> There, the district court found that the employer was liable under the FLSA because, although the employer's upper echelon management encouraged accurate timekeeping, the plaintiffs' immediate supervisors directed them to perform off-the-clock work. *Id. at 827*. The employer appealed, arguing that it could not have violated the FLSA because it had no knowledge of the unreported overtime. *Id.* But, the former Fifth Circuit rejected that argument, reasoning that the employer "cannot disclaim knowledge when certain segments of its management squelched truthful responses." *Id. at 828*. The court concluded that "[b]ecause the immediate supervisors were primarily responsible for the employees' failing to report all overtime, . . . they may have had actual knowledge of the unreported overtime." *Id. at 828*. "At the very least,' the court explained, "[the employer] had constructive knowledge, for they had the opportunity to get truthful overtime reports but opted to encourage artificially low reporting instead." Accordingly, the court ruled that the district court did not err in finding that the employer had knowledge of the plaintiffs' **[*12]** overtime. *Id. at 827*.

In light of *Brennan* and analogous cases, I concluded that Ms. Richardson's knowledge of Mr. Clark's overtime work was imputable to Alliance. *Id.* at 28. I reasoned, *id.*:

> Here, there is no dispute that Ms. Richardson acted as Mr. Clark's direct supervisor for the entirety of his employment at Alliance. ECF 28-1 at 82, No. 6. Therefore, pursuant to the Handbook, Ms. Richardson was responsible for setting Mr. Clark's hours and for authorizing his overtime hours. *Id.* at No. 8; *see also* ECF 36-1 at 57. Both Ms. Richardson and Mr. Clark testified that Ms. Richardson informed Mr. Clark that he would not be compensated for overtime work. *See* ECF 28-2 at 13, Tr. 49; ECF 29-1 at 14-15, Tr. 106-113. And, Ms. Malone admits that she never checked with Mr. Gordon to determine the accuracy of his timekeeping sheets. ECF 28-3 at 24. Therefore, there is no genuine dispute of fact that Alliance had actual or constructive notice that Mr. Clark was working uncompensated overtime.

Nonetheless, I found that Mr. Clark was not entitled to summary judgment "because there is a genuine issue of fact concerning the number of hours of work that he performed but for which he was not paid." ECF 40 at 28. Accordingly, **[*13]** I denied plaintiffs' summary judgment motion as to Mr. Clark. *See* ECF 41.

The Motion to Reconsider followed on February 18, 2020. ECF 42.

II. Standards of Review

Although Alliance cites only *Local Rule 105.10* in its Motion, a motion to reconsider an interlocutory order such as one denying summary judgment is governed by *Rule 54(b) of the Federal Rules of Civil Procedure*. *See* *U.S. Tobacco Coop., Inc. v. Big S. Wholesale of Va., LLC, 899 F.3d 236, 256 (4th Cir. 2018)*; *Carlson v. Bos. Sci. Corp., 856 F.3d 320, 325 (4th Cir. 2017)*; *Am. Canoe Ass'n v. Murphy Farms, Inc., 326 F.3d 505, 514-15 (4th Cir. 2003)*.[3] Under *Rule 54(b)*, any order "that adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties . . . may be revised at any time before the entry of a judgment adjudicating all the claims and all the parties' rights and liabilities."

The Fourth Circuit has distinguished between *Rule 54(b)* and *Rule 59(e)*, which governs reconsideration of final judgments, explaining that *Rule 54(b)* "involves broader flexibility" to account for new facts and arguments as the litigation unfolds. *See* *Carlson, 856 F.3d at 325*; *Am. Canoe Ass'n, 326 F.3d at 514-15*. However, the Fourth Circuit has admonished that "the discretion afforded by *Rule 54(b)* 'is not limitless,'" and the Court has "'cabined revision pursuant to *Rule 54(b)* by treating interlocutory rulings as law of the case.'" *Tobacco Coop., 899 F.3d at 256* (quoting *Carlson, 856 F.3d at 325*).

The law of the case doctrine "generally provides that 'when a court decides upon a rule of law, that decision should continue to govern the same issues in subsequent stages in the same case.'" **[*14]** *Musacchio v. United States, __ U.S. __, 136 S. Ct. 709, 716, 193 L. Ed. 2d 639 (2016)* (quoting *Pepper v. United States, 562 U.S. 476, 506, 131 S. Ct. 1229, 179 L. Ed. 2d 196 (2011))*; *accord* *Arizona v. California, 460 U.S. 605, 618, 103 S. Ct. 1382, 75 L. Ed. 2d 318 (1983)*; *Graves v. Lioi, 930 F.3d 307, 318 (4th Cir. 2019)*; *Carlson, 856 F.3d at 325*; *TFWS, Inc. v. Franchot, 572 F.3d 186, 191 (4th Cir. 2009)*. The doctrine's effect is to bar a party from resurrecting issues that were previously decided or "'decided by necessary implication.'" *United States v. Lentz, 524 F.3d 501, 528 (4th Cir. 2008)* (quoting *Sejman v. Warner-Lambert Co., Inc., 845 F.2d 66, 69 (4th Cir. 1988))*. In so doing, the law of the case doctrine advances the interests of efficiency, judicial economy, and finality. *See* *Christianson v. Colt Indus. Oper. Corp., 486 U.S. 800, 816, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1988)* (observing that the doctrine safeguards the "efficiency of the judicial process by protecting against the agitation of settled issues"); *United States v. Philip Morris USA Inc., 801 F.3d 250, 257, 419 U.S. App. D.C. 273 (D.C. Cir. 2015)* (noting that the law of the case "reflects the understanding that 'inconsistency is the antithesis of the rule of law'") (citation and alteration omitted).

When applied to a court's prior interlocutory rulings, the law of the case doctrine "is not an 'inexorable command' but rather a prudent judicial response to the public policy favoring an end to litigation." *Sejman, 845 F.2d at 68*

---

[3] Plaintiffs filed the Motion pursuant to *Local Rule 105.10*. With exceptions not applicable here, *Local Rule 105.10* provides that "any motion to reconsider any order issued by the Court shall be filed with the Clerk not later than fourteen (14) days after entry of the order." There is no contention here that the Motion is untimely.

(citation omitted). Accordingly, the Fourth Circuit has instructed that a court should revise an interlocutory order only to account for "'(1) a subsequent trial producing substantially different evidence; (2) a change in applicable law; or (3) clear error causing manifest injustice.'" *Tobacco Coop., 899 F.3d at 256* (quoting *Carlson, 856 F.3d at 325*). In this setting, the Fourth Circuit has colorfully explained that to be clearly erroneous the decision cannot **[*15]** be "'just maybe or probably wrong; it must . . . strike [the court] as wrong with the force of a five-week-old, unrefrigerated dead fish.'" *TFWS, Inc., 572 F.3d at 194* (first alteration in original) (citation omitted). In short, the decision must be "'dead wrong.'" *Id.* (citation omitted).

III. Discussion

Alliance assigns no error to the Court's Order denying summary judgment to Mr. Clark with respect to his FLSA claim. Nor does the Company quarrel with the Court's determination that there is a genuine dispute of material fact as to whether Mr. Clark performed unpaid overtime work and, if so, how many hours he worked. Rather, Alliance takes issue with the Court's analysis in the Memorandum Opinion concerning the Company's knowledge of Mr. Clark's uncompensated work. ECF 42 at 1-2.

In particular, Alliance contends that it is "unclear" whether the Court has precluded it from arguing at trial that Ms. Richardson's knowledge of Mr. Clark's unpaid work is not imputable to the Company because Ms. Richardson had no authority to direct Mr. Clark to underreport his hours. ECF 42-1 at 6. If the answer is "yes," *i.e.*, if the Company is foreclosed from making that argument, then the Company urges the Court to set aside that **[*16]** ruling. *See id.* at 9-13. According to Alliance, it should be able to argue to a jury that because the Handbook stripped Ms. Richardson of authority to instruct Mr. Clark to work off the clock, and because Mr. Clark knew Ms. Richardson lacked such authority, Ms. Richardson's knowledge of Mr. Clark's unpaid overtime cannot be imputed to the Company. *See id.*

In plaintiffs' view, "[t]here is nothing to clarify or reconsider." ECF 43 at 2. They argue that Ms. Richardson had actual authority over Mr. Clark's hours, and that Mr. Clark understood Ms. Richardson merely to be conveying Ms. Malone's directive. *Id.* at 1-2. Therefore, plaintiffs maintain that it is "uncontested" that "Ms. Richardson had knowledge of Mr. Clark's overtime hours worked, which knowledge is imputed to Defendant." *Id.* at 2.

To start, in the Memorandum Opinion, I squarely rejected the Company's reliance on agency principles. In my view, the Memorandum Opinion was clear: "Defendant's contention that it is insulated from liability because Ms. Richardson lacked actual or apparent authority to instruct Mr. Clark to manipulate his timesheets is not persuasive." ECF 40 at 26. I explained that courts have consistently held that where a supervisor encourages **[*17]** subordinates to falsify their time records, the supervisor's knowledge of unpaid work is imputable to the employer. *See id.* That was the case here, I observed, because, "pursuant to the Handbook, Ms. Richardson was responsible for setting Mr. Clark's hours and for authorizing his overtime hours" and "[b]oth Ms. Richardson and Mr. Clark testified that Ms. Richardson informed Mr. Clark that he would not be compensated for overtime work." *Id.* at 28.

Therefore, I found that "there is no genuine dispute of fact that Alliance had actual or constructive notice that Mr. Clark was working uncompensated overtime." *Id.* In this respect, the Memorandum Opinion needs no clarification. Accordingly, I turn to consider whether to revise my conclusion that Alliance in fact knew of Mr. Clark's unpaid work.

There is no claim of an intervening change in the law, and no presentation of new evidence, Therefore, I must determine whether my analysis amounted to clear error causing manifest injustice. *See Henslee v. Union Planters Nat. Bank & Tr. Co., 335 U.S. 595, 600, 69 S. Ct. 290, 93 L. Ed. 259, 1949-1 C.B. 223 (1949)* (Frankfurter, J., dissenting) ("Wisdom too often never comes, and so one ought not to reject it merely because it comes late.").

The FLSA provides that "no employer shall employ" a covered employee in excess of forty **[*18]** hours in a given week unless the employee is paid at "a rate not less than one and one-half times the regular rate at which he is employed" for each additional hour worked. *29 U.S.C. § 207(a)(1)*; *see Encino Motorcars, LLC v. Navarro, __ U.S. __, 136 S. Ct. 2117, 2121, 195 L. Ed. 2d 382 (2016)*; *U.S. Dep't of Labor v. Fire & Safety Investigation Consulting Servs., LLC, 915 F.3d 277, 280 (4th Cir. 2019)*. To "employ" is defined in the FLSA as "to suffer or permit to work." *29 U.S.C. § 203(g)*. The employer's knowledge of the work is an element of a FLSA claim that the plaintiff must establish to recover. *See* Bailey v. Cty. of Georgetown, 94 F.3d 152, 157 (4th Cir. 1996); Pforr v. Food Lion, Inc., 851 F.2d 106, 108 (4th Cir. 1988); Davis v. Food Lion, 792 F.2d 1274 (4th Cir. 1986).

The broad definition of "employ" places the onus on the employer to "exercise its control and see that the work is not performed if it does not want it to be performed." 29 C.F.R. § 785.13. Thus, employers must "pay for all work they know about, even if they did not ask for the work, even if they did not want the work done, and even if they had a rule against doing the work." Allen v. City of Chicago, 865 F.3d 936, 938 (7th Cir. 2017); *see also* Chao v. Gotham Registry, Inc., 514 F.3d 280, 288 (2d Cir. 2008) (collecting cases). Conversely, the law "'stops short of requiring the employer to pay for work it did not know about, and had no reason to know about.'" Allen, 865 F.3d at 938 (citation omitted). In other words, an employer is liable under the FLSA only if it had actual or constructive knowledge of the employee's overtime work. *Id.*

In assessing whether a plaintiff has met his burden, courts have regularly found that a supervisor's knowledge of the plaintiff's overtime **[*19]** work is imputable to the employer. *See* ECF 40 at 26-27 (collecting cases). For example, in Allen v. Board of Public Education, 495 F.3d 1306 (11th Cir. 2007), the Eleventh Circuit held that several plaintiffs had raised a genuine issue of material fact as to the employer's actual knowledge of unpaid work where their supervisor told them that they could not be paid overtime but observed them working beyond their scheduled hours. Id. at 1319. Similarly, in Kuebel v. Black & Decker, 643 F.3d 352 (2d Cir. 2011), the Second Circuit found the plaintiff had raised a genuine issue of fact as to the employer's knowledge where he testified, *inter alia*, that supervisors instructed him not to record more than forty hours per week. Id. at 356-57, 365. Notably, the employers in these cases implemented policies to promote compliance with the FLSA. *See, e.g.*, Kuebel, 643 F.3d at 356 (requiring employees to accurately record their hours and encouraging employees to report violations of company policies).

Alliance concedes that the decisions are "similar" in that the employers in those cases had policies requiring accurate timekeeping. ECF 42-1 at 11. But, the Company seeks to distinguish this case, asserting that "none of the employers in the precedent decisions had policies in place that expressly deprived supervisors of the authority to instruct an employee to not **[*20]** record all overtime hours." *Id.* As a result, "none of these cases discuss the legal doctrine of actual/apparent authority." *Id.* In contrast, the Company maintains that "Alliance not only has demonstrated that it denied this authority to its managers, Alliance also has demonstrated that Mr. Clark knew about this limitation on authority, and he understood it." *Id.* It follows, Alliance contends, that a jury should decide whether Ms. Richardson's knowledge can be imputed to the Company, given that she exceeded the scope of her authority when she instructed Mr. Clark to undercount his hours. *See id.* at 13.

It is true that federal statutes are ordinarily read against a backdrop of common law agency principles. *See* Krakauer v. Dish Network, LLC, 925 F.3d 643, 659 (4th Cir. 2019) (assuming that "federal statutes are written with familiar common law agency principles in mind"); *see, e.g.*, Campbell-Ewald Co. v. Gomez, 577 U.S. 153, 136 S. Ct. 663, 674, 193 L. Ed. 2d 571 (2016) (applying "federal common-law principles of agency" to the Telephone Consumer Protection Act); Vance Ball State Univ., 570 U.S. 421, 428, 133 S. Ct. 2434, 186 L. Ed. 2d 565 (2013) (Title VII); Clackamas Gastroenterology Assocs., P.C. v. Wells, 538 U.S. 440, 444-45, 123 S. Ct. 1673, 155 L. Ed. 2d 615 (2003) (ADA); Nationwide Mut. Ins. Co. v. Darden, 503 U.S. 318, 323, 112 S. Ct. 1344, 117 L. Ed. 2d 581 (1993) (ERISA); Am. Soc. of Mech. Eng'rs, Inc. v. Hydrolevel Corp., 456 U.S. 556, 567, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982) (***antitrust law***). Yet, because "'federal statutes are generally intended to have uniform nationwide application,'" courts apply a "federal rule of agency," not state law. Community for Creative Non-Violence v. Reid, 490 U.S. 730, 739-40, 109 S. Ct. 2166, 104 L. Ed. 2d 811 (1989) (citation omitted). For guidance, courts turn to the Restatement of Agency. *See* Burlington Indus. v. Ellerth, 524 U.S. 742, 755, 118 S. Ct. 2257, 141 L. Ed. 2d 633 (1998) **[*21]** (describing the Restatement as a "useful beginning point for a discussion of general agency principles"); Hodgin v. UTC Fire & Sec. Ams. Corp., 885 F.3d 243, 252 (4th Cir. 2018) (observing that "courts have traditionally looked to the Restatement of Agency" to derive a federal common law of agency).

Under traditional principles of agency law, the agent acts as a representative of the principal, who, in turn, has the right to control the agent's actions. *See* RESTATEMENT (THIRD) OF AGENCY § 1.01 cmt. c (2006). An agency relationship can arise in one of two ways: actual or apparent authority. A principal confers actual authority on an agent when "the agent reasonably believes, in accordance with the principal's manifestations to the agent, that the principal wishes the agent so to act." *Id.* § 2.01. An agency relationship predicated on apparent authority is formed "when a third party reasonably believes the actor has authority to act on behalf of the principal and that belief is traceable to the principal's manifestations." *Id.* § 2.03.

As a result of the agency relationship, the legal consequences of an agent's actions are attributable to the principal when the agent acts within the scope of his or her authority. *Id.* § 7.04 cmt. b; *see, e.g.*, Meyer v. Holley, 537 U.S. 280, 285, 123 S. Ct. 824, 154 L. Ed. 2d 753 (2003) (discussing applicability of vicariously liability principles to Fair Housing Act) **[*22]** . The rule "creates incentives for a principal to choose agents carefully and to use care in delegating functions to them." *RESTATEMENT, supra, § 5.03 cmt. b*.

According to the Restatement, an employee "acts within the scope of employment when performing work assigned by the employer or engaging in a course of conduct subject to the employer's control." *Id.* § 7.07. In contrast, an "employee's act is not within the scope of employment when it occurs within an independent course of conduct not intended by the employee to serve any purpose of the employer." *Id.* Notably, the Restatement teaches that "conduct is not outside the scope of employment merely because an employee disregards the employer's instructions." *Id.* cmt. c. For instance, if a delivery company directs its employee to transport a package with instructions to drive the speed limit and the employee speeds resulting in an accident, the company is nonetheless liable because the employee's conduct "is compatible with acting in an assigned role to do an assigned task." *Id.*

Generally, where the agent acquires information in furtherance of the agent-principal relationship, that knowledge is deemed known by the principal. *Id.* § 5.03; *see, e.g.*, Am. Sur. Co. v. Pauly, 170 U.S. 133, 153, 18 S. Ct. 552, 42 L. Ed. 977 (1898) ("It is the rule that the **[*23]** knowledge of the agent is the knowledge of his principal . . . ."). The Restatement, however, imposes two limitations on the imputation principle. First, "[t]he scope of an agent's duties delimits the content of knowledge that is imputed to the principal." *RESTATEMENT, supra, § 5.03*. Thus, an agent's knowledge that he "acted or intends to act in a manner unauthorized by the principal is not imputed to the principal." *Id.* Similarly, an agent's knowledge is "not imputed to the principal if the agent acts adversely to the principal in a transaction or matter, intending to act solely for the agent's own purposes or those of another person." *Id.* § 5.04. Second, even if knowledge lies within the scope of an employee's duties, it is imputed to the principal only if material to the agent's duties. *Id.* Stated differently, the employee's knowledge of a fact may be imputed to the employer only if it is of import to the agent's duties.

Although neither party addresses the applicability of agency principles to the FLSA, the Supreme Court has instructed that "'[i]n order to abrogate a common-law principle, the statute must speak directly to the question addressed by the common law.'" *United States v. Bestfoods, 524 U.S. 51, 63, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)* (alteration in *Bestfoods*) (quoting *United States v. Texas, 507 U.S. 529, 534, 113 S. Ct. 1631, 123 L. Ed. 2d 245 (1993)*). Therefore, **[*24]** a federal statute will not displace traditional agency principles absent clear indication from Congress. *See, e.g.*, *In re Crescent City Estates, LLC, 588 F.3d 822, 826 (4th Cir. 2009)* (finding that fee-shifting provision in removal statute clearly replaced the American Rule); *DiFelice v. U.S. Airways, Inc., 397 F. Supp. 2d 758, 780 (E.D. Va. 2005)* (concluding that ERISA supplanted traditional agency principles because it directly addresses the liability of a fiduciary to plan members).

The FLSA is silent with regard to agency principles; it evinces no congressional intent to supersede agency common law. And, notably, other courts have applied the rules of agency to the FLSA, albeit in circumstances different from those presented here. *See* *Arriaga v. Fla. Pac. Farms, LLC, 305 F.3d 1228, 1244-45 (11th Cir. 2002)* (concluding that the FLSA did not require farm owners to reimburse farmworkers for fees charged by recruiters where the allegations failed to support the creation of apparent authority between the farm owners and recruiters); *see also* *Ulloa v. Fancy Farms, Inc., 762 F. App'x 859, 866 (11th Cir. 2019)*. Accordingly, Alliance is correct that the FLSA does not supersede agency common law.

To be sure, the existence of an agent-principal relationship and the scope of an agent's authority are factual questions and so are ordinarily within the purview of the factfinder. *See, e.g.*, *Ashland Facility Operations, LLC v. NLRB, 701 F.3d 983 (4th Cir. 2012)* (citing *Metco Prods., Inc. v. NLRB, 884 F.2d 156, 159 (4th Cir. 1989)*). Here, however, it is undisputed that Alliance delegated to Ms. Richardson **[*25]** the authority to supervise Mr. Clark, which included the extent of any overtime he worked.

The Handbook states: "All overtime requires the prior approval of the Associate's Supervisor or Manager." ECF 36-1 at 57. Indeed, the Handbook warns: "Associates who work overtime without prior approval . . . may be subject to disciplinary action up to and included termination for violating the prior approval requirement." *Id.* Moreover, Ms. Karl acknowledged during her deposition that, according to Company policy, Mr. Clark would check with Ms. Richardson, not with her or Ms. Malone, for approval to work more than forty hours in a week. ECF 28-1 at 33, Tr. 46. Thus, there can be no dispute that Ms. Richardson had actual authority to manage Mr. Clark's hours, including the decision to permit Mr. Clark to work overtime.

Alliance disputes the conclusion that Ms. Richardson's knowledge can be imputed to it, insisting that the Handbook deprived Ms. Richardson of the authority to require Mr. Clark to falsify his timesheets, and Mr. Clark knew that such a command contravened Company policy. *See* ECF 42-1 at 7. Certainly, Alliance is correct that, pursuant to the Handbook, Ms. Richardson's alleged conduct **[*26]** violated its policies. *See* 36-1 at 57 (stating that "[w]orking off the clock is prohibited, and no manager has the authority to require any Associate to do so"). But, Alliance misses the proverbial forest for the trees. Whether Ms. Richardson's knowledge of Mr. Clark's unpaid work is imputable to Alliance turns on whether Ms. Richardson had authority over Mr. Clark's hours generally, not her authority specifically to direct Mr. Clark to work-off-the-clock.

It is illustrative to consider two hypothetical scenarios. First, imagine that Ms. Richardson tells Mr. Clark not to record his hours and he listens, but Ms. Richardson and Mr. Clark are similarly situated peers, not supervisor and subordinate. In that circumstance, Ms. Richardson is not an agent of Alliance with respect to Mr. Clark's hours; she can neither limit him to forty hours of work nor order him to work in excess of forty hours. Consequently, her knowledge of Mr. Clark's unpaid labor would not be imputable to the Company. In another scenario, Ms. Richardson, as Mr. Clark's supervisor, learns that Mr. Clark is consistently working unrecorded overtime and makes no effort to stop him from doing so, nor does she ensure the accuracy **[*27]** of his timesheets. In that circumstance, Ms. Richardson's knowledge is plainly imputable to the Company: Alliance delegated control of Mr. Clark's hours to Ms. Richardson and so Ms. Richardson's knowledge of Mr. Clark's overtime is within the scope of her authority. That is so even if she never discussed overtime with Mr. Clark. In sum, Ms. Richardson's authority to order Mr. Clark to work-off-the-clock is immaterial; what matters is her authority to control Mr. Clark's work hours.

Notably, Alliance has not cited a FLSA decision that supports its position that where supervisors act in violation of the employer's policies, their conduct is not imputable. Nor has the Court uncovered such a case. To the contrary, those courts that have considered the issue focus on whether the knowledgeable individual was a manager, not the precise scope of his or her authority. *See, e.g.*, *Bailey v. TitleMax of Ga., Inc., 776 F. 3d 797, 802 (11th Cir. 2015)* ("Knowledge may be imputed to the employer when its supervisors or management 'encourage artificially low reporting.'") (alteration and citation omitted); *Kuebel, 643 F.3d at 363-64* (observing that plaintiff asserted that "managers instructed him not to record more than forty hours per week" and that "it was [defendant], through its managers, **[*28]** that caused the inaccuracies in his timesheets"); *Allen, 495 F.3d at 1316* (finding genuine issue as to knowledge where employee's "supervisor told her that she could not be paid overtime, but observed her working beyond her scheduled hours"); *Forrester v. Roth's I.G.A. Foodliner, Inc., 646 F.2d 413, 414 (9th Cir. 1981)* ("any official" of the employer); *Brennan, 482 F. 2d at 828* ("immediate supervisor," or "management").

Moreover, Alliance's position is irreconcilable with the FLSA's capacious definition of "employ," which imposes on an employer a non-delegable duty to prevent unwanted work. *See* *Chao v. Gotham Registry, Inc., 514 F.3d 280, 288 (2d Cir. 2008)* ("An employer who has knowledge that an employee is working, and who does not desire the work be done, has a duty to make every effort to prevent its performance."); *Reich v. Dep't of Conservation & Nat. Res., 28 F.3d 1076, 1082 (11th Cir. 1994)* ("The reason an employee continues to work beyond his shift is immaterial; if the employer knows or has reason to believe that the employee continues to work, the additional hours must be counted."); *Forrester, 646 F.2d at 414* (holding that an employer "cannot stand idly by and allow an employee to perform overtime work without proper compensation").

And, Alliance's position is at odds with Department of Labor regulations, which make manifest that policies alone are insufficient to insulate an employer from FLSA liability. *See* 29 C.F.R. § 785.13 ("The mere promulgation of a rule against [unwanted] **[*29]** work is not enough. Management has the power to enforce the rule and must make every effort to do so."). Alliance offers no sound basis to distinguish its policy prohibiting management to order off-the-clock work from others, such as requiring employees to obtain preapproval to perform overtime, which courts have concluded does not discharge an employer's duty to account for all overtime work. *See* *Chao, 514 F.3d at 288-90*; *Reich, 28 F.3d at 1084*. Indeed, allowing Alliance to hide behind its Handbook would threaten to eviscerate the FLSA, as it would enable employers unofficially to pressure employees not to record overtime through management, but then defeat ensuing claims on the ground that its supervisors acted ultra vires.

However, after again combing through the parties' submissions, I am satisfied that there is a genuine dispute of material fact as to whether Ms. Richardson knew that Mr. Clark was not accurately recording his hours.

Ms. Richardson and Mr. Clark both testified that Ms. Richardson told Mr. Clark that he could not record more than forty hours per week, regardless of how much he actually worked. ECF 29-1 at 15, Tr. 110, 113. Further, Ms. Richardson testified that she knew Mr. Clark continued to work overtime following **[*30]** the conversation. *See* ECF 28-2 at 13, Tr. 48-49 (Ms. Richardson testifying that Mr. Clark "just worked the hours he needed to work without knowing that he could get paid for them").

On the other hand, in Alliance's opposition to plaintiff's motion for partial summary judgment (ECF 34), the Company challenged whether the conversation between Ms. Richardson and Mr. Clark in fact occurred, positing that the consistency of Mr. Clark's timekeeping practices throughout his employment at Alliance could lead a jury to "reasonably conclude that Richardson gave no instruction to Clark to not record more than 40 hours of work in a week." *Id.* at 37; *see* ECF 29-1 at 19, Tr. 129 (admission of Mr. Clark during his deposition that his timekeeping practices remained unchanged following his conversation with Ms. Richardson).[4]

The dispute turns on credibility. Accordingly, it must be decided by the fact finder, not the court on summary judgment. *See* *Wilson v. Prince George's Cty., 893 F.3d 213, 218-19 (4th Cir. 2018)*; *Black & Decker Corp. v. United States, 436 F.3d 431, 442 (4th Cir. 2006)*.

In sum, there is no dispute that Alliance charged Ms. Richardson with supervising Mr. Clark, including his work hours. Therefore, under settled agency principles, Ms. Richardson's knowledge of Mr. Clark's unpaid overtime is attributable to Alliance *if*, in fact, she **[*31]** had such knowledge. Thus, plaintiffs must prove at trial that Ms. Richardson knew that Mr. Clark was working unpaid overtime. It is for the jury to decide whether Ms. Richardson had knowledge of Mr. Clark's overtime work.

IV. Conclusion

For the foregoing reasons, I shall grant the Motion to Reconsider (ECF 42) in part and deny it in part. An Order follows, consistent with this Memorandum Opinion.

Date: April 29, 2020

/s/ Ellen L. Hollander

United States District Judge

ORDER

---

[4] Although the Company's contention is found only in the last sentence of the lengthy brief's penultimate page, it suffices to raise the issue of whether Ms. Richardson spoke with Mr. Clark's concerning his overtime.

For the reasons set forth in the accompanying Memorandum Opinion, it is this 29th day of April, 2020, by the United States District Court for the District of Maryland, **ORDERED**:

1) Defendant's Motion to Reconsider (ECF 42) is GRANTED in part and DENIED in part as follows:

a. The Court finds, based on undisputed facts, that Ms. Richardson had authority over Mr. Clark's overtime hours;

b. The Court finds that there is a genuine dispute of material fact as to whether Ms. Richardson had knowledge of Mr. Clark's overtime hours;

c. At trial, plaintiffs must prove that Ms. Richardson knew of Mr. Clark's overtime work in order for such knowledge to be imputed to Alliance; and

2) Counsel shall advise the Court by **May 18, 2020**, as to **[*32]** whether the parties wish to participate in a settlement conference before a magistrate judge.

/s/ Ellen Lipton Hollander

United States District Judge

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN1[] **Jury Trials, Right to Jury Trial**

Under California law, the right to a jury trial in a civil action may be afforded either by statute or by the California Constitution. As a general matter, the California Legislature has authority to grant the parties in a civil action the right to a jury trial by statute, either when the Legislature establishes a new cause of action or with respect to a cause of action that rests on the common law or a constitutional provision. Given the Legislature's broad general legislative authority under the California Constitution and in the absence of any constitutional prohibition, the

Legislature may extend the right to a jury trial to instances in which the state constitutional jury trial provision does not itself mandate a right to a jury trial. But even when the language and legislative history of a statute indicate that the Legislature intended that a cause of action established by the statute is to be tried by the court rather than a jury, if the California constitutional jury trial provision itself guarantees a right to a jury trial in such a cause of action, the Constitution prevails and a jury trial cannot be denied.

Civil Procedure > Remedies > Injunctions

Civil Procedure > Preliminary Considerations > Equity > Relief

***HN2*[]** **Remedies, Injunctions**

Actions seeking injunctive relief are equitable in nature.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > Business Torts > Unfair Business Practices > Remedies

***HN3*[]** **Deceptive & Unfair Trade Practices, State Regulation**

The language of *Bus. & Prof. Code, § 17206, subd. (b)*, clearly indicates that the amount of civil penalties is intended to be determined by the court.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Torts > Business Torts > Unfair Business Practices > Elements

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

***HN4*[]** **Deceptive & Unfair Trade Practices, State Regulation**

The exceedingly broad and general language that the Legislature incorporated in California's unfair competition law, *Bus. & Prof. Code, § 17200 et seq.*, to define the business practices that are proscribed by the statute — in the original language, "unfair or fraudulent business practice and unfair, untrue, or misleading advertising" — was adopted with the specific understanding that this broad language would be applied by a court of equity in determining whether a challenged business practice violated the statutory prohibition.

Civil Procedure > ... > Equity > Maxims > Remedy Principle

***HN5*[]** **Maxims, Remedy Principle**

When a scheme is evolved which on its face violates the fundamental rules of honesty and fair dealing, a court of equity is not impotent to frustrate its consummation because the scheme is an original one. There is a maxim as old as law that there can be no right without a remedy, and in searching for a precise precedent, an equity court must not lose sight, not only of its power, but of its duty to arrive at a just solution of the problem.

Civil Procedure > Preliminary Considerations > Equity

HN6[] **Preliminary Considerations, Equity**

Equity is much more elastic and capable of expansion and extension to new cases than the common law. Its very central principles, its foundation upon the eternal verities of right and justice, its resting upon the truths of morality rather than arbitrary customs and rigid dogmas, necessarily gave it this character of flexibility, and permitted its doctrines to be enlarged so as to embrace new cases as they constantly arose. It has, therefore, as an essential part of its nature, a capacity of orderly and regular growth, — a growth not arbitrary, according to the will of individual judges, but in the direction of its already settled principles. It is ever reaching out and expanding its doctrines so as to cover new facts and relations, but still without any break or change in the principles or doctrines themselves. The tradition and heredity of the flexible equitable powers of the modern trial judge derive from the role of the trained and experienced chancellor and depend upon skills and wisdom acquired through years of study, training and experience which are not susceptible of adequate transmission through instructions to a lay jury.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Torts > Business Torts > Unfair Business Practices

Governments > Courts > Judicial Precedent

HN7[] **Deceptive & Unfair Trade Practices, State Regulation**

In view of the similarity of language and obvious identity of purpose of *15 U.S.C. § 45(a)* and *Bus. & Prof. Code, § 17200*, decisions of the federal courts on the subject of unfair competition are more than ordinarily persuasive.

Torts > Business Torts > Unfair Business Practices > Elements

HN8[] **Unfair Business Practices, Elements**

Any finding of unfairness to competitors under *Bus. & Prof. Code, § 17200*, must be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. Thus, when a plaintiff who claims to have suffered injury from a direct competitor's unfair act or practice invokes *§ 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > Business Torts > Unfair Business Practices > Elements

HN9[] **Jury Trials, Province of Court & Jury**

It is clear from both the language and nature of the test for unfairness to competitors under *Bus. & Prof. Code, § 17200* — that is, whether the challenged business practice threatens an incipient violation of an ***antitrust law*** or violates the policy or spirit of one of those laws — that such a standard is one that may reasonably be applied only by a court. This standard is too indeterminate to be adequately conveyed by jury instructions or applied by a jury.

This test is limited to the context of an action by a competitor alleging anticompetitive practices and does not apply to actions by consumers or by competitors alleging other kinds of violations of California's unfair competition law, *Bus. & Prof. Code, § 17200 et seq.*

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > Business Torts > Unfair Business Practices > Elements

Governments > State & Territorial Governments > Claims By & Against

***HN10*[]** **Jury Trials, Province of Court & Jury**

Both (1) the fact that the cause of action under California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, originated solely as an action to enjoin an unfair or misleading business practice — an equitable action triable only by a court and not a jury — and (2) the fact that the broad and general standard of unfair competition that was incorporated into the statute contemplated that the standard would be applied by a court exercising its traditional, flexible equitable authority rather than by a jury, support the conclusion that the Legislature, in enacting the UCL, intended that a cause of action under the UCL would be tried by the court and not a jury, even when the government seeks civil penalties as well as injunctive relief.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Torts > Business Torts > Unfair Business Practices > Elements

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

***HN11*[]** **Deceptive & Unfair Trade Practices, State Regulation**

The nature of the principal issue presented in a great many actions under California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, supports the conclusion that such causes of action were intended to be decided by the court rather than a jury. Such cases often concern a nuanced and qualitative determination regarding whether a business practice should properly be considered unfair or deceptive within the meaning of the UCL. This type of qualitative determination — often requiring the consideration of a variety of factors or circumstances identified in prior cases in California or other jurisdictions or in administrative guidelines developed by the Federal Trade Commission or other consumer protection administrative agencies — is the type of decision that has traditionally been viewed as the province of courts rather than juries. Moreover, the overarching legislative concern in enacting the UCL is to provide a streamlined procedure for the prevention of ongoing or threatened acts of unfair competition, an objective that is inconsistent with the unavoidable delays and increased costs inherent in a jury, as compared to a court, trial.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > Business Torts > Unfair Business Practices

Governments > State & Territorial Governments > Claims By & Against

***HN12*[]** **Jury Trials, Province of Court & Jury**

The Legislature intended that a cause of action under California's unfair competition law, *Bus. & Prof. Code, § 17200 et seq.* — including an action brought by the government that seeks both injunctive relief and civil penalties — is to be tried by the court rather than by a jury.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN13[] **False Advertising, State Regulation**

California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, has been accurately described as the major California legislation designed to protect consumers from false or deceptive advertising. The procedures set forth in the FAL and in California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, are in many respects parallel to one another, and the UCL specifically provides that any practice that violates the FAL is also prohibited by the UCL.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Civil Procedure > Preliminary Considerations > Equity > Relief

HN14[] **False Advertising, State Regulation**

In the absence of a restriction as to the power of the trial court to order restitution, a court of equity may exercise the full range of its inherent powers in order to accomplish complete justice between the parties, restoring if necessary the status quo ante as nearly as may be achieved. In an action by the California Attorney General under *Bus. & Prof. Code, § 17535*, a trial court has the inherent power to order, as a form of ancillary relief, that the defendants make or offer to make restitution to the customers found to have been defrauded. A civil action under California's false advertising law (*Bus. & Prof. Code, § 17500 et seq.*) is an equitable action triable to the court.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN15[] **False Advertising, State Regulation**

The California Attorney General has only one cause of action against a defendant for violating *Bus. & Prof. Code, § 17500*, but the amount of civil penalties which may be imposed under *Bus. & Prof. Code, § 17536*, is dependent upon the number of violations committed by a defendant. Because the cause of action for violating *§ 17500* is an equitable action, the clear implication is that even when the Attorney General or a district attorney seeks civil penalties as well as injunctive relief in such an action, the action under California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, remains an equitable action, and, as such, is to be tried by the court, rather than by a jury. The amount of civil penalties under the FAL is to be determined by the court, not by a jury.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN16[] **False Advertising, State Regulation**

Like the choice of the term "unfair" in California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, the governing substantive standard of California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.* — prohibiting advertising that is "untrue or misleading" (*§ 17500*) — is set forth in broad and open-ended language that is intended to permit a court of equity to reach any novel or creative scheme of false or misleading advertising that a deceptive business may devise. The FAL prohibits not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public. Thus, to state a claim under either the UCL or the false advertising law, based on false advertising or promotional practices, it is necessary only to show that members of the public are likely to be deceived.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN17[] **False Advertising, State Regulation**

The broad reach and scope of the "untrue or misleading" standard of California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, is often framed in language (whether members of the public are likely to be deceived) that is not, on its face, beyond the ken of a jury. As employed in the FAL (as well as in California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, however, a determination that advertising poses a sufficient risk or tendency to deceive or confuse the public may potentially result in an injunctive order prohibiting what may be a common and widely utilized advertising, labeling, or promotional practice. In the FAL and UCL settings, this standard — whether members of the public are likely to be deceived — has been understood to call for the exercise of the type of equitable discretion and judgment traditionally employed by a court of equity.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN18[] **False Advertising, State Regulation**

The crucial issue in cases under California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, does not typically involve the type of ordinary factfinding assigned to a jury, but rather calls for an equitable judgment to determine whether an often undisputed advertising or promotional practice presents a sufficient tendency to deceive or confuse the public so as to support invocation of the FAL's remedies. As the breadth of the cases arising under the FAL attests, this determination calls for consideration of a wide variety of factors that prior cases and past administrative experience have shown may render an affirmative statement (or a failure to disclose) in a product label, packaging, or in other advertising or promotional practices misleading in a particular context. Given the capacity of the FAL's standard to be applied expansively to encompass all of the novel ways in which advertising or promotional material may be misleading, it is important that trial courts are required to set forth their reasoning for a determination that the FAL has been violated so that a body of precedent can evolve to inform businesses of advertising practices they must avoid.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > US Federal Trade Commission

HN19[] **False Advertising, State Regulation**

The complexities and nuances that are often involved in the determination whether an advertisement should properly be considered untrue or misleading for purposes of California's false advertising law, *Bus. & Prof. Code, §*

17500 et seq., are often ameliorated by judicial reference to the relevant guidelines developed by the U.S. Federal Trade Commission (FTC) regarding deceptive advertising. The great variety and complexity of contexts in which the potentially misleading nature of advertising may arise and must be evaluated can be gleaned from a simple listing of the numerous guidelines that the FTC has published relating to deceptive advertising.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN20[] False Advertising, State Regulation

The determination whether an advertising or promotional practice should properly be found untrue or misleading within the meaning of California's false advertising law, Bus. & Prof. Code, § 17500 et seq., depends upon the exercise of the type of equitable discretion and judgment typically employed by a court of equity.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN21[] False Advertising, State Regulation

Decisions under California's false advertising law, Bus. & Prof. Code, § 17500 et seq., have made clear the propriety and importance of a court's exercise of its equitable authority not only in determining whether an advertisement is untrue or misleading, but also in determining (1) the number of violations for which a defendant may properly be held responsible; and (2) the reasonable amount of civil penalties to be imposed for each violation.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Governments > State & Territorial Governments > Claims By & Against

HN22[] False Advertising, State Regulation

The Legislature intended that the civil cause of action embodied in California's false advertising law (FAL), Bus. & Prof. Code, § 17500 et seq., would be tried by a court of equity rather than by a jury in all FAL actions, including instances in which the California Attorney General or another governmental entity seeks civil penalties for a violation of the FAL as well as injunctive relief.

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN23[] Fundamental Rights, Trial by Jury in Civil Actions

Cal. Const., art. I, § 16 — the jury trial provision — states in part that trial by jury is an inviolate right and shall be secured to all. This provision was intended to preserve the right to a civil jury as it existed at common law in 1850 when the jury trial provision was first incorporated into the California Constitution. The right to trial by jury guaranteed by the California Constitution is the right as it existed at common law at the time the Constitution was adopted. It is the right to trial by jury as it existed at common law which is preserved; and what that right is, is a purely historical question, a fact which is to be ascertained like any other social, political or legal fact. The right is the historical right enjoyed at the time it was guaranteed by the Constitution. The California Constitution essentially preserves the right to a jury in those actions in which there was a right to a jury trial at common law at the time the Constitution was first adopted.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN24[] **Right to Jury Trial, Actions in Equity**

As a general matter, the California Constitution affords a right to a jury trial in common law actions at law that were triable by a jury in 1850, but not in suits in equity that were not triable by a jury in 1850. In applying this test, the cases have explained that the form or title of a statutory cause of action is not controlling and that if the substance of the cause of action is one that would have been triable by a jury at common law, there is a right to a jury trial even if the statute's designation might suggest that it is an equitable proceeding. In determining whether the action was one triable by a jury at common law, the court is not bound by the form of the action but rather by the nature of the rights involved and the facts of the particular case — the gist of the action. A jury trial must be granted where the gist of the action is legal, where the action is in reality cognizable at law.

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN25[] **Fundamental Rights, Trial by Jury in Civil Actions**

The constitutional right of trial by jury is not to be narrowly construed. It is not limited strictly to those cases in which it existed before the adoption of the California Constitution but is extended to cases of like nature as may afterwards arise.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN26[] **Right to Jury Trial, Actions in Equity**

When the legal and equitable causes of action or issues presented in a case are severable, a party retains the right to a jury trial of the severable legal issues and a court trial of the severable equitable issues.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN27[] **Right to Jury Trial, Actions in Equity**

When severable legal and equitable causes of action or issues are present in a single proceeding, the trial court generally has authority to determine in what order the matters should be heard, and if the equitable issue is tried by the court first and if the court's resolution of that issue determines a matter that would otherwise be resolved by a jury with regard to the legal claim or issue, the court's resolution of the matter will generally be binding and may leave nothing for a jury to resolve. And although a trial court retains discretion regarding the order in which the issues should be tried, the governing California cases express a preference that the equitable issues be tried first. This general "equity first preference" is a long standing feature of California law and has always been viewed as fully compatible with the right to jury trial embodied in the California Constitution.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN28[] **Right to Jury Trial, Actions in Equity**

Unlike proceedings in which multiple legal and equitable causes or issues are severable, when a cause of action involves legal and equitable aspects that are not severable California decisions have relied upon the gist of the action standard in determining whether the action should be considered legal or equitable for purposes of the constitutional jury trial issue. Although the legal or equitable nature of a cause of action ordinarily is determined by the mode of relief to be afforded, the prayer for relief in a particular case is not conclusive and the fact that damages is one of a full range of possible remedies does not guarantee the right to a jury.

Civil Procedure > Remedies > Damages > Monetary Damages

HN29[] **Damages, Monetary Damages**

The general rule is that monetary relief is a legal remedy, and an award of statutory damages may serve purposes traditionally associated with legal relief, such as compensation and punishment.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN30[] **False Advertising, State Regulation**

In light of the particular nature of the civil causes of action authorized by California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, the gist of a civil action under the UCL and FAL is equitable rather than legal in nature. Such causes of action are equitable either when brought by a private party seeking only an injunction, restitution, or other equitable relief or when brought by the California Attorney General, a district attorney, or other governmental official seeking not only injunctive relief and restitution but also civil penalties. Accordingly, there is no right to a jury trial in such actions under the California Constitution.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Governments > Courts > Common Law

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN31[] **False Advertising, State Regulation**

The statutory causes of action established by California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, are not of like nature or of the same class as any common law right of action. The UCL and FAL were enacted for the specific purpose of creating new rights and remedies that were not available at common law. The statutes deliberately broaden the types of business practices that can properly be found to constitute unfair competition and eliminate a number of elements that were required in common law actions for fraud. Furthermore, when the Legislature adopted the civil penalty provisions of the UCL and FAL, permitting government officials, and government officials alone, to seek civil penalties along with injunctive or other equitable relief in the civil actions such officials bring under the UCL and FAL, the causes of action under the UCL and FAL continued to constitute causes of action that were not of like nature or of the same class as any common law action.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Civil Procedure > Preliminary Considerations > Equity > Relief

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN32[] **False Advertising, State Regulation**

The legal and equitable aspects of actions brought under California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, are nonseverable not only because the determination whether a defendant's alleged conduct constitutes a violation of the statute provides the basis for all of the relief authorized by the statutes, but also because the amount of civil penalties that would be appropriate may well depend on the equitable remedies, including restitution, that are or are not imposed. With respect to the application of the gist of the action standard, the gist of the civil causes of action authorized by the UCL and FAL must properly be considered equitable, rather than legal, in nature. The bulk of the remedies provided for in the statutes — injunctive relief, restitution, and other clearly equitable remedies such as the appointment of a receiver — are clearly equitable in nature. As the legislative history of both the UCL and FAL make clear, the primary objective of both statutes is preventive, authorizing the exercise of broad equitable authority to protect consumers from unfair or deceptive business practices and advertising.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Governments > State & Territorial Governments > Claims By & Against

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN33[] **False Advertising, State Regulation**

Although California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, authorize in actions brought by the California Attorney General, a district attorney, or other government officials (but not private parties), the imposition of civil penalties — a type of remedy that in some contexts is properly considered legal in nature — the UCL and FAL statutes specify that in assessing the amount of the civil penalty to be imposed under these statutes, the court is afforded broad discretion to consider a nonexclusive list of factors that include the relative seriousness of the defendant's conduct and the potential deterrent effect of such penalties, the type of qualitative evaluation and weighing of a variety of factors that is typically undertaken by a court and not a jury. *Bus. & Prof. Code, §§ 17206*, *17536*. The civil penalties that may be awarded under the UCL and FAL, unlike the classic legal remedy of damages, are noncompensatory in nature; they require no showing of actual harm to consumers and are not based on the amount of losses incurred by the targets of unfair practices or misleading advertising.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Torts > Business Torts > Unfair Business Practices > Remedies

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN34[] **False Advertising, State Regulation**

Although civil penalties under California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, may have a punitive or deterrent aspect, their primary purpose is to secure obedience to statutes and regulations imposed to assure important public policy objectives. The focus of both statutory schemes is preventative. And the civil penalties obtained by the government in actions under the UCL and FAL are to be utilized for the enforcement of the statutes in question. The expansive and broadly worded substantive standards that are to be applied in determining whether a challenged business practice or advertising is properly considered violative of the UCL or FAL call for the exercise of the flexibility and judicial expertise and experience that was traditionally applied by a court of equity. Particularly in light of the equitable nature of the substantive standards that apply in UCL and FAL actions — both in actions brought by private parties and by government officials — the gist of the civil causes of action authorized by the UCL and FAL must properly be considered equitable in nature.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN35[] **False Advertising, State Regulation**

Under the California Constitution, there is no right to a jury trial in a cause of action under California's unfair competition law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law (FAL), *Bus. & Prof. Code, § 17500 et seq.*, including when the action is brought by a government official and seeks both injunctive relief and civil penalties. This conclusion does not deprive a defendant in a UCL or FAL action of any constitutional right afforded by the jury trial provision of the California Constitution. That constitutional provision grants the right to jury trial in actions of like nature or of the same class in which a jury trial was provided at common law in 1850, when the jury trial provision of the California Constitution was first adopted. The consumer protection actions authorized in the UCL and FAL are not of like nature or of the same class as an action that was triable by jury at common law. In actions like those under the UCL and FAL, in which the equitable and legal aspects are nonseverable, there is no constitutional right to a jury trial when the gist of the action is equitable rather than legal. In sum, there is no right to a jury trial under the California Constitution in a cause of action under the UCL or FAL, including an action in which civil penalties as well as an injunction or other equitable relief are sought.

Constitutional Law > State Constitutional Operation

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN36[] **Constitutional Law, State Constitutional Operation**

The federal civil jury trial provision of the Seventh *Amendment, U.S. Const., 7th* Amend., applies only to civil trials in federal court; federal decisions explicitly hold that the civil jury trial provision of the Seventh Amendment does not apply to state court proceedings. Instead, the right to jury trial in state court proceedings is governed by the provisions and judicial interpretation of each state's own constitutional jury trial provision.

Constitutional Law > State Constitutional Operation

Governments > Courts > Judicial Precedent

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN37[] **Constitutional Law, State Constitutional Operation**

In California, the constitutional right to a civil jury trial under the California Constitution is entirely independent of the federal constitutional civil jury trial right under the Seventh Amendment, as indicated in *Cal. Const., art. I, § 24*, and California cases have not hesitated to decline to follow the federal interpretation of the Seventh Amendment when the federal interpretation has been found inconsistent with a proper reading of the California provision.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN38[] **Right to Jury Trial, Actions in Equity**

When the legal and equitable aspects are severable, there is a preference for trying the equitable issues first. If common facts are resolved in a manner that obviates the need to try the legal issue, there is no right under the California Constitution to have the legal issues submitted to the jury. In cases in which a cause of action contains nonseverable legal and equitable aspects, California cases undertake a qualitative, holistic analysis of the action in its entirety to determine whether the gist of the action is legal or equitable, that is, whether the legal or equitable aspects predominate.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN39[] **False Advertising, State Regulation**

In causes of action under California's unfair competition law, *Bus. & Prof. Code, § 17200 et seq.*, and California's false advertising law, *Bus. & Prof. Code, § 17500 et seq.*, seeking injunctive relief and civil penalties, the gist of the actions is equitable, and there is no right to a jury trial in such actions under California law either as a statutory or constitutional matter.

Headnotes/Summary

Summary
[*279] CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court granted the People's motion to strike a jury demand as to causes of action under California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) in which both civil penalties and injunctive relief were sought. (Superior Court of Alameda County, No. RG15770490, George Hernandez, Jr., Judge.) The Court of Appeal, First Dist., Div. One, No. A150264, granted mandate relief.

The Supreme Court reversed the judgment of the Court of Appeal and remanded. The court held that there is no state constitutional right to a jury trial (*Cal. Const., art. I, § 16*) for causes of action under the UCL and the FAL because the gist of these causes of action is equitable and they differ significantly from actions triable by jury at common law. The Legislature intended that the causes of action be tried by the court even when the government seeks both civil penalties and injunctive relief because the UCL and the FAL provide for the exercise of broad equitable authority to protect consumers. Federal case law under *U.S. Const., 7th Amend.*, did not apply because California's civil jury trial right, construed independently (*Cal. Const., art. I, § 24*), requires a different analysis. (Opinion by Cantil-Sakauye, C. J., with Chin, Corrigan, and Groban, JJ., concurring. Concurring opinion by Kruger, J., with Liu and Cuéllar, JJ., concurring (see p. 334).)

Headnotes

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1)[] **(1)**

Jury § 7—Right to Jury Trial—Civil Cases—California Constitution and Statutes.

Under California law, the right to a jury trial in a civil action may be afforded either by statute or by the California Constitution. As a general matter, the California Legislature has authority to grant the parties in a civil action the right to a jury trial by statute, either **[*280]** when the Legislature establishes a new cause of action or with respect to a cause of action that rests on the common law or a constitutional provision. Given the Legislature's broad general legislative authority under the California Constitution and in the absence of any constitutional prohibition, the Legislature may extend the right to a jury trial to instances in which the state constitutional jury trial provision does not itself mandate a right to a jury trial. But even when the language and legislative history of a statute indicate that the Legislature intended that a cause of action established by the statute is to be tried by the court rather than by a jury, if the California constitutional jury trial provision itself guarantees a right to a jury trial in such a cause of action, the Constitution prevails and a jury trial cannot be denied.

CA(2)[] **(2)**

Equity § 5—Scope and Types of Relief—Injunctive Relief.

Actions seeking injunctive relief are equitable in nature.

CA(3)[] **(3)**

Unfair Competition § 10—Actions—Civil Penalties—Amount—Determination by Court.

The language of *Bus. & Prof. Code, § 17206, subd. (b)*, clearly indicates that the amount of civil penalties is intended to be determined by the court.

CA(4)[] **(4)**

Unfair Competition § 4—Acts Constituting—Unfair Business Practices—Determination by Court.

The exceedingly broad and general language that the Legislature incorporated in California's unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*) to define the business practices that are proscribed by the statute—in the original language, “unfair or fraudulent business practice and unfair, untrue, or misleading advertising”—was adopted with the specific understanding that this broad language would be applied by a court of equity in determining whether a challenged business practice violated the statutory prohibition.

CA(5)[] **(5)**

Equity § 6—Principles and Maxims—No Right Without Remedy.

When a scheme is evolved which on its face violates the fundamental rules of honesty and fair dealing, a court of equity is not impotent to frustrate its consummation because the scheme is an original one. There is a maxim as old as law that there can be no right without a remedy, and in searching for a precise precedent, an equity court must not lose sight, not only of its power, but of its duty to arrive at a just solution of the problem.

CA(6)[] **(6)**

Equity § 1—Flexibility and Expansion.

Equity is much more elastic and capable of expansion and extension to new cases than the common law. Its very central principles, its foundation upon the eternal verities of right and justice, its resting upon the truths of morality rather than upon **[*281]** arbitrary customs and rigid dogmas, necessarily gave it this character of flexibility, and permitted its doctrines to be enlarged so as to embrace new cases as they constantly arose. It has, therefore, as an essential part of its nature, a capacity of orderly and regular growth—a growth not arbitrary, according to the will of individual judges— but in the direction of its already settled principles. It is ever reaching out and expanding its doctrines so as to cover new facts and relations, but still without any break or change in the principles or doctrines themselves. The tradition and heredity of the flexible equitable powers of the modern trial judge derive from the role of the trained and experienced chancellor and depend upon skills and wisdom acquired through years of study, training and experience which are not susceptible of adequate transmission through instructions to a lay jury.

CA(7)[] **(7)**

Unfair Competition § 4—Acts Constituting—Federal Decisions as Persuasive Authority.

In view of the similarity of language and obvious identity of purpose of *15 U.S.C. § 45(a)* and *Bus. & Prof. Code, § 17200*, federal court decisions on the subject of unfair competition are more than ordinarily persuasive but not controlling.

CA(8)[] **(8)**

Unfair Competition § 4—Acts Constituting—Unfair Business Practices—Harm to Competition.

Any finding of unfairness to competitors under *Bus. & Prof. Code, § 17200*, must be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. Thus, when a plaintiff who claims to have suffered injury from a direct competitor's unfair act or practice invokes *§ 17200*, the word “unfair” in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

CA(9)[] **(9)**

Unfair Competition § 4—Acts Constituting—Unfair Business Practices—Harm to Competition—Determination by Court.

It is clear from both the language and nature of the test for unfairness to competitors under *Bus. & Prof. Code, § 17200*—that is, whether the challenged business practice threatens an incipient violation of an ***antitrust law*** or violates the policy or spirit of one of those laws—that such a standard is one that may reasonably be applied only by a court. This standard is too indeterminate to be adequately conveyed by jury instructions or applied by a jury. This test is limited to the context of an action by a competitor alleging anticompetitive practices and does not apply to actions by consumers or by competitors alleging other kinds of violations of California's unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*).

[*282] *CA(10)*[] (10)

Unfair Competition § 8—Actions—Equitable Nature—Court Trial—Government Action Seeking Civil Penalties and Injunction.

Both (1) the fact that the cause of action under California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) originated solely as an action to enjoin an unfair or misleading business practice—an equitable action triable only by a court and not a jury—and (2) the fact that the broad and general standard of unfair competition that was incorporated into the statute contemplated that the standard would be applied by a court exercising its traditional, flexible equitable authority rather than by a jury, support the conclusion that the Legislature, in enacting the UCL, intended that a cause of action under the UCL would be tried by the court and not a jury, even when the government seeks civil penalties as well as injunctive relief.

***CA(11)*[] (11)**

Unfair Competition § 4—Acts Constituting—Unfair Business Practices—Determination by Court.

The nature of the principal issue presented in a great many actions under California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) supports the conclusion that such causes of action were intended to be decided by the court rather than a jury. Such cases often concern a nuanced and qualitative determination regarding whether a business practice should properly be considered unfair or deceptive within the meaning of the UCL. This type of qualitative determination—often requiring the consideration of a variety of factors or circumstances identified in prior cases in California or other jurisdictions or in administrative guidelines developed by the Federal Trade Commission or other consumer protection administrative agencies—is the type of decision that has traditionally been viewed as the province of courts rather than juries. Moreover, the overarching legislative concern in enacting the UCL is to provide a streamlined procedure for the prevention of ongoing or threatened acts of unfair competition, an objective that is inconsistent with the unavoidable delays and increased costs inherent in a jury, as compared to a court, trial.

***CA(12)*[] (12)**

Unfair Competition § 8—Actions—Court Trial—Government Action Seeking Civil Penalties and Injunction.

The Legislature intended that a cause of action under California's unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*)—including an action brought by the government that seeks both injunctive relief and civil penalties—is to be tried by the court rather than by a jury.

***CA(13)*[] (13)**

Advertising § 7—False Advertising—Procedures and Prohibitions.

California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) has been accurately described as the major California legislation designed to protect consumers from false or deceptive advertising. The **[*283]** procedures set forth in the FAL and in California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*), are in many respects parallel to one another, and the UCL specifically provides that any practice that violates the FAL is also prohibited by the UCL.

CA(14)[] **(14)**

Advertising § 9—False Advertising—Equitable Action Tried by Court—Power to Order Restitution.

In the absence of a restriction as to the power of the trial court to order restitution, a court of equity may exercise the full range of its inherent powers in order to accomplish complete justice between the parties, restoring if necessary the status quo ante as nearly as may be achieved. In an action by the California Attorney General under *Bus. & Prof. Code, § 17535*, a trial court has the inherent power to order, as a form of ancillary relief, that the defendants make or offer to make restitution to the customers found to have been defrauded. A civil action under California's false advertising law (*Bus. & Prof. Code, § 17500 et seq.*) is an equitable action triable to the court.

CA(15)[] **(15)**

Advertising § 9—False Advertising—Equitable Action Tried by Court—Government Action Seeking Civil Penalties and Injunction.

The California Attorney General has only one cause of action against a defendant for violating *Bus. & Prof. Code, § 17500*, but the amount of civil penalties which may be imposed under *Bus. & Prof. Code, § 17536*, is dependent upon the number of violations committed by a defendant. Because the cause of action for violating *§ 17500* is an equitable action, the clear implication is that even when the Attorney General or a district attorney seeks civil penalties as well as injunctive relief in such an action, the action under California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) remains an equitable action, and, as such, is to be tried by the court, rather than by a jury. The amount of civil penalties under the FAL is to be determined by the court, not by a jury.

CA(16)[] **(16)**

Advertising § 8—False Advertising—What Constitutes—Untrue or Misleading Advertising.

Like the choice of the term “unfair” in California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*), the governing substantive standard of California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*)—prohibiting advertising that is “untrue or misleading” (*§ 17500*)—is set forth in broad and open-ended language that is intended to permit a court of equity to reach any novel or creative scheme of false or misleading advertising that a deceptive business may devise. The FAL prohibits not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public. Thus, to state a claim under **[*284]** either the UCL or the FAL, based on false advertising or promotional practices, it is necessary only to show that members of the public are likely to be deceived.

CA(17)[] **(17)**

Advertising § 8—False Advertising—What Constitutes—Untrue or Misleading Advertising—Equitable Nature of Determination.

The broad reach and scope of the "untrue or misleading" standard of California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) is often framed in language (whether members of the public are likely to be deceived) that is not, on its face, beyond the ken of a jury. As employed in the FAL (as well as in California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*)), however, a determination that advertising poses a sufficient risk or tendency to deceive or confuse the public may potentially result in an injunctive order prohibiting what may be a common and widely utilized advertising, labeling, or promotional practice. In the FAL and the UCL settings, this standard—whether members of the public are likely to be deceived—has been understood to call for the exercise of the type of equitable discretion and judgment traditionally employed by a court of equity.

CA(18)[] **(18)**

Advertising § 8—False Advertising—What Constitutes—Untrue or Misleading Advertising—Equitable Nature of Determination.

The crucial issue in cases under California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) does not typically involve the type of ordinary factfinding assigned to a jury, but rather calls for an equitable judgment to determine whether an often undisputed advertising or promotional practice presents a sufficient tendency to deceive or confuse the public so as to support invocation of the FAL's remedies. As the breadth of the cases arising under the FAL attests, this determination calls for consideration of a wide variety of factors that prior cases and past administrative experience have shown may render an affirmative statement (or a failure to disclose) in a product label, packaging, or in other advertising or promotional practices misleading in a particular context. Given the capacity of the FAL's standard to be applied expansively to encompass all of the novel ways in which advertising or promotional material may be misleading, it is important that trial courts are required to set forth their reasoning for a determination that the FAL has been violated so that a body of precedent can evolve to inform businesses of advertising practices they must avoid.

CA(19)[] **(19)**

Advertising § 8—False Advertising—What Constitutes—Untrue or Misleading Advertising—Reference to Federal Guidelines.

The complexities and nuances that are often involved in the determination whether an advertisement should properly be considered untrue or misleading for **[*285]** purposes of California's false advertising law (*Bus. & Prof. Code, § 17500 et seq.*) are often ameliorated by judicial reference to the relevant guidelines developed by the Federal Trade Commission (FTC) regarding deceptive advertising. The great variety and complexity of contexts in which the potentially misleading nature of advertising may arise and must be evaluated can be gleaned from a simple listing of the numerous guidelines that the FTC has published relating to deceptive advertising.

CA(20)[] **(20)**

Advertising § 8—False Advertising—What Constitutes—Untrue or Misleading Advertising—Equitable Nature of Determination.

The determination whether an advertising or promotional practice should properly be found untrue or misleading within the meaning of California's false advertising law (*Bus. & Prof. Code, § 17500 et seq.*) depends upon the exercise of the type of equitable discretion and judgment typically employed by a court of equity.

CA(21)[] **(21)**

Advertising § 9—False Advertising—Civil Penalties and Number of Violations—Equitable Nature of Determination.

Decisions under California's false advertising law (*Bus. & Prof. Code, § 17500 et seq.*) have made clear the propriety and importance of a court's exercise of its equitable authority not only in determining whether an advertisement is untrue or misleading, but also in determining (1) the number of violations for which a defendant may properly be held responsible; and (2) the reasonable amount of civil penalties to be imposed for each violation.

CA(22)[] **(22)**

Advertising § 7—False Advertising—Equitable Action Tried by Court—Government Action Seeking Civil Penalties and Injunction.

The Legislature intended that the civil cause of action embodied in California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) would be tried by a court of equity rather than by a jury in all FAL actions, including instances in which the California Attorney General or another governmental entity seeks civil penalties for a violation of the FAL as well as injunctive relief.

CA(23)[] **(23)**

Jury § 7—Right to Jury Trial—Civil Cases—California Constitution.

Cal. Const., art. I, § 16—the jury trial provision—states in part that trial by jury is an inviolate right and shall be secured to all. This provision was intended to preserve the right to a civil jury as it existed at common law in 1850 when the jury trial provision was first incorporated into the California Constitution. The right to trial by jury guaranteed by the California Constitution is the right as it existed at common law at the time the Constitution was adopted. It is the right to trial by jury as it existed at common law which is preserved; and what that right is, is a **[*286]** purely historical question, a fact which is to be ascertained like any other social, political or legal fact. The right is the historical right enjoyed at the time it was guaranteed by the Constitution. The California Constitution essentially preserves the right to a jury in those actions in which there was a right to a jury trial at common law at the time the Constitution was first adopted.

CA(24)[] **(24)**

Jury § 7—Right to Jury Trial—Civil Cases—California Constitution—Actions Triable by Jury at Common Law.

As a general matter, the California Constitution affords a right to a jury trial in common law actions at law that were triable by a jury in 1850, but not in suits in equity that were not triable by a jury in 1850. In applying this test, the cases have explained that the form or title of a statutory cause of action is not controlling and that if the substance of the cause of action is one that would have been triable by a jury at common law, there is a right to a jury trial even if the statute's designation might suggest that it is an equitable proceeding. In determining whether the action was one triable by a jury at common law, the court is not bound by the form of the action but rather by the nature of the rights involved and the facts of the particular case—the gist of the action. A jury trial must be granted where the gist of the action is legal, where the action is in reality cognizable at law.

CA(25)[] **(25)**

Jury § 7—Right to Jury Trial—Civil Cases—California Constitution.

The constitutional right of trial by jury is not to be narrowly construed. It is not limited strictly to those cases in which it existed before the adoption of the California Constitution but is extended to cases of like nature as may afterwards arise.

CA(26)[] **(26)**

Jury § 7—Right to Jury Trial—Civil Cases—Severable Legal and Equitable Issues.

When the legal and equitable causes of action or issues presented in a case are severable, a party retains the right to a jury trial of the severable legal issues and a court trial of the severable equitable issues.

CA(27)[] **(27)**

Jury § 7—Right to Jury Trial—Civil Cases—Severable Legal and Equitable Issues.

When severable legal and equitable causes of action or issues are present in a single proceeding, the trial court generally has authority to determine in what order the matters should be heard, and if the equitable issue is tried by the court first and if the court's resolution of that issue determines a matter that would otherwise be resolved by a jury with regard to the legal claim or issue, the court's resolution of the matter will generally be binding and may leave nothing for a jury to **[*287]** resolve. And although a trial court retains discretion regarding the order in which the issues should be tried, the governing California cases express a preference that the equitable issues be tried first. This general "equity first preference" is a long standing feature of California law and has always been viewed as fully compatible with the right to jury trial embodied in the California Constitution.

CA(28)[] **(28)**

Jury § 10—Right to Jury Trial—Determining Nature of Civil Action—Legal and Equitable Issues Not Severable—Gist of Action and Mode of Relief.

Unlike proceedings in which multiple legal and equitable causes or issues are severable, when a cause of action involves legal and equitable aspects that are not severable California decisions have relied upon the gist of the action standard in determining whether the action should be considered legal or equitable for purposes of the constitutional jury trial issue. Although the legal or equitable nature of a cause of action ordinarily is determined by the mode of relief to be afforded, the prayer for relief in a particular case is not conclusive and the fact that damages is one of a full range of possible remedies does not guarantee the right to a jury.

CA(29)[] **(29)**

Damages § 1—Statutory—Purposes Associated with Legal Relief.

The general rule is that monetary relief is a legal remedy, and an award of statutory damages may serve purposes traditionally associated with legal relief, such as compensation and punishment.

CA(30)[] **(30)**

Jury § 7—Right to Jury Trial—Civil Cases—Unfair Competition and False Advertising—California Constitution.

In light of the particular nature of the civil causes of action authorized by California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*), the gist of a civil action under the UCL and the FAL is equitable rather than legal in nature. Such causes of action are equitable either when brought by a private party seeking only an injunction, restitution, or other equitable relief or when brought by the California Attorney General, a district attorney, or other governmental official seeking not only injunctive relief and restitution but also civil penalties. Accordingly, there is no right to a jury trial in such actions under the California Constitution.

CA(31)[] **(31)**

Equity § 4—Grounds and Subjects of Relief—Unfair Competition and False Advertising.

The statutory causes of action established by California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) are not of like nature or of the same class as any **[*288]** common law right of action. The UCL and the FAL were enacted for the specific purpose of creating new rights and remedies that were not available at common law. The statutes deliberately broaden the types of business practices that can properly be found to constitute unfair competition and eliminate a number of elements that were required in common law actions for fraud. Furthermore, when the Legislature adopted the civil penalty provisions of the UCL and the FAL, permitting government officials, and government officials alone, to seek civil penalties along with injunctive or other equitable relief in the civil actions such officials bring under the UCL and the FAL, the causes of action under the UCL and the FAL continued to constitute causes of action that were not of like nature or of the same class as any common law action.

CA(32)[] **(32)**

Equity § 4—Grounds and Subjects of Relief—Unfair Competition and False Advertising.

The legal and equitable aspects of actions brought under California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) are nonseverable not only because the determination whether a defendant's alleged conduct constitutes a violation of the statute provides the basis for all of the relief authorized by the statutes, but also because the amount of civil penalties that would be appropriate may well depend on the equitable remedies, including restitution, that are or are not imposed. With respect to the application of the gist of the action standard, the gist of the civil causes of action authorized by the UCL and the FAL must properly be considered equitable, rather than legal, in nature. The bulk of the remedies provided for in the statutes—injunctive relief, restitution, and other clearly equitable remedies such as the appointment of a receiver—are clearly equitable in nature. As the legislative history of both the UCL and the FAL make clear, the primary objective of both statutes is preventive, authorizing the exercise of broad equitable authority to protect consumers from unfair or deceptive business practices and advertising.

CA(33)[] **(33)**

Equity § 5—Scope and Types of Relief—Civil Penalties—Unfair Competition and False Advertising.

Although California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) authorize in actions brought by the California Attorney General, a district attorney, or other government officials (but not private parties), the imposition of civil penalties—a type of remedy that in some contexts is properly considered legal in nature—the UCL and the FAL statutes specify that in assessing the amount of the civil penalty to be imposed under these statutes, the court is afforded broad discretion to consider a nonexclusive list of factors that include the relative seriousness of the defendant's conduct and the potential deterrent effect of such penalties, the type of qualitative **[*289]** evaluation and weighing of a variety of factors that is typically undertaken by a court and not a jury (*Bus. & Prof. Code, §§ 17206*, *17536*). The civil penalties that may be awarded under the UCL and the FAL, unlike the classic legal remedy of damages, are noncompensatory in nature; they require no showing of actual harm to consumers and are not based on the amount of losses incurred by the targets of unfair practices or misleading advertising.

CA(34)[] **(34)**

Equity § 4—Grounds and Subjects of Relief—Unfair Competition and False Advertising.

Although civil penalties under California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*) may have a punitive or deterrent aspect, their primary purpose is to secure obedience to statutes and regulations imposed to assure important public policy objectives. The focus of both statutory schemes is preventative. And the civil penalties obtained by the government in actions under the UCL and the FAL are to be utilized for the enforcement of the statutes in question. The expansive and broadly worded substantive standards that are to be applied in determining whether a challenged business practice or advertising is properly considered violative of the UCL or the FAL call for the exercise of the flexibility and judicial expertise and experience that was traditionally applied by a court of equity. Particularly in light of the equitable nature of the substantive standards that apply in UCL and the FAL actions—both in actions brought by private parties and by government officials—the gist of the civil causes of action authorized by the UCL and FAL must properly be considered equitable in nature.

CA(35)[] **(35)**

Jury § 7—Right to Jury Trial—Civil Cases—Unfair Competition and False Advertising—California Constitution.

Under the California Constitution, there is no right to a jury trial in a cause of action under California's unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (FAL) (*Bus. & Prof. Code, § 17500 et seq.*), including when the action is brought by a government official and seeks both injunctive relief and civil penalties. This conclusion does not deprive a defendant in a UCL or FAL action of any constitutional right afforded by the jury trial provision of the California Constitution. That constitutional provision grants the right to jury trial in actions of like nature or of the same class in which a jury trial was provided at common law in 1850, when the jury trial provision of the California Constitution was first adopted. The consumer protection actions authorized in the UCL and the FAL are not of like nature or of the same class as an action that was triable by jury at common law. In actions like those under the UCL and the FAL, in which the equitable and legal aspects are nonseverable, there is no constitutional right to a **[*290]** jury trial when the gist of the action is equitable rather than legal. In sum, there is no right to a jury trial under the California Constitution in a cause of action under the UCL or the FAL, including an action in which civil penalties as well as an injunction or other equitable relief are sought.

CA(36)[] **(36)**

Jury § 7—Right to Jury Trial—Civil Cases—Federal Constitution—Applicability.

The federal civil jury trial provision of *U.S. Const., 7th Amend.*, applies only to civil trials in federal court; federal decisions explicitly hold that the civil jury trial provision of the *U.S. Const., 7th Amend.*, does not apply to state court proceedings. Instead, the right to jury trial in state court proceedings is governed by the provisions and judicial interpretation of each state's own constitutional jury trial provision.

CA(37)[] **(37)**

Jury § 7—Right to Jury Trial—Civil Cases—California Constitution—Independent of Federal Constitutional Civil Jury Trial Right.

In California, the constitutional right to a civil jury trial under the California Constitution is entirely independent of the federal constitutional civil jury trial right under *U.S. Const., 7th Amend.* (*Cal. Const., art. I, § 24*), and California cases have not hesitated to decline to follow the federal interpretation of the *U.S. Const., 7th Amend.,* when the federal interpretation has been found inconsistent with a proper reading of the California provision.

CA(38)[] **(38)**

Jury § 7—Right to Jury Trial—Civil Cases—Severable and Nonseverable Legal and Equitable Issues.

When the legal and equitable aspects are severable, there is a preference for trying the equitable issues first. If common facts are resolved in a manner that obviates the need to try the legal issue, there is no right under the California Constitution to have the legal issues submitted to the jury. In cases in which a cause of action contains nonseverable legal and equitable aspects, California cases undertake a qualitative, holistic analysis of the action in its entirety to determine whether the gist of the action is legal or equitable, that is, whether the legal or equitable aspects predominate.

CA(39)[] **(39)**

Jury § 7—Right to Jury Trial—Civil Cases—Unfair Competition and False Advertising.

In causes of action under California's unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*) and California's false advertising law (*Bus. & Prof. Code, § 17500 et seq.*) seeking injunctive relief and civil penalties, the gist of the actions is equitable, and there is no right to a jury trial in such actions under California law either as a statutory or constitutional matter. An appellate judgment **[*291]** holding that a company had a right to a jury trial under the California Constitution in such actions thus had to be reversed and the matter remanded.

Opinion

[*292]

[464]** **CANTIL-SAKAUYE, C. J.**—Under two of California's most prominent consumer protection statutes—the unfair competition law (UCL)[1] and the false advertising law (FAL)[2]—the Attorney General or local prosecuting authorities may bring a civil action against a business that has allegedly engaged in an unfair, unlawful or deceptive business act or practice or false or misleading advertising and may obtain civil penalties as well as injunctive relief and restitution in such an action. In this case we must decide whether, when the government seeks civil penalties as well an injunction or other equitable remedies under those statutes, the causes of action are to be tried by the court (that is, the trial judge) or, instead, by a jury.

For more than 45 years, a uniform line of California Court of Appeal decisions has **[***717]** held that such causes of action under the UCL and the FAL are to be tried by the court rather than by a jury. In the current writ proceeding **[****3]** in this case, however, the Court of Appeal, relying primarily on a decision of the United States Supreme Court applying the civil jury trial provision of the *Seventh Amendment to the federal Constitution*—*Tull v. United States (1987) 481 U.S. 412 [95 L.Ed.2d 365, 107 S.Ct. 1831]* (*Tull*)—disagreed with the earlier line of decisions and held that the jury trial provision of the California Constitution should be interpreted to require a jury trial in any action brought under the UCL or the FAL in which the government seeks civil penalties in addition to injunctive or other equitable relief. We granted review to resolve the conflict in the Court of Appeal decisions.

For the reasons discussed hereafter, we conclude that the causes of action established by the UCL and the FAL at issue here are equitable in nature and are properly tried by the court rather than a jury. As we explain, the legislative history and underlying purpose of the statutory provisions in question demonstrate that these very broadly worded consumer protection statutes were fashioned to permit courts to utilize their traditional flexible equitable authority, tempered by judicial experience and familiarity with the treatment of analogous business practices in this and other jurisdictions, in evaluating whether a challenged business act or practice **[****4]** or advertising should properly be considered impermissible under these statutory provisions.

With regard to petitioners' constitutional claim, it is firmly established that California's constitutional jury trial provision preserves the right to jury trial **[*293]** in civil actions comparable to those *legal* causes of action in which the right to jury trial existed at the time of the first Constitution's adoption in 1850 and does not apply to causes of action that are *equitable* in nature. At early common law, “legal” causes of action (or “actions at law”) typically involved lawsuits in which the plaintiff sought to recover money damages to compensate for an injury caused, for example, by the defendant's breach of contract or tortious conduct, whereas “equitable” causes of action (or “suits in equity”) sought relief that was unavailable in actions at law, such as an injunction to prohibit ongoing or future misconduct or an order requiring a defendant to provide specific performance or disgorge ill-gotten gains. The consumer protection statutory causes of action at issue here are quite different from any early common law cause of action that was in existence at the time the civil jury trial provision **[****5]** of the California **[**465]** Constitution was first adopted. Given the nature of the substantive standard to be applied and the remedies afforded by the statutes, we conclude that the gist of both the UCL and FAL causes of action at issue here is equitable and consequently such actions are properly tried by the court rather than by a jury.

As further explained, the United States Supreme Court decision in *Tull, supra, 481 U.S. 412*, relied upon by the Court of Appeal below, does not govern this case for a variety of reasons. To begin with, the *Tull* decision rests

---

[1] The unfair competition law is set forth at *Business and Professions Code section 17200 et seq.* Although the Legislature has not given an official name to these statutory provisions, the legislation has generally been referred to as the unfair competition law, and we will refer to this statute as the UCL. (See *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 169, fn. 2 [83 Cal. Rptr. 2d 548, 973 P.2d 527]* (*Cel-Tech*).)

[2] The FAL is set forth at *Business and Professions Code section 17500 et seq.*

upon the federal high court's interpretation of the civil jury trial provision of the *Seventh Amendment to the federal Constitution*, and that court's decisions explicitly hold that the *Seventh Amendment* applies only to *federal court* proceedings, not *state court* proceedings. The constitutional right to jury trial in *state court* civil proceedings is governed only by the civil jury trial provisions of each individual state's own state constitution. In several important respects, California decisions have construed the civil jury trial provision of the California Constitution in a manner differently **[***718]** from how the federal high court has interpreted the federal civil jury trial provision. These differences are significant in this **[****6]** context and serve to distinguish the *Tull* decision from this case. Second, unlike the broad, flexible standards embodied in the two consumer protection statutes at issue in this case, there is no indication that the relevant substantive statutory standard at issue in *Tull* called for the exercise of a court's traditional equitable authority and discretion in determining whether a violation of the statute had occurred. Accordingly, the court in *Tull* had no occasion to determine how the federal constitutional civil jury trial provision should be interpreted or applied in such a setting.

Because the nature of the substantive statutory standards and remedies embodied in the civil causes of action under the UCL and the FAL establish the equitable nature of the actions, we limit the holding in this case to the UCL and FAL setting and express no opinion regarding how the state constitutional jury trial right applies to other statutory causes of action that authorize both injunctive relief and civil penalties.

[*294]

I. Facts and Proceedings Below

Petitioners Nationwide Biweekly Administration, Inc., Loan Payment Administration LLC, and Daniel S. Lipsky, the alleged alter ego, principal and sole shareholder **[****7]** of both entities (hereafter collectively referred to as Nationwide) operated a debt payment service in California and other states. Nationwide's program claimed to save debtors money through a process in which the debtor would reduce the amount of interest owed over the life of a loan by having the debtor accelerate the repayment of the debt through an extra monthly payment each year. Under the program, a debtor would pay to Nationwide one-half the debtor's ordinary monthly loan payment every two weeks (biweekly) rather than one full payment once a month, resulting in an extra month's payment each year (26 half-payments equal 13 full payments), and Nationwide would in turn pay those amounts to the debtor's lender. Nationwide advertised its services statewide, mostly through direct mailers to consumers with outstanding residential mortgages, and through followup telephone conversations with consumers who responded to the mailers.

In May 2015, the district attorneys of four counties, acting on behalf of the People, filed a civil complaint alleging that Nationwide had violated the UCL and the FAL by, among other things, employing business practices that: (1) misleadingly implied that Nationwide **[****8]** was affiliated with the consumer's lender; (2) disguised the amount that Nationwide's services actually cost by failing to fully and adequately disclose the amount, payment schedule, and effect of Nationwide's fees; and (3) overstated the amount of savings a consumer could reasonably expect to receive through Nationwide's services.[3] The complaint **[**466]** also stated that Nationwide's practices have been the subject of numerous consumer complaints and regulatory and law enforcement activities around the country, including an action brought by the federal Consumer Financial Protection Bureau (CFPB).[4]

---

[3] As initially filed, the complaint also alleged that Nationwide's practices violated the Check Sellers, Bill Payers and Proraters Law (*Fin. Code, § 12200 et seq.*) and asserted causes of action under that statute. While this case was pending before this court, those causes of action were dismissed as part of a larger settlement between the Department of Business Oversight and Nationwide. The underlying action now rests solely on the causes of action under the UCL and the FAL set forth in the complaint.

[4] In the action brought by the CFPB, the federal district court, after a seven-day bench trial, found that although some of the claims advanced by the CFPB were not meritorious, Nationwide had made a variety of misleading statements in its marketing materials. The court imposed injunctive relief and civil penalties of more than $7 million against Nationwide based on that misleading conduct. (*Consumer Financial Protection Bureau v. Nationwide Biweekly Administration, Inc. (N.D.Cal., Sept. 8,*

[*295]

[*719]** The complaint's prayer for relief requested that the court (1) issue an injunction prohibiting the business practices found to violate the provisions of the UCL or the FAL, (2) order restitution of all money wrongfully acquired by Nationwide from California consumers in violation of the UCL and the FAL, and (3) impose civil penalties up to $2,500 for each violation of the UCL or the FAL found by the court.[5]

In its amended answer to the complaint, Nationwide demanded a jury trial "on all issues so triable," and the People, in response, **[****9]** filed a motion to strike the jury demand "based on well settled law that this is an equity action requiring a court trial." After briefing, the trial court granted the People's motion to strike the jury demand.

Nationwide then filed a petition for writ of mandate in the Court of Appeal, challenging the trial court's ruling striking the jury demand. After the Court of Appeal initially summarily denied the writ petition, this court granted Nationwide's petition for review and retransferred the matter to the Court of Appeal with directions to issue an order requiring the People to show cause why Nationwide does not have a right to jury trial when the government seeks the civil penalties authorized under the UCL and the FAL.

After briefing and argument, the Court of Appeal held that under *article I, section 16 of the California Constitution*—the jury trial provision—Nationwide has a right to a jury trial in this matter and that the trial court erred in striking the jury demand. (*Nationwide Biweekly Administration, Inc. v. Superior Court (2018) 24 Cal.App.5th 438 [234 Cal. Rptr. 3d 468]* (*Nationwide Biweekly*).) The Court of Appeal, relying heavily on the reasoning of the United States Supreme Court's decision in *Tull, supra, 481 U.S. 412*, concluded that because the People are seeking civil penalties as well as injunctive relief and restitution, the "gist" of the People's **[****10]** UCL and FAL causes of action against Nationwide should properly be considered legal rather than equitable, "giving rise to a right to a jury trial" under *article I, section 16*. (*Nationwide Biweekly, supra, 24 Cal.App.5th at p. 442*.) At the same time, the Court of Appeal, again following the approach adopted by the United States Supreme Court in *Tull*, held that Nationwide's jury trial right is limited to the issue of liability—that is, to whether Nationwide's business practices violated the **[*296]** provisions of the UCL or the FAL—and **[***720]** does not extend to the issue of remedy, including the amount of civil penalties to be imposed. (*Nationwide Biweekly, at p. 456*.)

In the course of its opinion, the Court of Appeal rejected the People's contention that there is "'an unbroken line of appellate decisions finding no right to a jury trial [under the California Constitution] in UCL or FAL actions … where the People sought penalties'" **[**467]** (*Nationwide Biweekly, supra, 24 Cal.App.5th at p. 457*), finding instead that most of the cases relied upon by the People held only that such actions under the UCL and the FAL were not criminal in nature and thus that the jury trial provision of the *Sixth Amendment of the federal Constitution* did not apply to such actions. (*Nationwide Biweekly, at pp. 457–459*.) Although the Court of Appeal acknowledged that at least one appellate court decision—*People v. Bhakta (2008) 162 Cal.App.4th 973 [76 Cal.Rptr.3d 421]*—clearly held that the gist of an action under the UCL **[****11]** is equitable in nature and that there is no right to a jury trial in such an action under the California constitutional jury trial provision, the Court of Appeal disagreed with that decision's analysis and declined to follow its holding. (*Nationwide Biweekly, supra, 24 Cal.App.5th at pp. 459–460*.) In addition, the Court of Appeal questioned the validity of another appellate court decision relied upon by the People—*DiPirro v. Bondo Corp. (2007) 153 Cal.App.4th 150 [62 Cal. Rptr. 3d 722]* (*DiPirro*)—which held that there is no right to a jury trial in an action seeking injunctive relief, restitution, and civil penalties under the *Safe Drinking Water and Toxic Enforcement Act of 1986 (Health & Saf. Code, § 25249.5 et seq.)* (commonly known as Prop. 65).

---

*2017, No. 15-cv-02106-RS) 2017 WL 3948396, pp. *6–*9, *12–*13*.) Both parties filed appeals from the district court's decision, that are pending in the United States Court of Appeals for the Ninth Circuit. (Case Nos. 18-15431 & 18-15887, filed Mar. 15, 2018, & May 10, 2018.)

[5] In the answer brief filed in this court, Nationwide claims that the government seeks to impose "over $19.25 *billion* in civil penalties." The complaint, however, seeks no specific amount in penalties, and, as explained hereafter, the applicable statutes and case law grant trial courts broad, but not unlimited, discretion to impose penalties in a reasonable amount (up to $2,500 per violation) in light of the nature and severity of an offending business's conduct. (*Post*, at pp. 299, 307, 313.) The answer's hyperbole in this regard does not advance its legal argument.

The Court of Appeal found that the *DiPirro* decision had not adequately analyzed the United States Supreme Court's reasoning in *Tull*. (*Nationwide Biweekly, supra, 24 Cal.App.5th at pp. 461–463*.)

Accordingly, the Court of Appeal concluded that a writ of mandate should issue, directing the trial court to vacate its order striking Nationwide's request for jury trial and to grant a jury trial on all issues except the amount of any statutory penalties to be awarded. (*Nationwide Biweekly, supra, 24 Cal.App.5th at p. 463*.)

We granted the People's petition for review to determine whether there is a right to a jury trial in a UCL or FAL action brought by the government when the government seeks civil penalties as well as injunctive **[****12]** relief and restitution.

II. General Principles Regarding the Right to Jury Trial in Civil Cases Under California Law

CA(1)[] **(1)** As this court recently explained in *Shaw v. Superior Court (2017) 2 Cal.5th 983 [216 Cal. Rptr. 3d 643, 393 P.3d 98]* (*Shaw*): ***HN1***[] "Under California **[*297]** law, the right to a jury trial in a civil action may be afforded either by statute or by the California Constitution. … [¶] … [¶] As a general matter, the California Legislature has authority to grant the parties in a civil action the right to a jury trial by statute, either when the Legislature establishes a new cause of action or with respect to a cause of action that rests on the common law or a constitutional provision. [Citations.] Given the Legislature's broad general legislative authority under the California Constitution and in the absence of any constitutional prohibition [citations], the Legislature may extend the right to a jury trial to instances in which the state constitutional jury trial provision does not itself mandate a right to a jury trial. [¶] … But even when the language and legislative history of a statute **[***721]** indicate that the Legislature intended that a cause of action established by the statute is to be tried by the court rather than by a jury, if the California constitutional jury trial **[****13]** provision itself guarantees a right to a jury trial in such a cause of action, the Constitution prevails and a jury trial cannot be denied." (*2 Cal.5th at pp. 993–994*, fns. omitted.)

III. Is There a *Statutory* Right to Jury Trial Under Either the UCL or the FAL When the Government Seeks Civil Penalties as Well as Injunctive Relief?

Neither the UCL nor the FAL explicitly addresses the question whether the causes of action created by the two statutes—both of which authorize the government to seek civil penalties as well as injunctive relief and restitution—are to be tried by the court or by a jury. As we shall see, however, the legislative history and legislative purpose of both statutes convincingly establish that the Legislature intended that such causes of action under these statutes would be tried by the court, exercising the traditional flexible discretion **[**468]** and judicial expertise of a court of equity, and not by a jury, including when civil penalties as well as injunctive relief and restitution are sought.

A. *The UCL*

CA(2)[] **(2)** Prior to 1933, former *section 3369 of the Civil Code* provided simply that "[n]either specific nor preventive relief can be granted to enforce a penal law, except in a case of nuisance, nor to enforce a penalty or forfeiture in **[****14]** any case." The current provisions of the UCL—set forth in *Business and Professions Code section 17200 et seq.*—derive from a 1933 amendment of *Civil Code former section 3369*. (Stats. 1933, ch. 953, § 1, p. 2482.) The 1933 amendment broadened the exception in the statute to include "unfair competition" as well as "nuisance" (Civ. Code, former *§ 3369, subd. (1)*) and added additional subdivisions that: (a) provided that "[a]ny person performing or proposing to perform an act of unfair competition within this State *may be* ***[*298]*** *enjoined* in any court of competent jurisdiction" (*id., subd. (2)*, italics added); (b) defined "unfair competition" as used in the statute to "mean and include *unfair or fraudulent business practice and unfair, untrue or misleading advertising*" (*id.,* *subd. (3)*, italics added);[6] and (c) authorized actions for injunction under the statute to be brought "by the Attorney General or any district attorney in this State in the name of the people of the State of California" or by "any board, officer, … corporation or … person acting for the interests of itself, its members or the general public" (*Civ. Code, former § 3369, subd. (5)*). Because the unfair competition cause of action established by the 1933 amendment of former *section 3369* authorized the government (as well as private **[****15]** parties) to seek only injunctive relief, there is no question that the civil cause of action created in 1933 was equitable in nature and, as such, was intended to be tried by the court and not a jury. (See 3 Witkin, Cal. Procedure (5th ed. 2008) Actions, § 126, p. 205 [***HN2***[] "Actions seeking injunctive relief are, of course, equitable in nature"].) Nationwide does not suggest otherwise.

In 1972, as part of a legislative measure that expanded the reach of former *section 3369 of the Civil Code* **[***722]** to include "deceptive," as well as "unfair," "untrue," or "misleading," advertising (Stats. 1972, ch. 1084, § 1, p. 2020), the Legislature added former *section 3370.1 to the Civil Code*, authorizing the Attorney General or any district attorney (but not private parties) to seek and obtain, in addition to injunctive relief, "a civil penalty not to exceed two thousand five hundred dollars ($2,500) for each violation" of former *section 3369* (Stats. 1972, ch. 1084, § 2, p. 2021 [enacting Assem. Bill No. 1937 (1971–1972 Reg. Sess.)]). The 1972 legislation was proposed by the Attorney General and district attorneys who were charged with enforcing the prohibition on unfair competition embodied in former *section 3369*. In support of the legislation, the proponents maintained that "[i]t is **[****16]** our experience that an injunction without a civil penalty is not a deterrent to future consumer fraud abuses." (Atty. Gen. Evelle J. Younger, letter to Sen. Alfred H. Song re Assem. Bill No. 1937 (1971–1972 Reg. Sess.) July 13, 1972.) A legislative committee analysis of the proposed bill after its final amendment set forth the purpose of the legislation as intended to "[p]ermit the Attorney General and a district attorney to collect civil penalties in addition to either specific or preventive relief in actions they commence to enjoin acts of unfair competition," explaining that "[i]t is felt that the allowance of civil penalties, in addition to the requested injunctive relief, will provide a sufficient deterrent to the resumption of these unlawful practices." (Sen. Com. on Judiciary, Analysis of Assem. Bill No. 1937 (1971–1972 Reg. Sess.) as amended May **[*299]** 25, 1972, pp. 1, 2.) There is no indication in the legislative history of the 1972 enactment that the Legislature, in providing an additional remedy that could be sought in actions under former *section 3369* to enjoin acts of unfair competition, intended to transform such actions from ones that were to be tried by the court into actions **[**469]** that were **[****17]** to be tried by a jury. Civil actions under the UCL that were filed by private parties, in which only injunctive relief was authorized, continued to be tried by the court.

CA(3)[] **(3)** In 1977, the Legislature moved the relevant sections of the Civil Code embodying the UCL into the Business and Professions Code at *sections 17200 to 17206*. (Stats. 1977, ch. 299, § 1, p. 1202.) Former *section 3370.1 of the Civil Code*—the section authorizing the Attorney General or a district attorney to seek civil penalties as well as injunctive relief—was moved to *Business and Professions Code section 17206*. In 1992, the Legislature added *subdivision (b) to Business and Professions Code section 17206*, which provides in relevant part that "[i]n assessing the amount of the civil penalty, *the court* shall consider any one or more of the relevant circumstances presented by any of the parties to the case, including, but not limited to, the following: the nature and seriousness of the misconduct, the number of violations, the persistence of the misconduct, the length of time over which the misconduct occurred, the willfulness of the defendant's misconduct, and the defendant's assets, liabilities, and net worth." (Stats. 1992, ch. 430, § 4, pp. 1707, 1708, italics added.) Nothing in these further amendments suggests that in an action under the UCL in **[****18]** which the government seeks civil penalties as well as injunctive or other equitable relief, the Legislature intended that the action would be tried by a jury rather than by the trial court, and ***HN3***[] the language of *Business and Professions Code section 17206, subdivision (b)* clearly indicates that the amount of civil penalties is intended to be determined by the court.[7]

---

[6] The 1933 amendment also defined "unfair competition" to include any violation of the then-existing provisions of *Penal Code former sections 654a*, *654b*, or *654c*, all of which prohibited different specific forms of false advertising. (Stats. 1933, ch. 953, § 1, p. 2482 [*Civ. Code, former § 3369, subd. (3)*].)

[7] In the statewide election held in November 2004, the voters approved Proposition 64, an initiative statute that restricted the kinds of private plaintiffs that may seek an injunction or other equitable relief under the UCL or the FAL (*Bus. & Prof. Code, §§*

CA(4)[] **(4)** **[***723]** The factors just discussed—namely (1) the origin of the government's cause of action under the UCL as an action simply to enjoin an unfair business practice and (2) the language of the statutory provision relating to the awarding of civil penalties in such an action—clearly support the conclusion that the Legislature, in enacting the UCL, intended to create an equitable, rather than a legal, cause of action. Furthermore, from the statute's inception, California decisions interpreting and applying both the provisions of former *section 3369 of the Penal Code* and its current counterparts have explained that *HN4*[] the **[*300]** exceedingly broad and general language that the Legislature incorporated in the statute to define the business practices that are proscribed by the statute—in the original language, "unfair or fraudulent business practice and unfair, untrue, or misleading advertising"—was adopted with the specific understanding **[****19]** that this broad language would be applied *by a court of equity* in determining whether a challenged business practice violated the statutory prohibition.

CA(5)[] **(5)** For example, in *Barquis v. Merchants Collection Assn. (1972) 7 Cal.3d 94 [101 Cal. Rptr. 745, 496 P.2d 817]* (*Barquis*)—one of this court's seminal decisions applying the UCL—we emphasized that past cases under the statute "have frequently noted that the section was intentionally framed in its broad, sweeping language, precisely to enable *judicial tribunals* to deal with the innumerable '"new schemes which the fertility of man's invention would contrive."'" (*Barquis, at p. 112*, italics added.) Quoting from *American Philatelic Soc. v. Claibourne (1935) 3 Cal.2d 689, 698–699 [46 P.2d 135]*—one of the earliest decisions discussing the appropriate reach of the broad language of the statute at issue—*Barquis* observed: *HN5*[] "'When a scheme is evolved which on its face violates the fundamental rules of honesty and fair dealing, *a court of equity* is not impotent to frustrate its consummation because the scheme is an original one. There is a maxim as old as law that there can be no right without a remedy, and in searching for a precise precedent, *an equity court* must not lose sight, not only of its power, but of its duty to arrive at a just **[**470]** solution of the problem.'" (*Barquis, supra, 7 Cal.3d at p. 112*, italics added.)

CA(6)[] **(6)** The objective that the Legislature sought to accomplish **[****20]** through its adoption of the broad standard embodied in the UCL fits perfectly with the role historically exercised by a court of equity. As Pomeroy explained in his classic treatise on equity jurisprudence: *HN6*[] "[Equity is] much more elastic and capable of expansion and extension to new cases than the common law. Its very central principles, its foundation upon the eternal verities of right and justice, its resting upon the truths of morality rather than upon arbitrary customs and rigid dogmas, necessarily gave it this character of flexibility, and permitted its doctrines to be enlarged so as to embrace new cases as they constantly arose. It has, therefore, as an essential part of its nature, a capacity of orderly and regular growth—a growth not arbitrary, according to the will of individual judges—but in the direction of its already settled principles. **[***724]** It is ever reaching out and expanding its doctrines so as to cover new facts and relations, but still without any break or change in the principles or doctrines themselves." (1 Pomeroy, Equity Jurisprudence (5th ed. 1941) § 59, p. 76.) As the Court of Appeal observed in *A-C Co. v. Security Pacific Nat. Bank (1985) 173 Cal.App.3d 462, 473 [219 Cal. Rptr. 62]*: "The tradition and heredity of the flexible equitable powers of the modern **[****21]** trial judge derive from the role of the trained and experienced chancellor and depend upon **[*301]** skills and wisdom acquired through years of study, training and experience which are not susceptible of adequate transmission through instructions to a lay jury."[8]

17203, *17204*, *17535*) and provided that the revenue from the civil penalties imposed under the UCL or the FAL may be used only by the Attorney General and local public prosecutors for the enforcement of consumer protection laws. (*Bus. & Prof. Code, §§ 17206, subd. (c)*, *17536, subd. (c)*.) The changes effectuated by Proposition 64 have no direct bearing on the issue before us.

[8] The very broad consumer protective language set forth in the UCL closely tracks the broad language that Congress embodied in the *Federal Trade Commission Act (15 U.S.C. § 41 et seq.)* to reach business practices that were not specifically forbidden by the common law or other statutes. (See *15 U.S.C. § 45(a)* ["Unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce" are declared unlawful]; see generally Baker & Baum, *Section 5 of the Federal Trade Commission Act: A Continuing Process of Redefinition* (1962) 7 Vill. L.Rev. 517, 525–542.) California decisions have long recognized the close relationship between the language of the UCL and the Federal Trade Commission Act. (See, e.g., *People ex rel. Mosk v. National Research Co. (1962) 201 Cal.App.2d 765, 772–773 [20 Cal. Rptr. 516]*.)

The United States Supreme Court, in discussing the Federal Trade Commission's exercise of its authority to determine whether a trade practice is "unfair" under the *Federal Trade Commission Act* in *FTC v. Sperry & Hutchinson Co. (1972) 405 U.S. 233,* Over the more than 80-year history of the UCL, scores of decisions of both this court and the Courts of Appeal have uniformly recognized that the cause of action established by this statute is equitable in nature. (See, e.g., *Solus Industrial Innovations, LLC v. Superior Court (2018) 4 Cal.5th 316, 340 [228 Cal. Rptr. 3d 406, 410 P.3d 32]* [the UCL "'provides an *equitable* means through which both public prosecutors and private individuals can bring suit to prevent unfair business practices'" (italics added & omitted)]; *Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 1144 [131 Cal. Rptr. 2d 29, 63 P.3d 937]* ["A UCL action is equitable in nature; damages cannot be recovered. … Civil penalties may be assessed in public unfair competition actions, but the law contains no criminal provisions" (citation omitted)].)

In *Cel-Tech, supra, 20 Cal.4th 163*, our court addressed questions arising from the expansive scope of the language of the UCL in a case in which the plaintiff cell phone vendor challenged the business practices of the defendant competitor cell phone **[****22]** company as unfair under the UCL. In that case, the plaintiff contended that the defendant had assertedly taken improper advantage of its privileged position as one of only two cell phone companies licensed to provide cellular service in the Los Angeles area when it engaged in the practice of selling **[**471]** cell phones to its cellular service customers at below cost. In *Cel-Tech*, we noted that our court had not yet defined the term "unfair" as used in the UCL and determined that although two Court of **[*302]** Appeal decisions **[***725]** had attempted such a definition,[9] the suggested definitions in those appellate decisions were "too amorphous and provide too little guidance to courts and businesses." (*Cel-Tech, at p. 185*.)

CA(7)[] **(7)** Thereafter, in devising "a more precise test for determining what is unfair under the unfair competition law," the court in *Cel-Tech* "turn[ed] for guidance to the jurisprudence arising under the 'parallel' [citation] *section 5 of the Federal Trade Commission Act (15 U.S.C. § 45(a)*)," observing that ***HN7***[] "'[i]n view of the similarity of language and obvious identity of purpose of the two statutes, decisions of the federal court on the subject are more than ordinarily persuasive.'" (*Cel-Tech, supra, 20 Cal.4th at p. 185*.) ***CA(8)***[] **(8)** After describing a number of federal high court decisions **[****23]** considering the types of practices that would be considered "'unfair methods of competition'" between competitors under *section 5 of the Federal Trade Commission Act (FTC Act)* (*Cel-Tech, at p. 186*)—federal decisions that the *Cel-Tech* court emphasized it considered persuasive but not "controlling or determinative" (*id. at p. 186, fn. 11*)—the court in *Cel-Tech* concluded that "to guide courts and the business community adequately and to promote consumer protection, ***HN8***[] we must require that any finding of unfairness to competitors under [*Business and Professions Code] section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. We thus adopt the following test: *When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes section 17200 [(the relevant provision of the UCL)], the word 'unfair' in that section means conduct that threatens an incipient violation of an **antitrust law**, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition*" (*20 Cal.4th at pp. 186–187*, italics added).

HN9[] ***CA(9)***[] **(9)** It is clear from both the language and nature of the test adopted in *Cel-Tech*—that is, whether the challenged business practice **[****24]** "threatens an incipient violation of an ***antitrust law***" or "violates the policy or spirit of one of those laws"—that such a standard is one that may reasonably be applied only by a court. (*Cel-Tech, supra, 20 Cal.4th at p. 187*.) This standard is too indeterminate to be adequately conveyed by jury instructions or applied by a jury. Indeed, the *Cel-Tech* court's detailed description of the analysis that would have to be undertaken on remand of that case in determining whether the challenged practice meets the test of unfairness

---

244 [31 L.Ed.2d 170, 92 S.Ct. 898], concluded that "legislative and judicial authorities alike convince us that the Federal Trade Commission does not arrogate excessive power to itself if, in measuring a practice against the elusive, but congressionally mandated standard of fairness, it, *like a court of equity*, considers public values beyond simply those enshrined in the letter or encompassed in the spirit of antitrust laws." (Italics added.)

[9] See *People v. Casa Blanca Convalescent Homes, Inc. (1984) 159 Cal.App.3d 509, 530 [206 Cal. Rptr. 164]*, which stated that "an 'unfair' business practice occurs when it offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers," and *State Farm Fire & Casualty Co. v. Superior Court (1996) 45 Cal.App.4th 1093, 1104 [53 Cal. Rptr. 2d 229]*, which declared that in determining whether a business practice is unfair "'the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim.'"

adopted in *Cel-Tech* **[*303]** makes it clear that our opinion in that case recognized that the test was to be applied by the trial court and not a jury. (See *Cel-Tech, supra, 20 Cal.4th at pp. 188–191*; cf. *F. T. C. v. Motion Picture Adv. Co. (1953) 344 U.S. 392, 396 [97 L.Ed. 426, 73 S.Ct. 361]* ["The point where a method of competition becomes 'unfair' … will often turn on the exigencies of a particular situation, trade **[***726]** practices, or the practical requirements of the business in question"].)

The court in *Cel-Tech* explicitly noted that the case before it involved "an action by a competitor alleging anticompetitive practices" and emphasized that the specific test adopted in that decision was limited to that context and did not apply to "actions by consumers or by competitors alleging other kinds of violations of the unfair competition **[****25]** law." (*Cel-Tech, supra, 20 Cal.4th at p. 187,* ***[**472]*** *fn. 12*.) Subsequent to the decision in *Cel-Tech*, our court has not addressed the question whether in actions under the UCL brought on behalf of consumers rather than competitors, the term "unfair" in the UCL needs to be similarly defined in a more prescribed standard or test, and, if so, what that test should be. In the years since *Cel-Tech*, a split of authority has developed in the Courts of Appeal with regard to the proper test for determining whether a business practice is unfair under the UCL in consumer cases, with appellate decisions adopting three different tests for determining unfairness in the consumer context. (See, e.g., *Zhang v. Superior Court (2013) 57 Cal.4th 364, 380, fn. 9 [159 Cal. Rptr. 3d 672, 304 P.3d 163]* [describing split of authority].)[10] The issue of the proper test for defining the term "unfair" as used in **[*304]** the UCL in the consumer context is not raised in the present case, and we have no occasion to address it here. Nonetheless, we note that all the tests that have been proposed in the appellate court decisions are ones that, like the test adopted in *Cel-Tech*, can reasonably be applied only by courts, rather than by juries.

CA(10)[] **(10)** Accordingly, ***HN10***[] both (1) the fact that the cause of action under the UCL originated solely as an action to enjoin an **[****26]** unfair or misleading business practice—an equitable action triable only by a court and not a jury—and (2) the fact that the broad and general standard of unfair competition that was incorporated into the statute contemplated **[***727]** that the standard would be applied by a court exercising its traditional, flexible equitable authority rather than by a jury, support the conclusion that the Legislature, in enacting the UCL, intended that a cause of action under the UCL would be tried by the court and not a jury, even when the government seeks civil penalties as well as injunctive relief.

CA(11)[] **(11)** We note that ***HN11***[] the nature of the principal issue presented in a great many UCL actions additionally supports the conclusion that such causes of action were intended to be decided by the court rather than

---

[10] One line of Court of Appeal decisions has held that a balancing test, which the *Cel-Tech* court declined to adopt in the competitor context (see *Cel-Tech, supra, 20 Cal.4th at pp. 184–185*), should nonetheless be applied in the consumer context, under which the determination whether a business practice is unfair to consumers """involves an examination of [that practice's] impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim."'" (*Smith v. State Farm Mutual Automobile Ins. Co. (2001) 93 Cal.App.4th 700, 718 [113 Cal. Rptr. 2d 399]*; see, e.g., *Ticconi v. Blue Shield of California Life & Health Ins. Co. (2008) 160 Cal.App.4th 528, 539 [72 Cal. Rptr. 3d 888]*; cf. *FTC v. Sperry & Hutchinson Co., supra, 405 U.S. 233, 244–245, fn. 5* [quoting with approval similar test adopted by FTC in 1964 for determining unfairness under *§ 5 of the FTC Act]*.)

A second line of Court of Appeal decisions has adopted what has been termed a "tethering test," requiring that "the public policy which is a predicate to [a consumer unfair competition action under the "unfair" prong of the UCL] must be 'tethered' to specific constitutional, statutory or regulatory provisions" in a manner similar to which *Cel-Tech* requires a competitor's cause of action to be tethered to the antitrust laws. (*Gregory v. Albertson's, Inc. (2002) 104 Cal.App.4th 845, 854 [128 Cal. Rptr. 2d 389]*; see, e.g., *Scripps Clinic v. Superior Court (2003) 108 Cal.App.4th 917, 940 [134 Cal. Rptr. 2d 101]*.)

A third line of Court of Appeal cases has adopted the three-part definition of unfairness applied under section 5 of the FTC Act since 1980, namely that: "(1) The consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided." (*Camacho v. Automobile Club of Southern California (2006) 142 Cal.App.4th 1394, 1403 [48 Cal. Rptr. 3d 770]*; see, e.g., *Rubenstein v. The Gap, Inc. (2017) 14 Cal.App.5th 870, 880 [222 Cal. Rptr. 3d 397]*.) This test has sometimes been termed the "*section 5* test."

a jury. A cursory review of the numerous UCL actions that have been brought in recent years (see Stern, Cal. Practice Guide: *Bus. & Prof. Code § 17200* Practice (The Rutter Group 2019) ¶ 3:131, pp. 3-39 to 3-44 [describing 41 recent UCL cases]) reveals that such cases often concern a nuanced and qualitative determination regarding whether a business practice should properly be considered unfair or deceptive within the meaning of the UCL. (See, **[****27]** e.g., *Klein v. Chevron U.S.A., Inc. (2012) 202 Cal.App.4th 1342, 1376–1382 [137 Cal. Rptr. 3d 293]* [considering whether failing to sell temperature-adjusted motor fuel or to **[**473]** disclose the effect of temperature increases on the volume of fuel sold could constitute an unfair or fraudulent business practice]; *Jolley v. Chase Home Finance, LLC (2013) 213 Cal.App.4th 872, 907–908 [153 Cal. Rptr. 3d 546]* [considering whether bank's practice of "dual tracking"—agreeing to a loan modification while continuing to pursue foreclosure—could constitute an unfair or fraudulent business practice].) This type of qualitative determination—often requiring the consideration of a variety of factors or circumstances identified in prior cases in California or other jurisdictions or in administrative guidelines developed by the Federal Trade Commission or other consumer protection administrative agencies—is the type of decision that has traditionally been viewed as the province of courts rather than juries.
[*305]

Moreover, we have emphasized that "'the overarching legislative concern [in enacting the UCL is] to provide a *streamlined* procedure for the prevention of ongoing or threatened acts of unfair competition'" (*Cortez v. Purolator Air Filtration Products Co. (2000) 23 Cal.4th 163, 173–174 [96 Cal. Rptr. 2d 518, 999 P.2d 706]*), an objective that is inconsistent with the unavoidable delays and increased costs inherent in a jury, as compared to a court, trial. Furthermore, having a court, rather than **[****28]** a jury, decide the question whether a business practice is properly considered unfair or deceptive for purposes of the UCL has the additional significant benefit—for both defendants and plaintiffs—of facilitating appellate review of that determination, because a trial court, unlike a jury, is required to provide, upon request of any party, "a statement of decision explaining the factual and legal basis for its decision." (*Code Civ. Proc., § 632*.) And having appellate courts in the position in which they can adequately review trial courts' evaluations of the validity of business practices under the UCL, in turn, promotes the creation of a cumulative body of precedent that improves the consistency of future determinations under the UCL and provides needed guidance to companies in the formulation of their business practices.

CA(12)[] **(12)** In sum, for all of the foregoing reasons, we believe that it is clear that ***HN12***[] the Legislature intended that a cause of action under the UCL—including an action brought by the government that seeks both injunctive relief and civil penalties—is to be tried by the court rather than by a jury.

B. *The FAL*

HN13[] ***CA(13)***[] **(13)** The FAL (*Bus. & Prof. Code, § 17500 et seq.*) has been accurately described as "the **[***728]** major California legislation designed **[****29]** to protect consumers from false or deceptive advertising." (*People v. Superior Court (Olson) (1979) 96 Cal.App.3d 181, 190 [157 Cal. Rptr. 628]*.) The procedures set forth in the FAL and the UCL are in many respects parallel to one another, and the UCL specifically provides that any practice that violates the FAL is also prohibited by the UCL. (See *Bus. & Prof. Code, § 17200*.)

The original version of the FAL creating a civil cause of action was enacted in 1941. (Stats. 1941, ch. 63, § 1, pp. 727–729 [enacting *Bus. & Prof. Code, §§ 17500–17535*].)[11] The statute broadly prohibited false or misleading **[*306]** advertising, declaring that it is unlawful for any person or business to make or distribute any

---

[11] The FAL traces its origin to the 1915 version of former *section 654a of the Penal Code* (Stats. 1915, ch. 634, § 1, pp. 1252–1253), which, in turn, was based upon a model false advertising statute that was first proposed in 1911 in *Printer's Ink* magazine, an advertising journal. (See Note, *The Regulation of Advertising* (1956) 56 Colum. L.Rev. 1018, 1058; Note, *Enforcing California's False Advertising Law: A Guide to Adjudication* (1974) 25 Hastings L.J. 1105, 1106.) The 1911 model statute proposed to make it a misdemeanor to publish an advertisement containing "'any assertion, representation or statement of fact which is untrue, deceptive or misleading'" and was quite stringent, omitting any requirement that the advertiser be shown to have intended to deceive or to know the improper character of the advertisement. (Note, *The Regulation of Advertising, supra*, 56 Colum. L.Rev. at pp. 1058–1059 & fn. 245.) In adopting the statute in California in 1915, however, the Legislature added a scienter requirement, requiring a showing that the advertiser knew or, in the exercise of reasonable care, should have known of the false, deceptive or misleading character of the advertisement. (Stats. 1915, ch. 634, § 1, pp. 1252–1253.)

statement to induce the public to enter into a transaction "which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, **[**474]** to be untrue or misleading." (*Bus. & Prof. Code, § 17500*.) Like the civil cause of action authorized by the original version of the UCL, the FAL, as originally enacted, explicitly authorized only injunctive relief (*Bus. & Prof. Code, former § 17535*), permitting civil actions for injunction under the act to be prosecuted by the Attorney General or any district attorney on behalf of the People, and also "by any [entity or] person acting for the interests of itself, its members or the general public." (*Ibid.*) Because **[****30]** the civil action established by the 1941 legislation authorized only injunctive relief, it is clear that, as originally enacted, a civil action under the FAL, like that under the UCL as originally enacted, was equitable in nature and was intended to be tried by a court and not a jury. Again, Nationwide does not argue otherwise.

In 1965, the Legislature added *Business and Professions Code section 17536* to the FAL, authorizing the Attorney General or a district attorney, but not a private party, to seek a civil penalty not to exceed $2,500 for each violation of the FAL. (Stats. 1965, ch. 827, § 1, pp. 2419–2420.) The enactment of *section 17536* as part of the FAL in 1965 predated the enactment in 1972 of the comparable provision of the UCL, discussed above, authorizing the Attorney General or a district attorney to seek civil penalties as well as injunctive relief in an action under the UCL. (See, *ante*, pp. 297–298.) As with the comparable provision of the UCL, the legislative history of the 1965 enactment of *section 17536* indicates that the legislation was introduced at the request of the Attorney General to provide an additional remedy in actions **[****31]** to enjoin fraudulent sales schemes. (See Assemblyman George E. Danielson, letter to Gov. Edmund G. Brown, June 14, 1965 [urging approval of 1965 bill introduced by Danielson].) Nothing in the legislative history of the 1965 enactment indicates any legislative **[***729]** intent to change the nature of a civil action under the FAL from an equitable action that is tried to the court to one that is tried by a jury. As under the UCL, actions under the FAL that were filed by private parties, in which injunctive relief was the prescribed remedy, continued to be tried by the court, not a jury.

In *People v. Superior Court (Jayhill Corp.) (1973) 9 Cal.3d 283 [107 Cal. Rptr. 192, 507 P.2d 1400]* (*Jayhill*), this court addressed a number of **[*307]** issues arising in a civil action filed by the Attorney General under the FAL in which the Attorney General sought injunctive relief, restitution and civil penalties for alleged false and misleading advertising engaged in by door-to-door encyclopedia salespersons. The trial court had permitted the action to go forward with respect to injunctive relief but had struck all other forms of relief.

CA(14)[] **(14)** On appeal, the court in *Jayhill* first addressed the question of the availability of restitution in an FAL action under *Business and Professions Code section 17535*. At the time the complaint in *Jayhill* was filed, *section 17535* provided **[****32]** simply "that false or misleading advertising 'may be enjoined' in an action by the Attorney General, but was silent as to the power of the trial court to order restitution in such a proceeding." (*Jayhill, supra, 9 Cal.3d at p. 286*.) Relying on the general principle that ***HN14***[] "[i]n the absence of such a restriction *a court of equity* may exercise the full range of its inherent powers in order to accomplish complete justice between the parties, restoring if necessary the *status quo ante* as nearly as may be achieved," the *Jayhill* court held that "in an action by the Attorney General under *section 17535* a trial court has the inherent power to order, as a form of ancillary relief, that the defendants make or offer to make restitution to the customers found to have been defrauded." (*Ibid.,* first italics added.)[12] Thus, the court in *Jayhill* clearly recognized that a civil action under the FAL is an equitable action triable to the court.

[475]** ***CA(15)***[] **(15)** In *Jayhill, supra, 9 Cal.3d 283*, this court also addressed a separate issue concerning the application of *Business and Professions Code section 17536*, the provision of the FAL authorizing the trial court to impose civil penalties in a civil action under the FAL. We found that the trial court in that case had erred in determining that "'each claim for penalty is a separate **[****33]** cause of action'" which must be separately stated, concluding instead that "[*t*]*he Attorney General has only one cause of action against a particular defendant for violating section 17500; for this he seeks several forms of relief, including the civil penalty of $2,500 set forth in*

[12] After the trial court ruling but prior to our decision in *Jayhill*, the Legislature had explicitly amended *Business and Professions Code section 17535* to authorize the court to order restitution as well as injunctive relief. (Stats. 1972, ch. 244, § 1, p. 494.) In *Jayhill*, the court found that in light of its legislative history, the 1972 amendment was not intended "to create a new power in the trial court but simply to clarify existing law on the point." (*Jayhill, supra, 9 Cal.3d at p. 287, fn. 1*.)

section 17536. Since multiple victims are involved he prays for a penalty for each violation, but this does not elevate each violation to a separate cause of action. … We hold that **HN15**[] the Attorney General has only one cause of action against a defendant for violating section 17500, but that the amount of civil penalties which may be imposed under section 17536 is dependent upon the number of 'violations' committed by a defendant." (9 Cal.3d at p. 288, italics added.) Because, as **[*308]** we have seen, the court in *Jayhill* had already **[***730]** explained that the cause of action for violating section 17500 is an equitable action (Jayhill, at p. 286), the clear implication of the decision in *Jayhill* is that even when the Attorney General or a district attorney seeks civil penalties as well as injunctive relief in such an action, the action under the FAL remains an equitable action, and, as such, is to be tried by the court, rather than by a jury.

In 1992, Business and Professions Code section 17536 was amended to provide that "[i]n assessing the amount of the civil penalty, **[****34]** *the court* shall consider any one or more of the relevant circumstances presented by any of the parties to the case, including, but not limited to, the following: the nature and seriousness of the misconduct, the number of violations, the persistence of the misconduct, the length of time over which the misconduct occurred, the willfulness of the defendant's misconduct, and the defendant's assets, liabilities, and net worth." (Stats. 1992, ch. 430, § 5, pp. 1708, 1709, italics added.) This wording directly tracks the language that was added to section 17206 of the UCL in the same 1992 legislation. (See, *ante*, p. 299.) Again, this terminology makes it clear that the Legislature intended that the amount of civil penalties under the FAL is to be determined by the court, not by a jury.

As with respect to the UCL, past decisions of both this court and the Courts of Appeal have consistently described the civil cause of action authorized by the FAL as an equitable action that is to be tried by the court rather than a jury, including when the action is one brought by a government attorney and seeks civil penalties as well as injunctive relief. (See, e.g., Jayhill, supra, 9 Cal.3d at p. 286; Fletcher v. Security Pacific National Bank (1979) 23 Cal.3d 442, 452 [153 Cal. Rptr. 28, 591 P.2d 51] ["the basic equitable principles underlying [Business and Professions Code] section 17535 arm the trial court with broad **[****35]** discretionary power … '… to accomplish complete justice between the parties'"]; People v. Overstock.com, Inc. (2017) 12 Cal.App.5th 1064, 1091 [219 Cal. Rptr. 3d 65] (*Overstock.com*) [the ""equitable …" … "… remedial power granted under [the UCL and the FAL] is extraordinarily broad"" (citation omitted)].)

HN16[] **CA(16)**[] **(16)** Like the choice of the term "unfair" in the UCL, the governing substantive standard of the FAL—prohibiting advertising that is "untrue or *misleading*" (Bus. & Prof. Code, § 17500, italics added)—is set forth in broad and open-ended language that is intended to permit a court of equity to reach any novel or creative scheme of false or misleading advertising that a deceptive business may devise. (See, e.g., Kwikset Corp. v. Superior Court (2011) 51 Cal.4th 310, 320 [120 Cal. Rptr. 3d 741, 246 P.3d 877]; Overstock.com, supra, 12 Cal.App.5th 1064, 1091 ["'"Probably because false advertising and unfair business practices can take many forms, the **[*309]** Legislature has given the courts the power to fashion remedies to prevent their 'use or employment' in whatever context they may occur"'"].) As this court explained in Kasky v. Nike, Inc. (2002) 27 Cal.4th 939 [119 Cal. Rptr. 2d 296, 45 P.3d 243], the FAL prohibits "'not **[**476]** only advertising which is false, but also advertising which[,] although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public.' [Citation.] Thus, to state a claim under either the UCL or the false advertising law, based on false advertising or promotional practices, 'it **[****36]** is necessary only to show that "members of the public are likely to be deceived."'" (Kasky, at p. 951, quoting Leoni v. State Bar (1985) 39 Cal.3d 609, 626 [217 Cal. Rptr. 423, 704 P.2d 183] and Committee on Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 211 [197 Cal. Rptr. 783, 673 P.2d 660] (*Com. on Children's Television*).)[13]

CA(17)[] **(17)** **[***731]** It is true that **HN17**[] the broad reach and scope of the FAL's untrue or misleading standard is often framed in language (whether members of the public are likely to be deceived) that is not, on its face, beyond the ken of a jury. As employed in the FAL (as well as in the UCL), however, a determination that advertising poses a sufficient risk or tendency to deceive or confuse the public may potentially result in an injunctive

[13] As noted above (*ante*, p. 297), the UCL contains an overlapping prohibition of impermissible advertising, barring, in addition to "any unlawful, unfair or fraudulent business act or practice," any "unfair, deceptive, untrue or misleading advertising." (Bus. & Prof. Code, § 17200.)

order prohibiting what may be a common and widely utilized advertising, labeling, or promotional practice. (See, e.g., *Chern v. Bank of America (1976) 15 Cal.3d 866, 875–876 [127 Cal. Rptr. 110, 544 P.2d 1310]* [challenge to common bank practice of calculating interest rate advertised as "'per annum'" on the basis of a 360-day year]; *Com. on Children's Television, supra, 35 Cal.3d 197, 205–215, 222–223* [challenge to children's television advertising representing that breakfast foods with high sugar content are "'healthful and nutritious,'" and labeling such foods ""cereals"" rather than "'candy breakfasts'"].) In the FAL and UCL settings, this standard—whether members of the public are likely to be deceived—has been understood to call for the exercise of the type of equitable discretion **[****37]** and judgment traditionally employed by a court of equity. ***CA(18)***[] **(18)** As in the case of the UCL, ***HN18***[] the crucial issue in cases under the FAL does not typically involve the type of ordinary factfinding assigned to a jury, but rather calls for an equitable judgment to determine whether an often undisputed advertising or promotional practice presents a sufficient tendency to deceive or confuse the public so as to support invocation of the FAL's remedies. As the breadth of the cases arising under the FAL attests, this determination calls for consideration of a wide variety of factors that prior cases and past administrative experience have shown may render an affirmative statement (or a failure to disclose) in a product label, packaging, **[*310]** or in other advertising or promotional practices misleading in a particular context.[14] And, again as in the UCL context (see *ante*, pp. 304–305), given the capacity of the FAL's standard to be applied expansively to encompass all of the novel ways in which advertising or promotional material may be misleading, it is important that trial courts are required to set forth their reasoning for a determination that the FAL has been violated so that a body of precedent can evolve to **[****38]** inform businesses of advertising practices they must avoid.

In *Brady v. Bayer Corp. (2018) 26 Cal.App.5th 1156 [237 Cal. Rptr. 3d 683]*, for example, the Court of Appeal determined that the One A Day label on a bottle of gummy vitamins that required, in "miniscule" instructions on the back of the label (*id. at p. 1159*), that *two* gummies be taken daily to provide the recommended daily vitamin dosage was sufficiently potentially misleading to support **[***732]** a cause of action for violation of the FAL. The *Brady* court pointed out that despite the well understood traditional meaning of the One A Day brand, consumers who take one gummy a day "end up receiving only half the daily vitamin coverage **[**477]** they think they are getting." (*Brady, at p. 1160*.) In the course of its opinion, the *Brady* court discussed at some length a number of factors that past decisions had considered and balanced in determining whether a product label could be found sufficiently misleading to violate the FAL, including "common sense," the factual context in which literally true or literally false statements are made, the degree to which back-of-the-label qualifiers ameliorate any tendency to mislead, and the tendency of particular brand names to mislead. (*Brady, at pp. 1165–1174*.) Considering these factors **[****39]** as a whole, the *Brady* court found that the One A Day label had a sufficient "'capacity, likelihood or tendency to deceive or confuse the public'" to support a cause of action under the FAL. (*Brady, at p. 1173*.)

As a further example, in *Day v. AT & T Corp. (1998) 63 Cal.App.4th 325 [74 Cal. Rptr. 2d 55]*, the Court of Appeal determined that although the defendant phone company's policy of rounding up charges for phone calls longer than a minute to the next full minute was permissible under the "filed rate" doctrine, the failure of the packaging of defendant's prepaid phone cards to disclose this rounding-up practice was sufficiently misleading to violate the FAL. In reaching this conclusion, the *Day* court considered but distinguished two earlier out-of-state decisions that had rejected a claim by ordinary phone subscribers that a telephone company's failure to disclose the rounding-up practice was misleading. The court relied on the fact that unlike ordinary phone bills that disclosed to consumers that all phone calls were **[*311]** charged for full minutes, "[t]he phone cards in question, whose outer packagings do not reveal the practice of rounding up, are *prepaid.* A consumer cannot read any materials provided by the carrier with the card *before* buying the card, which will advise **[****40]** him or her of the practice. Based on the advertising a consumer will not know that whole minutes are being credited for each fraction of a minute until the card has been used." (*Day, at p. 334*.) Under these circumstances, the *Day* court concluded "that the practices alleged here were likely to mislead, confuse or deceive members of the public." (*Ibid.*)

---

[14] For a general discussion of the numerous and complex factors and considerations that may affect the determination whether advertising should properly be viewed as deceptive or misleading, see *Developments in the Law—Deceptive Advertising* (1967) 80 Harv. L.Rev. 1005, 1038–1063.

And in *Overstock.com, supra, 12 Cal.App.5th 1064*, the Court of Appeal upheld a trial court finding that the defendant online bargain retailer had violated the FAL through its online advertising practices. The defendant had used a number of different methods to indicate the purported bargain nature of its prices. At first, its advertisements displayed a "list price" that was shown stricken through, along with the retailer's own lower price and the difference that the consumer would assertedly save. Later, the advertisements changed "list price" to "'Compare at,'" and thereafter, to "Compare." The evidence at trial showed, however, that (1) the defendant failed to have a reliable procedure in place to verify that the comparator prices were realistic and (2) that the prices being compared frequently were not for the same or similar item. In affirming the trial court's finding that the challenged **[****41]** advertising was false or misleading within the meaning of the FAL, the *Overstock.com* court relied in part on the Federal Trade Commission (FTC) Guides Against Deceptive Pricing (16 C.F.R. § 233 (2019)). (*Overstock.com, supra, 12 Cal.App.5th at p. 1081*.) That FTC guide sets forth in considerable detail the numerous ways in **[***733]** which advertised pricing practices may be misleading or deceptive. (See *16 C.F.R. §§ 233.1–233.5 (2019)*.) Specifically with respect to retail value comparisons, the guide provides that the advertiser "should be reasonably certain that the higher price he advertises does not appreciably exceed the price at which substantial sales of the article are being made in the area—that is, a sufficient number of sales so that a consumer would consider a reduction from the price to represent a genuine bargain or saving" and also that the compared merchandise is "of essentially similar quality and obtainable in the area." (*16 C.F.R. § 233.2(a)*, *(c) (2019)*.)

CA(19)[] **(19)** The Court of Appeal decision in *Overstock.com* illustrates that, as with the determination whether a business practice is unfair within the meaning of the UCL, ***HN19***[] the complexities and nuances that are often involved **[**478]** in the determination whether an advertisement should properly be considered untrue or misleading for purposes **[****42]** of the FAL are often ameliorated by judicial reference to the relevant guidelines developed by the FTC regarding deceptive advertising. (See generally Stern, Cal. Practice Guide: *Bus. & Prof. Code § 17200* Practice, *supra*, ¶¶ 4:46-4:80.4, pp. 4-14 to 4-32.) The great variety and complexity of contexts in which the potentially misleading nature **[*312]** of advertising may arise and must be evaluated can be gleaned from a simple listing of the numerous guidelines, in addition to the Guides Against Deceptive Pricing relied upon in *Overstock*, that the FTC has published relating to deceptive advertising. (See Guides Against Bait Advertising [*16 C.F.R. §§ 238.0–238.4 (2019)*]; Guides for the Advertising of Warranties and Guarantees [*16 C.F.R. §§ 239.1–239.5 (2019)*]; Guides for Advertising Allowances and Other Merchandising Payments and Services [*16 C.F.R. §§ 240.1–240.15 (2019)*]; Guide Concerning Use of the Word "Free" and Similar Representations [*16 C.F.R. § 251.1(a)–(i) (2019)*]; Guides for Private Vocational and Distance Education Schools [*16 C.F.R. §§ 254.0–254.7 (2019)*]; Guides Concerning Use of Endorsements and Testimonials in Advertising [*16 C.F.R. §§ 255.0–255.5 (2019)*]; Guide Concerning Fuel Economy Advertising for New Automobiles [*16 C.F.R. §§ 259.1–259.4 (2019)*]; Guides for the Use of Environmental Marketing Claims [*16 C.F.R. §§ 260.1–260.17 (2019)*].)

And a brief look at just one of these FTC guidelines **[****43]** —the Guides Concerning Use of Endorsements and Testimonials in Advertising—provides a good indication of the type of equitable consideration and evaluation of a substantial variety of factors that often goes into the determination whether advertising is properly considered untrue or misleading for purposes of the FAL. The guide on endorsements declares, for example, that "[e]ndorsements must reflect the honest opinions, findings, beliefs, or experience of the endorser," and that "[a]n advertiser may use an endorsement of an expert or celebrity only so long as it has good reason to believe that the endorser continues to subscribe to the views presented. An advertiser may satisfy this obligation by securing the endorser's views at reasonable intervals where reasonableness will be determined by such factors as new information on the performance or effectiveness of the product, a material alteration in the product, changes in the performance of competitors' products, and the advertiser's contract commitments." (*16 C.F.R. § 255.1(a)*, *(b) (2019)*.) This FTC guide also distinguishes between advertising that uses "consumer endorsements" and advertising that uses "expert endorsements." (*Id.*, *§§ 255.2*, *255.3 (2019)*.) With **[****44]** respect to consumer endorsements, the guide provides in part: "An advertisement employing endorsements by one or more **[***734]** consumers about the performance of an advertised product or service will be interpreted as representing that the product or service is effective for the purpose depicted in the advertisement. Therefore, the advertiser must possess and rely upon adequate substantiation, including, when appropriate, competent and reliable scientific evidence, to support such claims made through endorsements in the same manner the advertiser would be required to do if it had made the representation directly, *i.e.*, without using endorsements." (*Id.*, *§ 255.2(a) (2019)*.) With respect to expert endorsements, the guide requires that "the endorser's qualifications must in fact give the endorser the expertise that he or she is represented as possessing with respect to the endorsement," **[*313]** and that "the endorsement must be supported by an actual exercise of that expertise in evaluating product features or characteristics with respect to which he or she is expert and which are relevant to an ordinary consumer's use of or experience with the product and are available to the ordinary consumer. This evaluation **[****45]** must have included an examination or testing of the product at least as extensive as someone with the same degree of expertise would normally need to conduct in order to support the conclusions presented in the endorsement." (*Id.*, § 255.3(a), (b) (2019).) Further, the guide provides with respect to all endorsers that "[w]hen there exists a connection between the endorser and the seller of the advertised product that might materially affect the weight or credibility of the endorsement (*i.e.*, the connection is not reasonably expected by **[**479]** the audience), such connection must be fully disclosed." (*Id.*, § 255.5 (2019).) Finally, the guide discusses numerous hypothetical examples that further explain the guide's provisions. (See *id.*, §§ 255.1–255.5 (2019).)

CA(20)[] **(20)** Thus, as past FAL decisions and the numerous FTC guidelines indicate, ***HN20***[] the determination whether an advertising or promotional practice should properly be found untrue or misleading within the meaning of the FAL depends upon the exercise of the type of equitable discretion and judgment typically employed by a court of equity. Federal cases examining whether an advertising practice is sufficiently deceptive to violate analogous federal consumer protection statutes **[****46]** also support this conclusion. (See, e.g., *FTC v. Colgate-Palmolive Co. (1965) 380 U.S. 374, 385–392 [13 L.Ed.2d 904, 85 S.Ct. 1035]* [discussing competing considerations involved in determining whether an undisclosed televised mockup of a product demonstration could properly be found to constitute deceptive advertising even if the underlying product claim was true]; *FTC v. Mary Carter Paint Co. (1965) 382 U.S. 46, 47–48 [15 L.Ed.2d 128, 86 S.Ct. 219]* [upholding FTC finding that advertisement offering a free can of paint if the consumer bought a can of the same paint at the advertised price was deceptive when the manufacturer never sold single cans of paint, even if the advertised price was a fair price for a single can of comparable paint]; *FTC v. Direct Marketing Concepts, Inc. (D.Mass. 2008) 569 F.Supp.2d 285, 298–299* [discussing numerous factors to be considered in determining whether an advertiser had sufficient "substantiation for the representation prior to making it in an advertisement" so as to render the advertisement nondeceptive].)[15]

[*314]

CA(21)[] **(21)** **[***735]** Furthermore, past ***HN21***[] FAL decisions also make clear the propriety and importance of a court's exercise of its equitable authority not only in determining whether an advertisement is untrue or misleading, but also in determining (1) the number of violations for which a defendant may properly be held responsible (see, e.g., *Jayhill, supra, 9 Cal.3d 283, 288–289*; *Overstock.com, supra, 12 Cal.App.5th 1064, 1087–1088*; *People v. JTH Tax, Inc. (2013) 212 Cal.App.4th 1219, 1249–1255 [151 Cal. Rptr. 3d 728]*; *People ex rel. Kennedy v. Beaumont Investment, Ltd. (2003) 111 Cal.App.4th 102, 127–130 [3 Cal. Rptr. 3d 429]* (*Beaumont Investment*); *People v. Toomey (1984) 157 Cal.App.3d 1, 22–23 [203 Cal. Rptr. 642]*; *People v. Superior Court (Olson), supra, 96 Cal.App.3d 181, 197–198*), and (2) the reasonable amount of **[****47]** civil penalties to be imposed for each violation. (See, e.g., *Overstock.com, supra, 12 Cal.App.5th at pp. 1087–1091*; *Beaumont Investment, supra, 111 Cal.App.4th at pp. 130–131*; *People v. First Federal Credit Corp. (2002) 104 Cal.App.4th 721, 733–734 [128 Cal. Rptr. 2d 542]*.)

---

[15] At oral argument, counsel for Nationwide suggested that in federal court juries often decide such questions in actions under the FTC Act in which civil penalties are sought. Under the FTC Act, however, civil penalties may be sought only for a defendant's violation of a prior cease and desist order (*15 U.S.C. § 45(l)*, *(m)(1)(B)*) or for a defendant's knowing violation of a specific trade regulation rule (*15 U.S.C. § 45(m)(1)(A)*). Although federal courts have held that there is a right to a jury trial in such actions, the jury in such actions does not determine whether the practice is unfair or deceptive within the meaning of the *FTC Act*, but rather determines only whether the defendant violated the existing cease and desist order or the specific trade regulation rule. (See, e.g., *U.S. v. J.B. Williams Co. (2d Cir. 1974) 498 F.2d 414, 421–430*; *U.S. v. Dish Network, LLC (C.D.Ill. 2010) 754 F.Supp.2d 1002, 1003–1004*; see also *15 U.S.C. § 45(m)(2)* [providing that when the cease and desist order was not issued against the particular defendant from whom civil penalties are sought, upon request "*the court* shall … review the determination of law made by the Commission … that the act or practice which was the subject of such proceeding constituted an unfair or deceptive act or practice in violation of *subsection (a)*" (italics added)].)

CA(22)[] **(22)** In sum, in light of the language and legislative history of the FAL and the relevant judicial precedent, we believe it is clear that, as with the UCL, HN22[] the Legislature intended that the civil cause of action embodied in the FAL would be tried by a court of equity rather than by a jury in all FAL actions, including instances in which the Attorney General or another governmental entity seeks civil penalties for a violation of the FAL as well as injunctive relief.

[**480] IV. Under the California Constitution, Is There a *Constitutional* Right to Jury Trial in a UCL or FAL Action When the People Seek Both Injunctive Relief and Civil Penalties?

As already noted, in our recent decision in *Shaw*, we explained that "even when the language and legislative history of a statute indicate that the Legislature intended that a cause of action established by the statute is to be tried by the court rather than by a jury, if the California constitutional jury trial provision itself guarantees a right to a jury trial in such a cause of action, the Constitution prevails and a jury trial cannot be denied." (*Shaw, supra, 2 Cal.5th at p. 994*.) Thus, we turn to the question whether, **[****48]** notwithstanding the Legislature's intent that such actions be tried by the court rather than a jury, **[*315]** the jury trial provision of the California Constitution itself guarantees a right to jury trial in an action brought by the People under the UCL or the FAL that seeks both injunctive relief and civil penalties.

A. *General California Constitutional Jury Trial Principles*

HN23[] CA(23)[] **(23)** *Article I, section 16 of the California Constitution*—the jury trial provision— **[***736]** states in relevant part that "[t]rial by jury is an inviolate right and shall be secured to all … ." From the outset of our state's history, our courts have explained that this provision was intended *to preserve* the right to a civil jury as it existed at common law in 1850 when the jury trial provision was first incorporated into the California Constitution. (See, e.g., *Cassidy v. Sullivan (1883) 64 Cal. 266 [28 P. 234]*; *Koppikus v. State Capitol Comm'rs (1860) 16 Cal. 248, 253–255*.) As this court observed in *People v. One 1941 Chevrolet Coupe (1951) 37 Cal.2d 283 [231 P.2d 832]* (*One 1941 Chevrolet Coupe*): "'The right to trial by jury guaranteed by the Constitution is the right as it existed at common law at the time the Constitution was adopted. … It is the right to trial by jury as it existed at common law which is preserved; and what that right is, is a purely historical question, a fact which is to be ascertained like any other social, political or legal fact. **[****49]** The right is the historical right enjoyed at the time it was guaranteed by the Constitution.'" (*Id. at pp. 286–287*, citation & fn. omitted.) "Our state Constitution essentially *preserves* the right to a jury in those actions in which there was a right to a jury trial at common law at the time the Constitution was first adopted." (*Crouchman v. Superior Court (1988) 45 Cal.3d 1167, 1175 [248 Cal. Rptr. 626, 755 P.2d 1075]*.)

CA(24)[] **(24)** Pursuant to this historical approach, HN24[] as a general matter the California Constitution affords a right to a jury trial in common law actions at law that were triable by a jury in 1850, but not in suits in equity that were not triable by a jury in 1850. (*C & K Engineering Contractors v. Amber Steel Co. (1978) 23 Cal.3d 1, 8–9 [151 Cal. Rptr. 323, 587 P.2d 1136]* (*C & K Engineering*).) In applying this test, our cases have explained that the *form* or *title* of a statutory cause of action is not controlling and that if the *substance* of the cause of action is one that would have been triable by a jury at common law, there is a right to a jury trial even if the statute's designation might suggest that it is an equitable proceeding. (See, e.g., *One 1941 Chevrolet Coupe, supra, 37 Cal.2d at p. 299*.) "'In determining whether the action was one triable by a jury at common law, the court is not bound by the form of the action but rather by the nature of the rights involved and the facts of the particular case—the gist of the action. A jury trial must **[****50]** be granted where the gist of the action is legal, where the action is in reality cognizable at law.'" (*Ibid.*) In the *One 1941 Chevrolet Coupe* decision, for example, the court held that the gist of the action at issue in that case—a civil lawsuit by **[*316]** the government seeking forfeiture of an automobile that was allegedly used to illegally transport a prohibited drug—was legal because at common law a similar cause of action for forfeiture of otherwise lawful property that was allegedly used for unlawful purposes was triable by a jury in a court of law. (*Id. at pp. 297–300*.) The court ruled that the fact that the statutory provision authorizing the cause of action designated the forfeiture action as a "'special proceeding'" did not change the legal nature of the action. (*Id. at p. 299*.)

[481]** ***CA(25)***[] **(25)** The court in *One 1941 Chevrolet Coupe, supra, 37 Cal.2d 283*, further explained that the fact that the statute under which the forfeiture proceeding in that case was brought was enacted after the adoption of the California Constitution did not in itself bring the statutory cause of action outside the guarantee of the constitutional jury trial provision. The court observed in this regard: ***HN25***[] "'The constitutional right of trial by jury is not to be narrowly construed. It is not limited **[****51]** strictly to those cases in which it existed before **[***737]** the adoption of the Constitution but is extended to cases of like nature as may afterwards arise. It embraces cases of the same class thereafter arising.'" (*One 1941 Chevrolet Coupe, at p. 300*.) In explaining why the lawsuit at issue was of "'like nature'" or "'the same class'" as the common law action at law, the court stated: "'At common law, prior to the adoption of the Constitution, a party against whom the forfeiture of property used in violation of law (then a carriage, wagon, horse or mule, now usually an automobile), was sought to be enforced was entitled to a trial by jury. Consequently such right exists now.'" (*Ibid.*; see also *Franchise Tax Bd. v. Superior Court (2011) 51 Cal.4th 1006, 1012 [125 Cal. Rptr. 3d 158, 252 P.3d 450]* ["We look to whether a claim arising under a modern statute is 'of like nature' or 'of the same class' as a common law right of action"].)

In a case like *One 1941 Chevrolet Coupe* that involves a single cause of action that at common law in 1850 was triable only by a jury, or conversely a case involving a single cause of action that at common law was triable only by the court (see, e.g., *People v. Englebrecht (2001) 88 Cal.App.4th 1236, 1245 [106 Cal. Rptr. 2d 738]* [action for injunctive relief to abate a nuisance]), the determination whether the gist of the action in question **[****52]** is legal or equitable is relatively straightforward. When a case involves multiple causes of action or multiple issues, some of which are legal in nature and would have been triable by a jury at common law and some of which are equitable in nature and would have been triable by the court at common law, the analysis is somewhat more complex.

B. *Cases Involving Severable Legal and Equitable Issues*

HN26[] ***CA(26)***[] **(26)** When the legal and equitable causes of action or issues presented in a case are severable, past California decisions establish that a party retains the **[*317]** right to a jury trial of the severable legal issues and a court trial of the severable equitable issues. (See, e.g., *Connell v. Bowes (1942) 19 Cal.2d 870, 871 [123 P.2d 456]* ["It is now established in this state … that if a complaint states two complete rights of action, one legal and one equitable, a jury trial may be obtained upon the issues raised by the legal cause"]; see generally 7 Witkin, Cal. Procedure, *supra*, Trial, § 86, p. 113 ["Where the action is of a hybrid character, raising both legal and equitable issues, a party is entitled to a jury trial of the severable legal issues"].)

CA(27)[] **(27)** At the same time, California decisions have also repeatedly held that ***HN27***[] when severable legal and equitable causes of action or issues are present in **[****53]** a single proceeding, the trial court generally has authority to determine in what order the matters should be heard, and if the equitable issue is tried by the court first and if the court's resolution of that issue determines a matter that would otherwise be resolved by a jury with regard to the legal claim or issue, the court's resolution of the matter will generally be binding and may leave nothing for a jury to resolve. (See, e.g., *Raedeke v. Gibraltar Sav. & Loan Assn. (1974) 10 Cal.3d 665, 671 [111 Cal.Rptr. 693, 517 P.2d 1157]* (*Raedeke*) ["It is well established that, in a case involving both legal and equitable issues, the trial court may proceed to try the equitable issues first, without a jury … , and that if the court's determination of those issues is also dispositive of the legal issues, nothing further remains to be tried by a jury"].) And although a trial court retains discretion regarding the order in which the issues should be tried, the governing California cases express a preference that the equitable issues be tried first. (See, e.g., *Orange County Water Dist. v. Alcoa Global Fasteners, Inc. (2017) 12 Cal.App.5th 252, 355 [219 Cal. Rptr. 3d 474]* [citing cases].) **[***738]** This general "equity first preference" is a long standing feature of California law and has always been viewed as fully compatible **[**482]** with the right to jury trial embodied in the California Constitution. (See, **[****54]** e.g., *Raedeke, supra, 10 Cal.3d at pp. 670–671*;[16] *Connell v. Bowes, supra, 19 Cal.2d 870, 872*; *Thomson v. Thomson (1936) 7 Cal.2d 671, 682–683 [62 P.2d 358]*; *Angus v. Craven (1901) 132 Cal. 691, 699 [64 P. 1091]* (conc. opn. of

---

[16] In *Raedeke* itself, the court, after confirming the existence and validity of the "equity first preference," held that a plaintiff who brings an action presenting both legal and equitable issues can avoid the potential loss of a jury trial on common issues by electing to forgo the equitable claim and thus removing the equitable issues from the case. (See *Raedeke, supra, 10 Cal.3d at pp. 671–672*.)

Henshaw, J.); Swasey v. Adair (1891) 88 Cal. 179, 180 [25 P. 1119]; Fish v. Benson (1886) 71 Cal. 428, 433–435 [12 P. 454]; Lestrade v. Barth (1862) 19 Cal. 660, 671–672.)[17]

[*318]

C. *Cases Involving Nonseverable Legal and Equitable Issues*

HN28[] **CA(28)**[] **(28)** Unlike proceedings in which multiple legal and equitable causes or issues are severable, when a cause of action involves legal and equitable aspects that are not severable California decisions have relied upon "the gist of the action" standard in determining whether the action should be considered legal or equitable for purposes of the constitutional jury trial issue. (See, e.g., C & K Engineering, supra, 23 Cal.3d 1, 9–11 [in action seeking damages for breach of contract ("in form an action at law") but relying solely on "the equitable doctrine of promissory estoppel," court concluded "[t]he 'gist' of such an action is equitable"]; Central Laborers' Pension Fund v. McAfee, Inc. (2017) 17 Cal.App.5th 292, 344–350 [225 Cal. Rptr. 3d 249] [in action by shareholders seeking money damages for breach of corporate directors' and officers' breach of fiduciary duty, court concluded that the gist of the action was equitable]; Interactive Multimedia Artists, Inc. v. Superior Court (1998) 62 Cal.App.4th 1546, 1552–1556 [73 Cal. Rptr. 2d 462] [in action seeking money damages for breach of a trustee's fiduciary duty, court held that the gist of the action was equitable when, under the applicable Delaware law, the determination of whether a breach occurred turned on a multifactor "'entire fairness test'" that required the application **[****55]** of equitable principles in "weighing various considerations **[***739]** in order to reach a just result"]; Martin v. County of Los Angeles (1996) 51 Cal.App.4th 688, 695–697 [59 Cal. Rptr. 2d 303] [although a tort defendant's claim for "equitable indemnity" seeking recovery of money damages for the proportional fault of a cotortfeasor involved application of equitable principles, court concluded the gist of the claim was legal because ascertaining the relative fault of cotortfeasors for equitable indemnity "'involves determinations of rights and liabilities traditionally arising in common law suits for negligence'"].) In our decision in *C & K Engineering*, we noted that "[a]lthough we have said that 'the legal or equitable nature of a cause of action ordinarily is determined by the mode of relief to be afforded' … , the prayer for relief in a particular case is not conclusive" and "'[t]he fact that damages is one of a full range of possible remedies does not guarantee … the right to a jury.'" (C & K Engineering, at p. 9, citations omitted.)

[*319]

[483]** Two Court of Appeal decisions that have grappled with the proper characterization of an action as legal or equitable involved statutory causes of action, like those at issue in the present case, in which both equitable and legal relief may be awarded.

In the first case, **[****56]** Southern Pac. Transportation Co. v. Superior Court (1976) 58 Cal.App.3d 433 [129 Cal. Rptr. 912] (*Southern Pac. Transportation*), the plaintiffs, who claimed that they had made improvements to real property in the good faith belief that they were the owners of the property, brought the underlying action against the true owner of the property seeking damages as good faith improvers of the property. The action was brought pursuant to a recently enacted "good faith improver" statutory scheme (Code Civ. Proc., §§ 871.1–871.7) that authorized a good faith improver of real property to bring an independent civil cause of action for relief. (*Id.*, § 871.3.) The legislation provided that in such an action the court, under appropriate circumstances, "may … effect such an adjustment of the rights, equities, and interests of the good faith improver, the owner of the land, and other

---

[17] Contrary to the implication of the Court of Appeal decision below (see Nationwide Biweekly, supra, 24 Cal.App.5th at p. 456), this court's recent decision in Shaw, supra, 2 Cal.5th 983 did not purport to abrogate or change this state's well-established "equity first preference" doctrine. In *Shaw*, we interpreted one provision of the statute before the court—Health and Safety Code section 1278.5, subdivision (m), which provided that nothing in the new legislation "abrogate[s] or limit[s] any other theory of liability or remedy otherwise available at law"—as preserving in full a plaintiff's complementary cause of action under Tameny v. Atlantic Richfield Co. (1980) 27 Cal.3d 167 [164 Cal. Rptr. 839, 610 P.2d 1330], including the plaintiff's right to obtain a jury resolution of the *Tameny* claim. (Shaw, supra, 2 Cal.5th at p. 1006.) *Shaw* did not purport to overrule or disapprove the numerous California decisions cited above that have applied the "equity first preference" doctrine for more than a century.

Because in this case the equitable and legal aspects of the UCL and FAL actions are nonseverable and because Nationwide has not questioned the continued vitality of the "equity first preference" doctrine, we have no occasion to consider whether there is any reason to reevaluate this doctrine or to determine its proper application in a particular context.

interested parties … as is consistent with substantial justice to the parties under the circumstances of the particular case." (*Id.*, § 871.5.)

The question before the Court of Appeal in *Southern Pac. Transportation* was whether the plaintiffs had a right to a jury trial in their action against the owner. The plaintiffs claimed that because their complaint sought only money damages from the landowner, the action was one at law in which they had a right to **[****57]** a jury trial. The Court of Appeal rejected the plaintiffs' contention. After noting that the right to a jury trial under the California Constitution is the right "existing at common law at the time the Constitution was adopted" (Southern Pac. Transportation, supra, 58 Cal.App.3d at p. 436), the court explained: "Because the provisions of [Code of Civil Procedure] sections 871.1–871.7 have no counterpart in English law, classification of the action as either legal or equitable depends upon characterization of the nature of the relief sought. Although [the plaintiffs] assert that they seek damages only, by bringing an action under section 871.3, they have invited the court to 'effect such an adjustment of the rights, equities, and interests' of the parties as is consistent with substantial justice. (§ 871.5.) 'Under this section, the court has considerable discretion to select appropriate relief from the full range of equitable and legal remedies.' (Legislative Committee Comment—Assembly, to § 871.5.)" (Southern Pac. Transportation, supra, 58 Cal.App.3d at p. 437.)

[*740]** The Court of Appeal continued: "The fact that damages is one of a full range of possible remedies does not guarantee [the plaintiffs] the right to a jury for their good faith improver action. We recognize that where a complaint raises both legal and equitable issues, a jury trial may be obtained upon the issues **[****58]** raised by the legal cause. [Citation.] Here, however, there is **[*320]** no possibility of severing the legal from the equitable. The trier of fact must determine whether to quiet title in the improver on the condition he pay to the landowner the value of the unimproved land, or whether and in what amount, to award damages to the improver, or whether to require a completely different form of relief. [Citation.] Such a determination is not susceptible of division into one component to be resolved by the court and another component to be determined by a jury. Only one decision can be made, and it must make a proper adjustment of the 'rights, equities, and interests' of all the parties involved." (Southern Pac. Transportation, supra, 58 Cal.App.3d at pp. 437–438.)

Under these circumstances the *Southern Pac. Transportation* court concluded: "Because of the wide range of equitable and legal relief authorized by Code of Civil Procedure section 871.5, it would be an impossible task for a jury to determine the appropriate relief and to resolve the rights, equities, and interests of all of the parties. … We have concluded, therefore, that it is the function of the court and not the jury to be the trier of fact in a good faith improver action." (Southern Pac. Transportation, supra, 58 Cal.App.3d at p. 438.)

In this court's subsequent decision in C & K Engineering, supra, 23 Cal.3d 1, we specifically **[****59]** cited **[**484]** and discussed the *Southern Pac. Transportation* decision with approval, quoting at some length the Court of Appeal's reasoning in that case. (C & K Engineering, supra, 23 Cal.3d at p. 11.)

In the second case, DiPirro, supra, 153 Cal.App.4th 150, the Court of Appeal addressed whether there is a right to a jury trial in an action seeking enforcement of the provisions of the Safe Drinking Water and Toxic Enforcement Act of 1986 (Health & Saf. Code, §§ 25249.5–25249.13), a legislative measure adopted by the voters through the initiative process and most commonly known as Proposition 65.[18] That measure—which generally prohibits businesses from (1) knowingly discharging chemicals known to cause cancer or reproductive toxicity into any source of drinking water (Health & Saf. Code, § 25249.5) or (2) knowingly exposing any individual to such chemicals without first giving clear and reasonable warning (*id.*, § 25249.6)—authorizes government officials and, under specified circumstances, private persons, to bring a cause of action seeking injunctive relief and civil penalties against any person who violates the statute. (*Id.*, **[*321]** § 25249.7.) Like the UCL and the FAL,

---

[18] The legislation was adopted by the voters at the November 4, 1986 General Election. The Legislature has amended relevant provisions of the act on numerous occasions since its inception. (See Stats. 1999, ch. 599, § 1, p. 4297; Stats. 2001, ch. 578, § 1, p. 4748; Stats. 2002, ch. 323, § 1, p. 1265; Stats. 2003, ch. 62, § 185, p. 500; Stats. 2013, ch. 581, § 1; Stats. 2014, ch. 71, § 90; Stats. 2014, ch. 828, § 1; Stats 2017, ch. 510, § 1.) For convenience, we shall refer to the legislation in its current form as Proposition 65.

Proposition 65 provides that once a statutory violation is found, the court may issue an injunction and shall impose a civil penalty not to exceed $2,500 per day for each violation (*Health & Saf. Code, § 25249.7, subds. (a)*, *(b)(1)*), and, again **[****60]** like the UCL **[***741]** and the FAL, Proposition 65 sets forth a list of multiple factors, including "[a]ny other factor that justice may require," that the court is to consider in determining the amount of the civil penalties to be imposed. (*Health & Saf. Code, § 25249.7, subd. (b)(2)(G)*.)[19] Because the determination whether a statutory violation has been established itself triggers the availability of both injunctive relief and civil penalties, the equitable and legal aspects of the action are not severable.

In deciding whether the plaintiff had a right to a jury trial in the civil action authorized by Proposition 65, the *DiPirro* court examined the statutory scheme as a whole to determine whether the gist of the action was legal or equitable. (*DiPirro, supra, 153 Cal.App.4th at pp. 180–184*.) In concluding that the legislation is "thoroughly infused with equitable principles that must be considered and adjudicated in an enforcement action" (*id. at p. 180*), the court relied in part on the fact that "Proposition 65 is '"a remedial statute intended to protect the public"'" (*ibid.*), along with its determination that the remedies authorized by the act were primarily equitable in nature, including injunctive relief to prevent the sale of offending products that lack the required warning. (*Id. at p. 180*; see *id. at p. 181*.)

CA(29)[] **(29)** The *DiPirro* court **[****61]** acknowledged that Proposition 65 also authorized an award of civil penalties (*DiPirro, supra, 153 Cal.App.4th at p. 181*) and explicitly recognized ***HN29***[] "'the "general rule"' that monetary relief is a legal remedy, 'and an award of statutory damages may serve purposes traditionally associated with legal relief, such as compensation and punishment.'" (*Id. at p. 182*.) The Court of Appeal pointed out, however, **[**485]** that the civil penalties that are authorized by Proposition 65 are to be determined by a highly discretionary consideration of multiple factors "that do not primarily take into account any harm suffered by the plaintiff … [and are] the kind of calculation traditionally performed by judges rather than a jury … ." (*DiPirro, **[*322]** at p. 182*, citation & fn. omitted.) Emphasizing that [proposition 65] "is informational and preventative rather than compensatory in its nature and function" (*ibid.*) and that "[t]he primary right to bring an action for civil penalties pursuant to [proposition 65] is … given to the state rather than individuals seeking compensation" (*id. at p. 183*), the *DiPirro* court determined that "the statutory remedies afforded by [proposition 65], including civil penalties, are not damages at law, but instead constitute equitable relief appropriate and incidental to enforcement of the Act, **[****62]** which do not entitle the plaintiff to a jury trial" (*id. at p. 184*).

D. *Application of Constitutional Principles to UCL and FAL Actions*

CA(30)[] **(30)** As we shall explain, ***HN30***[] in light of the particular nature of the civil causes of action **[***742]** authorized by the UCL and the FAL, we conclude that the gist of a civil action under the UCL and the FAL is equitable rather than legal in nature. Such causes of action are equitable either when brought by a private party seeking only an injunction, restitution, or other equitable relief or when brought by the Attorney General, a district attorney, or other governmental official seeking not only injunctive relief and restitution but also civil penalties. Accordingly, we conclude that there is no right to a jury trial in such actions under the California Constitution.

---

[19] *Health & Safety Code section 25249.7, subdivision (b)(2)* provides in full: "In assessing the amount of a civil penalty for a violation of this chapter, the court shall consider all of the following:

"(A) The nature and extent of the violation.

"(B) The number of, and severity of, the violations.

"(C) The economic effect of the penalty on the violator.

"(D) Whether the violator took good faith measures to comply with this chapter and the time these measures were taken.

"(E) The willfulness of the violator's misconduct.

"(F) The deterrent effect that the imposition of the penalty would have on both the violator and the regulated community as a whole.

"(G) Any other factor that justice may require."

CA(31)[] **(31)** To begin with, HN31[] the statutory causes of action established by the UCL and the FAL are clearly not of like nature or of the same class as any common law right of action. (Cf. One 1941 Chevrolet Coupe, supra, 37 Cal.2d 283, 300.) As the leading treatise on California's consumer protection statutes explains, under the common law only a business adversely affected by trademark or trade name infringement by a business competitor could file an action for unfair competition against the **[****63]** competitor and such an action could be brought only as a suit in equity. (See Stern, Cal. Practice Guide: Bus. & Prof. Code § 17200 Practice, *supra*, ¶ 2:1, p. 2-1.) "At common law, deceived consumers had no claim for unfair competition. This made little sense, since ultimately it is the consumer who is harmed by a business that passes off goods or services as genuine, or as those of another. … No matter; consumers were left without a claim or remedy. This was the era of *caveat emptor* [that is, let the buyer beware]." (*Id.*, ¶ 2:3, p. 2-1.)

The UCL and the FAL were enacted for the specific purpose of creating new rights and remedies that were not available at common law. (See, e.g., Bank of the West v. Superior Court (1992) 2 Cal.4th 1254, 1263–1264 [10 Cal. Rptr. 2d 538, 833 P.2d 545].) The statutes deliberately broaden the types of business practices that can properly be found to constitute unfair competition (see, e.g., Barquis, supra, 7 Cal.3d at p. 112), and eliminate a number of elements that were required in common law actions for fraud (see, e.g., In re **[*323]** Tobacco II Cases (2009) 46 Cal.4th 298, 312 [93 Cal. Rptr. 3d 559, 207 P.3d 20]; Com. on Children's Television, supra, 35 Cal.3d 197, 211). The statutes explicitly authorize government officials and injured private individuals to obtain injunctive relief to prevent a business from continuing to use the practice to the detriment of other consumers and to obtain restitution and other clearly equitable relief. (Bus. & Prof. Code, §§ 17203, 17204.) Such causes of action for unfair competition **[****64]** that authorize injunctive relief against unfair or deceptive business practices had no close or analogous counterpart at common law.

Furthermore, when the Legislature adopted the civil penalty provisions of the UCL and the FAL in 1972 and 1965 respectively, permitting government officials, and government officials alone, to seek civil penalties along with injunctive or other equitable relief in the civil actions such officials bring under the UCL and the FAL (see Jayhill, supra, 9 Cal.3d at p. 288), the causes of action under the UCL and the FAL continued to constitute causes of **[**486]** action that were not of like nature or of the same class as any common law action. Prior to 1850, early English law embodied numerous statutes imposing civil penalties for a variety of specifically delineated impermissible business practices—like using false weights and measures in the sale of a product or failing to pay the appropriate excise taxes due—that were enforced by the government through a civil action in the Court of **[***743]** Exchequer in which a jury was available. (See One 1941 Chevrolet Coupe, supra, 37 Cal.2d at pp. 295–296 & fn. 15.) We are unaware, however, of any early English statute that defined the business conduct proscribed by the statute in the type of broad and sweeping language adopted **[****65]** in the UCL and the FAL, which was specifically intended to reach novel but offensive business practices that were not encompassed by more specific statutory prohibitions. (See, e.g., Barquis, supra, 7 Cal.3d at p. 112.) Furthermore, the early English statutes generally set forth a specific amount of civil penalty that was to be imposed for each violation; again, we are aware of no such statute that required the amount of the civil penalty to be determined by a consideration of multiple factors comparable to those set out in the relevant provisions of the UCL and the FAL. (Bus. & Prof. Code, §§ 17206, subd. (b), 17536, subd. (b).) Finally, and perhaps most significantly, unlike the UCL and the FAL, none of the early English statutes authorized a prosecuting official to seek and obtain, *in the same action*, a civil penalty and an injunction that would explicitly restrain the business from committing the prohibited conduct in the future.[20]

---

[20] In his seminal article on the right to civil jury trial, Professor Fleming James observed that, at common law, when a plaintiff was seeking to obtain both injunctive relief and civil penalties for a defendant's alleged statutory violation, the plaintiff would have been required to bring two separate actions—one in equity and one in law. As Professor James explained: "B's violation of A's statutory right … might entitle A to an injunction, to compensatory damages, and to a penalty. The right to any relief would turn on whether B violated the statute. A might get a determination of that issue without a jury in an equity suit, seeking an injunction and perhaps compensatory damages as incidental to an injunction. Or he might get such determination in an action at law for damages or for the penalty. Since equity refused to enforce a penalty and the law would not give an injunction, two suits would be required for complete relief. A had the choice which to bring first. And the first determination of the common issue (violation *vel non*) would bind the parties in the second action. The plaintiff then had the power to choose the mode of trial of the common issue, and he could so exercise it as to leave no room for judicial discretion." (James, *Right to a Jury Trial in Civil*

[*324]

Accordingly, in the absence of a comparable common law counterpart, in deciding whether there is a right to a jury trial under the California Constitution, we must look to the statutory scheme as a whole to determine whether the gist of a cause of action under the UCL or the FAL seeking both injunctive relief **[****66]** and civil penalties is legal or equitable.

For nearly a half century, Court of Appeal decisions have explicitly and uniformly held that actions under the UCL and the FAL are equitable in nature and are to be tried by the court and not by a jury, including when the remedies sought are civil penalties as well as injunctive or other equitable relief. (See, e.g., *People v. Witzerman (1972) 29 Cal.App.3d 169, 176–177 [105 Cal. Rptr. 284]* (*Witzerman*); *People v. Bestline Products, Inc. (1976) 61 Cal.App.3d 879, 915–916 [132 Cal. Rptr. 767]*; *People v. First Federal Credit Corp., supra, 104 Cal.App.4th 721, 732–733*; *People v. Bhakta, supra, 162 Cal.App.4th 973, 977–979*; *People ex rel. Feuer v. Superior Court (Cahuenga's the Spot) (2015) 234 Cal.App.4th 1360, 1384 [184 Cal. Rptr. 3d 809]*.) Although this court has not previously **[***744]** been directly asked to decide this issue itself, we note that as recently as 2015, in *Quesada v. Herb Thyme Farms, Inc. (2015) 62 Cal.4th 298 [195 Cal. Rptr. 3d 505, 361 P.3d 868]*, our court, in responding to the defendant's concern that the plaintiff's false advertising and unfair competition claims in that case "would be evaluated by a lay jury applying a nebulous 'reasonable consumer' standard," stated that **[**487]** "these claims are decided by a judge, not a jury." (*Id. at p. 322*, citing *Hodge v. Superior Court (2006) 145 Cal.App.4th 278, 284–285 [51 Cal. Rptr. 3d 519]* [action brought by private plaintiff seeking equitable relief] and *Witzerman, supra, 29 Cal.App.3d 169, 176–177* [action brought by public official seeking injunctive relief and civil penalties].)

The Court of Appeal decision under review here was the first appellate decision to reach a contrary conclusion. Although the Court of Appeal suggested that the numerous prior Court of Appeal decisions cited above were either not on point or did not **[****67]** fully analyze the jury trial issue (*Nationwide Biweekly, supra, 24 Cal.App.5th at p. 457*), our review of those **[*325]** appellate court decisions does not support the Court of Appeal's characterization of those decisions. Those prior decisions, contrary to the Court of Appeal's suggestion, directly analyze the question whether there is a right to a jury trial in such actions under the California Constitution and conclude that there is no state constitutional right to a jury trial in such actions.

The 1972 decision in *Witzerman, supra, 29 Cal.App.3d 169*—the initial decision in this line of cases—demonstrates this point. *Witzerman* was an enforcement action brought by the Attorney General under the FAL seeking both injunctive relief and civil penalties. After noting that the defendants' jury trial claim relied on both the federal and state constitutional jury trial rights, the court initially addressed the state constitutional claim and rejected the defendants' argument that the trial court's denial of a jury trial was improper under the California Constitution because the issues to be tried were assertedly legal rather than equitable in nature. (*Witzerman, at p. 176*.) The court in *Witzerman* explained: "Assuming, without so deciding, that the civil penalties sought represent legal rather than equitable **[****68]** relief, we do not believe that in this case such issues could have been severed from the equitable ones. The same alleged misconduct on the part of appellants was the basis for both types of relief sought by the People. (Cf. *Jaffe v. Albertson Co. [(1966)] 243 Cal.App.2d 592, 610 [53 Cal.Rptr. 25]*.) Under these circumstances trial to the court of the People's case for injunctive relief disposed of as well the People's case for relief by way of civil penalties. (Cf. *Veale v. Piercy [(1962)] 206 Cal.App.2d 557, 562–563 [24 Cal.Rptr. 91]*.)" (*Witzerman, supra, 29 Cal.App.3d at pp. 176–177*.) Contrary to the Court of Appeal's critique below, only after rejecting the defendants' state constitutional jury trial claim did the court in *Witzerman* turn to and reject the defendants' federal *Sixth Amendment* claim. (*Witzerman, at p. 177*.)

Although the *Witzerman* decision directly addressed and rejected the defendant's state constitutional jury trial claim, it is not clear that the decision applied the proper mode of analysis. After correctly observing that the equitable and legal aspects of the FAL action before it were nonseverable, the court did not explicitly apply the "gist of the action"

Actions (1963) 72 Yale L.J. 655, 671–672, fns. omitted.) Thus, as a general matter, at common law when a plaintiff sought both injunctive relief and civil penalties based upon a business's alleged violation of a statute, the business was by no means guaranteed that the question whether it violated the statute would be determined by a jury rather than by a court.

test but instead appears to have applied the "equity first preference" doctrine. (Witzerman, supra, 29 Cal.App.3d at pp. 176–177.) **[***745]** Nonetheless, we conclude that the Witzerman court reached the correct result.

CA(32)[] **(32)** All parties before us agree that the legal and equitable aspects of **[****69]** the UCL and FAL actions at issue are nonseverable and that the gist of the action standard applies. **HN32**[] The legal and equitable aspects of these actions are nonseverable not only because, as the *Witzerman* court indicated (Witzerman, supra, 29 Cal.App.3d at pp. 176–177), the determination whether a defendant's alleged conduct constitutes a violation of the statute provides the basis **[*326]** for all of the relief authorized by the statutes, but also because the amount of civil penalties that would be appropriate may well depend on the equitable remedies, including restitution, that are or are not imposed. (See, e.g., Overstock.com, supra, 12 Cal.App.5th 1064, 1088–1089; People ex rel. Harris v. Sarpas (2014) 225 Cal.App.4th 1539, 1567 [172 Cal. Rptr. 3d 25].)

With respect to the application of the gist of the action standard, our independent analysis of the UCL and the FAL causes of action as **[**488]** a whole convinces us that the gist of the civil causes of action authorized by the UCL and the FAL must properly be considered equitable, rather than legal, in nature.

To begin with, the bulk of the remedies provided for in the statutes—injunctive relief, restitution, and other clearly equitable remedies such as the appointment of a receiver (see Bus. & Prof. Code, §§ 17203, 17535)—are clearly equitable in nature. As the legislative history of both the UCL and the FAL make clear, the primary objective of both statutes is preventive, **[****70]** authorizing the exercise of broad equitable authority to protect consumers from unfair or deceptive business practices and advertising.

CA(33)[] **(33)** Second, **HN33**[] although the statutes also authorize in actions brought by the Attorney General, a district attorney, or other government officials (but not private parties), the imposition of civil penalties—a type of remedy that in some contexts is properly considered legal in nature—the UCL and the FAL statutes specify that in assessing the amount of the civil penalty to be imposed under these statutes, the court is afforded broad discretion to consider a nonexclusive list of factors that include the relative seriousness of the defendant's conduct and the potential deterrent effect of such penalties, the type of qualitative evaluation and weighing of a variety of factors that is typically undertaken by a court and not a jury. (Bus. & Prof. Code, §§ 17206, 17536.) Notably, the civil penalties that may be awarded under the UCL and the FAL, unlike the classic legal remedy of damages, are noncompensatory in nature; they require no showing of actual harm to consumers and are not based on the amount of losses incurred by the targets of unfair practices or misleading advertising. **CA(34)**[] **(34)** Like the civil penalties **[****71]** at issue in Kizer v. County of San Mateo (1991) 53 Cal.3d 139, 147–148 [279 Cal. Rptr. 318, 806 P.2d 1353], **HN34**[] although the civil penalties under the UCL and the FAL "may have a punitive or deterrent aspect, their primary purpose is to secure obedience to statutes and regulations imposed to assure important public policy objectives. … The focus of [both] statutory scheme[s] is *preventative*." (Kizer, at p. 147–148, citations omitted.) And like the civil penalties in *Kizer* (id. at p. 147), the civil penalties obtained by the government in actions under the UCL and the FAL are to be utilized for the enforcement of the statutes in question. (See Bus. & Prof. Code, §§ 17206, subd. (c), 17536, subd. (c).)

[*327]

CA(35)[] **(35)** **[***746]** Finally, as discussed above (*ante*, pp. 299–303, 308–313), the expansive and broadly worded substantive standards that are to be applied in determining whether a challenged business practice or advertising is properly considered violative of the UCL or the FAL call for the exercise of the flexibility and judicial expertise and experience that was traditionally applied by a court of equity. Particularly in light of the equitable nature of the substantive standards that apply in UCL and FAL actions—both in actions brought by private parties and by government officials—we conclude that the gist of the civil causes of action authorized by the UCL and the FAL must properly be considered **[****72]** equitable in nature. Accordingly, we conclude that **HN35**[] under the California Constitution, there is no right to a jury trial in a cause of action under the UCL and the FAL, including when the action is brought by a government official and seeks both injunctive relief and civil penalties.

We emphasize that this conclusion does not deprive a defendant in a UCL or FAL action of any constitutional right afforded by the jury trial provision of the California Constitution. As we have explained (*ante*, pp. 315–316), that constitutional provision grants the right to jury trial in actions "'of like nature'" "'or of the same class'" in which a jury trial was provided at common law in 1850, when the jury trial provision of the California Constitution was first adopted. (*One 1941 Chevrolet Coupe, supra, 37 Cal.2d 283, 300*.) The consumer protection actions authorized in the UCL and the FAL are not of like nature or of the same class as an action that was triable by jury at common law. In actions like those under the UCL and the FAL, in which the equitable and legal aspects are nonseverable, there is no constitutional right **[**489]** to a jury trial when, as here, the gist of the action is equitable rather than legal.

In sum, we conclude that there is no right to a jury trial **[****73]** under the California Constitution in a cause of action under the UCL or the FAL, including an action in which civil penalties as well as an injunction or other equitable relief are sought. Because our conclusion rests in significant part on the fact that the substantive standards embodied in the UCL and the FAL contemplate the exercise of the type of equitable discretion and judgment traditionally applied by a court of equity, we have no occasion in this case to decide how the California constitutional jury trial provision applies to other statutory causes of action that authorize both injunctive relief and civil penalties.[21]

[*328]

[*747]** E. *Inapplicability of* Tull

As already noted, in reaching a contrary conclusion, the Court of Appeal relied heavily upon the United States Supreme Court's decision in *Tull, supra, 481 U.S. 412*. As we explain, for a variety of reasons we conclude that the Court of Appeal's reliance upon *Tull* was unwarranted.

Tull involved a civil action filed by the federal government against a real estate developer, alleging that the developer had dumped fill on wetlands without a permit in violation of the *federal Clean Water Act. (33 U.S.C. § 1251 et seq.*) As authorized by that act, the government sought both injunctive relief (*id.*, *§ 1319(b)*) and **[****74]** civil penalties (*id.*, *§ 1319(d)*). The court in *Tull* observed, however, that at the time the complaint in that case was filed the developer had sold most of the properties in question to a third party, and "[i]njunctive relief was therefore impractical except with regard to a small portion of the land." (*Tull, supra, 481 U.S. at p. 415*.) After denying the developer's demand for a jury trial, the trial court conducted a 15-day bench trial, concluded that the property on which the defendant had admittedly dumped fill constituted "wetlands" within the meaning of the federal statute, and ultimately imposed injunctive relief and civil penalties on the defendant.

---

[21] In concluding that the gist of the causes of action created by the UCL and the FAL is equitable even when civil penalties as well as injunctive relief are sought, we have relied on the specific attributes of the California UCL and FAL statutes, as well as the established understanding of the scope of the California constitutional jury trial provision.

Every other state has adopted consumer protection legislation somewhat comparable to the UCL and the FAL. (See, e.g., Stern, Cal. Practice Guide: *Bus. & Prof. Code § 17200* Practice, *supra*, ¶¶ 2:54-2:62, pp. 2-22 to 2-24; Nat. Consumer Law Center, Unfair and Deceptive Acts and Practices (9th ed. 2016) § 1.1., p. 1.) Although the numerous unfair or deceptive practice statutes in other jurisdictions differ from the California statutes in a variety of respects, we note that a substantial majority of other state courts that have addressed the question whether there is a right to a jury trial in civil actions brought under those states' unfair or deceptive practice laws have concluded that there is no right to a jury trial in such actions. (See *Nunley v. State (Ala. 1993) 628 So.2d 619, 621–622*; *People v. Shifrin (2014) 2014 COA 14 [342 P.3d 506, 512–513]*; *Associated Investment Co. Limited Partnership v. Williams Associates IV (1994) 230 Conn. 148 [645 A.2d 505, 508–512]*; *Martin v. Heinold Commodities (1994) 163 Ill.2d 33 [205 Ill.Dec. 443, 643 N.E.2d 734, 753]*; *Nei v. Burley (1983) 388 Mass. 307 [446 N.E.2d 674, 678–679]*; *State by Humphrey v. Alpine Air Products, Inc. (Minn.Ct.App. 1992) 490 N.W.2d 888, 895*; *State ex rel. Douglas v. Schroeder (1986) 222 Neb. 473 [384 N.W.2d 626, 629–630]*; *State v. State Credit Assn. (1983) 33 Wn.App. 617 [657 P.2d 327, 330]*.) Several states have reached a contrary conclusion, but none of those cases involved a statute that created a cause of action in which both injunctive relief as well as damages or civil penalties could be obtained. (See *Robinson v. McDougal (1988) 62 Ohio App.3d 253 [575 N.E.2d 469, 474]*; *State v. Credit Bureau of Loredo, Inc. (Tex. 1975) 530 S.W.2d 288, 290–292*; *State v. Abbott Laboratories (2012) 2012 WI 62 [341 Wis.2d 510, 816 N.W.2d 145, 156–159]*.) (See generally Annot., Constitutional Right to Jury Trial in Cause of Action Under State Unfair or Deceptive Trade Practices Law (1997) 54 A.L.R.5th 631.)

On appeal, the United States Supreme Court reversed, concluding that the developer was entitled to a jury trial under the *Seventh Amendment to the federal Constitution*. (*Tull, supra, 481 U.S. at pp. 417–425*.) The court in *Tull* acknowledged that a proceeding under the Clean Water Act seeking both injunctive relief and civil penalties is analogous to two different common law causes of action—an action to abate a nuisance in which there was no right to **[*329]** a jury trial and an action in debt to impose a civil penalty in which there was a right to a jury trial. (*Tull, at pp. 420–421*). **[**490]** However, the court concluded that it need not decide which common law action was the closer historical **[****75]** analog, because prior Supreme Court precedent established that "characterizing the relief sought is '[m]ore important' than finding a precisely analogous common-law cause of action in determining whether the *Seventh Amendment* guarantees a jury trial." (*Id. at p. 421*, citing *Curtis v. Loether (1974) 415 U.S. 189, 196 [39 L.Ed.2d 260, 94 S.Ct. 1005]*.)

