The difference between the traditional rule of reason and the rule of reason for exclusive dealing is that in the exclusive dealing context, courts are bound by the Tampa Electric requirement to consider substantial foreclosure. But foreclosure is usually no longer sufficient by itself; rather, it serves a useful screening function as a proxy for anticompetitive harm. Thus, foreclosure is one of several factors we now examine in determining whether the conduct harmed competition. The United States Court of Appeals for the Eleventh Circuit will also look for direct evidence that the challenged conduct has affected price or output, along with other indirect evidence, such as the degree of rivals' exclusion, the duration of the exclusive deals, and the existence of alternative channels of distribution. The ultimate question remains whether the defendant's conduct harmed competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN19[] Actual Monopolization, Anticompetitive & Predatory Practices

To effect anticompetitive harm, a defendant must harm the competitive process, and thereby harm consumers. In contrast, harm to one or more competitors will not suffice. This distinction makes good sense, particularly in a competitive market where injury to a single competitor may not have a significant effect on overall competition due to the persistence of other rivals. However, competitors and competition are linked, particularly in the right market settings: in a concentrated market with very high barriers to entry, competition will not exist without competitors. Indeed, this is one reason that the behavior of monopolists faces more exacting scrutiny under the antitrust statutes.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN20[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The governing judicial precedent in exclusive dealing cases speaks not of clear evidence or definitive proof of anticompetitive harm, but of probable effect. Indeed, the United States Court of Appeals for the Eleventh Circuit has often articulated the rule of reason, the governing standard for evaluating exclusive dealing claims, by quoting judicial precedent's instruction to analyze the effects of the challenged conduct, actual or probable.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN21[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Court of Appeals for the District of Columbia Circuit found no case supporting the proposition that *15 U.S.C.S. § 2* liability requires plaintiffs to present direct proof that a defendant's continued monopoly power is precisely attributable to its anticompetitive conduct. It noted that to require that *§ 2* liability turn on a plaintiff's ability or inability to reconstruct the hypothetical marketplace absent a defendant's anticompetitive conduct would only encourage monopolists to take more and earlier anticompetitive action.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN22[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Substantial foreclosure continues to be a requirement for exclusive dealing to run afoul of the antitrust statutes. Foreclosure occurs when the opportunities for other traders to enter into or remain in the market are significantly limited by the exclusive dealing arrangements. Traditionally a foreclosure percentage of at least 40 percent has been a threshold for liability in exclusive dealing cases. However, some courts find that a lesser degree of foreclosure is required when the defendant is a monopolist.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The test for substantial foreclosure is not total foreclosure, but whether the challenged practices bar a substantial number of rivals or severely restrict the market's ambit. Some circuits find monopolists liable for anticompetitive conduct where the targeted rival gained market share, but less than it likely would have absent the conduct. Exclusive dealing measures that slow a rival's expansion can still produce consumer injury.

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

HN24[] **Standards of Review, Substantial Evidence**

Under the United States Court of Appeals for the Eleventh Circuit's deferential standard of review, the mere fact that two inconsistent conclusions could be drawn from the record does not prevent the Federal Trade Commission's finding from being supported by substantial evidence.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN25[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Anti-competitive intent alone, no matter how virulent, is insufficient to give rise to an antitrust violation. But, as the United States Court of Appeals for the Eleventh Circuit has said, evidence of intent is highly probative not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences. For a monopolization charge, intent is relevant to the question whether the challenged conduct is fairly characterized as exclusionary or anticompetitive. There is agreement on the proposition that no monopolist monopolizes unconscious of what he is doing.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Evidence > Burdens of Proof > Burden Shifting

HN26[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Once the Federal Trade Commission establishes that a defendant's conduct harmed competition, the burden shifts to the defendant to offer pro-competitive justifications for its conduct. As the Commission explains, cognizable justifications are typically those that reduce cost, increase output or improve product quality, service, or innovation. Such justifications, however, cannot be merely pretextual.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN27[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Judicial precedent looks to evidence that proffered justifications for conduct are merely an excuse to cover up different and anticompetitive reasons.

Opinion by: MARCUS

Opinion

[*819] MARCUS, Circuit Judge:

This antitrust case involves allegedly anticompetitive conduct in the ductile iron pipe fittings ("DIPF") market by McWane, Inc., a family-run company headquartered in Birmingham, Alabama. In 2009, following the passage of federal legislation that provided a large infusion of money for waterworks projects that required domestic pipe fittings, Star Pipe Products entered the domestic fittings market. In response, McWane, the dominant producer of domestic pipe fittings, announced to its distributors that (with limited exceptions) unless they bought all of their domestic fittings from McWane, they would lose their rebates and be cut off from purchases for 12 weeks. The Federal Trade Commission ("FTC") investigated and brought an enforcement action under *Section 5 of the Federal Trade Commission Act*, *15 U.S.C. § 45*. The Administrative Law Judge ("ALJ"), after a two-month trial, and then a divided Commission, found that McWane's actions constituted an illegal exclusive dealing policy used to maintain McWane's monopoly power in the domestic fittings market. The Commission issued an order directing McWane to stop requiring exclusivity from distributors. McWane appealed, challenging nearly **[**3]** every aspect of the Commission's ruling.

After thorough review, we affirm the Commission's order. The Commission's factual and economic conclusions -- identifying the relevant product market for domestic fittings produced for domestic-only projects, finding that McWane had monopoly power in that market, and determining that McWane's exclusivity program harmed competition -- are supported by substantial evidence in the record, as required by our deferential standard of review, and their legal conclusions are supported by the governing law.

I.

A.

The essential facts developed in this extensive record are these. Pipe fittings join together pipes and help direct the flow of pressurized water in pipeline systems. They are sold primarily to municipal water authorities and their contractors. Although there are several thousand unique configurations of fittings (different shapes, sizes, coatings, etc.), approximately 80% of the demand is for about 100 commonly used fittings.

Fittings are commodity products produced to American Water Works Association ("AWWA") standards, and any fitting that meets AWWA specifications is interchangeable, regardless of the country of origin. Ductile iron pipe fittings **[**4]** manufacturers rarely sell fittings directly to end users; instead, they sell them to middleman distributors, who in turn sell them to end users. An end user (e.g., a municipal water authority) will issue a

---

* Honorable Robert L. Hinkle, United States District Judge for the Northern District of Florida, sitting by designation. **[**2]**

"specification" for its project, detailing the pipes, fittings, and other products required. Competing contractors solicit bids for the specified products from distributors, who in turn seek quotes from various manufacturers like McWane.

[*820] End users issue either "open specifications," permitting the use of fittings manufactured anywhere in the world, or "domestic specifications," requiring the use of fittings made in the United States. An end user might issue a domestic specification either because of its preference or due to legal procurement requirements: certain municipal, state, and federal laws require waterworks projects to use domestic-only fittings.[1] Domestic fittings sold for use in projects with domestic-only specifications command higher prices than imported fittings or domestic fittings sold for use in projects with open specifications. The majority of specifications are open, and the majority of fittings sold (approximately 80-85%) are imported.

Historically, fittings were made by a number of American companies, most of which offered a full line of domestic fittings. However, beginning in the 1980s, importing fitting suppliers -- including Star Pipe Products and Sigma Corporation -- began to make significant inroads into the market. By 2005, imported fittings made up the vast majority of ductile iron pipe fittings sales, and the competition from lower-priced and lower-cost imports drove most domestic manufacturers out of the market.

Today, the overall market for fittings sold in the United States -- whether manufactured domestically or abroad, sold into both open-specification and domestic-only projects -- is an oligopoly with three major suppliers: McWane, Star, and Sigma. Together they account for approximately 90% of the fittings sold in the United States. There are two national distributors, **[**6]** HD Supply and Ferguson, which together account for approximately 60% of the overall waterworks distribution market.

From April 2006 until Star entered the domestic fittings market in late 2009, McWane was the only supplier of domestic fittings. Until 2008, McWane produced fittings at two domestic foundries, one in Anniston, Alabama, ("Union Foundry") and the other in Tyler, Texas. In 2005, McWane opened a foundry to produce fittings in China, and in 2008 it closed its Texas foundry.

In 2009, looking to take advantage of the increased demand for domestic fittings prompted by ARRA, Star decided to enter the market for domestic DIPFs. In June 2009, Star publicly announced at an industry conference and in a letter to customers that it would offer domestic fittings starting in September 2009. Star became a "virtual manufacturer" of domestic fittings, contracting with six third-party foundries in the U.S. to produce fittings to Star's specifications. Star also investigated acquiring its own U.S. foundry, which the Commission found would have been a decidedly less costly and more efficient way to produce domestic fittings.

In response to Star's forthcoming entry into the domestic DIPF market, **[**7]** McWane implemented its "Full Support Program" in order "[t]o protect [its] domestic brands and market position." This program was announced in a September 22, 2009 letter to distributors. McWane informed customers that if they did not "fully support McWane branded products for their domestic fitting and accessory requirements," they "may forgo participation in **[*821]** any unpaid rebates [they had accrued] for domestic fittings and accessories or shipment of their domestic fitting and accessory orders of [McWane] products for up to 12 weeks." In other words, distributors who bought domestic fittings from other companies (such as Star) might lose their rebates or be cut off from purchasing McWane's domestic fittings for up to three months.[2] The Full Support Program did contain two exceptions permitting the

---

[1] In particular, the American **[**5]** Recovery and Reinvestment Act of 2009 ("ARRA"), ***Pub. L. No. 111-5, 123 Stat. 115***, provided more than $6 billion to fund water infrastructure projects, all with domestic-only specifications. Pennsylvania and New Jersey state laws also require domestic materials in public projects, as do Air Force bases, certain federal programs, and various municipalities. See, e.g., *73 P.S. § 1884*, *1886*; *N.J. Stat. Ann. § 52:33-3*; *McWane, Inc. (McWane I), 155 F.T.C. 903, 994-95, 2013 FTC LEXIS 76 (2013)*.

[2] McWane emphasizes that the policy deliberately used the words "may" and "or" to convey "a weak stance." However, McWane's Vice President and General Manager Richard Tatman recognized **[**8]** that "[a]lthough the words 'may' and 'or' were specifically used, the market has interpreted the communication in the more hard line 'will' sense."

purchase of another company's domestic fittings: where McWane products were not readily available, and where the customer bought domestic fittings and accessories along with another manufacturer's ductile iron pipe.

Internal documents reveal that McWane's express purpose was to raise Star's costs and impede it from becoming a viable competitor. McWane executive Richard Tatman wrote, "We need to make sure that they [Star] don't reach any critical market mass that will allow them to continue to invest and receive a profitable return." In another document, he "observed that 'any competitor' seeking to enter the domestic fittings market could face 'significant blocking issues' if they are not a 'full line' domestic supplier." McWane I, 155 F.T.C. at 1134. In yet another, McWane employees described the nascent Full Support Program as a strategy to "[f]orce [d]istribution to [p]ick their [h]orse," which would "[f]orce[] Star[] to absorb the costs associated with having a more full line before they can secure major distribution." Mr. Tatman was concerned about the "[e]rosion of domestic pricing if Star emerges as a legitimate competitor," and another McWane executive wrote that his "chief concern is that the domestic market [might] get[] creamed from a pricing standpoint" should Star become a "domestic supplier."

Initially, the Full Support Program **[**9]** was enforced as threatened. Thus, for example, when the Tulsa, Oklahoma branch of distributor Hajoca Corporation purchased Star domestic fittings, McWane cut off sales of its domestic fittings to all Hajoca branches and withheld its rebates.[3] Other distributors testified to abiding by the Full Support Program in order to avoid the devastating result of being cut off from all McWane domestic fittings. For example, following the announcement of the Full Support Program, the country's two largest waterworks distributors, HD Supply (with approximately a 28-35% share of the distribution market) and Ferguson (with approximately 25%), prohibited their branches from purchasing domestic fittings from Star unless the purchases fell into one of the Full Support Program exceptions, and even canceled pending orders for domestic fittings that they had placed with Star. Indeed, the Commission found that "Star was rebuffed by some distributors even after offering a more generous rebate than McWane." However, some distributors also identified other factors that contributed to their decision not to purchase from Star, including "concerns about Star's inventory, the quality of fittings produced at several **[**10]** different foundries, . . . the timeliness of delivery," **[*822]** and negative past business dealings with Star.

Despite McWane's Full Support Program, Star entered the domestic fittings market and made sales to various distributors. From 2006 until Star's entry in 2009, McWane was the only manufacturer of domestic fittings, with 100% of the market for domestic-only projects. By 2010, Star had gained approximately 5% of the domestic fittings market, while McWane captured the remaining 95%. Star grew to just under 10% market share in 2011, leaving the remaining 90% for McWane, and Star was "on pace, at the time of trial, to have its best year ever for [d]omestic [f]ittings sales in 2012." The Commission noted that "many distributors made purchases under the exceptions allowed by the Full Support Program," but that Star's sales in total "were small compared to the overall size of the market." Star estimated **[**11]** that if the Full Support Program had not been in place, its sales would have been greater by a multiple of 2.5 in 2010 and by a multiple of three in 2011.

Star never ended up building or buying a domestic foundry of its own. The Commission found that this was because Star "believed its sales level was insufficient to justify running its own foundry." Star estimated that the cost of producing fittings at its own domestic foundry would have been significantly lower than the cost of contracting with independent foundries, and that operating its own foundry would have allowed it to appreciably reduce its domestic fittings prices. (This is because the third-party foundries used less specialized and less efficient equipment, had increased logistical costs and higher labor costs, and charged a markup plus a fee for shipping.) The Commission and the ALJ also found that the Full Support Program was a "significant reason" that another distributor, Serampore Industries Private, decided not to enter the domestic fittings market.

During 2009-2010, following Star's entry into the market and the Full Support Program's implementation, McWane's production costs for domestic fittings remained flat, but **[**12]** it raised its prices for domestic fittings and increased its gross profits. These prices were relatively consistent across all states, regardless of whether Star had entered

[3] McWane maintains that this was the only example of the Full Support Program's enforcement: "McWane never enforced the rebate program against any other distributor." Of course, the goal of the program was not necessarily to enforce the punishments but to dissuade customers from leaving McWane in the first place.

the domestic fittings market as a rival; Star's presence in various states did not result in lower prices. McWane "continued to sell its domestic fittings into domestic-only specifications at prices that earned significantly higher gross profits than for non-domestic fittings, which faced greater competition." *McWane, Inc. (McWane II), 2014-1 Trade Cas. (CCH) ¶ 78670, 2014 FTC LEXIS 28, 2014 WL 556261, at *17 (F.T.C. Jan. 30, 2014)*. Star's average prices, however, were higher than McWane's in several states.

The duration of the Full Support Program is a matter of some dispute. McWane contends that it ended the Full Support Program in early 2010, eliminating the provision that customers might forego shipments for up to 12 weeks. But the Commission found that McWane had never "publicly withdrawn the policy or notified distributors of any changes," and that some distributors believed that the policy was "still in effect." There is also evidence that some distributors started to ignore the Full Support Program in 2010 after they learned of the FTC's investigation into McWane's practices.

B.

On January 4, 2012, the FTC issued a seven-count **[**13]** administrative complaint **[*823]** charging McWane, Star, and Sigma[4] with violating *Section 5 of the Federal Trade Commission Act*. (In February and May of 2012, Star and Sigma entered consent decrees with the FTC without any admission of wrongdoing, leaving McWane as the sole defendant.) The only charge at issue on appeal is found in count six,[5] which alleged that McWane's exclusivity mandate (the Full Support Program) constituted unlawful maintenance of a monopoly over the domestic fittings market.

The ALJ conducted a two-month trial. On May 8, 2013, he issued a 464-page decision ruling in favor of the complaint counsel on count 6.[6] He specifically found that the sales for projects requiring domestic **[**14]** fittings constituted a separate product market in which McWane had monopoly power. McWane I, 155 F.T.C. at 1239-40, 1375-88. He ruled that McWane's Full Support Program was an exclusive dealing arrangement that foreclosed Star from a substantial share of the domestic fittings market and, thereby, unlawfully maintained McWane's monopoly. Both McWane and the complaint counsel appealed the ALJ's decision to the Commission.

A divided Commission affirmed as to count 6.[7] Like the ALJ, the Commission found that the relevant market was the supply of domestically manufactured fittings for use in domestic-only waterworks projects, because imported fittings are not a substitute for domestic fittings for such projects. *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *13*. The Commission noted that this conclusion was bolstered by the higher prices charged for domestic fittings used in domestic-only projects. *2014 FTC LEXIS 28, [WL] at *14*. The Commission also found that McWane had monopoly power in that market, with 90-95% market share from 2010-11 (a much higher share than courts usually require for a prima facie showing of monopoly power) and substantial barriers to entry in the form of major capital outlays required to produce **[**15]** domestic fittings. *2014 FTC LEXIS 28, [WL] at *15-18*.

The Commission agreed that McWane's Full Support Program was an unlawful exclusive dealing arrangement that foreclosed Star's access to distributors for domestic fittings and harmed competition, thereby contributing significantly to the maintenance of McWane's monopoly power in the market. *2014 FTC LEXIS 28, [WL] at *18-28*.

---

[4] In a series of events irrelevant to the resolution of this appeal, Sigma entered the domestic fittings market as an authorized distributor of McWane's domestic fittings. See *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *10-11*.

[5] Counts 1, 2, and 3 alleged an earlier conspiracy among McWane, Sigma, and Star to stabilize prices in the non-domestic fittings market. Counts 4 and 5 alleged that McWane's distribution agreement with Sigma violated the Federal Trade Commission Act. Count 7 alleged that the same conduct targeted in Count 6 amounted to attempted monopolization.

[6] The ALJ dismissed counts 1-3 but ruled in favor of the complaint counsel on counts 4-7.

[7] The Commission dismissed the other six counts. As to Count 7, attempted monopolization, the Commission deemed it "unnecessary to ask whether McWane attempted to monopolize the market" since it had found that McWane had actually done so. *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *31 n.16*.

It noted that HD Supply and Ferguson, the country's two largest waterworks distributors (with a combined 60% market share), prohibited their branches from purchasing domestic fittings from Star after the Full Support Program was announced, except through the program's limited exceptions. *2014 FTC LEXIS 28, [WL] at *23*. The practical effect of the program, the Commission found, "was to make it economically infeasible for distributors to drop McWane[] . . . and switch to Star." *2014 FTC LEXIS 28, [WL] at *24*. Unable to attract distributors, **[*824]** Star was prevented from generating the revenue needed to acquire its own foundry, a more efficient means of producing domestic fittings; thus, its growth into a rival **[**16]** that could challenge McWane's monopoly power was artificially stunted. *2014 FTC LEXIS 28, [WL] at *25*.

Moreover, the Commission found that there was evidence that McWane's exclusionary conduct had an impact on price: after the Full Support Program was implemented, McWane raised domestic fittings prices and increased its gross profits despite flat production costs, and it did so across states, regardless of whether Star had entered the market as a competitor. *2014 FTC LEXIS 28, [WL] at *27*.

Commissioner Wright filed a lengthy dissent. He assumed that McWane was a monopolist in the domestic-only fittings market, agreed that the Full Support Program was an exclusive dealing arrangement, and concluded that there was "ample record evidence" that the program harmed Star. *2014 FTC LEXIS 28, [WL] at *46* (Wright, dissenting). However, he contended that the government "failed to carry its burden to demonstrate that the Full Support Program resulted in cognizable harm to competition." *2014 FTC LEXIS 28, [WL] at *62*. He argued that according to modern economic theory, exclusive dealing is harmful to competition (as opposed to merely harmful to a competitor) only if it prevents rivals from attaining a minimum efficient scale needed to constrain a monopolist's exercise of monopoly power. *2014 FTC LEXIS 28, [WL] at *48*. Commissioner Wright contended **[**17]** that the government had failed to demonstrate such harm to competition, either through direct or indirect evidence. Specifically, he suggested that the government had failed to show that Star's inability to afford its own foundry was the equivalent of its being unable to achieve minimum efficient scale, failed to link the market foreclosure to McWane's alleged maintenance of monopoly power, and miscalculated the relevant foreclosure share. *2014 FTC LEXIS 28, [WL] at *58-60*. Moreover, he noted that other forms of indirect evidence -- including Star's ability to enter the domestic fittings market and expand despite the existence of the Full Support Program, as well as the short duration and terminability of the exclusive dealing arrangement -- cut against a finding that McWane's conduct was exclusionary.[8]@@*2014 FTC LEXIS 28, [WL] at *61-62*.

McWane filed a timely petition in this Court seeking review of the Commissioner's order on the lone remaining count.

II.

HN1[] This Court "review[s] the FTC's findings of fact and economic conclusions under the substantial **[**18]** evidence standard." *Schering-Plough Corp. v. FTC, 402 F.3d 1056, 1062 (11th Cir. 2005)*; see *15 U.S.C. § 45(c)* ("The findings of the Commission as to the facts, if supported by evidence, shall be conclusive."). "Substantial evidence is more than a mere scintilla, and [this Court] require[s] such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." *Schering-Plough, 402 F.3d at 1062* (quotation omitted). This standard "forbids a court to 'make its own appraisal of the testimony, picking and choosing for itself among uncertain and conflicting inferences.'" *Polypore Int'l, Inc. v. FTC, 686 F.3d 1208, 1213 (11th Cir. 2012)* (quoting *FTC v. Algoma Lumber Co., 291 U.S. 67, 73, 54 S. Ct. 315, 78 L. Ed. 655, 18 F.T.C. 669 (1934)*). Indeed, "the possibility of drawing two **[*825]** inconsistent conclusions from the evidence does not prevent an administrative agency's finding from being supported by substantial evidence." *Consolo v. Fed. Mar. Comm'n, 383 U.S. 607, 620, 86 S. Ct. 1018, 16 L. Ed. 2d 131 (1966)*.

HN2[] We review de novo the Commission's legal conclusions and the application of the facts to the law. *Polypore Int'l, 686 F.3d at 1213*. However, "we afford the FTC some deference as to its informed judgment that a particular commercial practice violates the Federal Trade Commission Act." *Schering-Plough, 402 F.3d at 1063*;

[8] Former FTC Commissioner Rosch -- whom Commissioner Wright replaced on the Commission in January 2013 -- had issued similar criticisms in his dissents at both the pleading and summary judgment stages of the case.

see FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 454, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986) ("[T]he identification of governing legal standards and their application to the facts found . . . are . . . for the courts to resolve, although even in considering such issues the courts are to give some deference to the Commission's informed judgment that a particular commercial **[**19]** practice is to be condemned as 'unfair' [under the Federal Trade Commission Act].").

McWane challenges three particular determinations by the Commission: its market definition; its finding that McWane monopolized the domestic fittings market; and its finding that the Full Support Program harmed competition. Because the standard of review is essential to our analysis, we explain the applicable standard for each of the Commission's conclusions. All three determinations are factual or economic conclusions reviewed only for substantial evidence.

First, ***HN3***[] our caselaw makes clear that "[t]he definition of the relevant market is essentially a factual question." U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 994 (11th Cir. 1993). Thus, we review the FTC's determination of market definition -- like all its factual findings -- for substantial evidence. See Jim Walter Corp. v. FTC, 625 F.2d 676, 682 (5th Cir. 1980) (applying the substantial evidence standard in reviewing the FTC's finding of market definition).[9]

[*826] Second, ***HN4***[] the FTC's determination that a defendant possesses monopoly power is a factual or economic conclusion that we also review for substantial evidence. No prior case of ours appears to hold this specifically, but this conclusion follows from previous cases that have treated a determination that a defendant possesses market power -- a lesser-included element of monopoly power -- as a factual finding. See NaBanco, 779 F.2d at 605. Again, other circuits agree. E.g., Realcomp II, Ltd. v. FTC, 635 F.3d 815, 829 (6th Cir. 2011) (applying substantial evidence standard to FTC's finding that defendant possessed substantial market power); L.G. Balfour Co. v. FTC, 442 F.2d 1, 13 (7th Cir. 1971) (applying substantial evidence standard to FTC's finding that defendant possessed monopoly power).

---

[9] In Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir.1981) (en banc), this Court adopted as binding precedent all decisions of the old Fifth Circuit handed down prior to October 1, 1981.

A recent opinion of this Court stated that we review the FTC's finding of market definition for "clear error." Polypore Int'l, 686 F.3d at 1217. Clear error is the traditional standard used to review a district court's factual **[**20]** findings, and we employ it in reviewing a finding of market definition by a district court judge. See, e.g., United States v. Engelhard Corp., 126 F.3d 1302, 1305 (11th Cir. 1997); Cable Holdings of Ga., Inc. v. Home Video, Inc., 825 F.2d 1559, 1563 (11th Cir. 1987); Nat'l Bancard Corp. (NaBanco) v. VISA U.S.A., Inc., 779 F.2d 592, 604 (11th Cir. 1986). Polypore drew its "clear error" language from just such a case. 686 F.3d at 1217 (citing Engelhard, 126 F.3d at 1305). But substantial evidence, not clear error, is the "traditional . . . standard used by courts to review agency decisions." Am. Tower LP v. City of Huntsville, 295 F.3d 1203, 1207 (11th Cir. 2002). Indeed, Polypore itself noted the correct standard of review for the FTC's factual findings earlier in the opinion. See 686 F.3d at 1213.

Other circuits follow this distinction, reviewing the FTC's market definition finding for substantial evidence while reviewing a district court's market definition finding for clear error. Compare, e.g., Olin Corp. v. FTC, 986 F.2d 1295, 1297-98 (9th Cir. 1993) (reviewing FTC's market definition for substantial evidence), and ProMedica Health Sys., Inc. v. FTC, 749 F.3d 559, 566 (6th Cir. 2014) (same), petition for cert. filed, No. 14-762 (Dec. 30, 2014), with, e.g., JBL Enters., Inc. v. Jhirmack Enters., Inc., 698 F.2d 1011, 1016 (9th Cir. 1983) (reviewing district court's market definition for clear error), and United States v. Cent. State Bank, 817 F.2d 22, 24 (6th Cir. 1987) (per curiam) (same).

Moreover, Polypore's language cannot be squared with the old Fifth Circuit's approach in Jim Walter. In that case, the Court asked "whether there is substantial evidence to support the FTC's finding of a national market for tar and asphalt roofing products." 625 F.2d at 683. After determining that the FTC's market definition was founded "primarily **[**21]** on the casual observations of industry representatives and an economist," the Court held that the FTC's proposed market was "not supported by substantial evidence" and remanded "for reconsideration of the appropriate . . . market." Id. Jim Walter plainly held that the FTC's market definition is reviewed for substantial evidence. Although Polypore may be read to say otherwise, in the case of an intra-circuit conflict, the earlier case is binding. See Morrison v. Amway Corp., 323 F.3d 920, 929 (11th Cir. 2003).

Finally, so too with the Commission's determination that McWane's conduct harmed competition **[**22]** and lacked offsetting procompetitive benefits. Again, no binding case of ours appears to deal with the particular type of Federal Trade Commission Act violations at issue here, but we have applied the substantial evidence standard to analogous findings under that same act and other antitrust statutes. See *Schering-Plough, 402 F.3d at 1068* (examining "whether there is substantial evidence to support the Commission's conclusion that [defendant's conduct] restrict[ed] competition" in violation of *Section 1 of the Sherman Act* and *Section 5 of the Federal Trade Commission Act*); *Foremost Dairies, Inc. v. FTC, 348 F.2d 674, 678-79 (5th Cir. 1965)* (applying substantial evidence standard to FTC's finding of injury to competition under the Robinson-Patman Act).

This approach comports with the law in other circuits in a variety of antitrust contexts. The Seventh Circuit put the point most clearly in a Clayton Act case: "[T]he substantial evidence rule (like the clearly erroneous rule) applies to ultimate as well as underlying facts, including economic judgments. . . . [T]he ultimate question under the Clayton Act -- whether the challenged transaction may substantially lessen competition -- is governed by the substantial evidence rule." *Hosp. Corp. of Am. v. FTC, 807 F.2d 1381, 1385 (7th Cir. 1986)* (internal citation omitted). Our sister circuits have applied the substantial evidence standard **[**23]** to analogous economic conclusions in cases brought under the Federal Trade Commission Act, e.g., *N.C. State Bd. of Dental Exam'rs v. FTC, 717 F.3d 359, 374 (4th Cir. 2013)* (applying substantial evidence standard to FTC's determination that defendant's behavior "was likely to cause significant anticompetitive harms" in violation of the Federal Trade Commission Act), aff'd, *135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*; *Realcomp II, 635 F.3d at 831-34* (applying substantial evidence standard to FTC's finding that defendant's policies harmed competition in violation of the Federal Trade Commission Act), and under other antitrust statutes, see, e.g., *N. Tex. Specialty Physicians v. FTC, 528 F.3d 346, 370 (5th Cir. 2008)* (applying substantial evidence standard to FTC's determination that defendant's conduct "amounted to horizontal price-fixing that is unrelated to competitive efficiencies" under *Section 1 of the Sherman Act)*; **[*827]** *Gibson v. FTC, 682 F.2d 554, 571 (5th Cir. 1982)* (applying substantial evidence standard to FTC's finding of illegal brokerage in violation of *Clayton Act § 2(c)*); RSR Corp. v. FTC*, 602 F.2d 1317, 1320, 1324-25 (9th Cir. 1979)* (applying substantial evidence standard to FTC's finding under *Section 7 of the Clayton Act* that merger was anticompetitive); *Fruehauf Corp. v. FTC, 603 F.2d 345, 355 (2d Cir. 1979)* (same); *Yamaha Motor Co. v. FTC, 657 F.2d 971, 977 n.7 (8th Cir. 1981)* (same, as to a joint venture).

HN5[] The ultimate legal conclusion that a defendant's conduct violates the Federal Trade Commission Act is an "application of the facts to the law," which we review de novo, *Polypore Int'l, 686 F.3d at 1213*, except for the limited deference prescribed by *Indiana Federation of Dentists, 476 U.S. at 454*. But the **[**24]** Commission's factual building blocks and economic conclusions -- findings of market definition, monopoly power, and harm to competition -- are reviewed for substantial evidence.

III.

The Commission found that McWane adopted an exclusionary distribution policy that maintained its monopoly power in the domestic fittings market in violation of ***HN6***[] *Section 5* of the Federal Trade Commission Act, which prohibits "[u]nfair methods of competition in or affecting commerce." *15 U.S.C. § 45*.[10] Although exclusive dealing arrangements are common and can be procompetitive, particularly in competitive markets, see *Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 76 (3d Cir. 2010)*, these arrangements can harm competition in certain circumstances, see *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (O'Connor, J., concurring) ("Exclusive dealing can have adverse economic consequences by allowing one supplier of goods or services unreasonably to deprive other suppliers of a market for their goods . . ."), abrogated

---

[10] The Commission acknowledged that violations of *Section 2 of the Sherman Act* (monopolization) also constitute "unfair methods of competition" under *Section 5 of the Federal Trade Commission Act*, and therefore relied on Section 2 caselaw in its analysis. See *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *11 n.7* (citing *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 762, 119 S. Ct. 1604, 143 L. Ed. 2d 935 & n.3 (1999)*; *FTC v. Motion Picture Adver. Serv. Co., 344 U.S. 392, 394-95, 73 S. Ct. 361, 97 L. Ed. 426, 49 F.T.C. 1730 (1953))*; see also William Holmes & Melissa Mangiaracina, ***Antitrust Law*** Handbook § 7:2 (2014) ("For the most part . . . the [Federal Trade Commission Act] has been held coterminous with the Sherman and Clayton Acts."). Both parties (and the dissenting Commissioner) agree that this is the correct **[**26]** analytical approach.

on other grounds by *Ill. Tool Works Inc. v. Ind. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*; Jonathan M. Jacobson, Exclusive Dealing, "Foreclosure," and Consumer Harm, 70 Antitrust L.J. 311, 328 (2002) ("The concern [with exclusive dealing arrangements] is . . . that creating or increasing market power through exclusive dealing is the means by which the defendant is likely to increase prices, restrict output, reduce quality, slow innovation, **[**25]** or otherwise harm consumers."). When a market is competitive, the "competition for the [exclusive] contract is a vital form of rivalry" that can induce the offering firm to provide price reductions or improved services to buyers, to the ultimate benefit of consumers. See *Menasha Corp. v. News Am. Mktg. In-Store, Inc., 354 F.3d 661, 663 (7th Cir. 2004)*. But, notably, in the absence of such competition, a dominant firm can impose exclusive deals on downstream dealers to "strengthen[] or prolong[] [its] market position." **[*828]** IIIB Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 760b7, at 54 (3d ed. 2008). Thus, while such arrangements are "not illegal in themselves," they can run afoul of antitrust laws as "an improper means of maintaining a monopoly." *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)*.

HN7[] A violation of *Section 5 of the Federal Trade Commission Act* premised on monopolization requires proof of "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1293-94 (11th Cir. 2004)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))* (internal quotation mark omitted). Thus, for the Commission's conclusion that McWane violated the Federal Trade Commission Act to stand, it must have successfully defined the relevant market, demonstrated that McWane had monopoly power in that market, and showed that McWane's Full Support Program constituted the illegal maintenance of that monopoly power. McWane challenges all three of the Commission's determinations, and we address each of them in turn.

A. Monopoly Power in the Relevant Market

1. Market Definition

HN8[] "Defining the market is a necessary step in any analysis of market power and thus an indispensable element in the consideration of any monopolization . . . case arising under *section 2*." *U.S. Anchor, 7 F.3d at 994*. A product market consists of "products that have reasonable interchangeability for the purposes for which they are produced." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. **[**27]** "The reasonable interchangeability of use or the cross-elasticity of demand between a product and its substitutes constitutes the outer boundaries of a product market for antitrust purposes." *U.S. Anchor, 7 F.3d at 995* (footnote omitted). "Cross-elasticity of demand" measures the extent to which modest variations in the price of one good affect customer demand for another good. "[A] high cross-elasticity of demand indicates that the two products in question are reasonably interchangeable substitutes for each other and hence are part of the same market." *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1337 n.13 (11th Cir. 2010)*.

HN9[] In defining product markets, this Court has long looked to the factors set forth by the Supreme Court in *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, including "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Polypore Int'l, 686 F.3d at 1217* (quoting *U.S. Anchor, 7 F.3d at 995*). Again, we are obliged to review the Commission's market definition for substantial evidence.

HN10[] A relevant geographic market also must be defined. See, e.g., *Am. Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1579 (11th Cir. 1985)*. The Commission (and the ALJ) defined the relevant geographic market as the United States. Neither party contests this determination. **[**28]**

As for the product market, the Commission, agreeing with the ALJ, found that the relevant market was one "for the supply of domestically-manufactured fittings **[*829]** for use in . . . projects with domestic-only specifications." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *13*. It noted that various laws and end-user preferences requiring projects to use domestic fittings precluded imported fittings from being "reasonable substitutes" for those projects, even though the fittings themselves are functionally identical. Id.; see IIB Phillip E. Areeda, Herbert Hovenkamp & John Solow, ***Antitrust Law*** ¶ 572b, at 430 (3d ed. 2007) ("To the extent that regulation limits substitution, it may define the extent of the market."). The Commission also noted that McWane charged higher prices for (and reaped greater profits from) domestic fittings in domestic-only projects: the ALJ found that McWane charged approximately 20%-95% more for its domestic fittings for domestic-only projects than for open-specification projects. This price differentiation reflected McWane's ability to target customers with domestic-only project specifications who could not avoid the higher prices by substituting imported fittings. Indeed, ***HN11***[] Brown Shoe specifically identified "distinct **[**29]** prices" as a factor indicating a separate product market. *370 U.S. at 325*.

McWane contends, however, that domestic and imported fittings are, in fact, interchangeable, because some customers (those whose projects' specifications are not dictated by law) can "flip" their projects from domestic-only to open, thereby turning imported fittings into a reasonable substitute. However, the Commission found, based on testimony in the record, that "flipping typically only occurs when domestic fittings are unavailable, rather than as a result of competition between domestic and imported fittings." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *15*. This is consonant with the ALJ's finding that end users with domestic-only preferences "are aware of, but not sensitive to, the price differential between domestic fittings and import fittings." McWane I, 155 F.T.C. at 999.

McWane also alleges that the Commission's definition was insufficient as a matter of law because it "was unsupported by an expert economic test," which McWane claims is a requirement under Eleventh Circuit caselaw. ***HN12***[] It is true that in some circumstances we have said that a market definition "must be based on expert testimony." *Bailey v. Allgas, Inc., 284 F.3d 1237, 1246 (11th Cir. 2002)*; see *Am. Key Corp., 762 F.2d at 1579* ("Construction of a relevant economic market . . . cannot . . . be based upon lay **[**30]** opinion testimony."). Such testimony can be insufficient when "conclusory" or "based upon insufficient economic analysis." *Gulfstream Park Racing Ass'n, Inc. v. Tampa Bay Downs, Inc., 479 F.3d 1310, 1313 (11th Cir. 2007)* (per curiam); see *Bailey, 284 F.3d at 1246-47* (finding that plaintiff's expert testimony, which failed to consider alternative products in defining relevant market, was insufficient as a matter of law).

But in this case, the Commission did rely in part on the complaint counsel's expert witness, Dr. Laurence Schumann, who considered a hypothetical monopolist test and the lack of interchangeability between domestic and imported fittings in domestic-only projects. Nevertheless, McWane claims that the expert's analysis was insufficient because it did not involve an econometric analysis, such as a cross-elasticity of demand study. However, there appears to be no support in the caselaw for McWane's claim that such a technical analysis is always required. Indeed, as the Commission correctly noted, "[c]ourts routinely rely on qualitative economic evidence to define relevant markets." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *14*. Thus, for example, in Polypore, the Commission's market definition was affirmed by this Court on the basis of the **[*830]** Brown Shoe factors, apparently without an econometric study. *686 F.3d at 1217-18*. Given the identification of persistent price **[**31]** differences between domestic fittings and imported fittings, the distinct customers, and the lack of reasonable substitutes in this case, there was sufficient evidence to support the Commission's market definition.

2. Monopoly Power

HN13[] "As a legal matter, *Sherman Act § 2* requires that the defendant either have monopoly power or a dangerous probability of achieving it . . ." XI Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1800c5, at 22 (3d ed. 2011); accord *Dentsply, 399 F.3d at 187* ("A prerequisite for [a *§ 2* violation] is a finding that monopoly power exists."). Monopoly power is the ability "to control prices or exclude competition." *Grinnell, 384 U.S. at 571* (quotation omitted). However, "[b]ecause . . . direct proof [of the ability to profitably raise prices substantially above the competitive level] is only rarely available, courts more typically examine market structure in search of circumstantial evidence of monopoly power." *United States v. Microsoft Corp., 253 F.3d 34, 51, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc) (per curiam). Courts regularly ask whether the firm has a predominant market share, see *Bailey, 284 F.3d at 1246* ("Because demand is difficult to establish with accuracy, evidence of a seller's market share may provide the most convenient circumstantial measure of monopoly power."), and look to other circumstantial factors such **[**32]** as "the size and strength of competing firms, freedom of entry, pricing trends and practices in the industry, ability of consumers to substitute comparable goods, and consumer demand," *Dentsply, 399 F.3d at 187*.

In determining that McWane had monopoly power, the Commission found that McWane's market share of the domestic fittings market had been 100% from 2006 until Star's entry into the market in 2009. McWane's market share was then approximately 95% in 2010 and approximately 90% in 2011, "far exceed[ing] the levels that courts typically require to support a prima facie showing of monopoly power." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *16*. It also observed that there were "substantial barriers to entry in the domestic fittings market" both for brand new entrants and for those who already supply imported fittings. Id. Although Star was able to enter the market, the Commission noted that its share remained below 10% in 2010 and 2011, and, notably, its entry had no effect on McWane's prices. The Commission reasoned that McWane's "ability to control prices" in the market "provide[d] direct evidence of [its] monopoly power." *Id. at *18*.

The difficulty in this case is that the circumstantial evidence does not all point in the same direction. McWane's market share during the relevant **[**33]** time period is plainly high enough to be considered predominant. See *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (80-95% market share sufficient to establish monopoly power); *Grinnell, 384 U.S. at 571* (87% sufficient); *Dentsply, 399 F.3d at 188* (market share between 75-80% is "more than adequate to establish a prima facie case of [monopoly] power"); *Colo. Interstate Gas Co. v. Natural Gas Pipeline Co. of Am., 885 F.2d 683, 694 n.18 (10th Cir. 1989)* ("[To establish monopoly power,] lower courts generally require a minimum market share of between 70% and 80%."); *Cliff Food Stores, Inc. v. Kroger, Inc., 417 F.2d 203, 207 n.2 (5th Cir. 1969)* ("[S]omething more than 50% of the market is a prerequisite to a finding of monopoly"). Standing alone, **[*831]** this would seem to be sufficient evidence to support the Commission's conclusion that McWane had monopoly power in the domestic fittings market.

However, there is also evidence that, despite the presence of the Full Support Program, Star was still able to enter the domestic fittings market and expand its market share from 0% in 2009 to approximately 5% in 2010 to approximately 10% in 2011, while McWane's market share correspondingly declined. McWane contends that this "clear and successful entry" and growth by a competitor precludes a finding of monopoly power by demonstrating a lack of barriers to entry in the market. The Commission disagreed, finding that, despite Star's entry and growth, substantial barriers to entry existed **[**34]** in both the overall fittings market and the domestic fittings market. The ALJ found (and the Commission agreed) that "a significant capital investment" is required to enter the overall fittings market, McWane I, 155 F.T.C. at 1113, as "new entrant[s] must overcome existing relationships between existing manufacturers[,] and the [d]istributors[,] and [e]nd [u]sers," in addition to "develop[ing] hundreds of patterns and moldings," id. at 1114. All told, the Commission agreed with the ALJ that a de novo entrant would need approximately three to five years to enter the fittings market. *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *16*. Star, as an established player in the overall fittings market, did not face all of these obstacles in entering the domestic fittings market. (For example, it had pre-existing relationships with some distributors and did not need to alter its sales team.) Nevertheless, the Commission found that significant barriers to entry existed in the domestic market, as Star still needed to purchase its own foundry or contract with third-party domestic foundries. Id.; see *Bailey, 284 F.3d at 1256* ("Entry barriers include . . . capital outlays required to start a new business . . . ."). Moreover, the Commission found that the Full Support Program itself posed a barrier to entry by shrinking the number of available distributors. **[**35]** In support of this argument, the Commission observed that two other suppliers of imported fittings, Sigma Corporation and Serampore Industries Private, considered entering the domestic fittings market but ultimately concluded that the costs and challenges were too high. *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *17*.

Some caselaw from other circuits appears to support McWane. See *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 99 (2d Cir. 1998)* ("We cannot be blinded by market share figures and ignore marketplace realities, such as the relative ease of competitive entry. . . . [A competitor's] successful entry . . . refutes any inference of the existence of monopoly power that might be drawn from [the defendant's] market share.").[11] But not all courts agree. See *Rebel*

---

[11] It is worth noting, however, that the defendant in Tops Markets had a lower market share than McWane -- 74% as opposed to over 90% -- and the plaintiffs "failed to produce any . . . evidence to rebut [the defendant's] assertion" that the market contained

Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1440 (9th Cir. 1995) ("The fact that entry has occurred does not necessarily preclude the existence of 'significant' entry barriers. If the output or capacity of the new entrant is insufficient to take significant business away from the predator, they are unlikely to represent a challenge to the predator's market power."); Reazin v. Blue Cross & Blue Shield of Kan., Inc., 899 F.2d 951, 971 (10th Cir. 1990) (rejecting defendant's **[*832]** argument that presence of multiple competitors demonstrated that entry barriers were insubstantial where "no other entrant remotely approached [defendant's] domination of the market"); Oahu Gas Serv., Inc. v. Pac. Res. Inc., 838 F.2d 360, 366-67 (9th Cir. 1988) ("A declining market **[**36]** share may reflect an absence of market power, but it does not foreclose a finding of such power." (quotation omitted)). No decision of this Court appears to be directly on point.

In addition to McWane's overwhelming (albeit declining) market share, the Commission cited the particular importance of Star's inability to constrain McWane's pricing for domestic fittings. After Star's entry, McWane continued to sell domestic fittings for domestic-only products at prices that "earned significantly higher gross profits than for non-domestic fittings, which faced greater competition." McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *17. Indeed, McWane's prices and profits for domestic fittings rose in 2010, the year after Star's entry.

On this record, we are unprepared to say that Star's entry and growth foreclose a finding that McWane possessed monopoly power in the relevant **[**37]** market. Although the limited entry and expansion of a competitor sometimes may cut against such a finding, the evidence of McWane's overwhelming market share (90%), the large capital outlays required to enter the domestic fittings market, and McWane's undeniable continued power over domestic fittings prices amount to sufficient evidence that "a reasonable mind might accept as adequate to support" the Commission's conclusion. Schering-Plough, 402 F.3d at 1062 (quotation omitted).

B. Monopoly Maintenance

Having established that McWane "possess[es] . . . monopoly power in the relevant market," we turn to the question of whether the government proved that McWane engaged in "the willful . . . maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Morris Commc'ns, 364 F.3d at 1293-94 (quoting Grinnell, 384 U.S. at 570-71).

As we've observed, ***HN14***[] exclusive dealing arrangements are not per se unlawful, but they can run afoul of the antitrust laws when used by a dominant firm to maintain its monopoly. Of particular relevance to this case, an exclusive dealing arrangement can be harmful when it allows a monopolist to maintain its monopoly power by raising its rivals' costs sufficiently to prevent them from growing **[**38]** into effective competitors. See XI Areeda & Hovenkamp, supra, ¶ 1804a, at 116-17 (describing how exclusive contracts can raise rivals' costs and harm competition); see generally Thomas G. Krattenmaker & Steven C. Salop, Anticompetitive Exclusion: Raising Rivals' Costs to Achieve Power Over Price, 96 Yale L.J. 209 (1986). The following description seems particularly appropriate here:

> [S]uppose an established manufacturer has long held a dominant position but is starting to lose market share to an aggressive young rival. A set of strategically planned exclusive-dealing contracts may slow the rival's expansion by requiring it to develop alternative outlets for its product, or rely at least temporarily on inferior or more expensive outlets. Consumer injury results from the delay that the dominant firm imposes on the smaller rival's growth.

XI Areeda & Hovenkamp, supra, ¶ 1802c, at 76; see ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 271 (3d Cir. 2012); Dentsply, 399 F.3d at 191.

[*833] Tracking this economic argument, the Commission's theory is that McWane's Full Support Program was an exclusive dealing policy designed specifically to maintain its monopoly power "by impairing the ability of rivals to grow into effective competitors that might erode the firm's dominant position." McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *19. To prevail, the FTC must establish that McWane "has engaged in anti-competitive

---

no barriers to entry. 142 F.3d at 99. In this case, as we noted, the complaint alleged and the Commission found significant entry barriers.

conduct **[**39]** that reasonably appears to be a significant contribution to maintaining monopoly power." *Dentsply, 399 F.3d at 187*; accord *Microsoft, 253 F.3d at 79* (quoting III Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 650c, at 69 (1996)).

HN15[] Neither the Supreme Court nor this Circuit has provided a clear formula with which to evaluate an exclusive dealing monopoly maintenance claim, but the D.C. Circuit has synthesized a structured, "rule of reason"-style approach to monopolization cases that has been cited with approval. See Jacobson, supra, at 364-69; III Areeda & Hovenkamp, supra, P 651, at 97 n.1. First, the government must show that the monopolist's conduct had the "anticompetitive effect" of "harm[ing] competition, not just a competitor." *Microsoft, 253 F.3d at 58-59*. If the government succeeds in demonstrating this anticompetitive harm, the burden then shifts to the defendant to present procompetitive justifications for the exclusive conduct, which the government can refute. *Microsoft, 253 F.3d at 59*; *Dentsply 399 F.3d at 196*; see *Eastman Kodak, 504 U.S. at 482-84* (describing defendant's proffered "valid business reasons" for its actions and plaintiff's rebuttal). If the court accepts the defendant's proffered justifications, it must then decide whether the conduct's procompetitive effects outweigh its anticompetitive effects. *Microsoft, 253 F.3d at 59*. This approach mirrors rule of reason analysis. See *Schering-Plough, 402 F.3d at 1064-65* (outlining a substantially similar burden-shifting **[**40]** approach in "traditional rule of reason analysis").

The Commission followed this approach. It found that McWane's Full Support Program was an exclusive dealing policy that harmed competition by foreclosing Star's access to necessary distributors and contributed significantly to Star's lost sales and subsequent inability to purchase its own foundry and expand output. It considered McWane's procompetitive justifications but ultimately found them unpersuasive.

McWane challenges each aspect of the Commission's ruling: first, it says that its Full Support Program was "presumptively legal" because it was non-binding and short-term; second, it contends that the government failed to carry its burden of establishing harm to competition; third, it argues that the Commission wrongly rejected its proffered procompetitive justifications. We address each claim in turn.

1. Presumptive Legality

McWane suggests that the Full Support Program lacked the characteristics of anticompetitive exclusive dealing arrangements. Specifically, it urges that the Full Support Program was "presumptively legal" and "[could not] harm competition" because it was short-term and voluntary (rather than a binding contract of **[**41]** a longer term). No binding precedent from the Supreme Court or this Court speaks specifically to this issue, but McWane hangs its hat on caselaw from other circuits. See, e.g., *Omega Envtl. v. Gilbarco, Inc., 127 F.3d 1157, 1163 (9th Cir. 1997)* ("[T]he short duration and easy terminability of these [one-year] agreements negate substantially their potential to foreclose competition." (footnote omitted)); *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 395* ***[*834]*** *(7th Cir. 1984)* ("Exclusive-dealing contracts terminable in less than a year are presumptively lawful under *section 3 [of the Clayton Act]*."); Jacobson, supra, at 351-52 & n.195.

But not all courts agree. The Third Circuit in Dentsply held that where exclusive deals were "technically only a series of independent sales," they nevertheless constituted antitrust violations because "the economic elements involved -- the large share of the market held by [the defendant] and its conduct excluding competing manufacturers -- realistically ma[d]e the arrangements . . . as effective as those in written contracts." *399 F.3d at 193*. The Dentsply court noted that "in spite of the legal ease with which the relationship can be terminated, the [distributors] have a strong economic incentive to continue [buying defendant's product]." *Id. at 194*; see also *ZF Meritor, 696 F.3d at 270* ("[D]e facto exclusive dealing claims are cognizable under the antitrust laws."); *Minn. Mining & Mfg. Co. v. Appleton Papers, Inc., 35 F. Supp. 2d 1138, 1144 (D. Minn. 1999)* (evaluating an **[**42]** exclusive dealing arrangement's "practical effect" rather than "merely . . . its form" in determining whether it was terminable at will (internal quotation marks omitted)). The Third Circuit distinguished opposing cases by noting that those situations primarily involved markets in which firms could viably sell directly to consumers even when foreclosed from distributors, *Dentsply, 399 F.3d at 194 n.2*, whereas in Dentsply direct sales were not "a practical alternative for most [competing] manufacturers," *id. at 189*. Likewise, in the case at hand, both the Commission and the ALJ found that distributors were essential to the domestic fittings market: "No evidence supports the existence of viable alternate distribution channels, including direct sales to end users." McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *23.

This approach is consistent with the Supreme Court's instruction to look at the "practical effect" of exclusive dealing arrangements. Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 326-28, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961); see also Eastman Kodak, 504 U.S. at 466-67 ("Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***. This Court has preferred to resolve antitrust claims on a case-by-case basis, focusing on the 'particular facts disclosed by the record.'" (quoting Maple Flooring Mfrs. Ass'n v. United States, 268 U.S. 563, 579, 45 S. Ct. 578, 69 L. Ed. 1093 (1925))). ***HN16***[] The Commission adopted this **[**43]** approach, looking to "the reality of [the] marketplace" and finding that "the practical effect of McWane's program was to make it economically infeasible for distributors to . . . switch to Star." McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *24. Even the dissenting commissioner agreed with this approach. Id. at *55 n.38 (Wright, dissenting). So do we.

Moreover, the nature of the Full Support Program arguably posed a greater threat to competition than a conventional exclusive dealing contract, as it lacked the traditional procompetitive benefits of such contracts. As we've noted, courts often take a permissive view of such contracts on the grounds that firms compete for exclusivity by offering procompetitive inducements (e.g., lower prices, better service). But not here. The Full Support Program was "unilaterally imposed" by fiat upon all distributors, and the ALJ found that it resulted in "no competition to become the exclusive supplier" and no "discount, rebate, or other consideration" offered in exchange for exclusivity. McWane I, 155 F.T.C. at 1414. This is consistent with evidence that McWane's prices rose, rather than fell, in the wake of the program.

[*835] We are disposed to follow the Supreme Court's instruction that we consider "market realities" rather than "formalistic **[**44]** distinctions" in rejecting McWane's argument that the specific form of its exclusivity mandate insulated it from antitrust scrutiny.

2. Harm to Competition

We turn then to the first step in the monopolization test: the government must demonstrate that the defendant's challenged conduct had anticompetitive effects, harming competition.

As with many areas of ***antitrust law***, the federal judiciary's approach to evaluating exclusive dealing has undergone significant evolution over the past century. Under the approach laid out by the Supreme Court in Standard Oil Co. of California and Standard Stations, Inc. v. United States (Standard Stations), 337 U.S. 293, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949), all that was required for an exclusive deal to violate the Clayton Act was proof of substantial foreclosure -- "proof that competition ha[d] been foreclosed in a substantial share of the line of commerce affected." Id. at 314. The Supreme Court amended that approach in Tampa Electric, in which it continued to emphasize the importance of substantial foreclosure, but opened the door to a broader analysis. See 365 U.S. at 328-29.

Lower federal courts have burst through that door over the past 50 years, interpreting Tampa Electric as authorizing a rule of reason approach to exclusive dealing cases. See, e.g., ZF Meritor, 696 F.3d at 271 (characterizing Tampa Electric as standing for the proposition that **[**45]** "exclusive dealing agreements . . . [are] judged under the rule of reason"); Jacobson, supra, at 322 (noting that "later cases have suggested" that Tampa Electric "authorize[d] full-scale rule of reason analysis"); XI Areeda & Hovenkamp, supra, P 1820b, at 177 ("Most decisions follow the language in the Supreme Court's Tampa Electric decision indicating that a complete rule of reason analysis is essential, and foreclosure percentages represent only a first step in the inquiry."). ***HN17***[] This Court, without specifically citing Tampa Electric, has joined the consensus that exclusive dealing arrangements are "reviewed under the rule of reason." DeLong Equip. Co. v. Washington Mills Abrasive Co., 887 F.2d 1499, 1508 n.12 (11th Cir. 1989).

HN18[] The difference between the traditional rule of reason and the rule of reason for exclusive dealing is that in the exclusive dealing context, courts are bound by Tampa Electric's requirement to consider substantial foreclosure. See Microsoft, 253 F.3d at 69. But foreclosure is usually no longer sufficient by itself; rather, it "serves a useful screening function" as a proxy for anticompetitive harm. Id. Thus, foreclosure is one of several factors we now examine in determining whether the conduct harmed competition. See Jacobson, supra, at 361-64; XI Areeda & Hovenkamp, supra, P 1821d, at 197 ("[Foreclosure percentages] are seldom decisive in and of themselves. Rather, they provide the jumping-off **[**46]** point for further analysis."). We will also look for direct evidence that the challenged conduct has affected price or output, along with other indirect evidence, such as the degree of rivals' exclusion, the duration of the exclusive deals, and the existence of alternative channels of distribution. XI Areeda & Hovenkamp, supra, P 1821d, at 197-209. The ultimate question remains whether the defendant's conduct harmed competition.

HN19[] To effect anticompetitive harm, a defendant "must harm the competitive process, and thereby harm consumers. In contrast, harm to one or more competitors **[*836]** will not suffice." *Microsoft, 253 F.3d at 58*; see also *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Co., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. This distinction makes good sense, particularly in a competitive market where injury to a single competitor may not have a significant effect on overall competition due to the persistence of other rivals. However, competitors and competition are linked, particularly in the right market settings: "in a concentrated market with very high barriers to entry, competition will not exist without competitors." *Spirit Airlines, Inc. v. Nw. Airlines, Inc., 431 F.3d 917, 951 (6th Cir. 2005)*. Indeed, this is one reason that the behavior of monopolists faces more exacting scrutiny under the antitrust statutes. See *Eastman Kodak, 504 U.S. at 488* (Scalia, J., dissenting) ("Behavior that might otherwise not be of concern to the **[**47]** antitrust laws . . . can take on exclusionary connotations when practiced by a monopolist."); *Dentsply, 399 F.3d at 187* ("Behavior that otherwise might comply with ***antitrust law*** may be impermissibly exclusionary when practiced by a monopolist."); IIIB Areeda & Hovenkamp, supra, P 806e, at 423.

Before we proceed, we address a point of disagreement between the Commission, the dissenting commissioner, and the amici: the government's burden of proof in demonstrating harm to competition. The dissenting commissioner insisted that, given the high likelihood that an exclusive dealing arrangement is actually procompetitive, a plaintiff alleging illegal exclusive dealing must show "clear evidence of anticompetitive effect." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *51* (Wright, dissenting). Applying that standard, Commissioner Wright concluded that the government had not met its burden for several reasons, including that it had not sufficiently established that the Full Support Program caused the observed price effects. The Commission countered that Commissioner Wright sought "a new, heightened standard of proof for exclusive dealing cases" that had "no legal support." *Id. at *26* & n.12 (majority). Although McWane does not articulate its proposed burden of proof using the dissenting commissioner's **[**48]** language, it agrees in substance that the Commission did not prove harm to competition with sufficient certainty.

We agree with the Commission. Putting aside the possible economic merits of raising the standard of proof for exclusive dealing cases, we can find no foundation for this conclusion in the caselaw. ***HN20***[] The governing Supreme Court precedent speaks not of "clear evidence" or definitive proof of anticompetitive harm, but of "probable effect." *Tampa Elec., 365 U.S. at 329* (instructing courts to weigh the "probable effect of the [exclusive dealing] contract on the relevant area of effective competition" (emphasis added)); accord *ZF Meritor, 696 F.3d at 268* ("Under the rule of reason, an exclusive dealing arrangement will be unlawful only if its 'probable effect' is to substantially lessen competition in the relevant market." (quoting *Tampa Elec., 365 U.S. at 327-29*)). Indeed, this Court has often articulated the rule of reason -- the governing standard for evaluating exclusive dealing claims, *DeLong Equip. Co., 887 F.2d at 1508 n.12* -- by quoting the Supreme Court's instruction in *Board of Trade of Chicago v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*, to analyze the effects of the challenged conduct, "actual or probable." E.g., *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1334 n.8 (11th Cir. 2010)*; *Schering-Plough, 402 F.3d at 1064 n.12*.

Of course, the FTC's allegation is not merely that McWane engaged in exclusive dealing, but that it used exclusive dealing **[*837]** to maintain its monopoly **[**49]** power. In the monopolization context, courts have articulated the government's burden in terms of the causality that must be shown between the defendant's conduct and the anticompetitive harm. These formulations, too, are framed in terms of probability: "unlawful maintenance of a monopoly is demonstrated by proof that a defendant has engaged in anti-competitive conduct that reasonably appears to be a significant contribution to maintaining monopoly power." *Dentsply, 399 F.3d at 187* (emphasis added); accord Microsoft, 253 F.3d at 79. In Microsoft, HN21[] the D.C. Circuit found no case supporting the proposition that Sherman Act § 2 liability requires plaintiffs to "present direct proof that a defendant's continued monopoly power is precisely attributable to its anticompetitive conduct." Microsoft, 253 F.3d at 79. It noted that "[t]o require that § 2 liability turn on a plaintiff's ability or inability to reconstruct the hypothetical marketplace absent a defendant's anticompetitive conduct would only encourage monopolists to take more and earlier anticompetitive action." Id.; see also III Areeda & Hovenkamp, supra, P 657a2, at 162 ("[T]he government suitor need not show that competition is in fact less than it would be in some alternative universe in which the challenged conduct had not occurred. It is enough **[**50]** to show that anticompetitive consequences are a naturally-to-be-expected outcome of the challenged conduct.").

We agree with the Commission and our sister circuits that in these circumstances the government must show that the defendant engaged in anticompetitive conduct that reasonably appears to significantly contribute to maintaining monopoly power. As we've already discussed, because this determination is an economic conclusion, the Commission's finding on this count must be supported by substantial evidence.

a) Substantial Foreclosure

HN22[] "Substantial foreclosure" continues to be a requirement for exclusive dealing to run afoul of the antitrust statutes. Foreclosure occurs when "the opportunities for other traders to enter into or remain in [the] market [are] significantly limited" by the exclusive dealing arrangements." Microsoft, 253 F.3d at 69 (quoting Tampa Elec., 365 U.S. at 328) (internal quotation marks omitted). Traditionally a foreclosure percentage of at least 40% has been a threshold for liability in exclusive dealing cases. Jacobson, supra, at 362. However, some courts have found that a lesser degree of foreclosure is required when the defendant is a monopolist. See Microsoft, 253 F.3d at 70 ("[A] monopolist's use of exclusive contracts . . . may give rise to a § 2 violation **[**51]** even though the contracts foreclose less than the roughly 40% or 50% share usually required in order to establish a § 1 violation.").

In this case, both the Commission and the ALJ found that the Full Support Program foreclosed Star from a substantial share of the market. Although the Commission did not quantify a percentage, it did note that the two largest distributors, who together controlled approximately 50-60% of distribution, prohibited their branches from purchasing from Star (except through the Full Support Program exceptions) following the announcement of the Full Support Program. Indeed, HD Supply went so far as to cancel pending orders for domestic fittings that it had placed with Star. The Commission also observed that the third-largest distributor was initially interested in purchasing domestic fittings from Star, but followed suit soon after the Full Support Program was announced. Testimony in the record supports **[*838]** the Commission's conclusion that this pattern recurred with other dealers, even when Star promised lower prices than McWane. Thus, for example, U.S. Pipe refused to purchase domestic fittings from Star, despite a promise of lower prices, until September 2010. Likewise **[**52]** with TDG distributors. Executives at Groeniger and Illinois Meter also testified that the Full Support Program deterred them from dealing with Star. Although the Commission did not place an exact number on the percentage foreclosed, it found that the Full Support Program "tie[d] up the key dealers" and that the foreclosure was "substantial and problematic." McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *24 n.10.

These factual findings are all consistent with the ALJ's determinations, and all pass our deferential review. Nevertheless, McWane challenges the Commission's conclusion by arguing that Star's entry and growth in the market demonstrate that, as a matter of law, the Full Support Program did not cause substantial foreclosure. As before, when McWane raised a substantially similar claim to rebut the Commission's finding of monopoly power, this argument is ultimately unpersuasive. Again, HN23[] "[t]he test is not total foreclosure, but whether the challenged practices bar a substantial number of rivals or severely restrict the market's ambit." Dentsply, 399 F.3d at 191. Our sister circuits have found monopolists liable for anticompetitive conduct where, as here, the targeted rival gained market share -- but less than it likely would have absent the conduct. See Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 789-91 (6th Cir. 2002). As noted above, **[**53]** exclusive dealing measures that slow a rival's expansion can still produce consumer injury. See XI Areeda & Hovenkamp, supra, ¶ 1802c, at 76; accord Dentsply, 399 F.3d at 191; ZF Meritor, 696 F.3d at 271. Given the ample evidence in the record that the Full Support Program significantly contributed to key dealers freezing out Star, the Commission's foreclosure determination is supported by substantial evidence and sufficient as a matter of law.

b) Evidence of Harm to Competition

Having concluded that the Commission's finding of substantial foreclosure is supported by substantial evidence, we turn to the remainder of the Commission's evidence that McWane's Full Support Program injured competition. The record contains both direct and indirect evidence that the Full Support Program harmed competition. The Commission relied on both, and taken together they are more than sufficient to meet the government's burden. The Commission found that McWane's program "deprived its rivals . . . of distribution sufficient to achieve efficient scale, thereby raising costs and slowing or preventing effective entry." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *22*. It found that the Full Support Program made it infeasible for distributors to drop the monopolist McWane and switch to Star. This, the Commission found, deprived Star **[**54]** of the revenue needed to purchase its own domestic foundry, forcing it to rely on inefficient outsourcing arrangements and preventing it from providing meaningful price competition with McWane. *2014 FTC LEXIS 28, [WL] at *25*.

Perhaps the Commission's most powerful evidence of anticompetitive harm was direct pricing evidence. It noted that McWane's prices and profit margins for domestic fittings were notably higher than prices for imported fittings, which faced greater competition. Thus, these prices appeared to be supracompetitive. Yet in states where Star entered as a competitor, notably there was no effect on McWane's prices. Indeed, soon after Star entered **[*839]** the market, McWane raised prices and increased its gross profits -- despite its flat production costs and its own internal projections that Star's unencumbered entry into the market would cause prices to fall. *Id. at *27*. Since McWane was an incumbent monopolist already charging supracompetitive prices (as demonstrated by the difference in price and profit margin between domestic and imported fittings), evidence that McWane's prices did not fall is consistent with a reasonable inference that the Full Support Program significantly contributed to maintaining McWane's **[**55]** monopoly power.

McWane claims, however, that the government did not adequately prove that the Full Support Program was responsible for this price behavior. But as we've noted, McWane demands too high a bar for causation. While it is true that there could have been other causes for the price behavior, the government need not demonstrate that the Full Support Program was the sole cause -- only that the program "reasonably appear[ed] to be a significant contribution to maintaining [McWane's] monopoly power." *Dentsply, 399 F.3d at 187*. Moreover, ***HN24***[] under our deferential standard of review, the mere fact that "two inconsistent conclusions" could be drawn from the record "does not prevent [the Commission's] finding from being supported by substantial evidence." Consolo*, 383 U.S. at 620*.

