HN1[] An *FRCP 12(b)(6)* motion to dismiss tests the legal sufficiency of the claim or claims stated in the complaint. The complaint must be construed in the light most favorable to plaintiff. *Russell v Landrieu, 621 F.2d 1037, 1039 (9th Cir 1980)*. The court must accept as true all material allegations in the complaint, as well as all reasonable inferences to be drawn from these facts. *NL Indus, Inc v Kaplan, 792 F.2d 896, 898 (9th Cir 1986)*. Material allegations must be accepted as true no matter how improbable they may seem and without regard to any potential difficulties in proof. *Allison v California Adult Authority, 419 F.2d 822, 823 (9th Cir 1969)*. The court need not, however, accept as true allegations that contradict **[*8]** matters properly subject to judicial notice, *Mullis v United States Bankruptcy Court, 828 F.2d 1385, 1388 (9th Cir 1987)*, cert denied, *486 U.S. 1040, 108 S. Ct. 2031, 100 L. Ed. 2d 616 (1988)*, that are conclusory or mere legal conclusions, that are unwarranted deductions of fact or unreasonable inferences, *Clegg v Cult Awareness Network, 18 F.3d 752, 754-55 (9th Cir 1994)*; *Western Mining Council v Watt, 643 F.2d 618, 624 (9th Cir)*, cert denied, *454 U.S. 1031, 102 S. Ct. 567, 70 L. Ed. 2d 474 (1981)*, or that are contradicted by exhibits to the complaint, *Durning v First Boston Corp, 815 F.2d 1265, 1267 (9th Cir)*, cert denied, *484 U.S. 944, 108 S. Ct. 330, 98 L. Ed. 2d 358 (1987)*. Even so, ***HN2***[] the motion may not be granted "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*; *Moore v City of Costa Mesa, 886 F.2d 260, 262 (9th Cir 1989)*, cert denied, *496 U.S. 906, 110 S. Ct. 2588, 110 L. Ed. 2d 269 (1990)*.

B

HN3[] In considering a motion to dismiss for lack of subject matter jurisdiction under *FRCP 12(b)(1)*, a court will ordinarily **[*9]** address the jurisdictional issues prior to considering other claims. *Thornhill Publishing Co v General Tel & Electronics, 594 F.2d 730, 733-34 (9th Cir 1979)*. The party asserting subject matter jurisdiction in federal court bears the burden of establishing that jurisdiction. *Kokkonen v Guardian Life Ins Co of America, 511 U.S. 375, 114 S. Ct. 1673, 1675, 128 L. Ed. 2d 391 (1994)*. ***HN4***[] Because lack of antitrust injury or the failure to plead relevant market will defeat the court's subject matter jurisdiction, plaintiff bears the burden of demonstrating such injury and pleading an appropriate relevant market. Although plaintiff is indulged all favorable inferences on a motion under *FRCP 12(b)(6)*, such inferences do not extend to certain allegations in a complaint alleging violations of the antitrust statutes. See e.g., *Letica Corp v Sweetheart Cup Co, 790 F. Supp. 702, 704 (ED Mich 1992)****HN5***[] ("[M]ere conclusory allegations couched in factual allegations are not sufficient to state a cause of action, particularly in complex litigation such as alleged violations of the Sherman Act"); *HRM, Inc v Tele-Communications, Inc, 653 F. Supp. 645, 647 (D Colo 1987)* **[*10]** ("[C]onclusory allegations which merely recite the litany of antitrust will not suffice").

II

A

As noted above, News America argues that Theme's proffered relevant product markets of the (1) market for advertising and promotional services provided in conjunction with the placement, publication and distribution of FSIs in newspapers and (2) market for publishing and distributing FSIs are deficient because Theme fails to explain why its market should not include other promotional services such as television or radio ads. Theme maintains that it has adequately explained why FSIs must be distinguished from other promotional tools and that any other inquiry into how the relevant product market should be defined is a question of fact which cannot be decided at this stage of the litigation.

HN6[] An antitrust complaint must allege a relevant market in which the anticompetitive effect of a challenged activity can be assessed. See *Re-Alco Industries, Inc v Natl Ctr for Health Educ, 812 F. Supp. 387, 391 (SDNY 1993)*(citing *Jefferson Parish Hosp Dist No 2 v Hyde, 466 U.S. 2, 29, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984))*. The relevant product market includes all products reasonably interchangeable, **[*11]** the determination of which requires consideration of the cross-elasticity of demand. See id (citing *United States v E.I. DuPont de Nemours & Co, 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. See also *Brown Shoe Co v United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*("The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it").

This is not to say that ***HN7***[] an antitrust plaintiff is precluded from arguing that a particular product is unique. See e.g., *Eastman Kodak Co v Image Technical Services, Inc, 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*("This Court's prior cases support the proposition that in some instances one brand of a product can constitute a separate market"). Of course, plaintiff cannot survive a motion to dismiss simply by baldly asserting that a particular product is unique. See e.g., *B.V. Optische Industrie de Oude Delft v Hologic, Inc, 909 F. Supp. 162, 171 (SDNY 1995)*. Rather, the complaint in an antitrust case must explain why the market it alleges is the relevant, economically significant product market. See id (citing *Re-Alco, 812 F. Supp. at 391*). **[*12]**

In the present case, the court concludes that plaintiff has met its burden of setting forth a theory why services the court initially thought could be substituted for FSIs are not reasonably interchangeable with FSIs. At P 6 of the amended complaint, Theme has done more than merely use the lingo of antitrust to conclude that FSIs have no substitutes; Theme has alleged that "FSIs, as distinguished from other forms of product promotion or general advertising, enhance product sales through the use of discount coupons which a consumer can use to obtain discounts on the purchase of packaged goods * * *." See Amended Compl at P 6. By so distinguishing other products which seem at first glance to have interchangeability or cross-elasticity of demand with FSIs, Theme has taken those other products into account, thereby rendering its relevant market legally sufficient. Compare *Queen City Pizza, Inc v Dominos Pizza, Inc, 124 F.3d 430, 436 (3d Cir 1997)*, cert denied, *523 U.S. 1059, 118 S. Ct. 1385, 140 L. Ed. 2d 645 (1998)*("Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed **[*13]** relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted"). In the case at bar, plaintiff has alleged that FSIs are unique because they are a combination of general advertising and discount coupon. See Amended Compl at P 6. Whether this combination does in reality make FSIs different from a coupon sent to a customer by mail or different from broadcast advertising and the like may be a factual question which can only be resolved on a motion for summary judgment or by a jury. See *Oltz v St Peter's Community Hosp, 861 F.2d 1440, 1446 (9th Cir 1988)*. No such inquiry is appropriate in this case, however, for another reason to be explained presently.

B

News America next contends that because the first amended complaint does not contain any independent allegations with respect to the market for advertising and promotional services provided in conjunction with the placement, publication and distribution of FSIs, the court must dismiss all antitrust claims relating to that market. Specifically, **[*14]** News America argues that in the absence of some allegation that News America's enforcement of its exclusivity contracts with packaged goods companies raised prices or reduced output in the market for advertising and promotional services provided in conjunction with FSIs, Theme's antitrust claims must be dismissed. Theme responds that it has properly stated a claim that News America is using its alleged market power in the market for publishing and distributing FSIs to drive Theme out of the market for advertising and promotional services provided in conjunction with the placement, publication and distribution of FSIs. Theme concedes that it has not alleged that News America's policy affects the output of FSIs or increases their prices but argues that by its allegation that Valassis has been harmed by the arrangement (in that if a packaged goods company must publish its "related item" advertisements with News America, it cannot publish with Valassis), it has properly pled that the challenged actions affect competition and not simply competitors.

First, the court must reject Theme's argument that it need not plead that News America has market power in the market for advertising and **[*15]** promotional services. Theme alleges that News America is attempting to monopolize the market for advertising and promotional services through its alleged monopoly in the market for publication and distribution of FSIs. Theme asserts that "monopoly leveraging" is a "well-recognized theory of recovery under the antitrust laws," citing *Alaska Airlines, Inc v United Airlines, Inc, 948 F.2d 536 (9th Cir 1991)*, cert denied, *503 U.S. 977, 112 S. Ct. 1603, 118 L. Ed. 2d 316 (1992)*. This assertion is plainly misleading.

In *Catlin v Washington Energy Co, 791 F.2d 1343, 1346 (9th Cir 1986)*, the Ninth Circuit declined "any invitation to adopt the monopoly leveraging theory [] as a basis for *Section 2* liability independent of any proof of actual or attempted monopolization" and reserved the question whether leveraging is an independent *Section 2* violation. In Alaska Airlines, the very case which Theme suggests recognizes "monopoly leveraging" as a theory of ***antitrust law*** recovery, the court discussed the Second Circuit's decision in *Berkey Photo, Inc v Eastman Kodak Co, 603 F.2d 263 (2d Cir 1979)*, cert denied, *444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)*, rejected "Berkey's **[*16]** monopoly leveraging doctrine as an independent theory of liability under *Section 2*," decided that Berkey "misapplied the elements of *Section 2* by concluding that a firm violates *Section 2* merely by obtaining a competitive advantage in the second market, even in the absence of an attempt to monopolize the leveraged market" and held that the "anticompetitive dangers that implicate the Sherman Act are not present when a monopolist has a lawful monopoly in one market and uses its power to gain a competitive advantage in the second market." *Alaska Airlines, 948 F.2d at 547-548*. Theme's astonishing reliance on Alaska Airlines to suggest that "monopoly leveraging" is a "well-recognized" theory of recovery in the Ninth Circuit and bootstrap its contentions regarding News America's alleged market share and monopoly power in the market for publication and distribution of FSIs into claims that News America monopolized or attempted to monopolize the market for promotional services provided in conjunction with the placement, publication and distribution of FSIs without allegation of independent actual or attempted monopolization in the latter market borders on a contention **[*17]** unwarranted by existing law and is bereft of a nonfrivolous argument for extension, modification or reversal of existing law or the establishment of new law.

Second, ***HN8***[] a plaintiff must allege antitrust injury, or injury to competition, before proceeding with an antitrust claim under either *Section 1* or *2* of the Sherman Act. *McGlinchy v Shell Chemical Co, 845 F.2d 802, 811 (9th Cir 1988)*. Antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant['s] acts unlawful." *Brunswick Corp v Pueblo Bowl-O-Mat, Inc, 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. ***HN9***[] In determining whether a plaintiff was injured by an anticompetitive aspect or effect of a defendant's behavior, care must be taken in defining competition. See *Rebel Oil v Atlantic Richfield Co, 51 F.3d 1421, 1433 (9th Cir)*, cert denied, *516 U.S. 987, 116 S. Ct. 515, 133 L. Ed. 2d 424 (1995)*. Although competition that eliminates rivals reduces competition, exclusion of a competitor is not a sufficient condition for finding antitrust injury because reduction of competition does not invoke the Sherman Act until it harms consumer welfare. See id; *Legal Economic Evaluations v Metropolitan Life Ins Co, 39 F.3d 951, 954 (9th Cir 1994),* **[*18]** cert denied, *514 U.S. 1044, 115 S. Ct. 1420, 131 L. Ed. 2d 304 (1995)*. The antitrust laws were enacted for the "'protection of *competition,* not *competitors*.'" *Brown Shoe Co, 370 U.S. at 320*. Thus, ***HN10***[] an act is deemed anticompetitive under the Sherman Act only if it harms both allocative efficiency and raises the prices of goods above competitive levels or diminishes their quality. See *Rebel Oil, 51 F.3d at 1421*. See also *Les Shockley Racing v National Hot Rod Assn, 884 F.2d 504, 508 (9th Cir 1989)*(injury to competition requires showing "proof of actual detrimental competitive effects such as output decreases or price increases" even on a motion to dismiss).

Under the heading "HARM TO COMPETITION," Amended Compl at P 36-37, Theme alleges the following:

> 36. Defendant's anticompetitive behavior as herein alleged has harmed competition in the market for advertising and promotional services provided in conjunction with the placement, publication and distribution of FSIs in newspapers nationally. Not only has [Theme], as one of only three market participants and the direct target of [News America's] actions, been severely damaged as a result of Defendant's **[*19]** conduct, but [Valassis'] interests have also been negatively affected by [Theme's] inability to freely choose which FSI company publishes and distributes its FSI[s]. Defendant's unlawful conduct has therefore lessened competition in the relevant markets to the detriment of not only the two market participants but, as alleged below, to the detriment of packaged goods companies and consumers as well. Competition is also harmed in the market for publishing and distributing FSIs nationally by virtue of Defendant's predatory and anticompetitive behavior as herein alleged. Defendant's calculated effort to eliminate [Theme] as a market competitor and to assert and maintain its market power in the market for advertising and promotional services provided in conjunction with the placement, publication and distribution of FSIs in newspapers nationally and the market for publishing and distributing FSIs nationally was and is the type of conduct the antitrust laws were intended to prevent.

> 37. Defendant's actions have also caused significant harm to competition in the FSI marketplace and to consumers generally. Packaged goods companies who have [exclusive] contracts with Defendant **[*20]** are no longer able to use, or are severely restricted from using, TCP's [Theme's] unique and cost-effective services. Additionally, packaged goods companies who [sic] do not have exclusive contracts with Defendant are precluded from running joint promotional campaigns through TCP with any company who [sic] has an [exclusive] contract with Defendant. This has resulted in a decrease in the number of overall FSI pages and an increase in the cost of advertising per unit sold. Consumers are also harmed in that their ability to take advantage of TCP's related item and special events programs, and the freedom of choice such programs provide, has been restricted. Unless restrained by this Court, Defendant's anticompetitive conduct will continue to harm competition in the relevant markets by restricting output and raising prices.

In its May 29, 1998, order at 8, the court noted that the language of these paragraphs defines, at most, a harm to Theme, but not to competition. ***HN11***[] "[R]emoval of one or a few competitors need not equate with injury to competition." *Les Shockley Racing, 884 F.2d at 508*. Although the Les Shockley Racing case dealt only with *Section 1* of **[*21]** the Sherman Act, its logic applies with equal force to a claim under *Section 2*. Theme argues that in light of its new allegation that the market for advertising and promotional services provided in conjunction with the market for placement, publication and distribution of FSIs has only three players, the court should find that an injury to Theme is an injury to competition. While "convergence of injury to a market competitor and injury to competition is possible when the relevant market is both narrow and discrete and the market participants are few," id, the court cannot find an injury to competition in the absence of evidence that News America's policy decreases output, raises prices, harms the quality of goods or otherwise affects allocative efficiency in the market for advertising and promotional services provided in conjunction with the placement, publication and distribution of FSIs in newspapers. The first amended complaint alleges no such facts.

Valassis' alleged harm by News America's decision to enforce its exclusivity contracts does not change the analysis. First, although Theme does allege that Valassis participates in the market for advertising and promotional services **[*22]** provided in conjunction with the placement, publication and distribution of FSIs, Theme merely claims that "Valassis' interests have also been negatively affected by [Theme's] inability to freely choose which FSI company publishes and distributes its FSI[s]." See Amended Compl at P 36. Any such injury to Valassis affects only the market for publishing and distributing FSIs and is, thus, besides the point. Second, simply because Valassis does not have the opportunity to publish certain FSIs does not equate with an injury to competition; what is essential is that there be some allegation that either the total number of FSIs published in newspapers nationally has been reduced or made more expensive or that the overall quality of FSIs published has been lessened. See id. While Theme does allege that consumers have been severely restricted from using Theme's cost effective services, see Amended Compl at P 37, this does not mean that consumers are receiving fewer or lesser quality FSIs at a higher price. Although the court has found that Theme has properly pled that FSIs may in some sense be unique, Theme continues to allege that its services consist of the FSI Plus program which in **[*23]** turn includes not just FSI advertising but also securing the tie-in partners, creating a joint coupon offer and using free standing inserts, in-store instant redeemable coupons, other in-store materials, retailer taggable television and radio ads and other performance incentives. See Amended Compl at P 5. Thus, alleging that consumers are restricted from using Theme's cost effective services does not enable the court to infer that there has been a price increase, output reduction or lessening of quality in FSIs.

Theme has now had two opportunities to allege antitrust injury and has failed to do so. It, therefore, appears that there is no set of facts that will render News America's simple enforcement of its exclusivity contracts the type of injury the antitrust laws were intended to prevent. Accordingly, the court DISMISSES Theme's antitrust claims with prejudice.

III

Theme attempts to state claims against News America for intentional interference with contractual relations and interference with prospective economic advantage. Specifically, Theme claims that News America's decision to enforce its exclusivity contracts with packaged goods companies even when they place "related **[*24]** item" advertising interferes with Theme's commitment contracts and business prospects with certain specified packaged goods companies. Of course, News America may be privileged to enforce its exclusive contracts. See *Richardson v La Rancherita, 98 Cal. App. 3d 73, 81, 159 Cal. Rptr. 285 (1979)* ***HN12***[] ("If [defendant] has a present, existing economic interest to protect, such as * * * a prior contract of his own * * * he is privileged to prevent performance of the contract of another which threatens it")(citing Prosser on Torts (4th ed 1971) § 129 at 944-45). This privilege applies with equal force to claims for interference with prospective economic advantage. *Della Penna v Toyota Motor Sales, U.S.A., Inc, 11 Cal. 4th 376, 389, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995)*(noting that once plaintiff establishes an intent to interfere, defendant may prevail by proving the affirmative defense of privilege or justification to secure business for himself).

This affirmative defense aside, plaintiff points to paragraphs 32-34 as containing the facts underlying its intentional interference with contractual relations and prospective economic advantage claims. [2] But these paragraphs merely allege that Theme has been compelled **[*25]** "to relinquish its right under its commitment contracts with [certain] packaged goods companies to purchase the FSI space on their behalf and instead has been compelled to permit these companies to purchase the FSI space directly from Defendant." See Amended Compl at P 33. It is plain that News America's alleged refusal to deal with Theme does not affect the consideration given for Theme's commitment contracts. Simply because News America purportedly will not deal with Theme does not mean that Theme no longer has the option to buy advertising space on behalf of the packaged goods companies; Theme simply chooses not to exercise that right to purchase FSI space if a packaged goods company agrees to purchase services from Theme and also has an exclusivity contract with News America. Paragraph 33, thus, alleges nothing more than a loss of business Theme hoped it might realize if packaged goods companies chose to place FSI advertisements through Theme. ***HN13***[] Alleged losses of speculative business opportunities do not make out claims for interference with contractual relations or prospective economic advantage. See *Youst v Longo, 43 Cal. 3d 64, 71, 233 Cal. Rptr. 294, 729 P.2d 728 (1987)*

[*26] IV

Pursuant to the foregoing, the court GRANTS defendant's motion to dismiss first, second, third, eighth and tenth claims (Doc # 28, pt 1) with prejudice.

---

[2] The first amended complaint exhibits an unfortunately rather common and wholly unsatisfactory style of pleading. The first 38 paragraphs contain an undigested recital of facts followed by cursory allegation of the eleven causes of action completely disconnected from the facts incorporating all 38 paragraphs by reference. With rare exceptions, see paragraphs 78 and 91, the reader is left to guess which of the alleged facts apply to which cause of action. Fortunately, defendant's previous motion to dismiss forced plaintiff to link alleged facts which claims alleged. Short of that, the pleading would have been totally indefinite.

IT IS SO ORDERED.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] Price Fixing & Restraints of Trade, Tying Arrangements

Cal. Bus. & Prof. Code § 16727 prohibits illegal tying arrangements. A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed. Indeed tying arrangements serve hardly any purpose beyond the suppression of competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Powers > General Overview

HN5[] Price Fixing & Restraints of Trade, Tying Arrangements

Tying arrangements are illegal per se if the party has sufficient economic power and substantially forecloses competition in the relevant market. Even when not per se illegal, a tying arrangement violates the Cartwright Act, Cal. Bus. & Prof. Code § 16727, if it unreasonably restrains trade. On the other hand, the Cartwright Act is not intended to dictate what price a company might charge for its goods: the problem arises when the company is conditioning the consumer's access to a product or service on his or her relinquishment of the freedom to choose whether to purchase another product or service. In other words, the seller cannot force its customers to accept one product or service in order to obtain another.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN6[] Regulated Practices, Price Fixing & Restraints of Trade

The antitrust laws are intended to protect the competitive process, not to protect individual competitors.

HN7[] **Pretrial Matters, Continuances**

A party's failure to file a motion for a continuance supported by the necessary declarations and proof waives the right to claim that it was deprived of the opportunity to oppose the motion for summary judgment.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court granted summary judgment for a luxury car distributor in an action against it by an automobile floor mat manufacturer that alleged defendant's decision to include floor mats as standard equipment in its vehicles constituted an illegal tying arrangement between its vehicles and floor mats in violation of the Cartwright Act (*Bus. & Prof. Code, § 16727*). (Superior Court of Los Angeles County, No. BC135028, Aviva K. Bobb, Judge.)

The Court of Appeal affirmed. The court held that there was no illegal tying arrangement. Consumers were not forced to purchase defendant's vehicle with standard floor mats any more than they were forced to purchase one with a standard antitheft device or with standard side-impact air bags. This was especially true given that defendant controlled less than 1 percent of the total car and light truck market in the United States, and only 10 percent of the luxury car market. There was no restraint of commerce in floor mats. The competition continued, only floor mat manufacturers were competing against each other to supply defendant instead of competing to supply individual dealerships. Moreover, no illegality resulted from the dealers being forced to accept the standard floor mats. A franchisor's ability to coerce its franchisee does not show market power and does not invoke antitrust concerns. Franchisees are able to lock in results from a business relationship of their choosing through the franchise, whose terms were freely entered into by both parties. (Opinion by Boren, P. J., with Fukuto and Zebrowski, JJ., concurring.)

Headnotes

CA(1)[] **(1)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Purpose.

--The purpose of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) is to protect and foster competition by preventing combinations and conspiracies which unreasonably restrain trade, and federal decisions are applicable when interpreting it.

CA(2)[] **(2)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements.

--Under *Bus. & Prof. Code, § 16727*, which prohibits illegal tying arrangements, a tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he or she will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed. Indeed tying arrangements serve hardly any purpose beyond the suppression of competition. They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price, but because of the power of leverage in another market. At the same time buyers are forced to forgo their free choice between competing products. Tying arrangements are illegal per se if the party has sufficient economic power and substantially forecloses competition in the relevant market. Even when not per se illegal, a tying arrangement violates the Cartwright Act if it unreasonably restrains trade. On the other hand, the Cartwright Act is not intended to dictate what price a company might charge for its goods: The problem arises when the company is conditioning the consumer's access to a product or service on the relinquishment of the freedom to choose whether to purchase another product or service. In other words, the seller cannot force its customers to accept one product or service in order to obtain another.

CA(3a)[] **(3a)** *CA(3b)*[] **(3b)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements—Floor Mats as Standard Equipment in Vehicles.

--The trial court properly granted summary judgment for a luxury car distributor in an action against it by an automobile floor mat manufacturer that alleged defendant's decision to include floor mats as standard equipment in its vehicles constituted an illegal tying arrangement between its vehicles and floor mats in violation of the Cartwright Act (*Bus. & Prof. Code, § 16727*). There was no illegal tying arrangement. Consumers were not forced to purchase defendant's vehicle with standard floor mats any more than they were forced to purchase one with a standard antitheft device or with standard side-impact air bags. This is especially true given that defendant controlled less than 1 percent of the total car and light truck market in the United States, and only 10 percent of the luxury car market. There was no restraint of commerce in floor mats. The competition continued, only floor mat manufacturers were competing against each other to supply defendant instead of competing to supply individual dealerships. Moreover, no illegality resulted from the dealers being forced to accept the standard floor mats. A franchisor's ability to coerce its franchisee does not show market power and does not invoke antitrust concerns. The franchisees are able to lock in results from a business relationship of their choosing through the franchise, whose terms were freely entered into by both parties.

CA(4)[] **(4)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements.

--Not every refusal to sell two products separately can be said to restrain competition under the Cartwright Act (*Bus. & Prof. Code, § 16727*). If each of the products may be purchased separately in a competitive market, one seller's decision to sell the two in a single package imposes no unreasonable restraint on either market, particularly if competing suppliers are free to sell either the entire package or its several parts. Buyers often find package sales attractive; a seller's decision to offer such packages can merely be an attempt to compete effectively.

CA(5)[] **(5)**

Summary Judgment § 27—Appellate Review—Reserving Objections—Discovery.

--Plaintiff in a civil action, which failed to file a motion for a continuance supported by the necessary declarations and proof, waived its right to claim on appeal that it was deprived of the opportunity to oppose a motion for summary judgment because of defendant's alleged failure to timely provide discovery.

Counsel: Ervin, Cohen & Jessup and Eliot G. Disner for Plaintiff and Appellant.

Brobeck, Phleger & Harrison, George A. Cumming, Jr., and Kent M. Roger for Defendants and Respondents.

Judges: Opinion by Boren, P. J., with Fukuto and Zebrowski, JJ., concurring.

Opinion by: BOREN

Opinion

[*719] [186] BOREN, P. J.**

A distributor in one of this state's most competitive fields --automobile sales--decided to include floor mats as standard equipment in its vehicles to compete with other car manufacturers which offer standard floor mats and to satisfy a perceived consumer demand for increasing levels of comfort and convenience in new automobiles. A floor mat manufacturer sued under the Cartwright Act, claiming that it was financially damaged because floor mats did not remain an optional accessory. We find no violation of **[***2]** California ***antitrust law*** and affirm the judgment in favor of the car distributor.

FACTS

Respondent Mercedes-Benz of North America, Inc. (Mercedes) sells luxury vehicles in the United States. Its sales represent less than 1 percent of all automobile sales in this country. Among luxury cars, Mercedes holds about a 10 percent market share.

Appellant Lloyd Design Corporation (Lloyd) manufactures and sells accessory floor mats for vehicles. Lloyd makes about 3,000,000 different combinations of floor mats. Lloyd sells floor mats to some Mercedes dealerships which, in turn, sell the mats to consumers. Because floor mats were optional accessories in Mercedes vehicles until 1995, there was a competitive business amounting to some $ 250,000 in new car floor mat sales to Mercedes dealerships in California. [1]

Beginning in model year 1996, Mercedes decided to make **[***3]** floor mats standard equipment after the Mercedes National Dealer Council met and urged the company to make this change because "luxury car customers expect this" and because a growing number of competitors offer this standard feature. [2] The cars are delivered by Mercedes to the dealerships with the mats already in the car trunk, ready for placement.

Mercedes does not manufacture floor mats itself. Rather, it purchases mats from suppliers which compete with each other to manufacture and sell mats to Mercedes. Lloyd is not precluded from bidding for a floor mat contract **[*720]** with Mercedes. Mercedes chose not to use Lloyd as a supplier because Lloyd's mats lack a **[***4]** heel pad, no price advantage was offered, and Lloyd uses a cutting process that is too slow for Mercedes's needs. Mercedes has not received a bid proposal from Lloyd since 1991. Mercedes dealerships continue to purchase floor mats from Lloyd for customers who need to replace their car mats.

The cost of floor mats is included in the base price of Mercedes vehicles. Mercedes dealerships are not charged separately for the mats. Mercedes's decision to include the car mats did not cause the base price of their vehicles to rise. On the contrary, Mercedes decreased the sticker price on most models while including extra standard equipment such as floor mats and cupholders. Now that the mats are in the car when it is delivered, the dealers are relieved of the cost of stocking a large inventory of floor mats and need not be concerned that a new car customer will demand a mat which is out of stock.

---

[1] According to Lloyd, six different companies in the United States compete with each other to manufacture and sell floor mats for Mercedes vehicles.

[2] A 1994 study by Mercedes showed that among "select" (i.e., premium) car manufacturers floor mats are standard equipment on Audis, Cadillacs, Infinitis, Jaguars (some models), Lincolns, Saabs and Volvos. Mats are "dealer installed" on Acuras, BMW's and Lexuses. Only Porsche still treats mats as optional equipment, among luxury carmakers.

In September of 1995, Lloyd filed suit against Mercedes claiming that the decision to deliver the cars with floor mats constituted an illegal tying arrangement between Mercedes automobiles and floor mats in violation **[**187]** of the Cartwright Act. [3] Mercedes brought a motion for summary judgment. The **[***5]** trial court granted the motion and entered judgment in favor of Mercedes and codefendant Caliber Motors, Inc. Lloyd appeals from the judgment.

DISCUSSION

I. *Cartwright Act Claim*

Lloyd alleges a violation of ***HN1***[] *Business and Professions Code section 16727*, an antitrust statute falling within the Cartwright Act. [4] ***CA(1)***[] **(1)** "The purpose of the Cartwright Act is to protect and foster competition by preventing combinations and conspiracies which unreasonably restrain trade." (*Morrison v. Viacom, Inc. (1997) 52 Cal. App. 4th 1514, 1524 [61 Cal. Rptr. 2d 544]*.) ***HN2***[] **[*721]** *Section 16727* is based on a federal equivalent, hence federal decisions are applicable when interpreting the Cartwright Act. (*Chicago Title Ins. Co. v. Great Western Financial Corp* ***[***6]*** *. (1968) 69 Cal. 2d 305, 315 [70 Cal. Rptr. 849, 444 P.2d 481]*; *Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal. 3d 842, 853 [94 Cal. Rptr. 785, 484 P.2d 953]*.)

CA(2)[] **(2)** ***HN4***[] *Business and Professions Code section 16727* prohibits illegal **[***7]** tying arrangements. A tying arrangement is " 'an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed. Indeed "tying arrangements serve hardly any purpose beyond the suppression of competition." [Citation.] They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power of leverage in another market. At the same time buyers are forced to forego their free choice between competing products. . . .' " (*Corwin v. Los Angeles Newspaper Service Bureau, Inc., supra, 4 Cal. 3d at p. 856*; *Eastman Kodak Co. v. Image Technical Services, Inc. (1992) 504 U.S. 451, 464, fn. 9 [112 S. Ct. 2072, 2081, 119 L. Ed. 2d 265]*.)

"***HN5***[] Tying arrangements are illegal per se if the party has sufficient economic power and substantially forecloses competition in the relevant market. [Citation.] Even **[***8]** when not per se illegal, a tying arrangement violates the Cartwright Act if it unreasonably restrains trade." (*Morrison v. Viacom, Inc., supra, 52 Cal. App. 4th at p. 1524*.) On the other hand, the Cartwright Act is not intended to dictate what price a company might charge for its goods: the problem arises when the company is "conditioning the consumer's *access* to a product or service on his or her relinquishment of the freedom to choose *whether* to purchase another product or service." (*Id. at p. 1525*.) In other words, the seller cannot force its customers to accept one product or service in order to obtain another. (*Ibid*.)

CA(3a)[] **(3a)** We see no illegal tying arrangement in this case. Consumers are not "forced" to purchase a Mercedes with standard floor mats any more than they are "forced" to purchase a Lexus with a standard antitheft device or a Volvo with standard side-impact air bags. This is especially true given that Mercedes controls less than 1 percent of the total car/light truck market in the United States, and only 10 percent of the luxury car market. A wide variety of car makes, models **[**188]** and price is available to consumers with an equally wide variety of standard **[***9]** equipment.

---

[3] Lloyd later added as a defendant one Mercedes dealership, respondent Caliber Motors, Inc. Lloyd makes no argument on appeal with respect to its claims against Caliber Motors, thereby waiving any claim of error in the trial court's judgment in favor of Caliber.

[4] ***HN3***[] *Business and Professions Code section 16727* reads, "It shall be unlawful for any person to lease or make a sale or contract for the sale of goods, merchandise, machinery, supplies, commodities for use within the State, or to fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods, merchandise, machinery, supplies, commodities, or services of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement or understanding may be to substantially lessen competition or tend to create a monopoly in any line of trade or commerce in any section of the State."

[*722] Nor can it be said that Mercedes is making a gambit to dominate the floor mat business: Mercedes is a *purchaser* of floor mats, not a manufacturer of floor mats. The company's economic self-interest lies in encouraging competition among floor mat manufacturers in order to obtain a better product at a lower price. Thus, Lloyd's entire premise that "competition in floor mats for new Mercedes vehicles has been eliminated" is fallacious. There is no restraint of commerce in floor mats. The competition continues, only now floor mat manufacturers are competing against each other to supply Mercedes instead of competing to supply individual Mercedes dealerships.

Once the floor mats are placed in the car by the manufacturer or its distributor, they become part of the car, just as the seats, stereo system, antitheft device and so on become part of the car once they are installed. [5] If we accept Lloyd's argument that the floor mats and the car are two separate products, the only "standard" equipment on cars would be the chassis, engine and body: Car seat, vanity mirror and steering wheel manufacturers (among others) would be claiming that their products come in **[***10]** all different shapes, sizes and colors and should therefore be separate product options left up to the consumer. Such a scenario--far from benefiting consumers--would make car buying a more exasperating experience than it already is.

Acknowledging that consumers are no more forced to buy Mercedes vehicles with standard floor mats than they are to buy Cadillacs or Infinitis with floor mats, Lloyd has recast the scenario by claiming that Mercedes *dealers* as opposed to actual consumers are "forced" to accept delivery of Mercedes vehicles with standard floor mats or risk losing their dealerships if they refuse to accept the cars as delivered. The dealerships would **[***11]** prefer, Lloyd insists, to choose their own floor mats. This is absurd. Mercedes dealers must also accept all the other standard equipment and aspects of the vehicles manufactured by the company whose product they have chosen to sell, from the colors the company chooses to paint its cars, to the climate-control system, to the design of the headlights, to the placement of the parking brake (hand brake versus foot brake), and so on. [6] If each dealership were entitled to dictate to Mercedes how to manufacture and equip its cars, the company would promptly go out of business.

[*12]** **[*723]** Thus, Lloyd's focus on the plight of Mercedes dealers who are forced to sell cars with standard floor mats is misplaced. "[A] franchisor's ability to 'coerce' its franchisee does not show market power and does not invoke antitrust concerns. . . . [P] The franchisees' 'lock in' . . . results from a business relationship of their choosing, the franchise, whose terms were freely entered into by both parties." (*Exxon Corp. v. Superior Court, supra, 51 Cal. App. 4th at p. 1686*.)

A Mercedes purchaser who is dissatisfied with the quality of nonessential standard items (such as the paint color, or the sound system, or the tire rims, or the floor mats) can easily arrange to have the car customized at the consumer's own expense or attempt to negotiate a credit or a price reduction from the dealer. Most consumers, however, would prefer to have as much standard equipment as possible on the car: it is well known that "options" drive up the price of a new car substantially. We do not see why consumers should be deprived of a complete standard **[**189]** equipment package just because a handful of dealers wished that the equipment were of better quality or a different color.

CA(4)[] **(4)** As the **[***13]** Supreme Court has observed, "not every refusal to sell two products separately can be said to restrain competition. If each of the products may be purchased separately in a competitive market, one seller's decision to sell the two in a single package imposes no unreasonable restraint on either market, particularly if competing suppliers are free to sell either the entire package or its several parts. . . . Buyers often find package

[5] There is no basis in law or reason to conclude that one part of a new car is a separate product merely because that part is easier to remove than another part of the car. With varying degrees of facility, all parts of a car may be removed or replaced. Nevertheless, when all the parts are packaged together to form a new car, it is one product.

[6] "To MBNA it is crucial that a dealer operating under a franchise distribution arrangement offer standardized products. Only then can customers confidently rely on the Mercedes name." (*Mozart Co. v. Mercedes-Benz of North America, Inc. (9th Cir. 1987) 833 F.2d 1342, 1349*.) "In a franchise relationship, the franchisee presumably accepts the burdens of the arrangement to reap some benefits" such as institutional advertising, marketing support, and so on. (*Exxon Corp. v. Superior Court (1997) 51 Cal. App. 4th 1672, 1684 [60 Cal. Rptr. 2d 195]*.)

sales attractive; a seller's decision to offer such packages can merely be an attempt to compete effectively . . . ." (Jefferson Parish Hospital Dist. No. 2 v. Hyde (1984) 466 U.S. 2, 11-12 [104 S. Ct. 1551, 1558, 80 L. Ed. 2d 2].)

The restraint of trade argument advanced by Lloyd has been thoroughly considered and rejected by the Third Circuit Court of Appeals, en banc, in a case involving Chrysler's decision to make auto sound systems standard equipment. (Town Sound and Custom Tops v. Chrysler Motors (3d Cir. 1992) 959 F.2d 468.) [7] Before the 1980's, sound systems were an option on Chrysler vehicles. After Chrysler decided to provide sound systems as **[*724]** standard equipment included in its vehicles' base price, it was sued by a group **[***14]** of independent auto sound dealers, claiming that this was an illegal restraint of trade and tie-in which forced consumers to accept inferior and over-priced Chrysler-supplied stereos. (Id. at p. 471.)

[*15]** The Third Circuit disposed of the two theories advanced by the auto sound dealers, observing that the relevant antitrust consideration was whether *consumers* were hurt, *not* whether independent auto sound dealers would eventually be "doomed to competitive oblivion." (959 F.2d at p. 495, fn. 40.) [8] First, the court found there was no violation "per se" of the antitrust laws because Chrysler--with 10 to 12 percent of the new car market--lacks sufficient market power to force or coerce the objected-to tied-in sale. (Id. at pp. 475-481.) The court rejected the notion that the relevant tying product market consisted only of new Chrysler cars manufactured for sale in this country and instead concluded that "[t]he relevant product market includes Chrysler cars *and* cars that are reasonably interchangeable with Chrysler cars." (Id. at p. 480.) Second, the court concluded that under the "rule of reason," the auto sound dealers could not prevail because there was no injury of the type the antitrust laws were designed to prevent. The court reasoned that the market for automobiles is so competitive that any manufacturer with a substandard package of performance, color, styling, **[***16]** sound system, etc., will find consumers either buying their cars from competitors or demanding a lower price for the car given its less desirable features. (Id. at pp. 481-494.)

CA(3b)[] **(3b)** The same reasoning applies here. Mercedes--with a minuscule share of the total new car market and only a small share of the new luxury car market--does not have sufficient market power to force a tie-in arrangement. Lloyd's attempt to avoid defeat by pleading that the relevant product market is "custom floor mats sold to Mercedes dealers for new cars" is unavailing. The product market is not confined to Mercedes or floor mats, as neither product is unique but rather is one choice among many. (See Exxon Corp. v. Superior Court, supra, 51 Cal. App. 4th at p. 1686, fn. 7; **[***17]** **[**190]** Muenster Butane, Inc. v. Stewart Co. (5th Cir. 1981) 651 F.2d 292, 296.) "Put more **[*725]** simply, a market . . . includes actual or potential competitors who may take business away from each other." (Town Sound and Custom Tops v. Chrysler Motors, supra, 959 F.2d at p. 480.) There is significant competition in cars and car floor mats that is not substantially lessened or otherwise restrained by Mercedes's decision to purchase floor mats from suppliers rather than leaving that decision up to car buyers. [9] The continued

---

[7] Evidently aware that the *Town Sound* opinion is fatal to its claims, Lloyd argues that the opinion has been supplanted by Eastman Kodak Co. v. Image Technical Services, Inc., supra, 504 U.S. 451. The facts of the *Kodak* case are entirely distinguishable from *Town Sound* and the case at bench. Kodak, which controlled 100 percent of the parts market for its photocopiers, attempted to monopolize photocopier repairs by refusing to supply replacement parts to independent copier repair companies, thereby forcing consumers who were already "locked in" to have their broken copiers serviced by Kodak and Kodak alone. An analogy to *Kodak* might be drawn if Mercedes were refusing to supply otherwise unobtainable Mercedes replacement parts to independent car repair shops in order to force consumers to have their cars repaired at Mercedes dealerships. That is not remotely what this case is about. Consumers factor in the quality of the standard floor mats *before* they purchase the car or are "locked in."

[8] Otherwise stated, ***HN6***[] the antitrust laws are intended to protect the competitive process, not to protect individual competitors. (Atlantic Richfield Co. v. USA Petroleum Co. (1990) 495 U.S. 328, 342-345 [110 S. Ct. 1884, 1893-1895, 109 L. Ed. 2d 333].)

[9] See Suburban Mobile Homes, Inc. v. AMFAC Communities, Inc. (1980) 101 Cal. App. 3d 532, 549 [161 Cal. Rptr. 811], suggesting that the existence of a tying arrangement may be established "if a not insubstantial volume of commerce in the tied

competitiveness of the automobile industry has protected and benefited consumers who can take advantage of the profusion of car choices to bargain for better designed, standard equipment-filled vehicles at optimum prices.

[*18]** At base, the problem here is not that consumers or dealers are forced to accept Mercedes vehicles with standard floor mats. On the contrary, the evidence shows that consumers and retailers benefited when Mercedes began to include floor mats as standard equipment at a *lower* base price than was previously charged. Rather, the "problem" which Lloyd refuses to acknowledge is that Mercedes is presently using one or more of Lloyd's competitors as its floor mat supplier. This is not a "problem"; it is the marketplace in action. If Lloyd devises a way to manufacture a floor mat which is of better quality and a lower price than its competitors' mats, it will be able to sell Mercedes floor mats on a more substantial scale than ever before. Lloyd's present inability to offer Mercedes better service, product and price than other floor mat manufacturers cannot be resolved by invoking the Cartwright Act or resorting to the courts.

There is, in short, no evidence to support a claim that Mercedes's decision to include floor mats as standard equipment in its new vehicles "substantially lessen[s] competition or tend[s] to create a monopoly" in this state's commerce. (*Bus. & Prof. Code, §* ***[***19]*** *16727*.) Summary judgment was properly granted as a matter of law. (*Tibor v. Superior Court (1997) 52 Cal. App. 4th 1359, 1368-1369 [61 Cal. Rptr. 2d 326]*.)

II. *Discovery Issue*

CA(5)[] **(5)** Lloyd argues that the judgment below should be reversed because Mercedes failed to timely provide discovery. Lloyd failed, however, to make a showing that a continuance of the summary judgment motion was needed in order to compel production of the information it now claims was central to its case. (*Code Civ. Proc., § 437c, subd. (h)*; Super. Ct. L.A. County Rules, rule 9.21(g).) ***HN7***[]

[*726] Lloyd failed to file a motion for a continuance supported by the necessary declarations and proof and thus waives its right to claim now that it was deprived of the opportunity to oppose the motion for summary judgment. (*Lewinter v. Genmar Industries, Inc. (1994) 26 Cal. App. 4th 1214, 1224 [32 Cal. Rptr. 2d 305]*.) Indeed, Lloyd's opposition to the motion for summary judgment informed the trial court that "The showing made by Lloyd here should be more than enough to permit it to now proceed to trial, even without it now having the significant discovery that defendants still cavalierly deny it." By indicating **[***20]** that the court had "more than enough" evidence before it to sustain a ruling in Lloyd's favor, Lloyd gave the trial court sufficient reason not to continue the motion for the purposes of allowing further discovery.

DISPOSITION

The judgment is affirmed.

Fukuto, J., and Zebrowski, J., concurred.

A petition for a rehearing was denied September 1, 1998, and appellant's petition for review by the Supreme Court was denied November 18, 1998.

End of Document

---

product is restrained." We need not analyze the correctness of the dicta in *Suburban* in light of our conclusion that there are not two separate tied products in the present case.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN3[] **Intentional Interference, Elements**

Following the Restatement (Second) of Torts for competitive torts, Iowa law requires proof of improper interference. In determining what is improper, the Restatement recognizes that vigorous competition is desirable, not tortious. See *Restatement (2d) Torts § 768*. Reflecting that principle, the Supreme Court of Iowa has held that intentional interference with prospective advantage requires proof of a predominant purpose to injure or destroy the plaintiff.

Opinion by: LOKEN

Opinion

[*970] LOKEN, Circuit Judge.

National Parcel Service is a "zone skipper," a shipping company that receives packages from mail order and retail catalog merchants and delivers them in bulk to United States Postal Service (USPS) bulk mail distribution centers. This enables NPS to **[*971]** charge lower prices than United Parcel Service (UPS), because UPS charges a premium for residential deliveries, and to offer faster service **[**2]** than USPS.

J.B. Hunt Transport is a large interstate trucking company. In mid-1994, a J.B. Hunt subsidiary entered the zone skipping business, targeting the customers of NPS and a third zone skipper, CTC, with low prices. J.B. Hunt's early strategy was to make "whatever price concessions you need to give or whatever, get us in the business quickly." At a meeting between representatives of J.B. Hunt and NPS, an NPS principal asked the J.B. Hunt representative why he had suggested the meeting. The answer was, "Well, I'm not going to buy you. Why would I buy you? I'd just take you out." J.B. Hunt's revenues grew quickly at its competitors' expense. Not surprisingly, NPS lost business and J.B. Hunt lost money. NPS responded with this lawsuit, seeking damages for predatory pricing under the federal antitrust laws and the Iowa law of interference with prospective advantage. The district court [1] granted summary judgment in favor of the J.B. Hunt defendants, and NPS appeals. We affirm.

[3]** *HN1*[] To establish competitive injury for a predatory pricing claim under *§ 2* of the Sherman Act, *15 U.S.C. § 2*, plaintiff must prove "that the prices complained of are below an appropriate measure of its rival's costs," *and* "that the competitor had . . . a dangerous probability of recouping its investment in below-cost prices." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-24, 125 L. Ed. 2d 168, 113 S. Ct. 2578*

* The HONORABLE JOHN B. JONES, United States District Judge for the District of South Dakota, sitting by designation.

[1] The HONORABLE ROBERT W. PRATT, United States District Judge for the Southern District of Iowa.

(1993). Here, NPS cannot show a dangerous probability of recoupment because UPS and USPS can always take over or eliminate the zone skipping "niche" market should a competitor like J.B. Hunt or NPS begin charging supracompetitive prices and reaping monopoly profits. ***HN2***[] Unfair pricing antitrust claims should be viewed with "great caution and a skeptical eye." *Bathke v. Casey's General Stores, Inc., 64 F.3d 340, 343 (8th Cir. 1995)*. The district court properly dismissed this claim.

NPS's state law tort claim is for interference with its relations with one customer who succumbed to J.B. Hunt's better prices. ***HN3***[] Following the Restatement (Second) of Torts for competitive torts, Iowa law requires proof **[**4]** of "improper" interference. See *Nesler v. Fisher & Co., 452 N.W.2d 191, 196-99 (Iowa 1990)*. In determining what is improper, the Restatement recognizes that vigorous competition is desirable, not tortious. See *Restatement (2d) Torts § 768*. Reflecting that principle, the Supreme Court of Iowa has held that intentional interference with prospective advantage requires proof of a "predominant purpose" to injure or destroy the plaintiff. See *Berger v. Cas' Feed Store, Inc., 543 N.W.2d 597, 599 (Iowa 1996)*; *Wilkin Elevator v. Bennett State Bank, 522 N.W.2d 57, 62 (Iowa 1994)*. NPS argues it has sufficient evidence of such a purpose -- the statement by J.B. Hunt that it could "take you out." One court has persuasively suggested that intent is not a useful standard for distinguishing between actionable predatory pricing and healthy price competition because hard competition necessarily entails injuring unsuccessful competitors, and "you cannot be a sensible business executive without understanding the link among prices, your firm's success, and other firms' distress." *A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F.2d 1396, 1401-02 (7th Cir. 1989)*, **[**5]** cert. denied, *494 U.S. 1019, 108 L. Ed. 2d 501, 110 S. Ct. 1326 (1990)*. For this reason, we are uncertain whether the Supreme Court of Iowa would apply its "predominant purpose" test when the alleged interference is predatory pricing. But in any event, we agree with the district court that the passing remark by J.B. Hunt that it could "take you out" is not the kind of competitive threat that will support a prima facie case of tortious interference. Cf. *Fischer v. UNIPAC Serv. Corp., 519 N.W.2d 793, 800 (Iowa 1994)*.

Accordingly, we affirm.

Concur by: HEANEY (In Part)

Dissent

[*972] HEANEY, Circuit Judge, concurring in part and dissenting in part

I agree with the majority that, as a matter of law, NPS failed to establish a violation of federal ***antitrust law***. In my view, however, the district court erred by holding that as a matter of Iowa state law, J.B. Hunt did not have the predominant purpose of injuring or destroying NPS. There was more than sufficient evidence to present this issue to a jury. For this reason, I respectfully dissent.

Under the Iowa law of interference with prospective **[**6]** advantage, NPS was required to prove five elements as part of its prima facie case: "(1) that it had a prospective contractual or business relationship; (2) that defendant knew of the prospective relationship; (3) that defendant intentionally and improperly interfered with the relationship; (4) that defendant's interference caused the relationship to fail to materialize; and (5) the amount of the resulting damage." *Preferred Marketing Assocs. v. Hawkeye Nat'l Life Ins., 452 N.W.2d 389, 396 (Iowa 1990)* (citation omitted). As the majority correctly points out, NPS was required further to show that J.B. Hunt's predominant purpose was to injure or destroy NPS. In this regard, there remain genuine issues of material fact warranting a trial.

When NPS's president, John Krusenstjerna, met with J.B. Hunt's manger, Donald Swanson, Swanson stated: "I'm not going to buy you. Why would I buy you? I'd just take you out." Swanson also stated that Hunt decided to try and take NPS out of the zone-skipping market because "you were the easiest." J.B. Hunt immediately targeted NPS's most lucrative client, offered prices well below market costs, took a significant loss, and within a **[**7]** short time of Krusenstjerna's and Swanson's meeting, NPS was forced to leave the zone-skipping market.

In *Willey v. Riley, 541 N.W.2d 521 (Iowa 1995)*, the Iowa Supreme Court stated that in order to demonstrate that a defendant's predominant purpose was to injure or destroy the plaintiff, a plaintiff must present evidence of "intent" and mere "speculation . . . is not evidence" warranting that a case be submitted to a jury. *Id. at 527*. In this case, NPS presented evidence in the form of Swanson's statements to Krusenstjerna that J.B. Hunt had the intent to take NPS out of the market. Rather than NPS merely speculating that this was the case, Swanson said as much to Krusenstjerna.

Coupled with this intent, J.B. Hunt's subsequent conduct certainly raises genuine issues of material fact as to its predominant purpose.

The majority's correct resolution of the federal claim should not confuse the issue of the state law claim. In *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*, the United States Supreme Court stated:

> Even an act of pure malice by one business competitor **[**8]** against another does not, without more, state a claim under the federal antitrust laws; those laws do not create a federal law of unfair competition or "purport to afford remedies for all torts committed by or against persons engaged in interstate commerce."

Id. at 225 (quoting *Hunt v. Crumboch, 325 U.S. 821, 826, 89 L. Ed. 1954, 65 S. Ct. 1545 (1945)* (emphasis added)). Because there are genuine issues of material fact, a jury should determine whether J.B. Hunt committed a tort. In short, I would reverse on the state law claim and remand this case to the district court. On remand, the district court could retain jurisdiction over the case, see *28 U.S.C. § 1367(a)*, or exercise its discretion in dismissing the claim without prejudice. See id. *§§ 1367(c)*, *1367(d)*.

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment under *Fed. R. Civ. P. 56(c)* is appropriate if the record, read in the light most favorable to the non-moving party, demonstrates no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. Material facts are those necessary to the proof or defense of a claim, and are determined by reference to the substantive law. The court must not weigh the evidence or determine the truth of the matter but only determine whether there is a genuine issue for trial. In attempting to illustrate why a case should proceed to trial, however, the nonmoving party may not just point to some theoretical factual dispute once the movant has made a strong showing that they are entitled to judgment. When the moving party has carried its burden under *Rule 56(c)*, its opponent must do more than simply show that there is some metaphysical doubt as to the material facts.

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > ... > Defenses > Patent Invalidity > General Overview

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN2[] **Burdens of Proof, Clear & Convincing Proof**

Because validity of a patent is presumed under *35 U.S.C.S. § 282*, a party challenging validity must show prior invention, knowledge, or market availability by clear and convincing evidence.

Patent Law > Anticipation & Novelty > General Overview

HN3[] **Patent Law, Anticipation & Novelty**

Oral testimony by an interested party about prior inventions and their presence on the market must be corroborated. While relying on oral testimony alone is heavily disfavored, this does not mean that oral testimony is irrelevant or somehow excludable from a court's consideration of the sufficiency of the evidence. There are eight criteria to assess whether the offered corroboration is sufficient to find the testimony significant. Applying these criteria calls more for general consideration than precise coverage of each element. The overall examination of proposed oral testimony and its corroboration is one of applying a "rule of reason" rather than per se categoricals.

Evidence > ... > Credibility of Witnesses > Impeachment > General Overview

Patent Law > Anticipation & Novelty > General Overview

Evidence > ... > Testimony > Credibility of Witnesses > General Overview

Patent Law > Invention Date & Priority > General Overview

HN4[] **Credibility of Witnesses, Impeachment**

The eight criteria to assess whether the offered corroboration is sufficient to find the oral testimony significant about prior inventions and their presence on the market are: 1) relationship between the corroborating witness and the alleged prior user, 2) time period between the event and trial, 3) interest of the corroborating witness in the subject matter in suit, 4) contradiction or impeachment of the witness's testimony, 5) extent and details of the corroborating testimony, 6) witness's familiarity with the subject matter of the patented invention and the prior use, 7) probability that a prior use could occur considering the state of the art at the time, 8) impact of the invention on the industry, and the commercial value of its practice.

Patent Law > Anticipation & Novelty > General Overview

Patent Law > Jurisdiction & Review > Standards of Review > General Overview

HN5[] **Patent Law, Anticipation & Novelty**

Where there is significant corroboration of the proposed oral testimony and the general circumstances of the proffered testimony take it outside relatively unreliable situations, it is improper to grant summary judgment without the factfinder's assessment of the credibility of the witnesses and the character of the documentary evidence.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Evidence > Inferences & Presumptions > Presumptions > Conflicting Presumptions

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN6[] **Bad Faith, Fraud & Nonuse, Fraud**

A monopoly granted pursuant to a patent is immune from either private or public suits under the Sherman Act. Where a patent is obtained by fraud, however, this immunity is stripped away.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN7[] **Bad Faith, Fraud & Nonuse, Fraud**

A patentee's omission of prior art in a patent application may give rise to the defense of inequitable conduct before the Patent and Trademark Office (PTO). It may also give rise to a fraud-based antitrust claim. The required showing to establish fraud, however, is greater than that required to establish the defense of inequitable conduct. This is because inequitable conduct is a defense that acts as a "shield," whereas a more serious finding of fraud acts as a "sword" that exposes the patentee to antitrust liability. A finding of fraud requires a higher showing of both intent and materiality: It must be based on independent and clear evidence of deceptive intent together with a clear showing of reliance, that is, that the patent would not have issued but for the misrepresentation or omission. For an omission such as a failure to cite a piece of prior art to support a finding of fraud, the withholding of the reference must show evidence of fraudulent intent. A mere failure to cite a reference to the PTO will not suffice.

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN8[] **Inequitable Conduct, Effect, Materiality & Scienter**

Although a mere failure to cite a piece of prior art is not itself sufficient to show fraud, a jury may infer the requisite intent from the facts and circumstances surrounding the intentional non-disclosure of material information.

Torts > Business Torts > Slander of Title > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Opinion

ORDER GRANTING [*2] IN PART AND DENYING IN PART DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT.

INTRODUCTION

This matter comes before the Court on two motions for summary judgment by defendants Pro-Innovative Concepts, Inc. ("PIC") and Mark Scatterday. Defendants seek the Court's determination that plaintiff's antitrust, business tort, and abuse of process claims are invalid, and that the on-sale bar and prior art challenges to defendant Scatterday's patent are insufficient to invalidate the patent as a matter of law. The motions are GRANTED in part and DENIED in part.

BACKGROUND

The facts surrounding the issues at the core of the case are addressed more fully in a separate order denying summary judgment to defendants on their counterclaim for patent infringement, but the essential issues are briefly covered again here for clarity. Defendant and counter-claimant's U.S. Patent No. 5,556,358 ("the '358 patent") is a continuation of two earlier patents on a deformable device used to exercise the hands, commonly known as a "squeeze ball." It is primarily embodied in a product called "The Gripp," which is manufactured and sold by PIC. Plaintiff Sport Squeeze allegedly infringes upon the patent **[*3]** through their production of a product called the "Ad Squeeze". It filed this suit seeking declaratory judgment of noninfringement and invalidity, as well as to recover antitrust and other business tort damages based on defendants' alleged improper use of the patent. Defendants counterclaimed for patent infringement. The separate order denies summary judgment for defendants on their patent infringement claim. This order addresses two summary judgment motions by defendants asserting that plaintiff's evidence is insufficient as a matter of law to show invalidity or violation of the antitrust and unfair competition laws. Because the antitrust and other business tort claims are based on the assertion that defendant and counterclaimant fraudulently procured the patent given their alleged knowledge that it would be disallowed on prior art and on-sale bar grounds, the Court addresses the logically prior invalidity claims first after covering the basic standard of review.

ANALYSIS

I. Summary Judgment Standard

HN1[] Summary judgment under *Fed. R. Civ. P. 56(c)* is appropriate if the record, read in the light most favorable to the non-moving party, demonstrates no genuine issue of material **[*4]** fact and the moving party is entitled to judgment as a matter of law. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *Bagdadi v. Nazar, 84 F.3d 1194, 1197 (9th Cir. 1996)*. Material facts are those necessary to the proof or defense of a claim, and are determined by reference to the substantive law. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. The court must not weigh the evidence or determine the truth of the matter but only determine whether there is a genuine issue for trial. *See* *Abdul-Jabbar v. General Motors Corp., 85 F.3d 407, 410 (9th Cir. 1996)*. In attempting to illustrate why a case should proceed to trial, however, the nonmoving party may not just point to some theoretical factual dispute once the movant has made a strong showing that they are entitled to judgment. "When the moving party has carried its burden under *Rule 56(c)*, its opponent must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Electric Industrial Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986).* **[*5]**

II. Prior Art and On-Sale Bar Challenges

Plaintiff challenged the validity of the patent on the grounds that it was anticipated within the relevant art under 35 U.S.C. § 102(a), that prior commercial availability more than one year before the initial patent was filed renders the invention unpatentable under 35 U.S.C. § 102(b), and that at least certain claims were previously invented and unpatentable under 35 U.S.C. § 102(g). By statute, the patent is presumed valid. *See* 35 U.S.C. § 282. **HN2**[] Because validity is presumed, a party challenging validity must show prior invention, knowledge, or market availability by clear and convincing evidence. *See* Innovative Scuba Concepts, Inc. v. Feder Indus., Inc., 26 F.3d 1112, 1115 (Fed.Cir.1994) ("Under 35 U.S.C. § 282, a patent is presumed valid and one challenging its validity bears the burden of proving invalidity by clear and convincing evidence.").

Plaintiff's evidence to support the prior art and on sale bar challenges to the patent comes primarily, but not exclusively, from proposed testimony **[*6]** to be presented by an alleged prior inventor, Geoffrey O'Connor. O'Connor claims to have invented his product, the "Deadball," in late 1990 and to have brought it to market in May or June of 1991. These claims are backed up by invoices showing bulk purchases of the materials used to construct the Deadball in May 1991 and sales for what the declarations indicate was a secondary purchase by a dealer in late June of 1991. Proposed testimony by others would detail O'Connor's prior invention efforts and a reduction to practice in late 1990. The record puts Scatterday's first relevant patent filing, U.S. Patent 5,190,504 ("the '504 patent"), of which the '358 patent is a continuation, at June 9, 1992. It further indicates that Scatterday reduced the claimed invention to practice in February or March in 1991. Plaintiff contends that its declarations and documentary evidence raise material issues of fact as to whether the invention was unpatentable as anticipated because O'Connor's invention was prior art or because it was on sale more than one year prior to Scatterday's first patent filing.

Defendants attack the sufficiency of this evidence to meet the demanding "clear and convincing" standard **[*7]** primarily by contending that oral testimony about prior inventions and their presence on the market is insufficient as a matter of law to survive summary judgment. They rely primarily on the doctrine set forth in Washburn & Moen Mfg. Co. v. Beat-Em-All Barbed Wire Co., 143 U.S. 275, 12 S. Ct. 443, 36 L. Ed. 154 (1892) ("Barbed Wire Patent Case"), and more recently invoked in the Federal Circuit's opinion in Woodland Trust v. Flowertree Nursery, Inc., 148 F.3d 1368, 1998 WL 385665 (Fed. Cir. 1998), that **HN3**[] oral testimony by an interested party must be corroborated. While relying on oral testimony alone is heavily disfavored, this does not mean that oral testimony is irrelevant or somehow excludable from a court's consideration of the sufficiency of the evidence. In *Woodland Trust*, the Federal Circuit noted both the general rule and eight criteria to assess whether the offered corroboration is sufficient to find the testimony significant under In re Reuter, 670 F.2d 1015, 1021 n.9 (C.C.P.A. 1981). [1] Applying these criteria calls more for general consideration than precise coverage of each element; the Federal Circuit has described **[*8]** the overall examination of proposed oral testimony and its corroboration as being one of applying a "rule of reason" rather than per se categoricals. *See* Mahurkar v. C.R. Bard. Inc., 79 F.3d 1572, 1577 (Fed. Cir. 1996).

The Court therefore finds it unnecessary to address each of these criteria individually on corroborating evidence. It instead finds **[*9]** that there is sufficient proposed and admissible testimony that a jury could find the Deadball prior art and that it was on sale more than one year prior to Scatterday's initial patent filing by clear and convincing evidence for three reasons. First, and most importantly, the testimony as to prior art and the time of first sale is not uncorroborated. The prior art claim is supported primarily by oral testimony, but as outlined below, it is not the type of uncorroborated oral testimony typically discredited in an infringement action. The on sale bar claim is supported

[1] **HN4**[] The eight criteria are: 1) relationship between the corroborating witness and the alleged prior user; 2) time period between the event and trial; 3) interest of the corroborating witness in the subject matter in suit; 4) contradiction or impeachment of the witness's testimony; 5) extent and details of the corroborating testimony; 6) witness's familiarity with the subject matter of the patented invention and the prior use; 7) probability that a prior use could occur considering the state of the art at the time; 8) impact of the invention on the industry, and the commercial value of its practice. Reuter, 670 F.2d at 1021 n.9.

by both oral testimony and documentary evidence indicating purchase of materials to construct the Deadball in the time frame that would invalidate Scatterday's patent under the on-sale bar doctrine.

Second, the disallowance of oral testimony as relevant evidence in the Barbed Wire Patent Case and its progeny was heavily dependent on the noted interests of the party claiming prior invention. Here, there is no clear interest on the part of alleged Inventor O'Connor. He is not the alleged infringer, nor is he affiliated with the alleged infringer. He did not patent his invention, and would be ineligible to file for such **[*10]** a patent now. At most, his interest in this litigation is in avoiding any possible infringement action against him, but even that possibility is foreclosed by the fact that his invention did not use a critical ingredient of the '504 patent. [2] It is also highly probable given the presence of squeezable toys and other equipment in the market, as well as easily available materials, that someone such as O'Connor could have put a very similar invention together before Scatterday.

Third, application of the Barbed Wire Patent Case doctrine relies heavily on the deterioration (or selectivity) of witnesses' memories because of the time lapse between invention and infringement actions and the entire absence of documentary corroboration. Here, O'Connor's proposed **[*11]** testimony is supported by an almost contemporaneous course of conduct in reaction to the defendants' assertion of infringement against O'Connor. When he received a cease and desist letter in early 1993, O'Connor through his counsel informed defendants in a May 6, 1993 letter that his invention had been on sale "at least as early as June 1, 1991" and reminded them of their obligation to reveal this fact to the Patent Office as likely barring the patent and any continuation patents thereon. Defendants did not report the Deadball's existence as posing a possible problem for the patentability of Scatterday's product in any of the continuation patent applications. They also dropped any action against the Deadball and pursued O'Connor no further. Defendants insistence that they were not obligated to indicate the Deadball's existence in any continuation application may or may not be consistent with the standards of the regulations governing a duty to investigate and report material prior art. *See* 37 C.F.R. §§ 1.56, 1.97 & 1.98. Regardless of whether it was proper to withhold this information from the PTO, the existence of this documented, almost contemporaneous action asserting priority **[*12]** supports the reliability of the testimony. [3]

[*13] Overall, then, ***HN5***[] where there is significant corroboration of the proposed oral testimony and the general circumstances of the proffered testimony take it outside the relatively unreliable situations analyzed In the Barbed Wire Patent Case and those like it, it is improper to grant summary judgment without the factfinder's assessment of the credibility of the witnesses and the character of the documentary evidence.

III. Antitrust Claims

Patent and ***antitrust law*** sometimes seem to be at loggerheads because the former conveys a type of monopoly while the latter forbids improper acquisition or maintenance of a monopoly. The general presumption resolving this conflict is that ***HN6***[] a monopoly granted pursuant to a patent is immune from either private or public suits under

[2] Defendants admit that the absence of talc as a lubricant in the Deadball would have prevented a valid infringement action under the '504 patent. (*See* Mem. of Pts. & Auth. in Supp. of Motion for Summ. Adjud. Of Issues that Deadball Is Not Prior Art at 5.)

[3] Defendants' rely extensively on *Hebert v. Lisle Corp., 99 F.3d 1109 (Fed. Cir. 1996)*, and specifically its alleged similarity to this case. But the Federal Circuit emphasized there that the basis of its invalidation of the jury verdict of unenforceability based on inequitable conduct was the fact that *no evidence whatsoever* was introduced that the information submitted to the patent holder was in fact prior art. *See* *Hebert, 99 F.3d at 1115* ("Lisle's patent expert did not testify that the omitted information was prior art. … No submission was offered or described as 'prior art' to the Hebert invention.") When there is literally no evidence that a party had prior art material, it is of course impossible for a factfinder to decide from an examination of the evidence that the party's decision to withhold prior art was willful. Here, there is evidence indicating that the Deadball was in fact prior art, and plaintiff's patent expert is prepared to testify that it was. Though *Hebert* certainly counsels a court to be careful in allowing final decisions by factfinders where no evidence of materiality is presented by a patent challenger, and underscores the burden on plaintiff to present evidence at trial to avoid a motion under *Fed. R. Civ. P. 50(a)*, it does not mandate summary judgment at this time.

the Sherman Act. Where a patent is obtained by fraud, however, this immunity is stripped away. *See* *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965)*.

HN7[] A patentee's omission of prior art in a patent application may give rise to the defense of inequitable conduct before the Patent and Trademark Office. In some circumstances, it **[*14]** may also give rise to a fraud-based antitrust claim under Walker Process. *See* *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068-70 (Fed. Cir. 1998)*. The required showing to establish fraud, however, is greater than that required to establish the defense of inequitable conduct. *See id.* This is because inequitable conduct is a defense that acts as a "shield," whereas a more serious finding of fraud acts as a "sword" that exposes the patentee to antitrust liability. *See* *id. at 1070*. Thus, a finding of Walker Process fraud requires a higher showing of both intent and materiality:

> It must be based on independent and clear evidence of deceptive intent together with a clear showing of reliance, i.e., that the patent would not have issued but for the misrepresentation or omission. Therefore, for an omission such as a failure to cite a piece of prior art to support a finding of *Walker Process* fraud, the withholding of the reference must show evidence of fraudulent intent. A mere failure to cite a reference to the PTO will not suffice.

Id. at 1071.

Defendants contend that it is entitled to judgment **[*15]** as a matter of law on plaintiff's antitrust claims because there is insufficient evidence of intent and of materiality to create a jury question. Though defendants are undoubtedly correct that only a high showing of materiality and intent may support a claim of fraud that would, in turn, strip it of antitrust immunity, there is sufficient evidence here to let plaintiff's antitrust claims go to a jury.

HN8[] Although a mere failure to cite a piece of prior art is not itself sufficient to show *Walker Process* fraud, the *Nobelpharma* court specifically held that a jury may infer the requisite intent from the facts and circumstances surrounding the intentional non-disclosure of material information. *See* *Nobelpharma, 141 F.3d at 1072*.

Here, plaintiff has presented evidence that defendants knew that the patent might be invalidated by the existence of prior art embodied in the O'Connor Deadball and the fact that the Deadball may have been on sale more than one year prior to Scatterday's initial filing date. Consequently, there is at least a triable issue as to whether the Deadball was at least material prior art, and whether defendants were aware of it. Thus, the evidence, **[*16]** viewed in a light most favorable to the plaintiff, indicates that defendants knowingly failed to disclose material prior art. Under *Nobelpharma*, this is sufficient to allow a reasonable jury to conclude that defendants possessed the requisite fraudulent intent. *See* *id. at 1072*. Defendants' motion for summary judgment on plaintiff's antitrust claims is therefore DENIED. [4]

IV. Abuse of Process, Interference with Prospective Economic Advantage, and Trade Libel Claims

Plaintiffs have produced admissible evidence that tends to establish each element of the abuse of process and interference with prospective economic advantage claims sufficient to create disputes of material fact -- though not as to all issues within those two causes of action. Their evidence on trade libel claims fails entirely, however, for the reason that defendants point out in their papers -- proof of "special damages" is required and there is an utter **[*17]** lack of direct connection between the alleged actions of defendants that are supported by the evidence and loss of specific business.

On the abuse of process claim with respect to an action taken in Phoenix, evidence is presented tending to establish that defendants improperly requested a temporary restraining order and filed a false affidavit as part of a relevant action, making a grant of defendants' motion as to that claim impossible. But plaintiff also presents

[4] Defendant's motion to strike is DENIED without prejudice.

insufficient evidence as to abuse of process by the filing of a suit against people who defendants apparently thought were affiliated with Sport Squeeze, such that summary adjudication of that claim is proper.

For interference with prospective economic advantage, plaintiff presents evidence as to the decline in gross business and disruptions of order flow under circumstances indicating intentional interference by defendants, and that damages were thereby sustained. ***HN9***[] With this broader type of tort, only evidence as to general damages is necessary. On the trade libel claims, however, a showing of specific damages is required. *See Erlich v. Etner, 224 Cal. App. 2d 69, 73-74, 36 Cal. Rptr. 256 (1964)* ("In **[*18]** the usual case ... the plaintiff must identify the particular purchasers who have refrained from dealing with him, and specify the transactions of which he claims to have been deprived.") (quoting Prosser on Torts at 766)). Here, there is no direct evidence of damage tying the loss of even one customer precisely to the actions of defendant in such a fashion. Summary adjudication for the trade libel claims in defendants' favor is therefore appropriate.

With regard to the other causes of action, the evidence is sufficient to support a jury verdict for plaintiffs. It may not turn out to be enough to convince a jury that plaintiff's version of the facts is accurate, but it is enough, read favorably to plaintiff as the non-moving party, to create a material dispute of fact. Defendants' mere assertion that no evidence is present that a factfinder could use to decide these causes of action against defendant is without merit.

V. Remaining Claims

Defendants contend that plaintiff has waived the third and fifth causes of action pled in its complaint. The third cause of action is simply a plea for injunctive relief as a remedy. Such a possibility remains an option as the case goes **[*19]** on should the plaintiff show it is entitled to such relief. This motion to dismiss this claim is DENIED.

Plaintiff's negligence claim is merely an antitrust claim in disguise. Plaintiff alleges that defendants had a duty not to monopolize competition, and by breaching the antitrust laws, breached that duty. This claim must fail because defendants have no duty to plaintiff in this regard. ***HN10***[] Though the antitrust laws prohibit certain monopolistic conduct, they do so in the interest of competition, not competitors. *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. Thus, they do not give rise to private duties of care. Plaintiff's negligence claim is DISMISSED.

CONCLUSION

For the reasons set forth above, defendants' motion for summary judgment or adjudication on the prior art and on-sale bar claims is DENIED. The motion for summary judgment on plaintiff's antitrust, and intereference with prospective economic advantage claims are also DENIED. The motion for summary judgment on plaintiff's trade libel and negligence claims is GRANTED. The motion for summary adjudication as to the abuse of process claim is GRANTED in part **[*20]** and DENIED in part. All evidentiary objections are DENIED without prejudice to their reconsideration at trial.

IT IS SO ORDERED.

HN1[] **Regulated Practices, Private Actions**

Antitrust claims are subject to the same summary judgment standards as other claims. However, summary judgment is not common in antitrust cases. The disfavor given summary judgment in antitrust cases is not because of the application of a different set of rules but, rather, because the relevant factual disputes in antitrust cases are typically more complicated than those in other cases. Accordingly, it is typically more difficult for the trial court to resolve all doubt about the merits of an antitrust claim on the pre-trial record alone. Nevertheless, when defending an antitrust claim against summary judgment, an antitrust plaintiff must clear the same hurdle as the plaintiff in any other cause of action: it must come forward with specific facts showing that there is a genuine issue for trial.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] Sherman Act, Claims

Section 1 of the Sherman Antitrust Act forbids contracts, combinations, or conspiracies in restraint of trade or commerce. The elements of a Section 1 claim are that the defendant (1) engaged in a conspiracy (2) affecting interstate commerce (3) that had an anti-competitive effect in the relevant market. In addition to proving the existence of an antitrust conspiracy, the plaintiff must also prove that it has suffered a cognizable antitrust injury.

Evidence > Inferences & Presumptions > General Overview

HN3[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Antitrust law limits the range of permissible inferences from ambiguous evidence in a case under § 1 of the Sherman Act. A plaintiff must show concerted action. Consequently, conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. When a plaintiff relies on circumstantial evidence to prove the existence of a conspiracy, it must proffer sufficient evidence to permit the inference of an antitrust conspiracy. The plaintiff must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. When there is no economically plausible motive for the alleged conspiracy, the scope of permissible conclusions which may be drawn from ambiguous evidence is limited. In other words, if a defendant had no rational economic motive to conspire, and if its conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy. Whether the plaintiff alleges a horizontal conspiracy among competitors, or a vertical conspiracy between a manufacturer/seller and a distributor/buyer, the focus remains the same: is there sufficient evidence to create a reasonable inference of concerted action to engage in illegal conduct?

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN5[] **Conspiracy to Monopolize, Elements**

A plaintiff can bring three types of claims under *Section 2* of the Sherman Act: a claim for monopolization, a claim for attempted monopolization, and a claim for conspiracy to monopolize. The elements for each claim are as follows: To state a claim for monopolization, a plaintiff must allege: (i) a relevant product and geographic market; (ii) the possession of monopoly power in such a market; and (iii) the willful acquisition or maintenance of that power. To state a claim for attempted monopolization, a plaintiff must allege: (i) a relevant product and geographic market; (ii) a specific intent to monopolize that market; (iii) exclusionary or predatory conduct in furtherance of the attempted monopolization; and (iv) a dangerous probability that, absent judicial intervention, the attempt will be successful. To state a claim for conspiracy to monopolize, a plaintiff must allege: (i) the existence of a combination or conspiracy; (ii) an overt act in furtherance of the combination or conspiracy; (iii) substantial amount of interstate commerce affected; and (iv) specific intent to monopolize. While the elements of each claim differ, each claim has the common requirement that a defendant must have either monopoly power or the dangerous probability of acquiring it.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN6[] **Intentional Interference, Defenses**

The elements for a cause of action for tortious interference with an existing contract are: (1) the existence of a contract subject to interference, (2) willful and intentional act of interference, (3) such act was a proximate cause of damage, and (4) actual damage has occurred. The elements of a cause of action for tortious interference with prospective contracts or business relationships are: (1) A reasonable probability that the parties would have entered into a contractual relationship, (2) an intentional and malicious act by the defendant that prevented the relationship from occurring, with the purpose of harming the plaintiff, (3) the defendant lacked privilege or justification to do the act, and (4) actual harm or damage resulted from the defendant's interference.

Opinion

[*651] ORDER GRANTING DEFENDANTS' MOTION FOR SUMMARY JUDGMENT

This matter is before the court on Defendants' Motion for Summary Judgment filed on February 3, 1998. Plaintiffs filed a response on March 3, 1998. Defendants filed a reply to Plaintiffs' response on April 8, 1998, and Plaintiffs filed a sur-reply on April 9, 1998. The court heard oral argument on August 6, 1998. Upon consideration of the written submissions of the parties, oral argument, and the applicable law, the court is of the opinion that Defendants' Motion for Summary Judgment should be GRANTED.

I. BACKGROUND

Plaintiffs are eight Texas corporations engaged in the business of repair and replacement **[**3]** of auto glass and residential and commercial flat glass. At the time Plaintiffs filed this action, Defendants were four foreign corporations doing business in Texas. Defendants Windshields America and U.S.A. GLAS subsequently merged to form a single company, Vistar Inc. Vistar Inc. then merged into Safelite Glas Corporation on December 18, 1997. Therefore, the four companies have now become two: Vistar Inc. and Harmon Glass Company.

Defendants and Plaintiffs are competitors in the auto glass repair and replacement business. Each Defendant's glass repair business is comprised of two parts: (1) individual company-owned glass shops and (2) a glass repair network. Defs.' Mot. for Summ. J. at 2. The operation of the Defendants' networks is, on its face, quite simple. The network company enters into either a regional or national agreement with an insurer to provide a claims management network to provide repair services to the insurer's policyholders. *Id.* at 3. Although such a network is usually considered the insurance company's network, it is maintained and operated by the network company. The network company maintains a customer service call center network to receive claims calls **[**4]** from the insurer's policyholders. *Id.* When a policyholder calls his insurer with a claim, the insurer will transfer the policyholder to a network call center where he will be greeted by a customer service representative ("CSR"). The CSR will then obtain certain information from the policyholder such as his coverage and deductible amount. The CSR is required to follow a company-created and insurer-approved script when taking this information. The CSR will then "provide the policyholder with the names, phone numbers, and addresses of network affiliates near the policyholder who stand contractually committed to perform the glass work he needs." *Id.*

These network affiliates are individual glass shops. These individual shops include the network company's own glass shops, other Defendants' glass shops, and certain independent glass shops. *Id.* The network company enters into non-exclusive contracts with each of these individual network affiliates. Pursuant to these subcontracts, the network affiliates agree to specific prices at which they will perform repair services for policyholders referred to them by the network's CSR.

After giving the policyholder information regarding **[**5]** network affiliates who can perform his glass work, the CSR will then ask the policyholder if he has a particular shop which he would like to use. *Id.* at 4. If he has such a preference, the policyholder can use that shop; however, the CSR will encourage him to choose a network affiliate to do the work. *Id.* Once the network affiliate completes the work, the policyholder pays the affiliate an amount equal to his insurance **[*652]** policy deductible. *Id.* The network company then pays the remainder of the policyholder's bill directly to the network affiliate. Finally, the network company bills the insurer according to the terms of the contract between the network company and the insurer.

Under the network system, the price paid by the insurer often exceeds the price charged by the network affiliate. *Id.* This mark-up in price includes the actual repair or replacement work, as well as the costs of running the network call center and claim management services. *Id.* If the contract price paid by the insurer exceeds the aggregate prices charged by the network affiliate and the costs of operating the network, the network company enjoys a profit; if not, the network company **[**6]** suffers a loss. *Id.*

Plaintiffs sued Defendants, alleging that their conduct in forming and operating glass repair network systems such as that described above violates *Sections 1* and *2* of the Sherman Act, as well as Texas law. On September 16, 1996, the court signed an order granting in part and denying in part Defendants' motions to dismiss. *See* *Stewart Glass & Mirror, Inc. v. U.S.A. GLAS, Inc., 940 F. Supp. 1026 (E.D. Tex. 1996)*. In light of that order, the following claims remain:

1. *Section 1* claim for unreasonably restraining trade;

2. *Section 1* claim for unlawfully boycotting Plaintiffs by denying them referrals from insurance companies;

3. *Section 2* claim for monopolizing, attempting to monopolize, and conspiring to monopolize the auto glass repair market through willfully acquired monopoly power; and,
4. Claims under Texas common law for tortiously interfering with Plaintiffs' existing and prospective contracts.

Id. Defendants now move for summary judgment on each of these claims.

II. ANALYSIS

A. Summary Judgment Standard in Antitrust Cases

HN1[] Antitrust claims are subject to the same summary judgment standards **[**7]** as other claims. However, summary judgment is not common in antitrust cases. *Consol. Metal Prod. v. American Petroleum Inst., 846 F.2d 284, 288 (5th Cir. 1988)*. The disfavor given summary judgment in antitrust cases is not because of the application of a different set of rules but, rather, "because the relevant factual disputes in antitrust cases are typically more complicated than those in other cases. Accordingly, it is typically more difficult for the trial court to resolve all doubt about the merits of an antitrust claim on the . . . pre-trial record alone." *Id.* Nevertheless, when defending an antitrust claim against summary judgment, an antitrust plaintiff must clear "the same hurdle as the plaintiff in any other cause of action: it must come forward with specific facts showing that there is a *genuine issue for trial." Id. at 289* (internal quotations omitted).

B. Section 1 of the Sherman Act

HN2[] "*Section 1* of the Sherman Antitrust Act forbids contracts, combinations, or conspiracies in restraint of trade or commerce." *Johnson v. Hosp. Corp. of America, 95 F.3d 383, 392 (5th Cir. 1996)*. The elements of a *Section **[**8]** 1* claim are that the defendant (1) engaged in a conspiracy (2) affecting interstate commerce (3) that had an anti-competitive effect in the relevant market. *Id.* In addition to proving the existence of an antitrust conspiracy, the plaintiff must also prove that it has suffered a cognizable antitrust injury. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

HN3[] "***Antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita, 475 U.S. at 588*. A plaintiff must show concerted action. Consequently, "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id.* When a plaintiff relies "on circumstantial evidence to prove the existence of a conspiracy, [it] must proffer sufficient evidence to permit the inference of an antitrust conspiracy." *Johnson v. Hosp. Corp. of America, 95 F.3d 383, 392 (5th Cir. 1996)*. The plaintiff must present evidence **[*653]** that tends to exclude the possibility that the alleged conspirators acted independently. **[**9]** *See Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. When there is no economically plausible motive for the alleged conspiracy, the scope of permissible conclusions which may be drawn from ambiguous evidence is limited. *Matsushita, 475 U.S. at 596*. In other words, if a defendant "had no rational economic motive to conspire, and if [its] conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy." *Id. at 596-97*. Whether the plaintiff alleges a horizontal conspiracy among competitors, or a vertical conspiracy between a manufacturer/seller and a distributor/buyer, the focus remains the same: is there sufficient evidence to create a reasonable inference of concerted action to engage in illegal conduct?

Defendants argue that Plaintiffs do not have the specific type of evidence required to support their conspiracy claim under the above standard. Defendants claim that in order to establish a viable claim, Plaintiffs must come forward with specific evidence to establish the existence of a conspiracy. Defendants contend **[**10]** that Plaintiffs can make only a "mere showing of parallel action, of an opportunity to conspire, or of relationships between the alleged conspirators [which] is insufficient to survive summary judgment." Defs.' Mot. for Summ. J. at 20. Defendants contend that Plaintiffs must exclude the possibility of independent action. *Id.* at 21. Defendants also argue that Plaintiffs cannot show that Defendants had a plausible, economically rational motive to engage in the alleged conspiracy. *Id.* Further, Defendants allege that it was Plaintiffs, not Defendants, who refused to deal in this case.

Plaintiffs claim that a conspiracy can be proven by circumstantial or direct evidence. Plaintiffs contend that the alleged conspiracy in this case must be viewed as a whole. Plaintiffs claim that there are two intertwined types of conspiracies in this case. First, Plaintiffs complain of vertical agreements in restraint of trade between Defendants (sellers) and third-party insurance companies (buyers). Plaintiffs concede that these agreements are similar to vertical agreements which have been upheld in challenges to preferred provider agreements in the medical care industry. However, Plaintiffs **[**11]** argue that when viewed together with the second type of agreements complained of in this case, horizontal agreements in restraint of trade between each defendant company, these vertical agreements can be distinguished from preferred provider agreements.

The overriding theme of Plaintiffs' case is that the Defendants worked together to eliminate independent glass shops from the glass repair market. Plaintiffs offer several volumes of exhibits in support of their claim. Although the court has carefully reviewed each of these exhibits, it would be virtually impossible for the court to discuss each of Plaintiffs' exhibits in this opinion. For the purposes of this opinion, however, the court will discuss the numerous exhibits relied upon by Plaintiffs during oral argument, which are, according to Plaintiffs, most helpful to their case.

Plaintiffs claim that their summary judgment evidence creates an issue of fact as to whether Defendants conspired to form illegal network systems. Plaintiffs point to an internal Safelite memorandum where an executive stated: "If we (including the other majors) take share from independents to a point where we 'control' service, why can't we achieve price **[**12]** improvement?" [1] Pls.' Proper Summ. J. Evidence, Vol. 1, Ex. 66. Plaintiffs claim this memorandum demonstrates Defendants' desire to ensure that the major glass companies gained control of the industry. Plaintiffs also rely upon Exhibit 200. This exhibit is a 1995 Harmon memorandum listing several company concerns, one of which was: "How long will we [Harmon] share network accounts with independent glass shops[?]". *Id.*, Ex. 200. Exhibit 25 shows that Defendants stressed a switch in philosophy from "competition to cooperation," in dealing with recent changes in the auto glass **[*654]** repair and replacement industry and even held a closed door "kick-off" meeting attended by an antitrust attorney, but did not invite independent glass shops. *Id.*, Ex. 25. Further, Plaintiffs claim that Exhibit 19 shows that Defendants were encouraged by the idea that their concerted effort would increase profits because each Defendant would get "a set percentage of a bigger pie." *Id.*, Ex. 19.

[13]** Plaintiffs also allege that in order to increase this pie, each Defendant's network system was made up not only of that Defendant's glass shops, but also the other Defendants' shops. Former competitors allegedly became part of a unified team. Plaintiffs allege the Defendants conspired to "use the network system to channel work to each other by various deals giving each other preference of referrals." *Id.*, Ex. 31-32. Defendants allegedly used means such as referral fees, rebates, and wholesale discounts in exchange for such referrals. *Id.*, Ex. 16, 27, 31-32, 35, 47, 75. Plaintiffs claim they were excluded from these "side deals." Plaintiffs also allege that Defendants made efforts to keep information concerning these agreements confidential, and cautioned each other to hire attorneys to ensure that they were "protected." *Id.*, Ex. 23.

Plaintiffs also claim that even though they were allowed to join the networks, Defendants nevertheless continued to try to keep business away from Plaintiffs. Plaintiffs claim Defendants created onerous conditions for membership including low prices, a small amount of referrals, and sharing and alleged misuse of trade secrets. *Id.*, Ex. **[**14]** 167-75, 179. Defendants allegedly utilized a variety of methods to steer policyholders away from using independent shops even if a policyholder requested a specific shop. When independents joined LYNX, a network comprised of

---

[1] There is a handwritten note, "AMEN!", in the margin of this memo. Defendants have stipulated that this note is written in the handwriting of Doug Herron, Safelite's CFO.

independent glass shops, Defendants allegedly attempted to convince insurers not to use LYNX, and "ghost wrote" a letter for an insurance executive who was trying to convince the insurers not to use LYNX. *Id.*, Ex. 1, 12, 13, 115.

C. Application of the Evidence

Despite Plaintiffs' arguments to the contrary, their evidence does not support their allegations of a conspiracy. Plaintiffs have not produced direct evidence of a conspiracy. Moreover, Plaintiffs' circumstantial evidence is not sufficient to eliminate the possibility that Defendants acted independently. Plaintiffs have not shown a single instance where a Defendant actually entered into an agreement with another Defendant to participate in illegal conduct. Plaintiffs' evidence does not show that Defendants' networks were the product of concerted action. Rather, this evidence merely shows that each Defendant's actions were directed toward winning business for themselves. Circumstantial evidence **[**15]** of conduct such as this, which is as consistent with a legal pro-competitive purpose as with an illegal purpose, is not sufficient to defeat summary judgment.

Indeed, Defendants' evidence demonstrates that each Defendant submitted separate bids to the insurance companies in order to obtain glass repair business on a national scale. *See, e.g.*, Defs.' Proper Summ. J. Evidence, Vol. 1, Ex. 21, pp. 163-64; Vol. 2, Ex. 12, pp. 99-101. This evidence shows that they did not cooperate with each other. Instead, the bidding process is highly competitive because the winning bidder can make greater profits. *Id.*, Vol 2, Ex. 12, pp. 116-17. If a Defendant is a losing bidder, it is no different than an independent glass shop striving to get referrals from the winning bidder's network. Defendants have also produced evidence that the network systems have led to lower costs for insurance companies, which have led to better service and lower premiums for policyholders. *Id.* at pp. 101-103.

The uncontroverted evidence is that the network companies needed to include some independent glass shops as subcontractors in order for the network systems to satisfy insurers' demands for services on **[**16]** a national scale. In order for a defendant to operate a network system for an insurer, the network must have at least one available glass repair shop in its network for each geographical location within the network. If an insured requested needed repair work in a location where there were no available glass shops within a network system, then the network would have to find a non-network shop to do **[*655]** the work. The network company would bear the risk that the shop would charge a price in excess of the price the insurer was contractually obligated to pay the network. Therefore, it was, and is, to Defendants' benefit to enter into subcontracts with as many glass shops as possible, including Plaintiffs, at as low a price as possible. It would be economically irrational for a Defendant to do otherwise.

The deposition of Glenn Decuir, a representative of one of the plaintiff independent glass shops, demonstrates that Defendants did not exclude Plaintiffs from participation in the network systems and that in many instances it was Plaintiffs who refused to participate. *Id.*, Vol. 1, Ex. 7, pp 121-123 (stating that he refused to take referral business from Defendants' CSR's by **[**17]** stating "I'm now against you, I don't want your business"). Further, Plaintiffs have not come forward with any specific evidence establishing that Defendants steered customers away from Plaintiffs' stores. To the contrary, both Plaintiffs' and Defendants' evidence shows that Defendants did no such thing. *See Id.* Vol III, Ex. L (Affidavit of Kim DiMaria) (stating that Harmon never gave preferential treatment to any glass shop, including Defendants', based on any factor other than service, quality, and price); Pls.' Proper Summ. J. Evidence, Vol. 1, Ex. 179 (Depo. of T. Cambree).

Plaintiffs claim that an inference of concerted action can be drawn from exhibits demonstrating that Defendants discussed alliances with each other and agreed upon such things as pricing and rebates. *See Id.*, Ex. 10, 23, 27, 28, 35, 46, 47, 75, 112, 119, 137. Defendants argue that the exhibits do not demonstrate any illegal agreements because they are not agreements between Defendants as networks. Rather, these are legal, vertical agreements between one Defendant as a network company and another Defendant as a network glass repair shop subcontractor.

Defendants rely on *Mosby v. American Medical Int'l, Inc., 656 F. Supp. 601 (S.D. Tex. 1987)*. **[**18]** In that case, Citizens General Hospital ("CGH") entered into an agreement with Dr. Vutpakdi, in which Vutpakdi agreed to provide continuous radiology services to CGH physicians. *Id. at 604*. Vutpakdi used an on-call roster of radiologists to help him meet his coverage obligations under this contract. The plaintiff, Mosby, was on this roster. Three months later, Vutpakdi stopped using the on-call roster, and began to use a full-time assistant to help him fulfill his obligations. *Id.* Vutpakdi's agreement was not an exclusive one. Therefore, although Mosby could no longer get referrals from Vutpakdi's on-call roster, he was still able to get referrals if an attending physician or patient requested his services. *Id.* Mosby filed suit, alleging that the agreement between CGH and Vutpakdi constituted an unreasonable restraint of trade in violation of *Section 1* of the Sherman Act. *Id.*

The court found that although Mosby provided sufficient proof of a combination or agreement, he did not provide sufficient proof that this agreement *unreasonably* restrained trade. *Id. at 606*. Mosby provided nothing but bare allegations that CGH had tried to **[**19]** exclude him. The court recognized that "competitive businesses maintain their share of the market by competing effectively. One method of [which] is to improve service to the customer. It is highly plausible that CGH sought to improve its radiology-service when it contracted with Dr. Vutpakdi." *Id.* Thus, the court did not find that CGH had an improper motive in entering into the agreement with Vutpakdi or allowing him to cease using the on-call list. *Id.* Further, the court found that competition and customer choice was not adversely affected. Mosby could still get business via patient and physician requests. *Id. at 609*. Patients could choose other hospitals, or they could choose a specific radiologist with staff privileges at CGH. *Id.* Thus, the court found that summary judgment in favor of CGH was proper because competition was not unreasonably restrained. *Id.*

Thus, the vertical agreements at issue in the present case are no different than *Mosby*. Just as any physician or patient could choose to use Mosby, a policyholder or insurance company can choose to use an independent glass shop. The policyholder has the right to choose a shop referred **[**20]** by the network's CSR or to choose a shop of his own. **[*656]** And, just as CGH's decision to utilize the agreement with Vutpakdi was as consistent with an independent legal business purpose--improving price and customer service--as an illegal reason, the network systems here are also consistent with the legal business purpose of improving price and customer service.

Thus, these agreements are legal vertical agreements akin to those upheld in the medical care industry. An insurer (buyer) can contract with one or more networks (seller) in order to give their policyholders better pricing and service. An insurer could even choose to enter into an exclusive dealing agreement with a single network, and the network could enter into an exclusive subcontract with its own company glass shops to provide glass repair services.

Plaintiffs nevertheless argue that, unlike the agreements in *Mosby*, where the agreements at issue were strictly vertical ones, the vertical agreements in the present case are intertwined with numerous horizontal agreements between the network companies. Plaintiffs argue that Defendants entered into horizontal agreements to help facilitate the network systems and **[**21]** eliminate competition from independent glass shops. These horizontal agreements allegedly included agreements to channel business to each other, share trade secrets and market allocation, enter into reciprocal subcontracting agreements, and channel business away from Plaintiffs.

Contrary to Plaintiffs' arguments, they have not produced evidence that these vertical agreements were the product of illegal horizontal agreements between Defendants. The evidence in this case demonstrates that Defendants each individually realized that in order to survive in this highly competitive market, they needed to compete at two levels--first as a network and second as a network subcontractor. Each Defendant worked independently to form its own network system and to gain as much business as possible in that role. Then, each Defendant worked to enroll as many glass shops as possible in its network. If a Defendant did not win business at the network level, it would then strive to enroll in each Defendants' network systems at the glass shop level, just as any independent shop would do.

It is only this second level of agreements to which Plaintiffs' evidence regarding agreements on price, rebates, and **[**22]** strategical alliances relates. Plaintiffs' exhibits pointing to agreements on pricing, strategical alliances, and rebates are simply common agreements between buyer and seller. A buyer has a right to purchase services from a seller at the most competitive rates possible. A buyer also has the right to provide the services itself instead of buying them from another source. Further, it is not illegal for a company to discuss, internally, strategies designed to keep as much work as possible within the company without having to refer the work out to its competitors.

Based on the above, the court finds that Plaintiffs have failed to come forward with evidence to create a fact issue on the conspiracy element of their Section 1 claim. Plaintiffs have not produced direct evidence of an agreement among Defendants at the network level. Further, Plaintiffs' circumstantial evidence neither negates the possibility that Defendants acted independently in creating and operating the network systems, nor creates an inference of concerted action by Defendants. The only evidence of agreements between Defendants relates to vertical agreements between buyer and seller. Such agreements are perfectly legal. **[**23]** Therefore, Defendants' Motion for Summary Judgment is GRANTED as to Plaintiffs' Section 1 claims.

D. Section 2 of the Sherman Act

HN4[] Section 2 of the Sherman Act makes it illegal to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce." 15 U.S.C. § 2. ***HN5***[] A plaintiff can bring three types of claims under Section 2: a claim for monopolization, a claim for attempted monopolization, and a claim for conspiracy to monopolize. The elements for each claim are as follows:

> To state a claim for *monopolization*, a plaintiff must allege: (i) a relevant product and geographic market; (ii) the possession of monopoly power in such a market; and (iii) *the willful acquisition or maintenance* **[*657]** *of that power*. . . . To state a claim for *attempted monopolization*, a plaintiff must allege: (i) a relevant product and geographic market; (ii) a specific intent to monopolize that market; (iii) exclusionary or predatory conduct in furtherance of the attempted monopolization; and (iv) a dangerous probability that, absent judicial intervention, the **[**24]** attempt will be successful. . . . To state a claim for *conspiracy to monopolize*, a plaintiff must allege: (i) the existence of a combination or conspiracy; (ii) an overt act in furtherance of the combination or conspiracy; (iii) substantial amount of interstate commerce affected; and (iv) specific intent to monopolize.

Stewart Glass, 940 F. Supp. at 1037 (citations and internal quotations omitted) (emphasis added). While the elements of each claim differ, each claim has the "common requirement that a defendant must have either monopoly power or the dangerous probability of acquiring it." *Id.*

As a threshold matter, Defendants argue that Plaintiffs' Section 2 conspiracy to monopolize claim must fail for the same reasons as Plaintiffs' Section 1 claims: lack of evidence of a conspiracy. Plaintiffs' Section 2 claims are based upon a theory of joint monopolization--the Defendants joined together to gain a dominant share of the market. Thus, to succeed under a theory of joint monopolization, Plaintiffs must establish that Defendants acted jointly.

Defendants argue that if there is not sufficient evidence of a conspiracy to support a Section 1 claim, then **[**25]** there is not sufficient evidence of a conspiracy to support a Section 2 claim. Defendants argue that the same standards of proof previously discussed apply when determining whether Plaintiffs have come forward with sufficient evidence to defeat summary judgment on a Section 2 claim. Defendants' argument is correct.

Plaintiffs' Section 2 claims allege that Defendants engaged in concerted action to gain a monopoly share. Plaintiffs have not produced sufficient evidence, however, to show that Defendants entered into an illegal agreement or engaged in a conspiracy of any kind. Therefore, Plaintiffs' Section 2 claims must fail. Accordingly, Defendants' Motion for Summary Judgment is GRANTED as to Plaintiffs' Section 2 claims.

E. State Law Claims for Tortious Interference with Actual and Prospective Contracts

HN6[] "The elements for a cause of action for tortious interference with an existing contract are: (1) the existence of a contract subject to interference, (2) willful and intentional act of interference, (3) such act was a proximate cause of damage, and (4) actual damage has occurred." Stewart Glass, 940 F. Supp. at 1038. The elements of a cause of action for **[**26]** tortious interference with prospective contracts or business relationships are:

> (1) A reasonable probability that the parties would have entered into a contractual relationship, (2) an intentional and malicious act by the defendant that prevented the relationship from occurring, with the purpose of harming the plaintiff, (3) the defendant lacked privilege or justification to do the act, and (4) actual harm or damage resulted from the defendant's interference.

Id. (citations and internal quotations omitted).

Defendants argue that Plaintiffs' tortious interference claims must fail because, even if they did interfere with Plaintiffs' contractual relationships, this interference is not unlawful if it resulted from mere spirited competition. That is, their conduct is only actionable if it was somehow wrongful. Plaintiffs concede this point and argue that proof of a violation of the antitrust laws is sufficient to support the wrongful conduct element in a tortious interference with existing or prospective contracts claim. In light of the court's ruling as to Plaintiffs' *Section 1* and *2* claims, Plaintiffs cannot satisfy this burden. Accordingly, Defendants' Motion for **[**27]** Summary Judgment is GRANTED as to Plaintiffs' claims for tortious interference with existing and prospective contracts.

III. CONCLUSION

For the reasons stated above, Defendants' Motion for Summary Judgment is GRANTED. It is so ORDERED.

SIGNED this the 12th day of August, 1998.

/S/

RICHARD A. SCHELL

UNITED STATES DISTRICT JUDGE

Telecomm Tech. Servs. v. Siemens Rolm Communications.

United States District Court for the Northern District of Georgia, Atlanta Division

HN2[] **Summary Judgment, Motions for Summary Judgment**

Under *Fed. R. Civ. P. 56*, a court shall grant a motion for summary judgment if there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. Where the nonmoving party bears the burden of proof at trial, the moving party must demonstrate to the court that there is an absence of evidence to support the nonmoving party's case, or must put forth affirmative evidence negating an element of the nonmoving party's case. It is then the responsibility of the nonmoving party, by revealing evidence outside of the pleadings, to show that evidence supporting its case does exist or that the element sought to be negated remains a genuine issue of material fact to be tried. Essentially, this requires the nonmoving party to come forward with evidence sufficient to withstand a directed verdict on this issue at trial.

Evidence > Inferences & Presumptions > Inferences

HN3[] **Summary Judgment, Opposing Materials**

The nonmoving party is not required to carry its burden of proof at the summary judgment stage. In analyzing the case, the court views the facts in the light most favorable to the nonmoving party and makes all factual inferences in favor of that party. The court must avoid weighing conflicting evidence or making credibility determinations. Where a reasonable fact finder may draw more than one inference from the facts, and that inference creates a genuine issue of material fact, then the court should refuse to grant summary judgment.

HN7[] Relief From Judgments, Altering & Amending Judgments

Under *Fed. R. Civ. P. 15(b)*, the court may permit a party to amend its pleadings to conform them to the evidence presented at trial, and shall do so freely when the presentation of the merits of the action will be subserved thereby and the objecting party fails to satisfy the court that the admission of such evidence would prejudice the party's action or defense upon the merits.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN8[] Antitrust & Trade Law, Sherman Act

Although the concept of relevant market is central to all *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, claims, it is a concept that is not easily defined. Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability actual or potential to take significant amounts of business away from each other. The reasonable interchangeability of use or the cross-elasticity of demand between a product and its substitutes constitutes the outer boundaries of a product market for antitrust purposes.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] Regulated Practices, Market Definition

Cross-elasticity of demand is defined as the extent to which consumers will change their consumption of one product in response to a price change in another.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Regulated Practices, Market Definition

Although the United States Supreme Court rejects a per se rule that, as a matter of law, competition in the primary equipment market precludes a finding of monopoly power in the aftermarket for service, it recognizes that, in many instances, competition in the primary market will, as a matter of fact, prevent a firm from charging supracompetitive prices in an aftermarket.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

The United States Supreme Court has held many times that power gained through some legal advantage such as a patent, copyright, or business acumen can give rise to liability if a seller exploits his dominant position in one market to expand his empire into the next.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Sherman Act, Claims**

Under the essential facilities doctrine, a plaintiff is required to prove the following four elements to establish a violation of the Sherman Act, *15 U.S.C.S. § 1 et seq.*: 1) that the facility to which the plaintiff has been denied access is essential to competition; 2) that the defendant has refused to allow the plaintiff access to the facility; 3) that the plaintiff cannot practically or reasonably duplicate the essential facility; and 4) that it is feasible for the defendant to provide access to the facility in light of its stated business goals.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

The elements for a plaintiffs' monopolization claim are: 1) the possession by defendant of monopoly power in the relevant market; and 2) the willful acquisition or maintenance of that power, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. A plaintiffs' attempted monopolization claim consists of three elements: 1) predatory or anticompetitive engaged in by defendant; 2) specific intent to monopolize; and 3) a dangerous probability of achieving monopoly power in the relevant market.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN14[] **Sherman Act, Claims**

If a plaintiff asserting a claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, establishes a prima facie case of anticompetitive conduct, a defendant can avoid liability by demonstrating that its conduct was justified by valid business reasons. Whether a defendant's conduct was motivated by its proffered reasons is a question of fact, and the plaintiff can rebut the proffered reasons by demonstrating that they are pretextual. Thus, the court's inquiry on a motion for summary judgment on a *§ 2* claim is very similar to its inquiry on a motion for summary judgment in an employment discrimination case. In such cases, the defendant's true motivations are particularly difficult to ascertain, thereby making such factual determinations generally unsuitable for disposition at the summary judgment stage.

Copyright Law > ... > Protected Subject Matter > Literary Works > General Overview

HN21[] Copyright Protection, Civil Infringement

To determine whether a state law claim is preempted by the Copyright Act, 17 U.S.C.S. § 1 et seq., the court must decide whether the rights at issue fall within the subject matter of the copyright set forth in § 102 and § 103 and whether the rights at issue are equivalent to the exclusive rights of § 106. With respect to the first prong of this test, it is clear that the software and other intellectual property fall within the subject matter of copyright. However, under the second prong of the test, the court must determine whether the state law claim requires an extra element for recovery, because a state law claim is not preempted if the extra element changes the nature of the action so that it is qualitatively different from a copyright infringement claim.

Opinion

[*1309] *ORDER*

Plaintiffs bring this antitrust action under sections four and sixteen of the Clayton Act, *15 U.S.C. §§ 15* and *26*, seeking damages and injunctive relief for violations of sections one and two of the Sherman Act, *15 U.S.C. §§ 1* and *2*. Defendant has also asserted a host of counterclaims under federal and state **[**4]** law. The Court has jurisdiction over this matter pursuant to *28 U.S.C. §§ 1331* and *1367*. Before the Court are defendant's motion for summary judgment on plaintiffs' complaint [384], defendant's motion for partial summary judgment on its counterclaims for copyright infringement [385-1] and for permanent injunctive relief [385-2], plaintiffs' motion for partial summary judgment on their claims for monopolization and attempted monopolization [386], plaintiffs' motion for summary judgment on defendant's counterclaims [387], defendant's motion to file surreplies in opposition to plaintiffs' motions for summary judgment [407], and plaintiffs' motion to strike the report and testimony of Miles Alexander [392].

[*1310] I. BACKGROUND

This case is about the servicing of Rolm-branded private branch exchanges ("PBXs"). A PBX, also known as a "switch," is a combination of hardware and software that allows businesses with multiple telephone lines (typically over 50) to send and receive telephone calls, both internally and externally. Rolm is a major manufacturer of PBXs sold in the United States, but it is not contended that Rolm enjoys a monopoly over the sale **[**5]** of this equipment. The parties all agree that other manufacturers, such as Lucent Technologies, Nortel, and NEC, compete with Rolm in the market for sales of PBXs. However, the parts and software used in the PBXs vary among the different manufacturers, and Rolm possesses intellectual property rights in many of the parts and all of the software incorporated into its PBXs.

In addition to manufacturing PBXs, Rolm is also in the business of providing parts and service to end users of Rolm PBXs. Plaintiffs are independent service organizations [1] ("ISOs") that are also in the business of servicing Rolm PBXs. Thus, they compete with Rolm for the business of end users. [2] However, because Rolm possesses patents on a number of proprietary parts and copyrights on its software, the ISOs are at a competitive disadvantage in this market. They contend that this competitive disadvantage is an "antitrust injury" for which they are entitled to treble damages under the Sherman Act.

[6]** Rolm denies that any of its conduct violates the federal antitrust laws. In addition, it contends that plaintiffs are liable to it for unlawfully infringing on Rolm's federally protected intellectual property rights and under principles of state law.

II. DISCUSSION

A. Procedural Motions

Before addressing those motions that deal with the merits of the parties' claims, the Court will first resolve the procedural matters that are before it. First, defendant has moved for leave to file surreplies in opposition to plaintiffs'

[1] Some plaintiffs are both end users and ISOs. Plaintiff Olde York Valley Inn is only an end user.

[2] End users have a third option for service of their PBXs-self-service-whereby they purchase the parts and software they need from Rolm and perform the maintenance themselves. The parties agree that these three alternatives-Rolm, ISOs, and self-service-are the only three service options available to end users. Self-service only accounts for a small portion of all service performed on Rolm PBXs, however.

motions for summary judgment on the ground that plaintiffs raised new arguments in their reply briefs. After considering the record before it, including plaintiffs' opposition to the motion, the Court finds that defendant should be permitted to file its surreplies. Accordingly, defendant's motion [407] is GRANTED, and the Court will consider its surreplies in ruling on plaintiffs' motions for summary judgment.

The other procedural matter before the Court is plaintiffs' motion to strike the expert report and testimony of Miles Alexander [392]. Through this motion, plaintiffs raise objections to the Court's consideration of the opinions offered by **[**7]** Miles Alexander in support of defendant's motion for summary judgment on plaintiffs' antitrust claims. However, the Court notes that rather than filing a motion to strike under *Federal Rule of Civil Procedure 12*, the proper method for challenging the admissibility of such evidence is to file a notice of objection to the challenged testimony. *Morgan v. Sears, Roebuck and Co., 700 F. Supp. 1574, 1576 (N.D. Ga. 1988)*. Accordingly, plaintiffs' motion is DENIED. Nonetheless, in ruling on defendant's motion for summary judgment, the Court will assess the admissibility of the statements in Alexander's report and will consider the objections raised by plaintiffs.

B. Plaintiffs' Claims

The complaint that is presently before the Court-the Revised Second Amended **[*1311]** Complaint-is the fourth formulation of claims presented by plaintiffs in this action. It has been considerably streamlined and only contains claims for monopolization and attempted monopolization under *section 2* of the Sherman Act. [3] Although these are distinct claims, plaintiffs essentially are pursuing a single theory of recovery. As plaintiffs' expert economist Dr. Roger Noll states, "this case is about Rolm's **[**8]** exploiting its control over parts and software to monopolize the service market." Report of Roger Noll at 31, Defendant's Motion for Summary Judgement, Ex. 8.

Plaintiffs' monopolization claim consists of two elements: 1) the possession by Rolm of monopoly power in the relevant market; and 2) the willful acquisition or maintenance of that power (as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident). *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 2089, 119 L. Ed. 2d 265 (1992)*. **[**9]** Plaintiffs' attempted monopolization claim consists of three elements: 1) predatory or anticompetitive engaged in by defendant; 2) specific intent to monopolize; and 3) a dangerous probability of achieving monopoly power in the relevant market. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 892, 122 L. Ed. 2d 247 (1993)*. Both of these claims are premised on a theory of "monopoly leveraging"--the use of market power in one market to gain market share in another market other than by competitive means. *Key Enterprises of Delaware, Inc. v. Venice Hosp., 919 F.2d 1550, 1566 (11th Cir. 1990)*.

Plaintiffs' contend that "Rolm has acquired market power in service by denying competitors access to proprietary parts and software." [4] Defendant does not dispute the validity of this theory of recovery in the abstract. It maintains, however, that the facts of this case do not support such a recovery.

[10]** 1. Defendant's Motion for Summary Judgment

HN2[] Under *Federal Rule of Civil Procedure 56*, a court shall grant a motion for summary judgment if there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. Where the nonmoving party bears the burden of proof at trial, the moving party must demonstrate to the Court that "there is an absence of evidence to support the nonmoving party's case," *Celotex v. Catrett, 477 U.S. 317, 325, 106 S. Ct. 2548, 2554, 91 L. Ed. 2d 265 (1986)*, or must put forth affirmative evidence negating an element of the nonmoving party's case, *Fitzpatrick v. Atlanta, 2 F.3d 1112, 1116 (11th Cir. 1993)*. It is then the

---

[3] ***HN1***[] *Section 2* of the Sherman Act provides that "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be guilty of a felony . . . ." *15 U.S.C. § 2*. Section 4 of the Clayton Act, *15 U.S.C. § 15*, allows any person injured by a violation of the antitrust laws to sue for damages.

[4] For purposes of their antitrust claims, plaintiffs do not dispute that Rolm's intellectual property rights are valid. In response to Rolm's counterclaims for copyright and patent infringement, however, plaintiffs do dispute the validity of those rights.

responsibility of the nonmoving party, by revealing evidence outside of the pleadings, to show that evidence supporting its case does exist or that the element sought to be negated remains a genuine issue of material fact to be tried. *Id.* Essentially, this requires the nonmoving party to come forward with evidence sufficient to withstand a directed verdict on this issue at trial. *Id. at 1116-17*.

HN3[] The nonmoving party is not required **[**11]** to carry its burden of proof at the summary judgment stage. In analyzing the case, the Court views the facts in the light most favorable to the nonmoving party and **[*1312]** makes all factual inferences in favor of that party. *Hairston v. Gainesville Sun Publishing Co., 9 F.3d 913, 918 (11th Cir. 1993)*. "The court must avoid weighing conflicting evidence or making credibility determinations." *Id. at 919*. "Where a reasonable fact finder may 'draw more than one inference from the facts, and that inference creates a genuine issue of material fact, then the court should refuse to grant summary judgment.'" *Id*. (quoting *Barfield v. Brierton, 883 F.2d 923, 933-34 (11th Cir. 1989))*.

Defendant offers a number of arguments in support of its motion for summary judgment on plaintiffs' antitrust claims. First, it contends that plaintiffs' claims are barred by the statute of limitations. Next, it maintains that plaintiffs have failed to plead their claims properly. Finally, it offers several substantive arguments concerning the merits of plaintiffs' claims. The Court will address these arguments in turn.

a. Statute of Limitations

Defendant initially **[**12]** argues that plaintiffs' claims arising out of defendant's alleged refusal to deal with plaintiffs are barred by the relevant statute of limitations. [5] ***HN4***[] Under the federal antitrust laws, any suit to enforce a private cause of action must be brought "within four years after the cause of action accrued." *15 U.S.C. § 15b*. Generally, a cause of action accrues "when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, 401 U.S. 321, 328, 91 S. Ct. 795, 806, 28 L. Ed. 2d 77 (1971)*. Defendant, citing *David Orgell, Inc. v. Geary's Stores, Inc., 640 F.2d 936 (9th Cir. 1981)* and *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705 (11th Cir. 1984)*, argues that a statement of a definitive policy constituting a unilateral refusal to deal causes an antitrust claim to accrue and the statute of limitations to begin to run. Defendant maintains that it definitively announced its policy of refusing to sell new parts and software to ISOs in January 1990 and that plaintiffs, therefore, were required to file suit within four years of that time. Because plaintiffs did not **[**13]** file this action until July 1994, defendant argues that all of their claims based on the refusal to deal are time-barred.

As an initial matter, the Court notes that *Orgell* included only a very cursory discussion of the statute of limitations issue, and the Ninth Circuit expressly noted the need for a clearer analysis in *LaSalvia v. United Dairymen of Arizona, 804 F.2d 1113, 1118 (9th Cir. 1986)* ("the brief opinion in *Orgell* does not disclose **[**14]** the basis for its conclusion that the initial refusal was both final and the source of the plaintiff's injury. *Orgell* may encourage ambiguous responses to requests to deal coupled with later allegations that those denials were final."). After decrying the limited analysis of *Orgell*, the court stated "we therefore place on defendants the burden of showing that their initial refusal to deal was in fact final, and that the finality of the refusal was conveyed to the plaintiff." *Id.*

This statement is consistent with the Eleventh Circuit's holding in *Midwestern Waffles*. In that case, the court was confronted with the question of whether a refusal to grant plaintiffs a franchise that occurred more than four years prior to the filing of a suit was time-barred. The court concluded that a genuine issue of material fact existed on the question, noting that

> if plaintiffs' subsequent requests for a franchise territory in Alabama or another southern state were genuine, that is if plaintiffs had reason to believe the original **[*1313]** decision not to grant them such a franchise did not still stand, there would be a new alleged injury when a genuine subsequent request was denied. **[**15]** If,

---

[5] Plaintiffs vigorously deny that this is a "refusal to deal" case. Plaintiffs' Opposition to Defendant's Motion for Summary Judgment at 1-2. Although defendant recognizes that plaintiffs' claims include allegations of anticompetitive conduct other than refusing to sell parts and software to plaintiffs and restricts its statute of limitations argument to those claims that are based on the alleged refusal to deal, the Court agrees with defendant that the overwhelming majority of plaintiffs' alleged damages appear to stem from the refusal to deal.

> however, plaintiffs' subsequent requests were futile and plaintiffs had reason to know they were futile, the statute of limitations will be found to bar plaintiffs' claim that defendants violated ***antitrust law*** by horizontally allocating territories.

Midwestern Waffles, 734 F.2d at 715. Although defendant has presented strong evidence that at least some of the plaintiffs viewed Rolm's announcement of January 1990 that it would not sell parts directly to ISOs as a final decision, in order to prevail on its motion for summary judgment, defendant must demonstrate that no reasonable jury could find that plaintiffs did not have reason to believe that defendant would reconsider its policy of refusing to sell parts directly to ISOs. Because documents in the record would support a contrary finding, defendant is not entitled to summary judgment on this ground.

The strongest evidence that plaintiffs viewed Rolm's January 1990 refusal to deal as final comes from the depositions of plaintiffs' representatives. Representatives of CMS, NOVA, and Realcom all testified that they were aware that, no later than January 1990, Rolm announced that it would not sell new parts **[**16]** directly to ISOs, and further testified that they were not aware of any change in that policy. Dep. of Thomas Murphy at 39-40; Dep. of Glenn Cosman at 280; Dep. of Fred Shriner at 228-229; Dep. of Robert Pyzna at 96-97; Dep. of Charles McNamee at 34-35. Defendant also points to answers to interrogatories from NOVA and ATC that state that these companies believed that requesting parts from Rolm was futile after January 1990. Defendant's Brief in Support of Motion for Summary Judgment, Ex. 3, 4. However, while this evidence could certainly support a finding in favor of defendant on the statute of limitations issue, plaintiffs have carried their burden of pointing to specific evidence outside the pleadings that demonstrates the existence of genuine issues of material fact on this question.

Three documents in particular can be read to support a finding that defendant's refusal to sell parts to plaintiffs in January 1990 was not sufficiently final to trigger the statute of limitations. The first two are minutes from the meetings of the Board of Directors of the National Association of Telecommunications Dealers ("NATD"), an industry group of which at least some plaintiffs are members. **[**17]** Fred Shriner of NOVA was present at both of these meetings, which took place on October 19, 1990 and November 11, 1991.

The minutes from the 1990 meeting indicate that a representative of Comdisco (a member of NATD but not a party to this action) had recently met with Rolm concerning its refusal to sell parts to "remarketeers" and that "a favorable resolution was expected." Plaintiffs' Opposition to Motion for Summary Judgment, Ex. 46 at 3. Similarly, the 1991 minutes indicate that Rolm is "currently rethinking its position" on selling parts to third parties. *Id.*, Ex. 71 at 3. The minutes further state that "Shriner's report [on this issue] is incorporated as APPENDIX III." *Id.* Appendix III of the minutes bears the heading "Rolm Liaison Committee," and summarizes the information relayed by Frank Keenan, Industry Relations Manager for Rolm, to members of the NATD summer meeting. According to the document, Keenan stated that Rolm's refusal to sell parts to third parties had not been as successful as it had hoped and that "perhaps in the 1992 time frame, Rolm might change this policy." *Id.* at Appendix III.

The third document is a Rolm memorandum to its file, dated February 7, 1994, regarding **[**18]** a meeting between Rolm and representatives of the NATD. Both Shriner and Charles McNamee of Realcom were in attendance. The memorandum indicates that the availability of parts to third parties was discussed at the meeting and that Rolm indicated that it would be willing to consider changing its current **[*1314]** practice of only selling parts to end users if the NATD could provide a business case to justify a change. Plaintiffs' Opposition to Motion for Summary Judgment, Ex. 182.

Because these documents indicate that after Rolm announced its allegedly final policy, it was making statements in the marketplace, and at times directly to plaintiffs' representatives that it was willing to discuss this policy and would consider changing it, the Court cannot conclude, as a matter of law, that Rolm's statement to its branch managers that "Rolm will not sell maintenance parts to other than end users of ROLM systems," contained in a memorandum dated January 8, 1990, constituted a final refusal to deal with plaintiffs that triggered the statute of limitations. Furthermore, the record contains evidence that at least some plaintiffs attempted to purchase parts from Rolm during the four years prior to the **[**19]** filing of this suit. *See* Defendants' Brief in Support of Motion for Summary Judgment, Ex. 3, 4. Accordingly, defendant is not entitled to summary judgment on this ground. [6]

b. Pleading Issue

Rolm also contends that it is entitled to summary judgment on plaintiffs' antitrust claims because the allegations contained in the Revised Second Amended Complaint are fatally inconsistent with the theory of recovery articulated by plaintiffs' expert economist. In the complaint, plaintiffs allege that each proprietary part and each piece of software is in a separate relevant antitrust market. *See* Revised Second Amended Complaint, PP 37-40. However, plaintiffs now seek to recover under a theory of **[**20]** a unified "parts and software" market. *See* Report of Roger Noll at 22-24, Defendant's Motion for Summary Judgement, Ex. 8. Although the obvious solution to this problem would be to amend the complaint, defendant strongly objects to any such amendment, and notes that the Court previously denied plaintiffs' motion for leave to file a third amended complaint that contained allegations of a unified parts and software market.

In response to this argument, plaintiffs take the position that it is immaterial to their claims under *section 2* of the Sherman Act whether Rolm has market power in a unified market for parts and software or multiple market because the claims under *section 2* only require the existence of, or a dangerous probability of achieving, monopoly power in a single relevant market that plaintiffs contend is service for Rolm PBXs. Although there is some intuitive appeal to this argument, it does not appear to be an accurate statement of the law that governs this case.

While plaintiffs are undoubtedly correct that most *section 2* claims only require the definition of a single relevant market, *see* *Kodak, 504 U.S. at 481, 112 S. Ct. at 2089*, plaintiffs' claims **[**21]** are based on a theory of monopoly leveraging, which, as noted above, involves the use of market power in one market to gain market share in another market other than by competitive means. Thus, ***HN5***[] "proof of the existence of two separate . . . markets is [a] necessary" element to this type of claim. *M.A.P. Oil Co., Inc. v. Texaco, Inc., 691 F.2d 1303, 1306*.

Plaintiffs do not necessarily dispute that they bear this burden, as they state that they are prepared to prove that service is in a separate market from parts and software. At issue here is whether plaintiffs are required to prove the product and geographic components of both markets or whether it is sufficient for them to prove these components for the market that they allege that defendant has monopolized and attempted to monopolize--service of Rolm PBXs--and that parts and software are in a distinct market or markets. Unfortunately, **[*1315]** the Court has been unable to locate a single published decision addressing this issue.

However, the Ninth Circuit has issued an unpublished decision that is directly on point. [7] In *Delta Systems, Inc. v. TRW, 874 F.2d 815, 1989 WL 41706 (9th Cir. 1989)* **[**22]** (table disposition at *874 F.2d 815*), the court, confronted with precisely the same argument advanced here by plaintiffs, noted that "we are aware of no case brought under a monopoly leveraging theory in which the secondary market has not been defined to the same extent as the primary market." *Delta Systems*, 1989 WL 41706, at **4 (citing cases). The Court's search for such a case decided since *Delta Systems* has also been fruitless. Accordingly, the Court holds that ***HN6***[] in order to succeed on their monopoly leveraging theory, plaintiffs must define the product and geographic components of both the primary and the secondary markets.

The conclusion that plaintiffs' claims must **[**23]** be dismissed does not flow from this holding, however. ***HN7***[] Under *Federal Rule of Civil Procedure 15(b)*, the Court may permit a party to amend its pleadings to conform them

---

[6] The Court notes, however, that in order to recover for any injury arising out of an alleged refusal to deal, each plaintiff must demonstrate that it made a genuine request to purchase parts from Rolm during the limitations period and that such request was denied. *Midwestern Waffles, 734 F.2d at 715*.

[7] The Court recognizes that, under *Ninth Circuit Rule 36-3*, opinions that are not designated for publication are not precedential. However, as this Court is not bound by Ninth Circuit decisions, this rule is of no moment here. The Court simply finds the opinion instructive on the issue presented in this case.

to the evidence presented at trial, and "shall do so freely when the presentation of the merits of the action will be subserved thereby and the objecting party fails to satisfy the court that the admission of such evidence would prejudice the party's action or defense upon the merits." *Fed. R. Civ. P. 15(b)*. Although defendant argues that a finding that allowing such an amendment would unduly prejudice defendant was implicit in the Court's order of September 15, 1997, which denied plaintiffs' motion for leave to file their proposed third amended complaint, the Court disagrees. The Court's ruling was based on its finding that plaintiffs unduly delayed in seeking to assert the amendment and that allowing the amendment at that time would cause further delays in the litigation. These concerns are no longer present.

c. Substantive Antitrust Issues

i. Definition of Relevant Market

Although defendant reluctantly acknowledges that the theories under which plaintiffs seek to recover are legally valid, it contends that it is **[**24]** entitled to summary judgment on plaintiffs' antitrust claims because the record is devoid of any evidence to support such a recovery. These arguments must be evaluated in light of the Supreme Court's decision in *Kodak, 504 U.S. 451, 481, 112 S. Ct. 2072, 2089, 119 L. Ed. 2d 265 (1992)*, which forms the foundation of plaintiffs' claims.

The relationship between the parties in *Kodak* and the nature of the claims presented are virtually identical to those presented here. In *Kodak*, ISOs of Kodak copiers and micrographic equipment sued Kodak under *sections 1* and *2* of the Sherman Act, alleging that Kodak's refusal to sell them parts prevented them from competing in the market for service of Kodak products. As in this case, Kodak competed with other manufacturers in the equipment markets, but its machines were sufficiently unique that the other manufacturers could not provide parts or service for Kodak machines. The district court granted summary judgment in favor of Kodak, but the Supreme Court found that summary judgment was not appropriate for a variety of reasons.

Although much of the *Kodak* opinion is devoted to an analysis of the ISOs' *section 1* "tying" claims, **[**25]** the ISOs in *Kodak* were also pursuing a *section 2* claim under a theory of monopoly leveraging. The Supreme Court's holding with respect to that claim--that a single brand of service can be a relevant market under the Sherman Act, *Kodak, 504 U.S. at 481, 112 S. Ct. at 2090*--is of critical importance here, as the **[*1316]** outcome in this case hinges largely on the definition of the relevant antitrust market.

HN8[] Although the concept of "relevant market" is central to all *section 2* claims, it is a concept that is not easily defined. As the Eleventh Circuit has explained,

> Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability--actual or potential--to take significant amounts of business away from each other. The reasonable interchangeability of use or the cross-elasticity of demand [8] between a product and its substitutes constitutes the outer boundaries of a product market for antitrust purposes.

U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 995 (11th Cir. 1993) (quotations, citations, and footnotes omitted; footnote added). **[**26]** This is clearly a question of fact that normally must be resolved by a jury. *Ad-Vantage Telephone Directory Consultants, Inc. v. GTE Directories Corp., 849 F.2d 1336, 1341 (11th Cir. 1987)*. In the instant case, however, both sides of this dispute contend that the question of relevant market can be decided as a matter of law. [9]

---

[8] ***HN9***[] Cross-elasticity of demand is defined as "the extent to which consumers will change their consumption of one product in response to a price change in another." *Kodak, 504 U.S. at 469, 112 S. Ct. at 2083*.

[9] It is important to note, however, that unlike the usual case involving cross-motions for summary judgment, the parties do not agree that the question of relevant market can be decided as a matter of law regardless of the definition that is ultimately adopted. Rather, plaintiffs and defendant argue that the facts that are material to the inquiry are undisputed and they support a

[27]** Defendant maintains that competition in the sale of PBXs prevents Rolm from charging supracompetitive prices for service of its PBXs and that, therefore, the relevant market in this case is a "systems" market that includes PBX equipment (the PBX itself), parts, software, and service sold by all manufacturers in the United States. [10] ***HN10***[] Although the Supreme Court in *Kodak* rejected a per se rule that, as a matter of law, competition in the primary equipment market precludes a finding of monopoly power in the aftermarket for service, *Kodak, 504 U.S. at 471, 112 S. Ct. at 2084*, it recognized that, in many instances, competition in the primary market would, as a matter of fact, prevent a firm from charging supracompetitive prices in an aftermarket. In support of its motion for summary judgment, Rolm argues that the undisputed facts of this case demonstrate that this is the economic reality of the situation at issue here.

[28]** Plaintiffs, however, have produced evidence from which a reasonable jury could **[*1317]** conclude that Rolm's service pricing has been 30% to 60% higher than comparable ISO service during the period relevant to this litigation, *e.g.*, Plaintiffs' Opposition to Motion for Summary Judgment, Ex. 68 at ROLM 0633906, Ex. 151, and that Rolm was interested in preventing ISOs from effectively competing for the business of Rolm end users and employed strategies designed to achieve that goal, *e.g., id.*, Ex. 71 at Appendix III. Thus Rolm "bears a substantial burden in showing that it is entitled to summary judgment. It must show that despite evidence of increased prices and excluded competition, an inference of market power is unreasonable." *Kodak, 504 U.S. at 469, 112 S. Ct. at 2083*. After carefully considering the record before it, the Court concludes that Rolm has failed to carry this burden.

As the defendant did in *Kodak*, Rolm relies on the concept of "lifecycle pricing" in support of its definition of relevant market. Simply stated, Rolm contends that consumers recognize that PBXs are durable goods and, therefore, select among competing brands based not only on the price **[**29]** of the goods themselves, but also on the expected cost of the maintenance of the goods over their lifetime. Accordingly, Rolm argues that because it competes with a number of other manufacturers of PBXs, if it were to charge supracompetitive prices for service, consumers would choose other copiers when making their initial purchase decision. Thus, the competition in the equipment market prevents Rolm from exercising market power (by raising prices over competitive levels) in the service market.

In *Kodak*, of course, the defendant presented this argument as a purely theoretical matter and maintained that it should not be required to present empirical evidence supporting its application to the facts of its case. The Supreme Court rejected this argument for two reasons. First, as noted above, the Court observed that plaintiffs had presented direct evidence that Kodak had in fact charged supracompetitive prices for parts. Thus, Kodak's theory did not appear to describe the "actual market realities" that were presented in the case. *Kodak, 504 U.S. at 466, 112 S. Ct. at 2072*. The Court then went on to examine the factual assumptions underlying Kodak's theoretical argument, **[**30]** and found that plaintiffs had demonstrated sufficient disputes existed as to whether these assumptions were true to withstand summary judgment.

---

finding of a certain relevant market. They disagree, however, about what facts are material. Consequently, they argue that if the Court is inclined to accept the opposing view of the relevant market, genuine issues of material fact preclude the Court from doing so as a matter of law.

[10] This market definition is consistent with the view that "relevant market" for antitrust purposes is defined by the "products that have a sufficient competitive impact on the product of the defendant to be considered collectively in deciding whether the defendant possesses monopoly power." Earl W. Kintner, Federal ***Antitrust Law*** § 12.3. To the extent that this definition of relevant market refers to the concept of monopoly power--defined as the ability to charge supracompetitive prices for an extended period of time--it is somewhat circular. It demonstrates an important point about the arguments advanced here, however.

Under defendant's definition of relevant market, the question of the percentage of Rolm PBXs to which Rolm provides service is irrelevant. Even if it were established that Rolm serviced virtually all of the Rolm PBXs, and, therefore, arguably could be said to have a monopoly share of that market, service for Rolm PBXs cannot be the "relevant market" for antitrust purposes, according to defendant, because competition in the sale of PBXs prevents Rolm from charging supracompetitive prices for service. Thus, for purposes of the instant motions, the concepts of "relevant market" and "monopoly power" are essentially indistinguishable. The Supreme Court recognized the conflation of these concepts *Kodak*. *See* *Kodak, 504 U.S. at 469 n.15, 112 S. Ct. at 2083 n.15*.

As the Court noted, "Kodak's proposed rule rests on a factual assumption about the cross-elasticity of demand in the equipment and aftermarkets: If Kodak raised its parts or service prices above competitive levels, potential customers would simply stop buying Kodak equipment." *Id. at 469, 112 S. Ct. at 2084-85* (internal quotations omitted). The Court specifically mentioned two reasons why this assumption might not hold true in reality. First, the information necessary to engage in accurate lifecycle pricing may be difficult or expensive to obtain. Second, because the initial investment in the durable goods is quite large, the cost of switching to another brand might be greater than the increase in the price of service or parts. In this case, purchasers of a manufacture's brand of equipment would be "locked-in" and would be forced to tolerate some increases in the prices of parts and service. Because of these market imperfections, the Court was not willing to adopt the per se rule proposed by Kodak.

In the instant case, Rolm **[**31]** argues that *Kodak* stands for the proposition that unless a plaintiff presents evidence that information costs and switching costs are high and that the consumers became "locked-in" to their purchases of a durable good, summary judgment is appropriate in a case brought by ISOs against a manufacturer that faces competition in the sale of its goods. The Court disagrees with Rolm's reading of *Kodak*. [11]

[32]** **[*1318]** The Supreme Court's discussion of information and switching costs in *Kodak* was offered as "a forceful reason why Kodak's theory, although perhaps intuitively appealing, may not accurately explain the behavior of the primary and derivative markets for complex durable goods." *Kodak, 504 U.S. at 473, 112 S. Ct. at 2085*. Nothing in the discussion suggests that these were the only factors that should be considered in evaluating such an argument. Rather, the opinion makes clear that "the relevant market for antitrust purposes is determined by the choices available to Kodak equipment owners," *id., at 482, 112 S. Ct. at 2090*, and that "the proper market definition . . . can be determined only after a factual inquiry into the commercial realities faced by consumers." *Id.* Contrary to Rolm's assertion, the facts regarding the commercial realties faced by consumers in this case are not undisputed. Rather, plaintiffs have produced evidence from which a reasonable jury could conclude that Rolm has charged supracompetitive prices for service and that Rolm has willfully maintained its ability to charge such prices by adopting business strategies designed **[**33]** to prevent ISOs from competing successfully for the business of Rolm end users. Accordingly, Rolm is not entitled to summary judgment on this ground.

ii. Interplay Between ***Antitrust Law*** and Intellectual Property Rights

Rolm also contends that its intellectual property rights in its proprietary parts and software insulate it from liability under the Sherman Act as a matter of law. This argument requires little discussion.

In *Kodak*, the Supreme Court reiterated that ***HN11***[] "the Court has held many times that power gained through some legal advantage such as a patent, copyright, or business acumen can give rise to liability if 'a seller exploits his dominant position in one market to expand his empire into the next.'" *Kodak, 504 U.S. at 479 n.29, 112 S. Ct. at 2089* (quoting *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 611, 73 S. Ct. 872, 882, 97 L. Ed. 1277 (1953))*. This is precisely what plaintiffs have alleged here. As in *Kodak*, if a jury concludes that Rolm "adopted its parts and service policies as part of a scheme of willful acquisition or maintenance of monopoly power, it will have violated *§ 2*." *Kodak, 504 U.S. at 483, 112 S. Ct. at 2090*. **[**34]** Accordingly, Rolm is not entitled to summary judgment on this ground.

---

[11] The Court notes, however, that even if it accepted Rolm's reading of *Kodak*, plaintiffs have presented sufficient evidence to withstand defendant's motion for summary judgment. First, Rolm's own lifecycle expert, John Anderson, testified that he is paid between $ 7,000 and $ 60,000 to conduct PBX lifecycle analyses for consumers. Dep. of John Anderson, pp. 309-312. Second, evidence in the record suggests that the average consumer expenditure for a Rolm PBX in 1992 and 1993 was $ 438,239. Plaintiffs' Brief in Support of Motion for Partial Summary Judgment, Ex. 31 at EDM 002037. This figure is more than twice as much as the expenditure required to purchase the most expensive equipment at issue in *Kodak*, in which the Supreme Court found that there was sufficient evidence of high switching costs to withstand the defendant's motion for summary judgment. Plaintiffs' Opposition to Motion for Summary Judgment, Ex. 229. Finally, regardless of whether Rolm's conduct in January 1990 constituted an announcement of a final policy of refusing to sell parts directly to ISOs, the record contains sufficient evidence to support a finding that, prior to that time, Rolm sold parts directly to ISOs. *See* section II.B.1.a, *supra*. This demonstrates the existence of a genuine issue of material fact on the question of whether end users who purchased Rolm PBXs prior to that time became "locked-in" to their purchases as a result of this change.

iii. Essential Facilities Doctrine

Rolm next contends it is entitled to summary judgment under the "essential facilities doctrine." ***HN12***[] Under this doctrine, which has been applied by several federal courts in cases involving allegations of unlawful refusals to deal, a plaintiff is required to prove the following four elements to establish a violation of the Sherman Act: 1) that the "facility" to which the plaintiff has been denied **[*1319]** access is essential to competition; 2) that the defendant has refused to allow the plaintiff access to the facility; 3) that the plaintiff cannot practically or reasonably duplicate the essential facility; and 4) that it is feasible for the defendant to provide access to the facility in light of its stated business goals. *MCI Communications Corp. v. AT&T, 708 F.2d 1081, 1132-33 (7th Cir. 1983)*. However, the Court finds that this doctrine is not applicable here.

The Supreme Court has never explicitly held that a *section 2* refusal to deal claim must be analyzed under this doctrine. Although the claims in *Kodak* clearly involved allegations of refusal to deal virtually identical **[**35]** to those presented here, the Court never discussed the doctrine in its opinion, nor was it mentioned in any of the cases cited by the Court. *See Kodak, 504 U.S. at 483, 112 S. Ct. at 2090-91* (citing *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1703-04, 16 L. Ed. 2d 778 (1966)*; *United States v. Aluminum Co. of America, 148 F.2d 416, 432 (2nd Cir. 1945)*; *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 600-05, 105 S. Ct. 2847, 2856-59, 86 L. Ed. 2d 467 (1985))*. Furthermore, in *Aspen Skiing*, the Court affirmed a jury verdict in favor of a plaintiff on a *section 2* refusal to deal claim, expressly declining to evaluate the claim under the essential facilities doctrine. *Aspen Skiing, 472 U.S. at 611 n.44, 105 S. Ct. at 2862 n.44* ("Given our conclusion that the evidence amply supports the verdict under the instructions as given by the trial court, we find it unneccessary to consider the possible relevance of the 'essential facilities' doctrine . . . ."). In light of these authorities, the Court finds that plaintiff need only prove the elements set forth at page **[**36]** 5, *supra*, [12] in order to prevail on its claims under *section 2*.

iv. Business Justification

HN14[] If a plaintiff asserting a claim under *section 2* of the Sherman Act establishes a prima facie case of anticompetitive conduct, a defendant can avoid liability by demonstrating that its conduct was justified by valid business reasons. *Aspen Skiing, 472 U.S. at 605, 105 S. Ct. at 2859*. **[**37]** Whether a defendant's conduct was motivated by its proffered reasons is a question of fact, and the plaintiff can rebut the proffered reasons by demonstrating that they are pretextual. *See Kodak, 504 U.S. at 483-84*; *112 S. Ct. at 2091*. Thus, the Court's inquiry on a motion for summary judgment on a *section 2* claim is very similar to its inquiry on a motion for summary judgment in an employment discrimination case. In such cases, the Eleventh Circuit has long recognized that the defendant's "true motivations are particularly difficult to ascertain, thereby making such factual determinations generally unsuitable for disposition at the summary judgment stage." *Hairston v. Gainesville Sun Publishing Co., 9 F.3d 913, 919 (11th Cir. 1993)* (internal citations omitted).