Thereafter, in discussing the relief sought in the action, the court in *Tull* focused primarily on the civil penalties that had been sought and obtained in the action, emphasizing that "[a] civil penalty was a type of remedy at common law that could only be enforced in courts of law" (*Tull, supra, 481 U.S. at p. 422*) in which a jury trial was available. Although the government had also sought and obtained injunctive relief in the action, the *Tull* court observed that under the applicable federal statute the government was free to seek an equitable remedy independent **[***748]** of legal relief (*id. at p. 425*) and further explained that prior federal decisions established that "if a 'legal claim is joined with an equitable claim, the right to jury trial on the legal claim, including all issues common to both claims, remains intact. The right cannot be abridged by characterizing the legal claim as "incidental" to the equitable relief sought'" (*ibid.*, citing *Curtis v. Loether, supra, 415 U.S. at p. 196, fn. 11*). (See also, e.g., *Ross v. Bernhard (1970) 396 U.S. 531, 537–538 [24 L.Ed.2d 729, 90 S.Ct. 733]* ["where equitable and **[****76]** legal claims are joined in the same action, there is a right to jury trial on the legal claims which must not be infringed either by trying the legal issues as incidental to the equitable ones or by a court trial of a common issue existing between the claims"]; *Dairy Queen v. Wood (1962) 369 U.S. 469, 473 [8 L.Ed.2d 44, 82 S.Ct. 894]* [requiring "that any legal issues for which a trial by jury is timely and properly demanded be submitted to a jury" "whether the trial judge chooses to characterize the legal issues presented as 'incidental' to equitable issues or not"]; *Beacon Theatres v. Westover (1959) 359 U.S. 500, 510–511 [3 L.Ed.2d 988, 79 S.Ct. 948]* ["only under the most imperative circumstances … can the right to a jury trial of legal issues be lost through prior determination of equitable claims" (fn. omitted)].) Thus, because prior federal decisions had interpreted the *Seventh Amendment* generally to require a jury trial whenever a legal claim is joined with an equitable claim, the court in *Tull* held that, for *Seventh Amendment* purposes, the fact that the government sought civil penalties in the action before it was itself sufficient to conclude that the developer had "a constitutional right to a jury trial to determine his liability on the legal claims." (*Tull, supra, 481 U.S. at p. 425*.)[22]

[*330]

CA(36)[] **(36)** For a number of reasons, we conclude that the Court of Appeal erred in relying **[****77]** upon the *Tull* decision. First and most fundamentally, the decision in *Tull* rested exclusively on the United States Supreme Court's interpretation of the right to civil jury trial embodied in the *Seventh Amendment to the United States Constitution*. ***HN36***[] The federal civil jury trial provision of the *Seventh Amendment* applies only to civil trials in *federal court*; federal decisions explicitly hold that the civil jury trial provision of the *Seventh Amendment* does not apply to *state court proceedings*. (See, e.g., *Osborn v. Haley (2007) 549 U.S. 225, 252, fn. 17 [166 L.Ed.2d 819, 127 S.Ct. 881]*; *Gasperini v. Center For Humanities, Inc. (1996) 518 U.S. 415, 432 [135 L.Ed.2d 659, 116 S.Ct. 2211]*; *Curtis v. Loether, supra, 415 U.S. at p. 192, fn. 6*; **[**491]** *Minn. & St. Louis R. R. v. Bombolis (1916) 241 U.S. 211, 217–223 [60 L.Ed. 961, 36 S.Ct. 595]*.) Instead, the right to jury trial in state court proceedings is

[22] Although the court in *Tull* held that the *Seventh Amendment* granted the developer a right to a jury trial on the issue of *liability*, the majority went on to hold that the *Seventh Amendment* did not require a jury trial on *the amount of civil penalties*. The majority explained that because "highly discretionary calculations that take into account multiple factors are necessary in order to set civil penalties under the Clean Water Act" and "[t]hese are the kinds of calculations traditionally performed by judges," "the *Seventh Amendment* does not require a jury trial for that purpose in a civil action." (*Tull, supra, 481 U.S. at p. 427*.)

Justice Scalia, joined by Justice Stevens, dissented from the latter holding, objecting that by fashioning a civil action in which liability but not the amount of damages is to be decided by a jury, "the Court creates a form of civil adjudication I have never encountered." (*Tull, supra, 481 U.S. at p. 428* (dis. opn. of Scalia, J.).)

governed by the provisions and **[***749]** judicial interpretation of each state's own constitutional jury trial provision.[23]

HN37[] ***CA(37)***[] **(37)** In California, the constitutional right to a civil jury trial under the California Constitution is entirely independent of the federal constitutional civil jury trial right under the *Seventh Amendment* (*Cal. Const., art. I, § 24*), and past California cases have not hesitated to decline to follow the federal interpretation of the *Seventh Amendment* when the federal interpretation has been found inconsistent with a proper reading of the California provision. (See, e.g., *Jehl v. Southern Pacific Co. (1967) 66 Cal.2d 821, 835 & fn. 17 [59 Cal. Rptr. 276, 427 P.2d 988]*; *Rankin v. Frebank Co. (1975) 47 Cal.App.3d 75, 91–92 [121 Cal. Rptr. 348]*.) The *Tull* decision rested on several points in **[*331]** which the federal interpretation of the *Seventh Amendment* departs from California's interpretation of the California jury trial **[****78]** provision.

CA(38)[] **(38)** Initially, unlike actions under the UCL and the FAL in which the equitable (injunctive relief) and legal (criminal penalties) nature of the available remedies are unquestionably *nonseverable* features of a single cause of action (see *Jayhill, supra, 9 Cal.3d at p. 288*), in *Tull* the court held that under the applicable Clean Water Act, the equitable (injunctive relief) and legal (criminal penalties) remedies were *severable*. (See *Tull, supra, 481 U.S. at p. 425* ["[T]he Government was free to seek an equitable remedy in addition to, or independent of, legal relief. *Section 1319* [the relevant provision of the *Clean Water Act*] does not intertwine equitable relief with the imposition of civil penalties. Instead each kind of relief is separably authorized in a separate and distinct statutory provision. *Subsection (b)*, providing injunctive relief, is independent of *subsection (d)*, which provides only for civil penalties."].) And the *Tull* court went on to rely on the severable nature of the claims at issue in finding that the issue of liability was to be tried by a jury rather than by the court, because federal decisions dictate that in cases involving severable legal and equitable issues, the legal issues should be tried prior to the equitable issues. (*Tull, supra, 481 U.S. at p. 425* ["In such **[****79]** a situation, if a 'legal claim is joined with an equitable claim, the right to jury trial on the legal claim … remains intact.' … Thus, petitioner has a constitutional right to a jury trial to determine his liability on the legal claims"].) By contrast, as noted above, the governing California decisions hold that ***HN38***[] when the legal and equitable aspects are severable, there is a preference for trying the equitable issues first and that if common facts are resolved in a manner that obviates the need to try the legal issue, there is no right under the California Constitution to have the legal issues submitted to the jury. (See *ante*, p. 315; *Hoopes v. Dolan (2008) 168 Cal.App.4th 146, 156–158 [85 Cal. Rptr. 3d 337]* [discussing difference in California and federal rules]; see also Hamilton, *Federalism and the State Civil Jury Rights* (2013) *65 Stan. L.Rev. 851, 864–865, 869–870* [same].) **[***750]** Thus, the conclusion reached in *Tull* under the *Seventh Amendment* is not necessarily the same result as would follow under California law.

[492]** Moreover, the *Tull* court's analysis of the jury trial question also demonstrates a second difference between the interpretation and application of the federal and state constitutional civil jury trial provisions. As we have explained, in cases in which a cause of action contains nonseverable **[****80]** legal and equitable aspects, California cases undertake a qualitative, holistic analysis of the action in its entirety to determine whether the gist of the action is legal or equitable, that is, whether the legal or equitable aspects predominate. (See **[*332]** *ante*, pp. 317–321.)[24] In *Tull*, by contrast, the court, in determining that under the *Seventh Amendment* there is a right to a

[23] We note that since the decision in *Tull*, a number of state courts, in interpreting and applying their own state constitutional civil jury trial provisions, have concluded, unlike the *Tull* decision, that there is no right to a jury trial in statutory causes of action authorizing both injunctive relief and civil penalties. (See, e.g., *State ex rel. Darwin v. Arnett (2014) 235 Ariz. 239 [330 P.3d 996, 1002]*; *Commissioner of Environmental Protection v. Connecticut Building Wrecking Co. (1993) 227 Conn. 175 [629 A.2d 1116, 1121–1123]*; *Dept. of Environmental Protection v. Emerson (Me. 1992) 616 A.2d 1268, 1271*; *Dept. of Environmental Quality v. Morley (2015) 314 Mich.App. 306 [885 N.W.2d 892, 897]*; *State v. Irving Oil Corp. (2008) 183 Vt. 386 [955 A.2d 1098, 1106–1108]*; ***State v. Evergreen Freedom Foundation (2002) 111 Wn.App. 586 [49 P.3d 894, 908–909]***.) A few states that have traditionally looked to the *Seventh Amendment* in interpreting their own state jury trial provision have followed *Tull*. (See, e.g., *Dept. of Revenue v. Printing House (Fla. 1994) 644 So.2d 498, 500–501*; *Bendick v. Cambio (R.I. 1989) 558 A.2d 941, 943–944*.)

jury trial for the statutory cause of action for civil penalties at issue in that case, relied primarily on its determination that the civil penalties in question were intended, at least in part, to be punitive in nature, which in the court's view was apparently sufficient to render the action legal in nature and require a jury trial. (*Tull, supra, 481 U.S. at pp. 422–424*.) In reaching this conclusion, however, the *Tull* court did not take into account a number of nonseverable equitable aspects of the action for civil penalties at issue there. Thus, the court does not appear to have thought it at all significant that the civil penalties were also intended in part to further the equitable purpose of **[***751]** restitution. (*Ibid.*) Moreover, and significantly, the court did not consider that, unlike actions for civil penalties at common law that typically provided a specific and fixed **[****81]** penalty for each violation, the civil penalties authorized by the statutory cause of action at issue in that case were to be determined by the equitable weighing and balancing of a number of factors similar to the list of factors set forth in the UCL and the FAL (see *Tull, supra, 481 U.S. at pp. 422–423, fn. 8*)—a determination that the *Tull* court itself recognized was more appropriate for a court than a jury. (*Id. at p. 427*.) Thus, rather than determining whether **[*333]** the statutory cause of action for civil penalties at issue should be characterized as legal or equitable by considering *all* of the legal and equitable aspects of that cause of action holistically, the *Tull* court somewhat artificially severed the cause of action for civil penalties into two parts—one that the court held is to be decided by a jury and one that is to be decided by the court—creating a novel type of cause of action that, as Justice Scalia's dissent in *Tull* pointed out, was unknown at common law. (*Id. at pp. 427–428* (dis. opn. of Scalia, J.).) As *Tull* demonstrates, in applying the *Seventh Amendment* federal courts generally have not applied the **[**493]** type of holistic gist of the action standard that California decisions have utilized in applying California's constitutional jury trial provision, and thus the **[****82]** *Tull* decision is distinguishable from the case before us on this ground as well.

Finally, in addition to the differences attributable to disparate interpretations of the federal and state constitutional civil jury trial provisions, the decision in *Tull* is distinguishable from the present case in yet another significant respect. Unlike the relevant broadly worded and expansive substantive standards embodied in the UCL and the FAL—which, as we have explained, call for the exercise of the type of equitable discretion and judgment traditionally employed by a court of equity—under the statute at issue in *Tull*, the question of liability turned simply on the question whether the defendant had, without a permit, deposited fill into an area constituting “wetlands” within the meaning of the Clean Water Act. (*Tull, supra, 481 U.S. at pp. 414–415*.) The parties in *Tull* apparently did not dispute that the substantive statutory standard of liability at issue in that case involved the type of factual determination that in other contexts has traditionally been made by juries. Accordingly, the court in *Tull* had no occasion to decide whether a jury trial is constitutionally required **[****83]** under the *Seventh Amendment* *whenever* a statute permits the recovery of civil penalties, even when the applicable substantive statutory standard clearly

---

[24] California is by no means alone in employing a holistic, qualitative standard for determining whether an action involving both legal and equitable aspects should be characterized as legal or equitable for purposes of an applicable constitutional jury trial provision. (See, e.g., *Miller v. Carnation Co. (1973) 33 Colo.App. 62 [516 P.2d 661, 663]* [“Where there are legal and equitable claims joined in the complaint the court must determine whether the basic thrust of the action is equitable or legal in nature”]; *Commissioner of Environmental Protection v. Connecticut Building Wrecking Co., supra, 629 A.2d 1116, 1121* [“In a case that involves both legal and equitable claims, ‘“whether the right to a jury trial attaches depends upon the relative importance of the two types of claims”’”]; *Shaner v. Horizon Bancorp. (1989) 116 N.J. 433 [561 A.2d 1130, 1139]* [“we have eschewed a focus solely on the remedy sought and have espoused a more eclectic view of the standards that serve to characterize the essential nature of a cause of action in giving meaning and scope to the right to a jury trial conferred by *article I, paragraph 9 of the New Jersey Constitution*”]; ***Insurance Financial Services, Inc. v. South Carolina Ins. Co. (1978) 271 S.C. 289 [247 S.E.2d 315, 318]*** [“Since the appellant has prayed for money damages in addition to seeking equitable relief, characterization of the action as equitable or legal depends on the appellant's ‘main purpose’ in bringing the action”]; *Norback v. Bd. of Directors of Church Extension Society (1934) 84 Utah 506 [37 P.2d 339, 345]* [“If the issues are legal or the major issues legal, either party is entitled upon proper demand to a jury trial; but, if the issues are equitable or the major issues to be resolved by an application of equity, the legal issues being merely subsidiary, the action should be regarded as equitable and the rules of equity apply”]; *Brown v. Safeway Stores (1980) 94 Wn.2d 359 [617 P.2d 704, 709]* [“In determining whether a case is primarily equitable in nature or is an action at law, the trial court is accorded wide discretion [which] should be exercised with reference to a variety of factors including, but not necessarily limited to, [seven factors set forth in an earlier Washington decision]”]; *Hyatt Bros. ex rel. Hyatt v. Hyatt (Wyo. 1989) 769 P.2d 329, 333* [“the right to a jury trial in cases involving mixed issues of law and equity [is] resolved by examining the entire pleadings and all the issues raised to determine whether the action is *primarily legal in nature* or *primarily equitable in nature*”].)

contemplates the exercise of equitable judicial discretion and judgment. We note in this regard that when the court in *Tull* addressed a substantive standard as to which the exercise of such equitable discretion was contemplated—that is, in assessing the *amount* of civil penalties to be imposed through "highly discretionary calculations that take into account multiple factors … traditionally performed by judges" (*Tull, at p. 427*)—the *Tull* court found that the trial court could properly resolve that matter without violating the federal constitutional civil jury trial right. (*Ibid.*)

Because of the significant differences in the manner in which the federal and California constitutional civil jury trial provisions have been interpreted and applied and because the court in *Tull* did not address a statutory standard, like those involved in the UCL and the FAL, which contemplates the exercise **[*334]** of the type of equitable discretion typically undertaken by a court of equity, we conclude that the Court **[***752]** of Appeal's reliance upon the *Tull* decision was misplaced.[25]

V. Conclusion

CA(39)[] **(39)** For **[****84]** the reasons set forth above, we conclude that ***HN39***[] in causes of action under the UCL or the FAL seeking injunctive relief and civil penalties, the gist of the actions is equitable, and there is no right to a jury trial in such actions under California law either as a statutory or constitutional matter. Given the specific attributes of the UCL and the FAL discussed above, we have no occasion to determine whether there is a right to a jury trial in other settings in which the government seeks injunctive relief and civil penalties under other statutes authorizing those remedies.

The judgment of the Court of Appeal, holding that Nationwide has a right to a jury trial under the California Constitution in such actions, is reversed and the matter is remanded to the Court of Appeal for further proceedings consistent with this opinion.

Chin, J., Corrigan, J., and Groban, J., concurred.

Concur by: KRUGER, J.

Concur

[494]** **KRUGER, J.,** Concurring.—I concur in the judgment. I agree with the majority that *article I, section 16 of the California Constitution* does not guarantee a jury trial in this action for equitable relief and civil penalties under the unfair competition law (UCL; *Bus. & Prof. Code, § 17200 et seq.*) and the false advertising law (FAL; *Bus. & Prof. Code, § 17500 et seq.*). But I arrive at that conclusion by a somewhat different—and narrower—path.

As the majority **[****85]** notes, California courts have assumed for decades that the UCL and the FAL create causes of action that are equitable in character and thus must be tried to a judge rather than a jury. This assumption only makes sense, since, at their inception, the only remedy under both statutes was injunctive relief, the quintessential equitable remedy. Even today, only equitable remedies are available to private parties who bring UCL and FAL actions. (*Bus. & Prof. Code, §§ 17203* [injunction and restitution as remedies for UCL violation], *17535* [same for FAL].)
[*335]

[25] In its answer brief filed in this court, Nationwide maintains that if this court rejects its state constitutional claim, we should address the question whether it has a right to a jury trial under the *Sixth* or *Seventh Amendment to the United States Constitution* and should hold, notwithstanding the absence of federal decisional support, that it has a right to jury trial in a state court action under those federal provisions. The Court of Appeal did not address these issues, neither the petition for review nor any answer to the petition raised these issues, and thus we decline to address those issues. (See *Cal. Rules of Court, rule 8.516(b)(1)*.)

But many years after the statutes were first passed, the Legislature authorized certain public officials—including, primarily, the Attorney General and district attorneys—to seek civil penalties as well as injunctive relief. (*Bus. & Prof. Code, §§ 17206 [UCL]*, *17536 [FAL]*.) This development has called into question the courts' long-held assumption about the availability of jury trial. That is because government actions seeking civil penalties, generally speaking, sound in law rather than equity and thus carry with them a constitutional right of jury trial under both the *Seventh Amendment to the United States Constitution* (applicable in federal courts) and *article I, section 16 of the California Constitution* (applicable in state courts). (*Tull v. United States (1987) 481 U.S. 412, 420 [95 L.Ed.2d 365, 107 S.Ct. 1831]* (*Tull*); *People v. One 1941 Chevrolet Coupe (1951) 37 Cal.2d 283, 295 & fn. 15 [231 P.2d 832]*.)

[*753]** It is not uncommon for the Legislature to enact a statutory **[****86]** cause of action that has some equitable features and some legal features. Our case law instructs that in such cases, we are to determine which feature predominates in defining its essential character—which, in the distinctive terminology of our precedents, represents the "gist" of the action. (*People v. One 1941 Chevrolet Coupe, supra, 37 Cal.2d at p. 299*; *C & K Engineering Contractors v. Amber Steel Co. (1978) 23 Cal.3d 1, 9 [151 Cal. Rptr. 323, 587 P.2d 1136]*.) If the gist is legal, then the parties are constitutionally entitled to a jury. If the gist is equitable, then they are not.[1]

Our cases also instruct that the nature of the remedies sought is an important—if not necessarily controlling—consideration in this analysis. (*C & K Engineering Contractors v. Amber Steel Co., supra, 23 Cal.3d at p. 9*.) In **[*336]** some cases where plaintiffs seek both equitable and legal remedies, courts have determined whether jury trial is available by comparing the relative **[**495]** significance of the two kinds of remedies. Where the government asks for massive penalties and only very minor injunctive restrictions on the defendant—or, conversely for highly burdensome injunctive orders and only nominal penalties—one form of relief might be deemed incidental to the other and the jury trial right recognized, or not, accordingly. (Cf. *Tull, supra, 481 U.S. at pp. 424–425* [where relief "would be limited primarily to civil penalties, since petitioner had **[****87]** already sold most of the properties at issue[, the] potential penalty of $22 million hardly can be considered incidental to the modest equitable relief sought" (citation omitted)].)

But that is not this case. The present case comes to us in an early procedural posture—on a motion to strike the jury trial demand from defendant's answer—and the parties dispute both the size of potential penalties and the significance of the injunctive relief sought. It does not appear possible here to characterize either form of relief as clearly predominant over, or incidental to, the other. We must therefore look more broadly at the bases for liability alleged in the complaint and the relationships between these causes of action **[***754]** and between the liability and remedy issues presented.

---

[1] Despite what the term "gist" might otherwise call to mind, the aim of this inquiry is not to identify a single essential element at the action's theoretical core. We instead try to understand how the statutory cause of action, considered as a whole, relates to the historical division between law and equity, the goal being to place the cause of action appropriately among its possible historical analogues.

I do not believe federal law differs a great deal on this basic point. Though the majority reads *Tull* as establishing a strict rule that the plea for a legal remedy carries a jury trial right notwithstanding any other substantial equitable characteristics the action might have (maj. opn., *ante*, at pp. 330–331), I do not read *Tull* this way. The high court's case law has long made clear that the federal jury trial inquiry turns on a holistic examination of both "the nature of the action and of the remedy sought"—a rule *Tull* cited without signaling any intent to depart from it. (*Tull, supra, 481 U.S. at p. 417*; see also *id. at p. 422, fn. 6* ["Our search is for a single historical analog, taking into consideration the nature of the cause of action and the remedy as two important factors."]; accord, e.g., *Feltner v. Columbia Pictures Television, Inc. (1998) 523 U.S. 340, 348 [140 L.Ed.2d 438, 118 S.Ct. 1279]* [*7th Amend. to the U.S. Const*. intended to apply to actions "'in which legal *rights* were to be ascertained and determined'" (italics omitted & added)].)

In any event, *Tull* is distinguishable from this case on other, more case-specific grounds, which I discuss later in this opinion. We need not rely here on any broad generalizations about how, if at all, the federal approach to the civil jury right differs from California's.

Taking this broader look at the UCL, I agree with the majority that the gist of the statutory action is equitable.[2] Whatever type of relief a government plaintiff might seek in a particular case, liability under the UCL inherently rests on equitable considerations—considerations of a sort that only the trial court can effectively weigh and determine. (Maj. opn., *ante*, at pp. 301–303.) The central provision of the UCL, Business and Professions Code section 17200, prohibits "unfair competition," **[****88]** which it defines to include "unfair" business practices. Determining what is unfair calls on courts to exercise the sort of flexible discretion that characterized the courts of equity—a kind of judgment that juries have not historically made, nor are well suited to make. It is hard to imagine drafting jury instructions, for example, to embody the "unfairness" test enunciated in Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187 [83 Cal. Rptr. 2d 548, 973 P.2d 527], which refers to "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit" of those laws. **[*337]**

The liability determinations at issue in *Tull* were of a different character. The question was whether the defendant had, without a permit, dumped fill into an area constituting "wetlands" within the meaning of the Clean Water Act. (*Tull, supra, 481 U.S. at pp. 414–415*.) The statutory rules governing this determination were certainly complicated and technical. (See *33 U.S.C. § 1344(f)*; *33 C.F.R. § 328.3(b) (2019)*.) But they did not call on the decision maker's equitable discretion, and no one in *Tull*, including the court, disputed that this was the type of factual determination that has traditionally been made by juries in otherwise appropriate cases. Indeed, the Clean Water Act also provides for criminal penalties for willful or negligent **[****89]** violations (*33 U.S.C. § 1319(c)*)—which means that in some set of Clean Water Act cases, the relevant factual disputes are, of necessity, resolved by juries. *Tull* is thus distinguishable from this case by the nature of the liability decision there, which required only the determination of the historical facts and the application of legal standards to those facts—tasks central to the traditional role of trial juries—in contrast to the balancing of interests typically called for in assessing liability under the UCL.

But here is where my analysis differs from the majority's: While UCL liability can readily **[**496]** be characterized as dependent on equitable considerations, I do not believe the same can be said of liability under the FAL. To be sure, the FAL, much like the UCL, is broadly written: The statute is designed to encompass any novel scheme for misleading the public. (Maj. opn., *ante*, at p. 308.) The statute makes claims relatively easy to prove, compared to common law fraud, by employing a negligence standard **[***755]** and omitting the elements of reliance and injury; the plaintiff need show only that the challenged advertisement or promotion is likely to mislead members of the public. (*Kasky v. Nike, Inc. (2002) 27 Cal.4th 939, 951 [119 Cal. Rptr. 2d 296, 45 P.3d 243]*.)[3] But at least by its text, **[****90]** the FAL does not create a standard of liability that depends on the exercise of a court's equitable judgment. No balancing of harms and benefits or weighing of the parties' and public interests are involved in determining liability; no equitable principles like laches or unclean hands come into play. Rather, as other state courts have observed in evaluating similar laws, the FAL in significant respects resembles the common law cause of action for negligent misrepresentation, a species of the tort of deceit. (See *Bily v. Arthur Young & Co. (1992) 3 Cal.4th 370, 407* ***[*338]*** *[11 Cal. Rptr. 2d 51, 834 P.2d 745]*; cf. *State v. Abbott Laboratories (2012) 341 Wis.2d 510, 533 [816 N.W.2d 145, 156]* [holding that Wisconsin's Deceptive Trade Practices Act, as "an essential

---

[2] The majority discusses the equitable character of the UCL and the FAL in detail only in part III of the opinion, which addresses *statutory* jury trial rights. The majority concludes there that in enacting and amending both statutes, "the legislative history and legislative purpose of both statutes convincingly establish that the Legislature intended that such causes of action under these statutes would be tried by the court, exercising the traditional flexible discretion and judicial expertise of a court of equity … ." (Maj. opn., *ante*, at p. 297.) In its constitutional analysis, the majority simply cross-references this discussion. (*Id.* at p. 326.) Readers should not be confused, however, by this organizational choice: The Legislature's intent does not control whether there is a constitutional right to jury trial. (See *id.* at p. 314.)

[3] *Business and Professions Code section 17500* defines the scope of false advertising liability: "It is unlawful for any person … with intent directly or indirectly to dispose of real or personal property or to perform services … to make or disseminate or cause to be made or disseminated before the public … any statement, concerning that real or personal property or those services … which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading, or for any person … to so make … any such statement as part of a plan or scheme with the intent not to sell that personal property or those services, professional or otherwise, so advertised at the price stated therein, or as so advertised."

counterpart to the common law claim of 'cheating,'" carries a right to jury trial].) Though the FAL requires only a misleading advertisement, not necessarily one containing express falsehoods, the same is true for tortious deceit in California. (*Universal By-Products, Inc. v. City of Modesto (1974) 43 Cal.App.3d 145, 151 [117 Cal. Rptr. 525]* ["A misrepresentation need not be express but may be implied by or inferred from the circumstances."]; *Sullivan v. Helbing (1924) 66 Cal.App. 478, 483 [226 P. 803]* ["Fraudulent representations may consist of half-truths calculated to deceive. Thus a representation literally true is actionable if used to create an impression substantially false."].) At least considered in isolation, then, nothing about the nature **[****91]** of liability determination under the FAL suggests it sits beyond the scope of the jury right.

In characterizing the nature of the FAL action as equitable, the majority emphasizes that appellate courts analyzing FAL liability have discussed a "variety of factors" relevant to whether a particular advertisement is misleading. (Maj. opn., *ante*, at p. 309.) These appellate discussions, though, tell us little about the legal or equitable character of FAL liability. The issues before the appellate courts were ones of legal sufficiency: whether allegations of misleading advertising were sufficient to survive demurrer (*Brady v. Bayer Corp. (2018) 26 Cal.App.5th 1156 [237 Cal. Rptr. 3d 683]*; *Day v. AT & T Corp. (1998) 63 Cal.App.4th 325 [74 Cal. Rptr. 2d 55]*) or whether substantial evidence supported a trial court's finding of an FAL violation (*People v. Overstock.com, Inc. (2017) 12 Cal.App.5th 1064 [219 Cal. Rptr. 3d 65]* (*Overstock.com*)). In answering these questions, the courts did cite a number of factual considerations that supported the complaint's or evidentiary showing's sufficiency, but those factual discussions are not particularly suggestive of an inherently equitable approach to FAL liability. What the appellate courts did in these cases does not differ in any meaningful way from what courts do when they review evidentiary sufficiency questions in cases involving **[***756]** causes of action that are tried to juries, such **[****92]** as common law fraud. (See, e.g., *Dore v. Arnold Worldwide, Inc. (2006) 39 Cal.4th 384, 393 [46 Cal. Rptr. 3d 668, 139 P.3d 56]* [in suit for fraudulent inducement to enter into at-will employment contract, evidence was **[**497]** insufficient to show reliance where employment offer did not specifically guarantee the plaintiff "would be employed there so long as his work was satisfactory or that he could be fired only for good cause" or contain any other "promises of long-term employment"]; *AREI II Cases (2013) 216 Cal.App.4th 1004, 1022 [157 Cal. Rptr. 3d 368]* [detailing several "facts and circumstances that permit a reasonable inference" defendant participated in fraud].) Indeed, even in criminal cases tried to juries, appellate decisions on sufficiency of evidence often articulate a number of factual considerations to guide the analysis. (See, e.g., *People v. Banks (2015) 61 **[*339]** Cal.4th 788, 804–811 [189 Cal. Rptr. 3d 208, 351 P.3d 330]* [detailed analysis of sufficiency of evidence to show major participation in felony and reckless indifference to human life]; *People v. Koontz (2002) 27 Cal.4th 1041, 1081–1082 [119 Cal. Rptr. 2d 859, 46 P.3d 335]* [discussing three nonexclusive factors relevant to sufficiency of evidence for premeditation and deliberation].)

None of the cases the majority cites discusses the possibility of a jury trial when civil penalties are sought. Indeed, the only case in which the issue could have arisen is *Overstock.com*—the only action brought by a public plaintiff entitled to seek civil penalties—but it **[****93]** was not raised there. Nor do any of the cases hold or state that determining an FAL violation requires weighing competing interests, applying equitable doctrines such as laches, estoppel, or unclean hands, or balancing the harms and benefits of a requested remedy. Indeed, the considerations discussed in the opinions appear fairly typical of issues that, in a jury trial, might be used by the jury to resolve the question of liability under the FAL: the inability of consumers to learn the terms of a prepaid phone card before buying the card (*Day v. AT & T Corp., supra, 63 Cal.App.4th at p. 334*); the application of "common sense" (*Brady v. Bayer Corp., supra, 26 Cal.App.5th at p. 1165*); the possibility that a brand name by itself would mislead consumers (*id. at p. 1170*); and the likelihood a consumer would understand "'Compare at'" in an advertisement boasting of a low price to refer to another seller's price for the same item (*Overstock.com, supra, 12 Cal.App.5th at p. 1081*).

The *Overstock.com* court did cite as consistent with its own analysis a regulation of the Federal Trade Commission (FTC), part of the agency's Guides Against Deceptive Pricing (FTC Guides), stating that price comparisons to other merchandise can be "'useful and legitimate'" when the comparison items are of essentially similar quality and are obtainable in the area. (*Overstock.com, supra, 12 Cal.App.5th at p. 1081* **[****94]** , quoting *16 C.F.R. § 233.2(c) (2017)*.) The majority holds this up as an example of how "the complexities and nuances" of FAL liability "are often ameliorated by judicial reference to the relevant guidelines developed by the FTC regarding deceptive advertising."

(Maj. opn., *ante*, at p. 311, citing Stern, Cal. Practice Guide: Bus. & Prof. Code § 17200 Practice (The Rutter Group 2019) ¶¶ 4:46–4:80.4, pp. 4-14 to 4-32.)

This overstates the significance of the FTC Guides to the question before us. For one thing, the link between the FTC Guides and liability under the FAL appears rather tenuous. The FTC Guides are not comprehensive or definitive regulations even **[***757]** for interpreting the FTC Act, and certainly nothing suggests they were intended, or have functioned, to define deceptive practices **[*340]** for purposes of state law.[4] In any event, while the FTC **[**498]** Guides offer guidance on what sort of practices will be considered deceptive, none of this guidance appears to turn on the application of equitable judgment. For example, the Guides Concerning Use of Endorsements and Testimonials in Advertising, which the majority describes as illustrating the type of "equitable consideration" that goes into an FAL liability determination (maj. opn., *ante*, at p. 312), covers such questions as when **[****95]** an advertiser should confirm that the endorser's views have not changed (16 C.F.R. § 255.1(b) (2020)) and what kind of substantiation must support the claims of effectiveness implied by a consumer endorsement (*id.*, § 255.2(a), (b) (2020)). The FTC Guides illustrate the potential factual complexity of deceptive advertising claims, but they do not support the majority's conclusion that deciding the merits of an FAL claim "depends upon the exercise of the type of equitable discretion and judgment typically employed by a court of equity." (Maj. opn., *ante*, at p. 313.)[5]

The majority also argues that because of the FAL's potential breadth, it is important that the FAL liability standard be administered by trial courts, which can "set forth their reasoning for a determination that the FAL has been violated so that a body of precedent can evolve to inform businesses of advertising practices they must avoid." (Maj. opn., *ante*, at p. 310.) As an argument for cabining the scope of the constitutional jury trial right, I find this reasoning unpersuasive. Binding precedent is made only by appellate courts, and an appellate decision on sufficiency of the evidence fills out the precedential picture **[****96]** regardless of whether trial was to a jury or to the bench. And while it might be thought desirable from some points of view to have all FAL actions heard by judges, the same might be said for any number of civil causes of action. Defendants in insurance bad faith cases, for example, might well prefer bench trials and could argue that they, too, need a body of precedent to guide their actions. But they get such precedential guidance from **[*341]** appellate decisions on legal issues. (E.g., *Wilson v. 21st Century Ins. Co. (2007) 42 Cal.4th 713, 721–726 [68 Cal. Rptr. 3d 746, 171 P.3d 1082]* [propriety of summary judgment].) It would not be consistent with the constitutional **[***758]** mandate that trial by jury "is an inviolate right and shall be secured to all" (*Cal. Const., art. I, § 16*) for us to pick out categories of civil actions that, because they sometimes raise complicated factual issues or implicate common business decisions, we regard as more suitable for trial to the court.

In the end, however, while it seems to me the majority comes up short in its effort to show that FAL claims implicate inherently equitable judgment uniquely suited to a court, I agree that the present action was nonetheless predominantly equitable in character.

---

[4] The FTC Guides on testimonials and endorsements, for example, simply "provide the basis for voluntary compliance with the law by advertisers and endorsers." (*16 C.F.R. § 255.0(a) (2020)*; see also *id.*, *§ 260.1(a) (2019)* [Guides on environmental claims "help marketers avoid making environmental marketing claims that are unfair or deceptive," but "do not operate to bind the FTC or the public."]; *FTC v. Mary Carter Paint Co. (1965) 382 U.S. 46, 47–48 [15 L.Ed.2d 128, 86 S.Ct. 219]* ["These, of course, were guides, not fixed rules as such, and were designed to inform businessmen of the factors which would guide Commission decision."].) And while the Stern treatise describes some of the FTC Guides as potentially relevant to FAL liability, it gives no examples of their use by courts for this purpose and does not describe such use as common. (See Stern, Cal. Practice Guide: *Bus. & Prof. Code § 17200* Practice, *supra*, ¶¶ 4:46, 4:72, 4:80.2–4:80.4, pp. 4-14, 4-32.)

[5] The same is true of the cited federal decisions upholding FTC findings of deceptiveness (maj. opn., *ante*, at p. 313), such as *FTC v. Colgate-Palmolive Co. (1965) 380 U.S. 374, 384–390 [13 L.Ed.2d 904, 85 S.Ct. 1035]* and *FTC v. Mary Carter Paint Co., supra, 382 U.S. at pages 47* to 48: They may show that deceptiveness can be factually complicated, but not that it depends on application of equitable principles.

First, as the majority explains, even if liability for civil penalties is **[****97]** deemed a legal question, the amount of such penalties under the UCL and the FAL is decided by the court on an equitable basis, along with questions of injunctive relief and appropriate restitution. (Maj. opn., *ante*, at p. 326 ["[T]he UCL and the FAL statutes specify that in assessing the amount of the civil penalty to be imposed under these statutes, the court is afforded broad discretion to consider a nonexclusive list of factors that include the relative seriousness of the defendant's conduct and the potential deterrent effect of such penalties, the type of qualitative evaluation and weighing of a variety of factors that is typically undertaken by a court and not a jury. (*Bus. & Prof. Code, §§ 17206*, *17536*.)"].) The parties do not dispute that even if the request for civil penalties triggered a jury trial right, the right would extend only to the trial on liability; the ultimate amount of any penalties awarded would be decided by the court. Such an arrangement is not unprecedented (see *Tull, supra, 481 U.S. at pp. 425–427*), but this allocation of remedial authority **[**499]** does diminish the practical importance of the jury's factfinding role and, in my view, strains the idea that the gist of the action is predominantly legal.

Second, and equally important, the causes **[****98]** of action under the UCL and the FAL are inherently intertwined. This is because "unfair" competition under the UCL expressly includes "any act prohibited by" the FAL (*Bus. & Prof. Code, § 17200*), meaning that every violation of the FAL is therefore also a violation of the UCL. When, as here, allegedly deceptive conduct is pleaded as a violation of both statutes, the same liability questions that a jury would decide for purposes of the FAL would be decided by the court for purposes of the UCL. And while it might be theoretically possible to separate out the UCL claims that depend on equitable principles from those that do not, in practice the effort to keep the claims separate would be bound to collapse, since each UCL cause of action in a complaint is not necessarily limited to a single type of conduct or a single legal theory of liability.

[*342]

In these circumstances, trying liability under the FAL to the jury, while the rest of the action was decided by the court, would create procedural complications without significant benefit to the defendant demanding jury trial. Because the FAL and the UCL are intertwined in this manner, a trial court that considered the defendant's advertising deceptive could impose liability **[****99]** under the UCL before even putting the FAL liability question to the jury. (See maj. opn., *ante*, at p. 317 [trial court has discretion as to order of trying severable legal and equitable issue].) The court could then exercise its equitable judgment to impose both injunctive relief and substantial civil penalties for the UCL violation, regardless of the jury's view as to FAL liability. In other words, although every found violation of the FAL triggers civil penalties under the UCL, the inverse is **[***759]** not true; a jury's finding of no FAL liability would not preclude a judge from awarding substantial civil penalties under the UCL. Because of the way these intertwined causes of action relate when the same conduct is at issue, the jury's verdict does not ultimately determine whether civil penalties are imposed.

Plaintiffs here seek a traditionally legal remedy, civil penalties, along with the equitable remedies of injunction and restitution. They also plead causes of action under the FAL, for which liability appears to rest on factual determinations rather than equitable judgment, as well as the UCL. But in the end, the equitable facets of this action predominate over the legal ones. The amount **[****100]** of any civil penalties would be determined by the trial court on the basis of equitable principles, allowing the court to all but nullify any jury finding of an FAL violation. What is more, the court could effectively override any jury decision *against* FAL liability by imposing liability for the same conduct under the UCL before the FAL issue is ever tried, then awarding plaintiffs injunctive relief and penalties for that violation. For these reasons, I agree with the majority that the action is predominantly equitable in nature.

Liu, J., and Cuéllar, J., concurred.

LexisNexis® Headnotes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Preliminary Considerations > Jurisdiction > Subject Matter Jurisdiction

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

Under *Fed. R. Civ. P. 12(b)(1)*, a district court should dismiss a case when it lacks statutory or constitutional power to adjudicate it. In reviewing a motion to dismiss under *Rule 12(b)(1)*, the court must accept all material factual allegations in the complaint as true, but should not draw argumentative inferences favorable to the party asserting jurisdiction. The court may refer to evidence outside the pleadings. Evidentiary matter may be presented by affidavit or otherwise under a Rule 12(b)(1) motion. The plaintiff bears the burden of showing, by a preponderance of the evidence, that the court has subject matter jurisdiction over its claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] Motions to Dismiss, Failure to State Claim

To survive a Fed. R. Civ. P. 12(b)(6) motion, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A complaint must contain facts that do more than present a sheer possibility that a defendant has acted unlawfully. To decide Defendants' motion to dismiss, the court will accept all factual allegations in the complaint as true and draw all reasonable inferences in Plaintiffs' favor. However, the court will identify pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth. The court must then evaluate the well-pleaded factual allegations and determine whether they plausibly give rise to an entitlement to relief. This plausibility analysis does not impose a probability requirement at the pleading stage, but requires the complaint to provide enough fact to raise a reasonable expectation that discovery will reveal evidence of illegality.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > The Judiciary > Case or Controversy > Standing

HN3[] Remedies, Injunctions

Section 16 of the Clayton Act entitles any person, firm, corporation, or association to sue for injunctive relief against threatened loss or damage by a violation of the antitrust laws. 15 U.S.C.S. § 26. At the pleading stage, an antitrust plaintiff must show both constitutional standing and antitrust standing.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN4[] Standing, Elements

To satisfy the irreducible constitutional minimum of Article III standing, a plaintiff must demonstrate (1) an injury in fact, (2) a causal connection between the injury and complained-of conduct, and (3) a likelihood that the injury will be redressed by a favorable decision. The second and third requirements of standing, causation and redressability, require a plaintiff to demonstrate that the injury-in-fact she suffers is fairly traceable to the challenged action of the defendant and likely to be redressed by a favorable decision.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN5[] Standing, Elements

The traceability requirement for Article III standing means that the plaintiff must demonstrate a causal nexus between the defendant's conduct and the injury. The requirement that a complaint allege an injury that is fairly traceable to defendants' conduct for the purposes of constitutional standing is a lesser burden than the requirement that it show proximate cause. Thus, a plaintiff does not lack standing simply by virtue of the indirectness of his or her injury. Plaintiffs' injury would satisfy the fairly traceable requirement if they had alleged all the links in the chain of causation. This lesser burden as between traceability and proximate cause is particularly true at the pleading stage. Accordingly, the fact that there is an intervening cause of the plaintiff's injury may foreclose a finding of proximate cause but is not necessarily a basis for finding that the injury is not fairly traceable to the acts of the defendant.

Antitrust & Trade Law > Procedural Matters

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN6[] Antitrust & Trade Law, Procedural Matters

Some assumptions are acceptable at the pleading stage to meet the traceability requirement for Article III standing, especially in the antitrust context. Allegations of economic harm based on standard principles of supply and demand are routinely credited by courts in a variety of contexts. Antitrust cases often involve tracing a cost increase through several levels of a chain of distribution.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN7[] Standing, Elements

The third and final requirement for Article III standing is redressability. The redressability inquiry focuses on whether the injury that a plaintiff alleges is likely to be redressed through the litigation. To satisfy the redressability requirement, a plaintiff must establish that it is likely and not merely speculative that the plaintiff's injury will be remedied by the relief plaintiff seeks in bringing suit. Importantly, the redressability prong does not require that court-ordered relief completely redress all injury, and it is not a demand for mathematical certainty, As the Second Circuit recently explained, redressability is an issue that is closely related to the question of causation. When the injury alleged is caused by the illegal conduct, in many instances (at least where continuation of the illegal conduct will continue to cause harm), the cessation of the illegal conduct will be likely to at least diminish further instance of the injury.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN8[] Antitrust & Trade Law, Procedural Matters

At the motion to dismiss stage, a private antitrust plaintiff must plausibly allege (a) that it suffered a special kind of antitrust injury, and (b) that it is a suitable plaintiff to pursue the alleged antitrust violation and thus is an efficient enforcer of the antitrust laws. As the Second Circuit has explained: The efficient enforcer inquiry turns on: (1) whether the violation was a direct or remote cause of the injury; (2) whether there is an identifiable class of other persons whose self-interest would normally lead them to sue for the violation; (3) whether the injury was speculative; and (4) whether there is a risk that other plaintiffs would be entitled to recover duplicative damages or that damages would be difficult to apportion among possible victims of the antitrust injury. These factors reflect a concern about whether the putative plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement. These four factors need not be given equal weight, and the relevant significance of each factor will depend on the circumstances of the particular case.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN9[] **Antitrust & Trade Law, Procedural Matters**

Directness in the antitrust context means close in the chain of causation. The overall inquiry is akin to proximate cause in tort law—plaintiffs may not be too remote so as to avoid duplicative recovery and limitlessly increase the universe of potential plaintiffs. As a general matter, those entities most directly injured by anticompetitive conduct are customers or competitors of the defendant. Nonetheless, a plaintiff who is not a customer or competitor may suffer a direct injury if it is a participant in the very market directly distorted by the antitrust violation and its injury is inextricably intertwined with the injury the defendants sought to inflict. To assess the plausibility of a putative plaintiff's claim to antitrust injury as being inextricably intertwined with the injury the defendants ultimately sought to inflict, the court must ask whether the plaintiff was manipulated or utilized by defendant as a fulcrum, conduit, or market force to injure competitors or participants in the relevant product and geographical markets.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN10[] **Antitrust & Trade Law, Procedural Matters**

The second efficient-enforcer factor recognizes that not every victim of an antitrust violation needs to be compensated under the antitrust laws in order for the antitrust laws to be efficiently enforced. This is particularly relevant where multiple sets of plaintiffs have sued the defendant over the same alleged antitrust violations.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN11[] **Antitrust & Trade Law, Procedural Matters**

The existence of only highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement. At the same time, some degree of uncertainty stems from the nature of ***antitrust law***. Impediments to reaching a reliable damages estimate often flow from the nature and complexity of the alleged antitrust violation.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Antitrust & Trade Law > Procedural Matters

HN12[] **Remedies, Injunctions**

Because standing under *15 U.S.C.S. § 16* raises no threat of multiple lawsuits or duplicative recoveries, some of the factors other than antitrust injury that are appropriate to a determination of standing under § 4 are not relevant under *§ 16*.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN13[] **Class Members, Named Members**

As long as the named plaintiffs have standing to sue the named defendants, any concern about whether it is proper for a class to include out-of-state, nonparty class members with claims subject to different state laws is a question of predominance under *Fed. R. Civ. P. 23(b)(3)* not a question of adjudicatory competence under Article III.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN14[] **Federal & State Interrelationships, Erie Doctrine**

A federal court adjudicating state law looks to the state's decisional law, as well as to its constitution and statutes. When the state law is unsettled, the court is obligated to carefully predict how the state's highest court would resolve the uncertainty or ambiguity. The court must give the fullest weight to the pronouncements of the state's highest court while giving proper regard to the rulings of the state's lower courts.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > State Regulation

Governments > Courts > Judicial Precedent

HN15[] **Attempts to Monopolize, State Regulation**

New York's Donnelly Act prohibits every contract, agreement, arrangement or combination whereby competition may be restrained. *N.Y. Gen. Bus. Law § 340(1)*. The New York Court of Appeals has noted that the Donnelly Act should generally be construed in light of Federal precedent and given a different interpretation only where State policy, differences in the statutory language, or the legislative history justify such a result.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Judicial Precedent

HN16[] **Federal & State Interrelationships, Erie Doctrine**

A federal court's view that a state appellate court decision is wrongly decided (or would lead to results with which the federal court would disagree) is not grounds for the federal court to ignore the state court's ruling.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships

HN17[] **Antitrust & Trade Law, Procedural Matters**

A harmonization provision in a state's antitrust statute does not require a state's Supreme Court to find that state ***antitrust law*** must be analyzed under the federal standard. That is particularly true where the harmonization provision finds that federal law is merely persuasive.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN18[] **State Regulation, Claims**

The Tennessee Trade Practices Act (TTPA) prohibits anti-competitive conduct which tends to lessen full and free competition in the importation or sale of articles imported into this state or which tend to advance, reduce, or control the price or the cost to the producer or the consumer of any such product. *Tenn. Code Ann. § 47-25-101*. The TTPA provides a civil remedy to any person who is injured or damaged by such arrangement. § 47-25-106. The Tennessee Supreme Court has held that this includes claims brought by indirect purchasers.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN19[] **Trade Practices & Unfair Competition, State Regulation**

The Tennessee Trade Practices Act (TTPA) lacks a mandatory harmonization clause requiring consistency between interpretation of the TTPA and interpretations of federal antitrust laws.

Constitutional Law > The Judiciary > Case or Controversy > Standing

HN20[] **Case or Controversy, Standing**

A party has standing to sue under Tennessee law when it meets the minimum constitutional requirements of standing under federal law.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN21[] **Trade Practices & Unfair Competition, State Regulation**

The Tennessee Trade Practices Act's use of "control" includes the ability to exercise a restraining or directing influence over something.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN22[] **State Regulation, Claims**

Under California law, where a plaintiff fails to state an antitrust claim, and where an unfair competition claim is based upon the same allegations, such state claims are properly dismissed.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN23[] **Deceptive & Unfair Trade Practices, State Regulation**

Mass. Gen. Laws ch. 93A (CBPA) provides a cause of action for any person who has been injured by another person's use or employment of any unfair method of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. CBPA, § 2, § 9(1).

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN24[] **Deceptive & Unfair Trade Practices, State Regulation**

The Massachusetts Consumer and Business Protection Act is to be construed broadly in light of its goals of protecting Massachusetts consumers, regardless of whether Plaintiffs have standing under either federal or state antitrust laws.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN25[] **Deceptive & Unfair Trade Practices, State Regulation**

A Massachusetts Consumer and Business Protection Act plaintiff must allege a connection between plaintiff and defendant, even if it is an indirect one.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN26[] **Deceptive & Unfair Trade Practices, State Regulation**

New Mexico's Unfair Practices Act (NMUPA) provides that unfair or deceptive trade practices and unconscionable trade practices in the conduct of any trade or commerce are unlawful. *N.M. Stat. Ann. § 57-12-3*. The NMUPA defines unconscionable trade practice as: an act or practice in connection with the sale, lease, rental or loan, or in connection with the offering for sale, lease, rental or loan, of any goods or services, including services provided by licensed professionals, or in the extension of credit or in the collection of debts that to a person's detriment: (1) takes advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or (2) results in a gross disparity between the value received by a person and the price paid. *N.M. Stat. Ann. § 57-12-2(E)*.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN27[] **Federal & State Interrelationships, Choice of Law**

Implied consent is sufficient to establish choice of law.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN28[] **Types of Contracts, Quasi Contracts**

The New York Court of Appeals has held that while a plaintiff need not be in privity with the defendant to state a claim for unjust enrichment, the connection between the defendant and the plaintiff must not be too attenuated. Plaintiffs must allege direct dealings or an actual, substantive relationship with defendants.

Opinion by: NICHOLAS G. GARAUFIS

Opinion

NICHOLAS G. GARAUFIS, United States District Judge.

This is a putative class action brought against Defendants American Express Company and American Express Travel Related Services Company, Inc. (together, "Amex"). Plaintiffs, consumers who made purchases using a non-Amex electronic form of payment, challenge the non-discrimination provisions contained in Amex's contracts with merchants who accept its cards (the "Anti-Steering Rules"). (Compl. (Dkt. 1) ¶ 1.) Currently before the court is Amex's motion to dismiss the complaint under *Federal Rules of Civil Procedure 12(b)(1)* and *12(b)(6)*. (Mot. to Dismiss ("Mot.") (Dkt. 37).) For the following reasons, Amex's motion is GRANTED IN PART and DENIED IN PART.

I. BACKGROUND

This action challenges Amex's Anti-Steering Rules. (Compl. ¶ 1.) Plaintiffs allege that Amex's Anti-Steering Rules unreasonably restrain trade in the two-sided market for credit- and charge-card transactions ("credit card transactions") because they: "(i) increase two-sided credit card transaction prices to supracompetitive levels; (ii) result in fewer credit card transactions **[*3]** than would occur but-for the restraints; and (iii) raise consumer retail prices on goods and services purchased throughout the country by Plaintiffs and the Class." (*Id.* ¶ 3.)

The Anti-Steering Rules have been the subject of much litigation. That background—including the procedural history of relevant cases, the workings of the credit-card market in general, and Amex's platform in particular, etc.—has been discussed at great length in this court's previous opinions. *See* *In re Am. Exp. Anti-Steering Rules Antitrust Litig., 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425, at *2-4 (E.D.N.Y. 2020)* (*"Non-Amex Merchants"*);[1]*In re Am. Exp. Anti-Steering Rules Antitrust Litig., 361 F. Supp. 3d 324, 331-33 (E.D.N.Y. 2019)*; *In re Am. Exp. Anti-Steering Rules Antitrust Litig., No. 11-MD-2221 (NGG), 2016 U.S. Dist. LEXIS 3332,*

[1] When quoting cases, unless otherwise noted, all citations and quotation marks are omitted and all alterations are adopted.

2016 WL 748089, at *1-4 (E.D.N.Y. Jan. 7, 2016); United States v. Am. Exp. Co. ("U.S. v. Amex"), 88 F. Supp. 3d 143, 149-67 (E.D.N.Y. 2015), *rev'd* 838 F.3d 179 (2d Cir. 2016), *aff'd sub nom*. Ohio v. Am. Exp. Co. ("Ohio"), 138 S. Ct. 2274, 201 L. Ed. 2d 678 (2017). The background necessary to introduce and decide the instant motion is laid out below.

A. The Parties

This action is brought by ten named Plaintiffs: (1) Anthony Oliver, a resident of California; (2) Terry Gayle Quinton, a resident of Tennessee; (3) Shawn O'Keefe, a resident of North Carolina; (4) Andrew Amend, a resident of Kansas; (5) Susan Burdette, a resident of New Mexico; (6) Gianna Valdes, a resident of New York; (7) David Moskowitz, a resident of Oregon; (8) Zachary Draper, a resident of Nevada; (9) Nate Thayer, a resident **[*4]** of Massachusetts; and (10) Michael Thomas Reid, a resident of Florida (collectively, "Plaintiffs"). Plaintiffs bring this action on their own behalf and, pursuant to *Federal Rule of Civil Procedure 23(b)(2)*, on behalf of a proposed "Nationwide Class" defined as:

> All persons or entities residing in the United States that do not have an Amex card and who use an electronic form of payment to purchase goods or services from merchants which accept Amex, Visa, Mastercard and/or Discover credit or charge cards.
>
> Excluded from the Class are Defendants, their parent companies, subsidiaries, agents and affiliates, all governmental entities, and any judges or justices assigned to hear any aspect of this action.

(Compl. ¶ 137.) Plaintiffs also bring this action pursuant to *Rule 23(a)* and *23(b)(3)* on behalf of thirty-two separate statewide damage classes asserting claims for damages under the antitrust statutes or consumer protection statutes and the law of unjust enrichment of thirty-two jurisdictions: Alabama, Arizona, California, District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Massachusetts, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Ohio, **[*5]** Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin (collectively, the "State Damages Classes"). (*Id.* ¶ 138.) Like the Nationwide Class, the State Damages Classes are made up of individual consumers who do not have an Amex card and who used any electronic form of payment to purchase a product from a merchant that accepted Amex, Visa, Mastercard, or Discover credit or charge cards. (*Id.* ¶ 139.)

Defendant American Express Company is a New York Corporation. (*Id.* ¶ 22.) Defendant American Express Travel Related Services Company, Inc. is a New York Corporation, with its principal place of business in New York, New York. (*Id.* ¶ 23.) It is a wholly owned subsidiary of American Express Company. (*Id.*)

B. The Relevant Market

Plaintiffs assert that the relevant geographic market is "the United States, including each of the States." (*Id.* ¶ 71.) The relevant product market is "the market for two-sided general purpose credit and charge card transactions." (*Id.* ¶ 72.)

C. Factual Allegations

1. The Credit Card Industry

Amex is one of four significant competitors in the nationwide credit card market. (*Id.* ¶ 36.) The others are Visa, Mastercard, and Discover. (*Id.*) According **[*6]** to Plaintiffs, the market shares of these four companies as of 2013 were Visa 45%, Amex 26.4%, MasterCard 23.3%, and Discover 5.3%. (*Id.*; *see* Ohio, 138 S. Ct. at 2282.) The market is also constrained by high barriers to entry; in fact, there has not been a successful entry into the market since Discover in 1985. (*Id.* ¶ 38.)

Credit card companies provide services both to cardholders, who use the cards to purchase goods and services, and to merchants, who accept those cards as payment in exchange for goods and services. These credit card companies thus operate a two-sided platform, offering services to two, distinct groups (merchants and consumers) and facilitating transactions between them. *See* *Ohio, 138 S. Ct. at 2280*. Credit card companies need to make a sale to both sides of the market to succeed; after all, "no credit-card transaction can occur unless both the merchant and the cardholder agree to use the same credit-card network." *Id.; (see also* Compl. ¶¶ 45-47). Amex offers services directly to both merchants and consumers. (Compl. ¶ 40.)

As Plaintiffs allege, "when a consumer uses a credit or charge card, the merchant's point of sale terminal relays a record of the transaction to the card's network." (*Id.* ¶ 48.) The network then **[*7]** pays, or facilitates the payment of, money for that transaction to the merchant, consisting of the purchase price charged to the customer minus the fee that network or bank charges merchants (the "merchant fee"). (*Id.*) Consumers may also pay fees to use their credit cards and get rewards for making purchases with a particular card. (*Id.* ¶ 49.) Unlike its competitors, who charge variable merchant fees depending on the particular card the individual consumer is using, Amex "charg[es] a single merchant fee for all of [its] various credit and charge cards." (*Id.* ¶ 52.) Amex sets its merchant fee pricing by industry segments, and, in general, its merchant fees are higher than those of its competitors. (*Id.* ¶¶ 53, 69.) Plaintiffs further allege that, in contrast to its competitors, "the vast majority of Amex's revenue comes from merchant fees." (*Id.*¶ 55.)

2. The Anti-Steering Rules

The target of this litigation is a provision in the Card Acceptance Agreement ("CAA"), known as the Anti-Steering Rules, to which all merchants who accept Amex cards must agree. Pursuant to the Anti-Steering Rules, Merchants may not:

- indicate or imply that they prefer, directly or indirectly, any Other Payment **[*8]** Products over [Amex] Card[s];
- try to dissuade cardholders from using [their Amex] Card;
- criticize or mischaracterize [the Amex] Card or any of [Amex's] services or programs;
- try to persuade or prompt cardholders to use any Other Payment Products or any other method of payment (e.g., payment by check);
- impose any restriction, conditions, or disadvantages when the Card is accepted that are not imposed equally on all Other Payment Products, except for ACH funds transfer, cash, and checks;
- engage in activities that harm [Amex's] business or the American Express Brand (or both);
- or promote any Other Payment Products (except the Merchant's own private label card that they issue for use solely at their establishments) more actively than the Merchant promotes [Amex's] Card.

(*Id.* ¶ 78.)

3. Harm to Plaintiffs

Plaintiffs allege that the "intended and actual result of Amex's Anti-Steering Rules is near-total insulation from price competition amongst Amex, Visa, Mastercard, and Discover in the fees charged to merchants." (*Id.* ¶ 83.) This is because the Anti-Steering Rules prevent merchants from encouraging customers to use non-Amex cards, even where another card is less expensive for the merchant **[*9]** to accept. (*Id.*) In turn, any incentive for Visa, Mastercard, and Discover "to compete with Amex *or with one another* on the level of merchant fees" is removed. (*Id.*) Absent the Anti-Steering Rules, merchants could—and would—use "a number of different procompetitive steering devices to encourage cardholders to use a lower- cost credit card." (*Id.* ¶ 84.) This steering, Plaintiffs allege, would have many procompetitive virtues, including: "fostering horizontal competition between the four [credit card] networks; driving supra-competitive prices to merchants and two-sided [credit card] transaction prices down to a competitive level by letting market forces, not Amex's restraints, determine the price; and increasing the number of credit and charge card transactions in the relevant markets." (*Id.* ¶ 85.) Plaintiffs allege that the Anti-Steering Rules have stifled this competition and have caused and continue to cause higher credit card transaction prices, a lower volume of overall credit card transactions, and higher consumer retail prices on goods and services purchased throughout the country. (*Id.* ¶ 94.)

Plaintiffs allege that the Anti-Steering Rules do not just insulate Amex from competition, **[*10]** but also result in higher merchant fees charged by Visa, Mastercard, and Discover as well. (*Id.* ¶ 107.) This is because "[a]bsent merchant steering, a credit card provider cannot expect to receive any competitive benefit for offering a price below that of its competitors." (*Id.* ¶ 110.) As a result, Visa, Mastercard, and Discover have all raised their merchant fees. (*Id.* ¶¶ 70, 116, 117.) And, with steering in place, the total number of credit card transactions, and the volume of those transactions, would also increase. (*Id.* ¶¶ 121-124.)

Plaintiffs allege that without the Anti-Steering Rules, merchants, seeking cost savings, would steer customers to other credit card networks because Amex's merchant fees are generally the highest. That steering would motivate competition between all credit card networks to lower merchant fees in an attempt to convince merchants to steer customers to their network. That market competition would drive down the costs merchants paid to credit card networks. As a result, instead of passing along higher merchant fees as higher retail costs, merchants would pass on these merchant fee cost-savings in the form of lower retail prices "on everything, to every consumer." **[*11]** (Compl. ¶ 127.) Instead, with the Anti-Steering Rules in place, "[h]arm to Plaintiffs and class members occurs at the time of each retail purchase from all [credit card]-accepting merchants in every State." (*See generally id.* ¶¶ 125-129.)

D. Procedural History

Plaintiffs Oliver, O'Keefe, Valdes, Amend, Burdette, Reid, and Draper previously brought claims for relief in this court against Amex based on the same facts and circumstances as alleged herein. These actions were consolidated under *Jaynes et al. v. Am. Ex. et al.*, 15-CV-1598 (E.D.N.Y. July 7, 2015). After the Second Circuit's decision in *U.S. v. Amex*, the parties executed a tolling agreement, in which Plaintiffs agreed to dismiss their claims against Amex without prejudice with the right to re-file those claims within sixty days after all rights of appeal in *U.S. v. Amex* were exhausted. Plaintiffs subsequently filed their complaint in this action on January 29, 2019. (Compl.) On July 24, 2019, Amex filed a fully briefed motion to dismiss the complaint. (*See* Amex Mem. in Supp. of Mot. ("Mem.") (Dkt. 38); Pls. Mem. in Opp. to Mot. ("Opp.") (Dkt. 40); Amex Reply in Supp. of Mot ("Reply.") (Dkt. 32).)

II. LEGAL STANDARD

A. Rule12(b)(1) [*12]

HN1[] Under *Rule 12(b)(1)*, a district court should dismiss a case when it "lacks statutory or constitutional power to adjudicate it." *Makarova v. United States, 201 F.3d 110, 113 (2d Cir. 2000)*. In reviewing a motion to dismiss under *Rule 12(b)(1)*, the court must accept all material factual allegations in the complaint as true, but should not draw "argumentative inferences favorable to the party asserting jurisdiction." *Atl. Mut. Ins. Co. v. Balfour Maclaine Int'l Ltd., 968 F.2d 196, 198 (2d Cir. 1992)* (citing *Norton v. Larney, 266 U.S. 511, 515, 45 S. Ct. 145, 69 L. Ed. 413 (1925))*. The court may refer to evidence outside the pleadings. *See* *Makarova, 201 F. 3d at 113* (citing *Kamen v. American Tel. & Tel. Co., 791 F. 2d 1006, 1011 (2d Cir. 1986)* (stating that "evidentiary matter may be presented by affidavit or otherwise" under a *Rule 12(b)(1)* motion)). The plaintiff bears the burden of showing, by a preponderance of the evidence, that the court has subject matter jurisdiction over its claims. *See id.*

B. *Rule 12(b)(6)*

HN2[] To survive a *Rule 12(b)(6)* motion, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A complaint must contain facts that do more than present a "sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678*. To decide Defendants' motion to dismiss, the court "will accept all factual allegations in the [c]omplaint as true and draw all reasonable inferences in [Plaintiffs'] favor." *L-7 Designs, Inc. v. Old Navy, LLC, 647 F.3d 419, 429 (2d Cir. 2011)*. However, the court will "identify[] pleadings that, because they are no more **[*13]** than conclusions, are not entitled to the assumption of truth." *Iqbal, 556 U.S. at 679*. The court must then evaluate the "well-pleaded factual allegations" and "determine whether they plausibly give rise to an entitlement to relief." *Iqbal, 556 U.S. at 679*. This plausibility analysis "does not impose a probability requirement at the pleading stage," but requires the complaint to provide "enough fact to raise a reasonable expectation that discovery will reveal evidence of illegality." *Arista Records, LLC v. Doe 3, 604 F.3d 110, 120 (2d Cir. 2010)* (quoting *Twombly, 550 U.S. at 556*).

III. DISCUSSION

A. Federal Claims

HN3[] *Section 16* of the Clayton Act entitles "[a]ny person, firm, corporation, or association" to sue for injunctive relief "against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. At the pleading stage, "[a]n antitrust plaintiff must show both constitutional standing and antitrust standing." *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 770 (2d Cir. 2016)*; *see also* *Eastman Kodak Co. v. Henry Bath LLC, 936 F.3d 86, 94 (2d Cir. 2019)*. Amex claims that Plaintiffs have not met either burden.

1. Article III Standing

HN4[] To satisfy the "irreducible constitutional minimum" of Article III standing, a plaintiff must demonstrate (1) an "injury in fact," (2) a "causal connection" between the injury and complained-of conduct, and (3) a likelihood "that the injury will be redressed by a favorable decision." *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. The second and third requirements of **[*14]** standing, "causation" and "redressability," require a plaintiff to demonstrate that the "injury-in-fact" she suffers is "fairly traceable to the challenged action of the defendant and likely to be redressed by a favorable decision." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 125, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*.

a. Injury in Fact

Plaintiffs' adequately allege an injury-in-fact: that they "pa[y] more for goods and/or services purchased from merchants . . . than they otherwise would and will pay in the absence of Amex's restraints." (Compl. ¶ 152.) Amex does not dispute that this type of economic harm is sufficient for the purposes of standing.

b. Traceability

A more difficult question concerns whether Plaintiffs' respective injuries are "fairly traceable" to Amex's Anti-Steering Rules. ***HN5***[] "The traceability requirement for Article III standing means that the plaintiff must demonstrate a causal nexus between the defendant's conduct and the injury." *Rothstein v. UBS AG, 708 F.3d 82, 91 (2d Cir. 2013)*. *Rothestein* explained that "[t]he requirement that a complaint allege an injury that is fairly traceable to defendants' conduct for the purposes of constitutional standing is a lesser burden than the requirement that it show proximate cause." *Id. at 92*. Thus, a plaintiff "does not lack standing simply by virtue of the indirectness of **[*15]** his or her injury." *Heldman v. Sobol, 962 F.2d 148, 156 (2d Cir. 1992)*; *see also id.* ("[P]laintiffs' injury would satisfy the fairly traceable requirement if they had alleged all the links in the chain of causation."). This "lesser burden" as between traceability and proximate cause is "particularly [true] at the pleading stage." *Connecticut v. Am. Elec. Power Co., Inc., 582 F.3d 309, 346 (2d Cir. 2009)*, *rev'd on other grounds*, *564 U.S. 410, 131 S. Ct. 2527, 180 L. Ed. 2d 435 (2011)*. Accordingly, "the fact that there is an intervening cause of the plaintiff's injury may foreclose a finding of proximate cause but is not necessarily a basis for finding that the injury is not 'fairly traceable' to the acts of the defendant." *Rothstein, 708 F.3d at 92*.

Here, Plaintiffs meet this low burden. Plaintiffs allege that, absent the Anti-Steering Rules, merchants would steer customers to the credit card networks that charged merchants the lowest merchant fee. This would precipitate price competition between credit card companies on the merchant side of the transaction, *i.e.* incentivize credit card networks to lower their merchant fees to attract merchant business. Those lower fees would lead to increased savings for merchants, a portion of which they would pass on in the form of lower retail prices to Plaintiffs.

Accepting these allegations as true, Plaintiffs have met their "relatively modest" **[*16]** burden to demonstrate traceability. Plaintiffs' allegations rely on certain basic economic assumptions about supply and demand: that, for instance, credit card networks would respond to merchant demand for lower fees and that merchants would respond to consumer demand for lower prices and pass on a certain amount of savings. While raising potential proximate cause problems, ***HN6***[] such assumptions are acceptable at the pleading stage to meet the traceability requirement, especially in the antitrust context. *See* *Adams v. Watson, 10 F.3d 915, 923 (1st Cir. 1993)* (allegations of economic harm "based on standard principles of supply and demand" are "routinely credited by courts in a variety of contexts"); *Ill. Brick Co. v. Illinois, 431 U.S. 720, 758, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (Brennan, J., dissenting) (noting that antitrust cases often involve "tracing a cost increase through several levels of a chain of distribution").

The court finds the reasoning in *Osborn v. Visa* persuasive. *797 F.3d 1057, 418 U.S. App. D.C. 193 (D.C. Cir. 2015)*. In *Osborn*, users and operators of independent automatized teller machines ("ATMs") brought suit against Visa, Mastercard, and certain affiliated banks alleging anticompetitive schemes for pricing ATM access fees. *Osborn, 797 F.3d at 1060*. When a cardholder uses an independent ATM, two fees are paid: (1) the cardholder's bank pays an "interchange" fee to the **[*17]** ATM; and (2) the ATM pays a network fee to the ATM network (operated by, among other companies, Visa and Mastercard) that connects the ATM to the cardholder's bank. *Id. at 1060-61*. The difference between those two fees (the "net interchange fee") represents a portion of the ATM operator's profit. In addition to the net interchange fee collected each time a consumer uses an ATM, ATM operators also collect revenue from ATM access fees which are paid directly by the cardholder. *Id.* In *Osborn*, plaintiffs alleged that Visa and Mastercard generally charged relatively higher network fees (meaning the net interchange fee for the ATM operator would be lower) while competing networks charged comparatively lower network fees (meaning that the net interchange fee for the ATM operator would be greater). *Id.*

Visa and Mastercard imposed non-discrimination provisions as conditions for ATM operators to access their network. *Id.* These provisions provided that "no ATM operator may charge customers whose transactions are processed on Visa or Mastercard networks a greater access fee than that charged to any customer whose transaction is processed on an alternative ATM network." *Id. at 1061*. As the court explained, these "anti-steering" **[*18]** provisions meant that "operators cannot say to cardholders: 'We will charge you $ 2.00 for a MasterCard or Visa transaction, but if you [use a lower-cost card], we will charge you only $ 1.75.'" *Id.* Plaintiffs alleged that these non-discrimination provisions prevented independent ATM operators from incentivizing cardholders to choose and use cards "that are most efficient and less costly than either Visa or Mastercard's." *Id.*

Particularly relevant to the present motion, the court in *Osborn* described the theory of harm of the plaintiff-consumers (who, unlike the ATM operators, were themselves not subject to the non-discrimination provisions) as follows:

> The consumers' theory of harm complements that of the operators. The consumers allege that they pay inflated access fees when they visit ATMs. They believe that the Access Fee Rules inhibit competition in both the network services market and the market for ATM access fees. But for the [nondiscrimination provisions], some ATM operators would offer discounted access fees for cards linked to lower-cost ATM networks, and this discounting would create downward pressure on access fees generally.

Id. at 1064. Rejecting the district court's determination **[*19]** that plaintiffs' allegations constituted an "attenuated, speculative chain of events that relies on numerous independent actors . . . that fails both because of uncertainty of several individual links and because of the number of speculative links that must hold for the chain to connect the challenged acts to the asserted particularized injury," the court held plaintiffs had standing, emphasizing that "[a] *Rule 12(b)(1)* motion . . . is not the occasion for evaluating the empirical accuracy of an economic theory." *Id. at*

1064-65. To the contrary, because "the economic facts alleged by the Plaintiffs are specific [and] plausible . . . they pass muster for standing purposes at the pleadings stage." Id. at 1066.

Osborn's logic applies here. Relying on the same basic economic assumptions regarding competition and supply and demand as the consumer-plaintiffs in *Osborn*, Plaintiffs here allege specific facts supporting the causal link between Amex's Anti-Steering Rules and their economic harm. According to Plaintiffs, Amex's Anti-Steering rules insulate both Amex and its competitors from competition on fees charged to merchants. (Compl. ¶¶ 82-84.) Plaintiffs allege that between 2012 and 2015, because of a lack of incentive to compete **[*20]** on the merchant side of the market, Visa and Mastercard merchant fees have grown an average of 8.5% per year and that Visa announced a further fee increase in October 2018. (*Id.* ¶ 117.) At the same time, Plaintiffs allege that Amex raised its merchant fees on twenty separate occasions between 2005 and 2010 without losing any appreciable market share. (*Id.* ¶ 104.) Plaintiffs also highlight Discover's experience with its "low-cost pricing strategy" in the late 1990s, in which Discover sought to "capture market share from disgruntled merchants" by "provid[ing] a low-priced network for credit card services." (*Id.* ¶ 108.) However, the Anti-Steering Rules prevented significant market share from shifting to Discover,[2] and Discover "began raising discount rates in order to align itself with its competitors"; today, Discover's merchant fees are "similar to those offered by Visa and Mastercard." (*Id.* ¶¶ 108-109.) Finally, Plaintiffs allege that increased competition would lead to lower merchant fees and savings for merchants, and that "merchants will pass-on cost saving from reduced merchant fees in the form of lower retail prices." (*Id.* ¶ 127.) Taken together, these allegations plausibly state **[*21]** the necessary causal connection between Amex's Anti-Steering Rules and Plaintiffs' injury required for traceability under Article III at the pleading stage.

c. Redressability

HN7[] The third and final requirement for Article III standing is redressability. Amex focuses its argument on this prong, arguing that "because Plaintiffs' alleged multiple-step theory of causation depends on the actions of multiple third-party payment networks as well as merchants, it is entirely speculative that any relief that could be awarded in this case against Amex would redress the injury alleged." (Mem. at 5-6.) The court disagrees.

The redressability inquiry "focuses . . . on whether the injury that a plaintiff alleges is likely to be redressed through the litigation." *Sprint Comms. Co., L.P. v. APCC Servs., Inc., 554 U.S. 269, 286-87, 128 S. Ct. 2531, 171 L. Ed. 2d 424 (2008)*. To satisfy the redressability requirement, a plaintiff must establish that "it is likely and not merely speculative that the plaintiff's injury will be remedied by the relief plaintiff seeks in bringing suit." *Id. at 273-74* (citing *Lujan, 504 U.S. at 560-61*). Importantly, the redressability prong does not require that court-ordered relief completely redress all injury, s*ee* *Knight First Amendment Inst. at Columba Univ. v. Trump, 302 F. Supp. 3d 541, 561 (S.D.N.Y. 2018)*, and it "is not a demand for mathematical certainty," *Mhany Mgmt., Inc. v. County of Nassau, 819 F. 3d 581, 602 (2d Cir. 2016)*. As the Second Circuit recently explained, **[*22]** redressability is "an issue that is closely related to the question of causation." *Citizens for Responsibility and Ethics in Washington v. Trump, 939 F.3d 131, 147 (2d Cir. 2019)* ("*CREW*"). "When the injury alleged is caused by the illegal conduct, in many instances (at least where continuation of the illegal conduct will continue to cause harm), the cessation of the illegal conduct will be likely to at least diminish further instance of the injury." *Id.*

The principle announced in *CREW* applies with full force here. Because Plaintiffs' have adequately plead causation (for the purposes of standing at the pleadings stage), it follows that the "cessation of the illegal conduct"—Amex's Anti-Steering Rules—will "at least diminish further instance of the injury"—higher retail prices paid by Plaintiffs. That cessation could be achieved by the injunction Plaintiffs seek. Amex argues that Plaintiffs' injury would not be diminished by such an injunction "because the relationship between the [Anti-Steering Rules] and the price Plaintiffs pay for goods and services is so tenuous." (Mem. at 6.) While Amex frames this argument in terms of redressability, it really is one of traceability—*i.e.* the causal relationship between the injury and the conduct is too speculative and

[2] Not to mention that, as perhaps one of the clearest signs of the anti-competitive nature of the credit card market, there "has been no successful entry into the [credit card] market since Discover in 1985"—more than three decades ago. (Compl. ¶ 38.)

attenuated. Yet, as **[*23]** explained above, Plaintiffs have adequately pleaded traceability for the purposes of Article III standing, and Amex's argument therefore fails.

Accordingly, the court holds that Plaintiffs have Article III standing.

2. Antitrust Standing

Amex next argues that Individual Plaintiffs and the putative Nationwide Class lack antitrust standing to pursue their claims. ***HN8***[] At the motion to dismiss stage, "a private antitrust plaintiff must plausibly allege (a) that it suffered a special kind of antitrust injury, and (b) that it is a suitable plaintiff to pursue the alleged antitrust violation and thus is an efficient enforcer of the antitrust laws." *In re London Silver Fixing, Ltd., Antitrust Litig., 213 F. Supp. 3d 530, 549 (S.D.N.Y. 2016)*. Because the court finds that Plaintiffs are not efficient enforcers of the ***antitrust law***, it will not address whether they have plausibly alleged antitrust injury.

As the Second Circuit has explained:

> The efficient enforcer inquiry turns on: (1) whether the violation was a direct or remote cause of the injury; (2) whether there is an identifiable class of other persons whose self-interest would normally lead them to sue for the violation; (3) whether the injury was speculative; and (4) whether there is a risk that other plaintiffs would be entitled to **[*24]** recover duplicative damages or that damages would be difficult to apportion among possible victims of the antitrust injury.

Gelboim, 823 F. 3d at 772; *see also Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters ("AGC")*, *459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (the "*AGC* factors"). "[These] factors reflect a concern about whether the putative plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement." *Gelboim, 823 F. 3d at 780*. "These four factors need not be given equal weight," and "the relevant significance of each factor will depend on the circumstances of the particular case." *IQ Dental Supply Inc. v. Henry Schein, Inc., 924 F. 3d 57, 65 (2d. Cir. 2019)*.

This court recently applied the *AGC* factors to determine that a class of merchants who did not accept Amex (the "Non-Amex Class") were not efficient enforcers to challenge Amex's Anti-Steering Rules. *See Non-Amex Merchants, 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425, at *6-11*. There, this court held that (1) the Non-Amex Class's alleged harm was not sufficiently direct to Amex; (2) there was an identifiable other class of more direct victims—namely, the class of merchants who accept Amex—which has "litigated the same issue, and remains free to do so pursuant to the arbitration process laid out in their agreement with Amex"; (3) that "Plaintiffs' damages **[*25]** calculation would necessarily rest on multiple layers of speculation"; and (4) that the availability of other enforcement mechanisms "reinforce[d] the conclusion that the remaining Plaintiffs are not efficient enforcers of the antitrust laws." *Id.*

a. Directness

HN9[] "Directness in the antitrust context means close in the chain of causation." *Gatt Comms., Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 78 (2d Cir. 2013)* "The overall inquiry is akin to proximate cause in tort law—plaintiffs may not be too remote so as to avoid duplicative recovery and limitlessly increase the universe of potential plaintiffs." *Harry v. Total Gas & Power N. Am., Inc., 889 F.3d 104, 116 (2d Cir. 2018)*. As a general matter, those entities most directly injured by anticompetitive conduct are customers or competitors of the defendant. *See In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 159 (2d Cir. 2016)*.

Nonetheless, a plaintiff who is not a customer or competitor may suffer a direct injury if it is "a participant in the very market directly distorted by the antitrust violation" and its injury is "inextricably intertwined with the injury the [defendants] sought to inflict." *Id. at 159, 160*; *see also SAS of PR, Inc. v. PR Telephone Co., 48 F.3d 39, 46 (1st Cir. 1995)*. "[T]o assess the plausibility of a putative plaintiff's claim to antitrust injury as being inextricably intertwined with the injury the defendants ultimately sought to inflict," this court must "ask whether the plaintiff was manipulated or utilized **[*26]** by defendant as a fulcrum, conduit[,] or market force to injure competitors or participants in the relevant product and geographical markets." *In re Aluminum Warehousing, 833 F.3d at 161*.

Plaintiffs are indisputably participants in the two-sided credit card market—the very market allegedly distorted by Amex's actions. The question is thus whether their supposed injury is inextricably intertwined with the injury Amex sought to inflict. It is not, for many of the same reasons that the alleged injury of the Non-Amex Class was not.[3] The crux of Plaintiffs' argument is that Amex's Anti-Steering Rules have led Visa, Mastercard, and Discover to raise merchant fees more than they would have absent the Anti-Steering Rules (and that, absent the Anti-Steering Rules, those competitors would all *lower* their merchant fees). (*See, e.g*. Compl. ¶¶ 125-129.) In turn, merchants have passed on increased costs to consumers. This is exactly the argument this court rejected in *Non-Amex Merchants*. There, the court explained that "Amex was not, according to the allegations in the complaint, using its market power to force its competitors to charge higher merchant fees across the board." *Non-Amex Merchants, 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425 at *8*. Instead, it "forc[ed] those merchants who did accept its cards **[*27]** to refrain from steering customers towards other cards and, in so doing, insulated its ability to charge those merchants ultracompetitive fees." *Id.* Even if "[p]laintiffs [were] right that this had an effect on the fees other credit card networks charged to the Non-Amex Class, . . . any such effect was incidental to Amex's alleged anticompetitive behavior." *Id; see also 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, [WL] at * 9* ("Plaintiffs allegations involve Amex's competitors reacting—perhaps in predictable ways—to a contractual provision entered into between Amex and the Amex Class.").

Here, Plaintiffs rely on the same unpersuasive argument to try and bridge the causal gap. The complaint alleges that "no longer insulated from price competition on the merchant side of the [credit card] platform [absent the Anti-Steering Rules], the four [credit card] networks would compete on price to merchants, and therefore merchant fees and the two-sided transaction price would be lower." (Compl. ¶ 126.) That logic—Amex's Anti-Steering Rules have caused Visa, Mastercard, and Discover to make decisions that have led to increased cost for Plaintiffs—under—girds Plaintiffs' entire theory. Yet, Plaintiffs do not allege that Amex's Anti-Steering Rules **[*28]** are a "direct agreement with any other party to manipulate or limit entry into the credit card market," *Non-Amex Merchants, 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425 at *8*, and, like the Non-Amex Class, fail to demonstrate how the fees charged by Amex's competitors (that, absent the Anti-Steering Rules, would have been lower and therefore led to reduced costs to consumer) are not "incidental to Amex's alleged anti-competitive behavior," *id.*

In arguing that Plaintiffs' alleged injury is sufficiently close to Amex's anticompetitive behavior for Plaintiffs to be efficient enforcers, Plaintiffs rely solely on *Ohio* and its articulation of the "two-sided market." (Opp. at 8-9.) Plaintiffs argue that "in the context of the two-sided market for [credit card] transactions . . . Amex, Visa, Mastercard, and Discover provide transactions that are 'jointly consumed by a cardholder, who uses the payment card to make a transaction, and a merchant, who accepts the payment card as a method of payment.'" (*Id.* (quoting *Ohio, 138 S. Ct. at 2286*).) Therefore, Plaintiffs contend, Plaintiffs and merchants are "cohabitants" on the credit-card platforms, and "Plaintiffs' injury flows from having a direct relationship with the other three [credit card] networks." (Opp. at 9.)

Plaintiffs are of course correct that *Ohio* ***[*29]*** held that the credit card market is a "two-sided market" that "facilitate[s] a single, simultaneous transaction between participants," each one of which is "jointly consumed" by a cardholder and a merchant. *Ohio, 138 S. Ct. at 2286-87*. Yet, this observation does not change the fact that the theory of Plaintiffs' injury relies on the actions taken by "the three other [credit card] networks," actions this court has held to be "incidental" to Amex's alleged anticompetitive behavior. *See Non-Amex Merchants, 433 F. Supp. 3d*

---

[3] Amex argues that Plaintiffs have not alleged a direct injury and instead present only a so-called umbrella theory of liability. (Mem. at 11-13.) The Second Circuit has not yet explicitly addressed the viability of antitrust claims that rely on an umbrella theory of liability, but it has expressed concerns about allowing such claims to proceed. *See Gelboim, 823 F.3d at 779* (noting that allowing claims under an umbrella theory of liability could "vastly extend the potential scope of antitrust liability" and could allow recovery for "damages disproportionate to wrongdoing."). Because the court holds that Plaintiffs are not efficient enforcers under the *AGC* factors, it need not rule on whether an umbrella theory of liability may ever create antitrust standing (or if umbrella standing concerns alone should determine that Plaintiffs are not efficient enforcers).

395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425, at *8. Further, as Amex points out, the two-sided credit card market in which both Amex and Plaintiffs are participants "involve multiple suppliers and consumers," not all of whom have a direct relationship. (Reply at 4.) To endorse Plaintiffs' argument would be to find that all consumers have a direct relationship with all suppliers without an inquiry into the actual relationship between the parties in question. This would not "reflect a concern about whether the putative plaintiff is a proper party to . . . vindicate the public interest in antitrust enforcement," Gelboim, 823 F. 3d at 772, and the court declines to adopt such a rule here.

b. Identifiable Class of Other More Direct Victims

HN10[] The second efficient-enforcer factor recognizes "that not every victim **[*30]** of an antitrust violation needs to be compensated under the antitrust laws in order for the antitrust laws to be efficiently enforced." Gelboim, 823 F.3d at 779. This is particularly relevant, where, as here, multiple sets of plaintiffs have sued the defendant over the same alleged antitrust violations. *See* IQ Dental, 924 F.3d at 66. In this case, there is an obvious class of "better positioned" victims who have been "more directly injured by the alleged antitrust [violation]" than Plaintiffs—the class of Amex merchants who are bound by Amex's Anti-Steering Rules. *Id.* Plaintiffs' assertion that Plaintiffs "bear the brunt of the alleged antitrust violation" (Opp. at 9), is unconvincing in light of the existence of that class of Amex-accepting merchants. *See* IQ Dental, 924 F. 3d at 66 ("Given that [the plaintiff] is further removed from the harm caused by Defendants than the parties directly affected by the boycott that have already sued the Defendants, the second efficient-enforcer factor weighs against [the plaintiff's] antitrust standing.").

Daniel v. American Bd. of Emergency Medicine does not compel a different result. 428 F.3d 408 (2d Cir. 2005). Plaintiffs note that, in *Daniel*, the Second Circuit affirmed denial of antitrust standing for a plaintiff "which was without 'natural economic **[*31]** self-interest' to reduce costs and favoring antitrust standing for ultimate payors which bore [the] brunt of alleged overcharges." (Opp. at 10 (quoting Daniel, 428 F.3d at 444).) In contrast, Plaintiffs here argue they are "significantly motivated [to pursue their claims] due to their natural economic self-interest in paying the lowest price possible." In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 689 ("DDAVP") (2d Cir. 2009). That fact alone, however, is not enough to sway this factor in Plaintiffs' favor because "denying [them] a remedy on the basis of [their] allegations in this case is not likely to leave a significant antitrust violation undetected or unremedied." IQ Dental, 924 F.3d at 66. Here, as in *Daniel*, there are other parties better suited to "vindicate the public interest in antitrust enforcement" than Plaintiffs. Daniel, 428 F. 3d at 443.

c. Speculative Nature of the Injury

HN11[] The existence of only "highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement." Gelboim, 823 F.3d at 779. "At the same time, some degree of uncertainty stems from the nature of ***antitrust law***." *Id.* "Impediments to reaching a reliable damages estimate often flow from the nature and complexity of the alleged antitrust violation." Id. at 780. Here, like in *Non*-Amex *Merchants*, Plaintiffs' claim "would involve assessing the **[*32]** pricing decision on Amex's nonparty competitors, all of whom are competing against one another as well as against Amex on both sides of the two-sided market." 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425 at *10. As this court explained:

> [T]he calculation involves several stages of speculation: how much steering would occur if merchants accepting Amex cards were permitted to engage in it? What effect would this have on Amex's merchant fees? What effect would any change in Amex's merchant fees have on the decisions of its competitors regarding their own merchant fees? And, perhaps most important in terms of the speculative nature of this clam, how would those decisions trickle over into the parallel situation of the Non-Amex Class members?

Id. Here, too, those questions remain unanswered—the most important of which, for these Plaintiffs, is how these decisions would trickle over into the retail costs charged to non-Amex consumers.

DDAVP does not tilt this factor toward Plaintiffs' favor. In that case, direct purchasers of a drug called DDAVP brought suit against the drug's brand name manufacturer alleging that the brand name manufacturer inflated DDAVP's price by suppressing generic competition in violation of the antitrust laws. *DDAVP, 585 F.3d at 682*. The **[*33]** Second Circuit held that, under the third efficient-enforcer factor, plaintiffs' harm was not overly speculative because there was clear evidence that "generic manufacturers would have decided to compete for DDAVP sales," because those "manufacturers [had] sought approval for generic DDAVP when [the defendants' patent] was still enforceable." *Id. at 689*. Thus, the panel held that while "it may be difficult to account precisely for the likely effects of generic competition . . . we have little doubt that those effects can be sufficiently estimated and measured." *Id.* Here, though, there is not a similarly tight nexus between the anticompetitive behavior and the harm, and simply asserting that there will be "competition on the merchant side of the market" absent Amex's Anti-Steering Rules does not address the numerous open questions regarding the pricing decisions of Amex's competitors. While "such exogenous factors are, to be sure, insufficient by themselves to defeat antitrust standing; nonetheless, their presence is relevant to the efficient enforcer analysis." *Non-Amex Merchants, 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425 at *10*.

d. Duplicative Recovery and Complex Apportionment

As a preliminary matter, Plaintiffs argue that this factor is "not relevant to Plaintiffs' **[*34]** federal claim for injunctive relief," and Amex agrees. (*See* Opp. at 7 n.11 (citing *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111 n.6, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; Mem at 16.) In *Cargill*, the Supreme Court explained that ***HN12***[] "because standing under *§ 16* [of the Clayton Act] raises no threat of multiple lawsuits or duplicative recoveries, some of the factors other than antitrust injury that are appropriate to a determination of standing under *§ 4* are not relevant under *§ 16*." *Cargill, 479 U.S. at 111 n. 6*.

Whether or not *Cargill* is applicable to this case, the court finds the other *AGC* efficient-enforcer factors all cut strongly against the Plaintiffs, and, accordingly, finds that Plaintiffs have not established federal antitrust standing. Therefore, Count I is dismissed with prejudice.

B. Count II—State Antitrust Claims

Under Count Two, Plaintiffs bring claims alleging antitrust violations under the laws of 28 jurisdictions. (Compl. ¶¶ 154-187.) Amex moves for dismissal of those claims on two grounds. First, Amex argues that Plaintiffs lack Article III standing to assert claims on behalf of consumers in 22 states for which Plaintiffs have not named any resident Plaintiffs. (*See* Mem. at 13-18.) Second, Amex contends that Plaintiffs have failed to plead antitrust standing under the laws of the remaining 10 states in which the named **[*35]** Plaintiffs reside. (*Id.*) For the following reasons, Amex's motion is granted in part and denied in part.

1. Non-Resident Plaintiff Standing

Plaintiffs seek to certify 32 separate state damages classes. (Compl. ¶ 138.) While the Complaint alleges named Plaintiffs for 10 of those jurisdictions, it does not identify individual resident Plaintiffs for the remaining 22.[4] Amex argues that "this is fatal" because "the law is clear that Plaintiffs lack Article III standing to assert claims on behalf of consumers in the 22 states for which Plaintiffs have no named any resident plaintiff." (Mem. at 14.)

Amex is wrong. In *Langan v. Johnson & Johnson Consumer Cos., Inc.*, the Second Circuit held that ***HN13***[] "as long as the named plaintiffs have standing to sue the named defendants, any concern about whether it is proper for a class to include out-of-state, nonparty class members with claims subject to different state laws is a question of predominance under *Rule 23(b)(3)* . . . not a question of adjudicatory competence under Article III." *897 F.3d 88, 93*

[4] These jurisdictions are: Alabama, Arizona, District of Columbia, Hawaii, Illinois, Iowa, Maine, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, North Dakota, Ohio, Rhode Island, South Dakota, Utah, Vermont, West Virginia, and Wisconsin. (Mem. at 15.)

(2d Cir. 2018). In its reply, Amex responds that *Langan* does not apply because the parties there agreed that the named plaintiff had standing to sue, whereas, in this case, "no Plaintiff named in the **[*36]** Complaint has standing to bring a claim under the law of the state where he or she purports to sue as an individual." (Reply at 10.) However, as discussed below, the individual named plaintiffs residing in Kansas, North Carolina, Oregon, and Tennessee have standing to bring claims under the antitrust laws of the states in which they reside. Therefore, under the plain language of *Langan*, Plaintiffs have standing to bring claims under the antitrust laws of the 22 states in which no named Plaintiff resides.

2. Resident Named Plaintiff Standing.

The named Plaintiffs reside in 10 states: California, Florida, Kansas, Massachusetts, Nevada, New Mexico, New York, North Carolina, Oregon, and Tennessee. (Compl. ¶¶ 12-21.) In Count Two, Plaintiffs allege claims under the antitrust laws of California, Kansas, Nevada, New Mexico, New York, North Carolina, Oregon, and Tennessee. (*Id.* ¶¶ 154-187.) Amex argues that Plaintiffs lack antitrust standing to bring claims under the antitrust laws of these states because each has adopted the *AGC* factors for antitrust standing, and Plaintiffs fail that test. (Mem. at 15-18.) Amex also argues that Plaintiffs lack standing to sue under Tennessee law because Plaintiffs **[*37]** are neither direct nor indirect purchasers. (*Id.* at 17-18.) Plaintiffs argue that they have standing because New York, California, Kansas, Oregon, North Carolina, do not apply the *AGC* test. (Opp. at 14-15.) Plaintiffs also argue they have standing under Tennessee law. (*Id.*)

HN14[] A federal court adjudicating state law "look[s] to the state's decisional law, as well as to its constitution and statutes." *Santalucia v. Sebright Transp., Inc., 232 F.3d 293, 297 (2d Cir. 2000)*. When the state law is unsettled, the court "is obligated to carefully predict how the state's highest court would resolve the uncertainty or ambiguity." *Id.* The court must give the "fullest weight" to the pronouncements of the state's highest court while giving "proper regard" to the rulings of the state's lower courts. *Id.*

a. California

In *Non-Amex Merchants*, this court had occasion to examine whether antitrust standing under California state law is properly analyzed under the same framework used to determine federal antitrust standing. *Non-Amex Merchants, 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425, at *12*. While noting that "courts have disagreed on the issue," this court found the California state court decision *Vinci v. Waste Mgmt., Inc., 36 Cal. App. 4th 1811, 43 Cal. Rptr. 2d 337, 338-39 (Cal. Ct. App. 1995)* persuasive and held that it would "apply the federal factors to analyze antitrust standing under California law." *Non-Amex Merchants, 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425, at *12*. Plaintiffs have not advanced any new arguments to convince **[*38]** the court to reconsider its decision in *Non-Amex Merchants*. Therefore, the court applies the *AGC* factors to Plaintiffs' claim under California ***antitrust law***, and dismisses Plaintiffs' claim for the reasons stated above.

b. Kansas

Amex cites no state court cases applying the *AGC* factors to determine antitrust standing under Kansas law. Instead, Amex cites one federal district court opinion as support for its position. (*See* Mem. at 16 (citing *In re Dairy Farmers of Am., Inc. Cheese Antitrust Litig.*, No. 09-cv-3690, *2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *9 (N.D. Ill. June 29, 2015)* ("*Dairy Farmers*")).) Plaintiffs, for their part, also cite a single federal district court opinion to argue that the court should not apply the *AGC* factors to claims brought under Kansas' ***antitrust law***. (Opp. at 17 (citing *In re Keurig Green Mountain Single-Serve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 259 (S.D.N.Y. 2019)* ("*Keurig*")).)

While the lack of Kansas authority makes it a close decision, the court finds that Plaintiffs and the *Keurig* court have the better argument. In *Keurig*, Judge Broderick conducted a review of the limited authority from Kansas courts—including an unpublished trial court opinion and federal district court cases—and concluded that "[t]hese cases do not clearly lead to the conclusion that the Kansas Supreme Court would apply the *AGC* factors in accordance with **[*39]** federal precedents." *Id.* Furthermore, *Keurig* explained that:

> The harmonization provision in the Kansas Restraint of Trade Act does not alter this conclusion. *Subsection (b)* states, "Except as otherwise provided in *subsections (d)* and *(e)*, the Kansas restraint of trade act shall be construed in harmony with ruling judicial interpretations of federal ***antitrust law*** by the United States supreme court." *Kan. Stat. Ann. § 50-163*. *Subsection (d)* states, "The Kansas restraint of trade act shall not be construed to prohibit . . . actions or proceedings by indirect purchasers pursuant to [*Kan. Stat. Ann. §] 50-161*, and amendments thereto . . . ." *Id.* Although it is plausible that the Kansas courts could interpret the harmonization provision to repeal *Illinois Brick* but still require application of the *AGC* factors in accordance with federal precedent, [Defendant] has provided no persuasive authority or argument supporting that reading.

Id. The court agrees, and Plaintiffs' claim under Kansas ***antitrust law*** survives.

c. Nevada and New Mexico

Amex cites persuasive state law authority for the proposition that Nevada and New Mexico apply the *AGC* factors under their respective state antitrust laws. (Mem. at 15-16 (citing *Nev. Recycling and Salvage, Ltd. V. Reno Disposal Co., 423 P.3d 605 (Nev. 2018)*; *Nass-Romero v. Visa U.S.A. Inc., 2012- NMCA 058, 279 P.3d 772 (N.M. Ct. App. 2012))*.) Both cases analyzed the relevant statutory language and case law and concluded **[*40]** that the *AGC* factors should apply to the antitrust standing determination. *Nev. Recycling, 423 P.3d at 607-08*; *Nass-Romero, 279 P.3d at 779-81*. Plaintiffs have not identified any contrary authority. As such, the court concludes that both Nevada and New Mexico would apply the *AGC* factors, and Plaintiffs therefore lack standing to bring claims under Nevada and New Mexico ***antitrust law***. Because Plaintiff Zachary Draper does not have a cause of action under either the Sherman Act or Nevada ***antitrust law***, he is dismissed from this case.

d. New York

HN15[] New York's Donnelly Act prohibits "[e]very contract, agreement, arrangement or combination whereby . . . competition . . . may be restrained." *N.Y. Gen. Bus. Law § 340(1)*. The parties dispute whether *AGC*'s efficient-enforcer factors apply to claims brought under the Donnelly Act. (*See, e.g.*, Mem. at 15-16; Opp. at 16-17.) The New York Court of Appeals has not squarely addressed this question, but it has noted that the Donnelly Act, "should generally be construed in light of Federal precedent and given a different interpretation only where State policy, differences in the statutory language or the legislative history justify such a result." *X.L.O. Concrete Corp. v. Rivergate Corp., 83 N.Y.2d 513, 518, 634 N.E.2d 158, 611 N.Y.S.2d 786 (1994)*. Plaintiffs urge that the Donnelly Act's lack of prohibition from recovery of antitrust plaintiffs who have **[*41]** "not dealt directly with the defendant" is itself indicative of New York's different policy with respect to antitrust such that "it is not conceivable that the state's highest court would apply [the] *AGC* factors to bar Plaintiffs here." (Opp. at 16.) However, in *Gatt*, the Second Circuit explained "[w]e see no reason . . . to interpret the Donnelly Act differently than the Sherman Act with regard to antitrust standing." *Gatt, 711 F.3d at 81*.

Plaintiffs have not pointed to any post-*Gatt* authority from either the Second Circuit or the New York Court of Appeals that compels a different outcome here. Accordingly, the court holds that the *AGC* factors apply to Plaintiffs' claim under New York's Donnelly Act, and dismisses Plaintiffs' claim for lack of antitrust standing for the reasons discussed above.

e. North Carolina

Amex cites a single federal district court case from Illinois for the proposition that North Carolina would apply the *AGC* factors to determine standing under its state ***antitrust law***. (Mem. at 16 (citing *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *15)*.) Plaintiffs respond that the North Carolina Court of Appeals has held that indirect purchasers have a cause of action under the state's ***antitrust law***, *see* *Hyde v. Abbott Lab, Inc., 123 N.C. App. 572, 473 S.E.2d 680, 688 (N.C. Ct. App. 1996)*, and "that the *AGC* factors do not apply in determining **[*42]** which indirect purchasers have standing to sue under the North Carolina antitrust statutes," *Teague v. Bayer AG, 195 N.C. App. 18, 671 S.E.2d 550, 557 (N.C. Ct. App. 2009)*.

The court finds the Superior Court decision in *Dicesare v. Charlotte-Mecklenburg Hosp. Auth., No. 16-CVS-16404, 2017 NCBC LEXIS 33, 2017 WL 1359599 (N.C. Super. Apr. 11, 2017)*, to be a cogent analysis of the current state of the law on this issue in North Carolina. *Dicesare* involved a suit brought by consumers of various third-party health insurance companies against the market-leading hospital in the Charlotte-Mecklenburg area (the "Hospital"). *2017 NCBC LEXIS 33, [WL] at *1-5*. Plaintiffs alleged that the Hospital required the third-party insurers like Cigna and Blue Cross/Blue Shield ("BCBS") to enter into Anti-Steering provisions which restricted the insurers' ability to steer consumers to insurance plans that included the Hospital's lower-cost competitors. *Id.* The court explained plaintiffs' allegations as follows:

> Plaintiffs allege that they pay for and receive health insurance from Cigna and BCBS. The [Fist Amended Complaint] alleges that the Hospital imposes Anti-Steering Provisions in its contracts with the Four Insurers, which includes Cigna and BCBS. Plaintiffs contend that the Anti-Steering Provisions reduce competition between the Hospital and other providers of acute inpatient hospital services in the Charlotte Area and, as a result, **[*43]** Plaintiffs pay more for health insurance, incur higher out-of-pocket costs, have fewer insurance plans to choose from, and are denied access to truthful information that would enable Plaintiffs to comparison-shop based on cost and quality.

*2017 NCBC LEXIS 33, [WL] at *7*.

In finding that the plaintiffs had standing to assert a claim under the North Carolina ***antitrust law***, the *Dicesare* court made several salient observations. First, the court held that "until the Supreme Court of North Carolina rules otherwise, *Teague* is controlling."[5] *2017 NCBC LEXIS 33, [WL] at *9*. Second, *Dicesare* held that, under *Teague*, plaintiffs were "not required at the pleading stage to prove a causal chain between the Hospital's challenged conduct and the [p]laintiffs' alleged injury." *Dicesare, 2017 NCBC LEXIS 33, 2017 WL 1359599, at *8* (citing *Teague, 671 S.E.2d at 557-58*). Third, unlike the *AGC* analysis, *Dicesare* held that the inherent complexity of antitrust cases—and, specifically, the "complicated questions of causation and damages"—are not "sufficient reason[s] to dismiss for lack of standing." *Id.* Fourth, the court rejected the defendant Hospital's argument that plaintiff consumers lacked standing because the price premium consumers paid to third-party insurance companies was "the result of the independent action of the insurance companies," **[*44]** finding instead that it would be premature to dismiss for lack of standing on those grounds. *2017 NCBC LEXIS 33, [WL] at *9*.

The North Carolina Supreme Court declined to review the trial court's ruling in *Dicesare. See Dicesare v. Charlotte-Mecklenburg Hospital Authority, 370 N.C. 215, 804 S.E.2d 541 (2017)* (order denying writ of certiorari to review order of trial court). While this does not equate to a wholesale adoption of *Dicesare*'s analysis by the high court, it does add persuasive weight to *Teague*'s holding (emphasized by *Dicesare*) that the *AGC* factors "do not apply . . . under the North Carolina antitrust statutes." *Teague, 671 S.E.2d at 557*. Therefore, the court finds that the *AGC* factors do not apply in evaluating Plaintiffs' claim under North Carolina law. Because Plaintiffs' "allegations . . . are sufficient to demonstrate standing," under North Carolina law, *see* *Dicesare, 2017 NCBC LEXIS 33, 2017 WL 1359599, at *7*, the court finds that Plaintiffs' North Carolina antitrust claim survives.[6]

---

[5] *Dairy Farmers*, upon which Amex relies, rejected *Teague* for what it called its "sometimes-dubious and often-difficult-to-follow analysis," and chose to rely on an earlier trial court decision in finding that North Carolina courts would apply the *AGC* factors. *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *15*. ***HN16***[] Yet, a federal court's view that a state appellate court decision is wrongly decided (or would lead to results with which the federal court would disagree) is not grounds for the federal court to ignore the state court's ruling.

[6] Amex cites *Dicesare* for the proposition that, because the North Carolina Supreme Court "has not spoken on the means . . . by which state courts are to distinguish those indirect purchasers who have sustained actual injuries from those who have

f. Oregon

The court is not aware of binding authority from Oregon state courts regarding the application of the *AGC* factors to determine antitrust standing under Oregon law. Amex cites to a federal district court decision predicting that the Oregon **[*45]** Supreme Court would apply the *AGC* factors (Mem. at 15 (citing *In re Dealer Mgmt. Sys. Antitrust Litig., 362 F. Supp. 3d 510, 545 (N.D. Ill. 2019)* (*"Dealer Mgmt."*)), while Plaintiffs cite to a federal district court decision that came to the opposite conclusion. (Opp. at 17 (citing *Keurig, 383 F. Supp. 3d at 261*).) The analysis in *Dealer Mgmt.* is quite limited. There, the court reasoned that "the presence of a statutory harmonization provision (either statutory or common law), absent any countervailing statutory law or case law from a state appellate court, is sufficient to permit a district court to apply federal antitrust standing law—including *AGC*—to claims brought under that state's antitrust laws." *Dealer Mgmt., 362 F. Supp. 3d at 545*. Because Oregon has a statutory harmonization provision, the *Dealer Mgmt.* court held that the *AGC* factors apply under Oregon law. In *Keurig*, by contrast, the court disagreed, explaining that "the Oregon antitrust statute states that federal precedents are persuasive, but not binding," and holding that "[a]bsent any authority from the Oregon state courts regarding the application of the *AGC* factors to determine antitrust standing under Oregon law, [the court] cannot conclude that the Oregon Supreme Court would apply *AGC." Keurig, 383 F. Supp. 3d at 261*.

The court finds *Keurig* to be the more persuasive opinion. ***HN17***[] A harmonization provision **[*46]** in a state's antitrust statute does not *require* a state's Supreme Court to find that state ***antitrust law*** must be analyzed under the federal standard. That is particularly true where, like here, the harmonization provision finds that federal law is "merely persuasive". *Cf. In re Packaged Seafood Products Antitrust Litig., 242 F. Supp. 3d 1033, 1108 (S.D. Cal. 2017)*. Accordingly, the court agrees with Judge Broderick that it "cannot conclude that the Oregon Supreme Court would apply *AGC," Keurig, 383 F. Supp. 3d at 261*, and finds that Plaintiffs have standing under Oregon ***antitrust law***.

g. Tennessee

HN18[] The Tennessee Trade Practices Act ("TTPA") prohibits anti-competitive conduct which tends to lessen "full and free competition in the importation or sale of articles imported into this state . . . or which tend to advance, reduce, or control the price or the cost to the producer or the consumer of any such product . . . ." *Tenn. Code Ann. § 47-25-101*. The TTPA provides a civil remedy to "any person who is injured or damaged by such arrangement." *Id. § 47-25-106*. The Tennessee Supreme Court has held that this includes claims brought by indirect purchasers. *See Freeman Indust., LLC v. Eastman Chem. Co., 172 S.W.3d 512, 519-20 (Tenn. 2005)*.

The court is convinced the Supreme Court of Tennessee would not apply the *AGC* factors. In holding that the TTPA included a right of action for indirect purchasers, the *Freeman* court noted that, **[*47]** unlike other state antitrust

---

sustained injuries that are too remote or attenuated to warrant relief," state courts in North Carolina "may still consider the *AGC* factors." (Reply at 7 n.7 (quoting *Dicesare, 2017 NCBC LEXIS 33, 2017 WL 1359599, at *12)*.) This is not an accurate representation of *Dicesare. Dicesare* notes that the state's "Court of Appeals expressly held that the *AGC* factors do not apply in determining which indirect purchasers have standing to sue under the North Carolina antitrust statues." *Dicesare, 2017 NCBC LEXIS 33, 2017 WL 1359599, at *11*. The court goes on to note that "antitrust cases—especially those involving indirect purchasers—will often involve complicated causation and damages issues," and that the state's Supreme Court "has not spoken on this precise complex issue." *Id.* Recognizing the potential burdens and costs faced by the parties should the case continue to discovery and the importance of this issue to the state as a whole, *Dicesare* welcomed state Supreme Court review of its decision, noting that it would exercise its discretion to stay further proceedings should the state Supreme Court take up the issue. *Id.* Contrary to Amex's representation, however, nowhere in this part of its analysis does the court *mention* the *AGC* factors, let alone hold (or even suggest) that the state Supreme Court's silence on this issue meant that "state courts may still consider the *AGC* factors." (Reply at 7 n.7.) To the contrary, *Dicesare* discusses the *AGC* factors twice: first in the context of *Teague's* "controlling" holding that the *AGC* factors do not apply to determinations of standing under the North Carolina antitrust statutes, and second in the context of an earlier Superior Court case that applied a "modified" version of *AGC*, which *Teague* rejected. *See Dicesare, 2017 NCBC LEXIS 33, 2017 WL 1359599, at *11-12*.

statutes, ***HN19***[] the TTPA lacks a mandatory harmonization clause requiring consistency between interpretation of the TTPA and interpretations of federal antitrust laws. *Id. at 519*. The *Freeman* court also rejected some of the factors—such as the risk of multiple liability and recovery and the speculative risk of complex damages assessments—that motivated the Supreme Court in *AGC* to craft prudential standing limitations on who may sue under federal ***antitrust law***. *Id. at 520*. Finally, the parties have not provided the court with any decision in which the Tennessee state courts apply the *AGC* factors to claims brought under the TTPA.[7]

Amex argues that Plaintiffs nonetheless lack standing because they are neither direct nor indirect purchasers of any product the sale of which is "controlled" by Amex. (Mem. at 17 (quoting *Tenn. Code Ann. § 47-25-106*.) However, the *Freeman* court explained that ***HN21***[] the TTPA's use of "control" includes "the ability to exercise a restraining or directing influence over something." *Freeman Indus., 172 S.W.3d at 517-18*. Plaintiffs' allegations that Amex's Anti-Steering Rules restrained the credit card transaction market and caused Plaintiffs to pay more for consumer goods is sufficient, at this stage, to establish **[*48]** standing to sue under the TTPA.[8]

C. Count III—State Consumer Protection Claims

Under Count III, Plaintiffs allege violations of the state consumer protection laws of California, the District of Columbia, Florida, Hawaii, Illinois, Massachusetts, Montana, New Hampshire, New Mexico, Ohio, and Rhode Island. (Compl. ¶¶ 188-200.) Amex argues that Plaintiffs' claims under California, Florida, Massachusetts, and New Mexico law should be dismissed for lack of standing under the laws of each respective state. (Mem. at 18-23.)[9] The court evaluates Plaintiffs' standing to assert claims under the laws of each state in turn.

1. California

Plaintiffs assert claims under the California's Unfair Competition Law ("UCL), *Cal. Bus. & Prof. Code §§ 17200, et seq.*, based on the same underlying conduct as their federal and state antitrust claims. (Compl. ¶¶ 188-190.) ***HN22***[] However, under California law, "[w]here a plaintiff fails to state an antitrust claim, and where an unfair competition claim is based upon the same allegations, such state claims are properly dismissed." *Formula One Licensing, B.V. v. Purple Interactive Ltd., 2001 U.S. Dist. LEXIS 2968, 2001 WL 34792530, at *4 (N.D. Cal. Feb. 6, 2001)*; *see also* *In re Wellpoint, Inc., Out-of-Network UCR Rates Litig., 903 F. Supp. 2d 880, 927-28 (C.D. Cal. 2012)* (dismissing UCL claims base on lack of antitrust standing for plaintiffs' Sherman Act claims). Here, the court has dismissed Plaintiffs' underlying antitrust **[*49]** claims under both federal and California law. Therefore, because Plaintiffs have "made no attempts to distinguish their antitrust claims from their consumer-protection claims," *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *18*, the court dismisses Plaintiffs' claim under the

---

[7] ***HN20***[] In lieu of the *AGC* factors, traditional constitutional standing principles apply. A party has standing to sue under Tennessee law when it meets the minimum constitutional requirements of standing under federal law. *See, e.g., In re Petition of Youngblood, 895 S.W.2d 322, 326 (Tenn. 1995)* (adopting federal constitutional standard); *Cox v. Shell Oil Co., 196 S.W.3d 747, 757-58 (Tenn. Ct. App. 2005)* (state law standing "parallels the constitutional restriction on federal court jurisdiction to 'cases and controversies'"). As discussed above, Plaintiffs meet that baseline constitutional standard.

[8] Amex argues that Plaintiffs' claim "is not an indirect purchaser claim," but "[r]ather, Plaintiffs allege that merchants passed some portion of alleged overcharges from credit card fees to consumers through increased prices on some unknown portion of goods sold and services rendered. This [c]ourt would need to track overcharges on countless items—paid by consumers with no relationship to Amex whatsoever, to merchants who may or may not accept Amex." (Mem. at 18.) Yet, the Tennessee Supreme Court has explicitly rejected the concerns Amex raises of complex damage assessment and fear of multiple liability as relevant to a standing analysis under TTPA (even though they are central to the *AGC* analysis).

[9] Amex describes the claims brought under the laws of these four states as Plaintiffs' "remaining state consumer protection law claims" (Mem. at 18), likely assuming that the claims brought under the consumer protection laws of the states in which no named Plaintiff is a resident must be dismissed. However, as discussed *supra, Langan* compels the opposite result. Therefore, Plaintiffs' claims under the consumer protection laws of District of Columbia, Hawaii, Illinois, Montana, New Hampshire, Ohio, and Rhode Island survive Amex's motion.

UCL. Because Plaintiff Anthony Oliver does not have a cause of action under the Sherman Act, California ***antitrust law***, or the UCL, he is dismissed from this case.

2. Florida

The same reasoning applies to Plaintiffs' claims under the Florida Deceptive and Unfair Trade Practices Act ("FDUTPA"). *See* *QSGI, Inc. v. IBM Glob. Fin., No. 11-80880-CIV, 2012 U.S. Dist. LEXIS 49601, 2012 WL 1150402, at *4 (S.D. Fla. Mar. 14, 2012)*("When, as here, plaintiff's FDUTPA claim is based on the same allegations as its antitrust claim, failure to establish a violation of ***antitrust law*** is sufficient to conclude that the plaintiff has also failed to state a FDUPTA claim."); *see also* *JES Props., Inc. v. USA Equestrian, Inc., No. 8:02-cv-1585-T-24MAP, 2005 U.S. Dist. LEXIS 43122, 2005 WL 1126665, at *19 (M.D. Fla. May 9, 2005)*. Because Plaintiffs' claim under the FDUTPA is identical to their antitrust claim, it must be dismissed. Plaintiff Michael Thomas Reid, who lacks a cause of action under either the Sherman Act or the FDUPTA, is dismissed from this case.

3. Massachusetts

The Massachusetts Consumer and Business Protection Act, Mass. ***HN23***[] Gen. **[*50]** Laws Ch. 93A ("CBPA") provides a cause of action for "any person . . . who has been injured by another person's use or employment of any . . . unfair method of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." CBPA, *§ 2*, *§ 9(1)*. Amex argues that Plaintiffs' claim must be dismissed because "Plaintiffs are consumers who have no business dealings with Amex and are neither direct nor indirect purchasers." (Mem. at 20.)

Both Plaintiffs and Amex direct the court towards *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 762 N.E.2d 303 (2002)*, in which the Supreme Judicial Court of Massachusetts analyzed the CBPA in detail. In *Ciardi*, the court held that indirect purchasers can assert claims for anticompetitive conduct under the CBPA, even where they have no standing to bring such claims under Massachusetts state ***antitrust law***. *Id. at 55*. In so holding, the court emphasized that the CBPA is "a statute of broad impact which creates new substantive rights and provides new procedural devices for the enforcement of those rights." *Id. at 59*. In affirming the trial court's denial of the defendants' motion to dismiss, *Ciardi* explicitly rejected defendants' argument that plaintiff had "failed to allege a sufficiently close nexus between herself and the defendants **[*51]** to state a claim under [the CBPA]." *Id. at 65*; *see also id.* ("The defendants contend that plaintiff would be hard pressed to show how a portion of an overcharge was passed on at *each* stage of the distribution chain and by which defendants."). The court reasoned that "defendants' contentions essentially relate to whether the plaintiff can prove her claim under [the CBPA], not whether she is entitled, as an indirect purchaser, to assert such a claim." *Id.* Finally, the *Ciardi* defendants argued that public policy considerations should compel the court to bar indirect purchaser claims under the CBPA. In response, the court noted that "it is the province of the Massachusetts Legislature to make its own policy decisions about whether to permit claims by indirect purchasers for antitrust violations under Massachusetts law. We read the language of [the CBPA] as a clear statement of legislative policy to protect Massachusetts consumers through the authorization of such indirect purchaser actions." *Id. at 66-67*. The court finds that *Ciardi* supports the conclusion that Plaintiffs have standing to sue under the CBPA.[10]***HN24***[] *Ciardi* makes clear that the CBPA is to be construed broadly in light of its goals of protecting Massachusetts **[*52]** consumers, regardless of whether Plaintiffs have standing under either federal or state antitrust laws. Amex's contention that Plaintiffs are not indirect purchasers is unavailing. ***HN25***[] *Ciardi* explains that a CBPA plaintiff must "allege[] a connection" between plaintiff and defendant, even if it is an "indirect one." *Ciardi, 436 Mass. at 65*. Here, Plaintiffs have met this "relatively light burden," *id.*, by alleging such a

---

[10] Amex cites to the federal district court opinion *Cash Energy Inc. v. Weiner*, but that case is distinguishable. (Mem. at 20 (citing *Cash Energy, Inc. v. Weiner, 768 F. Supp. 892, 894 (D. Mass. 1991))*.) *Cash* involved landowners bringing suit against defendants who had stored chemical solvents on an adjacent property that had allegedly contaminated plaintiffs' property. *Cash, 768 F. Supp. at 893*. The court dismissed plaintiffs' claim under the CBPA, holding that plaintiffs and defendants did not have "some transactional business relationship" as required by the CBPA. *Id. at 894*. Here, by contrast, Plaintiffs are not neighboring landowners with a dispute sounding in common law, but, accordingly to Plaintiffs, are participants in the same "two-sided market" as Defendants. At this stage, those allegations are sufficient—especially in light of the CBPA's "broad impact" and "clear statement of legislative policy to protect consumers," *Ciardi, 436 Mass. at 59, 65*, factors that were not implicated in *Cash*.

connection—namely, that Amex's Anti-Steering Rules restrain competition in such a way that Plaintiffs pay more for consumer goods than they would absent Amex's anticompetitive behavior.

4. New Mexico

HN26[] Finally, New Mexico's Unfair Practices Act ("NMUPA") provides that "[u]nfair or deceptive trade practices and unconscionable trade practices in the conduct of any trade or commerce are unlawful." *N.M. Stat. Ann. § 57-12-3*. The NMUPA defines "unconscionable trade practice" as:

> an act or practice in connection with the sale, lease, rental or loan, or in connection with the offering for sale, lease, rental or loan, of any goods or services, including services provided by licensed professionals, or in the extension of credit or in the collection of debts that to a person's detriment:
>
> > (1) takes **[*53]** advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or
> > (2) results in a gross disparity between the value received by a person and the price paid.

Id. at *§ 57-12-2(E)*. Plaintiffs allege that Amex's Anti-Steering Rules constitute an "unconscionable trade practice" because it "resulted in a gross disparity between the value received by members of the Class and the price paid by them for goods and services using an electronic form of payment." (Compl. ¶ 198(d).) Amex argues that Plaintiffs cannot sue for an NMUPA violation because "Plaintiffs are neither direct nor indirect purchasers of any product from Amex" (Mem. at 20), and "New Mexico law makes clear that only those who purchase a good or service from a defendant may sue under the NMUPA." (*Id.* (citing *Hicks v. Eller, 2012- NMCA 061, 280 P.3d 304 (N.M. Ct. App. 2012))*.)

The court agrees with Amex and finds that Plaintiffs have not stated a claim under the NMUPA. *Hicks* is instructive. That case involved a claim under the NMUPA brought by a seller of certain paintings to a defendant who subsequently sold the paintings to other buyers for a much higher price than originally paid to the plaintiff. *Hicks, 280 P.3d at 307*. The court held that the plaintiff did not state a claim under **[*54]** the NMUPA because "the [NM]UPA gives standing only to buyers of goods ands services," and the plaintiff who sold the paintings was not such a buyer. *Id. at 309*. While the court acknowledged that the NMUPA "does not require a transaction between a claimant and a defendant," it explained that the statute did require that "the claimant did purchase an item that was at some point sold by the defendants." *Id.* Plaintiffs fail to meet this standard and therefore lack standing under the NMUPA. Because Plaintiff Susan Burdette does not have a cause of action under the Sherman Act, New Mexico ***antitrust law***, or the NMUPA, she is dismissed from this case.

IV. COUNT IV—UNJUST ENRICHMENT

Under Count IV, Plaintiffs argue that New York law entitles them to damages for unjust enrichment. (*See* Opp. at 23-24.)[11] Plaintiffs allege that "[a]s a result of Defendants' conduct, Plaintiffs and other Class members in the State Damages Classes conferred a benefit upon Defendants, Defendants received and retained this benefit under such circumstances that it would be inequitable and unconscionable to permit them to retain it without paying the benefit's reasonable value to Plaintiffs and other Class members." (Compl. ¶ 202.) The court **[*55]** agrees with Amex that this claim should be dismissed.

HN28[] The New York Court of Appeals has held that while a plaintiff "need not be in privity with the defendant to state a claim for unjust enrichment," the connection between the defendant and the plaintiff must not be "too attenuated." *Sperry v. Crompton Corp., 8 N.Y.3d 204, 215-16, 863 N.E.2d 1012, 831 N.Y.S.2d 760 (2007)*; *see also*

---

[11] The complaint alleges claims for damages under the "law of unjust enrichment of thirty-two jurisdictions." (Compl. ¶ 138.) However, Plaintiffs argue in their brief that the court should apply New York law to their unjust enrichment claim, and Amex did not contest application of New York law in its reply. (Opp. at 23-25; Reply at 10.) Because ***HN27***[] "implied consent is sufficient to establish choice of law," *Krumme v. WestPoint Stevens, Inc., 238 F.3d 133, 138 (2d Cir. 2000)*, the court applies New York law.

*Carmona v. Spanish Broad. Sys., Inc., No. 08-cv-4475 (LAK), 2009 U.S. Dist. LEXIS 26479, 2009 WL 890054, at *6 (S.D.N.Y. Mar. 30, 2009)* (plaintiffs must allege "direct dealings or an actual, substantive relationship" with defendants."). In *Sperry*, for example, the Court of Appeals held that "the connection between the purchaser of tires and producers of chemicals used in the rubber-making process is simply too attenuated to support" an unjust enrichment claim. *Sperry, 8 N.Y.3d at 216*; *see also* *Keurig, 383 F. Supp. 3d at 272* (dismissing unjust enrichment claim brought under New York law because alleged relationship between parties was "too attenuated."). The court finds that, as in *Sperry* and *Keruig*, the alleged relationship between the parties is "too attenuated" to support a claim of unjust enrichment under New York law. Accordingly, Count IV is dismissed with prejudice. Because Plaintiff Gianna Valdes does not have a cause of action under the Sherman Act, the Donnelly Act, or the law of unjust enrichment, she is dismissed **[*56]** from this case.

V. CONCLUSION

For the foregoing reasons, Defendants' (Dkt. 37) motion to dismiss is GRANTED in part and DENIED in part. Specifically:

- Count I is DISMISSED in its entirety with prejudice;
- Count II is DISMISSED in part. The claims that are dismissed are those asserted under the antitrust laws of: California, Nevada, New Mexico, and New York. The claims asserted under the antitrust laws of the remaining 24 jurisdictions remain;
- Count III is DISMISSED in part. The claims that are dismissed are those asserted under the consumer protection laws of California, Florida, and New Mexico. The claims asserted under the consumer protection laws of the remaining eight jurisdictions remain;
- Count IV is DISMISSED in its entirety with prejudice; and
- The following named Plaintiffs are dismissed from this case: Anthony Oliver, Susan Burdette, Gianna Valdes, Zachary Draper, and Michael Thomas Reid.

The Parties are DIRECTED to contact the chambers of Magistrate Judge Gold regarding next steps in this case.

SO ORDERED.

2020 U.S. Dist. LEXIS 240273 *; 2020 WL 7401281

Bryant's Team Sports, Inc., Plaintiff, v. Mizuno USA, Inc., Defendant.

Core Terms

summary judgment, material fact, genuine, breach-of-contract, cancelled

Counsel: **[*1]** For Mizuno USA Inc., a foreign corporation, Defendant: Alan K. Fertel, LEAD ATTORNEY, Weiss Serota Helfman Cole & Bierman P.L., Fort Lauderdale, FL.

For Mizuno USA Inc., a foreign corporation, Defendant: Richard Bradlee Rosengarten, Greenberg Traurig LLP, Ft Lauderdale, FL.

For Mizuno USA Inc., a foreign corporation, Defendant: John M. Bowler, LEAD ATTORNEY, PRO HAC VICE, Troutman Sanders LLP, Atlanta, GA.

For Mizuno USA Inc., a foreign corporation, Defendant: Charles K Thimmesch, LEAD ATTORNEY, PRO HAC VICE, Troutman Sanders LLP, Atlanta, GA.

For Bryant's Team Sports Inc., a Florida corporation, Plaintiff: Douglas A. Orr, LEAD ATTORNEY, Orr Law Firm P.L., Cape Coral, FL.

Judges: Paul A. Magnuson, United States District Court Judge.

Opinion by: Paul A. Magnuson

Opinion

MEMORANDUM AND ORDER

This matter is before the Court on Defendant Mizuno USA's Motion for Summary Judgment (Docket No. 58). For the following reasons, Defendant's Motion is granted.

BACKGROUND

Plaintiff Bryant's Team Sports was a sporting-goods retailer, which primarily sold baseball and softball equipment. Defendant Mizuno USA manufactures sporting-goods equipment. At Plaintiff's inception as a brick-and-mortar store in 2007, Plaintiff sold Defendant's and **[*2]** other manufacturers' goods.[1] (Bryant Dep. (Docket No. 58-3) at 18-19.) In 2012, when Plaintiff transitioned to become an online retailer, it sold the goods on third-party websites, namely Amazon. (Id. at 33-35.) On January 19, 2018, Defendant informed its online retailers, including Plaintiff, that as of April 2018, it would no longer allow other retailers to sell its products on third-party sites, such as Amazon. (Pl.'s Opp'n Mem. (Docket No. 70) at 10); Blocker Decl. (Docket No. 58-2) ¶¶ 17-18.) Defendant would allow Plaintiff to continue selling its goods through other means, such as in brick-and-mortar stores, on Plaintiff's own website, or at sports tournaments. On March 30, 2018, Plaintiff ceased operation. (Bryant Dep. at 38-39.)

Plaintiff alleges breach of contract and breach of implied-in-fact contract, tortious interference, as well as violations of the implied covenant of good faith and fair dealing, Florida's ***antitrust law***, and the *Florida Deceptive and Unfair Trade Practices Act*. Defendant seeks summary judgment on all claims.

DISCUSSION

Summary judgment is proper only if there are no disputed issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* **[*3]** . The Court must view the evidence and the inferences that may be reasonably drawn from the evidence in the light most favorable to the nonmoving party. *Burton v. City of Belle Glade, 178 F.3d 1175, 1187 (11th Cir. 1999)* (citation omitted).

The moving party bears the burden of showing that there is no genuine issue of material fact and that it is entitled to judgment as a matter of law. *O'Ferrell v. United States, 253 F.3d 1257, 1265 (11th Cir. 2001)*. When opposing a motion for summary judgment, the nonmoving party must demonstrate the existence of specific facts in the record that create a genuine issue for trial. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A party opposing a properly supported motion for summary judgment may not rest on mere allegations or denials and "must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citation omitted).

A. Breach of Contract

Plaintiff's breach-of-contract and breach-of-implied-contract claims arise out of the same facts. The breach-of-contract claim alleges that Defendant breached the parties' agreement by prohibiting Plaintiff from selling Defendant's goods on Amazon after March 30, 2018, while allowing Amazon to sell goods at a special discount. Plaintiff asserts that the alleged breach caused damages. The implied-contract claim is similar in all respects, except it purports **[*4]** that Defendant breached an implied-in-fact contract.

To prevail at summary judgment on Plaintiff's breach-of-contract claims, Defendant must show that there is no genuine issue of material fact as to: (1) the existence of a valid contract; (2) a material breach of that contract; or (3) damages. *Beck v. Lazard Freres & Co., LLC, 175 F.3d 913, 914 (11th Cir. 1999)*.

Defendant disputes that a valid contract existed, and Plaintiff concedes that no single document encompassed the parties' relationship, contending that a collection of documents and their course of dealing comprised the "contract" on which this claim is based. Yet Christopher Bryant, Plaintiff's founder and sole proprietor, acknowledged that the relationship between the parties was on based on purchase orders, and that there was no agreement that the relationship would continue in perpetuity. (Bryant Dep. at 120-21.) He further testified that Plaintiff was under no obligation to purchase any of Defendant's products and that Defendant in its "sole discretion" could cease doing

---

[1] Christopher Bryant's deposition was the only evidence Defendant submitted in support of its Motion. Plaintiff submitted no evidence to oppose the Motion.

business with Plaintiff at any time. (Id. at 32, 140.) This forecloses any possibility of an ongoing contract between the parties.[2]

Viewing the facts in the light most favorable to Plaintiff, the Court is unpersuaded that a genuine dispute **[*5]** of material fact exists. See *Fed. R. Civ. P. 56(a)*. Plaintiff has not established the existence of an enforceable contract that required Defendant to allow Plaintiff to sell its goods on third-party websites. Defendant's Motion is granted as to the breach-of-contract claims.

B. Breach of Good Faith and Fair Dealing

In Florida, "an action for breach of the implied covenant of good faith cannot be maintained in the absence of a breach of an express contract provision." *Degutis v. Fin. Freedom, LLC, 978 F. Supp. 2d 1243, 1263 (M.D. Fla. 2013)* (quoting *Burger King Corp. v. Weaver, 169 F.3d 1310, 1316 (11th Cir. 1999))*. Because Plaintiff has not demonstrated that Defendant breached any express contract provision, the good-faith-and-fair-dealing claim is "untenable." *Id.* (quotation omitted). Without a valid breach-of-contract claim, Plaintiff's breach-of-good-faith-and-fair-dealing claim must be dismissed. Defendant's Motion is granted as to the alleged violation of *Fla. Stat. § 671.203*.

C. Deceptive Trade Practices

Plaintiff claims that Defendant's decision to prohibit Plaintiff from selling Defendant's goods on third-party websites and cancelling Amazon orders placed through Plaintiff, while allowing Amazon to sell Defendant's goods below minimum-advertised pricing ("MAP"), violated Florida's Deceptive and Unfair Trade Practices Act ("FDUTPA"), *Fla. Stat. §§ 501.201-213*. To overcome summary **[*6]** judgment on this claim, Plaintiff must show a genuine dispute of material fact as to any element: "1) a deceptive act or unfair practice; 2) causation; and 3) actual damages." *KC Leisure, Inc. v. Haber, 972 So. 2d 1069, 1073 (Fla. Dist. Ct. App. 2008)*.

Plaintiff's failure to conduct discovery is fatal to the claim that Defendant committed a deceptive or unfair act, because Plaintiff has no evidence to support its bald claim that Defendant allowed Amazon to sell below MAP pricing, or even that doing so would constitute a violation of the Act. Likewise, Plaintiff provides no evidence regarding its allegations of a single customer's order placed through Plaintiff on Amazon that Defendant cancelled. Plaintiff's suspicions about Defendant's conduct simply do not suffice to show a genuine dispute of material fact. Defendant's Motion is granted as to the FDUTPA claim.

D. Antitrust

Plaintiff concedes that Defendant is entitled is entitled to summary judgment on the antitrust claim, thus Defendant's motion is granted as to that claim.

---

[2] Although the claim fails, it notable that Plaintiff is less than forthcoming about its purported damages. Plaintiff argues that Defendant required it to place a $50,000 order of non-closeout items "[a]round June 2017 . . . to maintain its favorable pricing," and that it would have been impossible to sell those goods before Defendant prohibited Plaintiff from selling through third-party retailers in April 2018. (Pl.'s Opp'n Mem. at 3.) But Bryant testified that Defendant did not force Plaintiff to make the purchase and no contractual provision required it to do so. (Bryant Dep. at 201.) Further, Bryant did not know if Plaintiff's remaining inventory contained the goods obtained in the $50,000 purchase. (Id. at 183.) Plaintiff cannot now claim the $50,000 purchase as damages.

Additionally, Plaintiff cites a $153,463 purchase of closeout products in June 2017. (Pl.'s Opp'n Mem. at 9.) But Plaintiff is silent as to Defendant's contention that before litigation commenced, Defendant offered to buy back the closeout goods and give Plaintiff an additional $10,000. (Bryant Dep. at 186-87.)

E. Tortious Interference

Plaintiff claims that Defendant's employee, Tyson Blocker, cancelled an order that he placed through Plaintiff on Amazon, and that doing so tortiously interfered with Plaintiff and Defendant's business relationship **[*7]** and harmed Plaintiff. "Under Florida law, the elements of tortious interference with a business relationship are (1) the existence of a business relationship; (2) knowledge of the relationship on the part of the defendant; (3) an intentional and unjustified interference with the relationship by the defendant; and (4) damage to the plaintiff as a result of the breach of the relationship." *Duty Free Americas, Inc. v. Estee Lauder Cos., 797 F.3d 1248, 1279 (11th Cir. 2015)* (quotation and citation omitted). The first element requires only a mere understanding between the parties, not an enforceable contract. Id. For the third element, "[e]ven if the contract is terminable at will, the interferer's actions are tortious and actionable [only] if the motive is purely malicious and not coupled with any legitimate competitive economic interest." *Heavener, Ogier Servs., Inc. v. R. W. Florida Region, Inc., 418 So.2d 1074, 1077 (Fla. Dist. Ct. App. 1982)*.

Defendant concedes that Blocker once cancelled a test order that he placed through Plaintiff on Amazon. Even so, Plaintiff's bare allegation of Defendant's malicious motive is insufficient to overcome summary judgment because Defendant has proffered a legitimate motive that serves its competitive economic interest: ensuring that Plaintiff could fulfill drop-ship orders. Though Plaintiff alleges that Defendant repeatedly cancelled **[*8]** online orders, Plaintiff has not come forward with any evidence to support that assertion. Moreover, Bryant's opinion of Defendant's business practices does not constitute admissible evidence. See *Rule 56(c)(4)*.

Similarly, Plaintiff repeatedly contends that Defendant did not enforce its MAP agreement with Amazon but offers no evidence to buttress that argument. Its opinions as to Defendant's motives does not raise any genuine issue of material fact to defeat summary judgment. Rather, it is Plaintiff's burden to come forward with evidence to show that it can prove this claim. Plaintiff has failed to cite any such evidence, and therefore, Defendant's Motion is granted as to the tortious-interference claim.

CONCLUSION

There are no genuine issues of fact as to any of Plaintiff's claims. Accordingly, **IT IS HEREBY ORDERED** that Defendant's Motion for Summary Judgment (Docket No. 58) is **GRANTED**.

The Clerk shall enter judgment accordingly, terminate all remaining deadlines as moot, and close the file.

Opinion

REPORT AND RECOMMENDATION [*2] OF UNITED STATES MAGISTRATE JUDGE

To the Honorable Fred Biery, United States District Judge:

This Report and Recommendation concerns Defendant Superior Healthplan, Inc.'s Motion to Dismiss Plaintiffs' Second Amended Complaint. (Docket Entry 116.) This case was referred to the undersigned for consideration of pretrial matters. (Docket Entry 13.) For the reasons set out below, I recommend that Defendant's motion (Docket

Entry 116) be **GRANTED IN PART and DENIED IN PART**. Plaintiffs' state claim for tortious interference with contract should be dismissed on limitations grounds; the remainder of Plaintiffs' claims should be allowed to go forward at this time.

I. Jurisdiction.

Plaintiffs bring suit under the Declaratory Judgment Act, *28 U.S.C. §§ 2201*, *2202*, claiming violations of the Sherman Act, *15 U.S.C. § 1*, and the Texas Free Enterprise and Antitrust Act, *Tex. Bus. & Comm. Code Ann. § 15.05* (West 2019), as well as tortious interference and civil conspiracy. (Docket Entry 119-3, at 3.) The Court has original subject matter jurisdiction over Plaintiffs' federal claims pursuant to *28 U.S.C. §§ 1331* and *2202*, and it exercises supplemental jurisdiction over Plaintiffs state claims pursuant to *28 U.S.C. § 1367*. I have authority to issue this Report and Recommendation pursuant to *28 U.S.C. § 636(b)*.

II. Background.

Plaintiffs **[*3]** in this case are the Academy of Allergy & Asthma in Primary Care ("AAAPC") and United Allergy Services ("UAS").[1] They sue Defendants Superior Healthplan. Inc. ("Superior") and Centene Corporation ("Centene"). AAAPC is a trade association of primary care doctors interested in providing patients with allergy testing and immunotherapy. (Docket Entry 106, at 4.) UAS is a corporation trying to break into the allergy testing and immunotherapy market by supplying doctors with the tools to perform these services. (*Id.* at 5.) Superior is a managed care organization ("MCO"); along with other, competing MCOs, it provides managed care services throughout Texas, including care under subsidized programs like Medicaid. STAR, and CHIP. Superior is a wholly-owned subsidiary of Centene. (*Id.* at 5-6.)

Based on a dispute regarding allergy testing and treatment for Medicaid and other subsidized patients in Texas, UAS has alleged federal and state antitrust violations against Defendants, as well as other violations of state law. This factual background first briefly describes the Texas MCO/Medicaid payment system, along with allergy testing and immunotherapy treatment regimens which together provide context for the parties' **[*4]** dispute. It then describes Plaintiff UAS's business, the anti-competitive conspiracy that UAS alleges, and outlines the litigation that has ensued, including the present lawsuit.

1. The MCO/Medicaid Payment System.

Texas MCOs like Superior are paid a fee by the state to stand in the shoes of Texas Medicaid and administer Medicaid benefits to MCO members. The Texas Health and Human Services Commission ("HHSC") contracts with the MCOs and pays them a fixed monthly amount per individual enrolled in their health plan. (Docket Entry 106, at 6.) MCOs in turn contract directly with healthcare providers, including primary care physicians ("PCPs"). to create provider networks their members can use, and the MCOs pay claims for services that would otherwise be paid by Texas Medicaid or the Centers for Medicare & Medicaid Services ("CMS"). (*Id*,. at 7.)

Because HHSC pays MCOs a fixed amount per enrollee regardless of the number of claims, an MCO stands to retain a greater share of the payments if it pays out fewer claims. This perverse incentive is theoretically kept in check by patient choice: if an MCO covers fewer services than one of its competitors, patients will switch to a competing provider that will **[*5]** reimburse their claims, and the MCO will lose the fixed monthly payment for those individuals, thus reducing overall payments from the state.

[1] In their briefs, both parties collectively referrer to Plaintiffs as "UAS." This Report and Recommendation follows the parties' approach.

2. Allergy Testing and Immunotherapy Treatment.

Millions of Americans suffer from seasonal and perennial allergies. Traditionally. allergy symptoms are treated by a wide swath of physicians, including primary care physicians, pediatricians, family physicians, otolaryngologists (also known as "ENTs" or "ear, nose, and throat" doctors), and, of course, allergists. (Docket Entry 106, at 8-9.) The most common method of treating allergy symptoms is through over-the-counter and prescription medications, such as antihistamines and nasal steroids. (*Id.* at 9.) While this method temporarily alleviates allergy symptoms, it does not treat the underlying disease. (*Id.*) Long-term allergy treatment can involve immunotherapy, which cures a person's allergies by slowly introducing allergens in incremental doses into a patient's system over time, eventually completely desensitizing the patient to the allergen. (*Id.*)

Before immunotherapy can be provided to a particular patient, it must first be identified as a viable treatment option through allergy testing. (Docket Entry **[*6]** 106, at 10.) There are two recognized methods of allergy testing: a skin prick test and a blood test. (*Id.* at 11.) A skin prick test may be recommended by a physician after a physical examination and review of the patient's medical history; the test is typically administered by a technician at the physician's direction. (*Id.*) The technician pricks the skin of the patient with allergic material and the skin's reaction is measured and recorded, allowing the physician to determine whether the patient is allergic to the tested allergen. (*Id.*) Alternatively, the physician may recommend a blood test, referring the patient to a testing laboratory for a blood draw. (*Id.*) Once the blood is drawn, the lab technician applies an instrument to the blood and provides the resulting data to the physician, who reviews the results and determines if the patient is allergic to the relevant allergen. (*Id.*)

Once the physician determines the patient is allergic to a relevant allergen, the physician may recommend immunotherapy. (Docket Entry 106, at 11.) Under the physician's supervision, a technician mixes a serum composed of antigens and a dilutant. (*Id.*) The mixture is then further diluted to greater or lesser degrees **[*7]** and distributed into different vials based on concentration. (*Id.*) The vials are then administered to the patient, beginning with the lowest concentration and progressing to the highest concentration. (*Id.*) The doses are most commonly administered through subcutaneous shots, known as "SCIT" or "allergy shots." (*Id.* at 12.) Typically. receiving these allergy shots from the physician requires a visit to the treating physician's office—up to three times a week for a period of three to five years. (*Id.*)

Because of the substantial commitment of time and effort such treatment requires, many patients have difficulty completing the entire course of treatment. (Docket Entry 106. at 12.) Additionally, it is often cost prohibitive for non-allergist physicians to provide allergy testing and immunotherapy; accordingly, patients typically must go to an allergist for these services. (*Id.*)

3. UAS's Business Model.

Although over 40 million Americans suffer from airborne allergies, there arc less than 4,000 board-certified allergists practicing nationwide, and less than 300 practicing in Texas. (Docket Entry 106, at 9.) According to UAS, this shortage of physicians capable of providing immunotherapy treatment has **[*8]** made access to the treatment virtually unobtainable for much of the population, especially for patients outside of major cities who would be subject to routine long-distance travel. (*Id.*) Additionally, not all allergists in Texas accept Medicaid patients. (*Id.*) As a result, of all the allergy sufferers who might benefit from immunotherapy, only 2 to 6 percent actually receive the treatment. (*Id.*)

UAS came up with a business plan to address the availability gap. It would contract with family doctors and PCPs and provide them with skin prick test kits, antigens, vials, needles, and all other materials necessary to perform allergy testing and immunotherapy, and it would provide a trained technician to perform the non-physician aspects of the testing and immunotherapy. (Docket Entry 106, at 10.) If the risk of side effects in a patient was low, the technician could teach the patient how to administer the immunotherapy at home through self-injection of the serum. (*Id.* at 12.) Through this plan, PCPs would be able to perform the full range of allergy treatments; this added ability would greatly expand access to these services Ibr the average citizen, while also avoiding the higher costs and longer **[*9]** wait time associated with using a board-certified allergist. (*Id.* at 10, 13.)

4. The Alleged Conspiracy.

Of course, an increase in access to and use of a treatment for a common disease would also increase the number of claims filed with MCOs. It was in response to the increase in claims, UAS alleges, that Superior embarked on a conspiracy with competing MCOs in Texas to deny claims for PCP allergy testing and immunotherapy, and thus run UAS out of the market.[2]

The alleged plot began to form in late 2012, when representatives from an allergist association and blood testing company contacted Centene, advising them of alleged dangers of what they dubbed "home immunotherapy." (Docket Entry 106, at 16.) Superior's Chief Medical Director, Dr. David Harmon, who is also an employee of Centene. then received a position statement from an allergy trade association stating the organization forbids the practice of home immunotherapy among its members, and advising Superior to refuse to do business with PCPs who contract with UAS, and to deny reimbursement of those physicians' claims. (*Id.*)

According to UAS, Superior CEO Tom Wise, realizing the opportunity to stem the flow of new claims it was having to pay **[*10]** out, directed Dr. Harmon to use technicalities to hold up payments to PCPs requesting reimbursement for allergy testing and immunotherapy performed in conjunction with UAS. (Docket Entry 106, at 17.) Meanwhile, Superior internally prepared to begin denying claims based on the alleged dangers cited by the allergist associations and blood testing companies. (*Id.*) Wise further directed Dr. Harmon to reach Out privately to physicians who had contracted with UAS and advise them that, if they continued to provide allergy services in conjunction with UAS, they would be blacklisted by Superior for other services they provide. (*Id.* at 17-18) Dr. Harmon began acting on these directives in early 2013. (*Id.* at 18.)

Superior faced a problem, however. If it began to unilaterally deny claims for these services, the existing market demand for allergy testing and immunotherapy by PCPs would drive patients and providers to other MCOs who were reimbursing the claims, thus reducing Superior's per-patient payment from LIFISC and its competitiveness as an MCO in the market. (Docket Entry 106, at 18.) To avoid this danger, Superior would need the other MCOs to deny the claims as well, so as to present a unified front. Accordingly, **[*11]** Superior began seeking other MCOs which were willing to enact policies of denying reimbursement claims for physicians using UAS's services. (*Id.*)

In April 2013, while attending an annual meeting in Austin of medical directors of all Texas MCOs, Dr. Harmon advanced the plan during a private conversation Dr. Fred Buckwold, a senior executive of Superior's competitor, Community Health Choice ("CHC"). (Docket Entry 106. at 18.) The two agreed that they could eliminate reimbursement payments for UAS's services without suffering adverse market consequences if all MCOs in Texas adopted identical credentialing policies that would restrict allergy services to specialists. (*Id.*)

The following day, Dr. Harmon emailed Dr. Buckwold to request a copy of the proposed credentialing policy CHC was developing to deny allergy services not performed by specialists. (Docket Entry 106, at 18.) Buckwold forwarded CHC's policy to Harmon the following week, requesting that Harmon advise him if he "see[s] ways to improve on this." (Id.) CHC's proposed policy stated that laPlergy skin testing, assessment of test results. and decision-making regarding therapy is considered to be a specialty area . . . ," and it **[*12]** required that, to provide these services, "a provider must be credentialed . . . by the Medical Care Management Committee." (*Id.*) Harmon forwarded the proposed policy to Susan Mills, Superior's Vice President of Credentialing, directing her to adopt a similar policy. (*Id.*) Mills took the policy and copied it *verbatim*, simply replacing CHC's name with Superior's. (*Id.*)

Dr. Harmon reported his progress to Superior's credentialing committee, which included CEO Wise. (Docket Entry 106, at 19.) He informed the committee he had found a better solution than the *ad hoc* method of holding up

---

[2] As this case is at the motion-to-dismiss stage, all of UAS's well-pleaded facts must be accepted as true. *See* Part III, *infra*.

payments on technicalities; he advised the committee to adopt CHC's credentialing policy, which included requiring doctors to seek "sub-credentialing" to perform allergy services for which they were otherwise already licensed to perform. (*Id.*) He further suggested that the committee wholeheartedly embrace the safety concerns raised by the associations regarding "home immunotherapy." and to spread these concerns as widely as possible, regardless of their verity. (*Id.*) The committee agreed to table the proposal for further discussion. (*Id.*)

At the same time, other Texas MCOs had begun preparing to deny payments **[*13]** for UAS services. (Docket Entry 106, at 20.) Following the April 2013 MCO conference. Parkland Community Health Plan, Inc. ("Parkland")[3] began auditing and investigating providers by requesting medical records for allergy services provided by PCPs. (Id.) El Paso First Health Plan ("El Paso First") directed its special investigations unit to undertake audits and determine which PCPs in their network were offering allergy services of the type UAS provided. (*Id.*)

In June 2013, Superior began et Torts to recruit Dr. William Glomb, the medical director at FIFISC, to join Superior as its medical director and to guide its allergy-treatment-reimbursement policy, so as to avoid FIFISC interference with Superior's efforts to refuse reimbursement for allergy care by PCPs. (Docket Entry 106, at 20.) Glomb was apparently amenable to this plan, and while still at HHSC, he met with representatives from Thermo Fisher Scientific, Inc. ("Thermo Fisher"), the blood testing company who had initially approached Superior and Ccntene with position papers advising them not to do business with PCPs conducting allergy care services. (*Id.*) At that meeting, Glomb sought information on Thermo Fisher's talking **[*14]** points regarding how to characterize OAS's services as unsafe or fraudulent. (*Id.*) The Thermo Fisher representative obliged, and further suggested that Superior adopt a policy favoring blood testing under the pretext that skin prick allergy tests exposed patients with asthma to allergy-induced attacks. (*Id.*)

According to UAS, the alleged conspiracy then began to move forward in earnest. On June 5, 2013, Superior's credentialing committee reconvened and voted to approve Dr. Harmon's proposed allergy policy, and Superior immediately began implementing it. (Docket Entry 106. at 20.) On June 24, 2013, during a monthly conference call of the Texas Association of Health Plans. an association of Texas MCOs, representatives of Superior and Parkland discussed "an initiative that would authorize the Medicaid program to provide blood-based allergy testing for patients with persistent asthma to develop an appropriate treatment strategy that would minimize exposure to allergy-induced asthma attacks." (*Id.* at 21.) This tracked the suggestions made to Dr. Glomb by Thermo Fisher.

On July 1, 2013, Parkland's Medical Director and Vice President of Government Affairs, Dr. Barry Lachman, met with Thermo Fisher representatives **[*15]** to request advice on how to get other MCOs on board with the effort to restrict skin testing and immunotherapy by PCPs. (Docket Entry 106, at 21.) Lachman advised them at the meeting that he had recently attended the annual meeting of the Academy of Allergy, Asthma, and Immunology ("AAAAI") in order to gain insight into the methods allergists were using to discredit the practice of allergy testing and immunotherapy by non-allergists. (*Id.* at 20-21.) He suggested using AAAAI materials to lend legitimacy to the policy that only allergists could provide those services and that PCPs who allowed "home immunotherapy" did so in violation of the standard of care. (*Id.* at 21.)

On July 8, 2013, all Texas MCOs attended an annual meeting in Austin, Texas. (Docket Entry 106, at 22.) Included among the attendees were Dr. Buckwold of CHC, Dr. David Palafox of El Paso First, Dr. Lachman of Parkland, and Dr. Robert Griffin, the head of Superior's credentialing committee. (*Id.*) Dr. Glomb, who had by this time agreed to join Superior but was still working at HHSC, began the meeting by suggesting an open discussion among the MCOs on allergy care. (*Id.*) Superior's representative suggested all MCOs adopt policies restricting **[*16]** allergy skin testing and immunotherapy to specialists. (*Id.*) CHC, Parkland, El Paso First, and Superior representatives agreed that their respective MCOs would move forward with similar policies. (*Id.*)

Following the meeting, each of the four MCOs began taking steps to enact policies which would exclude PCPs and UAS from the allergy testing and immunotherapy market by disqualifying them from reimbursement for those

[3] Parkland was originally a party to this lawsuit, but the claims against it were resolved by joint motion last year (*See* Docket Entries 95. 96.)

services. On August 2, 2013, Superior issued a "news alert" to all providers in its network entitled "Allergy Testing Authorizations Change." in which it announced a proposed policy change to be effective on October 1, 2013. (Docket Entry 106, at 22.) The alert detailed the new policy it had been working on:

> Effective 10/01/13, all allergen immunotherapy services must be authorized through Superior, unless services are provided by an allergist, immunologist, or otolaryngologist. Requests should be submitted 5 business days prior to start of services. Up to (3) three months of treatment may be requested and authorized, when determined medically necessary and the medical prognosis is clinically supported . . . .
>
> Primary care providers may perform screening blood tests to help **[*17]** determine if a condition has an allergic origin. If such testing is positive, the member must be referred to an appropriate specialist for definitive testing and management . . . .
>
> In order to provide allergy testing and treatment to [Superior] members, a provider must be credentialed for this by the Credentials Committee (CC). Specialists considered trained in this area include Adult and Pediatric Allergy and Immunology; and Adult and Pediatric Otolaryngology (Ears, Nose, and Throat). If a provider outside these specialties desires such credentialing, the provider must submit:
>
> - Attestation form that states they have appropriate equipment and personnel to provide allergy and immunotherapy safely:
> - Evidence of comprehensive training in the field of allergy which is comparable to that received in a full training program of one of the specialties noted above.

(*Id.* at 22-23.)

Parkland then announced the same policy for its network. (Docket Entry 106, at 23.) On October 1, 2013, Parkland sent identical letters to PCPs and family physicians who were performing allergy testing and immunotherapy in contract with UAS, threating denial of reimbursement claims. (*Id.*) The letters stated:

> It has come to our attention **[*18]** that you are performing allergy and skin testing and immunotherapy in your primary care office. The American Academy of Allergy, Asthma and Immunology has developed standards for immunotherapy and skin testing. AAA[A]I states that physicians should have specialized training before providing these services. [Parkland] has mechanisms for PCP[]s to be jointly certified as specialists. Since you have never applied as a specialist qualified to do skin testing or immunotherapy, skin testing and primary immunotherapy are considered by [Parkland] as outside the scope of your primary care practice . . . . We are also aware that you are using [UAS] to provide some or all of these services. [UAS] is not a credentialed and contracted provider for [Parkland]. Your contract with [Parkland] indicates that those you contract with or refer services to must be participating providers with [Parkland]. Using this provider puts you in violation of your contract, which could subject you to termination of your contract with [Parkland].

(*Id.* at 23-24.) The letter went on to note that, effective October 4,2013—three days from the date of the letter—Parkland would no longer pay claims for immunotherapy or skin testing from **[*19]** any PCP. (*Id.* at 24.) It further required each provider in Parkland's network to submit a "corrective action plan" which confirmed that the provider would "no longer provide the services described in this letter or use non-credentialed subcontractors for [Parkland] patients," "comply with [Parkland] standards of care," and outline the steps the provider had taken or would take "to repair the contractual violations cited." (*Id.*) The letter was signed by Dr. Lachman. (*Id.*)

Later that same day, Superior ran into a problem blocking implementation of its policy: HHSC. (Docket Entry 106, at 24.) HHSC had begun an inquiry into Superior's proposed policy back in September 2013, due in part to concerns that it would negatively impact access to care. (*Id.*) FIHSC's review of Superior's geographic access maps revealed coverage issues based on the average distance a member would have to travel to receive allergy care. (*Id.* at 24-25.) Concerned by the inquiry, Dr. Harmon asked Dr. Glomb, who was still working at EIHSC at the time, to intervene on Superior's behalf. (*Id.* at 25.) Glomb emailed FIHSC's Director of Health Plan Management, Rudy Villarreal, and raised the same safety concerns that had been used by Superior to justify **[*20]** its policy. (*Id.*) Before emailing Villarreal, however, Glomb sent his draft to Harmon for approval. (*Id.*) The email proved ineffective, however, and Villarreal ordered HHSC to place an indefinite moratorium on Superior's policy. (*Id.*) Thus, on October 1, while Parkland was announcing its policy, Superior's policy was placed on indefinite hold. (*Id.*)

To announce the hold, Superior sent out another Provider Alert on October 1, 2013, announcing implementation of the policy had been "delayed." (Docket Entry 106. at 25.) However, the alert also "encourage [d]" Providers outside the specialties of allergist, immunologist, otolaryngologist, or pulmonologist to ensure that "[t]hey have appropriate equipment and personnel to provide allergy and immunotherapy safely; and, [e]vidence of comprehensive training in the field of allergy which is comparable to that received in a full training program of one of the specialties noted above." (*Id.* at 25-26.) The letter concluded by stating that Superior would distribute additional information on the future implementation of its policy as soon as final details and a timeline "are available and approved by" HHSC. (*Id.* at 26.)

Parkland was now the only MCO implementing the policy **[*21]** of denying reimbursement for PCPs utilizing allergy testing and immunotherapy. Parkland employees were instructed to forward all provider questions regarding the October 1 letter announcing Parkland's policy to Dr. Lachman or to Provider Relations Manager, Patricia Carney. (Docket Entry 106, at 26.) Lachman personally called the providers to discuss their work with UAS and the reasons for Parkland's concerns regarding allergy testing and immunotherapy. (*Id.*) In a communication to Parkland staff on November 6, 2013, Lachman announced that Parkland had received letters from the majority of their providers stating they had ceased performing allergy testing and immunotherapy for their patients, per the corrective action plan required by its October 1 letter. (*Id.*)

El Paso First also began moving forward with the policy in October 2013, when it began holding internal meetings on reimbursement for PCPs practicing allergy testing and immunotherapy as part of Dr. Palafox's previous commitment to the other MCOs. (Docket Entry 106, at 26.) At those internal meetings, Palafox supplied guidelines from an allergist trade organization, the American College of Allergy. Asthma, and Immunology ("ACAAI"), **[*22]** recommending, immunotherapy be prescribed only by an allergist-immunologist or other physician expertly trained in the therapy. (*Id.*) By this point, however, El Paso First had learned that Superior, its main competitor in the El Paso healthcare market, had placed a freeze on the policy. (*Id.*) Concerned that Superior would not perform its part of the agreement, El Paso First delayed implementation of its own program. (*Id.*) No further action was taken until November 6, 2013, when El Paso First's credentialing committee proposed they begin credentialing providers to provide immunotherapy in line with Parkland and Superior's policies. (*Id.* at 27.)

A few days later, on November 13, 2013 Dr. Lachman emailed Parkland's policy documents to Dr. Palafox, including the corrective action plan, the initial letter it had sent to its providers on October 1, and a follow up letter addressed to PCPs regarding the corrective action plan. (Docket Entry 106. at 27.) In the email. Lachman stated, "I-lope you find these useful. You will need to change the contract references and prior authorization language to match El Paso First. of course." (*Id.*) However, due to El Paso First's concern about Superior's delayed **[*23]** implementation, the proposal remained on hold. (*Id.*)

Although Superior's policy had been placed on hold indefinitely, it continued its efforts to reduce claims for allergy testing and immunotherapy services by PCPs. In December 2013. Dr. Harmon reached out to Dr. Gilbert Handal. a member of Superior's credentialing committee and paid consultant for Superior, and asked him to personally speak with some of the PCPs known to be working with UAS and persuade them to stop doing business with UAS. (Docket Entry 106. at 28.) Handal obliged, and a subsequent internal email from Harmon stated that he had, "asked Dr. Handal to visit some of the doctors that are using [UAS]. The first doctor he called decided he was going to stop. [Dr. Handal] is getting with the next group soon." (*Id.*)

In January 2014, Parkland began threatening providers with recoupment demands for alleged overpayment made for claims for allergy skin tests and immunotherapy by PCPs. (Docket Entry 106, at 29.) Parkland sent direct letters to individual physicians performing these services, referring to AAAAI's "standards of care" relating to allergy skin testing, immunotherapy, and the use of allergy technicians as justification. **[*24]** (*Id.*) One such physician was threatened with a recoupment demand of $172,557.97 for those services. (*Id.*) Parkland continued sending these recoupment letters for several months.

5. Litigation Begins.

By January 2014, UAS and AAAPC were aware of the concerted effort among MCOs to undermine PCP allergy services, and they filed a lawsuit. That lawsuit was not against Superior or the other MCOs, however; it was brought against the allergist associations AAAAI and ACAAI. alleging antitrust violations based on those organizations' efforts to convince MCOs not to do business with UAS or PCPs utilizing those services. *See Acad. of Allergy & Asthma in Primary. Care & United Biologics V. Allergy& Asthma Network/Mothers of Asthmatics. Inc..* No. 5:14-C V-35-OLG, Complaint (W.D. Tex. Jan. 13, 2014).

Superior's outside counsel, Greenberg Traurig, forwarded the complaint to Superior. (Docket Entry 106, at 30.) When Dr. Harmon received the complaint, he removed his attorneys from the email and added Dr. Palafox, Dr. Buckwold, and Dr. Lachman, writing "[a]ll of your plans are mentioned in this lawsuit, but only [Dr. Lachman] had the dubious distinction of being named specifically." (*Id.*) Palafox responded **[*25]** by stating. "Dr. [Lachman]. CONGRATULATIONS!!" (*Id.*) Lachman then responded, "This email track is discoverable. Therefore, I will not comment except to say that the information in the letter about [Parkland] is distorted and inaccurate." (*Id.*) Palafox then emailed Harmon directly, stating. "Thanks for the info as I did not know . . . I guess we are doing something right." (*Id.*)

The filing of the lawsuit was enough for El Paso First to drop the plan entirely. At a meeting of El Paso First's credentialing committee on February 12, 2014, the committee noted the "[p]roposed policy for Allergy & Immune Therapy has be[en] place[d] on hold due to [OAS's lawsuit]. [El Paso First] is not part of the lawsuit but could be a witness to the lawsuit so [El Paso First] cannot proceed in proposing any policies." (Docket Entry 106, at 30.)

Superior and Parkland, however, remained undaunted. In June 2014, Parkland sent a provider notification to physicians to clarify its position regarding authorization criteria for allergy skin testing and immunotherapy. (Docket Entry 106, at 31.) The notification stated that, unless the services were performed by allergists, pulmonologists, or otolaryngologists. Parkland **[*26]** would require prior authorization before the services were performed. (*M.*) Superior sent a similar provider alert that month entitled "Allergy and Immunology Therapy Credentialing Required for Medicaid Providers." (*Id.*) The alert stated that, effective August 1, 2014, providers who wanted to continue offering allergy and immunology services must be credentialed through Superior's credentialing committee before providing those services, unless the services were provided by an allergist. (*Id.*) The alert did make a small concession: Superior would allow noncredentialled PCPs to provide allergy blood tests. (*Id.*)

6. *The Effect on Access to Care.*

Following Superior's credentialing announcement, 1-11-ISC again requested information from Superior on its plan requirements and what effect the policy would have on its network's access to allergy testing and immunotherapy. (Docket Entry 106, at 32.) In response, Superior conceded to HFISC that its network would be insufficient to provide the statutorily required access to these services; this was because, in certain Texas counties, the relatively few providers in Superior's network who were authorized to provide allergy testing and immunotherapy **[*27]** services did not meet the statutorily required distance for travel to a provider. (Id.) Superior's directory listed only 153 locations in Texas where a new Medicaid enrollee could hypothetically receive allergy testing and immunotherapy, mainly in cities. (*M.*) This meant that each location would have to cover 19,119 Medicaid patients, with rural patients facing significant travel times to reach one of these locations. (*Id.*) In light of this issue, Superior had submitted an "access waiver" to the Texas Department of Insurance. (*Id.*) Superior advised HHSC it would continue its "ongoing efforts" to contract with available providers. (*Id.*)

In response to the credentialing policy. UAS and individual PCPs requested a meeting with HHSC and Superior to discuss their concerns. (Docket Entry 106, at 32.) HI-ISC and Superior agreed, and a meeting was held in May 2014. (*Id.*) At the meeting. UAS provided several testimonials from patients claiming they had utilized allergy services through their PCPs but were forced to stop when the insurance company stopped reimbursing the services, leaving no alternative but to seek sometimes distant allergists. (*Id.* at 33.) FIFISC stated its concerns regarding the lack **[*28]** of member access to allergy services through allergists, and in response Superior represented that their credentialing service would allow non-board-certified allergists to practice allergy care. (*Id.*) Despite these representations, after the announcement of the August 2014 policy, no provider seeking credentialing was approved who was not already a certified allergist. (*Id.* at 34.)

7. *Continued Litigation.*

On September 29, 2017, Chief Judge Garcia denied the defendant allergy associations' motion for summary judgment in OAS's pending case against the allergist associations, concluding, among other things, that UAS had factually supported antitrust standing, antitrust injury, and the relevant market. *See* No. 5:14-CV-35-OLG (Docket Entry 426, at *27-28, 30-32). That very same day, UAS and AAAPC filed this lawsuit. (*See* Docket Entry 1-1, at 1.)

A few months later, on December 28, 2017, UAS tiled a separate lawsuit in this district against Quest Diagnostics, Inc., the country's largest supplier of allergy blood tests, alleging nearly identical claims. See *Acad of Allergy & Asthma in Primary Care v. Quest Diagnostics Inc., No. CV 5:17-1295, 2019 U.S. Dist. LEXIS 29479, 2019 WL 919203, at *1 (W.D. Tex. Feb. 22, 2019)*. In that case, UAS's complaint was dismissed as time-barred. **[*29]** *Id. 2019 U.S. Dist. LEXIS 29479, [WL] at *4*. Judge Lamberth found that the last pleaded overt act in furtherance of the conspiracy was committed in August 2013, when a Quest representative met with Phadia, an allergy testing equipment manufacturer, to discuss Phadia's meeting with an insurance company to discuss its reimbursement policy for UAS; because the suit was filed in December 2017, it was outside the four-year limitations period for their federal and state antitrust claims. *Id.*

On March 26, 2018, a jury rendered a verdict against UAS in the allergist association case, and the Court entered a take-nothing judgment. *See* No. 5:14-CV-35-01A3 (Docket Entries 563. 564). Accordingly, the instant case is the only UAS anti-trust case that remains pending in the district.

III. Legal Standard Applicable to a Motion to Dismiss.

Under *Rule 8(a)(2) of the Federal Rules of Civil Procedure*, a complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Rule 12(b)(6)* authorizes the dismissal of a cause of action in a complaint when it fails "to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. When considering a motion to dismiss for failure to state a claim, the "court accepts 'all well-pleaded facts as true, viewing them in the light most favorable **[*30]** to the plaintiff.' *In re Katrina Canal Breaches Litig., 495 F.3d 191, 205 (5th Cir. 2007)* (quoting *Martin K Eby Constr. Co. v. Dallas Area Rapid Transit, 369 F.3d 464, 467 (5th Cir. 2004))*. "Review is limited to the contents of the complaint and matters properly subject to judicial notice." *Mathews v. City of San Antonio, SA:14-CV-566-DAE, 2014 U.S. Dist. LEXIS 171307, 2014 WL 7019984. at *2 (W.D. Tex. Dec. 11, 2014)* (citing *Tellabs, Inc. v. Makor Issues & Rights, Ltd, 551 U.S. 308. 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007))*.

For a claim to survive a motion to dismiss, the plaintiff must plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atlantic Cmp. v. Twombly, 550 U.S. 544. 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Although *Rule 8* does not require "detailed factual allegations," it does require more than "an unadorned, the-defendant-unlawfully-harmed-me accusation." *Id.* While "all well-pleaded facts are viewed in the light most favorable to the plaintiff," the plaintiff "must allege facts that support the elements of the cause of action in order to make out a valid claim." *City of Clinton v. Pilgrim's Pride Corp., 632 F.3d 148, 152-53 (5th Cir. 2010)*. That is, a complaint must contain "more than labels and conclusions, and a formulaic recitation of the elements °la cause of action will not do." *Twombly, 550 U.S. at 555*. "Factual allegations must be enough to raise a right to relief above the speculative level." *Id.*

IV. Analysis.

Superior moved to dismiss UAS's **[*31]** claims in its Second Amended Complaint[4] pursuant to *Rule 12(b)(6)*. (Docket Entry 116, at 1.) Superior first contends that all of UAS's claims are time barred under the relevant statutes of limitations. (*Id.* at 11.) Alternatively. Superior contends that UAS has failed to plead sufficient facts to support its claims. (*Id.* at 17.) This Report and Recommendation addresses each of these arguments in turn.

A. *Statute of Limitations.*

The Court may grant a motion to dismiss on a statute of limitations defense when it is evident from the pleadings that the action is time-barred, and the pleadings fail to raise some basis for tolling. *Taylor v. Bailey Tool Mfg. Co., 744 F.3d 944, 946 (5th Cir. 2014)* (quoting *Jones v. Alcoa, Inc., 339 F.3d 359, 366 (5th Cir. 2003))*. In this case, UAS makes claims that are subject to four-year and two-year limitations periods. It is not evident from the pleadings that UAS's antitrust claims, or its other claims with four-year limitations periods, are barred: however, the claims subject to a two-year period are barred by limitations.

1. *Sherman Act and Texas Free Enterprise and Antitrust Act.*

Both the Sherman Act and the Texas Free Enterprise and Antitrust Act impose four-year limitations periods. *See 15 U.S.C. § 15b*; TEN. BUS. & COM. CODE ANN. § 15.25 (West 2019). In this circuit, a cause of action for an antitrust claim accrues each **[*32]** time a defendant commits an act that injures the plaintiff; provided a suit is filed within four years of the time of accrual, the action is not barred by limitations. *Bell v. Dow Chem., Co., 847 F.2d 1179, 1186 (5th Cir. 1988)* (citing *Imperial Point Colonnades Condo., Inc. v. Mangurian, 549 F.2d 1029, 1035 (5th Cir. 1977))*.[5] If some injurious acts occurred outside of the statute of limitations, and some occurred within, the plaintiff is limited to recovering damages "resulting only from those acts committed less than four years before commencement of his suit." *Imperial Point Colonnades Condo., Inc.. 549 F.2d at 1034*.

Here, UAS tiled its lawsuit on September 29, 2017; therefore, to survive the motion to dismiss, UAS must have pleaded facts supporting an injurious act occurring after September 29, 2013. Superior cites Texas case law for the general proposition that "a cause of action . . . accrues at the time when facts come into existence which authorize a claimant to seek a judicial remedy." (*See* Docket Entry 116, at 10 (quoting *Exxon Mobil Corp. v. Rincones, 520 S.W.3d 572.591 (Tex. 2017)*.) Applying this rule to UAS's' pleadings, Superior contends that VAS was aware of the alleged conspiracy as of August 2, 2013, when Superior announced that it would stop reimbursing allergy services provided by non-allergists effective October 1, 2013. (Docket Entry 116, at 10.)

While Superior is correct that accrual for an antitrust claim generally occurs **[*33]** at the time plaintiff becomes aware of an injurious conspiracy, it does not explain how its unilateral announcement of policy put UAS on notice of an illegal anti-competitive agreement with other MCOs, especially when the other alleged conspirators had not yet announced corresponding policies. Even if UAS was on notice, however, Superior cites no authority contradicting the rule that a claim accrues each time a defendant commits an act that injures the plaintiff. *See Bell, 847 F.2d at 1186*. As the Supreme Court has held, "each overt act that is part of the violation and injures the plaintiff . . . starts the statutory period running again, *regardless of the plaintiff's, knowledge* of the alleged illegality at much earlier times." *Kiehl-v. A.O. Smith Coop.. 521 U.S. 179, 189 (1997)* (emphasis added). Superior quotes *Klehr* for its holding that a "plaintiff cannot use an independent, new predicate act as a bootstrap to recover for injuries caused by other earlier predicate acts that took place outside the limitations period." (*See* Docket Entry 129. at 4.) But that holding does not bar a lawsuit when additional injurious acts occurred within the limitations period: while a plaintiff cannot recover for acts accruing outside the limitations period. an act within **[*34]** the limitations period can still support a lawsuit. *Imperial Point Colonnades Condo., Inc., 549 F.2d at 1034*.

---

[4] UAS has moved the Court for leave to tile its Third Amended Complaint. (*See* Docket Entry 119.) That motion, which is opposed by Superior and Centene, will he addressed by separate order.

[5] The Texas Antitrust Act is interpreted in harmony with federal interpretation of the Sherman Act. *See Caller-Times Pub. Co. v. Triad Commc'ns, Inc.. 826 S.W.2d 576. 580 (Tex. 1992)*.

Here, UAS has alleged numerous injurious acts occurring after September 29, 2013. It alleged that on October 4, 2013, as part of the IVICOs' agreement. Parkland eliminated coverage for allergy testing and immunotherapy performed by PCPs. (Docket Entry 106, at 23-24.) It also alleged Parkland sent recoupment demands in January 2014 to physicians contracting with UAS. (*Id.* at 29.) UAS also alleged Superior implemented its credentialing policy blocking reimbursement for "non-credential led" providers, meaning any provider who was not an allergist, in August 2014. (*Id.* at 31.) These allegations, taken as true, all establish injurious acts within the limitations period; while UAS cannot recover for injuries occurring prior to September 29, 2013, its knowledge of those prior acts is irrelevant to its ability to bring claims for independent, injurious acts occurring after that date. Because, based on this record, it is not evident from the pleadings that the entirety of UAS's anti-trust claims are time-barred, the Court should deny Superior's motion to dismiss them. *Taylor, 744 F.3d at 946*.

2. *UAS's Other*

UAS also presents state-law claims for tortious interference, civil conspiracy, **[*35]** declaratory judgment, and injunctive relief. (Docket Entry 106, at 44-45.) For tortious interference claims. Texas common law provides for a two-year statute of limitations.[6] *See First Nat'l Bank of Eagle Pass v. Levine, 721 S.W.2d 287, 289 (Tex. 1986)* (tortious interference). As civil conspiracy is a derivative tort, the Texas Supreme Court has held that the statute of limitations for civil conspiracy is the same as that of the underlying tort. *See Agar Corp., Inc. v. Electro Circuits Inter., LLC. 580 S.W.3d 136, 142 (Tex. 2019)*. The same is true of declaratory judgment and injunctive relief, which are also governed by the statute of limitations for the underlying claims. Nw. *Austin Mun. Util. Dist. No. 1 v. City of Austin, 274 S.W.3d 820, 836 (Tex. App.—Austin 2008, pet. denied.)* (because a "declaratory judgment action is a procedural device used to vindicate substantive rights, it is generally governed by the statute of limitations for the legal remedy underlying the claim: consequently, to determine what statute of limitations should apply to an action for a declaratory judgment, one must look to the legal remedy underlying the cause of action.")

Here, UAS has pleaded both the state and federal antitrust claims and the state tortious interference claims as the torts underlying its civil conspiracy claim and its requests for declaratory and injunctive relief. Because, for the reasons set out above, the antitrust claims are not barred **[*36]** by limitations, the only relevant limitations question is whether the tortious interference claims are.

Because tortious interference claims are subject to a two-year statute of limitations, the actions supporting UAS's claims must have occurred after September 29, 2015, to survive the motion to dismiss. *Taylor, 744 F.3d at 946*. Applying this limitations period to UAS's claim for tortious interference, it appears that that the claim accrued outside the limitations period.[7]

UAS contends the Court should toll the statute of limitations under the discovery rule. (Docket Entry 125, at 18-19.) That rule "defers accrual of certain causes of action until the plaintiff knew, or exercising reasonable diligence, should have known of the wrongful act causing injury." *Jackson v. W. Telemarketing Corp. Outbound, 245 F.3d 518, 523-24 (5th Cir. 2001)* (quoting *Salinas v. Gary Pools, Inc., 31 S.W.3d 333, 335 (Tex. App.—San Antonio 2000, no pet.))*. The rule applies only in two circumstances: (1) in cases of fraudulent concealment; and (2) "when the nature of the injury is inherently undiscoverable and the injury itself is objectively verifiable." *Id.*

The second circumstance is plainly inapplicable here. According to UAS's pleadings. Superior announced its policy on August 2, 2013, and began taking action to discourage physicians in contract with UAS from continuing business

---

[6] In its motion, Superior alternatively contends that UAS's tortious interference claims are actually subject to only a one-year statute of limitations because they are based on defamatory conduct. (Docket Entry 116, at 13; Docket Entry 129. at 5 n.4.) This contention fails. Tortious interference claims are subject to a one-year limitations period only when defamatory conduct forms the sole basis for the complaint. *Nationwide Bi-Weekly Admin. Inc. v. Belo Corp., 512 F. 3d 137, 147 (5th Cir. 2007)*. Because UAS's tortious interference claims are based not only defamatory conduct but also on denial of reimbursement claims (*see* Docket Entry 106, at 44-45). the one-year statute of limitations is inapplicable.

[7] While UAS's response makes a conclusory reference to "more recent" acts against providers at Amarillo Pediatrics and Dr. Hashim, these alleged acts are not included in the second amended complaint. (*See* Docket Entry 125, at 20.)

with them shortly **[*37]** thereafter. (Docket Entry 106. at 23-24.) In December 2013, Dr. Handal, at Dr. Harmon's direction, personally contacted PCPs known to be working with UAS and persuaded them to stop doing business with UAS. (*Id.*, at 29.) In June 2014, Superior announced a credentialing policy, effective August 1, 2014. (Id. at 31.) But UAS has not shown how any of these acts were inherently undiscoverable. To the contrary, UAS filed a lawsuit in January 2014 in which it specifically pleaded that the allergist associations had wrongfully convinced MCOs not to do business with UAS. (*Id.* at 30.) Given that part of the alleged interference was already known to UAS, it cannot plausibly allege that Superior's publicly announced policies and actions were inherently undiscoverable even with due diligence on its part. *Cf.* *Jackson, 245 F.3d 518, 523-24*.

UAS instead rests its arguments on fraudulent concealment. Under Texas law, a plaintiff raising the limitations defense of fraudulent concealment must establish four elements: "(1) the existence of the underlying tort; (2) the defendant's knowledge of the tort; (3) the defendant's use of deception to conceal the tort; and (4) the plaintiff's reasonable reliance on the deception." *Welk v. Simpkins, 402 F. App'x 15, 18 (5th Cir. 2010)*. Claims of fraudulent concealment are **[*38]** subject to *Federal Rule of Civil Procedure 9*'s requirement that "the circumstances constituting fraud or mistake shall be stated with particularity." *Fed. R. Civ. P. 9(b)*; *see* *Norwood v. Raytheon Co., 501 F. Supp. 2d 836, 838 (W.D. Tex. 2006)* (discussing rule).

UAS's fraudulent concealment argument fails. UAS pleaded that Superior "fraudulently misrepresented to UAS since August 2014 that it would credential UAS-contracted physicians that complete a CME and applied to Superior's Credentialing Committee—a promise it made to both and UAS at a meeting held between the parties. It was not until well into 2016 UAS discovered every single physician who had tried to gain credentialing on this basis was denied and that Superior never meant to uphold that promise." (Docket Entry 106, at 50.) UAS has not stated, however, that Superior allegedly used deception to conceal the fact that no physician applying for credentialing over a two-year period ever received it, or in what way UAS reasonably relied on this alleged deception to its detriment. Because claims of fraudulent concealment must be made with specificity, UAS's failure to plead the third and fourth elements of a fraudulent concealment defense to limitations dooms its contention that the tortious interference claims should be tolled.[8] *Welk, 402 F. App'x at 18*.

For the reasons set **[*39]** out above, UAS's claims for tortious interference are time barred and the pleadings fail to raise a basis for tolling. Accordingly, as to that claim, Superior's motion to dismiss should be granted and UAS's tortious interference claims should be dismissed. *Taylor, 744 F.3d at 946*. However, because the antitrust claims underlying UAS's civil conspiracy claim and requests for declaratory and injunctive relief are timely, Superior's limitations arguments as to those claims should be denied in part.

B. *Sufficiency*.

Superior contends in its motion that UAS's antitrust claims[9] fail to state claims for relief under *Federal Rule of Civil Procedure 12(b)(6)*. Under *Section 1* of the Sherman Act. "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. "Although *§ 1* could be read to outlaw all contracts, it has long been interpreted to only proscribe unreasonable restraints." *Golden Bridge Tech., Inc. v. Motorola. Inc., 547 F.3d 266.*

---

[8] In its proposed Third Amended Complaint, UAS avers that "the earliest time any of the aforementioned causes of action would accrue is in 2016, where a glimpse of the wrongdoing behind Superior's allergy policy was discovered via its responses to a subpoena in different litigation, including the 2016 corporate representative deposition of Dr. Glomb pursuant to that subpoena." (Docket Entry 119-3, at 55.) These additional "filets" are not before the Court in the present motion to dismiss; even if they were, they appear insufficiently specific to satisfy the particularity requirements of *Rule 9(b)*.

[9] As already noted, *see* n.5, *supra*, the Texas Act mirrors federal ***antitrust law***, and Texas courts "are statutorily instructed to interpret the [Texas Act] in harmony with federal judicial interpretations of equivalent federal laws." *Apani Sir., Inc. v. Coca-Cola Ewer., Inc., 300 F.3d 620, 628* (5th Cir. 2002.) Therefore, resolution of the question of whether UAS has stated a claim under the Sherman Act also determines the survival of his Texas Act claims.

271 (5th Cir. 2008). To establish a violation of § 1, a plaintiff must show that the defendants engaged in an unlawful agreement that restrained trade in the relevant market. *Id.*

Superior makes three arguments for dismissal under Rule I 2(b)(6): (1) UAS fails to allege facts plausibly **[*40]** demonstrating an unlawful agreement; (2) UAS fails to adequately allege the relevant product or geographic markets; and (3) UAS fails to demonstrate antitrust standing. (Docket Entry 116, at 17.) All three arguments should be rejected.