The Commission also drew on testimony from Star executives that the Full Support Program deprived Star of the sales and revenue needed to invest in a domestic foundry of its own. These estimates were based in part on distributors' withdrawn requests for quotes or orders in the wake of the Full Support Program. Indeed, Star had identified a specific foundry to acquire and had entered negotiations to purchase it, but after the announcement of the Full Support Program, decided **[**56]** not to move forward with the purchase. Without a foundry of its own with which to manufacture fittings, Star was forced to contract with six third-party domestic foundries to produce raw casings -- a "more costly and less efficient" arrangement on account of higher shipping, labor, and logistical costs; smaller batch sizes; less specialized equipment; and various other factors. *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *25*. Star estimated that with its own foundry, it could have reduced costs and substantially lowered its domestic fittings prices.

Moreover, as the ALJ found, some customers, including HD Supply and Ferguson, were reluctant to purchase from a supplier that lacked its own foundry, thereby further inhibiting any challenge to McWane's market dominance. McWane I, 155 F.T.C. at 1157, 1160. Thus, the record evidence suggests that the Full Support Program stunted the growth of Star -- McWane's only rival in the domestic fittings market -- and prevented it from emerging as an effective competitor who could challenge McWane's supracompetitive prices.

We also consider it significant that alternative channels of distribution were unavailable to Star. In cases where exclusive dealing arrangements tie up distributors in a market, courts will often consider whether **[**57]** alternative channels of distribution exist. See *Dentsply, 399 F.3d at 193*; *Omega Envtl., 127 F.3d at 1162-63*; XI Areeda &

Hovenkamp, supra, ¶ 1821d4, at 203-09. If firms can use other means of distribution, or sell directly to consumers, then it is less likely that their foreclosure from distributors will harm competition. In Denstply, the Third Circuit found exclusive deals with distributors to be anticompetitive where direct sales of the market's products (artificial teeth) to consumers was not "practical or feasible in the market **[*840]** as it exists and functions." *399 F.3d at 193*. The Commission found the same in the domestic fittings market, and the dissent agreed. Thus, Star's foreclosure from the major distributors was particularly likely to harm competition in this market.

Finally, the clear anticompetitive intent behind the Full Support Program also supports the inference that it harmed competition. ***HN25***[] Anticompetitive intent alone, no matter how virulent, is insufficient to give rise to an antitrust violation. See *Microsoft, 253 F.3d at 60*. But, as this Court has said, "[e]vidence of intent is highly probative 'not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.'" *Graphic Prods. Distribs., Inc. v. ITEK Corp., 717 F.2d 1560, 1573 (11th Cir. 1983)* (quoting *Bd. of Trade of Chi., 246 U.S. at 238*). For **[**58]** a monopolization charge, intent is "relevant to the question whether the challenged conduct is fairly characterized as 'exclusionary' or 'anticompetitive' . . . . [T]here is agreement on the proposition that 'no monopolist monopolizes unconscious of what he is doing.'" *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)* (quoting *United States v. Aluminum Co. of Am., 148 F.2d 416, 432 (2d Cir. 1945))*; see also *Microsoft, 253 F.3d at 59* ("Evidence of the intent behind the conduct of a monopolist is relevant only to the extent it helps us understand the likely effect of the monopolist's conduct.").

In this case, the evidence of anticompetitive intent is particularly powerful. Testimony from McWane executives leaves little doubt that the Full Support Program was a deliberate plan to prevent Star from "reach[ing] any critical market mass that will allow them to continue to invest and receive a profitable return" by "[f]orc[ing] Star[] to absorb the costs associated with having a more full line before they can secure major distribution." Indeed, the plan was implemented as a reaction to concerns about the "[e]rosion of domestic pricing if Star emerges as a legitimate competitor." Although such intent alone is not illegal, it could reasonably help the Commission draw the inference that the witnessed price behavior was the (intended) result of the Full Support Program. **[**59]**

Not all of the evidence adduced in this case uniformly points against McWane. For example, as we've previously noted, Star was not completely excluded from the domestic fittings market; it was able to enter and grow despite the presence of the Full Support Program. However, it is still perfectly plausible to conclude on this record that Star's growth was meaningfully (and deliberately) slowed and its development into a rival that could constrain McWane's monopoly power was stunted. Cf. *Microsoft, 253 F.3d at 71* (stating that defendant's exclusionary conduct kept the rival's product "below the critical level necessary for [the targeted rival] or any other rival to pose a real threat to [the defendant's] monopoly"). Also, the Full Support Program was not a binding contract of a lengthy duration. As noted above, these characteristics do not render the program presumptively lawful, but they also do not point in the FTC's favor as an indirect indicator of anticompetitive harm. Nevertheless, the direct and indirect evidence of anticompetitive harm is more than sufficient to pass our deferential review. Again, the Commission's conclusion that the Full Support Program harmed competition is supported by substantial **[**60]** evidence and sound as a matter of law.

3. Procompetitive Justifications

HN26[] Having established that the defendant's conduct harmed competition, the **[*841]** burden shifts to the defendant to offer procompetitive justifications for its conduct. As the Commission explained, "[c]ognizable justifications are typically those that reduce cost, increase output or improve product quality, service, or innovation." *McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *30* (collecting cases); see also XI Areeda & Hovenkamp, supra, ¶ 1822a, at 213 ("A justification is reasonable if it reduces the defendant's costs, minimizes risk, or lessens the danger of free riding . . . ."). Such justifications, however, cannot be "merely pretextual." *Morris Commc'ns, 364 F.3d at 1296*; see *Eastman Kodak, 504 U.S. at 483-84*.

McWane offers two; neither is persuasive. First, McWane says that the Full Support Program was necessary to retain enough sales to keep its domestic foundry afloat. The Commission rightly rejected this argument; as other courts have recognized, such a goal is "not an unlawful end, but neither is it a procompetitive justification."

Microsoft, 253 F.3d at 71. And as the Commission noted, the steps McWane took to preserve its sales volume "were not the type of steps, such as a price reduction, that typically promote consumer welfare by increasing overall market output." McWane II, 2014 FTC LEXIS 28, 2014 WL 556261, at *30. McWane's sales "did **[**61]** not result from lower prices, improved service or quality, or other consumer benefits," but rather from reducing the output of its only rival. Id.

Second, McWane offers the more sophisticated argument that the Full Support Program was needed to keep Star from "'cherrypick[ing]' the core of [the] domestic fittings business by making only the top few dozen fittings that account for roughly 80% of all fittings sold," while leaving McWane alone to sell the remaining 20%. But even if McWane had good business reasons to adopt such a strategy, and such conduct could result in increased efficiency in the right market conditions, McWane offers no reasons to think that such conditions exist in this case. As the Commission noted, a full-line supplier like McWane could instead compete "by lowering its price for [the more common] products and increasing its price for the less common products." 2014 FTC LEXIS 28, [WL] at *31. Again, McWane has not explained why such a strategy would not work, how the collapse of the full line of products would harm consumers, or why full-line forcing was instead necessary. Thus, this argument is also unpersuasive.

Moreover, McWane's internal documents belie the notion that the Full Support Program was designed **[**62]** for any procompetitive benefit. As the Commission noted, McWane executives discussed the Full Support Program in terms of maintaining domestic prices and profitability by preventing Star from becoming an effective competitor. For example, McWane executive Richard Tatman said that his "chief concern" with Star becoming a domestic fittings supplier was that "the domestic market [might] get[] creamed from a pricing standpoint," and identified the biggest risk factor of Star's entry as the "[e]rosion of domestic pricing if Star emerged as a legitimate competitor." In a document encouraging the adoption of an exclusive dealing arrangement, Tatman opined that not doing so would allow Star to "drive profitability out of our business." And in an e-mail, he stated, with regard to Star, "we need to make sure that they don't reach any critical mass that will allow them to continue to invest and receive a profitable return." ***HN27***[] The Supreme Court has looked to evidence that proffered justifications for conduct "are merely . . . an excuse to cover up different and anticompetitive reasons." Jacobson, supra, at 367-68 (citing Eastman Kodak, 504 U.S. at 483). McWane's damning internal documents seem to be powerful **[*842]** evidence that its procompetitive justifications are **[**63]** "merely pretextual."

IV.

All told, the Commission's factual and economic conclusions are supported by substantial evidence and its legal conclusions comport with the governing law. The Commission's determination of the relevant market and its findings of monopoly power and anticompetitive harm pass our deferential review, and we agree that the conduct amounts to a violation of Section 5 of the Federal Trade Commission Act.

Accordingly, we AFFIRM.

Opinion

MEMORANDUM

Diamond, J.

Generic drug manufacturers, drug wholesalers, and retail pharmacies allege that Defendants Warner Chilcott and Mayne Pharmaceuticals have illegally thwarted competition in the sale of generic drugs. Defendants produce and sell Doryx, the branded version of delayed-release doxycycline hyclate, a prescription antibiotic used primarily to treat severe acne. Plaintiffs allege that Defendants conspired to protect their monopoly by "product hopping": making changes to the drug that ostensibly provided no significant improvements, but prevented pharmacists from automatically filling Doryx prescriptions with generic equivalents. Direct purchaser Plaintiffs, indirect purchaser Plaintiffs, and retailer Plaintiffs have all concluded modest settlements with Defendants, leaving generic drug maker Mylan Pharmaceuticals as the sole remaining Plaintiff. The Parties have filed cross motions for summary judgment. I will grant Defendants' Motions for Summary Judgment, deny Plaintiff's Motion, and enter judgment in favor of Defendants on all counts.

THE PARTIES

Plaintiff Mylan Pharmaceuticals is the third-largest generic pharmaceutical company in the world. (Doc. No. 84 at 1.) Mylan **[*6]** has a "global portfolio of approximately 1,100 different products." (Id.) In 2011, Mylan reported $6.13 billion in revenue and estimated that one of every eleven prescriptions dispensed in the United States was for a Mylan product. (Id. at 3.) Defendant Mayne Pharmaceuticals is an Australian-based pharmaceutical company that has six products, including Doryx. Mayne reported $50.1 million in sales in 2011. (Id. at 4.) Defendant Warner Chilcott is a United States-based pharmaceutical company that distributes and promotes Doryx domestically pursuant to a License Agreement with Mayne. Warner Chilcott reported $2.7 billion in revenue in 2011, 93% of which came from eight products. (Id. at 4.)

BACKGROUND

Several oral tetracyclines are used to treat acne: doxycycline monohydrate, doxycycline hyclate, and minocycline. (W.C. Mot. S.J. at 22-23.) Doryx is the branded form of delayed-release doxycycline hyclate. (Id.) To decide the Motions before me, I must consider the product history of Doryx—branded and generic. In doing so, I have set out those record facts that are undisputed and construed them in the light most favorable to Mylan. I have disregarded Mylan's allegations that are without evidentiary support. See *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* **[*7]** ; *Jones v. UPS, 214 F.3d 402, 407 (3d Cir. 2000)* ("unsupported allegations" cannot defeat summary judgment). I have accepted as true Mylan's remaining factual allegations and have construed them in the light most favorable to Mylan.

I. Regulatory Procedures

The Food, Drug and Cosmetic Act requires Food and Drug Administration approval before any drug may be marketed. *21 U.S.C. § 301 et seq.* The manufacturer must submit to the FDA a "New Drug Application" and prove the drug's safety and efficacy through extensive clinical trials. The FDCA originally obligated an applicant seeking to market a new generic drug to meet the same requirements as one seeking FDA approval of a branded drug, including full clinical trials. With the 1984 adoption of the Hatch-Waxman Act, however, generic manufacturers could submit an "Abbreviated New Drug Application" to expedite the approval process and lower costs. See Drug Price Competition and Patent Term Restoration Act of 1984, *Pub. L. No. 98-417, 98 Stat. 1585*. An "ANDA" filer must show only that its drug is bioequivalent to an already approved "reference" drug. Jessie Chang, Note, An Antitrust Analysis of Product Hopping in the Pharmaceuticals Industry, *108 Colum. L. Rev. 1471, 1479 (2008)*.

If the generic drug is the branded drug's bioequivalent and the two are the same dosage, strength, **[*8]** and form, the FDA identifies the generic as the branded version's "AB-rated" equivalent. *21 U.S.C. § 355*. Most states have incorporated this AB-rating into their own statutes. Under these "Drug Product Selection" laws, a pharmacist who fills a prescription for a branded drug can—or, in some states, must—substitute an AB-rated generic version (which is usually less expensive than the branded version), unless the prescribing physician notes "dispense as written."

Chang, Product Hopping, at 1479. Twelve states require pharmacists to substitute generic drugs, unless the physician prescribes otherwise. Thirty-nine states permit substitution in such circumstances. (W.C. Resp. to Mylan S.J. at 30.)

II. Doryx Development

Immediate-release doxycycline hyclate has been available to treat acne since the 1960s, when Pfizer launched Vibramycin. (W.C. Resp. to Mylan S.J. at 5.) Doryx capsules—delayed-released doxycycline hyclate—were first approved by the FDA in 1985 and launched by Mayne that same year. The capsules were not patent-protected. (Id.) They included enteric-coated pellets which would allow delayed release, intended to reduce the nausea and stomach irritation caused by immediate-release doxycycline. (Mayne S.J. at 5.) Mayne also produced **[*9]** an authorized generic version of Doryx. (W.C. Resp. to Mylan S.J. at 6.) Warner Chilcott, then a subsidiary of Warner Lambert, distributed branded and generic Doryx for Mayne in the United States. (Id.)

Sales of branded and generic Doryx capsules were sluggish in the early 1990s. (Id.) In 1994, Mayne (then known as F.H. Faulding & Co.), and Warner Chilcott entered into an exclusive license agreement intended to increase Doryx sales: (1) Mayne agreed to take its generic Doryx off the market and act as the exclusive manufacturer and supplier to Warner Chilcott of branded Doryx; (2) Warner Chilcott agreed to distribute branded Doryx in the United States and to market Doryx through targeted promotions to dermatologists in exchange for the rights to all income from the domestic sales of the drug. (W.C. Ex. 121.) Mayne agreed not to sell Doryx domestically, provided Warner met minimum Doryx purchase and sales thresholds. (Mayne S.J. at 9.) Although the License Agreement originally ran from 1997 to 2004, Mayne and Warner Chilcott have renewed the Agreement several times and it remains in force today. (Id. at 10.) The Agreement increased Doryx sales more than twenty-fold by 2005. (W.C. Resp. to Mylan S.J. at 33-34 **[*10]** & Table 2.)

III. "Product Hopping"

The 1997 License Agreement obligated Defendants to enter into negotiations "with respect to a new agreement pursuant to which [Mayne] would develop a doxycycline hyclate delayed release tablet" for Warner Chilcott to distribute in the United States. (W.C. Ex. 121 at 6.) That tablet development took over six years, during which Mayne: (1) reformulated delayed-release doxycycline hyclate, and (2) added a stabilizing coat solution to improve the drug's shelf-life. (Mayne S.J. at 16; W.C. Exs. 226, 191.)

In May 2005, the FDA approved Defendants' NDA for Doryx 75 and 100 mg tablets. (W.C. Ex. 211.) The tablets were introduced in September 2005, and Defendants took steps to switch the market for Doryx capsules to Doryx tablets. (Mylan S.J. at 12.) They: (1) stopped selling the capsules to wholesalers (Mylan Ex. 59); (2) removed Doryx capsules from the Warner Chilcott website (Mylan Ex. 62); (3) worked with retailers to "auto-reference" the Doryx tablet whenever a doctor filed a Doryx prescription (Mylan Ex. 61); (4) informed wholesalers, retailers, and doctors that "Doryx Capsules have been replaced by Doryx Tablets" (Mylan Ex. 63); (5) destroyed some of their remaining capsule inventory **[*11]** (Mylan Ex. 73); and (6) bought back some portion of the remaining capsule inventory (Mylan Ex. 68, 69, 71).

Beginning in January 2007, Defendants worked to develop a 150 mg strength Doryx tablet with a single "score"—a groove running across the tablet's surface. The "score" allows the user to split a 150 mg Doryx tablet into two 75 mg doses. Defendants submitted a supplemental NDA for the 150 mg single-scored tablet in December 2007. (W.C. Ex. 358.) The FDA granted its approval in June 2008 and Defendants launched the 150 mg Doryx single-scored tablet a short time later. (W.C. Ex. 216.)

In January 2009, Defendants stopped promoting the 75 and 100 mg tablets, and began an "aggressive marketing program[]" for the 150 mg dose tablet. (Mylan Ex. 130.) By late March 2009, the 150 mg tablet represented 71% of all new Doryx prescriptions and 61% of total Doryx prescriptions. (Id.) In May 2010, Warner Chilcott reported to investors that the company was able to transfer about 90% of its Doryx franchise into the 150 mg tablet. (Mylan Ex. 132.)

While they developed the 150 mg tablet, Defendants also developed scored versions of their existing 75 and 100 mg Doryx tablets. Defendants submitted the **[*12]** supplemental NDAs for 75 and 100 mg single-scored Doryx tablets in June and August 2008, and received approval in February and March 2009. (W.C. Exs. 360, 361, 248, 123.) Warner Chilcott stopped distributing the 75 and 100 mg single-scored Doryx tablets in March and August 2011, when the great majority of Doryx prescriptions were for the 150 mg tablet. (W.C. Exs. 362, 363.)

In March 2010, Defendants began developing a dual-scored 150 mg Doryx tablet, which could be broken into two or three pieces, thus providing dosing options of 50, 100, and 150 mg. (W.C. Ex. 251.) The firms submitted the supplemental NDA for the dual-scored 150 mg tablet in February 2011. (W.C. Ex. 223.) After receiving approval in September 2011, Warner Chilcott stopped distributing single-scored 150 mg tablets. (Id.; Mylan S.J. at 28.)

Finally, Defendants introduced an unscored 200 mg Doryx tablet in April 2013 as a once-a-day dosing regimen for chlamydia. (W.C. Resp. to Mylan S.J. at 17-18.) Today, Defendants produce and sell the 200 mg and 150 mg dual-scored Doryx tablets in the United States. (Id. at 18.)

IV. Mylan's Development of Generic Doryx

Although Mylan first began developing a generic Doryx capsule in April 2003, by the time Doryx **[*13]** tablets launched in September 2005, Mylan still had no viable generic capsule. (W.C. Resp. to Mylan S.J. at 19-21.) Mylan did not abandon the capsule effort until January 2006, after the FDA had approved a generic Doryx capsule manufactured by Sandoz, which launched in July 2006. (Id.; W.C. Exs. 261, 382.)

By September 2006, Mylan had prepared the tablet formulation for a wholly-coated Doryx tablet to achieve delayed release. (Mylan S.J. at 27.) In March 2008, Mylan submitted an ANDA for its generic 75 and 100 mg Doryx tablets; the FDA granted its approval in December 2010. (Mylan Ex. 207.)

While Mylan's ANDA application was pending in March 2009, Mayne and Warner Chilcott added score lines to their 75 and 100 mg tablets. The Parties dispute whether this alone delayed the market entry of Mylan's generic. (Mylan S.J. at 27.) It appears that at least part of the delay resulted from the FDA's issuance to Mylan of several deficiency notices unrelated to the scoring issue. (W.C. Ex. 377 (timeline of Mylan tablet development); Mylan Ex. 209, 210, 110.) I will nonetheless resolve this dispute in Mylan's favor, and find that the decision to add score lines to branded 75 and 100 mg Doryx tablets delayed the entry of Mylan's **[*14]** generic until December 2010. (Mylan Ex. 213.)

At that time, while Mylan's were the only generic Doryx tablets on the market, the FDA—acting in accordance with federal law—granted Mylan 180 days exclusivity, preventing other generic drug manufacturers from introducing their own generic versions of Doryx. *21 U.S.C. § 355*; (Mylan Ex. 213 (FDA approval of 75 and 100 mg generics).) When Defendants stopped selling 75 and 100 mg Doryx tablets in 2011, Mylan was the exclusive seller of 75 and 100 mg tablets—branded or generic—for two and a half years. (W.C. Opp. at 23.) During that period, Mylan raised the tablet prices to levels that were higher than Defendants' last reported prices for Doryx. (W.C. Resp. to Mylan S.J. at 23; W.C. Ex. 267.)

After Defendants' June 2008 launch of a 150 mg single-scored tablet, Mylan immediately began working on a generic version, and submitted an ANDA in December 2008. The FDA tentatively granted approval in June 2011. (Mylan Exs. 217-219.)

Finally, Defendants launched the dual-scored 150 mg tablet in September 2011 and petitioned the FDA, asking—as they had with the single-scored 150 mg tablet—that ANDA generic applicants match the dual scoring. (Mylan Ex. 222.) An e-mail from Mayne's CFO **[*15]** predicted that it was "likely that the FDA will make Mylan alter their generic to be a dual scored product." (Mylan Ex. 146.) The FDA rejected the request, however, noting that it might approve an ANDA for a 150 mg generic Doryx with a single score. (Mylan Ex. 149.) The FDA determined in

February 2012 that Mylan's single-scored 150 mg tablet would be AB-rated—at least initially—to Defendants' dual-scored 150 mg tablet. (Mylan Ex. 221.) Mylan thus launched its first 150 mg generic Doryx in February 2012. (Id.)

V. The Challenged "Hops"

Mylan alleges that each of the following changes to Doryx was an anti-competitive product hop:

1. 2005 change from 75 and 100 mg capsules to 75 and 100 mg tablets;
2. 2008 introduction of a single-scored 150 mg tablet;
3. 2009 addition of a single score to 75 and 100 mg tablets; and,
4. 2011 change from single to dual score on the 150 mg tablet.

(Mylan S.J. at 11-21.)

Defendants insist that each of these product changes improved Doryx and benefited consumers. (W.C. Resp. to Mylan S.J. at 4.) Defendants offer evidence that they had legitimate business reasons for each product change, including: (1) shelf-life stability issues with Doryx capsules; (2) the increased risk of esophageal **[*16]** injuries with capsules; (3) concern from French and Swedish regulators over the risk of esophageal injury; (4) a putative class action in the United States alleging esophageal injury from capsules; and, (5) dosing flexibility. (Resp. to Mylan S.J. at 4-5, 7-13.)

Mylan counters that any purported "legitimate business justifications . . . collapse[] under close scrutiny." (Mylan S.J. at 2.) Mylan has presented evidence that the stability problems could have been solved without switching to tablets. (Id. at 24-25.) Moreover, despite pressure from foreign regulators over the risk of esophageal injury, Doryx tablets were introduced only in the United States. (Id. at 22.) Doryx capsules continue to be sold in other jurisdictions and, as recently as 2011, Defendants considered re-introducing capsules into the United States. (Mylan Ex. 160, 172.) The products liability litigation to which Defendants refer was a putative class action that never got past the certification stage. (Mylan Reply at 10.)

Mylan has also presented evidence that Defendants' product changes were intended to delay generic market entry. Internal Mayne and Warner Chilcott documents provide that Doryx product changes were a "defen[s]e strategy to generic competition." **[*17]** (Mylan Ex. 31; see also Mylan Ex. 49 (tablet development is "an anti-generic strategy for Doryx"); Mylan Ex. 53 ("Th[e] tablet is to be utili[z]ed as an anti-generic strategy should competition to the existing capsule eventuate."); Mylan Ex. 107 (tablet scoring is an "additional product protection strategy"); Mylan Ex. 130 ("This dominance of Doryx by the 150 mg dose strength . . . provides some time for WC and [Mayne] to complete developments for new dose forms further discouraging generic competition.").)

That Defendants' product "hops" provided some benefit to consumers seems undeniable. For instance, the scoring of Doryx tablets made it easier to reduce the medicine's dosage. Nonetheless, at summary judgment, I am compelled to find that Defendants made the Doryx "hops"—even the six-year developmental "hop" from capsules to tablets—primarily to defeat generic competition. See *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 316 n.12 (3d Cir. 2010)* (in an antitrust case, disputed factual questions about reasonableness may not be resolved at summary judgment but usually should be left to jury).

PROCEDURAL HISTORY

Plaintiffs—then generic drug manufacturers and pharmaceutical wholesalers—filed the instant action on July 6, 2012. (Doc. No. 1, Compl.) The gravamen of their **[*18]** Complaint was that Defendants took improper advantage of the regulatory system by making "tactical modifications" to Doryx to thwart generic competition. (Mylan S.J. at 1.) In denying Defendants' Motions to Dismiss, I deferred until summary judgment addressing the question of whether product hopping is anticompetitive. (Doc. No. 280.)

On April 1, 2013, Direct Purchaser Plaintiffs and Indirect Purchaser Plaintiffs filed Motions for Class Certification, which Defendants opposed. (Doc. Nos. 151, 155, 228, 247.) While the Motions were pending, the Parties began settlement discussions. Direct Purchaser Plaintiffs reached a settlement on December 24, 2013. (Doc. No. 452.) I provisionally certified a settlement class on February 18, 2014 and, after a final fairness hearing, granted final certification on September 15, 2014. (Doc. No. 665.) The Retailer Plaintiffs filed a Stipulation of Dismissal on May 27, 2014. (Doc. No. 638.) Indirect Purchaser Plaintiffs reached a settlement on June 27, 2014, which I preliminarily approved on September 4, 2014 and, after a fairness hearing, I granted final certification on January 23, 2015. (Doc. No. 679.)

As sole remaining Plaintiff, Mylan alleges: (1) monopolization **[*19]** under *Section 2* of the Sherman Act; (2) attempted monopolization under *Section 2*; (3) an agreement between Warner Chilcott and Mayne in restraint of trade under *Section 1* of the Sherman Act; and (4) tortious interference under Pennsylvania state law. (Compl.) The Parties have filed cross motions for summary judgment.

SUMMARY JUDGMENT STANDARDS

Upon motion of any party, summary judgment is warranted "if there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. The moving party must show the absence of any genuine issue of material fact. *Celotex, 477 U.S. at 323*. An issue is material only if it could affect the result of the suit under governing law. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. I "must view the facts in the light most favorable to the non-moving party," and make every reasonable inference in that party's favor. *Hugh v. Butler Cnty. Family YMCA, 418 F.3d 265, 267 (3d Cir. 2005)*. If I then determine that the moving party is entitled to judgment as a matter of law, summary judgment is appropriate. *Celotex, 477 U.S. at 322*.

DISCUSSION

I. *Section 2* Claim

It is unlawful to monopolize, attempt to monopolize, or conspire to monopolize interstate or international commerce. *15 U.S.C. § 2*. The Sherman Act protects competition, not competitors. *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 338, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*; *Brunswick Corp. v. Pueblo Bowl O-Mat, Inc., 429 U.S. 477, 484, 488-89, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Indeed, conduct that makes it more difficult for competitors to keep pace—even **[*20]** conduct that actively harms competitors—is not proscribed by the Sherman Act unless it harms competition itself. *Eichorn v. AT&T Corp., 248 F.3d 131, 140 (3d Cir. 2001)* ("[A]n individual plaintiff personally aggrieved by an alleged anti-competitive agreement has not suffered an antitrust injury unless the activity has a wider impact on the competitive market.").

A. Monopolization Claim

To establish monopolization, Mylan must prove: (1) possession of monopoly power in the relevant market, and (2) the willful acquisition or maintenance of that power by means other than a superior product, business acumen, or historic accident. *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 306 (3d Cir. 2007)*. Here, Mylan can prove neither element.

1. Monopoly Power

A company has monopoly power if it can profitably raise prices without causing competing firms to expand output and drive down prices. *Harrison Aire, Inc. v. Aerostar Int'l, Inc., 423 F.3d 374, 380 (3d Cir. 2005)*. Such power can be proven directly—through evidence of control over prices and the ability to exclude competition—or indirectly through evidence of a high market share. *Broadcom Corp., 501 F.3d at 307 n.3*. To survive a motion for summary judgment, Mylan must present "economically plausible evidence" supporting its claim that Defendants held monopoly power. *Harrison Aire, Inc., 423 F.3d at 380*.

Direct evidence of monopoly power is "only rarely available." *Id. at 381*. Nonetheless, "[t]he existence of monopoly power may **[*21]** be proven through direct evidence of supracompetitive prices and restricted output." *Broadcom Corp., 501 F.3d at 307*. "[T]o support a claim that defendants set supra-competitive prices, antitrust plaintiffs must provide an analysis of the defendant's costs, and show that the defendant had an 'abnormally high price-cost margin' and that they 'restricted output.'" *Carpenter Tech. Corp. v. Allegheny Technologies Inc., No. 08-2907, 2011 U.S. Dist. LEXIS 112556, 2011 WL 4528303, at *12 (E.D. Pa. Sept. 30, 2011)* (quoting *Geneva Pharms. Tech. Corp. v. Barr Labs, Inc., 386 F.3d 485, 500 (2d Cir. 2004))*. "[W]ithout evidence that sheds light on material factors such as [the alleged monopolist's] price relative to its total costs (marginal and fixed) and whether output was restricted, monopoly power cannot be found as a matter of law." *In re Remeron Direct Purchaser Antitrust Litig., 367 F. Supp. 2d 675, 681 n.10 (D.N.J. 2005)*.

Mylan has not made a serious effort to present direct evidence of Defendants' monopoly power. To begin, Mylan offers no evidence of Defendants' "price-cost margins" for Doryx, nor does it explain whether those margins were abnormally high. (Mylan S.J. at 32.) Mylan's economic expert, Dr. Rubenfeld, elected to forego any analysis of Defendants' margins because, as he opined, other available evidence of monopoly power was "more compelling," and margins are "difficult to measure" and "imperfect indicators of market power." (Mylan Ex. 2, Rubenfeld Rep. at 34-35.) Dr. Rubenfeld nonetheless states that at least some of Defendants' data suggested a margin of 83% in the **[*22]** second quarter of 2006—without explaining whether that figure is abnormally high. (Id. at 35.) Regardless of whether or not evidence of Defendants' marginal and fixed costs was "compelling" or "difficult to measure," it is still required to prove monopoly power directly. *Carpenter Tech. Corp., 2011 U.S. Dist. LEXIS 112556, 2011 WL 4528303, at *12*. Mylan has not made such a showing. Mylan also fails to show that Defendants restricted Doryx output to maintain monopoly profits, and fails to discuss the quantity of Doryx Defendants manufactured during the relevant period. (Mylan S.J. at 32.) In these circumstances, Mylan has not presented plausible direct evidence of market power.

Mylan thus must prove with indirect evidence that Defendants possessed monopoly power. *Harrison Aire, Inc., 423 F.3d at 381*. Mylan must first define the relevant market in which Defendants were alleged monopolists. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*; see also *Broadcom Corp., 501 F.3d at 307* ("The scope of the market is a question of fact as to which the plaintiff bears the burden of proof."). Mylan must then produce evidence of Defendants' "dominant share of that market, and of high barriers to entry." *Harrison Aire, Inc., 423 F.3d at 381*.

The boundaries of the relevant product market are determined by a product's reasonable interchangeability of use between the product and its substitutes. *Queen City Pizza, Inc., 124 F.3d at 436*. "Interchangeability implies that one product is roughly **[*23]** equivalent to another for the use to which it is put; while there may be some degree of preference for the one over the other, either would work effectively." Id. (quoting *Allen-Myland, Inc. v. Int'l Bus. Mach. Corp., 33 F.3d 194, 206 (3d Cir.1994))*. Products in a relevant market are also characterized by cross-elasticity of demand; that is, whether "the rise in the price of a good within a relevant product market would tend to create a greater demand for other like goods in that market." Id. (quoting *Tunis Bros. Co., Inc. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991))*. Courts are reluctant to find single-product markets, noting that every manufacturer in a single-product market will have monopoly power. *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 480 (3d Cir. 1992)* (en banc) ("Except in rare circumstances, courts reject market definitions consisting of one supplier's products where other brands compete."); *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 118 (3d Cir. 1980)*. A proposed market is legally insufficient if it "clearly does not encompass all interchangeable substitute products." *Queen City Pizza, 124 F.3d at 436*.

Mylan urges a single-product market: branded and generic Doryx. (Mylan S.J. at 34.) Within this "market," Defendants held 100% of sales until generic entry, and currently "hold over 60% of sales." (Id. at 36.) Mylan excludes from its proposed market all other oral tetracyclines prescribed for acne, including branded and generic forms of immediate-release doxycycline hyclate, doxycycline monohydrate, **[*24]** and minocycline hydrochloride. Defendants counter that the relevant market necessarily includes these oral tetracyclines. (W.C. S.J. at 22.) Within this market, it appears that Defendants' market share never exceeded 18%. (Id. at 29.)

In seeking to prove the relevant market, Mylan relies almost entirely on two expert reports. One is authored by economist Phillip Nelson, who opines that acne treatment is "highly individualized" and that Doryx has "unique characteristics that differentiate it from other antibiotics," including a distinct gastrointestinal side-effect profile due to Doryx's delayed-release coating. (Mylan Ex. 19, Nelson Rep. at 18, 21, 26.) Dr. Nelson acknowledges, however, that these "other" drugs are "similarly effective" at treating acne. (Id. at 21.) The second report, prepared by dermatologist Mark Jackson, makes many of the same points. Dr. Jackson opines that effective acne treatment must be "tailored to the patient." (Mylan Ex. 239, Jackson Rep. at 13.) Dr. Jackson believes that Doryx is not "functionally interchangeable" with other tetracyclines given differences in "tolerability and side effects." (Id. at 24.) Mylan argues that its evidence, "at a minimum" establishes that Doryx is a "relevant antitrust submarket under *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*." (Mylan S.J. at 34.)

An expert report that **[*25]** has no record support cannot defeat summary judgment. *Advo, Inc. v. Philadelphia Newspapers, Inc., 51 F.3d 1191, 1198 (3d Cir. 1995)* (expert testimony without a factual foundation cannot defeat a motion for summary judgment); *Rosefielde v. Falcon Jet Corp., 701 F. Supp. 1053, 1070 (D.N.J. 1988)* ("[A]ntitrust plaintiff may not be allowed to defeat a motion for summary judgment with an expert report that lacks factual support in the record." (citing *Pennsylvania Dental Ass'n v. Med. Serv. Ass'n of Pennsylvania, 745 F.2d 248, 262 (3d Cir. 1984)))*.

The record abounds with uncontradicted evidence—some of it Mylan's—confirming and reconfirming the interchangeability of Doryx with other oral tetracyclines. There is a consensus among dermatologists that all oral tetracyclines treat acne with similar effectiveness and so are interchangeable for that purpose. (See, e.g., W.C. Ex. 38 at 10.) The FDA has approved virtually identical labeling for most of these drugs, stating that in cases of "severe acne" the drugs "may be useful adjunctive therapy." (W.C. App. 2 (collecting label information).)

Managed care organizations have sought to constrain patients to substitute Doryx with other, less costly tetracyclines to treat acne. Some organizations have removed Doryx as a reimbursable medication; others have limited any reimbursement. (W.C. S.J. at 26.) A number of managed care organizations sent notices to healthcare providers urging them to substitute other oral **[*26]** tetracyclines for Doryx. (Id. at 26-27.) The University of Pittsburgh Health Plan, for instance, characterized generic immediate-release doxycycline, tetracycline, and minocycline as "substitutes for Doryx," and actively encouraged physicians to switch from Doryx to these other drugs. (W.C. Ex. 64; see also W.C. Ex. 45 (Cigna); W.C. Ex. 39 (BCBS Florida); W.C. Ex. 21.).) Indeed, Mylan's own expert confirmed that Doryx is but one of a class of antibiotics used to treat acne. (See, e.g., Mylan Ex. 22 at 16 (noting other oral antibiotics used to treat acne).)

Years of internal marketing documents further confirm that tetracyclines are reasonable substitutes for one another. Defendants consistently defined the market in which Doryx competed as including other tetracyclines. In 1997, when Defendants began planning the branded strategy for Doryx and the development of Doryx tablets, they noted that capturing 20% of the then 800,000 prescriptions for Vibramycin (the branded version of immediate-release doxycycline) would result in "over $13 million in annualized Doryx sales." (W.C. Ex. 131.) The Doryx 2008 Brand Plan noted that Doryx had a 12% market share among its competitors—Adoxa, Dynacin, Solodyn, **[*27]** Oracea, generic minocycline, and generic doxycycline. (W.C. Ex. 92.) Defendants' competitors defined the market in the same fashion. (See, e.g., W.C. Ex. 70 (internal Foguera documents describing Adoxa as competing with Doryx and other tetracyclines); W.C. Ex. 72 (internal Aqua documents describing Monodox as competing with Doryx and other tetracyclines); W.C. Ex. 83 (internal Medicis documents describing Solodyn/Dyancin as competiting with Doryx and other tetracyclines).) Finally, Mylan itself repeatedly listed different tetracyclines in the "Same/Similar" product category in internal product analyses. (W.C. App. 4H, 4I & 4J.)

Advertising also confirms that oral tetracyclines are effective substitutes for each other. In an advertisement titled "Facts Don't Lie," Adoxa stated that there "is no clinical data to support the efficacy of Doryx over any other doxycycline product." (W.C. Ex. 69.) When Adoxa introduced a single-scored 150 mg tablet before Doryx, it boasted that Adoxa was the "1st and only doxycycline scored tablet." (W.C. Ex. 87; see also W.C. Ex. 71 (Oracea ads attacking Doryx); W.C. Ex. 72 (Mondox ad campaign attacking Doryx).) In response, Defendants emphasized that Doryx **[*28]** is superior to other oral tetracyclines. A 2006 Doryx ad, for example, touted the advantages of Doryx over Oracea, including dosing flexibility, safety, and value. (W.C. Ex. 60.)

Finally, Defendants produced evidence of cross-elasticity of demand between Doryx and other oral tetracyclines. (W.C. Ex. 53, Addanki Rep. at 41-46.) From July 2005 to February 2008, Defendants offered a "fixed-amount coupon" for Doryx to help patients offset their co-pays. (Id. at 41.) In February 2009, Defendants discontinued the fixed-amount coupon and began offering "pay no more" cards, which paid all but $25 of a patient's Doryx costs. (Id.) Defendants switched back to a less generous fixed-amount coupon in 2011, after concluding that the pay no more cards were too expensive. (Id. at 42) In response, doctors, pharmacists, and patients switched from Doryx to other oral tetracyclines. These decreased sales caused Defendants to reverse course; in August 2011, they went back to the pay no more cards. (Id. at 42.) A regression analysis of these events confirms the cross-elasticity of demand: when Defendants increased the price of Doryx, its sales decreased and the sales of other oral tetracyclines increased. There was "a statistically significant decline **[*29]** in the new prescriptions for Doryx during the first seven months of 2011 when the fixed subsidy coupon program structure was in effect," and a "statistically significant increase in the new prescriptions for Adoxa, generic immediate-release doxycycline hyclate, and generic immediate-release doxycycline monohydrate, as well as generic delayed-release doxycycline hyclate." (Id. at 44.) Mylan argues that this evidence is insufficient because there was "no clear pattern of substitution," ignoring that Mylan itself carries the burden of defining the relevant market. (Mylan Resp. to W.C. S.J. at 23.) Mylan cannot dispute, however, that an increase in Doryx's price in 2011 caused a statistically significant increase in the sales of at least some oral tetracyclines that ostensibly could not serve as Doryx substitutes.

Mylan argues that Doryx is not reasonably interchangeable with other oral tetracyclines because doctors have unique preferences in prescribing antibiotics to treat acne, and Doryx has a unique side effect profile that differentiates it from other oral tetracyclines. (Mylan S.J. at 34-36.) These subtle differences, however, do not mean that other oral tetracyclines are not a reasonable substitute for Doryx. **[*30]** Interchangeability is defined by rough equivalence, not perfect correspondence. *Queen City Pizza, Inc., 124 F.3d at 436*; see also *Town Sound & Custom Tops, Inc., 959 F.2d at 480* ("[U]niqueness confers economic power only when other competitors are in some way prevented from offering the distinctive product themselves."). Moreover, even if there are patients for whom Doryx is a preferred treatment, the "test for a relevant market is not commodities reasonably interchangeable by a particular plaintiff, but 'commodities reasonably interchangeable by consumers for the same purposes.'" *Queen City Pizza, Inc., 124 F.3d at 438* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*.

The record thus makes plain that the market in which Doryx competes includes other oral tetracyclines. No reasonable juror could find otherwise. *Harrison Aire, Inc., 423 F.3d at 380*. Defendants' share of this market—some 18%—is not predominant. *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)* ("Absent other pertinent factors, a share significantly larger than 55% has been required to established prima facie market power.").

In the absence of a predominant market share, I may consider other factors that might establish that Defendants held monopoly power: the size and strength of competing firms, freedom of entry, pricing trends and practices in the industry, the ability of consumers to substitute comparable goods, and consumer demand. *Id. at 187*. These factors weigh against finding **[*31]** that Defendants have monopoly power. As I have discussed, Mylan—Defendants' competitor in this market—is more than twice the size of Warner Chilcott, and 100 times the size of Mayne. (Doc. No. 84 at 1.) There is also freedom of entry into the oral tetracycline market. Since 2005—when Defendants purportedly were monopolists dominating the market—nearly forty oral tetracyclines gained FDA approval. (W.C. App. 5.) As I have described, the market for oral tetracyclines is quite competitive and consumers are able to substitute "comparable goods."

Finally, Mylan's argument that Doryx is an antitrust "submarket" within the market for oral tetracyclines also fails. *Brown Shoe Co., 370 U.S. at 325*. A submarket's boundaries are determined by "such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." Id. I have already explained why Doryx's features, however "unique," still allow the substitution of other oral tetracyclines. Moreover, Mylan has presented no evidence that the industry or public identifies Doryx **[*32]** as a "separate economic entity." On the contrary, the undisputed evidence shows that the industry and public identify Doryx as just one product in the crowded, competitive market for oral tetracyclines. Mylan has also failed to produce evidence suggesting that Doryx has distinct customers, distinct prices, or specialized vendors. Again, the evidence shows just the opposite: Doryx is therapeutically equivalent to other oral tetracyclines.

In sum, Mylan has failed to produce economically plausible evidence to prove that Defendants hold monopoly power in the relevant market. Nor has Mylan shown that other factors might support finding that Defendants exercise monopoly power in the absence of predominant market share. In these circumstances, Mylan has not made out a *Section 2* claim. *Broadcom Corp., 501 F.3d at 307*. Accordingly, I will enter summary judgment for Defendants on that claim. See *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 468-69, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("If the plaintiff's theory is economically senseless, no reasonable jury could find in its favor, and summary judgment should be granted."); *Harrison Aire, Inc., 423 F.3d at 380*.

2. Anticompetitive Conduct

Because Mylan's *Section 2* claim fails in the absence of Defendants' monopoly power, in other circumstances I would not address whether Defendants engaged in anticompetitive conduct. **[*33]** See *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* ("To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct*."). Because Mylan's remaining claims require me to determine if Defendants' conduct was anticompetitive, however, I will do so now.

In sum, I conclude that Mylan has failed to produce initial evidence of anticompetitive conduct. I thus need not proceed with the burden-shifting framework and determine whether Defendants have proffered nonpretextual, procompetitive justifications for their product changes, whether Mylan has rebutted those justifications, or whether the product changes were, on balance, procompetitive or anticompetitive. *United States v. Microsoft Corp., 253 F.3d 34, 58-59, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*.

"Anticompetitive conduct may take a variety of forms, but it is generally defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits." *Broadcom Corp., 501 F.3d at 308*. "[I]t is not necessary that all competition be removed from the market. The test is not total foreclosure, but whether the challenged practices bar a substantial number of rivals or severely restrict the market's ambit." *Dentsply Int'l, Inc., 399 F.3d at 191*. When an alleged monopolist introduces a new product, the question is whether **[*34]** it is "engaging in exclusionary conduct as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Microsoft, 253 F.3d at 58*. "As a general rule, any firm, even a monopolist, may . . . bring its products to market whenever and however it chooses." *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 171 F.3d 912, 925 n.7 (3d Cir. 1999)* (quoting *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 286 (2d Cir. 1979))*.

Mylan offers no evidence of anticompetitive conduct. Defendants did not exclude competition when they reformulated Doryx, introduced new versions of Doryx into the marketplace, marketed the new versions of Doryx, and withdrew old versions. The undisputed evidence shows that Mylan competes with Defendants and that Defendants have not excluded Mylan from competition on the merits. Doryx capsules have been available without patent protection since 1985, and in 2006, Sandoz introduced a generic Doryx capsule. (W.C. Ex. 382.) Although Mylan had been developing its own generic Doryx capsule since 2003, it chose to abandon that effort in January 2006. (W.C. Resp. to Mylan S.J. at 19-21.) After Defendants introduced the Doryx tablet in September 2005, Mylan began generic development and—after addressing problems raised in several FDA deficiency notices—launched its own generic 75 and 100 mg Doryx **[*35]** tablets in December 2010 and benefitted from 180 days of exclusivity for the tablets. (W.C. Ex. 377); see *F.T.C. v. Actavis, Inc., 133 S. Ct. 2223, 2229, 186 L. Ed. 2d 343 (2013)* (noting value of 180 day exclusivity period and that "vast majority" of generic profits materialize during exclusivity period). In 2011, Mylan became the sole producer of 75 and 100 mg Doryx after Defendants stopped selling those dosages. (W.C. Resp. to Mylan S.J. at 23.) Remarkably, during this time, Mylan raised the price of its generic 75 and 100 mg Doryx to a higher price than the last reported price of branded Doryx. (Id.) After Defendants introduced the 150 mg tablet, Mylan was able to develop and sell its own 150 mg generic tablet at a gross profit of $146 million over three years. (W.C. S.J. at App. 7.)

Throughout this period, doctors remained free to prescribe generic Doryx; pharmacists remained free to substitute generics when medically appropriate; and patients remained free to ask their doctors and pharmacists for generic versions of the drug. As I have described, undisputed evidence shows that managed care organizations promoted the substitution of lower-cost generics for branded Doryx even though they are not AB-rated. (W.C. Ex. 64.) When the price of Doryx increased, **[*36]** patients, pharmacists, and physicians switched to other drugs. (See, e.g., W.C. Ex. 53 at 43.)

Insofar as branded Doryx maintained market share, the record confirms that this was a function of Defendants' considerable efforts to promote Doryx. Since 2007, Warner Chilcott's promotional expenditures have increased each year, averaging approximately 10% of its net revenue from the sale of Doryx. (W.C. Ex. 53, Addanki Rep. at 30.) These efforts include advertising and promoting sales through contact with health care professionals. In 2011, these costs were approximately $23 million. (Id., Att. 3.). In 2012 (the latest year for which figures were provided), these costs were approximately $22 million. (Id.)

It is undisputed that Mylan expended no funds to promote its generic versions of Doryx. Mylan explains that "[n]o rational company would have undertaken [promotional expenses]" because

> the cost associated with detailing physicians and other extraordinary marketing tactics would essentially eliminate the cost savings associated with generic entry and any marketing of a generic would likely redound to the benefit of manufacturers.

(Mylan S.J. at 51.) Mylan thus seeks to transform its own refusal to incur promotion costs into Defendants' **[*37]** anticompetitive conduct. As I have described, however, Mylan's generic 150 mg Doryx tablet generated a gross profit of $146 million over three years—without Mylan spending a cent on "extraordinary tactics," such as promoting its product to doctors and the public. (W.C. S.J. at App. 7.) In 2010, Mylan took full advantage of the 180 days of exclusivity provided by statute, and, after Defendants stopped making 75 and 100 mg Doryx tablets, Mylan significantly raised the price of generic Doryx. *21 U.S.C. § 355*; (W.C. Ex. 377; W.C. Resp. to Mylan S.J. at 23). Spending some of its revenue on advertising would have lessened Mylan's now-increased profits. Mylan chose not to do so, relying instead on the "promotion" provided by state automatic substitution laws. Mylan is thus a "victim" of its own business strategy, not Defendants' "predatory" conduct.

The gravamen of Mylan's complaint is that Defendants' "anticompetitive product changes" were exclusionary because Mylan's generic would not automatically be substituted unless Mylan redesigned the generic to match the new version of Doryx and secured an AB-rating from the FDA. (Mylan S.J. at 39.) The Third Circuit has never ruled that this kind of conduct is anticompetitive. It has **[*38]** repeatedly held that "[c]onduct that merely harms competitors . . . while not harming the competitive process itself is not anticompetitive." *Broadcom 501 F.3d at 308*; accord *Dentsply Int'l, Inc., 399 F.3d at 187* ("There must be proof that competition, not merely competitors, has been harmed."). Moreover, where the Third Circuit has found exclusionary conduct, the excluded party is invariably smaller than the excluder. See, e.g., *Dentsply Int'l, Inc., 399 F.3d at 191* ("Consumer injury results from the delay that the dominant firm imposes on the smaller rival's growth." (quoting Herbert Hovenkamp, ***Antitrust Law*** ¶ 1802c, at 64 (2d ed. 2002))). As I have described, Mylan is considerably larger than either Defendant.

To establish anticompetitive conduct, "it is not necessary that all competition be removed from the market. The test is not total foreclosure, but whether the challenged practices bar a substantial number of rivals or severely restrict the market's ambit." *Dentsply Int'l, Inc., 399 F.3d at 191*. Even if Defendants' product changes prevented Mylan from taking advantage of more profitable means of distributing its generic Doryx, the changes did not "bar" Mylan from the market or "severely restrict the market's ambit." Id.

The Third Circuit's rulings respecting exclusionary conduct are instructive. In Dentsply, the alleged **[*39]** monopolist manufactured and controlled over 90% of the market for prefabricated artificial teeth, which it sold to dental labs through dealers—middlemen who were the labs' "preferred source" of artificial teeth. *399 F.3d at 192*. Dentsply required exclusive contracts with its dealers: if they sold other manufacturers' artificial teeth, they could not sell Dentsply products. *Id. at 185*. The Third Circuit concluded that these contracts were exclusionary because they prevented competitors from accessing the only practicable means of reaching customers. *Id. at 193* (noting that dealers had "controlling degree of access" to the customers). In LePage's Inc., the Third Circuit ruled that 3M's "bundled rebates" across its product lines were akin to "tying" contracts that had the practical effect of completely excluding LePage's products from the market. *LePage's Inc. v. 3M, 324 F.3d 141, 157 (3d Cir. 2003)* (en banc). In Broadcom Corp., Qualcomm falsely committed to license its proprietary mobile wireless technology on "fair, reasonable, and non-discriminatory" terms—thus "locking in" the market. It then refused to license the proprietary technology to competitors on the promised terms. *Broadcom Corp., 501 F.3d at 314*. The Third Circuit ruled that because the practical effect of Qualcomm's **[*40]** deceptive conduct was to exclude competition, it was anticompetitive. Id.

Here, there was no exclusionary conduct. Mylan remains able to reach consumers through, *inter alia*, advertising, promotion, cost competition, or superior product development. Mylan instead seeks to take advantage of generic substitution laws and thus increase its profits. Defendants have no duty to facilitate Mylan's business plan by keeping older versions of branded Doryx on the market. See *Verizon Commc'ns Inc., 540 U.S. at 415* (no general duty to aid competitors). Defendants certainly did not exclude competition by denying Mylan the opportunity to take advantage of a regulatory "bonus."

Mylan relies on decisions addressing the anticompetitive effects of changes to complementary products in separate markets. See *Microsoft, 253 F.3d at 87* (Microsoft eliminated consumer choice by bundling together its Windows operating system and its Internet Explorer web browser); *C.R. Bard, Inc. v. M3 Systems, Inc., 157 F.3d 1340, 1382 (Fed. Cir. 1998)* (sustaining jury verdict where Bard modified its biopsy gun to render it incompatible with its competitors' replacement needles and thus excluded competition in the complementary market for replacement needles); but see *Berkey Photo, Inc., 603 F.2d at 279* (rejecting antitrust liability when Kodak introduced a new camera that **[*41]** was incompatible with existing film). These decisions are inapposite because Mylan does not produce a complementary product or compete with Defendants in a complementary market. As I have explained, Mylan and Defendants vigorously compete in a single market for oral tetracyclines

Mylan also cites to a handful of procedurally inapposite decisions respecting whether product hopping in the pharmaceutical industry is a *Section 2* violation. See *New York v. Actavis, PLC, No. 14-7473, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198 (S.D.N.Y. Dec. 11, 2014)* (entering preliminary injunction that prevents a branded drug manufacturer from withdrawing an older version of its Alzheimers drug from the market); *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., No. 13-2445, 64 F. Supp. 3d 665, 2014 U.S. Dist. LEXIS 167204, 2014 WL 6792663, at *10 (E.D. Pa. Dec. 3, 2014)* (denying branded drug manufacturer's motion to dismiss); *Walgreen Co. v. AstraZeneca Pharm. L.P., 534 F. Supp. 2d 146, 151 (D.D.C. 2008)* (granting branded drug manufacturer's motion to dismiss); *Abbott Labs. v. Teva Pharms. USA, Inc., 432 F. Supp. 2d 408, 422 (D. Del. 2006)* (denying branded drug manufacturer's motion to dismiss). These courts addressed whether the introduction of a new product combined with other, exclusionary conduct can state a claim for relief under the Sherman Act. See, e.g., *In re Suboxone, 2014 U.S. Dist. LEXIS 167204, 2014 WL 6792663, at *10* ("The key question is whether the defendant combined the introduction of a new product with some other wrongful conduct, such that the comprehensive effect is likely to stymie competition, prevent consumer choice and reduce the market's ambit."). These decisions thus establish, **[*42]** at most, that a generic manufacturer can plead a plausible antitrust violation when a branded drug manufacturer redesigns the branded drug.

I, too, denied Defendants' motions to dismiss Mylan's Complaint. *Mylan Pharms., Inc. v. Warner Chilcott Pub. Co., No. 12-3824, 2013 U.S. Dist. LEXIS 152467, 2013 WL 5692880, at *2 (E.D. Pa. June 12, 2013)*. Given the absence of controlling authority (and *any* appellate authority), I thought it prudent to consider the legality of product hopping with the benefit of a fully developed record. That record now underscores that Defendants have not violated *Section 2*.

Adoption of Mylan's theory of "anticompetitive product redesign" could well have adverse, unintended consequences. *Any* time a pharmaceutical manufacturer changes the formulation of a branded drug and so compels a manufacturer to reformulate (or, as in the instant case, formulate for the first time) its generic, this could trigger a Microsoft burden-shifting contest. *Microsoft Corp., 253 F.3d at 58*; *In re Suboxone, 2014 U.S. Dist. LEXIS 167204, 2014 WL 6792663 at *7*. Once the branded drug manufacturer offered a procompetitive justification for the product change that the generic manufacturer could not rebut, courts and juries would have to determine which product changes were "sufficiently innovative" to justify their anticompetitive effects. *Microsoft Corp., 253 F.3d at 58-59*. Mylan has failed to offer an intelligible test of innovation "sufficiency," and I doubt that **[*43]** courts could ever fashion one. See *Allied Orthopedic Appliances, Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 1000 (9th Cir. 2010)* ("To weigh the benefits of an improved product design against the resulting injuries to competitors is not just unwise, it is unadministrable. There are no criteria that courts can use to calculate the "right" amount of innovation, which would maximize social gains and minimize competitive injury."); *United States v. Microsoft Corp., 147 F.3d 935, 948, 331 U.S. App. D.C. 121 (D.C. Cir. 1998)* ("Antitrust scholars have long recognized the undesirability of having courts oversee product design, and any dampening of technological innovation would be at cross-purposes with ***antitrust law***."); *Berkey Photo, Inc., 603 F.2d at 287* ("[N]o one can determine with any reasonable assurance whether one product is 'superior' . . . .").

Mylan's theory also risks slowing or even stopping pharmaceutical innovation. The prospect of costly and uncertain litigation every time a company reformulates a brand-name drug would likely increase costs and discourage manufacturers from seeking to improve existing drugs. Cf. *Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 73 (3d Cir. 2010)* ("The entry of summary judgment in favor of an antitrust defendant may actually be required in order to prevent lengthy and drawn-out litigation, which may have a chilling effect on competitive market forces.").

With Hatch-Waxman, Congress sought to encourage innovation and provide generic **[*44]** drug manufacturers a quick, less costly pathway to FDA approval. Indeed, Congress sought to "compensate" research drug companies and promote continued research amidst increased generic competition. (W.C. S.J. at 20 (citing statement of a Hatch-Waxman sponsor).) Yet, the Act is silent on product hopping. (Id. at 17.) Congress certainly could have created barriers to brand-name drug changes that could delay generic entry, but, perhaps understanding the adverse effects this could have on innovation, it did not. Courts should not seek to substitute their "legislative judgment" for that of Congress. See *Tri-Bio Labs. Inc. v. United States, 836 F.2d 135, 139 (3d Cir. 1987)* (Hatch-Waxman reflects a "statutory compromise of . . . competing concerns"); *Teva Pharm. Indus. Ltd. v. Crawford, 410 F.3d 51, 54, 366 U.S. App. D.C. 203 (D.C. Cir. 2005)* ("Because the balance struck between these competing goals is a quintessentially a matter for legislative judgment, the court must attend closely to the terms in which the Congress expressed that judgment.").

Finally, because I have decided that Defendants' product changes are not anticompetitive, I need not address Defendants' remaining arguments: that Mylan lacks antitrust standing, that Mylan's claims are time-barred, and that because Defendants petitioned the FDA to make the Doryx changes, they are covered by Noerr antitrust immunity. **[*45]** (W.C. S.J. at 9, 39-50, 50-53.) *B. Attempted Monopolization Claim* To demonstrate attempted monopolization, Mylan must show (1) that Defendants engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. Mylan's claim of attempted monopolization necessarily fails. Because Defendants' conduct was not anticompetitive, it could not constitute attempted monopolization. *California Computer Products, Inc. v. Int'l Bus. Machines Corp., 613 F.2d 727, 738 (9th Cir. 1979)* ("[C]onduct lawful for a monopolist must, a fortiori, be excluded as a basis for the attempt offense.").

II. Section 1 Claim

Mylan also challenges Defendants' exclusive licensing agreement as a restraint of trade in violation of *Section 1* of the Sherman Act. (Compl. ¶ 88.) The Third Circuit has held that:

> [t]o establish a violation of *Section 1*, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anticompetitive effects within the relevant product and geographic markets; (3) that the concerted actions were illegal; and (4) that it was injured as a proximate result of the concerted action.

Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir. 2005) (citations omitted). Because I have concluded that Defendants' development and introduction of the Doryx tablet were not anticompetitive, Mylan has not established the second prong of the **[*46]** Gordon test. Accordingly, I need not reach Defendants' argument that they are together a single economic entity incapable of antitrust conspiracy. (Mayne S.J. at 23-32.)

III. Tortious Interference Claim

Under Pennsylvania law, to prevail on a claim for tortious interference with prospective contractual relationships, Mylan must prove:

> (1) the existence of a contractual or prospective contractual or economic relationship between the plaintiff and a third party; (2) purposeful action by the defendant, specifically intended to harm an existing relationship or intended to prevent a prospective relation from occurring; (3) the absence of privilege or justification on the part of the defendant; (4) legal damage to the plaintiff as a result of the defendant's conduct; and (5) for prospective contracts, a reasonable likelihood that the relationship would have occurred but for the defendant's interference.

Acumed LLC v. Advanced Surgical Servs., Inc., 561 F.3d 199, 212 (3d Cir. 2009). Plaintiff's claim fails on third element: Defendants' conduct was privileged. *Id. at 215* (Pennsylvania law recognizes "that competitors, in certain circumstances, are privileged in the course of competition to interfere with others' prospective contractual relationships"). The privilege applies when: (1) the relation **[*47]** concerns a matter involved in the competition between the actor and the other; (2) the actor does not employ wrongful means; (3) his action does not create or continue an unlawful restraint of trade; and (4) his purpose is at least in part to advance his interest in competing with the other. Id.; *Restatement (Second) of Torts § 768* (1979).

These criteria underscore the privileged nature of Defendants' product changes. The relation between Defendants and their customers—whether direct or indirect purchasers—concerns a matter of competition among pharmaceutical companies such as Mylan, Warner Chilcott, and Mayne. Moreover, Defendants did not employ wrongful means: I have concluded that Defendants' product development was not anticompetitive. For the same reasons, I find that the changes to Doryx were not wrongful and were not an unlawful restraint on trade. Finally, Defendants' actions were meant, at least in part, to advance their interest in competing with Mylan. In these circumstances, Mylan's tortious interference claim is not viable.

CONCLUSION

Although Mylan had numerous opportunities to market generic Doryx, it waited until the sales of branded Doryx were so great that huge generic sales—buoyed by regulatory compulsion—were **[*48]** assured. Defendants' efforts to deny Mylan this regulatory windfall were hardly predatory. On the contrary, these efforts have compelled pharmaceutical giant Mylan to compete against much smaller Warner Chilcott and Mayne on the merits and price of its products. Mylan's reading of the Sherman Act would not only require federal courts to serve as FDA adjuncts, it would strongly discourage pharmaceutical development and innovation. Finally, giving generics a regulatory "preferred place" would not necessarily reduce drug prices. Once Mylan was the exclusive seller of generic 75 and 100 mg Doryx tablets, it raised prices so that they were higher than those of branded Doryx. Presumably, it would seek to do the same once its generic sales were assured by automatic substitution laws. I cannot allow Mylan, solely for its own benefit, to thus stand the Sherman Act on its head.

Accordingly, I will enter summary judgment in Defendants' favor.

An appropriate Order follows.

/s/ Paul S. Diamond

Paul S. Diamond, J.

April 16, 2015

JUDGMENT

AND NOW, this 16th day of April, 2015, upon consideration of Plaintiff Mylan Pharmaceuticals' Motion for Summary Judgment (Doc. No. 509), Defendant Warner Chilcott's Motion **[*49]** for Summary Judgment (Doc. No. 511), Defendant Mayne Pharmaceuticals' Motion for Summary Judgment (Doc. No. 493), and all related submissions, it is hereby **ORDERED** that Defendants' Motions are **GRANTED** and Plaintiff's Motion is **DENIED** for the reasons stated in today's Memorandum Opinion. Plaintiff Mylan Pharmaceutical's Complaint is **DISMISSED with prejudice**, and **JUDGMENT** is hereby entered as to all of Plaintiff's claims in favor of Defendants Warner Chilcott and Mayne Pharmaceuticals and against Plaintiff Mylan Pharmaceuticals. The Clerk shall mark this case as **CLOSED**.

AND IT IS SO ORDERED.

Opinion

ORDER

Plaintiffs Tri State Advanced Surgery Center, LLC ("Tri State"), Glenn A. Crosby II, M.D. ("Crosby"), and Michael Hood, M.D. ("Hood") bring this action against Health Choice, LLC ("Health Choice") and Cigna Healthcare of Tennessee, Inc. ("Cigna") alleging anti-trust violations of the Sherman Act, *15 U.S.C. §1*; tortious interference with contract; intentional interference with business relationships; and violations of the Tennessee Consumer Protection Act. In addition, Cigna and two additional parties, Connecticut General Life Insurance Company and Cigna Health and Life Insurance Company, have filed what they title counterclaims against Tri State and an additional party, Surgical Center Development, Inc., d/b/a SurgCenter Development ("SurgCenter"). Both Defendants have filed motions to dismiss all of the claims against them for failure to state a claim pursuant to Rule 12(b)(6). Tri State and SurgCenter have also filed a motion to dismiss the counterclaims. This order only addresses Defendants' motions to dismiss. Jurisdiction is proper in this Court on the basis of the claims brought under the Sherman Act and the Court's supplemental jurisdiction over Plaintiffs' state law claims. *28 U.S.C. §1331* and **[*4]** *28 U.S.C. §1367*.

Rule 8(a)(2) requires "a short and plain statement of the claim showing that the pleader is entitled to relief." In reviewing the sufficiency of a plaintiff's allegations when challenged with a motion to dismiss, the court must determine whether the complaint states a claim for relief that is "plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868*. The court must accept as true all of the factual allegations contained in the complaint and draw all reasonable inferences in favor of the nonmoving party. *Cole v. Homier Distributing Co., Inc. 599 F.3d 856, 861 (8th Cir. 2010)*.

Factual Allegations

This is a concerted refusal to deal case brought by two doctors and an ambulatory surgery center against a physician-hospital organization and an insurer. Plaintiffs allege that Defendants attempted to run Tri State out of business by preventing Tri State from contracting with insurers in the Memphis metropolitan area and by preventing referrals to Tri State.

The facts, as drawn from the complaint, are as follows. Plaintiff Tri State is an ambulatory surgery center (ASC) located in Crittenden County, Arkansas. It treats **[*5]** patients from Arkansas, Mississippi, and Tennessee. Plaintiff Crosby is a neurosurgeon who practices medicine with the Crosby Clinic in Memphis, Tennessee and at Tri State. Plaintiff Hood is a surgeon specializing in sports medicine and general orthopaedics who practices medicine with Delta Orthopaedics & Sports Medicine in West Memphis, Arkansas and at Tri State. Defendant Cigna acted as either the third-party administrator of various employers' healthcare plans or as an insurer of various healthcare insurance policies. Defendant Health Choice is a joint venture physician-hospital organization (PHO) between

MetroCare Physicians, an independent physician association (IPA) and Methodist LeBonheur Healthcare ("Methodist"), "the dominant hospital system in the Memphis metropolitan area." Health Choice contracts with health insurers, like Cigna, to provide networks of medical providers and provides managed care contracting services for medical providers. Both Crosby and Hood are members of MetroCare.

Pursuant to an agreement, Health Choice and Cigna mutually decide which Health Choice doctors should be included in Cigna's provider network. Tri State does not have a participating provider **[*6]** agreement with Cigna and is thus considered out-of-network for Cigna's members.

In letters dated June 27, 2013, Cigna notified physicians who treated patients at Tri State, including Crosby and Hood, that they had been "engaging in a pattern and practice of consistent and repeated referrals of Cigna patients to [Tri State], which is a non-network facility that does not participate with Cigna." The letter demanded that the physicians attest that they would "refer Cigna patients to in-network facilities" or Cigna would evaluate whether the physicians' continued participation with Cigna "is in our mutual benefit." Plaintiff alleges that Cigna and Health Choice illegally agreed that Cigna would send the letters "in order to coerce the physicians into directing the vast majority of these patients to Methodist-affiliated facilities and away from Tri State."