Here, defendant has offered two legitimate business justifications for its conduct: 1) its "procompetitive distribution strategy"; and 2) its desire to avoid liability under the Robinson-Patman Act. However, plaintiffs have pointed out specific evidence from which a reasonable jury could infer that neither of these proffered reasons were considered by Rolm when it decided to **[**38]** adopt its restrictive parts and software policies. *See* Plaintiffs' Opposition to Motion for Summary Judgment at 45-49. Accordingly, the Court finds that genuine issues of material fact exist with respect to the question of whether Rolm's proffered business justifications are pretextual.

[*1320] v. Testimony of Plaintiffs' Expert

---

[12] To reiterate, ***HN13***[] the elements for plaintiffs' monopolization claim are: 1) the possession by Rolm of monopoly power in the relevant market; and 2) the willful acquisition or maintenance of that power (as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident). Plaintiffs' attempted monopolization claim consists of three elements: 1) predatory or anticompetitive engaged in by defendant; 2) specific intent to monopolize; and 3) a dangerous probability of achieving monopoly power in the relevant market. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 892, 122 L. Ed. 2d 247 (1993)*.

Rolm's final argument in support of its motion for summary judgment is that the deposition of plaintiffs' expert economist demonstrates that his analysis, which is at the heart of plaintiffs' case, is insufficient to support plaintiffs' theory of recovery. The Court disagrees.

Although Rolm disagrees with the conclusions of plaintiffs' expert and has presented expert testimony of its own that reaches a conclusion directly contrary to that of plaintiffs' expert, this fact does not demonstrate that Rolm is entitled to summary judgment. After reviewing the passages of the deposition of plaintiffs' expert that defendant claims are factually deficient, the Court easily concludes that the conflicting testimony of these experts presents genuine issues of material fact that must be resolved by a jury. For these reasons, defendant's motion for summary judgment is DENIED.

[39]** 2. Plaintiffs' Motion for Partial Summary Judgment

Through this motion [386], plaintiffs seek a ruling that, as a matter of law, the relevant market in this case is service of Rolm PBXs. Although plaintiffs' motion is governed by essentially the same standard as set forth above in connection with defendant's motion for summary judgment, plaintiffs' burden is even more onerous than that borne by defendant because plaintiffs bear the burden of proof on this question at trial. *See* *Celotex, 477 U.S. at 331-32, 106 S. Ct. at 2557* (Brennan, J., dissenting). [13]

Plaintiffs' argument is based largely on the following dicta from *Kodak*: "The relevant market for antitrust purposes is determined by the choices available to Kodak equipment owners. Because service and parts for Kodak equipment **[**40]** are not interchangeable with other manufacturers' service and parts, the relevant market from the Kodak equipment owner's perspective is composed only of those companies that service Kodak machines." *Kodak, 504 U.S. at 481-82, 112 S. Ct. at 2090*. Although this statement, standing alone, appears to indicate that the Court found that the relevant market was, as a matter of law, limited to service of Kodak machines, the Court, of course, reached no such conclusion. Rather the Court ultimately concluded its opinion by stating that, "in the end, of course, Kodak's arguments may prove to be correct. It may be that its parts, service, and equipment are components of one unified market." *Id. at 486, 112 S. Ct. at 2092*.

In order to withstand plaintiffs' motion for summary judgment, Rolm need only demonstrate that, viewing all of the evidence in the light most favorable to it, a reasonable jury could find that a systems market was the relevant market. There is ample evidence in the record to support such a finding.

For example, in support of their motion, plaintiffs rely heavily on a document entitled "Services Core Business Strategy," which strongly supports **[**41]** a conclusion that Rolm considered service a separate market in which it competes with ISOs and not equipment manufacturers. Plaintiffs' Brief in Support of Motion for Partial Summary Judgment, Ex. 1 at 2015178 ("End users of Siemens Rolm provided communications equipment are the core market. . . . There are two classes of competition in this market. The first is third party service providers whose primary business competes with Siemens Rolm in all its lines of business."). However, the same document also contains language that would support a finding of a systems market. *Id.* at 2015206 ("This similarity [between service and support "packages" offered by Rolm and other PBX manufacturers] is critical during the customer's purchase cycle decision, when each manufacturer's products and services are compared **[*1321]** and the solution with the most value to the customer is chosen.").

Plaintiffs also argue that the expert opinion presented by defendant on this question is not supported by the facts of this case. However, the Court has carefully reviewed the expert evidence presented by all parties, and finds that the conclusions of each expert are sufficiently supported by the record to render **[**42]** summary judgment on this issue inappropriate. Any discrepancies between their testimony must be resolved by a jury. For these reasons, plaintiffs' motion for partial summary judgment is DENIED.

C. Defendant's Counterclaims

---

[13] Although Justice Brennan dissented in *Celotex*, he agreed with the majority's analysis of *Rule 56*. He believed, however, that the majority did not adequately explain what is required of the moving party.

Defendant has taken an expansive approach in pleading its counterclaims. Although it appears that the crux of its complaint is that plaintiffs unlawfully infringed upon its federally protected intellectual property rights, it has asserted the following counterclaims: declaratory judgment on the issue of copyright validity (Count I); copyright infringement (Counts II and III); patent infringement (Count IV); misappropriation of trade secrets (Count V); false advertising (Count VI); trademark infringement (Count VII); unfair and deceptive trade practices (Count VIII); breach of contract (Counts IX and XIX); tortious interference with contract (Count X); tortious interference with prospective business relations (Count XI); conversion and trover (Count XII); unjust enrichment (Count XIII); unfair competition (Count XIV); computer fraud/tampering/trespass (Count XV); product disparagement (Count XVI); for price of reasonable value of goods and services (Count XVII); **[**43]** quantum meruit (Count XVIII); and for an account stated (Count XX). Plaintiff now seeks summary judgment on all of these claims, and defendant seeks partial summary judgment on its claims for copyright infringement with respect to its software (Count II and parts of Count III). The Court will address defendant's motion first.

1. Defendant's Motion for Partial Summary Judgment

Rolm alleges that plaintiffs infringed upon its software copyrights in four distinct ways. First, Rolm complains that plaintiffs are guilty of "distribution infringement." The essence of this complaint is that plaintiffs, who are not licensed users of Rolm's proprietary software, have failed to comply with the formalities regarding the transfer of a software license contained in the license agreements executed by Rolm and end users. Specifically, defendant alleges that plaintiffs have purchased PBXs, which include Rolm's proprietary software, from end users and sold them to other end users without complying with these formalities.

Next, defendant accuses plaintiff of "mix and match copying infringement" by copying proprietary software installed on one PBX and installing it onto other PBXs [14] in violation of **[**44]** Rolm's software license, which only permits an end user to install software on a single PBX, and federal copyright law.

Defendant also complains of "feature activation infringement." These claims are based on the fact that Rolm's software includes certain features for PBXs that permit the PBXs to perform certain functions. Although all PBXs have the capability of performing these functions, the functions will only operate if they are activated by Rolm or an ISO. Rolm will only activate those features for which the end users have paid. Rolm contends, however, that plaintiffs have unlawfully activated features for their customers for which Rolm has not been paid.

Finally, defendant complains of "computer copying infringement." These claims are based on the fact that several **[**45]** routine maintenance tasks for Rolm PBXs **[*1322]** require that software be "reloaded" into the PBXs Random Access Memory ("RAM"). For example, whenever the power supply to the PBX is interrupted, software must be reloaded into the RAM before it will work properly. Rolm maintains that every time an ISO performs one of these maintenance tasks that requires reloading of the RAM, the ISO is making an unauthorized "copy" of the software. Rolm asserts that it is entitled to summary judgment on all of these claims.

The standard governing a motion for summary judgment was set forth above. *See* pp. 5-6, *supra*. As the Court explained previously, defendant, as the party that bears the burden of persuasion on these issues at trial, bears an even greater burden than it did in connection with its motion for summary judgment on plaintiffs' antitrust claims.

HN15[] In order to prevail on its claims of software copyright infringement, Rolm must establish: 1) that it owns a valid copyright in the work allegedly infringed; and 2) that the ISOs "copied" that work by infringing upon any of the five exclusive rights established by the copyright. *Donald Frederick Evans & Assocs., Inc. v. Continental Homes, Inc., 785 F.2d 897, 903 (11th Cir. 1986)*. **[**46]** The Court need not delve too deeply into the merits of Rolm's claims because the Court finds that the ISOs have produced evidence sufficient to establish the existence of a genuine issue of material fact with respect to the first element of Rolm's claims.

---

[14] Although all PBXs come with software installed, Rolm periodically produces "upgraded" software that works with the same PBX system. Plaintiffs are accused of providing their customers with these upgrades by copying them from other customers.

Although Rolm relies on its certificates of registration--obtained in September 1994, after the initiation of this litigation--as prima facie evidence of the validity of its copyrights, under *17 U.S.C. § 401(c)*, ***HN16***[] a certificate of registration constitutes prima facie evidence of validity only if it is "made before or within five years after first publication of the work." Plaintiffs contend that Rolm did not obtain registration for all of its software titles within five years of the public distribution of the software and that Rolm, therefore, is not entitled to summary judgment on these claims. [15] Rolm counters that there has never been a "publication" of its software titles within the meaning of the Copyright Act. Rather, it argues, its distribution of the software to Rolm distributors and end users constitutes, at most, a "limited publication," which does not fall within the definition of "publication" contained **[**47]** in *17 U.S.C. § 101*.

A district court in California was recently presented with a strikingly similar scenario. In *Bell Atlantic Business Sys. Servs., Inc. v. Hitachi Data Sys. Corp.*, No. C 93-20079 JW, 1995 WL 836331, (N.D. Cal. Dec. 14, 1995), the plaintiff **[**48]** was an independent service provider that serviced computer equipment, including direct access storage devices manufactured by the defendant. The plaintiff asserted antitrust claims against the defendant, and the defendant filed a counterclaim for copyright infringement based on the plaintiff's allegedly unlawful copying of the defendant's software. In support of its motion for summary judgment on the copyright infringement claim, the plaintiff argued that the defendant could not establish its ownership of a valid copyright because the defendant's distribution of its software constituted "publication." As in this case, the defendant responded that its distribution only constituted "limited publication."

As the court in *Hitachi Data* noted, ***HN17***[] a distribution is considered a "limited **[*1323]** publication" for copyright purposes if the work is only shown to a limited class of persons for a limited purpose, without the right of further reproduction, distribution, or sale. *Id.* at *5 (citing *Academy of Motion Picture Arts and Sciences v. Creative House, 944 F.2d 1446, 1452 (9th Cir. 1991))*. *See also* *Brown v. Tabb, 714 F.2d 1088, 1091 (11th Cir. 1983)*. After examining **[**49]** the record before it, the court noted that the evidence would support a finding that the software was made available only to a limited class of persons, that the end users did not own the copies of the software that accompanied their purchase of the hardware manufactured by the defendant, and that the defendant placed strict restrictions on the access and use of the software by distributors of the hardware. *Hitachi Data Sys*, 1995 WL 836331, at *5, 6. Accordingly, the court concluded that "a triable issue of material fact exists as to whether the distribution of [the software] by Hitachi constituted a limited publication." *Id.* at *6.

The analysis applied in *Hitachi Data Sys.* is equally applicable here. Although Rolm urges the Court to determine, as a matter of law, that the distribution of its software constituted no more than a "limited publication," based on the record before it, the Court finds that this question is more appropriately resolved by a jury. Consequently, Rolm's motion for partial summary judgment on its counterclaims is DENIED.

2. Plaintiffs' Motion for Summary Judgment

As noted above, plaintiffs have moved for summary judgment on the entirety **[**50]** of the counterclaims, offering several arguments in support of their motion. [16] As an initial matter, the Court notes that defendant has chosen not to respond to some of these arguments. For example, defendant has offered no response to: 1) plaintiffs' argument that there is no basis for defendant's fraud/tampering/trespass claim (Count XV); 2) plaintiffs' argument that there is no basis for defendant's copyright and patent infringement claims against Start Technologies Corporation, Olde York Valley Inn, or DD Hawkins Communications, Inc. (Counts II, III, and IV); 3) plaintiffs' argument that applicable state law does not recognize a claim for product disparagement (Count XVI); or 4) plaintiffs' argument that there is

---

[15] The Court recognizes that plaintiffs only contend that "Rolm failed to obtain registration until more than five years after *almost every* software title had been publicly distributed." Plaintiffs' Response to Defendant's Motion for Partial Summary Judgment at 5 (emphasis added). Therefore, it appears that plaintiffs concede that at least some of the registrations constituted prima facie evidence of validity. However, as the moving party with respect to this motion, Rolm bears the burden of demonstrating that it is entitled to judgment as a matter of law on each of its claims, and it has not attempted to break down its claims with respect to each of the nineteen software titles it alleges that plaintiffs infringed.

[16] The standard governing this motion is set forth above. *See* pp. 5-6, *supra*.

no evidence to support defendant's claim for tortious interference with contract (Count X). [17] Accordingly, the Court finds that plaintiffs are entitled to summary judgment on these claims.

[51]** a. Patent Claims

In support of their motion for summary judgment with respect to these claims, plaintiffs argue that Rolm has exhausted its patent rights by selling PBX systems that contained the patented inventions and that Rolm's patents are invalid. In response, defendant maintains that it has not exhausted its patent rights because its sales of the PBX systems were conditional or restricted sales or licenses. This argument is similar to the "limited publication" issue discussed above. As the Court concluded with respect to that issue, genuine issues of material fact preclude the entry of summary judgment on this ground. [18]

[*1324] Furthermore, Rolm's ***HN18***[] patents are presumed to be valid, and plaintiffs bear the burden of **[**52]** proving otherwise by clear and convincing evidence. *35 U.S.C. § 282*; *Hybritech, Inc. v. Monoclonal Antibodies, Inc., 802 F.2d 1367, 1375 (Fed. Cir. 1986)*. On the record before it, the Court cannot say that, as a matter of law, plaintiffs have carried this burden. Accordingly, their motion for summary judgment is DENIED with respect to these claims.

b. Copyright Claims

As noted above, defendant has asserted copyright infringement claims arising out of four distinct types of conduct. Plaintiffs' primary argument in support of its motion for summary judgment with respect to these claims is that they are barred by the doctrine of "copyright misuse," which the plaintiffs describe as a defense that "forbids the use of a copyright to secure an exclusive right or limited monopoly not granted by the Copyright Office." *See Lasercomb America, Inc. v. Reynolds, 911 F.2d 970, 977-79 (4th Cir. 1990)*. Essentially, plaintiffs' contend that Rolm's "computer copying" infringement claim is so lacking in merit, that Rolm's prosecution of this claim constitutes an abuse of its property rights, and that the equitable remedy for this abuse is to **[**53]** prevent Rolm from recovering for any of its infringement claims.

This argument has two major flaws, however. First, the Eleventh Circuit has not recognized the defense of "copyright misuse." [19] Second, regardless of whether this Court ultimately accepts the validity of Rolm's "computer copying" claim, at least one federal court of appeals has already done so. *See MAI Sys. Corp. v. Peak Computer, Inc., 991 F.2d 511 (9th Cir. 1993)*. Thus, even if the Court were inclined to recognize a "copyright misuse" defense, such a defense would not be appropriate because the Court cannot conclude that Rolm's claims are "objectively meritless" in light of the Ninth Circuit's decision in *MAI Sys. Corp.*. *See In re Independent Serv. Org. Antitrust Litigation, 964 F. Supp. 1479, 1491 (D. Kan. 1997)* (misuse defense based on the filing of suit not authorized unless claims are objectively meritless).

---

[17] The Court recognizes that defendant did respond to plaintiffs' initial attack on the sufficiency of its evidence with respect to Count X, directing the Court to the "numerous issues of fact presented by each element of that claim" allegedly demonstrated by defendant's statement of material facts that were in dispute. However, plaintiffs' specifically attacked the sufficiency of the evidence cited by defendant in their reply brief, and although the Court allowed defendant to file a surreply in support of its opposition to this motion, defendant did not respond to this attack therein.

[18] Plaintiffs offer an additional, "closely related" argument that defendant has granted them an implied license with respect to the patents-in-suit. This inquiry is also fact-intensive, and the Court finds that summary adjudication of this issue is not appropriate based on the record before it.

[19] Contrary to plaintiffs' assertion, the Eleventh Circuit has not "acknowledged that copyright misuse could in an appropriate case be used as a defense to discipline those who abuse their copyrights." As an initial matter, the Court notes that the case that plaintiffs cite for this proposition, *BellSouth Advertising & Publishing Corp. v. Donnelley Information Publishing, 933 F.2d 952 (11th Cir. 1991)* was vacated en banc. Furthermore, although the vacated opinion stated that the judicially recognized patent misuse defense might someday be extended to copyright law, the court expressly declined to do so in that case. *Id. at 961*.

[54]** Nonetheless, the Court agrees with plaintiffs that defendant's "computer copying" claims fail as a matter of law. ***HN19***[] Under *17 U.S.C. § 117*,

> It is not an infringement for the owner of a copy of a computer program to make or authorize the making of another copy or adaptation of that computer program provided:
>
> (1) that such a new copy or adaptation is created as an essential step in the utilization of the computer program in conjunction with a machine and that it is used in no other manner, or
>
> (2) that such a new copy or adaptation is for archival purposes only and that all archival copies are destroyed in the event that continued possession should cease to be rightful.

HN20[] Congress passed *section 117* knowing that computer users would need to make copies of computer software in order to utilize that software. *Aymes v. Bonelli, 47 F.3d 23, 26 (2nd Cir. 1995)* (citing H.R. Rep. No. 1307, 96th Cong., 2d Sess., Pt. I, at 23 (1980), reprinted in 1980 U.S.C.C.A.N. 6460, 6482). Thus, *section 117* provides a legitimate holder of a computer program with permission to do that copying of the **[*1325]** program which is necessary for him to be able to use it **[**55]** in his computer without running afoul of possible infringement actions.

Rolm does not challenge plaintiffs' contention that the maintenance tasks that form the basis of the "computer copying" claims fall within the scope of activity covered by *section 117*. Rather, it argues that *section 117* is inapplicable to these claims because plaintiffs' end user customers are not "owners of a copy of" Rolm's software within the meaning of the statute. The Court disagrees.

In support of its position, Rolm notes that it licenses its software to end users and expressly retains ownership of all copies. This fact, however, "does not preclude a finding that the [end users] are 'owners of a copy' for purposes of *section 117*." *DSC Communications Corp. v. Pulse Communications, Inc., 976 F. Supp. 359, 362 (E.D. Va. 1997)*. Rather, as the court noted in *DSC Communications*, "it is necessary to determine ownership of the copy, not whether the transaction . . . involved a license to use the program." *Id.*

In making its determination that the holders of the software were "owners" within the meaning of *section 117*, the court in *DSC Communications* noted that, "the transaction involves **[**56]** a single payment, giving the buyer an unlimited period in which it has a right to possession, making [the] transaction a sale." *Id.* The Court finds this analysis persuasive, [20] **[**57]** and its application to the instant case leads to the same conclusion; because Rolm's software license is granted for the life of the system and the initial purchaser pays one price for the software when it buys its PBX system, [21] the Court finds that Rolm's end users are "owners" within the meaning of *section 117*. Furthermore, because *section 117* allows "owners" to "authorize the making of another copy" of a computer program, plaintiffs are also entitled to the protections of *section 117* since they were acting on behalf of their customers when they committed the alleged infringements. Accordingly, plaintiffs' are entitled to summary judgment on these claims.

Plaintiffs' remaining arguments regarding Rolm's other copyright claims are not persuasive, however. Although plaintiffs assert defenses of estoppel and implied license with respect to Rolm's distribution infringement claims, the

---

[20] The Court recognizes that some courts have reached the contrary conclusion on this issue. *E.g., MAI Sys. Corp. v. Peak Computer, Inc., 991 F.2d 511 (9th Cir. 1993)* (software licensee not "owner" for purposes of *section 117*); *Advanced Computer Servs. of Mich., Inc. v. MAI Sys. Corp., 845 F. Supp. 356 (E.D. Va. 1994)* (same); *CMAX/Cleveland, Inc. v. UCR, Inc., 804 F. Supp. 337 (M.D. Ga. 1992)* (same). Many of these decisions, however, have been criticized in one of the leading treatises on copyright law. *See* 2 Melville B. Nimmer & David Nimmer, *Nimmer on Copyright § 8.08[B][1]* & nn. 37-38.1 (1998). The Court notes that defendant has cited this treatise as authoritative on at least one occasion in this litigation.

[21] Although Rolm notes that its software license provides that any "modifications to, or new releases or versions of, the software will be provided subject to this Agreement at applicable charges," this does not change the fact an end user only pays a single price for each copy of software that is licensed to it under the agreement.

applicability of these fact-intensive defenses to this action cannot be resolved as a matter of law based on the record that is before the Court. [22] Similarly, the fact that less than four percent of the ISO transactions had a "mismatch" problem does not indicate that plaintiffs are entitled to judgment as a matter of law on these claims. Finally, other than the misuse argument that the Court rejected above, plaintiffs have not offered any arguments in support of their motion with respect to Rolm's "feature activation" claims.

[58]** c. State Law Claims

Plaintiffs also maintain that Rolm's claims for misappropriation of trade secrets **[*1326]** (Count V), breach of contract (IX), tortious interference with prospective business relations (Count XI), conversion (Count XII), and unjust enrichment (Count XIII) are preempted by the Copyright Act. *See* 17 U.S.C. § 301. The Court agrees with defendant that this argument is without merit with respect to portions of Count V that relate to passwords and customer information, as well as Counts XII and XIII, which relate to such matters as the alleged theft of items not covered under any copyright, such as customer lists.

However, Rolm concedes that its claims for breach of contract and tortious interference "are preempted to the extent they are premised on acts that counterdefendants now concede implicate Siemens Rolm's exclusive rights under the Copyright Act." Defendant's Opposition to Motion for Summary Judgment on Counterclaims at 25. Accordingly, Rolm states that it is willing to withdraw these claims on the condition that plaintiffs are barred from contesting the application of the Copyright Act to the conduct at issue. Plaintiffs, however, have refused **[**59]** to agree to not contest the application of the Copyright Act, and Rolm, therefore, has not withdrawn these claims.

The fact that Rolm has offered to withdraw its claims is not dispositive on the question of preemption. Under the law of this circuit, ***HN21***[] to determine whether a state law claim is preempted by the Copyright Act, the Court must decide "whether the rights at issue fall within the 'subject matter of the copyright' set forth in sections 102 and 103 and whether the rights at issue are equivalent to the exclusive rights of section 106." *Donald Frederick Evans & Assocs., Inc. v. Continental Homes, Inc., 785 F.2d 897, 913-914 (11th Cir. 1986)*. With respect to the first prong of this test, it is clear that the software and other "intellectual property" at issue in these claims fall within the "subject matter of copyright." However, under the second prong of the test, the Court must determine whether the state law claim requires an "extra element" for recovery, because "[a] state law claim is not preempted if the 'extra element' changes the nature of the action so that it is *qualitatively* different from a copyright infringement claim." *Bateman v. Mnemonics, Inc., 79 F.3d 1532, 1549 (11th Cir. 1996)* **[**60]** (emphasis in original) (quoting *Computer Assocs. Int'l v. Altai, Inc., 982 F.2d 693, 716 (2nd Cir. 1992)*.

Under this analysis, it is clear that Rolm's breach of contract claim, which alleges that plaintiffs used Rolm software in a manner inconsistent with the terms of the licensing agreements and by failing to comply with the provisions governing the assignment or transfer of rights and duties established under the agreements, is not preempted. *See* *National Car Rental Sys., Inc. v. Computer Assocs. Int'l, Inc., 991 F.2d 426, 433 (8th Cir. 1993)* ("The contractual restriction on use of the programs constitutes an extra element that makes this cause of action qualitatively different from one for copyright."). The same is true for Rolm's tortious interference claim, which also alleges that plaintiffs violated the terms of Rolm's software license. Accordingly, the Court finds that these claims are not preempted. [23]

[61]** d. Trademark Claims

---

[22] For example, while plaintiffs argue that Rolm does not enforce the formalities relating to transfer that are contained in its licensing agreement, this is clearly a question for the jury.

[23] The Court notes, however, that if, in fact, the plaintiffs are not bound by Rolm's software license, then these claims would be preempted under the Copyright Act because the claims would essentially amount to allegations that plaintiffs did something that the copyright laws reserve exclusively to Rolm, such as unauthorized reproduction, distribution, or display. *See* *American Movie Classics Co. v. Turner Entertainment Co., 922 F. Supp. 926, 931 (S.D.N.Y. 1996)* (also noting that an action will not be saved from preemption by elements such as intent, which alter the action's scope but not its nature).

Rolm has asserted a number claims under both state and federal law relating to plaintiffs' allegedly unlawful use of the Rolm name in advertisements. At the center of these claims is Rolm's allegation that plaintiffs have used the Rolm mark in a way that creates a substantial **[*1327]** likelihood of confusion among consumers concerning the relationship between Rolm and the ISOs. For example, Rolm complains that plaintiffs include the Rolm mark in their promotional materials and that plaintiffs advertise that they employ "Rolm-certified" technicians without disclosing the fact that these technicians do not receive ongoing training by, or approval from, Rolm. Plaintiffs do not dispute that they engage in these practices. Rather, they argue that these practices are not likely to cause confusion among consumers. However, "likelihood of confusion is a factual matter," *Versa Products Co., Inc. v. Bifold Co. (Mfg.) Ltd., 50 F.3d 189, 200 (3rd Cir. 1995)*, and the Court cannot conclude, on the record before it, that no reasonable jury could find that a likelihood of confusion exists. [24] **[**62]** Accordingly, summary judgment is not appropriate. [25]

e. Trade Secret Claims

Plaintiffs next contend that they are entitled to summary judgment on Rolm's misappropriation of trade secrets claim (Count V) because the uncontroverted evidence demonstrates that Rolm did not make reasonable efforts to maintain the secrecy of its purported trade secrets and there is no evidence of misappropriation. However, the record materials **[**63]** cited in Rolm's response brief and its response to plaintiffs' statement of material facts not in dispute make clear that genuine issues of material fact exist with respect to the extent of the efforts employed by Rolm to maintain the secrecy of the materials at issue and whether plaintiffs misappropriated any of these materials. Defendant's Opposition to Motion for Summary Judgment on Counterclaims at 23-24; Defendant's Response to Plaintiffs' Statement of Material Facts Not in Dispute at PP 58-59. Accordingly, plaintiffs' motion for summary judgment is DENIED with respect to these claims. [26]

f. Claims for Money Due and Owing

Under Counts XVII through **[**64]** XX, Rolm seeks to recover debts allegedly owed to it by Realcom Office Communication ("Realcom") and Olde York Valley Inn ("Olde York"). These plaintiffs contend they are entitled to summary judgment on these claims for different reasons. First, Realcom Office Communication argues that these claims are barred by the doctrine of accord and satisfaction. However, Rolm denies that such a settlement was entered or that it received any payment. Although there is strong evidence in the record suggesting that a debt was settled by a payment of $ 15,403.64 in 1994, the amount of the debt that was allegedly settled by that does not precisely conform to the amount alleged in the counterclaim. *Compare* Counterclaim, P 181 *with* Aff. of Marla Buckman, P 3, Plaintiffs' Brief in Support of Motion for Summary Judgment on Counterclaims, Ex. 30. In light of this factual dispute, the Court cannot grant summary judgment on this claim.

[*1328] Similarly, factual disputes preclude summary judgment on defendant's claims against Olde Valley. Although Olde York contends that it was fraudulently induced into entering its service contract with Rolm by a statement made by a Rolm representative to the effect that **[**65]** Rolm was the only company that could provide service for its PBXs, Olde York has not identified the name of the Rolm employee that allegedly made this statement, and Rolm disputes that this statement was ever made. This factual dispute must be resolved by a jury.

---

[24] The question of likelihood of confusion is central not only to Rolm's claims under the Lanham Act, but also to its claims under Georgia law. *See* *University of Ga. Athletic Ass'n v. Laite, 756 F.2d 1535, 1539 n.11 (11th Cir. 1985)*.

[25] The Court recognizes that plaintiffs alternatively contend that they are entitled to summary judgment on the issue of damages because such an award under the Lanham Act requires a showing of actual confusion, which plaintiffs claim is lacking here. *See* *Web Printing Controls Co. v. Oxy-Dry Corp., 906 F.2d 1202, 1204-05 (7th Cir. 1990)*. Although the Court agrees that there is little evidence of actual confusion in the record before it, defendant has also moved for injunctive relief under the Lanham Act, which requires only a showing of likelihood of confusion. In light of the factual issues that exist on this question, the Court will not preclude defendant from attempting to establish actual confusion at trial.

[26] In further support of their contention that the materials were not "trade secrets," plaintiffs argue that the materials were readily available from third-parties. Assuming this to be true, however, plaintiffs have not cited any binding authority for the proposition that this fact precludes recovery for misappropriation of trade secrets as a matter of law.

III. CONCLUSION

For the aforementioned reasons, defendant's motion for leave to file surreplies [407] is GRANTED, and plaintiffs' motion to strike the expert report and testimony of Miles Alexander [392] is DENIED. Defendant's motion for summary judgment on plaintiff's antitrust claims [384] is DENIED, as is its motion for partial summary judgment on its copyright counterclaims and permanent injunctive relief [385-1, 385-2]. Plaintiffs' motion for partial summary judgment on their antitrust claims [386] is also DENIED. Plaintiff's motion for summary judgment on defendant's counterclaims [387] is GRANTED IN PART and DENIED IN PART. [27]

[66]** The Court reminds the parties that "motions for reconsideration shall not be filed as a routine practice." Local Rule 7.1E. Any frivolous motions for reconsideration filed concerning this order will be met with severe sanctions.

It is so ORDERED this 14 day of August, 1998.

Willis B. Hunt, Jr.

Judge, United States District Court

End of Document

[27] Plaintiffs' motion is granted with respect to Count X, Count XV, Count XVI, the claims asserted against Start Technologies Corporation, Olde York Valley Inn, and DD Hawkins Communications, Inc. in Counts II, III, and IV, and defendant's claims for "computer copying infringement." It is denied with respect to all other claims.

HN1[] **Trials, Judgment as Matter of Law**

A motion for judgment as a matter of law under *Fed. R. Civ. P. 50(b)* poses the legal question as to whether sufficient evidence was presented to support a jury verdict. The motion is properly granted only if the nonmoving party has not offered sufficient evidence to support a jury verdict in its favor. Before ruling on such a motion, a court must (a) resolve direct factual conflicts in favor of the nonmovant; (b) assume as true all facts supporting the nonmovant that the evidence tended to prove; (c) give the nonmovant the benefit of all reasonable inferences; and (d) deny the motion if the evidence would allow reasonable jurors to differ as to the conclusions that could be drawn. Judgment as a matter of law is appropriate only when all of the evidence points one way and is susceptible to no reasonable inference sustaining the position of the nonmoving party.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2[] **Private Actions, Remedies**

An antitrust plaintiff is not entitled to recover for losses due to factors other than defendant's anticompetitive acts.

Civil Procedure > Remedies > Judgment Interest > General Overview

HN10[] **Private Actions, Remedies**

Prejudgment interest is not recoverable in an antitrust case.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN11[] **Private Actions, Remedies**

The appropriate measure of damages in a antitrust case is the present value of profits lost as a result of the unlawful conduct.

Civil Procedure > Parties > Capacity of Parties > General Overview

HN12[] **Parties, Capacity of Parties**

There is no substantive or procedural requirement that a party must take the stand and testify that it "owns" the claims it is pursuing. In fact, such a notion is plainly contradicted by *Fed. R. Civ. P. 17(a)* and *25(c)*.

Civil Procedure > Parties > Real Party in Interest > Assignees

Civil Procedure > Parties > General Overview

Civil Procedure > Parties > Capacity of Parties > General Overview

Civil Procedure > Parties > Joinder of Parties > General Overview

Civil Procedure > Parties > Real Party in Interest > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN13[] **Real Party in Interest, Assignees**

Under *Fed. R. Civ. P. 17(a)*, an action shall be prosecuted in the name of the real party in interest. In other words, the action must be brought by the person entitled under the governing substantive law to enforce the asserted right. The purpose of the rule is to prevent multiple or conflicting lawsuits by persons such as assignees, executors, or third-party beneficiaries, who would not be bound by res judicata principles. But *Fed. R. Civ. P. 17* specifically requires that before an action can be dismissed at a defendant's behest, the court must allow a reasonable time for ratification by, or joinder of; the real party in interest.

Civil Procedure > Parties > Capacity of Parties > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Waiver & Preservation of Defenses

Civil Procedure > Parties > Real Party in Interest > General Overview

HN14[] **Parties, Capacity of Parties**

Under *Fed. R. Civ. P. 17*, objections must be timely raised: Because the requirements in *Fed. R. Civ. P. 17(a)* are for the benefit of defendant, we have held that an objection on real party in interest grounds should be raised with reasonable promptness in the trial court proceedings. If not raised in a timely fashion, the general rule is that the objection is deemed waived.

Civil Procedure > Parties > Substitution > General Overview

HN15[] **Parties, Substitution**

Under *Fed. R. Civ. P. 17*, applies only to transfers prior to the commencement of the lawsuit. When a transfer occurs during the pendency of litigation, *Fed. R. Civ. P. 25(c)* governs. *Fed. R. Civ. P. 25(c)* states that in case of any transfer of interest, the action may be continued by or against the original party, unless the court upon motion directs the person to whom the interest is transferred to be substituted in the action or joined with the original party. *Fed. R. Civ. P. 25(c)*. The rule is designed to allow an action to continue unabated when an interest in a lawsuit changes hands, rather than requiring the initiation of an entirely new lawsuit. Whether to substitute or join a transferee under *Fed. R. Civ. P. 25(c)* is a discretionary determination by the trial court. The court, if it sees fit, may allow the transferee to be substituted for the transferor. It is also free, if it wishes, to retain the transferor as a party and to order that the transferee be made an additional party.

Evidence > Weight & Sufficiency

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN16[] **Trials, Judgment as Matter of Law**

The court may grant a new trial on the basis that the verdict is against the weight of the evidence, if failing to do so would result in a miscarriage of justice. In determining whether a verdict is against the weight of the evidence, the trial court can rely on its own reading of the evidence it can weigh the evidence, disbelieve witnesses, and grant a new trial even where there is substantial evidence to sustain the verdict. The court, however, may not reweigh the evidence and set aside the jury verdict merely because the jury could have drawn different inferences or conclusions or because judges feel that other results are more reasonable.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > ... > Methods of Discovery > Interrogatories > General Overview

HN17[] **Jury Trials, Jury Instructions**

The submission and form of interrogatories to the jury are matters within the sound discretion of the trial court.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Criminal Law & Procedure > Trials > Jury Instructions > General Overview

HN18[] **Jury Trials, Jury Instructions**

A district court's decision to reject a proffered jury instruction is improper only if when viewed in their entirety, the jury instructions contain an error or errors that affect the substantial rights of the parties. The district court has discretion in the style and wording of jury instructions so long as the charge as a whole fairly and adequately states the law. Furthermore, where the charge to the jury correctly sets forth the law, a lack of perfect clarity will not render the charge erroneous.

Opinion

[*924] **ORDER**

Before the Court are Defendant Brunswick Corporation's Renewed Motion for Judgment as a Matter of Law Pursuant to *Rule 50(b) of the Federal Rules of Civil Procedure* **[**4]** and separate Motion for a New Trial. For the reasons set forth herein, the motions will be DENIED.

I.

Plaintiffs, a group of twenty-one boat manufacturers and their buying cooperative, Independent Boat Builders Incorporated ("IBBI"), brought this action against Brunswick Corporation ("Brunswick") alleging that Brunswick engaged in a variety of anticompetitive conduct with respect to the market for stern drive and inboard marine engines. [1]

[1] Brunswick manufactures MerCruiser stern drive engines. The Court will refer to "Brunswick" and "MerCruiser" interchangeably.

Plaintiffs alleged violations of *Sections 1* and *2* of the Sherman Act and Section 7 of the Clayton Act. Specifically, Plaintiffs claimed that Brunswick engaged in a multifaceted anticompetitive scheme that included **[*925]** the following unlawful practices: (1) the use of various exclusionary discount programs in the sale of stern drive and inboard marine engines to boat manufacturers; (2) the use of various exclusionary discount programs **[**5]** in the sale of stern drive and inboard marine engines to boat dealers; (3) the use of long-term contracts in the sale of stern drive and inboard marine engines; (4) the acquisitions of the boat manufacturers Ray Industries (Sea Ray), U.S. Marine (Bayliner), and Baja; and (5) the acquisitions of the engine manufacturers BMW Marine Diesel, Kiekhaefer Aeromarine and Force. Plaintiffs also alleged that Brunswick fraudulently concealed its anticompetitive acts.

Brunswick counterclaimed against the Plaintiffs who purchased stern drive engines, alleging that those Plaintiffs engaged in an unlawful group boycott. Brunswick alleged that Plaintiffs conspired to boycott MerCruiser stern drive engines at industry boat shows and conspired to price MerCruiser engines at a disadvantage to MerCruiser's competitors. Brunswick also brought three state law counterclaims against Plaintiffs G.W. Invader and KCS International relating to the alleged submission of falsified market share affidavits.

The trial commenced on April 13, 1998 and lasted ten weeks. The jury returned a verdict on June 19, 1998, after a day-and-a half of deliberations. The verdict defined the relevant market as the market for stern **[**6]** drive and inboard marine engines. The jury found for Plaintiffs on all three of the antitrust claims, finding that Brunswick had monopolized the market for stern drive and inboard marine engines; that Brunswick engaged in unreasonable restraints of trade in violation of *Section 1* of the Sherman Act; and that Brunswick engaged in acquisitions in violation of Section 7 of the Clayton Act. The jury awarded damages of $ 44.4 Million on the antitrust claims. [2] In addition, the jury returned a verdict for Plaintiffs on Brunswick's antitrust counterclaim and for G.W. Invader and KCS International on the three state law counterclaims.

II.

HN1[] A motion for judgment as a matter of law under *Federal Rule of Civil Procedure 50(b)* poses the legal **[**7]** question as to whether sufficient evidence was presented to support a jury verdict. *Gray v. Bicknell, 86 F.3d 1472, 1478 (8th Cir. 1996)*. The motion is properly granted only if the nonmoving party has not offered sufficient evidence to support a jury verdict in its favor. *Parrish v. Immanuel Med. Ctr., 92 F.3d 727, 731 (8th Cir. 1996)*; *Gray, 86 F.3d at 1478*; *Abbott v. Crocker, Mo., 30 F.3d 994, 997 (8th Cir. 1994)*. Before ruling on such a motion, a court must (a) resolve direct factual conflicts in favor of the nonmovant; (b) assume as true all facts supporting the nonmovant that the evidence tended to prove; (c) give the nonmovant the benefit of all reasonable inferences; and (d) deny the motion if the evidence would allow reasonable jurors to differ as to the conclusions that could be drawn. *Parrish, 92 F.3d at 731*; *Gray, 86 F.3d at 1478*; *Sherlock v. Quality Control Equip. Co., 79 F.3d 731, 735 (8th Cir. 1996)*. "Judgment as a matter of law is appropriate only when all of the evidence points one way and is susceptible to no reasonable inference sustaining **[**8]** the position of the nonmoving party." *Kehoe v. Anheuser-Busch, Inc., 96 F.3d 1095, 1100 (8th Cir. 1996)* (quoting *Tidwell v. Meyer's Bakeries, Inc., 93 F.3d 490, 494 (8th Cir. 1996)*.

III.

Brunswick argues that Plaintiffs are seeking damages for conduct which is not anticompetitive or has been excluded from the case. This "disaggregation" argument is based upon the well-settled principle that ***HN2***[] an antitrust plaintiff is not entitled to recover for losses due to factors other than the defendant's anticompetitive acts. *Amerinet Inc. v. Xerox Corp., 972 F.2d 1483 (8th Cir. 1992)*.

---

[2] The jury rejected Plaintiffs' claim of fraudulent concealment, thus limiting damages to the beginning of the limitations period, December 7, 1991. The jury also rejected Plaintiffs' claims for prospective damages. After trebling, the verdict is approximately $ 133 Million.

In order to place Brunswick's disaggregation argument in context, some explanation of Plaintiffs' damage model is necessary. Plaintiffs' expert, Dr. Robert Hall, provided the damage testimony for Plaintiffs at trial. **[*926]** Following his discussion of the alleged anticompetitive conduct, Dr. Hall testified that in order to quantify damages, he had to consider "what the market would have looked like without the conduct." Tr. at 1256. This analysis, commonly termed a "but for" analysis, required Dr. Hall to opine on the structure of the market and **[**9]** the market share of the participants in the absence of the conduct alleged to be anticompetitive. As a prelude to his damages testimony, Dr. Hall described the hypothetical "but for" market:

> These are my conclusions as an economist about how the market would be different. We'll be talking more about how I reached these conclusions, but the conclusions are: today Brunswick's share of sterndrive market is around 80 percent -- 75 to 80 percent. In this market without exclusionary acts, I believe that market share would be about 50 percent. It's not that Brunswick would not be in the market. Its role in the market would be smaller. Other rivals would be there, at least one other, taking up the other half the market there to give a good deal to compete against Brunswick.

Tr. at 1258. Thus, Dr. Hall essentially opined that in the "but for" market, Brunswick and at least one other engine manufacturer would each have approximately 50 percent of the relevant market.

Another key component to Dr. Hall's damage model is the economic model Dr. Hall used to derive his damage opinion, the Cournot model. In the Cournot model, competition is based on changing levels of output; each **[**10]** firm assumes that its rivals will produce a certain quantity of output and then selects its own profit-maximizing level of output. The Cournot model predicts that as the number of firms competing in a market increases, the relative concentration of the market decreases and the equilibrium price falls towards the competitive level.

Dr. Hall used the Cournot model to determine the average price in a competitive market for stern drive and inboard engines and then subtracted that price from an average actual price to determine an average overcharge per engine. One of the primary inputs into the Cournot model is market share. Consistent with Dr. Hall's opinion of the hypothetical market, if a market share of 50% is inserted into the formula, the model predicts no overcharge. However, as actual market share rises above 50%, the model predicts an overcharge, and the amount of the overcharge correspondingly increases the higher the share rises.

Brunswick contends that the damage model is fundamentally flawed for two reasons. First, according to Brunswick, events occurred in the actual market (the "real market") which were completely unrelated to any anticompetitive activity and resulted **[**11]** in market share gains for MerCruiser. Because Dr. Hall's model (the "hypothetical market") does not specifically account for these market share gains, Brunswick contends that the model inherently penalizes Brunswick for market share gains from lawful activity. Second, Brunswick points out that Dr. Hall's initial damage opinion at trial was identical to the opinion from his pre-trial report, even though the Court, prior to trial, had excluded from the jury's consideration two alleged anticompetitive acts which formed the basis of the damage opinion in the report.

A.

With respect to Brunswick's first argument, evidence was introduced at trial that two "events" in the real market, unrelated to the conduct of Brunswick, accrued to Brunswick's benefit and most likely resulted in some degree of market share gain for MerCruiser. The first event, the Outboard Marine Corporation ("OMC") Cobra recall, received quite a bit of attention throughout the trial. OMC was one of Brunswick's principal competitors in the stern drive business in the 1980's and early 1990's. In 1986, OMC's stern drive engine, the "Cobra," developed a problem with a shift cable which controlled whether the drive **[**12]** unit was in or out of gear. The testimony at trial was that the problem lingered about for some time, and that OMC initially blamed its dealers for the problem. Finally in 1989, OMC was forced to issue a voluntary recall of all of its Cobra engines produced from 1986 through 1989. Dr. Hall agreed that the Cobra problem cost OMC engine sales and resulted in market share gains by MerCruiser.

[*927] The second event involved the alleged contusion and mismanagement relating to the joint venture between OMC and Volvo Penta of the Americas ("Volvo"). There was evidence that several boat manufacturers were skeptical of the joint venture in its initial stages and that both Volvo and OMC seemed to compete against each other, despite the joint venture relationship, to their own detriment.

And finally, several witnesses offered evidence of MerCruiser's alleged superior products, outstanding reputation, quality service, and extensive dealer network. No witness was able to empirically quantify any market share gains due to these traits, but Brunswick argued at trial that these characteristics benefitted MerCruiser in the form of increased sales.

The Court notes that the task Dr. Hall faced **[**13]** in analyzing this case was an enormous one. Notwithstanding the complex nature of the conduct at issue, Dr. Hall was required to construct a hypothetical market, a "but for" market, free of the restraints and conduct alleged to be anticompetitive. The difficulty of such a task has long been recognized by courts in antitrust cases because" the vagaries of the marketplace usually deny us sure knowledge of what plaintiff's situation would have been in the absence of the defendant's antitrust violation." *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*.

Dr. Hall unequivocally testified that his 50/50 hypothetical market is a market in which *only* Brunswick's unlawful conduct has been removed. He also testified that he fully considered all of the characteristics of the relevant market before he reached his 50/50 conclusion, including the events which allegedly increased Brunswick's share. [3] And finally, Dr. Hall correctly noted that the creation of the "but for" market required consideration of certain market characteristics that could have prevailed in a more competitive market. Taking all of these factors **[**14]** into account, Dr. Hall opined that in the hypothetical market Brunswick would have fifty percent of the sales. He did not opine that Brunswick would exit the market altogether. Thus, inherent in Dr. Hall's damage analysis is the notion that Brunswick sells 50% of all stern drive and inboard engines in the relevant market because it is a vigorous competitor with a quality product, a good reputation, and the ability to capitalize on its competitors shortcomings. Dr. Hall has not eliminated those variables from any equation, he has only placed them into a proper frame of reference in a hypothetical competitive market. Dr. Hall testified that he constructed a market in which *only* the unlawful conduct had been removed, and that was all he was required under the law to do.

As Plaintiffs correctly point out, the fundamental flaw in Brunswick's **[**15]** argument is that Brunswick uses the 50% benchmark as the starting point of the analysis and then implies that share gains from the Cobra problem or "quality products" or "superior service" must be added on top of that. In other words, Brunswick assumes that it would have 50% of the hypothetical market *by default.* But, as Dr. Hall testified at trial, that is an inappropriate way to approach his model. Those factors are necessary for Brunswick to reach 50% of the hypothetical market in the first place.

Dr. Hall recognized that his 50/50 prediction is not mathematically precise. He recognized that in a complex market certain events will cause market share to rise and fall. And contrary to Brunswick's assertions, he never testified that every "positive" balances out exactly with every "negative." Dr. Hall's 50/50 opinion is an average, an equilibrium point, for Brunswick's market share in the absence of the unlawful conduct, and the Court does not believe the model inappropriately incorporates lawful conduct into its analysis.

B.

Next, Brunswick argues that Dr. Hall's damage opinion is based upon certain alleged conduct which was excluded from the jury's consideration prior **[**16]** to trial. Dr. Hall's expert report set forth an initial damage opinion based upon the conduct alleged to be unlawful. Prior to trial the Court excluded **[*928]** two instances of alleged unlawful conduct: that Brunswick caused Yamaha to exit the stern drive engine market and that Brunswick disseminated boat manufacturers' confidential information. Brunswick argues that Dr. Hall's damage opinion did not change following these rulings, so his damage opinion at trial necessarily incorporates lawful conduct.

---

[3] The Court notes that there were substantial factual disputes at trial concerning the significance of these events that purportedly increased MerCruiser's market share.

With respect to this issue, Brunswick might have had a viable argument had it chosen to raise it. As it turned out, Brunswick did not ask a single question of Dr. Hall about the excluded incidents, and Plaintiffs were prevented by the Court's orders from raising them. Brunswick did not ask Dr. Hall whether his opinion should have changed because of the exclusion of the conduct from consideration. At oral argument on the instant motion, Plaintiffs' counsel did offer an opinion as to what Dr. Hall would have said had he been asked that question, but the Court believes that it would not be appropriate to speculate as to what Dr. Hall's testimony might have been. If Brunswick wanted **[**17]** to demonstrate this particular flaw in Dr. Hall's damage opinion, then it should have inquired about the issue on cross-examination Because Brunswick did not do so, this issue is moot. [4]

IV.

At trial, Plaintiffs challenged three separate types of pricing programs used by Brunswick in the distribution of its stern drive engines: (1) market share discounts; (2) volume discounts; and (3) long-term discounts and contracts.

Prior to the beginning of each new model year, MerCruiser provides boat manufacturers **[**18]** (OEMs) with the upcoming model year's MerCruiser OEM Purchase Agreement (the "agreements"). These agreements provide the terms and conditions under which OEM's may purchase MerCruiser engines, including the discount schedules available on MerCruiser purchases. In any given year, several types of discounts may be available to OEMs. For example, in one year MerCruiser may offer market share, volume, purchase planning, cash, freight and long term discounts. Combined these discounts can reach approximately 15% off the list price.

Although they have recently been discontinued, MerCruiser provided various market share discounts from 1984 to 1997. The market share discounts allowed boat manufacturers and dealers to earn discounts if they purchased certain percentages of their total engine purchases from MerCruiser. The discounts were usually highest at an 80% market share although in later years the threshold was lowered to 70%. For example, the 1995 through 1997 model year program provided a 1% discount for a 60% share, a 2% discount for a 65% share, and a 3% discount for a 70% share. Tr. at 2474-75.

The volume discounts did not contain a market share component. The volume discounts were **[**19]** based upon the total volume of engines purchased in a given model year. In the 1995-1997 program the volume discounts ranged from 1% to 5% off list price depending on the volume purchased. In 1990, the threshold level for the volume discounts was 15,000 units. By the 1995-1997 model year program, the volume discount threshold had been reduced by 83% to 2,500 units. [5]

The long term discounts did contain market share provisions. Under the long term discounts OEMs would get an additional 1% to 2% discount if they would agree to purchase a certain market share (i.e., 80%) for a term of three years. Brunswick also entered into specific long term contracts with four boat manufacturers: Baja, Porter, Pro-Line and Fountain. These contracts were three to five years in duration and, in the case of Baja and Porter, contained some provisions extending beyond five **[**20]** years. Baja and Fountain's contracts obligated those companies **[*929]** to purchase 100% of their engines from Brunswick, while Porter was obligated to purchase 99%. Pro-line's contract contained a 50% market share threshold.

Although they were nominally termed "purchase agreements," none of the agreements embodying these discount programs expressly obligated the manufacturers or dealers to purchase engines. Rather, they provided that the

---

[4] Even if Brunswick had appropriately raised these issues with respect to Dr. Hall's damage opinion, it is unlikely that Dr. Hall's decision to use the same damage figure would be any cause for concern. Plaintiffs challenged a variety of unlawful conduct, some instances of which, understandably, were more serious than others. The two incidents at issue here were minor in comparison to the other conduct, and it highly unlikely that they would have impacted the damage calculation in any meaningful way.

[5] At trial, Plaintiffs presented evidence that these drastic reductions were part of an anticompetitive scheme to break up large buying groups such as IBBI.

OEMs and dealers would receive the discounts if their purchases reached the stated levels. Additionally, none of the agreements contained express provisions restricting the OEMs' or dealers' ability to deal with other engine suppliers.

Brunswick has advanced two closely related arguments in support of the discount pricing programs. First, Brunswick argues that prices under the discount programs were above cost, and are therefore legal *per se.* Second, Brunswick argues that the market share and other discount pricing programs cannot be found to be unlawfully exclusionary. [6]

[21] A.**

In support of its first argument, Brunswick relies heavily on the First Circuit case, *Barry* *Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227 (1st Cir. 1983)*. In *Barry Wright,* Grinnell's co-defendant, Pacific, offered Grinnell deep discounts on mechanical "snubbers," shock absorbers used in nuclear power plants. Barry Wright, a competitor of Pacific, alleged that the discounts were anticompetitive because they were unreasonably low and were intended to drive Barry Wright out of business. On appeal, the First Circuit examined the existing case law to determine when a price cut should be viewed as "predatory" and condemned by the antitrust laws. The court rejected a number of approaches from other circuits and ruled that prices above incremental and average costs are *per se* lawful. The court also found that the contract was not unreasonably exclusionary even though it required Grinnell to purchase the majority of its expected requirements (approximately 86%) from Pacific.

Brunswick further cites *Henry v. Chloride, 809 F.2d 1334 (8th Cir. 1987)*, another predatory pricing case, wherein the Eighth Circuit cited *Barry Wright* **[**22]** for the proposition that "prices above average total cost are legal *per se." Id. at 1346*. Because there has never been an allegation of below cost pricing in the present case, Brunswick argues that Plaintiffs' claims with respect to the various discount programs are foreclosed.

The Court questions whether this principle from *Barry Wright* and *Henry* completely forecloses Plaintiffs' claims. Plaintiffs have never alleged predatory pricing by Brunswick, and the Court agrees with Plaintiffs that this case has never been about "low prices." To the contrary, Plaintiffs have alleged and attempted to prove that Brunswick charges anticompetitive *high* prices for its engines. Plaintiffs are seeking to recover an overcharge based upon those prices. In essence, Plaintiffs have maintained that Brunswick sets an anticompetitive high price for its engines and then offers an attractive discount schedule designed to lock customers in to Brunswick purchases. Although one could attempt to argue that the discounts are merely functions of price, these discounts, are not *solely* functions of price because they are tied to corresponding conditions based upon certain degrees **[**23]** of exclusivity.

Furthermore, at least one court has rejected the argument that *any* pricing practice that leads to above cost prices is *per se* lawful under the antitrust laws. *See Le Page's Inc v. 3M, 1997 U.S. Dist. LEXIS 18501*, No. Civ.A. 97-3983, 1997 WL 734005 (E.D. Pa. Nov. 14, 1997). In that case, the restraint at issue was product "bundling," where the defendant, 3M, offered discounts on several products purchased together, but the prices were not below cost. In a motion to dismiss, 3M cited the Supreme Court's decision in *Brooke Group v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*, (as does Brunswick) in support of the position that above cost prices are legal *per se. 509 U.S. at 212, 213*. However, in an earlier case, *SmithKline v. Eli Lilly & Co., 575 F.2d 1056 (3rd Cir. 1978)*, the Third Circuit had found that a similar "bundling" program violated *Section 2*. The district court in *Le Page's* rejected 3M's argument, ruling that the conduct at issue was similar enough to that found unlawful **[*930]** in *SmithKline* to overcome the **[**24]** motion to dismiss. *509 U.S. at 213*. In the face of the obvious distinction that *Brook Group* was a predatory pricing and price discrimination case, the court stated that it "could not conclude that *Brooke Group* supersedes *SmithKline* with respect to this case." *509 U.S. at 212*.

[6] Brunswick did not raise either of these arguments prior to trial.

Similarly, the district court in *SmithKline* specifically rejected a "safe harbor" argument somewhat identical to Brunswick's argument here. *SmithKline Corp. v. Eli Lilly & Co., 427 F. Supp. 1089 (E.D. Pa. 1976)*. The district court's rationale is entirely applicable to the instant case, in spite of the slightly different factual context:

> *[**HN3**[] A] monopolist does not receive immunity merely because it has priced the product in issue above its average cost.* For that immunity is lost when it uses a pricing scheme linking the monopolistic products (Keflin and Keflex) with another competitive product (Kefzol) to deter SmithKline from entering or effectively competing in the cephalosporin market. We should be ever mindful that the gravamen of this complaint and my holding are not that the *price* Lilly separately charges for Keflin or Keflex **[**25]** are unreasonable from an antitrust standpoint; the nub of this case is the *linkage of these latter products in a pricing scheme to deter competition in Kefzol….*

SmithKline, 427 F. Supp. at 1128 (emphasis added). Thus, the district court recognized that it was not the price that was relevant, it was the "strings" attached to the price. [7] In the instant case, Plaintiffs are not challenging unreasonably low prices. They are challenging the "strings" attached to Brunswick's prices, i.e., the exclusivity provisions.

[26]** Notably, *SmithKline* and *Le Page's* are not the only "bundling" cases which lend support to Plaintiffs' position here. In *Ortho Diagnostic Systems, Inc. v. Abbott Laboratories, Inc., 920 F. Supp. 455 (S.D.N.Y. 1996)*, the court undertook an extensive analysis of the above average variable cost issue with respect to "bundling" and stated:

> This analysis disposes of Abbott's contention that it is entitled to dismissal of the *Section 2* claims because it is not even accused of pricing below average variable cost. While average variable cost is the controlling standard in this circuit in single product cases, … *Brooke Group* did not even address package pricing such as that involved here and thus cannot have decided the issue. For present purposes the controlling standard *serves only one purpose* - distinguishing in single product situations (a) *pricing* that constitutes competition on the merits from (b) *pricing* that may permit a monopolist or putative monopolist to get rid of its competitors and pave the way for an abuse of market power.

Id. at 467-68 (emphasis added) (footnote omitted). This quote lends support **[**27]** to Plaintiffs' position that the various incarnations of the "above cost" rule apply only to the price itself.

The Court believes that the proper application *of Brooke Group, Barry Wright,* and *Henry* to this case is that ***HN4***[] the "above cost" rule applies only to the price itself; and that those cases do not *per se* validate all above cost pricing programs which may be combined with additional restraints or otherwise structured in an anticompetitive manner.

B.

Brunswick next argues that its various market share discount programs can not, as a matter of law, constitute unlawful conduct in violation of *Section 1* or *2* of the Sherman Act.

---

[7] The Third Circuit affirmed the district court in *SmithKline.* The court's ruling is instructive:

> "In sum, the act of willful acquisition and maintenance of monopoly power was brought about by linking products on which Lilly faced no competition Keflin and Keflex with a competitive product, Kefzol. The result was to sell all three products on a non-competitive basis in what would have otherwise been a competitive market for Ancef and Kefzol…. Were it not for the Lilly's [pricing plan], the price, supply, and demand of Kefzol and Ancef would have been determined by the economic laws of a competitive market. The Revised CSP blatantly revised those economic laws and made Lilly a transgressor under *§ 2* of the Sherman Act.

SmithKline v. Eli Lilly & Co., 575 F.2d 1056, 1065 (3rd Cir. 1978).

As described above, the market share discount programs required the boat manufacturers **[*931]** and dealers participating in the programs to purchase certain levels of their total engine requirements (usually 70% - 80%, and in the case of some dealer programs, 100%) in order to receive certain discounts. Plaintiffs uniformly testified that purchasing MerCruiser engines and fulfilling the market share requirements was their only viable economic option and that in order to remain in business they had to achieve the maximum discounts. At **[**28]** trial, Plaintiffs presented evidence that the market share programs excluded Brunswick's competitors from the relevant market which in turn allowed Brunswick to artificially inflate engine prices. In addition, Plaintiffs introduced substantial evidence demonstrating Brunswick's monopoly power. With a market share of approximately 75% -80%, the evidence reflected that Brunswick dominates the relevant market.

Plaintiffs' expert, Dr. Hall, testified that the various programs and contracts operated to tax boat manufacturers and dealers on their purchases of non-Brunswick engines. Dr. Hall described the operation of the programs and their resulting tax as follows:

> First of all, we should understand the economics of the transaction that occurs between Brunswick and a boatmaker. Both of them desire to buy and sell the engine, so that's part of the story, so part of what you see there is boatmaker purchases of engines from Brunswick. But something else is happening in these contracts that's very important to understand, and that is that Brunswick is buying from the purchaser a barrier to entry. It does that by putting provisions into the contract, the market share, quantity discount, **[**29]** those type of provisions that we'll talk about. In order to sustain that, Brunswick has to, basically, buy that from the boatmaker. That's part of the deal.
> * * *
> The effect of these provisions is to give a substantial discount to a company that gives Brunswick a large fraction of its business. That's why they're called market share contracts. The market share being measured here is not the market as a whole, it's the share of that boatmaker's engine purchases that … is directed to Brunswick. The discounts are largest if a high share of the purchases come from Brunswick, and typically disappears below some level here (indicating), 60 percent. So, to start with the market share provision of the contract, it gives a 3 percent discount if more than 70 percent of engine purchases come from Brunswick; 2 percent between 65 and 69; 1 percent between 60 and 64; and below 60, no discount. The discount is taken away.
>
> Now, I'll go over this several times. But the tax comes in the following way: If a boatmaker decides to take some of its engine business elsewhere so that . . . for example, it drops below 70 percent, but it continues to purchase some engines, say 65 percent of its **[**30]** engines from Brunswick, it loses discount on the remaining engines. So you're losing something; business that's staying with Brunswick is no longer as well priced, its price is going up. That means, in effect, it's costly to buy those engines. You're sacrificing discounts by buying engines from another supplier. You lose the discount on the remaining engines. So as -- if a company went several notches down here (indicating), it could lose all three percentage points and, yet, if it continued to buy engines, it would have to be paying a higher price for the Brunswick engines. So there's a tax, as a company, in this case, as a boatbuilder, that goes from the 70 percent level below the 60 percent level. As they make that transition from being more loyal to Brunswick to less loyal, they're paying a tax on the engines that they're still buying.

Tr. 1158-61.

Plaintiffs presented further evidence regarding the effects of these discount programs. Dr. Hall testified that in 1996, 38% of all stern drives and inboards were sold under the market share discount programs. Similarly, the evidence reflected that Brunswick's captive boat companies, Bayliner and Sea Ray, accounted for 40% **[**31]** of the stern drive and inboard sales in 1996. Thus, the foreclosure rate at the manufacturer level was estimated to be 78%. In addition, at the dealer level, approximately 25% of the total industry's stern drive and inboard shipments in 1996 were tied to the dealer market share agreements. Evidence was also introduced **[*932]** that Brunswick's current principal competitor, Volvo, has been unable to achieve minimum efficient scale because of the alleged unlawful programs and acquisitions.

Finally, Plaintiffs presented a substantial amount of evidence regarding the "two-tiered" effect of the discount programs. In the marine industry boat manufacturers must have a network of dealers willing to carry their boat lines. Because Brunswick utilized the discount programs at the boat manufacturer and dealer level, several boat manufacturers testified that even if they had wanted to support Volvo, they could not have switched because the incentivized dealers would refuse to purchase non-MerCruiser powered boat lines. In contrast to the 70% to 80% manufacturer programs, several of the dealer programs from 1992 to 1996 required that the dealer sell 100% MerCruiser engines.

Although Brunswick **[**32]** was acutely aware of the effects of the various programs, the industry's concerns apparently fell on deaf ears. Plaintiffs, along with other boat manufacturers, complained vehemently to Brunswick that the market share requirements were unfair, and that they effectively prevented boat manufacturers from supporting other engine manufacturers. In spite of this, Brunswick never withdrew the market share requirements and even sought to increase the market share requirement to 95% in the proposed 1994 "Industry Growth Program." Those efforts ultimately proved unsuccessful due to serious backlash from boat manufacturers. Notably, MerCruiser's Director of Marketing, Bob Gowens, wrote that the purpose of the initial version of the Industry Growth program was to put MerCruiser's customers in "golden handcuffs" and to "lock out" Volvo. *See* PX 239, 1323.

Brunswick's business documents are riddled with acknowledgments of the anticompetitive nature of these agreements. In one document, MerCruiser employee Mike Gyorog wrote that "MerCruiser's market share is being driven by OEM's pricing to dealers to achieve 80 percent market share commitment." PX1369A. The reasonable inference from such a **[**33]** statement is that boat manufacturers were disadvantageously pricing non-MerCruiser equipped boats in order to achieve the market share requirements, and that this practice was "driving" MerCruiser's near-80% market share. Similarly, Barry Eller, MerCruiser's General Manager, acknowledged that the market share programs insulated MerCruiser from market share erosion:

> *MerCruiser will incur the risk of market share loss as a result of eliminating the market-share related discounts form the OEM program.* Falling below 70% market share today has significant implications.... The minimum penalty for falling below 70% market share is 3.2%, and as much as 7%. The current program does have an impact on our business ....

PX 1510A (emphasis added). Additionally, in 1990, McKinsey & Company and Mercury Marine jointly produced a document titled "Final Progress Review." According to that document, "Marine Power [i.e. Mercury Marine] has *meaningful barriers to entry* at sterndrive boat builders based upon volume rebates, share pricing, and long-term contract commitments." PX 1128A (emphasis added). Numerous other Brunswick documents reflect the anticompetitive intent and effect **[**34]** of the various programs.

Brunswick seeks to avoid the substantial evidence described above on formalistic legal presumptions. According to Brunswick: (1) Plaintiffs' claims are appropriately described as exclusive dealing claims; (2) under exclusive dealing law, a contract may be found unlawful *only* if it *completely* prevents customers from dealing in the goods of a competitor (in other words, only if it is 100% exclusive); and (3) because the boat manufacturers and dealers in this case retained the ability to deal with Brunswick's competitors, then the agreements at issue cannot constitute exclusive dealing and cannot violate the Sherman Act. Brunswick further argues that even if the agreements can constitute exclusive dealing, they are non-binding, and thus their short "duration" mandates a finding that they are lawful.

Brunswick's arguments are incorrect as a matter of law and fact. After a ten-week jury trial, the record is replete with evidence that Brunswick's programs, in conjunction with the remainder of the allegedly anticompetitive conduct, effectively *required*Plaintiffs **[*933]** and other boat manufacturers to purchase *extremely* high percentages of their **[**35]** total engine purchases from Brunswick for terms as long as three to five years, and that the manufacturers in fact risked their economic survival by dealing with alternative suppliers. The record also reflects the anticompetitive effects of these agreements, specifically that they prevented MerCruiser's competitors from competing in the relevant market and allowed MerCruiser to artificially elevate engine prices in the relevant market. The fact that the contracts are "non-exclusive" on their face and allow *some* purchases from other suppliers is technically irrelevant, as the fundamental consideration is the objective reasonableness and overall economic effect of *the entirety* of Brunswick's conduct, including the agreements at issue. Although Plaintiffs ostensibly retained the ability to deal with Brunswick's competitors, the overwhelming evidence was that this ability was tremendously restrained by the agreements, and that this restraint produced anticompetitive effects. In the Court's opinion, these agreements cannot be upheld *as a matter of law* merely because they were not 100% exclusive. [8]

[36]** The Court has found no existing case law addressing anything even close to the unique situation presented in this case. That is: (1) a defendant with monopoly power; (2) competing at two levels of distribution; (3) effectively requiring its downstream customers *at separate levels of distribution* (i.e., OEM's and dealers) to purchase extremely high percentages (70% - 100%) of their requirements from the defendant; (4) in order to receive discounts, the receipt of which are the buyers' only viable economic option; and (5) resulting in the obvious exclusion of any significant competition in the relevant market, the artificial inflation of prices in that market, and the assessment of unreasonable taxes and penalties on non-complying buyers. The Court has no doubt that such practices are within the purview of the Sherman Act, regardless of their alleged non-exclusivity because they are the de facto equivalent of exclusive dealing.

HN5[] The Supreme Court has specifically stated that antitrust cases must be resolved on their own unique facts:

> Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***. This **[**37]** Court has preferred to resolve antitrust claims on a case-by-case basis, focusing on the "particular facts disclosed by the record."

Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 466-67, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992), *citing* *Maple Flooring Manufacturers Ass'n v. United States, 268 U.S. 563, 579, 69 L. Ed. 1093, 45 S. Ct. 578 (1925)*. Similarly, the Eighth Circuit has expressly found that ***HN6***[] conduct that does not meet the "traditional" requirements for a particular antitrust claim can still violate the Sherman Act if it shares the same anticompetitive effect. *In Terre Du lac* *Association, Inc. v. Terre Du Lac, Inc., 772 F.2d 467 (8th Cir. 1985)*, the court refused to dismiss a claim for unlawful tying, even though the conduct at issue clearly did not constitute a tying arrangement. In doing so the court stated:

> The evil which is allegedly generated by the defendants' initiation fee arrangement is the same as that generated by traditional unlawful tying arrangements - competition in the market for one product is restrained due to the seller's exploitation of its control over another product. **[**38]** ... Thus, even though a proper tying claim was not alleged in the Association's complaint, the factual allegations made in the complaint may support a conclusion that the defendants' initiation fee arrangement constitutes an unreasonable "restraint of trade," *15 U.S.C. § 1*, in violation of the antitrust laws, *with the Association's tying arrangement serving only as an analogy for analyzing the lawfulness of the defendants' initiation fee arrangement.*

[*934] *Id. at 474-75* (emphasis added). Thus, ***HN7***[] regardless of whether the conduct at issue fits perfectly within a previously determined category of unlawful conduct, the fundamental concern is whether the conduct, in light of its requisite effects, can reasonably be found to violate *Sections 1* and *2* of the Sherman Act.

HN8[] To prevail under *Section 1* of the Sherman Act, Plaintiffs were required to prove the presence of agreements which unreasonably restrained trade. *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*. Under *Section 2* of the Sherman Act, Plaintiffs were required to demonstrate that Brunswick's **[**39]** pricing programs constituted exclusionary conduct in furtherance of a scheme to willfully acquire or maintain its monopoly power. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. Plaintiffs have presented a tremendous amount of proof on these elements, and the jury obviously found that Plaintiffs had satisfied their burdens. The Court has not found any rule

---

[8] Plaintiffs raise a good point with respect to the 100% argument. At what point would courts draw the line if that was in fact the law? Could 99% contracts violate the Sherman Act? Apparently under Brunswick's theory they could not, regardless of the anticompetitive impact such contracts might have. Such a drastic example reinforces the notion that it is the manifest reasonableness and effect of a challenged restraint, not its conclusory label, that is relevant to a Sherman Act rule of reason analysis.

of law that would mandate a reversal of those findings. Accordingly, Brunswick's motion for judgment as a matter of law with respect to the market share discount programs is denied.

V.

Brunswick next argues that Dr. Hall's methodology used to support Plaintiffs' liability claims and to calculate their damages fails to meet the standards of *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)* and *FED. R. EVID. 702*. Brunswick further argues that Dr. Hall's testimony cannot provide a "legally sufficient evidentiary basis" necessary to survive a motion for judgment as a matter of law.

Prior to trial the Court denied Brunswick's Daubert-related motion, and the Court will do so again here. **[**40]** The Supreme Court could not have stressed more forcefully in *Daubert* that ***HN9***[] the focus of *Rule 702* is solely on technique and methodology, not the conclusions that they generate. *Daubert, 509 U.S. at 595*. Plaintiffs have amply demonstrated the soundness of the Cournot model as a fundamental, time-tested economic tool that has been widely accepted for years by reputable economists. Indeed, the Cournot model provides the theoretical underpinnings for the Department of Justice's Horizontal Merger Guidelines and the widely used Herfindahl-Hirschman Index (the "HHI"). Noted economist Dr. Carl Shapiro has described the Cournot model as follows:

> Another attractive feature of the Cournot equilibrium is that it allows us to draw some direct relationships between market structure and performance ... Thus, Cournot's theory provides an intuitively reasonable prediction of the relationship between equilibrium market structure (as measured by market shares), and performances... Amazingly, this relationship can be summarized using a simple concentration index, the Herfindahl Index, in conjunction with the elasticity of industry demand.

DR. CARL SHAPIRO, HANDBOOK **[**41]** OF INDUSTRIAL ORGANIZATION 342 (1984). Brunswick makes no attempt to argue that the Cournot model is an inappropriate method of predicting equilibrium price formation in oligopolistic markets. And once one accepts the proposition that the Cournot model can be used to predict competitive price formation, each of Brunswick's criticisms are reduced to complaints about how Dr. Hall applied the Cournot model to the facts of this case. Accordingly, the Court finds that neither *Daubert* nor the Federal Rules of Evidence render Dr. Hall's opinions inadmissible.

But even if *Daubert* and *Rule 702* did apply to these *factual* criticisms of Dr. Hall's opinions, those opinions would still be entirely admissible. Brunswick more or less attacks every opinion Dr. Hall rendered in this case, arguing that Dr. Hall's 50/50 opinion is legally impermissible, and that every other opinion flowing from the 50/50 assumption is therefore fundamentally flawed. According to Brunswick, the 50/50 theory is "repugnant to the procompetitive purposes of the antitrust laws."

In its memorandum, Brunswick seems to argue that Dr. Hall has opined that every competitive market results in a 50/50 division. In fact, **[**42]** many of Brunswick's criticisms are in the same vein: Brunswick attempts to paint Dr. Hall's conclusions as absolutes *in* **[*935]** *every market.* But Dr. Hall could not have testified more clearly that his opinions in this case are based on a specific analysis of *this* market and the *specific* conduct that has been occurring in *this* market. Dr. Hall also clearly testified that the 50/50 conclusion was not mathematically precise. He further described how the hypothetical market could have been even more competitive, resulting in even lower equilibrium prices.

Beyond that, it is hard for the Court to see what is so "repugnant" about the 50/50 conclusion. If Dr. Hall had altogether eliminated Brunswick from the hypothetical market, there would be serious cause for concern. But Dr. Hall chose a hypothetical market division that is, with all things considered, relatively conservative and based upon actual facts in the record. Brunswick's protestations to the contrary are unfounded and, not surprisingly, implicate factual disputes that were for the jury to decide.

Brunswick's arguments with respect to the remainder of Dr. Hall's opinions suffer from the same infirmities **[**43]** as described above. In each instance Brunswick argues that an opinion is "completely unfounded" or "speculative" or "bogus," even though every one of the opinions was carefully explained by Dr. Hall, was reasonable under the circumstances, and has abundant support in the factual record. Furthermore, as explained in Section III., *supra,* Dr. Hall's opinions did in fact take into account the events which purportedly increased Brunswick's market share.

In sum, the Court finds no defects in Dr. Hall's methodology *or* the application of his methodology to the facts of this case, and his expert testimony is plainly sufficient to support the jury's verdicts.

VI.

Brunswick next asserts that it is entitled to judgment as a matter of law on the present value calculation incorporated into Dr. Hall's damage analysis. First, Brunswick argues that such a recovery is precluded because present value and prejudgment interest are synonymous under the law. Second, Brunswick argues that Dr. Hall's present value calculation is in actuality a prejudgment interest calculation and should therefore be precluded.

It is well settled that ***HN10***[] prejudgment interest is not recoverable in an antitrust **[**44]** case. *See Fishman v. Estate of Wirtz, 807 F.2d 520, 561-62 (7th Cir. 1986)*. However, several courts have upheld awards compensating for the present value of the injury, and the Eighth Circuit expressly allows for present value calculations in antitrust cases. *See H.J. Inc. v. International Tel. and Tel. Corp., 867 F.2d 1531, 1549 (8th Cir. 1989)*. In *H.J.,* the court ruled that ***HN11***[] the appropriate measure of damages "is the present value of profits lost" as a result of the unlawful conduct. *Id.; see also Multiflex Inc. v. Samuel Moore, 709 F.2d 980 (5th Cir. 1983)* (recovery allowed for damages that included "what the asserted lost profits would have earned in an open investment market," given that the claim was "based on an economic theory and not on a claim to statutory or common law prejudgment interest."); *Lovett v. General Motors Corp., 769 F. Supp. 1506, 1521-22 (D. Minn. 1991)* (allowing a present value calculation), *rev'd on other grounds, 998 F.2d 575 (8th Cir. 1993)*.

Brunswick argues that present value calculations are not recoverable because they are identical in function to prejudgment **[**45]** interest. Brunswick cites a non-antitrust case, *Library of Congress v. Shaw, 478 U.S. 310, 321, 92 L. Ed. 2d 250, 106 S. Ct. 2957 (1986)* where the Supreme Court ruled that a plaintiff in a suit against the government may not recover for prejudgment interest absent "an express waiver of sovereign immunity from an award of interest." *Id. at 311*. The Court in *Library of Congress* rejected the plaintiffs' argument that the no-interest rule did not preclude an award for delay in recovery. The Court stated that "interest and a delay factor share an identical function. They are designed to compensate for the belated receipt of money…." *Id. at 322*. Brunswick cites several unpublished cases that have applied *Library of Congress* in the antitrust context and precluded present value damage calculations.

The Court finds that *Library of Congress* does not preclude a present value damages calculation in this context. Plaintiffs are not making any type of claim to statutory or common law prejudgment interest. Rather, **[*936]** they are seeking to recover the present value of the overcharge. Given that *H.J.* (which was decided **[**46]** three years after *Library of Congress)* and other persuasive authority specifically allow for such a recovery, the Court finds that such an award would be appropriate.

The Court must still resolve the issue as to whether Dr. Hall's present value calculation is in effect a prejudgment interest calculation that would be precluded. Brunswick points to Dr. Hall's initial expert report where he stated: "Plaintiffs are entitled to interest on these damages from the time the damages were incurred until the time of trial. I calculated this interest as the cost of debt that Brunswick faces." Prelim. Rep. of Dr. Robert Hall at 46. Brunswick moved *in limine* to preclude this portion of Dr. Hall's damage calculation, and Plaintiffs argued in response that although Dr. Hall called the calculation "interest" in his report, he actually was describing a calculation for present value. Because it was unclear at the time how Dr. Hall made his calculation, the Court reserved ruling on that portion of the motion, finding that the true nature of the calculation would have to be determined from his trial testimony.

Dr. Hall's testimony at trial demonstrated that his calculation was actually one for **[**47]** present value. The following exchange occurred between Plaintiffs' counsel and Dr. Hall:

> A. Now, there is one more thing that needs to be done in the measurement of what this means in terms of how -- what amount of compensation today would be necessary to make up for overcharges that occurred in the past. Because to make up today for a loss that occurred in the past -- loss being the overcharge here -- you have to adjust for the time value of money and we do that through the discount rate.
> (Objection)
> Q. Dr. Hall, if you will continue with your answer, which I think was directed at how you went about calculating the time value of damages, time value of that money.
>
> A. Certainly. Another word for the adjustment that I'm applying here is what economists call present value. This 202, say, for 1986 says that it takes $ 2.02 to compensate someone today for a dollar that they lost in 1986. Or what we would say is the present value today of a 1986 dollar is $ 2.02. That's how we adjust for the fact of timing matters. If we look into the future, as we will, it goes the other way. The amount of compensation today for a future dollar lost is less than a dollar because **[**48]** you would rather have the dollar now than later. That's the time value of money expressed as the present value. So the overcharge in 1986 of $ 925,000.00 then to bring to present value is multiplied by 2.02 and that gives the $ 1.8 million for 1986. Similarly, all the way across. The same calculation for each year through 1993.

Brunswick's expert, Dr. Richard Rapp, challenged Dr. Hall's description of the calculations as present value calculations. Tr. at 5365-67. However, Dr. Rapp's testimony did not persuade the Court that Dr. Hall's calculations were bare interest calculations. Accordingly, the Court finds that Dr. Hall appropriately adjusted his damage calculations to reflect the present value of the overcharges. Brunswick's motion for judgment as a matter of law with respect to this issue is denied.

VII.

Brunswick next argues that two Plaintiffs did not prove at trial that they acquired their claims from their corporate predecessors. Plaintiffs filed this lawsuit on December 1, 1995. In 1991 Mirage Marine transferred some of its assets to Mirage Holdings. In 1996, following the commencement of the lawsuit, Mirage Holdings transferred its assets to the named Plaintiff **[**49]** in this action, Mirage Manufacturing, LLC. Similarly, in 1993 WTYS No. 4 acquired the assets of Thompson Boat Company out of bankruptcy. Then in 1996, WTYS No. 4 sold its assets to the current Plaintiff, Thompson Marine Products.

Brunswick argues that Mirage and Thompson cannot recover on any of their claims because the did not prove at trial that they "own" their claims. Brunswick characterizes the argument as follows:

> **[*937]** Plaintiffs Mirage Manufacturing, LLC ("Mirage") and Thompson Marine Products, Inc. ("Thompson") offered no *evidence* that they acquired a cause of action from their predecessors. Neither is entitled to recover damages for claims that they failed to demonstrate that they own. And, at trial, they did not demonstrate anything at all about the subject. Simply put, this is a failure of proof.

Brunswick's Mem. dated June 15, 1998 at 32 (emphasis in original); *see also,* Brunswick's Mem. dated May 13, 1998 at 115-16 ("But neither offered any proof to the jury that it acquired its predecessor's cause of action against Brunswick…. As a matter of law, Brunswick is entitled to judgment on those damage claims.").

This argument is somewhat **[**50]** puzzling, because ***HN12***[] there is no substantive or procedural requirement that a party must take the stand and testify that it "owns" the claims it is pursuing. In fact, such a notion is plainly contradicted by the Federal Rules of Civil Procedure. *See* *FED. R. CIV. P. 17(a)* and *25(c)*. Apparently equally confused, Plaintiffs initially responded to the argument as if Brunswick had asserted a lack of standing defense. However, an argument of this nature has nothing to do with standing. Instead, the issue falls squarely within the "real party in interest" doctrine, a concept directly addressed by *Rule 17 of the Federal Rules of Civil Procedure*. *See* *Tate v. Snap-On Tools Corp., 1997 U.S. Dist. LEXIS 1485*, No. 90 C 4436, *1997 WL 106275* (N.D. Ill. Feb. 11, 1997) (distinguishing standing from the real party in interest doctrine); *see also* 6A WRIGHT, MILLER & KANE,

FEDERAL PRACTICE AND PROCEDURE, § 1542 (2d ed. 1990). Accordingly, the Court will construe Brunswick's "failure of proof" argument as a real party in interest objection under *Rule 17*.

HN13[] *Federal Rule of Civil Procedure 17(a)* specifies that an action "shall be prosecuted in the name of the real party **[**51]** in interest." In other words, the action must be brought by the person entitled under the governing substantive law to enforce the asserted right. The purpose of the rule is to prevent multiple or conflicting lawsuits by persons such as assignees, executors, or third-party beneficiaries, who would not be bound by *res judicata* principles. 6A WRIGHT, MILLER & KANE, FEDERAL PRACTICE AND PROCEDURE, § 1543 (2d ed. 1986). But *Rule 17* specifically requires that before an action can be dismissed at a defendant's behest, the court must allow a reasonable time for ratification by, or joinder of; the real party in interest. Thus, the Eighth Circuit Court of Appeals has consistently held that ***HN14***[] *Rule 17* objections must be timely raised:

> Because the requirements in *Rule 17(a)* are for the benefit of the Defendant, we have held that an objection on real party in interest grounds "should be raised with reasonable promptness in the trial court proceedings. If not raised in a timely fashion, the general rule is that the objection is deemed waived."

United Healthcare Corp. v. American Trade Ins. Co., 88 F.3d 563, 569 (8th Cir. 1996) (quoting Sun Refining & Marketing Co. v. Goldstein Oil Co., 801 F.2d 343, 345 (8th Cir. 1986). **[**52]** In *United Healthcare,* the court found that an objection raised one week prior to trial was untimely. Other courts have routinely rejected untimely objections as having been waived. *See, e.g., Allegheny Int'l, Inc. v. Allegheny Ludlum Steel Corp. 40 F.3d 1416, 1431 (3rd Cir. 1994)* (buyer of corporation waived right to require successor in interest of seller to be substituted as party plaintiff, by not raising objection until it made a motion for summary judgment at trial); *Gogolin & Stelter v. Karn's Auto Imports Inc., 886 F.2d 100, 102-03 (5th Cir. 1989)* (holding that defendant waived real party in interest defense by "untimely assertion," where defendant raised it for the first time in a motion for directed verdict); *Hefley v. Jones, 687 F.2d 1383, 1388 (10th Cir. 1982)* (objection raised sixteen days prior to trial was untimely).

In the present case, Brunswick did not raise its real party in interest objection until it filed its motion for judgment as a matter of law. Under well-settled authority Brunswick raised the issue in an untimely manner, and the issue is waived.

Because some of the transfers at issue here occurred **[**53]** after the commencement of this lawsuit, consideration of *Rule 17* does not completely resolve the matter. ***HN15***[] *Rule 17* applies only to transfers prior to the commencement **[*938]** of the lawsuit. *ELCA Enterprises, Inc. v. Sisco Equip. Rental & Sales, Inc., 53 F.3d 186 (8th Cir. 1995)*. When a transfer occurs during the pendency of litigation, *Rule 25(c)* governs. *Rule 25(c)* states that "in case of any transfer of interest, the action may be continued by or against the original party, unless the court upon motion directs the person to whom the interest is transferred to be substituted in the action or joined with the original party." *FED. R. CIV. P. 25(c)*. The rule is "designed to allow an action to continue unabated when an interest in a lawsuit changes hands, rather than requiring the initiation of an entirely new lawsuit." *ELCA Enterprises, Inc., 53 F.3d at 191*. Whether to substitute or join a transferee under *Rule 25(c)* is a discretionary determination by the trial court. "The court, if it sees fit, may allow the transferee to be substituted for the transferor. It is also free, if it wishes, to retain the transferor as a party and to order that the **[**54]** transferee be made an additional party." 7C WRIGHT, MILLER & KANE, FEDERAL PRACTICE AND PROCEDURE, § 1958 (2d ed. 1986).

Here, two transfers of interest occurred during the pendency of the litigation. On April 18, 1996, Plaintiff Thompson Marine Products foreclosed on the assets of WTYS No. 4, Inc. On October 1, 1996, Mirage Holdings Inc. was sold to Plaintiff Mirage Manufacturing, LLC. Plaintiffs filed a motion for leave to file a third amended complaint on March 5, 1997. In the memorandum in support of the motion, Plaintiffs described the two corporate transfers and requested leave to substitute the new corporate entities. Plaintiffs specifically averred that the new corporate entities received the rights to any proceeds received in connection with this lawsuit. On March 17, 1997, Brunswick responded to Plaintiffs' motion to amend, stating that it had no objection to the party modifications proposed by Plaintiffs.

Although Plaintiffs filed their motion to amend pursuant to Rule 15, the import of the motion was clear: Plaintiffs intended to substitute two corporate successors in interest for the then existing Plaintiffs, WTYS No. 4 and Mirage

Holdings. Thus, the fact that the motion **[**55]** did not implicate *Rule 25(c)* on its face is irrelevant. By failing to object to the substitution, Brunswick waived any objection that it may have had. And even if the objection was not waived at the time of the motion, Brunswick was still obligated to raise any "improper substitution" issue in a timely manner to allow the Court to properly address it and to allow Plaintiffs to cure any possible defects. In sum, as with the *Rule 17(a)* objection, Brunswick has simply waited too long to inject this issue into this litigation. If Brunswick did not believe that Thompson Marine Products and Mirage Marine Manufacturing LLC were proper Plaintiffs, it should have raise the issue at an appropriate time. Similarly, if Brunswick believed that additional parties should have been joined to allow for complete relief, that issue should have been timely raised as well.

The Court believes the foregoing makes it clear that Plaintiffs Mirage and Thompson were not obligated to "prove up" their corporate history as a predicate to recovering on these claims. To the contrary, it was incumbent upon Brunswick, not the Plaintiffs, to raise issues of "ownership" of claims and necessary parties in a timely manner **[**56]** under the Federal Rules of Civil Procedure. Because Brunswick failed to do so, any objections it may have had in that regard are waived.

VIII.

In its final argument, Brunswick merely repeats the basic thrust of the argument above regarding Mirage and Thompson. Brunswick argues that "with respect to each Plaintiff who failed to appear and testify at trial, the record is devoid of any evidence that these Plaintiffs are in fact the Plaintiffs specified in the Complaint." Brunswick's Supp. Mem. dated May 15, 1998. Of course, as explained above, none of the Plaintiffs were obligated to testify to "identify" themselves or demonstrate that they "own" their claims. This argument is rejected.

Brunswick also argues that for those Plaintiffs who did not testify, there is no evidence in the record that they in fact purchased engines from Brunswick. Brunswick argues that the engine purchase data introduced through Dr. Hall is insufficient to establish this point.

[*939] This argument in simply incorrect. The engine purchase information introduced through Dr. Hall was based upon data supplied by Brunswick. As such, it was competent evidence regarding engine purchases that the jury **[**57]** was entitled to consider. Furthermore, it is significant that Brunswick never contested that the engine purchases were made by the Plaintiffs. In fact, in Brunswick's Answer to Plaintiffs' Fourth Amended Complaint, Brunswick admitted that each Plaintiff purchases stem drive engines from Brunswick. Brunswick never even objected to the introduction of exhibits through Dr. Hall attempting to establish the engine purchase information. In sum, there is substantial evidence in the record regarding all of the Plaintiffs' engine purchases, and the Plaintiffs were not obligated to individually appear and offer that testimony.

IX.

In its motion, Brunswick has raised several additional grounds for judgment as a matter of law. The Court has carefully considered these remaining issues and finds that they are uniformly lacking in merit. Several of these arguments clearly raise questions of fact that are not properly considered in a motion for judgment as a matter of law. Others ask the Court to completely disregard established authority as well as the voluminous evidence produced by the Plaintiffs in this case. The Court will summarily address these issues.

First, Plaintiffs presented substantial **[**58]** evidence to support the jury's verdict defining the relevant product market as the market for the sale of stern drive and inboard marine engines. Second, the jury's implicit finding that Brunswick possessed monopoly power in the relevant market is supported by substantial evidence and applicable authority. Third, the statute of limitations clearly does not act as a bar to Plaintiffs' claims under Section 7 of the Clayton Act. Fourth, Plaintiffs unquestionably have standing to recover damages based on Brunswick's anticompetitive acquisitions. And finally, the jury's finding that Brunswick's multiple acquisitions, considered collectively, violated Section 7 of the Clayton Act is fully supported by the evidence and applicable authority.

X.

Brunswick has also filed a motion for a new trial raising many of the same issues in its motion for judgment as a matter of law. ***HN16***[] The Court may grant a new trial on the basis that the verdict is against the weight of the evidence, if failing to do so would result in a miscarriage of justice. *Shaffer v. Wilkes, 65 F.3d 115, 117 (8th Cir. 1995) (quoting White v. Pence, 961 F.2d 776, 780 (8th Cir. 1992))*. "In **[**59]** determining whether a verdict is against the weight of the evidence, the trial court can rely on its own reading of the evidence--it can 'weigh the evidence, disbelieve witnesses, and grant a new trial even where there is substantial evidence to sustain the verdict'." *White, 961 F.2d at 780 (quoting Ryan v. McDonough Power Equip., 734 F.2d 385, 387 (8th Cir. 1984))*. The Court, however, may not "reweigh the evidence and set aside the jury verdict merely because the jury could have drawn different inferences or conclusions or because judges feel that other results are more reasonable." *White, 961 F.2d at 780* (quotations omitted).

The discussions in sections III, IV, V, and IX, *supra,* are particularly relevant to the initial issues raised in Brunswick's motion, and the Court will not repeat those discussions here. The Court finds that the jury's verdicts with respect to Plaintiffs' claims under *Sections 1* and *2* of the Sherman Act and Section 7 of the Clayton Act are not against the great weight of the evidence, and do not constitute a miscarriage of justice.

Brunswick argues that it is entitled to a new trial because the damages **[**60]** awarded by the jury were grossly excessive. However, the bulk of Brunswick's argument is directed to the same criticisms of Dr. Hall's opinions that the Court has rejected above. Brunswick also argues that if it had charged Dr. Hall's competitive price for engines, then it would have lost money on the sale of those engines. However, Dr. Hall offered a reasonable explanation for why that was an incorrect argument, and the jury was well within its province to reject the testimony of Dr. Rapp.

Brunswick also argues that it is entitled to a new trial based upon several evidentiary rulings. The Court finds that the admission **[*940]** of Dr. Hall's testimony, including the testimony regarding the present value of Plaintiffs' damages, was in no way unfairly prejudicial and does not provide a basis for a new trial. Furthermore, as explained in Sections VII and VIII, *supra,* all of the Plaintiffs presented competent, substantive evidence to demonstrate the elements of their claims, and they were in no way obligated to individually appear to testify that they "owned" their claims or to offer testimony regarding engine purchases.

The McKinsey documents were admitted by the Court after **[**61]** thorough consideration of the arguments and authority cited in Plaintiffs' Memorandum in Opposition to Defendant Brunswick Corporation's Motion in Limine (McKinsey & Company Documents) dated March 16, 1998. The McKinsey documents were relevant and admissible under multiple grounds, and Brunswick suffered no unfair prejudice from their admission.

The Court finds no error in the admission of the FTC Stipulation, which was appropriately admitted under 801(d)(2) and was not unfairly prejudicial. Brunswick's arguments as to the irrelevance of the FTC Stipulation are completely contradicted by the trial testimony of former Brunswick CEO Jack Reichert, who testified that there was actually *more* competition between outboards and stern drives in 1976. Tr. 4727-29. Furthermore, even if the FTC stipulation was improperly admitted (which it was not), it could only constitute harmless error. The amount of evidence in this case demonstrating that outboard engines and stern drive engines are in separate product markets was overwhelming.

The Court's decision to exclude the expert testimony of Stephen Humphries was fully explained in the Court's Order of May 20, 1998, and Brunswick makes no **[**62]** persuasive argument suggesting that the Order was erroneous. A party simply cannot wait until its opponent rests, and then seek to vastly expand the subject matter of expert testimony to areas that had never been properly disclosed in accordance with firm disclosure deadlines. Furthermore, it makes no difference that Humphries received some data after the disclosure deadline of March 16, 1998. The trial of this matter commenced on April 13, 1998, and Brunswick had ample opportunity to file a timely request to supplement.

Brunswick objects to the Court's verdict form, basically repeating its disaggregation argument addressed in Section III, *supra.* Because there is not a disaggregation problem, this issue does not warrant a new trial. Brunswick also argues that certain interrogatories should have been included in the verdict. ***HN17***[] The submission and form of interrogatories to the jury are matters within the sound discretion of the trial court. *E. I. du Pont de Nemours & Co. v. Berkley and Co., 620 F.2d 1247, 1271 (8th Cir. 1980)*. The proposed interrogatories were, quite simply, unnecessary and misleading, and the Court was justified in omitting them.

Brunswick further **[**63]** argues that the Court's instructions to the jury contained prejudicial errors and omissions. ***HN18***[] A district court's decision to reject a proffered jury instruction is improper only if when viewed in their entirety, the jury instructions contain an error or errors that affect the substantial rights of the parties. *Hastings v. Boston Mut. Life Ins. Co., 975 F.2d 506, 510 (8th Cir. 1992)*. "The district court has discretion in the style and wording of jury instructions so long as the charge as a whole fairly and adequately states the law." *Beckman v. Mayo Found., 804 F.2d 435, 438 (8th Cir. 1986)*. Furthermore, "[where] the charge to the jury correctly sets forth the law, a lack of perfect clarity will not render the charge erroneous." *Roth v. Black & Decker; U.S., Inc., 737 F.2d 779, 783 (8th Cir. 1984)*.

The Court finds that the jury was properly instructed on the definition of monopoly power, as the instruction was in full accord with established Supreme Court and Eighth Circuit precedent. Brunswick's argument with respect to Instruction No. 17 has no merit. First, the instruction itself is not an instruction on the law because it **[**64]** only recites several categories of conduct which Plaintiffs maintained were anticompetitive. Furthermore, the instructions as a whole fairly and adequately stated the law.

XI.

In accordance with the above, Defendant Brunswick Corporation's Renewed Motion **[*941]** for Judgment as a Matter of Law (Docket # 1239) and separate Motion for a New Trial (Docket # 1240) are hereby DENIED.

IT IS SO ORDERED this 19 day of August, 1998.

James M. Moody

United States District Judge

Docket No. 96-9281

Reporter

155 F.3d 59 *; 1998 U.S. App. LEXIS 22030 **; 29 ELR 20171

AUTOMATED SALVAGE TRANSPORT, INC.; BRIA RUBBISH AND RECYCLING, INC.; CONNECTICUT CARTING & SALVAGE CORP.; CONNECTICUT DISPOSAL SERVICE, INC.; D.P.L. REFUSE SERVICE, INC.; FRANK PERROTTI & SONS, INC.; ROYAL REFUSE & RECYCLING, INC.; SANITARY REFUSE COMPANY, INC.; QUALITY RECYCLING AND DISPOSAL; C & D SANITATION & RECYCLING, LLC, Plaintiffs-Appellants, v. WHEELABRATOR ENVIRONMENTAL SYSTEMS, INC.; BRIDGEPORT RESCO COMPANY, L.P.; RILEY ENERGY SYSTEMS OF LISBON CORPORATION, Defendants-Appellees, CONNECTICUT RESOURCES RECOVERY AUTHORITY, Intervenor-Defendant-Appellee.

Subsequent History: **[**1]** As Amended October 9. 1998. As Amended.

Prior History: Appeal from an order of the United States District Court for the District of Connecticut, Burns, J., dismissing a complaint alleging violations of the Sherman Act and the *Commerce Clause*, and declining to exercise supplemental jurisdiction over related state claims. The complaint challenged a settlement agreement between the Connecticut Resources Recovery Authority and Wheelabrator Environmental Systems, Inc., and its related corporate entities, which operate waste-to-energy facilities inside and outside of Connecticut. The settlement agreement, inter alia, removed what may have been the last obstacle to the opening of a sixth waste-to-energy plant in Connecticut by the Wheelabrator defendants in return for their promise to not process any waste that Connecticut municipalities had contractually committed to CRRA's facilities for processing. The challenge to the settlement agreement was rejected on the grounds that, even if it was anticompetitive, CRRA was exempt from the Sherman Act under the state action immunity doctrine, and that the settlement agreement did not discriminate against or unduly burden interstate commerce.

Disposition: Affirmed. **[**2]**

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] Standards of Review, De Novo Review

The courts review the grant of a motion under *Fed. R. Civ. P. 12(b)(6)*, de novo, and must construe in plaintiffs' favor factual allegations in the complaint. The court's consideration, like the district court's, is limited to facts stated on the face of the complaint and in documents appended to the complaint or incorporated in the complaint by reference, as well as to matters of which judicial notice may be taken.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] Defenses, Demurrers & Objections, Motions to Dismiss

Dismissal of the complaint is proper only where it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Real Property Law > Subdivisions > State Regulations

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > Public Improvements > General Overview

HN3[] Scope, Exemptions

The Parker doctrine exempts only anticompetitive conduct engaged in as an act of government by the state as sovereign, or, by its subdivisions; pursuant to state policy to displace competition with regulation or monopoly public service.

Constitutional Law > Congressional Duties & Powers > General Overview

International Law > Authority to Regulate > General Overview

International Trade Law > Authority to Regulate > General Overview

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Commerce With Other Nations

Constitutional Law > ... > Commerce Clause > Interstate Commerce > General Overview

Constitutional Law > ... > Commerce Clause > Interstate Commerce > Prohibition of Commerce

Transportation Law > Interstate Commerce > Federal Powers

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

HN4[] **Constitutional Law, Congressional Duties & Powers**

The *commerce clause* provides that Congress shall have the Power to regulate commerce with foreign nations and among the several states. *U.S. Const. art. I., § 8, cl. 3*. A dormant or negative aspect of this grant of power is that a state's power to impinge on interstate commerce is limited.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Environmental Law > Solid Wastes > Disposal Standards

HN5[] **Congressional Duties & Powers, Commerce Clause**

The processing and disposal of solid waste is commerce under the *Commerce Clause, U.S. Const. art. I, § 8, cl. 3*.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Transportation Law > Interstate Commerce > Balancing Tests

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN6[] **Commerce Clause, Dormant Commerce Clause**

The first step in analyzing any law subject to judicial scrutiny under the dormant *Commerce Clause* is to determine whether it regulates evenhandedly with only incidental effects on interstate commerce, or discriminates against interstate commerce. In this context, discrimination means differential treatment of in-state and out-of-state economic interests that benefits the former and burdens the latter.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Balancing Tests

HN7[] **Congressional Duties & Powers, Commerce Clause**

If a restriction on commerce is discriminatory, it may be applied only if it is demonstrably justified by a valid factor unrelated to economic protectionism. In contrast, nondiscriminatory regulations that have only incidental effects on interstate commerce are valid unless the burden imposed on such commerce is clearly excessive in relation to the putative local benefits.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Balancing Tests

Transportation Law > Intrastate Commerce

HN8[] **Congressional Duties & Powers, Commerce Clause**

The incidental burdens are the burdens on interstate commerce that exceed the burdens on intrastate commerce.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Balancing Tests

HN9[] **Interstate Commerce, State Powers**

Where a regulation does not have this disparate impact on interstate commerce, then the court must conclude that it has not imposed any incidental burdens on interstate commerce that are clearly excessive in relation to the putative local benefits. Thus, the minimum showing required to succeed in a *Commerce Clause, U.S. Const. art. I, § 8, cl. 3*, challenge to a state regulation is that it have a disparate impact on interstate commerce. The fact that it may otherwise affect commerce is not sufficient.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Transportation Law > Interstate Commerce > Market Participant Doctrine

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN10[] **Commerce Clause, Dormant Commerce Clause**

Under the market participant doctrine, which distinguishes between the direct exercise of a state's sovereign powers and a state's actions in the more general capacity of a market participant, only the former actions are subject to the limitations of the dormant *Commerce Clause, U.S. Const. art. I, § 8, cl. 3*.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Market Participant Doctrine

HN11[] **Interstate Commerce, State Powers**

When it acts as a market participant, a state agency may impose restrictions that reach beyond the immediate parties with which the government transacts business. The *Commerce Clause, U.S. Const. art. I, § 8, cl. 3*, does not require the state to stop at the boundary of formal privity of contract.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN12[] **Interstate Commerce, State Powers**

Only if the actions of a state, whether by statute, regulation, or contract, have a substantial regulatory effect outside of the particular market in which the state is a participant, do they offend the dormant *Commerce Clause, U.S. Const. art. I, § 8, cl. 3*.

Counsel: WILLIAM M. BLOSS, New Haven, CT (David L. Belt, Alinor C. Sterling, Jacobs, Grudberg, Belt & Dow, P.C., New Haven, CT, of counsel), for Plaintiffs-Appellants.

J. ANTHONY DOWNS, Boston, MA (A. Lauren Carpenter, Goodwin, Procter & Hoar, LLP, Boston, MA, of counsel), for Defendants-Appellees.

EVERETT E. NEWTON, New Haven, CT (Barry J. Waters, April L. Lieberman, Murtha Cullina Richter & Pinney, New Haven, CT, of counsel), for Intervenor-Defendant-Appellee.

Judges: Before: MESKILL and JACOBS, Circuit Judges, and KORMAN, District Judge. *

Opinion by: KORMAN

Opinion

[*62] KORMAN, District Judge:

The Connecticut Resources Recovery Authority (CRRA") was created by the Connecticut General Assembly in 1973. Since then, "CRRA has developed and maintained a vast system of solid waste management projects, under a Solid Waste Management Plan, which include[s] waste-to-energy plants . . . ." Amended Complaint P 7. The Solid Waste Management Plan, which was promulgated by Connecticut's Department of Environmental Protection ("DEP") pursuant to express **[**3]** legislative directive, *Conn.Gen.Stat § 22a-211*, "abandoned landfilling in favor of transporting waste via transfer stations or directly to trash-to-energy plants for ultimate disposal." Amended Complaint P 7.

CRRA owns four of the six trash-to-energy plants currently operating in Connecticut. These four plants, which were constructed by CRRA with the proceeds of bonds issued by CRRA, are in Hartford, Preston, Wallingford, and Bridgeport, and serve over two-thirds of the cities and towns in Connecticut pursuant to long-term contracts by which these cities and towns committed themselves to dispose of their waste. [1] A fifth waste-to-energy plant is located in Bristol, Connecticut, and is privately "owned, operated and/or controlled" by Ogden Systems, Inc. Amended Complaint P 9.

[4]** The opening of Connecticut's sixth waste-to-energy facility in Lisbon by defendant, Wheelabrator Environmental Systems (and related defendants), provides the backdrop for this lawsuit. See generally *Connecticut Resources Recovery Authority v. Commissioner of Environmental Protection, 233 Conn. 486, 488-96, 659 A.2d 714, 715-19 (1995)* (detailing history of CRRA opposition to permit). Specifically, CRRA challenged the decision of the Commissioner of Environmental Protection to permit the Lisbon waste-to-energy plant. CRRA invoked *Conn.Gen.Stat. § 22a-208d*, which was enacted to ensure that new solid waste disposal facilities would be permitted only if they would "not result in substantial excess capacity of resources recovery facilities . . . ."

* Honorable Edward R. Korman, United States District Judge for the Eastern District of New York, sitting by designation.

[1] The Hartford, Preston, and Wallingford plants are "owned, operated and/or controlled" in conjunction with either Ogden Systems, Inc., or American Refuel, Amended Complaint P 9, neither of whom is a party to this case. The Bridgeport plant is allegedly "operated and/or controlled in conjunction with the Wheelabrator defendants." Id.

The challenge was ultimately resolved by the settlement agreement at the center of this case. CRRA agreed to withdraw its objection to the Lisbon facility permit in consideration for an agreement that addressed, inter alia, a problem caused by certain waste haulers including plaintiffs, Automated Salvage Transport, Inc. (and related plaintiffs). These waste haulers essentially interfered with the performance of long-term **[**5]** contracts that CRRA negotiated with Connecticut municipalities to commit the municipal solid waste to CRRA facilities for disposal at fixed long-term rates. Instead of delivering this waste to CRRA, plaintiffs hauled it to privately operated waste-to-energy plants with more favorable spot market rates. The settlement agreement requires both CRRA and the Wheelabrator defendants to respect one another's municipal contracts by rejecting deliveries of any waste committed to one another. In addition, if a hauler delivers waste committed to CRRA three times within a three-month period to the Wheelabrator defendants, the Wheelabrator defendants must refuse all deliveries of waste from that hauler for the next three months.

The settlement agreement is the subject of Sherman Act and *Commerce Clause* complaint. Plaintiffs allege that the settlement agreement is a per se antitrust violation because it is "an unlawful contract, combination and conspiracy" to maintain an alleged CRRA monopoly over Connecticut waste disposal, Amended Complaint PP 11, 13(e), and that it violates the *Commerce Clause* because it "unreasonably restrain[s] free trade and interstate commerce." Amended Complaint P **[**6]** 13(h). Since the defendants have asserted the state action immunity defense to the **[*63]** antitrust cause of action and the market participant defense to the *Commerce Clause* cause of action, a brief history of the CRRA, and of the State of Connecticut's role in its creation and operation, is appropriate before we discuss plaintiffs' challenge to this settlement agreement.

Background

In 1973, after decades of reliance on landfills, the Connecticut legislature recognized that the State's "prevailing solid waste disposal practices . . . resulted in unnecessary environmental damage, wasted valuable land and other resources, and constituted a continuing hazard to the health and welfare of the people of the state." *Conn.Gen.Stat. § 22a-258*. Worse yet, floor debates in the Connecticut General Assembly revealed that roughly ninety percent of these landfills were actually illegal. 16 (S-97) Senate Proceedings, Pt. 8. 1973 Sess., p. 3753 (remarks of Sen. Costello). [2] They continued to operate, violating clean air and landfill regulations, because there was simply no alternative means for waste disposal. Id. Unable to enforce the laws without aggravating the crisis, Connecticut's **[**7]** Department of Environmental Protection (DEP) was forced into a "holding action." Id. at 3761. In 1971, the Connecticut General Assembly ordered the DEP to study Connecticut's solid waste system, and develop a master solid waste disposal solution for the entire state.

The DEP unveiled the contours of its state-wide waste disposal plan in 1973, proposing "an antithesis to the burn and bury philosophy which had caused such a problem" for Connecticut. 16 (H-143) H. R. Proceedings, Pt. 8, 1973 Sess., p. 6665 (remarks of Rep. Harlow). [3] Rather than simply incinerating or landfilling Connecticut's solid waste, the DEP plan phased out these disposal methods in favor of recycling and energy recovery. In the DEP's model, which has since become common across the nation, residents would "segregate" their waste, separating combustible materials from non-combustibles. The combustible waste would be **[**8]** sent to incinerators where it would be converted into energy, which, in turn, would be sold to utility companies. The non-combustible materials, such as aluminum, would be recycled. H. Rep. Tr. at 6658, 6666, 6692 (remarks of Rep. Harlow). Advocates of the solid waste plan touted it as not only environmentally sound but also "economically viable, perhaps the first plan in the country if not the world to provide a format which can . . . provide positive economic benefits." Id. at 6669.

Even as the DEP was working out the plan's final details, the Connecticut General Assembly, deeming the plan's general strategy both sound and inevitable, passed implementing legislation during its 1973 session, rather than

[2] The transcript of this Connecticut Senate floor debate (hereinafter "Sen. Tr.") was included in the Joint Appendix.

[3] The transcript of this Connecticut House of Representatives floor debate (hereinafter "H. Rep. Tr.") was included in the Joint Appendix.

delay the solid waste crisis another year. See id. at 6659, 6667-78. This legislation created the Connecticut Resources Recovery Authority ("CRRA") as a "necessary **[**9]** state structure, which can take initiative and appropriate action to provide the necessary systems, facilities, technology and services for solid waste management and resources recovery." *Conn.Gen.Stat. § 22a-258*.

The Connecticut General Assembly rejected the landfill system in favor of an "appropriate governmental structure, processes and support . . . so that effective state systems and facilities for solid waste management and large-scale resources recovery [could] be developed," *Conn.Gen.Stat. § 22a-259(3)*, and so that "solid waste disposal services [could] be provided for municipal and regional authorities and private persons in the state, at reasonable cost, by state systems and facilities . . . in accordance with the statewide solid waste management plan." *Conn.Gen.Stat. § 22a-259(6)*.

The Connecticut General Assembly hoped that, by creating this state-wide authority to implement the DEP plan, Connecticut would benefit from an economy of scale, allowing more efficient and affordable development of necessary systems and technologies. See **[*64]** *Conn.Gen.Stat. § 22a-258* (finding that. "coordinated large-scale processing of solid wastes may be necessary in order **[**10]** to achieve maximum environmental and economic benefits for the people of the state" and that "the development of systems and facilities and the use of the technology necessary to initiate large-scale processing of solid wastes have become logical and necessary functions to be assumed by state government").

A. CRRA's Self-Sustained Operation

CRRA was to fund itself by issuing $ 250 million in self-liquidating bonds. Sen. Tr. at 3751 (remarks of Sen. DeNardis). It was critical to the General Assembly that CRRA would repay these bonds through sales of its waste disposal services and recovered energy. See, e.g., H. Rep. Tr. at 6687 (remarks of Rep. Dice) ("I'm not . . . in favor of the state under-writing or ever subsequently having to pay from the state's funds as a whole to subsidize these matters from the towns. This is supposed to be a self-liquidating program."). See also *Conn.Gen.Stat. § 22a-262(2)* (directing CRRA to generate "revenues sufficient to provide for the support of the authority and its operations on a self-sustaining basis").

While the legislation creating CRRA did not preclude cities and towns from choosing alternatives to the CRRA-operated facilities, **[**11]** it was clear that once the CRRA facilities became operational the DEP would at last be free to enforce clean air and landfill regulations. see Sen. Tr. at 3761-62 (remarks of Sen. Costello). This enforcement would eliminate most, if not all, of CRRA's competition from landfills. Indeed, the bill creating CRRA was passed over objections that CRRA would simply condemn all of its private competitors. See id.; H. Rep. Tr. at 6686 (remarks of Rep. Camp); H. Rep. Tr. at 6698 (remarks of Rep. Varis); H. Rep. Tr. at 6699 (remarks of Rep. Pearson).

The Connecticut General Assembly further protected CRRA's financial stability by restricting the development of new waste-to-energy plants that would compete with CRRA for the supply of waste. See*Conn.Gen.Stat. §§ 22a-208d(a)*, *22a-208d(c)(1)(I)* (forbidding construction or expansion of disposal facilities that would create an excess capacity for municipal solid waste).

B. The Diverted Waste Problem

Since its creation, CRRA has developed four of Connecticut's six resource recovery facilities, eleven transfer stations, and five landfills, enabling it to serve more than one hundred municipalities who have entered into long-term contracts **[**12]** committing their solid waste to its facilities. Connecticut General Assembly Legislative Program Review & Investigations Committee, "Connecticut Resources Recovery Authority: Solid Waste

Management Fees" (December 1993) ("Legislative Report"), at i, 1, 11. [4] The facilities charge a "tipping" fee for each ton of waste they accept and process, and derive energy from the processed waste, which they then sell to utility companies. This revenue sustains the facilities' continued operation, and helps maintain their role in Connecticut's waste management system. Id. at 1, 19-20, 51-54. Several other towns are instead using the CRRA and private facilities on a spot basis. Id. at 11. These towns are essentially speculating on short-term price fluctuations in the "spot market," instead of committing to a set long-term price. See id. at 15-17, 35, 39.

[13]** In the years preceding the events leading to the complaint, CRRA was faced with a dwindling supply of contracted waste delivered to its facilities, caused by such unforeseen factors as economic recession and mandatory recycling programs enacted in the late 1980s and early 1990s. Id. at ii, 6-7, 32-34, 39. The shortage of contracted waste increased the demand and competition for **[*65]** spot waste. As a result, the rates charged for spot waste plummeted to "historic lows", falling below those charged for contractually committed waste. Id. at 15, 34-35. In 1994, for example, while CRRA's Mid-Connecticut facility charged a $ 51 per ton tipping fee for committed waste, its spot fees ranged from $ 32 to $ 34. At the Southeast plant, spot prices averaged $ 40 per ton, in contrast to fees of $ 98 per committed ton. Id. at 15.

Rather than pay the higher fees required by the towns' long-term contracts, some waste haulers simply delivered the towns' waste to whichever waste management facility was cheapest in the spot market. See id. at 15-17, 34, 39. This practice exacerbated the shortages in committed waste delivery.Id. at ii, 17, 34, 39. This case arose from CRRA's **[**14]** effort to ensure that it received the waste to which it was contractually entitled without interference from waste haulers.

C. The Settlement Agreement

Despite the overcapacity of waste-to-energy plants in Connecticut, the DEP issued a permit to the Wheelabrator defendants to open a sixth waste-to-energy plant in Lisbon. CRRA challenged the need for the new plant by intervening in the proceedings before the DEP, where it argued that the new facility would result in the "substantial excess capacity" forbidden by *Conn.Gen.Stat. § 22a-208d*. While the DEP ultimately decided to grant the permit for the Lisbon plant, it was not disputed that this facility would add to the then existing overcapacity in Connecticut. See *Connecticut Resources Recovery Authority v. Commissioner of the Department of Environmental Protection, 1994 Conn. Super. LEXIS 418*, *15, 1994 WL 60061, at *5 (Conn. Super. Feb. 16, 1994) ("The Lisbon plant will undoubtedly reduce the availability of waste for each of these plaintiffs, the impact being greatest upon . . . [the] plant in Preston [which] is operating well below its capacity for lack of sufficient waste."), appeal **[**15]** dismissed, *233 Conn. 486, 659 A.2d 714 (1995)*. Nevertheless, the DEP chose to permit the Lisbon facility because it determined that the added capacity would become necessary by 1998--a matter that was also the subject of some controversy. See, e.g., Legislative Report at 60-61 (recommending review of Lisbon decision and DEP decision-making process).

CRRA then commenced litigation seeking to overturn the DEP's decision and enjoin the plant's operational permitting. See *Connecticut Resources Recovery Authority v. Commissioner of the Department of Environmental Protection, 1994 Conn. Super. LEXIS 418, 1994 WL 60061*. After holding that CRRA had standing to invoke the benefits of *§ 22a-208d*, the Connecticut Superior Court accepted the DEP's finding that, although the plant was not yet necessary, it would become necessary by 1998. Nevertheless, the Superior Court found that the permit, contained an invalid condition intended to limit the processing of out-of-state waste at the Lisbon facility. Because this invalid condition was "inextricably intertwined" with the DEP's determination of need, the case was remanded to the DEP to reconsider whether it would **[**16]** adhere to its conclusion that the Lisbon facility would become

---

[4] The Legislative Report was attached by the Wheelabrator defendants to the memorandum in support of their motion to dismiss. They argued, without apparent contradiction by plaintiffs, that it "may be considered by the Court without converting this motion into one for summary judgment." Mem. at 7 n.2. The Legislative Report was also included in the Joint Appendix. We decline to consider it in determining whether the district court properly dismissed the complaint. Rather, we refer to it here solely to provide a background for this controversy that is not inconsistent with the facts alleged in the amended complaint.

necessary. Id. at *16. Both CRRA and Wheelabrator attempted, unsuccessfully, to reopen the remand order. See *Connecticut Resources Recovery Authority v. Commission of the Department of Environmental Protection, 1994 Conn. Super. LEXIS 1195, 1994 WL 197398* (Conn. Super. May 2, 1994); *Connecticut Resources Recovery Authority v. Commissioner of the Department of Environmental Protection, 1994 Conn. Super. LEXIS 1176, 1994 WL 197381* (Conn. Super. May 3, 1994). The parties then appealed the remand order to the Connecticut Supreme Court, which dismissed the appeal on June 13, 1995, because the remand was not a final judgment. *Connecticut Resources Recovery Authority v. Commissioner of Environmental Protection, 233 Conn. at 496-502, 659 A.2d at 719-22*.

At this point, CRRA and Wheelabrator entered into the July 19, 1995 settlement agreement at issue in this case. Article VI of the settlement agreement reads, in pertinent part:

> A. Deliveries of Waste Committed to Other Projects. [Wheelabrator] shall not accept and shall in fact reject deliveries of any waste **[**17]** known by [Wheelabrator] to be committed to any of the AUTHORITY'S Projects by written agreement (hereinafter the "Committed Waste") at any of the **[*66]** following [Wheelabrator] or [Wheelabrator-affiliated] facilities: Lisbon, Connecticut, Bridgeport, Connecticut, Peekskill, New York, Millbury, Massachusetts, and North Andover, Massachusetts. . . . This obligation shall extend to any deliveries of such Committed Waste by private haulers where the AUTHORITY or SCRRA have contracts with municipalities requiring the delivery of all waste within those municipalities. . . .
> The AUTHORITY shall not accept and shall in fact reject deliveries of any waste known to the AUTHORITY to be committed to projects operated by [the Wheelabrator defendants] by written agreement with any Connecticut municipality . . . . This obligation shall extend to any deliveries of such . . . waste by private haulers where [the Wheelabrator defendants] have contracts with municipalities requiring the delivery of all waste within those municipalities. . . .
>
> B. Notification to Reject Waste. If the AUTHORITY notifies . . . [Wheelabrator] at any time that it reasonably believes . . . that an **[**18]** identified hauler or one or more of its Affiliates is delivering Committed Waste to any [Wheelabrator] facility, then [Wheelabrator] shall refuse to accept such delivery of waste from such hauler or its Affiliate. . . . If on three occasions in any three-month period the AUTHORITY so identifies a hauler or its Affiliates delivering Committed Waste to any [Wheelabrator] Facility, and the identified deliveries are not so certified by an independent person, or if on three occasions in any three-month period, the AUTHORITY provides reasonably evidence that waste from a transfer station that has accepted Committed Waste has been delivered to a [Wheelabrator] Facility, then [Wheelabrator] shall refuse to accept any and all deliveries from such hauler and its Affiliates or from such transfer station, as the case may be, for a period of no less than three months. [5]

[19]** Thus, the settlement agreement requires both CRRA and the Wheelabrator defendants to respect one another's municipal contracts by rejecting deliveries of any waste committed to one another. In addition, if a hauler delivers waste to Wheelabrator facilities three times within a three month period when that waste is committed to CRRA, the Wheelabrator defendants must refuse all deliveries of waste from that hauler for the next three months. Put simply, the settlement agreement bars both parties from accepting diverted waste, and requires the Wheelabrator defendants to shun haulers for three months if they divert committed waste.

In exchange for the agreement, CRRA took steps to withdraw its legal action against the permitting of the Lisbon facility, and agreed that it would take no action to re-enter or re-institute the same or similar proceedings in the future. See Settlement Agreement, Art. VII; *Connecticut Resources Recovery Authority v. Commissioner of the Department of Environmental Protection, 1995 Conn. Super. LEXIS 2564, 1995 WL 548711* at *2 (Conn. Super. Sept. 7, 1995) (noting July 31, 1995 filing of stipulation consenting to dismissal of CRRA's appeal **[**20]** from the DEP decision to permit the opening of the Lisbon facility). CRRA also agreed to "take no further action which

---

[5] The "SCRRA" to which the settlement agreement refers is the Southeastern Connecticut Regional Resources Recovery Authority, a regional resources recovery facility comprised of the towns of East Lyme, Griswold, Groton, Ledyard, Montville, New London, North Stonington, Norwich, Sprague, Stonington, and Waterford.

reasonably could be construed as opposing the permitting, construction or operation of the Lisbon Facility," and to urge other parties engaged in litigation opposing the permitting to similarly withdraw their opposition. Settlement Agreement, Art. VII(C). Moreover, CRRA agreed to join Wheelabrator in seeking the permit, and to urge the other parties to do the same Id.

On May 3, 1996, plaintiffs, ten affiliated waste hauling companies, were notified that they were being "locked out" of the Wheelabrator defendants' facilities pursuant to the settlement agreement, for attempting three times within a three-month period to deliver waste to Wheelabrator facilities when that waste had been committed to CRRA. On May 6, 1996, roughly ten months after the settlement agreement was signed, plaintiffs **[*67]** filed an action against the Wheelabrator defendants in the District of Connecticut, alleging that the settlement agreement violated the antitrust laws. The district court entered an ex parte temporary restraining order, enjoining the defendants from carrying out **[**21]** the agreement, and scheduled a hearing on an order to show cause for May 13, 1996. On that date, CRRA was permitted to intervene in the action as a defendant. Plaintiffs amended their complaint on May 17, 1996, adding a claim that the settlement agreement violated the *Commerce Clause* on the ground that it "unreasonably restrained free trade and interstate commerce." Amended Complaint P 13(h). On August 30, 1996, the complaint was dismissed on the grounds that, even if the settlement agreement was anticompetitive, it was exempt from the Sherman Act under the state action immunity doctrine of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, and because it did not discriminate against or unduly burden interstate commerce.

Discussion

HN1[] We review the grant of a motion under *Fed.R.Civ.P. 12(b)(6)* de novo, and must construe in plaintiffs' favor factual allegations in the complaint. *Allen v. Westpoint-Pepperell, Inc., 945 F.2d 40, 44 (2d Cir. 1991)*. Our consideration, like the district court's, is limited to facts stated on the face of the complaint and in documents appended to the complaint or incorporated in the complaint by reference, **[**22]** as well as to matters of which judicial notice may be taken. Id. ***HN2***[] Dismissal of the complaint is proper only where "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)* (footnote omitted).

A. The Antitrust Cause of Action

Plaintiffs claim that CRRA "developed and maintained a vast system of [waste-to-energy] solid waste management projects, under a Solid Waste Management Plan" that "virtually eliminated" landfilling in favor of waste-to-energy disposal. Amended Complaint P 7. This has allegedly given CRRA a "virtual monopoly over waste incineration and disposal in the State of Connecticut." Id. P 10. Plaintiffs further allege that CRRA and the Wheelabrator defendants then engaged in a "per se Sherman Act violation, by conspiring to maintain the CRRA monopoly via a "total lock-out," or boycott, of the plaintiffs' business "to enforce flow-control contracts between municipalities and CRRA against private haulers . . . [who] were not parties to or bound by those contracts." Brief of Plaintiffs-Appellants **[**23]** at 10, 17; Amended Complaint P 15.

CRRA's "virtual monopoly" over waste disposal is the result of the Connecticut General Assembly's decision, discussed above, to phase out landfills in favor of more environmentally friendly waste-to-energy disposal. Connecticut's Solid Waste Management Plan, which promoted this monopoly, was promulgated not by CRRA, but by Connecticut's Department of Environmental Protection. Indeed, federal law tightened the grip of this "virtual monopoly," by further requiring Connecticut to abandon its landfill system. See 40 C.F.R. pt. 258 (1998) (detailing stricter environmental standards for landfills); Legislative Report at 7 ("One RCRA provision that is having a significant impact on waste management methods in Connecticut and other states requires that landfills meet stricter environmental protection standards or close by October 1, 1993 . . . . A number of landfills, particularly those owned by municipalities, are planning to close rather than institute costly improvements and operating procedures required by RCRA.").

Plaintiffs acknowledge that the source of the monopoly CRRA allegedly enjoys is the Solid Waste Disposal Plan adopted by the DEP pursuant **[**24]** to a legislative directive. Specifically, paragraph seven of the Amended Complaint alleges that

> CRRA has developed and maintained a vast system of solid waste management projects, under a Solid Waste Management Plan, which include waste-to-energy plants and transfer stations. This Plan has abandoned landfilling in favor of transporting waste . . . to trash-to-energy plants for ultimate disposal. By doing so, **[*68]** this Plan has virtually eliminated every available solid waste disposal site in the State of Connecticut in favor of trash-to-energy plaints [sic].

Indeed, the basis of the complaint is not the alleged monopoly, but the settlement agreement to boycott committed waste. See id. P 11.

While plaintiffs allege that this agreement "further tightened the grip" of this monopoly, Plaintiffs' Amended Complaint P 10, it does this, according to plaintiffs' own characterization, merely to ensure that CRRA receives the benefit of the municipal waste disposal contracts that CRRA had lawfully acquired. Brief of Plaintiffs-Appellants at 17 (arguing that CRRA entered into the agreement with the Wheelabrator defendants "to enforce flow-control contracts **[**25]** between municipalities and CRRA").

The defendants' motion to dismiss the antitrust cause of action relied solely on the state action immunity defense and did not challenge the complaint on the ground that it was otherwise insufficient to allege a violation of the Sherman Antitrust Act. Under these circumstances, we too assume the sufficiency of the antitrust cause of action, and follow the practice of deciding the state action immunity defense ahead of the substantive antitrust issue. See 1 P. Areeda & H. Hovenkamp, ***ANTITRUST LAW*** P 224, at 407 (1997).

1. The State Action Immunity Defense

In *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, the Supreme Court first articulated what has become known as the state action defense to the Sherman Act. We need not examine here the entire gloss that the Supreme Court has added to the Parker doctrine over the last 55 years. Indeed, we need go no further than the Supreme Court's holding in *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*. That case involved Sherman Act claims by and against two electric utility systems **[**26]** operating in Louisiana. The plaintiffs were two cities organized under the laws of the State of Louisiana, which granted them power to own and operate electric utility systems both within and beyond their city limits. The defendants were competitors who filed Sherman Act cross-claims against the two cities, referred to here as the municipal defendants. The latter, invoking the Parker doctrine, moved to dismiss the cross-claims.

The Supreme Court rejected the claim that the municipal defendants were state actors whose anticompetitive conduct was exempt from the Sherman Act, although they did enjoy what may loosely be described as a qualified exemption. Specifically, as Justice Brennan observed, ***HN3***[] "the Parker doctrine exempts only anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions; pursuant to state policy to displace competition with regulation or monopoly public service." *City of Lafayette, 435 U.S. at 413*.

In explaining why municipalities operating a public utility enjoyed immunity only if they acted pursuant to such state policies, Justice Brennan observed that the state action doctrine proceeded **[**27]** from the premise that given our "dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Id. at 421* (quoting *Parker, 317 U.S. at 351*). This policy of deference did not apply to municipalities as a general matter because "cities are not themselves sovereign" and "have not been treated as equivalents of the States themselves." *435 U.S. at 412*.

Moreover, it could not be assumed that actions taken by municipalities "with substantially less than statewide jurisdiction" necessarily reflected state policy. *Id. at 414*. "When cities, each of the same status under state law, are- equally free to approach a policy decision in their own way, the anticompetitive restraints adopted as policy by any one of them, may express its own preference, rather than that of the State. . . . To permit municipalities to be shielded from the antitrust laws in such circumstances would impair the goals Congress sought **[**28]** to achieve by those laws . . . without furthering **[*69]** the policy underlying the Parker 'exemption.'" *Id. at 414-15*.

These concerns required that municipalities satisfy a more stringent test in order to invoke Parker immunity for their anticompetitive behavior. *Id. at 415*. Nevertheless, Justice Brennan explained that "this does not mean . . . that a political subdivision necessarily must be able to point to a specific, detailed legislative authorization before it properly may assert a Parker defense to an antitrust suit." Id. [6] Instead; Justice Brennan articulated a foreseeability standard, holding that "an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found 'from the authority given a governmental entity to operate in a particular area, that the [state] legislature contemplated the kind of action complained of.'" Id. (quoting *City of Lafayette v. Louisiana Power & Light Co., 532 F.2d 431, 434* (5th Cir. (La.) 1976)). See Phillip Areeda, Antitrust Immunity for "State Action" after Lafayette, 95 Harv. L. Rev. 435, 445-46 (1981). **[**29]**

Subsequent cases would refer to City of Lafayette as requiring a "clearly articulated and affirmatively expressed policy" to displace competition. See, e.g., *New Motor Vehicle Bd. v. Orrin W. Fox Co., 439 U.S. 96, 109, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978)* (citing *City of Lafayette, 435 U.S. at 410*); *California Retail Liquor Dealers Assoc. v. Midcal Aluminum, 445 U.S. 97, 104, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)* (same). In the passage cited by these cases, Justice Brennan used this phrase to discuss the scheme at issue in *Bates v. State Bar of Arizona, 433 U.S. 350, 53 L. Ed. 2d 810, 97 S. Ct. 2691 (1977)*, **[**30]** an earlier Supreme Court case, rather than to set the standard for applying the state action exemption to anticompetitive acts by municipal market participants. *City of Lafayette, 435 U.S. at 410*. Nevertheless, the "clear articulation" label is not quite the hurdle that its language suggests, because it has always been construed as synonymous with the foreseeability test articulated above. See, e.g., *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 372-73, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*; *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 39, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)*; *Cine 42nd Street Theater Corp. v. Nederlander Organization, Inc., 790 F.2d 1032*; 1042 (2d Cir. 1986) ("The [Supreme] Court thus indicated the test should be one of foreseeability-whether the legislature could foresee the anticompetitive effects that would follow from the express authority the state had delegated to its cities.").

More significantly, however it is labeled, the City of Lafayette test does not apply to anticompetitive actions undertaken by a State rather than a municipality. On **[**31]** the contrary, it is clear that, if the State of Louisiana, rather than two of its municipalities, had operated the electric utility systems, it would have enjoyed an unqualified exemption from the antitrust laws. See *Cine 42nd Street, 790 F.2d at 1042*; *Limeco, Inc. v. Division of Lime, 778 F.2d 1086 (5th Cir. 1985)*. Indeed, four Justices in City of Lafayette argued that even the municipalities enjoyed such immunity. See *City of Lafayette, 435 U.S. at 427-41* (Stewart, J., dissenting). [7]

[32] 2. CRRA's Status for Parker Immunity Purposes**

CRRA is "a body politic and corporate, constituting a public instrumentality and political subdivision of the state of Connecticut established and created for the performance of an essential public and governmental function." *Conn.Gen.Stat. § 22a-261(a)*. The **[*70]** General Assembly has conferred upon CRRA the power of eminent domain bonding authority, and tax exempt status, *Conn.Gen.Stat. §§ 22a-269*, *22a-270*, *22a-276*, and vested in it "all powers necessary" to carry out its legislatively mandated responsibilities. *Conn.Gen.Stat § 22a-262*. The status

---

[6] Contrary to plaintiffs' arguments, see Brief of Plaintiffs-Appellants at 13-14, the Supreme Court reaffirmed this standard in *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 44, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)* ("Requiring such explicit authorization by the State might have deleterious and unnecessary consequences.").

[7] Only Chief Justice Burger would have required municipalities engaged in proprietary activities to show more than the state authorization required by the City of Lafayette, plurality. See *City of Lafayette, 435 U.S. at 425 n.6* (Burger, C.J., concurring). Nevertheless, he joined the plurality's judgment and the directions of the remand, "because they represent at a minimum what [the Chief Justice believed] we should demand of petitioners." *Id. at 426 n.6*.

of such entities was not directly addressed in City of Lafayette. Nevertheless, there are compelling reasons for concluding that CRRA should be treated as the State itself rather than as a municipality.

Unlike the Cities of Lafayette and Plaquemine, which had "substantially less than statewide jurisdiction," *City of Lafayette, 435 U.S. at 414*, CRRA was created to implement a uniform statewide waste disposal policy. As the Supreme Court of Connecticut observed, after summarizing the legislative scheme creating CRRA that we have already canvassed:

> These **[**33]** statutes evidence a legislative intent to commit the difficult regional problems of solid waste disposal to regional and statewide solution. The legislature could reasonably have determined that only a decision-making body with a mandate to consider the needs of more than one community could adequately balance the competing concerns of various localities within the state. Local zoning regulations . . . which operate to exclude the facilities that the CRRA has found necessary, and the DEP has found environmentally acceptable, frustrate the explicit purposes of the state statutes and are therefore preempted.

Shelton v. Commissioner, of the Department of Environmental Protection, 193 Conn. 506, 518, 479 A.2d 208, 215 (1984) (emphasis added). This is the antithesis of the scheme in City of Lafayette which left "cities, each of the same status under state law, . . . equally free to approach a policy decision in their own way" without any indication that the anticompetitive restraints adopted as policy reflected the State's preferences rather than those of the municipalities. *City of Lafayette, 435 U.S. at 414* (emphasis added).

[34]** CRRA is not only a statewide entity that undertakes state functions," it is "politically accountable to the State, and by extension, to the electorate." *Hess v. Port Authority Trans-Hudson Corp. 513 U.S. 30, 61, 130 L. Ed. 2d 245, 115 S. Ct. 394 (1994)* (O'Connor, J., dissenting). As Justice O'Connor continued in Hess: -

> The critical inquiry, then, should be whether and to what extent the elected state government exercises oversight over the entity. If the lines of oversight are clear and substantial--for, example, if the State appoints and removes an entity's governing personnel and retains veto or approval power over an entity's undertakings--then the entity should be deemed an arm of the State for *Eleventh Amendment* purposes.

Id. See also 1 P. Areeda & H. Hovenkamp, ***ANTITRUST LAW*** P 224, at 411 (1997) ("Presumptively, we would reserve the 'state itself' designation only for government agencies that are both statewide in their jurisdiction and have no particular susceptibility to capture by a particular business group.") (emphasis in original). The issue in Hess was whether a bi-state agency was an arm of the State for *Eleventh Amendment* **[**35]** purposes. The Supreme Court, dividing five to four, held that the decisive factor in determining the agency's status should be the impact of any adverse judgment on the State's treasury, rather than the control exercised by the elected state government. Justice O'Connor's discussion of the latter issue is helpful here, because the degree of control exercised by the State is a critical factor in determining whether the conduct of a state agency is that of "the State itself" for the purposes of the Parker doctrine. *Cine 42nd Street, 790 F.2d at 1044*.

Here, CRRA's 13-member board of directors now includes the Commissioners of Transportation and Economic Development, the Secretary of the Office of the Office of [Policy and Management, four gubernatorial appointees, and six legislative appointees (who may themselves be members of the general assembly). *Conn.Gen.Stat. § 22a-261(b)*. Two of the gubernatorial appointees must be first selectmen, mayors, or managers from Connecticut municipalities, and the other two must be "public members." *Conn.Gen.Stat.* ***[*71]*** *§ 22a-261(c)*. The chairman serves at the pleasure of the Governor, id., and any board member may **[**36]** be removed by the Governor, "for inefficiency, neglect of duty or misconduct in office." *Conn.Gen.Stat. § 22a-261(k)*.

More significantly, CRRA is not simply a statewide agency making policy on its own. Rather, it is a "creature of the General Assembly" of Connecticut, and, "the mechanism of carrying out the concept of a statewide plan of dealing with solid waste." H. Rep. Tr. at 6673 (comments of Rep. Ratchford); Sen. Tr. at 3754 (remarks of Sen. Costello). The Solid Waste Management Plan--CRRA's' basic charter--is promulgated by the Commissioner of Environmental Protection, who must also approve CRRA's annual plan of operations. *Conn.Gen.Stat. § 22a-264*. Indeed, the Commissioner was actually a member of CRRA's board until 1989, when the General Assembly recognized that, because "the role of CRRA changed from developer to operator, the Department's regulatory role had become more significant and must be perceived to fully independent." See Conn. Joint Standing Committee Hearings, Environment, 1989 Sess., p. 2680 (testimony of Leslie Carothers, Commissioner of Environmental Protection).

In contrast to Cine 42nd Street, where we held that New York's Urban Development Corporation **[**37]** ("UDC") "cannot claim that it is the state," because it had "nearly absolute operational autonomy," and because a "high level of participation by the state [was] missing," *Cine 42nd Street, 790 F.2d at 1036, 1044* & n.3, the opposite is true here. While CRRA, like the UDC, has the authority to operate free of the bureaucratic red tape that binds most state agencies, see *Shelton, 193 Conn. at 511-15, 479 A.2d at 211-13*, [8] it lacks "absolute operational autonomy." Instead, its operation is subject to regulation by the Commissioner of Environmental Protection. See *Automated Salvage Transport, Inc. v. Wheelabrator Environmental Systems, Inc., 1996 Conn. Super. LEXIS 2634, 1996 WL 601997*, *5 (Conn.Super. Oct. 8, 1996) (rejecting challenge by plaintiffs to the CRRA-Wheelabrator settlement agreement at issue here under the Connecticut Unfair Trade Practices Act, because "CRRA's plan of operation is administered by the commissioner of environmental protection").

[38]** Under these circumstances, there is a basis for suggesting that its acts should be considered acts of the State of Connecticut, and that the settlement agreement should be exempt from the antitrust laws, without a further finding that the settlement agreement was contemplated by the Connecticut General Assembly "from the authority given [CRRA] to operate in a particular area." *City of Lafayette, 435 U.S. at 415*. We do not, however, decide the case on the ground that CRRA is itself the State of Connecticut, and leave this question open. If CRRA is not the State itself, it is at least a political subdivision of Connecticut, and its alleged anticompetitive behavior is exempt under the City of Lafayette foreseeability standard; either as we "generously" applied that standard to the UDC, or under a more rigorous analysis that Judge Newman suggested would be applied if the anticompetitive conduct there was engaged in by a municipality. *Cine 42nd Street, 790 F.2d at 1049* (Newman, J., concurring).