1. Unlawful agreement.

To adequately plead a § 1 claim under the Sherman Act, the plaintiff's complaint must contain enough factual matter, taken as true, to suggest that an agreement was made. *Twombly, 550 U.S. at 556*. The facts pleaded must demonstrate the conspirators had a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Golden Bridge Tech., Inc., 547 F.3d at 271*. "[T]he pivotal question is whether the concerted action was a result of an agreement." *Marital Sports, L.L.C. v. Nat'l Collegiate Athletic Ass'n, 751 F.3d 368. 375 (5th Cir. 2014)*.

Here, UAS has adequately pleaded the existence of an agreement. UAS's complaint describes the first instance of agreement in April 2013, when Dr. Harmon of Superior and Dr. Buckwold of CHC, representing competing MCOs, privately discussed eliminating reimbursement payments for UAS services, and concluded they could do so without suffering adverse market consequences if all MCOs in Texas adopted policies restricting allergy services to specialists. (Docket Entry 106, at 18.) Harmon emailed Buckwold the following day requesting a copy of **[*41]** CHC's proposed policy, which Superior then copied *verbatim*, replacing only the name of the organization. (*Id.*) At a later meeting of all Texas MCOs, Superior's representative suggested that all the MCOs adopt policies restricting allergy skin testing and immunotherapy to specialists. (*Id. at 21*.) CHC, Parkland, El Paso First, and Superior representatives agreed that their respective MCOs would move forward with similar policies. (*Id.*) Parkland followed up by announcing the same policy on October 1, 2013, sending letters to PCPs and family physicians who were performing allergy testing and immunotherapy in contract with UAS, and threating denial of reimbursement claims and demanding they submit evidence that they had ceased providing the services. (*Id.*)

On November 13, Dr. Lachman of Parkland emailed his MCO's policy documents to Dr. Palafox of El Paso First, including the corrective action plan, the initial letter it had sent to its providers on October 1, and a follow up letter addressed to PCPs regarding the corrective action plan; Dr. Lachman stated, "Hope you find these useful. You will need to change the contract references and prior authorization language to match El Paso First, of course." **[*42]** (*Id. at 27*.) And in January 2014, when it learned of UAS's lawsuit against certain allergy associations, Superior's Dr. Harmon immediately emailed his counterparts at CHC, Parkland, and El Paso First about the suit. (*Id. at 29-30*.)

If credited, as they must be, these allegations constitute direct evidence of an agreement between competing MCOs to adopt uniform policies to reduce the number of payable claims without suffering the competitive market consequences of denying reimbursement fur services. *See Tunica Web Advert. v. Tunica Casino Operators Ass'n, Inc., 496 F.3d 403. 410 (5th Cir. 2007)* (finding evidence of antitrust agreement from email referring to casinos' accord to refuse to do business, individually or as group, with entity leasing internet domain names). The frequent communication and sharing of materials alleged by UAS tends to exclude the possibility of independent action, and instead suggests a conscious commitment to a common scheme: such pleadings plausibly allege an agreement. *See Golden Bridge Tech, Inc., 547 F.3d at 271* (stating the pleading requirements for a plausible agreement). Superior argues in its motion that its actions are equally consistent with "unilateral parallelism," which is not actionable. *See Royal Drug Co. Inc. v. Grp. Life and Health Ins. Co., 737 F.2d 1433, 1437 (5th Cir. 1984)*. However. UAS's allegations plausibly support coordination between competitors, coordination which would **[*43]** counter a claim of independent, unilateral action. Even if these allegations were considered "doubtful," the Court must proceed "on the assumption that [they] are true." *Twombly, 550 U.S. at 555*.

Superior further contends that no inference of agreement can be drawn from UAS's allegations because it had no rational economic motive to conspire, a contention supported by the fact that El Paso First, who was allegedly its only competitor in the El Paso MCO market, backed out of the scheme. (*See* Docket Entry 116, at 19 (citing *Golden*

Bridge Tech, Inc., 547 F.3d at 271)). But the plausibility of a claim of an antitrust conspiracy is not dependent on its wisdom, or ultimate success; all that matters is whether an unlawful agreement has been plausibly alleged. *Cf.* Golden Bridge Tech, Inc., 547 F.3d at 271 ("The plaintiff must present evidence that the defendants engaged in concerted action, defined as having 'a conscious commitment to a common scheme designed to achieve an unlawful objective.') In any event, an economic incentive has been plausibly alleged: as UAS contends, if the MCOs combined in a united front, they could cease reimbursements for the increased number of allergy care claims due to UAS's services and thus all retain a greater share of the HHSC premiums. The fact that some conspirators **[*44]** subsequently backed out of the alleged scheme does not affect the analysis of whether a plausible agreement has been alleged. Accordingly, UAS has pleaded facts suggesting an agreement between the competing MCOs.

2. *The relevant geographic market*.

Antitrust plaintiffs must plead facts identifying "the relevant geographic market." Apani, 300 F.3d at 625-26. The facts must identify the area of "effective competition" for the product in question, which "must be charted by careful selection of the market area in which the seller operates and to which buyers can practicably turn for supplies." Id. at 626. "Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiffs favor, the relevant market is legally insufficient, and a motion to dismiss may be granted." Id. at 628. Superior conceded at oral argument that UAS has adequately pleaded a product market; the parties differ only as to whether an adequate geographic market has been plead. (*See* Docket Entry 132, at 96.)

"[T]he definition **[*45]** of a relevant antitrust market is a highly fact-intensive inquiry; accordingly, a motion to dismiss a complaint for failure adequately to plead a relevant antitrust market should be granted only where the alleged market can be deemed "patently implausible solely on the basis of the four corners of the [complaint]." Cont'l Airlines, Inc. v. United Air Lines, Inc., 120 F. Supp. 2d 556, 568 (E.D. Va. 2000) (quoting Michael Anthony Jewelers, Inc. v. Peacock Jewelry, Inc., 795 F. Supp. 639, 646-47 (S.D.N.Y. 1992)). Measured by this standard, UAS's second amended complaint passes muster. UAS has pleaded that, for a PCP utilizing UAS's services to viably offer those services in its medical practice, the PCP must be reimbursed by a third-party payor, such as a commercial insurance company, an MCO, Medicare, or Medicaid. (Docket Entry 106, at 11.) It averred that 98% of allergy testing and immunotherapy services are paid for by one of these third-party payors. (*Id.*) The complaint also states that Medicaid patients are otherwise unable to afford these services, and thus 100% of reimbursements for these services from Medicaid patients come from MCOs or other government entities. (*Id.*) UAS stated that allergy services are offered in major cities and some smaller cities, and that the market boundary was that of cities in Texas. (*Id.* at 12.) The complaint elaborated that patients are willing **[*46]** to travel only a certain distance for these types of services based on Core-Based Statistical Areas ("CBSA"), which is limited to about 15 miles from their nearest provider. (*Id.* at 14.) It further elaborated that Superior's public directories listed 153 locations in Texas where a Medicaid enrollee could hypothetically receive allergy testing and immunotherapy from a credentialled allergist, which would equate to 19,119 Medicaid enrollees per location. (Id. at 32.)

UAS claims Texas MCOs control more than 90% of Texas's Medicaid patients. (Docket Entry 106, at 8.) It also claims that Superior provides Medicaid services in every county in Texas, and provides 60% of Texas's Medicaid services in El Paso County. UAS contends Parkland controls 60% of Texas's Medicaid services in Dallas County. (*Id.*) It further claims Superior. Parkland, and El Paso First jointly control more than 90% of Dallas and El Paso Counties, and that Parkland and Superior control more than 50% of the market in other areas. (*Id.* at 8, 40.)

While these pleadings are not supported with elaborate detail, they are sufficient at the motion to dismiss stage to place Defendants on notice of the relevant geographic market. *Cf. Allergy & Asthma Network, et* ***[*47]*** *al.*, No. 5:14-cv-35-OLG, at *31-32 (at summary judgment stage, finding sufficient detail regarding geographic based on claims that "consumers of ambulatory services, such as allergy testing and immunotherapy, are willing to travel locally to obtain service" but are "unlikely to shop outside the bounds of a CBSA"). UAS has detailed (1) the market area in which the seller operates and (2) the area to which buyers can practicably turn for supplies. Apani Sw., Inc., 300 F.3d at 626. It has further detailed the market power of the alleged conspirators, Superior, Parkland. and El Paso First. in combination, is greater than 50% in many areas and greater than 90% in some. *See Spectators' Commc'n*

Network Inc. v. Colonial country Club, 253 F.3d 215, 225 (5th Cir. 2001) ("[T]he reason for looking at market power is to determine whether the combination or conspiracy, not each individual conspirator, has the power to hurt competition in the relevant market."). Because "it is not inconceivable" that UAS "could prove a set of facts supporting the relevant market definition alleged in its complaint," the Court should deny Superior's motion to dismiss for failure to define the relevant market. *MCM Partners, Inc. v. Andrews-Bartlett & Assocs., Inc., 62 F.3d 967, 977 (7th Cir. 1995)*.

3. *Antitrust standing and injury*.

Finally, Superior contends that even if UAS has pleaded **[*48]** a valid antitrust claim, it does not have standing and has failed to allege antitrust injury. (Docket Entries 116, at 23; 129, at 11.)

A private antitrust plaintiff does not acquire standing merely by showing that he was injured by the defendant's conduct. *Setfecz v. Jewel Food Stores, 67 F.3d 591, 597 (7th Cir. 1995)*. Rather, a plaintiff must show: "(1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; (2) antitrust injury; and (3) proper plaintiff status, which assures that other parties are not better situated to bring suit." *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. All., Inc., 123 F.3d 301, 305-06 (5th Cir. 1997)*.

Antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Norris v. Hearst Tr., 500 F.3d 454, 465 (5th Cir. 2007)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. "The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Id.* Exclusion of a competitor from the market is an injury that the antitrust laws were intended to prevent; thus, a competitor who has been excluded from the market "suffers a distinct injury considered "[i]rrespective of consumer injury," and "has clear standing to challenge the conduct of rival(s) that . . . tends to exclude competitors from the market." *Andrx Pharm., Inc. v. Biovail Corp. Int'l, 256 F.3d 799, 816 (D.C. Cir. 2001)*.

Here, UAS does not lack standing **[*49]** and has adequately pleaded injury. UAS claims antitrust injury in the form of lost profits it would have earned but for its exclusion from the market, which is the type of injury antitrust laws were intended to prevent and which flows directly from the combined efforts of Superior and Parkland to deny claims. *Cf. Norris, 500 F.3d at 465*. Although Superior argues that suppliers to direct market participants cannot seek recovery because their injuries are too indirect to be considered "antitrust injuries," (Docket Entry 129, at 11, citing *Serfecz, 67 F.3d at 597*), UAS has plead that Superior and its co-conspirators' allegedly unlawful conduct was specifically directed against UAS: accordingly, the injuries, far from being indirect, are a direct result of the conspirators allegedly anticompetitive conduct. *See Allergy & Asthma Network, et al.*, No. 5:14-cv-35-OLG, at *28 (reaching similar conclusion).

As for "proper plaintiff' status, courts determine whether a plaintiff is a "proper plaintiff' by considering "such facts as (1) whether the plaintiffs injuries or their causal link to the defendant are speculative, (2) whether other parties have been more directly harmed, and (3) whether allowing this plaintiff to sue would risk multiple lawsuits, **[*50]** duplicative recoveries, or complex damage apportionment." *Norris. 500 F.3d at 465* (quoting *McCormack v. Nat'l Collegiate Athletic Ass'n, 845 F.2d 1338, 1341 (5th Cir. 1988))*. Here, the injuries UAS alleges are not speculative. Moreover, they are unique to UAS, such that no other parties are "more directly harmed" and there is no risk of duplicative recoveries. *See Andrx Pharm., Inc., 256 F.3d at 816* (when plaintiffs "alleged injury is not derived from or measured by the injury to consumers" but is instead measured by lost profits it would have realized had it not been excluded from market, injuries are distinct from those recoverable by other potential plaintiffs).

For all these reasons, UAS has adequately pleaded an antitrust violation, and Superior's *Rule 12(b)(6)* claim fails.

V. Conclusion and Recommendation.

Based on the foregoing, I recommend that Defendant's Motion to Dismiss Plaintiffs' Second Amended Complaint (Docket Entry 116) be **GRANTED IN PART** and **DENIED IN PART**. Defendant's motion should be **DENIED** as to the Sherman Act and Texas Free Enterprise and Antitrust Act claims, as well as the civil conspiracy claim derivative of those claims and the derivative requests for injunctive and declaratory relief. It should be **GRANTED** as to tortious interference claims and to the civil conspiracy claim derivative of that claim, and as to **[*51]** the request for injunctive and declaratory relief based on tortious interference.

VI. Instructions for Service and Notice of Right to Object.

The United States District Clerk shall serve a copy of this Report and Recommendation on all parties by either (1) electronic transmittal to all parties represented by attorneys registered as a "filing user" with the clerk of court, or (2) by mailing, a copy to those not registered by certified mail, return receipt requested. Written objections to this Report and Recommendation must be filed **within fourteen (14) days** after being served with a copy of same, unless this time period is modified by the district court. *28 U.S.C. § 636(b)(1)*; *Fed. R. Civ. P. 72(h)*. The party shall file the objections with the clerk of the court, and serve the objections on all other parties. A party filing objections must specifically identify those findings, conclusions or recommendations to which objections arc being made and the basis for such objections: the district court need not consider frivolous, conclusive or general objections. A party's failure to tile written objections to the proposed findings, conclusions and recommendations contained in this report shall bar the party from a *de novo* determination **[*52]** by the district court. *Thomas v. Arn, 474 U.S. 140,149-52, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *Acuña v. Brown & Root, Inc., 200 F.3d 335,340 (5th Cir. 2000)*. Additionally, failure to file timely written objections to the proposed findings, conclusions and recommendations contained in this Report and Recommendation shall bar the aggrieved party, except upon grounds of plain error, from attacking on appeal the unobjected-to proposed factual findings and legal conclusions accepted by the district court. *Douglass v. United Servs. Auto. Ass'n, 79 F.3d 1415. 1428-29 (5th Cir. 1996)* (en bane).

SIGNED on May 4, 2020.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN1[] **Prerequisites for Class Action, Commonality**

A plaintiff who seeks certification of a class action under *Fed. R. Civ. P. 23(b)(3)* bears the burden of satisfying the requirements of *Rule 23(a)*—numerosity, commonality, typicality, and adequacy of representation—as well as those of *Rule 23(b)(3)*: (1) that the questions of law or fact common to class members predominate over any questions affecting only individual members' and (2) that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. In addition to these enumerated requirements, the Second Circuit has recognized an implied requirement of ascertainability in *Rule 23*. A plaintiff must establish each *Rule 23* requirement by a preponderance of the evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN2[] Class Actions, Certification of Classes

A court may certify a class action only if it concludes, after a rigorous analysis, that the proposed class meets the requirements of *Fed. R. Civ. P. 23(a)* and *(b)*. Such analysis may entail some overlap with the merits of the plaintiff's underlying claim. But courts may decide merits issues at class certification only to the extent they are relevant to the application of *Rule 23*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN3[] Prerequisites for Class Action, Numerosity

Fed. R. Civ. P. 23(a)(1) requires a class to be so numerous that joinder of all members is impracticable. In the Second Circuit, numerosity is presumed for classes of 40 or more.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN4[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(a)(2) requires that there be questions of law or fact common to the class. A question is common to the class if it is capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke. Consideration of the commonality requirement obligates a district court to determine whether class members have suffered the same injury. Where the same conduct or practice by the same defendant gives rise to the same kind of claims from all class members, there is a common question.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN5[] Deceptive & Unfair Trade Practices, State Regulation

In an antitrust case alleging overcharges, the typical measure of damage is the difference between the price that was actually charged and the price that a consumer would have been charged in the but-for world.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN6[] Prerequisites for Class Action, Typicality

Fed. R. Civ. P. 23(a)(3) requires a finding that the claims or defenses of the representative parties are typical of the claims or defenses of the class. When it is alleged that the same unlawful conduct was directed at or affected both the named plaintiff and the class sought to be represented, the typicality requirement is usually met irrespective of minor variations in the fact patterns underlying individual claims.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN7[] **Prerequisites for Class Action, Adequacy of Representation**

Fed. R. Civ. P. 23(a)(4) requires that the representative parties will fairly and adequately protect the interests of the class. To determine if this requirement is met, courts must inquire into whether a (1) plaintiff's interests are antagonistic to the interest of other members of the class and (2) plaintiff's attorneys are qualified, experienced and able to conduct the litigation. This process serves to uncover conflicts of interest between named parties and the class they seek to represent.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN8[] **Class Actions, Certification of Classes**

The predominance and superiority requirements of *Fed. R. Civ. P. 23(b)(3)* ensure that the class will be certified only when it would achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN9[] **Class Actions, Certification of Classes**

A district court may certify a class under *Fed. R. Civ. P. 23(b)(3)* only if the questions of law or fact common to class members predominate over any questions affecting only individual members. Therefore, the predominance criterion is far more demanding than *Rule 23(a)*'s commonality requirement. A plaintiff satisfies the requirement by showing that: (1) resolution of any material legal or factual questions can be achieved through generalized proof, and (2) these common issues are more substantial than the issues subject only to individualized proof.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Evidence > Burdens of Proof > Allocation

HN10[] **Prerequisites for Class Action, Predominance**

Predominance is a comparative standard. A court must give careful scrutiny to the relation between common and individual questions in a case. An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN11[] **Class Actions, Certification of Classes**

The predominance inquiry asks whether the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues. The analysis is more qualitative than quantitative. The essential question is whether the proposed class is sufficiently cohesive to warrant adjudication by representation.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Remedies, Damages**

Determining whether common questions of law or fact predominate begins, of course, with the elements of the underlying cause of action. To establish a claim under the antitrust laws, a plaintiff must prove (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN13[] **Prerequisites for Class Action, Predominance**

Predominance is a test readily met in certain cases alleging violations of the antitrust laws. Where plaintiffs were allegedly aggrieved by a single policy of the defendant and there is strong commonality of the violation and the harm, this is precisely the type of situation for which the class action device is suited.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN14[] **Class Actions, Certification of Classes**

The U.S. Supreme Court and the Second Circuit have recognized that the existence of uninjured plaintiffs does not bar class certification.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN15[] **Standing, Elements**

To satisfy U.S. Const. art. III standing, a class member must have been affected in a personal and individual way, but the member need not be capable of sustaining a valid cause of action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN16[] **Class Actions, Certification of Classes**

The U.S. Supreme Court and Second Circuit have never suggested that a certain percentage or number of uninjured plaintiffs would automatically bar class certification. And the Seventh Circuit explicitly eschewed such an approach. It has held that a class may be certified unless it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant. And it later made clear that there is no precise measure for a great many, the determination of which is a matter of degree, and will turn on the facts as they appear from case to case. Beyond percentages, the number of uninjured class members in relationship to the size of the class also may matter.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN17[] **Class Actions, Certification of Classes**

District courts in the Second Circuit and other Circuits have held that a class may be certified so long as a de minimis number of class members were uninjured or, conversely, virtually all class members were injured. Although the concept of de minimis is not well defined, one court recently suggested that 5% to 6% constitutes the outer limits of a de minimis number of uninjured class members.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] **Standing, Requirements**

To decide if the class contains only a de minimis number of uninjured plaintiffs, the court must evaluate the methodology evidence to determine whether "no reasonable juror could have believed" it. Or, as other courts have framed it, the court must determine whether plaintiffs have advanced a workable methodology to demonstrate that antitrust injury can be proven on a class-wide basis.

Evidence > Types of Evidence > Documentary Evidence > Affidavits

HN19[] **Documentary Evidence, Affidavits**

Self-identifying affidavits are an accepted means to establish a class member's entitlement to recovery in class action litigation.

Evidence > Weight & Sufficiency

HN20[] **Evidence, Weight & Sufficiency**

The Second Circuit has accepted the use of representative evidence and statistical observations to prove classwide injury.

Civil Procedure > Pleading & Practice > Pleadings > Answers

HN21[] **Pleadings, Answers**

Defendants are not entitled to the benefit of the doubt when the very reason the court cannot know the answer to a question is because of their alleged wrongdoing.

Governments > Legislation > Statute of Limitations > Time Limitations

HN22[] **Statute of Limitations, Time Limitations**

Antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN23[] **Prerequisites for Class Action, Adequacy of Representation**

Speculative claims about class members' medical reaction to a non-existent drug cannot defeat class certification.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN24[] **Remedies, Damages**

The third and final element of an antitrust claim is damages.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN25[] **Class Actions, Certification of Classes**

Although a court must consider the fact that damages calculations will be individualized in the predominance analysis, class certification under *Fed. R. Civ. P. 23(b)(3)* does not require a court to conclude that damages are capable of measurement on a classwide basis. Further, where the legal and factual questions raised by the second element of an antitrust claim are common to the class, the predominance requirement of *Rule 23(b)(3)* is likely met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26[] **Class Actions, Certification of Classes**

The measure of overcharge damages in a RICO class action is straightforward.

Civil Procedure > Remedies > Damages > Compensatory Damages

HN27[] **Damages, Compensatory Damages**

The use of aggregate damages calculations is well established in federal court and implied by the very existence of the class action mechanism itself. The Second Circuit has accepted the use of aggregate classwide damages so long as they roughly reflect the harm caused to plaintiffs.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Evidence > Burdens of Proof > Allocation

HN28[] **Remedies, Damages**

Courts recognize that, given the inherent difficulty of identifying a but-for world, antitrust damages need not be measured with certainty. Rather, they must be demonstrated as a matter of just and reasonable inference, although the result be only approximate. If plaintiffs cannot prove their damages with precision, the most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created. For these reasons, the burden of proving antitrust damages is not as rigorous as in other types of cases.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN29[] **Class Actions, Certification of Classes**

In a motion for class certification, plaintiff bears the burden of providing an extensive analysis of state law variations to determine whether there are insuperable obstacles to class certification. Therefore, in such a case, the court must determine whether the variations in state case law "swamp" common legal issues and defeat the predominance requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN30[] **Prerequisites for Class Action, Predominance**

As the Second Circuit has held, variations in state laws do not necessarily prevent a class from satisfying the predominance requirement, so long as district courts do more than take the plaintiff's word that no material differences exist. Rather district courts themselves must undertake a considered analysis of the differences in state laws.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN31[] **Class Actions, Certification of Classes**

Curts must exercise care in conducting a choice-of-law analysis in a putative *Fed. R. Civ. P. 23(b)(3)* class action in order to determine whether any conflicts in governing law will overwhelm the ability of the trier of fact meaningfully to advance the litigation through classwide proof.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN32[] Federal & State Interrelationships, Erie Doctrine

When deciding matters of state law, a federal court generally must apply the choice-of-law principles of the state in which it sits.

Civil Procedure > Preliminary Considerations > Venue > Multidistrict Litigation

HN33[] Venue, Multidistrict Litigation

In a multidistrict litigation, the transferee court applies the choice of law rules of the state in which the action first was filed.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

Torts > Procedural Matters > Conflict of Law > Place of Injury

Torts > Procedural Matters > Conflict of Law > Significant Relationships

HN34[] Choice of Law, Significant Relationships

Unlike New York and California, Texas applies the "most significant relationship" test. This includes numerous factors to consider when determining which state has the most significant relationship to a case. The factors vary somewhat in importance from one field of law to another, and additional factors apply when considering tort claims. Under this analysis, the applicable law will usually be the local law of the state where the injury occurred.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

Torts > Procedural Matters > Conflict of Law > Place of Injury

Torts > Procedural Matters > Conflict of Law > Significant Relationships

HN35[] Choice of Law, Significant Relationships

The "most significant relationship" general factors include: (a) the needs of the interstate and international systems, (b) the relevant policies of the forum, (c) the relevant policies of other interested states and the relative interests of those states in the determination of the particular issue, (d) the protection of justified expectations, (e) the basic policies underlying the particular field of law, (f) certainty, predictability, and uniformity of result, and (g) ease in the determination and application of the law to be applied. The additional factors applicable to tort cases include: (a) the place where the injury occurred, (b) the place where the conduct causing the injury occurred, (c) the domicile, residence, nationality, place of incorporation and place of business of the parties, and (d) the place where the relationship, if any, between the parties is centered. These contacts are to be evaluated according to their relative importance with respect to the particular issue.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

Torts > Procedural Matters > Conflict of Law > Governmental Interests

Torts > Procedural Matters > Conflict of Law > Place of Injury

Torts > Procedural Matters > Conflict of Law > Significant Relationships

HN36[] **Choice of Law, Governmental Interests**

Under the government interest analysis, if conflicting conduct-regulating laws are at issue, the law of the jurisdiction where the tort occurred will generally apply because that jurisdiction has the greatest interest in regulating behavior within its borders.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN37[] **Class Actions, Certification of Classes**

The United States District Court for the District of Minnesota has expressly found that plaintiffs need not prove class-wide fact of injury or individual damages at the class certification stage, but only a viable method for doing so.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN38[] **Remedies, Damages**

In the context of proof of antitrust impact, in Michigan, the inability to show injury as to a few does not defeat class certification where the plaintiffs can show widespread injury to the class.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN39[] **Standing, Requirements**

In the context of proof of antitrust impact, the law in Florida does not support a heightened standard.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN40[] **Deceptive & Unfair Trade Practices, State Regulation**

Vermont's Consumer Protection Act, *Vt. Stat. Ann. tit. 9, §§ 2453* requires, in addition to elements common to the other consumer protection claims, that the claimed deception must be material, that is, likely to affect the consumer's conduct or decision regarding the product.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN41[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(b)(3) permits class certification only where a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. The Rule provides a list of factors to be considered in this assessment: (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and(D) the likely difficulties in managing a class action. Fed. R. Civ. P. 23(b)(3)(A)-(D).

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

Evidence > Burdens of Proof > Allocation

HN42[] Class Actions, Prerequisites for Class Action

In the Second Circuit, the ascertainability doctrine requires only that a class be defined using objective criteria that establish a membership with definite boundaries.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Class Attorneys > Appointments

HN43[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23(g) requires the court to appoint class counsel at the time of certification. In doing so, the court must consider: (i) the work counsel has done in identifying or investigating potential claims in the action; (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class. Fed. R. Civ. P. 23(g)(1)(A)(i)-(iv).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN44[] Class Actions, Certification of Classes

When a court certifies a Fed. R. Civ. P. 23(b)(3) class, Rule 23(c)(2)(B) provides that the court must direct to class members the best notice practicable under the circumstances, including individual notice to all members who can be identified through reasonable effort.

Opinion

[*7] OPINION AND ORDER ON END-PAYOR PLAINTIFFS' MOTION FOR CLASS CERTIFICATION

GERSHON, United States District Judge:

I. INTRODUCTION

This case, brought as a class action, involves allegations that defendant Allergan, Inc., a pharmaceutical company, took several unlawful actions to delay the market entry of generic versions of its product Restasis (cyclosporine ophthalmic emulsion). The named plaintiffs are entities that provide prescription drug coverage for Restasis to their members.[1] These End-Payor Plaintiffs ("plaintiffs" or "EPPs") allege that, if a generic version of Restasis had entered the market, it would have cost significantly less than what they paid for brand Restasis **[**10]** and that they were damaged by paying overcharges. EPPs now seek certification under *Federal Rules of Civil Procedure 23(a)* and *23(b)(3)* of a class of all end-payors, including consumers. For the reasons set forth below, plaintiffs' motion for class certification is granted.

Plaintiffs also move under *Federal Rule of Evidence 702* to exclude the testimony of two of defendant's expert witnesses offered on this motion. Today, I separately issue a decision granting those motions (the "Daubert Decision").

II. BACKGROUND

A. Factual Background

---

[1] The named plaintiffs are 1199SEIU National Benefit Fund; 1199SEIU Greater New York Benefit Fund; 1199SEIU National Benefit Fund for Home Care Workers; 1199SEIU Licensed Practical Nurses Welfare Fund; American Federation of State, County, and Municipal Employees District Council 37 Health and Security Plan; Fraternal Order of Police, Miami Lodge 20, Insurance Trust Fund; Ironworkers Local 383 Health Care Plan; Self-Insured Schools of California; Sergeants Benevolent Association Health & Welfare Fund; St. Paul Electrical Workers' Health Plan; and United Food and Commercial Workers Unions and Employers Midwest Health Benefits Fund.

I presume familiarity with EPPs' allegations, which are set forth in my decision **[*9]** denying defendant's motion to dismiss for lack of causation. *See* *In re Restasis (Cyclosporine Ophthalmic Emulsion) Antitrust Litig., 333 F. Supp. 3d 135 (E.D.N.Y. 2018)*. I will summarize them briefly.

Restasis, an oil-in-water emulsion containing the active ingredient cyclosporine, is prescribed by doctors to treat dry-eye disease. It is an extremely successful drug, with annual sales of over $1.5 billion. Plaintiffs allege that, to maintain its monopoly on Restasis after its patents for the drug expired on May 17, 2014, Allergan worked to delay approval by the Food and Drug Administration ("FDA") of generic versions of Restasis by (1) filing sham citizen petitions with the FDA; (2) defrauding the U.S. Patent and Trademark Office into issuing second **[**11]** wave patents for Restasis; (3) using those patents to file baseless patent infringement lawsuits against generic drug makers; and (4) frustrating attempts to invalidate its patents by selling them to the Saint Regis Mohawk Tribe, which licensed them back, in order to rent the Tribe's sovereign immunity.

EPPs claim that defendant's efforts allowed it to maintain a monopoly on Restasis after its patents expired. They allege that Allergan had a strong incentive to foreclose generic entry because, once a generic enters the market, there is a quick and dramatic reduction in sales of the brand drug.

The proliferation of generic drugs was spurred by the passage of the *Drug Price Competition and Patent Term Restoration Act of 1984 (the "Hatch-Waxman Act"), 98 Stat. 1585*, which changed the terms under which generic products could enter the market and compete with brand drugs. Since the Hatch-Waxman Act's introduction, there has been a rapid increase in drugs' generic penetration rates—that is, the rates at which consumers purchase generic equivalents to brand name drugs when such an option is available. Between 2008 and 2013, the average generic penetration rate increased from 91 to 97 percent for all prescriptions, **[**12]** and it remained at 97 percent from 2013 to 2017.

It is not disputed that generic drugs are favored because they are generally much cheaper than their brand name counterparts. Between 2011 and 2013, within eight months of their market entry, generic drugs cost an average of 74 percent less than the price of the corresponding brand drug before generic entry; they cost 90 percent less within two and a half years of entry.

The American health care system incentivizes consumers' purchase of generic drugs. All states but one have laws that either require or permit a pharmacist who is filling a prescription for a brand drug to substitute an equivalent generic when available. Higher dispensing fees and performance targets encourage pharmacists to take advantage of these laws and substitute generic drugs when possible. Health insurance plans and pharmacy benefit managers (PBMs), which many plans hire to administer their prescription drug programs, also promote the use of generics, mostly through tiered formularies that assign lower copayments or coinsurance to generic drugs compared to their brand equivalents.

The FDA has not yet approved a generic version of Restasis.

B. Procedural Background

[13]** This multi-district litigation was transferred to me in January 2018.[2] On April 4, 2018, I appointed Eric B. Fastiff of Lieff Cabraser Heimann & Bernstein, LLP; Dena C. Sharp of Girard Sharp LLP; and Joseph R. Saveri of Joseph Saveri Law Firm, Inc. as End-Payor Interim Co-Lead Counsel, and I appointed Dan Drachler of Zwerling,

---

[2] In addition to EPPs, the litigation includes other groups of plaintiffs. While the motion for class certification of the Direct Purchaser Plaintiffs ("DPPs") was pending, they announced that they and Allergan had agreed to a class settlement which awaits the court's approval. Another group of plaintiffs—referred to as the Retailer Plaintiffs—are DPPs who, in effect, opted out of the class action and also recently reached a settlement with Allergan. Finally, three entities proceeding as assignees of claims held by indirect purchasers—MSP Recovery Claims, Series LLC; MSPA Claims 1, LLC; and MAO-MSO Recovery II, LLC, Series PMPI—jointly filed a complaint in this court on May 3, 2019. These plaintiffs and defendant agreed to stay that action until I issue a ruling on EPPs' class certification motion.

Schachter & Zwerling, LLP as Interim Liaison Counsel. EPPs filed a Consolidated Class **[*10]** Action Complaint on that same day. Because *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, precludes EPPs from asserting federal damages claims under federal ***antitrust law***, they bring their claims exclusively under various state antitrust and consumer protection laws.[3]

On September 18, 2018, I denied Allergan's motion to dismiss plaintiffs' complaint for failure to allege causation. *In re Restasis, 333 F. Supp. 3d at 160*. And on November 13, 2018, I granted in part and denied in part defendant's motion to dismiss certain of plaintiffs' state law claims. *In re Restasis (Cyclosporine Ophthalmic Emulsion) Antitrust Litig., 355 F. Supp. 3d 145, 162 (E.D.N.Y. 2018)*. EPPs filed a Corrected First Amended Consolidated Class Action Complaint on December 20, 2018, in which they incorporated my rulings on defendant's motion to dismiss and added new state law claims.

On April 10, 2019, with discovery nearly complete, EPPs moved to certify the following class:

> All persons or entities who indirectly purchased, paid and/or provided reimbursement for some or all of the purchase price for Restasis, other than for resale, in Arizona, Arkansas, California, Colorado, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine*, Massachusetts*, Michigan, Minnesota, Mississippi, Missouri*, Montana*, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont*, West Virginia, and Wisconsin from May 1, 2015,[4] through the present (in the case of Arkansas **[**14]** only, July 31, 2017), for consumption by themselves, their families, or their members, employees, insureds, participants, or beneficiaries.

The states marked with an asterisk are those in which EPPs assert claims only on behalf of people, not corporations.

The proposed class includes insured consumers, uninsured consumers ("cash payors"), and third-party payors ("TPPs"). TPPs are entities that pay or provide reimbursement for all or some of the cost of a drug for people whom they insure. Consumers covered by a health insurance plan offered by a TPP pay a portion of a prescribed drug's cost either through coinsurance or a copayment; the TPP pays the remainder.

EPPs have excluded the following from the proposed class:

> Allergan, its officers, directors, employees, subsidiaries, and affiliates; all federal and state government entities except for cities, towns, municipalities, or counties with self-funded prescription drug plans; all persons or entities who purchased Restasis for purposes of resale or directly from Allergan or its affiliates; fully insured health plans, *i.e.*, plans that purchased insurance covering 100 percent of their reimbursement obligations to members; any "flat copay" **[**15]** consumers who purchased Restasis only via a fixed dollar copayment that does not vary on the basis of the drug's status as brand or generic; PBMs; and all judges assigned to this case and any members of their immediate families.

Although not suggested by EPPs, I will also exclude all members of the chambers staff of all judges assigned to this case as well as those staff members' immediate families.

Plaintiffs' class certification motion generated extensive briefing, initially resulting in seven submissions. As discussed in the Daubert Decision, plaintiffs also filed two separate motions challenging the admissibility of **[*11]**

---

[3] EPPs also brought claims for injunctive relief under the *Clayton Act* and for declaratory relief under the *Sherman Act*. They withdrew these federal claims in their class certification motion. This court retains jurisdiction over this action under the ***Class Action Fairness Act of 2005***, which grants federal district courts original jurisdiction over "any civil action in which [] the matter in controversy exceeds the sum or value of $5,000,000, exclusive of interest and costs, and is a class action in which . . . any member of a class of plaintiffs is a citizen of a State different from any defendant." *28 U.S.C. § 1332(d)(2)*.

[4] Plaintiffs originally sought certification of a class period that begins on May 17, 2014, the date the Restasis patents expired. But EPPs clarified at oral argument that the class period should begin on May 1, 2015, as a result of the conclusions of one of their merits experts that a reasonable date for generic entry would have been in May 2015.

evidence proffered by Dr. Laura Masselam Hatch and Dr. Kyriakos (Ken) Mandadakis—two experts Allergan relied on to oppose class certification.

On September 6, 2019, I granted defendant's request for an evidentiary hearing on class certification. At the hearing, which occurred during full day sessions on September 26 and September 27, 2019, I heard testimony from all six of the parties' experts—Todd Clark, Laura R. Craft, and Dr. Richard G. Frank for plaintiffs, and Dr. Hatch, Dr. James W. Hughes, and Dr. Mandadakis for defendant.

On October 23, 2019, I heard extensive oral **[**16]** argument on EPPs' three motions. At the proceeding, I also requested that the parties provide supplemental briefing addressing several issues relating to plaintiffs' state law claims, as described below.

As in many antitrust class actions, EPPs' ability to achieve class certification depends on whether they can satisfy *Rule 23(b)*'s predominance requirement by showing that individualized inquiries into the elements of injury-in-fact and damages will not overwhelm the common issues. Plaintiffs rely on the analysis of Dr. Frank, principally, and also on that of Ms. Craft to show that they can prove the element of injury-in-fact through common evidence and the element of damages through substantially common evidence. Dr. Frank's analysis predicts the conditions of the but- for world—a hypothetical world free of defendant's alleged anticompetitive actions. Defendant's critiques of Dr. Frank's analysis are at the heart of its opposition to class certification.

III. LEGAL STANDARD

HN1[] A plaintiff who seeks certification of a class action under *Rule 23(b)(3)* bears the burden of satisfying the requirements of *Rule 23(a)*—numerosity, commonality, typicality, and adequacy of representation—as well as those of *Rule 23(b)(3)*: (1) that "'the questions **[**17]** of law or fact common to class members predominate over any questions affecting only individual members'" and (2) that "'a class action is superior to other available methods for fairly and efficiently adjudicating the controversy.'" *In re Petrobras Sec., 862 F.3d 250, 260 (2d Cir. 2017)* (quoting *Fed. R. Civ. P. 23(b)(3)*). In addition to these enumerated requirements, the Second Circuit has recognized an "implied requirement of ascertainability" in *Rule 23*. *Brecher v. Republic of Argentina, 806 F.3d 22, 24 (2d Cir. 2015)*. A plaintiff must establish each *Rule 23* requirement by a preponderance of the evidence. *Johnson v. Nextel Communs., Inc., 780 F.3d 128, 137 (2d Cir. 2015)*.

HN2[] A court may certify a class action only if it concludes, after a "rigorous analysis," that the proposed class meets the requirements of *Rule 23(a)* and *(b)*. *Comcast Corp. v. Behrend, 569 U.S. 27, 33-34, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (internal quotation marks omitted). Such analysis may "entail some overlap with the merits of the plaintiff's underlying claim." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 351, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*; *accord* *Brown v. Kelly, 609 F.3d 467, 476 (2d Cir. 2010)*. But courts may decide merits issues at class certification "only to the extent [] they are relevant to" the application of *Rule 23*. *Amgen Inc. v. Conn. Ret. Plans & Trust Funds, 568 U.S. 455, 466, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*.

IV. ANALYSIS

A. Requirements of *Rule 23(a)*

1. Numerosity

HN3[] *Rule 23(a)(1)* requires a class to be "so numerous that joinder of all members is impracticable." In the Second Circuit, numerosity is presumed for classes of 40 or more. *Consol. Rail Corp. v. Town of Hyde Park, 47 F.3d 473, 483 (2d Cir. 1995)*. Plaintiffs estimate that the class includes between 30,000 and 40,000 TPPs and over one million consumers. The numerosity requirement **[**18]** is satisfied.

2. Commonality

HN4[] *Rule 23(a)(2)* requires that there be "questions of law or fact common to the class." A question is common to the class if it is "capable of classwide resolution—which means that determination of its truth or falsity **[*12]** will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart, 564 U.S. at 350*. Consideration of the commonality requirement obligates a district court to determine whether class members have "suffered the same injury." *Id. at 349-50* (internal quotation marks omitted). "Where the same conduct or practice by the same defendant gives rise to the same kind of claims from all class members, there is a common question." *Johnson, 780 F.3d at 137-38* (internal quotation marks omitted).

EPPs' proposed trial plan makes clear that there are a host of common issues of both law and fact.[5] Plaintiffs will attempt to show through common proof that Allergan willfully maintained monopoly power by engaging in anticompetitive conduct; that such conduct delayed market entry of generic Restasis; that absent Allergan's unlawful actions, multiple generic manufacturers would have entered the market; and that the relevant market is Restasis and generic versions of the drug. In addition, EPPs proffer that **[**19]** they will prove classwide injury by showing that consumers and TPPs pay significantly less for generic drugs than they do for brand drugs, with Restasis being no exception, and that many institutional mechanisms promote or require the substitution of less expensive generic drugs for brand versions once a generic drug enters the market.

Plaintiffs further intend to establish classwide damages by presenting evidence of generic Restasis' penetration rate and price in the but-for world as well as the number of Restasis prescriptions purchased during the class period. Using this common proof, the jury would then be asked to decide whether it found that the class paid more for Restasis than it would have paid if generic Restasis had been available and, if so, how much.[6]

Finally, EPPs' proposed claims administration process relies extensively on data collected from common sources in the pharmaceutical industry to identify plaintiffs, exclude uninjured ones, and allocate individualized damages. In a thorough, uncontested report, Ms. Craft, EPPs' expert who specializes in pharmaceutical data management and analysis, showed that, for every purchase of Restasis, data is available to discern **[**20]** who bought it, who paid for it, and how much every payor paid.[7] This is because each prescription drug purchase generates detailed and

---

[5] EPPs and DPPs submitted, with their respective class certification motions, proposed trial plans, both of which contemplated joint trials. On September 25, 2019, I ordered EPPs, DPPs, and Retailer Plaintiffs to meet and confer about their plans and to provide additional detail as to how they intend to try their cases to avoid inconsistent verdicts. The plaintiffs then jointly submitted a plan proposing bifurcated trials at which all plaintiffs would present, to one jury, common evidence to show that Allergan violated the laws at issue and delayed the entry of generic Restasis. Next, depending on the jury's findings, there would be separate trials on impact and damages. The plaintiffs proposed bifurcation to satisfy *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 491-94, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, which prohibits the admission at a direct purchaser trial of evidence that they may have passed on their overcharges to other parties, including end-payors. Retailer Plaintiffs have settled and, assuming I approve DPPs' proposed settlement, I expect EPPs to adjust their trial plan accordingly.

[6] ***HN5***[] In an antitrust case alleging overcharges, the typical measure of damage is the difference between the price that was actually charged and the price that a consumer would have been charged in the but-for world. *In re Rail Freight Fuel Surcharge Antitrust Litig., 292 F. Supp. 3d 14, 101 (D.C.C. 2017)*, *aff'd*, *934 F.3d 619, 443 U.S. App. D.C. 86 (D.C. Cir. 2019)*.

[7] Ms. Craft is the president of OnPoint Analytics, Inc., which provides data analytics for complex litigation. In many antitrust class actions, including those involving the pharmaceutical industry, she has developed databases of discrete transactions from multiple data sources, and she has used them to identify and remove class members who were uninjured or subject to specific exclusions.

Although defendant does not challenge her credentials, I note that a court recently denied a motion to exclude Ms. Craft's opinion. *See* *In re Loestrin 24 Fe Antitrust Litig., 410 F. Supp. 3d 352, 386 (D.R.I. 2019)* ("[Ms. Craft] is highly experienced in pharmaceutical data management and compilation for complex litigation. She has worked closely - and managed those working uniform data, including the product purchased, the patient's name and insurance plan, the TPP's identity, and the amounts **[*13]** paid by the consumer and the TPP. Indeed, data sets from the top seven PBMs and the 15 largest pharmacy operators alone would offer data for up to 97 to 99 percent of U.S. prescription drug sales. This data can be organized relatively easily because the industry uses a uniform coding system.

In sum, EPPs' proposed methodology to try this case is replete with common evidence, and the commonality requirement is easily met here. *See, e.g., In re Loestrin, 410 F. Supp. 3d at 397*; *In re Flonase Antitrust Litig., 284 F.R.D. 207, 217 (E.D. Pa. 2012)*.

3. Typicality

HN6[] *Rule 23(a)(3)* requires a finding that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." "When it is alleged that the same unlawful conduct was directed at or affected both the named plaintiff and the class sought to be represented, the typicality requirement is usually met irrespective of minor variations in the fact patterns underlying individual claims." *Robidoux v. Celani, 987 F.2d 931, 936-37 (2d Cir. 1993)*; *see also Brown, 609 F.3d at 475*. EPPs satisfy their burden here. The claims of all class **[**21]** members, whether named or unnamed, arise from the same alleged conduct and rest on similar legal arguments.

In a footnote in its final submission, Allergan argues that plaintiffs have not satisfied *Rule 23(a)*'s typicality and adequacy requirements. It claims that the named plaintiffs, which are all TPPs, are not "fulfilling their fiduciary duties to absent consumer class members" because they have requested that I certify a TPP-only class, if I conclude that the class's inclusion of consumers defeats *Rule 23(b)*'s predominance requirement.

Like the court in *Loestrin, 410 F. Supp. 3d at 398*, I reject this contention. EPPs have strenuously argued that I certify their entire class. Their alternative proposal shows that they are pragmatic and responsive to Allergan's arguments, not conflicted.

4. Adequacy of Representation

HN7[] *Rule 23(a)(4)* requires that "the representative parties will fairly and adequately protect the interests of the class." To determine if this requirement is met, courts must inquire into whether a "1) plaintiff's interests are antagonistic to the interest of other members of the class and 2) plaintiff's attorneys are qualified, experienced and able to conduct the litigation." *Cordes & Co. Fin. Servs. v. A.G. Edwards & Sons, 502 F.3d 91, 99 (2d Cir. 2007)* (internal quotation marks omitted). "This process 'serves to **[**22]** uncover conflicts of interest between named parties and the class they seek to represent.'" *Id.* (quoting *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 625, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*.

Other than the argument I rejected in the context of typicality, defendant does not challenge the named plaintiffs' or plaintiffs' counsel's adequacy. I find that the named plaintiffs are adequate class representatives and that class counsel are qualified, experienced, and able to conduct this litigation. There are no antagonistic interests between the named plaintiffs and the putative class or their counsel. Moreover, through my extensive observations of counsel, I am assured that they are well qualified to litigate this class action.

B. Requirements of *Rule 23(b)(3)*

Having found that plaintiffs meet *Rule 23(a)*'s requirements, I now must consider whether they have met the demands of *Rule 23(b)(3)*. ***HN8***[] That rule's predominance and superiority requirements "ensure[] that the class will be certified only when it would 'achieve economies of time, effort, and expense, and promote . . . uniformity of

---

closely - with pharmaceutical sales, marketing, and reimbursement data. The Court thus is convinced that she is knowledgeable about the types of data available, their presentation and formatting, and their use in analytical applications.").

decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.'" Cordes, 502 F.3d at 104 (quoting Amchem, 521 U.S. at 615).

It is at this point that Allergan's central opposition to class certification arises. **[**23]** Relying largely on the First Circuit's decision in In re Asacol Antitrust Litig., 907 F.3d 42 (1st Cir. 2018), Allergan contends that the proposed class contains large numbers of uninjured class members, that individualized inquiries are needed to cull the uninjured from the injured, and that these inquiries would overshadow the common questions of **[*14]** law or fact, compelling denial of class certification under Rule 23(b)(3).

1. Predominance

HN9[] A district court may certify a class under Rule 23(b)(3) only if "the questions of law or fact common to class members predominate over any questions affecting only individual members." Therefore, "the predominance criterion is far more demanding" than Rule 23(a)'s commonality requirement. Amchem, 521 U.S. at 623-24. A plaintiff satisfies the requirement by showing that: "(1) resolution of any material legal or factual questions can be achieved through generalized proof, and (2) these common issues are more substantial than the issues subject only to individualized proof." In re Petrobras, 862 F.3d at 270 (internal quotation marks and alterations omitted).

HN10[] "[P]redominance is a comparative standard[.]" Id. at 268. A court must "give careful scrutiny to the relation between common and individual questions in a case." Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. ___, 136 S.Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016). "An individual question is one where 'members **[**24]** of a proposed class will need to present evidence that varies from member to member,' while a common question is one where 'the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof.'" *Id.* (quoting 2 W. Rubenstein, Newberg on Class Actions § 4:50, at 196-97 (5th ed. 2012)) (alteration omitted). ***HN11***[] "The predominance inquiry 'asks whether the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues.'" *Id.* (quoting Newberg on Class Actions § 4:49, at 195-96). The analysis is "'more qualitative than quantitative.'" In re Petrobras, 862 F.3d at 271 (quoting Newberg on Class Actions, § 4:50, at 197) (alteration omitted). The essential question is whether the proposed class is "sufficiently cohesive to warrant adjudication by representation." Amchem, 521 U.S. at 623.

a) Elements of an Antitrust Claim

HN12[] Determining whether common questions of law or fact predominate "begins, of course, with the elements of the underlying cause of action." Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011). To establish a claim under the antitrust laws, a plaintiff must prove (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages. Cordes, 502 F.3d at 105 (internal quotation **[**25]** marks and alternations omitted).[8]

HN13[] "Predominance is a test readily met in certain cases alleging . . . violations of the antitrust laws." Amchem, 521 U.S. at 625. For, "where plaintiffs were 'allegedly aggrieved by a single policy of the defendant[]', and there is 'strong commonality of the violation and the harm,' this is 'precisely the type of situation for which the class action device is suited.'" Brown, 609 F.3d at 484 (quoting In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 146 (2d Cir. 2001)).

---

[8] Although EPPs raise only state law claims, the parties analyze the elements of a federal antitrust claim. This is because the state antitrust statutes generally adopt these same elements and require proof of injury-in-fact and damages—the elements at issue here. Below I separately address Allergan's arguments that differences in the state statutes cause individual issues to predominate.

Defendant also asserts that "[i]njury or impact" is an element of all of EPPs' consumer protection and unjust enrichment claims. EPPs have not argued otherwise, and thus I will assume for purposes of this motion that Allergan is correct.

Defendant does not dispute that EPPs will use common proof to attempt to prove the first element of an antitrust claim—a violation of ***antitrust law***—and this "concession does not eliminate a common issue from the predominance calculus." *See Cordes, 502 F.3d at 108* (internal quotation marks omitted). Indeed, as detailed above, every aspect of plaintiffs' allegations of anticompetitive conduct can be proven through common evidence, as these allegations focus exclusively on Allergan's actions and will not vary among class members. *See id. at 105*.

The second element of an antitrust violation presents two different questions. One is **[*15]** legal—whether the injury at issue "is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant['s] acts unlawful." *See Cordes, 502 F.3d at 106* (internal quotation marks omitted). **[**26]** It is uncontested that this question also will be answered through common proof—adding to the common proof in this case. *See id. at 108*. The second question—causation or "injury-in-fact," *id. at 106*—is the focus of defendant's arguments.

b) Whether, When Some Class Members Are Uninjured, Plaintiffs Can Show Injury-in-Fact Through Common Proof

EPPs have offered Dr. Frank's methodology to demonstrate that they can prove injury-in fact through common evidence. Dr. Frank is a professor of health economics at Harvard Medical School and a Research Associate at the National Bureau of Economic Research. From 2009 to 2016, he served in several senior capacities, including Assistant Secretary for Planning and Evaluation, at the U.S. Department of Health and Human Services. He has extensively studied, and published papers on, the economics of the pharmaceutical industry.

Dr. Frank used a commonly accepted two-step method to prove classwide injury-in-fact. *See Castro v. Sanofi Pasteur Inc., 134 F. Supp. 3d 820, 847-48 (D.N.J. 2015)* (collecting cases approving of the use of the same two-step model). This approach shows, first, that class members paid artificially inflated prices and, second, that "this price inflation occurred to substantially all class members." *Id. at 847*. Dr. Frank attempted to **[**27]** satisfy the second step by showing that generic Restasis would have achieved rapid and effective penetration of the market so that most purchases in the but-for world would have been for the generic.

Since a generic is not yet on the market, Dr. Frank lacked actual data regarding generic Restasis. He therefore used a yardstick approach to predict the price and penetration rate of generic Restasis in the but-for world. The approach examines the actual prices and quantities that occurred in a similar market that was not affected by defendant's behavior. Dr. Frank selected Pfizer's drug Xalatan, which is used to treat glaucoma, as his market yardstick. TPPs, insured consumers, and cash payors all paid significantly less for generic Xalatan than they had paid for Xalatan before generic entry. Additionally, the generic penetration rate for Xalatan averaged 94.3 percent over the damages period he measured.[9] Assuming that generic Restasis would have experienced the same penetration rate, Dr. Frank used common evidence to conclude that at least 94.3 percent of class members were injured by defendant's alleged conduct.

Based on his conclusion that 5.7 percent of prescriptions in the but-for world **[**28]** would have been for brand Restasis, Dr. Frank acknowledged that the class includes brand retainers—people who were uninjured because

---

[9] Dr. Frank measured damages from February 2016 (when he assumed for purposes of his analysis a generic would have entered in the but-for world) to January 2019 (the last month for which he had data). His methodology can be adjusted to reflect the damages period found by the jury.

For TPPs and insured customers, Xalatan's generic penetration rate was 92.2 percent after six months, 96.3 percent after 12 months, and 97.8 percent after two years. For cash payors, the generic penetration rate was 89.2 percent after six months, 91.9 percent after 12 months, and 94.8 percent after two years. These penetration rates are consistent with the rates observed in the industry as a whole.

they would have purchased only brand Restasis even with generic alternatives.[10] Plaintiffs assert that the existence of those consumers does not defeat their ability to show classwide impact.

Allergan disagrees. It argues first that, in the Second Circuit, a class simply cannot be certified if it contains uninjured plaintiffs. Alternatively, it argues that the uninjured plaintiffs in the proposed class are too numerous and cannot be eliminated through common proof, which will cause individualized issues to predominate over the many common issues to be decided.

[*16] (1) Whether a Class May Contain Uninjured Consumers

Allergan's first proposition is simply incorrect. ***HN14***[] The Supreme Court and the Second Circuit have recognized that the existence of uninjured plaintiffs does not bar class certification. In *Tyson Foods, 136 S.Ct. at 1044*, the Supreme Court affirmed certification of a class under the *Fair Labor Standards Act ("FLSA")* that contained over 200 uninjured class members.[11] *See* *Halliburton Co. v. Erica P. John Fund, Inc., 573 U.S. 258, 276, 134 S. Ct. 2398, 189 L. Ed. 2d 339 (2014)* (noting that predominance would still be satisfied if a class contained uninjured class members that "defendant might **[**29]** attempt to pick off" through individualized inquiries).

In *Seijas v. Republic of Argentina, 606 F.3d 53, 56-58 (2d Cir. 2010)*, the Second Circuit affirmed certification of eight classes of holders of defaulted Argentine bonds, expressing no concern that summary judgment briefing revealed that "[c]omplicated questions existed [] as to which bondholders were class members and as to how much each class member could recover." Similarly, in *Sykes v. Mel S. Harris & Assocs. LLC, 780 F.3d 70, 91 (2d Cir. 2015)*, the Court concluded that the possibility of uninjured plaintiffs did not defeat predominance "given the myriad common issues" in the case. And, in *Cordes, 502 F.3d at 95-97*, the Court, after reversing the district court's denial of class certification, remanded with instructions to the district court to reconsider whether the plaintiffs had satisfied *Rule 23(b)*'s predominance requirement even though the Court indicated that "[m]ore than ninety percent of" (and thus not all) class members were injured and the defendants argued that individualized inquiries were needed to determine whether each class member sustained antitrust injury-in-fact. *See also* *In re Petrobras, 862 F.3d at 259, 261* (reversing class certification and remanding for consideration in the predominance analysis of the potential need for individualized inquiries to determine if each class member purchased its Petrobras **[**30]** Note in a "domestic transaction," as required by the *Exchange Act* and the *Securities Act*).

Consistent with this precedent, district courts in this Circuit have certified classes that likely or certainly contained uninjured class members. *See* *Dial Corp. v. News Corp., 314 F.R.D. 108, 120 (S.D.N.Y. 2015)*; *In re Air Cargo Shipping Servs. Antitrust Litig., 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *44-45 (E.D.N.Y. Oct. 15, 2014)*, *adopted*, *2015 U.S. Dist. LEXIS 90402, 2015 WL 5093503 (E.D.N.Y. July 10, 2015)*; *In re Elec. Books Antitrust Litig., 2014 U.S. Dist. LEXIS 42537, 2014 WL 1282293, at *22 (S.D.N.Y. 2014)*; *In re Auction Houses Antitrust Litig., 193 F.R.D. 162, 166-67 (S.D.N.Y. 2000)*.

Circuit Courts in other circuits have also accepted that class certification does not require proof that all class members are injured. *Torres v. Mercer Canyons Inc., 835 F.3d 1125, 1136 (9th Cir. 2016)*; *Mims v. Stewart Title Guar. Co., 590 F.3d 298, 307-08 (5th Cir. 2009)*; *Kohen v. Pac. Inv. Mgmt. Co., 571 F.3d 672, 677 (7th Cir. 2009)*; *see* *In re Urethane Antitrust Litig., 768 F.3d 1245, 1254 (10th Cir. 2014)*, *aff'g*, *2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *2 (D. Kan. May 15, 2013)*; *In re Whirlpool Corp. Front-Loading Washer Prods. Liability Litig., 678*

---

[10] Allergan refers to these people as "brand loyalists." But, as Ms. Craft explained, powerful institutional factors, which are unrelated to a consumer's preference for a particular brand, drive brand retention rates. I will thus use the term "brand retention" instead of "brand loyalty."

[11] In its petition for certiorari, the employer, Tyson Foods, asked the Court to decide, among other things, "whether a class may be certified if it contains members who were not injured and have no legal right to any damages." *Id. at 1049* (internal quotation marks omitted). But, in its merits brief, Tyson Foods conceded that federal courts had the authority to certify such a class. *Id.*

F.3d 409, 420 (6th Cir. 2012), *vacated*, *569 U.S. 901, 133 S. Ct. 1722, 185 L. Ed. 2d 782 (2013)*, *reinstated*, 722 F.3d 838 (6th Cir. 2013), *cert. denied*, 71 U.S. 1196, 134 S.Ct. 1277, 188 L. Ed. 2d 298 (2014).

There is, in short, no support for defendant's contention that the mere existence of uninjured class members in this putative class compels denial of EPPs' motion.[12] I now will address each of the categories **[*17]** of class members that defendant alleges are uninjured. The first category, brand retainers, gives rise to the core disputes on this motion.

(2) Consumers Who Would Have Purchased Only the Brand in the But-For World

While defendant does not dispute that generic Restasis would have been cheaper than brand Restasis,[13] it claims there would have been more brand retainers than EPPs acknowledge, that Dr. Frank's methodology is unsound, and that individualized inquiries will therefore predominate. Relying on *Asacol*, Allergan **[**31]** further asserts that EPPs' proposal to use classwide proof to establish injury-in-fact violates its due process and *Seventh Amendment* rights to conduct individualized inquiries before the jury to identify each brand retainer, and that it also violates the *Rules Enabling Act*, which does not permit federal rules to "abridge, enlarge or modify any substantive right." *28 U.S.C. § 2072(b)*.

The parties vigorously dispute the percentage of prescriptions that brand Restasis would have retained in the but-for world, which they use to approximate the number of brand retainers. This dispute occupies the bulk of their briefing and was the focus of the witnesses' testimony at the evidentiary hearing.

While not abandoning its claim that the Second Circuit conditions class certification on a fully injured putative class, defendant asserts that it has not "staked its claims on the premise that *every single* class member must be uninjured for a class to be certified." Allergan's Sur-Reply in Further Opposition to End-Payor Plaintiffs' Motion for Class Certification at 3 n.7. It then notes that EPPs have not cited a case in the Second Circuit in which over four percent of class members were uninjured—referring to the certified class in *In re Air Cargo, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *55* **[**32]** .

The Supreme Court and Second Circuit, however, have never suggested that a certain percentage or number of uninjured plaintiffs would automatically bar class certification. And the Seventh Circuit explicitly eschewed such an approach. ***HN16***[] It has held that a class may be certified unless "it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant." *Kohen, 571 F.3d at 677*. And it later made clear that "[t]here is no precise measure for 'a great many,'" the determination of which is "a matter of degree, and will turn on the facts as they appear from case to case." *Messer v. Northshore Univ. HealthSystem, 669 F.3d 802, 825 (7th Cir. 2012)*; *see also* *In re Rail Freight, 292 F. Supp. 3d at 137-38* ("Beyond percentages, the number of uninjured class members in relationship to the size of the class also may matter.").

In any event, a review of the specific percentages addressed in other cases indicates that the percentage of uninjured class members proffered by EPPs here is well within the range that courts routinely accept. ***HN17***[]

---

[12] I also reject defendant's claim that *Denney v. Deutsche Bank AG, 443 F.3d 253, 264 (2d Cir. 2006)*, which held that a class must be defined to ensure that all class members have Article III standing, shows that the Second Circuit does not permit certification of a class containing uninjured members. ***HN15***[] To satisfy Article III standing, a class member must have been affected in a personal and individual way, but the member "'need not be capable of sustaining a valid cause of action.'" *Dubuisson v. Stonebridge Life Ins. Co., 887 F.3d 567, 574 (2d Cir. 2018)* (quoting *Denney, 443 F.3d at 264*). Here, because they purchased Restasis, all class members have standing—whether or not they paid an overcharge. *See* *Torres, 835 F.3d at 1137 n.6* (clarifying that *Denney*'s holding "signifies only that it must be possible that class members have suffered injury, not that they did suffer injury, or that they must prove such injury at the certification phase"). Notably, the *Asacol* Court found Article III standing satisfied there. *907 F.3d at 50-51*.

[13] The parties' experts disagree over the extent of the price differential, but that question will be resolved by the jury through the use of common evidence.

District courts in this and other Circuits have held that a class may be certified so long as a "*de minimis*" number of class members were uninjured or, conversely, "virtually all" class members were injured. *In re Rail Freight, 292 F. Supp. 3d at 134-35*; *In re Lidoderm Antitrust Litig., 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *11 (N.D. Cal. Feb. 21, 2017)*; *In re Air Cargo, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *44-45*. Although the concept of *de minimis* is not well defined, **[**33]** one court recently "suggest[ed] that 5% to 6% constitutes the outer limits of a *de minimis* number of uninjured class members." *In re Rail Freight, 292 F. Supp. 3d at 137* (comparing *In re Lidoderm, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *19*, **[*18]** and *In re Nexium (Esomeprazole) Antitrust Litig., 297 F.R.D. 168, 179 (D. Mass. 2013)*, *aff'd*, *777 F.3d 9 (1st Cir. 2015)*, with *Vista Healthplan, Inc. v. Cephalon, Inc., 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *20 (E.D. Pa. June 10, 2015))*; *see also* *Mayo v. USB Real Estate Sec., Inc., 2012 U.S. Dist. LEXIS 135454, 2012 WL 4361571, at *3 (W.D. Mo. Sept. 21, 2012)* (finding that a class where "at least 94%" of its members were injured was not overbroad, but declining class certification on other grounds). And recently the district court in *In re EpiPen (Epinephrine Injection, USP) Marketing, Sales Practices and Antitrust Litig., 2020 U.S. Dist. LEXIS 40975, 2020 WL 1180550, at *32-36 (D. Kan. Mar. 10, 2020)*, which involved, among other allegations, delayed generic entry, certified a class where the plaintiffs' expert concluded that approximately five percent of the consumers were uninjured. Conversely, the district court in *Rail Freight, 292 F. Supp. 3d at 141*, denied certification of a class in large part because at least 12.7 percent of its members were uninjured.

EPPs argue that Dr. Frank's methodology, which yielded a 5.7 percent brand retention rate, shows that only a *de minimis* number of plaintiffs were uninjured and that a finding of classwide injury-in-fact can be made. Indeed, they claim that the number of uninjured consumers is almost certainly lower than 5.7 percent. Because a consumer need incur only one overcharge to experience antitrust injury, an individual who purchased a single generic prescription in the but- for world—even if all of his or her other purchases **[**34]** were for the brand drug—was injured.[14] *See* *In re Nexium, 777 F.3d at 27*; *In re Rail Freight, 292 F. Supp. 3d at 136*; *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *15 (D. Ma. Oct. 16, 2017)*; *In re Air Cargo, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *45*.

HN18[] To decide if the class contains only a *de minimis* number of uninjured plaintiffs, I must evaluate Dr. Frank's methodology to determine whether "no reasonable juror could have believed" it. *Tyson Foods, 136 S.Ct. at 1049*; *see* *Comcast, 569 U.S. at 35* (criticizing lower court for not deciding whether the plaintiffs' "methodology was a just and reasonable inference or speculative" (internal quotation marks and alterations omitted)). Or, as other courts have framed it, I must determine whether EPPs have "advance[d] a workable methodology to demonstrate that antitrust injury can be proven on a class-wide basis." *See, e.g.,* *Dial Corp., 314 F.R.D. at 115*. I therefore must assess whether Dr. Frank's decision to use Xalatan as an analog (the source of his determination of the brand retention rate) was "sufficiently reliable to merit the court's consideration of it as proof common to the class." *In re Air Cargo, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *59*.

(a) Dr. Frank's Methodology to Predict But-For Brand Retention

As an initial matter, Allergan does not contest Dr. Frank's use of a yardstick approach to measure the but-for world—this is unsurprising as this approach is a generally accepted way to measure antitrust damages. *See, e.g.,* *SourceOne Dental, Inc. v. Patterson Cos., 2018 U.S. Dist. LEXIS 79291, 2018 WL 2172667, at *4 (E.D.N.Y. May*

---

[14] Defendant contests Dr. Frank's assertion that the percentage of patients remaining on the brand after generic entry would be lower than the percentage of brand prescriptions. Dr. Frank deemed Restasis a chronic condition, citing one study that listed the median duration of treatment as 23 months. Allergan claims that Dr. Frank misconstrued the facts, that the study he cites described a small set of people with an incurable eye disease, and that less than a quarter of patients remain on Restasis after 12 months. At oral argument, defendant also asserted that most consumers using the brand drug at the time of generic entry would have remained on the brand rather than switch to the generic. I need not resolve this dispute, as I find that class certification is appropriate even if 5.7 percent of consumers were uninjured. But I do note that defendant's own experts, whose expertise treating dry-eye disease EPPs have not challenged, testified that the disease "needs to be treated chronically," *see* Class Cert. Hr'g Tr. at 82 (Dr. Hatch), and that Restasis is "a lifelong treatment regimen," *id.* at 292 (Dr. Mandadakis).

10, 2018). Rather, Allergan takes issue with Dr. Frank's **[**35]** choice of Xalatan as a yardstick, contending that his conclusion that Restasis, like Xalatan, would have had a 5.7 percent brand retention rate "appears to be unreasonably low." Expert Report of Professor James W. Hughes ("Hughes Rep.") ¶ 72.

[*19] I will first state the obvious: neither side will ever prove whether its predictions are correct. The but-for world is, by definition, hypothetical. *See* *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)* ("The vagaries of the marketplace usually deny us sure knowledge of what plaintiff's situation would have been in the absence of the defendant's antitrust violation.").

Dr. Frank selected Xalatan as his market yardstick because it is also an ophthalmic product, it faced generic entry within the last 10 years, and it is featured in Allergan's own forecasting of generic entry as a useful analog. He also noted that Xalatan's generic penetration rate is consistent with the average penetration rates in the pharmaceutical industry.

The parties' arguments generally presume that a drug's generic penetration rate increases with the number of initial generic entrants.[15] In 2011, three generic versions of Xalatan initially entered the market nearly simultaneously, and a fourth entered approximately 18 months **[**36]** later.[16] Dr. Frank explained that his choice of Xalatan was conservative for two reasons. First, between 2011 and 2014, drugs with over $1 billion in sales in the year before generic entry averaged 8.9 generic entrants, while those with sales between $250 million and $1 billion averaged 4.9 generic entrants. With retail sales of at least $1.5 billion in the year before Dr. Frank's predicted generic launch date of February 2016,[17] Restasis falls into the former category. Xalatan, which had about $502 million in annual sales before generic entry, falls into the latter. Moreover, Xalatan had three generic entrants—fewer than the average drug with similar revenue. Second, the overall generic penetration rate in this country increased significantly after 2011. While Xalatan's generics launched in March 2011, EPPs proffer that a generic Restasis would not have entered the but-for world until 2015.[18]

Defendant's first line of attack on Dr. Frank's proposal is to offer the conclusions of its expert Dr. Hughes.[19] Dr. Hughes recently retired as the Thomas Sowell Professor of Economics at Bates College. He has served as an expert in numerous pharmaceutical antitrust cases.[20] Relying exclusively on the projections **[**37]** of Company A and Company B,[21] **[*20]** two large companies that intended to enter the generic Restasis market, Dr. Hughes

---

[15] Plaintiffs, through Ms. Craft's rebuttal report, offer a critique of this view. According to Ms. Craft, "the number of simultaneous generics may affect price discounts," but "its effect on the brand retention rate is not well established." Rebuttal Declaration of Laura R. Craft in Support of End-Payor Plaintiffs' Motion for Class Certification ("Craft Reb.") ¶ 74. According to her, "[t]he institutional mechanisms that drive generic adoption" can cause rapid generic penetration even with only one generic entrant. Craft Reb. ¶ 75.

[16] The exact contours of Xalatan's generic entry are not clear from the parties' submissions. According to Dr. Frank, there were initially five generic entrants, but the sales for two of them were small and quickly diminished to minimal level, so that the remaining three generic entrants accounted for 85 percent to nearly 100 percent of generic sales during the first two years. But, in a declaration submitted in the Restasis patent infringement litigation, David LeCause, Allergan's Vice President of U.S. Eye Care Sales, stated that four generics initially entered. Despite this confusion, at oral argument, counsel for both sides agreed that, for practical purposes, there were initially three generic entrants and a fourth entrant 18 months later.

[17] According to Dr. Frank, when adjusted to account for mail-order prescriptions, Restasis' sales were approximately $1.8 billion that year.

[18] Dr. Frank relied on these same factors to respond to defendant's criticism of his decision not to use as an analog Allergan's ophthalmic drug Alphagan P, which had only one generic entrant and higher brand retention than Xalatan. Dr. Frank explained that, in 2009, the year before Alphagan P lost exclusivity, its retail sales were only $188.8 million.

[19] I have excluded the challenged portions of defendant's other two witnesses, Dr. Hatch and Dr. Mandadakis. As I note in the Daubert Decision, however, even if I had found these experts' opinions admissible, they would not alter my decision on class certification.

[20] Although Dr. Hughes regularly serves as a defense witness in generic delay antitrust litigation, he has not published articles relevant to this topic.

concluded that at least 14 to 25 percent of Restasis prescriptions would have remained for the brand product in the but-for world.

In 2018, Company A forecasted that there would be three initial generic entrants, a fourth six months later, and a total of six after two years. It also predicted a brand retention rate that declined over time and leveled out at 14 percent after two years. Also in 2018, Company B predicted that brand Restasis would retain a steady 25 percent of the market throughout a five-year period. Company B's prediction of the number of generic entrants was unclear. A note on the forecast indicated that it would "only assume 1 - 2 enter," but, in a different section, the forecast appeared to predict three companies at launch and a fourth after six months.[22]

Dr. Hughes's prediction of brand retention does not demonstrate the unreliability of Dr. Frank's. Rather than doing any independent analysis, Dr. Hughes merely reasoned that, because the two companies whose forecasts he relied on were "deciding whether to invest the money to enter the market," he "would **[**38]** expect their work in the forecast[s] to be quite diligent." Class Cert. Hr'g Tr. at 241; *accord, e.g. id.* at 164. But there are reasons to question these forecasts' reliability. Indeed, Company A's representative testified that its forecasts are conservative to avoid overstating anticipated revenues. This may explain why the company predicted a generic entry rate almost identical to Xalatan's but a lower generic penetration rate.

As for Company B, although brand retention rates are known to decrease over time, that company forecasted that Restasis' brand retention rate would remain flat at 25 percent over five years. Dr. Hughes initially testified that the generic manufacturers' forecasts are "very serious" because "[t]hey try to take a lot of factors into account." *Id.* at 183. But, when asked about Company B's prediction of an unchanging rate, he speculated that the company "used very few assumptions and the more assumptions you use[,] the more assumptions that can be wrong." *Id.* at 267. Dr. Hughes's adherence to a forecast that does not reflect real world conditions, and a defense of it that defies his own economic principles, call into question his methodology.

Defendant also argues that Xalatan, a solution, is **[**39]** an inappropriate analog for Restasis, a complex emulsion. Plaintiffs do not dispute that emulsions are more complex than solutions and, as such, more difficult to reproduce by generic manufacturers. While Restasis' complex composition is not contested, the significance of the drug's composition on Restasis' but-for brand retention rate is.

Allergan asserts that Restasis' composition would have led to significant brand retention in the but-for world, making Xalatan an unrealistic analog. To support its position, it references a January 2019 statement from then-FDA Commissioner Scott Gottlieb that complex drugs, including eye drops, "are harder to 'genericize' under traditional approaches" and thus "often face less competition" and some industry analysts who predicted limited competition for Restasis because of its complexity.[23]

---

[21] I have excluded the names of these companies as confidential. However, this opinion reveals some facts about Allergan or third parties that Allergan has requested that I seal. *See* Motion to Redact and Seal Certain Documents Related to End-Payor Plaintiffs' Motion for Class Certification, Dkt. No. 456. Where it does so, it is because I have determined that the public's right—under the common law and the *First Amendment*—to understand the basis of my conclusions on a crucial motion in this litigation substantially outweighs the factors that favor sealing. *See* *Brown v. Maxwell, 929 F.3d 41, 47-51 (2d Cir. 2019)*; *Joy v. North, 692 F.2d 880, 893 (2d Cir. 1982)*; *Liberty Re (Bermuda) Ltd. v. Transamerica Occidental Life Ins. Co., 2005 U.S. Dist. LEXIS 9774, 2005 WL 1216292, at *6 (S.D.N.Y. May 23, 2005)*.

[22] At oral argument, EPPs' counsel asserted that Company B's representative confirmed that the company forecasted three initial entrants and a fourth six months later.

[23] Defendant cites *Statement from FDA Commissioner Scott Gottlieb, M.D., on 2019 Efforts to Advance the Development of Complex Generics to Improve Patient Access to Medicines*, Jan. 30, 2019, www.fda.gov/news-events/press-announcements/statement-fda-commissioner-scott-gottlieb-md-2019-efforts-advance-development-complex-generics; Jefferies, *Akorn (AKRX) ANDA to Restasis Disclosed; Could Become AKRX's Largest Opportunity—If Approved* (transmitted in an email dated July 16, 2015); and RBC Capital Markets, *Allergan, Inc.: Restasis Guidelines Major Setback; But AGN Still Attractive at Current Valuation*, June 24, 2013.

[*21] But, as EPPs note, Allergan **[**40]** has offered no empirical evidence showing that a drug's complexity influences its brand retention rate, let alone a metric by which to determine how much more complex Restasis is than Xalatan or, even more importantly, how much its complexity affects its generic penetration rate. And it certainly has not shown that the empirical factors Dr. Frank cites that influence generic entry—including the size of the brand drug's market before generic entry—are rendered irrelevant (or even less significant) in the context of a complex drug.

Allergan further criticizes Dr. Frank's reliance on the company's own internal forecasts of the effects of generic entry on Restasis, many of which used Xalatan as an analog, to support his selection of the drug. Defendant asserts that those forecasts accounted for factors that would have led to aggressive generic penetration in the actual world but would not have existed in the but-for world. It argues that Dr. Frank did not consider those differences when he conducted his analysis.

EPPs respond by casting doubt on the accuracy of defendant's claims that its forecasts all predicted aggressive generic entry, as some of the forecasts selected analog drugs with **[**41]** only one initial generic entrant. In any event, even if all of Allergan's forecasts predicted aggressive generic entry, there is no indication that they led Dr. Frank astray. With three initial generic entrants in 2011, Xalatan is hardly the "very aggressive" choice Dr. Hughes said it was. *See* Class Cert. Hr'g Tr. at 188. Perhaps the most powerful evidence of this comes from Dr. Hughes himself: Company A's forecast—which Dr. Hughes deemed an accurate measure of the but-for world—predicted a nearly identical pattern of generic entry as Xalatan's.[24]

Defendant also asserts that the conclusions of Dr. Jeffrey Leitzinger, DPPs' expert, regarding brand retention show why Dr. Frank's analysis was misguided. By averaging 72 forecasts from five generic manufacturers, Dr. Leitzinger predicted a but-for brand retention rate of 11.5 percent after three years.[25] Dr. Frank responded that the use of averaging is accurate only when the data relied upon is similar and based on equal expertise. Since Dr. Leitzinger did not analyze the accuracy of the underlying forecasts (or even account for the generic manufacturers' own view of their accuracy), Dr. Frank criticized his method for giving "undue weight to **[**42]** the generic companies' projections, which are often imprecise and unrealistic." Rebuttal Declaration of Richard G. Frank in Support of Class Certification of Restasis End-Payors ¶ 16. Dr. Frank's defense of his methodology, including why he did not find Dr. Leitzinger's methodology more accurate than his own, was persuasive, and I am satisfied that Dr. Frank's decision to use a yardstick approach was sound and workable.

Relying heavily on the evidence from Dr. Hatch and Dr. Mandadakis that I excluded in the Daubert Decision, defendant further contends that Dr. Frank did not account for eye care providers' unique skepticism of generic drugs, which would have made them hesitant to switch patients to generic Restasis in the but-for world. Dr. Frank convincingly responds that any such skepticism would have been accounted for by his choice of Xalatan, which is also an ophthalmic product, as an analog.

Allergan's assertions about eye care providers' skepticism of generic drugs are thus relevant to class certification only if it can show that these providers are especially skeptical of complex generic ophthalmic drugs generally or of Restasis in particular.[26] **[*22]** Daubert Dec. at 14. Defendant's evidence on these points **[**43]** is far from

---

[24] It is also possible that, in the but-for world, Allergan may have tried to retain more of the market by introducing its own generic version of Restasis—that is, an "authorized generic." According to Dr. Frank, 68 percent of drugs with high sales include an authorized generic at generic entry. One of Xalatan's generic entrants was an authorized one.

[25] It is noteworthy that, on average, these generic manufacturers predicted a brand retention rate that was significantly lower than that predicted by Dr. Hughes, who relied exclusively on single forecasts created by each of two companies.

[26] One piece of evidence cited by Dr. Hughes fails to make this critical distinction. Dr. Hughes wrote that "brand loyalty" is especially high for ophthalmic products in part because "the design of the bottle and eyedropper are very important for ophthalmic drugs, especially with regards to ease of use and precision of the quantity dispensed." Hughes Rep. ¶ 82. He cited an article in which an ophthalmologist, after asserting that the design of the bottle and eyedropper could make a generic drug less user-friendly, described the packaging of generic Xalatan products as an example. Dr. Yvonne Ou, *Glaucoma Eye Drops: Is There a Difference Between Brand Name and Generic*, Bright Focus Foundation, Mar. 24, 2017 ("Ou Article"),

conclusive. It relies heavily on a survey commissioned by Bank of America of just 75 ophthalmologists in which 78 percent stated that they viewed generics as potentially different from the brand (although the majority of that group still prescribe generics); 24 percent said they would not prescribe generic Restasis under the then- existing FDA bioequivalence guidance; and 27 percent said they would prescribe the generic only to new patients. Bank of America Merrill Lynch, *Allergan: Tidbits from ophthalmology survey*, at 5-6 (Aug. 7, 2013).

Most importantly, even if defendant had proffered stronger evidence of physician resistance, it has not bridged the gap between eye care providers' preferences and generic penetration rates. Indeed, the Bank of America survey itself acknowledged that "other factors (such as payor coverage)" often override physician preference, and, therefore, "most of the ophthalmic drugs that have gone generic in recent years have faced significant erosion." *Id.* at 1. Allergan notes that **[**44]** EPPs' expert Mr. Clark acknowledged that, if a large percentage of doctors wrote "dispense as written" on their prescriptions for a particular brand drug, it could increase the brand penetration rate. But Mr. Clark also described such a situation as extremely uncommon, citing prescriptions for thyroid medication as a rare exception. According to Ms. Craft, Allergan's former CEO David Pyott agreed, testifying at his deposition that "those days of writing dispense [as] written to [] override generics, they are history." Craft Reb. ¶ 56. In short, defendant has not shown that Dr. Frank's analysis is unreliable because of his failure to account for eye care providers' potential resistance to generic drugs.

Defendant further argues that the underperformance of a generic version of Restasis manufactured by Teva Pharmaceutical Industries Ltd. ("Teva") in Canada supports its claim that Restasis would have experienced significant brand retention in the United States. Teva's product entered the Canadian market in May 2018; after 11 months, it captured only a low percentage of sales—less than many other generic ophthalmic products in Canada had achieved. Allergan claims that Teva's experience **[**45]** shows that physician resistance to prescribing generic Restasis would have led to significant brand retention in the United States.

In response, EPPs retained Mr. Clark to compare the marketplaces for drugs in the United States and Canada and to determine whether the experience of Teva's generic was instructive as to how generic versions of Restasis would have performed in the United States. Mr. Clark, president of a life sciences industry advisory firm, concluded that Teva's **[*23]** generic sold poorly largely because it cost nearly the same as the brand and was not placed on Canada's provincial formularies. In a surrebuttal report, Dr. Hughes criticized Mr. Clark's findings, claiming that other generic drugs that shared the characteristics cited by Mr. Clark performed better in Canada. At the hearing, Mr. Clark took issue with Dr. Hughes's methodology.

The experience of Teva's generic in the Canadian pharmaceutical market does not render Dr. Frank's choice of Xalatan unreliable. The Canadian market is dramatically different from that of the United States. In 2018, Canadians spent about $30.7 billion on retail prescription drugs, while Americans spent between $360 and $520 billion. The smaller **[**46]** Canadian market reduces incentives for generic manufacturers to enter. In addition, insurance arrangements in Canada differ markedly from those in the United States, and the promotion of prescription drugs is

---

www.brightfocus.org/glaucoma/article/glaucoma-eye-drops-there-difference-between-brand-name-and-generic. This article's reference to Xalatan, of course, undercuts Dr. Hughes' claim that concerns about a generic's inferior packaging could impede the drug's rapid and effective penetration of the market.

Defendant also cites a study of Medicare Part D recipients that found that, in 2013, eye care providers prescribed brand drugs to Medicare patients at the highest rate relative to all other physician specialties. Dr. Paula A. Newman-Casey, et al., *Brand Medications and Medicare Part D: How Eye Care Providers' Prescribing Patterns Influence Costs*, 125 Ophthalmology 332 (2018), www.ncbi.nlm.nih.gov./pmc/articles/PMC5732892. The authors did not determine the precise reasons for the difference, although they did acknowledge, among other possibilities, some doctors' concerns about the efficacy of generic drugs. They also noted, however, that brand medications' "[h]igh costs result in less frequent medication purchases and lead to lower medication adherence," citing a study of 8,427 patients with open-angle glaucoma who were 39 percent more likely to have reduced medication adherence if they were prescribed the brand name drug. *Id.* The authors deemed it "likely critically important to prescribe less expensive [generic] medications as first-line therapies to help decrease the risk of cost-related medication nonadherence." *Id.* The Ou Article similarly acknowledged that the "[d]ecreased cost of glaucoma drops has been shown to increase adherence, or compliance with taking a medication as prescribed."

more strictly regulated. Notably, Teva's representative said that the company did not account for the experience of its Canadian generic when it forecasted generic Restasis' performance in the United States.

In sum, Allergan requests that I find unreliable Dr. Frank's conclusion that Restasis would have penetrated the market in the but-for world at a rate consistent with the average market penetration rate of all drugs. I decline to do so. Dr. Frank offered persuasive reasons for choosing Xalatan as a yardstick and equally persuasive reasons why the choice was conservative. Additionally, having observed his testimony, I found Dr. Frank to be a thorough, thoughtful, and credible witness. Defendant may make its case to a jury, but it has not given me a basis to say that Dr. Frank's use of Xalatan as an analog is unsound. Thus, EPPs have met their burden to show that they can present classwide proof of injury-in-fact and that the number of brand retainers is *de minimis*.

Finally, defendant **[**47]** sometimes argues that I need to determine on this motion not only whether Dr. Frank's methodology is sound enough to go to the jury, but what Restasis' brand retention rate would have been in the but-for world. If that were in fact the standard, I would readily accept Dr. Frank's analysis as establishing that brand retainers would account for no more than 5.7 percent of consumer class members.

(b) Plaintiffs' Methodology to Remove Brand Retainers from the Judgment

I now address Allergan's argument, supported largely by *Asacol*, that it is entitled to individualized inquiries at the liability phase of trial to identify brand retainers in the but-for world and that EPPs' proposed methodology to exclude them from the class is insufficient.[27]

EPPs propose that, using Dr. Frank's damages methodology, which relies exclusively on common proof, the jury will remove purchases that would have remained for the brand in the but- for world from the total damages award. Therefore, the experts' dispute over the brand retention *rate*

> does not undermine the fact that both experts rely on common proof (as opposed to individual proof) to estimate the impact Brand Loyalists have on the aggregate damages **[**48]** number under both of their models. Estimating the number of Brand Loyalist purchases (using a common proof methodology) is a sufficiently reliable method to remove purchases from the aggregate damages award.

*See In re Lidoderm, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *19*.[28]

[*24] This model also ensures that Allergan will not be forced to pay a penny more than the damages the jury determines it caused, protecting its due process rights.

> [I]n cases in which aggregate liability can be calculated in such a manner, 'the identity of particular class members *does not implicate the defendant's due process interest at all'* because '[t]he addition or subtraction of individual class members affects neither the defendant's liability nor the total amount of damages it owes to the class.'

---

[27] I note that defendant's argument appears contingent on a finding that the brand retention rate would be higher than that predicted by Dr. Frank—a finding I have not made. Notably, the district court in *Asacol* concluded that the rate there would have been 10 percent. *907 F.3d at 45*. I will nevertheless address defendant's argument, in part because it is not obvious that the *Asacol* Court's holding would have differed if that Court had been faced with a lower percentage of uninjured class members.

[28] EPPs' model distinguishes this case from two cited by defendant, *Jensen v. Cablevision Sys. Corp., 372 F. Supp. 3d 95, 129 (E.D.N.Y. 2019)*, and ***Vaccariello v. XM Satellite Radio, Inc., 295 F.R.D. 62, 74 (S.D.N.Y. 2013)***, in which the district courts denied class certification due, in part, to the need for individualized inquiries to determine whether each class member was injured. The plaintiffs in those cases, unlike EPPs, did not offer a method of classwide proof to separate uninjured class members from those who were injured.

See Briseno v. ConAgra Foods, Inc., 844 F.3d 1121, 1132 (9th Cir. 2017) (quoting Mullins v. Direct Digital, LLC, 795 F.3d 654, 670 (7th Cir. 2015)) (emphasis added); *accord* In re EpiPen, 2020 U.S. Dist. LEXIS 40975, 2020 WL 1180550, at *37.

In Hickory Secs. Ltd. v. Republic of Argentina, 493 F. App'x 156 (2d Cir. 2012), another iteration of the Argentine bondholders' class actions at issue in *Seijas*, the Second Circuit indicated its approval for a damages model similar to EPPs'. The Hickory Court reversed the district court's entry of an aggregate damages award because it did not "sufficiently account[] for non-continuous bondholders," who were excluded from the classes. *Id. at 158-59*. On remand, the Court instructed the district court to see if it could calculate **[**49]** aggregate damages that account, in "a reasonably accurate, non-speculative" way, for the volume of bonds that did not belong in the classes at issue. *Id. at 160*. By removing the percentage of prescriptions that would have remained for brand Restasis in the but-for world from the total damages amount, EPPs' proposal does precisely that.

Plaintiffs' methodology offers additional protection to defendant. To collect damages, consumers will be required to submit sworn affidavits declaring, among other things, that they would have purchased a generic version of Restasis if it had been available.[29] There is nothing novel about this approach. ***HN19***[] Self-identifying affidavits are an accepted means to establish a class member's entitlement to recovery in class action litigation. *See, e.g.,* *Briseno, 844 F.3d at 1131-32*; *Mullins, 795 F.3d at 667-72*. For instance, in consumer protection cases, many courts in this Circuit have accepted self-identifying affidavits to establish proof of a product's purchase (a prerequisite, of course, to injury) where such evidence does not otherwise exist. *See, e.g.,* *Hasemann v. Gerber Prods. Co., 331 F.R.D. 239, 270-72 (E.D.N.Y. 2019)*; *Ebin v. Kangadis Food, Inc., 297 F.R.D. 561, 567 (S.D.N.Y. 2014)*.

Here, by contrast, the data available in the pharmaceutical industry, detailed by Ms. Craft, ensures that only those who actually purchased Restasis will receive damages. **[**50]** "The detail and specificity of this electronically recorded data is truly exceptional in the realm of consumer goods purchases." Declaration of Laura R. Craft in Support of End-Payor Plaintiffs' Motion for Class Certification ¶ 24. This unique fact provides protections to Allergan that are regularly absent from consumer class actions. The data will show exactly how many purchases a consumer made and exactly how much he or she paid for each one. Where courts have accepted the use of affidavits to establish something as essential as a class member's proof of purchase of a product at issue, I see no reason to reject their use to discern a consumer's hypothetical purchasing activity in the but-for world.

As Allergan stresses, a proposal similar to that of EPPs was rejected by the Court in *Asacol*, which was also an antitrust class action alleging that the defendant pharmaceutical manufacturers worked to prevent generic entry. *See* 907 F.3d at 44-45. Where the district court found that 10 percent of class members had not been injured, *id. at 45*, the First Circuit held that a claims process that relies on affidavits "provides defendants **[*25]** no meaningful opportunity to contest whether an individual would have, in fact, **[**51]** purchased a generic drug had one been available," in violation of the defendants' Seventh Amendment and due process rights, *id. at 53*. The *Asacol* Court also rejected the plaintiffs' proposal to instruct the jury to remove the percentage of uninjured consumers from the aggregate damages amount. *Id. at 55-56*. It reasoned that "[a]ccepting plaintiffs' proposed procedure for class litigation would [] put us on a slippery slope, at risk of an escalating disregard of the difference between representative civil litigation and statistical observations of tendencies and distributions." *Id.*; *accord* In re Thalomid & Revlimid Antitrust Litig., 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *12-13 (D.N.J. Oct. 30, 2018)

[29] Allergan insists that it will challenge each plaintiff in the claims process to assure that no uninjured plaintiff receives an award. There are two responses to this. Realistically, the likelihood that Allergan would choose to undertake the time and expense to challenge each plaintiff is remote. This is because any award against it, having already been reduced by the percentage of uninjured plaintiffs found by the jury, will not change. If it nonetheless chooses this path, it may effectively use the affidavit process to cull those plaintiffs it wishes to challenge.

(relying on *Asacol* and Third Circuit precedent to deny, with leave to renew, class certification after the plaintiffs' expert determined that up to 10 percent of consumer class members were brand retainers).[30]

But **HN20**[] the Second Circuit has accepted the use of representative evidence and statistical observations to prove classwide injury. In *Cordes*, the Second Circuit recognized that the plaintiffs in that antitrust class action may show that "injury-in-fact is susceptible to common proof" through the use of a "single formula," observing that, if the district court on remand were to agree that the **[**52]** plaintiffs' formula could show injury-in-fact, the predominance requirement would "likely" be met. *502 F.3d at 106-08*. In *Petrobras*, where the plaintiffs were required to prove that they had purchased Petrobras Notes in a "domestic transaction," the Second Circuit indicated that they might have satisfied the predominance requirements if they had "suggest[ed] a form of representative proof that would answer the question of domesticity for individual class members." *862 F.3d at 272* (citing *Tyson Foods, 136 S.Ct. at 1045-46*).[31]

Defendant's argument, buoyed by *Asacol*, that the *Seventh Amendment, Due Process Clause*, and *Rules Enabling Act* require that it be permitted to challenge each class member's ability to show injury at the liability stage of trial is also inconsistent with *Tyson Foods*. *Tyson Foods* affirmed certification of a class in which the jury awarded aggregate damages without determining which individual class members' FLSA rights had been violated by the employer Tyson Foods. *136 S.Ct. at 1049-50*. Tyson Foods asked the Court to determine whether, "where class plaintiffs cannot offer proof that all class members were injured, they must demonstrate instead that there is some mechanism to identify the uninjured class members prior to judgment and ensure that uninjured members (1) **[**53]** do not contribute to the size of any damage award and (2) cannot recover such damages." *Id. at 1049* (internal quotation marks omitted). Deeming "the question whether uninjured class members may recover [] one of great importance," the Court nonetheless found its resolution "premature" since the damages award at issue had not yet been distributed. *Id. at 1050*. In a concurrence, Chief Justice John Roberts agreed **[*26]** that the issue was not ripe for the Court's resolution, but stated that "Article III does not give federal courts the power to order relief to any uninjured plaintiff, class action or not," and thus the jury's award could not stand "if there is no way to ensure that [it] goes only to injured class members." *Id. at 1053*.

As described above, uninjured class members here will "not contribute to the size of any damage award," and, by identifying and removing such class members during the claims administration process, plaintiffs' proposal satisfies Chief Justice Roberts's concerns. It also is in line with *Hickory*, in which the Second Circuit expressed no concern that uninjured class members had not been identified during the liability phase. *See 493 F. App'x at 160*. I therefore disagree with the First Circuit's conclusion in *Asacol* ***[**54]*** that defendant has a constitutional right to remove these individuals at the liability stage of trial. Notably, in a comprehensive opinion, the court in *EpiPen* predicted that *Asacol*'s analysis would not be followed by the Tenth Circuit, and it explicitly rejected the constitutional underpinnings of *Asacol*, upon which the defendants there, as here, relied. *2020 U.S. Dist. LEXIS 40975, 2020 WL 1180550, at *28-32, *36-37*.

---

[30] Allergan also relies on the D.C. Circuit's recent decision in *Rail Freight, 934 F.3d at 620*, which affirmed the district court's denial, on remand, of class certification because the class contained too many uninjured members. Although the D.C. Circuit cited *Asacol* with approval, *see id. at 624, 627*, the plaintiffs' model in *Rail Freight* was different from that in *Asacol* as well as from EPPs'. The plaintiffs in *Rail Freight* "insist[ed] that each member of the proposed class *was* injured," even though their own expert's model found that over 2,000 class members were not. *Id. at 623-24*. Thus, unlike here, the plaintiffs had not proposed a method to remove uninjured plaintiffs through common evidence, leaving the D.C. Circuit to conclude that it must be done through "full-blown, individual trials." *Id. at 625*.

[31] Defendant unpersuasively argues that EPPs' proposed methodology to show classwide impact is prohibited by the Supreme Court's decision in *Wal-Mart*. But there is no basis to compare the proposed class here to the class in *Wal-Mart* of 1.5 million female employees alleging employment discrimination in 3,400 stores. *564 U.S. at 357*. The Court there found that *Rule 23(a)*'s lenient commonality requirement was not met as there was not even a single common question. *Id. at 359*. And it rejected the use of "sample cases" to extrapolate the percentage of women who were discriminated against by their local supervisors. *See id. at 348, 357-58*. Dr. Frank's use in this case of a market yardstick to show classwide impact in the but-for world bears no resemblance to the "trial by formula" condemned in *Wal-Mart. See id. at 367*.

(c) Defendant's Argument That Individual Inquiries Are "Likely Impossible"

While stressing its absolute right to question every individual class member to determine if he or she would have purchased generic Restasis in the but-for world, Allergan simultaneously argues that determining the hypothetical actions of a consumer is "next to impossible here because there is still no evidence of what patients actually did once a generic version of Restasis hit the market in the U.S." Allergan's Memorandum of Law in Opposition to End-Payor Plaintiffs' Motion for Class Certification ("Opp.") at 27.[32]

This argument only buttresses plaintiffs' case. If defendant were correct that individualized inquiries would be futile, Dr. Frank's reliance on aggregate data is not just a reasonable way to account for brand retention in the but-for **[**55]** world; it is the only way. ***HN21***[] A finding otherwise "would enable the wrongdoer to profit by his wrongdoing at the expense of his victim. It would be an inducement to make wrongdoing so effective and complete in every case as to preclude any recovery[.]" *See* *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*; *see* *In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 209 (S.D.N.Y. 2018)* ("Defendants are not entitled to the benefit of [the] doubt when the very reason we cannot know the answer to [a] question is because of their alleged wrongdoing.").

Finally, Allergan's argument about the likely impossibility of individualized proof does not appear limited to class actions. If I were to accept this argument, it would lead to the untenable conclusion that in generic delay cases in which there is not yet a generic on the market—potentially because of the efficacy of a defendant's anticompetitive conduct—an individual plaintiff could not establish injury-in-fact. *Tyson Foods* accepted the plaintiffs' method of proving classwide liability in part because they could have relied on the same method to establish individual liability. *136 S.Ct. at 1046-48*. By analogy, I view with great skepticism an argument against class certification that would prevent individual lawsuits as well.[33]

[*27] In sum, Allergan may not defeat class certification **[**56]** by insisting that it has a right to individualized inquiries while also claiming that those inquiries would be fruitless.[34] EPPs have presented a reasonable methodology to eliminate brand retainers' purchases from the damages calculation and to remove them from the class before judgment. I therefore find that the existence of a small percentage of consumers who were unharmed by generic foreclosure does not doom this class action.

Indeed, defendant's assertion that a small percentage of brand retainers should prevent over one million people and 30,000 to 40,000 TPPs from suing collectively runs afoul of *Rule 23*, as interpreted by the Supreme Court and Second Circuit. Most of these class members have low value claims and no economic incentive to bring individual lawsuits. *Rule 23(b)(3)* was designed with such plaintiffs "dominantly in mind." *Amchem, 521 U.S. at 617*; *Sykes,*

---

[32] It also claims that the lack of a generic Restasis prevents the parties from examining "[o]ne of the factors that will likely drive especially high brand loyalty rates here [-] each patient's idiosyncratic medical issues, such as the likelihood that a patient would experience side effects and/or efficacy problems with the generic and their likely response if they experienced such side effects." *Id.* But a class member who experienced side effects from a generic would still be injured because he or she paid at least one overcharge. *See, e.g.,* *In re Nexium, 777 F.3d at 27*.

[33] At oral argument, Allergan contended that the continued absence of a generic entrant weighs against class certification because it evidences the weakness of plaintiffs' case. But the overall strength of plaintiffs' case is not relevant to class certification. *See, e.g.,* *In re Initial Pub. Offerings Secs. Litig., 471 F.3d 24, 41 (2d Cir. 2006)* ("a district judge should not assess any aspect of the merits unrelated to a *Rule 23* requirement").

[34] Defendant further argues that, even if a generic enters the market during this litigation, consumers' purchasing decisions would likely still provide insufficient data to show what they would have done in the but-for world. It is true that whether a consumer purchased a generic version of Restasis in the actual world is not open-and-shut proof that he or she would have done the same in the but-for world. But this data nonetheless would provide insight into his or her actions in the but-for world. *See* *In re Flonase, 284 F.R.D. at 222*; *In re Cardizem CD Antitrust Litig., 200 F.R.D. 326, 343 (E.D. Mich. 2001)*.

780 F.3d at 81. A district court bound by Asacol recently deemed the First Circuit's decision "likely a death knell for pharmaceutical, antitrust class actions brought by indirect purchasers," leaving "most putative class members' claims . . . unremedied." In re Intuniv Antitrust Litig., 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262, at *7 n.8 (D. Mass. Aug. 21. 2019). Another such court was "troubled that over ninety percent of consumers in the proposed EPP class may have been injured by **[**57]** Defendants' alleged unlawful conduct, but now have no practical recourse under ***antitrust law***." In re Loestrin, 410 F. Supp. 3d at 404.

* * *

In addition to brand retainers, which plaintiffs acknowledge exist within the class, Allergan argues there are other less significant categories of uninjured plaintiffs that also affect the predominance balance. As will be seen, these alleged categories either do not exist, are purely speculative, or at most create a small number of issues that can be dealt with using common proof or a relatively trivial number of individual inquiries.

(3) Consumers with Flat Copayment Plans

EPPs have excluded from the class consumers with flat copayment plans because they pay the same for both brand and generic drugs. Dr. Frank notes that the existence of this small group of consumers does not affect his classwide damages calculation because, when an insured consumer has a flat co-payment, the entire overcharge is borne by the TPP. These consumers thus affect only the distribution of damages between consumers and TPPs during the claims administration process.

Allergan argues that EPPs have not offered a way to use common proof to identify and exclude consumers with flat copayment plans, but sworn statements **[**58]** submitted to the court by PBMs OptumRx, Inc. and Prime Therapeutics LLC indicate otherwise. These PBMs confirmed that they are aware of the terms of the plans for the TPPs they service and that the PBMs can sort their data to exclude purchases by consumers with flat copayment plans.

Dr. Hughes does not contest that PBMs can identify and exclude flat copayors, but instead argues that there are *de facto* flat copayment plans that are not easily identifiable. He lists a coinsurance plan with a payment cap; an insurance plan that would have placed the generic drug on the same tier that the brand drug previously occupied; and individuals who qualify for "Full Extra Help" under Medicare's Low Income Subsidy Program.

Ms. Craft and Dr. Frank persuasively respond that Dr. Hughes's examples are based on either an unrealistic but-for price for generic Restasis, the unlikely and speculative actions of insurance plans in the but-for world, or an incorrect description of Medicare's program. In addition, these consumers **[*28]** constitute a *de minimis* group—around 0.4 percent of insured consumers.[35]

In short, the need to identify (solely to exclude from a damages award) consumers with official or *de facto* flat **[**59]** copayment plans does not defeat predominance. *But cf.* Vista Healthplan, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *19 (predominance requirement not satisfied in part because the plaintiffs' expert conceded that individualized inquiries were the only method to identify uninjured class members, including those with flat copayments).

EPPs explain that defendant's assertion that up to four percent of insured consumers fall into this category is incorrect because it includes consumers with coinsurance, whose payments are impacted by a drug's price.

[35] Ms. Craft and Dr. Frank both initially estimated that the percentage of individuals covered by employer-sponsored prescription drug plans that have flat copayments was 0.32. But, adjusting for numbers cited by Dr. Hughes in his report, Ms. Craft increased the percentage to 0.4 percent in her rebuttal report. This percentage may be a slight underestimate as it does not include individuals covered by Medicaid or by health insurance that is not sponsored by an employer.

(4) Consumers Who Used Coupon or Copayment Assistance Programs

Defendant offers coupon or copayment assistance programs that reduce the cost of brand Restasis for insured consumers to as low as $5 for a prescription. It asserts that, as a result, some consumers paid less for brand Restasis than they would have paid for a generic and that individualized inquiries are necessary to identify and exclude these individuals from the class.

I conclude that Allergan's issuance of coupons creates a *de minimis* number of unharmed class members, as most consumers who used coupons still paid overcharges. *See In re Thalomid and Revlimid, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *14*. According to Dr. Frank, consumers who used coupons made out-of-pocket payments of an average of $48 per prescription, **[**60]** and the vast majority of those consumers would have paid an average of $11 per prescription for generic Restasis in the but-for world. Furthermore, Dr. Frank asserts, and defendant does not contest, that the coupons limiting consumers' payments to $5 applied to just three percent of prescriptions, making it unlikely that a consumer who used such a coupon on one purchase would not have paid an overcharge on another purchase.

Furthermore, EPPs have indicated that common data probably can be used to determine which consumers used coupons and to what extent. According to Ms. Craft, the data generated by pharmaceutical transactions could be used to link transactions with and without coupons to the same consumer. Additionally, Allergan's own data may allow the parties to identify coupon users through common proof. Ms. Craft explained that the coupon programs were designed to collect consumers' data to aid defendant's marketing efforts. During discovery, Allergan apparently provided only aggregate coupon data to EPPs, claiming that its individualized data had been lost. Having examined the contracts between Allergan and its coupon processors, Ms. Craft opined that it is "highly implausible **[**61]** given the commercial value of the data and the large expense incurred in its collection" that the data is truly gone. Craft Reb. 1 52.

In sum, defendant has not persuaded me that its use of coupon programs creates predominance concerns.

(5) Consumers Who Would Have Purchased a Different or No Brand Drug in the But-For World

Allergan asserts that it devoted substantial resources to marketing Restasis and that Restasis usage rates were particularly susceptible to these efforts. Defendant claims that, once a generic enters, brand manufacturers generally discontinue these efforts, and, as a result, some customers who purchased Restasis in the real world may have purchased Xiidra (another dry-eye medication) or no drug at all in the but-for world. These uninjured consumers, defendant argues, cannot be identified and excluded from the class through the use of common proof.

Dr. Frank criticized the assumption upon which this argument is based: Dr. Hughes's claim that there would be a "likely reduction in total [Restasis] prescriptions in the but-for world." Hughes Rep. 1 94. According to Dr. **[*29]** Frank, Dr. Hughes relied on a misrepresentation of the findings of one study to argue that purchases of **[**62]** the molecule form (*i.e.*, brand and generic forms combined) of a drug decrease after generic entry. Dr. Frank indicated that, often, any decline in demand for the molecule form of a drug caused by a decline in promotion after generic entry is offset by an increase in demand resulting from generics' lower price. While Dr. Frank acknowledged at his deposition that the sales of the molecule form of drugs sometimes do decline after market entry, he said that he considered that possibility while conducting his analysis and found it unlikely here, since Allergan's own models predicted a steady increase in total molecule sales after generic entry.

Defendant's argument about this category of so-called uninjured class members is based on speculation and thus insufficient to defeat class certification. *See* *Amgen, 568 U.S. at 469-70*; *In re U.S. Foodservice Inc. Pricing Litig., 729 F.3d 108, 121-22 (2d Cir. 2013)*.

(6) Potentially Uninjured Third-Party Payors

Defendant argues that individualized inquiries are also required to identify and exclude certain categories of uninjured TPPs.[36] EPPs argue, and I agree, that, even though a percentage of insured consumers would have remained on the brand, there is no sound basis to conclude that any TPP would not have been injured as it would have paid at least one **[**63]** overcharge for Restasis. *In re EpiPen, 2020 U.S. Dist. LEXIS 40975, 2020 WL 1180550, at *32-34*; *In re Loestrin, 410 F. Supp. 3d at 404-05*; *In re Solodyn., 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *18*.

Defendant's argument that some TPPs were uninjured because they received rebates from Allergan is also meritless. In *Nexium*, the First Circuit observed that "[t]here is some disagreement as to whether [] rebates are passed-through as a discounted price when the PBMs bill the TPPs or whether TPPs are charged the list price and then refunded a portion based on the rebate amount." *777 F.3d at 28 n.23*. If they fall into the latter category, as EPPs contend, then "the rebates are only a damages setoff and do not affect the fact of injury." *Id.*; *accord In re Thalomid and Revlimid, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *14*. ***HN22***[] This is because "antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset." *In re Nexium, 777 F.3d at 27*.[37]

If, however, rebates fall into the former category (that is, if they serve to discount the initial price a TPP pays for a prescription), they still do not raise predominance concerns. Dr. Frank has challenged Dr. Hughes's assertion that the rebates offered to certain TPPs must have reduced the price of Restasis so dramatically that the TPPs would have paid more for a generic. Dr. Frank explains that Dr. Hughes relied on an unrealistically high price for generic Restasis in the but-for world. At **[**64]** minimum, "[Dr. Frank's] analysis suffices for purposes of the class certification motion . . . ." *In re Lidoderm, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *21*; *see In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *18*. Notably, even if Dr. Hughes' price calculations were accurate, a TPP would still have been injured if it paid just one overcharge on a purchase of Restasis. *See In re Solodyn, 2017 U.S. Dist. LEXIS\ 170676, 2017 WL 4621777, at *18*.

In addition, Allergan asserts that some TPPs who possessed stop-loss insurance may not have been injured and can only be identified through individualized inquiries. But reimbursements from stop-loss insurance are post-injury offsets that are "irrelevant to the question of impact." *In re Thalomid and Revlimid, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *14*.

[*30] Defendant also argues that a TPP would not suffer injury if, in the but-for world, a patient experienced side effects from generic Restasis, leading to additional medical visits and participation in a costly appeals process to demand coverage for the brand drug. Allergan's argument again is not grounded in the law, as a TPP's payment of a single overcharge renders it injured. *See, e.g., In re Lidoderm, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *21*. ***HN23***[] And speculative claims about class members' medical reaction to a non-existent drug cannot defeat class certification. *See, e.g., Amgen, 568 U.S. at 469-70*.

Defendant further claims that individualized inquiries are necessary to determine which TPP, among the many potential payors, **[**65]** paid any overcharge. It claims that PBMs (which are excluded from the class) often share in a prescription's cost through their role obtaining rebates from drug manufacturers and sharing these rebates with their TPP customers. Allergan also claims that PBMs offer discount guarantees and price protection to their TPP customers and, in doing so, share with these TPPs the risk of negotiating reimbursement terms and drug price increases.

---

[36] Dr. Frank's assertion that TPPs bore about 90 percent of the class' overcharges is uncontested.

[37] Defendant's reliance on *Minpeco, S.A. v. Conticommodity Servs., Inc., 676 F. Supp. 486, 488-90 (S.D.N.Y. 1987)*, to argue otherwise is not persuasive, as that case holds only that damages offsets should be accounted for in the ultimate assessment of damages, not that the existence of these offsets renders a party uninjured in the first place. The same can be said about *Abrahamson v. Fleschner, 568 F.2d 862, 878-79 (2d Cir. 1977)*, another case cited by Allergan, which addressed the measure of damages under the *Investment Advisors Act of 1940*. Consistent with these cases, Dr. Frank subtracted rebates from his calculation of TPPs' damages.

In response, EPPs have submitted declarations from the PBMs Express Scripts, Inc., OptumRx, Inc., and Prime Therapeutics LLC. The PBMs explain that they are hired to provide various services to assist in the administration of their clients' health plans. Nothing in those declarations suggests that a PBM directly or indirectly pays for its customers' prescription drug purchases. Ms. Craft also credibly and persuasively testified that PBMs serve only as agents for TPPs and do not pay for prescription drugs themselves. Allergan has provided no evidence to refute these representations.

I find that PBMs are not end-payors and, accordingly, their exclusion from the class does not create predominance concerns. *See, e.g., In re Loestrin, 410 F. Supp. 3d at 405*; *In re Thalomid and Revlimid, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *23*; *In re Lidoderm, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *6-7, *25*; *but cf. Vista Healthplan, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *9-13* (finding class unascertainable, **[**66]** in part, because PBMs may share the cost of a prescription); *In re Skelaxin (Metaxalone) Antitrust Litig., 299 F.R.D. 555, 569-77 (E.D. Tenn. 2014)* (denying class certification on ascertainability (and several alternative) grounds where plaintiffs' expert suggested that, while PBMs were excluded from the class, they might pay for the cost of some prescriptions); *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 148-51 (E.D. Pa. 2015)* (decertifying an end-payor class in part because the plaintiffs did not show that they could "ascertain which PBMs, if any, are members of the class").[38]

To summarize, the existence of a relatively small number of uninjured class members does not preclude a finding of predominance under *Rule 23(b)(3)*.

c) Plaintiffs' Aggregate Damages Proposal

HN24[] The third and final element of an antitrust claim is damages. *Cordes, 502 F.3d at 105*. EPPs propose that the jury issue an award of aggregate damages that accounts for classwide harm. Their "model is relatively straightforward as aggregate class-wide damages equal the difference between the costs paid by class members for [brand Restasis] in the actual world versus the costs class members would have paid for [generic Restasis] in the 'but-for' world." *In re Flonase, 284 F.R.D. at 232* (approving similar damages methodology). These damages would then be distributed to injured class **[*31]** members during the claims administration process.

Defendant argues **[**67]** that the need for individualized damages determinations weighs against a finding of predominance. ***HN25***[] Although a court must consider the fact that damages calculations will be individualized in the predominance analysis, class certification under *Rule 23(b)(3)* does not require a court to conclude "that damages are capable of measurement on a classwide basis." *Roach v. T.L. Cannon Corp., 778 F.3d 401, 402, 405 (2d Cir. 2015)*. Further, where, as here, the legal and factual questions raised by the second element of an antitrust claim are common to the class, "the predominance requirement of *Rule 23(b)(3)* is likely met." *Cordes, 502 F.3d at 108*.

Here, while the claims administration process will include individualized damages calculations, many of the questions relevant to the damages distribution will be answered through common proof. The entire process depends on the extensive and particularized data created in the pharmaceutical industry that reveals the number of prescriptions purchased by each consumer and how much each end-payor paid for each prescription. These common components will significantly narrow the scope of individualized damages calculations, which will likely

[38] Dr. Hughes also criticized EPPs' failure to exclude from the class insurers who function in an Administrative Services Only (ASO) capacity. As their name indicates, ASOs solely administer health plans on behalf of a health insurer; they do not pay for the drugs themselves. While Dr. Hughes does not assert otherwise, he claims the contractual relationships between TPPs and ASOs would cause various administrative difficulties, requiring individualized inquiries to determine exactly who is entitled to recoup an overcharge. But Dr. Hughes admitted during his hearing testimony that he had offered no specific case in which a conflict between a TPP and ASO may arise. I trust that, pursuant to the terms of their agreements, ASOs and TPPs will submit proper claims. To the extent they do not, these issues can be addressed during the claims administration process, with the aid of the robust data attached to each pharmaceutical transaction.

involve simple arithmetic. *See* In re U.S. Foodservice Inc., 729 F.3d at 123 (**HN26**[] the measure of overcharge damages in a RICO class action "is straightforward"). Thus, individualized **[**68]** damages calculations "will not qualitatively outweigh the plaintiffs' reliance on common proof." *See* In re Air Cargo, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *63.

Defendant also argues that Dr. Frank's damages calculations do not satisfy the Second Circuit's standard for aggregate damages. "'**HN27**[] The use of aggregate damages calculations is well established in federal court and implied by the very existence of the class action mechanism itself.'" Hickory Secs., 493 F. App'x at 159 (quoting In re Pharm. Indus. Average Wholesale Price Litig., 582 F.3d 156, 197 (1st Cir. 2009)). The Second Circuit has accepted the use of aggregate classwide damages so long as they "roughly reflect" the harm caused to plaintiffs. Id. at 158 (internal quotation marks omitted).

Upon careful scrutiny of Dr. Frank's methodology to calculate classwide damages, I find that it arrives at amounts that, at minimum, "roughly reflect" the harm caused by defendant. Hickory Secs., 493 F. App'x at 158. The result of this methodology would "accurately reflect the number of plaintiffs actually injured by defendant[]" and bear a direct "relationship to the amount of economic harm actually caused by defendant[]." *Cf.* McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 231 (2d Cir. 2008).

To determine overcharges for each of the three categories of class members (TPPs, insured consumers, and cash payors), Dr. Frank determined the monthly average price each category paid for a prescription of Restasis in the actual world **[**69]** and subtracted his predicted but-for price. He then reduced those numbers for TPPs and uninsured consumers according to Xalatan's data. In the case of insured consumers, he used weighted averages from the Kaiser Family Foundation's annual survey regarding generic copay and coinsurance amounts. Dr. Hughes challenges Dr. Frank's use of Xalatan's prices as a yardstick as well as his use of averages to calculate damages. I find Dr. Frank's use of the data he relied upon and his use of averages in this context a reasonable way to measure overcharges. *See* In re Air Cargo, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *61-62 (collecting cases in which "courts have permitted the use of averages to calculate overcharges").

Critically, Dr. Frank used Xalatan's monthly generic penetration rate to omit from his damages calculations the prescriptions that would have remained for the brand even after generic entry in the but-for world. He factored these figures in by determining the quantity of prescriptions that were subject to overcharges each month, based on the actual number of Restasis prescriptions, and reducing it by Xalatan's corresponding generic penetration rate. Dr. Frank then multiplied the per-month overcharge by the quantity of generic Restasis that **[**70]** would have been purchased each month and added the monthly **[*32]** totals together.[39]

Dr. Frank adjusted his overcharge totals based on the assumption that Allergan would not have provided rebates to TPPs and coupons to insured consumers in the but-for world. And he eliminated from his damages calculations uninjured entities not in the class—including insured consumers with flat copays, federal and state governmental entities, and fully insured health plans.

These actions ensure that Dr. Frank's aggregate damages formulation does not create substantial danger that defendant would be overpaying. *Cf.* McLaughlin, 522 F.3d at 231 (rejecting aggregate damages calculation that was "likely to result in an astronomical damages figure"); In re Rail Freight, 292 F. Supp. 3d at 143-44 (finding plaintiffs' classwide damages model unreliable because it, in part, assessed damages to uninjured class members).

Dr. Frank's methodology is especially appropriate here, where it is impossible to measure the true harm caused by Allergan's alleged conduct. **HN28**[] Courts recognize that, "[g]iven the inherent difficulty of identifying a 'but-for world,'" antitrust damages need not "be measured with certainty." Behrend v. Comcast Corp., 655 F.3d 182, 203 (3d Cir. 2011), *rev'd on other grounds*, 569 U.S. 27, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013). Rather, they must be demonstrated as "a matter of just and **[**71]** reasonable inference, although the result be only approximate."

[39] Dr. Frank calculated damages for two different scenarios in the but-for world—one in which generic products replaced prescriptions for Restasis MultiDose (a product Allergan launched in March 2017) and one in which they did not.

Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931). If plaintiffs cannot prove their damages with precision, "[t]he most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created." Bigelow, 327 U.S. at 265; *accord* Story Parchment Co., 282 U.S. at 563; In re Elec. Books, 2014 U.S. Dist. LEXIS 42537, 2014 WL 1282293, at *16. For these reasons, the "burden of proving antitrust damages is not as rigorous as in other types of cases." New York v. Julius Nasso Concrete Corp., 202 F.3d 82, 88 (2d Cir. 2000).

Allergan contends that Dr. Frank's damages calculations do not satisfy the demands of Hickory because, "[a]s in Asacol, the damages here are incremental rather than fixed." Opp. at 35. That Court concluded that "the aggregate damage amount is the sum of damages suffered by a number of individuals, such that proving that the defendant is not liable to a particular individual . . . reduces the amount of the possible total damage." In re Asacol, 907 F.3d at 55. That is not the case here. By removing a percentage of prescriptions from the total damages calculation, EPPs' model is not dependent on any individual class member's actions in the but-for world. If, in the claims administration process, defendant successfully challenges a class member's representation in his or her affidavit that he or she would have purchased generic **[**72]** Restasis, defendant would have identified someone who falls within the percentage of uninjured plaintiffs whose prescriptions were removed from the damages award. While that class member would not recover, the aggregate damages amount would not be affected.

I conclude that EPPs' method to determine and allocate classwide damages is reasonable and will not cause individual issues to predominate.

d) Predominance Concerns Raised by Multiple State Laws

EPPs' claims, under the laws of 31 states and the District of Columbia, arise under 31 antitrust laws, five consumer protection laws, and the unjust enrichment statute of California.[40] The statutes in play, while similar, are not identical. ***HN29***[] "In a motion for class certification, plaintiff bears the burden of providing an extensive analysis of state law variations to determine whether there are insuperable obstacles to class certification." Lyon v. Caterpillar, Inc., 194 F.R.D. 206, 219 (E.D. Pa. 2000) (internal quotations **[*33]** marks omitted). Therefore, I must determine whether the variations in state case law "swamp" common legal issues and defeat the predominance requirement. In re Pharm. Indus. Aver. Whol. Price List, 252 F.R.D. 83, 98 (D. Mass. 2008); *see also* In re Polyurethane Foam Antitrust Litig., 2015 U.S. Dist. LEXIS 94785, 2015 WL 4459636, at *4 (N.D. Ohio July 21, 2015) ("In the end, the question is not whether the 15 state consumer protection and unfair competition laws are different—they **[**73]** are—but whether those differences overwhelm common issues."). ***HN30***[] As the Second Circuit has held, "[v]ariations in state laws do not necessarily prevent a class from satisfying the predominance requirement," so long as "district courts . . . do more than take the plaintiff's word that no material differences exist. . . . Rather district courts themselves must undertake a considered analysis of the differences in state laws." Langan v. Johnson & Johnson Consumer Cos., 897 F.3d 88, 97 (2d Cir. 2018) (citations omitted).

Here, I found insufficient the charts initially offered by EPPs to meet their burden. Therefore, at my direction at oral argument, they submitted additional support for their trial plan. They have now grouped the states' laws according to the various statutes' requirements and drafted proposed questions for the jury that address the differences between these laws.

Plaintiffs contend that a multistate class action is appropriate because the elements of most statutes are substantially similar, any differences fall into predictable patterns that can be separated into tranches, and the court, in charging the jury and providing the jury with an appropriate verdict sheet, will resolve any remaining variations. As to the antitrust statutes, EPPs argue **[**74]** that each state's antitrust statute mirrors the federal antitrust laws, contains a federal harmonization provision, and/or has been interpreted in harmony with federal laws. Except in one regard discussed below and certain issues reserved for summary judgment, *see infra* footnote 41, Allergan does

[40] Defendant categorizes these slightly differently, classifying Missouri's antitrust statute as a consumer protection law, but that does not affect the analysis here.

not dispute that this is the case. As a result, plaintiffs argue, a single set of questions on the verdict sheet can be used to resolve questions of Allergan's liability.

With regard to the consumer protection statutes, plaintiffs maintain that they can prove violations of the statutes at issue here—those of Arkansas, California, Colorado, Montana, and Vermont—based on Allergan's allegedly unfair, unconscionable, and/or deceptive conduct through the presentation of common proof. Even so, several of the consumer protection statutes require additional proof. Specifically, California requires proof that Allergan violated another law, *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 131 Cal. Rptr. 2d 29, 63 P.3d 937, 943 (Cal. 2003)*; Colorado requires a showing that defendant knowingly made a false representation, *Colo. Rev. Stat. § 6-1-105(1)(e)*; and Vermont requires proof that Allergan's misconduct was likely to affect a consumer's conduct, *Carter v. Gugliuzzi, 168 Vt. 48, 716 A.2d 17, 23 (Vt. 1998)*. Additionally, as discussed below, multiple states' antitrust and consumer protection **[**75]** statutes have different standards for the imposition of enhanced damages. EPPs argue that the statutes' differences are resolvable through proposed additional jury questions.

Defendant, on the other hand, argues that these differences will predominate over common issues and render adjudication of the class unmanageable. In addition to the issues related to additional proofs identified above, Allergan argues that the antitrust statutes of Florida, Michigan, and Minnesota require a greater showing of individual impact than the other states' antitrust statutes and that the antitrust and consumer protection statutes of Colorado, Illinois, and Montana prohibit class actions entirely. Allergan does not argue that any single issue is determinative, but rather that the cumulative effect of the state law variations defeats predominance.[41]

(1) Choice-of-Law Analysis

Neither side addressed choice-of-law concerns in the initial briefing. I raised the **[*34]** issue at oral argument because***HN31***[] "[c]ourts must exercise care in conducting a choice-of-law analysis in a putative *Rule 23(b)(3)* class action . . . in order to determine whether any conflicts in governing law will overwhelm the ability of the trier of fact meaningfully **[**76]** to advance the litigation through classwide proof." *Johnson, 780 F.3d at 141*.

At oral argument, EPPs initially stated that their class definition included both purchases of Restasis made by residents of the class states and purchases of Restasis made in the class states by non-residents. In an attempt to avoid possible conflicts of law, EPPs have since limited the class to consumers who purchased Restasis in the class states, regardless of the consumer's state of residence. Defendant responds that plaintiffs have not adequately analyzed the issues and that choice-of-law considerations compound the problems of this multi-state class action.

HN32[] When deciding matters of state law, a federal court generally must apply the choice-of-law principles of the state in which it sits. *See* *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*. Adding a layer of complexity, this action is a consolidation of cases filed in this court and cases transferred from California and Texas. ***HN33***[] In a multidistrict litigation, "the transferee court applies the choice of law rules of the state in which the action first was filed." *In re Rezulin Prods. Liab. Litig., 390 F. Supp. 2d 319, 329 (S.D.N.Y. 2005)* (citations omitted). Thus, I must apply the choice-of-law rules of California, New York, and Texas to the cases arising therefrom.

Defendant acknowledges that California **[**77]** and New York courts employ variations on the same choice-of-law analysis—the "government interest test"—and it does not genuinely dispute that, under that analysis, the state of purchase provides the appropriate substantive law for consumer class members' claims. *See, e.g.,* *Mazza v. Am. Honda Motor Co., 666 F.3d 581, 594 (9th Cir. 2012)* (applying California's choice-of-law rule in determining that "each class member's consumer protection claim should be governed by the consumer protection laws of the

[41] In its initial briefing, defendant cited more perceived differences between the states' antitrust and consumer protection laws than it raises now. At oral argument and in subsequent briefing, defendant has acknowledged that many of the issues it had raised to defeat class certification are more appropriate for summary judgment. Therefore, I do not address them now.

jurisdiction in which the transaction took place"); *In re Grand Theft Auto Video Game Consumer Litig., 251 F.R.D. 139, 147, 150 (S.D.N.Y. 2008)* (applying law of state of purchase under New York and California choice-of-law rules). I agree with this uncontroversial analysis.

I therefore focus on three issues on which the parties disagree: (1) whether the law of a state other than the state of purchase would apply to consumers' purchases under Texas's choice of-law analysis, (2) whether the law of the state in which a TPP has its principal place of business should apply to its claims, and (3) whether the law of the state to which a consumer's mail-order prescription was delivered should apply to the claims of both consumers and TPPs.

Unlike New York and California, Texas applies the "most significant relationship" test of the Restatement (Second) **[**78]** Conflict of Laws (1971) ("the Restatement"). *Johnson, 780 F.3d at 145* (citing *Spence v. Glock, Ges.m.b.H., 227 F.3d 308, 311-12 (5th Cir. 2000))*. ***HN34***[] The Restatement lists numerous factors to consider when determining which state has the most significant relationship to a case.[42] *Restatement § 6(2)*. The factors vary somewhat in importance from one field of law to another, and additional factors apply when considering tort claims such as those at issue here.[43] *See In re Wellbutrin XL Antitrust* ***[*35]*** *Litig., 282 F.R.D. 126, 135 (E.D. Pa. 2011)* ("'antitrust violations are essentially tortious acts. . . .'") (quoting *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 547, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (Marshall, J., dissenting)); *In re Flonase Antitrust Litig., 815 F. Supp. 2d 867, 882 (E.D. Pa. 2011)* (same). Under this analysis, "[t]he applicable law will usually be the local law of the state where the injury occurred." *Restatement §§ 156(2)* (addressing the tortious character of the conduct); *158(2)* (addressing the interest entitled to legal protection).

Defendant argues that, under the most significant relationship test, the state where the anticompetitive activities occurred, or the states where plaintiffs and defendant are residents, may have the most significant contacts to the case. I disagree. As the court in *Wellbutrin* reasoned in a thorough analysis of the relevant state policies and contacts,

> The place of purchase is where the relationship between the parties is centered; it is where the transaction with the alleged overcharge actually **[**79]** occurs. A place-of purchase rule protects justified expectations because an in-state transaction will be governed by the antitrust laws and/or consumer protection laws of that state and not by the chance location of the TPP's principal place of business, the location of the TPP's PBM, or an individual purchaser's residence. This approach will also provide consistent results because all purchases within a state will be treated uniformly.

282 F.R.D. at 135. While some of the Restatement's factors favor other states, consideration of the factors as a whole and in the context of this case indicates that a consumer's place of purchase—that is, where he or she was injured by overpaying—has the most significant contacts or relationships with the particular issue. *See id.*; *In re Flonase, 815 F. Supp. 2d at 882*; *In re Relafen Antitrust Litig., 221 F.R.D. 260, 277 (D. Ma. 2004)*.

Johnson v. Nextel Communs., 780 F.3d 128, is relied upon by defendant because it found class members' home states to have the most significant contacts. But *Johnson*'s analysis fully supports plaintiffs' position, not Allergan's.

---

[42] ***HN35***[] These general factors include: "(a) the needs of the interstate and international systems, (b) the relevant policies of the forum, (c) the relevant policies of other interested states and the relative interests of those states in the determination of the particular issue, (d) the protection of justified expectations, (e) the basic policies underlying the particular field of law, (f) certainty, **[*36]** predictability, and uniformity of result, and (g) ease in the determination and application of the law to be applied." *Restatement § 6(2)*.

[43] The additional factors applicable to tort cases include: "(a) the place where the injury occurred, (b) the place where the conduct causing the injury occurred, (c) the domicile, residence, nationality, place of incorporation and place of business of the parties, and (d) the place where the relationship, if any, between the parties is centered." *Restatement § 145*. The Restatement further provides that "[t]hese contacts are to be evaluated according to their relative importance with respect to the particular issue." *Id.*

The Second Circuit in *Johnson* found the place of injury of critical importance for tort claims, but, under the wholly different facts in that case, the place of economic injury was the class members' home states. *Id. at 142-44*. Here, the place of injury is the place **[**80]** of purchase. Accordingly, I conclude that, under the choice-of-law analysis of New York, California, and Texas, the law of the place of purchase applies to each consumer class member's claims.

As to TPP class members, Allergan argues that, under a government interest analysis, the law of the state of a TPP's principal place of business should apply. On the contrary, the law of the TPPs' insured consumer's place of purchase governs the TPPs' claims under the most significant relationship test and the government interest test. ***HN36***[] Under the government interest analysis, "[i]f conflicting conduct-regulating laws are at issue, the law of the jurisdiction where the tort occurred will generally apply because that jurisdiction has the greatest interest in regulating behavior within its borders." *Cooney v. Osgood Mach., Inc., 81 N.Y.2d 66, 72, 612 N.E.2d 277, 595 N.Y.S.2d 919 (N.Y. 1993)*. Here, the consumer's antitrust injury or consumer protection injury takes place in the state where the drug is purchased, and, without a consumer's purchase in that state, the TPP would not be injured. As a result, under either the government interest test or the most significant interest test, the state that would be most impaired if its laws were not applied, the state with the greatest contacts, and **[**81]** the state with the most significant interest in preventing antitrust and consumer protection violations is the state in which a TPP's insured consumer purchased Restasis.[44] Moreover, this result will provide "certainty, predictability, and uniformity of result," *Restatement § 6(2)(f)*, and promote "ease in the determination and application of the law to be applied." *Restatement § 6(2)(g)*.

Finally, the parties disagree as to which state's law governs mail-order prescriptions. Defendant asserts that the law of the state of the consumer's residence should govern, while EPPs argue that, under both the government interest test and the most significant interest test, the law of the state where the drug was delivered (presumably, this generally would be the state of residence) should apply to both consumers and TPPs. I conclude that it is reasonable to treat the place of receipt of mailed drugs as the place of purchase and, therefore, the place of injury. In other words, it is reasonable to treat drugs received by mail-order the same as drugs received at a retail location.

In sum, choice-of-law considerations do not raise issues that defeat predominance.

(2) Proof of Antitrust Impact

Allergan argues that the antitrust laws of **[**82]** Florida, Michigan, and Minnesota require "a somewhat stronger and more precise showing of individual impact" than the laws of the other states at issue, quoting *In re Relafen, 221 F.R.D. at 282*, and *In re Digital Music Antitrust Litig., 321 F.R.D. 64, 99 (S.D.N.Y. 2017)*, which adopts this phrase from *Relafen* without discussion. As a result, defendant argues that the existence of uninjured plaintiffs precludes class certification under Florida, Michigan, and Minnesota antitrust laws.

A careful review of the law in these three states, and of the analysis made by the court in *Relafen*, leads me to a different conclusion—namely, that the requirements for showing individual impact, and also damages, are essentially the same in all of the states under which plaintiffs sue. I discern no heightened standard, explicit or implicit, in the cases upon which *Relafen* relies, and therefore there are no individualized issues regarding these three states.

---

[44] *Cf. In re Flonase, 815 F. Supp. 2d at 882-83* (applying state law of consumers' place of purchase using Pennsylvania's choice of law principles which "require[] an inquiry both into the number and nature of contacts at issue, as set forth in the Restatement (Second) of Conflict of Laws, as well as the policies and governmental interests underlying the issue"); *In re Wellbutrin XL, 282 F.R.D. at 135* (same); *but see In re K-Dur Antitrust Litig., 2008 U.S. Dist. LEXIS 113310, 2008 WL 2660783, at *5 (D.N.J. Mar. 19, 2008)* (applying state law of TPPs' principal place of business using government interest analysis); *In re Rezulin, 392 F. Supp. 2d at 611 n.85* (same).

In *Gordon v. Microsoft Corp., 2001 U.S. Dist. LEXIS 26360, 2001 WL 366432, at *4 (D. Minn. March 30, 2001)*, cited by *Relafen, 221 F.R.D. at 281*, the United States District Court for the District of Minnesota noted the "consistency" with which Minnesota courts had denied certification of indirect purchaser classes, but, after a close and comprehensive analysis of those cases, certified a class of indirect purchasers of Microsoft products. *Gordon* concluded that denial in the prior **[**83]** cases had been on "narrow grounds rather than pursuant to any general rule." *Id.* In addressing the earlier denials, the *Gordon* court highlighted the individual complexities of determining injury in *Keating v. Philip Morris, Inc., 417 N.W.2d 132 (Minn. App. 1987)*, where cigarette purchasers unsuccessfully sought class certification. *2001 U.S. Dist. LEXIS 26360, 2001 WL 366432, at *5*. In ***HN37***[] *Keating*, the complicated chain of distribution, and the likely unavailability of purchase records—two issues entirely absent here— made individualized issues predominant and made the proposed class unmanageable.[45] *417 N.W.2D at 137*. The court in *Gordon* also expressly found that plaintiffs need not "*prove* class-wide fact of injury or individual damages at the class certification stage," but only a viable method for doing so. *2001 U.S. Dist. LEXIS 26360, 2001 WL 366432, at *7* (emphasis in original).

Turning to Michigan, although its statute requires proof of "actual damages," *Mich. Comp. Laws Ann. § 445.778(2)*, that language, as interpreted by Michigan courts, does not require a showing of damages inconsistent with that proposed by EPPs here. *Ren v. Philip Morris Inc., 2002 Mich. Cir. LEXIS 1, 2002 WL 1839983 (Mich. Cir. Ct. June 11, 2002)*, which was not cited by *Relafen*, but is relied upon by Allergan, is particularly instructive. The *Ren* court found that "common issues of law or fact would likely predominate relative to the issue of the existence of injury in fact" despite the plaintiffs' expert's **[**84]** inability to "show that each and every member of the class was necessarily subjected to paying an illegal overcharge and hence was impacted." *2002 Mich. Cir. LEXIS 1, [WL] at *11*. This, the court held, was because the***HN38***[] "inability to show injury as to a few does not defeat class certification where the plaintiffs can show widespread injury to the class." *Id.* **[*37]** (quoting *In re Cardizem CD Antitrust Litig., 200 FRD 297, 321 (E.D. Mich. 2001))*. While the court in *Ren* rejected a class that sought to aggregate damages and then "simply award[ ] each member of the class the average of the class wide damages," it observed that an end-payor class "might not founder on the issue of computation of individual damages . . . where the number of purchasers of the product are readily identifiable and reliable records for individual purchases exist." *2002 Mich. Cir. LEXIS 1, [WL] at *15-16*. That, of course, is the situation here.

Finally, ***HN39***[] the law in Florida also does not support a heightened standard. For example, in *Execu-Tech Business v. Appleton Papers, 743 So. 2d 19 (Fla. App. 4 Dist. 1999)*, cited by *Relafen*, the appellate court upheld the trial court's denial of certification of an end-payor class where the trial court had rejected the plaintiffs' expert evidence and had concluded that there was no reasonable methodology for generalized proof of classwide impact and damages. Thus, while the court acknowledged its skepticism **[**85]** of end-payor classes, its holding was based upon the lack of sufficient evidence needed to avoid individual inquiries.

As *Relafen* also noted, a different Florida court had certified an end-payor class where, in contrast to *Execu-Tech*, the plaintiffs' expert economists had "identified methodologies for demonstrating the individual impact of" the defendants' behavior. *In re Relafen, 221 F.R.D. at 281* (citing *In re Fla. Microsoft Antitrust Litig.*, 2002 WL 31423620, at *11 (Fla. Cir. Ct. Aug. 26, 2002)). The *Florida Microsoft* court held that Microsoft's claim that some class members were not harmed and may even have benefitted from its conduct presented, at most, matters of fact for the jury, and did not impact class certification. Perhaps most significantly, in a case decided since *Relafen*, a Florida appellate court has expressly accepted that uninjured class members do not automatically preclude class certification in end-payor class actions. *Miami-Dade Expressway v. Tropical, 250 So.3d 751 (Fla. App. 3 Dist. 2018)*.

Rollins, Inc. v. Butland, 951 So. 2d 860, 866 (Fla. Dist. Ct. App. 2006), upon which Allergan relies, is not to the contrary. The court there refused to allow the plaintiffs to demonstrate classwide impact merely through a "pattern and practice" of deception. *Id. at 873*. It found that such a method would insufficiently show that class members

[45] The facts in *Ludke v. Philip Morris Cos., 2001 Minn. Dist. LEXIS 2, 2001 WL 1673791 (Minn. Dist. Ct. Nov. 21, 2001)*, relied upon by *Relafen*, were similar to those in *Keating*.

were impacted by the same misconduct and therefore, in violation of due process, the defendants would be denied **[**86]** their ability to defend against the claims. No such issue exists here.

In sum, the laws in these three states, like the laws of the other states at issue, permit the use of EPPs' methodologies to determine classwide impact and damages and to cull before judgment any uninjured class members.[46]

(3) Vermont

HN40[] EPPs bring a claim of deception against Allergan under *Vermont's Consumer Protection Act, Vt. Stat. Ann. Tit. 9 §§ 2453 et seq.*, which requires, in addition to elements common to the other consumer protection claims, that the claimed deception "must be material, that is, likely to affect the consumer's conduct or decision regarding the product." *Carter, 716 A.2d at 23*. To address this, plaintiffs' proposed verdict form includes a question asking if "Allergan's deceptive misconduct was likely to affect the consumer's conduct or decision regarding Restasis." Allergan argues that the inclusion of Vermont's deception claim greatly increases the difficulty of managing a certified class.

To the extent defendant argues, as it did in a withdrawn motion to dismiss, that Vermont's statute requires consumer-facing conduct and that EPPs are unable to meet that burden, this argument must be saved for summary judgment. If, however, **[**87]** Allergan is asserting that the inclusion of the additional **[*38]** jury question makes the case unmanageable, I am unpersuaded. Adding this question, and an appropriate jury charge, would not be onerous, and obtaining a common answer would not defeat the predominance of the common issues. Indeed, I accept plaintiffs' representation that they would use the same proof to answer this question as they would all others. I therefore find that the inclusion of EPPs' claims under Vermont law does not defeat predominance.

(4) Scienter - Arkansas & Colorado

Defendant argues that the consumer protection statutes of Arkansas and Colorado require a showing of scienter, rendering the class unmanageable because "there would have to be a separate phase of trial or a unique set of jury instructions in order for the jury to determine what scienter was required." Opp. at 38-39. Though Allergan acknowledged at oral argument that the court would determine the level of scienter that is required and instruct the jury to apply it to the facts, it still argues that including states with a scienter requirement would cause individual issues in those states to predominate.

The parties agree that EPPs' claim, pursuant to the catch-all **[**88]** provision of the *Arkansas Deceptive Trade Practices Act, Ark. Code Ann. § 4-88-107(a)(10)*, does not contain a scienter requirement. Allergan argues, however, that plaintiffs' patent-related allegations fall more appropriately under a different subsection of the same statute, which prohibits "[k]nowingly making a false representation as to the characteristics, ingredients, uses, benefits, alterations, source, sponsorship, approval, or certification of goods or services or as to whether goods are original or new or of a particular standard, quality, grade, style, or model." *Ark. Code Ann. § 4-88-107(a)(1)*. Defendant argues that EPPs' Arkansas claim therefore requires a different standard for scienter than the other class claims, contributing to the overall complexity of jury instructions.

As an initial matter, because EPPs bring their claim under only the catch-all provision, defendant's argument is, in essence, a motion to dismiss that claim and is inappropriately raised in opposition to class certification. *See Amgen,*

[46] It is also worth noting that many courts have certified end-payor classes containing claims under the laws of Minnesota, Michigan, and/or Florida without any discussion of a higher standard of individual impact. *See, e.g., Hosp. Auth. of Metro. Gov't of Nashville and Davidson County, Tenn. v. Momenta Pharmaceuticals, Inc., 333 F.R.D. 390, 2019 WL 4573433 (M.D. Tenn. Sept. 20, 2019)*; *In re Lidoderm, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367*; *In re Terazosin Hydrochloride, 220 F.R.D. 672 (S.D. Fla. 2004)*. Indeed, in *In re Nexium, 297 F.R.D. at 175*, the very judge who wrote the decision in *Relafen*, did precisely that.

568 U.S. at 466. And, even if defendant ultimately manages to transform EPPs' current Arkansas claim into one under *subsection (a)(1)*, the inclusion of a single jury question as to whether defendant possessed the requisite scienter would not defeat predominance. **[**89]** *See In re Pharm. Indus. Aver. Whol. Price List, 252 F.R.D. at 100* ("In the context of plaintiffs' theory in this case, the varying standards governing a defendant's scienter do not pose insuperable management issues because the Court can ask the jury specific questions. . . .").

The same analysis applies to the Colorado statute under which plaintiffs sue, which requires a showing that defendant "knowingly" made a false representation. *Colo. Rev. Stat. § 6-1-105(1)(e)*.

In sum, the need for a jury to determine scienter under one or two statutes does not defeat predominance or render the class unmanageable.

(5) Enhanced Damages

Defendant raises concerns regarding the availability of enhanced damages, whether treble or punitive, under some states' antitrust and consumer protection statutes. At oral argument, it conceded that this issue "is not important by itself" and that it has pressed the issue only because it "adds to the manageability." Oral Arg. Tr. at 165.

EPPs propose three questions to account for states that require an additional finding for an award of enhanced damages. The inclusion of these questions, even when added to the other questions regarding liability and damages, does not cause individual issues to predominate or render the class unmanageable.

(6) [90] State Law Bans on Class Actions**

Allergan also argues that Colorado, Illinois, and Montana ban class actions, precluding certification of a class that includes those states' claims. *See 740 Ill. Comp. Stat. § 10/7(2)*; *Mont. Code Ann. § 30-14-133(1)*; *Colo. Rev. Stat. § 6-1-113(2)*. Having carefully reviewed the parties' supplemental papers, I find that this issue is a legal question common to all class members within each state. Whether the statutes of Colorado, Illinois, **[*39]** and Montana bar recovery through a class action is more appropriately resolved on summary judgment; my decision on these questions is unnecessary for the purposes of class certification. *See Amgen, 568 U.S. at 466*. For efficiency's sake, I will rely on the parties' current briefing on these questions when I consider defendant's forthcoming summary judgment motion.

In conclusion, EPPs have met their burden of demonstrating, through an extensive analysis of state law variations, that class certification does not present insuperable obstacles. None of the issues raised by Allergan is alone so material as to prevent certification. Even when taken together, the differences cited by Allergan address factual and legal questions common to the entire class, or discrete subsections thereof; are remediable by additional questions to the jury; **[**91]** and/or are more appropriately raised on summary judgment.

2. Superiority

HN41[] *Rule 23(b)(3)* permits class certification only where "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." The Rule provides a list of factors to be considered in this assessment:

> (A) the class members' interests in individually controlling the prosecution or defense of separate actions;
> (B) the extent and nature of any litigation concerning the controversy already begun by or against class members;
> (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and
> (D) the likely difficulties in managing a class action.

Fed. R. Civ. P. 23(b)(3)(A)-(D).

EPPs have shown that litigating this case as a class is superior to other methods of adjudication. None of the factors listed in *Rule 23(b)(3)* counsels against certification. First, since the class contains thousands of TPPs, some with relatively small claims, and at least one million consumers, "proceeding individually would be prohibitive," not advantageous, for the majority of class members. *See Seijas, 606 F.3d at 58*. Thus, "substituting a single class action for numerous trials in a matter involving substantial common legal issues and factual **[**92]** issues susceptible to generalized proof will achieve significant economies of 'time, effort and expense, and promote uniformity of decision.'" *In re U.S. Foodservice Inc., 729 F.3d at 130-31* (quoting *Fed. R. Civ. P. 23* advisory committee's notes).

Second, the only cases brought by or against class members regarding this controversy are pending before me. Third, I do not see any reason why this litigation cannot remain concentrated in this court. Plaintiffs have effectively litigated these actions before me, and defendant has not argued that they cannot continue to do so. Finally, no one has a greater interest than I do in ensuring that this class action is manageable before certifying it. Based on my familiarity with the case, I am confident that this litigation can be managed as a class action.

Defendant makes two arguments against a finding of superiority. It first relies on its assertions, raised in the context of predominance, regarding the need for individualized inquiries. As set forth above, the individualized determinations required by this class action are relatively minimal. They do not make this class action unmanageable or inappropriate.

Nor am I persuaded by defendant's second argument, that the mere possibility of a *parens patriae* action **[**93]** in an antitrust case renders a class action an inferior mechanism to resolve EPPs' claim. *See Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 266, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*. This is especially true where the Federal Trade Commission ("FTC") and New York Attorney General chose not to bring such an action against Allergan regarding Restasis. *See Bryan v. Amrep Corp., 429 F. Supp. 313, 318-19 (S.D.N.Y. 1977)* ("The possibility that the FTC may at some future time secure refunds for the class is not an adequate reason to deny a class determination in this case, which seeks present and independent relief.").

[*40] C. Ascertainability

HN42[] In the Second Circuit, the ascertainability doctrine "requires only that a class be defined using objective criteria that establish a membership with definite boundaries." *In re Petrobras, 862 F.3d at 264*. As defendant does not contest, that "modest threshold" is easily met here. *See id. at 269*. The class is objectively defined as consisting of any person or entity who purchased Restasis not for resale in specific states during a discrete period. *See In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *13-14*.

V. APPOINTING CLASS COUNSEL AND CLASS REPRESENTATIVES

HN43[] *Rule 23(g)* requires me to appoint class counsel at the time of certification. In doing so, I must consider

> (i) the work counsel has done in identifying or investigating potential claims in the action;
>
> (ii) counsel's experience in handling class actions, other **[**94]** complex litigation, and the types of claims asserted in the action;
> (iii) counsel's knowledge of the applicable law; and
> (iv) the resources that counsel will commit to representing the class.

Fed. R. Civ. P. 23(g)(1)(A)(i)-(iv).

EPPs' current interim counsel seek appointment as class counsel. As discussed above in the context of *Rule 23(a)(4)*'s adequacy requirement, it is undisputed that these lawyers satisfy the requirements of *Rule 23(g)(1)(A)*. I carefully reviewed the qualifications, experience, and resources of these attorneys when I appointed them to their interim roles, and the attorneys' work since then, including on this motion, serves as further assurance that they are extremely qualified and able to represent the certified class. I have no hesitation that these lawyers will "fairly and adequately represent the interests of the class." *Fed. R. Civ. P. 23(g)(4)*. Therefore, Girard Sharp LLP, Lieff Cabraser Heimann & Bernstein, LLP, and Joseph Saveri Law Firm, Inc. are appointed as co-lead counsel for class plaintiffs, and Zwerling, Schachter & Zwerling, LLP is appointed as liaison counsel for the class.

Additionally, 1199SEIU National Benefit Fund; 1199SEIU Greater New York Benefit Fund; 1199SEIU National Benefit Fund for Home Care Workers; 1199SEIU Licensed Practical **[**95]** Nurses Welfare Fund; American Federation of State, County, and Municipal Employees District Council 37 Health and Security Plan; Fraternal Order of Police, Miami Lodge 20, Insurance Trust Fund; Ironworkers Local 383 Health Care Plan; Self-Insured Schools of California; Sergeants Benevolent Association Health & Welfare Fund; St. Paul Electrical Workers' Health Plan; and United Food and Commercial Workers Unions and Employers Midwest Health Benefits Fund are appointed as class representatives.

VI. CONCLUSION

Plaintiffs' motion for class certification is granted. The class is defined as:

> All persons or entities who indirectly purchased, paid and/or provided reimbursement for some or all of the purchase price for Restasis, other than for resale, who made their purchases in Arizona, Arkansas, California, Colorado, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine*, Massachusetts*, Michigan, Minnesota, Mississippi, Missouri*, Montana*, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont*, West Virginia, and Wisconsin from May 1, 2015, through the present (in the case of Arkansas **[**96]** only, July 31, 2017), for consumption by themselves, their families, or their members, employees, insureds, participants, or beneficiaries.

In the states marked with an asterisk, class members are only consumers, not TPPs. Excluded from the class are:

> Allergan, its officers, directors, employees, subsidiaries, and affiliates; all federal and state government entities except for cities, towns, municipalities, or counties with self-funded prescription drug plans; all persons or entities who purchased Restasis for purposes of resale or directly from Allergan of **[*41]** its affiliates; fully insured health plans, *i.e.*, plans that purchased insurance covering 100 percent of their reimbursement obligations to members; any "flat copay" consumers who purchased Restasis only via a fixed dollar copayment that does not vary on the basis of the drug's status as brand or generic; PBMs; and all judges assigned to this case and their chambers staff and any members of the judges' or chambers staff's immediate families.

HN44[] When a court certifies a *Rule 23(b)(3)* class, *Rule 23(c)(2)(B)* provides that "the court must direct to class members the best notice practicable under the circumstances, including individual notice to all members who can **[**97]** be identified through reasonable effort." Plaintiffs are directed to submit to the court a proposed plan for notice to class members, which should include a proposed form of notice.

[*809] ORDER RE DEFENDANTS' MOTION TO DISMISS

[Re: ECF 56]

The instant litigation comprises two separately-filed cases that the Court has consolidated. *See* ECF 42 (consolidating *Kumandan et al v. Google LLC et al*, Case No. 19-cv-04286-BLF and *Galvan et al v. Google LLC et al*, Case No. 19-cv-04360-BLF). Both cases charge Defendants Google LLC and Alphabet, Inc. with unlawfully intercepting, recording, disclosing, and using the private conversations of thousands of users of the Google Assistant software. Presently before the Court is Defendants' motion to dismiss the entire consolidated suit. ECF 56. Having considered the parties' arguments and the applicable law, the Court GRANTS **[**3]** IN PART and DENIES IN PART the motion to dismiss; further, any dismissals are WITH LEAVE TO AMEND.

I. BACKGROUND

This is a putative consumer class action concerning the Google Assistant, a virtual assistant software developed by Defendants Google LLC and Alphabet, Inc. for use on various "Google Assistant Enabled Devices" ("GAEDs") manufactured by Defendants and by third parties. Specifically, the operative Consolidated Amended Class Action Complaint ("Consolidated FAC"), which was filed on October 25, 2019, ECF 48, contains the following allegations:

[*810] The Google Assistant is a voice-activated software, which means that users can ask questions of and give instructions to the Google Assistant using their voices. ECF 48 ("Consol. FAC") ¶¶ 2, 22. This software comes preloaded onto certain devices, such as the Google Home, the Google Pixel smartphones, and third party-manufactured smartphones that use the Google Android operating system; it can also be installed on a range of devices. *Id.* ¶ 2. Because the Google Assistant is voice-activated, it is constantly listening for "hotwords"—i.e., "Okay Google" or "Hey Google." *Id.* ¶ 22. It does this by recording and analyzing short snippets of audio, **[**4]** which are stored locally in the Google Assistant Enabled Device's random-access memory ("RAM"); these snippets are continuously overwritten, however, if no hotwords are detected. *Id.* ¶ 23. When the hotwords are detected, the Google Assistant switches into "active listening" mode, meaning that it begins recording and analyzing audio in order to carry out the user's command. *Id.* ¶ 24. The Google Assistant can also be manually activated by pressing a button on the device. *Id.*

Plaintiffs allege that Defendants also keep and use the audio recordings for two purposes other than carrying out the user's command: (1) to target personalized advertising to users, and (2) to improve the voice recognition capabilities of the Google Assistant. *Id.* ¶ 25. The focus of this suit is the latter. Citing a 2019 news article by VRT NWS, Plaintiffs allege that the Google Assistant produces a script of each audio recording that it stores; Defendants then task human subcontractors with comparing the script to the audio recording to check the accuracy of the Google Assistant's interpretation. *Id.* ¶ 35. In a blog post responding to this and similar reports, Google apparently confirmed that it uses human reviewers **[**5]** to analyze audio recordings, but stated that only "0.2 percent" of all audio recordings are subject to such analysis. *Id.* ¶ 39.

Sometimes, the Google Assistant may be triggered into active listening mode when the Google Assistant misperceives other words as the hotwords. This is known as a "false accept." *Id.* ¶ 39. Plaintiffs believe that in such situations, Defendants do not destroy the audio recordings, but rather continue to use them for personalized advertising and to analyze the accuracy of the Google Assistant—just as Defendants would do with authorized recordings. *Id.* ¶¶ 38, 41. As evidence, Plaintiffs point to the investigation carried out by VRT NWS, in which VRT NWS reviewed "more than a thousand" audio recordings and "identified 153 conversations" that were recorded due to false accepts. *Id.* ¶ 36.

This suit is based on Defendants' use of audio recordings in "false accept" situations. In Plaintiffs' view, such use is an invasion of privacy, especially because many of the recorded conversations take place in individuals' homes. *Id.* ¶¶ 27-30. Plaintiffs also believe that this practice contravenes the privacy assurances that Defendants make to users in their Privacy Policy. *Id.* ***[**6]*** ¶ 31. Finally, Plaintiffs are particularly troubled by the fact that some of the recordings include the conversations of children because they do not believe that these children can consent to being recorded. *Id.* ¶ 42.

Based on the foregoing, Plaintiffs have sued Google LLC and its parent company Alphabet Inc. under various state and federal laws. There are 12 claims in the Consolidated FAC: (1) violation of the federal *Wiretap Act, 18 U.S.C. §§ 2510 et seq.*; (2) violation of the federal *Stored Communications Act ("SCA"), 18 U.S.C. §§ 2701 et seq.*; (3) violation of the *California Invasion of Privacy Act ("CIPA"), Cal. Penal Code § 631(a)*; (4) violation of the CIPA, *Cal. Penal Code § 632*; (5) intrusion upon seclusion **[*811]** under California common law; (6) invasion of privacy, in violation of *Article I, Section 1 of the California Constitution*; (7) breach of contract under California common law; (8) breach of express warranty under *Cal. Comm. Code § 2313*; (9) breach of the implied warranty of merchantability under *Cal. Comm. Code § 2314*; (10) violation of the *Magnuson-Moss Warranty Act, 15 U.S.C. §§ 2301 et seq.*; (11) violation of the California Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200 et seq.*; (12) request for declaratory judgment under the *Declaratory Judgment Act, 28 U.S.C. §§ 2201 et seq.* Consol. FAC ¶¶ 76-252.

These claims are brought by five Named Plaintiffs:

- Plaintiff Asif Kumandan is a resident of Kings County, New York. Consol. FAC **[**7]** ¶ 13. He alleges that he owned a Google Pixel smartphone during the Class Period (defined below) and that he "interacted with the Google Assistant on his Google Pixel repeatedly." *Id.* ¶ 52.

- Plaintiff Melissa Spurr is a resident of Union County, New York. *Id.* ¶ 14. She alleges that she owned a Google Home device during the Class Period and that "she interacted with this Google Home device repeatedly." *Id.* ¶ 51.

- Plaintiff B.S. is a minor member of Plaintiff Spurr's household; as such, she has allegedly interacted with Plaintiff Spurr's Google Home device during the Class Period. *Id.* ¶¶ 15, 51. She brings suit by and through her legal guardian, Plaintiff Spurr. *Id.* ¶ 15.

- E.G., is a member of Plaintiff Galvan's household; she was a minor during a portion of the Class Period but now brings suit on her own. *Id.* ¶¶ 17, 53. Plaintiff E.G. alleges that she owned a Samsung Galaxy Tab device on which she activated the Google Assistant. *Id.* ¶ 53. She further alleges that she interacted with the Samsung Galaxy Tab device repeatedly during the Class Period. *Id.*

- Lourdes Galvan is a resident of Los Angeles County, California. *Id.* ¶ 16. She alleges that she interacted with Plaintiff E.G.'s Samsung **[**8]** Galaxy Tab device during the Class Period. *Id.* ¶ 53.

To be precise, all five Named Plaintiffs assert Counts 1-7 and 11-12 on behalf of themselves and the following nationwide "Class":

> All individual purchasers of a Google Assistant Enabled Device, who reside in the United States and its territories and members of their households, whose conversations were obtained by Google without their consent or authorization and/or were shared with third parties without their consent from at least as early as May 18, 2016 to the present, or during the applicable statute of limitations period (the "Class Period").

Consol. FAC ¶ 60. As for Counts 8, 9, and 10, Plaintiffs Kumadan and Spurr assert these claims on behalf of themselves and the "Google Manufactured Device Subclass," which is defined as:

> A Subclass of individual purchasers of a Google Manufactured Device, who reside in the United States and its territories, and members of their households, whose conversations were obtained by Google without their consent or authorization and/or were shared with third parties without their consent during the Class Period.

Id.

Defendants now move to dismiss the Consolidated FAC in full pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. ECF 56 ("Mot.") **[**9]** at 1. The motion has been fully briefed and was heard on April 9, 2020. **[*812]** ECF 58 ("Opp."); ECF 61 ("Reply"); ECF 75 (hearing).

II. LEGAL STANDARD

Rule 8(a)(2) of the Federal Rules of Civil Procedure requires a complaint to include "a short and plain statement of the claim showing that the pleader is entitled to relief." A complaint that fails to meet this standard may be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. In other words, "[a] motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted 'tests the legal sufficiency of a claim.'" *Conservation Force v. Salazar, 646 F.3d 1240, 1241-42 (9th Cir. 2011)* (quoting *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001))*. To survive a *Rule 12(b)(6)* motion, a complaint must contain "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal quotation marks omitted).

A court's review on a 12(b)(6) motion to dismiss "is limited to the complaint, materials incorporated into the complaint by reference, and matters of which the court may take judicial notice." **[**10]** *Cedar Point Nursery v. Shiroma, 923 F.3d 524, 530 (9th Cir. 2019)* (citing *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007))*. Moreover, in evaluating the complaint, the court must "accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. At the same time, a court need not accept as true "allegations that contradict matters properly subject to judicial notice" or "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (internal quotation marks and citations omitted).

III. REQUEST FOR JUDICIAL NOTICE AND INCORPORATION BY REFERENCE

Defendants have submitted six exhibits that they ask the Court to review in ruling on their motion to dismiss. *See* ECF 56-1 ¶¶ 2-7; *id.* at Ex. A-F. Defendants believe these exhibits are either incorporated by reference by the Consolidated FAC or subject to judicial notice.

There are two doctrines that permit district courts to consider material outside the pleadings without converting a motion to dismiss into a motion for summary judgment: judicial notice under *Federal Rule of Evidence 201* and incorporation by reference. *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)*, *cert. denied sub nom. Hagan v. Khoja, 139 S. Ct. 2615, 204 L. Ed. 2d 264 (2019)*. The judicial notice doctrine permits a court to take judicial notice of matters that are "not subject to reasonable dispute." *Fed. R. Evid. 201(b)*. A fact **[**11]** is "not subject to reasonable dispute" if it is "generally known," or "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)(1)-(2)*. However, "[j]ust because the document itself is susceptible to judicial notice does not mean that every assertion of fact within **[*813]** that document is judicially noticeable for its truth." *Khoja, 899 F.3d at 999*. For instance, though public records are generally subject to judicial notice, a court may not take judicial notice of disputed facts within public records. *Id.*

"[I]ncorporation-by-reference is a judicially created doctrine that treats certain documents as though they are part of the complaint itself." *Khoja, 899 F.3d at 1002*. This doctrine permits a court to consider a document "if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*. A court generally "may assume an incorporated document's contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *Khoja, 899 F.3d at 1003* (internal quotations omitted). Because all inferences must still be drawn in the nonmoving party's favor, however, "it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded **[**12]** complaint." *Id.*

Having reviewed the basic principles of judicial notice and incorporation by reference, the Court turns to each of the six documents Defendants have submitted. Plaintiffs have not opposed the Court's consideration of any of the documents at issue.

Exhibit A is a copy of the 2019 news report by VRT NWS cited by Plaintiffs in Consolidated FAC. ECF 56-1, Ex. A; *see* Consol. FAC ¶¶ 34-38. Defendants ask the Court to treat the article as incorporated by reference; Defendants also argue that the article is subject to judicial notice, as it "appears on [a] publicly accessible website." Mot. at 2-3. It is well-established that "[c]ourts may take judicial notice of publications introduced to indicate what was in the public realm at the time, not whether the contents of those articles were in fact true." *Von Saher v. Norton Simon Museum of Art at Pasadena, 592 F.3d 954, 960 (9th Cir. 2010)* (internal quotations omitted); *see also Packsys, S.A. de C.V. v. Exportadora de Sal, S.A. de C.V., 899 F.3d 1081, 1087 n.2 (9th Cir. 2018)* ("We take notice of the fact of publication, but do not assume the truth of the article's contents."). The Court therefore takes judicial notice of the fact that VRT NWS published each of the allegations contained in the article, but not of the truth of those allegations. As Defendants do not ask the Court to treat the contents of the article **[**13]** as true—indeed, they dispute its truth—the Court need not reach the issue of incorporation by reference. The request for judicial notice is GRANTED, with the caveats just described.

Defendants similarly ask the Court to consider Exhibit B—the Google blog post referenced in the Consolidated FAC, *see* Consol. FAC ¶ 39—as incorporated by reference or as a judicially-noticeable website. Mot. at 2-3; ECF 56-1, Ex. B. Again, Defendants do not ask the Court to treat the contents of the blog post as true. Thus, as with the VRT NWS article, the Court takes judicial notice of the blog post for the fact that Google made the statements it contains, but not for the truth of those statements. The request for judicial notice is GRANTED as stated; the Court need not decide whether the blog post was incorporated by reference.

Exhibits C and D are copies of Defendants' Terms of Service ("TOS") and Privacy Policy, respectively. ECF 56-1, Ex. C (Google Terms of Service), Ex. D (Privacy Policy). These documents "form the basis" for Plaintiffs' claims for breach of contract (Count 7) and breach of express warranty (Count 8), as they contain the contract terms and warranty terms that were allegedly breached. **[**14]** *See* Consol. FAC ¶¶ 189-199, 210. Defendants' request to incorporate by reference the Terms of Service **[*814]** and Privacy Policy is therefore GRANTED. *See Ritchie, 342 F.3d at 908*; *accord Bass v. Facebook, Inc., 394 F. Supp. 3d 1024, 1037 n.1 (N.D. Cal. 2019)* (granting Facebook's request to incorporate by reference the Terms of Service because the consolidated complaint relied upon them to allege the breach of contract claims and statutory claims).

Lastly, Exhibit E purports to be a copy of the "Google Home Warranty — United States" and Exhibit F purports to be a copy of the "Hardware limited warranty for Android Hardware devices, including the Pixel smartphone." ECF 56-1 ¶¶ 6-7; *see id.* Ex. E-F. These documents are not incorporated by reference by the Consolidated FAC; rather, Defendants ask the Court take judicial notice of them because "they appear on publicly accessible websites and their authenticity cannot be reasonably questioned." Mot. at 3 (citing *Datel Holdings Ltd. v. Microsoft Corp., 712 F. Supp. 2d 974, 983-84 (N.D. Cal. 2010))*. The Court agrees that the existence of these documents is a judicially noticeable fact, and therefore GRANTS Defendants' unopposed request. *See, e.g., Opperman v. Path, Inc., 84 F. Supp. 3d 962, 976 (N.D. Cal. 2015)* (collecting cases in which courts have taken judicial notice of publicly available policies and agreements). The Court notes, however, that its judicial notice does not establish **[**15]** that these documents are "valid or binding contracts." *Datel Holdings, 712 F. Supp. 2d at 984*.

IV. DISCUSSION

Defendants move to dismiss all the claims in the Consolidated FAC; Plaintiffs, of course, oppose the motion. Because the legal requirements for each claim differ substantially, the Court considers the sufficiency of Plaintiffs' allegations as to each set of claims *seriatim*.

A. Count 1: Federal Wiretap Act

The Federal Wiretap Act ("Wiretap Act"), *18 U.S.C. §§ 2510-2520*, "is designed to prohibit 'all wiretapping and electronic surveillance by persons other than duly authorized law enforcement officials engaged in investigation of specified types of major crimes.'" *Greenfield v. Kootenai County, 752 F.2d 1387, 1388 (9th Cir. 1985)* (quoting S. Rep. No. 1097, 90th Cong., 2d Sess.). In Count 1 of the Consolidated FAC, Plaintiffs allege that the Defendants violated *18 U.S.C. 2511(1)(a)*, which makes it unlawful for a person to "intentionally intercept[], endeavor[] to intercept, or procure[] any other person to intercept or endeavor to intercept, any wire, oral, or electronic communication." *Id. § 2511(1)(a)*; *see* Consol. FAC ¶¶ 88-91. The Wiretap Act also imposes liability on any person who "intentionally discloses" to "any other person the contents of any wire, oral, or electronic communication," or "intentionally uses" the "contents of any **[**16]** wire, oral or electronic communication" while "knowing or having reason to know that the information was obtained through the [unlawful] interception," *id. § 2511(1)(c)-(d)*; Plaintiffs allege that Defendants also violate this provision. *See* Consol. FAC ¶¶ 92-95

Defendants contend that Plaintiffs have failed to adequately plead either of their theories because (1) Plaintiffs have not shown that any interception was "intentional" rather than inadvertent, (2) Plaintiffs have not identified any specific "oral communications" that were allegedly intercepted, (3) Defendants' conduct falls within the "ordinary course of business exception," and (4) Plaintiffs have not shown that Defendants used or disclosed information they knew to be unlawfully obtained. Mot. at 4-8. The Court addresses each argument below.

[*815] i. "Intentional" Interception

As the text of the statute makes clear, the Wiretap Act prohibits only interception that is "intentional, as opposed to inadvertent." *Sunbelt Rentals, Inc. v. Victor, 43 F. Supp. 3d 1026, 1030 (N.D. Cal. 2014)* (citing *Sanders v. Robert Bosch Corp., 38 F.3d 736, 742-43 (4th Cir. 1994))*. Defendants emphasize that Plaintiffs' claim is based only on "false accepts," which Defendants maintain are definitionally inadvertent rather than intentional. Mot. at 4-5. That is, false accepts are a defect rather than an intended **[**17]** feature of the Google Assistant. *Id.* Plaintiffs respond that Defendants' knowledge of the defect combined with its failure to remedy it or to destroy the recordings suffice to make its conduct "intentional" under the statute. ECF 58 ("Opp.").

The intent requirement under § 2511 requires the interception to have been "purposeful[] and deliberate[]" and not "a result of accident or mistake." United States v. Christensen, 828 F.3d 763, 774 (9th Cir. 2015); *accord* In re Pharmatrak, Inc., 329 F.3d 9, 23 (1st Cir. 2003) ("An act is not intentional if it is the product of inadvertence or mistake."). Although inadvertent interceptions are plainly not actionable, several courts have rejected a defendant's claim that the interception was inadvertent where the defendant was aware it was occurring. The case most similar to this one is Backhaut v. Apple, Inc., 74 F. Supp. 3d 1033 (N.D. Cal. 2014), in which the court allowed a Wiretap Act claim to proceed despite Apple's contention that it had "mistakenly" intercepted the messages at issue. Id. at 1044. The court held that Plaintiffs' allegations that Apple knowingly allowed the defect to recur and "even charged consumers $19 to 'fix' the problem" were sufficient to "foreclose[] the possibility that Apple's actions were the product of inadvertence or mistake." *Id.* This reasoning is consistent with that of courts outside this Circuit. *See* ***[**18]*** Abraham v. Cty. of Greenville, S.C., 237 F.3d 386, 392 (4th Cir. 2001) (upholding a jury's finding of intent under § 2511 based on evidence that the County knew it "might be inadvertently eavesdropping" on judges' conversations using a recording system intended only for "administrative personnel and the guards in the jail" yet never informed the judges); Anderson v. City of Columbus, Georgia, 374 F. Supp. 2d 1240, 1247 (M.D. Ga. 2005) (denying summary judgment on the issue of intent under § 2511 because "evidence exists that Turner was aware of the glitch in the recording system when the headsets were used. Therefore, a reasonable jury could conclude that Turner knew that the system would record Plaintiff, and she intentionally failed to tell Plaintiff how to prevent the recording").

The Court agrees with Plaintiffs and these various courts that interceptions may be considered intentional where a defendant is aware of the defect causing interception and takes no remedial action. And indeed, the Consolidated FAC alleges that Defendants are aware of false accepts and the recordings they cause to be made, yet have not fixed the problem. *See* Consol. FAC ¶¶ 38-39. At the same time, the Court finds persuasive Defendants' argument that some *de minimis* error rate in the Google Assistant may be tolerated without exposing them to liability; after all, **[**19]** even the human ear misinterprets words and sounds at times. For that reason, the degree of error will likely be material to the ultimate factual determination of whether Defendants' conduct was intentional. At the motion to dismiss stage, however—construing the allegations in Plaintiffs' favor—the Court will not assume that the rate of false accepts is *de minimus*.

Besides, Plaintiffs' objection is not only to Defendants' failure to prevent recordings **[*816]** caused false accepts—which may be a tall order—but also to Defendants' failure to destroy the audio recordings produced by false accepts. Plaintiffs allege that Defendants persist in using the recordings for personalized advertising or to improve the functionality of the Google Assistant, even after they become aware of their provenance. FAC ¶¶ 38-39. That Defendants allegedly do not destroy the audio recordings further supports an inference that the interception is "intentional."

The Court therefore rejects Defendants' argument that Plaintiffs have not adequately pleaded "intentional" interception. To be clear, the Court does not hold that inaction in the face of a known design defect necessarily makes an interception "intentional" under **[**20]** the Wiretap Act—only that the facts alleged here are sufficient to survive a motion to dismiss.

ii. "Oral Communications"

Defendants' second argument for dismissal concerns the requirement that a plaintiff show interception of a "wire, oral, or electronic communication." 18 U.S.C. § 2511(1)(a). Defendants argue that Plaintiffs' claim, despite being premised on the alleged interception of "oral communications," has failed "to identify a single oral communication that they contend was intercepted." Mot. at 5-6. Moreover, the Wiretap Act defines "oral communication" as "any oral communication uttered by a person exhibiting an expectation that such communication is not subject to interception under circumstances justifying such expectation," 18 U.S.C. § 2510(2); i.e., an oral communication in which the speaker had a "reasonable expectation of privacy," United States v. McIntyre, 582 F.2d 1221, 1223 (9th Cir. 1978). Defendants therefore assert that Plaintiffs must not only identify intercepted oral communications, they must also show that those communications were subject to a reasonable expectation of privacy. Mot. at 5-6.

In response, Plaintiffs point first to the 153 recordings due to false accepts that VRT NWS discovered in the course of reporting its 2019 news piece. Consol. FAC § 36. To show that these **[**21]** conversations were subject to a reasonable expectation of privacy, VRT NWS's description of these conversations as including "bedroom conversations, conversations between parents and their children," and "professional phone calls containing lots of private information." *Id.* But Plaintiffs do not allege that any of these 153 recordings covered Plaintiffs' communications rather than the communications of unnamed third parties. Hence, these allegations do not suffice to show that Plaintiffs' own oral communications were intercepted, which they must do. *See Lewis v. Casey, 518 U.S. 343, 357, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996)* ("[N]amed plaintiffs who represent a class must allege and show that they personally have been injured, not that injury has been suffered by other, unidentified members of the class to which they belong and which they purport to represent.") (internal quotations omitted).

As for the allegations regarding the Named Plaintiffs themselves, the Court finds these to be too vague. *See* Consol. FAC ¶¶ 51-53. At the outset, the Court rejects Defendants' suggestion that Plaintiffs must identify specific communications that Plaintiffs reasonably believed to be private and that were wrongly recorded. The Court is not convinced that Plaintiffs are **[**22]** required to produce such details at the pleading stage, prior to discovery. At the motion hearing, Defendants represented that through their accounts, users can view all their past conversations with the Google Assistant, including false accepts. If that is the case, Plaintiffs are advised to avail themselves of that information. But the Court believes it would be enough for Plaintiffs to show that they **[*817]** frequently have oral communications near their respective Google Assistant Enabled Devices under circumstances giving rise to a reasonable expectation of privacy. That, coupled with the allegations that false accepts routinely occur, would support an inference that Plaintiffs had private conversations intercepted.

In their Opposition, Plaintiffs maintain that they have done this. Opp. at 6. Not so. The Consolidated FAC contains insufficient detail regarding the particular circumstances under which Plaintiffs used their Google Assistant Enabled Devices. The Consolidated FAC merely alleges that Plaintiffs' conversations were "confidential" without alleging any facts regarding the participants in the conversations, the locations of the conversations, or examples of content from the conversations. **[**23]** *Cf. In re Yahoo Mail Litig., 7 F. Supp. 3d 1016, 1041 (N.D. Cal. 2014)* (finding plaintiffs' allegations that their emails were "private" to be "fatally conclusory"). Nor does the bare allegation that each Named Plaintiff "interacted with" their device "repeatedly" establish that those devices necessarily picked up private conversations, or that any expectation of privacy was reasonable. *Cf. Sunbelt Rentals, Inc. v. Victor, 43 F. Supp. 3d 1026, 1035 (N.D. Cal. 2014)* ("[T]here is no legally protected privacy interest and reasonable expectation of privacy in electronic messages, in general. Rather, a privacy interest can exist, if at all, only with respect to the content of those communications.") (internal quotations omitted).

This problem is especially glaring for Plaintiffs Kumandan, Galvan, and E.G., who allegedly interacted with smartphones. After all, smartphones are by their nature mobile and are frequently used in public places. The allegations as to Plaintiffs Spurr and B.S. also fall short. Though they allegedly interacted with a Google Home device—which presumably is less mobile—Plaintiffs make no allegations as to where the Google Home device was located and how Plaintiffs used it. Consol. FAC ¶ 51. Under these circumstances, the Court cannot infer that the Plaintiffs themselves had "oral communications" intercepted, **[**24]** as necessary under the Wiretap Act.

Accordingly, the Court must GRANT Defendants' motion to dismiss. That dismissal is with LEAVE TO AMEND, as leave ordinarily must be granted in this Circuit and Defendants have articulated no reason it should not be. *See Eminence Capital, LLC v. Aspeon, Inc., 316 F.3d 1048, 1052 (9th Cir. 2003)* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962))*.

iii. Ordinary Course of Business Exception

Although the Court must dismiss the Wiretap Act claim for failure to adequately plead "oral communications," the Court proceeds to address Defendants' other proposed grounds for dismissal. The next of these is Defendants' contention that the "ordinary course of business exception" inoculates its alleged interceptions here. The Wiretap Act defines "intercept" as "the aural or other acquisition of the contents of any wire, electronic, or oral communication through the use of any electronic, mechanical, or other device." 18 U.S.C. § 2510(4). In other words, there is no illegal interception without the use of a "device." *Accord* In re Yahoo Mail Litig., 7 F. Supp. 3d at 1026. The Wiretap Act then goes on to carve out from its definition of "device" "any telephone or telegraph instrument, equipment or facility, or any component thereof . . . being used by a provider of wire or electronic communication service *in the ordinary course of business*." *Id.* **[**25]** § 2510(5)(a)(ii); the "ordinary course of business" exception refers to this carve-out.

[*818] Defendants claim that their alleged conduct falls within the ordinary course of business exception because "the Assistant cannot operate unless it records and transmits audio to Google." Mot. at 7. They further assert that any false accepts are "incidental to" the necessary transmissions. *Id.* (citing *In re Google Inc. Gmail Litig., No. 13-MD-02430-LHK, 2013 U.S. Dist. LEXIS 172784, 2013 WL 5423918 (N.D. Cal. Sept. 26, 2013))*.

In response, Plaintiffs contend that Defendants are not a provider of "electronic communication service" ("ECS") as required for the exception to apply. Opp. at 7 (quoting 18 U.S.C. § 2510(5)(a)(ii)). The Wiretap Act defines "electronic communication service" as "any service which provides to users thereof the ability to send or receive wire or electronic communications." 18 U.S.C. § 2510(15). Of relevance here, "oral communications" are distinct from both "wire communications" and "electronic communications" under the Wiretap Act. *See* 18 U.S.C. §§ 2510(1), (2), (12); *Siripongs v. Calderon, 35 F.3d 1308, 1320 (9th Cir. 1994)* (treating the intercepted communication as an "oral communication" because police "acquired only what they recorded Siripongs saying into the mouthpiece, not what was transmitted over the wire"). Plaintiffs maintain that Defendants "cannot be considered" an ECS provider "in the instance **[**26]** when it is recording Plaintiffs' private oral communication" because oral communications are not "wire or electronic communications." Opp. at 7.

Plaintiffs misunderstand Defendants' argument, however. The "wire or electronic communication service" that the Google Assistant purports to provide is the transmission of valid commands from the user to Defendants' servers, which carry out the commands. These commands arguably constitute "electronic communications," which "means any transfer of signs, signals, writing, images, sounds, data, or intelligence of any nature transmitted in whole or in part by a wire, radio, electromagnetic, photoelectronic or photooptical system that affects interstate or foreign commerce." 18 U.S.C. § 2510(12). In simple terms—and as described in the Consolidated FAC, *see id.* ¶ 24—the Google Assistant translates a user's verbal command (e.g., "Hey Google, what is the weather forecast?") into electronic signals and then transmits those signals to the recipient, the relevant Google server. The Google Assistant could thus be seen as providing an electronic communication service.[1]

Nevertheless, the Court need not conclusively decide the merits of this issue, which has not been treated in any depth **[**27]** by the parties. Even assuming the Google Assistant is an electronic communication service provider, the ordinary course of business exception does not preclude Plaintiffs' Wiretap Act claims.