On October 2, 2013, Cigna sent a letter to Health Choice's CEO, Mitch Graves, that it was terminating Crosby and Hood, among others, from its network effective December 1, 2013. The letter stated that Cigna was invoking the without-cause termination provision, but Crosby and Hood allege that they were terminated for refusing to sign the **[*7]** attestation. Plaintiffs further allege that a Cigna representative advised Hood's office manager on November 4, 2013, that Health Choice had sent a letter to Cigna requesting that Cigna terminate Hood from its network and that Cigna agreed to do so. Crosby was also advised that Health Choice and Cigna had agreed to terminate him from Cigna's network unless he attested that he would only refer patients to in-network facilities.

The complaint further alleges that in July of 2013, another doctor was given notice by Cigna that if he did not stop referring patients to Tri State, he and his partners would not be permitted to perform a new office procedure, balloon sinuplasty, even though Cigna had permitted other doctors to perform this procedure in their offices. This same doctor received a letter from Cigna demanding that he disclose his financial interest in Tri State to his patients, though he had a financial interest in other ASCs and had never had to disclose his interest in those. These actions by Cigna were part of Health Choice and Cigna's "anti-competitive effort to dry up referrals to Tri State and to stymie any competition from Tri State."

Plaintiffs make further separate allegations **[*8]** against Health Choice. The complaint states that Health Choice committed other illegal conduct by making agreements with non-party insurers Aetna and Blue Cross Blue Shield of Tennessee in which these insurers agreed to advise doctors that they could not refer patients to Tri State in a "further effort to dry up referrals to Tri State and to stymie competition from the facility." Also, Plaintiffs state that at a Health Choice board meeting, Tri State was denied membership in Health Choice even though it had not yet submitted an application to join.

Sherman Act Claims

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of a trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. §1*. The Supreme Court has explained that the prohibition is not to be taken literally, and that only "unreasonable restraints" are prohibited. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. There are two ways to evaluate whether an agreement violates *Section 1*: using the so-called "rule of reason" analysis or making the determination that the agreement is a *per se* violation.[1] Under the rule of reason, the " true test of legality is whether

[1] The Eighth Circuit has recognized a third method of analysis, the "quick look," which is closer on the analysis spectrum to the *per se* analysis, but neither party has argued its application here. See *Craftsmen Limousine, Inc. v. Ford Motor Co., 491 F.3d 380 (8th Cir. 2007)*.

the restraint imposed is such as merely regulates **[*9]** and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*. "Rule-of-reason analysis guides the inquiry unless the challenged action falls into the category of 'agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.'" *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 289, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* (quoting *Northern Pacific R. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)* (internal citations omitted).

The *per se* rule is limited to agreements that are so inherently anticompetitive as to be illegal per se, such as horizontal agreements among direct competitors. *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*. The Supreme Court has acknowledged that there is some confusion surrounding the application of the *per se* rule against group boycotts such that "[s]ome care is therefore necessary in defining the category of concerted refusals to deal that mandate *per se* condemnation." *Id. at 294*. Furthermore, the Supreme Court **[*10]** has expressed its reluctance to extend *per se* analysis "to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious." *F.T.C. v. Indiana Federation of Dentists, 476 U.S. 447, 458-459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*.

Plaintiffs argue that their allegations of both Defendants' concerted refusal to deal with them falls within a recognized category of a *per se* violation of *Section 1*. Relying on language from *Northwest, supra*, they categorize the alleged illegal agreements as "joint efforts by a firm or firms to disadvantage competitors by 'either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle.'" *Id. at 294* (quoting L. Sullivan, Law of Antitrust 229-230(1977)). Plaintiffs also rely on *Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, where the Supreme Court applied the per se rule (without calling it by that name) to a boycott arranged by a single competitor but carried out by a "wide combination consisting of manufacturers, distributors, and a retailer." *Id. at 213*. But unlike the complaint in *Klor's*, the Plaintiffs' complaint does not contain sufficient factual matter plausibly suggesting that the competitor at issue, Methodist, entered into an illegal agreement. The complaint states that **[*11]** "on information and belief, Health Choice made this agreement on behalf of its joint venture partner Methodist in an attempt to eliminate competition to Methodist, while Cigna made this agreement in an attempt to obtain better terms in its contract with Health Choice and to keep Methodist in its provider Network." However, the only factual allegations involved action by Health Choice or Cigna, both of whom are in a vertical relationship with Plaintiffs, not horizontal competitors. Nor are Health Choice and Cigna in a horizontal relationship with each other. The Court agrees with Defendants, therefore, that the rule of reason is the appropriate vehicle to analyze Plaintiffs' complaint against both Defendants. Plaintiffs' efforts to bootstrap this into a horizontal agreement by including conclusory allegations against non-party Methodist are insufficient to state a *per se* illegal boycott claim against Defendants.

Under the rule of reason analysis, a plaintiff must show that an agreement has the potential for genuine adverse effects on competition, which can be shown by either market power or by proof of actual detrimental effects. *Flegel v. Christian Hospital, Northeast-Northwest, 4 F.3d 682, 688 (8th Cir. 1993)*. "Since the purpose of the inquiries into market definition **[*12]** and market power is to determine whether an arrangement has the potential for genuine adverse effects on competition, "proof of actual detrimental effects, such as a reduction of output," can obviate the need for an inquiry into market power, which is but a 'surrogate for detrimental effects.'" *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445(1986)* (quoting 7 P. Areeda, ***Antitrust Law*** ¶ 1511, p. 429 (1986)).

Plaintiffs argue that they have alleged actual detrimental effects on competition. They allege that consumer choices have been limited by Defendants' actions because doctors have been forced to stop referring patients to Tri State. Also, they allege that "consumers and competition have also been harmed by [Defendants'] actions which have precluded patients from using their [Out of Network] benefits for which they have paid additional insurance premiums." (Docket No. 1, ¶66). The complaint also alleges a number of benefits offered by Tri State over the same procedures being offered at hospitals (less expensive, better scheduling, closer parking). As compared to Methodist facilities, Plaintiffs argue that Tri State offers quicker treatment.

Defendants each challenge that Plaintiffs' allegations are sufficient to show actual detrimental **[*13]** effect on competition. The Court agrees. Plaintiffs do not allege that patients cannot receive Tri State's services absent in-network referrals or that patients cannot obtain ambulatory surgical services elsewhere in the market. They do not allege that there has been a decline in the number of facilities that perform surgical procedures which do not require hospitalization or in the actual quality of these procedures. Tri State is still open for business and all its services available to patients. Therefore, a more thorough analysis of market power is required.

To establish that Defendants have market power, Plaintiffs must allege that Defendants have a dominant share in a well-defined relevant market defined in both terms of product market and geographical market. *Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655 (8th Cir. 2000)*; *Flegel at 689*. "Antitrust claims often rise or fall on the definition of the relevant market." *Bathke v. Casey's Gen. Stores, Inc., 64 F.3d 340, 345 (8th Cir. 1995)*. While there is no absolute prohibition against dismissal of antitrust claims for failure to plead a relevant market, "[a] dismissal on the pleadings should be granted sparingly and with caution" and most often "only after a factual inquiry into the commercial realities faced by consumers." *Double D Spotting Service, Inc. v. Supervalu, Inc., 136 F.3d 554, 560 (8th Cir. 1998)* (internal quotations and citations omitted). **[*14]**

"A court's determination of the limits of a relevant product market requires inquiry into the choices available to consumers." *Little Rock Cardiology Clinic, PA v. Baptist Health, 591 F.3d 591, 599 (8th Cir. 2009)* ("*LRCC*"). "The relevant product market includes all reasonably interchangeable products." *Double D, at 560*. Plaintiffs in the instant case define the relevant product market as "the market for surgical services or procedures which do not require hospitalization, including orthopaedic surgery, sports medicine, spinal surgery, otolaryngology, and interventional pain management." (Docket No. 1, ¶29). Both Defendants challenge this definition as being fatally deficient, relying on the Eighth Circuit's opinion in *LRCC*, which summed up the issue of product market as follows: "LRCC's claims boil down to the allegation that, due to Baptist Health's allegedly unlawful actions, LRCC has access to fewer patients. The relevant question, then, is to whom might the cardiologist at LRCC potentially provide medical service?" *Id. at 597*. The Eighth Circuit found that LRCC's product market definition was fatally deficient in part because it defined the product market in terms of how consumers paid for services; it was undisputed that the definition was limited to patients covered by private **[*15]** insurance and excluded patients paying by any other method. *LRCC, at 596*.

Here, Plaintiffs state emphatically that their definition does not limit the relevant product market to patients covered by private insurance. The Court agrees with the argument made by Health Choice, however, and finds that Plaintiffs' silence on the issue of how patients pay for services does not cure the defect that exists in the allegations. Although deliberately excluded from the definition they presented on product market, the market for which Plaintiffs seek to make an anti-trust injury claim is, in fact, limited to the market for surgical services or procedures obtained by patients covered by Cigna health insurance which do not require hospitalization. It is from this impermissibly circumscribed market that they claim to have been shut-out. Plaintiffs' chief complaint is that by drying up referrals to Tri State, Defendants have engaged in anticompetitive conduct; the referrals at issue are referrals from doctors in the Cigna network. As in *LRCC*, the relevant inquiry, and thus the relevant market, must include all alternative patients available to Plaintiffs and not be limited to those who pay by private insurance **[*16]** bought from Cigna or any other insurer. The product market put forth by Plaintiffs is narrower than the product market that was found lacking in *LRCC*. Omitting the red-flagged phrase "covered by private insurance" from the proposed product market definition does not save the complaint from the Eighth Circuit's holding in *LRCC*.

In addition to relying on an impermissibly defined product market, the complaint also lacks a well-defined relevant geographic market, which is defined by considering the commercial realities faced by consumers. *Flegel v. Christian Hosp., Northeast-Northwest, 4 F. 3d 682, 690 (8th Cir. 1993)* (citations omitted). The Eighth Circuit outlined the nature of a court's inquiry into the proper geographic market in a medical setting in *LRCC*:

> Broken down, the test requires a court to first determine whether a plaintiff has alleged a geographic market that includes the area in which a defendant supplier draws a sufficiently large percentage of its business—"the

> market area in which the seller operates," its trade area. A court must then determine whether a plaintiff has alleged a geographic market in which only a small percentage of purchasers have alternative suppliers to whom they could practicably turn in the event that a defendant supplier's anticompetitive **[*17]** actions result in a price increase. The end goal in this analysis is to delineate a geographic area where, in the medical setting, "'few' patients leave ... and 'few' patients enter."

LRCC, at 598 (8th Cir. 2009) (internal citations omitted). "This crucial first step serves as a limitation, preventing antitrust plaintiffs from delineating arbitrarily narrow geographic markets." *LRCC, at 599*.

The complaint in this case defines the relevant geographic market as "the Memphis, Tennessee metropolitan area, including the adjacent counties in Mississippi and Arkansas." (Docket No. 1, ¶31). Health Choice argues that this definition is deficient as a matter of law because if fails to define the "adjacent counties" abutting the alleged market. Plaintiffs respond to this argument by stating that "[a]s Plaintiffs' allegations make clear, the market is the Memphis metropolitan statistical area ("MSA") as defined by the federal government." The Court finds that while the MSA is mentioned in the complaint in connection with Cigna's share in the health insurance market, the allegations of the complaint do not make clear that the MSA is the geographic market covered by the Section 1 claims. For the most part, the allegations refer to the "Memphis metropolitan **[*18]** area," not the Memphis metropolitan statistical area, and nowhere in the complaint are the "adjacent counties" mentioned by name, though Plaintiffs' response to Defendants' motions to dismiss lists nine specific counties covered by the MSA.[2]

The Court finds that Plaintiffs have failed to adequately allege a relevant geographic market. A careful review of the complaint fails to reveal a delineated geographic area in which only a small percentage of patients have alternative suppliers in the market for surgical services or procedures which do not require hospitalization to whom they could practicably turn the event that Methodist's actions result in a price increase. (This is assuming that the market of Methodist—rather than one of the named defendants—is relevant to this analysis.) The complaint provides a lot of statistics and trade area information. For example, Tri State, as its name implies, treats patients from three states: **[*19]** Arkansas, Tennessee, and Mississippi. Plaintiffs also allege that Cigna has control of 42% of the commercial health insurance market in the Memphis metropolitan statistical area, which leads them to conclude that Cigna has market power in the Memphis metropolitan statistical area. Regarding Methodist, Plaintiffs allege that "[i]n 2012, Methodist reported having a 40 percent market share in the metropolitan Memphis market," and, therefore, they conclude, Methodist has market power in the Memphis metropolitan market. But none of these allegations suggest the geographic area to be considered in analyzing patients' choices in the defined product market of outpatient surgeries.

Therefore, in the absence of sufficient allegations to plead a proper product market or a proper geographic market, and given that the deficiencies are inherent in the nature of the claims and not likely to be cured by further pleading, Plaintiffs' claims in Count I for violations of the Sherman Act against Cigna and Health Choice are dismissed with prejudice. Because the Court has dismissed all of Plaintiffs' federal claims, the Court declines to exercise supplemental jurisdiction over the remaining state law claims. **[*20]** *28 U.S.C. §1367(c)*.

THEREFORE, IT IS CONSIDERED, ORDERED, AND ORDERED that:

(1) Defendant Health Choice, LLC's Motion to Dismiss the Complaint (Docket No. 43) is GRANTED. As against this defendant, Count I is dismissed with prejudice, and Counts II, III, and IV are dismissed without prejudice.

(2) Defendant Cigna Healthcare of Tennessee, Inc.'s Motion to Dismiss the Complaint (Docket No. 45) is GRANTED. As against this defendant, Count I is dismissed with prejudice, and Count II is dismissed without prejudice.

(3) This resolves all of Plaintiffs' claims against Defendants. Cigna's counterclaims remain pending at this time.

---

[2] Plaintiffs' response states: "The Memphis TN-MS-AR Metropolitan Statistical Area includes Fayette, Shelby and Tipton Counties in Tennessee; Benton, DeSoto, Marshall, Tate and Tunica Counties in Mississippi; and Crittenden County, Arkansas." (Docket No. 60, p. 14).

IT IS SO ORDERED this 16th day of April, 2015.

United States District Judge

Go Computer v. Microsoft Corp.

Superior Court of California, County of San Francisco

April 18, 2015, Filed

Case No. CGC-05-442684

Reporter
2015 Cal. Super. LEXIS 10947 *

GO COMPUTER, INC., a Washington Corporation; S. JERROLD KAPLAN, an individual, Plaintiff, v. MICROSOFT CORPORATION, a Washington corporation, Defendants.

Core Terms

operating system, software, products, consumers, monopoly power, restrictions, license, relevant market, collateral estoppel, middleware, anticompetitive, exclusionary, customers, programs, innovation, interfaces, judicial estoppel, pre-installed, invoking, monopoly, exposed, removal, user, former proceeding, developers, technology, foreclose, positions, promotion, browsing

Opinion

[*1] STATEMENT OF DECISION THAT CERTAIN FINDINGS WERE NECESSARY TO A JUDGMENT AGAINST DEFENDANT MICROSOFT CORPORATION

INTRODUCTION

This court set this bifurcated trial to determine whether certain findings of fact and conclusions of law ("Findings") in the federal antitrust litigation known as *United States v. Microsoft Corp.*, ("the Microsoft Litigation") were necessary to the judgment in that litigation. The Microsoft Litigation was brought by a number of governmental entities against Microsoft Corporation ("Microsoft"), the defendant here, for allegedly violating Federal ***antitrust law*** and various state statutes, including California's Cartwright Act (*Cal. Bus. & Prof. Code §§ 16720 et seq). Certain findings that were made in the Microsoft Litigation are claimed by the plaintiffs in this case to have both relevance to and a preclusive effect on this litigation. This trial phase was solely to determine whether for the purpose of collateral estoppel, the Findings were necessary to the judgment in the Microsoft Litigation. This trial did not seek to establish any other element of collateral estoppel or of relevance that might apply to the use of the Findings in this case.

The Findings which this court determines to be necessary and **[*2]** essential to the judgment in the Microsoft Litigation are set forth in Appendix A to this Statement of Decision.

BACKGROUND

On May 18, 1998, the United States Department of Justice and 19 states commenced the Microsoft Litigation in the United States District Court for the District of Columbia as cases numbered 98-1232 (TPJ) and 98-1233 (TPJ). The two cases alleged, among other things, that Microsoft engaged in conduct that violated *Section 2* of the Sherman Act (*15 U.S.C. § 2*) ("*Section 2*"), as well as the Cartwright Act. After a 76-day bench trial, United States District

Judge Thomas Penfield Jackson determined that Microsoft had maintained a monopoly in the market for Intel-compatible operating systems ("relevant market") in violation of *Section 2*. *United States v. Microsoft Corp. (D.D.C. 1999), 84 F. Supp. 2d 9* and *United States v. Microsoft Corp (D.D.C. 2000) 87 F. Supp. 2d 30*.

The District of Columbia Circuit, sitting *en banc*, affirmed the judgment that Microsoft violated *Section 2*. The Court upheld Judge Jackson's finding that Microsoft possessed monopoly power in the relevant market. *United States v. Microsoft Corp. (D.C. Cir. 2001), 253 F.3d 34, 54, 346 U.S. App. D.C. 330*, *cert, denied* (2001; *534 U.S. 952, 122 S. Ct. 350, 151 L. Ed. 2d 264*, finding that "Windows accounted] for a greater than 95% share" of the market. It also affirmed the conclusion that Microsoft engaged in anticompetitive conduct in maintaining its monopoly by undertaking "a variety of exclusionary acts… to maintain **[*3]** its monopoly by preventing the effective distribution and use of products that might threaten that monopoly." *Id. at 58*. The court listed twelve such exclusionary acts that fell into the broad categories of: (I) using license restrictions, incentives, threats, and other methods to foreclose certain competitors from access to OEMs and ISVs; (2) making it impractical for OEMs and consumers to use competing products by integrating Microsoft's products into core Windows files and making removal impossible; and (3) coercing other companies, such as Intel, into withholding support to Microsoft's competitors and rivals. *Id. at 58-78*.

The Court of Appeals reversed other findings of liability against Microsoft that are not at issue here and remanded the matter to the District Court. On remand, United States District Judge Colleen Kollar-Kotelly (who replaced Judge Jackson on the case) approved the parties' proposed consent decree. *New York v. Microsoft Corp. (D.D.C. 2002), 224 F. Supp. 2d 76, 226*.

ANALYSIS

A. Requirements for Collateral Estoppel

Collateral estoppel precludes re-litigation of issues decided in a prior action. *Lucido v. Superior Court (1990), 51 Cal.3d 335, 341, 272 Cal. Rptr. 767, 795 P.2d 1223*. It is applied in order to "promote judicial economy by minimizing repetitive litigation, to prevent inconsistent judgments which undermine the integrity of **[*4]** the judicial system, or to protect against vexatious litigation." *Clemmer v. Hartford Ins. Co. (1978) 22 Cal.3d 865, 151 Cal. Rptr. 285, 587 P.2d 1098*. Collateral estoppel "is based on the sound public policy of limiting litigation when a party has already had one fair trial on an issue" (*Vezina v. Continental Cas. Co. (1977), 66 Cal. App. 3d 665, 670, 136 Cal. Rptr. 198)*, and it "causes no injustice when the party to be bound had a full and fair opportunity to litigate the issue to be foreclosed." *Vandenberg v. Superior Court (1999), 21 Cal. 4th 815, 834, 88 Cal. Rptr. 2d 366, 982 P.2d 229*.

Several threshold requirements must be met for collateral estoppel to apply. "First, the issue sought to be precluded from re-litigation must be identical to that decided in a former proceeding. Second, this issue must have been actually litigated in the former proceeding. Third, the issue must have been necessarily decided in the former proceeding. Fourth, the decision in the former proceeding must be final and on the merits. Finally, the party against whom preclusion is sought must be the same as, or in privity with, the party to the former proceeding." *Lucido, 51 Cal. 3d at 341*. Further, "the public policies underlying collateral estoppel-preservation of the integrity of the judicial system, promotion of judicial economy, and protection of litigants from harassment by vexatious litigation-strongly influence whether its application in a particular circumstance would be fair **[*5]** to the parties and constitute sound judicial policy." *Id. at 343*. The judgment of a federal court has the same preclusive effect in California state courts as it would h)ve in a federal court. *Levy v. Cohen, (1977) 19 Cal. 3d 165, 173, 137 Cal. Rptr. 162, 561 P.2d 252*.

At issue in this bifurcated trial is the third element of the collateral estoppel inquiry: whether the issue was "necessarily decided" by a court in the prior proceeding. *Lucido, 51 Cal. 3d at 341*; *Martin v. Dep't of Justice (D.C. Cir. 2007) 488 F.3d 446, 376 U.S. App. D.C. 293*. Requiring that findings and conclusions were necessary to the judgment ensures that "the tribunal that decided the first [took] sufficient care in determining an issue that… affect[ed] the result" and that "appellate review [is] available." 18 Wright & Miller, Federal Practice & Procedure:

Jurisdiction § 4421 (2d ed.). The D.C. Circuit considers an issue to be necessary to a prior judgment if its disposition "was the basis for the holding with respect to the issue and not mere dictum." *McLaughlin v. Bradlee (D.C. Cir. 1986), 803 F.2d 1197, 1204, 256 U.S. App. D.C. 119* *Jahr v. District of Columbia (D.D.C. 2013), 968 F. Supp. 2d 186, 191* ("Collateral estoppel applies… where the determination was essential to the judgment, and not merely dictum." (quoting *Modiri v. 1342 Rest. Group, Inc. (D.C. 2006), 904 A.2d 391, 394)*.

B. Elements of a *Section 2* Violation

Two elements of a *Section 2* claim which are central to the issue before this court are (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as **[*6]** distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. *United States v. Grinnell Corp. (1966), 384 U. S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778*; *Eastman Kodak Co. v. Image Tech. Servs., Inc., (1992) 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265*. For the purposes of the first of these two elements, monopoly power is "the power to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co (1956), 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264*. The second central element of a *Section 2* claim entails "the use of monopoly power 'to foreclose competition, to gain a competitive advantage, or to destroy a competitor.'" *Eastman Kodak, 504 U.S. at 482-83* (quoting *United States v. Griffith (1948) 334 U.S. 100, 107, 68 S. Ct. 941, 92 L. Ed. 1236)*. If a defendant "adopted its … policies as part of a scheme of willful…maintenance of monopoly power, it will have violated *§ 2*." *Id. at 483*.

Further, in order to establish an antitrust violation under *Section 2*, it is necessary to prove an anti-competitive effect or actual harm to competition., *Bunker Ramo Corp. v. United Bus. Forms, Inc., (7th Cir.1983) 713 F.2d 1272, 1283*.

C. Analysis of the Findings at Issue

The necessity of specific findings to judgment in the Microsoft Litigation requires an analysis of the elements of the *Section 2* violation set forth above. Also important to this analysis is the position Microsoft took in the Court of Appeals regarding these elements. Microsoft argued that the trial court had improperly defined the relevant market and that due to what it asserted was a unique and dynamic market, there was insufficient evidence that Microsoft wielded monopoly **[*7]** power. *United States v. Microsoft, supra, 253 F.3d at 51*. As a result of these arguments, the Court thoroughly analyzed the; District Court's findings of fact and conclusions of law in the context of the elements of the relevant violation of law, thus demonstrating how and why the findings were essential to the District Court's decisions which were upheld on appeal.

The Findings that this court concludes were essential to the definition of the relevant market are numbers 2, 4 and 10.

The Findings that this court concludes were essential to whether Microsoft possessed and wielded monopoly power are numbers 35, 66, 67, 132, 203, 214, 215, 228, 229, 338, and 339.

The Findings that this court concludes were essential to the *Section 2* element of an anti-competitive effect in the relevant market are numbers 410 and 412.

All of the Conclusions set forth in Appendix A were essential to the matters set forth above.

Microsoft argues that Findings 2, 4, and 10, "only provide background information and define technical terms." The argument is somewhat curious in that background information such as the specification of the products in the releyant market, the identity of the accused violator of *Section 2*, and the activities that create the behavior in violation of **[*8]** law provide the context and substance for a conclusion that an antitrust violation occurred. True, these facts can be viewed as "background," but they also provide the substjance necessary to understand who did what to violate *Section 2*. In other words, these "background" facts are all necessary to establish the relevant market and to show the essential elements that "that the defendant holds market power over the relevant market."

Sky Angel U.S., LLC v. Nat'l Cable Satellite Corp. (D.D.C. 2013), 947 F. Supp.2d 88, 102; *Southern Pac. Communications Co. v. American Tel. & Tel. Co. (D.C. Cir. 1984), 740 F.2d 980, 1000, 238 U.S. App. D.C. 309* ("[C]ourts frequently approach the problem of measuring market power by defining the relevant product… and computing the defendant's market share. Monopoly power is then ordinarily inferred from a predominant share of the market.").

Microsoft asserts that a number of the Findings at best relate to sweeping anticompetitive behavior that goes well beyond what it argues is a far narrower determination of its liability in the Microsoft Litigation. These Findings deal with behavior toward OEMs, restrictions on ISVs, and behavior relating to middleware products such as Netscape and Java (Findings 203, 214-215, 228-229, and 338-339 and conclusions 3 and 4). The Findings regarding middleware were termed "of importance" by the Court in its analysis of the relevant market and appeared **[*9]** essential to the Court's rejection of Microsoft's argument that the trial court had incorrectly defined the relevant market (*253 F.3d at 53-54*). Also, these Findings demonstrate restrictions and other conditions imposed by Microsoft on OEMs and ISVs, which were necessary to the second element of a *Section 2* violation: that Microsoft engaged in exclusionary conduct and "use[d its] monopoly power 'to foreclose competition, to gain a competitive advantage, or to destroy a competitor,'" *Eastman Kodak, 504 U.S. at 482-83* (quoting *Griffith, 334 U.S. at 107*), and that the imposed restrictions were not procompetitive. *Grinnell, 384 F.3d at 571* (distinguishing unlawful monopolization from one that developed "as à consequence of a superior product, business acumen, or historic accident"). The middleware product findings are essential in that they relate to the factors rejected in the Microsoft Litigation as a threat to Microsoft's monopoly (even though those products were not operating systems). Given these issues, these Findings were essential to the judgment. *E.I. du Pont de Nemours & Co., 351 U.S. at 395* ("In considering what is the relevant market for determining the control oi price and competition, no more definite rule can be declared than that [products] reasonably interchangeable by consumers for the same purposes make up that part of **[*10]** the trade or commerce, monopolization of which may be illegal.").

Microsoft argues that several of the Findings at issue should be rejected because they relate to a finding of a violation of the Cartwfight Act, which Microsoft argues was not included in a final judgment against it. (Findings (perhaps) 132, (perhaps 338-339, 410, 412, Conclusions 2 and 7). Here, so long as the finding is essential to the judgment in the Microsoft Litigation (e.g., the use of monopoly power), then the fact that it also might support a violation of the Cartwright Act (i.e., using monopoly power to coerce other market participants to become coconspirators) does not render it not essential to the final judgment.

Microsoft also objects to the Findings jregarding the harm caused by Microsoft's conduct (Findings 410 and 412 and Conclusions 2 and 7) as being overbroad relative to the actual violations found. These Findings, however, were necessary to the element of anti-competitive effect, an essential element to the judgment. *United States v. Microsoft, 253 F. 3d at 80* (explaining that "Microsoft's concerns over causation have more purchase in connection with the appropriate remedy issue, i.e., whether the court should impose a structural remedy or merely **[*11]** enjoin the offensive conduct… [but that] causation affords Microsoft no defense to liability for its unlawful actions undertaken to maintain its monopoly in the operating system market"). Similarly, the findings and conclusions made by Judge Kollar-Kotelly once the case was remanded by the Court of Appeals were necessarily decided because they formed the basis for her judgment: the entry of an order enjoining Microsoft from continuing certain practices found to be anticompetitive. [1] *See New York v. Microsoft Corp., 224 F. Supp. 2d at 152*. The fact that Microsoft's licensing restrictions were exclusionary was a necessary factor in the court's determination that its remedial decree must prohibit such exclusionary practices and protect OEMs and ISVs from Microsoft's conduct going forward. Likewise, the District Court's conclusion (conclusion 8) with respect to Cartwright Act liability was necessary to the remedy order that the District Court entered on remand, which granted the California Attorney General remedial power over Microsoft. *United States v. Microsoft Corp (D.D.C. 2002), 231 F. Supp. 2d 144, 198 & n.30*.

---

[1] The fact that some of the conclusions on remand restate and summarize the court of appeals' conclusions is of no moment in the determination of necessity. *See* *Yamaha Corp. of Am. v. United States, (D.C. Cir. 1992) 961 F.2d 245, 254, 295 U.S. App. D.C. 158* ("In issue preclusion, it is the prior **[*12]** *judgment* that matters, not the court's opinion explicating the judgment. 'Even in the absence of *any* opinion, a judgment bars re-litigation of an issue necessary to the judgment.'" [quoting *Am. Iron & Steel Inst, v. EPA, (D.C. Cir. 1989) 886 F.2d 390, 397, 280 U.S. App. D.C. 373]*.

D. Microsoft's Claimed Concession

Plaintiffs' assert that Microsoft conceded that 20 of the findings at issue here were necessary to the judgment in the Microsoft Litigation. The basis for this claimed concession was Microsoft's Memorandum Contesting 117 out of 383 Findings of Fact for Which Plaintiffs Seek Offensive Nonmutual Collateral Estoppel ("Microsoft's Memo") filed on June 6, 2004 in the California JCCP Case No. 4106, called the "Microsoft Cases." This Court has taken judicial notice of Microsoft's Memo for purposes of this trial only as Exhibit 7 to the Stipulation and Order filed herein on August 8, 2014(the "Stipulated Order").

Plaintiffs' argument is based on a claim of judicial estoppel, i.e., that Microsoft's Memo conceded that 20 of the findings at issue here were necessary to the judgment in the Microsoft Litigation and that it should not be permitted to take the opposite position now.

California's law of judicial estoppel was summarized in *The Swahn Group, Inc. v. Segal (2010), 183 Cal.App.4th 831, 841, 108 Cal. Rptr. 3d 651*:

> The doctrine of Judicial estoppel precludes **[*13]** a party from taking inconsistent positions in separate proceedings… It is invoked to prevent a party from changing its position in the course of judicial proceedings when such positional changes have an adverse impact on the judicial process…The policies underlying preclusion of inconsistent positions are general considerations of the orderly administration of justice and regard for the dignity of judicial proceedings… Judicial estoppel is intended to protect against the litigant from playing fast and loose with the courts…It seems patently wrong to allow a person to abuse the judicial process by first [advocating] one position, and later, if it becomes beneficial, to assert the opposite… [citations and internal quotation marks omitted.]

There are five requirements for the application of judicial estoppel: (1) the same party has taken two positions, (2) the positions were taken injudicial or quasi-administrative administrative proceedings, (3) the party was successful in asserting the first position, (4) the two positions are totally inconsistent, and (5) the first position was not taken as the result of ignorance, fraud or mistake. *Id. at 842*.

Judicial estoppel does not apply to the position **[*14]** that Microsoft took in the Microsoft Memo as compared with that it has taken in this bifurcated trial. First and foremost, Microsoft's position in the Microsoft Memo was expressly "subject to all of its ongoing objections" and thus was not totally inconsistent with its position here where objections to the Findings are raised. Further, the Court in the Microsoft cases did not adopt the position of Microsoft in the sense of accepting it over an opponent's contrary position. Instead, the Court had adopted the opponent's position that collateral estoppel would be applied, directing the parties to reach an accommodation as to the scope of that application (Stipulated Order, Ex. 6, p. 8, lines 3-p. 10, line 23). Microsoft's "concession in the Microsoft Memo is expressly made "based on that ruling" (Microsoft's Memo, page 1, lines 16-18). Finally, in light of how the Court handled the "necessary findings" issue (i.e., to decide that collateral estoppel would apply and to leave it up to the parties to work out the specific findings to be applied, it cannot be said that Microsoft's compliance with that process impugned the integrity of the judicial process or can be viewed as playing "fast **[*15]** and loose" with the court.

CONCLUSION

Based upon the foregoing, this court finds that the Findings set forth in Appendix A were necessary to the judgment in the Microsoft Litigation.

Dated: April 13, 2015

Judge of the Superior Court

APPENDIX A

United States v. Microsoft Corp., ***84 F. Supp. 2d 9 (D.D.C. 1999)***

Finding of Fact ("FOF") 2: An "operating system" is a software program that controls the allocation and use of computer resources (such as central processing unit time, main memory space, disk space, and input/output channels). The operating system also supports the functions of software programs, called "applications," that perform specific user-oriented tasks. The operating system supports the functions of applications by exposing interfaces, called "application programming interfaces," or "APIs." These are synapses at which the developer of an application can connect to invoke pre-fabricated blocks of code in the operating system. These blocks of code in turn perform crucial tasks, such as displaying text on the computer screen. Because it supports applications while interacting more closely with the PC system's hardware, the operating system is said to serve as a "platform."

FOF 4: An operating system designed to run on an Intel-compatible **[*16]** PC will not function on a non-Intel-compatible PC, nor will an operating system designed for a non-Intel-compatible PC function on an Intel-compatible one. Similarly, an application that relies on APIs specific to one operating system will not, generally speaking, function on another operating system unless it is first adapted, or "ported," to the APIs of the other operating system.

FOF 10: Microsoft licenses copies of its software programs directly to consumers. The largest part of its MS-DOS and Windows sales, however, consists of licensing the products to manufacturers of PCs (known as "original equipment manufacturers" or "OEMs"), such as the IBM PC Company and the Compaq Computer Corporation ("Compaq"). An OEM typically installs a copy of Windows onto one of its PCs before selling the package to a consumer under a single price.

FOF 35: Microsoft possesses a dominant, persistent, and increasing share of the worldwide market for Intel-compatible PC operating systems. Every year for the last decade, Microsoft's share of the market for Intel-compatible PC operating systems has stood above ninety percent. For the last couple of years, the figure has been at least ninety-five percent, **[*17]** and analysts project that the share will climb even higher over the next few years. Even if Apple's Mac OS were included in the relevant market, Microsoft's share would still stand well above eighty percent.

FOF 66: Furthermore, Microsoft expends a significant portion of its monopoly power, which could otherwise be spent maximizing price, on imposing burdensome restrictions on its customers — and in inducing them to behave in ways — that augment and prolong that monopoly power. For example, Microsoft attaches to a Windows license conditions that restrict the ability of OEMs to promote software that Microsoft believes could weaken the applications barrier to entry. Microsoft also charges a lower price to OEMs who agree to ensure that all of their Windows machines are powerful enough to run Windows NT for Workstations. To the extent this provision induces OEMs to concentrate their efforts on the development of relatively powerful, expensive PCs, it makes OEMs less likely to pursue simultaneously the opposite path of developing "thin client" systems, which could threaten demand for Microsoft's Intel-compatible PC operating-system products. In addition, Microsoft charges a lower price to **[*18]** OEMs who agree to ship all but a minute fraction of their machines with an operating system pre-installed. While this helps combat piracy, it also makes it less likely that consumers will detect increases in the price of Windows and renders operating systems not pre-installed by OEMs in large numbers even less attractive to consumers. After all, a consumer's interest in a non-Windows operating system might not outweigh the burdens on system memory and performance associated with supporting two operating systems on a single PC. Other such restrictions and incentives are described below.

FOF 67: Microsoft's monopoly power is also evidenced by the fact that, over the course of several years, Microsoft took actions that could only have been advantageous if they operated to reinforce monopoly power. These actions are described below.

FOF 132: In sum, from 1994 to 1997, Microsoft consistently pressured IBM to reduce its support for software products that competed with Microsoft's offerings, and it used its monopoly power in the market for Intel-compatible PC operating systems to punish IBM for its refusal to cooperate. Whereas, in the case of Netscape, Microsoft tried to induce a company to **[*19]** move its business away from offering software that could weaken the applications barrier to entry, Microsoft's primary concern with IBM was to reduce the firm's support for software products that competed directly with Microsoft's most profitable products, namely Windows and Office. That being said, it must be noted that one of the IBM products to which Microsoft objected, Notes, was like Navigator in that will exposed middleware APIs. In any event, Microsoft's interactions with Netscape, IBM, Intel, Apple, and RealNetworks all reveal Microsoft's business strategy of directing its monopoly power toward inducing other companies to abandon projects that threaten Microsoft and toward punishing those companies that resist.

FOF 203: If OEMs removed the most visible means of invoking Internet Explorer, and pre-installed Navigator with facile methods of access, Microsoft's purpose in forcing OEMs to take Internet Explorer — capturing browser usage share from Netscape — would be subverted. The same would be true if OEMs simply configured their machines to promote Navigator before Windows had a chance to promote Internet Explorer. Decision-makers at Microsoft believed that as Internet Explorer **[*20]** caught up with Navigator in quality, OEMs would ultimately conclude that the costs of pre-installing and promoting Navigator, and removing easy access to Internet Explorer, outweighed the benefits. Still, those decision-makers did not believe that Microsoft could afford to wait for the several large OEMs that represented virtually all Windows PCs shipped to come to this desired conclusion on their own. Therefore, in order to bring the behavior of OEMs into line with it: strategic goals quickly, Microsoft threatened to terminate the Windows license of any OEM that removed Microsoft's chosen icons and program entries from the Windows desktop or the “Start” menu. It threatened similar punishment for OEMs that added programs that promoted third-party software to the Windows “boot” sequence. These inhibitions soured Microsoft's relations with OEMs and stymied innovation that might have made Windows PC systems more satisfying to users. Microsoft would not have paid this price had it not been convinced that its actions were necessary tc ostracize Navigator from the vital OEM distribution channel.

FOF 214: The several OEMs that in the aggregate represented over ninety percent of Intel-compatible **[*21]** PC sales believed that the new restrictions would make their PC systems more difficult and more confusing to use, and thus less acceptable to consumers. They also anticipated that the restrictions would increase product returns and support costs and generally lower the value of their machines. Those OEMs that had already spent millions of dollars developing and implementing tutorial and registration programs and/or automatically-loading graphical interfaces in the Windows boot sequence lamented that their investment would, as a result of Microsoft's policy, be largely wasted. Gateway, Hewlett-Packard, and IBM communicated their opposition forcefully and urged Microsoft to lift the restrictions. Emblematic of the reaction among large OEMs was a letter that the manager of research and development at Hewlett-Packard sent to Microsoft in March 1997. He wrote:

> Microsoft's mandated removal of all OEM boot-sequence and auto-start programs for OEM licensed systems has resulted in significant and costly problems for the HP-Pavilion line of retail PC's.
>
> Our data (as of 3/10/97) shows a 10% increase in W[indows]95 calls as a % of our total customer support calls…
>
> Our registration rate has also dropped **[*22]** from the mid-80% range to the low 60% range. There is also subjective data from several channel partners that our system return rate has increased from the lowest of any OEM (even lower than Apple) to a level comparable to the other Microsoft OEM PC vendors. This is a major concern in that we are taking a step backward in meeting customer satisfaction needs.
>
> These three pieces of data confirm that we have been damaged by the edicts that □ Microsoft issued last fall.
>
> From the consumer perspective, we are hurting our industry and our customers. PC's can be frightening and quirky pieces of technology into which they invest a large sum of their money. It is vitally important that the PC suppliers dramatically improve the consumer buying experience, out of box experience as well as the longer term product usability and reliability. The channel feedback as well as our own data shows that we are going in the wrong direction. This causes consumer dissatisfaction in complex telephone support process, needless in-home repair visits and ultimately in product returns. Many times the cause is user misunderstanding of a product that presents too much complexity to the common user…

> Our Customers hold **[*23]** HP accountable for their dissatisfaction with our products. We bear □ the cost of returns of our products. We are responsible for the cost of technical support of our customers, including the 33% of calls we get related to the lack of quality or confusion generated by your product. And finally we are responsible for our success or failure in the retail PC market.
> We must have more ability to decide how our system is presented to our end users.
> If we had a choice of another supplier, based on your actions in this area, I assure you [that you] would not be our supplier of choice.
> I strongly urge you to have your executives review these decisions and to change this unacceptable policy.

FOF 215: Even in the face of such strident opposition from its OEM customers, Microsoft refused to relent on the bulk of its restrictions. It did, however, grant Hewlett-Packard and other OEMs discounts off the royalty price of Windows as compensation for the work required to bring their respective alternative user interfaces into compliance with Microsoft's requirements. Despite the high costs that Microsoft's demands imposed on them, the OEMs obeyed the restrictions because they perceived no alternative to **[*24]** licensing Windows for pre-installation on their PCs. Still, the restrictions lowered the value that OEMs attached to Windows by the amount of the costs that the restrictions imposed on them. Furthermore, Microsoft's intransigence damaged the goodwill between it and several of the highest-volume OEMs.

FOF 228: Like most other software products, Windows 95 and Windows 98 are covered by copyright registrations. Since they are copyrighted, Microsoft distributes these products to OEMs pursuant to license agreements. By early 1998, Microsoft had made these licenses conditional on OEMs' compliance with the restrictions described above. Notwithstanding the formal inclusion of these restrictions in the license agreements, the removal of the Internet Explorer icon and the promotion of Navigator in the boot sequence would not have compromised Microsoft's creative expression or interfered with its ability to reap the legitimate value of its ingenuity and investment in developing Windows. More generally, the contemporaneous Microsoft documents reflect concern with the promotion of Navigator rather than the infringement of a copyright. Also notable is the fact that Microsoft did not adjust its OEM **[*25]** pricing guidelines when it lifted certain of the restrictions in the spring of 1998.

FOF 229: Finally, it is significant that, while all vendors of PC operating systems undoubtedly share Microsoft's stated interest in maximizing consumer satisfaction, the prohibitions that Microsoft imposes on OEMs are considerably more restrictive than those imposed by other operating system vendors. For example, Apple allows its retailers to remove applications that Apple has pre-installed and to reconfigure the Mac OS desktop. For its part, IBM allows its OEM licensees to override the entire OS/2 desktop in favor of a customized shell or to set an application to start automatically the first time the PC is turned on. The reason is that these firms do not share Microsoft's interest in protecting the applications barrier to entry.

FOF 338: Because of the importance of “time-to-market” in the software industry, ISVs developing software to run on Windows products seek to obtain beta releases and other technical information relating to Windows as early and as consistently as possible. Since Microsoft decides which ISVs receive betas and other technical support, and when they will receive it, the ability **[*26]** of an ISV to compete in the market-place for software running on Windows products is highly dependent on Microsoft's cooperation. Netscape learned this lesson in 1995.

FOF 339: In dozens of “First Wave” agreements signed between the fall of 1997 and the spring of 1998, Microsoft has promised to give preferential support, in the form of early Windows 98 and Windows NT betas, other technical information, and the right to use certain Microsoft seals of approval, to important ISVs that agree to certain conditions. One of these conditions is that the ISVs use Internet Explorer as the default browsing software for any software they develop with a hypertext-based user interface. Another condition is that the ISVs use Microsoft's “HTML Help,” which is accessible only with Internet Explorer, to implement their applications' help systems.

FOF 410: By refusing to offer those OEMs who requested it a version of Windows without Web browsing software, and by preventing OEMs from removing Internet Explorer — or even the most obvious means of invoking it — prior to shipment, Microsoft forced OEMs to ignore consumer demand for a browserless version of Windows. The same actions forced OEMs either to ignore **[*27]** consumer preferences for Navigator or to give them a Hobson's choice of both browser products at the cost of increased confusion, degraded system performance, and restricted memory.

By ensuring that Internet Explorer would launch in certain circumstances in Windows 98 even if Navigator were set as the default, and even if the consumer had removed all conspicuous means of invoking Internet Explorer, Microsoft created confusion and frustration for consumers, and increased technical support costs for business customers. Those Windows purchasers who did not want browsing software — businesses, or parents and teachers, for example, concerned with the potential for irresponsible Web browsing on PC systems — not only had to undertake the effort necessary to remove the visible means of invoking Internet Explorer and then contend with the fact that Internet Explorer would nevertheless launch in certain cases; they also had to (assuming they needed new, non-browsing features not available in earlier versions of Windows) content themselves with a PC system that ran slower and provided less available memory than if the newest version of Windows came without browsing software. By constraining the **[*28]** freedom of OEMs to implement certain software programs in the Windows boot sequence, Microsoft foreclosed an opportunity for OEMs to make Windows PC systems less confusing and more user-friendly, as consumers desired. By taking the actions listed above, and by enticing firms into exclusivity arrangements with valuable inducements that only Microsoft could offer and that the firms reasonably believed they could not do without, Microsoft forced those consumers who otherwise would have elected Navigator as their browser to either pay a substantial price (in the forms of downloading, installation, confusion, degraded system performance, and diminished memory capacity) or content themselves with Internet Explorer. Finally, by pressuring Intel to drop the development of platform-level NSP software, and otherwise to cut back on its software development efforts, Microsoft deprived consumers of software innovation that they very well may have found valuable, had the innovation been allowed to reach the marketplace. None of these actions had pro-competitive justifications.

FOF 412: Most harmful of all is the message that Microsoft's actions have conveyed to every enterprise with the potential **[*29]** to innovate in the computer industry. Through its conduct toward Netscape, IBM, Compaq, Intel, and others, Microsoft has demonstrated that it will use its prodigious market power and immense profits to harm any firm that insists on pursuing initiatives that could intensify competition against one of Microsoft's core products. Microsoft's past success ir hurting such companies and stifling innovation deters investment in technologies and businesses that exhibit the potential to threaten Microsoft. The ultimate result is that some innovations that would truly benefit consumers never occur for the sole reason that they do not coincide with Microsoft's self-interest.

Conclusion of Law ("COL") 2, ***id. at 39*****:** Because Microsoft achieved this result through exclusionary acts that lacked procompetitive justification, the Court deems Microsoft's conduct the maintenance of monopoly power by anticompetitive means.

COL 3, ***id. at 43*****:** With respect to the ISV agreements, Microsoft has put forward no procompetitive business ends whatsoever to justify their exclusionary terms.

COL 4, ***id. at 43*****:** Microsoft used its monopoly power to prevent firms such as Intel from aiding in the creation of cross-platform interfaces.

COL 7, ***id. at 44*****:** Microsoft's **[*30]** anticompetitive actions trammeled the competitive process through which the computer software industry generally stimulates innovation and conduced to the optimum benefit of consumers.

COL 8, ***id. at 54 n.7***: The facts proving that Microsoft unlawfully maintained its monopoly power in violation of *§ 2* of the Sherman Act are sufficient to meet analogous elements of causes of action arising under the laws of each Plaintiff'state. *See Cal. Bus. & Prof. Code §§ 16720*, *16726*, *17200*.

D.C. Circuit Op. 1, ***id. at 53*****:** Operating systems also function as platforms for software applications. They do this by "exposing"-i.e., making available to software developers-routines or protocols that perform certain widely-used functions. These are known as Application Programming Interfaces, or "APIs."

D.C. Circuit Op. 2, ***id. at 53*****:** Software developers wishing to include that function in an application need not duplicate it in their own code. Instead, they can "call"-i.e., use-the Windows API.

D.C. Circuit Op. 3, *id. at 53*: Windows contains thousands of APIs, controlling everything from data storage to font display.

D.C. Circuit Op. 4, *id. at 53*: [A] middleware product written for Windows could take over some or all of Windows's valuable platform functions-that is, developers might begin to rely upon APIs **[*31]** exposed by the middleware for basic routines rather than relying upon the API set included in Windows. If middleware were written for multiple operating systems, its impact could be even greater. The more developers could rely upon APIs exposed by such middleware, the less expensive porting to different operating systems would be. Ultimately, if developers could write applications relying exclusively on APIs exposed by middleware, their applications would run on any operating system on which the middleware was also present.

D.C. Circuit Op. 5, *id. at 56*: Because the applications barrier to entry protects a dominant operating system irrespective of quality, it gives Microsoft power to stave off even superior new rivals. The barrier is thus a characteristic of the operating system market, not of Microsoft's popularity, or, as asserted by a Microsoft witness, the company's efficiency.

New York v. Microsoft Corp., ***224 F. Supp. 2d 76 (D.D.C. 2002)***

Remedies Op. 1, *id. at 152*: A significant portion of the liability findings concerns Microsoft's treatment of OEMs, specifically with regard to Microsoft's imposition of exclusionary restrictions in conjunction with the Windows operating system licenses provided to OEMs. The licenses sharply limited OEMs' flexibility and choices **[*32]** in configuring the PC desktop. The limitations were exclusionary in that they bound OEMs' configuration of the desktop in a manner which tended to favor Microsoft software and services at the expense of software and services offered by other entities.

Remedies Op. *2, id. at 159*: Specifically, the removal of end-user access to certain Microsoft technologies will eliminate, or at least substantially reduce, the deterrent effect of the presence of the Microsoft technology upon the OEM's inclination to install an alternative technology.

Remedies Op. 3, *id. at 166*: The Windows license is fundamental to an OEM's ability to conduct business, and hence, the threat of termination is a powerful tool which Microsoft can utilize to exert undue influence over a particular OEM.

Remedies Op. 4, *id. at 169*: Accordingly, the Court's remedial decree will limit Microsoft's ability to enter into agreements in which the other party agrees to support Microsoft's operating system products exclusively or in a fixed percentage. This provision will address those industry participants with whom Microsoft entered into unlawful and anticompetitive exclusive agreements, namely ISVs, IAPs, and OEMs, as well as those industry participants, such **[*33]** as ICPs and IHVs, who are ready targets for the imposition of similarly unlawful exclusive agreements.

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

HN1[] **Supremacy Clause, Federal Preemption**

The United States Supreme Court has said that, in passing the Natural Gas Act, 52 Stat. 821, Congress occupied the field of matters relating to wholesale sales and transportation of natural gas in interstate commerce.

Constitutional Law > Supremacy Clause > Federal Preemption

Constitutional Law > Supremacy Clause > Supreme Law of the Land

HN2[] Supremacy Clause, Federal Preemption

The *Supremacy Clause* provides that the laws of the United States (as well as treaties and the Constitution itself) shall be the supreme law of the land, anything in the Constitution or laws of any State to the contrary notwithstanding. *U.S. Const. art. VI, cl. 2*. Congress may consequently preempt, i.e., invalidate, a state law through federal legislation. It may do so through express language in a statute. But even where a statute does not refer expressly to preemption, Congress may implicitly preempt a state law, rule, or other state action. It may do so either through "field" preemption or "conflict" preemption. As to the former, Congress may have intended to foreclose any state regulation in an area, irrespective of whether state law is consistent or inconsistent with federal standards. In such situations, Congress has forbidden the States to take action in the field that the federal statute preempts. By contrast, conflict preemption exists where compliance with both state and federal law is impossible, or where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. In either situation, federal law must prevail.

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

HN3[] Natural Gas Industry, Distribution & Sale

In the early 20th century, the United States Supreme Court held that the *Commerce Clause* forbids the States to regulate the interstate shipment and sale of gas to local distributors for resale. Those holdings left a regulatory gap. Congress enacted the Natural Gas Act, 52 Stat. 821, to fill it. The Act, in § 5(a), *15 U.S.C.S. § 717d(a)*, gives rate-setting authority to the Federal Energy Regulatory Commission (FERC). That authority allows FERC to determine whether any rate, charge, or classification collected by any natural-gas company in connection with any transportation or sale of natural gas, subject to the jurisdiction of FERC, or any rule, regulation, practice, or contract affecting such rate, charge, or classification is unjust, unreasonable, unduly discriminatory, or preferential. Section 5(a) limits the scope of FERC's authority to activities in connection with any transportation or sale of natural gas, subject to the jurisdiction of the Commission. And the Act, in § 1(b), *15 U.S.C.S. § 717(b)*, limits FERC's jurisdiction to (1) the transportation of natural gas in interstate commerce, (2) the sale in interstate commerce of natural gas for resale, and (3) natural-gas companies engaged in such transportation or sale. The Act leaves regulation of other portions of the industry, such as production, local distribution facilities, and direct sales, to the States.

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

HN4[] Supremacy Clause, Federal Preemption

As the United States Supreme Court has repeatedly stressed, the Natural Gas Act, 52 Stat. 821, was drawn with meticulous regard for the continued exercise of state power, not to handicap or dilute it in any way. Accordingly, where a state law can be applied to nonjurisdictional as well as jurisdictional sales, courts must proceed cautiously, finding preemption only where detailed examination convinces a court that a matter falls within the preempted field as defined by Supreme Court precedents.

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

HN5[] **Supremacy Clause, Federal Preemption**

United States Supreme Court precedents emphasize the importance of considering the target at which a state law aims in determining whether that law is preempted under the Natural Gas Act, 52 Stat. 821. The Court consistently recognized that the significant distinction for purposes of preemption in the natural-gas context is the distinction between measures aimed directly at interstate purchasers and wholesales for resale, and those aimed at subjects left to the States to regulate. The Natural Gas Act does not preempt a state regulation concerning the timing of gas production from a gas field within the State, even though the regulation might have affected the costs of and the prices of interstate wholesale sales, i.e., jurisdictional sales. In reaching this conclusion, the Court explained that the state regulation aimed primarily at protecting producers' rights—a matter firmly on the States' side of that dividing line. The Court contrasted this state regulation with the state orders at issue in Northern Natural, which invalidly invaded the federal agency's exclusive domain precisely because they were unmistakably and unambiguously directed at purchasers.

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

HN6[] **Supremacy Clause, Federal Preemption**

The target to which United States Supreme Court cases that interpret the Natural Gas Act, 52 Stat. 821, refer must mean more than just the physical activity that a State regulates. After all, a single physical action, such as reporting a price to a specialized journal, could be the subject of many different laws—including tax laws, disclosure laws, and others. No one can claim that the Federal Energy Regulatory Commission's regulation of this physical activity for purposes of wholesale rates forecloses every other form of state regulation that affects those rates.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > State Regulation

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

HN7[] **Energy & Utilities, State Regulation**

Antitrust laws, like blue sky laws, are not aimed at natural-gas companies in particular, but rather all businesses in the marketplace.

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

HN8[] **Supremacy Clause, Federal Preemption**

To find field preemption of state regulation under the Natural Gas Act, 52 Stat. 821, merely because purchasers' costs and hence rates might be affected would be largely to nullify § 1(b), *15 U.S.C.S. § 717(b)*, of the Act.

Constitutional Law > Supremacy Clause > Federal Preemption

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Natural Gas Industry > Marketing & Transportation > General Overview

Energy & Utilities Law > Natural Gas Industry > Natural Gas Act > General Overview

HN9[] **Supremacy Clause, Federal Preemption**

The enumeration of the Federal Energy Regulatory Commission's powers in § 5(a), *15 U.S.C.S. § 717d(a)*, of the Natural Gas Act, 52 Stat. 821, is circumscribed by a reference back to the limitations in § 1(b), *15 U.S.C.S. § 717(b)*. Those limits are key to understanding the careful balance between federal and state regulation that Congress struck when it passed the Natural Gas Act. That Act was drawn with meticulous regard for the continued exercise of state power, not to handicap or dilute it in any way. States have a long history of providing common-law and statutory remedies against monopolies and unfair business practices.

Constitutional Law > Supremacy Clause > Federal Preemption

HN10[] **Supremacy Clause, Federal Preemption**

Mississippi Power & Light Co. v. Mississippi ex rel. Moore, 487 U. S. 354 (1988), is best read as a conflict preemption case, not a field preemption case.

Lawyers' Edition Display

Decision

[*511]** Natural Gas Act (*15 U.S.C.S. § 717 et seq.*) held not to pre-empt state-law claims challenging industry practices that directly affected wholesale natural gas market, when claims were asserted by litigants who purchased gas in retail transactions.

Summary

Overview: HOLDINGS: [1]-Manufacturers, hospitals, and other institutions that bought natural gas directly from interstate pipelines were not pre-empted under the Natural Gas Act, *52 Stat. 821*, from suing the pipelines under state antitrust statutes, claiming that they violated state law when they engaged in behavior that affected both wholesale and retail prices of natural gas; [2]-The Act was drawn with meticulous regard for the continued exercise of state power, it did not pre-empt the States from regulating issues involving the retail sale of natural gas, and no one could claim that the FERC's regulation of natural gas transmission for purposes of wholesale rates foreclosed every form of state regulation that affected those rates; [3]-To the extent conflicts arose between state ***antitrust law*** and the federal rate-setting process, the doctrine of conflict pre-emption was available to address them.

Outcome: Judgment affirmed. 7-2 decision; 1 concurrence; 1 dissent.

The *supremacy clause* provides that the laws of the United States (as well as treaties and the Constitution itself) shall be the supreme law of the land, anything in the Constitution or laws of any state to the contrary notwithstanding. *U.S. Const. Art. VI, cl. 2*. Congress may consequently preempt, i.e., invalidate, a state law through federal legislation. It may do so through express language in a statute. But even where a statute does not refer expressly to pre-emption, Congress may implicitly pre-empt a state law, rule, or other state action. It may do so either through “field” pre-emption or “conflict” pre-emption. As to the former, Congress may have intended to foreclose any state regulation in an area, irrespective of whether state law is consistent or inconsistent with federal standards. In such situations, Congress has forbidden the states to take action in the field that the federal statute pre-empts. By contrast, conflict pre-emption exists where compliance with both state and federal law is impossible, or where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. In either situation, federal law must prevail. (Breyer, J., joined by Kennedy, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

[*513]**

COMMERCE §138 > NATURAL GAS -- SHIPMENT AND SALE -- FEDERAL AND STATE REGULATION > Headnote:
LEdHN[3][] [3]

In the early 20th century, the United States Supreme Court held that the *commerce clause* forbids the states to regulate the interstate shipment and sale of gas to local distributors for resale. Those holdings left a regulatory gap.

Congress enacted the Natural Gas Act, *52 Stat. 821*, to fill it. The Act, in § 5(a), *15 U.S.C.S. § 717d(a)*, gives rate-setting authority to the Federal Energy Regulatory Commission (FERC). That authority allows FERC to determine whether any rate, charge, or classification collected by any natural-gas company in connection with any transportation or sale of natural gas, subject to the jurisdiction of FERC, or any rule, regulation, practice, or contract affecting such rate, charge, or classification is unjust, unreasonable, unduly discriminatory, or preferential. *Section 5(a)* limits the scope of FERC's authority to activities in connection with any transportation or sale of natural gas, subject to the jurisdiction of the Commission. And the Act, in § 1(b), *15 U.S.C.S. § 717(b)*, limits FERC's jurisdiction to (1) the transportation of natural gas in interstate commerce, (2) the sale in interstate commerce of natural gas for resale, and (3) natural-gas companies engaged in such transportation or sale. The Act leaves regulation of other portions of the industry, such as production, local distribution facilities, and direct sales, to the states. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

STATES, TERRITORIES, AND POSSESSIONS §45.8 > NATURAL GAS ACT -- STATE AND FEDERAL POWERS > Headnote:
LEdHN[4][] [4]

As the United States Supreme Court has repeatedly stressed, the Natural Gas Act, *52 Stat. 821*, was drawn with meticulous regard for the continued exercise of state power, not to handicap or dilute it in any way. Accordingly, where a state law can be applied to nonjurisdictional as well as jurisdictional sales, courts must proceed cautiously, finding pre-emption only where detailed examination convinces a court that a matter falls within the pre-empted field as defined by Supreme Court precedents. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

STATES, TERRITORIES, AND POSSESSIONS §45.8 > NATURAL GAS ACT -- STATE LAW -- FEDERAL PRE-EMPTION > Headnote:
LEdHN[5][] [5]

United States Supreme Court precedents emphasize the importance of considering the target at which a state law aims in determining whether that law is pre-empted under the Natural Gas Act, *52 Stat. 821*. The court consistently recognized that the significant distinction for purposes of pre-emption in the natural-gas context is the distinction between measures aimed directly at interstate purchasers and wholesales for resale, and those aimed at subjects left to the states to regulate. The Natural Gas Act does not pre-empt a state regulation concerning the timing of gas production from a gas field within the state, even though the regulation might have affected the costs of and the prices of interstate wholesale sales, i.e., jurisdictional sales. In reaching this conclusion, the Court explained that the state regulation aimed primarily at protecting producers' rights--a matter firmly on the states' side of that dividing line. The court contrasted this state regulation with the state orders at issue in Northern Natural, which invalidly invaded the federal agency's exclusive domain precisely because they were unmistakably and unambiguously directed at purchasers. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

STATES, TERRITORIES, AND POSSESSIONS §38.7 STATES, TERRITORIES, AND POSSESSIONS §45.8 > NATURAL GAS ACT -- STATE LAW -- FEDERAL PRE-EMPTION > Headnote:
LEdHN[6][] [6]

The target to which United States Supreme Court cases that interpret the Natural Gas Act, *52 Stat. 821*, refer must mean more than just the physical activity that a state regulates. After all, a single physical action, such as reporting a price to a specialized journal, could be the subject of many different laws--including tax laws, disclosure laws, and others. No one can claim that the Federal Energy Regulatory Commission's regulation of this physical activity for purposes of wholesale rates forecloses every other form of state regulation that affects those rates. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

STATES, TERRITORIES, AND POSSESSIONS §36 > NATURAL GAS -- STATE AND FEDERAL REGULATION > Headnote:
LEdHN[7][] [7]

Antitrust laws, like blue sky laws, are not aimed at natural-gas companies in particular, but rather all businesses in the marketplace. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

STATES, TERRITORIES, AND POSSESSIONS §45.8 > NATURAL GAS ACT -- FIELD PRE-EMPTION > Headnote:
LEdHN[8][] [8]

To find field pre-emption of state regulation under the Natural Gas Act, *52 Stat. 821*, merely because purchasers' costs and hence rates might be affected would be largely to nullify § 1(b), *15 U.S.C.S. § 717(b)*, of the Act. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

[*514]**

STATES, TERRITORIES, AND POSSESSIONS §45.8 > NATURAL GAS ACT -- STATE POWER > Headnote:
LEdHN[9][] [9]

The enumeration of the Federal Energy Regulatory Commission's powers in § 5(a), *15 U.S.C.S. § 717d(a)*, of the Natural Gas Act, *52 Stat. 821*, is circumscribed by a reference back to the limitations in § 1(b), *15 U.S.C.S. § 717(b)*. Those limits are key to understanding the careful balance between federal and state regulation that Congress struck when it passed the Natural Gas Act. That Act was drawn with meticulous regard for the continued exercise of state power, not to handicap or dilute it in any way. States have a long history of providing common-law and statutory remedies against monopolies and unfair business practices. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

STATES, TERRITORIES, AND POSSESSIONS §45.8 > PUBLIC UTILITY -- STATE LAW -- PRE-EMPTION > Headnote:
LEdHN[10][] [10]

Mississippi Power & Light Co. v. Mississippi ex rel. Moore, 487 U.S. 354, 108 S. Ct. 2428, 101 L. Ed. 2d 322 (1988), is best read as a conflict pre-emption case, not a field pre-emption case. (Breyer, J., joined by Kennedy, Thomas, Ginsburg, Alito, Sotomayor, and Kagan, JJ.)

Syllabus

[*373] [1592] [***515]** Respondents, a group of manufacturers, hospitals, and other institutions that buy natural gas directly from interstate pipelines, sued petitioner interstate pipelines, claiming that the pipelines had engaged in behavior that violated state antitrust laws. In particular, respondents alleged that petitioners reported false information to the natural-gas indices on which respondents' natural-gas contracts were based. The indices affected not only retail natural-gas prices, but also wholesale natural-gas prices.

After removing the cases to federal court, the petitioner pipelines sought summary judgment on the ground that the Natural Gas Act pre-empted respondents' state-law claims. That Act gives the Federal Energy Regulatory Commission (FERC) the authority to determine whether rates charged by natural-gas companies or practices affecting such rates are unreasonable. 15 U. S. C. §717d(a). But it also limits FERC's jurisdiction to the transportation of natural gas in interstate commerce, the sale in interstate commerce of natural gas for resale, and natural-gas companies engaged in such transportation or sale. §717(b). The **[****2]** Act leaves regulation of other portions of the industry--such as retail sales--to the States. *Ibid.*

The District Court granted petitioners' motion for summary judgment, reasoning that because petitioners' challenged practices directly affected wholesale as well as retail prices, they were pre-empted by the Act. The Ninth Circuit reversed. While acknowledging that the pipelines' index manipulation increased wholesale prices as well as retail prices, it held that the state-law claims were not pre-empted because they were aimed at obtaining damages only for excessively high retail prices.

Held: Respondents' state-law antitrust claims are not within the field of matters pre-empted by the Natural Gas Act. Pp. 384-391, 191 L. Ed. 2d, at 521-525.

(a) The Act "was drawn with meticulous regard for the continued exercise of state power." Panhandle Eastern Pipe Line Co. v. Public Serv. Comm'n of Ind., 332 U. S. 507, 517-518, 68 S. Ct. 190, 92 L. Ed. 128. Where, as here, a practice affects nonjurisdictional as well as jurisdictional sales, pre-emption **[*374]** can be found only where a detailed examination convincingly demonstrates that a matter falls within the pre-empted field as defined by this Court's precedents. Those precedents emphasize the importance of considering the target at which **[****3]** the state-law claims aim. See, *e.g.,* Northern Natural Gas Co. v. State Corporation Comm'n of Kan., 372 U. S. 84, 83 S. Ct. 646, 9 L. Ed. 2d 601; Northwest Central Pipeline Corp. v. State Corporation Comm'n of Kan., 489 U. S. 493, 109 S. Ct. 1262; 103 L. Ed. 2d 509. Here, respondents' claims are aimed at practices affecting retail prices, a matter "firmly on the States' side of [the] dividing line." Id., at 514, 109 S. Ct. 1262; 103 L. Ed. 2d 509.