3. Authorization of the Settlement Agreement

The "anticompetitive conduct" alleged here is an agreement that ensures that CRRA will receive the **[**39]** waste that is committed to it pursuant to long-term contracts with the municipalities it services. CRRA was authorized to enter into these long-term contracts, and they are vital to carrying out CRRA's mandate to conduct its resource recovery operations in a manner "sufficient to provide for the support of the authority and its operations on a self-sustaining basis." *Conn.Gen.Stat § 22a-262[2)*. While the Connecticut General Assembly may not have had the precise terms of this settlement agreement in mind, it is not precluded by the **[*72]** legislative mandate CRRA was given, and it is a reasonably foreseeable consequence of CRRA's specific direction to operate a financially solvent waste-to-energy system. As the Court of Appeals for the Eighth Circuit observed in a closely analogous case:

> We believe that the Iowa legislature did indeed contemplate these restrictions on competition. Chapter 28F expressly authorizes municipalities to finance collective projects by issuing revenue bonds. When ascertaining what was in the minds of the legislators, we cannot ignore the realities of the municipal bond market in the mid 1970's. The legislature surely realized the importance of assuring **[**40]** a source of repayment in order to make the bonds marketable. Common sense and experience suggest that the Iowa legislature must have intended Metro to have the latitude necessary to impose restrictions on competition if Metro believed such restrictions necessary to promote the sale of the bonds. The bond experts had convinced Metro that the restrictions were essential for marketing the bonds. In short, even though the legislation does not speak to the precise question whether restraints of trade could be employed to guarantee the financial vitality of Metro, the comprehensive legislative scheme favoring the development of solid waste facilities demonstrates that the

---

[8] CRRA was given this freedom in 1984 when the General Assembly amended ***Conn.Gen.Stat. § 22a-261(a)*** to provide that CRRA "shall not be construed to be a department, institution or agency of the state." The purpose of this language was to codify case law holding that CRRA was not a state agency subject to Connecticut's Uniform Administrative Procedure Act. See *Shelton, 193 Conn. at 514-15, 479 A.2d at 213*.

> legislature intended the localities to have broad authority to act in furtherance of the legislative mandate. Thus, we believe that the restraint on competition was a "necessary or reasonable consequence" of engaging in the authorized activity of constructing a waste disposal facility with funds raised by revenue bonds.

Central Iowa Refuse Systems, Inc. v. Des Moines Metropolitan Solid Waste Agency, 715 F.2d 419, 427 (8th Cir. 1983), cert. denied, *471 U.S. 1003, 85 L. Ed. 2d 158, 105 S. Ct. 1864 (1985)* **[**41]** (footnote omitted).

The Central Iowa analysis is equally applicable here, and is consistent with our own holding in *Cine 42nd Street, 790 F.2d at 1044-46*. The present case, however, is far stronger than Central Iowa or Cine 42nd Street, because there is a clearly articulated policy of the State of Connecticut to limit competition in the waste-to-energy market in order to protect CRRA's financial integrity.

There is ample evidence, which we have already detailed, that the State of Connecticut intended to replace failing (and illegal) landfills with a state-mandated system coordinated by CRRA. At the very least, the General Assembly contemplated CRRA's potential to displace competition when it passed the implementing legislation over objections that CRRA would simply condemn all of its private competitors. More significantly, the General Assembly's willingness to supplant competition is explicit in its subsequent decision to forbid the construction or expansion of disposal facilities that would create an excess capacity, or demand, for municipal solid waste. Specifically, *Conn.Gen.Stat. § 22a-208d(a)* requires that "the Commissioner of Environmental **[**42]** Protection shall not issue a permit under *section 22a-208a* to construct or expand a resources recovery facility . . . unless said commissioner makes a written determination that such facility . . . is necessary to meet the solid waste disposal needs of the state and will not result in substantial excess capacity of resources recovery facilities." Section 208d(c)(1)(I) similarly requires "[a] demonstration that the throughput capacity of the proposed facility, when combined with the throughput capacity of all other resources recovery facilities . . ., shall not exceed the total throughput capacity of resources recovery facilities . . . needed to process waste generated in the state."

One of the purposes, although not the only purpose, of the certificate of need requirement was concern over the consequences of overbuilding. As Representative Mushinsky, the Chairman of the Environmental Committee, explained in defending the original certification of need legislation that was enacted in 1987:

> Over-building of Resource Recovery Plants[,] which are very expensive to back financially, may cause some plants to be under capacity, and that would cause them to fail financially. It **[**43]** is in the State's best interest not to have any of these plants fail, so we don't wind up being the . . . payer of debt of last resort. It is up to the **[*73]** State to build wisely and not overdo it, so that all these plants make it financially.

30 (H-463) H. R. Proceedings, Pt. 14, 1987 Sess., p. 5094; see also id. at 5084 (explaining that proposed plant would be denied a certificate of need if it would create overcapacity that would result in "stealing waste from other plants, which then put those plants under capacity"); 30 (H-472) H. R. Proceedings, Pt. 23, 1987 Sess., p. 8381 (explaining that related language in former *Conn.Gen.Stat. § 22a-208a* was intended to accomplish similar purpose, and to permit plants to serve only Connecticut's needs).

Moreover, in the very case that gave rise to the settlement agreement, Justice David M. Shea, a retired Justice of the Supreme Court of Connecticut, relied on *§ 22a-208a* in holding that CRRA had standing to challenge the DEP decision to permit the Lisbon facility:

> One of the purposes the legislators probably had in mind in directing the commissioner to consider the capacity of existing [solid waste resources recovery] **[**44]** facilities when making a determination of need was the financial impact of a new competitor for municipal waste, because the state has a significant interest in maintaining the financial viability of these [solid waste resources recovery] facilities operated by CRRA . . . .

Connecticut Resources Recovery Authority v. Commissioner of the Department of Environmental Protection, 1994 Conn. Super. LEXIS 418, 1994 WL 60061, at *4 (Conn. Super. Feb. 16, 1994), appeal dismissed, *233 Conn. 486, 659 A.2d 714 (1995)*. See also Legislative Report at 60 (criticizing decision to permit Lisbon facility and recommending "five-year moratorium on making a written determination of need for a resources recovery facility as provided under *C.G.S. Sec. 22a-208d*"). [9]

[45]** Rather than stifling competition by denying a permit to open the Lisbon facility, however, the settlement agreement merely conditions the opening on Wheelabrator's agreement not to compete for CRRA's contractually committed waste supply. Of course, as plaintiffs argue, the Commissioner of Environmental Protection did not condition the Lisbon permit on Wheelabrator's agreement not to compete for waste contractually committed to CRRA. Nevertheless, CRRA had independent standing to sue to enforce *§ 22a-208d*, and the settlement agreement gave relief that, if otherwise impermissibly anticompetitive, was simply of a lesser magnitude than that explicitly contemplated by the General Assembly.

In the face of this compelling case for the application of the Parker doctrine, plaintiffs rely on language in *Federal Trade Comm'n v. Ticor Title Ins. Co., 504 U.S. 621, 636, 119 L. Ed. 2d 410, 112 S. Ct. 2169 (1992)*, suggesting that "state-action immunity is disfavored)," and essentially ask us to ignore binding Supreme Court and Second Circuit precedent. A careful reading of Ticor shows that neither its holding nor its cautionary language applies to the present case. **[**46]** Ticor was a private price-fixing case which revolved around the degree of active state supervision that was required to justify such anticompetitive behavior by private parties. See *California Retail Liquor Dealers Assoc. v. Midcal Aluminum, 445 U.S. 97, 104-05, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. Indeed, the Federal Trade Commission had conceded that the challenged conduct was foreseeable and contested only the adequacy of the "state participation in the rate setting scheme." *Ticor, 504 U.S. at 639*. Such participation "by governmental actors" was necessary to ensure "that the details of the rates or prices have been established as a product of deliberate state intervention, not simply by agreement among private parties." *Id. at 634-35*.

[*74] More significantly, the Supreme Court expressly limited its holding in Ticor to private "horizontal price fixing under a vague imprimatur in form and agency inaction in fact." *Id. at 639*. After observing that "no antitrust offense is more pernicious than price fixing," the Supreme Court concluded:

> Our decision should be read in light of the gravity **[**47]** of the antitrust offense, the involvement of private actors throughout, and the clear absence of state supervision. We do not imply that some particular form of state or local regulation is required to achieve ends other than the establishment of uniform prices.

Id.

Ticor has no relevance here; the present case does not involve price fixing. Nor is the close supervision test applied in Ticor applicable to state agency conduct. *Cine 42nd Street, 790 F.2d at 1047* (citing *Hallie, 105 S. Ct. at 1720 n.10*). This case is, therefore, an easy one in every respect. There is a compelling argument that CRRA should be treated in the same way as the State of Connecticut for the purposes of the Parker doctrine. More significantly, the settlement agreement meets the "broad test of forseeability [sic]" that plaintiffs acknowledge was adopted in Cine 42nd Street and which their argument would require us to overrule. Brief of Plaintiffs-Appellants at 26. Indeed, even under a soreseeability standard far more narrow than these cases require, the alleged anticompetitive conduct was simply conduct of a lesser magnitude than that authorized by **[**48]** the General Assembly.

Accordingly, the settlement agreement into which CRRA entered with Wheelabrator does not subject it to liability under the Sherman Act. Moreover, our conclusion that CRRA can avail itself of the Parker doctrine also compels the conclusion that the Wheelabrator defendants are shielded from antitrust liability. Subjecting them to antitrust

---

[9] The Lisbon facility itself may have been an issue at the time the certificate of need requirement was first enacted. Richard Adams, who testified against the legislation on behalf of Regional Disposal Systems., Inc., defended the Lisbon proposal against what he perceived as a possible concern that it would process out-of-state waste. Conn. Joint Standing Committee Hearings, Environment, Pt. 2, 1987 Sess., p. 497. Mr. Adams also argued that excess capacity "wouldn's necessarily be a bad idea," because it "might generate some actual competition for tipping fees in Connecticut, reducing the cost to the communities and the industries that are looking to dispose of solid waste." *Id. at 498*.

liability would effectively block CRRA's efforts to carry out its mandate through contracts with private parties. See *Cine 42nd Street, 790 F.2d at 1048* (holding that "private appellees acting in concert with the UDC are also entitled to state immunity. . . . Allowing successful tangential attacks on the UDC's activities through suits against the third parties would effectively block the efforts of the UDC."). See also Southern Motor carriers *Rate Conference, Inc. v. United States, 471 U.S. 48, 56-57, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*.

B. The *Commerce Clause* Cause of Action

HN4[] The *Commerce Clause* provides that "Congress shall have the Power . . . to regulate Commerce with foreign nations and among the several States." *U.S. Const. Art. I., § 8., cl. 3*. A "dormant" or "negative" **[**49]** aspect of this grant of power is that a State's power to impinge on interstate commerce is limited *Hughes v. Oklahoma, 441 U.S. 322, 326, 99 S. Ct. 1727, 60 L. Ed. 2d 250 (1979)*. ***HN5***[] The processing and disposal of solid waste is "commerce" under the *Commerce Clause*. *C & A Carbone, Inc. v. Town of Clarkstown, 511 U.S. 383, 391, 128 L. Ed. 2d 399, 114 S. Ct. 1677 (1994)*; *City of Philadelphia v. New Jersey, 437 U.S. 617, 622, 57 L. Ed. 2d 475, 98 S. Ct. 2531 (1978)*.

The Supreme Court has held that ***HN6***[] the first step in analyzing any law subject to judicial scrutiny under the dormant *Commerce Clause* is to determine whether it "regulates evenhandedly with only 'incidental' effects on interstate commerce, or discriminates against interstate commerce." *Hughes, 441 U.S. at 336*. In this context, "'discrimination' . . . means differential treatment of in-state and out-of-state economic interests that benefits the former and burdens the latter." *Oregon Waste Systems, Inc. v. Department of Environmental Quality, 511 U.S. 93, 99, 128 L. Ed. 2d 13, 114 S. Ct. 1345 (1994)*. ***HN7***[] If a restriction on commerce is discriminatory, **[**50]** it may be applied only if it is "demonstrably justified by a valid factor unrelated to economic protectionism." *Wyoming v. Oklahoma, 502 U.S. 437, 454, 117 L. Ed. 2d 1, 112 S. Ct. 789 (1992)*. In contrast, nondiscriminatory regulations that have only "incidental" effects on interstate commerce are valid unless "the burden imposed on such commerce is clearly excessive in relation to the putative local benefits." *Pike v. Bruce Church, Inc., 397 U.S. 137, 142,* ***[*75]*** *25 L. Ed. 2d 174, 90 S. Ct. 844 (1970)*.

"We have explained that ***HN8***[] the 'incidental burdens' to which Pike refers 'are the burdens on interstate commerce that exceed the burdens on intrastate commerce.'" *Gary D. Peake Excavating Inc. v. Town Bd. of Town of Hancock, 93 F.3d 68, 75 (2d Cir. 1996)* (quoting *USA Recycling v. Town of Babylon, 66 F.3d 1272, 1287 (2d Cir. 1995)*, cert. denied, *517 U.S. 1150, 116 S. Ct. 1452 (1996))*; New York State Trawlers Ass'n v. Jorling, *16 F.3d 1303, 1308 (2d Cir. 1994)*. ***HN9***[] Where a regulation does not have this disparate impact on interstate commerce, then "we must conclude that . . . [it] **[**51]** has not imposed any 'incidental burdens' on interstate commerce that 'are clearly excessive in relation to the putative local benefits.'" *USA Recycling, 66 F.3d at 1288* (quoting *Pike, 397 U.S. at 142*). Thus, the minimum showing required to succeed in a *Commerce Clause* challenge to a state regulation is that it have a disparate impact on interstate commerce. The fact that it may otherwise affect commerce is not sufficient. *66 F.3d at 1287* (rejecting *Commerce Clause* challenge to Town of Babylon's takeover of local garbage market notwithstanding "relatively minor effects on both interstate and local commerce," because it did "not impose any different burdens on nonlocal as opposed to local garbage haulers"). See also *National Paint & Coatings Ass'n v. City of Chicago, 45 F.3d 1124, 1131* (7th Cir.) (Easterbrook, J.), cert. denied, *515 U.S. 1143, 132 L. Ed. 2d 829, 115 S. Ct. 2579 (1995)*.

Plaintiffs' *Commerce Clause* cause of action fails for several reasons. Plaintiffs' claim appears to be a vaguely pleaded effort to invoke the Supreme Court's holding in *C & A Carbone, Inc. v. Town of Clarkstown, 511 U.S. 383, 390, 128 L. Ed. 2d 399, 114 S. Ct. 1677 (1994)*, **[**52]** that an ordinance that deprives out-of-state businesses access to a local market for processing of garbage "discriminates against interstate commerce." In reaching this conclusion, the Supreme Court observed that "what makes garbage a profitable business is not its own worth but the fact that its possessor must pay to get rid of it. In other words, the article of commerce is not so much the solid waste itself, but rather the service of processing and disposing of it." *Carbone, 511 U.S. at 390-91*. The Clarkstown ordinance discriminated with respect to this stream of commerce because "it allowed only the favored operator to process waste that [was] within the limits of the town." *Id. at 391*. The fatal flaw of the ordinance--like those the

Supreme Court had previously struck down--was that it hoarded a local resource . . . for the benefit of local businesses that treated it." *Id. at 392*. Specifically, it "hoarded solid waste, and the demand to get rid of it, for the benefit of the preferred processing facility." Id. This case is not Carbone. The settlement agreement does not prevent out-of-state waste processors from operating **[**53]** in Connecticut or from accepting waste generated there. Nor is the complaint about the differential treatment of in-state and out-of-state waste haulers. Plaintiffs concede here that the agreement does not facially discriminate against interstate commerce. Brief of Plaintiffs-Appellants at 35. While they argue that the settlement agreement has the practical effect of doing so, this argument cannot survive careful scrutiny. The status quo ante, which plaintiffs seek to have restored by enjoining enforcement of the settlement agreement, was one in which waste produced in Connecticut was processed in Connecticut. The local waste would remain in state because the overcapacity in Connecticut created such a competitive spot market that it actually attracted significant waste from out-of-state producers, Legislative Report at 17 ("About one half . . . the 651,000 tons of spot waste delivered to CRRA facilities in FY 93 came from generators located outside of Connecticut."); and because waste-to-energy plants located in Connecticut are inherently more attractive for Connecticut waste haulers, who do not have to incur additional transportation costs and delay. See Reply Brief of Plaintiffs-Appellants **[**54]** at 21 n.10.

Under these circumstances, it is not surprising that the specific damage plaintiffs allege they suffered as a result of the settlement agreement is that they "have been **[*76]** forced to travel longer distances, expend additional and unnecessary wear and tear on their vehicles, pay additional wages and overtime, devote substantial efforts to reroute their trucks, suffer delay and harassment, and pay higher prices for waste disposal" than they otherwise would have incurred. Amended Complaint P 14.

Plaintiffs do not allege that, but for the settlement agreement, they would haul waste to processors out-of-state. On the contrary, they expressly disclaim any desire to do so. Reply Brief of Plaintiffs-Appellants at 21 n.10 ("Article VI [of the settlement agreement] presents plaintiffs with an anticompetitive ultimatum: deliver as CRRA chooses in Connecticut, or incur increased travel costs transporting waste out of state."). Indeed, the equitable relief plaintiffs seek is simply the freedom to deliver waste as they choose inside Connecticut, rather than the freedom to push it -into the stream of interstate commerce.

Thus, the practical effect of the settlement agreement, **[**55]** as plaintiffs' complaint and arguments here confirm, is to control the intrastate flow of a particular segment of waste generated in Connecticut between CRRA and the Wheelabrator defendants (who are incorporated in Delaware and have their principal place of business in New Hampshire). This particular segment of waste is committed to them by contracts for which out-of-state processors could have bid. Like the automobile hulks in *Hughes v. Alexandria Scrap Corp., 426 U.S. 794, 49 L. Ed. 2d 220, 96 S. Ct. 2488 (1976)*, the in-state processing of which was subsidized by the State of Maryland, the waste generated in Connecticut remains in Connecticut "in response to market forces." *Id at 810*.

We do not suggest that the settlement agreement may not have some effect on interstate commerce. Specifically, the Wheelabrator defendants not only agreed to refuse committed waste at their Connecticut facilities, but also agreed to refuse committed waste at their inconveniently located waste-to-energy plants in Peekskill, New York (on the Hudson River, Millbury, Massachusetts (near Worcester), and Andover, Massachusetts (near New Hampshire). The Wheelabrator **[**56]** defendants also agreed to turn away for a three-month period all waste delivered, whether it is committed or not, by haulers who attempted to deliver committed waste three times in the preceding three months.

The provision requiring the three-month exclusion of uncommitted waste at Wheelabrator's three out-of-state facilities does not appear to be of any practical consequence, because the settlement agreement does not restrict plaintiffs from depositing this waste at the spot market rate in four of the six waste-to-energy plants inside Connecticut. Under the circumstances, it would be counter to plaintiffs' expressed economic interest to incur the additional expense of hauling uncommitted waste to distant locations outside of Connecticut.

Nevertheless, there is one scenario in which Wheelabrator's agreement to turn committed waste away from its three out-of-state facilities would affect interstate commerce. If Wheelabrator only turned plaintiffs away from its Connecticut facilities, it is possible that plaintiffs could profitably dispose of the committed Connecticut waste at

Wheelabrator's out-of-state facilities, albeit at a smaller profit. The claim that this constitutes an **[**57]** "incidental" burden on interstate commerce sufficient to invoke the Pike balancing standard, however, ignores the reason why plaintiffs would have any reason to haul committed waste outside of Connecticut for processing.

Plaintiffs remain free to deposit committed waste at CRRA and Wheelabrator waste-to-energy facilities in Connecticut by paying the contractually arranged tipping fees. Indeed, even during the three-month "penalty period" during which Wheelabrator is obligated to turn away even waste contractually committed to itself, plaintiffs concede that four of the six trash-to-energy facilities in Connecticut remain available to them, although they would be forced to "pay CRRA's above-market prices for *all* its waste for that time, or close their doors." Brief of Plaintiffs-Appellants at 7 (emphasis in original). The need, if any, to haul waste outside of Connecticut derives from plaintiffs' desire to obtain cheaper tipping fees than those available in **[*77]** Connecticut because of the settlement agreement.

The settlement agreement may very well affect commerce if it forces plaintiffs to haul committed waste from Connecticut to out-of-state processors. Nevertheless, **[**58]** because it cannot be said that "the flow of interstate commerce will be reduced, and thereby burdened," *USA Recycling, 66 F.3d at 1287*, the settlement agreement "has not imposed any 'incidental burdens' on interstate commerce that 'are clearly excessive in relation to the putative local benefits.'" *Id. at 1288* (quoting *Pike 397 U.S. at 142*). On the contrary, assuming that plaintiffs can still earn a profit by hauling committed waste for processing outside of Connecticut, the net effect of the settlement agreement is to increase the use of out-of-state processors for committed waste, even if three of Wheelabrator's out-of-state facilities will be closed to plaintiffs. [10] Indeed, this is presumably what plaintiffs have been doing since the settlement agreement was executed. See Amended Complaint P 14.

[59]** Moreover, even if the settlement agreement did have an "incidental effect" on interstate commerce, it is doubtful that plaintiffs could show that the burden on interstate commerce "is clearly excessive in relation to the putative local benefits." *Pike, 397 U.S. at 142*. Here, the putative local benefit is the preservation of CRRA's interest in "the security and integrity of contractual relations" into which it has entered with local municipalities. 2 Fowler V. Harper, Fleming James, Jr. & Oscar S. Gray, THE LAW OF TORTS § 6.5, at 302 (2d ed. 1986). Indeed, the particular contracts at issue here are sufficiently critical to the operation of an effective solid waste disposal system that Congress has specifically provided that "no State or local government within the State shall be prohibited under State or local law" from entering into them. *42 U.S.C. § 6943(a)(5)*.

On the other side of the scale, plaintiffs have not alleged or suggested facts that establish that any incidental effect that the settlement agreement may have on interstate commerce is excessive in relation to the benefit achieved. Instead, their only argument with respect to **[**60]** the Pike standard is that the settlement agreement is unreasonable because plaintiffs are not parties to the municipal contracts that CRRA seeks to keep free from plaintiffs' interference. Brief of Plaintiffs-Appellants at 40-41. This argument confuses the burden of the settlement agreement on plaintiffs with a burden on interstate commerce. Cf. *Exxon Corp. v. Governor of Maryland, 437 U.S. 117, 126, 57 L. Ed. 2d 91, 98 S. Ct. 2207 (1978)* ("The fact that the burden of a state regulation falls on some interstate companies does not, by itself, establish a claim of discrimination against interstate commerce.") . Since any effort to prevent a third party from interfering with a contract must be directed at that third party, the settlement agreement is not invalid solely for that reason, even if it affects interstate commerce. In sum, as Judge Easterbrook recently put it: "No disparate treatment, no disparate impact, no problem under the dormant *commerce clause*." *National Paint & Coatings, 45 F.3d at 1132*.

Nor is the settlement agreement invalid per se "because it has the practical effect of regulating commerce occurring wholly outside" the **[**61]** borders of the State of Connecticut. Brief of Plaintiffs-Appellants at 36. The *Commerce Clause* "precludes the application of a state statute to commerce that takes place wholly outside of the State's

---

[10] The complaint does not make clear why plaintiffs cannot use out-of-state facilities and transfer stations other than the three Wheelabrator waste-to-energy plants. See *Sal Tinnerello & Sons, Inc. v. Town of Stonington, 141 F.3d 46, 49 (2d Cir. 1998)* (discussing deposits of Connecticut waste at transfer stations in Rhode Island); Legislative Report Appendix A (noting migration of some Connecticut waste "to out-of-state landfills").

borders, whether or not the commerce has effects within the State." *Edgar v Mite Corp., 457 U.S. 624, 642-43, 73 L. Ed. 2d 269, 102 S. Ct. 2629 (1982)* (emphasis added). As the Supreme Court continued in Edgar:

> The limits on a State's power to enact substantive legislation are similar to the limits on the jurisdiction of state courts. In either case, "any attempt" 'directly' to assert extraterritorial jurisdiction over persons or property would offend sister **[*78]** States and exceed the inherent limits of the State's power."

Id. at 643 (quoting *Shaffer v. Heitner, 433 U.S. 186, 197, 53 L. Ed. 2d 683, 97 S. Ct. 2569 (1977))*.

This case does not involve a direct assertion of the legislative power of the State of Connecticut to regulate conduct outside of its borders. Instead, it involves an agreement by Wheelabrator to refuse plaintiffs' delivery of waste at its New York and Massachusetts facilities. While the **[**62]** agreement affects the conduct of the Wheelabrator defendants outside of Connecticut, it is the antithesis of "direct" regulation of the kind that is per se invalid. Indeed, the analogy the Supreme Court drew in Edgar to the territorial limits on the jurisdiction of state courts is equally apposite here.

Although the State of Connecticut is without power to directly legislate restrictions on Wheelabrator's freedom to conduct business in New York and Massachusetts, the *Commerce Clause* does not act as an inflexible bar against Wheelabrator's agreement to place certain restrictions on its activities there. Of course, the fact that Wheelabrator and CRRA have entered into an agreement does not necessarily insulate it from scrutiny under the *Commerce Clause*. See *South-Central Timber Development, Inc. v. Wunnicke, 467 U.S. 82, 97 n 10, 99, 81 L. Ed. 2d 71, 104 S. Ct. 2237 (1984)*. While we discuss this scrutiny in the context of the market participant doctrine, here it suffices to say that such analysis would not require the per se invalidation of the settlement agreement that plaintiffs seek.

2. Status of CRRA as a Market Participant

This brings us to **[**63]** the complete defense CRRA asserts against plaintiffs' *Commerce Clause* claim. Specifically, CRRA argues that because the settlement agreement was negotiated by two market participants, any undue burden the agreement imposes on interstate commerce does not implicate the *Commerce Clause*. ***HN10***[] Under the market participant doctrine, which distinguishes between the direct exercise of a State's sovereign powers and a State's actions in the more general capacity of a market participant, only the former actions are subject to the limitations of the dormant *Commerce Clause*. *New Energy Co. of Indiana v. Limbach, 486 U.S. 269, 277, 100 L. Ed. 2d 302, 108 S. Ct. 1803 (1988)*. Thus, for example, when a State chooses to manufacture and sell cement, its business methods, including those that favor its residents, are of no greater constitutional concern than those of a private business. See *Reeves, Inc. v. Stake, 447 U.S. 429, 438-439, 65 L. Ed. 2d 244, 100 S. Ct. 2271 (1980)*.

The long-term waste disposal contracts that CRRA has negotiated with Connecticut municipalities as a vendor of waste disposal services are clearly market participation. See *USA Recycling, 66 F.3d at 1272*; **[**64]** *SSC Corp. v. Town of Smithtown, 66 F.3d 502 (2d Cir. 1995)*, cert. denied, *516 U.S. 1112, 517 U.S. 1150, 133 L. Ed. 2d 842, 116 S. Ct. 911 (1996)*. The CRRA-Wheelabrator agreement to protect these contracts from interference by plaintiffs similarly involves the conduct of market participants, rather than the kind of regulatory power exercised by the State as a sovereign. Indeed, plaintiffs argue that CRRA "is without regulatory powers." Brief of Plaintiffs-Appellants at 10.

Moreover, the Commissioner of Environmental Protection, who had the power to decline to permit the Lisbon facility, did not condition his permit decision on Wheelabrator's consent to the terms of the settlement agreement. Rather, the settlement agreement arose out of a judicial proceeding in which CRRA was authorized to participate in order to ensure that the judgment of the Commissioner was exercised in a manner consistent with *Conn.Gen.Stat. § 22a-208d(a)*. See *Connecticut Resources Recovery Authority v. Commissioner of the Department of Environmental Protection, 1994 Conn. Super. LEXIS 418, 1994 WL 60061*. The exercise of CRRA's right to obtain judicial review **[**65]** of the Commissioner's determination does not render the subsequent settlement agreement a regulatory act of the State of Connecticut. Nor do plaintiffs argue to the contrary.

Instead, plaintiffs' only challenge to the market participant defense is that the settlement agreement affects conduct in "the **[*79]** trash hauling market," in which CRRA "is not a participant." Brief of Plaintitfs-Appellants at 42. This artificial dissection of the municipal waste processing market is inconsistent with plaintiffs' claim of "antitrust injury" essential to their standing to press their antitrust cause of action. "The requirement that the alleged injury [to plaintiff] be related to anti-competitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors." *Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1470 (9th Cir. 1985)*; see *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 539, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (denying antitrust standing to party that was "neither a consumer nor a competitor in the market in which trade was restrained").

[66]** This consideration aside, *South-Central Timber Development, Inc. v. Wunnicke, 467 U.S. 82, 81 L. Ed. 2d 71, 104 S. Ct. 2237 (1984)*, upon which plaintiffs rely, does not avail the plaintiffs here. That case involved a state program of selling timber from state-owned forests at a significantly reduced price on the condition that buyers agree to process that timber at in-state facilities prior to export. The Supreme Court held that "although the State may [have been] a participant in the timber market, it [was] using its leverage in that market to exert a regulatory effect in the processing market, in which it [was] not a participant." *Id. at 98*. The Court observed that a private seller of goods would have had no proprietary interest in what the buyer later did with those goods when the seller was not a participant in the downstream market. See *id. at 96*. Because the State retained no proprietary interest in the timber after the point of sale, it could not be considered the market participant in the downstream processing market. Id.

In contrast, here the "article of commerce is not so much the solid waste itself, but rather **[**67]** the service of processing and disposing of it." *Carbone, 511 U.S. at 391*. CRRA is in that business, and it is absurd to suggest that it does not have an interest in obtaining the waste generated by municipalities who have contracted with CRRA to process and dispose of their waste. Moreover, the fact that the settlement agreement protects the integrity of CRRA's municipal contracts by indirectly thwarting the efforts of waste haulers, who were not parties to either the municipal contracts or the agreement itself, does not render it "regulatory" within the meaning of the *Commerce Clause*. ***HN11***[] When it acts as a market participant, a state agency may "impose restrictions that reach beyond the immediate parties with which the government transacts business." *White v. Massachusetts Council of Construction Employers, 460 U.S. 204, 211 n.7, 75 L. Ed. 2d 1, 103 S. Ct. 1042 (1983)*. Indeed, the Supreme Court has held that "the *Commerce Clause* does not require the [State] to stop at the boundary of formal privity of contract." Id.

HN12[] Only if the actions of a State, "whether by statute, regulation, or contract," have a "substantial regulatory effect outside of **[**68]** the particular market" in which the State is a participant, do they offend the dormant *Commerce Clause*. *South-Central Timber, 467 U.S. at 97*. This case does not cross that line.

The waste haulers here are essential participants in the waste processing and disposal market; they pick up waste from municipalities who are contractually to have it delivered to CRRA for disposal. The settlement agreement's impact on plaintiffs is simply a necessary consequence of CRRA's right to contractually procure a supply of municipal waste.

C. The Alleged Inconsistency Between the Antitrust and *Commerce Clause* Defenses

Plaintiffs' final argument is that CRRA cannot claim both the market participant exception from the *Commerce Clause* and state action immunity from the antitrust laws. Such a dual exception, plaintiffs argue, "would unfairly permit CRRA to compete as a private party without being subject to antitrust liability like private parties." Brief of Plaintiffs-Appellants at 46. In *SSC Corp., 66 F.3d at 517-18*, we expressly rejected the argument that, if the challenged contractual agreement entered into by the Town of **[*80]** Smithtown constituted **[**69]** market participation, rather than regulation, the Town could not avail itself of the state action immunity from the Sherman Act. Nevertheless, plaintiffs argue that we did so without "directly address[ing] the potential conflict between the market participant exception to the dormant *commerce clause*, on the one hand, and state action immunity to antitrust laws, on the other." Brief of Plaintiffs-Appellants at 48 n.13.

We see no reason to question the soundness of our holding in SSC. Corp., nor do we perceive "a potential conflict" between the Parker and market participant doctrines that would automatically render a market participant a regulator of interstate commerce, even though it lacked any regulatory power, if it invoked the Parker exemption from antitrust scrutiny. The unfairness plaintiff perceives derives from giving undue weight to one of the policies underlying the market participant doctrine. In *Reeves v. Stake, 447 U.S. at 439*, the Supreme Court suggested that because "state proprietary activities may be, and often are, burdened with the same restrictions imposed on private market participants[,] . . . [e]venhandedness suggests that, **[**70]** when acting as proprietors, States should similarly share existing freedoms from federal constraints, including the inherent limits of the *Commerce Clause*." Plaintiffs argue that, because CRRA has invoked the Parker immunity doctrine, which shields CRRA from the antitrust laws "imposed on private market participants," CRRA may not invoke the principle of "evenhandedness" elucidated in Reeves.

Were evenhandedness the only rationale supporting the market participant doctrine, plaintiffs' argument might have some merit. The Reeves Court, however, identified several policy considerations underlying the market participant doctrine that largely mirror those underlying the Parker immunity doctrine. The most important of these rationales is that of "state sovereignty, [and] the role of each State 'as guardian and trustee for its people.'" *Reeves, 447 U.S. at 438* (citations and footnotes omitted). The Supreme Court observed that an "ad hoc" inquiry into the burden on interstate commerce caused by a state's marketplace activities "would unduly interfere with state proprietary functions if not bring them to a standstill." *Id. at 438 n.10* **[**71]** (quoting *American Yearbook Co. v. Askew, 339 F. Supp. 719, 725 (M.D.Fla. 1972))*. Indeed, the Court noted that, even where the State's actions in the marketplace did not involve "integral operations in areas of traditional government functions," the State still "may fairly claim some measure of a sovereign interest in retaining freedom to decide how, with whom, and for whose benefit to deal." Id. The Reeves Court concluded that because "the competing considerations in cases involving state proprietary action often will be subtle, complex, politically charged, and difficult to assess under traditional *Commerce Clause* analysis[,] . . . the adjustment of interests in this context is a task better suited for Congress." *447 U.S. at 439*.

Thus, like the Parker doctrine, the market participant doctrine reflects at its core a respect for state sovereignty. See *Parker, 317 U.S. at 350-51*. Indeed, after rejecting the Sherman Act claim in Parker, the Supreme Court rejected a *Commerce Clause* challenge, citing almost identical federalism concerns. *Id. at 362-63*. As Chief Justice Stone wrote in Parker:

> When **[**72]** Congress has not exerted its power under the *Commerce Clause*, and state regulation of matters of local concern is so related to interstate commerce that it also operates as a regulation of that commerce, the reconciliation of the power thus granted with that reserved to the state is to be attained by the accommodation of the competing demands of the state and national interests involved.

Id. at 362. While Parker did not involve the market participant exception, it is clear that this doctrine is one example of the means by which the Supreme Court has accommodated the federalism concerns articulated in Parker.

This accommodation would be undermined by a rule that would automatically prevent its beneficiaries from availing themselves of the **[*81]** Parker doctrine exemption from the Sherman Act. The only support for plaintiffs' argument is a passing suggestion of a "possible market participant exception" to the Parker immunity doctrine. *Omni Outdoor Advertising, 499 U.S. at 379* ("We reiterate that, with the possible market participant exception, any action that qualifies as state action is ipso facto . . . exempt from **[**73]** the operation of the antitrust laws." (punctuation and citation omitted)." Whether such an exception in fact existed and what its scope would be, the Court did not say." 1 P. Areeda & H. Hovenkamp, ***ANTITRUST LAW*** P 224, at 443 (1997).

More significantly, it is difficult to reconcile such an exception to the Parker doctrine with City of Lafayette in which eight Justices favored at least a qualified exemption from the antitrust laws for a municipal market participant. Indeed, in *Paragould Cablevision v. City of Paragould, 930 F.2d 1310 (8th Cir. 1991)*, cert. denied, *502 U.S. 963,* *116 L. Ed. 2d 450, 112 S. Ct. 430 (1992)*, the Court of Appeals for the Eighth Circuit declined an invitation to create the market participant exception to the Parker doctrine that the Omni Court suggested was "possible." Specifically, the Court of Appeals held that "the market participant exception is merely a suggestion and is not a rule of law." *Id. at 1313*. "Until such a transformation occurs," it would continue to apply the City of Lafayette standard for determining whether a municipal market participant was exempt from the Sherman **[**74]** Act. Id. We, too, see no reason to depart from our prior rejection of the same claim raised by plaintiffs here. *SSC. Corp., 66 F.3d at 517-18*. See also *Four T's, Inc. v. Little Rock Municipal Airport Comm'n, 108 F.3d 909 (8th Cir. 1997)*; *Limeco v. Division of Lime, 778 F.2d at 1087*; *James Emory, Inc. v. Twiggs County, 883 F. Supp. 1546, 1562 (M.D.Ga. 1995)*; *LeFrancois v. Rhode Island, 669 F. Supp. 1204, 1212 (D.R.I. 1987)*; *Transport Limousine of Long Island, Inc. v. Port Authority of New York and New Jersey, 571 F. Supp. 576, 588 (E.D.N.Y. 1983)*.

Conclusion

Over a quarter of a century ago, Connecticut developed a scheme for disposing of trash in a way that the private market was then unwilling or unable to undertake. Because we see no merit to plaintiffs' Sherman Act and *Commerce Clause* challenges to the exceedingly limited steps taken by CRRA to preserve its lawfully acquired contracts from interference, we affirm the order of the district court dismissing the complaint.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN1[] **Trials, Judgment as Matter of Law**

The court may grant judgment as a matter of law under *Fed. R. Civ. P. 50* only when there is no legally sufficient evidentiary basis for a reasonable jury to find for that party on that issue.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN2[] **Private Actions, Standing**

Antitrust rights are assignable.

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **US Department of Justice Actions, Criminal Actions**

The standard for proving antitrust damages is quite lenient. It is very difficult to prove antitrust damages, and an exacting burden of proof would render nugatory the value of private enforcement of the antitrust laws and would reward antitrust violators for particularly egregious conduct. As a result, the burden for establishing the amount of antitrust damages is relaxed. Under this relaxed burden, a jury verdict may stand on less evidence than is normally required to support a damage award in civil cases. While rank speculation will not be tolerated, evidence sufficient to support a just and reasonable inference of damages suffices.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Price Fixing & Restraints of Trade, Vertical Restraints**

A vertical restraint is not illegal per se unless it includes some agreement on price or price levels.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN7[] **Regulated Practices, Price Fixing & Restraints of Trade**

The essential factor for determining whether a defendant's actions will be found to be an unreasonable restraint of trade is whether the challenged restraint enhances or reduces competition. The Fifth Circuit has stated that the competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. The purpose of the analysis is to form a judgment about the competitive significance of the restraint. It is the factfinder who must weigh these various factors.

Opinion

MEMORANDUM OPINION

This case involves claims that the defendants, youth and adult amateur outdoor soccer organizations in the Midland/Odessa area, conspired with their players and coaches to carry out a group boycott of plaintiff's facility, the Permian Basin Sports Center. Plaintiff alleged that defendants' activities constituted an illegal restraint of trade in violation of the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.* A jury trial was held from February 16-27, 1998. The jury found for the plaintiff on each **[*2]** of plaintiff's claims, and awarded $ 100,000 in damages. Now before the

Court is defendants' Motion for Judgment as a Matter of Law, filed February 23, 1997. Plaintiff subsequently field a response to the motion, and defendants fild a reply. For the reasons set out below, defendants' motion is DENIED, and the jury's verdict shall stand.

A. Standard

HN1[] The Court may grant judgment as a matter of law under *Federal Rule of Civil Procedure 50* only when "there is no legally sufficient evidentiary basis for a reasonable jury to find for that party on that issue." Because a jury verdict has been returned in this case, the Court may allow that judgment to stand, order a new trial, or direct entry of judgment as a matter of law.

Defendants make four basic arguments in support of their Motion. They will be discussed in turn below.

B. Plaintiff's Antitrust Standing

1. Connection Between Antitrust Violations and Harm to Plaintiff--Defendants' first argument is that plaintiff, Eleven Line Inc., is not a successor-in-interest or assignee of Seven Line, Inc. Seven Line is the California corporation that owned and operated the Permian Basin Sports Center ("Permian Basin") during **[*3]** November and December of 1995, the time period in which the alleged violations occurred. Eleven Line, a Texas corporation, purchased the corporate assets of Seven Line but, defendants argue, this purchase did not also transfer potential antitrust causes of action to Eleven Line.

Plaintiff's response is persuasive. ***HN2***[] Antitrust rights are assignable. [1] Eleven line's purchase of Seven Line caused a complete and total transfer of all corporate assets of Seven Line, including any potential rights of action such as the pending antitrust claims. [2] Seven Line did not retain any rights or assets at all. The assignment document, dated December 12, 1995 (pl.'s ex. 406), states that "Seller shall convey, transfer and assign to Purchaser . . . all tangible and intangible assets of Seven Line, Inc. [and] any claims, choses in action, goodwill and other intangible interests in the business of Seven Line, Inc."

[*4] This document may not be phrased in the exact language that has previously been recognized by courts as transferring antitrust claims, [3] but it was clearly intended to transfer all rights and claims, including antitrust claims. Tom Higginson, the president of both Seven Line and Eleven Line, testified that he intended to have the antitrust rights transferred by this document. Furthermore, on February 24, 1997, the president of Seven Line and all of the shareholders executed a "Confirmation of Conveyance of Interests and Rights" (pl.'s ex. 201). This confirmation specifically confirms that the conveyance of Permian Basin included the assignment of "all causes of action, claims and demands of whatsoever nature, including any claims arising from the operations of Permian Basin Sports Center and including but not limited to any claims arising under the state and federal ***antitrust law***." Plaintiff is therefore the proper successor-in-interest to bring the instant case.

[*5] Defendants also argue that there was no evidence to show there was a causal link between defendants' actions and plaintiff's injury; specifically, that there was no evidence of a common agreement or understanding among any of the players, coaches, referees and the defendants. This is a question of whether or not plaintiff

---

[1] *See Martin v. Morgan Drive Away, Inc., 665 F.2d 598, 603 n.3 (5th Cir. 1982)*.

[2] Both cases cited by defendants involved transfers of particular, limited assets. The transferors desired to bring antitrust actions, but the defendants argued that the right to do so had been transferred to others. The factual situations are not, therefore, particularly parallel. *See Sullivan v. National Football League, 34 F.3d 1091, 1106 (1st Cir. 1994)*; *Gulfstream III Assoc., Inc. v. Gulfstream Aerospace Corp., 995 F.2d 425, 431, 437-40 (3rd Cir. 1993)*.

[3] *See, e.g., Sullivan, 34 F.3d at 1106*.

presented sufficient evidence on a particular issue, which is a factual determination for the jury. In this instance the jury found that there was evidence of such an agreement, and that the agreement caused harm to the plaintiff. There were sufficient facts alleged for the jury to reach this conclusion. There is no reason to set aside the verdict on this question.

2. Speculative Damages--Second, defendants argue that plaintiff did not provide evidence to establish lost profits as a measure of plaintiff's damages. In particular, defendants point to the fact that Permian Basin did not make a profit in the five years of its operation prior to the alleged antitrust violations. Defendants also challenge the methodology of plaintiff's expert, who calculated the projected "net cash flow" of Permian Basin for years 6-15 of its operation, by using a revenue growth **[*6]** curve derived from the first five years of operation of similar facilities. This comparison is not merely apples and oranges, they claim, but "lemons and broccoli."

HN3[] The standard for proving antitrust damages is quite lenient. The Fifth Circuit has repeatedly stated that it is very difficult to prove antitrust damages, and that an exacting burden of proof would "render nugatory the value of private enforcement of the antitrust laws and would reward antitrust violators for particularly egregious conduct." [4] As a result, the burden for establishing the amount of antitrust damages is relaxed. "Under this relaxed burden, a jury verdict may stand on less evidence than is normally required to support a damage award in civil cases. While rank speculation will not be tolerated, evidence sufficient to support a just and reasonable inference of damages suffices." [5]

[*7] The owner of plaintiff company, Tom Higginson, testified on the performance of Permian Basin, as well as the performance of other similar companies. He also testified about his plans to increase income at the facility. An expert witness supported Mr. Higginson's estimates, and presented his method for evaluating future profits based on the performance of similar facilities. Defendants made their arguments challenging the sufficiency of evidence on damages to the jury, [6] but did not put on an opposing expert to challenge plaintiff's methodology. Evaluating the claims and the evidence, the jury concluded that plaintiff should be awarded $ 100,000 in actual damages. This verdict was not based on speculation alone, so it will not be set aside.

C. Sherman Act Section One

1. Group Boycott--In their first argument against plaintiff's Section One claim defendants argue that as a matter of law there was no group boycott. This Court previously held in its **[*8]** ruling on defendants' Motion to Dismiss that the three defendants constituted a single entity for purposes of Sherman Act analysis. [7] That opinion went on to uphold plaintiff's allegations that defendants entered into a combination or conspiracy with each other and with their registered players and coaches to restrain competition. The players and coaches can be participants in the unlawful conspiracy even if they acted unwillingly and without any intention to harm competition. [8]

In their motion for judgment as a matter of law, defendants reallege the same arguments that the players and coaches cannot participate in a group boycott as a matter of law because they are a single unit with defendants, or

[4] *See* *Pierce v. Ramsey Winch Co., 753 F.2d 416, 434 (5th Cir. 1985)*.

[5] *Id. at 435* (internal quotation marks and citations omitted); *see also* *Lehrman v. Gulf Oil Corp., 464 F.2d 26, 46 (5th Cir. 1972)* ("In short, the law is clear: the courts are to take a charitable view of the difficulties of proving damages in a case when a treble-damage plaintiff must try to prove what would have accrued to him in the absence of the defendant's anticompetitive practice.") (citing *Cherokee Lab., Inc. v. Rotary Drilling Servs., Inc., 383 F.2d 97, 106 (5th Cir. 1967))*.

[6] *See* *Pierce, 753 F.2d at 441*.

[7] *See* *Eleven Line, Inc. v. North Texas State Soccer Ass'n, 1998 U.S. Dist. LEXIS 581, 1998 WL 25566*, at *2 (N.D. Tex. Jan 13, 1998).

[8] *See id.* at *3.

because they have no economic interest in harming competition. The players and coaches do not form a single entity with defendants. As **[*9]** stated in the earlier opinion, "they do not form a single economic unit, they do not have a complete unity of interest, and defendants do not have ultimate control over the players' and coaches' actions." [9]

The second component of defendants' argument is that the players and coaches are the ultimate consumers of defendants' products, and do not stand to profit financially from the defendants' alleged anticompetitive acts. Thus, defendants state, as a matter of law they cannot participate in a conspiracy. There is no case law to support this argument. The cases cited by defendants are not analogous. In *NAACP v. Claiborne Hardware Co., 458 U.S. 886, 914-915, 73 L. Ed. 2d 1215, 102 S. Ct. 3409 (1982)* the Supreme Court held that because ***HN4***[] the boycotters were politically rather than economically motivated, their behavior was protected from the application of the Sherman Act by the *First Amendment* and the *Noerr-Pennington* Doctrine. Similarly, **[*10]** in *Missouri v. National Organization for Women, 620 F.2d 1301, 1315-16 (8th Cir. 1980)*, the court held that ***HN5***[] the injury of a non-competitor by another non-competitor who carried out a boycott for political reasons was not a violation of the Sherman Act. [10] Defendants' actions in this case were not motivated by political interests, and do not fall under the protection of the *Noerr-Pennington* Doctrine. Contrary to defendants' assertions, the cited cases do not stand for the proposition that consumers with no potential financial benefit from the boycott can never participate in a conspiracy in violation of the Antitrust Act.

Therefore, there is no need to consider the lack of economic motive of the players and coaches. Even without such an economic motive, they are still capable of **[*11]** willingly or unwillingly participating in the alleged illegal restraint of trade. They did so to protect other, non-financial interests, namely their ability to play in defendants' outdoor soccer leagues, the only outdoor leagues in the region. [11] Because the other participants in the conspiracy (defendants) had a financial interest in lessening competition, the Court finds that this claim was sufficiently alleged to go to the jury, which subsequently found that there had been an illegal conspiracy among defendants and their players and coaches.

[*12] 2. Injury to Competition--Defendants' next argument is that the plaintiff did not present any evidence of harm to competition, but only of harm to its own business. Rather than harming competition, they argue, Rule II promotes the sport of soccer and makes it an effective competitor against other activities available to adults and children. [12] Plaintiff did present evidence that Rule II decreased competition in the market for amateur soccer in Midland/Odessa. Specifically, Rule II decreases the options available to consumers. Owners and operators of other indoor soccer arenas also testified that Rule II did not make soccer a superior product, but did force them to join the defendant organizations, out of economic necessity and against their wishes. The Court finds that there was sufficient evidence of damage to competition to uphold the jury's verdict on this issue.

3. Per Se Violation--Defendants next reassert **[*13]** an argument that was previously made in their Motion to Dismiss. They say that the alleged conspiracy was a vertical non-price restraint, and that as such, it cannot constitute a per se violation of Section One of the Sherman Act. In ruling on the Motion to Dismiss, this Court held that the alleged conspiracy *was* a vertical non-price restraint, but that it *did* constitute a per se violation. Relying on

---

[9] *Id.* at *3; *see also* cases cited in n.8, n.9.

[10] Defendants also cite *Allied Tube & Conduit Corp. v. Indian Head, Inc. 486 U.S. 492, 508, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)* for its brief discussion of the *Claiborn Hardware* case.

[11] Courts have upheld Section One claims in a few other cases in which some of the conspirators had interests that were not financial. *See, e.g., Volvo North America Corp. v. Men's Int'l Prof'l Tennis Council, 857 F.2d 55, 71 (2nd Cir. 1988)* (tennis players protecting their ability to play in major tennis competitions); *James Julian, Inc. v. Raytheon Co., 557 F. Supp. 1058, 1064-65 (D. Del. 1983)* (trade association members sought to keep others from hiring a subcontractor (plaintiff) because its employees were represented by a different union); *Feminist Women's Health Ctr. v. Mohammad, 415 F. Supp. 1258, 1267 (N.D. Fla. 1976)* (doctors boycotted a health center that provided abortions).

[12] This argument overlaps with defendants Section Two argument, *see* Section D below.

McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178 (5th Cir. 1972) and Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985), the Court found that defendants' efforts to persuade or coerce customers to boycott plaintiff's competing business constituted a group boycott that was a per se violation of Section One.

Defendants correctly point out, however, that in Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 734, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988), the Supreme Court held that ***HN6***[] "a vertical restraint is not illegal per se unless it includes some agreement on price or price levels." [13] **[*15]** The case involved **[*14]** a situation in which a dealer of Sharp products threatened to break off his relationship with the company unless Sharp terminated the dealership of another dealer in the same area who was cutting prices and hurting the first dealer's business. Sharp agreed and terminated the price-cutting dealer. The *Business Electronics* case thus dealt with facts that were very different from those of the case at hand, and this Court is not entirely persuaded that the reasoning applied there would lead to the same conclusion in this case. [14] The Supreme Court's holding, however, is very broadly written, and seems to bind this Court's decision. For that reason, this Opinion holds that defendants' alleged conspiracy cannot be a per se violation of the Sherman Act. [15]

[*16] Despite this conclusion, the jury verdict must stand. Plaintiff's allegations under Section One satisfy the alternative rule-of-reason test. As a matter of law, plaintiff sufficiently alleged that defendants' activities had an anti-competitive effect and were thus unreasonable. [16]

Furthermore, the jury found **[*17]** that defendants' conduct was an unreasonable restraint of trade and was the proximate cause of injury to plaintiff's business, as a matter of fact. ***HN7***[] The essential factor for determining whether a defendant's actions will be found to be an unreasonable restraint of trade is whether the challenged restraint enhances or reduces competition. [17] The Fifth Circuit has stated that the competitive effect "can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was

[13] *See also* Roy B. Taylor Sales, Inc. v. Hollymatic Corp., 28 F.3d 1379, 1382-83 (5th Cir. 1994) (holding that "vertical nonprice restraints are generally not subject to per se analysis," but tying arrangements, which are a type of vertical nonprice restraint, are sometimes per se illegal); Matrix Essentials, Inc. v. Emporium Drug Mart, Inc., 988 F.2d 587, 594 (5th Cir. 1993) (vertical restraints not dealing with price fixing are subject to rule of reason).

[14] For example, the Court explained: "Our approach to the question presented in the present case is guided by the premises of *GTE Sylvania* [Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)] and *Monsanto [v.* Spray-Rite Svc. Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)]: that there is a presumption in favor of a rule-of-reason standard; that departure from that standard must be justified by demonstrable economic effect, such as the facilitation of cartelizing, rather than formalistic distinctions; that interbrand competition is the primary concern of the antitrust laws; and that rules in this area should be formulated with a view towards protecting the doctrine of *GTE Sylvania*."

[15] Accordingly, this opinion vacates and supplants the Court's earlier opinion in this case, Eleven Line, 1998 WL 25566, at *3-*5 only insofar as it held that the alleged conspiracy was a per se violation of Section One. The Court is not persuaded by plaintiff's argument that defendants' activity was in fact a horizontal restraint. *See* Business Elec. Corp. v. Sharp Elec. Corp., 485 U.S. 717, 730, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988) ("Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints.").

[16] *See* Plueckhahn v. Farmers Ins. Exch., 749 F.2d 241, 246 (5th Cir. 1985) (citing GTE Sylvania, 433 U.S. at 49). Defendants argue that as a matter of law Rule II is not unreasonable, relying on the cases dealing with NCAA football rules. Unlike in those cases, however, Rule II is not a restraint on competition in amateur soccer in Midland/Odessa which is "essential if the product is to be available at all." McCormack v. National Collegiate Athletic Ass'n, 845 F.2d 1338, 1344 (5th Cir. 1988); National Collegiate Athletic Ass'n v. Board of Regents of the University of Oklahoma, 468 U.S. 85, 101, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984).

[17] *See* McCormack, 845 F.2d at 1344.

imposed. . . . The purpose of the analysis is to form a judgment about the competitive significance of the restraint." [18] It is the factfinder who must weigh these various factors.

Defendants argued to the jury that Rule II promotes competition by improving and maintaining the quality of defendants' product **[*18]** (amateur soccer) and thus making it competitive with other activities available to participants. The jury assumedly weighed these alleged pro-competitive effects against the alleged anticompetitive effects to reached its conclusion.

Plaintiff thus sufficiently stated a claim for an unreasonable restraint of trade under Section One of the Sherman Act. The Jury's conclusion, based on the evidence, that defendants' conduct did amount to such an unreasonable restraint will not be set aside.

D. Sherman Act Section Two

HN8[] One necessary requirement to establish a claim under Section Two of the Sherman Act is that defendants have monopoly power in the relevant market. The plaintiff must define the relevant market, which must include all products that are reasonably interchangeable and must be plausible. [19] Defendants argue that plaintiff's definition of the relevant product market as amateur youth and adult soccer in Midland/Odessa is too narrow. They feel that other activities such as other sports, boy and girl scouts, and church choir, all are reasonably interchangeable with amateur soccer.

[*19] This argument was also ruled on in the earlier opinion on the Motion to Dismiss. [20] Defendants have merely realleged the same exact arguments. As a legal matter, plaintiff was only required to give defendants notice of their definition of the relevant market, and the claims based thereon. [21] Plaintiff did so. The definition was not overly vague or confusing, and it was not implausible. [22]

HN9[] The ultimate determination of the proper definition of the relevant market is for the jury. [23] The jury in this case heard arguments from plaintiff and defendants on the relevant market. Plaintiff offered testimony on market shares, the numbers of participants, and other competitors, as well as testimony of consumers on the interchangeability of soccer with other products. The jury found that defendants did have monopoly power over the relevant market, and that defendants leveraged their power **[*20]** over a relevant market or submarket (outdoor soccer, Plaintiff argued) to acquire or maintain monopoly power over indoor soccer. The Court sees no reason to set aside this verdict.

E. Tortious Interference

Lastly, defendants argue that there was no case to submit to the jury on tortious interference with business relations because plaintiff failed to make out a prima facie case of liability or to establish damages. Defendants' argument relies on the allegation that there was no *unlawful* act done with malice by the defendants, because the antitrust

[18] *National Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

[19] *See* *Theatre Party Assoc. v. Shubert Org., Inc., 695 F. Supp. 150, 153-54 (S.D.N.Y. 1988)*; *see also* *Eleven Line, 1998 U.S. Dist. LEXIS 13868, 1998 WL 25566*, at *5 & cases cited in n.21-22.

[20] *See* *Eleven Line, 1998 WL 25566*, at *5.

[21] *See id.* at *5 & n.22.

[22] *See id.* at *5 & n.24.

[23] *See id.* at *5 & n.23.

claims were not established. Since the Court is upholding the jury's verdict on the antitrust violations, this argument is moot. Furthermore, to support their claim that tortious interference damages were not established, defendants simply refer back to their argument on antitrust damages. That question was addressed in Section B(2) above.

CONCLUSION

For the reasons stated herein, defendants' Motion for Judgment as **[*21]** a Matter of Law is **DENIED**, and the verdict issued by the jury on February 27, 1998 shall stand. An order entering Final Judgment shall be issued separately.

ENTERED: Aug 25, 1998

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

HN2[] **Motions to Dismiss, Failure to State Claim**

In deciding the merits of a motion to dismiss for failure to state a claim, all material allegations composing the factual predicate of the action are taken as true, for the court's task is to assess the legal feasibility of the complaint, not assay the weight of the evidence which might be offered in support thereof. Thus, where it is beyond doubt that plaintiff can prove no set of facts in support of his or her claim which would warrant relief, the motion for judgment on the pleadings must be granted.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Evidence > Judicial Notice > General Overview

HN3[] **Defenses, Demurrers & Objections, Motions to Dismiss**

On a *Fed. R. Civ. P. 12(b)(6)* motion, consideration is limited to the factual allegations in the complaint, to documents attached to the complaint as an exhibit or incorporated in it by reference, to matters of which judicial notice may be taken, or to documents either in plaintiff's possession or of which plaintiff had knowledge and relied on in bringing suit.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN4[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b) requires that in all allegations of fraud, the circumstances constituting the fraud must be stated with particularity. The pleading must be sufficiently particular to serve the three goals of *Rule 9(b)*, which are (1) to provide a defendant with fair notice of the claims against him; (2) to protect a defendant from harm to his reputation or goodwill by unfounded allegations of fraud; and (3) to reduce the number of strike suits.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN5[] **Business Torts, Fraud & Misrepresentation**

Allegations of fraud must adequately specify the statements made that were false or misleading, give particulars as to the respect in which it is contended that the statements were fraudulent, and state the time and place the statements were made and the identity of the person who made them.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN6[] **Pleadings, Heightened Pleading Requirements**

A pleading must give notice to each opposing party of its alleged misconduct. Thus, a claim may not rely upon blanket references to acts or omissions by all the defendants, for each defendant named is entitled to be apprised of the circumstances surrounding the fraudulent conduct with which he is individually charged. This requirement facilitates the preparation of an adequate defense while protecting a party's reputation from groundless accusations. It also serves to prevent abuse of process and gratuitous disruption of normal business activity.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN7[] **Pleadings, Heightened Pleading Requirements**

There are five elements necessary to sustain a claim of fraud under New York law: (1) misrepresentation of a material fact; (2) the falsity of that misrepresentation; (3) scienter, or intent to defraud; (4) reasonable reliance on that representation; and (5) damage caused by such reliance. Additionally, the plaintiff must comply with the heightened pleading standard of *Fed. R. Civ. P. 9(b)*.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN8[] **Defenses, Demurrers & Objections, Motions to Dismiss**

In evaluating a motion to dismiss, a court need not accept a complaint's legal conclusions and unwarranted factual deductions.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN9[] **Business Torts, Fraud & Misrepresentation**

Statements cannot support a fraud claim as a matter of law because they are simply not representations of fact.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN10[] **Business Torts, Fraud & Misrepresentation**

Fraud pleadings generally cannot be based on information and belief. The exception to this rule is that fraud allegations may be so pleaded as to facts peculiarly within the opposing party's knowledge; even then, however, the allegations must be accompanied by a statement of facts upon which the belief is founded. This exception to the general rule must not be mistaken for license to base claims of fraud on speculation and conclusory allegations. Where pleading is permitted on information and belief, a complaint must adduce specific facts supporting a strong inference of fraud or it will not satisfy even a relaxed pleading standard.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN11[] **Business Torts, Fraud & Misrepresentation**

An asserted reliance must be found to be justifiable under all the circumstances before a complaint can be found to state a cause of action in fraud.

Governments > Fiduciaries

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN12[] **Governments, Fiduciaries**

Under New York law, a party entering into a transaction has a duty to conduct an independent appraisal of the risk it is assuming and a duty to investigate the nature of its business transactions. In evaluating whether plaintiff has adequately alleged justifiable reliance, a court may consider, inter alia, plaintiff's sophistication and expertise in finance, the existence of a fiduciary relationship, and whether plaintiff initiated the transaction.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN13[] **Business Torts, Fraud & Misrepresentation**

A duty is imposed on sophisticated investors to obtain documentation of information material to their investment decisions. Where sophisticated businessmen engaged in major transactions enjoy access to critical information, but fail to take advantage of that access, New York courts are particularly disinclined to entertain claims of justifiable reliance.

Securities Law > Blue Sky Laws > Offers & Sales

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN14[] **Blue Sky Laws, Offers & Sales**

New York's Martin Act, N.Y. Gen. Bus. Law, art 23-A, §§ 352 et seq., governs fraud and deception in the sale of securities and provides for the attorney general to regulate and enforce New York's securities laws. There exists no private right of action for claims that are within the purview of the Martin Act. Plaintiff cannot convert a nonexistent Martin Act claim into another state law cause of action by artful pleading.

HN15[] **Governments, Fiduciaries**

The Martin Act, N.Y. Gen. Bus. Law, art 23-A, §§ 352 et seq., prohibits various fraudulent and deceitful practices in the distribution, exchange, sale, and purchase of securities but does not require proof of intent to defraud or scienter. As a result, claims for breach of fiduciary duty and negligent and innocent misrepresentation, for example, which do not require plaintiff to plead and prove intentional deceit, are covered by the Martin Act and cannot be asserted by private litigants.

Contracts Law > Breach > General Overview

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Commercial Interference > Contracts > General Overview

HN16[] **Contracts Law, Breach**

To state a claim for tortious interference with contractual relations under New York law, plaintiff must allege (1) the existence of a valid contract between itself and a third party for a specific term; (2) defendant's knowledge of that contract; (3) defendant's intentional procuring of its breach; and (4) damages. Additionally, plaintiff must assert that defendant's actions were the but for cause of the alleged breach of contract, that is, that there would not have been a breach but for the activities of defendant. The pleadings may not be conclusory; rather they must be supported by sufficient allegations of fact.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Torts > ... > Commercial Interference > Contracts > General Overview

HN17[] **Defenses, Demurrers & Objections, Motions to Dismiss**

Conclusory allegations of the legal status of defendant's acts need not be accepted as true for the purposes of ruling on a motion to dismiss.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN18[] **Contracts Law, Breach**

Once plaintiff alleges facts establishing that the breaching party was predisposed toward breaching its agreement, the claim for tortious interference must be dismissed for failure to plead but for causation.

Torts > ... > Elements > Causation > Causation in Fact

Torts > ... > Commercial Interference > Contracts > General Overview

HN19[] **Causation, Causation in Fact**

A claimant must allege but for causation for each individual and cannot satisfy that requirement merely by alleging that two or more individuals acted in concert to cause a breach in allegations of tortious interference with contracts.

Antitrust & Trade Law > Sherman Act > General Overview

HN20[] **Antitrust & Trade Law, Sherman Act**

See Sherman Act *§ 1*, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

To withstand a motion to dismiss, plaintiff in a Sherman Act *§ 1*, *15 U.S.C.S. §1* conspiracy claim must allege a concerted action by two or more persons that unreasonably restrains interstate or foreign trade or commerce. Plaintiff must do more than merely allege that a conspiracy exists, it must provide some factual basis for that allegation. For example, plaintiff must identify the relevant product market, the co-conspirators, and describe the nature and effects of the alleged conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] **Per Se Rule & Rule of Reason, Per Se Violations**

Except in narrow classes of per se violations of the Sherman Act, plaintiff must show that defendants acted to restrain competition. To allege unreasonable restraint of trade, something more than a private dispute must be alleged. The relevant product market must be identified, and plaintiff must allege how the net effect of the alleged violation is to restrain trade in the relevant market, and that no reasonable alternative source is available to consumers in that market. The economic impact in the relevant market must be specified, and plaintiff must show that the alleged restraint of trade tends or is reasonably calculated to prejudice the public interest.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN23[] **Regulated Practices, Price Fixing & Restraints of Trade**

Per se violations of the Sherman Act are certain types of conduct so destructive of competition that they almost always result in unreasonable restraints of trade. Such characterization, however, is reserved for manifestly anticompetitive practices. Only a narrow class of practices warrants classification as per se violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN24[] **Per Se Rule & Rule of Reason, Per Se Violations**

It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Act *§ 1*, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

HN25[] **Antitrust & Trade Law, Sherman Act**

A rigid per se classification is especially inappropriate where the complained-of practice is novel or unique. A per se rule is used in the relatively narrow circumstance where courts have sufficient experience with the activity to recognize that it is plainly anticompetitive and lacks any redeeming virtue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Energy & Utilities Law > Pipelines & Transportation > Eminent Domain Proceedings

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN26[] **Horizontal Refusals to Deal, Boycotts**

The per se standard under the Sherman Act *§ 1*, *15 U.S.C.S. § 1*, should not be extended to alleged restraints of ambiguous effect; any departure from the rule of reason standard must be based upon demonstrable economic effect, rather than from formalistic line drawing.

Antitrust & Trade Law > Sherman Act > General Overview

HN27[] **Antitrust & Trade Law, Sherman Act**

New York's ***antitrust law***, the Donnelly Act, is modeled on the Sherman Act, *15 U.S.C.S. § 1*, and should be construed in light of federal precedent.

Banking Law > Bank Activities > Securities > Retail Repurchase Agreements

Securities Law > Blue Sky Laws > Offers & Sales

HN28[] **Securities, Retail Repurchase Agreements**

A repurchase agreement, by its terms, involves two separate but related transactions: (1) a sale by a party of securities in exchange for cash and (2) an agreement by the seller to repurchase the same or equivalent securities for a specified price at a future date. In a reverse repurchase agreement, the party initially buys the securities in exchange for cash, and incurs a forward obligation to resell them. Every repurchase is also a reverse repurchase; that is, a reverse repurchase agreement is simply a repurchase agreement viewed from the perspective of the buyer.

Commercial Law (UCC) > Secured Transactions (Article 9) > General Provisions > Applicability of Provisions

Commercial Law (UCC) > Secured Transactions (Article 9) > General Overview

Commercial Law (UCC) > Secured Transactions (Article 9) > General Provisions > General Overview

Commercial Law (UCC) > ... > Definitions > Collateral > Commercial Paper

HN29[] **General Provisions, Applicability of Provisions**

N.Y. U.C.C. Art. 9 applies only to a transaction which is intended to create a security interest in personal property.

Commercial Law (UCC) > Secured Transactions (Article 9) > Attachment, Effectiveness & Rights > General Overview

HN30[] **Secured Transactions (Article 9), Attachment, Effectiveness & Rights**

To determine whether the parties to a transaction intended to create a security interest, courts look to the agreement governing the transaction. Where the parties' intention is clearly and unambiguously set forth in the agreement, effect must be given to the expressed intent.

Commercial Law (UCC) > Secured Transactions (Article 9) > Attachment, Effectiveness & Rights > General Overview

HN31[] **Secured Transactions (Article 9), Attachment, Effectiveness & Rights**

Where the agreement is clear, courts should look to the terms expressed in the contract itself, rather than to extrinsic evidence of terms that were not expressed or judicial views on what terms might be preferable.

Commercial Law (UCC) > Secured Transactions (Article 9) > Attachment, Effectiveness & Rights > General Overview

HN32[] **Secured Transactions (Article 9), Attachment, Effectiveness & Rights**

The objective intent of the parties expressed or apparent in the writing controls the agreement's interpretation, while the undisclosed, subjective intent of the parties has no bearing on the construction of the contract.

Banking Law > Bank Activities > Securities > Retail Repurchase Agreements

HN33[] **Securities, Retail Repurchase Agreements**

The unequivocal language of purchase and sale in the repurchase and reverse repurchase agreements at issue is strong prima facie evidence that the parties intended the transactions to be treated accordingly.

Banking Law > Bank Activities > Securities > Retail Repurchase Agreements

HN34[] **Securities, Retail Repurchase Agreements**

The mere presence of secured loan characteristics in repurchase and reverse repurchase agreements is not enough to negate the parties' voluntary decision to structure the transactions as purchases and sales.

Banking Law > Bank Activities > Securities > Retail Repurchase Agreements

HN35[] **Securities, Retail Repurchase Agreements**

In contexts such as commercial law and the antifraud provisions of the federal securities law, repurchase agreements generally are viewed as purchases and sales. For other purposes, such as taxes, they are typically viewed as financings.

Opinion by: ROBERT W. SWEET

Opinion

[*281] OPINION

Sweet, D.J.

Defendants Donaldson, Lufkin & Jenrette Securities Corporation ("DLJ"), Bear, Stearns & Co. Inc., Bear, Stearns Capital Markets Inc. (collectively, "Bear Stearns"), Howard Rubin ("Rubin), and Merrill Lynch, Pierce, Fenner & Smith Inc. ("Merrill Lynch") (together with DLJ, Bear Stearns, and Rubin, the "Brokers") have moved for partial dismissal of the First Amended Complaint ("Complaint") pursuant to *Rules 12(b)(6)* and *9(b) of the Federal Rules of Civil Procedure* for failure to state a claim upon which relief can be granted and for failure to plead fraud with particularity. Specifically, the Brokers move to dismiss the following claims against them: (1) inducing and participating in breach of fiduciary duty (Count I), (2) tortious interference with contract (Counts II, XII, and XXI, which is against Merrill Lynch), (3) rescission of unauthorized trades (Count III), (4) breach of duty due to wrongful margin calls and liquidation (Count V), (5) conversion (Count VI), (6) violations of the Sherman and Donnelly **[**3]**

Acts (Counts VII and VIII), (7) prima facie tort against Bear Stearns (Count IX), (8) breach of contract due to commercially unreasonable liquidations (Count X), (9) breach of duty to liquidate in a commercially reasonable manner (Count XI), (10) common law fraud (Count XIII), (11) negligent misrepresentation (Count XIV), (12) innocent misrepresentation (Count XV), (13) breach of express warranty (Count XVI), (14) unjust enrichment (Count XVII), and (15) equitable subordination (Count XX).

[*282] For the reasons set forth below, the Brokers' motion will be granted in part and denied in part.

Parties

Plaintiff Granite Partners, L.P. ("Granite Partners"), a Delaware limited partnership, was established in January 1990 as an investment fund to invest primarily in mortgage-related securities on behalf of individuals and entities subject to United States taxation.

Plaintiff Granite Corporation ("Granite Corp."), a Cayman Islands corporation, was organized in January 1990 to invest primarily in mortgage-backed securities on behalf of offshore investors and domestic tax-exempt entities, including foundations and pension funds.

Plaintiff Quartz Hedge Fund **[**4]** ("Quartz") (collectively with Granite Partners and Granite Corp, the "Funds"), a Cayman Islands corporation, was established in January 1994 as a vehicle to invest primarily in mortgage-related securities on behalf of offshore investors and others exempt from United States taxation.

The Funds bring this action by and through the Litigation Advisory Board (the "LAB"), which was given the exclusive authority on behalf of and in the name of the Funds' estates to commence, prosecute, settle, or otherwise resolve all unresolved claims and causes of action of the Funds' estates by order of the United States Bankruptcy Court for the Southern District of New York.

DLJ, Bear Stearns, and Merrill Lynch, all Delaware corporations with their principal places of business in New York City, are broker-dealers that transacted business with the Funds.

Rubin, a resident of New Jersey, was at all relevant times a senior managing director and the head CMO trader at Bear Stearns.

Relevant Nonparties

At all relevant times to this action, nonparty Askin Capital Management, L.P. ("ACM"), a Delaware limited partnership, was a registered investment advisor; whose exclusive place of business **[**5]** was New York City. ACM was, at all relevant times, controlled by nonparty David J. Askin ("Askin"), who owned and controlled ACM's sole general partner, Dashtar Corporation. Askin also served as ACM's sole limited partner, president, chief executive officer, and chief financial officer. ACM became the investment advisor to Granite Corp. and Granite Partners (and Granite Partners' sole general partner) on January 26, 1993. ACM has been the investment advisor to Quartz since its formation.

Prior Proceedings

On April 7, 1994, the Funds filed petitions for relief under chapter 11 of the United States Bankruptcy Code. The chapter 11 trustee for the Funds (the "Trustee") initially filed this action in the United States Bankruptcy Court for the Southern District of New York on September 12, 1996. The case was referred to this Court on October 18, 1996. On consent, this Court withdrew the reference from the Bankruptcy Court on December 3, 1996.

On January 27, 1997, the Trustee submitted a Third Amended Joint Plan of Liquidation for the Funds (the "Plan"). Following the Bankruptcy Court's confirmation of the chapter 11 Plan on March 2, 1997, this action has been pursued by **[**6]** the LAB, appointed pursuant to the Liquidation Plan.

The LAB filed the Complaint in this action on August 4, 1997, naming, in addition to Bear Stearns, Rubin, DLJ, and Merrill Lynch as defendants.

In the Complaint, the LAB asserts the following claims: breach of contract, inducing and participating in breach of fiduciary duty, tortious interference with contracts, rescission of unauthorized trades, breach of duty, conversion, federal and state antitrust violations, prima facie tort, common law fraud, negligent and innocent misrepresentation, breach of express warranty, unjust enrichment, objection to claims and interest, and equitable subordination.

Merrill Lynch and DLJ filed their motions to dismiss on November 10, 1997, and Bear Stearns filed its motion on November 12, 1997. Oral argument was heard on May 20, 1998, at which time the motions were deemed fully submitted.

On March 24, 1998, the Bond Market Association (the "BMA") moved for leave to file a memorandum of points and authorities as amicus curiae for the purpose of bringing to the Court's attention its views regarding the **[*283]** treatment of repurchase agreements ("repos") under the applicable state law **[**7]** and informing the Court of the importance of repos to the debt capital markets. The motion was granted on May 20, 1998.

Facts

HN1[] In considering a motion to dismiss, the facts alleged in the complaint are presumed to be true and all factual inferences must be drawn in the plaintiff's favor and against the defendants. See *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*; *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1174 (2d Cir. 1993)*; *Cosmas v. Hassett, 886 F.2d 8, 11 (2d Cir. 1989)*; *Dwyer v. Regan, 777 F.2d 825, 828-29 (2d Cir. 1985)*. Accordingly, the factual allegations considered here and set forth below are taken primarily from the LAB's Complaint and do not constitute findings of fact by the Court. They are presumed to be true only for the purpose of deciding the present motion.

This case arises out of the collapse in early 1994 of the Funds that were managed by Askin and ACM. The major claims brought in this lawsuit fall into two categories: (1) that the Brokers injured the Funds by selling to them inappropriate securities purchased by Askin and ACM, and (2) that **[**8]** the Brokers injured the Funds by making improper margin calls and liquidating the Funds' reverse repurchase positions when the margin calls were not satisfied.

The Funds invested primarily in collateralized mortgage obligations ("CMOs") created by the Brokers and other broker-dealers. ACM, through its president, Askin, purchased the securities for the Funds. The Brokers are alleged to be "among the principal sellers of CMOs to the Funds." (Compl. P 4.)

CMOs are bonds created from and collateralized by mortgage-backed securities formed from pools of residential mortgages or securities backed by such mortgages. They are divided into various classes, or "tranches," each of which is entitled to a different portion of the principal and/or interest payments made by the underlying mortgage obligors. The tranches differ from one another with respect to their sensitivity to interest rate changes and the certainty with which their reaction to such changes can be predicted. The Brokers referred to the riskiest tranches - those most prone to large and unpredictable swings in value - as "toxic" or "nuclear waste."

The two larger Funds, Granite Partners and Granite Corp., were designed to invest **[**9]** in "market-neutral" portfolios of high-quality CMOs. They were intended to acquire balanced holdings of "bullish" bonds and "bearish" bonds. A bullish security is likely to increase in value when interest rates fall and decrease in value when interest rates rise. A bearish security is likely to decrease in value when interest rates fall and increase in value when interest rates rise. By purchasing offsetting positions in predictable securities, the Funds would enjoy the high returns associated with rate-sensitive CMOs while hedging against the risk attendant upon interest rate fluctuations. Quartz was intended to be "market-directional" - to maintain a bullish or bearish portfolio depending on the predicted direction of interest rates.

Askin and ACM, the Funds' investment advisor, had fiduciary and contractual duties to the Funds to make investments with due care and in accordance with the Funds' stated investment objectives. ACM was to accomplish these respective goals by rigorously and continuously analyzing each proposed acquisition for each Fund with a sophisticated, proprietary computer model that would allow ACM and Askin to determine the impact of interest rate changes on **[**10]** the price and value of each bond.

Askin and ACM, however, managed the Funds negligently and repeatedly breached their contractual and fiduciary duties. They did not perform a rigorous analysis of the securities they bought, and they were unable to gauge how those securities would respond to interest rate movements. Moreover, they did not use, or even have, sophisticated computerized analytical techniques. In fact, "ACM and Askin often made purchase decisions based on little or no analysis or research. They instead relied on Broker recommendations, representations, valuations, and reports, Askin's 'instincts,' and unsophisticated analysis to select the Funds' securities. **[*284]** " (Compl. P 70.) As a result, ACM and Askin failed to create market-neutral portfolios for Granite Partners and Granite Corp., instead creating portfolios that were dramatically bullish, and that contained a number of highly volatile, unpredictable, toxic CMOs. Similarly, at the time when Askin believed that interest rates would rise, he constructed an inappropriate bullish portfolio for Quartz.

The Complaint alleges that throughout 1993 and early 1994, the Brokers took advantage of Askin's shortcomings. **[**11]** Although they knew of Askin's obligation to create market-neutral portfolios for Granite Partners and Granite Corp., knew of Askin's inability to analyze the impact of interest rate changes on esoteric CMO tranches, and knew of the Funds' dangerous bullish tilt, the Brokers induced Askin to buy inappropriate, toxic, bullish CMOs that eroded in value when short-term interest rates rose in early 1994. For example, from January 1993 to February 1994, the Brokers sold the Funds $ 34 million in bearish CMOs but $ 740 million in inappropriate securities. The Complaint maintains that the Brokers misrepresented many of these strongly bullish and toxic securities as bearish or only slightly bullish.

The Brokers sold these toxic and inappropriate securities to the Funds because it was profitable for them to do so. The sale of the toxic tranches of a CMO offering makes the entire offering economically feasible. The Brokers are committed to buying any unsold tranches for their own accounts, and they do not wish to own nuclear waste themselves. Accordingly, they are unwilling to market a new offering unless they are assured they will be able to sell the toxic securities. For this reason, the toxic **[**12]** tranches are referred to as the "deal drivers."

To generate demand for the more volatile tranches of their CMO offerings, the Brokers cultivated relationships with a small number of managers of investment funds, including ACM. They steered investors to ACM to enable ACM to purchase the more volatile, esoteric CMOs from the Brokers and granted ACM extensive credit (at times in violation of their own internal credit guidelines) to increase the amount of such CMOs that ACM could purchase. ACM, acting on the Funds' behalf, became one of the largest volume purchasers of these volatile and esoteric tranches from the Brokers. In early 1994, the Funds owned, in the aggregate, more than $ 1.5 billion of such CMOs, approximately half of which were purchased from the three Brokers (and another quarter from Kidder, Peabody & Co. Inc. ("Kidder")). In short, the Brokers all were "in bed" with ACM. (Compl. P 40.)

As a result of the Brokers' sales of numerous inappropriate securities to the Funds, by the beginning of 1994 the Funds' portfolios were dangerously "tilted" in a way that exposed the Funds to substantial losses in the event of an increase in interest rates. When interest rates rose in **[**13]** February and March 1994, the Funds experienced an erosion in value. In March 1994, the Brokers issued improper margin calls on the Funds, based on arbitrary security valuations.

The Funds acquired most of their securities pursuant to repos, a financing mechanism that allowed the Funds to pay only a fraction of the cost of each CMO in cash, borrowing the balance from the Brokers. In such a transaction, one party to the agreement agrees to sell a security to a buyer/lender for a given sum (the "repo amount") and to buy the security back from the buyer/lender at a later date (the "buy-back date") for the repo amount plus a market rate of interest (the "repo rate"). In effect, the Complaint alleges that the repos were collateralized loans - the Brokers loaned the Funds most of the purchase price for each CMO and took possession of the bonds as collateral. The use of repos benefitted the Brokers, allowing the Funds to increase their purchases from the Brokers.

The contracts between the Funds and the Brokers [1] allowed the Brokers to make margin calls on the Funds if the value of the **[*285]** securities on repo fell below the amount that the Funds had borrowed (plus an agreed-upon "haircut"). **[**14]** In that instance, a "margin deficit" exists. In making margin calculations, the market value of the securities must be the price obtained from a "generally recognized source agreed to by the parties or the most recent closing bid quotation from such a source," plus accrued income not included therein. (Compl. P 55.) In March 1994, however, the Brokers issued a blizzard of margin calls that were not based on fair market prices, but on unreasonably low, manipulated valuations.

When the Funds were unable to meet the Brokers' improper margin calls, the Brokers liquidated the Funds' portfolios. **[**15]** Under the PSA Agreements, if a proper margin call is not met, the broker-dealer may liquidate the collateral upon one business day's notice, including by selling the securities to itself in a "deemed" sale and crediting the customer in an amount equal to the price of the securities obtained from a generally recognized source or the most recent closing bid quotation from such a source. According to the Complaint, the liquidations were not conducted in good faith and in a commercially reasonable manner. Instead of seeking to maximize the prices paid for the Funds' securities in the liquidations by soliciting bids from their retail customers, the Brokers in nearly all cases simply "deemed" the CMOs sold to themselves, at unreasonably low prices.

The Brokers agreed to facilitate each other's liquidations by providing each Broker with sham bids for the Fund securities that each of them held. These were not bona fide offers to purchase the securities at market prices, but artificially low "accommodation" bids solicited and provided in an effort to justify the prices at which the Brokers then deemed the Funds' CMOs sold to themselves.

The Complaint alleges that by selling the inappropriate **[**16]** toxic securities to the Funds, by generating artificial and improper margin calls, and then by liquidating the portfolios in a commercially unreasonable and collusive manner, the Brokers netted profits, whereas the Funds lost more than $ 400 million.

Discussion

I. Legal Standards

A. *Rule 12(b)(6)*

HN2[] In deciding the merits of a motion to dismiss for failure to state a claim, all material allegations composing the factual predicate of the action are taken as true, for the court's task is to "assess the legal feasibility of the complaint, not assay the weight of the evidence which might be offered in support thereof." *Ryder Energy Distribution v. Merrill Lynch Commodities, Inc., 748 F.2d 774, 779 (2d Cir. 1984)* (quoting *Geisler v. Petrocelli, 616 F.2d 636, 639 (2d Cir. 1980))*. Thus, where it is beyond doubt that plaintiff can prove no set of facts in support of his or her claim which would warrant relief, the motion for judgment on the pleadings must be granted. See *H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 250, 106 L. Ed. 2d 195, 109 S. Ct. 2893 (1989)*; *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*; **[**17]** *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*.

Additionally, ***HN3***[] on a *Rule 12(b)(6)* motion, consideration is limited to the factual allegations in the complaint, "to documents attached to the complaint as an exhibit or incorporated in it by reference, to matters of which judicial notice may be taken, or to documents either in plaintiff['s] possession or of which plaintiff[] had knowledge and relied on in bringing suit." *Brass v. American Film Technologies, Inc., 987 F.2d 142, 150 (2d Cir. 1993)*; see *Cortec Indus., Inc. v. Sum Holding L.P., 949 F.2d 42, 47-48 (2d Cir. 1991)*.

---

[1] Each of the Funds entered into a Public Securities Association Master Repurchase Agreement ("PSA Agreement") with Bear Stearns and DLJ. Merrill Lynch entered into a PSA Agreement with Quartz, but not with Granite Partners or Granite Corp. In connection with its repurchase transactions with those funds, Merrill Lynch issued trade confirmations that purported to grant Merrill Lynch a security interest in the repoed securities.

B. *Rule 9(b)*

HN4[] *Federal Rules of Civil Procedure 9(b)* requires that in all allegations of fraud, the circumstances constituting the fraud must be stated with particularity. See *Shields v. Citytrust Bancorp, Inc., 25 F.3d 1124, 1127 (2d Cir. 1994)*; *In re Time Warner, Inc. Sec. Litig., 9 F.3d 259, 265 (2d Cir. 1993)*; *Shemtob v. Shearson, Hammill & Co., 448 F.2d 442, 444-45 (2d Cir. 1971)*. The pleading must be sufficiently particular to serve the three goals of *Rule 9(b)*, **[**18]** which are (1) to **[*286]** provide a defendant with fair notice of the claims against him; (2) to protect a defendant from harm to his reputation or goodwill by unfounded allegations of fraud; and (3) to reduce the number of strike suits. See *Di Vittorio v. Equidyne Extractive Indus., Inc., 822 F.2d 1242, 1247 (2d Cir. 1987)*; *O'Brien v. Price Waterhouse, 740 F. Supp. 276, 279 (S.D.N.Y. 1990)*, aff'd, *936 F.2d 674 (2d Cir. 1991)*.

The Court of Appeals has required that ***HN5***[] allegations of fraud adequately specify the statements made that were false or misleading, give particulars as to the respect in which it is contended that the statements were fraudulent, and state the time and place the statements were made and the identity of the person who made them. See *McLaughlin v. Anderson, 962 F.2d 187, 191 (2d Cir. 1992)*; *Cosmas, 886 F.2d at 11*.

HN6[] The pleading must give notice to each opposing party of its alleged misconduct. Thus, a claim may not rely upon blanket references to acts or omissions by all the defendants, for each defendant named is entitled to be apprised of the circumstances surrounding **[**19]** the fraudulent conduct with which he is individually charged. See *Jacobson v. Peat, Marwick, Mitchell & Co., 445 F. Supp. 518, 522 n.7 (S.D.N.Y. 1977)*. This requirement facilitates the preparation of an adequate defense while protecting a party's reputation from groundless accusations. See de *Atucha v. Hunt, 128 F.R.D. 187, 189 (S.D.N.Y. 1989)*, aff'd, *979 F.2d 846 (2d Cir. 1992)*; *Posner v. Coopers & Lybrand, 92 F.R.D. 765, 768 (S.D.N.Y. 1981)*, aff'd, *697 F.2d 296 (2d Cir. 1982)*. It also serves to prevent abuse of process and gratuitous disruption of normal business activity. See *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 740-41, 44 L. Ed. 2d 539, 95 S. Ct. 1917 (1975)*.

II. Count XIII Alleging Common Law Fraud Against the Brokers Is Dismissed

HN7[] There are five elements necessary to sustain a claim of fraud under New York law: (1) misrepresentation of a material fact; (2) the falsity of that misrepresentation; (3) scienter, or intent to defraud; (4) reasonable reliance on that representation; and (5) damage caused by such reliance. *May Dep't Stores Co. v. International Leasing Corp., 1 F.3d 138, 141 (2d Cir. 1993)*; **[**20]** *Katara v. D.E. Jones Commodities, Inc., 835 F.2d 966, 970-71 (2d Cir. 1987)*; *Red Ball Interior Demolition Corp. v. Palmadessa, 874 F. Supp. 576, 584 (S.D.N.Y. 1995)*. Additionally, the plaintiff must comply with the heightened pleading standard of *Rule 9(b), Fed. R. Civ. P.*

The Complaint alleges that, to sell the Funds the toxic, "deal driver" tranches of their CMO offerings, the Brokers 2 misrepresented certain securities, particularly inverse IOs, [2] as bearish or only slightly bullish when, in fact, they were strongly bullish or their reaction to interest rate changes was impossible to predict. In reliance on the Brokers' misrepresentations, the Funds purchased securities that they would not otherwise have, and they held onto securities that they would otherwise have sold.

[21]** Because some of the allegations do not meet the requirement of *Rule 9(b)*, and the remaining fail to adequately allege justifiable reliance, the fraud claim must be dismissed.

---

[2] One of the tranches of CMOs is the inverse IO. The response of inverse IOs to changes in interest rates is difficult to predict. For example, an increase in short-term rates would lead to a decrease in the coupon rate paid on an inverse IO whose coupon rate formula was based on LIBOR. The Complaint states that the decrease could be dramatic if leverage was involved. The decrease in the coupon rate on the inverse IO would tend to depress its value. If, however, the increase in short-term rates was accompanied by an increase in long-term rates, prepayments might decline, extending the payment stream on the inverse IO. This would tend to increase its value, perhaps enough to offset the decline in value caused by the reduction in the coupon rate. The difficultly in predicting the impact of interest rate changes on inverse IOs makes them risky securities. Inverse IOs are particularly toxic when they are leveraged. (Compl. P 32.)

A. Allegations of Fraud Specific to Bear Stearns Do Not Meet the Pleading Requirements of *Rule 9(b)*

There are three fraudulent allegations set forth in the Complaint particular to Bear Stearns. Because they do not comply **[*287]** with *Rule 9(b)*, Bear Stearns' motion to dismiss is granted.

The LAB invokes the deposition testimony of Askin in another matter as one of its allegations of fraud against Bear Stearns. Askin testified at a January 5, 1995, deposition:

> A: It's also not my testimony that each inverse IO shown to ACM by any or all dealers were bearish, but rather that some of the inverse IOs that were represented to ACM by some of the dealers were represented as bearish securities.
> Q: Was Kidder, Peabody one of the brokers who misrepresented an inverse IO as bearish?
> A: Kidder Peabody is one of the brokers that on more than one occasion represented that the inverse IOs that it wanted to sell were bearish. . . .
>
> Q: Does your last answer apply to Bear Stearns as well? **[**22]**
> A: I believe it does, yes.

(Compl. P 77.)

This exchange lacks the specificity required under *Rule 9(b)*. It not only fails to allege a statement by Bear Stearns, but it also fails to state the time and place the statement was made, as well as the identification of the speaker. See *Primavera Familienstiftung v. Askin, 173 F.R.D. 115, 123 (S.D.N.Y. 1997)*. Such a vague reference cannot form the basis for a fraud claim under *Rule 9(b)*.

The LAB also alleges that on March 31, 1993, "Bear Stearns faxed marketing materials to ACM indicating that four inverse IO residual CMOs were '1000 basis points cheap to benchmark I/Os' and that these same bonds were '25% cheaper than Trust IOs.'" (Compl. P 79.) The same fax allegedly included the sentence, "I would suggest a smaller long position (as the off-setting hedge) than we have been using in the IO analysis." (Id.) The LAB contends that upon translation of the broker's jargon Bear Stearns is representing that the four inverse IOs are less expensive substitutes for benchmark and Trust IOs, both well known to be bearish securities. According to the LAB, these statements mean that Bear Stearns advised ACM to purchase **[**23]** these securities as a hedge against Granite Corp. and Granite Partners' bullish securities.

Whereas the LAB maintains that Bear Stearns made a representation about the fundamental properties of inverse IOs upon which the Funds relied to their detriment, Bear Stearns asserts that the statements in the fax do not constitute a "representation" at all, much less a "misrepresentation" that certain securities are bearish. The first portion of the alleged statement, maintains Bear Stearns, is a relative price quotation, and the second part is, by its own terms, a suggestion - a statement of opinion.

The plain words of the allegation do not support the LAB's contention. The first portion of the fax states that four particular bonds are cheaper than certain other classes of bonds. The LAB does not claim that the statement was false - that the bonds were not, in fact, cheaper than the other classes of bonds. Instead, the LAB explains that this was a misrepresentation about the fundamental characteristics of these four securities. This is not a reasonable inference to be drawn in the LAB's favor since it requires the Court to take words that are concededly accurate and interpret them into a **[**24]** misrepresentation. See *Cohen v. Litt, 906 F. Supp. 957, 961 (S.D.N.Y. 1995)* ("***HN8***[] In evaluating a motion to dismiss, a court need not accept a complaint's legal conclusions and unwarranted factual deductions.").

The second portion of the fax is, as stated by Bear Stearns, a suggestion rather than a representation of fact. See *Schlaifer Nance & Co., Inc. v. Estate of Warhol, 927 F. Supp. 650, 661 (S.D.N.Y. 1996)* (finding that "***HN9***[] statements cannot support a fraud claim as a matter of law because they were simply not representations of fact"), aff'd, *119 F.3d 91 (2d Cir. 1997)*. [3] **[**25]** Additionally, the alleged statement does not indicate the type of security

[3] Bear Stearns notes that if the suggestion implies anything, it is that the four bonds are more bullish than the other classes of securities, not that they were more bearish, since the suggested hedge is to be smaller.

[*288] the suggested "offsetting hedge" would be. Because there can be no fraud without a misrepresentation, see *Cumberland Oil Corp. v. Thropp, 791 F.2d 1037, 1044 (2d Cir. 1986)*, this allegation cannot form the basis for fraud against Bear Stearns. [4]

Finally, the LAB alleges on information and belief that Bear Stearns described one of the forwards [5] as bearish in order to induce ACM to purchase it. Yet "***HN10***[] fraud pleadings generally cannot be based on information and belief." *Stern v. Leucadia Nat'l Corp., 844 F.2d 997, 1003 (2d Cir. 1988)*. The exception to this rule is that "fraud allegations may be so pleaded as to facts peculiarly within the opposing party's knowledge; even then, however, the allegations must be accompanied by a statement of facts upon which the belief is founded." Id.; see *Campaniello Imports, Ltd. v. Saporiti Italia S.p.A., 117 F.3d 655, 664 (2d Cir. 1997)*; see also *Wexner v. First Manhattan Co., 902 F.2d 169, 172 (2d Cir. 1990)* ("This exception to the general rule must not be mistaken for license to base claims of fraud on speculation and conclusory allegations. Where pleading is permitted on information and belief, **[**26]** a complaint must adduce specific facts supporting a strong inference of fraud or it will not satisfy even a relaxed pleading standard.").

The LAB represents that its basis for belief is that Bear Stearns described the identical security as bearish in written marketing materials faxed to the Clinton Group, another purchaser of CMOs. However, an alleged statement by Bear Stearns to a **[**27]** third party unrelated to the Funds cannot form the basis for LAB's fraud claim. It is nowhere alleged that the Funds ever heard or relied on this alleged misrepresentation, nor that the same representation was ever made to them. Furthermore, this specific allegation is not "peculiarly" within the defendant's knowledge, as it must for a fraud pleading premised on "information and belief," see *Campaniello Imports. Ltd., 117 F.3d at 664*, because the LAB must allege that the Funds heard it and relied on it. Thus allegation must also be dismissed for failure to meet the specificity required by *Rule 9(b)*.

B. The Fraud Claim Against the Brokers Will Be Dismissed Because the Lab Has Not Adequately Pleaded Reasonable Reliance

Under New York law, the LAB must establish actual, direct reliance upon the representations of bearishness made by the Brokers. See *Golden Budha Corp. v. Canadian Land Co., 931 F.2d 196, 202 (2d Cir. 1991)*; *Belin v. Weissler, 1998 U.S. Dist. LEXIS 10492*, *No. 97 Civ. 8787, 1998 WL 391114*, at *5 (S.D.N.Y. July 14, 1998); *Turtur v. Rothschild Registry Int'l, Inc., 1993 U.S. Dist. LEXIS 11939*, **[**28]** *No. 92 Civ. 8710, 1993 WL 338205*, at *6 (S.D.N.Y. Aug. 27, 1993); *Devaney v. Chester, 709 F. Supp. 1255, 1264 (S.D.N.Y. 1989)*. Once allegations of actual, direct reliance are adequately pleaded, the inquiry does not stop there. Under New York law, "***HN11***[] the asserted reliance must be found to be justifiable under all the circumstances before a complaint can be found to state a cause of action in fraud." *Danann Realty Corp. v. Harris, 5 N.Y.2d 317, 322, 157 N.E.2d 597, 599-600, 184 N.Y.S.2d 599, 603 (1959)*; see *Lazard Freres & Co. v. Protective Life Ins. Co., 108 F.3d 1531, 1541* (2d Cir.) (stating that "in order to sustain a claim of fraud, a party must establish, inter alia, justifiable reliance"), cert. denied, *139 L. Ed. 2d 112, 118 S. Ct. 169 (1997)*; *Palmadessa, 874 F. Supp. at 588* (dismissing common law fraud claim in part because plaintiff failed to show that "he was justified in taking action in reliance" upon defendant's representations).

[*289] As against DLJ, the LAB asserts as an allegation of fraud that on February 1, 1994, DLJ's salesperson represented that "an inverse **[**29]** IO being offered by DLJ, GECMS 1993 16-A6, was 'a good bearish bond.'"

---

[4] This allegation, if it were a proper misrepresentation, would nonetheless fail for inadequately pleading reasonable reliance, as discussed below.

[5] In addition to buying on repo, ACM also purchased CMOs for the Funds on a forward-settling basis, i.e., for settlement (payment by the Funds) in the future. In the CMO market, broker-dealers attempt to "pre-sell" certain tranches of CMOs before the CMO has been issued and settled. Frequently, these so-called "forwards" do not settle until several weeks or months after the buyer has committed to purchase them. The length of this lead time arises from the need of broker-dealers to assemble the collateral for and pre-sell much of the CMO deal, which may involve numerous adjustments to the very complex, multitranche structures.

(Compl. P 82.) However, the LAB concedes that the Funds never purchased that security. Thus, the LAB has failed to allege actual, direct reliance upon this representation of bearishness.

Also regarding DLJ, the LAB alleges that in September 1993, DLJ provided the Funds with a portfolio valuation analysis stating that three inverse IOs had a negative effective duration -- as per the LAB, an explicit representation that they were bearish; this proved to be false in March 1994 when, in a rising interest rate environment, DLJ marked each of these securities down from 40 to 61%. (*Id. P 105, 110)*. Similarly, as against all of the Brokers, the LAB maintains that at the end of February 1994, each of the Brokers ascribed values - or "marks" - to the Funds' inverse IOs. The LAB contends that the marks were tantamount to a misrepresentation that those securities were bearish or only slightly bullish when they were actually very bullish or unpredictable. In purported reliance on such representations, the LAB claims that the Funds retained the securities rather than selling them and subsequently purchased other, unidentified, **[**30]** securities. As to these allegations, the Funds' reliance was neither justified nor reasonable.

Before reaching the issue of justifiable reliance, the question of whether the marks constitute representations as to bearishness must be addressed. According to the Brokers, the LAB does not allege that any of the February marks were incorrect, much less fraudulently made. Rather, the LAB claims that the manner in which the prices changed from one month to another constituted a representation about the characteristics of the securities. The Brokers continue that the LAB is engaging in an Alice-in-Wonderland effort to create representations where none exist, for the February marks - simple price quotations without explanation for all of the bonds the Funds had with the Brokers - simply do not constitute representations as to bearishness. The marks were nothing more than the Brokers' valuation of the securities at that time, in the context of existing market conditions. Indeed, the LAB never alleges in the Complaint that the Brokers actually described any of these bonds as bullish or bearish - in other words, the Brokers never used the terms "bearish" or "bullish" in describing the bonds.

[31]** On the other hand, the LAB urges that the marks ascribed to the securities at the end of February constituted strong representations of bearishness because at the time of rising interest rates, the Brokers marked the securities as higher in value, or only slightly lower, than the previous month. As per the LAB, the marks were representations that these securities were in fact bearish or only slightly bullish. The LAB further contends that a month later, in March 1994, the representations were proven false when, with interest rates still rising, the Brokers lowered their marks for the same bonds, triggering the margin calls and liquidations that wiped out the Funds. Moreover, contends the LAB, because interest rates rose both in February and March, there was no economic or "market" basis for the Brokers' inconsistent approach to valuing these inverse IOs.

Because of the subsequent valuations in March, the LAB infers that the February marks were a misrepresentation of bearishness. However, as DLJ points out, the marks only indicate that the Brokers valued these securities at a certain price in February 1994 and that this valuation was lower - after a sea change in the market - in March **[**32]** 1994.

The LAB's allegation that the marks were affirmative representations of bearishness is debatable. Regardless, the fraud claim fails because if misrepresentations of bearishness were made, the LAB's reliance on them was neither justified nor reasonable as a matter of law.

HN12[] Under New York law, a party entering into a transaction has a duty to conduct an independent appraisal of the risk it is assuming and a duty to investigate the nature of its business transactions. See *Abrahami v. UPC Constr. Co. Inc., 224 A.D.2d 231, 234, 638 N.Y.S.2d 11, 14* (1st Dep't 1996); **[*290]** see also *Belin, 1998 WL 391114*, at *5-*8. In evaluating whether a plaintiff has adequately alleged justifiable reliance, a court may consider, inter alia, the plaintiff's sophistication and expertise in finance, the existence of a fiduciary relationship, and whether the plaintiff initiated the transaction. See *Brown v. E.F. Hutton Group, Inc., 991 F.2d 1020, 1032 (2d Cir. 1993)*.

The Second Circuit addressed the requirement for reasonable reliance in *Lazard Freres, 108 F.3d at 1542-43*. The defendant in that case asserted as an affirmative **[**33]** defense to the plaintiff's breach of contract claim that it reasonably relied upon plaintiff's characterization of the contents of a report that defendant considered material to its decision to enter into a deal. Id. Defendant further claimed that plaintiff had structured the deal in such a way that defendant had to rely on plaintiff's characterization and commit to the deal before it had the opportunity to review the report itself. *Id. at 1543*. In fact, defendant alleged that it was forced to rely on plaintiff's representations or lose the chance to be a part of the transaction. Nonetheless, the Second Circuit found that the defendant in Lazard Freres "was under a further duty to protect itself from misrepresentation." Id.

Lazard Freres imposes ***HN13***[] a duty on sophisticated investors to obtain documentation of information material to their investment decisions. Id. As the court proclaimed, "'where sophisticated businessmen engaged in major transactions enjoy access to critical information, but fail to take advantage of that access, New York courts are particularly disinclined to entertain claims of justifiable reliance.'" *Id. at 1541* **[**34]** (quoting *Grumman Allied Indus., Inc. v. Rohr Indus., Inc., 748 F.2d 729, 737 (2d Cir. 1984))*.

In evaluating the characteristics of complex derivative securities, DLJ maintains that no reasonable investor could rely solely on short-hand phrases like "bullish" or "bearish," or month-end valuations or portfolio analyses made after the purchase without conducting some independent due diligence. [6] Furthermore, the Funds cannot allege justifiable reliance in light of their representations that Askin and ACM - their sole decisionmakers - were sophisticated and experienced investors.

[35]** The LAB, however, states that Askin lacked the tools to model CMOs and to determine their response to interest rate changes and that Askin relied on the Brokers for that information; therefore, the extent of Askin's ability to determine the performance characteristics of the esoteric CMO tranches he was buying, and the reasonableness of his reliance on the Brokers in light of that ability, present fact questions that cannot be resolved in the instant motion.

Although the reasonableness of a plaintiff's reliance certainly can be, and often is, a factual issue, whether a plaintiff has adequately pleaded justifiable reliance is a proper subject for a motion to dismiss. See *Brown, 991 F.2d at 1032-33* (affirming the district court's dismissal of plaintiffs' common law fraud claim, holding that plaintiffs failed to plead justifiable reliance as a matter of law); *Independent Order of Foresters, 919 F. Supp. at 154* (dismissing plaintiff's fraud claim, holding that the plaintiff alleged reliance on statements in defendant's sales brochure was unreasonable as a matter of law). Indeed, the LAB does not contend that the Funds' receipt of the Brokers' valuation **[**36]** of securities in February 1994 satisfied the Funds' duty to conduct some independent due diligence.

Justifiable reliance is insufficiently pleaded. The LAB cannot use Askin and ACM's breach of duty to shift the responsibility for properly managing the Funds to the Brokers. As the Complaint states, it was the duty of Askin and ACM "to predict correctly a CMO's response to changes in interest **[*291]** rates - that is, to determine accurately whether the CMO would perform bullishly or bearishly - and then to have an appropriate balance of bullish and bearish securities or (in the case of Quartz) an appropriately directional portfolio." (Compl. P 46.) Askin and ACM "had committed themselves to making extensive use of proprietary computerized models to analyze CMOs by modeling cash flows, prepayment expectations, and yields across numerous interest rate scenarios." (*Id. P 67*.)

Askin and ACM were not novices. They cannot be held to the standard of an ordinary investor in terms of the type and amount of diligence that would be expected prior to making a purchase or investment. Indeed, the Funds collectively possessed close to $ 400 million in assets in March 1994, and Askin and ACM **[**37]** were their sole advisors. Accepting as true the LAB's allegation that ACM could not effectively model the CMOs, ACM was nonetheless bound by its contractual and fiduciary duties to the Funds to analyze the securities it purchased, and it had the means to hire someone to perform the necessary analysis if it could not. Additionally, the Complaint itself asserts that Askin and ACM based purchasing decisions on little or no analysis and research, but instead relied on

---

[6] See generally *Independent Order of Foresters v. Donaldson, Lufkin & Jenrette Inc., 919 F. Supp. 149, 154 (S.D.N.Y. 1996)* (dismissing plaintiff's complaint and holding as a matter of law that no reasonable investor, trading millions of dollars in CMOs, would rely on information in a sales brochure in light of the volumes of other information available in highly regulated securities transactions); *McCoy v. Goldberg, 883 F. Supp. 927, 936 (S.D.N.Y. 1995)* (dismissing complaint for failure to establish justifiable reliance where plaintiffs ignored information in prospectus and instead relied on information in summaries).

Broker "recommendations, representations, valuations, and reports, Askin's 'instincts,' and unsophisticated analyses to select the Funds' securities." (*Id. P 70*.) The lack of due diligence and investigation on Askin's part belies any representation that Askin's reliance on the February marks or DLJ's September 1993 valuation was justifiable or reasonable. Moreover, there is no allegation of the existence of a special or fiduciary relationship between the Brokers and the Funds such that wholesale reliance on the Brokers would border on reasonable. Thus, the fraud claim against the brokers is dismissed. [7]

[38] III. Counts XIV and XV for Negligent and Innocent Misrepresentation Are Precluded By the Martin Act**

HN14[] New York's Martin Act, N.Y. Gen. Bus. Law, art 23-A, §§ 352 et seq., governs fraud and deception in the sale of securities. It provides for the attorney general to regulate and enforce New York's securities laws. It is well established that there exists no private right of action for claims that are within the purview of the Martin Act. See, e.g., *Vannest v. Sage, Rutty & Co, Inc., 960 F. Supp. 651, 657 n.6 (W.D.N.Y. 1997)*; *Independent Order of Foresters, 919 F. Supp. at 153*; *CPC Int'l Inc. v. McKesson Corp., 70 N.Y.2d 268, 276, 514 N.E.2d 116, 519 N.Y.S.2d 804, 807 (1987)*; *Rego Park Gardens Owners v. Rego Park Gardens Assocs., 191 A.D.2d 621, 595 N.Y.S.2d 492* (2d Dep't 1993). Thus courts have dismissed state law claims "covered" by the Martin Act on the grounds that permitting them to proceed "would be equivalent to permitting a private claim" under the Act. *Vannest, 960 F. Supp. at 657 n.6*; see *Independent Order of Foresters, 919 F. Supp. at 153-54*. Additionally, **[**39]** a plaintiff cannot convert a nonexistent Martin Act claim into another state law cause of action by artful pleading. See id.; *Horn v. 440 East 57th Co., 151 A.D.2d 112, 119, 547 N.Y.S.2d 1, 5* (1st Dep't 1989).

HN15[] The Martin Act prohibits various fraudulent and deceitful practices in the distribution, exchange, sale, and purchase of securities but does not require proof of intent to defraud or scienter. See *CPC Int'l, 70 N.Y.2d at 276, 514 N.E.2d at 118, 519 N.Y.S.2d at 807*. As a result, claims for breach of fiduciary duty and negligent and innocent misrepresentation, for example, which do not require a plaintiff to plead and prove intentional deceit, are covered by the Martin Act and cannot be asserted by private litigants. [8] See *Independent Order of Foresters, **[*292]** 919 F. Supp. at 153-54* (dismissing plaintiff's breach of fiduciary duty and negligent misrepresentation claims arising from defendant's alleged misdescription of CMOs in its sales brochures as an impermissible effort to bring a private action under the Martin Act); *Horn, 151 A.D.2d at 119, 547 N.Y.S.2d at 5* (affirming the dismissal of plaintiffs' **[**40]** negligent misrepresentation and breach of fiduciary duty claims based on alleged oral misrepresentations in connection with the purchase of co-op shares); *Rego Park, 191 A.D.2d at 622, 595 N.Y.S.2d at 492* (upholding the dismissal of a claim for negligent misrepresentation "because this cause of action sought, in essence, to pursue a private cause of action under the Martin Act"); see also *Vannest, 960 F. Supp. at 657 n.6* (noting that plaintiffs' breach of fiduciary duty and negligent misrepresentation claims, which were predicated on defendant's representations to plaintiffs before they purchased limited partnership interests, could be dismissed as violating the Martin Act).

[41]** According to the LAB, however, the language and the legislative history of the Martin Act cannot be interpreted to preclude the assertion of the common law remedies. Yet this conclusion ignores the case law, cited

[7] The LAB's claims for negligent and innocent misrepresentation, discussed below, may also be dismissed for lack of adequately pleading justifiable reliance. See generally *Kimmell v. Schaefer, 89 N.Y.2d 257, 263-64, 675 N.E.2d 450, 454, 652 N.Y.S.2d 715, 719 (1996)* (discussing negligent misrepresentation); *Heard v. New York, 82 N.Y.2d 66, 74-75, 623 N.E.2d 541, 545-46, 603 N.Y.S.2d 414, 418-19 (1993)* (same); *Dygert v. Leonard, 138 A.D.2d 793, 794, 525 N.Y.S.2d 436, 438* (3d Dep't 1988) (stating that if the "element of scienter is subtracted from a cause of action for fraud, the remainder constitutes innocent misrepresentation").

[8] The Martin Act does not preclude private litigants from bringing common law fraud claims because such claims require a plaintiff to prove intent or scienter. Therefore, courts allow these claims to proceed while simultaneously dismissing negligent misrepresentation and breach of fiduciary duty claims. See e.g., *Whitehall Tenants Corp. v. Estate of Olnick, 213 A.D.2d 200, 623 N.Y.S.2d 585* (1st Dep't), appeal denied, ***86 N.Y.2d 704, 631 N.Y.S.2d 608 (1995)***.

above, to the contrary in which courts have held that the Martin Act precludes common law claims negligent misrepresentation and breach of fiduciary duty that are predicated on securities transactions.

The LAB also maintains that much of the cited precedents, particularly Horn, Rego Park, and Whitehall, are inapplicable because their effect is limited to claims relating to cooperatives and condominiums. The Martin Act, however, is not limited to cooperatives and condominiums, and these state cases did not limit their holdings to such circumstances. Moreover, the LAB's distinction ignores the decision in Independent Order of Foresters, which explicitly holds that the Martin Act precludes claims for misrepresentation and breach of fiduciary duty arising out of the sale of CMOs and limited partnership interests. See *Independent Order of Foresters, 919 F. Supp. at 153*; see also *Vannest, 960 F. Supp. at 657 n.6*.

In Independent **[**42]** Order of Foresters, the plaintiff had alleged a variety of claims in connection with its purchases of CMOs. As in the instant case, the plaintiff claimed that the defendants made false representations to the plaintiff regarding the securities. *919 F. Supp. at 151-52*. On defendant's motion to dismiss, the court concluded as a matter of law that plaintiff's negligent misrepresentation claim could not be sustained. The court found that

> any claim that is covered by the Martin Act is therefore not actionable by a private party; otherwise, the party essentially would be permitted to bring a private action under the Martin Act. It is established that actions for negligent misrepresentation and breach of fiduciary duty, without intentional deceit, are covered by the Martin Act. . . . Plaintiff has brought both actions. Hence, these cause[s] of action are hereby dismissed.

Id. at 153-54 (citations and footnotes omitted). A similar result is mandated here.

In the instant case, Counts XIV and XV allege that the Brokers negligently and innocently misrepresented the bullish/bearish nature of certain CMOs. As asserted in the Complaint, the misrepresentations **[**43]** were made in connection with the purchase of CMOs by the Funds. Because the Martin Act precludes these causes of action, they are dismissed.

IV. The Brokers' Motion to Dismiss Counts II and XII Alleging Tortious Interference With Contracts Is Granted

HN16[] To state a claim for tortious interference with contractual relations under New York law, a plaintiff must allege "(1) the existence of a valid contract between itself and a third party for a specific term; (2) defendant's knowledge of that contract; (3) **[*293]** defendant's intentional procuring of its breach; and (4) damages." 150 *East 58th St. Partners, L.P. v. Wilkhahn Wilkening & Hahn GmbH & Co., 1998 U.S. Dist. LEXIS 1701*, No. 97 Civ. 4262, 1998 WL 65992, at *1 (S.D.N.Y. Feb. 17, 1998) (quoting *Riddell Sports Inc. v. Brooks, 872 F. Supp. 73, 77 (S.D.N.Y. 1995))*; see *Jews for Jesus, Inc. v. Jewish Community Relations Council of N.Y., Inc., 968 F.2d 286, 292 (2d Cir. 1992)*; *Union Carbide Corp. v. Montell N.V., 944 F. Supp. 1119, 1136 (S.D.N.Y. 1996)*; *Foster v. Churchill, 87 N.Y.2d 744, 749-50, 665 N.E.2d 153, 156, 642 N.Y.S.2d 583, 586 (1996)*. **[**44]** Additionally, the plaintiff must assert that defendant's actions were the "but for" cause of the alleged breach of contract - that is, that there would not have been a breach but for the activities of the defendant. See *Sharma v. Skaarup Ship Management Corp., 916 F.2d 820, 828 (2d Cir. 1990)*; *Michele Pommier Models, Inc. v. Men Women N.Y. Model Management, Inc., 1997 U.S. Dist. LEXIS 18294*, *No. 97 Civ. 6837, 1997 WL 724575*, at *3 (S.D.N.Y. Nov. 18, 1997); *Demalco Ltd. v. Feltner, 588 F. Supp. 1277, 1280 (S.D.N.Y. 1984)*; *Washington Ave. Assocs., Inc. v. Euclid Equip., Inc., 229 A.D.2d 486, 487, 645 N.Y.S.2d 511, 512* (2d Dep't 1996). The pleadings may not be conclusory; rather they must be supported by sufficient allegations of fact. See 150 East 58th St., 1998 WL 65992, at *2; *S.A.E. Motor Parts Co., Inc. v. Tenenbaum, 226 A.D.2d 518, 519, 640 N.Y.S.2d 615, 616 (2d Dept. 1996)*.

Because the Complaint does not adequately plead "but for" causation, the tortious interference with contracts claims against the Brokers must be dismissed.

A. Count II Alleging Tortious [**45] Interference With Contracts Between the Funds and ACM

LAB's Complaint alleges that, despite their knowledge that ACM's investment advisory agreements with the Funds obligated ACM to create and maintain market-neutral portfolios (or an appropriately directional portfolio for Quartz), and despite their knowledge of the Funds' decidedly bullish tilt, the Brokers induced ACM to breach its contracts by purchasing a great volume of toxic securities that were bullish or whose responses to interest rate changes were impossible to predict, and as a direct result of the interference by the Brokers with ACM's performance of its obligations to the Funds, the Funds have been damaged.

Despite the words "direct result" in the Complaint, the facts alleged negate the possibility that the Brokers' alleged actions were the "but for" cause for the alleged breaches of contract. After all, the LAB maintains that numerous dealers, including nonparties, were selling inappropriate securities to the Funds. (See Compl. P 4 (acknowledging that the Brokers were "among" the principal sellers of CMOs to the Funds).) Thus, according to the Complaint, even if ACM had not purchased CMOs from each of the **[**46]** Brokers, it would have breached its contractual obligations to the Funds by making purchases from other broker-dealers.

The LAB contends that it is mere speculation that ACM would have breached its investment advisory agreements with the Funds absent the Brokers' involvement and proposes that the Brokers are injecting a trial issue into a motion to dismiss. However, the LAB must allege facts which, if proven, would show "that there would not have been a breach but for the activities of defendant." *Sharma, 916 F.2d at 828*; see also *In re American Express Co. Stockholder Litig., 39 F.3d 395, 400-01 n.3 (2d Cir. 1994)* (stating that "***HN17***[] conclusory allegations of the legal status of the defendant's acts need not be accepted as true for the purposes of ruling on a motion to dismiss"). Here, the LAB has not alleged facts showing "but for" causation. Indeed, the LAB's own allegations are fatal to its tortious interference with contracts claim. The LAB alleges that in early 1994 one-half of the "volatile and esoteric" CMOs that the Funds owned were purchased from dealers other than Bear Stearns, DLJ, and Merrill Lynch. (See Compl. P 40.) Thus if the **[**47]** Brokers had not sold the "volatile and esoteric" CMOs to the Funds, ACM would have - and did - purchase them from other brokers.

HN18[] Once a plaintiff alleges facts, as does the LAB in the case at bar, establishing that the breaching party was predisposed toward breaching its agreement, the claim for tortious **[*294]** interference must be dismissed for failure to plead "but for" causation. See *Special Event Entertainment v. Rockefeller Ctr., Inc., 458 F. Supp. 72, 78 (S.D.N.Y. 1978)*; see also *Rapp Boxx, Inc. v. MTV, Inc., 226 A.D.2d 324, 642 N.Y.S.2d 228* (1st Dep't 1996). In dismissing a claim for tortious interference with contract, the court in Special Event Entertainment took note of plaintiff's allegations that the breaching parties "were not disposed toward honoring their alleged commitment even before [they] entered the negotiations." *Special Event Entertainment, 458 F. Supp. at 78*.

In the instant case, it cannot be said that if a specific Broker had not acted as it allegedly did the Funds would have purchased only appropriate securities. Because the LAB's allegations indicate that ACM was predisposed toward breaching **[**48]** its agreements with the Funds and would have done so independently of each of the Broker's actions or participation, the LAB has failed to allege causation. Indeed, the Complaint goes beyond alleging predisposition since ACM, in fact, purchased the "volatile and esoteric" CMOs from other broker-dealers. Thus Count II is hereby dismissed.

B. Count XII Alleging Tortious Interference With Contracts Between the Funds and the Brokers

As to Count XII, the Complaint alleges that despite the existence of the PSA Agreements and other contracts that required liquidation of the Funds' portfolios in a commercially reasonable manner and each Broker's knowledge of those contracts, each Broker intentionally interfered with the other Brokers' contracts through the provision of lowball accommodation bids, which caused commercially unreasonable liquidations in breach of the agreements.

According to the LAB, the causation requirement has been met because "but for" the Brokers' accommodation bids, the Brokers would not have breached their PSA and other agreements. Yet this conclusory allegation without any relevant supporting facts is insufficient to state a cause of action **[**49]** for tortious interference with contractual relations against the Brokers. See Euclid Equip., Inc., 229 A.D.2d at 487, 654 N.Y.S.2d at 512.

Additionally, the Complaint alleges that "as an integral part of its plan to purchase for itself the Funds' securities at prices well below fair market value, Bear Stearns entered into an agreement with Kidder, DLJ, Merrill Lynch, and other broker-dealers" to submit lowball bids. (Compl. P 130.) Furthermore, elsewhere in the Complaint, the Brokers are alleged to have engaged in "an unlawful combination and conspiracy in restraint of interstate trade and commerce" in connection with the very same activity. (*Id. P 210*.)

However, ***HN19***[] the LAB must allege "but for" causation for each individual Broker and cannot satisfy that requirement merely by alleging that two or more Brokers acted in concert to cause the breach. See Crossland Fed. Sav. Bank v. 62nd and *First Assocs., L.P., 1993 U.S. Dist. LEXIS 14332*, *No. 92 Civ. 4056, 1993 WL 410461*, at *4 (S.D.N.Y. Oct. 12, 1993); *Sharma v. Skaarup Ship Management Corp., 699 F. Supp. 440, 447 (S.D.N.Y. 1988)* [hereinafter Sharma I], **[**50]** aff'd, *916 F.2d 820 (2d Cir. 1990)*; see also *Mina Investment Holdings Ltd. v. Steven W. Lefkowitz, 1998 U.S. Dist. LEXIS 12231, 97* Civ. 1321, slip op. at 8-13 (S.D.N.Y. Aug. 6, 1998) (dismissing tortious interference with contract claim for failure to allege "but for" causation where plaintiffs alleged that defendant conspired or acted in concert with the breaching party, and the allegations demonstrated that the breaching party was not inclined to fulfill its contractual obligations). The reason for this rule is that collusion involving a party to the contract indicates as a matter of law that the party involved was predisposed to breach its contractual obligations; thus, the allegedly interfering party cannot be the "but for" cause of the breach. In fact, as previously stated, a plaintiff who asserts a claim for tortious interference with contract must allege affirmatively that there would not have been a breach but for the activities of the particular defendant. See *Sharma, 916 F.2d at 828*.

The Crossland court dismissed a defendant's counterclaim for tortious interference with contract because defendant's assertion that **[**51]** "plaintiff participated in efforts 'to conspire **[*295]** with Cineplex to breach or repudiate its Lease with [defendant]'" failed to establish "but for" causation. *Crossland, 1993 WL 410461*, at *4. The court reasoned that plaintiff's activities with the Cineplex "in no way forecloses other reasons" for Cineplex's decision to violate its contract with defendant. Id.

In Sharma I, the district court dismissed a claim for tortious interference with contractual relations where the complaint alleged that "the Skaarup defendants procured the breach 'by conspiring and acting with Chemical to make it impossible for plaintiffs to arrange the necessary financing, which Chemical was obligated to allow and encourage.'" *Sharma I, 699 F. Supp. at 447*. The court found that "the allegation that the Skaarup defendants acted in concert with Chemical implies that Chemical would have breached its obligations even without the involvement of the Skaarup defendants." Id. "In no way do plaintiffs allege that Skaarup defendants were the motivating force behind Chemical's breach." Id.

In the instant case, the allegation that the Brokers engaged in collusive **[**52]** conduct consisting of the same activity that constituted the alleged breaches of contract precludes the LAB's claim for tortious interference. Each Broker could not have been the cause of another broker's breach because, according to the Complaint, the agreement or conspiracy to liquidate the portfolios through the use of accommodation bids was a result of, and therefore flowed directly from, each Broker's individual decision to breach its agreements. As in Crossland and Sharma I, allegations of conspiracy or collusive conduct do not foreclose the possibility that the broker-dealers would have violated their contracts with the Funds regardless of the participation by the Broker at issue.

Because the LAB cannot allege that each Broker's conduct was the causal force behind the purported breaches of contract by the other broker-dealers, it has not sufficiently alleged "but for" causation, and therefore the tortious interference with contracts claim in Count XII against the Brokers is dismissed.

V. The LAB Has Not Adequately Pleaded Violations of the Sherman and Donnelly Acts

According to the LAB, instead of liquidating the Funds' securities in bona fide auctions, **[**53]** the Brokers agreed to exchange, and did exchange, lowball accommodation bids that allowed each of them, and other broker-dealers, to acquire the securities in their possession at artificially depressed prices. The LAB alleges that by agreeing to forestall a competitive auction the Brokers engaged in a conspiracy in violation of the Sherman Act, *15 U.S.C. § 1*, and New York's Donnelly Act, *N.Y. Gen. Bus. Law § 340*.

Section 1 of the Sherman Act reads, in relevant part:

> HN20[] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony . . . .

15 U.S.C. § 1.

HN21[] To withstand a motion to dismiss, the plaintiff in a Sherman Act conspiracy claim must allege a concerted action by two or more persons that unreasonably restrains interstate or foreign trade or commerce. See In re Nasdaq Market-Makers Antitrust Litig., 894 F. Supp. 703, 710 (S.D.N.Y. 1995); **[**54]** Three Crown Ltd. Partnership v. Caxton Corp., 817 F. Supp. 1033, 1047 (S.D.N.Y. 1993); Broadcast Music, Inc. v. Hearst/ABC Viacom Entertainment Servs., 746 F. Supp. 320, 325 (S.D.N.Y. 1990); accord International Distrib. Ctrs., Inc. v. Walsh Trucking Co., 812 F.2d 786, 793 (2d Cir. 1987). Additionally, the plaintiff "must do more than merely allege that a conspiracy exists, it must provide some factual basis for that allegation." Fort Wayne Telsat v. Entertainment and Sports Programming Network, 753 F. Supp. 109, 115 (S.D.N.Y. 1990); see Garshman v. Universal Resources Holding Inc., 824 F.2d 223, 230 (3d Cir. 1987); Heart Disease Research Found. v. General Motors Corp., 463 F.2d 98, 100 (2d Cir. 1972). For example, the plaintiff must identify the relevant product **[*296]** market, the co-conspirators, and describe the nature and effects of the alleged conspiracy. See In re Nasdaq, 894 F. Supp. at 710; International Television Prods. Ltd. v. Twentieth Century-Fox Television Div. of Twentieth Century-Fox Film Corp., 622 F. Supp. 1532, 1537 (S.D.N.Y. 1985). **[**55]**

HN22[] Except in narrow classes of per se violations, the plaintiff must show that the defendants acted to restrain competition. To allege unreasonable restraint of trade, something more than a private dispute must be alleged. The relevant product market must be identified, and the plaintiff must "'allege how the net effect of the alleged violation is to restrain trade in the relevant market, and that no reasonable alternative source is available' to consumers in that market." International Television Prods., 622 F. Supp. at 1534 (quoting Gianna Enters. v. Miss World Ltd., 551 F. Supp. 1348, 1355 (S.D.N.Y. 1982)); see North Jersey Secretarial School, Inc. v. McKiernan, 713 F. Supp. 577, 583 (S.D.N.Y. 1989). The economic impact in the relevant market must be specified, and the plaintiff must show that "the alleged restraint of trade tends or is reasonably calculated to prejudice the public interest." Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266, 273 (5th Cir. 1979).

In the instant case, the Brokers maintain that the LAB has not alleged any economic impact on the CMO market but only injury to the Funds **[**56]** and that this failure to plead restraint of trade mandates dismissal of the Sherman Act claim. By contrast, the LAB seeks to neutralize any such inadequacy of its pleadings by urging that the alleged bid-rigging conspiracy is a per se violation and therefore - unlike the "rule of reason" standard utilized in analyzing the sufficiency of an antitrust claim - it is not required to show deleterious impact on competition. The LAB suggests that because a horizontal bid-rigging scheme has been alleged, it is entitled to per se treatment. In support for its proposition, the LAB cites, inter alia, United States v. Koppers Co., 652 F.2d 290, 291, 294 (2d Cir. 1981), where a bid-rigging conviction was upheld without proof of unreasonable restraint of trade because the bid-rigging was found to be illegal per se. However, merely labeling its claim as "bid-rigging" does not entitle the LAB to per se status and the less stringent pleading standards that such status would afford it. Affixing certain labels to alleged conduct is insufficient to invoke per se treatment.

"The Supreme Court has characterized as HN23[] per se violations of the Sherman Act certain types **[**57]** of conduct so destructive of competition that they almost always result in unreasonable restraints of trade. Such characterization, however, is reserved for 'manifestly anticompetitive' practices." Apex Oil Co. v. DiMauro, 713 F. Supp. 587, 595 (S.D.N.Y. 1989) (citing Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)). Only a narrow class of practices warrant classification as per se violations. See Gianna Enters., 551 F. Supp. at 1354; see also Continental T.V., 433 U.S. at 49-50; Northern Pac. Ry. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958).

In its reluctance to create new categories of per se violations, the Supreme Court has held that "HN24[] it is only after considerable experience with certain business relationships that courts classify them as per se violations." United States v. Topco Assocs., 405 U.S. 596, 607-08, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972); see Apex Oil Co., 713 F. Supp. at 596. Indeed, the Supreme Court has cautioned against an "unthinking application" **[**58]** of the per se categories:

> Easy labels do not always supply ready answers. . . . Literalness is overly simplistic and often overbroad. When two partners set the price of their goods or services they are literally "price fixing," but they are not per se in violation of the Sherman Act. Thus, it is necessary to characterize the challenged conduct as falling within or without that category of behavior to which we apply the label "per se price fixing." That will often, but not always, be a simple matter.

Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 8-9, 13 n.24, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1971) (citations omitted). It is typically, therefore, necessary to scrutinize a challenged practice and the industry affected before deciding whether **[*297]** the practice is a per se violation. See Apex Oil Co., 713 F. Supp. at 596.

Courts have recognized that HN25[] a rigid per se classification is especially inappropriate where the complained-of practice is novel or unique. See Broadcast Music, 441 U.S. at 9; see Hertz Corp. v. City of New York, 1 F.3d 121, 129 (2d Cir. 1993) **[**59]** (stating that a "per se rule is used in the relatively narrow circumstance where courts have sufficient experience with the activity to recognize that it is plainly anticompetitive and lacks any redeeming virtue"). Because the LAB's allegations in the instant case involve novel business practices and relationships that have not been addressed by the courts in an antitrust context, they preclude the application of per se analysis.

The LAB alleges that the mechanism used by the Brokers for the "purchase, sale, liquidation, and transfer of the securities in the Funds' portfolios" constituted an "unlawful combination and conspiracy in restraint of trade." (Compl. P 210.) The alleged conspiracy involved agreements among the Brokers to supply "collusive, rigged, and lowball accommodation bids that were designed . . . to create the false appearance of competitive bidding for the Funds' securities in the liquidation auctions . . . and to provide a false pricing background for deemed sales . . . ." (Id. P 212.) However, the traditional "horizontal price-fixing" paradigm does not contemplate a business practice and circumstance, such as the one alleged here, in which **[**60]** an unprecedented multibillion dollar liquidation took place in a falling market, where the liquidation was governed by contract under which deemed sales were expressly permitted, where all parties understood that the contract permitted some form of concerted action as a mechanism by which to gauge prices, where there was no "widely distributed or readily available" price quotations for CMOs by which to set a standard price (id. P 33), and where all of the Brokers alleged to have created the market were on the "sell" side.

In contrast, the authority on which the LAB relies present classic textbook examples of price fixing. Because of the unique nature of the circumstances surrounding the liquidations involved at bar, a rigid per se analysis is inappropriate. See Cha-Car, Inc. v. Calder Race Course, Inc., 752 F.2d 609, 613 (11th Cir. 1985) ("HN26[] The per se standard should not be extended to alleged restraints of ambiguous effect; any departure from the rule of reason standard must be based upon demonstrable economic effect, rather than from formalistic line drawing."); cf. Apex Oil Co., 713 F. Supp. at 598 (observing that "what behavior constitutes **[**61]** a horizontal group boycott deserving of per se condemnation under the Sherman Act has been the source of considerable confusion in recent years" (citations omitted)).

Due to the novel and complex nature of the circumstances and market at issue, and the lack of clear precedent or prior consideration of this industry's customs or dynamics, the "rule of reason," requiring the demonstration of restraint of trade and economic impact in the relevant market, is the appropriate standard under which the LAB's antitrust claims will be treated. Under this standard, the Complaint fails to state a cause of action.

The LAB does not allege that the conduct of the Brokers had any economic impact on the CMO market at large or any prejudice to the public interest. Nor does it articulate how the alleged conspiracy during the last week of March 1994 had the effect of substantially lessening the competition in the relevant market. Moreover, the Complaint does not state that the Brokers' actions resulted in a lack of reasonable alternative sources for buyers and sellers of

CMOs. In short, the LAB fails to adequately allege that anyone other than the Funds themselves was injured or prejudiced by the **[**62]** actions of the Brokers. This pleading failure is fatal to the LAB's Sherman Act cause of action. As the court stated in *Jarmatt Truck Leasing Corp. v. Brooklyn Pie Co., Inc., 525 F. Supp. 749 (E.D.N.Y. 1981)*, when it dismissed a Sherman Act *§ 1* claim,

> beyond its bald conclusions as to restraint of trade, the complaint fails to allege facts which show injury to competition, as distinct from injury to a competitor. No violation of *Section 1* of the Sherman Act is possible absent proof of anti-competitive effect beyond the injury **[*298]** to plaintiffs, and facts must be pleaded from which such effect can be inferred.

Id. at 750 (citations omitted).

Instead of articulating a specified economic impact in a relevant market with defined boundaries, the LAB alleges only that "nationwide competition and trade were injured, unreasonably restrained and eliminated in relevant markets under the Sherman Act," (Compl. P 214), and that the Brokers' acts "restrained competition within the State of New York." (*Id. P 221*.) After sifting through the conclusory allegations, the Complaint simply alleges that the Funds were injured as a result **[**63]** of an alleged conspiracy during a two-day liquidation of the Funds' portfolios. That injury can be redressed in the context of the LAB's breach of contracts claims, not through the antitrust laws. Accordingly, Count VII of the Complaint is dismissed.

HN27[] New York's ***antitrust law***, the Donnelly Act, is "modeled on the Sherman Act and should be construed in light of federal precedent." *Kramer v. Pollock-Krasner Foundation, 890 F. Supp. 250, 254 (S.D.N.Y. 1995)*; see *X.L.O. Concrete Corp. v. Rivergate Corp., 83 N.Y.2d 513, 518, 634 N.E.2d 158, 161, 611 N.Y.S.2d 786, 789 (1994)*. Thus, since the LAB has failed to allege a federal antitrust claim against the Brokers, its Donnelly Act claim in Count VIII is also dismissed.

VI. Count XI Alleging Breach of Duty to Liquidate in a Commercially Reasonable Manner Is Dismissed Only as to Bear Stearns and DLJ

The Brokers held most of the securities they liquidated pursuant to repos. The LAB represents that these repos were the functional equivalent of secured loans and that the Brokers, as secured parties, were obligated by Article 9 of the Uniform Commercial Code ("UCC") to exercise their right to liquidate **[**64]** in good faith and a commercially reasonable manner. See N.Y. *U.C.C. § 1-203* (McKinney 1993); id. § 9-594 (McKinney 1990). The Complaint also alleges that the common law applicable to pledgees imposes a duty of commercial reasonableness in liquidation. In Count XI, the LAB alleges that the Brokers violated these statutory and common law duties.

Because Article 9 is only applicable to secured transactions, the maintenance of the instant claim depends upon the characterization of the repos. If they are purchase and sales agreements, the UCC is inapplicable and Count XI must be dismissed. If they are secured loans, the claim stands.

A. Repurchase Agreements Defined [9]

HN28[]

A repurchase agreement, by its terms, involves two separate but related transactions: **[**65]** (1) a sale by a party (the "repo seller") of securities in exchange for cash and (2) an agreement by the repo seller to repurchase the same or equivalent securities for a specified price at a future date. In a reverse repurchase agreement, the party initially buys the securities in exchange for cash, and incurs a forward obligation to resell them. Every repo is also a reverse repo; that is, a reverse repurchase agreement is simply a repurchase agreement viewed from the

[9] The BMA, as amicus curiae, has submitted a memorandum to enlighten the Court about repos in general and their importance to the debt capital markets. The discussion in this subsection is based primarily on the BMA's amicus curiae brief.

perspective of the repo buyer. See *In re Bevill, Bresler & Schulman Asset Management Corp., 67 B.R. 557, 566-67 (D.N.J. 1986)*.

Repos are creatures of the capital markets. Their purchase-and-sale form reflects a value-for-value exchange designed as such for use explicitly in those markets. The legal status of repo agreements is not easily subject to characterization - the purchase-and-sale framework incorporates characteristics of other transactional forms, including financings. For example, as in a financing, the repurchase price for the securities reflects the time value of the cash obtained by the repo seller in the initial sale. However, the repo structure is distinct from that of a loan in other **[**66]** respects. Unlike a lender taking collateral for a secured loan, a repo buyer "take[s] title to the securities received and can trade, sell or pledge them." *SEC v. Drysdale Sec. Corp., 785 F.2d 38, 41 (2d Cir. 1986)*. Such free transferability of repo **[*299]** securities renders repos attractive to securities dealers whose inventories of securities turn over rapidly and who may require securities to be available for a variety of settlement obligations. At the same time, the adjustability of the term of repo agreements makes them an ideal financial management tool for institutional investors investing cash balances. Thus, for "such entities as state and local governments, public and private pension funds, money market and other mutual funds, banks, thrift institutions, and large corporations, repos have become a vital tool of cash management." S. Rep. No. 98-65, at 45 (1983) [hereinafter 1983 Senate Repo Amendments Report].

Repos are the principal method used by securities dealers to fund their acquisition of U.S. Treasury securities. See Department of the Treasury, Sec. and Exch. Comm'n, and Bd. of Governors of the Fed. Reserve Sys., Joint Report on **[**67]** the Government Securities Market at A-11 (Jan. 1992) [hereinafter 1992 Joint Report]. The Treasury relies heavily on primary dealers to absorb new government debt issues, and repos are extensively used by dealers to obtain the cash necessary to permit their underwriting of such issues. See, e.g., Government Securities Act Amendments of 1993, H.R. Rep. No. 255, at 10-11 (1993), reprinted in 1993 U.S.C.C.A.N. 2996, 2997. By maximizing the ease and flexibility with which dealers can acquire and hold inventories of Treasury securities, repo transactions contribute significantly to the depth and liquidity of the secondary market for Treasury securities. See, e.g., 1983 Senate Repo Amendments Report at 45-46. Together with other trading techniques and transactions, repos and reverse repos "have benefitted the market and the taxpayer by increasing liquidity, thereby lowering the government's financing costs." 1992 Joint Report at 1. [10]

[68]** Repo transactions perform a similar function with respect to other fixed-income securities, including federal agency securities such as those issued or guaranteed by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). [11] They are a vital and cost-efficient mechanism for broker-dealers to fund their inventory and dealing activities in these securities. The existence of a repo market in a particular type of securities also adds to the liquidity of the underlying cash market for the securities. CMOs, like those involved in the instant case, are securities where cash flows from a securitized mortgage pool are repackaged into classes of interests with different projected maturities and principal repayment schedules which appeal to a broad range of investors with specific investment needs and objectives. CMOs allow their investors to retain the yield and credit quality advantages of mortgage-backed securities while reducing many of their perceived burdens, particularly those relating to prepayment uncertainty. The ultimate beneficiaries of CMOs and other mortgage-backed securities are residential home buyers who are **[**69]** able to obtain lower-cost mortgages as a result of the cheaper cost of funds to originators. As Congress has recognized, the CMO market, and the repo market for CMOs which enable dealers in these securities to fund their inventory and make markets in

---

[10] Repos involving U.S. Treasury securities are also used by the Federal Reserve System as its primary tool for implementation of monetary policy. See *In re Bevill, Bresler & Schulman Asset Management Corp., 878 F.2d 742, 745 (3d Cir. 1989)*.