As Defendants themselves acknowledge, "the ordinary course of business exception . . . offers protection from liability only where an electronic communication service provider's interception *facilitates* the transmission of the communication at issue or *is incidental to* the transmission of such communication." *In re Google Inc. Gmail Litig., 2013 U.S. Dist. LEXIS 172784, 2013 WL 5423918, at *8*. False accepts certainly do not "facilitate" the functioning of the Google Assistant; they are, in both parties' **[*819]** views, produced by the malfunctioning of the Google Assistant. The question becomes, then, whether false accepts are so unavoidable that they could fairly be considered "incidental to" the Google Assistant's ordinary functioning. But as noted earlier, the degree to which that false accepts are unavoidable is a factual issue, unsuited for resolution at the pleading stage. *See* *Khoja, 899 F.3d at 1003*. Moreover, the Court is not aware of any cases applying the exception to interceptions that are allegedly the product of a defect. Hence, even if Defendants are providers of electronic communication services, **[**28]** there is a

[1] Defendants point out that Plaintiffs allege in the Consolidated FAC that the Google Assistant is an "electronic communication service" within the meaning of the SCA, 18 U.S.C. § 2702(a). Consol. FAC ¶ 112. Although true, this allegation is not dispositive. First of all, Plaintiffs are entitled to plead claims in the alternative: Plaintiffs may have pleaded that SCA claim in the event the Wiretap Act claim was found to be precluded by the ordinary course of business exception. Besides, the Court is not required to accept the purely legal conclusion offered by the allegation.

question of fact as to whether false accepts are "incidental to" the transmission of legitimate commands by the Google Assistant. Plaintiffs' Wiretap Act claim is not subject to dismissal on the basis of the ordinary course of business exception.

iv. Use or Disclosure

Plaintiffs' Wiretap Act claim also asserts the theory that Defendants "used" and "disclosed" unlawfully intercepted information, which is itself unlawful under *18 U.S.C. §§ 2511(1)(c)-(d)*. *See generally* *Noel v. Hall, 568 F.3d 743, 749 (9th Cir. 2009)*. Of relevance to this claim, Plaintiffs allege that Defendants used the unlawfully created audio recordings to personalize advertising and to improve the voice recognition capabilities of the Google Assistant. *See* Consol. FAC ¶¶ 41, 95. Plaintiffs further allege that, in order to accomplish the latter, Defendants disclosed the audio recordings to third party subcontractors. *Id.* ¶¶ 35-39.

Defendants move to dismiss this theory on two grounds. First, they correctly point out that liability for disclosure or use is contingent on the original interception being unlawful. *Noel, 568 F.3d at 751*; *see* Mot. at 8. Because the Court has just determined that Plaintiffs have not adequately pleaded the unlawfulness of the interceptions, their use or disclosure claim likewise **[**29]** fails.

Defendants' second argument implicates the requirement under *§§ 2511(1)(c)-(d)* that a defendant "*know[] or hav[e] reason to know* that the information was obtained through" an interception that violates the Wiretap Act. *18 U.S.C. §§ 2511(1)(c)-(d)*. Defendants maintain that Plaintiffs "have not and cannot allege that Google knew that the information allegedly disclosed or used came from an intercepted communication (rather than a communication intended for the Assistant) or that such interception was prohibited by the Wiretap Act." Mot. at 8. The argument appears to be that Defendants reasonably believed each audio recording to be the result of a legitimate command at the time when it sent the recording to a third party for analysis or used it to customize advertising.

To be sure, Defendants may mount a defense based on this argument. But Plaintiffs have specifically pleaded that "even after Google discovers that it has wrongly recorded a conversation, it nonetheless keeps and analyzes the recording." Consol. FAC ¶ 38. In other words, Plaintiffs allege that Defendants knew each recording was the product of an unauthorized interception at the time of their alleged use and disclosure. The Court must construe this allegation **[**30]** to be true at the motion to dismiss stage, despite Defendants' assertion to the contrary. Accordingly, the Court will dismiss the "use" or "disclosure" theory, but not on the ground that Defendants lacked knowledge of the antecedent interception.

B. Count 2: Stored Communications Act

Count 2 alleges violations of the Stored Communications Act ("SCA"). As the Ninth Circuit has explained, the SCA **[*820]** is modeled off the common law of trespass. *Theofel v. Farey-Jones, 359 F.3d 1066, 1072-73 (9th Cir. 2004)*. "Just as trespass protects those who rent space from a commercial storage facility to hold sensitive documents, the Act protects users whose electronic communications are in electronic storage with an ISP or other electronic communications facility." *Id.* (internal quotations and citations omitted). Thus, the SCA forbids making unlawful access to a stored communication, imposing liability on any person or entity who:

> (1) intentionally accesses without authorization a facility through which an electronic communication service is provided; or
> (2) intentionally exceeds an authorization to access that facility;
>
> and thereby obtains, alters, or prevents authorized access to a wire or electronic communication while it is in electronic storage in such system shall **[**31]** be punished as provided in *subsection (b)* of this section.

18 U.S.C. § 2701(a).

Subsection (c) goes on to state that subsection (a) does not apply "to conduct authorized" "(1) by the person or entity providing a wire or electronic communications service; [or] (2) by a user of that service with respect to a communication of or intended for that user." 18 U.S.C. § 2701(c)(1); *accord* Crowley v. CyberSource Corp., 166 F. Supp. 2d 1263, 1271 (N.D. Cal. 2001). However, an ECS provider still "shall not knowingly divulge to any person or entity the contents of a communication while in electronic storage by that service"; if it does so, it is liable for unlawful disclosure of customer communications under § 2702(a). 18 U.S.C. § 2702(a)(1). The Consolidated FAC asserts claims for unlawful access pursuant to § 2701(a) and unlawful disclosure pursuant to § 2702(a). Consol. FAC ¶¶ 117-124. In their motion to dismiss, Defendants argue that "Plaintiffs cannot state a claim under either provision." The Court disagrees: Although Plaintiffs have not pleaded a claim for unlawful access, Count 2 may proceed based on a theory of unlawful disclosure.

i. Unlawful Access under *18 U.S.C. § 2701(a)*

To make out a claim under either subsection of 18 U.S.C. § 2701(a), Plaintiffs must show that Defendants "(1) gained unauthorized access to a 'facility' where it (2) accessed an electronic communication in 'electronic storage.'" Davis v. Facebook, Inc. (In re Facebook Inc. Internet Tracking Litig.), 956 F.3d 589, 2020 WL 1807978, at *13 (9th Cir. 2020). The SCA defines "electronic **[**32]** storage" as

> (A) any temporary, intermediate storage of a wire or electronic communication incidental to the electronic transmission thereof; and
> (B) any storage of such communication by an electronic communication service for purposes of backup protection of such communication;

18 U.S.C. §§ 2711(1), 2510(17). The SCA does not, however, provide a statutory definition of "facility," which is a separate element of an SCA claim. *See* In re Facebook, 956 F.3d 589, 2020 WL 1807978, at *13, *14 n.10. Nor has the Ninth Circuit provided much guidance on interpreting the term.

In their motion to dismiss, Defendants argue that a facility must be "physical means or equipment," such as a server. Mot. at 9 (quoting Council on Am.-Islamic Relations Action Network, Inc. v. Gaubatz, 793 F. Supp. 2d 311, 335 (D.D.C. 2011)). Defendants believe that Plaintiffs have failed to identify a qualifying "facility" providing "electronic storage" that has allegedly been accessed. *See* Mot at 9; Reply at 5. The Consolidated FAC indicates that the Google Assistant "is the facility through which Google provides an electronic service." Consol. FAC ¶ 115. In their Opposition brief, Plaintiffs reiterate **[*821]** that the Google Assistant is a "facility" within the meaning of the SCA, *see* Opp. at 9; Plaintiffs also offer another possible "facility": Defendants' "remote servers," *see id.* (citing Consol. FAC ¶¶ 43, 93). Defendants maintain that **[**33]** neither qualifies. *See* Mot at 9; Reply at 5.

Turning first to whether the Google Assistant is a "facility," the Court notes that Plaintiffs have not been consistent or precise as to what they mean by the "Google Assistant." For clarity, the Court uses "Google Assistant" to refer to the virtual assistant software and not the Google Assistant Enabled Device onto which it may be pre-installed or downloaded. *See* Consol. FAC ¶¶ 21, 112. Without adopting Defendants' definition of "facility" as "physical" equipment, the Court is skeptical that software could properly be considered a facility. Regardless whether a facility is necessarily "physical," it indisputably must provide "electronic storage." It is not alleged that the Google Assistant itself—which, as a "computer program," is comprised of lines of code—provides electronic storage of any kind. *See* Consol. FAC ¶ 21. Rather, the Consolidated FAC states that a Google Assistant Enabled Device's RAM stores the snippets of audio that are continuously being analyzed by the Google Assistant. *See id.* ¶ 23.

It is perhaps unsurprising, then, that Plaintiffs do not attempt to argue that the Google Assistant software is a "facility" in their Opposition brief; **[**34]** they assert instead that their devices' RAM constitutes the facility from which their communications were accessed "while they were temporarily stored" there. Opp. at 9. Defendants object that a user's personal device cannot be a "facility" under the SCA. It is true that courts in this Circuit and others have interpreted "facility" to exclude users' personal devices. *See, e.g.,* In re Google Inc. Cookie Placement Consumer Privacy Litig., 806 F.3d 125, 147-48 (3d Cir. 2015); In re Facebook Internet Tracking Litig., 263 F. Supp. 3d 836, 845 (N.D. Cal. 2017), *aff'd*, 956 F.3d 589 (9th Cir. 2020); In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1057-58 (N.D. Cal. 2012); Freedom Banc Mortg. Servs., Inc. v. O'Harra, No. 2:11-cv-01073, 2012 U.S. Dist.

LEXIS 125734, 2012 WL 3862209, at *9 (S.D. Ohio Sept. 5, 2012). Even the Ninth Circuit has alluded to the SCA as "cover[ing] access to electronic information stored in *third party* computers." *In re Zynga Privacy Litig., 750 F.3d 1098, 1104 (9th Cir. 2014)*; *see also Theofel, 359 F.3d at 1072-73* ("Just as trespass protects those who rent space from a commercial storage facility to hold sensitive documents, the Act protects users whose electronic communications are in electronic storage *with an ISP or other electronic communications facility*.") (internal quotations and citation omitted).

These courts have focused on the requirement that the facility be one "through which an electronic communication service is provided." *18 U.S.C. § 2701(a)(1)*. As the Fifth Circuit put it, "[t]he relevant 'facilities' that the SCA is designed to protect are not computers that *enable* the use of an electronic communication **[**35]** service, but instead are facilities that are *operated by* electronic communication service providers and used to store and maintain electronic storage." *Garcia v. City of Laredo, Tex., 702 F.3d 788, 792 (5th Cir. 2012)* (emphasis in original) (holding that plaintiff's cell phone was not a "facility"). An individual's personal device "does not *provide* an electronic communication service just because the device *enables* use of electronic communication services," *id.* (emphasis in original); rather, that device is, in every practical sense, the "user." Moreover, as another court in this district pointed out, a contrary reading would "render other parts of the statute illogical," such as the provision at *18 U.S.C. § 2701(c)(1)* **[*822]** permitting an ECS provider to authorize access to the facility. *In re iPhone Application Litig., 844 F. Supp. 2d at 1058* ("It would certainly seem odd that the provider of a communication service could grant access to one's home computer to third parties, but that would be the result of plaintiff's argument."); *see also In re Google, 806 F.3d at 147* ("And this is consistent with the Act's purpose: home computers are already protected by the *Fourth Amendment*, so statutory protections are not needed.").

Thus, the weight of authority supports Defendants' position. Plaintiffs, meanwhile, have failed even to respond, let alone show that the Google **[**36]** Assistant Enabled Devices at issue are factually distinct from the above situations. Under these circumstances, the Court does not believe Plaintiffs' current allegations permit an inference that their personal Google Assistant Enabled Devices constitute "facilities."

Plaintiffs also argue that "Google's remote servers" constitute the requisite facilities. Opp. at 9. But of course, Defendants have authorization to access their own servers. *See 18 U.S.C. § 2701(c)(1)*; *accord In re Yahoo Mail Litig., 7 F. Supp. 3d at 1026-27* ("The SCA grants immunity to *18 U.S.C. § 2701(a)* claims to electronic communication service providers . . . for accessing content on their own servers."); *In re Google, Inc. Privacy Policy Litig., No. C-12-01382-PSG, 2013 U.S. Dist. LEXIS 171124, 2013 WL 6248499, at *12 (N.D. Cal. Dec. 3, 2013)* ("Whatever the propriety of Google's actions, it plainly authorized actions that it took itself."). Hence, though the servers are indisputably "facilities," there cannot have been "unauthorized access" by Defendants. Any claim that Defendants improperly "process[ed]" or "disseminat[ed]" Plaintiffs' communications, Mot. at 10, is properly brought under *18 U.S.C. § 2702(a)*, as assessed below.

Because Plaintiffs have not pleaded unauthorized access to a "facility" within the meaning of the SCA, their SCA claim under *§ 2701(a)* is DISMISSED. **[**37]** Although the Court is skeptical that Plaintiffs will be able to articulate yet another theory of unlawful access to an electronic storage "facility", the Court will nonetheless grant LEAVE TO AMEND.

ii. Unlawful Disclosure under *18 U.S.C. § 2702(a)*

Next, turning to Plaintiffs' claim for unlawful disclosure *18 U.S.C. § 2702(a)*, Plaintiffs allege that Defendants did not have authorization to disclose any audio recordings or transcripts resulting from false accepts, but nonetheless did so "for analysis or other purposes, including improving the functionality of Google Assistant for Google's own financial benefit and targeting personalized advertising to users." Consol. FAC ¶ 122.

First, to the extent Plaintiffs assert a claim based on Defendants' use of audio or transcripts to "target[] personalized advertising to users," the Court agrees with Defendants that this claim fails. There are no allegations in the Consolidated FAC suggesting that Defendants disclose any information to "third parties" to accomplish this purpose. Defendants' own use of Plaintiffs' data for advertising purposes does not constitute an unlawful "disclosure." The Court therefore DISMISSES WITH LEAVE TO AMEND any claim based on targeted advertising.

On the **[**38]** other hand, the Consolidated FAC does contain allegations of disclosure to third parties for the purpose of improving the Google Assistant's voice recognition functionality; these third parties are the "subcontractors" Defendants allegedly use to perform the relevant analysis. *See* Consol. FAC ¶¶ 35, 39. Defendants move to dismiss this claim on the ground **[*823]** that any disclosure was consented to by Plaintiffs. Mot. at 10. As relevant here, *§ 2702(b)(3)* permits an ECS provider to divulge the contents of a communication "with the lawful consent of the originator or an addressee or intended recipient of such communication, or the subscriber in the case of remote computer service." Defendants say that Plaintiffs (the originator of the purported communications) explicitly consented to any disclosure to "subcontractors" that Defendants may have used by agreeing to Defendants' Privacy Policy. Mot. at 10-11. Plaintiffs acknowledge that they are bound by the Privacy Policy, which forms the basis for their breach of contract and breach of express warranty claims. *See* Consol. FAC ¶¶ 2, 192, 210. The question then becomes whether the Privacy Policy adequately indicated to users that Defendants would engage in **[**39]** the disclosures at issue, such that users could fairly be said to have "agreed" to these disclosures. *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d 767, 789 (N.D. Cal. 2019)*. The Court considers this question "objectively, from the perspective of a reasonable . . . user." *Id.*

The Privacy Policy, of which the Court has taken judicial notice, *see infra* Part III, contains a section entitled "When Google shares your information." ECF 56-1 at 30. That section states, "We do not share your personal information with companies, organizations, or individuals outside of Google except in the following cases." ECF 56-1 at 30. It then goes on to state that one of these instances is "for external processing":

> We provide personal information to our affiliates and other trusted businesses or persons to process it for us, based on our instructions and in compliance with our Privacy Policy and other appropriate confidentiality and security measures. For example, we use service providers to help us with customer support.

Id. at 31.

Plaintiffs contend that this provision is too general to conclusively establish consent, and the Court agrees. *See* Opp. at 11. The Privacy Policy says nothing about the types of information that Defendants might send to "affiliates and other trusted business or persons" **[**40]** for "processing." Critically, moreover, the Privacy Policy does not indicate that such "processing" might involve human reviewers listening to the audio. Under these circumstances, the Court cannot say that a reasonable user reading the Privacy Policy must have understood it to cover the disclosures alleged in the Consolidated FAC. As the party seeking the benefit of an exception, Defendants have the burden to establish the existence of consent. *See* *In re Yahoo Mail Litig., 7 F. Supp. 3d at 1028*. It also bears repeating that, at the motion to dismiss stage, the Court must give Plaintiffs the benefit of all reasonable inferences. Where, as here, "the contract language at issue is reasonably susceptible to more than one interpretation, with one of those interpretations suggesting consent and another belying it, the Court cannot decide the consent issue in [Defendants'] favor." *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d at 789*.

Other courts in this district have come to the same conclusion when evaluating similarly vague language. In particular, the instant terms bear a close resemblance to those in *Campbell v. Facebook Inc., 77 F. Supp. 3d 836 (N.D. Cal. 2014)*. There, Facebook's counsel argued that their disclosure "that Facebook 'may use the information we received about you' for 'data analysis.'" *Id. at 847*. The court held, however, that "this disclosure **[**41]** is not specific enough to establish that users expressly **[*824]** consented to the scanning of the content of their messages . . . for alleged use in targeted advertising." *Id.*; *see also* *id. at 848* ("[A]ny consent with respect to the processing and sending of messages itself does not necessarily constitute consent to the specific practice alleged in this case—that is, the scanning of message content for use in targeted advertising."). The court in *In re Facebook, Inc., Consumer Privacy User Profile Litigation* made a similar point: "Although Facebook points to a section in its Data Use Policy entitled 'Service Providers' which says 'we give your information to the people and companies that help us provide, understand, and improve the services we offer,' that statement does not come close to disclosing the massive information-sharing program with business partners that the plaintiffs allege in the complaint." *402 F. Supp. 3d at 792*. So too here.

In an effort to supplement the Privacy Policy's notice regarding information sharing, Defendants highlight another provision in the Privacy Policy:

> We also use your information to ensure our services are working as intended, such as tracking outages or troubleshooting issues that you **[**42]** report to us. And we use your information to make improvements to our services—for example, understanding which search terms are most frequently misspelled helps us improve spell-check features used across our services.

ECF 56-1 at 24. However, this provision comes in a different section of the Privacy Policy, entitled "Why Google collects data." A reasonable user cannot be expected to connect the two sections and anticipate that Defendants may use "external processing" for any purpose for which Defendants collect data. Put another way, although users may have consented to Google's *collection* of their data to "to improve the functionality of the Assistant," Mot. at 11 (quoting Consol. FAC ¶ 122), that consent does not reasonably extend to *disclosure* of data. The Court DENIES Defendants' motion to dismiss the *§ 2702(a)* claim on the ground that Plaintiffs' consented to any disclosures.

Defendants assert an additional reason for dismissal in a footnote: They maintain that their subcontractors are "employees or agents" and not "third parties" under *§ 2702(a)*. *See* Mot. at 10-11 n.3. The Court rejects this argument, which is hardly even developed. That the putative third parties here are referred to as "subcontractors" **[**43]** does not, by itself, defeat Plaintiffs' claim. After all, whether an entity is a "third party" within the meaning of the statute is a factual question, interrogating the relationship between the entity and the provider. Moreover, the relevant facts are likely unavailable to Plaintiffs prior to discovery. Construing the allegations in Plaintiffs' favor, the Court finds that the "subcontractors" may be third parties, which suffices at the motion to dismiss stage. Defendants' motion to dismiss for failure to plead that subcontractors are "third parties" is DENIED.

In sum, the Court finds that Plaintiffs have adequately pleaded a claim for unlawful disclosure under *18 U.S.C. § 2702(a)* based on Defendants' disclosure of audio and transcripts to subcontractors for analysis "to improve the functionality" of the Google Assistant.

C. Counts 3 and 4: California Invasion of Privacy Act

Counts 3 and 4 of the Consolidated FAC assert violations of the California Invasion of Privacy Act ("CIPA"), *Cal. Penal Code §§ 630, et seq.* Consol. FAC ¶¶ 127-146. The CIPA is the California state law analogue to the federal Wiretap Act, enacted in 1967 in response to "advances in science and technology [that] have led to the development **[*825]** of new devices and techniques **[**44]** for the purpose of eavesdropping upon private communications." *Cal. Penal Code § 630*; *see* *Campbell v. Facebook Inc., 77 F. Supp. 3d 836, 848 (N.D. Cal. 2014)*. Two provisions of the CIPA are implicated in the instant case: Count 3 asserts a violation of *California Penal Code § 631*, which addresses "wiretapping," and Count 4 asserts a violation of *California Penal Code § 632*, which addresses "eavesdropping."

Defendants move to dismiss both counts on several grounds, as set forth below.

i. *Section 631*

To briefly describe the statutory framework, *California Penal Code § 631* addresses "wiretapping." As relevant here, *§ 631(a)* imposes liability upon

> Any person who, by means of any machine, instrument, or contrivance, or in any other manner, intentionally taps, or makes any unauthorized connection, whether physically, electrically, acoustically, inductively, or otherwise, with any telegraph or telephone wire, line, cable, or instrument, including the wire, line, cable, or instrument of any internal telephonic communication system, or who willfully and without the consent of all parties to the communication, or in any unauthorized manner, reads, or attempts to read, or to learn the contents or meaning of any message, report, or communication while the same is in transit or passing over any

> wire, line, or cable, or is being sent from, or received at any place within this state; **[**45]** or who uses, or attempts to use, in any manner, or for any purpose, or to communicate in any way, any information so obtained . . . .

Cal. Penal Code § 631(a). The California Supreme Court has clarified that this lengthy provision contains three operative clauses protecting against "three distinct and mutually independent patterns of conduct": (i) "intentional wiretapping," (ii) "willfully attempting to learn the contents or meaning of a communication in transit over a wire," and (iii) "attempting to use or communicate information obtained as a result of engaging in either of the two previous activities." *Tavernetti v. Superior Court, 22 Cal. 3d 187, 192, 148 Cal. Rptr. 883, 583 P.2d 737 (1978)*; *accord* *In re Google Inc., No. 13-MD-02430-LHK, 2013 U.S. Dist. LEXIS 172784, 2013 WL 5423918, at *15 (N.D. Cal. Sept. 26, 2013)*. Count 3 purports to allege violations of all three clauses in that "(i) Google made an unauthorized connection with Class Members' GAEDs; (ii) through the unauthorized interception, Google learned the contents of Plaintiffs' and Class Members' confidential communications; and (iii) Google transmitted the contents of the confidential communications to Google's servers as well as to third-party vendors." Opp. at 13 (citations omitted); *see* Consol. FAC ¶¶ 135-36.

In their motion to dismiss, Defendants argue that Plaintiffs cannot state a claim based on any of the three types **[**46]** of conduct prohibited by *§ 631(a)* because the provision prohibits only connections with a "wire, line, or cable" and hence "does not apply to in-person verbal communications" Mot. at 13. The Court considers this argument as to each clause.

Beginning the first clause of *§ 631(a)*, Defendants are correct that it protects only communications that are made over a "wire, line, or cable." This is evident from the plain text of the statute: The first clause expressly requires that the unauthorized "connection" be made with "any telegraph or telephone wire, line, cable, or instrument." *Cal. Penal Code § 631(a)*; *accord* *Matera v. Google Inc., No. 15-CV-04062-LHK, 2016 U.S. Dist. LEXIS 107918, 2016 WL 8200619, at *18 (N.D. Cal. Aug. 12, 2016)* (explaining that "the first clause" of *§ 631(a)* is "limited to communications passing over 'telegraph or telephone' wires, lines, or cables"). Plaintiffs do not dispute this; they **[*826]** also do not explain how their allegations satisfy the requirement of a "telegraph or telephone wire, line, cable, or instrument." Nor does the Consolidated FAC suggest that the Google Assistant operates using telegraph or telephone wires. In light of the foregoing, the Court finds that Plaintiffs fail to state a claim for violation of *§ 631(a)* based on intentional wiretapping.

The Court turns next to the second clause, **[**47]** which applies to any person who "willfully and without the consent of all parties to the communication, or in any unauthorized manner, reads, or attempts to read, or to learn the contents or meaning of any message, report, or communication while the same is in transit or passing over any wire, line, or cable, or is being sent from, or received at any place within this state." *Cal. Penal Code § 631(a)*. Defendants argue that this clause also requires a "wire, line, or cable." Plaintiffs object, citing *In re Google Inc. Gmail Litigation, 2013 U.S. Dist. LEXIS 172784, 2013 WL 5423918*. But that case simply stands for the proposition that "the limitation of 'telegraphic or telephone' on 'wire, line, cable, or instrument' in the first clause of the statute" is not "imported to the second clause of the statute"; it did not find that the second clause lacked the requirement of a "wire, line, or cable." *2013 U.S. Dist. LEXIS 172784, [WL] at *20*; *accord* *Matera, 2016 U.S. Dist. LEXIS 107918, 2016 WL 8200619, at *18* (explaining that "the second clause prohibits the unauthorized interception of communications passing over 'any wire, line, or cable'").

However, Plaintiffs also point out that the second clause applies if a communication is "in transit or passing over any wire, line, or cable, *or is being sent from, or received at any place within this state*." Because the clause is written in the disjunctive, **[**48]** the Court agrees that it could be read to cover messages "being sent from, or received at any place within this State," without regard to whether the sending and receiving makes use of a "wire, line, or cable." *See* Opp. at 13.

At the same time, California courts have often distinguished the essential concepts of eavesdropping under *§ 632* and wiretapping under *§ 631* on the ground that eavesdropping "does not require an unauthorized *connection* to a transmission line, whereas wiretapping does." *People v. Guzman, 11 Cal. App. 5th 184, 192 n.7, 217 Cal. Rptr. 3d*

509 (Ct. App. 2017), *aff'd*, (2019) (emphasis in original). And, as already noted, the California Supreme Court summarized the second clause as proscribing "wilfully attempting to learn the contents or meaning of a communication in transit *over a wire*." Tavernetti, 22 Cal. 3d at 192. Yet, the question of whether a defendant may be liable under § 631(a) for reading or attempting to read communications not sent over a wire, line or cable does not appear to have been squarely considered by other courts.

This Court may also leave that question to another day. That is because Plaintiffs have not plausibly alleged that their communications were being "sent from, or received at any place within this State." Although it may be possible for a communication to be "sent" or "received" **[**49]** without use of a wire, line or cable, it cannot fairly be said that a face-to-face conversation between two people in the same location involves "sending" or "receiving" communications within the meaning of the *§ 632*. Per the Consolidated FAC, the "communications" of which the Defendants are alleged to have "learned the contents" are oral conversations that took place in the presence of Plaintiffs' GAEDs. But as already discussed, Plaintiffs have not alleged any information about these conversations—they have not even plausibly alleged that they themselves were party to intercepted conversations. **[*827]** Of particular relevance here, there are no facts from which the Court could infer that any communications were being "sent from" and "received at" different locations; on the contrary, the Consolidated FAC suggests that the conversations were had in person. The Court therefore GRANTS Defendants' motion to dismiss any claim based on the second clause of § 631(a).

Last, the third clause covers any "attempt[] to use or communicate information obtained as a result of engaging in either of the two previous activities." Tavernetti, 22 Cal. 3d at 192. In other words, Plaintiffs must establish that the information at issue—here, the recordings **[**50]** and transcripts that Defendants' allegedly analyzed—was obtained through a violation of the first or second clauses. Because Plaintiffs have not done so, they also have failed to plead a violation of the third clause of § 631(a).

For these reasons, Count 3 is DISMISSED. Although Plaintiffs' theories as currently alleged do not appear to be compatible with § 631, the Court will nevertheless grant LEAVE TO AMEND to clarify those theories.

ii. *Section 632*

Defendants next challenge Plaintiffs' claim under *California Penal Code § 632*, which addresses "eavesdropping on or recording confidential communications." Specifically, *§ 632(a)* imposes liability upon

> A person who, intentionally and without the consent of all parties to a confidential communication, uses an electronic amplifying or recording device to eavesdrop upon or record the confidential communication, whether the communications is carried on among the parties in the presence of one another or by means of a telegraph, telephone, or other device, except a radio . . . .

"California courts interpret 'eavesdrop,' as used in *section 632*, to refer to a third party secretly listening to a conversation between two other parties." Thomasson v. GC Servs. Ltd. P'ship., 321 Fed. Appx. 557 (9th Cir. 2008) (citing Ribas v. Clark, 38 Cal.3d 355, 363, 212 Cal. Rptr. 143, 696 P.2d 637 (1985))); *see also* Flanagan v. Flanagan, 27 Cal. 4th 766, 775, 117 Cal. Rptr. 2d 574, 41 P.3d 575 (2002) (*§ 632* prohibits "unconsented-to eavesdropping or recording of conversations"). **[**51]** Count 4 alleges that Defendants violate this provision by "creat[ing] recordings . . . of Plaintiffs' and Class Members' confidential communications not preceded by the utterance of a hot word or where the Google Assistant Enabled Device was not manually activated." Consol. FAC ¶ 152.

A claim under *§ 632* bears many similarities to a claim under the federal Wiretap Act. *See, e.g.,* NovelPoster v. Javitch Canfield Grp., 140 F. Supp. 3d 938, 954 (N.D. Cal. 2014) ("Because NovelPoster is unable to allege a violation of the Wiretap Act, it is also unable to allege a violation of CIPA."). In particular, it covers only (1) "confidential communications" and (2) "intentional" conduct. Defendants therefore move to dismiss the *§ 632* claim for two of the reasons already discussed as to Count 1: that Plaintiffs have not adequately pleaded that their conversations were "confidential" or that Defendants' alleged interceptions were "intentional" rather than inadvertent.

Taking the latter first, the Court considered the parties' arguments regarding whether Defendants' conduct could be considered "intentional" as to Plaintiffs' Wiretap Act claim. As explained, the Court finds that Defendants' failure to rectify the defect causing "false accepts" or destroy the recordings produced under such **[**52]** circumstances could plausibly be considered "intentional" rather than "a result of accident **[*828]** or mistake." *See supra* Part IV.A.i. The result is the same under the CIPA, as the CIPA does not define "intentional" more restrictively than the Wiretap Act. *See* Mot. at 13; *Rojas v. HSBC Card Servs. Inc., 20 Cal. App. 5th 427, 435, 228 Cal. Rptr. 3d 640 (2018)* ("[T]he recording of a confidential conversation is intentional if the person using the recording equipment does so with the purpose or desire of recording a confidential conversation, or *with the knowledge to a substantial certainty that his use of the equipment will result in the recordation of a confidential conversation*.") (quoting *People v. Superior Court of Los Angeles Cty., 70 Cal. 2d 123, 134, 74 Cal. Rptr. 294, 449 P.2d 230 (1969))* (emphasis in original). Defendants' motion to dismiss for failure to plead "intentional" eavesdropping is therefore DENIED.

In the same vein, though, the Court agrees that Plaintiffs have not adequately pleaded "confidential communications." The California Supreme Court has held that a conversation is "confidential" under *§ 632* "if a party to that conversation has an objectively reasonable expectation that the conversation is not being overheard or recorded." *Kearney v. Salomon Smith Barney, Inc., 39 Cal. 4th 95, 117 n. 7, 45 Cal. Rptr. 3d 730, 137 P.3d 914 (2006)*; *see also* *Faulkner v. ADT Sec. Services, Inc., 706 F.3d 1017, 1019 (9th Cir. 2013)*. Neither party disputes that this standard is the same as the "reasonable expectation of privacy" required under the Wiretap **[**53]** Act, *18 U.S.C. § 2510(2)*. *See* Mot. at 14; Opp. at 15. The Court already concluded that the Consolidated FAC does not adequately demonstrate Plaintiffs' reasonable expectation of privacy in the conversations that the Google Assistant alleged intercepted and recorded. *See supra* Part IV.A.ii. That same defect afflicts Plaintiffs' *§ 632* claim, wherefore the Court must GRANT Defendants' motion to dismiss Count 4. As with the Wiretap Act claim, the Court gives LEAVE TO AMEND.

Having dismissed Count 4 for failure to allege "confidential communications," the Court need not address Defendants' additional argument that Plaintiffs "have not alleged facts showing that the parties did not consent to the alleged recording." Mot. at 14. The Court nonetheless advises Plaintiffs to further develop their contention that Defendants lacked consent to listen or record, as required to state a claim under *§ 632(a)*. Plaintiffs' allegation that the recordings "were made without Plaintiffs' consent" is conclusory. Consol. FAC ¶ 152. Meanwhile, Plaintiffs made little effort to respond to Defendants' argument in their Opposition briefing, opting to reference their arguments regarding consent under the SCA, *18 U.S.C. § 2702(a)*. But the SCA claim concerned unlawful disclosure **[**54]** to third parties—not the initial recording of Plaintiffs' conversations. Moreover, whereas consent is a defense under the SCA, "[i]t appears that, under California law, the plaintiff bringing a CIPA claim has the burden to prove that the defendant lacked consent to record." *Reyes v. Educ. Credit Mgmt. Corp., 773 Fed. App'x 989, 990 n.1 (9th Cir. 2019)*. Plaintiffs therefore cannot simply rest on their arguments regarding consent as to the SCA claim.

D. Counts 5 and 6: Common Law Intrusion upon Seclusion and Invasion of Privacy

Plaintiffs' next two claims are also California state law claims: Count 5 is the common law tort of intrusion upon seclusion and Count 6 is invasion of privacy in violation of the *California Constitution, Art. I, Sec. 1*. Consol. FAC ¶¶ 162, 187. Defendants move to dismiss both claims. Because the common law and constitutional sources of privacy protection under California **[*829]** law are closely related, the Court treats them together. *See* *Hernandez v. Hillsides, Inc., 47 Cal. 4th 272, 286, 97 Cal. Rptr. 3d 274, 211 P.3d 1063 (2009)*.

To state a claim for intrusion upon seclusion, a plaintiff must allege "(1) intrusion into a private place, conversation or matter (2) in a manner highly offensive to a reasonable person." *Shulman v. Group W Prods., Inc., 18 Cal. 4th 200, 231, 74 Cal. Rptr. 2d 843, 955 P.2d 469 (1998))*. As to the first element, the plaintiff must have had an "objectively reasonable expectation of seclusion or solitude in the place, conversation or data source." **[**55]** *Id. at*

232. "The second common law element essentially involves a policy determination as to whether the alleged intrusion is "highly offensive" under the particular circumstances." Hernandez, 47 Cal. 4th at 287. "Relevant factors include the degree and setting of the intrusion, and the intruder's motives and objectives." *Id.*

To allege a violation of California's constitutional right to privacy, a plaintiff must allege "(1) a legally protected privacy interest; (2) a reasonable expectation of privacy under the circumstances; and (3) conduct by the defendant that amounts to a serious invasion of the protected privacy interest." Low v. LinkedIn Corp., 900 F. Supp. 2d 1010, 1024 (N.D. Cal. 2012) (citing Hill v. Nat'l Collegiate Athletic Ass'n, 7 Cal. 4th 1, 35-37, 26 Cal. Rptr. 2d 834, 865 P.2d 633 (1994)). Regarding the first element, the California Supreme Court has explained that "[l]egally recognized privacy interests are generally of two classes: (1) interests in precluding the dissemination or misuse of sensitive and confidential information ('informational privacy'); and (2) interests in making intimate personal decisions or conducting personal activities without observation, intrusion, or interference ('autonomy privacy')." Hill, 7 Cal. 4th at 35. The third element, meanwhile, requires the invasion to be "sufficiently serious in [its] nature, scope, and actual or potential impact to constitute an egregious **[**56]** breach of the social norms underlying the privacy right." Id. at 37.

In this case, Plaintiffs allege that Defendants' practice of "intercepting, recording, transmitting, and disclosing" Plaintiffs' communications in false accept situations "constitute[s] an intentional intrusion" upon Plaintiffs' seclusion "in that Google effectively placed itself in the middle of a conversation to which it was not invited." Consol. FAC ¶ 164. Plaintiffs further allege that this same practice invades Plaintiffs' informational privacy interest "in the confidential and sensitive information" contained in their communications as well as Plaintiffs' autonomy privacy interest "in conducting their personal activities." *Id.* ¶ 179.

As evident from the foregoing, the constitutional and common law causes of action overlap substantially. Accordingly, the California Supreme Court has recognized that "the largely parallel elements of these two causes of action" require a court to consider "(1) the nature of any intrusion upon reasonable expectations of privacy, and (2) the offensiveness or seriousness of the intrusion, including any justification and other relevant interests." Hernandez, 47 Cal. 4th at 288. In their motion to dismiss, Defendants argue **[**57]** that (1) Plaintiffs have failed to allege a "reasonable expectation of privacy" in the communications at issue and (2) the alleged intrusion is not sufficiently "offensive" or "serious" to support a claim for invasion of privacy or intrusion upon seclusion. Mot. at 15.

First, Defendants contend that Plaintiffs have not shown that they had a "reasonable expectation of privacy" in the **[*830]** conversations upon which Defendants allegedly intruded. Mot. at 15. They are correct. As the Court already explained with respect to Plaintiffs' Wiretap Act claim, Plaintiffs have not alleged sufficient information about the conversations that were allegedly intercepted and recorded to establish that they were had under circumstances that would give rise to a reasonable expectation of privacy. *See supra* Part IV.A.ii. That deficiency is fatal to Plaintiffs' claims for invasion of privacy and intrusion upon seclusion.

In addition, Defendant argue that Plaintiffs have not alleged sufficient facts to establish a "highly offensive" or "serious" invasion of privacy. Mot. at 15-16. It is true, as Defendants emphasize, that "[t]he California Constitution and the common law set a high bar" for an intrusion to be actionable. **[**58]** Low, 900 F. Supp. 2d at 1025 (collecting cases). Many courts have found that the collection—and even disclosure to certain third parties—of personal information about the users of a technology may not constitute a sufficiently "egregious breach of social norms" to make out a common law or constitutional privacy claim. *See, e.g.,* In re Google, Inc. Privacy Policy Litig., 58 F. Supp. 3d 968, 988 (N.D. Cal. 2014) (no intrusion claim based on Google's collection and disclosure of users' data, including their browsing histories); Low, 900 F. Supp. 2d at 1025 (finding that LinkedIn did not commit a "highly offensive" invasion of users' privacy by disclosing users' browsing histories to third parties); In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1063 (N.D. Cal. 2012) (finding no invasion of privacy based on Defendants' disclosure of each user's addresses, geolocation, the unique device identifier assigned to the user's device, gender, age, time zone, and information about app usage). These courts have characterized the collection and disclosure of such data as "routine commercial behavior." Low, 900 F. Supp. 2d at 1025 (quoting Folgelstrom v. Lamps Plus, Inc., 195 Cal. App. 4th 986, 992, 125 Cal. Rptr. 3d 260 (2011)).

Nonetheless, the Court is not persuaded that the conduct Plaintiffs have described is not "highly offensive" or "serious" as a matter of law. Although it is a close call, the Court believes that a reasonable person could find Defendants' alleged conduct to be "highly offensive." **[**59]**

To begin with, the Court observes that courts have repeatedly found the surreptitious recording of a plaintiff's conversations or activity to constitute an actionable intrusion. *See, e.g., Shulman v. Group W Productions, Inc., 18 Cal. 4th 200, 237, 74 Cal. Rptr. 2d 843, 955 P.2d 469, 494 (1998), as modified on denial of reh'g* (July 29, 1998); *Safari Club Int'l v. Rudolph, No. SACV131989JVSANX, 2014 WL 12577408, at *8 (C.D. Cal. May 14, 2014)*. Plaintiffs' allegations that Defendants recorded their private conversations without authorization could be considered more analogous to these surreptitious recording cases than cases involving, for instance, browsing history. That human reviewers are alleged to listen to the recordings makes the analogy to surreptitious recording especially apt.

In any event, determining whether an intrusion is "highly offensive" requires a fact-intensive inquiry that "examine[s] all of the surrounding circumstances." *Hernandez, 47 Cal. 4th at 295*. Such an inquiry cannot be conducted at the motion to dismiss stage where, as here, there are open factual questions regarding "the likelihood of serious harm to the victim, the degree and setting of the intrusion, the intruder's motives and objectives, and whether countervailing interests or social norms render the intrusion inoffensive." *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *11* ("The ultimate question of whether Facebook's tracking and **[**60]** collection **[*831]** practices could highly offend a reasonable individual is an issue that cannot be resolved at the pleading stage."). In particular, false accepts are, by definition, situations in which the user is not attempting to use the relevant technology. A reasonable person could thus find that Defendants have no justifiable "motive" or "objective" for making the alleged interceptions, or that the "degree" of the intrusion is especially great. *See id.* ("Plaintiffs' allegations of surreptitious data collection when individuals were not using Facebook are sufficient to survive a dismissal motion on the issue.").

Many other factual circumstances remain to be ascertained. Take for instance the frequency with which false accepts occur and the amount of information that is subsequently recorded. As the California Supreme Court has recognized in the context of surreptitious surveillance, the scope or frequency of recording affects the offensiveness and seriousness of the privacy intrusion; "electronic surveillance that is persistent and pervasive may constitute a tortious intrusion on privacy even when conducted in a public or semi-public place." *Hernandez, 47 Cal. 4th at 297*. Other relevant factors include the content **[**61]** of the recordings and the degree to which the recordings are anonymized.

In sum, Plaintiffs have failed adequately to plead claims for intrusion upon seclusion or invasion of privacy because they have not established a reasonable expectation of privacy in the conversations or the recordings thereof. If they are able to do so, however, the Court believes that any dispute regarding the offensiveness of Defendants' alleged conduct is ill-suited for resolution on a motion to dismiss. Defendants' motion to dismiss Counts 5 and 6 is GRANTED WITH LEAVE TO AMEND.

E. Count 7: Common Law Breach of Contract

Count 7 is a claim for breach of contract based on Defendants' Terms of Service ("TOS") and the Privacy Policy contained therein. Consol. FAC ¶¶ 188-201. In order to plead a claim for breach of contract, Plaintiffs must allege: (1) the existence of a contract with Defendants, (2) their performance under that contract, (3) Defendants breached that contract, and (4) they suffered damages. *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *14* (citing *Oasis West Realty, LLC v. Goldman, 51 Cal. 4th 811, 821, 124 Cal. Rptr. 3d 256, 250 P.3d 1115 (2011))*. Defendants move to dismiss on the grounds that (1) Plaintiffs have failed to identify the specific provisions that have allegedly been breached; (2) there has been no breach, in any event; and (3) Plaintiffs **[**62]** have not alleged an adequate damages theory. *See* Mot. at 16-18.

i. Specific Contractual Provisions

The Court begins with Defendants' contention that Plaintiffs have not identified the specific contractual provisions creating the obligation Defendants are said to have breached, which the Court confirms Plaintiffs must do. *See* Miron v. Herbalife Int'l, Inc., 11 Fed. Appx. 927, 929 (9th Cir. 2001); Young v. Facebook, Inc., 790 F. Supp. 2d 1110, 1117 (N.D. Cal. 2011).

Defendants do not dispute that the TOS and the Privacy Policy are binding agreements to which they are parties. *See* Mot. at 16. Hence, there is no dispute that any provisions contained therein would be actionable in Plaintiffs' breach of contract claim. The Consolidated FAC alleges that Defendants breached the provision of the Privacy Policy promising, "We do not share your personal information with companies, organizations, or individuals outside of Google except in the **[*832]** following cases": "with your consent," "with domain administrators," "for external processing," and "for legal reasons." ECF 56-1 at 31-32; *see* Consol. FAC ¶¶ 192-93. Under the subheading entitled "with your consent," the Privacy Policy elaborates:

> We'll share personal information outside of Google when we have your consent. For example, if you use Google Home to make a reservation through a booking **[**63]** service, we'll get your permission before sharing your name or phone number with the restaurant. We'll ask for your explicit consent to share any sensitive personal information.

See ECF 56-1 at 30. The Consolidated FAC specifically highlights the statement, "We'll ask for your explicit consent to share any sensitive personal information." *See* Consol. FAC ¶ 193. The Court finds these provisions to be alleged with particularity, as required to state a claim for breach of contract.

However, these are the only contractual provisions that may form the basis for Plaintiffs' breach of contract claim. As the Court will explain, the other provisions referenced in the Consolidated FAC are not actionable.

First, in their Opposition brief, Plaintiffs assert a violation of another provision of the Privacy Policy: one stating that Defendants "may" collect "voice and audio information when you use audio features." Opp. at 18 (quoting ECF 56-1 at 22). The Consolidated FAC makes no reference to this provision, which means the Court cannot consider it to be alleged for purposes of the instant motion. *Broam v. Bogan, 320 F.3d 1023, 1026 n.2 (9th Cir. 2003)* ("In determining the propriety of a *Rule 12(b)(6)* dismissal, a court may not look beyond the complaint to a plaintiff's moving **[**64]** papers, such as a memorandum in opposition to a defendant's motion to dismiss.").

Additionally, Plaintiffs attempt to base their contract claim upon various provisions from different websites, including the "Google Nest Help Center" and the "Google Safety Center." *See* Consol. FAC ¶¶ 193-94. Plaintiffs assert that these websites are "incorporated into Google's TOS or Privacy Policy" by virtue of the following provision in the TOS:

> Our Services are very diverse, so sometimes additional terms or product requirements (including age requirements) may apply. Additional terms will be available with the relevant Services, and those additional terms become part of your agreement with us if you use those Services.

Consol. FAC ¶ 191; *see* ECF 56-1 at 13. But this vague statement is hardly sufficient to establish that the particular websites cited by Plaintiffs are part of the TOS or otherwise are binding upon the parties. Although it certainly possible that statements on the cited websites constitute binding agreements between the parties, Plaintiffs have not plausibly alleged this to be so.

All told, the only specific contractual terms allegedly breached are Defendants' promises in the Privacy Policy **[**65]** (1) not to share users' "personal information" "outside of Google" except in the four stated circumstances (2) to "ask for [users'] explicit consent to share any sensitive personal information."

ii. Breach

The Court now turns to whether Plaintiffs have plausibly alleged that Defendants breached these terms of the Privacy Policy. In Plaintiffs' view, these provisions amount to a promise that Defendants will not share users' "personal information" with "companies organizations, or individuals outside of Google *except . . . [with the express* *consent of the user]*." Opp. at 19 (alterations in original). Plaintiffs **[*833]** then assert that Defendants violate this promise by "shar[ing] the audio recording obtained from Plaintiffs and the Class with third-party vendors without Plaintiffs' consent in order to improve the functionality of the Google Assistant and not for external processing of users' request or queries." *Id.*

At the outset, the Court observes that in paraphrasing the relevant terms, Plaintiffs have altered them. Remember, the Privacy Policy listed four circumstances under which it would share users' personal information: "with your consent," "with domain administrators," "for external processing," **[**66]** and "for legal reasons." To establish a breach, then, Plaintiffs must not only plead that Defendants lacked consent, but also that their conduct does not fall within the other three circumstances. The Consolidated FAC has not done this. It all but ignores the existence of these three circumstances, focusing only on the alleged lack of consent. *See* Consol. FAC ¶¶ 197-99.

The Consolidated FAC falls short for another reason: It does not adequately plead that Plaintiffs' "personal information" has been shared. The vague and conclusory allegation that Plaintiffs "private conversations" were recorded and disclosed does not suffice. Consol. FAC ¶ 199. As already discussed multiple times, Plaintiffs have not plausibly alleged that Plaintiffs' own conversations were intercepted. *See supra* Part IV.A.ii. Relevant here, the Consolidated FAC contains no allegations describing the content of those conversations or the circumstances under which they were had. *See id.* In the absence of such allegations, the Court has no basis upon which to infer that Plaintiffs' "sensitive personal information" is implicated.

For these reasons, the Court finds that Plaintiffs have not stated a claim for breach of contract **[**67]** and DISMISSES Count 7. The Court will grant LEAVE TO AMEND.

iii. Damages

Although the Court need not do so, it now briefly considers the parties' arguments regarding Plaintiffs' damages theories. Plaintiffs proffer three damages theories: (1) benefit of the bargain, (2) "harm to [Plaintiffs'] "privacy interests," and (3) "disgorgement of profits made by Google as a result of its breach of contract." Consol. FAC ¶ 201; *see* Opp. at 19. Defendants believe all of these theories to be flawed. *See* Mot. at 18-19.

The first theory is benefit of the bargain damages: "Plaintiffs seek damages resulting from their overpayment for the GAEDs, which they allege are worth less due to Google's breaches of contract." Opp. at 19; *see* Consol. FAC ¶ 201. Also known as expectation damages, a benefit of the bargain measure of damages is intended "to give the injured party the benefit of his bargain and insofar as possible to place him in the same position he would have been in had the promisor performed the contract." *Coughlin v. Blair, 41 Cal. 2d 587, 262 P.2d 305, 314 (Cal. 1953)*; *see also* *Twin City Fire Ins. Co. v. Philadelphia Life Ins. Co., 795 F.2d 1417, 1425 (9th Cir. 1986)*.

Courts have approved damages based on benefit of the bargain in several technology cases involving privacy. For instance, in *In re Yahoo! Inc. Customer Data Sec. Breach Litig.*, Plaintiff Mortensen alleged **[**68]** that he paid "$19.95 each year since December 2007 for Yahoo's premium email service" but did not acquire the full value of Yahoo's service because it was not secure. *313 F. Supp. 3d 1113, 1130 (N.D. Cal. 2018)*. There, Plaintiff Mortensen plausibly lost the benefit of the bargain in that he received a less valuable email service than the one he paid for. *See id.* Similarly, in *In re Anthem, Inc. Data Breach Litig.*, plaintiffs paid premiums to defendants for health insurance plans. *No. 15-MD-02617-LHK, 2016 U.S. Dist. LEXIS 70594, 2016 WL 3029783, at *7-*8 (N.D.* **[*834]** *Cal. May 27, 2016)*. When the defendants experienced various breaches of its database containing individuals' health record information, the plaintiffs alleged, *inter alia*, that the defendants had breached their privacy policies. *2016 U.S. Dist. LEXIS 70594, [WL] at *9*. The Court allowed the plaintiff to pursue a theory of benefit of the bargain losses on the theory that some portion of their premiums went toward paying for robust security measures, which they allegedly did not receive. *2016 U.S. Dist. LEXIS 70594, [WL] at *13*.

In this case, however, Plaintiffs have not alleged that they paid anything to Defendants for the Google Assistant. Not only does the Consolidated FAC say nothing about any fee or premium paid, it appears that the Google Assistant is available free of charge for use on Google Assistant Enabled Devices. *See* **[**69]** Consol. FAC ¶ 21.

As a result, it cannot be said that Plaintiffs received less than what they paid for—they appeared to have paid nothing. *See* *In re LinkedIn User Privacy Litig., 932 F. Supp. 2d 1089, 1093 (N.D. Cal. 2013)* (rejecting plaintiffs' benefit of the bargain theory because "the FAC fails to allege that Plaintiffs actually provided consideration for the security services which they claim were not provided"). The Court therefore does not believe that benefit of the bargain is a viable damages theory.

On the other hand, Plaintiffs' second theory of damages—harm to their privacy interests—is more promising. Generally, a plaintiff may seek damages for "the detriment caused by the breach." *Stephens v. City of Vista, 994 F.2d 650, 657 (9th Cir. 1993)* (citing *Cal. Civ. Code § 3300*). In this case, the detriment Plaintiffs say they suffered was an invasion of their privacy. Plaintiffs are entitled to seek compensatory damages or perhaps nominal damages for such harm. *See* *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d at 802*; *Cal. Civ. Code § 3360*. The problem is that Plaintiffs have not sufficiently alleged an invasion of their privacy in the Consolidated FAC. As the Court has explained, the Consolidated FAC does not plausibly allege that Plaintiffs' own private conversations were intercepted. *See* Part IV.A.ii. If Plaintiffs are able to cure that deficiency, the Court believes they would be able to seek damages **[**70]** based on harm to their privacy interests.

Plaintiffs' third theory of damages suffers from a similar problem, but may also be viable. That theory is that Plaintiffs are entitled to "disgorgement of profits made by Google as a result of its breach of contract." Consol. FAC ¶ 201. The Ninth Circuit has said that "under California law, a defendant's unjust enrichment can satisfy the 'damages' element of a breach of contract claim, such that disgorgement is a proper remedy." *Foster Poultry Farms, Inc. v. SunTrust Bank, 377 Fed. App'x 665, 669 (9th Cir. 2010)* (citing *Ajaxo Inc. v. E*Trade Group, Inc., 135 Cal. App. 4th 21, 56-57, 37 Cal. Rptr. 3d 221 (2005))*. The Ninth Circuit has further held that "California law recognizes a right to disgorgement of profits resulting from unjust enrichment, even where an individual has not suffered a corresponding loss." *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *5-*6*.

To plead a theory of disgorgement, Plaintiffs must show "that they retain a stake in the profits garnered." *956 F.3d 589, Id. at *6*. Plaintiffs attempt to plead that they are entitled to the "substantial profits" that Defendants' have earned using their "personal information" because Defendants' use was unauthorized. Consol. FAC ¶¶ 199-200. But Plaintiffs have not adequately alleged that their unspecified "personal information" has financial value or that Defendants have profited from the information. Although courts **[**71]** have found **[*835]** that individuals' browsing history may plausibly carry financial value, *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *6*., Plaintiffs have not pleaded any description of the "personal information" that Defendants' allegedly used. Without such facts, Plaintiffs' assertion that Defendants garnered "substantial profits" from the information is purely conclusory. *See, e.g.,* *Varga v. Wells Fargo Bank, N.A., 796 Fed. App'x 430, 431 (9th Cir. 2020)* ("Varga's conclusory assertion that she was 'deprived of the contractual and consumer protections and benefits' of the notice provision is insufficient to plausibly allege" damages.). Should Plaintiffs cure this deficiency, however, the Court believes they could plausibly demonstrate that any profits were unjustly earned by virtue of Defendants' use being allegedly unauthorized. *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *6*.

F. Counts 8, 9, 10: Breach of Warranty

Counts 8, 9, and 10 are claims for breach of express and implied warranty; Counts 8 and 9 are brought under California state law and Count 10 is brought under the federal Magnuson-Moss Warranty Act. Unlike the other counts, these are asserted only by Plaintiffs Kumandan and Spurr, based upon their purchases of GAEDs manufactured by Defendants. Specifically, Plaintiff Kumandan allegedly purchased a Google Pixel smartphone and Plaintiff Spurr **[**72]** allegedly purchased a Google Home. The three claims assert essentially the same factual basis for relief: Defendants made affirmations of fact or promises to consumers that they would not intercept, record, or use the consumers' communications unless hotwords were uttered or the device was manually activated; Defendants subsequently breached these promises.

Defendants move to dismiss Counts 8, 9, and 10 on various grounds. As set forth below, the motion GRANTED WITH LEAVE TO AMEND as to all three claims.

i. Breach of Express Warranty

Count 8 alleges a breach of express warranty. Consol. FAC ¶¶ 202-210. "Any affirmation of fact or promise made by the seller to the buyer which relates to the goods and becomes part of the basis of the bargain creates an express warranty that the goods shall conform to the affirmation or promise." *Cal. Comm. Code § 2313*. To plead an action for breach of express warranty under California law, a plaintiff must allege: (1) the exact terms of the warranty; (2) reasonable reliance thereon; and (3) a breach of warranty which proximately caused plaintiff's injury. *Williams v. Beechnut Nutrition Corp., 185 Cal. App. 3d 135, 142, 229 Cal. Rptr. 605 (1986)*. To satisfy the first element, a plaintiff must identify a "specific and unequivocal written statement," *Maneely v. Gen. Motors Corp., 108 F.3d 1176, 1181 (9th Cir. 1997)*, "relating to **[**73]** the title, character, quality, identity, or condition of the sold goods," *In re Sony PS3 "other OS" Litig. v. Sony Computer Entm't Am., Inc., 551 Fed. Appx. 916, 919 (9th Cir. 2014)*. The statement need not be in a formal warranty document; for instance, "statements made in a manufacturer's advertising that are 'disseminated to the consuming public in order to induce sales' can create express warranties." *Birdsong v. Apple Inc., No. C 06-02280 JW, 2007 U.S. Dist. LEXIS 111342, 2007 WL 9723505, at *5 (N.D. Cal. Dec. 14, 2007)* (quoting *Keith v. Buchanan, 173 Cal. App. 3d 13, 22, 220 Cal. Rptr. 392 (1985))*.

Defendants move to dismiss this claim for two reasons. First, Defendants argue that Plaintiffs have not alleged the exact terms of the warranty, as they are required to do at this stage, *see, e.g., Blennis v. Hewlett-Packard Co., No. C 07-00333 JF, 2008 U.S. Dist. LEXIS 106464, 2008 WL 818526, at *2 (N.D. Cal. Mar. 25, 2008)*. Mot. at 19. In response, Plaintiffs simply refer to the Court **[*836]** to its arguments regarding breach of contract (Count 7). Opp. at 20; *see* Part IV.E.i. In so doing, Plaintiffs seem to imply that the same provisions of the Privacy Policy and Terms of Service that form the basis for their contract claim are also the relevant warranty terms for their warranty claim. But as Defendants emphasize, the "sold goods" here are the GAEDs that Plaintiffs purchased—not the Google Assistant software. Plaintiffs have not shown the cited provisions of the Privacy Policy relate to the Google Home or Google Pixel—let alone **[**74]** that they amount to an "explicit guarantee" about the quality or character of either product. *Hadley v. Kellogg Sales Co., 273 F. Supp. 3d 1052, 1092 (N.D. Cal. 2017)*. Indeed, the cited provisions—which are general assurances about Defendants' use and disclosure of user information—do not allude to any particular product or products.

Most of the statements that Plaintiffs cite from the "Google Nest Help Center" and the "Google Safety Center" webpages fare no better. *See* Consol. FAC ¶¶ 193-195. There is one statement, however, that could plausibly be construed as an express warranty term for the Google Home. In the Frequently Asked Questions section of the Google Nest Help Center cite, Defendants provided the following response to the question, "Is Google Home recording all of my conversations?":

> No. Google Home listens in short (a few seconds) snippets for the hotword. Those snippets are deleted if the hotword is not detected, and none of that information leaves your device until the hotword is heard. When Google Home detects that you've said "Ok Google" or "Hey Google," or that you've physically long pressed the top of your Google Home device, the LEDs on top of the device light up to tell you that recording is happening, Google Home records what you say, **[**75]** and sends that recording (including the few-second hotword recording) to Google in order to fulfill your request. You can delete these recordings through My Activity anytime.

Id. ¶ 195. This passage pertains to the Google Home device and describes the way that it functions. The Court finds that this statement about the Google Home is sufficiently specific and unequivocal, and could plausibly be considered a promise that the Google Home will delete any recordings "if the hotword is not detected." However, Plaintiffs have not adequately alleged that the promise was breached. *See* Mot. at 17-18. As described in the Consolidated FAC, false accepts are situations in which a hotword *is* detected, albeit mistakenly. Plaintiffs must plausibly plead that retaining recordings when a hotword is *mistakenly* detected violates a promise to delete recording if a hotword is *not* detected. They have not yet done so.

Accordingly, because Plaintiffs have not identified any particular warranty term that has plausibly been breached, Count 8 is DISMISSED WITH LEAVE TO AMEND.

The Court also briefly addresses Defendants' second ground for dismissal: They argue in a footnote that the Google Home and Google Pixel **[**76]** "are subject to express limited warranties which state that they are the only express warranty that Google provides for these devices, and provide an exclusive remedy in the event a defect arises during the warranty period." Mot. at 19 n.4. In other words, Defendants disclaim any express warranties beyond the ones they have submitted in their request for judicial notice. ECF 56-1 ¶¶ 6-7; *see id.* Ex. E-F. In Part III, the Court took judicial notice of the existence of the two documents—the "Google Home Warranty — United States" and the "Hardware limited warranty for Android Hardware devices, including the Pixel smartphone"— **[*837]** because they are available on public websites. However, the Court made clear that its judicial notice does not establish that these documents are "valid or binding contracts." *Datel Holdings, 712 F. Supp. 2d at 984*. That is because the binding effect of the documents is not a matter that "cannot reasonably be questioned," *Fed. R. Evid. 201*.

Consequently, the Court cannot yet determine whether the two documents asserted by Defendants operate to preclude any warranty claim based other statements Defendants have made. *See Ladore v. Sony Computer Entm't Am., LLC, 75 F. Supp. 3d 1065, 1074 (N.D. Cal. 2014)* ("[T]he Court will not consider whether Sony may have effectively disclaimed any express warranties **[**77]** in its Terms of Service or Software License."). Therefore, Count 8 is not subject to dismissal on that basis.

To summarize, then, Defendants' motion to dismiss Count 8 is GRANTED WITH LEAVE TO AMEND for failure to plead a prima facie case of breach of express warranty, but not based on the disclaimer proffered by Defendants.

ii. Breach of Implied Warranty

Next, Defendants move to dismiss Count 9, Plaintiffs' claim for breach of the implied warranty of merchantability. Consol. FAC ¶¶ 211-222; *see* Mot. at 20-21. Plaintiffs have asserted Count 9 under *California Commercial Code § 2314*, which is modeled on the Uniform Commercial Code. *See* Consol. FAC ¶ 217; Opp. at 20-21. Defendants move to dismiss this claim for three reasons, but the Court need only reach the first: that Plaintiffs' claims are barred by an explicit disclaimer of the implied warranty of merchantability in its Terms of Service.

Defendants cite the following provision from their Terms of Service, of which the Court has taken judicial notice, *see supra* Part III:

> Other than as expressly set out in these terms or additional terms, neither Google nor its suppliers or distributors make any specific promises about the services. For example, we don't make any commitments about **[**78]** the content within the services, the specific functions of the services, or their reliability, availability, or ability to meet your needs. We provide the services "as is."
>
> *Some jurisdictions provide for certain warranties, like the implied warranty of merchantability, fitness for a particular purpose and non-infringement. To the extent permitted by law, we exclude all warranties*.

ECF 56-1 at 16. Plaintiffs do not dispute that they are bound by the TOS or that the disclaimer contained therein covers the implied warranty of merchantability asserted in Count 9. *Cal. Com. Code § 2316(2)* (providing that a disclaimer of the implied warranty of merchantability "must mention merchantability and in case of a writing must be conspicuous").

Plaintiffs nonetheless challenges the validity of the disclaimer by arguing that it is "unconscionable in that it 'creates an overly harsh or one-sided result that shocks the conscience.'" Opp. at 22. But Plaintiffs have alleged no facts to support this argument, which is made in a scant few sentences in their Opposition brief. They simply assert that the

TOS is "a non-negotiable contract of adhesion." *Id.* That is not enough, for not all contracts of adhesion are unconscionable. Under California **[**79]** law, a contract provision is unconscionable, and therefore unenforceable, only if it is both procedurally and substantively unconscionable. *See Armendariz v. Found. Health Psychcare Servs., Inc., 24 Cal. 4th 83, 113-14, 99 Cal. Rptr. 2d 745, 6 P.3d 669 (2000)*. Procedural unconscionability "focus[es] on 'oppression' or 'surprise' due to unequal bargaining power,"; **[*838]** substantive unconscionability focuses on "'overly harsh' or 'one-sided' results." *Id.* Plaintiffs have made no non-conclusory allegations to establish either element.

Meanwhile, this Court and other courts in this district have dismissed implied warranty claims based on similar disclaimers. *See In re Nexus 6P Prod. Liab. Litig., 293 F. Supp. 3d 888, 944 (N.D. Cal. 2018)* (collecting cases). Under these circumstances, the Court is not persuaded by Plaintiffs' cursory argument that the instant disclaimer is unconscionable.

The Court will therefore enforce the disclaimer and GRANT Defendants' Motion to Dismiss the implied warranty claim. The Court will grant LEAVE TO AMEND to allege further facts in support of Plaintiffs' unconscionability argument.

iii. Magnuson-Moss Warranty Act

Count 10 alleges a violation of the federal Magnuson-Moss Warranty Act based on breach of the implied warranty of merchantability. Consol. FAC ¶¶ 223-233. Although the Magnuson-Moss Warranty Act creates a separate federal cause **[**80]** of action for breach of an implied warranty, it directs courts to state law to determine the meaning and scope of the implied warranty. *See 15 U.S.C. § 2301(7)*; *see Birdsong v. Apple, Inc., 590 F.3d 955, 958 n.2 (9th Cir. 2009)*. In this case, Plaintiffs have predicated their Magnuson-Moss Warranty Act claim on a breach of California state warranty law. *See* Opp. at 22. The Court has found Plaintiffs' claim for breach of implied warranty under California law (Count 9) to be inadequately pleaded; consequently, Plaintiffs' claim under the Magnuson-Moss Warranty Act must also be dismissed. *See Birdsong, 590 F.3d at 958 n.2* (dismissing plaintiffs' claims under the Magnuson-Moss Act "because we conclude that the plaintiffs have failed to state a claim for breach of an express or implied warranty" under California law). Defendants' motion to dismiss is GRANTED WITH LEAVE TO AMEND.

G. Count 11: California UCL

Count 11 is brought under California's Unfair Competition Law ("UCL"), which prohibits any "unlawful, unfair or fraudulent business practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. The California Supreme Court has clarified that the UCL, because it is "written in the disjunctive," prohibits three separate types of unfair competition: (1) unlawful acts or practices, (2) unfair acts of practices, **[**81]** and (3) fraudulent acts or practices. *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*; *accord Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)*. To plead a UCL claim, a plaintiff's allegations must show that a defendant's conduct violates one of these three "prongs." *Id.* In addition, because a UCL claim may only be brought by "a person who has suffered injury in fact and has lost money or property as a result of the unfair competition," *Cal. Bus. & Prof. Code § 17204*, a plaintiff must "demonstrate some form of economic injury." *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 323, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*. This requirement is sometimes referred to as "UCL standing." *Id. at 320-21*.

In their motion to dismiss, Defendants contend that Plaintiffs have failed to allege economic injury, which would preclude any UCL claim. Defendants also challenge the sufficiency of Plaintiffs' allegations as to each of the three prongs ("unlawful," "unfair," and "fraudulent").

i. Economic injury

The Court begins by addressing Defendants' contention that Plaintiffs **[*839]** have not alleged economic injury, as necessary to bring a UCL claim. Under California law, a UCL plaintiff must "(1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that that economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that **[**82]** is the gravamen of the claim." *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 322, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*. "There are innumerable ways in which economic injury" may be shown; for instance:

> A plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required to enter into a transaction, costing money or property, that would otherwise have been unnecessary.

Id. at 323.

In the instant case, Plaintiffs advance two theories of economic injury. First, Plaintiffs allege overpayment for their Google Assistant Enabled Devices, i.e. "that they would not have purchased their GAEDs, or would have paid less for them, if they had known that Google was intercepting, recording, disclosing, and otherwise misusing their conversations without their authorization." Opp. at 22 (citing Consol. FAC ¶¶ 7, 54, 241). Certainly, overpayment is an economic injury under the UCL. *See, e.g., Davidson v. Kimberly-Clark Corp., 889 F.3d 956, 966 (9th Cir. 2018)*, *cert. denied*, *139 S. Ct. 640, 202 L. Ed. 2d 492 (2018)*. The question becomes whether Plaintiffs have pleaded sufficient facts to establish overpayment here.

On that issue, Defendants maintain that the Consolidated FAC contains insufficient details regarding **[**83]** Plaintiffs' purchase of their Google Assistant Enabled Devices. Mot. at 22; Reply at 13. According to Defendants, the Consolidated FAC merely alleges that Plaintiffs "owned" and "interacted" with GAEDs and not that they purchased their devices. *Id.* (citing Consol. FAC ¶¶ 51-53). That is true of Named Plaintiff B.S., who allegedly interacted with a GAED that he did not own. *See* Consol. FAC ¶ 51. It is also true of Named Plaintiffs Galvan and E.G., who allegedly interacted with a device that was not manufactured by Defendants, the Samsung Galaxy Tab. *See id.* ¶ 53. Because these Named Plaintiffs have failed to allege that they actually paid any money for a Google Assistant Enabled Device, they cannot have been injured by overpayment.

By contrast, the Consolidated FAC does allege that Plaintiffs Kumandan and Spurr "purchased their Google Manufactured Device either directly from Google or from actual or apparent agents of Google." Consol. FAC ¶ 215. This allegation suffices to support an inference that Plaintiffs Kumandan and Spurr paid for their respective GAEDs. Defendants raise no other objection to the overpayment theory of damages. The Court therefore finds that Plaintiffs Kumandan **[**84]** and Spurr have plausibly alleged they would not have purchased their GAEDs, or would have paid less for them, if they had been aware of Defendants' practices with regard to false accepts.

Plaintiffs' second theory of economic injury is that Defendants "wrongfully monetized and profited from Plaintiffs' personal content and information, which is of value, entitling Plaintiffs to restitution." Opp. at 23. According to Plaintiffs, "[e]ntitlement to restitution is sufficient to demonstrate a loss of money or property under the UCL." Opp. at 23.

[*840] The Court does not doubt that claims for restitution are often based on actual loss of money or property, as in the cases Plaintiffs cite. *See* *In re Anthem, Inc. Data Breach Litig., No. 15-MD-02617-LHK, 2016 U.S. Dist. LEXIS 70594, 2016 WL 3029783, at *32 (N.D. Cal. May 27, 2016)* ("All California Plaintiffs paid premiums, which were in turn used to pay for services by Defendants."); *In re Google Android Consumer Privacy Litig., No. 11-MD-02264 JSW, 2014 U.S. Dist. LEXIS 31430, 2014 WL 988889, at *5 (N.D. Cal. Mar. 10, 2014)* ("Plaintiffs have alleged sufficient facts to show standing based on the diminished battery life."). But Plaintiffs are not absolved of their burden to plead economic injury by their conclusory assertion that they are entitled to restitution. Plaintiffs' allegation that Defendants "wrongfully monetized and profited **[**85]** from Plaintiffs' personal content and information" does not give rise to an inference that Plaintiffs "lost money or property," *Cal. Bus. & Prof. Code § 17204*. As another court in this district has explained, claiming that a defendant "may have gained money through its sharing or use of the plaintiffs' information" is "different from saying the plaintiffs lost money." *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d at 804*.

Moreover, Plaintiffs have not shown that they are, in fact, entitled to restitution under the UCL. The California Supreme Court has "defined an order for 'restitution' as one 'compelling a UCL defendant to return money obtained through an unfair business practice to those persons in interest from whom the property was taken.'" Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1144, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003). Of relevance here, restitution is distinguished from disgorgement. "'Disgorgement' is a broader remedy than restitution" in that disgorgement "has been used to refer to surrender of all profits earned as a result of an unfair business practice *regardless of whether those profits represent money taken directly from persons who were victims of the unfair practice*." Id. at 1145 (emphasis in original). By contrast, restitution under the UCL must "restore the status quo" by "returning to the plaintiff" funds taken from him or "benefits in **[**86]** which the plaintiff has an ownership interest." Id. at 1148-49. Put another way, restitutionary disgorgement "focuses on the plaintiff's loss, and nonrestitutionary disgorgement "focuses on the defendant's unjust enrichment." Meister v. Mensinger, 230 Cal. App. 4th 381, 398, 178 Cal. Rptr. 3d 604 (2014). Although the defendant's benefit and the plaintiff's loss are often the same, nonrestitutionary disgorgement may also be had "where a benefit has been received by the defendant but the plaintiff has not suffered a corresponding loss." *Id.* (internal quotations and alterations omitted).

Plaintiffs say they are entitled to restitution because Defendants "wrongfully monetized and profited from Plaintiffs' personal content and information." Opp. at 23. But "plaintiff's assertion that defendants received ill-gotten gain does not make a viable UCL claim unless the gain was money in which plaintiff had a vested interest." Madrid v. Perot Systems Corp., 130 Cal. App. 4th 440, 455, 30 Cal. Rptr. 3d 210 (2005). Here, as discussed in connection with Plaintiffs' breach of contract claim, *see supra* Part IV.E.iii, Plaintiffs have not shown that they have a vested interest in any money earned from unspecified "personal content and information."

To be clear, the Court is not requiring Plaintiffs to show they are entitled to restitution under the UCL in order to establish their standing **[**87]** under the UCL. *See* Kwikset Corp., 51 Cal. 4th at 337 (holding that standing is not dependent on eligibility for restitution). But where, as here, Plaintiffs **[*841]** themselves base their standing on eligibility for restitution, Plaintiffs' failure to plead their entitlement to restitution under the UCL is fatal.

In sum, the Court GRANTS Defendants' motion to dismiss Plaintiff Galvan's, Plaintiff B.S.'s, and Plaintiff E.G.'s UCL claims for failure to adequately plead economic injury; the Court will GRANT LEAVE TO AMEND, however, because they may able to remedy that defect. Plaintiffs Kumandan and Spurr have adequately pleaded economic injury. Because their UCL claims shall go forward, the Court proceeds to consider of the adequacy of Plaintiffs' pleadings under each prong of the UCL.

i. Unlawful Prong

The "unlawful" prong of the UCL "borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." Cel-Tech, 20 Cal. 4th at 180. In other words, to be "unlawful" under the UCL, Defendants' conduct must violate another "borrowed" law. HSBC Bank Nevada, 691 F.3d at 1168. "Virtually any state, federal or local law can serve as the predicate for an action under section 17200." *Id.* (quoting People ex rel. Bill Lockyer v. Fremont Life Ins. Co., 104 Cal. App. 4th 508, 515, 128 Cal. Rptr. 2d 463 (2002)) (alterations omitted). Here, Plaintiffs predicate **[**88]** their "unlawful" claim on Defendants' alleged violations of (1) the Wiretap Act, (2) the SCA, (3), the CIPA, (4) the Magnuson-Moss Warranty Act, (5) Cal. Bus. & Prof. Code § 22576,[2] for having breached the Privacy Policy, (6) the California Constitution's right of privacy, and (7) the common law prohibition of intrusion upon seclusion. Opp. at 24; *see* Consol. FAC ¶ 235.

---

[2] This provision states:

> An operator of a commercial Web site or online service that collects personally identifiable information through the Web site or online service from individual consumers who use or visit the commercial Web site or online service and who reside in California shall be in violation of this section if the operator fails to comply with the provisions of Section 22575 or with the provisions of its posted privacy policy in either of the following ways:
>
> (a) Knowingly and willfully.

Because Plaintiffs assert each of these alleged violations as independent counts, the Court has already considered the adequacy of Plaintiffs' allegations as to those counts. The Court's findings in that regard are equally determinative of the validity of Plaintiffs' UCL claim. Accordingly, the Court must DISMISS WITH LEAVE TO AMEND any claims based on (1) the Wiretap **[**89]** Act, as alleged in Count 1; (2) *Section 2701(a)* of the Wiretap Act, as alleged in Count 2; (3) the CIPA, as alleged in Counts 3 and 4; (4) the Magnuson-Moss Warranty Act, as alleged in Count 10; (5) *Cal. Bus. & Prof. Code § 22576*, as alleged in Count 7; (6) the California Constitution's right of privacy, and (7) the common law prohibition of intrusion upon seclusion. On the other hand, Plaintiffs have stated a UCL claim based on a violation of *Section 2702(a) of the SCA*, which the Court found to be sufficiently pleaded in Count 2. *See supra* Part IV.ii.

Although not addressed in Plaintiffs' Opposition brief, the Consolidated FAC also alleges an "unlawful" claim based on *California Family Code § 6701*, *see* Consol. FAC ¶¶ 236-38, which provides:

> Except as otherwise provided by statute, a contract of a minor may be disaffirmed by the minor before majority or within a reasonable time afterwards or, in case of **[*842]** the minor's death within that period, by the minor's heirs or personal representative.

The Consolidated FAC alleges that Defendants have run afoul of this provision by failing to obtain "minor Plaintiff B.S.'s or E.G.'s consent to intercept, record, disclose, or use their confidential communications." Consol. FAC ¶ 238.

In their motion to dismiss, Defendants argue that Plaintiffs have **[**90]** not shown how the facts of this case implicate a minor's right of disaffirmance. Mot. at 24. The Court agrees that it is not clear how Plaintiffs' allegations pertain to the statute, and Plaintiffs have provided no explanation in their Opposition briefing. Based on Plaintiffs' lack of response, the Court considers the claim based on *California Family Code § 6701* abandoned and the argument conceded. *Montgomery v. Specialized Loan Servicing, LLC, 772 Fed. App'x 476, 477 (9th Cir. 2019)* ("The district court properly dismissed plaintiffs' remaining claims because plaintiffs failed to respond to the arguments raised in defendants' motion to dismiss these claims.") (citing *Walsh v. Nev. Dep't of Human Res., 471 F.3d 1033, 1037 (9th Cir. 2006))*.

For these reasons, Plaintiffs may proceed with their UCL claim premised on *Section 2702(a) of the SCA*; Defendants' motion to dismiss is otherwise GRANTED.

ii. Fraudulent Prong

The UCL also provides a cause of action again "fraudulent" business acts or practices. "A business practice is fraudulent under the UCL if members of the public are likely to be deceived." *HSBC Bank Nevada, 691 F.3d at 1169* (citing *Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal. App. 4th 638, 645, 72 Cal. Rptr. 3d 903 (2008))*. In their Opposition brief, Plaintiffs argue that they "adequately allege affirmative misrepresentations" and "omissions," which are presumably meant to form the basis of a claim that Plaintiffs have engaged in "fraudulent" business practices. Opp. at 23. But the Consolidated FAC does not purport to assert a claim **[**91]** under the fraudulent prong of the UCL. *See* Consol. FAC ¶¶ 234-242. Furthermore, the Consolidated FAC makes no mention of "affirmative misrepresentations" or "omissions"; certainly, it has not identified any misrepresentations or omissions with particularity.

The lack of specific allegations regarding the allegedly fraudulent business practices is especially problematic here because claims under the fraudulent prong of the UCL are subject to "the heightened pleading requirements of *Rule 9(b)*." *Davidson v. Kimberly-Clark Corp., 889 F.3d 956, 964 (9th Cir. 2018)*. To satisfy *Rule 9(b)*, "a pleading must

---

> (b) Negligently and materially.

Cal. Bus. & Prof. Code § 22576. Plaintiffs allege that Defendants violate this provision by virtue of its breach of contract, as alleged in Count 7. Opp. at 24; *see* Consol. FAC ¶ 235.

identify the who, what, when, where, and how of the misconduct charged, as well as what is false or misleading about the purportedly fraudulent statement." *Cafasso v. Gen. Dynamics C4 Sys., 637 F.3d 1047, 1055 (9th Cir. 2011)*. Plaintiffs have not done any of the above. Defendants' motion to dismiss is therefore GRANTED WITH LEAVE TO AMEND.

iii. Unfair Prong

Last, Plaintiffs allege that Defendants have "engaged in business acts or practices deemed 'unfair' under the UCL." Consol. FAC ¶ 239.

"The UCL does not define the term 'unfair.' In fact, the proper definition of 'unfair' conduct against consumers is currently in flux among California courts." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)* (internal quotations omitted). For some years, the California **[**92]** Courts of Appeal formulated different tests, such as whether the practice "offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious **[*843]** to consumers," *Cel-Tech, 20 Cal. 4th at 184* (quoting *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 887, 85 Cal. Rptr. 2d 301 (1999))* ("*South Bay* test"), or whether "the gravity of the harm to the alleged victim" outweighs "the utility of the defendant's conduct," *id.* (quoting *State Farm Fire & Casualty Co. v. Superior Court, 45 Cal. App. 4th 1093, 1104, 53 Cal. Rptr. 2d 229 (1996))* ("*State Farm Fire* test"). Then, in *Cel-Tech*, the California Supreme Court appeared to confine "unfair" to "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *20 Cal. 4th at 187*. "It further required that 'any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition.'" *HSBC Bank Nevada, 691 F.3d at 1170* (quoting *Cel-Tech, 20 Cal. 4th at 185*). The *Cel-Tech* Court explained that the prior definitions were "too amorphous" and "provide[d] too little guidance to courts and businesses." *HSBC Bank Nevada, 691 F.3d at 1169* (quoting *Cel-Tech, 20 Cal. 4th at 185*).

However, the *Cel-Tech* court expressly limited **[**93]** its decision, stating, "Nothing we say relates to actions by consumers or by competitors alleging other kinds of violations of the unfair competition law such as 'fraudulent' or 'unlawful' business practices or 'unfair, deceptive, untrue or misleading advertising.'" *Cel-Tech, 20 Cal. 4th at 187 n.12*. Consequently, California courts remain divided on whether the *Cel-Tech* definition applies to "consumer actions" or whether the *State Farm Fire* and *South Bay* tests remain valid. *See HSBC Bank Nevada, 691 F.3d at 1170*. The Ninth Circuit has noted this continued controversy but awaits the California Supreme Court's resolution of it. *See id.*; *Hodsdon, 891 F.3d at 866*.

In this case, the parties follow the Ninth Circuit's lead and argue under both *Cel-Tech* and the prior balancing tests from *State Farm Fire* and *South Bay. See* Consol. FAC ¶ 239.

First, as to Plaintiffs' claim that Defendants' conduct is unfair under the *Cel-Tech* test, the Court agrees with Defendants that Plaintiffs have not alleged any harm to competition or violation of the "letter, policy, or spirit of the antitrust laws," *HSBC Bank Nevada, 691 F.3d at 1170*. *See* Mot. at 24. Indeed, the Court cannot discern a single allegation in the Consolidated FAC pertaining to competitive harm. Plaintiffs' brief in Opposition makes **[**94]** no attempt to explain or defend their omissions, wherefore the Court considers the claim abandoned. *See Montgomery, 772 Fed. App'x at 477*.

Second, as to the pre-*Cel-Tech* definitions of "unfair," some courts have treated the *State Farm Fire* and *South Bay* tests as distinct tests; others, including the Ninth Circuit, have referred to them together as the "balancing test," *see HSBC Bank Nevada, 691 F.3d at 1169*; *Accord Herskowitz v. Apple Inc., 940 F. Supp. 2d 1131, 1146 (N.D. Cal. 2013)*. In any event, the parties agree that both tests require the Court to "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." Mot. at 25; Opp. at 25 (quoting *HSBC Bank Nevada, 691 F.3d at 1169*). Plaintiffs say that Defendants' actions have harmed Plaintiffs by "illegally wiretapping and wrongfully transmitting to third parties Plaintiffs' confidential communications." Opp. at 25. Defendants object that, considering the substantial benefit the Google Assistant **[*844]** provides to consumers, Plaintiffs "cannot reasonably allege" that the utility of their Google Assistant Enabled Devices is outweighed by the "occasional error" of false accepts. Mot. at 25.

Just how "occasional" the error is, however, is a question of fact that remains unanswered at this stage. Moreover, the harm that is asserted here is the invasion of privacy, which is difficult to quantify. **[**95]** The Court cannot say, as a matter of law, that the utility of the Google Assistant necessarily outweighs the harm from false accepts. *Accord* *In re Carrier IQ, Inc., 78 F. Supp. 3d 1051, 1117 (N.D. Cal. 2015)* ("The cost-benefit analysis this test calls for is not properly suited for resolution at the pleading stage."); *In re iPhone Application Litigation, 844 F. Supp. 2d 1040 (N.D. Cal. 2012)* ("While the benefits of Apple's conduct may ultimately outweigh the harm to consumers, this is a factual determination that cannot be made at this stage of proceedings.").

The Court nevertheless finds that Plaintiffs' "unfair" claim is deficient because, as discussed in Part IV.A.ii., the Named Plaintiffs failed to adequately plead that their own conversations were intercepted and that those conversations were subject to a reasonable expectation of privacy. That failure means that Plaintiffs have not adequately pleaded "harm to the alleged victim" for purposes of their UCL claim. The Court therefore must DISMISS Plaintiffs' claims under the "unfair" prong of the UCL but will GRANT LEAVE TO AMEND.

H. Count 12: Declaratory Judgment

Defendants do not move to dismiss Count 12, Plaintiffs' request for declaratory judgment under the Declaratory Judgment Act, *28 U.S.C. §§ 2201 et seq.* Count 12 may proceed.

V. ORDER

For the foregoing reasons, the Court rules **[**96]** on Defendants' motion to dismiss the 12 Counts in the Consolidated FAC as follows:

- Count 1: GRANTED WITH LEAVE TO AMEND.

- Count 2: GRANTED WITH LEAVE TO AMEND as to the claim under *18 U.S.C. § 2701(a)*; DENIED as to the claim under *18 U.S.C. § 2702(a)*.
- Count 3: GRANTED WITH LEAVE TO AMEND.
- Count 4: GRANTED WITH LEAVE TO AMEND.
- Count 5: GRANTED WITH LEAVE TO AMEND.
- Count 6: GRANTED WITH LEAVE TO AMEND.
- Count 7: GRANTED WITH LEAVE TO AMEND.
- Count 8: GRANTED WITH LEAVE TO AMEND.
- Count 9: GRANTED WITH LEAVE TO AMEND.
- Count 10: GRANTED WITH LEAVE TO AMEND.
- Count 11: GRANTED WITH LEAVE TO AMEND as to the fraudulent and unfair prongs; DENIED as to the unlawful prong.

Any amended complaint is **due by June 5, 2020**. Plaintiffs are directed to file a redlined complaint as an attachment to any amended complaint. Leave to amend is restricted to the defects discussed in this Order and in Defendants' motion; Plaintiff may not add new parties or claims without obtaining prior express leave of the Court. However, to the extent Plaintiffs fail to cure the defects identified by this Order, **[*845]** their claims will be subject to dismissal with prejudice.

IT IS SO ORDERED.

Opinion

MEMORANDUM AND ORDER

Saris, D.J.

Plaintiff Nuance Communications, Inc. brings this action against Defendant Omilia Natural Language Solutions, Ltd., alleging infringement of eight patents concerning automated speech recognition and interactive voice response systems used in large scale call centers.

Omilia counter-punched with numerous counterclaims alleging, among other things, a violation of *Section 2* of the Sherman Act (Count 17); a violation of *Section 7* of the Clayton Act (Count 18); common law unfair competition (Count 19); tortious interference with contractual relations (Count 20); and tortious interference with advantageous business **[*3]** relations (Count 21)[1] .

Now, Nuance moves to dismiss Omilia's antitrust and state law counterclaims (Counts 17-21), or in the alternative to stay those counterclaims pending resolution of the underlying patent infringement suit. After hearing, the Court **ALLOWS** the motion to dismiss Omilia's claim of common law unfair competition (Count 19) and **DENIES** the motion with regard to Omilia's remaining antitrust and state law counterclaims.

FACTUAL BACKGROUND

The following facts are drawn from Omilia's countercomplaint (Docket No. 44) and must be taken as true at this stage. See *Newman v. Lehman Bros. Holdings Inc., 901 F.3d 19, 25 (1st Cir. 2018)*.

I. Nuance

Nuance develops and provides Automated Speech Recognition ("ASR") technology, which allows a machine to recognize and respond to human voice commands. Nuance's ASR software is used by enterprise-level call centers around the world.

Nuance was created in 2005 from a merger of ScanSoft and another entity named Nuance ("Pre-2005 Nuance"). ScanSoft had already acquired at least three other voice recognition firms between 2001 and 2005. From 2005 to 2018, the newly formed Nuance acquired at least 16 additional companies "that developed and/or commercialized voice recognition-related technology." Docket No. 44 ¶ 106. **[*4]** Nuance also acquired over 5,000 voice-recognition related patents during the 2005-2018 timeframe. Omilia alleges that, due to these corporate and intellectual property acquisitions, Nuance has maintained an international market share of over 70% since 2001.[2] Nuance is now the owner of one of the largest speech-recognition patent portfolios in the world.

Omilia alleges that Nuance has a strategy of "acquir[ing] actual and potential competitors through a calculated scheme of threatening to assert and/or actually asserting baseless patent infringement litigation using its massive portfolio of acquired patents to drive its competitors out of the market and/or coerce them into being acquired by Nuance." Id. ¶ 112. Since 2011, ScanSoft/Nuance has initiated at least seventeen patent lawsuits against its competitors. At least three of these lawsuits were initiated shortly after the defendant corporation refused a buyout offer by Nuance.

---

[1] Omilia's answer labeled this claim as Count 20. Docket No. 44 at 68.

[2] Omilia argues that the Court may reasonably infer that, given Nuance's 70% international market share, Nuance's market share within the United States is at least 70%. See Dkt. No. 80 at 44 (motion hearing transcript).

Omilia alleges that this strategy enables Nuance to "maintain supra-competitive prices for its software . . . without innovating that software, which it would have been forced to do" if it was subject to competition. Id. ¶ 114. For example, Nuance introduced **[*5]** a new major release related to its speech recognition software once a year between 1994 and 2005, but since 2005 has issued only three new releases. The Department of Justice ("DOJ") Antitrust Division investigated a Nuance transaction related to the medical transcription sector in 2008 and "raised concerns" about Nuance's proposed acquisition of a voice recognition firm in 2009. Id. ¶ 115.

II. Omilia's Relationship with Nuance

Omilia is a Cyprus-based company that sells a proprietary ASR software system for use in large enterprise call centers. Omilia resold Nuance's ASR technology from 2007 to 2013, along with Omilia's own proprietary natural language understanding ("NLU") engine and dialogue manager ("DM").

In April 2010, Omilia's Managing Director Dimitris Vassos contacted Nuance's CEO to discuss the possibility of an expanded partnership. Vassos met with Peter MacKinnon, the General Manager of Nuance Europe, in January 2011. During that meeting and in related emails, Vassos provided Nuance with documents describing Omilia's proprietary NLU and DM system, known as DiaManT.

In 2012, Nuance introduced an amendment to its reseller agreement with Omilia. The amendment required Omilia to **[*6]** bundle Nuance's professional support services with Omilia's products and required Omilia to sell the full stack of Nuance's products, so that Omilia could not integrate Omilia's NLU with Nuance's ASR. Omilia alleges that Nuance implemented the same amendments with other resellers, in order to use its dominant position in the ASR market to gain monopoly profits in the market for professional services.

In October 2013, Nuance asked Omilia to disclose its full list of customers and projects as part of a "global partner review." Id. ¶ 125. Nuance represented that it would maintain the list in confidence. However, soon after Omilia provided the list, Nuance contacted an Omilia customer and an Omilia partner organization, allegedly to interfere with Omilia's relationships with those organizations. On October 31, 2013, Nuance served Omilia with a 90-day notice to terminate the Nuance-Omilia reseller agreement. After termination of the reseller agreement, Omilia implemented a proprietary ASR technology.

III. Procedural Background

In January 2018, Nuance sent Omilia a letter demanding it to submit to an audit of all transactions and royalty payments it received from any customer since the inception **[*7]** of its Reseller Agreement with Nuance. Omilia refused this demand. In September 2018, Nuance sent Omilia a letter asserting that Omilia's systems infringe three patents owned by Nuance. Two of those patents are at issue in Nuance's infringement lawsuit here.

Omilia alleges that before Nuance sent the September 2018 letter, Nuance represented to Omilia's customers and potential customers in the U.S. and Canada that it had already brought a patent infringement lawsuit against Omilia. Omilia claims it lost commercial opportunities and "hundreds of millions of dollars of potential revenue" due to those representations. Id. ¶¶ 133-34.

In March 2019, Omilia responded to Nuance's letter, stating that Omilia did not infringe Nuance's patents. In June 2019, Nuance filed suit in this Court, alleging that Omilia infringed eight of its patents. Omilia subsequently filed a motion to dismiss for lack of personal jurisdiction, which this Court denied in December 2019.

Omilia filed an Answer and Counterclaims in November 2019. Omilia alleged that Nuance engaged in a "monopolistic scheme" in the ASR Enterprise Software Market in the United States by acquiring more than fifty companies and "thousands" **[*8]** of patents. Id. ¶¶ 91, 143-44, 146. Omilia also claimed that Nuance told at least two actual or potential Omilia customers, Connex and TD Bank, about Omilia's alleged patent infringement. Nuance filed the present motion to dismiss in January 2020, and Omilia opposed in February 2020.

The underlying patent dispute is scheduled to proceed in phases. Claims related to two of the eight patents will be considered during Phase 1, for which a trial is currently scheduled for October 2021.

STANDARD OF REVIEW

A *Rule 12(b)(6)* motion is used to dismiss complaints that do not "state a claim upon which relief can be granted." See *Fed. R. Civ. P. 12(b)(6)*. To survive a *Rule 12(b)(6)* motion to dismiss, the factual allegations in a complaint must "possess enough heft" to state a claim to relief that is plausible on its face. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555-57, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In evaluating the motion, the Court must accept the factual allegations in the plaintiff's complaint as true, construe reasonable inferences in his favor, and "determine whether the factual allegations in the plaintiff's complaint set forth 'a plausible claim upon which relief may be granted.'" *Foley v. Wells Fargo Bank, N.A., 772 F.3d 63, 71 (1st Cir. 2014)* (quoting *Woods v. Wells Fargo Bank, N.A., 733 F.3d 349, 353 (1st Cir. 2013))*.

In addition to the complaint, the court may also consider "documents incorporated by reference into the complaint, matters **[*9]** of public record, and facts susceptible to judicial notice." *Haley v. City of Boston, 657 F. 3d 39, 46 (1st Cir. 2011)* (cleaned up).

DISCUSSION

I. Antitrust Claims

Nuance argues that Omilia's antitrust claims should be dismissed because (1) Omilia fails to allege unlawful monopolization under *Section 2* of the Sherman Act; (2) Omilia fails to plead a plausible market definition for its *Sherman Act* and *Clayton Act* claims; and (3) all but one of the transactions challenged by Omilia under the *Clayton Act* are time-barred by the four-year statute of limitations period, and the single remaining transaction is insufficient to state a claim.

A. *Section 2* of the Sherman Act (Count 17)

Nuance argues that Omilia fails to allege unlawful monopolization under *Section 2* of the Sherman Act. That section imposes liability upon "every person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States." *15 U.S.C. § 2*. To establish a *Section 2* monopolization claim, a plaintiff must show "(1) that the defendant possesses monopoly power in the relevant market, and (2) that the defendant has acquired or maintained that power by improper means." *In re Lantus Direct Purchased Antitrust Litigation, 950 F.3d 1, 7 (1st Cir. Feb. 13, 2020)* (quoting *Town of Concord v. Bos. Edison Co., 915 F.2d 17, 21 (1st Cir. 1990))*.

Here, neither party contests that Nuance plausibly possesses monopoly power in the ASR Enterprise Market. The **[*10]** parties disagree about the proper geographic scope of that market, as described below in section I.B. The parties also disagree as to whether Omilia has plausibly alleged that Nuance has acquired or maintained its monopoly power by improper means.

Omilia alleges that Nuance has a strategy of "acquir[ing] actual and potential competitors through a calculated scheme of threatening to assert and/or actually asserting baseless patent infringement litigation using its massive portfolio of acquired patents to drive its competitors out of the market and/or coerce them into being acquired by Nuance." Docket No. 44 ¶ 112; see id. ¶ 118 (quoting New York Times report that Nuance's CEO had told a potential competitor, "I have patents that can prevent you from practicing in this market."); id. ¶¶ 117, 119 (providing additional example of lawsuit filed after a competitor refused a buy-out offer). Omilia supports this theory with examples of Nuance acquiring competitors and patents in the ASR market, pursuing patent enforcement lawsuits, and "interfer[ing] with rivals' relationships with customers." Docket No. 72-1 at 3; see also Docket No. 44 ¶¶ 91-92, 125-27, 129, 132-33. Nuance responds that each **[*11]** of the individual complained-of acts are lawful. See, e.g., *Automatic Radio Mfg. Co. v. Hazeltine Res. Inc., 339 U.S. 827, 834, 70 S. Ct. 894, 94 L. Ed. 1312, 1950 Dec. Comm'r Pat. 608 (1950)* ("[M]ere accumulation of patents, no matter how many, is not in and of itself illegal.").

In the antitrust context, however, "acts which are in themselves legal lose that character when they become constituent elements of an unlawful scheme." *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 707, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*; see also *id. at 699* ("[P]laintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each."); *LePage's Inc v. 3M, 324 F.3d 141, 162 (3d Cir. 2003)* (explaining that "courts must look to the monopolist's conduct taken as a whole rather than considering each aspect in isolation"); *City of Anaheim v. S. Cal. Edison Co., 955 F.2d 1373, 1376 (9th Cir. 1992)* ("[I]t would not be proper to focus on specific individual acts of an accused monopolist while refusing to consider their overall combined effect.")

Courts examining a monopolist's otherwise lawful acts must ask whether the actions "impaired competition in an unnecessarily restrictive way," such as by "exclude[ing] rivals on some basis other than efficiency." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; see also *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 230 (1st Cir. 1983)* (asking whether the defendant's conduct was "reasonable in light of its business needs" or whether it "unreasonably restrict[ed] competition"). A motion to dismiss a *Section 2* claim must **[*12]** be denied if there is a plausible allegation that the defendant acted to artificially restrict competition and inflate prices in the market. See *In re Lantus, 950 F.3d at 7* (reversing dismissal of antitrust claims).

Here, Omilia has plausibly alleged that Nuance violated *Section 2* of the Sherman Act by wielding its pool of patents against competitors to threaten costly, baseless litigation unless the competitors agree to a buy out or merger, and by notifying the competitors' potential customers of the possibility of litigation, all with an anti-competitive motive. Cf. *Kobe, Inc. v. Dempsey Pump Co., 198 F.2d 416, 423-24 (10th Cir. 1952)* (upholding jury's finding of violations of *Sections 1* and *2* of the Sherman Act where defendant had monopoly on patents in market and sent plaintiff's potential customers notices of patent infringement lawsuits). Omilia has plausibly alleged that a monopolization scheme by Nuance has resulted in supracompetitive prices for customers and less frequent innovation for consumers, and impeded Omilia's ability to compete in the ASR Enterprise market.

1. Noerr-Pennington Doctrine and "Sham" Litigation Exception

a. Legal Framework

The Noerr-Pennington doctrine "provides a party immunity from antitrust liability for . . . enforcing one's intellectual property rights in court." **[*13]** *United Food & Commercial Workers Unions & Employers Midwest Health Benefits Fund v. Novartis Pharms. Corp., 902 F.3d 1, 4-5 (1st Cir. 2018)*; see also *Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*. The immunity is grounded in the *First Amendment* right to petition the government. *Novartis, 902 F.3d at 4-5*.

"Noerr-Pennington immunity has two exceptions. An antitrust defendant may not enjoy the immunity in enforcing its patent if it obtained that patent through a fraud on the Patent Office, or if its suit to enforce the patent is a 'sham' for impermissible anti-competitive conduct." *Id. at 5* (citations omitted).

The "sham" litigation exception to Noerr-Pennington immunity applies if the lawsuit is (1) "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits," and (2) "conceals 'an attempt to interfere directly with the business relationships of a competitor' through the 'use [of] the governmental process — as opposed to the outcome of that process — as an anticompetitive weapon.'" *Id. at 13* (citation omitted). An objectively reasonable patent suit is not a "sham" within the meaning of the exception to Noerr-Pennington immunity, even if the litigant has a subjective intent to monopolize. *Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 57, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("PREI").

b. Parties' Arguments

Nuance argues that Omilia's *Section 2* counterclaim must be dismissed because Nuance enjoys Noerr-Pennington immunity. Omilia responds that the "sham" litigation exception **[*14]** to Noerr-Pennington immunity applies because Nuance's patent infringement lawsuit is objectively baseless and intended to harm competition. Omilia also points to Nuance's past lawsuits against other competitors as evidence of a "pattern of anticompetitive conduct." Docket No. 74 at 8.

It is premature for the court to determine whether Noerr-Pennington immunity applies here. Without a claim construction hearing and discovery, this court has no basis to assess the merits of the underlying patent suit. Moreover, even if the litigation is not baseless, Omilia has also alleged non-litigation conduct by Nuance, such as threats to litigate if a competitor does not agree to a buy-out, threats to competitors' customers, and statements to the market via the press regarding Nuance's buy-out strategy. The motion to dismiss the Sherman Act *Section 2* claim under the Noerr-Pennington doctrine is accordingly denied.

B. Market Definition (Counts 17 and 18)

Nuance also alleges that Omilia fails to plead a plausible market definition for its antitrust claims. Antitrust plaintiffs must allege both a plausible product market and plausible geographic market. *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 197 & n.11 (1st Cir. 1996)*. A geographic market is "the geographic area in which the **[*15]** defendant faces competition and to which consumers can practically turn for alternative sources of the product." *Id. at 196*; see also *United States v. Phila. Nat'l Bank, 374 U.S. 321, 359, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*.

Neither party contests Omilia's product market definition of the "ASR Enterprise software market." The conflict centers on the geographic market definition: Omilia alleges that the geographic market for its Sherman and Clayton Act claims is the United States. Nuance contends that this allegation, on its own, is insufficient to survive a motion to dismiss, because the market for ASR Enterprise Software is global, or at least includes all English-speaking countries.

Market definition is a question of fact that generally cannot be decided on a motion to dismiss. See *Morales-Villalobos v. Garcia-Llorens, 316 F.3d 51, 55 (1st Cir. 2003)* (reversing a motion to dismiss because parties' dispute as to whether the relevant geographic market was an individual town, all of Puerto Rico, or the entire United States could not "be resolved on the face of the complaint"); see also *Coastal Fuels, 79 F.3d at 196* ("[M]arket definition is a question of fact.").

Here, Omilia has plausibly alleged that the United States is the relevant geographic market for its antitrust claims. Omilia alleges that Nuance uses its U.S. patents to exclude competitors within the United States. Omilia **[*16]** also alleges "massive barriers to entry" to the market due to challenges in "acquiring the [speech] data required to train an ASR system." Docket No. 44 ¶ 145; see also id. ¶ 94 (explaining that "time-intensive analysis of real-life human speech for a given language . . . is critical for an ASR engine to function well as to that language"). Given the location-specific nature of the technology, Omilia has plausibly alleged that the United States is "the geographic area in which [Nuance] faces competition, and to which consumers can practically turn for alternative sources of the product." See *Coastal Fuels, 79 F.3d at 196*. These allegations are sufficient to survive a motion to dismiss.

C. Clayton Act (Count 18)

Nuance argues that Omilia's claim under *Section 7* of the Clayton Act is time-barred and insufficient to state a claim. Omilia alleges that in the four years prior to this suit, Nuance acquired patents related to "speech recognition that's used in enterprises in the United States." Docket No. 80 at 40 (hearing transcript); Docket No. 51 at 21 & n.4. Moreover, Omilia argues that its challenges to Nuance's earlier acquisitions are not time-barred under the Clayton

Act, because those acquisitions ripened into a prohibited **[*17]** effect and caused Omilia injury within the four-year limitations period.

Section 7 of the Clayton Act prohibits asset acquisitions whose effect "may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. The statute requires *Section 7* claims to be brought "within four years after the cause of action accrued." *15 U.S.C. § 15(b)*.

The Supreme Court has articulated two formulations of *Section 7*'s "accrual" standard. In a case brought by the United States, the Court held that a *Section 7* claim accrues "any time when the acquisition threatens to ripen into a prohibited effect." *United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 587, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)* (permitting *Section 7* prosecution to proceed thirty years after the challenged stock acquisition, even where no anticompetitive threat existed at the time of the acquisition). In a case brought by a private plaintiff, the Court held that a *Section 7* claim accrues "when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*.

Although these capacious holdings have been criticized, see, e.g., Paul J. Stancil, Atomism and the Private Merger Challenge, *78 Temp. L. Rev. 949, 1011 (2005)*, they are still applied. See id. (describing the precedents as "still-valid (and still-cited)"); see also *United States v. ITT Cont'l Baking Co., 420 U.S. 223, 240, 95 S. Ct. 926, 43 L. Ed. 2d 148 (1976)* (holding that *Section 7*'s restriction on "acquisitions" includes "both the purchase of rights in another company **[*18]** and the retention of those rights"); *U.S. Gypsum Co. v. Indiana Gas Co., Inc., 350 F.3d 623, 628 (7th Cir. 2003)* (explaining that "old activity . . . is not immunized, if the potential for [an antitrust injury] is created or realized more recently as market conditions change"); *Telectronics Proprietary, Ltd. v. Medtronic, Inc., 687 F. Supp. 832, 844 (S.D.N.Y. 1988)* (denying summary judgment because of factual dispute existed as to whether plaintiff suffered *Section 7* injury when defendant acquired certain patents or when defendant asserted those patents against the plaintiff). Cf. *Midwestern Machinery, Co., Inc. v. Nw. Airlines, Inc., 392 F.3d 265, 276 (8th Cir. 2004)* (holding, at summary judgment stage, that *Section 7* claim was barred because plaintiffs had not filed suit within four years of suffering "a quantifiable injury"); *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1051 (8th Cir. 2000)* (explaining that the Clayton Act's statute of limitations can be tolled "where a plaintiff's damages are only speculative during the limitations period"); Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application § 320b (4th Ed. 2013-2018) (explaining that antitrust cause of action accrues at time plaintiff is injured, even if defendant committed the illegal act more than four years before the injury); id. § 320d ("In some cases the injury caused by a merger might not occur until many years after the transaction was completed.").

Here, Omilia alleges that its *Section 7* claim accrued within **[*19]** the statute of limitations because Nuance's past acquisitions "ripened into a prohibited effect" and caused Omilia an injury within that timeframe. Docket No. 74 at 8. Specifically, Omilia alleges it "discovered the effects of Nuance's anticompetitive acquisitions" only when it attempted to enter the U.S. market in 2015 and 2016. Id. Omilia has plausibly alleged a *Section 7* violation within the four-year statute of limitations.

II. State Law Claims

A. Unfair Competition (Count 19)

Omilia alleges that Nuance is liable for the Massachusetts common law tort of unfair competition. However, "[i]t is settled in Massachusetts that 'the gravamen of an unfair competition claim is the likelihood of consumer confusion as to the source of the goods or services.'" *Open Software Found., Inc. v. U.S. Fid. & Guar. Co., 307 F.3d 11, 17 (1st Cir. 2002)* (quoting *Datacomm Interface, Inc v. Computerworld, Inc., 396 Mass. 760, 489 N.E.2d 185, 191 (Mass. 1986))*.

Here, Omilia has failed to allege any customer confusion regarding the source of an ASR product. Instead, Omilia argues that Nuance engaged in unfair competition under Massachusetts common law by providing Omilia's customers with incorrect information regarding the instant patent infringement suit. Omilia has not cited any case law to support this interpretation of the unfair competition tort. Omilia's unfair competition claim is therefore **[*20]** dismissed for failure to state a claim upon which relief can be granted. See *Pegasystems, Inc. v. Appian Corp., No. 19-11461, 424 F. Supp. 3d 214, 2019 WL 6560120, at *6 (D. Mass. Dec. 5, 2019)* (dismissing unfair competition claim for failure to allege customer confusion about the source of litigant's products).

B. Tortious Interference (Counts 20 and 21)

Omilia also brings counterclaims against Nuance for tortious interference with contractual relations (Count 20) and advantageous business relations (Count 21). Omilia alleges that Nuance intentionally and with improper means informed Omilia's current and prospective customers of the instant patent lawsuit in order to interfere with Omilia's contractual and business relations. Nuance responds that these claims must fail because Nuance's conduct was incidental to lawful patent enforcement protected by Noerr-Pennington immunity.

Under Massachusetts law, a plaintiff claiming tortious interference must show "(1) a business relationship or contemplated contract of economic benefit; (2) the defendant's knowledge of such relationship; (3) the defendant's interference with the relationship through improper motive or means; and, (4) the plaintiff's loss of advantage as a direct result of the defendant's conduct." *Singh v. Blue Cross/Blue Shield of Mass., Inc., 308 F.3d 25, 47 (1st Cir. 2002)* (citation omitted). Here, Omilia alleges that **[*21]** Nuance knowingly communicated with Omilia's current client Connex and prospective client TD Bank regarding the instant patent lawsuit. Omilia alleges that as a direct result of these actions, Omilia "suffered substantial economic damages." Docket No. 44 ¶¶ 163, 168. Omilia has plausibly alleged claims of tortious interference with contractual and advantageous business relations.

Some courts have held that communications related to ongoing patent suits are protected by Noerr-Pennington immunity in some circumstances. Compare *Golan v. Pingel Enter., Inc., 310 F.3d 1360, 1364-65 (Fed. Cir. 2002)* (holding that notices sent to distributors of alleged infringer were protected by Noerr-Pennington immunity, because they were not sent in bad faith despite the patent having been expired at the time the letters were sent) and *Storage Tech. Corp. v. Custom Hardware Eng'g & Consulting Ltd., No. 02-12102, 2006 U.S. Dist. LEXIS 43690, 2006 WL 1766434, at *35 (D. Mass. June 28, 2006)* (dismissing tortious interference claim because defendant's communication with plaintiff's business partner regarding court's preliminary injunction decision was an act "incidental to protected litigation"), with *Nuance Commc'ns, Inc. v. MModal LLC, No. 17-01484, 2018 U.S. Dist. LEXIS 216709, 2018 WL 6804488, at *3 (D. Del. Dec. 27, 2018)* (explaining that "blog posts and press releases providing status updated regarding the litigation" did not enjoy Noerr-Pennington immunity). Here, Omilia argues that Noerr-Pennington immunity does not protect Nuance from tort liability **[*22]** because some communications were made before the patent lawsuit was filed. Omilia has plausibly alleged claims for tortious interference.

III. Request to Bifurcate and Stay Discovery

Nuance argues that if dismissal is not warranted, discovery on Omilia's antitrust and state law counterclaims should be stayed pending resolution of the patent infringement claims. *Federal Rule of Civil Procedure 42(b)* permits bifurcation of claims "[f]or convenience, to avoid prejudice, or to expedite and economize" issues for trial. "[F]ederal courts possess the inherent power to stay proceedings for prudential reasons." *Microfinancial, Inc. v. Premier Holidays Intern., Inc., 385 F.3d 72, 77 (1st Cir. 2004)*.

The Federal Circuit has noted that the "standard practice" is to separate "for trial patent issues and those raised in an antitrust counterclaim." *In re Innotron Diagnostics, 800 F.2d 1077, 1084 (Fed. Cir. 1986)* (emphasis added). This Court has affirmed that view multiple times. See, e.g., *Hewlett-Packard Co. v. Genrad, Inc., 882 F. Supp. 1141, 1157-58 (D. Mass. 1995)* ("[C]ourts often separate patent issues from antitrust counterclaim issues."); *Skinder-Strauss Assocs. v. Mass. Continuing Legal Educ., Inc., 870 F. Supp. 8, 11 (D. Mass. 1994)* ("[P]roceedings on the counterclaims should be stayed until after the resolution of the [intellectual property] action. This procedure will avoid a waste of judicial and party resources on the question of [the defendant's] intent in filing the lawsuit."). Courts sometimes allow discovery on patent claims and antitrust **[*23]** counterclaims to proceed in tandem, while preserving the possibility of bifurcation at trial. See, e.g., *Wi-LAN Inc. v. LG Elecs., Inc., 382 F. Supp. 3d 1012, 1026 (S.D. Cal. 2019)*.

Nuance points out that if it succeeds in its original patent suit, its success could demonstrate that the original suit is not a sham, but rather merits Noerr-Pennington immunity. See *Skinder-Strauss, 870 F. Supp. at 11* (staying defendant's antitrust counterclaims because resolution of the underlying intellectual property dispute would create "a record for determining whether the challenged litigation is objectively meritless"); see also *PREI, 508 U.S. 49, 60 n.5 (1993)* ("A winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham."); *U.S. Philips Corp. v. Sears Roebuck & Co., 55 F.3d 592, 597 (Fed. Cir. 1995)* ("The charge that Philips' patent infringement suit in Florida was sham can not be deemed to have substance, for Philips prevailed in Florida on that issue.").

Nuance also argues it would be prejudiced by the cost of discovery regarding twenty years of its acquisition of patents and competitors. Indeed, the Supreme Court has cautioned that "proceeding to antitrust discovery can be expensive." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 558, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

Omilia responds that it would be prejudiced by a delay in the resolution of its antitrust claims, as continuation of Nuance's anticompetitive activities will hinder Omilia's ability **[*24]** to enter the U.S. market.

In order to balance judicial economy and potential prejudice to the parties, the Court stays discovery regarding Omilia's Sherman Act counterclaim at least until after phase 1 of the patent litigation. However, the Court allows limited discovery regarding Nuance's pre-litigation conduct and communications with respect to Omilia and certain competitors named in the complaint, specifically ART, Voice Signal, Vlingo, and MModal. See Docket No. 44 ¶ 117-119. The Court also allows discovery on Omilia's claims of tortious interference. Finally, the Court allows discovery related to the anticompetitive effect of Nuance's mergers and acquisitions on the current market under the Clayton Act claim. The parties shall propose a discovery schedule within 30 days.

CONCLUSION

The Court **ALLOWS** the motion to dismiss with regard to Omilia's claim of common law unfair competition (Count 19) and **DENIES** the motion to dismiss with regard to Omilia's remaining antitrust and state law counterclaims. The parties shall submit a joint proposed discovery schedule within 30 days.

SO ORDERED.

Opinion

MEMORANDUM & ORDER

GORTON, J.

This multi-district litigation involves five actions which were centralized in this Court and divided into two putative classes against Ranbaxy Inc. and Sun Pharmaceutical Industries Limited (collectively, "Ranbaxy" or "defendants") for allegedly causing the delayed market entry of three generic drugs (Diovan, Valcyte and Nexium).

Direct purchaser plaintiffs ("DPPs"), such as wholesalers, purchased brand name and generic drugs directly from drug manufacturers. End-payor plaintiffs ("EPPs"), such as consumers and third-party payors, purchased brand name and generic drugs at the end of the distribution chain from retailers and other financial intermediaries. The DPPs and EPPs separately bring claims for violations of the *Racketeer Influenced and Corrupt Organizations Act* ("RICO"), federal and state ***antitrust law*** and state consumer protection law.

Pending **[*5]** before the Court is the motion of Ranbaxy to dismiss Counts Six, Seven and Eight of the Consolidated Amended Complaint of the EPPs insofar as those counts allege violation of the state consumer protection statutes of California, West Virginia and Maine.

I. Background

Both the Court and the parties are well acquainted with the facts, which are described in detail in Magistrate Judge Page Kelley's Report and Recommendation on Ranbaxy's motion to dismiss the complaint of plaintiffs Meijer, Inc. and Meijer Distribution, Inc. in the original action in this Court prior to centralization. See *Meijer, Inc. v. Ranbaxy, Inc., No.1:15-cv-11828-NMG, 2016 U.S. Dist. LEXIS 120998 (D. Mass. Sept. 7, 2016)*. For purposes of completeness, however, the Court provides the following abbreviated summary of the background relevant to the pending motion.

On November 27, 2019, this Court dismissed without prejudice the EPPs' consumer protection claims under the laws of California, West Virginia and Maine for failure to plead compliance with the notice and demand requirements of the respective state statutes. With the Court's permission, the EPPs amended their consolidated complaint but Ranbaxy once again moves to dismiss each amended claim. **[*6]**

II. Motions to Dismiss

A. Legal Standard

To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In considering the merits of a motion to dismiss, the Court may only look to the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the complaint and matters of which judicial notice can be taken. *Nollet v. Justices of Trial Court of Mass., 83 F. Supp. 2d 204, 208 (D. Mass. 2000)*, aff'd, *228 F.3d 1127 (1st Cir. 2000)*.

Furthermore, the Court must accept all factual allegations in the complaint as true and draw all reasonable inferences in the plaintiff's favor. *Langadinos v. Am. Airlines, Inc., 199 F. 3d 68, 69 (1st Cir. 2000)*. If the facts in the complaint are sufficient to state a cause of action, a motion to dismiss the complaint must be denied. See *Nollet, 83 F. Supp. 2d at 208*.

Although a court must accept as true all the factual allegations in a complaint, that doctrine is not applicable to legal conclusions. *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Threadbare recitals of legal elements which are supported by mere conclusory statements do not suffice to state a cause of action. Id. Accordingly, a complaint does not state a claim of relief where the well-pled facts fail to warrant an inference of any more than the mere possibility of misconduct. *Id. at 1950*.

B. Application

Ranbaxy moves to dismiss **[*7]** Counts Six, Seven and Eight of the EPPs' Consolidated Amended Complaint insofar as those counts allege violation of the state consumer protection statutes of California, West Virginia and Maine. Ranbaxy submits that the EPPs fail to allege compliance with the procedural notice and demand requirements of those acts. The EPPs respond that the procedural requirements are satisfied because Ranbaxy had actual notice of the EPPs' claims and written demands would have been futile.

1. California

The California consumer protection statute requires that 30 days prior to commencement of an action for damages for a consumer protection violation, a consumer "[n]otify the person alleged to have employed or committed" unlawful practices and "[d]emand that the person correct, repair, replace, or otherwise rectify" the unlawful goods or services. *Cal. Civ. Code § 1782(a)*. Such notice must be in writing and sent by certified mail. Id. The sole statutory exception applies to actions for injunctive relief. Id. *§ 1782(d)*. Such actions may be commenced without compliance with *Subdivision (a)* and may be amended 30 days thereafter to include a claim for damages. Id.

The procedural requirements of *Section 1782(a)* are not jurisdictional. *Cattie v. Wal-Mart Stores, Inc., 504 F. Supp. 2d 939, 949 (S.D. Cal. 2007)*. Compliance is, however, "necessary **[*8]** to state a claim." Id. (citing *Outboard Marine Corp. v. Superior Court, 52 Cal. App. 3d 30, 40-41, 124 Cal. Rptr. 852 (1975))*. The legislative intent in enacting *Section 1782(a)* reflects goals beyond mere notice and include the imposition of time constraints upon a manufacturer's opportunity to take corrective action as well as the facilitation of settlement prior to litigation. See *Outboard Marine Corp., 52 Cal. App. 3d. at 40-41*. California courts have consistently held that such goals can be accomplished only by literal application of the notice and demand requirements. *Davis v. Chase Bank U.S.A., N.A., 650 F. Supp. 2d 1073, 1088-89 (C.D. Cal. 2009)*. Anything short of compliance is insufficient, even upon a showing that the defendant had actual notice as a result of similar litigation between the parties and the likelihood of settlement is virtually nonexistent. Id.

The EPPs were provided an opportunity to amend their consolidated complaint to allege compliance with the procedural requirements of *Section 1782(a)*. The Consolidated Amended Complaint fails to accomplish that goal. Accordingly, the California consumer protection claims of the EPPs will be dismissed, this time with prejudice.

2. West Virginia

The West Virginia consumer protection statute, like that of California, contains mandatory compliance language. It provides that no claim may be brought until the plaintiff

> has informed the seller or lessor in writing and by certified **[*9]** mail . . . of the alleged violation and provided . . . twenty days from receipt of the notice of violation but ten days in the case a cause of action has already been filed to make a cure offer . . .

W. Va. Code. § 46A-6-106(c). There is admittedly a dearth of caselaw interpreting that provision. The little that does exist, however, favors the California approach requiring strict application of the notice requirement absent statutorily prescribed excuses. See *McCoy v. South Energy Homes, Inc., No. 1:09-cv-1271, 2012 U.S. Dist. LEXIS 56594, 2012 WL 1409533, *12 (S.D.W. Va. Apr. 23, 2012)* ("Plaintiffs' argument that they are excused from providing notice to the seller because it would be impossible to do so fares no better. The statute does not create such an exception . . . .").

The EPPs' respond that the Court should simply apply a "liberal construction" to the West Virginia statute because it is "remedial" in nature and intended to protect consumers from unfair and deceptive business practices. The remedial nature of the statute does not, however, excuse one who seeks to bring a consumer protection claim from complying with the procedural requirements of providing written notice. Consequently, the EPPs' West Virginia consumer protection claims will be dismissed, also with prejudice.

[*10] 3. Maine

The consumer protection statute of Maine similarly employs mandatory language requiring pre-suit notice and demand. *Maine's Unfair Trade Practices Act* ("the MUTPA") provides that

> [a]t least 30 days prior to the filing of an action for damages, a written demand for relief, identifying the claimant and reasonably describing the unfair and deceptive act or practice relied upon and the injuries suffered, must be mailed or delivered to any prospective respondent at the respondent's last known address.

5 Me. Rev. Stat. § 213(1-A). The only statutory exception applies to counterclaims and cross claims. Id.

The case law interpreting the MUTPA is, as the parties describe, even more "sparse" than that interpreting its West Virginia counterpart. Unlike the West Virginia precedent, however, the limited case law interpreting the MUTPA is virtually uniform in allowing claims to proceed despite lack of pre-suit notice and demand. The Maine Supreme Judicial Court has plainly held that failure to comply with the MUTPA's pre-suit notice and demand requirement does not require dismissal. *Oceanside at Pine Point Condominium Owners Ass'n v. Peachtree Doors, Inc., 659 A.2d 267, 268 (Me. 1995)* ("Oceanside").

In Oceanside, the Court considered a dispute between a condo association and a window manufacturer in which summary judgment **[*11]** was entered in favor of defendants on plaintiffs' MUTPA claim for failure to comply with *Section 213(1-A)*. Id. Plaintiff insisted that the notice requirement was effectively met because the contractor that installed the allegedly defective windows sent to defendants a letter regarding the defect before plaintiff filed its lawsuit. *Id. at 272*. The Court held that the contractor's letter did not satisfy *Section 213(1-A)* because it was not written by the plaintiff, did not identify the allegedly unfair and deceptive conduct and did not make a demand for monetary relief. *Id. at 273*. The appellate Court nevertheless concluded that

> [i]n the absence of explicit terms regarding noncompliance . . . the notice requirements of *section 213(1—A)* are not jurisdictional and do not operate in this case to preclude the plaintiffs from maintaining their UTPA claim against [defendant].

Id.

Ranbaxy dismisses Oceanside as merely holding that *Section 213(1-A)* is not jurisdictional. That interpretation is, however, undermined by the clear language of the Maine Supreme Judicial Court reaffirming *Oceanside in Kilroy v. Northeast Sunspaces, Inc., 2007 ME 119, 930 A.2d 1060, 1064 (Me. 2007)*. In Kilroy, the Court considered "the question of the appropriate remedy when . . . the notice requirement of *section 213(1-A)* is not met." Id. After reiterating that dismissal of the MUTPA claim was not required, **[*12]** the Court explained that the failure of a plaintiff to comply with *Section 213(1-A)* may have consequences other than dismissal, such as being factored into consideration in determining whether to award attorney's fees. Id. See also *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 186 (D. Me. 2004)* ("[F]ailure to comply with the express terms of [the MUTPA's] notice requirement does not bar [plaintiff's] Maine consumer protection claim.").

Oceanside and *Kilroy* compel the conclusion that the failure to comply with *Section 213(1-A)* does not require dismissal of the EPPs' MUTPA claims. Accordingly, Ranbaxy's motion to dismiss the Maine consumer protection claims of the EPPs will be denied.

ORDER

For the forgoing reasons, the motion of defendants Ranbaxy, Inc. and Sun Pharmaceutical Industries, Ltd. to dismiss Counts Six, Seven and Eight of the Consolidated Amended Complaint of the End-Payor Plaintiffs (Docket No. 181) is, with respect to the alleged violation of the state consumer protection laws of Maine, **DENIED**, but is otherwise **ALLOWED**. Those counts, with respect to the alleged violation of the state consumer protection laws of California and West Virginia, are **DISMISSED with prejudice**.

So ordered.

Opinion

[*1316] **REDACTED**[1]

[1] The Court has implemented the parties' proposed redactions in substantial part.

ORDER GRANTING DEFENDANTS' DAUBERT MOTION; AND

[Doc. No. 99]

GRANTING IN PART AND DENYING IN PART [2] DEFENDANTS' MOTION FOR SUMMARY JUDGMENT**

[Doc. No. 98]

Defendants AMN Healthcare, Inc., AMN Healthcare Services, Inc., AMN Healthcare Services LLC, Medefis, Inc. ("Medefis"), and Shiftwise Inc. ("Shiftwise"), (collectively, "Defendants" or "AMN") move to exclude certain opinions proffered by Plaintiffs Aya Healthcare Services, Inc. and Aya Healthcare, Inc.'s (collectively, "Plaintiffs" or "Aya") expert Patricia G. Donohoe. *See* Doc. No. 99 (hereinafter "*Daubert* motion"). Defendants also move for summary judgment on each of the claims asserted by Plaintiffs. *See* Doc. No. 98. For the reasons set forth below, the Court **GRANTS** AMN's *Daubert* motion and **GRANTS IN PART** and **DENIES IN PART** AMN's motion for summary judgment. The Court also **ORDERS** the parties to show cause as to whether summary judgment should be granted in AMN's favor with respect to Aya's *Sherman Act Sections 1* and *2* claims for exclusionary damages in light of the Court's findings with respect to market power and harm to competition.

BACKGROUND[2]

Aya brings this action against AMN asserting claims pursuant to *Sections 1* and *2* of the Sherman Antitrust Act of 1890 ("Sherman Act"), *15 U.S.C. §§ 1-7*, as amended by the *Clayton Act of 1914* ("Clayton Act"), *15 U.S.C. §§ 12-27*, *California's Cartwright Act*, **[**3]** *Cal. Bus. & Prof. Code § 16750(a)* and Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200, et seq.*, as well as a common law claim of tortious interference with prospective economic relations. *See* Doc. No. 37 ("TAC").

The case involves non-solicitation provisions in AMN's agreements with other healthcare staffing agencies, including Aya, as well as AMN's termination of the parties' collaborating relationship. The parties are companies that operate agencies for different types of temporary healthcare employees, the most relevant type here being travel nurses. Travel nurses are nurses and nurse technicians who perform temporary, medium-term assignments in understaffed hospitals and other healthcare facilities ("hospitals") that cannot have the assignments performed by their own nurses. *See* Doc. No. 150-2 ("Braynin Decl.") at 1.[3] The only other kind of temporary nurses are per diem nurses, who are generally unavailable to perform medium-term assignments. Hospitals will use the services of travel nurses only when they lack any alternative. *Id.*

Healthcare staffing agencies employ travel nurse recruiters to find, screen, and **[*1317]** recruit travel nurses, and maintain relationships with the travel nurses and work with other company personnel, particularly account **[**4]** managers, to place the travel nurses on temporary assignments. *Id.* at 8. The agencies place the travel nurses at hospitals several ways: by directly placing the travel nurses at the agencies' hospital accounts and by indirectly placing the travel nurses at hospitals through either an agency that manages the hospitals' travel nurse needs ("managed service provider" or "MSP") or electronic platforms that facilitate the placements. *See id.* at 2. In 2017, agencies placed approximately 31 percent of travel nurse services directly and approximately 15 and 54 percent indirectly via platforms and MSPs, respectively. *See* Doc. 150-22 ("Markham Decl.), Ex. 81 at 12-16.

---

[2] These material facts are taken from the parties' separate statements and responses thereto, as well as the supporting declarations and exhibits. Disputed material facts are discussed in further detail where relevant to the Court's analysis. Facts that are immaterial for purposes of resolving the current motions are not included in this recitation.

[3] Unless the Court indicates otherwise, the Court's citations to electronically filed documents refer to the pagination assigned by the document's author, rather than the pagination assigned by the CM/ECF system.

AMN has been a leader in the healthcare staffing industry for over thirty years. *See id.* at 3. In 2009, in addition to providing travel nurses to hospitals on direct placements, AMN started to become the MSP of an increasing number of hospitals. Later in 2013 and 2015, AMN acquired two electronic platforms, Shiftwise and Medefis, respectively, and began to place temporary travel nurses through the platforms. *See id.* at 3.

Aya is a younger healthcare staffing company that was founded in 2009 by Alan Braynin. *See id.* at 1. Braynin merged Aya with another healthcare staffing **[**5]** company that he founded in 2001, Access Nurses, Inc., by having Aya purchase its assets and operations. *Id.* Since its founding, Aya has been placing nurses directly in hospitals, and it has also been Aya's "mainstay" to take advantage of subcontracting opportunities, placing nurses in hospitals indirectly through MSP programs, such as those of AMN. *See id.* at 3-4.

As AMN grew its MSP programs, it was not always able to fulfill the demand of its hospital customers for travel nurse assignments. In these circumstances, AMN referred these "spillover assignments" to its network of subcontractors, or "associate vendors" ("AVs"), which were other healthcare staffing agencies, such as Aya. *See id.* at 4. These spillover assignments offered Aya and other healthcare staffing agencies a valuable source of income, which was also attractive to travel nurses because AMN's customer network was known generally to offer better opportunities in terms of pay and healthcare experience. *See id.* Aya later introduced its own MSP program, *see* Doc. 150-1 at 12, as have other healthcare staffing agencies. *See* Markham Decl., Ex. 81 at 20-21.

To obtain the spillover assignments from AMN, Aya first had to satisfy AMN that Aya was **[**6]** competent to provide travel nurses to AMN's customer network. In 2010, Aya provided information about its company to AMN at its request and met its criteria to become a subcontractor and receive spillover assignments. *See id.* Thereafter, AMN explained to Aya that to complete the process, Aya had to agree to AMN's [TEXT REDACTED BY THE COURT] that AMN allowed Aya to serve for spillover assignments. *Id.* at 4-5; Braynin Decl., Exs. 1, 2. The AV agreements include certain non-solicitation provisions. *See* Braynin Decl., Exs. 1, 2. Aya signed its first AV agreement in 2010, becoming AMN's AV for subcontracting opportunities to provide travel nurses to AMN's customers upon its request. *See* Braynin Decl. at 5. AMN and Aya experienced a mutually beneficial relationship going forward as Aya became AMN's largest AV and AMN continued to provide Aya with opportunities to grow its young company. *See id.* at 5-6.

In 2013, when AMN acquired Shiftwise, AMN utilized the electronic platform like its MSP programs and fulfilled the demand of its customers for travel nurses through placements on Shiftwise. *See id.* at **[*1318]** 5. AMN made spillover assignments available to its AVs via Shiftwise, and later via Medefis when AMN acquired that platform **[**7]** in 2015. Aya has made temporary placements of its travel nurses through both platforms since AMN acquired them and continues to do so. *See id.* at 17.

Around May 2015, Aya began actively soliciting AMN's travel nurse recruiters. *See* Braynin Decl. at 9-12. Aya had not previously solicited AMN's travel nurse recruiters. *See id.* at 10-11. Since then, the parties' business relationship has soured. Around late September 2015, AMN temporarily terminated Aya's access to AMN's platform. *See* Braynin Decl. at 14. This took place while Aya still had travel nurses on assignments through the platform at some of AMN's hospital accounts. Aya experienced difficulty with monitoring the travel nurses that remained on assignments until it successfully negotiated with AMN to restore limited access for Aya to the platform. *See id.* AMN no longer provided Aya with spillover assignments through its MSP programs, and the parties later memorialized the termination of their prior AV agreements in December 2015. *See id.* at 15; Doc. No. 98-2 ("Fitzsimmons Decl."), Ex. 1.

During its AV relationship with AMN, Aya grew its business. According to Staffing Industry Analysts ("SIA"), the leading research and trade organization for the U.S. staffing **[**8]** industry, Aya ranked [TEXT REDACTED BY THE COURT] between 2013 and 2017. *See* Doc. No. 150-1 at 1 (referring to Fitzsimmons Decl., Ex. 4 at 40:7-41:6, 42:16-19 and Fitzsimmons Decl., Ex. 2). SIA also reported that between 2014 and 2017, Aya's travel nurse revenues [TEXT REDACTED BY THE COURT]; its travel nurse market share [TEXT REDACTED BY THE

COURT];[4] and it rose from [TEXT REDACTED BY THE COURT]. *See id.* at 2 (referring to Fitzsimmons Decl., Ex. 5).

[TEXT REDACTED BY THE COURT][5] [TEXT REDACTED BY THE COURT]. *See id.* at 4 (referring to Fitzsimmons Decl., Ex. 9). Aya grew at a compound annual growth rate of 85% between 2012 and 2017 and by an average of 90% between 2013 and 2018. *See id.* at 5 (referring to Fitzsimmons Decl., Ex. 4 at 83:17-22, 116:12-117:4, 117:22-118:13). Aya has also reported truthfully to its customers that in 2016 to 2017, "it added more travel nurses than its top two competitors combined (one of them being AMN);" "it has a consistent 'fill rate' for all of its MSP programs of 99% and can fill those travel nurse positions within one to five days;" and "it has tens of thousands of travel nurse candidates for recruitment each year." *Id.* at 7-9 (referring to Fitzsimmons Decl., Ex. 4 at 83:17-22, **[**9]** 88:23-89:15, 90:1-13, 115:2-10).

Aya commenced this action on February 2, 2017. *See* Doc. No. 1. Aya claims that it suffered "exclusionary damages" as a result of AMN's non-solicitation covenant in the parties' AV agreements and "retaliatory damages" as a result of AMN's decision to terminate its AV relationship with Aya. *See* Opp. at 19, 22-24. Aya claims that these business practices unreasonably restrain trade and interfere with Aya's prospective business opportunities in violation of federal, state, and common law. *See* Doc. No. 1. The non-solicitation provision applicable to Aya in the parties' AV agreement is set forth below:

> [TEXT REDACTED BY THE COURT]

[*1319] Braynin Decl. Ex. 1; *see also* Braynin Decl. Ex. 2.

DEFENDANTS' *DAUBERT* MOTION

AMN moves pursuant to *Rules 403* and *702 of the Federal Rules of Evidence* to exclude certain opinions proffered by Aya's putative industry expert, Patricia G. Donohoe. AMN objects to Donohoe's opinions regarding (1) "how certain restraints would be interpreted by industry participations," and (2) "how these restraints would impact the relevant industry participants." Doc. No. 99 at 1 (quoting 99-1 at 50). AMN argues that Donohoe's proposed testimony should be excluded to the extent (1) she proffers legal interpretations **[**10]** of certain contractual provisions between AMN and its employees, customers, and other healthcare staffing agencies; (2) she opines as to the purported competitive impact of such contractual provisions; (3) she opines as to how industry participants might react to or feel about such contractual provisions; and (4) opines as to AMN's reputation for enforcing such contractual provisions. *See* Doc. No. 99 at 2-6. Aya opposes AMN's *Daubert* motion, primarily arguing that the opinions at issue should not be excluded because Donohoe "does not tell the jury what legal conclusions to reach on the ultimate issues before it . . . ." Doc. No. 110 at 5.

1. Legal Standard

Rule 702 of the Federal Rules of Evidence provides that expert opinion evidence is admissible if: "(a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case." *Fed. R. Evid. 702*. Expert opinion testimony is reliable if such knowledge has a "basis in the knowledge

---

[4] Aya disputes that AMN's market share [TEXT REDACTED BY THE COURT] as shown by an SIA report because [TEXT REDACTED BY THE COURT]. *See id.* This dispute, however, is not material since the market share is measured nationally, while Aya's proposed geographic markets for its federal antitrust claims are regional. *See* Doc. No. 37 ¶¶ 331, 360.

[5] Aya's fiscal year begins on October 1st of the preceding year and ends on September 30th of the fiscal year in question. For example, for Aya's fiscal year 2017, it began on October 1, 2016, and ended on September 30, 2017. *See* Fitzsimmons Decl., Ex. 7 at 45:7-13.

and experience **[**11]** of [the relevant] discipline." *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 592, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. "Knowledge" requires more than a subjective belief or an unsupported speculation; it requires an appropriate level of validation. *See id. at 593*. As the Ninth Circuit has explained:

> Under *Daubert* and its progeny, including *Daubert* II, a district court's inquiry into admissibility is a flexible one. *Alaska Rent-A-Car, Inc. v. Avis Budget Grp., Inc., 738 F.3d 960, 969 (9th Cir. 2013)*. In evaluating proffered expert testimony, the trial court is "a gatekeeper, not a fact finder." *Primiano v. Cook, 598 F.3d 558, 565 (9th Cir. 2010)* (citation and quotation marks omitted).
>
> "[T]he trial court must assure that the expert testimony 'both rests on a reliable foundation and is relevant to the task at hand.'" *Id. at 564* (quoting *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 597, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993))*. "Expert opinion testimony is relevant if the knowledge underlying it has a valid connection to the pertinent inquiry. And it is reliable if the knowledge underlying it has a reliable basis in the knowledge and experience of the relevant discipline." *Id. at 565* (citation and internal quotation marks omitted). "Shaky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, not exclusion." *Id. at 564* (citation omitted). The judge is "supposed to screen the jury from unreliable nonsense opinions, but not exclude opinions merely because they are impeachable." **[**12]** *Alaska Rent-A-Car, 738 F.3d at 969*. Simply put, "[t]he district court is not tasked with deciding whether the expert is right or wrong, just whether his testimony has substance **[*1320]** such that it would be helpful to a jury." *Id. at 969-70*.

City of Pomona v. SQM N. Am. Corp., 750 F.3d 1036, 1043-44 (9th Cir. 2014). "Challenges that go to the weight of the evidence are within the province of a fact finder, not a trial court judge. A district court should not make credibility determinations that are reserved for the jury." *Id. at 1044*.

2. Discussion

a. Qualifications

As an initial matter, the parties do not dispute that Donohoe has extensive experience in the healthcare staffing industry. *See* Doc. No. 134 at 1. Nor has AMN moved to exclude Donohoe's proffered testimony on the ground that she is not qualified.

Rule 702 recognizes that witnesses gain expertise in a variety of ways, including training and experience. Experience-based experts may testify on matters within their expertise. *See, e.g., Fortune Dynamic, Inc. v. Victoria's Secret Stores Brand Mgmt., Inc., 618 F.3d 1025, 1043 (9th Cir. 2010)* (admitting proffered expert's industry testimony where his expertise "is one based on experience"); *Hangarter v. Provident Life and Accident Ins. Co., 373 F.3d 998, 1016 (9th Cir. 2004)* ("Given [expert's] significant knowledge of and experience within the insurance industry, the district court did not abuse its discretion in concluding that he was qualified to testify as an expert witness.")

Donohoe has gained extensive experience **[**13]** and specialized knowledge in the healthcare staffing industry since 1980. *See* Doc. Nos. 99-3 at 7;[6] 110 at 2. She details this extensive experience in the beginning of her report. *See* Doc. No. 99-3 at 7-9. Accordingly, the Court finds that Donohoe is qualified under *Rule 702* to opine on matters within her experience in the healthcare staffing industry.

b. Opinions as to the Industry Participants' Interpretations of or Reactions to Contract Provisions

[6] There are two sets of page numbering with respect to Defendants' Exhibit A (Doc. No. 99-3) in support of its *Daubert* motion. The Court's citations refer to the page numbering of the filed exhibit, located directly beneath the page number of the actual report.

The parties dispute whether Donohoe has inappropriately opined as to industry participants' interpretations of and reactions to certain of AMN's contract provisions. AMN contends that Donohoe's opinions regarding the legal interpretations of contract provisions are "inappropriate and would be confusing to a jury . . .." Doc. No. 99-1 at 3. AMN further argues that Donohoe may neither opine as to the legal interpretations of the contractual provisions nor to industry participants' interpretations of or reactions to the same. *See id.* at 3-5. Aya responds that Donohoe "does not offer any ultimate conclusion of law at issue in this antitrust case" and permissibly "provides [an] analysis on the basis of her extraordinary experience and knowledge in the travel-nurse **[**14]** industry." Doc. 110 at 4.

Unless a contract is deemed ambiguous or there is a term of the contract that requires an expert's explanation, it is improper for an expert to interpret or construe a contract in his opinion. *McHugh v. United Serv. Auto. Ass'n, 164 F.3d 451, 454 (9th Cir. 1999)* (holding that "although experts may disagree in their conclusions; their testimony cannot be used to provide legal meaning or interpret the policies as written."). Such matters of law are "inappropriate subjects for expert testimony." *Aguilar v. Int'l Longshoremen's Union Local No. 10, 966 F.2d 443, 447 (9th Cir.1992)*. Moreover, "the opinions of [expert] witnesses on the intent, **[*1321]** motives, or states of mind of corporations, regulatory agencies and others have no basis in any relevant body of knowledge or expertise." *Stone Brewing Co., LLC v. MillerCoors LLC, No. 18-CV-331, 2020 U.S. Dist. LEXIS 32010, 2020 WL 907060, at *4 (S.D. Cal. Feb. 25, 2020)* (quoting *In re Rezulin Prods. Liab. Litig., 309 F. Supp. 2d 531, 546 (S.D.N.Y. 2004))*.

AMN primarily relies on *Wells Fargo Bank N.A. v. LaSalle Bank Nat. Ass'n* in support of its position that Donohoe's interpretations of their contractual provisions should be excluded. In that case, the defendant's industry expert opined as to the defendant's liability pursuant to an exculpatory provision of the contract at issue and the lack of any basis for the plaintiff's claim under the contract. *See Wells Fargo Bank N.A. v. LaSalle Bank Nat. Ass'n, No. 08-CV-1448, 2011 U.S. Dist. LEXIS 119395, 2011 WL 743748, at *3 (D. Nev. Feb. 23, 2011)*. The court held that such opinions based on the expert's contract interpretation were inappropriate and excluded. Here, AMN is **[**15]** correct that Donohoe interprets the contract, as she expressly states in her report that her assignment was in part to "opine on how certain restraints imposed by AMN would be interpreted by participants in the travel nurse staffing industry . . .." Doc. No. 99-3 at 10; *see also id.* at 56.

Aya does not contend that Donohoe opines as to any purportedly ambiguous provisions of AMN's contracts. Nor does Aya proffer any reason as to why Donohoe was opined as to the interpretation of such contract provisions, other than to "explain[] her understanding of what those restraints purport to do, how those are bound by them are affected by them in practice, and what has been their likely effect on agencies, staffing professionals, and travel nurses." Doc. No. 110 at 4. Aya primarily relies on dicta from the Tenth Circuit's *Specht v. Jensen* decision, arguing that such opinions are proper. *See id.* In *Specht*, the court excluded an attorney expert witness's testimony regarding his views of the applicable law and opinion as to whether defendants' conduct violated the law. *See Specht v. Jensen, 853 F.2d 805, 806 (10th Cir. 1988)*. In dicta, the court stated that an expert's testimony is proper "if the expert does not attempt to define the legal parameters within **[**16]** which the jury must exercise its fact-finding function," but is improper "when the purpose of testimony is to direct the jury's understanding of the legal standards upon which their verdict must be based . . .." *Id. at 809-10*.

Aya's reliance on *Specht* is unpersuasive, as the court there did not speak to an expert's attempt to interpret any contract provision. Moreover, "[t]he question of interpretation of [a] contract is for the jury and the question of legal effect is for the judge. In neither case do we permit expert testimony." *Loeb v. Hammond, 407 F.2d 779, 781 (7th Cir. 1969)* (citing 3 Corbin on Contracts, § 554, 226-27 (1960)); *see also Marx & Co. v. Diners' Club Inc., 550 F.2d 505, 509 (2d Cir. 1977)* (excluding expert opinion "as to the meaning of the contract terms at issue"). Accordingly, Donohoe's interpretations of the contracts must be excluded because "it is improper for an expert to interpret or construe the [unambiguous] contract in h[er] opinion." *Wells Fargo, 2011 U.S. Dist. LEXIS 119395, 2011 WL 743748, at *3* (citing *McHugh, 164 F.3d at 454*). Further, Donohoe's proffered testimony is speculative as to how the "restraints would be interpreted by industry participants." Doc. No. 99-3 at 56. This constitutes impermissible testimony regarding the states of mind of third parties that has "no basis in any relevant body of knowledge or expertise." *Stone Brewing Co., 2020 U.S. Dist. LEXIS 32010, 2020 WL 907060, at *4*. Lastly, the Court excludes Donohoe's testimony under *Rule 403* as substantially **[**17]** more prejudicial than probative, since the testimony would **[*1322]** intrude on the jury's role of interpreting the contract provisions at issue.

c. Opinions as to the Competitive Impact of Contractual Restraints

AMN next contends that Donohoe's testimony as to the competitive impact of certain of AMN's contract provisions should be excluded. *See* Doc. No. 99-1 at 3-4. AMN argues that such testimony is speculative, unreliable, confusing, and highly prejudicial, and in any event the testimony should come from percipient witnesses. *See id.* Aya maintains that such testimony is admissible. *See* Doc. No. 110 at 4-5.

"Expert testimony is inadmissible if it addresses lay matters which a jury is capable of understanding and deciding without the expert's help." *In re Novatel Wireless Secs. Litig., No. 08-CV-1689, 2011 U.S. Dist. LEXIS 133105, 2011 WL 5827198, at *4 (S.D. Cal. Nov. 17, 2011)* (internal quotations omitted, citing *Highland Capital Mgmt., L.P. v. Schneider, 379 F. Supp. 2d 461, 468 (S.D.N.Y. 2005))*. As such, expert testimony cannot be presented to the jury solely for the purpose of constructing a factual narrative based upon record evidence. *See Johns v. Bayer Corp., No. 09-CV-1935, 2013 U.S. Dist. LEXIS 51823, 2013 WL 1498965, at *28 (S.D. Cal. Apr. 10, 2013)* (excluding proffered expert testimony that "offer[ed] nothing more than a factual narrative of [] documents") (citing *In re Rezulin, 309 F. Supp. 2d at 551* (rejecting portions of plaintiffs' expert's testimony that was "a narrative reciting selected regulatory events" because "[s]uch material, to the **[**18]** extent it is admissible, is properly presented through percipient witnesses and documentary evidence")).

The Court finds that under the circumstances, such testimony is unhelpful to the jury. Donohoe sets out her interpretations of certain contractual provisions and then concludes that such provisions "make it more difficult" for other healthcare staffing agencies to compete and "discourage" AMN's employees from leaving to other healthcare staffing agencies. *See, e.g.*, Doc. No. 99-3 at 55 ("AMN's non-solicitation restraint makes it more difficult for an associate vendor to hire employees . . .."), 62 ("AMN's confidentiality restraint would discourage an AMN employee from leaving for a competitor . . .."). In other words, after Donohoe impermissibly interprets the contractual provisions at issue in this case, she forms conclusions as to their effects on competition and states of mind of industry participants. Such testimony intrudes on the province of the jury, who is capable of evaluating the same evidence and drawing conclusions without Donohoe's proffered testimony. Donohoe's experience in the healthcare staffing industry does not render her specially situated, or any better situated **[**19]** than lay persons on a jury, to observe and draw conclusions from evidence regarding any effects of the different types of contractual provisions at issue on healthcare staffing agencies and AMN's employees. *See In re Novatel Wireless Secs. Litig., 2011 U.S. Dist. LEXIS 133105, 2011 WL 5827198, at *4* (excluding proffered expert testimony forming conclusions based on a reading of record evidence because "no specialized or technical knowhow is required to read and draw conclusions" from the documents and testimony cited by the expert); *Andrews v. Metro N. Commuter R.R. Co., 882 F.2d 705, 708 (2d Cir. 1989)* (expert testimony is inadmissible when it addresses "lay matters which a jury is capable of understanding and deciding without the expert's help"). And as discussed above, an expert may not testify regarding the states of mind of third parties. *See Stone Brewing Co., 2020 U.S. Dist. LEXIS 32010, 2020 WL 907060, at *4*. Therefore, her opinions that certain industry participants are "discouraged" by AMN's contracts are likewise inadmissible.

The Court further agrees with AMN that Donohoe is simply providing a narrative **[*1323]** of Aya's theory of the case, which "is properly presented through percipient witnesses and documentary evidence." *Rezulin, 309 F. Supp. 2d at 551*; *see also LinkCo, Inc. v. Fujitsu Ltd., 2002 U.S. Dist. LEXIS 12975, 2002 WL 1585551, at *1-*2 (S.D.N.Y. July 16, 2002)* (where expert's report was based on a review of, *inter alia*, "documents, computer documents, computer files, deposition transcripts and exhibits," the "testimony by fact witnesses **[**20]** familiar with those documents would be far more appropriate ... and renders [the expert witness'] secondhand knowledge unnecessary for the edification of the jury") (citation and internal quotation marks omitted) (alterations in original); *Taylor v. Evans, No. 94-CV-8424, 1997 U.S. Dist. LEXIS 3907, 1997 WL 154010, at *2 (S.D.N.Y. Apr.1, 1997)* (rejecting portions of expert report on the ground that the testimony consisted of "a narrative of the case which a lay juror is equally capable of constructing").

Thus, for the foregoing reasons, Donohoe's proffered testimony as to the competitive impact of the contractual provisions is excluded.

d. Opinions as to Defendants' Reputation

AMN lastly argues that Donohoe's opinions as to AMN's reputation for enforcing their contracts with its employees and other healthcare staffing agencies should be excluded. *See* Doc. No. 99-1 at 5-6. Specifically, AMN argues that such testimony "is vague, confusing, irrelevant and prejudicial." *Id.* at 6. As AMN recognizes, Aya's failure to oppose the *Daubert* motion on this issue constitutes a waiver or abandonment in regard to this uncontested issue. *See* *Luat v. Mabus, No. 11-CV-0496, 2011 U.S. Dist. LEXIS 142484, 2011 WL 6152285, at *4 (S.D. Cal. Dec. 12, 2011)* (citing *Stichting Pensioenfonds ABP v. Countrywide Fin. Corp., 802 F. Supp. 2d 1125, 1132 (C.D. Cal. Aug. 9, 2011)* ("[I]n most circumstances, failure to respond in an opposition brief to an argument put forward in an opening brief constitutes waiver or abandonment in regard to **[**21]** the uncontested issue")).

The Court also agrees with AMN on the merits. Donohoe's testimony is irrelevant to any issue that the jury will decide in this case, and even if it had any relevance, such relevance is substantially outweighed by the likelihood of unfair prejudice to AMN. *See, e.g.,* *Napolitano v. Synthes, Inc., No. 09-CV-828, 2014 U.S. Dist. LEXIS 204087, 2014 WL 12867042, at *5 (D. Conn. Apr. 9, 2014)* (excluding expert's opinion of the reputation of the defendant and its products as irrelevant to any issue in the case and unfairly prejudicial to the defendant). Moreover, Donohoe's testimony as to AMN's reputation lacks any basis in her experience or in any methodology and is therefore unreliable and unhelpful to the jury. *See, e.g.,* *Tajonera v. Black Elk Energy Offshore Operations, L.L.C., No. 13-CV-0366, 2016 U.S. Dist. LEXIS 193772, 2016 WL 8274173, at *8 (E.D. La. May 26, 2016)* (excluding expert opinion as to defendant's "culture" and reputation because the expert lacked experience, expertise, and methodology to substantiate such opinions).

e. Conclusion

In sum, the Court finds that while Donohoe is qualified to testify as a healthcare staffing industry expert, her testimony as to industry participants' interpretations of and reactions to certain contract provisions, the competitive effect of such contract provisions, and AMN's reputation is impermissible. Accordingly, the Court finds the proffered opinions inadmissible and **GRANTS** AMN's **[**22]** *Daubert* motion.

DEFENDANTS' MOTION FOR SUMMARY JUDGMENT

AMN moves for summary judgment on all of Aya's claims. *See* Doc. No. 98. AMN argues that Aya cannot establish the essential element of antitrust injury and therefore Aya's Sherman Act and Cartwright Act claims fail. AMN contends that **[*1324]** Aya's additional claims lack any evidentiary basis upon which to establish a genuine factual issue for trial.

1. Legal Standard

"A party may move for summary judgment, identifying each claim or defense—or the part of each claim or defense—on which summary judgment is sought. The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. The party seeking summary judgment bears the initial burden of establishing the basis of its motion and of identifying the portions of the declarations, pleadings, and discovery that demonstrate absence of a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The moving party has "the burden of showing the absence of a genuine issue as to any material fact, and for these purposes the material it lodged must be viewed in the light most favorable to the opposing party." *Adickes v. S. H. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*. A fact **[**23]** is material if it could affect the outcome of the suit under applicable law. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A dispute about a material fact is genuine if there is sufficient evidence for a reasonable jury to return a verdict for the non-moving party. *See id.*

2. Aya's Antitrust Claims

AMN argues that Aya's claims under *Sections 1* and *2* of the Sherman Act and the California Cartwright Act fail because the undisputed record evidence shows Aya has suffered no antitrust injury, nor could it as a matter of law.[7] *See* Doc. 98-1 ("MSJ Mem.") at 4-33.

a. Relevant Law

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. To prove a *Section 1* claim, a plaintiff must show (1) that there was a contract, combination, or conspiracy, *i.e.*, an agreement or concerted action toward a common goal, (2) that the agreement unreasonably restrains trade, under either a *per se* rule of illegality or a rule of reason analysis, and (3) that the restraint harmed competition, not just competitors. *See T.W. Elec. Serv., Inc. v. Pac. Elec. Contractors Ass'n, 809 F.2d 626, 632 (9th Cir. 1987)*; *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 812 (9th Cir. 1988)*.

Section 2 of the Sherman Act declares it unlawful to "monopolize" or "attempt to monopolize." *15 U.S.C. § 2*. To prove monopolization under *Section 2*, a plaintiff must prove (1) that the defendant **[**24]** has monopoly power in the relevant market, and (2) that the defendant willfully acquired or maintained that power. *See Transamerica Computer Co., Inc. v. International Business Machines Corp., 698 F.2d 1377, 1382 (9th Cir.)*, *cert. denied*, *464 U.S. 955, 104 S. Ct. 370, 78 L. Ed. 2d 329 (1983)*. To prove attempted monopolization under *Section 2*, a plaintiff must show (1) that the defendant specifically intended to control prices or to destroy competition, (2) that the defendant engaged in anticompetitive conduct directed to accomplishing **[*1325]** that end, and (3) that the defendant has a dangerous probability of success. *See id.*

Section 4 of the Clayton Act authorizes a private right of action for private parties "injured in [their] business or property by reason of anything forbidden in the antitrust laws . . .." *15 U.S.C. § 15*. And as with all federal claims, a plaintiff must establish Article III standing, which requires proof of (1) injury-in-fact, (2) causation, and (3) redressability. *Gerlinger v. Amazon.com Inc., 526 F.3d 1253, 1255 (9th Cir. 2008)*. "For Article III purposes, an antitrust plaintiff establishes injury-in-fact when he has suffered an injury which bears a causal connection to the alleged antitrust violation." *Id.* (internal quotation marks and citation omitted). Private antitrust plaintiffs must make that showing of causal antitrust injury by demonstrating they suffered (1) "injury of the type the antitrust laws were intended **[**25]** to prevent" that also (2) "flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *In re Online DVD-Rental Antitrust Litig., 779 F.3d 914, 921-22 (9th Cir. 2015)*.

b. Analysis

AMN moves for summary judgment on the singular issue of antitrust injury. *See* Doc. No. 98 at 1 ("[T]he undisputed material facts in the record and applicable law compel the conclusion that Aya has not suffered antitrust injury, whether in the form of 'exclusionary' or 'retaliatory' damages or otherwise, and therefore Aya cannot prevail on its claim for violation of the federal and state antitrust laws."); Reply at 1 (quoting the same). As noted above, Aya claims it "has suffered two kinds of antitrust injury because of AMN's antitrust violations: exclusionary harm and retaliatory harm." TAC ¶ 262. With respect to Aya's claim of exclusionary damages, AMN does not argue that Aya cannot demonstrate the other requisite *Section 1* elements: (1) that there was a contract, combination, or conspiracy, *i.e.*, an agreement or concerted action toward a common goal, (2) that the agreement unreasonably restrains trade, under either a *per se* rule of illegality or a rule of reason analysis, and (3) that the restraint harmed competition, not just competitors. Regarding Aya's claim of **[**26]** retaliatory damages, AMN similarly does not address these elements expressly, though it does contest the existence of a "'cartel' agreement among industry staffing companies" under the first element. MSJ Mem. at 16. Moreover, AMN does not expressly move for summary judgment on the other *Section 2* elements for monopolization or attempted monopolization, though AMN

---

[7] The Court prioritizes its analysis of Aya's Sherman Act claims because the Court's subject matter jurisdiction hinges on the presence of a federal question pursuant to *28 U.S.C. § 1331*. In any event, the Court's analysis under the Cartwright Act would be the same as the Court's analysis under the *Sherman Act*. *See County of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* (citing *Cal. Bus. & Prof. Code § 16700 et seq.*).

does contest Aya's assertion that AMN was "acting as a monopolist or under circumstances where there was a danger of AMN becoming a monopolist." *Id.* at 17.

The Court provides this detail as a threshold matter to make clear that it will only address the express basis for AMN's motion for summary judgment: the issue of antitrust injury. To the extent AMN appears to challenge other elements of Aya's claims, the Court will address those arguments as they arise.

i. Exclusionary Damages

AMN first argues that Aya's claim for "exclusionary damages" is belied by the undisputed factual record, and in any event fails as a matter of law because (1) the parties' AV agreements containing the restraints at issue were easily terminable, and (2) Aya cannot disaggregate its damages attributable to the alleged anticompetitive conduct from losses flowing from lawful **[**27]** conduct. *See* MSJ Mem. at 4-13. The Court addresses each argument in turn.

[*1326] 1. Aya's Growth

First, AMN argues that the undisputed record evidence shows that Aya grew considerably from 2013 to mid-2015 when Aya was subject to the non-solicitation provisions at issue, and therefore, there is no genuine dispute of material fact that Aya has suffered no injury in fact or antitrust injury. *See* MSJ Mem. at 4-9. Aya responds that AMN is incorrect, because even a profitable plaintiff may suffer causal antitrust injury where a defendant's anticompetitive conduct causes the plaintiff lost profits. *See* Opp. at 20.

The Court agrees with Aya. Aya's undisputed growth during the time period in question is no doubt in tension with its theory that it suffered harm. However, AMN provides no authority that such evidence is dispositive on the issue of whether Aya suffered causal antitrust injury. Indeed, the argument is not responsive to Aya's theory that it would have earned greater profits but for the alleged anticompetitive conduct. *See, e.g.*, Opp. at 21. Controlling and persuasive case law show that even a profitable antitrust plaintiff may recover lost profits attributable to a defendant's anticompetitive conduct. *See* *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1222 (9th Cir. 1997)* ("Juries **[**28]** may award damages to profitable businesses for lost sales as the result of anticompetitive behavior."); *see also* *Pierce v. Ramsey Winch Co., 753 F.2d 416, 436-37 (5th Cir. 1985)* (plaintiff can establish antitrust injury by showing that it would have earned an even higher profit but for anticompetitive conduct). Accordingly, AMN is not entitled to summary judgment on this ground.

2. Easily Terminable Contracts

AMN next argues that because its AV agreements with Aya were easily terminable, Aya's purported claim for exclusionary damages fails as a matter of law. *See* MSJ Mem. at 9-10. Aya responds that "a party that enters into a contract offered by a counterparty with superior bargaining power can later challenge the contract on antitrust grounds." Opp. at 25 (citing *Systemcare, Inc. v. Wang Labs. Corp., 117 F.3d 1137, 1138 (10th Cir. 1997)* and *US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 48-49 (2d Cir. 2019))*. Aya adds that in any event, the non-solicitation restraints on AVs expressly [TEXT REDACTED BY THE COURT] Opp. at 26.

Though AMN provides no authority for its position, the argument has some appeal. The pertinent inquiry in a *Section 1* case such as this is whether the challenged agreement *unreasonably* restrains trade. *See* *United States v. Standard Oil Co., 221 U.S. 1, 60, 31 S. Ct. 502, 55 L. Ed. 619 (1911)* (establishing the "rule of reason" standard that only those restraints upon interstate commerce which are unreasonable are proscribed by *§ 1* of the Sherman Act); *see also* *Major League Baseball Props., Inc. v. Salvino, Inc., 542 F.3d 290, 315 (2d Cir. 2008)* (The Supreme Court "has **[**29]** not taken a literal approach to [*Section 1*]," but instead "has long recognized that Congress intended to outlaw only *unreasonable* restraints.") (citing *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (emphasis in *Dagher*)). In essence, AMN argues that no such unreasonable restraint exists here since Aya and other agencies can simply exercise their rights to terminate their agreements and free themselves of the non-solicitation provisions. An analogous argument has been made, sometimes successfully, in the exclusive dealing context. *See, e.g.,* *Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1163 (9th Cir. 1997)* (granting summary judgment for defendant manufacturer where its agreements with customers were of short duration and easily terminable, thereby "negat[ing] substantially their potential to foreclose competition" **[*1327]** from competing manufacturers); *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 194 (3d Cir. 2005)* (reversing judgment for defendant, finding that despite the legal ease with which customers can terminate contracts with defendant, the commercial realities showed that such terminations were not realistic).

Nevertheless, the Court finds that AMN's argument is insufficient for purposes of summary judgment. First, AMN provides no authority for its position, nor can the Court find any that holds a contract with a termination clause precludes a finding of an unreasonable **[**30]** restraint under *Section 1*. Rather, if there is an agreement that harms competition, and the counterparty suffers injury as a result, it may challenge the agreement as an unreasonable restraint under *Section 1*. *See* *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 766, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (noting that the Court has previously found "each plaintiff could 'clearly' charge a combination between itself and the defendants") (citing *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 141-42, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968))*. Though the cases cited by Aya do not directly confront the issue, the cases are informative. In *Systemcare*, the court recognized that "a plaintiff 'can clearly charge a combination between [the defendant] and himself, as of the day he unwillingly complied with the restrictive . . . agreement[ ].'" *117 F.3d at 1143* (citing *Copperweld* and *Perma Life Mufflers*). Aya asserts that it is doing just that. *See* Braynin Decl. at 7-8. Similarly, *US Airways* involved a plaintiff airline customer challenging under *Section 1* of the Sherman Act provisions in its contract with the defendant operator of a global distribution system. *See* *938 F.3d at 48-51*. Like the plaintiff in *US Airways*, Aya here is challenging discrete provisions in its AV agreements that, according to Aya, harm competition by restricting the labor market for travel nurses and recruiters. *See* Braynin Decl. at 7-8.

Second, Aya correctly notes **[**31]** that the AV agreements have a [TEXT REDACTED BY THE COURT]. *See* Opp. at 26 (citing Markham Decl. Ex. 31, § VII.F.). AMN responds "that the language does not support that strained interpretation." Reply at 5. The parties' disagreement on the matter is a factual dispute regarding the interpretation of the AV agreements, which is within the province of the jury. Moreover, Aya's theory of exclusion, supported by some evidence, is that AMN will enforce its alleged scheme to restrict the employment mobility of its personnel by various threats and retaliatory actions, including cutting off MSP or platform access for noncompliant AVs, initiating baseless litigation against defecting employees and the agencies that the employees join, and publicizing its enforcement efforts to current employees. *See* Opp. at 12-18. Whether such actions harm competition generally is a separate question that AMN has not expressly addressed in its motion for summary judgment on Aya's claim for exclusionary damages; rather, AMN only addresses whether Aya can suffer exclusionary harm when the theory of exclusion is premised on an easily terminable contract.

The Court declines AMN's invitation to adopt a legal presumption that Aya suffered **[**32]** no such injury here because it could have simply terminated the AV agreements. "Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***." *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 466-67, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Accordingly, summary judgment is not appropriate on this basis.

[*1328] 3. Disaggregation

With respect to Aya's purported claim of exclusionary damages, AMN lastly argues that they are unavailable as a matter of law because Aya cannot disaggregate damages attributable to unlawful conduct from injury resulting from lawful conduct. *See* MSJ Mem. at 10-13. Aya replies that it has disaggregated its damages, and in any event AMN's argument is legally flawed. *See* Opp. at 20-21.

AMN relies on *City of Vernon v. S. California Edison Co., 955 F.2d 1361, 1371-72 (9th Cir. 1992)*, and *ACT, Inc. v. Sylvan Learning Sys., Inc., 296 F.3d 657, 670 (8th Cir. 2002)*, in support of its position. MSJ Mem. at 11. In *City of Vernon*, the Ninth Circuit affirmed summary judgment for a defendant because the plaintiff's damages study was "seriously flaw[ed]" in the sense that the plaintiff's expert failed to segregate damages flowing from each allegedly anticompetitive act complained of by the plaintiff. *See* *955 F.2d at 1373*. Because the Ninth Circuit, earlier in the opinion, "had already found that many of those acts were proper," the jury had no basis to award damages as the expert failed **[**33]** to construct a model segregating damages resulting from those lawful acts from damages attributable to unlawful acts. *Id.*

Here, by AMN's own admission, Aya's economist expert, Dr. Rothman, "attributes **all** of Aya's 'exclusionary' damages **solely** to one particular type of 'restraint:' the so-called 'no-poaching' (non-solicitation) provisions in AMN's Associate Vendor (AV) agreements." Reply at 3 (emphasis in original, citations omitted); *see also* MSJ Mem. at 9 (same); Opp. at 20 ("AMN's No-Poaching Restraints prohibited Aya from soliciting *any* of AMN's travel-nurse recruiters . . .. That was the cause of Aya's harm during this period.") (emphasis in original). Therefore, *City of Vernon* is distinguishable as requiring disaggregation in a damages study where a plaintiff challenges various allegedly anticompetitive acts as causing its injury. Whereas here, it is undisputed that Aya is only challenging an allegedly anticompetitive non-solicitation provision in AMN's AV agreements with healthcare staffing agencies.

ACT is similarly distinguishable. There, the Eighth Circuit affirmed the district court decision granting a motion in limine to exclude evidence of purported damages, finding that "damages **[**34]** [plaintiff] claims from its failure to close a deal with [a third party] did not flow from conduct by [defendant] that violated *§ 2*." *296 F.3d at 670*. In other words, there was no finding that the defendant had harmed competition. Here, by contrast, AMN moves for summary judgment solely on the issue of "antitrust injury" in the form of "exclusionary damages" and "retaliatory damages," leaving it for the jury to determine whether its non-solicitation provisions have harmed competition generally.

4. Conclusion

For the aforementioned reasons, the Court **DENIES** AMN's motion for summary judgment on Aya's claim for exclusionary damages.

ii. Retaliatory Damages

AMN next argues that Aya's claim for retaliatory damages is not recoverable with respect to its *Section 1* claim because there is no "cartel." MSJ Mem. at 13-17. Regarding Aya's *Section 2* claim, AMN argues that retaliatory damages are unavailable for "at least three independent reasons: (1) AMN reserved the legal right to terminate the AV agreements, pursuant to their express terms; (2) there is no evidentiary showing that the alleged 'retaliatory' damages were the result of conduct by AMN acting as a monopolist or under circumstances where there was a danger of AMN becoming **[**35]** a monopolist; and (3) **[*1329]** the *Colgate* doctrine preludes those damages." *Id.* at 17. The Court considers each argument in turn.

1. Cartel

AMN argues that Aya cannot recover retaliatory damages because there is no genuine dispute of material fact that there even is a cartel that retaliated against Aya. *See* MSJ Mem. at 13-17.

A cartel is defined as "[a] combination of producers or sellers that join together to control a product's production or price." Black's Law Dictionary (11th ed. 2019). "Competing firms form a cartel when they replace independent decisions with an agreement on price, output, or related matters." Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 405a, at 26 (2d ed. 2002). "Horizontal price fixing, output limitations, and market division are classic characteristics of a cartel." *Freedom Holdings, Inc. v. Spitzer, 447 F. Supp. 2d 230, 251 (S.D.N.Y. 2004)*, *aff'd*, *408 F.3d 112 (2d Cir. 2005)*. The key feature of a cartel is the concerted action between competitors toward a *per se* illegal goal, such as the aforementioned trade restraints, "that would always or almost always tend to restrict competition and decrease output." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*.

Aya argues that it is allowed to recover retaliatory damages under *Hammes v. AAMCO Transmissions, Inc.* "on policy grounds." Opp. at 22. *Hammes* involved two individuals (the **[**36]** "Cookseys") who were franchised by a transmissions company to operate a transmission repair center in Indianapolis. *33 F.3d 774, 777 (7th Cir. 1994)*. To obtain the franchise, the Cookseys had to join an unincorporated association, which included the company's other dealers. *Id.* The association purchased an advertisement in the yellow pages that lists each number of the association's members, and calls to each number were forward in accordance with a preexisting agreement to one of the association's dealers. *Id.* The other members wanted to stifle competition from the Cookseys, so they refused to include the Cooksey's dealership in the call-forwarding network, such that no calls were forwarded to the Cookseys. *Id.* When the Cookseys tried to advertise outside the association, the dealers sued and enjoined the Cookseys in state court for violating the association's agreement, then eventually the Cookseys "went belly-up." *Id.*

As an out-of-circuit case, *Hammes* is of course not binding on this Court. In any event, Aya is not entitled to retaliatory damages under *Hammes* for several reasons. First, it is undisputed that an overarching horizontal agreement amongst AMN and the other healthcare staffing agencies does not exist. Aya merely **[**37]** contends that it and other healthcare staffing agencies each entered into AV agreements with AMN that contain the non-solicitation provision at issue. Contrary to Aya's suggestion that the distinction is "meaningless," it is not because, as the Court has explained, cartels are formed when competitors agree to pursue ends "that would always or almost always tend to restrict competition and decrease output." *Business Electronics, 485 U.S. at 723*. Aya admits that it is challenging the non-solicitation provisions in "bilateral staffing agreements," not some overarching agreement between AMN and agencies to refrain from soliciting or hiring each other's employees or to retaliate against Aya for not agreeing to do the same. *See* Doc. No. 150-1 at 21-23. Those non-solicitation provisions are not "naked" horizontal agreements to fix prices or achieve some other manifestly anticompetitive end, but rather they are admittedly part of a collaboration agreement to fulfill the demand of hospitals for travel nurses. *See, e.g.*, Braynin **[*1330]** Decl., Exs. 1 and 2 (Aya's AV agreements with AMN). Simply put, there is no evidence here of a cartel of healthcare staffing agencies combining "to accomplish an unlawful purpose or to accomplish some purpose, **[**38]** not unlawful in itself, by unlawful means." *Frackowiak v. Farmers Ins. Co., 411 F. Supp. 1309, 1316 (D. Kan. 1976)* ("[A] 'conspiracy' in violation of the Sherman Act is not established by mere proof of joint undertaking or concerted action.") (citations omitted).

Second, Aya fails to sufficiently dispute that "[t]here is no evidence that any companies other than AMN were involved in or even knew in advance about the termination of Aya's collaborations with AMN." Doc. No. 150-1 at 22; *see also id.* at 23 (not disputing that "AMN unilaterally determined not to continue extending to Aya the benefits of the AV relationship"). Aya offers evidence that AMN has taken measures to enforce its non-solicitation provisions, including by initiating "baseless" litigation. *See id.* at 22. But efforts by AMN to enforce the non-solicitation provisions against other agencies in the past have nothing to do with those agencies jointly agreeing to retaliate against Aya in any way. *Hammes* involved competitors agreeing to stifle competition from another competitor and is therefore distinguishable on this basis as well.

Third, neither the Supreme Court nor the Ninth Circuit has held so-called "no-poaching" agreements to be *per se* illegal under the antitrust laws.[8] Moreover, this case involves no **[**39]** such thing. A non-solicitation agreement is not synonymous with a no-poaching agreement. A no-poaching agreement refers to an agreement between competing employers "not to solicit, recruit, hire without prior approval, or otherwise compete for employees." *See* Competitive Impact Statement at 1, *United States v. Knorr-Bremse AG, et al.*, No. 1:18-cv-00747 (D.D.C. April 3, 2018), Doc. No. 3. In contrast, a non-solicitation agreement generally refers to an agreement between two parties not to solicit each other's employees or customers.

The Court is mindful that the United States Department of Justice ("DOJ") has stated its intention "to bring criminal, felony charges against culpable companies and individuals who enter into naked No-Poach Agreements." *Id.* at 10-11 (citation omitted). However, DOJ's policy is not binding authority and the non-solicitation provisions that Aya challenges here are clearly not naked no-poach agreements, but rather are ancillary provisions in agreements between collaborating healthcare staffing agencies to meet customer demand. *See, e.g.*, Braynin Decl., Exs. 1 and 2 (Aya's AV agreements with AMN). Aya's own expert, Dr. Rothman, **[**40]** admits that such ancillary provisions

[8] Aya erroneously cites *United States v. eBay, Inc., 968 F. Supp. 2d 1030, 1038-39 (N.D. Cal. 2013)*, and *In re High-Tech Empl. Antitrust Litig., 856 F. Supp. 2d 1103, 1122-23 (N.D. Cal. 2012)*, for the proposition that "a naked agreement among employers not to solicit one another's employees is a *per se* violation of *Section 1*." Opp. at 27. Both cases, confronted with motions to dismiss, deferred ruling on whether the *per se* rule applies until summary judgment. *See* *eBay, 968 F. Supp. 2d at 1039*; *In re High-Tech Empl. Antitrust Litig., 856 F. Supp. 2d at 1122*.

can protect firms against risks that would otherwise be present and impede healthcare staffing agencies from collaborating to provide hospital customers with the travel nurse services that they demand. *See* Markham Decl., Ex. 81 at 87-88. Indeed, Aya's AV agreement with AMN clearly shows that AMN is subject to a similar non-solicitation provision [TEXT REDACTED BY THE COURT]. Braynin Decl., Ex. 1 at AMN0000102619. It is also noteworthy that Aya does not argue the non-solicitation **[*1331]** provisions prevent it and other agencies from "conducting general advertising to which AMN employees may respond" or hiring AMN employees. *Id.* at AMN0000102620. Under these circumstances, the Court cannot conclude that the non-solicitation covenants that Aya complains of are agreements between competitors to pursue ends "that would always or almost always tend to restrict competition and decrease output." *Business Electronics, 485 U.S. at 723*. *See also infra* at 28-29.

In sum, Aya is not entitled to retaliatory damages under *Hammes*. Accordingly, summary judgment in favor of AMN is appropriate as to Aya's claim for retaliatory damages under *Section 1* of the Sherman Act.

2. Easily Terminable Contracts

AMN next argues that retaliatory **[**41]** damages are not recoverable by Aya under *Section 2* of the Sherman Act because AMN contractually reserved the right to terminate the AV agreements with Aya. *See* MSJ Mem. at 17-18. AMN further argues that without a contractual right to receive spillover assignments, Aya is left with a "dubious claim" for relief as a result of AMN's unilateral refusal to deal, *see id.* at 18-21, which does not meet an exception to the *Colgate* doctrine. *See id.* at 24-27. Aya contends that even if *Hammes* does not apply, "*Aspen Skiing* affords an independent ground for [retaliatory damages]." Opp. at 23.

The Sherman Act "does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal . . .." *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*. This is referred to as the *Colgate* doctrine and it recognizes that "[t]he freedom to switch suppliers lies close to the heart of the competitive process that the antitrust laws seek to encourage." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 137, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*.

The Court finds that the *Colgate* doctrine bars Aya's request for retaliatory damages. For the reasons already discussed with respect to Aya's claim for exclusionary damages, the Court is not persuaded that retaliatory damages are unavailable **[**42]** as a matter of law because Aya's AV agreements have termination clauses. Rather, retaliatory damages are unavailable because the alleged damages do not flow from anticompetitive conduct in violation of the Sherman Act. AMN correctly notes that the *Colgate* doctrine protects the freedom of contract, even for firms with substantial market power. *See* MSJ Mem. at 24-25 (citing *Colgate, 250 U.S. at 307*). AMN argues that its refusal to deal with Aya by continuing their AV relationship is not anticompetitive, *i.e.*, such conduct has not harmed competition in a relevant market. The Court agrees.

Aspen Skiing does not change the outcome that AMN lawfully refused to deal further with Aya. That case involved two ski companies that successfully offered skiers joint passes to both companies' ski mountains until the defendant ski company decided to end the relationship. *472 U.S. 585, 587-95, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. When the plaintiff ski company tried to recreate the multi-mountain pass by giving its customers vouchers equal to a price of a full day's lift ticket, the defendant refused to honor the vouchers. *Id. at 593-94*. The Court held that termination of the relationship was anticompetitive, as the evidence supported an inference that the defendant "was not motivated by efficiency **[**43]** concerns and that it was willing to sacrifice short-run benefits **[*1332]** and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *Id. at 611*.

This case does not involve a unilateral refusal to deal motivated by solely by the goal of stifling competition. At most, Aya claims that AMN refused to continue the AV relationship with Aya because Aya would no longer abide by the parties' non-solicitation provision in their AV agreements. *See, e.g.*, Opp. at 23 ("AMN, which holds monopoly positions, cut off Aya to retaliate against it and deter others from emulating its example."). But even Aya's expert, Dr. Rothman, recognizes that such contractual restraints are important to guiding a collaboration between otherwise competing healthcare staffing agencies. *See* Markham Decl., Ex. 81 at 87-88. Without being able to provide for such contractual restraints, the companies would likely be less willing or unwilling to deal with other agencies to supply travel nurses to hospitals which, as Aya also recognizes, already experience a "chronic shortage of nurses." Opp. at 31. The reason is because, as the undisputed facts clearly demonstrate, competitiveness in the healthcare staffing industry depends in large **[**44]** part on an agency's ability to establish networks that include recruiters, travel nurses, AVs, and of course, hospital customers. *See* Markham Decl., Ex. 81 at 59-61. AMN, a player in the industry for over thirty years, guards its investments and establishes AV relationships with only those agencies that agree, *inter alia*, not to abuse the relationship by proactively raiding AMN's employees, AVs, and customers. Aya is therefore not entitled to retaliatory damages under *Aspen Skiing*, as there is no dispute that AMN had a legitimate reason to refuse to deal further with Aya. *See* *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1075 (10th Cir. 2013)* ("Put simply, the monopolist's conduct must be irrational but for its anticompetitive effect."). Accordingly, summary judgment in favor of AMN is appropriate as to Aya's claim for retaliatory damages under *Section 2* of the Sherman Act

Moreover, as discussed below, Aya is not entitled to retaliatory damages under *Aspen Skiing* because there is insufficient evidence from which a jury could find that AMN is a monopolist or even a near-monopolist in the relevant markets that Aya identifies for its *Section 2* claims.

3. Monopolization and Attempted Monopolization

AMN next asserts that Aya is not entitled to retaliatory damages because Aya **[**45]** did not suffer those damages due to AMN acting as a monopolist or near-monopolist. *See* MSJ Mem. at 21-24. Aya responds that it has proffered evidence that shows it suffered damages as a result of AMN's exercise of monopoly or near-monopoly power in the market for travel nurses. *See* Opp. at 33-35.

In deciding whether a plaintiff was injured by a defendant's anticompetitive conduct, the focus is whether the injury results from harm to competition—not the elimination or reduction of competition with rivals, but harm to consumer welfare. *See* *Rebel Oil, 51 F.3d at 1433* ("[R]eduction of competition does not invoke the Sherman Act until it harms consumer welfare.") (citation omitted). Consumer welfare is maximized when economic resources are allocated to their best use and consumers are assured competitive prices and quality of goods or services. *Id.* (citations omitted). "Accordingly, an act is deemed *anticompetitive* under the Sherman Act only when it harms both allocative efficiency *and* raises the prices of goods above competitive levels or diminishes their quality." *Id.* (emphasis in original, citation omitted).

[*1333] For a firm unilaterally to raise prices above competitive levels, it must have sufficient market power to restrict its **[**46]** output, thereby restricting market-wide output and increasing market-wide prices. *See id.* (citing Phillip Areeda & Donald F. Turner, ***Antitrust Law*** ¶ 501, at 322 (1978)). "Market power" refers to a firm's "ability to raise prices above those that would be charged in a competitive market." *National Collegiate Athletic Association v. Board of Regents of the University of Oklahoma, 468 U.S. 85, 109 n.38, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. "Monopoly power" generally refers to a firm's large degree of market power that allows it "to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Market power can be demonstrated by "direct evidence of the injurious exercise of market power," such as restricting output and charging supracompetitive prices, or by circumstantial evidence: a well-defined relevant market, defendant's dominant share of that market, and the existence of significant barriers to entry and expansion. *See* *Rebel Oil, 51 F.3d at 1434* (citations omitted).