Schneidewind v. ANR Pipeline Co., 485 U. S. 293, 108 S. Ct. 1145, 99 L. Ed. 2d 316, is not to the contrary. That opinion explains that the Act does not pre-empt "traditional" state regulation, such as blue sky laws. Id., at 308, n. 11, 108 S. Ct. 1145, 99 L. Ed. 2d 316. Antitrust laws, like blue sky laws, are not aimed at natural-gas companies in particular, **[**1593]** but rather **[***516]** all businesses in the marketplace. The broad applicability of state antitrust laws supports a finding of no pre-emption here.

So, too, does the fact that States have long provided "common-law and statutory remedies against monopolies and unfair business practices," California v. ARC America Corp., 490 U. S. 93, 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86. As noted earlier, the Act circumscribes FERC's powers and preserves traditional areas of state authority. §717(b). Pp. 384-388, 191 L. Ed. 2d, at 521-524.

(b) Neither Mississippi Power & Light Co. v. Mississippi ex rel. Moore, 487 U. S. 354, 108 S. Ct. 2428, 101 L. Ed. 2d 322, nor FPC v. Louisiana Power & Light Co., 406 U. S. 621, 92 S. Ct. 1827, 32 L. Ed. 2d 369, supports petitioners' position. *Mississippi Power* is best read as a conflict pre-emption case, not a field pre-emption case. In any event, the state inquiry in *MississippiPower* was pre-empted because it was directed at jurisdictional sales in a way that **[****4]** respondents' state antitrust suits are not. *Louisiana Power* is also a conflict pre-emption case, and thus does not significantly help petitioners' field pre-emption argument. Pp. 388-390, 191 L. Ed. 2d, at 524-525.

(c) Because the parties have not argued conflict pre-emption, questions involving conflicts between state antitrust proceedings and the federal ratesetting process are left for the lower courts to resolve in the first instance. Pp. 390, 191 L. Ed. 2d, at 525.

(d) While petitioners and the Government argue that this Court should defer to FERC's determination that field pre-emption bars respondents' claims, they fail to point to a specific FERC determination that state antitrust claims fall within the field pre-empted by the Natural Gas Act. Thus, this Court need not consider what legal effect such a determination might have. *P. 390, 191 L. Ed. 2d, at 525*.

715 F. 3d 716, affirmed.

Thomas, J., filed an opinion concurring in part and concurring in the judgment, *post*, p. 391. Scalia, J., filed a dissenting opinion, in which Roberts, C. J., joined, *post*, p.392.

Opinion by: BREYER

Opinion

[1594]**

[*376] Justice **Breyer** delivered the opinion of the Court.

In this **[****5]** case, a group of manufacturers, hospitals, and other institutions that buy natural gas directly from interstate pipelines sued the pipelines, claiming that they engaged in behavior that violated state antitrust laws. The pipelines' behavior affected *both* federally regulated *wholesale* natural-gas prices *and* nonfederally regulated *retail* natural-gas prices. The question is whether the federal Natural Gas Act pre-empts these lawsuits. ***HN1***[] ***LEdHN[1]***[] [1] We have said that, in passing the Act, "Congress occupied the field of matters relating to wholesale sales and transportation of natural gas in interstate commerce." *Schneidewind v. ANR Pipeline Co., 485 U. S. 293, 305, 108 S. Ct. 1145, 99 L. Ed. 2d 316 (1988)*. Nevertheless, for the reasons given below, we conclude that the Act does not pre-empt the state-law antitrust suits at issue here.

[*517]** I

A

HN2[] ***LEdHN[2]***[] [2] The *Supremacy Clause* provides that "the Laws of the United States" (as well as treaties and the Constitution itself) "shall be the supreme Law of the Land . . . any **[**1595]** Thing in the Constitution or Laws of any state to the Contrary notwithstanding." *Art. VI, cl. 2*. Congress may consequently pre-empt, *i.e.*, invalidate, a state law through federal legislation. It may do so through express language in a statute. But even where, as here, a statute does not refer expressly to pre-emption, **[****6]** Congress may implicitly pre-empt **[*377]** a state law, rule, or other state action. See *Sprietsma v. Mercury Marine, 537 U. S. 51, 64, 123 S. Ct. 518, 154 L. Ed. 2d 466 (2002)*.

It may do so either through "field" pre-emption or "conflict" pre-emption. As to the former, Congress may have intended "to foreclose any state regulation in the *area*," irrespective of whether state law is consistent or inconsistent with "federal standards." *Arizona v. United States, 567 U. S. 387, 401, 132 S. Ct. 2492, 2502, 183 L. Ed. 2d 351, 370 (2012)* (emphasis added). In such situations, Congress has forbidden the State to take action in the *field* that the federal statute pre-empts.

By contrast, conflict pre-emption exists where "compliance with both state and federal law is impossible," or where "the state law 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.'" *California v. ARC America Corp., 490 U. S. 93, 100, 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. In either situation, federal law must prevail.

No one here claims that any relevant federal statute expressly pre-empts state antitrust lawsuits. Nor have the parties argued at any length that these state suits conflict with federal law. Rather, the interstate pipeline companies (petitioners here) argue that Congress implicitly "'occupied *the field of matters* relating to wholesale sales and transportation of natural gas in interstate commerce.'" Brief for Petitioners 18 (quoting **[****7]** *Schneidewind, supra, at 305, 108 S. Ct. 1145, 99 L. Ed. 2d 316* (emphasis added)). And they contend that the state antitrust claims advanced by their direct-sales customers (respondents here) fall within that field. The United States, supporting the pipelines, argues similarly. See Brief for United States as *Amicus Curiae* 15. Since the parties have argued this case almost exclusively in terms of field pre-emption, we consider only the field pre-emption question.

B

1

Federal regulation of the natural-gas industry began at a time when the industry was divided into three segments. **[*378]** See 1 Regulation of the Natural Gas Industry §1.01 (W. Mogel ed. 2008) (hereinafter Mogel); *General Motors Corp. v. Tracy, 519 U. S. 278, 283, 117 S. Ct. 811, 136 L. Ed. 2d 761 (1997)*. First, natural-gas producers sunk wells in large oil and gas fields (such as the Permian Basin in Texas and New Mexico). They gathered the gas, brought it to transportation points, and left it to interstate gas pipelines to transport the gas to distant markets.

Second, interstate pipelines shipped the gas from the field to cities and towns across the Nation. Third, local gas distributors bought the gas from the interstate pipelines and resold it to business and residential customers within their localities.

[*518]** Originally, the States regulated all three segments of the industry. **[****8]** See 1 Mogel §1.03. But ***HN3***[] ***LEdHN[3]***[] [3] in the early 20th century, this Court held that the *Commerce Clause* forbids the States to regulate the second part of the business—*i.e.*, the interstate shipment and sale of gas to local distributors for resale. See, *e.g.*, *R. I. v. Public Util. Comm'n of Attleboro Steam & Elec. Co., 273 U. S. 83, 89-90, 47 S. Ct. 294, 71 L. Ed. 549 (1927)*; **[**1596]** *Missouri ex rel. Barrett v. Kansas Natural Gas Co., 265 U. S. 298, 307-308, 44 S. Ct. 544, 68 L. Ed. 1027 (1924)*. These holdings left a regulatory gap. Congress enacted the Natural Gas Act, *52 Stat. 821*, to fill it. See *Phillips Petroleum Co. v. Wisconsin, 347 U. S. 672, 682-684, and n. 13, 74 S. Ct. 794, 98 L. Ed. 1035 (1954)* (citing H. R. Rep. No. 709, 75th Cong., 1st Sess., 1-2 (1937); S. Rep. No. 1162, 75th Cong., 1st Sess., 1-2 (1937)).

The Act, in *§5(a)*, gives ratesetting authority to the Federal Energy Regulatory Commission (FERC, formerly the Federal Power Commission (FPC)). That authority allows FERC to determine whether "any rate, charge, or classification . . . collected by any natural-gas company in connection with any transportation or sale of natural gas, *subject to the jurisdiction of* [*FERC*]," or "any rule, regulation, practice, or contract affecting *such* rate, charge, or classification is unjust, unreasonable, unduly discriminatory, or preferential." *15 U. S. C. §717d(a)* (emphasis added). As the italicized words make clear, *§5(a)* limits the scope of FERC's authority **[*379]** to activities "in connection with any transportation or sale of natural gas, *subject to the jurisdiction of the Commission* ***[****9]*** ." *Ibid.* (emphasis added). And the Act, in *§1(b)*, limits FERC's "jurisdiction" to (1) "the transportation of natural gas in interstate commerce," (2) "the sale in interstate commerce of natural gas for resale," and (3) "natural-gas companies engaged in such transportation or sale." *§717(b)*. The Act leaves regulation of other portions of the industry—such as production, local distribution facilities, and direct sales—to the States. See *Northwest Central Pipeline Corp. v. State Corporation Comm'n of Kan., 489 U. S. 493, 507, 109 S. Ct. 1262, 103 L. Ed. 2d 509 (1989)* (*Section 1(b)* of the Act "expressly" provides that "States retain jurisdiction over *intrastate* transportation, local distribution, and distribution facilities, and over 'the production or gathering of natural gas'").

To simplify our discussion, we shall describe the firms that engage in interstate transportation as "jurisdictional sellers" or "interstate pipelines" (though various brokers and others may also fall within the Act's jurisdictional scope). Similarly, we shall refer to the sales over which FERC has jurisdiction as "jurisdictional sales" or "wholesale sales."

2

Until the 1970's, natural-gas regulation roughly tracked the industry model we described above. Interstate pipelines would typically buy gas from **[****10]** field producers and resell it to local distribution companies for resale. See *Tracy, supra, at 283, 117 S. Ct. 811, 136 L. Ed. 2d 761*. FERC (or FPC), acting under the authority of the Natural Gas Act, would set interstate pipeline wholesale rates using classical "cost-of-service" ratemaking methods. See *Public Serv. Comm'n of N. Y. v. Mid-Louisiana Gas Co., 463 U. S. 319, 328, 103 S. Ct. 3024, 77 L. Ed. 2d 668 (1983)*. That is, FERC would determine a pipeline's revenue **[***519]** requirement by calculating the costs of providing its services, including operating and maintenance expenses, depreciation expenses, taxes, and a reasonable profit. See FERC, Cost-of-Service Rates Manual **[*380]** 6 (June 1999). FERC would then set wholesale rates at a level designed to meet the pipeline's revenue requirement.

Deregulation of the natural-gas industry, however, brought about changes in FERC's approach. In the 1950's, this Court had held that the Natural Gas Act required regulation of prices at the interstate pipelines' *buying* end—*i.e.*, the prices at which field producers sold natural gas to interstate pipelines. *Phillips Petroleum Co., supra, at 682, 685, 74 S. Ct. 794, 98 L. Ed. 1035*. By the 1970's, many in Congress thought that such efforts to regulate field prices **[**1597]** had jeopardized natural-gas supplies in an industry already dependent "on the caprice of nature." *FPC v. Hope Natural Gas Co., 320 U. S. 591, 630, 64 S. Ct. 281, 88 L. Ed. 333 (1944)* (opinion of Jackson, J.); see *id., at 629, 64 S. Ct. 281, 88 L. Ed. 333* (recognizing that "the **[****11]** wealth of Midas and the wit of man cannot produce . . . a natural gas field"). Hoping to avoid future shortages, Congress enacted forms of field price deregulation designed to rely upon competition, rather than regulation, to keep field prices low. See, *e.g.*, Natural

Gas Policy Act of 1978, 92 Stat. 3409, codified in part at *15 U. S. C. §3301 et seq.* (phasing out regulation of wellhead prices charged by producers of natural gas); Natural Gas Wellhead Decontrol Act of 1989, *103 Stat. 157* (removing price controls on wellhead sales as of January 1993).

FERC promulgated new regulations designed to further this process of deregulation. See, *e.g.*, Regulation of Natural Gas Pipelines After *Partial Wellhead Decontrol, 50 Fed. Reg. 42408 (1985)* (allowing "open access" to pipelines so that consumers could pay to ship their own gas). Most important here, FERC adopted an approach that relied on the competitive marketplace, rather than classical regulatory ratesetting, as the main mechanism for keeping *wholesale* natural-gas rates at a reasonable level. Order No. 636, issued in 1992, allowed FERC to issue blanket certificates that permitted jurisdictional sellers (typically interstate pipelines) to charge market-based rates for gas, provided that FERC had first determined that the sellers lacked **[****12]** market **[*381]** power. See *57 Fed. Reg. 57957-57958* (1992); *id.*, at 13270.

After the issuance of this order, FERC's oversight of the natural-gas market largely consisted of (1) ex ante examinations of jurisdictional sellers' market power, and (2) the availability of a complaint process under *§717d(a)*. See Brief for United States as *Amicus Curiae* 4. The new system also led many large gas consumers—such as industrial and commercial users—to buy their own gas directly from gas producers, and to arrange (and often pay separately) for transportation from the field to the place of consumption. See *Tracy, 519 U. S., at 284, 117 S. Ct. 811, 136 L. Ed. 2d 761*. Insofar as interstate pipelines sold gas to such consumers, they sold it for direct consumption rather than resale.

3

The free-market system for setting interstate pipeline rates turned out to be less than perfect. Interstate pipelines, distributing companies, and many of the customers who bought directly from the pipelines found that **[***520]** they had to rely on privately published price indices to determine appropriate prices for their natural-gas contracts. These indices listed the prices at which natural gas was being sold in different (presumably competitive) markets across the country. The information on which these indices were based was voluntarily **[****13]** reported by natural-gas traders.

In 2003, FERC found that the indices were inaccurate, in part because much of the information that natural-gas traders reported had been false. See FERC, Final Report on Price Manipulation in Western Markets (Mar. 2003), App. 88-89. FERC found that false reporting had involved "inflating the volume of trades, omitting trades, and adjusting the price of trades." *Id.*, at 88. That is, sometimes those who reported information simply fabricated it. Other times, the information reported reflected "wash trades," *i.e.*, "*prearranged* pair[s] of trades of the same good between the same parties, involving no economic risk and no net change in beneficial **[*382]** ownership." *Id.*, at 215. FERC concluded that these "efforts to manipulate **[**1598]** price indices compiled by trade publications" had helped raise "to extraordinary levels" the prices of both jurisdictional sales (that is, interstate pipeline sales for resale) and nonjurisdictional direct sales to ultimate consumers. *Id.*, at 86, 85.

After issuing its final report on price manipulation in western markets, FERC issued a Code of Conduct. That code amended all blanket certificates to prohibit jurisdictional sellers "from engaging in actions without a legitimate business **[****14]** purpose that manipulate or attempt to manipulate market conditions, including wash trades and collusion." *68 Fed. Reg. 66324 (2003)*. The code also required jurisdictional companies, when they provided information to natural-gas index publishers, to "provide accurate and factual information, and not knowingly submit false or misleading information or omit material information to any such publisher." *Id., at 66337*. At the same time, FERC issued a policy statement setting forth "minimum standards for creation and publication of any energy price index" and "for reporting transaction data to index developers." *Price Discovery in Natural Gas and Elec. Markets, 104 FERC ¶61,121*, pp. 61,407, 61,408 (2003). Finally, FERC, after finding that certain jurisdictional sellers had "engaged in wash trading . . . that resulted in the manipulation of [natural-gas] prices," terminated those sellers' blanket marketing certificates. *Enron Power Marketing, Inc., 103 FERC ¶61,343*, p. 62,303 (2003).

Congress also took steps to address these problems. In particular, it passed the Energy Policy Act of 2005, *119 Stat. 594*, which gives FERC the authority to issue rules and regulations to prevent "any manipulative or deceptive device or contrivance" by "any entity . . . in connection with the purchase or sale of natural gas or the purchase or sale of transportation **[****15]** services subject to the jurisdiction of" FERC, *15 U. S. C. §717c-1*.

[*383] C

We now turn to the cases before us. Respondents, as we have said, bought large quantities of natural gas directly from interstate pipelines for their own consumption. They believe that they overpaid in these transactions due to the interstate pipelines' manipulation of the natural-gas indices. Based on this belief, they filed state-law antitrust suits against petitioners **[***521]** in state and federal courts. See App. 244-246 (alleging violations of *Wis. Stat. §§133.03*, *133.14*, *133.18*); see also App. 430-433 (same); *id.*, at 519-521 (same); *id.*, at 362-364 (alleging violations of Kansas Restraint of Trade Act, *Kan. Stat. Ann. §50-101 et seq.*); App. 417-419 (alleging violations of Missouri ***Antitrust Law***, *Mo. Rev. Stat. §§416.011-416.161*). The pipelines removed all the state cases to federal court, where they were consolidated and sent for pretrial proceedings to the Federal District Court for the District of Nevada. See *28 U. S. C. §1407*.

The pipelines then moved for summary judgment on the ground that the Natural Gas Act pre-empted respondents' state-law antitrust claims. The District Court granted their motion. It concluded that the pipelines were "jurisdictional sellers," *i.e.*, "natural gas companies engaged in" the "transportation of natural gas in interstate commerce." **[****16]** Order in No. 03-cv-1431, (D Nev., July 18, 2011), pp. 4, 11. And it held that respondents' claims, which were "aimed at" these sellers' "alleged practices of false price reporting, wash trades, and anticompetitive collusive behavior" were pre-empted because "such practices" not only affected nonjurisdictional direct-sale prices but also "directly affect[ed]" jurisdictional (*i.e.*, wholesale) rates. *Id.*, at 36-37.

[1599]** The Ninth Circuit reversed. It emphasized that the price-manipulation of which respondents complained affected not only jurisdictional (*i.e.*, wholesale) sales but also nonjurisdictional (*i.e.*, retail) sales. The court construed the Natural Gas Act's pre-emptive scope narrowly in light of Congress' intent—manifested in *§1(b)* of the Act—to preserve **[*384]** for the States the authority to regulate nonjurisdictional sales. And it held that the Act did not pre-empt state-law claims aimed at obtaining damages for excessively high *retail* natural-gas prices stemming from interstate pipelines' price manipulation, even if the manipulation raised *wholesale* rates as well. See *In re Western States Wholesale Natural Gas Antitrust Litigation, 715 F. 3d 716, 729-736 (2013)*.

The pipelines sought certiorari. They asked us to resolve confusion in the lower courts as to whether the Natural Gas Act pre-empts retail customers' **[****17]** state ***antitrust law*** challenges to practices that also affect wholesale rates. Compare *id., at 729-736*, with *Leggett v. Duke Energy Corp., 308 S. W. 3d 843 (Tenn. 2010)*. We granted the petition.

II

Petitioners, supported by the United States, argue that their customers' state antitrust lawsuits are within the field that the Natural Gas Act pre-empts. See Brief for Petitioners 18 (citing *Schneidewind, 485 U. S., at 305, 108 S. Ct. 1145, 99 L. Ed. 2d 316*); Brief for United States as *Amicus Curiae* 13 (same). They point out that respondents' antitrust claims target anticompetitive activities that affected wholesale (as well as retail) rates. See Brief for Petitioners 2. They add that the Natural Gas Act expressly grants FERC authority to keep wholesale rates at reasonable levels. See *ibid.* (citing *15 U. S. C. §§717(b)*, *717d(a)*). In exercising this authority, FERC has prohibited the very kind of anticompetitive conduct that the state actions attack. See Part I-B-3, *supra*. And, petitioners contend, letting these actions proceed will permit state antitrust courts to reach conclusions about that conduct that differ from those that FERC **[***522]** might reach or has already reached. Accordingly, petitioners argue, respondents' state-law antitrust suits fall within the pre-empted field.

A

Petitioners' arguments are forceful, but we cannot accept their conclusion. ***HN4***[] ***LEdHN[4]***[] [4] As we **[****18]** have repeatedly stressed, the Natural **[*385]** Gas Act "was drawn with meticulous regard for the continued exercise of state power, not to handicap or dilute it in any way." *Panhandle Eastern Pipe Line Co. v. Public Serv. Comm'n of Ind., 332 U. S. 507, 517-518, 68 S. Ct. 190, 92 L. Ed. 128 (1947)*; see also *Northwest Central, 489 U. S., at 511, 109 S. Ct. 1262, 103 L. Ed. 2d 509* (the "legislative history of the [Act] is replete with assurances that the Act 'takes nothing from the State [regulatory] commissions'" (quoting 81 Cong. Rec. 6721 (1937))). Accordingly, where (as here) a state law can be applied to nonjurisdictional as well as jurisdictional sales, we must proceed cautiously, finding pre-emption only where detailed examination convinces us that a matter falls within the pre-empted field as defined by our precedents. See *Panhandle Eastern, supra, at 516-518, 68 S. Ct. 190, 92 L. Ed. 128*; *Interstate Natural Gas Co. v. FPC, 331 U. S. 682, 689-693, 67 S. Ct. 1482, 91 L. Ed. 1742 (1947)*.

HN5[] ***LEdHN[5]***[] [5] Those precedents emphasize the importance of considering the *target* at which the state law *aims* in determining whether that law is pre-empted. For example, in *Northern Natural Gas Co. v. State Corporation Comm'n of Kan., 372 U. S. 84, 83 S. Ct. 646, 9 L. Ed. 2d 601 (1963)*, the Court said that it had "consistently recognized" **[**1600]** that the "significant distinction" for purposes of pre-emption in the natural-gas context is the distinction between "measures *aimed directly at* interstate purchasers and wholesales for resale, and those aimed at" subjects left to the **[****19]** States to regulate. *Id., at 94, 83 S. Ct. 646, 9 L. Ed. 2d 601* (emphasis added). And, in *Northwest Central*, the Court found that the Natural Gas Act did not pre-empt a state regulation concerning the timing of gas production from a gas field within the State, even though the regulation might have affected the costs of and the prices of interstate wholesale sales, *i.e.*, jurisdictional sales. *489 U. S., at 514, 109 S. Ct. 1262, 103 L. Ed. 2d 509*. In reaching this conclusion, the Court explained that the state regulation aimed primarily at "protect[ing] producers' . . . rights—a matter firmly on the States' side of that dividing line." *Ibid.* The Court contrasted this state regulation with the state orders at issue in *Northern Natural*, which "'invalidly invade[d] the federal **[*386]** agency's exclusive domain' precisely because" they were "'unmistakably and unambiguously *directed at purchasers*.'" *Id., at 513, 109 S. Ct. 1262, 103 L. Ed. 2d 509* (quoting *Northern Natural, supra, at 92, 83 S. Ct. 646, 9 L. Ed. 2d 601*; emphasis added). Here, too, the lawsuits are directed at practices affecting *retail* rates—which are "firmly on the States' side of that dividing line."

Petitioners argue that *Schneidewind* constitutes contrary authority. In that case, the Court found pre-empted a state law that required public utilities, such as interstate pipelines crossing the State, to obtain state approval before issuing long-term **[****20]** securities. *485 U. S., at 306-309, 108 S. Ct. 1145, 99 L. Ed. 2d 316*. But the Court there thought that the State's securities regulation was aimed directly at interstate pipelines. **[***523]** It wrote that the state law was designed to keep "a natural gas company from raising its equity levels above a certain point" in order to keep the company's revenue requirement low, thereby ensuring lower *wholesale* rates. *Id., at 307-308, 108 S. Ct. 1145, 99 L. Ed. 2d 316*. Indeed, the Court expressly said that the state law was pre-empted because it was "*directed at* . . . the control of rates and facilities of natural gas companies," "precisely the things over which FERC has comprehensive authority." *Id., at 308, 108 S. Ct. 1145, 99 L. Ed. 2d 316* (emphasis added).

The dissent rejects the notion that the proper test for purposes of pre-emption in the natural-gas context is whether the challenged measures are "aimed directly at interstate purchasers and wholesales for resale" or not. *Northern Natural, supra, at 94, 83 S. Ct. 646; 9 L. Ed. 2d 601*. It argues that this approach is "unprecedented," and that the Court's focus should be on "*what* the State seeks to regulate . . ., not *why* the State seeks to regulate it." *Post, at 397, 191 L. Ed. 2d, at 529* (opinion of Scalia, J.). But ***HN6***[] ***LEdHN[6]***[] [6] the "target" to which our cases refer must mean more than just the physical activity that a State regulates. After all, a single physical action, such as reporting a price **[****21]** to a specialized journal, could be the subject of many different laws—including tax laws, disclosure laws, and others. To repeat the point we made above, no one could claim that FERC's regulation **[*387]** of this physical activity for purposes of wholesale rates forecloses every other form of state regulation that affects those rates.

Indeed, although the dissent argues that *Schneidewind* created a definitive test for pre-emption in the natural-gas context that turns on whether "the matter on which the State asserts the right to act is in any way regulated by the Federal Act," *post, at 394, 191 L. Ed. 2d, 527* (quoting *485 U. S., at 310, n. 13, 108 S. Ct. 1145, 99 L. Ed. 2d 316*), *Schneidewind* could not mean this statement as an absolute test. It goes on to explain that the Natural Gas Act does not pre-empt "traditional" state regulation, such as state blue sky laws (which, of course, raise wholesale—as well as retail—investment **[**1601]** costs). *Id., at 308, n. 11, 108 S. Ct. 1145, 99 L. Ed. 2d 316*.

HN7[] LEdHN[7][] [7] Antitrust laws, like blue sky laws, are not aimed at natural-gas companies in particular, but rather all businesses in the marketplace. See *ibid.* They are far broader in their application than, for example, the regulations at issue in *Northern Natural*, which applied only to entities buying gas from fields within the State. See 372 U. S., at 85-86, n. 1, 83 S. Ct. 646, 9 L. Ed. 2d 601; contra, **[****22]** post, at 396, 191 L. Ed. 2d, at 529 (stating that *Northern Natural* concerned "background market conditions"). This broad applicability of state ***antitrust law*** supports a finding of no pre-emption here.

Petitioners and the dissent argue that there is, or should be, a clear division between areas of state and federal authority in natural-gas regulation. See Brief for Petitioners 18; post, at 397-398, 191 L. Ed. 2d, 530. But that Platonic ideal does not describe the natural-gas regulatory world. Suppose FERC, when setting wholesale rates in the former cost-of-service ratemaking days, had denied cost recovery for pipelines' failure to recycle. Would that fact deny States the power to enact and apply recycling laws? These state laws might well raise pipelines' operating costs, **[***524]** and thus the costs of wholesale natural gas transportation. But in *Northwest Central* we said that HN8[] LEdHN[8][] [8] "[t]o find field pre-emption of [state] regulation merely because purchasers' costs and hence rates might be **[*388]** affected would be largely to nullify . . . §1(b)." 489 U. S., at 514, 109 S. Ct. 1262, 103 L. Ed. 2d 509.

The dissent barely mentions the limitations on FERC's powers in §1(b), but HN9[] LEdHN[9][] [9] the enumeration of FERC's powers in §5(a) is circumscribed by a reference back to the limitations in §1(b). See post, at 392-394, 191 L. Ed. 2d, at 526-528. As we explained above, see Part **[****23]** I-B-1, *supra*, those limits are key to understanding the careful balance between federal and state regulation that Congress struck when it passed the Natural Gas Act. That Act "was drawn with meticulous regard for the continued exercise of state power, not to handicap or dilute it in any way." Panhandle Eastern, 332 U. S., at 517-518, 68 S. Ct. 190, 92 L. Ed. 128. Contra, post, at 399, 191 L. Ed. 2d, at 531. States have a "long history of" providing "common-law and statutory remedies against monopolies and unfair business practices." ARC America, 490 U. S., at 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86; see also Watson v. Buck, 313 U. S. 387, 404, 61 S. Ct. 962, 85 L. Ed. 1416 (1941) (noting the States' "long-recognized power to regulate combinations in restraint of trade"). Respondents' state-law antitrust suits relied on this well-established state power.

B

Petitioners point to two other cases that they believe support their position. The first is Mississippi Power & Light Co. v. Mississippi ex rel. Moore, 487 U. S. 354, 108 S. Ct. 2428, 101 L. Ed. 2d 322 (1988). There, the Court held that the Federal Power Act—which gives FERC the authority to determine whether rates charged by public utilities in electric energy sales are "just and reasonable," 16 U. S. C. §824d(a)—pre-empted a state inquiry into the reasonableness of FERC-approved prices for the sale of nuclear power to wholesalers of electricity (which led to higher retail electricity rates). 487 U. S., at 373-377, 108 S. Ct. 2428, 101 L. Ed. 2d 322. Petitioners argue that this case shows that state regulation of similar sales here—*i.e.*, by a pipeline **[****24]** to a direct consumer—must also be pre-empted. See Reply Brief 11-12. HN10[] LEdHN[10][] [10] *Mississippi Power*, however, is best read as a conflict pre-emption case, not a field pre-emption case. See 487 U. S., at 377, 108 S. Ct. 2428, 101 L. Ed. 2d 322 ("[A] **[*389]** state agency's 'efforts to regulate commerce must fall when they conflict with or interfere with federal authority over the same activity'" (quoting **[**1602]** Chicago & North Western Transp. Co. v. Kalo Brick & Tile Co., 450 U. S. 311, 318-319, 101 S. Ct. 1124, 67 L. Ed. 2d 258 (1981))).

Regardless, the state inquiry in *Mississippi Power* was pre-empted because it was directed at jurisdictional sales in a way that respondents' state antitrust lawsuits are not. Mississippi's inquiry into the reasonableness of FERC-approved purchases was effectively an attempt to "regulate in areas where FERC has properly exercised its jurisdiction to determine just and reasonable wholesale rates." 487 U. S., at 374, 108 S. Ct. 2428, 101 L. Ed. 2d 322. By contrast, respondents' state antitrust lawsuits do not seek to challenge the reasonableness of any rates expressly approved by FERC. Rather, they seek to challenge the background **[***525]** marketplace conditions that affected both jurisdictional and nonjurisdictional rates.

Petitioners additionally point to FPC v. Louisiana Power & Light Co., 406 U. S. 621, 92 S. Ct. 1827, 32 L. Ed. 2d 369 (1972). In that case, the Court held that federal law gave FPC the authority to allocate natural gas during shortages by ordering interstate pipelines to curtail gas deliveries **[****25]** to all customers, *including retail customers.* This latter fact, the pipelines argue, shows that FERC has authority to regulate index manipulation insofar as that manipulation affects *retail* (as well as wholesale) sales. Brief for Petitioners 26. Accordingly, they contend that state laws that aim at this same subject are pre-empted.

This argument, however, makes too much of too little. The Court's finding of pre-emption in *Louisiana Power* rested on its belief that the state laws in question *conflicted* with federal law. The Court concluded that "FPC has authority to effect orderly curtailment plans involving both direct sales and sales for resale," *406 U. S., at 631, 92 S. Ct. 1827, 32 L. Ed. 2d 369*, because otherwise there would be "unavoidable conflict between" state regulation of direct sales and the "uniform federal **[*390]** regulation" that the Natural Gas Act foresees, *id., at 633-635, 92 S. Ct. 1827, 32 L. Ed. 2d 369*. Conflict pre-emption may, of course, invalidate a state law even though field pre-emption does not. Because petitioners have not argued this case as a conflict pre-emption case, *Louisiana Power* does not offer them significant help.

C

To the extent any conflicts arise between state ***antitrust law*** proceedings and the federal rate-setting process, the doctrine of conflict pre-emption **[****26]** should prove sufficient to address them. But as we have noted, see Part I-A, *supra*, the parties have not argued conflict pre-emption. See also, *e.g.*, Tr. of Oral Arg. 24 (Solicitor General agrees that he has not "analyzed this [case] under a conflict preemption regime"). We consequently leave conflict pre-emption questions for the lower courts to resolve in the first instance.

D

We note that petitioners and the Solicitor General have argued that we should defer to FERC's determination that field pre-emption bars the respondents' claims. See Brief for Petitioners 22 (citing *Arlington v. FCC, 569 U. S. 290, 301-305, 133 S. Ct. 1863, 185 L. Ed. 2d 941, 963-968 (2013)*); Brief for United States as *Amicus Curiae* 32 (same). But they have not pointed to a specific FERC determination that state antitrust claims fall within the field pre-empted by the Natural Gas Act. Rather, they point only to the fact that FERC has promulgated detailed rules governing manipulation of price indices. Because there is no determination by FERC that its regulation pre-empts the field into which respondents' state-law antitrust **[**1603]** suits fall, we need not consider what legal effect such a determination might have. And we conclude that the detailed federal regulations here do not offset the other considerations that weigh against **[****27]** a finding of pre-emption in this context.

[*391] ***

For these reasons, the judgment of the Court of Appeals for the Ninth Circuit is affirmed.

It is so ordered.

Concur by: THOMAS

Concur

[*526]** Justice **Thomas**, concurring in part and concurring in the judgment.

I agree with much of the majority's application of our precedents governing pre-emption under the Natural Gas Act. I write separately to reiterate my view that "implied pre-emption doctrines that wander far from the statutory text are inconsistent with the Constitution." *Wyeth v. Levine, 555 U. S. 555, 583, 129 S. Ct. 1187, 173 L. Ed. 2d 51 (2009)* (Thomas, J., concurring in judgment). The *Supremacy Clause* of our Constitution "gives 'supreme' status only to those [federal laws] that are 'made in Pursuance'" of it. *555 U.S., at 585, 129 S. Ct. 1187, 173 L. Ed. 2d 51* (quoting *Art. VI, cl. 2*). And to be "made in Pursuance" of the Constitution, a law must fall within one of Congress' enumerated powers and be promulgated in accordance with the lawmaking procedures set forth in that document. *Id., at 585-586, 129 S. Ct. 1187, 173 L. Ed. 2d 51*. "The Supremacy Clause thus requires that pre-emptive effect be given only to those federal standards and policies that are set forth in, or necessarily follow from, the statutory text that was produced through the constitutionally required bicameral and presentment procedures." *Id., at 586, 129 S. Ct. 1187, 173 L. Ed. 2d 51*.

In light of this constitutional requirement, I have **[****28]** doubts about the legitimacy of this Court's precedents concerning the pre-emptive scope of the Natural Gas Act, see, *e.g.*, *Northern Natural Gas Co. v. State Corporation Comm'n of Kan., 372 U. S. 84, 91-92, 83 S. Ct. 646, 9 L. Ed. 2d 601 (1963)* (defining the pre-empted field in light of the "objective[s]" of the Act). Neither party, however, has asked us to overrule these longstanding precedents or "to overcome the presumption of *stare decisis* that attaches to" them. *Kurns v. Railroad Friction Products Corp., 565 U. S. 625, 633, 132 S. Ct. 1261, 1267, 182 L. Ed. 2d 116, 125 (2012)*. And even under these precedents, the challenged state antitrust laws fall outside the **[*392]** pre-empted field. Because the Court today avoids extending its earlier questionable precedents, I concur in its judgment and join all but Part I-A of its opinion.

Dissent by: SCALIA

Dissent

Justice **Scalia**, With Whom The Chief Justice joins, dissenting.

The Natural Gas Act divides responsibility over trade in natural gas between federal and state regulators. The Act and our cases interpreting it draw a firm line between national and local authority over this trade: If the Federal Government may regulate a subject, the States may not. Today the Court smudges this line. It holds that States may use their antitrust laws to regulate practices already regulated by the Federal Energy Regulatory Commission whenever "other considerations **[****29]** . . . weigh against a finding of pre-emption." *Ante, at 390, 191 L. Ed. 2d, at 525*. The Court's make-it-up-as-you-go-along approach to preemption has no basis in the Act, contradicts our cases, and will prove unworkable in practice.

I

Trade in natural gas consists of three parts. A drilling company collects gas from the earth; a pipeline company then carries the gas to its destination and sells **[**1604]** it at wholesale to a local distributor; and the local distributor sells the gas at retail to industries and households. See *ante, at 377-378, 191 L. Ed. 2d, at 517*. **[***527]** The Natural Gas Act empowers the Commission to regulate the middle of this three-leg journey—interstate transportation and wholesale sales. *15 U. S. C. §717 et seq.* But it does not empower the Commission to regulate the opening and closing phases—production at one end, retail sales at the other—thus leaving those matters to the States. *§717(b)*. (Like the Court, I will for simplicity's sake call the sales controlled by the Commission wholesale sales, and the companies controlled by the Commission pipelines. See *ante, at 379, 191 L. Ed. 2d, at 518*.)

Over 70 years ago, the Court concluded that the Act confers "exclusive jurisdiction upon the federal regulatory **[*393]** agency." *Public Util. Comm'n of Ohio v. United Fuel Gas Co., 317 U. S. 456, 469, 63 S. Ct. 369, 87 L. Ed. 396 (1943)*. The Court thought it "clear" that the Act contemplates **[****30]** "a harmonious, dual system of regulation of the natural gas industry—federal and state regulatory bodies operating side by side, each active in its own sphere," "without any confusion of functions." *Id., at 467, 63 S. Ct. 369, 87 L. Ed. 396*. The Court drew this inference from the law's purpose and legislative history, though it could just as easily have relied on the law's terms and structure. The Act grants the Commission a wide range of powers over wholesale sales and transportation, but qualifies only some of these powers with reservations of state authority over the same subject. See *§717g(a)* (concurrent authority over recordkeeping); *§717h(a)* (concurrent authority over depreciation and amortization rates). Congress's decision to include express reservations of state power alongside these grants of authority, but to omit them alongside other grants of authority, suggests that the other grants are exclusive. Right or wrong, in any event, our inference of exclusivity is now settled beyond debate.

United Fuel rejected a State's regulation of wholesale rates. *Id., at 468, 63 S. Ct. 369, 87 L. Ed. 396*. But our later holdings establish that the Act makes exclusive the Commission's powers in general, not just its rate-setting power in particular. We have again and again set aside **[****31]** state laws—even those that do not purport to fix wholesale rates—for regulating a matter already subject to regulation by the Commission. See, *e.g.*, *Northern Natural Gas Co. v. State Corporation Comm'n of Kan., 372 U. S. 84, 89, 83 S. Ct. 646, 9 L. Ed. 2d 601 (1963)* (state regulation of pipelines' gas purchases preempted because it "invade[s] the exclusive jurisdiction which the Natural Gas Act has conferred upon the [Commission]"); *Exxon Corp. v. Eagerton, 462 U. S. 176, 185, 103 S. Ct. 2296, 76 L. Ed. 2d 497 (1983)* (state law prohibiting producers from passing on production taxes preempted because it "trespasse[s] upon FERC's authority"); *Schneidewind v. ANR Pipeline Co., 485 U. S. 293, 309, 108 S. Ct. 1145, 99 L. Ed. 2d 316 (1988)* (state securities regulation directly affecting **[*394]** wholesale rates and gas transportation facilities preempted because it regulates "matters that Congress intended FERC to regulate"). The test for preemption in this setting, the Court has confirmed, "'is whether the matter on which the State asserts the right to act is in any way regulated by the Federal Act.'" *Id., at 310, n. 13, 108 S. Ct. 1145, 99 L. Ed. 2d 316*.

Straightforward application of these precedents would make short work of the case at hand. The Natural **[***528]** Gas Act empowers the Commission to regulate "practice[s] . . . affecting [wholesale] rate[s]." *§717d*. Nothing in the Act suggests that the States share power to regulate these practices. The Commission has reasonably determined that this power allows it **[**1605]** to regulate the behavior **[****32]** involved in this case, pipelines' use of sham trades and false reports to manipulate gas price indices. Because the Commission's exclusive authority extends to the conduct challenged here, state antitrust regulation of that conduct is preempted.

II

The Court agrees that the Commission may regulate index manipulation, but upholds state antitrust regulation of this practice anyway on account of "other considerations that weigh against a finding of pre-emption in this context." *Ante, at 390, 191 L. Ed. 2d, at 525*. That is an unprecedented decision. The Court does not identify a single case—not one—in which we have sustained state regulation of behavior already regulated by the Commission. The Court's justifications for its novel approach do not persuade.

A

The Court begins by considering "the *target* at which the state law *aims*." *Ante, at 385, 191 L. Ed. 2d, at 522*. It reasons that because this case involves a practice that affects both wholesale and retail rates, the Act tolerates state regulation that takes aim at the practice's retail-stage effects. *Ante, at 386*.

This analysis misunderstands how the Natural Gas Act divides responsibilities between national and local regulators. The Act does not give the Commission the power to aim at **[*395]** particular **[****33]** effects; it gives it the power to regulate particular activities. When the Commission regulates those activities, it may consider their effects on *all* parts of the gas trade, not just on wholesale sales. It may, for example, set wholesale rates with the aim of encouraging producers to conserve gas supplies—even though production is a state-regulated activity. See *Colorado Interstate Gas Co. v. FPC, 324 U. S. 581, 602-603, 65 S. Ct. 829, 89 L. Ed. 1206 (1945)*; *id., at 609-610, 65 S. Ct. 829, 89 L. Ed. 1206* (Jackson, J., concurring). Or it may regulate wholesale sales with an eye toward blunting the sales' anticompetitive effects in the retail market—even though retail prices are controlled by the States. See *FPC v. Conway Corp., 426 U. S. 271, 276-280, 96 S. Ct. 1999, 48 L. Ed. 2d 626 (1976)*. The Court's ad hoc partition of authority over index manipulation—leaving it to the Commission to control the practice's consequences for wholesale sales, but allowing the States to target its consequences for retail sales—thus clashes with the design of the Act.

To justify its fixation on aims, the Court stresses that this case involves regulation of "background marketplace conditions" rather than regulation of wholesale rates or sales themselves. *Ante, at 389, 191 L. Ed. 2d, at 524*. But the Natural Gas Act empowers the Commission to regulate wholesale rates *and* "background" practices affecting such rates. It grants both powers in the same **[****34]** clause: "Whenever the Commission . . . find[s] that a [wholesale] rate, charge, or classification . . . [or] any rule, regulation, *practice*, or contract affecting such rate, charge, or classification is unjust [or] unreasonable, . . . the Commission shall determine **[***529]** the just and reasonable rate, charge, classification, rule, regulation, *practice*, or contract to be thereafter observed." §717d(a) (emphasis added). Nothing in this provision, and for that matter nothing in the Act, suggests that federal authority over practices is a second-class power, somehow less exclusive than the authority over rates.

The Court persists that the background conditions in this case affect *both* wholesale and retail sales. Ante, at 389, 191 L. Ed. 2d, at 525. This observation adds atmosphere, but nothing more. The **[*396]** Court concedes that index manipulation's dual effect does not weaken the Commission's power to regulate it. **[**1606]** Ante, at 384-385, 191 L. Ed. 2d, at 521. So too should the Court have seen that this simultaneous effect does not strengthen the claims of the States. It is not at all unusual for an activity controlled by the Commission to have effects in the States' field; production, wholesale, and retail are after all interdependent stages of a single trade. We have **[****35]** never suggested that the rules of field preemption change in such situations. For example, producers' ability to pass production taxes on to pipelines no doubt affects both producers and pipelines. Yet we had no trouble concluding that a state law restricting producers' ability to pass these taxes impermissibly attempted to manage "a matter within the sphere of FERC's regulatory authority." Exxon, supra, at 185-186, 103 S. Ct. 2296, 76 L. Ed. 2d 497.

The Court's approach makes a snarl of our precedents. In *Northern Natural*, the Court held that the Act preempts state regulations requiring pipelines to buy gas ratably from gas wells. 372 U. S., at 90, 83 S. Ct. 646, 9 L. Ed. 2d 601. The regulations in that case shared each of the principal features emphasized by the Court today. They governed background market conditions, not wholesale prices. Id., at 90-91, 83 S. Ct. 646, 9 L. Ed. 2d 601. The background conditions in question, pipelines' purchases from gas wells, affected both the federal field of wholesale sales and the state field of gas production. Id., at 92-93, 83 S. Ct. 646, 9 L. Ed. 2d 601. And the regulations took aim at the purchases' effects on production; they sought to promote conservation of natural resources by limiting how much gas pipelines could take from each well. Id., at 93, 83 S. Ct. 646, 9 L. Ed. 2d 601. No matter; the Court still concluded that the regulations "invade[d] the federal agency's **[****36]** exclusive domain." Id., at 92, 83 S. Ct. 646, 9 L. Ed. 2d 601. The factors that made no difference in *Northern Natural* should make no difference today.

Contrast *Northern Natural* with Northwest Central Pipeline Corp. v. State Corporation Comm'n of Kan., 489 U. S. 493, 109 S. Ct. 1262, 103 L. Ed. 2d 509 (1989), which involved state regulations that restricted the times when producers could take gas from wells. On **[*397]** this occasion the Court upheld the regulations—not because the law aimed at the objective of gas conservation, but because the State pursued this end by regulating "'the physical ac[t] of drawing gas from the earth.'" Id., at 510, 109 S. Ct. 1262, 103 L. Ed. 2d 509. Our precedents demand, in other words, that the Court focus in the present case upon *what* the State seeks to regulate (a pipeline practice that is subject to regulation by the Commission), not *why* the State seeks to regulate it (to curb the practice's effects on retail rates).

[*530]** Trying to turn liabilities into assets, the Court brandishes statements from *Northern Natural* and *Northwest Central* that (in its view) discuss where state law was "aimed" or "directed." Ante, at 385, 386, 191 L. Ed. 2d, at 522. But read in context, these statements refer to the entity or activity that the state law regulates, not to which of the activity's effects the law seeks to control by regulating it. See, *e.g.*, ***[****37]*** Northern Natural, supra, at 94, 83 S. Ct. 646; 9 L. Ed. 2d 601 ("[O]ur cases have consistently recognized a significant distinction . . . between conservation measures aimed directly at interstate purchasers and wholesales . . ., and those aimed at producers and production"); Northwest Central, supra, at 512, 109 S. Ct. 1262, 103 L. Ed. 2d 509 ("[This regulation] is directed to the behavior of gas producers"). The lawsuits at hand target pipelines (entities regulated by the Commission) for their manipulation of indices (behavior regulated by the Commission). That should have sufficed to establish preemption.

B

The Court also tallies several features of state ***antitrust law*** that, it believes, weigh **[**1607]** against preemption. Ante, at 387-388, 191 L. Ed. 2d, at 523-524. Once again the Court seems to have forgotten its precedents. We have said before that "'Congress meant to draw a bright line easily ascertained, between state and federal jurisdiction'" over the gas trade. Nantahala Power & Light Co. v. Thornburg, 476 U. S. 953, 966, 106 S. Ct. 2349, 90 L. Ed. 2d 943 (1986) (quoting FPC v. Southern Cal. Edison Co., 376 U. S. 205, 215-216, 84 S. Ct. 644, 11 L. Ed. 2d 638 (1964)). Our decisions have therefore "'squarely rejected'" **[*398]** the theory, endorsed by the Court today, that the boundary between national and local authority turns on "'a case-by-case analysis of the impact of state regulation upon the national interest.'" *Ibid.*

State ***antitrust law***, the Court begins, applies to "all businesses in the marketplace" rather than just "natural-gas companies **[****38]** in particular." *Ante, at 387, 191 L. Ed. 2d, at 523*. So what? No principle of our natural-gas preemption jurisprudence distinguishes particularized state laws from state laws of general applicability. We have never suggested, for example, that a State may use general price-gouging laws to fix wholesale rates, or general laws about unfair trade practices to control wholesale contracts, or general common-carrier laws to administer interstate pipelines. The Court in any event could not have chosen a worse setting in which to attempt a distinction between general and particular laws. Like their federal counterpart, state antitrust laws tend to use the rule of reason to judge the lawfulness of challenged practices. Legal Aspects of Buying and Selling §10:12 (P. Zeidman ed. 2014-2015). This amorphous standard requires the reviewing court to consider "a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U. S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Far from authorizing across-the-board application of a uniform requirement, therefore, the Court's decision will invite state antitrust courts to engage in targeted regulation of the **[****39]** natural-gas industry.

The Court also stresses the "'long history'" of state antitrust regulation. *Ante, at 388, 191 L. Ed. 2d, at 524*. **[***531]** Again, quite beside the point. States have long regulated public utilities, yet the Natural Gas Act precludes them from using that established power to fix gas wholesale prices. *United Fuel, 317 U. S., at 468, 63 S. Ct. 369, 87 L. Ed. 396*. States also have long enacted laws to conserve natural resources, yet the Act precludes them from deploying that power to control purchases made by gas pipelines. *Northern* ***[*399]*** *Natural, 372 U. S., at 93-94, 83 S. Ct. 646, 9 L. Ed. 2d 601*. The Court's invocation of the pedigree of state ***antitrust law*** rests on air.

One need not launch this unbounded inquiry into the features of state law in order to preserve the States' authority to apply "tax laws," "disclosure laws," and "blue sky laws" to natural-gas companies, *ante, at 386, 387, 191 L. Ed. 2d, at 523*. One need only stand by the principle that if the Commission has authority over a subject, the States lack authority over that subject. The Commission's authority to regulate gas pipelines "in the public interest," *§717a*, is a power to address matters that are traditionally the concern of utility regulators, not "a broad license to promote the general public welfare," *NAACP v. FPC, 425 U. S. 662, 669, 96 S. Ct. 1806, 48 L. Ed. 2d 284 (1976)*. We have explained that the Commission does not, for example, have power to superintend **[****40]** "employment discrimination" or "unfair labor practices." *Id., at 670-671, 96 S. Ct. 1806, 48 L. Ed. 2d 284*. So the Act does not preempt state employment discrimination or labor laws. But the Commission does have power to consider, say, "conservation, **[**1608]** environmental, and *antitrust* questions." *Id., at 670, n. 6, 96 S. Ct. 1806, 48 L. Ed. 2d 284* (emphasis added). So the Act does preempt state antitrust laws.

C

At bottom, the Court's decision turns on its perception that the Natural Gas Act "'was drawn with meticulous regard for the continued exercise of state power.'" *Ante, at 385, 191 L. Ed. 2d, at 522* No doubt the Act protects state authority in a variety of ways. It gives the Commission authority over only some parts of the gas trade. *§717(b)*. It establishes procedures under which the Commission may consult, collaborate, or share information with States. *§717p*. It even provides that the Commission may regulate practices affecting wholesale rates "upon its own motion *or upon complaint of any State*." *§717d(a)* (emphasis added). It should have gone without saying, however, that no law pursues its purposes at all costs. Nothing in the Act and nothing in our cases suggests that Congress protected state power in the way imagined **[*400]** by today's decision: by licensing state sorties into the Commission's domain whenever judges conclude **[****41]** that an incursion would not be too disruptive.

The Court's preoccupation with the purpose of preserving state authority is all the more inexpiable because that is not the Act's only purpose. The Act also has competing purposes, the most important of which is promoting "uniformity of regulation." *Northern Natural, supra, at 91-92, 83 S. Ct. 646;9 L. Ed. 2d 601*. The Court's decision impairs *that* objective. Before today, interstate pipelines knew that their practices relating to price indices had to comply with one set of regulations **[***532]** promulgated by the Commission. From now on, however, pipelines will have to ensure that their behavior conforms to the discordant regulations of 50 States—or more accurately, to the discordant verdicts of untold state antitrust juries. The Court's reassurance that pipelines may still invoke conflict preemption, see *ante, at 390, 191 L. Ed. 2d, at 525*, provides little comfort on this front. Conflict preemption will resolve only discrepancies between state and federal regulations, not the discrepancies among differing state regulations to which today's opinion subjects the industry.

***

"The Natural Gas Act was designed . . . to produce a harmonious and comprehensive regulation of the industry. Neither state nor federal regulatory body was to **[****42]** encroach upon the jurisdiction of the other." *FPC v. Panhandle Eastern Pipe Line Co., 337 U. S. 498, 513, 69 S. Ct. 1251, 93 L. Ed. 1499 (1949)* (footnote omitted). Today, however, the Court allows the States to encroach. Worse still, it leaves pipelines guessing about when States will be allowed to encroach again. May States aim at retail rates under laws that share none of the features of ***antitrust law*** advertised today? Under laws that share only some of those features? May States apply their antitrust laws to pipelines *without* aiming at retail rates? But that is just the start. Who knows what other "considerations that weigh against a finding of pre-emption" remain **[*401]** to be unearthed in future cases? The Court's all-things-considered test does not make for a stable background against which to carry on the natural-gas trade.

I would stand by the more principled and more workable line traced by our precedents. The Commission may regulate the practices alleged in this case; the States therefore may not. I respectfully dissent.

ORDER GRANTING IN PART AND DENYING IN PART MOTION FOR JUDGMENT ON THE PLEADINGS

Re: Dkt. No. 17

Plaintiff Greg Garrison ("Plaintiff") brings this putative class action against Defendant Oracle Corporation ("Oracle") for alleged violations of federal and California antitrust laws. ECF No.[1] ("Compl.").1 Before the Court is Oracle's Motion for Judgment on the Pleadings. ECF No. 17. Having considered the parties' submissions, **[*2]** the relevant

---

[1] Unless otherwise indicated, all ECF references are from the docket of No. 14-04592 in the Northern District of California.

law, and the record in this case, the Court hereby GRANTS in part and DENIES in part Oracle's Motion for Judgment on the Pleadings with leave to amend. The case management conference scheduled for April 23, 2015, at 1:30 p.m. remains as set.

I. BACKGROUND

A. Factual Background

1. The Parties

Plaintiff is a former employee of Oracle. Compl. ¶ 14. Plaintiff worked for Oracle as a senior account manager from approximately December 2008 to June 2009. *Id.* ¶¶ 14, 23. In that capacity, Plaintiff managed regional sales of Oracle's Crystal Ball software, a spreadsheet-based software used for predictive modeling, forecasting, simulation, and optimization across various business industries. *Id.* ¶ 23.

Oracle, a Delaware corporation with its principal place of business in Redwood Shores, California, is a multinational computer technology corporation. Compl. ¶¶ 15-16. The world's second-largest software producer by revenue, Oracle specializes in developing and marketing computer hardware systems and enterprise software products, including its own brands of database management **[*3]** systems. *Id.* ¶ 16.

2. *In re High-Tech Employee Antitrust Litigation*

Plaintiff alleges here that Oracle conspired with Google Inc. ("Google") to enter into a "Restricted Hiring Agreement" (the "Agreement"). Compl. ¶ 19. There appears to be significant factual overlap between Plaintiff's allegations and the related action *In re High-Tech Employee Antitrust Litigation* ("*High-Tech*"), No. 11-02509. *See id.* ¶¶ 25-27 (discussing the alleged *High-Tech* conspiracy). As the factual and procedural history of *High-Tech*, as well as the U.S. Department of Justice's ("DOJ") investigations and complaints, are relevant to this action, the Court briefly summarizes the background of that litigation below.

From 2009 to 2010, DOJ's Antitrust Division investigated the employment and recruitment practices of various Silicon Valley technology companies, including Adobe Systems, Inc. ("Adobe"), Apple Inc. ("Apple"), Intel Corp. ("Intel"), Intuit Inc. ("Intuit"), and Google. *See* *In re High-Tech Emp. Litig., 856 F. Supp. 2d 1103, 1109 (N.D. Cal. 2012)*. In September 2010, DOJ filed civil complaints against the above-mentioned technology companies, in addition to Pixar and Lucasfilm Ltd. ("Lucasfilm"). *Id.* DOJ filed its complaint against Adobe, Apple, Google, Intel, Intuit, and Pixar **[*4]** on September 24, 2010. *Id.* On December 21, 2010, DOJ filed another complaint against Pixar and Lucasfilm. *See* No. 11-02509, ECF No. 65 ¶ 114. All of the technology company defendants stipulated to proposed final judgments in which they agreed that DOJ's complaints had stated claims under federal ***antitrust law*** and agreed to be "enjoined from attempting to enter into, maintaining or enforcing any agreement with any other person or in any way refrain from . . . soliciting, cold calling, recruiting, or otherwise competing for employees of the other person." *High-Tech, 856 F. Supp. 2d at 1109-10*. The D.C. District Court entered the stipulated proposed final judgments on March 17, 2011, and June 2, 2011, respectively. *Id. at 1110*.

The *High-Tech* plaintiffs filed five separate state court actions between May and July 2011. Following removal, transfer to San Jose to the undersigned judge, and consolidation, the *High-Tech* plaintiffs filed a consolidated amended complaint on September 13, 2011. *856 F. Supp. 2d at 1112-13*. In their complaint, the *High-Tech* plaintiffs alleged antitrust claims against their employers, claiming that the defendants had conspired "to fix and suppress employee compensation and to restrict employee mobility." *Id. at 1108*. More specifically, the **[*5]** *High-Tech* plaintiffs alleged a conspiracy comprised of "an interconnected web of express bilateral agreements." *Id. at 1110*. One such agreement, the "Do Not Cold Call" agreement involved one company placing the names of another company's employees on a "Do Not Cold Call" list and instructing its recruiters not to cold call the employees of the other company. *Id.* In addition to the "Do Not Cold Call" agreements, the *High-Tech* plaintiffs also alleged that Pixar and Lucasfilm entered into express, written agreements (1) not to cold call each other's employees, (2) to notify the other company whenever making an offer to an employee of the other company, and (3) not to engage in "bidding wars." *Id. at 1111*.

On May 17, 2013, the *High-Tech* plaintiffs publicly filed a number of documents in support of their supplemental motion for class certification. No. 11-02509, ECF Nos. 418, 428. One of those documents was an internal Google memo describing Google's hiring protocols and practices as of "1.7.2008." No. 11-02509, ECF No. At one point, the Google memo refers to certain companies on the "'Restricted Hiring' list," including Microsoft, Novell, Sun Microsystems, and, as relevant here, Oracle. *Id.*

3. Instant Lawsuit [*6]

As indicated above, Plaintiff alleges here that starting in May 2007, Oracle and Google entered into the Agreement. Compl. ¶ 19. Pursuant to the Agreement, Oracle, Google, and other technology companies agreed to the following:

> 1) Not to pursue manager level and above candidates for Product, Sales, or [General and Administrative] roles—even if they have applied to [any of the other companies who are parties to the Restricted Hiring Agreement];
> 2) However, there are no restrictions to our recruiting from these companies at individual contributor levels for PSG&A; [and]
> 3) Additionally, there are no restrictions at any level for engineering candidates.

Id. (second and third alterations in original). According to Plaintiff, Oracle entered into the Agreement with "the intent and effect of fixing the compensation of the employees of participating companies at artificially low levels." *Id.* ¶ 31; *see also id.* ¶ 8 ("The intended and actual effect of the Restricted Hiring Agreement was to fix and suppress employee compensation, and to impose unlawful restrictions on employee mobility."). Other than the senior executives who "actively managed and enforced" the Agreement, "Oracle employees were not **[*7]** apprised and did not consent to this restriction on their mobility of employment." *Id.* ¶¶ 20-22. Accordingly, Plaintiff seeks to represent the following class of Oracle employees in this action:

> All persons who worked at any time from May 10, 2007 to the present for Oracle in the United States in any manager level or above positions for Product, Sales, or General and Administrative roles, excluding engineers.

Id. ¶ 34.

B. Procedural History

In light of the relationship between the instant case and *High-Tech*, the Court briefly summarizes the relevant procedural history in *High-Tech* before turning to the instant case.

1. *High-Tech*

The *High-Tech* defendants removed the first state court action on May 23, 2011. No. 11-02509, ECF No. 1. On April 18, 2012, the Court granted in part and denied in part the *High-Tech* defendants' joint motion to dismiss and denied Lucasfilm's motion to dismiss. No. 11-02509, ECF No. 119. On April 5, 2013, the Court granted in part and denied in part the *High-Tech* plaintiffs' motion for class certification with leave to amend. No. 11-02509, ECF No. 382. The Court granted the *High-Tech* plaintiffs' supplemental motion for class certification on October 24, 2013. No. 11-02509, **[*8]** ECF No. 531. On November 13, 2013, the *High-Tech* defendants filed a Rule 23(f) petition before the Ninth Circuit, requesting permission to appeal this Court's October 24, 2013 class certification order. No. 13-80223 (9th Cir.), ECF No. 1. The Ninth Circuit denied the defendants' petition on January 14, 2014. No. 13-80223 (9th Cir.), ECF No. 18.

In the interim, three of the *High-Tech* defendants—Intuit, Lucasfilm, and Pixar—reached an early settlement with the plaintiffs. On September 21, 2013, the *High-Tech* plaintiffs filed a motion for preliminary approval of a proposed class action settlement as to defendants Intuit, Lucasfilm, and Pixar. No. 11-02509, ECF No. 501. On October 30, 2013, the Court preliminarily approved the proposed settlement with Intuit, Lucasfilm, and Pixar. No. 11-02509, ECF No. 540. The Court granted final approval as to that settlement on May 16, 2014. No. 11-02509, ECF No. 915. The Court entered a final judgment with regards to Lucasfilm, Pixar, and Intuit on June 9, 2014. No. 11-02509, ECF No. 936. At the request of Intuit, the Court entered an amended final judgment on June 20, 2014. No. 11-02509, ECF No. 947.

The remaining *High-Tech* defendants—Adobe, Apple, Google, and **[*9]** Intel—filed individual motions for summary judgment, and joint motions for summary judgment and to strike certain expert testimony on January 9, 2014. No. 11-02509, ECF Nos. 554 (Intel), 556 and 557 (joint motions), 560 (Adobe), 561 (Apple), 564 (Google). The Court denied the *High-Tech* defendants' individual motions for summary judgment on March 28, 2014. No. 11-02509, ECF No. 771. On April 4, 2014, the Court granted in part and denied in part the *High-Tech* defendants' motion to strike, and denied the defendants' joint motion for summary judgment. No. 11-02509, ECF No. 788. On May 22, 2014, the *High-Tech* plaintiffs filed a motion for preliminary approval of class action settlement as to the remaining defendants. No. 11-02509, ECF No. 920. On August 8, 2014, the Court denied the *High-Tech* plaintiffs' motion for preliminary approval, concluding that the proposed settlement did not fall "within the range of reasonableness." No. 11-02509, ECF No. 974 at 30. On September 4, 2014, the *High-Tech* defendants filed a petition for a writ of mandamus with the Ninth Circuit. No. 14-72745 (9th Cir.), ECF No. 1. On January 13, 2015, the *High-Tech* defendants filed correspondence with the Ninth Circuit **[*10]** referring to a new proposed settlement agreement. No. 14-72745 (9th Cir.), ECF No. 21. On January 30, 2015, the defendants filed an unopposed motion to dismiss the petition, which the Ninth Circuit granted on February 2, 2015. No. 14-72745 (9th Cir.), ECF Nos. 23, 24.

On January 15, 2015, the *High-Tech* plaintiffs filed a motion for preliminary approval of class action settlement as to the remaining defendants. No. 11-02509, ECF No. 1032. In this second proposed class action settlement, the parties had reached a settlement amount exceeding the previously rejected settlement by approximately $90.5 million. *Id.* at 1. Following a fairness hearing on March 2, 2015, the Court granted preliminary approval to the January 2015 settlement agreement on March 3, 2015. No. 11-02509, ECF Nos. 1051, 1054. A final approval hearing is scheduled for July 9, 2015.

2. Instant Lawsuit

Plaintiff here filed his class action complaint on October 14, 2014. The complaint asserts four causes of action under the following statutes: (1) Section 1 of the Sherman Act, *15 U.S.C. § 1*; (2) California's Cartwright Act, *Cal. Bus. & Prof. Code § 16720 et seq.*; (3) California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200 et seq.*; and (4) *California Business & Professions Code § 16600 et seq.* ("*Section 16600*"). Compl. ¶¶ 49-80. Plaintiff seeks damages, **[*11]** pre- and post-judgment interest, attorney's fees and expenses, and injunctive relief. *Id.* at 14-15.

On October 22, 2014, the Court related this action to *High-Tech*. ECF No. 6. After initially answering the complaint on November 10, 2014, ECF No. 9, Oracle filed an amended answer on December 1, 2014, ECF No. 12.

On January 5, 2015, Oracle filed the instant Motion for Judgment on the Pleadings. ECF No. 17 ("Mot."). Oracle also filed a request for judicial notice in connection with its motion. ECF No. 18. Plaintiff opposed Oracle's motion on January 20, 2015. ECF No. 21 ("Opp."). Plaintiff also filed a request for judicial notice in connection with its opposition. ECF No. 22.[2] Oracle filed its reply on January 27, 2015. ECF No. 29 ("Reply").

---

[2] The Court GRANTS the parties' unopposed requests for judicial notice. ECF Nos. 18, 22. The Court may take notice of facts not subject to reasonable dispute that are "capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*. Oracle asks the Court to take judicial notice of certain documents filed publicly in other proceedings. *See* *Reyn's Pasta Bella, LLC v. Visa USA, Inc., 442 F.3d 741, 746 n.6 (9th Cir. 2006)* (taking

II. LEGAL STANDARD

A. *Rule 12(c)*

"After the pleadings are closed—but early enough not to delay trial—a party may move for judgment on the pleadings." *Fed. R. Civ. P. 12(c)*. "Judgment on the pleadings is properly granted when, accepting all factual allegations in the complaint as true, there is no issue of material fact in dispute, and the moving party is entitled to judgment as a matter of law." *Chavez v. United States, 683 F.3d 1102, 1108 (9th Cir. 2012)* (brackets and internal quotation marks omitted). Like a motion to dismiss under *Rule 12(b)(6)*, a motion under *Rule 12(c)* challenges the legal sufficiency of the claims asserted in the complaint. *See id.* Indeed, a *Rule 12(c)* motion is "functionally identical" to a *Rule 12(b)(6)* motion, and courts apply the "same standard." *Dworkin v. Hustler Magazine, Inc., 867 F.2d 1188, 1192 (9th Cir. 1989)* (explaining that the "principal difference" between *Rule 12(b)(6)* and *Rule 12(c)* "is the timing of filing"); *see also* *U.S. ex rel. Cafasso v. Gen. Dynamics C4 Sys., 637 F.3d 1047, 1054 n.4 (9th Cir. 2011)*.

Judgment on the pleadings should thus be entered when a complaint does not plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content **[*13]** that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal quotation marks omitted). For purposes of ruling on a *Rule 12(c)* motion, the Court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*.