[11] As stated by the BMA, the repo market fosters important interrelationships among the different types of fixed-income securities. The market for federal agency securities, and the fixed-income markets generally, are closely linked to the market for Treasury securities: the price of an agency security is generally expressed in terms of its "spread" over Treasury securities of comparable maturity, and dealers quickly act on arbitrages between Treasury and agency security markets. See 1992 Joint Report at D-4 to D-5. Rapid movements of securities through repos and reverse repos facilitate this process and are thus among a number of financial mechanisms that contribute to the smooth functioning of the nation's fixed-income markets.

these securities, is, like the repo market in U.S. Treasury securities, important to the national economy. See generally S. Rep. No. 98-293 (1984) (noting that the Secondary Mortgage Market Enhancement Act in 1984 was enacted for the purpose of "encouraging the 'broadening of the market for mortgage-backed securities by encouraging **[*300]** more extensive involvement of the private sector'").

[70] B. Characterization of the Repos**

The key to the inquiry as to whether the repos in this case should be characterized as purchase and sale agreements or secured loans lies in the intention of the parties. Article 9 only applies to transactions in which the parties' intent is to create a security interest. See N.Y. *U.C.C. § 9-102* (McKinney 1990); see also *In re O.P.M. Leasing Servs., Inc., 23 B.R. 104, 115 (Bankr. S.D.N.Y. 1982)* (stating that "***HN29***[] Article 9 applies only to a transaction which is intended to create a security interest in personal property"). ***HN30***[] To determine whether the parties to a transaction intended to create a security interest, courts look to the agreement governing the transaction. Where the parties' intention is clearly and unambiguously set forth in the agreement, effect must be given to the expressed intent. See *John Hancock Mutual Life Ins. Co. v. Amerford Int'l. Corp., 22 F.3d 458, 461 (2d Cir. 1994)* (stating that ***HN31***[] where the agreement is clear, courts should look to the "terms expressed in the contract itself, rather than to 'extrinsic evidence of terms that were not expressed or judicial views on what terms might **[**71]** be preferable'"); In re *O.P.M., 23 B.R. at 116* & n.8 (observing that "it would have been a simple matter for the parties expressly to provide . . . for the grant of a security interest," but because they did not "it is evident that no security interest was ever intended"). ***HN32***[] The objective intent of the parties "expressed or apparent in the writing controls" the agreement's interpretation, while the "undisclosed, subjective intent of the parties has no bearing" on the construction of the contract. *In re Bevill, 67 B.R. at 586*.

In the case at bar, the governing contracts include the PSA Agreements into which Bear Stearns and DLJ entered with each of the Funds, the PSA Agreement into which Merrill Lynch entered with Quartz, and the trade confirmations relied on by Merrill Lynch as to Granite Partners and Granite Corp. [12]

[72] 1. The PSA Agreements**

According to the Brokers, the plain language of the PSA Agreement demonstrates that each of the Brokers was an outright purchaser of bonds from the Funds and not merely a "secured party." The Brokers assert that the intention of the Brokers and the Funds not to engage in secured transactions is made clear by paragraph 6 of the PSA Agreement, which reads, in pertinent part: "the parties intend that all Transactions hereunder be sales and purchases and not loans." Thus, under the PSA Agreement, the securities acquired by the Brokers in reverse repos were sold to the Brokers and were not collateral pledged to secure a loan. Consistent with the parties' intent to effect a transfer of ownership, paragraph 8 of the PSA Agreement states, in relevant part:

> Title to all Purchased Securities shall pass to Buyer and, unless otherwise agreed by Buyer and Seller, nothing in this Agreement shall preclude Buyer from engaging in repurchase transactions with the Purchased Securities or otherwise pledging or hypothecating the Purchased Securities.

Thus, claim the Brokers, this Court need not look beyond the four corners of the PSA Agreement to determine **[**73]** that the repurchase transactions at issue are purchases and sales and not secured loans.

The LAB counters that the contracts reflect the parties understanding that the Funds' repos were the functional equivalent of secured loans, extrinsic evidence will indicate that the Brokers viewed their repos as collateralized

---

[12] Consideration of the agreements themselves is appropriate on the motion to dismiss because the LAB must rely on the agreements to prove contractual relations with the Brokers, the LAB had notice of them when the action was filed, and the LAB itself utilizes them in its opposition papers. See *Belin, 1998 WL 391114*, at *3-*4; see also *San Leandro Emergency Med. Group Profit Sharing Plan v. Philip Morris Cos., 75 F.3d 801, 808-09 (2d Cir. 1996)* (permitting consideration of the full text of documents "integral" to plaintiff's claim on motion to dismiss); *Barnum v. Millbrook Care Ltd. Partnership, 850 F. Supp. 1227, 1230* (S.D.N.Y.) (finding reference to the full text of a contract on a motion to dismiss appropriate even though the plaintiff had not formally incorporated it by reference), aff'd, ***43 F.3d 1458 (2d Cir. 1994)***.

loans, and a finding that repurchase agreements are purchases and sales can only be accomplished after a careful consideration **[*301]** of all of the evidence on a more fully-developed record.

In In re Bevill, a bankruptcy court was required to determine whether the securities underlying repo transactions were property of the debtor estates or belonged instead to repo and reverse repo participants. That issue turned on whether the repos constituted purchases and sales or collateralized loans. In determining the parties' intent, the court noted that the trade tickets of each executed repo reported them as purchases and sales, that the standard Repurchase Agreements used the language of "buyer" and "seller" - not lender and borrower - and that under these agreements the buyer could freely rehypothecate the purchased securities. The court concluded that "***HN33***[] the unequivocal **[**74]** language of purchase and sale in the repo and reverse repo agreements at issue . . . is strong prima facie evidence that the parties intended the transactions to be treated accordingly." *In re Bevill, 67 B.R. at 597*. However, despite noting that the repo agreement at issue made no reference to secured loans or to any intention to grant a security interest to the lender, because the agreements contained "terms customarily found in secured loan transactions," the court held that it had to consider extrinsic evidence of the parties' intentions before it could characterize the repos in that case as sales or loans. See *id. at 590*.

In its final analysis, the court in In re Bevill concluded that

> repos and reverse repos are hybrid transactions which do not fit neatly into either a secured loan or purchase and sale classification. There is no question that repo and reverse repo transactions have functional attributes which resemble collateralized loans. The initial taking of margin (the "haircut"), the right of substitution, and the "mark-to-market" provisions are undeniably secured loan characteristics not commonly found in purchase and **[**75]** sale transactions. In addition, principal and/or interest paid on the underlying securities remains the property of the seller. On the other hand, the repo buyer's unrestricted right to trade the securities during the term of the agreement represents an incident of ownership which does not pass to a secured lender in a collateralized transaction.

Id. at 596-97.

Indeed, as the Second Circuit stated in Drysdale, the "'[defendant] ignores a most significant difference between repos and standard collateralized loans. . . . In the latter transaction the lender holds pledged collateral for security and may not sell it in the absence of a default. In contract, repo "lenders" take title to the securities received and can trade, sell or pledge them.'" *Drysdale, 785 F.2d at 41*, quoted in *In re Bevill, 67 B.R. at 593-94*.

Furthermore, stated the court in In re Bevill,

> while the risk of market fluctuations in the value of the underlying securities rests with the original seller, this truism is of no legal consequence. The seller's interest in the market value of the securities is no greater in a secured loan transaction **[**76]** where he retains beneficial ownership of the securities than in a purchase and sale transaction where he is contractually bound to reacquire ownership of them. Clearly, any attempt to determine whether a repo or reverse repo transaction is more like a secured loan than a purchase and sale by weighing economic factors on a finely tuned balance scale would be an essentially formalistic and ultimately unproductive exercise.
>
> In any event, the proper characterization of repo and reverse repo agreements does not rest solely on an evaluation of the economic substance of the individual transactions. Rather, the intent of the parties viewed in the context of the entire market in which these transactions take place is the controlling consideration under . . . New York . . . law. This intent must be gleaned from the express terms employed in the transaction documents as well as relevant extrinsic evidence of intent, including trade custom and usage, market realities and the parties' course of conduct and performance.

In re Bevill, 67 B.R. at 597.

The agreements in In re Bevill differ from the instant PSA Agreements in an important **[*302]** respect such that **[**77]** extrinsic evidence need not be considered: while the agreements in that case used isolated terms of purchase and sale, the PSA Agreements at issue affirmatively state the parties' intent to treat the transaction as such. Thus, claim the Brokers, the LAB cannot point to any place in the PSA Agreements that make their terms ambiguous. Moreover, they continue, the PSA contracts were created after the decision in In re Bevill and after Congress amended the Bankruptcy Code in 1984 to make clear that repos should not be considered secured transactions for bankruptcy purposes. In addition, the court in In re Bevill soundly rejected the contention that the similarities between repos and loans were a basis for construing repo transactions as secured loans. "***HN34***[] The mere presence of secured loan characteristics in repo and reverse repo agreements is not enough to negate the parties' voluntary decision to structure the transactions as purchases and sales." *Id. at 598*.

Because the standard industry documentation for repo transactions prepared by the BMA and used by the Brokers in this case explicitly states that the parties "intend that all Transactions hereunder be sales **[**78]** and purchases and not loans," PSA Agreement P 6, that intention must be honored. [13] Therefore, the repos entered into by Bears Stearns and DLJ with each of the Funds, as well as the PSA agreement entered into by Merrill Lynch with Quartz, are to be treated as a matter of law as purchase and sale agreements and not secured loans subject to Article 9 of the UCC.

[79]** Policy considerations and trade custom and usage support such a finding. Moreover, ignoring the affirmative intent of the parties would inject unpredictability and insecurity in the manner by which major financial institutions obtain credit. The decision by market participants to enter into a repo transaction documented using the PSA Agreement, structured as a purchase and sale, thus carries with it a wide variety of legal and regulatory consequences. Market participants who prefer to enter into secured lending transactions rather than repos may do so (with the attendant legal result that their transaction will be treated as a loan); participants who prefer to enter into a sale and wholly distinct forward purchase (with attendant legal consequences) may also do so. The determination of market participants that elect to enter into a repo transaction has been and should be respected and their settled expectations will not be overturned.

According to the BMA, repos have evolved to fulfill certain market needs and objectives that cannot be served by secured loans. Critical to the usefulness, flexibility, and liquidity of the repo market is the transfer of ownership of the repo securities **[**80]** to the repo buyer and the repo buyer's ability to sell, transfer, or pledge the securities purchased in a repo transaction during its term. The mobility of repo securities is what makes them a key tool of the funding markets, enabling dealers to continuously convert their securities inventory to cash to use to finance the purchase of yet additional securities and thereby make markets. Reverse repos are often used by dealers to obtain securities needed for deliveries when they are "short," thereby avoiding "fails" in the market and facilitating settlements and the smooth functioning of the market. The flexibility of repo buyers with respect to the repo securities also contributes to the popularity of repos as flexible cash management vehicles, thereby bringing a large supply of diverse cash investors to the repo markets.

[*303] Applying to repurchase transactions the provisions of Part 5 of UCC Article 9, asserts the BMA, which governs the disposition of collateral after default, for example, would undermine the requisite flexibility of the repo market. As many of the provisions in Part 5 are not subject to consensual predefault waiver by the parties, see *U.C.C. § 9-501(3)*, **[**81]** repo counterparties would be unable to establish by contract their rights and remedies in a default situation, thereby introducing uncertainties in the repo marketplace. The health and efficiency of the repo market depends on market participants' ability to transact on well-settled understandings and certainty as to the consequences of their transactions and/or failure to perform their transactions. It was this need for certainty in

[13] The operative provisions of the PSA Agreement conform to this stated intention. The parties are denominated "Buyer" and "Seller," they agree that on the "Purchase Date" for a transaction the "Purchased Securities" will be transferred to the "Buyer" or its agent against payment of the "Purchase Price." On the "Repurchase Date," this process occurs in reverse. The parties further acknowledge the difference between their repo transactions and conventional secured indebtedness by agreeing that each "Transaction" is a "repurchase agreement" and a "securities contract" entitled to the benefits of special protective provisions under the Bankruptcy Code. Perhaps most telling, the parties agree that the title to the Purchased Securities passes to the Buyer, who is explicitly permitted to engage in repos with the Purchased Securities or otherwise transfer or hypothecate them. See *Drysdale, 785 F.2d at 41*. Under prevailing market practice, the Buyer, as owner, may sell the Purchased Securities.

expectations, according to the BMA, that led the repo market participants, through the BMA, to publish the PSA Agreement as industry standard contractual documentation and provide a legal framework establishing the rights and obligations of the parties in repo transactions based on market practices. [14]

[82]** Application of Article 9 would additionally cast doubt on the efficacy of certain remedy provisions of the widely used PSA Agreement in cases of default. For example, the Agreement provides that upon default of the repo seller, a repo buyer may elect, in lieu of selling the purchased securities, to engage in a "deemed sale" of the purchased securities and give the defaulting repo seller credit in an amount equal to the price obtained from a generally recognized source. See PSA Agreement P 11. The repo buyer retains its ability to seek payment from the repo seller for any remaining deficiency between the credited "deemed sale" price and the contractually agreed repurchase price (plus any other amounts owing by the defaulting party). Id. In contrast, Article 9 requires a secured party, who under certain circumstances takes in a defaulting debtor's collateral, to receive the debtor's consent and waive its deficiency claim. See *U.C.C. § 9-505*. The BMA proposes that the application of this provision, with its 21-day notice requirement, would nullify the "real world" swift liquidation mechanism that the repo market and its participants require. This sort of uncertainty could **[**83]** have adverse consequences on the repo market.

The LAB concedes that repos play a vital role in providing liquidity, thereby reducing risk and interest rates, but it attempts to distinguish the repos at issue here - which were primarily in securities issued by the government-sponsored agencies Fannie Mae and Freddie Mac - by claiming that they do not play anything like the role of Treasury bills in the nation's financial infrastructure. The LAB thus urges formulation of different rules based on the type of securities involved. Yet the LAB ignores the fact that the PSA Agreement is an industry standard master repo agreement that applies generally to all repo transactions and does not distinguish between Treasuries and other types of securities. Therefore the LAB requests a ruling that the same words in the very same contract should be interpreted differently depending upon the type of security at issue. Identical contracts would sometimes be subject to Article 9 and sometimes not. Such a result fosters unwarranted uncertainty.

Moreover, the market for Fannie Mae and Freddie Mac securities is vitally important not only to the nation's financial markets but also to the nation's housing **[**84]** markets. Congress's goal in creating CMO-issuing National Mortgage Associations like Fannie Mae and Freddie Mac was to

> provide ongoing assistance to the secondary market for residential mortgages . . . by increasing the liquidity of mortgage investments and improving the distribution **[*304]** of investment capital available for residential mortgage financing; and . . . promote access to mortgage credit throughout the Nation . . . by increasing the liquidity of mortgage investments and improving the distribution of investment capital available for residential mortgage financing . . . .

12 U.S.C. § 1716. Indeed, the success of Fannie Mae and Freddie Mac and the securities they issue has helped to significantly lower the mortgage rates paid by homeowners in this country. See S. Rep. No. 102-282, at 30-31 (1992) (stating that "most mortgage interest rates are generally thought to be 1/4 to 1/2 of a percentage point lower . . . than they would otherwise be"). "Together, [Fannie 'Mae and Freddie Mac] now provide financing for more than a third of all home loans outstanding . . . ." Id.

Furthermore, the instant ruling is consistent with **[**85]** case law. ***HN35***[] In contexts such as commercial law and the antifraud provisions of the federal securities law, repos generally are viewed as purchases and sales. See *In re Bevill, 67 B.R. 557*, and *Drysdale, 785 F.2d 38*. For other purposes, such as taxes, they are typically viewed as financings. See *Nebraska Dep't of Revenue v. Loewenstein, 513 U.S. 123, 130 L. Ed. 2d 470, 115 S. Ct. 557*

---

[14] The BMA also maintains that Article 9 would impinge upon repo participants' rights with respect to repo securities in the nondefault context. The BMA uses, as an example, section 9-207, which prescribes the rights and duties of a secured party holding collateral in its possession. While section 9-207(2)(e) provides that "the secured party may repledge the collateral upon terms which do not impair the debtor's right to redeem it," it does not permit a secured party to sell or dispose of the collateral in its possession. The application of Article 9 would negate a repo buyer's contractual right to freely sell the repo securities and may hamper the repo buyer's right to rehypothecate the repo securities. These rights of the repo buyer are inherent features of repo transactions, key to their value to the capital markets.

(1994). For accounting purposes, they are viewed either way, depending upon particular factors. In yet other circumstances, such as under *Section 559 of the Bankruptcy Code*, repo transactions have been assigned a distinct legal status which acknowledges their unique attributes.

Because the PSA Agreement is not ambiguous, because it clearly provides that the parties intended the transaction to be treated as a purchase and sale, and because such a finding is consistent with the practices and expectations of the securities industry, see *In re Bevill, 67 B.R. at 598*, Count XI of the Complaint is dismissed as to Bear Stearns and DLJ, and as to Merrill Lynch it is dismissed only with respect to the PSA Agreement into which it entered with **[**86]** Quartz. [15]

2. Trade Confirmations Upon Which Merrill Lynch Relied

Merrill Lynch did not execute PSA Agreements with Granite Partners and Granite Corp. Instead, it relied on trade confirmations for the contract terms applicable to the repo transactions. Those confirmations state:

> THE TRANSFEROR/SELLER SHALL BE DEEMED TO HAVE GRANTED THE TRANSFEREE/PURCHASER, AS OF THE PURCHASE DATE, A SECURITY INTEREST IN THE SECURITIES ("SECURITIES" PLEDGED/SOLD PURSUANT TO A TRANSACTION HEREUNDER) FOR SUCH TRANSACTION (AND IN ALL INCOME AND DISTRIBUTIONS THEREON AND PROCEEDS THEREOF) TO SECURE ITS OBLIGATION TO REPURCHASE SUCH SECURITIES, UNLESS THE SELLER IS IN DEFAULT, THE SELLER SHALL BE ENTITLED TO ALL PAYMENTS OF PRINCIPLE [sic] AND INTEREST ON THE SECURITIES, AND THE PURCHASER SHALL, UPON RECEIPT, REMIT TO THE SELLER ANY SUCH PAYMENTS **[**87]** RECEIVED BY IT, SUBJECT TO ITS OBLIGATION TO RESELL THE SECURITIES (OR EQUIVALENT SECURITIES) TO THE SELLER, THE PURCHASER MAY SELL, PLEDGE OR OTHERWISE TRANSFER THE SECURITIES.

Here, the language is far more ambiguous. Unlike the PSA Agreement, it does not contain an unequivocal expression of intent. In cases where the express terms of a contract or agreement are ambiguous, unclear, or conflicting, and the intended meaning and operation of the contract cannot reasonably be derived from the "four corners of the writing," courts allow the "introduction and examination of extrinsic evidence of intent as an aid in interpretation." *In re Bevill, 67 B.R. at 587*. Consideration of extrinsic evidence of the parties' intent is properly left to a later time, with the benefit of a fully-developed factual record. Therefore, the **[*305]** motion to dismiss Count XI against Merrill Lynch regarding the transactions evidenced by trade confirmations is denied.

VII. Although the Motion to Dismiss Count X Alleging Breach of Contract Due to Commercially Unreasonable Liquidations Is Denied, the Claim Is Hereby Modified

In Count X, the LAB alleges that the Brokers **[**88]** violated the PSA and other agreements by liquidating the Funds' securities at below-market prices. By exchanging lowball accommodation bids and conducting sham auctions that led to the sale of the Funds' portfolios at prices substantially below fair market value, the Brokers breached their obligation to liquidate at a price "obtained from a generally recognized source or the most recent closing bid quotation from such a source." (Compl. P 233.) Additionally, the LAB contends, by deliberately depressing the prices at which the Funds' CMOs were sold the Brokers breached their contractual duty to liquidate in good faith and in a commercially reasonable manner.

While DLJ does not move against this cause of action, Merrill Lynch proposes that it should be dismissed under *Rule 9(b)*, and Bear Stearns challenges it insofar as it alleges a breach of the implied duty of "commercial reasonableness."

A. *Rule 9(b)* Does Not Apply to the Contract Claim

---

[15] Additionally, the LAB's allegation that the forward contracts between the Funds and Bear Stearns resulted in secured loans is unsupported and therefore dismissed.

On its face, *Rule 9(b)* does not apply to contract claims, but only to "averments of fraud and mistake." Merrill Lynch's contention that Count X fails to meet the requirement of *Rule 9(b)* does not command solicitude because the authority **[**89]** it cites is inapposite to the instant case.

For example, Merrill Lynch invokes *Frota v. Prudential-Bache Securities, Inc., 639 F. Supp. 1186, 1193 (S.D.N.Y. 1986)*, in which the court applied *Rule 9(b)* to a claim that "merely incorporates the allegations of the securities fraud and RICO counts." By contrast, the LAB's contract claim does not "merely incorporate" the fraud allegation, nor does it depend in any way on a showing of fraud. It is based on the allegation that the Brokers' below-market liquidation of the Funds' portfolios breached specified contract provisions, as well as the Brokers' obligation to liquidate in good faith. *Rule 9(b)* is inapplicable to such a claim.

B. Implied Duties of Good Faith and Commercial Reasonableness

The Complaint alleges a breach of both the implied duties to liquidate the Funds' holdings in good faith and in a "commercially reasonable manner." (Compl. § 232.) While Bear Stearns has no quarrel with the requirement of good faith, it takes issue with that of commercial reasonableness.

"Implicit in all contracts is a covenant of good faith and fair dealing in the course of contract performance." *Dalton v. Educational Testing Serv., 87 N.Y.2d 384, 389, 663 N.E.2d 289, 292, 639 N.Y.S.2d 977, 979 (1995)*. **[**90]** The covenant encompasses "any promises which a reasonable person in the position of the promisee would be justified in understanding were included," and it prohibits either party from acting in a manner "which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract." Id. (citations and internal quotations omitted); see *Travellers Int'l, A.G. v. Trans World Airlines, Inc., 41 F.3d 1570, 1575 (2d Cir. 1994)* (stating that "the implied covenant of good faith and fair dealing inheres in every contract"). Breach of the covenant gives rise to a cognizable claim. See *Chase Manhattan Bank, N.A. v. Keystone Distribs., Inc., 873 F. Supp. 808, 815 (S.D.N.Y. 1994)* (finding that "[a] party may be in breach of its implied duty of good faith and fair dealing even if it is not in breach of its express contractual obligations").

Indeed, the broker's "power to liquidate must be exercised in good faith under the existing facts and circumstances." *Cauble v. Mabon Nugent & Co., 594 F. Supp. 985, 992 (S.D.N.Y. 1984)*; see *Modern Settings, Inc. v. Prudential-Bache Sec., Inc., 936 F.2d 640, 644 (2d Cir. 1991)* **[**91]** (stating that the "contractual power [to liquidate] must be exercised in good faith"); see also *Travellers Int'l, 41 F.3d at 1575* ("Even when a contract confers **[*306]** decision-making power on a single party, the resulting discretion is nevertheless subject to an obligation that it be exercised in good faith.").

While an implied covenant of good faith and fair dealing is recognized in most contracts under New York law, the duty cannot be used to create independent obligations beyond those agreed upon and stated in the express language of the contract. See *Warner Theatre Assoc. Ltd. Partnership v. Metropolitan Life Ins. Co., 1997 U.S. Dist. LEXIS 17217*, *No. 97 Civ. 4914, 1997 WL 685334*, at *6 (S.D.N.Y. Nov. 4, 1997). Any purported duty of good faith "cannot add to, detract from, or alter the terms of the contract itself." Id.; see *CIBC Bank and Trust Co., Ltd. (Cayman) v. Banco Cent. do Brasil, 886 F. Supp. 1105, 1118 (S.D.N.Y. 1995)* ("Although the obligation of good faith is implied in the contract, it is the terms of the contract which govern the rights and obligations of the parties.").

The phrase "commercially **[**92]** reasonable manner," however, has been given special meaning under Article 9 of the UCC, and the totality of those concepts will not be imported wholesale into the PSA Agreement to which, as discussed above, Article 9 does not apply. The contract claim is to be interpreted under ordinary contract jurisprudence. Therefore, to the extent the LAB seeks to impose an implied obligation by its use of the term "commercially reasonable," Count X is to be modified such that any reference invoking the duty to liquidate "in a commercially reasonable manner" shall be deleted. If the LAB wishes, it may replace the term with the covenant of "fair dealing."

VIII. The LAB May Not Maintain Count I of the Complaint Alleging a Claim for Inducing and Participating in a Breach of Fiduciary Duty Against the Brokers

To state a claim for inducing or participating in a breach of fiduciary duty under New York law, [16] the plaintiff must allege that a fiduciary breached its obligations to another, that the defendant knowingly induced or participated in the breach, and that the plaintiff suffered damages as a result of the breach. See *S & K Sales Co. v. Nike, Inc., 816 F.2d 843, 847-48 (2d Cir. 1987)*. **[**93]**

[94]** As stated in the Complaint, the objective of Granite Corp. and Granite Partners was to invest on a market-neutral basis. Askin and ACM were supposed to employ sophisticated computer models capable of analyzing the impact of interest rate changes on prepayments, cash flows, and yields in order to balance bullish and bearish CMOs. It was anticipated that the Funds would achieve a high rate of return through this process, without exposure to upward or downward movements in interest rates. The Complaint **[*307]** alleges that Askin and ACM had a fiduciary duty to adhere to this investment strategy. They, however, breached that duty by failing to use adequate analytic models and by constructing portfolios that, far from being market-neutral, were dangerously bullish, containing, in particular, inordinate numbers of inappropriate, highly toxic, bullish inverse IOs. [17]

[95]** The Complaint further alleges that the Brokers knew of Askin and ACM's duty to follow the Funds' investment strategy; that they knew Askin and ACM lacked the ability to analyze the securities that the Brokers were creating and selling to the Funds; and that they knew of the Funds' drastic bullish tilt. Despite this knowledge, the Brokers induced and participated in Askin and ACM's breach of duty by urging them to buy ever greater quantities of toxic inverse IOs and other bullish or unpredictable securities, including inappropriate forward-settling CMOs that the Brokers knew Askin and ACM were unable to analyze.

The Brokers maintain that the claim for inducing and participating in Askin and ACM's breach of fiduciary duty fails because of the doctrine of in pari delicto. According to the Brokers, the LAB is collaterally estopped from bringing the instant claim because of the decision in *Granite Partners, L.P. v. Primavera Familienstiftung, 194 B.R. 318 (Bankr. S.D.N.Y. 1996)* [hereinafter Granite I], and because the in pari delicto defense bars the claim as a matter of law. The LAB counters that Granite I does not preclude the claim because the allegations **[**96]** in the instant Complaint differ from that in Granite I, that the applicability of in pari delicto cannot be established on the pleadings because the relative degrees of culpability must be determined, and that the doctrine is inapplicable to a bankruptcy trustee and his successors.

A. *Granite I* and Collateral Estoppel

---

[16] As an initial matter, the LAB contends that their tort claim is to be governed by the laws of the Cayman Islands and Delaware because the Funds were organized under the laws of those jurisdictions. New York law, however, governs this cause of action. It was brought in a New York federal court by and against entities and individuals located in New York and based on facts alleged to have occurred in New York. Significantly, the disposition of the claim - that the Brokers induced and participated in a breach of fiduciary duty by a money manager of investment funds - is vitally important to the financial industry, which is centered in New York. For these reasons, New York substantive law applies to the claim and, therefore, to the applicability of the Brokers' in pari delicto defense discussed below. See *Brink's Ltd. v. South African Airways, 93 F.3d 1022, 1030 (2d Cir. 1996)*, cert. denied, *519 U.S. 1116, 136 L. Ed. 2d 845, 117 S. Ct. 959 (1997)*.

The LAB cites to this Court's decision in *ABF Capital Management v. Askin Capital Management, L.P., 957 F. Supp. 1308, 1331 (S.D.N.Y. 1997)*, for the proposition that its claim for inducing and participating in breach of fiduciary duty will be governed by Cayman Islands and Delaware law. Yet, the LAB misreads the decision. In discussing whether investors in the Funds had standing to bring aiding and abetting claims against broker-dealers, this Court in ABF merely held that the investors' claims are derivative claims under Cayman Islands and Delaware law. Id. A choice of law analysis to determine which law should apply to the aiding and abetting breach of fiduciary duty claim was not performed at that time. As noted recently in *Solow v. Stone, 994 F. Supp. 173 (S.D.N.Y. 1998)*, under New York's choice of law rules, the law of the state of incorporation controls a breach of fiduciary duty claim while New York law controls the plaintiff's claim for aiding and abetting the breach of fiduciary duty because the acts giving rise to the claim took place, in significant part, in New York. *Id. at 177*.

[17] Quartz was intended to be market-directional. Despite concerns about rising interest rates, which dictated the purchase of bearish securities, Askin and ACM breached their duties by acquiring for Quartz the same bullish CMOs they were buying for Granite Corp. and Granite Partners.

In Granite I, The Honorable Stuart M. Bernstein ruled that the Funds, then represented by the Trustee, could not bring an aiding and abetting breach of fiduciary duty claim against several broker-dealers under the doctrine of in pari delicto. The Brokers submit that this holding collaterally estops the Funds from asserting Count I of the Complaint.

The doctrine of collateral estoppel "bars a party from relitigating in a second proceeding an issue of fact or law that was litigated and actually decided in a prior proceeding." *Metromedia Co. v. Fugazy, 983 F.2d 350, 365 (2d Cir. 1992)*. For collateral estoppel to apply, two requirements must be satisfied: "first, the identical issue necessarily must have been decided in the prior action and be decisive of the present action, and second, the party to be precluded . . . must **[**97]** have had a full and fair opportunity to contest the prior determination." *Kaufman v. Eli Lilly & Co., 65 N.Y.2d 449, 455, 482 N.E.2d 63, 67, 492 N.Y.S.2d 584, 588 (1985)*; see also *Computer Assocs. Int'l, Inc. v. Altai, Inc., 126 F.3d 365, 371 (2d Cir. 1997)*, cert. denied, *140 L. Ed. 2d 814, 118 S. Ct. 1676 (1998)*.

In Granite I, the Trustee filed an adversary proceeding in the Bankruptcy Court on behalf of the Funds to enjoin certain equity holders and their representatives from violating the automatic stay by pursuing claims against Askin and ACM for breach of fiduciary duty and against several broker-dealers, including the Brokers here, for aiding and abetting that breach. The Trustee asserted that the claims for mismanagement, waste, and breach of fiduciary duty belonged to the debtor Funds, not the investors. Judge Bernstein found that once bankruptcy ensues, claims for breach of fiduciary duty could be asserted only by the Trustee on behalf of the debtor estates. *Granite I, 194 B.R. at 328*. However, Judge Bernstein also found that where the debtor's insiders acted in concert with third parties, the doctrine **[**98]** of in pari delicto may be invoked.

In Granite I, the investors had alleged that the defendant broker-dealers aided, abetted, and influenced Askin and ACM to breach their fiduciary duties to the Funds. **[*308]** *Id. at 330*. Judge Bernstein found that "the law imputes to the corporation the knowledge and conduct of the guilty insider; a corporation only acts through its agents, and the imputation of the agent's wrongful conduct lies at the heart of in pari delicto." Id. Relying on the Second Circuit's decisions in *Hirsch v. Arthur Andersen & Co., 72 F.3d 1085 (2d Cir. 1995)*, and *Shearson Lehman Hutton, Inc. v. Wagoner, 944 F.2d 114 (2d Cir. 1991)*, Judge Bernstein concluded that the doctrine of in pari delicto applied to the Funds and would preclude the Trustee from asserting claims against the broker-dealers for aiding and abetting a breach of fiduciary duty by Askin and ACM. The analysis in Granite I was confirmed by this Court. See *Primavera Familienstiftung v. Askin, 1996 U.S. Dist. LEXIS 12683*, No. 95 Civ. 8905, 1996 WL 494904, at *12 (S.D.N.Y. Aug. 30, 1996) ("Applying **[**99]** the doctrine, Judge Bernstein held that the in pari delicto doctrine deprived the Trustee of the ability to bring the claims - which would otherwise belong to the Funds' estate - for waste, mismanagement, and breach of fiduciary duty.").

The Brokers urge that because the Funds are the same parties that moved to enjoin the investor suits in Granite I, they had a full and fair opportunity to contest the prior determination. The LAB, however, responds that it is not collaterally estopped by the Granite I decision because, unlike Primavera Familienstiftung, the party which the Funds' Trustee sought to enjoin in Granite I, the LAB does not allege that Askin or ACM committed fraud against the Funds.

Because the allegations in the two cases differ somewhat, Count I will not be dismissed pursuant to a collateral estoppel approach. However, accepting the allegations of the LAB's Complaint as true, the doctrine of in pari delicto provides an independent basis for dismissal.

B. The Doctrine of *In Pari Delicto* May Be Applied to Bar Count I of the LAB's Complaint

The in pari delicto doctrine derives from the Latin, in pari delicto potior est conditio **[**100]** defendentis: "'In case of equal or mutual fault . . . the position of the [defending] party . . . is the better one.'" *Bateman Eichler, Hill Richards, Inc. v. Berner, 472 U.S. 299, 306, 86 L. Ed. 2d 215, 105 S. Ct. 2622 (1985)* (quoting Black's Law Dictionary 711 (5th ed. 1979)). The doctrine is based on the following two premises: "courts should not mediate disputes between wrongdoers, and denying judicial relief to a wrongdoer deters illegal conduct." *Granite I, 194 B.R. at 328* (citing *Bateman Eichler, 472 U.S. at 306*, and *Ross v. Bolton, 904 F.2d 819, 824 (2d Cir. 1990))*. It is "rooted in the common-law notion that a plaintiff's recovery may be barred by his own wrongful conduct." *Pinter v. Dahl, 486*

U.S. 622, 632, 100 L. Ed. 2d 658, 108 S. Ct. 2063 (1988). The Supreme Court in Pinter explained that in pari delicto bars claims of a plaintiff who is "an active, voluntary participant in the unlawful activity that is the subject of the suit. Plaintiffs who are truly in pari delicto are those who have themselves violated the law in cooperation with the defendant." Id. at 635-36 **[**101]** (citations and internal quotations omitted). In litigations arising under the federal regulatory statutes, in discussing the application of in pari delicto, the Supreme Court has required "at least substantially equal responsibility" on the part of the plaintiff. See Bateman Eichler, 472 U.S. at 310.

As the Brokers represent, during the period in which the conduct alleged in the Complaint occurred, Askin, directly and through ACM, was the Funds' sole decisionmaker. Cf. Granite I, 194 B.R. at 331. Askin was the sole voting shareholder of Granite Corp. and Quartz and was the sole general partner of Granite Partners. Id. Thus whatever wrongful conduct the Brokers are alleged to have induced and participated in was consented to and participated in by the Funds. The Brokers claim that even accepting the allegations in Count I as true, the Funds themselves -- acting through their managers, ACM and Askin -- are equally at fault. Therefore, the principles underlying the doctrine of in pari delicto preclude the LAB from asserting a claim for inducing and participating in a breach of fiduciary duty against the Brokers.

[*309] The Funds **[**102]** were active and voluntary participants in the securities purchases about which they now complain. Acting through Askin and ACM, they were the central decisionmakers in the allegedly improper purchases they made. The Complaint states that "ACM and Askin repeatedly breached their fiduciary and contractual duties to the Funds to make investments with due care and in accordance with the Funds' stated investment objectives. ACM and Askin did not create market neutral . . . portfolios . . .; they did not use (or have) sophisticated computerized analytical techniques; they maintained inadequate liquidity; and they exposed the Funds to near-complete market - i.e., Broker - control." (Compl. P 69.) It further states that "as a result of ACM's and Askin's failure to manage the Funds with due care . . . ACM and Askin failed to create a market neutral portfolio . . . . Rather, ACM and Askin created portfolios that were markedly and inappropriately tilted toward the bullish . . . securities at a time when virtually all observers, including Askin, believed that interest rates soon would rise or were in fact rising." (Id. P 71.)

The LAB, however, asserts that Askin and the Brokers were not **[**103]** of substantially equal fault since the Complaint alleges that Askin breached his duty of care by negligently buying inappropriate securities, whereas the Brokers deliberately took advantage of Askin's weaknesses and induced him to buy toxic waste that they knew to be inappropriate. Thus the LAB submits that Askin and ACM are alleged to be less culpable than the Brokers and not pari in their delicto. According to the LAB, application of the in pari delicto doctrine depends on proof that these factual allegations were wrong - i.e., it depends on proof that Askin and ACM did, in fact, deliberately buy securities that they knew to be inappropriate for the Funds.

The LAB's "conclusory allegations of the legal status" of the acts of Askin and the Brokers, however, "need not be accepted as true for the purposes of ruling on a motion to dismiss." In re American Express, 39 F.3d at 400-01 n.3; see Cohen, 906 F. Supp. at 961. Also, as stated in Granite I, "it is true that in many of the in pari delicto cases, the trustee filed the complaint detailing the insider's wrongdoing, and the Court could determine from the trustee's own allegations **[**104]** whether in pari delicto applied." [18] Granite I, 194 B.R. at 330; see, e.g., Hirsch, 72 F.3d at 1092; In re Mediators, Inc., 190 B.R. 515, 520 (Bankr. S.D.N.Y. 1995), aff'd, 105 F.3d 822 (2d Cir. 1997).

Indeed, the LAB's factual allegations concerning ACM and Askin's conduct in breaching their fiduciary duties do not sound in negligence. For example, the LAB alleges that ACM and Askin "had committed themselves to making extensive use of proprietary computerized models to analyze CMOs." (Compl. P 67.) According to the LAB, ACM and Askin breached their fiduciary duties in that "they **[**105]** did not use (or have) sophisticated analytical techniques," (id. P 69), "ACM and Askin in fact had no proprietary, computerized tools with which to model CMOs," and "often made purchase decisions based on little or no analysis or research." (Id. P 70.) This is the language of

---

[18] It is appropriate to resolve this issue on a motion to dismiss if, as the Brokers contend, the LAB's pleading alleges that Askin and ACM, the Funds' sole decisionmakers, and the Brokers were equal wrongdoers as a matter of law. See Ross, 904 F.2d at 826; In re Haven Indus., Inc., 462 F. Supp. 172, 180 (S.D.N.Y. 1978).

deliberate misrepresentation, not negligence. It is difficult to interpret an allegation that Askin and ACM "committed" themselves to using a computer model, then bought billions of dollars of CMOs without having one, as anything but intentional conduct. [19] Additionally, the LAB establishes that ACM and Askin were responsible for forming and managing the **[*310]** Funds' portfolios and that "ACM and Askin created portfolios that were markedly and inappropriately tilted toward bullish . . . securities." (Compl. P 71 (emphasis added).); cf. *Pinter, 486 U.S. at 633* (stating that the in pari delicto doctrine is not limited to situations "when the plaintiff's fault is intentional or willful"). Any attempt to claim that Askin and ACM were not central to the alleged wrongdoing is contradicted by the factual allegations the Complaint sets forth.

[106]** Because the factual allegations demonstrate substantially equal fault between the Funds - acting through Askin and ACM - and the Brokers, the doctrine of in pari delicto bars the claim. [20]

C. *In Pari Delicto* Is Applicable to the LAB's [107] Claim**

The LAB also proposes that the doctrine is inapplicable to a bankruptcy trustee or his successor, in this case the LAB. This contention, however, is based on decisions from other jurisdictions and is contrary to the prevailing law of this circuit.

The Second Circuit decisions that the LAB does cite address actions by trustees exercising special avoidance powers under the Bankruptcy Code to recover estate property from transferees. By contrast, the present case seeks ordinary damages from the alleged wrongdoing and has been recognized as the type of case in which the in pari delicto may apply. See Primavera, 1996 WL 494904, at *12; *Granite I, 194 B.R. at 328*.

Indeed, in his decision in Granite I, Judge Bernstein showed no hesitation in explaining how in pari delicto would apply to the Trustee's ability to bring claims against broker-dealers, including the Brokers here. Significantly, Judge Bernstein noted that the LAB's predecessor, the Trustee, made "several arguments why in pari delicto does not apply here." *Id. at 330*. Judge Bernstein rejected those arguments, finding that allegations of the broker-dealers' **[**108]** complicity in ACM and Askin's wrongdoing fall within the in pari delicto doctrine. This Court embraced Judge Bernstein's explanation in Primavera, 1996 WL 494904, at *12.

IX. Count XX Against DLJ for Equitable Subordination Is Dismissed

Analogous to the defense of in pari delicto, the doctrine of "unclean hands" bars recovery by the LAB in equity. The doctrine of clean hands is an "established and salutary tenet of equity practice" based on the principle that "one who seeks equity must do equity." *In re Mediators, 190 B.R. at 530*. Under New York law, a court may decline to exercise its equitable powers in favor of a party whose "'unconscionable act . . . has immediate and necessary relation to the matter that he seeks in respect of the matter in litigation.'" *Aris-Isotoner Gloves, Inc. v. Berkshire*

---

[19] It is the same intentional conduct that formed the basis for Judge Bernstein's finding that the Funds' Trustee was barred from pursuing a claim on behalf of the Funds' debtor estates for inducing and participating in a breach of fiduciary duty against the broker-dealers because the Funds were in pari delicto with them. See *Granite I, 194 B.R. at 330*.

Contrary to the LAB's contention, Askin and ACM need not only have deliberately bought inappropriate securities to have engaged in intentional wrongdoing such that in pari delicto may be applied. The factual allegations concerning the computer models, for example, smell of fraud.

[20] It is useful to note that to succeed in an inducing and participating in a breach of fiduciary duty claim, a requirement of "knowledge" is sufficient. The factual allegations in the Complaint demonstrate as much regarding Askin and ACM.

According to Merrill Lynch, it seems illogical to claim that a defendant's culpability for inducing and participating in a breach of fiduciary duty can ever be greater than that of the fiduciary himself. As the Supreme Court stated in Bateman Eichler, which is cited by the LAB, "we do not believe that a person whose liability is solely derivative can be said to be as culpable as one whose breach of duty gave rise to the liability in the first place." *472 U.S. at 313* (speaking in the context of insider trading).

Fashions, Inc., 792 F. Supp. 969, 969 (S.D.N.Y. 1992) (quoting Keystone Driller Co. v. General Excavator Co., 290 U.S. 240, 245, 78 L. Ed. 293, 54 S. Ct. 146 (1933)).

In In re Mediators, the plaintiff debtor corporation, through a committee of unsecured creditors, sought to recover fees paid **[**109]** by the corporation to its attorneys and bank, claiming that these defendants had been unjustly enriched because they assisted in defrauding the corporation. In re Mediators, 190 B.R. at 529. The court dismissed the unjust enrichment claim, holding that, because the corporation's sole shareholder and decisionmaker had engineered the fraud, the corporation's hands were also "filthy with fraud," and thus it was barred from obtaining equitable relief. Id. at 530.

[*311] Here, the LAB acknowledges that the Funds, through Askin and ACM, invested in inappropriate securities, failed to use proprietary computerized models to analyze the securities they purchased, did not continuously monitor their portfolios, and did not maintain sufficient liquidity in their portfolios. The factual allegations support that the Funds knowingly engaged in these acts, through Askin and ACM, despite contrary representations to their investors. This conduct by the Funds is intrinsically related to the claims for which the LAB seeks to recover from DLJ. Accordingly, the equitable subordination claim is dismissed. [21]

[110] X. The Brokers' Motion to Dismiss the Unjust Enrichment Claim in Count XVII Is Granted**

In Count XVII of the Complaint, the LAB alleges that the Brokers were unjustly enriched through their receipt of monies from four transactions: (1) "profits, fees, commissions, bonuses, interest, and other compensation" from its sale of inappropriate CMOs to 'the Funds; (2) "by deeming sales of the Funds' securities" to themselves at prices "substantially below their fair market value"; (3) "profits, fees, commissions, bonuses, interest, and other compensation" from their sales of other CMOs to other customers allegedly made possible by the Funds' purchase of the "deal driver" CMOs; and (4) short sale profits after artificially depressing the CMO market by its "collusive, rigged liquidations" of the Funds' securities. (Compl. PP 271-72.)

To state a claim for unjust enrichment, a plaintiff must allege that the defendant was enriched at the plaintiff's expense and that the circumstances are such that equity and good conscience require that the defendant make restitution. See ABF Capital, 957 F. Supp. at 1333; Violette v. Armonk Assocs., L.P., 872 F. Supp. 1279, 1282 (S.D.N.Y. 1995). **[**111]** Unjust enrichment is a quasi-contractual remedy, so that such a claim is ordinarily unavailable when a valid and enforceable written contract governing the same subject matter exists. See ABF Capital, 957 F. Supp. at 1333-34; Clark-Fitzpatrick, Inc. v. Long Island R.R. Co., 70 N.Y.2d 382, 388, 516 N.E.2d 190, 193, 521 N.Y.S.2d 653, 656 (1987). This is true whether the contract is one between parties to the lawsuit, or where one party to the lawsuit is not a party to the contract. See ABF Capital, 957 F. Supp. at 1334; Graystone Materials, Inc. v. Pyramid Champlain Co., 198 A.D.2d 740, 604 N.Y.S.2d 295, 296 (3d Dep't 1993); Metropolitan Elec. Mfg. Co. v. Herbert Constr. Co., 183 A.D.2d 758, 583 N.Y.S.2d 497, 498 (2d Dept. 1992).

Here, the Complaint represents that the transactions and repurchase agreements between the Brokers and the Funds were governed by written agreements. Because both the sales of securities to the Funds and the liquidation of those securities were done pursuant to contracts, namely the PSA and transaction confirmations, the unjust enrichment claim may not lie. [22] See, **[**112]** e.g., Clark-Fitzpatrick, 70 N.Y.2d at 388, 516 N.E.2d at 193, 521

---

[21] The "unclean hands" doctrine also provides grounds for dismissing the other claims through which the LAB seeks equitable relief: unjust enrichment and innocent representation, for example. As discussed above, the innocent representation claim is also barred by the Martin Act (as well as failure to plead justifiable reliance), and, as discussed below, the unjust enrichment claim is precluded due to the existence of written contracts.

[22] Indeed, the LAB alleges three causes of action against the Brokers for breach of contract, claiming that the Brokers breached contractual obligations to the Funds by "improperly calculating the margin positions in the Funds' accounts," (Count IV), by liquidating the Funds' securities "at prices substantially below fair market value," by "failing to give the Funds credit for repoed securities in an amount equal to the price therefore obtained from a generally recognized source or the most recent closing bid quotation from such a source, within the meaning of the PSA Agreement," (Count X), and "by failing to pay the Funds more than

N.Y.S.2d at 656; A.H.A. General Constr., Inc. v. New York City Housing Auth., 241 A.D.2d 428, 661 N.Y.S.2d 213, 216 (1st Dep't 1997), rev'd on other grounds, 92 N.Y.2d 20, 699 N.E.2d 368, 677 N.Y.S.2d 9, 1998 WL 305439 (N.Y. 1998).

[113] [*312]** While the LAB does not meaningfully oppose the opposition against the unjust enrichment claim based on profits derived from allegedly wrongful margin calls and commercially unreasonable liquidations, it maintains that the allegations regarding the sale of inappropriate CMOs to the Funds is viable. According to the LAB, the Brokers profited from their sale of inappropriate CMOs to the Funds in two ways: First, they received large markups and other fees directly from the Funds as payment for the toxic securities. Second, because the securities that the Funds bought were the "deal driver" tranches of the Brokers' CMO offerings - the riskiest securities that had to be sold, or preferably pre-sold, to make the entire offering economically feasible - their sale to the Funds allowed the Brokers to market the balance of each offering to their other customers, also at a substantial profit.

The LAB contends that the claim that the Brokers sold the Funds toxic CMOs that they knew were inappropriate is outside the scope of any contract between the Brokers and the Funds because the Complaint does not allege that the Brokers breached any contract by selling inappropriate toxic CMOs **[**114]** to the Funds. However, such a narrow characterization of the allegations set forth in the Complaint is not entirely forthright. The amounts paid by the Funds for the "inappropriate" CMOs were in every case at the heart of the contractual agreements governing those transactions. The enrichment which was allegedly "unjust" was simply the payment of a bargained-for sales price for the securities which were in fact delivered to the Funds, and the LAB does not allege otherwise. The law is clear that the payments made pursuant to the express terms of a contract cannot be recovered via unjust enrichment theory. See Harris Trust & Sav. Bank v. John Hancock Mut. Life Ins. Co., 767 F. Supp. 1269, 1284 (S.D.N.Y. 1991) ("Bargained-for benefits cannot be deemed to unjustly enrich a contracting party" (citing City of Yonkers v. Otis Elevator Co., 844 F.2d 42, 48 (2d Cir. 1988) (noting that quasi-contractual relief unavailable where an express contract covers the subject matter))), aff'd in part and rev'd in part on other grounds, 970 F.2d 1138 (2d Cir. 1992), aff'd, 510 U.S. 86 (1993).

Additionally, as alleged in the Complaint, **[**115]** ACM and Askin were bound by both fiduciary and contractual duties to, inter alia, make investments in accordance with the Funds' stated investment objectives. Part of ACM and Askin's duties were to purchase appropriate - or bearish - securities for the Funds. The Complaint further maintains that the Brokers allegedly sold bullish securities to the Funds, in breach of the investment objective requiring the bearish securities. It is undisputed that the transaction confirmations issued the agreement between the parties with respect to any particular purchase. The LAB is on unsteady ground in contending that the agreements between the Funds and the Brokers regarding the purchase and sale of CMOs memorialized in transaction confirmations did not encompass the type and characteristics of the CMOs sold.

In support for its contention, the LAB cites to this Court's decision in Violette, 872 F. Supp. at 1282, in which an unjust enrichment claim was sustained despite the existence of contracts between the parties because the "agreements [did] not expressly address" the matter about which the plaintiff complained. The case is distinguishable, however, because unlike the **[**116]** instant case Violette is a quantum meruit case. In Violette, this Court held that quasi-contract principles dictated that a worker's compensation insurer pay legal fees out of its portion of settlement proceeds negotiated by the employee's attorneys, despite the settlement agreement's silence on the subject of attorneys' fees. Id. Violette's holding that the attorneys were entitled to payment for their work does not support the LAB's assertion that it should recover in quasi-contract the payment price of the securities purchased by the Funds.

The sale of and profits made from inappropriate CMOs are covered by the contract between ACM and the Funds and agreements between the Brokers and the Funds. The written agreements governing the substance of the instant claim preclude recovery **[*313]** under the quasi-contractual theory of unjust enrichment.

$ 4 million of principal and interest payments due the Funds, and/or by improperly applying such principal and interest payments to alleged deficiencies in the Funds' accounts that resulted from the liquidations of the Funds' securities," (Count XVIII).

Furthermore, the last two grounds for the LAB's unjust enrichment claim - namely, monies the Brokers received from sales of CMOs to customers other than the Funds and receipt of profits from "short sales of Treasury and mortgage-backed securities" before and during the liquidation, (Compl. PP 271-73) - are dismissed for **[**117]** failure to adequately allege enrichment at the Funds' expense.

A defendant is enriched at the expense of a plaintiff when the defendant receives a benefit of money or property belonging to the plaintiff. See *Ammar Textiles (PVT) Ltd. v. Contitrade Servs. Corp., 1994 U.S. Dist. LEXIS 3783*, No. 93 Civ. 237, *1994 WL 115993*, at *3 (S.D.N.Y. Mar. 30, 1994). The Funds had no right to the Brokers' profits from sales of CMOs to other customers, nor did the Funds have any right to proceeds allegedly received by the Brokers from short sales of their own accounts of Treasury and other mortgage-backed securities. Accordingly, the LAB's unjust enrichment claim is dismissed.

XI. The Remaining Claims Subject to This Motion

The Brokers also moved to dismiss the claims for rescission of unauthorized trades; breach of duty due to wrongful margin calls and liquidation; conversion; prima facie tort against Bear Stearns; breach of express warranty; and tortious interference with contract between the Trustee and Gifford Fong, against Merrill Lynch. The LAB concedes that these counts are to a large extent duplicative of other causes of action asserted **[**118]** in the Complaint and has therefore not provided meaningful opposition to the Brokers' motion for dismissal. After careful review, the Court finds that the reasons the Brokers' have provided in support of their motion to dismiss those claims have merit. Therefore, the claims above are hereby dismissed.

Conclusion

For the reasons set forth above, the Brokers' motion for partial dismissal of the Complaint is granted in part and denied in part. The LAB is granted leave to replead within 20 days of this decision.

Specifically, the Brokers' motion to dismiss the claims for inducing and participating in a breach of fiduciary duty (Count I), tortious interference with contracts (Counts II, XII, and XXI), rescission of unauthorized trades (Count III), breach of duty due to wrongful margin calls and liquidation (Count V), conversion (Count VI), violations of the Sherman and Donnelly Acts (counts VII and VIII, respectively), prima facie tort against Bear Stearns (Count IX), common law fraud (Count XIII), negligent and innocent misrepresentation (Counts XIV and XV, respectively), breach of express warranty (Count XVI), unjust enrichment (Count XVII), and equitable subordination **[**119]** against DLJ (Count XX) is hereby granted.

The Brokers' motion to dismiss the claim for breach of duty to liquidate in a commercially reasonable manner (Count XI) is granted as to Bear Stearns and DLJ but denied as to Merrill Lynch.

The motion to dismiss the breach of contract claim for commercial unreasonable liquidations (Count X) is hereby denied, but the claim is to be modified as directed herein.

It is so ordered.

A dismissal is warranted under *Fed. R. Civ. P. 12(b)(6)* only if it appears beyond doubt that plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Under this standard, the question is not whether a plaintiff will or might ultimately prevail on its claim, but whether it is entitled to offer evidence in support of the allegations in the complaint. It may appear on the face of the pleadings that a recovery is very remote and unlikely, but that is not the test. To this end, the court must accept as true all the factual allegations in the complaint and must draw all reasonable inferences in favor of plaintiff. This generous approach to pleading applies in the antitrust context, and courts should recall that where the proof of an alleged antitrust violation is largely in the hands of defendants, dismissals prior to giving plaintiff an opportunity for discovery should be granted sparingly.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] **Sherman Act, Claims**

To state a monopolization claim under *15 U.S.C.S. § 2* of the Sherman Act, a plaintiff must establish (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To state an attempted monopolization claim, a plaintiff must establish (1) that defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN3[] **Market Definition, Relevant Market**

It is a basic principle in the law of monopolization that the first step in a court's analysis must be a definition of the relevant markets. This is so because without a definition of that market, there is no way to measure a defendant's ability to lessen or destroy competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN4[] **Regulated Practices, Market Definition**

For antitrust purposes a relevant market has both a product dimension and a geographic dimension.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Regulated Practices, Market Definition**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Defining the relevant product market requires consideration of "cross-elasticity of demand" between products, which measures the extent to which consumers will change their consumption of one product in response to a price change in another. If customers are able to substitute one product or service in response to a nontrivial increase in the price of another, these products or services must fall within the same product market. Defining a relevant product market is a process of describing those groups of producers which, because of the similarity of their products, have the ability -- actual or potential -- to take significant amounts of business away from each other.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Relevant Market, Product Market Definition**

The boundaries of so-called "submarkets" may be established by reference to such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7[] **Regulated Practices, Market Definition**

Ultimately, a "submarket" definition turns on the same inquiry as a "market" definition -- whether the products in a proposed submarket are reasonably interchangeable in use or production with products in the broader market. At bottom, then, the same proof which establishes the existence of a relevant product market also shows (or fails to show) the existence of a product submarket.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN8[] **Regulated Practices, Market Definition**

To define a relevant product market one must look at how consumers view the products in question.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

International Trade Law > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **International Aspects, Commerce With Foreign Nations**

No rule of law or economic principle bars application of *15 U.S.C.S. § 2* of the Sherman Act to one of several alternative means of distributing a product. The statute prohibits monopolization of "any part" of interstate or foreign commerce. Accordingly, the Sherman Act and other antitrust statutes have been applied to protect competition in one of alternate channels of distribution.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Regulated Practices, Market Definition**

It is appropriate to limit a market to a discrete channel of distribution so long as it is shown, using established market-definition criteria, that enough customers do not view other methods of distribution as viable substitutes to the distribution method in question.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN11[] **Regulated Practices, Market Definition**

Market definition is a particularly fact-based inquiry. Thus, courts granting *Fed. R. Civ. P. 12(b)(6)* motions for failure to allege a proper market generally dismiss only those complaints that fail to explain how the product in question is not reasonably interchangeable with other similar products.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Monopolies & Monopolization, Attempts to Monopolize**

The essence of product market definition in a monopoly case under *15 U.S.C.S. § 2* of the Sherman Act is determining whether there exists a group of buyers which is unable, because of market forces, to switch to an alternative product or service in the face of a monopolist's price increase.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN14[] **Monopolies & Monopolization, Actual Monopolization**

Even where a defendant has monopoly power, a plaintiff's claims of actual or attempted monopolization require proof of anticompetitive conduct as an essential element of the claim.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN15[] **Actual Monopolization, Anticompetitive & Predatory Practices**

There is a general right of a private business to select its customers, but the exercise of that right for the purpose of monopolization violates *15 U.S.C.S. § 2* of the Sherman Act. In the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he may deal.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > Inferences & Presumptions > General Overview

HN16[] **Regulated Practices, Market Definition**

Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***.

Counsel: For Plaintiff: Richard M. Steuer, Esq., Michael Malina, Esq., Randolph S. Sherman, Esq., Michael A. Rogoff, Esq., Robert Grass, Esq., KAYE, SCHOLER, FIERMAN, HAYS & HANDLER, LLP, New York, New York.

For Plaintiff: Gerard W. Casey, Esq., Pamela C. McGuire, Esq., PEPSICO, INC., Somers, New York.

For Defendant: Jonathan M. Jacobson, Esq., Daniel F. McInnis, Esq., Anthony W. Swisher, Esq., AKIN, GUMP, STRAUSS, HAUER & FELD, L.L.P., New York, New York.

For Defendant: Michael C. Russ, Esq., Jeffrey S. Cashdan, Esq., KING & SPALDING and Abbot B. Lipsky, Jr., Esq., James M. Koelemay, Jr., Esq., Kenneth L. Glazer, Esq., Joel M. Neuman, Esq., THE COCA-COLA COMPANY, Atlanta, Georgia.

Judges: LORETTA A. PRESKA, United States District Judge.

Opinion by: LORETTA A. PRESKA

Opinion

OPINION AND ORDER

LORETTA A. PRESKA, United States District Judge:

Plaintiff PepsiCo, Inc. ("PepsiCo") has sued defendant The Coca-Cola Company, Inc. ("Coca-Cola"), alleging that Coca-Cola has violated *section 2* of the Sherman Act, *15 U.S.C. § 2*, by monopolizing and attempting to monopolize a segment of the fountain-dispensed **[*2]** soft drink industry. Coca-Cola moves to dismiss the complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*. For the reasons that follow, Coca-Cola's motion is denied.

BACKGROUND

The facts alleged in the complaint are as follows. PepsiCo complains of Coca-Cola's behavior in a market described as "sales of fountain-dispensed soft drinks distributed through foodservice distributors throughout the United States." Complaint P 9. This market allegedly consists of "an increasing number of restaurant chains, movie theater chains and other 'on-premise' accounts" that purchase "most of their supplies, including fountain soft drink products, through foodservice distributors." *Id*. P 7.

Foodservice distributors are "independent companies that distribute a broad variety of food products, paper products and other supplies, including fountain-dispensed soft drinks, in consolidated deliveries to restaurant chains, movie theater chains and other customers." *Id*. P 2. These distributors carry thousands of items and supply all of a customer's needs at once, using consolidated single-truck deliveries and consolidated bookkeeping. *Id*. P 8.

Because foodservice distributors offer a form of one-stop **[*3]** shopping, their customers take delivery of all of the customer's supplies from only one distributor at each of the customer's locations. *Id*. P 2. Foodservice distributors' customers "generally make it a practice not to purchase these supplies through any other means." *Id*. Furthermore, for "logistical and economic reasons, these accounts make it a practice to have only a single foodservice distributor supply any given outlet, and it is common for a single foodservice distributor to supply either an entire chain or groups of outlets within a chain." *Id*. As a result, "for each location in each such chain there is only one foodservice distributor through which a supplier" can have its product distributed. *Id*. P 7.

According to PepsiCo, the accounts in question have no viable alternatives to fountain-dispensed soft drinks distributed through foodservice distributors. As an initial matter, soft drinks sold in bottles and cans are not adequate substitutes for fountain products. Indeed, virtually all of the soft drink volume of these accounts is in fountain-dispensed products (which provide considerably greater profits than drinks sold in bottles and cans), and the cost of **[*4]** switching a fountain business to bottles and cans would be prohibitive. *Id*. P 8.

Other modes of delivery also fail to present an adequate alternative to distribution through foodservice distributors. According to PepsiCo, "customers of foodservice distributors generally refuse to be supplied by any other means once they have begun receiving supplies through such distributors, because changing from their established distribution and accounting practices to other methods of distribution, or even switching distributors, would cause them to incur severely adverse economic and logistical consequences." *Id*. As described in the complaint, the distribution "superhighway" formed by the growth of independent foodservice distributors has become "the lifeblood of competitive efficiency in the restaurant business, movie theater business and other businesses that depend upon delivery through foodservice distributors in order to remain logistically efficient." *Id*.

PepsiCo alleges that Coca-Cola "dominates" the market described above, *see* Complaint PP 9, 33, 36, and that "virtually every major foodservice distributor in America today" has an agreement with Coca-Cola to distribute **[*5]** Coca-Cola fountain products. *Id*. P 16. Coca-Cola is alleged to control over 90% of that market and to possess the power to control prices and exclude competition in the market. *Id*. P 9.

PepsiCo alleges that the parties' past business practices explain Coca-Cola's dominance in, and PepsiCo's absence from, this market. Although PepsiCo itself markets fountain-dispensed soft drinks, for two reasons "it historically has been less successful than Coca-Cola in penetrating the relevant market." *Id*. P 10. First, the fountain products that PepsiCo sold to its "on-premise" accounts were distributed exclusively through PepsiCo local bottlers, while Coca-Cola's sales were made through various types of national, regional and local fountain distributors. *Id*. P 11. As a result, when foodservice distributors "began to take over" distribution of supplies to restaurant chains, movie theater chains and other "on-premise" accounts, Coca-Cola was able to designate the foodservice distributors as Coca-Cola fountain distributors as well, "thereby facilitating sales to the growing number of customers that had begun to receive their supplies only through such distributors." *Id*. P 11. **[*6]** In contrast, PepsiCo's arrangements with its local bottlers prevented it from selling its products through foodservice distributors, and PepsiCo lost the opportunity to capitalize on the emergence of foodservice distribution. *Id*. P 11.

PepsiCo attributes its disadvantage as well to its acquisition in the 1970's and 1980's of restaurant chains which featured PepsiCo products. Coca-Cola capitalized on PepsiCo's restaurant ownership by "convincing other restaurant chains that PepsiCo had become their competitor and therefore they should spurn Pepsi and support Coke." *Id*.

In 1997, PepsiCo changed its business strategy. It negotiated new arrangements with its bottlers, thereby allowing it to distribute fountain-dispensed soft drinks through foodservice distributors rather than local bottlers. PepsiCo also divested itself of its restaurant chains "so that it could no longer be portrayed as a competitor of the other chains." *Id*. P 13. As a result of these moves, PepsiCo "emerged in 1997 as a significantly more potent competitive threat to Coca-Cola's dominance" in the alleged market. *Id*. P 14. Rid of its self-imposed constraints, PepsiCo increased its efforts to sell and **[*7]** market its fountain products; to this end, PepsiCo approached restaurant chains, movie theater chains and other customers with "highly competitive proposals, offering to sell to them through foodservice distributors for less money than Coca-Cola." *See id*.

According to the complaint, Coca-Cola viewed PepsiCo's emergence as a threat to Coca-Cola's market dominance. Coca-Cola thus embarked on a "strategy to use its market power to perpetuate its monopoly by threatening foodservice distributors with the loss of Coke if they dare to carry Pepsi for their customers who want Pepsi, and by cutting off any distributors that decide to carry Pepsi anyway, making examples of them." *Id*. P 15. PepsiCo maintains that Coca-Cola's strategy "threatens to freeze PepsiCo out of the market and leave customers that require delivery through foodservice distributors with no alternative to Coke." *Id*.

According to the complaint, to carry out its strategy Coca-Cola relied on the terms of its contracts with foodservice distributors. Those contracts allegedly contain an express condition prohibiting the distributor from handling PepsiCo soft drink products. *Id*. P 17. While those agreements historically **[*8]** contained such a condition, Coca-Cola rarely enforced it and even had acquiesced when some foodservice distributors refused to agree to the provision. *Id*. As soon as PepsiCo "became a serious competitive threat," however, Coca-Cola began to enforce the condition actively. *Id*. P 20. Coca-Cola allegedly cut off foodservice distributors that began to distribute PepsiCo products and threatened to cut off those that showed an interest in carrying PepsiCo products. *Id*. PP 20-26.

PepsiCo maintains that Coca-Cola's tactics lock foodservice distributors into Coca-Cola, depriving those distributors of the ability to distribute competing brands to their customers. In particular, because of Coca-Cola's

> huge share of the relevant market, its particular dominance of fountain-dispensed cola (which restaurants, theaters and other accounts must have), and the fact that foodservice distributors must carry Coke products in order to fill orders from their other customers who sell Coke, such a threat is overwhelmingly powerful and coercive, and reflects Coca-Cola's single-minded determination to hold on to its monopoly.

Id. P 25. As a consequence, restaurant chains, theater **[*9]** chains and other customers of foodservice distributors "remain locked into Coca-Cola as their supplier without the real ability to entertain a competitive bid from PepsiCo." *Id*. P 11. Because their distributors will only deliver Coca-Cola products, establishments that wish to serve PepsiCo products are forced to remain with Coca-Cola products and are prevented from putting their requirements out for fair and open competitive bids. *Id*. P 27. This absence of price competition is alleged to affect the consumers who are customers of these establishments and deprives PepsiCo of opportunities to compete on the merits for the business of the customers that require delivery through foodservice distributors. *Id*. PP 27-28.

DISCUSSION

Coca-Cola moves to dismiss, under *Fed. R. Civ. P. 12(b)(6)*, on the ground that PepsiCo's complaint fails to state a claim upon which relief may be granted. "***HN1***[] A dismissal is warranted under *Rule 12(b)(6)* only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Hamilton Chapter of Alpha Delta Phi, Inc. v. Hamilton College, 128 F.3d 59, 62-63 (2d Cir. 1997)*. **[*10]** Under this standard, the question is not "whether a plaintiff will or might ultimately prevail on [its] claim, but whether [it] is entitled to offer evidence in support of the allegations in the complaint." *Id. at 62*. As explained by the Supreme Court, and recently reiterated by the Court of Appeals, "it may appear on the face of the pleadings that a recovery is very remote and unlikely but that is not the test." *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 1686, 40 L. Ed. 2d 90 (1974)* (quoted in *Hamilton College, 128 F.3d at 62*). To this end, I must "accept as true all the factual allegations in the complaint and must draw all reasonable inferences in favor of the plaintiff." *Hamilton College, 128 F.3d at 63* (citing *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 740, 96 S. Ct. 1848, 1850, 48 L. Ed. 2d 338 (1976))*. This "generous approach to pleading applies in the antitrust context," and courts should recall that "where the proof of the alleged antitrust violation is largely in the hands of the defendants, dismissals prior to giving the plaintiff an opportunity **[*11]** for discovery should be granted sparingly." *Id*.

I. *SECTION 2* OF THE SHERMAN ACT

PepsiCo alleges that Coca-Cola is guilty of actual or attempted unlawful monopolization of the relevant market in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2*. ***HN2***[] To state a monopolization claim under *section 2*, a plaintiff must establish "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*; *Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 61 (2d Cir. 1997)*. To state an attempted monopolization claim, a plaintiff must establish "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 890, 122 L. Ed. 2d 247 (1993)*; *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 99-100 (2d Cir. 1998)*. **[*12]**

According to Coca-Cola, PepsiCo's complaint must be dismissed because it fails, as a matter of law, to allege either (1) a valid relevant market or (2) prohibited anticompetitive conduct. These contentions are discussed in turn below.

II. FAILURE TO ALLEGE A VALID RELEVANT MARKET

HN3[] It is "a basic principle in the law of monopolization that the first step in a court's analysis must be a definition of the relevant markets." *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 268 (2d Cir. 1979)*, *cert. denied*, *444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)*. This is so because "without a definition of that market, there is no way to measure [a defendant's] ability to lessen or destroy competition." *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 350, 15 L. Ed. 2d 247 (1965)*; *see* *Morgenstern v. Wilson, 29 F.3d 1291, 1296 (8th Cir. 1994)* ("An actual monopolization claim often succeeds or fails strictly on the definition of the product or geographic market."), *cert. denied*, *513 U.S. 1150, 115 S. Ct. 1100, 130 L. Ed. 2d 1068 (1995)*. Accordingly, **[*13]** PepsiCo's first task is to plead a relevant market. *See* *Nifty Foods Corp. v. Great Atlantic & Pacific Tea Co., 614 F.2d 832, 840 (2d Cir. 1980)*; *Theatre Party Assocs., Inc. v. Shubert Org., Inc., 695 F. Supp. 150, 153 (S.D.N.Y. 1988)*.

A. *Defining a Relevant Product Market*

HN4[] For antitrust purposes a relevant market has both a product dimension and a geographic dimension. *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 82 S. Ct. 1502, 1523, 8 L. Ed. 2d 510 (1962)*; *T. Harris Young & Assoc. v. Marquette Elec. Inc., 931 F.2d 816, 823* (11th Cir.), *cert. denied*, *502 U.S. 1013, 112 S. Ct. 658, 116 L. Ed. 2d 749 (1991)*. Coca-Cola does not contest PepsiCo's allegation that the relevant geographic market in this case consists of sales "throughout the United States." This dispute thus focuses on whether PepsiCo has alleged a valid and relevant product market.

As the Supreme Court has explained, ***HN5***[] "the outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1523*; **[*14]** *Hayden Pub. Co., Inc. v. Cox Broadcasting Corp., 730 F.2d 64, 70-71 (2d Cir. 1984)*. Defining the relevant product market requires consideration of "cross-elasticity of demand" between products, which measures "the extent to which consumers will change their consumption of one product in response to a price change in another." *Eastman Kodak v. Image Technical Servs., 504 U.S. 451, 469, 112 S. Ct. 2072, 2083, 119 L. Ed. 2d 265 (1992)*. If customers are able to substitute one product or service in response to a nontrivial increase in the price of another, these products or services must fall within the same product market. *F.T.C. v. R.R. Donnelley & Sons Co., 1990 U.S. Dist. LEXIS 11361, 1990-2 Trade Cas. (CCH) P 69,239, at 64,854 (D.D.C. 1990)* (citing *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 400, 76 S. Ct. 994, 1010, 100 L. Ed. 1264 (1956))*. As explained by the Court of Appeals, "'defining a relevant product market is a process of describing those groups of producers which, because of the similarity of their products, have the ability -- actual or potential -- to take significant amounts of business **[*15]** away from each other.'" *Hayden, 730 F.2d at 71* (quoting *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063* (3d Cir.), *cert. denied*, *439 U.S. 838, 99 S. Ct. 123, 58 L. Ed. 2d 134 (1978))*.

At play in this case is the principle that within a broad product market there may exist "well-defined submarkets . . . which, in themselves, constitute product markets for antitrust purposes." *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1524* (citing *United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 593-95, 77 S. Ct. 872, 877, 1 L. Ed. 2d 1057 (1957))*. ***HN6***[] The boundaries of so-called "submarkets" may be established by reference to such "practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.; see* *F.T.C. v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 1998 U.S. Dist. LEXIS 11778, 1998 WL 433784*, at *12 (D.D.C. 1998); *F.T.C. v. Staples, Inc., 970 F. Supp. 1066, 1075 (D.D.C. 1997)*. **[*16]**

HN7[] Ultimately, a "submarket" definition turns on the same inquiry as a "market" definition -- "whether the products in a proposed submarket are reasonably interchangeable in use or production with products in the broader market." ABA Antitrust Section, ***Antitrust Law*** Developments 521 (4th ed. 1997). At bottom, then, "the same proof which establishes the existence of a relevant product market also shows (or fails . . . to show) the existence of a product submarket." *H.J., Inc. v. International Tel. & Tel. Corp., 867 F.2d 1531, 1540 (8th Cir. 1989)*; *AD/SAT v. Associated Press, 920 F. Supp. 1287, 1296 n.6 (S.D.N.Y. 1996)* (observing that "the required analysis does not change whether a particular product market is deemed a market or a submarket," agreeing with commentators that "submarket" term draws no meaningful distinction and restricting itself to use of the term "market"); *Staples, 970 F. Supp. at 1080 n.11* (noting that use of term "submarket" may be confusing and observing that "whatever term is used -- market, submarket, relevant product market -- the analysis is the same"). As Professor Areeda counseled, "speaking of submarkets **[*17]** is both superfluous and confusing in an antitrust case," and "nothing would be lost by deleting the word 'submarket' from the antitrust lexicon." IIA ***Antitrust Law*** P 533e, at 170, 173. Heeding this advice, where possible this Opinion will speak only of relevant "markets".

Also crucial here is the principle that ***HN8***[] to define a relevant product market one must look at how *consumers* view the products in question. *See* *Westman Commission Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)* ("Any definition of a line of commerce which ignores the buyers and focuses on what the sellers do, or theoretically can do, is not meaningful." (quoting *United States v. Bethlehem Steel Corp., 168 F. Supp. 576, 592 (S.D.N.Y. 1958))*; *Cardinal Health*, 1998 WL 433784, at *11 ("The relevant market consists of all of the products that the Defendant's customers view as substitutes to those supplied by the Defendants.").

The market definition inquiry set out in *Cardinal Health*, which involved a potential merger of pharmaceutical wholesalers, is apt here. In deciding whether wholesale distribution services constituted a market distinct **[*18]** from other distribution methods, Judge Sporkin focused on customers' decisions:

> Thus, in this case, if enough customers view other forms of prescription drug delivery methods as acceptable substitutes to the services provided by the Defendants, then the relevant market should include these

alternative methods. On the other hand, if customers do not view the other methods of distribution as viable substitutes, then the relevant product market should be limited to wholesalers' services.

12 F. Supp. 2d 34, 46, 1998 WL 433784, at *11. Judge Sporkin also reflected that "it is imperative that the Court, in determining the relevant market, take into account the economic and commercial realities of the pharmaceutical industry." *Id. at 46*. Similarly, market definition in this case must account for the "economic and commercial realities" of the beverage industry, but on this motion to dismiss such consideration must be limited to how those realities are alleged in the complaint.

B. *The Standard for Evaluating Market Definition on a Motion to Dismiss*

As the above cases might suggest, market definition is most often a factual inquiry. *See* **[*19]** *Hayden, 730 F.2d at 70 n.8* (noting that "'a pronouncement as to market definition is not one of law, but of fact'" (quoting *Jennings Oil Co. v. Mobil Oil Corp., 539 F. Supp. 1349, 1352 (S.D.N.Y. 1982)))*; *International Audiotext Network, Inc. v. American Tel. & Tel. Co., 893 F. Supp. 1207, 1214 (S.D.N.Y. 1994)* ("Market definition . . . is generally ultimately a question of fact which 'can be determined only after a factual inquiry into the "commercial realities" faced by consumers.'" (quoting *Eastman* *Kodak, 504 U.S. at 482, 112 S. Ct. at 2090*)), *aff'd*, *62 F.3d 69 (2d Cir. 1995)*. Motions to dismiss in this context thus may be granted only if the alleged market makes "no economic sense under any set of facts." *National Communications Ass'n v. American Tel. & Tel. Co., 808 F. Supp. 1131, 1134 (S.D.N.Y. 1992)* (quoting *Theatre Party*, 695 F. Supp. at 154); *Envirosource, Inc. v. Horsehead Resource Dev. Co., 1997 U.S. Dist. LEXIS 12570, 1997-2 Trade Cas. (CCH) P 71,944, at 80,608 (S.D.N.Y. 1997)* ("Extensive analyses of reasonable interchangeability **[*20]** and cross elasticity of demand . . . are not required at the pleading stage."); *Michael Anthony Jewelers, Inc. v. Peacock Jewelry, Inc., 795 F. Supp. 639, 647 (S.D.N.Y. 1992)* (deeming market definition-based 12(b)(6) dismissal proper only where proposed market definition is "patently implausible solely on the basis of the four corners" of the complaint). Absent an inherently implausible market allegation, the question must be resolved on the facts and economic realities of the case. *See, e.g., R.R. Donnelley, 1990 U.S. Dist. LEXIS 11361*, 1990-2 Trade Cas. P 69,239, at 64,854 (rejecting market definition where evidence showed that technological developments in relevant fields rendered once-viable market allegation implausible).

C. *PepsiCo's Alleged Market*

As explained above, PepsiCo defines the relevant market as "sales of fountain-dispensed soft drinks distributed through independent foodservice distributors throughout the United States." Complaint P 6. In alleging this market, PepsiCo contends, and for the purposes of the motion Coca-Cola accepts, that the relevant sales are to the restaurants, movie theaters, or other establishments that **[*21]** purchase fountain-dispensed soft drinks for later sale to individual consumers, not sales to the diners, moviegoers, or other customers who patronize those retail establishments and actually drink the soft drinks. The market PepsiCo alleges consists of an "increasing number" of these restaurants, theater operators, and other "on-premise" accounts who "generally make it a practice" to purchase the supplies exclusively through foodservice distributors. *Id*. PepsiCo thus alleges that the relevant market consists not of the sale of all soft drinks, or even of all fountain-dispensed soft drinks, but only of sales of fountain-dispensed soft drinks distributed through foodservice distributors. In this way, PepsiCo alleges that within the broader market for fountain-dispensed soft drinks, there exists a separate distinct market (or submarket) for fountain-dispensed soft drinks distributed through foodservice distributors. The boundaries of PepsiCo's proposed product market are thus defined by this particular method of distribution. As one would expect, Coca-Cola takes issue with this market definition.

D. *Coca-Cola's Arguments*

1. *A Market Cannot Be Limited to Sales Through a Single* **[*22]** *Group of Distributors*

At the outset I must address Coca-Cola's argument that "as a matter of law, a market cannot be limited to sales through a single group of distributors." Memorandum of Defendant The Coca-Cola Company in Support of Its Motion to Dismiss ("Coca-Cola Mem.") at 12. This statement is incorrect -- numerous courts have defined product markets by reference to a channel of distribution. *See e.g., Cardinal Health*, 1998 WL 433784, at *13 (holding that wholesale distribution of pharmaceutical products to customers who demanded such distribution was a relevant market, even though products so delivered were identical to those delivered through other modes of distribution); Staples, 970 F. Supp. at 1080 (holding that sales of consumable office supplies through office supply superstores constituted relevant market, even though the office supplies sold in those outlets were physically identical to those sold elsewhere; relying on "compelling pricing evidence" which demonstrated that customers of office superstores did not turn to non-superstore outlets when faced with price increases in the superstore market); Columbia Broadcasting Sys., Inc. v. FTC, 414 F.2d 974, 978-79 (7th Cir. 1969), **[*23]** *cert. denied*, *397 U.S. 907, 90 S. Ct. 903, 25 L. Ed. 2d 88 (1970)* (phonograph records sold through record clubs comprised relevant market even though records delivered by clubs were identical to those sold in record stores and other outlets); Henry v. Chloride, Inc., 809 F.2d 1334, 1343 (8th Cir. 1987) (sales of automobile batteries through route salespersons distinct from sales of such batteries through retail stores even though "the batteries sold by route salespersons are not different in character, creation or use from those sold from a warehouse or store"); Ansell Inc. v. Schmid Lab., Inc., 757 F. Supp. 467, 471-75 (D.N.J. 1991) (holding that sales of condoms "to retail distributors does constitute an 'economically significant submarket'" even though manufacturers "may sell their products through a number of different channels of distribution").

The point was expressly made in Greyhound Computer Corp., Inc. v. International Business Mach. Corp., 559 F.2d 488, 494 (9th Cir. 1977), *cert. denied*, *434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)*, where IBM argued that leasing general purpose **[*24]** computers did not constitute a submarket "economically distinct from others in which such computers are made available to users," such as sales, time-sharing and contracting with service bureaus. Id. at 494. In upholding the jury's finding that leasing of computers did constitute a separate submarket, the court noted:

> ***HN9***[] No rule of law or economic principle bars application of section 2 of the Sherman Act to one of several alternative means of distributing a product. The statute prohibits monopolization of 'any part' of interstate or foreign commerce. Accordingly, the Sherman Act and other antitrust statutes have been applied to protect competition in one of alternate channels of distribution.

Id.

Accordingly, ***HN10***[] it is appropriate to limit a market to a discrete channel of distribution so long as it is shown, using established market-definition criteria, that enough customers do not view other methods of distribution as viable substitutes to the distribution method in question. *See Cardinal Health*, 1998 WL 433784, at *11. PepsiCo's allegations on this score are more than adequate.

PepsiCo's complaint expressly alleges that there **[*25]** are no viable substitutes to fountain-dispensed soft drinks distributed through independent foodservice distributors. *See, e.g.*, Complaint P 8 (alleging that neither sales of soft drinks in bottles and cans nor sales of fountain-dispensed soft drinks through alternative means of distribution are viable alternatives to foodservice distribution of fountain-dispensed soft drinks). According to the complaint, distribution through foodservice distributors constitutes "the lifeblood of competitive efficiency" among the delineated restaurants, theaters, and other customers who must take delivery in this fashion in order to "remain logistically efficient." *Id*. P 8. Indeed, "because customers of foodservice distributors maintain a tightly integrated relationship with their distributors, relying on the distributor for virtually all of their supplies, it is far more difficult for them to switch distributors than to switch brands of soft drinks." *Id*. P 24. Accordingly, even though PepsiCo has made "highly competitive proposals" to customers of foodservice distributors, *id*. P 14, those customers "remain locked into Coca-Cola as their supplier without the real ability to entertain **[*26]** a competitive bid from PepsiCo." *Id*. P 27. PepsiCo has adequately alleged a market with reference to cross-elasticity of demand and a lack of reasonable interchangeability within the meaning of the distribution channel cases cited above.

Nonetheless, Coca-Cola argues that it is inappropriate to define the relevant product market in this way, because there is no difference in the products that the parties manufacture. Viewing PepsiCo's proposed market definition as a "submarket" within a broader soft-drink market, Coca-Cola argues that "there can be no relevant submarket without some differences in the products" the parties sell. In support Coca-Cola cites T. Harris, 931 F.2d 816, where a supplier of EKG paper alleged that its competitor monopolized the market in EKG paper sold to "hospitals with more than 200 beds." *Id. at 825*. Although recognizing that "a relevant product market can be limited to a portion of customers," the court cautioned that such a limitation must be "based on a distinction in the product sold to those customers." *Id. at 823*. The court rejected plaintiffs' purported distinction, finding after discovery **[*27]** that the paper sold to hospitals with more than 200 beds was identical to the paper sold to all other hospitals. Coca-Cola seizes on the court's holding, observing that "the product that Coca-Cola and PepsiCo supply -- soft drinks -- is *identical* irrespective of the form of distribution that is used." *See* Reply Brief of Defendant The Coca-Cola Company in Support of Its Motion to Dismiss ("Coca-Cola Reply Mem.") at 11. Coca-Cola maintains that this fact is fatal to PepsiCo's claim.

Although *T. Harris* is not dispositive for Coca-Cola, it highlights a crucial aspect of PepsiCo's claim: under PepsiCo's purported market definition, there *is* a distinction among the products in question -- PepsiCo has alleged that the relevant product market is not the market for soft-drinks, or fountain-dispensed soft drinks, but rather the market for "fountain-dispensed soft drinks *distributed through foodservice distributors*." This product -- fountain-dispensed soft drinks distributed through foodservice distributors -- is alleged to be something distinct from "fountain-dispensed soft drinks" distributed through any other means. Indeed, the complaint posits that the buyers in question **[*28]** have real efficiency-based reasons to take delivery of all of their supplies, including fountain syrup, from foodservice distributors; the complaint maintains that for these customers delivery through other means simply will not do. The *T. Harris* plaintiff made no showing to this effect. [1] Further, PepsiCo alleges that a soft drink manufacturer that can offer its product delivered through the preferred -- indeed required -- channel of distribution offers something markedly different than does a soft drink manufacturer that can only offer delivery of its product through alternate, but disfavored, methods of distribution.

Coca-Cola contends generally **[*29]** that PepsiCo has merely selected one group of customers and called it a market. Coca-Cola posits that "just as Coca-Cola could not define a market made up of [fast-food restaurants owned by a PepsiCo subsidiary] and then accuse PepsiCo of monopolizing the sale of soft drinks within that market, PepsiCo cannot make out a monopolization case focused entirely on a segment of the selling opportunities in which Coca-Cola has achieved substantial success." Coca-Cola Reply Mem. at 7.

In this vein, Coca-Cola relies on *Redmond v. Missouri Western State College, 1988 U.S. Dist. LEXIS 12230, 1988-2 Trade Cas. (CCH) P68,323, at 59,843 (W.D.Mo. 1988)*. There, a private college-textbook bookstore claimed that the college-owned bookstore unlawfully monopolized a market for the sale of college textbooks to scholarship students by issuing vouchers to the students usable only for books in the college-owned bookstore. The court rejected plaintiff's attempt to "define the relevant market in terms of a certain class of prospective purchasers," noting that to do so would run "contrary to the classic tests used in a monopolization case." *Id*. The court observed that "it seems unprecedented **[*30]** to allow a claim that a defendant has monopolized a class of customers as distinguished from a product or service." *Id*. The *Redmond* court noted, and Coca-Cola relies upon, the proposition that a plaintiff cannot artificially define a market so as to cover only the practice complained of; to do so would, as described by the *Redmond* court, be an example of "circular or at least result-oriented reasoning." *Id.*

Redmond is distinguishable. Here, the complaint alleges that market realities force the end users in question to make their purchases exclusively through foodservice distributors. Thus, at least at the pleading stage, it is economic reality, not reference to "the practice complained of," that delineates the boundaries of the alleged market. Further, the books at issue in *Redmond* were identical whether delivered by the plaintiff or the defendant; as noted above, PepsiCo argues that the character and value of the product actually manufactured by the parties -- fountain syrup used to create fountain-dispensed soft drinks -- changes in the eyes of buyers by virtue of the manner in which it is delivered. Because foodservice distributors satisfy all of their customers' **[*31]** supply needs at once, offering consolidated delivery and accounting systems, their customers buy supplies through them to the exclusion of all other methods of distribution. *See, e.g., Staples, 970 F. Supp. at 1080*; *Cardinal Health*, 1998 WL

---

[1] Further, as another court in this Circuit has observed, *T. Harris* was decided "not on law, but on facts." *See Sunshine Cellular v. Vanguard Cellular Sys., Inc., 810 F. Supp. 486, 494 (S.D.N.Y. 1992)*. Its consideration of the economic realities of the marketplace before it thus provide limited guidance on this motion under *Rule 12(b)(6)*.

433784, at *11. Thus, a manufacturer offering to sell its product through a foodservice distributor is offering something different from a manufacturer offering to sell the same product through other means of distribution. The cluster of products and services offered by independent foodservice distributors selling fountain syrup is alleged to constitute a different product, for antitrust purposes, than fountain syrup sold through other methods of distribution. *See, e.g., Staples, 970 F. Supp. at 1080*; *Cardinal Health*, 1998 WL 433784, at *15.

Finally, the *Redmond* scholarship students had the option of exchanging their vouchers for cash and then using that cash to purchase books elsewhere; the class of customers alleged to have no alternative to textbooks in the college-owned store in actuality were free to purchase their books from other distributors. Here, in contrast, **[*32]** PepsiCo alleges that buyers who take delivery through foodservice distributors are unable to switch to any product/distribution combination other than fountain-dispensed soft drinks distributed through foodservice distributors. If, as alleged, Coca-Cola has monopoly power in the market for distribution of fountain syrup within the distinct cluster of products and services offered by foodservice distributors, Coca-Cola would have the ability to restrict output, raise prices, and exclude competition in that market to the detriment of its rivals and buyers in the market.

PepsiCo has not, as suggested at argument, merely "drawn a circle around" certain customers and called those customers a market. To the contrary, PepsiCo has alleged a market using criteria traditionally considered in antitrust cases and has alleged that Coca-Cola has monopolized or attempted to monopolize that market. The market alleged indeed contains a disproportionately high number of Coca-Cola purchasers; but those purchasers are alleged to be distinct, not because they buy Coca-Cola, but because market forces dictate that they purchase their fountain syrup only through foodservice distributors, and those foodservice **[*33]** distributors offer only Coca-Cola.

Coca-Cola also relies on *Queen City Pizza v. Domino's Pizza, Inc., 124 F.3d 430 (3d Cir. 1997)*, *cert. denied*, *140 L. Ed. 2d 645, 118 S. Ct. 1385 (1998)*, to argue that a market cannot be defined by reference to the purchasing restrictions of a distinct class of customers. There, Domino's pizza franchisees, bound under the terms of their franchise agreements to purchase Domino's-approved supplies and distribution services, claimed that Domino's had monopolized the market for the supplies and services "used in the operation of Domino's stores." *Id. at 437*. The district court granted the defendant's *Rule 12(b)(6)* motion to dismiss for failure to allege a valid relevant market, and the Third Circuit affirmed. The court of appeals observed that the supplies available from other pizza suppliers and used by other pizza companies differed from Domino's approved supplies in but one particular: only the latter could be used by Domino's franchisees without precipitating a breach of the franchise contract. Because "the test for a relevant market is not commodities reasonably interchangeable by a particular **[*34]** plaintiff, but 'commodities reasonably interchangeable by consumers for the same purposes,'" the inquiry properly focused not on the contractual restrictions of one class of consumers but rather on the decisions of all consumers purchasing the commodity for the same purpose. *Id. at 438*. The court rejected the notion that a market may be defined by reference to a particular consumer's contractual restraints, affirming the district court's conclusion that the relevant economic power in the antitrust context must flow from the market, not from private contractual relations. *Id. at 435*; *see also* IIA Phillip E. Areeda et al., ***Antitrust Law*** P 510b, at 111 (Supp. 1998) (discussing *Queen City* holding and noting that "the existence of even an unconscionable contract does not create a relevant market for antitrust purposes").

In contrast to the *Queen City* plaintiffs, however, PepsiCo alleges a market based on consumer demand, not on contractual restrictions. As noted above, PepsiCo has alleged that "logistical efficiency" considerations compel an increasing number of purchasers to take delivery of supplies exclusively through foodservice distributors **[*35]** and that such customers will not switch away from that method of distribution once they have chosen it because to do so would result in "severely adverse economic and logistical consequences." Complaint P 8. Again, as alleged, economic forces, not contractual restraints, dictate the boundaries of the market defined in the complaint, and *Queen City* is thus distinguishable. *See* IIA ***Antitrust Law*** P 510b, at 112 (noting importance of distinguishing between "lock-in" imposed by a contract and that imposed by market forces).

The above cases demonstrate that ***HN11***[] market definition is a particularly fact-based inquiry. Thus it is not surprising that courts granting 12(b)(6) motions for failure to allege a proper market generally have dismissed only those complaints that failed to explain how the product in question was not reasonably interchangeable with other similar products. *See e.g., Rohlfing v. Manor Care, Inc., 172 F.R.D. 330, 347 (N.D. Ill. 1997)* (dismissing complaint where alleged market "improperly excludes interchangeable substitutes"); *Deep-South Pepsi-Cola Bottling Co. v. PepsiCo, Inc., 1989 U.S. Dist. LEXIS 4639, 1989-1 Trade Cas. (CCH) P68,560 (S.D.N.Y. 1989)* **[*36]** (granting 12(b)(6) dismissal where plaintiff failed "to set out a theoretically rational explanation to support its proposed relevant product market"; plaintiff "failed to allege why Pepsi-Cola franchises are not interchangeable with franchises for the distribution of other soft drinks"); *Theatre Party*, 695 F. Supp. at 153 (dismissing complaint after concluding that plaintiff alleging a market limited only to the defendant-supplier's own product had "narrowly defined the market in an attempt to conform the alleged market to the facts of the present case"). Here, the complaint addresses and explains the basis for the market, and on this score is more than sufficient to withstand a motion to dismiss.

While not compelling on a motion to dismiss, Coca-Cola's arguments highlight the difficulties PepsiCo may encounter in proving the existence of the market it has alleged in the complaint. Indeed, numerous cases have rejected purported market definitions, some of which were similar to that proposed here, after evidence culled during discovery demonstrated that the plaintiff had excluded reasonably interchangeable products or services from its proposed market definition. **[*37]** *See e.g., Thurman v. Pay ' N Pak Stores, Inc., 875 F.2d 1369 (9th Cir. 1989)* (rejecting proposed submarket based on one-stop shopping where evidence failed to support plaintiff's purported market); *Westman, 796 F.2d 1216* (rejecting proposed market limited to one-stop shopping distributors of goods where evidence in record failed to establish inelastic demand between defendant's products and similar products offered by competing brands); *see also R.R. Donnelley*, 1990 Trade Cas. at P 64,852 (denying motion for a preliminary injunction after five days of evidentiary hearings because plaintiff was unable to prove the contours of the product market that it had alleged); *T. Harris, 931 F.2d 816* (rejecting alleged market because record failed to support finding that products included in alleged market differed from those sold to different class of customers).

Here, if the facts adduced during discovery demonstrate that customers purchasing fountain-dispensed soft drinks view other methods of fountain-dispensed soft drink delivery as acceptable substitutes to delivery through foodservice distributors, then the market **[*38]** alleged should include those alternative methods, and Coca-Cola may be entitled to summary judgment at that time. But for the moment our attention is limited to the complaint, and the allegations contained therein must be taken as true. Those allegations expressly state that an "increasing number" of customers do not view the other distribution methods as viable substitutes. As such the market alleged in the complaint is properly limited to fountain-dispensed soft drinks distributed through foodservice distributors.

2. *Even if the Purported Market Exists, It is Irrelevant to This Claim*

Conceding that a market may, in certain circumstances, be defined by reference to a distribution channel, Coca-Cola argues that even if such a market exists here, it is irrelevant to PepsiCo's claim. In particular, Coca-Cola points out that PepsiCo alleges it has been foreclosed from competition. Therefore, Coca-Cola maintains, citing *Tampa Electric Co. V. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*, that foreclosure must be measured within the context of a market which "includes the full range of selling opportunities reasonably open to rivals, namely, **[*39]** all the product and geographic sales they may readily compete for, using easily convertible plants and marketing organizations." Coca-Cola Reply Brief at 4 (citing IIA ***Antitrust Law*** P 570b, at 278 (rev. ed. 1995)). To this end, Coca-Cola asserts that foreclosure should be "measured in a market including the total output of the sellers who would be included in the market for assessing a horizontal merger between the merging seller [*i.e.*, Coca-Cola] and any allegedly foreclosed rival [*i.e.*, Pepsi]." Coca-Cola Mem. at 13. Coca-Cola maintains that whatever amount of sales might be attributed to the buyers PepsiCo delineates in its alleged market, such a distinct class of customers is meaningless unless considered in the context of the entire market in which PepsiCo and Coca-Cola, both soft drink manufacturers, compete generally. I disagree.

HN12[] A "'market' for antitrust purposes is the one relevant to the particular legal issue at hand." IIA ***Antitrust Law*** P 533, at 167. With this in mind it is helpful to examine the nature of the claim PepsiCo asserts. Here, PepsiCo asserts monopoly claims under *section 2* of the Sherman Act. That Act prohibits unlawful monopolies because monopoly **[*40]** power allows the monopolist to control a market by excluding competition, restricting output, and raising prices, all without losing customers. *See Grinnell Corp., 384 U.S. at 571, 86 S. Ct. at 1704*; *Hamilton*

College, 128 F.3d at 67 (explaining that ability to "restrict output and raise prices" without losing customers is "precisely the vice of a monopoly"). **HN13**[] The essence of product market definition in a monopoly case, therefore, is determining whether there exists a group of buyers which is unable, because of market forces, to switch to an alternative product or service in the face of a monopolist's price increase. [2]

[*41] An example by Professor Areeda, advanced in his attempt to discourage use of the term "submarket," *see supra*, demonstrates that identifying the relevant market turns on identifying the harm to be avoided. Presume a glass maker selling containers for food, medicine, *etc.*; presume also that some of the buyers can readily substitute cans or other packages, but others find substitution more difficult. In explaining how to define the market properly in such a case, Professor Areeda noted that "while the glass firms might be able to charge the latter higher prices than others, the more vulnerable customers are not a 'submarket,'" but rather are properly deemed a relevant product market in their own right. IIA ***Antitrust Law*** P 533e, at 170. The following F.T.C. discussion makes the point even more clearly:

> If in fact price could be raised above competitive levels for the glass containers sold in these end-use segments, those segments would be proper topics of antitrust concern not because they are submarkets, but because they would be relevant product markets in their own right. *At least in theory, each end-use segment could stand as a grouping of sales for which a hypothetical* **[*42]** *monopolist might be able to impose a significant price increase.*

In re Owens-Illinois, Inc., 115 F.T.C. 14 (1992) (emphasis added).

Here, the complaint alleges a distinct "end-use segment" comprised of those fountain-dispensed soft drink purchasers who can take delivery *only* through foodservice distributors. For these customers nothing else will do; in Professor Areeda's words, they find substitution "more difficult" than do other purchasers of fountain syrup. If a monopolist -- in this case Coca-Cola -- can charge these customers more than it charges others, these "more vulnerable" customers constitute a separate product market, and that market is directly relevant to a case complaining about the monopolist's anticompetitive behavior.

As noted above, Coca-Cola suggests that the proper market definition inquiry in a case between manufacturers would be the same as that undertaken in evaluating a horizontal merger between those parties. Exploring this suggestion, I note that in evaluating a horizontal merger between sellers, it is appropriate to consider not only the effect of the merger across a market defined by the full range of those companies' selling **[*43]** opportunities, but also to explore the merger's effects within smaller, distinct markets for "unique" items that the merging entities offer. As the Supreme Court put it in *Brown Shoe*, "because § 7 of the Clayton Act prohibits any merger which may substantially lessen competition 'in any line of commerce', it is necessary to examine the effect of a merger in each economically significant submarket to determine if there is a reasonable probability that the merger will substantially lessen competition." Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1524. Indeed, as then-Judge Bork observed, "that view of submarket analysis is also mandated by the purpose of antitrust laws: the promotion of consumer welfare." Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 253 U.S. App. D.C. 142, 792 F.2d 210, 218 (D.C. Cir. 1986) (Bork, J.), *cert. denied*, *479 U.S. 1033, 107 S. Ct. 880, 93 L. Ed. 2d 834 (1987)*; *see also* United States v. Household Fin. Corp., 602 F.2d 1255 (7th Cir. 1979) (noting that "in determining the effect of competition in mergers of one type of institution, it is the effect in any area of unique services **[*44]** that must be considered" (citing United States v. Phillipsburg Nat'l Bank, 399 U.S. 350, 360-61, 90 S. Ct. 2035, 26 L. Ed. 2d 658 (1970))), *cert. denied*, *444 U.S. 1044 (1980)*.

[2] Courts have also considered "supply substitutability," or cross-elasticity of supply, *i.e.*, "the ability of firms in a given line of commerce to turn their productive facilities toward the production of commodities in another line because of similarities in technology between them." *See* Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1271 (9th Cir. 1975). While the parties have not focused on this potential factor, I note that the effect, if any, of supply substitutability on market definition can be determined after discovery.

Indeed, in *Owens-Illinois, supra*, which involved a proposed merger of glass container manufacturers, the F.T.C. looked not only at the market for the broadest range of the companies' selling opportunities, but also examined the effect within distinct "end-user segments" that might be vulnerable to price increases imposed by a hypothetical monopolist. The Commission found that certain classes of customers put the glass containers to different end uses, with varying abilities to substitute away from the product in the event of price increases. The Commission concluded that so long as an "end-user segment within the larger grouping meets the same economic standard which defines a market, the end-use segment may properly be analyzed as a product market in its own right." *Owens-Illinois*, 115 F.T.C. at 16. Accordingly, here, where the complaint alleges an end-use segment that "meets the same economic standard which defines a market," it is appropriate to consider that **[*45]** segment a market.

3. *Coca-Cola Cannot Monopolize a Market in Which It Does Not Participate*

Coca-Cola also argues that PepsiCo's allegations indicate that the proper market here is really the market for foodservice distribution services, not any type of market for fountain syrup. Coca-Cola argues that PepsiCo's market definition is thus inappropriate in a claim against Coca-Cola because Coca-Cola is not a foodservice distributor.

To support the proposition that an entity may not be said to monopolize a market in which it does not participate, Coca-Cola points to *Official Airline Guides, Inc. v. FTC, 630 F.2d 920 (2d Cir. 1980)*, *cert. denied*, *450 U.S. 917, 101 S. Ct. 1362, 67 L. Ed. 2d 343 (1981)*. There, the petitioner published an airline guide which provided detailed information on flight connections and fares. The guide, described as the "bible" of the industry, was the "standard reference for airline ticket offices, travel agents, businesses, and the public generally" and was the "primary market tool of . . . virtually every (air) carrier . . . in the United States." *Id. at 921-22*. The publisher's concededly arbitrary listing **[*46]** policy was found to handicap commuter carriers attempting to compete against certificated carriers. The Court of Appeals held that the publisher, not itself an air carrier, had no duty under the Federal Trade Commission Act "not to discriminate unjustifiably between certificated air carriers and commuter airlines so as to place the latter at a significant competitive disadvantage." *Id. at 921*.

In so holding, the Court of Appeals noted at the outset that the guide publisher had no "purpose to create or maintain a monopoly" in the relevant market, which was defined as the airline industry. *Id. at 925*. The court concluded that the guide publisher, "though possibly a monopolist in the airline schedule publishing industry, admittedly had no anticompetitive motive or intent with respect to the airline industry and is engaged in a different line of commerce from that of the air carriers." *Id. at 926*.

Here, in contrast, the complaint clearly alleges that Coca-Cola has acted with "anticompetitive motive or intent with respect" to the downstream distribution of its product, that is to say, in the market for fountain-dispensed soft drinks **[*47]** distributed through foodservice distributors. In particular, by virtue of its agreements with foodservice distributors and in carrying out its actual and threatened refusals to deal, Coca-Cola is alleged to have exhibited anticompetitive conduct in a market for its product as delivered through a particular method of distribution that a number of customers must have in order to remain efficient. It is alleged to have done so to the detriment of both retail customers and ultimate consumers, as well as to the detriment of PepsiCo, which is foreclosed from reaching the buyers in this market. Moreover, in contrast to *Official Airline Guide*, both PepsiCo and Coca-Cola compete with one another in the market alleged.

Coca-Cola also relies on *Interface Group, Inc. v. Massachusetts Port Authority, 816 F.2d 9 (1st Cir. 1987)*, but that case is distinguishable as well. There, the defendant was a municipal authority which possessed a monopoly over an airport's facilities. The plaintiff, an air carrier, was denied access to the ground facility of its choice and claimed that defendant had denied plaintiff access to an "essential facility" in violation of *section 2* of the Sherman **[*48]** Act. The court rejected the claim, because it was "difficult to see how denying a facility to one who, like [plaintiff], is not an actual or potential competitor could enhance or reinforce the monopolist's market power." *Id. at 12*. Here in contrast, Coca-Cola's alleged refusals to deal clearly could "enhance or reinforce" Coca-Cola's market power in the market for the sale of its product to those customers who must take delivery through independent foodservice distributors.

The lingering question, however, is whether it makes sense to charge Coca-Cola, a soft-drink manufacturer, with monopolizing a product market defined by reference to both the product Coca-Cola manufactures, fountain syrup, and the independent, value-added method of distribution through which that syrup is delivered. As PepsiCo alleges it, this case involves one market with two components: the market for (1) fountain-dispensed soft drinks (2) distributed through foodservice distributors. As Coca-Cola would have it, this case involves two distinct markets: (1) a market for fountain-dispensed soft drinks (in which PepsiCo and Coca-Cola compete) and (2) a market for foodservice distribution services **[*49]** (in which neither PepsiCo nor Coca-Cola participate or compete). Coca-Cola maintains that the market PepsiCo has alleged is at most a distribution-specific market; thus, because Coca-Cola does not participate or operate in any distribution business, a claim that it monopolizes such a market makes no sense. According to Coca-Cola, it may be accused of monopolizing only a market for the "thing" it produces, which in this case is the fountain syrup used to make fountain-dispensed soft drinks.

But PepsiCo does more than allege a market for distribution services and it has not alleged that Coca-Cola monopolizes the foodservice distribution industry generally. Rather, PepsiCo alleges that Coca-Cola has monopolized the market for fountain-dispensed soft drinks *as distributed through* foodservice distributors. According to the allegations in the complaint, consumers view fountain syrup distributed within this cluster of products and services to be different from fountain-dispensed soft drinks distributed through other means. According to the complaint, therefore, the relevant product is neither fountain-dispensed soft drinks alone nor foodservice distribution services alone, but rather **[*50]** a distinct product created by the combination of fountain-dispensed soft drinks and distribution through foodservice distributors. So understood, Coca-Cola has a hand in making this combined product -- it manufactures the fountain syrup and secures delivery of that syrup through a distinct channel of distribution that the complaint describes as the "lifeblood of competitive efficiency in the restaurant business, movie theater business and other businesses that depend upon delivery through foodservice distributors in order to remain logistically efficient." Complaint P 8. In this way Coca-Cola creates a product that is unique in the purchasing eyes of an increasing number of restaurants, movie theaters, and other "on-premise" accounts. Moreover, the complaint alleges that by virtue of its actual and threatened refusals to deal Coca-Cola has acted with anticompetitive purpose and intent in this market. Thus, while the complaint does not allege that Coca-Cola is a direct participant in the downstream foodservice distribution market, *i.e.*, it does not compete horizontally with foodservice distributors, the complaint does allege Coca-Cola's purposeful participation in the distribution **[*51]** of its product and in that regard trumps, at the pleading stage, any attempt by Coca-Cola to disclaim participation in the market alleged in the complaint.

III. FAILURE TO ALLEGE ANTICOMPETITIVE CONDUCT

PepsiCo alleges that Coca-Cola is unlawfully exercising its monopoly power by refusing to deal and threatening to refuse to deal with foodservice distributors that carry or desire to carry Pepsi. Coca-Cola properly notes that ***HN14***[] even where a defendant has monopoly power, a plaintiff's claims of actual or attempted monopolization require proof of anticompetitive conduct as an essential element of the claim. *See* *Spectrum Sports, 506 U.S. at 456, 113 S. Ct. at 890*; *Delaware & Hudson Ry. Co. v. Consolidated Rail Corp., 902 F.2d 174, 178 (2d Cir. 1990)*, *cert. denied*, *500 U.S. 928, 111 S. Ct. 2041, 114 L. Ed. 2d 125 (1991)*.

Coca-Cola argues that the conduct in which it is alleged to have engaged is not anticompetitive as a matter of law. In particular, Coca-Cola contends that PepsiCo's complaint is fatally flawed because it fails to allege that Coca-Cola's agreements with foodservice distributors are not terminable at will. For this **[*52]** proposition Coca-Cola cites a number of cases of "fairly recent vintage": *Paddock Publications, Inc. v. Chicago Tribune Co., 103 F.3d 42* (7th Cir.), *cert. denied*, *520 U.S. 1265, 138 L. Ed. 2d 196, 117 S. Ct. 2435 (1997)*; *Omega Envt'l, Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1164 (9th Cir. 1997)*, *pet. for cert. denied*, *142 L. Ed. 2d 36, 119 S. Ct. 46 (1998)*; *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 236-38 (1st Cir. 1983)*.

Each of these cases held that exclusive dealing arrangements that were terminable at will or of short duration were not barred by the antitrust laws because they left the relevant market up for grabs and because competitors were not foreclosed from the market but rather were encouraged to "compete for the contract." *See* *Paddock, 103 F.3d at 45* (dismissing exclusive dealing claim brought under section 1 of the Sherman Act because, *inter alia*, "other firms that want to enter the market can do so by competing at intervals for these contracts"); *Gilbarco, 127 F.3d at 1164* (finding, after trial, that exclusive dealing arrangements **[*53]** did not foreclose rivals from substantial portion of market because other modes of distribution were available and all relevant distributors were open to bids within one year or less); *Barry Wright, 724 F.2d at 236-38* (affirming district court's rejection of claim that requirements contract was exclusionary after finding, on complete record, that multiple factors, including nature and duration of contract, suggested the agreements were not 'exclusionary').

Coca-Cola argues that in this case the ability of *all* distributors to switch to Coca-Cola's competitors' products at all times precludes a finding of exclusionary conduct as a matter of law. Coca-Cola points out that the complaint itself alleges that the reason distributors faced with threats do not carry Pepsi is because those distributors could not afford to stop distributing Coca-Cola in favor of Pepsi because those distributors have customers who want Coca-Cola. According to Coca-Cola, this reflects Coca-Cola's superior product and superior business strategy, not unlawful monopolistic activity.

PepsiCo points out, however, that this complaint does not assert that Coca-Cola has entered into anticompetitive **[*54]** exclusive dealing contracts. Rather, PepsiCo complains that Coca-Cola's actual and threatened refusals to deal represent anticompetitive monopolization or attempted monopolization of the relevant market. To this effect, PepsiCo relies predominantly upon *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, which held that a defendant-monopolist's refusal to deal with any advertiser that also dealt with an emerging competitor constituted a *section 2* violation because it was a use of "monopoly to destroy threatened competition." *Id. at 143, 72 S. Ct. at 187* (recognizing ***HN15***[] the general right of a private business to select its customers, but holding that the exercise of that right for the purpose of monopolization violates the Sherman Act). This principle may be traced back to the Supreme Court's pronouncement generations ago that:

> *In the absence of any purpose to create or maintain a monopoly*, the [Sherman Act] does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he may deal. **[*55]**

United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992 (1919). The principle has remained valid law. *See* *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 105 S. Ct. 2847, 2857, 86 L. Ed. 2d 467*; *Byars v. Bluff City News Co., 609 F.2d 843, 858 (6th Cir. 1979)* (observing that where "a monopolist refuses to deal with customers who deal with its rivals," such "behavior is inherently anticompetitive; *Lorain Journal* . . . makes it clear that this is illegal . . . ."). As noted by Professors Areeda and Hovenkamp:

> Extraction of an agreement not to deal with any competitor -- or the equivalent, refusing to deal with buyers who do -- can be exclusionary and particularly damaging where the buyers cannot do without the seller's product or service. We see no convincing justification for a requirement that a customer not deal with a particular rival.

IIIA Phillip E. Areeda et al., ***Antitrust Law*** P 768e6 (citing *Lorain Journal, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181*).

In this case, PepsiCo asserts that Coca-Cola has refused to deal and threatened **[*56]** to refuse to deal with independent foodservice distributors who wish to distribute Pepsi. This conduct might be unobjectionable had PepsiCo not alleged that Coca-Cola has acted with a "purpose to create or maintain a monopoly." But PepsiCo's complaint does allege that Coca-Cola possesses or is likely to possess monopoly power in the market for fountain-dispensed soft drinks delivered through these distributors and that Coca-Cola's actual and threatened refusals to deal have been undertaken with the "purpose to create or maintain" monopoly power in that market. The complaint also alleges that Coca-Cola's actions effectively foreclose PepsiCo from reaching any consumers in the relevant market. As such, PepsiCo's complaint states a *section 2* claim, and Coca-Cola's motion to dismiss on the ground that PepsiCo has failed to allege anticompetitive conduct must be denied.

CONCLUSION

"***HN16***[] Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***." *Eastman Kodak, 504 U.S. at 467-68, 112 S. Ct. at 2082*. Taking the allegations in the complaint as true, I find that they describe an economically **[*57]** viable market relevant to the *section 2* claims PepsiCo asserts. Thus, because it does not appear that PepsiCo "can prove no set of facts in support of [its] claim which would entitle [it] to relief," *see* *Hamilton College, 128 F.3d at 62*, Coca-Cola's motion to dismiss is denied. PepsiCo now must demonstrate, however, that "market realities" support the market it has alleged.

Counsel shall appear for an initial pre-trial conference in Courtroom 12A on Friday, October 2, 1998, at 10:00 a.m.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews the district court's grant of summary judgment de novo. Although permissible inferences from the underlying facts are to be drawn in the light most favorable to the non-moving party, those inferences must, in every case, fall within the range of reasonable probability and not be so tenuous as to amount to speculation or conjecture.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN2[] **Remedies, Damages**

Section 4 of the Clayton Act, which authorizes private actions for treble damages, provides in part that any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue. *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN3[] **Private Actions, Standing**

In determining whether a plaintiff has standing to sue under the antitrust laws, the threshold inquiry must focus on the plaintiff's alleged injury. This inquiry is potentially dispositive: if there is no showing of injury, the plaintiff does not have a claim cognizable under the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN4[] **Private Actions, Remedies**

The threshold showing of injury in a private antitrust action, sometimes labeled injury in fact, is satisfied if the plaintiff can produce sufficient evidence of an injury proximately caused by the defendants' conduct. However, the showing of an injury causally linked to a defendant's alleged illegal conduct, by itself, is insufficient to maintain an action for treble damages. Rather, an antitrust plaintiff must show that the alleged injury is an "antitrust injury," which it defined as: injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should be the type of loss that the claimed violations would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN5[] **Private Actions, Remedies**

Injury in fact is not equated with antitrust injury for not every loss stemming from an antitrust violation counts as antitrust injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN6[] **Private Actions, Standing**

Antitrust standing involves more than the constitutional standing requirement of case or controversy. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN7[] **Clayton Act, Claims**

Certain factors limiting the reach of the threefold damage remedy authorized by § 4 of the Clayton Act, codified at *15 U.S.C.S. § 15(a)*, which are to be assessed on a case-by-case basis, include: the risk of duplicative recovery by multiple antitrust claimants; the extent to which the claim is based upon speculative, abstract, or impractical measures of damages; the causal connection between the alleged violation and the harm suffered; and the relationship of the injury alleged to the forms of injury about which Congress was concerned when it created a private remedy.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN8[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act provides in part that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to be illegal. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Opinion

OPINION

PER CURIAM:

Supermarket of Marlinton, Inc. ("Marlinton") and the owners of Central Market **[*2]** ("Central Market") filed class actions against several large dairy companies, seeking treble damages for alleged violations of federal antitrust laws. Specifically, the grocery stores claimed that the dairy companies conspired to suppress competition by fixing, raising, and maintaining the price of milk at artificially high levels in violation of the Sherman Act. *See 15 U.S.C.A. § 1 (West 1997)*. Marlinton and Central Market appeal the district court's order granting summary judgment to the dairy companies on the ground that they failed to produce sufficient evidence of injury in fact, and, therefore, lacked antitrust standing. We affirm.

I.

Marlinton and Central Market are two grocery stores located in southeastern West Virginia and southwestern Virginia, respectively. They instituted these private antitrust actions in the wake of a 1992 Department of Justice investigation into the milk industry, which led to the indictment of Valley Rich Dairy ("Valley Rich"), Meadow Gold Dairies, Inc. ("Meadow Gold"), Borden, Inc. ("Borden"), and three Meadow Gold officials on charges that they had rigged school milk bids. The dairy companies pled guilty while the Meadow **[*3]** Gold officials proceeded to trial.

During the trial of the Meadow Gold officials, Paul French ("French"), the former General Manager of Valley Rich, testified under a grant of use immunity that he had engaged in various pricefixing activities with officials from Meadow Gold, a competitor in portions of Virginia and West Virginia. More specifically, French testified about meetings in which he and the Meadow Gold officials conspired to fix school milk bids and wholesale milk prices. He stated that these meetings were in person, prearranged, and conducted at locations away from his office. French further testified that he filled out his expense accounts in such a manner as to conceal these meetings. The trial resulted in a hung jury and the Government did not reprosecute the case. French's testimony, however, became the basis for the present actions against the dairies.

In 1993, Marlinton filed a class action [1] against Meadow Gold, Borden, Valley Rich, Flav-O-Rich, Inc. ("Flav-O-Rich"), and Valley of Virginia Co-Operative Milk Producers Association ("Valley of Virginia"), [2] alleging that between 1984 and 1987 the dairies had conspired to fix the price of milk sold in the wholesale **[*4]** market where Marlinton conducted business. The district court granted the dairies' motion for summary judgment on the ground that the applicable statute of limitations barred Marlinton's claim. [3] We reversed that ruling in *Supermarket of Marlinton, Inc. v. Meadow Gold Dairies, Inc.*, [4] holding that the district court had employed an incorrect standard for the tolling of the statute of limitations under the fraudulent concealment doctrine. In addition, we recognized that on remand the district court would have to resolve the question of whether Marlinton had antitrust standing, an issue that the parties had not yet fully briefed. [5] In April 1996, Marlinton's attorney filed an identical suit on behalf of John and Ruth Miles, who owned and operated Central Market during the period of the alleged conspiracy. The district court consolidated these cases for discovery purposes. Thereafter, in April 1997, the grocery stores deposed French, who by then claimed to have a poor recollection of his price-fixing discussions with Meadow Gold officials. However, French did testify that his discussions with Meadow Gold officials had "no application" when: (1) Valley Rich faced competition from **[*5]** a third dairy competitor; (2) one of Valley Rich's partners, such as Flav-O-Rich, controlled the account; (3) there was guaranteed pricing; (4) the milk was sold to a customer under a private label; or (5) the milk was purchased from a distributor to whom Valley Rich sold milk.

[*6] Two developments relevant to this appeal occurred after French's deposition. First, the district court approved a classwide settlement between the grocery stores and Meadow Gold and Borden in the amount of $ 100,000. Therefore, in the present appeal, Valley Rich, Flav-O-Rich, and Valley of Virginia are the only defendants remaining in the case. Second, the non-settling dairies once again moved for summary judgment, arguing that the grocery stores lacked antitrust standing because the grocery stores could not prove that they were injured by the price-fixing conspiracy. Although Marlinton and Central Market could show that a price-fixing conspiracy existed in the general geographic areas where they conducted business, the district court held they could not demonstrate that the products they purchased from the dairies were a subject of that conspiracy, *i.e.*, Marlinton and Central Market failed to produce sufficient evidence of injury in fact. Therefore, the district court found that Marlinton and Central Market lacked antitrust standing, and granted the dairies' motion for summary judgment. This appeal followed.

II.

---

[1] Marlinton purported to represent a class of similarly situated commercial milk purchasers in western Virginia and a portion of southeastern West Virginia.

[2] During the relevant period, Flav-O-Rich and Valley of Virginia were joint venture partners of Valley Rich.

[3] *See* *Supermarket of Marlinton, Inc. v. Meadow Gold Dairies, Inc., 874 F. Supp. 721 (W.D. Va. 1994)*.

[4] *71 F.3d 119 (4th Cir. 1995)*.

[5] On remand, the dairies renewed their motion for summary judgment, arguing that the action was both time-barred and that Marlinton lacked antitrust standing to bring suit because it could not prove that it purchased a price-fixed product from any of the dairies during the relevant period. The district court denied that motion.

HN1[] We review the district court's grant of summary judgment *de* **[*7]** *novo*. [6] Although permissible inferences from the underlying facts are to be drawn in the light most favorable to the non-moving party, we have noted that, "those inferences must, in every case, fall within the range of reasonable probability and not be so tenuous as to amount to speculation or conjecture." [7] *HN2*[] Section 4 of the Clayton Act (" § 4"), which authorizes private actions for treble damages, provides in pertinent part that, "*any* person who shall be injured in his business or property by reason of *anything* forbidden in the antitrust laws may sue . . . ." [8] The Supreme Court has recognized that "[a] literal reading of the statute is broad enough to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation." [9] For this reason, "the federal courts . . . have not interpreted section 4 as expansively as its literal language suggests." [10] Rather, "the voluminous case law on [antitrust] standing to sue under section four reflects an effort by the federal courts to narrow the scope of the broad statutory language so as to prevent unfair and oppressive results." [11] "Judicial limitation of the § 4 remedy . . **[*8]** . has proven to be less than an empirical judicial science." [12] **[*9]** "The Supreme Court, along with the lower federal courts, has long struggled to develop a precise test to determine whether a particular plaintiff is the proper party to bring an antitrust suit under section 4 of the Clayton Act; in truth, 'the issue of antitrust standing has become somewhat confused.'" [13]

Although federal courts have not developed a single precise test for determining antitrust standing, they have gradually begun to conduct § 4 analysis in a uniform manner. [14] **[*12]** In particular, courts have recognized that an

[12] *Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1081 (6th Cir. 1983)*.

[13] *Todorov, 921 F.2d at 1449* (footnote omitted) (quoting *Local Beauty Supply, Inc. v. Lamaur, Inc., 787 F.2d 1197, 1201 (7th Cir. 1986))*.

In *Associated General, 459 U.S. at 535-36*, the Supreme Court likened the struggle of federal judges to fashion a precise test to determine antitrust standing to "the struggle of common-law judges to articulate a precise definition of the concept of 'proximate cause.'"

[14] *See* *Sports Racing Serv., Inc. v. Sports Car Club of Am., Inc., 131 F.3d 874, 882 (10th Cir. 1997)* (stating that "to maintain standing to bring an antitrust claim under § 4 . . . a plaintiff must show (1) an 'antitrust injury;' and (2) a direct causal connection between that injury and a defendant's violation of the antitrust laws"); *Doctor's Hosp. of Jefferson, Inc. v. Southeast Med. Alliance, Inc., 123 F.3d 301, 305 (5th Cir. 1997)* (antitrust standing exists only if plaintiff shows: (1) injury in fact; (2) antitrust injury; and (3) proper plaintiff status, "which assures that other parties are not better situated to bring suit"); *Barton & Pittinos, Inc. v. Smithkline Beecham Corp., 118 F.3d 178, 182 (3d Cir. 1997)* (explaining that antitrust standing requires a showing of antitrust injury and proper plaintiff status); *Serfecz v. Jewel Food Stores, 67 F.3d 591, 596-97 (7th Cir. 1995)* ("in order to maintain an antitrust action, plaintiffs must establish that they (1) have suffered an antitrust injury and (2) are proper plaintiffs to maintain an antitrust action . . . ."); *Balaklaw v. Lovell, 14 F.3d 793, 797 n.9 (2d Cir. 1994)* (noting that courts have developed a two-pronged test for determining antitrust standing: (1) whether the plaintiff suffered an antitrust injury; and (2) an analysis of other factors "largely relating to the directness and identifiability of the plaintiff's injury"); *Todorov, 921 F.2d at 1449* (prescribing a twopronged test for determining antitrust standing: (1) whether the plaintiff has suffered an antitrust injury; and (2) whether the

antitrust standing analysis should begin by examining the plaintiff's alleged injury. As the Eighth Circuit has noted, ***HN3***[] in determining "whether a plaintiff has standing to sue under the antitrust laws, the threshold inquiry must focus on the plaintiff's alleged injury. This inquiry is potentially dispositive: if there is no showing of injury . . . the plaintiff does not have a claim cognizable under the antitrust laws. **[*10]** " [15] Indeed, we have noted that injury is the "crux" of every private antitrust action. [16] ***HN4***[] This threshold showing of injury, sometimes labeled injury in fact, [17] **[*13]** is satisfied if the plaintiff can produce sufficient evidence of an injury "proximately caused by the defendants' conduct." [18] **[*14]** However, the Supreme Court has held that the showing of an injury causally linked to a defendant's alleged illegal conduct, by itself, is insufficient to maintain an action for treble damages. [19] Rather, in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, [20] the Court held that an antitrust plaintiff must show that the alleged injury is an "antitrust injury," which it defined as:

---

plaintiff is an "efficient enforcer" of the antitrust laws); *Adams v. Pan Am. World Airways, Inc., 264 U.S. App. D.C. 174, 828 F.2d 24, 26 (D.C. Cir. 1987)* (stating that the plaintiff must show: (1) antitrust injury; and (2) proper plaintiff status).

[15] *Midwest Communications, 779 F.2d at 450* (footnote omitted). *See also* *Amarel v. Connell, 102 F.3d 1494, 1507 (9th Cir. 1997)* (stating that "the nature of the plaintiff's alleged injury is of 'tremendous significance' in determining whether a plaintiff has antitrust standing") (quoting *Bhan v. NME Hosp., Inc., 772 F.2d 1467, 1470 n.3 (9th Cir. 1985))*; 2 Phillip E. Areeda & Hebert Hovenkamp, ***Antitrust Law*** P 363a, at 219 (rev. ed. 1995) (stating that "all courts demand a showing of injury-in fact 'caused' by an antitrust violation").

[16] *See* *Windham v. American Brands, Inc., 565 F.2d 59, 66 (4th Cir. 1977)*.

[17] *See* Areeda & Hovenkamp, *supra*, P 360e, at 201 (stating that "we usually speak of 'causation' or 'injury-in-fact' when focusing on the presence or absence of actual injury caused by an alleged antitrust violation").

We recognize that a majority of courts begin their antitrust standing analysis by determining whether a plaintiff has suffered an "antitrust injury." We see no substantive difference between those courts which look first to whether the plaintiff has produced sufficient evidence of injury in fact and those which begin by examining whether the plaintiff has suffered an "antitrust injury." "The key point is that a plaintiff is generally denied relief unless he proves each element[for standing]. The Supreme Court has made this clear in requiring a plaintiff to establish both proximately caused injury-in-fact and antitrust injury as 'essential' elements of the plaintiff's case." *Id.*,P 360e, at 200 (citing *Associated General, 459 U.S. at 539, 542-44*; *Blue Shield of Virginia v. McCready, 457 U.S. 465, 478-79, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982))*.

We do note, however, that there is a distinction between the two concepts. On several occasions, the Supreme Court has declined to ***HN5***[] "equate injury in fact with antitrust injury . . . [for] not every loss stemming from an [antitrust] violation counts as antitrust injury." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339 n.8, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* (noting that the Court declined to adopt such an approach in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, and *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986))*. *See also* Areeda & Hovenkamp, *supra*, P 360e, at 201 n.53 (stating that "injury-in-fact is never defined to include antitrust injury").

[18] *Doctor's Hosp., 123 F.3d at 305*. *See also* Areeda & Hovenkamp, *supra*, P 360e, at 201 (stating that "causation, or injury-in-fact, requires a showing that the injury of which the plaintiff complains actually resulted from those acts of the defendant that violated the antitrust laws"); M. Sean Royall, *Disaggregation of Antitrust Damages*, 65 Antitrust L.J. 311, 315 (1997) (noting that "in order to establish the fact of injury, an antitrust plaintiff must demonstrate that it suffered 'some damage' as a causal result of the defendant's violation") (footnote omitted).

As courts and commentators have observed, ***HN6***[] antitrust standing involves more than the constitutional standing requirement of "case or controversy." "Harm to the antitrust plaintiff is sufficient to satisfy the constitutional requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action." *Associated General, 459 U.S. at 535 n.31*; *see also* *Todorov, 921 F.2d at 1448* (stating that antitrust standing involves more than the constitutional "case or controversy" requirement).

[19] *See* *Brunswick, 429 U.S. at 489*.

[20] *429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*.

injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations . . . would be likely to cause." [21] The purpose of such a requirement is two-fold: "It ensures that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of **[*11]** the antitrust laws . . . and it prevents losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief." [22] We recently applied *Brunswick*'s "antitrust injury" requirement in Thompson Everett, Inc. v. National Cable Advertising, L.P., [23] and concluded that the plaintiff, "if injured at all, had not been injured by anything forbidden by the antitrust laws." [24] If a would-be antitrust claimant produces sufficient evidence of "antitrust injury," the standing analysis continues. In Cargill, Inc. *v. Monfort, Inc.*, [25] the Supreme Court stated that, "[a] showing of antitrust injury is necessary, but not always sufficient, to establish standing under § 4, because a party may have suffered antitrust injury but may not be a proper plaintiff under § 4 for other reasons." [26] Identifying who is a "proper plaintiff" under § 4 involves an analysis of "other factors in addition to antitrust injury." [27] **[*15]** These factors help determine whether a plaintiff is an efficient enforcer of the antitrust laws, and helps "exclude as plaintiffs those whose suits might 'undermine[] the effectiveness of treble-damages suits.'" [28]

In *Pocahontas Supreme Coal Co. v. Bethlehem Steel Corp.*, [29] **[*16]** we identified certain factors, enunciated by the Supreme Court in *Blue Shield of Virginia v. McCready* [30] and *Associated General Contractors of California, Inc. v. California State Council of Carpenters*, [31] which are "designed in combination to put principled limits on the literally unbounded reach of the threefold damage remedy authorized by § 4 of the Clayton Act." [32] ***HN7***[] These factors, which are to be assessed on a case-by-case basis, include:

the risk of duplicative recovery by multiple antitrust claim ants; the extent to which the claim is based upon speculative, abstract, or impractical measures of damages; the causal connection between the alleged violation and

the harm suffered; and the relationship of the injury alleged to the forms of injury about which Congress was concerned when it created a private remedy. [33]

In the instant case, the district court determined that Marlinton and Central Market lacked antitrust standing because they failed to produce sufficient evidence that they purchased products affected by the alleged price-fixing conspiracy, *i.e.*, they failed to produce sufficient evidence of injury in fact. Based on the following, we affirm. [34]

[*17] III.

Marlinton and Central Market base their claims entirely upon French's testimony. They contend that French's testimony demonstrates that between 1984 and 1987 Valley Rich and Meadow Gold agreed on joint responses to changes in the regulated cost of raw milk in the geographic areas where the grocery stores conducted business, in violation of the Sherman Act. *See* *15 U.S.C.A. § 1*. [35]

In support of their argument, the grocery stores point specifically to the agreement that whenever there was a significant change in the price of raw milk, French and Meadow Gold officials would meet to decide on the timing and amount of published price changes of key items, such as gallons, **[*18]** half-gallons, quarts, and pints of milk. Marlinton and Central Market claim that they purchased milk affected by these price changes. Therefore, the injury they assert is the increase in prices that they and others paid over the price that would have been charged in a competitive market.

A.

Central Market claims to have direct evidence that beginning in December 1986 it purchased milk affected by the alleged price-fixing conspiracy. On September 1, 1986, the regulated cost of raw milk in the relevant portions of southern West Virginia and southwestern Virginia rose $ .60 per hundred weight. French testified that he and a Meadow Gold official agreed on a joint response to this increase. At the time of this joint response, Central Market was served by Alexander, Inc. ("Alexander"), one of Valley Rich's distributors. Central Market does not contend that Alexander was a party to this pricefixing agreement, and indeed, French stated in his deposition that his price-fixing discussions with Meadow Gold officials had "no application" when an independent distributor, such as Alexander, controlled the pricing.

However, on December 12, 1986, Valley Rich acquired Alexander, and as a result, **[*19]** Central Market began purchasing milk directly from Valley Rich. Because the regulated cost of raw milk did not change again until 1987, Central Market claims that the milk it began purchasing from Valley Rich in December 1986 was affected by the alleged price-fixing conspiracy. We disagree.

As an initial matter, we will assume for purposes of our analysis that the alleged conspiracy existed through 1987, as Marlinton and Central Market contend. We note, however, that the district court determined that the latest evidence of price-fixing was a discussion between French and a Meadow Gold official concerning the September 1, 1986 regulated price increase of raw milk, and that there was no evidence "of any collusion in prices in 1987." [36] Additionally, in analyzing Central Market's claim, the district court found that the evidence was "suggestive of the

---

[33] *Id.* (citations omitted).

[34] Because we agree that Marlinton and Central Market have failed to satisfy the threshold requirement of demonstrating injury in fact, we need not address whether they produced sufficient evidence of "antitrust injury" and whether they are considered "proper plaintiffs" under § 4.

[35] ***HN8***[] *Section 1* of the Sherman Act provides in pertinent part that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C.A. § 1 (West 1997)*.

[36] J.A. 354 n.4.

absence, not presence, of collusion between Valley Rich and Meadow Gold" [37] because the price Central Market paid for milk did not change when Valley Rich acquired Alexander.

[*20] We are mindful that, ***HN9***[] in order to prevail, "a private plaintiff must establish both that (1) he has standing *and* (2) the defendant has violated the antitrust laws. Once it appears, whether early or late in the litigation, that either requirement is lacking, the suit must be dismissed." [38] In the instant case, if there is no evidence that the alleged conspiracy continued to exist in December 1986, then in reality Central Market's claim fails on its merits. [39] **[*21]** However, we limit our discussion to antitrust standing, and in so doing, we will "assume the existence of a violation and then [determine] whether the . . . standing elements are shown." [40] Applying this test, even assuming the alleged conspiracy existed through 1987, we find that Central Market has not produced sufficient evidence that it purchased price-fixed products.

As noted, Marlinton and Central Market allege that Valley Rich and Meadow Gold agreed on *joint responses* to changes in the regulated cost of raw milk. Such joint responses would have resulted in joint increases or decreases in the dairies' milk prices. However, the pricing data for Central Market during the period it was allegedly injured demonstrates that Valley Rich's and Meadow Gold's prices to Central Market were not mutual. When Valley Rich acquired Alexander's account in December 1986, Valley Rich continued to charge Central Market the same prices as had Alexander. These prices were substantially lower than Meadow Gold's during this time. In addition, while Valley Rich did not change its gallon price for milk sold to Central Market until July 1987, Meadow Gold changed Central Market's gallon price two times during this same period.

Even when there were changes in the regulated cost of raw milk, which the grocery stores contend was the "triggering event" for price increases, "the movement in milk prices charged by Valley Rich and **[*22]** Meadow Gold to Central Market [was] anything but mutual." [41] For example, when the regulated cost of raw milk increased effective January 1, 1987, Meadow Gold's gallon price to Central Market increased four cents, while Valley Rich's price did not increase. Similarly, when Meadow Gold, in response to a May 1987 regulated raw milk change, lowered its price on half-gallons and quarts, Valley Rich's prices remained unchanged.

As the Supreme Court has stated, ***HN10***[] "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." [42] In light of the pricing data, we cannot agree with Central Market's contention that it has produced sufficient evidence that could support an inference that it was injured by its purchases of milk from Valley Rich. Because Central Market has not produced sufficient evidence that it purchased products that were affected by the alleged pricefixing conspiracy, it has failed to satisfy the threshold requirement of demonstrating injury in fact, **[*23]** and therefore, lacks antitrust standing.

[42] *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

B.

Both Marlinton and Central Market make the additional argument that they have established a circumstantial evidentiary basis to infer that they were injured by their purchases from Meadow Gold throughout the 1984-87 conspiracy period. Specifically, Marlinton and Central Market contend that French's testimony supports the existence of a general conspiracy whose effect must flow through the pricing system of the two dairies. We disagree.

In his deposition testimony in this case, which focused upon wholesale price fixing by the dairies, French specifically testified that his discussions had "no application" when: (1) Valley Rich faced competition from a third dairy competitor; (2) one of Valley Rich's partners controlled the account; (3) there was guaranteed pricing; (4) the milk was sold to a customer under a private label; or (5) **[*24]** the milk was purchased from a distributor to whom Valley Rich sold milk. When asked specifically about Marlinton and Central Market, French testified that: (1) his discussions had "no application" to Marlinton because a third dairy, Broughton's Foods, was present in the market during the relevant period and set Marlinton's prices; and (2) his discussions had "no application" to Central Market because Alexander, an independent distributor, controlled Central Market's prices.

French's deposition testimony is significant for several reasons. First, it reveals the narrow scope of his price-fixing discussions and the fact that the alleged conspiracy did not have the all-encompassing effects which the grocery stores urge. Second, French's deposition was the first time that he testified in great detail as to the alleged conspiracy to fix prices in the wholesale market, as opposed to the school milk market at issue in the previous criminal proceedings. Finally, French's deposition statements are consistent with his trial testimony that "all bets were off" when a third party competitor was involved.

To reiterate the Supreme Court's instruction - "***antitrust law*** limits the range of permissible **[*25]** inferences from ambiguous evidence in a *§ 1* case." [43] Because French's testimony is the grocery stores' only evidence indicating how Meadow Gold handled its pricing, we believe that Marlinton and Central Market have failed to establish a circumstantial evidentiary basis to infer that they were injured by their purchases from Meadow Gold.

IV.

Based upon the foregoing, we hold that Marlinton and Central Market have failed to produce sufficient evidence that the products they purchased were affected by the alleged price-fixing conspiracy.

As such, they have failed to satisfy the threshold requirement of demonstrating injury in fact, and therefore, lack antitrust standing. Accordingly, the district court's grant of summary judgment in favor of the dairy companies is affirmed.

AFFIRMED

Opinion by: JERRY E. SMITH

Opinion

[*221] JERRY E. SMITH, Circuit Judge:

Surgical Care Center of Hammond ("St. Luke's") sued Hospital Service District No. 1 of Tangipahoa Parish ("North Oaks") and Quorum Health Resources, Inc. ("Quorum"), under the Sherman Act, *15 U.S.C. § 2*, charging various anticompetitive practices. The district **[**2]** court found that North Oaks and Quorum were entitled to state action immunity from the antitrust laws and dismissed the complaint. We affirm.

I.

St. Luke's is an outpatient surgery center in Hammond, Louisiana, that opened for business in 1996. North Oaks, a hospital service district created pursuant to Louisiana statute, is a neighbor of St. Luke's. North Oaks's hospital is located about a quarter mile from St. Luke's and is managed by Quorum, a private, for-profit hospital management firm. In addition to its acute care services, North Oaks offers both inpatient and outpatient surgery.