The Court finds Aya has failed to show as a matter of law that it suffered retaliatory damages as a result of AMN exercising its monopoly or market power. First, as AMN correctly notes, Dr. Rothman computed Aya's retaliatory damages on a nationwide basis, even though he did not opine that AMN has a nationwide monopoly or even a high nationwide market share. *See* MSJ Mem. at 22 (citing Fitzsimmons Decl., Ex. 13 at **[**47]** 107:20-108:7). Aya does not specifically address this point other than to insist that it has offered sufficient evidence of AMN's monopoly power in several regional, not national, markets. *See* Opp. at 24, 34-35 (citing Markham Decl., Ex. 81 at 94-100, Table 3, in support of its argument that sufficient evidence supports that it "suffered compensable antitrust injury in the form of exclusionary and retaliatory losses because of AMN's attempted and actual monopolization").

Aya effectively concedes that Dr. Rothman has not attributed all of the retaliatory damages to AMN exercising its monopoly power in regional markets by refusing to deal with Aya. There is no nexus between, on one hand, AMN's alleged monopoly or near-monopoly market shares in certain regional markets, and on the other, Aya's lost profits resulting from AMN's termination of the AV relationship that covered their collaboration to provide travel nurses to hospitals around the nation. And *Aspen Skiing* is distinguishable, as that case involved a ski company suffering damages as a result of a larger ski company monopolizing the market for downhill skiing services in Aspen, Colorado by ending a long-standing collaboration for no legitimate **[**48]** business reason other than to stifle competition. Here, Aya is not seeking lost profits attributable to AMN ending its AV relationship with Aya in certain regional markets for the purpose of monopolizing travel nurse services in those markets.

Furthermore, the Court will not infer monopoly power or sufficient market power solely from Dr. Rothman's market share calculations for AMN. AMN again correctly points out that for Aya's *Section 2* claim, Dr. Rothman calculates market shares for regions that are "far below anything that might be actionable." MSJ Mem. at 22-24. For the markets in which AMN is alleged to have monopoly power, *see* Doc. No. 37 at 75, AMN did not have a market share of even 50% according to Dr. Rothman. *See* Fitzsimmons Decl., Ex. 14, Exhibit V-2. Case law holds that a market share of less than 50 percent is presumptively insufficient for purposes of determining whether a firm has monopoly power. *See* *Rebel Oil, 51 F.3d at 1438* (collecting cases).

[*1334] Similarly, the Court will not infer the requisite *durable* monopoly power here where there are low barriers to entry and expansion, for "[a] mere showing of substantial or even dominant market share alone cannot establish market power sufficient to carry out a predatory **[**49]** scheme." *Id. at 1439* ("The plaintiff must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price."). While Aya argues that market barriers are high, *see* Opp. at 34, Dr. Rothman identified only two barriers to entry and expansion: access to key inputs and brand recognition. *See* Markham Decl. Ex. 81 at 53-54. A nursing shortage may prove to be a peculiar market barrier, but the same cannot be said with respect to brand recognition, which is typically important in many industries.

In any event, evidence of Aya's tremendous success and dramatically increasing number of placements demonstrates that barriers to expansion are low. *See* Doc. No. 150-1 at 1-10. For example, it is undisputed that Aya has grown dramatically since 2013, as shown by its rapid growth in profits and travel nurse placements. *See* Doc. No. 150-1 at 1-9. On the other hand, Aya has come forward with no evidence of would-be rivals passing on opportunities to enter the market or existing rivals lacking the capacity to expand output to challenge AMN. Under these circumstances, there is insufficient evidence from which a reasonable **[**50]** juror could find that "new rivals are barred from entering the market and [] existing competitors lack the capacity to expand their output to challenge [AMN]." *Rebel Oil, 51 F.3d at 1438*.

Nor will the Court infer that AMN has sufficient market power for purposes of Aya's attempted monopolization claim or that AMN has harmed competition in any relevant market. In addition to the same list of states identified as relevant markets for purposes of Aya's monopolization claim, Aya identifies eight other states and five metropolitan service areas. *See* Doc. No. 37 at 71. AMN argues that its market share in the additional markets are too low, and that Dr. Rothman fails to consider some of these additional markets in analyzing any potential impact on competition. *See* MSJ Mem. at 23. Aya does not respond to this point other than to insist that the proffered evidence supports its monopolization claim. *See* Opp. at 34-35. Nor does Aya address any actual harm to competition, which would be direct evidence of AMN's market power. *See* *Rebel Oil, 51 F.3d at 1433*.

Even though AMN has over 30% market shares in some of the alleged markets, as a matter of law the Court cannot infer that AMN has market power due to such shares, for market shares alone do not demonstrate **[**51]** that a firm has durable market power. *See* *id. at 1439*. Rather, Aya must show that market barriers impede entry from new firms and obstruct the expansion of output from existing rivals, and that it has failed to do.

Moreover, Aya's failure to identify any harm to competition in several of the relevant markets that it has identified for both its monopolization and attempted monopolization claim is another independent reason why its *Section 2* claims for retaliatory damages fail as a matter of law. Evidence of harm to the competitive process would serve to make the requisite showing of AMN's market power, as well as the separate essential showing that AMN's conduct does not merely harm competitors, but competition generally. *See* id. at 1433. A review of Dr. Rothman's report supports this finding, as he identifies as purported harm to competition a few instances in which Aya won business away from AMN by offering customers lower rates after **[*1335]** Aya reneged on its non-solicitation agreement with AMN. *See* Markham Decl., Ex. 81 at 77-82.

Isolated incidents of Aya's successful bidding do not demonstrate that AMN's prices were supracompetitive *market-wide*. Dr. Rothman repeatedly opines in his report that AMN imposes restraints **[**52]** that "make it more difficult for its rivals" to compete. *See, e.g.*, Markham Decl., Ex. 81 at 82-84. But Aya's "raising rivals' costs" theory of harm is insufficient, for the "reduction of competition does not invoke the Sherman Act until it harms consumer welfare." Rebel Oil, 51 F.3d at 1433; *see also* Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 494 (3d Cir. 1992) (it is "no concern of the antitrust laws" that a practice may consign even an entire "class of competitors . . . to competitive oblivion," unless "consumers [a]re also hurt because of diminished competition.").

In an effort to demonstrate harm to competition, Aya relies on Dr. Rothman's study that purportedly shows prices, or "bill rates," are higher in relevant markets in which AMN has a 30% or higher market share. *See* Opp. at 30 (citing Markham Decl., Ex. 82). Such markets include four of the six markets that Aya identified for both its monopolization and attempted monopolization claims, as well as four of the additional 12 markets that Aya identified for the attempted monopolization claim. *See* Doc. No 37 ¶¶ 331, 360. Aya therefore effectively concedes that it has failed to identify any harm to competition in 10 of the 18 geographic markets it has identified for its Sherman Act claims.

As for the eight markets in which **[**53]** AMN has a 30% market share or higher, the Court fails to see how any reasonable juror could find such evidence is indicative of harm to competition as a result of either the non-solicitation provisions in the AV agreements, or AMN's refusal to deal with Aya. Dr. Rothman calculates AMN's market share by referring to "all placements made directly by AMN, all placements made through AMN's MSPs, and all placements made through AMN's platforms if the placements are not made through another provider MSP." Markham Decl., Ex. 81 at 52. But neither Dr. Rothman nor Aya explains how this data is relevant later in analyzing the significance of bill rates increasing in markets where AMN has a 30% or higher market share. Aya's theory of harm to competitors and competition is that AMN's non-solicitation provisions in AV agreements raise rivals' costs so that AMN is able to charge supracompetitive prices in certain regional markets. *See* Opp. at 30 ("AMN's trade restraints have . . . blocked rivals' access to key inputs . . . and sales outlets . . . result[ing] in less competitive pressure in the markets for travel-nurse services and higher prices for these service, and the effect is most pronounced in those **[**54]** markets where AMN has the strongest presence."); *see also* Markham Decl., Ex. 82 at 7 (". . . AMN's trade restraints harm competition by making it more difficult for AMN's rivals to compete.").

There are a few problems fatal to Aya's theory of harm to competition. First, this theory of harm has no nexus with Aya's claim for retaliatory damages; the alleged harm to competition, *i.e.*, supracompetitive pricing, purportedly results from the effect of AMN's non-solicitation provisions, not the retaliation of AMN terminating Aya's AV relationship. *See* Opp. at 30-31. Second, Aya provides no support whatsoever that such non-solicitation provisions (or any contract provision for that matter) raise rivals' costs. Third, even crediting the unsupported assertion, AMN's direct placements have no bearing on Aya's theory of harm to competition by supracompetitive prices since those placements do not involve AMN collaborating with and imposing **[*1336]** non-solicitation covenants on AVs; the same is true for the placements that AMN makes through its own MSP programs and platforms. Yet, Dr. Rothman does not account for this in his study, leading the Court to view his opinion on this issue unreliable under the Daubert standard **[**55]** and of marginal relevance without understanding the underlying data more clearly.

Fourth, the mere fact that market bill rates are higher in certain markets where AMN's market share is 30% or higher does not speak to whether AMN, the alleged monopolist or near-monopolist, is charging supracompetitive prices, as opposed to rivals charging higher prices. But that question is precisely what Section 2 concerns—the threat of monopolists or near-monopolists engaging in conduct unfairly allowing it to reap supracompetitive profits by charging high prices or restricting output, while successfully fending off competitors from expanding output to challenge the dominant firm and eat away at the monopoly profits. It is axiomatic that "[a]ntitrust claims must make economic sense." Adaptive Power Sols., LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 952 (9th Cir. 1998) (affirming summary judgment for defendants where plaintiff's "argument makes no economic sense") (citing *Eastman Kodak, 504 U.S. at 468*). Aya's theory of harm to competition makes no "economic sense" upon closer examination and is unsupported by the evidence.[9]

Lastly, even where Aya has proffered some evidence that AMN has a market share of 30% or higher, AMN's refusal to deal with Aya is not actionable as anticompetitive conduct. AMN is correct that "even **[**56]** a monopolist . . . is free to refuse to deal or cooperate with rivals for legitimate business reasons" because a refusal to deal is not actionable unless the refusal "would make no economic sense but for its tendency to eliminate or lessen competition." MSJ Mem. at 24 (emphasis omitted, citing *Novell, 731 F.3d at 1075*). As discussed *supra*, AMN's refusal to deal with Aya for not abiding by the agreed-upon non-solicitation provision qualifies as a legitimate business decision. Non-solicitation provisions like the types at issue serve to protect AMN from its collaborating AVs taking advantage of the relationship by pilfering AMN's employees, AVs, and customers.

4. Conclusion

In sum, no reasonable jury could find that Aya is entitled to retaliatory damages for its claims under *Sections 1* and *2* of the Sherman Act. First, Aya is not entitled to relief under *Hammes* because there is no evidence of a cartel of healthcare staffing agencies that all agreed to refrain from soliciting or hiring each other's employees or to retaliate against Aya for reneging on such an agreement. Furthermore, Aya has failed to proffer evidence that AMN has sufficient market power in the various markets identified for Aya's *Section 2* claims, or that AMN's conduct **[**57]** has harmed competition. Even where there may arguably be indicia of higher prices in markets where AMN has a 30% or higher market share relative to prices in markets where AMN's share is lower, Aya is still not entitled to retaliatory damages for its *Section 2* claims because that evidence does not speak to whether AMN is charging **[*1337]** supracompetitive prices in those markets, and in any event, AMN has not committed an actionable unilateral refusal to deal under *Aspen Skiing*.

Accordingly, the Court **GRANTS** AMN's motion for summary judgment on Aya's claim for retaliatory damages.

3. Order to Show Cause re: Exclusionary Damages and State Law Claims

The Court finds that Aya has not put forth evidence of AMN's market power or harm to competition sufficient to meet its burden on summary judgment. As such, Aya's claim for retaliatory damages under *Sections 1* and *2* of the Sherman Act fail as a matter of law. Given the Court's conclusion that this case does not involve a cartel or a *per se* illegal agreement, the Court's findings of insufficient market power and harm to competition similarly appear fatal to Aya's claim for exclusionary damages, which the Court understands is redress that Aya seeks for both its Sherman Act **[**58]** *Sections 1* and *2* claims. *See* Opp. at 33, 35. With no federal claim to provide this Court with subject matter jurisdiction under *28 U.S.C. § 1331*, the Court would decline to exercise supplemental jurisdiction over Aya's remaining state law claims. Thus, the Court **ORDERS** the parties to submit supplemental briefing or otherwise show cause on or before June 1, 2020 as to whether summary judgment should be granted in AMN's favor with respect to Aya's Sherman Act *Sections 1* and *2* claims for exclusionary damages. The supplemental briefing must be no more than ten pages in length and may cite to documents already filed with the Court, but must not include new exhibits not already filed with the Court.

CONCLUSION

---

[9] Also insufficient is Aya's argument that AMN's trade restraints, when aggregated, have a "marketwide reach" that hinder rivals from soliciting AMN's employees, AVs, and hospital customers. Opp. at 32. Still, Aya must demonstrate harm to competition, as the Court will not give Aya a pass on the requirement. Doing so would inappropriately condemn facially innocuous non-solicitation provisions as *per se* illegal under the Sherman Act or inherently anticompetitive.

Based on the foregoing, the Court **GRANTS** AMN's *Daubert* motion and **GRANTS IN PART** and **DENIES IN PART** AMN's motion for summary judgment. The Court also **ORDERS** the parties to submit supplemental briefing or otherwise show cause on or before June 1, 2020 as to whether summary judgment should be granted in AMN's favor with respect to Aya's Sherman Act *Sections 1* and *2* claims for exclusionary damages in light of the Court's findings with respect to market power and harm to competition.

IT IS SO ORDERED.

Dated: May 12, 2020

/s/ Michael M. Anello

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Governments > Courts > Judicial Precedent

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN1[] **Standards of Review, De Novo Review**

The application of stare decisis and res judicata are questions of law that the appellate court reviews de novo.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN2[] **Standards of Review, Clearly Erroneous Review**

The appellate court reviews factual findings for clear error and legal conclusions de novo. Under clear error review, the appellate court must accept the district court's findings of fact unless it is left with the definite and firm conviction that a mistake has been committed. The appellate court must not reverse as long as the findings are plausible in light of the record viewed in its entirety. In other words, a decision is not clearly erroneous unless it strikes the appellate court as wrong with the force of a five-week-old, unrefrigerated dead fish.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN3[] **Standards of Review, Abuse of Discretion**

The appellate court reviews a district court's decision to grant a permanent injunction for an abuse of discretion; the factual findings underpinning the award for clear error; and the rulings of law relied upon by the district court in awarding injunctive relief de novo.

Governments > Courts > Judicial Precedent

HN4[] Courts, Judicial Precedent

Stare decisis binds today's court to yesterday's decisions. In determining whether the court is bound by an earlier decision, it considers not only the rule announced, but also the facts giving rise to the dispute, other rules considered and rejected and the views expressed in response to any dissent or concurrence. Insofar as there may be factual differences between the current case and a prior case, the court must determine whether those differences are material to the application of the rule or allow the precedent to be distinguished on a principled basis. Decisions furnish the rule for the determination of a subsequent case involving identical or similar material facts.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN5[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Antitrust decisions are particularly fact-bound. The Rule of Reason contemplates case-by-case adjudication. Each case arising under the Sherman Act must be determined upon the particular facts disclosed by the record, and opinions in those cases must be read in the light of their facts.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN6[] Preclusion of Judgments, Res Judicata

Res judicata, also known as claim preclusion, bars a party in successive litigation from pursuing claims that were raised or could have been raised in a prior action. It applies when there is: (i) an identity of claims between the prior and subsequent actions; (ii) a final judgment on the merits; and (iii) identity or privity between the parties. The defendant bears the burden of proving all three elements.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN7[] Preclusion of Judgments, Res Judicata

Claim preclusion does not apply to claims that were not in existence and could not have been sued upon when the allegedly preclusive action was initiated.

Antitrust & Trade Law > Sherman Act > Claims

HN8[] Sherman Act, Claims

The Sherman Act prohibits, inter alia, agreements in restraint of interstate trade or commerce. *15 U.S.C.S. § 1*. The United States Supreme Court has interpreted *§ 1* as outlawing only unreasonable restraints' of trade. When considering agreements among entities involved in league sports, the court must determine whether the restriction is unreasonable under the Rule of Reason.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the Rule of Reason's three-step framework: (1) the plaintiffs bear the initial burden of showing that the restraint produces significant anticompetitive effects within a relevant market; (2) if they carry that burden, the defendant must come forward with evidence of the restraint's procompetitive effects; and (3) the plaintiffs must then show that any legitimate objectives can be achieved in a substantially less restrictive manner. Courts are not free to micromanage organizational rules or to strike down largely beneficial market restraints, Accordingly, a court must invalidate a restraint and replace it with an less restrictive alternative only if the restraint is patently and inexplicably stricter than is necessary to accomplish all of its procompetitive objectives.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Improving customer choice is procompetitive. A restraint that broadens choices can be procompetitive.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The proper inquiry under the Rule of Reason is: What procompetitive benefits are served by the defendants' challenged rules?

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN12[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

At the Rule of Reason's third step, it is the plaintiff's burden to make a strong evidentiary showing that their proposed less restrictive alternatives to the challenged scheme are viable. To be viable, an alternative must be virtually as effective in serving the procompetitive purposes of the defendant's current rules, and without significantly increased cost. Where a restraint is patently and inexplicably stricter than is necessary to accomplish all of its procompetitive objectives, an antitrust court can and should invalidate it and order it replaced with an less restrictive alternative.

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN13[] **Injunctions, Permanent Injunctions**

Courts construe injunctions in context and so as to avoid absurd results.

Civil Procedure > Appeals > Standards of Review

HN14[] Appeals, Standards of Review

Under the deferential standard of review required, the appellate court must examine the record in its entirety.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN15[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Courts are ill-suited to identify terms of dealing between competitors, including a product's proper price.

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN16[] Injunctions, Permanent Injunctions

Fed. R. Civ. P. 65(d) reflects the basic principle that those against whom an injunction is issued should receive fair and precisely drawn notice of what the injunction actually prohibits. The appellate court will not set aside injunctions under *Rule 65(d)* unless they are so vague that they have no reasonably specific meaning.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN17[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A finding of anticompetitive harm at step one of the Rule of Reason does not end the inquiry. A defendant may escape antitrust liability despite inflicting harm if a court determines that the restraint has a procompetitive effect, and a proposed less restrictive alternative eliminating that restraint is not viable.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN18[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Where a restraint is patently and inexplicably stricter than is necessary to accomplish all of its procompetitive objectives, an antitrust court can and should invalidate it and order it replaced with a viable less restrictive alternative.

Summary:

SUMMARY[*]

Antitrust

[*] This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

The panel affirmed the district court's order in an antitrust action, enjoining the National Collegiate Athletic Association from enforcing rules that restrict the education-related benefits that its member institutions may offer students who play Football Bowl Subdivision football and Division I basketball.

In *O'Bannon v. NCAA (O'Bannon II), 802 F.3d 1049 (9th Cir. 2015)*, the court affirmed in large part the district court's ruling that the NCAA illegally restrained trade, in violation of *section 1 of the Sherman Act*, by preventing FBS football and D1 men's basketball players from receiving compensation for the use of their names, images, and likenesses, and the district court's injunction insofar as it required the NCAA to implement the less restrictive alternative of permitting athletic scholarships for the full cost of attendance.

Subsequent antitrust actions by student-athletes were consolidated in the district court. After a bench trial, the district court entered judgment for the student-athletes in part, concluding that NCAA limits on education-related benefits were unreasonable **[**2]** restraints of trade, and accordingly enjoining those limits, but declining to hold that NCAA limits on compensation unrelated to education likewise violated *section 1*.

The panel affirmed the district court's conclusion that *O'Bannon II* did not foreclose this litigation as a matter of stare decisis or res judicata.

The panel held that the district court properly applied the Rule of Reason in determining that the enjoined rules were unlawful restraints of trade under *section 1 of the Sherman Act*. The panel concluded that the student-athletes carried their burden at the first step of the Rule of Reason analysis by showing that the restraints produced significant anticompetitive effects within the relevant market for student-athletes' labor on the gridiron and the court.

At the second step of the Rule of Reason analysis, the NCAA was required to come forward with evidence of the restraints' procompetitive effects. The district court properly concluded that only some of the challenged NCAA rules served the procompetitive purpose of preserving amateurism and thus improving consumer choice by maintaining a distinction between college and professional sports. Those rules were limits on above-cost-of-attendance **[**3]** payments unrelated to education, the cost-of-attendance cap on athletic scholarships, and certain restrictions on cash academic or graduation awards and incentives. The panel affirmed the district court's conclusion that the remaining rules, restricting non-cash education-related benefits, did nothing to foster or preserve consumer demand. The panel held that the record amply supported the findings of the district court, which reasonably relied on demand analysis, survey evidence, and NCAA testimony.

The panel affirmed the district court's conclusion that, at the third step of the Rule of Reason analysis, the student-athletes showed that any legitimate objectives could be achieved in a substantially less restrictive manner. The district court identified a less restrictive alternative of prohibiting the NCAA from capping certain education-related benefits and limiting academic or graduation awards or incentives below the maximum amount that an individual athlete may receive in athletic participation awards, while permitting individual conferences to set limits on education-related benefits. The panel held that the district court did not clearly err in determining that this alternative **[**4]** would be virtually as effective in serving the procompetitive purposes of the NCAA's current rules, and could be implemented without significantly increased cost.

Finally, the panel held that the district court's injunction was not impermissibly vague and did not usurp the NCAA's role as the superintendent of college sports. The panel also declined to broaden the injunction to include all NCAA compensation limits, including those on payments untethered to education. The panel concluded that the district court struck the right balance in crafting a remedy that both prevented anticompetitive harm to student-athletes while serving the procompetitive purpose of preserving the popularity of college sports.

Concurring, Judge M. Smith wrote that because he was bound by *O'Bannon II*, he joined the panel opinion in full. He wrote separately to express concern that the current state of ***antitrust law*** reflects an unwitting expansion of the Rule of Reason inquiry in a way that deprived the student-athletes of the fundamental protections that the antitrust laws were meant to provide them.

Opinion by: THOMAS

Opinion

[*1243] THOMAS, Chief Judge:

We consider an appeal and cross-appeal from an order enjoining the National Collegiate Athletic Association (the "NCAA") from enforcing rules that restrict the education-related benefits that its member institutions may offer students who play Football Bowl Subdivision ("FBS") football and Division I ("D1") basketball (collectively, "Student-Athletes"). *See* *In re* **[*1244]** *NCAA Athletic Grant-In-Aid Cap Antitrust Litig. (Alston), 375 F. Supp. 3d 1058 (N.D. Cal. 2019)*. We have jurisdiction under *28 U.S.C. § 1291*, and we affirm.

We conclude that the district court properly applied the Rule of Reason in determining that the enjoined rules are unlawful restraints of trade under *section 1* of the **[**8]** Sherman Act, *15 U.S.C. § 1*. We further conclude that the record supports the factual findings underlying the injunction and that the district court's antitrust analysis is faithful to our decision in *O'Bannon v. NCAA (O'Bannon II), 802 F.3d 1049 (9th Cir. 2015)*.

I

A. The NCAA and its Compensation Rules

Founded in 1905, the NCAA regulates intercollegiate sports. *Id. at 1053*. Its mission statement is to "maintain intercollegiate athletics as an integral part of the educational program and the athlete as an integral part of the student body and, by so doing, retain a clear line of demarcation between intercollegiate athletics and professional sports." NCAA regulations govern, among other things, the payments that student-athletes may receive in exchange for and incidental to their athletic participation as well as in connection with their academic pursuits.

The NCAA divides its member schools into three competitive divisions. D1 schools—some 350 of the NCAA's approximately 1,100 member schools—sponsor the largest athletic programs and offer the most financial aid. D1 football has two subdivisions, one of which is the FBS.

In August 2014, the NCAA amended its D1 bylaws (the "Bylaws") to grant the so-called "Power Five" conferences—the FBS conferences that generate the most **[**9]** revenue—autonomy to adopt collectively legislation in certain areas, including limits on athletic scholarships known as "grants-in-aid." [1] In January 2015, the Power Five voted to increase the grant-in-aid limit to the cost of attendance ("COA") at each school. Since August 2015, the Bylaws have provided that a "full grant-in-aid" encompasses "tuition and fees, room and board, books and other expenses related to attendance at the institution up to the [COA]," as calculated by each institution's financial aid office under federal law. *See 20 U.S.C. §§ 1087kk*, *ll*. The Bylaws also contain an "Amateurism Rule," which strips student-athletes of eligibility for intercollegiate competition if they "[u]se[] [their] athletics skill (directly or indirectly) for pay in any form in [their] sport." "[P]ay" is defined as the "receipt of funds, awards or benefits not permitted by governing legislation."

However, governing legislation permits a wide range of above-COA payments—both related and unrelated to education. Without losing their eligibility, student-athletes may receive, for instance: (i) awards valued at several hundred dollars for athletic performance ("athletic participation awards"), [2] which may take the form **[**10]** **[*1245]** of Visa gift cards; (ii) disbursements—sometimes thousands of dollars—from the NCAA's Student Assistance Fund ("SAF") and Academic Enhancement Fund ("AEF") for a variety of purposes, such as academic achievement or graduation awards, school supplies, tutoring, study-abroad expenses, post-eligibility financial aid, health and safety expenses, clothing, travel, "personal or family expenses," loss-of-value insurance policies, car repair, personal legal services, parking tickets, and magazine subscriptions; [3] (iii) cash stipends of several thousands of dollars calculated to cover costs of attendance beyond the fixed costs of tuition, room and board, and books, but used wholly at the student-athlete's discretion; [4] (iv) mandatory medical care (available for at least two years after the athlete

---

[1] The Power Five conferences are the Atlantic Coast Conference (the "ACC"), Big Ten Conference, Big 12 Conference, Pacific 12 Conference (the "Pac-12"), and Southeastern Conference (the "SEC"). Student-Athletes named the Power Five as defendants, along with Conference USA, the Mid-American Conference (the "MAC"), Mountain West Conference, Sun Belt Conference, Western Athletic Conference, and American Athletic Conference (the "AAC").

[2] Athletic participation awards include the "Senior Scholar-Athlete Award," which is a postgraduate scholarship of $10,000 or less that institutions may award two student-athletes per year, and awards for achievement in special events, such as all-star or post-season bowl games.

[3] The record indicates that the NCAA does little to regulate or monitor the use of these funds. While it controls the total pool of money that an institution may distribute each year, it has not capped the amount that an individual athlete may receive. The SAF is broadly available to "assist student-athletes in meeting financial needs that arise in conjunction with participation in intercollegiate athletics, enrollment in an academic curriculum or to recognize academic achievement as determined by conference offices." And the NCAA "encourage[s]" schools to allocate AEF funds to provide "direct benefits to student-athletes that enhance [their] welfare."

graduates) for an athletics-related injury; (v) unlimited meals and snacks; (vi) reimbursements for expenses incurred by student-athletes' significant others and children to attend certain athletic competitions; and (vii) a $30 per diem for "unitemized incidental expenses during travel and practice" for championship events.

The NCAA has carved out many of these exceptions in the past five years. For **[**11]** example, before 2015, athletic participation awards did not take the form of cash-like Visa gift cards. And once the NCAA permitted grants-in-aid for the full COA, effective August 2015, many more student-athletes began to receive above-COA payments, such as cash stipends, Pell Grants, and AEF as well as SAF distributions.

This expansion of above-COA compensation has coincided with rising revenue from D1 basketball and FBS football for the NCAA and its members. In the 2015-16 academic year, these programs generated $4.3 billion in revenue (a $300 million increase from the previous year) for the Power Five. And in 2016, the NCAA negotiated an eight-year extension (until 2032) of its multimedia contract for the broadcasting rights to March Madness, the annual D1 men's basketball tournament. Under that agreement, the NCAA will receive $1.1 billion per year (an annual increase of over $325 million).

B. The *O'Bannon* Litigation

The NCAA is no stranger to antitrust litigation arising from its compensation rules. In 2009, Ed O'Bannon, a former UCLA basketball player, sued the NCAA after learning that a college basketball video game featured an avatar that resembled him and sported his jersey **[**12]** number. *O'Bannon II, 802 F.3d at 1055*. "The gravamen of [his] complaint" was that the NCAA illegally restrained trade, in violation of *section 1*, by preventing FBS football and D1 men's basketball players from receiving compensation for the use of their names, images, and likenesses ("NILs").[5] *Id.*

[*1246] After a bench trial, the district court agreed under the Rule of Reason and entered relief for the plaintiffs. *See O'Bannon v. NCAA (O'Bannon I), 7 F. Supp. 3d 955, 962-63 (N.D. Cal. 2014)*, *aff'd in part, rev'd in part*, *O'Bannon II, 802 F.3d at 1079*. The district court acknowledged the NCAA's evidence that college athletics'"amateur tradition" helps maintain their popularity as a product distinct from professional sports. *Id. at 999*. It nevertheless concluded that this procompetitive benefit did not justify the NCAA's "sweeping prohibition" on NIL compensation. *Id.* Based on evidence that "school loyalty and geography" primarily drive consumer demand and a lack of proof that small payments to student-athletes would diminish college sports' popularity, the district court determined that the NCAA could justify, at most, restrictions on large payments. *Id. at 1000-01*.

After identifying two less restrictive alternatives ("LRAs") to the challenged rules, *id. at 1004-07*, the district court implemented those LRAs through an injunction that required the NCAA to permit **[**13]** its schools to (i) "use the licensing revenue generated from the use of their student-athletes' [NILs] to fund stipends covering the [COA]"; and (ii) to make deferred, post-eligibility cash payments in NIL revenue, not to exceed $5,000, to student-athletes. *Id. at 1007-08*; *see also id. at 1008* (finding no evidence that "such a modest payment" would "undermine[]" NCAA's "legitimate procompetitive goals"). The NCAA appealed.

A majority of a Ninth Circuit panel concluded that the district court's decision, the first of its kind, was "largely correct." *O'Bannon II, 802 F.3d at 1053*; *id. at 1079* (Thomas, C.J., concurring in part and dissenting in part). The panel unanimously affirmed the injunction insofar as it required the NCAA to permit athletic scholarships for the full

---

[4] Under the Bylaws, student-athletes who have already received Pell Grants (calculated to cover the COA) may also receive these stipends.

[5] The *O'Bannon* class included "[a]ll current and former student-athletes" who had played D1 men's basketball or FBS football "and whose [NILs] may be, or have been, included or could have been included (by virtue of their appearance in a team roster) in game footage or in video[]games licensed or sold by Defendants, their co-conspirators, or their licensees." *Id. at 1055-56*.

COA, but a panel majority reversed and vacated the injunction's requirement that the NCAA allow deferred NIL payments. *Id. at 1053*.

In pertinent part, the panel rejected the NCAA's threshold argument that its amateurism rules, including those governing compensation, are "valid as a matter of law" under *NCAA v. Board of Regents of the University of Oklahoma, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. *O'Bannon II, 802 F.3d at 1061*. The panel acknowledged the Supreme Court's observation, in "dicta," that the NCAA has historically preserved its product by, *inter alia*, prohibiting payments to student-athletes. *Id. at 1063* (citing *Bd. of Regents, 468 U.S. at 102*). **[**14]** But it declined to read that statement as perpetual blanket approval for the NCAA's compensation rules, which were not at issue in *Board of Regents*. *Id.* Though conceding that the NCAA's "amateurism rules are likely to be procompetitive," [6] *id. at 1053*, the panel refused to exempt them from antitrust scrutiny, *see id. at 1064* (explaining that a procompetitive rule "can still be invalid under the Rule of Reason").

The panel then affirmed much of the district court's analysis. *See id. at 1069-76*. As is relevant here, it found, based on the record, "a concrete procompetitive effect in the NCAA's commitment to amateurism: namely that the amateur nature of collegiate sports increases their appeal to consumers." *Id. at 1073*. As to LRAs, it **[*1247]** agreed that the ban on funding COA scholarships with NIL revenue was "*patently and inexplicably* stricter" than necessary to differentiate college from professional sports. *Id. at 1075* ("[B]y the NCAA's own standards, student-athletes remain amateurs as long as any money paid to them goes to cover legitimate educational expenses."). It clarified that courts must invalidate such restraints but may not "micromanage organizational rules" or "strike down largely beneficial market restraints[.]" ***[**15]*** *Id.*

A panel majority, however, found error in the district court's adoption of deferred NIL compensation "untethered to [student-athletes'] education expenses" as a viable LRA. *Id. at 1076*. It explained that "not paying student-athletes is *precisely what makes them amateurs*" and disagreed that "being a poorly-paid professional" is "'virtually as effective' for that market as being a[n] amateur." *Id.* To avert a "transition[]" to "minor league status" and to heed the "Supreme Court's admonition that [courts] must afford the NCAA 'ample latitude' to superintend college athletics," the majority vacated this portion of the injunction. *Id. at 1079* (quoting *Bd. of Regents, 468 U.S. at 120*). In closing, it "emphasize[d] the limited scope of [its] decision," explaining that "in th[at] case," the Rule of Reason did "not require" anything "more" of the NCAA than to permit student-athletes to receive scholarships for the COA. *Id.* [7]

C. The *Alston* Litigation

In March 2014, while the NCAA was litigating *O'Bannon I*, FBS football and D1 men's and women's basketball players filed several antitrust actions against the NCAA and eleven D1 conferences that were transferred to and, with one exception, consolidated before the same district court presiding over **[**16]** *O'Bannon I*. Rather than confining their challenge to rules prohibiting NIL compensation, Student-Athletes sought to dismantle the NCAA's entire compensation framework.

In December 2015, the district court certified three injunctive relief classes comprised of (i) FBS football players, (ii) D1 men's basketball players, and (iii) D1 women's basketball players. Each subclass consists of student-athletes who have received or will receive a full grant-in-aid during the pendency of this litigation.

---

[6] In *O'Bannon II*, "amateurism rules" refers to, *inter alia*, the NCAA's "financial aid rules" and other rules "that limit student-athletes' compensation and their interactions with professional sports leagues." *Id. at 1055*.

[7] I dissented from this vacatur, mostly on the basis of the standard of review, because I concluded that the record supported the entirety of the judgment. *Id. at 1080*. Though agreeing that "court[s] should not eliminate the distinction between professional and college sports," I also disagreed that the vacated remedy would have done so. *Id. at 1082 n.4*. As a practical matter, the remedy that survived appeal required nothing of the NCAA, which had already adopted a more generous adjustment to the grant-in-aid limit by permitting schools to offer *any* D1 recruit an athletic scholarship up to the COA, irrespective of whether his or her NIL was or could be used or licensed.

Nearly a year after our decision in *O'Bannon II*, the NCAA sought judgment on the pleadings, invoking res judicata. It argued that *O'Bannon II* "requires nothing more of the NCAA than that it permit its member schools to provide student-athletes with their full education-related [COA]." Because the NCAA had already amended its rules to satisfy that requirement, it reasoned that any post-*O'Bannon* antitrust challenges to its compensation rules must fail. The district court denied the motion. It explained that Student-Athletes, unlike the *O'Bannon* plaintiffs, had challenged, among other things, limits on non-cash, education-related benefits. It acknowledged the possibility that *O'Bannon* forecloses a **[**17]** *type* of relief—lifting restrictions on cash payments untethered to educational **[*1248]** expenses—but declined to read it more broadly than that.

Cross-motions for summary judgment followed. The district court again rejected the NCAA's preclusion arguments. As to the merits, it adopted, at the parties' request, the market definition from *O'Bannon I*: the market for a college education or, alternatively, student-athletes' labor. It then granted Student-Athletes summary judgment at the Rule of Reason's first step, as the NCAA did not meaningfully dispute that the challenged rules have anticompetitive effects in the relevant markets. At the Rule of Reason's second step, it determined that the NCAA had raised triable issues as to whether its rules have the procompetitive effect(s) of maintaining the popularity of its elite college basketball and football products or integrating student-athletes into the wider campus community. Last, the district court found that Student-Athletes had proffered sufficient evidence to support their two proposed LRAs: (i) allowing individual conferences, but not the NCAA, to regulate student-athlete compensation; or (ii) enjoining NCAA rules that restrict both non-cash **[**18]** education-related benefits and benefits that are incidental to athletic participation.

D. The District Court's Decision

After a ten-day bench trial, the district court entered judgment for Student-Athletes, in part. The court concluded that NCAA limits on education-related benefits are unreasonable restraints of trade, and accordingly enjoined those limits; however, the court declined to hold that NCAA limits on compensation unrelated to education likewise violate section 1. Alston, 375 F. Supp. 3d at 1109.

1. *Determination that* O'Bannon *Is Not Preclusive*

At the outset of its conclusions of law, the district court again declined to dismiss the case on res judicata grounds. Id. at 1092-96. It identified "material factual differences" between *O'Bannon* and the *Alston* litigation, id. at 1095, including in the identity of class members and the rules and rights at issue, *see* id. at 1093-94 (explaining that "[t]he crux of the *O'Bannon* case was the right to student-athletes' NIL[s]," whereas "[t]he conduct at issue here is not connected to NIL rights" but to limits on above-COA compensation and benefits); id. at 1094 (noting that challenged rules either did not exist or have "materially changed" since *O'Bannon*). The district court then proceeded to its Rule of Reason analysis.

2. *The **[**19]** Relevant Market*

To begin, the district court accepted Student-Athletes' trial theory narrowing the relevant market to one in which Student-Athletes sell their "labor in the form of athletic services" to schools in exchange for athletic scholarships and other payments permitted by the NCAA. Id. at 1067, 1097.

3. *Anticompetitive Effects*

Next, the court reiterated its summary judgment finding of "significant anticompetitive effects in the relevant market." Id. at 1067, 1097. It relied on Student-Athletes' economic analyses reflecting that schools, as buyers of athletic services, exercise monopsony power to artificially cap compensation at a level that is not commensurate with student-athletes' value. Id. at 1068. Based on these analyses, it also found that, but for the challenged restraints, schools would offer recruits compensation that more closely correlates with their talent. Id. at 1068-69, 1098.

The district court also highlighted additional trial evidence demonstrating the challenged rules' anticompetitive effects. **[*1249]** This included testimony that, in 2013, the Power Five began to urge the NCAA to loosen its compensation restrictions based on a concern that existing rules incongruously allowed schools to spend on virtually anything, including palatial **[**20]** athletic facilities and seven-figure coaches' salaries, *except* direct financial support for student-athletes. *Id. at 1068-69*. In the district court's view, the Power Five's concerns constituted further proof that, absent the NCAA's rules, student-athletes would receive higher compensation. *Id. at 1069*. Although the NCAA granted the Power Five autonomy to create new forms of compensation and to expand previously available compensation and benefits in 2015, the district court observed that these conferences remain constrained by "overarching NCAA limits" that cap compensation at an artificially low level. *Id.*

4. *Procompetitive Effect*

The district court then turned to the NCAA's asserted procompetitive justifications. In pertinent part, the NCAA argued that the challenged rules implement "amateurism," which drives consumer interest in college sports because "consumers 'value amateurism.'" [8] *Id. at 1070* (internal citation omitted). The district court accepted this justification with respect to the NCAA's limits on cash compensation untethered to education, but not as to its limits on non-cash education-related benefits. *Id. at 1082-83, 1101-02*.

As a preliminary matter, the district court found no proof that the challenged rules *directly* foster consumer **[**21]** demand. *Id. at 1070*. It acknowledged the NCAA's theory that its rules safeguard "amateurism" for consumers' benefit, but the meaning of that term eluded the court. [9] *See id. at 1070-71* (noting former SEC commissioner's testimony that he "do[es not] even know what [amateurism] means" (internal citation omitted)). Though the NCAA defined amateurism during the litigation as "'not paying' the participants," *id. at 1071* (internal citation omitted), the district court observed that this purported pay-for-play prohibition is riddled with exceptions. *See id. at 1071-74*.

After cataloguing the long list of above-COA payments that the NCAA permits, the court then reached two conclusions: (i) the challenged rules "do not follow any coherent definition of amateurism . . . or even 'pay,'" and (ii) these payments (many of which post-date *O'Bannon*) have not diminished demand for college sports, which "remain[] exceedingly popular and revenue-producing." *Id. at 1074*.

On the question of consumer demand, the district court found Student-Athletes' evidence regarding the effect (or lack thereof) of above-COA compensation on demand more compelling than the NCAA's. For instance, in the battle of **[*1250]** economic experts, the district court found the NCAA's only demand expert, **[**22]** Dr. Kenneth Elzinga, unreliable because he failed to study "standard measures of consumer demand, such as revenues, ticket sales, or ratings," but instead relied on interviews with NCAA affiliates introduced to him by defense counsel. *Id. at 1075*. The district court further found his analysis irrelevant as he refused to study consumer response to historical changes in compensation levels based on the false premise that the NCAA's amateurism rules have not materially changed over time. *Id.*

By contrast, the district court credited Student-Athletes' expert Dr. Daniel Rascher's demand analysis, which was based on two natural experiments and, in some respects, corroborated by defense witnesses. *Id. at 1076-78, 1100*. The first experiment—comparing consumer demand before and after the August 2015 increase to the grant-in-aid limit, which resulted in "thousands of class members receiving significant" above-COA payments, including SAF and AEF distributions—demonstrated "no negative impact on consumer demand." *Id. at 1076*. In fact, Dr. Rascher

---

[8] This justification is the only one raised on appeal. The district court rejected the NCAA's other proffered justification (abandoned on appeal): The challenged rules purportedly enhance student-athletes' college education by integrating them into the wider campus community. *Id. at 1083-86, 1102-03*. The district court declined to find that the challenged rules improve academic performance or prevent a social "wedge" between athletes and non-athletes. *Id. at 1083-85, 1102-03*. To the contrary, it found that the challenged rules foster resentment by permitting expenditures on "frills, like extravagant athletes-only facilities." *Id. at 1085-86, 1103*.

[9] The NCAA's "Principle of Amateurism" provides that student-athletes'"participation should be motivated primarily by education and by the physical, mental and social benefits to be derived," that their "participation in intercollegiate athletics is an avocation," and that they "should be protected from exploitation by professional and commercial enterprises." *Id. at 1070* (internal citation omitted).

found that revenues from D1 basketball and FBS football, "one of the best economic measures of consumer demand," have increased since 2015. *Id. at 1076-77*; *see also* *id. at 1078* (noting corroborating testimony by an NCAA **[**23]** *Rule 30(b)(6)* witness and a Big 12 *Rule 30(b)(6)* witness). The second experiment—comparing demand before and after the University of Nebraska (of the Big Ten) began providing athletes up to $7,500 in post-eligibility education-related aid—likewise did not demonstrably reduce interest in Nebraska sports or FBS football and D1 basketball more broadly. *Id. at 1077-78*.

The district court also found Student-Athletes' survey expert, Dr. Hal Poret, considerably more persuasive than the NCAA's, Dr. Bruce Isaacson. *Id. at 1078-80, 1100-01*. Dr. Isaacson asked respondents why they watch college sports and listed "amateurs and/or not paid" as one possible reason, but failed to indicate that "amateurs" means "not paid" or to otherwise define "amateurs," thus "render[ing] the responses hopelessly ambiguous." *Id. at 1078*. Moreover, he measured only consumer *preference* and conceded that he did not attempt to study *behavior*. *Id. at 1079*. By contrast, Dr. Poret tested behavior and found that consumers would continue to view or attend college athletics (at the same rate) even if eight types of compensation that the NCAA currently prohibits or limits were individually implemented. *Id. at 1079-80*. The district court credited this conclusion. *Id. at 1079-80 & n.24*.

Testimony by NCAA lay witnesses that "student" status **[**24]** drives demand also failed to persuade the district court of a connection between the challenged compensation regime and demand. *Id. at 1082, 1101*. It reasoned that "student-athletes would continue to be students in the absence of the challenged rules," *id. at 1082*, relying on *O'Bannon II*'s observation that higher education "would still be available to student-athletes if they were paid some compensation in addition to their athletic scholarships," *id. at 1101* (quoting *O'Bannon II, 802 F.3d at 1073*). It also underscored the absence of evidence that the NCAA had promulgated its rules based on demand analyses. *Id. at 1080, 1100-01*.

Despite finding the NCAA's procompetitive theory largely unpersuasive, the district court "credit[ed] the importance to consumer demand of maintaining a distinction between college sports and professional sports." *Id. at 1082*. The court then found that some NCAA rules—the COA limit on the grant-in-aid, limits on compensation unrelated to education, and limits on cash awards for graduating or other academic **[*1251]** achievements—serve that purpose by precluding "unlimited payments unrelated to education, akin to salaries seen in professional sports leagues." *Id. at 1082-83*; *see also* *id. at 1101-02*. But the court concluded that limits on "non-cash education-related benefits," such as post-eligibility **[**25]** graduate scholarships or tutoring, do not have that effect; it reasoned that such benefits "could not be confused with a professional athlete's salary" and would only "emphasize that the recipients are students." *Id. at 1083*.

5. *Less Restrictive Alternative*

At the Rule of Reason's third step, the district court considered whether three potential alternatives to the challenged restraints were less restrictive but virtually as effective in preventing "demand-reducing unlimited compensation indistinguishable from that observed in professional sports." *Id. at 1086*. The district court rejected two proposed LRAs, both of which would have permitted individual conferences to limit above-COA compensation, but would have otherwise invalidated either (i) *all* NCAA compensation limits or (ii) NCAA limits on education-related compensation *and* existing caps on benefits incidental to athletics participation, such as healthcare, pre-season expenses, and athletic participation awards. *Id. at 1086-87*. The district court found that both these alternatives would enable professional-style cash payments, thus threatening the distinction between college and professional sports. *Id. at 1087*. The court acknowledged the possibility that conferences could "discover" **[**26]** demand-preserving compensation levels. *Id.* But it rejected these LRAs to avoid demand-reducing "miscalculations" during "the inevitable trial-and-error phase." *Id.*

The district court then identified a viable LRA:

> (1) allow the NCAA to continue to limit grants-in-aid at not less than the [COA]; (2) allow the [NCAA] to continue to limit compensation and benefits unrelated to education; (3) enjoin NCAA limits on most compensation and benefits that are related to education, but allow it to limit education-related academic or graduation awards and

> incentives, as long as the limits are not lower than its limits on athletic performance awards now or in the future. [10]

Id. The court enumerated specific education-related benefits that the NCAA would be unable to prohibit or limit under the LRA: "computers, science equipment, musical instruments and other items not currently included in the [COA] but nonetheless related to the pursuit of various academic studies"; post-eligibility scholarships for undergraduate, graduate, and vocational programs at any school; tutoring; study-abroad expenses; and paid post-eligibility internships. *Id. at 1088*.

The district court explained that this LRA would permit some NCAA **[**27]** regulation of cash graduation or academic awards because these payments could otherwise morph into professional-like salaries. *Id.* It instructed that the cap on such awards should not fall below the existing limit on aggregate athletic participation awards (currently, $5,600), as receipt of the latter "has been shown not to decrease consumer demand and not to be inconsistent with the NCAA's understanding of amateurism." *Id.* Under this LRA, individual conferences may continue to limit all payment types because "no individual conference dominates **[*1252]** nearly the entire market, like the NCAA does." *Id.* The district court further reasoned that this LRA would not "greatly impact[]" the NCAA's "latitude to superintend college sports," as it "would affect only a small fraction of [its] rulemaking jurisdiction." *Id.*

The district court concluded that this LRA would be virtually as effective as the challenged rules at preserving student-athletes' status as students (and thus demand), analogizing it to the LRA affirmed in *O'Bannon II*: Both require the NCAA to permit members "to cover legitimate education-related costs." *Id. at 1105* (citing *O'Bannon II, 802 F.3d at 1075*). Finally, it determined that, far from resulting in significantly increased **[**28]** costs, the LRA's elimination of a category of rules would decrease the NCAA's enforcement costs. *Id. at 1090-91, 1105*.

6. *Remedy*

The district court implemented this LRA via a permanent injunction. *See In re NCAA Athletic Grant-In-Aid Cap Antitrust Litig., 2019 WL 1593939 (N.D. Cal. Mar. 8, 2019)*. The injunction provides that the parties may move to modify its list of education-related benefits and that the NCAA may move to incorporate a definition of compensation and benefits that are "related to education" if it chooses to adopt one. *Id.* at *1. It also allows the NCAA to regulate *how* its members provide education-related benefits. *Id.*; *see also Alston, 375 F. Supp. 3d at 1107* ("[T]he NCAA could require schools to pay for these items directly or to reimburse student-athletes for [equipment] expenses if adequate proof of purchase is shown."). The court reiterated that NCAA members remain free to independently restrict pay. *Alston, 375 F. Supp. 3d at 1109*. And it stayed the injunction pending resolution of a timely appeal. *Id. at 1110*.

E. Post-Appeal Developments

After the NCAA timely appealed, California enacted the Fair Pay to Play Act (the "FPP Act"). *See* Cal. S.B. 206 (Sept. 30, 2019), *Cal. Educ. Code § 67456*. The FPP Act requires the NCAA and its member institutions to permit student-athletes enrolled in California colleges and universities to earn compensation from the use of their NILs. *Id. § 67456(a)*, *(g)*. It **[**29]** takes effect on January 1, 2023. *Id. § 67456(h)*.

In response to the FPP Act, the NCAA created a working group that has recommended permitting NIL benefits so long as they are tethered to education and otherwise preserve the distinction between college and professional sports recognized in *O'Bannon II*. *See* Fed. and State Leg. Working Grp. Report 4 (Oct. 23, 2019), *available at* https://tinyurl.com/working-grp-report. In recent testimony before the Senate Commerce Subcommittee on Manufacturing, Trade and Consumer Protection, NCAA President Dr. Mark Emmert denied that the NCAA would be "taking any action that is contrary to the position advocated by the NCAA or accepted by the Ninth Circuit with

---

[10] The district court found that the current aggregate limit on such awards is $5,600. *Id. at 1072, 1099*.

respect to the type of NIL payments that were at issue in the *O'Bannon* case[.]" *See* Test. of Dr. Mark Emmert 6 (Feb. 11, 2020), *available at* https://tinyurl.com/Emmert-Test-y.

HN1[] The application of stare decisis and res judicata are questions of law that we review de novo. *See In re Watts, 298 F.3d 1077, 1079 (9th Cir. 2002)*; *Media Rights Techs., Inc. v. Microsoft Corp., 922 F.3d 1014, 1020 (9th Cir. 2019)*.

HN2[] We review factual findings for clear error and legal conclusions de novo. *See O'Bannon II, 802 F.3d at 1061*. Under clear error review, we must "accept the **[*1253]** district court's findings of fact unless we are left with the definite and firm conviction that a mistake **[**30]** has been committed." *Id.* (quoting *FTC v. BurnLounge, Inc., 753 F.3d 878, 883 (9th Cir. 2014))*; *see also United States v. Alexander, 106 F.3d 874, 877 (9th Cir. 1997)* ("We must not reverse as long as the findings are plausible in light of the record viewed in its entirety[.]"). In other words, a decision is not clearly erroneous unless it "strike[s] us as wrong with the force of a five-week-old, unrefrigerated dead fish." *Prete v. Bradbury, 438 F.3d 949, 968 n.23 (9th Cir. 2006)* (internal citation omitted).

HN3[] Last, "[w]e review a district court's decision to grant a permanent injunction for an abuse of discretion"; the "factual findings underpinning the award" for clear error; and the "rulings of law relied upon by the district court in awarding injunctive relief" de novo. *Ollier v. Sweetwater Union High Sch. Dist., 768 F.3d 843, 867 (9th Cir. 2014)* (internal citations and quotation marks omitted).

III

The district court correctly concluded *O'Bannon II* did not foreclose this litigation as a matter of stare decisis and res judicata.

A

HN4[] Stare decisis binds "today's Court" to "yesterday's decisions." *Danielson v. Inslee, 945 F.3d 1096, 1097 (9th Cir. 2019)* (quoting *Kimble v. Marvel Entm't, LLC, 576 U.S. 446, 135 S. Ct. 2401, 2409, 192 L. Ed. 2d 463 (2015))*. "In determining whether [we are] bound by an earlier decision," we consider "not only the rule announced, but also the facts giving rise to the dispute, other rules considered and rejected and the views expressed in response to any dissent or concurrence." *Hart v. Massanari, 266 F.3d 1155, 1170 (9th Cir. 2001)*. "Insofar as there may be factual differences between the current case" and *O'Bannon* ***[**31]*** *II*, we "must determine whether those differences are material to the application of the rule or allow the precedent to be distinguished on a principled basis." *Id. at 1172*; *see also In re Osborne, 76 F.3d 306, 309 (9th Cir. 1996)* (explaining that decisions "furnish[] the rule for the determination of a subsequent case involving identical or similar material facts" (internal citation omitted)).

HN5[] Antitrust decisions are particularly fact-bound. The Supreme Court has long emphasized that the Rule of Reason "contemplate[s]" "case-by-case adjudication." *See Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 899, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*; *see also Maple Flooring Mfrs.' Ass'n v. United States, 268 U.S. 563, 579, 45 S. Ct. 578, 69 L. Ed. 1093 (1925)* ("[E]ach case arising under the Sherman Act must be determined upon the particular facts disclosed by the record, and . . . opinions in those cases must be read in the light of their facts"); Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application*, ¶ 1205c3 (4th ed. 2018) ("Continuing contracts in restraint of trade," are "typically subject to continuing reexamination," and "even a judicial holding that a particular agreement is lawful does not immunize it from later suit or preclude its reexamination as circumstances change.").

O'Bannon II was a decision of "limited scope," which the panel majority summarized as follows:

> [W]e reaffirm **[**32]** that NCAA regulations are subject to antitrust scrutiny and must be tested in the crucible of the Rule of Reason. . . . [T]he NCAA is not above the antitrust laws, and courts cannot and must not shy away from requiring **[*1254]** the NCAA to play by the Sherman Act's rules. *In this case*, the NCAA's rules have been more restrictive than necessary to maintain its tradition of amateurism in support of the college sports market. *The Rule of Reason requires* that the NCAA permit its schools to provide up to the [COA] to their student athletes. It does not require more.

802 F.3d at 1079 (emphasis added).

In arguing that the last two sentences of this passage foreclose the current litigation, the NCAA ignores the inherently fact-dependent nature of a Rule of Reason analysis, which evaluates dynamic market conditions and consumer preferences; the panel majority's manifest effort to limit its decision to the record before it; and the majority's mandate that courts must continue to subject NCAA rules, including those governing compensation, to antitrust scrutiny. *See id. at 1064* ("The amateurism rules' validity must be proved, not presumed.").

Far from straying outside *O'Bannon II*'s bounds, the district court here sought to toe the **[**33]** line that the panel majority drew. The court uncapped education-related benefits, but left in place NCAA limits on compensation unrelated to education, consistent with the majority's observation that "student-athletes remain amateurs as long as any money paid to them goes to cover *legitimate educational expenses*." *Id. at 1075* (emphasis added); *see also id. at 1076* (vacating injunction only insofar as it forced NCAA to permit "cash payments untethered to . . . education expenses").

The district court meaningfully and properly distinguished *O'Bannon II* from the current litigation as a narrow challenge to restrictions on NIL compensation. *See id. at 1052* (introducing challenged rules as those that "prohibit student-athletes from being paid for the use of their [NILs]"); *id. at 1055* (stating that the "gravamen of O'Bannon's complaint was that the NCAA's amateurism rules, insofar as they prevented student-athletes from being compensated for the use of their NILs, were an illegal restraint of trade"); *id. at 1073 n.17* ("The correct inquiry under the Rule of Reason is: What procompetitive benefits are served by the NCAA's existing rule banning NIL payments?"). Additionally, the proposed LRAs in *O'Bannon* were expressly limited to "licensing revenue **[**34]** generated from the use" of student-athletes' NILs. *See O'Bannon I, 7 F. Supp. 3d at 1007*. By contrast, this action more broadly targets the "interconnected set of NCAA rules that limit the compensation [student-athletes] may receive in exchange for their athletic services." *Alston, 375 F. Supp. 3d at 1062*. And Student-Athletes sought LRAs that would uncap above-COA compensation, regardless whether their NILs have, will, or could generate any revenue that would fund such compensation. *See id. at 1086*.

The NCAA's argument that it should not incur antitrust liability for *relaxing* its compensation limits since *O'Bannon* is not persuasive. The district court rightly concluded that this argument misses the mark: "It is the fact that the prices of student-athlete compensation are fixed, as opposed to the amount at which these prices are fixed, that renders the agreements at issue anticompetitive." *Id. at 1095* (citing *O'Bannon II, 802 F.3d at 1071* ("It is no excuse that the prices fixed are themselves reasonable.") (quoting *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)))*.

Additionally, the NCAA's concession that it has relaxed its compensation limits since *O'Bannon* only underscores that the instant litigation is materially factually different from *O'Bannon*. Indeed, as Student-Athletes **[*1255]** argue, the changes to compensation limits since *O'Bannon* "alter the **[**35]** factual assumption that drove the result in *O'Bannon*: they show that non-education-related cash payments in excess of the [COA] are no longer a 'quantum leap' from current NCAA practice[.]" *See O'Bannon II, 802 F.3d at 1078* ("The difference between offering student-athletes education-related compensation and offering them cash sums untethered to educational expenses is not minor; it is a quantum leap.")).

In *O'Bannon II*, the majority addressed only two types of above-COA allowances: Pell Grants and prize money for tennis recruits. *See id. at 1058-59*. It distinguished Pell Grants, which are "intended for education-related expenses," from "pure cash compensation" for athletic performance. *Id. at 1078 n.24*. And it declared that "award money from outside athletic events implicates amateurism differently than allowing schools to pay student-[athletes] directly." *Id. at 1077 n.21*. Neither of these above-COA allowances is analogous to the post-*O'Bannon II* forms of compensation—provided by schools and unrelated to education—that the district court cited to support its conclusion that the NCAA, contrary to its theory of amateurism, *does* provide at least some "pay for play." *See Alston, 375 F. Supp. 3d at 1071-74*. For example, the court found that, after the *O'Bannon* record closed, student-athletes **[**36]** have received, *inter alia*, athletic participation awards in the form of Visa gift cards,[11] SAF disbursements in the thousands of dollars to pay for loss-of-value insurance,[12] and personal expenses unrelated to education. *Id. at 1095*. Based on these innovations, the court fairly concluded that the compensation landscape has meaningfully changed since *O'Bannon. See id. at 1094*.

In sum, because *O'Bannon II* "was decided on a narrow set of facts that are distinguishable from the present case," we "decline to adopt" the NCAA's "broad interpretation" of that decision. *United States v. Silver, 245 F.3d 1075, 1079 (9th Cir. 2001)*.

B

HN6[] Res judicata, also known as "claim preclusion," "bars a party in successive litigation from pursuing claims that 'were raised or could have been raised in [a] prior action.'" *Media Rights Techs., 922 F.3d at 1020* (internal citation omitted). It applies when there is: (i) an identity of claims between the prior and subsequent actions; (ii) a final judgment on the merits; *and* (iii) identity or privity between the parties. *Id. at 1020-21*. The NCAA bears the burden of proving all three elements. *Id. at 1021*. The NCAA fails to carry its burden with respect to the first element.

HN7[] "Claim preclusion does not apply to claims that were not in existence and could not have been sued upon . . . when the allegedly **[**37]** preclusive action was initiated." *Id.* (internal citation omitted). That bright-line rule is dispositive here. Because Student-Athletes' antitrust claim "arose from events that occurred after" the *O'Bannon* record closed in August 2014—that is, the above-described proliferation **[*1256]** of permissible above-COA payments alongside a growth in revenues from FBS football and D1 basketball—it is "not barred." *Howard v. City of Coos Bay, 871 F.3d 1032, 1040 (9th Cir. 2017)*; *see also Harkins Amusement Enters., Inc. v. Harry Nace Co., 890 F.2d 181, 183 (9th Cir. 1989)* ("Failure to gain relief for one period of time does not mean that the plaintiffs will necessarily fail for a different period of time"); *California v. Chevron Corp., 872 F.2d 1410, 1415 (9th Cir. 1989)* (providing that "conduct of the parties since the first judgment[] must be considered" in connection with successive antitrust suits).[13]

IV

The district court properly granted judgment on the Student-Athletes' *Sherman Act § 1* claim. ***HN8***[] The *Sherman Act* prohibits, *inter alia*, agreements "in restraint of" interstate trade or commerce. *15 U.S.C. § 1*. The Supreme

---

[11] Visa gift cards function like cash, even if the NCAA declines to admit as much.

[12] The NCAA characterizes this insurance as a "legitimate expense to protect against the risk of loss that could be incurred during athletic competition," but the legitimacy of these payments is irrelevant here. What matters, for stare decisis purposes, is that the *O'Bannon II* panel had no occasion to consider whether such payments accord with the NCAA's conception of amateurism.

[13] In support of its res judicata argument, the NCAA cites the *O'Bannon II* majority's discussion of the "danger" of "future plaintiffs" pursuing "essentially the same claim again and again." If anything, the cited discussion cuts against the NCAA. The majority predicted that future challenges to the district court's $5,000 cap on deferred NIL payments would ultimately result in student-athletes, "captur[ing] the full value of their NIL" and the NCAA's transformation into a minor league. *O'Bannon II, 802 F.3d at 1079*. Far from enshrining the majority's decision as the last word on the legality of NCAA compensation rules, this hypothetical rests on the premise that res judicata would *not* have blocked such challenges.

Court has interpreted *section 1* "as 'outlaw[ing] only unreasonable restraints' of trade." *See In re Nat'l Football League's Sunday Ticket Antitrust Litig., 933 F.3d 1136, 1149 (9th Cir. 2019)* (alteration in original) (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. "[W]hen considering agreements among entities involved in league sports, such as here, [we] must determine whether the restriction is unreasonable under the [R]ule of [R]eason." **[**38]** *Id. at 1150 n.5*; *see also O'Bannon II, 802 F.3d at 1069* ("[T]he appropriate rule is the Rule of Reason.").

HN9[] As applied here, under the Rule of Reason's "three-step framework:" (1) Student-Athletes "bear[] the initial burden of showing that the restraint produces significant anticompetitive effects within a relevant market"; (2) if they carry that burden, the NCAA "must come forward with evidence of the restraint's procompetitive effects"; and (3) Student-Athletes "must then show that any legitimate objectives can be achieved in a substantially less restrictive manner." *O'Bannon II, 802 F.3d at 1070* (quoting *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001))*. Throughout this analysis, we remain mindful that, although "the NCAA is not above the antitrust laws," *id. at 1079*, courts are not "free to micromanage organizational rules or to strike down largely beneficial market restraints," *id. at 1075*. Accordingly, a court must invalidate a restraint and replace it with an LRA only if the restraint is "*patently and inexplicably* stricter than is necessary to accomplish all of its procompetitive objectives." *Id. at 1075*.

A

The district court properly concluded that the Student-Athletes carried their burden at the first step of the Rule of Reason. The district court found that the NCAA's rules have "significant anticompetitive effects in the relevant **[**39]** market" for Student-Athletes' labor on the gridiron and the court. *See Alston, 375 F. Supp. 3d at 1070* ("[B]ecause elite student-athletes lack any viable alternatives to [D1], they **[*1257]** are forced to accept, to the extent they want to attend college and play sports at an elite level after high school, whatever compensation is offered to them by [D1] schools, regardless of whether any such compensation is an accurate reflection of the competitive value of their athletic services."). These findings "have substantial support in the record," *O'Bannon II, 802 F.3d at 1070*; *see Alston, 375 F. Supp. 3d at 1067-70*, and the NCAA does not dispute them, *see O'Bannon II, 802 F.3d at 1072*.

B

The NCAA does, however, quarrel with the district court's analysis at the Rule of Reason's second step, where the NCAA bears a "heavy burden" of "competitively justify[ing]" its undisputed "deviation from the operations of a free market." *Bd. of Regents, 468 U.S. at 113*; *see also O'Bannon II, 802 F.3d at 1064* (explaining that the NCAA is not entitled to a presumption that its restraints are procompetitive). On appeal, the NCAA advances a single procompetitive justification: The challenged rules preserve "amateurism," which, in turn, "widen[s] consumer choice" by maintaining a distinction between college and professional sports.

HN10[] "Improving customer choice is procompetitive." *Paladin Assocs., Inc. v. Mont. Power Co., 328 F.3d 1145, 1157 (9th Cir. 2003)*; *see also O'Bannon II, 802 F.3d at 1072* ("[A] restraint **[**40]** that broadens choices can be procompetitive."). Thus, the district court properly "credit[ed] the importance to consumer demand of maintaining a distinction between college and professional sports." *Alston, 375 F. Supp. 3d at 1082*.[14]

---

[14] Writing in support of Student-Athletes, amici assert that courts may not consider a restraint's procompetitive benefits in a market outside the market deemed relevant for the purpose of evaluating a restraint's anticompetitive effects. That proposition is not settled. *See Paladin, 328 F.3d at 1157 n.11* (acknowledging the "theory that procompetitive effects in a separate market cannot justify anticompetitive effects in the market . . . under analysis" (citing *United States v. Topco Assocs., Inc. 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972))*. The *O'Bannon II* panel had no occasion to address it, as the parties there limited their dispute to whether the challenged rules, as a factual matter, preserved consumer demand. *See 802 F.3d at 1072-74*. So, too, here: The parties have agreed that the relevant market is the market for Student-Athletes' labor, while the market to be

The district court concluded, however, that only *some* of the challenged rules serve that procompetitive purpose: limits on above-COA payments unrelated to education, the COA cap on athletic scholarships, and certain restrictions on cash academic or graduation awards and incentives. *Id. at 1101-02* (recognizing that removal of these restrictions could result in unlimited cash payments akin to professional salaries). It explained that the remaining rules—those restricting "non-cash education-related benefits"—do nothing to foster or preserve demand because "[t]he value of such benefits, like a scholarship for post-eligibility graduate school tuition, is inherently limited to its actual value, and could not be confused with a professional athlete's salary." *Id. at 1083*.

The record amply supports these findings. The district court reasonably relied on demand analyses, survey evidence, and NCAA testimony indicating that caps on non-cash, education-related benefits have no demand-preserving effect and, **[**41]** therefore, **[*1258]** lack a procompetitive justification. *See id. at 1076-80*.

First, Dr. Rascher's and Dr. Noll's demand analyses demonstrate that the NCAA has loosened its restrictions on above-COA, education-related benefits since *O'Bannon* without adversely affecting consumer demand. These benefits include SAF and AEF distributions to cover fift-hand sixth-year aid, postgraduate scholarships, tutoring, international student fees, educational supplies, academic achievement or graduation awards, graduate school exam fees, and fees for internship programs. *Id. at 1072 n.15*.

Second, Student-Athletes' survey evidence reflects that individually implementing seven types of education-related benefits—limited or forbidden under the challenged rules—would not diminish the survey respondents' viewership or attendance.[15]

Third, NCAA witnesses confirmed that the NCAA set limits on education-related benefits without consulting any demand studies. *See id. at 1080* ("Indeed, [Kevin] Lennon, who has worked for the NCAA for more than thirty years, testified that he does not recall any instance in which any study on consumer demand was considered by the NCAA membership when making rules about compensation"); *see also id. at 1074* ("Defendants have not provided any cogent **[**42]** explanation for why the NCAA generally prohibits financial aid for graduate school at another institution, or for why the Senior Scholar Awards are limited in quantity and amount.").

Notwithstanding this evidence, the NCAA accuses the district court of straying from a purported "judicial consensus" that the NCAA expands consumer choice by enforcing an amateurism principle under which student-athletes "must not be paid" a penny over the COA. This sweeping procompetitive justification—the "Not One Penny" standard, in Dr. Noll's parlance—lacks support in both precedent and the record.

Although both *Board of Regents* and *O'Bannon II* define amateurism to exclude payment for athletic performance, neither purports to immortalize that definition as a matter of law. In fact, *O'Bannon II* recognizes that *Board of Regents*' discussion of amateurism is "dicta." *802 F.3d at 1063*. And to the extent the *O'Bannon II* majority accepted the NCAA's conception of amateurism, it did so based on the record, which demonstrated a "concrete procompetitive effect," *id. at 1073*, of limiting above-COA "NIL cash payments untethered to [students'] education expenses," *id. at 1076*.

The record in this case, by contrast, reflects no such concrete procompetitive **[**43]** effect of limiting non-cash, education-related benefits. Instead, the record supports a much narrower conception of amateurism that still gives rise to procompetitive effects: Not paying student-athletes "unlimited payments unrelated to education, akin to salaries seen in professional sports leagues" is what makes them "amateurs." *Alston, 375 F. Supp. 3d at 1083*. The district court credited NCAA testimony that college sports resonates with fans because they are not professionalized, and that "if the college game looks to be professional sports, [fewer] people will watch it." *Id. at*

---

assessed for pro-competitive effects is the market for college sports. Thus, the issue is not presented in this case. Because the issue raised by amici is "not properly before us," we express no view on its merits, and leave it for another day. *Pres. Coal., Inc. v. Pierce, 667 F.2d 851, 862 (9th Cir. 1982)*.

[15] These benefits were: an academic incentive payment with a maximum value of $10,000, a graduation incentive payment with a maximum value of $10,000, a post-eligibility undergraduate scholarship, a work-study payment, off-season expenses, a graduate school scholarship for the COA, and a post-eligibility study-abroad scholarship.

1082 (internal citations omitted). But the court reasonably declined to adopt the Not One Penny standard based on considerable **[*1259]** evidence that college sports have retained their distinctive popularity despite an increase in permissible forms of above-COA compensation and benefits.

In defense of its expansive conception of amateurism, the NCAA relies on its survey of 1,100 college sports fans, reflecting that 31.7 percent watch college sports because, *inter alia*, they "like the fact that college players are amateurs and/or are not paid." The NCAA claims that the district court rejected this survey on "baseless grounds." But it disregards the court's **[**44]** primary and most compelling reason for dismissing this evidence: The survey results reflect, at most, a consumer *preference* for "amateurism," but do not capture the effects (if any) that the tested compensation scenarios would have on consumer *behavior. See* *id. at 1079* ("Dr. Isaacson acknowledged that measuring consumer preferences is 'not the same thing' as measuring future consumer behavior, and that he did not do any work to measure any relationship between the two." (internal citation omitted)). The NCAA does not deny this flaw in its survey evidence.

The district court offered another sound reason to reject the NCAA's survey evidence: The survey's use of the phrase "amateurs and/or not paid" made its responses "hopelessly ambiguous." *Id. at 1078*. In so finding, the district court did not, as the NCAA complains, "inject ambiguity into a commonplace term." Amateurism does not have a fixed definition, as NCAA officials themselves have conceded. *See, e.g., id. at 1070-71* ("Mike Slive, who served as commissioner of the SEC, one of the Power Five, . . . testified that amateurism is 'just a concept that I don't even know what it means. I really don't.'" (internal citation omitted)); *see also* *O'Bannon II, 802 F.3d at 1083* (Thomas, C.J., dissenting) **[**45]** (referring to amateurism as a "nebulous concept prone to ever-changing definition"). Survey respondents who selected "amateurs and/or not paid" may have very well equated amateurism with student status, irrespective of whether those students receive compensation for athletics. *See* *Alston, 375 F. Supp. 3d at 1082* (acknowledging defense witness testimony that "consumers' perception that student-athletes are, in fact, students" drives consumer demand for D1 basketball and FBS football). Given this lack of clarity, the district court reasonably concluded that the NCAA's survey results were of limited evidentiary value.

Finally, the district court properly considered whether the challenged rules themselves, rather than hypothetical alternatives, have procompetitive benefits. ***HN11***[] As both parties recognize, the proper "inquiry under the Rule of Reason is: What procompetitive benefits are served by the NCAA's [challenged] rule[s]?" *See* *O'Bannon II, 802 F.3d at 1073 n.17*. As we have recounted, the district court gave reasoned consideration to the procompetitive effects achieved by each type of challenged rule, ultimately concluding that the NCAA "sufficiently show[ed] a procompetitive effect of *some aspects of* the *challenged compensation scheme*," but not all. **[**46]** *Alston, 375 F. Supp. 3d at 1103* (emphasis added). By contrast, in *O'Bannon*, the district court erred at step two because it considered the procompetitive benefits of *hypothetical* limits on large amounts of compensation. *See* *O'Bannon II, 802 F.3d at 1073 n.17* ("During the second step, the district court could only consider the benefits of the NCAA's existing rule prohibiting NIL payments—it could not consider the potential benefits of an alternative rule (such as capping large payments)."). Here, the NCAA has conceded that its rules, in part, "prevent the receipt of unlimited pay" unrelated to education. Dr. Isaacson also acknowledged that the challenged rules prohibit unlimited pay. Thus, the court did not err **[*1260]** in assessing whether such rules have procompetitive effects.

In short, the district court fairly found that NCAA compensation limits preserve demand to the extent they prevent unlimited cash payments akin to professional salaries, but not insofar as they restrict certain education-related benefits.[16]

---

[16] The NCAA asserts that the district court proceeded from the "simply fictional" premise that the dividing line between student-athletes and professionals is that the latter may receive "unlimited pay." In context, the district court was using the term "unlimited pay" as shorthand for payments that run the risk of eroding consumer perception of student-athletes as students—that is, *cash* payments *unrelated to education* and *akin to professional salaries*. The NCAA's own expert used that shorthand in surveying consumer attitudes toward an "unlimited payments scenario," where "a college could pay a student-athlete any amount it wanted to, without any limit, for playing college sports."

C

HN12[] At the Rule of Reason's third step, it is Student-Athletes' burden to "make a strong evidentiary showing" that their proposed LRAs to the challenged scheme "are viable." *Id. at 1074*. "[T]o be viable," an **[**47]** alternative "must be 'virtually as effective' in serving the procompetitive purposes of the NCAA's current rules, and 'without significantly increased cost.'" *Id.* (quoting *Cty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1159 (9th Cir. 2001))*. Where "a restraint is *patently and inexplicably* stricter than is necessary to accomplish all of its procompetitive objectives, an antitrust court can and should invalidate it and order it replaced with [an LRA]." *Id. at 1075*.

The LRA identified by the district court would prohibit the NCAA from (i) capping certain education-related benefits[17] and (ii) limiting academic or graduation awards or incentives below the maximum amount that an individual athlete may receive in athletic participation awards, while (iii) permitting individual conferences to set limits on education-related benefits. *See* *Alston, 375 F. Supp. 3d at 1087*. The district court did not clearly err in determining that this LRA would be "'virtually as effective' in serving the procompetitive purposes of the NCAA's current rules," and may be implemented without "significantly increased cost." *See* *O'Bannon II, 802 F.3d at 1074* (internal citation omitted).

1

The district court reasonably concluded that uncapping certain education-related benefits would preserve consumer demand for college athletics just as well as the challenged **[**48]** rules do. Such benefits are easily distinguishable from professional salaries, as they are "connect[ed] to education"; "their value is inherently limited to their actual costs"; and "they can be provided in kind, not in cash." *Alston, 375 F. Supp. 3d at 1102*. And, as already detailed, the record furnishes ample support for the district court's finding that the provision of education-related benefits has not and will not repel college sports fans.

The district court drew an apt analogy between the LRA upheld in *O'Bannon II* **[*1261]** and the LRA it identified here: Both athletic scholarships for the COA and education-related benefits "cover legitimate education-related costs." *Id. at 1105*. Indeed, in affirming the district court's order insofar as it raised the grant-in-aid cap to the COA, the *O'Bannon II* panel noted Dr. Emmert's testimony that this alternative would not harm demand "because all the money given to students would be going to cover their 'legitimate costs' to attend school." *O'Bannon II, 802 F.3d at 1075*. In reference to this litigation, Dr. Emmert similarly announced the NCAA's approval of the court's order to the extent that it would foster competition among conferences and schools "over who can provide the best educational experience"—"an inherently **[**49]** good thing." Associated Press, *Emmert: Ruling reinforced fundamentals of NCAA*, ESPN, Apr. 4, 2019, *available at* https://tinyurl.com/emmert-NCAA/ .

Dr. Emmert's comment is consistent with the record. As in *O'Bannon II*, the NCAA presented no evidence that demand will suffer if schools are free to reimburse education-related expenses of inherently limited value. Indeed, its evidence was to the contrary. For instance, in testifying about a University of Nebraska program that permits student-athletes to receive up to $7,500 in post-eligibility aid (for study-abroad expenses, scholarships, and internships), the University's former chancellor conceded that such benefits "relate to the educational enterprise" and, thus, do not erode demand. When asked about the propriety of above-COA compensation, the current MAC commissioner similarly testified that the "key" is "linking" payments to the "pursuit of the educational opportunities of the individual involved." The LRA fashioned by the district court achieves that link.

---

[17] Those benefits are the following: "computers, science equipment, musical instruments and other tangible items not included in the cost of attendance calculation but nonetheless related to the pursuit of academic studies; post-eligibility scholarships to complete undergraduate or graduate degrees at any school; scholarships to attend vocational school; tutoring; expenses related to studying abroad that are not included in the cost of attendance calculation; and paid post-eligibility internships." *In re NCAA Athletic Grant-In-Aid Cap Antitrust Litig., 2019 WL 1593939, at *1*.

In light of this evidence, the district court reasonably concluded that market competition in connection with education-related benefits will only reinforce consumers' perception **[**50]** of student-athletes as students, thereby preserving demand. *See Alston, 375 F. Supp. 3d at 1089* (observing that NCAA's "own witnesses" testified that "consumer demand for [D1] basketball and FBS football is driven largely by consumers' perception that student-athletes are, in fact, students").

Moreover, no evidence in the record substantiates the NCAA's concerns that certain benefits permissible under the LRA, if uncapped, will become vehicles for payments that are virtually indistinguishable from a professional's salary. These concerns are premised on an unreasonably expansive reading of the injunction, including its requirement that the NCAA permit reimbursement for "tangible items not included in the [COA] calculation but nonetheless related to the pursuit of academic studies." *In re NCAA Athletic Grant-In-Aid Cap Antitrust Litig., 2019 WL 1593939, at *1*. ***HN13***[] We construe injunctions in "context" and "so as to avoid . . . absurd result[s]." *Gathright v. City of Portland, 439 F.3d 573, 581 (9th Cir. 2006)*. The context here makes plain that it "cannot have been the district court's intent," *id.*, for uncapped benefits to be vehicles for unlimited cash payments. Instead, it expressly envisioned "non-cash education-related benefits" for "*legitimate* education-related costs," not luxury cars or expensive musical instruments for students who are *not* studying music. **[**51]** *Alston, 375 F. Supp. 3d at 1105* (emphasis added). Thus, properly construed, the injunction does not permit the type of unlimited cash payments asserted by the NCAA. Further, as the district court properly concluded, it is doubtful that a consumer could mistake a *post-eligibility* internship for a professional athlete's salary, where the former is necessarily divorced from participation in college athletics.

[*1262] The NCAA's challenges to the evidence underlying this LRA are likewise unavailing. To be sure, neither the survey nor Dr. Rascher's observations regarding the Nebraska program purport to reflect the effect that *nationwide* education-related benefits, implemented in the *aggregate*, would have on consumer demand. But the district court did not rely exclusively on this evidence. ***HN14***[] Under the deferential standard of review required here, we must examine the record "in its entirety." *Alexander, 106 F.3d at 877*. The NCAA fails to explain why the cumulative evidence, which included demand analyses regarding the growth of NCAA revenue alongside the expansion of SAF and AEF payments for education-related expenses, was insufficient.

And though the record does not reflect whether an athlete has ever received $5,600 in aggregate athletic participation awards, **[**52]** the district court reasonably concluded that permitting student-athletes to receive up to that amount in academic or graduation awards and incentives will not erode consumer demand. *See Alston, 375 F. Supp. 3d at 1072* (citing Dr. Elzinga's testimony that a player on a successful team could obtain $5,600 in cumulative awards under existing rules). The district court had before it (and fairly credited) evidence that demand would withstand even *higher* caps on such awards and incentives. *See id. at 1080* (discussing Student-Athletes' survey, which indicated that consumers would continue to view and attend college sports events even if student-athletes received academic or graduation incentive payments of up to $10,000); *see also id. at 1074, 1102, n.42* (observing that NCAA's *30(b)(6)* witness was unable to explain the NCAA's reason for limiting Senior Scholar-Athlete Awards to two students per year and a value of $10,000). The NCAA's objection to the $5,600 cap rings especially hollow considering that it does not cap individual academic or graduation awards drawn from the AEF or SAF. *See id. at 1072 n.15*.[18]

Finally, the NCAA contends that the district court engaged in improper judicial price setting by tying the cap on academic and graduation awards and incentives **[**53]** to the cap on aggregate athletic participation awards. ***HN15***[] The Supreme Court has remarked that courts are "ill suited" to identify terms of dealing between competitors, including a product's "proper price." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. But the district court did not *fix* the value of these

---

[18] The $5,600 cap on academic achievement awards and the $5,000 cap on deferred NIL compensation that the panel majority struck down in *O'Bannon II* may be "remarkably close" as a numerical matter, but they are different where it counts: Unlike deferred NIL compensation, academic achievement awards are plainly education-related and, thus, reinforce the demand-preserving perception of student-athletes as students.

academic awards: The task of setting their value to protect demand, by adjusting the aggregate value of athletic participation awards, remains in the NCAA's court. *See Alston, 375 F. Supp. 3d at 1107*.

2

The district court did not clearly err in finding that this LRA will not result in significantly increased costs. The district court reasoned that enjoining NCAA caps on most education-related benefits will actually save the NCAA resources that it would have otherwise spent on enforcing those caps. *Id. at 1090*. Commonsense supports that determination, as does the record.

Moreover, though the injunction permits the NCAA to regulate, to an extent, academic **[*1263]** and graduation awards and incentives, and conferences to regulate all education-related benefits, there is no reason to believe that such regulation, if pursued, will result in significantly increased costs. The NCAA does not dispute that it and its conferences have existing rulemaking and enforcement infrastructure to achieve **[**54]** such regulation. *See id. at 1090 n.32* (noting NCAA's recent creation of enforcement body to adjudicate violations of "complex" NCAA rules, including the "prioritiz[ation of] academics and the well-being of college athletes" (internal citation omitted); *see also id.* (noting that conferences are legislative bodies under the Bylaws).

The court's findings at step three are supported by the record, and certainly not clearly erroneous.

V

The final question remaining is whether the district court's injunction goes too far or not far enough in enjoining the NCAA's unlawful conduct. In the NCAA's view, the injunction is impermissibly vague, in violation of *Federal Rule of Civil Procedure 65(d)* ("*Rule 65(d)*"), and usurps the association's role as the "superintend[ent]" of college sports, *O'Bannon II, 802 F.3d at 1074*. On cross-appeal, Student-Athletes urge that the district court should have enjoined *all* NCAA compensation limits, including those on payments untethered to education. In our view, the district court struck the right balance in crafting a remedy that both prevents anticompetitive harm to Student-Athletes while serving the procompetitive purpose of preserving the popularity of college sports. Thus, we neither vacate nor broaden the injunction, but affirm.

A

HN16[] *Rule 65(d)* reflects the "basic **[**55]** principle" that "those against whom an injunction is issued should receive fair and precisely drawn notice of what the injunction actually prohibits." *Fortyune v. Am. Multi-Cinema, Inc., 364 F.3d 1075, 1086-87 (9th Cir. 2004)* (internal citation omitted). "[W]e will not set aside injunctions under *Rule 65(d)* 'unless they are so vague that they have no reasonably specific meaning.'" *Id. at 1087* (internal citation omitted). The challenged injunction clears this hurdle.

The district court enjoined the NCAA from limiting *enumerated* "compensation and benefits related to education," *In re NCAA Athletic Grant-In-Aid Cap Antitrust Litig., 2019 WL 1593939, at *1* (listing computers, science equipment, musical instruments, etc.). The NCAA does not claim confusion as to the meaning of any of these items. Instead, it stakes its *Rule 65(d)* objection on the injunction's reference to "other tangible items not included in the [COA] but nonetheless related to the pursuit of academic studies." *Id.* When read in context, following a list of specific types of education-related equipment, this language is reasonably specific. And unlike in *Columbia Pictures Industries, Inc. v. Fung*, a copyright infringement case on which the NCAA relies, the injunction here does not make cryptic reference to "general[]" or "wide[spread]" understanding and knowledge of technical terms. *710 F.3d 1020, 1048 (9th Cir. 2013)*.

Nor did the district **[**56]** court impermissibly wrest control of college sports from the NCAA by empowering itself to determine the types of benefits that qualify as "related to" education, instead of "leaving th[at] task" to "the institutions experienced in and responsible for providing education." The NCAA does not (nor can it reasonably) dispute that the benefits enumerated in the injunction are plainly related to academics. What is more, the injunction **[*1264]** invites the NCAA to promulgate a definition of "related to education," based on its institutional expertise, subject to the court's approval. *See In re NCAA Athletic Grant-In-Aid Cap Antitrust Litig., 2019 WL 1593939, at *1*. This allowance does not constitute judicial usurpation by a long shot.

In sum, we uphold the injunction against the NCAA's challenges.

B

If the district court had concluded, as Student-Athletes contend, that NCAA limits on compensation unrelated to education unreasonably restrain trade, then it should have enjoined those limits. *See* 15 U.S.C. §§ 4, 25 (conferring jurisdiction on federal courts to "prevent and restrain violations" of ***antitrust law***); *see also Ford Motor Co. v. United States, 405 U.S. 562, 577-78, 92 S. Ct. 1142, 31 L. Ed. 2d 492 (1972)* ("Antitrust relief should unfetter a market from *anticompetitive conduct*." (emphasis added)). The problem for Student-Athletes is that the court did not conclude as much; instead, **[**57]** it determined that NCAA limits on *education*-related compensation are the only challenged rules that flunk the Rule of Reason.

HN17[] Although the district court found that *all* the challenged rules have an anticompetitive effect, *Alston, 375 F. Supp. 3d at 1067-70*, a finding of anticompetitive harm at step one does not end the inquiry. A defendant may escape antitrust liability despite inflicting harm if a court determines that the restraint has a procompetitive effect, and a proposed LRA eliminating that restraint is not viable. *See, e.g., O'Bannon II, 802 F.3d at 1070, 1076-79* (finding that rules prohibiting NIL compensation had significant anticompetitive effects, but vacating portion of injunction requiring deferred compensation for NILs after concluding that this alternative was not a viable LRA).

As previously stated, the district court concluded, at step two, that the NCAA satisfied its burden of showing that "[r]ules that prevent unlimited payments"—"unrelated to education" and "akin to salaries seen in professional sports leagues"—serve the procompetitive end of distinguishing college from professional sports. *Alston, 375 F. Supp. 3d at 1083*. And at step three, it rejected Student-Athletes proposed LRAs, which would have eliminated such limits, reasoning:

> [A]t least some conferences would **[**58]** allow their schools to offer student-athletes unlimited cash payments that are unrelated to education. Such payments could be akin to those observed in professional sports leagues. Payments of that nature could diminish the popularity of college sports as a product distinct from professional sports.

Id. at 1087. Contrary to Student-Athletes' understanding, this analysis reflects the judgment that limits on cash compensation unrelated to education do *not*, on this record, constitute anticompetitive conduct and, thus, may not be enjoined.

This judgment was adequately reasoned and rests on neither factual nor legal error. The district court acknowledged the theoretical possibility that "conference officials, as rational economic actors, would not act contrary to their members' aggregate economic interests" by paying demand-reducing levels of compensation. *Id.* But it reasonably perceived a risk of "miscalculations" by conferences during an "inevitable trial-and-error phase." *Id.* The district court did not clearly err in declining to assume that conferences, in reality, would act rationally.

[*1265] The record indicates that the Power Five schools have exercised their autonomy in recent years to expand benefits **[**59]** unrelated to education and that conferences and schools have provided largely discretionary SAF and AEF payments for a wide range of expenses unrelated to education—both without harming consumer demand. But the district court reasonably concluded that this evidence may not reliably indicate that *individual* conferences would regulate payments in a demand-preserving manner absent any restrictions: The autonomy structure permits the Power Five to *collectively* adopt compensation-related legislation, in line with *O'Bannon II*'s guidance that some degree of "mutual agreement" is necessary to make the college sports product available. *See 802 F.3d at 1069* (quoting *Bd. of Regents, 468 U.S. at 102*). And the NCAA currently limits the use of SAF funds to payments that are distinguishable from a professional's salary in that they "meet[] financial needs that arise in conjunction with participation in intercollegiate athletics, enrollment in academic curriculum or to recognize academic achievement."

Student-Athletes' claims of legal error are likewise unpersuasive. They cite no support for their position that a court "should not simply import the [LRA] as its injunction." ***HN18***[] Indeed, *O'Bannon II* holds otherwise: "Where, as here, a restraint is *patently* ***[**60]*** *and inexplicably* stricter than is necessary to accomplish all of its procompetitive objectives, an antitrust court can and should invalidate it and *order it replaced with a [viable LRA]*." *Id. at 1075* (emphasis added).

Finally, Student-Athletes argue that the NCAA may no longer rely on *O'Bannon II*'s conclusion that NCAA limits on cash payments untethered to education are critical to preserving the distinction between college and professional sports now that it has "endorse[d]" the very "same NIL benefits" at issue there. This argument is premature. As it stands, the NCAA has *not* endorsed cash compensation untethered to education; instead, it has undertaken to comply with the FPP Act in a manner that is consistent with *O'Bannon II*—that is, by loosening its restrictions to permit NIL benefits that are "tethered to education." Fed. and State Leg. Working Grp. Report 4 (Oct. 23, 2019), *available at* https://tinyurl.com/working-grp-report; *see also* Test. of Dr. Mark Emmert 6 (Feb. 11, 2020), *available at* https://tinyurl.com/Emmert-Test-y. Accordingly, we disagree that the NCAA's response to the FPP Act militates in favor of enjoining all NCAA compensation limits.[19]

VI

To repeat my observation **[**61]** in *O'Bannon II*: "The national debate about amateurism in college sports is important. But our task as appellate judges is not to resolve it. Nor could we. Our task is simply to review the district court judgment through the appropriate lens of ***antitrust law*** and under the appropriate standard of review." *O'Bannon II, 802 F.3d at 1083* (Thomas, C.J., concurring in part and dissenting in part).

For the foregoing reasons, we hold that the district court properly concluded that NCAA limits on education-related benefits do not "play by the Sherman Act's rules." **[*1266]** *Id. at 1079*. Accordingly, we affirm its liability determination and injunction in all respects.

AFFIRMED.

Concur by: M. SMITH

Concur

M. SMITH, Circuit Judge, concurring:

Because I am bound by our decision in *O'Bannon v. NCAA (O'Bannon II), 802 F.3d 1049 (9th Cir. 2015)*, I join the panel opinion in full. I write separately to express concern that the current state of our ***antitrust law*** reflects an unwitting expansion of the Rule of Reason inquiry in a way that deprives the young athletes in this case (Student-Athletes) of the fundamental protections that our antitrust laws were meant to provide them.

Student-Athletes are talented, hardworking individuals who have dedicated their young lives to excelling in specific sports. As amici describe, Student-Athletes **[**62]** work an average of 35-40 hours per week on athletic duties during their months-long athletic seasons, and most work similar hours during the off-season to stay competitive. At

[19] Student-Athletes further contend that the FPP Act and similar proposed legislation in other states indicate a "consensus" that student-athletes' receipt of payments unrelated to education will not dampen consumer interest in college sports. However, the Act's legislative history suggests that concerns about fundamental fairness, rather than considerations regarding demand, drove its enactment. *See, e.g.*, S.B. 206 Assembly Floor Analysis 2 (Sept. 4, 2019), *available at* https://tinyurl.com/SB-206-AFA .

the same time, most of them do their best to succeed academically, managing to devote on average another 40 hours per week to classes and study. Nevertheless, their coaches and others in the Division 1 ecosystem make sure that Student-Athletes put athletics first, which makes it difficult for them to compete for academic success with students more focused on academics. They are often forced to miss class, to neglect their studies, and to forego courses whose schedules conflict with the sports in which they participate. In addition to lessening their chances at academic success because of the time they must devote to their sports obligations, Student-Athletes are often prevented from obtaining internships or part-time paying jobs, and, as a result, often lack both income and marketable work experience. Meanwhile, the grueling hours and physical demands of college sports carry significant health risks, such as sleep deprivation, stress, broken bones, and even potential brain damage. Despite their best efforts, **[**63]** however, fewer than 5% of Student-Athletes will ever play at a professional level, and most of those lucky few will stay in the pros only a few short years. In short, the college years are likely the only years when young Student-Athletes have any realistic chance of earning a significant amount of money or achieving fame as a result of their athletic skills.

For all their dedication, labor, talent, and personal sacrifice, Student-Athletes go largely uncompensated. They may receive tuition for an academic experience that they cannot take full advantage of, minimal living expenses, and some lavish perks that do nothing for their present or future financial security. However, that is not because their athletic services have little value. On the contrary, the NCAA and Division 1 universities make *billions* of dollars from ticket sales, television contracts, merchandise, and other fruits that directly flow from the labors of Student-Athletes. A number of Division 1 head football coaches take home multimillion-dollar salaries that exceed those of many NFL coaches. Moreover, contrary to the NCAA's representations about the importance of "amateurism," the evidence in this case shows that college **[**64]** sports viewership has only increased since we reduced some limitations on student-athlete compensation in *O'Bannon II. See* Panel Op. at 11-13.

My reaction to our application of federal ***antitrust law*** to the case of the Student-Athletes is similar Justice Alito's reaction to the majority's view in *Collins v. Virginia, 584 U.S. __, 138 S. Ct. 1663, 201 L. Ed. 2d 9 (2018)*. Said he: "An ordinary person of common sense would react to the Court's decision the way Mr. Bumble famously **[*1267]** responded when told about a legal rule that did not comport with the reality of everyday life. If that is the law, he exclaimed, 'the law is a ass—a idiot.'" *Id. at 1681* (Alito, J., dissenting) (quoting C. Dickens, *Oliver Twist* 277 (1867)).

The treatment of Student-Athletes is not the result of free market competition. To the contrary, it is the result of a cartel of buyers acting in concert to artificially depress the price that sellers could otherwise receive for their services. Our antitrust laws were originally meant to prohibit exactly this sort of distortion.

The Sherman Act and related antitrust laws were designed to preserve our economic freedom. *United States v. Topco Assocs., Inc., 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. Under those laws,

> the freedom guaranteed each and every business, no matter how small, is the freedom to compete—to assert with vigor, imagination, **[**65]** devotion, and ingenuity whatever economic muscle it can muster. Implicit in such freedom is the notion that it cannot be foreclosed with respect to one sector for the economy because certain private citizens or groups believe that such foreclosure might promote greater competition in a more important sector of the economy.

Id. The Sherman Act thus "protect[s] the economic freedom of participants in the relevant market." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1057 (9th Cir. 1999)* (quoting *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 538, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. Those protections extend to sellers of goods and services—such as Student-Athletes—to the same extent they do buyers, consumers, or competitors. *Mandeville Island Farms, Inc. v. Am. Crystal Sugar Co., 334 U.S. 219, 235, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)*. "The Act is comprehensive in its terms and coverage, protecting *all* who are made victims of the forbidden practices by whomever they may be perpetrated." *Id.* (emphasis added).

Section 1 of the Sherman Act, at issue here, prohibits agreements that unreasonably restrain trade. *15 U.S.C. § 1*; *Standard Oil Co. of N.J. v. United States, 221 U.S. 1, 58, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. In evaluating alleged violations of *Section 1* that fall outside the bounds of several now-established *per se* rules, courts apply the Rule of Reason to determine the effect of a given restraint on competition. "[T]he inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition." **[**66]** *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 691, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. Importantly, it is *not* the purpose of the Rule of Reason analysis "to decide whether a policy favoring competition is in the public interest, or in the interest of the members of an industry. Subject to exceptions defined by statute, that policy decision has been made by the Congress." *Id. at 692*.

The Rule of Reason entails a three-step analysis, of which the starting point is to identify the market in which the restraint occurs. *See Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1104-05 (9th Cir. 1999)*. At Step One, the "plaintiff bears the initial burden of showing that the restraint produces significant anticompetitive effects within" that market. *O'Bannon II, 802 F.3d at 1070* (quoting *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001))*. If the plaintiff meets that burden, at Step Two, "the defendant must come forward with evidence of the restraint's procompetitive effects." *Id.* (quoting *Tanaka, 252 F.3d at 1063*). Finally, at Step Three, "the plaintiff must . . . **[*1268]** show that any legitimate objectives can be achieved in a substantially less restrictive manner." *Id.* (quoting *Tanaka, 252 F.3d at 1063*).

Despite confining the Step One analysis of anticompetitive effects to the defined market, courts have not consistently limited the scope of the Step Two analysis in the same way. Some, including our court, have permitted defendants to offer procompetitive effects in a collateral market as **[**67]** justification for anticompetitive effects in the defined market. In *NCAA v. Board of Regents of Univ. of Oklahoma (Board of Regents), 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*, for example, the Supreme Court considered whether preserving demand for tickets to live college football games could justify anticompetitive restraints in the market for live college football television. *Id. at 95-96, 115-17*. The district court defined the relevant market at Step One as "live college football television." *Id. at 95*. The NCAA had restrained competition in this market by fixing the price of telecasts, negotiating exclusive contracts with two television networks, and artificially limiting the number of televised games. *Id. at 96*. Among other alleged procompetitive justifications, all of which the Court ultimately rejected, the NCAA argued that its television plan promoted consumer demand for live attendance at college football games. *Id. at 115*. The Court rejected this argument for three reasons: (1) individual schools could protect live attendance at the specific game being televised by negotiating a regional blackout, without acting in concert with other schools; (2) no evidence supported the NCAA's theory that limiting televised games actually promoted live attendance, especially since games would still be broadcast at all hours of the day; and **[**68]** (3) the NCAA's live attendance theory was "not based on a desire to maintain the integrity of college football as a distinct and attractive product, but rather on a fear that . . . ticket sales for most college games are unable to compete in a free market"—"a justification that is inconsistent with the basic policy of the Sherman Act." *Id. at 115-17*. The Supreme Court did not, however, say that the live attendance justification failed because courts categorically cannot consider procompetitive benefits outside the defined market.

Our relevant precedents follow a similar analysis. In *O'Bannon II*, we held that preserving consumer demand for college sports was a legitimate procompetitive justification for anticompetitive restraints on compensation for student-athletes' names, images, and likenesses in the market among colleges for student-athletes' services. *802 F.3d at 1069-73*. The district court had defined the relevant market at Step One as the "college education market," "wherein colleges compete for the services of athletic recruits by offering them scholarships and various amenities, such as coaching and facilities." *Id. at 1070*. The NCAA had restrained competition in this market by preventing member schools from paying student **[**69]** athletes for the use of their names, images, and likenesses. *Id.* Contrary to two of the NCAA's proffered justifications, we accepted the district court's factual determinations that the restraint did "not promote competitive balance," and did "not increase output in the college education market." *Id. at 1072*. We also rejected the NCAA's argument that, by preserving the character of college sports, the restraint "'widen[ed]' the choices 'available to athletes.'" *Id.* (quoting *Board of Regents, 468 U.S. at 102*). "As the district court found, it is primarily 'the opportunity to earn a higher education' that attracts athletes to **[*1269]** college sports rather than professional sports, and that opportunity would still be available to student-athletes if they were paid some compensation in addition to their athletic scholarships." *Id. at 1073*. Yet, without tying the Step 2 analysis to the "college education market," we held that the NCAA had demonstrated that the restraint served the procompetitive purpose of preserving "the amateur nature of collegiate sports [that] increases their appeal to consumers." *Id.* Accordingly, we proceeded to Rule of Reason Step Three, wherein we upheld the district court's less restrictive alternative of allowing grant-in-aid **[**70]** up to the full cost of attendance, but we vacated the district court's less restrictive alternative of allowing "small" amounts of deferred cash compensation as incompatible with amateurism. *Id. at 1074-79*.

Other courts, however, have rejected procompetitive justifications outside of the defined market. For example, in *Smith v. Pro Football, Inc., 593 F.2d 1173, 193 U.S. App. D.C. 19 (D.C. Cir. 1978)*, a former NFL player challenged rules governing the draft of graduating college players under which "no team was permitted to negotiate prior to the draft with any [eligible] player . . . and no team could negotiate with (or sign) any player selected by another team in the draft." *Id. at 1176*. The D.C. Circuit affirmed the finding that the draft had anticompetitive effects. The draft eliminated competition by "inescapably forc[ing] each seller of football services to deal with one, and only one buyer, robbing the seller, as in any monopsonistic market, of any real bargaining power." *Id. at 1185*.

At Step Two of the Rule of Reason analysis, the NFL asserted that the draft rules were procompetitive because they promoted "competitive balance" among the league's teams, in turn "producing better entertainment for the public, higher salaries for the players, and increased financial security for the clubs." *Id. at 1186*. The **[**71]** court rejected those justifications because they did not have procompetitive effects in the *market for players' services*. "The draft is 'procompetitive,' if at all, in a very different sense from that in which it is anticompetitive." *Id.* "[W]hile [the draft] may heighten athletic competition and thus improve the entertainment product offered to the public, [it] does not increase competition in the economic sense of encouraging others to enter the market and to offer the product at lower cost." *Id.* The court concluded that the draft's anticompetitive and procompetitive effects were "not comparable," and thus it was "impossible to 'net them out' in the usual rule-of-reason balancing." *Id.*

Despite its ruling in *Board of Regents*, the Supreme Court has not squarely addressed the proper scope of the Step Two analysis. And, although we conducted a similar analysis in *O'Bannon II*, neither have we. In my view, the underlying purpose of the Sherman Act—promoting competition—counsels in favor of conducting a more limited Rule of Reason analysis, as the court in *Smith* did. Realistically, the Rule of Reason analysis is judicially administrable only if it is confined to the single market identified **[**72]** from the outset. If the purpose of the Rule of Reason is to determine whether a restraint is net procompetitive or net anticompetitive, accepting procompetitive effects in a collateral market disrupts that balancing. It weakens antitrust protections by permitting defendants to rely on a broader array of justifications that promote competition, if at all, in collateral markets where the restraint under analysis does not occur.

Jurists faced with weighing the anticompetitive effects in one market with the procompetitive effects in another cannot simply "net them out" mathematically. **[*1270]** *Smith, 593 F.2d at 1186*. Rather, courts employing a cross-market analysis must—implicitly or explicitly—make value judgments by determining whether competition in the collateral market is more important than competition in the defined market. As the Supreme Court has warned, this is not what the antitrust laws invite courts to do. "If a decision is to be made to sacrifice competition in one portion of the economy for greater competition in another portion this too is a decision that must be made by Congress and not by private forces or by the courts. Private forces are too keenly aware of their own interests in making such decisions **[**73]** and courts are ill-equipped and ill-situated for such decisionmaking." *Topco, 405 U.S. at 611*.

Consider this case. The district court accepted the relevant market as that for Student-Athletes' "labor in the form of athletic services in men's and women's Division I basketball and FBS football," in which Student-Athletes "sell their athletic services to the schools that participate in Division I basketball and FBS football in exchange for grants-in-aid and other benefits and compensation permitted by NCAA rules." *In re NCAA Athletic Grant-In-Aid Cap Antitrust Litig. (Alston), 375 F. Supp. 3d 1058, 1067 (N.D. Cal. 2019)*. At Step One, the district court found that Student-Athletes had established significant anticompetitive effects in the market for their athletic services. The court concluded that the NCAA rules "have the effect of artificially compressing and capping student-athlete compensation and reducing competition for student-athlete recruits by limiting the compensation offered in exchange for their athletic services." *Id. at 1068*.

At Step Two, the court did not limit its consideration to the procompetitive effects of the compensation limits in the market for Student-Athletes' athletic services. Rather, it found that certain of the compensation limits are procompetitive because they drive consumer demand for college **[**74]** sports by distinguishing collegiate from professional athletics. *Id. at 1083*. In other words, the court found that limiting Student-Athletes' pay in the market for their services was justified because that restraint drove demand for the distinct product of college sports in the consumer market for sports entertainment. The court did not require that the NCAA prove that this impact on consumer demand had a corollary procompetitive impact on the market for Student-Athletes' services, that it "increase[d] output" or "'widen[ed]' the choices 'available to athletes.'" *O'Bannon II, 802 F.3d at 1072* (quoting *Board of Regents, 468 U.S. at 102*). The court did not require that the NCAA prove its compensation rules, within the defined market, "increase competition in the economic sense of encouraging others to enter the market to offer the product at lower cost." *Smith, 593 F.2d at 1186*. It was enough for the NCAA to meet its Step Two burden that it could show (however feebly) a procompetitive effect in a collateral market.

Although the district court correctly applied our precedents, the result of this analysis seems to erode the very protections a Sherman Act plaintiff has the right to enforce. Here, Student-Athletes are quite clearly deprived of the fair value of their services. *Alston, 375 F. Supp. 3d at 1068*. As **[**75]** the district court found, while the NCAA and its conferences generate billions in revenue from college sports, they "have monopsony power to restrain student-athlete compensation in any way and at any time they wish, without any meaningful risk of diminishing their market dominance." *Id. at 1063, 1070*. Under the Rule of Reason analysis we affirm today, so long as the NCAA cites consumer demand for college sports, we allow it to artificially suppress competition for collegiate athletes' services by limiting their compensation. **[*1271]** Instead of requiring the NCAA to explain how those limits promote schools' competition for athletes, we leave Student-Athletes with little recourse under the antitrust laws. Student-Athletes are thus denied the freedom to compete and, in turn, "of compensation they would receive in the absence of the restraints." *Id. at 1068*.

Our Rule of Reason framework has shifted toward this cross-market analysis without direct consideration or a robust justification. It may be that scholars or litigants can develop a purely economic, mathematically-defensible method for cross-market analysis that does not depend on policy judgments that our antitrust laws never meant to delegate to the courts. But we **[**76]** do not currently have such a method, and it may equally be the case that no such method is possible or desirable.

Lacking a robust justification, I fear that our cross-market Rule of Reason analysis frustrates the very purpose of the antitrust laws, in this case to the great detriment of Student-Athletes. I hope our court will reconsider this issue in a case that squarely raises it.

3Shape Trios A/S v. Align Tech., Inc.

United States District Court for the District of Delaware

May 20, 2020, Decided; May 20, 2020, Filed

Opinion

REPORT AND RECOMMENDATION

This is an antitrust case. Plaintiff 3Shape TRIOS A/S ("3Shape" or "Plaintiff") filed suit against Defendant Align Technology, Inc. ("Defendant" or "Align") on August 28, 2018, alleging monopolization and attempted monopolization in violation of *Section 2 of the Sherman Act*, *15 U.S.C. § 2*. (D.I. 1.) The Court dismissed 3Shape's original complaint without prejudice on September 26, 2019. (D.I. 59, 62.) *No. 18-1332-LPS, 2019 U.S. Dist. LEXIS 165242, 2019 WL 4686614 (D. Del. Sept. 26, 2019)* (adopting Report and Recommendation, *2019 U.S. Dist. LEXIS 137982, 2019 WL 3824209 (D. Del. Aug. 15, 2019))*. 3Shape filed an amended complaint on October 28, 2019. (D.I. 63.) Pending before the Court **[*2]** is Align's motion to dismiss 3Shape's amended complaint for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)*. (D.I. 66.) Because 3Shape has plausibly alleged both anticompetitive conduct and relevant markets, I recommend that Align's motion be DENIED.

I. BACKGROUND[1]

Defendant Align is a Delaware corporation that sells Invisalign, a system of clear plastic aligners for straightening teeth. (D.I. 63 ¶¶ 1, 25-26.) Aligners are ordered through dental professionals, who prescribe them to patients with teeth misalignment. (*Id.* ¶¶ 8, 28.) Aligners are custom-made, which requires an accurate representation of the patient's upper and lower jaws, teeth, and bite. (*Id.*) A fast and accurate way to obtain an accurate image of the patient's full mouth is to scan it with a digital intraoral scanner. (*Id.*) With a scanner, a dental professional can scan a patient's full mouth, process and evaluate the scan through task-specific software, and submit the scan to aligner manufacturers. (*Id.* ¶ 151.) According to the amended complaint, digital scanners "are essential to dental professionals offering Clear Aligners to their patients and are essential to effective sales of Clear Aligners by dental professionals." (*Id.* ¶ 40.) **[*3]** Typically, a dental practice can only afford to own one scanner because it is a significant capital investment—not only are the scanners themselves expensive, but the accompanying software subscription can be several thousand dollars annually. (*Id.* ¶ 41.)

In addition to selling aligners, Align sells the iTero Element digital intraoral scanner, which it introduced in 2015. (*Id.* ¶¶ 3, 39.) The iTero Element was designed to send digital scans directly to Align for orders of Invisalign. (*Id.*) It cannot send scans to Align's competitors. (*Id.* ¶¶ 44-45.)

Plaintiff 3Shape is a Danish corporation that designs and manufactures dental equipment and software, including digital intraoral scanners. (*Id.* ¶¶ 24, 73.) 3Shape sells the TRIOS digital intraoral scanner, which "can be used for scanning, designing and ordering of clear aligners and a number of other orthodontic treatments or dental products." (*Id.* ¶ 73.)

In December 2015, Align and 3Shape entered into an interoperability agreement "under which the parties worked together to build an interface so that dental professionals could send TRIOS scans into Align's Invisalign work flow." (*Id.* ¶ 80.) Pursuant to the agreement, "3Shape was certified **[*4]** by Align to send digital scans from 3Shape's TRIOS to Align for Invisalign orders." (*Id.* ¶ 16.) The interoperability agreement permitted 3Shape to continue to provide scans to other aligner manufacturers. (*Id.* ¶ 85.) In December 2017, Align announced that it was unilaterally terminating the agreement with 3Shape with respect to Invisalign orders placed from the United States. (*Id.* ¶ 93.) Since the termination, which became effective in January 2018, Invisalign can no longer be ordered with scans sent directly from a TRIOS in the United States. (*Id.* ¶¶ 93-94.) In the rest of the world, where Align has a lower share in the aligner market, Align continues to accept scans sent from TRIOS scanners. (*Id.* ¶ 94.)

The amended complaint defines two markets relevant to 3Shape's antitrust claims. First, it alleges the existence of a relevant market in the United States for the manufacture and sale of "custom-manufactured removable dental aligners made of clear plastic that correct teeth misalignment." (*Id.* ¶¶ 1, 141-148.) According to the amended complaint, consumers do not view braces as reasonably interchangeable with aligners and the price of braces does not affect the price of aligners. (*Id.* ¶¶ 143, 147.) **[*5]** Aligners are removable, making them appropriate for sports, and they are more comfortable and require less time for treatment than braces. (*Id.* ¶¶ 143-144.) Unlike braces, which can only be prescribed by orthodontists, aligners can be prescribed by dentists. (*Id.* ¶ 145.) In addition, treatment with aligners requires fewer in-person office visits than with braces. (*Id.* ¶ 144.)

The amended complaint also alleges the existence of a relevant market in the United States for the manufacture and sale of "digital intraoral scanners used by dental professionals to generate full mouth scans for orthodontic treatment, including to order Clear Aligners." (*Id.* ¶ 150.) The amended complaint alleges that only two scanners on the market are "viable" for ordering aligners: Align's iTero and 3Shape's TRIOS. (*Id.* ¶¶ 8, 152.) It alleges that

[1] I assume the facts alleged in the amended complaint to be true for purposes of resolving this motion. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

scanners designed to scan individual teeth for crowns and local dental restorative work are not adequate substitutes because they are slower and less accurate. (*Id.* ¶¶ 158-165.) It further alleges that silicone molds are not adequate substitutes for generating dental representations because they are less accurate, more cumbersome, inconvenient, and unpleasant **[*6]** for the patient. (*Id.* ¶¶ 166-170.)

Align has significant shares in both the aligner and scanner markets. Align manufactures over 90 percent of the clear aligners sold in the United States and it has monopoly power in that market. (*Id.* ¶¶ 2, 26-27, 142, 182.) In 2017, Align's iTero scanner had approximately a 60 percent share in the scanner market (as defined above). (*Id.* ¶¶ 1, 155.) Following Align's termination of its agreement with 3Shape in 2017, the iTero's share of the scanner market has increased significantly. (*Id.* ¶¶ 155-156.)

Align has entered into several types of contracts with dental professionals and dental service organizations ("DSOs") that, 3Shape contends, operate to maintain and enhance Align's monopoly power in the aligner market and give rise to a dangerous probability that Align will acquire monopoly power in the scanner market. (*Id.* ¶¶ 11-12.) The first type includes Align's multi-year contracts with DSOs, including Heartland Dental and Aspen Dental. On July 25, 2018, Align announced a deal with Heartland Dental, the nation's largest DSO, to place iTero scanners in 90% of supported member dental offices by the end of 2018. (*Id.* ¶ 51.) That deal resulted in Heartland **[*7]** Dental's purchase of over 900 scanners. (*Id.*) That same day, Align announced a deal with Aspen Dental, the nation's largest branded DSO, to place iTero scanners in all of its locations. (*Id.* ¶ 53.) 3Shape submitted a bid for the Aspen Dental contract but was not selected because TRIOS scanners were not interoperable with Align's Invisalign system. (*Id.* ¶ 54.)

The second type of contract involves Align's Fusion Program. Launched in 2017, the program provides a significant discount on the iTero scanner to dental professionals who commit to ordering a certain number of Invisalign cases each year for three years. (*Id.* ¶¶ 56-57.) A dental professional who fails to meet the minimum cases is subject to penalties that "could total $10,000 over three years, or 30 percent or more of the cost of the iTero scanner." (*Id.* ¶¶ 58, 60.) According to the amended complaint, Align set the required number of cases in excess of the average dental professional's anticipated total number of aligner cases, "which forced the dental professionals to either stop sending cases to Align's competitors, or trigger penalties." (*Id.* ¶¶ 58-59.) Align offered the Fusion program to "major DSOs," and it resulted in a dramatic **[*8]** increase in sales of iTero scanners to DSOs and an increase in sales of Invisalign. (*Id.* ¶ 50.)

3Shape alleges that it could not compete with Align's Fusion Program offering. (*Id.* ¶ 64.) Although 3Shape's TRIOS and Align's iTero were sold at similar list prices, the Fusion program effectively made the iTero $10,000 cheaper. (*Id.*) While 3Shape could drop its pricing to compete with the lower price, it would cause 3Shape to forego nearly a third of its revenue. (*Id.*) According to 3Shape, the Fusion Program has foreclosed portions of both the aligner and scanner markets from competitors. (*Id.* ¶¶ 62-64.)

As a result of Align's arrangements with DSOs, DSO members are effectively locked into using iTero scanners and ordering Invisalign. (*Id.* ¶ 47.) 3Shape alleges that Align's sales of iTero scanners to DSOs have "increased dramatically" as a result of the DSO arrangements, and that they "have enabled Align to rapidly increase its market share" in the scanner market. (*Id.* ¶¶ 50, 55.) 3Shape further alleges that the DSO contracts have enabled Align to "maintain its monopoly" in the aligner market. (*Id.* ¶ 55.)

The third type of arrangement involves Align's Advantage Program. Under that program, **[*9]** dental professionals received discounts on Invisalign based on the total number of cases they submit. (*Id.* ¶¶ 65-66.) Dental professionals that submit the most cases receive the largest discounts. (*Id.*) Until recently, once a dental professional reached the highest discount level they would retain the same discount level moving forward. (*Id.* ¶ 67.) Align changed the program in 2018 so that dental professionals were offered discounts based solely on their sales for in the previous six months. (*Id.* ¶ 68.) Consequently, to achieve the highest discounts, dental professionals must consistently order from Align. (*Id.* ¶ 69.) These discounts, which can affect a dental professional's margins by 30 percent or more, are necessary for a dental professional to effectively compete with dental professionals who receive the discounts. (*Id.*) According to the amended complaint, "[t]he only way for dental professionals to achieve the highest discount levels is to purchase and use an iTero scanner." (*Id.* ¶ 70.)

3Shape alleges that "Align's conduct has harmed competition in both [the scanner and aligner] markets by, among other things, excluding rivals, increasing barriers to entry, and imposing costs on **[*10]** rivals." (*Id.* ¶ 140.) According to the amended complaint, "[t]his conduct has resulted in less consumer choice and higher consumer cost." (*Id.*) The amended complaint contains two counts: monopolization of the clear aligner market under *Section 2 of the Sherman Act*, *15 U.S.C. § 2* (Count 1); and attempted monopolization of the scanner market under *Section 2 of the Sherman Act* (Count 2). (*Id.* ¶¶ 174, 181.)

Align filed the pending motion to dismiss the amended complaint on November 12, 2019 (D.I. 66), and the parties completed the briefing on December 20, 2019. (D.I. 72.) Both parties requested oral argument (D.I. 73, 74), and I heard oral argument on February 13, 2020. ("Tr. __".)

II. LEGAL STANDARDS

A defendant may move to dismiss a complaint under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is plausible on its face when the complaint contains "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* A possibility of relief is not enough. *Id.* "Where a complaint pleads facts **[*11]** that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief.'" *Id.* (quoting *Twombly, 550 U.S. at 557*). In determining the sufficiency of the complaint under the plausibility standard, all "well-pleaded facts" are assumed to be true, but legal conclusions are not. *Id. at 679*.

"[W]hen the allegations in a complaint, however true, could not raise a claim of entitlement to relief, this basic deficiency should be exposed at the point of minimum expenditure of time and money by the parties and the court." *Twombly, 550 U.S. at 558* (internal marks omitted). "Antitrust claims in particular must be reviewed carefully at the pleading stage because false condemnation of competitive conduct threatens to 'chill the very conduct the antitrust laws are designed to protect.'" *In re Keurig Green Mt. Singleserve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 218 (S.D.N.Y. 2019)* (quoting *Verizon Commc'ns., Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 414, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004))*. However, the same *Twombly* plausibility standard applies. *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 98 (3d Cir. 2010)* ("[I]t is inappropriate to apply Twombly's plausibility standard with extra bite in antitrust and other complex cases.").

III. DISCUSSION

Section 2 of the Sherman Act, *15 U.S.C. § 2*, makes it unlawful to "monopolize" or "attempt to monopolize."[2] It does not prohibit monopolies. Indeed, the possession of monopoly power is not only legal, "it is an important **[*12]** element of the free-market system." *Trinko, 540 U.S. at 407* ("The opportunity to charge monopoly prices—at least for a short period—is what attracts 'business acumen' in the first place; it induces risk taking that produces innovation and economic growth.").

A *Section 2* plaintiff must therefore do more than just prove a monopoly. To succeed on a monopolization claim, the plaintiff must demonstrate both (1) the defendant's possession of monopoly power in a relevant market and (2) anticompetitive conduct. *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007)*. To establish

---

[2] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $100,000,000 if a corporation, or, if any other person, $1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court." *15 U.S.C. § 2*.

attempted monopolization, the plaintiff must show (1) anticompetitive conduct, (2) a specific intent to monopolize, and (3) a dangerous probability of achieving monopoly power in a relevant market. *Phila. Taxi Ass'n, Inc. v. Uber Techs., Inc., 886 F.3d 332, 339 (3d Cir. 2018)*. Both types of claims require "anticompetitive conduct." *See id. at 338* ("Anticompetitive conduct is the hallmark of an antitrust claim.").

A private plaintiff (as opposed to a government plaintiff) must also demonstrate that it has antitrust standing, that is, that the plaintiff suffered injuries caused by the defendant's anticompetitive conduct. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 281 (3d Cir. 2012)*.

Align argues that the amended complaint fails to plausibly allege anticompetitive conduct, monopoly power, and antitrust standing. I disagree.

A. Anticompetitive Conduct [*13]

Anticompetitive conduct is "generally defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits." *Broadcom, 501 F.3d at 308*. On the other hand, "[c]onduct that merely harms competitors, . . . while not harming the competitive process itself, is not anticompetitive." *Id.*; *W. Penn, 627 F.3d at 108* ("The line between anticompetitive conduct and vigorous competition is sometimes blurry, but distinguishing between the two is critical, because the *Sherman Act* 'directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself.'"). Accordingly, in order to be deemed exclusionary, a monopolist's conduct must have an anticompetitive effect on the market. *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*.

"'Anticompetitive conduct' can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties." *LePage's Inc. v. 3M, 324 F.3d 141, 152 (3d Cir. 2003)* (quoting *Caribbean Broad. Sys., Ltd. v. Cable & Wireless P.L.C., 148 F.3d 1080, 1087, 331 U.S. App. D.C. 226 (D.C. Cir.1998))*. Over the last century, however, courts have recognized various types of conduct that have the potential to harm competition. Examples of agreements that may constitute anticompetitive conduct under *Section 2* include exclusive dealing arrangements, *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)*, and tying **[*14]** agreements, *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 483, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Courts also recognize that deceptive or bad faith conduct can be anticompetitive. *See Broadcom, 501 F.3d at 314* (patentee's deception of a standards setting organization can be anticompetitive); *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) ("PRE")* (sham litigation can be anticompetitive).

Certain types of pricing behavior can also constitute anticompetitive conduct. For example, setting prices below one's costs can constitute anticompetitive predatory pricing (if other requirements are met). *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-23, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. The Third Circuit (but not the Supreme Court) has also held that offering bundled discounts can constitute anticompetitive conduct. *LePage's, 324 F.3d at 154-58*.

As explained in more detail below, there are legal rules that govern the application of each of these theories of anticompetitive conduct. Still, challenged conduct "may be susceptible to more than one court-defined category." *Viamedia, Inc. v. Comcast Corp., 951 F.3d 429, 453 (7th Cir. 2020)*. "At bottom, the purpose of identifying these categories of conduct is to help determine 'the presence or absence of harmful effects, which are both the reason for any antitrust concern and often the simplest element to disprove.'" *Id.* (quoting Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: *An Analysis of Antitrust Principles and Their Application* ¶ 1701d, at 33 (4th ed. 2015)).

Here, 3Shape **[*15]** alleges that Align has engaged in two types of monopolistic conduct recognized by the antitrust laws: (1) exclusive dealing; and (2) bundled discount arrangements.[3] The parties do not dispute that exclusive dealing arrangements and bundled discounts are cognizable theories of anticompetitive conduct. They dispute, however, whether 3Shape alleged enough facts to move forward on either theory. I conclude that it has.

1. Exclusive Dealing

3Shape contends that Align's agreements with DSOs and dental professionals constitute unlawful exclusive dealing arrangements. In an exclusive dealing arrangement, "a buyer agrees to purchase certain goods or services only from a particular seller for a certain period of time." *ZF Meritor, 696 F.3d at 270*. While an exclusive dealing claim requires a showing of an agreement between the buyer and seller, an express exclusivity provision is not necessary. *Id. at 282*. "*De facto* exclusive dealing claims are cognizable under the antitrust laws" where the effect of the agreement "in the real world" demonstrates that competitors are excluded from a substantial share of the relevant market. *ZF Meritor, 696 F.3d at 270-272, 282-83*.

Exclusive dealing arrangements are not *per se* illegal. Rather, due to their potentially procompetitive **[*16]** benefits, the legality of an exclusive arrangement is judged under the rule of reason. *Id. at 271*. Whether an arrangement is legal "depends on whether it will foreclose competition in such a substantial share of the relevant market so as to adversely affect competition." *ZF Meritor, 696 F.3d at 271*. There is no set formula for conducting the analysis, "but modern ***antitrust law*** generally requires a showing of significant market power by the defendant, . . . substantial foreclosure, . . . contracts of sufficient duration to prevent meaningful competition by rivals, . . . and an analysis of likely or actual anticompetitive effects considered in light of any procompetitive effects." *ZF Meritor, 696 F.3d at 271-72*.

I agree with 3Shape that its amended complaint plausibly alleges unlawful exclusive dealing in both markets. 3Shape alleges that Align has significant shares in both markets: 90 percent in the aligner market and 60 percent in the scanner market. (D.I. 63 ¶¶ 2, 26-27, 142, 155 182.) It further alleges that, as a result of the DSO arrangements, Align's sales of its iTero scanners to DSOs "increased dramatically" and that they "have enabled Align to rapidly increase its market share" in the scanner market. (*Id.* ¶¶ 50, 55.) And 3Shape alleges that **[*17]** the DSO arrangements have enabled Align to "maintain its monopoly" in the aligner market. (*Id.* ¶ 55.) 3Shape alleges that the DSO agreements with Heartland Dental and Aspen Dental are multi-year, *de facto* exclusive dealing contracts that essentially require members of the two largest DSOs in the United States to purchase their scanners from Align. (*Id.* ¶¶ 47-55.) It alleges that the result of the agreements is to lock DSO members into using iTero scanners and ordering Invisalign. (*Id.*) It further alleges that, in connection with its Fusion program, Align offered discounts on its iTero scanners to other DSOs in exchange for multi-year Invisalign order commitments that could only be met if participating dental professionals sent scans exclusively to Align for Invisalign, and not its competitors. (*Id.* ¶¶ 56-64.) 3Shape alleges that its own sales and market share have "fallen precipitously" as a result of Align's conduct. (Id. ¶ 136.) And it alleges that Align's conduct has likely and actual anticompetitive effects, including higher costs for consumers. (*Id.* ¶¶ 140, 177, 183.)

Align argues that the amended complaint fails to adequately allege "substantial foreclosure" of the relevant markets. **[*18]** (D.I. 67 at 9.) In particular, Align points out that the amended complaint lacks detail about the percentage of the market foreclosed to competitors. (*Id.*; Tr. 7:15-10:2) But the cases cited by Align do not stand for the proposition that such detail is required at the pleading stage. *See, e.g., Eisai Inc. v. Sanofi Aventis US, LLC, 821 F.3d 394 (3d Cir. 2016)* (summary judgment); *ZF Meritor, 696 F.3d 254* (trial); *Dentsply Int'l, 399 F.3d 181* (trial); *Barr Labs. v. Abbott Labs., 978 F.2d 98 (3d Cir. 1992)* (summary judgment); *Roxul USA, Inc. v. Armstrong World, Indus., Inc., No. 17-1258, 2019 U.S. Dist. LEXIS 37925, 2019 WL 1109868 (D. Del. Mar. 8, 2019)* (summary

---

[3] In this round of briefing, 3Shape does not contend that Align's other actions—its design of the iTero Element Scanner, its termination of the interoperability agreement with 3Shape in 2017, and its patent litigation—are independently anticompetitive. (D.I. 71 at 13-16; *see also* Tr. 22:4-7.) Rather, 3Shape argues that Align's other conduct has contributed to the overall exclusionary effect and evidences its intent to monopolize. (*Id.*)

judgment); *Insight Equity A.P. X, LP v. Transitions Optical, Inc., No. 10-635, 2016 U.S. Dist. LEXIS 85751, 2016 WL 3610155 (D. Del. July 1, 2016)* (summary judgment).[4] Viewing the amended complaint in its entirety and in the light most favorable to 3Shape, there is enough detail to make it plausible that the effect of the alleged exclusive dealing arrangements was to substantially foreclose competitors from the relevant markets. Whether the foreclosure was *in fact* "substantial" is a conclusion that does not need to be reached, and would be inappropriate to reach, at this stage of the litigation. That determination will ultimately require factual assessments and expert analyses that are inappropriate at the pleading stage.

I conclude that the amended complaint plausibly alleges unlawful exclusive dealing.

2. Bundled Discounts

3Shape also argues that Align's Fusion program—which provided significant discounts on Align's iTero scanner to dental professionals who **[*19]** committed to ordering a high number of Invisalign cases each year for three years—constitutes an unlawful bundled discount arrangement. I agree with 3Shape that the amended complaint plausibly alleges an anticompetitive bundled discount.

Price discounts are generally not anticompetitive. *Pac. Bell Tel. Co. v. linkLine Commc'ns, Inc., 555 U.S. 438, 451, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*; *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Philadelphia Taxi Ass'n, 886 F.3d at 340* ("It is well established that lower prices, as long as they are not predatory, benefit consumers—'regardless of how those prices are set.'" (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 340, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. But there are exceptions to the general rule. One exception is predatory pricing, which is when a monopolist prices its goods below cost in order to drive other competitors out of the market. Once its competitors have been eliminated, the monopolist raises its prices to supracompetitive levels. *Brooke Grp., 509 U.S. at 226*; *Cargill, Inc. v. Monfort of Colo., 479 U.S. 104, 121 n.17, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. To plead predatory pricing, an antitrust plaintiff must plausibly allege both (1) "that the prices complained of are below an appropriate measure of [the defendant's] costs"; and (2) that the defendant had "a dangerous probability[] of recouping its investment in below-cost prices." *Brooke Grp., 509 U.S. at 222-24*; *ZF Meritor, 696 F.3d at 272*.

The Third Circuit (but not the Supreme Court) has also recognized a bundled discount exception to the general rule protecting price discounts. **[*20]** A bundled discount is when a firm sells a bundle of goods for a lower price than the seller charges for the goods purchased individually. In *LePage's*, the Third Circuit held that bundled discounts can constitute anticompetitive conduct even when the predatory pricing test is not met (for example, because the goods are sold above cost). *324 F.3d at 154-157*. Under the *LePage's* standard, the antitrust plaintiff must show that the effect of the discounts is to "foreclose portions of the market to a potential competitor who does not manufacture an equally diverse group of products and who therefore cannot make a comparable offer."[5] *Id. at 155*.

---

[4] The only case cited by Align that dismissed an exclusive dealing claim at the pleading stage for failure to allege substantial foreclosure is *International Construction Products LLC v. Caterpillar Inc., C.A. No. 15-108, 2016 U.S. Dist. LEXIS 6826, 2016 WL 264909, at *4 (D. Del. Jan. 21, 2016)*. In that case, the court noted that "the factual allegations [in the complaint] pertaining to exclusive dealing [were] sparse" and that it "allege[d] no facts about the nature of the exclusive dealing arrangements and their potentially anticompetitive effects." *2016 U.S. Dist. LEXIS 6826, [WL] at *5-6*. That case does not stand for the proposition that a specific percentage of foreclosure must be alleged.

Here, 3Shape has alleged numerous facts about the nature of Align's arrangements with DSOs and has alleged facts regarding their exclusionary effects.

[5] The *LePage's* standard for bundled discounts has not been adopted by any other Circuit Court of Appeals, and it has not been expanded in the Third Circuit. *See* ***Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 894-903, 908-09 (9th Cir. 2008)*** (discussing the controversy over *LePage's*). The Third Circuit has instructed courts to interpret *LePage's* narrowly in light of more recent Supreme Court precedent. *See* *ZF Meritor, 696 F.3d at 274 n.11* (acknowledging the Supreme Court's recent emphasis on adherence to the predatory pricing test to assess the legality of price discounts).

In its motion to dismiss, Align argues that the amended complaint fails to plausibly allege that 3Shape was unable to make "a comparable offer" to Align's Fusion Program discount within the meaning of *LePage's*. According to Align, 3Shape must allege that it could not match the price of the iTero scanner if the aggregate Fusion program discount were allocated to the scanner. (D.I. 67 at 11; Tr. 18:14-19:20.) Align points out that the amended complaint does not contain that allegation and, on the contrary, acknowledges that "3Shape could . . . drop **[*21]** its TRIOS price to compete with [the Fusion program] price." (D.I. 63 ¶ 64.)

3Shape responds that it has adequately alleged its inability to make "a comparable offer" within the meaning of *LePage's* because it "does not manufacture an equally diverse group of products." *LePage's, 324 F.3d at 155*. 3Shape only sells scanners, not aligners. And it alleges that matching Align's Fusion program price on scanners would require 3Shape to forego a third of its revenue, whereas Align can make up for the discount from the sale of the additional Invisalign cases. (D.I. 63 ¶¶ 64, 137; Tr. 26:13-27:1)

The problem I am confronted with is that neither side adequately articulates what "a comparable offer" means, or how it is plausibly alleged in the Third Circuit at the pleading stage. It seems to me that 3Shape's articulation would allow an antitrust plaintiff who only sells one product to state a claim whenever a dominant seller provides a discount for ordering products in multiple lines. (D.I. 71 at 8; Tr. 29:3-13.) I am highly skeptical of that articulation since it does not require any consideration of the size of the discount. On the other hand, contrary to Align's argument, the Third Circuit in *LePage's* did not require **[*22]** a showing that the aggregate discount resulted in a below-cost price when allocated to a single product, nor did it require a showing that the plaintiff could not match the aggregate discount. *See generally* *LePage's, 324 F.3d at 175-76* (Greenberg dissenting) ("LePage's did not even attempt to show that it could not compete by calculating the discount that it would have had to provide in order to match the discounts offered by 3M through its bundled rebates . . . ."); *see also* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application*, ¶ 749d3 n.92 (4th ed. 2020).

The line must be somewhere in the middle. Under the circumstances here, where the amended complaint alleges not only that a defendant with market power offered a discount for purchasing products in multiple lines, but it also alleges facts supporting the allegation that the plaintiff "could not compete effectively" if it matched the aggregate discount applied to a single line (D.I. 63 ¶ 64), I think it states a plausible bundled discounting claim. I am not stating where I think the line for plausibly asserting a bundled discount claim exists, I am merely stating my conclusion that it has been crossed **[*23]** here.

The amended complaint also plausibly alleges facts suggesting that "portions of the [scanner] market" have been "foreclosed" to potential competitors. *LePage's, 324 F.3d at 155*. For example, the amended complaint alleges that 3Shape's scanner sales have "fallen precipitously as dental professionals have ceased purchasing the TRIOS scanner as they have been forced to turn instead to the iTero scanner," and that iTero sales have increased by 84 percent. (D.I. 63 ¶¶ 55, 136.)

Align again points out that the amended complaint fails to include details about the number of customers lost or the percentage of market foreclosure. However, the cases cited by Align do not support the proposition that such details are required at the pleading stage. *See, e.g.,* *Dentsply Int'l, 399 F.3d at 189 (3d Cir. 2005)* (trial); *Microsoft, 253 F.3d at 58* (same).

Here, viewing the amended complaint in its entirety and in the light most favorable to 3Shape, I agree with 3Shape that it plausibly alleges an exclusionary bundled discount arrangement.[6]

[6] Because I conclude that the amended complaint plausibly alleges anticompetitive conduct in connection with Align's DSO arrangements and its Fusion Program (which will result in the case moving forward), I do not address Align's argument that its Advantage Program does not constitute anticompetitive conduct. Align is free to re-raise at the summary judgment stage its arguments that the Advantage Program is not actionable anticompetitive conduct, either alone or in connection with its other conduct.

B. Monopoly Power in a Relevant Market

To succeed on a claim under *Section 2 of the Sherman Act*, the plaintiff must also demonstrate the defendant's possession of monopoly power in a relevant market (for a monopolization claim) or a dangerous probability of achieving **[*24]** monopoly power in a relevant market (for an attempted monopolization claim). *Dentsply, 399 F.3d at 186-87*; *Phila. Taxi Ass'n, 886 F.3d at 339*. Align argues that 3Shape failed to plausibly allege relevant scanner and aligner markets in which Align has monopoly power or a dangerous probability of achieving it. I disagree.

The Supreme Court has defined monopoly power as "the power to control prices or exclude competition." *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* (quoting *United States v. E. I. du Pont De Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. The existence of monopoly power in a relevant market may be proven "through direct evidence of supracompetitive prices and restricted output." *Broadcom, 501 F.3d at 307*. Alternatively, monopoly power may be inferred from indirect evidence, where the plaintiff shows that a defendant "has a dominant share in a relevant market, and that significant 'entry barriers' protect that market." *Broadcom, 501 F.3d at 307* (citing *Harrison Aire, Inc. v. Aerostar Int'l, Inc., 423 F.3d 374, 380-81 (3d Cir. 2005))*.

Section 2 plaintiffs who take the indirect route bear the burden of defining a "relevant market." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*. "Competing products are in the same market if they are readily substitutable for one another; a market's outer boundaries are determined by the reasonable interchangeability of use between a product and its substitute, or by their cross-elasticity of demand." *Broadcom, 501 F.3d at 308*.

The plaintiff must adequately allege a proposed relevant market in its complaint. *Id.*; *see also* *Queen City Pizza, 124 F.3d at 436*. A complaint **[*25]** may be dismissed for failure to plead a relevant market where the plaintiff "fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand." *Queen City Pizza, 124 F.3d at 436*. A complaint is also legally insufficient and subject to dismissal where the "proposed relevant market . . . clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor." *Id.* However, in general, the determination of a relevant market is a "complex and fact-intensive inquiry." *Philadelphia Taxi Ass'n, 886 F.3d at 341-42*. Accordingly, courts should deny motions to dismiss unless "the alleged market makes 'no economic sense under any set of facts.'" *PepsiCo, Inc. v. Coca—Cola Co., No. 98-3282, 1998 U.S. Dist. LEXIS 13440, 1998 WL 547088, at *6 (S.D.N.Y. Aug. 27, 1998)*. "Absent an inherently implausible market allegation, the question must be resolved on the facts and economic realities of the case." *Id.*

Align challenges 3Shape's proposed scanner and aligner market definitions on the basis of their product scopes as well as their geographic scopes. Align first argues that 3Shape's scanner and aligner market definitions both improperly define the geographic market as the United States. According to Align, the amended complaint "reveals nothing **[*26]** about why demand conditions are bounded at the United States and not more narrowly or broadly." (D.I. 72 at 6.) I disagree.

The amended complaint alleges that Align sells its products in all fifty states. (D.I. 63 ¶¶ 159, 173.) That is a plausible reason why the geographic markets should not be defined any smaller. The amended complaint also alleges facts making it plausible that the geographic markets should not be defined any larger, namely, differences in the United States markets arising from the fact that Align only terminated interoperability with the TRIOS scanner in the United States and not elsewhere. (*Id.* ¶¶ 93-94.) And there is no reason to think that 3Shape is attempting to gerrymander a geographic market, as was the situation in the case cited by Align. *See* *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 726 (3d Cir. 1991)* (rejecting "an oddly configured" geographic market "stretching 6.36 miles east, 7 miles west, 11.45 miles north and 10 miles south"). Taking the allegations in the amended complaint as true, I cannot conclude that 3Shape's geographic market definitions are inherently implausible.

Align also challenges both the scanner and aligner product market definitions. As for scanners, Align argues that 3Shape's market definition **[*27]** is too narrow. I conclude that the definition of the scanner market in 3Shape's amended complaint is not inherently implausible.

The amended complaint defines the scanner market as "the market for digital intraoral scanners used by dental professionals to generate full mouth scans to order [clear] aligners." (*Id.* ¶ 1.) It alleges that silicone molds are not adequate substitutes for scanners, for example, because they are inconvenient and unpleasant to for the patient. (*Id.* ¶¶ 166-170.) The amended complaint also alleges that scanners designed to scan individual teeth for crowns and local dental restorative work are not adequate substitutes, for example, because they are slower and less accurate. (*Id.* ¶¶ 158-165.) Those allegations describing the differences between the market as alleged and potential substitutes are sufficient to survive a motion to dismiss, particularly since defining the relevant market is a "fact-intensive inquiry." *Philadelphia Taxi Ass'n, 886 F.3d at 341-42*.

3Shape also argues that Align fails to sufficiently allege a relevant market for aligners. 3Shape contends that the amended complaint "does not allege facts that would enable the Court to conclude that traditional braces do not substitute for clear aligners." **[*28]** (D.I. 72 at 6.) I disagree.

It is not inherently implausible that there is a relevant market for aligners. The amended complaint defines the aligner market as "the market for custom-manufactured removable dental aligners made of clear plastic that correct teeth misalignment." (D.I. 63 ¶ 1.) It alleges that "[c]ustomers do not see Clear Aligners as reasonably interchangeable with traditional metal braces" and that "cross-elasticity of demand is not present between Clear Aligners and metal braces." (*Id.* ¶¶ 143, 147.) And it sets forth reasons why that is so, for example, because aligners cause less discomfort and require less time for treatment. (*Id.* ¶¶ 143-148.) Those allegations are sufficient to survive a motion to dismiss.[7]

IV. CONCLUSION

For the reasons set forth above, I recommend that Align's motion be DENIED. Align is, of course, free to re-raise all of its defenses at the summary judgment stage.

This Report and Recommendation is filed pursuant to *28 U.S.C. § 636(b)(1)(B)*,*(C)*, *Federal Rule of Civil Procedure 72(b)(1)*, and *District of Delaware Local Rule 72.1*. Any objections to the Report and Recommendation shall be filed within fourteen days and limited to ten pages. Any response shall be filed within fourteen days thereafter and limited

---

[7] Align also argues, in a footnote, that 3Shape lacks antitrust standing to assert its claim that Align monopolized the aligner market. (D.I. 67 at 19 n.12.) To establish antitrust standing, a plaintiff must show that it has suffered an "antitrust injury"—that is, an "'injury of the type the antitrust laws were intended to prevent and that flows from that which makes [the] defendants' acts unlawful.'" *Ethypharm S.A. France v. Abbott Labs., 707 F.3d 223, 233 (3d Cir. 2013)* (alteration in original) (quoting *Brunswick Corp., 429 U.S. at 489*). Typically, only consumers and competitors in the restrained market have antitrust standing. *See W. Penn, 627 F.3d at 102*. A plaintiff may also have antitrust standing when its "injuries are the means by which the defendant[] seek[s] to achieve [its] anticompetitive ends." *Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 172* (quoting *W. Penn, 627 F.3d at 102*).

Antitrust standing is a prudential limitation rather than a jurisdictional requirement. *Ethypharm, 707 F.3d at 232*. As such, antitrust standing "is more properly viewed as an element of an antitrust claim" that can be resolved at a later stage of the case. *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 164 (3d Cir. 2017)*.

Align does not challenge 3Shape's standing with respect to the scanner market, but it points out that 3Shape is neither a competitor nor a consumer in the aligner market. Having reviewed the complaint in its entirety, I find that 3Shape has plausibly alleged that the injuries it suffered to its scanner business as a result of Align's conduct were the means by which Align sought to maintain its monopoly in the aligner market. I conclude, therefore, that 3Shape has adequately pleaded antitrust standing at this stage. Align is free to re-raise its antitrust standing arguments at the summary judgment stage.

to ten pages. The failure **[*29]** of a party to object to legal conclusions may result in the loss of the right to *de novo* review in the district court.

The parties are directed to the Court's "Standing Order for Objections Filed Under *Fed. R. Civ. P. 72*," dated October 9, 2013, a copy of which can be found on the Court's website.

Opinion by: ROBERT C. JONES

Opinion

ORDER

Defendants move to dismiss, alleging failure to state a claim and other defenses. Additionally, Defendant Northeastern Nevada Regional Hospital ("NNRH") moves to strike portions of the complaint. Finally, Plaintiffs move for leave to file an amended complaint. First, the Court finds that leave to amend would be futile, and therefore denies Plaintiffs' motion. Proceeding to the motions to dismiss, the Court finds the complaint facially insufficient and consequently dismisses it with leave to amend. Because the Court dismisses the complaint, **[*2]** it denies the motion to strike as moot.

FACTUAL BACKGROUND

The allegations in the complaint are as follows: Plaintiffs provide home health care and hospice service in and around Elko, Nevada. Defendants include a hospital, other home health care and hospice service providers, and individuals. Defendant NNRH is the dominant hospital in Elko and has used this market dominance to "steer" patients to the hospice Defendants, which are direct competitors of Plaintiffs. This steering is accomplished through referrals of discharged patients and providing only the contact information for hospice Defendants in publications. Defendant NNRH refuses to refer patients to Plaintiffs or to put Plaintiffs' contact information in the community publications despite repeated request and complaints. Such steering conduct renders Plaintiffs unable to compete in the hospice market for Elko.[1] Presently, Plaintiffs bring this suit against Defendants, claiming antitrust injuries and unjust enrichment.

LEGAL STANDARD

Fed. R. Civ. P. 8(a)(2) requires that a complaint contain "a short and plain statement of the claim showing that the pleader is entitled to relief." This pleading standard "does not require 'detailed factual allegations,' **[*3]** but demands more than . . . 'labels and conclusions' or 'formulaic recitations of the elements of a cause of action." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). Plausibility is satisfied where the pleaded factual content "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. Plausibility does not require a demonstration of probability, but "asks for more than a sheer possibility." *Id.*

Further, "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions." *Id.* Consequently, while the Court "accept[s] all material allegations in the complaint as true and construe[d] . . . in the light most favorable to" the nonmoving party, *NL Indus. v. Kaplan, 792 F.2d 896, 898 (9th Cir. 1986)*, it is not required to "accept as true allegations that contradict matters properly subject to judicial notice or by exhibit," *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*. Nor is it required to accept "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *Id.*

ANALYSIS

Prior to engaging in the analysis **[*4]** of the merits, the Court notes that an issue of subject-matter jurisdiction must be addressed, despite there being no objection by Defendants. *See* *Louisville & Nashville R.R. Co. v. Motley, 211 U.S. 149, 152 (1908)* (noting that it is the duty of a federal court to ensure that its jurisdiction granted by statute is not exceeded). Plaintiffs argue that this Court has subject-matter jurisdiction under both *28 U.S.C. § 1331* and *§ 1332* (among other statutes not at issue here). The issue here is with the claim of jurisdiction under *28 U.S.C. § 1332*.

First, Plaintiffs claim jurisdiction under *§ 1332(d)*, which is restricted to class actions. Plaintiffs' complaint does not identify this suit as a class action, nor does it identify a proposed class of plaintiffs. However, even if the "(d)" is in error, the requirements for diversity jurisdiction under *§ 1332*, generally, are not met. Plaintiffs allege that "diversity exists, and the amount in controversy exceeds $10 million," (ECF No. 1 at ¶ 25), but review of the named parties

---

[1] Plaintiffs' complaint includes a significant number of paragraphs discussing incidents of patient care, alleged violations of Medicare and Nevada licensing statutes, and multiple other allegations that are not relevant to either antitrust or unjust enrichment claims. Due to this lack of relevance, the Court declines to include those allegations in its recitation of the facts.

show only corporations with their principal place of business in Nevada or individuals domiciled in Nevada. (*Id.* at ¶¶ 13-23.)[2] Therefore, any jurisdiction of this Court may only arise from the presence of a federal question.

I. Motion for Leave to File an Amended Complaint (ECF No. 108)

Plaintiffs **[*5]** move for leave to file an amended complaint under *Fed. R. Civ. P. 15(a)(2)*. (ECF No. 108.) As granting Plaintiffs' motion would void the original complaint, and all of Defendants' motions associated with it, the Court must address Plaintiffs' motion prior to ruling on the other motions. Plaintiffs note the original complaint was prepared by the parties *in propria persona*, and the purpose of the amended complaint is to "clarify their claims and allegations." (*Id.*) Plaintiffs further note that "[t]here has been no undue delay, no bad faith, and no dilatory motive on the part of [Plaintiffs.]" (*Id.*) Defendants oppose the motion, claiming that amendment would be futile. (ECF Nos. 110 and 111.) The Court agrees, and therefore denies the motion.

"A motion for leave to amend may be denied if it appears to be futile or legally insufficient." *Miller v. Rykoff-Sexton, Inc., 845 F.2d 209, 214 (9th Cir. 1988)* (citing *Gabrielson v. Montgomery Ward & Co., 785 F.2d 762, 766 (9th Cir. 1986))*. In considering futility, the Court applies an analysis identical to that used for Rule 12(b)(6) motions. *Miller, 845 F.2d at 214*.

As discussed in greater detail below, Plaintiffs' antitrust claims are deficient in multiple aspects. Of those deficiencies, the only one Plaintiffs attempt to correct is the lack of interstate commerce or substantial effect on interstate commerce. However, the mere addition **[*6]** of the fact that Defendant NNRH treats patients from Oregon and Utah, (*see, e.g.*, ECF No. 108 Ex. 1 at ¶ 33), does not in any way address the question of whether the *hospice care* is itself participating in or substantially affecting interstate commerce. Thus, even under the amended complaint, Plaintiffs' federal antitrust claims fail as a matter of law.

Plaintiffs' amended complaint correctly identifies the Nevada statutes regarding antitrust actions and also brings two additional state-law claims that were not in the original complaint: business disparagement and intentional interference with prospective economic advantage and/or contractual relationship. However, as discussed above, Plaintiffs have not alleged the presence of any diverse parties, therefore this Court has no diversity jurisdiction under *28 U.S.C. § 1332*. As the Court finds the federal antitrust claims facially insufficient, there are no remaining federal claims that would allow for supplemental jurisdiction under *28 U.S.C. § 1367*. Accordingly, there are no claims in the amended complaint over which this Court has jurisdiction and amendment would therefore be futile. Consequently, the Court denies the motion for leave to file amended complaint and **[*7]** proceeds to the motions to dismiss filed in connection with the original complaint.

II. Motions to Dismiss (ECF Nos. 28, 46, 60, 85, and 103)

Plaintiffs' claims can be organized into three categories: federal antitrust claims under the Sherman Act, state antitrust claims, and a state claim for unjust enrichment. The Court addresses each of these categories in turn and, finding the complaint facially insufficient, dismisses the complaint with leave to amend.[3]

a. Federal Antitrust Claims Generally

---

[2] Even if the Court were to consider the parties alleged in the proposed amended complaint, the analysis would not change. (ECF No. 108 Ex. 1 at ¶¶ 1-15.)

[3] Because the Court dismisses Plaintiffs' complaint in its entirety for failure to state a claim, Defendant NNRH's motion to strike (ECF No. 45) and Defendant Highland Manor's Rule 12(b)(4-5) arguments are moot. Thus, the Court denies them without prejudice.

To bring a claim under the Sherman Act, a plaintiff must demonstrate that the allegedly unlawful conduct either occurred in interstate commerce, *Yellow Cab Co. of Nev. v. Cab Emp'rs, Auto. and Warehousemen, Local No. 881, 457 F.2d 1032, 1034 (9th Cir. 1972)*, or had a substantial effect on interstate commerce, *id. at 1035 n.2*. In the instant case, Plaintiffs allege the Sherman Act applies because "Defendants employed various [interstate] devices to commit illegal acts described herein," and that "Defendants' complained-of activities occurred within the stream of, and have substantially affected, state and interstate commerce." (ECF No. 1 at ¶ 27.)[4]

However, Plaintiffs do not provide any factual allegations to support those legal conclusions. In fact, Plaintiffs have explicitly described the relevant market as "a market **[*8]** for hospice care which benefits patients that comprise the geographic region of Nevada and specifically the region surrounding Elko, Nevada (or smaller geographic markets therein)." (*Id.* at ¶ 234.) Plaintiffs' description of the results of that conduct further undercuts their argument that the allegedly unlawful conduct substantially affects interstate commerce. (*See, e.g.*, ECF No. 1 at ¶ 8 ("This scheme lets Defendants pocket or re-capture a substantial percentage of the home health care and hospice care business in Elko, Nevada.").) Thus, there is not, and cannot be, a dispute over whether Defendants' conduct substantially affected interstate commerce because Plaintiffs have provided only "formulaic recitations of a cause of action," *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*), insufficient to "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Twombly, 550 U.S. at 555* (omission in original) (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*.

Nevertheless, Plaintiffs argue that the Court should allow discovery and litigate "the issue of jurisdiction . . . once discovery and the facts ha[ve] been solidified by depositions and other discovery." (ECF No. 80 at 26; *see also* ECF No. 100 at 2 ("In fact, every case the Defendants cite had **[*9]** extensive discovery conducted before the courts entertained the question of whether the Plaintiffs have met their burden of proof on the jurisdictional question of interstate commerce.").) Yet, the high cost of discovery, especially in antitrust cases, was the genesis for the *Twombly* ruling. *550 U.S. at 558* ("[I]t is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive.") (internal citation omitted). Consequently, "it is only by taking care to require allegations that reach the level suggesting [valid antitrust claims] that we can hope to avoid the potentially enormous expense of discovery." *Id. at 559*.

To support the argument that their complaint is sufficient to withstand a motion to dismiss, Plaintiffs point to *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)*, which stated that "'liability may be established by proof of either an unlawful purpose or an anticompetitive effect' . . . . Thus, respondent need not allege, or prove, an actual effect on interstate commerce to support federal jurisdiction." *Id. at 330-331* (quoting *McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 243, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980))*. Plaintiffs misplace reliance on *Pinhas*, however, as it was "undisputed" that the defendant in *Pinhas* "unquestionably engaged **[*10]** in interstate commerce." *500 U.S. at 329*. Further, the market in *Pinhas* was the "provision of [specific in-hospital] services . . . [which] are regularly performed for out-of-state patients and generate revenues from out-of-state sources" and are important to "the entire operation of the hospital." *Id. at 329-330*. In the instant case, as discussed above, the relevant market is in-home hospice care, and the complaint lacks allegations that Defendants (or Plaintiffs, for that matter) provide such services in interstate commerce. Therefore, *Pinhas* is inapposite.

Furthermore, the failure to demonstrate interstate commerce, or substantial effect on the same, is not the only legal defect in Plaintiffs' complaint. As has been repeatedly noted, "[t]he antitrust laws . . . were enacted for 'the protection of *competition* not competitors.'" *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (emphasis added) (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320,*

[4] These vague assertions evince another deficiency that pervades the complaint in that it does not allege facts sufficient to show how this claim applies to *every* Defendant. Plaintiffs attempt to assert all of the causes of action against all Defendants, but, for example, there is no allegation mentioning Defendant Iguban anywhere in the complaint except in the caption and in Paragraph 20, which only states that he resides and does business in Elko, Nevada.

82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)). Explicitly excluded from that category are "claim[s] to profits that would have been earned" in the absence of the alleged anti-competitive conduct. Brunswick Corp., 429 U.S. at 490.

Yet, these are precisely the allegations made by Plaintiffs. (*See, e.g.*, ECF No. 1 at ¶ 34 ("Steering—*and the competition from lower-priced healthcare providers that steering animates*— threatens Plaintiff's [sic] **[*11]** revenues.") (emphasis added).) In fact, the conduct described by Plaintiffs seem to *benefit* consumers, not harm them. (*See, e.g.*, *id.* at ¶ 33 ("The ability of NNRH to steer gave [Defendants] a decided market advantage as those organizations did not have to advertise or otherwise seek new patients, *which in turn reduced their costs* and provided a market edge to them that was not provided to the Plaintiffs.") (emphasis added); *id.* at ¶ 35 ("NNRH steered patients to Defendants . . . and away from Plaintiff's [sic] *to the detriment and loss of the Plaintiffs*.") (emphasis added); ECF No. 113 at 4:20-22 ("Plaintiffs have been harmed by this [conduct] because they have lost patients based upon this activity, and the Plaintiffs have decreased revenue as a result of the activity in question").) Thus, Plaintiffs only allege Defendants' actions harmed *them*—not *competition*—contravening well-settled ***antitrust law***.

In sum, Plaintiffs have not alleged facts sufficient to show that any Defendant's actions were in or substantially affected interstate commerce, or that they harmed competition. Therefore, Plaintiffs' federal antitrust claims are facially invalid, and the Court dismisses them accordingly. **[*12]**

b. Federal Antitrust Claims in Regard to Defendant NNRH

In addition to the general objections brought by various Defendants, Defendant NNRH makes several objections that apply solely to the claims against it. Defendant argues that, aside from the other deficiencies in Plaintiffs' antitrust claims, Plaintiffs fail to allege a conspiracy, as required under Section 1, and that Defendant is a market participant, as required under Section 2. Both arguments are correct.

It is well-settled law that "[t]he conduct of a single [entity] is governed by § 2 alone and is unlawful only when it threatens actual monopolization." Copperweld Corp. v Independence Tube Corp., 467 U.S. 752, 767, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984). That is, Section 1 requires "a 'contract, combination . . . or conspiracy' between *separate* entities. It does not reach conduct that is 'wholly unilateral.'" Id. at 768 (emphasis in original) (first quoting 15 U.S.C. § 1, then quoting Albrecht v. Herald Co., 390 U.S. 145, 149, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)). The sole allegations in the complaint that there is any sort of agreement or conspiracy are the grammatically incorrect phrase "Between NNRH steering patients to Defendants . . . because of the increased patient volume that accompanies steering, as well as alleged kickbacks from Defendants," (ECF No. 1 at ¶ 36), and the phrase "Defendants continue to improperly steer patients away from Plaintiffs **[*13]** and into their own pockets," (*id.* at ¶ 73). The inclusion of the words "alleged kickbacks" and vague allegations are not sufficient to find a properly alleged conspiracy in light of the multiple allegations that appear to demonstrate that Defendant NNRH's conduct is unilateral in nature. (*See, e.g.*, ECF No. 1 at ¶¶ 1-5, 35.)

As to Plaintiffs' Section 2 claims, "[t]he requirement that the alleged injury be related to anti-competitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors." Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1470 (9th Cir. 1985). Plaintiffs identify the relevant market as "the market for hospice care which benefits patients." (ECF No. 1 at ¶ 234.) As a hospital, Defendant NNRH is not involved in the market for hospice care other than the fact that patients discharged from the hospital sometimes engage hospice care providers. That is simply not enough to label Defendant NNRH as a "market participant."

c. State Antitrust Claims

Four of Plaintiffs' nine counts claim antitrust abuses in violation of "Nevada common law." However, antitrust actions are governed by Nevada statute, not common law. *See* NRS 598A.010, et seq. Specifically, private antitrust actions are governed by NRS 598A.210. Therefore, Plaintiffs' **[*14]** state antitrust claims are facially invalid, and the Court dismisses them accordingly. Furthermore, as discussed above, correctly identifying the statutes which provide a cause of action does not remedy the jurisdictional issue created by the lack of diversity or the lack of standing provided by the federal antitrust statutes.

d. Unjust Enrichment

Under Nevada law, "[u]njust enrichment exists when the plaintiff confers a benefit on the defendant, the defendant appreciates such benefit, and there is 'acceptance and retention by the defendant of such benefit under circumstances such that it would be inequitable for him to retain the benefit without payment of the value thereof.'" *Certified Fire Prot. V. Precision Constr., 128 Nev. 371, 283 P.3d 250, 257 (Nev. 2012)* (quoting *Unionamerica Mtg. v. McDonald, 97 Nev. 210, 626 P.2d 1272, 1273 (Nev. 1981))*. Here, Plaintiffs allege that "Defendants have knowingly received and retained wrongful benefits in multiple forms," (ECF No. 1 at ¶ 294), but do not provide any factual description of benefits "conferred by" Plaintiffs. Instead, the "benefits" Plaintiffs appear to allege are unlawfully withheld are the "financial benefits" that Plaintiffs would have derived from referrals if not for the unlawful conduct. (*Id.* at ¶ 298.) Such financial benefits are not those envisioned by the doctrine of unjust enrichment. **[*15]** Accordingly, the Court dismisses Plaintiffs' claim of unjust enrichment.

e. Leave to Amend

Upon granting a motion to dismiss, a court must then determine whether to allow leave to amend the complaint. Leave to amend should be granted unless "amendment would be futile." *DeSoto v. Yellow Freight Sys., Inc., 957 F.2d 655, 658 (9th Cir. 1992)* (citing *Reddy v. Litton Indus., 912 F.2d 291, 296 (9th Cir. 1990))*. That is, dismissal without leave to amend is appropriate only where "the court determines that the allegation of other facts consistent with the challenged pleading could not possibly cure the deficiency." *Schreiber Distrib. Co. v. Serv-Well Furniture Co., Inc., 806 F.2d 1393, 1401 (9th Cir. 1986)* (citing *Bonanno v. Thomas, 309 F.2d 320, 322 (9th Cir. 1962))*. Here, the Court cannot find that amendment would be futile, therefore dismisses Plaintiffs' complaint with leave to amend.[5]

CONCLUSION

IT IS HEREBY ORDERED that Defendants' Motions to Dismiss (ECF Nos. 28, 46, 60, 85, and 103) are GRANTED.

IT IS FURTHER ORDERED that Plaintiffs' Complaint (ECF No. 1) is DISMISSED WITH LEAVE TO AMEND.

IT IS FURTHER ORDERED that Plaintiffs have thirty days from the date of this Order to file an amended complaint. If Plaintiffs decline to file an amended complaint, the Clerk shall enter judgment and close the case.

IT IS FURTHER ORDERED that Plaintiffs' Motion for Leave to File an Amended Complaint (ECF No. 108) **[*16]** is DENIED.

IT IS FURTHER ORDERED that Defendant's Motion to Strike (ECF No. 45) is DENIED AS MOOT.

IT IS SO ORDERED.

---

[5] In the event Plaintiffs choose to file an amended complaint, the Court refers counsel to LR IA 10-1, LR 7-2, and LR 7-3 for use in their litigation before this Court. Furthermore, the Court notes that the practice of simply copying and pasting paragraphs from a complaint into a responsive filing does not actually constitute argument or rebuttal of the relevant motion. *See, e.g.*, *Aubrecht v. Penn. State Police, 389 Fed. App'x 189, 192-93 (3d Cir. 2010)*. Indeed, such a "copy-and-paste approach to briefing . . . 'is inexcusable for a counseled complaint.'" *Dama v. Prudential Ins. Co. of Am., No. 18-CV-03104, 2018 U.S. Dist. LEXIS 215738, 2018 WL 6706314, at *2 n.3 (E.D.N.Y. Dec. 20, 2018)* (quoting *Lowe v. Planning & Zoning Comm'n of Town of Mansfield, No. 3:16-CV-381, 2018 U.S. Dist. LEXIS 4842, 2018 WL 379010, at *4 n.3 (D. Conn. Jan. 10, 2018)*).

Opinion

ORDER DENYING MOTION TO DISMISS

This matter is before the Court on Defendants' Motion to Dismiss, filed December 30, 2019 (CM/ECF Document 10), Plaintiffs' Response, filed February 4, 2020 (Doc. 25), and Defendants' Reply, filed February 14, 2020 (Doc. 30). Having reviewed the pleadings, applicable law, and being otherwise fully informed in the premises, the Court FINDS and ORDERS as follows.

BACKGROUND

This case arises from a dispute over Defendants' alleged antitrust violations in relation to their acquisition and leasing of minerals in the Codell and Niobrara formations, located in east Laramie County, Wyoming. For the **[*5]** purpose of this motion, the Court assumes as true the factual allegations made in the Complaint. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

According to the Complaint, Plaintiffs are owners of several thousand acres of land and mineral rights in various areas of east Laramie County. Defendant Anadarko Land Corp ("Land Corp"), a subsidiary of Anadarko, also owns several thousand acres of land in the area, including fee mineral interests that it acquired from Union Pacific Land Resources Corporation ("Union Pacific"). Union Pacific originally acquired the land now owned by Land Corp through federal land grants during the development of the railroad. To foster railroad development, the federal government granted Union Pacific the alternating odd-numbered square-mile sections along the railroad corridor, creating a "checkerboard" pattern of land ownership. Land Corp owns interests in the odd-numbered sections formerly belonging to Union Pacific, while Plaintiffs own interests in the neighboring even-numbered and certain odd-numbered sections.

At some point not specified in the Complaint, Anadarko's subsidiary, Anadarko E&P Onshore ("E&P Onshore"), leased Land Corp's mineral rights in the Codell and Niobrara mineral formations and **[*6]** obtained from the Wyoming Oil and Gas Conservation Commission ("WOGCC") approximately 2,200 permits to drill oil and gas wells. E&P Onshore's permits authorize it to drill the maximum number of allowable wells under WOGCC regulations in the odd-numbered sections of the checkerboard owned by Land Corp. All of E&P Onshore's permits are for two-mile horizontal wells, which involve drilling vertically to a certain depth, then drilling horizontally for a distance of two miles. According to Plaintiffs, each permit grants E&P Onshore "the exclusive right to conduct (or not conduct) horizontal oil and gas drilling for two square miles." This right encompasses the minerals in the odd-numbered sections where Land Corp holds an interest. It also extends to embrace the even-numbered sections owned by Plaintiffs, as those sections are included in the drilling unit for each two-mile horizontal well.

Plaintiffs' Complaint, filed November 25, 2019, factually asserts that E&P Onshore's acquisition of drilling permits, along with the leases executed between Land Corp and E&P Onshore (together "Anadarko" or "Defendants"), give rise to an unlawful monopoly in Anadarko for the exploration and production **[*7]** and oil and gas leasing in the Niobrara and Codell Formations. Plaintiffs assert that Anadarko has not drilled a well in the area since 2013 and that it has no plans to do so. Plaintiffs also allege that, to the extent Anadarko's permits are exclusive under Wyoming law, Anadarko's possession of permits to drill in all permissible areas prevents other operators from drilling a well to extract Plaintiffs' minerals. Finally, Plaintiffs allege that Land Corp leased its minerals to Onshore at an above-market, noncompetitive royalty rate of 30%. Plaintiffs assert that the excessive royalty to Land Corp would render drilling unprofitable to Anadarko unless Anadarko leased Plaintiffs' minerals at a royalty rate below market value. Even if another operator acquired permits in the area, drilling would be unprofitable due to the high royalties to which Anadarko would be entitled, according to Plaintiffs.[1]

Ultimately, Plaintiffs' alleged injury derives from Anadarko's acquisition and maintenance of exclusive permits to drill in the area, as well as Anadarko's execution of "supracompetitive" lease terms, as this conduct by Anadarko has prevented competing operators from seeking **[*8]** permits from WOGCC or leases from Plaintiffs. Plaintiffs further assert that, were Anadarko itself ever to lease Plaintiffs' minerals, Anadarko would necessarily offer Plaintiffs less than fair-market royalties, given the excessive royalties reserved for Land Corp under the terms of the intracompany leases.

Legally, Plaintiffs' Complaint first alleges that Defendants have created an unlawful monopoly in violation of *§ 2* of the *Sherman Act* by executing collusive leases that misappropriate, convert, and arrogate the value of Plaintiffs' mineral rights (Count One: *Sherman Act § 2*, Monopolization). Second, the Complaint alleges that even if Defendants have not succeeded in creating the alleged monopoly, they attempted to do so in violation of *§ 2* of the *Sherman Act*. (Count Two: *Sherman Act § 2*, Attempted Monopolization). Third, the Complaint alleges that Defendants violated *Wyoming Statute § 40-4-101* by making, entering into, forming, and becoming a party to a "plan, contract, agreement, and combination to prevent competition and to control or influence production and prices thereof through the acquisition of drilling permits and the execution of collusive leases." (Count Three:

---

[1] Plaintiffs do not explicitly state whether, or through what contractual, legal or procedural mechanism, competing operators would be obligated to assume royalty payments of 30% to Land Corp if another operator was permitted to develop the unit and pooled Anadarko's interest. However, at the stage of a motion to dismiss, the Court is obligated to indulge all reasonable inferences in Plaintiffs' favor. *See, e.g., Swanson v. Bixler, 750 F.2d 810, 813 (10th Cir. 1984)*. Here, Plaintiffs allege that due to the leases executed between Onshore and Land Corp, competing operators could not operate profitably even if those competitiors leased Plaintiffs' rights and applied for permits on the expiration of Defendants' permits. ((*See, e.g.*, Doc. 25 at 3) ("[T]he non-competitive royalty rate essentially guaranteed that competitors would be unable to economically lease the plaintiffs, pool the defendants, and profitably drill wells.")). This allegation is sufficient for the Court to draw the reasonable inference that a competing operator, if permitted, would be obligated by contract or law to fulfill the 30% royalty owed to Land Corp. In drawing this inference, the Court does not mean to indicate this is the only plausible reading of Plaintiffs' Complaint.

Violation of *Wyoming Statute § 40-4-101*). Finally, the Complaint alleges that Defendants violated Article 1, § 30 and *Article 10, § 8 of the Wyoming Constitution* through unlawful **[*9]** competition or interference with the public good and general welfare through monopolistic enterprises. (Count Four: Violation of Wyoming Constitution).

Defendants have moved to dismiss Plaintiffs' Complaint on numerous grounds: (1) Plaintiffs' Sherman Act claims (Counts One and Two) are barred by the state-action doctrine; (2) Plaintiffs' Sherman Act and state-law claims (all Counts) are further barred by the *Noerr-Pennington* doctrine; (3) Plaintiffs' state-law claims (Counts Three and Four) should be dismissed because Wyoming antitrust laws do not prohibit monopolies obtained through drilling permits issued under Wyoming law; (4) Plaintiffs fail to state a claim for monopolization under *Federal Rule of Civil Procedure 12(b)(6)* by failing to plead a relevant geographic market, failing to allege anticompetitive conduct, and failing to adequately plead antitrust injury; and (5) Plaintiffs lack standing to bring their claims.

Standard on Motion to Dismiss

The standard of review on a motion to dismiss is well-established. An antitrust claim is not subject to a heightened pleading standard. *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001)*; *Lawter & Assocs., PLLC v. Sw. Bell Advert. L.P.*, No. CIV-07-0393-HE, 2009 WL 10673103, at *2 (W.D. Okla. Jan. 16, 2009) (citing *New Home Appliance Center, Inc. v. Thompson, 250 F.2d 881, 883 (10th Cir. 1957)*). To survive a motion to dismiss, a plaintiff's "complaint must contain sufficient factual matter . . . to 'state a claim to relief **[*10]** that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). For the claims of a complaint to be considered "plausible," a plaintiff must plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. Thus, although the plaintiff does not need to provide detailed factual allegations, the complaint must contain more than mere "labels," "conclusions," and "formulaic recitations of the elements of a cause of action." *Twombly, 550 U.S. at 555*. In its evaluation of the complaint, the Court must accept all factual allegations as true. *Id. at 572*.

When ruling on a motion to dismiss for failure to state a claim, it is not the Court's function "to weigh [the] potential evidence that the parties might present at trial, but to assess whether the plaintiff's complaint alone is legally sufficient to state a claim for which relief may be granted." *Miller v. Glanz, 948 F.2d 1562, 1565-66 (10th Cir. 1991)*. The Court must also view the factual allegations in the light most favorable to the non-moving party. *Sutton v. Utah State Sch. For Deaf & Blind, 173 F.3d 1226, 1236 (10th Cir. 1999)*.

Discussion

I. *Sherman Act* § 2

Section 2 of the *Sherman Act* provides that "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce . . . shall be **[*11]** deemed guilty of a felony." *15 U.S.C. § 2*. To state a monopolization claim under *§ 2*, a plaintiff must "define a relevant market within which the defendants allegedly engaged in anticompetitive behavior. 'The offense of monopoly under *§ 2* of the *Sherman Act* has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power.'" *Campfield v. State Farm Mutual Auto. Ins. Co., 532 F.3d 1111, 1117-18 (10th Cir. 2008)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*).

To state an attempted monopolization claim, Plaintiffs must plead: "(1) relevant market (including geographic market and relevant product market); (2) dangerous probability of success in monopolizing the relevant market; (3) specific intent to monopolize; and (4) conduct in furtherance of such an attempt." *Colo. Interstate Gas. Co. v. Natural Gas Pipeline, 885 F.2d 683, 693 (10th Cir. 1989)*. "Initially, therefore, the plaintiff must plead facts sufficient to establish the existence of a relevant market and the defendant's power in that market." *TV Commc'ns Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1025-26 (10th Cir. 1992)* (citing *Perington Wholesale, Inc. v. Burger King Corp., 631 F.2d 1369, 1373 (10th Cir. 1979)*).

As threshold issues, Defendants assert two theories under which Plaintiffs' claims are barred. First, Defendants state Plaintiffs' Sherman Act claims must be dismissed because Defendants' alleged monopoly is the result of a state action. Therefore, Defendants contend they are entitled to immunity from suit under the state-action or "*Parker* ***[*12]*** " doctrine. Defendants also assert Plaintiffs' claims are barred under the *Noerr-Pennington* doctrine, which would shield from liability Defendants' acquisition of permits from the WOGCC if it is considered petitioning activity under the *First Amendment*. The Court will first consider whether Plaintiffs' claims are barred under the *Parker* and *Noerr-Pennington* doctrines before proceeding to consider whether Plaintiffs have stated a claim on which relief can be granted under *Federal Rule of Civil Procedure 12(b)(6)*.

A. State-Action/*Parker* Immunity

1. Summary of Defendants' Argument for State-Action Immunity

The Court finds a brief summary of Defendants' arguments is warranted before proceeding to analyze each in turn. The instant motion presents three theories in support of the application of state-action immunity. First, Defendants state that the gravamen of the Complaint is directed toward conduct actually committed by the State of Wyoming through the WOGCC. For instance, Plaintiffs state "[t]he purpose and effect of Anadarko's obtaining the drilling permits have been to confer on Anadarko a monopoly in the relevant market, in that no other oil and gas exploration firm will be able to gain entry and operate profitably in the relevant market." **[*13]** (Doc. 1, at 19). Taking the facts as pled, Anadarko necessarily "obtained" its permits through a process regulated by the WOGCC. Therefore, Defendants argue, the WOGCC bears equal responsibility for the conferral of such a monopoly because it granted the permits for which Anadarko applied.

Anadarko's second theory in favor of state-action immunity is that even if the WOGCC is not considered "the state" for purposes of immunity, the WOGCC is a sub-state actor entitled to immunity under the relevant test. For sub-state actors, the relevant test for application of state-action immunity is whether the entity's conduct "was authorized by a clearly articulated and affirmatively expressed state policy to displace competition with regulation, and therefore was not subject to the *Sherman Act*." *See* *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 38-40, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*.

Defendants' assertion that they are entitled to state-action immunity rests primarily on the two theories described above (*i.e.*, that the WOGCC was the monopolizing actor). However, Defendants submit in the alternative that state-action immunity extends protection over Anadarko's conduct as a private entity, including Anadarko's execution of intracompany leases allegedly designed to exclude competitors from **[*14]** profitably operating in the market. According to Defendants, they enjoy immunity for *all* conduct, even as private non-state actors, because the alleged conduct is a "foreseeable result" of Wyoming law. *See* *Lease Lights, Inc. v. Pub. Serv. Co. of Okla., 849 F.2d 1330, 1333 (10th Cir. 1988)*.

2. *Parker v. Brown* and Other Applicable Law

The Supreme Court originally set forth the state-action doctrine in *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. In *Parker*, the Supreme Court held that the *Sherman Act* does not restrict states from imposing market restraints "as an act of government." *Id. at 352*. "States may regulate economic activity as they wish, pursuing even patently anticompetitive policies without having to look over their shoulders to see if Congress approves." *Kay Elec. Co-op. v. City of Newkirk, Okla., 647 F.3d 1039, 1042 (10th Cir. 2011)*. Except for situations in which the state itself is acting as a market participant, "any action that qualifies as state action is *ipso facto* . . .

exempt from the operation of the antitrust laws . . . ." *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 379, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*.

a. Whether Defendants Enjoy Immunity for their Acquisition of the Permits?

Defendants' primary argument is that Plaintiffs' claims must be dismissed because the alleged harms arise directly from the WOGCC's issuance of permits to Anadarko, which pursuant to their own terms, give Anadarko exclusive drilling rights in the area covered by the permits. (Doc. 1 at 5). Thus, Anadarko's **[*15]** acquisition of its alleged monopoly would be characterized as a state-action immunized from liability under the *Sherman Act*. At least one circuit has issued precedent that agrees with this result. Defendants cite *Charley's Taxi Radio Dispatch Corp. v. SIDA of Haw., Inc., 810 F.2d 869 (9th Cir. 1987)*, in which the Ninth Circuit concluded that a *Sherman Act § 2* claim lacked merit where a state department of transportation had conferred on a defendant taxi company an exclusive franchise to provide outbound taxi service from the airport. That Court stated:

> Because the monopoly granted to [the State Independent Drivers Association, Inc. ("SIDA")] was shielded by the *Parker* doctrine, SIDA cannot be held liable for possessing that monopoly. To hold otherwise, would allow the *Parker* doctrine to be circumvented by artful pleading: 'A plaintiff could frustrate any [*Parker* protected state plan] merely by filing suit against the regulated private parties, rather than the state officials who implement the plan.'

Id. at 878 (quoting *S. Motor Carriers Rate Conference, 471 U.S. 48, 56-57, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*). Similarly here, to the extent Plaintiffs' monopoly claims rely upon Defendants' acquisition of the permits, the Court concludes Defendants are immunized under *Parker* because the alleged harms arise just as much from WOGCC's approval of the permit complex as Anadarko's application for those permits.

b. Whether Defendants [*16] Enjoy Immunity for the Execution of "Supracompetitive" Intracompany Leases?

While the Court finds that Defendants enjoy state-action immunity from *Sherman Act* liability for their acquisition of the permits, Plaintiffs' alleged harms appear to arise at least in part from Anadarko's execution of intracompany leases divorced from its conduct in acquiring the permits. Therefore, Plaintiffs necessarily assert that Defendants have engaged in *§ 2* violations in their capacities as private parties.

Courts have extended the state-action doctrine to immunize conduct by private parties. "Although the doctrine was aimed at protecting state legislatures and state supreme courts acting in their legislative capacities, it can provide protection to other individuals or entities acting pursuant to state authorization." *Zimomra v. Alamo Rent-A-Car, Inc., 111 F.3d 1495, 1498 (10th Cir. 1997)*. But when the challenged conduct is attributable to another person or entity acting under state authorization, "closer analysis is required" to determine whether antitrust immunity is warranted. *Porter Testing Lab. v. Bd. of Regents, 993 F.2d 768, 770 (10th Cir. 2017)*.

In *California Retail Liquor Dealers Association v. Midcal Aluminum, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*, the Supreme Court established a two-part test (the "*Midcal* test") to determine whether alleged anticompetitive conduct by a private party under state regulation is immunized under the state-action doctrine. **[*17]** The two requirements under that test are: (1) "the challenged restraint must be one clearly articulated and affirmatively expressed as state policy," and (2) "the policy must be actively supervised by the State itself." *Id. at 105* (internal quotation marks omitted).

i. Whether the challenged restraint is clearly articulated and affirmatively expressed as state policy?

"Whether a state policy is clearly and affirmatively expressed such that immunity extends to private parties is a matter of degree." *Id.* In *Kay Electric Cooperative v. City of Newkirk, Oklahoma*, the Tenth Circuit instructed that, at minimum, a defendant seeking the protection of state-action immunity "bear[s] the burden of showing that its challenged conduct was *at least* a foreseeable (if not explicit) result of state legislation." *647 F.3d 1039, 1043 (10th Cir. 2011)*. The Tenth Circuit has previously framed this foreseeability test by emphasizing that "there must be a clearly articulated and affirmatively expressed state policy to *displace competition*," as opposed to merely a "neutral" expression of state policy. *Allright Colo., Inc. v. Denver, 937 F.2d 1502, 1507 (10th Cir. 1991)* (emphasis added) (internal quotation marks omitted).