The Court, however, need not accept as true allegations contradicted by judicially noticeable facts, *see Shwarz v. United States, 234 F.3d 428, 435 (9th Cir. 2000)*, and it "may look beyond the plaintiff's complaint to matters of public record" without converting the *Rule 12(c)* motion into a motion for summary judgment, *Shaw v. Hahn, 56 F.3d 1128, 1129 n.1 (9th Cir. 1995)*. Nor must the Court "assume the truth of legal conclusions merely because they are cast in the form of factual allegations." *Fayer v. Vaughn, 649 F.3d 1061, 1064 (9th Cir. 2011)* (per curiam) (internal quotation marks omitted). Mere "conclusory allegations of law and unwarranted inferences are insufficient" to defeat a motion for judgment on the pleadings. *Adams v. Johnson, 355 F.3d 1179, 1183 (9th Cir. 2004)*.

B. Leave to Amend

If the Court determines that judgment on the pleadings is warranted, it must then decide whether to grant leave to amend. *See* *Harris v. Cnty. of Orange, 682 F.3d 1126, 1131, 1134-35 (9th Cir. 2012)* (affirming district **[*14]** court's dismissal under *Rule 12(c)* but reversing for failure to grant leave to amend). Under *Rule 15(a) of the Federal Rules of Civil Procedure*, leave to amend "shall be freely given when justice so requires," bearing in mind "the underlying purpose of Rule 15 to facilitate decisions on the merits, rather than on the pleadings or technicalities." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (alterations and internal quotation marks omitted). When granting judgment on the pleadings, "a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Id. at 1130* (internal quotation marks omitted). Accordingly, leave to amend generally shall be denied only if allowing amendment would unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has acted in bad faith. *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 532 (9th Cir. 2008)*.

---

judicial notice of documents filed in other courts). Plaintiff asks **[*12]** the Court to take judicial notice of DOJ documents that are publicly available on government websites. *See* *Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998-99 (9th Cir. 2010)* (taking judicial notice of information on a publicly available government website).

III. DISCUSSION

Oracle offers three bases for the Court to enter judgment on the pleadings as to all of Plaintiff's antitrust claims: (1) Plaintiff's claims are barred by the applicable statutes of limitations; (2) Plaintiff has failed to plead injury-in-fact sufficient to establish Article III standing; and (3) Plaintiff fails to adequately allege an agreement between **[*15]** Oracle and Google. Mot. at 8-20. Oracle also contends that Plaintiff has failed to state a UCL claim because he is ineligible for restitution or disgorgement. *Id.* at 20-22. Lastly, Oracle argues that Plaintiff, as a former Oracle employee, lacks standing to seek injunctive and declaratory relief. *Id.* at 22-24.

As the Court concludes that Plaintiff's claims are time barred, the Court does not reach the remainder of Oracle's arguments, except for Oracle's Article III standing argument, which the Court addresses first. *See* *Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 93-95, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998)* (explaining that Article III jurisdiction must be established "as a threshold matter"); *see also* *Vt. Agency of Natural Res. v. U.S. ex rel. Stevens, 529 U.S. 765, 771, 120 S. Ct. 1858, 146 L. Ed. 2d 836 (2000)* ("We first address the jurisdictional question whether respondent Stevens has standing under Article III of the Constitution to maintain this suit.").

A. Article III Standing: Injury-in-Fact

A federal court must ask whether a plaintiff satisfies the "case or controversy" requirement of Article III of the U.S. Constitution. "One element of the case-or-controversy requirement is that plaintiffs must establish that they have standing to sue." *Clapper v. Amnesty Int'l USA, 133 S. Ct. 1138, 1146, 185 L. Ed. 2d 264 (2013)* (internal quotation marks omitted). To establish Article III standing, a plaintiff must allege: injury-in-fact that is (1) concrete and particularized, as well as actual and imminent; (2) fairly traceable to the challenged action of the defendant; **[*16]** and (3) redressable by a favorable ruling. *See* *Monsanto Co. v. Geertson Seed Farms, 561 U.S. 139, 149, 130 S. Ct. 2743, 177 L. Ed. 2d 461 (2010)*. "For Article III purposes, an antitrust plaintiff establishes injury-in-fact when he has suffered an injury which bears a causal connection to the alleged antitrust violation." *Gerlinger v. Amazon.com Inc., 526 F.3d 1253, 1255 (9th Cir. 2008)*. While Plaintiff bears the burden of establishing Article III injury-in-fact, *see* *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*, at this stage he "need only show that the facts alleged, if proven, would confer standing," *Krottner v. Starbucks Corp., 628 F.3d 1139, 1141 (9th Cir. 2010)*.

Oracle contends that Plaintiff "has not pled any facts demonstrating that *he* actually suffered any concrete or particularized injury caused by the alleged Restricted Hiring Agreement." Mot. at 15. In particular, Oracle argues, Plaintiff "does not allege that he ever applied to work for Google, desired to work for Google, or was even qualified for a managerial-level position at Google." *Id.* Because Plaintiff "never alleges that *he actually* faced any obstacles in mobility or that *he* applied to Google and was not considered for a job because of the alleged agreement," Oracle says "Plaintiff's allegations of injury are thus only hypothetical and conjectural and he lacks standing to pursue his antitrust claims." *Id.* at 15-16.

The Court disagrees. Oracle fails to appreciate the gravamen of Plaintiff's alleged injury: that **[*17]** Oracle and Google engaged in a conspiracy "to fix and suppress *the compensation* of their employees," Plaintiff included, "by way of [the] Restricted Hiring Agreement." Compl. ¶ 2 (emphasis added); *see also id.* ¶ 31 ("Oracle entered into, implemented, and policed the Restricted Hiring Agreement with the knowledge of the overall conspiracy, and did so with the intent and effect of fixing the compensation of the employees of participating companies at artificially low levels."); *id.* ¶ 32 (alleging that Plaintiff "was harmed by the Restricted Hiring Agreement" through "elimination of competition and suppression of compensation and mobility"); *id.* ¶ 52 (claiming that "Defendant's conduct injured and damaged Plaintiff . . . by suppressing compensation to levels lower than the [employees] otherwise would have received in the absence of the Restrictive Hiring Agreements"). Plaintiff, who worked for and was paid by Oracle from December 2008 to June 2009, alleges that Oracle's anticompetitive conduct artificially depressed his compensation during that period. Plaintiff, therefore, has alleged a cognizable injury for purposes of Article III. *See* *High-Tech, 856 F. Supp. 2d at 1123 n.11* (explaining that "Plaintiffs meet the requirements **[*18]** for Article III standing" because "Plaintiffs allege that their salaries were artificially reduced as a result of Defendants' alleged anticompetitive conduct and that their injury can be redressed through the payment of damages should Plaintiffs establish liability").

As a result, the Court DENIES Oracle's Motion for Judgment on the Pleadings on grounds that Plaintiff has failed to allege an Article III injury-in-fact.

B. Statutes of Limitations

Oracle argues that Plaintiff's claims are all time barred by the applicable statutes of limitations. Mot. at 8-13; Reply at 2-7. For the reasons stated below, the Court agrees.

1. Four-Year Limitations Period

As a threshold matter, Plaintiff does not dispute that his claims under the Sherman Act, Cartwright Act, UCL, and Section 16600 are all subject to a four-year statute of limitations. *See* *15 U.S.C. § 15b* (Sherman Act); *Cal. Bus. & Prof. Code § 16750.1* (Cartwright Act); *Cal. Bus. & Prof. Code § 17208* (UCL); *Cal. Civ. Proc. Code § 343* (catch-all limitations statute applicable to *Section 16600*); *see also* *Ryan v. Microsoft Corp., No. 14-CV-04634-LHK, 2015 U.S. Dist. LEXIS 47753, 2015 WL 1738352, at *10-12 (N.D. Cal. Apr. 10, 2015)* (concluding that these four statutes are all subject to a four-year limitations period). Nor does Plaintiff dispute that the applicable statutes of limitations began to run in May 2007 (i.e., when Plaintiff alleges Oracle and Google entered into the Agreement); that the limitations **[*19]** period would have ended in May 2011 absent statutory tolling during the pendency of the DOJ investigation, *see* *15 U.S.C. § 16(i)*; or that, as a result, Plaintiff had until March 18, 2012, at the latest to file suit in this action. *See* Mot. at 8.[3]

Rather, in hopes of avoiding the time bar, Plaintiff argues that two doctrines apply to toll the statutes of limitations: (1) the "continuing violation" doctrine; and (2) fraudulent concealment. **[*20]** Opp. at 6-13. The Court addresses each in turn.

2. Continuing Violation Doctrine

Under the "continuing violation" doctrine, "each overt act that is part of the [antitrust] violation and that injures the plaintiff . . . starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times." *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (internal quotation marks omitted); *see also* *Pace Indus. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)* ("A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured."). In the Ninth Circuit, an overt act restarts the statute of limitations in an antitrust action if it: (1) is "a new and independent act that is not merely a reaffirmation of a previous act"; and (2) "inflict[s] new and accumulating injury on the plaintiff." *Samsung Elecs. Co. v. Panasonic Corp., 747 F.3d 1199, 1202 (9th Cir. 2014)* (internal quotation marks omitted), *cert. denied*, *135 S. Ct. 1157, 190 L. Ed. 2d 912 (2015)*.

---

[3] Federal ***antitrust law*** provides:

> Whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws, but not including an action under *section 15a* of this title, the running of the statute of limitations in respect to every private or State right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter.

15 U.S.C. § 16(i). Since the parties do not dispute that this provision extended the statute of limitations period to March 18, 2012, and because the outcome is the same whether the limitations period expired in May 2011 or March 2012, the Court assumes without deciding that the parties are correct.

At the outset, the Court notes that Plaintiff spends only two brief paragraphs in his complaint alleging a "continuing violation." Compl. ¶¶ 43-44. The Court notes further that these two paragraphs are virtually identical to the two paragraphs in the plaintiffs' complaint in *Ryan v. Microsoft* that the Court recently found "woefully lacking" in alleging a continuing **[*21]** violation. *See* 2015 U.S. Dist. LEXIS 47753, 2015 WL 1738352, at *13; *see also* No. 14-04634, ECF No. 1 ¶¶ 55-56 (virtually identical paragraphs in the *Ryan* complaint).

Similarly, the Court concludes here that the bald assertion that "[Oracle's] conspiracy was a continuing violation through which [Oracle] repeatedly invaded Plaintiff and Plaintiff Class' interests by adhering to, enforcing, and reaffirming the anticompetitive agreements described herein" is insufficient to show a continuing violation. Compl. ¶ 43. A review of the specific factual allegations in Plaintiff's complaint reveals no alleged wrongful communications or specific conduct during the limitations period. Other than Plaintiff's allegation that Oracle and Google entered into the Agreement in May 2007, the complaint is largely bereft of *any* dates or details with regards to Oracle's specific conduct. *See generally* Compl. There are no allegations of any new or independent actions taken by Oracle after October 14, 2010—i.e., within four years of the filing date of this complaint—that caused Plaintiff any new or accumulating injury. *See* Pace, 813 F.2d at 237. This is not entirely surprising given the complaint's conspicuous absence of specific factual allegations regarding Oracle's alleged conduct **[*22]** before, during, or after the limitations period, with the exception of the allegation that Oracle entered into the Agreement in May 2007.

In opposition, Plaintiff relies on his allegation that Oracle communicated "by phone and e-mail and through in-person meetings to further the conspiracy and the secrecy of the conspiracy." Opp. at 9 (quoting Compl. ¶ 44). The Court is not convinced. Again, Plaintiff offers no facts detailing when, where, or with whom these alleged phone calls, emails, and in-person meetings took place. Plaintiff also cites a number of cases describing what type of conduct has been found to be a continuing violation. *Id.* at 7-8 (citing Columbia Steel Casting Co. v. Portland Gen. Elec. Co., 111 F.3d 1427 (9th Cir. 1996); Hennegan v. Pacifico Creative Serv., Inc., 787 F.2d 1299 (9th Cir. 1986); Process Specialties, Inc. v. Sematech, Inc., No. CIV. S-00-414FCD PAN, 2001 U.S. Dist. LEXIS 26261, 2001 WL 36105562 (E.D. Cal. Nov. 8, 2001); Red Lion Med. Safety, Inc. v. Ohmeda, Inc., 63 F. Supp. 2d 1218 (E.D. Cal. 1999)). These cases are inapposite, however, because they do not change the reality that Plaintiff has simply failed to allege any facts indicating *when* the supposed continuing violations took place, let alone that they took place on or after October 14, 2010.

At bottom, Plaintiff must allege more than a continuing violation; he must also allege an overt act:

> A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff **[*23]** is injured. *However, even when a plaintiff alleges a continuing violation, an overt act by the defendant is required* to restart the statute of limitations and the statute runs from the last overt act.

Pace, 813 F.2d at 237 (emphasis added). Plaintiff's bare allegation that his interests were "repeatedly invaded" is therefore insufficient as a matter of law. Compl. ¶ 43. Consequently, the Court finds that Plaintiff has failed to plead a continuing violation—namely, that Oracle engaged in a "new and independent act that is not merely a reaffirmation of a previous act," which "inflict[ed] new and accumulating injury" on Plaintiff. Samsung, 747 F.3d at 1202; *see also* Ryan, 2015 U.S. Dist. LEXIS 47753, 2015 WL 1738352, at *13-14 (finding nearly identical allegations insufficient to plead a continuing violation); In re Animation Workers Antitrust Litig., ___ F.3d ___, 2015 U.S. Dist. LEXIS 44922, 2015 WL 1522368, at *12 (N.D. Cal. Apr. 3, 2015) (holding that the plaintiffs had failed to plead a continuing violation because "Plaintiffs do not allege that any Defendant abided by, attempted to enforce, or otherwise 'reaffirmed' the anti-solicitation scheme or salary range setting on or after September 8, 2010, i.e., four years prior to the first-filed complaint in this consolidated action").

3. Fraudulent Concealment

"A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a **[*24]** way that the plaintiff, acting as a reasonable person, did not know of its existence." Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012). The plaintiff bears the burden of pleading and proving fraudulent concealment. *Id.;see also* Conmar v. Mitsui & Co. (U.S.A.), Inc., 858 F.2d 499, 502 (9th Cir. 1988). To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have "actual or constructive knowledge of the facts giving rise to [his] claim" as a result of the defendant's affirmative acts; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to his claim. Hexcel, 681 F.3d at 1060. Moreover, allegations of fraudulent concealment must be pled with particularity. Conmar, 858 F.2d at 502.

To start, Plaintiff says he need not plead affirmative acts of concealment because Oracle had a "duty to disclose" its participation in the alleged anticompetitive conspiracy to Plaintiff. Opp. at 12. In the Ninth Circuit, "[p]assive concealment of information is not enough to toll the statute of limitations, unless the defendant had a fiduciary duty to disclose information to the plaintiff." Conmar, 858 F.2d at 505 (citation omitted). Plaintiff relies on a single case for the proposition that Oracle owed Plaintiff, and all of Oracle's employees, a fiduciary duty. Opp. at 12 (citing Harris v. Duty Free Shoppers Ltd. P'ship, 940 F.2d 1272, 1276 (9th Cir. 1991)). *Harris*, however, is inapposite. **[*25]** Indeed, the Ninth Circuit in *Harris* held that tour guides did *not* owe fiduciary duties to tourists under California law. Id. at 1275. Furthermore, as a general matter, the fact of an employer-employee relationship alone is insufficient to create a fiduciary relationship. *See, e.g.,* Salsgiver v. Am. Online, Inc., 32 F. App'x 894, 897 (9th Cir. 2002) (citing O'Dell v. Freightliner Corp., 10 Cal. App. 4th 645, 659, 12 Cal. Rptr. 2d 774 (1992)) ("[T]here is generally no fiduciary relationship between employee and employer."). Plaintiff offers no other argument or authority for the proposition that Oracle owes a fiduciary duty to Plaintiff, much less to all of Oracle's employees. As Plaintiff has provided no basis for the Court to conclude that Oracle owed Plaintiff a fiduciary duty, the Court concludes that Oracle had no obligation to affirmatively disclose its alleged illicit conduct.

Additionally, having reviewed Plaintiff's complaint, the Court finds that Plaintiff's allegations with respect to Oracle's alleged fraudulent concealment of Plaintiff's claims fail to pass muster under Rule 9(b). To satisfy the heightened standard under Rule 9(b), Plaintiff must allege "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007) (internal quotation marks omitted). However, Plaintiff **[*26]** fails to allege sufficient facts showing the "who, what, where, when, and how" of Oracle's alleged fraudulent concealment. For instance, Plaintiff alleges that Oracle "provided pretextual, incomplete, or materially false and misleading explanations for hiring, recruiting, and compensation decisions made under the conspiracy." Compl. ¶ 46. Plaintiff does not allege when, where, or to whom Oracle allegedly provided these false and misleading explanations, or the content of these allegedly misleading explanations. This conclusory allegation devoid of factual content does not satisfy Rule 12(b)(6)'s pleading standard, much less Rule 9(b)'s heightened pleading standard. *See* Animation Workers, 2015 U.S. Dist. LEXIS 44922, 2015 WL 1522368, at *16 (finding a verbatim allegation insufficient to support a claim of fraudulent concealment under Rule 9(b)).

The only allegation with any detail—also, the only allegation differentiating this portion of Plaintiff's complaint from the virtually identical complaint the Court has already dismissed against Microsoft in *Ryan, see* No. 14-04634, ECF No. 1 ¶¶ 57-61—involves former Oracle CEO, Larry Ellison ("Ellison"), and current Oracle CEO, Safra Catz ("Catz"). According to Plaintiff, "during meetings concerning the acquisition of new employees," Ellison **[*27]** and Catz "personally ensured that the division of Oracle engaging in the employee acquisitions was not hiring employees from companies who were co-participants in the Restrictive Hiring Agreement." Compl. ¶ 46. Critically, however, Plaintiff makes no allegation as to when any of these supposed "meetings" took place. Nor is there any allegation regarding what was said at those meetings, let alone that what was said was in any way misleading to Plaintiff, as is required to plead fraudulent concealment. *See* Conmar, 858 F.2d at 505. If anything, the complaint suggests the opposite—to wit, that Ellison and Catz told the truth about the alleged conspiracy by "personally ensur[ing]" that Oracle "was *not* hiring employees from companies" that were party to the Agreement. Compl. ¶ 46 (emphasis added).

Even if Plaintiff's allegation with respect to Ellison and Catz was sufficient under Rule 9(b), which it isn't, Plaintiff has still failed to plead an "affirmative act" of concealment. Indeed, the Court does not even understand what Plaintiff is alleging when he says in the very next sentence, "In order to keep the Restrictive Hiring Agreement secretive, Oracle's officers refrained from delegating such tasks." Compl. ¶ 46. To what "tasks" **[*28]** is Plaintiff referring? Who are "Oracle's officers"? As the Ninth Circuit explained in *Conmar*, the fact that a defendant's acts are "by nature self-concealing" is insufficient to show that the defendant has affirmatively misled the plaintiff as to the existence of the plaintiff's claim. *See* *858 F.2d at 505*; *see also* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 320e (2014) ("Of course, regarding every secret conspiracy as sufficiently self-concealing to toll the statute would often force the courts to deal with stale, if not ancient, evidence."). The same is true here.

In the absence of any factual allegations regarding Oracle's alleged wrongful conduct in affirmatively concealing the existence of Plaintiff's claims, the Court concludes that Plaintiff has failed to adequately allege an essential element of fraudulent concealment. *See* *Hexcel, 681 F.3d at 1060*. As such, the Court finds that Plaintiff has failed to plead fraudulent concealment.

4. Conclusion

In sum, the Court finds that all of Plaintiff's antitrust claims are time barred, and that Plaintiff has failed to adequately allege a plausible tolling theory. Accordingly, the Court GRANTS Oracle's Motion **[*29]** for Judgment on the Pleadings. The Court does so with leave to amend because the Court concludes that amendment would not necessarily be futile, as Plaintiff may be able to allege sufficient facts to support his tolling theories. *See* *Lopez, 203 F.3d at 1127* (holding that "a district court should grant leave to amend . . . unless it determines that the pleading could not possibly be cured by the allegation of other facts" (internal quotation marks omitted)).

IV. CONCLUSION

For the foregoing reasons, the Court rules as follows:

- The Court hereby DENIES Oracle's Motion for Judgment on the Pleadings on grounds that Plaintiff has failed to allege an Article III injury-in-fact; and
- The Court hereby GRANTS Oracle's Motion for Judgment on the Pleadings with leave to amend on grounds that Plaintiff's claims are time barred by the applicable statutes of limitations.

Should Plaintiff elect to file an amended complaint curing the deficiencies identified herein, Plaintiff shall do so within thirty (30) days of the date of this Order. Failure to meet the thirty-day deadline to file an amended complaint or failure to cure the deficiencies identified in this Order will result in a dismissal with prejudice of Plaintiff's claims. **[*30]** Plaintiff may not add new causes of action or parties without leave of the Court or stipulation of the parties pursuant to Rule 15 of the Federal Rules of Civil Procedure.

IT IS SO ORDERED.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN1[] **Sherman Act, Claims**

Sections 1 and *2* of the Sherman Act, *15 U.S.C.S. §§ 1*, *2*, address concerted and independent action, respectively. Because Congress perceived different risks from multilateral and unilateral conduct, it set different standards for liability under each section.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] Monopolies & Monopolization, Actual Monopolization

Section 2 of the Sherman Act prohibits three types of actions: monopolization, attempted monopolization, and a conspiracy to monopolize. 15 U.S.C.S. § 2. A monopolization claim has two elements: (1) the possession of monopoly power in a relevant market; and (2) the willful acquisition, maintenance, or use of that power by anti-competitive or exclusionary means as opposed to growth or development resulting from a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN3[] Attempts to Monopolize, Elements

An attempted monopolization under § 2 of the Sherman Act occurs when a competitor, with a dangerous probability of success, engages in anti-competitive practices the specific design of which are, to build a monopoly or exclude or destroy competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] Conspiracy to Monopolize, Elements

Conspiracy to monopolize entails proof of concerted activity, but, like the other two § 2 of the Sherman Act claims, requires an initial identification of the relevant markets.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] Actual Monopolization, Claims

For a completed monopolization claim to succeed, the plaintiff must prove a general intent on the part of the monopolist to exclude; while by contrast, to prevail on a mere attempt claim, the plaintiff must prove a specific intent to destroy competition or build a monopoly. But since no monopolist monopolizes unconscious of what he is doing improper exclusion is always deliberately intended.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] Regulated Practices, Market Definition

The definition of a market for antitrust purposes has two components: the relevant product market and the relevant geographic market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN7[] **Scope, Monopolization Offenses**

The United States Supreme Court has operationalized *§ 2* of the Sherman Act in the context of predatory pricing claims to focus on the economic essence of predatory pricing: that a business rival has priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant market. The Supreme Court has established two prerequisites to liability. The first of these requires that the defendant's prices be shown to be below an appropriate measure of its costs. The Sixth Circuit applies a burden-shifting framework to determine the appropriate measure of a rival's cost. Specifically, if the defendant's prices were below average total cost but above average variable cost, the plaintiff bears the burden of showing defendant's pricing was predatory. If, however, the plaintiff proves that the defendant's prices were below average variable cost, the plaintiff has established a prima facie case of predatory pricing and the burden shifts to the defendant to prove that the prices were justified without regard to any anticipated destructive effect they might have on competitors. Notably, the court has also required that predatory prices be at least below average total cost.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN8[] **Scope, Monopolization Offenses**

The United States Supreme Court's second prerequisite to liability for predatory pricing is a demonstration that the competitor had a reasonable prospect, under the Robinson-Patman Act, or, under *§ 2* of the Sherman Act, a dangerous probability, of recouping its investment in below-cost prices. This recoupment element requires at least two showings. Recoupment first implies that the below-cost pricing must be capable of producing the intended effects on the firm's rivals, whether driving them from the market, or causing them to raise their prices to supra-competitive levels within a disciplined oligopoly. Additionally, even if the target is forced to exit or is disciplined, determining whether recoupment of predatory losses is likely requires an estimate of the cost of the alleged predation and a close analysis of both the scheme and the structure and conditions of the relevant market. Most notable among these structures and conditions of the market are barriers to entry that protect the monopolistic profits of a successful predator.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN9[] **Regulated Practices, Price Fixing & Restraints of Trade**

The text of *§ 1* of the Sherman Act declares illegal every contract, combination or conspiracy, in restraint of trade. *15 U.S.C.S. § 1*. Where the plaintiff relies on circumstantial evidence of illicit collusion, that evidence must tend to exclude the possibility that the alleged conspirators acted independently, which assumes that the inferences of conspiracy from that evidence are plausible as a matter of economic theory. In other words, courts are more likely to infer an illegal agreement as the economic plausibility of anticompetitive conduct grows. Broader inferences of an agreement are permitted, and the tends to exclude standard is more easily satisfied, when the conspiracy is economically sensible for the alleged conspirators to undertake and the challenged activities could not reasonably be perceived as procompetitive. More evidence is required the less plausible the charge of collusive conduct. Additionally, the illegal conspiracy must produce antitrust injury, namely, an injury to competition itself.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN10[] **Opposing Materials, Motions for Additional Discovery**

A party that has not had the opportunity to obtain evidence in support of its opposition to a motion for summary judgment should not have that inability held against it.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Discovery & Disclosure > Discovery

HN11[] **Standards of Review, Abuse of Discretion**

The appellate court reviews a trial court ruling limiting or denying discovery for an abuse of discretion.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN12[] **Standards of Review, Abuse of Discretion**

An abuse of discretion occurs if the district court relies on clearly erroneous findings of fact, applies the wrong legal standard, misapplies the correct legal standard when reaching a conclusion, or makes a clear error of judgment.

Civil Procedure > Discovery & Disclosure > Discovery > Relevance of Discoverable Information

HN13[] **Discovery, Relevance of Discoverable Information**

The parties may demand any nonprivileged material that is relevant to any party's claim or defense, so long as that material appears reasonably calculated to lead to the discovery of admissible evidence. *Fed. R. Civ. P. 26(b)(1)*. But the trial court may limit discovery where the burden or expense of the proposed discovery outweighs its likely benefit, considering the needs of the case, the amount in controversy, the parties' resources, the importance of the issues at stake in the action, and the importance of the discovery in resolving the issues. *Rule 26(b)(2)(C)(iii)*. In sum, although a plaintiff should not be denied access to information necessary to establish her claim, neither may a plaintiff be permitted to go fishing and a trial court retains discretion to determine that a discovery request is too broad and oppressive.

Civil Procedure > Judicial Officers > Magistrates > Objections

Civil Procedure > Judicial Officers > Magistrates > Waiver of Appeals

HN14[] **Magistrates, Objections**

On a non-dispositive issue, a party must object to a magistrate's order within 14 days of receiving a copy of the order. *Fed. R. Civ. P. 72(a)*. Failure to do so risks losing the right to appeal the underlying issue to the court.

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN15[] **Judgments, Relief From Judgments**

It would be inappropriate to permit a party to sidestep an order merely by filing a similar motion and forcing the district court to respond anew.

Civil Procedure > Judicial Officers > Magistrates > Objections

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > Judicial Officers > Magistrates > Waiver of Appeals

HN16[] **Magistrates, Objections**

Failure to object is not a jurisdictional bar on appellate review, so the court may excuse the default in the interest of justice.

Civil Procedure > Discovery & Disclosure > Discovery > Undue Burdens in Discovery

HN17[] **Discovery, Undue Burdens in Discovery**

Parties may need some focused discovery, which may include sampling of the sources, to learn more about what burdens and costs are involved in accessing the information, what the information consists of, and how valuable it is for the litigation in light of information that can be obtained by exhausting other opportunities for discovery. *Fed. R. Civ. P. 26(b)(2)* advisory committee's notes.

Civil Procedure > ... > Discovery > Methods of Discovery > Inspection & Production Requests

HN18[] **Methods of Discovery, Inspection & Production Requests**

Fed. R. Civ. P. 34(a) permits sampling of documents or electronically stored information.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Admissibility > Expert Witnesses

HN19[] **Standards of Review, Abuse of Discretion**

The appellate court reviews the district court's decision to admit expert testimony, including its decisions about how to determine reliability and its ultimate conclusion, for abuse of discretion.

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN20[] **Admissibility, Expert Witnesses**

Under *Fed. R. Evid. 702*, a proposed expert's opinion is admissible, at the discretion of the trial court, if the opinion satisfies three requirements. First, the witness must be qualified by knowledge, skill, experience, training, or education. Second, the testimony must be relevant, meaning that it will assist the trier of fact to understand the evidence or to determine a fact in issue. Third, the testimony must be reliable.

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN21[] Admissibility, Expert Witnesses

The *Fed. R. Evid. 702* inquiry is a flexible one and its focus must be solely on principles and methodology, not on the conclusions they generate. Similarly, *Rule 702* directs courts to focus on the reliability of expert testimony, rather than the credibility and accuracy of that testimony.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN22[] Scope, Monopolization Offenses

A firm only acts as a "predator" to the extent that it sells at prices below an appropriate measure of cost and stands to recoup its losses through later supracompetitive profits.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Evidence > Admissibility > Expert Witnesses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN23[] Scope, Monopolization Offenses

Admitting an expert opinion on predation relying on either a disturbing proximity test or a no economic sense test is flatly contrary to law. A plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs. While the appropriate measure of cost has some flexibility (as, say, between average variable and average total cost), this flexibility extends only to costs directly incurred, not all conceivable opportunity costs.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN24[] Standards of Review, De Novo Review

The appellate court reviews a grant of summary judgment de novo.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

HN25[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate where the evidence on record shows no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*, *(c)*. The moving party must first demonstrate to the court that an essential element of the nonmoving party's case is absent; upon that showing, the non-moving party must then present sufficient evidence to demonstrate that there is a factual controversy as to that element, or at least explain why such evidence is not available. The court grants all reasonable inferences in favor of the non-moving party. But the mere existence of a scintilla of evidence in support of the plaintiff's position will be insufficient to defeat summary judgment.

Judges: Before: MERRITT, GIBBONS, and DONALD, Circuit Judges.

Opinion by: JULIA SMITH GIBBONS

Opinion

[*315] [*2]** JULIA SMITH GIBBONS, Circuit Judge. Gordon Auto Body Parts ("Gordon"), a Taiwanese company, was one of several early entrants into the United States market for replacement truck hoods. For a while, it faced competition solely from a handful of other Taiwanese manufacturers, at least some of whom participated in joint ventures with Gordon. Superior Production **[**2]** Partnership (trade name "PBSI") eventually entered the market for certain replacement hoods but found that it could not match the prices of Gordon and the Taiwanese firms. Believing that Gordon and the other firms were conspiring to drive it out of business with predatory prices, PBSI brought antitrust claims against Gordon.

The district court granted Gordon's motion for summary judgment after ruling on several discovery disputes. PBSI appeals both the resolution of the discovery disputes and the grant of summary judgment. Because PBSI has failed to make any showing that Gordon's prices were below an appropriate measure of cost, we affirm.

I.

Gordon and a handful of other Taiwanese manufacturers produce an array of replacement parts for automobiles that have been in collisions. Before the mid-2000s, they were the only producers of replacement hoods for certain models of trucks in the American market. Gordon and at least two of the other Taiwanese manufacturers had formal agreements or joint ventures related to shared investments in plant equipment and production of parts.

PBSI started making replacement bumpers as early as the 1980s. In the early 2000s, its management decided to expand **[**3]** into the market for replacement hoods, eventually beginning production on its first hood in 2006. The company soon began manufacturing replacement hoods for four different trucks. Sometime before or shortly after PBSI's entry into these markets, Gordon and other Taiwanese manufacturers reduced their prices on the same hoods. Though PBSI had planned to expand into production of other replacement parts, it found the **[***3]** price competition in these first four markets sufficiently discouraging to nix those plans. PBSI's management now claims that it may be forced to exit the replacement hood market altogether.

[*316] Believing its competitors' price changes to be illegal, PBSI filed a suit in federal district court with several antitrust claims, including violations of *Sections 1* and *2* of the Sherman Act and *Section 13(a)* of the Clayton Act as amended by the Robinson-Patman Act. The core allegations of the complaint described a predatory pricing scheme among Gordon and other Taiwanese manufacturers to force PBSI to cease production of truck hoods. The complaint defined the relevant markets as those for the four replacement truck hood models in the United States.

After discovery commenced, PBSI served requests for production **[**4]** on Gordon. Of particular relevance here, PBSI sought (i) "[a]ll documents and communications relating to the cost of production and manufacture of" the four types of hoods for several years in each market and (ii) "[a]ll documents which evidence, relate to, or refer to communications between or among Gordon" and other Taiwanese manufacturers or "any agreement regarding pricing, sharing or use of tooling or refraining from competition" in the United States or elsewhere. Gordon responded to the cost documentation request with what were apparently summaries of its manufacturing costs and contracts with suppliers; PBSI rejected this production as inadequate to determine Gordon's cost-calculation methods and verify its actual costs incurred. PBSI therefore moved to compel production of all cost documentation—including invoices and accounts payable records—underlying the summaries. Gordon objected that this scale of production would be unduly burdensome.

Gordon did produce tooling[1] and production agreements among the Taiwanese firms covering two of the four truck hoods but objected to the requests for agreements covering other parts as irrelevant. Gordon claimed that any such agreements did not concern **[**5]** the "relevant markets." Gordon also insisted that the remaining agreements "only involve[d] the equal sharing of the cost to produce the manufacturing tool/die for [other parts], and do not involve pricing of the part[s]." PBSI moved to compel production of these agreements as well.

[*4]** The magistrate judge granted PBSI's motion in part. As to cost documentation, the judge agreed that PBSI was "entitled to do some comparison of the documents from which the summaries ha[d] been drawn . . . to identify the frequency with which the summaries do not reflect information correctly[,]" but he also expressed concern at the burden of producing "every single piece of paper generated by Gordon over the relevant time period which relates to the costs of the products at issue." Faced with significant uncertainty about the relative merits of these claims, the judge settled on an "auditing" procedure by which the parties would agree on a subset of the underlying cost data necessary to "allow [PBSI] to verify or dispute the accuracy of the summary information[.]" If the "results . . . reveal[ed] substantial discrepancies between the summary information **[**6]** and the backup documents," the judge would be willing to compel further production. As to the agreements among the Taiwanese competitors, the magistrate essentially agreed with Gordon that any agreements relating to joint tooling or die production were irrelevant to predatory pricing of the truck hoods, but the judge admitted that he "c[ould not] tell" whether any parts "production agreements" outside of tooling arrangements, namely, "pricing agreements and [other] agreements which might limit competition," had been turned over. The **[*317]** magistrate "assume[d] either that any such agreements [had] already been produced, or that they do not exist."

With respect to the cost data, there is no indication in the record that PBSI objected to this order or asked for reconsideration by the district court until approximately 18 months later when it filed a second, separate motion to

[1] "Tooling" (or "tools and dies") refers to metal dies used to manufacture metal goods.

compel. In that motion, PBSI reasserted its position that Gordon should produce "all [b]ackup [c]ost [d]ocumentation." By this time, Gordon had produced cost data for five fiscal quarters under an agreement with PBSI negotiated pursuant to the magistrate judge's initial decision. When the magistrate judge denied this second motion to compel, PBSI filed an **[**7]** objection with the district court. The district court construed the second motion to compel as an attack on the conclusion of the magistrate's order denying in part the *first* motion to compel, found the "auditing procedure" in the magistrate's first order to be a "reasonable compromise between [the parties'] competing interests," and affirmed denial of the second motion to compel.

[*5]** With respect to the competitor agreements, PBSI filed a motion to "Compel[] Compliance with, or for Clarification of," the magistrate's order on the initial motion to compel. PBSI specifically sought clarification that Gordon should produce any competitor agreements relating to production of parts other than the four truck hoods, as evidence of a "proclivity" for collusion. The magistrate admitted that the previous order "did not address directly the relevance of production agreements for other parts." But he nonetheless refused to compel production of any agreements for other parts. The judge thought it "extremely unlikely that PBSI can make a convincing argument that such evidence is admissible under either *Fed. R. Evid. 403* or *406*, so that the request is not reasonably likely to lead to the discovery of relevant evidence **[**8]** based" on PBSI's "proclivity" theory. PBSI filed a timely objection with the district court, but the district court affirmed the decision for essentially the same reasons articulated by the magistrate.

PBSI and Gordon also submitted expert reports from economists Henry McFarland and Robert Hall, respectively. Both experts submitted second reports addressing each other's initial findings. We explain these reports in more detail below. Each party moved to exclude the expert testimony of the other. The district court denied PBSI's motion to exclude Hall's reports, but granted in part Gordon's motion to exclude McFarland's reports. The court specifically excluded McFarland's opinions on "predatory intent" and recoupment, the latter of which, in the court's view, was intertwined with McFarland's comparison of prices and costs.

Gordon then moved for summary judgment on all antitrust claims, claiming there was no genuine dispute of material fact on either the issue of below-cost pricing or recoupment of losses. In the same opinion in which it resolved the motions to exclude expert testimony, the district court granted Gordon summary judgment. The court stated that its conclusion rested on a **[**9]** lack of evidence that Gordon could recoup its costs and that it would "not analyze and resolve whether PBSI presents evidence . . . [of] below-cost pricing[.]" However, as with the motions to exclude, the district court essentially subsumed its analysis of below-cost pricing into its examination of recoupment.

PBSI timely appealed the grant of summary judgment as well as the district court's rulings on discovery and the expert reports.

[*6] [*318] II.**

We begin with the framework of ***antitrust law***. ***HN1***[] *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1-2*, address "concerted" and "independent" action, respectively. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-68, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. Because Congress perceived different risks from multilateral and unilateral conduct, it set different standards for liability under each section. *Id. at 768-69*.

A.

The law on predatory pricing claims under *§ 2* is significantly clearer, so we begin there.[2] ***HN2***[] *Section 2* prohibits three types of actions: monopolization, attempted monopolization, and a conspiracy to monopolize. *See 15*

---

[2] For the purposes of this case, the analysis of PBSI's *§ 2* claims extends to its claims under the Robinson-Patman Act, *15 U.S.C. § 13(a)—(b)*. *See Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 219, 221-22, 113 S. Ct. 2578,*

U.S.C. § 2. A monopolization claim has two elements: "(1) the possession of monopoly power in a relevant market; and (2) the willful acquisition, maintenance, or use of that power by anti-competitive or exclusionary means as opposed to 'growth or development resulting from a superior **[**10]** product, business acumen, or historic accident.'" Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 782 (6th Cir. 2002) (quoting Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 595-96, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)). ***HN3***[] "An attempted monopolization [under § 2] occurs when a competitor, with a dangerous probability of success, engages in anti-competitive practices the specific design of which are, to build a monopoly or exclude or destroy competition." Id. at 782 (alteration in original) (quoting Smith v. N. Mich. Hosps., Inc., 703 F.2d 942, 954 (6th Cir. 1983)). ***HN4***[] Conspiracy to monopolize entails "proof of concerted activity," but, like the other two § 2 claims, requires an initial identification of the relevant markets.[3] Potters Med. Ctr. v. City Hosp. Ass'n, 800 F.2d 568, 574 (6th Cir. 1986). Finally, ***HN5***[] "for a completed monopolization claim to succeed, the plaintiff must prove a general intent on the part of the monopolist to exclude; while by contrast, to prevail on a mere attempt claim, the plaintiff must prove a specific intent to destroy competition or build a monopoly." Conwood Co., 290 F.3d at 782 (internal quotation marks omitted). But since "'no monopolist **[***7]** monopolizes unconscious of what he is doing . . . [i]mproper exclusion . . . is always deliberately intended.'" *Id.* (alteration in original) (quoting Aspen Skiing Co., 472 U.S. at 602-03).

Helpfully, ***HN7***[] the Supreme Court has operationalized § 2 in this context to focus on the economic "essence" of predatory pricing: that "[a] business rival has priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant market." Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993). The Court established two prerequisites to liability. *See* id. at 222-24. The first of these requires that the defendant's **[*319]** prices be shown to be "below an appropriate measure of [its] costs." Id. at 222. This circuit applies a burden-shifting framework to determine the "appropriate measure of a rival's cost." Spirit Airlines, Inc. v. Nw. Airlines, Inc., 431 F.3d 917, 938 (6th Cir. 2005). Specifically:

> If the defendant's prices were below average total cost but above average variable cost, the plaintiff bears the burden of showing defendant's pricing was predatory. If, however, the plaintiff proves that the defendant's prices were below average variable cost, the plaintiff has established a *prima facie* case of predatory pricing and the burden shifts to the defendant to prove that the prices were justified without regard to any anticipated destructive effect they might have on competitors.

Id. (internal quotation marks **[**12]** omitted). Notably, this court has also required that predatory prices be at least below average total cost. Arthur S. Langenderfer, Inc. v. S.E. Johnson Co., 729 F.2d 1050, 1055-56 (6th Cir. 1984).

HN8[] The Supreme Court's second prerequisite to liability is "a demonstration that the competitor had a reasonable prospect, [under the Robinson-Patman Act], or, under § 2 of the Sherman Act, a dangerous probability, of recouping its investment in below-cost prices." Brooke Group Ltd., 509 U.S. at 224. This recoupment element requires at least two showings. Recoupment first implies that the "below-cost pricing must be capable . . . of producing the intended effects on the firm's rivals, whether driving them from the market, or . . . causing them to raise their prices to supracompetitive levels within a disciplined oligopoly." Id. at 225. Additionally, even if the target is forced to exit or is disciplined, "[d]etermining whether recoupment of predatory losses is likely requires an estimate of the cost of the alleged predation and a close analysis of both the scheme . . . and the structure and conditions of the relevant **[***8]** market." Id. at 226. Most notable among these "structure[s] and conditions" of the market are barriers to entry that protect the monopolistic profits of a successful predator. *See* Spirit Airlines, Inc., 431 F.3d at 946.

---

125 L. Ed. 2d 168 (1993); Spirit Airlines, Inc. v. Nw. Airlines, Inc., 431 F.3d 917, 938 (6th Cir. 2005) (citing Schwartz v. Sun Co., 276 F.3d 900, 903-04 (6th Cir. 2002)).

[3] ***HN6***[] The definition of a market for antitrust purposes has two components: "the relevant **[**11]** product market and the relevant geographic market." E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 441 (4th Cir. 2011).

B.

HN9[] The text of *§ 1* of the Sherman Act declares illegal "[e]very contract, **[**13]** combination . . . or conspiracy, in restraint of trade[.]" *15 U.S.C. § 1*. Where, as here, the plaintiff relies on circumstantial evidence of illicit collusion, that evidence must "tend[] to exclude the possibility that the alleged conspirators acted independently"—which assumes that the inferences of conspiracy from that evidence are plausible as a matter of economic theory. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 593-94, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (internal quotation marks omitted). In other words, courts are more likely to infer an illegal agreement as the economic plausibility of anticompetitive conduct grows. *See In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 62-63 (2d Cir. 2012)* ("[B]roader inferences [of an agreement] are permitted, and the 'tends to exclude' standard is more easily satisfied, when the conspiracy is economically sensible for the alleged conspirators to undertake and the challenged activities could not reasonably be perceived as procompetitive.") (internal quotation marks omitted); *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 661 (7th Cir. 2002)* (Posner, J.) ("More evidence is required the less plausible the charge of collusive conduct."). Additionally, the illegal conspiracy must produce antitrust injury, namely, an injury to competition itself. **[*320]** *In re Se. Milk Antitrust Litig., 739 F.3d 262, 284 (6th Cir. 2014)*.

Courts have rarely addressed the application of *§ 1* to the scenario before us. *Matsushita*, undoubtedly the leading case, declared single-firm **[**14]** predatory pricing generally implausible and a *conspiracy* to charge predatory prices even more so. *475 U.S. at 589-91*. But *Matsushita* did not make it entirely clear if *§ 1* liability required a showing of prices below some "appropriate" level of cost, as in *Brooke Group. See Matsushita, 475 U.S. at 584 n.8* (noting that, for that particular case, the Court would view the threshold as either "(i) pricing below the level necessary to sell [plaintiff's] products, or (ii) pricing below some appropriate measure of cost" without deciding if those tests applied to future cases). Nor did *Matsushita* expressly lay out a recoupment requirement.

[*9]** Nonetheless, we think it best to infer these same elements in a *§ 1* predatory pricing claim. *Matsushita* clearly considered both below-cost pricing and the likelihood of recoupment to impact, if not fully determine, the plausibility of a predatory pricing conspiracy. *See id. at 590-91*. And whether predation and recoupment are merely considerations that inform the plausibility of inferring an agreement, as PBSI suggests, or are formally independent requirements beyond a *§ 1* agreement and antitrust injury, as Gordon argues, is a technicality we need not address here. Either way, a plaintiff must grapple with these concepts in **[**15]** proving its case under *§ 1*. *See R.J. Reynolds Tobacco Co. v. Cigarettes Cheaper!, 462 F.3d 690, 695-96 (7th Cir. 2006)* (Easterbrook, J.).

As explained below, neither PBSI's *§ 1* claim, *§ 2* claim, nor its Robinson-Patman Act claim can survive summary judgment on the issue of below-cost pricing. We therefore analyze each assignment of error solely for its illumination of the relationship between Gordon's prices for the hoods and its costs of production.

III.

We turn first to the district court's discovery orders, as any significant errors here would offer a clear reason to reverse summary judgment. *See, e.g., Tenn. Valley Auth. v. United States, 60 Fed. Cl. 665, 675-76 (Fed. Cl. 2004)* (*HN10*[] "A party that has not had the opportunity to obtain evidence in support of its opposition to a motion for summary judgment should not have that inability held against it."). *HN11*[] We review a trial court ruling limiting or denying discovery for an abuse of discretion. *Robertson v. Lucas, 753 F.3d 606, 623 (6th Cir. 2014)*; *see also Louzon v. Ford Motor Co., 718 F.3d 556, 560 (6th Cir. 2013)* (reviewing denial of a motion to compel for abuse of discretion). *HN12*[] "An abuse of discretion occurs if the district court relies on clearly erroneous findings of fact, applies the wrong legal standard, misapplies the correct legal standard when reaching a conclusion, or makes a clear error of judgment." *Louzon, 718 F.3d at 560* (internal quotation marks omitted).

HN13[] The parties may demand "any nonprivileged material that is relevant to **[**16]** any party's claim or defense," so long as that material "appears reasonably calculated to lead to the discovery of admissible evidence."

Fed. R. Civ. P. 26(b)(1). But the trial court may limit discovery where "the burden or expense of the proposed discovery outweighs its likely benefit, considering the **[***10]** needs of the case, the amount in controversy, the parties' resources, the importance of the issues at stake in the action, and the importance of the discovery in resolving the issues." *Fed. R. Civ. P. 26(b)(2)(C)(iii)*. In sum, "[a]lthough a plaintiff should not be denied access to **[*321]** information necessary to establish her claim, neither may a plaintiff be permitted to 'go fishing' and a trial court retains discretion to determine that a discovery request is too broad and oppressive." *Surles ex rel. Johnson v. Greyhound Lines, Inc., 474 F.3d 288, 305 (6th Cir. 2007)* (internal quotation marks omitted).

A.

PBSI argues that the district court should have compelled production "of all documents showing Gordon's costs to produce the four hoods at issue, including the cost of materials, labor, and administrative overhead." Gordon does not dispute the relevance of this cost data; it responds instead that PBSI waived this argument below and that the district court reasonably exercised its discretion by requiring limited production of cost documents. **[**17]**

We agree with Gordon that PBSI waived its right to appeal this issue for failure to object to the magistrate judge's order in a timely fashion. ***HN14***[] On a non-dispositive issue, a party must object to a magistrate's order within 14 days of receiving a copy of the order. *Fed. R. Civ. P. 72(a)*. Failure to do so risks losing the right to appeal the underlying issue to this court. *Stemler v. City of Florence, 126 F.3d 856, 866 n.9 (6th Cir. 1997)*.

Here, the magistrate judge entered an order in December 2008 granting in part PBSI's motion to compel. That order quite clearly set up a scheme for initially limited production of cost documentation based on the reasonable compromises of both parties, but PBSI did not raise this issue again until a year and a half later when it moved to compel production of the same documents. PBSI's later motion might have been permissible had it "alleged failure to comply with the prior order of the Court," or had it been based on materials reviewed as a result of Gordon's compliance with the first order, but that is not the tack it took. Instead—and as the magistrate judge and district court recognized—the second motion to compel effectively sought full reconsideration of the initial order. In the words of its own motion, PBSI argued that "[t]he information **[**18]** provided by Gordon does not allow PBSI [to] *fully* evaluate *every* element of Gordon's costs over the relevant time period. . . . PBSI must be allowed to look at the *entire* ***[***11]*** *period* of time for which Gordon's pricing was extraordinarily low." This is far beyond the limits of the magistrate judge's original decision.

PBSI did timely object to the denial of its second motion to compel. But ***HN15***[] it would be inappropriate to permit PBSI to sidestep the 2008 order merely by filing a similar motion and forcing the district court to respond anew. *See Daley v. Marriott Int'l, Inc., 415 F.3d 889, 892-93, 893 n.9 (8th Cir. 2005)* (denying appellate review where plaintiff failed to object to a magistrate's ruling in time but later filed a motion to reconsider); *Key Energy Res., Inc. v. Merrill (In re Key Energy Res., Inc.), 230 F.3d 1197, 1200-01, 1201 n.3 (10th Cir. 2000)* (finding waiver even where the district court reached the merits of the magistrate judge's ruling on a motion to reconsider filed after the window for objecting).

HN16[] Failure to object is not a jurisdictional bar on appellate review, however, so we may "excuse the default in the interest of justice[.]" *Alspaugh v. McConnell, 643 F.3d 162, 166 (6th Cir. 2011)* (internal quotation marks omitted). But we do not think PBSI has shown an injustice or abuse of discretion regarding the production of cost data. The magistrate judge faced plausible, competing claims about the need to verify **[**19]** the summary **[*322]** data already produced, and the potential for "extreme hardship" of fully depicting manufacturing costs in four markets across several years. So the magistrate judge sensibly allowed the burden of discovery to escalate only as a greater benefit became apparent. In this case (and as agreed to by the parties), that meant initial production of cost documentation for five fiscal quarters to allow PBSI to "verify or dispute the accuracy of the summary information[.]" If this limited production suggested flaws in Gordon's summaries, PBSI could return to court to compel further production.

Although the magistrate judge and district court referred to this scheme as an "auditing procedure," it might better be described as sampling[4]—a discovery method often thought well within the discretion of a trial court. *See, e.g., Larson v. AT&T Mobility LLC, 687 F.3d 109, 130 n.33 (3d Cir. 2012)* ("[T]he **HN17**[] parties may need some focused discovery, which may include sampling of the sources, to learn more about what burdens and costs are involved in accessing the information, what the information consists of, and how valuable it is for the litigation in light **[***12]** of information that can be obtained by exhausting other opportunities for discovery." (alteration in original) **[**20]** (quoting *Fed. R. Civ. P. 26(b)(2)* advisory committee notes)); *see also* **HN18**[] *Fed. R. Civ. P. 34(a)* (permitting sampling of documents or electronically stored information). In fact, sampling may have been a permissible approach to discovery of cost information even if Gordon had never produced any cost summaries whatsoever. *See Soto v. Castlerock Farming & Transp., Inc., 282 F.R.D. 492, 503-04 (E.D. Cal. 2012)* (collecting cases approving sampling as a discovery compromise). And even if this sampling did not produce PBSI's desired results *ex post*, this does not make it an impermissible method for the trial court to manage discovery *ex ante*.

B.

PBSI also argues that the district court should have compelled production of the competitor agreements relating to automobile parts other than the four truck hoods. PBSI points to deposition testimony of Gordon employees that appears to confirm the existence of production agreements the Taiwanese firms made to establish artificially high prices in other product and geographic markets. But PBSI contends only that these agreements are relevant to recoupment—not the relationship **[**21]** between the costs and prices of the truck hoods. We simply see no indication—and PBSI gives us no reason—that the agreements among Taiwanese firms about addressing joint production of *other* parts meaningfully influenced Gordon's cost of producing, or revenue from selling, the four truck hoods at the heart of this case. Those agreements that did concern the truck hoods were produced during initial discovery, and, notably, PBSI does not rely on them to defeat summary judgment on below-cost pricing. Consequently, any error in the discovery orders covering these agreements does not warrant remand.

IV.

We turn next to the expert reports. **HN19**[] We review the "district court's decision to admit expert testimony, including its 'decisions about how to determine reliability' and 'its ultimate conclusion,' for abuse of discretion." *Surles ex rel. Johnson, 474 F.3d at 293* (quoting *Kumho Tire **[*323]** Co. v. Carmichael, 526 U.S. 137, 152, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*). We have summarized the substantive test for admissibility as follows:

> **[***13]** **HN20**[] Under *Rule 702 of the Federal Rules of Evidence*, "a proposed expert's opinion is admissible, at the discretion of the trial court, if the opinion satisfies three requirements. First, the witness must be qualified by 'knowledge, skill, experience, training, or education.' Second, the testimony must be relevant, meaning that it 'will **[**22]** assist the trier of fact to understand the evidence or to determine a fact in issue.' Third, the testimony must be reliable."

*Burgett v. Troy-Bilt LLC, 579 Fed. Appx. 372, 2014 WL 4290109, at *3 (6th Cir. 2014)* (quoting *In re Scrap Metal Antitrust Litig., 527 F.3d 517, 528-29 (6th Cir. 2008)*). **HN21**[] "The *Rule 702* inquiry is a flexible one and its focus must be solely on principles and methodology, not on the conclusions they generate." *Lee v. Smith & Wesson Corp., 760 F.3d 523, 526 (6th Cir. 2014)* (quoting *Daubert v. Merrell Dow Pharms., 509 U.S. 579, 595, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*) (internal alterations and quotation marks omitted). Similarly, *Rule 702* directs courts to focus on the reliability of expert testimony, rather than the "credibility and accuracy" of that testimony. *In re Scrap Metal Antitrust Litig., 527 F.3d 517, 529 (6th Cir. 2008)*.

---

[4] We do not mean to suggest that the court's method was a truly random sample used to make a statistical inference about a larger population. Rather, we use this term in the sense used in the ***Fed. R. Civ. P. 26(b)(2)*** advisory committee notes.

Before applying these standards, we describe in more detail the expert testimony at issue. Hall's report found, *inter alia*, that Gordon's prices never fell below average avoidable cost and that the risk of future entry would undermine any attempt to recoup predatory losses in the markets for the hoods. McFarland attempted to calculate average variable costs in his first report but found this "very difficult to measure" given gaps and ambiguities in the data; ultimately, though, he concluded that Gordon's "prices are often above the estimated level of [average variable] costs, but the difference . . . is often very small." He found this "aggressive pricing" "disturbing" and potentially suggestive of a predatory scheme. McFarland **[**23]** also addressed the prospects of a predator recouping its losses in his first report. In his analysis, Gordon might recoup its losses either through higher prices for the hoods after PBSI's exit, or "if [the scheme] discouraged PBSI from entering the production of other hoods," Gordon might enjoy "higher sales and prices[.]"

In his second report, McFarland revamped his theory of predation. Rather than focus on average variable or average avoidable cost, he opted instead for what he called the "no economic sense" test, under which the losses from predation are measured as *any* downward deviation from a profit-maximizing price. McFarland's second analysis also addressed the likelihood that PBSI would be forced out of the four markets for replacement hoods, and it provided more **[***14]** quantitative explanation of Gordon's recoupment prospects, even comparing those to the "losses" under the "no economic sense" test.

A.

As relevant here, the district court excluded as unreliable McFarland's opinion on two issues: (i) predatory intent and (ii) below-cost pricing. PBSI contests both exclusions. We find no abuse of discretion.

1.

McFarland opined in both reports that Gordon's pricing strategy reflected **[**24]** an intent to force PBSI out of the markets for replacement hoods. The district court excluded this part of the report under *Rule 702(a)* because, in its view, specialized knowledge would not aid the factfinder in **[*324]** determining intent. We see no meaningful error on this particular ruling.

If the district court used "intent" to mean either the "general" intent required for "completed" monopolization or the "specific" intent required for attempted monopolization, *see Conwood Co., 290 F.3d at 782*, there is certainly no need for expert assistance. As noted above, the Supreme Court has virtually eliminated the substance of this element, or at least folded it into the other elements of a predatory pricing claim.[5] *See Aspen Skiing Co., 472 U.S. at 602-03* ("[T]here is agreement on the proposition that no monopolist monopolizes unconscious of what he is doing. . . . Improper exclusion (exclusion not the result of superior efficiency) is always deliberately intended." (internal quotation marks omitted)). And if the district court used "predatory intent" as shorthand for injury to competition, *see, e.g., D.E. Rogers Assocs., Inc. v. Gardner-Denver Co., 718 F.2d 1431, 1439 (6th Cir. 1983)*, that question collapses into the predation and recoupment analyses in McFarland's report. Post-*Brooke Group*, ***HN22***[] a firm only acts as a "predator" to the extent that it sells at prices **[**25]** below an appropriate measure of cost and stands to recoup its losses through later supracompetitive profits. *509 U.S. at 222-24*. And as discussed below, McFarland's report has serious infirmities relating to the cost-price relationship.

[*15]** Thus, no expert testimony is truly needed on the question of intent, at least assuming that all other elements have been established, and the court therefore did not abuse its discretion in barring McFarland from testifying on this narrow question.

---

[5] We also note that, in the case of predatory pricing, intent to harm competition itself can often accrue to the benefit of consumers. When a would-be predator sets its prices too low but later finds that it cannot recoup those losses, consumers have gained. *Brooke Group Ltd., 509 U.S. at 223-24*. ***Antitrust law*** should not pose an obstacle to this sort of inept predation. *Id. at 224*.

2.

The district court's second quarrel with McFarland's report also has merit. The court framed the problem as a flaw in McFarland's recoupment analysis, but we think the court's reasoning is more applicable to below-cost pricing. We conclude that McFarland's opinion does not apply a permissible test for this issue.

In his initial report, McFarland concluded that he could only say that Gordon's **[**26]** "prices are often above the estimated level of costs, but the difference between price and cost[] is often very small." Though he found this proximity "disturbing," he admitted in his second report that Gordon's "aggressive pricing strategy" could not be shown to fall below average variable or average avoidable costs. He therefore analyzed Gordon's short-term losses using what he termed the "no economic sense test," which calculates losses as possible profits foregone by not charging a higher price. Under this test, a predator does not necessarily price below average variable, average avoidable, or average total cost; rather, it simply charges something less than the profit-maximizing price. McFarland then compared his estimate of these foregone profits with his calculations of what Gordon and its alleged conspirators stood to gain by forcing PBSI out of the market for replacement truck hoods to reach his conclusion about the likelihood of recoupment.

The district court and Gordon are correct that ***HN23***[] admitting an expert opinion on predation relying on either a "disturbing" **[*325]** proximity test or a "no economic sense" test is flatly contrary to law. *See Brooke Group Ltd., 509 U.S. at 222-23* ("[A] plaintiff seeking to establish **[**27]** competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs."). While the appropriate measure of cost has some flexibility (as, say, between average variable and average total cost), *see Spirit Airlines, Inc., 431 F.3d at 938*, this flexibility extends only to costs directly incurred, not all conceivable **[***16]** opportunity costs.[6] *See Arthur S. Langenderfer, Inc., 729 F.2d at 1058* (rejecting a "profit maximization" theory of predation similar to that used here); *see also United States v. AMR Corp., 335 F.3d 1109, 1118 (10th Cir. 2003)* ("Courts and scholars have observed that such a sacrifice test would necessarily involve a great deal of speculation and often result in injury to the consumer and a chilling of competition."). Consequently, McFarland's analysis of putative losses from predation is inadmissible, and the district court did not abuse its discretion in rejecting the "no economic sense" test. Nor are prices close to, but above, some measure of cost permissible evidence of anticompetitive conduct. Rather, they are the essence of competition. *Brooke Group Ltd., 509 U.S. at 223-24*.

B.

As it did in the district court proceedings, PBSI now contends that Hall's opinion is contrary to law, and therefore inadmissible, because he compared Gordon's prices only to average variable cost. Relying on a few stray remarks in the 200 or so pages of material from Hall, PBSI claims that his entire analysis is tainted by the lack of references to average total cost, another metric for predation. The district court, reading Hall's report as a whole, disagreed. In its view, the remarks identified by PBSI referred to common practice among economists, not lawyers, and, more importantly, did not purport to "find that predatory pricing may never exist if a firm's pricing is above" average variable cost.

---

[6] As the Fifth Circuit explains in more detail:

> It must be noted that the expert relied on an erroneous interpretation of the law regarding predatory pricing. The opinion clearly indicated that the expert **[**28]** believed the law of this Circuit allowed a finding of predation when prices are above a firm's variable costs but below a "short-run profit maximizing price." As we explained above, this position is no longer tenable in the wake of *Brooke Group*. This error may explain, but does not excuse, the expert's failure to address the question of variable cost. In affirming summary judgment, we may disregard the conclusions of an expert opinion grounded in an error of law.

Stearns Airport Equip. Co. v. FMC Corp., 170 F.3d 518, 533 n.14 (5th Cir. 1999).

The district court was **[**29]** well within its discretion to admit Hall's testimony. We agree that no statement identified by PBSI categorically excludes average total cost as a legal criterion for predation. And since average variable cost is clearly relevant to and consistent with this court's case law on predation, *see* *Spirit Airlines, Inc., 431 F.3d at 938*, any supposed risk of confusion **[***17]** to the factfinder would be easily outweighed by the utility of Hall's (concededly reliable) analysis.

V.

Having addressed and approved the procedural and evidentiary rulings by the district court, we now consider the ultimate issue in this case: whether Gordon should have received summary judgment based on the record before the district court.

HN24[] We review a grant of summary judgment *de novo. Payne v. Novartis Pharms.* ***[*326]*** *Corp., 767 F.3d 526, 530 (6th Cir. 2014)*. ***HN25***[] Summary judgment is appropriate where the evidence on record shows no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*, *(c)*. The moving party must first demonstrate to the court that an essential element of the nonmoving party's case is absent; upon that showing, the non-moving party must then present sufficient evidence to demonstrate that there is a factual controversy as to that element, or at least explain why such evidence is **[**30]** not available. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. We grant all reasonable inferences in favor of the non-moving party. *Matsushita, 475 U.S. at 587-88*. But "[t]he mere existence of a scintilla of evidence in support of the plaintiff's position will be insufficient" to defeat summary judgment. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

Our conclusions on the discovery and expert testimony issues go a long way toward resolving PBSI's appeal of the grant of summary judgment. PBSI, without the benefit of McFarland's "no economic sense" analysis, has little to support an essential part of its case. Rather than pointing to evidence in the record, PBSI primarily argues that vague inferences about "predatory intent" or a "scheme's predatory nature" can replace a cost-price comparison under its reading of *Spirit Airlines*.

While *Spirit Airlines* did not lay out a cost test that *must* be used to show predation, *431 F.3d at 938-39*, it is untenable to suggest that a plaintiff can skate by without *any* method for comparing prices to cost. *See* *Arthur S. Langenderfer, Inc., 729 F.2d at 1056*; *see also* *R.J. Reynolds Tobacco Co., 462 F.3d at 695-96*. Since price cuts are generally *pro-competitive*, some comparison to cost is necessary to determine injury to competition; without a cost-based **[***18]** test of predation, courts would inevitably punish firms for being the most efficient producers. *See* *Brooke Group Ltd., 509 U.S. at 222-24*. *Spirit Airlines* is therefore **[**31]** best read to allow plaintiffs the flexibility to apply a cost-based test other than average variable cost (or variations on average variable cost). *See* *431 F.3d at 945* (finding an issue of material fact given an "intellectual disagreement" over the proper calculation of average variable costs); *see also* *AMR Corp., 335 F.3d at 1116* ("[W]e do not favor [average variable cost] to the exclusion of other proxies for marginal cost. Whatever the proxy used to measure marginal cost, it must be accurate and reliable in the specific circumstances of the case at bar."). Plaintiffs can proffer any number of proxies for the marginal cost of production. *See* *AMR Corp., 335 F.3d at 1115-20* (discussing several alternatives).

But without McFarland's "no economic sense" test, PBSI has not offered such a metric. And even if there is a reasonable inference from the expert reports that Gordon's prices were below average *total* cost, that inference still leaves the burden of production on PBSI. *Spirit Airlines, Inc., 431 F.3d at 938*. Thus, PBSI's claims, under both the Sherman Act and the Robinson-Patman Act, succeed or fail based on an analysis of average variable cost. *See* *AMR Corp., 335 F.3d at 1120-21* (affirming summary judgment on a predatory pricing claim where plaintiff's cost metrics were unreliable and no one disputed that prices were above **[**32]** average variable cost). It is not helpful to the plaintiff that Gordon's prices may have a "close proximity" to average variable cost, or that any price cuts merely coincided with competitive entry. So long as prices are still **[*327]** above cost, those actions simply suggest *pro-competitive* behavior. *Brooke Group Ltd., 509 U.S. at 224*.

Finally, PBSI provides only a *single* record citation, across both of its briefs, to support its assertion that Gordon priced below its variable costs. That citation purports to compare costs discussed in deposition testimony with a table of prices in McFarland's initial report. On our review of that deposition testimony, we simply do not see any cost figures with sufficient specificity to construct a meaningful comparison. The deposition transcript does provide one aggregate cost figure for a single truck hood in 2006. But it does not at all illuminate how costs varied throughout the year or how sales of the hoods were distributed across time—at least one of which is necessary to comparing Gordon's costs to its highly fluctuating prices. To infer from **[***19]** this evidence that Gordon sold below cost, we would be forced to assume that it sold the overwhelming majority of its output only during the few **[**33]** months with the absolutely lowest prices in McFarland's table. Even putting aside the issue of whether a predatory pricing scheme could succeed in such a short period of time, PBSI points to no evidence that Gordon's output was concentrated in this interval. We do not find this assumption reasonable. PBSI's last-gasp citation, then, is no more than a "scintilla" of evidence on an essential element of each of its antitrust claims, and summary judgment was therefore appropriate. *Anderson, 477 U.S. at 252*.