In 1997 St. Luke's filed the instant suit, alleging that North Oaks enjoyed monopoly power and was conspiring with Quorum to engage in unlawful anticompetitive practices aimed at driving St. Luke's from the market. St. Luke's claimed that North Oaks exercised monopoly power in the market for acute care services and surgical care and was seeking to attain monopoly power in the outpatient surgical care submarket. St. Luke's alleged **[*222]** violations of the Sherman Act, the Louisiana Monopolies Law, *LA. REV. STAT. § 51:123*, and the Louisiana Unfair Trade Practice and Consumer Protection Law, *LA. **[**3]** REV. STAT. § 51:1405*, 1409.

Specifically, St. Luke's charged that North Oaks, by leveraging its power in the acute care market and inpatient surgical care submarket, was pressuring managed care plans to sign exclusive contracts. St. Luke's characterized these deals as unlawful tying arrangements that stifled competition in the outpatient surgical care submarket. [1]

[4]** The district court granted North Oaks and Quorum's motion to dismiss, concluding that both were insulated from antitrust liability under the state action doctrine. It then dismissed St. Luke's state law claims for want of jurisdiction.

II.

A.

---

[1] St. Luke's alleged other unlawful trade practices, including North Oaks's refusal to enter into an emergency blood type-and-cross match agreement, its refusal to enter into a standard patient transfer agreement, its attempt to intimidate North Oaks personnel from working at St. Luke's, its refusal to allow nurses from St. Luke's to attend training courses at North Oaks, its attempt to form a joint alliance with an independent physician association to negotiate all contract rates and terms with health care insurers, its purchase and funding of family practices in hopes of channeling their patients to North Oaks, and its attempt to undermine the practices of two St. Luke's doctors. In its brief, however, St. Luke's focuses on the exclusive contracts as the most egregious of North Oaks's alleged anticompetitive practices.

HN1[] We review *de novo* the dismissal of a complaint under FED. R. CIV. P. 12(b)(6). Morin v. Caire, 77 F.3d 116, 120 (5th Cir. 1996). We must construe all allegations in the complaint favorably to the pleader and accept as true all well-pleaded facts. Word of Faith World Outreach Ctr. Church v. Sawyer, 90 F.3d 118, 121 (5th Cir. 1996).

B.

The Supreme Court first recognized state action immunity to antitrust liability in Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943), holding that a state agricultural program did not violate the Sherman Act, even though the program restricted competition. The Court premised its holding on principles of federalism and state sovereignty, concluding: "We find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. **[**5]** " Id. at 350-51. The Sherman Act, the Court reasoned, targeted *private* restraints of trade rather than restraints imposed by state legislatures. *Id*.

Four decades later, the Court refined the state action doctrine in Town of Hallie v. City of Eau Claire, 471 U.S. 34, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985). **HN2**[] There, the Court expanded the state action doctrine to include acts by political subdivisions that stem from state authority. Although subdivisions, because they are not sovereign, are not *automatically* immune, they nonetheless can claim immunity when they "demonstrate that [they are] engaging in the challenged activity pursuant to a clearly expressed state policy" to displace competition. Id. at 40. The Court held that the legislature need not state explicitly, in the statute or legislative history, its intention or expectation that the delegated action have anticompetitive effects. Instead, a municipality is entitled to *Parker* immunity when the anticompetitive action is the "foreseeable result" of the legislation. Id. at 42. In other words, we ask whether "the legislature contemplated the **[**6]** kind of action complained of." Id. at 44 (quoting Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 415, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)). [2]

[*223] We construed *Parker* immunity in Martin v. Memorial Hosp., 86 F.3d 1391 (5th Cir. 1996), a case arising under strikingly similar facts. In *Martin*, we concluded that a hospital district was entitled to antitrust immunity when it entered into an exclusive contract with a doctor to operate **[**7]** its facility for end stage renal disease ("ESRD"). The plaintiff, another doctor, complained that the exclusive contract barred him from treating his own patients in the hospital facility. The hospital district pointed to the Mississippi statute authorizing it to enter exclusive contracts and requiring a certificate of need prior to establishing an ESRD facility. We agreed that, based on this statute, the Mississippi legislature "clearly contemplated anticompetitive conduct." Id. at 1399. Accordingly, the hospital district was entitled to *Parker* immunity.

III.

The instant case centers on a Louisiana statute, LA. REV. STAT. § 46:1051 et seq., which authorizes the creation, and specifies the powers and duties, of hospital districts. St. Luke's argues that while the statute entitles hospital districts to enter into contracts, the Louisiana legislature did not authorize or foresee the extent and magnitude of the anticompetitive conduct in which North Oaks and Quorum allegedly engaged. North Oaks and Quorum dispute this reading of the statute and argue that *Martin* controls this case. Because North Oaks is a political subdivision of the state of Louisiana, **[**8]** *see* LA. REV. STAT. § 46: 1064(a), it is entitled to *Parker* immunity if its anticompetitive conduct is the foreseeable result of the statutory scheme.

A.

---

[2] The Court reaffirmed the *Town of Hallie* test in City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 372-73, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991), where it observed:

> We have rejected the contention that [the clear articulation] requirement can be met only if the delegating statute explicitly permits the displacement of competition. It is enough, we have held, if suppression of competition is the "foreseeable result" of what the statute authorizes.

We begin with the statutory language. ***HN3***[] *LA. REV. STAT. § 46:1077* provides that a hospital service district "may contract with or engage in a joint venture with any person, corporation, partnership, or group of persons to offer, provide, promote, establish, or sell any hospital health service." This broad statutory language parallels the language we deemed sufficient to confer immunity in *Martin*:

> The [Mississippi] statute clearly, affirmatively and articulately empowers the hospital to contract with any individual for the providing of services by or to the hospital regarding any facet of the operation of the hospital or any division or department thereof, or any related activity. It is clearly a foreseeable result of what the statute authorizes that a hospital would enter an exclusive contract with an individual physician to supervise and perform the critical functions of the ESRD units.

Id. at 1400. [3] Following *Martin*, which linked (1) the power to contract with (2) the foreseeability **[**9]** of a hospital entering into exclusive contracts, we hold that ***HN4***[] the Louisiana hospital statute similarly contemplates that a hospital service district might enter into exclusive contracts with health care providers.

[10]** B.

Buttressing our conclusion is the plain language of *LA. REV STAT. § 46:1071*, which sets forth the legislative findings and purpose. (No comparable provision appeared in the Mississippi statute, which makes *Parker* immunity even more appropriate here.) This **[*224]** section, which appears under the subpart heading "ENHANCED ABILITY TO COMPETE," provides in its entirety:

> ***HN5***[] The legislature hereby finds that the market for hospital and health care services is becoming increasingly competitive. The legislature finds that the hospital and other health care providers are contracting to engage in economic joint ventures or form partnerships to offer integrated health care services to the public. The legislature finds that this increasing competition is forcing hospitals and other health care providers to develop market strategies and strategic plans to effectively compete. *The legislature further finds that hospital service districts are presently at a competitive disadvantage*. The legislature hereby declares that the purpose of R.S. 46:1071 through 1076 is to enhance the ability of a hospital service district to compete effectively and equally in the market for health care **[**11]** services. Towards this end, the provisions of R.S. 46:1071 through 1076 shall be construed liberally.

LA. REV. STAT. § 46:1071 (emphasis added). Given that the *Martin* court concluded that anticompetitive activity was foreseeable even in the absence of a legislative finding that hospitals were competitively disadvantaged, the Louisiana statute presents a far stronger case for foreseeability.

C.

St. Luke's seeks to distinguish *Martin* on the ground that here, the hospital has signed exclusive contracts with health care *plans*, whereas in *Martin*, the hospital signed exclusive contracts with individual *providers*. We agree with the district court that St. Luke's has not shown that this distinction is legally relevant. We must ask what

---

[3] The Mississippi statute provided that a hospital may:

> contract by way of lease . . . or otherwise, with any agency, department or other office of government or any individual, partnership, corporation, owner, other board of trustees, or other health care facility, for the providing of property, equipment or services by or to the community hospital or other entity or regarding any facet of the construction, management, funding or operation of the community hospital or any department or division thereof, or any related activity, including, without limitation, shared management expertise or employee insurance and retirement programs, and to terminate said contracts when deemed in the best interests of the community hospital.

MISS. CODE. ANN. § 41-13-35(5)(g). While the Mississippi statute is broader in that it is not confined to "hospital health services," the anticompetitive practices alleged in the instant case concern the provision or promotion of health services, so this distinction is not implicated here. Moreover, the Louisiana statute defines "hospital health services" rather broadly. *See LA. REV. STAT. § 46:1072(1)* ("'Hospital health services" means but is not limited to any clinical, diagnostic, or rehabilitation service and any administrative, managerial, or operational service incident thereto.").

conduct is foreseeable under the statute, and *LA. REV. STAT. § 46:1077* provides that a hospital "may contract . . . with any person, corporation, partnership, or group of persons." This language belies St. Luke's distinction between plans and providers.

Moreover, nothing in *Martin* suggests that the holding was contingent on this distinction. Although exclusive contracts with health care plans may produce greater anticompetitive **[**12]** effects, the key issue, for purposes of *Parker* immunity, is not the magnitude of the effect but rather whether the effect was contemplated by the legislature. *Parker*'s focus is on federalism, not economics: It commands judicial deference to regulatory schemes enacted by state legislatures, notwithstanding a court's views on the economic wisdom of the challenged regulation. [4]

[13]** The Fourth Circuit considered a similar antitrust challenge in *Coastal Neuro-Psychiatric Assoc., P.A. v. Onslow Mem'l Hosp., 795 F.2d 340 (4th Cir. 1986)*. There, a physicians' association argued that a county hospital had violated the Sherman Act by entering into exclusive contracts with radiologists. The court held that the hospital was entitled to *Parker* immunity because the North Carolina statute contemplated anticompetitive conduct in allowing hospitals to decide which physicians could practice in them. *Id. at 341-42*. The court noted that restricting qualified doctors from practicing at the hospital "may or may not be a salutary result. It is clear, however, from *Town of Hallie* that the choice is that of North Carolina and its local hospital boards of governance." *Id. at 342*.

Several district courts have granted hospital districts *Parker* immunity based on the Louisiana statute. *See Willis-Knighton Med. Ctr. v. City of Bossier, 1997 U.S. Dist. LEXIS 20920*, *21-*22, No. 96-2617 (W.D. La. Oct. 15, 1997) (applying *Martin* and concluding that "the delegation of contractual authority, standing **[**14]** alone, [is] enough to immunize the municipal hospital from any antitrust liability that might otherwise arise from executing an exclusive services contract"), **[*225]** *appeal pending*; *Fremaux v. Board of Comm'rs, 1997 U.S. Dist. LEXIS 4098*, *8-*10, No. 96-1225 (E.D. La. Mar. 26, 1997) (applying *Martin* and concluding that hospital's entering into an exclusive contract was foreseeable). In two district court cases from Florida, both of which St. Luke's says were wrongly decided, the courts construed *Parker* broadly and immunized a broad swath of anticompetitive conduct by hospitals. *See Central Fla. Clinic v. Citrus County Hosp. Bd., 738 F. Supp. 459* (M.D. Fla.), *aff'd*, *888 F.2d 1396 (11th Cir. 1989)* (unpublished); *Hospital Dev. & Serv. Corp. v. North Broward Hosp. Dist., 619 F. Supp. 535 (S.D. Fla. 1985)*.

D.

In sum, we conclude that the appellees are entitled to *Parker* immunity. The exclusive nature of the contracts was reasonably foreseeable by the Louisiana legislature. As to the other alleged unlawful trade practices, we agree with the district court that while North Oaks may have engaged **[**15]** in "cutthroat" and "hardball" business practices by trying to lure patients to North Oaks, it is conduct that is a reasonably foreseeable result of the Louisiana statute.

IV.

St. Luke's argues that even if North Oaks is entitled to *Parker* immunity, Quorum--because it is a private actor--is not. We disagree. ***HN6***[] *LA. REV. STAT. § 46:1055(B)* provides that hospital service districts "may enter into a special services agreement with any person, including . . . a hospital management firm . . . to manage, operate, and administer a hospital or hospitals, or any part thereof, under the control of the commission for the benefit of the hospital's service district." Because North Oaks's agreement with Quorum is expressly authorized by the statute,

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

The court will render summary judgment only if the factual record shows that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The court will not render summary judgment if a reasonable jury could return a verdict for the nonmoving party. In ruling on a motion for summary judgment, the court views the facts in the light most favorable to the nonmoving party.

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Summary Judgment, Opposing Materials**

On a motion for summary judgment, the moving party bears the initial burden of showing that no genuine issue of material fact exists. Since the parties filed cross-motions for summary judgment, each party assumes the role of the moving party and the nonmoving party. Therefore, if one party demonstrates that no genuine issue of material fact exists, then the burden shifts to the opposing party, which must set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. In determining whether there are any genuine issues of material fact, we draw all inferences in the light most favorable to the nonmovant. However, the court is not required to draw every conceivable inference from the record, only those inferences which are reasonable.

Banking Law > Types of Banks & Financial Institutions > Bank Holding Companies > General Overview

Banking Law > ... > Banking & Finance > Federal Acts > Bank Holding Company Act

HN3[] **Financial Institutions, Bank Holding Company Act**

The Bank Holding Company Act (Act) prohibits a bank from conditioning credit upon the requirement that the customer shall obtain some additional credit, property, or service from such bank, bank holding company, or subsidiary of such bank holding company. *12 U.S.C.S. § 1972(1)(B)*. The Act was not intended to prohibit customary banking practices or even unusual practices performed solely to protect a bank's investment. Rather, it was meant to ban anti-competitive ties which were designed to reduce competition and to increase a bank's economic power. In order to recover under the anti-tying provisions of the Act, plaintiffs must establish that defendant's actions (1) were unusual in the banking industry; (2) constituted an anti-competitive tying arrangement; and (3) benefited the bank.

Banking Law > ... > Banking & Finance > Federal Acts > Bank Holding Company Act

Antitrust & Trade Law > Regulated Industries > Financial Institutions > General Overview

HN5[] **Financial Institutions, Bank Holding Company Act**

Unlike in traditional ***antitrust law***, *12 U.S.C.S. § 1972* plaintiffs need not quantify or articulate with great specificity the anti-competitive effect of the alleged tie-in, nor are they required to prove actual anti-competitive effects of the challenged practice, such as a bank's dominance or control over the tying product market or that a substantial volume of commerce is affected.

Banking Law > ... > Banking & Finance > Federal Acts > Bank Holding Company Act

HN6[] **Federal Acts, Bank Holding Company Act**

A tie-in is an arrangement by one party to sell one product (the tying product), but only on the condition that the buyer also purchase a different product (the tied product), or at least agree that he will not purchase the product from another supplier. Tying arrangements lessen competition by enabling an economically powerful seller of the tying product to coerce customers of that product into buying an additional product they do not want or would rather buy elsewhere.

Opinion

MEMORANDUM OPINION AND ORDER

Plaintiffs Robert Johnstone, on behalf of National Income Realty Trust, and John Pedjoe, on behalf of Transcontinental **[*2]** Realty Investors, Inc., bring this action against Defendants, First Bank System, Inc., First Bank National Association, First Bank, and FBS Business Finance Corporation ("FBS Entities") and David J. Wabick, alleging violations of the anti-tying provision of the Bank Holding Company Act ("the Act"), *12 U.S.C. § 1972* (Count I). Plaintiffs also allege that defendants violated various state laws by conspiring to breach fiduciary duties (Count II), conspiring to defraud (Count III), and conspiring to convert and misappropriate trust assets (Count IV).

The parties have filed cross-motions for summary judgment pursuant to *Rule 56 of the Federal Rules of Civil Procedure*. Plaintiffs move the court to grant partial summary judgment on their behalf as to Count I of their Second Amended Verified Derivative Complaint. The FBS Entities move the court to enter summary judgment on their behalf and to dismiss with prejudice all claims asserted against them. For the reasons set forth below, the court grants defendants' motion for summary judgment with respect to Count I and denies defendants' motion for summary judgment with respect to plaintiffs' state law conspiracy claims. The court also denies **[*3]** plaintiffs' motion for partial summary judgment.

Background

National Income Realty Trust ("NIRT") and Transcontinental Realty Investors ("TCI"), hereinafter referred to collectively as "the Trusts," are real estate investment trusts whose primary business involves investing in equity interests in real estate and financing real estate related activities through mortgage loans. (Pl.'s Compl. P 7.) [1] At all times relevant to this case, the Trusts were managed and controlled directly or indirectly by Gene E. Phillips ("Phillips") and William S. Friedman ("Friedman"), on behalf of Basic Capital Management, Inc. ("BCM"), the advisors to the Trusts. [2]

By 1991, Phillips and Friedman were experiencing grave financial difficulties. American Realty Trust ("ART"), then the largest shareholder of the Trusts and two sister trusts [3] controlled by Phillips and Friedman, **[*4]** was being

[1] Refers to plaintiffs' Second Amended Derivative Complaint.

[2] Basic Capital Management was formerly known as National Realty Advisors.

[3] The two sister trusts controlled and managed by Phillips and Friedman were Continental Mortgage and Equity Trust ("CMET") and Income Opportunity Realty Trust ("IORT"). (Pl. Compl. P 19.)

pressured to repay approximately $ 30 million of delinquent obligations to its chief lender, First City BanCorporation of Texas ("First City"). (Pl. Compl. P 17.) In June 1991, First City had sent ART a letter of default based on its failure to make required payments. (Id. P 19.) Other Phillips-Friedman affiliates also owed millions of dollars to First City. (Id.)

At the same time, Milwaukee developer Frank P. Crivello ("Crivello") was also mired in a severe fiscal crisis. More than thirty foreclosure suits had been commenced against Crivello and his related entities and more than 100 other lawsuits were commenced against them by unpaid subcontractors and other creditors. In addition, Crivello and his affiliates were indebted to defendants in the principal amount of approximately $ 10.2 million, plus accrued interest. **[*5]** In early 1991, Vaughan Rasmussen ("Rasmussen"), Senior Vice President for First Bank National Association, assumed responsibility for the bank's relationship with Crivello. Rasmussen believed at the time that Crivello would "most likely have to file bankruptcy" and that the Crivello loans were collectible, if at all, only through litigation or pursuit in bankruptcy proceedings. (First Rasmussen Aff. P 6.) Throughout the course of the year, defendants "charged off" on its books and records a large portion of Crivello's obligations ("the notes"). [4] (Rasmussen Aff. P 8.)

It is uncontested that in late April 1991, Crivello told Rasmussen that he knew an individual who would **[*6]** propose to purchase the Crivello notes from defendants in return for the extension of secured real estate loans. (Pl.'s 12(N) P 13.) That individual was David Wabick. During his first direct communication with Rasmussen, Wabick stated that he would purchase the Crivello Notes from defendants provided that defendants would extend secured real estate loans to entities designated by Wabick. (Id. P 14.) These entities were all affiliated, either directly or indirectly, with BCM, Friedman, and Phillips. According to plaintiffs, Wabick was a partner of Friedman and Phillips whose participation in this arrangement was primarily designed to broker the transaction and to conceal its true nature. (Pl.'s Am. Compl. P 28; Pl.'s Mot. for Summ. J. at 2.) Eventually, both parties orally agreed to the general terms of the Crivello note purchase/real estate financing transactions as originally proposed by Wabick.

The precise manner in which the following transactions unfolded is disputed. According to plaintiffs, the first phase of the alleged notes-for-loans exchange occurred on December 13, 1991, when Wabick purchased $ 4.93 million in Crivello notes and December 16, when he purchased $ 1.69 **[*7]** million of additional Crivello obligations. (Pl.'s 12(N) P 27-29.) Plaintiffs claim that although the December purchase documentation identifies Wabick as the purchaser, in actuality, the Trusts funded most of these purchases and were the true acquiring parties. (Id. P 28.) According to plaintiffs, Wabick's actual role was in the exchange was essentially that of a broker. They assert that all parties knew and understood that Wabick was an assignee and that the Trusts were the true acquiring parties of the notes. (Pl.'s Mem. for Par. Summ. J. at 2; Pl.'s 12(M) P 14.)

Defendants deny that they knew either of Wabick's supposedly nominal role in the transaction or that he was not providing the money to buy the Crivello notes. (Def.'s 12(N) P 14.) In fact, defendants contend that they do not know whether the Trusts loaned the funds for the purchase to Wabick, whether the Trusts were mere conduits of the funds from another source, whether the Trusts transferred the funds to defendants to satisfy preexisting obligations to Wabick, or whether Wabick caused the Trusts to transfer the funds for another reason. (Id. P 13.) According to defendants, it was Wabick who conditioned his willingness **[*8]** to purchase the notes upon defendants' willingness to fund real estate loans to entities designated by him. (Def.'s 12(N) P 29.) Defendants claim that they never coerced or pressured either Wabick or the Trusts to purchase the Crivello debt.

The time sequence of the next phase of the transaction is also disputed. According to plaintiffs, defendants funded approximately $ 30 million in real estate loans on December 16 to three Illinois limited partnerships [5] ("Illinois

---

[4] According to Rasmussen, "obligations are 'charged off' by financial institutions for many reasons, including, but not limited to, situations where there is potential uncertainty regarding collectibility." In many instances, defendants have recovered the full amount due on obligations that had previously been charged off. (Rasmussen Aff. P 8.)

[5] Defendants loaned $ 15 million to Search/Lodges Diversified L.P., $ 7.1 million to Tiberon Diversified L.P. and $ 7.025 million to Mallard Diversified, L.P. (Rasmussen Aff. PP 22-25.) Plaintiffs maintain that these Illinois partnerships were owned by "affiliates" of the Trusts and BCM, and were managed by Friedman and Phillips. (Pl.'s 12(M) P 19.)

partnerships") formed by Wabick and managed by Phillips and Friedman. Plaintiffs contend that these loans were *quid pro quo* for the December 13 note purchases and were extended on the condition that the Trusts, directly or indirectly, purchase the Crivello notes. (Pl.'s Mem. for Summ. J. at 3.) They claim that defendants approved the loans in order to recover millions of dollars on the Crivello notes, which had been charged off and deemed essentially worthless by the bank. (Pl.'s Mem. for Summ. J. at 2; Pl.'s 12(N) P 30.) In return, the proceeds from the loans to the Illinois partnerships were used to help Phillips' and Friedman's affiliates, principally ART, pay off their delinquent obligations, thus preventing **[*9]** the collapse of Phillips' and Friedman's financial empire. According to plaintiffs, the Trusts, which were consequently saddled with the essentially worthless Crivello notes, were the only parties who did not ultimately benefit from this transaction.

While defendants concede that the December 1991 note purchases were packaged with and related to the loans to the Illinois partnership, they maintain that these loans were not *quid pro quo*, but were rather contemporaneously extended when plaintiffs purchased the Crivello notes on December 13. They claim that the loans were not used to coerce plaintiffs into purchasing the defaulted Crivello debt, but were rather **[*10]** in accordance with the terms and conditions originally proposed by *Wabick.* (Def.'s 12(N) PP 16-17.) Defendants deny that they considered and treated the Illinois partnerships and the Trusts to be affiliates and related parties or that they conditioned the extension of credit upon the Crivello note purchases. (Id. P 22.)

According to plaintiffs, the parties engaged in a similar notes-for-loans exchange in February 1992. Plaintiffs maintain that on February 21, TCI purchased three additional Crivello notes for approximately $ 1.3 million. The notes had been previously written down by defendants to $ 560,000, thus resulting in a $ 712,124 gain for the defendants. (Pl.'s 12(M) PP 24-25.) As *quid pro quo* for purchasing these notes, defendants extended approximately $ 3.6 million in loans to TCI subsidiary South Cochran. (Id. P 6.) Plaintiffs contend that although certain documents identified Wabick as the note purchaser in the February transactions, once again he was essentially a nominee for TCI, and that TCI both financed the note purchases and received the extended loans. (Pl.'s Mem. for Summ. J. at 4.)

Defendants respond that Wabick, not TCI, purchased the additional **[*11]** Crivello Notes, and that Wabick, not defendants, proposed the terms and conditions of the February transactions. (Def.'s 12(N) PP 24, 27.) In addition, defendants maintain that the Crivello notes were not sold "at par," but rather for their outstanding principal amount. (Id. P 24.) According to defendants, they did not realize a gain on any of the Crivello notes sold to Wabick, but instead received only the principal amounts due in connection with the Crivello indebtedness sold to Wabick, thus suffering a loss represented by unreceived interest and collection expenses. (Id. P 26.) Defendants deny that they conditioned the funding of the December 1991 and February 1992 loans upon the purchase of the Crivello obligations. (Id. P 31.)

In 1994, the Trusts completely released Phillips and Friedman from any liability in connection with the transactions challenged in the litigation. (Pearson Aff. PP 14-15; Pl.'s 12(N) P 48.) Plaintiffs filed this lawsuit on March 31, 1995. On July 28, 1995, defendants filed a motion to dismiss the action for failure to state a claim. After finding that plaintiffs had failed to allege that defendants' actions constituted an anti-competitive tying **[*12]** arrangement, the court granted defendants' motion to dismiss plaintiff's federal Bank Holding Company Act claim. The court also denied defendants' motion to dismiss plaintiffs' state law conspiracy claims. See *Johnstone v. First Bank System, Inc., 947 F. Supp. 1220 (N.D. Ill. 1996)*. On February 3, 1997, plaintiffs filed a Second Amended Derivative Complaint for damages arising from civil conspiracy and from violations of the anti-tying provisions of the Bank Holding Company Act.

Analysis

HN1[] The court will render summary judgment only if the factual record shows "that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Bratton v. Roadway Package Sys., Inc., 77 F.3d 168, 173 (7th Cir. 1996)* (quoting *Fed. R. Civ. P. 56(c)*). The court will not render summary judgment if "a reasonable jury could return a verdict for the nonmoving party." *Sullivan v. Cox, 78 F.3d*

322, 325 (7th Cir. 1996) (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986))*. In ruling on a motion for summary judgment, the court views the facts in the light most favorable to the nonmoving **[*13]** party. *Bratton, 77 F.3d at 171* (citation omitted); *Sullivan, 78 F.3d at 325* (citation omitted).

HN2[] On a motion for summary judgment, the moving party "bears the initial burden of showing that no genuine issue of material fact exists." *Hudson Ins. Co. v. City of Chicago Heights, 48 F.3d 234, 237 (7th Cir. 1996)* (citing *Celotex Corp v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986))*. Since the parties filed cross-motions for summary judgment, each party assumes the role of the moving party and the nonmoving party. Therefore, if one party demonstrates that no genuine issue of material fact exists, then the burden shifts to the opposing party which "must set forth specific facts showing that there is a genuine issue for trial." *Fed. R. Civ. P. 56(e)*; accord, *NLFC, Inc. v. Devcom Mid-America, Inc., 45 F.3d 231, 234 (7th Cir. 1995)* (citations omitted). "In determining whether there are any genuine issues of material fact, we draw all inferences in the light most favorable to the nonmovant." *Bartman v. Allis-Chalmers Corp., 799 F.2d 311, 312 (7th Cir. 1986)*, cert. *Denied, 479 U.S. 1092, 107 S. Ct. 1304, 94 L. Ed. 2d 160 (1987)*. However, the **[*14]** court is not required to draw every conceivable inference from the record--only those inferences which are reasonable. *Spring v. Sheboygan Area School Dist., 865 F.2d 883, 886 (7th Cir. 1989)*.

I. Bank Holding Company Act

HN3[] The Bank Holding Company Act prohibits a bank from conditioning credit upon the requirement that "the customer shall obtain some additional credit, property, or service from such bank, bank holding company, or subsidiary of such bank holding company." [6] *12 U.S.C. § 1972(1)(B)*. The Act was not intended to prohibit customary banking practices or even unusual practices performed solely to protect a bank's investment. *McCoy v. Franklin Savings Association, 636 F.2d 172, 175 (7th Cir. 1980)*. Rather, it was meant to ban anti-competitive ties which were designed to reduce competition and to increase a bank's economic power. *Baggett v. First National Bank of Gainesville, 117 F.3d 1342, 1346 (11th Cir. 1997)*. In order to recover under the anti-tying provisions of the Act, plaintiffs must establish that defendant's actions (1) were unusual in the banking industry; (2) constituted an anti-competitive tying arrangement; and (3) benefited the bank. **[*15]** *ITC Financial Services, Ltd. v. Interstate Bank of Oak Forest, 1993 U.S. Dist. LEXIS 16137, 93 C 3799, 1993 WL 469926* *2 (N.D. Ill. Nov. 10, 1993); see *Graue Mill Development Corporation v. Colonial Bank and Trust Company of Chicago, 1990 U.S. Dist. LEXIS 111, 88 C 2584, 1990 WL 6823 (N.D. Ill. 1990)*, aff'd, *927 F.2d 988 (1991)*.

Plaintiffs allege that defendants violated the anti-tying provisions of the Act by conditioning the extension of credit upon plaintiffs' purchasing the defaulted loans of an unrelated borrower. Defendants respond that plaintiffs have no claim under **[*16]** the BHCA because (1) defendants did not coerce any party to enter into the transactions; (2) the Trusts do not qualify as "customers" in any tied transaction; (3) the challenged transactions had no anti-competitive effect; and (4) the Trusts lack standing because their alleged injury is not of the type that the BHCA was intended to remedy. Both parties move the court to enter summary judgment on their behalf pursuant to *Rule 56 of the Federal Rules of Civil Procedure*. For the reasons stated below, the court finds that plaintiffs are unable to establish that defendants' actions constituted an anti-competitive tying arrangement, and therefore grants defendant's motion for summary judgment on Count I.

---

[6] ***HN4***[] The Bank Holding Company Act provides in relevant part that:

> A bank shall not in any manner extend credit, lease or sell property of any kind, or furnish any service, or fix or vary the consideration for any of the foregoing, on the condition or requirement . . .
>
> (B) that the customer shall obtain some additional credit, property, or service from a bank holding company of such bank or from any other subsidiary of such bank holding company.

12 U.S.C. § 1972 (1)(B).

In order to determine whether these admittedly related notes-and-loans transactions constituted an illegal tying arrangement, it is first necessary to examine the statute's legislative history and intent. The Act was designed to "prohibit anti-competitive practices which require bank customers to accept or provide some other service or product . . . in order to obtain the bank product they desire." Senate Banking and Currency Committee Report No. 91-1084, 91st Cong., 2d Sess. (1970). It **[*17]** was originally intended to guard against unfair competition and to prevent a small number of powerful banks from using their economic leverage to dominate commerce. The Act was amended in 1970 to "reach the anti-competitive practices of even smaller banks, which notwithstanding their comparative size, were able to exert economic power over businesses because of their control over credit." *Baggett, 117 F.3d at 1345*. However, the Act was only intended to prohibit intentionally anti-competitive banking practices, and Congress deliberately attempted to limit the statute's potentially expansive reach. See *Parsons Steel, Inc. v. First Alabama Bank of Montgomery, 679 F.2d 242, 245 (11th Cir. 1982)* (stating that Congress "was concerned that [the Act] not be too expansive" and did not intend to prohibit banking practices which were not anti-competitive). Consequently, the mere fact that a banking practice is "unusual" or is not directly related to a bank's investment does not constitute a violation of the Act. See *Davis v. First National Bank of Westville, 868 F.2d 206, 207 (7th Cir. 1989)* (noting that Act only proscribes anti-competitive banking practices). Unless the "unusual" **[*18]** banking practice is shown to be an anti-competitive tying arrangement principally designed to enhance the bank's market power, it does not fall within the scope of the Act's prohibitions. *Parsons, 679 F.2d at 245*.

The Seventh Circuit has suggested that bank tying laws are analogous to traditional antitrust statutes, and has construed *section 1972* to prohibit exclusive dealing practices and preserve "competition among rival businesses." [7] *Exchange National Bank of Chicago v. Daniels, 768 F.2d 140, 143 (7th Cir. 1985)* (noting that "we treat [the statute] as the banking equivalent of . . . the Clayton Act). See also *Mid-State Fertilizer v. Exchange National Bank of Chicago, 877 F.2d 1333, 1338 (7th Cir. 1989)* (noting that bank tying statutes bear a "considerable, although not total" resemblance to ***antitrust law***). Consequently, the Seventh Circuit has interpreted the Act's anti-tying provisions narrowly, and has required that plaintiffs show the anti-competitive nature of the challenged action. ***HN5***[] Unlike in traditional ***antitrust law***, *section 1972* plaintiffs need not "quantify or articulate with great specificity the anti-competitive effect" of the alleged tie-in, nor are they **[*19]** required "to prove actual anti-competitive effects of the challenged practice, such as a bank's dominance or control over the tying product market or that a substantial volume of commerce is affected." *Graue Mill Development Corporation v. Colonial Bank and Trust Co. of Chicago, 927 F.2d 988, 991-2 (7th Cir. 1991)* (citation omitted); *Palermo v. First National Bank and Trust Company of Oklahoma City, 894 F.2d 363, 368 (10th Cir. 1990)*. However, in order to recover under the Act, the Seventh Circuit requires that plaintiffs demonstrate that a challenged banking practice is an anti-competitive tying arrangement.

In the instant case, plaintiffs' claim fails because they are unable to establish either that the alleged notes-for-loans **[*20]** transactions were a "tie-in" or that they were anti-competitive. According to the Seventh Circuit, ***HN6***[] a "tie-in" is "an arrangement by one party to sell one product (the tying product), but only on the condition that the buyer also purchase a different product . . . (the tied product), or at least agree that he will not purchase the product from another supplier." *Davis, 868 F.2d at 208* (citation omitted). Tying arrangements lessen competition by enabling "an economically powerful seller of the tying product to coerce customers of that product into buying an additional product they do not want or would rather buy elsewhere." Id.

The court finds that no reasonable jury, even when viewing the facts in the light most favorable to the plaintiffs, could find that the notes-for-loans exchanges constituted an illegal tying arrangement. There is simply no factual issue as to whether defendants expressly conditioned their approval of the loans upon the purchase of the Crivello obligations. [8] Indeed, it is undisputed that it was not defendants but *Wabick* who initially proposed the terms and

[7] The antitrust laws are a response to tie-ins and reciprocity agreements that enable a party with sufficient power in one market to avoid the standard market criteria of price, quality, and service in another market and thereby lessen competition. ***Davis, 868 F.2d at 208***.

[8] Even by selectively quoting from Rasmussen's deposition testimony, plaintiffs are unable to create a genuine factual dispute as to whether defendants conditioned the loans upon the note purchases. A complete review of the deposition transcript reveals

conditions of the entire scheme. Because the bank did not use the promise of credit to entice **[*21]** plaintiffs into purchasing the Crivello notes, the arrangement, however unorthodox or profitable it might have been, does not constitute an illegal tying arrangement.

It is not true, as defendants assert, that plaintiffs must prove actual coercion in order to prevail under the Act. [9] Nevertheless, it would be unconscionable and illogical to find that defendants had participated in an illegal tying arrangement simply by accepting the terms of Wabick's proposed transaction. It would be a complete misapplication of the Act to hold that it permitted a cause of action against a bank who adheres to the terms and conditions of a **[*22]** transaction which are initially established by a customer. While a loan arrangement which conditioned "the extension of credit to a bank customer on the requirement that the customer participate in the bank's bad loans to an unrelated customer" would certainly be a blatant violation of the Act, that is not what happened here. *Palermo, 894 F.2d at 369*. Instead, it is undisputed that Wabick, rather than defendants, established the terms and conditions of the transaction and that defendants ultimately accepted those conditions. (Pl.'s 12(N) P 14.) The fact that the challenged transaction was financially advantageous to both defendants and the Phillips-Friedman-Wabick financial empire and financially harmful to the Trust does not, without more, constitute an illegal tying arrangement.

[*23] Moreover, plaintiffs are unable to evince that the challenged transactions were anti-competitive. As noted above, *Section 1972* plaintiffs have a lesser burden of proof than traditional antitrust plaintiffs. [10] See *Davis, 868 F.2d at 208* (noting that bank tying plaintiffs can prevail without showing "specific adverse effects on competition or other restraints of trade and without any showing of some degree of bank dominance or control over the tying product of service.") However, this less stringent standard does not completely relieve plaintiffs from showing that defendants' actions were designed to lessen competition. See *Graue Mill, 927 F.2d at 990* (noting that Seventh Circuit requires *section 1972* plaintiffs to allege anti-competitive practice). But plaintiffs have failed to show that defendants' actions were designed to lessen competition. Like the Palermo plaintiffs, plaintiffs in the instant case "have not addressed the distinction between requiring proof of an anti-competitive *effect* versus requiring proof of an anti-competitive *practice*." *Palermo, 894 F.2d at 368* (emphasis supplied). ***HN7***[] In order to prevail under the Act, plaintiffs must show that the **[*24]** notes-and-loans transactions were anti-competitive, i.e., that defendants "used their economic power over credit to lessen competition" in the marketplace. *Davis, 868 F.2d at 209*.

[*25] Plaintiffs contend that they have proven the requisite anti-competitive effect by satisfying the alternate-prong standard established by the Seventh Circuit in Graue Mill. See *Graue Mill, 927 F.2d at 991* (stating that Seventh Circuit requires "plaintiffs to allege that they have sustained some semblance of economic injury as a result of the tying arrangement, or conversely, that economic advantage has accrued to the bank"). However, plaintiffs' reliance upon Graue Mill is misplaced. The anti-competitiveness "standard" employed in Graue Mill was narrowly tailored to the facts of that case, in which *section 1972* plaintiffs failed to allege either that they had suffered an economic injury, or that the bank had tangibly benefited from the challenged arrangement. Id. It was not intended to nullify the Seventh Circuit's requirement that bank-tying plaintiffs show that defendants' actions were anti-competitive and designed to lessen competition. See *McCoy, 636 F.2d at 175* (noting that Act was "intended only to prohibit anti-

---

that Rasmussen explicitly stated that the arrangement was conditional in that Wabick established and insisted upon the term's conditions.

[9] Contrary to defendants' assertions, the Seventh Circuit has never expressly held that a plaintiff must show that a bank used its economic leverage to coerce a plaintiff into purchasing an unwanted product. See Def.'s Mem. for Summ. J. at 7.

[10] Defendants completely misstate the applicable standard for determining whether a challenged banking practice is an "anti-competitive practice" under the Act. The Seventh Circuit has never held, in Mid-State Fertilizer or elsewhere, that "a tie is unlawful under the BHCA only if a plaintiff shows that a bank (1) used its market power (2) to lessen competition in a particular market for banking services." (Def.'s Mem. for Summ. Judg. at 9.) Likewise, both parties' reliance upon traditional antitrust standards is misplaced. Although the Seventh Circuit has recognized "the congruence of bank-tying law with its antitrust cousin," it does not hold bank-tying plaintiffs to the same burden of proof as antitrust plaintiffs. *Mid-State Fertilizer Co., 877 F.2d at 1338*. See ***Davis*, *868 F.2d at 208*** (stating that "*section 1972* renders tying arrangements involving a bank unlawful 'without any showing of specific adverse effects on competition"). Consequently, Mr. Frankel's disputed affidavits (which detail the standards used to determine an anti-competitive practice in ***antitrust law***) have no material bearing on the ultimate disposition of this case.

competitive practices"); *Daniels, 768 F.2d at 143* (stating that Act was intended to preserve competition and to prohibit exclusive dealing **[*26]** practices); Davis*, 868 F.2d at 209* (finding that a challenged transaction which is not anti-competitive is "not the concern of *section 1972*"); *Mid-State Fertilizer, 877 F.2d at 1338* (affirming summary judgment against plaintiffs who failed to allege an anti-competitive practice). Indeed, the Graue Mill court ultimately affirmed the district court's decision to dismiss the bank-tying claim on the grounds that "tying arrangements that have no anti-competitive effect . . . do not violate *Section 1972*." *Graue Mill, 927 F.2d at 992*.

In summary, plaintiffs have produced no evidence tending to show that the alleged notes-for-loans exchanges were anti-competitive in practice or were intended to have an anti-competitive effect. They have presented no evidence suggesting that defendants misused their economic power by engaging in the challenged transactions. No reasonable jury could find that defendants agreed to Wabick's proposal in order to reduce competition or to compete unfairly. Even accepting, as the court must for the purposes of a summary judgment motion, plaintiffs' claim that defendants were fully aware that the Trusts' managers were misappropriating their assets **[*27]** for personal gain, the challenged transactions were "not anti-competitive and therefore not the concern of *section 1972*, which was enacted to prevent banks from using their economic power to lessen competition." Davis*, 868 F.2d at 209*. The Act was simply not intended to provide a cause of action for situations in which an organization's managers have mismanaged its assets. Indeed, it is plaintiffs, rather than defendants, who have "attempted to stretch the law beyond recognition" in this case. (Pl.'s Resp. at 1.)

Plaintiffs have failed to allege that the challenged action was an anti-competitive tying arrangement. Defendants' alleged actions simply do not constitute a violation of the Bank Holding Company Act. Accordingly, the court grants defendants' motion for summary judgment as to Count I claim.

II. **State Law Conspiracy Claims**

Plaintiffs also allege that defendants violated various state laws by conspiring with Phillips and Friedman to breach fiduciary duties, to defraud, and to convert and misappropriate the assets of the Trusts. This court has original jurisdiction over the parties to this action pursuant to *28 U.S.C. § 1332*, because the parties are from **[*28]** diverse states and the amount in controversy exceeds $ 50,000, exclusive of interest and costs (the requisite jurisdictional amount when this action was filed in 1995). Each of the plaintiffs is a citizen of the state of California; the defendant entities are incorporated under the laws of the state of Delaware; and defendant Wabick is a citizen of the state of Illinois.

HN8[] In diversity cases, federal courts apply the choice of law rules of the state in which they sit. *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 85 L. Ed. 1477, 61 S. Ct. 1020 (1941)*. Illinois choice of law rules provide that the law of the state with the most significant relationship with the events giving rise to the litigation shall apply. *Malatesta v. Mitsubishi Aircraft International, Inc., 275 Ill. App. 3d 370, 655 N.E.2d 1093, 1099, 211 Ill. Dec. 710 (Ill. App. Ct. 1995)*(citing *Ingersoll v. Klein, 46 Ill. 2d 42, 262 N.E.2d 593, 596 (Ill. 1970))*. In this case, Minnesota and Wisconsin have the most significant relationships with the events giving rise to this litigation. The closings on the sales of the Crivello notes occurred in Milwaukee, Wisconsin, and the closings on the real estate loans **[*29]** occurred in Minneapolis, Minnesota.

HN9[] Wisconsin [11] defines a civil conspiracy as "a combination of two or more persons by some concerted action to accomplish some unlawful purpose or to accomplish by unlawful means some purpose not in itself unlawful." *Anderson v. Regents of the University of California, 203 Wis. 2d 469, 489, 554 N.W.2d 509, 518 (Wis. Ct. App. 1996)* (quoting *Cranston v. Bluhm, 33 Wis. 2d 192, 147 N.W.2d 337, 340 (Wis. 1967))*. In general, for a conspiracy to exist under Wisconsin law, there must be, at a minimum, "facts that show some agreement, explicit or otherwise, between the alleged conspirators on the common end sought and some cooperation toward the attainment of that end." *Bartley v. Thompson, 198 Wis. 2d 323, 542 N.W.2d 227, 235 (Wis. Ct. App. 1995)*. This court previously found that plaintiffs had adequately stated claims for civil conspiracy in compliance with *Federal Rules of Civil Procedure 12(b)(6)* and *9(b)*. [12] See *Johnstone v. First Bank System, Inc., 947 F. Supp. 1220 (N.D.*

---

[11] There are no substantive differences between Minnesota and Wisconsin law with respect to the relevant issues.

Ill. 1996). The question currently before this court is whether plaintiffs have produced sufficient evidence to permit a reasonable inference that defendants entered into a conspiracy with **[*30]** Phillips and Friedman and to preclude summary judgment.

Defendants maintain that, in order to withstand summary judgment, plaintiffs must present evidence suggesting that FBS Entities 1) knowingly participated in a conspiracy and 2) had a legal duty of disclosure to the Trusts. They claim that they are entitled to judgment as a matter of law because plaintiffs have failed to produce any such evidence. They assert that "there is absolutely no evidence of the Bank's knowing participation in such a common plan or any agreement," and that, even if there were, defendants could not be held liable because they owed no independent **[*31]** duty of disclosure to the Trusts. (Def.'s Mem. for Summ. Judg. at 3-5.) However, defendants have once again misstated the applicable law. [13] Wisconsin law does not require that the alleged conspirator owe a legal duty to the plaintiff regarding the underlying wrong. Instead, it requires proof that two or more individuals engaged in "some concerted action to accomplish some unlawful purpose or to accomplish by unlawful means some purpose not in itself unlawful." *Anderson, 554 N.W.2d at 518* (citation omitted). Plaintiffs allege that defendants conspired with Phillips and Friedman so that defendants could recoup millions of dollars on the defaulted Crivello notes and Friedman and Phillips could extricate themselves from a severe financial crisis. The "unlawful means" by which they accomplished this goal was the misappropriation and misuse of the Trusts' assets for their own personal gain. Plaintiffs claim to have produced "overwhelming" evidence that not only were defendants aware that the Trusts' assets were being misappropriated through the purchase of defaulted and over-valued properties, but that they knowingly participated in the scheme in order to recover on Crivello's charged **[*32]** off obligations.

The court finds that plaintiffs have presented evidence permitting a reasonable inference that defendants were, in fact, aware of the true nature of the challenged transactions and knowingly participated in the scheme in order to profit from them. Rasmussen, the First Bank officer primarily responsible for the transaction, admitted in his deposition testimony **[*33]** that he was aware at the time of the December transaction that the Trusts were to hold legal title to the Crivello notes. (Rasmussen Dep. at 181.) Rasmussen was also aware that Cliff Towns, the attorney who negotiated the final stages of the exchange, was affiliated with NRA/BCM and knew "there was a high possibility and a probability that [the funding for the note purchases] was coming from someone affiliated with NRA." (*Id. at 53*.) In addition, Crivello, the indebted party in the transaction, testified in his deposition that it was his understanding that "Rasmussen was completely aware of the true nature of the parties, specifically the ownership of the assets and who the true borrowers were, notwithstanding the fact that Wabick was up front." (Crivello Dep. at 75.) Crivello also stated that Wabick had told him on several occasions that Rasmussen had said that First Bank would not loan the money directly to either Phillips or his related entities because they would "have the comp controller or FDIC crawling all over [them]" if they did so (*Id. at 145-146*.) [14]

[*34] Moreover, another First Bank officer, Richard J. Mikos, testified that he was aware by December 1991 that NIRT was providing at least a portion of the funding for the December note purchases. (Mikos Dep. at 41-42.) Indeed, he acknowledged that on November 18, NIRT deposited $ 4 million with First Bank. Mikos testified that he construed this deposit as intended "to indicate a willingness to proceed with the transaction." Furthermore,

---

[12] ***HN10***[] Under Wisconsin law, in order to state a claim for civil conspiracy, plaintiff must set forth "the formation and operation of the conspiracy, the wrongful act or acts done pursuant to the conspiracy, and the resultant damage from such acts." *Anderson, 554 N.W.2d at 518*.

[13] As support for this contention, defendants cite two California cases, *Applied Equip. Corp. v. Litton Saudi Arabia Ltd., 7 Cal. 4th 503, 869 P.2d 454, 458 (Cal. 1994)* and *Younan v. Equifax Inc., 111 Cal. App. 3d 498, 169 Cal. Rptr. 478 (1980)*, which are largely irrelevant and which have no precedential value. Likewise, the Minnesota case cited is not applicable to the instant case, as there was no assertion of an underlying crime or tort in that case, and the defendants in that case sought only permissible ends and acted only through permissible means. See *Senart v. Mobay Chemical Corp., 597 F. Supp. 502, 505 (D. Minn. 1984)*.

[14] Both Wabick and Towns have asserted their *Fifth Amendment* privilege against self-incrimination to all questions concerning this litigation.

Friedman testified that it was his understanding that "Rasmussen was directing the transaction in order to recoup bad loans from Crivello, and that he knew why the deal was being structured." (Friedman Dep. at 165.)

These documents, taken together, raise a genuine issue of fact as to whether defendants were aware of the true nature of the arrangement, but intentionally looked the other way in order to recoup the defaulted Crivello loans. It is undisputed both that Rasmussen had "charged off" most of the Crivello debt and that the notes-and-loans transactions allowed FBS Entities to recover millions of dollars on these defaulted loans. Moreover, both Mikos and Crivello testified that the exchange, which allowed defendants to realize a multi-million dollar **[*35]** profit on defaulted obligations which had been essentially charged off on their own books, was "unusual" in the banking industry. Based upon this evidence, a reasonable jury could certainly conclude that the bank had participated in an illegal conspiracy in order to recover on the defaulted Crivello loans.

HN11[] It is true that, in order to withstand summary judgment, a plaintiff must present "more than a mere suspicion or conjecture" that a conspiracy was formed. *Eiden v. Hovde, 260 Wis. 573, 51 N.W.2d 531, 532 (Wis. 1952)*. However, this court cannot grant summary judgment if "a fair-minded jury could return a verdict for the nonmoving party on the evidence presented." *Bridgman v. New Trier High School, District No. 203, 128 F.3d 1146, 1147-8 (7th Cir. 1997)* (quoting *Anderson, 477 U.S. at 252*). The court concludes that plaintiffs have adequately established that a factual issue exists as to whether defendants conspired with Phillips and Friedman to breach their fiduciary duties to the Trusts, to defraud the Trusts, and to convert and misappropriate the Trusts' assets. Because a jury could reasonably infer from the proffered evidence that defendants had unlawfully participated **[*36]** in a conspiracy, the court finds that plaintiffs are entitled to a trial on their state law conspiracy claims and accordingly denies defendants' motion for summary judgment.

Conclusion

For the foregoing reasons, the court denies plaintiffs' motion for partial summary judgment and grants defendants' motion for summary judgment in part and denies in part. The court grants defendants' motion for summary judgment with respect to the BHCA claim and denies defendants' motion with respect to the state law conspiracy claims.

HN4[] **Summary Judgment, Supporting Materials**

Fed. R. Civ. P. 56(c) authorizes summary judgment where the pleadings and supporting materials show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. The court's focus in reviewing a motion for summary judgment is whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law. The moving party has the burden to establish the absence of a genuine issue as to any material fact.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN5[] Summary Judgment, Supporting Materials

In considering a *Fed. R. Civ. P. 56* summary judgment motion, a court must construe the evidence and the inferences drawn from the underlying facts in the light most favorable to the party opposing the motion. Furthermore, facts asserted by the party opposing a summary judgment must be regarded as true if supported by affidavit rendered an opinion or other evidentiary material. Ultimately, where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] Regulated Practices, Market Definition

Under federal antitrust laws, the existence of competition is determined by market performance, not the number of competitors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7[] Regulated Practices, Market Definition

Absent exceptional market conditions, one brand in a market of competing brands cannot constitute a relevant product market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Tying Arrangements, Clayton Act**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product. Such an arrangement can violate the Sherman Act's prohibition against agreements in restraint of trade, codified at *15 U.S.C.S. § 1*. But not every refusal to sell two products separately can be said to restrain trade. Congress intended to prohibit only unreasonable restraints. Most antitrust claims are therefore analyzed under a rule of reason, according to which the finder of fact must decide whether the practice at issue imposes an unreasonable restraint on competition. This determination requires a consideration of a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

An illegal tying arrangement has five elements: (1) a tying product and a tied product; (2) evidence that the seller forced the buyer to purchase the tied product to get the tying product; (3) evidence that the seller has sufficient economic power in the tying product market to coerce buyer acceptance of the tied product; (4) anticompetitive effects in the tied market; and (5) the involvement of a not insubstantial amount of interstate commerce in the market of the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN11[] **Tying Arrangements, Per Se Rule**

A claim that a tying arrangement is illegal per se eliminates the requirement that the plaintiff show an actual anticompetitive effect.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Sherman Act, Claims**

Market power is defined as the power to force a purchaser to do something he would not do in a competitive market. Market power is generally measured by market share. The appropriate query is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market. If the seller has sufficient power in the tying market to force the buyer to purchase the tied product, then competition on the merits is restrained and the Sherman Act, *15 U.S.C.S. § 1 et seq.*, is violated. Without market power, the seller is unable to engage in the forcing necessary to establish a *15 U.S.C.S. § 1* violation.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The fourth element of the five-element tying test -- anticompetitive effects in the tied market -- is properly analyzed in terms of the price of the tied and tying bundle. Thus, the plaintiffs must establish that the combined price for the tying and tied products was greater than if they had been sold independently.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN14[] **Antitrust & Trade Law, Sherman Act**

In order to violate the Sherman Act, *15 U.S.C.S. § 1 et seq.*, injury resulting from a tie-in must be shown by establishing that payments for both the tied and tying products exceeded their combined fair market value. The rationale behind this requirement is apparent: A determination of the value of the tied products alone would not indicate whether the plaintiff indeed suffered any net economic harm, since a lower price might conceivably have been exacted by the defendant for the tying product. Unless the fair market value of both the tied and tying products are determined and an overcharge in the complete price found, no injury can be claimed; suit then would be foreclosed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN15[] **Tying Arrangements, Defenses**

A tying arrangement is illegal if it: (1) has an actual anticompetitive effect or threatened to have such an effect; and (2) that effect is not outweighed by procompetitive justifications.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN16[] **Monopolies & Monopolization, Actual Monopolization**

Monopolization is the use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Monopolies & Monopolization, Actual Monopolization**

A monopolization claim under § 2 of the Sherman Act, 15 U.S.C.S. § 2, has two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. A § 2 claim requires a greater market share for a finding of market power than a claim under § 1 of the Sherman Act, 15 U.S.C.S. § 1.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN18[] **Sherman Act, Claims**

To prove an attempt to monopolize claim under § 2 of the Sherman Act, 15 U.S.C.S. § 2, a plaintiff must show that: (1) the defendant engaged in predatory or anticompetitive conduct; (2) the defendant had the specific intent to monopolize; and (3) there was a dangerous probability that the defendant might achieved monopoly power. Proof of a dangerous probability of successful monopolization necessarily involves a determination of the relevant market and the defendant's power in that market.

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN19[] **Intentional Interference, Elements**

The elements of a claim for tortious interference with a business relationship under Florida law are: (1) the existence of a business relationship; (2) defendant's knowledge of that relationship; (3) an intentional and unjustified interference with the relationship by the defendant; and (4) damage to the plaintiff. A plaintiff must prove each element to recover for tortious interference.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > Business Torts > Commercial Interference > General Overview

HN20[] **Commercial Interference, Prospective Advantage**

Lawful competitive practices are privileged under Florida tortious interference law. As long as no improper means are employed, business activities taken to safeguard or promote one's own financial interests are not actionable.

Judges: ALAN S. GOLD, UNITED STATES DISTRICT JUDGE.

Opinion by: ALAN S. GOLD

Opinion

[*1348] AMENDED ORDER ON DEFENDANTS' MOTION FOR SUMMARY JUDGMENT ON COUNTS 3 THROUGH 13

The issue before the Court on defendants' motion for summary judgment is whether, under the principles set forth in *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*, the defendants' alleged refusal to sell certain internal parts for their automotive diagnostic equipment without repair service can constitute illegal tying or monopoly in violation of *sections 1* and *2* of the Sherman Act where the defendants never changed their parts and service policy and there is no showing that the defendants **[**2]** concealed the true cost of repairs or charged unreasonably high prices for internal parts or service.

I. FACTS

Robert Metzler and his corporation, Allstate's of America, Inc., filed this lawsuit against Metzler's former employers, SPX and Bear Automotive Service; and the Allen Group, alleging claims for breach of contract, intentional infliction of emotional distress, interference with an existing and prospective business relationship, and violations of federal and state anti-trust laws, specifically *sections 1* and *2* of the Sherman Act and *sections 542.18* and *542.19* of the Florida Statutes. [1] The gravamen of the plaintiffs' antitrust claims is that the defendants have failed to make certain internal parts available to independent service providers who wish to service the defendants' machines. Defendants' actions are allegedly designed to force equipment owners to obtain their service from the defendants (the illegal tie) and to capture the service market in the defendants' machines (the monopolization and attempted monopolization). Both parties agree that the outcome of this case is controlled by principles of ***antitrust law*** set forth by the Supreme Court in *Eastman Kodak* ***[**3]*** *Co. v. Image Technical Servs., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

The plaintiffs. Robert Metzler is the owner, president, and chief executive officer of Allstate's of America, Inc. **[**4]** Beginning in 1983, Metzler, through his company, worked as a sales representative, selling automotive diagnostic equipment for defendants Bear and SPX. As part of his job, Metzler trained customers in the use of the

---

[1] ***HN1***[] *Section 1* of the Sherman Act provides in relevant part: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. section 1*. ***HN2***[] *Section 2* provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $ 10,000,000 if a corporation, or, if any other person, $ 350,000, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court." *15 U.S.C. section 2*.

equipment, installed upgrades, and performed some warranty--work on Bear machines. In 1993, SPX ended the business relationship over Metzler's objection.

The defendants. SPX Corporation manufactures and sells diagnostic equipment used to test and evaluate automobile functions such as engine performance, gas emissions, and wheel balance and alignment. SPX also sells replacement parts and labor services for its equipment. In 1988, SPX acquired Bear Automotive Service Equipment Company, a corporation that manufactured and distributed Bear brands of engine analyzers, emissions/gas analyzers, computerized wheel alignment machines, and computerized battery testers. [2] In June 1993, SPX acquired Allen Testproducts, a division of The Allen Group, Inc., a company that manufactured **[*1349]** and sold Allen Testproducts brands of engine analyzers, emissions/gas analyzers, and machines that combine engine and gas analyzers and emissions. After its acquisitions, SPX sold automotive diagnostic **[**5]** machines under both the Bear and Allen Testproducts brand names. In 1993, SPX consolidated the operations and product lines of Bear and Allen Testproducts into its Automotive Diagnostics division. At the end of 1996, the Automotive Diagnostics division was consolidated into SPX's Aftermarket Tool and Equipment Group. At that time, SPX stopped manufacturing the Allen Testproducts line.

Automobile diagnostic equipment. Automobile diagnostic machines are used to analyze problems with vehicles. These machines are manufactured and sold around the world by such companies as Ford, Chrysler, General Motors, Sun Electric, ESP, John Beam, Snap-On, and the defendants. It is undisputed that the market for automobile diagnostic equipment is highly competitive and swiftly changing. Automotive diagnostic machines are found in a wide range of automobile repair facilities, including independent service stations, car dealerships, and national automobile repair companies such **[**6]** as Pep Boys, Firestone, BP Oil, and Goodyear. Until the early 1980's, automotive diagnostic machines performed relatively simple diagnostic functions. But during the 1980's, as vehicles became more computer-based, manufacturers began selling computerized diagnostic equipment. In the early 1990's, Bear and Allen introduced personal-computer (PC) based automotive diagnostic equipment. The automotive diagnostic machines at issue in this lawsuit are large, PC-based machines set on wheeled carts. Outfitted with specialized software to provide an array of diagnostic functions, the machines are known in the industry as "big boxes." These machines generally cost between $ 10,000 and $ 40,000.

Parts. Although the defendants manufacture and sell both internal and external parts for diagnostic equipment, the plaintiffs' tying and monopoly claims relate solely to the defendants' actions concerning the sale and service of internal parts for the diagnostic equipment. Counting both external and internal parts, throughout the years at issue in this lawsuit, the defendants' equipment has been comprised of thousands of different types of parts. Of those thousands of parts, the plaintiffs have **[**7]** identified 109 internal parts which they claim are the alleged tying parts. In other words, the defendants allegedly will not sell any of these 109 parts unless the customer also agrees to purchase service. The differences between the internal and external parts to the defendants' automotive diagnostic equipment are explained below.

External parts. External parts for the defendants' equipment are easily obtained from a variety of sources and are interchangeable with the external parts of other manufacturers. When an external part needs to be replaced, the customer can generally perform the repair himself, without the need for a service technician. External parts are gradually used up and discarded by the customer.

Internal parts. Internal parts include such items as circuit board assemblies, programmed e-proms, internal power supplies, and built-in monitors. Some internal parts, such as circuit boards, are unique to the brand of equipment for which they are designed and will not work in other brands of automotive diagnostic equipment. Some internal parts are not unique. For almost all internal parts, a service call is generally required for repair or replacement. Unlike **[**8]** external parts, used internal parts typically have some repairable or exchange, "core" value, so they are not thrown away. The defendants buy back the internal parts and repair them.

---

[2] Bear no longer exists as a separate entity.

Parts for Bear or Allen Testproducts equipment fall into three categories: internally-manufactured parts, parts sold by outside manufacturers, and off-the-shelf generic computer parts. The majority of parts for Bear equipment are off-the-shelf generic parts. A small number of parts for Bear equipment are internally manufactured. Some parts for Bear equipment, such as membrane key pads and optical benches, are manufactured by outside manufacturers.

The plaintiffs' allegations of illegal tying and monopoly apply only to the defendants' practices with respect to internal parts. In **[*1350]** contrast to external parts which are readily available from the defendants or other numerous sources, the plaintiffs claim that internal parts are usually obtainable only from the defendants. The amended complaint alleges that the defendants will not sell internal parts to competing ISOs and have prohibited authorized ISOs from selling to competing ISOs. In support of this contention, the plaintiffs submitted the affidavits of **[**9]** several independent service providers, all former employees of the defendants, who testified that they tried to buy parts from the defendants who either refused to sell to them or made them pay retail price. [3]

The defendants contend that they sell to anyone and that most parts can be purchased from multiple sources. They state that anyone seeking internal parts can purchase them from the defendants by calling a toll-free 800 number. The defendants will provide customers with a parts price list that specifies the price for each part. Parts are shipped directly to the customer from centralized warehouse facilities. Defendants presented evidence that many of the alleged tying parts, such as built-in monitors, internal harnesses, cables, connectors, optical benches, keyboards, some internal power supplies and some circuit boards are also obtainable from outside manufacturers to whom the plaintiffs **[**10]** have access equal to the defendants. [4] Defendants admit, however, that internal parts manufactured by Memtron are not readily available on the open market. In accordance with Memtron's standard practices, Memtron will not sell parts manufactured specifically for SPX without SPX's approval. SPX is only one of approximately 500 Memtron customers. Memtron's refusal to sell to third parties applies equally to all Memtron's customers. Its stated reason for this policy is that customers pay tool and die costs for manufacturing the part and are therefore entitled to determine to whom it is sold. Memtron will make the exact same item for any customer willing to pay the tool and die costs. It will also manufacture a part provided by a customer for duplication if the customer pays the engineering costs.

Sales and Service. Up to the early 1980's, the dominant player in the automotive diagnostic equipment **[**11]** business was Sun Electric. Sun used its own employees to sell and service its products. In contrast, authorized independent service organizations (ISOs), located throughout the United States and Canada, serviced products sold by Bear and Allen Testproducts. The authorized ISOs were able to purchase parts and upgrades from Bear or Allen Testproducts at substantial discounts. But in the early 1980's, Bear and Allen Testproducts followed Sun's example and began to replace independent sales and service organizations with their own employees. By 1990, Bear and Allen had replaced substantially all of their ISOs with their own employees. Presently, only three authorized ISOs remain in existence. Bear and Allen Testproducts' stated reasons for changing to in-house sales and service was that increased computerization made the machines more complicated to service. The defendants, therefore, trained in-house technicians to ensure that repairs would be properly and promptly made.

Significantly, the defendants' policies and practices with regard to the sale of replacement parts and the provision of service have remained essentially unchanged since the mid-1980's. Allen Testproducts' policies and **[**12]** practices for the sale of replacement parts and the provision of service have generally been identical to Bear's, with one exception. Until 1993, Allen Testproducts would not sell internal circuit boards to anyone without accompanying professional Allen Testproducts installation. But in 1993, when SPX bought Allen Testproducts, it changed the Allen Testproducts circuit board policy so it comported with Bear practices. Customers needing repairs for most Bear or Allen Testproducts equipment had three choices: (1) they could obtain service directly from the defendants' technicians; (2) they could perform the service themselves, or (3) they could **[*1351]** hire an ISO or other technician to perform the repairs.

---

[3] Agosto affid. at paragraph 4, Martin affid. at paragraph 3, 6, Berry affid. at paragraph 3, Baker affid. at paragraph 5.

[4] Bailey affid. at paragraphs 26, 28, 34, Munelly affid. at paragraphs 24, 26, 34, Kepple affid. at paragraph 4.

Repair service was, and is, provided by the defendants either through service contracts or on a time and materials basis. The service contract is the equivalent of an extended warranty which obligates the defendants, for a predetermined price, to repair any problems arising during the contract period. Repairs performed on a time and material basis require the customer to pay for the repair on an hourly basis and to pay for any part needed in the repair.

The plaintiffs allege that the defendants **[**13]** illegally tie the sale of certain internal parts to the purchase of defendants' repair services. To support this contention, the plaintiffs submitted the affidavits of two former Bear employees, now independent service providers, who testified that they were instructed to tell customers that no one else could perform service but the defendants. Also submitted was the deposition of an independent service provider who stated that when he tried to order internal circuit boards from Bear, Allen, or SPX, he was told to contact the service department because circuit boards must be installed by SPX technicians. [5]

Warranty Coverage. SPX equipment is generally sold with a standard one-year factory warranty covering parts and labor from SPX during that period. An extended warranty or service contract is available, but not mandatory, for customers who want additional coverage.

Defendants also sell parts with warranty coverage. Warranty **[**14]** coverage on parts is optional with the customers. The plaintiff submitted the deposition of a former Allen employee who testified that for certain internal parts that defendants consider physically sensitive, such as circuit boards, no warranty is provided unless one of the defendants' technicians performs the installation. For purposes of summary judgment, each defendant concedes that it did not warrant internal parts sold without service.

Prices. Prior to 1983, the defendants gave large national accounts and ISOs a substantial discount on part prices. After the switch to in-house technicians, all customers, except large national accounts, paid list price for parts. Metzler and Allstate's claim that by refusing to give ISOs a discount on parts, the defendants have engaged in anticompetitive practices because without the discounts, it is difficult for the ISOs to compete with the defendants in the service market. Plaintiffs further contend that once the defendants switched from ISOs to in-house technicians, they began charging supracompetitive prices for parts and service. [6] Nonetheless, a careful review of the record shows that the plaintiffs submitted absolutely no credible **[**15]** evidence in support of a finding of supracompetitive prices. [7] **[**16]** To the contrary, the undisputed evidence shows that plaintiffs' service rates were comparable to the rates charged by the defendants. Bear and SPX's rate for service remained at $ 85 per hour from 1989 until 1997, when SPX raised its rate to $ 90 per hour. [8] The plaintiffs' hourly charge for service was $ 75 an hour from 1989 to 1993. In 1994 it rose to $ 80 an hour, and in 1995, it equaled SPX's rate of $ 85 an hour. The record contains no evidence regarding the prices charged for service by any other ISO, past or present.

[*1352] As for parts prices, the plaintiffs have failed to submit a complete list identifying the prices charged by the defendants for the 109 alleged tying parts. Nor did they submit evidence as to the prices charged by defendants' competitors for comparable internal parts. Likewise there is no evidence that the package price for defendants'

---

[5] Agosto affid. at paragraph 3, Martin affid. at paragraph 3, Namon deposition.

[6] A price is supracompetitive if it is substantially higher than the defendants would charge in a competitive market. See Phillip E. Areeda, Herbert Hovenkamp, and John L. Solow, ***Antitrust Law*** PP 501-03 (1995).

[7] Some former employees of the defendant, now independent service providers, testified for the plaintiffs that the defendants charged high prices. Their testimony about high prices, however, was very general. They didn't explain the basis for their conclusion that the prices were high. They made no comparisons to the prices charged by the defendants' competitors. See e.g., Perry depo. at 258

Q. Do you have any knowledge as to whether any of these companies, these authorized ISOs, ever indicated to you that their customers were unhappy with the prices that these parts from Bear and Allen were being set at?

A. Oh, yeah, sure. Everybody complains about prices….Sometimes it is not justified but they complain anyhow.

[8] The defendants also add a milage charge.

equipment, parts, and service was, at any time, higher than the package price of equipment, parts, and service sold by any competing manufacturer.

Customer information. Metzler and Allstate's contend that defendants failed to inform potential customers about the lifecycle costs of Bear and Allen equipment, thereby creating a "de facto" lock-in because once the customers purchased the expensive diagnostic equipment, it was not economically feasible for them to switch to other brands of equipment. Nothing in the record, however, supports a finding of a "de facto" lock-in. The plaintiffs' own evidence shows that it is difficult for equipment owners to estimate the total expected costs for automotive diagnostic equipment, **[**17]** whether the brand is Bear, Allen, Sun, or any other brand. Useful life varies depending on a number of factors including frequency of use, weather, and accidents in the shop. [9] In discovery Metzler acknowledge that the defendants' policies with respect to parts and services has been well known since the early 1989's. [10] Furthermore, by 1989, a substantial majority of Bear and Allen customers had previously purchased machines from either the defendants or a competitor and were presumably knowledgeable about the market for automotive diagnostic machines and the practices of various manufacturers with regard to their service and parts policies. Contrary to plaintiffs' contentions, the evidence of record shows that the defendants' policies and practices with respect to parts and services was generally known. [11]

[**18] II. PROCEDURAL HISTORY

Plaintiffs' Second Amended Complaint for Damages and Injunctive Relief alleges the following claims: Count I is a state-law claim for breach of contract against Bear and SPX; Count II alleges a state-law claim for Intentional Infliction of Emotional Distress against Bear and SPX, Counts III and VII allege federal antitrust claims of unlawful tying; Counts V and VI allege federal antitrust violations of monopolization and attempted monopolization; Counts VII, VIII, IX, and X allege state antitrust violations for unlawful tying and monopolization; Counts XI, XII, and XIII allege state law claims for intentional interference with an existing and prospective business relationship; and Count XIV alleges a state law claim for wrongful termination of contract against Bear and SPX.

The parties have engaged in extensive discovery in this vigorously-litigated case which is now in its fifth year. [12] Counts I (breach of contract) and XIV (wrongful termination) are no longer viable because a predecessor judge granted summary judgment in favor of defendants, approving a Report and Recommendation of the magistrate. The plaintiffs had alleged that Bear and SPX breached **[**19]** an oral employment contract granting the plaintiffs the right to be exclusive distributors of the defendants' products in a specific sales territory in Dade County. Summary judgment was granted on the basis that the claim was barred by the statute of frauds and that the relationship was terminable at will. Count II for intentional infliction of emotional distress was dismissed.

Count XIII alleges a state-law claim against SPX for Intentional Interference with Existing and Prospective Business Relations. The gravamen of Count XIII is that SPX intentionally interfered with a business relationship the plaintiffs had with Hennessy by telling a Hennessy representative that **[*1353]** SPX was involved in litigation with the plaintiffs. The magistrate recommended that SPX's motion for **[**20]** summary judgment on the intentional interference claim be granted, finding that as a matter of law the plaintiffs have no basis in prevailing on the third element of the claim - an intentional and unjustified interference. This Court issued an order which concluded that the magistrate judge had erred when he relied on a state-law prohibition against pyramiding inference on inference when federal law was to the contrary. Consequently, Count XIII is viable at this time. Defendants, however, have filed a renewed motion for summary judgment or, in the alternative, motion in limine, to exclude evidence as to Count XIII.

---

[9] See affidavit of independent automobile repair service owner, Andrews at 8.

[10] See plaintiffs' sworn interrogatory answers.

[11] E.g., Berry affid. at paragraph 7, Martin affid. at paragraph 3, Vega affid. at paragraph 3.

[12] The statute of limitations in an antitrust action is four years. 15 U.S.C. section 5b. Consequently, the relevant period for plaintiffs' antitrust claims commences on October 13, 1989, four years prior to the filing of the initial complaint.

The plaintiffs filed a motion for partial summary judgment on relevant market and monopoly, arguing that the undisputed facts show that there is no competitive after market for parts and service of internal parts. On January 26, 1998, the Magistrate Judge recommended that this motion for summary judgment be denied because there is evidence showing that the defendants do not control the market of available parts, including Metzler's own affidavit, which states that he has been successful in obtaining parts. Plaintiffs filed objections to the Report and Recommendation. On **[**21]** March 23, 1998, this Court affirmed the magistrate's report and denied summary judgment in favor of the plaintiffs on the relevant market, monopoly power, and related issues.

The motion presently before the Court is defendants' motion for summary judgment on Counts III through XII, the antitrust counts. Defendants argue that they are entitled to summary judgment because the plaintiffs cannot demonstrate the requisite elements of an illegal tie, nor can they show monopolization or attempted monopolization. On June 15, 1998, the magistrate judge issued a Report and Recommendation that defendants' motion for summary judgment be denied. The defendants filed objections.

III. MAGISTRATE JUDGE'S REPORT AND RECOMMENDATION

It is axiomatic that ***HN3***[] when an objection is made to a magistrate's findings or recommendations on a dispositive motion, the district court shall make a *de novo* determination of those portions of the report or proposed findings to which the objections are addressed. *United States v. Raddatz, 447 U.S. 667, 673, 100 S. Ct. 2406, 2411, 65 L. Ed. 2d 424 (1980)*. The report and recommendation issued in this case recommended that summary judgment be denied, stating, **[**22]** "regardless of whether a change in policy is or is not required under *Kodak*, there are issues of fact … which remain to be resolved at trial." After conducting a *de novo* review of the record, this Court disagrees. In accordance with the holdings of the First, Third, Sixth, and Seventh Circuits, as well as numerous federal courts and commentators, this Court finds that an antitrust plaintiff cannot succeed on a Kodak-type theory where the defendant has not, within the applicable statute of limitations period, exacteded supracompetitive prices by implementing a restrictive anticompetitive change of policy that locked in customers, or used other coercive anticompetitive methods to deceive customers about the prices they would have to pay for parts and service. On this record, there is no evidence of a restrictive policy change, coercive methods to prevent customers from learning the lifecycle costs of defendants' equipment, or the imposition of supracompetitive prices. Accordingly, defendants' objections to the magistrate's report and recommendation are well taken, as explained in detail in the sections to follow.

IV. SUMMARY JUDGMENT STANDARD

HN4[] *Rule 56(c) of the Federal* ***[**23]*** *Rules of Civil Procedure* authorizes summary judgment where the pleadings and supporting materials show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 2510, 91 L. Ed. 2d 202 (1986)*. The court's focus in reviewing a motion for summary judgment is "whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." *Allen vs. Tyson Foods,* ***[*1354]*** *Inc., 121 F.3d 642, 646 (11th Cir. 1997)*. The moving party has the burden to establish the absence of a genuine issue as to any material fact. *Adickes v. S.H. Kress and Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 1608, 26 L. Ed. 2d 142 (1970)*; *Tyson Foods, Inc., 121 F.3d at 646*.

HN5[] In considering the motion, the Court must construe the evidence and the inferences drawn from the underlying facts in the light most favorable to the party opposing the motion. *United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 994, 8 L. Ed. 2d 176 (1962)*. Furthermore, facts asserted by the **[**24]** party opposing a summary judgment must be regarded as true if supported by affidavit rendered an opinion or other evidentiary material. *Coke v. General Adjustment Bureau, Inc., 640 F.2d 584, 595 (5th Cir. 1981)*. Ultimately, "where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial." *Tyson Foods, Inc., 121 F.3d at 646*; *Matsushita, 475 U.S. 574 at 587, 106 S. Ct. 1348 at 1356, 89 L.*

Ed. 2d 538. Applying this standard, in order to avoid summary judgment, the plaintiffs are required to come forward with sufficient evidence in support of each element of their tying and monopoly claims for a jury to return a verdict in their favor. Southern Card & Novelty, Inc., v. Lawson Mardon Label, Inc., 138 F.3d 869, 873-74 (11th Cir. 1998).

V. APPLICABLE LAW

Metzler and Allstate's do not contend that the defendants' practices in selling replacement parts or providing repair services for their automotive diagnostic equipment enabled the defendants to secure a monopoly, or attempt a monopolization, over the numerous other competing brands of automotive diagnostic equipment. Rather, the plaintiffs ground their claims on **[**25]** the holding of the Supreme Court in Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992), that in some limited circumstances it is possible for "information costs," "switching costs," and a "lock-in" to create a potential for aftermarket power in the derivative aftermarkets for the manufacturer's own equipment.

A. Market Definition. Congress passed the antitrust laws to promote competition and to prevent monopoly. Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 100 at 3 (1997). ***HN6***[] Under those laws, the existence of "competition" is determined by market performance, not the number of competitors. *Id.* at 3-4. Thus, while the antitrust laws protect competition, they do not protect competitors. Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962).

In seeking to encourage competition, the primary focus of antitrust laws is the promotion of competition between competing brands, or interbrand competition. Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 724, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988); Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. **[**26]** 36, 52 n.19, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977). So long as there is sufficient interbrand competition, a firm's intrabrand policies will not be deemed a threat to competition. *See* GTE Sylvania, Inc., 433 U.S. at 54-56. Indeed, where there is interbrand competition, an intrabrand restraint may promote interbrand competition, rather than harm it. *See* Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 810 (6th Cir. 1988).

1. The Rule Against Single Brand Relevant Markets.

Given the antitrust laws' concern with interbrand competition, rather than intrabrand competition, courts have historically declined to limit their antitrust analysis to the defendant's brand of products alone. The rationale for this position is that under classic economic theory, cross-elasticity of demand in the basic equipment market prevents exploitation of the parts and service aftermarkets by consumers choosing not to buy the basic equipment. United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 400, 100 L. Ed. 1264, 76 S. Ct. 994 (1966). High prices for the defendant's brand can therefore be only a short-run phenomenon, which is simply not the type of problem with which **[**27]** antitrust laws are concerned. *Parts & Elec. Motors, Inc., v. Sterling Elec., Inc., 866 F.2d 228, 234-36 (7th Cir. 1988)* (Posner, J., **[*1355]** dissenting). As the Supreme Court stated in *E.I. du Pont de Nemours & Co.*, it simply makes no economic sense to punish a manufacturer for asserting the "natural" monopoly in the sale and distribution of its own products. 351 U.S. at 393-95 (1966). *See also* Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 282 (5th Cir. 1978).

Because it would be inappropriate to punish a firm for its natural monopoly in its own products, courts embraced a sweeping prohibition against analyzing alleged anticompetitive activity by focusing on single-brand relevant markets: ***HN7***[] "Absent exceptional market conditions, one brand in a market of competing brands cannot constitute a relevant product market." Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 488 (5th Cir. 1984); *accord* Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 479-81 (3rd Cir. 1992); Grappone, Inc. v. Subaru of New England, Inc., 858 F.2d 792, 797 (1st Cir. 1988); Mozart Co. v. Mercedes-Benz of North Am., Inc., 833 F.2d 1342, 1346-47 **[**28]** (9th Cir. 1987); A.I. Root Co. v. Computer/Dynamics, Inc., 806 F.2d 673, 675-76 (6th Cir. 1986); Neumann v. Reinforced Earth Co., 252 U.S. App. D.C. 11, 786 F.2d 424, 428-30 (D.C. Cir. 1986); Will v. Comprehensive Accounting Corp., 776 F.2d 665, 673-74 (7th Cir. 1985).

2. The Role of Market Imperfections.

Consistent with the rule against single-brand relevant markets, antitrust courts have declined to narrowly define a market based on market imperfections alone. *See* [Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 25-26, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)]. For example, in *Jefferson Parish*, defendant East Jefferson hospital held a 30% market share in the New Orleans metropolitan area -- not enough to prove market power. [Id. at 7-8, 26-29]. Plaintiff, a doctor alleging illegal tying, tried to narrow the market by arguing that "market imperfections" -- inadequate price information and reduced price competition due to insurance companies -- effectively narrowed the market to one in which East Jefferson did have power. *Id.* The Supreme Court rejected that contention, holding that a relevant market may not be narrowed due to "market imperfections" **[**29]** alone. *Id.* The Court stated:

> While these factors [inadequate price information and insurance companies] may generate "market power" in some abstract sense, they do not generate the kind of market power that justifies condemnation of tying.

[Jefferson Parish, 466 U.S. at 27].

3. The Kodak Case.

In June 1992, in [Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)], the Supreme Court rendered an opinion on whether Kodak's restrictive policies in the sales of Kodak equipment parts constituted an illegal tying arrangement. In a 6-3 decision, the Court rejected Kodak's argument that it was entitled to summary judgment merely because it lacked market power in its alleged tying product market for photocopier and micrographic equipment. Based on a relevant market analysis, the majority held that Kodak was subject to suit when it suddenly implemented policies to control sales in the tied product market - the service aftermarket for Kodak equipment.

It was undisputed that Kodak faced a highly competitive interbrand market for copier and micrographic equipment. Beginning in the early 1980's, ISOs began repairing **[**30]** and servicing Kodak machines. Some ISO customers purchased replacement parts themselves, and other obtained both parts and service through the ISOs. In 1985 and 1986, Kodak switched to a policy of selling replacement parts only to customers who used Kodak's service or performed their own servicing. Kodak also obtained an agreement from the original equipment manufacturers that produced parts for its machine, not to sell Kodak parts to ISOs. Equipment owners and independent parts distributors were pressured not to sell Kodak parts to ISOs. A group of eighteen ISOs sued Kodak over the sudden change in parts policy, claiming that Kodak had unlawfully tied the sale of service for Kodak equipment to the sales of parts for Kodak equipment in violation of [section 1] of the Sherman Act and had monopolized and attempted to monopolize the markets for the **[*1356]** sales and service for Kodak equipment in violation of [section 2] of the Sherman Act.

Before plaintiffs had initiated any discovery, Kodak moved for summary judgment. Rather than engaging in a factual analysis of the relevant market, Kodak took an absolute theoretical position on market definition, arguing that the Court should adopt as a matter **[**31]** of law, the basic equipment market as its relevant tying product market. The defendant asked the court to adopt a per se rule that where there is competition in the market for the sale of a particular product, the manufacturer of the product cannot exercise market power in the parts or service aftermarkets for the product.

The district court granted Kodak's summary judgment motion. But the court of appeals reversed, holding that market imperfections can keep economic theories about how consumers behave from mirroring reality. [903 F.2d 612 at 617]. The court did not identify any specific market imperfections in the relevant markets, but it did indicate that some existing Kodak customers could be locked in to particular Kodak machines and therefore might be forced to pay supracompetitive prices for service rather than switch to new equipment. [Id. at 616]. In the Supreme Court, Kodak made the same arguments. Specifically, it argued that if it raised its parts or service prices above competitive levels, potential customers would simply stop buying Kodak equipment. Perhaps Kodak would be able to increase short term profits through such a strategy, but at a devastating cost to its long term interests. **[**32]** Thus, due to fierce competition in the interbrand equipment markets, Kodak cannot exercise market power or act anticompetitively in any derivative parts or service aftermarkets.

The Supreme Court flatly rejected Kodak's urging of a formalistic rule that did not take into account the facts of a particular case. Like the Court of Appeals, the Supreme Court focused on Kodak's change in its parts and service policy mid-stream, after customers had already purchased their machines and built businesses around existing Kodak policies. *Kodak, 504 U.S. at 477* & n.24. If the cost of switching is high, consumers who already have purchased equipment are "locked in" and will therefore tolerate service price increases to avoid purchasing new equipment. The ISOs offered evidence showing that the initial outlay for Kodak equipment, combined with the required support, would make switching costs substantial. Under this scenario, a seller could maintain supracompetitive prices in the aftermarket if the switching costs were high relative to the increase in service prices, and the number of locked-in customers was high relative to the number of new purchasers. The restrictive policy change, existing **[**33]** imperfections in the copier market such as high "information" costs and high "switching" costs, created an issue of fact as to whether Kodak had improperly locked in its customers, formed the basis to deny defendant's motion for summary judgment. *Id. at 477* & n.24. Kodak's assertion that its policies resulted in a procompetitive market was clearly contrary to the facts. The Court stated that market definition is quintessentially a factual matter. *504 U.S. at 453*. Kodak's failure to show any factual support for its contentions was therefore critical to the denial of summary judgment.

4. Post-Kodak Cases. Cases interpreting *Kodak* have imposed a sharp limitation on its sweep. The dissent in *Kodak* advanced a proposition that an up-front tie-in of equipment and service would not raise the same antitrust concerns. *504 U.S. at 491-92* (Scalia, J., dissenting). Circuit courts, discussing the holding of *Kodak*, have agreed, recognizing that the effect of an advance disclosure of a tying arrangement is to prevent the purchaser from being locked in. [13] For example, in *Digital Equip. Corp. v.* ***[*1357]*** *Uniq Digital Tech., Inc., 73 F.3d 756 (7th Cir. 1996)*, the Seventh Circuit characterized **[**34]** the triable issue in *Kodak* as "whether the change in policy enabled Kodak to exact supracompetitive prices from customers who had already purchased its machines." *Id. at 763*.

> The Court did not doubt in Kodak that if spare parts had been bundled with Kodak's copiers from the outset, or Kodak had informed customers about its policies before they bought its machines, purchasers could have shopped around for competitive life-cycle prices. The material dispute that called for a trial was whether the change in policy enabled Kodak to extract supra-competitive prices from customers who had already purchased its machines.

Id. at 763.

[35]** The First Circuit has also focused on the change in policy, stating, in *Lee v. Life Ins. Co. of N. Am., 23 F.3d 14 (1994)*, that "the timing of the 'lock-in' at issue in *Kodak* was central to the Supreme Court's decision."

> Had previous customers known, at the time they bought their Kodak copiers, that Kodak would implement its restrictive parts-servicing policy, Kodak's market power," i.e., its leverage to induce customers to purchase Kodak servicing, could only have been as significant as its [power] in the copier market, which was stipulated to be inconsequential or nonexistent.

23 F.3d at 19.

In *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430 (3d Cir. 1997)*, the Third Circuit noted that "the *Kodak* case arose out of concerns about unilateral changes in Kodak's parts and repairs policies." *Id. at 440*.

---

[13] Commentators have also discussed the importance of a mid-stream change in policy. See e.g., Daniel M. Wall, *Aftermarket Monopoly Five Years After Kodak*, 11 Antitrust 32 (Summer 1997); Carl Shapiro, *Aftermarkets and Consumer Welfare: Making Sense of Kodak*, 63 Antitrust L.J. 483 (1995); Michael W. Klass, Richard T. Rapp, *Litigating the Key Economic Issues After Kodak*, 7 Antitrust 14 (Spring 1993); Douglas S. Katz, *The Benefits and Burdens of Kodak from a Litigant's Perspective*, 7 Antitrust 8 (Winter 1992); Mark R. Patterson, *Coercion, Deception, and other Demand-Increasing Practices in* ***Antitrust Law***, 66 Antitrust L.J. 1 (1997).

"Because this change in policy was not foreseen as the time of the sale, buyers had no ability to calculate these higher costs at the time of purchase and incorporate them into their purchase decision." *Id.* The Third Circuit concluded that *Kodak* did not apply because the Domino's franchisees could assess the potential costs and **[**36]** economic risks at the time they signed the franchise agreement. Unlike *Kodak*, the transaction between plaintiff and defendant was "subjected to competition at the pre-contract stage." *Id.* Similarly, the Fifth Circuit has held that where the defendant's restrictive policies are disclosed in advance, information and switching costs are "virtually nonexistent." *United Farmers Agents Ass'n v. Farmers Ins. Exch., 89 F.3d 233 (5th Cir. 1996)*.

Perhaps the *post-Kodak* case most significant to the resolution of the issue before this Court, however, is *PSI Repair Services, Inc. v. Honeywell, Inc., 104 F.3d 811 (6th Cir. 1997)*. As in *Kodak* and the instant case, *PSI* involved a durable goods aftermarket. An ISO filed a lawsuit against Honeywell, a manufacturer of industrial machinery, alleging that it had violated antitrust laws by refusing to sell certain parts necessary for repairing internal circuit boards without accompanying service. The restrictive policy at issue had been in existence for many years. Relying on the holding in *Kodak*, the ISO argued that the relevant markets were the aftermarkets for Honeywell's circuit boards and service. The Sixth Circuit **[**37]** disagreed, finding that the absence of a change in Honeywell's policy was fatal to the ISO's claim, despite the fact that the policy made it impossible for the ISO to compete with Honeywell in repairing circuit boards.

> Information and switching costs were particularly high in *Kodak* because Kodak adopted its parts-restrictive policy after numerous customers had already purchased Kodak copiers, thus creating a "lock-in" effect. . . . The change in policy in *Kodak* was the crucial factor in the Court's decision. By changing its policy after its customers were "locked in," Kodak took advantage of the fact that its customers lacked the information to anticipate this change.

104 F.3d at 818-20.

The *PSI* court stressed the continued viability of the Supreme Court's decision in *Jefferson Parish*, which found that illegal market power could not derive from market imperfections alone. There must be change in policy that is coupled with any existing market imperfections. *104 F.3d at 829* ("we **[*1358]** thus hold that an antitrust plaintiff cannot succeed on a Kodak-type theory when the defendant has not changed its policy after locking in some of its customers, and the defendant **[**38]** has been otherwise forthcoming about its pricing structure and service policies.").

VI. APPLICATION OF LAW TO FACTS OF THIS CASE

The defendants contend that under the principles set forth in *Kodak* and its progeny, Metzler and Allstate's simply cannot establish their case because they cannot show that the defendants changed their policies to become restrictive, thereby locking in their customers, or otherwise failed to be forthcoming about their pricing structure and service policies. Without a showing of a change in business policy, or other coercive practice which concealed the true cost of parts and repairs, the exception to the general rule - that the relevant market is the primary equipment market - cannot apply because the purchasers of the automotive diagnostic equipment knew about repair costs at the time they bought the equipment. Under these circumstances, the relevant market is the primary equipment market.

THE RELEVANT MARKET. Central to the outcome of the *section 1* tying claim and the *section 2* monopoly claims is the Court's determination as to the relevant product market. This determination is critical because if the market is defined as the primary **[**39]** equipment market, the plaintiffs cannot prevail because the uncontradicted evidence of record shows that the defendants clearly have no market power in the primary equipment market.

The plaintiffs argue that through the use of coercive practices, such as a refusal to sell parts to ISOs, the defendants have gained sufficient market power in the tying product market (parts) to restrain competition in the tied product market (service). Consequently, as in *Kodak*, a trier of fact could conclude that competition in the equipment market does not really curb defendants' power in the parts and service aftermarket. Thus, according to the plaintiffs, the relevant market should be the aftermarket for parts and services.

In *Kodak*, the defendant sought summary judgment arguing that as a matter of law "equipment competition precludes any finding of monopoly power in derivative aftermarkets." *504 U.S. at 464, 112 S. Ct. at 2085*. Rejecting Kodak's economic theory, the Court denied summary judgment because the ISOs had presented a reasonable theory that due to Kodak's change in policy, Kodak's argument was factually incorrect: owners of Kodak equipment were unable to calculate lifecycle costs **[**40]** at the time of purchase because the seller's change in policy was not foreseer and significant switching costs discouraged them from changing to other equipment once the true costs were known. *504 U.S. at 471, 112 S. Ct. at 2086*. Because of these particular circumstances, ordinary market forces, which would have caused higher prices in the parts and service aftermarkets to be offset by lower profits in the primary equipment market as customers switched to lower-cost equipment, did not apply. The limited choices available to owners of Kodak equipment led the Court to conclude that under certain circumstances, one brand can form the relevant market for purposes of both *section 1* and *section 2* of the Sherman Act. *See Collins v. International Dairy Queen, Inc., 980 F. Supp. 1252, 1256-57 (M.D. Ga. 1997)*.

The Court finds that no particular circumstances exist in this case which would sustain a finding that the relevant market is the parts and service aftermarket for defendants' brand of products, rather than the primary equipment market. First, the plaintiffs have not identified a change in policy that locked in the defendants' customers. [14] **[**42]** Even plaintiffs' expert admitted that there **[**41]** has been no change in policy. [15] Until recently, Metzler **[*1359]** and Allstate's have not advanced the argument that the transition in the early 1980's from ISOs to in-house technicians was the change that locked in equipment purchasers to supracompetitive prices. [16] Nor would such an argument be persuasive. It is undisputed that the defendants' switch from ISOs to in-house technicians was a vertical integration. The elimination of a distribution network by vertical integration generally does not run afoul of the antitrust laws. *See University Life Ins. Co. v. Unimarc, Ltd, 699 F.2d 846, 852 (7th Cir. 1983)*("vertical ***HN8***[] integration," performance within one company of two or more steps in chain of production and distribution, does not violate the Sherman Antitrust Act). *Kodak* has very little to say about vertical restraints. *See* Ronald S. Katz, *The Benefits and Burdens of Kodak from a Litigant's Perspective* 7 Antitrust 8, 12 (Winter 1992). Furthermore, the defendants' decision to vertically integrate was made in the early 1980's, many years outside the statute of limitations period in this case.

Here the defendants never initiated a sudden restrictive change in policy which caused their customers to be unwittingly locked in to the use the defendants' services. To the extent that there are limited service options available in the market, those limited options have been in place for more than fifteen years.

Second, the plaintiffs have failed to establish a material fact in support of their contention that the defendants engaged in coercive practices which concealed the true **[**43]** cost of parts and repairs. They have made no showing that the defendants applied coercive tactics to prevent customers from estimating lifecycle costs prior to their equipment purchase. To the contrary, the evidence, in substance, establishes that customers knew or could readily obtain information about the defendants' parts and service policies. Customers unhappy with those policies could purchase equipment from other manufacturers. And customers were free to purchase their external parts and some internal parts from sources other than the defendants. This is in contrast to Kodak, which apparently tied the sale of <u>all</u> its parts with service.

---

[14] The only change in policy show by the evidence was SPX's elimination of Allen's policy of making the sale of certain internal parts contingent on the purchase of service.

[15] When asked about whether there had been a change in the defendants' policies with respect to the alleged tying products, Dr. Seaman responded, "In my reading of the record, there has not particularly been a change in the policy of the companies involved, the defendants, regarding their policy towards these products."

[16] Plaintiffs' expert, Bruce Seaman, testified that "antitrust claims made by the plaintiffs in this case in no way depend upon any particular challenge to this historical shift toward a vertically integrated service system by the defendants." (Seaman's Exp. Rep. App. Ex. 1 at paragraph 11).

Third, the plaintiffs have failed to produce sufficient evidence to permit a reasonable jury to find that the defendants used a change in policy to exact supracompetitive prices from existing customers. Supracompetitive prices is the ultimate evil arising from the sudden change in policy that concerned the Supreme Court in *Kodak*. As noted in *PSI Repair Services*, "if there were any evidence in the record that [the defendant] took advantage of its customers' imperfect information in order to reap supracompetitive profits in the aftermarkets **[**44]** for its equipment, we would not hesitate to allow a Kodak-type theory to be submitted to the jury. However, we can find nothing in the record or [plaintiff's] brief that alleges that [the defendant] engaged in such activities. In this situation a Kodak-type theory is not applicable." *104 F.3d at 820*. Similarly, there is nothing in the record before this Court to support a finding that the defendants coerced their customers to pay supracompetitive prices for either parts or service. The plaintiffs have presented no evidence showing the defendants regularly charged higher prices for parts to Bear and Allen equipment than the prices charged by the defendants' competitors for similar parts. Moreover, the undisputed evidence shows that the defendants' service charges were consistent with the plaintiffs' own service charges. For the foregoing reasons, the Court finds that the circumstances of this case are readily distinguishable from *Kodak*, Accordingly, the primary market is the relevant market for *sections 1* and *2* antitrust purposes.

A. THE TYING CLAIMS. The plaintiffs contend that Bear and Allen, and later SPX, have illegally tied the sale of certain internal parts **[**45]** to their equipment to their repair services. ***HN9***[] A tying arrangement is "an agreement by a party to sell one **[*1360]** product but only on the condition that the buyer also purchases a different (or tied) product." *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 462, 112 S. Ct. 2072, 2097, 119 L. Ed. 2d 265 (1992)*. Such an arrangement can violate the Sherman Act's prohibition against agreements "in restraint of trade." *15 U.S.C. section 1*. But not every refusal to sell two products separately can be said to restrain trade. *Jefferson Parish Hosp. Distr. v. Hyde, 466 U.S. 2, 9, 104 S. Ct. 1551, 1556, 80 L. Ed. 2d 2 (1984)*. Courts have long recognized that Congress intended to prohibit only unreasonable restraints. *Southern Card & Novelty, Inc., 138 F.3d 869, 874 (11th Cir. 1998)*. Most antitrust claims are therefore analyzed under a "rule of reason," according to which the finder of fact must decide whether the practice at issue imposes an unreasonable restraint on competition. *Id.* This determination requires a consideration of a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the **[**46]** restraint's history, nature, and effect. *Southern Card & Novelty, Inc., 138 F.3d at 874*.

Certain tying arrangements, however, pose a predictable and unacceptable risk of stifling competition and therefore are unreasonable per se. *Jefferson Parish Hosp. Distr., 466 U.S. at 9, 104 S. Ct. at 1556*. In the Eleventh Circuit, the per se rule is applied reluctantly, and only when experience with a particular type of restraint enables the court to predict with confidence that the rule of reason will condemn it. *Southern Card & Novelty, Inc., 138 F.3d at 874*. *Retina Assoc., P.A. v. Southern Baptist Hosp., 105 F.3d 1376, 1381 (11th Cir. 1997)*. The plaintiffs allege illegal tying under both the per se rule and the rule of reason. But it is far from certain that the practices at issue in this case would fall into the per se category. The Court will therefore first review all relevant considerations to determine whether the rule of reason would condemn them. *See All Care Nursing Serv., Inc. v. High Tech Staffing Servs., Inc., 135 F.3d 740, 746 (11th Circuit 1998)*("a presumption exists that the circumstances of a case will be looked at in the light of the rule of reason standard **[**47]** and will not be deemed per se unreasonable"). ***HN10***[] An illegal tying arrangement has five elements:

> 1) a "tying" product and a "tied" product; 2) evidence that the seller forced the buyer to purchase the tied product to get the tying product; 3) that the seller has sufficient economic power in the tying product market to coerce buyer acceptance of the tied product; and 4) anticompetitive effects in the tied market; and 5) the involvement of a "not insubstantial" amount of interstate commerce in the market of the tied product.

Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1502-1503 (11th Cir. 1985). ***HN11***[] A claim that a tying arrangement is illegal per se eliminates the requirement that the plaintiff show an actual anticompetitive effect. *Id.* The defendants contend that the plaintiffs have failed to carry their burden to come forward with sufficient evidence to create a genuine dispute of material fact in support of the second, third, and fourth elements of their illegal tying claim.

1. Separate Products. Two separate products are tied together if a difference exists in the "character and demand for the two items." *Id.* Thus to determine whether there **[**48]** are the parts and service are two separate products, the Court must focus on the demand for the two items. *Jefferson Parish, 466 U.S. at 19*; *104 S. Ct. at 1561-62*. In *Kodak*, the Court wrote that parts and service can be separate products if there is "sufficient consumer demand so that it is efficient for a firm to provide service separately from parts." *504 U.S. at 462*; *112 S. Ct. at 2080*. For the purposes of this summary judgment motion, the defendants concede that parts and service are separate products.

2. Evidence of actual coercion. The plaintiffs cannot satisfy the second element of the test because the evidence shows that (1) there was no change in policy which locked in existing customers; and (2) there is no evidence showing that defendants exacteded supracompetitive prices from customers who had already purchased their equipment. In *Kodak*, the defendant changed its business policy after customers had purchased **[*1361]** their equipment, thereby creating the opportunity to exact additional money from locked-in customers by raising prices to noncompetitive levels. These factors, which were critical to the holding in *Kodak*, are simply absent in this case. Metzler **[**49]** and Allstate claim that the defendants refuse to sell parts to ISOs, or to sell them parts at a discount. Assuming for the purposes of summary judgment that these allegations are true, this conduct is insufficient to constitute the coercive type of practice that gives rise to a monopoly claim if the primary market is competitive and potential customers are not locked in to unanticipated high prices. *See* *Jefferson Parish, 466 U.S. at 17, 104 S. Ct. at 1561* (when seller does not have either the degree or kind of market power that enables him to force customers to purchase a second, unwanted product in order to obtain the first, tying product, antitrust violation can be established only by evidence of unreasonable restraint on competition in the relevant market); *Digital Equip. Corp. v. UNIQ Digital Technologies, Inc., 73 F.3d 756 (7th Cir. 1996)*(refusal to sell to distributor for discount is not antitrust violation).

3. Market Power. ***HN12***[] Market power is defined as the power "to force a purchaser to do something he would not do in a competitive market." *PSI, 104 F.3d at 817*. Market power is generally measured by market share. *Jefferson Parish, 466 U.S. at 27*. [17] The **[**50]** appropriate query is "whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market. *Fortner Enters., Inc. v. United States Steel Corp., 394 U.S. 495, 504, 89 S. Ct. 1252, 1259, 22 L. Ed. 2d 495 (1969)*. If the seller has sufficient power in the tying market to "force" the buyer to purchase the tied product, then competition on the merits is restrained and the Sherman Act is violated. *Jefferson Parish, 466 U.S. at 12, 104 S. Ct. at 1558*. Without market power, the seller is unable to engage in the forcing necessary to establish a *section 1* violation. *PSI, 104 F.3d at 818*.

In this case, the plaintiffs have focused on the parts and service **[**51]** aftermarket and have provided no data regarding the primary equipment market. The only market-share evidence of record shows that the primary equipment market was and is competitive. In 1993 for example, Bear and Allen's combined share of the automotive diagnostic equipment market was 26 percent. Market shares below 30 percent are generally insufficient, as a matter of law, to constitute market power in tying and monopolization cases. *E.g.,* *Jefferson Parish, 466 U.S. at 26-29*; *PSI, 104 F.3d at 821* (granting summary judgment as to market power in monopolization and tying case where defendant had 27 percent share of primary equipment market); *ABA Section of **Antitrust Law**, **Antitrust Law** Developments* (Fourth) Vol. I, at 194 (1997)(since *Jefferson Parish* no court has accepted a market share below 30 percent as evidence of sufficient market power to warrant application of per se rule). Consequently, the plaintiffs cannot establish this fourth element of their tying claim.

4. Anticompetitive Effects on Tied Market. ***HN13***[] The fourth *Amey* element--anticompetitive effects in the tied market--is properly analyzed in terms of the price of the tied and tying bundle. Thus, the **[**52]** plaintiffs must establish that the combined price for the tying and tied products was greater than if they had been sold independently. *Kypta v. McDonald's Corp., 671 F.2d 1282 (11th Cir. 1982)*.

[17] Market power can also be demonstrated by direct evidence that defendants raised prices and drove out competition in the tied product market. *Wilson v. Mobile Oil Corp.*, 1997 WL 675326 (E.D. La. 1997). No such evidence has been presented in this case.

> ***HN14***[] Injury resulting from a tie-in must be shown by establishing that payments for both the tied and tying products exceeded their combined fair market value. The rationale behind this requirement is apparent: A determination of the value of the tied products alone would not indicate whether the plaintiff indeed suffered any net economic harm, since a lower price might conceivably have been exacted by the [defendant] for the tying product. Unless the fair market value of both the tied and tying products are determined and an overcharge in the complete price found, no **[*1362]** injury can be claimed; suit then would be foreclosed.

Id. at 1285. Under *Krupta* then, even if the defendants had unreasonably restricted the availability of their parts, causing high prices for parts, Metzler and Bear cannot prevail on their tying claim unless they show that the defendants' service rates were supracompetitive, resulting in a higher package price for parts and service. The Court finds that **[**53]** the plaintiffs have totally failed to meet this burden. To the contrary, the undisputed evidence establishes that customers did not pay supracompetitive rates for the "tied product," that is, service for defendants' automotive diagnostic equipment. Defendants' service rates are and have been virtually the same as plaintiffs' service rates. [18] Consequently, the plaintiffs have not established this essential element of a tying claim.

> Plaintiffs did not claim, let alone offer evidence to show, that the price they paid for the franchise-computation package is higher than the price for those two products purchased in separate markets. . . . They therefore failed to show market power directly. *Kypta* . . . holds that unless . . . the package price was elevated the suit must be dismissed without further ado.

Will v. Comprehensive Accounting Corp., 776 F.2d 665, 673 (7th Cir. 1985). *Accord* *United Farmers Agents Ass'n v. Farmers Ins. Exchange, 89 F.3d 233, 237 (5th Cir. 1996)* (affirming summary judgment, noting "plaintiffs have failed to even allege that the tied bundle . . . cost more than the sum of their market prices.").

[54]** Even if the defendants did charge supracompetitive prices, the plaintiffs burden does not stop there. They must also establish a causal relationship between defendants' actions and plaintiffs' injury. ***HN15***[] A tying arrangement is illegal if it (1) has an actual anticompetitive effect or threatened to have such an effect and (2) that effect is not outweighed by procompetitive justifications. *Jefferson Parish, 466 U.S. at 29-31, 80 L. Ed. 2d 2, 104 S. Ct. 1551*; *Levine v. Central Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1551* (11th Cir.). Without showing a clear connection between the alleged tie and an actual injury, plaintiffs cannot withstand summary judgment.

> We simply hold that a plaintiff may not proceed to trial simply because it presents some evidence that the defendant is engaged in tying and some evidence that some injury is occurring. A plaintiff must link the two showings with a theory of causation that is both plausible and cognizable by the antitrust laws.

Town Sound Custom Tops, Inc., 959 F.2d 468, 486-87 (3rd Cir. 1992).

Plaintiffs present no evidence of failure of the market. The report by their expert, Dr. Seaman, presents no factual findings regarding **[**55]** the industry at issue, the market definition, or the causal relationship between the alleged conduct and the alleged injury. Dr. Seaman merely concludes that "This unique near absence of ISO's from automotive equipment servicing is consistent with plaintiff's arguments in this case that the behavior of the defendants has had the effect of excluding competitors . . . ." [19] But the absence of ISOs may also be consistent with legal, procompetitive behavior. *See e.g.*, George Vetter, *Vertical Restraints Post Kodak* 43 R.I. B.J. 7 (1994)("vertical restraints may actually enhance competition, particularly among interbrand competitors"). Dr. Seaman merely assumes the cause-and-effect relationship, rather than substantiates it. His testimony is ambiguous. Consequently, the plaintiffs cannot defeat summary judgment. *See, e.g., Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* ("***Antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case.").

---

[18] As stated in the facts section of this opinion, Bear and ATP's hourly rate for service was $ 85 from 1989 until 1996; it went to $ 90 in 1997. In comparison, plaintiffs' hourly rate from 1989 to 1993 was $ 75; it went up $ 5 in 1994 and again in 1995 to equal to Defendants' pre-1997 rate of $ 85 per hour.

[19] *Seaman Report* at P 19 (emphasis added).

[56] 5. Amount of interstate commerce.** The fifth requirement for a tying arrangement is that a "not insubstantial" amount of interstate commerce be involved. The defendants **[*1363]** concede that this element has been met.

Because the plaintiffs cannot establish three out of the five essential elements of an illegal tying claim, the defendants are entitled to summary judgment on the *section 1* claim. *See* *Retina Assoc., P.A. v. Southern Baptist Hosp., 105 F.3d 1376, 1385 (11th Cir. 1997)*.

B. THE MONOPOLY AND ATTEMPTED MONOPOLY CLAIMS.

The amended complaint alleges two claims under *section 2* of the Sherman Act: a monopolization claim and an attempt to monopolize claim. ***HN16***[] Monopolization is "the use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *Kodak, 504 U.S. at 482-83, 112 S. Ct. at 2090* (quoting *United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 945, 92 L. Ed. 1236 (1948)*. ***HN17***[] A *section 2* monopolization claim has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of **[**57]** a superior product, business acumen, or historic accident." *Eastman Kodak, 504 U.S. at 481, 112 S. Ct. at 2089* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966))*. A *section 2* claim requires a greater market share for a finding of market power than a *section 1* claim. *PSI, 104 F.3d at 821*; *see* *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*(87 percent share of relevant market constitutes a monopoly). A defendant can escape *section 2* liability if the defendant's actions can be explained by legitimate business justifications. *See* *Eastman Kodak, 504 U.S. at 483, n. 32, 112 S. Ct. at 2091, n. 32*; *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 627, 73 S. Ct. 872, 890, 97 L. Ed. 1277 (1953)*. As this Court found previously, in its *section 1* analysis, the plaintiffs have not shown that the defendants possess market power in the primary equipment market. The plaintiffs therefore cannot prove their *section 2* claim. This Court need not reach the second part of the *section 2* monopoly analysis, that the defendants willfully acquired or maintained an alleged **[**58]** monopoly.

HN18[] To prove an attempt to monopolize claim under *section 2*, a plaintiff must show that (1) the defendant engaged in predatory or anticompetitive conduct, (2) the defendant had the specific intent to monopolize, and (3) there was a dangerous probability that the defendant might achieved monopoly power. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 890-91, 122 L. Ed. 2d 247 (1993)*; *Technical Resource Servs., Inc., 134 F.3d 1458 at 1466*; *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 993 (11th Cir.1993)*. Proof of a dangerous probability of successful monopolization necessarily involves a determination of the relevant market and the defendant's power in that market. *Spectrum Sports, 506 U.S. at 459, 113 S. Ct. at 892* ("demonstrating the dangerous probability of monopolization in an attempt case also requires inquiry into the relevant product and geographical market and the defendants' economic power in that market"; *see also* *U.S. Anchor Mfg., 7 F.3d at 994*; *T. Harris Young & Assocs. v. Marquette Electronics, 931 F.2d 816, 823 (11th Cir. 1991)*. In this case the relevant market is the primary equipment market. Nowhere do the plaintiffs **[**59]** allege, nor does the evidence show, that the defendants engaged in predatory or anticompetitive conduct in the primary equipment market. Consequently, this claim must also fail. *See* *PSI, 104 F.3d at 821-22*. Defendants are entitled to summary judgment on the *section 2* claims.

VII. COUNTS XI AND XII

Metzler and Allstate's have also plead state-law claims for tortious interference with a business relationship based on the exact same conduct underlying the antitrust claims. ***HN19***[] The elements of a claim for tortious interference with a business relationship under Florida law are: (1) the existence of a business relationship; (2) defendant's knowledge of that relationship; (3) an intentional and unjustified interference with the relationship by the defendant; and (4) damage to the plaintiff. *Pyles v. United Airlines, Inc., 79 F.3d 1046, 1049 (11th Cir. 1996)*;

[*1364] *Tamiami Trail Tours, Inc. v. Cotton, 463 So. 2d 1126 (Fla. 1985)*. A plaintiff must prove each element to recover for tortious interference. *See Pyles, 79 F.3d at 1049*.

HN20[] Lawful competitive practices are privileged under Florida tortious interference law. *Wackenhut Corp. v. Maimone, 389 So. 2d 656, 658 (Fla. 4th DCA **[**60]** 1980)*. As long as no improper means are employed, business activities taken to safeguard or promote one's own financial interests are not actionable. *Ethyl Corp. v. Balter, 386 So. 2d 1220, 1225 (Fla. 3d DCA 1980)*; *accord Perez v. Rivero, 534 So. 2d 914, 916 (Fla. 3d DCA 1988)*.

This Court has held that the defendants' conduct was not illegal under the antitrust laws. Plaintiffs have set forth no facts showing any other independent basis for finding the defendants' acts wrongful or tortious under state law. If the defendants' conduct is not wrongful or illegal, it is justified. Plaintiffs therefore cannot prove the third element of its claim - intentional and unjustified interference with a relationship by the defendant. Admittedly some conduct not in violation of the antitrust laws may constitute tortious interference. But where the tort is grounded on precisely the same "anticompetitive" behavior alleged in the failed antitrust claim, it cannot as a matter of law constitute tortious interference with a business relationship. *Ocean State Physicians Health Plan, Inc. v. Blue Cross & Blue Shield of Rhode Island, 883 F.2d 1101, 1114 (1st Cir. 1989)*(***antitrust law*** provides best **[**61]** barometer of whether alleged anticompetitive behavior can be found "wrongful" and hence tortious under state law); *Maxim Integrated Prods., Inc. v. Analog Devices, Inc., 1994 WL 514024 (N.D. Calif. 1994)*(where alleged interference involves same conduct as the antitrust violations, plaintiff's inability to raise a genuine issue on its antitrust claims dooms its state law interference claim); *Aviani v. Sisters of St. Mary, 1987 U.S. Dist. LEXIS 9824, 1987 WL 18934 (N.D. Ill. 1987)*(summary judgment granted in favor of defendant on tortious interference claim where tort was based on conduct found to be not an illegal restraint of trade). *See also* *Los Angeles Land Co. v. Brunswick Corp., 6 F.3d 1422 (9th Cir. 1993)*(defendant's conduct that did not violate the antitrust laws was privileged competition which could not give rise to tortious interference claim). Consequently, the defendants are entitled to summary judgment on Counts XI and XII.

VIII. CONCLUSION

The plaintiffs' claims are insufficient to support a finding of illegal tying or monopoly. The evidence, construed in the light most favorable to the plaintiffs, shows that the defendants refused to sell parts to ISOs, tied the sale of some **[**62]** internal parts to service, and that some internal parts are available only from the defendants. But where, as here, the defendant lacks market power in the primary equipment market, there must be a showing of a restrictive change in policy or other coercive practice that enabled the manufacturer to exploit customers by charging supracompetitive prices. One reason for this result is that manufacturers of technical durable goods typically service a monopoly-like share of the installed parts to their own equipment. Published estimates show that 84 percent of mini-computers, 80 percent of ultrasound equipment, 90 percent of MRIs, and 70 percent of CT scanners are serviced by the manufacturer. Daniel M. Wall, *Aftermarket Monopoly Five Years After Kodak*, 11 Antitrust 32 (Summer 1997). Moreover, such manufacturers typically "monopolize" at least some of the parts to their equipment.

[This type of Monopoly] is an almost inevitable by-product of innovation or attempts to create product differentiation; some key components will have been specifically engineered, may be protected by intellectual property rights, and are therefore not produced by anyone else. The typical manufacturer will **[**63]** have not just one, but two or more (maybe dozens, if many parts are unique) "aftermarket monopolies."

Id. at 32-33.

In the aftermath of *Kodak*, courts and commentators alike have focused on the significance of Kodak's change in policy which enabled Kodak to coerce existing customers into paying service prices that were higher than reasonably anticipated at the time of contracting. They have noted that customers are entitled to the benefit of their reasonably anticipated bargain. A mid-stream policy **[*1365]** change is an opportunistic act. In this case, however, there was no mid-stream change in policy. The defendants' longstanding business practices are "common knowledge." Plaintiffs have failed to show that the defendants engaged in the type of blatant opportunism found in

Kodak. Furthermore, there is no evidence to support a finding that the defendants charged supracompetitive or even higher-than-anticipated prices. Higher-than-anticipated prices is a critical missing element. *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 1740 at 168 (1996)(if defendant lacks market power in the primary market, to survive summary judgment, plaintiff must show that price of **[**64]** defendants' entire package was noncompetitive); *See also* *Digital, 73 F.3d at 761*; *Kypta, 671 F.2d at 1286* (same). Although market imperfections exist, they are not the type that are of concern to antitrust laws. Accordingly, it is hereby

ORDERED AND ADJUDGED that summary judgment is granted in favor of the defendants on the antitrust counts and the tortious interference claims that are based on the conduct underlying the antitrust claims. [20]

DONE AND ORDERED in Chambers at Miami, Florida, this 1 day of Sept., 1998.

HN6[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

Cal. Bus. & Prof. Code § 16727 provides that a sale or contract for sale of goods, merchandise, machinery, supplies, commodities is unlawful when conditioned on the agreement that the purchaser shall not use or deal in the goods, merchandise, machinery, supplies, commodities, or services of a competitor or competitors. The term "services" is used to describe tied items and is not used to describe tying items.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN7[] Private Actions, Remedies

The plaintiff in a Cartwright Act proceeding must show that an antitrust violation was the proximate cause of his injuries. An "antitrust injury" must be proved; that is, the type of injury the antitrust laws were intended to prevent, and which flows from the invidious conduct which renders defendants' acts unlawful.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

Several customers brought an antitrust class action against a cable television supplier, asserting that defendant violated state antitrust laws by illegally tying the sale of satellite channels to the sale of broadcast channels and the sale of premium channels to the sale of both broadcast and satellite channels. The trial court sustained defendant's demurrer to plaintiffs' complaint and denied plaintiffs leave to amend, finding that plaintiffs failed to state a claim under either *Bus. & Prof. Code, § 16720*, or *Bus. & Prof. Code, § 16727*, of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*). The court entered judgment against plaintiffs. (Superior Court of Marin County, No. 161687, Peter Allen Smith, Judge. [+])

The Court of Appeal affirmed the judgment. The court held that the trial court properly found that plaintiffs failed to state a claim under *Bus. & Prof. Code, § 16720*, of the Cartwright Act, since plaintiffs failed to plead the requisite tied product market foreclosure. Plaintiff failed to identify any facts to show that defendant had any competitors in the tied product market for local broadcast television, and alleged that the tied product was available for free over the airwaves, which established that the challenged practice had no effect on competition. Moreover, the trial court did not abuse its discretion by denying plaintiffs leave to amend to clarify and/or refine their tied product market definition, since plaintiffs failed to establish a reasonable possibility that the defect in their pleadings was curable. The court further held that the trial court properly found that plaintiffs failed to state a claim under *Bus. & Prof. Code, § 16727*, of the act, since that statute does not apply when the tying item is a service, and cable television is a service. The court also held that the trial court's finding that plaintiffs alleged no facts to show an injury from restraints on competition was an appropriate alternate ground for sustaining defendant's demurrer to both of plaintiffs' Cartwright Act claims. (Opinion by Haerle, J., with Kline, P. J., and Lambden, J., concurring.)

Headnotes

[+] Retired judge of the Marin Superior Court, assigned by the Chief Justice pursuant to *article VI, section 6 of the California Constitution*.

CA(1)[] **(1)**

Appellate Review § 128—Scope of Review—Function of Appellate Court—Rulings on Demurrers.

--When reviewing a judgment based on an order sustaining a demurrer without leave to amend, the court accepts as accurate the factual allegations of the appellant's complaint. If the complaint states a cause of action, the judgment must be reversed.

CA(2)[] **(2)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Scope of Act.

--The Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) prohibits combinations in restraint of trade. Although the statutory language is all-encompassing, the courts have limited the act's reach to unreasonable restraints. Certain restraints that lack redeeming virtue are conclusively presumed to be unreasonable and illegal.

CA(3)[] **(3)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—General Principles.

--A tying arrangement is a requirement that a buyer purchase one product or service as a condition of the purchase of another. Traditionally, the product that is the inducement for the arrangement is called the "tying product," and the product or service that the buyer is required to purchase is called the "tied product." A tying arrangement may be condemned under either or both *Bus. & Prof. Code, §§ 16720* and *16727*, of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*).

CA(4)[] **(4)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—Requirements for Per Se Illegality.

--The elements of a per se tying arrangement violative of *Bus. & Prof. Code, § 16720*, of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), include: (1) a tying agreement, arrangement or condition existed whereby the sale of the tying product was linked to the sale of the tied product or service; (2) the party had sufficient economic power in the tying market to coerce the purchase of the tied product; (3) a substantial amount of sale was affected in the tied product; and (4) the complaining party sustained pecuniary loss as a consequence of the unlawful act. Under *Bus. & Prof. Code, § 16727*, of the act, a per se violation is established if either element (2) or (3) is established along with elements (1) and (4).

CA(5a)[] **(5a)** *CA(5b)*[] **(5b)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements—Requirements for Per Se Illegality—Adverse Impact on Competition in Tied Product Market—Cable Television.

--In an antitrust class action brought against a cable television supplier by several customers, asserting that defendant violated state antitrust laws by illegally tying the sale of satellite channels to the sale of broadcast channels and the sale of premium channels to the sale of both broadcast and satellite channels, the trial court properly found that plaintiffs failed to state a claim under *Bus. & Prof. Code, § 16720*, of the Cartwright Act (*Bus. &

Prof. Code, § 16700 et seq.). Plaintiffs were required to allege facts showing that a total amount of business, substantial enough in terms of dollar volume so as not to be merely de minimis, was foreclosed to competitors by the tie. However, they failed to plead the requisite tied product market foreclosure by failing to identify any facts to show that defendant had any competitors in the tied product market for local broadcast television, and by alleging that the tied product was available for free over the airwaves, which established that the challenged practice had no effect on competition. Moreover, the trial court did not abuse its discretion in sustaining defendant's demurrer to plaintiffs' complaint and by denying plaintiffs leave to amend to clarify or refine their tied product market definition, since plaintiffs failed to establish a reasonable possibility that the defect in their pleadings was curable.

[See 1 Witkin, Summary of Cal. Law (9th ed. 1987) Contracts, § 589.]

CA(6)[] **(6)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements—Requirements for Per Se Illegality—Adverse Impact on Competition in Tied Product Market.

--When a purchaser is forced to buy a product that he or she would not have otherwise bought even from another seller in the tied product market, there can be no adverse impact on competition because no portion of the market that would otherwise have been available to other sellers has been foreclosed. When all buyers are forced to take a tied product they do not want and would not have purchased elsewhere, tied market foreclosure is zero and thus does not satisfy even the minimal requirements for per se illegality.

CA(7)[] **(7)**

Appellate Review § 128—Scope of Review—Function of Appellate Court—Rulings on Demurrers—Demurrer Sustained Without Leave to Amend—Determination Whether Defect Can Be Cured by Amendment.

--When a demurrer is sustained without leave to amend, the court decides whether there is a reasonable possibility that the defect can be cured by amendment. If it can be, the trial court has abused its discretion, and the appellate court reverses; if not, there has been no abuse of discretion, and the reviewing court affirms. The burden of proving such reasonable possibility is squarely on the plaintiff.

CA(8)[] **(8)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements—Per Se Illegality—When Tying Product Is a Service—Cable Television.

--In an antitrust class action brought against a cable television supplier by several customers, asserting that defendant violated state antitrust laws by illegally tying the sale of satellite channels to the sale of broadcast channels and the sale of premium channels to the sale of both broadcast and satellite channels, the trial court properly found that plaintiffs failed to state a claim under Bus. & Prof. Code, § 16727, of the Cartwright Act (Bus. & Prof. Code, § 16700 et seq.). Section 16727 does not apply when the tying item is a service. In this case, the alleged tying product, cable television, was a service and not a commodity; thus the statute did not apply.

CA(9)[] **(9)**

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Tying Arrangements—Claim of Injury From Restraints on Competition—Cable Television.

--In an antitrust class action brought against a cable television supplier by several customers, asserting that defendant violated state antitrust laws by illegally tying the sale of satellite channels to the sale of broadcast channels and the sale of premium channels to the sale of both broadcast and satellite channels, the trial court's finding that plaintiffs alleged no facts to show an injury from restraints on competition was an appropriate alternate ground for sustaining defendant's demurrer to plaintiffs' claims under *Bus. & Prof. Code, §§ 16720* and *16727*, of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*). The plaintiff in a Cartwright Act proceeding must show that an antitrust violation was the proximate cause of his or her injuries. An antitrust injury must be proved, that is, the type of injury the antitrust laws were intended to prevent, and that flows from the invidious conduct rendering the defendant's acts unlawful. In this case, plaintiffs failed to allege antitrust injury because they failed to allege any facts showing that they suffered an injury that was caused by restraints on competition. In light of plaintiffs' concession that local broadcast television was transmitted over the airwaves free of charge, the real injury about which plaintiffs complained was that defendant had inflated its cable rates by requiring that customers pay a fee for broadcast television even though broadcast television was available to other consumers for free. This practice did not constitute an anticompetitive tying arrangement.

Opinion

[*538] [135] HAERLE, J.**

I. INTRODUCTION

This is the second appeal in this antitrust action against Viacom, Inc., a supplier of cable television, by several of Viacom's customers. In the first appeal, we held that the superior court erroneously sustained a demurrer to appellants' complaint because the antitrust claims alleged therein were only partially preempted by federal law regulating the cable industry. (*Morrison v. Viacom, Inc. (1997) 52 Cal. App. 4th 1514 [61 Cal. Rptr. 2d 544]* (*Morrison I*).)

After our ruling in *Morrison I*, the superior **[***2]** court sustained Viacom's motion for judgment on the pleadings on the ground appellants' original complaint, filed September 22, 1994, failed to allege a cause of action under the Cartwright Act. Thereafter, the trial court sustained a demurrer to the first amended complaint, filed August 29, 1997, on the same ground. In this appeal, appellants contend they have alleged sufficient facts to support their claim that Viacom's business practices constitute illegal tying, a per se violation of both *section 16720* and *16727* of the Cartwright Act. (*Bus. & Prof. Code, § 16720*, *16727*.) Alternatively, appellants argue the trial court abused its discretion by denying them leave to amend. We affirm.

II. FACTS AND PROCEDURAL BACKGROUND

The first amended complaint alleges that appellants represent a class consisting of persons living in Marin, San Francisco and several East Bay communities who have purchased cable television from Viacom during the four-year period prior to the filing of the original complaint. Appellants contend Viacom has compelled members of the alleged class to participate in an illegal tying arrangement which has restrained trade "in the market for providing local broadcast **[***3]** television."

[*539] The "arrangement" appellants challenge is Viacom's organization of the cable channels it sells to its customers into three categories and its requirement that customers pay for certain categories to obtain access to others. According to appellants, Viacom has divided the channels into the following three categories: (1) broadcast channels, consisting of local television channels concurrently available over the noncable airwaves without charge, such as KGO, KPIX and KRON; (2) satellite cable channels, consisting of geographically remote broadcast television channels and nonbroadcast channels such as CNN and ESPN; and (3) premium channels, consisting of nonbroadcast channels such as HBO and Showtime.

The first amended complaint alleges that Viacom requires that a customer must purchase broadcast channels as a prerequisite for purchasing satellite cable channels and that he or she must purchase both broadcast channels and satellite cable channels in order to purchase premium channels. According to appellants these alleged requirements constitute a per se illegal tying arrangement; they claim Viacom has violated our state antitrust laws by illegally tying the **[***4]** sale of satellite channels to the sale of broadcast channels and the sale of premium channels to the sale of both broadcast and satellite channels. [1]

Appellants allege that they are unwilling coconspirators "coerced" by Viacom to participate in its illegal conspiracy to "boycott competing sources of television channels and to refuse to do business with entities providing other access to television channels." They claim they have suffered damage from the conspiracy because they were forced to purchase broadcast channels from Viacom even though (1) broadcast channels were "readily available **[***5]** . . . without charge over the airwaves," and (2) airwave reception of the broadcast channels interfered with cable reception of the broadcast channels and produced "multiple, 'ghost' images and otherwise **[**136]** impaired the reception of the broadcast channels."

The first amended complaint alleges that, if not for Viacom's tying arrangement, appellants would not have purchased broadcast channels from Viacom or any other cable company and that "[b]ut for the illegal tying arrangement alleged herein, [appellants] would have purchased television reception equipment and secured their television channels from competitors of [Viacom] thereby saving money."

[*540] On December 1, 1997, the superior court sustained Viacom's demurrer to the first amended complaint and denied appellants leave to amend. The basis for the lower court's order is readily discernible from the detailed tentative rulings it issued in this case. The court reasoned that appellants failed to state a claim under section 16727 of the Cartwright Act (Bus. & Prof. Code, § 16727 (hereafter § 16727)) because that provision does not apply when the alleged "tying" item is a service. Nor did appellants allege sufficient **[***6]** facts to constitute a violation of section 16720 of the Cartwright Act (Bus. & Prof. Code, § 16720 (hereafter § 16720)) because they failed to allege an adverse impact on competition in the tied product market or injury resulting from a restraint on competition in that market.

Judgment was entered on January 2, 1998, and, on January 30, 1998, appellants filed this timely appeal.

III. DISCUSSION

Appellants contend they have adequately alleged facts to show that Viacom's tiering practice is a tying arrangement which constitutes a per se violation of sections 16720 and 16727. **CA(1)**[] **(1)** **HN1**[] "When reviewing a judgment based on an order sustaining a demurrer without leave to amend, we accept as accurate the factual allegations of appellants' complaint. [Citation.] If the complaint states a cause of action, the judgment must be reversed. [Citation.]" (*Morrison I, supra*, 52 Cal. App. 4th at p. 1519.)

A. *Tying May Constitute a Per Se Violation of the Cartwright Act*

CA(2)[] **(2)** The Cartwright Act prohibits combinations in restraint of trade. *(* Bert G. Gianelli Distributing Co. v. Beck & Co. (1985) 172 Cal. App. 3d 1020, 1042 [219 Cal. Rptr. 203]; Suburban Mobile Homes, Inc. v. AMFAC Communities, **[***7]** Inc. (1980) 101 Cal. App. 3d 532, 541 [161 Cal. Rptr. 811] (*Suburban Mobile Homes*.)

[1] Appellants further allege that, to the extent Viacom's business practices violate the Cartwright Act, they also constitute unfair business practices within the meaning of section 17200 of the Business and Professions Code (hereafter section 17200.) We need not separately address the section 17200 claim as its validity depends on whether appellants have adequately alleged a cause of action under the Cartwright Act.

Although the statutory language is all-encompassing, the courts have limited the Cartwright Act's reach to unreasonable restraints. Certain restraints which lack redeeming virtue are conclusively presumed to be unreasonable and illegal. Under certain conditions, which appellants have attempted to allege, tying constitutes such a per se illegal practice. (*Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal. 3d 842, 853 [94 Cal. Rptr. 785, 484 P.2d 953]*; *Suburban Mobile Homes, supra, 101 Cal. App. 3d at pp. 541-542*.)

CA(3)[] **(3)** ***HN2***[] A tying arrangement is "a requirement that a buyer purchase one product or service as a condition of the purchase of another. [Citation.] Traditionally the product which is the inducement for the arrangement is **[*541]** called the 'tying product' and the product or service that the buyer is required to purchase is the 'tied product.' " (*Classen v. Weller (1983) 145 Cal. App. 3d 27, 36 [192 Cal. Rptr. 914]*.) A tying arrangement may be condemned under either or both section 16720 and section 16727.

HN3[] Section 16720 defines a trust as "a combination **[***8]** of capital, skill or acts by two or more persons" for the purpose of restraining trade. Except as expressly provided in the Cartwright Act, "every trust is unlawful, against public policy and void." (*Bus. & Prof. Code, § 16726*.) Federal law interpreting Sherman Antitrust Act *section 1* (*15 U.S.C. § 1*) is useful when addressing issues arising under section 16720. (*State of California ex rel. Van de Kamp v. Texaco, Inc. (1988) 46 Cal. 3d 1147, 1164 [252 Cal. Rptr. 221, 762 P.2d 385]*, superseded by statute on other grounds as stated in *Stop Youth Addiction, Inc*. v. *Lucky Stores, Inc*. *(1998) 17 Cal. 4th 553, 570 [71 Cal. Rptr. 2d 731, 950 P.2d 1086]*; *Biljac Associates v. First Interstate* ***[**137]*** *Bank (1990) 218 Cal. App. 3d 1410, 1420-1421 [267 Cal. Rptr. 819]*.) [2]

[*9]** Section 16727 provides that it is unlawful for any person to sell or contract "***HN4***[] for the sale of goods, merchandise, machinery, supplies, commodities . . . on the condition, agreement or understanding that the . . . purchaser thereof shall not use or deal in the goods, merchandise, machinery, supplies, commodities, or services of a competitor or competitors of the . . . seller, where the effect . . . may be to substantially lessen competition or tend to create a monopoly in any line of trade or commerce in any section of the State." Section 16727, added to the Cartwright Act in 1961, was patterned after section 3 of the federal Clayton Act, and cases interpreting Clayton Act section 3 are applicable when construing section 16727. (*Corwin v. Los Angeles Newspaper Service Bureau, Inc*., *supra*, 4 Cal. 3d at pp. 852-853; *Chicago Title Ins. Co. v. Great Western Financial Corp. (1968) 69 Cal. 2d 305, 315 [70 Cal. Rptr. 849, 444 P.2d 481]*; *Bert G. Gianelli Distributing Co. v. Beck & Co*., *supra*, 172 Cal. App. 3d at p. 1050.)

CA(4)[] **(4)** The elements of a per se tying arrangement violative of *section 16720* are: ***HN5***[] "(1) a tying agreement, arrangement or condition existed whereby **[*542]** **[***10]** the sale of the tying product was linked to the sale of the tied product or service; (2) the party had sufficient economic power in the tying market to coerce the purchase of the tied product; (3) a substantial amount of sale was affected in the tied product; and (4) the complaining party sustained pecuniary loss as a consequence of the unlawful act. [Citations.]" (*Classen v. Weller, supra, 145 Cal. App. 3d at pp. 37-38*; see also *MacManus v. A.E. Realty Partners (1983) 146 Cal. App. 3d 275, 286 [194 Cal. Rptr. 567]*; cf. *Corwin v. Los Angeles Newspaper Service Bureau, Inc*., *supra*, 4 Cal. 3d at pp. 856-857; see generally, Fontana & Hunsader, *Application of the California Cartwright Act to Vertical Restraints* (PLI 1989) 659 Corp. 655.)

---

[2] Many cases state that section 16720 was patterned after *section 1* of the Sherman Act and that federal law construing *section 1* is applicable to resolve problems arising under section 16720. (See, e.g., *Corwin v. Los Angeles Newspaper Service Bureau, Inc*., *supra*, 4 Cal. 3d at p. 852*; Marin County Bd. of Realtors, Inc. v. Palsson (1976) 16 Cal. 3d 920, 925 [130 Cal. Rptr. 1, 549 P.2d 833]* (*Palsson*); *Bert G. Gianelli Distributing Co. v. Beck & Co., supra*, 172 Cal. App. 3d at p. 1042*; Suburban Mobile Homes*, *supra*, 101 Cal. App. 3d at p. 540.) However, in *State of California ex rel. Van de Kamp v. Texaco, Inc., supra, 46 Cal. 3d at page 1168*, our Supreme Court stated that "the Sherman Act is not, contrary to our past statements, directly probative on interpretation of the Cartwright Act." Though not always directly probative of the Cartwright Act drafters' intent, judicial interpretations of the Sherman Act are, nevertheless, often helpful because of the similarity in language and purpose between the federal and state statutes. (*Id. at p. 1164; Biljac Associates v. First Interstate Bank*, *supra*, *218 Cal. App. 3d at pp. 1420-1421*.)

Under section 16727, a per se violation is established if *either* element (2) or (3) is established along with elements (1) and (4). (*Classen v. Weller, supra, 145 Cal. App. 3d at p. 37*; *Suburban Mobile Homes*, *supra*, 101 Cal. App. 3d at pp. 549-550; see also *People v. National Association of Realtors (1984) 155 Cal. App. 3d 578, 583 [202 Cal. Rptr. 243]*.)

B. *Appellants Have Not Alleged a Violation* **[***11]** *of Section 16720*

CA(5a)[] **(5a)** The trial court found the amended complaint does not sufficiently allege element (3) set forth above, i.e., that a substantial amount of sale was affected in the tied product for local broadcast television. To plead this element, appellants must allege facts to show that " 'a total amount of business, substantial enough in terms of dollar-volume so as not to be merely *de minimis*, is foreclosed to competitors by the tie.' " (*Corwin v. Los Angeles Newspaper Service Bureau, Inc., supra, 4 Cal. 3d at pp. 856-857*; *Kim v. Servosnax, Inc. (1992) 10 Cal. App. 4th 1346, 1361 [13 Cal. Rptr. 2d 422]*.)

The amended complaint alleges that "[i]n each and every market that Defendants did business, Defendants were the dominant if not sole provider of satellite television such **[**138]** that Defendant [*sic*] had sufficient economic power to impose an appreciable restraint on free competition in the market for local broadcast television." However, appellants failed to allege any facts which, if proven, would establish that there was any actual effect on competition *in the tied product market for local broadcast television*. Indeed, the facts appellants *do* **[***12]** allege are inconsistent with establishing there was any such effect. [3]

[*13] [*543]** Appellants define the tied product (broadcast television) as "local broadcast television channels which were concurrently available to Plaintiff without charge over the airwaves." They contend Viacom compelled them to purchase the tied product "even though Plaintiff neither needed nor desired to purchase from Defendants or any other cable company, that which is readily available to plaintiff without charge over the air waves."

Appellants have failed to plead the requisite tied product market foreclosure because they do not allege that plaintiffs would have purchased the broadcast channels from someone else if not forced to buy them from Viacom. Indeed, appellants have not even alleged sufficient facts to show that Viacom has competitors in the tied product market. A transaction cannot restrain trade when no competitor exists from whom to purchase the tied product. (See *MDC Data Centers, Inc. v. International Bus. Mach. Corp. (E.D.Pa. 1972) 342 F. Supp. 502, 505*.)

---

[3] At oral argument, appellants' counsel argued for the first time during this appeal that there are two tied product markets in this case, i.e., that "cable programming" is the tied product with respect to some of the activities challenged in the first amended complaint.

As we have noted, the first amended complaint does allege that Viacom customers are required to purchase satellite cable channels in order to purchase premium channels. However, appellants have clearly failed to allege sufficient facts to support a claim that Viacom illegally ties their premium cable service to their satellite cable service. Not only have appellants failed to allege injury to competition in the satellite cable market or damage to them resulting from such an injury, they have not even alleged facts to establish that satellite channels and premium channels constitute distinct product markets.

The first amended complaint also alleges that, at some unspecified time in the past, Viacom required that customers purchase satellite cable channels in order to purchase broadcast channels, but that Viacom discontinued this practice "[a]t some time prior to the initiation of this action." Since this alleged practice was not at issue in the lower court and is never even mentioned in the appellate briefs, we assumed that appellants had abandoned any plan they may have had to use this alleged business practice as a basis of an antitrust claim against Viacom. However, in light of appellants' counsel's reference at oral argument to a tied product market consisting of cable programming, we note just a few reasons why allegations regarding Viacom's former practice of requiring customers to purchase broadcast channels in order to purchase satellite channels do not state an antitrust cause of action: (1) the first amended complaint does not allege that Viacom engaged in this practice during the four-year period prior to the filing of the original complaint in this action; (2) there is no allegation that this alleged practice restrained trade in the market for satellite cable channels; (3) appellants have not alleged any injury resulting from restraint on competition in the market for satellite cable television; (4) there is no allegation that Viacom has or had sufficient market power in the broadcast television market to coerce a sale in the satellite cable market. (Indeed, with respect to this last point, appellants implicitly concede they were not coerced to purchase satellite channels in order to obtain broadcast channels by admitting that broadcast channels are transmitted over the airwaves free of charge.)