In order to meet the first prong of the *Midcal* test, a private party does not have to "point to a specific, **[*18]** detailed legislative authorization" for its challenged conduct; the State need only have made clear its intent to replace competition with a regulatory program in a particular field. *Trigen Okla. City Energy Corp. v. Okla. Gas & Elec. Co., 244 F.3d 1220, 1226 (10th Cir. 2001)* (citing *S. Motor Carriers, 471 U.S. at 64*). The state policy does not have to compel the private party to engage in anticompetitive conduct. "If the state policy expressly permits, but does not compel, anticompetitive conduct, the private party may still qualify for state action immunity." *Id.*

The purpose of the Wyoming Oil and Gas Conservation Act (the "Act") is to "provide a comprehensive regulatory program which prevents the *waste* of Wyoming's oil and gas resources and *protects the correlative rights* of property owners." *Union Pac. Res. Co. v. Texaco, Inc., 882 P.2d 212, 223 (Wyo. 1994)* (emphasis added) (citing *Wyo. Stat. §§ 30-5-102*, 104). As relevant here, the Act authorizes the WOGCC to set forth a process for the permitting of oil and gas wells (*see Wyo. Stat. Ann. § 30-5-115*) and to regulate the drilling, producing, and spacing of oil and gas wells (*see § 30-5-104*). Further, *§ 30-5-109* authorizes the WOGCC to enter voluntary or forced "pooling" orders for the development of a drilling unit that embraces two or more separately owned tracts. Pooling can be voluntary, but when owners do not consent to pool their interests, *Wyoming Statute § 30-5-109* allows the WOGCC to compulsorily pool the **[*19]** non-participating interests. In such a "forced-pooling" situation, non-consenting owners do not receive payment for their interests in production until the operator has recovered 100% of the owner's share of equipment and operating costs, 300% of the costs of drilling and of well-completion, and 200% of the cost incurred on new in-well equipment.[2]

There is nothing in the Act indicating, nor do Defendants argue, that the Act is intended to displace unfettered competition in the market of oil and gas leasing. *City of Columbia v. Omni Outdoor Advert. Inc., 499 U.S. 365, 373, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*. Still, at least one foreseeable result of the Act's forced-pooling provision is that mineral owners such as Plaintiffs would be forced into accepting less than "fair-market" royalty rates by application of the Act itself, in the event an operator offered less than desirable royalty rates. Further, the Wyoming legislature's recent amendment to *§ 30-5-109* requiring "mandatory royalties" in a forced-pooling situation suggests that the legislature intended to regulate the royalty percentages to which even non-consenting owners are entitled in a forced-pooling scenario. Similar to the zoning ordinance that was at issue in *Omni*, one possible reading of the Act's purpose in authorizing the **[*20]** WOGCC to comprehensively regulate the permitting, spacing, and unitization of oil and gas development is the "prevent[ion of] normal acts of competition, particularly on the part of new entrants." *Omni Outdoor Advert., Inc., 499 U.S. at 373*.

At the same time, it is clear that neither the WOGCC nor the Act have explicit provisions authorizing owners and/or operators to enter into leases that have the effect of excluding competition. But the facts that (1) the permits themselves grant Anadarko the exclusive drilling rights for the entire area, and (2) the Act does regulate the

---

[2] The State of Wyoming Legislature recently enacted an amendment to *§ 30-5-109*, which becomes effective on July 1, 2020. *See* Drilling Units-Risk Penalties and Mandatory Royalties Act, H.B. 14, Budget Sess. 2020 (Wyo. 2020). Under the amendment, in addition to other modifications to the statute, pooling orders shall "expire twelve (12) months after issuance if the person authorized to drill and operate a well fails to commence operations within twelve (12) months of issuance of the pooling order." *Id.* Further, the amendment includes a provision for the payment of royalty to an unleased, non-consenting owner in a drilling unit during the operator's cost-recovery period. The new royalty payment provision mandates the royalty payment be in the amount of sixteen percent (16%) or "[t]he acreage weighted average royalty interest of the leased tracts within the drilling unit." *Id.*

situation in which Anadarko does not offer to lease Plaintiffs' rights on terms agreeable to them, render Defendants' argument on this prong at least persuasive. Nonetheless, for the reasons stated below, Defendants' leases may give rise to liability because the State of Wyoming does not exercise active supervision over the terms of oil and gas leases.

ii. Whether the policy is actively supervised by the State itself?

The second prong of the *Midcal* test, the "active supervision" requirement, "is designed to ensure that the state-action doctrine will shelter only the particular anticompetitive acts of private parties that, in the judgment of the State, actually further **[*21]** state regulatory policies." *Patrick v. Burget, 486 U.S. 94, 100-01, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988)* (internal citation omitted). The active supervision requirement "mandates that the State exercise ultimate control over the challenged anticompetitive conduct." *Id. at 101*. It requires

> state officials [to] have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy. Absent such a program of supervision, there is no realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests.

Id. In the context of private parties alleged to be involved in a price-fixing scheme, as Plaintiffs have alleged here, "actual state involvement, not deference to private pricefixing arrangements under the general auspices of state law, is the precondition for immunity from federal law. Immunity is conferred out of respect for ongoing regulation by the State, not out of respect for the economics of price restraint." *F.T.C. v. Ticor Title Ins. Co., 504 U.S. 621, 633, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)*.

Defendants argue that the conduct of permitted operators is actively supervised by the WOGCC pursuant to its statutory powers, "both in relation to the permit application process and after any permits are issued." (Doc. **[*22]** 11, at 17-18). In response, Plaintiffs state that even though the WOGCC has this authority and, on expiration of Anadarko's two-year drilling period, other operators could have filed their own permit applications ("APDs"), those operators were dissuaded from doing so given that Anadarko's complex of leases at non-competitive royalty rates would render exploration, development, and production of the even sections unprofitable, since those sections would necessarily need to be pooled with Defendants' sections to prevent waste and to protect all owners' correlative rights.

There is no provision in the Act granting WOGCC specific authority to actively supervise the terms of oil and gas leases. However, the Act gives the WOGCC authority to "make rules, regulations, and orders, and shall take other appropriate action, to effectuate the purposes and intent" of the Act. *Wyo. Stat. Ann. § 30-5-104*. The Wyoming Supreme Court has interpreted the WOGCC's authority to include "continuing authority to modify its previous orders" for the *prevention of waste and protection of correlative rights.* *Union Pac. Res. Co., 882 P.2d at 225* (emphasis added). Moreover, the WOGCC requires permit holders to file a new application to drill "after the expiration of a period **[*23]** of two (2) years from the date of issuance" if drilling is not commenced by that time. WOGCC Rules, Ch. 3, § 8(h).

At the very least, the WOGCC appears to have ultimate control over whether Anadarko's permits are re-issued, and Anadarko would be entitled to immunity on that basis. However, Plaintiffs urge the Court to find that the active-supervision requirement is not met for Anadarko's leasing practices which, according to Plaintiffs, is a "manipulation of their royalty rate in the checkerboard" that guarantees other operators will not seek to file competing APDs on the two-year expiration of Anadarko's leases. (Doc. 25 at 3). According to Plaintiffs, "the non-competitive royalty rate essentially guaranteed that competitors would be unable to economically lease the plaintiffs, pool the defendants, and profitably lease wells." (*Id.*).

Viewing the Complaint in the light most favorable to Plaintiffs, Plaintiffs plausibly allege that Anadarko's leasing practices have precluded competitors from applying for permits to drill in the even sections owned by Plaintiffs, even when Anadarko's permits have expired under the two-year period. Neither the WOGCC, nor any other state regulatory body, **[*24]** are charged with "actively supervising" leasing practices among mineral owners and their lessees (much less for the specific purpose of policing anticompetitive processes). It is clear that leases are private contracts, *see* *State v. Moncrief, 720 P.2d 470, 473 (Wyo. 1986)*, over which the WOGCC does not exercise ongoing supervision once it issues any related permits for drilling under any such leases. Indeed, the purpose of the state-action doctrine is to protect the sovereignty of "actual state involvement," not to protect "private pricefixing arrangements under the general auspices of state law." *See* *Ticor Title Ins. Co., 504 U.S. at 633*. Finding that Plaintiffs have plausibly alleged the latter type of "state-action," Defendants' invocation of immunity fails on this prong in relation to their execution of intracompany leases.

B. Immunity from Suit under the *Noerr-Pennington* Doctrine

Defendants further submit the *Noerr—Pennington* doctrine also immunizes them from Plaintiffs' antitrust claims brought under both the *Sherman Act* and Wyoming state law. According to Defendants, Plaintiffs' claims are untenable because the *Noerr-Pennington* doctrine prevents Plaintiffs from attacking Anadarko for its acquisition of the permits. Defendants' theory appears to be that Plaintiffs bring this **[*25]** action in a veiled attempt to influence the WOGCC's permitting process and its decision to issue the specific permits at issue.

As stated above, the Court agrees with Defendants that Anadarko's acquisition of permits through the WOGCC is not a proper basis of liability. Nonetheless, a brief review of the *Noerr-Pennington* doctrine is warranted to determine whether it bears applicability here. "The *Noerr—Pennington* doctrine is based upon the protections of the *First Amendment* and exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition." *Zimomra, 111 F.3d at 1503* (citing *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *E. R.R. Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*). "Immunity under the *Noerr—Pennington* doctrine is designed to protect the right to petition and engage in political activity." *Oberndorf v. City & County of Denver, 900 F.2d 1434, 1440 (10th Cir. 1990)*, *abrogated on other grounds,* *Omni Outdoor Advert., Inc., 499 U.S. at 382*. "[T]he right to petition extends to all departments of the Government . . . [including] to administrative agencies (which are both creatures of the legislature, and arms of the executive) and to courts, the third branch of Government." *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*.

Defendants assert the *Noerr-Pennington* doctrine shields them from Plaintiffs' Sherman Act claims because, according to Defendants, the crux of Plaintiffs' claims is that Anadarko **[*26]** gained its alleged monopoly by applying for and obtaining drilling permits from the WOGCC. As stated above, the Court has determined that Defendants' argument fails to embrace a critical component of Plaintiffs' argument, namely, that Defendants are liable as private parties for anticompetitive leasing practices conducted without state supervision. This line of Plaintiffs' Complaint cannot be construed as an "effort to influence Executive Branch or administrative rulings" because Plaintiffs do not challenge the permits themselves. (*See* Doc. 30 at 8 (citing AREEDA & HOVENKAMP, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION ¶ 202a (2019)). Rather, a plausible reading of the Complaint is that Plaintiffs challenge Defendants' intracompany leases as entirely divorced from WOGCC's conferral of the permit complex on Anadarko. Therefore, the Court is not persuaded that *Noerr-Pennington* shields Defendants from Plaintiffs' Sherman Act or Wyoming state law claims.

C. Whether Plaintiffs have Plausibly Alleged the Elements of a Sherman Act *§ 2* Claim

Finding that Plaintiffs' claims arising from the intracompany leases are not barred by either the *Parker* or the *Noerr-Pennington* doctrines, **[*27]** the Court turns next to Defendants' argument for dismissal of Plaintiffs' Sherman Act claims under *Federal Rule of Civil Procedure Rule 12(b)(6)*. Defendants assert that the claim must be dismissed for failure to adequately plead a relevant geographic market; failure to adequately plead that Anadarko engaged in anti-competitive conduct; and failure to adequately plead that Plaintiffs suffered an antitrust injury.

1. Relevant Geographic Market

Plaintiffs' Complaint sets forth two proposed relevant geographic markets, the first based on "exploration and production of oil and gas," and the second based on "the leasing and sale of oil and gas rights" of mineral acre lands in the Niobrara and Codell formations in portions of Laramie County, Wyoming, generally east of Cheyenne. Defendants state this description is deficient for lack of specificity and because it does not fall within the definition of a relevant market for antitrust purposes. Defendants further contend this is not an adequate geographic market for purposes of an antitrust claim, as "buyers" of oil and gas production rights can easily seek "competitive substitutes for exploration and production" in areas adjacent to east Laramie County.

a. Applicable Law

To state an antitrust **[*28]** claim, Plaintiffs must identify a relevant market in terms of both product and geographic area. *Campfield, 532 F.3d at 1118*. The product market consists of products "found to be sufficiently substitutable," and the geographic market encompasses "the terrain in which competition takes place." *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1071 (10th Cir. 2013)*. If the market described in the Complaint fails to include "reasonably good substitutes," the plaintiff has not carried his burden to allege a relevant market. *Campfield, 532 F.3d at 1118*. To be legally sufficient, the alleged geographic market must be "the narrowest market which is wide enough so that products from adjacent areas cannot compete on substantial parity with those included in the market." *Lantec, Inc. v. Novell, Inc., 306 F.3d 1003, 1026-27 (10th Cir. 2002)* (internal quotation omitted). Defendants' motion appears to address only whether Plaintiffs have failed to plead a relevant geographic market; thus, the Court will not address whether Plaintiffs have adequately pled a relevant product market except to the extent it is relevant to their alleged geographic market.

Market definition is a fact-intensive inquiry. Historically, courts have hesitated to grant motions to dismiss for failure to plead a relevant market. *See* *Found. for Interior Design Educ. Research v. Savannah Coll. of Art & Design, 244 F.3d 521, 531 (6th Cir. 2001)* ("Market definition is a highly fact-based analysis that generally requires discovery.") **[*29]** (citing *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*); *Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 560 (8th Cir. 1998)* (noting that "courts are hesitant to dismiss antitrust actions before the parties have had an opportunity for discovery"); *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)* (explaining that "in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers") (citing *Eastman Kodak, 504 U.S. at 482*); *see also* *Bansavich v. McLane Co., Inc., No. 3:07cv702 (WWE), 2008 U.S. Dist. LEXIS 89071, 2008 WL 4821320, *3 (D. Conn. Oct. 31, 2008)* (unreported) ("An antitrust plaintiff fails to state a claim only where a proposed market definition is patently implausible on the basis of the four corners of the complaint."). Nonetheless, there is no absolute rule against the dismissal of antitrust claims for failure to allege a relevant market. *Queen City, 124 F.3d at 436*.

Defendants' first argument is that Plaintiffs' alleged geographic market is underinclusive because it fails to explain why "areas adjacent to 'Laramie County east of Cheyenne' are not competitive substitutes for exploration and production within it." (Doc. 11 at 25). Defendants further state "Plaintiffs must, but do not, describe the specific bounds of their alleged market." (*Id.*).

First, the Court notes that the relevant geographic market to an antitrust claim is "not ordinarily susceptible to a metes and bounds" definition encouraged by Defendants. *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1118 (10th Cir. 2008)* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 331-32, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*). This is especially **[*30]** true at the pleadings stage, when Plaintiffs' burden is solely to allege a plausible geographic market. Second, and more importantly, this track of Defendants' argument mischaracterizes

Plaintiffs' alleged product market.[3] As the Court has discussed above, Plaintiffs' described market consists of exploration and production of oil and gas, *and* leases for the exploration and production of oil and gas. While it is true that oil and gas operators could conduct exploration and production in areas outside of this particular segment of east Laramie County, Plaintiffs also argue their claims in the context of a geographic market for oil and gas leases in which Plaintiffs and Defendants are competing suppliers. If true, Plaintiffs contend these facts give rise to a monopsony.

Monopsonistic practices by buyers are among the practices prohibited by the *Sherman Act*. *Telecor Commc'ns, Inc., 305 F.3d at 1134* (citing *Mandeville Island Farms v. Am.Crystal Sugar Co., 334 U.S. 219, 235-36, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)*). "A monopsony is different from the usual form **[*31]** of monopolistic control in which suppliers utilize market power to restrict output and thereby raise prices." *Campfield, 532 F.3d at 1118*. The prevailing distinction between a monopoly and a monopsony is the concentration of anticompetitive market power in sellers, versus buyers. "In a monopsony, the buyers have market power to decrease market demand for a product and thereby lower prices." *Id.* (citing HERBERT HOVENKAMP, ANTITRUST 3 (3d ed. 1999)).

At this stage, Plaintiffs have alleged specific facts to support their definition of a relevant geographic market "in a in a way that is plausible and bears a rational relation to the methodology courts prescribe to define a market for antitrust purposes." *See* *Todd v. Exxon Corp., 275 F.3d 191, 203 (2d Cir. 2001)* (holding that market underinclusivity is a "fact-specific question" that "cannot be resolved on the pleadings."). Plaintiffs have alleged they are suppliers of mineral leasing, exploration, and production opportunities in portions of the Codell and Niobrara formations. Defendants are the sole lessees or "buyers" of mineral interests in the area where Plaintiffs own rights. Taking the facts as pled, Defendants have exercised their market power with the result that Anadarko is the only feasible lessee of Plaintiffs' **[*32]** oil and gas interests.[4] Competing operators—even if permitted—could not operate profitably in the area. Plaintiffs have also alleged that Defendants' market power would permit Defendants to manipulate the royalty terms of new leases. While certain parameters of Plaintiffs' alleged market remain unclear, instances of dismissal at the pleading stage for failure to define a relevant geographic market are rare and the Court

---

[3] Although Defendants do not appear to challenge Plaintiffs' proposed product market, Defendants draw the Court's attention to *Buccaneer Energy (USA) Inc. v. Gunnison Energy Corp., 846 F.3d 1297, 1314 (10th Cir. 2017)*. In *Buccaneer Energy*, the Tenth Circuit considered whether a plaintiff's mere designation of "production rights" as the relevant product was a deficient description of the product market. In finding that the Plaintiff had failed to meet its burden on summary judgment, the Court stated:

> By arguing only that the district court's definition is wrong, but never offering a definition it considers to be right, Buccaneer left that question open and, as a result, impermissibly shirked its "obligat[ion] to make an affirmative showing of [its] proposed relevant market."

Id. at 1314 (quoting *Telecor Commc'ns, Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1134 (10th Cir. 2002)*, *305 F.3d 1124, 1131 (10th Cir. 2002)*). The Court acknowledges the value of *Buccaneer* in its holding that "production rights" is a legally deficient description of a relevant product. However, the question presently before the Court relates to the relevant *geographic* market, not the relevant product market. Further, at this stage of these proceedings, Plaintiffs' burden is only to allege a plausible relevant geographic market, not to make an affirmative showing.

[4] On this point, *Campfield* does not warrant a contrary conclusion. In *Campfield*, the Tenth Circuit held that a plaintiff's alleged market of "the State Farm insured repairable windshield repair market, in the geographic area of the United States of America" was deficient. *Campfield, 532 F.3d at 1119* (citing *Jayco Sys., Inc. v. Savin Bus. Mach. Corp., 777 F.2d 306, 319 n. 43 (5th Cir. 1985)* ("[O]ne purchaser in a market of competing purchasers cannot constitute a relevant geographic market, absent exceptional market conditions")). This case is readily distinguishable from the facts of *Campfield*. The *Campfield* plaintiff owned an automobile glass repair shop and brought antitrust allegations against an auto-insurance agency that refused to endorse the plaintiff's patented windshield repair technique, which refusal limited the plaintiff's access to the defendant's market of insured customers. Unlike the *Campfield* plaintiff, Plaintiffs in this case have not limited their alleged market to Anadarko as its sole lessee, but rather allege that they are not able to market their mineral interests to *any* operator given the anticompetitive effects of Anadarko's lease complexes.

cannot find that Plaintiffs' Complaint is subject to any glaring deficiencies for which courts have found such dismissal appropriate.[5]

b. Anticompetitive Conduct

Defendants next argue Plaintiffs' Complaint is subject to dismissal for failure to allege anticompetitive conduct by Defendants. Defendants state, "Plaintiffs cannot plausibly explain how Anadarko's obtaining permits is anticompetitive, even setting aside the immunities that attach to this conduct" and "Plaintiffs allege no facts indicating that Anadarko engaged in any anticompetitive or predatory conduct to prevent other operators from seeking the permits at issue." (Doc. 11 at 26). Further, Defendants assert that Anadarko's decisions not to drill in the relevant area or seek **[*33]** leases from Plaintiffs are not anticompetitive, as "businesses are free to choose the parties with whom they will deal as well as the prices, terms, and conditions of that dealing." (Doc. 11 at 27 (quoting *Pac. Bell Tel. Co. v. Linkline Comm'ns, Inc., 555 U.S. 438, 448 (2009)*). Plaintiffs respond that they have effectively alleged anticompetitive conduct in the form of Anadarko's intracompany leases. (Doc. 25 at 20).

Anticompetitive conduct is an essential element of a claim under the *Sherman Act*. "Even if a firm has monopoly *power* in a relevant market, a plaintiff must also show 'the *willful acquisition or maintenance of that power* as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" *Christy Sports, LLC v. Deer Valley Resort Co., 555 F.3d 1188, 1194 (10th Cir. 2009)* (quoting *Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* (emphasis added)). But while the *Sherman Act* clearly prohibits certain anticompetitive conduct, the Supreme Court and Tenth Circuit have both emphasized that even a "putative monopolist, has 'no antitrust duty to deal with its rivals at all.'" *Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1221 (10th Cir. 2009)* (quoting *Pac. Bell Tel. Co., 555 U.S. at 444*).

The thrust of Defendants' argument on this element relies upon their apparent assumption that Anadarko's acquisition of drilling permits is the sole basis of anticompetitive conduct that Plaintiffs allege. Were this Plaintiffs' only argument for a finding of anticompetitive **[*34]** conduct, Defendants would enjoy immunity, as the Court has already elaborated at length.

As the Court has further indicated, the crux of Plaintiffs' remaining argument is that Anadarko's intracompany leases have fortified the market against new entrants and necessarily reduced the value Plaintiffs would expect to receive from the development of their mineral interests. While the law certainly does not inhibit Defendants' freedom to "choose the parties with whom they will deal as well as the prices, terms, and conditions of that dealing," Plaintiffs have alleged anticompetitive conduct by Anadarko beyond a "refusal-to-deal." *See Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 410, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*). Rather, Plaintiffs' allegations indicate that Anadarko executed its intracompany leases for the express purpose of "making it difficult for other competitors to coexist." (Doc. 25 at 20 (citing SULLIVAN & HARRISON, UNDERSTANDING ANTITRUST AND ITS ECONOMIC IMPLICATIONS 274 (7th Ed., 2019))). At this stage in the proceedings, and accepting as true Plaintiffs' factual allegations, the Court finds Plaintiffs have met their burden on this element.

---

[5] *See Allen v. Dairy Farmers of Am., Inc., 748 F. Supp. 2d 323, 338-39 (D. Vt. 2010)* (collecting cases) ("dismissals at the pre-discovery, pleading stage . . . are generally limited to instances in which the complaint either: (1) fails to allege a geographic market or the boundaries of a relevant geographic market, *see, e.g., Sun Microsystems, Inc. v. Versata Enters., Inc., 630 F. Supp. 2d 395, 403 (D. Del. 2009)*; (2) defines a geographic market in an unreasonably and implausibly narrow manner, *see, e.g., Smugglers Notch Homeowners' Ass'n, Inc. v. Smugglers' Notch Mgmt. Co., Ltd., 2009 U.S. Dist. LEXIS 46026, 2009 WL 1545829, *3 (D. Vt. May 29, 2009)* (granting motion to dismiss where, among other things, plaintiffs' proposed geographic market was a single village); or (3) alleges a "contradictory" and "vague delineation of the relevant geographic market." *Mathias v. Daily News, L.P., 152 F. Supp. 2d 465, 483 (S.D.N.Y. 2001)*") (internal quotations omitted)). *See also Bansavich, 2008 U.S. Dist. LEXIS 89071, 2008 WL 4821320, *3* ("An antitrust plaintiff fails to state a claim only where a proposed market definition is patently implausible on the basis of the four corners of the complaint.").

c. Antitrust Injury

Defendants further argue that Plaintiffs have not alleged antitrust injury, as Plaintiffs' **[*35]** alleged losses "stem from the purported exclusion of non-permitted operators from the alleged relevant market" and therefore the alleged injuries "can be due only to the permits themselves, as Plaintiffs identify no other conduct by which rival operators could plausibly have been excluded." (Doc. 11 at 29).

To establish an antitrust injury, a plaintiff "must allege a business or property injury, an antitrust injury, as defined by the *Sherman Act*." *Tal v. Hogan, 453 F.3d 1244, 1257-58 (10th Cir. 2006)*. "[O]nly buyers and sellers in the defendants' market are within the target of the antitrust laws." *Id.* (quoting *Comet Mech. Contractors, Inc. v. E.A. Cowen Constr., Inc., 609 F.2d 404, 406 (10th Cir. 1980)*). Secondary or remote injuries, "such as those suffered by companies that desire to obtain a subcontract from a company injured by an antitrust violation" are not cognizable antitrust injuries. *Id.* The mere fact that a plaintiff "could potentially benefit as a result of a derivative future business relationship" with a competitor seller or buyer in the same market or "through incidental and speculative increases in property value" does not establish an antitrust injury. *Id.*

Unlike the *Tal* plaintiff, Plaintiffs in this case have alleged an injury to their own pecuniary and property interests. Plaintiffs assert they are suppliers in their alleged **[*36]** market. Plaintiffs have further alleged their injuries are not merely speculative, but that Plaintiffs have already been injured. The Court finds that Plaintiffs have plausibly pled facts, which taken as true, are sufficient to demonstrate a redressable antitrust injury.

II. Whether Plaintiffs Lack Article III Standing to Assert their Claims for Injunctive Relief

In bringing this suit, Plaintiffs seek money damages as well as an order enjoining Anadarko's leases. Defendants assert that Plaintiffs do not possess standing to seek the requested injunctive relief. "Standing under Article III is, of course, a threshold issue in every case before a federal court." *Coll v. First Am. Title Ins. Co., 642 F.3d 876, 892 (10th Cir. 2011)* (citing *Hutchinson v. Pfeil, 211 F.3d 515, 523 (10th Cir. 2000)* (internal quotation, alteration, emphasis omitted)). To establish constitutional standing under Article III, Plaintiffs "must demonstrate three elements: injury in fact, traceability, and redressability." *S. Utah Wilderness All. v. Off. of Surface Mining Reclamation & Enforcement, 620 F.3d 1227, 1233 (10th Cir. 2010)*. Plaintiffs "must have standing to seek each form of relief in each claim." *Bronson v. Swensen, 500 F.3d 1099, 1106 (10th Cir. 2007)*. "At bottom, the gist of the question of standing is whether [Plaintiffs] have such a personal stake in the outcome of the controversy as to assure that concrete adverseness which sharpens the presentation of issues upon which the court so largely depends for illumination." **[*37]** *Mass. v. E.P.A., 549 U.S. 497, 517, 127 S. Ct. 1438, 167 L. Ed. 2d 248 (2007)* (citation and internal quotation marks omitted).

Here, Defendants' only argument on standing is that Plaintiffs' claims lack redressability. "[T]he requirement of redressability ensures that the injury can likely be ameliorated by a favorable decision." *S. Utah Wilderness Alliance, 620 F.3d at 1233*. "The plaintiff must show that a favorable judgment will relieve a discrete injury, although it need not relieve his or her every injury." *Nova Health Sys. v. Gandy, 416 F.3d 1149, 1158 (10th Cir. 2005)*.

According to Defendants:

> [I]t is clear that enjoining Anadarko's intercompany leases would not likely affect Plaintiffs' property values [because (1)] Anadarko has an incentive to get the best rate it can to keep its drilling costs down, irrespective of the rates in its intercompany leases [and (2)] the alleged leverage from the threat of forced-pooling exists by virtue of the statute; even if the leases were enjoined, Plaintiffs would . . . be compelled to acquiesce to unreasonable royalty terms to avoid remuneration under forced pooling.

(Doc. 11, at 31). In essence, Defendants argue that even if the Court enjoined the leases in question, Plaintiffs would be forced to accept excessively low remuneration under operation of Wyoming's forced pooling statute.

Plaintiffs respond that the injuries they **[*38]** allege are in fact redressable because "[e]njoining the enforcement and transfer of the collusive leases will remove this impediment to oil and gas development by plaintiffs and by defendants' drilling competitors in the relevant market." (Doc. 25, at 24). Plaintiffs state that Defendants "have the power to refrain from enforcing or conveying the supra-competitive royalty rights," and thus that an injunction on the leases would redress the harms to Plaintiffs.

At this stage of the proceedings, the Court finds that Plaintiffs have sufficiently alleged redressability in satisfaction of Article III's standing requirements. Plaintiffs have alleged that, were Anadarko's allegedly "supra-competitive" leases to be enjoined, Plaintiffs would have opportunity to lease their mineral rights at fair-market value because other operators would not be precluded from entry into the market. If Plaintiffs succeed on their claim that Anadarko's royalty rates are anti-competitive in violation of the *Sherman Act*, Plaintiffs would likely benefit from an injunction on the leases. The possibility that Plaintiffs would still be forced "to acquiesce to unreasonable royalty terms to avoid remuneration under forced pooling" **[*39]** does not negate that a "favorable judgment" would relieve Plaintiffs of their alleged "discrete injury" under the leases. Therefore, the Court will allow Plaintiffs' claim for injunctive relief to proceed. *See Nova Health Sys., 416 F.3d at 1158*.

III. State-Law Claims

Finding that Plaintiffs' *Sherman Act § 2* claims survive the Motion to Dismiss, the Court must finally determine whether Plaintiffs' state-law claims may also proceed. Plaintiffs have asserted that the alleged conduct by Defendants creates a basis for liability not only under the *Sherman Act*, but also under provisions of Wyoming's Constitution and state law (Wyo. Const. art. I, § 30, art. X, § 8; *Wyo. Stat. Ann. § 40-4-101(a)(1)*). Defendants claim these laws erect no prohibitions against monopolies obtained by operators through their acquisition of permits to drill and that Plaintiffs' state-law claims must therefore be dismissed.

The Wyoming Constitution deems "perpetuities and monopolies . . . contrary to the genius of a free state." *Wyo. Const. art. I, § 30*. The Wyoming Constitution further commands against the "consolidation or combination of corporations of any kind whatever to prevent competition, to control or influence productions or prices thereof, or in any other manner to interfere with the public good and general welfare." *Id.* at art. X, § 8. To this end, *Wyoming Statute § 30-4-101(a)(1)* forbids firms and **[*40]** corporations from "[m]ak[ing], enter[ing] into, form [ing]or becom[ing] a party to any plan, contract, agreement, consolidation, merger or combination of any kind whatsoever to prevent competition or to control or influence production or prices thereof."

Defendants argue that there is "no precedent to construe this clause as prohibiting permits that were issued by the State and remain subject to its active control and supervision." (Doc. 11). This argument must fail for the same reasons described above, that Plaintiffs have pled liability arises on Defendants' intracompany leases. As previously discussed, the WOGCC does not actively supervise the leasing process and the leases at issue are wholly separate from the permitting process. Therefore, Defendants' argument for dismissal of Plaintiffs' state-law claims must fail for substantially the same reasons as their arguments for dismissal of Plaintiffs' *Sherman Act § 2* claims.

CONCLUSION

For all the reasons stated herein, the Court concludes that Defendants have not stated a basis for dismissal of Plaintiffs' Complaint. At this stage in the proceedings, Plaintiffs have stated a plausible claim for relief.

Accordingly, the Court HEREBY ORDERS that the Motion **[*41]** to Dismiss (Doc. 10) is DENIED.

Dated this 28 day of May, 2020.

HN1[] **Relief From Judgments, Altering & Amending Judgments**

Fed. R. Civ. P. 60(b) governs reconsideration of a final judgment, order, or proceeding of a district court. That rule allows a district court to relieve a party from a final judgment, order, or proceeding for the following reasons: (1)

mistake, inadvertence, surprise, or excusable neglect; (2) newly discovered evidence; (3) fraud by an opposing party; (4) the judgment is void; (5) the judgment has been satisfied or (6) any other reason that justifies relief. *Fed. R. Civ. P. 60(b)*. A motion under *Rule 60(b)* must be made within a reasonable time but no more than a year after the entry of the judgment or order or the date of the proceeding. *Fed. R. Civ. P. 60(c)*. The party making a motion under *Rule 60(b)* bears the burden of proof. Reconsideration is an extraordinary remedy, to be used sparingly in the interests of finality and conservation of judicial resources. Reconsideration is appropriate only in very limited circumstances. Motions for reconsideration are not the proper vehicles for rehashing old arguments and are not intended to give an unhappy litigant one additional chance to sway the judge. A motion for reconsideration also may not be used to raise arguments or present evidence for the first time when they could reasonably have been raised earlier in the litigation.

Civil Procedure > ... > Relief From Judgments > Grounds for Relief from Final Judgment, Order or Proceeding > Extraordinary Circumstances

HN2[] **Grounds for Relief from Final Judgment, Order or Proceeding, Extraordinary Circumstances**

A movant seeking relief under *Fed. R. Civ. P. 60(b)(6)* must show extraordinary circumstances. This rule is used sparingly as an equitable remedy to prevent manifest injustice.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN3[] **Relief From Judgments, Altering & Amending Judgments**

It is inappropriate to raise an argument for the first time in a motion for reconsideration, absent good cause.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

HN4[] **Relief From Judgments, Altering & Amending Judgments**

In the absence of new evidence or a change in the law, a party may not use a motion for reconsideration to raise arguments or present new evidence for the first time when it could reasonably have been raised earlier in the litigation.

Civil Procedure > Appeals > Appellate Jurisdiction > Certified Questions

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN5[] **Appellate Jurisdiction, Certified Questions**

A district court may certify an order for interlocutory appeal when the district court finds that such order involves a controlling question of law as to which there is substantial ground for difference of opinion and that an immediate appeal from the order may materially advance the ultimate termination of the litigation. *28 U.S.C.S. § 1292(b)*. A court may find a question of law controlling if its resolution could materially affect the outcome of litigation in the district court. A court may find substantial ground for difference of opinion when reasonable jurists might disagree about the resolution to the question of law at issue.

Civil Procedure > Appeals > Appellate Jurisdiction > Certified Questions

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN6[] **Appellate Jurisdiction, Certified Questions**

The first statutory requirement for certification for interlocutory appeal is that the requested issue or issues for appeal be a controlling question of law.

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN7[] **Standards of Review, Questions of Fact & Law**

Under *28 U.S.C.S. § 1292(b)*, a question of law is generally one that is pure or abstract and does not require a review of the record.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] **Appellate Jurisdiction, Interlocutory Orders**

When the court of appeals is not asked to overturn any findings of fact, but instead to determine the legal significance of a set of facts by deciding whether a complaint met the pleading standard set forth in Bell Atlantic Corp. v. Twombly, such a determination might be appropriate for interlocutory appeal.

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN9[] **Standards of Review, Questions of Fact & Law**

Application of a legal standard is a controlling question of law, although routine applications of well-settled legal standards to facts are not.

Civil Procedure > ... > Discovery > Privileged Communications > Attorney-Client Privilege

Evidence > Privileges > Attorney-Client Privilege > Waiver

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN10[] **Privileged Communications, Attorney-Client Privilege**

Whether a holder has waived the right to claim the attorney-client privilege is a mixed question of law and fact which the court reviews de novo.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Preliminary Considerations > Venue > Multidistrict Litigation

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN11[] **Appellate Jurisdiction, Interlocutory Orders**

In the liability phase of a multidistrict, multiparty litigation case, or what the court described as the issue of liability in such unusual cases, interlocutory appeal of mixed questions of law relating to the Court's interpretation of Mead v. Retail Clerks International Association is a pure question of law.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN12[] **Appellate Jurisdiction, Interlocutory Orders**

An appellate court's interlocutory jurisdiction under *28 U.S.C.S. § 1292(b)* permits it to address any issue fairly included within the certified order because it is the order that is appealable, and not the controlling question identified by the district court. The scope of interlocutory review includes all issues material to the order in question. A court of appeals may not, however, reach beyond the certified order to address other orders made in the case.

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN13[] **Standards of Review, Questions of Fact & Law**

Decisions holding that the application of a legal standard is a controlling question of law within the meaning of *28 U.S.C.S. § 1292(b)* are numerous.

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN14[] **Commercial Speech, Boycotts & Picketing**

The rules of causation imported into the statutory scheme through the by reason of language of section 303, *29 U.S.C.S. § 187*, afford a means of dealing with at least the extremes of the problem. The requirement that the unlawful objective must have materially contributed to the loss or have been a substantial factor in bringing it about, will prevent windfall recoveries by employers negligibly affected by a violation, and protect the union's right to strike for primary objectives where such objectives, standing alone, would have caused the strike, but the unlawful objective, standing alone, would not. On the other hand, a relatively relaxed standard of proof, allowing recovery on evidence supporting a just and reasonable inference, more likely true than not, that the employer was damaged because of picketing or other union pressure will assure recovery in most cases in which the unlawful motivation was a significant factor producing the union pressure.

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN15[] **Collective Bargaining & Labor Relations, Strikes & Work Stoppages**

Mead v. Retail Clerks International Association does not require that the illegal object be the sole cause of the strike, only that it be a substantial cause or that it materially contribute to the injury, notwithstanding other factors contributed also.

Torts > Procedural Matters > Conflict of Law > Place of Injury

HN16[] **Conflict of Law, Place of Injury**

The controlling rules derive from tort law principles where more than one factor can be a substantial cause, and no single factor need be the sole causative element.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN17[] **Private Actions, Remedies**

Cases under ***antitrust law***, however, may require more specific apportionment of damages by the plaintiff.

Evidence > Burdens of Proof > Allocation

Torts > Procedural Matters > Multiple Defendants > Distinct & Divisible Harms

HN18[] **Burdens of Proof, Allocation**

Under tort law principles, however, the burden of apportionment is placed on the party arguing for divisibility. Under the Restatement (Third) of Torts, § 26, a jury determines divisibility and apportionment unless the issue is without dispute or a court determines that no reasonable jury could find the damages to be divisible. The party arguing for divisibility and apportionment has the burden of proof on both divisibility and the magnitude of each divisible part. Whether damages are divisible is a question of fact. A party alleging that damages are divisible has the burden to prove that they are divisible. The magnitude of each divisible part is also a question of fact.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

Evidence > Burdens of Proof > Allocation

Torts > Procedural Matters > Multiple Defendants > Distinct & Divisible Harms

HN19[] **Private Actions, Remedies**

There is conflict between antitrust principles and tort principles relating to divisibility and apportionment, particularly on the burden of proof. Mead v. Retail Clerks International Association cites and incorporates both ***antitrust law*** and tort law.

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN20[] **Appellate Jurisdiction, Final Judgment Rule**

Resolution of a question materially advances the termination of litigation if it facilitates disposition of the action by getting a final decision on a controlling legal issue sooner, rather than later in order to save the courts and the litigants unnecessary trouble and expense.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > ... > Stays of Judgments > Appellate Stays > Nonmoney Judgments

HN21[] **Judges, Discretionary Powers**

A district court may stay a case pending interlocutory appeal. *28 U.S.C.S. § 1292(b)*. Filing an interlocutory appeal does not automatically stay proceedings in the district court, but a district court may grant a stay to promote economy of time and effort for itself, for counsel, and for litigants. A stay is not a matter of right, however, even if irreparable injury might otherwise result. Instead, it is an exercise of judicial discretion. In deciding whether to order a stay pending interlocutory appeals, courts traditionally balance four factors: (1) whether the stay applicant has made a strong showing that he is likely to succeed on the merits; (2) whether the applicant will be irreparably injured absent a stay; (3) whether issuance of the stay will substantially injure the other parties interested in the proceeding; and (4) where the public interest lies. The first two factors are the most critical.

Civil Procedure > ... > Entry of Judgments > Stays of Judgments > Appellate Stays

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN22[] **Stays of Judgments, Appellate Stays**

There are many ways to articulate the minimum quantum of likely success necessary to justify a stay—be it a reasonable probability; fair prospect; a substantial case on the merits; or that serious legal questions are raised.

Harriman, Dan Jackson, and Brook Dooley, KEKER, VAN NEST & PETERS LLP, San Francisco, CA; Robert A. Shlachter, Timothy S. DeJong, and Lydia Anderson-Dana, STOLL BERNE PC, Portland, OR.

Judges: Michael H. Simon, United States District Judge.

Opinion by: Michael H. Simon

Opinion

OPINION AND ORDER

Michael H. Simon, District Judge.

After a ten-day trial, the jury returned a verdict in the amount of $93,635,000 in favor of Plaintiff ICTSI Oregon, Inc. ("ICTSI") and against Defendants International Longshore and Warehouse Union ("ILWU National") and International Longshore and Warehouse Union Local 8 ("Local 8") (collectively, "ILWU"). The jury found that ILWU had engaged in illegal secondary boycott activities, in violation of *§ 303 of the Labor-Management Relations Act*, *29 U.S.C. § 187*. The Court received the jury's verdict and discharged the jury but deferred entering judgment. **[*2]**

ILWU filed post-trial motions under *Rules 50(b)* and *59(a) of the Federal Rules of Civil Procedure*. The Court denied ILWU's renewed motion for judgment as a matter of law under *Rule 50(b)*. The Court also denied ILWU's motion for new trial under *Rule 59(a)* based on the jury's findings related to liability and causation. Further, the Court conditionally denied ILWU's motion for new trial on damages if ICTSI would agree to accept reduced damages in the amount of $19,061,248 but also conditionally ordered a new trial limited to damages if ICTSI were to reject remittitur. ICTSI rejected remittitur. A second trial, limited to damages, has not yet occurred.

Before the Court is ILWU's motion for: (1) reconsideration of the Court's order for new trial limited to damages; (2) certification for interlocutory appeal under *28 U.S.C. § 1292(b)* of the Court's Opinion and Order resolving ILWU's post-trial motions; and (3) stay pending appeal. The Court has reviewed the written submissions of the parties and all *amici curiae* and heard oral argument on May 27, 2020. For the reasons that follow, the Court denies ILWU's motion for reconsideration, grants ILWU's motion for certification in part, and grants ILWU's motion for stay.

DISCUSSION

A. Motion for Reconsideration

HN1[] *Rule 60(b) of the Federal Rules of Civil Procedure* governs reconsideration of "a **[*3]** final judgment, order, or proceeding" of a district court. That rule allows a district court to relieve a party from a final judgment, order, or proceeding for the following reasons: "(1) mistake, inadvertence, surprise, or excusable neglect; (2) newly discovered evidence . . . ; (3) fraud . . . by an opposing party; (4) the judgment is void; (5) the judgment has been satisfied . . . or (6) any other reason that justifies relief." *Fed. R. Civ. P. 60(b)*. A motion under *Rule 60(b)* must be made within a reasonable time but "no more than a year after the entry of the judgment or order or the date of the proceeding." *Fed. R. Civ. P. 60(c)*. The party making a motion under *Rule 60(b)* bears the burden of proof. *See Rufo v. Inmates of Suffolk Cty. Jail, 502 U.S. 367, 383, 112 S. Ct. 748, 116 L. Ed. 2d 867 (1992)*. Reconsideration is "an extraordinary remedy, to be used sparingly in the interests of finality and conservation of judicial resources." *Carroll v. Nakatani, 342 F.3d 934, 945 (9th Cir. 2003)* (citation and quotation marks omitted); *see also Shalit v. Coppe, 182 F.3d 1124, 1132 (9th Cir. 1999)* (noting that "reconsideration is appropriate only in very limited circumstances"). "[M]otions for reconsideration are not the proper vehicles for rehashing old arguments and are not intended to give an unhappy litigant one additional chance to sway the judge." *Phillips v. C.R. Bard, Inc., 290 F.R.D. 615, 670 (D. Nev. 2013)* (alteration in original) (quoting *Cheffins v. Stewart, 2011 U.S. Dist. LEXIS 34036, 2011 WL 1233378, at *1 (D. Nev. Mar. 29, 2011)*). A motion for reconsideration also "may not be used to raise **[*4]** arguments or present evidence for the first time when they could reasonably have been raised earlier in the litigation." *Carroll, 342 F.3d at 945*.

ILWU moves for reconsideration of the Court's order granting a new trial limited to damages. ILWU does not discuss the standards for reconsideration but presumably moves under *subsection (b)(6) of Rule 60*, the "catch-all" provision. ***HN2***[] "A movant seeking relief under *Rule 60(b)(6)* must show 'extraordinary circumstances' . . . ." *Jones v. Ryan, 733 F.3d 825, 833 (9th Cir. 2013)* (quoting *Gonzalez v. Crosby, 545 U.S. 524, 528, 125 S. Ct. 2641, 162 L. Ed. 2d 480 (2005)*). This rule is "'used sparingly as an equitable remedy to prevent manifest injustice.'" *Lal v.*

California, 610 F.3d 518, 524 (9th Cir. 2010) (quoting United States v. Alpine Land & Reservoir Co., 984 F.2d 1047, 1049 (9th Cir. 1993)).

ILWU argues that damages and liability are so intertwined in this case, and generally in cases under 29 U.S.C. § 187, that a court may not hold a trial limited to damages. ILWU argues that reconsideration is necessary to prevent the manifest injustice of separating liability from damages. In support of this argument, ILWU cites Gasoline Products Co. v. Champlin Refining Co., 283 U.S. 494, 51 S. Ct. 513, 75 L. Ed. 1188 (1931), and Hasbrouck v. Texaco, Inc., 663 F.2d 930 (9th Cir. 1981).

In ILWU's 119 pages of briefing on its post-trial motions, however, ILWU never cited either Gasoline Products or Hasbrouck. Further, in its post-trial motions, ILWU moved alternatively for judgment as a matter of law, for new trial (on all issues, including liability), and for *new trial on damages*. ILWU also moved, in the further alternative, for remittitur. **[*5]** ILWU did *not* argue that if the Court were to deny ILWU's motions for judgment as a matter of law and for new trial based on liability but grant ILWU's motion for new trial on damages (or grant ILWU's request for remittitur and ICTSI were to reject remittitur), the Court would need to grant a new trial on *both* liability and damages. Indeed, ILWU argued just the opposite in its post-trial motions. ILWU specifically requested that the Court propose reduced damages of $3,983,669 and "if ICTSI rejects that remittitur, the Court should grant a new trial limited to damages for the time period from May 21, 2012 to August 13, 2013." ECF 653 at 14 and 70.

ILWU now argues that the Court may not grant a new trial limited to damages. ILWU also argues that if the Court were to deny a new trial conditioned upon remittitur and ICTSI were to reject remittitur, the Court would be required to order a new trial on both liability and damages. Yet these positions are inconsistent with ILWU's earlier arguments. In resolving ILWU's post-trial motions, if the Court would have agreed with the argument now being made by ILWU and so fashioned a remittitur order, this would have been important information for ICTSI **[*6]** to consider before deciding whether to accept remittitur. This argument, however, was not made by ILWU until its pending motion for "reconsideration."

Gasoline Products and Hasbrouck, the cases cited by ILWU for its current argument, date from 1931 and 1981, respectively. They are not new law. ILWU's only argument for why it did not cite these decades-old cases in its post-trial motions and did not present the argument it now raises is that it did not need to because the Court had not yet ordered a new trial limited to damages. This argument is rejected.

ILWU should have raised this argument in its post-trial motions. ILWU requested the relief of remittitur and requested, in the alternative, a new trial limited to damages. Yet ILWU did not argue that if the Court were to grant this requested relief, the Court would be required to order a new trial on all issues, including liability. ILWU also specifically requested in its reply brief a new trial limited to damages, without expressing any issue based on Gasoline Products or Hasbrouck. Moreover, during oral argument on the post-trial motions, the Court expressed its concern with the testimony of ICTSI's damages expert, but ILWU did not **[*7]** raise any argument at that time about the need for a full retrial if the Court were to reject the jury's damage award as lacking in evidentiary support. Instead, ILWU again argued for a new trial limited to damages for the period from May 21, 2012 through August 13, 2013. When the Court asked ICTSI's counsel whether a new trial limited to damages could extend to the period including through 2017, depending on how the Court viewed the evidence, counsel for ILWU agreed, stating: "Right." ILWU gave no hint of its current position, either in briefs or at oral argument.

HN3[] It is inappropriate to raise an argument for the first time in a motion for reconsideration, absent good cause. *See* Shalit, 182 F.3d at 1132 (concluding that there was no abuse of discretion by district court in denying motion for reconsideration when movant offered no reason for failure to provide evidence when litigating underlying motion); Rosenfeld v. U.S. Dep't of Justice, 57 F.3d 803, 811 (9th Cir. 1995) ("The district court did not abuse its discretion in declining to consider an argument raised for the first time on reconsideration without a good excuse."). **HN4**[] "In the absence of new evidence or a change in the law, a party may not use a motion for reconsideration to raise arguments or present new evidence for **[*8]** the first time when it could reasonably have been raised earlier in the litigation." Cachil Dehe Band of Wintun Indians of Colusa Indian Cty. v. California, 649 F. Supp. 2d 1063, 1069 (E.D. Cal. 2009) (citing Carroll v. Nakatani, 342 F.3d 934, 945 (9th Cir. 2003)). ILWU has not shown good cause for not raising this argument earlier. Accordingly, ILWU's motion for reconsideration is denied. *Accord In re Galena Biopharma, Inc. Derivative Litig., 2014 U.S. Dist. LEXIS 154652, 2014 WL 5494890, at *2 (D. Or. Oct. 30, 2014)* (denying motion for reconsideration when movant raised new arguments that could have been presented during the substantive briefing of the original motion).[1]

B. Request for Certification for Interlocutory Appeal

HN5[] A district court may certify an order for interlocutory appeal when the district court finds "that such order involves a controlling question of law as to which there is substantial ground for difference of opinion and that an immediate appeal from the order may materially advance the ultimate termination of the litigation." *28 U.S.C. § 1292(b)*. A court may find a question of law "controlling" if its resolution "could materially affect the outcome of litigation in the district court." *In re Cement Antitrust Litig., 673 F.2d 1020, 1026 (9th Cir. 1982)*. A court may find substantial ground for difference of opinion when "reasonable jurists might disagree" about the resolution to the question of law at issue. *Reese v. BP Expl. (Alaska) Inc., 643 F.3d 681, 688 (9th Cir. 2011)*.

1. Whether a Controlling Question of Law Must be Purely a Legal Issue

HN6[] The first statutory requirement for certification for interlocutory **[*9]** appeal is that the requested issue or issues for appeal be a controlling question of law. The parties dispute whether the questions for review need to be "pure" legal issues or may be mixed questions of law and fact that would require the Ninth Circuit to review the record on appeal.[2] The Ninth Circuit has not specifically addressed this question outside the context of multidistrict litigation involving unusual issues of liability.[3]

---

[1] The Court granted ILWU's motion for new trial "relating to damages." The Court, however, has not yet described the parameters of that trial. Both parties cite *Great Coastal Exp., Inc. v. Int'l Bhd. of Teamsters, Chauffeurs, Warehousemen & Helpers of Am., 511 F.2d 839, 844-48 (4th Cir. 1975)*. Although the second trial in that case was limited to damages, the trial court there also allowed evidence and argument related to causation. Precisely how a second trial limited to damages will be structured here is an issue that the Court reserves for another day.

[2] This district court previously found persuasive the Seventh Circuit's discussion in *Ahrenholz v. Bd. of Trs., 219 F.3d 674, 677 (7th Cir. 2000)*, holding that ***HN7***[] under *§ 1292(b)*, a question of law is generally one that is "pure" or "abstract" and does not require a review of the record. *See, e.g., Columbia Sportswear N. Am., Inc. v. Seirus Innovative Accessories, Inc., 2020 U.S. Dist. LEXIS 12050, 2020 WL 403722, at *3 (D. Or. Jan. 24, 2020)*; *accord Schedler v. FieldTurf USA, Inc., 2018 U.S. Dist. LEXIS 7433, 2018 WL 451555 (D. Or. Jan. 17, 2018)* (explaining that the issue was not a controlling question of law in part because it was not a "pure" legal issue), *adopting Schedler v. FieldTurf USA, Inc., 2017 U.S. Dist. LEXIS 215616, 2017 WL 8948593 (D. Or. Oct. 16, 2017)* (citing *Ahrenholz* and concluding the issue was not a "pure question of law" and thus not controlling). The Seventh Circuit later held, however, that ***HN8***[] when the court of appeals is not asked to overturn any findings of fact, but instead "to determine the legal significance of a set of facts" by deciding whether a complaint met the pleading standard set forth in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, such a determination might be appropriate for interlocutory appeal. *In re Text Messaging Antitrust Litig., 630 F.3d 622, 625-26 (7th Cir. 2010)*. The court certified the case for interlocutory appeal despite the fact that such a review is often labeled as a "mixed question of law and fact," noting that such labels were "not helpful," and concluding that an appeal under *§ 1292(b)* "should not be precluded altogether by a narrow interpretation of 'question of law.'" *Id.* The court distinguished *Ahrenholz* because resolving the *Twombly* issue did not require "hunting through a record or immersing ourselves in a complicated contract." *Id. at 626*. The court further noted that ***HN9***[] "application of a legal standard is a controlling question of law," although "routine applications of well-settled legal standards to facts" are not. *Id.*

[3] In *Steering Committee v. United States, 6 F.3d 572 (9th Cir. 1993)*, the Ninth Circuit *sua sponte* addressed whether it could consider an interlocutory appeal of a mixed issue of law and fact "served the congressional purposes underlying *§ 1292(b)*." *Id.* (quoting *In re Air Crash Disaster at John F. Kennedy Int'l Airport on June 24, 1975, 479 F. Supp. 1118, 1126 (E.D.N.Y. 1978)*). The Ninth Circuit, however, has certified some cases under *§ 1292(b)* that are not multidistrict litigation actions yet involve mixed questions of law and fact. *See, e.g., Tahoe-Sierra Pres. Council, Inc. v. Tahoe Reg'l Planning Agency, 216 F.3d 764 (9th Cir.*

At oral argument, the parties clarified their positions on this issue. ILWU argues that so long as the resolution of the proposed question of law meets the requirement established in *In re Cement Antitrust Litig.* that resolution of the question could materially affect the outcome of the litigation in the district court, the question may be appropriate for certification for interlocutory appeal even if it requires a review of the record, particularly if it involves an important question of law. ICTSI argues that only "pure" questions of law are appropriate **[*10]** for certification. ICTSI further argues that the Ninth Circuit and district courts in the Ninth Circuit accept certification for mixed questions of law and fact only when there also is a "pure" question of law that has been certified.

Under either parties' interpretation of this factor, certification may be appropriate for the questions proposed for certification by ILWU, provided that resolution could materially advance the outcome of the litigation. This is because even under ICTSI's interpretation, there only needs to be one "pure" question of law, and the Court finds, as discussed below, that the question and fact, after noting that several other jurisdictions do not permit interlocutory review of such issues under *§ 1292(b)*. *Id. at 575*. In *Steering Committee*, the Ninth Circuit concluded that ***HN11***[] in "the liability phase of a multidistrict, multiparty litigation case," or what the court described as "'the issue of liability in such unusual cases,'" interlocutory appeal of mixed questions of law relating to the Court's interpretation of *Mead* is a pure question of law. Thus, the critical question for the "controlling question of law" factor in this case is whether the resolution of ILWU's proposed questions **[*11]** "could materially affect the outcome of litigation in the district court." *In re Cement Antitrust Litig., 673 F.2d at 1026*. The specific questions requested to be certified by ILWU are considered under this standard.

2. *Mead's* Application of Tort Principles to Dividing and Apportioning Damages

a. Waiver

ILWU requests interlocutory review of the Court's Opinion and Order resolving ILWU's post-trial motions ("Post-Trial Opinion"). *ICTSI Oregon, Inc. v. Int'l Longshore & Warehouse Union, 2020 U.S. Dist. LEXIS 38457, 2020 WL 1062881 (D. Or. Mar. 5, 2020)* (ECF 662). ILWU argues that the Court's citations in the Post-Trial Opinion to the Ninth Circuit's decision in *Mead v. Retail Clerks Int'l Ass'n Local Union No. 839, 523 F.2d 1371 (9th Cir. 1975)*, warrant interlocutory review because the Court interpreted *Mead* as applying tort principles, rather than antitrust principles. ILWU specifically challenges the Court's conclusions relating to divisibility (or separability) of damages and the burden of proof for apportionment of damages.

Although before trial ILWU argued that the Court—and not the jury—must determine divisibility (or separability) of damages as a matter of law, the Court allowed the jury to determine that issue. The Court also applied tort principles for apportionment, even though ILWU argued that the Court must find as a matter of law that ICTSI failed properly to apportion damages and thus failed to prove any damages. ILWU also **[*12]** argued that the Court must follow antitrust principles in this case and place the burden of proof on ICTSI to apportion damages, if the question of apportionment were sent to the jury. ILWU did not directly challenge any of these decisions in the post-trial motions and did not directly challenge the related jury instructions. Thus, the Court's interpretation of *Mead* relating to these decisions was not directly at issue in the post-trial motions and *Mead* was not cited for these propositions in the Post-Trial Opinion. To be precise, ILWU's current challenges in its request for interlocutory appeal are not directly to the Court's use of *Mead* in the Post-Trial Opinion but rather to the Court's pretrial rulings interpreting

---

2000), *aff'd*, *535 U.S. 302, 122 S. Ct. 1465, 152 L. Ed. 2d 517 (2002)*, *and overruled on other grounds by Gonzalez v. Arizona, 677 F.3d 383 (9th Cir. 2012)* (certifying under *§ 1292(b)* the question of a regulatory taking and specifically noting that whether government regulation of private property amounts to a regulatory taking "depends largely upon the particular circumstances [of each] case—that is, on essentially *ad hoc*, factual inquiries" and engaging in the requisite factual inquiry (alterations in original) (quoting *Penn Central Transp. Co. v. City of New York, 438 U.S. 104, 124, 98 S. Ct. 2646, 57 L. Ed. 2d 631 (1978)*)); *Tennenbaum v. Deloitte & Touche, 77 F.3d 337, 339-40 (9th Cir. 1996)* (certifying under *§ 1292(b)* the question of waiver of attorney-client privilege and stating that ***HN10***[] "[w]hether a holder has waived the right to claim the attorney-client privilege is a mixed question of law and fact which we review *de novo*.").

Mead. Ultimately, however, the Court's interpretation of Mead in the Court's pretrial rulings and jury instructions played a significant role in the outcome of this case, including the results reached in the Court's Post-Trial Opinion.

The two citations to Mead in the Post-Trial Opinion are not related to the Court's interpretation of Mead currently challenged by ILWU related to applying tort principles to divisibility and apportionment of damages. The Court cited Mead ***[*13]*** in the Post-Trial Opinion as an "accord" supporting authority after a string citation relating to "mixed motive" liability—supporting that when a union has a mixed motive (both lawful and unlawful) for conduct, if the unlawful objective is found to be a substantial motivating factor for the challenged activity, then all of the activity is considered unlawful. *ICTSI, 2020 U.S. Dist. LEXIS 38457, 2020 WL 1062881, at *12*. The court later cited Mead and one of the cases in the string cite for the proposition that if a union engaged in both unlawful activity and lawful activity and an unlawful motive (giving rise to the unlawfulness) was a substantial motivating factor for all the conduct, then all damages caused by that conduct are recoverable. *2020 U.S. Dist. LEXIS 38457, [WL] at *14*.[4] ICTSI argues that because ILWU did not specifically challenge in its post-trial motions the Court's pretrial rulings or jury instruction relating to the Court's interpretation of Mead applying tort principles to separability and apportionment, ILWU waived its ability to request interlocutory review of the Court's interpretation of Mead on this issue. The Court rejects ICTSI's argument.

Both the Supreme Court and the Ninth Circuit have held that **HN12**[] "an appellate court's interlocutory jurisdiction **[*14]** under *28 U.S.C. § 1292(b)* permits it to 'address any issue fairly included within the certified order because it is the *order* that is appealable, and not the controlling question identified by the district court.'" *Nevada v. Bank of Am. Corp., 672 F.3d 661, 673 (9th Cir. 2012)* (quoting *Yamaha Motor Corp. v. Calhoun, 516 U.S. 199, 205, 116 S. Ct. 619, 133 L. Ed. 2d 578 (1996)* (emphasis in original)); *see also* *Yamaha Motor Corp., 516 U.S. at 205* (noting that the "scope of interlocutory review [includes] all issues material to the order in question" (alteration in original) (quoting Note, "*Interlocutory Appeals in the Federal Courts Under § 1292(b)*," 88 Harv. L. Rev. 607, 628-29 (1975)). A court of appeals may not, however, "reach beyond the certified order to address other orders made in the case." *Id.* Although the Court's Post-Trial Opinion only cited Mead for two discrete issues, the Court's understanding of the burden of proof and the sufficiency of the evidence relating to causation and damages was guided by the Court's interpretation of Mead applying tort principles to divisibility and apportionment, and that interpretation was material to most of the Court's conclusions. In fact, most of the Court's conclusions in the Post-Trial Opinion may be fairly construed as including the Court's interpretation of Mead reflected in the Court's pretrial rulings and jury instructions. Thus, ILWU has not waived its right to have this issue **[*15]** considered.

b. Controlling question of law

Whether the Court correctly interpreted Mead regarding applying tort principles instead of antitrust principles to the issues of divisibility of damages and the proper allocation of the burden of proof for apportionment in a case under *29 U.S.C. § 187* is a controlling question of law that could materially affect the outcome of this litigation. If ILWU's interpretation is correct, then the jury's liability determination may not survive review and a new trial limited to damages could be a waste of the parties' and the Court's resources.

Further, the proper interpretation of *Mead* on this issue is a "pure" question of law. Thus, regardless of whether a mixed question of law and fact is appropriate for certification under *§ 1292(b)*, this specific question is appropriate for certification. It does not involve the "routine application of a well-settled legal standard" because the standard is not well-settled. *See* *In re Text Messaging Antitrust Litig., 630 F.3d 622, 626 (7th Cir. 2010)*. And although applying whatever legal standard is ultimately found to be the correct legal standard to the facts of this case would involve

---

[4] To the extent ILWU requests certification of the Court's citations to Mead in the Post-Trial Opinion for the two discrete issues for which it was cited, the Court declines certification. The Court cited Mead as one authority among others supporting "routine applications of well-settled legal standards to facts," which is not considered a controlling question of law for purposes of interlocutory review. *See* *In re Text Messaging Antitrust Litig., 630 F.3d at 626*.

consideration of the facts, ***HN13***[] "[d]ecisions holding that the application of a legal standard is a controlling question of law **[*16]** within the meaning of *section 1292(b)* are numerous." *Id.* (citing cases).

c. Substantial ground for disagreement

ILWU argued before trial that *Mead* incorporates antitrust principles of apportionment and places the burden on ICTSI to prove that no other factors other than illegal labor activities caused damage to ICTSI. This argument is based on *Mead's* statements that labor law derives from ***antitrust law***. *See Mead, 523 F.2d at 1376-78* (citing and quoting antitrust cases for legal principles to apply and noting the "exact parallel" of problems for plaintiffs in labor cases and antitrust cases trying to prove lost profit damages).

Before trial, however, ICTSI argued, and the Court held, that *Mead* incorporates tort principles relating to apportionment for that specific causation issue. As stated by the Ninth Circuit in *Mead*:

> ***HN14***[] The rules of causation imported into the statutory scheme through the "by reason of" language of *section 303* afford a means of dealing with at least the extremes of the problem. The requirement that the unlawful objective must have "materially contributed" to the loss or have been a "substantial factor" in bringing it about, will prevent windfall recoveries by employers negligibly affected by a violation, and protect the **[*17]** union's right to strike for primary objectives where such objectives, standing alone, would have caused the strike, but the unlawful objective, standing alone, would not. *Restatement (Second) of Torts § 432*; W. Prosser, *Law of Torts* § 41, at 238-40 (4th ed. 1971); 2 F. Harper & F. James, *Torts* § 20.3, at 1121-23 (1956). On the other hand, a relatively relaxed standard of proof, allowing recovery on evidence supporting "a just and reasonable inference," more likely true than not, that the employer was damaged because of picketing or other union pressure will assure recovery in most cases in which the unlawful motivation was a significant factor producing the union pressure.

Mead, 523 F.2d at 1379; *see also id. at 1376* (quoting the Restatement (Second) of Torts in support of the "substantial factor" standard, and stating that the "by reason of" text "is read as incorporating common law principles of causation," the same as in antitrust cases).

In crafting the jury instructions here, the Court considered the most recent Restatement, the Restatement (Third) of Torts, instead of the Restatement (Second) of Torts, which was the Restatement in effect when *Mead* was decided.[5] The Court determined that the damages here might be capable of divisibility, or separation, depending **[*18]** on the evidence presented at trial, and thus the Court asked the jury to decide the issue, as instructed by both the Restatement (Second) of Torts and the Restatement (Third) of Torts. The Court also asked the jury to decide whether ILWU engaged in any lawful labor activity (the jury's answer was "no") and whether any lawful activity or nonlabor factors caused any damage to ICTSI (again, the jury's answer was "no"). Because both these answers were "no," the jury did not need to answer the question about divisibility.

In considering divisibility and apportionment, and whether to apply antitrust or tort law principles, the Court also relied on the Ninth Circuit's decision in *Frito-Lay, Inc. v. Local Union No. 137, Int'l Bhd. of Teamsters, Chauffeurs, Warehousemen & Helpers of Am., 623 F.2d 1354 (9th Cir. 1980)*. In *Frito-Lay*, the Ninth Circuit stated:

> Appellants claim that the underlying object of the strike was lawful to obtain increased economic benefits for its members even though the attempt to force multi-employer bargaining was unlawful. They argue that to recover damages Frito-Lay must either (1) distinguish between the effects of the legal and illegal objectives, or (2) if those effects are not separable, establish that the strike would not have occurred absent the illegal objectives.
>
> *Mead* ***HN15***[] does not require that the **[*19]** illegal object be the sole cause of the strike, only that it be a "substantial" cause or that it "materially contribute" to the injury, "notwithstanding other factors contributed also." *523 F.2d at 1376-77*. The Union's argument misapprehends the principles applicable to proof of

[5] ICTSI argued that under the Restatement (Second) of Torts, the burden also was on ILWU.

> causation in cases such as this. **HN16**[] *The controlling rules derive from tort law principles where more than one factor can be a substantial cause*, and no single factor need be the sole causative element. Here the district court properly found the illegal objective to be at least a substantial if not the sole cause of the strike; from this the court could reasonably infer a causal relationship between the illegal objectives and the damages attributable to the strike.

Id. at 1362-63 (emphasis added).

Many cases under labor law decline to apportion damages in the manner argued by ILWU. *See, e.g., R.L Coolsaet Constr. Co. v. Local 150, Int'l Un. Of Operating Eng'rs, 177 F.3d 648, 660 (7th Cir. 1999)*; *Abreen Corp. v. Laborers' Int'l Un., N.A., AFL, AFL-CIO, 709 F.2d 748, 758-60 (1st Cir. 1983)*; *Pepsi-Cola Co. v. Rhode Island Carpenters Dist. Council, 962 F. Supp. 266, 282-83 (D.R.I. 1997)*. Jury instructions under labor law generally focus on what the Court instructed here—that a union may only be held liable for unlawful conduct and defining what that means. **HN17**[] Cases under ***antitrust law***, however, may require more specific apportionment of damages **[*20]** by the plaintiff. *See, e.g., Schiller & Schmidt, Inc. v. Nordisco Corp., 969 F.2d 410, 415-16 (7th Cir. 1992)*; *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1376-79 (2d Cir. 1988)*; *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1351-53 (3d Cir. 1975)*.

ILWU requested a modified version of the American Bar Association's Antitrust Model Jury Instruction No. 4: Causation and Disaggregation. This proposed instruction would require placing the burden on ICTSI to prove that no other factor, such as nonlabor factors or any lawful labor activity engaged in by ILWU, caused ICTSI's damages, and to require ICTSI to provide evidence from which damages may be apportioned between illegal labor activity and any other factor. ILWU argued that if ICTSI did not provide evidence from which a jury could apportion damages, then a verdict must be entered for ILWU. ILWU argued that ICTSI had this burden of apportionment, even if ILWU's unlawful purpose was a substantial factor in motivating ILWU's conduct.

HN18[] Under tort law principles, however, the burden of apportionment is placed on the party arguing for divisibility. Under the *Restatement (Third) of Torts, § 26*, a jury determines divisibility and apportionment unless the issue is without dispute or a court determines that no reasonable jury could find the damages to be divisible. The party arguing for divisibility and apportionment has the burden of proof on both divisibility **[*21]** and the magnitude of each divisible part. *See, e.g.*, *Restatement (Third) of Torts: Apportionment Liab. § 26 cmt. h (2000)* ("Whether damages are divisible is a question of fact. A party alleging that damages are divisible has the burden to prove that they are divisible. . . . The magnitude of each divisible part is also a question of fact. The burden to prove the magnitude of each part is on the party who seeks division.").

Thus,**HN19**[] there is conflict between antitrust principles and tort principles relating to divisibility and apportionment, particularly on the burden of proof. *Mead* cites and incorporates both ***antitrust law*** and tort law. In issuing its pretrial rulings, the Court found the following persuasive: (1) *Mead's* discussion and citation to tort principles on causation; (2) *Frito-Lay's* interpretation of *Mead*; and (3) the application of labor law, including *Mead*, by courts in this circuit and other jurisdictions. These pretrial rulings permeate throughout the Court's Post-Trial Opinion.

Mead, however, also specifically referenced and incorporated ***antitrust law***. The application of ***antitrust law*** may support ILWU's argument. The Court struggled with this issue and asked for supplemental briefing from the parties, who cited differing authorities. **[*22]** Reasonable jurists could disagree on whether the Court should have applied tort law principles or ***antitrust law*** principles in this context, and whether applying ***antitrust law*** principles would have made a difference in the outcome of the Court's pretrial rulings, jury instructions, or the Post-Trial Opinion in this case. Thus, this factor supports certification.

d. Materially advance the ultimate termination of the litigation

HN20[] "Courts within the Ninth Circuit have held that resolution of a question materially advances the termination of litigation if it 'facilitate[s] disposition of the action by getting a final decision on a controlling legal issue sooner, rather than later [in order to] save the courts and the litigants unnecessary trouble and expense.'" *Finder v. Leprino Foods Co., 2016 U.S. Dist. LEXIS 100417, 2016 WL 4095833, at *4 (E.D. Cal. Aug. 1, 2016)* (alterations in original) (quoting *United States v. Adam Bros. Farming, Inc., 369 F. Supp. 2d 1180, 1182 (C.D. Cal. 2004)*). If the Ninth Circuit reviews on interlocutory appeal the district court's application of tort principles to divisibility and apportionment of damages for claims under *29 U.S.C. § 187*, that would materially advance the litigation under the unique circumstances of this case because it may prevent an otherwise unnecessary second trial (or even a third, of the second trial is not done consistently with the Ninth Circuit's **[*23]** view of the law). Further, if ILWU's arguments prevail, then a second trial limited to damages may be unnecessary. ILWU may prevail as a matter of law or may prevail in obtaining a new trial on both liability and damages. If a new trial limited to damages is held before this issue is resolved on appeal and if ILWU were to prevail on appeal, a second trial would result in a significant waste of the parties' and the district court's resources.

3. The Court's Finding that ICSTI Remained a Secondary Employer

ILWU argued in its motions under *Rule 50(b)* that ICSTI entangled itself in the "vortex" of ILWU's dispute with the Port of Portland (the "Port") to such a degree that ICTSI lost its status as a "secondary employer." The Court rejected this argument, holding that ICTSI did not so entangle itself the Port or with ILWU's dispute with the Port as to lose ICTSI's status as a secondary employer. The Court also found that to the extent there were labor activities between ILWU and ICTSI that were lawful primary activities, there was sufficient evidence in the record to support a finding by the jury that ILWU's unlawful objective was a substantial motivating factor for ILWU's conduct and thus, as the jury **[*24]** found, all of the challenged conduct was unlawful. ILWU requests certification of this decision.

a. Controlling question of law

As discussed above, for this factor the Court focuses on whether resolution of the proposed question could materially affect the outcome of this litigation before the district court. It could. If ILWU prevails in its argument, ILWU might be entitled to judgment as a matter of law. Thus, this factor is satisfied.

b. Substantial ground for disagreement

ILWU argues that Congress and the Supreme Court have mandated that secondary liability be narrowly construed and that the jury's interpretation of the evidence and the Court's construction is too expansive. Although the Court finds this to be a closer call than the issue of whether tort or antitrust principles apply to divisibility and apportionment in labor law, the Court nevertheless concludes that if certification is accepted, there would be a benefit to having these challenged issues considered together and that reasonable jurists could disagree on this issue. Thus, this factor is met.

c. Materially advance the termination of the litigation

For the same reasons discussed above, this factor is satisfied. Under the **[*25]** unique circumstances of this case, if ILWU prevails in its argument, ILWU might be entitled to judgment as a matter of law.

4. The Court's Determination on ILWU's Waiver

ILWU also challenged in its motions under *Rule 50(b)* certain evidence from ICTSI's experts. In response to ILWU's motions under *Rule 50(b)*, ICTSI objected that ILWU had waived its right to challenge that evidence by failing to include its objections in its pretrial *Daubert* motions and other pretrial filings. In its Post-Trial Opinion, the Court held that although ILWU included these challenges in its *Rule 50(a)* motions, it had not raised many of these later objections to ICTSI's expert testimony in any pretrial objection or timely raised those objections during trial, specifically during the relevant expert's testimony or at the earliest reasonable time after the basis for the objection became apparent. Thus, the Court held, ILWU waived its right to challenge those aspects of expert testimony for purposes of its motion under *Rule 50(b)*. ILWU requests certification of the Court's ruling that ILWU's challenges to expert testimony that ILWU raised in its motion under *Rule 50(a)* but did not preserve before or during trial were waived for purposes of *Rule 50(b)*.

ILWU's question regarding **[*26]** waiver might not be a "controlling question of law." Reversing the Court's findings of waiver relating to ILWU's challenges to certain testimony by ICTSI's expert witnesses would not materially affect the outcome of the litigation before this Court. Regarding ILWU's challenges to ICTSI's causation expert Dr. Bryce Ward, the Court made an alternative finding on the merits. Thus, any possible harm to ILWU by any potential erroneous ruling by the Court in finding waiver was mitigated by the Court's alternative merits determination.

Regarding the Court's finding of waiver of some of ILWU's challenges to ICTSI's damages expert Mr. Jay Sickler, even if the Court erroneously found waiver and even if the Court would have accepted ILWU's challenges and excluded Mr. Sickler's testimony, that would not materially affect the outcome of this case. The Court denied ILWU's *Rule 59(a)* motion based on challenges to Mr. Sickler's testimony conditioned on ICTSI's acceptance of remittitur. Because ICTSI rejected remittitur, the Court, in effect, granted ILWU's *Rule 59(a)* motion based on challenges to Mr. Sickler's testimony. The Court ordered a new trial limited to damages.

ILWU's current request for interlocutory appeal would **[*27]** only materially affect the outcome of this litigation if it could result the Court granting ILWU's *Rule 50(b)* motion. Even if ILWU's challenges to Mr. Sickler's testimony that were considered waived had been accepted by the Court, and if Mr. Sickler's testimony was thus excluded at trial, there was still sufficient evidence of damage presented by ICTSI as of the close of its case-in-chief for the case to go to the jury. The other evidence of damage included at least: (1) evidence of the fee paid by ICTSI to terminate the lease; (2) testimony from Elvis Ganda, President and Chief Executive Officer of ICTSI, regarding estimated shipping volume through 2012 that, in his opinion, would have occurred but for the labor dispute; (3) Mr. Ganda's testimony regarding the rates ICTSI charged for shipping volume; and (4) testimony from James Mullen, ICTSI's former Director of Labor and Terminal Services, regarding the lost volume from shipping companies that had to bypass Terminal 6 in the summer of 2012. Thus, even without Mr. Sickler's testimony, there was evidence of at least some damage to ICTSI sufficient to withstand a *Rule 50(a)* motion at the close of Plaintiff's case-in-chief, and also warranting the denial **[*28]** of a renewed motion under *Rule 50(b)*.

Although the Court declines to certify this specific issue for interlocutory appeal, the Court notes that it is an issue fairly included within the Post-Trial Opinion and thus is nevertheless eligible for interlocutory appeal along with the controlling questions certified by this Court. *See Bank of Am., 672 F.3d at 673*; *see also Yamaha Motor Corp., 516 U.S. at 205*. The Court expresses no opinion on whether the Ninth Circuit should include this non-controlling but related issue if the Ninth Circuit decides to accept interlocutory review of the other issues certified in this Opinion and Order.

C. Motion for Stay Pending Appeal

Finally, ILWU moves to stay pending appeal a second trial limited to damages. ILWU argues that moving forward with a second trial limited to damages could be a waste of the parties' and the district court's resources. If ILWU were to prevail on interlocutory appeal on some or all the issues that it has raised, then a second trial may be unnecessary or may significantly change in scope.

HN21[] A district court may stay a case pending interlocutory appeal. *See 28 U.S.C. § 1292(b)*; *see also Lakeland Vill. Homeowners Ass'n v. Great Am. Ins. Grp., 727 F. Supp. 2d 887, 897 (E.D. Cal. 2010)*. Filing an interlocutory appeal does not automatically stay proceedings in the district court, but a district court may grant a stay to "promote **[*29]** economy of time and effort for itself, for counsel, and for litigants." *Filtrol Corp. v. Kelleher, 467 F.2d 242, 244 (9th Cir. 1972)*. "A stay is not a matter of right, [however,] even if irreparable injury might otherwise result." *Nken v. Holder, 556 U.S. 418, 433, 129 S. Ct. 1749, 173 L. Ed. 2d 550 (2009)*. Instead, it is "an exercise of judicial discretion." *Id.* In deciding whether to order a stay pending interlocutory appeals, courts traditionally balance four factors: (1) whether the stay applicant has made a strong showing that he is likely to succeed on the merits; (2) whether the applicant will be irreparably injured absent a stay; (3) whether issuance of the stay will substantially injure the other parties interested in the proceeding; and (4) where the public interest lies. *Id. at 434*; *Scallon v. Scott Henry's Winery Corp., 2015 U.S. Dist. LEXIS 134617, 2015 WL 5772107, at *1 (D. Or. 2015)*. The first two factors are the most critical. *Nken, 556 U.S. at 433-34*.

The Ninth Circuit has discussed at length the first factor and what a moving party must show with regard to success on the merits, reviewing *Nken* and other Supreme Court and circuit court cases. *Leiva-Perez v. Holder, 640 F.3d 962, 966-68 (9th Cir. 2011)*. ***HN22***[] The Ninth Circuit has explained that "[t]here are many ways to articulate the minimum quantum of likely success necessary to justify a stay—be it a 'reasonable probability'[;] 'fair prospect'; 'a substantial case on the merits'; or that 'serious legal questions are raised.'" *Id. at 967-68* (citations omitted). **[*30]** The Ninth Circuit concluded that however the standard is articulated, it does not "demand a showing that success is more likely than not." *Id. at 968*. Although ILWU has not shown that success is more likely than not, it raises serious legal questions, and denying a stay risks causing irreparable injury to ILWU. Further, staying this action will not likely cause substantial injury to ICTSI, especially in light of the fact that ICTSI ceased all operations at the Port in 2017. A stay also will serve the public interest by avoiding potentially wasteful use of the parties' and the district court's resources. Balancing all factors and considering the unique circumstances of this case, the Court exercises its discretion and grants a stay pending appeal.

CONCLUSION

The Court GRANTS ILWU's motion for certification for interlocutory appeal under *28 U.S.C. § 1292(b)*. ECF 664. The Court CERTIFIES for interlocutory appeal its Opinion and Order dated March 5, 2020. ECF 662. The Court also STAYS all proceedings before this Court pending final action by the Ninth Circuit on ILWU's interlocutory appeal. The parties are directed to file a joint status report within two weeks after any final action by the Ninth Circuit on ILWU's petition **[*31]** for interlocutory review.

IT IS SO ORDERED.

DATED this 28th day of May, 2020.

Opinion

ORDER

A review of the papers, record, precedent, and scholarly literature reveals that the magistrate judge's report and recommendation (Doc. 240) warrants adoption. However, the circumstance justifies a few comments on some points the plaintiff raises in objection and on the report in general.

First, the argument that tyntec inherited a "preexisting voluntary **[*2]** and . . . profitable"[1] course of dealing by virtue of Iris's contract assignment is weak, at best.[2] (Doc. 250 at 20-1) Because a course of dealing, considered in the

---

[1] *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1074 (10th Cir. 2013)*.

antitrust context, sheds "light upon the motivation of [the] refusal to deal," *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 409, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, the course of dealing between Iris and Syniverse imputes no probative course of dealing to tyntec and Syniverse, who were strangers before the assignment. Although Iris and Syniverse's prior course of dealing might retain some evidentiary value on some issue and, in that sense, might acquire some "relevance," the Iris and Syniverse course of dealing establishes neither a voluntary and profitable course of dealing between Syniverse and tyntec nor a perennial course of dealing in the inter-carrier vendor (ICV) market. Both logic and the protean economics of the ICV market caution strongly to the contrary.

Second, a year into this action, tyntec offered Syniverse more than forty-thousand dollars if Syniverse would agree to a free peering relationship. tyntec argues that Syniverse manifested "exclusionary practices" by rejecting this offer and forbearing short-term profits. (Doc. 116 at 10-11) The notion that Syniverse's rejection of tyntec's **[*3]** eleventh-hour offer exemplifies Syniverse's "anti-competitive" motivation will not cohere. The antitrust laws obligate a court to "look back in time to the marketplace as it once was and . . . not as it now is." *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1071 (10th Cir. 2013)*. Further, "the bringing of a lawsuit . . . may provide a sound business reason for . . . terminating [business] relations." *House of Materials, Inc. v. Simplicity Pattern Co., 298 F.2d 867, 871 (2d Cir. 1962)*). And Syniverse provides several other reasons for the decision to discontinue a peering relationship. Thus, because tyntec initiated the peering offers a year after suing Syniverse and because Syniverse states a reasonable basis for refusing to deal, Syniverse's refusal to accept tyntec's eleventh-hour peering offers displays no "willingness to sacrifice short-term profits" within the contemplation of *Section 2*. Therefore, Syniverse's rejection of tyntec's proposals constitutes no ongoing refusal to deal and serves no useful evidentiary function.

* * *

Section 2 of the Sherman Act provides, "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, . . . shall be deemed guilty of a felony." Although monopolistic behavior typically comprises **[*4]** collusive or conspiratorial conduct, ***antitrust law*** recognizes in a limited circumstance the potential for monopolistic behavior to manifest in unilateral conduct. An anticompetitive refusal to deal is one of these limited circumstances. But "refusal to deal" jurisprudence comes shrouded in "weak" and precarious doctrinal justification. ROBERT H. BORK, THE ANTITRUST PARADOX: A POLICY AT WAR WITH ITSELF 346 (1993) ("[T]he doctrinal justifications for the differences in [refusal to deal] outcome[s] appear weak."). Accordingly, a posture of restraint should guide the analysis of antitrust liability for a refusal to deal. This is not to suggest that "refusal to deal" jurisprudence lacks any proper place in antitrust jurisprudence or serves no benefit in averting monopolistic conduct; rather, this is to suggest that "refusal to deal" jurisprudence needs no further muddling — an inevitable result if unwarranted liability is imposed in a case such as tyntec's.

Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985), a seminal precedent for "refusal to deal" doctrine (and a case on which tyntec heavily relies), falls "at or near the outer boundary of § 2 liability," as characterized in *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 409, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, which circumscribes *Aspen* within its idiosyncratic facts and **[*5]** which consequently constricts "refusal to deal" liability.

Eleventh Circuit precedent further constricts the boundary of "refusal to deal" liability and narrows the conduct that falls within the boundary. *See, e.g., Morris Communications Corp. v. PGA Tour, Inc., 364 F.3d 1288 (11th Cir. 2004)*; *Covad Communications Co. v. BellSouth Corp., 374 F.3d 1044 (11th Cir. 2004)*. At whatever undescribed boundary "refusal to deal" liability might lie following *Aspen, Trinko, Morris, Covad, Novell*, and similar precedent, Syniverse's business conduct — pervaded by deliberative, understandable, reasonable, and lucid efficiency justifications — falls somewhere outside the boundary of Section 2 liability.

---

[2] *But see Steward Health Care Sys., LLC v. Blue Cross & Blue Shield of Rhode Island, 997 F. Supp. 2d 142, 154 (D.R.I. 2014)* (declining to grant a motion to dismiss because "the Court is not aware of case law that would preclude consideration of [the assignor's] direct prior course of dealing with [the defendant]").

tyntec's action stands consequentially distinct from *Aspen*, some of which distinctions warrant remark.[3] The parties in *Aspen* shared a longstanding business relationship that created a "joint venture"; Syniverse and tyntec were essentially strangers until the assignment of Iris's contract. The parties in *Aspen* shared a voluntary and mutually profitable relationship; Syniverse and tyntec shared no relationship but for a contractually imposed duty induced by a third party. The *Aspen* defendant's conduct introduced a sudden and unexpected reversal into the parties' course of dealing; assuming (generously) a course of dealing between Syniverse and tyntec, Syniverse's **[*6]** conduct was foreseeable and anticipatorily announced. The *Aspen* defendant's conduct inflicted monetary loss on the defendant; Syniverse's conduct guaranteed higher profit.[4] The *Aspen* defendant refused to sell products to the competitor at a retail price despite the defendant's selling to others in the relevant market at a retail price; Syniverse offered to tyntec services at precisely the "retail" price offered to entities similarly situated to tyntec.[5] The *Aspen* defendant's refusal generated disgruntled consumers who lacked a meaningful, alternative product option; Syniverse's refusal generated one potentially dissatisfied customer, which ultimately denied Syniverse's offer for services and pursued an alternative.[6] The *Aspen* defendant offered no legitimate business justification or efficiency defense for the challenged conduct; Syniverse offers an array of business justifications, all of which comport with a goal to perpetuate profit.

Given these differences, permitting liability for Syniverse's conduct is to mistakenly permit the proverbial camel to pass through the unusually impassable "narrow-eyed needle of refusal to deal doctrine." *Novell, 731 F.3d at 1074*. "[T]he limits on the **[*7]** administrative capacities of courts to police market . . . transactions,"[7] the judiciary's duty to foster predictable rules and results on which a business can rely, and the "presumption of freedom [ ] appropriate to a free market economy"[8] — even taken singularly, but especially taken collectively — commend judicial restraint unless distinct evidence reveals the refusal as predatory. As *Novell* states, "If the doctrine . . . must err still to some slight degree, perhaps it is better that it should err on the side of firm independence." *731 F.3d at 1076*.

In sum, tyntec fails to establish a causal link between Syniverse's ostensibly "anti-competitive refusal" and injury to consumers and competition, Syniverse's behavior fails to qualify as "predatory" conduct within the meaning contemplated by *Section 2*, and the magistrate judge's cogent report offers still other persuasive reasons for

---

3 Although aptly summarizing the facts in, and ably applying the law of, *Aspen*, the report perhaps awkwardly analogizes Syniverse's free peering to free skiing on a competitor's mountain. However, no awkwardness in any of the report's analogies undermines the balance of the report's well-reasoned and thorough analysis.

4 Syniverse's charging tyntec for ICV services suggests an aim to increase short-term profit. That is, tyntec cannot reasonably argue that the only possible reason for Syniverse's terminating the free peering arrangement was to exclude tyntec from the market. If tyntec accepted Syniverse's offer, the result would guarantee immediate short-term profit for Syniverse. Thus, although Syniverse's rejection of free peering "may suggest a hard-nosed intent to undo rivals" (which is unactionable conduct by itself), the rejection suggests no "inten[t] to forgo profits." *Novell, 731 F.3d at 1078*. Even if cast as "raising rivals' costs," as attempted by tyntec, that description fails to "displace *Aspen* and *Trinko*'s profit-sacrifice test in the narrow world of refusal to deal cases." *Novell, 731 F.3d at 1079*. tyntec clearly cannot satisfy *Trinko*'s profit-sacrifice test. The record lopsidedly establishes that Syniverse retained a profit-seeking incentive throughout the entirety of Syniverse's negotiations with tyntec. The desire to defeat competition, if coupled with legitimate business or efficiency explanations, defeats antitrust liability.

5 Although tyntec disputes similarity to these entities, tyntec itself analogizes the business services of these entities to tyntec's own business services.

6 Of course, tyntec argues that many more customers will become dissatisfied because Syniverse will eventually charge monopolistic prices — after Syniverse routs tyntec out of the market. Determining the accuracy of broad, speculative, and attenuated assumptions such as this, even if correct, falls outside the judiciary's expertise. Further, the *Aspen* defendant and plaintiff were the only two participants in the construed "market," but more options exist for ICV customers. Thus, tyntec's argument falters in any event.

7 *Novell, 731 F.3d at 1072*.

8 BORK, THE ANTITRUST PARADOX, at 344.

granting summary judgment in favor of Syniverse. However, if summary judgment in favor of Syniverse is proper for no other reason, "[w]here an efficiency potential appears in a case involving an individual refusal to deal, and there is no clear evidence that the purpose of the refusal was predatory, courts," philosopher-kings, central **[*8]** planners, "experts," and many others are ill-equipped and ill-advised to meddle in an independent industry by imposing antitrust liability for routine refusals to deal. BORK, THE ANTITRUST PARADOX, at 346. History suggests that in any event the undertaking would not meet with success.

The magistrate's report and recommendation (Doc. 240) is **ADOPTED**. tyntec's motion (Doc. 116) for summary judgment is **DENIED**, and Syniverse's motion (Doc. 119) for summary judgment is **GRANTED**. The clerk is directed to enter judgment in favor of Syniverse and against tyntec, and the clerk is directed to close the case.

ORDERED in Tampa, Florida, on May 29, 2020.

Opinion

[*884] **MEMORANDUM OPINION AND ORDER**

The Commonwealth of Kentucky alleges that Defendants **[**2]** Marathon Petroleum Corporation, Marathon LP, and Speedway LLC violated federal antitrust laws by overcharging consumers for gasoline. (Docket No. 88) Marathon Petroleum Corporation asserts that the Court may not exercise personal jurisdiction over it and moves for summary judgment on that ground. (D.N. 156) Following oral argument, the Court directed the parties to file supplemental briefs addressing the impact of the Clayton Act's nationwide service-of-process provision on the Court's jurisdiction over Marathon Petroleum Corporation. (D.N. 224) For the reasons stated below, the Court finds that it has personal jurisdiction over Marathon Petroleum Corporation and will therefore deny Marathon Petroleum Corporation's motion for summary judgment on personal-jurisdiction grounds. The Court will, however, grant Defendants' motion to exclude the Commonwealth's expert witness, Dr. Michael Sattinger (D.N. 191), and therefore also grant Defendants' motion for summary judgment on the merits. (D.N. 195)

[*885] I.

The factual background is nearly unchanged since the Court's ruling on Marathon Petroleum Corporation's motion to dismiss (D.N. 147); thus, only a brief summary of the facts is necessary here. **[**3]**

Marathon Petroleum Corporation, together with its subsidiaries Marathon LP and Speedway LLC, is one of the largest petroleum-product refiners, marketers, and transporters in the United States. (D.N. 88, PageID # 1093) "Marathon" is the largest refiner in the Midwest and owns the only refinery in Kentucky. (*Id.*, PageID # 1089) It is also the largest gasoline supplier in Kentucky and largest reformulated gasoline (RFG) supplier in Louisville and Northern Kentucky. (*Id.*)

The Commonwealth claims that Marathon's market share "has allowed [Marathon] to illegally manipulate and attempt to manipulate the market for RFG in . . . Louisville and [Northern Kentucky] (hereinafter "LNK.")." (*Id.*) Specifically, the Commonwealth contends that Marathon maintains its market dominance through a variety of contractual arrangements, including the anticompetitive use of specialized supply agreements known as exchange agreements. (*See* D.N. 147 (summarizing the practices the Commonwealth alleges violate ***antitrust law***); *see also infra*, Part III.B., for detailed definition of exchange agreements) As a result of these practices, the Commonwealth asserts, Marathon has caused the wholesale and retail prices of RFG **[**4]** to be substantially higher in Kentucky than those found in comparative competitive markets. (*Id.*, PageID # 1101)

The Commonwealth filed this suit against Marathon LP on May 12, 2015, alleging violations of the Sherman Antitrust Act and the Clayton Act. (D.N. 1) On November 7, 2017, the Commonwealth amended its complaint to add Marathon Petroleum Corporation and Speedway, LLC as defendants, invoking the Clayton Act. (D.N. 88) Marathon Petroleum Corporation moved to dismiss for lack of personal jurisdiction and failure to state a claim. (D.N. 92) Marathon Petroleum Corporation's personal-jurisdiction argument hinged on the company's allegedly insufficient contacts with the forum state. Marathon Petroleum Corporation claimed that as a parent corporation it has no direct connections with Kentucky and that Kentucky's long-arm statute thus does not allow this Court to exercise jurisdiction over Marathon Petroleum Corporation. The Court denied the motion to dismiss. (D.N. 147) Marathon Petroleum Corporation now seeks summary judgment, again arguing that it lacks the necessary contacts with the forum state. (D.N. 156)

The Court heard oral argument on the motion for summary judgment on October **[**5]** 18, 2019. (D.N. 224) After the hearing, the Court directed the parties to file supplemental briefs addressing the application of *15 U.S.C. § 22* and the Sixth Circuit's holding in *Carrier Corp. v. Outokumpu Oyj, 673 F.3d 430 (6th Cir. 2012)*, to the parties' positions on personal jurisdiction. (D.N. 224) Specifically, the Court asked the parties to address whether personal jurisdiction was proper in this action anywhere within the United States because of the Clayton Act's national service-of-process provision. *See* *Carrier Corp., 673 F.3d at 449-50* (holding that under the Clayton Act, "personal jurisdiction exists whenever the defendant has 'sufficient minimum contacts with the United States' to satisfy the due process requirements under the *Fifth Amendment*"); *see also* *In re Auto. Refinishing Paint Antitrust Litig., 358 F.3d 288, 297-98 (3d Cir. 2004)* (finding that nationwide service of process is appropriate under the Clayton Act if the defendant has sufficient minimum contacts with the **[*886]** United States). In its supplemental brief, Marathon Petroleum Corporation argues for the first time that venue in the Western District of Kentucky is improper under the Clayton Act, and that proper venue is a prerequisite to application of the nationwide service-of-process provision addressed in *Carrier.* (D.N. 228) Neither party addressed venue in its briefs on the motion for summary judgment, so the **[**6]** Court bases its conclusions on the legal arguments presented in the post-hearing briefs.

II.

A. Clayton Act

Because the Court must decide whether it can exercise personal jurisdiction over Marathon Petroleum Corporation before it may rule on the substantive motions, the Court will consider Marathon's motion for summary judgment on personal jurisdiction first.

Marathon argues that for the Clayton Act's nationwide service-of-process provision to apply, the Act's venue provision must also be satisfied. The Clayton Act prohibits numerous business practices that can result in antitrust injury to consumers. Both the nationwide service-of-process provision discussed above and the Clayton Act's venue provision are found in *15 U.S.C. § 22*, which states:

> Any suit, action or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business [venue provision]; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found [nationwide service-of-process provision].

15 U.S.C. § 22.

In their post-hearing briefs, the parties focus on the circuit **[**7]** split regarding whether the venue and service-of-process provisions of the Clayton Act should be read together or separately—i.e., whether the provisions are "coupled" or "decoupled" for purposes of statutory interpretation. Marathon argues that the provisions must be read together and that because the Commonwealth cannot establish *venue* under the Clayton Act, the nationwide service-of-process provision is irrelevant and the case must be dismissed for lack of personal jurisdiction. (D.N. 228, PageID # 15232 (citing *KM Enter., Inc. v. Glob. Traffic Techs., Inc., 725 F.3d 718, 733-34 (7th Cir. 2013)* (holding that venue and service provisions of the Clayton Act must be read together)).) The Commonwealth argues that the venue and service-of-process provisions of the Clayton Act can be read separately and that the Court may exercise personal jurisdiction over Marathon Petroleum Corporation via the Clayton Act's service-of-process provision because venue is appropriate under the general venue statute, *28 U.S.C. § 1391*. (D.N. 231, PageID # 15261 (citing *Go-Video, Inc. v. Akai Elec. Co., 885 F.2d 1406, 1408 (9th Cir. 1989)* (holding that the venue and service provisions of the Clayton Act may be considered separately))) The Sixth Circuit has not yet considered this discrete question. And district courts in the circuit are, as noted by the parties, divided **[**8]** on the issue. *Compare Hyland v. Homeservices of Am., Inc., No. 3:05-cv-612-R, 2007 U.S. Dist. LEXIS 47502, 2007 WL 1959158 (W.D. Ky. June 28, 2007)* (finding "proper venue is still required in order to confer personal jurisdiction" under the Clayton Act), *with Ky. Speedway, LLC v. Nat'l Ass'n of Stock Car Auto Racing, Inc., 410 F. Supp. 2d 592, 601 (E.D. Ky. 2006)* (adopting reasoning of *Go-Video* and decoupling Clayton Act's service-of-process and venue provisions). The Court need not weigh **[*887]** the competing approaches here, because as explained below, Marathon Petroleum Corporation waived any challenge to venue by not raising it in its first affirmative pleading.

B. Waiver of Venue

"Unlike jurisdictional defects, venue objections can be waived." *Al-Muhaymin v. Jones, 895 F.2d 1147, 1149 (6th Cir. 1990)*. *Federal Rule of Civil Procedure 12(h)(1)* provides:

> A party waives any defense listed in *Rule 12(b)(2)-(5)* by:
>
> (A) omitting it from a motion in the circumstances described in *Rule 12(g)(2)*; or
> (B) failing to either:
> (i) make it by motion under this rule; or
> (ii) include it in a responsive pleading or in an amendment allowed by Rule 15(a)(1) as a matter of course.

Rule 12(b)(3) covers the defense of improper venue. A party must therefore raise venue in its first responsive pleading, or else that defense is waived. *See* Whittington v. Milby, 928 F.2d 188, 192 (6th Cir. 1991) ("It is true that improper venue is a personal defense which is waived if not raised either by motion or in a responsive pleading."); *see also* Palazzo v. Harvey, 380 F. Supp. 3d 723, 730 (M.D. Tenn. 2019) ("Generally speaking, arguments raised for the first time in **[**9]** reply briefs are waived, and this applies both on appeal, *American Family Prepaid Legal Corp. v. Columbus Bar* [Ass'n], 498 F.3d 328, 335 (6th Cir. 2007), and to summary judgment motions filed in the trial court, Ryan v. Hazel Park, 279 F. App'x 335, 339 (6th Cir. 2008)."). This rule applies equally in actions brought under the Clayton Act. *See* KM Enter., 725 F.3d at 733-34 (discussing theory of waiver of venue in antitrust case); Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1237 n.3 (6th Cir. 1981) (declining to address relationship between Clayton Act's venue and service-of-process provisions given defendant's waiver of objections to venue and service of process in the district court).

Marathon Petroleum Corporation's first responsive pleading was a motion to dismiss for lack of personal jurisdiction and failure to state a claim. (D.N. 92) Following the Court's denial of that motion, Marathon Petroleum Corporation moved for summary judgment, again on personal-jurisdiction grounds. (D.N. 156) In both the motion to dismiss and the first motion for summary judgment, Marathon Petroleum Corporation's personal-jurisdiction argument turned on whether the company had the requisite minimum contacts with Kentucky to satisfy the Commonwealth's long-arm statute. Marathon Petroleum Corporation raised no venue argument in either motion. In its post-hearing supplemental brief, however, Marathon **[**10]** Petroleum Corporation shifted its focus from the Clayton Act's nationwide service-of-process provision to the Act's venue provision, arguing for the first time that venue is improper in the Western District of Kentucky under the Clayton Act. (D.N. 228, PageID # 15232)

Waiver is clearly established when an issue was not raised in the first responsive pleading. *See* King v. Taylor, 694 F.3d 650, 660 (6th Cir. 2012) (holding that "forfeiture . . . was . . . clear" where, "[a]fter including the service defense in his answer, [defendant] was completely silent about it until the summary judgment stage"); Whittington, 928 F.2d at 192. The Sixth Circuit has addressed a similar scenario in the antitrust context and concluded that the defendant waived the defense of improper venue. In *Chrysler Corp.*, the defendant argued that the nationwide "service of process provision in the second **[*888]** clause of [§] 12 is available only when the forum contact requirements of the first clause are met." 643 F.2d at 1237 n.3. But the Sixth Circuit found that it "need not decide this question because . . . failure to object to service of process or venue in [the defendant's] Rule 12(b) motion below constitutes a waiver of any such objection here." *Id.* The Sixth Circuit thus declined to address the circuit split as to whether the **[**11]** Clayton Act's venue and service-of-process provisions should be coupled because the defendant waived the defense of improper venue. *Id*; *see also* Daniel v. Am. Bd. of Emergency Med., No. 90-CV-1086A, 1997 U.S. Dist. LEXIS 22425, 1997 WL 785635, at *2 (W.D.N.Y. Nov. 19, 1997) (holding that because defendants in Clayton Act case "failed to raise their venue defense in their original pleadings with the court, they have waived the defense and cannot now raise it"); *cf.* KM Enter., 725 F.3d at 733-34 (discussing possibility of defendant's waiver-of-venue argument, but finding that venue had not been waived).

In sum, the Court finds that Marathon Petroleum Corporation waived any challenge to venue by failing to assert the defense in either of its first two substantive motions. Because the challenge to venue has been waived, Marathon Petroleum Corporation's challenge to the Court's personal jurisdiction fails. Summary judgment on personal-jurisdiction grounds is therefore inappropriate.

III.

Because the Court may exercise personal jurisdiction over Marathon Petroleum Corporation, it will next consider the motion of all three defendants (Marathon Petroleum Corporation, Marathon LP, and Speedway) to exclude the Commonwealth's only expert witness, Dr. Michael Sattinger. (D.N. 191)

District courts serve as gatekeepers for admission of expert-witness testimony **[**12]** and must exclude "expert testimony that is unreliable and irrelevant." Conwood Co., L.P. v. U.S. Tobacco Co., 290 F.3d 768, 792 (6th Cir.

2002) (citing Hardyman v. Norfolk & W. Ry. Co., 243 F.3d 255, 260 (6th Cir. 2001)). The Court's analysis is guided by the principles set forth in Federal Rule of Evidence 702, which provides that

> [a] witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

The main goal of the admissibility inquiry is "to determine whether the evidence 'both rests on a reliable foundation and is relevant to the task at hand.'" Ky. Speedway, LLC v. Nat'l Ass'n of Stock Car Auto Racing, Inc., 588 F.3d 908, 915 (6th Cir. 2009) (citing Daubert v. Merrell Dow Pharm., 509 U.S. 579, 597 (1993)). With respect to the admissibility determination, *Daubert* "provided a non-exclusive checklist for trial courts to consult in evaluating the reliability of expert testimony." In re Scrap Metal Antitrust Litig., 527 F.3d 517, 529 (6th Cir. 2008). The *Daubert* factors include "testing, peer review, publication, error rates, the existence and maintenance of standards controlling the technique's operation, and general **[**13]** acceptance in the relevant scientific community." United States v. Langan, 263 F.3d 613, 621 (6th Cir. 2001) (citing Daubert, 509 U.S. at 593-94). **[*889]** Although the factors are not a "definitive checklist or test," Kumho Tire Co. v. Carmichael, 526 U.S. 137, 150, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999), they can guide a court's inquiry "where they are reasonable measures of the reliability of expert testimony." Gross v. Comm'r, 272 F.3d 333, 339 (6th Cir. 2001). Determining reliability and relevance does not require a court to evaluate the accuracy of an expert's opinion—a task reserved for the jury—but rather requires the Court "to determine whether [the expert's testimony] rests upon a reliable foundation, as opposed to, say, unsupported speculation." *In* Re Scrap Metal, 527 F.3d at 529-30.

Defendants move to exclude the Commonwealth's expert, Dr. Michael Sattinger.[1] (D.N. 191) Defendants do not attack Sattinger's qualifications but argue that the methodology he employed to reach his conclusions regarding the relevant market, the existence of antitrust injury, and the amount of damages was technically deficient and renders his opinion unreliable, irrelevant, and inadmissible. (*Id.*) After careful consideration of the record, the Court agrees and will exclude Sattinger's testimony on these topics for the reasons detailed below.

A. Relevant Market

An antitrust plaintiff bears the burden to "define the relevant market within which the alleged anticompetitive **[**14]** effects of the defendant's actions occur." Worldwide Basketball & Sport Tours v. Nat'l Coll. Athletic Ass'n, 388 F.3d 955, 962 (6th Cir. 2004). The relevant market contains "both a geographic component and a product component," Ky. Speedway, 588 F.3d at 916, and is defined by "commodities reasonably interchangeable by consumers for the same purposes [that] make up that part of the trade or commerce, monopolization of which may be illegal." United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). The Sixth Circuit applies the reasonable-interchangeability standard to define the relevant market. The reasonable-interchangeability standard relies on "(1) product uses (whether substitute products can perform the same function) and/or (2) consumer response (also known as 'cross-elasticity'), defined as 'consumer sensitivity to price levels at which they elect substitutes for the defendant's product or service.'" Ky. Speedway, 588 F.3d at 917 (quoting Worldwide Basketball & Sport Tours, 388 F.3d at 961). "Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim." NHL Players' Ass'n v. Plymouth Whalers Hockey Club, 325 F.3d 712, 719-20 (6th Cir. 2003); *see also* ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments, 629 (8th ed. 2017) ("[M]any [courts] have found the lack of sufficient expert testimony supporting or refuting a proposed market to be fatal.") (citations omitted).

---

[1] Defendants requested oral argument on their motion to exclude Sattinger's testimony. (D.N. 212, PageID # 13591) Because the issue has been thoroughly briefed following extensive discovery and the parties' arguments are fully developed, the Court finds oral argument unnecessary. Defendants' request for oral argument will therefore be denied.

The Commonwealth alleges that Marathon LP and Marathon Petroleum Corporation monopolized the wholesale market for Summer RFG, **[**15]** a special type of gasoline that gas stations must sell during the summer in certain parts of Kentucky *See* *42 U.S.C. § 7545(k)(6)(A)*. (D.N. 88, PageID # 1090) Reformulated blendstock for oxygenate blending (RBOB) is a type of **[*890]** gasoline that serves as the active and necessary ingredient of RFG. (D.N. 203-3, PageID # 12579) RFG, however, cannot be shipped in its final state for practical reasons, so RBOB is blended with ethanol at terminals—docking stations that receive shipments of raw petroleum products—to create RFG. (*Id.*, PageID # 12580) That RFG is then sold to retailers for sale to the ultimate consumer at the gas station. (*Id.*) The crux of the Commonwealth's argument is that Marathon dominates the wholesale RFG market because it controls the influx of RBOB, allowing it to monopolize the market for retail RFG, a downstream product of RBOB. (D.N. 203-3, PageID # 12576) The "consumers" in this market are therefore retailers of RFG, such as Kroger and Valero, that either buy or self-supply RFG from terminals. Sattinger determined that "at the wholesale level, the terminals where RFG is sold constitute the relevant geographic market for Summer RFG." (D.N. 203-3, PageID # 12596) He further limited the geographic **[**16]** market to terminals located in Kentucky. (*Id.*) Thus, the geographic market defined by Sattinger consists solely of terminals in Kentucky that blend RBOB to produce and then sell Summer RFG.

Sattinger's report fails to identify a reliable geographic market. The market Sattinger defined suffers from two fatal shortcomings. First, Sattinger did not explain his methodology for defining the relevant market. Generally, to define a relevant market, economists employ the hypothetical-monopolist test, also known as the SSNIP[2] test, a widely used device that allows analysts to determine whether customers would leave the market in response to a "small but significant non-transitory increase in price," usually using a five percent increase. *See* *Ky. Speedway, 588 F.3d at 918* (citing *FTS v. Whole Foods Mkt., Inc., 548 F.3d 1028, 1038 (D.C. Cir. 2008)* (finding that SSNIP test is an admissible tool for defining relevant market)). If customers leave the market in response, the market is defined too narrowly. *See In* *Re Se. Milk Antitrust Litig., 739 F.3d 262, 277 (6th Cir. 2014)* (acknowledging that SSNIP typically utilizes a 5% price increase).

Although Sattinger acknowledged that the hypothetical-monopolist test "provides a guide" to defining a relevant market (D.N. 203-3, PageID # 12594 (citing Merger Guidelines, Section 4.1)), he did not employ it here. (D.N. 191-4, **[**17]** PageID # 7924) While a relevant market can be defined without the use of the SSNIP test, Sattinger is nonetheless required to root his conclusions in a reliable methodology. *See* *Universal Surveillance Corp. v. Checkpoint Sys., Inc., No. 5:11-CV-1755, 2015 U.S. Dist. LEXIS 147106, 2015 WL 6082122, at *8 (N.D. Ohio Sept. 30, 2015)* (finding expert analysis reliable despite absence of SSNIP test because expert "utilized a different, still-reliable statistical method to determine the relevant product market"); *Encana Oil & Gas, Inc. v. Zaremba Family Farms, Inc., No. 1:12-cv-369, 2015 U.S. Dist. LEXIS 183802, 2015 WL 12883545 (E.D. Mich. Sept. 18, 2015)* (holding expert testimony admissible where expert employed an economic analysis other than SSNIP test to define relevant market). Yet Sattinger's report contains no explanation for why he chose to limit the market to terminals in Kentucky. (*See* D.N. 203-3) In the absence **[*891]** of an alternative, but "still-reliable statistical method to determine the relevant product market," *Universal Surveillance, 2015 U.S. Dist. LEXIS 147106, 2015 WL 6082122*, and considering the additional deficiencies discussed below, the Court concludes that the market Sattinger proposes lacks the "objective, independent validation of methodology" that is required for admissibility. *Vaughan v. Konecranes, Inc., 642 F. App'x 568, 577 (6th Cir. 2016)*; *see also* *Ky. Speedway, 588 F.3d at 919* (excluding expert testimony in antitrust case because expert used unreliable methodology to define a relevant **[**18]** market).

Second, even if the Commonwealth had demonstrated that Sattinger defined his market using a reliable method, his opinion would still be excluded because his proposed market does not reflect the economic realities of the wholesale RFG market. *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 336-37, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* (holding that the relevant market must "correspond to the commercial realities of the industry and be economically significant"). Marathon LP and its competitors must ship RBOB, a necessary component of RFG, into

---

[2] "Specifically, the [hypothetical monopolist] test requires that a hypothetical profit-maximizing firm, not subject to price regulation, that was the only present and future seller of those products ("hypothetical monopolist") likely would impose at least a small but significant and non-transitory increase in price ("SSNIP") on at least one product in the market." Horizontal Merger Guidelines, U.S. Dept of Justice and FTC, Section 4.1.1, August 19, 2010 (hereinafter "Merger Guidelines").

terminals in the Commonwealth. Yet Sattinger's proposed geographic market fails to consider where Marathon's competitors could "practicably turn for [RBOB]." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; *see also* Merger Guidelines § 4.2.1, 4.2.2, 5.1 (stating that geographic markets must include competitors and that "firms that clearly possess the necessary assets to supply into the relevant market rapidly" must be considered part of the geographic market). Determining where market participants can practicably turn for supplies requires a fact-intensive inquiry that includes "considerations of areas where products are marketed, or where the defendant perceives that it is competing; any applicable regulatory standards; transportation costs and challenges such as risk of spoilage, size, **[**19]** or weight; and 'other factors bearing upon where customers might realistically look to buy the product.'" *In re Se. Milk, 739 F.3d at 277* (quoting *E.I. du Pont de Nemours & Comp. v. Kolon Indus., Inc., 637 F.3d 435, 442-43 (4th Cir.2011)* (internal citations omitted)).

Sattinger limited the geographic market to terminals in Kentucky. But he failed to explain why he excluded the sources of RBOB from his market. For example, Valero, Marathon's only competitor for RFG, self-supplied RBOB from its refinery in Louisiana to supplement its supply of RFG available for sale in Louisville. (D.N. 191, PageID # 7888) Indeed, Sattinger noted in his report that Valero "received RBOB [at its Louisville terminal] from its Memphis, St. Charles, and Meraux refineries by barge on the Mississippi and Ohio Rivers." (D.N. 203-3, PageID # 12586) Further, Marathon has submitted evidence demonstrating that both Kroger and Marathon LP have trucked in supplemental sources of RBOB from terminals in the Chicago and St. Louis areas. (D.N. 212, PageID # 13604-05) Without explanation, Sattinger dismisses this evidence in his rebuttal report as "anecdotal" and thus irrelevant. (D.N. 191-11, PageID # 8105) But this evidence establishes that not only could wholesale customers turn to sources of RBOB from refineries well outside of the proposed **[**20]** geographic market, they *already have.* By failing to include "reasonably interchangeable" sources of RBOB, the necessary precursor for RFG, Sattinger's geographic market is rendered unreliable. *See* *Worldwide Basketball & Sport Tours, 388 F.3d at 961*.

Without relying on an established methodology, and while excluding sources of supply already used by competitors in the wholesale market, Sattinger defined a geographic market that is "connected to existing **[*892]** data only by the *ipse dixit* of the expert" and does not meet the admissibility requirements of *Daubert. Nelson v. Tenn. Gas Pipeline Co., 243 F.3d 244, 254 (6th Cir. 2001)* (citing *General Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997))*; *see* Black's Law Dictionary (11th ed. 2019) (defining "ipse dixit" as "[s]omething asserted but not proved"). The geographic market defined by Sattinger is therefore unreliable and cannot be used to calculate market share or demonstrate market dominance. *See* *Worldwide Basketball & Sport Tours, 388 F.3d at 963* (holding that antitrust claim must be dismissed because plaintiff's expert failed to define a relevant market through reliable means).

B. Antitrust Injury

Sattinger's opinion must also be excluded because it fails to establish a connection between Defendants' allegedly anticompetitive behavior and harm to consumers. Sattinger employed a yardstick approach—a straightforward comparison—to calculate $173.6 million in damages. (D.N. **[**21]** 203-3, PageID # 12563) To reach this figure, he compared the markets for RFG in Baltimore and St. Louis to the LNK market. (*Id.*) Sattinger analyzed the market prices of RFG across the cities, accounting for discounts that Marathon allegedly provided its wholesale customers, and then attributed the difference in price to anticompetitive conduct by Defendants. (D.N. 203-3, PageID # 12620-21) He multiplied that price differential by the relevant time period to arrive at his damages figure, assuming that the difference in price was attributable to the alleged wrongdoing of the defendants. (*Id.*, PageID # 12688) According to Sattinger, St. Louis and Baltimore were appropriate comparison cities because they represented competitive markets for RFG with a substantial number of wholesale customers. (D.N. 203-3, PageID # 12617) He also testified in his deposition that the two cities had been chosen for him before he ran any analysis. (D.N. 212-1, PageID # 13608)

A yardstick approach is one way that an expert can calculate antitrust damages. The approach requires the expert to analyze the differences in the price of the product at issue among meaningfully comparable markets, firms, or locations. **[**22]** It is typically used when comparing profitability between similar firms, *MM Steel, L.P. v. JSW Steel*

(USA) Inc., 806 F.3d 835, 851-52 (5th Cir. 2015) (analyzing how comparable yardsticks must be), or to compare profit margins within the same company in differently situated markets. *See* Conwood Co., 290 F.3d at 794 (finding that yardstick approach was appropriately employed by expert to compare the defendant's profits across two different tobacco markets). Expert opinions based on the yardstick approach may be admissible when the approach is properly applied. *See, e.g., id.* Successful applications of this approach usually employ a regression analysis. A regression analysis is a basic statistical tool "useful in quantifying the relationship between a dependent variable [e.g., the price of Summer RFG] and independent variables [e.g., demand for gasoline and population size]." *In* Re Se. Milk, 739 F.3d at 285 (citing Wiesfeld v. Sun Chemical Corp., 84 F. App'x 257, 261 n.3 (3d. Cir. 2004)).

To be meaningful, the yardsticks to be compared must be the same length. *See* Eleven Line, Inc. v. N. Texas State Soccer Ass'n, Inc., 213 F.3d 198, 208 (5th Cir. 2000) (finding that expert testimony could not support a jury verdict where the expert's yardsticks were not nearly identical and he offered no evidence of the comparison markets' geographic locations, sizes, markets served, or costs of operation). **[*893]** The Seventh Circuit found that expert testimony was inadmissible for failing to control **[**23]** for the length of yardsticks in Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 152 F.3d 588 (7th Cir. 1998). There, Judge Posner deemed "worthless" expert reports that compared damages between the antitrust defendant's clinics and other providers in the area but failed to control for any factors except the mix of drugs provided. Id. at 593. Without any sort of regression analysis to "correct for salient factors, not attributable to the defendant's misconduct, that may have caused the harm of which the plaintiff is complaining," Judge Posner concluded, expert reports "do not provide a rational basis for a judgment." *Id.* The expert opinion at issue in *Marshfield Clinic* was therefore excluded because the "evidence [was] not probative because it omitted the major variables," rendering it a "'regression[] so incomplete as to be inadmissible as irrelevant.'" Bickerstaff v. Vassar College, 196 F.3d 435, 449 (2d Cir. 1999) (quoting Bazemore v. Friday, 478 U.S. 385, 400 n.10, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)).

By contrast, the Sixth Circuit found in *Conwood Co.* that the plaintiff's expert testimony that relied upon a yardstick approach was admissible. 290 F.3d 768. There, the expert employed "regression analyses, a yardstick test and a before-and-after test" to establish antitrust damages. Id. at 793. The court analyzed the expert's report and found it sufficiently reliable because the expert "ruled out the possibility that the statistical **[**24]** relationship was caused by factors other than [the defendant's] conduct" and "examined the possible explanations that [the defendant's] own expert suggested" by using regression analyses. *Id.*

Here, Sattinger merely compared LNK to Baltimore and St. Louis, subtracted the discounts given by Marathon to its retailers, and then concluded that the difference in price must be attributable to anticompetitive conduct by Defendants. (D.N. 203-3, PageID # 12620-21) This application of the yardstick approach is fundamentally flawed for three reasons. First, Sattinger testified that "there could be other factors," besides Defendants' conduct, that "could add [to] the difference or reduce the difference" in price of RFG between the comparison cities. (D.N. 191-4, PageID # 7947-48) Those factors included population size, number of automobile drivers, and geographic proximity to different sources of supply. (D.N. 191-4, PageID # 7917-19, 7924). Sattinger conceded that he did not control for those factors among the cities, although he acknowledged the existence of fundamental differences in both supply and demand and population size in his report. (D.N. 203-3, PageID # 12620; D.N. 191-4, PageID # 7948) **[**25]**

In *Conwood*, the Sixth Circuit found "particularly relevant the undisputed evidence" that the plaintiff's expert controlled for the other factors that could have explained the price differences using regression analyses. 290 F.3d at 793. Here, Sattinger failed to account for even the most salient differences among the comparison cities:

> Q: [D]id you make any comparisons of the population between Baltimore and the populations in the Kentucky markets? . . .
>
> A I do not see a comparison population in the report. It's possible that others have looked at the populations. But that is not included in the report. . . .
>
> Q: Did you make any comparisons about the demand characteristics of Summer RFG in Baltimore Versus the Kentucky areas?
>
> A: No. . . .

[*894] Q: Did you make any analysis of the - anything relating to traffic of vehicles using gasoline in Baltimore vs. Kentucky?

A: No, I did not.

(D.N. 191-4, PageID # 7917-19; 7924)

To be reliable and thus admissible, Sattinger's application of the yardstick approach would need to follow established methodology and control for the major differences among the cities that could impact the market price for RFG. *See* *The Iams Co. v. Nutro Prod., Inc., No. 3:00-CV-566, 2004 U.S. Dist. LEXIS 31141, 2004 WL 5496244, at *6 (S.D. Ohio June 30, 2004)*, *on reconsideration* ***[**26]*** *sub nom.* *Iams Co. v. Nutro Prod., Inc., No. 3:00-CV-566, 2004 U.S. Dist. LEXIS 30334, 2004 WL 5831566 (S.D. Ohio Aug. 23, 2004)* (holding that it is appropriate to "declar[e] regression analysis inadmissible when it omits one or more major variables" (quoting Paul C. Giannelli and Edward J. Imwinkelried, Scientific Evidence 3rd, 719-20 (1999) ("The courts have been increasingly receptive to regression analysis. . . . However, the model's omission of any obviously influential variable or the absence of a major assumption of regression analysis often results in the inadmissibility of the evidence."))). But as in *Marshfield Clinic*, Sattinger's analysis is rendered "worthless" because it failed to control for even the most fundamental differences among LNK, Baltimore, and St. Louis. *152 F.3d at 593*. Sattinger's analysis is ultimately "evidence [that] is not probative because it omitted the major variables," rendering it a "'regression[] so incomplete as to be inadmissible as irrelevant.'" *Bickerstaff, 196 F.3d at 449* (quoting *Bazemore, 478 U.S. at 400 n.10*).

Second, Sattinger's analysis failed to account for whether the comparison markets utilize exchange agreements. An exchange agreement "is a contract between two [gasoline] refiners by which the two companies trade gasoline." (D.N. 88, PageID # 1094) As characterized by Marathon LP, the exchange agreements **[**27]** "involve a refiner or supplier agreeing to provide gasoline to a competing refiner for sale in a particular area where that competitor has insufficient supply." (D.N. 28-1, PageID # 219) The use of exchange agreements is a particularly important variable here because the Commonwealth has identified Defendants' use of exchange agreements as one of the three main forms of anticompetitive conduct that allegedly harmed consumers. (D.N. 88, PageID # 1097) If wholesale buyers and sellers in the Baltimore and St. Louis markets also entered exchange agreements, then Sattinger's conclusion that the differences in price among the markets must be attributable to anticompetitive conduct is significantly undermined. And Sattinger admitted at his deposition that it was possible that Baltimore and St. Louis market participants use exchange agreements because "[i]t is widespread practice in the oil industry." (D.N. 191-4, PageID # 7921-22)

Finally, Sattinger failed to disaggregate the portion of his ultimate damages figure that could be attributable to any of the Defendants' *procompetitive* conduct. To prevail on its antitrust claim, the Commonwealth must be able to show that Defendants' illegal conduct **[**28]** is the source of the alleged injury to consumers. *See, e.g.,* *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1378 (2d Cir. 1988)* (holding that antitrust plaintiff must link injury to defendant's anticompetitive conduct with economic analysis). As noted by the Commonwealth, an antitrust expert is not required to attribute exact sums of damages to particular actions by the defendant. *See* *MCI Commc'n Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1161 (7th Cir. 1983)* (applying Supreme Court's determination that antitrust plaintiff need **[*895]** not disaggregate "damages among the various unlawful acts of the defendant"). But an antitrust plaintiff must distinguish between "damages attributable to lawful competition and [those] attributable to the unlawful scheme." *Farley Transp. Co. v. Santa Fe Trail Transp. Co., 786 F.2d 1342, 1352 (9th Cir. 1985)*; *U.S. Football League, 842 F.2d at 1378* (holding that "the damages awarded must be traced to some degree to unlawful acts" (citing *MCI Commc'n, 708 F.2d at 1161*)). Sattinger's report fails because he did not specify what portion of the calculated damages figure stems from Defendants' legal conduct and what portion, if any, is caused by any of their allegedly illegal forms of conduct. Without establishing that illegal conduct by Defendants caused the claimed injuries, the Commonwealth cannot show proof of "injury of the type antitrust laws were intended to prevent." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

In sum, the Court cannot find that the methodology Sattinger employed to arrive **[**29]** at his damages calculations was reliable or based upon sound scientific principles. He admitted to failing to control for rudimentary differences among cities, but then claimed to calculate damages by comparing LNK to Baltimore and St. Louis. The Court acknowledges that an expert is not required to control for every variable. *See* *Jahn v. Equine Servs., PSC, 233 F.3d 382, 390 (6th Cir. 2000)* ("In order to be admissible on the issue of causation, an expert's testimony need not eliminate all other possible causes of the injury."). Moreover, although Sattinger's rebuttal opinion attempted to control for the most salient differences between the comparison cities (D.N. 191-11, PageID # 8113), it still neglected to address or recalculate the original damages figure. Sattinger's failure to calculate a reliable damages figure renders his opinion inadmissible. *See* *In re Wireless Tel. Servs. Antitrust Litig., 385 F. Supp. 2d 403, 427 (S.D.N.Y. 2005)* ("Where an expert conducts a regression analysis and fails to incorporate major independent variables, such analysis may be excluded as irrelevant."). Further, Sattinger assumed that the differences in price were attributable to anticompetitive conduct and did not eliminate any procompetitive explanation for his ultimate damages figure. This shortcoming also renders his opinion inadmissible, **[**30]** because he cannot show that the Commonwealth's claimed injuries are "injur[ies] of the type the antitrust laws were intended to prevent and that flow[] from that which makes defendants' acts unlawful." *Brunswick Corp., 429 U.S. at 489*. Because Sattinger neither employed a scientifically reliable method to arrive at his proposed relevant market nor established an antitrust injury through reliable means, Defendants' motion to exclude Sattinger's testimony will be granted. *Daubert, 509 U.S. at 597* (holding that district court may only admit expert testimony that "both rests on a reliable foundation and is relevant to the task at hand").

IV.

The Court will next consider Defendants' motion for summary judgment on the merits of the Commonwealth's antitrust claims. (D.N. 195) Summary judgment is required when the moving party shows, using evidence in the record, "that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *see* 56(c)(1). For purposes of summary judgment, the Court must view the evidence in the light most favorable to the nonmoving party. *Loyd v. Saint Joseph Mercy Oakland, 766 F.3d 580, 588* ***[*896]*** *(6th Cir. 2014)* (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986))*. The Court "need consider only the cited materials," however. *Fed. R. Civ. P. 56(c)(3)*; *see* *Shreve v. Franklin Cty., 743 F.3d 126, 136 (6th Cir. 2014)*. If the nonmoving party "fails to properly support an assertion **[**31]** of fact or fails to properly address another party's assertion of fact as required by *Rule 56(c)*," the fact may be treated as undisputed. *Fed. R. Civ. P. 56(e)(2)-(3)*. To survive a motion for summary judgment, the nonmoving party must establish a genuine issue of material fact with respect to each element of each of its claims. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*.

Summary judgment is often unsuited for fact-intensive antitrust cases, but the standard for summary judgment remains the same. *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 481 (3d Cir. 1992)*. Both the Sixth Circuit and the Supreme Court have found that summary judgment is appropriate where a party fails to establish the necessary components of an antitrust claim. *See* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Ky. Speedway, 588 F.3d at 915*. Specifically, "[a]ntitrust plaintiffs cannot survive motions for summary judgment without adequately alleging an antitrust injury." *In re Se. Milk, 739 F.3d at 284*. As stated above, an antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp., 429 U.S. at 489*. Summary judgment is also appropriate when a court excludes the only expert testimony proposing a relevant market, since antitrust claims make "no economic sense" in the absence of "proof of relevant markets." *Ky. Speedway, LLC v. Nat'l Ass'n of Stock Car Auto Racing, Inc., No. CIV.A.05-138(WOB), 2008 U.S. Dist. LEXIS 1076, 2008 WL 113987, at *2 (E.D. Ky. Jan. 7, 2008)* **[**32]** , *aff'd*, *588 F.3d 908*.

As detailed above, Sattinger's report fails to establish a relevant market, calculates damages based on a flawed comparison, and makes no attempt to control for the impact of Defendants' procompetitive behavior as opposed to its alleged anticompetitive practices. Sattinger is the Commonwealth's only expert witness who has submitted a report. And the only other evidence of market definition or dominance offered by the Commonwealth is "lay testimony and internal [Marathon] documents," which are insufficient to establish a reliable geographic market. *Ky. Speedway, 588 F.3d at 919*. Without a properly defined relevant market, the Commonwealth cannot establish that

Marathon Petroleum Corporation and Marathon LP dominated the market for wholesale RFG; indeed, "[t]he purpose of defining a geographic market is to reveal whether, or to what extent, market power exists." *In re Se. Milk, 739 F.3d at 262, 277*. Without an adequately defined relevant market, the Commonwealth cannot demonstrate either that Defendants unreasonably restrained trade in the market or that they exercised monopoly power in the market. Therefore, the Commonwealth's Sherman Act §§ 1 and 2 claims must fail. *See Verizon Commc'ns, Inc. v. Law Offices of Curtis Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (holding that a claim under § 2 of the Sherman Act requires "the possession **[**33]** of monopoly power *in the relevant market*" (emphasis added)); *Worldwide Basketball & Sports Tours, 388 F.3d at 959* (listing requisite elements of § 1 Sherman Act claim, including unreasonable restraint of trade "in the relevant market"); *see also NHL Players' Ass'n, **[*897]** 325 F.3d at 719-20* ("Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim.").

Further, without evidence of an antitrust injury, the Commonwealth cannot establish that Defendants' alleged wrongdoing harmed consumers. Sattinger admitted that it was possible that "other factors" besides Marathon's misconduct contributed to the differences in prices among St. Louis, Baltimore, and LNK. (D.N. 191-4, PageID # 7947-48) The Commonwealth has not presented any other evidence of a link between Marathon Petroleum Corporation, Marathon LP, or Speedway's allegedly anticompetitive conduct and antitrust injury. It is the Commonwealth's burden to prove antitrust injury, *Worldwide Basketball & Sport Tours, 388 F.3d at 962*, and without Sattinger's testimony, no evidence remains to raise a material issue of fact as to causation. Summary judgment is therefore appropriate as to the Commonwealth's federal antitrust claims against all the defendants because there is no evidence of a "causal connection" between Defendants' conduct and the allegedly **[**34]** anticompetitive prices of Summer RFG in Louisville and Northern Kentucky. *See J.B.D.L. Corp. v. Wyeth-Ayerst Labs., Inc., 485 F.3d 880, 891 (6th Cir. 2007)* (upholding grant of summary judgment based on failure to establish causal connection between the defendant's conduct and alleged antitrust injury); *see also Valley Prods., Inc. v. Landmark, 128 F.3d 398, 403 (6th Cir. 1997)* ("The Sixth Circuit, it is fair to say, has been reasonably aggressive in using the antitrust injury doctrine to bar recovery where the asserted injury, although linked to an alleged violation of the antitrust laws, flows directly from conduct that is not itself an antitrust violation."). And with the federal claims dismissed, the Court declines to exercise supplemental jurisdiction over the remaining state-law claims, which will be dismissed without prejudice. *Gamel v. City of Cincinnati, 625 F.3d 949, 952 (6th Cir. 2010)* ("When all federal claims are dismissed before trial, the balance of considerations usually will point to dismissing the state law claims, or remanding them to state court if the action was removed." (quoting *Musson Theatrical, Inc. v. Fed. Exp. Corp., 89 F.3d 1244, 1254-55 (6th Cir. 1996))*); *see also 28 U.S.C. § 1367(c)(3)* (stating that a district court may decline to exercise supplemental jurisdiction if it has "dismissed all claims over which it ha[d] original jurisdiction"). Accordingly, and the Court being otherwise sufficiently advised, it is hereby

ORDERED as follows:

(1) Marathon Petroleum **[**35]** Corporation's motion for summary judgment on personal jurisdiction (D.N. 156) is **DENIED.**

(2) Defendants' motion to exclude the testimony of Dr. Sattinger (D.N. 191) is **GRANTED.**

(3) Plaintiff's motion to exclude the testimony of Dr. Shehadeh and Dr. Baye (D.N. 190) is **DENIED** as moot.

(4) Defendants' motion for summary judgment (D.N. 195) is **GRANTED** as to the Commonwealth's federal antitrust claims (Counts 1, 2, and 3).

(5) Plaintiff's remaining state-law claims are **DISMISSED** without prejudice pursuant to *28 U.S.C. § 1367(c)(3)*.
(6) A separate judgment will be entered this date.

Opinion

OPINION AND ORDER DENYING DEFENDANTS' MOTION [*90] TO ENFORCE THIS COURT'S FINAL JUDGMENTS

Before the Court is Anti-Vibrational Rubber Parts ("AVRP") Defendants' Motion to Enforce this Court's Final Judgments in the End-Payor Plaintiffs' action (ECF No. 265). AVRP Defendants assert that Releases obtained in the End-Payor Plaintiffs' ("EPPs") class action against Defendants barr the claims advanced by the three named individual Plaintiffs in the Direct Purchaser Plaintiffs' action (13-801). EPPs take no position on the motion. The

Court heard oral argument, and at the conclusion of the hearing, took this matter under advisement. For the reasons that follow, the motion is **DENIED**.

I. INTRODUCTION AND PROCEDURAL BACKGROUND

A. Direct Purchaser Case

In November 2016, Plaintiffs Jerry A. Anderson, Sr., Laura L. LaRue and Christopher A. Lee, filed a class action on behalf of a proposed class of direct purchaser plaintiffs ("DPPs") against Defendants, global manufacturers and suppliers of Anti-Vibrational Rubber Parts that are sold in the United States (See ECF No. 1 ¶ 1 in 16-14057). In their proposed class action, DPPs allege that Defendants engaged in a conspiracy, from as early as March 1996, to fix prices in the automotive parts industry by **[*91]** agreeing to rig bids for, and to fix, stabilize, and maintain the prices of AVRPs (Id. ¶¶ 1, 5). AVRPs are used to reduce engine and road vibration. (Id. ¶ 4). Among other things, DPPs allege that they purchased replacement parts "installed in motor vehicles to replace worn out, defective, or damaged Anti-Vibration rubber parts." (Id. ¶ 31). According to DPPs, they purchased the replacements "directly from an entity of which one of the Defendants is the ultimate parent. (Id. ¶¶ 11-13).

Defendants in the direct purchaser action are either the parent company of an American subsidiary or the subsidiary in one of four corporate families. According to DPPs, Bridgestone Corporation ("BCP"), which is a Japanese corporation, "directly and/or through its subsidiaries and other entities of which it is the ultimate parent, which it wholly owned and/or controlled--manufactured, marketed, and/or sold Anti-Vibration Rubber Parts that were purchased throughout the United States, including in this district, during the Class Period." (Id. ¶ 14). Bridgestone APM Company ("BAPM"), a subsidiary of Bridgestone Corporation, "manufactured, marketed, and/or sold Anti-Vibration Rubber Parts that were purchased **[*92]** throughout the United States, including in this District, during the Class Period." (Id. ¶ 15). Similar allegations are advanced against Yamashita Rubber Co., Ltd. and its subsidiary, YUSA Corporation (id. ¶¶ 17, 18); Sumitomo Riko Company, Ltd., and its subsidiary, DTR Industries, Inc. (id. ¶¶ 19, 20); and Toyo Tire & Rubber Co., Ltd. and its subsidiaries, Toyo Tire North America OE Sales LLC and Toyo Automotive Parts (USA), Inc. (id. ¶¶ 21, 22, 23). Paragraphs 11 through 13 of the DPP Class Action Complaint advance allegations regarding the relationship between Plaintiffs and Defendants. Each individual is alleged to have purchased AVRPs "directly from an entity of which one of the Defendants is the ultimate parent during the Class Period." (Id.) Defendants Bridgestone Corporation, Yamashita Rubber Co., Ltd., and Toyo Tire & Rubber Co., Ltd., pleaded guilty to federal charges and agreed to pay multimillion-dollar criminal fines for their role in a conspiracy to fix prices of AVRPs installed in cars sold in the United States and elsewhere. (Id. ¶¶ 66-74, 71).

AVRP Defendants filed a collective motion to dismiss Direct Purchaser Plaintiffs on several grounds, including that the three **[*93]** named individual Plaintiffs lacked antitrust standing. Among other things, AVRP Defendants asserted that the named plaintiffs could not establish that they were direct purchasers, entitled to pursue damages under federal ***antitrust law***. The purchasers' status was dispositive because under *Illinois Brick Co. v. Illinois, 431 U.S. 720, 746, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, only the direct purchasers of an allegedly price-fixed product may bring a private action for money damages under federal antitrust laws. Exceptions have been carved out of the direct purchaser rule, including one that DPPs asserted was dispositive: "instances where the defendant owns or controls the intermediary that sold the goods to the indirect-purchaser plaintiff." *Laumann v. Nat'l Hockey League, 907 F. Supp. 2d 465, 481 (S.D.N.Y. 2012)*. According to DPPs, the ownership/control exception to the direct purchaser rule applied in the case before the Court because DPPs purchased directly from one of Defendants' wholly-owned subsidiaries.

This Court, in deciding the motion to dismiss, reviewed the applicable caselaw and the allegations in the complaint. (See ECF No. 43 in 13-801 at 11-12). It concluded that DPPs had indeed alleged a claim based on the ownership/control exception to *Illinois Brick*. The Court's resolution was grounded in DPPs' allegations that Defendants were either **[*94]** the parent company of an American subsidiary or the subsidiary in one of four corporate families, that "directly and/or through [ ] subsidiaries and other entities of which it is the ultimate parent, which it wholly owned and/or controlled--manufactured, marketed, and/or sold Anti-Vibration Rubber Parts" that were purchased by DPPs. (Id. ¶ 14). Accordingly, the Court denied the motion to dismiss.

B. EPP Action

After DPPs filed their complaint, and after the Court resolved the motion to dismiss in that action, the defendants in the EPP AVRP component part case settled the claims. The End-Payor AVRP action was filed in June 2014. In their complaint, EPPs alleged that they suffered harm as a result of their purchases of AVRPs as component parts or as replacement parts. (ECF No. 20, Am. Compl. In 13-803). The defendants settled those claims for $81.5 million.

The settlement agreements, which form the basis upon which AVRP Defendants now move for dismissal of the DPP case, "completely released, acquitted, and forever discharged" each of the Defendants "[f]rom any and all claims, demands, actions, suits, causes of action" that the "Releasors, or any of them, ever had, now has, or hereafter **[*95]** can, shall or may ever have . . . in any way arising out of . . . or relating in any way" to Defendants' alleged conspiracy. (ECF No. 265 in 13-803, Ex. A at ¶ 23, Bridgestone Settlement Agreement; accord Ex. B at ¶ 21, Tokai Settlement Agreement; Ex. C at ¶ 22, Yamashita Settlement Agreement; Ex. D at ¶ 23, Toyo Settlement Agreement). The Agreements define Releasors as any member of the settlement class and include "**all persons and entities**" that "**indirectly purchased one or more AVRPs as a replacement part**, which were manufactured or sold by a Defendants, any current or former subsidiary of a Defendant, or any co-conspirator of a Defendant." Id. (Emphasis added).

After the Court approved the settlements, it entered final judgment under Rule 54(b) and dismissed each of the defendants with prejudice (See ECF Nos. 257, 258, 216, 260 in 13-803).

The Final Judgments included the language that follows:

> All persons and entities who are Releasors are barred and enjoined from commencing, prosecuting, or continuing in an individual or representative or derivative capacity, against the [Defendants], in this or any other jurisdiction, any and all claims, causes of action or lawsuits, which they had, have, **[*96]** or in the future may have, arising out of or related to any of the Released Claims as defined in the [Settlement] Agreement.

(ECF No. 257 at ¶ 7, Bridgestone Final Judgment; ECF No. 258 at ¶ 7, Yamashita Final Judgment; ECF No. 216 at ¶ 7, Tokai Final Judgment; ECF No. 260 at ¶ 7, Toyo Final Judgment in 13-803). The named plaintiffs in the Direct Purchaser Complaint did not seek exclusion from the EPP settlement classes.

II. STANDARD OF REVIEW

The Sixth Circuit holds that settlement agreements are contracts governed by principles of state contract law. *Neely v. Good Samaritan Hosp., 345 Fed. Appx. 39, 43 (6th Cir. 2009)*; *MLW Assocs., Inc. v. Certified Tool & Mfg. Corp., 106 Fed. Appx. 307, 312 (6th Cir. 2004)*. Under Michigan law, a plaintiff first must establish the elements of a valid contract to state a claim for breach of contract. *Pawlak v. Redox Corp., 182 Mich. App. 758, 453 N.W.2d 304, 307 (Mich. Ct. App. 1990)*. A valid contract in Michigan requires (1) parties competent to contract, (2) a proper subject matter, (3) a legal consideration, (4) mutuality of agreement, and (5) mutuality of obligation. *Thomas v. Leja, 187 Mich. App. 418, 468 N.W.2d 58, 60 (Mich. Ct. App. 1990)*.

Once a valid contract has been established, the plaintiff must prove (1) the terms of the contract, (2) breach of those terms by the defendant, and (3) injury to the plaintiff resulting from the breach. *In re Brown, 342 F.3d 620, 628 (6th Cir. 2003)*. When interpreting a contract, "Michigan courts 'examine contractual language and give the words their plain and ordinary **[*97]** meanings.' " *Certified Restoration Dry Cleaning Network, LLC v. Tenke Corp., 511 F.3d 535, 544 (6th Cir. 2007)* (alterations omitted) (quoting *Coates v. Bastian Bros., Inc., 276 Mich. App. 498, 741 N.W. 2d 539 (Mich. Ct. App. 2007)*). "If the language of the contract is unambiguous, the court construes and enforces the contract as written." *Quality Prod. & Concepts Co. v. Nagel Precision, Inc., 666 N.W.2d 251 (Mich. 2003)*.

III. ANALYSIS

At the outset, the Court observes that pursuant to the orders of dismissal in the EPP case, the Court retains jurisdiction over any disputes arising from the settlement agreement. (See ECF Nos. 257 at ¶ 11; 258 at ¶ 12; 216 at ¶11, and 260 at ¶ 11 in 13-803). Thus, this Court has jurisdiction over this dispute. See *Kokkonen v. Guardian Life Insurance Company of America, 511 U.S. 375, 380-81, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)* (recognizing jurisdiction over a settlement agreement may be exercised where the obligation of the parties to comply with the settlement agreement had been made part of the order of dismissal either by: (1) a separate provision in the dismissal order retaining jurisdiction in the district court over the settlement agreement; or (2) "incorporating the terms of the settlement agreement into the order" of dismissal). Therefore, the Court turns its attention to the merits of the dispute; specifically, whether the language in the Settlement Agreements in the EPP action bars DPPs' claims.

AVRP Defendants characterize the DPP class representatives, who purport to represent a putative class of all direct purchasers, **[*98]** as advancing claims virtually identical to those asserted by the EPPs. AVRP Defendants assert that the named class representatives are merely styled as direct purchasers when they are not-- in fact the named class representatives indirectly purchased AVRPs as standalone replacement parts. Therefore, even if the DPPs' claims could proceed under *Illinois Brick*, the named class representatives are not transformed from indirect purchasers to direct purchasers. The rule put forth in *Illinois Brick* does not alter their status as indirect purchasers; it merely allows for an exception for indirect purchasers to bring claims for money damages under federal law. Consequently, their claims are barred by the language of the Settlement Agreements, and they cannot avoid the injunctions by claiming to be direct purchasers.

There is no dispute that the AVRPs purchased by the named plaintiffs were sold as replacement parts. Moreover, there is no dispute that the named plaintiffs, unlike EPPs, do not allege that the replacement parts they purchased were made by Defendants. Instead, the three named plaintiffs allege that they had their cars repaired at a repair shop ultimately owned by a named defendant. Based on these undisputed **[*99]** facts and allegations, AVRP Defendants conclude that the purchases are indirect purchases made from an entity other than the named antitrust violator defendant. (Tr. 77-8). Because the named plaintiffs in the direct purchaser case failed to opt out of the AVRP EPP settlements, AVRP Defendants assert that the claims advanced by the named plaintiffs are barred by the settlement language in the EPP case.

This Court acknowledges the accuracy of the facts as advanced by AVRP Defendants but disagrees with their legal analysis. Notably, no one contests that the settlements in the EPP action are valid. AVRP Defendants' argument, however, is at odds with the language contained in the Settlement Agreements that "**claims made by direct purchasers** of AVRPs" are not released. (ECF No. 266, Ex. 1 at ¶¶ 12, 23). Consequently, the Court must decide how to characterize the named plaintiffs in the DPP action.

In contrast to AVRP Defendants' conclusion, a review of applicable caselaw shows that the courts have used different lables to characterize purchasers in the situation presented by the named class representatives in the direct purchaser case. Some courts addressing such circumstances have deemed them **[*100]** direct purchasers. See *Domestic Drywall Antitrust Litig., 2016 U.S. Dist. LEXIS 90619, 2016 WL 3769680, at *5 (E.D. Pa. July 13, 2016)* (rejecting the argument that those plaintiffs that purchased drywall directly from a subsidiary of a defendant made the plaintiffs indirect purchasers); *Tech. Learning Collective, Inc. v. Daimler-Benz AG, 1980 U.S. Dist. LEXIS 9517, 1980 WL 1943, at *15 (D. Md. Aug. 28, 1980)* (finding that "[b]ecause the 'control' exception to *Illinois Brick* applies to parent-subsidiary relationships, these class members are direct purchasers from the defendants"). Other courts have deemed them indirect purchasers with special standing. See *In re: Royal Printing Co. v. Kimberly-Clark Corp., 621 F.2d 323, 326 (9th Cir. 1980)* (using the exception to *Illinois Brick* does not transform an indirect purchaser into a direct purchaser); *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420 YGR, 2014 U.S. Dist.*

LEXIS 7516, 2014 WL 309192, at *9 (N.D. Cal. Jan. 21, 2014) (observing that the owned or controlled exception to Illinois Brick permits suits brought by indirect purchasers when "the direct purchaser to whom they pay the passed-on overcharge is owned or controlled by a conspirator"). Some courts have deemed the exercise of how to characterize such purchasers as immaterial. See, e.g., In re Optical Disk Drive Antitrust Litig., No. 3:10-MD-2143 RS, 2012 U.S. Dist. LEXIS 55300, 2012 U.S. Dist. LEXIS 55300, 2012 WL 1366718, at *5 (N.D. Cal. Apr. 19, 2012) (describing this issue as "one of nomenclature rather than substance"); In re Mid-Atl. Toyota Antitrust Litig., 516 F. Supp. 1287, 1295 (D. Md. 1981) (bemoaning the fruitlessness of engaging in "an overly semantic analysis of the . . .exception; what is useful instead is to review the allegations in light of the policy objectives underlying Illinois Brick. If those policy considerations argue for application of the Illinois Brick rule it will be applied, if they do not, it will **[*101]** not.") None of the cases cited is dispositive. The Court finds the better approach is to place substance over semantics. The Sixth Circuit denied Defendants' request for interlocutory appeal in the DDP case. This Court declines to sanction this collateral attack on its ruling in the DPP case.

Finally, both AVRP Defendants and named class representatives assert that the decision in Apple, Inc. v. Pepper, 139 S. Ct. 1514, 203 L. Ed. 2d 802 (2019) favors their respective positions. In Apple, the Supreme Court held that consumers, who had purchased smartphone applications from Apple's retail stores, were direct purchasers with standing to sue the manufacturer for alleged monopolization. The Supreme Court expressly rejected Apple's assertion that iPhone owners were not direct purchasers, observing that there was no intermediary in the distribution chain. Id. at 1520-22.

In rendering its decision, the Supreme Court first considered the broad language contained in the statutory text of Section 4 of the Clayton Act, 15 U.S.C. § 14(a), observing that it authorizes "any person" injured in his property because of conduct forbidden by antitrust laws to sue the alleged violator. 139 S. Ct. at 1520. The Supreme Court next reviewed its Illinois Brick decision, observing that it incorporated proximate cause into § 4, preventing an indirect purchaser, **[*102]** "removed from the violator in a distribution chain" from bringing a suit under the statute. The Court characterized Illinois Brick as establishing "a bright-line rule that authorizes suits by direct purchases but bars suits by indirect purchasers." 139 S. Ct. at 1520 (citing Illinois Brick, 431 U.S. at 756). The Supreme Court concluded that iPhone owners did not fall to the "bottom of a vertical distribution chain" given the absence of an intermediary between Apple and the iPhone owner. Id. at 1521. Finally, the Court characterized iPhone owners as direct purchasers. Id.

The reasoning favors the named representatives' position. In addition other factors tip the scale in favor of named class representatives being deemed direct purchasers. Notably, DPPs' lawsuit was being litigated at the time of the EPP settlements. Nevertheless, counsel for Defendants never asked DPPs to release their claims or asked them to consent to inclusion in the EPP settlements. Defendants did not file a notice in the DPP case indicating they had settled the DPP claims. Nor did AVRP Defendants seek concurrence from DPPs or inform DPPs of the pendency of this motion. These actions strengthen named class representatives' suggestion that this motion is an attempt to do an **[*103]** end-run around the Court's ruling in which the Court rejected the request to dismiss DPPs' claim because DPPs are indirect purchasers prohibited by Illinois Brick from pursuing their claims. EPPs only sought injunctive relief under the Sherman Act; their damages claims were for violations of state law. In contrast, named class representatives are seeking money damages under federal law. They may proceed with their claims.

IV. CONCLUSION

For the reasons stated above, the motion is **DENIED**.

IT IS SO ORDERED.

Courts have adopted a liberal policy of admissibility with respect to *Fed. R. Evid. 702*. As such, the rejection of expert testimony is the exception and not the rule.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Burdens of Proof > Preponderance of Evidence

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN3[] **Expert Witnesses, Daubert Standard**

Courts must address a trilogy of restrictions before permitting the admission of expert testimony: qualification, reliability and fit. The party offering the expert must establish each requirement by a preponderance of the evidence.

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN4[] **Expert Witnesses, Qualifications**

To qualify as an expert, *Fed. R. Evid. 702* requires the witness to have specialized knowledge regarding the area of testimony. The Third Circuit has instructed courts to interpret the qualification requirement liberally and not to insist on a certain kind of degree or background when evaluating the qualifications of an expert. The Third Circuit noted that a witness can qualify as an expert under *Rule 702* on the basis of practical experience alone, and a formal degree, title, or educational specialty is not required.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN5[] **Expert Witnesses, Daubert Standard**

The reliability requirement of *Fed. R. Evid. 702* means that the expert's opinion must be based on the methods and procedures of science rather than on subjective belief or unsupported speculation; the expert must have good grounds' for his or her belief.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Relevance > Relevant Evidence

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN6[] **Expert Witnesses, Daubert Standard**

For expert testimony to meet the fit requirement, it must assist the trier of fact to understand the evidence or to determine a fact in issue. *Fed. R. Evid. 702*. This condition goes primarily to relevance. Expert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN7[] **Prerequisites for Class Action, Commonality**

The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only. *Fed. R. Civ. P. 23(a)* sets out four prerequisites for a class action—numerosity, commonality, typicality, and adequacy. Subsection (b) provides additional requirements for each type of class action. To obtain certification under *Fed. R. Civ. P. 23(b)(3)*, the moving party must also show that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. These requirements are referred to, respectively, as predominance and superiority. *Rule 23(b)(3)* also contains an implied, judicially-created requirement that the identities of class members are ascertainable.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

HN8[] **Class Actions, Certification of Classes**

The party seeking certification bears the burden of establishing each element of *Fed. R. Civ. P. 23*. Trial courts must engage in a rigorous analysis and find each of *Rule 23* 's requirements met by a preponderance of the evidence before granting certification. They must do so even if it involves judging credibility, weighing evidence, or deciding issues that overlap with the merits of a plaintiff's claims. The *Rule 23* analysis also requires courts to determine the nature of the evidence, and how plaintiffs would present this evidence at trial. However, a court should not address merits-related issues beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN9[] **Class Actions, Certification of Classes**

Actual, not presumed conformance with *Fed. R. Civ. P. 23* requirements is essential. When courts harbor doubt as to whether a plaintiff has carried her burden under *Rule 23*, the class should not be certified.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN10[] **Prerequisites for Class Action, Numerosity**

Fed. R. Civ. P. 23(a)(1) requires that the class be so numerous that joinder of all members is impracticable. *Fed. R. Civ. P. 23(a)(1)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN11[] **Prerequisites for Class Action, Commonality**

To satisfy *Fed. R. Civ. P. 23(a)(2)*, there must be questions of law or fact common to the class. Satisfaction of the commonality requirement requires that plaintiffs demonstrate that their claims depend upon a common contention, the resolution of which will resolve an issue that is central to the validity of each one of the claims in one stroke. Commonality does not require an identity of claims or facts among class members; instead, the commonality requirement will be satisfied if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN12[] Prerequisites for Class Action, Typicality

Fed. R. Civ. P. 23(a)(3) requires that the claims or defenses of the representative parties are typical of the claims or defenses of the class. The Third Circuit has a low threshold for satisfying typicality. To conduct the typicality inquiry, the Court must examine whether the named plaintiffs' claims are typical, in common-sense terms, of the class, thus suggesting that the incentives of the plaintiffs are aligned with those of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN13[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23(a)(4) requires plaintiffs to show that the representative parties will fairly and adequately protect the interests of the class. Whether adequacy has been satisfied depends on two factors: (a) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation, and (b) the plaintiff must not have interests antagonistic to those of the class. Only a fundamental conflict will defeat adequacy of representation. Judgment vacated on other grounds.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN14[] Class Actions, Certification of Classes

The ascertainability inquiry of Fed. R. Civ. P. 23(b) is two-fold, requiring a plaintiff to show that: (1) the class is defined with reference to objective criteria; and (2) there is a reliable and administratively feasible mechanism for determining whether putative class members fall within the class definition. Plaintiff has the burden of making this showing by a preponderance of the evidence, and the district court must undertake a rigorous analysis of the evidence to determine if the standard is met. However, plaintiff need not be able to identify all class members at class certification—instead, a plaintiff need only show that class members can be identified.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN15[] Class Actions, Certification of Classes

The Third Circuit has articulated three principal rationales for the ascertainability standard: First, ascertainability and a clear class definition allow potential class members to identify themselves for purposes of opting out of a class. Second, it ensures that a defendant's rights are protected by the class action mechanism, and that those persons who will be bound by the final judgment are clearly identifiable. Finally, it ensures that the parties can identify class members in a manner consistent with the efficiencies of a class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN16[] Prerequisites for Class Action, Predominance

The predominance and ascertainability inquiries are distinct because the ascertainability requirement focuses on whether individuals fitting the class definition may be identified without resorting to mini-trials, whereas the predominance requirement focuses on whether essential elements of the class's claims can be proven at trial with common, as opposed to individualized, evidence.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

Evidence > Burdens of Proof > Preponderance of Evidence

HN17[] Class Actions, Prerequisites for Class Action

Plaintiffs have the burden of showing ascertainability by a preponderance of the evidence, and the district court must undertake a rigorous analysis of the evidence to determine if the standard is met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN18[] Class Actions, Certification of Classes

While a plaintiff need only show at class certification that class members can be identified, actual, not presumed, conformance with the ascertainability requirement is essential.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN19[] Class Actions, Certification of Classes

When courts harbor doubt as to whether a plaintiff has carried her burden under *Fed. R. Civ. P. 23*, the class should not be certified.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN20[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(b)(3) requires that the questions of law or fact common to class members predominate over any questions affecting only individual members. *Rule 23(b)(3)*, however, does not require a plaintiff seeking class certification to prove that each element of her claim is susceptible to classwide proof. What the rule does require is that common questions predominate over any questions affecting only individual class members. An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN21[] **Class Actions, Certification of Classes**

The aim of the predominance inquiry is to test whether any dissimilarity among the claims of class members can be dealt with in a manner that is not inefficient or unfair. Inefficiency can be pictured as a line of thousands of class members waiting their turn to offer testimony and evidence on individual issues. Unfairness is equally well pictured as an attempt to eliminate inefficiency by presuming to do away with the rights a party would customarily have to raise plausible individual challenges on those issues.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN22[] **Sherman Act, Claims**

Under federal ***antitrust law***, antitrust injury occurs the moment that a purchaser incurs an overcharge. Antitrust injury is also referred to as antitrust impact.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN23[] **Standing, Requirements**

With respect to a class action, it is well established that the lack of common evidence of antitrust injury or impact alone can cause individual questions to predominate.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN24[] **Remedies, Damages**

It is undisputed that under longstanding federal ***antitrust law***, antitrust injury occurs the moment that a purchaser incurs an overcharge.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN25[] Clayton Act, Claims

Proof of antitrust injury or impact is analytically distinct from proof of antitrust damages. The purpose of the antitrust injury requirement is to prove that the theory of unlawful conduct, i.e. the theory of liability, was in fact responsible for causing harm to plaintiffs. The availability of a pass-on defense has no bearing on proof that a plaintiff sustained some harm traceable to the defendant's conduct. To the extent that pass-on defense is available, it relates to the calculation of damages, not the standard of antitrust injury.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN26[] Prerequisites for Class Action, Commonality

To the extent that a proposed class contains uninjured class members, plaintiffs must provide a reasonable and workable method for differentiating between uninjured class members and injured class members so that uninjured class members do not recover damages. Such a method must be protective of a defendant's constitutional rights and not cause individual inquiries to overwhelm common issues.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN27[] Prerequisites for Class Action, Predominance

For purposes of the predominance analysis, the number of potentially uninjured class members is a relevant consideration. While it is perfectly reasonable for the Court to address challenges to a small number of uninjured class members, it would be far more difficult for a court to weed out over 2,000 uninjured class members—or some subset of that number—from a class of over 16,000.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN28[] Class Actions, Certification of Classes

The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only, and for a party to take advantage of the class action device, it must limit their class to an operational definition.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN29[] Class Actions, Certification of Classes

At class certification, a model purporting to serve as evidence of damages in a class action must measure only those damages attributable to that theory.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN30[] **Remedies, Damages**

Unlike antitrust injury, a relaxed measure of proof is applied to antitrust damages calculations and the actual amount of damages may result from a reasonable estimate. A defendant whose wrongful conduct has rendered difficult the ascertainment of the precise damages suffered by the plaintiff, is not entitled to complain that they cannot be measured with the same exactness and precision as would otherwise be possible. Any adjustment to damages calculations for pass-on defenses arising under state laws would not affect the fact of antitrust injury, and does not preclude class certification.

Governments > Courts > Authority to Adjudicate

HN31[] **Courts, Authority to Adjudicate**

The availability of the pass-on defense involves merits-related issues beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Evidence > Burdens of Proof > Allocation

HN32[] **Prerequisites for Class Action, Predominance**

A plaintiff's burden of demonstrating that common questions of law or fact predominate includes providing the Court with an extensive analysis which demonstrates that the variations in the applicable state laws do not defeat predominance. Under the Third Circuit standard, courts may certify nationwide classes where differences in state law fall into a limited number of predictable patterns, and any deviations could be overcome at trial by grouping similar state laws together and applying them as a unit. However, plaintiffs face a significant burden to demonstrate that grouping is a workable solution.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN33[] **Prerequisites for Class Action, Numerosity**

The superiority requirement asks the court to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication. Superiority, unlike numerosity, considers alternatives to class actions other than joinder.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN34[] **Class Actions, Certification of Classes**

In considering whether superiority is established, the Court must consider whether variations in state laws present the types of insuperable obstacles which render class litigation unmanageable.

Opinion by: Jan E. DuBois

Opinion

[*686] **MEMORANDUM**

TABLE OF CONTENTS

I. INTRODUCTION

This multidistrict litigation involves what has come to be known as a "pay-for-delay," or "reverse payment," settlement—a practice in which a brand-name drug manufacturer brings a patent-infringement action against a generic drug manufacturer and then compensates the generic drug manufacturer for its agreement to delay entering the market with a competing generic version of the brand-name drug. In this case, two putative classes—the Direct-Purchaser Plaintiffs ("DPPs") and the End-Payor Plaintiffs ("EPPs")—aver **[**3]** that the brand-name manufacturer of the drug Niaspan, Kos Pharmaceuticals, Inc. ("Kos"), entered into anticompetitive settlement agreements with the generic manufacturer of that drug, Barr Pharmaceuticals, Inc. ("Barr"), in March of 2005 in order to terminate patent-infringement litigation brought by Kos against Barr in the District Court for the Southern District of New York. Kos was later acquired by defendant AbbVie Inc. ("AbbVie"), and Barr was later acquired by defendant Teva Pharmaceuticals, Inc. ("Teva").

Presently before the Court are End-Payor Plaintiffs' Motion for Class Certification, Defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller Offered in Support of End-Payor Plaintiffs' Motion for Class Certification, and End-Payor Plaintiffs' Motion to Exclude the Opinions and Testimony of John F. Fritz.

For the reasons that follow, (1) Defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller is denied, (2) EPPs' Motion for Class Certification is denied without prejudice, and (3) EPPs' Motion to Exclude the Opinions and Testimony of John F. Fritz is denied as moot.

II. BACKGROUND

The background of this case is set forth in detail **[**4]** in the Court's Memorandum and Order of September 5, 2014. *See* *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735 (E.D. Pa. 2014)*. This Memorandum recites only the facts and procedural history relevant to the motions presently before the Court.

Defendant AbbVie, a drug manufacturer that was spun off from Abbott Laboratories ("Abbott") in January 2013, manufactures and sells Niaspan, a brand-name prescription drug, primarily used in the treatment of lipid disorders. In the early 1990s, Kos, acquired by AbbVie in December 2006, developed a therapeutically-effective time-release version of niacin, which does not cause the side effects previously associated with niacin. Kos obtained a series of U.S. patents on time-release niacin and marketed the drug using the trademark Niaspan. Niaspan has been manufactured and sold by AbbVie (and AbbVie's predecessor corporations) since September of 1997.

In October 2001, Barr, acquired by Teva in January 2009, filed an Abbreviated New Drug Application ("ANDA") with the Food and Drug Administration ("FDA") seeking authorization to manufacture and sell a generic equivalent of certain dosages of Niaspan. The ANDA process provides for streamlined FDA approval of a bioequivalent generic version of an FDA-approved brand-name **[**5]** drug. As part of the ANDA process, Barr filed certifications with the FDA stating that its generic drug did not infringe any of the patents covering Niaspan and/or that the patents were invalid or unenforceable.

[*689] In March 2002, Kos initiated the first of a series of patent-infringement lawsuits against Barr in the Southern District of New York, alleging infringement of its Niaspan patents. After three years of litigation, on April 12, 2005, Kos and Barr entered into several related settlement agreements terminating the litigation. These agreements constitute the alleged "pay-for-delay" or "reverse payment" settlement that is the subject of this litigation.

EPPs allege that defendants' conduct violated the antitrust laws of 16 states, the consumer protection laws of 5 states, the unfair trade practices laws of 7 states, and the unjust enrichment laws of 25 states—a total of 53 state laws from 26 jurisdictions. *See* Defs.' Opp'n to EPPs' Mot. for Class Certification ("Defs.' Opp'n Class Cert") 3; Defs.' Apps. State L. Supp. Defs.' Opp'n to EPPs' Mot. for Class Certification (("Defs.' App.") A1-1-A1-4. Specifically, EPPs claim that as a result of the alleged unlawful reverse payment settlement, **[**6]** putative class members "were denied the opportunity to purchase generic Niaspan before September 20, 2013, and were further denied the benefit of the price competition that would have ensued in a competitive environment where Kos launched an authorized generic Niaspan to compete with Barr during the 180-day exclusivity period."[1] Mem. L. Supp. EPPs' Mot. for Class Certification ("EPPs' Mot. Class Cert") 12.

On December 19, 2018, EPPs filed a Motion for Class Certification. In their motion, EPPs seek certification of an overcharges class and an unjust enrichment class, each with two subclasses, a third party payor ("TPP") and a consumer subclass:

---

[1] "[T]o encourage generic entry and to compensate ANDA filers for the expense and risk of a potential infringement lawsuit, federal law grants the first generic manufacturer to file a[n] . . . ANDA application (i.e., the "first-filer") a 180-day period of exclusive marketing rights." *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 741 (E.D. Pa. 2014)*. The 180-day period is exclusive only with respect to other ANDA applicants and does not prohibit the holder of an approved New Drug Application (the manufacturer of the brand-name drug) from marketing its own generic version of its drug (an authorized generic). *Id.*

• Third Party Payor ("TPP") Overcharges Sub-class Definition:

○ All entities in the United States and its territories who purchased, paid, and/or provided reimbursement for some or all of the purchase price for Niaspan and/or generic versions of Niaspan in Arizona, California, Florida, Iowa, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New York, North Carolina, North Dakota, Oregon, Rhode Island, Tennessee, Vermont, West Virginia, and Wisconsin for consumption by their members, employees, **[**7]** insureds, participants, or beneficiaries **[*690]** during the period April 3, 2007 through January 31, 2018 (the "Overcharges Class Period").

• Consumer Overcharges Sub-class Definition:

○ All persons in the United States and its territories who purchased, paid, and/or provided reimbursement for some or all of the purchase price for Niaspan and/or generic versions of Niaspan in Arizona, California, Florida, Iowa, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New York, North Carolina, North Dakota, Oregon, Rhode Island, Tennessee, Vermont, West Virginia, and Wisconsin for consumption by themselves or their families during the period April 3, 2007 through January 31, 2018 (the "Overcharges Class Period").

• TPP Unjust Enrichment Sub-class Definition:

○ All entities in the United States and its territories who purchased, paid, and/or provided reimbursement for some or all of the purchase price for Niaspan and/or generic versions of Niaspan in Alabama, Arizona, Florida, Iowa, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Rhode Island, Tennessee, **[**8]** Utah, Vermont, West Virginia, Wisconsin, and Wyoming for consumption by their members, employees, insureds, participants, or beneficiaries during the period April 3, 2007 through September 19, 2013 (the "Unjust Enrichment Class Period").

• Consumer Unjust Enrichment Sub-class Definition:

○ All persons in the United States and its territories who purchased, paid, and/or provided reimbursement for some or all of the purchase price for Niaspan and/or generic versions of Niaspan in Alabama, Arizona, Florida, Iowa, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Rhode Island, Tennessee, Utah, Vermont, West Virginia, Wisconsin, and Wyoming for consumption by themselves or their families during the period April 3, 2007 through September 19, 2013 (the "Unjust Enrichment Class Period").

• Excluded from Overcharges and Unjust Enrichment Classes:

○ Defendants and their officers, directors, management, employees, subsidiaries, or affiliates;

○ All federal or state government entities other than cities, towns or municipalities with self-funded prescription drug plans;

○ All persons or entities **[**9]** who, after September 20, 2013, paid and/or provided reimbursement for branded Niaspan and did not pay and/or provide reimbursement for generic Niaspan;

○ All persons with a tiered co-pay plan who purchased only generic Niaspan;

○ All persons or entities who purchased Niaspan for purposes of resale or directly from Defendants or their affiliates.

○ Fully insured health plans (i.e., plans that purchased insurance from another third party payor covering 100% of the Plan's reimbursement obligations to its members);

○ Pharmacy Benefit Managers ("PBMs");

○ Flat co-payers (i.e., consumers who paid the same co-payment amount for brand and generic drugs);

○ The judges in this case and any members of their immediate families;

○ All Counsel of Record.

End-Payor Plaintiffs' Motion for Class Certification ("EPPs' Mot. Class Cert.") 1-3.[2]

---

[2] At the Hearing on May 14 and 15, 2019, EPPs stated that the class definitions submitted with the Motion for Class Certification contained errors and submitted a slide deck correcting those errors. *See* May 14, 2019 Hr'g Tr. ("May 14 Tr.") 101:23-103:9; EPPs' Slide Deck (ECF No. 660) 51-54. The above class definitions incorporate those corrections.

[*691] In their motion, EPPs ask the Court to appoint plaintiffs A.F. of L. - A.G.C. Building Trades Welfare Plan, City of Providence, Rhode Island, Electrical Workers 242 and 294 Health & Welfare Fund, International Union of Operating Engineers Local 49 Health and Welfare Fund, International Union of Operating Engineers Local 132 Health and Welfare Fund, New England Electrical **[**10]** Workers Benefits Fund, Painters District Council No. 30 Health & Welfare Fund, United Food & Commercial Workers Local 1776 & Participating Employers Health and Welfare Fund, Miles Wallis, and Carol Prasse (collectively, "named plaintiffs") as class representatives. *Id.* 3. EPPs also request appointment of Kenneth A. Wexler of Wexler Wallace LLP, Steve Shadowen of Hilliard Shadowen LLC, Michael Buchman of Motley Rice LLC, and Marvin Miller of Miller Law LLC as Co-Lead Counsel, and Jeffrey Kodroff of Spector Roseman & Kodroff P.C. as Liaison Counsel for the EPP class pursuant to *Fed. R. Civ. P. 23(c)(1)(B)* and *23(g)*. *Id.* 3-4.

On February 25, 2019, defendants responded to EPPs' motion for class certification and filed a motion to exclude the expert testimony of EPP class certification experts Eric Miller and Laura Craft. On March 25, 2019, EPPs filed a reply in support of their motion for class certification, responded to defendants' motion to exclude the expert testimony of Miller and Craft, and filed a motion to exclude the expert testimony of defendants' expert John Fritz. On April 8, 2019, defendants responded to EPPs' motion to exclude Fritz's testimony. The Court held Hearings on EPPs' class certification motion and the related **[**11]** motions to exclude expert testimony on May 14 and 15, 2019, and July 23, 2019.

III. MOTION TO EXCLUDE THE EXPERT TESTIMONY OF LAURA CRAFT AND ERIC MILLER

Defendants argue that the expert testimony of two EPP rebuttal experts on class ascertainability, Eric Miller and Laura Craft, should be excluded under *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. Mem. L. Supp. Defs.' Mot. Exclude Expert Test. Laura Craft & Eric Miller Offered Supp. EPPs' Mot. Class Certification ("Mem. Exclude Craft & Miller") 1. EPPs oppose defendants' motion and argue that both experts provide admissible evidence. EPPs' Opp'n Defs.' Mot. Exclude Expert Test. Laura Craft & Eric Miller ("Opp'n Mot. Exclude Craft & Miller") 1. For the reasons that follow, the Court agrees with EPPs that Craft and Miller proffer admissible evidence. Defendants' motion to exclude the expert testimony of Craft and Miller is therefore denied.

A. *APPLICABLE LAW*

Federal Rule of Evidence 702 provides:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the **[**12]** testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

That rule requires the Court to act as a gatekeeper and is applicable to scientific testimony and testimony based on "technical" **[*692]** and "other specialized" knowledge. *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 141, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. ***HN1***[] A court must determine whether an expert "employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field." *Id. at 152*.

HN2[] Courts have adopted a "liberal policy of admissibility" with respect to *Rule 702*. *Pineda v. Ford Motor Co., 520 F.3d 237, 243 (3d Cir. 2008)* (quoting *Kannankeril v. Terminix Int'l, Inc., 128 F.3d 802, 806 (3d Cir. 1997)*). As such, the "rejection of expert testimony is the exception and not the rule." *Dorman Prods. v. PACCAR, Inc., 201 F. Supp. 3d 663, 686 (E.D. Pa 2016)* (DuBois, J.) (quoting *Fed. R. Evid. 702* Advisory Committee Note).

HN3[] Courts must address a "trilogy of restrictions" before permitting the admission of expert testimony: qualification, reliability and fit. *Schneider v. Fried, 320 F.3d 396, 404 (3d Cir. 2003)*; *Elcock v. Kmart Corp., 233 F.3d 734, 741 (3d Cir. 2000)*. The party offering the expert must establish each requirement by a preponderance of the evidence. *In re TMI Litig., 193 F.3d 613, 663 (3d Cir. 1999)*.

i. Qualification

HN4[] To qualify as an expert, "*Rule 702* requires the witness to have 'specialized knowledge' regarding the area of testimony." *Betterbox Commc'ns Ltd. v. BB Techs., Inc., 300 F.3d 325, 335 (3d Cir. 2002)*. The Third Circuit has instructed courts to interpret the qualification **[**13]** requirement "liberally" and not to insist on a certain kind of degree or background when evaluating the qualifications of an expert. "[T]he Third Circuit noted that a witness can qualify as an expert 'under *Rule 702* on the basis of practical experience alone, and a formal degree, title, or educational specialty is not required.'" *Voilas v. Gen. Motors Corp., 73 F. Supp. 2d 452, 457 (D.N.J. 1999)* (citing *Lauria v. AMTRAK, 145 F.3d 593, 599 (3d Cir.1998)*).

ii. Reliability

HN5[] The reliability requirement of *Daubert* "means that the expert's opinion must be based on the 'methods and procedures of science' rather than on 'subjective belief or unsupported speculation'; the expert must have 'good grounds' for his or her belief." *In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 742 (3d Cir. 1994)*.

iii. Fit

HN6[] For expert testimony to meet the *Daubert* "fit" requirement, it must "assist the trier of fact to understand the evidence or to determine a fact in issue." *Fed. R. Evid. 702*. "This condition goes primarily to relevance. Expert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful." *Daubert, 509 U.S. at 591*.

B. *DISCUSSION*

The Court reviews defendants' challenges to Miller and Craft's proffered opinions in turn.

i. Eric Miller

In his declaration, Miller proffers two primary conclusions. First, Miller opines that through subpoenas issued to PBMs and pharmacies, EPPs will be able to obtain transactional **[**14]** level purchase data regarding purchases of Niaspan and **[*693]** its generic equivalents during the class period. Decl. Eric J. Miller ("Miller Decl.") ¶¶ 3, 20. Second, he opines that through the PBM and pharmacy transaction records obtained by the EPPs, the EPPs will be able to identify purchasers of Niaspan and its generic equivalents during the Class Period. *Id.* ¶¶ 8, 10, 20. Miller also states that he "disagrees with [defense expert, Donald] Dietz's suggestion that there is no 'reliable and administratively feasible means to identify class members in this case.'" Miller Decl. ¶ 20.

The Court concludes that Miller meets the *Rule 702* requirements, but his testimony is limited to his opinions that (1) EPPs can obtain transactional level purchase data regarding purchases of Niaspan and its generic equivalents during the class period and (2) EPPs can use PBM and pharmacy transaction records to identify purchasers of Niaspan and its generic equivalents during the class period. To the extent that Miller purports to opine that class members can be identified, he has not addressed the way in which exclusions from the class can be applied and therefore he has not provided reliable grounds for any such opinion. **[**15]**

1. *Qualification*

EPPs claim Miller's "extensive experience obtaining and utilizing comparable data," including his direct involvement with settlement administration in over 25 indirect purchaser pharmaceutical class lawsuits, qualifies him to offer his opinions. Opp'n Mot. Exclude Craft & Miller 15.

Miller attests that he has "personally overseen the methodologies used in indirect purchaser pharmaceutical class actions to identify class members," which "utilized prescription data obtained from the records of pharmacies and PBMs to identify consumers who may be class members." Miller Decl. ¶ 9. He has 18 years of experience administering class actions settlements, including more than 25 indirect purchaser pharmaceutical class cases. Opp'n Mot. Exclude Craft & Miller 2. The Court concludes that Miller is sufficiently qualified to offer his opinions that EPPs can obtain brand and generic Niaspan transaction records for the class period and that those records can be used to identify purchasers of brand and generic Niaspan during the class period.

2. *Reliability*

Defendants argue that Miller is unreliable because he (1) did not offer a methodology to identify class members and (2) did not review **[**16]** any data produced in this case, address the challenges posed by the class definition, or address limitations in data availability and access in PBMs' data systems. Mem. Exclude Craft & Miller 4-9.

EPPs respond that (1) Miller need not provide a methodology to identify class members because he does not purport to provide a method for ascertaining class members, and (2) Miller was not required to review the record because his testimony is reliably based on his past industry experience and his involvement in four cases in which pharmaceutical transaction data was obtained and used. Opp'n Mot. Exclude Craft & Miller 15, 17-18.

First, the Court agrees with EPPs that Miller need not provide a methodology for identifying class members because he does not opine on such a methodology. Though EPPs' evidence of a reliable and administratively feasible methodology for identifying class members is critical to the Court's ascertainability inquiry, Miller's testimony does not address that issue—he only opines on the question whether Niaspan and generic *purchasers* can be identified. As Miller explained during his deposition, his declaration did not consider the EPPs' class definition, did not compare **[**17]** the EPPs' definition to the class definitions in *Relafen, Tricor, Provigil* and *Fluoride Tablets*, and did not address any of the exclusions in EPPs' class definition. Videotape Dep. Eric Miller 26:13-19, 27:13-18, 30:1-5. For those reasons, Miller will not be permitted **[*694]** to testify that he disagrees with defense expert Donald Dietz's opinion that there is no reliable and administratively feasible means to identify class members.

Second, the Court concludes that Miller has "good grounds" for both of his conclusions. Miller opines that EPPs can obtain brand and generic Niaspan transaction records for the class period based on his past experience with settlement administration in pharmaceutical cases in which he was involved. Miller Decl. ¶ 10. Specifically, he relies upon his experience in the *Relafen, Tricor*, *Provigil* and *Fluoride Tablets* cases, in which pharmaceutical records were obtained through subpoenas to pharmacies and PBMs. *Id.* ¶¶ 10-15. Miller's past experience provides reasonable grounds for him to conclude that subpoenas to PBMs and pharmacies will result in the production of pharmaceutical records in this case. *See* *In re Paulsboro Derailment Cases, 746 F. App'x 94, 98 (3d Cir. 2018)* (holding that an expert may base his opinion upon personal **[**18]** experience).

Similarly, Miller opines that EPPs can identify purchasers of Niaspan and its generic equivalents during the class period based on his experience with similar subpoenaed data. Miller Decl. ¶ 8. Specifically, he states that in the *Relafen, Tricor*, *Provigil* and *Fluoride Tablets* cases, the electronic data fields enabled the plaintiffs to identify each drug purchaser. *Id.* ¶¶ 11-18. Miller's past experience in which the subpoenaed pharmaceutical data identified drug purchasers provides good grounds for his belief that the production of Niaspan pharmaceutical data would enable the identification of brand and generic Niaspan purchasers.

Because Miller has good grounds for his opinions on the identification of purchasers of brand and generic Niaspan, defendants' arguments that Miller failed to review the produced data or to address limitations in data availability and retrieval address the weight of Miller's testimony, not its admissibility. *See* *In re TMI Litig., 193 F.3d 613, 665 (3d*

Cir. 1999) ("[T]he judge should not exclude evidence simply because he or she thinks that there is a flaw in the expert's investigative process which renders the expert's conclusions incorrect. The judge should only exclude the evidence if the flaw **[**19]** is large enough that the expert lacks the "good grounds" for his or her conclusions.").

For all of the forgoing reasons, Miller will be permitted to testify that brand and generic Niaspan purchasers can be identified. He will not be permitted to testify that class members can be identified.

3. *Fit*

Defendants argue that Miller's experience with claims administration in the settlement of cases is inapposite to this case because it does not involve a settlement class. Mem. Exclude Craft & Miller 10-11. In support, they point to the fact that several courts have recognized that "the successful administration of a settlement does not **[*695]** necessarily mean that a litigation class could be ascertained." *Id.* at 10.

EPPs respond that the fact Miller's experience with settlement administration does not impact his opinion on the availability of the data. *See* Opp'n Mot. Exclude Craft & Miller 18-19. They contend Miller's testimony addressing the existence and availability of PBM and pharmacy transaction data is relevant to the identification of brand and generic Niaspan purchasers.

The Court rejects defendants' argument that Miller's testimony is not relevant because his experience is based on settlement claims **[**20]** administration. Although defendants' are correct that "[t]he successful administration of a settlement does not necessarily mean that a litigation class could be ascertained," *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 151 n.8 (E.D. Pa. 2015)*, EPPs correctly state that "the *fact* of data availability is the same, regardless of the context." Opp'n Mot. Exclude Craft & Miller 19. The Court thus concludes that Miller's testimony, as limited *supra*, satisfies the fit requirement under *Rule 702*.

4. *Conclusion*

Accordingly, that part of defendants' motion seeking to exclude all of the opinions and testimony of Miller is denied. However, Miller's testimony is limited to his opinions that (1) EPPs can obtain transactional level purchase data regarding purchases of Niaspan and its generic equivalents during the class period and (2) EPPs can use PBM and pharmacy transaction records to identify purchasers of Niaspan and its generic equivalents during the class period. However, he has not provided the required foundation to opine that class members can be identified in a reliable and administratively feasible manner.

ii. Laura Craft

In her declaration, Laura Craft attests that if provided with data from TPPs, PBMs, and pharmacies containing the identities of purchasers of **[**21]** Niaspan and its generic equivalents during the class period, she can compile a list reflecting the identities of the members of the proposed class in a manageable process that "can be carried out programmatically." Decl. Laura R. Craft ("Craft Decl.") ¶ 10. For the reasons below, the Court concludes that Craft's opinion is admissible under *Rule 702*'s "liberal policy of admissibility."