VI.

The judgment of the district court is affirmed.

Judges: HON. YVONNE GONZALEZ ROGERS, UNITED STATES DISTRICT JUDGE.

Opinion by: YVONNE GONZALEZ ROGERS

Opinion

FINDINGS OF FACT AND CONCLUSIONS OF LAW ON EQUITABLE RELIEF UNDER UCL CLAIM [*3]

On July 1, 2013, Plaintiff Netlist Inc. ("Netlist") brought this action against Defendant Diablo Technologies, Inc. ("Diablo"). In the operative Second Amended Complaint, filed March 21, 2014, Netlist alleged claims against Diablo for misappropriation of trade secrets, breach of contracts, and unfair competition under the California Unfair Competition Law ("UCL"), *California Business & Professions Code section 17200*, based on that alleged conduct, in addition to claims for correction of inventorship of a patent, and claims under the Lanham Act for trademark infringement and false and misleading advertising.

Netlist's claims were tried to a jury, with the exception of its UCL claim. Netlist now seeks a permanent injunction based on violation of the UCL. In accordance with the jury's verdict, and after considering all of the testimony, documentary evidence,[1] and arguments of counsel presented during and after trial, the Court makes the following findings of fact and conclusions of law:

PROCEDURAL BACKGROUND

1. Netlist moved for and was granted a preliminary injunction, which commenced on January 12, 2015. The preliminary injunction and was stayed by the Federal Circuit on March 26, 2015.

2. A jury trial commenced on March 9, 2015. Both parties presented witness testimony and the Court admitted documentary and physical exhibits.

3. On March 25, 2015, the jury returned its verdict in favor of Diablo on the claims for breach of contracts, trade secret misappropriation, and correction of inventorship, and in favor of Netlist on its claims of trademark infringement and Lanham Act false advertising. (Dkt. No. 420.) The jury's verdict provided as follows:

On Netlist's Claims for Breach of Contract:

a. Netlist and Diablo entered into a contract referred to as the Mutual Non-Disclosure Agreement.
b. Diablo did not breach the Mutual Non-Disclosure Agreement.
c. Netlist was not harmed by Diablo's conduct with respect to the Mutual Non-Disclosure Agreement.
d. Netlist and Diablo entered into a contract referred to as the Development and Supply Agreement.

e. Diablo did not breach the Development and **[*5]** Supply Agreement.
f. Netlist was not harmed by Diablo's conduct.

On Netlist's Claim for Misappropriation of Trade Secrets:

g. None of the eight alleged trade secrets was "secret" information.

On Netlist's Claim for Correction of Inventorship:

h. Netlist did not prove that Dr. Hyun Lee should be added as a named inventor of the '917 patent.

On Netlist's Claim for Trademark Infringement

---

[1] The Court SUSTAINS the objections of Netlist (Dkt. No. 452) and **STRIKES** the Declaration of Lou Marchant, Senior Solution Sales Executive for Lenovo (United States), Inc. (Dkt. No. 450-3), as well as the brief and Declaration of Steven J. Corr filed on behalf **[*4]** of Non-parties SanDisk Corporation and Smart Storage Systems, Inc. (Dkt. No. 448, 449).

i. Netlist proved its claim for trademark infringement against Diablo and was entitled to nominal damages in the amount of $1.00.

On Netlist's Claim for False and Misleading Advertisement

j. Netlist proved its claim for false and misleading advertisement against Diablo and was entitled to nominal damages in the amount of $1.00.

4. Upon motion by Diablo and full briefing by the parties, as well as the parties' arguments at the hearing on April 24, 2015, the Court dissolved the preliminary injunction in light of the jury's verdict, by order issued April 24, 2015.

5. Remaining for decision by the Court is Netlist's claim under *California Business & Professions Code section 17200* ("UCL claim").

6. Netlist's post-trial briefing rests its UCL claim entirely on the theory that Diablo breached the parties' Supply Agreement and that the breach gave Diablo a "head start" which constitutes **[*6]** "unfair" competitive conduct in violation of the UCL. Based on this theory, Netlist contends that it is entitled to a permanent injunction for a period of 10 months and 27 days enjoining the manufacture and sale of Diablo's Rush and Bolt chips, and any integrated circuits derived from or based on the current versions of the Rush and Bolt chips.

7. Netlist asserts that the Court may "set aside the jury's erroneous breach of contract verdict based on Netlist's reserved 50(a) motion or its forthcoming 50(b) motion for judgment as a matter of law." (Dkt. No. 446 at 3 n.1.). The Court denied all the parties' oral Rule 50(a) motions (TR 1982:2-13). The Court declined to rule on Netlist's written Rule 50(a) motion filed at the close of all the evidence in the case in favor of waiting for a jury verdict. (TR 1969-70.) The Court has no Rule 50(b) motion before it at this time.[2]

FINDINGS OF FACT

1. Netlist is a Delaware corporation with its principal place of business at 175 Technology Drive, Irvine, California 92618. The company was founded in 2000 by C.K. "Chuck" Hong, Christopher Lopes and Jay Bhakta. The company's mission is to create high performance memory products technologies for the computing industry.

2. Defendant Diablo is a Canadian corporation with its principal place of business at 80 Aberdeen Street, Suite 401, Ottawa, Ontario, K1S 5R5, Canada. It is a developer of customized semiconductor memory chips for the computing server industry.

3. Netlist and Diablo entered into a Mutual Non-Disclosure Agreement on March 20, 2008, to discuss a possible collaboration between the two companies. (Exh. 25.)

4. Netlist and Diablo entered into a Development and Supply Agreement ("Supply Agreement") with an effective date of September 10, 2008. (Exh. 53.)

5. By its verdict, the jury found that there was no breach **[*8]** of either the Mutual Non-Disclosure Agreement or the Supply Agreement. (Jury Verdict, Dkt. No. 420, at 2.)

CONCLUSIONS OF LAW

---

[2] The Court follows the "desirable" practice of refraining from ruling on a 50(a) motion until the jury has returned a verdict, in favor of a renewed 50(b) motion post-verdict. ***Therrell v. Georgia Marble Holdings Corp., 960 F.2d 1555, 1569 (11th Cir. 1992)*** quoting 9 Charles A. Wright & Arthur R. Miller, Federal Practice and Procedure § 2533, at 586 (1971) ("the appellate courts have repeatedly said that it is usually desirable to take **[*7]** a verdict, and then pass on the sufficiency of the evidence on a post-verdict motion"). The Court notes that no briefing or hearing schedule on the written Rule 50(a) motion was ever set, nor was one sought by Netlist. Remaining issues can be raised in a Rule 50(b) motion.

The UCL authorizes the Court to "make such orders or judgments... as may be necessary to prevent the use or employment by any person of any practice which constitutes unfair competition, as defined in this chapter, or as may be necessary to restore to any person in interest any money or property, real or personal, which may have been acquired by means of such unfair competition." *Cal. Bus. & Prof. Code § 17203*. Because a UCL claim is equitable in nature, the Court, rather than a jury, must decide whether there was a UCL violation. *Bradstreet v. Wong, 161 Cal.App.4th 1440, 1458, 75 Cal. Rptr. 3d 253 (2008)*. "[I]n a case where legal claims are tried by a jury and equitable claims are tried by a judge, and the claims are 'based on the same facts,' in deciding the equitable claims 'the *Seventh Amendment* requires the trial judge to follow the jury's implicit or explicit factual determinations.'" *Los Angeles Police Protective League v. Gates, 995 F.2d 1469, 1473 (9th Cir. 1993)* (quoting *Miller v. Fairchild Indus., 885 F.2d 498, 507 (9th Cir. 1989)*, *cert. denied*, *494 U.S. 1056, 110 S. Ct. 1524, 108 L. Ed. 2d 764 (1990))*.

A "common law violation such as breach of contract is insufficient," standing alone, to support a UCL claim. *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1044 (9th Cir. 2010)*. "A breach of contract claim...may only form the basis of a *section 17200* [UCL] claim if the breach itself is 'unlawful, unfair, or fraudulent.'" *Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal.App.4th 638, 645, 72 Cal. Rptr. 3d 903 (2008)*.

Under the UCL, an "unfair" act is **[*9]** one which "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law." *Cel-Tech Commc'ns v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. In determining what is "unfair" under the UCL, courts look to parallel provisions in the Federal Trade Commission Act, *15 U.S.C. § 45(a)*, particularly where the claims at issue allege unfair competition between business competitors. *Id. at 185*. The "antitrust laws... were enacted for the protection of *competition*, not *competitors*." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (internal citations omitted) (emphasis in original). Thus, "injury to a competitor is not equivalent to injury to competition," and standing alone does not establish an "unfair" act under the UCL. *Cel-Tech, 20 Cal. 4th at 186*. Rather, a *Section 17200* claim based on the unfair prong must "be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Id. at 186-87*; *see also* *Marolda v. Symantec Corp., 672 F. Supp. 2d 992, 1005 (N.D. Cal. 2009)* ("breach of contract claim...could constitute an unfair business practice... [where it alleged] systematic breach of contract and unauthorized renewal of obsolete products [that] would directly and serious impact competition in defendant's industry"). "[W]hen the plaintiff is a direct competitor of the defendant and invokes **[*10]** *Section 17200*'s 'unfair' prong, the word 'unfair'... means conduct that... otherwise significantly threatens or harms competition." *Worldwide Travel, Inc. v. Travelmate US, Inc., 2015 U.S. Dist. LEXIS 28517, 2015 WL 1013704, at *11 (S.D. Cal. 2015)* (internal citations omitted).

Here, the Court does not disturb the jury's findings that Diablo did not breach the Supply Agreement and accepts those findings for the UCL claim. It follows from the jury's findings that Netlist cannot establish the threshold showing of a predicate breach of contract for purposes of relief under the UCL.

CONCLUSION

Netlist failed to establish a predicate breach of contract to support its UCL claim. Consequently, Diablo is entitled to have judgment entered in its favor on Netlist's UCL claim. The Court will enter judgment on this claim, as well as the others decided by the jury's verdict, forthwith.

It Is So Ordered.

Dated: April 24, 2015

/s/ Yvonne Gonzalez Rogers

Hon. Yvonne Gonzalez Rogers

UNITED STATES DISTRICT JUDGE

JUDGMENT

On March 25, 2015, the jury rendered its verdict in awarding Plaintiff Netlist, Inc. ("Netlist") nominal damages on its claims against Defendant Diablo Technologies, Inc. ("Diablo") under the Lanham Act for trademark infringement and false and misleading advertising. The jury found in favor of Diablo on all other claims **[*11]** submitted to it. On April 24, 2015, based on the verdict, the Court found in favor of Diablo on Netlist's equitable claim for violation of *California Business & Professions Code § 17200 et seq.* ("UCL"). Therefore,

IT IS ORDERED, ADJUDGED AND DECREED that Diablo shall pay to Netlist the sum of $2.00 for liability under the Lanham Act for trademark infringement and false and misleading advertising.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that judgment shall be entered in favor of Diablo and against Netlist, and that Netlist shall take nothing, on its claims for misappropriation of trade secrets, breach of contracts, violation of the UCL, and correction of inventorship of a patent.

IT IS SO ORDERED.

Opinion

OPINION AND ORDER

In this civil action for declaratory and injunctive relief, plaintiff Woodman's Food Market, Inc. alleges that defendants The Clorox Company and The Clorox Sales Company ("Clorox") have violated the price discrimination provisions of the Robinson-Patman Act, *15 U.S.C. § 13(a)*, *(d)* and *(e)*, by offering to sell "large pack" products only to "club" retailers such as Costco and Sam's Club and not "general market" stores like Woodman's. In an order entered on February 2, 2015, I denied Clorox's motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, finding that even though Clorox legally may refuse to deal with a particular retailer, the use of special packaging and package sizes to benefit only certain customers stated a claim sufficient to survive front-end **[*2]** dismissal. Dkt. 50. Since then, things have zigged and zagged a bit:

On February 24, 2015, Clorox unilaterally chose to end all business dealings with Woodman's. That same day, Clorox moved to dismiss Woodman's complaint as moot because Woodman's no longer was a purchaser of its products and therefore could not suffer any further alleged discrimination. Dkt. 63. Woodman's opposes that motion, arguing that it remains a "purchaser" under the act because now it will buy Clorox products through one or more wholesalers. Dkt. 69. In addition, Woodman's now seeks to amend its complaint to add claims under *§ 1 of the Sherman Act*. Dkt. 68. Clorox rejoins that its decision to terminate its business relationship with Woodman's has deprived this court of subject matter jurisdiction in this case, which in turn prevents the court from granting Woodman's leave to amend.

Because Woodman's has shown that it may still qualify as a purchaser with standing under the Act, I am denying Clorox's motion to dismiss and granting Woodman's motion for leave to file an amended complaint.

OPINION

I. Legal Standard

As an initial matter, the parties dispute how the court should characterize Clorox's pending motion to dismiss. **[*3]** Clorox contends that the complaint is moot, but it does not identify in its motion or brief which rule of civil procedure it is relying on. Woodman's apparently construed the motion as a *Rule 12(b)(6)* motion to dismiss for failure to state a claim and argues that the motion should be converted to a motion for summary judgment under *Rule 12(d)* because Clorox relies on matters outside the pleadings.

In its reply brief, Clorox states that it is moving for dismissal for lack of subject matter jurisdiction under *Rule 12(b)(1)* and may rely on affidavits and other materials supporting its motion. *See* *United Phosphorus Ltd. v. Angus Chem. Co., 322 F.3d 942, 946 (7th Cir. 2003)*; *Sapperstein v. Hager, 188 F.3d 852, 855 (7th Cir. 1999)* ("[W]here evidence pertinent to subject matter jurisdiction has been submitted . . . the district court may properly look beyond the jurisdictional allegations of the complaint . . . to determine whether in fact subject matter jurisdiction exists.") (internal quotation marks and citation omitted). The Court of Appeals for the Seventh Circuit has made clear that "[f]ederal courts lack subject matter jurisdiction when a case becomes moot." *Pakovich v. Verizon LTD Plan, 653 F.3d 488, 492 (7th Cir. 2011)*. Therefore, Clorox's motion is properly characterized as a motion brought pursuant to *Rule 12(b)(1)*, and it is unnecessary to convert the motion to a motion for summary judgment under *Rule 12(d)*.

II. Analysis

Clorox contends that Woodman's **[*4]** action for declaratory and injunctive relief[1] has become moot because Clorox has ended its customer relationship with Woodman's, a decision that Clorox says was within its rights under the Robinson-Patman Act, *15 U.S.C. § 13*. *See* *Harper Plastics, Inc. v. Amoco Chemicals Corp., 617 F.2d 468, 470-71 (7th Cir. 1980)* (agreeing with district court that the Act does not prohibit seller from choosing its customers or from refusing to deal with purchasers to whom it does not wish to sell); *Mullis v. Arco Petroleum Corp., 502 F.2d 290, 294 (7th Cir. 1974)* (statute does not require seller to create or maintain customer relationship with any buyer). Therefore, contends Clorox, no live controversy remains in this lawsuit because Woodman's cannot claim protection under *§§ 13(d)* and *(e)* of the Act because only a "purchaser" may do so. *Harper Plastics, 617 F.2d at 470-71*; *see also* *Wisconsin Right to Life State Political Action Comm. v. Barland, 664 F.3d 139, 149 (7th Cir. 2011)* ("A case must present a live controversy at the time of filing, contain a live dispute through all stages of litigation, and the parties must continue to have a personal stake in the outcome of the lawsuit throughout its duration.). Extending that reasoning, Clorox contends that without continuing jurisdiction, the court cannot even grant Woodman's leave to amend its complaint to add a separate claim under the Sherman Act.

Generally, a case may become moot where the defendant **[*5]** has completely discontinued the challenged activity, the discontinued activity has no present effects, and the defendant can demonstrate that there is no reasonable expectation that the wrong will be repeated. *Chicago United Indus., Ltd. v. City of Chicago, 445 F.3d 940, 947 (7th Cir. 2006)*; 13C Charles Alan Wright, Arthur R. Miller & Edward H. Cooper, *Federal Practice & Procedure* § 3533.5 (3d ed. 2013). Clorox points out that because it has ceased all sales to Woodman's, there no longer is any danger that it will sell to Woodman's on discriminatory terms. Woodman's responds that notwithstanding this freeze-out,

---

[1] Woodman's does not seek monetary damages in this case.

Woodman's continues to be a purchaser within the meaning of the Act because it continues to purchase Clorox products through one or more wholesalers. Dkt. 71 (affidavit of Woodman's procurement director).

The two price discrimination provisions at issue in this case prohibit certain actions by sellers with respect to promotions offered to their buyers. Although *§ 13(d)* refers to "customers" and *§ 13(e)* refers to "purchasers" in describing who is protected by the Act, the two terms are used interchangeably. *16 C.F.R. § 240.4* ("The word 'customer' which is used in section 2(d) of the Act includes 'purchaser' which is used in section 2(e)."); Areeda Hovenkamp, XIV ***Antitrust Law*** ¶ 2363b (3d ed. 2012). Woodman's points out **[*6]** that in the *Guides for Advertising Allowances and Other Merchandising Payments and Services*, the Federal Trade Commission (FTC) has broadly defined a "customer" to include "any person who buys for resale directly from the seller, or the seller's agent or broker" and "any buyer of the seller's product for resale who purchases from or through a wholesaler or other intermediate reseller." *16 C.F.R. § 240.4*. Clorox contends that the guidelines are not entitled to deference because the commission has stated that they "do not carry the force of law," *79 Fed. Reg. 58245, 58253 (Sept. 29, 2014)*; multiple agencies share responsibility for enforcing the Robinson-Patman Act, creating a risk that the same statutory provision will be interpreted differently by different agencies, *Rapaport v. U.S. Dep't of Treasury, Office of Thrift Supervision, 59 F.3d 212, 216, 313 U.S. App. D.C. 216 (D.C. Cir. 1995)*; and the courts and not federal agencies are charged with interpreting broadly worded statutes. But even though the *Guides* may not have the force of law, they are instructive in this case, particularly in light of Supreme Court precedent on this issue.

Shortly before the FTC issued the guidelines in 1969, the Supreme Court addressed the definition of "customer" in *F.T.C. v. Fred Meyer, Inc., 390 U.S. 341, 88 S. Ct. 904, 19 L. Ed. 2d 1222 (1968)*. There, the seller had paid preferential promotional allowances to a direct-buying retailer but did not make the **[*7]** same allowances available to retailers that purchased through wholesalers. The Court found that the seller's program should have made comparable allowances, presumably through the wholesalers, to the indirect purchasers:

> If we were to read "customer" as excluding retailers who buy through wholesalers and compete with direct buyers, we would frustrate the purpose of s 2(d). We effectuate it by holding that the section includes such competing retailers within the protected class.
>
> *F.T.C. v. Fred Meyer, Inc., 390 U.S. 341, 351, 88 S. Ct. 904, 19 L. Ed. 2d 1222 (1968)*.

Woodman's seeks—but does not obtain—additional support from a decision by the Court of Appeals for the Sixth Circuit in which the court discussed the reach of the *Fred Meyer* decision in a case where both the favored and disfavored parties purchased through intermediaries. *Lewis v. Philip Morris Inc., 355 F.3d 515 (6th Cir. 2004)*. In *Lewis*, cigarette vending machine operators, some of whom purchased indirectly through wholesalers, alleged that Phillip Morris offered promotions directly to convenience stores but did not offer any such promotions to the vending machine operators, either directly or indirectly through the wholesaler. Although Woodman's cites language from *Lewis* that appears to grant standing to the cigarette vendors who purchased through wholesalers, this **[*8]** is not the court's actual holding. The opinion in *Lewis* was entered per curiam by a sharply divided panel. Although the majority confirmed *Fred Meyer*'s definition of the term "customer" in *§§ 13(d)* and *(e)*, it actually refused to grant standing to the cigarette vendors who purchased through wholesalers. The majority found that an action cannot be maintained where both the favored and disfavored parties are indirect purchasers. *Id. at 526-27*. Thus the Sixth Circuit "would limit *Fred Meyer* to its actual situation—namely, where the defendant offered [promotions] to a large retailer who purchased directly but failed to offer them either to a wholesaler intermediary, or to the retailer customers of that intermediary." Hovenkamp ¶ 2363d2 at p. 291. That said, Woodman's overselling of *Lewis* is of no consequence to this court's analysis because the facts here align more tightly with the facts in *Fred Meyer*. Woodman's alleges that Clorox offers special packaging to large club stores that purchase directly from Clorox but fails to offer the same special packaging to general market stores like Woodman's, even when they purchase Clorox products through wholesalers.

Clorox posits without elaboration that *Fred Meyer* and **[*9]** *Lewis* are distinguishable because neither case involved a seller's refusal to deal directly with a customer. Without more, it is unclear how this distinction would have made a difference in either case. The Supreme Court explained in *Fred Meyer* that

> We hold only that, when a supplier gives allowances to a direct-buying retailer, he must also make them available on comparable terms to those who buy his products through wholesalers and compete with the direct buyer in resales. Nothing we have said bars a supplier, consistently with other provisions of the antitrust laws, from utilizing his wholesalers to distribute payments or administer a promotional program, so long as the supplier takes responsibility, under rules and guides promulgated by the Commission for the regulation of such practices, for seeing that the allowances are made available to all who compete in the resale of his product.
>
> *Fred Meyer, 390 U.S. at 358*.

If the wholesalers from which Woodman's now purchases Clorox products are constrained by Clorox's decision to sell large-size products only to club stores, then the rule announced in *Fred Meyer* would apply to Woodman's. *See also* Hovenkamp ¶ 2363d2 at p. 289 ("*Fred Meyer* stands for the proposition **[*10]** that a seller's duty to provide proportionally equal promotional services or facilities, or payment therefor, extends downstream to buyers competing with each other at the same functional level, even if one set of buyers purchases directly from the defendant while another set purchases through intermediaries.").

Because it is possible that Woodman's can be considered a "customer" and "purchaser" with standing under the act, at least at this early stage in the litigation, Clorox is not entitled to have this lawsuit dismissed. To the extent that Clorox has additional bases to challenge whether Woodman's qualifies as a purchaser given the specific facts of this case, Clorox may raise these points at summary judgment or trial after the parties have had an opportunity to develop the record.

III. Motion for Leave to Amend Complaint

Clorox opposes Woodman's motion for leave to amend solely on the ground that the case became moot when Clorox stopped selling to Woodman's on February 24, 2015, thereby depriving the court of subject matter jurisdiction. On March 17, 2015, Woodman's notified Clorox that it intended to file an amended complaint, but Clorox asked Woodman's to delay filing the proposed **[*11]** amended complaint so that the parties could attempt settlement. In return, Clorox agreed not to challenge the motion to amend as untimely. Because I have found that the case is not moot and there is no other apparent reason for denying Woodman's leave to amend, I will grant leave. *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)* ("In the absence of any apparent or declared reason—such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc.—the leave sought should, as the rules require, be 'freely given'"); *Fed. R. Civ. P. 15(a)(2)* ("court should freely give leave [to amend] when justice so requires").

ORDER

IT IS ORDERED that:

(1) Defendants' motion to dismiss this lawsuit for lack of subject matter jurisdiction, dkt. 63, is DENIED; and,

(2) Plaintiff's motion for leave to amend its complaint, dkt. 68, is GRANTED.

Entered this 27th day of April, 2015.

Opinion

ARLEO, UNITED STATES DISTRICT JUDGE

This matter comes before this Court on Defendant's Motion to Dismiss Plaintiff's Amended Complaint for failure to state a claim, pursuant to *Federal Rule of Civil Procedure 12(b)(6)* [Dkt. No. 34]. The Court decides the motion without oral argument pursuant to *Federal Rule of Civil Procedure 78* and *Local Civil Rule 78.1*. For the reasons set forth below, the motion is **GRANTED**.

I. FACTS

This dispute concerns a textbook manufacturer's policy requiring that its textbooks and other educational materials must be shipped by the manufacturer, a policy stringently objected to by a delivery service. The manufacturer here, Defendant Houghton Mifflin Harcourt Publishing Company ("Defendant"), sells and ships educational materials throughout the United States, including in New Jersey, and controls approximately 38% **[*2]** of the market share in the national K12 educational material market. Am. Compl. at 1 ¶ 2, 4 ¶ 4, 5 ¶ 5. The delivery service, Plaintiff Debjo Sales, LLC ("Plaintiff"), was founded in 2007 with the goal of entering into agreements with school districts to pick up and deliver textbooks ordered by such districts from Defendant. Id. at 2 ¶ 3.

It is unclear whether Plaintiff succeeded. Plaintiff had agreements with multiple school districts in New Jersey to pick up school books from Defendant and deliver them to the school districts. Id. at 6 ¶ 2. Plaintiff was also recently awarded "a Time and Materials contract through Educational Data Services, Inc., for 650 school districts in New Jersey and 150 school districts in New York," which approved Plaintiff's services for use by school districts throughout New Jersey and New York. Id. at 4 ¶ 2. However, whether Plaintiff was paid for these agreements, the agreements' terms, when these agreements began, and whether these agreements constituted enforceable contracts is never stated in the Amended Complaint.

The disputed policy change was implemented by Defendant on or around July 3, 2014. Id. at 2 ¶ 5. Beginning on that date, Defendant required all orders under $500,000 to be **[*3]** shipped by Defendant and charged a 5% handling fee for orders over $500,000 that were picked up by customers. Id. This allegedly prevents schools from negotiating the best price for delivery of textbooks or from choosing different modes of delivery when purchasing Defendant's books. Id. at 2 ¶ 6, 4 ¶ 3. Defendant was able to charge 10.5% of the total order when it shipping its books, even though usual shipping prices are approximately 5% for this service. Id. at 3 ¶ 7.

Defendant's policy change "caused damage" to Plaintiff's agreements with at least twenty-three schools, which Plaintiff lists in its Amended Complaint. Id. at 7 ¶ 3. Plaintiff also alleges that some agreements with school districts were "nullified" or "rendered nullities" by Defendant's policy change. Id. at 3 ¶ 8, 5 ¶ 6. Other than to say that several of its agreements were damaged or nullified, Plaintiff does not explain the effect of Defendant's policy change. On at least one occasion, a school district wrote Defendant and informed it that Plaintiff was to deliver its purchases. Id. at 6 ¶ 2.

Plaintiff now sues on four counts: illegal tying in violation of the Sherman Act *§ 1*,[1] intentional interference with contract, unjust enrichment, and tortious interference **[*4]** with contractual relations. Defendant moves to dismiss these counts as inadequately pled. Because Plaintiff has failed to plead adequate facts to state a claim under any of these causes of action, the Court dismisses Plaintiff's Amended Complaint without prejudice to Plaintiff's right to refile.

II. Standard of Review

In considering a *Rule 12(b)(6)* motion to dismiss on the pleadings, the court accepts as true all of the facts in the complaint and draws all reasonable inferences in favor of the plaintiff. *Phillips v. Cnty. of Allegheny, 515 F.3d 224, 231 (3d Cir. 2008)*. Moreover, dismissal is inappropriate even where "it appears unlikely that the plaintiff can prove those facts or will ultimately prevail on the merits." Id.

The facts alleged, however, must be "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The allegations in the complaint "must **[*5]** be enough to raise a right to relief above the speculative level." Id. Accordingly, a complaint will survive a motion to dismiss if it provides a sufficient factual basis such that it states a facially plausible claim for relief. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

---

[1] Though Plaintiff also mentions *N.J.S.A. 56:9-3* in its pleading, the New Jersey statute's language is virtually identical to the first statement of the Sherman Act, and each party's briefing analyzes Plaintiff's claims only under *Section 1* of the Sherman Act. This Court therefore analyzes this count solely under *Section 1* of the Sherman Act, *15 U.S.C. § 1*.

The Court must here detour from its description of routine and universally-accepted pleading standards to address Plaintiff's reliance on the rejected "no set of facts" pleading standard of *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. Conley was explicitly abrogated by Twombly, which stated that Conley's "no set of facts" statement "has earned its retirement" and "is best forgotten as an incomplete, negative gloss on an accepted pleading standard . . . ." *Twombly, 550 U.S. at 563*. Plaintiff makes much of the fact that this is an antitrust case, so the pleading standard should be lower. But Twombly was an antitrust case. Id. Under current law, Plaintiff must plead facts sufficient to render a cause of action plausible. *Id. at 557*.

III. ANALYSIS

A. Antitrust Violation (Count I)

1. Antitrust Standing

Private parties may only bring antitrust claims if they have antitrust standing. Under current law, competitors or consumers of the defendant in the relevant market have antitrust standing. See *Ethypharm S.A. Fr. v. Abbott Labs., 707 F.3d 223, 233 (3d Cir. 2013)* (dismissing claim for lack of standing because **[*6]** "antitrust injury . . . is limited to consumers and competitors in the restrained market and to those whose injuries are the means by which the defendants seek to achieve their anticompetitive ends") (citation and internal quotation marks omitted).

Defendant argues that Plaintiff has failed to allege facts sufficient to show that it is a competitor or consumer. Plaintiff argues that it was a competitor because it had "contractual agreements" which were nullified or damaged by Defendant's policy change, and its business model of delivery service for educational materials was rendered inoperable by Defendant's policy change. Am. Compl. at3 ¶ 8, 5 ¶ 6, 6 ¶ 2.

In Barton & Pittinos, the Third Circuit amalgamated the Supreme Court's analysis in *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, into a formulation of factors that are relevant for this Court to consider when antitrust standing is challenged:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, **[*7]** which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 181 (3d Cir. 1997). Considering these factors, the Court finds Plaintiff has antitrust standing.

Under factor one, although Plaintiff has demonstrated a causal connection between the antitrust violation and harm to Plaintiff—the change in policy substantially decreased the value proposition of Plaintiff's service—it has failed adequately to plead facts showing that Defendant intended to cause the harm. The second factor weighs strongly in favor of Plaintiff. Using market power in one product to preclude competition in a distinct product to the disadvantage of the consumer is precisely the concern antitrust tying restrictions are designed to address. Directness of injury is less clear. The chain of causation between the policy and harm to Plaintiff is not attenuated, but Plaintiff's failure adequately to allege that enforceable contracts existed before Defendant's policy change and were invalidated by that change render any injury somewhat **[*8]** speculative. Factor four slightly supports Plaintiff, as there are unlikely to be more direct victims of a delivery policy change than Plaintiff, a company which specializes in delivery. Finally, the potential for duplicative recovery here, though present due to the alleged harm to school districts, does not excessively complicate this dispute, and so does not weigh strongly in either direction.

On balance, the Court finds that the Barton factors indicate that Plaintiff has antitrust standing due to the combination of the causal connection of harm under the theory alleged, the type of injury of which Plaintiff complains, and the lack of powerful mitigating factors counseling a contrary finding.

Defendant argues that Plaintiff does not have antitrust standing because it failed to show injury to competition rather than merely to a competitor. The Court again disagrees.

Defendant cites to Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc. for support. *429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. But Brunswick was decided on a drastically different fact pattern. There, the disputed conduct increased competition in bowling centers, and a competing bowling center sued to recover lost profits due to the increased competition. *Id. at 488*. On those facts, **[*9]** the plaintiff did not have antitrust standing.

This case is quite different. Plaintiff does not allege a pro-competitive action that harms only it. The alleged conduct here—prohibiting or imposing high fees on third-party shipping—has a plainly anticompetitive effect, and Defendant does not argue otherwise. This dispute is one for which antitrust laws were made: preventing the tying of unrelated products by a market leader to decrease competition. As such, Plaintiff has antitrust standing.

2. Tying

Though Plaintiff has standing to bring an antitrust claim, it still must plead facts sufficient to state a claim in order to survive a motion to dismiss. The antitrust claim here alleges that Defendant tied distinct products or services, in violation of the Sherman Act, *15 U.S.C. § 1*. To prove a per se tying violation, Plaintiff must allege facts plausibly showing that: "(1) a defendant seller ties two distinct products; (2) the seller possesses market power in the tying product market; and (3) a substantial amount of interstate commerce is affected . . . ." *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 477 (3d Cir. 1992)*; see also *Marchese v. Cablevision Sys. Corp., No. 10-2190, 2012 U.S. Dist. LEXIS 2799, 2012 WL 78205, at *2 (D.N.J. Jan. 9, 2012)*. Alternatively, Plaintiff may rely on the rule of reason by replacing the second prong above—market power—with proof that the defendant **[*10]** "unreasonably restrained competition in the tied product market." *Brokerage Concepts, Inc. v. U.S. Healthcare, Inc., 140 F.3d 494, 511 (3d Cir. 1998)*. In its threadbare Amended Complaint, Plaintiff fails adequately to plead any of these components.[2]

a. Distinct Products

Defendant argues that no alleged facts indicate that K-12 educational materials and delivery of the same are separate and distinct articles of commerce. The Court agrees.

Tying products (or services) together only violates ***antitrust law*** if the products are separate and distinct. Products are distinct where there is sufficient demand for each product separately to make it efficient for a firm to provide the

---

[2] As a preliminary matter, the Court rejects Defendant's argument that control over delivery of one's own product can never violate antitrust tying laws. The cases Defendant cites do not support that proposition. Rather, they simply hold that a company must have an economic interest in the alleged tie to violate tying laws. See *Crawford Transp. Co. v. Chrysler Corp., 338 F.2d 934, 939 (6th Cir. 1964)* (Chrysler did not violate antitrust tying laws by requiring its cars to be shipped through approved shipping companies because it had no financial interest in and received no profit from the shipping companies); *Venzie Corp. v. U.S. Mineral Prods. Co., 521 F.2d 1309, 1317-18 (3d Cir. 1975)* ("The absence of a direct interest in the tied product market leaves open the possibility of a nonpredatory justification for requiring sales only through Armstrong and distinguishes this situation from the solely anti-competitive arrangements which have been branded as per se antitrust violations."); *Carl Sandburg Vill. Condo. Ass'n No. 1 v. First Condo. Dev. Co., 758 F.2d 203, 207 (7th Cir. 1985)* ("[A]n illegal tying arrangement will not be found where the alleged tying company has absolutely no economic interest in the sales of the tied seller, whose products are favored by the tie-in."). **[*11]** Here, by contrast, Defendant has an economic interest. Defendant allegedly receives substantial remuneration from its policy—either a 10.5% fee for direct delivery or a 5% fee if a third party is used. Am. Compl. at 2 ¶ 5, 3 ¶ 7. Delivery of one's own product is not categorically exempt from antitrust laws.

products separately. See *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("For service and parts to be considered two distinct products, there must be sufficient consumer demand so that it is efficient for a firm to provide service separately from parts."); *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 21-22, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (there must be "sufficient demand for the purchase of [the tied product] separate from [the tying product] to identify a distinct product market in which it is efficient to offer [the tied product] separately from [the tying product]."). In this case, **[*12]** therefore, Plaintiff must allege facts sufficient to show that consumer demand for delivery of educational materials makes it efficient to separate the materials from their delivery.

Plaintiff's only relevant factual allegation is that at least one school district told Defendant that Plaintiff would deliver the books. That is not enough. Alone, that does not show consumer demand, much less sufficient demand to make separation of the materials and their delivery efficient. Plaintiff also alleges it had agreements with school districts to pick up and drop off books, Am. Compl. at 6 ¶ 2, but the content and number of these agreements is left to the imagination, so these allegations do not show sufficient consumer demand for delivery of the textbooks. Plaintiff has thus not adequately alleged facts demonstrating that K-12 educational materials and their delivery are separate and distinct products.[3]

b. Market Power or Unreasonable Restraint of [*13] Competition

Defendant argues that Plaintiff has failed adequately to plead that Defendant has market power because (1) Defendant's market share is insufficient, as a matter of law, to show market power in the national K-12 educational materials market and (2) Plaintiff's alleged market is facially implausible.

i. Market Share

Defendant's first argument, that 38% is not enough market share to create market power, is unpersuasive. Defendant cites to several cases which indicate that 38% market share is insufficient to demonstrate a per se antitrust violation. See *Times-Picayune Pub. Co. v. U.S., 345 U.S. 594, 612-13, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)* (newspaper's 33%-40% share of advertising market insufficient to invoke per se rule); *Greene Cnty. Mem'l Park v. Behm Funeral Homes, Inc., 797 F. Supp. 1276, 1287 (W.D. Pa. 1992)* (funeral home with 33%-43% of alleged market insufficient to constitute per se violation). But these cases were not decided on a motion to dismiss. Because the effect of market share on market power varies from industry to industry, this Court cannot conclude at this stage that 38% market share is insufficient to plead market power. See *United States v. Columbia Steel Co., 334 U.S. 495, 528, 68 S. Ct. 1107, 92 L. Ed. 1533 (1948)* ("The relative effect of percentage command of a market varies with the setting in which that factor is placed."). Taking all inferences in favor of the Plaintiff, the Court finds that Plaintiff's allegation **[*14]** that Defendant has 38% market share is sufficient plausibly to infer that Defendant has market power here.[4]

ii. Market Definition

Plaintiff's allegation of 38% market share, however, means nothing if the market is not plausibly defined. The Amended Complaint does not provide facts sufficient to make a K-12 educational materials market plausible.

---

[3] Any renewed pleading must provide facts which show consumer demand for delivery of educational materials independent from the materials' sale, such that it would be efficient for a firm to separate purchase of educational materials from their delivery.

[4] Though Defendant also challenges the accuracy of Plaintiff's statistics concerning Defendant's market share, this is a factual dispute, and so is misplaced at this stage of the case.

When considering the relevant product market, courts examine whether products are reasonably interchangeable by the consumer for the same purpose. *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (considering "commercial realities" and reasonable interchangeability to determine the relevant market); *United States v. Grinnell Corp., 384 U.S. 563, 584, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* (using reasonable interchangeability to distinguish central station monitoring from watchmen services or audible alarms); *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* (stating that "[t]he market is composed of products that have reasonable interchangeability").

Plaintiff's alleged product market of K-12 educational materials is facially implausible without additional facts. A kindergarten textbook is not interchangeable with a high school textbook. The Court does not **[*15]** here conclude that this product market is impossible-it is conceivable that school districts purchase these materials as a unit and that consistent practice indicates that demand for these products is not split into discrete units based on educational level. Plaintiff, however, has failed to allege any facts sufficient to support a finding of a K-12 educational materials market.

Plaintiff's national geographic market is also unsupported by any alleged facts. When considering the relevant geographic market, courts identify "the area in which a potential buyer may rationally look for the goods or services he or she seeks." *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 726 (3d Cir. 1991)*; see also *Grinnell, 384 U.S. at 570-71*.

Here, there are no alleged facts indicating that school districts look to publishers across the nation when purchasing educational materials. Again, the Court does not conclude such a market is impossible, only that Plaintiff has failed to plead any facts providing support for Plaintiff's geographic market definition.

Without a plausible relevant market (both geographic and product), the Court cannot determine that Plaintiff alleges that Defendant has market power.

iii. Unreasonable Restraint on Competition

Though Plaintiff has not pled market power, its claim **[*16]** may proceed under rule of reason analysis if Plaintiff has adequately alleged that Defendant unreasonably restrained competition. See *Brokerage Concepts, Inc., 140 F.3d 494, 511 (3d Cir. 1998)*. Plaintiff does not so plead. Indeed, the Amended Complaint contains no facts regarding the reasonableness of Defendant's policy change. In the absence of any facts showing an unreasonable restraint on competition, Plaintiff cannot rely on rule of reason analysis here to survive a motion to dismiss.

c. Substantial Effect on Interstate Commerce

Defendant also argues that Plaintiff has failed sufficiently to allege a substantial effect on interstate commerce. The Court agrees.

In tying cases, "[P]laintiffs [must] show a substantial and adverse effect on commerce." *Cardio-Med. Assoc., Ltd. v. Crozer-Chester Med. Ctr., 721 F.2d 68, 72 (3d Cir. 1983)*. "[S]ubstantiality of effect . . . is to be viewed on a case-by-case, practical economic basis, from the perspective of whether the local activity has a significant impact on competition in commerce and whether the commerce so affected is substantial in volume." Id. (quoting *Harold Friedman, Inc. v. Thorofare Markets Inc., 587 F.2d 127, 132 (3d Cir. 1978))*.

The only relevant allegation in the Amended Complaint is that Defendant is a national company that ships textbooks throughout the nation. Am. Compl. at 5 ¶ 5. Though this implicates interstate commerce, it does not show a "substantial and adverse effect" **[*17]** on such commerce. Nor does Plaintiff's allegation concerning Defendant's market share satisfy the substantial-effects pleading requirement. The pleadings do not aver the size of the textbook delivery service market or even the market for K-12 educational materials generally. The Court declines to speculate in the absence of a pleading that provides some basis from which to infer a substantial effect on interstate commerce. Plaintiff therefore fails adequately to plead that Defendant's actions have a substantial effect on interstate commerce.

For the reasons mentioned above—Plaintiff's failure to plead facts adequate plausibly to show (1) distinct products, (2) market power over the relevant market or unreasonable restraint on competition in violation of the rule of reason, and (3) a substantial effect on interstate commerce—Plaintiff's Amended Complaint is dismissed without prejudice as to Count I.

B. Tortious Interference with Contractual Relationships (Counts II and IV)[5]

To plead tortious interference with contractual relations, Plaintiff must provide facts sufficient reasonably to infer: "(1) actual interference with a contract; (2) that the interference was inflicted intentionally by a defendant who is not a party to the contract; (3) that the interference was without justification; and (4) that the interference caused damage." *Dello Russo v. Nagel, 358 N.J. Super. 254, 268, 817 A.2d 426 (App. Div. 2003)*. Plaintiff does not do so here.

1. Contractual Relationships

Plaintiff fails to allege valid contracts with sufficient specificity to satisfy its burden to plead facts showing actual interference with a contract.

This case is similar to *Plasticware, LLC v. Flint Hills Res., LP, 852 F. Supp. 2d 398 (S.D.N.Y 2012)*. In Plasticware, the plaintiff alleged it had "agreements" with its customers, without providing specifics about any of those agreements. *Id. at 404*. The court held that plaintiff's failure to "allege[] adequate details about a specific contract" justified dismissal of the claim for **[*19]** tortious interference with contractual relationships. Id. Many other cases agree. See *Only v. Ascent Media Grp., LLC, No. 06-2123, 2006 U.S. Dist. LEXIS 72676, 2006 WL 2865492, at *8 (D.N.J. Oct. 5, 2006)* (general allegations that plaintiff had valid contractual relationships were insufficient to identify existing contracts with required specificity to state a claim for tortious interference under New Jersey law); *Commerce Ins. Servs. v. Szczurek, No. 05-3565, 2006 U.S. Dist. LEXIS 515, at *26-27 (D.N.J. Jan. 6, 2006)* (dismissing a claim for tortious interference when complaint failed to identify existing contracts).

Here too, Plaintiff has alleged only that it had "contractual agreements" or "agreements" with various entities. Plaintiff provides a list of twenty-three school districts with which it had "agreements," but does not provide adequate specifics concerning these agreements. As an example of this deficiency, it is not clear whether any of these agreements were actual paying contracts. Plaintiff also fails to identify the date any of these agreements became effective, so it is unclear whether any of these agreements predate the policy change. Given the ambiguity of Plaintiff's Amended Complaint, the Court finds that Plaintiff has failed to identify valid relevant contracts with reasonable specificity.

2. Intentionality

Plaintiff also fails to provide any facts plausibly **[*20]** indicating that Defendant changed its policy to harm Plaintiff intentionally.

---

[5] Count II, "intentional interference with contract," and Count IV, "tortious interference with contract," are pled almost identically and, insofar as is relevant to this opinion, appear to apply the same law. See *Norwood-Jeb, L.L.C. v. N. River Mews Assocs., L.L.C., No. 1259-07T3, 2009 N.J. Super. Unpub. LEXIS 1558, 2009 WL 1010963, at *9 (N.J. Super. App. Div. Apr. 15, 2009)* **[*18]** (analyzing an "intentional interference with contract" claim under "tortious interference with contractual rights"). Plaintiff does not contest Defendant's characterization that these counts are identical, in law and in fact, so the Court analysis applies to both.

Interference is intentional when "the actor desires to bring it about or if he knows that the interference is certain or substantially certain to occur as a result of his action." *Dello Russo, 358 N.J. Super. at 268*; *Cargill Global Trading v. Applied Dev. Co., 706 F. Supp. 2d 563, 575 (D.N.J. 2010)*. Plaintiff's only relevant allegation is that Defendant's intent to harm Plaintiff is "evidenced by the fact" that the change in policy "was enacted at the commencement of plaintiff's busiest shipping season of the year." Am. Compl. at 8 ¶ 4. It is not plausible to infer that Defendant intended to hurt Plaintiff based solely on the fact that the timing of the disputed policy change hurt Plaintiff. This element is not sufficiently pled.

3. Lack of Justification or Excuse

In the context of intentional interference with contractual relationships, Plaintiff must allege malice—i.e. intentionally inflicting harm without justification or excuse. See *Lamorte Burns & Co. v. Walters, 167 N.J. 285, 306, 770 A.2d 1158 (2001)*. A "bare recital that Defendants' alleged interference was carried out with 'malice' falls short" of the required allegations to sustain a claim under this count. *Mu Sigma, Inc. v. Affine, Inc., No. 12-1323, 2013 U.S. Dist. LEXIS 99538, 2013 WL 3772724, at *5 (D.N.J. July 17, 2013)* (citation omitted). Thus, irrespective of other deficiencies, Plaintiff's allegations here fail unless Plaintiff alleges that **[*21]** Defendant had no justification or excuse for its policy change.

Plaintiff makes no such allegation. Defendant, for its part, identifies several justifications for its policy change—including unrecovered costs due to inept external shipping companies. Because Plaintiff does not plead that Defendant changed its policy without any justification, this claim must be dismissed.

The Court dismisses Counts II and IV without prejudice.

C. Unjust Enrichment (Count III)

To plead unjust enrichment, Plaintiff "must show both that defendant received a benefit and that retention of that benefit without payment would be unjust." *VRG Corp. v. GKN Realty Corp., 135 N.J. 539, 554, 641 A.2d 519 (1994)*. Plaintiff must also show that Plaintiff "expected remuneration from the defendant at the time it performed or conferred a benefit on defendant and that the failure of remuneration enriched defendant beyond its contractual rights." Id. Plaintiff's Amended Complaint fails to plead these requirements.

Under New Jersey law, unjust enrichment cannot provide an independent tort claim. *Castro v. NYT Television, 370 N.J. Super. 282, 299, 851 A.2d 88 (App. Div. 2004)* ("[T]he role of unjust enrichment in the law of torts is limited for the most part to its use as a justification for other torts such as fraud or conversion."); *Nelson v. Xacta 3000 Inc., No. 08-5426, 2009 U.S. Dist. LEXIS 109580, 2009 WL 4119176, at *7 (D.N.J. Nov. 24, 2009)* ("New Jersey law does not recognize unjust **[*22]** enrichment as an independent tort cause of action"). Thus, the only basis on which Plaintiff could theoretically rely for an independent cause of action for unjust enrichment is a contractual relationship between the Plaintiff and Defendant. Plaintiff does not allege any such relationship here. Facially, then, the unjust enrichment claim in this case has no basis under New Jersey law and must be dismissed.

The unjust enrichment claim must be dismissed on yet another basis. In an unjust enrichment claim, the plaintiff must be the party who provides the benefit to the defendant. See *Eli Lilly & Co. v. Roussel Corp., 23 F. Supp. 2d 460, 496 (D.N.J. 1998)* (unjust enrichment claim failed to state a claim "because [plaintiff] had not alleged (nor could it prove) that it conferred a benefit on defendants"). The benefit that Defendant allegedly received from its change of policy was approximately 10% in delivery fees. Plaintiff did not pay that money to Defendant, nor does it confer any benefit upon Defendant in any meaningful way. Plaintiff may be injured here, but there is no doubt that, as pled, Plaintiff does not confer any benefit on Defendant. Because of these deficiencies, the Court dismisses Plaintiff's unjust enrichment claim without prejudice to Plaintiff's **[*23]** right to refile.

IV. CONCLUSION

For the foregoing reasons, this Court dismisses Plaintiff's Amended Complaint in its entirety without prejudice to Plaintiff's right to refile within twenty-one days. Plaintiff is on notice of the defects with its current complaint. If these defects are not remedied in any subsequent pleading, the Court will deny further amendment as futile. An appropriate Order accompanies this Opinion.

Date: April 29, 2015

Hon. Madeline Cox Arleo

UNITED STATES DISTRICT JUDGE

ORDER

This matter comes before the Court on Defendant Houghton Mifflin Harcourt Publishing Company's ("Defendant") Motion to Dismiss Plaintiff Debjo Sales, LLC's ("Plaintiff") Amended Complaint [Dkt. No. 34]. For the reasons articulated in this Court's accompanying Opinion,

IT IS on this 29th day of April, 2015,

ORDERED that Defendant's Motion to Dismiss is hereby **GRANTED** without prejudice to Plaintiff's right to move to replead by **May 21, 2015**.

Opinion by: ROBERT T. NUMBERS, II

Opinion

Memorandum & Recommendation

Plaintiff Gary Swanson is currently the defendant in four criminal matters pending in North Carolina Superior Court related to the alleged violation of the terms of a domestic violence protective order. While being held in pre-trial detention in the New Hanover County Detention Facility, Swanson filed a Complaint against the State of North Carolina. He claims that local law enforcement violated his civil rights and federal anti-trust law in the course of his arrest and prosecution. Swanson seeks an order dismissing the criminal proceedings against him and monetary damages from the State of North Carolina for the alleged violations of his rights.

Pursuant to the Prison Litigation Reform Act, the court is required to review complaints filed by prisoners[1] which raise claims against "governmental entity or officer or employee of a governmental entity." *28 U.S.C. § 1915A(a)*. The court is required to identify any cognizable claims contained in the complaint and dismiss any portion of the complaint that is frivolous, malicious, fails to state a claim upon which **[*2]** relief may be granted, or seeks monetary relief against a party who is immune from such relief. *Id.* at *§ 1915(b)*. By reviewing prisoner complaints,

[1] Although Swanson is a pre-trial detainee, his Complaint is still subject to screening under the PLRA. *Section 1915A(c)* defines prisoner to include "any person incarcerated or detained in any facility who is accused of, convicted of, sentenced for, or adjudicated delinquent for, violations of criminal law...."

the courts are attempting to effectuate "Congress' dual goals of reducing prisoner litigation and, at the same time, preserving meaningful access to the courts for prisoners with potentially meritorious claims." *McLean v. United States, 566 F.3d 391, 400 (4th Cir. 2009)*.

Here, it is appropriate for the court to dismiss Swanson's Complaint in its entirety. Under the *Younger* abstention doctrine, the court should decline to exercise jurisdiction over his request that the court enjoin or dismiss the criminal actions pending against him in North Carolina Superior Court. His claim for monetary relief against the State of North Carolina must also be dismissed because the state is not amenable to suit under *Section 1983*. Finally, Swanson's allegations of a violation of anti-trust law must be dismissed because it is completely lacking in factual **[*3]** support. The court will address each of these claims in more detail below.

Initially, Swanson seeks an order from this court which would require the State of North Carolina to dismiss the criminal proceedings pending against him. However, under the *Younger* abstention doctrine, federal courts should refuse to inhibit the progress of state criminal proceedings "if there is (1) an ongoing state judicial proceeding, instituted prior to any substantial progress in the federal proceeding; that (2) implicates important, substantial, or vital state interests; and (3) provides an adequate opportunity for the plaintiff to raise the federal constitutional claim advanced in the federal lawsuit." *Nivens v. Gilchrist, 319 F.3d 151, 154 (4th Cir. 2003)*.

All three *Younger* factors are satisfied in this case. First, Swanson's Complaint indicates that there are multiple ongoing state criminal proceedings that were filed well before he initiated this action. Second, "North Carolina has a very important, substantial, and vital interest in preventing violations of its criminal laws." *Id. at 154*. Finally, Swanson has an adequate opportunity to raise issues related to his allegations of coercion and unreasonable searches and seizures in the state court action. Therefore, **[*4]** the court should decline to exercise jurisdiction over Swanson's request that the court require the dismissal of the criminal claims pending against him in North Carolina's General Courts of Justice and it is recommended that the district court dismiss Swanson's claim for injunctive relief.

Swanson's Complaint also seeks monetary relief from the State of North Carolina under *42 U.S.C. § 1983*. *Section 1983* provides for liability against "every person" who, under color of state law, violates a plaintiff's constitutional rights. However, the State of North Carolina is not amenable to suit under *Section 1983* because it is not a "person" within the meaning of that statute. *Will v. Michigan Dep't of State Police, 491 U.S. 58, 109 S. Ct. 2304, 105 L. Ed. 2d 45 (1989)*. *See* *Kentucky v. Graham, 473 U.S. 159, 165, 105 S. Ct. 3099, 87 L. Ed. 2d 114 (1985)*. Therefore, the court should dismiss Swanson's claim for monetary relief because he has failed to state a claim against the State of North Carolina.

Finally, Swanson claims that the State should be held liable for violations of federal ***antitrust law***. However, the Complaint fails to include any factual allegations whatsoever that would establish such a violation. This claim should also be dismissed. *See* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (holding that to state a claim a complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on **[*5]** its face.'")

Therefore, it is recommended that the district court dismiss Swanson's claim for injunctive relief without prejudice due to lack of subject matter jurisdiction and dismiss his remaining claims with prejudice due to failure to state a claim upon which relief may be granted.

Judges: NICHOLAS G. GARAUFIS, United States District Judge.

Opinion by: NICHOLAS G. GARAUFIS

Opinion

MEMORANDUM

I. INTRODUCTION

Following a lengthy bench trial, the court issued Findings of Fact and Conclusions of Law (the "Decision") on February 19, 2015, finding that the Non-Discrimination Provisions (the "NDPs") maintained by American Express Company and American Express Travel Related Services Company (collectively, "Defendants," "American Express," or "Amex") constitute an unlawful restraint on trade under *Section 1* of the Sherman Act, *15 U.S.C. § 1*. (Decision (Dkt. 619).) Pursuant to a Scheduling Order also issued on February 19, 2015 ("Scheduling Order") (Dkt. 620), **[*16]** the parties made submissions to the court concerning the proper scope of permanent injunctive relief in this case. (See Joint Submission as to Remedy ("Joint Submission") (Dkt. 621); Pls.' Mem. in Supp. of Proposed Final J. ("Gov't's Br.") (Dkt. 622); Defs.' Mem. of Law in Supp. of Defs.' Proposed Final J. ("Defs.' Br.") (Dkt. 623); Pls.' Reply Mem. in Supp. of Proposed Final J. ("Gov't's Reply") (Dkt. 626); Defs.' Reply Mem. of Law in Further Supp. of Defs.' Proposed Final J. ("Defs.' Reply") (Dkt. 627).) The Government and Defendants each submitted proposed remedial orders (see Gov't's Proposed J. (Joint Submission, App. 1 (Dkt. 621-1)); Defs.' Proposed J. (Joint Submission, App. 2 (Dkt. 621-2))), as well as an appendix reflecting a comparison of the two proposals (see Joint Submission, App. 3 (Dkt. 621-3)). In addition, the court granted leave to two sets of non-party merchants and to merchant Southwest Airlines to submit comments concerning the proposed remedy. (See Not. by Non-Party Merchants Concerning Proposed Remedy (Dkt. 631); Not. by Class Pls. in 11-MD- 2211 (E.D.N.Y.) Concerning Gov't's Proposed J. (Dkt. 634); Not. by Southwest Airlines Regarding Proposed Relief (Dkt. 635).) **[*17]** With leave of court, American Express and the Government each filed consolidated responses to the three merchant comments. (See Pls.' Mem. in Reply to Non-Party Filings Regarding Remedy (Dkt. 636); Resp. of Defs. to Non-Party Comments (Dkt. 637).)

Having considered the submissions, including the specific remedies proposed by the Government and American Express, and on the basis of the well-developed factual record introduced during the trial, the Court issues this Memorandum to explain certain of the provisions contained in the Order Entering Permanent Injunction as to the American Express Defendants (the "Permanent Injunction") that the court enters concurrently with this Memorandum.

As the court has explained on numerous occasions, the court believes that given the complexity of the general purpose credit and charge card network services industry, "the parties themselves are likely best equipped to determine how American Express's merchant regulations might be rewritten so as to satisfy American Express's interests and yet comport with the Sherman Act." (Scheduling Order at 2.) The court therefore encouraged the parties to jointly propose a remedy. (See id. at 1-3.) Unfortunately, as demonstrated **[*18]** by the competing proposed orders, the parties have reached only limited common ground. Thus, the court must resolve numerous disputes, concerning both core and collateral issues. This Memorandum explains the reasoning behind the court's resolution of the parties' core disputes.[1]

As discussed more fully below, with some exceptions and with certain modifications, the court generally adopts proposals made by the Government and rejects competing proposals made by Defendants. Although the court invited American Express to play an active role in the construction of the Permanent Injunction, American Express's core proposals were, considering the record before the court, too narrow or unwieldy to effectuate the remedial objectives of a permanent injunction under the Sherman Act. Through its proposals, American Express would have the court ignore the Supreme Court's guidance in the antitrust context that:

> [t]he District Court is not obliged to assume, contrary to common experience, that a violator **[*20]** of the antitrust laws will relinquish the fruits of his violation more completely than the court requires him to do. And advantages already in hand may be held by methods more subtle and informed, and more difficult to prove, than those which, in the first place, win a market. When the purpose to restrain trade appears from a clear violation of law, it is not necessary that all of the untraveled roads to that end be left open and that only the worn one be closed.

Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 698, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978) (quoting *Int'l Salt Co. v. United States, 332 U.S. 392, 400, 68 S. Ct. 12, 92 L. Ed. 20 (1947))*.

The Permanent Injunction is designed to eliminate the consequences of Defendants' past violation of the Sherman Act and to encourage a functional and fair market in the future. It is structured to clarify which rights merchants now have, and confirms which powers American Express retains. The Permanent Injunction contains detailed notice provisions to ensure that Amex-accepting merchants receive notification of the changes to the NDPs and of their nascent ability to steer customers toward particular credit card brands. It also contains thorough compliance provisions to guarantee that American Express meets its obligations and changes its perception of and response to steering by merchants. The court does not seek **[*21]** to punish Defendants or to impose punitive terms upon them, and the court is cognizant of the fact that the implementation of the Permanent Injunction will require Defendants to expend significant efforts and to alter the ways in which they engage with merchants. This result flows from the findings contained in the court's Decision, and is a result that the Sherman Act is designed to provide.

II. LEGAL STANDARD

In an antitrust case, "courts have an obligation, once a violation of the antitrust laws has been established, to protect the public from a continuation of the harmful and unlawful activities." *United States v. Parke, Davis & Co., 362 U.S. 29, 48, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*. An antitrust remedy should "pry open to competition a market that has been closed by defendants' illegal restraints." *Int'l Salt Co. v. United States, 332 U.S. 392, 401, 68 S. Ct. 12, 92 L. Ed. 20 (1947)*, abrogated on other grounds by *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28,*

---

[1] This Memorandum does not provide a detailed explanation for the court's resolution of less significant disputes between the parties. These include the court's adoption of the Government's proposed definition of "Merchant" (see Permanent Injunction § I.M), adoption of the Government's proposed provision authorizing exclusive-steering agreements between Amex and merchants under certain circumstances (see Permanent Injunction §§ III.B.3, IV.D), adoption (as modified by the court) of American Express's proposed provision confirming its right to steer cardholders toward particular merchants (see Permanent Injunction § III.B.6), adoption (as modified by the court) of the Government's proposed provisions governing notice to merchants of the court's Decision and Permanent Injunction (see Permanent Injunction § IV.C), rejection of American Express's proposed definition of "Rule" (see Defs.' Proposed J. § I.22), rejection **[*19]** of American Express's proposed provision regarding marketing benefits and other services (see Defs.' Proposed J. § III.B.6), and rejection of American Express's proposal that would have required merchants engaging in steering to provide notice to Amex (see Defs.' Proposed J. § III.B.9). Finally, the court notes that while it has drawn largely from the parties' proposals, it has also made its own additions and subtractions to the language, including adjustments to certain time periods.

126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006). The remedy should seek "both to avoid a recurrence of the violation and to eliminate its consequences," Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 697, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978), and to "cure the ill effects of the illegal conduct, and assure the public freedom from its continuance," United States v. U.S. Gypsum Co., 340 U.S. 76, 88, 71 S. Ct. 160, 95 L. Ed. 89, 1951 Dec. Comm'r Pat. 580 (1950). See also Ford Motor Co. v. United States, 405 U.S. 562, 573, 92 S. Ct. 1142, 31 L. Ed. 2d 492 (1972) ("The relief in an antitrust case must be 'effective to redress the violations' and 'to restore competition.'" (quoting United States v. E.I. du Pont de Nemours & Co., 366 U.S. 316, 326, 81 S. Ct. 1243, 6 L. Ed. 2d 318 (1956))). The relief ordered should be based "on some clear 'indication of a significant causal connection **[*22]** between the conduct enjoined or mandated and the violation found directed toward the remedial goal intended.'" United States v. Microsoft Corp., 253 F.3d 34, 105, 346 U.S. App. D.C. 330 (D.C. Cir. 2001) (quoting 3 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 653(b) (1996)). The punishment of a defendant for its prior transgressions is not, however, a proper remedial purpose. See, e.g., Hartford-Empire Co. v. United States, 323 U.S. 386, 409, 65 S. Ct. 373, 89 L. Ed. 322, 1945 Dec. Comm'r Pat. 607 (1945) ("[W]e may not impose penalties in the guise of preventing future violations."). Thus, the remedy should not "adopt overly regulatory requirements which involve the judiciary in the intricacies of business management." New York v. Microsoft Corp., *224 F. Supp. 2d 76, 100 (D.D.C. 2002)* (citing United States v. Paramount Pictures, 334 U.S. 131, 163, 68 S. Ct. 915, 92 L. Ed. 1260 (1948)), aff'd sub. nom Massachusetts v. Microsoft Corp., 373 F.3d 1199, 362 U.S. App. D.C. 152 (D.C. Cir. 2004).

Absent an adequate remedy in an antitrust case, the Government may have "won a lawsuit [but] lost a cause." Int'l Salt, 332 U.S. at 401. Accordingly, district courts "are invested with large discretion to model their judgments to fit the exigencies of the particular case." Int'l Salt, 332 U.S. at 400-01. It "is entirely appropriate" for an antitrust remedy to "go[] beyond a simple proscription against the precise conduct previously pursued." Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 698. A district court thus has "broad power to restrain acts which are of the same type or class as unlawful acts which the court has found to have been committed or whose commission in the future unless enjoined, may fairly be anticipated from the defendant's conduct **[*23]** in the past.'" Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 132, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969) (quoting N.L.R.B. v. Express Publ'g Co., 312 U.S. 426, 435, 61 S. Ct. 693, 85 L. Ed. 930 (1941)). "[I]t is well settled that once the Government has successfully borne the considerable burden of establishing a violation of law, all doubts as to the remedy are to be resolved in its favor." F. Hoffmann-La Roche Ltd v. Empagran S.A., 542 U.S. 155, 171, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004) (quoting E.I. du Pont de Nemours, 366 U.S. at 334)).

More generally, as Defendants emphasize in their submissions, a court entering a permanent injunction in any case must not misuse its equitable powers under Rule 65 of the Federal Rules of Civil Procedure. See Fed. R. Civ. P. 65(d); City of New York v. Mickalis Pawn Shop, LLC, 645 F.3d 114, 144 (2d Cir. 2011) ("Although a district court has 'a wide range of discretion in framing an injunction in terms it deems reasonable to prevent wrongful conduct,' it is nonetheless 'the essence of equity jurisdiction' that a court is only empowered 'to grant relief no broader than necessary to cure the effects of the harm caused by the violation.'" (quoting Forschner Group v. Arrow Trading Co., 124 F.3d 402, 406 (2d Cir. 1997))). While the Second Circuit has warned, generally, that "[i]njunctive relief should be narrowly tailored to fit specific legal violations" and "should not impose unnecessary burdens on lawful activity," Waldman Publ'g Corp. v. Landoll, Inc., 43 F.3d 775, 785 (2d Cir. 1994) (citation omitted), in the antitrust context, the Supreme Court has made clear that a court issuing an antitrust remedy is authorized to constrain a defendant's otherwise protected conduct, see, e.g., Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 697-98 ("In fashioning a remedy, the District Court may, of course, consider the **[*24]** fact that its injunction may impinge upon rights that would otherwise be constitutionally protected, but those protections do not prevent it from remedying the antitrust violations."); F.T.C. v. Nat'l Lead Co., 352 U.S. 419, 430, 77 S. Ct. 502, 1 L. Ed. 2d 438 (1957) ("[D]ecrees often suppress a lawful device when it is used to carry out an unlawful purpose.").

III. DISCUSSION

The court now turns to the core disputes between the parties concerning the scope of the Permanent Injunction. Although the parties have agreed on certain definitions and provisions, the most significant aspects of the remedy require judicial resolution.