More devastating to their case is appellants' concession in their pleading that, if not for Viacom's business practice, plaintiffs would not buy broadcast channels at all because they are available for **[***14]** free over the airwaves. This concession establishes that the challenged practice has no effect on competition in the tied product market. ***CA(6)***[ ] **(6)** The United States Supreme Court articulated the applicable rule in *Jefferson Parish Hospital Dist. No. 2 v. Hyde (1984) 466 U.S. 2, 16 [104 S. Ct. 1551, 1560, 80 L. Ed. 2d 2]*. The court stated: "[W]hen a purchaser is 'forced' to buy a product he would not **[*544]** have otherwise bought even from another seller in the tied-product market, there can be no adverse impact on competition because no portion of the market which would otherwise have been available to other sellers has been foreclosed." (*Ibid*.) Phillip Areeda explains the rule this way: "When all buyers are forced to take a tied product they do not want and would not have purchased elsewhere, tied-market foreclosure is zero **[**139]** and thus does not satisfy even the minimal requirements for per se illegality." (10 Areeda et al., ***Antitrust Law*** (1996) P 1769e1, pp. 439-440.)

Perhaps as an attempt to counteract the effect of their concession, appellants attempted, in their first amended complaint, to shift the focus of this case from broadcast channels themselves to the means by **[***15]** which those channels are transmitted to customers. They added to the most recent version of their complaint allegations that Viacom coerced consumers into "joining an illegal conspiracy to boycott competing sources of television channels and to refuse to do business with entities providing other access to television channels" and that, "[b]ut for the illegal tying arrangement alleged herein, Plaintiffs would have purchased television reception equipment and secured their television channels from competitors of Defendants thereby saving money." Apparently, appellants intended for these additional allegations to show there are other entities that compete with Viacom to provide consumers access to broadcast television. The only competitors alluded to in the amended complaint are suppliers of television reception equipment, i.e., television antennae.

The trial court found that the amended complaint fails to allege facts to show that cable television services are in the same market with television antennae. In this court, appellants maintain that the tied product market is not the cable television services market but rather the market for "providing local broadcast television programming" **[***16]** and that suppliers of television antennae and others are in that market.

There are at least two problems with appellants' argument. First, the first amended complaint does not allege any facts to show that there are any competitors in appellants' proposed alternative tied product market for providing local broadcast television. Sellers of "television reception equipment" do not provide television. They supply a product which surely may help improve the *quality* of television reception, but antennae purchased by consumers to improve reception do not, by definition, transmit or supply broadcast television to customers.

Second, and more fundamentally, appellants' proposed alternative characterization of the tied product market is inconsistent with the basic premise of **[*545]** this lawsuit, i.e., that Viacom makes its customers *purchase the broadcast channels* themselves in order to receive satellite and premium channels. The alleged tying arrangement does not involve the tangible equipment or means that Viacom uses to physically transmit cable to its customers. The amended complaint contains no allegation or suggestion that Viacom requires its customers to purchase different **[***17]** equipment to access each tier of service. Rather, the implicit message of appellants' complaint is that it is unfair for Viacom to require customers who have paid for Viacom's cable equipment to be required to pay for certain programs before they can watch other programs. Since the alleged tying arrangement pertains to the pricing and access requirements of Viacom's tiered programming, and not to the tangible means Viacom uses to deliver those programs to customers, the tied product market must be broadcast television itself and not the physical method by which broadcast television (as well as satellite and premium channels) are delivered.

The amended complaint does not allege that anyone else aside from Viacom *sells* broadcast channels to consumers (i.e., as distinguished from providing them for free over the airwaves). As discussed above, television antenna suppliers do not compete in the tied product market since they do not sell broadcast channels. The only other potential competitors appellants identify in their appellate briefs are microwave systems and satellite systems. But appellants do not allege that suppliers of these systems offer broadcast television as a distinct **[***18]** service. Further, appellants have not and cannot seriously contend that any Viacom customer would also purchase a microwave or satellite system in order to obtain broadcast channels if not required to purchase broadcast channels from Viacom. Microwave and satellite systems may offer consumers a total package alternative to Viacom's comprehensive service, but we have been provided with no information indicating they are or could be **[**140]** competitors in the local broadcast television market.

Appellants contend the trial court abused its discretion by denying them leave to amend to clarify and/or refine their tied product market definition. ***CA(7)***[] **(7)** When a demurrer is "sustained without leave to amend, we decide whether there is a reasonable possibility that the defect can be cured by amendment: if it can be, the trial court has abused its discretion and we reverse; if not, there has been no abuse of discretion and we affirm. [Citations.] The burden of proving such reasonable possibility is squarely on the plaintiff." (*Blank v. Kirwan (1985) 39 Cal. 3d 311, 318 [216 Cal. Rptr. 718, 703 P.2d 58]*.)

CA(5b)[] **(5b)** As the foregoing analysis illustrates, appellants have not established a reasonable possibility **[***19]** that the defect in their pleadings is curable. **[*546]** They have not identified any facts to show that Viacom has any competitors in the tied product market and they continue to allege that the tied product is available for free. Under these circumstances, Viacom's conduct could not have foreclosed competition in the tied product market. Therefore, the superior court did not abuse its discretion by denying appellants leave to again amend.

C. *Appellants Have Not Alleged a Violation of Section 16727*

CA(8)[] **(8)** The trial court sustained the demurrer with respect to appellants' *section 16727* claim on the ground that that section does not apply when the tying item is a service. The complaint alleges that the tying item is satellite and/or premium channels; that, in order to obtain satellite and or premium cable channels, Viacom coerces customers to purchase broadcast channels. Appellants contend the trial court's ruling was erroneous; that *section 16727* does apply when the tying item is a service.

Appellants ignore the language of *section 16727*, which supports the trial court's ***HN6***[] conclusion. The statute provides that a sale or contract for sale of "*goods, merchandise, machinery, supplies,* **[***20]** *commodities*" is unlawful when conditioned on the agreement that the purchaser "shall not use or deal in the *goods, merchandise, machinery, supplies, commodities, or services* of a competitor or competitors." The term "services" is used to describe tied items and is not used to describe tying items.

Although we have found no California authority directly on point, this court has stated in dicta that section 16727 does not apply when the tying item is a service. (*Suburban Mobile Homes*, *supra*, 101 Cal. App. 3d at p. 550.) In *Suburban Mobile Homes*, the plaintiff was a mobilehome dealer who alleged that several other dealers and a mobilehome park owner established an illegal tying arrangement by restricting use of a significant portion of the mobilehome park to tenants who bought their mobilehomes from the dealer defendants (who then shared proceeds from those sales with the defendant mobilehome park owner). We held that the trial court erred by granting the defendants' motion for nonsuit with respect to the plaintiff's section 16720 claim but affirmed the nonsuit as to its section 16727 claim.

In *Suburban Mobile Homes*, we recognized that section 16727 is based **[***21]** on section 3 of the Clayton Act and we applied federal law construing that act to hold that section 16727 does not apply when the tying item is land. (*Suburban Mobile Homes*, *supra*, 101 Cal. App. 3d at p. 549.) Specifically, we acknowledged the federal rule that " '[i]f the tie does not involve a commodity but concerns land, services or credit which do not fit the Clayton Act's **[*547]** language, it is governed by the Sherman Act and the plaintiff is required to bear the additional burden of proving that the defendant's economic power with respect to the tying product is sufficient to produce an appreciable restraint.' " (*Id. at p. 550*, quoting *N.W. Controls, Inc. v. Outboard Marine Corporation (D.Del. 1971) 333 F. Supp. 493, 500*, italics omitted.) By finding this rule dispositive, we implicitly acknowledged that (1) section 16727's definition of commodity, like the definition applicable to the Clayton Act, does not include land, *services* or credit, and (2) neither land, *services* nor credit fits section 16727's language describing the tying product.

[141]** Appellants contend that our Supreme Court defined commodity to include services in *Palsson, supra, **[***22]** 16 Cal. 3d 920*. In *Palsson*, the Supreme Court held that a county board of realtors violated section 16720 and 16726 of the Cartwright Act by "limiting its membership to persons primarily engaged in the real estate business and by denying nonmembers access to its multiple listing service." (16 Cal. 3d at p. 924.) In reaching this conclusion, the court rejected the argument that the Cartwright Act is concerned primarily with problems relating to merchandise or commodities and does not apply to services. The court relied heavily on federal law establishing that the Sherman Act applies to activities of real estate brokers. (Id. at pp. 925-927.) The court rejected an inhibiting interpretation of the term "commodity," reasoning that the broad and comprehensive language of section 16720 prohibiting "restrictions in trade or commerce" compelled its application to service industries. (16 Cal. 3d at pp. 927-928.)

As the trial court in the present case recognized, and as we stated in *Suburban Mobile Homes*, in *Palsson* the word "commodity" was interpreted under section 16720, which the *Palsson* court characterized as the equivalent of section 1 of the Sherman Act. (*Palsson,* **[***23]** *supra, 16 Cal. 3d at p. 925*.) The *Palsson* analysis does not apply to section 16727 "which is governed by the Clayton Act and the case interpretation thereunder." (*Suburban Mobile Homes*, *supra*, 101 Cal. App. 3d at p. 550.)

In an apparent attempt to portray the alleged tying item as a commodity, appellants have deleted the term "service" from their amended complaint and characterize the tying product markets as the markets for providing cable television. However, appellants cite no authority (nor have we found any) to support their characterization of cable television as a commodity rather than a service. Indeed, applicable federal authority construing the parallel provision of Clayton Act section 3 establishes that cable television is a service and not a commodity. (*Satellite T Assoc. v. Continental Cablevision of Va. (E.D.Va. 1982) 586 F. Supp. 973, 975-976*; *Rankin Cty. Cablevision v.* **[*548]** *Pearl River Val. Water (S.D.Miss. 1988) 692 F. Supp. 691, 693*; see also *TV Communications Network, Inc. v. ESPN, Inc. (D.Colo. 1991) 767 F. Supp. 1062, 1076* [cable is a service and not a commodity under section 2 of the Clayton Act]; *Gall v. Home Box Office,* **[***24]** *Inc*. (S.D.N.Y. 1992) 1992 WL 230245 [same].)

The foregoing authority confirms the superior court's conclusion that appellants have failed to state a cause of action under section 16727 because the alleged tying product in this case, cable television, is a service and section 16727 does not apply when the tying product is a service.

D. *Appellants Have Failed to Adequately Allege Antitrust Injury*

CA(9)[] **(9)** The trial court found that appellants "have still alleged no facts to show an injury *from restraints on competition*." We conclude this finding was an appropriate alternate ground for sustaining Viacom's demurrer to both of appellants' Cartwright Act claims.

"***HN7***[] The plaintiff in a Cartwright Act proceeding must show that an antitrust violation was the proximate cause of his injuries. [Citation.] . . . An 'antitrust injury' must be proved; that is, the type of injury the antitrust laws were intended to prevent, and which flows from the invidious conduct which renders defendants' acts unlawful. [Citations.]" (*Kolling v. Dow Jones & Co. (1982) 137 Cal. App. 3d 709, 723 [187 Cal. Rptr. 797]*.)

Appellants allege that the fact that they are not competitors of Viacom does **[***25]** not prevent them from establishing antitrust injury. Although we agree (see *Saxer v. Philip Morris, Inc. (1975) 54 Cal. App. 3d 7, 26 [126 Cal. Rptr. 327]*), appellants completely miss the point. Appellants failed to allege antitrust injury not because they are customers rather than competitors of Viacom, but because they have failed to allege any facts to show they suffered an injury which was *caused* by restraints on competition.

The pecuniary injury alleged in the first amended complaint is that appellants were **[**142]** forced to purchase broadcast channels from Viacom even though broadcast channels were "readily available . . . without charge over the airwaves." We have already explained why forcing a consumer to buy something that he or she would not buy elsewhere does not injure competition; if the buyer would not have purchased the tied product elsewhere, the challenged business practice could not have foreclosed competition in the tied product market. For the same reason, the buyer has not suffered antitrust injury. "[S]uch buyers are not injured in fact, for this tie simply increases the effective price of the tying product. If that effective price exceeds the market **[*549]** **[***26]** price, no one would patronize the tying seller; if it does not, the effective price paid the defendant is the market price for his product. Hence, these buyers can claim neither per se illegality nor injury-in-fact." (10 Areeda et al., ***Antitrust Law***, *supra*, P 1769e1, p. 440, fn. omitted.)

In their opening brief to this court, appellants suggest that their injury was not simply paying too high a price for Viacom's cable programming but that they could have actually paid a lower price to obtain local broadcast television programming by alternative means. But, as we have already explained, appellants have not alleged or stated in their briefs any facts to show that there is an alternative means of purchasing local broadcast television. The only allegation bearing on this issue, an allegation we believe is dispositive, is appellants' concession that local broadcast television is transmitted over the airwaves free of charge. In light of this concession, the real injury about which appellants complain is that Viacom has inflated its cable rates by requiring that customers pay a fee for broadcast television even though broadcast television is available to other consumers for free. This **[***27]** practice may implicate rate regulations but it does not constitute an anticompetitive tying arrangement.

IV. DISPOSITION

The judgment is affirmed.

Kline, P. J., and Lambden, J., concurred.

Appellants' petition for review by the Supreme Court was denied November 18, 1998.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN4[] **Standards of Review, De Novo Review**

The circuit court of appeals reviews the grant of a motion for judgment as a matter of law de novo, using the same standard as the district court.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN5[] **Standards of Review, De Novo Review**

The circuit court of appeals reviews the decision to grant judgment as a matter of law de novo, which is appropriate where a party has been fully heard on an issue and there is no legally sufficient evidentiary basis for a reasonable jury to find for that party. *Fed. R. Civ. P. 50(a)(1)*. Although the plaintiff is awarded the benefit of all reasonable inferences, it is not given the benefit of unreasonable inferences or those at war with the undisputed facts. If the record contains no proof beyond speculation to support the verdict, judgment as a matter of law is appropriate.

HN6[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Antitrust Act makes it unlawful to form a conspiracy in restraint of trade. *15 U.S.C.S. § 1*. Restraints which have pernicious effect on competition and lack of any redeeming virtue are illegal per se under *§ 1* without inquiry into the reasonableness of the restraint or the harm caused. Analysis of whether a restriction's harm to competition outweighs any procompetitive effects is necessary if the anticompetitive impact of a restraint is less clear or the restraint is necessary for a product to exist at all. Some trade restrictions by sports leagues fall into this category.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

In order to prevail under 15 U.S.C.S. §, a plaintiff must prove that: (1) there was an agreement among the defendants in restraint of trade; (2) plaintiff was injured as a direct and proximate result; and (3) its damages are capable of ascertainment and not speculative. The first element is established by proof that there was an agreement in restraint of trade and that the challenged action was part of or pursuant to that agreement.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

In order to prove that *15 U.S.C.S. § 1* defendants were acting pursuant to a conspiracy, a plaintiff must present evidence that tends to exclude the possibility that the alleged coconspirators acted independently, because conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Counsel: Counsel who presented argument on behalf of the appellant was Alan Popkin, St. Louis, MO. Additional attorneys appearing on the brief were Arthur L. Smith and Charles S. Kramer.

Counsel who presented argument on behalf of the appellee was Gregg H. Levy, Washington, D.C. Additional attorneys appearing on the brief were: Sonya D. Winner, Frank Rothman, James Keyte, Alan C. Kohn and John A. Klobasa.

Judges: Before WOLLMAN and MURPHY, Circuit Judges, and KYLE, [1] District Judge.

Opinion by: MURPHY

Opinion

[*852] MURPHY, Circuit Judge.

---

[1] The Honorable Richard H. Kyle, United States District Judge for the District of Minnesota, sitting by designation.

After St. Louis lost its professional football team to Phoenix in 1988, extensive efforts began to obtain another team and resulted in the successful relocation of the Los Angeles Rams in 1995. Many millions of dollars were spent in order to accomplish the relocation, and the St. Louis Convention and Visitors Center (CVC) sued the National Football League and twenty four of **[**2]** its member teams (collectively the NFL) alleging that these expenditures were made necessary by actions of the NFL in violation of antitrust and **[*853]** tort law. The case was tried before a jury for over four weeks before it ended in a judgment in favor of the NFL. CVC appeals the dismissal of its claim for Sherman Act conspiracy and tortious interference with contract. The NFL cross appeals the refusal of the district court [2] to rule that the league and the member teams do not amount to a single entity for antitrust purposes. We affirm the judgment.

I.

A.

The move of the St. Louis Cardinals football team to Phoenix in 1988 caused the Missouri state legislature, the city of St. Louis and the surrounding county to undertake to find a replacement by the beginning of the 1995 season. The legislature assigned the effort to procure a team to CVC, a body previously created by **[**3]** the Missouri legislature and empowered to promote the convention and tourism business in St. Louis. *See* Mo. St. Ann. §§ 67.601, 67.607. The initial goal was to obtain one of the two NFL expansion franchises to be established in 1993. In order to attract a team the city resolved to build a convention center in downtown St. Louis called America's Center which would include a new football stadium. The football stadium was called the Trans World Dome, and its $ 258 million cost was paid from state and local government funds. The stadium lease was assigned to CVC which became its manager and initially subleased the right to present football in the dome to private parties.

Problems associated with control over the lease and the potential ownership group caused St. Louis to be passed over in the NFL's expansion voting. The new franchises were awarded to Jacksonville, Florida and Charlotte, North Carolina. This forced the St. Louis football enthusiasts to adopt another strategy, and they turned their attention toward attracting an existing team. They founded a civic organization called FANS, Inc. (Football at the New Stadium), to assist their efforts. FANS, acting on behalf of CVC, then **[**4]** approached the Los Angeles Rams and began to negotiate a deal for the team to move to St. Louis. As a result a written agreement was eventually signed by CVC and the Rams.

The NFL League Constitution and Bylaws require a favorable vote by three fourths of the team owners to permit relocation, and the proposal for the Rams to move was initially voted down by the owners. It was later approved after the Rams agreed to pay the NFL a $ 29 million relocation fee. CVC eventually agreed with the Rams to pay $ 20 million of this fee, despite a clause in their contract allowing CVC to cancel if the fee were to exceed $ 7.5 million.

The Rams began playing in St. Louis in 1995, and in that year CVC was unable to make some of the payments owed to the team. CVC then brought this suit against the league and twenty four of its member teams. It also made an agreement with the Rams that they would receive half of any recovery obtained in the case in return for forgiveness of the money CVC owed them. The theory CVC presented at trial was that the league's relocation rules and the way they had been applied had created an atmosphere in which teams were unwilling to relocate. It contended that this anti-relocation **[**5]** atmosphere had discouraged interested teams from bidding on the St. Louis lease. The result was a one buyer market which forced the CVC to give more favorable lease terms than it would have in a competitive market.

B.

---

[2] The Honorable Jean C. Hamilton, Chief Judge, United States District Court for the Eastern District of Missouri.

The league was formed in 1966 by a union of the American Football League and the National Football League, and it functions as the governing body of a joint venture of thirty professional football teams producing "NFL football." The teams are independently owned and managed by different business interests. The league is organized through the League Constitution and Bylaws, **[*854]** an agreement among team members that sets out rules for league management of matters such as game rules, game schedules, team ownership, and location of teams. Most decisions affecting the league are made by vote of team representatives at NFL meetings. When NFL members decided to create two new team franchises for 1993, representatives from various cities made presentations to team owners in order to win a franchise.

St. Louis political leaders and business people were among those who made presentations to the league, and they emphasized the benefits an NFL team could expect **[**6]** from the stadium lease and the city. But there were problems with the St. Louis application for a team. At the time of the expansion decisions the exclusive right to use the Trans World Dome for professional football games was held by St. Louis NFL, Inc., which was controlled by two St. Louis businessmen, Jerry Clinton who owned one third and Jim Orthwein who owned the remaining two thirds. The fact that rights to lease the stadium for football were held by individuals who were unrelated to CVC caused the owners to pass over St. Louis as the site of an expansion team.

CVC's next option was to arrange for an existing team to leave its home city and relocate to St. Louis. Community members formed the civic organization FANS, Inc. in January of 1994, headed by former Senator Thomas Eagleton, to accomplish the task which they were increasingly anxious to complete. Around this time Congressman Richard Gephardt alerted FANS that the Los Angeles Rams were considering relocating from their stadium in Anaheim, California. He had seen a newspaper report that the Rams were discussing a possible move to Baltimore, Maryland. Congressman Gephardt concluded that since Baltimore had been one of **[**7]** St. Louis' main competitors during the expansion process, the city should follow Baltimore's lead and approach the Rams. FANS then contacted John Shaw, the Rams president, and began negotiations on a relocation agreement and stadium lease. During this period, St. Louis was competing with Hartford and Anaheim in addition to Baltimore.

FANS made an initial presentation to the Rams, but talks ended because of problems with Clinton and Orthwein having control over the lease and because FANS had leaked information about the negotiations to the press, including the Rams' list of features it desired in a new stadium (the "wish list"). Discussions resumed only after CVC gained control over the lease, and the Rams told CVC that they would discontinue any business dealings if the CVC approached any other team about moving to St. Louis. CVC never contacted any other team to solicit a bid on the lease. CVC considered it the better course to focus on only one team, and it believed its presentation during the expansion process should have been sufficient to stimulate the interest of other teams.

The Rams and CVC eventually agreed on a lease. The Rams agreed to pay to CVC $ 25,000 rent per game, **[**8]** plus half of the game day expenses. In return the Rams would receive all of the ticket revenue from Rams games, 75% of the first $ 6 million in advertising revenue and 90% of the remainder, 100% of the profit from the concessions at Rams games and a portion of the concessions profit from other events. Rams president John Shaw estimated the lease would produce approximately $ 40 million per season in revenue for the Rams. CVC agreed to a number of other obligations, including promises to pay $ 28 million to fulfill bond obligations which the Rams owed on Anaheim Stadium, to build a $ 9.9 million training facility for the team, and to pay the team's moving costs. Once the Rams and CVC reached their agreement, the Rams presented their relocation application to the league owners for approval in March, 1995.

C.

Relocation decisions by the NFL come under Article 4.3 of the league constitution which provides that "no member club shall have the right to transfer its franchise or playing site to a different city, either within or outside its home territory, without prior approval by the affirmative vote of three-fourths of the existing member clubs of the **[*855]** league." While **[**9]** not expressed in the governing documents, the league claims the right to assess a relocation fee on any team seeking to move. At the time CVC was dealing with the Rams, the NFL had levied one previous relocation fee; the Cardinals had been assessed $ 7.5 million for their move to Phoenix.

After a successful antitrust challenge to an application of Article 4.3 to the relocation of the Oakland Raiders to Los Angeles, *see* Los Angeles Memorial Coliseum Comm'n v. NFL, 726 F.2d 1381 (9th Cir. 1984) (*Raiders I*), [3] **[**10]** the NFL commissioner had issued procedures for obtaining league approval of any proposed relocation and nine non-exclusive factors (the guidelines) [4] that team owners should consider in deciding how to vote on a move. No guidelines have been promulgated on the imposition or computation of a relocation fee. Under the rules in effect at the time of the Rams move, a NFL team which wanted to move would negotiate a lease and relocation agreement with its new landlord and then apply to the league for permission to relocate. Only the moving team participated in the NFL application process; the new landlord had no direct involvement.

Owners voted down the initial application by the Rams because of disagreements between the league and the team on several of the relocation terms, including payment of a relocation fee, sharing of revenues from the sale of "personal seat licenses" (options to purchase tickets), and possible indemnification of the league for television payments it might owe as a consequence of the move. After the initial league vote, and in anticipation of the assessment of a relocation fee, CVC agreed with the Rams it would pay up to $ 7.5 million of any fee. Either party had the right to void the agreement should the fee exceed that amount

The Rams and the NFL reentered negotiations, and the NFL commissioner said that the relocation could be approved if the Rams would pay a higher fee. The NFL had "the right to assess whatever fee they thought necessary" since the initial relocation proposal had **[**11]** not satisfied the league guidelines. The Rams then agreed to pay a $ 29 million relocation fee, [5] to forgo any share in the next two relocation fees levied by the league, to share $ 17 million in personal seat license revenue with the NFL, and to indemnify the league for up to $ 12.5 million of any extra expenses arising from the league's television contract. The Rams relocation was approved on April 12, 1995.

The agreement between CVC and the Rams about CVC's obligating itself on any relocation fee was not revealed to the NFL owners during these negotiations, and it does not appear that the owners were informed about it until after the April 12 vote. [6] Following the vote, the Rams and CVC once again entered negotiations, this time on how the charges assessed by the NFL on the Rams would be paid. **[**12]** The parties agreed in June of 1995 that CVC would pay $ 20 million of the relocation fee and that CVC would be **[*856]** directly liable to the NFL for its payment. CVC did not exercise the agreement's escape clause, and the Rams began playing in St. Louis in 1995. During that year CVC experienced difficulties meeting its financial obligations to the Rams and did not pay approximately $ 14 million of the amount due. CVC and Rams president Shaw then agreed that CVC would sue the NFL and that the Rams would receive a right to half of any recovery in place of the payments due.

[13] II.**

---

[3] In *Raiders I* the Ninth Circuit held that Article 4.3 had impermissibly foreclosed competition between stadia seeking NFL tenants and granted exclusive territories to NFL teams. 726 F.2d at 1395. Future applications of the rule could withstand scrutiny, however, if the NFL adopted objective factors for consideration by team owners before voting, as well as clarified procedures including an opportunity for any applicant to make a presentation to the league. *Id. at 1397*. The NFL commissioner subsequently issued such guidelines. CVC complains that the guidelines and the rule have had the effect of discouraging competitive bidding for available stadia, thereby driving up the cost for a locality seeking a team.

[4] These factors include consideration of the adequacy of the team's current stadium, the extent of demonstrated fan support for the team, and the extent to which the owner has contributed to the need for relocation.

[5] The relocation fee was described by the commissioner as reflecting among other things the increased value of the team after the move to St. Louis and the value of that franchise opportunity compared to Anaheim.

[6] The record is not clear on when the NFL owners learned about CVC's agreement to contribute to any relocation fee. John Shaw testified that he informed Commissioner Tagliabue of the agreement before the April 12 vote, but on cross he said that he had withheld information about the agreement from the NFL and team owners and had insisted that CVC do the same. Tagliabue testified that he did not inform the owners about CVC's undertaking in regard to the fee until after they had voted.

A.

CVC filed this case against the league and twenty four member teams on December 18, 1995, claiming that their actions had violated *Sections 1* and *2* of the Sherman Antitrust Act, *15 U.S.C. §§ 1*, *2*, and that the imposition of the high relocation fee tortiously interfered with CVC's contract with the Rams. CVC's theory was that Article 4.3, the accompanying guidelines, and their application over time functioned as an agreement among the league and the individual teams to restrain relocations, creating an atmosphere which deterred teams from moving and therefore from bidding on the Trans World Dome lease. It contended that the Rams were the only team willing to take the risk of an attempted relocation so they were the only bidder on the lease. As a consequence the Rams were able to obtain very favorable terms from CVC which caused it to lose between $ 77 and $ 122 million. CVC requested damages under the Clayton Act which, if established, would be trebled to between $ 241 and $ 366 million, and attorney fees. *See* *15 U.S.C. § 15*. The tortious interference claim was based on the theory that the $ 29 million relocation **[**14]** fee assessed on the Rams was levied through economic duress, since its only choices were to agree to increase its share of the fee from $ 7.5 million to $ 20 million or abandon the deal with the Rams. It asserted that the fee made its contract with the Rams substantially more burdensome which constituted tortious interference under Missouri law, as did the use of economic duress.

B.

A number of motions were brought during the pretrial period, including one by the NFL for summary judgment on the *Section 1* claim. The NFL argued that the league and teams form a single economic enterprise incapable of conspiring among themselves. The court denied the motion on the basis of collateral estoppel. The Ninth Circuit had previously ruled against the NFL on the same issue in *Raiders I, 726 F.2d at 1387-90* (league not a single economic enterprise because teams have independent value, are separately owned and managed, earn different profits, and compete in various ways). The district court was not persuaded that two subsequent cases dealing with the concept of single economic enterprise required a different result. *Copperweld Corp v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* **[**15]** (***HN1***[] parent and wholly owned subsidiary cannot conspire with each other under *Section 1*) and *City of Mt. Pleasant v. Associated Elec. Coop., Inc., 838 F.2d 268, 274-76 (8th Cir. 1988)* (test is whether entities have "pursued interests diverse from those of the cooperative itself"). *See* *White Earth Band of Chippewa Indians v. Alexander, 683 F.2d 1129, 1134 (8th Cir. 1982)* (***HN2***[] change in law required to prevent collateral estoppel).

In a second summary judgment motion the NFL argued for dismissal of all of CVC's claims. The district court granted the motion as to the Missouri antitrust claims on the basis that they were preempted by federal law, citing *Partee v. San Diego Chargers Football Co., 34 Cal. 3d 378, 668 P.2d 674, 194 Cal. Rptr. 367 (Cal. 1983)* (en banc), and denied it in all other respects. The remaining issues for trial were discussed in some detail in the course of its ruling.

The court's discussion of the *Section 1* claim gave direction on several legal points. It indicated that CVC could not succeed on this antitrust claim with a theory that Article 4.3 was per se anticompetitive, but instead would have to show that the alleged **[**16]** anticompetitive effect of the rule outweighed its procompetitive features. The court relied on *National Collegiate Athletic Ass'n v. Board of Regents of Univ. of Oklahoma, 468 U.S. 85, 100-103,* ***[*857]*** *104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* (*NCAA*) (league limits on number of televised games), and *Raiders I, 726 F.2d at 1387* (league rule requiring vote to allow a team to relocate). These cases had held that certain rules of sports leagues governing matters such as the number of games to be televised and the division of home territories among professional teams, while perhaps ordinarily per se anticompetitive, were necessary for the existence of the league and should therefore be judged under a rule of reason analysis. CVC would also have to offer proof that the alleged conspiracy to suppress movement of teams in fact caused the absence of competing bids on the Trans World Dome lease before a jury would be permitted to decide whether harm to competition from Article 4.3 and its enforcement outweighed the positive effects on competition. *See* *NCAA, 468 U.S. at 100*; *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918).* **[**17]** This was because CVC's claim was unlike cases alleging damage from a direct application of a regulation, *see* Raiders I, 726 F.2d at 1384-85 (case arose from owners' vote against relocation under Article 4.3 which required approval for a move). There was nothing in the NFL Constitution and Bylaws or in the deposition evidence to suggest that there was an explicit ban or limit on competitive bidding for leases.

The court also denied summary judgment on CVC's Section 2 and tortious interference claims. It held that CVC could make out a Section 2 monopoly leveraging claim if it could show that the NFL used a monopoly position in the professional football market to gain an advantage in the market for stadia. More evidence was necessary in order to evaluate the NFL's claim that the stadium market was not distinct from the market for professional football. The court determined that there were questions of material fact on the tortious interference claim. These included whether CVC's renegotiation of its lease agreement with the Rams was a necessary consequence of enforcement of Article 4.3 and whether the NFL intended to interfere with that contract. With the case focused **[**18]** on these issues, the parties went to trial.

C.

CVC's case consisted largely of the testimony of various owners, league commissioner Paul Tagliabue, Rams president John Shaw, and several experts. It also presented testimony of individuals involved in the Rams relocation to St. Louis. FANS leader Senator Eagleton, Congressman Gephardt, and St. Louis County Executive George Westfall all testified about their involvement in the relocation and the interaction with NFL officials. CVC focuses in this appeal on three bodies of evidence.

CVC attempted to show that past applications of Article 4.3 and the related guidelines and the NFL approach to team relocations had created an atmosphere in which teams were afraid to move and that they did not bid on CVC's lease as a result. Several team owners stated in deposition testimony that the purpose of the rules was to ensure stability, and they also testified to differing interpretations of the guidelines and of their relative importance in deciding how to vote. CVC argued that this evidence showed teams could anticipate league disapproval of any moves or use of the rules to extract concessions upon relocating and that teams would therefore **[**19]** not seek out and bid on opportunities to move. Leonard Tose, the former owner of the Philadelphia Eagles, testified that the NFL had sued to stop the Eagles from moving to Phoenix and taken actions which CVC claims necessitated sale of the team. Victor Kiam, the former owner of the New England Patriots, also testified about the attempt to relocate his team, which met with resistance and a forced sale.

CVC claims that the uncertainty about imposition of a relocation fee and its amount was one reason why teams did not seek out relocation opportunities. The league had assessed a relocation fee of $ 7.5 million on the St. Louis Cardinals when the team moved to Phoenix in the first team relocation after the guidelines were issued. CVC offered evidence on the benefits a predictable formula for calculating the fee would have and pointed out that the NFL has not adopted one.

[*858] CVC called Rams president John Shaw in its case in chief. He explained during his testimony that the Rams would obtain a portion of any recovery in this case. Shaw testified about the negotiations between the Rams and CVC and about the Rams' dealings with the NFL during the voting on the relocation proposal. **[**20]** In addition to testifying about the Rams interest in relocating and their negotiations with CVC, he also discussed his own experience with the league and his views about other teams. Shaw testified that based on his experience representing the Rams at league meetings Article 4.3 prevented team movement, that the NFL took an antagonistic approach toward relocations, and that there were high risks of alienating the league or possible penalties in any attempt to move a NFL team. The Rams benefitted in their negotiations with CVC because no other team was bidding as a result of Article 4.3 and its application, and this enabled him to demand a more favorable lease from CVC than he would have been able to get in a competitive environment.

Among the experts called by CVC was Professor John Siegfried, an economics professor at Vanderbilt University who has done research on the economics of sports. Siegfried said that in his opinion the relocation policies had a direct effect on the lease price. He testified that any team which challenged the regulations would be the only bidder on an available lease (in antitrust terms, a "monopsony") and could therefore extract favorable terms from the **[**21]** captive buyer. In a "freely competitive marketplace with full dissemination of information" he would expect teams to seek out the best lease opportunities and to bid against each other on them. He based his conclusions on "observed market behavior" and the "prospect of earning higher returns at the Trans World Dome."

CVC also used circumstantial evidence to support its argument that the NFL culture caused the lack of bidding on its lease. CVC argued that the purpose of the NFL rules was to deter relocation and that they accomplished that purpose and prevented other teams from bidding on the lease. It claimed that the market would normally produce competition for a lucrative lease, and offered the testimony of Stanley "Bud" Adams, Jr., owner of the Houston Oilers football team, who stated he would have expected high competition for the lease. CVC contends in its brief that from this evidence "a reasonable jury could infer that some external factor was disrupting free competition -- and that a set of relocation policies designed and intended to frustrate team movement were the most likely candidate."

D.

The NFL moved for judgment as a matter of law at the close of CVC's **[**22]** case, after four weeks of evidence, and the district court granted the motion as to two of CVC's three remaining claims. The court found that CVC had failed to present evidence that the relocation fee caused a breach in its lease agreement with the Rams, and breach is a necessary element of tortious interference under Missouri law. CVC instead modified its agreement with the Rams to accommodate the size of the fee. The court also found that there had been no evidence that the NFL had intended to interfere with the contract, another required element under state law. Judgment was granted in the NFL's favor on the *Section 2* claim as well, since CVC had not shown that the NFL had a monopoly in the professional football market or that there was a secondary market in NFL stadia. CVC has not appealed the ruling on the *Section 2* claim. The court permitted the *Section 1* claim to proceed, despite expressing misgivings about CVC's case.

After the NFL had presented two days of evidence and was close to finishing its case, the court convened the charge conference to prepare for submission of the *Section 1* claim to the jury. The parties again disagreed about whether CVC could make a submissible **[**23]** case by showing that the NFL's rules and actions must have been what had prevented other teams from bidding on the Trans World Dome lease, as opposed to showing that there had been a connection in fact between the allegedly anticompetitive behavior and the absence of competitive bidding. CVC was asked to explain its *Section 1* theory at the conference. Counsel responded that "this application and enforcement **[*859]** of the relocation policies had a very substantial deterrent effect upon anybody but the Rams entering into negotiations with CVC." At this point the NFL moved again for judgment as a matter of law, *see* *Fed. R. Civ. P. 50(a)*. It argued that without a showing that the NFL's rules and actions had in fact deterred bidding on the St. Louis lease, CVC's claim was in essence a per se attack on Article 4.3 and the guidelines, and the court had already indicated that the rule of reason was the proper method of analysis.

After further briefing and oral argument, the court described the critical question as whether there was evidence tending to show that "the alleged restraint arises out of 'the agreement of the teams to adopt Article 4.3 to empower the commissioner to adopt **[**24]** and promulgate rules in enforcing 4.3 which has resulted in conduct which has precluded teams from coming to bid competitively in St. Louis.'" In other words, in order to go to the jury CVC had to show more than a theoretical connection between the allegedly anticompetitive actions and the events surrounding the Rams move to St. Louis.

Since the court concluded that CVC had presented no evidence to show that the NFL's rule and the guidelines actually had caused league teams other than the Rams to refrain from competitive bidding on the Trans World Dome lease, it granted the *Rule 50* motion. CVC had not shown that it had either tried to learn if other teams might be interested in relocating, that there were teams actually interested in moving to St. Louis, or that the failure of the others to bid on the lease was due to the NFL's policies and acts. There was no showing that there had been interested teams who had failed to contact CVC or that at the time CVC was seeking a team there were team owners who had not bid because of past application of league rules or acts of the commissioner to stop relocations. Finally, the court held that CVC had failed to present evidence of antitrust **[**25]** injury. It said there had been no evidence that collusive activity of the league and member teams reduced competitive bidding and that the opinion testimony of CVC's expert on damages lacked foundation in the record and was not consistent with its theory of liability.

III.

CVC's appeal from the judgment focuses on the dismissal of its claim under *Section 1* of the Sherman Act and of its claim for tortious interference with contract. It seeks a new trial. CVC argues that its evidence was sufficient to establish a *Section 1* violation, contending that it had shown a connection in fact between the NFL rules and actions and the lack of competitive bidding on the lease. It also argues that the tortious interference claim should not have been dismissed because it had established both economic duress and actions which made its agreement with the Rams more burdensome. The NFL responds that CVC did not produce sufficient evidence and no evidence that it sought bids from other teams or that other teams were even in a position to move. The league and teams also suggest that Article 4.3 and the related guidelines could not have affected the number of bidders on the lease because the **[**26]** rules did not become relevant until after the agreement between the Rams and CVC was completed and the Rams made their application to move, in other words well after any bidding period. Finally, the NFL argues that CVC was unable to show there were not independent reasons for the absence of other bids, especially since other owners did not know that the St. Louis lease problems which surfaced during the expansion period had been corrected or that certain acts alleged to have been taken by the commissioner to prevent team relocation had occurred.

The league and teams also cross appeal. They challenge the district court ruling that they were collaterally estopped from arguing that they are a single economic enterprise incapable of conspiracy under *Section 1* of the Sherman Act. They contend that the Supreme Court decision in *Copperweld Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628*, and this court's decision in *City of Mt. Pleasant, 838 F.2d 268*, have changed the law on single economic enterprise since the Ninth Circuit decision in *Raiders I*. They seek reversal of the collateral estoppel ruling and dismissal of CVC's **[*860]** *Section [**27] 1* claim on the ground that they amount to a single economic enterprise.

A.

CVC claims that the district court failed to use the correct legal standard for ***HN3***[] *Rule 50*, which required it to "1) resolve direct factual conflicts in favor of the nonmovant, (2) assume as true all facts supporting the nonmovant which the evidence tended to prove, (3) give the nonmovant the benefit of all reasonable inferences, and (4) deny the motion if the evidence so viewed would allow reasonable jurors to differ as to the conclusions that could be drawn." *Sip-Top, Inc. v. Ekco Group, Inc., 86 F.3d 827, 830 (8th Cir. 1996)* (quoting *Pumps & Power Co. v. Southern States Indus. Inc., 787 F.2d 1252, 1258 (8th Cir. 1986)* (cites omitted). CVC does not believe that the district court viewed the evidence in the light most favorable to it, particularly its evidence on causation. Since it presented enough evidence to survive the earlier motion for summary judgment and introduced more evidence at trial, the *Rule 50* motion should have been denied and the case submitted to the jury.

The district court stated the correct legal standard at the time it granted the *Rule 50* **[**28]** motion, and our review of the record does not lead to the conclusion that it failed to apply it. *See Admiral Theatre v. Douglas Theatre, 585 F.2d 877, 883 (8th Cir. 1978)*. ***HN4***[] We review the grant of a motion for judgment as a matter of law de novo, using the same standard as the district court. *Id.* Although CVC claims that the court explicitly declined to consider its evidence of causation, the passages it cites in the district court opinion do not contain any such statement. Rather, the court explained in its opinion that even after weeks of trial it was not clear what legal theory CVC was proceeding with on its *Section 1* claim. The court restated its consistent ruling that CVC would not be able to rely solely on the existence of the NFL rules to prove its case. That principle of law was not incorrect, and CVC does not point to any other example to support its argument that the court did not follow the standard.

The court's prior decision on summary judgment did not control the outcome of the Rule 50 motion. The Rule 50 motion was made and considered after the court had had the benefit of over four weeks of trial. It had heard the testimony of many witnesses and **[**29]** received numerous exhibits. There had been the opportunity for extensive legal arguments by the parties. At the time of the summary judgment motion it had been even less clear what CVC's precise legal theory was and what its evidence would be. By the time the district court ruled on the Rule 50 motion, it was able to review all the evidence in light of the legal discussions at the charge conference. It concluded that CVC had not met its burden. Given these facts and the posture of the case, the court was not required to reject the Rule 50 motion because of its earlier order on summary judgment.

B.

CVC contends that its evidence was sufficient to withstand a Rule 50 motion. CVC says that the testimony of John Shaw and Professor Siegfried, together with circumstantial evidence, tended to show that actions by the NFL caused the lack of bidding and the damages it seeks. The NFL replies that none of the evidence shows that the NFL policies, or their implementation, had the actual effect of deterring any team from making a bid on the stadium lease.

HN5[] We review the decision to grant judgment as a matter of law de novo, which is appropriate where "a party has been fully heard on **[**30]** an issue and there is no legally sufficient evidentiary basis for a reasonable jury to find for that party." Fed. R. Civ. P. 50(a)(1); *see also* Deneen v. Northwest Airlines, Inc., 132 F.3d 431, 435 (8th Cir. 1998). Although the plaintiff is awarded the benefit of all reasonable inferences, it is not given "the benefit of unreasonable inferences or those at war with the undisputed facts." Sip-Top, 86 F.3d at 830 (quoting Marcoux v. Van Wyk, 572 F.2d 651, 653 (8th Cir. 1978)) (internal quotations and citations omitted). "Where the record contains no proof beyond speculation to support the verdict, judgment as a matter of law is appropriate." *Id.*

[*861] **HN6**[] Section 1 of the Sherman Antitrust act makes it unlawful to form a conspiracy in restraint of trade. 15 U.S.C. § 1. Restraints which have "pernicious effect on competition and lack of any redeeming virtue" are illegal per se under Section 1 without inquiry into the reasonableness of the restraint or the harm caused. Northern Pac. Rw'y v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958); *see also* Copperweld Corp., 467 U.S. at 768; **[**31]** United States v. Topco Associates, Inc., 405 U.S. 596, 607-08, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972). Analysis of whether a restriction's harm to competition outweighs any procompetitive effects is necessary if the anticompetitive impact of a restraint is less clear or the restraint is necessary for a product to exist at all. *See* Chicago Board of Trade, 246 U.S. at 238; Broadcast Music, Inc. v. Columbia Broadcast Sys., Inc., 441 U.S. 1, 9-10, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979). Some trade restrictions by sports leagues have been held to fall into this category. NCAA, 468 U.S. at 94 (restriction on broadcasts of league games); NBA v. SDC Basketball Club, Inc., 815 F.2d 562, 567-68 (9th Cir. 1987) (relocation rules); Sullivan v. NFL, 34 F.3d 1091, 1096 (1st Cir. 1994) (prohibition of public ownership of teams). The district court held in this case that the franchise relocation rule and guidelines for evaluation of proposed team moves do not fit the per se category of restraints and should therefore be addressed under a rule of reason analysis. This ruling has not been appealed.

[32]** **1.**

HN7[] In order to prevail under Section 1, CVC must prove that: (1) there was an agreement among the league and member teams in restraint of trade; (2) it was injured as a direct and proximate result; and (3) its damages are capable of ascertainment and not speculative. Admiral Theatre Corp. v. Douglas Theatre Corp., 585 F.2d 877, 883-84 (8th Cir. 1978). The first element is established by proof that there was an agreement in restraint of trade and that the challenged action was "part of or pursuant to that agreement." Monsanto v. Spray-Rite Service Corp., 465 U.S. 752, 767, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984). Other Section 1 challenges to rules of sports leagues have involved situations where the defendants had taken action pursuant to an allegedly anticompetitive rule and the plaintiff attacked the rule itself or the application of the rule. *See* NCAA, 468 U.S. at 100-101 ; Sullivan, 34 F.3d 1091; SDC Basketball Club., 815 F.2d 562. In those cases there was no question that the defendants were acting pursuant to an agreement in restraint of trade, and the issue was whether the **[**33]** agreement was unreasonable.

See id. This case is different because CVC has not challenged a vote by team owners or a particular application of the rules, *see* *Raiders I, 726 F.2d at 1385*, nor was St. Louis unable to obtain a NFL team. CVC complains instead about market conditions and attributes the conditions existing at the time it was seeking a tenant to an atmosphere created by the rules and the handling of prior relocations.

CVC did not present evidence tending to show that there was even one other team besides the Rams that failed to bid on its lease because of the NFL rules and past applications of them. *See* *Monsanto, 465 U.S. at 764*. ***HN8***[] In order to prove that *Section 1* defendants were acting pursuant to a conspiracy, a plaintiff must present evidence that tends "to exclude the possibility that the alleged coconspirators acted independently," *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574 at 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538* (quoting *Monsanto, 465 U.S. at 764*), because "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support **[**34]** an inference of antitrust conspiracy," *The Corner Pocket of Sioux Falls, Inc. v. Video Lottery Technologies, Inc., 123 F.3d 1107, 1109 (8th Cir. 1997)*, *cert. denied 140 L. Ed. 2d 116, 118 S. Ct. 1054 (1998)* (quoting *Matsushita, 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986))*. *See also* *Monsanto, 465 U.S. at 764 (1984)*; *Lovett v. General Motors Corp., 998 F.2d 575, 578-79 (8th Cir. 1993)*. [7]

[*862] CVC presented no evidence to exclude the possibility that the owners who did not bid on the St. Louis lease were acting for independent business **[**35]** reasons rather than pursuant to the alleged agreement in restraint of trade. Indeed, the evidence at trial was to the contrary. The deposition testimony of the owners reflected their awareness of problems with the St. Louis lease, concern for their existing leases, and loyalty to their communities. These were all independent reasons why teams might not have bid. Moreover, CVC did not present evidence tending to show that all NFL teams would use the same criteria to evaluate a relocation opportunity or automatically attempt to move to the city offering the most lucrative lease. CVC argues that the parties' pretrial stipulation that the league Constitution and Bylaws amounted to an agreement among the NFL and its members was all that was necessary to show the existence of a conspiracy. This evidence did not tend to prove that any team acted pursuant to a conspiracy to prevent bidding on the stadium lease, however. "***HN9***[] ***Antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case," and the trial evidence did not support an inference that NFL teams were acting pursuant to the alleged conspiracy when they declined to bid on the Trans World Dome lease. *Matsushita, 475 U.S. at 588*.

[36]** 2.

The district court rested its summary judgment ruling on the issue of causation. ***HN10***[] In order to satisfy the causation element of a *Section 1* case, CVC had to show that the NFL's anticompetitive acts were an actual, material cause of the alleged harm to competition. *See* *National Association of Review Appraisers v. Appraisal Found., 64 F.3d 1130, 1135 (8th Cir. 1995)*; *Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 883-84 (8th Cir. 1978)*. Since nothing in the NFL rules expressly prevented competition among teams for leases or stated that only one team could negotiate with a leaseholder at a time, CVC had to show that past suppression of movement and the alleged anti-relocation atmosphere created by previous rule applications effectively prevented all other teams from dealing with the CVC about the St. Louis lease and entering bids on it.

CVC argues that Shaw's testimony was sufficient to prove causation, but his testimony did not tend to prove that the rules deterred any interested owner from bidding in St. Louis or that other owners considered the rules a factor in their lack of interest in the lease. Shaw could not identify **[**37]** a single team that was expressly interested in moving to St. Louis or was prevented from bidding on the lease because of past applications of league relocation rules, and there was no additional evidence that any particular team was able to move at the time CVC was seeking a tenant. [8] In fact, CVC failed to ask any NFL owner whether they were interested **[*863]** in moving to St. Louis at

---

[7] The cited cases involved situations which could amount to a per se violation of the antitrust laws. In a rule of reason case like this one, where there is an issue as to the cause of the lack of competitive bidding, evidence about whether the alleged agreement affected the actions of the other team owners is relevant, as is evidence tending to exclude independent action.

[8] CVC claims that eight teams had expressed interest in moving since 1991, but the testimony it cites in support contains no indication that any team was interested in moving in 1995, CVC's deadline for a team. It cites the deposition testimony of New

the time it was seeking a team. Shaw was not a disinterested witness, and in the absence of other evidence his testimony was not enough to establish that the rule and its past application had created an anti-relocation atmosphere in the NFL which caused the lack of bidders, especially in light of the fact that Shaw's own team succeeded in moving after negotiating with several cities. *See* H & B Equipment Co. v. International Harvester Co., 577 F.2d 239, 247 (5th Cir. 1978) (plaintiff could not show causation based on corporate officer's testimony alone). Shaw was not a participant in what is alleged to have been a refusal to approach CVC, and his testimony on the motivation of other owners to refrain from bidding could not support a reasonable inference that the rules prevented **[**38]** the competitive bidding which CVC wished to have on the St. Louis stadium.

[39]** CVC contends that the testimony of its expert, Professor John Siegfried, establishes a causal link between the NFL's actions and the lack of competitive bidding on the lease. ***HN11***[] A jury may not rest its verdict on an expert's conclusion "without some underlying facts and reasons, or a logical inferential process to support the expert's opinion." *Sullivan, 34 F.3d at 1105* (citing *Mid-State Fertilizer Co. v. Exchange National Bank, 877 F.2d 1333, 1339 (7th Cir. 1989))*. Here, there was no evidence on which the jury could have drawn a logical inference from Siegfried's opinion. Siegfried testified that he would have expected to see bidding on the lease, but there was no evidence to support a finding that there were teams that were actually able and desiring to bid, but were prevented from doing it. Moreover, Siegfried rested his conclusions on economic theory that states that in a freely competitive market NFL teams would want to move to the most advantageous lease opportunity, but there was no evidence which tended to show that this was actually the case, especially in light of admissions by CVC witnesses that several team owners would not move because **[**40]** of loyalty to their communities or ownership of their stadia. Siegfried also testified that he had not seen any of the lease agreements involved in the case, any relocation agreement, or any documentation on the lease negotiations. Without evidence tending to show that Siegfried's economic model actually applied to the NFL and the CVC efforts to obtain a team, his testimony is insufficient to create a jury question on the issue of causation. *Sip-Top, 86 F.3d at 830* (***HN12***[] judgment as a matter of law appropriate where plaintiff only relies on speculation to support theory).

CVC relies also on circumstantial evidence to prove causation. It claims that since the purpose of the rules was to deter team movement and there was a lack of competitive bidding on the Trans World Dome lease, it can be inferred that the rules were the cause of the harm allegedly suffered. *See* *Alexander v. National Farmers Org., 687 F.2d 1173, 1209-10 (8th Cir. 1982)* ("***HN13***[] causal links also may properly be a matter of inference from the circumstances and evidence as a whole."). CVC cites the *Alexander* case to support its position, but the facts there were significantly different. The **[**41]** plaintiff had produced substantial evidence that its competitor in the dairy distribution business threatened and harassed buyers to stop dealing with it; the defendant's actions were planned at its board meetings and "there was no doubt that the unlawful conspiracy was the material cause" of the plaintiff's injury. *Id.* . The fact that the rules were allegedly intended to discourage relocation does not support the inference that they prevented all other teams besides the Rams from pursuing a possible move to St. Louis. There were many legitimate reasons why owners may not have bid, and without evidence from those who did not bid about why they had not, the circumstantial evidence was insufficient to allow the case to be presented to the jury on causation.

The district court found it particularly significant that CVC had not presented evidence to show that it had sought bids from other teams. *See* *Read v. Medical X-Ray Center, P.C., 110 F.3d 543, 546 (8th Cir.)*, *cert. denied 139 L.*

Orleans Saints owner Tom Benson who said that teams had expressed interest in St. Louis, but Benson did not identify any teams or the nature of any interest. CVC also does not cite any support elsewhere in the record for Shaw's testimony that the Houston Oilers, Cincinnati Bengals, and New England Patriots could move.

CVC argues that the Tampa Bay Buccaneers were available to move, citing the deposition testimony of a league official. That official stated, however, that the team would have had to pay a penalty on its lease in order to relocate, and CVC does not point to any testimony by team officials indicating they were prepared to move. Senator Eagleton testified, however, that Jerry Clinton had negotiated with the Buccaneers and claimed he could bring them to St. Louis on the same terms as the Rams if an additional $ 5 million were made available, but Eagleton did not indicate why St. Louis had not attempted to create a competitive bidding situation between the teams.

CVC also claims that the Minnesota Vikings were available, citing testimony by Senator Eagleton, but Eagleton testified that FANS concluded that the Vikings were not interested in St. Louis.

Ed. 2d 230, 118 S. Ct. 299 (1997); *Admiral Theatre Corp., 585 F.2d at 893-94*. ***HN14***[] Where a plaintiff has otherwise failed to present evidence of causation, **[**42]** he must show that he made "a demand on the defendant to allow the plaintiff to take some action or obtain some benefit, which the defendant's challenged practice is allegedly **[*864]** preventing the plaintiff from taking or obtaining, in order to prove that the practice caused injury in fact." *Sullivan v. National Football League, 34 F.3d 1091, 1103 (1st Cir. 1994)*; *see also Out Front Productions, Inc. v. Magid, 748 F.2d 166, 169-70 (3d Cir. 1984)*. The record shows no effort by CVC to solicit bids from other NFL teams and CVC did not contact any other NFL team to encourage it to consider the St. Louis opportunity. The negotiations between CVC and the Rams were carried out in secret, and there was undisputed evidence that CVC had made a conscious decision to negotiate with only one team at a time. In fact, the Rams had informed CVC they would back away if there were negotiations with other teams and even suspended talks when CVC leaked information to the press.

CVC claims that the evidence about its presentation to the NFL owners during the expansion process and its publication of the Rams "wish list" during its negotiations was sufficient to **[**43]** show that it had sought interest from other teams. There was undisputed testimony that St. Louis had been passed over for expansion because of problems with its ownership group and lease, and there was no evidence that CVC made owners aware that these problems had been rectified. Publication of the benefits the Rams sought in St. Louis was not the same as informing other owners CVC was seeking additional bidders. ***HN15***[] CVC "may not recover for losses due to factors other than the [NFL's] anticompetitive violations." *National Association of Review Appraisers, 64 F.3d at 1135* (quoting *Amerinet Inc. v. Xerox Corp., 972 F.2d 1483, 1494 (8th Cir. 1992))*. Since CVC failed to present evidence showing that the alleged conspiracy caused it injury, it did not make out the element of causation necessary for a *Section 1* claim.

3.

The district court also ruled that CVC failed to present evidence to make out a submissible case of antitrust injury. CVC says that its evidence tended to prove that the NFL's policies caused a reduction in competitive bidding which is an antitrust injury. The NFL replies that the theory of CVC's case was that the very existence **[**44]** of Article 4.3 and the guidelines limited team bidding. It did not show that they operated to make CVC's financial obligations greater than they should have been, there was no antitrust injury. The league and team also argue that the rules did not result in a reduction in output of the number of NFL games, teams, or stadia which would be necessary to show antitrust injury, citing *Chicago Prof'l Sports Ltd. Partnership v. NBA, 95 F.3d 593 (7th Cir. 1996)*.

HN16[] Antitrust injury is "injury of the type the antitrust laws were intended to prevent and flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. CVC failed to offer proof of antitrust injury because it did not present evidence to show that there was a suppression of bidding on the St. Louis lease. There was no evidence at trial that any other willing and able bidder besides the Rams was in the market for a stadium and interested in the St. Louis opportunity at the time CVC was in the market for a tenant. ***HN17***[] A showing of antitrust injury requires proof that the possibility for the alleged harm to competition **[**45]** actually existed and that competition was diminished by the defendants' actions. "The Sherman Act does not require competitive bidding; it prohibits unreasonable restraints on competition." *National Society of Professional Engineers v. United States, 435 U.S. 679, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)* (organization's ethical rules prohibited competitive bidding). CVC presented no evidence that it was injured by a restraint on competition.

In sum, CVC did not make out a claim under *Section 1* of the Sherman Act, and appellees were entitled to judgment as a matter of law. [9] It failed to present sufficient evidence to prove that the lack of expressed **[*865]** interest from

---

[9] Because the league and teams are entitled to judgment as a matter of law on the *Section 1* claim for the reasons discussed, it is not necessary to reach the issue raised by their cross appeal as to whether they are unable to conspire among themselves because they are a single economic enterprise under *Copperweld Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* and *City of Mt. Pleasant, 838 F.2d 268 (8th Cir. 1988)*.

other teams in the St. Louis opportunity was caused by Article 4.3 and other acts of a conspiracy consisting of the league and its members, and there was no evidence of antitrust injury.

[46]** IV.

CVC also claims that the NFL tortiously interfered with its contract with the Rams by charging the $ 29 million relocation fee after initially voting down the Rams' application to move. CVC argues that it was forced to pay the fee because of economic duress and that the required fee made its obligations to the Rams substantially more burdensome. The NFL responds that CVC failed to establish several of the essential elements of a tortious interference claim under Missouri law. The district court dismissed this claim because of lack of evidence of a breach induced by the NFL's conduct or of any intentional interference.

HN18[] Missouri law requires a plaintiff alleging tortious interference with a contract to prove "(1) a contract or valid business expectancy; (2) defendant's knowledge of the contract or relationship; (3) a breach induced or caused by defendant's intentional interference; (4) the absence of justification; and (5) damages." *Rice v. Hodapp, 919 S.W.2d 240, 245 (Mo 1996)* (en banc). CVC presented no evidence that the NFL's imposition of a high relocation fee caused a breach in its contract with the Rams. Despite having the option to terminate its **[**47]** contract with the Rams once it was decided that the fee would exceed $ 7.5 million, CVC agreed to pay the fee in order to be sure the Rams would play in St. Louis in 1995, the target year it had set. There was also no evidence that the intent behind the NFL's fee was to disrupt the contract between CVC and the Rams. It is not even clear that the team owners knew about the contract at the time the fee was set. CVC contends, however, that the NFL can be liable for tortious interference even without a breach if it caused the performance of the contract to be more burdensome and expensive, citing *Restatement (Second) of Torts, § 766(A)*. CVC points to no Missouri authority which has recognized this theory, and ***HN19***[] a federal court ruling on a point of state law is obligated to follow the law as announced by that state's highest court. *Gilstrap v. Amtrak, 998 F.2d 559, 560 (8th Cir. 1993)*; *Carman v. Harrison, 362 F.2d 694, 698 (8th Cir. 1966)*. To adopt CVC's theory would be contrary to the Missouri requirement that a plaintiff prove that the defendant induce a breach of contract. Since CVC did not make out the required elements of this state tort, appellees **[**48]** were entitled to a judgment as a matter of law on it.

V.

CVC had ample opportunity to prove the causes of action that are the subject of its appeal, and it took some four weeks to put in its evidence at trial. The many legal issues were briefed and argued by the parties before the district court ruled on them. Since CVC failed to produce sufficient evidence to make out essential elements required under *Section 1* of the Sherman Act and under Missouri law on tortious interference, the league and the member teams were entitled to judgment as a matter of law. CVC has not shown on its appeal that it should have a new trial, and the cross appeal is dismissed as moot. Accordingly, we affirm the judgment of the district court.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

Where a plaintiff proves conduct that falls within a per se category under the Sherman Act, 15 U.S.C.S. § 1, nothing more is needed for liability; the defendants' power, illicit purpose and anticompetitive effect are all said to be irrelevant.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Joint Ventures > General Overview

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

HN2[] **Antitrust & Trade Law, Sherman Act**

Joint venture enterprises, unless they amount to complete shams, are rarely susceptible to per se treatment. Where the venture is producing a new product, there is patently a potential for a productive contribution to the economy, and conduct that is strictly ancillary to this productive effort (e.g., the joint venture's decision as to the price at which it will purchase inputs) is evaluated under the rule of reason.

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Types of Contracts, Joint Contracts**

A joint venture is not "per se" legal. Any joint venture, especially one that involves competitors, tends to be susceptible to attack under the Sherman Act *§ 1*'s rule of reason--on the theory that the operations of the joint venture represent collaboration of the separate entities that own or control it.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

A plaintiff's mismanagement is not a bar to recovery where an antitrust violation is a material cause of injury. But mismanagement is certainly relevant to the factual question whether the antitrust violation had such an effect or whether the plaintiff is entirely the cause of its own failure.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

HN5[] **Standards of Review, Clearly Erroneous Review**

On the issue of whether the antitrust violation is a material cause of injury or whether the plaintiff is entirely cause of its own failure, the plaintiff bears the burden of proof at trial. On appeal, the district court's findings and ultimate conclusion of fact are entitled to stand unless found to be clearly erroneous.

Governments > Courts > Rule Application & Interpretation

HN6[] **Courts, Rule Application & Interpretation**

There is no mechanical rule for determining the exact level of findings required by *Fed. R. Civ. P. 52(a)*.

Counsel: Alan R. Kusinitz with whom Samuel Adams, Keith C. Long, and Warner & Stackpole LLP were on brief for appellant.

James C. Burling with whom Michelle D. Miller, Hale and Dorr LLP, William L. Patton, Jane E. Willis, Ropes & Gray, Kevin P. Light and Choate, Hall & Stewart were on brief for appellees.

Judges: Before Boudin, Circuit Judge, Coffin, Senior Circuit Judge, and Shadur, [*] Senior District Judge.

Opinion by: BOUDIN

Opinion

[*49] BOUDIN, *Circuit Judge*. Addamax Corporation brought a federal antitrust suit against Open Software Foundation ("OSF"), Hewlett-Packard Company and Digital Equipment Corporation. After a bench trial limited to the issues of causation and damages, the district court found that antitrust violations, even if they were assumed to have occurred, were not a material cause of Addamax's failure in the line of business at issue. Addamax now appeals and we affirm.

We begin with a statement of those background facts **[**2]** that are more or less undisputed. Addamax was created by Dr. Peter A. Alsberg in 1986 and, in 1987, began to focus on developing security software for Unix operating systems. Unix is a very popular operating system for larger computers, and security software is a component that can be used with the operating system to restrict outside access to sensitive information and to restrict a particular user to information consistent with that user's security classification.

During this period, the National Computer Security Center, a division of the federal government's National Security Agency, rated security software, giving ratings (ranging from the most to the least secure) of A, B-3, B-2, B-1, C-2, C-1 and D. Addamax decided to produce B-1 software for Unix operating systems, a level of security demanded primarily by government users. During the years 1988-89, Addamax did develop B-1 security software for at least two different versions of Unix. [1]

[3]** While Addamax was trying to produce its security software, a different struggle was developing between AT&T--the inventor of Unix--and a number of major computer manufacturers. Although originally Unix had been freely licensed by AT&T, it **[*50]** appears that in the late 1980s AT&T began restricting its licenses in the face of various software modifications being introduced by individual licensees; and at the same time, AT&T began to develop a close working relationship with Sun Microsystems, a major microprocessor manufacturer. Other hardware manufacturers professed to fear that AT&T was trying to establish a single dominant version of Unix, intending to exclude the proprietary Unix variations from the market.

Accordingly, in May 1988, a number of important computer manufacturers--including defendants Hewlett-Packard and Digital Equipment Corp.--formed the Open Software Foundation as a non-profit joint research and development venture. [2] OSF registered under the National Cooperative Research Act of 1984, *15 U.S.C. § 4301*, although that status has no direct importance for the issues before us. At least one of OSF's professed objectives was to

---

[*] Of the Northern District of Illinois, sitting by designation.

[1] Because such software products emerge through test versions and then successive upgrades, it is difficult to pinpoint from the testimony precisely when the "product" was on the market. The district court gave June 1989 as the date, but Addamax claims some licenses dating back to 1988; the discrepancy is not critical to our resolution.

[2] The phrase "joint venture" is often used to describe a venture, other than one engaged in naked per se violations (like a price fixing cartel), that represents a collaborative effort between companies--who may or may not be competitors--to achieve a particular end (*e.g.*, joint research and development, production of an individual product, or efficient joint purchasing).

develop **[**4]** an alternative Unix operating system, denominated OSF-1, as a competitor to the Unix system being developed jointly by AT&T and Sun Microsystems.

In 1989, while OSF-1 was still being developed, OSF decided that it should include security software at the B-1 level. At that time, only three companies--AT&T, Addamax and SecureWare, Inc.--were producing security software for the Unix system. On November 1, 1989, OSF sent a "request for technology" to Addamax and SecureWare, soliciting bids for a B-1 security component for the new OSF-1 system. Bids were submitted on November 27, 1989, and OSF selected SecureWare on December 22, 1989. There **[**5]** is some indication that the Addamax security software was more sophisticated--one witness agreed that the contrast was between a Cadillac and a Chevette--but the Addamax price may also have appeared more substantial. [3] In any event, OSF-1 itself was never a very successful product.

Addamax continued to sell its own B-1 software for some period after losing the bid. Nothing prevented OSF "sponsors" (the founding members of OSF) or "members" (a great many other companies) from using Addamax security software for their own programs; and OSF sponsors and members were not the only potential buyers of Addamax's program. However, by 1991, Addamax began to phase out its B-1 security software, turning away new buyers so that it could devote **[**6]** its resources to the development of a new security software product, in which it appears that the company was successful.

In April 1991, Addamax filed a complaint in the district court against OSF, Hewlett-Packard and Digital, alleging various violations of federal and state ***antitrust law***. As later amended, the complaint charged the defendants, together with other companies associated with OSF, with horizontal price fixing, boycott, and otherwise unlawful joint venture behavior in violation of the Sherman and the Clayton Acts, *15 U.S.C. §§ 1-2*, *18*. A central theme, although not the only one, was that the defendants had conspired to force down the price for security software below the free-market level and otherwise to limit or impair the ability of Addamax to compete as a supplier of security software. [4]

[7]** Considerable discovery was conducted, and in due course the defendants moved for summary judgment. In a thoughtful decision in May 1995, the district judge dismissed Addamax's per se claims on the ground that the alleged conduct of the defendants did not fit within the narrow categories for which per se treatment was appropriate; but the court **[*51]** declined to dismiss Addamax's rule of reason claims, saying that the factual issues involving market power and anticompetitive effect were unsuitable for disposition on summary judgment. *Addamax Corporation v. Open Software Foundation, Inc., 888 F. Supp. 274 (D. Mass. 1995)*.

Thereafter, the parties entered into a stipulation that the damage phase of the case would be tried first, on a jury waived basis, to determine "whether the defendants' conduct was a material cause of injury in fact to the plaintiff and, if so, the amount of damages." The stipulation further provided:

> Solely for purposes of this stipulation, the Court will assume that the defendants' conduct as alleged in the Amended Complaint and described in the non-damages portions of the expert reports of Drs. Comanor and Howe occurred and violates **[**8]** the federal and state law accounts. However, the Court will not assume, but will hear and take evidence on, whether there was injury in fact to the plaintiff as a result of that conduct and, if so, the amount of damages, which is the subject of this phase of the trial.

Trial was conducted over 12 days between November 18 and December 16, 1996. Addamax presented as live witnesses Dr. Alsberg, three experts, and a single Addamax customer. The defendants did not present live witnesses but did cross-examine extensively and relied on documentary submissions and deposition testimony.

---

[3] SecureWare sought a single up-front payment of $ 3 million. Addamax requested an up-front payment of half this amount with royalties on OSF-1 systems sold before 1992. If one were optimistic about OSF-1 prospects, Addamax's bid could have appeared higher, although not in retrospect.

[4] Similar claims under Massachusetts ***antitrust law*** and a state law claim based on interference with business relations in violation of Massachusetts common law have not been separately pressed on this appeal and are not further discussed.

In May 1997, the district court issued a decision concluding that the defendants' conduct was "not a material cause" of Addamax's losses. *Addamax Corporation v. Open Software Foundation, Inc., 964 F. Supp. 549, 555 (D. Mass 1997)*. The court found that the B-1 software market was a highly risky business, that Addamax's belatedly-offered product was "too expensive and too complex, and . . . actually exceeded B-1 requirements." *Id. at 553*. The court said that Addamax faced severe competition from AT&T in the B-1 market and that SecureWare's product was "a cheaper and simpler" **[**9]** one. *Id.* Accordingly, the court held on the merits that Addamax was not entitled to any damages.

Addamax has now appealed and argues what in substance are three different points: that the district court erred in its factual determination that defendants' conduct was not a material cause of Addamax's losses in the B-1 security software market; that the stipulation, pertinent case law or both required the district court to find that the defendants' conduct had caused damage to Addamax; and that the court erred in dismissing the per se claims against the defendants. Because the legal issues set the frame for the factual ones, it is more convenient to take these claims in reverse order.

1. As we explained in an earlier case, per se rules under *section 1* of the Sherman Act have left only a couple of "serious candidates" for per se treatment: these include price or output fixing agreements (horizontal market division agreements are of essentially the same character) and "*certain* group boycotts or concerted refusals to deal." *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 593 (1st Cir. 1993)*. Since those words were written, the categories have been **[**10]** narrowed even further by the Supreme Court's decision to overrule *Albrecht v. The Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)* and thereby to exclude from per se treatment vertical maximum resale price fixing agreements. *State Oil Co. v. Khan, 522 U.S. 3, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)*.

HN1[] Where a plaintiff proves conduct that falls within a per se category, nothing more is needed for liability; the defendants' power, illicit purpose and anticompetitive effect are all said to be irrelevant. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. But courts have been very careful to confine per se treatment to conduct of the type that is almost always actually or potentially anticompetitive and has no redeeming benefits (*e.g.*, reduced costs, increased competition) worthy of being weighed against the negative effects. *Broadcast Music, Inc. v. Columbia Broadcasting System, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. Per se offenses remain very important--they include horizontal price fixing--but only for conduct that **[*52]** fits **[**11]** squarely within the "ever narrowing per se niche." *U.S. Healthcare, 986 F.2d at 593*.

HN2[] Joint venture enterprises like OFC, unless they amount to complete shams, *cf. Palmer v. BRG of Georgia, 498 U.S. 46, 112 L. Ed. 2d 349, 111 S. Ct. 401 (1990)*, are rarely susceptible to per se treatment. Where the venture is producing a new product--here, the OFC-1 software package--there is patently a potential for a productive contribution to the economy, and conduct that is strictly ancillary to this productive effort (*e.g.*, the joint venture's decision as to the price at which it will purchase inputs) is evaluated under the rule of reason. [5] This is so even if we accept, pursuant to the stipulation, the *arguendo* premise that OSF and those connected with it represented a large portion of the market for purchasing B-1 security software and represented a large portion of some kind of output market for integrated Unix software programs.

[12]** Addamax points to fragments of evidence that, assuming a full context were established, might or might not suggest that OSF was an aggressive response to the AT&T Sun venture and that Hewlett-Packard had a secret agenda to favor SecureWare over Addamax (for reasons that are never made quite clear), regardless of whether

[5] *Northwest Wholesale Stationers v. Pacific Stationery and Printing Co., 472 U.S. 284, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1984)*; *BMI v. CBS, 441 U.S. 1*; *NCAA v. Board of Regents, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*. *United States v. Topco Associates, 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*, would probably be explained today by noting that the anticompetition restraint in question was considerably broader than necessary to make the joint venture work. *United States v. Topco Assoc., 1972 U.S. Dist. LEXIS 11845, 1972 WL 669 (N.D. Ill. 1972)* (on remand), ***414 U.S. 801 (1973)*** (affirming judgment). *Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d 1 (1st Cir. 1979)*, cited by Addamax on this issue, involved naked horizontal restraints that were not ancillary to any actual joint venture.

Addamax offered a superior product. None of the evidence pointed to by Addamax suggests that OSF-1 was other than a legitimate, if ultimately unsuccessful, product; and there is nothing to suggest that the ancillary decisions--what inputs to purchase, at what price, and from whom--were not legitimately related to this effort. In this context, flinging around terms like "cartel" and "boycott" do not convert a rule of reason claim into a per se one.

2. On the other hand, ***HN3***[] neither is a joint venture "per se" legal. Any joint venture, especially one that involves competitors, tends to be susceptible to attack under *section 1*'s rule of reason--on the theory that the operations of the joint venture represent collaboration of the separate entities that own or control it. How far this theory can be pressed in the case of a truly integrated enterprise, whose "owners" were **[**13]** no more than stockholders, is a matter we need not pursue; we will assume here that the OSF joint venture, or some aspect of it, could be condemned under *section 1* if the balance of harms and benefits tipped in favor of harms; questions of power and motive are primarily clues to such effects. [6]

At this point, Addamax's most straightforward claim would be that OSF's concentration of purchasing power in the supposed "market" for acquiring B-1 security software was so great that it imposed a significant risk of forcing prices below competitive levels, and that those risks outweighed any benefit from the venture or, more plausibly, that the venture could achieve those benefits in a less restrictive fashion, *i.e.*, without creating a substantial threat of monopsony pricing. Whether or not this **[**14]** theory could be proved, we are here assuming liability *arguendo*. The question remains whether Addamax established--either as a matter of law or based on the evidence--some causal connection between this assumed violation by defendants and Addamax's failure in the B-1 security software business.

Addamax first argues that the stipulation required the district court to find that the assumed violation was a material cause of injury to Addamax. Addamax's reading is contrary both to the explicit language of the stipulation and to its evident purpose. The **[*53]** stipulation said that the first phase of the bench trial was to determine "whether" defendants' conduct was "a material cause of injury in fact" to Addamax (and, if so, the amount of damages), assuming *arguendo* that a violation of law had occurred. Pointedly, the stipulation went on to emphasize that although the existence of a violation was to be assumed, the court "will not assume, but will hear and take evidence on," the question whether there was "injury in fact to the plaintiff as a result of" the attributed conduct.

Certainly both Addamax's complaint and its experts *asserted* that the alleged conduct has caused **[**15]** injury, but this was not part of the facts to be assumed *arguendo*. The stipulation did not assume the truth of the complaint, but only that defendants had engaged in the "conduct" alleged in the complaint. Under the stipulation, the reports of Addamax's experts were assumed to be true only in describing the conduct and not its consequences; that is made clear by the reference in the stipulation to assuming the truth of the "non damages portions of the expert reports."

Addamax's more interesting argument is its claim that the case law, and the economic theory that underlies it, require a conclusion that the conduct assumed *arguendo* to comprise a violation must have caused injury to Addamax. The broadest version of this proposition is Addamax's claim that under the rule of reason, conduct is condemned only because it has an anticompetitive effect. Therefore, Addamax argues, there must have been some injury to it, and the only question that remains is to calculate the amount of damages.

A more specific version of the argument, also advanced, is that in this very case the complaint's straightforward charge is that the defendants engaged in an agreement that had the effect of **[**16]** reducing price for B-1 security systems and since Addamax was a provider of B-1 security programs, it necessarily was injured by a reduction in price. An alternative version is Addamax's claim that the joint venturers were engaged in suppressing demand for their own output--Unix programs like OSF-1 embodying B-1 software--and this in turn reduced the demand, and presumably therefore price, volume or both, for suppliers of the input.

It is technically an overstatement to say that actual anticompetitive impact is a requirement of liability in a rule-of-reason case. True, as a practical matter, most courts would be unlikely to condemn an otherwise legitimate joint

---

[6] Addamax's briefs in this court do not separately develop the asserted claims under section 2 and section 7; and in any event it is not clear on the present facts why those sections would give Addamax any additional help.

venture absent some showing of anticompetitive effect. But in principle, a sufficiently high *risk* of an anticompetitive effect, coupled with marginal benefits (or none at all that could not be achieved through an easily available less restrictive alternative) might justify condemnation under the rule of reason.

But all this is beside the point. Even if we assume that the OSF purchasing consortium was capable of exercising monopsony power directly or through coordination of its sponsor/members' actions, it does not follow **[**17]** that Addamax was a victim or that the alleged below-market price offered by the consortium materially affected Addamax. The only formal purchase by OSF involving Addamax was based on the November 1989 request for technology, in which SecureWare was the successful supplier. If below market price was paid, SecureWare, and not Addamax, was directly injured.

To be sure, Addamax claims that its sales opportunities were indirectly curtailed. While the OSF sponsors and members were free to purchase B-1 security programs from anyone they wanted on an individual basis, Addamax claims that winning the OSF-1 sale would have amounted to a valuable OSF endorsement, spurring other sales. But it is hard to see this loss as a consequence of monopsony pricing. In all events, Addamax's claim of secondary injury reduces itself to an issue of fact--not an issue that can be taken as resolved by stipulation or case law.

3. As a preface to its factual claims, Addamax asserts that the district court's decision recognizes a "defense" of mismanagement. ***HN4***[] A plaintiff's mismanagement is not a bar to recovery where an antitrust violation is a material cause of injury. *Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d at 14 n.21*. **[**18]** But mismanagement is certainly **[*54]** relevant to the factual question whether the antitrust violation had such an effect or whether the plaintiff is entirely the cause of its own failure. *Argus Inc. v. Eastman Kodak Co., 801 F.2d 38, 42-45 (2d Cir. 1986)*.

We turn then to the question whether the district court erred in its factual determination that Addamax's inability to succeed in its efforts to sell its B-1 security program for Unix more widely was materially caused by the defendants' conduct. ***HN5***[] On this issue, Addamax bore the burden of proof at trial. *Irvin Industries, Inc. v. Goodyear Aerospace Corp., 974 F.2d 241, 244 (2d Cir. 1992)*. On appeal, the district court's findings and ultimate conclusion of fact are entitled to stand unless found to be clearly erroneous. *La Esperanza De P.R., Inc. v. Perez Y Cia. De Puerto Rico, Inc., 124 F.3d 10, 15 (1st Cir. 1997)*.

Addamax is mistaken in its suggestion that the district court misunderstood the legal standard for causation: quite unlike *Haverhill Gazette Co. v. Union Leader Corp., 333 F.2d 798 (1st Cir. 1964)*, the district judge properly asked whether the **[**19]** defendants' assumed conduct had been a substantial or material cause of the losses claimed by Addamax. Although we there cautioned against an unduly rigid view of causation in computing damages once injury had been established, *id. at 808 n.16*, nothing in the opinion relieved the plaintiff from making the statutory showing (fully satisfied in *Haverhill*) that the violation had caused at least some injury to the plaintiff's business or property. *15 U.S.C. § 15*.

Here, the district court was presented with two competing versions of reality. Addamax's witnesses took the view that Addamax developed a superior B-1 product and its failure to succeed resulted from defendants' machinations which forced down the price of the product to sub-competitive levels and suppressed output for Unix software incorporating B-1 security programs. In some places, Addamax describes itself as the target, and elsewhere as the accidental victim, of a larger conspiracy directed against AT&T.

The defense version, which the district court adopted, was derived from defense depositions, cross-examination of the plaintiffs' experts and numerous documents. In this view, **[**20]** Addamax engaged in risky entry into a market dominated by AT&T, an established supplier of B-1 security software for Unix; the Addamax system was oversophisticated, expensive, arrived late, and never received the important certification from NSA's National Computer Security Center. And, in a market characterized by ever-changing demands, AT&T's promised development of a follow-on B-2 system made the market for B-1 security software for Unix inherently risky and in some measure transitional. There is nothing inherently implausible about either version; everything depends on the evidence.

In fairness to Addamax, the factual analysis in its brief represents exactly the kind of detailed critique of the evidence that fairly presents the question whether the district judge's findings are adequately supported by the record. Addamax identifies specific findings with which it disagrees, cites to record evidence it thinks was misconstrued, furnishes citations to the record for propositions it advances, points to counterveiling evidence that it says the district judge ignored and misinterpreted. In this respect, the brief deserves to be taken seriously, and we have done so.

But while in a few **[**21]** instances the district court may have misinterpreted an exhibit or ignored some fact that softens or qualifies the inference it draws, Addamax's own critique is filled with one-sided versions of events and refusals to confront evidence in support of the district court's findings. What emerges from our own review of the record is that the district court had evidence to support each of its key findings: that the business was a risky one; that Addamax entered late, with a high-priced, overbuilt and uncertified product; that AT&T and SecureWare, in different ways, posed major problems for Addamax; that many of Addamax's problems, including losses of customers, had begun before the OSF selection of SecureWare; and that changes in market conditions proved to be adverse to Addamax.

Further, the evidence is largely derived from Addamax itself, including the deposition **[*55]** and trial testimony of Dr. Alsberg. The risky nature of Addamax's venture was stressed in its disclosures to investors, and the delays and cost overruns concerning its B-1 product emerge from its own records; it was Addamax that expressed concern with competition from AT&T and especially its ability to offer a smooth **[**22]** transition to its own promised B-2 offering; and the defection of existing and prospective customers to AT&T, apparently before OSF-1, can be traced through Addamax records. The district court did not commit "clear error" in finding the facts in favor of defendants.

Addamax attacks the district court's findings as inadequate under *Fed. R. Civ. P. 52(a)*. By this, it means not that the explicit findings were wrong (it argues this elsewhere) but that the findings are either not sufficiently detailed or did not affirmatively find specific facts helpful to Addamax or did not address evidence that favored Addamax where there was evidence both ways. But the district court was not required to make findings on every detail, was not required to discuss all of the evidence that supports each of the findings made, and was not required to respond individually to each evidentiary or factual contention made by the losing side. *Knapp Shoes, Inc. v. Sylvania Mills Co., 15 F.3d 1222, 1228 (1st Cir. 1994)*; *Applewood Landscape & Nursery Co. v. Hollingsworth, 884 F.2d 1502, 1503-04 (1st Cir. 1989)*.

HN6[] There is no mechanical rule for determining the exact level of findings **[**23]** required by *Rule 52(a)*. In this instance, the district court made explicit intermediate findings (*e.g.*, competition from AT&T, the strengths and weaknesses of Addamax's product) making clear the bases for its ultimate finding on causation; and, with the help of counsel, it has been relatively easy to discern the evidence underlying these key findings. The district court could have written a 200-page decision on this case, but the far more compact assessment it made was entirely adequate under *Rule 52(a)*.

Affirmed.

HN1[] Trials, Judgment as Matter of Law

A motion for judgment as a matter of law under *Fed. R. Civ. P. 50* poses the legal question as to whether sufficient evidence was presented to support a jury verdict. The motion is properly granted only if the nonmoving party has not offered sufficient evidence to support a jury verdict in its favor. Before ruling on such a motion, a court must (a) resolve direct factual conflicts in favor of the nonmovant; (b) assume as true all facts supporting the nonmovant that the evidence tended to prove; (c) give the nonmovant the benefit of all reasonable inferences; and (d) deny the motion if the evidence would allow reasonable jurors to differ as to the conclusions that could be drawn. Judgment as a matter of law is appropriate only when all of the evidence points one way and is susceptible to no reasonable inference sustaining the position of the nonmoving party.

HN2[] Sherman Act, Claims

Section 1 of the Sherman Act condemns contracts, combinations, and conspiracies which unduly restrain trade. 15 U.S.C.S § 1.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

Torts > Vicarious Liability > Corporations > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

Unilateral actions of a single entity do not give rise to antitrust liability under § 1 of the Sherman Act (Act), 15 U.S.C.S. § 1. Section 1 of the Act applies only to concerted action. Proof of concerted action requires evidence of a relationship between two or more legally distinct persons or entities. A corporation and its wholly owned subsidiary are incapable of conspiring in violation of § 1.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > ... > Duties & Liabilities > Causes of Action & Remedies > Unauthorized Acts

Business & Corporate Law > Agency Relationships > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

When the interests of principal and agents diverge, and the agents at the time of the conspiracy are acting beyond the scope of their authority or for their own benefit rather than that of the principal, they may be legally capable of engaging in an antitrust conspiracy with their corporate principal.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN5[] Antitrust & Trade Law, Sherman Act

Economic reality, not corporate form, should control the decision of whether related entities can conspire. Antitrust policy requires the courts to seek the economic substance of an agreement, not merely its form.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN6[] Remedies, Damages

A plaintiff seeking treble damages under § 4 of the Clayton Act must establish: (1) an antitrust violation; (2) the fact of damage or injury; (3) a causal relationship between the violation and the injury; and (4) the amount of damages.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN7[] Remedies, Damages

A plaintiff's burden of proving the fact of damage under § 4 of the Clayton Act is satisfied by its proof of some damage flowing from the unlawful conspiracy; inquiry beyond this minimum point goes only to amount and not the fact of damage.

Opinion by: James M. Moody

Opinion

ORDER

Before the Court are Defendant Brunswick Corporation's Motion for Judgment as a Matter of Law on Count I of its Counterclaim and Plaintiffs' Motions for Judgment as a Matter of Law on Count I of Brunswick's Counterclaim. For the reasons set forth herein, Brunswick's motion will be GRANTED in part and DENIED in part. Plaintiffs' motions will also be GRANTED in part and DENIED in part.

I.

Brunswick Corporation is a large, multi-national conglomerate engaged in part in the production of stern drive and inboard marine engines. In Count I of its Counterclaim, Brunswick alleged that the Stern Drive Plaintiffs ("Plaintiffs") and their buying cooperative, Independent Boat Builders Inc. ("IBBI") engaged in a *per se* unlawful conspiracy to boycott MerCruiser engines **[*2]** at industry boat shows and to price MerCruiser engines at a disadvantage to

MerCruiser's competitors. [1] At the conclusion of its case-in-chief, Brunswick moved to dismiss as to 13 of the original Plaintiffs, leaving only IBBI and the five Plaintiffs who were represented on the IBBI board of directors. The Court granted Brunswick's motion to dismiss, and allowed Count I to proceed to the jury. The jury's verdict of June 19, 1998, found that none of the remaining Plaintiffs engaged in an unreasonable restraint of trade in violation of *Section 1* of the Sherman Act.

Brunswick has moved for judgment as a matter of law with respect to liability on Count I of the Counterclaim. Plaintiffs have also filed a motion for judgment as a matter of law as to both liability and **[*3]** damages, a motion which was mooted by the jury verdict unless the Court grants Brunswick's motion. Before addressing the merits of the arguments, the Court must consider the standard by which these motions shall be judged.

II.

HN1[] A motion for judgment as a matter of law under *Federal Rule of Civil Procedure 50* poses the legal question as to whether sufficient evidence was presented to support a jury verdict. *Gray v. Bicknell, 86 F.3d 1472, 1478 (8th Cir. 1996)*. The motion is properly granted only if the nonmoving party has not offered sufficient evidence to support a jury verdict in its favor. *Parrish v. Immanuel Med. Ctr., 92 F.3d 727, 731 (8th Cir. 1996)*; *Gray, 86 F.3d at 1478*; *Abbott v. Crocker, Mo., 30 F.3d 994, 997 (8th Cir. 1994)*. Before ruling on such a motion, a court must (a) resolve direct factual conflicts in favor of the nonmovant; (b) assume as true all facts supporting the nonmovant that the evidence tended to prove; (c) give the nonmovant the benefit of all reasonable inferences; and (d) deny the motion if the evidence would allow reasonable jurors to differ as to the conclusions that could be drawn. *Parrish, 92 F.3d at 731*; *Gray, 86 F.3d* ***[*4]*** *at 1478*; *Sherlock v. Quality Control Equip. Co., 79 F.3d 731, 735 (8th Cir. 1996)*. "Judgment as a matter of law is appropriate only when all of the evidence points one way and is susceptible to no reasonable inference sustaining the position of the nonmoving party." *Kehoe v. Anheuser-Busch, Inc., 96 F.3d 1095, 1100 (8th Cir. 1996)* (*quoting* *Tidwell v. Meyer's Bakeries, Inc., 93 F.3d 490, 494 (8th Cir. 1996))*.

III.

HN2[] *Section 1* of the Sherman Act condemns contracts, combinations, and conspiracies which unduly restrain trade. *15 U.S.C. § 1*. Because the alleged conduct, if proven, would amount to a *per se* violation of the antitrust laws, Brunswick was not required to prove any impact on interstate commerce or prove the unreasonableness of Plaintiffs' conduct. [2] In order to prevail on Count I of the Counterclaim, Brunswick was only required to prove by a preponderance of the evidence that one or more of the remaining Plaintiffs agreed to enter into the unlawful conspiracy. The agreement must have reflected "a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *American Tobacco Co. v. United States, 328 U.S.* ***[*5]*** *781, 810, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*; *ES Devel. Inc. v. RWM Enters., Inc., 939 F.2d 547, 554 (8th Cir. 1991)*. In its motion, Brunswick argues that the evidence establishes as a matter of law that such an agreement or understanding was reached by IBBI and the five boat manufacturers.

The evidence of an initial agreement between IBBI and the five individual members of the board of **[*6]** directors is overwhelming. The board met on May 18, 1993. The minutes reflect that the meeting was attended by Jimmy Fulks of Mariah Boats, Don Dacus of Galaxie Boats, Pete Gillon of Harris-Kayot Inc., Kevin Hirdes of Powerquest Boats,

---

[1] Brunswick manufactures MerCruiser stern drive engines. The Court will refer to Brunswick and MerCruiser interchangeably. For simplicity, the Court will refer to the "Stern Drive Plaintiffs" as the "Plaintiffs" instead of the "Counter-Defendants."

[2] For a discussion of the *per se* unlawful nature of this alleged conspiracy, see the Court's Order dated March 18, 1998. In their motion, Plaintiffs invite the Court to reconsider this finding. The Court declines to do so. The aspects of this boycott which rendered it *per se* unlawful are just as present following the close of the evidence as they were at the summary judgment phase. Furthermore, the issue here is not whether there are pro-competitive reasons for the existence of purchasing cooperatives. The issue here is whether IBBI and its members' actions exceeded the scope of lawful buying group activity.

and Rex Jardine of Campion Marine. The meeting was also attended by David Ball, the President of IBBI, and Barbara Coffey, the Secretary/Treasurer of IBBI. According to the minutes of the board meeting the IBBI board of directors unanimously approved a proposal to "blackout" MerCruiser engines at industry boat shows. In light of the plain language of the minutes, it is not hard to find the elements of an agreement:

> The board unanimously and enthusiastically accepted Pete Gillon's proposal to pick a trade show, AND SHOW NOT ONE MERCURY there. The board chose IMTEC in Chicago to be the main target, where IBBI will come as close as possible to a TOTAL MERCURY BLACKOUT for the outboards and the sterndrives. Pete further suggested and the board agreed that the Southwest Marine Trade Show in Dallas, where many IBBI members plan to exhibit, would be a good starting point to ZERO OUT MERCURY. At all other trade and each member's own dealer shows, the **[*7]** goal is a 100% MERCURY BLACKOUT, to send Mercury a clear message of IBBI solidarity.

DX 1168 (emphasis in original). The minutes also clearly reflect an agreement to "price position Volvo and Yamaha favorably":

> It was the *consensus of the board* that IBBI would seek 100% support from each and every member to not only list Volvo and Yamaha on their price lists but to position them favorably, or at least equal to Mercury, on their '94 price lists . . .

Id. (emphasis added). Finally, the minutes reflect an agreement to jointly limit the spending of Mercury cooperative advertising funds. According to the minutes, "the board felt that this would be a powerful tool to get Mercury's attention." *Id.*

The minutes also demonstrate that the board members actually agreed to implement the boycott through the respective companies:

> Pete Gillon stated that Harris-Kayot would not be displaying ANY Mercury's at this year's trade shows, including IMTEC, and Don Dacus said that Galaxie would also have a complete Mercury boycott. Jimmy Fulks said that his company had not planned to show in Dallas but would now plan to be there just for the purpose of zeroing out **[*8]** Mercury. All other board members expressed similar intentions, to completely boycott showing any Mercury's where possible and to greatly reduce the presence of any Mercury's where not possible to completely boycott.

Id. (emphasis in original). Brunswick produced several other documents corroborating the passage of the proposal and demonstrating that IBBI monitored the results of the boycott for its members.

At trial Plaintiffs attempted to distinguish their actions from an "agreement" by arguing that the boycott reflected in the minutes was "saber rattling," a mere hollow threat that they never actually intended to carry out. Jimmy Fulks, Kevin Hirdes, and David Ball were the only IBBI board members who testified at trial, and they admitted the passage of the resolution at the May 18, 1993 board meeting. In an effort to justify their actions, Fulks testified that the blackout was meant to be a "bargaining chip" in IBBI's negotiations with MerCruiser. Ball and Hirdes gave similar testimony. They also portrayed the boycott as an attempt to "level the playing field" with Brunswick.

Regardless of the likely merit of these contentions, this evidence has no bearing on the **[*9]** legality of the board's actions. Competitors violate the Sherman Act at the moment they agree to pursue a *per se* unlawful course of action. It does not matter what their motivation and intent are at the time of reaching the agreement, nor does it matter that their actions are objectively futile. [3] And unless they completely withdraw from the conspiracy (which is fairly difficult to do), it does not matter what they do following the consummation of the agreement. There are no "take backs" of *per se* violations of the Sherman Act. Once the existence of the agreement is shown, questions of intent and actual participation are relevant *only* to the issue of damages.

---

[3] The futility of a certain course of action might be relevant to the issue of liability if the evidence requires inferences to be drawn as to the existence of an agreement. But it is not relevant where the existence of the agreement is undisputed or blatantly obvious.

In spite of the unanimous passage of the proposal, the legal ramifications **[*10]** of this evidence are less than clear. This evidence is the only evidence that Brunswick introduced to prove an unlawful agreement. In fact, at trial, every member of the board who testified flatly denied that his individual company agreed to, or actually did participate in, any blackout or conspiracy. Brunswick was unable to produce any *additional* evidence demonstrating that any of the five specific Plaintiff companies actually agreed to the recommendation. With respect to the other members of IBBI during the alleged blackout, Brunswick simply produced no evidence at all.

Plaintiffs argue that these gaps in the proof mandate a finding that no unlawful agreement was reached. More specifically, Plaintiffs maintain that the members of the IBBI board of directors were incapable of conspiring among themselves or with IBBI, and that their actions taken in the capacity as directors can in no way be imputed to their companies so as to constitute an agreement between IBBI and the individual companies.

It is undisputed that ***HN3***[] unilateral actions of a single entity do not give rise to antitrust liability under *Section 1* of the Sherman Act. *Copperweld Corp. v. Independence Tube Corp., 467* ***[*11]*** *U.S. 752, 769, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. *Section 1* of the Act applies only to concerted action. *Fisher v. City of Berkeley, 475 U.S. 260, 266, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986)*; *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. Proof of concerted action requires evidence of a relationship between two or more legally distinct persons or entities. *Copperweld, 467 U.S. at 769*. In *Copperweld*, the Supreme Court held a corporation and its wholly owned subsidiary are incapable of conspiring in violation of *Section 1*. The rationale of *Copperweld* has broader implications, and courts have applied it in a variety of intraenterprise situations to preclude a conspiracy finding.

The real issue here is not whether IBBI and its member companies can conspire among themselves for purposes of *Section 1* of the Sherman Act. Under well-established authority they can. The companies themselves are competitors and their affiliation represents a joining of independent sources of economic power previously pursuing separate interests. *See* *Copperweld, 467 U.S. at 771*; *see also* *City of Mt. Pleasant, Iowa v. Associated* ***[*12]*** *Electric Coop. Inc., 838 F.2d 268, 274-78 (8th Cir. 1988)*; [4] *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 253 U.S. App. D.C. 142, 792 F.2d 210, 214-15 (D.C. Cir. 1986)*. Instead, the issue here is whether *individual* agents of IBBI's representative companies, sitting on IBBI's board of directors, can be found to bind their representative corporations in an unlawful conspiracy *solely* upon acts that they take while in the capacity as an IBBI board member. In other words, can the passage of the resolution by the board provide the predicate plurality of actors necessary for *Section 1* liability as to IBBI and the five Plaintiffs. Plaintiffs dispute such a proposition, maintaining that the actions of the board are solely the actions of IBBI.

[*13] There are well recognized exceptions to the *Copperweld* rule. In some instances an officer or employee clearly can conspire with its corporate principal. As the Eighth Circuit stated in *Pink Supply Corp. v. Hiebert, 788 F.2d 1313 (8th Cir. 1986)*:

> ***HN4***[] When the interests of principal and agents diverge, and the agents at the time of the conspiracy are acting beyond the scope of their authority *or for their own benefit rather than that of the principal*, they may be legally capable of engaging in an antitrust conspiracy with their corporate principal.

Id. (emphasis added); *see also* *Green v. Associated Milk Producers, Inc., 692 F.2d 1153, 1156-57 (8th Cir. 1982)*; *Morton Buildings of Nebraska, Inc. v. Morton Buildings, Inc., 531 F.2d 910, 916-17 (8th Cir. 1976)*; *Victorian House, Inc. v. Fisher Camuto Corp., 769 F.2d 466, 469 (8th Cir. 1985)*.

---

[4] The court in *City of Mt. Pleasant* noted that the critical inquiry is whether the alleged antitrust conspirators have a "unity of interests" or whether, instead, "any of the defendants has pursued interests diverse from those of the cooperative itself." *City of Mt. Pleasant, 838 F.2d at 274-77*. The Eighth Circuit defined "diverse" as "interests which tend to show that any two of the defendants are, or have been, actual or potential competitors" *Id.* All of the members of IBBI compete in the sale of recreational boats.

Likewise, a trade association or joint venture can conspire with its board of directors. For example, in *Rothery Storage & Van Co. v. Atlas Van Lines Inc., 253 U.S. App. D.C. 142, 792 F.2d 210 (D.C. Cir. 1986)*, a group of motor carriers challenged as a group boycott a competition suppressing membership policy **[*14]** promulgated by Atlas Van Lines' board of directors. The Atlas board of directors consisted of executives of other carrier companies that were "agents" within the Atlas system. The plaintiffs maintained that Atlas conspired with its board in promulgating the restrictions. The district court characterized the argument as follows:

> Plaintiffs attempt to invoke this exception on the ground that Atlas's board of directors included the executives of some of Atlas's own agents and carrier-agents, which are separate corporate entities, independent from Atlas and from each other; plaintiffs argue that the new Atlas policies would necessarily affect both the Atlas and non-Atlas business potential of these separate companies in some fashion and thus give the agent companies on the board an independent stake in whether the policy was adopted.

Rothery Storage and Van Co. v. Atlas Van Lines, Inc., 597 F. Supp. 217, 225-26 (D. D.C. 1984). The district court rejected the plaintiffs' argument, citing *Copperweld* and holding that the plaintiffs had not produced evidence that the board members possessed an "independent personal stake" separate from their obligations to Atlas. **[*15]** *Id. at 228-229*. The court went to great pains to demonstrate that the agent companies' interests were substantially similar to Atlas's interests as an organization. *Id.* ("Atlas's success is to a large extent dependent upon--rather than divergent from or inconsistent with--the success of its agent companies, either individually or as a group.")

On appeal, the District of Columbia Circuit reversed. *Rothery Storage & Van Co. v. Atlas Van Lines Inc., 253 U.S. App. D.C. 142, 792 F.2d 210 (D.C. Cir. 1986)*(Bork, J.). The court found that all but two members of the board represented legally separate entities that were direct competitors, not only among themselves, but with Atlas as well. The court was unswayed by the intraenterprise nature of the board's relationship with Atlas, finding it *dispositive* that a group of legally separate corporate entities agreed to a policy that restricted competition. The court's ruling is instructive:

> If it is deemed important, it may be noted that the Atlas Board of Directors consisted of actual or potential competitors of Atlas and that is also sufficient to take this case out of the *Copperweld* rule. *See* *United States v. Sealy* ***[*16]*** *Corp., 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*; *see also* *Topco Associates, Inc. v. United States, 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. The two non-carrier agents represented on the eleven-person Board when Atlas adopted the policy were capable of competing by acquiring interstate authority. The four carrier agents represented on the Board at the time were actual competitors of Atlas. Three of the remaining members of the board were officers of Atlas. *Thus, all but two members of the board represented separate legal entities that competed in interstate commerce*. This brings the case within the rule of *Sealy* and *Topco* and shows the existence of a horizontal restraint.

Rothery Storage & Van Co., 792 F.2d at 215 (emphasis added). The court's reasoning in *Rothery* has been embraced by leading antitrust commentators:

> [In *Sealy* and *Topco*], as well as [*National Collegiate Athletic Assn. v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)]*, which was also invoked by the [*Rothery*] court, the central rulemaking organization was wholly owned and controlled by the members who were thus making rules for themselves **[*17]** and its rules did indeed amount to a horizontal agreement among the members who remained independent actors in the marketplace. The *Rothery* court emphasized that the firms actually carrying the goods competed with each other and, in part, with Atlas, and that the rules governing their association, though formally promulgated by Atlas, reflected an understanding among the constituent parts, which remained independent forces in the market to which the Atlas rules applied. This conclusion seems correct even though the affiliated firms did not own Atlas or entirely control it.

AREEDA & HOVENKAMP, ***ANTITRUST LAW***, P 1478' (Supp. 1997).

A similar situation was addressed in *Tunis Bros. Co. v. Ford Motor Co., 763 F.2d 1482, 1496 (3rd Cir. 1985)*, *vacated and remanded*, *475 U.S. 1105 (1986)*, *reinstated*, *823 F.2d 49 (1987)*, *cert. denied*, *484 U.S. 1060 (1988)*, a case involving a conspiracy relating to a dealer termination. The plaintiff alleged a conspiracy between defendant

Ford Motor Company and a Ford dealership, Wenner Ford. The plaintiffs also added as defendants two individuals, Fraher and Hasel, who served simultaneously as directors of Wenner Ford and management **[*18]** employees of Ford Motor Company. The plaintiffs maintained that Wenner Ford conspired with Ford Motor Company *through* the two employees. *838 F.2d at 273-74*. The district court rejected the plaintiffs' argument, finding that the employees did not engage in the unlawful activity while performing a duty for Wenner Ford. *Id. at 274*. In other words, the district court found that the employees were solely representing Ford Motor Company at the time of the illegal act.

The Third Circuit reversed, finding that the plaintiffs had raised genuine issues of fact regarding issues of "motive, intent, and conflict of interest." *Tunis Bros. Co. v. Ford Motor Co., 763 F.2d 1482, 1499 (3rd Cir. 1985)*. The court further reasoned:

> It is reasonable to infer that Fraher and Hasel were mindful of their corporate obligations as officers and directors of Wenner Ford when they considered the matter of Tunis Brothers in 1980 and 1981. Fraher and Hasel served "two masters"--one Wenner Ford, the other Ford Motor Company. There is no reason why a jury must find that they made some of their Ford decisions adverse to plaintiffs with an obliviousness to its advantages to Wenner Ford. *He who wears* **[*19]** *two hats simultaneously should not be surprised if a jury wonders which hat he prefers. He should not be surprised if the jury concludes, by his actions, that he favors only one of the hats . . . .*

Id. at 1499 (emphasis added).

Applying these various legal principles to the facts of the instant case compels a similar conclusion, albeit a conclusion that there are no genuine issues of fact. As described above, there is no factual dispute that the members of the IBBI board unanimously agreed to the passage of a resolution, the purpose of which was a *per se* violation of the antitrust laws. Thus, the key issues here are the relationship of these board members to IBBI and among themselves, and the extent of their "personal stake" in the passage of the resolution.

The very nature of IBBI is such that the board members were never acting solely in the interests of IBBI, which is only a buying cooperative formed to pursue the economic interests of its individual members. [5] The members of IBBI, including the board members, are direct competitors of one another. When the IBBI board members voted to pursue the blackout, they were not taking an action that would accrue exclusively **[*20]** to IBBI's benefit. IBBI, as an organization, does not purchase marine engines and would itself stand to gain very little from the boycott. The board members, on the other hand, had everything to gain by pursuing the objectives of the boycott and the passage of the resolution was unquestionably intended for the primary benefit of their respective companies. [6] **[*21]** They wanted lower engine prices and higher volume discount thresholds. [7] They wanted Brunswick to accede to demands which would have likely increased the prices of engines to their smaller competitors. The board members were serving "two masters," and their actions cannot reasonably be described as the unilateral actions of IBBI.

Furthermore, Plaintiffs' repeated assertions that acts of the IBBI board were not binding on its members is irrelevant to the existence of this unlawful agreement. The board members themselves, as representatives of their competing companies, formulated and adopted the agreement. Thus, there is no issue as to whether the board had authority

---

[5] IBBI serves as a "conduit" through which many small companies are able to aggregate their buying power. With respect to engines, this aggregation of buying power is extremely beneficial, as the engine is by far the most expensive component of a completed boat.

[6] The Court is not saying that IBBI, as an organization, had no interest in the boycott. Clearly it did, because one of the stated objectives of the boycott was to preserve IBBI's status as a significant purchasing cooperative. However, the primary benefits flowing from the boycott, i.e., the financial benefits of the boycott, would ultimately flow to the individual members.

[7] Plaintiffs presented evidence at trial that Brunswick drastically lowered the volume discount threshold as part of an anticompetitive scheme to fragment large buying groups such as IBBI. Thus, it is not surprising that IBBI and the board members were pursuing this course of action. But again, their motivation in entering into the agreement is not relevant here.

to bind the board's representative companies. Plaintiffs' theory completely ignores the economic realities of the board members' actions.

Any other interpretation of this evidence would certainly spell the demise of *Section 1* enforcement. Under Plaintiffs' interpretation of intraenterprise conspiracy law, competitors would be encouraged to unite in unlawful conspiracies. Competitors could merely **[*22]** form a separate trade association and then pawn off, for example, their group price-fixing decisions as "unilateral acts" of a "board of directors." They could then point to a provision in a charter or operating agreement stating that board resolutions are "non-binding." The antitrust laws do not allow for such conduct. ***HN5***[] "Economic reality, not corporate form, should control the decision of whether related entities can conspire." *City of Mt. Pleasant, 838 F.2d at 275*. "Antitrust policy requires the courts to seek the economic substance of an agreement, not merely its form." *Weiss v. York Hospital, 745 F.2d 786, 815 (3rd Cir. 1984)*.

The Court finds that as a matter of law, IBBI and the board members entered into a *per se* unlawful agreement for the economic benefit of their representative companies, and as such, their actions rise to an unlawful agreement between IBBI and the board members' representative companies. Thus, the predicate plurality of actors necessary for *Section 1* liability has been established, and Brunswick is entitled to the entry of judgment as a matter of law as to the existence of a conspiracy in violation of *Section 1* of the Sherman Act.

In the verdict, **[*23]** the jury never reached the question of damages on the Counterclaim, instead finding that there had been no violation of *Section 1*. As indicated above, the Court should have instructed the jury as to the existence of an unlawful conspiracy between the five Plaintiffs and IBBI. Because the Court did not do so, Brunswick is potentially entitled to a new trial on the Counterclaim solely on the issue of injury and damages. However, the Court must still determine whether Plaintiffs are correct in their argument that Brunswick failed in the first instance to present legally sufficient evidence of injury and damage.

IV.

HN6[] A plaintiff seeking treble damages under § 4 of the Clayton Act must establish: (1) an antitrust violation; (2) the fact of damage or injury; (3) a causal relationship between the violation and the injury; and (4) the amount of damages. *Rosebrough Monument Co. v. Memorial Park Cemetery Assoc., 666 F.2d 1130 (8th Cir. 1981)*. Brunswick has demonstrated the existence of the violation. However, the fact of injury cannot merely be presumed due the *per se* nature of the violation. The fact of injury must be proven "to a reasonable certainty." *Id. at 1146*. The **[*24]** quantum of proof necessary to demonstrate fact of injury is somewhat less than that required to establish the amount of damage. ***HN7***[] Plaintiffs' "burden of proving the fact of damage under § 4 of the Clayton Act is satisfied by its proof of some damage flowing from the unlawful conspiracy; inquiry beyond this minimum point goes only to amount and not the fact of damage." *Rosebrough Monument Co., 666 F.2d at 1145* (*quoting Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969))*. Thus, if Brunswick demonstrated *any* injury to its business or property caused by the conspiracy, such as lost profits or lost sales, then the fact of damage has been established. Once fact of injury is demonstrated, a more relaxed standard will apply as to proof of the actual amount of damages. The ultimate issue will be whether Brunswick demonstrated reasonably ascertainable, non-speculative damages actually *caused by* the conspiracy.

Brunswick's expert, Dr. Richard Rapp, presented a damage study on behalf of Brunswick. Dr. Rapp chose a "before-and-after" model for his damages study. Dr. Rapp analyzed IBBI purchases of stern drive engines from **[*25]** MerCruiser during a "benchmark" period before the alleged conspiracy. He then compared those purchases to IBBI's purchases during the "conspiracy" period to determine the impact of the unlawful conspiracy on IBBI's purchases. Dr. Rapp concluded that IBBI members bought 254 fewer stern drive and inboard engines because of the unlawful conspiracy. The lost engine sales are the only theory of injury and damage that Brunswick has advanced.

The Court finds that Brunswick has submitted sufficient evidence of injury in fact. IBBI's internal documents corroborate the conclusion that Brunswick lost at least *some* engine sales because of the conspiracy. David Ball's September 15, 1993 letter to IBBI members stated that "the blackout strategy developed by your board of directors is taking root and reflecting solid results." DX 1283. Ball then outlined member participation in the blackout at two boat shows, and described increases in Volvo purchases through IBBI. Likewise, Ball's December 23, 1993 letter to Rex Jardine of Campion Marine further described the effects of the conspiracy. DX 1355. In sum, this evidence is sufficient to demonstrate the threshold issue of injury in fact.

The issue **[*26]** of the actual amount of damages is more complicated. Plaintiffs argue that Dr. Rapp's damage study is flawed in number of respects, but, as will be seen, the dispositive issue here relates to Dr. Rapp's decision to base his damage calculations on the purchases of IBBI as a group. Brunswick originally brought Count I of the Counterclaim against 18 members of IBBI. Near the end of its case-in-chief Brunswick moved to dismiss all of the Plaintiffs from the counterclaim with the exception of the five companies represented by the IBBI board of directors and IBBI itself. Curiously, Brunswick presented absolutely no evidence that any of the dismissed companies or companies that were not sued ever joined or participated in the unlawful conspiracy. In fact, Brunswick presented absolutely no evidence relating to these companies. [8] Thus, while Brunswick's damage study calculates damages based upon the purchasing patterns of approximately *twenty-five* companies, Brunswick only presented evidence that *five* companies actually joined the conspiracy. [9] Such an analysis is highly suspect considering that Dr. Rapp testified that the validity of his damage study depended upon a "substantial" **[*27]** number of IBBI members joining the conspiracy.

In defense of the damage study, Brunswick argues that the jury is entitled to conclude that *all* of IBBI's reductions in purchases during the conspiracy period are attributable to the conspiracy. Brunswick points to an IBBI document stating that "at Dallas 10 out of 11 members and at Chicago 18 out of 20 members hung Volvo Penta and/or Yamaha power either exclusively or jointly with MerCruiser." The Court believes that such a statement is so ambiguous as to be relatively meaningless. The statement does not identify who the members were, nor does **[*28]** it identify how many actually showed MerCruiser exclusively. Brunswick also points to David Ball's blackout "updates" quantifying how much Volvo orders through IBBI had increased. While such statements are certainly relevant, they in no way identify which Plaintiffs were increasing their Volvo orders, and more importantly they do not identify *why*.

Brunswick further argues that it was not required to sue all of the co-conspirators, and that it has demonstrated that the remaining members were later joining members of the conspiracy. One theory is that the balance of the IBBI members joined the conspiracy when they filed this lawsuit. Brunswick then cites the joint and several liability rule, arguing that it cures any problems presented by the study.

Brunswick is entirely correct that it was not required to sue all of the co-conspirators. However, the joint and several liability rule is of no assistance to Brunswick's damage model. Of course, co-conspirators are jointly and severally liable for the entire effect of an unlawful conspiracy. But the rule allowing for joint and several liability in a conspiracy does not abrogate the requirement that Brunswick can only recover for loses **[*29]** actually *caused by* the conspiracy. To illustrate the problem here: assume companies 1-5 reduced their MerCruiser purchases pursuant to a conspiracy; assume companies 6-25 reduced their purchases for other reasons unrelated to the conspiracy; and finally assume companies 6-25 joined the conspiracy later by the filing of this lawsuit. [10] In such an instance, the reductions in MerCruiser purchases by companies 6-25 are not caused by the conspiracy, and thus those reductions are not relevant to damages, even though companies 6-25 clearly are conspirators and are jointly and severally liable for all of the effects of the conspiracy.

---

[8] These companies did not join the conspiracy merely by virtue of the fact that they were members of IBBI at the conspiracy's inception. Brunswick was required to demonstrate that these companies individually agreed to participate in the unlawful conspiracy.

[9] Several Plaintiffs joined IBBI after the conspiracy period and several IBBI members during the conspiracy period were never parties in this lawsuit.

[10] This an unlikely proposition because of the *Noerr-Pennington* doctrine. Brunswick maintains an exception applies in this instance, but there merits of that particular position are not relevant to this hypothetical.

The situation in the present case is no different than the above illustration. Even if the Court assumes that the five board member Plaintiffs reduced their **[*30]** MerCruiser purchases *solely* because of the conspiracy (which in itself is an unwarranted assumption), there is absolutely no evidence demonstrating that the twenty remaining members of IBBI reduced their MerCruiser purchases because of the conspiracy. This conclusion renders any damage calculation wholly speculative. [11]

Further compounding the problem, Plaintiffs presented substantial and unchallenged evidence of several legally valid reasons why *all* of the IBBI members may have reduced their MerCruiser purchases during the conspiracy period. Some of these reasons include the following: (1) in 1994 MerCruiser discontinued a popular 3.0 liter engine, an engine that accounted for approximately 25% of IBBI's prior volume up to that time; (2) for **[*31]** six months during the blackout, MerCruiser refused to allow IBBI members to purchase more engines than they had previously forecasted, thus requiring IBBI members to turn to other suppliers for their excess needs; and (3) during the conspiracy period, Yamaha exited the stern drive engine market and had an admitted "fire sale" on its remaining inventory. Thus, in order to find damages under this model, the jury would be required to blatantly speculate that the members of IBBI, as a group, reduced their purchases because of the conspiracy, and not because of the other valid reasons. [12] The jury would be required to do so even though there is not a shred of proof that twenty of the companies even joined the conspiracy. This proof further renders any potential damage award wholly speculative.

[*32] On cross-examination, Plaintiffs' counsel and Dr. Rapp quarreled over Dr. Rapp's decision to base his damage figures on the buying patterns of IBBI as a group. Dr. Rapp's testimony underscores the untenable nature of his theory:

> A. [If] it turned out that there were only one or two members in the conspiracy, just speaking hypothetically, then I would have to say that this damage theory would not be a workable one to use unless you thought . . . that those one or two people lost 254 engines. If, on the other hand, there were a substantial number of IBBI members, perhaps not every one who was listed on the Brunswick counterclaim complaint, if there are a substantial number, then I would like to have the jury consider this damage theory as a reasonable way of estimating damages.

Tr. at 5439. Focusing on this particular passage, the Court finds that there was absolutely no evidence in the record that would allow a juror to reasonably conclude that the five board member Plaintiffs accounted for all 254 of the alleged reduced engine purchases. Notably, Dr. Rapp testified unequivocally that "the analysis requires that a substantial number of the membership of IBBI participated." **[*33]** Tr. at 5440.

Other testimony was revealing as well. Dr. Rapp continually acknowledged the deficiencies in his theory:

> Q. Let me ask you this question, Dr. Rapp. Suppose before you started this analysis Brunswick's attorneys came to you and said IBBI has 30 members, but only five of them, only five of those 30 participated in this alleged conspiracy. Could you have still done your analysis this way?
>
> A. I would not have done my analysis that way if it were clear that the five were distinguishable and there were no -- there were no legal reasons why the others might be included too for some reason.

Tr. at 5444. This portion of Dr. Rapp's testimony, like Brunswick's argument above, appears to reflect a misunderstanding as to the nature of joint and several liability. None of the co-conspirators are liable for reductions

---

[11] Both Fulks and Hirdes, the only board members that testified, denied that Mariah or Powerquest even reduced their MerCruiser purchases. Brunswick presented no evidence that they did (other than to point out that they were in IBBI during the conspiracy).

[12] This situation is in marked contrast to the position Brunswick advocated with respect to Dr. Hall, who did not use a "before-and-after" damage model. Dr. Hall testified that all market factors were taken into account before arriving at the hypothetical market division, and it was clear from the evidence that he did in fact take all of the market factors into account. In contrast, Dr. Rapp simply admitted that he did not even consider obvious market factors present in the benchmark and conspiracy periods. Additionally, the evidence reflected that Dr. Rapp was unaware that Plaintiffs Armada and Caravelle purchased over 400 engines from OMC during the benchmark period, a fact that, to use the words of Dr. Rapp, could "mean the damages are too big." Tr. at 5496. Dr. Rapp's eventual explanation for failing to take the OMC purchases into account was not persuasive.

in engine purchases for reasons unrelated to the conspiracy, regardless of whether they ultimately joined the conspiracy later.

Near the end of his testimony, Dr. Rapp conceded that his damage figure would have no application to a conspiracy of only a few IBBI members:

> A. I will certainly concede this, that if the -- if the jury were to decide **[*34]** that only a small group of plaintiffs were responsible, that they would have to make use of this damage theory, but not use it, *but not use the conclusion of $ 397,000 to get at the right answer*. That would have to be reduced. It it is only one or two people rather than 25 or 30.
> Q. Dr. Rapp, how do you know that the reduction in purchases would be attributable to the one or two and not to the many that may have had other business reasons for reducing the purchases of MerCruiser?
> A. The other business reasons get -- whatever business reasons they had in 1993, the assumption is that they would have had in 1992. That's what the benchmark is all about. That's why the damages are what they are because there's a comparison to a historical factual benchmark.
> * * *
> Q. Dr. Rapp, if you had prepared a table that is 2587 and reflected on it the purchases of all boat builders of whom IBBI are only a small fraction, and you had shown a benchmark period and a damage period, would you concede that if you included the entire industry, this wouldn't be a valid analysis. Is that right?
> A. That's correct.
>
> Q. Now, if you included the purchases of all IBBI members, many of **[*35]** whom are not even alleged to be a part of the conspiracy, isn't it equally invalid?
>
> A. I guess I have to go back to the question of who is in and who is out of the conspiracy. I can only answer you, again, abstracting from the law in the extreme. *It is true if it is determined that there are only a very few conspirators, then this analysis may still be useful, but not the full amounts, not the full amounts*. That doesn't mean, in other words, you don't have to lump this and say we have to go individual by individual and ask them because that's not the way to get anywhere, what they would have purchased if they weren't participants in the conspiracy.
> Q. So what you are saying is you think it would be fair for the jury to start with your number of $ 396,792 and the circumstance you described and adjust it based on how many members of IBBI they might think were participants in the conspiracy. Is that right?
>
> A. *I'm not sure how you would go about it*. It wouldn't just be a question of adjusting that number. You would have to go back and think through what the right total is, used shares; but, in general, something like that, yes.
>
> Q. But you haven't done that, **[*36]** have you?
>
> A. *I have not*.
> Q. You have not given the jury any evidence to do that. Is that right?
>
> A. I have given you the table and a description of how it is put together. *But I did not anticipate at all the proposition that there would only be a very few members of the alleged conspiracy. That's right*.
> Q. I think you indicated that if it is only one or two that participated in the conspiracy that this would not be a valid approach?
> A. Right, right.
> Q. But you say if it is 25 or 30 it is a valid approach?
> A. Yes, that's right.
> Q. Where do you draw the line?
>
> A. *I don't know where to draw the line*. You would have to use adjustments in between. You would have to work with it in between. There is no line.

Tr. 5445-49 (emphasis added).

Construing all of the evidence in Brunswick's favor, the Court finds that there is no reasonable basis for a juror to conclude that any IBBI member's actions, aside from the five board members, are solely attributable to the blackout. There is absolutely no evidence in the record suggesting that the remaining companies reduced their MerCruiser purchases *because* of the conspiracy and there **[*37]** is substantial unrebutted evidence in the record that *all* IBBI members may have reduced MerCruiser purchases for reasons that were entirely lawful, reasons that were exclusively present during either the benchmark period or the conspiracy period. Thus, the Court finds that Brunswick's damage study cannot support a damage award in Brunswick's favor, and that the Plaintiffs are entitled to judgment as a matter of law with respect to the issue of damages on Count I of the Counterclaim.

V.

As described above, Brunswick has demonstrated, as a matter of law, a *per se* violation of *Section 1* of the Sherman Act. However, Brunswick presented inadequate evidence of damages, such that no award of damages on the counterclaim would have been sustainable, even if the jury had been instructed to find the existence of the unlawful conspiracy.

The Court has emphasized on numerous occasions that expert reports were conclusive and final, and that parties would not be allowed to offer new opinions not properly disclosed according to firm disclosure deadlines. This principle even worked to deny Plaintiffs the ability to present a damage claim to the jury for attempted monopolization of **[*38]** the outboard engine market. Thus, the Court will not allow Brunswick a new trial on damages. Brunswick had its opportunity to present a damage claim to the jury, and having failed in that regard, there is no just reason to afford Brunswick a second chance. However, Brunswick has demonstrated injury in fact due to a *per se* violation of the Sherman Act. Accordingly, upon entry of judgment, the Court will award Brunswick nominal damages on Count I of the Counterclaim in the amount of one dollar ($ 1.00), trebled to three dollars ($ 3.00).

VI.

In accordance with the above, Defendant Brunswick Corporation's Motion for Judgment as a Matter of Law on Count I of its Counterclaim (Docket # 1176) is hereby GRANTED in part and DENIED in part. Plaintiffs' Motions for Judgment as a Matter of Law on Count I of Brunswick's Counterclaim (Docket #'s 1155, 1157, 1159, 1160, 1163, and 1167) are hereby GRANTED in part and DENIED in part.

IT IS SO ORDERED this 4 day of September, 1998.

James M. Moody

United States District Judge

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > Remittiturs

HN1[] **Appeals, Remands**

A plaintiff in federal court, whether prosecuting a state or federal cause of action, may not appeal from a remittitur order he has accepted. The policy underlying this rule sounds in contract law. By accepting remittitur of damages in lieu of a new trial, the plaintiff has accepted the benefit of not having to undergo the rigors, risks, and costs of a new trial in exchange for an agreement not to challenge the damages award or otherwise appeal any matter pertaining to the issues covered by the remittitur offer. However, a party who has accepted remittitur of damages on one cause of action may still appeal issues related to other causes of action not subject to the remittitur order.

Opinion

[*1214] **EBEL**, Circuit Judge.

Plaintiff-Appellant Utah Foam Products Co. ("Utah Foam") appeals from a jury verdict and order of damages in its favor on its fraud and negligent misrepresentation claims against Defendant-Appellee, The Upjohn Company ("Upjohn"). Utah Foam claims that the district court erred in making certain evidentiary rulings, in dismissing Utah Foam's claim under the Utah Unfair Trade Practices Act, and in denying Utah Foam's request for prejudgment interest on damages awarded. Utah Foam also claims that the district court judge erred in refusing **[**2]** to recuse himself from the case. Upjohn brings a cross-appeal, claiming that the district court erred in refusing to grant judgment as a matter of law in favor of Upjohn on Utah Foam's fraud and negligent misrepresentation claims. We affirm the jury's verdict and all of the district court's rulings.

Background

This lengthy litigation grew out of a dispute about the price Upjohn charged Utah Foam for polymeric isocyanate (trade name "PAPI"), a chemical made by Upjohn and used by Utah Foam in making rigid sprayable polyurethane foam, an insulating material. From 1978 until 1986, Upjohn contracted to supply Utah Foam with PAPI 27, one of the types of isocyanate made by Upjohn. According to Utah Foam, Upjohn fraudulently and negligently misrepresented to Utah Foam that Utah Foam would always be the recipient of Upjohn's "best price" for PAPI. See *Utah Foam Products Co. v. The Upjohn Company, 930 F. Supp. 513, 516 (D. Utah 1996)*. Utah Foam discovered this alleged fraud and misrepresentation when circumstances forced Utah Foam to buy PAPI 27 from one of Utah Foam's competitors, and found that the competitor was able to offer the product to Utah Foam at a lower price **[**3]** than that charged by Upjohn.

[*1215] In July, 1987, Utah Foam filed suit against Upjohn, claiming that Upjohn violated Utah's Unfair Practices Act, breached the contract, and committed fraud and negligent misrepresentation. Utah Foam requested compensatory and punitive damages. During a drawn-out period of pretrial litigation, the district court repeatedly ruled that Upjohn's records regarding the sales of PAPI 135 would not be subject to discovery in this case, because PAPI 135 was not of like grade and quality to PAPI 27, the subject of Utah Foam's Unfair Practices claim. [1] The district court also denied Utah Foam's motions to compel production of sales records of CPR, a wholly-owned subsidiary of Upjohn, on the basis that all deliveries of PAPI from Upjohn to CPR qualified as intra-company transfers, and not sales, and thus they were irrelevant to Utah Foam's claims. On January 12, 1994, the district court granted summary judgment to Upjohn on Utah Foam's state price discrimination claim. The district court dismissed Utah Foam's breach of contract claim on October 18, 1994. On December 18, 1995, the district court ruled that Utah Foam's experts' testimony as to the calculation **[**4]** of damages would be limited to proving lost margins, based upon differences in the net price paid for PAPI, and not lost sales. On January 26, 1996, Utah

---

[1] Shortly before trial, Utah Foam successfully argued to the district court that Upjohn's PAPI 135 records were relevant to its fraud claim. However, in light of Utah Foam's unjustified tardiness in making this argument for the first time so close to the scheduled start of trial, the court limited discovery of those records to those already prepared by Upjohn (years 1983-1985). The court refused to order production of PAPI 135 records from earlier years, on the grounds that so doing would cause real prejudice to Upjohn.

Foam filed a motion for recusal, on the ground that the district court judge had exhibited bias against Utah Foam and favoritism for one of Upjohn's counsel. After a hearing, the district court denied the motion.

Utah Foam's fraud and negligent misrepresentation claims went to trial before a jury on February 20, 1996. See *Utah Foam, 930 F. Supp. at 515*. **[**5]** The jury found that Upjohn had made fraudulent and negligent misrepresentations to Utah Foam regarding the price of PAPI, and awarded Utah Foam $ 313,593 in compensatory damages plus $ 5.5 million in punitive damages. See *id. at 516*. Upjohn moved under *Federal Rule of Civil Procedure 50(b)* to vacate or adjust the award of compensatory damages on Utah Foam's fraud and negligent misrepresentation claims. See *id. at 518*. The court refused to vacate the award, but reduced the amount of compensatory damages to $ 303,573.11. See *id. at 518-22, 532*. The district court also denied Upjohn's *Rule 50(b)* motion to vacate the award of punitive damages, but granted its motion for remittitur, reducing the punitive damages award to $ 607,142.22. See *id. at 523-32*. In addition, the district court denied Utah Foam's motion for prejudgment interest. See *id. at 522-23*. The district court then issued an order offering Utah Foam the option of accepting remittitur or undergoing a new trial on all issues. See Utah Foam Prods. Co. v. The Upjohn Co., No. 87-C-955G, at 5-6 (D. Utah Nov. 19, 1996) (unpublished order). **[**6]** Utah Foam accepted remittitur.

Utah Foam now appeals the district court's evidentiary rulings restricting the discovery of Upjohn's PAPI 135 sales records, prohibiting discovery of CPR's records, and limiting Utah Foam's experts' testimony as to estimated losses and damages; the district court's denial of prejudgment interest; the district court's dismissal of Utah Foam's Utah Unfair Practices claim; and the district court's denial of Utah Foam's motion to recuse. Upjohn cross-appeals the district court's refusal to grant Upjohn's *Rule 50(b)* motion to vacate the jury's finding of liability for fraud and negligent misrepresentation.

I. Acceptance of remittitur

In *Donovan v. Penn Shipping Co., Inc., 429 U.S. 648, 650, 51 L. Ed. 2d 112, 97 S. Ct. 835 (1977)* (per curiam), the Supreme Court reiterated "the longstanding rule that ***HN1***[] a plaintiff in federal court, whether prosecuting a state or federal cause of action, may not appeal from a remittitur order he has accepted." The policy underlying this rule sounds in contract law. By accepting remittitur of damages in lieu of a new trial, the plaintiff has accepted the benefit of not having to undergo the rigors, risks, **[**7]** and costs of a new trial in exchange for an agreement **[*1216]** not to challenge the damages award or otherwise appeal any matter pertaining to the issues covered by the remittitur offer. However, a party who has accepted remittitur of damages on one cause of action may still appeal issues related to other causes of action not subject to the remittitur order. See *Denholm v. Houghton Mifflin Co., 912 F.2d 357, 359 & n.2 (9th Cir. 1990)* (listing cases); *Call Carl, Inc. v. BP Oil Corp., 554 F.2d 623, 626-27 (4th Cir. 1977)*; Bruce I. McDaniel, Annotation, Plaintiff's Right to Appeal Adverse Judgment on One Cause of Action As Affected by Acceptance of Remittitur on Another Cause of Action, 41 A.L.R. Fed. 856, 857 (1979).

In *Alley v. Gubser Dev. Co., 785 F.2d 849, 856-57 (10th Cir. 1986)*, the district court gave the plaintiffs a choice between remittitur of the jury's punitive damages award or a new trial on all issues. The plaintiffs chose remittitur. When the plaintiffs attempted to appeal the district court's denial of attorney's fees and prejudgment interest on the compensatory damages, we held that they were **[**8]** barred from doing so under Donovan. See id. In short, the well-established rule is that ***HN2***[] acceptance of remittitur of damages effectively waives the right to appeal any issue pertaining to the causes of action covered by the remittitur offer. See *Denholm, 912 F.2d at 360-61* (acceptance of remittitur of compensatory damages bars appeal of pretrial orders excluding evidence relevant to proving those damages). Moreover, acceptance of remittitur of either compensatory or punitive damages bars appeal of issues related to both. See *Alley, 785 F.2d at 857* ('The district court's remittitur embraced all issues considered in the case and . . . the Alleys' acceptance of the remittited judgment waives their right to appeal these issues."); see also *Lanier v. Sallas, 777 F.2d 321, 322 (5th Cir. 1985)* (because punitive damages and compensatory damages based upon same cause of action are "inextricably intertwined," acceptance of remittitur of compensatory damages barred appeal of district court's refusal to submit issue of punitive damages to the jury).

Here, Utah Foam does not dispute that it had the choice of accepting either remittitur **[**9]** of its damages based upon its fraud and negligent misrepresentation claims or face a new trial on those claims. Nor does Utah Foam attack the district court's decision to impose remittitur, but rather seeks to appeal the court's rulings on issues directly related to Utah Foam's claims at trial, namely, the district court's denial of pre-judgment interest, its rulings limiting the scope of discovery of Upjohn's PAPI records, its ruling denying discovery of CPR's PAPI documents, and its limitation of Utah Foam's experts' testimony as to the calculation of damages. Because Utah Foam accepted remittitur of damages on its fraud and negligent misrepresentation claims and thereby avoided a complete retrial of those issues, Alley bars Utah Foam's appeal of all issues which relate to those claims. We find that Utah Foam's acceptance of remittitur waived the right to appeal these issues and decline to consider them now.

II. Utah Unfair Practices Act claim

Because the Utah Unfair Practices Act claim did not go before the jury in this case and the district court did not order a retrial of that claim in the event Utah Foam did not accept the remittitur on the fraud and negligent misrepresentation **[**10]** claims, Utah Foam did not waive the right to appeal the dismissal by summary judgment of the Unfair Practices Act claim. See *Call Carl, 554 F.2d at 626-27* (acceptance of remittitur on fraud and deceit count does not preclude appeal of directed verdict on Sherman Act count). ***HN3***[] We review a grant of summary judgment de novo, applying the same standard as the district court. See *Sports Racing Servs., Inc. v. Sports Car Club of America, Inc., 131 F.3d 874, 882 (10th Cir. 1997)*. After reviewing the record on appeal, we conclude that the district court did not err in granting Upjohn's motion for summary judgment on Utah Foam's price discrimination claim.

HN4[] Discrimination in pricing is illegal "where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce . . . ." *Utah Code Ann. § 13-5-3(1)(a)* (1996); see *Burt v. Woolsulate, Inc., 106 Utah 156, 146 P.2d 203, 205 (Utah 1944)* ("It is not every discrimination in price that is outlawed by the Utah Act, but only those which tend to substantially lessen competition or tend to **[*1217]** create a monopoly."). ***HN5***[] The party alleging **[**11]** illegal pricing discrimination bears the burden of showing that the illegal conduct may have substantially impacted competition. See *Gold Strike Stamp Co. v. Christensen, 436 F.2d 791, 796-97 (10th Cir. 1970)*; *Burt, 146 P.2d at 205*. Under Utah law, the term "commerce" means "intrastate commerce in the state of Utah." *Utah Code Ann. § 13-5-5* (1996). It is not clear that the commerce affected here was intrastate commerce. See *Belliston v. Texaco, Inc., 521 P.2d 379, 381-82 (Utah 1974)*. However, even if the affected commerce was intrastate, we agree with the district court that it was not substantially lessened by the defendants' conduct, and accordingly we affirm.

At summary judgment, the district court held that Utah Foam could only prove discriminatory pricing damages totaling $ 18,981 and could not prove injury to competition. Thus, the district court dismissed the claim because Utah Foam had failed to show that Upjohn's price discrimination substantially impacted competition in the Utah insulating foam market, as required by the statute. We have carefully reviewed the district court's order and the record, applying the same **[**12]** standard used by the district court. We agree with the analysis and findings of the district court. Accordingly, we affirm the district court's conclusion that the defendant was entitled to summary judgment because its acts of discriminatory pricing did not have, and were not likely to have, the effect of substantially lessening competition or a tendency to create a monopoly in any line of commerce. [2]

III. Evidentiary issues

Utah Foam asserts that the district court erred in not allowing it to discover Upjohn's PAPI 135 sales records and records of transfers of PAPI from Upjohn to CPR, and claims that if it were allowed to present this evidence, its anticompetitive damages would be shown to have had more than a de minimus effect on commerce in Utah. ***HN6***[

[2] We disagree with Utah Foam's argument that the grant of summary judgment against it on its state discriminatory pricing claim is inconsistent with the jury verdict holding Upjohn liable for fraud and negligent misrepresentation.

] We review the district court's **[**13]** decision to exclude evidence at the summary judgment stage for abuse of discretion. See *Sports Car Racing Servs., 131 F.3d at 894*.

HN7[] Under the Utah price discrimination statute, comparisons of allegedly similar discriminatory sales must be made among sales of products of "like grade and quality." *Utah Code Ann. § 13-5-3(1)(a)* (1996). The plaintiff bears the burden of proving that the products in question were of like grade and quality. See *Liggett Group, Inc. v. Brown & Williamson Tobacco Corp., 1989-1 Trade Cas. (CCH) P 68,583, at 61,103 (M.D.N.C. 1988)*. [3] "In fashioning a 'like grade and quality' standard, courts have generally emphasized the presence, or absence, [of] significant physical differences between products and the effect of those differences upon consumer preferences." Id. (listing cases). Also relevant to the inquiry is whether there are "differences in the way in which a customer can or must use the product." J.P. Ludington, Annotation, What Are "Commodities" and "Commodities of Like Grade and Quality," within *Provision of Robinson-Patman Act Prohibiting Price Discrimination Between Different Purchasers of Commodities of Like Grade and Quality- Federal Cases, 16 L. Ed. 2d 1097, 1101 (1967)*. **[**14]** Thus, "bona fide physical differences affecting consumer use or marketability should be sufficient to cause products not to be of like grade and quality." ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments 444-45 (4th ed. 1997).

Although Utah Foam asserts that PAPI 27 and PAPI 135 are very similar in structure and may be used interchangeably, it is undisputed that PAPI 27 and PAPI 135 differ, mainly in terms of viscosity and reactivity, particularly in colder situations. **[**15]** As a result, some consumers prefer one over the other; **[*1218]** Utah Foam's own president admitted in his affidavit and during depositions that the company had a clear preference for PAPI 27 over PAPI 135 because of PAPI 27's superior performance qualities at high altitudes. Thus, the district court did not err in holding that, for the purposes of Utah Foam's price discrimination claim, PAPI 135 was not a product of "like grade and quality" to PAPI 27 and in refusing to order discovery of Upjohn's PAPI 135 sales records for the purposes of Utah Foam's price discrimination claim.

Utah Foam also argues that the court erred in not allowing it to discover CPR's PAPI records. According to Utah Foam, CPR, a producer of foam insulation systems, was both a competitor of Utah Foam in the Utah market and an economic entity independent from Upjohn. Because the district court held CPR to be economically indivisible from Upjohn, and because there was no evidence offered that Upjohn used CPR to sell raw PAPI 27 to Utah Foam's competitors at lower prices than those available to Utah Foam, the court held that Upjohn's transfers of PAPI to CPR were not within the purview of the Utah price discrimination **[**16]** statute.

HN8[] It is well established that a defendant's transfers of product to a wholly owned subsidiary is an intra-corporate transfer and not a "sale" for purposes of a price discrimination claim. See *City of Mt. Pleasant, Iowa v. Associated Elec. Coop., Inc., 838 F.2d 268, 277-79 (8th Cir. 1988)*; *Russ' Kwik Car Wash, Inc. v. Marathon Petroleum Co., 772 F.2d 214, 221 (6th Cir. 1985)*; *Security Tire & Rubber Co. v. Gates Rubber Co., 598 F.2d 962, 966 (5th Cir. 1979)*. This is because the wholly owned subsidiary and the parent company are seen as a single economic actor. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 770-71, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* (In the context of Section 1 of the Sherman Act, "A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal 'agreement,' the subsidiary acts **[**17]** for the benefit of the parent, its sole shareholder.")