1. *Qualification*

EPPs argue that Craft is qualified as president of data analytics firm OnPoint Analytics, specializes in collecting, manipulating, and analyzing pharmaceutical industry data, especially in the litigation context, and has applied her expertise to over fifty pharmaceutical cases. Opp'n Mot. Exclude Craft & Miller 5-6.

Craft's qualifications include "extensive experience [at OnPoint] working with insurance and claims processing data, including the processing of prescription drug benefits." Craft Decl. ¶ 3. She also has extensive experience using transactional data to "identify[] individual class members in a variety of contexts . . . [including] identifying transaction dates, types, and costs, the participants in making payment, and eliminating duplicates." *Id.* ¶ 5. Craft declares that OnPoint's expertise **[**22]** with transactional data includes "the cleaning and transformation processes that create consistency and allow efficient programming across data obtained from multiple sources." *Id.*

The Court concludes that Craft's extensive experience working with pharmaceutical data qualifies her to opine that EPP class members can be identified in a programmatic and manageable process.[3]

2. *Reliability*

Defendants contend that Craft's testimony is unreliable because she has not reviewed the data produced in this case and has not offered a methodology for **[*696]** identifying class members. Mem. Exclude Craft & Miller 5-9.

EPPs respond that Craft properly based her opinions on her experience and not on the produced data because "absent a subpoena and a negotiated production process and the execution of protective orders that assure that there is a *HIPAA*-qualified protective order in place, one would not expect to see samples that would be, standalone, sufficient to answer all of the questions which might be implicit in defining the class." Opp'n Mot. Exclude Craft & Miller 12. They further argue that Craft justifiably relies on sworn declarations by four of the largest PBMs that they maintain their **[**23]** claims data in the industry standard format and that they maintain the types of data that would be required to identify class members and apply key exclusions. *Id.* at 10-12.

EPPs also contend that Craft explained a six-step methodology for identifying class members based on her experience manipulating pharmaceutical data, *id.* at 9, and that her methodology is particularly well-suited for drug sales in the pharmaceutical industry, "which are tracked, monitored, and recorded across a set of substantially uniform variables." Reply Mem. L. Supp. EPPs' Mot. Class Certification ("EPPs' Reply Class Cert.") 6.

The Court concludes that Craft's failure to review the data produced in this case does not render her opinion unreliable. Although Craft does not rely on actual produced data, she relies on her experience working with pharmaceutical data from PBMs, TPPs, drug manufacturers, pharmacies, and consumers. Craft Decl. ¶ 5-6. Craft reports that the data standardization process "is particularly easy in the pharmaceutical industry because the specific types of data reported are already relatively standard" and "[PBM] databases are generally able to report the same key variables." *Id.* She also relies on declarations **[**24]** from PBM representatives Kyle Brua (Prime Therapeutics LLC, March 28, 2018), Jonathan Stocker (Prime Therapeutics LLC, March 28, 2018), Tom Henry (Express Scripts, Inc., March 28, 2018), Robert Lahman (OptumRx, Inc. March 26, 2018), and Steven Schaper (Caremark, LLC, March 20, 2018), which detail the type of data that PBMs retain.

The Court further concludes that Craft's relatively threadbare methodology is adequate under the liberal admissibility standard of *Rule 702*. In her declaration, Craft asserts that "OnPoint would be able to merge the data from the various sources, identify and eliminate data errors, transform the data to standardize the fields, eliminate duplicates, and compile a list reflecting the identities of the class members contained in the data." Craft Decl. ¶ 10. Defendants are correct that Craft does not explain how any of these steps would be carried out and "did not describe a specific method" to identify payors who meet the class definitions in this case. Mem. Exclude Craft & Miller 6. However, Craft reviewed the class exclusions, and declared that "OnPoint has extensive experience applying these types of exclusions to pharmaceutical data." Craft Decl. ¶ 9. As such, Craft's **[**25]** opinion that she can create a list of class members and apply the class exclusions in this case is based on her experience applying these types of exclusions to similar data in other cases. The Court determines that Craft's reliance upon her past experience applying "these types of exclusions" provides sufficient grounds for her belief that she can do so again in this instance. Defendants' objections to Craft's assurances that she can apply the class exclusions go to the weight of her testimony and not its admissibility. *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 596, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)* **[*697]** ("Vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence.").

3. *Fit*

---

[3] The analysis under *Daubert* involves a preliminary assessment of admissibility and has no effect on the Court's substantive analysis of whether the admissible evidence satisfies the more rigorous *Rule 23* ascertainability requirement by a preponderance of the evidence. *See, e.g., In re Wellbutrin XL Antitrust Litig., 308 F.R.D. at 144, 151* (concluding that plaintiff's witness was "sufficiently qualified to be an expert" but offered evidence that "[fell] short" of satisfying ascertainability).

Defendants argue that Craft has not shown her experience is sufficiently analogous because "Craft's declaration did not identify a single case that showed she had applied her (unspecified) methodology in a comparable setting." Mem. Exclude Craft & Miller 10. However, as explained above, Craft states that she has "extensive experience applying these types of exclusions to pharmaceutical data." Craft Decl. ¶ 9. Craft's declaration rebuts defense expert Dietz's opinion **[**26]** by explaining that she and OnPoint "routinely perform[] precisely th[e] type of work" that Dietz incorrectly (in her view) identifies as 'difficult' and 'cumbersome.'" Opp'n Mot. Exclude Craft & Miller 8. Thus, Craft's testimony assists the Court in understanding the evidence relating to whether EPPs have provided a reliable and administratively feasible mechanism for identifying class members, which is relevant to the Court's determination of class ascertainability.

4. *Conclusion*

The Court thus concludes that Craft's expert opinion is admissible. That part of defendants' motion seeking to exclude the opinion and testimony of Laura Craft is denied.

IV. EPPS' MOTION FOR CLASS CERTIFICATION

A. *LEGAL STANDARD*

HN7[] "The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only." *In re Modafinil Antitrust Litig., 837 F.3d 238, 248 (3d Cir. 2016)*. *Subsection (a) of Federal Rule of Civil Procedure 23* sets out four prerequisites for a class action—numerosity, commonality, typicality, and adequacy. *Subsection (b)* provides additional requirements for each type of class action. To obtain certification under *Rule 23(b)(3)*, as EPPs seek to do in this case, the moving party must also show "that the questions of law or fact common to class members predominate over any questions **[**27]** affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." These requirements are referred to, respectively, as predominance and superiority. *Rule 23(b)(3)* also contains an implied, judicially-created requirement that the identities of class members are ascertainable. *Byrd v. Aaron's Inc., 784 F.3d 154, 162 n.5 (3d Cir. 2015)*.

HN8[] "The party seeking certification bears the burden of establishing each element of *Rule 23*." *In re Modafinil Antitrust Litig., 837 F.3d at 248*. "[T]rial courts 'must engage in a rigorous analysis and find each of *Rule 23*[ ]'s requirements met by a preponderance of the evidence before granting certification.' They must do so even if it involves judging credibility, weighing evidence, or deciding issues that overlap with the merits of a plaintiff's claims." *Harnish v. Widener Univ. Sch. of Law, 833 F.3d 298, 304 (3d Cir. 2016)* (citing *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 316-25 (3d Cir. 2008)*). The *Rule 23* analysis also requires courts to "determine the nature of the evidence, and how plaintiffs would present this evidence at trial." *In re Domestic Drywall Antitrust Litig., 322 F.R.D. at 221*. However, "a court should not address merits-related issues 'beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof.'" *Harnish, 833 F.3d at 305*.

[*698] ***HN9***[] The Third Circuit has "repeatedly emphasize[d] that [a]ctual, not presumed conformance with *Rule 23* requirements is essential." **[**28]** *Gonzalez v. Corning, 885 F.3d 186, 192 (3d Cir. 2018)* (internal quotations omitted). "When courts harbor doubt as to whether a plaintiff has carried her burden under *Rule 23*, the class should not be certified." *Mielo v. Steak 'n Shake Operations, Inc., 897 F.3d 467, 483 (3d Cir. 2018)*.

B. *DISCUSSION*

EPPs contend that they meet the four requirements under *Rule 23(a)* and the three requirements under *Rule 23(b)(3)*. The Court addresses each such requirement in turn.

C. RULE 23(A) REQUIREMENTS

EPPs must initially satisfy the four prerequisites detailed in Rule 23(a): numerosity, commonality, typicality, and adequacy. The Court concludes that each requirement is satisfied.

i. Numerosity

HN10[] Rule 23(a)(1) requires that the class be "so numerous that joinder of all members is impracticable." Fed. R. Civ. P. 23(a)(1).

EPPs assert that "Niaspan prescriptions peaked at nearly 600,000 per month in 2011," and argue that joinder is impracticable for such a large class. Mem. L. Supp. EPPs' Mot. Class Certification ("EPPs' Class Cert. Mem.") 8. The Court agrees with EPPs and concludes that the numerosity requirement is satisfied.

ii. Commonality

HN11[] To satisfy Rule 23(a)(2), there must be "questions of law or fact common to the class." Satisfaction of the commonality requirement requires that plaintiffs demonstrate that their claims "depend upon a common contention," the resolution of which "will resolve an issue that is central to the **[**29]** validity of each one of the claims in one stroke." Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011). "Commonality does not require an identity of claims or facts among class members; instead, [t]he commonality requirement will be satisfied if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class." Johnston v. HBO Film Mgmt., Inc., 265 F.3d 178, 184 (3d Cir. 2011).

The Court agrees with EPPs that most of the "central questions in this case focus entirely on Defendants' conduct" and involve common questions. EPPs' Class Cert. Mem. 9. These common questions include, *inter alia*, (1) whether Kos entered into a contract, combination, and/or conspiracy with Barr to restrain trade; (2) whether Kos paid cash and/or other valuable consideration to Barr in exchange for a promise to delay the launch of generic Niaspan; (3) whether defendants had pro-competitive justifications for their conduct; and (4) whether defendants possessed market power in the relevant market. The commonality requirement is satisfied.

iii. Typicality

HN12[] Rule 23(a)(3) requires that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." The Third Circuit has a "low threshold" for satisfying typicality. *See* In re Nat'l Football League Players Concussion Injury Litig., 821 F.3d 410, 428 (3d Cir. 2016). To conduct the typicality inquiry, the **[**30]** Court must examine "whether the named plaintiffs' claims are typical, in common-sense terms, of the class, thus suggesting that the incentives of the plaintiffs are aligned with those of the class." In re Blood Reagents Antitrust Litig., No. 09-2081, 2015 U.S. Dist. LEXIS 141909, 2015 WL 6123211, at *26 (E.D. Pa. Oct. 19, 2015) (DuBois, J.).

[*699] EPPs argue that typicality is satisfied because "named Plaintiffs' claims arise out of the same facts and legal theories that give rise to the claims of all EPP Class members: Kos and Barr entered into a reverse-payment settlement that unlawfully extended Kos' monopoly over the Niaspan market and delayed the onset of generic competition." EPPs' Class Cert. Mem. 11. Defendants do not contest that EPPs have satisfied the typicality requirement. The Court concludes that the typicality requirement is satisfied.

iv. Adequacy

HN13[] *Rule 23(a)(4)* requires plaintiffs to show that "the representative parties will fairly and adequately protect the interests of the class." "Whether adequacy has been satisfied 'depends on two factors: (a) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation, and (b) the plaintiff must not have interests antagonistic to those of the class.'" *McDonough v. Toys R Us, Inc., 638 F. Supp. 2d 461, 477 (E.D. Pa. 2009)*. "Only a fundamental conflict will defeat adequacy of representation." *In re K-Dur Antitrust Litig., 686 F.3d 197, 223 (3d Cir. 2012)*, ***[**31]*** *judgment vacated on other grounds*, *570 U.S. 913, 133 S. Ct. 2849, 186 L. Ed. 2d 904 (2013)*.

EPPs contend that "plaintiffs are represented by experienced counsel thoroughly familiar with litigating complex class actions" and "there is no likelihood of a conflict of interest among class members." EPPs' Class Cert. Mem. 11-12. Defendants make no argument to the contrary, and the Court agrees with EPPs that the adequacy requirement is satisfied.

D. ***RULE 23(B)(3) REQUIREMENTS***

EPPs must also satisfy the predominance and superiority requirements of *Rule 23(b)(3)* and the ascertainability requirement. *See* *In re: Domestic Drywall Antitrust Litig., 322 F.R.D. 188, 200 (E.D. Pa. 2017)*. Defendants argue that EPPs fail their burden of proving each of these requirements. The Court addresses each such requirement in turn, beginning with ascertainability.

i. Ascertainability

HN14[] The ascertainability "inquiry is two-fold, requiring a plaintiff to show that: (1) the class is 'defined with reference to objective criteria'; and (2) there is 'a reliable and administratively feasible mechanism for determining whether putative class members fall within the class definition.'" *Byrd v. Aaron's Inc., 784 F.3d 154, 163 (3d Cir. 2015)*. "Plaintiff has the burden of making this showing by a preponderance of the evidence, and the district court must 'undertake a rigorous analysis of the evidence to determine if the standard is met.'" **[**32]** *City Select Auto Sales Inc. v. BMW Bank of N. Am. Inc., 867 F.3d 434, 439 (3d Cir. 2017)* (internal citations omitted). "However, plaintiff need not 'be able to identify all class members at class certification—instead, a plaintiff need only show that 'class members can be identified.'" *Id.* (internal citations omitted).

HN15[] The Third Circuit has articulated three principal rationales for the ascertainability standard:

> First, ascertainability and a clear class definition allow potential class members to identify themselves for purposes of opting out of a class. Second, it ensures that a defendant's rights are protected by the class action mechanism, and that those persons who will be bound by the final judgment are clearly identifiable. Finally, it ensures that the parties can identify class members in a manner consistent with the efficiencies of a class action.

[*700] *City Select Auto Sales Inc., 867 F.3d at 439* (internal quotations and citations omitted).

HN16[] "The predominance and ascertainability inquiries are distinct . . . because the ascertainability requirement focuses on whether individuals fitting the class definition may be identified without resort[ing] to mini-trials, whereas the predominance requirement focuses on whether essential elements of the class's claims can be proven at trial with common, as opposed to individualized, **[**33]** evidence." *Byrd, 784 F.3d at 164*.

EPPs argue that under the governing Third Circuit law, plaintiffs can satisfy ascertainability with "almost zero evidence." EPPs' Class Cert. Mem. 17. In support, EPPs rely heavily on *Byrd*, for the proposition that EPPs need not show "how the records would be obtained, who would obtain them, or who would do the matching of records." EPPs' Class Cert. Mem. 18.

Defendants' respond that EPPs "offer a gross misreading of *Byrd* and the Third Circuit's ascertainability jurisprudence." Defs.' Opp'n Class Cert. 37.

The Court agrees with defendants that EPPs mischaracterize the Third Circuit ascertainability standard. Contrary to EPPs' assertion, *Byrd* does not stand for the proposition that ascertainability requires less than a rigorous showing of administrative feasibility. In *Byrd*, the Third Circuit reversed a denial of class certification in a case in which the district court "summarily adopted the Magistrate Judge's Report and Recommendation, and no oral argument was held on the class-certification motion," notwithstanding the fact that the plaintiffs had filed an objection to the Report and Recommendation that addressed class ascertainability. *Byrd, 784 F.3d at 169-170*. As such, the Third Circuit ruled **[**34]** that the district court erred in failing to conduct a rigorous analysis of the evidence presented.

Although Judge Rendell filed a concurring opinion in *Byrd* in which she opined that "the time has come to do away with [the ascertainability requirement]," that position has not been adopted by this Circuit. *See* *Byrd, 784 F.3d at 172* (Rendell, J., concurring). ***HN17***[] As the Third Circuit recently reiterated, plaintiffs have the burden of showing ascertainability "by a preponderance of the evidence, and the district court must 'undertake a rigorous analysis of the evidence to determine if the standard is met.'" *City Select Auto Sales Inc., 867 F.3d at 439*. Courts in this district have consistently rejected EPPs' argument that *Byrd* lowered the Third Circuit ascertainability standard, and this Court agrees with those decisions. *See, e.g.,* *In re Domestic Drywall Antitrust Litig., No. 13-2437, 2017 U.S. Dist. LEXIS 135758, 2017 WL 3700999, at *8 (E.D. Pa. Aug. 24, 2017)* ("[In *City Select*,] the court reaffirmed its prior precedent and did not take the opportunity to retreat from the "heightened" ascertainability standard that has been developed in this Circuit, as urged by Judge Rendell in her *Byrd* concurrence."); *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *11 (E.D. Pa. June 10, 2015)* ("[P]lans to create a methodology at a later date do not satisfy the rigorous analysis insisted upon by the Third Circuit and I do not read *Byrd* to alter these requirements.").

Thus, **[**35]** the Court will rigorously analyze EPPs' evidence of ascertainability. ***HN18***[] While EPPs need only show at class certification that class members can be identified, *City Select, 867 F.3d at 439*, "actual, not presumed[,] conformance with [the ascertainability] requirement[] is essential." *Gonzalez v. Corning, 885 F.3d 186, 192 (3d Cir. 2018)* (internal quotations and alterations omitted). The Court next considers whether **[*701]** EPPs' class definition is defined with objective criteria.

1. *Defining Class with Reference to Objective Criteria*

EPPs argue that the provided class definitions are defined with reference to objective criteria. EPPs' Class Cert. Mem. 13. Defendants disagree, arguing that "given the complex flow of payments and reimbursements in the pharmaceutical distribution chain, it is far from clear exactly who is in the class and who is not." Defs.' Opp'n Class Cert. 29. Defendants also claim that there is an ambiguity in the class definition regarding whether a payor includes any entity that bears risk for drug costs. *Id.* at 29-31.

EPPs respond that "[t]he ambiguities that Defendants assert do not appear on the face of the class definitions, which is the standard by which to determine class membership." EPPs' Reply Class Cert. 3.

The Court agrees with EPPs that the class definition **[**36]** is defined with reference to objective criteria and satisfies the first prong of the ascertainability analysis. Defendants' arguments do not challenge the objective nature of the class criteria. *Cf.* *City Select Auto Sales Inc., 867 F.3d at 439* ("Under the objective criteria requirement, '[a] class definition that depends on subjective criteria, such as class members' state of mind, will fail for lack of definiteness.'"). The Court next turns to the evidence submitted by EPPs to establish that they have a reliable and administratively feasible mechanism for identifying class members.

2. *Reliable and Administratively Feasible Mechanism for Determining Whether Putative Class Members Fall Within the Class Definition*

EPPs assert that they have "submitted evidence that an administratively feasible methodology exists to allow for the determination of whether a TPP or consumer falls within the definitions of the Proposed Classes." EPPs' Class Cert. Mem. 14. Defendants respond that EPPs have not met their burden of proving a reliable and administratively feasible methodology by a preponderance of the evidence. Defs.' Opp'n Class Cert. 34.

Upon a rigorous analysis of the evidence, the Court determines that EPPs have failed to carry their **[**37]** burden of showing a reliable and administratively feasible mechanism for identifying class members by a preponderance of the evidence.

a. EPPs' Evidence of a Reliable and Administratively Feasible Mechanism

EPPs face an uphill battle in carrying their burden of proving they have a reliable and administratively feasible mechanism for identifying class members. Courts in this district have held in similar pay-for-delay cases that end-payor plaintiffs have failed to provide adequate evidence of an administratively feasible mechanism for identifying class members. *See, e.g.,* *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 107013, 2015 WL 4737288, at *11 (E.D. Pa. Aug. 4, 2015)* ("Plaintiffs have . . . not met their burden of establishing that any methodology for identifying class members would be administratively feasible."); *see also* *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 149-50 (E.D. Pa. 2015)* ("[Plaintiffs ha[ve] not shown by a preponderance of the evidence that there is a reliable and administratively feasible mechanism for determining which PBMs and individual consumers are members of the class.").

EPPs argue in this case, they "have provided the [evidentiary] record that the courts in *Wellbutrin* and *Vista [Healthplan]* lacked." EPPs' Reply Class Cert. 3. They argue that their evidence demonstrates "that obtaining, standardizing, and **[*702]** merging data **[**38]** from multiple sources with the goal of ascertaining class members is . . . common practice in antitrust litigation, [and] is especially well-suited to the pharmaceutical industry." EPPs' Reply Class Cert. 4. The Court reviews EPPs' evidence below.

First, EPPs proffer evidence that the relevant pharmaceutical transaction data exists. EPPs' expert, Myron Winkelman, asserts that "[e]very prescription drug transaction in the United States is well-documented and records of those transactions are maintained so that TPPs and consumers can identify, at a minimum, the prescriptions drugs they purchased, the date on which they were purchased, and the price they each paid for the medication." Decl. Myron Winkelman ("Winkelman Decl.") ¶ 18. Winkelman also claims that "PBMs are obligated by their contractual agreements with the TPPs to maintain records in connection to the processing, payment and denial of claims," *id.* ¶ 35, and "mail order and retail pharmacies maintain extensive records of each consumer's prescription purchase." *Id.* ¶ 36. Finally, Winkelman opines that pharmaceutical data is "maintained in standardized accepted industry format." *Id.* ¶ 32.

In support of EPPs' claim that the data **[**39]** exists, they have presented short declarations by several PBM representatives. For example, Jonathan Stocker, Vice President of PBM Operations at Prime Therapeutics LLC, declared "Prime has readily accessible records, in an industry standard format created by the National Council for Prescription Drug Program, by which third party payors and consumer can be identified on every purchase of Niaspan and Generic Niaspan that Prime adjudicates on behalf of its third-party payor clients." Decl. Non-Party Prime Therapeutics LLC ("Stocker Decl.") ¶ 7. Similarly, Robert Lahman, Senior Vice President of Industry Relations at OptumRx, Inc., attested that "OptumRx has readily accessible records, in an industry standard format created by the National Council for Prescription Drug Program, by which third party payors and consumers can be identified on every purchase of Niaspan and Generic Niaspan that OptumRx adjudicates on behalf of its third-party payor clients." Decl. Non-Party OptumRx ("Lahman Decl.") ¶ 5. Both PBM declarants stated that they maintain the records of transaction details in its regular course of business. Stocker Decl. 9; Lahman Decl. ¶ 7.

Second, EPPs proffer evidence that the **[**40]** data is obtainable. They rely on Miller's expert opinions, discussed above, in which Miller states that through subpoenas issued to PBMs and pharmacies, EPPs will be able to obtain transactional level purchase data regarding purchases of Niaspan and its generic equivalents during the class period, which will enable EPPs to identify purchasers of Niaspan and its generic equivalents during the class period. Miller Decl. ¶¶ 3, 8, 10, 20. As set forth in greater detail above, Miller bases his opinions on his experience in claims administration for settlement classes.

Third, EPPs assert that identifying class members from the obtained pharmaceutical data is administratively feasible. In support, they rely on Craft's declaration, discussed above, in which she states that she can compile a list reflecting the identities of the members of the proposed class in a manageable process that "can be carried out programmatically" and that she has "extensive experience applying these types of exclusions to pharmaceutical data." Craft Decl. ¶¶ 9-10.

EPPs also present a declaration by EPP Interim Co-Lead Counsel, Kenneth Wexler, which synthesizes EPPs' "evidence that an administratively feasible methodology **[**41]** **[*703]** exists to allow for the determination of whether a TPP or consumer falls within the definitions of the Proposed EPP Classes." EPPs' Class Cert. Mem. 14. First, Wexler states that Winkelman has provided evidence that "PBMs, TPPs, pharmacies, and individual consumers have records reflecting what TPPs and consumers purchased Niaspan or its generic versions during the class periods." Decl. Kenneth A. Wexler Supp. EPPs' Mot. for Class Certification ("Wexler Decl.") ¶ 26. Second, Wexler says that EPPs would serve HIPAA-compliant court-issued subpoenas to "the top six Pharmacy Benefit Managers (in terms of market share), the ten largest Third-Party Payors, the top ten chain store pharmacies, and the top five mail order pharmacies" for the production of purchase records for brand and generic Niaspan during the class period. *Id.* ¶¶ 27-28. Third, he says EPPs would retain OnPoint Analytics, transfer the obtained records to OnPoint, which "could then process the data and identify those persons and entities in the data who fit the class definitions." *Id.* ¶¶ 29-30. Finally, Wexler states that the remainder of unidentified class members can obtain records of their relevant purchases and prove their **[**42]** class membership. *Id.* ¶ 31.

Defendants argue that EPPs' evidence does not show that the class is ascertainable, and EPPs' "offer only vague assurances that they will somehow be able to ascertain class members in the future." Defs.' Opp'n Class Cert. 32. They claim that EPPs failed to present a methodology "specific to this case" or provide "evidentiary support that the method will be successful." *Id.* at 33 (citing *Carrera v. Bayer Corp., 727 F.3d 300, 306, 310 (3d Cir. 2013)*). Defendants also raise specific challenges to EPPs' evidence that they can obtain the necessary data and identify class members using pharmaceutical data.

For the reasons below, the Court agrees with defendants that EPPs have not satisfied their burden of proving a reliable and administratively feasible mechanism for identifying class members.

b. Data Obtainability

Defendants contend that EPPs have not shown that the records necessary to identify class members are obtainable and raise several challenges to EPPs' evidence. Defs.' Opp'n Class Cert. 39. Defendants note that EPPs have faced difficulties obtaining data in this case, as evidenced by the fact that when EPPs served deposition and document subpoenas on four PBMs, three PBMs served formal objections, and only two PBMs produced **[**43]** requested data—one of which produced an extremely limited report relating only to the transactions involving named plaintiff AF of L. *Id.* at 22. According to defendants, EPPs' declarations from the PBM representatives are inadequate because they "merely describe in non-specific terms the type of information generated in the claim adjudication process." *Id.* at 20.

Defendants' also challenge Miller's opinion that data of brand and generic Niaspan purchases can be feasibly obtained. They highlight that Miller did not account for data limitations that arose in past cases in which he was involved. Specifically, defendants present affidavits originally filed in *Relafen*, one of the four cases upon which Miller primarily relies in his report, in which two PBMs, Express Scripts and Medco, attested to the difficulties of data retrieval. *Id.* at 20-21.

EPPs' reply that defendants' objections to data obtainability rely on "outdated" declarations from PBMs and that PBMs' reluctance to produce data "merely underscores the importance of implementing a HIPAA-compliant protective order (which has been done in this case) and, if necessary, the routine matter of enforcing subpoenas." **[*704]** EPPs' Reply Class Cert. 14-15. EPPs also note that **[**44]** "[m]ost of the named Plaintiffs in this litigation were able to provide data for the complete set of relevant transactions going back to around the beginning of the class period." *Id.* at 14.

The Court concludes that, notwithstanding defendants' objections, EPPs have demonstrated by a preponderance of the evidence that the necessary records of brand and generic Niaspan purchases can be obtained. In addition to EPPs' evidence above, the Court notes that the Vice President of Knowledge Solutions and Chief Data Officer for PBM Express Scripts submitted a declaration in this case that "Express Scripts maintains records of claims that can be provided to its Clients, although certain additional fees, costs, or expenses may be associated with this service." Decl. Non-Party Express Scripts, Inc. ("Henry Decl."). Although the failure of several PBMs to provide any record evidence "heightens the Court's concern that such pharmaceutical records may not be obtainable for use in the ascertainability inquiry," *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 150 (E.D. Pa. 2015)*, the Court is satisfied that through Court-issued subpoenas, records of brand and generic Niaspan transactions can be obtained. However, the Court is concerned about the economic feasibility of obtaining **[**45]** such information and the ability of EPPs to identify class members in a reliable and administratively feasible manner, issues that the Court addresses below.

c. Methodology for Determining Class Membership

In this case, EPPs have proffered a complex class definition with multiple exclusions. As such, the inquiry as to the ascertainability of class members does not end merely by noting the existence of obtainable records of brand and generic Niaspan purchasers. EPPs "must also demonstrate an administratively feasible method for [applying the exclusions], as required by the class definition." *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *21 (D.N.J. Oct. 30, 2018)*; *see also* City Select, 867 F.3d at 441-442 (remanding for an inquiry as to whether plaintiffs could use existing database as part of a reliable and administratively feasible means to determine class membership); *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 107013, 2015 WL 4737288, at *2 (E.D. Pa. Aug. 4, 2015)* ("However, by choosing to define its class with eight specific exclusions, Plaintiffs have created the need for a structured, multi-stepped, individualized fact-finding process in order to determine which individuals would fall within the class definition and which would fall within one of the eight exclusions.").

Defendants contend that EPPs' "experts have affirmatively conceded that they have no methodology for determining **[**46]** class membership in this case." Defs.' Opp'n Class Cert. 1. They assert EPPs failed to provide a feasible methodology for identifying and removing brand and generic Niaspan purchases that fall within class exclusions. *Id.* at 41. Defendants specifically argue that EPPs failed to provide any method for identifying the exclusions of brand-only payors after actual generic entry, generic-only payors on tiered plans, consumers with the same co-payment for brand and generic drugs, fully insured plans, and state and federal agencies with self-funded prescription drug plans. *Id.* at 41-46.

EPPs respond that Craft proffers a six-step methodology for identifying class members based on her experience manipulating pharmaceutical data, and that her methodology is particularly well-suited for the pharmaceutical industry, "which are tracked, monitored, and recorded across a **[*705]** set of substantially uniform variables." EPPs' Reply Class Cert. 6. EPPs also argue defendants' challenges to feasibility address "tiny subgroups of consumers" and "each argument can be addressed reliably and programmatically through Plaintiffs' proposed methodology." *Id.* at 20.

The Court agrees with defendants on this issue. It is not persuaded that EPPs have **[**47]** an administratively feasible mechanism for identifying class members which involves applying all class exclusions. Craft's six-step methodology that "OnPoint would be able to merge the data from the various sources, identify and eliminate data errors, transform the data to standardize the fields, eliminate duplicates, and compile a list reflecting the identities of the class members contained in the data," Craft Decl. ¶ 10, does not offer a methodology "specific to this case." *See* *Carrera, 727 F.3d at 306, 311*. Without more information about the process through which Craft claims she will "compile a list reflecting the identities of the class members," defendants lack the ability to meaningfully test the reliability of EPPs' proposed method of identifying class members. *See* *Carrera, 727 F.3d at 307*. As defendants persuasively stated at oral argument, EPPs have the burden "to develop the methodology and bring it to the Court . . . for [defendants] to be able to evaluate and . . . to present [to the Court any] opposing positions." July 23, 2019 Hr'g Tr. ("July 23 Tr.") 137:5-10.

Craft's expert report assures the Court that she can "programmatically" through a "manageable process" identify a list of class members based on the fact that she **[**48]** has "extensive experience applying these types of exclusions." While Craft's report constitutes admissible evidence, the Court does not find that her report establishes by a preponderance of the evidence that EPPs have an administratively feasible methodology for identifying class members. The Court is particularly concerned by Craft's failure to provide any explanation as to how she can apply all of the exclusions required by plaintiffs' complex class definition in an administratively feasible manner. Mere assurances that a model will be effective to ascertain class members is insufficient. *Carrera, 727 F.3d at 311-312*. Accordingly, plaintiffs must provide more than Craft's *ipse dixit* to prevail under a rigorous ascertainability analysis.[4]

A review of EPPs' evidence belies their claim that all exclusions can be "addressed reliably and programmatically through Plaintiffs' proposed methodology." EPPs' Reply Class Cert. 20. EPPs submitted numerous short declarations that omitted critical supporting details necessary to satisfy the Court. EPPs present an individualized, *ad hoc* approach that does not adequately establish a feasible methodology to address **[**49]** the many class exclusions.

For example, defendants argue that EPPs have proposed no methodology for identifying federal and state entities with self-funded plans—one of the many class exclusions. Defs.' Opp'n Class Cert. 45; May 14 Tr. 175:23-177:15. EPPs respond that federal and government agencies are facially obvious. EPPs' Reply Class Cert. 17. However, defendants provided evidence that such plans are not necessarily facially obvious. May 14 Tr. 176:7-177:6. Moreover, even if such plans were facially **[*706]** obvious, EPPs have not explained how they intend to programmatically apply that exclusion to a putative class estimated at over 600,000 members.

The District of Rhode Island's recent decision on the ascertainability of TPPs is not persuasive on this issue. *See In re Loestrin 24 FE Antitrust Litig., 410 F. Supp. 3d 352, 2019 WL 5406077 (D.R.I. Sept. 17, 2019)* (Smith, J.). The *Loestrin* court approved of end payor plaintiffs' proposed methodology for identifying class members in part by dismissing concerns regarding the exclusion of federal and state entities with self-funded plans. *145 F.3d 593, [WL] at *30*. However, EPPs in that case made specific assurances that self-funded government plans would be removed from the data by PBMs rather than merely identified **[**50]** by name. *Id.* As discussed above, EPPs in this case have only said that such plans would be facially obvious—a contention that defendants have rebutted.

Additionally, defendants contend that plaintiffs have no methodology to identify and exclude "[f]ully insured plans (i.e. plans that purchased insurance from another third party covering 100% of the Plan's reimbursement obligations to its members)." Defs.' Opp'n Class Cert. 44. In her deposition, Craft asserted for the first time that Form 5500s, an IRS form filed by health benefit plans, could be used to identify fully insured plans. *Id.* at 44-45. However, defendants identify inconsistencies on the Form 5500 of named plaintiff AF of L as exemplary of the difficulties in ascertaining fully insured health plans in that manner. *Id.* at 45.

EPPs respond that defendants can only point to "a single Form 5500," which they contend does not rebut Craft's deposition testimony. EPPs' Reply Class Cert. 18. They also note that Winkelman testified that PBMs typically maintain data that can be used to identify and exclude fully-insured plans. *Id.* However, Winkelman acknowledged that no such data has been produced in this case. Defs.' Opp'n Class Cert. 45. In their Reply, **[**51]** EPPs proffer that "even to the extent that Form 5500 and PBM records do not capture the funding status of a small number of plans, those plans can be presumed to be fully-insured (and thus excluded from the subclasses) unless they are able to supply proof of their self-insured status." EPPs' Reply Class Cert. 19. It is possible that such a methodology, if adopted, could address this challenge. However, the above exchange further illustrates the extent of EPPs' *ad hoc* approach to applying class exclusions and the lack of a comprehensive methodology for systematically applying exclusions in this case.

For some exclusions, EPPs have simply not provided the Court with satisfactory evidence that the exclusions can be systematically applied. For example, the class definition excludes consumers with the same co-payment for brand and generic drugs ("flat co-payors"). Exclusion of these flat co-payers requires a determination of what purchasers would have paid for their brand Niaspan prescription as well as what they would have paid for generic

---

[4] EPPs provided the Court with notice of the decision in *In re Restasis (Cyclosporine Ophthalmic Emulsion) Antitrust Litig.*, No. 18-md-2819, (E.D.N.Y. May 5, 2020), in which Judge Gershon of the Eastern District of New York certified an end payor class, relying in part on evidence provided by Craft (Document No. 706, filed May 15, 2020). The Court concludes that this precedent is unpersuasive because the Second Circuit applies a less rigorous standard for analyzing ascertainability.

Niaspan they never purchased, a task further complicated by the fact that a health plan co-payment structure can change over time. Defs.' Opp'n Class **[**52]** Cert. 42. EPPs provide evidence that at least some PBMs maintain this information. Jonathan Stocker of Prime Therapeutics stated that "Prime's database houses member plan design details, including, but not limited to, information regarding copayment structure (*i.e.* flat co-payment or percentage co-payment), to the extent applicable." Stocker Decl. ¶ 10. Kyle Brua, also of Prime Therapeutics, declared that "Prime can . . . provide purchase records that exclude purchases made by members with a flat co-payment benefit plan." Decl. Non-Party **[*707]** Prime Therapeutics LLC ("Brua Decl.") ¶ 6. However, as defendants' ascertainability expert, Donald Dietz, explains, in the pharmaceutical industry, the term "flat co-pay" refers to "a co-pay that is set in dollar amounts, as opposed to a percentage of the drug cost . . . and not a single-tier plan design that has the same co-pay for brand and generic drugs." Expert Rep. Donald J. Dietz ("Dietz Rep.") ¶ 68. Based on the evidence before the Court, EPPs' have not established that PBMs can provide purchase records that exclude consumers with the same co-payment for brand and generic drugs, or that transactional records stored by PBMs and other record holders **[**53]** contain information related to plan details in a way that could be programmatically and feasibly applied in order to exclude "flat co-payors" from the class.

The Court is further concerned about the possibility that even if identification of class members is technically possible, EPPs' proposed methodology would be prohibitively expensive and thus infeasible. At oral argument, EPPs claimed that an administratively feasible mechanism for identifying class members is not required for facilitating the best class notice practicable pursuant to *Rule 23(c)(2)*.[5]*See* May 15, 2019 Hr'g Tr. ("May 15 Tr.") 44:15-46:3. Moreover, EPPs predicted that they may never have to utilize their methodology for identifying class members. *Id.* at 45:8-21. In fact, counsel for EPPs reported that in a similar pay-for-delay case before Judge Saris,[6] when plaintiffs sought to subpoena the relevant pharmaceutical records, they learned it would cost $18 million to obtain the requested information. July 23 Tr. 181:20-182:1. In that case, Judge Saris rejected that approach as "too expensive because it [would] come[] out of the class's recovery," and pursued publication notice instead. *Id.* at 181:20-182-14. In view of these statements, **[**54]** the Court is concerned that EPPs' claimed ascertainability methodology is not reasonably practicable.

The Court harbors significant doubt as to whether EPPs have met their burden of showing they can identify class members through a reliable and administratively feasible mechanism. ***HN19***[] "When courts harbor doubt as to whether a plaintiff has carried her burden under *Rule 23*, the class should not be certified." *Mielo v. Steak 'n Shake Operations, Inc., 897 F.3d 467, 483 (3d Cir. 2018)*. Accordingly, the Court declines to certify the EPP class as ascertainable on the state of the present record. As detailed below, the EPP proposed class also fails the predominance and superiority requirements of *Rule 23(b)(3)*.

ii. Predominance

HN20[] *Rule 23(b)(3)* requires that "the questions of law or fact common to class members predominate over any questions affecting only individual members." "*Rule 23(b)(3)*, however, does *not* require a plaintiff seeking class certification to prove that each 'elemen[t] of [her] claim [is] susceptible to classwide proof.' What the rule does **[*708]** require is that common questions '*predominate* over any questions affecting only individual [class] members.'" *Amgen Inc. v. Conn. Ret. Plans & Trust Funds, 568 U.S. 455, 469, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)* (emphasis in original).

---

[5] The Court notes that EPPs' interpretation of the ascertainability requirement is not supported by Third Circuit precedent. *See, e.g., Marcus v. BMW of N. Am., LLC, 687 F.3d 583, 593 (3d Cir. 2012)* ("[The ascertainability requirement] protects absent class members by facilitating the 'best notice practicable' under *Rule 23(c)(2)* in a *Rule 23(b)(3)* action."); *Carrera v. Bayer Corp., 727 F.3d 300, 307 (3d Cir. 2013)* ("First, at the commencement of a class action, ascertainability and a clear class definition allow potential class members to identify themselves for purposes of opting out of a class.").

[6] Judge, former Chief Judge, U.S. District Court for the District of Massachusetts. *In re Pharmaceutical Industry Average Wholesale Price Litigation*, No. 01-12257, (D. Mass. filed Dec. 19, 2001).

"An individual question is one where members of a proposed **[**55]** class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide proof." *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016)* (internal quotations and citations omitted).

HN21[] "The aim of the predominance inquiry is to test whether any dissimilarity among the claims of class members can be dealt with in a manner that is not 'inefficient or unfair.'" *In re Asacol Antitrust Litig., 907 F.3d 42, 51 (1st Cir. 2018)*. "Inefficiency can be pictured as a line of thousands of class members waiting their turn to offer testimony and evidence on individual issues." *Id.* "Unfairness is equally well pictured as an attempt to eliminate inefficiency by presuming to do away with the rights a party would customarily have to raise plausible individual challenges on those issues." *Id. at 51-52*.

EPPs' argue that common issues predominate across their antitrust claims and unjust enrichment claims, and that aggregate damages can be calculated on a classwide basis. EPPs' Class Cert. Mem. 20-28. Specifically, EPPs claim they will be able to prove their antitrust claims with common evidence that there was an unlawful restraint of trade through an unjustified reverse **[**56]** payment from Kos to Barr, that the reverse payment had anticompetitive effects in the relevant market, that the anticompetitive effects outweighed any pro-competitive justifications, and that EPPs sustained class-wide impact, or injury, caused by defendants' actions. *Id.* at 20-25. They also assert that their unjust enrichment claims can be proven by the same common evidence used to prove that unlawful delay in generic entry produced monopoly profits at the expense of EPPs. *Id.* at 26; EPPs' Reply Class Cert. 65.

Defendants respond that individual questions predominate because EPPs lack common evidence of antitrust injury and cannot establish that class members were injured without resorting to individualized evidence that would overwhelm common questions. They argue that EPPs improperly apply the federal overcharge standard for antitrust injury, but even under that injury standard, EPPs have no common proof of antitrust injury.[7] They further contend that EPPs' evidence of classwide injury relies on averages that impermissibly conceal uninjured class members and identify specific subsets of the class that are potentially uninjured. Defendants also raise challenges to EPPs' aggregate damages model, and contend **[**57]** that many state antitrust laws, unjust enrichment laws, and unfair trade practices and consumer protection laws require proof of actual damages and that variations between the state laws raise individualized questions that overwhelm the common issues.

The Court considers each of defendants' challenges in turn.

[*709] 1. *The Impact of Individual Questions for Antitrust Injury and Impact*

EPPs argue that defendants' predominance challenges focus on proof of injury, and that common questions predominate based on EPPs' "common proof to establish the [other] essential substantive elements of their antitrust claims, including the presence of a 'large, unjustified reverse-payment,' market power, anti competitive effects, and causation." EPPs' Reply Class Cert. 30.

The Court rejects EPPs' argument on this issue. ***HN23***[] It is well established that the lack of common evidence of antitrust injury or impact alone can cause individual questions to predominate. *See, e.g., In re Modafinil Antitrust Litig., 837 F.3d 238, 262 (3d Cir. 2016)* ("In an antitrust class action, 'impact often is critically important for the purpose of evaluating *Rule 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof.'").

2. *Antitrust **[**58]** Injury and Impact Standard for State Law Claims*

---

[7] ***HN22***[] Under federal ***antitrust law***, antitrust injury occurs the moment that a purchaser incurs an overcharge. *See Adams v. Mills, 286 U.S. 397, 407, 52 S. Ct. 589, 76 L. Ed. 1184 (1932)*. Antitrust injury is also referred to as "antitrust impact." *See In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*.

HN24[] It is undisputed that under longstanding federal ***antitrust law***, antitrust injury occurs the moment that a purchaser incurs an overcharge. *See e.g., Adams v. Mills, 286 U.S. 397, 407, 52 S. Ct. 589, 76 L. Ed. 1184 (1932)* ("In contemplation of law the claim for damages arose at the time the extra charge was paid."). However, the parties disagree as to whether that same injury standard should apply to EPPs' state law antitrust claims. EPPs contend that the federal antitrust standard, under which injury occurs the moment of overcharge, applies to the state law claims. EPPs' Class Cert. Mem. 24. Defendants disagree, asserting that the Court has an obligation to determine whether each state would apply an actual economic harm standard, and that under the correct state law standards for injury, EPPs are required to prove that they suffered actual economic harm from the overcharge, and did not pass on that overcharge to others. Defs.' Opp'n Class Cert. 66-68.

In order to assess the antitrust injury standard for state law claims, it is important to first review the jurisprudential backdrop against which EPPs bring their antitrust claims.

In *Hanover Shoe*, the Supreme Court held that antitrust plaintiffs could recover **[**59]** the full amount of their overcharge damages, and antitrust defendants could not raise the defense that plaintiffs were unharmed because plaintiffs passed to others any overcharges that they had paid. *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 491-93, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. The Supreme Court chose to abolish this pass-on defense because "establishing the applicability of the passing-on defense would require a convincing showing of each of these virtually unascertainable figures [and] the task would normally prove insurmountable . . . Treble-damage actions would often require additional long and complicated proceedings involving massive evidence and complicated theories." *Id. at 493*.

In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the Supreme Court "made the symmetrical decision, consistent with *Hanover [Shoe]*, to disallow an offensive use of the [pass-on] theory." *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1164 n.10 (3d Cir. 1993)*. "[J]ust as *Hanover Shoe* wanted to avoid burdening antitrust plaintiffs from nearly-impossible evidentiary challenges, *Illinois Brick* reflected the Supreme Court's 'perception of the uncertainties and difficulties in analyzing price and out-put decisions in the real economic **[*710]** world . . . and of the costs to the judicial system and the efficient enforcement of the antitrust laws of attempting to reconstruct those decisions in the courtroom.'" *In re Processed Egg Prod. Antitrust Litig., 881 F.3d 262, 270 (3d Cir. 2018)*. Under **[**60]** *Illinois Brick*, federal antitrust claims by indirect purchasers were barred. However, *Illinois Brick* did not preempt indirect purchasers from bringing antitrust actions under state antitrust laws. *California v. ARC Am. Corp., 490 U.S. 93, 105-06, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. In the present action, EPPs bring their antitrust claims under laws by "*Illinois Brick* repealer states" that have passed statutes enabling indirect purchasers to bring antitrust claims under state law. EPPs' Reply Class Cert. 35; *see generally In re Flonase Antitrust Litig., 284 F.R.D. 207, 214 n.9 (E.D. Pa. 2012)* (describing "*Illinois Brick* repealers").

Defendants argue that "[t]he federal overcharge measure of injury that EPPs rely upon is a legal construct that, for reasons grounded in federal antitrust policy, permit direct purchasers to recover the entire overcharge even if they 'passed on' the overcharge to others and suffered no actual economic harm." Defs.' Opp'n Class Cert. 67 (citing *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 494, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*). They state that "EPPs just assume, without any analysis of specific state laws, that the federal measure of injury for direct purchaser claims applies to their indirect purchaser claims [and that EPPs'] assumption makes no sense, as a matter of law or policy." Defs.' Opp'n Class Cert. 67. Defendants argue to the contrary that the Court must assess each state statute, **[**61]** and absent "a definitive ruling by a state's highest court, [this Court] must predict how that court would rule if faced with the issue." *Id.* at 68 (citing *Covington v. Cont'l Gen. Tire, Inc., 381 F.3d 216, 218 (3d Cir. 2004)*).

EPPs respond that "[t]he class states repealed *Illinois Brick Co. v. Illinois*'s prohibition against indirect purchaser antitrust actions, but they did not repeal the century of federal ***antitrust law*** preceding *Illinois Brick*[,] . . . includ[ing] the well established principle that 'antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset.'" EPPs' Reply Class Cert. 35 n. 55.

The Court agrees with EPPs that Illinois Brick repealer states have applied the federal overcharge injury standard. Defendants' argument conflates the policy that the Supreme Court articulated with respect to treatment of the pass-on defense in Hanover Shoe and the offensive use of the pass-on theory in Illinois Brick with the longstanding antitrust principle that injury occurs at the moment of overcharge. *See, e.g.,* Adams v. Mills, 286 U.S. 397, 407, 52 S. Ct. 589, 76 L. Ed. 1184 (1932); S. Pac. Co. v. Darnell-Taenzer Lumber Co., 245 U.S. 531, 534, 38 S. Ct. 186, 62 L. Ed. 451 (1918). The "federal" overcharge standard of antitrust injury is distinct from the policy judgments implicated by *Hanover Shoe* and *Illinois Brick* and the subsequent passage of the state statutes repealing **[**62]** Illinois Brick.

EPPs contend that defendants' argument "is based on the faulty legal premise that injury and damages are synonymous." EPPs' Class Cert. Mot. 34. The Court agrees with EPPs on that issue.

HN25[] Proof of antitrust injury or impact is analytically distinct from proof of antitrust damages. In re Lamictal Direct Purchaser Antitrust Litig., 957 F.3d 184, 194 (3d Cir. 2020) ("We have consistently distinguished injury from damages."); Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 188 (3d Cir. **[*711]** 2001) ("Proof of injury (whether or not an injury occurred at all) must be distinguished from calculation of damages (which determines the actual value of the injury)."). "[T]he purpose of the antitrust injury requirement is to prove that the theory of unlawful conduct, i.e. the theory of liability, was in fact responsible for causing harm to plaintiffs." In re Niaspan Antitrust Litig., No. 13-2460, 397 F. Supp. 3d 668, 2019 WL 3816829, at *14 (E.D. Pa. Aug. 14, 2019). The availability of a pass-on defense has no bearing on proof that a plaintiff sustained "some harm traceable to the defendant's conduct." Harnish v. Widener Univ. Sch. of Law, 833 F.3d 298, 305 (3d Cir. 2016). To the extent that pass-on defense is available, it relates to the calculation of damages, not the standard of antitrust injury. *See* In re Cardizem CD Antitrust Litig., 200 F.R.D. 297, 317 (E.D. Mich. 2001) ("Defendants' by-pass and offsetting benefits arguments relate to the quantum of damages; not the fact of injury."); *see also* In re Vitamins Antitrust Litig., 259 F. Supp. 2d 1, 8-9 (D.D.C. 2003) (permitting a pass-on defense as a challenge to "plaintiff's damage estimates").

The Court **[**63]** concludes that EPP class members sustained antitrust injury at the moment they were overcharged. This decision is consistent with the approach adopted by other courts considering state law claims in similar antitrust actions by indirect purchasers. *See* In re Nexium Antitrust Litig., 777 F.3d 9, 27 (1st Cir. 2015) ("[A]ntitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset."); In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *14 (D.N.J. Oct. 30, 2018) (holding that subsequently recovered damages are "irrelevant to the question of impact"); In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-02503, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *15 (D. Mass. Oct. 16, 2017) ("[E]ven if putative class members were reimbursed for overcharges through insurance plans or coupons, they still experienced antitrust injury in the form of an overcharge, although the amount of damages may require adjustment."); In re Lidoderm Antitrust Litig., No. 14-02521, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *21 (N.D. Cal. Feb. 21, 2017) ("[T]he Court concludes that a person suffers a cognizable injury and is impacted by a price-fixing conspiracy at the moment he pays an antitrust overcharge, even if the anticompetitive conduct at issue also results in offsetting benefits.").

Thus, for purposes of the predominance inquiry, EPPs may satisfy their burden of showing common evidence of antitrust injury by establishing that each class member paid an overcharge, regardless of whether that overcharge was subsequently passed on to others. **[**64]**

3. *EPPs' Common Proof of Injury*

EPPs present an expert report from Dr. Meredith Rosenthal to support their claim that they have common proof of antitrust injury arising from the delay in generic entry. Dr. Rosenthal relies on extensive evidence, including a Federal Trade Commission ("FTC") study finding that "generic price discounts with respect to the pre-launch branded price reach 17% after 6 months," at which point generics hold 83.7% of the market share. Expert Rep. Meredith Rosenthal, Ph.D. ("Rosenthal Rep.") ¶ 37. According to Dr. Rosenthal, the actual launch of generic Niaspan resulted in a 33% price discount after 6 months, at which point generic Niaspan garnered 79% of the market share. *Id.* Dr. Rosenthal also notes that defendant AbbVie's internal analyses anticipated results similar to the FTC study, namely, "a generic penetration rate starting at 30% in the first month and reaching nearly 90% assuming two generic products." *Id.*

[*712] Based on this research, Dr. Rosenthal employs a "yardstick model," which compares the actual prices and quantities in the market of interest to the prices and quantities that occur in a similar market untainted by the delay of generic entry and foreclosure **[**65]** of lower prices. *Id.* ¶ 27. She bases her yardstick calculations on AbbVie's internal analysis and the FTC study results, and assumes an average rate of generic substitution of 87.8% from Kos' own internal forecasting. *Id.* ¶ 38.

Dr. Rosenthal concludes that "the likelihood that a consumer who paid for Niaspan during the Class Period would not have paid for at least one prescription of the generic in the but-for world is small -100 minus 87.8 or 12.2%. Moreover, because Niaspan is a maintenance drug most potential Class members will have many prescriptions and thus repeated opportunities to be offered and try the generic." *Id.* ¶ 39. With respect to TTPs, Dr. Rosenthal opines that, assuming a TPP pays for at least ten independent Niaspan claims, "the likelihood that a payer with only 10 claims for Niaspan in the actual world had no generic claims in the but-for world is approximately 0.000000001 or 1 in 1 billion." *Id.* ¶ 38.

According to EPPs, "the analysis conducted by Dr. Rosenthal demonstrates that virtually all class members were injured on at least one transaction by the unlawful delay in generic Niaspan competition."[8] EPPs' Class Cert. Mem. 33.

4. *Defendants' Challenges to EPPs'* ***[**66]*** *Common Proof of Injury*

Defendants argue that contrary to EPPs' assertions, Dr. Rosenthal's report does not provide common evidence of antitrust injury. Defs.' Opp'n Class Cert. 51-55. Defendants highlight Dr. Rosenthal's deposition testimony in which she conceded she does not opine that all class members were injured, and that her aggregate damages analysis does not show which individual class members were uninjured. *Id.* at 52. As defendants' expert, Professor James Hughes, opines, "if [Dr. Rosenthal's] damages model were reliable, which it is not, at best she could establish the average 'overcharge' per prescription paid by the class. But this average overcharge simply does not speak to whether any or all individual class members were injured." Expert Rep. Prof. James W. Hughes, Ph.D. ("Hughes Rep.") ¶ 119. Defendants contend that Dr. Rosenthal's reliance on averages impermissibly hides uninjured class members. In support, they rely on Professor Hughes' analysis of transactional data produced by ten EPP named plaintiffs. Defs.' Opp'n Class Cert. 54. After reviewing the data, Professor Hughes concluded that "there is wide heterogeneity across Named Plaintiffs in total prescription costs for **[**67]** Niaspan, ranging from $0 to over $1,000 per prescription," and that "[p]ayments made by consumers of Niaspan and generic niacin also vary considerably across consumers and also deviate substantially from Professor Rosenthal's calculated average, ranging from $0 to over $250." Hughes Rep. ¶ 122. Defendants argue that Dr. Rosenthal's assertion that Niaspan users will likely make at least one generic purchase "ignores studies that showed more than 40 percent of patients **[*713]** stopped taking Niaspan after the first three months, and only 16 percent continued to take Niaspan after one year." Defs.' Opp'n Class Cert. 26.

Defendants further argue that "there are numerous examples of circumstances in which potential class members would not have suffered any injury from the alleged delay in generic entry, and for which there is no way to identify those class members without individualized inquiries." Defs.' Opp'n Class Cert. 57. These groups include (1) consumers and TPPs who still would have paid for brand Niaspan after generic Niaspan was introduced (brand loyalists), (2) uninjured consumers due to copay assistance, (3) consumers fully reimbursed by health reimbursement accounts ("HRAs"), (4) flat **[**68]** co-payors, (5) consumers who filled all Niaspan prescriptions in

---

[8] EPPs argue that they are entitled to a presumption of causation that the class sustained classwide injury. EPPs' Class Cert. Mem. 24-25. They claim that "an antitrust plaintiff may be entitled to a presumption of causation where the anticompetitive conduct 'is deemed wrongful because it is believed significantly to increase the risk of a particular injury' and that injury occurred." *Id.* at 24 (citing *In re Actos End-Payor Antitrust Litig., 848 F.3d 89, 101 (2d Cir. 2017)*). The Court agrees with defendants that *Actos* does not diminish EPPs' burden of proving classwide antitrust injury. *See* Defs.' Opp'n Class Cert. 56.

the Medicare Part D coverage gap, (6) TPPs that would have paid the same or more for generic Niaspan than brand Niaspan, and (7) rebates.

The Court first considers defendants' challenges to EPPs' use of averages to prove classwide injury, and then addresses the defendants' claims regarding specific subgroups of uninjured class members.

a. EPPs' Use of Averages To Prove Classwide Injury

The Court must determine whether Dr. Rosenthal's use of averages in her yardstick model masks uninjured class members or can be used to prove common classwide injury. The answer: Dr. Rosenthal does not provide common evidence of classwide injury; proof of injury would involve individualized inquiries that defeats predominance. Dr. Rosenthal's use of averages to determine classwide injury thus masks uninjured class members.

"The use of averages in a common impact analysis is controversial, and courts have come down on both sides of the issue at the class certification stage . . . Essentially, the case law seems to compel the court to view averages as at least somewhat suspect, but not as fatally flawed so long as (1) the differentiation among **[**69]** the data being averaged is not so great as to make the use of averages misleading; and (2) there are other indicia that the averages are not concealing the true story of the data." *In re Blood Reagents Antitrust Litig., No. 09-2081, 2015 U.S. Dist. LEXIS 141909, 2015 WL 6123211, at *18 (E.D. Pa. Oct. 19, 2015)* (DuBois, J.) (citing *In re Processed Egg Prod. Antitrust Litig., 81 F. Supp. 3d 412, 428 (E.D. Pa. 2015)*). "Averages are also more of a problem when plaintiffs seek to certify a class of indirect purchasers." *In re Lamictal Indirect Purchaser & Antitrust Consumer Litig., No. 12-00995, 2018 U.S. Dist. LEXIS 209993, 2018 WL 6567709, at *7 (D.N.J. Dec. 12, 2018)*, *rev'd on other grounds* *957 F.3d 184 (3d Cir. 2020)*. On this issue, the Third Circuit recently cautioned that courts should not assume, "absent a rigorous analysis, that averages are acceptable." *In re Lamictal Direct Purchaser Antitrust Litig., 957 F.3d at 194*.

EPPs contend that Dr. Rosenthal's proposed damages model uses common evidence to show class-wide injury, and "is constructed by reference to the well-researched and accepted understanding in the scholarly literature of the impact of generic competition on drug prices, real world data reflecting the prices and volume of brand and generic Niaspan, in addition to the prices and quantities sold for 'yardstick' products." EPPs' Reply Class Cert. 44. They argue that the variation is not so wide as to mask uninjured members. *Id.* According to EPPs, this case is similar to *Flonase*, another pay-for-delay case, in which plaintiffs submitted expert evidence of common injury based on a yardstick analysis. *Id.* at 44 n.66 (citing *In re Flonase Antitrust Litig., 284 F.R.D. 207, 222 (E.D. Pa. 2012)*. In that case, **[**70]** the **[*714]** court was "satisfied that the data variation in this case [was] not so extreme as to mask the absence of injury for a significant number of class members." *Id. at 229*.

Defendants argue that *Flonase* is inapposite. May 14 Tr. 191:7-15. In *Flonase*, plaintiffs' expert conducted a sensitivity analysis, which assured the court that the averages did not mask significant variation. *Id.*; *In re Flonase Antitrust Litig., 284 F.R.D. at 228-229*. In addition, defendants correctly note that the *Flonase* court was only satisfied that the averages did not mask significant variation after excluding several groups of potentially uninjured plaintiffs, including (1) uninsured consumers who purchased brand Flonase after generic entry; (2) all consumers who purchased brand Flonase prior to generic entry and did not purchase brand or generic Flonase after generic entry; and (3) TPPs that only purchased and/or reimbursed brand Flonase but never generic Flonase during the Class Period. *In re Flonase Antitrust Litig., 284 F.R.D. at 230-232*. Significantly, *Flonase* was decided prior to the Third Circuit adoption of the ascertainability requirement, so the court was able to exclude potentially uninjured purchasers without considering whether purchasers falling within those exclusions were reasonably ascertainable. *Id.*; May **[**71]** 14 Tr. 192:4-6. Thus, *Flonase* is distinguishable from this case.

EPPs correctly state that evidence of delay in generic entry that results in overcharges can in some cases suffice to show classwide evidence of injury. EPPs' Reply Class Cert. 44, 52-53. However, the substantial variation in prices reported by Dr. Hughes among the sliver of data produced by named plaintiffs—$0 to over $1,000 per prescription for TPPs, and $0 to over $250 for consumers—raises cause for concern in this case. *See* Hughes Rep. ¶ 122. EPPs do not contest Dr. Hughes' analysis, but instead observe that "most transaction prices clustered around [Dr.

Rosenthal's] average prices, and that any variations follow a discernable trend alongside the average prices." EPPs' Reply Class Cert. 52 n.75.

The Court concludes that the averages in Dr. Rosenthal's yardstick model do not suffice to prove classwide injury for EPPs in this case. Critically, Dr. Rosenthal conceded that her yardstick model does not purport to show that all class members were injured. Defs.' Opp'n Class Cert. 52 (citing Rosenthal Dep. 62:21-63:5). The Court finds this case analogous to *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC* **[**72]** , in which plaintiffs also relied on the expert testimony of Dr. Rosenthal. In that case, Judge Stengel conducted "[a] 'rigorous analysis' of Dr. Rosenthal's reports and testimony" and concluded "it does not show that *all* class members paid supra-competitive prices for generic or branded sustained release bupropion, or that this determination can be made with common proof." *No. 04-5898, 2010 U.S. Dist. LEXIS 105646 , 2010 WL 3855552, at *26 (E.D. Pa. Sept. 30, 2010)*. In *GlaxoSmithKline*, Dr. Rosenthal admitted that certain class members may be uninjured, and that her analysis would be unable to identify them, leading the court there to conclude that the proffered yardstick model masked groups of uninjured class members. *2010 U.S. Dist. LEXIS 105646, [WL] at *30*. As Judge Stengel noted in rejecting the proposed yardstick methodology, "the issue is not whether [the] techniques are generally accepted; it is whether they are appropriate when applied to the facts and data *in this case*." *Id.* (internal quotations omitted and emphasis in original). In this case, the Court concludes that the use of averages hides several groups of uninjured class members who cannot be easily identified.

[*715] b. Means of Removing Uninjured Class Members

Defendants argue that EPPs further fail the predominance requirement because there are large **[**73]** categories of uninjured class members that EPPs have not identified and cannot identify without individualized inquiry. Defs.' Opp'n Class Cert. 57. Specifically, defendants point to brand loyalists, consumers who are uninjured due to co-payment assistance, health reimbursement accounts ("HRAs"), flat co-payors, consumers who filled all Niaspan prescriptions during a Medicare Part D coverage gap, TPPs paying the same or more for generic Niaspan than for brand Niaspan, and TPPs that received brand rebates. In response, EPPs assert that "virtually all class members were injured on at least one transaction by the unlawful delay in generic Niaspan competition." EPPs' Reply Class Cert. 33.

HN26[] To the extent that a proposed class contains uninjured class members, plaintiffs must provide a reasonable and workable method for differentiating between uninjured class members and injured class members so that uninjured class members do not recover damages. *In re Asacol Antitrust Litig., 907 F.3d 42, 58 (1st Cir. 2018)*. Such a method must be protective of a defendant's constitutional rights and not cause individual inquiries to overwhelm common issues. *Id.*; *see also* *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *21 (E.D. Pa. June 10, 2015)* ("Without a means of identifying these uninjured persons using common evidence, every class member **[**74]** would need to be reviewed on an individualized basis to see if they were impacted by Defendants' alleged anticompetitive actions."). Moreover, for purposes of the predominance analysis, the number of potentially uninjured class members is a relevant consideration. ***HN27***[] While it is perfectly reasonable for the Court to address challenges to a small number of uninjured class members, "it would be far more difficult for a court to 'weed out' over 2,000 uninjured class members—or some subset of that number—from a class of over 16,000." *In re Rail Freight Fuel Surcharge Antitrust Litig., 292 F. Supp. 3d 14, 137-38 (D.D.C. 2017)*; *see also* *In re Intuniv Antitrust Litig., No. 16-12396, 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262, at *8 (D. Mass. Aug. 21, 2019)*. In this case, there are an estimated 600,000 class members, any of whom may be uninjured, and according to defendants, there are thousands who in fact suffered no injury. *See* *In re Asacol Antitrust Litig., 907 F.3d at 53-54*.

The Court next addresses defendants' arguments on the issue of uninjured class members.

i. Brand Loyalists

The first and most significant group of uninjured, unidentified class members are consumer brand loyalists, who were unharmed by delayed generic entry because they would have continued buying brand Niaspan regardless of any price difference between brand and generic Niaspan. Dr. Rosenthal calculated that 12.2% of purchases after generic entry would remain brand purchases. **[**75]** Rosenthal Rep. ¶ 39.

Defendants contend that "there is simply no mechanism to determine which prescriptions [the 12.2% of continued brand purchases after generic entry] would have been, and who would have paid for them, without class-member-specific and even transaction-specific inquiries." Defs.' Opp'n 57.

EPPs first respond that "[d]ue to state automatic substitution laws, all or virtually all Niaspan consumers would try generic Niaspan at least once, even if they ultimately chose to return to the brand at a higher price." EPPs' Reply Class Cert. 49 **[*716]** (citing *In re Nexium Antitrust Litig., 777 F.3d 9, 27-30 (1st Cir. 2015)*. EPPs have provided no evidence regarding the specific terms of such state laws. This omission is significant because, while all states have such laws, not all states make substitution mandatory.

EPPs also argue that they have accounted for brand loyalists by excluding consumers who purchased only brand Niaspan after generic entry on September 20, 2013, and argue that such purchasers can be identified. EPPs' Reply Class Cert. 23. They assure the Court that they can create a database by which they can systematically apply the brand loyalist exclusion. *Id.* For the reasons discussed when analyzing class ascertainability, the Court **[**76]** doubts whether EPPs can feasibly produce such a database and systematically apply the brand loyalist exclusion.

Even assuming *arguendo* that EPPs could identify the brand loyalists that purchased only brand Niaspan after generic entry, EPPs have no means of identifying brand loyalists who purchased brand Niaspan prior to generic entry but made no purchases of brand or generic Niaspan after generic entry. EPPs respond with three arguments. The Court rejects EPPs' arguments.

First, EPPs argue that "such consumers cannot properly be considered brand loyalists because generic Niaspan was not yet available on the market, they lacked an opportunity to demonstrate any preference for or 'loyalty' to branded or generic Niaspan." EPPs' Reply Class Cert. 25. This response fundamentally misconceives the objective of the inquiry, which is to assess whether a purchaser *would have* purchased cheaper generic Niaspan had that option been available. This Court is aware of no court that has adopted this unfounded argument, and it declines to do so in this case.

Second, EPPs argue that the presence of unidentified, uninjured brand loyalists in the class does not prejudice defendants. EPPs' Reply Class Cert. **[**77]** 25. Specifically, they assert that Dr. Rosenthal factored in the presence of brand loyalists and calculated damages only for those class members who would have switched to generic Niaspan or who purchased the generic at inflated prices so "defendants have no interest tied to the exclusion of purported brand loyalist class members." *Id.* at 26.

EPPs' argument that defendants have no interest in the exclusion of uninjured class members has been rejected by the Third Circuit. *See* *Carrera v. Bayer Corp., 727 F.3d 300, 310 (3d Cir. 2013)* ("[Defendant] has an interest in ensuring it pays only legitimate claims. If fraudulent or inaccurate claims materially reduce true class members' relief, these class members could argue the named plaintiff did not adequately represent them [and they are not bound by the judgment."); *see also* *In re Asacol Antitrust Litig., 907 F.3d 42, 56 (1st Cir. 2018)* ("Once one accepts plaintiffs' 'no harm, no foul' position there would be no logical reason to prevent a named plaintiff from bringing suit on behalf of a large class of people, forty-nine percent or even ninety-nine percent of whom were not injured, so long as aggregate damages on behalf of 'the class' were reduced proportionately. Such a result would fly in the face of the core principle that class actions are the aggregation of **[**78]** individual claims, and do not create a class entity or reapportion substantive claims.").

Finally, EPPs argue "it would be inappropriate to exclude from the classes individuals who purchased Niaspan solely prior to generic entry because it would permit Defendants to benefit from their own illegal conduct." EPPs' Reply Class Cert. 26. However, this argument is unavailing, **[*717]** as under *Rule 23*, it is EPPs who bear the burden of proof. ***HN28***[] "The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only," *In re Modafinil Antitrust Litig., 837 F.3d 238, 248 (3d Cir. 2016)*, and for EPPs to take advantage of the class action device, EPPs must limit their class to an operational definition. *See,* *e.g., In re Flonase Antitrust Litig., 284 F.R.D. 207, 232 (E.D. Pa. 2012)* (excluding class members who did not make any purchases of brand or generic Flonase after generic entry to avoid potential brand loyalists).

The Court concludes that there are a substantial number of brand loyalists in the class, and EPPs have the burden of showing that excluding them can be accomplished without extensive individualized inquiry. EPPs have provided no "reasonable and workable plan for how [the opportunity to press at trial genuine challenges to allegations of injury-in-fact] will be provided **[**79]** in a manner that is protective of the defendant's constitutional rights and does not cause individual inquiries to overwhelm common issues." *Thalomid, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *12*. Accordingly, the Court concludes that identification of consumer brand loyalists would require extensive individualized inquiries and defeat predominance. *See Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 107013, 2015 WL 4737288, at *19 (E.D. Pa. Aug. 4, 2015)*;[9]*Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, No. 04-5898, 2010 U.S. Dist. LEXIS 105646, 2010 WL 3855552, at *25 (E.D. Pa. Sept. 30, 2010)*.

Thus far, the brand loyalist discussion has focused on consumer purchasers. With respect to TPP brand loyalists, Dr. Rosenthal opined that the likelihood that a payor with only 10 independent claims for Niaspan had no generic claims is approximately 1 in 1 billion. Rosenthal Rep. ¶ 38. As a result, EPPs state there is no brand loyalist concern for TPPs with many independent claims. In response, defendants point out that there are over 20,000 self-insured health plans and over 4,000 mixed health plans, many of which are very small and would have made only a few purchases, thereby rendering it more likely that at least some of the TPPs are uninjured. May 14 Tr. 188:7-15. For example, defendants point to the fact that from 2014 to 2016, named TPP plaintiff AF of L paid for only 31 months of Niaspan for only three beneficiaries. **[**80]** *Id.* at 188:16-23.

Even if a TPP reimbursed only three beneficiaries, it would remain unlikely that all the TPP's reimbursements were for brand loyalists. On the current state of the record, the Court concludes that the number of any TPP brand loyalists is *de minimis*.

ii. Uninjured Consumers Due to Co-payment Assistance

Defendants argue that EPPs have made no attempt to determine whether there are uninjured class members due to coupon use—that involvement in a coupon co-payment assistance program resulted in some purchasers paying less for branded Niaspan than they would have paid for generic Niaspan had it been available. Defs.' Opp'n **[*718]** Class Cert. 61-62. Dr. Hughes estimates that 3-4% of brand Niaspan purchases were made with co-payment assistance coupons that included $0 co-payment coupons, $50 off co-payment coupons, and $25 maximum co-payment coupons, *id.* at 61, whereas Dr. Rosenthal estimates that 2.4% of prescription purchases involved coupon use. *Id.* at 62 n.27.

Defendants claim that they "are entitled to defend against individual claims by testing whether class members used copay assistance and did not pay an overcharge, necessitating individualized inquiries." *Id.* at 62. Defendants further contend that given the **[**81]** drug's low persistency rate, there were likely many consumers who used coupons for all of their purchases. *Id.* at 61-62.

EPPs respond that defendants concede that coupons apply to less than 4% of transactions and would affect "only a handful of customers." EPPs' Reply Class Cert. 22. However, even if only a small percentage of consumers were uninjured due to coupon use, the sheer class size creates significant difficulties for manageably addressing defendants' challenges. *In re Rail Freight Fuel Surcharge Antitrust Litig., 292 F. Supp. 3d 14, 137-38 (D.D.C. 2017)*.

---

[9] EPPs provided notice to the Court that Judge Goldberg recently certified a settlement class in *Vista Healthplan, Inc. v. Cephalon, Inc., 2020 U.S. Dist. LEXIS 69614, No. 2:06-cv-01833, slip op. at 1 (E.D. Pa. Apr. 21, 2020)*. However, Judge Goldberg made clear that the prospect of settlement impacted his analysis of both ascertainability and predominance. *Id. at 24-25, 28*. Indeed, many of the concerns at issue in certifying a litigation class are alleviated after settlement. *See In re Wellbutrin XL Antitrust Litig., 308 F.R.D. at 151 n.8* ("In certifying a litigation class, the Court must be mindful of a defendant's due process rights. Such a concern is not present when administering a settlement class.").

EPPs also state that "even if there were a small substantiated subset of uninjured 'all-coupon' consumers—and there is not—these consumers can be identified and programmatically excluded from the subclasses" because "pharmacies track coupon usage on a transactional basis, including the coupon value, prescription fill date, and identity of the consumer." EPPs' Reply Class Cert. 22. Assuming *arguendo* that adequate records tracking coupon use on all Niaspan purchases could be produced prior to trial, defendants have the right to present evidence to the jury that a subset of class members did not suffer antitrust injury because of their coupon use. *See* *In re Asacol Antitrust Litig., 907 F.3d 42, 58 (1st Cir. 2018)* ("[C]ertainly where injury-in-fact is a required element of a claim, as it is **[**82]** in an antitrust action, a class cannot be certified based on an expectation that the defendant will have no opportunity to press at trial genuine challenges to allegations of injury-in-fact." (internal citations omitted)). EPPs have offered no means of manageably addressing such challenges in a manner that would not defeat predominance. EPPs' failure to identify a non-individualized means of addressing uninjured consumers due to coupon use weighs against class certification.

iii. Health Reimbursement Accounts

Defendants argue that consumers who were subsequently fully reimbursed by HRAs for their Niaspan and generic Niaspan payments had no damages and are therefore uninjured. Defs.' Opp'n Class Cert. 62. EPPs respond that "[t]hird-party reimbursements under HRAs—to the unsubstantiated extent they occur at all for Niaspan—are irrelevant to the issue of whether consumers were injured" because the purchasers were injured as soon as they paid the overcharge. EPPs' Reply Class Cert. 23. The Court agrees with EPPs that injury occurs at the time of an unlawful overcharge, and any subsequent reimbursement is irrelevant.

Defendants raise the possibility that some purchasers may be uninjured because **[**83]** they paid for brand Niaspan with debit cards issued and paid for by their employer. Defs.' Opp'n Class Cert. 10 n.2; May 14 Tr. 195:20-196:1. Defendants do not even attempt to estimate the prevalence of such uninjured class members. On this issue the Court concludes that, to the extent that the class contains such uninjured members, that number is *de minimis* and does not preclude certification.

[*719] iv. Flat Co-Payors

Defendants further argue that 4-9% of consumers had flat co-pays during the class period and would have paid the same for generic as brand Niaspan and therefore are uninjured. Defs.' Opp'n Class Cert. 58-59, 64.

EPPs respond that they "have established that records exist to identify plans by copayment structure, which can then be sorted by a data analytics firm to exclude transactions associated with a flat copay." EPPs' Reply Class Cert. 49-50.

To the extent that the identification of flat co-payors, which are excluded from the class definition, cannot be differentiated from other class members without extensive individualized inquiry, flat co-payors pose a predominance problem in addition to an ascertainability problem. As the Court discussed with respect to ascertainability, **[**84]** the Court is not convinced that EPPs have a method of differentiating flat co-payors from other class members through a means that avoids extensive individualized inquiries. Absent a systematic means of excluding flat co-payors, defendants would be entitled to present individualized evidence to a jury that certain Niaspan purchasers are uninjured due to a flat co-pay structure and are therefore excluded from the class definition. *See* *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *19 (E.D. Pa. June 10, 2015)* ("When the identification and exclusion of these consumers cannot be managed without considering the highly individualized purchasing history of individuals and their specific insurance plans, simply stating that they are excluded from the class definition is not sufficient to show that common issues will predominate.").

v. Consumers Who Filled all Niaspan Prescriptions After Reaching a Medicare Part D Coverage Gap

Defendants assert that consumers who filled Niaspan prescriptions in a Medicare Part D coverage gap may not have incurred an overcharge because their coinsurance rates were lower for branded than generic drugs. Defs.' Opp'n Class Cert. 59.

EPPs contend that defendants' hypothetical is highly speculative, so "it is no surprise that neither Defendants **[**85]** nor Dr. Hughes identify a single consumer who meets these criteria nor attempt to estimate their prevalence." EPPs' Reply Class Cert. 50. They note that in order to reach the coverage gap,

> a Part D consumer must first reach their out-of-pocket deductible and then pay a copayment or coinsurance on their prescriptions until reaching their initial coverage limit. Only after surpassing these two coverage thresholds does a Part D consumer enter the coverage gap and allegedly pay less for brand Niaspan-and even then, only through the end of that policy period. A consumer would need to fill all of their Niaspan prescriptions only after entering the Part D coverage gap in every period during which they were prescribed Niaspan to be uninjured.

Id. The Court agrees with EPPs that defendants' argument rests on an unfounded hypothetical and "defendants' speculation cannot defeat certification." *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *23 (D.N.J. Oct. 30, 2018)*.

vi. TPPs Paying the Same or More for Generic Niaspan than Brand Niaspan

Defendants assert that there are multiple scenarios in which TPPs would not have paid an overcharge because they would have paid the same or more for generic Niaspan than for brand Niaspan. Defs.' Opp'n Class Cert. 59. Dr. Hughes **[*720]** hypothesizes **[**86]** that "if the retail price of the brand drug is $100 and $83 for the generic, and the consumer's copayment is $30 for a preferred brand drug and the generic copayment is $10 (as was the case for certain City of Providence plans), then the TPP would pay $70 for the brand but $73 for the generic." *Id.* Defendants also highlight that Dr. Hughes found that, for two named TPP plaintiffs, "the effective cost to TPPs for Niaspan just before actual generic entry [was] often lower than for generic niacin after actual generic entry." *Id.* at 54.

EPPs argue that the TPPs would have to have an unfavorable co-pay on every single payment, and note that in Hughes' two examples, for one insurer, twelve of the fifteen claims for generic Niaspan were less than the brand, and for the other, generic Niaspan claims were less in five out of eight transactions. EPPs' Reply Class Cert. 50. EPPs also persuasively note that Hughes not only failed "to identify a single Plaintiff that would have paid more on every generic Niaspan transaction for even one insured member in a competitive world, [he also failed to] even estimate the likelihood of that situation actually occurring for any TPP across all its members." *Id.*

The Court **[**87]** is convinced by EPPs' argument; given Dr. Hughes' failure to even estimate the prevalence of uninjured TPPs, the Court concludes that the number of TPPs in this hypothetical category is *de minimis*.

vii. Rebates

Defendants also argue that TPPs may have received brand rebates, which would further lower the costs of brand Niaspan and could result in generic Niaspan being more expensive. Defs.' Opp'n Class Cert. 60-61. Plaintiffs respond that there is no legal basis to argue that rebates negate antitrust injury, and instead would act as a "damages set-off." EPPs' Reply Class Cert. 48.

The Court agrees with EPPs. *See* *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *14* ("[A]s Plaintiffs correctly argue, any amounts that such Plan Sponsors received in coverage or in the form of rebates is irrelevant to the question of impact.").

Defendants argue that some rebates are different in that they do not operate as reimbursements but rather are credited towards the cost of prescriptions at the time of the invoicing. Defs.' Opp'n Class Cert. 61 n.26. This latter type of rebate could negate antitrust impact, or injury. *See* *In re Nexium Antitrust Litig., 777 F.3d 9, 28 (1st Cir. 2015)*. However, defendants do not even attempt to quantify the prevalence of such rebates, and on the present state of the record, the Court **[**88]** concludes that such rebates are *de minimis*.

viii. Conclusion: Uninjured Class Members

In sum, the Court is concerned that the class contains, at minimum, substantial numbers of uninjured consumer brand loyalists, coupon users, and flat co-payers.[10] The Court is not satisfied that EPPs have a non-individualized means of identifying these uninjured class members in a way that protects defendants' constitutional rights. *See, e.g., In re Intuniv Antitrust Litig., No. 16-12396, 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262, at *8 (D. Mass. Aug. 21, 2019)* (holding predominance not satisfied because plaintiffs "have not put forth a reasonable and workable plan to weed out uninjured class **[*721]** members"); *In re Asacol Antitrust Litig., 907 F.3d 42, 53-54 (1st Cir. 2018)* ("The need to identify those [uninjured] individuals will predominate and render an adjudication unmanageable absent evidence . . . [of] some . . . mechanism that can manageably remove uninjured persons from the class in a manner that protects the parties' rights."). The Court concludes that EPPs lack common evidence of antitrust injury, and cannot satisfy the *Rule 23(b)(3)* predominance requirement.

5. *Defendants' Challenge to EPPs' Aggregate Damages Model*

Defendants also challenge EPPs' classwide aggregate damages model. ***HN29***[] At class certification, "a model purporting to serve as evidence of damages in [a] class action must measure only **[**89]** those damages attributable to that theory." *In re Niaspan Antitrust Litig., No. 13-2460, 397 F. Supp. 3d 668, 2019 WL 3816829, at *14 (E.D. Pa. Aug. 14, 2019)* (citing *Comcast v. Behrend, 569 U.S. 27, 35, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*.

Defendants argue that "there is a mismatch between the EPPs' aggregate damages model and their exclusion of PBMs from . . . class membership," because "PBMs sometimes end up paying for part of the cost of prescriptions charged by pharmacies." Defs.' Opp'n Class Cert. 64-65. In support of their position, defendants assert that "the record contains documentary evidence of Caremark, a PBM, making a $333,906 payment to the City of Providence in order to perform a price guarantee. On this issue, Mr. Winkelman acknowledged that, in his experience auditing PBM contracts, around half of the time the PBM ended up having to make a payment to perform on price guarantees." *Id.* at 65.

EPPs respond that "[t]here is no merit to Defendants' argument that the role of PBMs—intermediary service providers who do not insure or pay for beneficiary purchases—somehow fatally wounds EPPs' damages model under *Comcast*." EPPs' Reply Class Cert. 44-45. They contend that "[d]efendants have completely failed to substantiate their argument that PBMs actually suffer losses on Niaspan purchases through the mechanics of their price negotiations on behalf of TPPs. Indeed, the **[**90]** PBMs themselves disavow this theory." *Id.* at 45. As Robert Lahman of OptumRx stated,

> As a PBM, OptumRx does not consider itself to be paying for its Clients' prescription drug purchases. While OptumRx may retain, in certain cases, compensation through spread pricing, rebates, or administrative fees, that compensation is payment for services that OptumRx provides and not payment for prescription drugs that are dispensed to health plan members and which are the financial responsibility of the health plan.

Lahman Decl. ¶ 11. EPPs further note that defendants' Caremark example does not show that any of the repayment in question was attributable to Niaspan purchases. EPPs' Reply Class Cert. 45.

Courts considering this argument in similar cases have recognized that a PBM's payment of part or all of the overcharge for the cost of prescriptions charged by pharmacies, "would create issues either with ascertainability or, if PBMs are excluded, with the classwide damages model." *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *23 (D.N.J. Oct. 30, 2018)*; *see also In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 149 (E.D. Pa. 2015)* (noting if PBMs were excluded from the class definition, "[plaintiffs'] current damages model would potentially include damages suffered by non-class members, and may therefore overstate the amount of damages suffered **[**91]** by the [class]."). However, **[*722]** courts have rejected this challenge in cases in which the defendants did not provide evidence that PBMs may have paid pharmacies more for a drug than the payment they received from a TPP, and therefore dismissed the challenge as a "general,

---

[10] EPPs' contention that "[d]efendants have not rebutted Plaintiffs' common evidence of injury with any substantiated example of a specific uninjured class member in the record," EPPs' Reply Class Cert. 34, is unpersuasive in light of the expert testimony discussed above and the extremely limited data production in the case.

theoretical risk." *In re Thalomid & Revlimid Antitrust Litig., 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *23*; *In re Lidoderm Antitrust Litig., No. 14-02521, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *25 (N.D. Cal. Feb. 21, 2017)*.

In this case, the Court agrees with EPPs that defendants have not provided evidence that any PBM payments based on price guarantees resulted in a loss on Niaspan purchases, and further credits the statement by OptumRx that any such PBM payments are "not payment for prescription drugs." The Court thus concludes that EPPs' aggregate damages model is consistent with the exclusion of PBMs from class membership.

6. *Availability of Pass-On Defense Under State Law*

Defendants contend that individualized issues predominate because, unlike federal law, some states allow antitrust defendants to raise a pass-on defense, which requires individualized analysis as to whether any particular plaintiff sustained actual economic harm. Defs.' Opp'n Class Cert. 68-70. They rely on the opinion of their expert, John Fritz, to argue that many EPPs did not suffer actual economic harm because those EPPs passed on any overcharge **[**92]** incurred through increased insurance or contribution premiums. *Id.* at 72-75.

EPPs respond that the pass-on defense is not available under most state statutes, and when it is available, it is limited to transactions within the chain of distribution and does not include premium payments. EPPs' Reply Class Cert. 36. EPPs also filed a Motion to Exclude the Opinions and Testimony of Fritz.

As explained *supra*, to the extent that state laws do permit a pass-on defense,[11] that defense relates to the quantum of damages, not antitrust injury. ***HN30***[] Unlike antitrust injury, a "relaxed measure of proof" is applied to antitrust damages calculations and "the actual amount of damages may result from a 'reasonable estimate.'" *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1176 (3d Cir. 1993)*; *Eastman Kodak Co. of New York v. S. Photo Materials Co., 273 U.S. 359, 379, 47 S. Ct. 400, 71 L. Ed. 684 (1927)* ("[A] defendant whose wrongful conduct has rendered difficult the ascertainment of **[*723]** the precise damages suffered by the plaintiff, is not entitled to complain that they cannot be measured with the same exactness and precision as would otherwise be possible."). Any adjustment to damages calculations for pass-on defenses arising under state laws would not affect the fact of antitrust injury, and does not preclude class certification.

HN31[] As a result, the **[**93]** availability of the pass-on defense involves "merits-related issues 'beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof.'" *See Harnish v. Widener Univ. Sch. of Law, 833 F.3d 298, 305 (3d Cir. 2016)*. Accordingly, the Court does not address defendants' argument that certain class members did not suffer actual economic harm based on the pass-on defense or EPPs' motion to exclude Fritz's opinion addressing that issue.

7. *Consumer Protection and Unfair Trade Practices Claims and Unjust Enrichment Claims*

EPPs assert that their claims arising under state consumer protection and unfair trade practices laws "all recognize that satisfaction of antitrust elements constitute liability." EPPs' Reply Class Cert. 2. EPPs have asserted no other

---

[11] EPPs have failed to provide to the Court with an adequate analysis of which state antitrust laws permit a pass-on defense to damages. EPPs summarily contend that the pass-on defense is not permitted under state law because "the relevant antitrust statutes have language mirroring federal antitrust laws, contain a federal harmonization provision, and/or have been interpreted in harmony with federal law." EPPs' Class Cert. Mot. 20 (citing App. A). However, as defendants persuasively argue, "[i]n permitting indirect purchaser actions at all, the [*Illinois Brick* repealer] state has already determined that its laws will not follow, but rather will deviate significantly, from federal ***antitrust law***." Defs.' Opp'n Class Cert. 70; May 15, 2019 Hr'g Tr. 20:6-19. These statutory deviations specifically repeal *Illinois Brick*'s bar against indirect purchaser actions, the symmetrical counterpart to *Hanover Shoe* which eliminated the pass-on defense under federal law. *See In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1164 n.10 (3d Cir. 1993)*. As such, EPPs' references to generic federal antitrust harmonization provisions does not provide the Court with the individualized analysis of the applicable states' laws to determine whether each state would permit a pass-on defense, and "the Court will decline to undertake the 'back-breaking labor involved in deciphering the state of antitrust [pass-on defense] in each of those states.'" *See In re Processed Egg Prod. Antitrust Litig., 312 F.R.D. 124, 148-149 (E.D. Pa. 2015)*.

theory of liability under the state consumer protection laws. Because the Court concludes that common issues do not predominate as to EPPs' antitrust claims, the Court likewise rejects EPPs' argument with respect to the state consumer protection claims. *See* *In re Processed Egg Prod. Antitrust Litig., 312 F.R.D. 124, 163 (E.D. Pa. 2015)*.

EPPs also argue that "all invoked unjust enrichment claims include essentially the same equitable elements" as the antitrust claims. EPPs' Reply Class Cert. 2. However, because EPPs have failed to demonstrate **[**94]** that common issues predominate as to their antitrust claims, and because EPPs assert no other theory of unjust enrichment, the Court rejects EPPs' argument as to EPPs' unjust enrichment claims. *See* *In re Processed Egg Prod. Antitrust Litig., 312 F.R.D. at 163*.

For these reasons, the Court concludes that EPPs' claims arising under consumer protection and unfair trade practices statutes and EPPs' unjust enrichment claims fail the *Rule 23(b)(3)* predominance requirement.

8. *Variations in States Laws*

Defendants further argue that the variations between the various state laws under which EPPs bring their claims defeat predominance.[12] Defs.' Opp'n Class Cert. 77-88.

HN32[] EPPs' burden of demonstrating that common questions of law or fact predominate "includes providing the Court with an extensive analysis which demonstrates that the variations in the applicable state laws do not defeat predominance."[13] **[*724]** *Vista Healthplan, Inc. v. Cephalon, Inc., 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *33 (E.D. Pa. June 10, 2015)*. Under the Third Circuit standard, courts may "certify nationwide classes where differences in state law f[a]ll 'into a limited number of predictable patterns,' and any deviations 'could be overcome at trial by grouping similar state laws together and applying them as a unit.'" *Grandalski v. Quest Diagnostics Inc., 767 F.3d 175, 183 (3d Cir. 2014)*. However, "plaintiffs face a significant burden to demonstrate that grouping **[**95]** is a workable solution." *Id*; *see also* *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *16 (D.N.J. Oct. 30, 2018)* ("In a motion for class certification, plaintiff bears the burden of providing an extensive analysis of state law variations to determine whether there are insuperable obstacles to class certification.").

Defendants contend that "[f]or this case to proceed as a class action, this Court would need to analyze the specific elements and issues that may arise under 53 state laws, decide critical and unsettled legal issues regarding how those laws would apply to the allegations in this case, and determine how the case will be adjudicated and tried under the 53 state laws." Defs.' Opp'n Class Cert. 77. They further assert that "EPPs provide no analysis of the state laws, no explanation of how they plan to prove the necessary elements of the 53 state laws, no proposed jury instructions nor any plan to address and manage these issues." *Id.*; May 15 Tr. 33:9-35:23. In addition, defendants raise numerous putative differences between the various state laws. Defs.' Opp'n Class Cert. 81-88.

EPPs reply that "'variations' in applicable state laws do not exist or are minor and manageable." EPPs' Reply Class Cert. 54. They assure the Court that any **[**96]** variations between the various statutes "can be handled via a special verdict form or by separating the purported variations into grouped categories." *Id.* at 58. They also note that

---

[12] Defendants also claim that EPPs failed to properly conduct a choice of law analysis. Defs.' Opp'n Class Cert. 77-81. The Court is not persuaded by this argument and agrees with EPPs that "[u]nder proper choice of law principles, the law of the state where the drug was purchased from a pharmacy governs because the injury (i. e., overcharge) occurs at the point of sale." EPPs' Reply Class Cert. 54. *See* *In re Flonase Antitrust Litig., 815 F. Supp. 2d 867, 883-84 (E.D. Pa. 2011)*; *In re Wellbutrin XL Antitrust Litig., 282 F.R.D. 126, 134-136 (E.D. Pa. 2011)*; *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 391 (E.D. Pa. 2010)*.

[13] The inquiry into whether variations in state laws can be manageably addressed implicates both the predominance and superiority requirements. *See* *Vista Healthplan, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *35*. The Court considers this issue under the predominance standard. *See, e.g.,* *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *11*.

some courts have held that differences between state consumer protection and unjust enrichment laws do not defeat predominance and address many of the alleged specific variations raised by defendants. *Id.* at 56-68.

The Court is not persuaded by EPPs' *ipse dixit* that there are no significant variations between the various state laws. The Third Circuit's *Grandalski* opinion is instructive in this regard. In that case, the plaintiffs "failed to provide a sufficient, or virtually any, analysis describing how the grouped state laws might apply to the facts of this case. They assert[ed] only that the differences between the state laws within each group are 'insignificant or non-existent.'" *Grandalski v. Quest Diagnostics Inc., 767 F.3d at 184*. The *Grandalski* court explained that "[plaintiffs] must do more than provide their own *ipse dixit*, citation to a similar case, and a generic assessment of state consumer fraud statutes, to justify grouping." *Id.*

In this case, EPPs have provided no analysis of any variations between the various state laws other than to assure the Court that such differences **[**97]** are minor and manageable. Without an extensive analysis of the applicable state laws and any variation in state law, EPPs cannot meet their burden of proving predominance under *Rule 23*. *See Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *34 (E.D. Pa. June 10, 2015)* (concluding that "Plaintiffs' accounting of the state variations [was] not comprehensive and glosses over important differences."); *see also In re Processed Egg* ***[*725]*** *Prod. Antitrust Litig., 312 F.R.D. 124, 164 (E.D. Pa. 2015)* ("Plaintiffs have provided charts seeking to demonstrate what the requirements of each state are with respect to the claims at issue[], but Plaintiffs have not proposed how those state claims would be grouped and managed at trial.").

Moreover, in other indirect purchaser antitrust actions proceeding under a wide array of state laws, plaintiffs have proposed trial plans, jury instructions or verdict sheets to assist the Court in understanding how any variations could be managed at trial. *See, e.g., Vista Healthplan, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *34* (evaluating plaintiffs' "proposed jury instructions [to] organize the state laws into a limited number of permutations"); *In re Processed Egg Prod. Antitrust Litig., 312 F.R.D. at 165* (considering plaintiffs' "Suggested Trial Options" memorandum); *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *20 (D. Mass. Oct. 16, 2017)* (addressing plaintiffs' proposed multiple phase trial plan). EPPs have not presented any such proposals in this case. Any renewed motion for class certification by EPPs should include, **[**98]** at minimum, charts identifying the substantive elements of each state law claim, an analysis of all variations between the state law claims, and a proposed trial plan through which these variations may be manageably addressed.

For all of the above reasons, the Court concludes that EPPs have not satisfied the predominance requirement.

iii. Superiority

HN33[] The superiority requirement "asks the court to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication." *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 533-34 (3d Cir. 2004)*. "[S]uperiority, unlike numerosity, considers alternatives to class actions other than joinder." *In re Modafinil Antitrust Litig., 837 F.3d 238, 253 n.11 (3d Cir. 2016)*.

HN34[] In considering whether superiority is established, the Court must consider "whether variations in state laws present the types of insuperable obstacles which render class litigation unmanageable." *Vista Healthplan, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *35* (citing *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 529 (3d Cir. 2004)*). For the reasons stated above, EPPs have not provided a record sufficient for the Court to conclude that variations in applicable state laws are manageable in a single trial. They have not demonstrated by a preponderance of the evidence that a single class action proceeding under the 53 state laws arising from 26 jurisdictions would be superior to alternative **[**99]** available methods of adjudication. The Court thus concludes that EPPs have not established superiority on the current state of the record.

iv. Conclusion

In sum, EPPs have not satisfied their burden of establishing ascertainability, predominance, or superiority by a preponderance of the evidence. For these reasons, EPPs' motion for class certification is denied. This decision is without prejudice to EPPs' right to file an amended motion for class certification if warranted by the facts and applicable law as set forth in this Memorandum.

V. EPPS' MOTION TO EXCLUDE THE OPINIONS AND TESTIMONY OF JOHN F. FRITZ

EPPs filed a motion to exclude the opinions and testimony of defendants' expert witness, John Fritz, who opines that certain EPP class members passed on the **[*726]** costs of any overcharge and therefore did not sustain actual economic harm. Mem. L. Supp. EPPs' Mot. Exclude Opinions & Test. John F. Fritz 1. As explained above, the issue of whether recoverable damages are limited to a class members' actual economic harm does not impact class certification, and the Court need not address this issue at this stage in the litigation. In light of the Court's denial of EPPs' motion for class certification, **[**100]** EPP's motion to exclude Fritz's opinions and testimony is denied as moot. This decision is without prejudice to plaintiffs' right to challenge Fritz's expert testimony, if warranted, at a later stage in this litigation.

VI. CONCLUSION

For the reasons set forth above, (1) defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller is denied, (2) EPPs' Motion for Class Certification is denied without prejudice to EPPs' right to file an amended motion if warranted by the facts and applicable law as set forth in this Memorandum, and (3) EPPs' Motion to Exclude the Opinions and Testimony of John F. Fritz is denied as moot.

An appropriate Order follows.

ORDER

AND NOW, this 2nd day of June, 2020, upon consideration of End-Payor Plaintiffs' Motion for Class Certification (Document No. 578, filed December 19, 2018), Defendants' Opposition to End-Payor Plaintiffs' Motion for Class Certification (Document Nos. 601 & 608, filed February 25, 2019), Defendants' Appendices of State Laws in Support of Defendants' Opposition to End-Payor Plaintiffs' Motion for Class Certification (Document No. 602, filed February 25, 2019), Reply Memorandum of Law in Support of End-Payor Plaintiffs' **[**101]** Motion for Class Certification (Document No. 628, filed March 25, 2019), Defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller Offered in Support of End-Payor Plaintiffs' Motion for Class Certification (Document Nos. 603 & 609, filed February 25, 2019), Declaration of Jeffrey Y. Wu in Support of Defendants' Opposition to End Payor Plaintiffs' Motion for Class Certification and Defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller (Document Nos. 605 & 610, filed February 25, 2019), End-Payor Plaintiffs' Opposition to Defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller (Document No. 627, filed March 25, 2019), End-Payor Plaintiffs' Motion to Exclude the Opinions and Testimony of John F. Fritz (Document No. 626, filed March 25, 2019), Defendants' Opposition to End-Payor Plaintiffs' Motion to Exclude the Opinions and Testimony of John F. Fritz (Document Nos. 630 & 631, filed April 8, 2019), and the parties' Notices of Supplemental Authority and responses (Document Nos. 691, 695, 704, 705, 706, 707), and following Hearings on May 14 and 15, 2019, and July 23, 2019, for the reasons stated in the accompanying **[**102]** Memorandum dated June 2, 2020, **IT IS ORDERED** as follows:

1. Defendants' Motion to Exclude the Expert Testimony of Laura Craft and Eric Miller Offered in Support of End-Payor Plaintiffs' Motion for Class Certification is **DENIED**;

2. End-Payor Plaintiffs' Motion for Class Certification is **DENIED WITHOUT PREJUDICE** to their right to file an amended motion if warranted by the facts and applicable law as set forth in the Memorandum dated June 2, 2020; and

3. End-Payor Plaintiffs' Motion to Exclude the Opinions and Testimony of John F. Fritz is **DENIED AS MOOT**.

[*727] IT IS FURTHER ORDERED that, on or before June 16, 2020, the parties shall submit a proposed schedule for further proceedings through the filing of Motions for Summary Judgment and responses. The Court will thereafter conduct a telephone conference to address scheduling.

BY THE COURT:

/s/ Hon. Jan E. DuBois

DuBOIS, JAN E., J.

Distance Learning Co. v. Maynard

United States District Court for the Northern District of California

June 4, 2020, Decided; June 4, 2020, Filed

Case No. 19-cv-03801-KAW

Reporter

2020 U.S. Dist. LEXIS 99256 *; 2020-1 Trade Cas. (CCH) P81,247; 2020 WL 2995529

Opinion

ORDER GRANTING MOTION TO DISMISS

Re: Dkt. No. 43

Plaintiff The Distance Learning Company filed this putative class action against Defendants Bethany Susan Maynard and Derick Gene Maynard, asserting that Defendants are seeking "to suppress competition and maintain control in the field of online traffic schools." (First Amended Compl. ("FAC") ¶ 2, Dkt. No. 39.)

Pending before the Court is Defendants' motion to dismiss. (Defs.' Mot. to Dismiss, Dkt. No. 43.) Having considered the parties' filings and the relevant legal authority, the Court GRANTS Defendants' motion.

I. BACKGROUND

Plaintiff and the putative class operate online driver's education and traffic schools in California. (FAC ¶ 9, 14.) The California Department of Motor Vehicles ("DMV") permits **[*2]** any company to set up a new traffic school by paying a $450 application fee if they have a course curriculum, place of business, operator, and bond. (FAC ¶ 32.) California law requires that the DMV maintain a list of driving schools, both on-line and in hard copy for distribution in traffic courts. (FAC ¶ 28.) Plaintiff alleges that schools that appear on this list do not need to spend money on advertising or marketing because they must be added to the list. (FAC ¶ 29.) The list is not alphabetized, but auto-rotates every time a user accesses the DMV's website, displaying a random list of several dozen traffic schools. (FAC ¶¶ 47-48.)

Defendants are a husband and wife who also own and operate online traffic schools. (FAC ¶¶ 30, 40.) Plaintiff asserts that Defendants have abused a "loophole" in the current DMV statute and regulations. (FAC ¶ 33.) Specifically, Plaintiff alleges that Defendants have registered hundreds of traffic schools that operate out of the same office space, with the intent of flooding the DMV's list with numerous schools operated by the same owner and operator. (FAC ¶ 35.) "Defendants' schools, in many cases, have different names, but utilize the exact same website, **[*3]** place of business, curriculum, and instructor." (FAC ¶ 35.) Defendants jointly and severally run the traffic schools, which are located at the same physical access and "offer identical services for identical prices." (FAC ¶¶ 39, 41.) Altogether, Plaintiff alleges that Defendants "jointly operate 1,500 of the 2,790 of the DMV's licensed traffic schools, or 53.8% of the licensed traffic schools," including setting up 501 schools on a single day in January 2019. (FAC ¶¶ 37-38.)

Plaintiff alleges that Defendants have admitted in published news articles that the sole purpose of opening so many traffic schools "was to flush out businesses who were charging lower prices for the same services as Defendants." (FAC ¶ 44.) By creating so many traffic schools, "Defendant[s] can attempt to monopolize the DMV's website, and to create high barriers to entry for new traffic schools, in order to discourage competition." (FAC ¶ 39.) In short, by creating so many "alter-ego proxy schools," Defendants can "increase their likelihood of appearing at or near the top of the randomized list, thereby bettering their chance of being selected by a consumer, not through any legitimate competitive advantage, but **[*4]** through sheer volume and luck of the randomized draw." (FAC ¶ 50.) This is because consumers are unlikely "to scroll through and research all 2,700 plus traffic schools to find a suitable and competitive option, especially given the relatively low price point of these traffic school programs[. Thus], schools listed at or near the top of these randomized lists are the most likely to be selected by a consumer." (FAC ¶ 49.)

Plaintiff further alleges that Defendants' actions encourage price collusion. (FAC ¶ 72.) Plaintiff asserts that the average price of an online traffic school is $17.00/person, but that Defendants agreed to have their schools charge $7.00 higher than the industry average, an increase of 41% from the industry average. (FAC ¶¶ 70, 72.) Plaintiff believes consumers are unlikely to notice the change or care, permitting Defendants to "gouge consumers and prevent law-abiding legitimate competitors, such as Plaintiff, from being exposed to consumers . . . ." (FAC ¶ 76.)

On June 28, 2019, Plaintiff filed the instant case. (Compl., Dkt. No. 1.) On January 6, 2020, Plaintiff filed the operative complaint, alleging claims for: (1) violation of the *Sherman Act § 1* (unlawful collusion), **[*5]** (2) violation of the *Sherman Act § 2* (unlawful monopolization), (3) violation of the *Sherman Act § 2* (attempted monopolization), (4) violation of the *Unfair Competition Law ("UCL")*, and (5) violation of the *Cartwright Act*. (FAC ¶¶ 81-136.)

On February 3, 2020, Defendants filed the instant motion to dismiss. On March 4, 2020, Plaintiff filed its opposition. (Pl.'s Opp'n, Dkt. No. 48.) On March 18, 2020, Defendants filed their reply. (Defs.' Reply, Dkt. No. 49.)

On May 5, 2020, the Court vacated the hearing, and requested supplemental briefing. (Dkt. No. 54.) On May 11, 2020, Plaintiff filed its supplemental brief. (Pl.'s Supp. Br., Dkt. No. 55.) On May 15, 2020, Defendants filed their supplemental brief. (Defs.' Supp. Br., Dkt. No. 56.)[1]

II. LEGAL STANDARD

---

[1] On May 15, 2020, Plaintiff also filed a request for oral argument. (Dkt. No. 57.) Plaintiff did not explain why oral argument was needed. Having reviewed Plaintiff's request, the parties' filings, and the relevant legal authorities, the Court deems the matter suitable for disposition without a hearing pursuant to *Civil Local Rule 7-1(b)*.

Under *Federal Rule of Civil Procedure 12(b)(6)*, a party may file a motion to dismiss based on the failure to state a claim upon which relief may be granted. A motion to dismiss under *Rule 12(b)(6)* tests the legal sufficiency of the claims asserted in the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*.

In considering such a motion, a court must "accept as true all of the factual allegations contained in the complaint," *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (per curiam) (citation omitted), and may dismiss the case or a claim "only where there is no cognizable legal theory" **[*6]** or there is an absence of "sufficient factual matter to state a facially plausible claim to relief." *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1041 (9th Cir. 2010)* (citing *Ashcroft v. Iqbal, 556 U.S. 662, 677-78, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Navarro, 250 F.3d at 732*) (internal quotation marks omitted).

A claim is plausible on its face when a plaintiff "pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (citation omitted). In other words, the facts alleged must demonstrate "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

"Threadbare recitals of the elements of a cause of action" and "conclusory statements" are inadequate. *Iqbal, 556 U.S. at 678*; *see also* *Epstein v. Wash. Energy Co., 83 F.3d 1136, 1140 (9th Cir. 1996)* ("[C]onclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim."). "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully . . . . When a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 557*) (internal citations omitted).

If the court grants a motion to dismiss, it **[*7]** should grant leave to amend even if no request to amend is made "unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (citations omitted).

III. DISCUSSION

A. *Sherman Act § 1* (Antitrust Conspiracy)

"*Section 1 of the Sherman Act* prohibits '[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations.'" *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1046 (9th Cir. 2008)* (quoting *15 U.S.C. § 1*). Defendants contend this claim must be dismissed because: (1) Plaintiffs fail to allege sufficient facts demonstrating an agreement or conspiracy between Defendants, and (2) Defendants are legally incapable of conspiring amongst themselves because there is a unity of interest. (Defs.' Mot. to Dismiss at 7, 8.)

i. Sufficiency of the Pleading

To plead a § 1 violation, a plaintiff must "plead not just ultimate facts (such as conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." **[*8]** *Kendall, 518 F.3d at 1047*. Conclusory allegations that the defendants entered into a contract, combination or conspiracy are insufficient; instead, a plaintiff must plead "enough factual allegations to suggest an agreement was made." *Jones v. Micron Tech., Inc., 400 F. Supp. 3d 897, 914-15 (N.D. Cal. 2019)*; *see also* *Kendall, 518 F.3d at 1047*.

"Factual allegations concerning an agreement to restrain trade can take two forms: direct or circumstantial. Direct evidence factual allegations are explicit and require no inferences to establish the existence of a conspiracy." Jones, 400 F. Supp. 3d at 915 (internal quotation omitted). The Supreme Court has "suggested that to allege an agreement between antitrust co-conspirators, the complaint must allege facts such as a 'specific time, place, or person involved in the alleged conspiracies' . . . ." Kendall, 518 F.3d at 1047 (quoting Twombly, 550 U.S. at 565 n.10). In contrast, a plaintiff relying on circumstantial evidence "must present allegations of parallel conduct of the defendants as well as so-called 'plus factors.' Parallel conduct occurs when competitors act similarly or follow the same course of action . . . ." Jones, 400 F. Supp. 3d at 915 (citation omitted). Plus factors are circumstances that "point[] toward a meeting of the minds of the alleged conspirators," namely "economic actions and outcomes that are largely inconsistent with unilateral, lawful conduct but **[*9]** largely consistent with explicitly coordinated action." *Id.* (internal quotations omitted).

Here, Defendants argue that Plaintiff pleads inadequate facts of an agreement. (Defs.' Mot. to Dismiss at 7.) The Court disagrees. Plaintiff has alleged that Defendants entered into an agreement to flood the marketplace with duplicate traffic schools at the same time, using the same website, place of business, curriculum, and instructor. (FAC ¶¶ 35, 41, 83.) Such allegations go beyond "bare, unsupported conclusions" of an agreement, as it specifically identifies who is involved in the agreement, what was agreed to, how the agreement would be carried out, and the intended effects of the agreement.

Additionally, even if such allegations were insufficient to directly demonstrate an agreement, Plaintiff has pled sufficient circumstantial evidence of an agreement. Specifically, Plaintiff has alleged parallel conduct, namely registering hundreds of traffic schools using the same office space, website, curriculum, and instructor. (FAC ¶ 35.) Plaintiff has also alleged circumstances that point to a meeting of the minds; in addition to using the same resources, Defendants allegedly charged the same price **[*10]** and opened 500 traffic schools on the same day. (FAC ¶¶ 35, 36, 72.) It is difficult to imagine that such actions were coincidental, as Defendants suggest. (*See* Defs.' Mot. to Dismiss at 8.)

Accordingly, the Court finds Plaintiff has adequately pled an agreement between Defendants.

ii. Unity of Interest

In the alternative, Defendants argue that the § 1 claim must be dismissed because "there is a unity of interest among [Defendants] and the traffic schools they own," which makes Defendants "legally incapable of conspiring among themselves." (Defs.' Mot. to Dismiss at 8.) The Court agrees that as pled in the complaint, Defendants have a unity of interest.

"The distinction between unilateral and concerted conduct is necessary for a proper understanding of the terms 'contract, combination . . . or conspiracy' in § 1." Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984). Specifically, "[n]othing in the literal meaning of those terms excludes coordinated conduct among officers or employees of the *same* company." *Id.* "The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals." *Id.* Likewise, § 1 is **[*11]** not violated by coordination between a corporation and one of its unincorporated divisions, or between a parent and its wholly owned subsidiary. Id. at 770, 772. With respect to a parent and a subsidiary, this is because they "have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousness, but one." Id. at 771.

In determining whether entities are capable of conspiring, the key inquiry is whether the alleged agreement or conspiracy "joins together separate decisionmakers." Am. Needle, Inc. v. NFL, 560 U.S. 183, 195, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010). The entities must be "separate economic actors pursuing separate economic interests, such that the agreement deprives the marketplace of independent centers of decisionmaking, and therefore of diversity of entrepreneurial interests, and thus of actual or potential competition." Id. at 195 (internal quotations omitted). Thus, "it is not determinative that two parties to an alleged § 1 violation are legally distinct entities." Id. at

196. Instead, "[t]he question is whether the agreement joins together 'independent centers of decisionmaking.' If it does, the entities are capable of conspiring under § 1 . . . ."

Plaintiff argues that Defendants are comparable **[*12]** to the NFL teams in American Needle, Inc. v. National Football League, which the Supreme Court found to be separate economic interests capable of conspiring under § 1.[2] (Pl.'s Opp'n at 23-24.) There, the 32 NFL teams formed the National Football League Properties ("NFLP") to develop, license, and market their intellectual property, eventually granting exclusive licenses. 560 U.S. 183, 187, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010). The defendants argued that the NFL, NFL teams, and NFLP were incapable of conspiring because they were a single economic enterprise. Id. at 188**.** The Supreme Court rejected this argument, explaining that "[t]he NFL teams do not possess either the unitary decisionmaking quality or the single aggregation of economic power characteristic independent action." Id. at 196. Rather, each team was "a substantial, independently owned, and independently managed business," with their corporate actions "guided or determined by separate corporate consciousness, and their objectives are not common." *Id.* (internal quotations omitted). Further, "[t]he teams compete with one another, not only on the playing field, but to attract fans, for gate receipts, and for contracts with managerial and playing personnel." Id. at 196-97. Significantly, the NFL teams also "compete **[*13]** in the market for intellectual property," as "[w]hen each NFL team licenses its intellectual property, it is not pursuing the 'common interests of the whole' league but is instead pursuing interests of each corporation itself." Id. at 197. Thus, each NFL team was a "separate, profit-maximining entit[y], and their interests in licensing team trademarks are not necessarily aligned." Id. at 198.

American Needle, Inc. is readily distinguishable from the instant case. There are no allegations that Defendants are or were competitors; instead, they are alleged to be a *husband and wife*, who would presumably have the same economic interest, especially given California's community property laws. (FAC ¶ 40; *see also* Cal. Fam. Code § 760 ("all property, real or personal, wherever situated, acquired by a married person during the marriage while domiciled in this state is community property").) This fact cuts against a finding that Defendants would ordinarily be competing against *each other* in the traffic school business absent the alleged conspiracy. Other allegations in the complaint further support a finding that Defendants have a unity of interest, including that Defendants "jointly operate" the schools, which use the same website, **[*14]** place of business, curriculum, and instructor. (FAC ¶¶ 35, 37.) In short, unlike the NFL teams, there is nothing to suggest that Defendants interest were never aligned with respect to owning and operating traffic schools, or that they are "independent centers of decisionmaking" who, by working together, deprive the marketplace of actual or potential competition.

Instead, these facts are more akin to Top Rank, Inc. v. Haymon. There, the plaintiff alleged that the Haymon defendants (professional boxing management companies) and the Waddell defendants (asset management and investment advisory firms) were conspiring together to monopolize the boxing sport. CV 15-4961-JFW (MRWx), 2015 U.S. Dist. LEXIS 164676, at *4-5 (C.D. Cal. Oct. 16, 2015). In dismissing the § 1 claim, the district court explained that the defendants had "no alleged separate interest, at least as it relates to the relevant management and promotion markets." Id. at *48. Of particular significance, the district court explained that "the Waddell Defendants, as asset management and investment advisory firms, are not actual or potential competitors of the Haymon Defendants. Accordingly, their alleged venture with the Haymon Defendants does not deprive the marketplace of independent centers of decisionmaking, **[*15]** or of a diversity of entrepreneurial interests, and thus of actual or potential competition." *Id.* (internal quotation omitted). Such is the case here, where Defendants are a husband and wife who would not ordinarily be competing against each other in business.

In its supplemental brief, Plaintiff concedes that under the American Needle test, a husband and wife would share a unity of interests. (Pl.'s Supp. Br. at 1.) Plaintiff, however, contends that this is not its allegation; rather, Plaintiff suggests that Defendants' 1,500 businesses are colluding with one another. (*Id.*) Plaintiff's argument is contrary to the pleadings; for example, the operative complaint alleges that "*Defendants* have together colluded to set up as many 'different' schools as possible, in order to flood the DMV's list with many schools which are all operated by the same owner/operator." (FAC ¶ 35 (emphasis added); *see also* ¶¶ 50 ("Defendants' intention in creating thousands

---

[2] Plaintiff also argues that a determination of whether there is a unity of interest is premature at the pleading stage. (*See* Pl.'s Opp'n at 2 n.1.) As discussed below, however, based on Plaintiff's own allegations, there appears to be a unity of interest.

of alter-ego proxy schools is to increase their likelihood of appearing at or near the top of the randomized list."), 83 ("Defendants entered into an agreement to flood the marketplace with fake/duplicate traffic schools at the same time"). **[*16]** These are actions that only Defendants, not their schools, could have taken; the schools did not create themselves, nor did the schools enter into an agreement to flood the market. As alleged, the schools are the conduit through which Defendants, the alleged conspirators, attempted to collude.

Further, even if Plaintiff had alleged the driving schools themselves were colluding, as alleged, it appears unity of interest would still apply. Here, the driving schools are jointly operated by individuals who, as Plaintiff concedes, have a unity of interest. Courts have found that no § 1 violation occurred when the "corporations were under common ownership and control . . . ." *Century Oil Tool, Inc. v. Prod. Specialties, Inc., 737 F.2d 1316, 1317 (5th Cir. 1984)*; *see also* *Livingston Downs Racing Ass'n, Inc. v. Jefferson Downs Corp., 257 F. Supp. 2d 819, 835 (M.D. La. 2002)* ("Where two people together are controlling the affairs of separate corporations those corporations cannot conspire under *§ 1 of the Sherman Act*.") Further, there are no allegations that the driving schools would compete with each other; rather, they are all part of a single operation to increase the market share for their common owner.

Absent allegations that would allow the Court to find that Defendants are competitors, the Court finds that as pled, Defendants have a unity of interest and therefore are legally **[*17]** incapable of conspiring under *§ 1*. Accordingly, the § 1 claim is dismissed without prejudice. While it is unclear the driving schools are capable of conspiring with each other, the Court will allow amendment of this claim.

B. *Sherman Act § 2* (Monopolization and Attempted Monopolization)

Plaintiff alleges that Defendants have engaged in unlawful monopolization and attempted monopolization, in violation of the *Sherman Act § 2*. (FAC ¶¶ 94, 102.) A monopoly claim has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Attempted monopoly has four elements: "(1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at achieving that purpose; (3) a dangerous probability of achieving 'monopoly power'; and (4) causal antitrust injury." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1445 (9th Cir. 1995)*.

Here, Defendants effectively argue that Plaintiff's § 2 claims fail because Plaintiff has failed to adequately allege market power. In *Rebel Oil*, the Ninth Circuit explained that "reduction of competition does not **[*18]** invoke the *Sherman Act* until it harms consumer welfare." *51 F.3d at 1433*. Thus, "an act is deemed *anticompetitive* under the *Sherman Act* only when it harms both allocative efficiency *and* raises the prices of goods above competitive levels or diminishes their quality." *Id.* In order to unilaterally "raise prices above competitive levels, the [defendant] must obtain sufficient market power." *Id. at 1434*. A defendant "has sufficient market power when, by restricting its own output, it can restrict marketwide output and, hence, increase marketwise prices." *Id.* To establish market power, "[t]he most common type of proof is circumstantial evidence pertaining to the structure of the market." *Rebel Oil, 51 F.3d at 1434*. Thus, "a plaintiff must: (1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry and show that existing competitors lack the capacity to increase their output in the short run." *Id.* The Ninth Circuit has applied these same factors in both monopolization and attempted monopolization cases, although a lesser market share suffices for attempted monopolization. *See* *Rebel Oil, 51 F.3d at 1432-34* (applying market power factors in an attempted monopolization case); **[*19]** *W. Parcel Express v. UPS of Am., 190 F.3d 974, 975 (9th Cir. 1999)* (applying market power factors in a monopolization case).

i. Relevant Market

First, Defendant argues that Plaintiff improperly limited the relevant market to online traffic schools because Plaintiff should have also included brick and mortar traffic schools. (Defs.' Mot. to Dismiss at 10.) The relevant market is "the pool of goods of services that enjoy reasonable interchangeability of use and cross-elasticity of demand." *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)* (internal quotation omitted). Thus, "defining the product market involves identification of the field of competition: the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business." *Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)*.

A court may dismiss a monopolization claim if the plaintiff "alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products." *ChriMar Sys. v. Cisco Sys., 72 F. Supp. 3d 1012, 1017 (N.D. Cal. 2014)* (internal quotation omitted). Dismissal under *Rule 12(b)(6)*, however, is only appropriate "if the complaint's 'relevant market' definition is facially unsustainable" because "the validity of the 'relevant market' is typically a factual element rather than legal element . . . ." *Newcal Indus. v. Ikon Office Solution, Inc., 513 F.3d 1038, 1045 (9th Cir. 2008)*.

Here, Plaintiff's limitation of the relevant market to online traffic schools **[*20]** is not "facially unsustainable." While Defendants point to Plaintiff's allegation that both online and brick and mortar schools appear on the DMV's list, this does not necessarily mean the services provided are interchangeable. (*See* Defs.' Mot. to Dismiss at 10; FAC ¶ 28.) As Plaintiff points out, online traffic schools may be "more convenient, less time consuming, and cheaper" than brick and mortar schools. (*See* Pl.'s Opp'n at 23.) Indeed, an individual may be able to use an on-line traffic school located anywhere in California, but would be limited to specific brick and mortar schools in their surrounding area. Thus, not all brick and mortar schools would have "actual or potential ability to deprive" the internet traffic schools "of significant levels of business." *Thurman Indus., Inc., 875 F.2d at 1374*. Whether Plaintiff's defined market is too narrow is a determination appropriately left for summary judgment or trial.

ii. Market Share

Second, Defendants argue that even if the relevant market is limited to only online traffic schools, Plaintiff has not alleged adequate market share. (Defs.' Mot. to Dismiss at 11.) "Calculation of the market share allows for a proper understanding of the defendant's influence and relative **[*21]** power in the relevant market. A dominant share of the market often carries with it the power to control output across the market, and thereby control prices." *Image Tech. Servs. v. Eastman Kodak Co., 125 F.3d 1195, 1206 (9th Cir. 1997)*. For a monopolization claim, "[c]ourts generally require a 65% market share to establish a prima facie case of market power." *Id.* For an attempted monopolization claim, "a lower quantum than the minimum showing required in an actual monopolization case." *Rebel Oil, 51 F.3d at 1438*. Most attempted monopolization "cases hold that a market share of 30 percent is presumptively insufficient to establish the power to control price," although the Ninth Circuit has found that a market share of 44% was sufficient where "entry barriers are high and competitors are unable to expand their output in response to supracompetitive pricing." *Id.*

Here, Plaintiff alleges that Defendants have a 53.8% market share because Defendants own and operate approximately 53.8% of the DMV's licensed traffic schools. (FAC ¶¶ 37, 62, 73.) Thus, Plaintiff argues that this 54% market share is sufficient to survive a motion to dismiss because it lies in the "gray area of the law" between the 30% and 65% thresholds identified by the Ninth Circuit. (Pl.'s Opp'n at 19.) Operating 53.8% of **[*22]** online traffic schools, however, does not automatically mean Defendants conduct 53.8% of all online traffic school *business*; Defendants correctly argue Plaintiff has offered "no basis . . . for the implausible underlying assumption that market share in a given market is distributed evenly to all business in that market." (Defs.' Mot. to Dismiss at 11.) At best, Plaintiff can demonstrate that Defendants occupy 53.8% of the DMV's list, but even taking as true the allegation that consumers are likely to select the schools listed at the top of the list, this does not translate to market share. There is no allegation, for example, that most or even a meaningful number of consumers use the DMV's list to begin with, as opposed to an internet search. (*See* Defs.' Reply at 10.) In its supplemental briefing, Plaintiff argues that the vast majority of business for online

In its supplemental briefing, Plaintiff argues that the vast majority of business for online schools (80%) does come from the DMV list. (Pl.'s Supp. Br. at 1.) Plaintiff also cites to the drop in its business and that of other online traffic schools since Defendants' alleged opening of thousands of online schools. (*Id.* at 1-2.) Such facts, **[*23]** however, were not in the operative complaint. It is also not clear that even assuming Defendants now have 53.8% of the 80% of business that goes through the DMV list (*i.e.*, 43.04% of all business), this would be sufficient for a monopolization claim, which generally requires a 65% market share. *See* *Image Tech. Servs., 125 F.3d at 1206*. Even for an attempted monopolization claim, this 43.04% share is less than the 44% share in *Rebel Oil*, which the Ninth Circuit found sufficient because there were high barriers of entry. *51 F.3d at 1438*.

Because Plaintiff has not alleged facts demonstrating adequate market share, Plaintiff's § 2 claims must be dismissed.

iii. Barriers to Entry

Finally, Defendants argue that Plaintiff has not alleged any significant barriers to market entry. (Defs.' Mot. to Dismiss at 12.) "A § 2 plaintiff must show that new competitors face high market barriers to entry and that current competitors lack the ability to expand their output to challenge a monopolist's high prices." *Image Tech. Servs., 125 F.3d at 1208*. "Entry barriers are additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants, or factors in the market that deter entry while permitting incumbent firms to earn monopoly returns. *Rebel Oil Co., 51 F.3d at 1439*. Typical entry barriers **[*24]** include: "(1) legal license requirements; (2) control of an essential or superior resource; (3) entrenched buyer preferences for established brands; (4) capital market evaluations imposing higher capital costs on new entrants; and, in some situations, (5) economies of scale." *Id.*

The Court finds that Plaintiff has not alleged significant barriers to entry. As Plaintiff itself alleges, "the DMV allows any company to pay the $450 application fee, and set up a new traffic school[]," in addition to having a course curriculum, place of business, operator, instructor, and a bond. (FAC ¶ 32.) These are not significant barriers that prevent new competitors from entering the market.

Instead, Plaintiff essentially argue that in order to *compete* with Defendants, new entrants must pay $675,000 in DMV application fees in order to set up 1,500 traffic schools of their own. (Pl.'s Opp'n at 7, 21; FAC ¶ 59.) In *United States v. Syufy Enterprises*, however, the Ninth Circuit rejected the argument that "competition is itself a structural barrier to entry." *903 F.2d 659, 667 (9th Cir. 1990)*. There, Syufy operated a movie theater, eventually buying out most of his competitors. *Id. at 662*. The Ninth Circuit found that Syufy did not have the power **[*25]** to exclude competition, as there were "no structural barriers to entry into the market . . . . To the contrary, the record discloses a rough-and-tumble industry, marked by easy market access, fluid relationships with distributors, an ample and continuous supply of product, and a healthy and growing demand." *Id. at 667*. As to the government's argument that "competitors w[ould] be deterred from entering the market because they could not hope to turn a profit competing against Syufy," the Ninth Circuit "ma[de] clear . . . that an efficient, vigorous, aggressive competitor is not the villain antitrust laws are aimed at eliminating." *Id. at 667-68*.

Alternatively, Plaintiff argues that Defendants have been able to charge rates 40% greater than the industry average by overwhelming the DMV list, thus demonstrating an ability to control prices. (Pl.'s Opp'n at 19.) It is not clear how this is relevant to barriers to entry or barriers to expansion; the fact that Defendants charge a higher rate than the industry average does not necessarily mean Defendants are preventing new entrants to the market or that current competitors cannot expand their output to challenge Defendants' higher prices. *See* *Image Tech. Servs., 125 F.3d at 1208*.

Accordingly, the Court **[*26]** finds that Plaintiff has failed to allege the second and third market power factors. As amendment is not futile, Plaintiff's § 2 claims are DISMISSED without prejudice.

C. Cartwright Act

"The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the *Cartwright Act, Cal. Bus. & Professions Code § 16700 et seq.*, was modeled after the *Sherman Act*." *Cty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2011)*. Thus, where the plaintiff's "claim under the *Cartwright Act* is predicated on the same conduct underlying the Sherman Act claims[,] the legal analysis of [the] Cartwright Act claim . . . should mirror the analysis under the Sherman Act claims." *Stewart v. Gogo, Inc., Case No. 12-cv-5164-EMC, 2013 U.S. Dist. LEXIS 51895, at *15 (N.D. Cal. Apr. 10, 2013)*. Here, Plaintiff's Cartwright Act complains of the same actions as the Sherman Act claims, namely Defendants' alleged agreement to create duplicate traffic schools, using the same websites, business addresses, owners, and operators, in order to flood the marketplace. (*See* FAC ¶ 133.) Thus, Plaintiff's Cartwright Act claim is DISMISSED without prejudice.

D. Unfair Competition Law ("UCL")

"The UCL is a broad remedial statute that permits an individual to challenge wrongful business conduct 'in whatever context such activity might occur.'" *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007)* (quoting *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 181, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999))*. The *UCL* prohibits "unlawful **[*27]** competition," defined as "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising . . . ." *Cal. Bus. & Prof. Code § 17200*. "Because the statute is written in the disjunctive, it is violated where a defendant's act or practice is (1) unlawful, (2) unfair, (3) fraudulent, or (4) in violation of *section 17500* (false or misleading advertisements)." *Lozano, 504 F.3d at 731* (internal citation omitted).

Here, Plaintiff brings UCL claims under the unlawful and unfair prongs. (*See* FAC ¶ 110-112.) As discussed above, Plaintiff has failed to allege violations of the *Sherman Act* or *Cartwright Act*, and therefore the UCL claim based on the unlawful prong fails.

The parties dispute, however, whether the UCL claim based on the unfair prong may survive independent of the Sherman Act or Cartwright Act claims. In general, "[e]ach prong of the UCL is a separate and distinct theory of liability; thus, the 'unfair' practices prong offers an independent basis for relief." *Lozano, 504 F.3d at 731*. Plaintiff argues that to determine whether the "unfair" UCL claim can survive, the Court should apply: "(1) the traditional balancing test; (2) the FTC Act section 5 test; or (3) the *Cel-Tech* tethering test." (Pl.'s Opp'n at 9.) The Court finds that the **[*28]** traditional balancing test and FTC Act section 5 test do not apply, and Plaintiff does not satisfy the *Cel-Tech* tethering test.

First, with respect to the Section 5 test, Plaintiff itself acknowledges that "it is not the appropriate standard in this case for the UCL claims." (Pl.'s Opp'n at 10.) It is therefore unclear how the Section 5 test is relevant to the instant case.

Second, with respect to the traditional balancing test, "the California Supreme Court rejected the balancing test . . . in suits involving unfairness to the defendant's competitors." *Lozano, 504 F.3d at 735*; *see also* *Morris v. BMW of N. Am., LLC, Case No. 07-2827-WHA, 2007 U.S. Dist. LEXIS 85513, at *19 (N.D. Cal. Nov. 7, 2007)* (same); *Hadley v. Kellogg Sales Co., 243 F. Supp. 3d 1074, 1104 (N.D. Cal. 2017)* ("[t]he California Supreme Court has rejected the traditional balancing test for UCL claims between business competitors and instead requires that claims under the unfair prong be 'tethered to some legislatively declared policy.'") (quoting *Cel-Tech, 20 Cal. 4th at 186*). While Plaintiff alleges damage to consumers because Defendants charge higher prices, Plaintiff cites no authority that the balancing test applies when the case is brought by a *competitor*, as is the case here. *See* *Almasi v. Equilon Enters., LLC, Case No. 10-cv-3458-EJD, 2012 U.S. Dist. LEXIS 128623, at *26 (N.D. Cal. Sept. 10, 2012)* ("Plaintiffs do not cite any authority indicating that the balancing test applies in cases **[*29]** where a plaintiff is not a consumer."). Ultimately, Plaintiff brings this case not on behalf of consumers, but on behalf of competitors such as itself. Accordingly, the traditional balancing test does not apply in this case.

Finally, the Court finds that Plaintiff does not satisfy the *Cel-Tech* tethering test. In *Cel-Tech*, the California Supreme Court explained that "a practice may be deemed unfair even if it is not specifically proscribed by some other law." *20 Cal. 4th at 180*. The California Supreme Court acknowledged, however, that in "determin[ing] whether the challenged conduct is unfair within the meaning of the unfair competition law[,] courts may not apply purely subjective notions of fairness." *Id. at 184*. Thus, "[w]hen a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id. at 187*.

Following *Cel-Tech*, courts have found that a UCL claim based on the "unfair" prong **[*30]** cannot survive when it is premised on the same actions as an alleged statutory antitrust claim. In *Chavez v. Whirlpool Corp.*, the California Court of Appeal found:

> If the same conduct is alleged to be both an antitrust violation and an 'unfair' business act or practice for the same reason -- because it unreasonably restrains competition and harms consumers -- the determination that the conduct is not an unreasonable restraint of trade necessarily implies that the conduct is not 'unfair' toward consumers. To permit a separate inquiry into essentially the same question under the unfair competition law would only invite conflict and uncertainty and could lead to the enjoining of procompetitive conduct.

93 Cal. App. 4th 363, 375, 113 Cal. Rptr. 2d 175 (2001). Applying *Chavez*, the Ninth Circuit in an unpublished decision upheld the dismissal of a UCL claim based on the "unfair" prong, finding that "[w]here . . . the same conduct is alleged to support both a plaintiff's federal antitrust claims and state-law unfair competition claim, a finding that the conduct is not an antitrust violation precludes a finding of unfair competition." *LiveUniverse, Inc. v. MySpace, Inc., 304 Fed. Appx. 554, 558 (9th Cir. 2008)*; *see also* *GreenCycle Paint, Inc. v. PaintCare, Inc., Case No. 15-cv-4059-MEJ, 2016 U.S. Dist. LEXIS 47960, at *31 (N.D. Cal. Apr. 8, 2016)* ("where the same conduct alleged to be **[*31]** unfair under the UCL is also alleged to be a violation of another law, the UCL claim rises or falls with the other claims") (internal quotation omitted); *DocMagic, Inc. v. Ellie Mae, Inc., 745 F. Supp. 2d 1119, 1147 (N.D. Cal. 2010)* ("DocMagic has not alleged facts showing that Ellie Mae's conduct violated the *Sherman Act* by posing a dangerous threat of monopoly in the DPS market. As a result, any claims DocMagic might be asserting under the UCL's unfair prong necessarily fail as well."); *ChriMar Sys., 72 F. Supp. 3d at 1020* ("Courts have held that where the alleged conduct does not violate the antitrust laws, a claim based on unfair conduct under the UCL cannot survive."); *Los Gatos Mercantile, Inc. v. E.I. Dupont de Nemours & Co., Case No. 13-cv-1180-BLF, 2014 U.S. Dist. LEXIS 133540, at *32 (N.D. Cal. Sept. 22, 2014)* ("Because Plaintiffs have failed to state a claim for an antitrust violation, they have failed to state a claim under the UCL based upon the alleged anticompetitive conduct.").[3]

Such is the case here, where Plaintiff's claims are based on the same actions that underlie the statutory violations, namely the creation of duplicate traffic schools in order to flood the marketplace. (FAC ¶ 112.) Because Plaintiff's factual allegations do not rise to a violation of the *Sherman Act* or the *Cartwright Act*, those same factual allegations cannot **[*32]** give rise to a UCL claim based on the "unfair" prong. Accordingly, Plaintiff's UCL claim is DISMISSED without prejudice.[4]

---

[3] In its supplemental brief, Plaintiff argues that *Chavez* was limited to cases involving safe harbors. (Pl.'s Supp. Br. at 3.) As discussed above, however, numerous courts have applied *Chavez*, focusing on whether the plaintiff is relying on the same factual allegations for both the statutory violation and a UCL claim based on the "unfair" prong. The above cases did not involve conduct which was condoned under antitrust laws.

[4] In the alternative, Defendants argue that Plaintiff's UCL claim must be dismissed because it falls within the safe harbor of the DMV traffic school statutes, namely *California Vehicle Code § 11200 et seq.* *Section 11202(a)(7)(B)* provides: "A person may be an operator for more than one traffic school if (i) the schools have a common owner or owners and (ii) the schools share a single established business address." Defendants thus contend that its ownership of multiple traffic schools is expressly permitted by statute, and cannot support a UCL claim. (Defs.' Mot. to Dismiss at 15.) The Court need not reach this issue because the Court finds that the UCL claim fails for separate reasons. The Court observes, however, that the Supreme Court in *Cel-Tech* found that "[i]f the Legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination." *20 Cal. 4th at 182*.

E. Remedies

Defendants also challenge the remedies sought by Plaintiff, namely restitution under the UCL, injunctive relief, and punitive damages. (Defs.' Mot. to Dismiss at 18-20.) As the Court finds that the complaint must be dismissed for failure to state a claim, the Court need not address these arguments. The Court notes, however, that Plaintiff generally did not address the arguments made and legal authority cited by Defendants, particularly with respect to whether restitution is available for lost profits or if punitive damages are cognizable under any of Plaintiff's claims. In the future, Plaintiff must address the arguments made or the Court will presume that Plaintiff agrees with Defendants' position.

IV. CONCLUSION

For the reasons stated above, the Court GRANTS Defendants' motion to dismiss. Plaintiff may file an amended complaint within **thirty days** of the date of this **[*33]** complaint.

IT IS SO ORDERED.

Opinion

[*426] MEMORANDUM OPINION

LEWIS A. KAPLAN, *District Judge*.

This class action involves futures contracts for natural gas. The complaint alleges that the three defendants — Total Gas & Power North America ("Total Gas"), its French parent company Total, S.A. ("Total S.A."), and Total Gas & Power, Ltd. ("Total Ltd."), a U.K. subsidiary of Total S.A. — unlawfully manipulated various indices that are used to price natural gas contracts traded at four hubs in the Southwestern United States. The plaintiff, the City of Long Beach, California, ("Long Beach"), claims that this conduct caused it to pay artificially inflated prices for natural gas that it purchased at one such hub.[1] On behalf of itself and others similarly situated, Long Beach raises claims for damages under *Section 2 of the Sherman Act*, restitution under the *California Unfair Competition Law ("UCL")*, **[**2]** and restitution and damages under the law of unjust enrichment.[2]

Before the Court are two motions to dismiss, one filed jointly by Total S.A. and Total Ltd. and one filed by Total Gas. The former presents issues concerning personal jurisdiction. The latter raises the question whether this alleged manipulation of a futures market states a legally sufficient antitrust claim. I hold that it does not. For the following reasons, both motions are granted.

Facts

The facts alleged are fairly straightforward but require some understanding of abstract financial instruments called derivatives. The Court begins by explaining what those instruments are and how they are used in the natural gas trade.

Derivatives and the Natural Gas Trade

"The term 'derivative,' as it is used in today's financial world, refers to a financial instrument that derives its value from the price of an underlying instrument or index."[3] Like other financial instruments, derivatives can be bought and sold. This case involves two types of derivatives: futures and swaps.

Futures Contracts and Natural Gas Pricing

A futures contract is a derivative that requires the holder to purchase a physical commodity in the future. **[**3]** The futures at issue here were for the purchase of natural gas throughout the following month at one of four delivery hubs in the Southwestern United States (the "Southwestern Hubs"). Those hubs are known as Southern California Gas Co. ("SoCal"), El Paso Natural **[*427]** Gas Co., Permian Basin ("Permian"), West Texas, Waha ("Waha"), and El Paso San Juan Basin ("San Juan").[4]

There are two common ways of pricing natural gas, quantities of which typically are referred to in millions of British Thermal Units ("MMBtu"). Some contracts use a predetermined "fixed rate," such as $4.10 per MMBtu, that remains the same throughout the life of the contract.[5] Others use a "floating rate," which is a rate pegged to a variable quantity that changes over time.[6] At the four Southwestern Hubs, the floating rates in some natural gas contracts incorporated hub-specific indices.[7] According to the complaint, companies called Platts and NGI calculated a "Monthly Index Price" for each hub by averaging the price of natural gas sold on the hub (as reported by the traders) during the last five business days of each month, a period called "bidweek."[8] Other floating rate contracts

---

[1] Complaint, Dkt. 1 ("Cmplt.") ¶ 17.

[2] The laws of several jurisdictions theoretically could apply to the unjust enrichment claim. For reasons explained later in this opinion, the Court assumes without deciding that the claim arises under New York law.

used the New York Mercantile Exchange ("NYMEX") **[**4]** price, which was derived from trading prices at Henry Hub, Louisiana.[9] The Monthly Index Prices essentially were local rates specific to each of the four hubs, while the NYMEX price was used as a nationwide benchmark.

Swap Contracts

The second type of derivative relevant to this case is a "swap" contract. A swap is an "instrument[] whereby two counterparties agree to exchange cash flows on two financial instruments over a specific period of time."[10] "These are (1) a 'reference obligation' or 'underlying asset' such as a security, a bank loan, or an index, and (2) a benchmark loan, generally with an interest rate set relative to a commonly used reference rate such as the London Inter—Bank Offered Rate ('LIBOR')."[11] Swaps are purely financial transactions and do not involve the exchange of commodities. While parties often enter into swaps because they have exposure to the underlying commodity and wish to hedge various types of risk, others simply are speculating. Typically, swaps making use of different cash flows are executed when the party with the less favorable cash flow pays the difference between the two quantities to the counterparty.[12]

This case involves swaps referenced to the price of natural gas. Many involved exchanging the Monthly Index Price at a Southwestern Hub with the NYMEX price.[13] To understand how this works, imagine that Alice believes that the NYMEX price for natural gas in June will be lower than the SoCal Monthly Index Price. Alice can bet on this belief by swapping the SoCal price for the NYMEX price. If the NYMEX price is lower, the counterparty will pay Alice the difference between the prices multiplied by the quantity covered by the transaction. If instead the SoCal Monthly Index Price is lower, Alice **[*428]** will pay the difference to the counterparty. Neither party needs to own or purchase natural gas to enter into this transaction, and no natural gas changes hands.

For the swaps at issue in this case,[14] everything turned on the Monthly Index Price at one of the Southwestern Hubs. Depending on the net position of a trader's swaps for a given month at a given hub, an increase or decrease in the Monthly Index Price for that hub would yield higher or lower profits on the swaps. Accordingly, if a swap trader could control the Monthly Index Price at a particular hub, that trader could increase **[**6]** its profits at will — at the expense of the counterparties to its swaps, and to the detriment of other traders whose financial instruments are priced according to the same Monthly Index Price. That, in essence, is what Long Beach claims happened here.

[14] These swaps are index and basis swaps, the differences between which are immaterial for the purposes of this opinion. For more information about these swaps, see *Harry v. Total Gas & Power North America, Inc., 889 F.3d 104, 108 (2d Cir. 2018)* (discussing the same contracts at issue in this case).

Total S.A. is a large oil and gas company headquartered in Paris that operates all over the world.[15] Total Ltd. is a subsidiary of Total S.A. based in London that directs Total S.A.'s global trading operations.[16] Total Gas is a subsidiary of Total S.A. headquartered in Houston, Texas and incorporated in Delaware that trades natural gas and related energy products in the United States and worldwide markets.[17] Long Beach alleges that Total Gas, through its trading activity, serves "to optimize market access for [Total S.A.'s] current and future natural gas production and reserves."[18] In furtherance of this purported goal, Total Gas purchases large quantities of natural gas products, and particularly liquefied natural gas, for export each year.[19]

In 2008, a natural gas trader at Total Gas in Houston named Aaron Hall founded the company's "West Desk."[20] Total Gas there executed trades of physical and financial natural **[**7]** gas securities — meaning, as explained above, futures and swaps.[21] From at least July 1, 2009 through July 31, 2012 (the "Class Period"), the West Desk traded futures and swaps pertaining to natural gas sold at the Southwestern Hubs.[22] Hall ran the West Desk until approximately September 2011.[23] At that time, a veteran West Desk trader named Therese Tran took over as its leader.[24]

Total Gas's Alleged Scheme

According to the complaint, the traders at Total Gas's West Desk, in Long Beach's word, "manipulated" the Monthly Index Prices for natural gas at the Southwestern Hubs during the Class Period. The alleged scheme involved two steps. Prior to certain bidweeks, Total Gas traded large volumes of futures and swaps using floating rates and taking positions on a Monthly Index Price at one of the four Southwestern Hubs relative to the NYMEX price.[25] **[*429]** Then, during those bidweeks, Total Gas traded large volumes of natural gas futures using fixed rate prices.[26] According to the complaint, these fixed rate futures offset the floating rate futures that Total Gas had purchased prior to bidweek.[27] This "flattening" process generally meant that Total Gas owned no natural gas **[**8]** at the end of the month.[28]

[28] *Id.*

According to the complaint, Total Gas lost $2.09 million on its bidweek trades during the Class Period.[29] Allegedly, these trades often were made at artificially high or low prices, meaning that Total Gas could have gotten better rates.[30] However, the complaint claims that Total Gas ultimately made over $9 million in profit from its net trading activity throughout the Class Period.[31] This occurred because the bidweek trades moved the Monthly Index Prices in directions favorable to Total Gas's positions on its pre-bidweek trades.[32] The purported scheme allegedly succeeded because the West Desk traded a large volume of natural gas during the bidweek periods. Often, it was on one side or the other of transactions accounting for more than 50 percent of the total volume traded at a given hub during the measured period.[33]

These fairly abstract allegations can be explained more easily with an example. As alleged in the complaint: Prior to the July 2011 bidweek, the West Desk entered into numerous futures and swaps that left it with a "long" position of 14,000,000 MMBtu.[34] Total Gas would profit on these trades if the SoCal Monthly Index Price for August **[**9]** 2011 was high.[35] And the Monthly Index Price would be high if, during bidweek, buyers of fixed price futures at SoCal agreed to pay high fixed rates.[36] When SoCal bidweek arrived, Total Gas bought natural gas futures accounting for 48 percent of the reported trading volume during the week.[37] It paid higher prices than other buyers on these trades.[38] When all was said and done, Total Gas lost money on its bidweek trades, but it pushed up the SoCal Monthly Index Price and profited accordingly on its pre-bidweek trades.[39] The complaint alleges that Hall and Tran orchestrated this scheme on behalf of Total Gas with the knowing and willful participation of other traders at the West Desk and, to a vaguely described but apparently limited degree, the knowledge of other individuals at Total Gas.[40] It does not allege that Total S.A. or Total Ltd. played any role in orchestrating the scheme or even knew of its existence while it was ongoing. Two allegations in some sense pertain to those defendants and the price manipulation scheme. One is that some time after 2009, Total Gas's president sent a memorandum to, and met with, unnamed executives of both foreign entities "about **[*430]** [Total Gas's] very high market **[**10]** share at several trading points and resultant regulatory scrutiny."[41] The other is that Total Gas's president "alerted senior management at [Total S.A. and Total Ltd.]" shortly after receiving a June 10, 2012 "whistleblower" email informing him about the West Desk scheme."[42]

Prior Legal Actions

Before turning to Long Beach's claims, the Court notes three earlier proceedings — two regulatory and one judicial — involving the allegations outlined above.

Regulatory Investigations

In June 2012, Matt Wilson, a West Desk trader, contacted the Commodity Futures Trading Commission ("CFTC") and the Federal Energy Regulatory Commission ("FERC"), both of which are federal agencies, and each of which has a degree of regulatory authority over natural gas derivative trading.[43] Wilson told both agencies that Total Gas had been engaged in market manipulation — namely, the scheme described above.[44] Both agencies investigated these allegations.[45]

The CFTC issued a report on December 7, 2015 finding that Total Gas had manipulated some of the markets at issue during three of the months included in the Class Period.[46] Long Beach alleges that it did not discover, and could not have discovered, **[**11]** that Total Gas had engaged in any market manipulation prior to this date.[47] On April 28, 2016, FERC published a report alleging that Total Gas had manipulated rates at all four Southwestern Hubs 38 times during the Class Period — each manipulation representing one month for one market.[48] FERC found, and Long Beach now alleges, that Total Gas's manipulation of the Monthly Index Prices cost other market participants at least $89 million.[49]

The Harry Litigation

On December 10, 2015, on the heels of the CFTC report, Michael Anastasio filed a class action against Total Gas in this Court on behalf of all individuals who traded derivatives at the Southwestern Hubs during the Class Period.[50] Anastasio, and eventually several other plaintiffs, brought claims under the *Commodity Exchange Act ("CEA")* and *Section 2 of the Sherman Act* against Total Gas, Total S.A., and Total Ltd.[51]

On March 27, 2017, Judge Koeltl dismissed the complaint.[52] He concluded first that the plaintiffs had failed to state a claim under the CEA.[53] Then, turning to the Sherman Act claim, he held that the plaintiffs lacked antitrust

51 *Id.* Ultimately, Anastasio withdrew from the case and Alan Harry and several other plaintiffs took his place. Consolidated Amended Class Action Complaint, *id.*, Dkt. 58 (S.D.N.Y. May 12, 2016).

52 *Harry v. Total Gas & Power N. Am., Inc., 244 F. Supp. 3d 402, 406 (S.D.N.Y. 2017)*, *aff'd as modified*, *889 F.3d 104 (2d Cir. 2018)*.

standing.[54] The **[*431]** premise of this holding was that none **[**12]** of the plaintiffs alleged to have traded natural gas contracts on any of the four Southwestern Hubs.[55] For essentially the same reason, the court held that the plaintiffs lacked Article III standing.[56] The court declined to consider an argument by Total S.A. and Total Ltd. that it lacked personal jurisdiction over them.[57]

The Second Circuit affirmed in *Harry v. Total Gas & Power North America, Inc*.[58] The panel disagreed with the district court's conclusion that the plaintiffs lacked Article III standing, finding it "within the realm of possibility" — though not "plausible" — that "prices at U.S. natural gas hubs are so interconnected that manipulation at any of the hubs amounts to manipulation of all of them, including the one on which the prices of their derivative contracts were based."[59] However, the court agreed with the district court that the plaintiffs lacked antitrust standing because none of them alleged to having traded on the Southwestern Hubs or at "artificial prices" as a result of the alleged market manipulation.[60] Likewise, it agreed with the district court that the plaintiffs had failed to state a claim under the CEA.[61] It did not pass on the merits of the Section 2 claim **[**13]** or resolve the personal jurisdiction issue.

The Complaint

On September 19, 2019, Long Beach filed this complaint against Total Gas, Total S.A., and Total Ltd. on behalf of itself and all those who held a contract that settled against the NGI or Platts Monthly Index Prices for natural gas at SoCal, Permian, Waha, or San Juan during the Class Period. It asserts claims against Total Gas for monopolization and attempted monopolization under *Section 2 of the Sherman Act*.[62] In addition, Long Beach asserts claims against Total Gas on behalf of all members of the class who reside in California for a violation of the California UCL and the law of unjust enrichment.[63]

Count V asserts claims against Total S.A. and Total Ltd. on theories that they "controlled" Total Gas and that Total Gas was their *alter ego* or agent.[64] It is not entirely clear whether the "controlled" language in this claim is intended to mean that Long Beach is *directly* liable on the first four counts, each of which mentions only Total Gas, or instead is intended to assert only that they are *derivatively* liable on the *alter ego* and agency theories. The Court construes Count V to assert theories of direct and derivative liability against Total **[**14]** S.A. and Total Ltd.

Discussion

Total S.A. and Total Ltd. argue that (1) the Court lacks personal jurisdiction over them and (2) Long Beach fails to allege plausibly that they are directly or derivatively liable for the alleged wrongdoing of Total Gas. Total Gas argues that (1) Long Beach lacks Article III standing, (2) its claims are untimely, (3) it has not pled antitrust standing as required for its Sherman Act claims, (4) it in any event fails to state claims for unlawful monopolization or attempted monopolization, and (5) its UCL and unjust enrichment claims fail as a matter of law. Total S.A. and Total Ltd. join Total Gas's arguments. The Court addresses **[*432]** these arguments only as needed to resolve the motions.

I. Personal Jurisdiction over Total S.A. and Total Ltd.

Personal jurisdiction is a court's authority to require a non-consenting party to appear before it. A federal court may exercise personal jurisdiction over a defendant where (1) it properly was served, (2) jurisdiction is authorized by statute, and (3) jurisdiction is not prohibited by the Constitution.[65] "A plaintiff 'must establish the court's jurisdiction with respect to each claim asserted.'"[66]

Total S.A. and **[**15]** Total Ltd. argue on various grounds that the court lacks a statutory basis for asserting personal jurisdiction against them and, in any event, that the exercise of such jurisdiction would be unconstitutional.

A. Personal Jurisdiction Arising from Total S.A.'s and Total Ltd.'s Contacts

1. Statutory Jurisdiction

i. Sherman Act Section 2 Claims

Long Beach contends that the Court may assert personal jurisdiction over Total S.A. and Total Ltd. with respect to the federal antitrust claims under either *Section 12 of the Clayton Act* or *Federal Rule of Civil Procedure 4(k)(2)*.

a. Section 12 of the Clayton Act

Section 12 of the Clayton Act states:

> "Any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found."[67]

"Because the service of process provision [the second clause] applies only to 'such cases' described in the [venue provision, the first] clause, the Second Circuit has concluded that nationwide service of process is permissible 'only in cases in which [the] venue provision is satisfied.'"[68]

---

[65] *See, e.g., Waldman v. Palestine Liberation Org., 835 F.3d 317, 327 (2d Cir. 2016)*.

[66] *Charles Schwab Corp. v. Bank of Am. Corp., 883 F.3d 68, 83 (2d Cir. 2018)* (quoting *Sunward Elecs., Inc. v. McDonald, 362 F.3d 17, 24 (2d Cir. 2004)*).

[67] *15 U.S.C. § 22*.

Total S.A. and Total Ltd. concede that they were served in accordance with *Section 12*. They argue, however, that the venue component is not satisfied because they are not "inhabitant[s]" of the Southern District of New York, they are not "found" here, and they do not "transact[] business" here.[69]

Total S.A. is based and incorporated in France and Total Ltd. is based and incorporated in the United Kingdom. The complaint does not allege that either has offices, employees, or any significant presence or operations in the Southern District of New York or even the United States. They plainly are not inhabitants of the district and are not "found" here within the meaning of *Section 12*. Long Beach does not challenge these findings; it focuses only on the "transacts business" prong.

In no significant way does the complaint allege that Total S.A. or Total Ltd. transacts business in the Southern District of **[*433]** New York. "The Supreme Court has construed the phrase 'transacts business,' as used in the venue provision of *Clayton Act Section 12*, to refer to 'the practical, everyday business or commercial concept of doing business or carrying on business of any substantial character.'"[70] This requires "some amount **[**17]** of business continuity and certainly more than a few isolated and peripheral contacts with the particular judicial district."[71] Long Beach alleges that Total S.A. has made securities filings with the New York offices of the Securities and Exchange Commission ("SEC"), that an agent of Total S.A. once paid a $500,000 settlement to the SEC through a New York bank account, and that Total S.A.'s CEO and CFO gave a strategy presentation in New York City in 2018.[72] None of these sporadic contacts, each of which concerned only Total S.A., comes close to satisfying the "transacts business" standard for either defendant. Nor does anything else alleged in the complaint.

Long Beach argues that "the relevant geographic area for assessing minimum contacts under the *Clayton Act* is 'the United States as a whole, not just New York.'"[73] But *Section 12*'s venue requirement is not concerned with "minimum contacts" at all. It unambiguously authorizes suit only "in the judicial district" where the defendant is an inhabitant or "in any district" where it is found or transacts business. As Long Beach's own authority makes clear, nationwide contacts are relevant to the different question of "whether the exercise of personal **[**18]** jurisdiction would comport with due process."[74]

b. Rule 4(k)(2)

Federal Rule of Civil Procedure 4(k)(2) authorizes the exercise of personal jurisdiction over defendants sued under federal law where "the defendant is not subject to jurisdiction in any state's courts of general jurisdiction" and "exercising jurisdiction is consistent with the United States Constitution and laws." By arguing that *Rule 4(k)(2)* applies, Long Beach necessarily concedes that Total S.A. and Total Ltd. are not subject under state law to the

jurisdiction of any state court.[75] This inquiry thus merges with the constitutional analysis, to which the Court turns momentarily.[76]

ii. State Law Claims

Rule 4(k)(1)(A) authorizes the exercise of personal jurisdiction over a defendant where doing so would be consistent with the laws of the forum state.[77] Under New York's applicable long arm statute, **[*434]** *C.P.L.R. § 302(a)*, a court may exercise jurisdiction over a non- domiciliary based on its conduct if, among other possibilities not relevant here, the defendant "transacts any business within the state."[78] "To determine the existence of jurisdiction under *section 302(a)(1)*, a court must decide (1) whether the defendant 'transacts any business' in **[**19]** New York and, if so, (2) whether [the] cause of action 'aris[es] from' such a business transaction."[79]

By failing entirely to respond to Total S.A. and Total Ltd.'s argument that the Court lacks a statutory basis under New York law to exercise personal jurisdiction with respect to the state law claims, Long Beach has waived its opposition. In any event, nothing in the complaint permits an inference that Total S.A. or Total Ltd. transacts business in New York. The sporadic contacts referenced above do not suffice and have no relationship to the state law claims. To the extent that the complaint alleges that Total S.A. and Total Ltd. acted in any manner relevant to this lawsuit — a point to which the Court will return — it alleges that they acted from France and the United Kingdom to **[**20]** control Total Gas's conduct in Texas, California, and New Mexico.

2. Constitutional Minimum Contacts

The Constitution sets an outer limit on a court's authority to assert personal jurisdiction over a defendant. Litigants have a substantive due process right not to be haled into court unless they have minimum contacts with the forum in which the court sits.[80]

i. Which Forum?

---

[75] Long Beach asserts that neither foreign defendant is "jurisdictionally present in *any* of the fifty states sufficient to subject them to general jurisdiction in *any* district." Dkt. 53 at 4. While it makes this assertion to invoke the first requirement of *Rule 4(k)(2)*, it evidently misreads the phrase "courts of general jurisdiction" to mean "general personal jurisdiction," which is a type of personal jurisdiction rather than a type of court. Nonetheless, the Court concludes — and therefore does not survey the laws of all fifty states — that Long Beach's failure to assert that any state court would exercise jurisdiction over Total S.A. or Total Ltd. is a concession that none would.

[76] The Court need not, and does not, address Total S.A. and Total Ltd.'s argument that they were not served in accordance with *Rule 4(k)*.

[77] *See, e.g., Spiegel v. Schulmann, 604 F.3d 72, 76 (2d Cir. 2010)*.

[78] *N.Y. C.P.L.R. § 302(a)(1)*.

> Other possibilities include that the defendant contracts anywhere to supply goods or services in the state, that under certain circumstances it commits a tortious act within the state, and that it owns, possesses, or uses real property situated within the state. *N.Y. C.P.L.R. § 302(a)*. Nothing alleged in the complaint supports the exercise of jurisdiction on any of these bases, and Long Beach does not argue otherwise.

[79] *Best Van Lines, Inc. v. Walker, 490 F.3d 239, 246 (2d Cir. 2007)* (citation omitted).

[80] *See, e.g., Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)*.

The parties disagree over the appropriate forum to be considered in the minimum contacts analysis. Total S.A. and Total Ltd. contend that New York is the proper jurisdiction for the federal and state law claims. Long Beach argues that the Court instead must ask whether the foreign defendants have minimum contacts with the United States as a whole.

With respect to each claim, the appropriate forum for assessing minimum contacts depends on which statute authorizes personal jurisdiction. That question, in turn, depends upon which statute authorizes service of process.

Several courts in this circuit, including this one, have held that where a claim "arises under federal law and a federal statute authorizes nationwide service of process, the relevant contacts for determining personal jurisdiction are contacts with **[**21]** the United States as a whole."[81] Although the Second Circuit has not yet passed on this issue, the Court reaches this conclusion once again for the reasons stated in a prior opinion.[82] In appropriate circumstances, *Section 12 of the Clayton Act* and *Rule 4(k)(2)* both may authorize nationwide service of process for federal **[*435]** antitrust claims. Thus, regardless of which provision is treated as having authorized service of process here, the relevant minimum contacts for the federal antitrust claims are with the United States as a whole. Personal jurisdiction with respect to the state law claims, however, is another matter.

Personal jurisdiction over these claims would flow through *Rule 4(k)(1)(A)*, which does not authorize nationwide service of process. Where a defendant is served in accordance with *Rule 4(k)(1)(A)*, a court must look instead to the defendant's contacts with the forum state to determine whether it has personal jurisdiction.[83]

The United States is the appropriate forum for contacts associated with the federal claims, and New York is the appropriate forum for contacts associated with the state law claims. Nonetheless, because the law is unsettled with respect to the federal claims, the Court will consider whether either set **[**22]** of claims bears a sufficient nexus to either forum.

ii. Minimum Contacts

The minimum contacts test can be satisfied where the forum jurisdiction's courts have general or specific jurisdiction over a defendant.[84] General jurisdiction authorizes suit against a corporation in forums where it is "essentially at home," which ordinarily means its place of incorporation or principal place of business.[85] The complaint alleges that Total S.A.'s home is France and that Total Ltd.'s home is the United Kingdom. As neither entity is at home in New York or the United States, the Court lacks general jurisdiction over them.

Specific jurisdiction considers whether a sufficient nexus exists between the forum and the defendant's conduct giving rise to the claims.[86] "When there is no such connection, specific jurisdiction is lacking regardless of the extent of a defendant's unconnected activities in the [forum]."[87]

---

[81] *Dennis, 345 F. Supp. 3d at 201* (quoting *Gucci Am., Inc. v. Weixing Li, 768 F.3d 122, 142 n.21 (2d Cir. 2014)*).

[82] The issue ultimately does not matter here because, as explained, Long Beach fails to allege that Total S.A. or Total Ltd. has minimum contacts with either the United States as a whole or with New York specifically.

[83] *See, e.g., Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 673 F.3d 50, 60 (2d Cir. 2012)*.

[84] *See, e.g., Gucci, 768 F.3d at 134*.

[85] *See BNSF Ry. Co. v. Tyrrell, 137 S. Ct. 1549, 1552, 198 L. Ed. 2d 36 (2017)*.

[86] *See, e.g., Bristol-Myers Squibb Co. v. Superior Court of California, San Francisco Cty., 137 S. Ct. 1773, 1781, 198 L. Ed. 2d 395 (2017)*.

[87] *Id.*

The requirements of specific jurisdiction are not met here, either with respect to New York or the United States. The simple reason is that virtually all the conduct described in the complaint is attributed to Total Gas. The only arguably relevant allegations involving Total **[**23]** S.A. or Total Ltd. are as follows:

• Total S.A. is the parent corporation of Total Gas, which is located in the United States;[88]

• Total Gas "is part of [Total S.A.'s] trading group" and Total Ltd. "effectively[] directs Total [S.A.'s] global trading operations";[89]

• In 2009, after Total Gas's president reviewed a report noting that the West Desk had engaged in a high volume of trading during bidweeks, he sent a memorandum to, and met with, executives of Total S.A. "about [Total Gas's] very high market share at several trading points and resultant regulatory scrutiny";[90]

[*436] • On June 10, 2012, shortly after receiving a "whistleblower" email from a trader at the West Desk, Total Gas's president "alerted senior management at Total [S.A.] and [Total Ltd.] and asked [Total Gas's] Vice President of Risk Control . . . to analyze the West Desk's bidweek trading";[91]

• Total Ltd. and Total S.A. "participated in biweekly steering committee meetings with [Total Gas] personnel where they discussed [Total Gas] trading issues, including positions and market views";[92]

• Officers at Total Ltd. "participated in setting the trading strategies and budget of [Total Gas], and approved certain staffing decisions as well as **[**24]** the structure of [Total Gas's trade floor]."[93]

None of these allegations meaningfully links Total S.A. or Total Ltd. to New York. And, as noted above, the few facts involving New York have no connection to this lawsuit. Long Beach has not attempted to explain, and cannot explain, why the Total S.A. chief executive's one presentation in New York City or the company's filings with the SEC have anything to do with allegations that Total Gas, operating in Texas, manipulated prices used at four natural gas markets in the Southwest.[94]

The same is true as to Total S.A.'s and Total Ltd.'s contacts with the United States as a whole. Nothing in the complaint permits an inference that the facts giving rise to this lawsuit arose in any significant sense from these defendants' sparse contacts with the United States.[95] The story told by the complaint is that traders at Total Gas's West Desk devised and perpetrated the alleged scheme without the authorization, control, or even contemporaneous knowledge of Total S.A. or Total Ltd. The two vaguely described communications between Total Gas's president and one or both of the foreign corporations do not suggest otherwise.

---

[88] Cmplt. ¶¶ 18, 20.

[89] *Id.* ¶¶ 19, 20.

[90] *Id.* ¶¶ 92-94. The allegation refers not to actual or threatened regulatory scrutiny, but to the possibility of regulatory scrutiny that the president apparently had inferred from the internal report he reviewed.

[91] *Id.* ¶ 96.

[92] *Id.* ¶ 125.

[93] *Id.*

[94] Likewise, the allegations that a wholly owned subsidiary of Total S.A. once made a $500,000 disgorgement payment to the SEC's New York office at Total S.A.'s direction, and that Total Gas reached a consent agreement with the SEC, have no asserted or apparent nexus to this lawsuit. *See id.* ¶ 16.

[95] Whether these defendants played a role in the alleged scheme through their own conduct is a separate question from whether they are *alter egos* of Total Gas and should be treated as a single entity for jurisdictional purposes. That question is addressed below.

In sum, **[**25]** even if the Court had the statutory authority to assert personal jurisdiction over Total S.A. or Total Ltd., the Constitution would forbid it.

iii. Pendent Personal Jurisdiction

As noted above, the minimum contacts test directs courts to consider whether a defendant has sufficient contacts with the forum. "The doctrine of pendent personal jurisdiction provides that 'where a federal statute authorizes nationwide service of process, and the federal and state-law claims derive from a common nucleus of operative fact, the district court may assert personal jurisdiction over the parties to the related state-law claims even if personal jurisdiction is not otherwise available.'"[96] The Court may not exercise pendent personal jurisdiction with respect to the state law claims because **[*437]** personal jurisdiction is lacking with respect to the federal claims.

B. Personal Jurisdiction Based on Total Gas's Contacts

The analysis thus far has considered whether the Court has personal jurisdiction over Total S.A. or Total Ltd. based on their own contacts with New York and the United States. Long Beach argues also that the Court should assert personal jurisdiction over the foreign entities based on Total Gas's **[**26]** contacts with these forums. Its argument is premised on an *alter ego* or, alternatively, an agency theory.

1. Alter Ego Theory

"[T]he exercise of personal jurisdiction over an alter ego corporation does not offend due process."[97] Thus, if a court finds that one corporation is the *alter ego* of another, it may disregard the corporate form for minimum contacts analysis. Long Beach argues that both Total Gas and Total Ltd. are *alter egos* of Total S.A.[98] On that ground, and based on the conduct attributed to Total Gas, it asks the Court to assert personal jurisdiction over the foreign defendants.

For an *alter ego* relationship to exist under federal common law, the controlling corporation "must have used the corporate entity to perpetrate a fraud or have so dominated and disregarded the corporate entity's form that the entity primarily transacted the [subservient entity's] personal business rather than its own corporate business."[99] Although this rule is for *alter ego* liability, courts apply it also to the question of whether an *alter ego* relationship exists for the purpose of personal jurisdiction.[100]

New York law[101] requires "a showing of fraud or . . . complete control **[**27]** by the dominating corporation that leads to a wrong against third parties."[102] But where, as here, the question is whether a court may exercise

---

[101] "The law of the forum state governs where, as here, neither party alleges that the law of a different state would control and differs from New York law." *See, e.g., VTech Holdings, Ltd. v. Pricewaterhouse Coopers, LLP, 348 F. Supp. 2d 255, 262 n.48 (S.D.N.Y. 2004)*.

personal jurisdiction over an alleged *alter ego*, New York courts apply a "'less onerous standard' than that necessary for equity to pierce the corporate veil for liability purposes under New York law."[103] Whether an analogous "less onerous standard" exists for federal common law is unclear.[104]

The antitrust claims are governed by federal common law because they arise **[*438]** under federal law. The question of which law applies to the state law claims is more complicated.[105] Rather than decide an issue that the parties did not brief adequately, the Court considers both standards with respect to the state law claims.

The complaint offers little more than bare allegations of control. It says virtually nothing about the management of the defendants, explains only minimally their relationships with each other, and does not detail what role, if any, Total S.A. or Total Ltd. played in Total Gas's operations. Nor, as explained above, does the complaint allege in any meaningful way that either **[**28]** foreign defendant was involved in the conduct at issue in this case. The few paragraphs that mention Total S.A. and Total Ltd. do not permit an inference that any defendant exercised, as New York law requires, "complete control [over another defendant] . . . that leads to a wrong against third parties," even under the "less onerous standard" that applies in the context of personal jurisdiction. This same problem dooms the *alter ego* theory under federal common law's "dominated and disregarded" standard, whether or not that doctrine employs also a "less onerous standard" at the personal jurisdiction stage.[106]

The complaint fails to plead that, for the purpose of personal jurisdiction, any defendant is the *alter ego* of another.

2. Principal-Agent Theory

Long Beach alleges also that Total Gas is an agent of Total S.A. and Total Ltd. and that the Court therefore should attribute Total Gas's contacts to the foreign defendants for jurisdictional purposes. The parties fail to argue that any particular law should govern the existence of a principal-agent relationship. For the reasons explained in its *alter ego* analysis, the Court applies the federal common law of agency to the federal **[**29]** claims, and it considers both the federal and New York standards as to the state law claims. That said, the issue here turns not on the standards themselves, but on certain limitations common to both standards.

---

[102] *Wm. Passalacqua Builders, Inc. v. Resnick Developers S., Inc., 933 F.2d 131, 138 (2d Cir. 1991)*.

[103] *D. Klein & Son, Inc. v. Good Decision, Inc., 147 F. App'x 195, 196 (2d Cir. 2005)* (quoting *Marine Midland Bank, N.A. v. Miller, 664 F.2d 899, 904 (2d Cir. 1981)*).

[104] *Compare* sources cited in note 100 *supra* (not purporting to apply a less onerous standard), *with In re Platinum & Palladium Antitrust Litig., No. 1:14-cv-9391 (GHW), 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *47 & n.23 (S.D.N.Y. Mar. 28, 2017)* (noting, without distinguishing between federal and New York law, that some courts apply a "less onerous" standard but questioning whether they should).

[105] If the Court's jurisdictional authority arose from *Rule 4(k)(1)(A)*, New York's *alter ego* rule arguably would apply because the basis for the Court's jurisdiction would be state law. But the reason that the Court would look to state law is *Rule 4(k)(1)(A)*'s instruction to do so. One could argue that *Rule 4(k)(1)(A)* simply incorporates state law and that federal common law therefore applies. Moreover, if the Court chose to exercise personal jurisdiction pendent to the federal claims — pendent personal jurisdiction is federal common law — the federal doctrine arguably would apply. The Court need not and does not pass on the merits of these theories because the parties did not consider them.

[106] Total S.A. and Total Ltd. make factual assertions in declarations and in their memoranda supporting their argument that Total Gas is a separate corporate entity. *See, e.g.*, Dkt. 45 at 16-19. The Court does not consider these assertions in holding that the complaint does not permit a finding of *alter ego*.

"It is well established that a defendant can 'purposefully avail itself of a forum by directing its agents or distributors to take action there.'"[107] Although the Second Circuit has "not clearly delineated the showing necessary before an agent's contacts will be imputed to its principal for purposes of personal jurisdiction under the *Due Process Clause*," it has articulated several principles explaining when such a finding is inappropriate.[108] Under both New York and federal law, "a defendant must have purposefully availed itself of the **[*439]** privilege of doing business in the forum" for a principal-agent theory of jurisdiction to apply.[109] At least under New York law, this means that "the alleged agent acted in New York for the benefit of, with the knowledge and consent of, and under some control by, the nonresident principal."[110]

After stating these requirements in the context of a parent corporation and a broker-dealer subsidiary that sold securities on the parent's behalf, the Second Circuit held that **[**30]** "an agency relationship . . . could establish personal jurisdiction over the parent in a state in which the parent 'indirectly' sells the securities."[111] For that theory to succeed, the plaintiff must do more than "generally allege[] that [the parent] controlled or otherwise directed or materially participated in the operations of the broker-dealer[], and reaped proceeds or other financial benefits from the brokerdealer[' s] sales of [the relevant] financial instruments."[112] "The Second Circuit has credited allegations of principal-agent relationships, for example, where a plaintiff alleged that corporate officers 'benefitted from [the] corporation's in-forum activities and exercised extensive control over [the] corporation in the transaction underlying the suit.'"[113]

These same principles control here and make clear that Long Beach does not sufficiently allege that the foreign **[**31]** defendants purposefully availed themselves of the benefit of doing business in New York or the United States with respect to the claims at issue. Largely for the reasons explained above, the complaint does not allege plausibly that any defendant exercised control, extensive or otherwise, over any other defendant with regard to the facts giving rise to this lawsuit. Nor does it allege that Total Gas acted with the knowledge or consent of Total S.A. or Total Ltd. Its threadbare allegations of control fall short under federal law and New York law.

* * *

The Court lacks personal jurisdiction over Total S.A. and Total Ltd. with respect to all the claims asserted against them in the complaint.

II. Direct or Derivative Liability of Total S.A. and Total Ltd.

---

[107] *Charles Schwab, 883 F.3d at 84* (quoting *Daimler AG v. Bauman, 571 U.S. 117, 135 n.13, 134 S. Ct. 746, 187 L. Ed. 2d 624 (2014)*).

[108] *See* *id. at 85*.

[109] *Id.* (citation and quotation marks omitted).

[110] *Id.* (quoting *Grove Press, Inc. v. Angleton, 649 F.2d 121, 122 (2d Cir. 1981)*).

[111] *Id. at 85-86*.

[112] *Id. at 86*.

[113] *Dennis v. JPMorgan Chase & Co., 439 F. Supp. 3d 256, 2020 U.S. Dist. LEXIS 25556, 2020 WL 729789, at *2 (S.D.N.Y. 2020)* (quoting *Charles Schwab, 883 F.3d at 85*).

Although this language suggests that the standard for finding a principal-agent relationship is similar to that for piercing the corporate veil, the two standards differ at least insofar as the latter requires a finding of "abuse of control." *See* *Itel Containers Int'l Corp. v. Atlanttrafik Exp. Serv. Ltd., 909 F.2d 698, 702 (2d Cir. 1990)* (distinguishing the standards on this ground).

As noted previously, Counts I through IV are pled solely against Total Gas. Count V alleges that Total S.A. and Total Ltd. are liable under three theories: that (1) they controlled Total Gas with respect to the relevant conduct, which the Court interprets as a theory of direct liability; (2) Total Gas and Total Ltd. are *alter egos* of Total S.A., and Total Gas is an *alter ego* also of Total Ltd.; and (3) Total Gas and Total Ltd. are agents of **[**32]** Total S.A., and Total Gas is an agent also of Total Ltd.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'"[114] "A **[*440]** claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged."[115]

Total S.A. and Total Ltd. argue that the complaint fails to plead facts sufficient to support any of the three theories of liability.

A. Direct Liability

In its personal jurisdiction analysis, the Court held that the complaint pleads virtually no facts linking Total S.A. or Total Ltd. to the alleged misconduct. The same is true for present purposes, and the Court therefore holds that the claims against the foreign defendants fail under *Rule 12(b)(6)*. Other than the allegations enumerated in the Court's minimum contacts analysis, nothing in the complaint suggests that Total S.A. or Total Ltd. played any meaningful role in the alleged antitrust or state law violations. Threadbare allegations that Total S.A. exercised "control" over its subsidiaries or that it operated "as a single entity with [Total **[**33]** Gas]" do not suffice to state a claim for relief.

B. Alter Ego Liability

The Court already has concluded that the complaint fails to plead sufficiently under federal common or New York law that any defendant is the *alter ego* of another for the purposes of personal jurisdiction. The Court now conducts the *alter ego* analysis for liability purposes.

1. Sherman Act Section 2 Claims

The federal common law standard for *alter ego* liability applies to the federal claims for the reasons explained in the personal jurisdiction analysis. Under that standard, the Court concluded that the complaint fails to demonstrate that any defendant is the *alter ego* of another for the purposes of personal jurisdiction.[116] Because the analysis is the same for liability purposes, the conclusion is the same, as well.

2. State Law Claims

At the personal jurisdiction stage, the Court analyzed the principal-agent question under New York law because neither party argued that a different jurisdiction's law should apply. For liability purposes, however, Total S.A. and Total Ltd. argue that New York's choice of law rules require the application of Delaware law. The Court agrees.

---

[114] *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

[115] *Id.*

[116] The Court reached this conclusion regardless of whether the standard applied for purposes of personal jurisdiction is "less onerous" than that applied for liability purposes.

"[U]nder New York choice of law principles, the law of the **[**34]** state of incorporation determines when the corporate form will be disregarded and liability will be imposed on shareholders."[117]

"To prevail on an alter ego claim under Delaware law, a plaintiff must show (1) that the parent and the subsidiary 'operated as a single economic entity' and **[*441]** (2) that an 'overall element of injustice or unfairness . . . [is] present."[118] "Operating as a 'single entity' requires showing the parent entity's 'complete domination and control' to such an extent that the subsidiary entity 'no longer has legal or independent significance of its own.'"[119] "A plaintiff seeking to persuade a Delaware court **[**35]** to disregard the corporate structure faces 'a difficult task.'"[120] "Although the question of domination is generally one of fact, courts have granted motions to dismiss as well as motions for summary judgment in favor of defendant parent companies where there has been a lack of sufficient evidence to place the alter ego issue in dispute."[121]

Largely the reasons explained in the Court's analysis of the *alter ego* issue under the standards of federal common law ("dominated and disregarded the corporate entity's form") and New York law ("complete control"), the complaint falls short of Delaware's "complete domination and control" standard. Long Beach has not alleged plausibly any facts suggesting that any defendant meaningfully dominated or controlled another. Although it asserts that Total S.A. is the parent of Total Gas and Total Ltd., it barely discusses their relationships with each other, either in general or in a way that elaborates helpfully on the role, if any, that the foreign defendants played in the conduct relevant to this case. Showing that the defendants operated as a single economic entity requires more than skeletal allegations of "extraordinary administrative control" **[**36]** and "biweekly steering committee meetings" involving "trading issues."[122] In addition, the complaint does not explain how there would be any injustice or unfairness in declining to hold Total S.A. or Total Ltd. liable for the actions of Total Gas. There are no allegations that Total Gas would be unable to satisfy a judgment or that Long Beach could not prosecute its case in the absence of the foreign defendants.[123]

C. Principal-Agent Liability

---

[117] *Fletcher v. Atex, Inc., 68 F.3d 1451, 1456 (2d Cir. 1995)* (brackets, quotation marks, and citation omitted).

Total S.A. and Total Ltd. assert that the outcome is the same under New York law. *See* Dkt. 45 at 24 n.10. Long Beach takes no position on the choice of law issue, but its authority applies Delaware law. *See* Dkt. 37 at 31 (citing, *e.g., Bentivoglio v. Event Cardio Grp., Inc., No. 18-cv-2040 (PKC), 2019 U.S. Dist. LEXIS 206381, 2019 WL 6341130, at *5 (S.D.N.Y. Nov. 27, 2019)* (applying Delaware law); *Allison v. Clos-ette Too, L.L.C., No. 14-cv1618 (LAK), 2015 U.S. Dist. LEXIS 2826, 2015 WL 136102, at *3 (S.D.N.Y. Jan. 9, 2015)* (same)). While the parties' failure to assert a true conflict ordinarily is grounds for applying forum law, the Court applies Delaware law because both assume that it applies and rely exclusively on Delaware authority.

[118] *Id. at 1457* (quoting *Harper v. Delaware Valley Broadcasters, Inc., 743 F. Supp. 1076, 1085 (D. Del. 1990)*).

[119] *Bentivoglio, No. 18-cv-2040 (PKC), 2019 U.S. Dist. LEXIS 206381, 2019 WL 6341130, at *5* (quoting *Wallace ex rel. Cencom Cable Income Partners II, Inc. v. L.P. Wood, 752 A.2d 1175, 1183-84 (Del. Ch. 1999)*).

[120] *Fletcher, 68 F.3d at 1458* (quoting *Harco Nat. Ins. Co. v. Green Farms, Inc., C.A. No. 1131, 1989 Del. Ch. LEXIS 114, 1989 WL 110537, at *4 (Del. Ch. Sept. 19, 1989)*)

[121] *Id.*

[122] *See* Cmplt. ¶ 125.

[123] In its personal jurisdiction analysis, the Court concluded under New York law that Long Beach had failed to show sufficiently that any defendant was the *alter ego* of another. It did so under the "less onerous" version of New York's *alter ego* standard that applies in the context of personal jurisdiction. Accordingly, if New York law applied at the liability stage, the ordinary level of onerousness would apply, and the Court would reach the same conclusion for the same reasons.