A. The NDPs

In its Scheduling Order, the court invited the parties to propose new language for the NDPs, noting that "[f]ashioning appropriate relief in this case will require certain of the provisions in the NDPs to be excised entirely," while "[i]t may be possible . . . for other challenged clauses to be revised, amended, or recharacterized in such a way that considers the interests of both Plaintiffs and Defendants." (Scheduling Order at 2.) The Government's proposed judgment not only identifies language that, in the Government's view, must be excised, but also proposes affirmative contractual language informing merchants of their right to engage in steering. (See **[*25]** Gov't's Proposed J. § V.B.) American Express, on the other hand, argues that the Government's proposal to include specific changes to the contractual language is "unnecessary," since "American Express will be subject to the Final Judgment that is entered in this case and . . . will have every incentive to ensure that it remains in compliance with that order." (Defs.' Br. at 49.) American Express further argues that its "able transactional counsel," and not the court or the Government, "are in the best position to draft the specific language that would be necessary to effectuate the Court's order while protecting American Express's legitimate business interests." (Id.; see also id. ("American Express has not found any precedent in which a Court unilaterally made specific, wide-ranging edits to a firm's contractual language as part of a final judgment in a Section 1 case.").)

The court agrees in part with the Government and in part with Defendants. After years of litigation between the parties (in addition to ongoing litigation between American Express and non-party merchants), a remedy that does not identify specific contractual language that is no longer enforceable merely kicks the can down the proverbial road. The Permanent Injunction must, at a minimum, identify the language currently contained in the NDPs rendered unenforceable by the court's Decision. Thus, in **[*26]** § IV.B of the Permanent Injunction, the court identifies language, currently contained in the NDPs, that is no longer enforceable.

The court does not, however, find it appropriate, for lack of a better phrase, to put words into American Express's mouth. Thus, the Permanent Injunction does not mandate Amex to include specific language in its contracts with merchants. (Compare, e.g., Permanent Injunction § IV.B.2 (striking unenforceable language), with Gov't's Proposed J. § V.B.2 (proposing that Amex include affirmative language in contracts notifying merchants of their right to steer and providing examples of such steering).) Other provisions of the Permanent Injunction ensure that (1) merchants will be aware of their rights, and (2) American Express will not undermine the remedy by including improper or overly restrictive language in its revised contracts. First, all merchants will receive ample notice of the court's Decision and Permanent Injunction (see Permanent Injunction § IV.C), and any merchant that is terminated by Amex or threatened with termination will receive additional notice (see Permanent Injunction § IV.F). Second, whenever American Express plans to implement changes **[*27]** to the way it regulates merchants' acceptance of other brands of credit cards or of debit cards, it must provide notice to the Government. (See Permanent Injunction § IV.H.)

In one, limited context, the court does include specific language that American Express may include in its contracts with merchants without violating the terms of the Permanent Injunction. (See Permanent Injunction § IV.B.4.) Pursuant to § III.B.5 of the Permanent Injunction, American Express remains authorized to require a merchant engaged in steering to indicate, in a limited manner, its acceptance of American Express. See also infra Part III.D.1. Thus, where the NDPs before required all merchants communicating payment methods to customers to "display [Amex] Marks according to [its] guidelines and as prominently and in the same manner as any Other Payment Products," Amex's merchant contracts can still (if Amex chooses) require merchants that engage in steering to "post limited signage at the point of sale (including online or on mobile services) or store entry or communicate orally that the Merchants accept [Amex]." (See Permanent Injunction § IV.B.4.) As discussed in more detail below, this language strikes an **[*28]** appropriate balance between allowing merchants to effectively steer, and protecting Defendants' legitimate interest in requiring merchants who steer away from Amex to at least inform customers that they also accept American Express.[2] As with other provisions of its merchant contracts, Amex is authorized to instead draft alternative language that comports with the Permanent Injunction, upon notice to the Government. (See Permanent Injunction § IV.H.) The court includes affirmative contractual language in § IV.B.4 to provide the parties a "safe harbor" of acceptable language concerning merchant signage and oral communications.

B. Boundaries of Permitted Steering

The parties sharply dispute the boundaries of permitted merchant steering. American Express argues that, based on the court's Decision and the trial record, steering should be allowed only to a "Less Expensive General Purpose Card," as determined on a transaction-by transaction basis. In other words, **[*29]** under Amex's proposal, steering would be allowed only if the merchant—using a calculation of "All-In Merchant Fee" supplied by Defendants—determines that for the particular transaction, accepting the customer's particular non-Amex-branded credit card would cost the merchant less money. In addition, under Amex's proposal, the Permanent Injunction would not protect a merchant's right to steer to products outside of credit and charge card products, including debit cards. In response, the Government argues that Amex's "Less Expensive Card" and transaction-based approach would undermine the remedy and allow Defendants, rather than merchants, to determine when a merchant may steer. In addition, the Government argues that although the court's Decision held that the relevant market for purposes of its market power analysis excludes debit cards, allowing steering only between general purpose credit and charge cards "would only deter merchants from engaging in steering in the first place, including steering among general purpose cards, and would hinder restoration of competition among general purpose card networks." (Gov't's Br. at 14.) Accordingly, the Government proposes a remedy that would **[*30]** allow steering to any "Form of Payment," a term defined by the Government to include cash, check, debit, "or any other means by which Customers pay for goods or services." (See Gov't's Proposed J. § II.I.)

For the reasons discussed below, the court rejects American Express's proposals that steering be permitted only on a transaction-by-transaction basis and only to a "Less Expensive General Purpose Card." In addition, although the court agrees that the implementation of an effective remedy in this case must allow a merchant to steer, in certain circumstances, to brands of debit, the court rejects the Government's overly broad proposal that the remedy also protect steering to other forms of payment, such as cash and check.[3]

1. Amex's "Less Expensive General Purpose Card" Proposal

Amex argues that the "Decision—and the Government's entire theory of competitive effects—is premised on the theory that merchants need the ability to steer to lower cost [general purpose credit and charge] cards to enhance competition **[*31]** among the [general purpose credit and charge] card networks for merchant business." (Defs.' Br. at 9.) While true that in most instances, rational merchants will want to steer customers toward credit cards that cost them less money to accept, it is not American Express's right to perform such a calculation, or to force merchants to make such a calculation on the basis of American Express's pre-defined terms. The trial record demonstrated that merchants are able to make price comparisons, and that certain merchants care about non-price features, such as speed of pay or treatment of refunds. In other words, as the court noted in its Decision, "the law does not permit American Express to decide on behalf of the entire market which legitimate forms of interbrand competition should be available and which should not." (Decision at 136.) Cf. *F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 452, 106 S.*

[2] In addition, the court did not strike from the NDPs language that makes clear that American Express can require all merchants to indicate their acceptance of Amex whenever a customer affirmatively asks what forms of payment are accepted.

[3] Of course, other sources of law outside of the scope of the Permanent Injunction, such as the Durbin Amendment to the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, may protect certain forms of steering to certain forms of payment. (See generally Decision at 30-31.)

Ct. 2009, 90 L. Ed. 2d 445 (1986) ("The [defendant] is not entitled to pre-empt the working of the market by deciding for itself that its customers do not need that which they demand.").[4]

2. Amex's Transaction-Based Approach

In tandem with its "Less Expensive General Purpose Card" proposal, Amex posits that "the only way to ensure that merchants are steering to lower cost cards, and thereby acting in a manner consistent with the Court's . . . Decision, is to require that the cost comparison be done at the transaction level." (Defs.' Br. at 11.) Again, Amex seeks to continue its control of merchant decision-making, rather than to allow merchants to decide what is best for themselves. It is the merchant's prerogative to determine whether to steer on a general, brand level (and increase its own costs for those transactions where it happens to steer to a particular Visa card that ultimately costs more to accept than the customer's Amex card), or whether to steer on a transactional basis. The trial record and the Decision include many examples of general, brand-specific steering, and a limitation on steering to the level of a specific, anticipated transaction would severely undermine the remedy.

3. Steering to Debit Brands

The parties dispute whether American Express should be permitted to bar merchants from steering customers toward debit cards and other forms of **[*33]** payment, such as cash and check. American Express argues that, "consistent with the Court's market definition findings, . . . the conduct that the Court's remedy should redress has nothing to do with non-[general purpose credit card] payment forms," such as debit. (Defs.' Br. at 17, 19.) The Government responds that "Amex has no basis for demanding the right, unavailable to Visa or MasterCard, to block merchants from attempting to steer customers to payment forms outside the relevant market, including to particular brands of those payment forms." (Gov't's Br. at 13.)

As reflected in § III.A of the Permanent Injunction, the court has determined that in order to implement an effective remedy in this case—in other words, "to allow Merchants to attempt to influence the General Purpose Cards that a Customer uses by providing choices and information in a competitive market"—merchants must be allowed to steer toward particular brands of debit cards, in addition to steering between brands of credit cards. (Permanent Injunction § III.A.) The Permanent Injunction does not, however, expressly protect steering to other forms of payment, such as cash and check, although other sources of law provide **[*34]** such protection in certain circumstances.

The court acknowledges, as Amex emphasizes, that it determined in its Decision that debit and credit network services comprise separate markets. (See Decision at 37-61.) However, the mere fact that debit cards are not part of the general purpose credit and charge card network services market does not mean that the court lacks the power to include brands of debit cards within the scope of the Permanent Injunction. In tailoring the terms of the remedy to this particular case, a pragmatic approach is necessary. The fact of the matter is that the major brands of credit cards (such as Visa and MasterCard) also sponsor debit cards—it is therefore impossible for merchants to effectively steer between brands of credit without the authority to, in certain cases, in effect steer a customer toward a debit card. Under American Express's proposal, a merchant would be constrained to state that it "prefers Visa credit cards," or that customers who use "MasterCard credit cards" receive an upgrade. But a merchant may want to steer by stating simply that it "prefers Visa," or that customers who use a "MasterCard" receive an upgrade, or even by prominently displaying just the **[*35]** Discover logo. Excluding brands of debit cards from the scope of the permitted steering would chill merchant steering and could render illusory the rights provided by the Permanent Injunction. Thus, Amex cannot prohibit a merchant from posting a sign stating that it prefers a particular brand, where that brand name encompasses both credit and debit cards.[5]

---

[4] If American Express believes that merchants and/or consumers do not understand the true relative costs of accepting Amex credit cards compared to other credit cards, it is of course permitted to educate merchants and **[*32]** consumers.

[5] This is not the first case in which an antitrust injunction has covered a product not within the relevant market. See, e.g., Int'l Boxing Club of N.Y. v. United States, 358 U.S. 242, 262, 79 S. Ct. 245, 3 L. Ed. 2d 270 (1959) (upholding injunction that "went beyond the relevant market which has been considered for purposes of determining the Sherman Act violations," because "the

Finally, the court expressly does not include brands of debit cards within the scope **[*36]** of § III.A.7 of the Permanent Injunction. Thus, while a merchant has the right under the Permanent Injunction to communicate to customers the cost of accepting American Express, or the relative costs of accepting different brands of credit cards (and the merchant may do so on an average, rather than transaction-specific, basis), American Express can prohibit merchants from including costs associated with acceptance of debit cards in this calculation, since blending the costs of accepting credit cards and debit cards would likely overstate the difference between the merchant's overall cost of accepting American Express and its cost of accepting other brands, such as Visa and MasterCard, that have both credit and debit cards. (See Permanent Injunction § III.A.7; Defs.' Br. at 16-17.)

C. Termination of Merchants Engaged in Steering

Defendants seek an express provision in the Permanent Injunction that would "confirm . . . that American Express is entitled to exercise its right not to do or continue to do business with a merchant that chooses to steer Card Members away from its Cards." (Defs.' Br. at 26; see also Defs.' Proposed J. § III.B.8.) American Express relies on United States v. Colgate **[*37]** & Co., in which the Supreme Court stated that the Sherman Act "does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1910)*; see also, e.g., *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* ("A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." (citing *Colgate, 250 U.S. at 307*)); *United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 728-29, 64 S. Ct. 805, 88 L. Ed. 1024 (1944)* ("But in no instance has [Congress] indicated an intention to interfere with ordinary commercial practices. In a business, such as [defendant's], which deals in a specialty of a luxury or near-luxury character, the right to select its customers may well be the most essential factor in the maintenance of the highest standards of service.").

The Government responds that allowing American Express to terminate a merchant who opts to lawfully steer would amount to "explicit Court authorization" for Amex "to achieve the same anticompetitive objective that the Court condemned in its Decision." (Gov't's Br. at 14.) Even where the Supreme Court has recognized the Colgate doctrine, the Government argues, it has also described the breadth of the district court's equitable **[*38]** power and the authority of the district court to take "action [that] reasonably tends to dissipate the restraints and prevent evasions." *Bausch & Lomb, 321 U.S. at 726*.

The court recognizes that, in the abstract, Defendants' argument is appealing. But it would be an absurd result if the Colgate doctrine completely suppressed the district court's authority under the Sherman Act to issue appropriate relief, and thereby authorized Amex to continue, through its market power and a non-contractual "refusal to deal," the very practice deemed unlawful in the court's Decision.

In its Decision, the court concluded that one of American Express's core business practices—the maintenance and enforcement of the NDPs—violated the Sherman Act. Thus, American Express is not similarly situated to the general "manufacturer" or "trader" described in *Colgate*, and does not enjoy the same presumptive rights. In other words:

> The law violator who would oppose a remedy imposed against him as itself a violation of the law does not stand in the same position as an innocent party; those whom the court has found in the wrong may not oppose a remedy on the ground that it would constitute a wrong if leveled at a non-participant in the litigation. **[*39]** "In fashioning a remedy, the District Court may, of course, consider the fact that its injunction may impinge upon

---

relief [] must be broader than the [relevant market] because the evil to be remedied is broader." (internal quotation marks and alterations omitted)). Indeed, debit was included within the terms of the injunction in the Visa litigation, even though the court, like this one, determined that credit and debit comprised separate markets. See *United States v. Visa U.S.A., Inc., 163 F. Supp. 2d 322, 408 (S.D.N.Y. 2001)* ("Moreover, including debit as a necessary part of the remedy does not put it in the same product market with general purpose cards.").

> rights that would otherwise be constitutionally protected, but those protections do not prevent it from remedying" the violations.

United States v. Paradise, 480 U.S. 149, 193 n.3, 107 S. Ct. 1053, 94 L. Ed. 2d 203 (1987) (quoting Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 697-98). Thus, a district court has discretion under the Sherman Act "to decree relief effective to redress the violations, whatever the adverse effect of such a decree on private interests." E.I. du Pont de Nemours, 366 U.S. at 326; see also Nat'l Lead, 352 U.S. at 430 ("[D]ecrees often suppress a lawful device when it is used to carry out an unlawful purpose."). Indeed, the Supreme Court has previously approved of antitrust remedies that restricted a violator's rights, including First Amendment rights, see Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 698, and patent rights, see United States v. Glaxo Grp. Ltd., 410 U.S. 52, 58-60, 93 S. Ct. 861, 35 L. Ed. 2d 104 (1973) (holding that district court properly limited defendant's patent rights in antitrust injunction).

Here, the court found that the existence and enforcement of the NDPs was an anticompetitive restraint on trade; Colgate cannot stand for the proposition that a firm's ordinary right to refuse to deal is sacrosanct under circumstances where that firm could use its market power to impose the same exact harm on competition. Moreover, in its Decision, the court found that cardholder insistence significantly **[*40]** limits a merchant's ability to cease acceptance of American Express (see Decision at 71-78), and that Amex has actively monitored merchant activity and enforced the NDPs, including terminating merchants for steering (see id. at 31-32). In this particular case, and based on American Express's prior willingness to stop merchant steering at all costs, granting Amex's request for an unconditional right to refuse to deal would make the Government's vindication of the public's rights entirely illusory. Cf. Int'l Salt, 332 U.S. at 401 ("A public interest served by such civil suits is that they effectively pry open to competition a market that has been closed by defendants' illegal restraints. If [an antitrust] decree accomplishes less than that, the Government has won a lawsuit and lost a cause.")

The court also finds persuasive the reasoning of Toys "R" Us, Inc. v. FTC, 221 F.3d 928 (7th Cir. 2000), although, as Defendants note, there are differences between that case and this one. Like this case, which the court has previously described as "not fit[ting] neatly into the standard taxonomy of federal ***antitrust law***" (Decision at 34), Toys "R" Us involved a complicated series of vertical and horizontal agreements, in which Toys "R" Us (a traditional retailer) attempted to influence the business activities of toy **[*41]** manufacturers and the relationships between toy manufacturers and discount retailers. 221 F.3d at 930-35. An administrative law judge entered a remedy that, inter alia, prohibited Toys "R" Us from "refusing to purchase toys and related products from a supplier because, in whole or in part, that supplier offered to sell or sold toys and related products to any toy discounter." See id. at 939. Toys "R" Us argued to the administrative law judge (and again on appeal to the Seventh Circuit) that the remedy "trampled on its ability to exercise its rights under Colgate to choose unilaterally the companies with which it wanted to deal." Id. at 934. The Seventh Circuit rejected this argument, explaining that "unilateral actions of the sort protected by Monsanto and Colgate are not the same thing as a retailer's request to the manufacturer to change the latter's business practice." Id. at 939. In other words, the remedial order barred Toys "R" Us from "tell[ing] the manufacturer what to do," but still permitted Toys "R" Us "to decide which toys it want[ed] to carry and which ones to drop, based on business considerations such as the expected popularity of the item." Id. at 939-40. In addition, the Seventh Circuit explained that a remedial provision barring **[*42]** Toys "R" Us from refusing to deal with suppliers that also sold their products to discounters was proper under Colgate, since "[t]hese refusals to deal were the means [Toys "R" Us] used to accomplish the unlawful result, and as such, they are subject to regulation." Id. at 939, 940 (citing Nat'l Lead, 352 U.S. at 425).

Here, given Amex's market power, cardholder insistence, and Amex's prior enforcement of the NDPs, and given the court's "obligation, once a violation of the antitrust laws has been established, to protect the public from a continuation of the harmful and unlawful activities," Parke, Davis & Co., 362 U.S. at 48, the court agrees with the Seventh Circuit's reasoning in Toys "R" Us that a remedial order can, in this particular circumstance, limit a violator's right to refuse to deal without running afoul of Colgate. Of course, like Toys "R" Us, American Express remains free to terminate a merchant for reasons other than merchant steering; but, consistent with the court's findings that Amex has violated the Sherman Act, it is not free to dictate merchants' business practices (and perpetuate the status quo of merchants not engaging in steering) by threatening to refuse to deal with merchants who exercise their rights pursuant to the Permanent Injunction. **[*43]** Accordingly, the Permanent Injunction does not contain the provision American Express seeks.

In addition, Amex is concerned that it will risk violating the Permanent Injunction if it terminates a steering merchant for a reason other than steering; it also contends that a requirement of pre-termination notice to the Government is contrary to a public policy that favors termination of merchants engaged in illegal activities. (See, e.g., Defs.' Br. at 29-30 n.15 ("If American Express faces a contempt proceeding every time it cancels a merchant that also happens to be steering, American Express would uniquely be penalized for exercising cancellation rights even when cancellation would be required by law, regulation or prudent business judgment.").) The court is confident, however, that under the modified notice and reporting requirements imposed by the Permanent Injunction, Amex maintains its ability to terminate merchants for reasons other than steering, including where required by other applicable law. (See Permanent Injunction §§ IV.E (requiring quarterly reporting by Amex to Government of all terminations or suspensions and the reasoning for the actions), IV.F (requiring notice from **[*44]** Amex to any merchant it terminates or threatens with termination).) The court has rejected the Government's proposal that Amex give advanced notice to the Government whenever it plans to threaten or terminate a merchant that is engaged in steering, no matter the reason for the termination. (Compare Permanent Injunction § IV.F, with Gov't's Proposed J. § V.F.)

D. Additional Clarifications

1. Visa and MasterCard Consent Decree

The parties dispute the significance of the Visa and MasterCard Consent Decree previously entered in this case. (See Final J. as to Defs. MasterCard Int'l Inc. and Visa Inc. ("Consent Decree") (Dkt. 143).) Amex argues that because a court has greater flexibility in approving a proposed consent decree, "while withholding rights from American Express that were granted to Visa and MasterCard in the Consent Decree in this case would be inappropriately punitive, the fact that the decree with Visa and MasterCard includes certain restrictions on their activity cannot, on its own, form the basis for imposing those same restrictions on American Express." (Defs.' Br. at 7.) The Government, on the other hand, argues that "[a] settlement is often a compromise, and thus may encompass **[*45]** less relief than a litigated judgment." (Gov't's Reply at 4 (emphasis in original).) In other words, "when a consent decree is brought to a district judge, because it is a settlement, there are no findings that the defendant has actually engaged in illegal practices. It is therefore inappropriate for the judge to measure the remedies in the decree as if they were fashioned after trial." *United States v. Microsoft Corp., 56 F.3d 1448, 1460-61, 312 U.S. App. D.C. 378 (D.C. Cir. 1995)* (emphasis in original).

The court appreciates that in their submissions, both parties noted where their proposals parallel or differ from the Consent Decree, and the justifications for those parallels or differences. (See, e.g., Gov't's Br., Ex. 2 (table comparing each provision of the parties' proposed judgments to the Consent Decree); Defs.' Br. at 41 (arguing that compliance provisions from the Consent Decree are sufficient).) While the court recognizes the interplay between the Permanent Injunction and the Consent Decree, it also recognizes that the Permanent Injunction must be based on the evidence submitted at trial. The court further recognizes that American Express's business model differs in important ways from that of Visa and MasterCard. Thus, the Permanent Injunction parallels the Consent **[*46]** Decree in some respects, and deviates from the Consent Decree in other respects. The fact that the Permanent Injunction contains a provision that Amex opposes because it does not appear in the Consent Decree does not render such a provision "punitive" (see Defs.' Br. at 37); the fact that the Permanent Injunction contains a provision not in the Consent Decree that the Government opposes does not mean that Amex is inequitably granted rights not available to Visa and MasterCard (see, e.g., Gov't's Br. at 5 ("Thus, the judgment should not provide Amex with opportunities to restrict steering in ways Visa and MasterCard cannot and thus perpetuate the market impediments that this Court found unlawful.")).

2. Communicating Acceptance of Amex

As discussed above, see supra Part III.A, American Express has a legitimate interest in requiring that merchants who steer customers away from Amex cards also communicate to those customers that they accept American Express. The Government argues that Amex should only be allowed to require such a communication where the merchant otherwise communicates to customers which brands it accepts (for example, on a small display at the point of sale indicating all **[*47]** brands accepted). Where a merchant only communicates its preference for certain brands (for example, a sign at the point of sale stating that a merchant prefers Visa, or a sign at the point of sale offering a discount to customers who use a MasterCard, but nothing more), the Government appears to argue that Amex cannot compel a merchant to communicate, in some way, that it also accepts American Express.

The purpose of the Permanent Injunction is not to mislead consumers into believing that a particular merchant that chooses to engage in steering does not, in fact, accept American Express. Rather, as the court explained in the Decision, the removal of the NDPs should increase the flow of truthful information between merchants and customers. (See Decision at 30.) Thus, at the threshold, the court agrees with Defendants that they should have the authority to require merchants that engage in steering to also communicate to customers that they accept American Express. Similarly, the court does not agree with the Government that a provision protecting Amex's ability to enforce signage rules is "unnecessary" and gives Amex an "undue influence with merchant steering." (Gov't's Br. at 18.)

Under § III.B.5 **[*48]** of the Permanent Injunction, American Express has authority to impose signage requirements, but this authority is limited, and in no event is Amex authorized to use rules concerning signage or other merchant communications regarding Amex acceptance to deter or undermine the efficacy of merchant steering. (Permanent Injunction § III.B.5.) Accordingly, at most, Defendants can require that merchants post signage at the point of sale (including online or on mobile services) or store entry or communicate orally that they accept American Express. For example, Amex cannot compel a merchant to do more than post a sticker at the point of sale or store entry indicating all accepted brands, including the preferred brand(s). The power to require anything greater would chill efforts by merchants to steer, and would dilute the effectiveness of steering (for example, it would go too far if a rule required merchants engaging in steering to place an Amex logo on the actual sign attempting to influence customer choice). With respect to online or mobile transactions, the court rejects American Express's proposal that it "shall be entitled to require that the signage indicating American Express acceptance **[*49]** must appear at the earliest point within the payment path at which any such practice occurs." (Defs.' Proposed J. § III.B.6.) Like traditional merchants (who, under the Permanent Injunction, can indicate their acceptance of Amex at the point of sale or store entry), online and mobile merchants that choose to steer are entitled to determine the appropriate way of reasonably communicating their acceptance of American Express, so long as they communicate to customers at some point in the process that they, in fact, accept American Express.

Finally, as discussed above, under § IV.H of the Permanent Injunction, American Express must give notice to the Government of any changes to its rules governing merchants' acceptance of other credit card brands or debit cards before implementation of those rules. Thus, the Government will be on notice should American Express take a position regarding signage that is contrary to the terms of the Permanent Injunction and this Memorandum, and will be able to seek relief from this court should the Government believe American Express has done so.

3. Disparagement and Surcharging

The parties agree that Defendants should retain the right to prohibit merchants **[*50]** from disparaging or mischaracterizing the Amex brand, but disagree on remedial language. Defendants seek a provision that permits them to adopt rules that "prohibit Merchants from disparaging or mischaracterizing its Brand or making untrue statements about American Express or the Merchant's All-In Merchant Fee for accepting American Express General Purpose Cards." (Defs.' Proposed J. § III.C.) The Government proposes that Amex be permitted only to "prohibit Merchants from disparaging its Brand, including (1) mischaracterizing American Express General Purpose Cards, or (2) engaging in activities that harm American Express's business or its Brand." (Gov't's Proposed J. § IV.C.) The Non-Party Merchants go further, proposing that the Permanent Injunction expressly define "disparaging" so that Amex cannot take the future position that novel forms of steering not expressly included in the Permanent Injunction are, in fact, activities that "harm American Express's business or its Brand." (Non-Party Merchants' Comment at 9-10.)

In § III.C of the Permanent Injunction, the court clarifies that Amex is permitted to enforce both rules that prohibit merchants from disparaging its brand and rules that prohibit merchants from mischaracterizing **[*51]** its brand. (Permanent Injunction § III.C.) Included within the umbrella of "mischaracterization" are rules that prohibit merchants from making untrue statements about Amex, or untrue statements about the merchant's cost for accepting American Express credit cards or other credit cards, or untrue statements about the relative costs of accepting the cards of different brands. (Permanent Injunction § III.C.) The court does not adopt the Non-Party Merchants' proposal to define "disparaging," as what conduct constitutes disparagement was not part of the trial in this case. However, the Permanent Injunction does include language, for the avoidance of any doubt, providing that engaging in authorized steering practices—including a merchant communicating the reasonably estimated (including average) cost incurred when a customer uses a particular brand of credit card—cannot constitute a practice that "disparages," "mischaracterizes," or "harms" the Amex brand. (See Permanent Injunction § III.C.) The court is confident that the parties and merchants will understand the conduct captured by the concepts of disparagement and mischaracterization. And the Permanent Injunction includes mechanisms for **[*52]** a merchant to file a complaint with the Government should that merchant believe that Defendants are taking an overly broad view of these concepts. (See Permanent Injunction §§ IV.F, V.F.)

Similarly, the court does not adopt the Non-Party Merchants' proposal to define the concept of "surcharges." The court is confident that merchants will understand the difference between a discount and a surcharge, and the definition of surcharging was not part of the trial in this case.

4. Timing

Considering that this is a permanent injunction entered after a full trial, the court rejects American Express's proposal that it have the later of (a) 90 days from the date of entry of the Permanent Injunction, or (b) 90 days following the expiration of any stay of the Permanent Injunction entered by this court or an appellate court, to implement the required changes to its business. (See Defs.' Proposed J. § I.9.) Rather, in the Permanent Injunction, the court orders that within the later of 30 days from the date of entry of the Permanent Injunction, or 30 following the expiration of a stay, Amex (a) cease to engage in the Prohibited Conduct and (b) commence the Required Conduct and notice/compliance requirements. **[*53]** (See, e.g., Permanent Injunction §§ I.G, III.A, IV.A.) The 30-day period of implementation gives Defendants ample time to seek an additional stay of the Permanent Injunction, while also providing that, absent a stay, the process of remedying the instant antitrust violation will begin in earnest.

The court agrees with the Government that a ten-year termination provision (with the possibility for one-year extensions) is appropriate, and rejects Defendants' proposal that would terminate the Permanent Injunction upon the adoption of rules by Visa and MasterCard that prohibit forms of steering authorized by the Permanent Injunction. (Compare Permanent Injunction § VI.C, with Defs.' Proposed J. § VI.C.) If circumstances change, and/or if upon the expiration of the Consent Decree Visa and MasterCard attempt to again bar merchant steering, Amex can, consistent with the Permanent Injunction, seek relief from this court. (See Permanent Injunction § VI.A (reserving the court's jurisdiction over the Permanent Injunction and authorizing the parties to seek further orders or modifications).)

E. Compliance Provisions

Finally, the Government proposes significant compliance provisions, arguing that "Amex **[*54]** should be required to devote as least as much attention to monitoring compliance with the Final Judgment as it did to monitoring merchants' compliance with its anticompetitive restraints." (Gov't's Br. at 33.) Defendants respond that the "onerous, unnecessary, and unreasonable" compliance provisions are punitive and premised on the Government's "baseless" assumption that "American Express cannot be trusted to comply with the Court's Final Judgment." (Defs.' Br. at 41, 42.) Defendants propose compliance provisions that parallel those in the Consent Decree, but nothing more.

The court agrees with the Government; considering American Express's previous, aggressive enforcement of the NDPs, and certain of the positions that it took at trial, robust compliance provisions are necessary to ensure that Amex complies with the Permanent Injunction. It is not yet clear to the court whether American Express has a positive compliance attitude, particularly in light of its unwillingness to agree to some of the Government's more modest proposals. Contrary to Defendants' argument, compliance provisions are not reserved only for antitrust violators who engaged in criminal, intentional, or malfeasant **[*55]** conduct. (See Defs.' Br. at 45; Gov't's Reply at 18 & n.12.) For a company of the size of American Express, the compliance provisions included in the Permanent Injunction are not overly costly or burdensome—for example, the court has not appointed an independent, external monitor, although it certainly has the authority to do so. In addition, should Defendants (or the Government, for that matter) believe that the compliance provisions are unworkable, or require adjustments once implemented, they are permitted under the Permanent Injunction to seek modifications from the court.

IV. CONCLUSION

As set forth above, and as embodied in the court's seperate Order Entrering Permanent Injunction as to the American Express Defendants, the court adopts many of proposals made by the Government with respect to the proper scope of injuctive relief in this case, with some exceptions, and with certain modifications.

SO ORDERED.

HN1[] **Justiciability, Standing**

On September 16, 2011, President Obama signed the America Invents Act ("AIA") into law. The AIA amended *35 U.S.C.S. § 292* to eliminate qui tam false marking suits and require that an entity suffer a "competitive injury" to bring a private right of action to enforce the false marking statute. America Invents Act, Pub. L. No. 112-29, § 16, 125 Stat. 284, 329 (2011). In Rogers v. Tristar Prods., Inc., the United States Court of Appeals for the Federal

Circuit held in a nonprecedential opinion that the amendment applied retroactively to a suit pending at the time the AIA was enacted.

HN4[] **Justiciability, Standing**

35 U.S.C.S. § 292(b)'s "competitive injury" standing requirement was added in 2011 by the America Invents Act, Pub. L. No. 112-29, § 16, 125 Stat. 284, 329 (2011). A potential competitor may suffer competitive injury if it has attempted to enter the market. An attempt is made up of two components: (1) intent to enter the market with a reasonable possibility of success; and (2) an action to enter the market. Satisfaction of this competitive injury requirement, however, does not mean that a party necessarily has standing under *§ 292(b)*. The statute also imposes a causation requirement. Standing under *§ 292(b)* is limited to those who have suffered a competitive injury as a result of a violation of *35 U.S.C.S. § 292(a)*.

Civil Procedure > ... > Justiciability > Standing > General Overview

HN5[] **Justiciability, Standing**

A plaintiff must possess standing as of the time the plaintiff files its lawsuit.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN6[] **Regulated Practices, Trade Practices & Unfair Competition**

Law dictionaries define "competitive injury" as a wrongful economic loss caused by a commercial rival, such as the loss of sales due to unfair competition, or a disadvantage in a plaintiff's ability to compete with a defendant caused by a defendant's unfair competition. A potential competitor would generally not be considered a "commercial rival," but a potential competitor may suffer a disadvantage in its ability to compete if another's actions impair its ability to enter the market. Still, this definition does not include all potential competitors. To suffer a disadvantage in the "ability to compete," an entity must have some present ability to compete—if only in part—that is disadvantaged. Therefore, law dictionaries define "competitive injury" to encompass some potential competitors, but only those that suffer a disadvantage in their ability to compete.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Governments > Legislation > Statutory Remedies & Rights

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

A source to inform the meaning of "competitive injury," as that term is used in *35 U.S.C.S. § 292*, is the term's use in analogous areas of law. Although the phrase is not identical, "injury to competition" is a common concept in ***antitrust law***. In that context, preventing market entry unquestionably qualifies as "injury to competition." For example, the United States Supreme Court has held that injury to competition includes creating barriers to entry of new competitors in the market. In addition, the United States Court of Appeals for the Ninth Circuit has stated that vertical agreements that foreclose competitors from entering or competing in a market can injure competition by reducing the competitive threat those competitors would pose. Similarly, on another occasion the Ninth Circuit reasoned that tying arrangements are forbidden on the theory that, if a seller has market power over a tying product, the seller can leverage that market power through tying arrangements to exclude other sellers of the tied product.

Governments > Federal Government > Claims By & Against

Patent Law > Infringement Actions > Infringing Acts > General Overview

Patent Law > Remedies > General Overview

Governments > Legislation > Statutory Remedies & Rights

HN8[] **Federal Government, Claims By & Against**

The United States Court of Appeals for the Federal Circuit finds persuasive the argument that "competitive injury" in *35 U.S.C.S. § 292* must include what is arguably the most egregious type of competitive injury: the prevention of market entry altogether. Competition is certainly harmed when a market participant's false marking deters a would-be competitor from attempting to enter the market. This was recognized as one of the original rationales for allowing qui tam actions to remedy false marking. The America Invents Act's ("AIA's"), Pub. L. No. 112-29, § 16, 125 Stat. 284, 329 (2011), removal of qui tam claims for false marking did not indicate disapproval of this rationale. Rather, the AIA recalibrated the enforcement mechanism for false marking in response to a flood of false marking claims that did little to achieve the original objective of minimizing anticompetitive conduct.

Civil Procedure > ... > Justiciability > Standing > General Overview

Governments > Legislation > Statutory Remedies & Rights

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN9[] **Justiciability, Standing**

From a review of the statutory text, legislative history, analogous areas of law, and policy rationale, the United States Court of Appeals for the Federal Circuit concludes that *35 U.S.C.S. § 292(b)* extends standing to sue for a violation of *35 U.S.C.S. § 292(a)* to some potential competitors. Nevertheless, it is equally clear that the amended statute does not confer standing upon any entity that claims a subjective intent to compete. Rather, *§ 292* limits standing to entities that have suffered a competitive injury as a result of a violation of *§ 292(a)*. A potential competitor can only suffer a competitive injury if it engages in competition. Dreaming of an idea but never attempting to put it into practice is insufficient. Otherwise, market entry is too speculative and, thus, competition cannot be harmed by false marking. Likewise, sometimes a falsely marked product is also properly marked with other patents. In that case, a potential competitor must show that the falsely marked patents deterred market entry, but that—for some reason—the properly marked patents did not deter market entry.

Civil Procedure > ... > Justiciability > Standing > General Overview

Patent Law > Infringement Actions > Infringing Acts > General Overview

Governments > Legislation > Statutory Remedies & Rights

HN10[] **Justiciability, Standing**

For purposes of *35 U.S.C.S. § 292*, an injury is only a "competitive injury" if it results from competition, and a potential competitor is engaged in competition if it has attempted to enter the market, which includes intent to enter the market and action to enter the market. And, for the sake of completeness, an entity has standing under *§ 292(b)* if it can demonstrate competitive injury that was caused by the alleged false marking.

Opinion

[*1398] **[***1627]** PROST, *Chief Judge*.

Ponani Sukumar and Southern California Stroke Rehabilitation Associates, Inc. (collectively, "Sukumar") appeal from the district court's grant of summary judgment for Nautilus, Inc. ("Nautilus"). The district court held that Sukumar had not suffered "competitive injury" necessary to have standing to assert a false marking claim. *See* *35 U.S.C. § 292(b)*. The district court also granted summary judgment on Sukumar's state law unfair competition claims. We affirm.

I. BACKGROUND

In 1994, Sukumar began caring for his aging father after Sukumar's father became ill and lost much of his mobility. Sukumar assisted his father with his rehabilitation, but, according to **[**2]** Sukumar, he noticed that the rehabilitation fitness machines used by his father did not adequately suit frail seniors. As a result, Sukumar resolved to learn more about rehabilitation for seniors, and he went to trade shows in the late 1990s where he met Nautilus representatives.

Soon afterward, in 1998 and 1999, Sukumar ordered Nautilus machines and asked for certain modifications to cater to elderly users' needs. When Nautilus delivered the custom fitness machines, Sukumar was dissatisfied, and Sukumar filed a breach of contract action against Nautilus and Med-Fit Systems, Inc., the distributor of the products. That case was the first of several legal actions between Sukumar and Nautilus.[1]

In 2004, Sukumar founded Southern California Stroke Rehabilitation Associates ("SCSRA"), the other plaintiff in this action. Although somewhat unclear, SCSRA's business was likely to include opening and running the senior rehabilitation facilities in which Sukumar was to use modified Nautilus fitness machines. However, SCSRA's **[**3]** operations have been quite limited. SCSRA has acquired over 100 Nautilus fitness machines and, according to Sukumar's deposition testimony, SCSRA has twice attempted to negotiate a patent license from Nautilus. At least one of these license negotiations was proposed by Sukumar in settlement of litigation. Sukumar filed this case on October 21, 2010. As of that date, SCSRA had no business plan, no employees other than Sukumar, no office space, and no prototype designs.

On February 10, 2012, Sukumar moved for partial summary judgment on the issue of whether the Nautilus machines were **[*1399]** falsely marked. The district court granted Sukumar's motion. Specifically, the district court found that eight of the twenty-four patents marked on the 2006 Nitro Plus Biceps Curl, the 2007 Nitro V-Triceps Extension, the 2008 F2 Lat Pulldown, the 2008 Studio Pec Fly, the 2009 One Triceps Press, and the 2009 XPLoad Compound Row did not cover the machines. In addition, eight of the sixteen patents marked on the 2006 Nautilus Commercial Series E916 Elliptical, 2006 Nautilus Commercial Series EV 916 Elliptical, and 2006 StairMaster StepMill 7000PT were found to not cover the machines.

After the district court's **[**4]** partial summary judgment decision, Sukumar became substantially more active. Sukumar retained John Whitman to create a business plan for selling fitness equipment, hired a design firm to create initial renderings of a fitness machine, and consulted with engineers in the industry. At least as of August 2013, Sukumar was in talks to acquire land for offices and a manufacturing facility.

---

[1] The other legal actions are relevant because depositions and a settlement offer from those cases include evidence that contradicts portions of Sukumar's testimony in this case.

In the meantime, the law concerning who could bring an action for false marking had changed. ***HN1***[] On September 16, 2011, President **[***1628]** Obama signed the America Invents Act ("AIA") into law. The AIA amended *35 U.S.C. § 292* to eliminate qui tam false marking suits and require that an entity suffer a "competitive injury" to bring a private right of action to enforce the false marking statute. America Invents Act, Pub. L. No. 112-29, § 16, 125 Stat. 282, 329 (2011). Soon after, this court held in a nonprecedential opinion that this amendment applied retroactively to a suit pending at the time the AIA was enacted. *See Rogers v. Tristar Prods., Inc., 559 F. App'x 1042, 1044 (Fed. Cir. 2012)*.

After a period of discovery to inform issues of standing and causation, the district court allowed a second round of summary judgment motions, and the parties brought cross-motions for summary judgment. On December 6, 2013, the district court granted Nautilus' motion **[**5]** for summary judgment on all claims and denied Sukumar's motion. Sukumar appeals.

II. Discussion

HN2[] The district court's grant of summary judgment is reviewed de novo. *Grober v. Mako Prods., Inc., 686 F.3d 1335, 1344 (Fed. Cir. 2012)*; *Bruckelmyer v. Ground Heaters, Inc., 445 F.3d 1374, 1377 (Fed. Cir. 2006)*. Summary judgment is appropriate if, viewing the evidence in the light most favorable to the non-moving party, the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. We first consider Sukumar's false marking claim, followed by Sukumar's state law claims.

A. False Marking Claim

HN3[] *Title 35 section 292(a)* prohibits, in part, "mark[ing] upon . . . in connection with any unpatented article, the word 'patent' or any word or number importing that the same is patented, for the purpose of deceiving the public." *35 U.S.C. § 292(a)*. *Section 292(b)* provides a private right of action to enforce *§ 292(a)* to any "person who has suffered a competitive injury as a result of a violation of this section." *35 U.S.C. § 292(b)*. The district court granted Nautilus summary judgment on Sukumar's false marking claim because it found that Sukumar had not suffered a competitive injury, and thus lacked standing to enforce *§ 292(a)*.

[*1400] 1. The Competitive Injury Requirement

HN4[] *Section 292(b)*'s "competitive injury" standing requirement was added in 2011 by the AIA. The parties do not **[**6]** dispute that Sukumar was not selling products in competition with Nautilus at the time this suit was filed.[2] This case thus presents the question of whether (or to what extent) an entity that has not entered the relevant market can suffer "competitive injury." Nautilus argues that an entity cannot suffer competitive injury unless it actively sells products in the market. Sukumar contends that a potential competitor may suffer competitive injury if it intends to enter the market. We hold that a potential competitor may suffer competitive injury if it has attempted to enter the market. An attempt is made up of two components: (1) intent to enter the market with a reasonable possibility of success, and (2) an action to enter the market.[3]

This court has yet to address the meaning of "competitive injury," so we begin with its plain meaning. **[**7]** ***HN6***[] Black's Law Dictionary defines "competitive injury" as "[a] wrongful economic loss caused by a commercial rival, such as the loss of sales due to unfair competition; a disadvantage in a plaintiff's ability to compete with a defendant, caused by the defendant's unfair competition." Black's Law Dictionary (9th ed. 2009). This definition,

---

[2] ***HN5***[] A plaintiff must possess standing as of the time the suit was filed. *See Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), Inc., 528 U.S. 167, 191, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)*.

[3] Satisfaction of this competitive injury requirement, however, does not mean that a party necessarily has standing under *§ 292(b)*. The statute also imposes a causation requirement. Standing under *§ 292(b)* is limited to those who have suffered a competitive injury "as a result of a violation of *[section 292(a)]*." *35 U.S.C. § 292(b)*.

while hardly conclusive, lends some support for Sukumar's position. A potential competitor would generally not be considered a "commercial rival," but a potential competitor may suffer "a disadvantage in [its] ability to compete" if another's actions impair its ability to enter the market. Still, this definition does not include all potential competitors. To suffer a disadvantage in the "ability to compete," an entity must have some present ability to compete—if only in part—that is disadvantaged. Therefore, Black's Law Dictionary defines "competitive injury" to encompass some **[***1629]** potential competitors, but only those that suffer "a disadvantage in [their] ability to compete."

Because the text of the statute is inconclusive, we next consider the legislative history. The House of Representatives' report on the AIA provides the most succinct summary of congressional **[**8]** intent with respect to the amendments to *§ 292*. The report notes a recent "surge in false-marking qui tam litigation" and explains that most of the new suits involve a product that was originally properly marked, but no longer was once the patent expired. H.R. Rep. 112-98, 53, 2011 U.S.C.C.A.N. 67, 84. According to the report, "[i]t is doubtful that the Congress that originally enacted this section anticipated that it would force manufacturers to immediately remove marked products from commerce once the patent expired, given that the expense to manufacturers of doing so will generally greatly outweigh any conceivable harm of allowing such products to continue to circulate in commerce." *Id.* The report concludes that

> [t]o address the recent surge in litigation, the bill replaces the qui tam remedy for false marking with a new action that allows a party that has suffered a competitive injury as a result of such **[*1401]** marking to seek compensatory damages. The United States would be allowed to seek the $500-per-article fine, and competitors may recover in relation to actual injuries that they have suffered as a result of false marking, but the bill would eliminate litigation brought by unrelated, private third **[**9]** parties.[4]

Id.

Nautilus seizes on the language that "competitors may recover in relation to actual injuries that they have suffered as a result of false marking" to argue that only current market participants have standing to bring a false marking action. But the use of the word "competitors" just begs the question of what "competitors" means. In the same sentence, the report juxtaposes "competitors" with "unrelated, private third parties." Entities actively attempting to enter the market are not "unrelated, private third parties." As such, the legislative history is inconclusive.

HN7[] Another source to inform the meaning of "competitive injury" is the term's use in analogous areas of law. Although the phrase is not identical, "injury to competition" is a common concept in ***antitrust law***. *See, e.g., Razorback Ready Mix Concrete Co. v. Weaver, 761 F.2d 484, 488 (8th Cir. 1985)*; *Midwest Underground Storage, Inc. v. Porter, 717 F.2d 493, 498 (10th Cir. 1983)*. In that context, preventing market entry unquestionably qualifies as "injury to competition." For example, **[**10]** the Supreme Court has held that injury to competition includes "creat[ing] barriers to entry of new competitors in the market." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 14, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *abrogated in part on other grounds by Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. In addition, the Ninth Circuit has stated that "[v]ertical agreements that foreclose competitors from entering or competing in a market can injure competition by reducing the competitive threat those competitors would pose." *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1198 (9th Cir. 2012)*. Similarly, on another occasion the Ninth Circuit has reasoned that "[t]ying arrangements are forbidden on the theory that, if the seller has market power over the tying product, the seller can leverage this market power through tying arrangements to exclude other sellers of the tied product." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 912 (9th Cir. 2008)*.

HN8[] We also find persuasive Sukumar's argument that "competitive injury" in *§ 292* must include what is arguably the most egregious type of competitive injury: the prevention of market entry altogether. The rule Nautilus proposes would exclude this important circumstance. Indeed, competition is certainly harmed when a market

---

[4] Congress explicitly preserved the ability to seek a $500-per-article fine in *§ 292(a)*, but limited enforcement to the government. As such, the statute uses the threat of a government suit—rather than the previous mechanism of qui tam actions—to deter businesses from falsely marking their products.

participant's false marking deters a would-be competitor from attempting to enter the market. This was recognized as one of the original rationales for allowing qui tam actions to remedy false marking. *See* *Forest Grp., Inc. v. Bon Tool Co., 590 F.3d 1295, 1303 (Fed. Cir. 2009)* ("If an article **[**11]** that is within the public domain is falsely marked, potential competitors may be dissuaded from entering the same market."). The AIA's removal of qui tam claims for false marking did not indicate **[***1630]** disapproval of this rationale. Rather, the AIA recalibrated the enforcement mechanism for false marking in response to a flood of false marking claims that did little **[*1402]** to achieve the original objective of minimizing anticompetitive conduct.

HN9[] From the above review of the statutory text, legislative history, analogous areas of law, and policy rationale, we conclude that *§ 292(b)* extends standing to sue for a violation of *§ 292(a)* to some potential competitors. Nevertheless, it is equally clear that the amended statute does not confer standing upon any entity that claims a subjective intent to compete. Rather, *§ 292* limits standing to entities that have "suffered a competitive injury as a result of a violation of *[section 292(a)]*." A potential competitor can only suffer a *competitive* injury if it engages in competition. Dreaming of an idea but never attempting to put it into practice is insufficient. Otherwise, market entry is too speculative and, thus, competition cannot be harmed by the false marking. Likewise, sometimes a falsely **[**12]** marked product is also properly marked with other patents. In that case, a potential competitor must show that the falsely marked patents deterred market entry, but that—for some reason—the properly marked patents did not deter market entry. Therefore, ***HN10***[] an injury is only a "competitive injury" if it results from competition, and a potential competitor is engaged in competition if it has attempted to enter the market, which includes intent to enter the market and action to enter the market. And, for the sake of completeness, an entity has standing under *§ 292(b)* if it can demonstrate competitive injury that was caused by the alleged false marking.

2. Application to Sukumar

a. Intent to enter the market

Sukumar alleges that he developed the intent to compete with Nautilus in the mid- to late-1990s. Nautilus responds that Sukumar never intended to sell fitness machines in competition with Nautilus, and that, if anything, Sukumar intended to operate senior rehabilitation centers. According to Nautilus, these rehabilitation centers would use modified Nautilus fitness machines, which would make Sukumar a customer of Nautilus', not a competitor.

To support his argument, Sukumar cites his declaration, **[**13]** which was prepared for the purposes of summary judgment; the summary judgment declaration of Frank Smith, a former Nautilus employee hired as a consultant by Sukumar; and some excerpts of Sukumar's deposition testimony in this case. These three sources claim that, beginning in the late 1990s, Sukumar intended to modify Nautilus machines and sell the modified machines in competition with Nautilus.

The district court properly found that other evidence, including nearly all of the objective evidence, tends to support Nautilus. *Sukumar v. Nautilus, Inc., No. 7:11-CV-00218, 2013 U.S. Dist. LEXIS 172005, 2013 WL 6408351, at *10-12 (W.D. Va. Dec. 6, 2013)*. In 1998 and 1999, Sukumar placed orders for custom Nautilus fitness machines with certain modifications requested by Sukumar. When Sukumar was dissatisfied with the machines Nautilus eventually delivered, he commenced litigation against Nautilus. There is no evidence that Sukumar intended to mass produce the designs Nautilus produced for him in competition with Nautilus.

Several years later, in 2004, Sukumar incorporated SCSRA. It is unclear what, if any, business activities SCSRA or Sukumar undertook with respect to the fitness machines market over the next half-decade apart from litigating against Nautilus and purchasing **[**14]** several modified fitness machines from a company called MedX Corporation. Both parties direct the court to a litigation settlement proposed by Sukumar **[*1403]** as evidence of Sukumar's intent during this time. In this settlement proposal, which Sukumar communicated to Nautilus in 2009, Sukumar attempted to negotiate a license to Nautilus patents. The license offer explained that Sukumar and Southern California Stroke Rehabilitation Associates, Inc. were "interested in developing and operating a series of rehabilitation centers that would provide physical therapy and other rehabilitation services to stroke victims and patients suffering from stroke-like symptoms." The proposed patent license extended only for Sukumar "to make and have made for use exclusively in Sukumar-owned rehabilitation centers equipment and parts that are covered by a claim of Nautilus' patent rights."

The district court also noted that the bulk of Sukumar's testimony confirms that Sukumar's intent was always to use modified fitness machines in senior rehabilitation and spa centers. **[***1631]** *2013 U.S. Dist. LEXIS 172005, [WL] at *12*. At his deposition in this case, Sukumar spoke at length about his plans to devote SCSRA to open senior rehabilitation centers and senior **[**15]** spa centers. *Id.* In addition, the district court found that this testimony comports with testimony Sukumar has given in previous cases between the parties. *2013 U.S. Dist. LEXIS 172005, [WL] at *11*. For example, in another lawsuit Sukumar testified that SCSRA would have started senior rehabilitation centers were it not for Nautilus' failure to provide Sukumar seven fitness machines.

In response to this glut of evidence, Sukumar points to numerous activities he has undertaken since the district court found that some of Nautilus' machines were falsely marked as evidence of his earlier intent to compete with Nautilus. As an example, Sukumar has recently commissioned the development of a business plan and design of a prototype, and engaged in discussions to purchase land for a manufacturing facility. However, the district court did not err in finding that this evidence has minimal probative value for several reasons. *See* *2013 U.S. Dist. LEXIS 172005, [WL] at *11, *11 n.14, *12*. First, crediting it would allow parties in litigation to manufacture evidence after the suit has been filed. Second, in this case Sukumar's logic makes little sense. Sukumar says he was deterred from entering the market by Nautilus' patent labels. Apparently now that a court has confirmed that some of **[**16]** the patent labels on some of Nautilus' machines were inappropriate, Sukumar is no longer deterred, even though the vast majority of Nautilus' machines—including all those released prior to 2006—have not been adjudicated as falsely marked.

In sum, we agree with the district court that Sukumar's evidence of his intent to compete with Nautilus is weak. Sukumar and Frank Smith's assertions as to Sukumar's subjective intent are contradicted by Sukumar's statements in both this case and others. The documentary evidence suggests that Sukumar intended only to open senior rehabilitation centers, which would not operate in competition with Nautilus. Still, on summary judgment, as did the district court, we must view the evidence in the light most favorable to Sukumar. Therefore, we must consider the second component of an at tempt to enter the market: whether Sukumar took action to enter the market.

b. Action to enter the market

Consistent with the district court, we conclude that, even if Sukumar subjectively intended to enter the market for fitness machines, he took insufficient action to pursue that intent. *See* *2013 U.S. Dist. LEXIS 172005, [WL] at *10-12*. Thus, no genuine issue of material fact remains—Sukumar did not attempt to compete **[**17]** with Nautilus, so Sukumar did not suffer a competitive injury. Sukumar possesses a Master of Business Administration **[*1404]** degree and previously held a career as an investment banker. Sukumar has little to no engineering knowledge of fitness machines or business experience in the fitness machine market. Sukumar contends that, to gain familiarity with Nautilus fitness machines, he purchased over 100 exercise machines from Nautilus. But Sukumar's alleged attempt to compete with Nautilus ends here. Sukumar placed the Nautilus machines he purchased in storage for years. And despite the fact that over a decade passed between when Sukumar claims he developed the intent to compete with Nautilus and when Sukumar filed this case, the list of basic steps Sukumar did not take is long:

Sukumar did not develop a business plan.
Sukumar did not attempt to design a prototype.
Sukumar did not hire any employees.
Sukumar did not gain engineering knowledge.
Sukumar did not investigate developing manufacturing capacity.

As the district court noted, the undisputed evidence establishes that, at the time Sukumar filed the suit, Sukumar had not taken sufficient action to enter the market for fitness machines. *2013 U.S. Dist. LEXIS 172005, [WL] at *10*. Therefore, **[**18]** Sukumar was not engaged in competition with Nautilus and did not suffer a competitive injury. Accordingly, the district court properly granted summary judgment for Nautilus because Sukumar lacks standing to bring a claim for false marking under *§ 292*.

B. State Law Claims

Sukumar also appeals the district court's grant of summary judgment for Nautilus on Sukumar's unfair competition claims, which were brought under Washington and California law. Sukumar contends that the district **[***1632]** court applied the wrong causation standard to the state law claims. Specifically, Sukumar argues that the district court required Nautilus' false marking to be the sole cause of his damages, rather than an "immediate cause" (the standard in California) or a "but-for cause" (the standard in Washington).

In arguing that the district court applied the wrong legal standard for causation, Sukumar cites a single sentence from the district court's opinion: "It simply defies common sense to conclude that, for more than ten years, Plaintiffs have not entered the market to compete with Nautilus and that the sole item holding them back was their fear of infringing patents that were falsely listed on the accused machines' patent **[**19]** labels." *Id.* Apparently based on the district court's usage of the word "sole" in one sentence, Sukumar contends that the district court employed an improperly stringent causation standard throughout the district court's entire twenty-eight page opinion.

Sukumar takes a single word of the district court's opinion out of context. The district court used the word "sole" for emphasis in demonstrating the absurdity of Sukumar's causation claim. While the district court's particular word choice in that sentence may be imprecise, it does not negate the district court's two-page recital of what even Sukumar admits is the correct law. Nor does a single use of the word "sole" nullify the district court's faithful application of the correct law throughout the rest of the opinion.

Furthermore, as to Sukumar's argument that Nautilus' false marking caused his alleged damages, we agree with the district court that Sukumar does not present sufficient evidence. For example, the district court found that "Sukumar has repeatedly blamed other actions of Nautilus—not any false patent labels—for the **[*1405]** years of delay in accomplishing his business objectives and he has done so both in prior litigation and in **[**20]** his deposition in this case." *2013 U.S. Dist. LEXIS 172005, [WL]at *11*. Such actions include Nautilus' alleged "unwillingness or inability to provide satisfactorily-modified equipment" to Sukumar and "oral representations by Nautilus regarding patent protection generally on its machines." *2013 U.S. Dist. LEXIS 172005, [WL] at *11, *13*. We also note that Sukumar never attempted to develop a capacity to enter the market. As discussed above, the district court properly found that Sukumar's intent was to open senior rehabilitation and spa centers, not to compete with Nautilus. *2013 U.S. Dist. LEXIS 172005, [WL] at *11-12*. Finally, at bottom, Sukumar cannot create a genuine issue of material fact by simply submitting a conclusory declaration against overwhelming evidence to the contrary. *Moore U.S.A., Inc. v. Standard Register Co., 229 F.3d 1091, 1112 (Fed. Cir. 2000)* (***HN11***[] "A party may not overcome a grant of summary judgment by merely offering conclusory statements."). Thus, the district court did not err in granting summary judgment for Nautilus on Sukumar's state law claims.

III. CONCLUSION

Accordingly, we affirm the district court's grant of summary judgment for Nautilus on Sukumar's false marking and state law claims.

AFFIRMED

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss is proper under *Fed. R. Civ. P. 12(b)(6)* where the pleadings fail to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. A complaint may be dismissed if it does not allege enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. However, a complaint does not suffice if it tenders naked assertions devoid of further factual enhancement. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. If a motion to dismiss is granted, a court should normally grant leave to amend unless it determines that the pleading could not possibly be cured by allegations of other facts.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > ... > Pleadings > Complaints > Prelitigation Notices

HN2[] **Deceptive & Unfair Trade Practices, State Regulation**

For purposes of Mass. Gen. Laws ch. 93A, § 9, in order to avoid the pre-suit notice requirement, a plaintiff must plead that defendants do not maintain a place of business or keep assets in Massachusetts.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN4[] Purchasers, Indirect Purchasers

Mass. Gen. Laws ch. 93A, § 11 focuses on the persons engaged in the conduct of any trade or commerce. Massachusetts courts have struggled with identifying the line between a consumer claim — which can be brought on behalf of an indirect purchasers — and a business claim — which can not. The choice appears to turn on whether a given party has undertaken the transaction in question for business reasons, or has engaged in it for purely personal reasons (such as the purchase of an item for personal use), and any transaction in which the plaintiff is motivated by business considerations gives rise to claims only under the statute's business section.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN5[] Purchasers, Indirect Purchasers

The District of Columbia's consumer protection statute allows causes of action on behalf of a consumer who does or would purchase, lease (as lessee), or receive and normally use consumer goods or services for personal, household, or family purposes. D.C. Code § 28-3901(a)(2)(B)(i). The relevant distinction is one between retail and wholesale transactions. Transactions along the distribution chain that do not involve the ultimate retail customer are not consumer transactions that the Consumer Protection Procedures Act seeks to reach. Rather, it is the ultimate retail transaction between the final distributor and the individual member of the consuming public that the Act covers. Accordingly, it is not the use to which the purchaser ultimately puts the goods or services, but rather the nature of the purchaser that determines the nature of the transaction.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] Deceptive & Unfair Trade Practices, State Regulation

Montana's Unfair Trade Practices and Consumer Protection Act defines a consumer as a person who purchases or leases goods, services, real property, or information primarily for personal, family, or household purposes. Mont. Code Ann. § 30-14-102(1). The statute excludes persons who buy goods for resale.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Governments > Legislation > Interpretation

HN7[] Deceptive & Unfair Trade Practices, State Regulation

The Arkansas Deceptive Trade Practices Act (DTPA) prohibits deceptive and unconscionable trade practices including any unconscionable, false, or deceptive act or practice in business, commerce, or trade. *Ark. Code Ann. § 4-88-107(a)(10)*. The legislature's use of "unconscionable" illustrates that liberal construction of the DTPA is appropriate. *Ark. Code Ann. § 4-88-107(a)(10)* was intended to expand and not limit the types of unfair trade practices actionable at common law or under other statutes of Arkansas. The Arkansas Supreme Court has defined "unconscionable" as an act that affronts the sense of justice, decency, or reasonableness.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN8[] Deceptive & Unfair Trade Practices, State Regulation

Like *Idaho Code Ann. § 48-603C*, *Idaho Code Ann. § 48-603(17)* prohibits practices which are misleading, false, or deceptive to the consumer.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN9[] Deceptive & Unfair Trade Practices, State Regulation

To be actionable under *Idaho Code Ann. § 48-603(17)*, the conduct at issue must be directed to consumers.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN10[] Deceptive & Unfair Trade Practices, State Regulation

Under Maine's Unfair Trade Practices Act, unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful. *Me. Rev. Stat. Ann. tit. 5, § 207*. The Maine Supreme Court has held in pricing cases under the Act the inquiry is whether the price has the effect of deceiving the consumer, or inducing her to purchase something that she would not otherwise purchase. Courts in the Northern District of California have relied on the Maine case law to dismiss antitrust-based consumer protection claims where higher prices alleged could not have deceived or induced consumers into buying a product.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] Deceptive & Unfair Trade Practices, State Regulation

The Michigan Consumer Protection Act prohibits specifically identified unfair, unconscionable, or deceptive methods, acts or practices. *Mich. Comp. Laws § 445.903(1)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN12[] Deceptive & Unfair Trade Practices, State Regulation

Minnesota's Uniform Deceptive Trade Practices Act prohibits acts involving deceptive trade practices. *Minn. Stat. § 325D.44*.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN13[] Consumer Protection, Likelihood of Confusion

Actionable conduct under the Minnesota Uniform Deceptive Trade Practices Act includes prohibiting sellers from passing off goods, causing likelihood of confusion as to product qualities/origin, false representations about goods. It appears that each of the prohibited acts focuses on affirmative representations made by the sellers to consumers. *Minn. Stat. § 325D.44(1)-(13)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN14[] Deceptive & Unfair Trade Practices, State Regulation

The Minnesota Prevention of Consumer Fraud Act prohibits fraud, misrepresentation, deceptive practices with the intent that others rely thereon in connection with the sale of any merchandise. *Minn. Stat. § 325F.69*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN15[] Deceptive & Unfair Trade Practices, State Regulation

Oregon's Unlawful Trade Practices Act, *Or. Rev. Stat. § 646.605*, prohibits any unconscionable tactic in connection with selling, renting or disposing of real estate, goods or services, or collecting or enforcing an obligation. *Or. Rev. Stat. § 646.607*. Unconscionable tactics include, but are not limited to, actions by which a person (a) knowingly takes advantage of a customer's physical infirmity, ignorance, illiteracy or inability to understand the language of the agreement; (b) knowingly permits a customer to enter into a transaction from which the customer will derive no material benefit; (c) permits a customer to enter into a transaction with knowledge that there is no reasonable probability of payment of the attendant financial obligation in full by the customer when due. *Or. Rev. Stat. § 646.605(9)*.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN16[] Consumer Protection, Likelihood of Confusion

The Pennsylvania Unfair Trade Practices and Consumer Protection Law prohibits specific unfair methods of competition and unfair or deceptive trade practices, including engaging in any other fraudulent or deceptive conduct which creates a likelihood of confusion or of misunderstanding. *73 Pa. Stat. Ann. § 201-2(4)(xxi)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] Deceptive & Unfair Trade Practices, State Regulation

Under South Dakota's Deceptive Trade Practices and Consumer Protection statute, it is a deceptive practice to knowingly act, use, or employ any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any material fact in connection with the sale or advertisement of any merchandise. *S.D. Codified Laws § 37-24-6(1)*. Proof of an intentional misrepresentation or concealment of a fact on which plaintiff relied and that caused an injury to plaintiff is required to state a claim under *§ 37-24-6*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN18[] Deceptive & Unfair Trade Practices, State Regulation

For purposes of South Dakota's Deceptive Trade Practices and Consumer Protection statute, *S.D. Codified Laws § 37-24-6*, where affirmative misrepresentations are made by a defendant and passed along to consumers by a third-party, those misrepresentations are actionable.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN19[] Consumer Protection, Likelihood of Confusion

West Virginia's Consumer Credit and Protection Act (WCCCPA) prohibits unfair methods of competition and unfair or deceptive acts or practices and defines trade or commerce as advertising, offering for sale, sale or distribution of any goods or services, and shall include any trade or commerce, directly or indirectly, affecting the people of West Virginia. *W. Va. Code § 46A-6-102*. One judge in the Northern District of California has found that general antitrust allegations are insufficient to establish a violation of WCCCPA. Reading the list literally, nothing on the list targets what might be called traditional antitrust conduct - e.g., price-fixing and market allocation, or conduct otherwise constituting a horizontal or vertical restraint on trade or commerce. Rather, the list is aimed at conduct that, in one way or another, creates a likelihood of confusion or of misunderstanding with respect to goods, services or businesses, or involves deceptive, false, or misleading statements and representations in connection with goods, services and businesses.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] Deceptive & Unfair Trade Practices, State Regulation

New York's consumer protection statute, *N.Y. Gen. Bus. Law § 349*, applies only to commercial conduct occurring within New York and for it to apply, the transaction in which the consumer is deceived must occur in New York.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN21[] Deceptive & Unfair Trade Practices, State Regulation

Under North Carolina's Unfair and Deceptive Trade Practices Act (NCUDTPA), only conduct that has a substantial effect on in-state business is actionable. NCUDPTA allows personal jurisdiction over defendants in a case involving foreign acts if an injury to person or property occurs within North Carolina and, at or about the time of the injury, the defendants were either working in North Carolina or had products in the North Carolina commerce through the ordinary course of business. In order not to unduly burden interstate commerce, courts should not allow the NCUDPTA to have extra-territorial effect and be used by a foreign plaintiff with no operations in the state because to do so would raise due process concerns. The NCUDPTA itself does not contain or mandate a substantial effects analysis.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN22[] Types of Contracts, Quasi Contracts

For an unjust enrichment claim under Arizona law, the critical inquiry is not whether a benefit was conferred directly, but whether the plaintiff can establish the relationship between his detriment and the defendant's benefit flow from the challenged conduct.