Utah Foam claims that CPR was in fact an "independent subsidiary" of Upjohn, and therefore transfers of PAPI 27 from Upjohn to CPR should be treated as "sales" under the price discrimination statute. Utah Foam points to the

[3] Because we find no controlling Utah law construing the phrase "like grade and quality," we look to federal law for guidance. See *Belliston v. Texaco, Inc., 521 P.2d 379, 380 (Utah 1974)* ("Except for the jurisdictional requirements, the language of Section 3(a) of the Unfair Practices Act is substantially similar to the provisions of Section 13(a) of the Robinson-Patman Act."); cf. *Evans v. State, 963 P.2d 177, 1998 Utah LEXIS 37, 1998 WL 327681*, at *3 (Utah 1998) (citing Utah Code Ann. § 76-10-926).

following factors, all based upon the testimony of Upjohn's Keith Edmonson, Vice President and General Manager of Upjohn's Chemical Division, as evidence that CPR was sufficiently independent from Upjohn so as to render the two separate economic entities:

> (1) The title of goods passed to CPR when the product was shipped; (2) CPR recommended prices of the PAPI and systems it sold, which prices were never overruled by Upjohn; (3) Upjohn's divisions, like Polymer and CPR, were allowed to set their own prices; (4) CPR had its own payroll department and personnel department; (5) CPR made decisions as to whom and to where it would sell its products; (6) CPR could reject the product it received from Upjohn based on its quality; and (7) CPR had its own accounting department and separate checking accounts.

(See Aplt. Br. at 26 (record citations omitted).) None of this evidence tends to show that **[**18]** CPR was anything but an individual corporate "horse" pulling together with its sister divisions for the benefit of their common "driver," namely, Upjohn. See *Copperweld, 467 U.S. at 771*. For its part, Upjohn points to evidence that all of CPR's essential activities were overseen by Mr. Edmondson, who wielded final executive decision-making and accounting power over CPR. Simply because Upjohn granted its CPR Division some measure of free reign over its activities does not diminish the fact that the evidence shows that CPR operated solely for the benefit and under the ultimate control of Upjohn. We conclude that the district court did not abuse its discretion in holding that all transfers of PAPI 27 from Upjohn's Chemicals Division to CPR were intra-company transfers and not "sales" under the Utah price discrimination statute.

In the alternative, Utah Foam claims that even if Upjohn and CPR were a **[*1219]** single economic entity, we should still find CPR's sales records to be discoverable in order to determine whether CPR sold PAPI 27 to Utah Foam's competitors, in which case CPR's sales could be attributed to its parent, Upjohn. However, the record shows that **[**19]** CPR sold complete foam spray systems, and not raw PAPI 27. Therefore, the district court did not abuse its discretion in deeming CPR's sales records irrelevant to this lawsuit.

IV. Recusal

Regarding recusal, Utah Foam merely argues that if we remand the case we should send it back to a different judge on the ground that Judge Greene erred in refusing Utah Foam's request that he recuse himself. Because we have identified no reason for remanding this case, we consider this argument moot. [4]

V. Upjohn's Cross-Appeal

Upjohn appeals the district court's refusal to vacate the jury verdict finding it liable to Utah Foam for damages caused by its negligent misrepresentation and fraud. We examine the negligent misrepresentation claim first.

A. Negligent Misrepresentation

Upjohn claims that under the negligent misrepresentation theory of liability Utah Foam can only recover for the difference **[**20]** between the price it paid for the product and the fair market value of the product. Upjohn then asserts that because Utah Foam did not and cannot prove the fair market value of PAPI during the times in question, it must lose on this claim as a matter of law. We disagree.

Here, Upjohn does not dispute that the elements of negligent misrepresentation were proved at trial. Instead, Upjohn argues that the *damages* proved by Utah Foam are inappropriate for this claim, namely, that Utah Foam only proved "benefit of the bargain" loss as opposed to pecuniary loss based on the difference between the price it paid for PAPI and the fair market price.

---

[4] Even if we were to treat this claim as an independent argument for reversal, we would find no error.

HN9[] Under Utah law, the measure of damages for negligent misrepresentation includes the amount of money necessary to compensate the plaintiff for its detrimental reliance. See Forsberg v. Burningham & Kimball, 892 P.2d 23, 27 (Utah Ct. App. 1995). Such damages include "'the difference between the value of what [plaintiff] has received in the transaction and its purchase price or other value given.'" Id. (quoting Restatement (Second) of Torts § 552(B)(1)(a) (1976)).

Here, the district court did just that. It held that the **[**21]** "market price" for this case was not the price of PAPI on the open market but rather the price paid by Utah Foam's competitors. See Utah Foam, 930 F. Supp. at 522. This approach to calculating the difference between the value Utah Foam thought it was getting and the actual value of the PAPI comports with the law in Utah. Thus, we affirm the jury verdict against Upjohn for negligent misrepresentation.

B. Fraud

At trial, the jury found Utah Foam's actual damages caused by Upjohn's negligent misrepresentation and fraud to be identical: $ 313,593. Utah Foam was awarded this single amount, minus post-trial reductions by the district court. Because on appeal Upjohn does not challenge the propriety of the negligent misrepresentation verdict in Utah Foam's favor (other than the damages calculation), because the jury found Utah Foam's damages from the two causes of actions to be singular, and because we affirm the negligent misrepresentation damages award, we need not address Upjohn's argument that the district court erred in refusing to grant its motion to vacate the jury verdict as to Utah Foam's fraud claim.

Conclusion

For the reasons stated above, the **[**22]** judgment below is AFFIRMED.

End of Document

Alba v. Marietta Mem'l Hosp.

United States District Court for the Southern District of Ohio, Eastern Division

September 8, 1998, Decided ; September 10, 1998, Filed

Case No. 94CV00524

HN1[] **Summary Judgment, Opposing Materials**

Summary judgment is appropriately entered for the moving party as a matter of law when all the papers before a trial court show that there are no genuine issues of material fact in light of the substantive law governing the case. *Fed. R. Civ. P. 56(c)*. The litigant seeking summary disposition of a case bears the initial burden of demonstrating, through affidavits or otherwise, the absence of genuine factual issues If the moving party meets its burden, the non-moving party then has the obligation to produce probative evidence supporting its view that a dispute exists. On summary judgment, a plaintiff's evidence is to be believed and all reasonable inferences must be drawn in his favor. The party opposing summary judgment, however, must do more than simply show that there is some metaphysical doubt as to the material facts, the nonmoving party must come forward with specific facts showing that there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN2[] **Summary Judgment, Burdens of Proof**

In the context of antitrust litigation the range of inferences that may be drawn from ambiguous evidence is limited; the non-moving party must set forth facts that tend to preclude an inference of permissible conduct. The court must determine whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law.

HN3[] **Sherman Act, Claims**

Section 1 of the Sherman Act states: Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states is declared to be illegal. *15 U.S.C.S. § 1*.A plaintiff claiming a *§ 1* violation must first establish a combination or some form of concerted action between at least two legally distinct economic entities. Unilateral conduct on the part of a single person or enterprise, even if such conduct unreasonably restrains trade, falls outside the purview of this provision in the ***antitrust law***. An agreement between a parent corporation and its wholly-owned subsidiary or its agents is not a concerted action for purposes of the Act. This requirement is known as the "intracorporate immunity" doctrine, also commonly referred to as the "intracorporate conspiracy" doctrine, because unilateral actions of a single enterprise are immune from liability under *§ 1* of the Act. The traditional rule under this doctrine is that two or more individual officers, directors or agents within a corporation, acting on behalf of that corporation, are considered incapable of conspiring with each other or with their corporation, for *§ 1* purposes.

Opinion

[*282] OPINION AND ORDER

I. INTRODUCTION

This matter is before the Court on both of Defendants' Motions for Summary Judgment (docs. 90, 91). Plaintiff, Dr. Joseph C. Alba, M.D., alleges that Defendants, Dr. Gregory B. Krivchenia, Sr., M.D., and Marietta Memorial Hospital, violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*, in restricting Plaintiff's surgical privileges through the formal peer review process. In addition, Plaintiff **[**2]** has brought eight state law claims against Defendants which arise out of the same alleged wrongful conduct. Oral argument on the Motions was held on February 20, 1998. The Plaintiff was subsequently granted leave to file surreply and to supplement the record for summary judgment purposes (doc. 146), the Defendants responded (doc. 147), and the Motions are again now ripe. This Court issued an earlier Interim Order on May 7, 1998, and now issues its Final Opinion and Order in this matter.

II. BACKGROUND

A. General Overview

Plaintiff, Dr. Jose C. Alba, M.D., ("Alba"), first began working at Defendant, Marietta Memorial Hospital ("MMH"), in Marietta, Ohio in 1972. He was granted full surgical privileges in 1973. He practiced exclusively at MMH as a general surgeon. Due to a surgical complication in 1976, however, Alba's surgical privileges were temporarily restricted for about one year. Again in 1983, Alba's surgical privileges were temporarily restricted. The temporary nature of this second restriction later became contingent upon Alba becoming Board certified in general surgery.

The Board of Trustees' decision to impose temporary restrictions on Alba's surgical privileges **[**3]** until he became Board certified was the ultimate result of the peer review process at MMH. This process involved several committees of doctors reviewing various complications that Alba had had in his surgical practice. Dr. Gregory B. Krivchenia, Sr., M.D. ("Krivchenia") a Board Certified orthopaedic surgeon and chairman of the medical staff Credential Committee at that time, became aware of these complications and was instrumental in this process. Alba had an initial hearing regarding the restriction of his privileges and an appellate review hearing. In addition, Alba was represented by counsel in preparation for and at the appellate review hearing in 1984.

Nine years later, in 1993, Alba was allegedly told by a doctor at MMH, who had reviewed the available documents from the 1984 peer review process, that there were discrepancies in the record, or that a fraud had been committed against him during the process. Alba suspected an anti-competitive purpose, Plaintiff again retained counsel and filed his Complaint on June 9, 1994. He alleges that the restriction of his surgical privileges at MMH was a part of a greater anticompetitive conspiracy to oust older, generalist physicians like **[**4]** him through the fraudulent subversion of the peer review process, so that younger specialists with greater revenue-generating abilities (such as board-certified orthopedists) could be substituted in their place. He also alleges that the marketplace was injured in that it was suffering from a low supply of orthopedic services, and that Dr. Krivchenia succeeded in monopolizing the market. Finally, Alba alleges that the restrictions imposed upon him by MMH in 1983-84 essentially ruined his practice.

B. Statement of Facts

Dr. Alba first began work as a general surgeon at MMH in 1972. In May 1976, Dr. Alba's privileges at MMH were restricted and he was required to have consultation for all major surgical cases. These restrictions, however, were lifted after less than a year. In March 1983, an Ad Hoc Committee of general surgeons, appointed by the chief of surgery, recommended that Alba's privileges again be restricted. On March 28, 1983, the recommended restrictions were imposed by MMH's Executive Committee. The restrictions required that he be monitored by a qualified general surgeon for every major surgical procedure he performed. The restrictions were to be in place for approximately **[**5]** a year until reappointments to the **[*283]** Hospital's 1984 staff membership were made. Plaintiff did not contest these restrictions.

The Medical Staff Executive Committee, the Credentials Committee, and the Ad Hoc Committee of general surgeons reviewed the restrictions on Dr. Alba's privileges again in September 1983, so that a recommendation could be made with regard to Alba's 1984 surgical staff privileges. On October 4, 1983, the Ad Hoc Committee recommended that the restrictions remain in place. However, the specific restrictions recommended by the Committee at that time amounted to what Plaintiff calls "some loosening" of the restrictions imposed in March 1983. On the same date, the Credentials Committee recommended that the restrictions remain, but again, in Plaintiff's terms, its recommendation resulted in "some loosening" of the restrictions imposed in March 1983.

On November 15, 1983, at a meeting of the Executive Committee, Dr. Krivchenia allegedly falsely reported that the Credentials Committee believed Dr. Alba "lacked surgical judgment" and good surgical technique, and that he should therefore lose his major surgical privileges altogether. In addition, the executive Committee **[**6]** allegedly never told about what Plaintiff calls the more favorable reports from the Ad Hoc Committee or the Credentials Committee.

On November 28, 1983, Alba was notified of the Executive Committee's recommendations, which were largely consistent with both the Ad Hoc and Credentials Committees' recommendations -- a temporary restriction in major surgical privileges with certain exceptions. However, the Executive Committee added to its recommendation to the Board of Trustees that the restrictions not be lifted until Dr. Alba became Board certified in general surgery.

On December 7, 1983, Alba requested an appellate hearing and requested that members of the original Ad Hoc Committee be included on his Hearing Panel. His request was denied, however, and the Panel was made up of seven disinterested physicians, who were not in direct economic competition with Alba, and, therefore, were not general surgeons. Plaintiff did not object any further to the composition of the panel. The denial of Alba's request was based upon an outdated set of by-laws (1979). The by-laws actually in force at the time (adopted in September, 1982) required one member of the original Ad Hoc Committee and one member **[**7]** of the Executive Committee to serve on the appellate Hearing Panel. The 1979 by-laws, however, required that the Panel be composed of disinterested physicians. In all other respects, the procedures outlined in the 1979 version of the bylaws were equivalent to the by-laws adopted in September, 1982.

On January 3, 1984, Alba received a "bill of particulars" from MMH, which included information regarding eight surgical cases that would be in question at the Hearing Panel. On January 12, 1984, Alba's hearing before the Hearing Panel took place. Dr. Krivchenia allegedly informed the Hearing Panel that eight separate cases were reviewed by the Executive Committee, as well as the chief of surgery, and the Credentials Committee, in making their recommendations. Plaintiff alleges that this representation was false, and that only Dr. Krivchenia had reviewed the eight cases.

Dr. Krivchenia also allegedly told the Hearing Panel the Executive Committee had fully considered the recommendations of the Ad Hoc Committee and the Credentials Committee before making its recommendation to the Board of Trustees. Plaintiff alleges that this also was a false statement, since the Executive Committee was **[**8]** never told about the "more favorable" reports from the Ad Hoc Committee or the Credentials Committee.

The Chairman of the Hearing Panel, Dr. Scileppi, initiated the Hearing Panel proceedings by stating that he would express no opinion about Alba's work and would remain neutral unless he was needed to break a tie. During the deliberations by the Hearing Panel, however, Scileppi allegedly did not remain neutral. Instead, he allegedly urged the other Panel members to agree with the restrictions and "exaggerated" about Dr. Alba's deficiencies during the deliberations. In addition, Dr. Scileppi discussed cases other than the eight mentioned during the hearing.

[*284] On January 13, 1984, the Hearing Panel issued its conclusions and recommendations to the Executive Committee which stated that they were in unanimous agreement with the recommendations of the Executive Committee temporarily to limit the privileges of Dr. Alba. Plaintiff alleges that the Hearing Panel was not in unanimous agreement. The transcript of the recordings of the deliberations allegedly reveals that several Hearing Panel members thought that the restrictions recommended by the Executive Committee were too harsh. Plaintiff **[**9]** alleges that a final vote may not ever have been taken since no written record exists. On January 31, 1984, the Executive Committee informed Dr. Alba that the restricts affirmed in November 1983 would remain in place until he became Board certified.

On February 16, 1984, Alba requested an appellate review before the Board of Trustees of MMH. Between February and June 1984, Alba hired counsel to assist him in the appellate review process. In preparation, Alba and his counsel obtained a copy of the transcript of the Hearing Panel proceedings, (but not the deliberations), a copy of the By-laws dated 1979, (but not the applicable By-laws dated 1982) and, finally, a copy of the Ad Hoc Committee's October 4, 1983 recommendation. However, Plaintiff alleges that he was denied access to any minutes of the meetings at which his restrictions were discussed. The hearing before the Board of Trustees was continued at least once at Plaintiff's request so that he and his counsel could fully prepare.

On July 12, 1984, the appellate review hearing before the Appellate Review Committee of the Board of Trustees was held. Plaintiff and his counsel each had an opportunity to be heard and to protest the **[**10]** recommendation of the Executive Committee and to raise any issues of impropriety or unfairness that they believed occurred.

Indeed, it is clear from his statement, that Alba's counsel suspected wrongdoing in the imposition of these restrictions:

> . . . Subsequent to this hearing [before the Hearing Committee], which you have a transcript of, [1] **[**12]** Dr. Alba came to our firm . . . We told Dr. Alba we would take a look at it [the proceedings], because he had some serious reservations about what he contended had been done to him by, I guess, your [Medical] Executive Committee or your Credentials Committee . . .
>
> . . . What we did is we began to look for other reasons [why Dr. Alba's major surgical privileges were being restricted]. . . [2] I am certainly not here to accuse anybody of **ulterior motives** in trying to get Dr. Alba's [major] surgical privileges suspended at this hospital. What I have found, however, is the following: that when he [Alba] began practice here in January of 1973, you had lots of patients and a full hospital. Business was booming. In January of '73 until January of 1983, or maybe a little bit before, business was fine and there was (sic) **[**11]** no problems. What we have found, at least in our brief investigation of this hospital, is that elective surgery dropped drastically . . . **You have a group of doctors, and again, correct me if I am wrong, but that Board [Medical Executive Committee] consists of all doctors whose livelihood depends on this hospital, a group of doctors get together and decide someone is unfit to be a surgeon--after ten years--**and I would just say to you gentlemen tonight if he is unfit to be a surgeon in 1983, what was he in '82, in '81 and every other year when you let him do surgery. [3] Why, all of a sudden in 1983, when you don't have enough patients to fill your beds, you decide all of a sudden he is unfit to be a surgeon? 77 patients, I think were registered in the hospital, I don't know whether that was a month ago or whatever. 90% of his practice is elective surgery. He **[*285]** doesn't do that elective surgery, **someone else divvies up the pot** . . . [4]

Dr. Krivchenia presented the case against Plaintiff, and allegedly made two misrepresentations regarding: (1) the years of practice that had been selected for review by the Committees; and (2) the number of cases that had been presented to and reviewed by the Executive Committee. The Appellate Review Committee of the Board of Trustees ultimately recommended to the Board that it impose those restrictions on Plaintiff's surgical privileges that had been recommended by the other Committees. On July 18, 1984, the Board of Trustees adopted the recommendations of the Appellate Review Committee, affirming the recommended restrictions upon Alba.

After July 1984, Plaintiff felt that he had been treated unfairly and **[**13]** that he had been wronged by the imposed restrictions. He recommended to his counsel that they file a lawsuit to regain his privileges. His counsel declined, and the attorney-client relationship was severed in September 1984. In late 1984, Plaintiff applied for privileges at St. Joseph's Hospital in West Virginia, but was denied. Plaintiff then applied for and was granted primary care privileges at Selby Hospital in Marietta. Only much later, in 1986 and 1989 respectively, did he apply for and was he granted minor and then major surgical privileges at Selby. [5]

In 1985, Plaintiff asked MMH's new President to look into his restrictions and to assist him in regaining them, but he allegedly received no response. From 1989 to 1992, Plaintiff did very little to rebuild his surgical practice at Selby Hospital. In **[**14]** 1992, Plaintiff dropped the coverage to perform major operations from his malpractice insurance.

In March 1993, however, Alba applied for reappointment of his surgical privileges at MMH. Alba had not taken any efforts to date to become Board certified. In August 1993, MMH's Executive Committee appointed a three doctor

---

[1] This statement alone indicates the information that was in the possession of Plaintiff's former counsel and reviewed by said counsel in preparation for the hearing before the Appellate Review Committee.

[2] Mr. Leez, before getting to this point, articulates certain reasons, such as lack of competence and concern about malpractice cases, that had been mentioned by various committees.

[3] Plaintiff's privileges were restricted for the first time in 1976.

[4] Transcript of Appellate Hearing before the Board of Trustees, July 12, 1984, pp. 2, 4, Exhibit D. (Emphasis added).

[5] Even though Alba regained major surgical privileges at Selby in 1989, he alleges that by that time, and as a result of Defendants' action, he had very few referral services and his practice suffered.

panel, including one Dr. White to review the 1983/84 file on the restriction of the surgical privileges of Dr. Alba. The three doctors allegedly found a number of "discrepancies" in the peer review process afforded Alba. Specifically and among other things, it was discovered that the October 4, 1983 Ad Hoc Committee Recommendation was allegedly never reported to the Executive Committee.

In October 1993, Dr. White allegedly told Dr. Alba of these discrepancies and that they occurred primarily due to the actions of Dr. Krivchenia. Dr. Alba's 1993 request to have his surgical privileges reinstated at MMH, however, was never acted upon by Dr. White, or the three doctor panel on which Dr. White sits. In January, 1994 Alba submitted to MMH his surgical logs from Selby and letters of recommendation, but he heard nothing from MMH. In June 1994, Plaintiff filed this lawsuit. **[**15]** And in 1995, Plaintiff retired without ever becoming Board certified.

III. ANALYSIS

A. Standard on Summary Judgment

HN1[] Summary judgment is appropriately entered for the moving party as a matter of law when all the papers before a trial court show that there are no genuine issues of material fact in light of the substantive law governing the case. *Fed.R.Civ.P. 56(c)*. The litigant seeking summary disposition of a case bears the initial burden of demonstrating, through affidavits or otherwise, the absence of genuine factual issues *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. If the moving party meets its burden, the non-moving party then has the obligation to produce probative evidence supporting its view that a dispute exists.

On summary judgment, a plaintiffs' evidence is to be believed and all reasonable inferences must be drawn in his favor. *See* *Anderson v. Liberty Lobby Inc., 477 U.S. 242, 250, 91 L. Ed. 2d 202, **[*286]** 106 S. Ct. 2505 (1986)*. The party opposing summary judgment, however, "must do more than simply show that there is some metaphysical doubt as to the material facts ..., the nonmoving party must **[**16]** come forward with 'specific facts showing that there is a genuine issue for trial.'" *Matsushita Electric Industrial Co., Ltd. v. Zenith Radio Corp.,, 475 U.S. 574, 586-8, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* (quoting *Fed.R.Civ.P. 56(e)*). ***HN2***[] In the context of antitrust litigation the range of inferences that may be drawn from ambiguous evidence is limited; the non-moving party must set forth facts that tend to preclude an inference of permissible conduct. *475 U.S. at 587-88*. This Court must determine "whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." *See* *Street v. Bradford, 886 F.2d 1472, 1479*, (6th Cir. 1990).

B. Plaintiff's antitrust claim is barred by the "intracorporate immunity" doctrine

Defendants' Motions for Summary Judgment with respect to the antitrust claim are premised upon three separate and independent bases; [6] (1) Plaintiff's claim is barred by the applicable statute of limitations, and he fails to raise an issue of fact on the issue of fraudulent concealment; (2) Plaintiff's claim is barred by the "intracorporate immunity" doctrine; **[**17]** and (3) Plaintiff's claim is barred by the doctrine of "antitrust injury." Each of these bases is an independent basis for summary judgment on Plaintiff's antitrust claim. For the following reasons, this Court grants Defendants' Motions for Summary Judgment on Plaintiff's claim for a violation of *Section 1* of the Sherman Act. [7]

---

[6] The parties agree that the protections afforded by the Health Care Quality Improvement Act of 1986, codified at 42 U.S.C, § 11011, *et. seq.*, do not apply to the actions taken against Alba in 1983-84.

[7] Because this Court finds in favor of Defendants on the Motions for Summary Judgment on Plaintiffs' only federal claim -- the antitrust claim -- it need not address the parties' arguments related to Plaintiff's eight state law claims. Pursuant to the favored practice in this Circuit, this Court will decline to exercise its pendent jurisdiction over those state law claims. See *United Mine*

[18]** ***HN3***[] *Section 1* of the Sherman Act states: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States … is declared to be illegal." *15 U.S.C. § 1 (1988)*. According to the statute, a plaintiff claiming a *§ 1* violation must first establish a combination or some form of concerted action between at least two legally distinct economic entities. *See Schwartz v. Aultman Health Services Assn.,* unpublished, *1995 U.S. App. LEXIS 35549*, No. 94-3967 (6th Cir. 1995) 1995 WL 696715 (citing *Capital Imaging v. Mohawk Valley Medical Assn., 996 F.2d 537, 542 (2nd Cir. 1993)*, *cert. denied, 510 U.S. 947, 114 S. Ct. 388, 126 L. Ed. 2d 337 (1993))*. Unilateral conduct on the part of a single person or enterprise, even if such conduct unreasonably restrains trade, falls outside the purview of this provision in the ***antitrust law***. *See Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. For that reason, an agreement between a parent corporation and its wholly-owned subsidiary or its agents is not a concerted action for purposes of the Act. *See Copperweld Corp. v. Independence Tube Corp., **[**19]** 467 U.S. 752, 771, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*.

This requirement has come to be known as the "intracorporate immunity" doctrine, also commonly referred to as the "intracorporate conspiracy" doctrine, because unilateral actions of a single enterprise are immune from liability under *§ 1* of the Act. The traditional rule under this doctrine is that "two or more individual officers, directors or agents within a corporation, acting on behalf of that corporation, are considered incapable of conspiring with each other or with their corporation, for *Section 1* purposes.'" *Smith v. Northern Mich. Hospitals, Inc., 703 F.2d 942, 950 (6th Cir. 1983)* **[*287]** (quoting *Harvey v. Fearless Farris Wholesale, Inc., 589 F.2d 451, 455 n.7 (9th Cir. 1979))*. *See, Copperweld, 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731*.

In *Smith v. Northern Mich. Hospitals, Inc., 703 F.2d 942, 950 (6th Cir. 1983)*, the Sixth Circuit applied this rule in the context of hospitals and physicians for the first time. Physician staff members at a hospital which merged two hospitals into one sued the hospital and a medical clinic corporation for antitrust conspiracy. Part of the plaintiffs' claim was premised **[**20]** on the theory that some doctors in the medical clinic corporation conspired on behalf of the corporation with other doctors in the corporation to exclude the plaintiffs. The district court dismissed the claim.

The Sixth Circuit affirmed the dismissal under the traditional rule stated above. In addition, the Court rejected the application of the "independent personal stakes" exception to the rule because "to apply this supposed exception for 'independent stake to the present case would be paramount to allowing the exception to subsume the rule." *Id. at 951*. The Court also stated that "There are rather substantial policy reasons for not adopting such an exception." *Id. at 950 n. 15*. While the Court recognized that other Circuits had adopted and applied this exception, it stated that "it is doubtful that we would follow the analysis in" those cases. *Id. at 951 n.17*.

The Sixth Circuit again addressed this doctrine in *Potters Medical Center v. City Hospital Ass'n, 800 F.2d 568 (6th Cir. 1986)*. Plaintiffs, a medical center and 2 clinics, sued a hospital, its attorney/Board member, and a senior member of its medical staff for antitrust conspiracy, alleging that the two individuals/agents **[**21]** conspired with the defendant hospital to, among other things, refuse to grant staff privileges to doctors at Plaintiffs' medical center and the clinics. The district court dismissed the claims.

The Sixth Circuit agreed that "as a matter of law" the two agents of the hospital "lack the capacity to conspire with" the hospital. *Id. at 573*. The rationale is that agents of a single firm share a unity of economic purpose with the firm, so that agreements among them do not impermissibly coalesce economic power that was previously directed toward divergent goals. Plaintiff/appellants argued for the "independent personal stakes" exception, but the Court did not recognize the exception:

> Although several courts have recognized the 'independent personal stakes' exception to the rule that officers and agents lack capacity to conspire with their corporation, . . . this circuit has never endorsed the exception. In fact, this court has noted the 'rather substantial policy reasons for not adopting such an exception.' Even if we were to recognize the exception, appellants argument would still fail.

Workers of America v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966) ("pendent jurisdiction is a doctrine of discretion, not of plaintiff's right."); *See also Gaff v. FDIC, 814 F.2d 311, 319 (6th Cir. 1987)* (recognizing a general rule disfavoring a district court's exercise of pendent jurisdiction when federal issues are dismissed before trial).

Id. at 573. The Court thus affirmed.

The Court again addressed the rule and **[**22]** the exception in *Nurse Midwifery Associates v. Hibbett, 918 F.2d 605 (6th Cir. 1990)*, where two nurse midwives and an obstetrician sued three hospitals, and certain members of the medical staff of two of these hospitals, among others, under the Sherman Act. The plaintiffs alleged that the medical staff had conspired with the hospitals to bar them from obtaining hospital privileges. The district court granted summary judgment, relying on *Potters and Smith*, and declined to adopt the exception to the doctrine.

On appeal, the Sixth Circuit discussed the "intracorporate conspiracy doctrine" in general at length. It discussed how some courts have held that the doctrine does *not* prevent a finding of a conspiracy between a hospital and its medical staff or among the members of the medical staff, because the relationships are different than corporation/agent relationships or agent/agent ones. *See* *Bolt v. Halifax Hosp. Med. Center, 851 F.2d 1273, 1280* (11th Cir.), vacated, *861 F.2d 1233 (11th Cir. 1988)* *(en banc),*reinstated in part, *874 F.2d 755 (11th Cir. 1989)* *(en banc);* *Weiss v. York Hosp., 745 F.2d 786, 813-17 (3d Cir. 1984)*.

However, the *Weiss* court's holding **[**23]** also provided that the doctrine did prevent a finding of conspiracy in the context of peer review proceedings regarding staff hospital privileges. *Id. at 816-17*. The *Weiss* court held that the members of the medical staff were capable of conspiring amongst themselves **[*288]** because they were not really officers of the hospital when practicing medicine in their individual capacities in competition with each other. *Id. at 814-17*. Unlike *Bolt*, however, the *Weiss* court held that the members of the medical staff were acting only as officers of the hospital when they made staff privilege decision for the hospital, and could not conspire with the hospital because the medical staff was not in competition with the hospital. *Id. at 816-17*.

The Sixth Circuit in *Nurse Midwifery* agreed with the *Weiss* court's solomonic decision, and held that the doctrine "prevents a finding of conspiracy between a hospital and its medical staff but, in certain situations, does not preclude a conspiracy among individual members of the medical staff." *918 F.2d at 614*. The Court reasoned:

> there are no strong antitrust concerns that would warrant a departure from traditional concepts **[**24]** of agency since the hospital and the medical staff are not competitors. The fact that the medical staff may have acted with anticompetitive motives is not sufficient to warrant a finding that a hospital's decision to accept the staff recommendation is an antitrust conspiracy.

Id. Thus, the Court affirmed the grant of summary judgment.

While the Sixth Circuit in *Nurse Midwifery* noted that some courts had recognized the "independent personal stakes" exception, it described that "this court, while not specifically rejecting the . . . exception," had noted the substantial policy reasons for not adopting the exception. *Id. at 613*. The Court then rejected the plaintiff's arguments in that case for adopting the exception:

> We are not inclined at this point to follow several other circuits in adopting this exception, in view of substantial policy reasons for not doing so. . . We are not convinced that an agent acting with anticompetitive motives due to some independent personal stakes raises sufficient antitrust concerns to warrant abandoning the traditional rule that a principal cannot conspire with one of its agents See also P. Areeda, ***Antitrust Law*** P1471 (1986).

[25]** *Id. at 615*.

The Sixth Circuit again affirmed this holding in this context in *Muzquiz, Jr. v. W.A. Foote Memorial Hospital, 70 F.3d 422 (6th Cir. 1995)*. The plaintiff's doctor in *Muzquiz* sued his hospital for among other things, an antitrust violation when it, through its Board, denied his request for privileges. The Sixth Circuit affirmed the dismissal of the antitrust claim on the basis that "this court's holding in *Nurse Midwifery* precludes an antitrust claim against the hospital in this case." *Id. at 429-30*.

Plaintiff spent a great deal of effort in his briefs and at oral argument presenting arguments why the intracorporate immunity doctrine does not bar his claim in this case. In addition, Plaintiff, spent similar efforts in explaining why, if the doctrine does apply, the independent personal stakes exception should be adopted by this Court and applied to his antitrust claim. This Court is not persuaded however, that the Sixth Circuit's ruling that a hospital cannot conspire with its medical staff in peer review proceedings can be varied from in this matter. As the Sixth Circuit has stated, "no strong antitrust concerns" in the hospital staff privileges **[**26]** context warrant a departure from the traditional rule, and the independent personal stakes theory fails to raise "sufficient antitrust concerns" to warrant its adoption in this Circuit. *Nurse Midwifery at 614-15*.

Therefore, as in *Muzquiz*, plaintiff's antitrust claim against the hospital and its staff (Dr. Krivchenia) in this context -- hospital staff privilege decisions made through the peer review process -- is precluded, as a matter of law, by the Sixth Circuit's holding in *Nurse Midwifery*. Furthermore, this Court is bound by the Sixth Circuit's determination in these cases not to adopt the independent personal stakes exception to this doctrine in the case *sub judice.* Thus, Plaintiffs' claim under *Section 1* of the Sherman Act must be dismissed.

Since this finding is a sufficient basis to support summary judgment on the antitrust claim, this Court need not address Defendants' two other separate and independent bases for summary judgment. However, because this Court also finds for Defendants on **[*289]** their statute of limitations argument, that basis will be addressed.

C. Plaintiff fails to raise a genuine dispute of material fact with regard to fraudulent concealment,* [**27] *and therefore, his antitrust claim is time-barred.

Defendants also argue that Plaintiff's antitrust claim is time-barred because the statute of limitations on a private antitrust action is four years. *See* *15 U.S.C. § 15*. The restriction of Plaintiff's major surgical privileges at MMH was finalized on July 18, 1984. He did not file suit until June 1994, almost ten years later. Plaintiff argues that the statute was tolled until 1993 due to the acts of fraudulent concealment perpetrated by Defendant. Defendants, however, argue that Plaintiff had sufficient information to alert him to the "possibility of wrongdoing" in 1984, and that he failed to exercise due diligence to discover any alleged wrongdoing after that date.

In this Circuit, ***HN4***[] Plaintiff must prove three elements to justify his claim that fraudulent concealment tolls the statute:

> (1) Defendant concealed the conduct that constituted the cause of action;
>
> (2) Plaintiff failed to discover the operative facts that are the basis of his cause of action within the limitations period;
>
> and (3) Plaintiff used due diligence until discovery.

Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389, ***[**28]*** *394 (6th Cir. 1975)*, Plaintiff's failure to raise an issue of fact as to any one of these three elements is fatal to his claim.

The focus is properly weighted on the second two factors of the *Dayco* Test as explained by Judge Speigel in *Ohio v. Louis Trauth Dairy, Inc., 856 F. Supp. 1229, 1238 (S.D. Ohio 1994)*:

> "the bedrock threshold for granting the equitable tolling of the statute of limitations for fraudulent concealment must be whether a Plaintiff knew or through due diligence should have known the existence of his claim."

Whether or not Plaintiff adduced sufficient evidence to raise a genuine dispute of material fact related to the first two factors necessary for a fraudulent concealment analysis need not be addressed because Plaintiff's evidence is insufficient to survive summary judgment on the third factor -- whether he exercised due diligence from the date of the alleged wrongdoing until the date of its alleged discovery.

Plaintiff first argues that his duty of due diligence did not arise until 1993, when he received notice of the alleged wrongdoing. However, ***HN5***[] due diligence must be exercised once suspicions of wrongdoing do or reasonably should arise. **[**29]** *Dayco 523 F.2d at 394* ("any fact that should excite suspicion is the same as actual knowledge of his entire claim.") It is undisputed that Plaintiff suspected wrongdoing in the restriction of his surgical privileges by the date of the hearing before the Appellate Review Committee of the Board of Trustees, July 12, 1984. His counsel's statement to that Committee on that day reveals that he and Plaintiff suspected an economic motive to the restriction. In addition, Plaintiff admits that he thereafter requested that his counsel file suit because he felt as though he had been wronged and treated unfairly. The fact that his attorney declined to file suit did not prevent Plaintiff from seeking to retain other counsel to handle his complaints. Therefore, Plaintiff's duty to exercise due diligence in discovering the alleged wrongdoing arose after July 12, 1984, when it is undisputed that he and his counsel suspected wrongdoing.

Plaintiff next argues that any attempt to uncover the suspected wrongdoing after July 1984 would have been futile since the information necessary to discover what he believed to be the truth was in the complete control of Defendants. Furthermore, Plaintiff argues **[**30]** that had he filed suit in 1984, he would not have been likely to uncover antitrust conspiracy because he would not have been granted access to these secret peer review documents. Plaintiff relies on the fact that no court in this Circuit had addressed the issue of the discoverability of peer review documents until 1991 in the case of *LeMasters v. The Christ Hospital, 791 F. Supp. 188* ***[*290]*** *(S.D. Ohio 1991)* (peer review information sought by physician not privileged).

However, even though the *LeMasters* case was a case of first impression in this Circuit, the *LeMasters* court cited to and relied upon other circuit and district court cases, which predated 1984, and which affirmed the discoverability of peer review documents. The District Court for the Eastern District of Michigan granted a plaintiff's motion to compel production of peer review report, in spite of a Michigan statute purporting to establish absolutely privilege, in *Dorsten v. LaPeer County General Hospital, 88 F.R.D. 583 (E.D. Mich. 1980)*. *See, also Memorial Hospital vs. McHenry County v. Shadur, 664 F.2d 1058 (7th Cir. 1981)* (also cited in *LeMasters* and holding that privilege against discovery did not **[**31]** extend to hospital in federal antitrust action given the public interest in the private enforcement of federal antitrust laws). Thus, had Plaintiff and his counsel sued in 1984 for the alleged wrongdoing in restricting his surgical privileges, it is reasonable to assume that he would have uncovered the evidence which he has today uncovered as a result of suing in 1994. See *Dayco, 523 F.2d at 394* ("the means of knowledge are the same thing as knowledge itself.") (citing *Wood v. Carpenter, 101 U.S. 135, 143, 25 L. Ed. 807 (1979))*.

Plaintiff's only excuse for sitting idly by from 1985 to 1993 is that he was unaware of the existence of a conspiracy or any fraudulent conduct However, he believed that he was wronged and treated unfairly, and his lawyer suspected at least an anticompetitive if not antitrust purpose, all in 1984. Due diligence require more than sitting idly by until the facts are someday revealed to you. *See Campbell v. Upjohn Co., 676 F.2d 1122, 1128 (6th Cir. 1982)*. Whatever it requires, it is clear that due diligence requires something more than what Plaintiff did in this case. Therefore, Plaintiff's claim for an antitrust violation under *Section 1* of the Sherman **[**32]** Act is timebarred.

IV. CONCLUSION

Defendants' Motions for Summary Judgment are hereby **GRANTED** as to the antitrust claim. This Court declines to exercise its pendent jurisdiction over the remaining state law claims, dismisses those claims, and, therefore, **DISMISSES** this matter in its entirety.

IT IS SO ORDERED.

ALGENON L. MARBLEY

UNITED STATES DISTRICT JUDGE

DATED: September 8, 1998

JUDGMENT IN A CIVIL CASE - Date: September 10, 1998

Decision by Court. This action came to trial or hearing before the Court. The issues have been tried or heard and a decision has been rendered.

IT IS ORDERED AND ADJUDGED that defendants' motions for summary judgment are hereby GRANTED as to the antitrust claim. This Court declines to exercise its pendent jurisdiction over the remaining state claims, dismisses those claims, and therefore DISMISSES this matter in its entirety.

Date: September 10, 1998

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN2[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

To determine whether a restraint is unreasonable, courts apply one of two modes of analysis, depending upon the nature of the concerted action at issue. Agreements are either analyzed through a case-by-case application of the so-called rule of reason, whereby the fact finder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition or the court applies the per se standard, which dispenses with the need for case-by-case analysis. Under the per se standard, conduct that is manifestly anticompetitive or would always or almost always tend to restrict competition is conclusively presumed to unreasonably restrain competition without elaborate inquiry as to the precise harm it has caused or the business excuse for its use.

HN4[] **Sherman Act, Claims**

To establish a violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, plaintiffs must prove: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within the relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiffs were injured as a proximate result of that conspiracy.

Evidence > Burdens of Proof > General Overview

Evidence > Inferences & Presumptions > General Overview

HN5[] **Evidence, Burdens of Proof**

When the nonmoving party will bear the burden of proof at trial, that party must adduce evidence sufficient to establish the existence of every element essential to that party's case, and on which that party will bear the burden of proof at trial.

Evidence > ... > Exemptions > Statements by Coconspirators > Statements Furthering Conspiracy

Evidence > ... > Hearsay > Rule Components > Statements

HN7[] Inchoate Crimes, Conspiracy

Under *Fed. R. Evid. 801(d)(2)(E)*, a statement by a coconspirator of a party during the course and in furtherance of the conspiracy is not inadmissible hearsay as to that party. Under our jurisprudence, four requirements must be met before a statement can be admitted under this exception. It must appear: (1) that a conspiracy existed; (2) the declarant and the party against whom the statement is offered were members of the conspiracy; (3) the statement was made in the course of the conspiracy; and (4) the statement was made in furtherance of the conspiracy.

Evidence > Admissibility > Conduct Evidence > Prior Acts, Crimes & Wrongs

HN8[] Conduct Evidence, Prior Acts, Crimes & Wrongs

The prior doing of other similar acts, whether clearly a part of a scheme or not, is useful as reducing the possibility that the act in question was done with innocent intent.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN9[] Private Actions, Remedies

To recover damages, an antitrust plaintiff must prove causation, described in our jurisprudence as fact of damage or injury. It is not necessary to show with total certainty the amount of damages sustained, just that the antitrust violation caused the antitrust injury suffered by the plaintiff.

V. CONCLUSION 70

[*456] BECKER, Chief Judge. *

[4]** This appeal from the grant of summary judgment in favor of antitrust defendants presents a familiar pattern. A dealer irritates his competitors and their principal supplier through his aggressive price discounting practices. The other dealers complain to the supplier, who, to placate the aggrieved dealers, agrees not to sell any product to the dealer. The "boycotted" dealer then brings a Sherman Act suit, *15 U.S.C. § 1 et seq.*, in federal court. The alleged conspiracy involves a number of the plaintiff's competitors, and the refusal to deal is said to have become a group boycott, which can be a horizontal antitrust violation with per se antitrust implications; the supplier, notwithstanding its vertical relation to the plaintiff, is said to have become a co-conspirator.

The present case arose out of the rough and tumble roofing and siding materials distribution business in northern New Jersey, where several favored roofing and siding distributors were concerned that the entrance of a new price cutting competitor could destabilize the market and substantially cut into their profit margins. The principal players in this drama are plaintiffs Joseph Rossi, **[**5]** and his two successive roofing and siding distribution businesses, Rossi Florence Corp. ("Rossi Florence"), and Rossi Roofing, Inc. ("Rossi Roofing"); defendants Standard Roofing, Inc., ("Standard") and Arzee Supply Corporation ("Arzee"), two of Rossi's chief competitors, and several of their key officers; and defendant GAF Corporation ("GAF"), the manufacturer that supplied the most important product in the market. Minor roles were played by defendants Wood Fiber Industries, Inc. ("Wood Fiber"), another roofing and siding manufacturer, and Servistar Corp. ("Servistar"), a national purchasing cooperative and reseller of roofing and siding products.

---

* Honorable Edward R. Becker, United States Circuit Judge for the Third Circuit, assumed Chief Judge status on February 1, 1998.

Following discovery, the district court granted summary judgment for all defendants on the ground that plaintiffs had failed to adduce sufficient evidence to meet the demanding standard of proof in the antitrust context established by the Supreme Court's jurisprudence. The court also relied on plaintiffs' alleged failure to demonstrate causation and damages. While we agree with the district court that Rossi cannot survive summary judgment as to Servistar and Wood Fiber, we believe that the record is sufficient to enable Rossi to survive **[**6]** summary judgment on the antitrust claims as to Standard, Arzee, the individual defendants associated with those firms, and GAF.

The Supreme Court's jurisprudence in the area of concerted refusals to deal teaches that not every situation in which a distributor is cut off at the behest of his competitors constitutes a group boycott entitled to per se treatment. Otherwise, legitimate efforts by manufacturers to impose reasonable rules limiting intra-brand competition would be outlawed and the beneficial effects such actions have on inter-brand competition would be lost. Moreover, the distinction between vertical and horizontal restraints would blur. These concerns, however, are not implicated here, in view of both the price-related orientation of the alleged offending conduct of the key defendants and the sheer scope and draconian modus operandi of the alleged conspiracy.

The jurisprudence also renders it difficult for an antitrust plaintiff to prove that the manufacturer and distributors conspired, typically because it is difficult for the plaintiff to demonstrate that what the manufacturer or supplier did was inconsistent with independent action or that the claimed conspiracy **[**7]** makes economic sense. In this case, however, at least at the summary judgment stage, that burden is surmounted by the presence of certain direct evidence of conspiracy as well as: (1) evidence that GAF acted against its consistent policy (and hence ostensibly against its own interest) in refusing to sell (and seeing to it that others did not sell) GAF products to Rossi; (2) evidence of pretext in connection with GAF 's efforts to explain away the foregoing; (3) evidence that **[*457]** the major suppliers had sufficient leverage over GAF to induce it to so act; and (4) the quite graphic and extensive nature of the statements and actions of various defendants directed towards eliminating Rossi as a price-cutting competitor who passed secret rebates onto his customers and thereby threatened to de-stabilize the market. We also discern genuine issues of material fact on causation and damages, and this too precludes summary judgment on the antitrust claims against the key defendants.

Although the district court's order granting summary judgment on the antitrust claims regarding GAF, Standard, Arzee, and their corporate officers must be reversed, it must be affirmed as to Servistar **[**8]** and Wood Fiber, since Rossi has failed to overcome his burden of showing that either Servistar's or Wood Fiber's actions tended to exclude the possibility of independent action on their part. More specifically, Rossi has failed to put forth any evidence of Servistar's motive to conspire; as we shall explain, Servistar's relationship to GAF was far different from that of the distributor defendants. Rossi has also failed to show that the other defendants had any leverage over Servistar with which they could have coerced it to join the conspiracy. With respect to Wood Fiber, the only evidence Rossi has been able to adduce is that Wood Fiber may, on one or two occasions, have responded to pressure and threats from Standard and Arzee by not selling to Rossi, and hence this record is insufficient to satisfy the standards for proving concerted action as delineated by the Supreme Court.

Rossi also pressed a tortious interference claim under New Jersey state law. The district court granted summary judgment for all defendants on this claim without any discussion. This aspect of the judgment must be set aside because it violates our rule requiring that district courts accompany grants of summary **[**9]** judgment with an explanation sufficient to permit the parties and this court to understand the legal basis for the court's order. See *Vadino v. A. Valey Eng'rs, 903 F.2d 253, 257-60 (3d Cir. 1990)*.

I. FACTS AND PROCEDURAL HISTORY

The following background facts, which describe the basic framework and background within which this case arises, are set forth in the light most favorable to the non-moving party as is required when considering a motion for summary judgment. The remainder of Rossi's evidence, most of which deals specifically with the existence vel non of concerted action by the defendants, will be detailed in § II.B.2, infra, after we have explained the appropriate legal standards.

A. The Parties

The plaintiffs, in addition to Joseph Rossi, are Rossi Florence and Rossi Roofing. [1] Rossi has been in the roofing and siding distribution business in northern New Jersey since 1972. Rossi Florence and Rossi Roofing were roofing and siding distribution companies formed by Rossi at the end of 1988 and the beginning of 1989. Both are now out of business. This suit was brought against a number of Rossi's competitors (as well as several individuals **[**10]** associated with them), several roofing and siding manufacturers, and one national purchasing cooperative. Several of the original defendants, Allied Roofing, Inc. ("Allied"), Nailite Corp. ("Nailite"), Certainteed Corp. ("Certainteed"), and Wolverine Technologies Corp. ("Wolverine") have settled with Rossi and were dismissed from the case. The remaining defendants are: Standard, Arzee, GAF, Wood Fiber, Servistar, the estate of Robert Higginson (hereinafter "Robert Higginson"), William **[*458]** Higginson, Joseph Licciardello, Alvin Roth, and Cary Roth.

[11]** Standard and Arzee are distributors of roofing and siding products in northern New Jersey. Like Rossi Roofing, they purchase products from manufacturers and resell them to contractors and applicators in large volume. Standard is headquartered in Tinton Falls, New Jersey and has seven branch locations, including five in New Jersey, one in Pennsylvania, and one in Connecticut. Robert Higginson was the founder and chairman of Standard. William Higginson, Robert's son, is a shareholder and the current president of Standard. Arzee is a family-owned distributor with one of its branches located adjacent to Standard in Cedar Knolls. Defendant Alvin Roth is a shareholder and the president of Arzee, and defendant Cary Roth is Alvin's son and one of Arzee's branch managers.

GAF and Wood Fiber manufacture and supply roofing products to distributors like Rossi Roofing, Standard, and Arzee. GAF and Wood Fiber are two of the 37 roofing product manufacturers that serve the northern New Jersey market. GAF manufactures and sells its roofing material ("GAF product") to most, but not all, of the distributors located in northern New Jersey. GAF sold to Standard, Arzee, and Allied, but refused to sell **[**12]** to Rossi. Joseph Licciardello was an employee of GAF, who quit his job and replaced Rossi as vice president of Standard after Rossi was fired. [2] Wood Fiber competes with GAF in the northern New Jersey market, manufacturing and selling Structodek FS, a product used principally in commercial roofing applications.

Defendant Servistar is a member-owned, national purchasing cooperative that operates hardware distribution centers nationwide. Servistar has over 4000 members at the retail level and deals primarily in paint, hardware, plumbing and electrical supplies, housewares, lawn and garden equipment, power tools, and lumber. Roofing products account for only 2% of Servistar's total purchases on behalf of its members, which were just under $ 1 billion in 1990. Servistar does not warehouse roofing supplies, but rather operates on a "drop shipment" basis, meaning that members place their orders through Servistar (which affords **[**13]** them a discount based on Servistar's status as a national volume purchaser), and the selected roofing manufacturer then supplies the product directly to the member. Servistar pays the manufacturer and later collects from the member.

B. Rossi at Standard; Rossi Forms His Own Company

From 1972 to 1988, Rossi worked for defendant Standard as the manager of its Cedar Knolls, New Jersey branch, selling roofing and siding materials. In 1980, Rossi was promoted to vice president, rewarded with stock in the company, and told that he would eventually become a co-owner of the business. Eight years later, however, in September 1988, Standard fired Rossi. The parties dispute the reasons for Rossi's discharge. Rossi alleges that Standard fired him because he refused to participate in a conspiracy with defendant Arzee to fix prices, discussed

---

[1] Defendants contend that Joseph Rossi lacks standing as an individual to pursue this matter against them because his personal claims of injury are derivative of the claims of Rossi Florence and Rossi Roofing. The district court did not reach that issue because it found that no antitrust violation existed at all. See *Rossi v. Standard Roofing, Inc., 958 F. Supp. 976, 991 n.11 (D.N.J. 1997)*. Since we are reversing the district court's grant of summary judgment in favor of several of the defendants and remanding this case for further proceedings, we will also remand the standing issue so that the district court can consider it in the first instance. Because we are not then differentiating between plaintiffs for the purposes of this appeal, we will assume that all three plaintiffs have standing, and will generally use the term "Rossi" to refer to them all.

[2] Section I.B, infra, provides further information about Rossi's career at Standard.

infra at § II.B.2.a. Standard claims that it fired Rossi for a combination of reasons including his deteriorating work performance, his failure to control expenses, the Cedar Knolls branch's excessively high payroll expenses under his management, his large personal expense account, his failure to arrive at work until late morning, his concentration **[**14]** on outside business ventures to the detriment of Standard, and, ultimately, his failure to achieve branch profits commensurate with branch sales.

At all events, by the time he was fired, Rossi had developed a reputation within the industry for extremely competitive pricing, excellent service, and reliability. While at Standard, Rossi had refined an aggressive marketing strategy that stressed high volume sales at low prices. This strategy, as one might imagine, angered Rossi's competitors and even concerned some of his suppliers, which were sensitive to their distributors concerns about pricing.

After his termination, Rossi decided to use his connections within the industry to open his own roofing and siding distributorship **[*459]** that would serve northern New Jersey in direct competition with Standard and Arzee. Rossi's first attempt, in late 1988, was Rossi Florence, a joint venture with Richard Droesch ("Droesch"), president of Florence Corp. ("Florence"), a roofing, siding, and window distributor in Long Island, New York. Rossi and Droesch planned to operate their new business out of a warehouse Rossi owned at 8 Frederick Place, located immediately adjacent to Standard's **[**15]** Cedar Knolls/Morristown branch and just down the street from Arzee's Morristown branch. Rossi and Droesch made substantial preparations for their venture during the fall of 1988. Droesch (together with one of his employees) invested $ 100,000 in Rossi Florence, and Rossi Florence obtained a $ 900,000 bank line of credit secured by the principals' personal guarantees. By mid-January 1989, however, Droesch decided to pull out of Rossi Florence, and Rossi refunded his investment. Droesch felt that because of pressure from Standard, Arzee, and others, the new company would be unable to get the products it needed to successfully compete in the market. In addition, Alvin Roth, president of Arzee, threatened Droesch that if he continued in business with Rossi in New Jersey, Arzee would open up a branch in Long Island to compete directly with Droesch's Florence distributorship.

Thereafter, in February 1989, Rossi incorporated Rossi Roofing, continuing his efforts to break into the roofing and siding distribution business in northern New Jersey. Rossi Roofing obtained another $ 900,000 bank line of credit, personally guaranteed by Rossi and his wife. The company, which opened for business **[**16]** on March 20, 1989, closed in less than a year, after experiencing great difficulty in obtaining product lines and weathering the brunt of a major downturn in the New Jersey housing industry. In January 1990, unable to run Rossi Roofing profitably, Rossi sold the company's assets to American Builders and Contractors, Inc. ("ABC"), a national roofing and siding distributor.

C. The Roofing and Siding Industry in Northern New Jersey; Price Discounting and Market Shares

During the relevant time period, the northern New Jersey market included thirty-nine roofing distributors with more than fifty-seven locations. Eleven residential roofing manufacturers, nine commercial roofing manufacturers, and seventeen vinyl siding manufacturers operated in the region. It is undisputed that this roofing and siding marketplace was highly competitive, and that roofing and siding contractors constantly price-shopped, pitting distributor against distributor in order to obtain the best possible deal.

GAF, which served this region, offered certain favored distributors secret off-invoice, volume and non-volume discounts or "rebates" in the form of periodic credits against purchases. Standard, Arzee, **[**17]** and former defendant Allied purportedly all received such discounts from GAF. The amount of these discounts was kept highly confidential because the favored distributors feared that if other distributors found out, they might complain to GAF and ultimately destabilize prices in the market. As GAF district sales manager Elmer "Bud" Krusa put it, "the less people that know about it, the less chance you have of getting it -- dropping the entire market price." Rossi contends that while he was employed at Standard, he would pass these discounts on to his customers in an effort to increase his market share, whereas his competitors typically pocketed the rebate.

GAF and Wood Fiber are the only two manufacturers remaining as litigants in this case. According to GAF 's own estimates, it supplied a large percentage of the New Jersey shingle market (38% for all shingles and 71% for laminate shingles). GAF was Standard's primary supplier of roofing products in the 1980's, and Standard was GAF 's biggest customer in New Jersey and one of its top five customers in the entire country. Standard bought $ 7.7 million of GAF product in 1989 (or 32% of GAF 's total sales in New Jersey that year), substantially **[**18]** more than any other GAF customer in New Jersey.

Arzee and former defendant Allied also purchased GAF product, but in markedly smaller quantities. Arzee, for example, featured Tamko and Owens Corning Roofing, **[*460]** rather than GAF product, and only purchased $ 919,747 of GAF product in 1989 (or 4% of GAF's total sales in New Jersey in 1989). Together, however, Standard, Arzee, and Allied (which bought $ 2.1 million of GAF product in 1989) purchased $ 10.7 million of the $ 24.1 million of GAF product sold in New Jersey (or 44% of GAF 's total sales in New Jersey in 1989). [3] Rossi contends that, notwithstanding the large number of other manufacturers offering product in the area, GAF product was critical for a distributor to successfully compete in Northern New Jersey, as evidenced by GAF's large market share and also the fact that it was the most desirable and popular roofing material available. This in turn stems in part from several facts: GAF product was well-known by both homeowners and contractors; GAF guaranteed its product; and importantly, GAF product had already been selected for many of the existing townhouse projects in northern New Jersey in 1989 and 1990, making **[**19]** it impossible for the builders to switch brands mid-stream.

The evidence in the record regarding Wood Fiber's market position in 1989-90 is not as clearly defined as that of GAF. Wood Fiber manufactures Structodek FS, a commercial roofing product used primarily in commercial applications for certain modified bitumen roofs. Commercial work comprised no more than a third of Rossi Roofing's

---

[3] 1989 sales of GAF product in the northern New Jersey market (rounded to the nearest $ 100,000) were:

Company	Amount	% of Total Sales
Standard	$ 7,700,000	32.0%
Allied	$ 2,100,000	8.7%
Arzee	$ 900,000	3.8%
Total	*$ 10,700,000*	*44.5%*

business; the remaining two-thirds consisted of residential roofing. We do not know from the record how much product Wood Fiber sold in the northern New Jersey market; nor do we know what percentage of Wood Fiber's sales was purchased by Standard or Arzee (or Allied); nor is there any evidence that Wood Fiber had an off-invoice rebate **[**20]** program favoring certain distributors similar to GAF's. This is not surprising because Wood Fiber's involvement in this case stems largely from two isolated episodes, one in which a Wood Fiber representative complained of "pressure" not to sell to Rossi Roofing, and another in which Wood Fiber refused to supply product to Rossi after having accepted an order. See infra § II.B.2.d.

D. Rossi's Damage Claims

Rossi submits that because of his inability to purchase "GAF and other essential products, Rossi Roofing could not succeed." Unable to sustain the business any longer, on January 8, 1990, Rossi entered into an asset purchase agreement with ABC, which leased Rossi's 8 East Frederick Place property and opened a branch where Rossi Roofing once stood. Most employees, including Rossi as the branch manager, continued to work for ABC. According to Rossi, ABC (which was able to get GAF and other products) did very well. In 1990, it achieved over $ 5.5 million in sales, and by 1993, sales had increased to $ 11 million. [4] In 1993, ABC fired Rossi, closed the Morristown branch, and transferred operations to Randolph, New Jersey. Rossi then entered into a similar agreement with **[**21]** Allied, which opened up a location on Rossi's property and hired him to manage it.

Rossi contends that he suffered substantial damages when Rossi Florence and Rossi Roofing, unable to get GAF and other important products, failed. In support, Rossi offers the testimony of several of his former customers during his tenure at Standard, who stated that they would have done business with Rossi Roofing if it had had the necessary product lines. Thus, in Rossi's submission, if the manufacturers had sold to him the same products that they ultimately sold to ABC (and later **[**22]** Allied), Rossi Roofing would have succeeded, and "over time, Rossi would have had his company open up new branches, as Standard, Arzee and Allied have done. The lost profits to Rossi Florence, and to Rossi Roofing, have been over $ 7 million **[*461]** at a minimum." In addition, Rossi claims to have suffered additional, non-duplicative damages of over $ 1 million from payments he made on behalf of Rossi Florence and Rossi Roofing, including payments made on his personal guarantees of Rossi Roofing's debts.

E. Procedural History

Rossi's action in the district court alleged, inter alia, a group boycott in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, and *Section 3* of the New Jersey Antitrust Act, as well as tortious interference with plaintiffs' contractual and prospective contractual relations. [5] After extensive discovery and submissions in support of and opposition to the motions, the district court granted defendants' motions for summary judgment, finding insufficient evidence of concerted action, causation, and damages. Rossi has appealed not only that judgment but also a discovery ruling -- the district court's order denying a motion **[**23]** to compel defendant GAF to provide additional factual detail about the subject matter of GAF's counsel's handwritten notes of three telephone conversations with GAF employees.

The district court had subject matter jurisdiction pursuant to *28 U.S.C. §§ 1337* and *1367*, as well as *15 U.S.C. § 15*. We have appellate jurisdiction pursuant to *28 U.S.C. § 1291*.

II. *SECTION 1* OF THE SHERMAN ANTITRUST ACT

Under the literal dictates of *§ 1* of the Sherman Act "***HN1***[] every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal." *15 U.S.C. 1* (emphasis

---

[4] There is little evidence as to what the net profits (or losses) of the ABC branch were. Arzee contends, based upon some nebulous testimony in the record, that the ABC branch run by Rossi suffered losses in each of its four years of operation, app. at 4253-56, and that the Morristown branch of ABC was a failure, generating only $ 5 million in revenues in 1990, $ 1.7 million less than Rossi's own break-even figure for Rossi Roofing. App. at 4309-10.

[5] State law claims for breach of contract, conversion, fraud, and negligent misrepresentation, arising out of Rossi's contractual relationships with Standard, were dismissed without prejudice and are not under review here.

supplied). The Supreme Court has interpreted this provision to prohibit only unreasonable **[**24]** restraints. See *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*. ***HN2***[] To determine whether a restraint is unreasonable, courts apply one of two modes of analysis, depending upon the nature of the concerted action at issue. Agreements are either analyzed through "a case-by-case application of the so-called rule of reason," whereby the fact finder "weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition," id. (internal quotations omitted), or the court applies the per se standard, which dispenses with the need for case-by-case analysis. [6] See id. Under the per se standard, conduct that is "manifestly anticompetitive" or "would always or almost always tend to restrict competition," id. (internal citations omitted), is conclusively presumed to unreasonably restrain competition "without elaborate inquiry as to the precise harm [it has] caused or the business excuse for [its] use." *Northern Pac. Ry. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. This **[**25]** is because "of [its] pernicious effect on competition and lack of any redeeming virtue." *Northern Pac. Ry., 356 U.S. at 5*. Thus, the first issue we must consider is whether the conduct alleged here warrants per se or the more lenient rule of reason treatment, because that determination will dramatically affect the quantum of proof Rossi must offer to sustain his claim.

[26]** A. Characterizing a Group Boycott; Per se Versus the Rule of Reason

Rossi, relying on such cases as *United States v. General Motors Corp., 384 U.S. 127, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966)*, *Big Apple BMW, Inc. v. BMW of N. Am., Inc., 974 F.2d 1358, 1376 (3d Cir. 1992)*, *Fragale & Sons Beverage Co. v. Dill, 760 F.2d 469, 473 (3d Cir. 1985)*; *Malley-Duff v. Crown Life Ins. Co, 734 F.2d 133 at 140*, **[*462]** and *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 114 (3d Cir. 1980)*, alleges that the defendants engaged in a classic horizontal group boycott that qualifies as a per se violation. Rossi submits that several of his fellow distributor-competitors (i.e. Standard, Arzee, and Allied), as well as their principal manufacturer/supplier(s), agreed to boycott Rossi Florence and Rossi Roofing and frustrate Rossi's attempts to obtain the products he needed to successfully compete against them.

Defendants respond that Rossi's theory does not comprise a per se antitrust claim because it is a vertical conspiracy in which there has been no allegation of resale price **[**27]** fixing. We agree with defendants that if this were simply a vertical conspiracy, between one horizontal competitor and one supplier or manufacturer, we would analyze it under the rule of reason unless there were some evidence of price fixing. See *Business Elecs., 485 U.S. at 735-36* (analyzing an alleged agreement between one supplier and one horizontal distributor as a vertical non-price-fixing conspiracy under the rule of reason); *Tunis Brothers Co. v. Ford Motor Company, 763 F.2d 1482 at 1497, 1502* (same); cf. *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 37, 59, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)* (concluding that franchise agreements that bar retailers from selling franchised products from locations other than those specified are analyzed under the rule of reason). [7] Unlike the cases cited above, however, here there are a number of horizontal competitors involved. Thus, this case more closely resembles the horizontal nature of *United States v. General Motors Corp., 384 U.S. 127, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966)*, a case that the Supreme Court treated as a group boycott with per se **[**28]** implications.

In General Motors, the Supreme Court found a group boycott where a group of automobile dealers had joined together to force their manufacturer, General Motors, to assist them in ending the practice of some dealers that were reselling their automobiles to discounters. See *384 U.S. at 143-44, 147*. Other cases fit this mold as well. See,

---

[6] We have also recently discussed a third standard that falls somewhere between the rule of reason and per se standards. In our jurisprudence, we refer to this middle ground as an abbreviated or "quick look" rule of reason analysis. See *Orson, Inc. v. Miramax Film Corp., 79 F.3d 1358, 1367 n.9 (3d Cir. 1996)* (citing *United States v. Brown Univ., 5 F.3d 658, 669 (3d Cir. 1993)*). This "quick look" analysis applies "where per se condemnation is inappropriate, but where a full-blown industry analysis is not required to demonstrate the anticompetitive character of an inherently suspect restraint." Id.

[7] In Business Elecs., the Supreme Court indicated that the rationale behind applying the rule of reason to vertical non-price restraints is that such restraints have the potential to promote inter-brand competition, the "primary concern of the antitrust laws," over intra-brand competition. See *485 U.S. at 724-25* (citations omitted).

e.g., Big Apple BMW, 974 F.2d at 1376 (analyzing an alleged agreement among supplier BMW North America and several of its dealers to prevent a potential price-cutting competitor from receiving a franchise as a horizontal group boycott); Sweeney, 637 F.2d at 114 **[**29]** (holding that when a manufacturer terminates a distributor's supply pursuant to an agreement with several distributors, these actions make out a horizontal § 1 claim); cf. Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212-13, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959) (applying a similar horizontal analysis under § 2 of the Sherman Act where manufacturers and distributors had conspired among themselves and with a major retailer to deprive another retailer access to product lines).

The common principle we glean from these cases is that ***HN3***[] a conspiracy is horizontal in nature when a number of competitor firms agree with each other and at least one of their common suppliers or manufacturers to eliminate their price-cutting competition by cutting his access to supplies. From this perspective, Rossi's asserted conspiracy is indistinguishable from those put forth in General Motors, Klor's, Big Apple BMW and Sweeney -- namely, "joint action to eliminate [a] discounter[] from participation in the market," General Motors, 384 U.S. at 144 -- and thus, the defendants' characterization of the conspiracy Rossi alleges as vertical, **[**30]** and not horizontal, cannot withstand scrutiny.

This conclusion, however, leaves us with the second (and ultimately more difficult) question whether this horizontal agreement, which Rossi labels a "group boycott," qualifies as a per se violation. Traditionally, such agreements have received such per se treatment. See Malley-Duff & Assocs. v. Crown Life Insur. Co., 734 F.2d 133, 140 (3d Cir. 1984). Indeed, in all of the horizontal "group boycott" cases listed above, the court adopted the per se approach. See, e.g., General Motors Corp., 384 U.S. at 143-44, 147; **[*463]** Klor's, 359 U.S. at 212-13; Big Apple BMW, 974 F.2d at 1376; Sweeney, 637 F.2d at 114. More recently, however, the Supreme Court has reminded us that it is not a simple exercise to determine what conduct falls within the "forbidden category" of a per se group boycott. See Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 294, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985) (" 'There is more confusion about the scope and operation of the per se rule against **[**31]** group boycotts than in reference to any other aspect of the per se doctrine.' ") (quoting L. Sullivan, Law of Antitrust 229-30 (1977)); FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 458-59, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986). Under the more recent jurisprudence, it is clear that assigning the label "group boycott" to a concerted refusal to deal with a distributor does not have a talismanic effect, automatically bringing the case under the per se rubric. Instead, the Supreme Court has directed us to carefully scrutinize the nature of the asserted refusals to deal to determine whether it fits within the per se " 'boycott' pigeonhole." Indiana Fed'n of Dentists, 476 U.S. at 458.

In Northwest Wholesale Stationers, the Supreme Court attempted to explain what kinds of boycotts qualify for the per se approach and what kinds do not. The Court emphasized that the per se approach was appropriate when the allegations were of "joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive **[**32]** struggle." 472 U.S. at 294 (internal quotes omitted). The Court also noted that per se boycott cases usually contain three elements: "denial of something a competitor needs to compete effectively, defendants with a dominant position in the relevant market, and the absence of any plausible contention that the challenged behavior would 'enhance overall efficiency and make markets more competitive.' " P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 1510 (Supp. 1997) (quoting and interpreting Northwest Wholesale Stationers, 472 U.S. at 294-95). Finally, the Court instructed that although "a concerted refusal to deal need not necessarily possess all of these traits to merit per setreatment . . . [a] plaintiff seeking application of the per se rule must present a threshold case that the challenged activity falls into a category likely to have predominantly anticompetitive effects. The mere allegation of a concerted refusal to deal does not suffice because not all concerted refusals to deal are predominantly anticompetitive." [8] Northwest Wholesale Stationers, 472 U.S. at 295, 298.

---

[8] The Courts of Appeals have differed in their application of this language. The Seventh Circuit has held that "once control over an important resource appears, no justification for a refusal to deal can be considered." Areeda & Hovenkamp, ***Antitrust Law*** P 1510 (interpreting Fishman v. Wirtz, 807 F.2d 520, 541 (7th Cir. 1986) (holding that a concerted refusal to deal is illegal per se if the "defendants have either market power or exclusive access to an element essential to effective competition.") (internal quotes

[33]** Applying these precepts to the "boycott" at issue in Northwest Wholesale Stationers, the Court determined that it was "not a form of concerted activity characteristically likely to result in predominantly anticompetitive effects." *472 U.S. at 295*. In that **[*464]** case, a retail office supply store had sued a nonprofit cooperative buying association claiming that its expulsion from the cooperative was per se illegal. The expulsion -- without explanation, notice, or hearing -- hurt the plaintiff by effectively raising the wholesale price of supplies and eliminating certain favorable warehousing options made available to members of the defendant. Examining this type of restraint, the Court held that "the act of expulsion from a wholesale cooperative does not necessarily imply anticompetitive animus and thereby raise a probability of anticompetitive effect." *Id. at 296* (citations omitted). Rather, the Court noted that cooperatives must "establish and enforce reasonable [membership] rules in order to function effectively." Id. Therefore, the rules that the plaintiff allegedly violated (it allegedly failed to disclose to the cooperative **[**34]** membership of a change in its ownership) might have been necessary for the cooperative to monitor its members' creditworthiness. Without a showing that "the cooperative possessed market power or exclusive access to an element essential to effective competition," the Court held that expulsion based upon violation of the disclosure rules was not "likely to result in predominantly anticompetitive effects." Id.

Similarly, in Indiana Fed'n of Dentists, the Court refused to extend per se group boycott status to a situation in which a professional association collectively refused to cooperate with insurers' requests for x-rays. The Court refused to expand the category of cases classified as per se group boycotts to situations involving professional associations or situations where "the economic impact of certain practices is not immediately obvious." *476 U.S. at 459*. While the collective refusal to cooperate with insurers "resembled practices that have been labeled 'group boycotts,' " the Court refused to hold that the economic impact of this agreement was immediately obvious. *Id. at 458*.

Here, in contrast to Indiana Fed'n of Dentists **[**35]** and Northwest Wholesale Stationers, the defendants are not members of a professional association, and the economic impact of their actions -- driving a price-cutting competitor out of business -- is clear. Applying the precepts laid out in Northwest Wholesale Stationers, we believe that the Rossi boycott falls within the description of "joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle." *472 U.S. at 294* (internal quotes omitted). As will be discussed more fully below, see infra § II.B.2.b(1), Rossi has adduced evidence that GAF product was, if not unique, then at least necessary for him to compete in the marketplace. Further, the gravamen of his complaint fits snugly within the Court's Northwest Wholesale Stationers description of per se concerted refusals to deal -- namely, Standard and Arzee (and perhaps other horizontal competitors like Allied) conspired with manufacturers like GAF and suppliers like Servistar to deny Rossi access to GAF product as well as to coerce other suppliers not to **[**36]** sell any products to him. Importantly, all of this activity was done against the backdrop of Standard's and Arzee's dissatisfaction with Rossi's price-cutting proclivities, and thus an inference can be drawn that the conspiracy was at least partially conceived as a price restraint.

For these reasons, we find it implausible that the alleged behavior by the defendants would "enhance overall efficiency and make markets more competitive," Northwest Wholesale *Stationers, 472 U.S. at 294*, and therefore,

---

omitted)). The Eighth and Ninth Circuits have focused on the number of horizontal players in the alleged conspiracy and have found no per se rule against boycotts in situations where the conspirators included only a single supplier and a single retailer in competition with the plaintiff. See id. (discussing *Lomar Wholesale Grocery, Inc. v. Dieter's Gourmet Foods, Inc., 824 F.2d 582, 591 (8th Cir. 1987)* ("there must be some collusion between competitors on the same market level," for otherwise the "net economic impact of refusals to deal" is not "immediately obvious") and *Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 734 (9th Cir. 1987))*. The implication of these holdings would seem to be that the result differs as the number of parties to the conspiracy grows. This Court has tended to follow the Eighth and Ninth Circuits and has seemingly been more willing than some others, see, e.g., *K.M.B. Warehouse Dists., Inc. v. Walker Manuf. Co., 61 F.3d 123, 127 (2d Cir. 1995)* (viewing an alleged agreement among a vertical manufacturer and three horizontal distributors as a vertical non-price-fixing conspiracy subject to the rule of reason, not per se, analysis), to find an horizontal per se violation when a small number of dealers have prevailed upon a manufacturer or supplier to cut off a price discounter. See, e.g., *Big Apple BMW, 974 F.2d at 1376*; *Malley-Duff, 734 F.2d at 140*, and *Sweeney, 637 F.2d at 114*.

taking into account the Court's most recent guidance, we conclude that Rossi's allegations should be analyzed using the per se framework.

Our conclusion that Rossi's allegations constitute a per se violation of § 1 simplifies our analysis here. In the usual rule of reason case, **HN4**[] to establish a violation of § 1, plaintiffs must prove:

> (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within the relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that **[**37]** the plaintiffs **[*465]** were injured as a proximate result of that conspiracy.

Tunis Bros. Co., Inc. v. Ford Motor Co., 763 F.2d 1482, 1489 (3d Cir. 1985) (citations omitted), vacated on other grounds, *Ford Motor Co. v. Tunis Brothers Co. Inc., 475 U.S. 1105, 89 L. Ed. 2d 909, 106 S. Ct. 1509 (1986)*. Here, because per se analysis applies, prongs two and three are conclusively presumed satisfied and need not be addressed. Accordingly, to prevail on summary judgment, Rossi need only show the existence of a genuine issue of material fact regarding concerted action and proximate causation. We will address these in turn.

B. Concerted Action

1. *Section 1* of the Sherman Antitrust Act -- Proving the Conspiracy

The presence of concerted action or an agreement is an essential element of a *§ 1* claim. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* ("Unity of purpose or a common design and understanding, or a meeting of the minds in an unlawful arrangement" must exist to trigger *section 1* liability.) (internal quotes omitted); *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 999-1000 (1994)* **[**38]** (noting that the existence of concerted action is one of the important distinguishing features between a *§ 1* claim of conspiracy and a § 2 claim of monopolization). Unilateral activity, no matter what its motivation, cannot give rise to a *§ 1* violation, see *Sweeney, 637 F.2d at 110-11*, because a manufacturer "has the right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. A plaintiff may utilize either direct or circumstantial evidence in order to make out the element of concerted action. While direct evidence, the proverbial "smoking-gun," is generally the most compelling means by which a plaintiff can make out his or her claim, it is also frequently difficult for antitrust plaintiffs to come by. Thus, plaintiffs have been permitted to rely solely on circumstantial evidence (and the reasonable inferences that may be drawn therefrom) to prove a conspiracy. See *Alvord-Polk, 37 F.3d at 1000* (citing *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 98 L. Ed. 273, 74 S. Ct. 257 (1954)*; **[**39]** *Sweeney, 637 F.2d at 111*).

While the traditional summary judgment standard applies with equal force in antitrust cases, [9] when the plaintiff relies solely on circumstantial evidence to prove concerted action, this analysis is modified in accordance with the

---

[9] A district court's grant of summary judgment is subject to plenary review. See *Knabe v. Boury Corp., 114 F.3d 407, 410 n.4 (3d Cir. 1997)*; *Public Interest Research of New Jersey v. Powell Duffryn Terminals, Inc., 913 F.2d 64, 71 (3d Cir. 1990)*. Summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. An issue is genuine if "the evidence is such that a reasonable jury could return a verdict for the non-moving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

As in this case, **HN5**[] when the nonmoving party will bear the burden of proof at trial, that party must adduce evidence "sufficient to establish the existence of [every] element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. **HN6**[] In evaluating the sufficiency of the evidence, facts and inferences must be viewed in the light most favorable to the party opposing summary judgment. See *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 456, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*; *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

leading antitrust cases dealing with this subject, Monsanto and *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, and their progeny. In Matsushita, the Supreme Court explained the limitation courts must apply to permissible inferences when deciding a summary **[*466]** judgment motion in an antitrust conspiracy case: "Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Matsushita, 475 U.S. at 588* (citing *Monsanto, 465 U.S. at 764*). Rather, to survive a motion for summary judgment, "a plaintiff seeking damages for a violation of *§ 1* must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently," id., "direct or circumstantial evidence **[**40]** that reasonably tends to prove that [the alleged conspirators] 'had a conscious commitment to a common scheme designed to achieve an unlawful objective.' " *Monsanto, 465 U.S. at 764* (quoting *Sweeney, 637 F.2d at 111*).

[41]** The Supreme Court's concerns about permitting the inference of a conspiracy from ambiguous circumstantial evidence in the antitrust context stem from its conclusion that mistakes by an overzealous judiciary would be "especially costly . . . chilling the very conduct the antitrust laws are designed to protect." *Matsushita, 475 U.S. at 594*; *Monsanto, 465 U.S. at 763*; *Big Apple BMW, 974 F.2d at 1363* ("Care must be taken to ensure that inferences of unlawful activity drawn from ambiguous evidence do not infringe upon defendant's freedom, so long as it acts independently, to refuse to deal.") (citing *United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919))*. For this reason, the plausibility of an antitrust plaintiff's claim is important. "If the factual context renders [the plaintiff's] claim implausible -- if the claim is one that simply makes no economic sense -- [a plaintiff] must come forward with more persuasive evidence to support [its] claim than would otherwise be necessary." *Matsushita, 475 U.S. at 587* (citations omitted). Relatedly, in evaluating whether **[**42]** a genuine issue for trial exists, the antitrust defendants' economic motive is highly relevant. "If[the defendants] had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy." *Id. at 596*. Moreover, even with a plausible motive to conspire, ambiguous conduct will not create a triable issue of fact with respect to the existence of a conspiracy. See *id. at 597 n.21*.

Under our jurisprudence, the Matsushita standard only applies when the plaintiff has failed to put forth direct evidence of conspiracy. See *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., Inc., 998 F.2d 1224, 1233 (3d Cir. 1993)*. Thus, in direct evidence cases, the plaintiff need not adduce circumstantial evidence " 'that tends to exclude the possibility' that the alleged conspirators acted independently," *Matsushita, 475 U.S. at 588*, and there need not be an inquiry into the plausibility of the defendants' claim or the rationality of defendants' economic motives. See *id. at 596-97*. This is **[**43]** because when the plaintiff has put forth direct evidence of conspiracy, the fact finder is not required to make inferences to establish facts, and therefore the Supreme Court's concerns over the reasonableness of inferences in antitrust cases evaporate. See *Petruzzi's, 998 F.2d at 1233*.

Additionally, our jurisprudence does not require the summary judgment opponent to " 'match, item for item, each piece of evidence proffered by the movant,' " but rather he or she must only exceed the " 'mere scintilla' " standard. See *Petruzzi's, 998 F.2d at 1230* (quoting *Big Apple BMW, 974 F.2d at 1363*). Accordingly, when examining the sufficiency of what the plaintiff has adduced, we are not to "tightly compartmentalize the evidence," but rather we must evaluate it as a whole to see if it supports an inference of concerted action. See *id. at 1230*.

In sum, Matsushita does not introduce a special burden on antitrust plaintiffs opposing summary judgment; it "demands only that the nonmoving party's inferences be reasonable in order to reach the jury, a requirement that was not invented, but merely articulated, in that decision. If the plaintiffs **[**44]** theory is economically senseless, no reasonable jury could find in its favor, and summary judgment should be granted." *Eastman Kodak, 504 U.S. at 468-69* **[*467]** (footnote omitted). Conversely, Matsushita does not mean that antitrust defendants are entitled to summary judgment merely by showing that there is a plausible explanation for their conduct; rather "the focus must remain on the evidence proffered by the plaintiff and whether that evidence 'tends to exclude the possibility that [the

---

That being said, however, when the moving party has pointed to material facts tending to show there is no genuine issue for trial, the "opponent must do more than simply show that there is some metaphysical doubt as to the material facts . . . . Where the record taken as a whole could not lead a rational trier of fact to find for the nonmoving party, there is no 'genuine issue for trial.' " *Matsushita, 475 U.S. at 586-87* (citations omitted).

defendants] were acting independently.' " *Petruzzi's, 998 F.2d at 1232* (quoting *Monsanto, 465 U.S. at 764*). Thus, where the nonmoving party has put forth evidence that provides an inference of concerted action, the moving party "bears the burden of proving that drawing the inference of unlawful behavior is unreasonable." *Id. at 1230*.

Finally, while ambiguous conduct cannot create a triable issue of fact, when "the alleged conduct is 'facially anticompetitive and exactly the harm the antitrust laws aim to prevent,' no special care need be taken in assigning inferences to circumstantial evidence." *Alvord-Polk, 37 F.3d at 1001* **[**45]** (quoting *Eastman Kodak, 504 U.S. at 478*).

With these standards in mind, we will address the evidence adduced by Rossi in support of his theory of conspiracy. Cognizant of our obligation to view the evidence as a whole and to resist the temptation to compartmentalize it, see *Petruzzi's, 998 F.2d at 1230*, we will nonetheless consider Rossi's allegations, defendant by defendant, to provide a logical structure to our analysis. We note in this regard that this court has been relatively hospitable to the efforts of plaintiffs to prove concerted action. See *Alvord-Polk, 37 F.3d at 1010, 1013*; *Petruzzi's, 998 F.2d at 1247*; *Big Apple BMW, 974 F.2d at 1380, 1383*; *Arnold Pontiac-GMC, Inc. v. Budd Baer, Inc., 826 F.2d 1335, 1338-39 (3d Cir. 1987)*; *Arnold Pontiac-GMC, Inc. v. General Motors Corp., 786 F.2d 564, 572-75 (3d Cir. 1986)*; *Tunis Bros., 763 F.2d at 1489, 1502*.

2. Rossi's Evidence of Concerted Action

a. Standard (Robert Higginson, William Higginson, Joseph Licciardello) and Arzee (Al Roth and Cary Roth) [10]

[46]** We begin with Rossi's horizontal competitors, Standard and Arzee, against whom Rossi has the strongest evidence of motive to keep a price-cutting competitor with close ties to many customers from entering the market. Standard's and Arzee's (as well as the other defendants') first line of defense to Rossi's charges is that the conspiracy he alleges is implausible, and therefore under Matsushita, permitting an inference of antitrust conspiracy would have the effect of "chilling the very conduct the antitrust laws are designed to protect." *475 U.S. at 594*. According to the defendants, there was no rational economic reason for them to conspire, and thus they had no plausible motive to conspire to boycott Rossi.

They base their implausibility claim on the fact that the market was extremely price competitive and consisted of upwards of three dozen competing distributors. Under these conditions, defendants argue that they could not have charged above-market prices and stayed in business, and thus that they had nothing to fear from a price-cutter like Rossi. Moreover, they submit that there would be little to gain by excluding one more distributor from the market when **[**47]** there were at least three dozen firms in the market already. In defendants' view, any conspiracy to stabilize the market and reap enhanced profits would be doomed to failure (and is therefore presumably implausible) because, to succeed, it would have required an enormously complex and far-reaching undertaking, involving upwards of sixty participants (each selling different quantities of comparable, competing products) to stabilize prices at supra-competitive levels. Defendants maintain that, because there was virtually no likelihood that three (Standard, Arzee, and Allied) out of the almost forty competing distributors, and one or two **[*468]** (GAF and possibly Wood Fiber) out of thirty manufacturers could have sustained such a conspiracy, they had no rational motive to conspire, and the conspiracy is thus implausible.

The defendants compare this to the situation in Matsushita. There, the defendants were alleged to have entered into a twenty-plus-year conspiracy to fix prices in the electronics market below the market level in the hopes of establishing a monopoly and extracting monopoly profits in the undetermined future. See *Matsushita, 475 U.S. at 588-90*. **[**48]** The Court viewed this predatory pricing scheme as implausible because it would have required multiple defendants to endure tremendous up-front losses for the foreseeable future in the hopes that they could, at some point, recover these losses and make even greater profits once they had driven their competitors from the

---

[10] In our discussion of Standard, Robert Higginson, William Higginson, Joseph Licciardello, and also Arzee, Alvin Roth, and Cary Roth, we find no basis to separate the individual defendants from their respective corporate employers. Thus, for shorthand purposes, when we make future reference to "Standard" or "Arzee," (or the "Standard defendants" and the "Arzee defendants"), we refer to the individuals as well as the corporate entities with which they are related.

market and established a monopoly. See id. at 589-90. The Court, examining the electronics market as well as the length and ongoing failure of the alleged conspiracy, concluded that there was no evidence that the defendants could ever recoup such losses, see id. at 594-95, and therefore, that the defendants had no motive to engage in the conspiracy. See id. at 595.

Standard's and Arzee's reliance on Matsushita in this case is misplaced for several reasons. As a threshold matter, Matsushita does not apply when there is direct evidence of conspiracy. See Petruzzi's, 998 F.2d at 1233. Here, Rossi has adduced direct evidence of concerted action between defendants Standard and Arzee in the form of a threat Rossi received in December of 1988. Joseph Licciardello, who had by that time left his **[**49]** job at GAF and was working in Rossi's old job as manager of the Standard branch at Cedar Knolls, told Rossi that Standard and Arzee would do whatever it took to put him out of business if he persisted with his plans to found Rossi Florence. In his deposition, Rossi testified:

> Q: Mr. Rossi, tell me specifically what anyone from Standard did to prevent Rossi Florence from going into business.
>
> * * *
>
> A: I guess it started when Joe Licciardello came over and threatened me that if I went into business that he and Arzee Supply would do anything they could, stop supplies, cut the prices, whatever they had to do they were going to do to keep me out of business. That's the way he put it. [11]

[50]** Licciardello's threat, viewed in a light most favorable to Rossi, indicates that two of his competitors had discussed and agreed to act jointly to prevent Rossi from competing with them in the roofing and siding business in northern New Jersey. Moreover, Licciardello's statement even details how the two companies planned to do it; they agreed to "stop supplies" anyway they could. Thus, we conclude that the Matsushita implausible conspiracy argument is not relevant to the allegations of conspiracy with respect to Standard and Arzee. However, even if, as in **[*469]** the case of GAF, there was no direct evidence of concerted action, the conspiracy Rossi alleges is not implausible. Indeed, as we will discuss below, with respect to Standard, Arzee, and GAF, the conspiracy makes perfect sense. See infra § II.B.2.b(1).

The direct evidence discussed above is enough to take the case against Standard and Arzee beyond the constraints of Matsushita (and thus permits us to avoid the questions whether the circumstantial evidence tends to exclude the possibility of independent action, whether the plaintiff 's claim is plausible, and whether the defendants' economic motives were **[**51]** rational). See supra at § II.B.1. However, it is not enough by itself to satisfy Rossi's burden in opposing summary judgment. On the other hand, Rossi has adduced a significant collection of other evidence, circumstantial in nature, in support of his position. We turn to that evidence now.

First, Rossi has adduced evidence of two meetings between Standard and Arzee employees which, when taken together, support the inference of a joint motive by the two defendants to unlawfully stabilize roofing prices in northern New Jersey. This motive is consistent with the motive behind the defendants' alleged boycott of Rossi

---

[11] Arzee argues that this statement is not admissible against it under Bourjaily v. United States, 483 U.S. 171, 97 L. Ed. 2d 144, 107 S. Ct. 2775 (1987). We conclude that it is. ***HN7***[] Under Fed. R. Evid. 801(d)(2)(E), "a statement by a coconspirator of a party during the course and in furtherance of the conspiracy" is not inadmissible hearsay as to that party. Under our jurisprudence, four requirements must be met before a statement can be admitted under this exception. "It must appear: (1) that a conspiracy existed; (2) the declarant and the party against whom the statement is offered were members of the conspiracy; (3) the statement was made in the course of the conspiracy; and (4) the statement was made in furtherance of the conspiracy." United States v. McGlory, 968 F.2d 309, 333 (3d Cir. 1992). The district court must find these requirements by a preponderance of the evidence. See Bourjaily, 483 U.S. at 175; McGlory, 968 F.2d at 333. The district court made no such finding here. It did not even address the issue, concluding, as a matter of law, that no conspiracy existed. Thus, the question whether there is sufficient evidence to permit such a finding is subject to plenary review. See McGlory 968 F.2d at 334.

As will be made clear in the discussion that follows, the record is replete with circumstantial evidence that Licciardello, Standard, and Arzee were members of a conspiracy to boycott Rossi and drive him out of business. See infra § II.B.2.a. As the record also shows, Licciardello's threat was made during the conspiracy and in furtherance of it. We conclude therefore that Rossi has satisfied the preponderance standard with respect to all four requirements.

Florence and Rossi Roofing -- that Standard and Arzee wanted to eliminate an uncooperative competitor who threatened to undercut their prices and destabilize the market. Rossi testified that sometime in 1986 or 1987, while he was still working for Standard (he was fired in September 1989), his boss at that time and chairman of Standard, Robert Higginson, directed him to attend a lunch with Al and Cary Roth of Arzee. According to Rossi, Robert Higginson told him that this lunch had been set up so that the two competitors could "cooperate" and share price information. **[**52]** Robert Higginson also told Rossi that Standard's other competitors had pricing agreements and that they were the only ones who were not participating. At the lunch, Al Roth proposed to Rossi a price-fixing scheme whereby Arzee and Standard would fix prices and divide up their large customers and jobs. Al Roth further explained to Rossi that he had maintained a similar arrangement with Allied concerning Certainteed products. Rossi rejected Al Roth's overtures, and Standard and Arzee did not, at that time, enter into an agreement to set prices.

The second Standard-Arzee meeting at which prices were discussed took place over the telephone in February of 1990. It involved a conversation between Licciardello, the manager at that time of Standard's Cedar Knolls branch, and Cary Roth, the manager of one of Arzee's local branches, regarding the price of GAF vinyl siding. Patrick Mulcahy, a former employee of Standard who overheard the conversation, recalled that Licciardello said to Cary Roth: "We really got to run this like a business and we all have to make a profit here. And we've got to keep certain price levels in order to do this." [12] This statement is remarkably similar to other **[**53]** statements that we have found probative of an agreement between competitors. See, e.g., *Petruzzi's, 998 F.2d at 1236* ("Why don't you put your prices in line and make money on what you have?").

Neither of these discussions took place during the period of the alleged conspiracy to boycott and exclude Rossi from the market; one took place before, and one after. Yet we reject Standard's and Arzee's contention that they are irrelevant to our decision. The two pieces of evidence, especially taken together, **[**54]** are probative of Standard's and Arzee's motive. Evidence that Standard's and Arzee's principals had actively considered fixing prices and allocating customers in 1986-87, and again in 1990, is sufficient to permit the inference that Standard and Arzee may have had a long-standing intent to stabilize prices in the roofing distribution business in northern New Jersey. See *Big Apple BMW, 974 F.2d at 1360-61* (reviewing evidence outside of the statute of limitations and thus not part **[*470]** of the alleged conspiracy which nevertheless "demonstrated a pattern of conduct"); see also *Andresen v. Maryland, 427 U.S. 463, 483-84, 49 L. Ed. 2d 627, 96 S. Ct. 2737 (1976)* (proof of similar acts is admissible to show intent or the absence of mistake); *Keyes v. School District No. 1, 413 U.S. 189, 207-08, 37 L. Ed. 2d 548, 93 S. Ct. 2686 (1973)* (citing the well-settled evidentiary principle that " ***HN8***[] 'the prior doing of other similar acts, whether clearly a part of a scheme or not, is useful as reducing the possibility that the act in question was done with innocent intent.' ") (quoting 2 J. Wigmore, Evidence 200 (3d ed. 1940)). Because Rossi **[**55]** was known to the defendants as a price-cutter and potent competitor who had refused to collude on prices in the past, this circumstantial evidence tends to link Standard's and Arzee's motives with their other actions in support of the boycott, which are detailed below.

The record is also replete with examples of high pressure recruitment, monitoring, and enforcement tactics undertaken by Standard and Arzee in furtherance of their efforts to prevent Rossi from purchasing roofing materials, particularly GAF product. There is evidence that Standard and Arzee put pressure on virtually everyone, including manufacturers, distributors, and even Rossi's prospective business partner, Droesch, to convince them not to do business with Rossi. In December 1988, for example, Al Roth called Droesch, who had agreed to establish Rossi Florence and go into business with Rossi, and told him that he was not happy about Rossi competing against Arzee and that if Droesch proceeded with his plans to establish Rossi Florence with Rossi, Roth would open up an Arzee location on Long Island near Droesch's Florence business which was located there. Also in late 1988 and early 1989, representatives of several **[**56]** manufacturers told Rossi that they were being pressured not to deal with him or sell to Rossi Florence. Specifically, Rossi testified that representatives from Gold Bond, Wood Fiber, Bird Corporation, Homosote, Hi-Finn, Genstar, Vipco, and Hastings Aluminum, told him that they had been threatened

[12] Standard and Arzee both raise questions about whether this conversation actually took place. In addition to denying it, they point out that Mulcahy did not hear the voice of the person on the phone, and only heard Licciardello talking to someone named "Cary." Mulcahy assumed the person on the other end of the line was Cary Roth. As this is before us on a motion for summary judgment, we conclude that, in a light most favorable to Rossi, a jury could infer that "Cary" was Cary Roth of Arzee.

by representatives of Standard. Similarly, representatives of Nailite and Certainteed claimed that they had been threatened by Arzee. [13]

There was evidence that after Rossi incorporated Rossi Roofing in early 1989, Standard's and Arzee's pressure on manufacturers and distributors continued. Joe Mullenhour of Bird Corporation told Rossi that Licciardello of Standard had threatened to drop Bird's vinyl siding if Bird Corporation sold to Rossi Roofing. **[**57]** Bill Higginson of Standard also spoke to Raymond Six of Gold Bond and told him that he was "disappointed" that Gold Bond had agreed to sell to Rossi Roofing. Six cut off the conversation because he was concerned by the antitrust implications of Bill Higginson's overtures. More specifically, Six told Higginson that he would not let the conversation go further because:

> Gold Bond had been in an anti-trust suit back in the 70's on gypsum. Every Gold Bond manager - well, I'll say every Gold Bond employee had been schooled, I'll say, from 1975 on, anyway, on what Robinson-Patman is, what Sherman anti-trust was. So the conversation wasn't going to go any further than what my statement to him was.

When Rossi asked Jim Hines of Hi-Finn to supply Rossi Roofing with the "Atlas" insulation line, he arranged for Rossi to buy the product indirectly through a middleman at a higher price. When Hines later visited Standard on a sales call, Licciardello told him, "You know why I can't do business with you." Hines replied that "if it has anything to do with the truck of Atlas insulation that Joe Rossi has in stock, that was purchased through another distributor, not directly through Atlas. **[**58]** " Licciardello referred Hines to Bob Schaab, Standard's Controller, who told Hines to "do what you want to." Based upon his experience with Schaab and his dealings with Standard, Hines testified that he concluded that conversation with "the feeling that his implication may have been that, if I sold to Joe [Rossi], he definitely **[*471]** wouldn't buy from me." Finally, Hines testified that his business with Standard fell off right around the time that Rossi purchased the Atlas insulation from the middleman recommended by Hines. On this evidence, a fact finder could reasonably draw the inference that Licciardello had threatened Hines to ensure Hi-Finn's cooperation in the boycott of Rossi, and that, when Hines rebuffed him, Standard punished Hines and Atlas by cutting off future purchases.

Similarly, Rick Fiore, an employee of roofing manufacturer Certainteed, told Rossi that Cary Roth of Arzee had pressured him and threatened to sue Certainteed if it sold to Rossi Roofing. Robert Qualik of Nailite informed Rossi that Arzee had told Nailite not to sell to Rossi Roofing and that "[Arzee] had blocked [Rossi Roofing] from getting product on a particular job right around the corner **[**59]** from us." Also, Karl Loser of Wood Fiber told Rossi that he was receiving a lot of pressure from Standard not to sell Structodek FS, a Wood Fiber product, to Rossi Roofing.

In an effort to circumvent these supply problems arising from his efforts to buy directly from manufacturers, Rossi attempted to purchase product through other distributors, even though this would cost more. For example, Rossi was able to convince Passaic Metals, a roofing and siding distributor in northern New Jersey, to sell him some GAF product. In response, Bill Higginson of Standard called his competitor, Frank Gurtman, the president of Passaic Metals, and threatened to open a branch near Passaic Metals and take away all of his customers if Gurtman continued to sell to Rossi.

There is also evidence that Standard and Arzee went to great lengths to monitor Rossi Roofing. The record indicates that Licciardello ordered Keith Cogley and Jorge Esteves to report to him the comings and goings of all roofing materials at Rossi Roofing. All three closely watched Rossi's premises on a daily basis to determine what kinds of products Rossi was able to purchase and from where they might be coming. Cary Roth and Ed Jacobitz **[**60]** of Arzee also frequently monitored Rossi Roofing by sitting in their cars in a cul-de-sac adjacent to Rossi's premises.

In addition, there is evidence that Standard even reported back to GAF when its employees saw GAF product on Rossi's premises to assist GAF in enforcing the boycott. Former GAF district manager Licciardello, then working for

---

[13] While offered in hearsay form, we will consider these statements because they are capable of being admissible at trial, see *Petruzzi's, 998 F.2d at 1234 n.9* (citations omitted), for Rossi has simply to produce the declarants to give the testimony. Id.

Standard, admitted that after seeing GAF product on Rossi's premises, he called Bob Gessner of GAF to confirm that GAF was still not selling to Rossi. On another occasion, when a load of GAF was sitting out in front of Rossi Roofing, Gessner said to Licciardello, "I thought we weren't selling him," to which Licciardello responded "we're not."

When Standard's Cogley saw a load of GAF product at Rossi Roofing, Licciardello called GAF to find out how Rossi had procured the product. Someone at GAF told Licciardello that the load was not for Rossi Roofing, but that it was being transported on a Jentar truck, and was simply stopping overnight at 8 East Frederick Place, where both Jentar Trucking and Rossi Roofing had offices. Later, after Licciardello learned that Rossi Roofing had purchased GAF product from Servistar through his Far Hills account, **[**61]** see infra § II.B.2.c, Licciardello told Standard employee Esteves that " 'That's the last time we're going to be seeing any GAF across the street.' They got the -- they were getting the loads through [Far Hills], which is [Servistar]. That's how Joe Rossi was getting GAF and he's [Licciardello's] going to put an end to that. 'Never going to see another GAF load across the street.' "

While this monitoring and reporting activity would not in isolation be probative of a conspiracy, in the context of the pressure and enforcement tactics described above, the direct evidence that Standard and Arzee had talked about and agreed to boycott Rossi Florence and Rossi Roofing, and the circumstantial evidence of motive, certain inferences can be drawn from this evidence. To enforce a boycott, Standard and Arzee would need to monitor carefully the supplies Rossi was able to procure, communicate to cooperating manufacturers any evidence that Rossi had been able to circumvent the boycott, and bring pressure on any non-cooperating manufacturers **[*472]** or distributors that refused to participate in the conspiracy. Here, Rossi has adduced evidence of exclusive monitoring by both Standard **[**62]** and Arzee, and evidence that Licciardello could "put an end" to Rossi receiving GAF product. Viewed in conjunction with the evidence that Standard and Arzee pressured many manufacturers and distributors, this monitoring and reporting activity also supports an inference that Rossi's two primary competitors were jointly attempting to establish a market-wide boycott of Rossi Roofing.

We emphasize that we would not consider the evidence that Standard and Arzee aggressively monitored Rossi Roofing (and even reported the substance of those observations to GAF), without more, sufficient to satisfy Rossi's burden in opposing summary judgment. However, in conjunction with all of the other pieces of circumstantial evidence Rossi has adduced, we believe that this monitoring and reporting activity represents an important thread to be considered in the complicated tapestry of conspiracy that Rossi weaves.

Looking at all of the evidence Rossi has assembled against Standard and Arzee, we conclude that he has satisfied his burden in opposing summary judgment on the concerted action prong. First, Rossi has developed direct evidence that Standard and Arzee had, both before and after Rossi Roofing **[**63]** existed, attempted to conspire to fix prices, allocate customers, and otherwise stabilize the roofing and siding distribution market in northern New Jersey. He has also shown that both defendants knew him to be a price-cutting competitor who had frustrated their unlawful purposes by refusing to cooperate with them. These two facts provide strong evidence of the defendants' motive to conspire against Rossi. Desiring to raise prices above their competitive levels in a highly competitive market, an inference is supported that Standard and Arzee were concerned that they could not succeed without Rossi's cooperation, and that they therefore decided to prevent him from competing against them.

Next, Rossi points us to direct evidence of the boycott, namely Licciardello's threat on behalf of Standard and Arzee to cut off his supplies and put him out of business. Finally, Rossi has developed considerable evidence of Standard's and Arzee's elaborate efforts to enforce the boycott. Rossi has produced testimony that many manufacturers and distributors were pressured and/or threatened not to do business with Rossi Florence and Rossi Roofing. He has also adduced testimony that Standard and Arzee **[**64]** had an elaborate monitoring system in place, one which even included reporting back to GAF to help enforce the boycott.

To be sure, this evidence is far from conclusive. It could be found at trial that Standard, Arzee, and GAF were all acting independently of one another in parallel efforts to do Rossi in. However, given the comprehensive nature of the evidence covering all elements of the group boycott Rossi alleges, we must reverse the district court's order granting summary judgment in favor of Standard, Arzee, Robert Higginson, William Higginson, the Roths, and Licciardello.

b. GAF

We also believe that Rossi has adduced sufficient evidence that GAF acted in concert with Standard and Arzee to survive its motion for summary judgment and will reverse the district court with respect to GAF as well.

(1) Matsushita Implausibility

GAF's first defense, like Standard's and Arzee's, is that the conspiracy alleged by Rossi is implausible under Matsushita. Because Licciardello's statement that Standard and Arzee intended to establish a boycott of Rossi Roofing is insufficient by itself to hold in GAF, and we can find no (other) direct evidence of GAF 's participation in **[**65]** the alleged conspiracy in the record, we must analyze, under the Matsushita standard, the plausibility of the conspiracy that Rossi alleges. See supra § II.B.2.a. In contrast with that case, we find that the theory Rossi advances with respect to GAF 's motivations and participation in the conspiracy is not economically implausible.

[*473] First, Rossi's claim does not, as defendants allege, require the cooperation of dozens of distributors and manufacturers (each selling different quantities of comparable competing products) in the northern New Jersey marketplace to succeed (i.e. for distributors Standard, Arzee, and Allied to be able to charge supra-competitive prices). Rather, it is primarily focused on the actions of three distributors, Standard, Arzee, and Allied, and one manufacturer, GAF. Despite the fact that this case arises against the backdrop of the highly competitive, price-sensitive roofing and siding industry in northern New Jersey in 1989 and 1990, Rossi advances a plausible theory of how these defendants could have unlawfully conspired to fix prices and therefore why they would want to boycott Rossi. Moreover, even if Standard and Arzee were not conspiring **[**66]** to keep prices artificially inflated by pocketing the secret rebates that their competitors were not receiving, both still had a plausible motive to keep Rossi, an avowed and experienced price-cutter and acknowledged potent competitor with a reputation among their customers for excellent service, from opening up a competing distributorship next door.

In order to comprehend the plausibility of the conspiracy Rossi alleges, it is necessary to understand GAF's position in the market and the importance of GAF product. In 1990, GAF was indisputably one of the largest and most important manufacturers of roofing supplies in the northern New Jersey market, with an estimated 38% share of the entire residential roofing shingle market in New Jersey and an estimated 71% share of the residential roofing laminate shingle market in New Jersey. GAF not only supplied a large percentage of the overall market, but it also was Standard's single largest supplier during the time that Rossi was a manager there. As such, Rossi was extremely familiar with GAF, and a large percentage of his customers, many of whom followed him from Standard to Rossi Roofing, had a strong preference for GAF product. Indeed, **[**67]** there is substantial testimony in the record from many sources supporting Rossi's contention that GAF product was critical to both Rossi Florence's and Rossi Roofing's success in the market.

For example, Sean Coffey, one of the five largest residential roofers in northern New Jersey, testified that he used GAF product in 1989 and 1990 almost exclusively and would not buy from any roofing distributor that did not have access to it. Similarly, Francis Doherty, proprietor of another large roofing business in northern New Jersey, testified that "99 percent" of his strip shingle purchases had been GAF product. John Feher, another roofer who attempted to purchase GAF product from Rossi Roofing, testified that GAF was very popular with everyone, including contractors and homeowners, because "it's easy to get and guarantees [sic] and everything is good on it." Thomas Harnett, an executive at Bird Corporation, testified that GAF "dominated all levels of roofing in New Jersey," and that it was a "highly desirable product."

Likewise, Albert Logan, a former Celotex employee, stated that GAF had "dominated the market for years," representing at least fifty percent of every distributor's inventory. **[**68]** John Mulcahy, a former Standard employee, also testified that GAF was "dominant and had . . . [its] products so well-established in the area." Because of this, Mulcahy stated that any distributor denied access to GAF product would have difficulty competing in the residential shingle market. Id. When asked to describe the magnitude of the adverse impact of trying to compete without GAF product, Mulcahy stated, "It would be like a beer distributor not having Budweiser."

Finally, another former employee at Standard, Michael Hydro, testified that GAF comprised eighty percent of his sales while he worked there and at least five of Standard's customers purchased exclusively GAF product. He also explained that in 1989 and 1990, a large number of townhouse projects were already "spec'd" with GAF product, which made it impossible for the roofers to switch product lines mid-stream. Thus, anyone who could not supply GAF product was effectively barred from bidding for these jobs. On the basis of all of this evidence, we believe that Rossi has demonstrated that a genuine issue of material fact exists as to **[*474]** whether GAF product was special, and necessary for a distributor like **[**69]** Rossi to successfully compete in northern New Jersey.

Against this background on the roofing market in general and GAF 's place in the market in particular, we move to the evidence Rossi adduced that GAF used secret rebates with several of its biggest distributors in northern New Jersey, including Standard, Arzee, and Allied, for that is critical to understanding the motivations of Rossi's horizontal competitors. Pursuant to this scheme, GAF provided these distributors off-invoice, non-volume discounts on their purchases. These "rebates," assuming they were only offered to a few favored distributors as Rossi contends, allowed those distributors to sell GAF product at or below the prevailing market price (as set by the distributors who did not receive the discounts) while secretly conspiring to pocket the difference. In GAF district sales manager Bud Krusa's words, "the less [sic] people [who] knew about it [the discounts], the less chance you [the smaller distributors] have of getting it and dropping the entire market price." The most favorable inference we can draw for Rossi from Krusa's statement is that if these highly secret rebates became widely known, the smaller distributors **[**70]** who were not receiving rebates would have put pressure on GAF to receive equal treatment, and that this shake up of the market could ultimately destabilize prices, lead to a price war, and "drop[] the entire market price" for GAF product.

By adducing evidence of the GAF rebate scheme and the importance of GAF and GAF product, Rossi transforms what might otherwise have been a very difficult (and implausible) conspiracy into a realistic opportunity for a few cooperating competitors to fix prices and earn substantial profits while still operating within what appears to be a competitive marketplace. Cf. *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 239, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (holding that a conspiracy to fix supra-competitive prices in a market with many variables was implausible because of the complexity required to monitor and enforce it) (citations omitted).

We find this case, as it relates to GAF, Standard, and Arzee, fundamentally unlike Matsushita. There, the critical problem with the conspiracy as alleged was that the conspirators had been losing large sums of money over a period of twenty plus years by undercutting **[**71]** the market in the hope of building market share and eventually establishing a monopoly. Not only did the Court find it difficult to distinguish the allegedly predatory pricing strategy from actual price competition, but given the extremely low chance that the scheme would succeed, the Court concluded that the defendants, if they operated in a rational manner, had no motive to engage in the conduct with which they were charged. In contrast, it is not difficult to divine the likely motive of the three distributors, Standard, Arzee, and Allied, in boycotting Rossi. As Rossi's horizontal competitors, they wanted to rid the market of a price-cutting competitor with a reputation for excellent service and reliability who had refused to cooperate in their price-fixing schemes in the past. Moreover, Rossi is aided in asking us to permit the fact finder to draw this inference by the strong likelihood that the boycott would actually succeed (as evidenced by the results).

Even if all of this is true, submits GAF, it still does not explain why it would make sense for GAF to join the conspiracy. We agree that GAF 's motive, as the manufacturer-supplier, is less obvious than Standard's or Arzee's, **[**72]** but ultimately we find it no less compelling. This is because Rossi has adduced evidence that Standard, Arzee, and Allied possessed substantial economic leverage over GAF. Together, they purchased $ 10.7 million of the $ 24.1 million of GAF product sold in New Jersey in 1989, or 44.5% of GAF 's total northern New Jersey sales. These distributors were not happy about the prospects of Rossi entering the market and competing with them, and they made their views known to GAF. Complaints and threats from three of GAF's largest customers in New Jersey are sufficient to establish a rational motive for GAF to engage in the concerted conduct that Rossi alleges. For these reasons, we do not accept GAF's submission that Rossi's conspiracy theory, and the economic **[*475]** motivations behind it, are inherently implausible.

(2) Circumstantial Evidence Against GAF

We turn next to the circumstantial evidence that supports Rossi's allegations that GAF joined with Standard and Arzee (and potentially others) to enforce a market-wide boycott of first Rossi Florence and later Rossi Roofing, The evidence comes in several forms. First, as we will detail, Rossi has adduced evidence that GAF received **[**73]** numerous complaints about Rossi's pricing practices while he was at Standard and responded to them by asking Rossi to raise his resale prices on GAF product. While these complaints antedate Rossi entering the marketplace, they are useful background information to establish motive and practice. See *Big Apple BMW, 974 F.2d at 1360-61*.

Second, GAF participated in the group boycott against Rossi through monitoring and enforcement activities and the implementation of an unprecedented anti-trans-shipment policy. Third, there is evidence that GAF singled out Rossi and acted contrary to its own corporate policy in refusing to deal with him (an important factor under Monsanto and Matsushita), in that GAF employees testified that the company had an "open distribution" policy under which they sold to all comers, yet GAF refused to sell to Rossi and went to considerable lengths to see that he was not able to secure GAF product from other sources. Finally, Rossi has also adduced evidence that two of GAF 's explanations why it refused to deal with him -- that it had adequate distribution in New Jersey and product shortage -- were pretextual.

(a) Distributors' Complaints **[**74]** and GAF's Response

While Rossi worked at Standard, the company received, as did Arzee and Allied, the off-invoice, non-volume rebates discussed supra. Rossi used these rebates to reduce the prices he charged to his customers in an effort to increase sales volume; he did not, as his competitors did, retain the rebates to increase gross profits. This aggressive price-cutting strategy understandably angered Standard's competitors, and several of them complained to GAF about Rossi's behavior. Krusa and Licciardello, both then working as GAF district sales managers in the New Jersey region, frequently called Rossi at Standard and passed along the complaints of Arzee, Allied, Passaic Metals and others about Rossi's pricing. Krusa and Licciardello also called Bob Schaab, the Controller of Standard, to complain that Rossi was passing on the discounts given by GAF to Standard to his customers.

Although GAF did not have suggested resale prices, Krusa and Licciardello told Rossi to raise his resale prices for GAF product. Schaab, relaying GAF's messages, also asked Rossi to refrain from passing the GAF rebates to Standard's customers. Rossi refused, and vowed to price as he saw fit. **[**75]** This evidence suggests several things. First, it reaffirms the motives of Rossi's horizontal competitors, Arzee and to a lesser extent Standard. Second, it shows that a group of distributors (even a group that did not include Standard) could wield economic leverage over GAF and influence its interactions with recalcitrant distributors. Third, it suggests that GAF's course of conduct was to curry favor with its larger distributors by doing what it could to assist them in stabilizing the market and keeping price levels up.

We agree with GAF that evidence that it succumbed to pressure from distributors is not sufficient, by itself, to survive summary judgment, since the evidence of complaints and threats GAF received from Standard and Arzee is not enough in isolation to prove concerted action. See *Monsanto, 465 U.S. at 763-64* ("permitting an agreement to be inferred merely from the existence of complaints, or even from the fact that termination came about 'in response to' complaints, could deter or penalize perfectly legitimate conduct."); *Sweeney, 637 F.2d at 111*. However, we do not rely solely on these complaints. Rather, there is a substantial **[**76]** amount of additional evidence to support a finding of an unlawful conspiracy. In this circumstance, we are permitted to consider the evidence of distributor complaints. See *Monsanto, 465 U.S. at 764 n.8* ("We do not suggest that evidence of complaints has no probative value at all, but **[*476]** only that the burden remains on the antitrust plaintiff to introduce additional evidence sufficient to support a finding of an unlawful contract, combination, or conspiracy.").

(b) Actions in Contravention of GAF Corporate Policy

GAF's boycott against Rossi appears to be contrary to its own corporate policy, particularly in light of the evidence adduced of GAF's draconian enforcement and anti-trans-shipment activities. There is testimony in the record that GAF had an open distribution system. Peter Bacchione, GAF 's director of marketing and sales and Krusa's superior in 1989, testified that GAF never had a closed distribution network and never rejected a potential distributor because the local market was saturated. Bacchione testified:

Q: Do you recall in 1989 whether GAF, with respect to the roofing products that you had responsibility for, had any **[**77]** particular objectives with respect to increasing, decreasing, or otherwise, its distribution channel.
A: . . . We always looked to increase our share of business with any distributor.
Q: Did GAF have any exclusive distributors for roofing products while you were national sales director?
A: No.
* * *
Q: Wasn't GAF's philosophy to have an open distribution network?
* * *
A: Maybe it was -- maybe it was a philosophy. A practice. Whether it was a philosophy that was up on a wall some place, I don't recall that.
Q: Was it the practice?
A: Generally, we sold on an open basis. There were no exclusivities. [14]

[78]** This testimony directly contradicts GAF's litigation position as stated by Krusa, who has maintained since 1989 that GAF refused to supply Rossi because it had "adequate distribution." [15] Krusa is also contradicted by Lorraine Campbell, Ruth Rogers, Mary Lou Sperr and Bob Tafaro, all of whom worked for Krusa, and all of whom testified that Krusa never told them that GAF had adequate distribution in New Jersey. Finally, Rossi submits that Krusa is contradicted by the fact that GAF supplied 34 out of the 39 distributors in northern New Jersey, and only refused to sell to three distributors including Rossi Roofing. On summary judgment, of course, we need not resolve this dispute, but rather grant Rossi all favorable inferences.

[79]** (c) Monitoring and Enforcement Activities

GAF, through Krusa and Licciardello, took still more steps to ensure that Rossi did not get any GAF product. In January 1989, when Droesch told Krusa that he planned to buy GAF product through his Florence Corporation in Long Island and resell it to Rossi Florence, Krusa told Droesch that "he would not allow that and he would not sell me [sic] in Long Island if I did that." GAF also warned other distributors not to resell its products to Rossi, and there is evidence that, on at least one occasion, GAF took steps to enforce its boycott. GAF salesmen Sal Granfort and Doug Collins warned DiNaso & Sons, a roofing and siding distributor located in Staten Island, New York, not to resell its product to Rossi. After DiNaso & Sons ignored their warnings, GAF raised DiNaso's prices by $ 1.00/unit, arguably in retaliation. **[*477]** Similarly, when Rossi contacted Stroeber Supply, another northern New Jersey distributor, to see if it would sell GAF product to him, Larry Hammershock of Stroeber told a Rossi Roofing employee that Stroeber had already been told by GAF not to sell GAF product to Rossi Roofing. Hammershock defied GAF and sold to **[**80]** Rossi Roofing anyway, but at a higher price.

There is also evidence that GAF extended the boycott to buying groups like HWI and Servistar which Rossi began to use, in addition to distributors like Stroeber and DiNaso, to try to circumvent the GAF boycott. [16] To this end,

---

[14] Bacchione appears to contradict himself during his deposition. For example, in reference to the decision whether to open up ABC as a distributor after Rossi Roofing had gone out of business, Bacchione also said: "The concern was not whether or not to open up another distributor. The concern was whether or not we had adequate distribution, I think was the subject at hand. I think we felt there was adequate distribution. . . . There was not a valid reason to open up another distributor [next door to Standard]." This contradictory testimony leads to two possible conclusions, and on summary judgment, we must accept the one most favorable to Rossi.

[15] For example, Krusa allegedly told Droesch in January 1989 that GAF would not sell to Rossi Florence in New Jersey because it had adequate distribution. In July 1989, when Krusa prevented Rossi from picking up an order of GAF product from HWI, Rossi spoke with Krusa who told him, "The distribution is filled. GAF requires no other distributors."

[16] Rossi contests the district court's affirmance of an order by the magistrate judge, denying his motion to compel GAF to disclose the names of the entity or entities that were the subject matter of certain conversations between GAF 's in-house counsel Robert Poyourow and Krusa on July 27, 1989, August 10, 1989, and January 6, 1990. Rossi hypothesizes that several of these discussions centered around HWI and Servistar, and he submits that the district court abused its discretion when it accepted GAF's description of the "subject matter" of these conversations on its privilege log as "absence of a legal obligation to sell product." We conclude, however, that the district court did not abuse its discretion by denying Rossi's motion to compel the

Rossi joined HWI in July 1989 and placed an order for GAF product. Membership in HWI ordinarily should have allowed Rossi to purchase products from all of HWI's suppliers, including GAF. Likewise, GAF normally supplied its products to all HWI members, regardless of whether they appeared on GAF's own customer list. Notwithstanding this, when a Rossi Roofing driver went to GAF's facility on July 27, 1989, to pick up the GAF product ordered through HWI, GAF would not release it. After several hours of wrangling over the order, Rossi eventually spoke with Krusa, who had given the order not to release the GAF product. Krusa told Rossi "I am not selling to you. The distribution is filled. GAF requires no other distributors." Rossi replied that GAF was not really selling to Rossi Roofing, but rather to HWI, to which Krusa responded, "We are not selling to you." After this dramatic exchange, Dave Heine of HWI remarked that **[**81]** he had never seen anything like this in his ten years working at the buying group. App. at 2596, 3513.

[82]** In yet another effort to obtain GAF product and circumvent the boycott, Rossi used Far Hills Lumber and Hardware ("Far Hills"), a start-up hardware store of which he was a principal, to place orders through the buying group Servistar. See supra § II.B.2.a and infra § II.B.2.c. Rossi was able to purchase one order of $ 30,000 worth of GAF product on August 2 and 3, 1989. However, after GAF and Standard found out that Rossi had used Far Hills and Servistar to get GAF product, see infra § II.B.2.c, GAF refused to fill Far Hills' second order for $ 456 of GAF product.

Rossi has also adduced evidence that GAF and Standard coordinated to ensure that Rossi was not getting any GAF product. See supra § II.B.2.a. Rossi developed evidence that Licciardello of Standard confirmed with Gessner of GAF that GAF was not selling to Rossi, and there is evidence that, after seeing GAF product in front of Rossi Roofing, Licciardello called and was reassured by GAF that the load was not for Rossi but bound for Walmart on a Jentar truck. See id. In addition, there is the statement made by Licciardello after he learned that Rossi Roofing had been getting GAF product through Far **[**83]** Hills and Servistar that" 'that's the last time we're going to be seeing any GAF across the street.' They got the -- they were getting the loads through [Far Hills], which is [Servistar]. That's how Joe Rossi was getting GAF and he's [Licciardello] going to put an end to that. 'Never going to see another GAF load across the street.' " See supra § II.B.2.a.

[*478] (d) Pretextual Excuses

Finally, Rossi argues that GAF used pretextual excuses to explain why it refused to supply Rossi, and that this use of pretext is further circumstantial evidence of the conspiracy he alleges. See *Fragale, 760 F.2d at 474* (pretextual excuses are circumstantial evidence that can disprove the likelihood of independent action). The first excuse is that Rossi was not needed because GAF had adequate distribution. Rossi notes that, despite Krusa's contention that everyone in his office knew that he had "adequate distribution" in New Jersey, neither his boss, Peter Bacchione, nor his employees, Lorraine Campbell, Ruth Rogers, Mary Lou Sperr, and Bob Tafaro had ever heard of this policy. Even Krusa admits that GAF had never refused to fill an order through a buying group **[**84]** like Servistar because its distribution was allegedly full.

This "adequate distribution" excuse is just the "flip side" of Rossi's contention that GAF was acting in contravention of its open distribution policy, and for the same reasons that there is a genuine issue whether GAF 's policy was to supply all distributors who wished to purchase its products, there is also a genuine issue of material fact whether the "adequate distribution" justification Krusa gave to Rossi was legitimate or simply pretextual. We note again that GAF supplied its roofing product to at least 34 of the 39 distributors in the northern New Jersey marketplace, but not to Rossi.

---

name of the entity discussed or any other additional information concerning the "subject matter" of the conversation catalogued in GAF's privilege log. See *Rabushka v. United States, 122 F.3d 559, 565 (8th Cir. 1997)* (standard of review), cert. denied, ***Rabushka ex rel. United States v. Crane Co., 140 L. Ed. 2d 498, 118 S. Ct. 1336 (1998)***. ***Rule 26(b)(5)*** only requires that a party claiming a privilege "describe the nature of the documents, communications, or things not produced or disclosed in a manner that . . . will enable other parties to assess the applicability of the privilege or protection." ***Fed. R. Civ. Pro. 26(b)(5)***. These matters are generally best left to the district and magistrate courts' discretion. In the circumstances that exist here, we will not second guess the courts' conclusion that the description provided was adequate to support the privilege claim.

GAF's second excuse, which Rossi submits was also pretextual, was that GAF had a product shortage and therefore could not supply any new distributors. Rossi contends that there is a genuine issue of material fact as to the validity of this excuse because Bacchione, GAF's national sales manager, testified that he could recall no problems in filling customer orders for GAF product in 1989, despite the fact that this would have been a matter within his job responsibilities. In addition, Rossi argues that the only document GAF has been **[**85]** able to produce to corroborate Krusa's claim that GAF product was in short supply in 1988 and 1989 was a memorandum dated August 11, 1989. Rossi submits that this memorandum should not be considered conclusive for the purposes of summary judgment because it was written almost nine months after GAF had decided not to supply Rossi Florence. GAF counters that the memorandum refers to the product shortage as a "continuing" issue, and therefore that summary judgment is appropriate.

The critical language in the memorandum is:

> We continue to have an im-balance of inventory between Baltimore and So. Bound Brook. The lack of warehousing has been a very critical issue, causing the im-balance in inventory.
>
> We are receiving more calls, on a daily basis, from customers in the southern half of the district complaining of our lack of product and the congestion of trucks and also the length of time it takes to get loaded at the Baltimore Plant.

Our reading of the document is that it is ambiguous and therefore insufficient to command summary judgment. For example, it is unclear whether the memorandum refers to an overall GAF product shortage or just a warehousing "im-balance" **[**86]** that was temporarily interfering with delivery to the southern half of Krusa's territory. Also, while the memorandum refers to the problem as a "continuing" one, there is no indication what that means. On summary judgment, viewing the evidence in a light most favorable to Rossi, he has established a genuine issue of fact whether both the "adequate distribution" and the "product shortage" excuses were pretextual.

(e) <u>Conclusion</u>

To summarize, we find that Rossi has adduced competent evidence that GAF: (1) responded to distributor complaints in the past; (2) singled out Rossi as one of the few distributors out of a large number in northern New Jersey not to receive GAF product; (3) acted in contravention of its own established open distribution policy in dealing with Rossi; (4) threatened and punished distributors who resold to Rossi; (5) refused to supply Rossi through buying groups; (6) implemented an unprecedented policy prohibiting trans-shipment of GAF product to Rossi; (7) cooperated with Standard in monitoring and enforcing **[*479]** the boycott; and (8) offered pretextual excuses to explain its behavior. Examining the totality of this evidence, it is sufficient to support **[**87]** a reasonable inference that GAF was acting in concert with Standard and Arzee to boycott Rossi.

Particularly forceful is the evidence that GAF prohibited distributors from trans-shipping GAF product to Rossi and that GAF prevented Rossi from purchasing its products from buying groups. These actions simply do not make sense in light of GAF's asserted justifications for its behavior vis a vis Rossi. For example, if there were truly a product shortage in northern New Jersey, presumably GAF would then have cut off supply to all Servistar and HWI members who were not on GAF's approved customer list to ensure that its larger distributors like Standard and Arzee would not suffer from the short supply. Yet, GAF supplied Far Hills, also an entity that was not on GAF's customer list, until it discovered that Far Hills was under Rossi's control. Moreover, the product shortage excuse is not consistent with GAF's claim that it unilaterally implemented a policy precluding trans-shipment of product at the distributor level. Assuming that GAF product was scarce, GAF would understandably want to ensure that its favored distributors received it ahead of all others. However, once GAF decided how it **[**88]** would allocate among its approved distributors whatever amount of GAF product existed, it is difficult to conceive of a legitimate reason why GAF would care whether that distributor used the product or resold it to Rossi Roofing at a profit.

Additionally, the product shortage justification does not explain why GAF would sell Droesch as much GAF product as he wanted in Long Island but would not allow him to trans-ship that product to New Jersey. Similarly, it is hard to comprehend why GAF would continue to fill $ 30,000 orders, obviously commercial-sized purchases, to buying group members in northern New Jersey, if it was truly believed that it had adequate distribution in that market. One explanation of this behavior is that GAF was acting in concert with Standard, Arzee, and Allied to boycott Rossi and force him out of business.

For the reasons described above, Rossi has met his burden of adducing evidence that tends to exclude the possibility of independent action, and hence we will reverse the district court's order granting summary judgment in favor of GAF.

c. Servistar

In contrast to the defendants discussed above, we will affirm the district court's grant of summary **[**89]** judgment in favor of Servistar because Rossi has failed to introduce either direct or circumstantial evidence that tends to exclude the possibility that Servistar acted independently rather than joining the conspiracy against Rossi.

Servistar's involvement in this case stems from its refusal to honor Rossi's second purchase request for $ 456 of GAF product on August 11, 1989. Rossi had already obtained a little over $ 30,000 of GAF product on August 8 and 9, 1989, via his Far Hills account with Servistar, which was resold to Rossi Roofing. Two days later, when Rossi attempted to order a second batch, Servistar did not fill it, claiming that GAF had cut Far Hills off from obtaining GAF product. Rossi contends that after he received the first order of GAF product, Standard and Arzee discovered how he had circumvented the blockade, notified GAF, and that GAF then enlisted Servistar to join the group boycott and cut off this new avenue of supply. Rossi offers three pieces of evidence to support this allegation: (1) a discussion he had with Jim Cherbonneau of Servistar in which Cherbonneau told him that GAF did not want Servistar to ship its product to Rossi and that GAF would not supply **[**90]** Rossi through his Servistar account; [17] (2) Servistar's curious and sudden change of mind, selling Rossi $ 30,000 of GAF product one day and refusing a minuscule $ 456 order two days later; and (3) Servistar's use of the allegedly pretextual excuse that Far Hills had credit problems to justify its refusal to deal.

[*480] Rossi's only direct evidence, the phone conversation with Cherbonneau, is not evidence of Servistar's conspiratorial involvement. Cherbonneau said that "GAF would not sell product to Servistar to go to -- through [Far Hills] to me." Cherbonneau's statement, while not precluding concerted action, is evidence only of a unilateral decision by GAF to not supply Rossi through any means (or a multilateral conspiracy that did not include Servistar). Additionally, it is undisputed that Servistar could not force GAF to supply **[**91]** it or its members with GAF product. Unlike other products Servistar supplied, Servistar neither stored GAF product in its warehouses nor had the contractual right to compel GAF to supply the product. The Servistar-GAF purchasing agreement did not obligate GAF to accept all of Servistar's members' orders.

Because Servistar provided GAF product to its members on what is known in the industry as a "drop shipment" basis, it had no control over whether its suppliers would actually deliver their products to its members. The "drop shipment" relationship between Servistar and GAF meant that when a Servistar member placed an order with Servistar for GAF product, Servistar would forward that order to GAF. The member would then go to the GAF warehouse to pick up the GAF product directly from GAF, not Servistar. GAF then would invoice Servistar for the purchase, and Servistar would pay GAF. Subsequently, Servistar would collect the amount due from its member. Using this "drop shipment" purchasing method, Servistar assists its members by: (1) negotiating group discounts from manufacturers, and (2) acting as the guarantor of its members' credit to those manufacturers. Thus, Servistar's role did **[**92]** not include pre-purchasing and warehousing of GAF product, and it had virtually no say over which of its members GAF chose to supply.

Under these circumstances, Rossi's claim that "at the request of GAF, Servistar refused to fill Far Hills' next order for $ 450 because Far Hills had resold it to Rossi Roofing," is not supported by Rossi's own testimony. As described above, according to the undisputed evidence, GAF did not have to conspire with Servistar to boycott Rossi Roofing because GAF did not need Servistar's acquiescence to prohibit Far Hills or Rossi Roofing from buying its product through Servistar. Since there is no evidence that Servistar could overrule a unilateral GAF decision to refuse to

[17] Cherbonneau told Rossi, "GAF called, they knew where the product was going. They had filled their needs in that area, and [] they do not want us to ship to you."

supply a Servistar member, we cannot reasonably infer on the basis of such ambiguous evidence that Servistar and GAF agreed to refuse to sell to Far Hills. See *International Logistics Group Ltd. v. Chrysler Corp., 884 F.2d 904, 907 (6th Cir. 1989)* (no credible conspiracy is alleged where a manufacturer imposing distribution restraints does not need agreement or acquiescence from its distributors in formulating marketing conditions for its product); 6 Phillip E. Areeda, **[**93]** ***Antitrust Law*** P 1402b4 (1986) ("discussions, suggestions, recommendations, and the giving of information do not indicate any conspiracy where the actor imposing the alleged restraint does not wish or need the acquiescence of the other party or any quid pro quo from him").

Similarly, Rossi's allegation that Servistar made no effort to require GAF to fill the order of its member Far Hills does not support his theory of conspiracy. Without direct evidence (or other strong circumstantial evidence) of concerted action by Servistar and GAF, we cannot draw an inference of an unlawful conspiracy from the equivocal nature of Servistar's decision not to make what would most likely have been a futile effort to encourage GAF to sell to Rossi. Servistar's refusal to disrupt its relationship with GAF because GAF unilaterally (from Servistar's perspective) refused to deal with Rossi is clearly "as consistent with permissible competition as with illegal conspiracy," *Matsushita, 475 U.S. at 588* (citations omitted), and is not evidence of a "conscious commitment to a common scheme." *Monsanto, 465 U.S. at 764*. We note in this regard that there is no evidence **[**94]** that Servistar was on notice that GAF was part of a conspiracy to boycott Rossi Roofing. Thus, from Servistar's point of view, this was simply a unilateral refusal to deal. Indeed, even if Servistar did know that GAF was involved in an unlawful group boycott, its decision to continue **[*481]** relations with GAF would still not rise to the level of concerted action.

Without direct evidence with respect to Servistar, we must also consider whether Rossi's conspiracy theory is plausible, and whether inferring concerted action under these circumstances would have the effect of deterring significant procompetitive conduct. See *Petruzzi's, 998 F.2d at 1233*. Both of these considerations militate against inferring concerted action with respect to Servistar. Apart from the evidence discussed above that it would be unreasonable to infer that Servistar would conspire with GAF to do what GAF could do unilaterally (i.e. refuse to release GAF product to Rossi from GAF warehouses), it is similarly implausible that GAF, an extremely minor Servistar supplier, could "pressure" Servistar, a billion plus dollar buying cooperative, into joining the group boycott of Rossi Roofing, **[**95]** a small start-up roofing and siding distributor. Similarly, Rossi has adduced no evidence of a motive for Servistar to join the conspiracy. See *Matsushita, 475 U.S. at 596-97*. Nothing in the record indicates that Servistar had any reason to support a conspiracy to increase or stabilize wholesale roofing prices in New Jersey, and, to repeat, there is simply no evidence of GAF leverage over Servistar. [18]

Perhaps most importantly, inferring a conspiracy from the slim circumstantial evidence would have the effect of deterring Servistar's significant procompetitive conduct in this as well as many other markets. As a wholesale purchasing cooperative, Servistar bolsters competition and increases economic efficiency by aggregating small purchasers thereby **[**96]** permitting them "to achieve economies of scale in both the purchase and warehousing of wholesale supplies, and also ensuring ready access to a stock of goods that might otherwise be unavailable on short notice. The cost savings and order-filling guarantees enable smaller retailers to reduce prices and maintain their retail stock so as to compete more effectively with larger retailers." *Northwest Wholesale Stationers, 472 U.S. at 295*. If we were to permit an antitrust violation to be inferred under the facts of this case, it would significantly impact the ability of Servistar to continue its procompetitive actions in the market.

Because Servistar could not compel GAF to sell to Far Hills, Servistar's only option in response to GAF's decision not to supply Far Hills would have been to somehow bring pressure to bear on the roofing manufacturer. Such action would undoubtedly adversely affect all Servistar members nationwide who were receiving improved pricing for GAF product through Servistar, especially if it led to the restriction or cessation of Servistar's purchasing agreement with GAF. Indeed, inferring concerted action in these circumstances could encourage Servistar **[**97]** to terminate relationships with every supplier that refused to sell to a particular Servistar member. This would deter Servistar's procompetitive activities and deny Servistar's members the significant benefits of cooperative membership.

---

[18] Sales of GAF product through Servistar, estimated at about $ 2.5 million, comprised only 12 of Servistar's total roofing purchases on behalf of its members and an insignificant fraction of Servistar's one billion plus national purchases in 1989.

Finally, Rossi submits that Servistar offered a pretextual excuse to explain its decision not to supply Far Hills with GAF product. Pretextual excuses, as noted, can disprove the likelihood of independent action. See *Fragale, 760 F.2d at 474*. Rossi challenges Servistar's explanation that it refused to supply the second order of GAF product to Far Hills because of Far Hills' credit problems. Although it appears that there are genuine issues of fact concerning Far Hills' credit-worthiness and its impact on Servistar's decision to refuse Rossi's second order of GAF product, [19] considering **[*482]** Servistar's lack of motive to conspire, GAF's lack of any leverage over Servistar, and the fact that GAF did not need to enlist Servistar's help to boycott Rossi, this slim reed of pretext is simply not enough. In view of the procompetitive role Servistar plays in the market generally and concerned that we do not "chill the very conduct **[**98]** the antitrust laws are designed to protect," *Matsushita, 475 U.S. at 594*, we conclude that Rossi has not met his burden here in opposing summary judgment, and therefore we will affirm the district court's order granting summary judgment in favor of Servistar.

d. Wood Fiber

Like GAF, Wood Fiber manufactures roofing products, including Structodek FS, which is widely used in certain commercial roofing applications. Unlike GAF, however, **[**99]** Wood Fiber is only tangentially involved in the alleged conspiracy with its activity centering around a single incident in which Rossi was frustrated in his attempt to purchase approximately $ 5,000 worth of Structodek FS. We will affirm the district court's grant of summary judgment in favor of Wood Fiber because, as with Servistar, Rossi has failed to introduce evidence that tends to exclude the possibility that Wood Fiber acted independently rather than joining the conspiracy against Rossi.

On June 6, 1989, Rossi Roofing ordered Structodek FS from Wood Fiber for its customer, Star Roofing. Wood Fiber quoted a price and a shipping date of July 5th to Rossi Roofing. On June 27, 1989, Karl Loser, Wood Fiber's sales representative in New Jersey, called and told Rossi Roofing's Mike Issler that Wood Fiber would not fill the order. As a result, Rossi Roofing lost the order for Structodek FS from Star Roofing. Rossi claims that Loser told him that Wood Fiber was being pressured by Standard and Arzee not to sell to him and that there was a "problem" with his pricing. Loser also told Issler that Wood Fiber had previously sold product to a small distributor on Long Island and suffered when **[**100]** Allied canceled orders in retaliation. Loser testified that he wanted to supply Rossi Roofing, but that his concerns that Rossi Roofing's competitors would retaliate "influenced" his decision not to supply Rossi Roofing.

Based upon these facts, Rossi asks us to infer that Wood Fiber participated in a conspiracy to boycott Rossi Roofing because it gave in to pressure and fear of retaliation by several of its distributors. It is well established that this kind of evidence, by itself, is legally insufficient to prove a conspiracy. See *Monsanto, 465 U.S. at 763-64*; *Sweeney, 637 F.2d at 111*. In Sweeney, the plaintiffs contended that "the retailers' acts of complaining and [the defendant's] reaction to the complaints constituted concerted action in restraint of trade." *Sweeney, 637 F.2d at 110*. We rejected that argument and noted that "even if the appellants had demonstrated that [the defendant's] actions were in response to these complaints, such evidence alone would not show the necessary concerted action." Id. Similarly, in Monsanto, the Supreme Court opined that "permitting an agreement to be inferred merely from **[**101]** the existence of complaints, or even from the fact that termination came about 'in response to' complaints, could deter or penalize perfectly legitimate conduct." *465 U.S. at 763*. Thus, the Court held that " 'to permit the inference of concerted action on the basis of receiving complaints alone and thus to expose the defendant to treble damage liability would both inhibit management's exercise of independent business judgment and emasculate the terms of the statute.' " *Id. at 764* (quoting *Sweeney, 637 F.2d at 111 n.2*).