The principal-agent question requires similarly the application of different laws to different claims. Federal common law applies once again to the federal claims. Because neither party argues for the application of any particular law to the state law claims, New York's agency doctrine applies.

1. Sherman Act Section 2 Claims

Federal ***antitrust law*** provides that an alleged principal can be held liable for the unlawful conduct of its agent.[124] "[U]nder general rules of agency law," and with regard to *Section 2 of the Sherman Act* **[*442]** specifically, "principals are liable when their agents act with apparent authority."[125] "Apparent authority is the power to affect the legal relations of another person by transactions with third persons, professedly as agent for the **[**37]** other, arising from and in accordance with the other's manifestations to such third persons."[126] "Under an apparent authority theory, '[l]iability is based upon the fact that the agent's position facilitates the consummation of the fraud, in that from the point of view of the third person the transaction seems regular on its face and the agent appears to be acting in the ordinary course of the business confided to him.'"[127]

As noted, the complaint alleges that traders at Total Gas's West Desk perpetrated the scheme over several years. But it fails to allege that they did so at any direction from, or with the contemporaneous knowledge of, Total S.A. or Total Ltd. It does not allege that either foreign defendant monitored or failed to monitor the traders, that they authorized any of the trades at issue, or even that they created indirectly conditions that helped facilitate the misconduct. Moreover, those counterparties' alleged injuries arose not from the trades themselves, but from the effect of those trades on the Monthly Index Prices.[128]

Long Beach places significant weight on its allegation that the foreign defendants "were closely involved in, and exerted significant control **[**38]** over, [Total Gas's] operations."[129] It claims, among other things not relevant to trading activity, that Total S.A. set risk limits for Total Gas's traders, that Total S.A. "retained extraordinary administrative control over the daily operation of critical business components such as IT systems and [Total Gas's] trading book," that "trading issues" were discussed in "biweekly steering committee meetings" involving unidentified "officers" of the three defendants, and that "officers" at Total Ltd. "participated in setting the trading strategies and budget of [Total Gas], and approved certain staffing decisions as well as the structure of [Total Gas's] trade floor."[130] "General allegations of corporate ownership, combined marketing, shared board membership, and so forth are insufficient to establish a principal-agent relationship between corporate entities."[131] And setting aside the

---

[124] *See Am. Soc. of Mech. Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 572-74, 102 S. Ct. 1935, 72 L. Ed. 2d 330 & n.11 (1982)*.

[125] *Id. at 565-66*.

[126] *Id. at 566 n.5* (quoting *Restatement (Second) of Agency § 8 (1957)*).

[127] *Id. at 566* (quoting *RESTATEMENT (Second) of Agency § 261 (1957)*).

[128] In fact, Long Beach alleges that during bidweeks, Total Gas either overpaid for natural gas or sold its own natural gas at a discount. If true, these facts would mean that the counterparties *benefitted* from the alleged scheme, at least with respect to these trades.

[129] Cmplt. ¶ 125.

[130] *Id.*

> Long Beach provides slightly more detail about the "officers," **[**39]** "meetings," and alleged relationships among the defendants in its opposition memorandum. Dkt. 53 at 28-30. The Court does not credit these allegations to the extent that they are not found in the complaint, but whatever additional specificity they provide would make no material difference.

vagueness of these claims, the complaint fails to connect them to the trading activity at issue in this case. Liability on an apparent authority theory "is based upon the fact that the putative agent's position *facilitates the consummation of the fraud*."[132]

[*443] This final point suggests an additional problem: Long Beach has not pled sufficiently that Total Gas acted with the apparent authority of the foreign defendants. As noted at the outset, "[a]pparent authority is the power to affect the legal relations of another person by transactions with third persons, *professedly as agent for the other* [*i.e.*, the principal], *arising from and in accordance with the other's manifestations to such third persons."*[133] The complaint contains no allegations that Total Gas professed to be an agent for Total S.A. or Total Ltd. when engaging in the relevant activity. Nor does it contain allegations that Total S.A. or Total Ltd. made manifestations to third persons permitting them to conclude that Total Gas was acting under their authority and that such conclusions influenced the third parties' actions. In fact, the complaint **[**40]** does not allege that Total S.A. or Total Ltd. had *any* interactions with relevant third persons, such as the counterparties to Total Gas's trades, other traders on the affected markets, Long Beach itself, or those who compiled the NGI and Platts Monthly Index Prices. For this reason too, the principal-agent theory fails.

2. State Law Claims

New York law is no different on this point. Like federal courts, the New York Court of Appeals applies the "apparent authority" standard taken from *Section 8 of the Restatement (Second) of Agency*.[134] The Court of Appeals "has made it clear that 'apparent authority is dependent upon verbal or other acts *by a principal* which reasonably give an appearance of authority to conduct the transaction.'"[135] The complaint makes no such allegation here. It does not allege even that Total S.A. or Total Ltd. knew about the trades giving rise to this lawsuit until after they were made.

* * *

Total S.A. and Total Ltd.'s motion to dismiss is granted. The Court turns now to Total Gas's motion, which the foreign defendants join.

III. Article III Standing

Standing is a doctrine rooted in *Article III, Section 2 of the Constitution*, which restricts the federal judicial power to "Cases" and "Controversies." To have standing to sue in federal court, a "plaintiff must **[**41]** have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision."[136] The plaintiff bears the burden of alleging clearly facts that, if true,

---

[131] *In re LIBOR-Based Fin. Instruments Antitrust Litig., No. 11-md-2262 (NRB), 2015 U.S. Dist. LEXIS 149629, 2015 WL 6696407, at *21 (S.D.N.Y. Nov. 3, 2015)* (citing *Fletcher, 68 F.3d at 1459-62*).

[132] *Hydrolevel Corp., 456 U.S. at 566* (emphasis added, citation, brackets, and quotation marks omitted).

[133] *Id. at 566 n.5* (emphasis added) (quoting *RESTATEMENT (SECOND) OF AGENCY § 8 (1957)*).

[134] *Fletcher, 68 F.3d at 1462*.

[135] *Id.* (emphasis in original) (quoting *Greene v. Hellman, 51 N.Y.2d 197, 204, 412 N.E.2d 1301, 433 N.Y.S.2d 75 (1980)*).

[136] *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*.

would satisfy each of these elements.[137] Where, as here, a plaintiff sues on behalf of a putative class, the standing inquiry looks only to the plaintiff's own alleged injuries, and not to those of the proposed class members.[138]

In the *Harry* litigation, the plaintiffs claimed to have traded natural gas contracts not incorporating the Monthly Index Prices at locations other than the Southwestern Hubs.[139] The Second Circuit **[*444]** held that they had Article III standing to sue for injuries arising from the alleged manipulation of the Monthly Index Prices.[140] It reached this holding by crediting as "within the realm of possibility" the plaintiffs' theory that "prices at U.S. natural gas hubs are so interconnected that manipulation at any of the hubs amounts to manipulation of all of them."[141]

The Court is bound by this holding. The complaint is based on the same facts as the *Harry* litigation. **[**42]** Long Beach, like the plaintiffs there, alleges that it traded natural gas contracts during the time when Total Gas allegedly manipulated the Monthly Index Prices. Moreover, and unlike the *Harry* plaintiffs, Long Beach alleges that it traded at one of the Southwestern Hubs (SoCal) and that its contracts incorporated the SoCal Monthly Index Prices.

Total Gas argues that Long Beach has not alleged that it suffered an economic loss. In its view, the complaint permits an inference that Long Beach *profited* as a result of the inflation and deflation of the SoCal Monthly Index Prices. It contends that to demonstrate standing, Long Beach would need to account for all of its trades and show that it was a net loser. Total Gas concedes, however, that the Second Circuit found standing in *Harry* where the plaintiffs made no such showing.[142] More fundamentally, "the fact that an injury may be outweighed by other benefits, while often sufficient to defeat a claim for damages, does not negate standing."[143]

At least at this pleading stage, Long Beach has Article III standing to pursue claims premised on trading at the four Southwestern Hubs.[144]

IV. Antitrust Standing

"It is a well-established principle **[**43]** that, while the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate 'standing.'"[145] Assuming the existence of an antitrust violation, courts ask (1) whether the plaintiff has "suffered antitrust injury" as a consequence of the violation, and (2)

---

137 *Id.*

138 *See, e.g., Denney v. Deutsche Bank AG, 443 F.3d 253, 263-64 (2d Cir. 2006)*; 1 WILLIAM B. RUBENSTEIN, NEWBERG ON CLASS ACTIONS § 2:3 (5th ed.).

139 *See Harry, 889 F.3d at 109*.

140 *Id. at 111*.

141 *Id.*

142 *See* Dkt. 20 at 10 n.7 (citing *Harry, 889 F.3d at 110-11*).

143 *Denney, 443 F.3d at 265*; *see also id.* ("For purposes of determining standing, we 'must . . . construe the complaint in favor of the complaining party." (quoting *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*).

144 This conclusion says nothing about the question of whether Long Beach is typical, or could be an adequate representative, of a class of individuals who traded on the three hubs where it does not allege to having traded. These questions are not at issue here and are considered properly under *Rule 23(a)*. *See NECA-IBEW Health & Welfare Fund v. Goldman Sachs & Co., 693 F.3d 145, 165 (2d Cir. 2012)*.

145 *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 436 (2d Cir. 2005)*.

whether the plaintiff would be an "efficient enforcer[] of the antitrust laws."[146] This case turns on the first of these criteria.

An antitrust injury is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful."[147] Determining whether a plaintiff has suffered an antitrust injury involves a three-step process:

> **[*445]** "[1] the plaintiff must 'identify the practice complained of and the reasons such a practice is or might be anticompetitive'; then [2] the court must 'identify the actual injury the plaintiff alleges' by 'look[ing] to the ways in which the plaintiff claims it is in a worse position as a consequence of defendant's conduct'; and finally, [3] the court must 'compare the anticompetitive effect of the specific practice at issue to the actual injury the plaintiff alleges.'"[148]

In *Harry*, the Second Circuit held that **[**44]** the plaintiffs failed to satisfy this three-pronged test.

> "Plaintiffs argue that they adequately alleged that they were part of the same undifferentiated natural gas commodities and commodities derivatives market as Defendants, that they were harmed by artificial prices at Henry Hub and on NYMEX, and that Defendants' manipulations required a connection between regional hubs, and as such trading at Henry Hub was inextricably intertwined with their trading.
>
> Set aside whether they were part of the same market as Defendants (they were not) or whether they have shown that Plaintiffs' alleged injuries were the fulcrum for Defendants' scheme (they were not); Plaintiffs do not even present evidence that they traded at 'artificial prices.' There is no actual injury the Plaintiffs allege, let alone a connection between Defendants' unlawful conduct and that non-injury. Any further analysis of the connection between regional hubs and Henry Hub or comparisons with other case law on antitrust standing is superfluous."[149]

Long Beach does not allege that it traded natural gas contracts incorporating the Permian, Waha, or San Juan Monthly Index Prices or that it traded at those hubs. Thus, just as in *Harry* ***[**45]*** , "[t]here is no actual injury that the [plaintiff] allege[s]" with respect to the trading on those markets.[150] Long Beach does not have antitrust standing to pursue claims based on the manipulation of the Monthly Index Prices at those three hubs. Unlike the *Harry* plaintiffs, however, Long Beach does allege that it traded derivatives at SoCal that were based on the SoCal Monthly Index Price. The Court applies the three-step inquiry to this portion of its claim.

For the first question, Long Beach alleges that Total Gas manipulated the Monthly Index Prices at SoCal during the Class Period. It posits that this practice was anticompetitive because it caused entities that bought or sold natural gas contracts on this market to pay higher prices for their purchases or receive lower prices for their sales.

"Generally, when consumers, because of a conspiracy, must pay prices that no longer reflect ordinary market conditions, they suffer injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful."[151] Based in part on this principle, the Second Circuit found the "anticompetitive practice" factor satisfied where several competitors **[**46]** allegedly conspired manipulate an index price.[152] But

[150] *See id.*

[151] *Gelboim, 823 F.3d at 772* (citation and quotation marks omitted).

part of the reason the conduct alleged was anticompetitive was that it involved a *conspiracy*, which *Section 1 of the Sherman Act* **[*446]** forbids. Here, Long Beach claims that Total Gas acted alone. It attempts to proceed on a *monopoly* theory and raises its claim under *Section 2*.

"*Section 2*, by contrast [to *Section 1*], is aimed primarily not at improper conduct but at a pernicious market structure in which the concentration of power saps the salubrious influence of competition.[153] In plain English, this eloquent language means that *Section 2* is not an all-purpose weapon against shady business practices. It instead takes aim at those who acquire monopoly power, "the power to control prices or exclude competition," and use it to injure competition.[154] "[T]he possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct*."[155]

This final point is critical. *Section 2* is not intended to punish "the proverbial inventor of the better mousetrap" or one who succeeds by virtue of a superior product or business acumen.[156] If it were, the statute would stifle legitimate business competition — the opposite of its goal. "Courts . . . have been engaged for **[**47]** years in a case-by-case process of distinguishing between conduct that reflects a 'purpose or intent to exercise [monopoly] power,' and that which reflects no more than aggressive competition on the merits, competition that properly may utilize the advantages of size, but that may not employ the power derived from a dominant position in the market."[157] The aim is to prohibit the use of monopoly power to gain competitive advantages at the expense of others or victimize consumers by supracompetitive prices enabled by eliminating competition.

Long Beach's theory is that Total Gas influenced the price for natural gas, and thereby increased its profits on pre-bidweek derivatives trading, by manipulating the Monthly Index Prices by means of its bidweek transactions. This theory loosely resembles a monopoly allegation in the limited sense that Total Gas influenced natural gas prices and thereby injured Long Beach, which was forced to pay inflated rates. But if that were all that were required under *Section 2*, a plaintiff could state a monopolization claim by alleging that a defendant influenced the Monthly Index Prices by coercively threatening NGI and Platts to set them according to its will or by **[**48]** some other conduct having nothing to do with competition. Coercive threats no doubt would be unlawful on different legal theories — as may be the manipulation alleged in the complaint. But the problem with both allegations is that the type of anticompetitive conduct prohibited by *Section 2* is lacking.

An example borrowed from the context of predatory pricing helps underscore this point. In *Brooke Group Limited v. Brown & Williamson Tobacco Corp.*,[158] the Supreme Court discussed *Section 2 of the Sherman Act*'s prohibition on predatory pricing, a practice that at times is a **[*447]** gateway to the acquisition or maintenance of monopoly power.[159] The essence of a predatory pricing claim is that the defendant "priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant

[159] *Id. at 222*.

market."[160] As this language makes plain, the claim cannot lie where a defendant merely lowers its prices. Instead, the plaintiff must show that the defendant lowered its prices "below an appropriate measure of its . . . costs" in circumstances where there exists "a dangerous probability" that the defendant will recoup its short-term losses once the competition has **[**49]** been eliminated and it possesses a monopoly.[161] The critical point is that price cutting, which ordinarily is a pro-competitive practice, is not a violation of *Section 2* unless it has a significant anticompetitive effect — *i.e.*, it augurs the willful acquisition, maintenance, or exploitation of monopoly power.

As the foregoing discussion makes clear, the market manipulation is not alleged to have derived from Total Gas's size or its share of market power. Instead, it derived from strategically timed trades that, as far as the complaint alleges, any other participant in the market could have made. While the intent and effect of those trades was to influence prices, Long Beach does not allege that they involved the willful attainment, maintenance, or exercise of monopoly power. Accordingly, it has failed to identify an anticompetitive practice of a type which the antitrust laws were intended to prohibit. That is fatal to its Section 2 claims. But there is more.

This conclusion that Long Beach has failed to allege anticompetitive conduct flows also into the analysis of the second and third steps of the antitrust injury analysis. As to the second, the actual injury that Long Beach **[**50]** alleges is that, as a buyer of natural gas, it lost money because the alleged market manipulation moved the Monthly Index Prices in directions unfavorable to its contracts. While this injury is claimed to have been the consequence of Total Gas's conduct, Long Beach has failed to show that the conduct was anticompetitive within the meaning of the antitrust laws.[162] Likewise, the third step is not satisfied because Long Beach has failed to allege an *anticompetitive* effect given its failure to allege any anticompetitive practice.[163]

The Section 2 claims for monopolization and attempted monopolization are dismissed for lack of antitrust standing.

[*448] *V. State Law Claims*

Finally, Total Gas contends that the complaint fails to state a claim under the California UCL and New York's law of unjust enrichment.

A. California UCL Claim

The UCL authorizes claims for restitution by private parties injured by "unfair competition," which means "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by [a separate statute]."[164] "Each prong of the UCL is a separate and distinct theory of

---

[160] *Id.*

[161] *Id. at 222-24*; *cf. id. at 224* ("It is axiomatic that the antitrust laws were passed for the protection of *competition*, not *competitors."* (citation and quotation marks omitted)).

[162] Total Gas argues for the first time in its reply brief that Long Beach did not suffer an antitrust injury because "it is merely a go-between for natural gas it buys from an upstream purchaser and sells to downstream consumers, with the cost that it paid borne *entirely* by the latter." Dkt. 50 at 4 (citing *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 110 S. Ct. 2807, 111 L. Ed. 2d 169, (1990)*). "Issues raised for the first time in a reply brief are generally deemed waived." *Connecticut Bar Ass 'n v. United States, 620 F.3d 81, 91 n.13 (2d Cir. 2010)*.

[163] Long Beach notes that at least one court in this district has held that a monopoly claim of this nature involves an antitrust injury. *See* *Merced Irrigation Dist. v. Barclays Bank PLC, 165 F. Supp. 3d 122, 133 (S.D.N.Y. 2016)* ("[The plaintiff] has pled an antitrust injury causally linked to [the defendant's] practices: it is a purchaser of electricity on the daily markets in which it alleges it paid higher supra-competitive prices or received lower sub-competitive prices as a result of [the defendant's] rate-manipulation."). For the foregoing reasons, the Court respectfully disagrees.

liability."[165] Long Beach seeks restitution on the **[**51]** theory that Total Gas engaged in "unfair, unconscionable, deceptive or fraudulent acts and practices" causing injury to its property.[166]

The UCL has a standing requirement for suits by private plaintiffs. The Court begins there.

1. UCL Standing

The UCL's private right of action authorizes suit by "a person who has suffered injury in fact and has lost money or property as a result of . . . unfair competition."[167] "To satisfy the . . . standing requirements imposed by [the voter initiative that created them], a party must . . . (1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that that economic injury was the result of, i.e., *caused by*, the unfair business practice or false advertising that is the gravamen of the claim."[168]

For the first prong, the phrase "injury in fact" has the same meaning as it does for Article III standing.[169] The requirement that a plaintiff have "lost money or property," however, is unique to the UCL. The loss of money or property can be shown in "innumerable ways."[170] And "the quantum of lost money or property necessary to show [UCL] standing is only so much as would suffice to establish **[**52]** injury in fact."[171] That said, a plaintiff must "allege or prove an identifiable monetary or property injury."[172] In this way, "the lost money or property requirement is more difficult to satisfy than that of injury in fact."[173]

The "as a result of prong "requires a showing of a causal connection or reliance on the alleged misrepresentation."[174] In effect, the statute incorporates ordinary principles of actual and proximate causation.[175]

With respect to trading at SoCal, the complaint alleges that Long Beach suffered an injury in fact and lost money by paying inflated natural gas prices as a result of Total Gas's conduct. Long Beach has standing under the UCL to pursue its claims based on this trading for the same reasons it has standing under Article III.

[*449] The question of whether Long Beach has UCL standing to pursue its claims based on trading at the Permian, Waha, or San Juan hubs is trickier. The Second Circuit held that the *Harry* plaintiffs had Article III standing premised on the alleged manipulation of indices used at hubs where they did not trade because it was "within the

[175] *See id. at 887-88*.

realm of possibility" that "prices at U.S. natural gas hubs are so interconnected that manipulation at any **[**53]** of the hubs amounts to manipulation of all of them."[176] This holding necessarily entailed a finding that any entity that traded at any U.S. natural gas hub during the Class Period suffered an injury in fact with respect to the alleged price manipulation at Permian, Waha, and San Juan. The Court is bound by this precedent; the UCL's injury in fact requirement is met.

However, this does not mean that Long Beach has made the "more difficult" showing that it "lost money or property" as a result of these trades.[177] Long Beach did not trade at Permian, Waha, or San Juan. And it does not attempt to explain how a finder of fact could determine whether it lost any money or property in connection with the defendants' alleged manipulation at those markets. While the interconnectedness theory suffices under Article III (though barely), it is not enough under the UCL. Long Beach's failure to "allege or prove an identifiable monetary or property injury" requires the Court to dismiss this claim as it pertains to Permian, Waha, and San Juan.[178]

Far from helping Long Beach, *Harry* dooms its cause. Although the Second Circuit concluded that the plaintiffs had Article III standing on their interconnectivity **[**54]** theory, it held several times that this theory was not "plausible" for Rule 12(b)(6) purposes.[179] In fact, the court affirmed the dismissal of the CEA and *Sherman Act* claims *because* this theory was implausible. It observed that "[o]nly speculation" could allow it to infer whether the plaintiffs had lost money as a result of the alleged manipulation of indices at hubs where they did not trade.[180] Further, it concluded that allegations of this nature could not demonstrate even that the plaintiffs had "traded at 'artificial prices' on other markets.[181] For that reason, the court held, for the purpose of antitrust standing, that "[t]here is no actual injury the Plaintiffs allege, let alone a connection between [the defendants'] unlawful conduct and that non-injury."[182] The same reasoning applies here, where Long Beach makes no effort to explain how the manipulation of the index prices at Permian, Waha, or San Juan hubs plausibly could have caused it to pay artificially inflated prices at SoCal, the one market where it claims to have traded.

2. Entitlement to Restitution

Plaintiffs who prevail under the UCL "are generally limited to injunctive relief and restitution."[183] Long Beach has UCL standing insofar **[**55]** as it claims injury with respect to trading at SoCal. However, "the standards for establishing standing under [the UCL] and eligibility **[*450]** for restitution . . . are wholly distinct."[184] Here, that distinction matters.

---

176 *Harry, 889 F.3d at 111*.

177 *See Kwikset, 246 P.3d at 887*.

178 *See id.*

179 *See Harry, 889 F.3d at 111, 114-15*.

180 *See id. at 115* ("We do not require that a plaintiff calculate damages at the pleading stage, but we certainly need some reason to believe that any damage has occurred at all. Only speculation could lead us to that belief here.").

181 *Id. at 116*.

182 *Id.*

183 *Zhang v. Superior Court, 57 Cal. 4th 364, 159 Cal. Rptr. 3d 672, 304 P.3d 163, 167 (Cal. 2013)* (citation omitted).

184 *Kwikset, 246 P.3d at 894*.

"Restitution under [UCL § 17203] is confined to restoration of any interest in 'money or property, real or personal, which may have been acquired by means of . . . unfair competition. '"[185] "A restitution order against a defendant thus requires both that money or property have been lost by a plaintiff, on the one hand, *and that it have been acquired by a defendant*, on the other."[186] "Compensatory damages are not recoverable as restitution."[187]

The complaint alleges that Total Gas profited as a result of its alleged market manipulation. It alleges also that the market manipulation caused Long Beach to lose money. It does not, however, connect the profit and the loss. There is no claim that Total Gas *acquired* any of the money that Long Beach lost or even that the two parties ever traded with each other. According to the complaint, Total Gas's profits came from the counterparties to its trades, and Long Beach's losses went to the counterparties to its trades.

Because Long Beach does not **[**56]** allege that Total Gas ever came to possess any of its money or property, and otherwise offers no theory as to how it might recover restitution, it fails to establish entitlement to that relief. It fails also to explain how it is entitled to any other form of relief that may be available under the UCL.[188] Its claim is dismissed.

B. New York Unjust Enrichment Claim

Long Beach asserts also a claim for unjust enrichment. It "seek[s] restitution with respect to, and/or disgorgement of, all illicitly obtained monies and profits obtained by [Total Gas] . . . either as damages or restitution."[189] The Court understands this as a claim for restitution and, to the extent that they differ from restitution and are permissible, damages.

The Court assumes without deciding that this claim arises under New York law. Total Gas posits that New York or California law might apply and argues that the outcome is the same under either.[190] In discussing this claim, Long Beach cites only to New York cases and thereby assumes that New York law applies.[191] "The law of the forum state governs where, as here, neither party alleges that the law of a different state would control and differs from New York law."[192]

---

[185] Zhang, 304 P.3d at 167 (quoting Cal. Bus. & Prof. Code § 17203).

[186] *Id.* (citation omitted, emphasis added).

[187] *Id.* (citation and brackets omitted); *see* Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 131 Cal. Rptr. 2d 29, 63 P.3d 937, 948 (Cal. 2003) ("[T]he UCL is not an all-purpose substitute for a tort or contract action. . . . [T]he remedies provided are limited. . . . [I]t is well established that individuals may not recover damages . . . [including] nonrestitutionary disgorgement.").

[188] The complaint "seek[s] restitution and/or monetary recoveries permitted under California law as referenced herein for these injuries." Cmplt. ¶ 154. The meaning of the "monetary recoveries" language is entirely unclear. The only form of monetary recovery permitted by the UCL that Long Beach has brought to the Court's attention is restitution.

[189] *Id.* ¶ 158.

[190] Dkt. 27 at 31-32 & n.19.

[191] Dkt. 37 at 33.

[192] VTech Holdings, 348 F. Supp. 2d at 262 n.48.

California's unjust enrichment doctrine is notoriously confusing. For many years, courts believed that "in California, there is not a standalone cause of action for 'unjust enrichment,' which is synonymous with 'restitution.'" Astiana v. Hain Celestial Grp., Inc., 783 F.3d 753, 762 (9th Cir. 2015). But like the discovery of a Lazarus taxon — a species long believed to be extinct that one day reappears — "the California Supreme Court [recently] has clarified California law, allowing an independent claim for unjust enrichment to proceed in an insurance dispute." ***Bruton v. Gerber Prods. Co., 703 F. App'x 468, 470 (9th Cir. 2017)*** (citing Hartford Cas. Ins. Co. v. J.R. Mktg., L.L.C., 61 Cal. 4th 988, 190 Cal. Rptr. 3d 599, 353 P.3d 319 (Cal. 2015)). Whether this

[*451] "In order to succeed on a claim for unjust enrichment under New York law, a plaintiff must prove that (1) defendant was enriched, (2) at plaintiff's expense, and (3) equity and good conscience militate against permitting defendant to retain what plaintiff is seeking to recover."[193] "The theory of unjust enrichment lies as a quasi-contract claim."[194] It "is available only in unusual situations when, though the defendant has not breached a contract nor committed a recognized tort, circumstances create an equitable obligation running from the defendant to the plaintiff."[195] While there need not be privity between the plaintiff and defendant, "a plaintiff cannot succeed on an unjust enrichment claim unless it has a sufficiently close relationship with the other party."[196] The New York Court of Appeals has found several times that a relationship between two commercial entities was "too attenuated" where they "simply had no dealings with each other."[197]

There is not a sufficiently close relationship between Total Gas and Long Beach. Insofar as the complaint alleges, they "simply had no dealings with each other" and were not aware of each other's existence during the Class Period.

Moreover, **[**58]** that lack of a relationship prevents Long Beach from pleading the elements of unjust enrichment. Total Gas's alleged enrichment did not come at Long Beach's expense, at least in the equitable sense contemplated by the unjust enrichment cause of action. It came at the expense of the counterparties to Total Gas's trades, who allegedly paid more money to Total Gas as a result of the price manipulation.[198] Traders like Long Beach that used the index prices but did not transact with Total Gas were collateral **[*452]** damage. In these circumstances, Long Beach fails to show how equity or good conscience make it any more entitled than Total Gas to money allegedly taken from third parties.[199]

Conclusion

---

cause of action is different from a quasi-contract claim for restitution remains disputed. *See* *Price v. L'Oreal USA, Inc., No. 17-cv-0614 (LGS), 2017 U.S. Dist. LEXIS 165931, 2017 WL 4480887, at *5 (S.D.N.Y. Oct. 5, 2017)*. **[**57]** But regardless of how it is captioned, California law permits a claim for restitution that resembles what other states, including New York, call unjust enrichment. *See* *Hartford, 353 P.3d at 326* (authorizing claims for restitution in the absence of a contract where "the enrichment obtained lacks any adequate legal basis and thus cannot conscientiously be retained" (citation and quotation marks omitted)).

[193] *Diesel Props S.r.l. v. Greystone Bus. Credit II LLC, 631 F.3d 42, 55 (2d Cir. 2011)* (citation and quotation marks omitted).

[194] *Beth Israel Med. Ctr. v. Horizon Blue Cross & Blue Shield of New Jersey, Inc., 448 F.3d 573, 586 (2d Cir. 2006)* (emphasis and citation omitted).

[195] *E.J. Brooks Co. v. Cambridge Sec. Seals, 31 N.Y.3d 441, 455, 80 N.Y.S.3d 162, 105 N.E.3d 301 (2018)* (citation omitted).

[196] *Georgia Malone & Co. v. Rieder, 19 N.Y.3d 511, 516, 973 N.E.2d 743, 950 N.Y.S.2d 333 (2012)*.

[197] *See* *id. at 516-18* (citing cases).

[198] These parties might not have a claim for unjust enrichment, either, because their relationship with Total Gas was created by the same contracts that incorporated the allegedly manipulated prices. "The existence of a valid and enforceable written contract governing a particular subject matter ordinarily precludes recovery in quasi contract for events arising out of the same subject matter." *Beth Israel, 448 F.3d at 587* (quoting *Clark-Fitzpatrick, Inc. v. Long Island R.R. Co., 70 N.Y.2d 382, 388-89, 516 N.E.2d 190, 521 N.Y.S.2d 653 (1987)*).

[199] As noted above, California's unjust enrichment or quasi-contract doctrine is similar to New York's. *See supra* note 195; *see also* *First Hill Partners, LLC v. BlueCrest Capital Mgmt. Ltd., 52 F. Supp. 3d 625, 634 (S.D.N.Y. 2014)* (noting the similarity). California's doctrine authorizes claims for restitution where a defendant was "unjustly enriched *at the expense of another."* *Hartford, 353 P.3d at 326* (emphasis added). As explained, the complaint does not allege that Total Gas was enriched at Long Beach's expense. The outcome would be the same under California law.

Total S.A.'s and Total Ltd.'s motion to dismiss [Dkt. 44] and Total Gas's motion to dismiss [Dkt. 26] are granted, all for failure to state a claim upon which relief may be granted and the first motion on the additional ground **[**59]** of lack of personal jurisdiction.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[ ] **Motions to Dismiss, Failure to State Claim**

A complaint must contain a short and plain statement that plausibly suggests a right to relief. *Fed. R. Civ. P. 8(a)(2)*. In ruling on a motion to dismiss, a court must accept all factual allegations in the complaint as true and draw all reasonable inferences in plaintiffs' favor, but need not accept legal conclusions, bare assertions, or conclusory allegations. The complaint does not need to include detailed factual allegations, but it must provide more than labels and formulaic recitations of the elements of the cause of action, and must present a story that holds together. If a complaint pleads facts that are merely consistent with liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Novel inventions are those not disclosed in the prior art. 35 U.S.C.S. § 102(a). The prior art includes anything that has already been patented or described in a printed publication, or that is in public use, on sale to the public, or otherwise available to the public. The patent application process is nonadversarial and relies on applicants to abide by their duty of disclosure, candor, and good faith. 37 C.F.R. § 1.56(a). If the applicant does not disclose (and the examiner does not find) all of the pertinent prior art, patents may issue to underserving inventions.

Patent Law > Statutory Bars > Public Use Bar > Elements

Patent Law > Double Patenting > Terminal Disclaimers

Patent Law > Infringement Actions > Defenses > Statute of Limitations

Patent Law > Nonobviousness > Elements & Tests > Prior Art

HN4[] Public Use Bar, Elements

As prior art accumulates, patent applicants face an increasingly crowded space. There are, however, ways to navigate around some of that prior art. For instance, inventors are granted a one-year grace period to file their patent applications after any public disclosure of their own invention. 35 U.S.C.S. § 102(b)(1). Continuation applications offer another work around: any applicant with a pending application may later tack on new, related claims. 35 U.S.C.S. § 120; 37 C.F.R. § 1.78(d). If the new claims are sufficiently related to the original claim, they are backdated and do not have to account for any prior art developed after the original application's filing date. 35 U.S.C.S. § 120; 37 C.F.R. § 1.78(d). The catch is that if the new claims are simple, obvious variations on the invention described in the original application, the applicant generally must file a terminal disclaimer (37 C.F.R. § 1.321(b)) relinquishing any portion of the new claim's term that would extend beyond the expiration date of the patent that is the subject of the pending application. In other words, if the applicant wants to use the original filing date for a simple and obvious variation on the original invention, the applicant has to accept the original expiration date, too.

Patent Law > Infringement Actions > Claim Interpretation > Scope of Claim

HN5[] Claim Interpretation, Scope of Claim

The claims define the exact boundaries beyond which no member of the public may pass without invading the exclusive rights of the patentee. Claims force the patentee to define precisely what his invention is.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN6[] Agriculture & Food, Federal Food & Drugs Act

Manufacturers that want to bring a new drug (patented or not) to market must first receive approval from the Food and Drug Administration. *21 U.S.C.S. § 355*; *42 U.S.C.S. § 262(a)*. Different kinds of drugs require different kinds of approvals. The process for biologic drugs starts when a manufacturer submits a Biologic License Application demonstrating that its new drug is (among other things) safe, pure, and potent. *42 U.S.C.S. § 262(a)(2)(C)(i)*. If the application is approved, the manufacturer enjoys a period of exclusivity during which it is the only entity that can market the drug for the approved purpose. *42 U.S.C.S. § 262(k)(7)*. Manufacturers often charge supracompetitive prices during this period in order to recoup their research and development costs and obtain a profit.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN7[] Defenses, Experimental Use & Testing

Eventually, the exclusivity following approval of a Biologic License Application ends. One way it can end is when a different manufacturer designs a biosimilar and submits (and has approved) an Abbreviated Biologic License Application. *42 U.S.C.S. § 262(k)(2)(A)*, *(k)(6)*. Abbreviated applications piggyback on existing approvals by identifying an approved reference biologic and demonstrating that there is no clinically meaningful difference between the reference biologic and the proposed biosimilar. *42 U.S.C.S. § 262(k)(2)(B)*, *(k)(4)*. Biosimilar manufacturers have to wait four years from the date the reference biologic was approved before submitting an abbreviated application, and the Food and Drug Administration has to wait twelve years from that same date before approving any abbreviated applications. *42 U.S.C.S. § 262(k)(7)(A)*, *(B)*. Once approved, the biosimilar can be marketed to the public—assuming the drug is not also patented. Prices tend to drop shortly after a new biosimilar is introduced.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN8[] Defenses, Experimental Use & Testing

Often, a drug is patented. The regulatory framework sets out a five-step series of required prelitigation exchanges (sometimes called the "patent dance") aimed at resolving patent disputes between the biosimilar manufacturer (the applicant) and the reference biologic's manufacturer (the sponsor). *42 U.S.C.S. § 262(l)*. Once the Food and Drug Administration accepts the application for review, the applicant is required to send information about its biosimilar to the sponsor (step one), 42 U.S.C.S. § 262(l)(2), the sponsor must send back a list of the patents (if any) that it believes would be infringed if the biosimilar was put on the market (step two), 42 U.S.C.S. § 262(l)(3)(A), the applicant explains why it believes those patents are invalid, unenforceable, or would not be infringed (step three), 42 U.S.C.S. § 262(l)(3)(B), and the sponsor responds (step four). 42 U.S.C.S. § 262(l)(3)(C). At the fifth step the applicant tells the sponsor the number of patents it would like test in litigation, and then both sides simultaneously exchange a list of patents. 42 U.S.C.S. § 262(l)(5). The sponsor then must initiate a lawsuit to determine the validity of the patents that appear on both lists (which, at most, includes double the number identified by the applicant, assuming no overlap). 42 U.S.C.S. § 262(l)(6).

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Healthcare Law > Medical Treatment > Medical Devices > Premarket Approval

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN9[] **Defenses, Experimental Use & Testing**

At the fifth step aimed at resolving patent disputes between the biosimilar manufacturer (the applicant) and the reference biologic's manufacturer (the sponsor), the applicant has to decide whether to launch "at risk" by putting its biosimilar on the market notwithstanding the prospect of a large damages award against it in patent litigation. Unlike the Hatch-Waxman Act (which governs small molecule drugs and imposes an automatic 30-month stay on Food and Drug Administration (FDA) approval whenever a brand-name manufacturer files an infringement lawsuit (and meets other prerequisites), 21 U.S.C.S. § 355(j)(5)(B)(iii)), the Biologics Price Competition and Innovation Act allows the FDA to approve an abbreviated biologic application despite a pending infringement suit and only requires the applicant to give the sponsor 180-days' notice before launching. 42 U.S.C.S. § 262(l)(8)(A). But even if the biosimilar manufacturer decides to launch at risk, the sponsor can still file a second lawsuit seeking a preliminary injunction (sometimes referred to as "second phase" litigation). 42 U.S.C.S. § 262(l)(8)(B).

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > Claims

HN10[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act prohibits the wrongful monopolization of interstate trade or commerce. 15 U.S.C.S. § 2. In order to state a claim under § 2, a plaintiff must allege (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Constitutional Law > Congressional Duties & Powers > Copyright & Patent Clause

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN11[] **Inequitable Conduct, Anticompetitive Conduct**

Both the patent and antitrust laws aim to encourage innovation, industry, and competition. *U.S. Const. art. I, § 8, cl. 8*. The former does this by dangling the carrot of a limited and temporary right to exclude others from practicing a patented invention and the latter by prohibiting conduct which unfairly tends to destroy competition itself. Even though patents operate like limited exceptions to the Sherman Act, they do not wholly insulate the patent owner from the antitrust laws. And since it is unlawful to use monopoly power—however lawfully obtained—to foreclose competition, to gain a competitive advantage, or to destroy a competitor, it is in some instances unlawful to use patents in ways that foreclose competition.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

HN12[] **Fundamental Freedoms, Freedom to Petition**

Antitrust liability has long attached wherever there was a pattern of baseless, repetitive claims that shows the administrative and judicial processes have been abused. Although the *First Amendment* protects the right to petition the government, it does not protect exercising that right as the means or the pretext for achieving substantive evils which the legislature has the power to control. But because immunized conduct cannot be aggregated with nonimmunized conduct without nullifying the immunity, it is necessary to identify protected and unprotected conduct. The first step is to identify any conduct that is immunized, and then, after that, to consider the evidence of the remaining challenged conduct in the aggregate to see if it is sufficient to support antitrust liability.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN13[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine may be applied at the motion-to-dismiss stage.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN14[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

A pattern of baseless, repetitive claims instituted without probable cause, and regardless of the merits falls outside of Noerr-Pennington protection. Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc. articulates a two-part test for identifying sham litigation: first, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If the lawsuit is objectively baseless, then the court asks, whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor, through the use of the governmental process—as opposed to the outcome of that process—as an anticompetitive weapon.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN15[] Exemptions & Immunities, Noerr-Pennington Doctrine

The objectively reasonable requirement applies to the sham lawsuit exception to Noerr-Pennington whether the allegations involve a single instance of sham petitioning or a series. Any lawsuit reasonably calculated to elicit a favorable outcome is objectively reasonable, and any successful action self-proves its reasonableness.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Failure to Fulfill Duties

Patent Law > US Patent & Trademark Office Proceedings > Examinations > Office Actions

Business & Corporate Compliance > ... > Patent Law > US Patent & Trademark Office Proceedings > Reexamination Proceedings

HN16[] Inequitable Conduct, Failure to Fulfill Duties

Proceedings before the Patent and Trademark Office (PTO) are adjudicative. The PTO reviews patent applications submitted by interested parties often represented by counsel with specialized legal training, engages in formal fact-finding based on submissions made pursuant to duties of disclosure, candor, and good faith, and issues decisions subject to definite standards and judicial review. *37 C.F.R. § 1.56(a)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN17[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

The Food and Drug Administration reviews applications for new drugs submitted in nonadversarial processes marked by strict guidelines. That formalized review looks at a wealth of technical information and is guided by standards set forth by federal law. *42 U.S.C.S. § 262*.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Patent Law > Infringement Actions > Burdens of Proof

Evidence > Burdens of Proof > Clear & Convincing Proof

HN18[] Defenses, Bad Faith Enforcement

Even if patentees are presumed to enforce their patents in good faith (the law recognizes a presumption that the assertion of a duly granted patent is made in good faith), that presumption is evidentiary, and evidentiary presumptions do not overcome plausible allegations at the pleading stage. If the party challenging such statements under state or federal law presents clear and convincing evidence that the infringement allegations are objectively false, and that the patentee made them in bad faith, viz., with knowledge of their incorrectness or falsity, or disregard for either, the statements are actionable and are not protected by the existence of a patent.

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN19[] **Patent Invalidity, Presumption of Validity**

Anyone with a patent not obtained by fraud enjoys a presumption of validity that entitles them to sue alleged infringers, and to settle with them, whatever their private doubts, unless a neutral observer would reasonably think either that the patent was almost certain to be declared invalid, or the defendants were almost certain to be found not to have infringed it, if the suit went to judgment.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN20[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

For purposes of the Noerr-Pennington doctrine, when a lawsuit terminates in a settlement that provides substantial value to an antitrust defendant accused of initiating that lawsuit as a sham, that lawsuit is objectively reasonable.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN21[] **Private Actions, Sherman Act**

There is a risk that by focusing only on each individual action in a series, a broader pattern of anticompetitive conduct might escape policing and remedy. Plaintiffs must be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each, but at the same time, conduct immunized from antitrust liability cannot be aggregated with nonimmunized conduct without nullifying the immunity.

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN22[] **Patent Invalidity, Presumption of Validity**

Patents are entitled to a presumption of validity, *35 U.S.C.S. § 282(a)*, and even though that presumption is not so strong as to make patents completely unassailable, it is a presumption rightly based on the expertise of patent examiners presumed to have done their job.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN23[] **Standing, Requirements**

The patent system might be thought to be in need of reform, but the antitrust laws were not designed to repair other government regulatory processes.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN24[] **Sherman Act, Claims**

The rule of reason analysis involves an inquiry into market power and market structure designed to assess the actual effect of the contract, combination, or conspiracy, or, in Sherman Act *§ 2*, *15 U.S.C.S. § 2*, cases, of an alleged monopolization.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN25[] **Scope, Monopolization Offenses**

Section 1 of the Sherman Act declares illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*. In order to state a claim under *§ 1*, plaintiffs must plead (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in a relevant market; and (3) an accompanying injury. When assessing whether a particular restraint enhances or inhibits competition, courts apply three categories of analysis: per se, quick-look, and rule of reason. All three are meant to answer the same question: whether or not the challenged restraint enhances competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN26[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Per se analysis is applied when a practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, such as horizontal price fixing and output limitations. The quick-look approach asks whether an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect. If legitimate, procompetitive justifications for facially anticompetitive behavior are found, then rule of reason analysis may be necessary. Under the rule of reason, plaintiffs must allege that an agreement or contract has an anticompetitive effect on a given market within a given geographic area.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN27[] **Per Se Rule & Rule of Reason, Per Se Violations**

Horizontal price fixing and output limitation are classic examples of behavior that is considered anticompetitive per se. Even reverse-payment patent settlement agreements that involve cash payments from the patentee to the alleged infringer do not usually receive per se treatment, and types of agreements that involve two sets of early entry dates in two different regions are even less facially restrictive because they do not involve a cash payment in return for a promise to keep a competing product off the market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN28[] **Sherman Act, Claims**

Market allocation agreements are classic examples of per se Sherman Act *§ 1*, *15 U.S.C.S. § 1*, violations. In a market allocation agreement, competitors at the same level of a market allocate territories in order to minimize competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN29[] **Per Se Rule & Rule of Reason, Per Se Violations**

To fit under the per se rule a horizontal, market-allocation agreement need not foreclose all possible avenues of competition.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN30[] **Conveyances, Licenses**

Patents come with the right to selectively license the patent to the whole or any specific part of the United States. *35 U.S.C.S. § 261*. A patent dispute that settles with a market division license agreement will be approved, and the courts repeatedly state that they are loath to inquire into such things as whether the patents in question are valid.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN31[] **Conveyances, Licenses**

A patentee may issue territorial licenses that allow competitors to sell patented products in some foreign countries but not others (and not in the U.S.).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN32[] **Per Se Rule & Rule of Reason, Per Se Violations**

Market allocation agreements are not free from per se treatment just because they involve intellectual property licenses, but patents are different from other types of intellectual property when it comes to geographic restrictions, and an agreement to permit entry into a market previously protected by a patent does not become a per se invalid market allocation agreement just because it is specific to one territory (or one country). *35 U.S.C.S. § 261*. The most obvious reading of the Patent Act is that, where the patentee also makes the manufactured product in a territory, the statute explicitly authorizes a form of horizontal territorial division that would be illegal per se if done in the absence of an intellectual property license.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN33[] **Sherman Act, Claims**

Per se treatment is disfavored for novel theories of antitrust violations. Per se treatment is appropriate once experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it. It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN34[] Scope, Monopolization Offenses

An agreement that allows competitors to enter markets from which there is a chance they would otherwise be excluded is not on its face anticompetitive.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN35[] Sherman Act, Claims

Reverse-payment settlements (where the patentee pays the alleged infringer rather than the other way around) trigger § 1 of the Sherman Act, 15 U.S.C.S. § 1, antitrust scrutiny and rule of reason analysis.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN36[] Inequitable Conduct, Anticompetitive Conduct

Ordinarily, a patent holder has some entitlement to monopoly profits for the duration of its patent and consumers benefit from a deal to allow a competitor to enter the market before the patent expires.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN37[] Inequitable Conduct, Anticompetitive Conduct

A reverse payment from a patentee to an alleged infringer, where large and unjustified, can bring with it the risk of significant anticompetitive effects.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN38[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Although scrutiny of such settlements can lead to time-consuming, complex, and expensive litigation, the Supreme Court has rejected a blanket rule immunizing reverse-payment patent-infringement settlements from antitrust scrutiny. Procompetitive justifications (e.g., the avoidance of litigation costs) can be examined and accounted for as part of the rule of reason analysis. And fears that it would be expensive and time-consuming to assess the value of the underlying patent claim are mitigated by the fact that it is normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham). The size of the reverse payment can serve as a proxy for the patent's weakness without forcing a court to conduct a detailed exploration of the validity of the patent itself. A rule of reason analysis would not be cumbersome when the size of the payment suggests that the patentee possessed the market power it needed to bring about anticompetitive harm.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN39[] **Inequitable Conduct, Anticompetitive Conduct**

To avoid deterring reverse-payment patent infringement suit settlements because of exposure to antitrust liability, the Supreme Court has noted an important exception. Parties remain free to settle on other terms—for example, by allowing the generic manufacturer to enter the patentee's market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN40[] **Inequitable Conduct, Anticompetitive Conduct**

FTC v. Actavis, Inc. identifies a settlement that allows early entry but without the patentee paying a competitor to stay out of the market as one type of agreement that is not an antitrust problem. This makes sense because such settlements increase competition by cutting monopolies short.

Patent Law > Remedies > Damages > Measure of Damages

HN41[] **Damages, Measure of Damages**

When considering whether a settlement of a patent infringement suit constitutes a large and unjustified reverse payment, the various payments cannot be examined in isolation.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN42[] **Inequitable Conduct, Anticompetitive Conduct**

When both licenses are permissible patent infringement suit settlement terms under FTC v. Actavis, Inc., the simultaneous grant of both does not render either license unlawful. Actavis does not provide a legal basis for restricting negotiated settlement terms where they do not restrain competition.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN43[] **Inequitable Conduct, Anticompetitive Conduct**

It is not unlawful to enter into agreements that have been explicitly recognized by the Supreme Court as not a matter for antitrust concern, that implement a right included in the bundle of rights awarded to patent holders, *35 U.S.C.S. § 261*; and that play an important role in making global patent settlement agreements easier.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN44[] **Clayton Act, Claims**

Sections 4 and 16 of the Clayton Act provide for private rights of action (for damages and injunctive relief, respectively) in antitrust cases. *15 U.S.C.S. §§ 15*, *26*. Both require that plaintiffs suffer an antitrust injury. Antitrust injury analysis focuses on the type of injury claimed by a particular plaintiff and demands that it be an antitrust injury. An antitrust injury is any injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury must be the type of loss that the claimed violations would be likely to cause. The injury requirement applies to Sherman Act *§ 1* and *§ 2*, *15 U.S.C.S. §§ 1* and *2*, claims. The antitrust injury requirement comes from § 4 of the Clayton Act, which is what grants plaintiffs the right to bring a private right of action under both *§ 1* and *§ 2* of the Sherman Act.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN45[] **Standing, Requirements**

Antitrust injury analysis involves a two-step causation inquiry. After delineating the type of interests protected by the antitrust laws, the court must determine whether the violation was the cause-in-fact of the injury: that but for the violation, the injury would not have occurred. The illegality need only be a material cause of the injury and plaintiffs need not prove that there was no other potential cause of the injury. The injury must flow directly from the anticompetitive aspect of the practice under scrutiny.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN46[] **Complaints, Requirements for Complaint**

There is no hard-and-fast rule against deciding the question of antitrust injury at the pleading stage. Dismissal is appropriate if the claim rests at bottom on some abstract conception or speculative measure of harm.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN47[] **Standing, Requirements**

Higher prices are one of the principles vices proscribed by the antitrust laws.

Antitrust & Trade Law > Sherman Act > Claims

HN48[] **Sherman Act, Claims**

Indirect and speculative injuries cannot support a private antitrust lawsuit. In order to allege cause-in-fact, plaintiffs must allege that the injury would not have occurred absent the alleged unlawful conduct.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN49[] **Scope, Monopolization Offenses**

AS 45.50.471 does not contain the words anticompetitive, monopoly, or unconscionable, and pertains to deceptive acts and practices more akin to trademark infringement than antitrust violations. Alaska's antitrust laws are codified elsewhere.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN50[] **Motions to Dismiss, Failure to State Claim**

Plaintiffs do not have to cite the right laws in their complaint. A complaint should limn the grievance and demand relief and need not identify the law on which the claim rests. Plaintiffs do not need to plead legal theories. What matters is whether they have stated a claim upon which relief can be granted and provided defendants with fair notice of what the claim is and the grounds upon which it rests. *Fed. R. Civ. P. 8(a)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN51[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

The Federal Trade Commission Act is aimed at all the familiar methods of law violation which prosecutions under the Sherman Act have disclosed, but also has a broader purpose. There are unfair or unconscionable acts that are not contracts or combinations in restraint of trade or unlawful monopolies.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN52[] **Complaints, Requirements for Complaint**

A defendant is entitled to fair notice of what the claim is and the grounds upon which it rests. *Fed. R. Civ. P. 8(a)*.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN53[] **Complaints, Requirements for Complaint**

A complaint need only limn the grievance and demand relief. It does not have to identify the law on which the claim rests. Plaintiffs do not need to plead legal theories.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

Constitutional Law > Bill of Rights > State Application

HN54[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Noerr-Pennington may affect the viability of state-law claims because it is rooted in the *First Amendment*. The *First Amendment* applies to the states through the *Fourteenth Amendment*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN55[] **Trade Practices & Unfair Competition, State Regulation**

AS 45.50.471 of the Alaska Unfair Trade Practices and Consumer Act prohibits unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce. AS 45.50.471. AS 45.50.531 provides a private right of action for acts declared unlawful under § 45.50.471.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN56[] **Standing, Clayton Act**

Only buyers that purchase products directly from the antitrust violator may bring claims against that party for damages. Some states have enacted Illinois Brick repealer statutes that allow indirect purchasers to sue for money damages. Alaska's repealer statute only partially repealed Illinois Brick. AS 45.50.577(i).

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN57[] **Remedies, Damages**

The attorney general is the only person who can bring an antitrust claim for damages on behalf of indirect purchasers under Alaska's Restraint of Trade Act. AS 45.50.562-45.50.570, 45.50.577(i).

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN58[] **Attempts to Monopolize, Elements**

No court has construed Alaska's consumer protection statute to permit claims based on alleged antitrust and monopolization conduct by indirect purchasers. Doing so would allow plaintiffs to circumvent Alaska's partial indirect purchaser bar by proceeding under Alaska's more general consumer protection statute.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN59[] **Purchasers, Indirect Purchasers**

The better reading of the Alaska Unfair Trade Practices and Consumer Act, considered in conjunction with Alaska's Restraint of Trade Act, is that it precludes plaintiffs from bringing claims as indirect purchasers even under a non-antitrust unfair practices theory.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN60[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law defines unfair competition to include unlawful, unfair or fraudulent business acts or practices and unfair, deceptive, untrue or misleading advertising. Cal. Bus. & Prof. Code § 17200.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Contracts Law > Remedies > Restitution

HN61[] **Types of Contracts, Quasi Contracts**

California law does not recognize an independent cause of action for unjust enrichment. Unjust enrichment is not a cause of action, just a restitution claim.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN62[] **Deceptive & Unfair Trade Practices, State Regulation**

In addition to borrowing violations from other laws, California's Unfair Competition Law provides its own unique cause of action. A practice may be deemed unfair even if not specifically proscribed by some other law.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN63[] **Trade Practices & Unfair Competition, State Regulation**

The District of Columbia's Consumer Protection Act makes it unlawful for any person to engage in an unfair or deceptive trade practice. D.C. Code Ann. § 28-3904. It was designed to police trade practices arising only out of consumer-merchant relationships, and covers only the ultimate retail transaction between the final distributor and the individual member of the consuming public.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN64[] **Deceptive & Unfair Trade Practices, State Regulation**

The District of Columbia Code defines a consumer as any person who does or would purchase or receive consumer goods or services, including as co-obligor or surety, or does or would otherwise provide the economic demand for a trade practice. D.C. Code Ann. § 28-3901(a)(2)(A).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN65[] **Trade Practices & Unfair Competition, State Regulation**

Georgia's Fair Business Practices Act prohibits unfair or deceptive acts or practices in the conduct of consumer transactions. *O.C.G.A. § 10-1-393*. In order to bring a suit under that statute, plaintiffs have to provide defendants with a written demand identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered at least thirty days before filing suit, but not if the prospective respondent does not maintain a place of business or does not keep assets within the state. *O.C.G.A. § 10-1-399(b)*.

Governments > Legislation > Interpretation

HN66[] Legislation, Interpretation

The notice provision of the Georgia Fair Business Practices Act is to be liberally construed.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN67[] Remedies, Damages

The Illinois Consumer Fraud and Deceptive Business Practices Act declares unlawful all unfair methods of competition and unfair or deceptive acts or practices, in the conduct of any trade or commerce whether any person has in fact been misled, deceived or damaged thereby. *815 ILCS 505/2*. Illinois has adopted an repealer statute that permits indirect purchasers to sue for antitrust money damages. *740 ILCS 10/7(2)*. However, that statute prohibits class action antitrust claims brought by indirect purchasers. *740 ILCS 10/7(2)*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN68[] Purchasers, Indirect Purchasers

Even though in some states where Illinois Brick has been repealed, some courts have allowed suits brought by indirect purchasers under consumer protection statutes based on conduct that might also qualify as a violation of that state's antitrust statutes, the law in Illinois is different. Permitting plaintiffs to bring a class action based on conduct that more closely approximates an antitrust violation under a broader consumer protection statute would allow them to make an end run around the Illinois legislature's determination that such actions should not be permitted. Plaintiffs cannot assert what are essentially antitrust claims in the guise of a claim under the Illinois consumer protection statute, especially when doing so allows them to avoid a provision of Illinois law that would otherwise bar this particular type of suit. *740 ILCS 10/7(2)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN69[] Trade Practices & Unfair Competition, State Regulation

Much like Georgia's statute, the Nevada Deceptive Trade Practices Act mandates that any person bringing an action under the statute shall, simultaneously with the filing of the complaint with the court, mail a copy of the complaint to the Attorney General. *Nev. Rev. Stat. Ann. § 598A.210(3)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN70[] Motions to Dismiss, Failure to State Claim

When opposing a *Fed. R. Civ. P. 12(b)(6)* motion, plaintiffs may submit materials outside the pleadings to illustrate the facts the plaintiff expects to be able to prove, so long as those new elaborations are consistent with the complaint.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN71[] Trade Practices & Unfair Competition, State Regulation

New Hampshire's Deceptive Trade Practices Act declares unlawful any unfair method of competition or any unfair or deceptive act or practice in the conduct of any trade or commerce within this state. *RSA 358-A:2*. The words "trade" and "commerce" include the sale of any thing of value, wherever situate, and any trade or commerce directly or indirectly affecting the people of *New Hampshire. RSA 358-A:1(II)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN72[] Deceptive & Unfair Trade Practices, State Regulation

The New Hampshire Deceptive Trade Practices Act is phrased broadly to include the sale of goods no matter where those goods are located and includes within its purview commerce that indirectly affects the people of New Hampshire. The New Hampshire Supreme Court has declined to prohibit the bringing of antitrust-type actions under New Hampshire's Deceptive Trade Practices Act and has found that the legislature intended a broad sweep. The offending conduct does not need to occur within New Hampshire so long as it had an effect on the people of that state. Even if New Hampshire's statute requires that the offending conduct take place within New Hampshire's borders, it is enough to allege that the defendants introduced overpriced products into New Hampshire markets.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN73[] Trade Practices & Unfair Competition, State Regulation

North Carolina's Unfair Trade and Business Practices Act declares unlawful all unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce. *N.C. Gen. Stat. Ann. § 75-*

1.1. The Act addresses primarily local concerns. Actions that have only an incidental local effect fall outside its reach.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN74[] Trade Practices & Unfair Competition, State Regulation

The North Carolina Unfair Trade and Business Practices Act does not require substantial effects on intrastate commerce. *N.C. Gen. Stat. Ann. § 75-1.1*. It is enough to plead intrastate effects that caused supracompetitive process in the relevant jurisdiction.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN75[] Deceptive & Unfair Trade Practices, State Regulation

Utah's Consumer Sales Practices Act declares unlawful any unconscionable act or practice by a supplier in connection with a consumer transaction whether it occurs before, during, or after the transaction. *Utah Code Ann. § 13-11-5(1)*. In Utah, the term "unconscionable" defies precise definition, and Utah courts assess the circumstances of each particular case in light of the twofold purpose of the doctrine, prevention of oppression and of unfair surprise.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN76[] Deceptive & Unfair Trade Practices, State Regulation

In the few cases where Utah courts have interpreted the Utah Consumer Sales Practices Act, they have consistently looked to contract principles to define its terms. Plaintiffs generally must allege gross bargaining power inequality or oppressive contractual terms.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN77[] Deceptive & Unfair Trade Practices, State Regulation

Utah's Consumer Sales Practices Act is not limited to contract disputes, but it is limited to conduct that is unconscionable.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN78[] Trade Practices & Unfair Competition, State Regulation

West Virginia's Consumer Credit and Protection Act declares unlawful unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. *W. Va. Code Ann. § 46A-6-104*. At least when consumers allege that a purchase was made because of a misrepresentation, the Act does not extend to prescription drug purchases, because physicians protect consumers when they intervene in that decision-making process.

Opinion

[*819] **MEMORANDUM OPINION AND ORDER**

Defendant AbbVie Inc. makes a lot of money selling the prescription drug Humira. One reason for Humira's profitability is that AbbVie's Humira-related patents (more than a hundred) make it difficult (if not impossible) to sell competing drugs. Another reason may be that the Food and Drug Administration's lengthy approval process imposes additional costs on competitors hoping to reach the market. Still a third reason might be the expensive, complicated, and contentious patent infringement litigation that often follows on the heels of FDA approval.

Plaintiffs, indirect purchasers of Humira, allege a different reason: AbbVie cornered the market for Humira (and other biosimilar drugs) through anticompetitive conduct. They say that AbbVie (and its subsidiary, AbbVie Biotechnology, Ltd.) applied for, obtained, and asserted patents to gain the power it needed to elbow its competitors (the other defendants in this case, Amgen, Inc., Samsung Bioepis Co., Ltd., and Sandoz, Inc.) out of the Humira market in **[**7]** the United States (in violation of *§ 2 of the Sherman Act*) and then entered into agreements with those competitors to keep their competing drugs off the market (in violation of *§ 1*). In return, AbbVie gave those competitors permission to market their drugs in Europe (where AbbVie also possessed an imposing patent portfolio that blocked competition).

The legal and regulatory backdrop for patented biologic drugs, together with a well-resourced litigation strategy, gave AbbVie the ability to maintain control over Humira. Plaintiffs say that AbbVie's plan to extend its power over Humira amounts to a scheme to violate federal and state antitrust laws. But what plaintiffs describe is not an antitrust violation. AbbVie has exploited advantages conferred on it through lawful practices and to the extent this has kept prices high for Humira, existing antitrust doctrine does not prohibit it. Much of AbbVie's petitioning was protected by the *Noerr-Pennington* doctrine, and plaintiffs' theory of antitrust injury is too speculative. Because the federal antitrust claims fail, the state antitrust claims fail, too. And although the complaint is lengthy and detailed, its application to state statutes that prohibit **[**8]** unfair and unconscionable conduct falls short. The complaint is dismissed without prejudice.

I. Legal Standards

HN1[] A complaint must contain a short and plain statement that plausibly suggests a right to relief. *Ashcroft v. Iqbal, 556 U.S. 662, 677-78, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Fed. R. Civ. P. 8(a)(2)*. In ruling on a motion to dismiss, a court must accept all factual allegations in the complaint as true and draw all reasonable inferences in plaintiffs' favor, but need not accept legal conclusions, bare assertions, or conclusory allegations. *Iqbal, 556 U.S. at 680-82*. The complaint does not need to include detailed factual allegations, but it must provide more than labels and formulaic recitations of the elements of the cause of action, *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, and must "present a story that holds together." *Swanson v. Citibank, N.A., 614 F.3d 400, 404 (7th Cir. 2010)*. If a complaint pleads facts that are "merely consistent with" liability, it "stops short of the line between possibility and plausibility of entitlement to relief." *Iqbal, 556 U.S. at 678*.

[*820] II. Facts

A. Humira and the '382 Patent

Humira is an anti-inflammatory biologic (a drug derived from living organisms that helps slow down overactive immune systems). [109] ¶¶ 2, 32, 77.[1] Originally developed for rheumatoid arthritis, Humira is now used to treat a variety of autoimmune disorders ranging from Crohn's disease to plaque psoriasis. *Id.* ¶ 81.

Humira generated **[**9]** almost $20 billion in worldwide sales in 2018 alone and more than $56 billion in the United States between 2012 and 2018, *id.* ¶ 84, making it the best-selling drug in the country. *Id.* ¶¶ 2, 84. Its sales dollars come not from volume, but from price: a one-month prescription of Humira injections costs about $4,500. *See id.* ¶ 84.

Humira's active ingredient is an antibody called "adalimumab." *See id.* ¶¶ 77-78. Abbott Laboratories bought the patent for adalimumab (U.S. Patent No. 6,090,382, originally assigned to BASF AG in 2000) and used it to launch a new drug—Humira—in 2002. *Id.* ¶¶ 78-80. Abbott sold Humira throughout the world for eleven years before passing the patent off to its spin-off biologic and branded drug business, AbbVie, Inc. *Id.* ¶ 87. The '382 patent expired on December 31, 2016. *Id.* ¶ 78.

The plaintiffs in this lawsuit—indirect purchasers of Humira, including the City of Baltimore, *id.* ¶ 13, an insurance trust fund for Miami Police Department officers, *id.* ¶ 14, and a Minnesota-based employee welfare benefit plan for plumbers, pipefitters, and other workers in the pipe trades industries, *id.* ¶ 15, among others—say that, in the months and years leading up to the expiration of the '382 patent, AbbVie created a thicket **[**10]** of intellectual property protection so dense that it prevented would-be challengers from entering the market with cheaper biosimilar alternatives.[2] *See id.* ¶¶ 4-9. Then, plaintiffs say, defendants AbbVie Inc. and AbbVie Biotechnology Ltd.

---

[1] Bracketed numbers refer to entries on the district court docket. The facts are taken from the consolidated class action complaint, [109], plaintiffs' opposition to defendants' motions to dismiss, [144], and, where noted, from sources outside of those documents through judicial notice.

[2] Biosimilars are to biologics what generics are to small molecule drugs. *See* [109] ¶ 47. Small molecule drugs are those made from chemical processes. *See id.* ¶¶ 32, 47.

used that intellectual property as leverage during negotiations with the other defendants (Amgen, Inc., Samsung Bioepis Co., Ltd., and Sandoz, Inc.[3]), forcing them to agree to delay their market entry in return for licensing agreements that cut through AbbVie's patent thicket. *Id.* ¶¶ 4, 7.

B. The Patent System

HN2[] Anyone who invents or discovers any new and useful machine, manufacture, or composition of matter (e.g., a new drug) may apply for a patent from the United States Patent and Trademark Office. *See* 35 U.S.C. § 101. Once issued, the patent comes with an exclusive right to make, use, and sell the invention in the United States. 35 U.S.C. § 154(a). This "limited monopoly," *Nautilus, Inc. v. Biosig Instruments, Inc.*, 572 U.S. 898, 901, 134 S. Ct. 2120, 189 L. Ed. 2d 37 (2014), lasts for twenty years. 35 U.S.C. § 154(a)(2). *But see* P. Areeda & H. Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application § 704a (4th ed. 2019) (Areeda & Hovenkamp) (a patent is more akin to a property right than a monopoly because the "great majority" of patents do not **[*821]** confer sufficient market **[**11]** power to dominate a properly defined market).

HN3[] Novel inventions are those not disclosed in the prior art. 35 U.S.C. § 102(a). The prior art includes anything that has already been patented or described in a printed publication, or that is in public use, on sale to the public, or otherwise available to the public. *Id.* The patent application process is nonadversarial and relies on applicants to abide by their duty of disclosure, candor, and good faith. 37 C.F.R. § 1.56(a); *Kingsland v. Dorsey*, 338 U.S. 318, 319, 70 S. Ct. 123, 94 L. Ed. 123, 1950 Dec. Comm'r Pat. 591 (1949); *Elkay Mfg. Co. v. Ebco Mfg. Co.*, No. 93 C 5106, 1995 U.S. Dist. LEXIS 473, 1995 WL 389822, at *11 (N.D. Ill. Feb. 15, 1995). *See also* [109] ¶ 58. If the applicant does not disclose (and the examiner does not find) all of the pertinent prior art, patents may issue to underserving inventions.

HN4[] As prior art accumulates, applicants face an increasingly crowded space. There are, however, ways to navigate around some of that prior art. For instance, inventors are granted a one-year grace period to file their patent applications after any public disclosure of their own invention. 35 U.S.C. § 102(b)(1). Continuation applications offer another work around: any applicant with a pending application may later tack on new, related claims.[4] 35 U.S.C. § 120; 37 C.F.R. § 1.78(d). If the new claims are sufficiently related to the original claim, they are backdated and do not have to account for any prior art developed after the original application's **[**12]** filing date. *Id. See also* [109] ¶¶ 55-56. The catch is that if the new claims are simple, obvious variations on the invention described in the original application, the applicant "generally must" ([109] ¶ 56) file a terminal disclaimer (*see* 37 C.F.R. § 1.321(b)) relinquishing any portion of the new claim's term that would extend beyond the expiration date of the patent that is the subject of the pending application. [109] ¶ 56. In other words, if the applicant wants to use the original filing date for a simple and obvious variation on the original invention, the applicant has to accept the original expiration date, too. *See id.*

C. The Food and Drug Administration's Approval Process

HN6[] Manufacturers that want to bring a new drug (patented or not) to market must first receive approval from the Food and Drug Administration. *See* 21 U.S.C. § 355; 42 U.S.C. § 262(a). Different kinds of drugs require different kinds of approvals. *See id.* The process for biologic drugs starts when a manufacturer submits a "Biologic License Application" demonstrating that its new drug is (among other things) "safe, pure, and potent." 42 U.S.C. §

---

[3] Fresenius Kabi USA LLC was originally named as a defendant but was dismissed shortly before the filing of the motion to dismiss. *See* [120].

[4] **HN5**[] The claims "define the exact boundaries beyond which no member of the public may pass without invading the exclusive rights of the patentee." *Nat'l Carbon Co. v. W. Shade Cloth Co.*, 93 F.2d 94, 96 (7th Cir. 1937). Claims force the patentee to "define precisely what his invention is." *White v. Dunbar*, 119 U.S. 47, 52, 7 S. Ct. 72, 30 L. Ed. 303, 1886 Dec. Comm'r Pat. 494 (1886).

262(a)(2)(C)(i). *See also* [109] ¶ 35. If the application is approved, the manufacturer enjoys a period of exclusivity during which it is the only **[**13]** entity that can market the drug for the approved purpose. 42 U.S.C. § 262(k)(7). *See also* [109] ¶ 34. Manufacturers often charge supracompetitive prices during this period in order to recoup their research and development costs and obtain a profit. [109] ¶ 34.

HN7[] Eventually, that exclusivity ends. One way it can end is when a different manufacturer designs a biosimilar and submits (and has approved) an "Abbreviated Biologic License Application." 42 U.S.C. §§ 262(k)(2)(A), (k)(6). *See also* [109] ¶¶ 39-40. Abbreviated applications piggyback on existing approvals by identifying an approved reference biologic and demonstrating **[*822]** that there is no "clinically meaningful difference" between the reference biologic and the proposed biosimilar. 42 U.S.C. §§ 262(k)(2)(B), (k)(4). *See also* [109] ¶ 39. Biosimilar manufacturers have to wait four years from the date the reference biologic was approved before submitting an abbreviated application, and the FDA has to wait twelve years from that same date before approving any abbreviated applications. 42 U.S.C. §§ 262(k)(7)(A), (B). *See also* [109] ¶ 41. Once approved, the biosimilar can be marketed to the public—assuming the drug is not also patented. [109] ¶ 41. Prices tend to drop shortly after a new biosimilar is introduced. *See id.* ¶¶ 43-45.

HN8[] Often, the drug is **[**14]** patented. The regulatory framework sets out a five-step series of required prelitigation exchanges (sometimes called the "patent dance") aimed at resolving patent disputes between the biosimilar manufacturer (the "applicant") and the reference biologic's manufacturer (the "sponsor"). 42 U.S.C. § 262(l). *See also* [109] ¶ 61. Once the FDA accepts the application for review, the applicant is required to send information about its biosimilar to the sponsor (step one), *see* 42 U.S.C. § 262(l)(2), the sponsor must send back a list of the patents (if any) that it believes would be infringed if the biosimilar was put on the market (step two), *see* 42 U.S.C. § 262(l)(3)(A), the applicant explains why it believes those patents are invalid, unenforceable, or would not be infringed (step three), *see* 42 U.S.C. § 262(l)(3)(B), and the sponsor responds (step four). *See* 42 U.S.C. § 262(l)(3)(C). *See also* [109] ¶¶ 62-66. At the fifth step the applicant tells the sponsor the number of patents it would like test in litigation, and then both sides simultaneously exchange a list of patents. *See* 42 U.S.C. § 262(l)(5); [109] ¶ 67. The sponsor then must initiate a lawsuit to determine the validity of the patents that appear on both lists (which, at most, includes double the number identified by the applicant, assuming no overlap). *See* 42 U.S.C. § 262(l)(6) **[**15]** ; [109] ¶¶ 65-67.

HN9[] At that point, the applicant has to decide whether to launch "at risk" by putting its biosimilar on the market notwithstanding the prospect of a large damages award against it in patent litigation. Unlike the *Hatch-Waxman Act* (which governs small molecule drugs and imposes an automatic 30-month stay on FDA approval whenever a brand-name manufacturer files an infringement lawsuit (and meets other prerequisites), *see* 21 U.S.C. § 355(j)(5)(B)(iii)), the *Biologics Price Competition and Innovation Act* allows the FDA to approve an abbreviated biologic application despite a pending infringement suit and only requires the applicant to give the sponsor 180-days' notice before launching. 42 U.S.C. § 262(l)(8)(A). *See also* [109] ¶¶ 69-70. But even if the biosimilar manufacturer decides to launch at risk, the sponsor can still file a second lawsuit seeking a preliminary injunction (sometimes referred to as "second phase" litigation). 42 U.S.C. § 262(l)(8)(B).

D. AbbVie's Patents

In the lead up to the expiration of the '382 patent, AbbVie started applying for Humira-related patents. [109] ¶ 90. It sought patents on not only the many uses of Humira but also the process for manufacturing it and the ingredients and formulations that AbbVie anticipated its competition might **[**16]** seek to employ. *Id.* One estimate suggests that AbbVie filed a total of 247 patent applications related to Humira and obtained 132 patents (a batting average of .534). *Id.* ¶ 99. More than 90% of those patents were issued in 2014 or later, despite the fact that Humira was first marketed in 2002. *Id.* ¶ 4.

In the process, AbbVie relied heavily on continuation applications. *See id.* ¶¶ 99-100. **[*823]** For instance, AbbVie used one application from 2002 (U.S. Patent Application 10/22,140) to serve as the basis for twenty-two continuation applications, all of which would have been barred by prior art but-for their ability to relate back. *Id.* ¶¶ 102-104. AbbVie's 100-plus Humira-related patents can be traced back to twenty root patents, forming twenty patent trees. *Id.* ¶¶ 130-131. By targeting the root patents that lie at the base of these trees, plaintiffs say they can quickly identify whole swaths of AbbVie's IP portfolio that should not have issued. *See id.* ¶¶ 107, 131, 132.

For instance, fifteen of those trees are rooted in formulation and manufacturing process patents that, together, serve as the source of eighty-four of AbbVie's Humira-related patents. *Id.* ¶ 131. Twelve of those fifteen root patents **[**17]** were filed after 2006. *Id.* ¶ 132. Humira launched on New Year's eve of 2002, meaning AbbVie had until the first day of 2004 (the end of the one-year grace period) to apply for any patent describing a formulation or manufacturing process that was used to make Humira when it launched. *Id.* ¶¶ 126-128; *35 U.S.C. § 102(a)(1)*. As a result, the twelve patents filed after 2006 (and the nearly sixty patents that were issued as a result of continuation applications based on those underlying patents) are invalid because they describe inventions that were not novel when the patents issued. [109] ¶¶ 132-140.

Plaintiffs add that any formulation patent that describes a variant of Humira, (i.e., one that does not describe Humira as it was approved by the FDA) should not be used to block biosimilars of Humira. *Id.* ¶ 129. And, plaintiffs reason, any manufacturing process that was not used to make Humira when it launched must not be necessary to make Humira, meaning it should be no bar to making a biosimilar. *Id.*

AbbVie's wrongdoing was not limited to its continuation applications. For instance, AbbVie withheld information from the United States Patent and Trademark Office, such as the fact that it had already been using a **[**18]** way to make and sell a certain product for several years when it told the Patent and Trademark Office that the method was not obvious. *Id.* ¶ 114. And while prosecuting another patent, AbbVie filed a declaration affirming that a certain process was unexpected to be successful despite earlier disclosures that suggested the process was not only likely to be successful but was in fact the standard method for achieving that result. *Id.* ¶¶ 115-120. Some of AbbVie's other patents are invalid because they claim methods that were already in the prior art. *Id.* ¶¶ 109-113.

When the Patent Trial and Appeal Board heard challenges to five of AbbVie's Humira-related patents, it ruled that three were invalid. [109] ¶ 108. AbbVie terminated the other two before the board reached any final determination. *Id.*[5]

At the same time that AbbVie was obtaining these patents, its executives were discussing AbbVie's broader IP strategy **[*824]** with investors. For instance, in 2014, AbbVie's CFO said that AbbVie was "obviously not very specific about what" it was putting into its "very robust collection of IP" because "with a product as important and as attractive as Humira, you do everything you can on the IP **[**19]** front to ensure that you've protected it to the best you can." *Id.* ¶ 90. He added that the bulk of AbbVie's IP strategy was to "make it more difficult for a biosimilar to follow behind." *Id.* In an email to investors, AbbVie's CEO noted that market entry for any Humira biosimilars would likely be delayed because patent litigation takes more than four years and at-risk launches are rare. *Id.* ¶ 94.

E. The Other Defendants' Applications for Biosimilars and the U.S. Market Settlements

As AbbVie pursued new patents, its competitors applied for FDA approval to manufacture biosimilars. Amgen filed the first abbreviated biologic application for its biosimilar, Amjevita, in November of 2015. [109] ¶ 142. During the patent dance, AbbVie identified sixty-six patents that it believed Amjevita would infringe. *Id.* ¶ 143. Amgen responded by saying that it believed sixty-five of those patents (all but the original '382 patent) were invalid, and that it did not plan to market Amjevita until the '382 patent expired. *See id.* ¶¶ 140-146. By August of 2016, Amgen

---

[5] In its motion to dismiss, AbbVie adds that, on thirteen occasions that plaintiffs neglect to mention, the Patent Trial and Appeal Board declined to initiate *inter partes* review of AbbVie's patents, finding that there was no reasonable likelihood that the challengers of AbbVie's patents (among them defendants Amgen and Sandoz and nondefendant Coherus) would succeed. [124] at 17-18. Plaintiffs do not object to AbbVie's request to take judicial notice of these decisions. [144]. The decisions are public court documents and beyond reasonable dispute. *Fed. R. Evid. 201(b)*; *White v. Keely, 814 F.3d 883, 886 (7th Cir. 2016)*; *Finjan, Inc. v. Blue Coat Sys., Inc.*, 2016 WL 7732542, at *1 n.1 (N.D. Cal. July 25, 2016); [124-1]; [124-2]; [124-3]; [124-4]; [124-5]; [124-6]; [124-7]; [124-8]; [124-9]; [124-10]; [124-11]; [124-12]; [124-13]. I take notice of them.

and AbbVie had finished the patent dance and AbbVie had filed suit. *Id.* ¶ 148. One month later, the FDA approved Amgen's abbreviated application to market Amjevita. ***[**20]*** *Id.* ¶ 149. On December 31, 2016, the '382 patent expired. *Id.* ¶ 78. Amgen did not launch at risk. *See id.* ¶¶ 149-51.

One year into litigation, in the fall of 2017, Amgen and AbbVie settled. *Id.* ¶ 151. At the time, a bench trial was scheduled to start in the fall of 2019. *Id.* ¶ 150. Any appeal would have taken (on average) at least another year to resolve.[6] *See* [125] at 3 n.3. The terms of the settlement are confidential, but AbbVie's press release made clear that Amgen had agreed to drop its patent challenges and delay Amjevita's market entry until January of 2023. *Id.* ¶ 151.[7]

AbbVie reached similar settlement agreements with eight other manufacturers seeking to market Humira biosimilars, including defendants Samsung Bioepis and Sandoz and nondefendants Mylan, Fresenius, Momenta, Pfizer, Coherus, and Boehringer. [109] ¶¶ 157-184. Each agreed to U.S. market entry dates ranging from June 30, 2023 (Samsung Bioepis) to December 15, 2023 (Coherus). *Id.* ¶¶ 157-184, 211. AbbVie reached these settlements at different stages of its disputes with these companies. It settled with Samsung Bioepis before that company even filed its abbreviated application, *id.* ¶ 157, with Sandoz after AbbVie had initiated **[**21]** litigation but before Sandoz had responded to the complaint, *id.* ¶ 170, and with Boehringer only after it had responded to AbbVie's **[*825]** infringement complaint and asserted counterclaims seeking to invalidate many of AbbVie's patents. *Id.* ¶¶ 183-84. In the process, AbbVie occasionally asserted patents for which there was not even an arguable claim of infringement. *Id.* ¶ 167. Only four of the biosimilar manufacturers that settled with AbbVie (Amgen, Samsung Bioepis, Sandoz, and Boehringer) ever received FDA approval to market their biosimilars. *Id.* ¶ 211. Only two (Amgen and Boehringer) received approval before they had entered into settlement agreements with AbbVie. *Id.*

F. The European Market Settlements

At the same time, in Europe, plaintiffs say that AbbVie took advantage of a more fractured patent system (and a type of European patent application similar to the continuation application, known as a "divisional application") to pressure the biosimilar defendants into settling there, too. *See id.* ¶¶ 185-89. AbbVie's strategy in Europe was to abandon or withdraw patents as soon as they were challenged in one jurisdiction and then use its pending applications in other jurisdictions as the basis **[**22]** for divisional applications that covered much the same material it had just abandoned. *Id.* ¶¶ 185-90.

For instance, when Samsung Bioepis and another company challenged two of AbbVie's patents in the U.K., AbbVie decided to abandon those patents rather than risk an adverse judicial verdict that could have been used to preclusive effect elsewhere. [109] ¶¶ 191-192. The judge issued an order finding that AbbVie "made every effort to shield the claims of its patents from scrutiny." *Id.* ¶ 199. AbbVie then turned around and filed divisional patents in other countries covering much the same subject matter as that in the patents it had just abandoned. *Id.* ¶ 198. As a result, AbbVie was able to extend the life of its patent protection for Humira in Europe.

The settlements AbbVie entered into in the U.S. included European market entry dates. *See id.* ¶ 203. AbbVie's agreement with Amgen allowed Amgen to enter the European market in October of 2018—more than four years before Amgen's January 2023 date for the U.S. market. *Id.* Samsung Bioepis's and Sandoz's agreements contained

---

[6] Plaintiffs do not object to judicial notice of the fact that patent appeals, on average, take more than one year to complete. *See* [125] at 3 n.3; U.S. Court of Appeals for the Federal Circuit, Median Disposition Time for Cases Decided by Merits Panels, 2009-2018, available at http://www.cafc.uscourts.gov/sites/default/files/the-court/statistics/06_Med_Disp_Time_MERITS_table_-_Final.pdf (last visited June 4, 2020); [144].

[7] The complaint alleges that AbbVie promised to not let any other manufacturer enter the market until the end of June 2023, ensuring Amgen a five-month period of (semi) exclusivity worth nearly a billion dollars. [109] ¶¶ 151, 153, 154. AbbVie filed under seal copies of its settlement agreements with Amgen, [124-14]; [124-15]; [126-1]; [126-2], and, in response, plaintiffs dropped their claims that Amgen's *de facto* five months of exclusivity constituted a reverse payment. [144] at 46 n.15.

the same European early entry date (October 16, 2018). *Id.* That date coincided with the expiration of AbbVie's European **[**23]** patent for adalimumab. *Id.*

The early European entry dates were extremely valuable to Amgen, Samsung Bioepis, and Sandoz. *Id.* ¶ 205. And plaintiffs say that AbbVie used those early European entry dates as bargaining chips during negotiations over the entry dates for the U.S. market, inducing Amgen, Samsung Bioepis, and Sandoz to delay their U.S. market entry by offering the *quid pro quo* of earlier entry dates in Europe. [109] ¶ 206. AbbVie's motive was to keep prices in the U.S. artificially high for as long as possible. *Id.* ¶ 207. It succeeded: the cost of Humira to treat arthritis in the U.S. remains 50% more expensive than the cost of the same treatment in Spain (and 155% more expensive than in Switzerland). *Id.* ¶ 207.

G. The Claims in the Consolidated Complaint

Plaintiffs bring class action claims on behalf of two representative classes. The first seeks injunctive relief and is defined as, "[a]ll entities in the United States, the District of Columbia, and Puerto Rico who indirectly purchased, paid and/or provided reimbursement for some or all of the purchase price of Humira, other than for resale, from December 31, 2016, through the present." [109] ¶ 224.

The second seeks damages and **[**24]** is defined as, "[a]ll entities who indirectly purchased, paid and/or provided reimbursement **[*826]** for some or all of the purchase price for Humira, other than for resale," in thirty-one states and the District of Columbia, "from December 31, 2016, through the present, for consumption by their members, employees, insureds, participants, or beneficiaries." *Id.* ¶ 225.

The complaint has seven counts, seeking injunctive relief under federal law and damages under state law. Count I asserts a pay-for-delay theory of liability under *§ 1 of the Sherman Act* against all defendants (i.e., AbbVie, Inc., AbbVie Biotechnology, Ltd., Amgen, Inc., Samsung Bioepis Co., Ltd., and Sandoz, Inc.), [109] ¶¶ 261-68, Count III asserts a market-allocation-agreement theory of liability under *§ 1 of the Sherman Act* against all defendants, *id.* ¶¶ 279-85, and Count V asserts a violation of *§ 2 of the Sherman Act* against AbbVie. *Id.* ¶¶ 295-300. Each federal antitrust claim comes with its state-law analog: Count II asserts a pay-for-delay theory of liability under state antitrust laws (and consumer protection laws that prohibit anticompetitive conduct) against all defendants, *id.* ¶¶ 269-78, Count IV asserts a market-allocation-agreement **[**25]** theory of liability under state antitrust laws (and consumer protection laws that prohibit anticompetitive conduct) against all defendants, *id.* ¶¶ 286-94, and Count VI asserts a monopolization theory of liability under state antitrust laws (and consumer protection laws that prohibit anticompetitive conduct) against AbbVie. *Id.* ¶¶ 301-08. Lastly, Count VII asserts violations of state laws that prohibit unfair and unconscionable conduct against AbbVie. *Id.* ¶¶ 309-406. For purposes of the *Sherman Act* claims, the complaint defines the relevant geographic market as the United States, *id.* ¶ 236, and alleges that AbbVie maintains 100% of the relevant market share for adalimumab. *Id.* ¶ 238.

III. Analysis

Defendants move to dismiss the complaint. With regard to the *§ 2* claims, AbbVie says there is nothing illegal about amassing a broad portfolio of legitimate patents and that, even if a few were issued erroneously, the *Noerr-Pennington* doctrine immunizes them from liability. With regard to the § 1 claims, defendants say that the settlements at issue do not violate ***antitrust law*** because they: allow AbbVie's competitors to enter the market before the expiration of AbbVie's patents, do not involve any **[**26]** reverse payments from AbbVie (the patentee) to Amgen, Samsung Bioepis, and Sandoz (the alleged infringers), and only divvy up the market in ways consistent with AbbVie's patent rights. Third, with regard to both the *§ 1* and *§ 2* claims, defendants argue that if a single one of AbbVie's patents is valid, that patent would have prevented plaintiffs from entering the market at all. Defendants' unlawful conduct was only the but-for cause of plaintiffs' alleged injury if defendants obtained every single one of their patents unlawfully. And that, defendants say, is not plausible. Lastly, defendants advance arguments particular to each of the dozens of state-law claims.

Amgen, Samsung Bioepis, and Sandoz add that they had to enter into the settlement agreements because their only other choices were years of expensive litigation over an impassable patent thicket or an at-risk launch likely to result in a hefty damages award. They say the complaint's assessment of their bargaining position is too rosy and that their negotiated entry dates did not harm competition.

As plaintiffs recognize, theirs is a new kind of antitrust claim. [144] at 28-35. Although the *§ 2* claim in some ways resembles the one asserted **[**27]** in *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp.*, which held that obtaining a patent **[*827]** by fraud can violate *§ 2 of the Sherman Act*, *382 U.S. 172, 174, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, and the one asserted in *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc.*, which assigned antitrust liability to "objectively baseless" petitioning that falls outside the protection of the *Noerr-Pennington* doctrine, *508 U.S. 49, 51, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) ("PRE")*, plaintiffs disclaim reliance on those cases. [144] at 26 n.3, 38. And while the § 1 claims rely heavily on *F.T.C. v. Actavis, Inc., 570 U.S. 136, 141, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, which calls for scrutiny of settlement agreements that require patent holders to pay money to alleged infringers (rather than the other way around), those claims bump against a sentence in *Actavis* that approved of settlements where the only reverse payment is an agreement permitting the alleged infringer to "enter the patentee's market prior to the patent's expiration." *Id. at 158*.

The complaint brings together a disparate set of aggressive but mostly protected actions to allege a scheme to harm competition and maintain high prices. The allegations—even when considered broadly and together for their potential to restrain trade—fall short of alleging the kind of competitive harm remedied by ***antitrust law***.

A. The *§ 2* Claims Against AbbVie [**28] and AbbVie Biotechnology Ltd.

HN10[] *Section 2 of the Sherman Act* prohibits the wrongful monopolization of interstate trade or commerce. *15 U.S.C. § 2*. In order to state a claim under *§ 2*, a plaintiff must allege "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 854 (7th Cir. 2011)*.

This complaint proposes a new theory of *§ 2* antitrust liability. Plaintiffs' claim is not that AbbVie obtained its patents by knowing and willful fraud. [144] at 27 n.4; *Ritz Camera & Image, LLC v. SanDisk Corp., 700 F.3d 503, 506 (Fed. Cir. 2012)*. Nor is their claim that it was anticompetitive to accumulate a large portfolio of patents. [144] at 26 n.3; *Automatic Radio Mfg. Co. v. Hazeltine Research, 339 U.S. 827, 829, 70 S. Ct. 894, 94 L. Ed. 1312, 1950 Dec. Comm'r Pat. 608 (1950)*. Nor is their claim that any one of AbbVie's petitioning activities was "objectively baseless." [144] at 38; *PRE, 508 U.S. at 51*.

Instead, the complaint alleges that AbbVie abused its monopoly over the U.S. market for adalimumab (which includes Humira and its biosimilars) when it gummed up progress toward lower prices by obtaining and asserting "swaths of invalid, unenforceable, or noninfringed patents without regard to the patents' merits." [109] ¶¶ 236-38; [144] at 44. By repeatedly and aggressively asserting **[**29]** this patent thicket during a lengthy, detailed regulatory process (and subsequent infringement litigation), AbbVie was able to delay its competitors and avoid any real examination of the patents' validity long enough to reap a few more years' worth of monopoly profit on its lucrative, patent-protected product, Humira. *Id.* at 44-45.

HN11[] Both the patent and antitrust laws aim to encourage innovation, industry, and competition. *Atari Games Corp. v. Nintendo of Am., Inc., 897 F.2d 1572, 1575 (Fed. Cir. 1990)*; *U.S. Const. art. I, § 8, cl. 8*. The former does this by dangling the carrot of a limited and temporary right to exclude others from practicing a patented invention and the latter by prohibiting "conduct **[*828]** which unfairly tends to destroy competition itself." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. Even though patents operate like limited exceptions to the *Sherman Act*, they do "not wholly insulate the patent owner from the antitrust laws." *Atari Games Corp., 897 F.2d at 1576*. And since it is unlawful to use monopoly power—however lawfully obtained—to "foreclose competition, to gain a competitive advantage, or to destroy a competitor," United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 92 L. Ed. 1236 (1948), *overruled on other grounds by* Copperweld Corp. v. Ind. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984), it is in some instances unlawful to use patents in ways that foreclose competition. United States v. Line Material Co., 333 U.S. 287, 308, 68 S. Ct. 550, 92 L. Ed. 701 (1948).

Plaintiffs say one such example is when a patentee acquires and asserts whole tracts of questionable patents as part of a bad-faith, **[**30]** intentional effort to prop up the market for an existing, expiring patented product. Their theory depends on another old premise: that petitioning the government (during patent prosecutions, the FDA approval process, and in the courts) can violate the antitrust laws if, in reality, that petitioning is nothing more than a sham meant to inhibit competition. ***HN12***[] Antitrust liability has long attached wherever there was a "pattern of baseless, repetitive claims" that shows the "administrative and judicial processes have been abused." California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 513, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972) (citations omitted). Although the First Amendment protects the right to petition the government, *see* E. R. R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961); United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965), it does not protect exercising that right as the "means or the pretext for achieving substantive evils which the legislature has the power to control." California Motor, 404 U.S. at 515 (citations omitted). But because immunized conduct cannot be aggregated with nonimmunized conduct without nullifying the immunity, it is necessary to identify protected and unprotected conduct. Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 839 (7th Cir. 2011) (the first step is to "identify any conduct that is immunized," and then, after that, to "consider the evidence of the remaining challenged conduct in the aggregate to see if it is sufficient to support antitrust liability").[8]

HN14[] In California Motor, the Court recognized that "a pattern of baseless, repetitive claims" instituted "without probable cause, and regardless of the merits" falls outside of *Noerr-Pennington* protection. California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 513, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972). PRE articulates a two-part test for identifying sham litigation: "[f]irst, the lawsuit must be objectively baseless in the sense that no reasonable **[*829]** litigant could realistically expect success on the merits." Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 51, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993). If the lawsuit is objectively baseless, then the court asks, "whether the baseless lawsuit conceals an attempt to interfere *directly* with the business relationships of a competitor, through the use of the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." Id. at 60-61 (cleaned up).

Some courts have cabined the "objectively baseless" requirement from PRE to situations where it was only necessary to assess whether a single action constituted sham petitioning. Primetime 24 Joint Venture v. Nat'l Broad., Co., 219 F.3d 92, 101 (2d Cir. 2000); Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 180 (3d Cir. 2015); Waugh Chapel S., LLC v. United Food & Commercial Workers Union Local 27, 728 F.3d 354, 363 (4th Cir. 2013); USS-POSCO Indus. v. Contra Costa Cty. Bldg. & Const. Trades Council, AFL-CIO, 31 F.3d 800, 810-11 (9th Cir. 1994). Plaintiffs rely on this line of cases to argue that AbbVie's serial use of legal process does not need to meet PRE's objectively baseless requirement (and that, instead, a more flexible test should be used to determine whether AbbVie's actions fell outside of **[**32]** *Noerr-Pennington*'s protection). *See* [144] at 42.

In U.S. Futures Exch., L.L.C. v. Bd. of Trade of the City of Chicago, Inc., 953 F.3d 955, 958 (7th Cir. 2020), *reh'g and reh'g en banc denied* (Apr. 23, 2020)—decided after briefing here—plaintiffs' theory (dubbed a "delay theory") invoked both the fraudulent misrepresentation and sham lawsuit exceptions to *Noerr-Pennington.* Id. at 959. The

[8] ***HN13***[] The *Noerr-Pennington* ***[**31]*** doctrine may be applied at the motion-to-dismiss stage. *See* Metro Cable Co. v. CATV of Rockford, Inc., 516 F.2d 220, 222 (7th Cir. 1975) (affirming district court's dismissal of the complaint on *Noerr-Pennington* grounds). *See also* United Food & Commer. Workers Unions & Employers Midwest Health Benefits Fund v. Novartis Pharms. Corp., 902 F.3d 1, 7 (1st Cir. 2018); Armstrong Surgical Ctr., Inc. v. Armstrong Cty. Mem'l Hosp., 185 F.3d 154, 164 (3d Cir. 1999); Mark Aero, Inc. v. Trans World Airlines, Inc., 580 F.2d 288, 290 (8th Cir. 1978); Oregon Nat. Res. Council v. Mohla, 944 F.2d 531, 533 (9th Cir. 1991); GF Gaming Corp. v. City of Black Hawk, Colo., 405 F.3d 876, 884 (10th Cir. 2005).

court first found that the fraudulent misrepresentation exception did not apply because the proceedings at issue were legislative. *Id. at 963*. ***HN15***[] Then, the court held that the "objectively reasonable" requirement from *PRE* applies to the sham lawsuit exception whether the allegations involve a single instance of sham petitioning or a series. *Id. at 963-65*. *See also* *Puerto Rico Tel. Co., Inc. v. San Juan Cable LLC, 874 F.3d 767, 769 (1st Cir. 2017)*. Any lawsuit "reasonably calculated to elicit a favorable outcome" is objectively reasonable, and any "successful action self-proves its reasonableness." *Id. at 963* (citations omitted). Because the subjective prong of *PRE* only comes into play once the objective prong is satisfied, the plaintiff in *U.S. Futures* was unable to prove that the proceedings were a sham "merely by showing that its competitor's purposes were to delay the plaintiff's entry into the market." *Id. at 965* (quoting *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*) (cleaned up).[9]

The claim here involves adjudicative proceedings. AbbVie's alleged transgressions occurred **[**33]** in three venues: patent prosecutions and *inter partes* review proceedings before the United States Patent and Trademark Office, the biologic licensing process before the Food and Drug Administration, and patent infringement actions in federal district court. *See* [109] ¶¶ 32-43, 54-70. The last of those three is quintessentially adjudicative. ***HN16***[] Proceedings before the Patent and Trademark Office **[*830]** are also adjudicative. The PTO reviews patent applications submitted by interested parties often represented by counsel with specialized legal training, engages in formal fact-finding based on submissions made pursuant to duties of disclosure, candor, and good faith, and issues decisions subject to definite standards and judicial review. *See* [109] ¶¶ 54-58; *37 C.F.R. § 1.56(a)*.

The proceedings before the Food and Drug Administration are also adjudicative. Members of Congress have been critical of AbbVie's conduct before the Food and Drug Administration and some have even introduced legislation that could stymie AbbVie's efforts to obtain similar patent thickets in the future. *See* [109] ¶¶ 214-223. But those actions say nothing about the character of the FDA's process. ***HN17***[] The FDA reviews applications for new drugs submitted **[**34]** in nonadversarial processes marked by strict guidelines. *See id.* ¶¶ 32-43. That formalized review looks at a wealth of technical information and is guided by standards set forth by federal law. *See, e.g.*, [109] ¶ 40; *42 U.S.C. § 262*.

Plaintiffs' claim is not one under *PRE*. [144] at 38. But under *U.S. Futures*, AbbVie's conduct is protected by *Noerr-Pennington* (and not subject to antitrust scrutiny) unless its petitions—its patent applications, patent dance exchanges, and the lawsuits that followed—were objectively baseless. *U.S. Futures Exch., 953 F.3d at 958*. It is not enough to describe "numerous flaws in AbbVie's patents and its assertion of them." *See* [144] at 38. Plaintiffs have to allege that AbbVie's petitioning was objectively baseless.

The question then becomes whether plaintiffs have plausibly alleged objectively baseless conduct.[10] AbbVie's rate of success with its patent applications—more than half (53.4%) of AbbVie's patent applications resulted in patents, [109] ¶ 99—is not "irrelevant," [144] at 43; it compels the conclusion, as a matter of law, that more than half of AbbVie's patent applications were not objectively baseless. *U.S. Futures Exch., 953 F.3d at 963-64* ("a successful action self-proves its reasonableness"). It is also not the product of guesswork—that **[**35]** rate is apparent on the

---

[9] *U.S. Futures* applied the objectively baseless test from *PRE* for two reasons: (1) that is the test to apply whenever the allegations involve a pattern of sham lawsuits, *id. at 965*, and (2) the conduct alleged involved a single proceeding within which the defendants were accused of making multiple filings, a situation which does not normally qualify as a "pattern." *See id. at 965-66*. Although the allegations here are characterized by a wide-ranging pattern of patent prosecutions, BPCIA exchanges, and federal litigation, *U.S. Futures* holds that the same test applies to that conduct, too.

[10] *See* *Michael v. Letchinger, No. 10 C 3897, 2011 U.S. Dist. LEXIS 86685, 2011 WL 3471082, at *11 (N.D. Ill. Aug. 5, 2011)* (applying plausibility standard to an allegation that a zoning and building code lawsuit was objectively baseless); *In re Skelaxin Metaxalone Antitrust Litig., No. 1:12-MD-2343, 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185, at *22 (E.D. Tenn. May 20, 2013)* (applying plausibility standard to claims of a series of objectively baseless sham petitioning under *California Motor Transport Co.*); *Inserra Supermarkets, Inc. v. Stop & Shop Supermarket Co., No. 16-CV-01697, 2017 U.S. Dist. LEXIS 118054, 2017 WL 3189029, at *3 (D.N.J. July 27, 2017)* (same).

face of the complaint. The allegations about AbbVie's petitioning of the USPTO are not plausible acts of sham petitioning.

Even in circuits that apply the type of more flexible test plaintiffs say should be applied here, a batting average of .534 would be too high to plausibly allege sham petitioning as a matter of law. *Compare* *Waugh Chapel S., LLC v. United Food & Commercial Workers Union Local 27, 728 F.3d 354, 365 (4th Cir. 2013)* (one out of fourteen (7%) success rate suggests a sham) *with* *USS-POSCO, 31 F.3d at 811* (no sham litigation when fifteen of twenty-nine (52%) of the lawsuits were successful); *Kaiser Found. Health Plan, Inc. v. Abbott Labs., Inc., 552 F.3d 1033, 1046-47 (9th Cir. 2009)* (no sham litigation when seven out of seventeen (41%) of the lawsuits were successful and where, in the other ten, the defendants had plausible arguments on which they could have prevailed); *Twin City Bakery Workers & Welfare Fund v. Astra Aktiebolag, 207 F.Supp.2d 221, 224 (S.D.N.Y. 2002)* (no sham litigation when "claims of infringement of four of the six asserted patents ... proceed[ed] **[*831]** beyond summary judgment, and two of the four ... proceed[ed] through trial").[11]

AbbVie's success rate during *inter partes* review was even higher, and establishes that AbbVie's conduct there was not objectively baseless, either. Although the Patent Trial and Appeal Board found invalid **[**36]** three of the five AbbVie patents that it reviewed (and even though AbbVie terminated the other two before a final determination could be reached), [109] ¶ 108, the PTAB declined to initiate *inter partes* review with regard to thirteen of AbbVie's other patents, finding there was no reasonable likelihood that the parties challenging AbbVie's patents would succeed on even one of the challenged claims. *See supra* n.5; *35 U.S.C. § 314*. True, patents cannot be challenged for failing to account for prior art during *inter partes* review, and even when AbbVie succeeded in convincing the PTAB to decline to initiate *inter partes* review, that success did not result in a finding that AbbVie's patents were valid. *Ethicon, Inc. v. Quigg, 849 F.2d 1422, 1429 n.3 (Fed. Cir. 1988)*; *In re TLI Commc'ns LLC Patent Litig., 87 F.Supp.3d 773, 781, 804 (E.D. Va. 2015)* (finding patent invalid under *§ 101* after an *inter partes* review petition was denied), *aff'd*, *823 F.3d 607 (Fed. Cir. 2016)*.[12] But the high success rate—thirteen out of eighteen, or 72.2%—renders implausible the allegation that AbbVie's submissions to the PTAB during those *inter partes* review proceedings were objectively baseless (at least without some other factual allegation to overcome that observation). AbbVie's petitioning before the USPTO and the PTAB is protected by *Noerr-Pennington*.[13]

---

[11] The complaint also contains allegations that AbbVie made material misrepresentations and omissions to the USPTO during the prosecution of its patents. [109] ¶ 114. But the complaint does not assert a *Walker Process* claim, [144] at 27 n.4, likely because these plaintiffs would lack standing to do so. *Farag v. Health Care Serv. Corp., 2017 U.S. Dist. LEXIS 103302, 2017 WL 2868999, at *6 (N.D. Ill. July 5, 2017)*. In the end, even if plaintiffs could pursue a misrepresentation theory (while disclaiming reliance on *Walker Process*), plaintiffs effectively concede that not all of AbbVie's patents are invalid and they do not intend to prove that AbbVie's conduct was objectively baseless. That is enough to establish *Noerr-Pennington* protection for AbbVie's conduct before the USPTO.

[12] Plaintiffs identify another argument that could not have been advanced during *inter partes* review and that diminishes any suggestion that AbbVie's patent portfolio is legitimate: because AbbVie had to describe in its original patent application the best mode contemplated for carrying out the invention (i.e., adalimumab), *35 U.S.C. § 112(a)*, the formulation and manufacturing patents that post-date the original adalimumab patent cannot possibly have prevented biosimilar competitors from coming to market. [144] at 39-40. As a result, plaintiffs say AbbVie should be estopped from asserting that those patents ever could have prevented biosimilar competitors from coming to market. *Id.* at 40. But even if AbbVie could not point to some of its patents as barriers to biosimilar entry, plaintiffs' theory remains that the entire thicket and conduct surrounding the thicket restrained competition. Picking at some of the patents as legally irrelevant to biosimilar manufacturing because of the original patent's best-mode disclosure is just another way to say that AbbVie made unreasonable representations during the patent dance. But that the thicket and surrounding conduct were not as formidable as they may have seemed is a minor point given plaintiffs' overarching claim, and raises the question of how plausible it is to glean concrete harm to consumers from the biosimilar manufacturers' analysis of risk when taking on AbbVie's patents.

[13] To the extent AbbVie's petitioning before the USPTO and PTAB was unsuccessful, that petitioning did not give rise to an antitrust injury. *See* § III.C. AbbVie's patent applications required no response from any of the biosimilar manufacturers and were not so numerous that it is plausible to allege that their sheer volume intimidated AbbVie's sophisticated competitors into forgoing

[*832] To the degree the **[**37]** complaint describes a kernel of objectively baseless petitioning, it is what happened during the patent dances.[14] There, AbbVie allegedly asserted without basis that if Amgen launched its biosimilar, it would infringe no less than sixty-six of AbbVie's patents. [109] ¶ 143. When Amgen disagreed, AbbVie failed to address Amgen's concerns and declined to elaborate (even after Amgen repeatedly notified AbbVie of its failures to respond). *Id.* ¶¶ 144-147. During AbbVie's prelitigation exchanges with Sandoz, AbbVie listed nine formulation patents that specified the use of a buffer system with ingredients that were in neither Sandoz's biosimilar nor Humira—i.e., that were objectively baseless to assert. *See also id.* ¶¶ 167-168. AbbVie also listed patents that were not infringed or that had been invalidated during its patent dance with Boehringer. [109] ¶ 180.

AbbVie's presumptively valid patents were not presumptively infringed,[15] and unlike the proceedings before the USPTO and the PTAB, no neutral third party ever decided who was successful in these pre-litigation exchanges. Only successful petitioning self-proves its reasonableness, *see* *U.S. Futures Exch., 953 F.3d at 963*, and AbbVie's patent dance exchanges were **[**38]** not successful, so they may still have been objectively baseless. *But see* *Tyco Healthcare Grp. LP v. Mut. Pharm. Co., 762 F.3d 1338, 1345 (Fed. Cir. 2014)* ("it will be a rare case in which a patentee's assertion of its patent in the face of a claim of invalidity will be so unreasonable as to support a claim that the patentee has engaged in sham litigation"). And without a high success rate to make AbbVie's actions appear reasonable, it remains plausible that at least some of the assertions AbbVie made during the patent dances were objectively baseless.

One difference between AbbVie's patent applications to the USPTO and its responses during the patent dance is that AbbVie did not initiate the patent dance—the challengers did. *Kaiser Found. Health Plan, Inc. v. Abbott Labs., 552 F.3d 1033, 1047 (9th Cir. 2009)* ("[i]t is true that Abbott was litigious, but ... [t]he volume of Abbott's suits was dependent on the number **[*833]** of generic companies attempting to enter the ... marketplace, a matter over which Abbott had no control"). Nonetheless, AbbVie participated. It was not forced to assert any patents at all during the patent dance (and it certainly was not forced to assert patents that were invalid or not infringed). AbbVie's conduct during the patent dances was not protected by *Noerr-Pennington*. What effect AbbVie's **[**39]** actions during the patent dance had on the market for Humira is another question. *See* § III.C below.

With regard to the infringement litigation that followed, AbbVie's right to pursue those lawsuits was not without limitation. *Asahi Glass Co. v. Pentech Pharms., Inc., 289 F. Supp. 2d 986, 992-93 (N.D. Ill. 2003)*, *dismissed*, *104 Fed. Appx. 178 (Fed. Cir. 2004)* (***HN19***[↑] anyone with a patent not obtained by fraud enjoys a presumption of validity that entitles them "to sue alleged infringers, and to settle with them, whatever [their] private doubts, unless a neutral observer would reasonably think either that the patent was almost certain to be declared invalid, or the defendants were almost certain to be found not to have infringed it, if the suit went to judgment"). One potential

the production of biosimilars (especially not to the degree those petitions were objectively baseless), and plaintiffs have not alleged that any of AbbVie's submissions during the *inter partes* reviews were objectively baseless. *See* [109] ¶ 108.

[14] Actually, the exchanges that take place between applicants and reference product sponsors during the patent dance portion of the FDA's biosimilar application process might not qualify as petitioning at all, since neither party is (at that moment) asking the government to do anything. *See* *Freeman v. Lasky, Haas & Cohler, 410 F.3d 1180, 1184 (9th Cir. 2005)* ("discovery is merely communication between parties as an aid to litigation," and is not a petition because it is not "in any sense a communication to the court," although "conduct incidental to" a petition is protected if the petition itself is protected). Still, as discussed below, plaintiffs fail to allege a *§ 2* claim because most of the conduct upon which their allegations are based was immunized, and because plaintiffs' theory depends on considering AbbVie's conduct as a whole. *See* [144] at 44-45. *See also* *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1155 n.114 (7th Cir. 1983)*.

[15] ***HN18***[↑] Even if patentees are presumed to enforce their patents in good faith, *see* *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1369 (Fed. Cir. 1998)* (the law "recognizes a presumption that the assertion of a duly granted patent is made in good faith"), that presumption is evidentiary, *id.*, and evidentiary presumptions do not overcome plausible allegations at the pleading stage. *See also* *Golan v. Pingel Enter., Inc., 310 F.3d 1360, 1371 (Fed. Cir. 2002)* ("if the party challenging such statements under state or federal law presents clear and convincing evidence that the infringement allegations are objectively false, and that the patentee made them in bad faith, viz., with knowledge of their incorrectness or falsity, or disregard for either, the statements are actionable and are not protected by the existence of a patent").

problem for plaintiffs is that AbbVie was required by law to bring those infringement suits, 42 U.S.C. § 262(l)(6) ("not later than 30 days after such agreement, the reference product sponsor shall bring an action for patent infringement with respect to each such patent"), which gives AbbVie an objectively reasonable basis for bringing them. *See* Kaiser Found. Health Plan, Inc., 552 F.3d at 1047.

In any event, each of the lawsuits was settled on terms that foreclose a finding of objective baselessness. ***HN20***[] When a lawsuit terminates in a settlement that provides substantial value to an antitrust defendant accused **[**40]** of initiating that lawsuit as a sham, that lawsuit is objectively reasonable. *See* New W., L.P. v. City of Joliet, 491 F.3d 717, 722 (7th Cir. 2007); *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1008 (9th Cir. 2008)*.

AbbVie settled its suit with Amgen roughly one year after it began, agreeing to allow Amgen to enter the U.S. market five years before the expiration of AbbVie's U.S. patents. [109] ¶ 151. It then entered into similar settlements with other biosimilar applicants, all of which contemplated U.S. market entry dates during calendar year 2023. *See id.* ¶¶ 157, 160, 170, 173-176, 184. At least with regard to plaintiffs' § 2 claims, looking just at the allegations in the complaint, these settlements (all of which required concessions from both sides) render unreasonable any inference that the litigation that preceded them was an objectively baseless sham maintained by AbbVie to extend the patent-backed monopoly it had obtained in the market for Humira.

The foregoing raises the question as to what conduct should be considered part of the alleged overarching scheme to destroy competition and what parts should be swept aside as lawful petitioning. ***HN21***[] There is a risk that by focusing only on each individual action in a series, a broader pattern of anticompetitive conduct might escape policing and remedy. Plaintiffs must **[**41]** be given the "full benefit of [their] proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each," but at the same time, conduct immunized from antitrust liability cannot be aggregated with nonimmunized conduct without nullifying the immunity. Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 839 (7th Cir. 2011) (quoting Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)). *See also* City of Anaheim v. S. California Edison Co., 955 F.2d 1373, 1376 (9th Cir. **[*834]** 1992) (considering the "synergistic effect" of the "mixture of the elements").

Here, the vast majority of the alleged scheme is immunized from antitrust scrutiny, and what's left are a few sharp elbows thrown at sophisticated competitors participating in regulated patent and biologic-drug regimes. Some of AbbVie's conduct was not immunized by the *Noerr-Pennington* doctrine—including what plaintiffs allege to be the heart of their monopolization claim—but much of what preceded and followed that conduct was immunized, which makes the entirety of alleged monopolization scheme immune, because plaintiffs' theory depends on all the components of AbbVie's conduct as the means to suppress competition. [144] at 44-45.

Unlike many of the cases that have considered a series of allegedly sham petitions, these claims involve the patent system. That difference is all the more reason **[**42]** to decline to recognize plaintiffs' new theory of antitrust liability. ***HN22***[] Patents are entitled to a presumption of validity, 35 U.S.C. § 282(a), and even though that presumption is not so strong as to make patents "completely unassailable," Chicago Rawhide Mfg. Co. v. Crane Packing Co., 523 F.2d 452, 458 (7th Cir. 1975), it is a presumption rightly based on the "expertise of patent examiners presumed to have done their job." Brooktree Corp. v. Advanced Micro Devices, Inc., 977 F.2d 1555, 1574 (Fed. Cir. 1992). The patent prosecution system is no doubt imperfect, Saint Regis Mohawk Tribe v. Mylan Pharm. Inc., 896 F.3d 1322, 1331 (Fed. Cir. 2018) (Dyk, J., concurring) (noting that the USPTO is an agency with "finite resources that sometimes issues patents in error"), but even if it is so broken that patent examiners are having the wool pulled over their eyes more than half the time by applicants acting mostly nonfraudulently and with disregard for their applications' chances of success, the proper fix is not to use antitrust doctrine to launch a collateral attack on 132 patents, thirteen *inter partes* review determinations, multiple patent dance exchanges and at least two patent infringement lawsuits. Doing so will not revamp the FDA's biologics application process or the USPTO's drug patenting process. *See* Areeda & Hovenkamp, §§ 221, 704b4 (***HN23***[] "the patent system might be thought to be ... in need of reform," but "the antitrust laws were not designed to repair other **[**43]** government regulatory processes").

The cases plaintiffs cite in support of their new theory of antitrust liability are unconvincing and distinguishable. *In re Neurontin Antitrust Litigation* is inconsistent with *U.S. Futures, 953 F.3d 955, 958 (7th Cir. 2020)*, and, in any event, plaintiffs there firmly alleged that the petitioning in question was objectively baseless. *No. 02-1390, 2009 U.S. Dist. LEXIS 77475, 2009 WL 2751029, at *18-*23 (D.N.J. Aug. 28, 2009)*. So did the plaintiffs in *Nuance Communs., Inc. v. Omilia Natural Language Sols., Ltd., No. CV 19-11438-PBS, 2020 U.S. Dist. LEXIS 79718, 2020 WL 2198362 (D. Mass. May 6, 2020)*; [167]. Here, plaintiffs disclaim any intent to prove objectively baseless conduct. And in *Nuance Communications*, there was no basis for assessing the merits of the *§ 2* claim at the motion-to-dismiss stage, *2020 U.S. Dist. LEXIS 79718, 2020 WL 2198362 at *5*, while here, the vast majority of the petitioning has already proved itself reasonable. *U.S. Futures Exch., 953 F.3d at 963*.

Also distinguishable are the cases addressing the practice of "pooling" existing patents. In *Kobe, Inc. v. Dempsey Pump Co.*, the defendants were accused of purchasing large numbers of patents from the entities to whom the patents had been issued. *198 F.2d 416, 420 (10th Cir. 1952)*. *See also* *Intellectual Ventures I LLC v. Capital One Financial Corp., 99 F.Supp.3d 610, 626 (D. Md. 2015)* (the alleged conduct at issue there was the intentional acquisition of "a massive patent **[*835]** portfolio"). The practice of "pooling" patents does not involve petitioning the government, it involves a series of private transactions, **[**44]** and defendants' *First Amendment* right to petition the government for internally developed patents (and, to a certain degree, for FDA approval) is what protects most of their activity from suit here. Areeda & Hovenkamp, § 704c ("we would never hold internal patent development to be a *§ 2* exclusionary practice because we do not wish to discourage innovation, even by monopolists"). *See also* *Abbott Labs. v. Teva Pharms. USA, Inc., 432 F.Supp.2d 408, 429 (D. Del. 2006)* ("*Kobe* ... is contrary to more recent pronouncements by the Supreme Court concerning *Noerr* immunity"); *Axis, S.p.A. v. Micafil, Inc., 870 F.2d 1105, 1107 (6th Cir. 1989)* (dismissing antitrust action when allegation was that one company raised barriers to entering a market by acquiring companies that held patents relevant to the industry). Pooling patents also facilitates collusion among competitors, *Princo Corp. v. ITC, 616 F.3d 1318, 1334-35 (Fed. Cir. 2010)* (en banc), which is not at issue in AbbVie's patent-development conduct. And plaintiffs' reliance on *Dairy Foods Inc. v. Dairy Maid Prods. Coop.* is misplaced because *Dairy Foods* was decided before *California Motor* and *PRE*. *297 F.2d 805, 809 (7th Cir. 1961)*.

Lastly, plaintiffs say the rule of reason should be applied to their *§ 2* claims, that they need only make out a prima facie case of anticompetitive effect, and that any procompetitive justifications must be assessed later. *See* *In re Opana Er Antritrust Litig., 162 F. Supp. 3d 704, 719 (N.D. Ill. 2016)*. ***HN24***[] The rule of reason analysis involves an "inquiry into market power and **[**45]** market structure designed to assess the ... actual effect" of the contract, combination, or conspiracy, *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, or, in *§ 2* cases, of an alleged monopolization. *Hennessy Indus. Inc. v. FMC Corp., 779 F.2d 402, 404-05 (7th Cir. 1985)*. With regard to the conduct immunized by the *Noerr-Pennington* doctrine, rule of reason analysis is not necessary. *See* *Wilk v. Am. Med. Ass'n, 895 F.2d 352, 357 (7th Cir. 1990)*. And since so much of the conduct in question is immunized, and since the only parts that may not have been are inseparable from the alleged *§ 2* scheme, the claim fails. *See* *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 839 (7th Cir. 2011)* (cautioning against aggregating conduct to nullify immunity). But even if AbbVie's nonimmunized conduct is sufficient to be a standalone scheme of monopolization, the complaint still fails for lack of an antitrust injury because it is not plausible that AbbVie's nonimmunized conduct intimidated the other defendants into delaying the launch of their biosimilars (or otherwise caused any antitrust injury). *See* § III.C below.

B. The § 1 Claims Against all Defendants

HN25[] *Section 1 of the Sherman Act* declares illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. In order to state a claim under *§ 1*, plaintiffs must plead "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint **[**46]** of trade in [a] relevant market; and (3) an accompanying injury." *Deppe v. NCAA, 893 F.3d 498, 501 (7th Cir. 2018)*. When assessing whether a particular restraint enhances or inhibits competition, courts apply three categories of analysis: per se, quick-look, and rule of reason. *Agnew v. NCAA, 683 F.3d 328, 335 (7th Cir. 2012)*. All three are "meant to answer the same question: whether or not the challenged restraint enhances competition." *Id.* (quotations omitted).

[*836] ***HN26***[] Per se analysis is applied when a "practice facially appears to be one that would always or almost always tend to restrict competition and decrease output," such as horizontal price fixing and output limitations. *Id. at 336*. The quick-look approach asks whether an "observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect." *Id.* (quoting *California Dental Ass'n v. F.T.C., 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*). If legitimate, procompetitive justifications for facially anticompetitive behavior are found, then rule of reason analysis may be necessary. *Id.* Under the rule of reason, plaintiffs must allege that "an agreement or contract has an anticompetitive effect on a given market within a given geographic area." *Id. at 335*.

The complaint alleges that AbbVie, Amgen, Samsung Bioepis, and Sandoz violated *§ 1* when they entered into **[**47]** settlement agreements that required the latter three defendants to temporarily give up their efforts to introduce biosimilars in the U.S. market in return for near-immediate permission to launch their biosimilars in Europe. [109] ¶¶ 141-212. Plaintiffs say that those agreements violated *§ 1* under both a pay-for-delay theory (i.e., AbbVie paid off its competitors to buy itself more time as a monopolist), *id.* ¶¶ 261-68, and a market-allocation theory (i.e., AbbVie allocated to itself the U.S. market and allocated to the other defendants the European market). *Id.* ¶¶ 279-85.

These agreements do not justify per se treatment because they are not facially anticompetitive in any way that would always or almost always tend to restrict competition. The agreements do not set prices for Humira and its biosimilars, nor do they include terms setting the quantity of Humira (or its biosimilars) that is to be sold in the market. *See Agnew, 683 F.3d at 336* (***HN27***[] "[h]orizontal price fixing and output limitation are classic examples of behavior that is considered anticompetitive per se"). Even reverse-payment patent settlement agreements that involve cash payments from the patentee to the alleged infringer do not usually receive per **[**48]** se treatment, *see FTC v. Actavis, Inc., 570 U.S. 136, 158-59, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, and the types of agreements at issue here—which involve two sets of early entry dates in two different regions—are even less facially restrictive because they do not involve a cash payment in return for a promise to keep a competing product off the market.

HN28[] Market allocation agreements, however, are "classic examples" of per se *§ 1* violations. *United States v. Topco Assocs., Inc., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. In a market allocation agreement, competitors at the same level of a market "allocate territories in order to minimize competition." *Id.* For instance, in *Palmer v. BRG of Georgia, Inc.*, it was a per se violation of *§ 1* for *BRG* to promise not to provide bar review courses outside of Georgia in return for a promise from its competitor to not provide bar review courses inside of Georgia. *498 U.S. 46, 47, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*. *See also Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 152 F.3d 588, 591 (7th Cir. 1998)* (the defendants "entered into agreements with competitors to stay out of each other's territories").

According to plaintiffs, the European entry dates are the quid pro quo for the U.S. market entry dates, and for the period that falls between the two, AbbVie effectively allocated to itself the U.S. market while allocating to the other defendants the European market. [144] at 47-48. The result is that, in the interim, consumers in **[*837]** the U.S. are "subsidizing **[**49]** competition in Europe." *Id.* at 48.

One difference between the usual market allocation agreement and the one alleged here is that there is no allegation that AbbVie planned to stop selling Humira in Europe after Amgen, Sandoz, Samsung Bioepis, and the others introduced their biosimilars. *See* [109] ¶¶ 203, 205, 209. That does not necessarily sink plaintiffs' claim. Areeda & Hovenkamp, § 2030c; *Blackburn v. Sweeney, 53 F.3d 825, 827 (7th Cir. 1995)* (***HN29***[] "[t]o fit under the *per se* rule" a horizontal, market-allocation agreement "need not foreclose all possible avenues of competition"). For instance, in *United States v. Topco*, one of the geographic restrictions that was found per se unlawful did not completely bar sales in the geographic region but placed some parties at a disadvantage in that region. *405 U.S. 596, 601-02, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*.

The first difference here is that this complaint mentions no such disadvantages in either the U.S. or Europe. There is no allegation that Amgen, Sandoz, Samsung Bioepis, or the others could only market their biosimilar in Europe (or in the U.S.) using a certain label, or to certain kinds of doctors, or for a certain price, or by using certain kinds of advertisements. Once the entry dates passed, all competitors were free to compete on level ground. *See* [109] ¶¶ **[**50]** 203-204.

The second (and bigger) difference is that AbbVie is asserting patents. ***HN30***[] Patents come with the right to selectively license the patent "to the whole or any specific part of the United States." *35 U.S.C. § 261*; Areeda & Hovenkamp, § 704b4 ("a patent dispute that settles with a market division license agreement will be approved, and the courts repeatedly state that they are loath to inquire into such things as whether the patents in question are valid"). ***HN31***[] A patentee may also issue territorial licenses that allow competitors to sell patented products in some foreign countries but not others (and not in the U.S.). *Dunlop Co. v. Kelsey-Hayes Co., 484 F.2d 407, 417 (6th Cir. 1973)*. *See also* Areeda & Hovenkamp, § 2044a1 (the *Patent Act* does not protect horizontal territorial divisions that do not involve the transfer of intellectual property rights unless the agreement resolves a bona fide intellectual property dispute, in which case the agreement receives "special consideration"); § 2045a ("[A]ssuming a genuine dispute, the outcome of even a settlement agreement producing a per se antitrust violation might be no more anticompetitive than the outcome of litigation.").

HN32[] Market allocation agreements are not free from per se treatment just because they involve intellectual property licenses, **[**51]** *see* *United States v. Sealy, Inc., 388 U.S. 350, 351, 357-59, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*, but patents are different from other types of intellectual property when it comes to geographic restrictions, and an agreement to permit entry into a market previously protected by a patent does not become a per se invalid market allocation agreement just because it is specific to one territory (or one country). *35 U.S.C. § 261*; Areeda & Hovenkamp, § 2044a1 (the "most obvious" reading of the *Patent Act* is that, "where the patentee also makes the manufactured product in a territory, the statute explicitly authorizes a form of 'horizontal' territorial division that would be illegal per se if done in the absence of an intellectual property license"). The settlement agreements here are not market-allocation agreements, as that term is understood for per se treatment.

HN33[] In any event, per se treatment is disfavored for novel theories of antitrust violations like this one. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* ("*Per se* treatment is appropriate **[*838]** once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it.") (citations omitted); *United States v. Topco Assocs., Inc., 405 U.S. 596, 607-08, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)* ("[i]t is only after considerable experience with certain business relationships that courts classify them as per se violations of the *Sherman Act*"). **[**52]** The agreements are not per se unlawful under *§ 1*.

The quick-look test is not the right test, either, because an observer with a rudimentary understanding of economics would not conclude that the agreements have an anticompetitive effect. *California Dental Ass'n v. F.T.C., 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. AbbVie's intellectual property portfolio contains many Humira-related patents, and competitors Amgen, Sandoz, and Samsung Bioepis are all seeking to introduce drugs that are (by design) very similar to Humira. ***HN34***[] An agreement that allows competitors to enter markets from which there is a chance they would otherwise be excluded is not on its face anticompetitive. Even if the rudimentary economist is informed that most of the patents are likely invalid and uninfringed and being asserted without regard to their validity, there are still legitimate, procompetitive justifications for the agreements that require full rule of reason analysis (for instance, the agreements provide certainty to both parties and avoid further litigation costs). *See* *Agnew v. NCAA, 683 F.3d 328, 335 (7th Cir. 2012)*. Because a "great likelihood of anticompetitive effect" cannot "easily be ascertained," *California Dental, 526 U.S. at 770*, the quick look test is not right for these agreements, either.

The rule of reason is a better fit, although the question at this **[**53]** stage is simply whether there is a plausible claim for a restraint on competition.[16] ***HN35***[] Reverse-payment settlements (where the patentee pays the alleged infringer rather than the other way around) trigger *§ 1* antitrust scrutiny and rule of reason analysis. *FTC v. Actavis, Inc., 570 U.S. 136, 158, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. In *Actavis*, the patent holder settled its infringement claims against a generic drug manufacturer. *Id. at 144-45*. In the settlement, the patent holder paid the alleged infringer and the alleged infringer agreed to delay its entry into the market. *Id. at 145*. That "unusual" form of settlement, where an alleged infringer received money to stay away from the patent holder's market, raised the concern that the agreement had an adverse effect on competition. *Id. at 147-48, 152*. ***HN36***[] Ordinarily, a patent holder has some entitlement to monopoly profits for the duration of its patent and consumers benefit from a deal to allow a competitor to enter the market before the patent expires. *Id. at 153-54*. But the *Actavis* settlement suggested that the patents were at risk and that the patentee purchased an opportunity to keep prices set at its preferred level—sharing monopoly profits with a competitor without consumer gains. *Id. at 154*. ***HN37***[] "In sum, a reverse payment, where large and unjustified, can bring with **[*839]** it the risk **[**54]** of significant anticompetitive effects." *Id. at 159*.

HN38[] Although scrutiny of such settlements can lead to "time-consuming, complex, and expensive litigation," the Court rejected a blanket rule immunizing reverse-payment patent-infringement settlements from antitrust scrutiny. Procompetitive justifications (e.g., the avoidance of litigation costs) can be examined and accounted for as part of the rule of reason analysis. *Id. at 156*. And fears that it would be expensive and time-consuming to assess the value of the underlying patent claim are mitigated by the fact that it is "normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham ...)." *Id. at 157*. The size of the reverse payment can serve as a proxy for the patent's weakness without forcing a court to conduct a "detailed exploration of the validity of the patent itself." *Id. at 157-58*. A rule of reason analysis would not be cumbersome when the size of the payment suggests that the patentee possessed the market power it needed to bring about anticompetitive harm. *Id. at 157*.

HN39[] To avoid deterring settlements because of exposure to antitrust liability, the Court noted **[**55]** an important exception. Parties remain free to settle on other terms—for example, "by allowing the generic manufacturer to enter the patentee's market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point." *Id. at 158*.

The settlements here and their context are different than in *Actavis*. The *Actavis* settlement and its *Hatch-Waxman Act* context conferred limited exclusivity on the alleged infringer (*Actavis*, the generic manufacturer that was the first to file an abbreviated application), thereby allowing a patent monopoly to be shared, but not open to competition. *F.T.C. v. Actavis, Inc., 570 U.S. 136, 155, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. Here, Amgen was not the only party to pursue litigation and reach an agreement for an early U.S. market-entry date—the complaint mentions eight other companies that followed closely on its heels (Samsung Bioepis, Mylan, Sandoz, Fresenius, Momenta, Pfizer, Coherus, and Boehringer). *See* [109] ¶¶ 141-184. Plaintiffs no longer allege that AbbVie granted any exclusivity to Amgen. *Id.* ¶ 155; *see* [126-1]; [126-2]; [144] at 46 n.15. Concerns that settlements like the one at issue here allow for sharing of monopoly profits to the detriment of consumers are undermined by the allegation that **[**56]** a wave of challengers stands waiting in the wings to sell adalimumab, and that none of them was forced to wait longer than the first-filer because of a settlement agreement. [109] ¶¶ 141-184; [144] at 46 n.15.

On their face, the U.S. settlements here are settlements that allow for early entry without a payment. ***HN40***[] *Actavis* identifies a settlement that allows early entry but without the patentee paying a competitor to stay out of the market as one type of agreement that is not an antitrust problem. *Actavis, Inc., 570 U.S. at 158*. This makes sense

---

[16] It is not always necessary to determine which of the three categories of analysis should be applied when ruling on a motion to dismiss. *City of Rockford v. Mallinckrodt ARD, Inc., 360 F.Supp.3d 730, 754 (N.D. Ill. 2019)*, *reconsideration denied*, *No. 17 C 50107, 2019 U.S. Dist. LEXIS 103885, 2019 WL 2763181 (N.D. Ill. May 3, 2019)*. *See also* Areeda & Hovenkamp, § 305(e) ("Often ... the decision about which rule is to be employed will await facts that are developed only in discovery.") But there are no facts that need to be developed before determining which rule to apply here. The plaintiffs have alleged in their complaint the basic terms of the agreements and how they affected the market. *See* [109] ¶¶ 157-210.

because such settlements increase competition by cutting monopolies short. For instance, in *Asahi Glass Co. v. Pentech Pharms., Inc.*, a patentee had reached a settlement with a competitor that allowed that competitor to sell one of the patentee's drugs in Puerto Rico immediately and, in the rest of the U.S., as soon as any other generic version hit the market. *289 F.Supp.2d 986, 992-93 (N.D. Ill. 2003)*, *dismissed*, *104 Fed. Appx. 178 (Fed. Cir. 2004)*. There was no antitrust violation because the only "payment" was competition itself. *Id. at 994* ("the 'payment' of Puerto Rico ... increased the **[*840]** competition there"). Since the payment was permission to start competing a little earlier than the competitor otherwise had the right to, and because the agreement did not **[**57]** extend any existing monopolies, there was no § 2 antitrust violation. *See id.* That logic aligns with the Supreme Court's decision to name early entry settlement agreements as examples of permissible settlements. *See* *Actavis, 570 U.S. at 158*. The U.S. settlement agreements are not reverse-payment agreements subject to *Actavis* antitrust scrutiny.

HN41[] The fact that the settlements did not involve a direct payment is not determinative. *See* *In re Aggrenox Antitrust Litig., 94 F.Supp.3d 224, 242-243 (D. Conn. 2015)*. *See also* *King Drug Co. of Florence v. Smithkline Beecham Corp., 791 F.3d 388, 403 (3d Cir. 2015)*; *In re Opana Er Antritrust Litig., 162 F. Supp. 3d 704, 718 (N.D. Ill. 2016)* (when considering whether a settlement constitutes a large and unjustified reverse payment, the various payments cannot be examined in isolation); *In re Loestrin 24 Fe Antitrust Litig., 261 F. Supp. 3d 307, 331 (D.R.I. 2017)*. Plaintiffs allege that there was a reverse payment, just not one within the infringement litigation settlement agreements. AbbVie paid the biosimilar manufacturers in the form of European agreements that allowed the biosimilars to enter the European market. In exchange, the biosimilar companies agreed to settle the infringement litigation with an AbbVie-friendly U.S. early entry date. The package deals conferred large European revenue streams (hundreds of millions of dollars, [144] at 53) onto the biosimilar companies, while buying AbbVie even more lucrative monopoly time in the U.S. (worth billions of dollars **[**58]** in revenue for AbbVie, [109] ¶ 204).[17]

Nevertheless, and notwithstanding the allegation that this exchange was for the purpose of unnecessarily perpetuating AbbVie's patent monopoly, the package of global patent settlements were not an *Actavis*-like unlawful reverse-payment. They provided one early entry date for the European market and a different early entry date for the U.S. market—both permissible under *Actavis*. *See* *In re Actos End Payor Antitrust Litig., No. 13-CV-9244 RA, 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *17 (S.D.N.Y. Sept. 22, 2015)* *vacated in part on other grounds*, *848 F.3d 89 (2d Cir. 2017)* (***HN42***[] when "[b]oth ... licenses [are] permissible settlement terms under *Actavis* ... the simultaneous grant of both does not render either license unlawful"). The European deals were early entry settlements of the **[*841]** kind that did not worry the Court in *Actavis*, as were the U.S. settlements. The transfer of value, as large as it was, did not have the hallmarks of an unjustified and otherwise inexplicable payment because the package either increased competition or preserved an anticompetitive status quo. *In re Actos End Payor Antitrust Litig., 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *16* ("*Actavis* does not provide a legal basis for restricting negotiated settlement terms where they do not restrain competition"). The effect of the payment was to increase, not restrain competition **[**59]** by bringing competitors into the market when patents otherwise prohibited the competition.

There is also a broader reason to uphold these agreements under antitrust review: encouraging patent litigants to settle worldwide patent disputes. Any early entry date in one region could always be considered a transfer of value

[17] The defendants challenge the plausibility of plaintiffs' allegation that there was a quid pro quo in the U.S. and European agreements. Mylan and Boehringer agreed to roughly the same U.S. market entry dates as the other biosimilar manufacturers despite not accepting an early European entry date. [109] ¶¶ 177-84, 203. That undermines the inference that those European early entry dates were worth all that much or were a bargaining chip in the U.S. settlements. Similarly, AbbVie points out that it only has three European patents, that those three patents "protect indications for adalimumab for only four diseases, leaving at least five other diseases for which Humira is approved unguarded by patents in Europe," [124] at 36-37, and so the European patents were not a valuable barrier to competition. And the complaint itself alleges that AbbVie's European adalimumab patent expired on the same day that the agreements allowed Amgen, Samsung Bioepis, and Sandoz to enter the European market, further undermining the implication that the European early entry dates were worth all that much (or that they were "early" at all). [109] ¶ 203. But at this stage, I put aside potential inconsistencies and accept plaintiffs' factual allegation of an exchange. The complaint alleges that AbbVie's conduct rendered it difficult (if not impossible) to sell competing biosimilars in Europe absent the agreements in question, and concluding otherwise would require drawing an inference in AbbVie's favor. *See* [109] ¶¶ 185-202.

in return for a later entry date in another region. Plaintiffs assure the court that "[i]t is the particular circumstances of AbbVie's patent gamesmanship ... that, taken together with the contemporaneously executed settlement agreements, creates the violation," [144] at 59-60, but they do not elaborate. ***HN43***[] Although certain aspects of this settlement agreement might take it outside the norm (the alleged value of the European early entry dates, for one), it is not unlawful to enter into agreements that have been explicitly recognized by the Supreme Court as not a matter for antitrust concern, *Actavis, 570 U.S. at 152*, that implement a right included in the bundle of rights awarded to patent holders, *35 U.S.C. § 261*; *Dunlop Co. v. Kelsey-Hayes Co., 484 F.2d 407, 417-18 (6th Cir. 1973)*, and that play an important role in making global patent settlement agreements easier.

In *King Drug Co. of Florence v. Smithkline Beecham Corp.*, Smithkline induced Teva Pharmaceuticals to give up a **[**60]** challenge to Smithkline's patent by promising Teva two things: (1) an early entry into the generic market and (2) that Smithkline would not produce an authorized generic of its own. *791 F.3d 388, 393-94 (3d Cir. 2015)*. Finding that this "no AG" agreement represented an "unusual, unexplained reverse transfer of considerable value," the Third Circuit found that the agreement may have violated the antitrust laws because "the source of the benefit to the claimed infringer [was] something costly to the patentee." *Id. at 394, 405*. When a brand name manufacturer agrees to not produce a generic, consumers lose and the market for the brand name drug (and its generics) becomes less competitive than it would have been absent the agreement. The difference here is that when AbbVie agreed to let Amgen, Sandoz, and Samsung Bioepis enter the European and U.S. markets earlier than they might have been able to otherwise, consumers won and the market for Humira (and its generics) became more competitive. These agreements were decidedly not "as harmful as those resulting from reverse payments of cash." *Id. at 405*. *See also* *United Food & Commer. Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F.Supp.3d 1052, 1067-68 (N.D. Cal. 2014)* (recognizing that agreements that increase competition fall outside the scope of *Actavis*).[18]

In both *King Drug*, and *In re Lipitor Antitrust Litig.*, the Third Circuit acknowledged **[*842]** that it might not be appropriate to justify anticompetitive effects in one market with procompetitive effects in another. *King Drug, 791 F.3d at 409 n.34*; *In re Lipitor Antitrust Litig., 868 F.3d 231, 256 n.12 (3d Cir. 2017)*. But both cases ultimately turned on the sufficiency of the complaint's allegation that a patent holder made an unjustified transfer of value to an alleged infringer in a manner suggestive of competitive harm. *In re Lipitor Antitrust Litig., 868 F.3d at 239*; *King Drug Co. of Florence, 791 F.3d at 392*.

Like *King Drug* and *In re Lipitor*, this case doesn't depend on the competitive benefits in one market (Europe) justifying the effects in another (the U.S.). The issue is whether the complaint alleges a patent settlement that has *Actavis*-like anticompetitive features and that warrants further scrutiny under the rule of reason. Unlike *King Drug* and *In re Lipitor*, the complaint here does not. The U.S. settlements were on terms consistent with *Actavis*'s notion of a competitively legitimate settlement, and while part of the bargain included the European deals, that part was also consistent with a permissible early entry settlement. The settlement terms, when taken together, involve transfers of value from the patentee to the alleged infringer. But because all the agreements **[**62]** are of a type specifically permitted by *Actavis*, and because they deliver value to consumers, plaintiffs have not plausibly alleged the existence of an agreement that restrained competition.[19] Both of plaintiffs' § 1 claims (for market allocation and pay-for-delay) against all of the defendants—AbbVie, Amgen, Samsung Bioepis, and Sandoz—are dismissed.

---

[18] Plaintiffs also rely on *Tawfilis v. Allergan, Inc.. 157 F.Supp.3d 853, 862 (C.D. Cal. 2015)*. Although it found allegations of anticompetitive injury arising from a licensing agreement between competitors to be plausible, that case makes no mention of *Actavis* ***[**61]*** and is neither binding nor persuasive here.

[19] Although it is "normally not necessary to litigate patent validity to answer the antitrust question," *F.T.C. v. Actavis, Inc., 570 U.S. 136, 157, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, plaintiffs' theory here does require a detailed exploration of both the validity of hundreds of patents (some of which have already been the subject of extensive infringement litigation and other disputes before the USPTO and PTAB) and whether those patents were infringed. That makes the European revenue conferred on the biosimilar companies a far less helpful proxy for market power because the alleged reverse-payment has to be measured against the global litigation risks and the approximate strength of hundreds of AbbVie's patents (plus AbbVie's intellectual property portfolio in Europe). In other words, the allegations here require even more expensive and time-consuming litigation

C. Antitrust Injury

HN44[] *Sections 4* and *16 of the Clayton Act* provide for private rights of action (for damages and injunctive relief, respectively) in antitrust cases. *15 U.S.C. §§ 15*, *26*; *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1419 (7th Cir. 1989)*; *Sw. Suburban Bd. of Realtors, Inc. v. Beverly Area Planning Ass'n, 830 F.2d 1374, 1377-78 (7th Cir. 1987)*; *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 112-13, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. Both require that plaintiffs suffer an "antitrust injury." *Id.* Antitrust injury analysis "focuses on the *type* of injury claimed by a *particular* plaintiff and demands that it be an 'antitrust injury.'" *Indiana Grocery, 864 F.2d at 1419* (emphasis in original). An antitrust injury is any "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. The injury must be "the type of loss that the claimed violations ... would be likely to cause." *Id.* The injury requirement applies to both plaintiffs' *§ 1* and *§ 2* claims. *See Indiana Grocery, Inc., 864 F.2d at 1419* (the antitrust injury requirement comes **[*843]** from *§ 4 of the Clayton Act*, which is what grants plaintiffs the right to bring a private right **[**63]** of action under both *§ 1* and *§ 2 of the Sherman Act*).

HN45[] Antitrust injury analysis involves a two-step causation inquiry. *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)*. After delineating the "*type* of interests protected by the antitrust laws," the court must determine whether the "violation was the cause-in-fact of the injury: that 'but for' the violation, the injury would not have occurred." *Id.* (emphasis in original). The illegality need only be a material cause of the injury and plaintiffs need not prove that there was no other potential cause of the injury. *See Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. The injury must flow directly from the anticompetitive aspect of the practice under scrutiny. *McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1065 (7th Cir. 2019)*.

HN46[] There is no hard-and-fast rule against deciding the question of antitrust injury at the pleading stage. *See McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1061 (7th Cir. 2019)* (upholding dismissal on antitrust injury grounds at the motion to dismiss stage); *Midwest Gas Servs., Inc. v. Indiana Gas Co., 317 F.3d 703, 712-13 (7th Cir. 2003)* (same). Dismissal is appropriate if the claim "rests at bottom on some abstract conception or speculative measure of harm." *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 543, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*.

The type of antitrust injury that plaintiffs allege they suffered is monopoly prices. Plaintiffs claim they paid monopoly prices for Humira during a period of time when, but-for the alleged unlawful conduct, competition would have driven prices lower. ***HN47***[] Higher prices are **[**64]** one of the "principles vices" proscribed by the antitrust laws, *McGarry & McGarry, LLC, 937 F.3d at 1065*, so the allegations satisfy the first part of the causation test. *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)*.

Plaintiffs advance two sets of allegations to demonstrate that defendants' conduct was the cause-in-fact of the monopoly prices: one set pertains to the underlying infringement litigation and the other pertains to the settlement agreements. With regard to the litigation, plaintiffs allege that, if the biosimilar manufacturers had pursued the underlying infringement suits, they could have prevailed and, by invalidating the patents that were preventing them from entering the market, entered the market even sooner than they are now able to under their settlement agreements, driving prices down. [144] at 64-67. With regard to the alternative settlement theory, plaintiffs allege that if AbbVie had asserted only those patents that were valid and infringed (i.e., fewer patents), the biosimilars' bargaining position would have been stronger and the biosimilar manufacturers would have been able to negotiate earlier entry dates. [144] at 63.

The allegations about what might have happened in the underlying infringement litigation are too speculative and would require **[**65]** legal and factual determinations that go beyond judicially manageable limits. *Associated Gen.*

---

than in *Actavis*, and this further suggests that plaintiffs' theory pushes antitrust doctrine into unintended overlap with the patent regime.

Contractors, 459 U.S. at 543; *Greater Rockford, 998 F.2d at 394* (***HN48***[] indirect and speculative injuries cannot support a private antitrust lawsuit). In order to allege cause-in-fact, plaintiffs must allege that "the injury would not have occurred" absent the alleged unlawful conduct. *Greater Rockford, 998 F.2d at 395*. With regard to the underlying infringement litigation, plaintiffs are **[*844]** not willing to go that far. Instead, they argue that at least one of the biosimilar defendants could—not would—have prevailed in one of the underlying infringement suits. [144] at 64 (citing *United Food & Commer. Workers Local 1776 v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1155 (N.D. Cal. 2017)* (requiring "some evidence" of the patents' invalidity "is not the same as requiring plaintiffs to prove that the generic defendant *would have* won, only that it *could have*" won in the underlying infringement suit) (emphasis in original)). Plaintiffs' position has some support: at the pleading stage the question is "*could* these things have happened, not *did* they happen." *Carlson v. CSX Transp., Inc., 758 F.3d 819, 826-27 (7th Cir. 2014)*. But when it comes to this proposed alternative history, plaintiffs' use of the word "could" instead of "would" is not merely semantic; it signals that they do not intend to prove that prices were going to fall but-for the **[**66]** litigation. They have conceived of a world where that might have happened, but conceivable falls short of plausible. *Id. at 826*.

The first problem with the litigation theory is that it only takes one valid, infringed patent to render all the rest—whether invalid, infringed, or not—irrelevant for purposes of cause-in-fact analysis. If a drug is not able to launch because launching would infringe even a single patent, then the "injury (if it could still be called that) would be caused not by the settlement but by the patent laws prohibiting the launch." *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132, 165 (3d Cir. 2017)*, *judgment entered sub nom.* *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 2017 WL 3529114 (3d Cir. 2017)*; *In re Canadian Imp. Antitrust Litig., 470 F.3d 785, 791 (8th Cir. 2006)* ("[t]he absence of competition from Canadian sources in the domestic prescription drug market ... is caused by the federal statutory and regulatory scheme adopted by the U.S. government, not by the conduct of the defendants," and, "[c]onsequently, the alleged conduct of the defendants did not cause an injury of the type that the antitrust laws were designed to remedy"). If the reason the biosimilar manufacturers could not make it to market was that AbbVie had a patent that prevented them from doing so, it was the patent—and not AbbVie's other conduct—that was the but-for cause of the monopoly prices.

Against that backdrop, **[**67]** plaintiffs' theory of antitrust injury is not plausible. The complaint calls many of AbbVie's patents "weak," [109] ¶ 6, its patent applications "dubious," *id.* ¶ 185, says that some of the patents were "obvious in light of prior art," *id.* ¶ 107, and identifies four patents that were issued as the result of material misrepresentations and omissions to the USPTO. *Id.* ¶¶ 114-20. But the complaint never alleges that all of AbbVie's patents were invalid or not infringed. *See, e.g.*, [109] ¶ 107 ("many" of AbbVie's patents do not withstand scrutiny), ¶ 112 (all of the formulation patents are invalid in light of prior art), ¶¶ 130-132 (of AbbVie's more than 100 patents covering adalimumab, each can be traced back to twenty patents, two-thirds of which fail the novelty requirement), ¶ 134 ("the majority" of AbbVie's formulation and manufacturing/process patents fail other requirements), ¶ 140 (AbbVie should be precluded from asserting any formulation and manufacturing patents filed after February 1996). Confirming as much in their response, plaintiffs say they do not need to allege that all of AbbVie's patents were invalid or infringed. *See* [144] at 62. Instead, they say it is enough that a **[**68]** "great many of the patents were invalid or not infringed," [144] at 65, and that, as a result, at least one of the biosimilar manufacturers could have prevailed in the underlying litigation. **[*845]** [144] at 64. But without identifying which patent at issue in the litigation was going to be declared invalid or committing to a clear pathway to establish how prices would have fallen if the biosimilars had stuck it out in the global patent fight against AbbVie, plaintiffs' complaint leaves the defendants (and the reader) without notice of their claim.[20]

The second problem is that litigation takes time. In the case of complex patent portfolios, it can take a lot of time. For instance, when Amgen and AbbVie settled their infringement suit, trial was still two years away (they settled in September of 2017, at which point trial was scheduled for November of 2019). *See* [109] ¶¶ 148-51. Plaintiffs' theory requires them to allege that trial would have taken place as scheduled, that Amgen would have prevailed, and that any appeal would have resolved in time for Amgen's biosimilar to hit the market before January 31, 2023

---

[20] Plaintiffs say that under their alternative settlement theory, the biosimilar companies had significant leverage and could have obtained licenses for any patents that were valid and infringed (i.e., "blocking patents"). [144] at 67. But for the reasons discussed with regard to the alternative settlement theory below, that claim is possible—not plausible.

(the market entry date Amgen received under its settlement agreement). [144] at 66. **[**69]** Nondefendant Boehringer's infringement suit was scheduled to go to trial in October of 2020 when it settled in May of 2019. [109] ¶¶ 181, 183-84. And since no trial date had been set in either Samsung Bioepis's or Sandoz's patent infringement suits when they settled in April and October of 2018, respectively, [109] ¶¶ 157, 170, plaintiffs are left to allege it was "likely" that their trials would have been scheduled and would have concluded—and that any appeal would have been resolved—early enough to allow them to bring their biosimilars to market before their June (Samsung Bioepis) and September (Sandoz) 2023 entry dates. [144] at 66; [109] ¶¶ 83-84, 148-51, 157, 170. Nothing in the complaint demonstrates a basis to predict the requisite timing to establish plaintiffs' injury.

Alternatively, the biosimilar manufacturers might have launched at risk. According to the complaint, the only two biosimilar companies that received FDA approval before settling (Amgen and Boehringer) chose not to launch at risk. *See* [109] ¶¶ 149, 151, 182, 184, 211. Boehringer spent twenty months waiting for the underlying patent litigation to wrap up without launching. *See id.* ¶¶ 182, 184.[21] As the complaint **[**70]** points out, the reason for their delay was AbbVie's patent thicket, which was "impassable." [109] ¶ 9. *See also supra*, n.5 (thirteen of the eighteen petitions for *inter partes* review had failed to punch a hole through the thicket). Launching while the underlying patent litigation was ongoing posed an enormous risk. *See id.* ¶¶ 86, 97 (the potential damages were "crushing"). And while plaintiffs acknowledge that phase-two litigation often poses a significant final barrier for biosimilar manufacturers hoping to reach the market, *see* [144] at 45, they say nothing about what it was that they think Boehringer or Amgen (or Samsung Bioepis and Sandoz) might have done to get their biosimilars to market before 2023 if they had tried launching at risk and AbbVie had initiated second-phase litigation seeking an injunction. **[*846]** With regard to the potential at-risk launches, too, plaintiffs' theory rests on speculative guesses about what hypothetically competitive biosimilar manufacturers might have done.

Amgen, [125] at 5-6, Samsung Bioepis, [130] at 5-6, and Sandoz, [131] at 3-4, all argue that the complaint does not plausibly allege that, but-for their allegedly illegal agreements, the patent litigation **[**71]** would have concluded in time for consumers to have been able to buy their biosimilars any sooner than they will be able to under the existing agreements. I agree. The complaint requires drawing a conclusion that rests on too many inferences and reveals a theory of antitrust injury that is speculative as a matter of law.

The alternative settlement theory fares no better. Plaintiffs say that all they have to allege is that, but-for AbbVie's conduct, the biosimilar manufacturers could have obtained earlier U.S. market entry dates than they did. [144] at 67. But the allegations in the complaint do not make plaintiffs' hypothesis plausible. The complaint alleges that the defendants entered into settlements. As discussed above, these settlements are not anti-competitive reverse payments of the kind that worried the Court in *Actavis*. Another way to see that these agreements do not suggest antitrust liability is to focus on the question of antitrust injury. As alleged, AbbVie and the biosimilar defendants agreed to early entry in Europe in exchange for favorable (to AbbVie) early entry in the United States. But to allege injury, plaintiffs must still plausibly allege that but for that agreement, **[**72]** the biosimilars would have entered sooner—that they had the kind of leverage over AbbVie's patents to negotiate licenses or settlements even more favorable to them (and to consumers) than the compromise they agreed to. Given that AbbVie's IP portfolio was "impassable," its patents had survived thirteen *inter partes* review challenges, and that all it would have taken was one valid and infringed patent to preclude market entry until that patent's expiration, it is not plausible that these agreements prevented an even earlier entry date in the U.S. market for a biosimilar. *See* *Kroger Co. v. Sanofi-Aventis, 701 F.Supp.2d 938, 957 (S.D. Ohio 2010)* ("an injury deriving from the failure to reach a hypothetical procompetitive agreement is 'nothing but speculation.'" (quoting *Associated Gen. Contractors, 459 U.S. at 543*)).

Antitrust injury is a prerequisite for all of plaintiffs' federal antitrust claims against not only AbbVie but also defendants Amgen, Samsung Bioepis, and Sandoz. Because plaintiffs have failed to plausibly allege that the but-for cause of Humira's monopoly prices was the biosimilar manufacturers' failure to pursue infringement litigation to its

---

[21] Plaintiffs did not allege that any of the biosimilar manufacturers sent notice to AbbVie that they intended to market their biosimilar, which suggests those manufacturers may not have launched their biosimilars anyway. *See* *42 U.S.C. § 262(l)(8)(A)* & *(B)*; [124] at 47; [150] at 26. But plaintiffs were not required to account in their complaint for all of AbbVie's alternative scenarios, and I draw the reasonable inference in plaintiffs' favor that there was no technical barrier to launching at risk.

conclusion, AbbVie's unlawful assertion of its patent thicket, or the biosimilar manufacturers' failure to use the leverage that they apparently **[**73]** didn't know they had to reach an agreement to enter the market sooner than they did, all of the federal antitrust claims in the complaint fail.

D. State Law Claims

Plaintiffs' state-law claims are spread across four counts.[22] Counts II and IV assert pay-for-delay and market-allocation-agreement theories of liability under antitrust laws from twenty-seven states. [109] ¶¶ 269-78, 286-94. Count VI asserts a monopolization theory of liability under the **[*847]** antitrust laws of twenty-three states. [109] ¶¶ 301-08.

Counts II, IV, and VI also list six states' consumer protection laws. *See id.* [109] ¶¶ 276, 292, 306 (citing *Alaska Stat. Ann. § 45.50.471*; *Cal. Bus. & Prof. Code §§ 17200, et seq.*; *Fla. Stat. §§ 501.201 et seq.*; *Ga. Code Ann. § 10-1-393*; *S.C. Code Ann. §§ 39-5-20, et seq.*; *Vt. Stat. Ann. tit. 9, §§ 2453, et seq.*). According to the complaint, these state consumer protection laws prohibit both anticompetitive conduct, [109] ¶¶ 276, 292, and monopolization. *Id.* ¶ 306. Count VII asserts violations of sixteen states' laws that prohibit unfair and unconscionable conduct. *Id.* ¶¶ 309-406. Five of the same six consumer protection laws cited in Counts II, IV, and VI also appear in Count VII. *Id.* ¶¶ 317, 327, 339, 346, 391.[23]

Both AbbVie and plaintiffs agree that if the federal antitrust claims are dismissed, the state-law antitrust claims should **[**74]** be dismissed, too. [124] at 49-50; [144] at 74 ("[t]he defendants are correct that the plaintiffs' state law antitrust claims ... should be dismissed if their federal antitrust claims are dismissed"). I dismiss plaintiffs' state-law antitrust claims for the same reasons I dismissed the federal antitrust claims.

Plaintiffs also agree that if their federal antitrust claims are dismissed, the state law antitrust claims brought pursuant to consumer protection statutes should be dismissed, too. [144] at 74. Accordingly, those claims are dismissed, and that resolves the last of the claims asserted against Amgen, Samsung Bioepis, and Sandoz.

With regard to the claims in the complaint under the heading, "unfair and unconscionable conduct," *id.* ¶¶ 309-406, AbbVie says that all of plaintiffs' state-law consumer protection claims fail because they are "inextricably linked" to plaintiffs' antitrust claims. [124] at 53-54. But just because plaintiffs used certain factual allegations to support their antitrust claims does not mean that they cannot use those same factual allegations to support their unfair and unconscionable conduct claims. AbbVie also argues that if the conduct in the complaint fails **[**75]** to allege an antitrust violation, then it must also fail to allege any unfair or unconscionable act or practice. [124] at 53. But many of the state laws that form the basis of plaintiffs' unfair and unconscionable conduct claims are modeled after the Federal Trade Commission Act, which is broader than *§ 1* and *§ 2 of the Sherman Act*. *See, e.g.*, *Fla. Stat. Ann. §*

---

[22] Subject-matter jurisdiction exists over the state-law claims because the amount in controversy exceeds $5,000,000, *see, e.g.*, [109] ¶ 251, and because at least one member of the proposed class of plaintiffs is a citizen of a state different from at least one of the defendants. *Id.* ¶¶ 14-24, 224-225; *28 U.S.C. § 1332(d)(2)*.

[23] Plaintiffs' statutory labels are not controlling. For instance, plaintiffs cite *Alaska Stat. Ann. § 45.50.471*, which they describe first as a "state consumer protection law[] that prohibit[s] anticompetitive conduct," [109] ¶¶ 276, 292, second, as a "state consumer protection law[] that prohibit[s] monopolization," *id.* ¶ 306, and third, as a state law that prohibits "unfair and unconscionable conduct." *Id.* ¶¶ 309-10, 317. ***HN49***[] The statute does not contain the words anticompetitive, monopoly, or unconscionable, and pertains to deceptive acts and practices more akin to trademark infringement than antitrust violations. *See, e.g.*, *Alaska Stat. Ann. § 45.50.471(b)(1)*. Alaska's antitrust laws are codified elsewhere. *See, e.g.*, *Alaska Stat. Ann. § 45.50.562*. ***HN50***[] That being said, plaintiffs do not have to cite the right laws in their complaint. *N.A.A.C.P. v. Am. Family Mut. Ins. Co., 978 F.2d 287, 292 (7th Cir. 1992)* (a complaint "should limn the grievance and demand relief" and "need not identify the law on which the claim rests"); *Beaton v. SpeedyPC Software, 907 F.3d 1018, 1023 (7th Cir. 2018)*, *cert. denied*, ***139 S. Ct. 1465, 203 L. Ed. 2d 684 (2019)*** ("plaintiffs do not need to plead legal theories"). What matters is whether they have stated a claim upon which relief can be granted and provided defendants with "fair notice of what the ... claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *Fed. R. Civ. P. 8(a)*.

501.204(2); **[*848]** 15 U.S.C. § 45; Fed. Trade Comm'n v. R.F. Keppel & Bro., 291 U.S. 304, 310, 54 S. Ct. 423, 78 L. Ed. 814, 18 F.T.C. 684 (1934) (**HN51**[] the Federal Trade Commission Act was "aimed at all the familiar methods of law violation which prosecutions under the Sherman Act had disclosed," but "also had a broader purpose") (citations omitted). There are unfair or unconscionable acts that are not contracts or combinations in restraint of trade or unlawful monopolies.

But because the complaint is shaped by its antitrust theories, once those theories fall out of the case it becomes difficult to assess how the allegations satisfy the unfair or unconscionable standards of various states' laws. **HN52**[] AbbVie is entitled to "fair notice of what the ... claim is and the grounds upon which it rests." Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007); Fed. R. Civ. P. 8(a). The first few hundred paragraphs of the complaint contain detailed allegations about AbbVie's conduct, and the complaint recaps the relevant portions of those factual allegations generally before invoking **[**76]** state consumer protection statutes. [109] ¶¶ 310-316. But at bottom, the complaint lists various states' consumer protection laws and asserts that AbbVie's conduct was unfair and unconscionable without ever explaining (or even implying) what was unfair or unconscionable about AbbVie's conduct beyond its potential to restrain competition or effect an unlawful monopoly (both of which it fails to allege plausibly). The complaint says the conduct violated public policy and there was a gross disparity between price and value, but never offers an explanation beyond invoking the words of the statutes. In some cases that may be enough to tell the defendant what it is defending against. **HN53**[] A complaint need only "limn the grievance and demand relief." N.A.A.C.P. v. Am. Family Mut. Ins. Co., 978 F.2d 287, 292 (7th Cir. 1992). It does not have to "identify the law on which the claim rests." *Id.*; Beaton, 907 F.3d at 1023 (7th Cir. 2018) ("plaintiffs do not need to plead legal theories").

But the problem here is that read as a whole, the complaint sounds in antitrust, and once it is understood to not state such a claim, something more (perhaps not much) must be offered other than statutory language or quotations from state caselaw to understand why the nonactionable antitrust conduct happens to limn the grievance **[**77]** of state prohibitions against unfairness or unconscionability. **HN54**[] *Noerr-Pennington* may affect the viability of these state-law claims, too, because it is rooted in the First Amendment. *See, e.g.,* Green Mountain Realty Corp. v. Fifth Estate Tower, LLC, 161 N.H. 78, 89, 13 A.3d 123 (2010) (applying that doctrine in the context of New Hampshire's unfair and unconscionable conduct statute); Curtis Pub. Co. v. Butts, 388 U.S. 130, 149, 87 S. Ct. 1975, 18 L. Ed. 2d 1094 (1967) (the First Amendment applies to the states through the Fourteenth Amendment). Incorporating large swaths of allegations that describe activity protected by the First Amendment further makes it difficult to separate the unfair and unconscionable from nonactionable conduct. Count VII is dismissed without prejudice for failure to give adequate notice of the claim. Because plaintiffs may be able to cure this problem, some additional state-specific issues merit resolution to give plaintiffs additional guidance going forward.

1. *Alaska*

HN55[] Section 45.50.471 of the Alaska Unfair Trade Practices and Consumer Act prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce." [109] ¶¶ 276a, 292a, 306a, 317; Alaska Stat. Ann. § 45.50.471. *See also* Alaska Stat. Ann. § 45.50.531 (providing a private right of **[*849]** action for acts declared unlawful under § 45.50.471).

HN56[] Only buyers that purchase products directly from the antitrust violator may bring claims against that party for damages. Illinois Brick Co. v. Illinois, 431 U.S. 720, 735-38, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977). Some states have **[**78]** enacted "Illinois Brick repealer" statutes that allow indirect purchasers to sue for money damages. *See* McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1064 (7th Cir. 2019). Alaska's repealer statute only partially repealed Illinois Brick*. See* Alaska Stat. Ann. § 45.50.577(i). **HN57**[] As a result, the attorney general is the only person who can bring an antitrust claim for damages on behalf of indirect purchasers under Alaska's Restraint of Trade Act. Alaska Stat. Ann. §§ 45.50.562-45.50.570, 45.50.577(i); In re Lidoderm Antitrust Litig., 103 F.Supp.3d 1155, 1163 (N.D. Cal. 2015).

HN58[] "No court has construed Alaska's consumer protection statute to permit claims based on alleged antitrust and monopolization conduct by indirect purchasers." In re Lidoderm Antitrust Litig., 103 F.Supp.3d at 1163. Doing so would allow plaintiffs to circumvent Alaska's partial indirect purchaser bar by proceeding under Alaska's more general consumer protection statute. *See* In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 516 F.Supp.2d 1072, 1108 (N.D. Cal. 2007). HN59[] The better reading of the Act, considered in conjunction with Alaska's Restraint of Trade Act, is that it precludes plaintiffs from bringing claims as indirect purchasers even under a non-antitrust unfair practices theory.

2. *California*

HN60[] California's Unfair Competition Law defines unfair competition to include "unlawful, unfair or fraudulent business act[s] or practice[s] and unfair, deceptive, untrue or misleading advertising." Cal. Bus. & Prof. Code § 17200. In the last paragraph of their California-law-based unfair and unconscionable conduct allegations, **[**79]** plaintiffs allege that, as a result of AbbVie's wrongful conduct, AbbVie was unjustly enriched. [109] ¶ 332. HN61[] As AbbVie points out, California law does not recognize an independent cause of action for unjust enrichment. Hill v. Roll Internat. Corp., 195 Cal. App. 4th 1295, 1307, 128 Cal. Rptr. 3d 109 (2011) ("Unjust enrichment is not a cause of action, just a restitution claim"); United Food & Commer. Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1091 (N.D. Cal. 2014).

But plaintiffs have not brought a cause of action for unjust enrichment, they seek equitable relief in the form of restitution and disgorgement. [109] ¶¶ 327-32. HN62[] In addition to borrowing violations from other laws, De La Torre v. CashCall, Inc., 854 F.3d 1082, 1085 (9th Cir. 2017), California's Unfair Competition Law provides its own unique cause of action. *See* Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999) (a "practice may be deemed unfair even if not specifically proscribed by some other law"). AbbVie's argument that the claim is a prohibited unjust enrichment claim is not well taken and would not be an impediment to an amended complaint.

3. *District of Columbia*

HN63[] The District of Columbia's Consumer Protection Act makes it unlawful for "any person to engage in an unfair or deceptive trade practice." D.C. Code Ann. § 28-3904. It was "designed to police trade practices arising only out of consumer-merchant relationships," Ford v. Chartone, Inc., 908 A.2d 72, 80-81 (D.C. App. 2006) (citations omitted), and covers only **[*850]** the "ultimate retail transaction **[**80]** between the final distributor and the individual member of the consuming public." Adam A. Weschler & Son, Inc. v. Klank, 561 A.2d 1003, 1005 (D.C. App. 1989). Since plaintiffs here are indirect purchasers that reimburse their members, the transactions do not qualify under the statute. *See also* In re Lidoderm Antitrust Litig., 103 F.Supp.3d 1155, 1164-65 (N.D. Cal. 2015) (dismissing CPPA claim brought by end-payor plaintiff). *But see* In re Remicade Antitrust Litig., 345 F.Supp.3d 566, 588 (E.D. Pa. 2018).

HN64[] The code also defines a consumer as "any person who ... does or would purchase ... or receive consumer goods or services, including as co-obligor or surety, or does or would otherwise provide the economic demand for a trade practice." D.C. Code Ann. § 28-3901(a)(2)(A). The plaintiffs here do not purchase or receive Humira. They also do not provide the economic demand for Humira—they reimburse the people that provide the economic demand for Humira. *See* [109] ¶¶ 13-17, 225. The people that suffer from the ailments that Humira treats provide the demand. Plaintiffs have not alleged that they are co-obligors or sureties of the people that provide the demand for Humira. *See id.* ¶¶ 333-38. (That being said, plaintiffs have adequately alleged that AbbVie is a merchant within the meaning of the Consumer Protection Act because they have alleged that AbbVie sells a broad range of drugs all over the United States at volumes that plausibly suggest **[**81]** they sell with regularity in the District of Columbia. [109] ¶¶ 19, 84; D.C. Code Ann. § 28-3901(a)(3). The District of Columbia's Consumer Protection Act does not reach the transactions at issue.

4. *Georgia*

HN65[] Georgia's Fair Business Practices Act prohibits "[u]nfair or deceptive acts or practices in the conduct of consumer transaction[s]." *Ga. Code Ann. § 10-1-393*; [109] ¶¶ 276d, 292d, 306d, 346-350. In order to bring a suit under that statute, plaintiffs have to provide defendants with a written demand "identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered" at least thirty days before filing suit, but not if "the prospective respondent does not maintain a place of business or does not keep assets within the state." *Ga. Code Ann. § 10-1-399(b)*.

The complaint does not say whether notice was provided, but as plaintiffs point out in their opposition, the complaint also does not say that AbbVie maintains an office in Georgia. ***HN66***[] The notice provision is to be liberally construed, *Amin v. Mercedes-Benz USA, LLC, 301 F.Supp.3d 1277, 1292 (N.D. Ga. 2018)*, and a reasonable inference drawn from the factual allegations in the complaint is that AbbVie does not maintain an office in Georgia, meaning that no notice was required.

5. *Illinois*

The *Illinois Consumer Fraud and Deceptive Business Practices Act* **[**82]** declares unlawful all "[u]nfair methods of competition and unfair or deceptive acts or practices, ... in the conduct of any trade or commerce ... whether any person has in fact been misled, deceived or damaged thereby." *815 Ill. Comp. Stat. Ann. 505/2*; [109] ¶¶ 351-54. Illinois has adopted an *Illinois Brick* repealer statute that permits indirect purchasers to sue for antitrust money damages. *McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1064 (7th Cir. 2019)*; *740 Ill. Comp. Stat. Ann. 10/7(2)*. However, that statute prohibits class action antitrust claims brought by indirect purchasers. *740 Ill. Comp. Stat. § 10/7(2)*.

[*851] ***HN67***[] Even though in some states where *Illinois Brick* has been repealed, some courts have allowed suits brought by indirect purchasers under consumer protection statutes based on conduct that might also qualify as a violation of that state's antitrust statutes, *see, e.g., Mack v. Bristol-Myers Squibb Co., 673 So.2d 100, 104 (Fla. Dist. Ct. App. 1996)*; *In re Generic Pharms. Pricing Antitrust Litig., 368 F.Supp.3d 814, 842-43 (E.D. Pa. 2019)*, the law in Illinois is different. Plaintiffs' claim under the *Illinois Consumer Fraud and Deceptive Business Practices Act* is a class action. [109] ¶¶ 252, 254-55. Permitting plaintiffs to bring a class action based on conduct that more closely approximates an antitrust violation under a broader consumer protection statute would allow them to make an "end run around the Illinois legislature's determination" that such actions should not be **[**83]** permitted. *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 539 (E.D. Pa. 2010)*. ***HN68***[] Plaintiffs cannot assert what are "essentially antitrust claims in the guise of a claim under the Illinois consumer protection statute," *In re Wellbutrin XL Antitrust Litig., 260 F.R.D. 143, 162 (E.D. Pa. 2009)*, especially when doing so allows them to avoid a provision of Illinois law that would otherwise bar this particular type of suit. *740 Ill. Comp. Stat. § 10/7(2)*. *See also Appraisers Coalition v. Appraisal Institute, 845 F.Supp. 592, 609 (N.D. Ill. 1994)* (dismissing consumer protection claims because they only "alleged violations of the *Sherman* and *Clayton Acts*").

6. *Nevada*

HN69[] Much like Georgia's statute, the *Nevada Deceptive Trade Practices Act* mandates that any person bringing an action under the statute "shall, simultaneously with the filing of the complaint with the court, mail a copy of the complaint to the Attorney General." *Nev. Rev. Stat. Ann. § 598A.210(3)*. As pointed out in the plaintiffs' opposition, several plaintiffs sent the required notice to the Nevada Attorney General. [145-1] at 22-23. *See also Geinosky v. City of Chicago, 675 F.3d 743, 745 n.1 (7th Cir. 2012)* (***HN70***[] when opposing a Rule 12(b)(6) motion, plaintiffs "may submit materials outside the pleadings to illustrate the facts the [plaintiff] expects to be able to prove," so long as those "new elaborations" are consistent with the complaint"). The Attorney General notice requirement is not a basis to dismiss the Nevada statutory claim.

7. *New Hampshire*

HN71[] *New Hampshire's Deceptive Trade Practices Act* **[**84]** declares unlawful "any unfair method of competition or any unfair or deceptive act or practice in the conduct of any trade or commerce within this state." *N.H. Rev. Stat. Ann. § 358-A:2*; [109] ¶¶ 367-372. The words "trade" and "commerce" include the sale of any "thing of value, wherever situate," and "any trade or commerce directly or indirectly affecting the people of" New Hampshire. *N.H. Rev. Stat. Ann. § 358-A:1(II)*.

HN72[] The statute is phrased broadly to include the sale of goods no matter where those goods are located and includes within its purview commerce that indirectly affects the people of New Hampshire. *See* LaChance v. U.S. Smokeless Tobacco Co., 156 N.H. 88, 94-96, 931 A.2d 571 (2007) (declining to prohibit the bringing of antitrust-type actions under New Hampshire's Deceptive Trade Practices Act and finding that the legislature intended a "broad sweep"). The offending conduct does not need to occur within New Hampshire so long as it had an effect on the people of that state. In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1081 (S.D. Cal. 2017); In re Zetia (Ezetimibe) Antitrust Litig., 400 F.Supp.3d 418, 438 (E.D. Va. 2019) ("a nationwide pattern of conduct that resulted in consumers in each **[*852]** of the challenged jurisdiction[s] purchasing [a drug] at elevated prices adequately pleads sufficient intrastate connections" for purposes of a claim under New Hampshire's Deceptive Trade Practices Act) (citations omitted); In re DDAVP Indirect Purchaser Antitrust Litig., 903 F.Supp.2d 198, 231 (S.D.N.Y. 2012) (denying motion to dismiss because the complaint **[**85]** alleged that the putative plaintiffs "located in New Hampshire had to pay higher prices ... because of [the] alleged deception"). *But see* Pacamor Bearings, Inc. v. Minebea Co., 918 F.Supp. 491, 504 (D.N.H. 1996) ("the statute is only applicable if the offending conduct took place within the territorial borders of the state"); In re Flash Memory Antitrust Litig., 643 F.Supp.2d 1133, 1159 (N.D. Cal. 2009). Even if New Hampshire's statute requires that the offending conduct take place within New Hampshire's borders, it is enough to allege that the defendants introduced overpriced products into New Hampshire markets. In re Chocolate Confectionary Antitrust Litig., 749 F.Supp.2d 224, 235 (M.D. Pa. 2010).

The complaint alleges that AbbVie's conduct "substantially affected New Hampshire's trade and commerce." [109] ¶ 370. Elsewhere, it includes allegations that plausibly suggest that Humira was introduced into the New Hampshire market, such as the allegation that AbbVie made more than $56 billion selling Humira throughout the United States during a six-year period. *Id.* ¶ 84. Although Count VII is dismissed for other reasons, it adequately pleads the requisite effect in New Hampshire.

8. *North Carolina*

HN73[] North Carolina's Unfair Trade and Business Practices Act declares unlawful all "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce." N.C. Gen. Stat. Ann. § 75-1.1; [109] ¶¶ 379-84. **[**86]** The Act addresses "primarily local concerns." The 'In' Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494, 502 (M.D.N.C. 1987); ITCO Corp. v. Michelin Tire Corp., Commercial Div., 722 F.2d 42, 48 n.9 (4th Cir. 1983). Actions that have only an "incidental local effect" fall outside its reach. The 'In' Porters, 663 F.Supp. at 502; In re Refrigerant Compressors Antitrust Litig., No. 2:09-MD-02042, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *19 (E.D. Mich. Apr. 9, 2013).

HN74[] That statute does not, however, require "substantial effects" on intrastate commerce. *See* N.C. Gen. Stat. Ann. § 75-1.1. And unlike in The 'In' Porters, S.A., 663 F.Supp. at 502, the plaintiffs here include at least a few people that purchased Humira in the state of North Carolina. [109] ¶ 382. That is enough to satisfy the "primarily local" aims of North Carolina's Unfair Trade and Business Practices Act. In re Lidoderm Antitrust Litig., 103 F.Supp.3d 1155, 1174 (N.D. Cal. 2015); Hosp. Auth. of Metro. Gov't of Nashville v. Momenta Pharms. Inc., 353 F. Supp. 3d 678, 695 (M.D. Tenn. 2018) (it is enough to plead intrastate effects that caused supracompetitive process in the relevant jurisdiction); In re Ductile Iron Pipe Fittings ("DIPF") Indirect Purchaser Antitrust Litig., 2013 U.S. Dist. LEXIS 142466, 2013 WL 5503308, at *22 (D.N.J. Oct. 2, 2013). The alleged aggregate effect of those purchases was more than incidental. *See* In re Remicade Antitrust Litig., 345 F.Supp.3d 566, 586 (E.D. Pa. 2018) (allegations that defendants had monopolized the market for a drug, "resulting in North Carolina purchasers paying artificially inflated prices" for that drug, was enough to survive a motion to dismiss).

9. *Utah*

HN75[] Utah's Consumer Sales Practices Act declares unlawful any "unconscionable **[*853]** act or practice by a supplier in connection with a consumer transaction ... whether it occurs before, during, or after the transaction." Utah Code Ann. § 13-11-5(1); [109] ¶¶ 395-401. In **[**87]** Utah, the term "unconscionable ... defies precise definition," and Utah courts "assess the circumstances of each particular case in light of the twofold purpose of the doctrine, prevention of oppression and of unfair surprise." *Woodhaven Apartments v. Washington, 942 P.2d 918, 924 (Utah 1997)* (quoting *Res. Mgmt. Co. v. Weston Ranch & Livestock Co., 706 P.2d 1028, 1041 (Utah 1985)*).

HN76[] In the few cases where Utah courts have interpreted the statute, they have consistently looked to contract principles to define its terms. *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F.Supp.2d 160, 204 (D. Me. 2004)*; *In re Interior Molded Doors Indirect Purchaser Antitrust Litig., No. 3:18-CV-00850-JAG, 2020 U.S. Dist. LEXIS 78458, 2020 WL 2110931, at *3 (E.D. Va. May 4, 2020)*; *Imperial Mobile Home Park, L.L.C. v. Kelsch, No. 971591-CA, 1998 Utah App. LEXIS 171, 1998 WL 1758393, at *1 (Utah Ct. App. Nov. 27, 1998)* (plaintiffs generally must allege "gross bargaining power inequality or oppressive contractual terms").

The Utah-based claim alleged here, which is brought against AbbVie only, is based on AbbVie's alleged patent-related conduct. *See* [109] ¶¶ 310-316, 401. The fact that the patent-related conduct in question did not relate to a contract is not determinative. What matters is whether AbbVie's alleged conduct qualifies as unconscionable, as Utah's courts have interpreted that term. The problem for plaintiffs is that AbbVie's alleged patent-related conduct did not involve either gross bargaining power or oppression. *Imperial Mobile Home Park, 1998 Utah App. LEXIS 171, 1998 WL 1758393 at *1*. Nor have plaintiffs alleged facts that show procedural unconscionability (i.e., that plaintiffs did not have "a reasonable **[**88]** opportunity to read and understand the terms of the contract," *Woodhaven Apartments, 942 P.2d at 925*), or substantive unconscionability (i.e., facts that show a disparity in bargaining power "so great as to shock the conscience," *id.* (citations omitted)).

HN77[] *Utah's Consumer Sales Practices Act* is not limited to contract disputes, but it is limited to conduct that is "unconscionable," and the complaint fails to allege conduct that qualifies as unconscionable as that word has been interpreted by Utah courts.

10. *West Virginia*

HN78[] *West Virginia's Consumer Credit and Protection Act* declares unlawful "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *W. Va. Code Ann. § 46A-6-104*; [109] ¶¶ 402-406. At least when consumers allege that a purchase was made because of a misrepresentation, the Act "does not extend to prescription drug purchases," because physicians protect consumers when they intervene in that decision-making process. *White v. Wyeth, 227 W.Va. 131, 141, 705 S.E.2d 828 (2010)*. Here, plaintiffs' allegations are not based on any alleged misrepresentations to consumers, but to the degree any of AbbVie's conduct involved misrepresentations to patent examiners, the claims fail for the same reason the claims failed in *White v. Wyeth*: a trained third-party **[**89]** intervened before consumers were affected. *227 W.Va. 131, 140-41, 705 S.E.2d 828*.

IV. Conclusion

Defendants' motion to dismiss [123] is granted. The complaint is dismissed without prejudice and with leave to file an amended complaint. *Barry Aviation Inc. v. Land O'Lakes Mun. Airport Comm'n, 377 F.3d 682, 687 (7th Cir. 2004)*; *Runnion ex rel. Runnion v. Girl Scouts of Greater Chicago & Nw. Indiana, 786 F.3d 510, 518 **[*854]** (7th Cir. 2015)*. Plaintiffs shall file a status report on June 29, 2020, with a statement of whether they intend to file an amended complaint, or if they instead prefer that the dismissal convert to a dismissal with prejudice so they may seek appellate review.