We have explained at length supra why the claims against Standard, Arzee, and GAF survive, notwithstanding these precedents. However, because Rossi has not adduced evidence of anything other than the fact that Wood

---

[19] On the one hand, the record indicates that Servistar refused Far Hills credit on August 15, 1989, even though Far Hills had only used $ 30,755 of its outstanding $ 75,000 credit limit and no payments were yet due. On the other hand, Servistar contends that it extended the $ 75,000 credit limit to Far Hills for the purpose of funding hardware purchases, not roofing supplies. According to Servistar's forceful rejoinder, the initial order of $ 30,755 was an error, and after it was discovered, Servistar unilaterally determined not to permit it to happen again.

Fiber may have responded to pressure and threats from Standard and Arzee, we cannot infer the existence of concerted action involving Wood Fiber. The evidence adduced against Wood Fiber stands in stark contrast to the evidence against GAF. For example, Rossi has not adduced any evidence that Wood Fiber offered pretextual excuses, or prohibited trans-shipment of its product, or **[*483]** engaged in monitoring **[**102]** and enforcement of the alleged boycott. Without some additional evidence, a fact finder may not infer that Wood Fiber entered into an agreement to boycott Rossi Florence or Rossi Roofing, and therefore we will affirm the district court's order granting summary judgment in favor of Wood Fiber.

III. PROXIMATE CAUSE AND ANTITRUST INJURY

Having determined that Rossi has adduced sufficient evidence of a conspiracy to satisfy the first prong of the prima facie case with respect to the Standard defendants, the Arzee defendants, and GAF, we now consider whether Rossi has adduced sufficient evidence to satisfy the fourth prong, "that the plaintiffs were injured as a proximate result of that conspiracy." *Tunis Bros., 763 F.2d at 1489*. [20]

The district court concluded that even if Rossi had established **[**103]** the existence of an agreement, his claim still would fail because he had not established that the business losses he suffered were in any way related to that conspiracy. See *Rossi v. Standard Roofing, Inc., 958 F. Supp. 976, 991 (D.N.J. 1997)*. The court determined that Rossi's allegations -- that the defendants prevented him from obtaining GAF and other roofing products he needed to compete and thereby stopped him from opening Rossi Florence and ultimately forced Rossi Roofing out of business -- are unsupported in the record. The district court also concluded that Rossi's damages expert, Regan R. Rockhill, CPA, based his report upon unfounded assumptions that would force a trier of fact to use "guesswork and speculation" in determining what, if any, injury Rossi suffered as a result of the defendants' actions. See id. The court criticized the Rockhill Report for being nothing more than an impermissible "but for" damage model that erroneously ignored several important factors, including failing: (1) to consider that Rossi had no experience running his own business; (2) to analyze specifically what products were needed to assure a successful distributorship; and **[**104]** (3) to engage in any analysis of what harm, if any, was caused by the alleged antitrust violations as opposed to other factors, such as Rossi's management style or general business conditions. See id.

The district court accordingly held that Rossi had not presented sufficient evidence of damages such that a reasonable inference could be made connecting the injury with the defendants' conduct. For the reasons we will explain, we disagree with the court's conclusion that Rossi has not identified a genuine issue of material fact with regard to the proximate cause and damages element of his prima facie case.

HN9[] To recover damages, an antitrust plaintiff must prove causation, described in our jurisprudence as "fact of damage or injury." See *Danny Kresky Enters. Corp. v. Magid, 716 F.2d 206, 209 (3d Cir. 1983)*. It is not necessary to show with total certainty the amount of damages sustained, just that the antitrust violation caused the antitrust injury suffered by the plaintiff. See *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483, 1493 (8th Cir. 1992)*; *Danny Kresky, 716 F.2d at 211* ("the standard of causation requires only that **[**105]** plaintiff prove that defendant's illegal conduct was a material cause of its injury"). As the Supreme Court explained in *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1968)* (citations omitted) (emphasis in original):

> [Plaintiff's] burden of proving the fact of damage under § 4 of the Clayton Act is satisfied by its proof of some damage flowing from the unlawful conspiracy; inquiry beyond this minimum point goes only to the amount and not the fact of damages. It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under § 4.

---

[20] As explained above, because Rossi's allegations qualify for per se treatment, the second and third prongs of the four-part antitrust prima facie case are conclusively presumed. See supra § II.A.

[*484] Once causation is established, the jury is permitted to calculate the actual damages suffered using a " 'reasonable estimate, as long as the jury verdict is not the product of speculation or guess work.' " *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1176 (3d Cir. 1993)* (citing *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1161 (7th Cir. 1983))* **[**106]** (other citations omitted). Thus, in antitrust cases, there are ultimately two related, but distinct, inquiries to establish antitrust injury. First, the plaintiff must prove the fact of antitrust injury, as part of his prima facie case; then, he must make a showing regarding the amount of damages, in order to justify an award by the trier of fact. Concerning the former, courts apply the ordinary standard of proof, but with respect to the latter, the standard is somewhat relaxed. See *In re Lower Lake Erie Iron Ore, 998 F.2d at 1176* ("the relaxed measure of proof is afforded to the amount, not the causation of loss -- the nexus between the defendant's illegal activity and the injuries suffered must be reasonably proven.") (citations omitted); see also *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264-65, 90 L. Ed. 652, 66 S. Ct. 574 (1946)* (holding that when the plaintiff cannot prove his damages by precise computation, the jury "may make a just and reasonable estimate of the damage based on relevant data, and render its verdict accordingly").

Under these standards, Rossi's antitrust claim does not suffer from the infirmities claimed by **[**107]** the district court. At the threshold, it is important to note that we need only concern ourselves with the first element of antitrust injury, causation. At this procedural juncture, reviewing the district court's grant of the defendants' motions for summary judgment, we are not, as we would be upon reviewing a jury verdict, determining whether a plaintiff has brought forth sufficient evidence to justify the actual damages awarded. Rather, here, all we are concerned with is whether Rossi has established that the defendants' "illegal conduct was a material cause of [his] injury." *Danny Kresky, 716 F.2d at 211*; see also *Zenith Radio, 395 U.S. at 114 n.9*.

We find two sources of evidence sufficient for Rossi to demonstrate fact of injury or causation: (1) evidence of specific lost transactions based upon Rossi's inability to purchase product; and (2) the Rockhill Damage Report. We discuss these in turn.

We have already explained that there is ample evidence in the record that Standard, Arzee, and GAF conspired to deny Rossi access to GAF product and prevent him from competing in the roofing and siding business in northern New Jersey. See supra **[**108]** § II.B.2.a & b. Also, there is evidence that, with a few exceptions, the defendants successfully prevented Rossi from obtaining GAF product. See id. Moreover, there is evidence that GAF product was highly desirable, if not critical, to Rossi's target customers. See supra § II.B.2.b(1). Finally, several of Rossi's former customers from his Standard days, including Sean Coffey, Francis Doherty, John Feher, Albert Logan, and Melvin Stanley, have testified that they would have done business with Rossi Roofing if he had had access to the necessary products, primarily GAF product.

This evidence is enough by itself to satisfy Rossi's burden on causation for the purposes of summary judgment. Rossi has put forth evidence that the defendants' alleged conspiracy unlawfully prevented him from obtaining GAF product, and that he lost multiple sales as a result. Thus, if Rossi can successfully prove the existence of the conspiracy, he will have proved fact of injury. The case before us is not analogous to *Van Dyk Research Corp. v. Xerox Corp., 478 F. Supp. 1268 (D.N.J. 1979)*, a case upon which the district court relied, where the plaintiff failed to prove fact **[**109]** of injury primarily because it could not show that it lost even a single contract based upon the alleged unlawful practices of the defendant. See *478 F. Supp. at 1327*.

In the same vein, Amerinet is not availing to the defendants either. In Amerinet, the Eighth Circuit concluded that the plaintiff had not shown antitrust injury or causation in large part because statements and assertions by its own damage expert "strongly suggested . . . that [plaintiff's] decline was caused at least partly by, if not substantially **[*485]** or mainly by, other factors than [defendant's] alleged antitrust violations." *Amerinet, 972 F.2d at 1495* (noting that the plaintiff's damage expert admitted that the plaintiff was in a period of decline prior to the defendant's alleged antitrust violations). In addition, the plaintiff in Amerinet was only able to show that, at most, the allegedly illegal activity was "one factor among many, and not a controlling or major factor" in specific potential clients' decisions not to purchase from the plaintiff. *Id. at 1497*. Therefore, the Eighth Circuit held that the plaintiff had not adduced sufficient **[**110]** evidence of element of causation to enable it to withstand summary judgment.

Here, Rossi's evidence is more substantial than in either Van Dyk Research or Amerinet. Rossi has proffered evidence from five specific customers that they would have purchased GAF product from Rossi if he had been able to sell it to them, and Rossi's inability to consummate those sales (leading to a loss of business and therefore injury) is a direct result of the alleged antitrust violation--the group boycott. In addition, Richard Droesch, Rossi's partner in the failed Rossi Florence venture, backed out of that venture at least in part based upon his understanding that the company would not be able to get the products it needed, particularly GAF product, to compete successfully in the market. For all these reasons, we believe that the record supports Rossi's allegations that he suffered antitrust injury, and that it was caused by the defendant's allegedly unlawful actions.

The district court also utterly rejected Rossi's damage expert, holding that his report was nothing more than a "but for" damage model that failed as a matter of law to support Rossi's damage allegations. We believe, however, **[**111]** that the Rockhill Report, when combined with the testimony concerning the five lost sales, is indicative of a larger pattern of loss and helps Rossi demonstrate causation. Thus, while the other damage evidence is enough alone to satisfy Rossi's summary judgment burden, for the guidance of the district court on remand, we nonetheless consider the Rockhill Report.

A typical "but for" damage model, like the one in *Southern Pacific Com. Co. v. American Tel. & Tel. Co., 556 F. Supp. 825 (D.D.C. 1983)*, aggregates the defendant's alleged violations and creates a hypothetical calculation projecting the plaintiff's profits and losses "but for" the defendant's antitrust violations. In Van Dyk Research, for example, this estimate was based upon an internal "task force" report created by the plaintiff projecting its own future performance. See *478 F. Supp. at 1327*. The plaintiff then compares this hypothetical figure with its actual performance to calculate its damages. Courts usually highlight two problems with models created using this methodology.

First, they do not attempt to measure the particularized effects of any specific alleged illegal practices, **[**112]** but rather rely on an aggregation of injury from all factors. See Southern Pacific, 556 F. Supp. at 1092. Second, their hypothetical "but for" calculations usually rely upon unrealistic ex ante assumptions about the business environment, such as assumptions of perfect knowledge of future demand, future prices, and future costs that tend to overstate the plaintiff's damage claim. See *id. at 1092-93* (pointing out many difficulties not caused by the defendants that negatively impacted plaintiff's profitability yet were not accounted for in the "but for" damage model). Thus, using a "but for" damage model arguably makes it impossible for the trier of fact to determine what, if any, injury derived from the defendant's antitrust violations as opposed to other factors, and courts sometimes reject such models as the basis of either causation or amount of injury. See Southern Pacific, 556 F. Supp. at 1090, 1098; *Van Dyk Research, 478 F. Supp. at 1327*.

The Rockhill Report is in many respects a "but for" damage model because it does not deal with the particularized effects of specific injuries, but rather aggregates **[**113]** all of Rossi's damages into one figure. Relying on Van Dyk Research and Southern Pacific, defendants argue that all "but for" models should be precluded as a matter of law from serving as a basis for antitrust causation and damage calculation. We do not agree with the defendants' reading of these cases (and, at all events, are not bound by them), which we conclude only stand for the proposition that some, not all, "but for" models are too speculative and must be precluded as a matter of law. The Rockhill Report, as we shall **[*486]** see, is much less speculative and does not suffer from many of the flaws in the damage models discussed in Van Dyk Research and Southern Pacific, and thus it is not comparable with them.

Rockhill made two major assumptions in calculating the damages Rossi suffered because of his inability to procure products. First, he estimated that Rossi Florence and/or Rossi Roofing would have achieved the same pattern of sales revenues (and revenue growth) beginning in 1989 and extending to 2008 that ABC's Morristown sales branch actually achieved from 1990-1993, operating out of the same location, with Rossi as branch manager. Rossi makes a strong **[**114]** argument that this estimate took into account the poor general business conditions that existed at the time, as well as any other extrinsic factors not related to the defendants' alleged boycott, because Rockhill based his estimate upon actual sales figures Rossi was able to achieve competing against the same firms, selling the same products at the same location to the same customers under the actual business conditions that existed at the time. [21] **[**115]** The second major assumption in the Rockhill Report is that Rossi would have been able to manage Rossi Florence and Rossi Roofing in the manner that he had run Standard's Morristown branch from 1974-1987. Rockhill used Standard's Morristown branch financial statements to develop 14-year averages for cost of sales, payroll expenses, equipment expenses, and administrative expenses (as a percentage of total sales) and applied them to the sales estimate. This kind of estimate, while perhaps not one upon which we would base our own personal investment decisions, nevertheless is sufficient to establish causation (especially when considered in conjunction with the five lost transactions). [22]

---

[21] Defendants also complain that it is inappropriate to use sales figures Rossi achieved working for ABC, a major national chain, to estimate the revenues that Rossi Florence or Rossi Roofing would have achieved without the boycott. This position has some force and is certainly an appropriate argument to advance before the trier of fact; however, it is not uncontroverted. There is ample evidence in the record that wholesale roofing and siding sales has a strong local accent, and that after price, service and reliability are the next most critical factors in customers' purchasing decisions. Rossi had a long track record in northern New Jersey, and several witnesses testified that they would patronize Rossi regardless of whom he worked for, as long as he carried the product they needed at a competitive price, because he provided the best service. Thus, it is not clearly evident that Rossi's sales figures with ABC (or Standard) would necessarily be higher than with Rossi Roofing.

[22] For the guidance of the district court on remand, we note that the Rockhill Report satisfies the relaxed Bigelow standard of proof for estimating the amount of damages under which:

> the jury [may] conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the plaintiffs. . . . [When] [] tortious acts . . . preclude[] ascertainment of the amount of damages more precisely, by comparison of profits, prices and values as affected by the conspiracy, with what they would have been in its absence under freely competitive conditions . . . we [have] held that the jury could return a verdict for the plaintiffs, even though damages could not be measured with the exactness which would otherwise have been possible.
>
> In such a case, even where the defendant by his own wrong has prevented a more precise computation, the jury may not render a verdict based on speculation or guesswork. But the jury may make a just and reasonable estimate of the damage based on relevant data, and render its verdict accordingly. In such circumstances 'juries are allowed to act on probable and inferential as well as [upon] direct and positive proof.' Any other rule would enable the wrongdoer to profit by his wrongdoing at the expense of his victim. It would be an inducement to make wrongdoing so effective and complete in every case as to preclude any recovery, by rendering the measure of damages uncertain.

Bigelow, 327 U.S. at 264 (internal citations omitted).

In Bigelow, the Supreme Court upheld a jury's damage award based upon a comparison of the plaintiff's actual profits with the contemporaneous profits of a competing theater with access to first-run films, which were illegally denied to plaintiff theater by a group of conspiring film distributors. See *J. Truett Payne Co., Inc. v. Chrysler Motors Corp., 451 U.S. 557, 566, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)* (explaining Bigelow). The Bigelow plaintiff had also adduced evidence comparing his actual profits during the conspiracy with his profits when he had been able to obtain first-run films. See id. This was enough to uphold the jury's verdict. Similarly, in Zenith Radio, the Supreme Court permitted the plaintiff, who had been the victim of an illegal campaign against importers attempting to bring new products into Canada, to estimate its damages by comparing its market share in the United States (where it competed freely) with its market share in Canada (where it was the target of unlawful distribution-disrupting tactics). See *395 U.S. at 116 n.11* & 124-25. Finally, we have held that "plaintiffs must be free to select their own damage theories as long as they are supported by a reasonable foundation." *Danny Kresky, 716 F.2d at 213* (upholding a market share damage calculation approach in which the plaintiff argued that had it not been for the defendants' antitrust violations, it would have been able to achieve a percentage of the excluded market segment equal to the percentage of the market it enjoyed in the rest of the market generally).

Compared with these cases, Rossi's damage estimation is far less speculative. The sales revenues (at least for the first few years of the ten year estimate) were exactly those that Rossi actually achieved while working as ABC's branch manager at the same location. Thus, the jury here need not even speculate whether the comparison market (or location) is similar enough to serve as a basis for its damage estimate, as the jury had to in Bigelow and Zenith Radio. Similarly, both the sales and expenses are based on real world numbers, not pure conjecture by an optimistic new competitor. These numbers may or may not

[116]** On the subject of the Rockhill Report, we add that the defendants' criticism that the report is flawed as a matter of law because it improperly mixes data using "a variety of sources including the historic operations of **[*487]** Standard; ABC actual data; input from Mr. Rossi; and judgment" is unavailing. Rockhill used actual data to support his estimates, and thus they are based upon a "reasonable foundation." See *Danny Kresky, 716 F.2d at 213*. We do not suggest that Standard's problems with the report are baseless, only that they constitute genuine issues of material fact and should also be argued before the trier of fact.

Finally, the defendants attack the evidence supporting Rossi's assertion of damages on several other bases. Defendants submit that Rossi Florence and Rossi Roofing failed because: (1) they were start-up operations, (2) they were founded during one of the worst recessions ever to hit the New Jersey housing market, (3) Rossi, as a manager, failed to control his costs, and/or (4) Rossi worked on other ventures to the detriment and ultimate failure of both companies. One or more of these reasons, particularly the theory that it was the recession, **[**117]** not a conspiracy, which mortally wounded Rossi's business efforts, might explain Rossi's failure in the roofing and siding business in northern New Jersey, and could conceivably result in a verdict for the defendants at trial. They are, however, unavailing to the defendants at this stage of the case because they all involve factual disputes that need to be resolved by the trier of fact, not by this court on a motion for summary judgment.

Standard also argues that Rossi failed to establish causation because an essential element in causation involves proving that there are no comparable substitutes for the desired product -- here, GAF product. See *Elder-Beerman Stores Corp. v. Federated Dep't Stores, Inc., 459 F.2d 138, 148 (6th Cir. 1972)*. This is another factual issue that Standard may argue to the jury. As we have explained above, we are satisfied that Rossi's own testimony and that of several of his witnesses are sufficient to establish that GAF product was, for practical purposes, unique and highly desired in this market. See supra § II.B.2.b(1).

In sum, Rossi has established a prima facie case of antitrust injury with respect to Standard, Arzee, and **[**118]** GAF. He has adduced evidence of specific lost transactions showing causation or fact of injury, which is bolstered by an expert damage report that is not overly speculative as a matter of law. The combination of this evidence, while not conclusive, provides enough of a foundation that an eventual finder of fact would be justified in making a "just and reasonable inference" of the damages Rossi may have suffered as a result of the defendants' allegedly unlawful activities.

IV. STATE LAW TORTIOUS INTERFERENCE WITH CONTRACTUAL AND PROSPECTIVE CONTRACTUAL RELATIONS

The district court dismissed Rossi's state law tortious interference claims against **[*488]** defendants with no discussion. It very well may be, as some of the defendants suggest, that the district court concluded when it dismissed Rossi's state law claims that Rossi had not shown any wrongful or intentional conduct designed to interfere with alleged contractual or prospective contractual relationships. If that is the case, then based upon our disposition here, the state law claims will likely have to be reinstated with respect to the Standard defendants, the Arzee defendants, and GAF since we have found that there is **[**119]** sufficient evidence of their participation in an unlawful conspiracy to boycott Rossi. However, the district court may have had some other reason for dismissing these claims of which neither we nor the parties before us is aware. Our jurisprudence requires district courts in this circuit to accompany grants of summary judgment with an explanation sufficient to permit the parties and this court to understand the legal premise for the court's order. See *Vadino v. A. Valey Eng'rs, 903 F.2d 253, 257-60 (3d Cir. 1990)*. We will therefore reverse the district court's order dismissing the state tortious interference claims against all defendants and remand them to the district court for further consideration and explanation consistent with this opinion.

V. CONCLUSION

For the foregoing reasons, we will affirm the district court's judgment on the federal antitrust issues with respect to Servistar and Wood Fiber, but reverse on those issues with respect to the Standard defendants, the Arzee

---

accurately represent what Rossi Florence or Rossi Roofing would have done had it stayed in business, but they are clearly not mere speculation or wishful thinking, as was the case in Van Dyk Research and Southern Pacific.

defendants, and GAF. We will also reverse the district court's judgment dismissing the state claims with respect to all defendants. The case will be remanded for further proceedings consistent **[**120]** with this opinion.

Governments > Local Governments > Finance

Governments > Public Improvements > General Overview

HN2[] Antitrust & Trade Law, Exemptions & Immunities

The state action doctrine provides states with immunity from federal antitrust suits seeking monetary or injunctive relief. The doctrine has been extended to provide immunity to local governments that engage in anticompetitive conduct pursuant to a state policy to displace competition with regulation or monopoly public service. Other courts have held, and this court agrees, that the state action doctrine applies not only to municipalities, but to the official acts of their officers. To demonstrate the existence of a clearly articulated state policy to displace competition, a municipality need not be able to point to a specific, detailed legislative authorization. Nor must its actions be actively supervised by the state. Instead, it is sufficient if the municipality acted pursuant to a clearly articulated and affirmatively expressed state policy, the foreseeable or logical result of which is anticompetitive.

HN4[] **Exemptions & Immunities, Parker State Action Doctrine**

For purposes of the state action doctrine, a municipality's authority to act is broader than what is applied to determine the legality of the municipality's action under state law. As the Supreme Court explained, a broader conception of authority is necessary to prevent the state action doctrine from undermining the very interests of federalism it is designed to protect. To be sure, state law "authorizes" only agency decisions that are substantively and procedurally correct. However if the antitrust court demands unqualified "authority" in this sense, it inevitably becomes the standard reviewer not only of federal agency activity but also of state and local activity whenever it is alleged that the governmental body, though possessing the power to engage in the challenged conduct, has actually exercised its power in a manner not authorized by state law.

Va. Code Ann. § 59.1-9.4(b)(1) exempts from scrutiny under the Virginia Antitrust Act any conduct that is authorized, regulated, or approved by a statute of this Commonwealth.

Counsel: ARGUED: John Warren Hart, BEATON & HART, P.C., Virginia Beach, Virginia, for Appellants.

ARGUED: William Gray Broaddus, MCGUIRE, WOODS, BATTLE & BOOTHE, L.L.P., Richmond, Virginia, for Appellees.

ON BRIEF: Scott Andrew Simmons, MCGUIRE, WOODS, BATTLE & BOOTHE, L.L.P., Richmond, Virginia, for Appellees.

Judges: Before MURNAGHAN and WILKINS, Circuit Judges, and BEEZER, Senior Circuit Judge of the United States Court of Appeals for the Ninth Circuit, sitting by designation.

Opinion

OPINION

PER CURIAM:

Appellant, American International Security Specialists, Inc. (American), appeals the district court's dismissal of its state and federal antitrust claims **[*2]** against various law enforcement officers (Appellees) operating in Virginia. Finding no error in the district court's judgment, we affirm.

I.

American is a private security provider doing business in Virginia. It brought suit against the Appellees, numerous Virginia-based sheriffs and chiefs of police, alleging that they had violated the Sherman Act, *15 U.S.C. § 1*, and analogous provisions of the Virginia Antitrust Act, *Va. Code §§ 59.1-9.5*, 9.6, by permitting and encouraging subordinate officers to engage in off-duty employment as private security personnel, using state and locally supplied uniforms, badges, weapons, radios, and other equipment.

The Appellees filed motions to dismiss American's claims, pursuant to *Fed. R. Civ. P. 12(b)(6)*. Construing American's complaint to state allegations against the Appellees in their official capacities only, the district court concluded that they were entitled to federal immunity under the state action doctrine and the Local Government Antitrust Act, *15 U.S.C. §§ 35-36*, and state immunity under the state action doctrine and an exemption to the Virginia Antitrust Act. When American declined to amend **[*3]** its complaint to state a claim against the Appellees in their individual capacitates, the district court granted the Appellees' motions to dismiss. On appeal, American maintains that such dismissal was erroneous.

II.

HN1[] We review de novo the district court's decision to dismiss American's claims pursuant to *Rule 12(b)(6)*. *See* *Brooks v. City of Winston-Salem, 85 F.3d 178, 181 (4th Cir. 1996)*. In conducting our review, we are required to accept as true the factual allegations in American's complaint and to construe those facts in the light most favorable to American. *See* *Estate Constr. Co. v. Miller & Smith Holding Co., Inc., 14 F.3d 213, 217-18 (4th Cir. 1994)*. The district court's dismissal of the claim must be affirmed if it appears beyond doubt that no set of facts could be proved which would entitle American to relief. *See* *id. at 218*.

The state action doctrine was first articulated by the Supreme Court in *Parker v. Brown, 317 U.S. 341, 350-51, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. ***HN2***[] It provides states with immunity from federal antitrust suits seeking monetary or injunctive relief. *See* *Cohn v. Bond, 953 F.2d 154, 158 (4th Cir. 1991)* **[*4]** (citation omitted). In more recent times, the doctrine has been extended to provide immunity to local governments that engage in anticompetitive conduct "pursuant to [a] state policy to displace competition with regulation or monopoly public service." *See* *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 413, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*. Other courts have held, and we agree, that the state action doctrine applies not only to municipalities, but to the official acts of their officers. *See* *Fisichelli v. City Known as Town of Methuen, 956 F.2d 12, 15-16 (1st Cir. 1992)* ("We do not believe that a plaintiff can avoid the [state action doctrine] simply by substituting, for the name of the town, the names of the town officials who approved the challenged municipal action.").

To demonstrate the existence of a clearly articulated state policy to displace competition, a municipality "need not be able to point to a specific, detailed legislative authorization . . . .'" *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 39, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)* (quoting *Lafayette, 435 U.S. at 415*). **[*5]** Nor must its actions be actively supervised by the state. *See* *id. at 46*. Instead, it is sufficient if the municipality acted pursuant to "a clearly articulated and affirmatively expressed . . . state policy," *see* *Lafayette, 435 U.S. at 410*, the "foreseeable" or "logical" result of which is anticompetitive, *see* *Hallie, 471 U.S. at 42*.

In the present case, the district court concluded, and we agree, that the Appellees are entitled to immunity under the state action doctrine. The Commonwealth of Virginia has clearly articulated a policy of allowing municipalities and their law-enforcement officers to engage in the conduct complained of by American. ***HN3***[] *Section 15.2-1712 of the Virginia Code* authorizes municipalities to "adopt an ordinance which permits law-enforcement officers and deputy sheriffs. . . to engage in off-duty employment which may occasionally require the use of their police powers . . . [and to provide for] reasonable rules to apply to such off-duty employment . . . ." In light of that provision, it is certainly foreseeable that a municipality might allow its police officers to engage in off-duty work in the private security field, **[*6]** and that a municipality could, as part of the "regulation" thereof, allow its officers to use publicly supplied uniforms and other equipment during the course of such employment.

American argues that the Appellees' activities are outside the scope of the state's clearly articulated policy since some of the municipalities have failed to pass the ordinance authorized by *§ 15.2-1712*. We find that argument unpersuasive. In *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*, the Supreme Court held that ***HN4***[] for purposes of the state action doctrine, a municipality's "authority" to act is "broader than what is applied to determine the legality of the municipality's action under state law," *id. at 372*. As the Court explained, a broader conception of authority is necessary "to prevent [the state action doctrine] from undermining the very interests of federalism it is designed to protect." *Id. at 372*.

> To be sure, state law "authorizes" only agency decisions that are substantively and procedurally correct. . . .[However,] if the antitrust court demands unqualified "authority" in **[*7]** this sense, it inevitably becomes the standard reviewer not only of federal agency activity but also of state and local activity whenever it is alleged that the governmental body, *though possessing the power to engage in the challenged conduct, has actually exercised its power in a manner not authorized by state law*.

Id. at 371-72 (emphasis added) (quoting P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 212.3b (Supp. 1989)); *see also* *Allright Colorado, Inc. v. City and County of Denver, 937 F.2d 1502, 1511 (10th Cir. 1991)* ("We reject the argument that alleged errors or abuses in the implementation of state law should expose the City to antitrust liability."); *Boone v. Redevelopment Agency of San Jose, 841 F.2d 886, 892 (9th Cir. 1988)* ("Concerns over federalism and state sovereignty . . . dictate that the [plaintiffs] not be allowed to use federal anti-trust law to remedy their claim that the city and the agency exceeded their authority under state law."). In the present case, it is clear that, pursuant to *§ 15.2-1712*, municipalities have the "authority," in the broad sense intended by *Columbia* , to regulate the **[*8]** off-duty employment of their police officers. We therefore affirm dismissal of American's federal claims. [1]

We reach the same conclusion with respect to state immunity. ***HN5***[] *Section 59.1-9.4(b)(1) of the Virginia Code* exempts from scrutiny under the Virginia Antitrust Act any "conduct that is authorized, regulated, or approved . . . by a statute of this Commonwealth." Here, as discussed above, the Appellees are so authorized. We, therefore, have no difficulty concluding that they are entitled to immunity. [2]

[*9] The judgment of the district court is, therefore,

AFFIRMED.

End of Document

[1] Our conclusion that the Appellees are entitled to immunity under the state action doctrine renders it unnecessary to consider whether they might also be entitled to immunity under the Local Government Antitrust Act.

[2] This conclusion makes it unnecessary to address the district court's alternative holding, about which we have considerable doubt, that the Appellees are entitled to state immunity under the *Parker* state action doctrine.

Iron Workers Local Union No. 17 Ins. Fund v. Philip Morris Inc.

United States District Court for the Northern District of Ohio, Eastern Division

September 10, 1998, Decided ; September 10, 1998, Filed

CASE NO. 1:97-CV-1422

Reporter

23 F. Supp. 2d 771 *; 1998 U.S. Dist. LEXIS 14340 **; 1998-2 Trade Cas. (CCH) P72,367

IRON WORKERS LOCAL UNION NO. 17 INSURANCE FUND AND ITS TRUSTEES, et al., Plaintiffs, v. PHILIP MORRIS INCORPORATED, et al., Defendants.

Subsequent History: As Amended September 21, 1998.

Disposition: **[**1]** Defendants' motions to dismiss plaintiffs' claims for breach of voluntary undertaken duty averred in Counts VI and VII of the Amended Complaint granted. Defendants' motions to dismiss plaintiffs' remaining claims under federal RICO (Counts I, II, III), under the Ohio Corrupt Activity Act (Counts XIV, XV, and XVI), for antitrust (Counts IV and X), and for civil conspiracy (Count XI) denied.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A court properly grants a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* only if it appears beyond doubt that the plaintiff can prove no set of facts that would entitle her to relief. The court accepts as true and construes all factual allegations in the complaint in the light most favorable to the plaintiff.

Torts > Negligence > General Overview

HN2[] **Torts, Negligence**

A plaintiff has a right of action in negligence only if a defendant's conduct was negligent relative to her, and if the plaintiff's injury was not reasonably foreseeable, then the defendant's act was not negligent relative to her.

Torts > ... > Elements > Duty > General Overview

Torts > Strict Liability > Abnormally Dangerous Activities > General Overview

HN3[] Elements, Duty

If acts are imminently dangerous to anyone who may come within contact, the law will find a duty of prevision not far from that of an insurer. Willfully dangerous acts or intentional acts support a broader scope of duty.

Torts > ... > Causation > Proximate Cause > General Overview

HN4[] Causation, Proximate Cause

Proximate cause is the limitation that courts place upon an actor's responsibility for the consequences of his conduct.

Torts > ... > Elements > Causation > Concurrent Causation

Torts > ... > Elements > Causation > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN5[] Causation, Concurrent Causation

The proximate cause of a result is that which in a natural and continued sequence contributes to produce the result, without which it would not have happened. The fact that some other cause concurred with the negligence of a defendant in producing an injury does not relieve him from liability, unless it is shown such other cause would have produced the injury independently of defendant's negligence.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN6[] Private Actions, Racketeer Influenced & Corrupt Organizations

In deciding whether a plaintiff shows proximate injury under the federal Racketeer Influenced and Corrupt Organizations (RICO) law, a party is generally required to show a direct injury to have standing. It is generally insufficient under RICO to complain of harm flowing from the misfortunes visited upon another person by the defendant's acts.

Torts > Remedies > Damages > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Torts > ... > Fraud & Misrepresentation > Actual Fraud > General Overview

HN7[] Remedies, Damages

In cases of willful or malicious injury, and injury from reckless or illegal acts, or from positive fraud, the damages are not so strictly confined to proximate consequences as when these elements do not exist. Where there is fraud or other intentional wrong, there is not the same strictness to exclude remote or uncertain damages, even where punitive damages are not involved.

Torts > ... > Elements > Causation > Causation in Fact

Torts > Intentional Torts > General Overview

HN8[] Causation, Causation in Fact

An act is intentional when the actor desires to cause consequences of his act, or he believes that the consequences are substantially certain to result from it.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN9[] Private Actions, Standing

In determining whether a party has standing to bring a Racketeer Influenced and Corrupt Organization Act (RICO) action, a court should consider: (1) the difficulty the plaintiff has in showing that damages flowed from the defendant's conduct; (2) the risk of double recovery; and (3) whether the defendant's conduct is sufficiently injurious to warrant deterrence.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN10[] Private Actions, Remedies

Ohio Rev. Code Ann. § 2923.34(F) provides that in a civil proceeding under division (B) of this section, any person directly or indirectly injured by conduct in violation of *§ 2923.32* or a conspiracy to violate that section, shall have a cause of action for triple the actual damages he sustained. Ohio Rev. Code Ann § 2823.34(F).

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN11[] Private Actions, Standing

Persons indirectly injured should have standing to bring an action under the Ohio Pattern of Corrupt Activity Act.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN12[] Private Actions, Racketeer Influenced & Corrupt Organizations

18 U.S.C.S. § 1964(c) gives a cause of action to any person injured in his business or property by reason of a violation of § 1962. *18 U.S.C. § 1964(c)*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN13[] Private Actions, Standing

To decide whether the plaintiff has standing to make claim under the Racketeer Influenced and Corrupt Organizations Act, a court must examine whether others are positioned to make the same claims, whether the plaintiff will have difficulty showing its damages flowed from the defendant's conduct, whether there is a risk of double recovery, and, importantly, whether the defendant's conduct is sufficiently harmful to warrant deterrence.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Torts > Business Torts > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN14[] Private Actions, Standing

Only a person injured in his business or property may recover damages underthe Racketeer Influenced and Corrupt Organizations Act (RICO). *18 U.S.C.S. § 1964(c)*. RICO excludes from its ambit damages for personal injury. Claims for personal property injuries are also not cognizable under RICO. A plaintiff only has standing if, and can only recover to the extent that, he has been injured in his business or property by the conduct constituting the violation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN15[] Private Actions, Remedies

To assert a claim for damages under the antitrust statutes, one must be injured in his business or property. *15 U.S.C.S § 15(a)*. A plaintiff must allege specific antitrust injury. An injury, although causally related to an antitrust violation, nevertheless will not qualify as an antitrust injury unless it is attributable to an anti-competitive aspect of the practice under scrutiny.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] **Remedies, Damages**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15* allows civil recovery of treble damages by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15(a)*.To make a claim under § 4 of the Clayton Act, a plaintiff need not prove that the antitrust violation was the sole or but for cause of his injury. It is enough that the challenged conduct is a material cause of that injury. A plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] **Private Actions, Standing**

A court determining antitrust standing must evaluate: (1) the nature of the damages sought; (2) whether the injury is of the type that the antitrust laws were intended to remedy; (3) the risk of duplicative recoveries of complex damages apportionment; and (4) the presence of more direct victims of the antitrust violation who can bring claim.

Torts > ... > Standards of Care > Reasonable Care > General Overview

Torts > ... > Elements > Duty > General Overview

Torts > ... > Duty > Affirmative Duty to Act > Voluntary Assumption of Duty

HN18[] **Standards of Care, Reasonable Care**

Under Ohio law, one who gratuitously undertakes a voluntary act assumes the duty to be careful under the circumstances.

Torts > Remedies > Damages > General Overview

Torts > ... > Duty > Affirmative Duty to Act > Voluntary Assumption of Duty

HN19[] **Remedies, Damages**

Under Ohio law, a claim for breach of a voluntarily undertaken duty must allege physical injury.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Torts > ... > Types of Damages > Compensatory Damages > General Overview

HN20[] **Conspiracy, Elements**

In Ohio, civil conspiracy is a malicious combination of two of more persons to injure another in person or property, in a way not competent for one alone, resulting in actual damages. An actionable conspiracy must be based upon an actionable underlying tort.

Opinion

[*776] OPINION AND ORDER

On January 8, 1998, defendants [1] **[**7]** moved this Court to dismiss plaintiffs' First Amended Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* [Doc. 27]. [2] In ruling on defendants' motion to dismiss for failure to state a claim upon which relief can be granted, the Court first examines defendants' general defense that plaintiffs' claims are too remote to allow recovery. To decide this, the Court reviews the principles underlying the remoteness **[*777]** doctrine and the proximate cause doctrine. After having made this review, the Court concludes that plaintiffs' claims are not generally stopped as too remote.

The Court then decides whether plaintiffs state claims for violations of the Racketeer Influenced Corrupt Organizations Act ("RICO") and the Ohio Pattern of Corrupt Activity Act ("Ohio Corrupt Activity Act"), *Ohio Rev. Code §§ 2923.31, et seq.* In deciding this, the Court examines the federal and Ohio statutory schemes and determines whether the Ohio Corrupt Activity Act is broader than RICO. After considering the federal and Ohio schemes, the Court determines whether plaintiffs state causes under either or both. After making this review, the Court finds that plaintiffs state causes of action under both RICO and the Ohio Corrupt Activity Act.

After **[**8]** determining whether plaintiffs state RICO claims under federal or state law, the Court addresses plaintiffs' antitrust claims under federal and state law. Again, the Court decides whether plaintiffs' claims are too remote and whether the damages claimed by plaintiffs have proximately resulted from defendants' conduct. The Court also looks to whether plaintiffs have standing to make antitrust claims. After making this review the Court finds that plaintiffs have sufficiently stated causes of action under federal and state ***antitrust law***.

The Court then looks to whether the plaintiffs sufficiently state claims for breach of a voluntarily undertaken duty and for conspiracy. After reviewing these questions, the Court finds plaintiffs do state a cause of action for civil conspiracy upon which relief can be granted. However, the Court finds plaintiffs do not state causes of action for breach of a voluntarily undertaken duties. Accordingly, the Court grants defendants motions to dismiss Counts VI and VII of the Amended Complaint.

I. Introduction

Plaintiffs are certain trusts organized to provide health-related benefits to workers and their families. [3] The plaintiffs are nonprofit, union-sponsored **[**9]** tax-exempt trusts organized under the Employee Retirement Income Security Act ("ERISA"), 29 U.S.C. §§ 1100.01, *et seq.* The trusts provide medical or hospital care benefits to participants and their beneficiaries as an employee retirement income security program. Trustees govern the trusts. Of the trustees,

---

[1] The defendants are leading cigarette and tobacco manufacturers in control of the tobacco market in the United States, their research councils, and a public relations firm.

Defendants are Philip Morris Incorporated; RJR Nabisco, Inc.; RJR Nabisco Holdings Corp.; R.J. Reynolds Tobacco Company; Brown & Williamson Tobacco Corporation; Lorillard Tobacco Company; The American Tobacco Company; Liggett Group, Inc.; United States Tobacco Sales and Marketing Company Inc.; The Council for Tobacco Research - U.S.A., Inc.; The Tobacco Institute, Inc.; Hill & Knowlton, Inc.; B.A.T Industries p.l.c.; and British-American Tobacco Company Limited ("BATCo.").

[2] On January 8, 1998, defendants filed a motion to dismiss for failure to join necessary parties pursuant to *Fed. R. Civ. P. 12(b)(7)* [Doc. 28]. In March 1998, Defendants Tobacco Institute, BAT Industries, PLC, Smokeless Tobacco Council, Inc., RJR Nabisco, Inc. and RJR Nabisco Holdings, Inc. filed motions to dismiss for lack of personal jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(2)*. The Court deals with these motions in separate orders.

[3] Plaintiffs are Iron Workers Local Union No. 17 Insurance Fund. IBEW Local No. 38 Health & Welfare Fund, Ohio Laborers' District Council-Ohio Contractors' Association Insurance Fund, Dealers-Unions Insurance Fund, Local 47 Welfare Fund No. 1, Toledo Electrical Welfare Fund and their trustees.

Plaintiffs have moved this Court to certify this case as a class action. Consideration of class certification shall be addressed in a subsequent opinion and order of the Court.

employers contributing to the trusts typically choose half of the trustees and union member beneficiaries of the trusts choose half of the trustees.

On May 20, 1997, Plaintiffs Funds brought this action against tobacco-related entities. [4] **[**10]** Plaintiffs allege that, since about 1953, the defendants have shifted the large health care costs of smoking onto plaintiffs, proposed class members, and other health care payers. Plaintiffs say defendants expected, foresaw, and planned this shift of expenses. The plaintiffs say that as the direct result of the defendants' wrongdoing, plaintiffs and all similar trust funds had to make substantial expenditures to pay for treatment of smoking-related illnesses and addiction.

Because of this alleged shift of expenses onto the funds, and other medical expense payers, plaintiffs say the defendants have depleted their Trusts of monies otherwise available. Because of this purportedly unlawful conduct, **[**11]** Plaintiffs Funds say they bore the cost of damages caused by the defendants. Plaintiffs allege standing to sue defendants for damage to the business or property of the trust funds. Plaintiffs say they bring this action in fulfillment of their fiduciary duty to replenish the trust funds and to maximize health care benefits for all trust beneficiaries. Plaintiff Funds seek damages and injunctive relief.

[*778] In Counts I, II, and III, plaintiffs make claim under the federal RICO provisions of the Organized Crime Control Act of 1979. *18 U.S.C. § 1961, et seq.* In Counts XIV, XV, and XVI, plaintiffs make claim under the Ohio equivalent of RICO, the Ohio Pattern of Corrupt Activity Act, *Ohio Rev. Code §§ 2923.31, et seq.* In Counts IV and X of the Amended Complaint, the plaintiffs make two antitrust claims. In Counts VI and VII, plaintiffs make claim for intentional and negligent breach of a special duty. Finally, plaintiffs make claim for civil conspiracy in Count XI of their Amended Complaint. [5]

[12]** Defendants now seek dismissal of all plaintiffs' claims. In seeking dismissal, defendants say certain reasons stop all claims made by plaintiffs. Separately, defendants say certain defenses stop individual claims. In ruling upon defendants' motion to dismiss, the Court first examines defendants' more generalized defenses. Chief among these defenses is the argument that plaintiffs' claims are too remote to allow recovery. After reviewing defendants' more generalized arguments, the Court moves to defendants' more specific arguments for dismissal.

II. Standard of review

HN1[] A court properly grants a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* only if it appears beyond doubt that the plaintiff can prove no set of facts that would entitle her to relief. *See McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)*. We accept as true and construe all factual allegations in the complaint in the light most favorable to the plaintiff. *U.S. ex rel. McKenzie v. BellSouth Telecommunications, Inc., 123 F.3d 935 (6th Cir. 1997)*, *cert. denied*, *__ U.S. __, 139 L. Ed. 2d 755, 118 S. Ct. 855 (1998)*. [6] Applying this standard, **[**13]** the Court considers the instant motions.

III. Discussion

A. General discussion of remoteness

---

[4] The Funds can sue or be sued in their own name. *See* ERISA, *29 U.S.C. § 1132(d)(1)* ("An employee benefit plan [like the Funds] may sue or be sued under this subchapter as an entity."); *Whitworth Bros. Storage Co. v. Central States, Southeast & Southwest Areas Pension Fund, 794 F.2d 221, 224 n.2 (6th Cir. 1986)*.

[5] On September 8, 1998, Plaintiffs dismissed without prejudice claims for fraud (Count V), for unjust enrichment (Count IX), and for violation of the Deceptive Trade Practices Act (Count XII). Plaintiffs earlier withdrew claims for breach of warranty (Count VIII), for violation of ERISA (Count XIII), for strict product liability (Count XVII), and for negligence (Count XVIII). Therefore, Counts V, VIII, IX, XII, XIII, XVII, and XVIII of the Amended Complaint are dismissed.

[6] Because all factual allegations in the complaint are accepted as true and construed in the light most favorable to the plaintiff, the court describes this case as plaintiffs allege in their pleadings. Of course, proof of plaintiffs' allegations await later determination.

Defendants argue generally that plaintiffs' claims are too remote to allow relief and, for this reason, the Court should dismiss all of plaintiffs' claims. Because the Court finds the defense of remoteness differs depending on the claim involved, the Court denies defendants' generalized request for dismissal on this ground. Instead, the Court finds that a more claim-specific examination is needed. Nonetheless, a discussion of defendants' general remoteness argument lends assistance to the Court's examination of particular claims.

In seeking dismissal on grounds of remoteness, defendants say that plaintiffs' action is one simply to recover medical **[**14]** expenses incurred by another. Claiming that plaintiffs' claim is only to recover medical expenses incurred by another, defendants say these claims are too remote to give a common law right to reimbursement through "direct" or "independent" claims. If the claims are too remote, then plaintiffs are limited to bringing an action as an assignee or subrogee. [7] However, if the claims are found direct, Plaintiffs Funds would avoid some or all of the defenses that would potentially stop surrogated claims.

[15]** To support their view that plaintiffs' claims are too remote to allow recovery, the defendants claim support from a plethora of old **[*779]** cases, including the 1846 Massachusetts case, *Anthony v. Slaid, 52 Mass. (11 Met.) 290 (1846)*. In *Slaid*, a party contracting to provide support to paupers made claim against a party who had tortuously caused injury to an indigent. The Massachusetts Supreme Judicial Court denied recovery, finding that the damage was too remote and indirect. [8]

To decide whether the reasoning of *Slaid* should stop the present claims, a review of the principles of remoteness, proximate causation, and standing is beneficial. Scrutiny of the classic decision *Palsgraf v. Long Island R. Co., 248 N.Y. 339, 162 N.E. 99 (1928)*, aids this review. In *Palsgraf*, the decision by Chief Judge Cardozo and the dissent by Judge Andrews respectively set out arguments suggesting a limitation on tort claims **[**16]** and arguments allowing a broader scope of claims. [9]

In *Palsgraf*, railway employees negligently pushed a passenger onto a departing train. While boarding the train in this way, the passenger dropped a package of fireworks, which exploded upon hitting the ground. The shock of the explosion dislodged scales at the other end of the platform, many feet away. The scales struck the plaintiff, causing injuries for which she sued and recovered judgment.

Judge Cardozo's majority opinion reversed a jury verdict in favor of Plaintiff Palsgraf and against the railway. In denying recovery, Cardozo found that the injuries foreseen control the scope of duty. Cardozo found that a plaintiff may recover in negligence only if her injury was one that a defendant exercising reasonable foresight (less than "extravagant prevision") would have foreseen. The court **[**17]** there ruled:

> Negligence, like risk, is thus a term of relation. . . . One who seeks redress at law does not make out a cause of action by showing without more that there has been damage to his person. If the harm was not willful, he must show that the act as to him had possibilities of danger so many and apparent as to entitle him to be protected against the doing of it though the harm was unintended.

Id. at 345 (citations omitted).

---

[7] If so limited, the plaintiffs would need to make additional showings. "According to the general rule, an assignee or subrogee of a claim stands in the shoes of the assignor or subrogor, and succeeds to all the rights and remedies of the latter." *Inter Ins. Exch. of the Chicago Motor Club v. Wagstaff, 144 Ohio St. 457, 460, 59 N.E.2d 373 (1945)*. Further, a subrogee may only assert claims the subrogor could assert. *Kurent v. Farmers Ins., Inc., 62 Ohio St. 3d 242, 247, 581 N.E.2d 533 (1991)*. In short, "standing in the shoes" of these participants would require the Funds to offer individual proofs (and overcome affirmative defenses) for each smoker as to whom subrogation is claimed.

[8] See also *Great American Insurance Co. v. United States, 575 F.2d 1031 (2nd Cir. 1978)*.

[9] Cardozo's *Palsgraf* opinion enjoyed a narrow majority. Three judges concurred in the majority opinion of Cardozo while two judges joined the dissent of Andrews.

Cardozo's argument breaks down into two parts: (1) ***HN2***[] a plaintiff has a right of action in negligence only if the defendant's conduct was negligent relative to her; and (2) if the plaintiff's injury was not reasonably foreseeable, then the defendant's act was not negligent relative to her. Central to Cardozo's argument is the suggestion that tort law does not afford a remedy for merely unsocial conduct:

> The argument for the plaintiff is built upon the shifting meanings of such words as 'wrong' and 'wrongful,' and shares their instability. What the plaintiff must show is 'a wrong' to herself; i.e., a violation of her own right, and not merely a wrong to some one else, nor conduct 'wrongful' because unsocial, but not 'a wrong' to **[**18]** any one.

248 N.Y. at 343-44.

To decide if a tort plaintiff is within the orbit of those protected against a defendant's wrongful conduct, Cardozo suggested that "the risk reasonably to be perceived defines the duty to be obeyed." Moreover, "this does not mean, of course, that one who launches a destructive force is always relieved of liability, if the force, though known to be destructive, pursues an unexpected path. 'It was not necessary that the defendant should have had notice of the particular method in which an accident would occur, if the possibility of an accident was clear to the ordinarily prudent eye.'" *Id. at 344* (quoting *Munsey v. Webb, 231 U.S. 150, 156, 58 L. Ed. 162, 34 S. Ct. 44 (1913))*. Cardozo further ruled that ***HN3***[] if acts are imminently dangerous to anyone who may come within contact, the law will find a duty of prevision not far from that of an insurer. *248 N.Y. at 344*. Willfully dangerous acts or intentional acts support a broader scope of duty. *Id.*

In dissent, Judge Andrews argued for a broader scope of those able to bring tort claims. Andrews argued that the wrongdoer **[*780]** should be liable, without limitation, for all damages shown to have resulted **[**19]** from the wrongful conduct. Andrews explained his reasoning:

> We are told that 'there is no negligence unless there is in the particular case a legal duty to take care, and this duty must be not which is owed to the plaintiff himself and not merely to others.' This I think too narrow a conception. Where there is the unreasonable act, and some right that may be affected there is negligence whether damage does or does not result. That is immaterial. Should we drive down Broadway at a reckless speed, we are negligent whether we strike an approaching car or miss it by an inch. The act itself is wrongful. If [sic] is a wrong not only to those who happen to be within the radius of danger, but to all who might have been there--a wrong to the public at large.
>
> * * *
>
> Due care is a duty imposed on each one of us to protect society from unnecessary danger, not to protect A, B, or C alone.
>
> * * *
>
> The proposition is this: Every one owes to the world at large the duty of refraining from those acts that may unreasonably threaten the safety of others. Such an act occurs. Not only is he wronged to whom harm, might reasonably be expected to result, but he also who is in fact injured, **[**20]** even if he be outside what would generally be thought the danger zone. There needs be duty due the one complaining, but this is not a duty to a particular individual because as to him harm might be expected. Harm to some one being the natural result of the act, not only that one alone, but all those in fact injured may complain.

Id. at 348-50 (citations omitted).

The *Palsgraf* decision, like *Slaid*, deals with the question of duty. Stated simply, does the defendant stand in such relation to the plaintiff that the law will impose obligations and consequences resulting from the defendant's acts or omissions?

Contrary to the arguments that defendants here make, the determination of duty lacks precision. As Dean Prosser explained:

> In the decision whether or not there is a duty, many factors interplay: the hand of history, our idea of morals and justice, the convenience of administration of the rule, and our social ideas as to where the loss should fall. In the end the court will decide whether there is a duty on the basis of the mores of the community, "always keeping in mind the fact that we endeavor to make a rule in each case that will be practical and in **[**21]** keeping with the general understanding of mankind."

Dean Prosser, *Palsgraf Revisited*, 52 Mich. L. Rev. 1, 15 (1953) (footnotes omitted).

Prosser states the issue:

> Essentially, the choice is between an innocent plaintiff and a defendant who is admittedly at fault. If the loss is out of all proportion to the defendant's fault, it can be no less out of proportion to the plaintiff's innocence. If it is unjust to the defendant to make him bear the loss which he could not have foreseen, it is no less unjust to the plaintiff to make him bear a loss which he could not have foreseen and which is not even due to his own negligence but to that of another. In these cases there is no justice to be had. [10]

[22]** To place some limit upon liability for negligent acts, Prosser suggests that there must be some "reasonably close connection between the harm threatened and the harm done." Prosser, *Palsgraf Revisited*, at 27.

HN4[] "Proximate cause" is the limitation that courts place upon an actor's responsibility for the consequences of his conduct. In reality, an act's consequences go on forever. [11] **[*781]** As suggested by Prosser, we can make a strong argument that it is more equitable to visit responsibility for unforeseen consequences upon the wrongdoer rather than upon the victim. Nevertheless, the law limits a wrongdoer's responsibility for his wrongful acts to avoid a flood of litigation and to avoid the uncertainty attending less direct claims. By shifting the expense to the victim rather than the tortfeasor, the law limits claims to those causes that are so closely connected with the result and of such significance that the law is justified in imposing liability.

[23]** The proximate cause requirement, therefore, limits a defendant's liability. While the reasons for a proximate cause requirement are easily articulated, defining when proximate cause exists is uncertain.

Judicial denial of derivative claims is less clear than defendants suggest. For example, a spouse or parent or child can bring an independent claim for loss of the services of an injured wife or husband or child [12] or parent. [13]

[24]** Likewise, an employer may bring an action for negligent injury to his employee. See *Cincinnati Bell Telephone Company v. Straley, 40 Ohio St. 3d 372, 380-81, 533 N.E.2d 764 (1988)* (citing *Ledex, Inc. v. Heatbath Corp., 10 Ohio St. 3d 126, 461 N.E.2d 1299 (1984)* and *Midvale Coal Co. v. Cardox Corp., 152 Ohio St. 437, 89*

---

[10] Dean Prosser, *Palsgraf Revisited*, 52 Mich. L. Rev. 1, 17 (1953). While criticizing Cardozo for failing to give reasoned guidance for deciding the issues of duty and proximate cause, Prosser recognized the need to place some limit upon liability:

> There is still the problem of an end to liability, of a place to stop. It is still unthinkable that any one shall be liable to the end of time for all of the results that follow in endless sequence from his single act.

Dean Prosser, *Palsgraf Revisited* at 24.

[11] Prosser, Law of Torts § 41, at 236 (4th ed. 1971). "In a philosophical sense, the consequences of an act go forward to eternity, and the causes of an event go back to the discovery of America and beyond. . . . Thus, it could be argued that the fatal trespass done by Eve was the cause of all woe." *Id.*

[12] *See* *Grindell v. Huber, 28 Ohio St. 2d 71, 275 N.E.2d 614 (1971)* (syllabus at paragraph one) (stating when a minor child suffers an injury, allegedly as a result of the negligence of a defendant, two separate causes of action arise: an action by the child for his or her personal injuries, and a derivative action in favor of the parents for loss of services and medical expenses.).

[13] The Supreme Court of Ohio recognized a minor child's cause of action for loss of parental consortium against one who has negligently harmed the child's parent in *Gallimore v. Children's Hospital Med. Ctr., 67 Ohio St. 3d 244, 617 N.E.2d 1052 (1993)* (syllabus at paragraph two).

N.E.2d 673 (1949)) (employer whose employee suffers injuries and recovers workers' compensation benefits may bring an action for increased workers' compensation premiums against a third party whose conduct caused the employee's injuries.); Ohio Rev. Code § 4123.931 (statutorily recognized right of an employer to bring an action for increased workers compensation expenses against third party tortfeasor.). Further, a party not in privity with an accountant can bring an action for damages resulting from negligence of the accountant. Haddon View Inv. Co. v. Coopers & Lybrand, 70 Ohio St. 2d 154, 436 N.E.2d 212 (1982) (syllabus at paragraph one) ("An accountant may be held liable by a third party for professional negligence when that third party is a member of a limited class whose reliance on the accountant's representation they specifically foresee."). As **[**25]** indicated by these examples, the determination of relationship necessary to support a cause of action is less clean than suggested by defendants.

In claiming that they owed plaintiffs no duty in the instant case, defendants say that plaintiffs' claims are too indirect to go forward. Defendants say that the law does not allow recovery by third parties, i.e., parties not themselves directly injured. In making their general claim that plaintiffs' claims are too remote, defendants primarily rely upon cases that deal with proximate cause or directness in the "negligence" context. [14] However, the tests of proximate causation **[*782]** and remoteness are not the same for all types of claims. The tests for remoteness and proximate causation differ for the varied statutory, intentional tort, and equitable contexts in which plaintiffs' claims here arise.

[26]** The decision of whether a defendant should respond to claims from less directly injured claimants require examination of whether there is a reasonable connection between the defendant's acts and its consequences.

To decide whether the defendants' acts and failures to act alleged in the Amended Complaint have a reasonable connection to the greatly increased expenses visited upon the plaintiffs, the Court looks to relevant precedent for guidance. [15]

As later described, plaintiffs make claim against defendants under RICO. In making the general argument that plaintiffs do not have standing, Defendants suggest support in Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992). [16] In *Holmes*, the Supreme Court reviewed whether a

---

[14] The Ohio Supreme Court generally defines proximate cause consistent with Cardozo's majority opinion in *Palsgraf*. The Ohio Supreme Court, in Piqua v. Morris, 98 Ohio St. 42, 120 N.E. 300 (1918), defined proximate cause in paragraph one of the syllabus:

> **HN5**[] The 'proximate cause' of a result is that which in a natural and continued sequence contributes to produce the result, without which it would not have happened. The fact that some other cause concurred with the negligence of a defendant in producing an injury does not relieve him from liability, unless it is shown such other cause would have produced the injury independently of defendant's negligence.

In Armour & Co. v. Ott, 117 Ohio St. 252, 257, 158 N.E. 189 (1927), the Ohio Supreme Court approved the following definition for remote cause: " . . . an injury that could not have been foreseen or reasonably anticipated as the probable result of an act of negligence . . . ."

No liability can result to a party, "even if negligence of a party is a cause of injury to another," if the cause is a remote one. Tanzi v. N.Y. Cent. R. Co., 155 Ohio St. 149, 98 N.E.2d 39, "'159 patent (1951).

[15] The parties here identify no clearly controlling precedent of the Sixth Circuit.

[16] In making the claim that plaintiffs' claims are too remote to allow the action to proceed, defendants offensively misrepresent the *Holmes* holding to the Court. Thus, defendants represent to this Court: "[In *Holmes v. Securities Investor Protection Corp.*, [the Supreme Court] held that a RICO plaintiff who "complain[s] of harm flowing merely from the misfortune, visited upon a third person by the defendant's acts . . . stand[s] at too remote a distance to recover." Holmes, 503 U.S. at 268-69.

The complete quote from *Holmes* is: "Thus, a plaintiff who complained of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts was generally said to stand at too remote a distance to recover." *See, e.g.*, 1 J. Sutherland, Law of Damages 55-56 (1882).

nonprofit corporation had standing, under RICO, to sue employees of a defunct securities brokerage firm. In bringing its action, the nonprofit corporation **[**27]** had sought and obtained approval for the appointment of a trustee to liquidate a securities broker-dealer. The nonprofit corporation and the trustee then brought a RICO action against persons alleged to have conspired in a fraudulent scheme that led to the end of two companies.

[28]** In the circumstances of the *Holmes* case, the Supreme Court found that plaintiffs in a RICO action must show not only a direct injury but also must show that defendant's conduct was a proximate cause of plaintiff's injury:

> Here we use "proximate cause" to label generically the judicial tools used to limit a person's responsibility for the consequences of that person's own acts. At bottom, the notion of proximate cause reflects "ideas of what justice demands, or of what is administratively possible and convenient."

Id. at 268.

HN6[] In deciding whether a plaintiff shows proximate injury under the federal RICO law, the Supreme Court found that a party is *generally* required to show a direct injury to have standing. It is generally insufficient under RICO to complain of harm "flowing from the misfortunes visited upon [another] person by the defendant's acts." *Id.* The *Holmes* Court found that the plaintiffs could not make claim for injuries more directly visited upon third parties. The *Holmes* Court emphasized that others were positioned to make the same claims: "Although the customers' claims are senior (in recourse to 'customer property') to those of **[**29]** the broker-dealers' general creditors, the causes of their respective injuries are the same." *Id. at 271*. [17]

Because the proximate cause determination is a policy decision about who will bear the expense of extended damage, courts should consider the original reasons for the proximate cause rule. The decision involves choosing between "an innocent plaintiff and a defendant who is admittedly at fault." To decide this, the *Holmes* Court directed consideration of the difficulty the plaintiff has in showing that its damages flowed from the **[*783]** defendant's conduct, the risk of double recovery, and, importantly, whether the defendant's conduct is sufficiently harmful to warrant deterrence. *Holmes, 503 U.S. at 269*.

In deciding a motion to dismiss, we accept plaintiffs' allegations that defendants' conduct caused damages. Stated another way, the standing issue does not involve whether **[**30]** defendants' conduct caused plaintiffs great financial damage. Instead, ruling on defendants' motion requires the Court to consider whether, considering the conduct and damages alleged, and "on the basis of the mores of the community," [18] **[**31]** a party should avoid damages that party caused. [19]

Defendants' misrepresentation is obvious. First, the quoted language describes general language from a treatise without clearly adopting the treatise. The Supreme Court does not clearly adopt the description in the treatise. Second and more important, the defendants remove the term "generally" in an effort to cause this Court to misunderstand the *Holmes* holding.

[17] In *Holmes*, more directly injured parties had already brought an action complaining of the same conduct. *503 U.S. at 273*.

[18] Prosser, *Palsgraf Revisited*, at 15. The mores of communities evolve. In a letter to Samuel Kercheval on July 12, 1816, Thomas Jefferson spoke to change in the law:

> I am not an advocate for frequent changes in laws and constitutions, but laws and institutions must go hand in hand with the progress of the human mind. As that becomes more developed, more enlightened, as new discoveries are made, new truths discovered and manners and opinions change, with the change of circumstances, institutions must advance also to keep pace with the times. We might as well require a man to wear still the coat that fitted him when a boy as civilized society to remain ever under the regimen of their barbarous ancestors.

Quoted in *Klever v. Canton Sachsenheim, Inc., 1998 Ohio App. LEXIS 3992*, No. 1998-CA-0010 (Ohio Ct. App. 5th Dist. August 10, 1998) (Gwin, W.S.) (unreported).

[19] Defendants deny that their acts or omissions caused any damage. In reviewing defendants' motion for judgment, plaintiffs' allegations that defendants' acts caused damages are taken as true.

At this juncture, the Court finds that plaintiffs allege facts that would allow recovery. First, plaintiffs do not bring a negligence action. Statutes and court interpretations of those statutes define the proximate cause elements of plaintiffs' RICO and antitrust claims. *See, e.g.,* *National Organization for Women v. Scheidler, 510 U.S. 249, 127 L. Ed. 2d 99, 114 S. Ct. 798 (1994)* ("NOW") (describing the proximate cause/directness requirement of a RICO claim); *Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)* (same); *Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* (describing antitrust standing requirements); *Associated Gen. Contractors of California v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (same).

Second, plaintiffs allege that **[**32]** defendants acted intentionally in causing harm to plaintiffs. ***HN7***[] "In cases of willful or malicious injury, and injury from reckless or illegal acts, or from positive fraud, the damages are not so strictly confined to proximate consequences as when these elements do not exist. . . . Where there is fraud or other intentional wrong, there is not the same strictness to exclude remote or uncertain damages, even where punitory damages are not involved." *Burckhardt v. Burckhardt, 42 Ohio St. 474, 487(1885)*. [20] See also *Restatement (Second) of Torts § 435B*.

As suggested by plaintiffs, proximate causation is broader with regard to intentional **[**33]** acts than it is for negligent acts. The *Comments to Restatement (Second) of Torts § 435B* support this contention:

> "Responsibility for harmful consequences should be carried further in the case of one who does an intentionally wrongful act than in the case of one who is merely negligent . . . ."

Restatement (Second) of Torts § 435B, ch.16., cmt. a (1965).

HN8[] An act is intentional when "'the actor desires to cause consequences of his act, or . . . he believes that the consequences are substantially certain to result from it.'" *Sicard v. Univ. of Dayton, 104 Ohio App. 3d 27, 30, 660 N.E.2d 1241 (2nd Dist. 1995)* (quoting *Marchetti v. Kalish, 53 Ohio St. 3d 95, 96 n. 2, 559 N.E.2d 699 (1990))*. [21] See also *Monsler v. Cincinnati Cas. Co., 74 Ohio App. 3d 321, 328, **[*784]** 598 N.E.2d 1203 (10th Dist. 1991)* ("An act is intentional in the context of civil liability if (1) it is done willingly, and either (2) the actor desires the results of his conduct, or (3) the actor knows, or ought to know, the result will follow from his conduct.") (citation omitted). As the plaintiffs allege intentional conduct, "the responsibility for harmful consequences should be carried further." **[**34]** *Comments to Restatement (Second) of Torts § 435B*.

The determinations of proximate cause, standing, and remoteness are particularly matters of policy. Plaintiffs bring different causes of actions with different considerations for standing. The Court finds that plaintiffs' standing to bring various actions must be individually judged. Accordingly, the defendants' blanket argument for dismissal on remoteness grounds fails.

IV. Standing to bring RICO actions.

A. General discussion of standing for RICO claims.

HN9[] In determining whether a party has standing to bring a RICO action, the *Holmes* Court said courts should consider: (1) the difficulty the plaintiff has in showing that damages flowed from the defendant's conduct; (2) the risk

---

[20] In *Burckhardt*, the Supreme Court of Ohio explained its approach:

> That the person injured shall received [sic] a compensation commensurate with his loss or injury, is the universal and cardinal principle of the law of damages. This principle is paramount, and by it all rules on the subject of compensatory damages are tested and corrected.

42 Ohio St. at 487.

[21] The *Sicard* case quotes from 1 *Restatement (Second) of Torts § 8A*, at 15 (1965).

of double recovery; and (3) whether the defendant's conduct is sufficiently injurious to warrant deterrence. *Holmes, 503 U.S. at 269*.

While disputed, plaintiffs show evidence, that if believed, **[**35]** would show that damages directly resulted to plaintiffs from defendants' conduct. Plaintiffs suggest they will offer epidemiological evidence showing that defendants' conduct greatly increased the expenses of affording coverage to beneficiaries. Some medical research suggests that smoking causes 10 percent of the nationwide medical expenses. [22] Plaintiffs claim that union members' beneficiaries smoke at rates greater than the general population. Plaintiffs suggest that they will show that nearly 10 percent of the hundreds of millions of dollars they have spent on health care has been caused by defendants' unlawful conduct.

[36]** As described, the *Holmes* Court delineated three considerations for determining whether damages caused by violation of RICO should not be allowed on proximate cause grounds. Under the first factor, the Court focused on the difficulty the plaintiff has in showing that damages flowed from the defendant's conduct. *503 U.S. 258, 112 S. Ct. 1311, 117 L. Ed. 2d 532*. The plaintiff avers major damages to their trusts from being required to absorb medical expenses caused by defendants. The Court finds that this factor weighs in favor of a finding of proximate relationship.

The *Holmes* Court described a second consideration in the policy grounded determination of proximate causation in RICO actions: whether we should stop claim for injury because of the risk of double recovery. *Id.*

Defendants suggest that they would be exposed to double recovery should this Court permit plaintiffs to bring this action. Specifically, defendants say that both Fund beneficiaries and the plaintiffs would seek, and might recover, for the same damages.

[*785] The Court finds little potential for double recovery. First, an injured smoker beneficiary could not recover under antitrust or RICO for the medical costs paid by any of the plaintiffs' **[**37]** trust funds. Both ***antitrust law*** and RICO require a showing of injury to a plaintiffs business or property. Medical expenses paid on the behalf an injured smoking beneficiary could not make up a monetary loss or other injury to a smoker's "business or property." *See* Clayton Act § 4, *15 U.S.C. § 15* (antitrust); *Reiter v. Sonotone Corp., 442 U.S. 330, 339, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979)* (antitrust injury to property includes loss of money, excludes personal injuries); *18 U.S.C. § 1964(c)* (RICO); *Steele v. Hospital Corp. of America, 36 F.3d 69, 70 (9th Cir. 1994)* ("If the patients have paid none of the allegedly excessive charges out of their own pockets because those charges were covered by insurance, then they have suffered no financial loss," and plaintiff patients have no injury to their business or property). [23]

---

[22] The Amended Complaint alleges that cigarette smoking is the leading cause of premature death in the United States. Plaintiffs allege that cigarette smoking kills more than 400,000 Americans each year, more than the combined deaths caused by automobile accidents, AIDS, alcohol use, use of illegal drugs, homicide, suicide and fires. Plaintiffs say smoking-related illnesses account for one of every five deaths in the United States. Amended Complaint at PP 53-57.

See U.S. Dep't of Health, Educ. & Welfare, *The Health Consequences of Smoking: A Public Health Service Review* 34, 135 -38 (1967); Advisory Comm. to the Surgeon General of the Public Health Service, U.S. Dep't of Health. Educ. & Welfare, *Smoking and Health* 31 (1964). *See also* Richard Scruggs, *Tobacco Litigation: a Problem That Needs a Solution*, *41 N.Y.L. Sch. L. Rev. 487, 487-88 (1997)*; Raymond E. Gangarosa et al., *Suits by Public Hospitals to Recover Expenditures for the Treatment of Disease, Injury and Disability Caused by Tobacco and Alcohol*, *22 Fordham Urb. L.J. 81, 81-103 (1994)*.

Researchers from the University of California and the Centers for Disease Control estimate smoking-related medical care in 1993 at $ 50 billion. Others suggest that ten to twenty percent of all health care dollars are spent treating tobacco-related illnesses. C. Everett Koop, *A Tax That's Good for You*, Wash. Post, Sept. 21, 1993, at A19 (cited in D. Garner and R. Whitney, *Protecting Children From Joe Camel And His Friends: a New First Amendment and Federal Preemption Analysis of Tobacco Billboard Regulation*, *46 Emory L. J. 479 (1997)*); *Medical Care Expenditures Attributable to Cigarette Smoking -- United States*, 1993, 43 Morbidity & Mortality Wkly. Rep. 469, 470 (1994).

[23] The *Holmes* Court cited the pendency of an action by the broker-dealers as suggesting the Court not afford a remedy:

[38]** Moreover, the single satisfaction rule would allow defendants to seek credit for amounts paid plaintiffs in antitrust and RICO litigation in later personal injury litigation by beneficiaries. *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 348, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971)* (antitrust); [24] **[**39]** *Singer v. Olympia Brewing Co., 878 F.2d 596, 599-601 (2nd Cir. 1989)* (RICO), *cert. denied*, *493 U.S. 1024, 107 L. Ed. 2d 748, 110 S. Ct. 729 (1990)*; *Morley v. Cohen, 888 F.2d 1006, 1012-13 (4th Cir. 1989)* (RICO, citing antitrust and tort cases); [25] *Restatement (Second) of Torts § 885(3)* (torts). [26] The payment by defendants of a judgment or settlement would give defendants a defense of satisfaction in any other suit in which an injured smoker/trust beneficiary might seek to recover any of the costs sought here. Defendants would not have to pay for the same medical cost damages twice.

[40]** Having found that there is no major difficulty showing that defendants' conduct caused damage to the plaintiffs trust funds, and having found that there is little risk of a double recovery, the Court turns to the third factor suggested by the *Holmes* Court: whether the defendant's conduct is sufficiently harmful to warrant deterrence. *Holmes, 503 U.S. at 269*.

The Amended Complaint alleges seriously wrongful conduct on defendants' part. Moreover, the Amended Complaint alleges extremely large damages flowed from defendants' claimed unlawful conduct.

[*786] Plaintiffs allege that for decades, defendants have known that nicotine is addictive and is the reason that people continue to smoke cigarettes and use smokeless tobacco. [27] **[**41]** Plaintiffs claim that defendants have long known that cigarettes and smokeless tobacco create addiction and causing cancer, heart disease, emphysema, cataracts, adverse pregnancy outcomes, and other diseases and death. [28] The plaintiffs say

---

> Finally, the law would be shouldering these difficulties despite the fact that those directly injured, the broker-dealers, could be counted on to bring suit for the law's vindication. As noted above, the broker-dealers have in fact sued in this case, in the persons of their SIPA trustees appointed on account of their insolvency.

503 U.S. at 273

[27] Amended Complaint at PP 2, 165, 172-189. Thus, the Amended Complaint alleges that in 1962, Sir Charles Ellis, a science advisor to the board of the parent of Brown & Williamson stated that "smoking is a habit of addiction" and that nicotine is not only a very fine drug, but the technique of administration by smoking has considerable psychological advantages. . ." Plaintiffs allege he described Brown & Williamson as being "in the nicotine rather than the tobacco industry. Amended Complaint at P 165.

Plaintiffs also allege that the general counsel of Brown & Williamson, wrote in 1963: "Moreover, nicotine is addictive. We are, then, in the business of selling nicotine, an addictive drug effective in the release of stress mechanisms." *Id.*

defendants had the means of manufacturing and marketing safer and less-addictive tobacco products, yet conspired not to do so. [29]

Despite such knowledge and ability to market safer products, plaintiffs say defendants fraudulently promised to conduct objective research and reveal accurate information as to all aspects of smoking and health and then suppressed information that cigarettes were harmful. Plaintiffs further contend the defendants manipulated nicotine content to create and maintain addiction and inhibited the development and marketing of safer, less-addictive cigarettes and smokeless tobacco. [30] **[**42]** Plaintiffs also say the defendants lied to Congress under an oath about their knowledge of the dangers and addictiveness of their products. [31]

In deciding whether this Court should dismiss this action on remoteness or proximate cause grounds, *Holmes* directs this Court to consider whether the defendant's conduct is sufficiently injurious to warrant deterrence. *Holmes, 503 U.S. at 269*. If proven, one can scarcely imagine conduct more harmful. See footnote 21.

Having found that proving the plaintiffs' damages flowed from defendants RICO violation is not unduly difficult, and having found there is little risk of double recovery for defendants purported RICO violations, and having found that, if proven, defendants conduct is sufficiently injurious to warrant deterrence, the factors described in *Holmes* suggest this Court not dismiss plaintiffs RICO counts on standing or proximate cause grounds.

B. Plaintiffs' State Law RICO Claim - Standing

In Counts XIV, XV, and XVI, the plaintiffs make claim under the Ohio equivalent of RICO, the Ohio Pattern of Corrupt Activity Act, *Ohio Rev. Code §§ 2923.31, et seq.* Plaintiffs allege that the tobacco companies have violated *§§ 2923.32(A)(1)*, *(2)* **[**43]** and *(3)* of the Ohio Corrupt Activity Act. [32]

In seeking dismissal of these state law RICO claims, defendants argue that Plaintiffs Funds cannot establish that defendants' violations of RICO proximately caused their injuries. As support for their assertion, defendants say that plaintiffs were not directly injured and cannot bring a direct action. Separately, defendants assert that plaintiffs do not allege facts showing that they suffered injury to their "business or property."

To decide whether plaintiffs allege sufficient facts to avoid dismissal on standing grounds, the Court first examines the Ohio RICO law. In doing so, this Court is mindful that determinations of proximate cause, **[*787]** standing and remoteness are particularly matters of policy. Accordingly, courts should be especially respectful of legislative decisions. Additionally, courts should consider the difficulty of proof, the potential for multiple recoveries, and the need to place some limit upon the number **[**44]** of claims flowing from a wrongful act.

With *Ohio Rev. Code § 2923.34*, the Ohio General Assembly provided for a civil action for violation of *Ohio Rev. Code § 2923.32*. [33] In providing for a civil action, the General Assembly addressed who should have standing to bring such action for triple damages and attorney's fees. In pertinent part, ***HN10***[] *§ 2923.34(F)* provides:

---

[28] Amended Complaint at PP 53-62, 109. Thus, plaintiffs allege that a 1958 memorandum at Philip Morris stated "the evidence . . . is building up that heavy cigarette smoking contributes to lung cancer either alone or in association with physical and physiological factors . . ." Amended complaint P 109.

[29] Amended Complaint at PP 147-162.

[30] Amended Complaint at PP 74, 163-221, 147-162. Thus, plaintiffs allege that internal Philip Morris reports in the 1970s stated:

> "The cigarette should be conceived not as a product but as a package. The product is nicotine. . . . Think of the cigarette pack as a storage container for a day's supply of nicotine. . . . Think of the cigarette as a dispenser for a dose unit of nicotine."

Amended Complaint at P 177.

[31] Amended Complaint at PP 63-65, 78.

[32] Amended Complaint at PP 255-291, 398-434.

> (F) In a civil proceeding under division (B) of this section, any person *directly or indirectly* injured by conduct in violation of *section 2923.32* of the Revised Code or a conspiracy to violate that section, . . . shall have a cause of action for triple the actual damages he sustained. . . .

Ohio Rev. Code § 2823.34(F) (emphasis added).

In affording a cause of action to any person directly or *indirectly* injured, the **[**45]** Ohio General Assembly departed from the language used by Congress in affording a federal cause of action under the federal RICO law. Title *18 U.S.C. § 1964* provides in pertinent part:

> (c) Any person injured in his business or property by reason of a violation of section 1962 of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

18 U.S.C. § 1964(c).

Even a cursory review shows that the Ohio General Assembly largely patterned the Ohio Pattern of Corrupt Activity Act after the federal cause of action. [34] Yet while similar, the Ohio General Assembly made obvious and significant departures. Most pertinent to the issues here, the Ohio General Assembly stated that persons injured both directly and indirectly by violations of *§ 2923.32* had standing to bring an action under Ohio's RICO law.

[46]** "In the absence of any definition of the intended meaning of words or terms used in a legislative enactment they will, in the interpretation of the act, be given their common, ordinary and accepted meaning in the connection in which they are used." *Thompson Elec., Inc. v. Bank One, Akron, N.A., 37 Ohio St. 3d 259, 264, 525 N.E.2d 761 (1988)* (quoting paragraph three of the syllabus in *Baker v. Powhatan Mining Co., 146 Ohio St. 600, 67 N.E.2d 714 (1946))*. As the Ohio Supreme Court held in *Iddings v. Bd. of Educ. of Jefferson Cty. Sch. Dist., 155 Ohio St. 287, 98 N.E.2d 827 (1951)*:

> It has been so frequently stated as to become axiomatic that the meaning and intent of a legislative enactment are to be determined primarily from the language itself. The plain provisions of a statute must control. If there is no ambiguity therein there is no occasion to construe or interpret. To construe or interpret what is already plain is not interpretation but legislation, which is not the function of courts. When the meaning is plain from the language employed, an attempt to construe it only tends to make ambiguous that which is simple and clear.

Id. at 290.

Where a legislature **[**47]** makes a difference from patterned legislation, such change **[*788]** suggests the desire to alter previous understandings: "It is axiomatic that it will be assumed that the General Assembly has knowledge of prior legislation when it enacts subsequent legislation." *State v. Frost, 57 Ohio St. 2d 121, 125, 387 N.E.2d 235 (1979)*.

In reviewing an antitrust claim in *Minnesota v. Philip Morris Inc. 551 N.W.2d 490, 495 (1996)*, the Minnesota Supreme Court reviewed similar language. There, a Minnesota ***antitrust law*** provided for a cause of action for "any person, any governmental body, or the state of Minnesota or any of its subdivisions or agencies, injured directly or

---

[33] Ohio enacted its version of RICO on June 20, 1985, creating the criminal offense of "engaging in a pattern of corrupt activity." Ohio Rev. Code § 2823.32(B)(1). These statutes took effect on January 1, 1986.

[34] *See* *State v. Thrower, 62 Ohio App. 3d 359, 369, 575 N.E.2d 863 (9th Dist. 1989)* ("The Ohio RICO statute was based on the federal RICO statute and statutes passed by other states."). Congress explicitly directed that the RICO statute be "liberally construed to effectuate its remedial purposes." *Russello v. United States, 464 U.S. 16, 27, 78 L. Ed. 2d 17, 104 S. Ct. 296 (1983)*. The Sixth Circuit also recognizes "the broad construction of RICO." *Dana Corp. v. Blue Cross & Blue Shield Mutual of Northern Ohio, 900 F.2d 882, 887 (6th Cir. 1990)*. RICO is written "in terms variously described as 'broad' . . . 'expansive' . . . and 'sweeping'." ***County of Oakland v. City of Detroit, 866 F.2d 839, 847 (6th Cir. 1989)*** (quoting *Associated General, 459 U.S. at 529*, *McCready, 457 U.S. at 472*, and *Southhaven, 715 F.2d 1079 at 1081)*.

indirectly by a violation" of the Minnesota antitrust laws. *Id.* (citing to *Minn. Stat. § 325D.57* (1994)). The Court found "that this expansive grant of standing reaches the [antitrust] injuries suffered by Blue Cross." *Id. at 496*.

In choosing to broaden standing to bring RICO actions under state law, the Ohio General Assembly decided to widen the right to bring an action. Such determination is clearly a policy matter. Making this policy decision is within the prerogative of the legislature. Courts need show extreme **[**48]** deference to the policy determinations of the popularly elected legislature.

Because the Ohio General Assembly has determined that ***HN11***[] persons indirectly injured should have standing to bring an action under the Ohio Pattern of Corrupt Activity Act, the Court finds defendants' standing argument here without merit. Accordingly, the Court denies defendants' motion to dismiss Counts XIV, XV, and XVI of the Amended Complaint. [35]

C. Plaintiffs' Federal Law RICO Claim - Standing

As noted, ***HN12***[] *18 U.S.C. § 1964(c)* gives a cause of action to "any person injured in his business or property by reason of a violation of section 1962." *18 U.S.C. § 1964(c)*. Defendants principally say that plaintiffs lack standing to bring this federal **[**49]** RICO action because they did not suffer any direct injury.

In making their defense on standing, defendants principally rely upon *Holmes*, in which the Supreme Court examined the standing requirement of the federal civil RICO provision. In *Holmes*, the Supreme Court found that Congress had modeled *§ 1964(c)* of the RICO law on the Clayton Act. The Clayton Act had been interpreted as requiring a plaintiff to show that its damages were both the direct result and the proximate result of defendants' conduct.

In *Holmes*, the Supreme Court required a RICO plaintiff to show that the defendant's unlawful conduct violation was both the "but for" and "proximate" cause of the plaintiffs injury. *Holmes, 503 U.S. at 265-269*. *See also Firestone v. Galbreath, 976 F.2d 279, 285 (6th Cir. 1992)*. To decide whether a plaintiff's RICO damages proximately resulted from defendants' conduct, the *Holmes* Court looked to the common law for guidance. In so doing, it focused primarily on one element of proximate cause: the directness of the relationship "between the injury asserted and the injurious conduct alleged." *503 U.S. at 268*. This requirement of a direct relation was held to *generally* **[**50]** preclude recovery by "a plaintiff who complained of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts." *Id. at 268-69*. Applying the Clayton Act to RICO, the *Holmes* Court found that the plaintiff's claims were insufficiently direct to show proximate causation. *Id. at 267-68*. [36]

[51]** **[*789]** However, in *National Organization for Women, Inc. v. Scheidler, 510 U.S. 249, 127 L. Ed. 2d 99, 114 S. Ct. 798 (1994)*, the Supreme Court broadly afforded standing to health care clinics to bring a claim that defendants threatened or used actual force, violence, or fear against clinic employees, doctors, and patients. Alleging that defendants conspired to use intimidation against doctors and patients, the plaintiff health organizations made viable claims under RICO.

---

[35] Plaintiffs claim that they were directly injured by defendants conduct. Having determined that plaintiffs have standing under the Ohio Corrupt Activity Act even if they were not directly injured, the Court need not reach this issue with regard to Counts XIV, XV, and XVI of the Amended Complaint.

[36] In *Holmes*, the Supreme Court held that the plaintiff, Securities and Investor Protection Corporation ("SIPC"), had not met the proximate cause requirement and thus had no standing to bring suit under RICO. SIPC is a private nonprofit corporation, created pursuant to the Securities Investors Act, which most broker-dealers are required by law to join and which has a statutory duty to advance funds to reimburse the customers of member broker-dealers that are unable to meet their obligations. *503 U.S. at 261*.

SIPC brought a civil RICO action alleging that former members of a brokerage firm conspired in a stock manipulation scheme. SIPC said this scheme caused damages of nearly $ 13 million representing monies that SIPC advanced to cover claims. *See also Brokerage Concepts, Inc. v. U.S. Healthcare, Inc., 140 F.3d 494 (3rd Cir. 1998)*.

In *NOW*, the Court found standing, though the intimidating acts were largely directed against patients and employee physicians. Thus, in *NOW*, the Supreme Court allowed clinics to make claims for damages resulting from acts directed at others.

Lower courts echo the Supreme Court in finding that standing to bring a RICO claim is not always limited to those directly injured. [37] *See Khurana v. Innovative Health Care Sys., Inc., 130 F.3d 143 (5th Cir. 1997)* (to establish standing under RICO subsection that provides for treble damages for injuries to business or property, the plaintiff must show (1) RICO violation, (2) injury to business or property, and (3) injury proximately caused by RICO violation); *Mid* **[**52]** *Atl. Telecom, Inc. v. Long Distance Servs., Inc., 18 F.3d 260, 263 (4th Cir. 1994)* (rejecting adoption of "a rule that only injuries suffered by the immediate victim of a predicate act satisfy the 'by reason of requirement of *§ 1964(c)*'"); *Zervas v. Faulkner, 861 F.2d 823, 833 (5th Cir. 1988)* ("requirement that the nexus between the injury and a predicate act be 'direct' may . . . be overly restrictive").

[53]** In *Mid Atlantic*, plaintiff telephone company accused one of its competitors of violating RICO by defrauding its customers with fictitious charges, enabling it to charge lower rates to entice new subscribers. The plaintiff company alleged that it lost revenues from subscribers whom the competitor defrauded into accepting the fraudulent lower rates of the defendant company. The Fourth Circuit rejected the argument that the plaintiff company lacked standing because the customers were the directly injured parties and its alleged misconduct proximately injured only them. [38]

[54]** ***HN13***[] To decide whether the plaintiff has standing to make claim under RICO, the Court must examine whether others are positioned to make the same claims, whether the plaintiff will have difficulty showing its damages flowed from the defendant's conduct, whether there is a risk of double recovery, and, importantly, whether the defendant's conduct is sufficiently harmful to warrant deterrence. *Holmes, 503 U.S. at 269*.

[*790] As described above, the Court finds sufficient standing for this case to go on. First, under RICO, participant smokers cannot make claim for medical bills. The medical expenses incurred by plaintiffs represent damage to the business and property of the Plaintiffs Funds, not to individual smokers. *See Steele v. Hospital Corp. of America, 36 F.3d 69, 70 (9th Cir. 1994)*. In *Steele*, the Ninth Circuit examined a RICO claim brought by hospital patients

---

[37] Defendants suggest support from *Firestone v. Galbreath, 976 F.2d 279 (6th Cir. 1992)*. The case is inapposite. In *Firestone*, beneficiaries of a trust complained that the trust corpus was reduced by theft during another beneficiary's life. The Sixth Circuit found that the decedent's estate had standing to bring an action but the children as beneficiaries did not. Important to this determination, the Sixth Circuit found that under Ohio law the executor, not the heirs, have the right to bring the estate's causes of action. Ohio does not permit heirs to bring these claims for their own, individual, benefit. *976 F.2d at 283*. The Sixth Circuit further found that any property was removed before death. Ohio law grants no enforceable rights to potential takers under a will before the testator's death. The *Firestone* plaintiffs had no vested interests until death. *976 F.2d at 284-285*.

[38] The Fourth Circuit explained its finding:

> LDS and Rice contend that their customers were the only victims of the alleged fraud and only those customers can assert their rights. They further maintain that any injury to Mid Atlantic stemmed from the independent intervening acts of Mid Atlantic customers after LDS's solicitations. It follows, the appellees argue, that the solicitations could not have been the proximate cause of Mid Atlantic's injuries.
>
> We are unable to agree. In *Brandenburg, 859 F.2d 1179 at 1189*, it was recognized that "the legal cause determination is properly one of law for the court, taking into consideration such factors as the foreseeability of the particular injury, the intervention of other independent causes, and the factual directness of the causal connection." *Brandenburg* also explained that proximate causation requires a nexus between the proscribed acts and the injuries. *Id. at 1187*. We did not, however, intend to establish a rule that only injuries suffered by the immediate victim of a predicate act satisfied the "by reason of" requirement of *§ 1964(c)*.

Mid Atlantic, 18 F.3d at 263.

complaining of over billing. Because insurance had paid the charges, the Ninth Circuit found that the insurer had suffered the damages, not the patient:

> The district court explained that it was the insurance companies and not the patients themselves who suffered financial loss from the allegedly fraudulent health **[**55]** care billings. . . . It is not enough that the patients show that their insurance company had to pay out more than it otherwise would have without the alleged RICO violation. This does not constitute financial loss to them.

36 F.3d at 70.

Next, the plaintiffs do not seek personal injury damages, such as pain and suffering or wrongful death damages. Following *Steele*, the Court finds that individual smokers cannot make claim for medical expenses incurred by insurers or trust funds. Because others cannot make claims under RICO for these damages, the Court finds no others are positioned to make the same claims. There is scant reason to fear that defendants will be subjected to double recovery.

While defendants say the plaintiffs will have difficulty showing that their damages flowed from the defendants' conduct, the Court finds this argument insufficient to stop this action at this stage. While disputed, the Court finds that plaintiffs make plausible claims that defendants' conduct damaged them in their business and property.

Finally, plaintiffs allege conduct that, if believed, has had extremely deleterious consequences upon plaintiffs. Having alleged such consequences, **[**56]** the Court finds the Amended Complaint avers conduct sufficiently harmful as to warrant deterrence. *Holmes, 503 U.S. at 269*.

D. Plaintiffs' State and Federal Law RICO Claim - Damage to Property

Beyond arguing for dismissal of the Ohio Pattern of Corrupt Activity Act claims for standing reasons, defendants say plaintiffs cannot bring this action because plaintiffs cannot allege the defendants damaged them in their business or property. Rather, defendants suggest the plaintiffs' action under the Ohio RICO law is to recover for damages resulting from physical injury.

HN14[] Only a person "injured in his business or property" [39] may recover damages under RICO. 18 U.S.C. *§ 1964(c)*. RICO excludes from its ambit damages for personal injury. [40] Claims for personal property injuries are also not cognizable under RICO. *See, e.g., Genty v. Resolution Trust Corp., 937 F.2d 899, 918 (3rd Cir. 1991)*; *Drake v. B.F. Goodrich Co., 782 F.2d 638, 644 (6th Cir. 1986)*. "The plaintiff only has standing if, and can only recover to the extent that, he has been injured in his business or property by the conduct constituting the violation." **[*791]** *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 496, **[**57]** 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985)*.

---

[39] The "injury to business or property" language in *18 U.S.C. § 1964(c)* was taken from Section 4 of the Clayton Act, *15 U.S.C. § 15*. The United States Supreme Court has held that this language has "restrictive significance" in that "it would, for example, 'exclude personal injuries suffered.'" *Reiter v. Sonotone Corp., 442 U.S. 330, 339, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979)*. Case law interpreting the Clayton Act has been persuasive and heavily relied upon by courts addressing issues involving RICO. *See Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 267-68, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*.

[40] The Sixth Circuit has held that economic losses resulting from physical injuries are not damages to "business or property" within the meaning of RICO:

> Whether [the plaintiff] can show a financial loss does not, by definition, establish that she has suffered a business or property injury within the meaning of *§ 1964(c)*. Most personal injuries -- loss of earnings, loss of consortium, loss of guidance, mental anguish, and pain and suffering, to name a few -- will entail pecuniary consequences. Perhaps the economic aspects of such injuries could, as a theoretical matter, be viewed as injuries to "business or property" but engaging in such metaphysical speculation is a task best left to philosophers, not the federal judiciary.

Doe v. Roe, 958 F.2d 763, 770 (7th Cir. 1992).

[58]** The requirement that a plaintiff suffer an injury to its "business or property" means that the plaintiff must show a proprietary or economic type of damage. *See, e.g., Agency Holding Corp. v. Malley-Duff & Associates, Inc., 483 U.S. 143, 151, 97 L. Ed. 2d 121, 107 S. Ct. 2759 (1987)* ("Both RICO and the Clayton Act are designed to remedy economic injury by providing for the recovery of treble damages, costs, and attorney's fees.").

In the instant case, the Court finds that plaintiffs have sufficiently alleged injury to their "business or property" to withstand dismissal under *Fed. R. Civ. P. 12(b)(6)*. Plaintiffs allege that the defendants' conduct has required them to incur significant costs and expenses attributable to tobacco-related diseases. While related, the Court finds that plaintiffs' injuries are distinct from the personal injury claims of smokers. Plaintiffs have sufficiently stated RICO's injury element.

V. Plaintiffs' antitrust claims

In Counts IV and X of the Amended Complaint, the plaintiffs make antitrust claims under federal and state law. [41] In their Amended Complaint, plaintiffs allege that defendants have conspired to restrain trade and inhibit competition **[**59]** by suppressing the development and marketing of safer, less addictive tobacco products and by agreeing in furtherance of this conspiracy to conceal information concerning the negative health attributes of their products. Plaintiffs say that the defendants have restrained competition in the market for safer tobacco products. Because of this purported restraint, plaintiffs allege the Plaintiffs Funds incurred substantial costs to treat the tobacco-related illnesses of their participants.

In their motion to dismiss, defendants argue that the plaintiffs have suffered no antitrust injury, that the plaintiffs lack antitrust standing, and that the plaintiffs fail to adequately allege an antitrust violation.

Although the federal and state antitrust statutes are worded slightly differently, the goals are the same. Both condemn combinations **[**60]** having for their purpose restraints on trade or commerce. Ohio courts interpret the Valentine Act in light of federal judicial construction of *Section 1* of the Sherman Act. *C.K. & J.K., Inc. v. Fairview Shopping Ctr. Corp., 63 Ohio St. 2d 201, 204, 407 N.E.2d 507 (1980)*. See also *Re/Max Intern., Inc. v. Realty One, Inc., 924 F. Supp. 1474 (N.D. Ohio 1996)*. A review of defendants' arguments regarding the Sherman Act will encompass the Ohio claims as well. *See Richter Concrete Corp. v. Hilltop Basic Resources, 547 F. Supp. 893, 920 (S.D. Ohio 1981)*, *aff'd*, *691 F.2d 818 (6th Cir. 1982)* (plaintiff's failure to prove its claims under Sherman Act was a failure to prove claim under Valentine Act).

A. Antitrust injury

Defendants say that plaintiffs have not suffered an antitrust injury. Congress intended the Sherman Act to protect only against injury to the competitive process, not as a substitute for common law tort claims. Defendants argue that the increased health care costs the Funds claim are not the type of injury to "business or property" for which the antitrust acts permit recovery.

HN15[] To assert a claim for damages under the antitrust statutes, one must be injured in **[**61]** his "business or property." *See 15 U.S.C. § 15(a)*. A plaintiff must allege specific "antitrust injury." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. An injury, "although causally related to an antitrust violation, nevertheless will not qualify as an 'antitrust injury' unless it is attributable to an anti-competitive aspect of the practice under scrutiny." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*.

In *Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*, the Supreme Court found that limits must be placed upon those who might make claim under the antitrust laws:

[41] Count IV is based on a violation of the Sherman Act, *15 U.S.C. § 1, et seq.* Count X is based on claimed violations of the Valentine Act, Ohio Rev. Code § 1331, *et seq.*

> **[*792]** An antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy; but "despite the broad wording of § 4 there is a point beyond which the wrongdoer should not be held liable." . . . It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property. . . . **[**62]** Indeed, the unrestrictive language of the section, and the avowed breadth of the congressional purpose, cautions us not to cabin § 4 in ways that will defeat its broad remedial objective. . . . The courts are thus forced to resort to an analysis no less elusive than that employed traditionally by courts at common law with respect to the matter of "proximate cause." In applying that elusive concept to this statutory action, we look (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and (2), more particularly, to the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4.

457 U.S. at 476-78 (citations omitted).

In part, the Amended Complaint claims the defendants conspired to stop the development of safer cigarettes. Private standard-setting associations "have economic incentives to restrain competition and that the product standards set by such associations have a serious potential for anti-competitive harm. Agreement on a product standard is, after all, implicitly an agreement not **[**63]** to manufacture, distribute, or purchase certain types of products. Accordingly, private standard-setting associations have traditionally been objects of antitrust scrutiny." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 500, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)* (citations omitted). Because the stifling of competition in product quality is of the type that Congress designed the antitrust laws to address, the Court finds that defendants' arguments on this issue fail.

Defendants also raise the separate argument that this Court should dismiss plaintiffs' antitrust claims in the Amended Complaint because plaintiffs cannot show proximate relationship to defendants' conduct. In *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*, the Supreme Court examined whether the plaintiff-unions had sufficiently alleged antitrust injury. To decide whether the plaintiffs there had sufficiently alleged antitrust injury, the *California* Court required the plaintiff to allege both injury in fact and a proximate relationship. The Supreme Court identified factors used for this determination: **[**64]**

> Other relevant factors -- the nature of the Union's injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the Union's alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy -- weigh heavily against judicial enforcement of the Union's antitrust claim.

459 U.S. at 545.

As previously discussed regarding defendants' motion to dismiss plaintiffs' RICO claim, the Court finds sufficient allegations to support a finding of proximate causation as for the antitrust injuries. The Court finds little potential for duplicative recovery or apportionment of damages. As described, cigarette smoking fund beneficiaries do not have standing to bring claim for personal injuries under the Clayton Act. Under that law, beneficiaries are restricted to bringing claims for injuries to their business or property. There is little risk of double recoveries against defendants.

For similar reasons, there is little difficulty with an apportionment of damages. There are no more direct victims of the alleged conspiracy who have standing to bring **[**65]** claims under the antitrust laws.

Separately, the defendants argue that plaintiffs' claims are for personal injuries and that plaintiffs cannot make antitrust claim for such injuries. *See* *Reiter v. Sonotone Corp., 442 U.S. 330, 339, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979)* (while consumers cannot make claim for personal injuries under **[*793]** § 4 of the Clayton Act, they can make claim for having to pay a higher price for goods purchased for personal use because of antitrust violations).

HN16[] Section 4 of the Clayton Act allows civil recovery of treble damages by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15(a)*. As in the RICO context, the requirement that a plaintiff suffer an injury to his "business or property" means that the plaintiff must show a proprietary or economic type of damage. Here, plaintiffs allege that defendants' conduct has resulted in a substantial increase in the cost of medical care for the participants and beneficiaries. Plaintiffs say the defendants have required them to bear these increased costs.

To make a claim under § 4 of the Clayton Act, a plaintiff need not prove that the **[**66]** antitrust violation was "the sole or 'but for' cause of his injury. It is enough that the challenged conduct is a material cause of that injury. '[A] plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury. . . .'" *Allied Accessories & Auto Parts Co. v. General Motors Corp., 901 F.2d 1322, 1325 (6th Cir. 1990)* (quoting *Zenith Corp. v. Hazeltine, 395 U.S. 100, 114 n. 9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969))*.

Plaintiffs allege their tobacco-related health care costs were greatly increased by the defendants' anti-competitive restriction of product choice and suppression of product information. [42] The Court finds that plaintiffs sufficiently allege an antitrust conspiracy that resulted in proprietary or economic injury to plaintiffs' "business or property."

B. Standing to Assert Antitrust Claims

Even if plaintiffs can show injury under Section 4 of the Clayton Act, defendants say the plaintiffs do **[**67]** not have standing to make antitrust claims. Antitrust standing is an independent requirement that must be satisfied to obtain legal or equitable relief in an antitrust action. *Cargill, Inc. v. Monfort, Inc., 479 U.S. 104, 110 n.5, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. The Court finds this argument fails, largely for the reasons previously discussed.

In *Blue Shield v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*, the Supreme Court noted that "despite the broad wording of § 4 there is a point beyond which the wrongdoer should not be held liable." In quoting from Judge Andrews' dissent in *Palsgraf*, the *McCready* court limited the right to make antitrust claims to those proximately injured: "What we do mean by the word 'proximate' is, that because of convenience, of public policy, of a rough sense of justice, the law arbitrarily declines to trace a series of events beyond a certain point." *Id. at 477*.

As previously discussed, ***HN17***[] a court determining antitrust standing must evaluate (1) the nature of the damages sought, (2) whether the injury is of the type that the antitrust laws were intended to remedy, (3) the risk of duplicative recoveries of **[**68]** complex damages apportionment, and (4) the presence of more direct victims of the antitrust violation who can bring claim. *Associated Gen. Contractors, Inc., 459 U.S. at 537-45*.

The Court finds that plaintiffs have standing to make antitrust claims. The Amended Complaint alleges economic injury to the plaintiffs' businesses through expenses increased by collusion to stop the introduction of safer cigarettes. The Court finds this to be the type of injury the antitrust laws were directed to remedy. The Court also finds little risk of duplicative recovery or complex damage apportionment. Any such risk is obviated by defendants' rights to set off amounts otherwise paid in damages and settlement for the same injuries. Finally, the Court finds no more directly injured victims who could bring antitrust claims, first, because the antitrust laws do not allow an action for personal injury, and second, because plaintiffs-funds are better positioned to make such claims.

For these reasons, the Court denies defendants' motion to dismiss Counts IV and X of the Amended Complaint.

[*794] VI. Voluntarily undertaken duty

In Counts VI and VII, plaintiffs make claims for breach of voluntarily undertaken **[**69]** duties. [43] Defendants seek dismissal of these causes of action. In seeking dismissal, defendants contend that the plaintiffs must allege physical harm and that they have not. Defendants also seek dismissal on grounds that the plaintiffs' economic losses are not recoverable in this action. Further, defendants say that their conduct did not increase the risk of harm to the Funds.

---

[42] Amended Complaint at P 300.

[43] In Count VI, plaintiffs allege an intentional breach of a voluntarily undertaken duty. In Count VII, plaintiffs allege a negligent breach of a voluntarily undertaken duty.

As to these causes of action, plaintiffs claim that defendants voluntarily agreed to undertake studies regarding the effect of tobacco products and promised to reveal all material facts about tobacco use, health and addiction uncovered by their research. In 1954, defendants published the "Frank Statement." With that statement, defendants promised to take "an interest in people's health as a basic responsibility," and "pledged aid and assistance to the research effort **[**70]** into all phases of tobacco use and health." [44] Beyond the 1954 "Frank Statement," plaintiffs say defendants otherwise represented that they would monitor and report on the health consequences of smoking.

HN18[] Under Ohio law, one who gratuitously undertakes a voluntary act assumes the duty to be careful under the circumstances. *Seley v. G. D. Searle & Co., 67 Ohio St. 2d 192, 202, 423 N.E.2d 831 (1981)*; *Briere v. Lathrop Co., 22 Ohio St. 2d 166, 258 N.E.2d 597 (1970)*; Prosser on Torts § 56, at 343-348.

The *Restatement (Second) of Torts § 323* describes a cause of action for a voluntarily undertaken duty. That section provides:

> Negligent Performance of Undertaking to Render Services
>
> One who undertakes, gratuitously **[**71]** or for consideration, to render services to another which he should recognize as necessary for the protection of the other's person or things, is subject to liability to the other for physical harm resulting from his failure to exercise reasonable care to perform his undertaking, if
> (a) his failure to exercise such care increases the risk of such harm, or
> (b) the harm is suffered because of the other's reliance upon the undertaking.

Restatement (Second) of Torts § 323, ch.12 (1965).

Although the Ohio Supreme Court has not expressly adopted *§ 323 of the Restatement,* it has been cited with approval by the Ohio Supreme Court and several courts of appeals of this state. *See, e.g., Seley, 67 Ohio St. 2d at 202*; *Briere, 22 Ohio St. 2d at 172*; *Wissel v. Ohio High Sch. Athletic Ass'n, 78 Ohio App. 3d 529, 605 N.E.2d 458 (1st Dist. 1992)*; *King v. Lindsay, 87 Ohio App. 3d 383, 622 N.E.2d 396 (10th Dist. 1993)*.

HN19[] Under Ohio law, a claim for breach of a voluntarily undertaken duty must allege physical injury. In *Hinton v. United States Postal Service, 68 F.3d 474* (TABLE) (6th Cir. 1995) (unpublished), the court described voluntary duty under Ohio law:

> Under **[**72]** the Good Samaritan doctrine, "one who voluntarily assumes a duty must perform that duty with reasonable care." *Thomas v. Tennessee Valley Authority, 769 F.2d 367, 370 (6th Cir. 1985)*. However, "recovery under the Good Samaritan Doctrine is limited to physical harm." *Shaner v. United States, 976 F.2d 990, 994 (6th Cir. 1992)*, *cert. denied*, *507 U.S. 1051, 113 S. Ct. 1944, 123 L. Ed. 2d 650 (1993)* (citations omitted).

Hinton, 68 F.3d at 474.

Plaintiffs have previously said that "plaintiffs do not seek to recover for tobacco-related personal injuries suffered by Fund participants; rather, plaintiffs' claims are for economic injuries." [Doc. 63, at 4-5]. In the Amended Complaint, plaintiffs have disclaimed **[*795]** seeking damages for personal injuries.

Recognizing that the Amended Complaint does not allege physical harm, plaintiffs suggest that they only seek to recover for intentional breach of a voluntarily assumed duty, not for a negligent breach of an assumed duty. This argument is disingenuous. Count VII clearly states a cause of action for "Negligent Breach of Special Duty."

[44] Defendants publicly disseminated the "Frank Statement," which appeared in 448 newspapers across the nation in 258 cities. According to Defendants, this was done because "people are entitled to know where we stand on this matter and what we intend to do about it." Amended Complaint at P 105.

Moreover, the Court finds that the attempt to characterize the claim as an intentional **[**73]** tort does not change the elements of the cause of action. [45]

Given that plaintiffs do not allege physical harm or personal injury damages, the Court concludes that plaintiffs fail to state a cause of action for breach of voluntarily undertaken duties. Therefore, the Court grants defendants' motion to dismiss Counts VI and VII of the Amended Complaint.

VII. Conspiracy claim

Defendants move to dismiss Count XI of the Amended Complaint. **[**74]** In that count, plaintiffs seek to state a claim for conspiracy. As grounds for its motion to dismiss Count XI, defendants say that conspiracy, of itself, furnishes no cause of civil action.

HN20[] In Ohio, civil conspiracy is "a malicious combination of two of more persons to injure another in person or property, in a way not competent for one alone, resulting in actual damages." *Kenty v. Transamerica Premium Ins. Co., 72 Ohio St. 3d 415, 419, 650 N.E.2d 863 (1995)* (citing *LeFort v. Century 21-Maitland Realty Co., 32 Ohio St. 3d 121, 126, 512 N.E.2d 640 (1987))*. See also *Gosden v. Louis, 116 Ohio App. 3d 195, 218, 687 N.E.2d 481 (9th Dist. 1996)*.

An actionable conspiracy must be based upon an actionable underlying tort. *Stiles v. Chrysler Motors Corp., 89 Ohio App. 3d 256, 266, 624 N.E.2d 238 (6th Dist. 1993)*; *Miskinis v. Chester Twp. Park Dist., 112 Ohio App. 3d 466, 472, 679 N.E.2d 39 (11th Dist. 1996)* ("A claim of civil conspiracy requires the plaintiff to prove a malicious combination of two or more persons causing injury to person or property and the existence of an unlawful act independent from the actual conspiracy.").

In seeking dismissal of plaintiffs' conspiracy claim, the defendants **[**75]** argue that all of plaintiffs' underlying causes of action should fail. Defendants say that if all plaintiffs' other causes of action fail, then plaintiffs' conspiracy claim must also fail. Although defendants' argument is logically correct, it is inapplicable here. The Court has found that plaintiffs state causes of action under RICO, the Ohio Corrupt Activity Act, and federal and state antitrust laws. Having stated such causes, the Court concludes that plaintiffs' have sufficiently stated a cause of action for civil conspiracy.

Accordingly, the Court denies defendants' motion to dismiss Count XI of the Amended Complaint.

For the foregoing reasons, the Court grants defendants' motions to dismiss plaintiffs' claims for breach of voluntary undertaken duty averred in Counts VI and VII of the Amended Complaint. The Court denies defendants' motions to dismiss plaintiffs' remaining claims under federal RICO (Counts I, II, III), under the Ohio Corrupt Activity Act (Counts XIV, XV, and XVI), for antitrust (Counts IV and X), and for civil conspiracy (Count XI).

IT IS SO ORDERED.

Dated: September 10, 1998

Judge James S. Gwin

United States District Judge

End of Document

---

[45] Plaintiffs also cite to authority from other jurisdictions to support their claim that physical injury is not required. *See, e.g., City and County of San Francisco v. Philip Morris, Inc., 957 F. Supp. 1130, 1142-43 (N.D. Cal. 1997)*; *State, by Humphrey v. Philip Morris Inc., 551 N.W.2d 490 (Minn. 1996)*. The Court finds the discussion of voluntarily assumed duty fails to directly speak to whether a showing of physical harm is required. But more importantly, clear Ohio authority teaches that physical harm is an element of a claim for breach of a voluntarily assumed duty.

HN1[] **Summary Judgment, Evidentiary Considerations**

Summary judgment is appropriate where admissible evidence fails to demonstrate a genuine issue of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. If the nonmoving party bears the burden of persuasion at trial, the moving party must show that the nonmoving party's evidence is insufficient to carry that burden. The nonmoving party can create a genuine issue of material fact by pointing to evidence in the record sufficient to support a jury verdict in its favor at trial. Alternatively, the burden on the moving party may be discharged by showing that there is an absence of evidence to support the nonmoving party's case. Since a complete failure of proof concerning an essential element on which a party bears the burden of proof at trial establishes that the moving party is entitled to a judgment as a matter of law, the nonmoving party must establish the existence of every element essential to its case. Such evidence must be significantly probative and more than merely colorable. The nonmoving party is afforded the benefit of all reasonable inferences drawn from the record.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN2[] **Summary Judgment, Opposing Materials**

Once the moving party has satisfied its burden, the nonmoving party is required by *Fed. R. Civ. P. 56(e)* to establish that there remains a genuine issue of material fact. The nonmovant may not rest upon mere allegation or denials of his pleadings, but must set forth specific facts showing that there is a genuine issue for trial. A fact is material if it might affect the outcome of the suit under the governing law, and is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. In determining whether a nonmovant has established the existence of a genuine issue of material fact requiring a jury trial, the evidence of the nonmovant must be believed and all justifiable inferences are to be drawn in its favor. Whether an inference is justifiable, however, depends on the evidence adduced. An inference based upon speculation or conjecture does not create a material factual dispute sufficient to defeat summary judgment. Likewise, simply showing that there is some metaphysical doubt as to the material facts does not establish a genuine issue for trial.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Governments > Legislation > Statutory Remedies & Rights

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN3[] **Antitrust & Trade Law, Exemptions & Immunities**

The Noerr-Pennington doctrine was developed by the Supreme Court in recognition of the fact that the right to petition the government for redress of grievances, a right protected by the *First Amendment*, generally trumps the statutory right of competitors to be free from unfairly anticompetitive conduct under ***antitrust law***. Those who petition government for redress are generally immune from antitrust liability, even though the purpose of that petitioning may be to restrain competition.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN4[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine does not insulate from antitrust attack conduct that is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor.

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN5[] **Sanctions, Baseless Filings**

The Supreme Court outlines a two-part definition of "sham" litigation. First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process, as opposed to the outcome of that process, as an anticompetitive weapon. This two-tiered process requires the plaintiff to disprove the challenged lawsuit's legal viability before the court will entertain evidence of the suit's economic viability.

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN6[] **Sanctions, Baseless Filings**

Probable cause requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication. Once probable cause for defendant's legal actions is shown, the antitrust plaintiff fails as a matter of law to satisfy the objective prong of the sham exception.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Variances

HN7[] **Zoning, Ordinances**

Under Pennsylvania law, as to specific requirements of a zoning ordinance, the applicant has the persuasion burden, as well as the initial evidence presentation burden. This rule means the applicant must bring the proposal within the specific requirements expressed in the ordinance for the use sought as a special exception. Once the applicant has made that showing, the objector has the burden of showing the proposal to be detrimental to public health, safety, and welfare. If the applicant's burden is not met, the special exception cannot be granted.

Opinion

[2] [*423]** ***MEMORANDUM OPINION AND ORDER***

D. Brooks Smith, District Judge.

This is an antitrust case in which plaintiffs, who wished to and ultimately did build and operate a Hampton Inn hotel in Somerset, Pennsylvania, have sued various defendants who operated existing, competing hotels in that city. The gravamen of plaintiffs' claims is that defendants, through the use of a trade group known as the Somerset Hotel Association, conspired to impede the construction of the Hampton Inn by interposing patently meritless legal challenges to plaintiffs' positions before Somerset Borough's zoning and planning commissions, and before the courts. Defendants have responded with motions for summary judgment, asserting that the *Noerr-Pennington* doctrine insulates their conduct from antitrust attack, regardless of its motivation. Because the undisputed facts of record demonstrate that defendants' legal challenges were not objectively baseless as contemplated by *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)*, I will grant the motions and enter summary judgment for defendants.

I.

The material facts, viewed **[**3]** in the light most favorable to plaintiffs, are as follows. In January 1995, Virginia Inn Management ("VIM") contracted to purchase a parcel of land adjacent to an existing truck stop located just off the Somerset Turnpike exit; on this property they hoped to construct their Hampton Inn. Dkt. no. 51, Exh. 1. This tract of land then served as extra parking space for the truck facility and was zoned such that a hotel could be build upon it.

[1] The design of VIM's Hampton Inn, however, was such that a special height exception would have to be obtained from the zoning board, in addition to a general site plan approval from the planning commission.

VIM's proposed hotel was to be the first major overnight lodging facility built in Somerset in many years. As such, it was viewed **[*424]** with no small amount of consternation by its competitors, who in response, formed the **[**4]** Somerset Hotel Association to represent their common interests. *Id.*, Exh's 3-4. The association decided to send representatives to the public meetings and hearings concerning the proposed Hampton Inn, expressing opposition to the project. *Id.*, Exh. 7.

The first of these hearings occurred on April 4, 1995 before the Somerset Zoning Hearing Board. *See id.*, Exh. 12. VIM's proposed design height for its five-story Hampton Inn was fifty-five feet, ten feet higher and two more floors than normally permitted under the local zoning ordinance. *Id.* at 5; *see also id.*, Exh. 11, at 6 (table). That ordinance, however, provided for a special height exception to be granted upon a showing by VIM that the extra height would not "substantially affect adversely the uses of adjacent and neighboring property." *Id*, Art. 12, § 4.

At the zoning hearing, VIM's counsel put evidence on the record that was intended to show that the extra ten feet would not adversely affect adjoining properties. This evidence took the form of a plan view of the site, photographs of other Hampton Inns, testimony from two engineers retained by VIM, and the testimony of the owner of the truck stop (who **[**5]** was also the seller of the land). *Id.* Exh. 12, at 3-12, 16-22. VIM, however, did not perform any property-by-property analysis of how its proposed use would affect the views and signage of the adjoining businesses, nor did it provide any front, rear or side elevation drawings of the proposed hotel. *See id.* at 44-53.

For their part, defendants offered no evidence that the extra building height would adversely affect the uses of their properties, or, for that matter, on any other issue. Instead they argued concerning the increase in vehicle traffic that they believed would accompany the new Hampton Inn, and the possibility, feared by local business owners, that the Pennsylvania Turnpike Commission would consider relocating the Somerset interchange should there be an increase in congestion and vehicular accidents. *Id.* at 22-26, 31-32. Defendants then moved to continue the proceedings while they developed their rebuttal evidence. *Id.* at 47-50.

Defendants' objections, although vociferous, went to the issue of whether a hotel should be permitted to be built at the site *vel non*, not whether an extra ten feet in its height would adversely affect their properties. Because **[**6]** VIM had the right, under the zoning ordinance, to build a hotel on the site, defendants' contentions were immaterial to the board's decision, and the borough solicitor so informed the board members at the hearing. Thus, the board voted, 3-1, to grant the special exception, with one member dissenting because she felt that VIM's evidence was insufficient to give her a sense of how the hotel would affect the surrounding properties. *Id. at 53, 65*. No action was taken on the motion for continuance.

On May 2, 1995, defendant Somerset Hotel Association filed a land use appeal in the court of common pleas challenging the zoning board's decision to grant the special height exception. *Id.*, Exh. 33. One basis of this appeal was that VIM had failed to come forward with sufficient evidence that its hotel's additional ten feet in height would not have an adverse effect on the adjoining property owners. *Id.*

On May 25, the Somerset Borough Planning Commission held a public meeting to consider VIM's proposed site plan for its hotel. *Id.*, Exh. 32. Again, defendants argued, without presenting evidence, that the hotel would increase traffic around the Somerset interchange, and that approval **[**7]** be delayed until a traffic study could be conducted, as previously requested by the Turnpike Commission. *Id.* In this proceeding, however, the zoning ordinance required the planning commission to examine the project's effect on internal and external traffic patterns in making its determination whether to approve the site plan. Dkt. no. 46, Exh. B., §§ 4(1)(e), 4(3). Nevertheless, the borough solicitor instructed the commissioners that they could not legally require a traffic impact study or consider any traffic effects beyond the borders of the site itself. Dkt. no. 51, Exh. 32. The commission accordingly approved the site

[1] The land was zoned M-1. Dkt. no. 51, Exh. 15. A hotel may be lawfully be constructed in such a district. *See id.*, Exh. 11, Art. 5, §§ 8.2(7), 5.2(10).

plan, contingent on the appeal of the zoning exception being resolved in **[*425]** VIM's favor. *Id.* Defendants appealed this decision to the court of common pleas as well.

Both appeals were consolidated and on August 22, 1995, defendants filed motions to open the record and present additional evidence, although initially defendants had no offer of proof in support of the motions. *See id.*, Exh. 35, at 3, 39. Eventually, however, defendants' evidence was confined solely to the position of the Turnpike Commission (expressed by one of its officials) that traffic around **[**8]** the Somerset interchange was a real concern. *Id.* at 44-45. This default, combined with the fact that the evidence was available to defendants at the time of the planning commission hearing, led the motions judge to decline to open the record, without prejudice. *Id.*, Exh. 36.

Thus, both appeals proceeded on their merits, the zoning appeal on the theory that VIM had failed to produce sufficient evidence that its hotel's extra height would not adversely affect neighboring properties, and the planning appeal on the contention that the commission improperly failed to comply with the ordinance's requirement that the hotel's effect on external traffic patterns be considered. Defendants renewed their motion to open the record, but their proposed witness, a representative of the Turnpike Commission, would have testified only that the Commission thought that a traffic study *should* be performed, but not that the Turnpike Commission had the power to *require* a study or otherwise delay the project. *Id.*, Exh. 39, at 50. Given this limited testimony, defendants ultimately decided not to even offer it. *See id. at 50*. On October 4, 1995, the court denied both appeals, *Id.*, **[**9]** Exh. 40; defendants did not appeal to the Commonwealth Court.

As a result of defendants' ultimately unfounded opposition to the Hampton Inn project, defendants were unable to begin construction by the time winter set in in 1995, and were forced to wait until the Spring of 1996. *Id.*, Exh. 20. Plaintiffs estimate that they were delayed a total of 228 days because of the actions of the defendants. *Id.*

Plaintiffs filed suit on April 2, 1996, alleging that defendants engaged in an antitrust conspiracy in violation of the Sherman Act, as well as civil conspiracy, wrongful use of civil process, abuse of process and intentional interference with contractual and prospective business relationships under state law. Dkt. no. 1. On March 27, 1997, I denied defendants' motions to dismiss the complaint under *Fed. R. Civ. P. 12(b)(6)*, dkt. no. 27. Answers and summary judgment motions were subsequently filed. Discovery is complete, and those motions are now ripe for adjudication.

II.

HN1[] Summary judgment is appropriate where admissible evidence fails to demonstrate a genuine issue of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. If the **[**10]** nonmoving party bears the burden of persuasion at trial, the moving party must show that the nonmoving party's evidence is insufficient to carry that burden. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. The nonmoving party can create a genuine issue of material fact by pointing to evidence in the record sufficient to support a jury verdict in its favor at trial. *Brewer v. Quaker State Oil Refining Corp., 72 F.3d 326, 330 (3d Cir. 1995)*. Alternatively, "the burden on the moving party may be discharged by showing . . . that there is an absence of evidence to support the nonmoving party's case." *Celotex, 477 U.S. at 325* (internal quotation marks omitted). "Since a complete failure of proof concerning an essential element," *id. at 323-24*, on which a party bears the burden of proof at trial establishes that the moving party is "entitled to a judgment as a matter of law," the nonmoving party must establish the existence of every element essential to its case. *Id.* Such evidence must be significantly probative and more than "merely colorable." *Armbruster v. Unisys Corp., 32 F.3d 768, 777 (3d Cir. 1994)*. The nonmoving party **[**11]** is afforded the benefit of all reasonable inferences drawn from the record. *Id.*

HN2[] Once the moving party has satisfied its burden, the nonmoving party is required by *Fed. R. Civ. P. 56(e)* to establish that there remains a genuine issue of material fact. **[*426]** *Clark v. Clabaugh, 20 F.3d 1290, 1294 (3d Cir. 1994)*. The nonmovant "may not rest upon mere allegation or denials of his pleadings, but must set forth specific facts showing that there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. A fact is material if it "might affect the outcome of the suit under the governing law. . ." *id. at 248*, and is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id. at 248, 257*.

In determining whether a nonmovant has established the existence of a genuine issue of material fact requiring a jury trial, the evidence of the nonmovant must "be believed and all justifiable inferences are to be drawn in [its] favor." *Id. at 255*. Whether an inference is justifiable, however, depends on the evidence adduced. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., **[**12]** 475 U.S. 574, 595-96, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. An inference based upon speculation or conjecture does not create a material factual dispute sufficient to defeat summary judgment. *Robertson v. Allied Signal, Inc., 914 F.2d 360, 382 n.12 (3d Cir. 1990)*. Likewise, "simply showing that there is some metaphysical doubt as to the material facts" does not establish a genuine issue for trial. *Matsushita, 475 U.S. at 586*.

III.

Defendants move for summary judgment, arguing that their conduct is completely insulated from antitrust attack under the *Noerr-Pennington* doctrine. [2] "Not so," counter the plaintiffs, who assert forcefully that defendants' obstructionist tactics fall within the "sham exception" to *Noerr-Pennington*. To sort out these contentions, it is first necessary to explore the contours of *Noerr-Pennington*.

[13]** A.

HN3[] The *Noerr-Pennington* doctrine was developed by the Supreme Court in recognition of the fact that the right to petition the government for redress of grievances, a right protected by the *First Amendment*, generally trumps the statutory right of competitors to be free from unfairly anticompetitive conduct under ***antitrust law***. *See Columbia Pictures, 508 U.S. at 56*. Thus, "those who petition government for redress are generally immune from antitrust liability[,]" *id.*, even though the purpose of that petitioning may be to restrain competition. *See Eastern R.R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 138-39, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*.

Nevertheless, ***HN4***[] the *Noerr-Pennington* doctrine does not insulate from antitrust attack conduct that "is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor. . . ." *Noerr, 365 U.S. at 144*. This "sham exception" was refined by the Supreme Court in *Columbia Pictures* and has a very narrow scope. As the Court opined:

> ***HN5***[] We now outline a two-part definition of "sham" litigation. First, the lawsuit must be objectively **[**14]** baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under *Noerr*, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere *directly* with the business relationships of a competitor through the use of the governmental process--as opposed to the outcome of that process--as an anticompetitive weapon. This two-tiered process requires the plaintiff **[*427]** to disprove the challenged lawsuit's *legal* viability before the court will entertain evidence of the suit's *economic* viability.

Columbia Pictures, 508 U.S. at 60-61 (citations and internal quotation marks omitted).

The Supreme Court then further elaborated on the definition of objective baselessness, equating it first to the concept of lack of probable cause as applied in the common-law **[**15]** tort of wrongful civil proceedings. *Id. at 62-63*. On that point, the Court noted that ***HN6***[] probable cause "requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication." *Id.* (citing, *inter alia*, *Restatement (Second) of Torts § 675 comment e* (1977)). Once probable cause for defendant's legal actions is shown, the antitrust plaintiff fails as a matter of law to satisfy the objective prong of the sham exception. *Id. at 63*. A few pages later, in

[2] Defendant K&M Properties of Somerset, Inc., which operates the local Days Inn, has additionally moved for summary judgment on the ground that it successfully withdrew from any unlawful conspiracy and should not be held liable. Dkt. nos. 40, 41. Because I conclude that the *Noerr-Pennington* doctrine provides a complete defense to the allegations of the complaint, I need not reach this issue.

vindicating the defendant's conduct, the Court noted that defendant's lawsuit against the plaintiff met the requirements of nonfrivolity under Fed. R. Civ. P. 11. Id. at 65. [3]

[16]** B.

Here, I assume, without deciding, that defendants' purpose for opposing the Hampton Inn was to restrain competition. The issue that must be determined, then, is whether its tactics in prosecuting that opposition were objectively baseless. I conclude they were not.

In deciding this issue, as on any motion for summary judgment, if "there is no dispute over the predicate facts of the underlying legal proceeding, a court may decide probable cause as a matter of law." [4] Columbia Pictures, 508 U.S. at 63. I must also be mindful that, even though "the antitrust defendant has lost the underlying litigation, a court must resist the understandable temptation to engage in post hoc reasoning by concluding that an ultimately unsuccessful action must have been unreasonable or without foundation." Id. at 60 n.5 (citation and internal quotation marks omitted). Thus, I must determine whether, as a matter of state law, it was objectively reasonable for defendants to challenge the decisions of the zoning and planning **[*428]** boards; that is, whether a reasonable litigant in their position would "believe that there is a chance that a claim may be held valid upon adjudication." Id. at 62-63. **[**17]**

[18]** 1.

The Somerset Borough Zoning Ordinance provides that certain "buildings and uses are permitted as special exceptions if the Board finds that, in its opinion, as a matter of fact, such exceptions will not substantially affect adversely the uses of adjacent and neighboring property." Dkt. no. 46, Exh. B, Art. 12 § 4, at 56. A special height exception is specifically provided for land, such as plaintiff's, located in the M-1 and M-2 districts. *Id.* § 4.3, at 58.

HN7[] Under Pennsylvania law, "as to specific requirements of the zoning ordinance, the applicant has the persuasion burden, as well as the initial evidence presentation burden." Bray v. Zoning Bd. of Adj., 48 Pa. Commw.

[3] The state law standard for determining whether a land use appeal is frivolous is similar to the one applied under a *Noerr-Pennington* analysis:

> A frivolous appeal is one in which no justiciable question has been presented and the appeal is readily recognizable as devoid of merit in that there is little prospect that it can ever succeed.

Abbey v. Zoning Hearing Bd., 126 Pa. Commw. 235, 559 A.2d 107, 112 (Pa. Commw. Ct. 1989) (quoting Black's Law Dictionary 601 (5th ed. 1979)).

[4] Defendants rely upon the "expert opinion" of Attorney David W. Craig, retired President Judge of the Commonwealth Court of Pennsylvania, to support their argument that their land use appeals were "not objectively baseless as a matter of law. . . ." Dkt. no. 45, at 19. It detracts not at all from my high regard for former Judge Craig, nor the esteem in which he is held by the legal community, to observe that lack of objective baselessness is not the sort of issue that lends itself to expert testimony under Fed. R. Evid. 702 and 704. While "testimony in the form of an opinion or inference otherwise admissible is not objectionable because it embraces an ultimate issue to be decided by the trier of fact[,]" *id.*, "an expert may not state his or her opinion as to legal standards nor may he or she state legal conclusions drawn by applying the law to the facts." Okland Oil Co. v. Conoco, Inc., 144 F.3d 1308, 1328 (10th Cir. 1998); *accord* Burger v. Mays, 176 F.R.D. 153, 156-57 (E.D. Pa. 1997); Haberern v. Kaupp Vascular Surgeons Ltd., 812 F. Supp. 1376, 1378 (E.D. Pa. 1992); Rich v. Bailey, 1996 U.S. Dist. LEXIS 19437, No. 95-9632, 1996 WL 745298, *5 (E.D. Pa. Dec. 23, 1996) (citing cases), *aff'd mem.*, ***135 F.3d 766 (3d Cir. 1997)***. "Because the jury does not decide . . . questions of law, such testimony is not helpful to the jury and so does not fall within the literal terms of Fed. R. Evid. 702. . . . This is because the judge's expert knowledge of the law makes any such assistance at best cumulative, and at worst prejudicial." Nieves-Villanueva v. Soto-Rivera, 133 F.3d 92, 100 (1st Cir. 1997). Indeed, "each courtroom comes equipped with a 'legal expert,' called a judge, and it is his or her province alone to instruct the jury on the relevant legal standards." Burkhart v. Washington Metro Area Transit Auth., 324 U.S. App. D.C. 241, 112 F.3d 1207, 1213 (D.C. Cir. 1997); *accord* Askanase v. Fatjo, 130 F.3d 657, 673 (5th Cir. 1997). Accordingly, because such testimony would not assist the jury to determine a fact in issue, I cannot consider it as factual evidence on a motion for summary judgment. Nevertheless, I will treat Attorney Craig's report as additional legal argument, which it plainly is, and to which plaintiffs have had ample opportunity to respond.

523, 410 A.2d 909, 912 (Pa. Commw. Ct. 1980). "This rule means the applicant must bring the proposal within the specific requirements expressed in the ordinance for the use . . . sought as a special exception." 410 A.2d at 911; *accord* Abbey v. Zoning Hearing Bd., 126 Pa. Commw. 235, 559 A.2d 107, 109 (Pa. Commw. Ct. 1989); Trenge v. Zoning Bd. of Adj., 95 Pa. Commw. 583, 506 A.2d 490, 490 (Pa. Commw. Ct. 1986). Once the applicant has made that showing, the objector has "the burden of showing the **[**19]** proposal to be detrimental to public health, safety and welfare." *Id.* (citation and internal quotation marks omitted). If the applicant's burden is not met, the special exception cannot be granted. *See* Trenge, 506 A.2d at 494; *Sites v. Zoning Hearing Bd., 5 Pa. Commw. 78, 287 A.2d 909, 910 (Pa. Commw. Ct. 1972)*.

Here, then, plaintiffs bore the burden of showing that its proposed extra height for the Hampton Inn would "not substantially affect adversely the uses of adjacent and neighboring property." To meet this burden, plaintiffs introduced a plan view of the site, photographs of other Hampton Inns, the testimony of its engineers and the testimony of the seller of the land. The site plan, however, did not include an elevation view and failed to show how the proposed overheight hotel would affect the signage or other aspects of adjoining properties. Nor did it include any depictions of the hotel in relation to those properties. Moreover, plaintiff's engineer, Scott Krabill, testified to his opinion that the Hampton Inn would not adversely affect the surrounding properties, but did not explain in any detail the basis for his opinion. *See* Dkt. no. 46, Exh. E, *passim* **[**20]** . A majority of the board found this evidence sufficient to sustain the plaintiff's burden and granted the special height exception. Yet, one of the four board members dissented:

> MRS. RYAN: Well, I have -- I just have some concerns. I have a little trouble with spatial things. It's my own problem; but trying to picture how -- just how high this building is, I find that difficult to do without more information on it.

Id. at 53. On appeal, as stated earlier, the Court of Common Pleas affirmed.

The relevant inquiry here, it bears repeating, is not whether plaintiffs actually met their burden and legitimately obtained their special exception, but whether defendants could have reasonably believed that their court challenge to the special exception might be successful. I conclude that such a reasonable belief could have been formed. Plaintiff's evidence, to put it mildly, was sparse. Other than the self-serving testimony of the seller that the Hampton Inn would not be detrimental to his truck stop, plaintiff offered no other landowner's testimony, no diagrams of the hotel in context with the adjoining properties, and no objectively verifiable evidence of the effect, if **[**21]** any, on the neighboring properties' signage, view or light. Indeed, one member of the board could not determine from the evidence presented whether plaintiffs qualified for the special exception or not, and voted against it. From this, it is impossible to conclude that the appeal to common pleas court on the issue of whether plaintiff met its initial burden to qualify for the exception was objectively baseless, without probable cause, or frivolous. Hence, the zoning appeal was not a sham.

[*429] 2.

The Somerset Borough Zoning Ordinance requires that all "major uses" of land, including hotels, "be subject to review by the Planning Commission[.]" Dkt. no. 46, Exh. B, Art. 14, § 4(1), at 73. It further provides that:

> The Planning Commission shall examine the proposed development with respect to the traffic and circulation patterns, internal and external, relation to major thoroughfares, utilities, drainage, and community facilities. . . .

Id. § 4(3).

Notwithstanding this requirement, and the heated discussion at the commission meeting over the impact the Hampton Inn would allegedly have on traffic in and near the Somerset interchange, the borough solicitor instructed **[**22]** the commissioners as follows:

> OK, now there has been discussion about traffic and traffic impact studies and I believe that term traffic impact study first appeared in an unsolicited letter from the Pa. Turnpike Commission addressed to the mayor with a copy to me. . . . In any event, our ordinance does not present the opportunity for the Planning Commission to impose as a requirement for site plan approval that a traffic impact study be done. When you are looking at a

> site plan, you are looking at the site, not the other areas beyond the site where the traffic may flow, and from what I can gather, the turnpike commission is interested in just that and that is what the traffic impact study is directed to. . . . I can tell you that under Pennsylvania law, even if a traffic impact study came out the worst, it could possibly be you still could not deny approval of this site plan because the development would cause too much traffic. If you did that, it would strongly be against my advice because if you did that you are [sic] condemning [the] property and it's my job to keep you from doing those kinds of things; somebody's going to have to pay for that property and it's not going **[**23]** to be my client. . . .

Dkt. no. 46, Exh. I at 282 (spelling and punctuation of original transcript corrected for clarity). The Board Chairman then stated, "Based on what our solicitor just told me we legally cannot do what you have requested." The matter was then moved, and the site plan approved unanimously.

An appeal from this decision cannot be considered objectively baseless. The plain language of the ordinance states that the commission must examine internal and external traffic and circulation patterns, but the borough solicitor instructed the commission that external traffic patterns were outside the scope of its review and suggested that denying the proposed site plan would amount to a compensable taking. Based on this advice, the chairman told the objectors that the commission was powerless to grant relief. Again, regardless of whether such an appeal might or might not ultimately succeed, it is clear that a nonfrivolous case could be made that the commission disregarded its statutory mandate when it approved the site plan. Accordingly, this appeal was not a sham, either.

3.

Hoping to avoid the *Columbia Pictures* test, plaintiffs rely on dictum in one footnote **[**24]** of that opinion to the effect that the *Noerr-Pennington* doctrine "permits the imposition of antitrust liability for a litigant's fraud or other misrepresentations." *508 U.S. at 62*; *see* *Whelan v. Abell, 310 U.S. App. D.C. 396, 48 F.3d 1247, 1255 (D.C. Cir. 1995)* ("However broad the *First Amendment* right to petition may be, it cannot be stretched to cover petitions based on known falsehoods."). Notably, however, there is no evidence on this record that defendants made any false submissions to the court of common pleas or otherwise perpetrated a fraud upon the court. In any event, to the extent that plaintiff is arguing that the fraud consisted of the defendants never actually caring about traffic hazards (as opposed to their own economic interests), *see* dkt. no. 50, at 18-24; dkt. no. 59, at 9-12, this argument misses the mark. First, defendants never had to represent to the court or any other body that they *cared* about increased traffic, only that traffic constituted a valid basis for denying the application. Second, this argument attempts an end run around *Columbia Pictures'* core holding that objectively reasonable litigation cannot be a sham, regardless of its **[**25]** subjective motivation. **[*430]** Thus, I reject plaintiff's contention that *Columbia Pictures'* two-part test does not apply, and will dismiss plaintiff's antitrust claims in their entirety as barred by the *Noerr-Pennington* doctrine. [5]

IV.

Plaintiffs have also asserted state law claims for civil conspiracy, wrongful use of civil process, abuse of process and intentional interference with contractual and prospective business relationships. It is well-settled in this circuit, however, that ***HN8***[] claims for civil conspiracy, tortious interference and malicious use of process are subject to *Noerr-Pennington* immunity. [6] **[**26]** *See* *Brownsville Golden Age Nursing Home, Inc. v. Wells, 839 F.2d 155, 156, 160 (3d Cir. 1988)*. Thus, the same analysis and conclusions set forth above apply to these claims as well. [7]

---

[5] Because of this disposition, it is unnecessary for me to consider plaintiffs' argument, dkt. no. 50, at 43-47, that their antitrust claims survive summary judgments on their merits.

[6] This holds especially true for malicious prosecution claims asserted against zoning objectors, where it is important not to chill the *First Amendment* Rights of neighbors to come forward and make their positions known. *See* *Matter of Larsen, 532 Pa. 326, 616 A.2d 529, 592 (Pa. 1992)*.

[7] The *Brownsville* case did not involve a claim for abuse of process (as opposed to wrongful use of civil process); nevertheless, that court did cite with approval a Colorado case applying the *Noerr-Pennington* doctrine to that tort. *839 F.2d at 160* (citing *Protect Our Mountain Envt., Inc. v. District Court, 677 P.2d 1361, 1369 (Colo. 1984))*. Plaintiffs have not argued any principled

An appropriate order follows.

NOW, THEREFORE, this *10th* day of September 1998, upon consideration of defendants' motions for summary judgment, dkt. nos. 40, 43, 44, and the responses thereto, it is hereby ORDERED and DIRECTED that the aforesaid motions are GRANTED and plaintiffs' complaint is DISMISSED WITH PREJUDICE. The Clerk of Court shall mark this case CLOSED.

BY THE COURT,

D. Brooks Smith

United States District Judge

---

reason why abuse of process should be treated any differently under a *Noerr-Pennington* analysis than wrongful use of civil process, and I can discern no such difference. Hence, I will dismiss this claim as well.