HN24[] Purchasers, Indirect Purchasers

A direct benefit from a plaintiff directly to a defendant is required for unjust enrichment claims under North Dakota law. A number of district courts have — relying on North Dakota case law — concluded that indirect purchaser allegations are insufficient to establish a direct benefit under North Dakota law.

Opinion

[*1160] ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS SECOND AMENDED COMPLAINTS

Re: Dkt. No. 139

INTRODUCTION

This case concerns the alleged antitrust and anticompetitive impact of a July 2012 settlement agreement between defendants Endo Pharmaceuticals Inc., Teikoku Seiyaku Co., Teikoku Pharma USA (collectively "Endo defendants") and defendant Watson Pharmaceuticals, Inc. (collectively "defendants"), which terminated Watson's patent litigation lawsuit against the Endo defendants in exchange for the provision of brand-name Lidoderm patches to Watson and giving Watson a period of exclusivity to market its generic version of Lidoderm patches without competition from the Endo defendants' generic patch.[1] Following my prior Order granting in part and denying in part the defendants' motion **[**28]** to dismiss, the End-Payor Plaintiffs (EPPs) and the Government Employees Health

[1] The factual background and procedural background in these consolidated antitrust cases was explained in depth in my prior Order, granting in part and denying in part defendants' prior motion to dismiss. November 17, 2014 Order [Dkt. No. 117] at 1-9. That discussion is incorporated into this Order. In this Order I will refer to brand name and generic Lidoderm patches as "Lidoderm" or "Lidoderm patches."

Organization (GEHA) filed Second Amended Complaints (SACs) on December 19, 2014. Dkt Nos. 22, 23.[2] Defendants move to dismiss specific state law antitrust, consumer protection, and unjust enrichment claims.[3]

Each state's statutes and case law, to the extent the latter exists, must be analyzed independently to determine the merits of the motion-it is not helpful, for example, to look to cases in Michigan to determine the reach of the consumer protection statute in Maine. Following oral argument on the motion, and having analyzed the pleadings requirements under each of the state law claims at issue, I GRANT in part and DENY in part the motion to dismiss.

LEGAL STANDARD

HN1[] A motion to dismiss is proper under *Federal Rule of Civil Procedure 12(b)(6)* where the pleadings fail to state a claim upon which relief can be granted. *FED. R. CIV. P. 12(b)(6)*. A complaint may be **[*1161]** dismissed if it does not allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. However, "a complaint [does not] suffice if it tenders naked assertions devoid of further factual enhancement." *Id.* (quotation marks and brackets omitted). "Threadbare recitals of the elements of a cause **[**30]** of action, supported by mere conclusory statements, do not suffice." *Id.* If a motion to dismiss is granted, a court should normally grant leave to amend unless it determines that the pleading could not possibly be cured by allegations of other facts. *Cook, Perkiss & Liehe v. N. Cal. Collection Serv., 911 F.2d 242, 247 (9th Cir. 1990)*.

DISCUSSION

I. END-PAYOR SECOND AMENDED COMPLAINT

Defendants move only to dismiss the EPPs' claims asserted under Massachusetts and Utah laws. In opposition, the EPPs agree to dismiss their claim under Utah law, asking that the dismissal be without prejudice to amending to bring in a Utah resident as a class representative in the future. EPP Oppo. [Dkt. No. 143] at 1. The EPPs' claim under Utah law is DISMISSED WITHOUT PREJUDICE.

With respect to the EPPs' claim under Massachusetts law, the question is whether End-Payor plaintiff Letizia Galloto, who is bringing her claim under *Section 9* of the Massachusetts Consumer Protection Act (CPA), was required to provide pre-suit notice to defendants prior to bringing her claim. *Mass. Gen. Law ch.93A § 9*. Plaintiff Galloto is a resident of Massachusetts who pleads that she indirectly purchased Lidoderm and/or the generic version at supracompetitive prices during the Class Period. EPP SAC, ¶ 17. In their Opposition, **[**31]** the EPPs argue that Galloto does not need to comply with the pre-suit notice requirement because none of the defendants maintain a place of business or keep assets in Massachusetts. EPP Oppo. at 2; *CPA, § 9(3)*.

Defendants counter that ***HN2***[] in order to avoid the pre-suit notice requirement, a plaintiff must plead that defendants do not maintain a place of business or keep assets in Massachusetts and the EPP SAC is devoid of those allegations. *See* *Bean v. Bank of New York Mellon, No. CIV.A. 12-10930-JCB, 2012 U.S. Dist. LEXIS*

---

[2] In my November 17, 2014 Order, some of the claims of the direct purchaser plaintiffs were also dismissed with leave to amend. The DPPs filed their Second Amended Complaint on December 19, 2014. Dkt. No. 121. Defendants have not moved to dismiss any claims asserted by the DPPs in their SAC.

[3] Defendants challenge the following claims: EPPs' state antitrust and monopolization claims under Utah and Massachusetts law; GEHA's state antitrust and monopolization claims under Rhode Island and Massachusetts law; GEHA's **[**29]** state consumer protection claims under 17 states' laws; and GEHA's unjust enrichment claims under 38 states' laws.

*132447, 2012 WL 4103913, at *7 (D. Mass. Sept. 18, 2012)* ("Although Bean is not required to allege the legal conclusion that the demand letter requirement is inapplicable, she must allege facts that BNY does not maintain a place of business or keep assets in Massachusetts to show the exception to the demand letter requirement applies to plead a Chapter 93A claim."); *Sumner v. Mortgage Elec. Registration Sys., Inc., No. CIV.A. 11-11910-DJC, 2012 U.S. Dist. LEXIS 104416, 2012 WL 3059429, at *6 (D. Mass. July 26, 2012)*.

Because the EPP SAC does not allege that none of the defendants maintain a place or business or have assets in Massachusetts — which would excuse the pre-suit demand requirement — defendants' motion to dismiss the EPPs' claim under Massachusetts law is GRANTED with leave to amend. The Third Amended Complaint shall be filed within 35 days of the date of this **[**32]** Order.[4]

[*1162] II. GEHA'S SECOND AMENDED COMPLAINT

Defendants challenge GEHA's state law antitrust, consumer protection, and unjust enrichment claims for various states.

A. State Law Antitrust and Consumer Protection Claims[5]

1. Rhode Island

In dismissing the EPPs' antitrust and monopolization claims under Rhode Island law, I concluded that the *Illinois Brick* repealer statute passed by Rhode Island in July 2013 was not retroactive and therefore that the EPPs' claims, including claims for injuries occurring after July 2013, were barred. Dkt. No. 117 at 45. GEHA challenges that conclusion and contends, at a minimum, that injuries resulting from purchases of Lidoderm after July 2013 should be actionable. GEHA Oppo. [Dkt. No. 146] at 4-5. GEHA argues that in cases where there is a continuing conspiracy to violate the federal antitrust laws, "this has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to **[**33]** recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. That, plus the fact that Rhode Island's antitrust statute prohibits "a construction of the Antitrust Act that is not in harmony with federal ***antitrust law***," *Siena v. Microsoft Corp., 796 A.2d 461, 464 (R.I. 2002)*, means, according to GEHA, that it should be able to pursue injuries suffered after July 2013, even though the antitrust conduct at issue was effectuated by the 2012 agreement.

The issue here is not a statute of limitations defense or a continuing conspiracy to commit antitrust conduct between the defendants. It is whether injury that occurred *after* Rhode Island passed legislation allowing indirect purchaser actions is barred because the only alleged antitrust conduct — the May 2012 agreement — occurred well before the repealer statute was passed. In effect, GEHA is attempting to overcome my prior conclusion that Rhode Island's repealer statute is not retroactive. I conclude, as before, that because the antitrust conduct identified by GEHA occurred before the Rhode Island legislature passed the law allowing for indirect purchaser actions, GEHA's claims under Rhode Island's ***antitrust law*** are barred. **[**34]** *See, e.g., Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 430 (E.D. Pa. 2010)* (looking to date of alleged antitrust conduct and not date of damage to determine whether claims were barred because conduct occurred before repealer statute passed); *see also In re Relafen Antitrust Litig., 225 F.R.D. 14, 26 (D. Mass. 2004)* (focusing

---

[4] At oral argument, the EPPs indicated that in addition to filing a Third Amended Complaint, they will also serve a demand letter on defendants in accordance with the statute.

[5] GEHA voluntarily withdraws its claims under the New Hampshire Consumer Protection Act. GEHA Oppo. at 2, fn. 2.

on alleged date of antitrust conduct, not date of resulting injury, where repealer statutes were prospective in application).[6] GEHA's claim under Rhode Island's antitrust statute is DISMISSED WITH PREJUDICE.

[*1163] *2.* Alaska

Defendants move to dismiss GEHA's claim under the Alaska consumer protection statute, arguing that it is barred by *Illinois Brick*. They note that Alaska's antitrust statute was amended in **[**35]** 2003 to clarify that only the Alaska Attorney General may seek monetary relief on behalf of indirect purchasers. *Alaska Stat. Ann. § 45.50.577(i)* (***HN3***[] "Only the attorney general, in a suit brought under this section, may seek monetary relief for injury indirectly sustained for a violation."). They point out that no court has construed Alaska's consumer protection statute (*Alaska Stat. Ann. § 45.50.531(a)*) to permit claims based on alleged antitrust and monopolization conduct by indirect purchasers. And a judge in this District has addressed this exact question and rejected the plaintiffs' attempt to circumvent the *Illinois Brick* bar by reliance on the more general Alaska Consumer Protection statute. *See In re Dynamic Random Access Memory (Dram) Antitrust Litig., 516 F. Supp. 2d 1072, 1108 (N.D. Cal. 2007)* ("recognizing that this court is not in the best position to decide unresolved legal issues for the state of Alaska, the court chooses to adopt the interpretation that will wreak the least amount of havoc on the existing law in Alaska. To that end, the court therefore declines to read the AUTPCPA to permit indirect purchaser standing, since no court has affirmatively found to the contrary, and since, under the current status of the law in Alaska, only the attorney general may sue **[**36]** for money damages on behalf of indirect purchasers as a result of antitrust violations.").

In opposition, GEHA relies only on the broad language of the Alaska consumer protection statute and on *Fed. Trade Comm'n v. Mylan Labs., Inc., 99 F. Supp. 2d 1, 5 (D.D.C. 1999)*. In *Mylan*, the court simply allowed the Alaska Attorney General to seek restitution on behalf of indirect purchasers under the Alaska consumer protection act for alleged anticompetitive acts. *Id.* That case was decided prior to the 2003 amendment to Alaska's antitrust statute and rests on the authority of the Alaska Attorney General.[7]

In absence of any persuasive authority from Alaska, and in light of the clear intent of the Alaska antitrust statute reserving to the Alaska Attorney General the ability to seek damages on behalf of indirect purchasers, I agree with the analysis of *In re Dram*, and DISMISS WITH PREJUDICE GEHA's claim under Alaska law.

3. Massachusetts

Defendants contend that GEHA **[**37]** lacks standing under *section 11* of Massachusetts' Consumer Protection Act because indirect purchasers who are engaged in "trade or commerce" cannot bring claims under *section 11* of the Massachusetts CPA. In my November 17, 2014 Order, I dismissed the EPPs' claims under *section 11* as to the City of Providence and the Iron Workers District Council or New England Welfare Fund ("Iron Workers," a health and welfare fund) because I found both entities were engaged in "trade or commerce" when paying for the Lidoderm patches on behalf of their employees or members. Dkt. No. 117 at 40-43. In that Order, I recognized that ***HN4***[] the Massachusetts statute focuses on the persons engaged in the "conduct of any trade or commerce" and that Massachusetts courts had struggled with identifying the line between **[*1164]** a consumer claim — which could be brought on behalf of an indirect purchasers — and a business claim — which could not. *Id.* I relied on the decision

---

[6] At the hearing, GEHA relied on a recent decision in *In re Aggrenox Antitrust Litigation* from the District Court of Connecticut, Case No. 14-md-2516 SRU. In that case, the court agreed that the Rhode Island repealer statute was not retroactive but then — in one sentence without any analysis of authority — held without explanation that indirect purchaser claims based on "overcharges incurred after" the date the Rhode Island repealer statute was passed could continue. In absence of any persuasive analysis that supports the court's conclusion, I will not follow that case.

[7] In *California v. Infineon Technologies AG, 531 F. Supp. 2d 1124, 1142 (N.D. Cal. 2007)*, the court addressed *Mylan* and concluded that in light of the 2003 amendment to Alaska's antitrust statute, the Attorney General was *only* allowed to seek recovery for indirect purchasers under Alaska's consumer protection statute after the 2003 amendment.

in *Frullo v. Landenberger, 61 Mass. App. Ct. 814, 814 N.E.2d 1105 (2004)*, which explained that "the choice appears to turn on whether a given party has undertaken the transaction in question for business reasons, or has engaged in it for purely personal reasons (such as the purchase of an item for personal use)" and that "any transaction in which the plaintiff is motivated by business **[**38]** considerations gives rise to claims only under the statute's business section." *Id. at 821*. Given that holding, I concluded that the city and the health and welfare plan who bought Lidoderm patches for their employees or members (or reimbursed them for those purchases) did so for business reasons and not for "purely personal" reasons. Dkt. No. 117 at 42.

GEHA does not attempt to distinguish itself from the Iron Workers. Instead, GEHA asserts that it was not engaged in trade or commerce when purchasing or reimbursing its members because it was acting solely as a "dual end payor along with its plan members in consumer retail transactions." GEHA Oppo. at 7-8, n.15. However, because GEHA did not engage in the transactions for its own "purely personal reasons" but instead acted in its business interests of providing health care coverage for its members, I find that GEHA's purchases were for business reasons that fall within the "business or trade" exception for indirect purchaser actions.[8] GEHA's claim under Massachusetts' CPA is DISMISSED WITH PREJUDICE.

4. Can GEHA be considered to have purchased Lidoderm for "personal, family, or household" purposes under consumer protection statutes of specific states?

Somewhat relatedly, defendants move to dismiss a number of state law consumer protection claims, arguing that as a health plan GEHA cannot be considered to have purchased Lidoderm patches for "personal, family, or household" purposes as required under various states' statutes. I will only address the arguments regarding the District of Columbia and Montana in this section because I am dismissing the claims for Maine and Pennsylvania on separate grounds (plaintiffs' failure to plausibly allege fraud or deception, as discussed in section 5, below).

a. District of Columbia

HN5[] The District of Columbia's consumer protection statute allows causes of action on behalf of a "consumer" who "does or would purchase, lease (as lessee), or receive and normally use" consumer goods or services "for personal, household, or family purposes." *D.C. Code § 28-3901(a)(2)(B)(i)*. As explained **[**40]** by the District of Columbia Court of Appeals, "the relevant distinction is one between retail and wholesale transactions. Transactions along the distribution chain that do not involve the ultimate retail customer are not 'consumer transactions' that the Act seeks to reach. Rather, it is the ultimate retail transaction between the final distributor and the individual member of the consuming public that the Act covers. Accordingly, **[*1165]** it is not the use to which the purchaser ultimately puts the goods or services, but rather the nature of the purchaser that determines the nature of the transaction." *Adam A. Weschler & Son, Inc. v. Klank, 561 A.2d 1003, 1005 (D.C. 1989)*; *see also* *Julian Ford v. ChartOne, Inc., 908 A.2d 72, 81 (D.C. 2006)* ("the CPPA 'was designed to police trade practices arising only out of consumer-merchant relationships,' . . . and does not apply to commercial dealings outside the consumer sphere." (citation omitted)).

Here the purchaser at issue — the one trying to secure a recovery for its indirect purchases — is GEHA. It is true that GEHA has pled it is a joint "end payor" for the Lidoderm patches, GEHA SAC ¶ 50, and that it has paid retail and mail order pharmacies in the District of Columbia $13,432.85 for Lidoderm patches during the relevant period. *Id.* ¶ 23. However, GEHA was not part of the **[**41]** "retail" transaction, in terms of deciding to purchase the product or actually purchasing it. It, instead, was required to pay the pharmacies for a portion of the expenses for the

---

[8] GEHA also argues, as the EPPs did on the prior motion to dismiss, that even if GEHA is considered to be engaged in "trade or commerce," it can still pursue a *Section 11* indirect **[**39]** purchaser claim under the rationale of *Blue Cross & Blue Shield v. AstraZeneca Pharms. LP (In re Pharm. Indus. Average Wholesale Price Litig.), 582 F.3d 156 (1st Cir. 2009)*. I specifically rejected that argument in my prior Order (Dkt. No. 117 at 42) and GEHA offers no persuasive reason why I should revisit that determination on this motion.

patches because its members filled personal prescriptions for Lidoderm patches. Although GEHA played a role in the retail transaction, its own transactions with the pharmacies were more akin to "wholesale" than retail transactions. Following the guidance of courts in the jurisdiction, I conclude that GEHA is not a consumer under the District of Columbia's statute and GEHA's claim is DISMISSED WITH PREJUDICE.[9]

b. Montana

HN6[] Montana's Unfair Trade Practices and Consumer Protection Act defines a "consumer" as "a person who purchases or leases goods, services, real property, or information primarily for personal, family, or household purposes." *Mont. Code Ann. § 30-14-102(1)*. The statute excludes persons who buy goods for resale. *See, e.g., In re Auto. Parts Antitrust Litig., No. 12-MD-02311, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *30 (E.D. Mich. June 6, 2013)* (automotive dealer plaintiffs could not bring a claim under Montana's UTPCA). In the absence of any authority from Montana, I find that GEHA is not a "consumer" **[**42]** under Montana's statute and I DISMISS WITH PREJUDICE GEHA's claims under Montana law.

5. GEHA's Allegations of Fraud or Deception

Defendants argue that under specific states' statutes, GEHA has failed to allege false, fraudulent, or deceptive conduct on the part of defendants to state a consumer protection claim. GEHA responds that in its SAC it added allegations about defendant Teikoku Seiyaku's fraud on the United States Patent and Trademark Office; specifically that during the prosecution of the '529 Patent, Teikoku failed to disclose multiple instances of prior art which would have prevented the patent from issuing. GEHA SAC ¶¶ 80-114, 227. GEHA also relies more generally on its allegations that defendants deceived the public by selling Lidoderm patches at prices that were not the result of fair and open market competition, but rather the result of the illegal payoffs to Watson. GEHA SAC ¶¶ 124-181.

As the pleading requirements under each state's law differs, I will address each jurisdiction in turn.[10]

[*1166] a. Arkansas

HN7[] The Arkansas Deceptive Trade Practices Act prohibits deceptive and unconscionable trade practices including any "unconscionable, false, or deceptive act or practice in business, commerce, or trade." *Ark. Code Ann. § 4-88-107(a)(10)*. The court in *State ex rel. Bryant v. R & A Inv. Co., 336 Ark. 289, 985 S.W.2d 299 (1999)* held that the legislature's use of "unconscionable" "illustrates that liberal construction of the DTPA is appropriate" and that *section (a)(10)* was intended to expand and not "limit the types of unfair trade practices actionable at common law or under other statutes of this state." *Id. at 302* ; *see also* *Baptist Health v. Murphy, 365 Ark. 115, 128 n.6, 226 S.W.3d 800 (2006)* (Arkansas Supreme Court relying on Black's Law Dictionary to define unconscionable as "an act that 'affront[s] the sense of justice, decency, or reasonableness.'").

GEHA relies on *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 405 (E.D. Pa. 2010)* which held that "plaintiffs' allegation that GSK engaged in a scheme designed to maintain its monopoly over the Wellbutrin SR market and prevent generic manufacturers from entering the market does fall under the catch all provision in *subsection (a)(10)*." *See also* *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 583 (M.D. Pa. 2009)* (allowing indirect end users of chocolate to pursue price fixing claims under

[9] GEHA's reliance on *In re Processed Egg Prods. Antitrust Litig., 851 F. Supp. 2d 867, 898 (E.D. Pa. 2012)* is misplaced, as that case does not discuss who is a "consumer" under the statute.

[10] GEHA argues that defendants are "implicitly" challenging its consumer protection claim under Arizona law. GEHA Oppo. at 3, n. 9. However as defendants clarified at the hearing, they did not challenge the Arizona consumer **[**43]** protection claim and, as such, GEHA may continue to pursue it.

ADTPA) and *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 178-179 (D. Me. 2004)* (finding that allegations of a conspiracy to keep Canadian cars out of the United **[**44]** States' market "unconscionable" under ADTPA, but failure to disclose conspiracy insufficient to constitute "false or deceptive" act). Three judges in this District have likewise held that price fixing allegations are sufficient to state "unconscionable" conduct under the ADTPA. *See* *In re Lithium Ion Batteries Antitrust Litig., Case No. 13-md-2420 YGR, 2014 U.S. Dist. LEXIS 141358, *124-125 (N.D. Cal. Oct. 2, 2014)* (relying on broad definition of "unconscionable" conduct adopted by Arkansas Supreme Court in *Baptist Health v. Murphy* as conduct that "affront[s] the sense of justice, decency, or reasonableness," and "includes conduct violative of public policy or statute."); *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1156-57 (N.D. Cal. 2009)*; *see also* *In re Dynamic Random Access Memory Antitrust Litig., 516 F. Supp. 2d 1072, 1108-09 (N.D. Cal. 2007)* (allowing indirect purchaser claim to proceed under ADTPA based on allegations that acts were unconscionable, including misleading consumers into believing price were set by a free market and that conduct was substantively unconscionable because it was one-sided and unfairly benefitted defendants at the expense of plaintiffs).

However, three other judges in this District have found that even in light of the broad definition of unconscionability adopted by the Arkansas Supreme **[**45]** Court, in absence of authority from Arkansas courts that the ADTPA extends to price fixing claims, those claims should be dismissed. *See* *In re TFT-LCD Antitrust Litig., 787 F. Supp. 2d 1036, 1042 (N.D. Cal. 2011)* (addressing *Baptist Health* but declining to recognize indirect purchaser claim for price fixing "in light of this split among federal authorities, and the lack of any cases from Arkansas state or federal courts recognizing a price-fixing claim under the ADTPA."); *In re Static Random Access Memory Antitrust Litig. (SRAM), Case No. 07-md-0819 CW, 2010 U.S. Dist. LEXIS 131002, *51 **[*1167]** (N.D. Cal. Dec. 8, 2010)* ("The Court has found no Arkansas case law indicating that the ADTPA reaches price-fixing conduct of the nature presented in this lawsuit. Thus, the Court declines to extend the statute to permit indirect purchasers to sue manufacturers for a conspiracy to fix prices); *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1029-30 (N.D. Cal. 2007)*; *see also* *In re Graphics Processing Units Antitrust Litig., 540 F. Supp. 2d 1085, 1101 (N.D. Cal. 2007)* (dismissing claim under ADTPA where there were no allegations other than the price fixing allegations).

In light of the split in federal authority and the absence of authority from Arkansas, I conclude — as Judges Illston, Wilken, and Alsup have — that the ADTPA does not extend **[**46]** to the monopoly and price inflation claims at issue here. GEHA's allegations regarding Teikoku's conduct at the PTO does not change this conclusion; GEHA has not cited any authority from Arkansas that would extend the reach of the consumer protection statute to allegedly fraudulent conduct that occurred *exclusively* before the PTO and was not directed to consumers. GEHA's consumer protection claims under Arkansas law are DISMISSED WITH PREJUDICE.

b. Idaho

Defendants move to dismiss GEHA's claims under the Idaho Consumer Protection Act, *Idaho Code § 48-601*, arguing that the antitrust conduct alleged does not fall within any of the categories of conduct specifically prohibited by the ICPA. *Idaho Code § 48-603*. GEHA responds that under *Section 48-603(17)* — prohibiting "any act or practice which is otherwise misleading, false, or deceptive to the consumer" — the allegations regarding Teikoku's fraud in securing the patent and defendants' overall scheme to charge inflated prices are covered.

Defendants point out that in *State ex rel. Wasden v. Daicel Chem. Indus., Ltd., 141 Idaho 102, 107-08, 106 P.3d 428, 433-34 (2005)*, the Idaho Supreme Court concluded that "there is nothing in the wording of *Idaho Code § 48-603* indicating that the list of conduct is merely illustrative. Price-fixing is not listed in *§ 48-603* as conduct that constitutes either an unfair method of competition **[**47]** or an unfair or deceptive act or practice." The court also specifically rejected the argument that the price-fixing conduct at issue (price fixing by sorbate manufacturers) could be covered by *48-603(18)*, which prohibits "unconscionable method, act or practice in the conduct of trade or commerce, as provided in *section 48-603C*" because the antitrust conduct was not directed to consumers. Following *Wasden, Judge Hamilton in In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d*

896, 907 (N.D. Cal. 2008), dismissed indirect purchaser claims under the Idaho statute because the Idaho Supreme Court "expressly held that indirect purchasers may not bring suit under the Idaho Consumer Protection Act."

Neither the *Wasden* Court nor Judge Hamilton considered whether antitrust conduct could be pursued under Section 48-603(17), as asserted by GEHA here. ***HN8***[] Like section 48-603C, examined by the Idaho Supreme Court in *Wasden*, Section 48-603(17) prohibits practices which are "misleading, false, or deceptive *to* the consumer." (emphasis added). Defendants argue that none of the conduct alleged--neither Teikoku's alleged fraudulent conduct before the PTO nor the agreement to settle the patent litigation in exchange for payments of product and a period of generic exclusivity to Watson--was "misleading, false, or deceptive" to consumers.

Two conflicting cases have addressed this **[**48]** question. GEHA relies on *In re DDAVP Indirect Purchaser Antitrust Litig.,* ***[*1168]*** *903 F. Supp. 2d 198, 225 (S.D.N.Y. 2012)*, where the court construed the ICPA liberally and because defendants had "not cited case law in which a court has dismissed consumers' claims under the ICPA if they suffered monetary loss as a result of a defendant's deceptive acts toward a third party," allowed the ICPA claim to proceed under section 48-603(17) based on plaintiffs' allegations that defendants committed fraud at the PTO and filed a baseless citizen petition with the FDA. *Id. at 214, 225*. The defendants point to *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380 (E.D. Pa. 2010)*, where the court held that conduct in violation of section 48-603(17) must be directed to consumers. The allegations in that case —defendants committed fraud at PTO and filed sham litigation against generic drug manufacturers in an attempt to preserve defendants' monopoly power — were not directed to consumers, but were directed to the PTO and genetic drug manufacturers. *Id. at 411*.

Sheet Metal Workers is more persuasive. Contrary to the *DDVAP* court's attempt to distinguish *Sheet Metal Workers*, the same subsection of 48-603(17) was at issue and discussed in both cases. I agree with the *Sheet Metal Workers* court that ***HN9***[] to be actionable, the conduct at issue must be directed to consumers. None of the conduct alleged here **[**49]** satisfies that requirement. GEHA's claims under the Idaho statute are DISMISSED WITH PREJUDICE.

c. Maine

HN10[] Under Maine's Unfair Trade Practices Act, "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful." *5 M.R.S. § 207*. The Maine Supreme Court has held "[i]n pricing cases under the Act the inquiry is whether the price has the effect of deceiving the consumer, or inducing her to purchase something that she would not otherwise purchase." *Tungate v. MacLean-Stevens Studios, Inc., 1998 ME 162, 714 A.2d 792, 797 (Me. 1998)*. Courts in this District have relied on *Tungate* to dismiss antitrust-based consumer protection claims where higher prices alleged could not have deceived or induced consumers into buying a product. *See, e.g., In re TFT-LCD Antitrust Litig., 586 F. Supp. 2d 1109, 1126 (N.D. Cal. 2008)* ("the complaint does not allege that the prices of LCD products had the effect of deceiving plaintiffs or inducing them to purchase something they would not otherwise purchase."); *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1031 (N.D. Cal. 2007)* ("Here, the higher prices plaintiffs allegedly paid for GPUs because of the price-fixing conspiracy could not have induced plaintiffs to purchase them. Arguing that higher prices induced consumers to make purchases simply does not make sense."). **[**50]**

At oral argument, GEHA attempted to get around *Tungate* by arguing that in addition to inflated prices, the allegations here also include the intentional delay of competing generic products. But GEHA admits in its SAC that the result of the agreement to delay the Endo defendants' generic was inflated prices. GEHA SAC ¶ 17.

GEHA also relies on its allegations that defendants' deceptive conduct with respect to the PTO is sufficient "deception" to allow this claim to go forward. GEHA Oppo. at 10-11, n.20. However, GEHA presents no case law discussing what constitutes "deceptive" conduct under the Maine statute to support its augment that deceptive conduct before the PTO — which allegedly resulted in the issuance of the '529 Patent — suffices.[11] In absence of any persuasive authority that Maine would recognize the fraud committed by Teikoku at the PTO as a ground for **[*1169]** "deception" under its consumer protection statute, the claim under Maine's UTPA is DISMISSED WITH PREJUDICE.

d. Michigan

HN11[] The Michigan Consumer Protection Act (MICPA) prohibits specifically identified "[u]nfair, unconscionable, or deceptive methods, acts or practices." *Mich. Comp. Laws § 445.903(1)*. Defendants cite *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 176 (D. Me. 2004)*, which rejected the argument that defendants' failure to inform consumers of the antitrust conspiracy (to keep out Canadian cars, resulting in inflated new car prices in the United States) was actionable "deception" under MICPA. *Id. at 189*.

GEHA relies on *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 2014 U.S. Dist. LEXIS 167204, *80 (E.D. Pa. Dec. 3, 2014)*. However, in *In re Suboxone*, the court refused to dismiss the end payor's claim under MICPA because the complaint adequately alleged fraudulent and deceptive conduct; namely that (i) defendant fabricated a safety issue regarding its drug for the purpose of impairing generic competition and eliciting monopoly proceeds from consumers, **[**52]** (ii) broadcast the false safety issue to the FDA, doctors, industry participants, and the public, and (iii) made misrepresentations in a Citizen Petition to the FDA. *Id. at *77-78*. Here, the only falsity relied on by GEHA is defendants' conduct in prosecuting of the '529 Patent. There is not the sort of wide-spread dissemination of false information to the *public* that was alleged in *In re Suboxone*.

I conclude that the deceptive conduct alleged is more similar to the omissions at issue in *New Motor Vehicles* as opposed to the broad dissemination of false safety concerns at issue in *In re Suboxone*. GEHA's claims under Michigan's statute are DISMISSED WITH PREJUDICE.

e. Minnesota

HN12[] Minnesota's Uniform Deceptive Trade Practices Act (MUDTPA) prohibits acts involving "deceptive trade practice[s]." *Minn. Stat. § 325D.44*. GEHA argues that its allegations satisfy *subsection (13)*, which makes actionable conduct that "similarly creates a likelihood of confusion or of misunderstanding." *Minn. Stat. § 325D.44(13)*. The only case relied on by GEHA is *State by Humphrey v. Philip Morris, Inc., 551 N.W.2d 490, 497 (Minn. 1996)*. However, that case is inapposite because it addressed a different question (standing) and rested on far different allegations regarding deception.[12]

---

[11] In support of its general argument that allegations of fraud before the PTO is sufficient to be actionable deception and fraud under state's consumer protection laws, GEHA relies on three cases: *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 2014 U.S. Dist. LEXIS 167204, 1 (E.D. Pa. Dec. 3, 2014)*; *In re DDAVP Indirect Purchaser Antitrust Litig. v. Ferring Pharms. Inc., 903 F. Supp. 2d 198, 224 (S.D.N.Y. 2012)*; *Abbott Labs. v. Teva Pharms. USA, Inc., 432 F. Supp. 2d 408, 433 (D. Del. 2006)*. In each of these three cases, the courts found that allegations **[**51]** that defendants committed fraud on the PTO, filed sham patent litigation and/or filed sham Citizen Petitions with the FDA were sufficient to remove the cases from the scope of preemption under the patent laws and *Noerr-Pennington* immunity for petitioning the government. However, none of those cases addressed Maine's UPTA and GEHA does not argue why the language of Maine's UPTA would be specifically covered by the rationale in any of these cases.

[12] In *State by Humphrey*, the Minnesota Supreme Court addressed only Blue Cross's standing to sue for consumer **[**53]** protection and antitrust claims against tobacco companies on the theory that Blue Cross paid inflated costs due to the tobacco companies' conduct. *Id. at 495-97*. The allegations of deceptive conduct by the tobacco companies included that the tobacco companies illegally conspired to suppress research on the deleterious effects of smoking, manipulated nicotine levels in cigarettes, undertook a duty but failed to protect the public health by its assertions that it would cooperate with public health

Looking more broadly at the types of ***HN13***[] actionable conduct under MUDTPA — **[*1170]** prohibiting sellers from passing off good, causing likelihood of confusion as to product qualities/origin, false representations about goods — it appears that each of the prohibited acts focuses on affirmative representations made by the sellers to consumers. *Minn. Stat. § 325D.44(1) — (13)*. In absence of any authority directly on point, I find that the conduct alleged by GEHA — antitrust conduct and fraud before the PTO — are not acts which create a "likelihood of confusion" or "misunderstanding" on the part of consumers under MUDTPA. **[**54]**

GEHA also relies on Minnesota's Prevention of Consumer Fraud Act (MPCFA). *See* GEHA SAC ¶ 243. Defendants did not mention MPCFA in their motion to dismiss, but in reply argue that they inadvertently omitted a citation to MPCFA and that for the same reasons that the MUDPTA claim must be dismissed, so must the MPCFA claim. Reply at 11, n. 15. ***HN14***[] The MPCFA prohibits "fraud, misrepresentation, deceptive practices" "with the intent that others rely thereon in connection with the sale of any merchandise." *Minn. Stat. § 325F.69*. I find that in absence of any authority interpreting the breadth of MPCFA, the alleged fraudulent and deceptive conduct at issue — which occurred only in negotiations between defendants and before the PTO — is not the type of fraud, misrepresentation or deceptive practices covered by MPCFA. GEHA's claim is DISMISSED WITH PREJUDICE.

f. Oregon

HN15[] Oregon's Unlawful Trade Practices Act, *Or. Rev. Stat. § 646.605*, prohibits "any unconscionable tactic in connection with selling, renting or disposing of real estate, goods or services, or collecting or enforcing an obligation." *Or. Rev. Stat. § 646.607*. "Unconscionable" tactics "include, but are not limited to, actions by which a person" "(a) [k]nowingly takes advantage of a customer's physical infirmity, ignorance, **[**55]** illiteracy or inability to understand the language of the agreement; (b) [k]nowingly permits a customer to enter into a transaction from which the customer will derive no material benefit; (c) [p]ermits a customer to enter into a transaction with knowledge that there is no reasonable probability of payment of the attendant financial obligation in full by the customer when due." *Or. Rev. Stat. Ann. § 646.605(9)*.

Defendants argue that because the conduct alleged — conspiracy to maintain prices/profits and fraud on the PTO — are not the sorts of acts covered by the definition of "unconscionable" in the statute, GEHA cannot state a claim under OUTPA. GEHA responds that the types of unconscionable acts listed in the statute are examples but not an exclusive list.

In *In re Dynamic Random Access Memory (Dram) Antitrust Litig., 516 F. Supp. 2d 1072, 1115 (N.D. Cal. 2007)*, the court did not address the "unconscionability" subsection of the statute, but instead the catchall provision which prohibits "other unfair or deceptive conduct in trade or commerce." *Or. Rev. Stat. § 646.608(1)(u)*. The court concluded that the horizontal price fixing allegations did not state a claim under OUTPA because none "of the **[*1171]** allegations of plaintiffs' complaint specifically allege false and misleading representations made by **[**56]** defendants to plaintiffs, or set forth conduct that caused plaintiffs confusion or misunderstanding, as is intended by OUTPA." *Id. at 1115*.

While a different subsection of the statute is being asserted by GEHA in this case, Judge Hamilton's approach makes sense. GEHA has failed to cite to any authority applying the "unconscionable" tactics provision and the conduct alleged here is not sufficiently similar to the examples provided in the statute of actionable unconscionable acts. In absence of authority from Oregon, I will not extend the statute to cover the allegations of GEHA asserted here. GEHA's claim is DISMISSED WITH PREJDUICE.

g. Pennsylvania

---

authorities, and utilized false advertising. *Id. at 492, 495*. Those are starkly different allegations than the "deception" alleged in this case.

HN16[] The Pennsylvania Unfair Trade Practices and Consumer Protection Law (UTPCPL) prohibits specific unfair methods of competition and unfair or deceptive trade practices, including "[e]ngaging in any other fraudulent or deceptive conduct which creates a likelihood of confusion or of misunderstanding." *73 Penn. Stat. § 201-2(4)(xxi)*. GEHA argues that its allegations are actionable under the catchall provision, and for support relies on *Grimes v. Enter. Leasing Co. of Phila., LLC, 2013 PA Super 57, 66 A.3d 330, 332 (Pa. Superior Ct. 2013)*, *reversed on other grounds by* *105 A.3d 1188, 1190 (Pa. 2014)*.

In *Grimes*, the allegations were not simply that defendants charged a consumer "inflated prices," but that defendants made intentionally **[**57]** inflated the cost of the damage to a rental car, failed to explain justification for the inflated charges, and improperly sought to collect those charges. *Id. at 336-37*. There are no similar facts alleged here to demonstrate that defendants' conduct created a "likelihood of confusion or of misunderstanding" on behalf of purchasers of Lidoderm patches. *See also* *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 200 (D. Me. 2004)* (finding the language of the UPTCPL catchall section "requires fraud or deception" and allegations of conspiracy to prevent less expensive Canadian vehicles from entering the American market insufficient to state a claim). Accordingly, in the absence of authority from Pennsylvania to extend the statute to cover GEHA's allegations here, its claim is DISMISSED WITH PREJUDICE.

h. South Dakota

HN17[] Under South Dakota's Deceptive Trade Practices and Consumer Protection statute, it is a deceptive practice to "[k]nowingly act, use, or employ any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any material fact in connection with the sale or advertisement of any merchandise." *S.D. Codified Laws § 37-24-6(1)*. In *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160 (D. Me. 2004)*, the court determined that the SDDTPA required proof of an affirmative misrepresentation, and the allegations **[**58]** in that complaint — that consumers suffered injury because defendants conspired to keep Canadian cars out of the market — were insufficient to state a claim of fraud or deception under the statute. *Id. at 202-03*.

This analysis is consistent with *Nw. Pub. Serv., a Div. of Nw. Corp. v. Union Carbide Corp., 236 F. Supp. 2d 966 (D.S.D. 2002)*,which held that "proof of an intentional misrepresentation or concealment of a fact on which plaintiff relied and that caused an injury to plaintiff" is required to state a claim under *§ 37-24-6*. *Id. at 973-74*. Here, there are no allegations that defendants made affirmative **[*1172]** misrepresentations that were passed along to the purchasers of Lidoderm.

GEHA relies on *In re DDAVP Indirect Purchaser Antitrust Litig. v. Ferring Pharms. Inc., 903 F. Supp. 2d 198 (S.D.N.Y. 2012)*. There, the court concluded that because defendants "made misrepresentations to the PTO and FDA, which in turn allowed Defendants to manufacture and market DDAVP to consumers on the premise that the patent underlying DDVAP was legally obtained, Plaintiffs were 'adversely affected' by the fraud committed by Defendants within the meaning of the SDDTPA when they relied on such representations and paid supra-competitive prices for the drug." *Id. at 229* (misrepresentations to the PTO included submitting declarations from purported non-interested parties who were in fact interested/aligned with defendants' interests and FDA citizen **[**59]** petition was alleged to be baseless). However, the only South Dakota case the *DDAVP* court relied on is *Brookings Mun. Utils., Inc. v. Amoco Chem. Co., 103 F. Supp. 2d 1169 (D.S.D. 2000)*, which is distinguishable. The *Brookings* court held that **HN18**[] where *affirmative* misrepresentations were made by defendant and passed along to the consumers by a third-party, those misrepresentations were nonetheless actionable. *See* *id. at 1178* ("Defendants cannot escape liability to plaintiffs for their alleged misrepresentations simply because they did not make any statements directly to plaintiffs. Defendants may be liable to plaintiffs, even if plaintiffs only received misrepresentations through" a third party."). Here, there are no similar allegations that affirmative misrepresentations or concealment of a fact were passed along to or relied upon by GEHA.

Following the more in-depth analysis of the *New Motor Vehicles* and *Brookings* cases, GEHA's claims under South Dakota law are DISMISSED WITH PREJUDICE.

i. West Virginia

HN19[] West Virginia's Consumer Credit and Protection Act prohibits "unfair methods of competition and unfair or deceptive acts or practices" and defines trade or commerce as "advertising, offering for sale, sale or distribution of any goods or services and shall include any trade or **[**60]** commerce, directly or indirectly, affecting the people of this state." W. Va. Code § 46A-6-102. One judge in this District has found that general antitrust allegations are insufficient to establish a violation of WCCCPA. In re Dynamic Random Access Memory Antitrust Litig., 516 F. Supp. 2d 1072, 1118 (N.D. Cal. 2007) ("reading the list literally, nothing on the list targets what might be called traditional antitrust conduct - e.g., price-fixing and market allocation such as that alleged by plaintiffs here, or conduct otherwise constituting a horizontal or vertical restraint on trade or commerce. Rather, the list is aimed at conduct that, in one way or another, 'creates a likelihood of confusion or of misunderstanding' with respect to goods, services or businesses, or involves deceptive, false, or misleading statements and representations in connection with goods, services and businesses."). The court also concluded that "[w]hile the WVCCP expressly states that the list of enumerated acts and practices is not meant to be exclusive, it is nonetheless clear that the statute is aimed at conduct different from the allegations of price-fixing asserted by plaintiffs here." Id. at 1072.

The *DRAM* Court also expressly distinguished the one case relied on by GEHA **[**61]** here, FTC v. Mylan Lab., Inc., 99 F. Supp. 2d 1 (D.D.C. 1999). In *Mylan*, the court allowed direct and indirect purchaser claims for antitrust conduct to continue under WVCCP. Id. at 10. The *DRAM* **[*1173]** court declined to follow *Mylan* because that decision did "not contain any detailed rationale for finding indirect purchaser standing under the statute, or how price-fixing allegations fall within the purview of the statute." Id. at 1119.

In absence of any West Virginia cases defining unfair methods of competition and unfair or deceptive acts or practices to include the types of antitrust allegations and fraud on the PTO allegations asserted here, I will follow Judge Hamilton's analysis in *DRAM*. GEHA's claim under West Virginia law is DISMISSED WITH PREJUDICE.

6. Intrastate Commerce

Defendants contend that for two states, GEHA has failed to allege sufficient intrastate commerce to state actionable consumer protection claims. I disagree.

a. New York

Defendants argue that **HN20**[] New York's consumer protection statute, N.Y. Gen. Bus. Law § 349, applies only to commercial conduct occurring within New York and for it to apply, "the transaction in which the consumer is deceived must occur in New York." Goshen v. Mut. Life Ins. Co., 98 N.Y.2d 314, 324, 774 N.E.2d 1190, 746 N.Y.S.2d 858 (2002). Defendants argue that because GEHA's SAC does not allege any conduct took place in New York, this claim **[**62]** must be dismissed.

The court in Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 263 F.R.D. 205 (E.D. Pa. 2009) dismissed plaintiffs' claim under New York consumer protection statute because plaintiffs' allegations of fraud on patent examiners and filling of sham litigation was not deception that took place in New York. Id. at 214. However, in In re Suboxone, 64 F. Supp. 3d 665, 2014 U.S. Dist. LEXIS 167204 (E.D. Pa. Dec. 3, 2014), the court concluded that allegations that overcharges for drugs occurred in New York, were sufficient to establish an intrastate nexus. Id. at *83; *see also* In re DDAVP Indirect Purchaser Antitrust Litig. v. Ferring Pharms. Inc., 903 F. Supp. 2d 198, 228 (S.D.N.Y. 2012) (finding that defendants' fraudulent conduct before the PTO and FDA in effort to maintain drug prices "was plausibly 'imbued with a degree of subterfuge,' . . . . and the fraud was plausibly designed to prevent competitors' entry into the market, thereby allowing Defendants to overcharge consumers for DDAVP, Plaintiffs have stated a claim under Section 349.").

Here, GEHA alleges that it paid retail and mail order pharmacies in New York $21,464.46 for Lidoderm. GEHA SAC ¶ 23. That is sufficient to state an intrastate nexus under New York's statute.

b. North Carolina

Defendants move to dismiss GEHA's claim ***HN21***[] under North Carolina's Unfair and Deceptive Trade Practices Act (NCUDTPA) because only conduct that has a "substantial effect on in-state business" is actionable, and **[**63]** the allegations here amount only to incidental, not substantial, effect.

The "substantial effects" test was first applied under the NCUDPTA by a district court in North Carolina considering whether a foreign corporation who had no operations and suffered no injury in North Carolina could bring an unfair practices claim under NCUDPTA consistent with jurisdictional and *commerce clause* concerns. *See The 'In' Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494, 501 (M.D.N.C. 1987)* (finding that the UDPTA is not available "to a foreign plaintiff suing a resident defendant over alleged foreign injuries having a negligible effect, if any, **[*1174]** on North Carolina trade or commerce."). That case found that NCUDPTA "allows personal jurisdiction over defendants in a case involving foreign acts if an injury to person or property occurs within North Carolina and, at or about the time of the injury, the defendants were either working in North Carolina or had products in the North Carolina commerce through the ordinary course of business." *Id. at 501*. The court also held that in order not to unduly burden interstate commerce, courts should not allow the Act to have extra-territorial effect and be used by a foreign plaintiff with no operations in the state because to do so would raise due process concerns. **[**64]** *Id. at 502*.[13]

As GEHA points out, the NCUDPTA itself does not contain or mandate a "substantial effects" analysis. The case law relied on by defendants is inapposite. Like *The 'In' Porters, S.A. v. Hanes Printables, Inc.*, a number of the cases on which they rely did not address claims of in-state injury by plaintiffs.[14] Defendants cite another case where the district court relied on *The 'In' Porters* reasoning to dismiss indirect purchaser claims where there were no allegations of "substantial wrongful conduct" in North Carolina.[15] I decline to follow that case because it did not recognize the specific type of cases that call for application of the "substantial effects" requirement, *e.g.*, a foreign plaintiff with no in-state **[**65]** injury or attempted extra-territorial application of NCUDTPA.

B. Unjust Enrichment Claims[16]

---

[13] The *The 'In' Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494, 501 (M.D.N.C. 1987)* court relied extensively on *Am. Rockwool, Inc. v. Owens-Corning Fiberglas Corp., 640 F. Supp. 1411, 1428 (E.D.N.C. 1986)* for imposing a "substantial" injury requirement to determine whether the NCUDTPA could be asserted by the foreign plaintiff. The *Am. Rockwool* case determined whether North Carolina law could be applied by a plaintiff to seek recovery for "multi-state conduct" and not just acts occurring in North Carolina. *Id. at 1428*. None of those issues are involved in *this* case, where GEHA seeks to apply North Carolina law only to remedy injuries suffered in North Carolina.

[14] *See, e.g., Duke Energy Int'l, L.L.C. v. Napoli, 748 F. Supp. 2d 656, 677 (S.D. Tex. 2010)* (dismissing NCUDTPA where plaintiff failed to explain how it "experienced harm in North Carolina as a the result of the alleged wrongful conduct" and failed to allege any harm to North Carolina consumers); *In re Parmalat, 383 F. Supp. 2d 587, 603 (S.D.N.Y. 2005)*(dismissing claim where plaintiff failed to allege any in-state injury); *Merck & Co. Inc. v. Lyon, 941 F. Supp. 1443, 1463 (M.D.N.C. 1996)* (dismissing claim where foreign plaintiffs failed to allege in-state injury); *Dixie Yarns, Inc. v. Plantation Knits, Inc., No. 3:93CV301-P, 1994 U.S. Dist. LEXIS 21725, 1994 WL 910955, at *2 (W.D.N.C. July 12, 1994)* (declining to apply NCUDTPA where unclear whether plaintiff suffered injury in North Carolina and defendants did not manufacture or sell their product in North Carolina).

[15] *See In re Refrigerant Compressors Antitrust Litig., No. 2:09-MD-02042, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *19 (E.D. Mich. Apr. 9, 2013)* (where "alleged conspiracy caused manufacturers to pay inflated prices for compressors and, any retail customers who ultimately purchased finished products containing compressors paid an inflated price for those products," such effect is merely "an incidental in-state injury" absent allegations that defendants "engaged in any wrongful conduct in North Carolina.").

1. Unjust Enrichment Claims for States that Have Not Passed *Illinois Brick* Repealers

In my November 17, 2014 Order, I reviewed the split in authority among district **[*1175]** courts concerning whether the EPPs could assert unjust enrichment claims for states which had not passed an *Illinois Brick* repealer statute and followed the majority of courts that found they could not. Dkt. 117 at 46-48. GEHA asks me to reconsider that decision, arguing that it ignores the lack of Sherman Act preemptive force over state ***antitrust law*** as well as the interplay between state common law and statutory law. GEHA Oppo. at 14-15.

GEHA does not rely on any authority that I did not address in my prior opinion or address the district court decisions I relied on. It cannot make an "end run" around *Illinois Brick* by relying on its unjust enrichment claim for states that have not enacted an *Illinois Brick* repealer statute absent authority from the courts of those states that would allow unjust enrichment claims to proceed. Therefore, **[**67]** GEHA's unjust enrichment claims under the laws of Alaska, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Montana, New Jersey, Oklahoma, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Texas, Virginia, Washington, and Wyoming are DISMISSED WITH PREJUDICE.

2. Autonomous Unjust Enrichment Claims

Relatedly, defendants argue that GEHA's "autonomous" unjust enrichment claims must be dismissed where the recovery is prohibited by *Illinois Brick* or under the particular requirements of a state's consumer protection statute. *See, e.g., In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 542 (E.D. Pa. 2010)* (discussing distinction between autonomous and parasitic unjust enrichment claims and concluding that allowing autonomous unjust enrichment claims where plaintiffs were unable to state antitrust or consumer protection claims "would undermine state legislative policies and an entire body of substantive law."); *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 208 n.13 (D. Me. 2004)* (same).[17]

I agree that to the extent GEHA has been unable to assert a claim under a state's antitrust or consumer protection statute, GEHA cannot assert an unjust enrichment claim unless it has support for that proposition from authority in that state. Without such support, I will not allow an autonomous claim for restitution to proceed.[18]

3. Autonomous Unjust Enrichment Claims in States with Repealer Statutes

Defendants make a number of additional arguments why GEHA's remaining unjust enrichment claims fail under specific state laws. I address each in turn.

a. Arizona

---

[16] GEHA voluntarily withdraws its unjust enrichment claims under Idaho and New **[**66]** Jersey common law. GEHA Oppo. at 2, fn. 3. Here, GEHA has alleged in-state injury and that defendants' products were being sold in North Carolina. GEHA SAC ¶ 23. That is sufficient at this juncture to state a claim under the NCUDTPA.

[17] Defendants also argue that to the extent GEHA's claims are "parasitic" unjust enrichment claims — claims which rely on a violation of a state's antitrust or consumer protection statutes — then those claims must fail where GEHA has failed to adequately plead a claim under either **[**68]** the antitrust or consumer protection statutes of those states. In its opposition brief, GEHA clarifies that the unjust enrichment claims it intends to pursue are "autonomous" claims that are not tethered to its allegations of antitrust or consumer protection violations. GEHA Oppo. at 15-16.

[18] The unjust enrichment claims DISMISSED WITH PREJUDICE on this basis are Alabama and Arkansas.

Defendants assert that Arizona requires that a "direct benefit" pass from a plaintiff to the defendant to state an unjust enrichment claim under Arizona law. Defendants rely *on* *In re Refrigerant Compressors Antitrust Litig. (Compressors* ***[*1176]*** *II), No. 2:09-MD-02042, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *26 (E.D. Mich. Apr. 9, 2013)*, which dismissed **[**69]** unjust enrichment claims under Arizona and other jurisdictions' laws because "[a]ny benefit that the IP Plaintiffs conferred would be on others in the chain of distribution from whom they purchased, not on Defendants." *2013 U.S. Dist. LEXIS 50737, [WL] at *26*. However, the *Compressors II* court did not cite or rely on *any* cases from Arizona or any cases applying Arizona's unjust enrichment statute in reaching its conclusion.

GEHA relies on *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d 836, 2014 U.S. Dist. LEXIS 136404, 232 (E.D. Mich. Sept. 25, 2014)*, which denied a motion to dismiss ***HN22***[] an unjust enrichment claim under Arizona law, finding that the " critical inquiry" was not whether a benefit was conferred directly, but whether plaintiff "'can establish the relationship between his detriment and the defendant's benefit "flow from the challenged conduct."'" *Id. at *232* (quoting *In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 618, 669 (E.D. Mich. 2000))*.[19] Similarly, in *D.R. Ward Constr. Co. v. Rohm & Haas Co., 470 F. Supp. 2d 485 (E.D. Pa. 2006)*, the court declined to dismiss an unjust enrichment claim under Arizona law where plaintiffs alleged that defendants were enriched by colluding to inflate prices, plaintiffs were impoverished by paying the inflated price, and that plaintiffs' overpayment flowed up the distribution chain to inure to defendants' financial benefit. *Id. at 507-08*. The court reached its conclusion after reviewing Arizona unjust enrichment cases. *Id. at 507, n.10*.

I will follow *In re Auto Parts* and *D.R. Ward*, which relied on cases decided by Arizona courts. GEHA has adequately alleged a traceable benefit to defendants from their co-payments for Lidoderm patches.

b. California

In my November 17, 2014 Order, I dismissed the EPPs' unjust enrichment claim under California law finding that the weight of authority in California state and federal court decisions is that unjust enrichment does not state an independent claim under California law. Dkt. No. 117 at 50. GEHA argues that in light of the split on this issue, the court should reconsider and allow its claim to go forward. Oppo. at 23-24. In absence of any newly decided authority on the issue, I will not reconsider. GEHA's stand-alone claim for unjust enrichment under California law is DISMISSED WITH PREJUDICE.

c. District of Columbia

Defendants contend that GEHA fails **[**71]** to allege a sufficient direct benefit under District of Columbia law, but their authorities are not helpful. Defendants rely on *Minebea Co. v. Papst, 444 F. Supp. 2d 68 (D.D.C. 2006)*, where the court dismissed the unjust enrichment claim because plaintiff never "afforded any direct benefit" to the defendant. *Id. at 186*. However, no benefit was conferred because there was no evidence plaintiff ever paid anything to the defendant with respect to the patent portfolio at issue and the defendant actually paid substantial consideration for the patents to a third-party. *Id.* Defendants also cite *Compressors II, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *26*, which dismissed an unjust enrichment claim under District of Columbia law without **[*1177]** any analysis or citation to any case decided under District of Columbia law. In addition, defendants point to *Sabre Int'l Sec. v. Torres Advanced Enter. Solutions, LLC, 60 F. Supp. 3d 36, 2014 U.S. Dist. LEXIS 116761, 2014 WL 4162236, at *4 (D.D.C. Aug. 21, 2014)*. The unjust enrichment claim there was dismissed as to individual defendants because there were no factual allegations that connected the individual defendants' salaries or bonuses

---

[19] The *In re Auto Parts* court also relied **[**70]** on a district court case from Arizona, *Yee v. Nat'l Gypsum Co., 2010 U.S. Dist. LEXIS 61488 (D. Ariz. June 22, 2010)*, which dismissed an unjust enrichment claim absent an allegation that plaintiff conferred some benefit on defendant — the manufacturer of a product plaintiff indirectly purchased. *Id. at * 12*. However, there was no discussion of a need for that benefit to have been conferred "directly" to the defendant from plaintiff.

to the monies plaintiff paid the individual defendants' company. *Cf.* [Danny Lynn Elec. & Plumbing, LLC v. Veolia ES Solid Waste Se., Inc., 2011 U.S. Dist. LEXIS 78557, 2011 WL 2893629 (M.D. Ala. July 19, 2011)].

GEHA relies on *In re TFT-LCD (Flat Panel) Antitrust Litig., Case No. 07-1827 SI, 2011 U.S. Dist. LEXIS 110635, 49 (N.D. Cal. Sept. 28, 2011)*, which distinguished *Minebea Co.* and allowed ***HN23***[] indirect purchasers to pursue their unjust enrichment claims under District of Columbia law despite the **[**72]** lack of a "direct benefit" that defendants claim is required. *Id. at *48-49*; *see also* *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d 836, 2014 U.S. Dist. LEXIS 136404, 235 (E.D. Mich. Sept. 25, 2014)* (following *In re TFT-LCD* and allowing unjust enrichment claims under District of Columbia law to proceed). I find that in absence of cases arising under District of Columbia law that support defendants' proposed narrow definition of direct benefit, the claims under District of Columbia law can proceed.

d. Kansas

Defendants contend that under Kansas law, the premise of an unjust enrichment claim is that defendant received a benefit without providing consideration. Because GEHA has not asserted that it failed to receive the Lidoderm patches, defendants argue that GEHA cannot assert this claim. GEHA responds that a plaintiff's unjust enrichment claim is not vitiated where a plaintiff received some consideration (here the Lidoderm patches) as long as the consideration was not adequate, *e.g.*, the defendant was paid more than it should have been and was still unjustly enriched. *In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 545 (D.N.J. 2004)* (Plaintiffs' receipt of valuable medicine for their payments does not, as Defendants contend, bar an unjust enrichment claim."); *see also* *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d 836, 2014 U.S. Dist. LEXIS 136404, 229 (E.D. Mich. Sept. 25, 2014)* ("the Court disagrees with Defendants that the exchange of Bearings for payment bars IPPs' unjust enrichment **[**73]** claims.

The issue is whether the transaction was unjust."). The cases defendants rely on are inapposite, dealing mostly with the situation where a property owner is sued by an unpaid subcontractor hired by a tenant. In *Senne & Co. v. Simon Capital Ltd. P'ship, 155 P.3d 1220 (Kan. Ct. App. 2007)* the court recognized the unremarkable proposition that a "claim for unjust enrichment is that the defendant received a benefit without having paid for it." The court there dismissed the claim for unjust enrichment because the defendant — the mall property owner — had not contracted for plaintiff's construction work (the property lessor had) and had not benefitted from it or from the lessors' failure to pay plaintiff. *Id.* The court's analysis does not bar the type of unjust enrichment claim at issue here. *See also* [Tradesmen Int'l, Inc. v. U.S. Postal Serv., 234 F. Supp. 2d 1191, 1204 (D. Kan. 2002)] (addressing the "special circumstances" where "under which an unjust enrichment claim may be brought by a subcontractor against an owner, absent privity," may proceed). Absent any case law on point to support defendants' attempt to limit the unjust enrichment **[*1178]** claim under Kansas law, this claim may proceed.

e. New York

As defendants point out, in *Fenerjian v. Nongshim Co., Ltd, Case No. 13-CV-04115-WHO, 72 F. Supp. 3d 1058, 2014 U.S. Dist. LEXIS 156229, 2014 WL 5685562 (N.D. Cal. Nov. 4, 2014)*, I held that "the transactions and relationships between the **[**74]** indirect purchaser plaintiffs and the defendants" — where plaintiffs indirectly purchased allegedly price-fixed noodles — were "too attenuated to state an unjust enrichment claim under New York law" after considering cases decided by New York's highest court. *2014 U.S. Dist. LEXIS 156229, [WL] at *22-23*. GEHA does not provide any basis on which to distinguish my conclusion in *Fenerjian* based on the facts alleged here. Therefore, GEHA's unjust enrichment claim under New York law is DISMISSED WITH PREJUDICE. ***f. North Carolina***

There is a split in authority whether North Carolina requires the type of narrowly defined direct benefit proposed by defendants (i.e., direct payment, not through a third-party) to state an unjust enrichment claim. Defendants rely on *In re Aftermarket Filters Antitrust Litig., 2010 U.S. Dist. LEXIS 32652, 2010 WL 1416259, at *3 (N.D. Ill. Apr. 1, 2010)* and *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 546 (E.D. Pa. 2010)*, both of which adopted a narrow definition of "direct benefit" as requiring a plaintiff to confer a benefit directly on a defendant, and not through a third-party.[20]

However, more recently the court in *In re Processed Egg Products Antitrust Litig., 851 F. Supp. 2d 867, 932 (E.D. Pa. 2012)*, rejected that argument. In doing so, the court reviewed the North Carolina appellate cases relied **[**75]** on by the *Aftermarket* and *Flonase* courts, found those cases to be unpersuasive, and instead relied on North Carolina Supreme Court cases which had taken a more expansive view of unjust enrichment claims under North Carolina law. *In re Processed Egg Products Antitrust Litig., 851 F. Supp. 2d 867 at 931-32* (discussing *Booe v. Shadrick, 322 N.C. 567, 369 S.E.2d 554 (1988)* and *Embree Const. Group, Inc. v. Rafcor, Inc., 330 N.C. 487, 411 S.E.2d 916 (1992)*, which did not require a benefit to flow from plaintiff directly to defendant). This analysis is consistent with the decision of a court in this district. In *In re TFT-LCD Antitrust Litig., 599 F. Supp. 2d 1179 (N.D. Cal. 2009)*, the court likewise rejected the narrow definition applied in *Effler* and accepted the broader application of unjust enrichment from the North Carolina Supreme Court in *Booe. Id. at 1190*. The court concluded that plaintiffs' allegations that they conferred a benefit on defendants by paying higher prices for LCD products than they would have absent the alleged price-fixing conspiracy, was sufficient under North Carolina law. *Id. at 1190*.

I agree with the more expansive analysis applied by the courts in *In re TFT-LCD Antitrust Litig.* and *In re Processed Egg Products Antitrust Litig.* — which rely on North Carolina Supreme Court cases — and find that the allegations here are sufficient under North Carolina law.

g. North Dakota

Defendants argue that ***HN24***[] a "direct benefit" from a plaintiff directly to a **[**76]** defendant **[*1179]** is required under North Dakota law. A number of district courts have — relying on North Dakota case law[21] — concluded that indirect purchaser allegations are insufficient to establish a "direct benefit" under North Dakota law. *See, e.g., In re DDAVP Indirect Purchaser Antitrust Litig., 903 F. Supp. 2d 198, 235 (S.D.N.Y. 2012)* ("Plaintiffs have not and cannot plead a direct benefit of the kind that North Dakota law requires-in other words, something akin to an arms-length transaction between the Indirect Purchaser Plaintiffs and Defendants is required to state a claim."); *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1191 (N.D. Cal. 2009)* (finding that the "broader language of *Apache* suggests that a 'direct benefit' is required under North Dakota law . . . . Plaintiffs have not cited any authority holding that North Dakota law does not require a direct benefit, and in the face of *Apache*."); *In re Relafen Antitrust Litig., 225 F.R.D. 14, 28 (D. Mass. 2004)* ("Here, the benefits that SmithKline received were obtained most directly from wholesalers, who, in turn, obtained benefits from end payors. Because [North Dakota] precedent casts doubt on the end payors' unjust enrichment claims," were dismissed).

GEHA does not distinguish these district court cases or cite any more recent North Dakota authority. Accordingly, I will follow the **[**77]** courts that have addressed this issue directly and DISMISS WITH PREJUDICE GEHA's unjust enrichment claim under North Dakota law.

h. Tennessee

Similar to the argument raised with respect to Kansas law, defendants contend that under Tennessee law as long as a defendant has provided any benefit (here the Lidoderm patches), plaintiffs are precluded from bringing unjust enrichment claims, even if the amount paid was inflated. In support, defendants cite cases that stand for the general proposition that a claim for unjust enrichment is not stated where defendant paid compensation to a third party

---

[20] The *Aftermarket* and *Flonase* cases relied on two North Carolina Court of Appeals decisions: *Effler v. Pyles, 94 N.C. App. 349, 380 S.E.2d 149, 152 (N.C. Ct. App. 1989)* and ***Baker Constr. Co., Inc. v. City of Burlington, 200 N.C. App. 435, 683 S.E.2d 790, 2009 WL 3350747, at *6 (N.C. Ct. App., 2009)*** (unpublished).

[21] *See Apache Corp. v. MDU Res. Grp., Inc., 1999 ND 247, 603 N.W.2d 891, 895 (N.D. 1999)*.

(usually under a contract), even though the plaintiff did not receive compensation. *See, e.g.,* *McKee v. Meltech, Inc., No. 10-2730, 2011 U.S. Dist. LEXIS 49612, 2011 WL 1770461, at *10 (W.D. Tenn. May 9, 2011)* (where wife of plaintiff under contract with, and compensated by defendant, plaintiff could not being unjust enrichment claim because he was not directly compensated); W*eather* *Doctor Servs. Co. v. Stephens, 2001 Tenn. App. LEXIS 553, 2001 WL 849540, at *1 (Tenn. Ct. App. July 27, 2001)* (where property owner defendant testified he had paid contractor for materials, subcontractor could not allege an unjust enrichment claim against property owner); *Paschall's, Inc. v. Dozier, 219 Tenn. 45, 57, 407 S.W.2d 150 (1966)* ("Consequently, if the landowner has given any consideration to any person for the improvements, it would not be unjust for him to retain the benefit without paying the **[**78]** furnisher.").

As I discussed with respect to Kansas, these cases are different from the situation alleged here, where GEHA alleges that it paid inflated prices for the Lidoderm patches and that it would be unjust for defendants to retain the excess. *See* *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d 869, 2014 WL 4793850, at *19 (E.D. Mich. 2014)* (sustaining unjust enrichment claim under Tennessee law where "allegations create an inference that the consideration was not reasonable, valuable, or adequate."); *see also* *In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 545 (D.N.J. 2004)* ("Plaintiffs' receipt of valuable medicine for their payments does not, as Defendants contend, bar an unjust enrichment claim."). **[*1180]** In absence of any on point authority under Tennessee law, GEHA's unjust enrichment claim may proceed.

CONCLUSION

Defendants' motion to dismiss is GRANTED in part and DENIED in part.

The EPPs' consumer protection claim under Utah law is DISMISSED without prejudice. The EPPs' consumer protection claim under Massachusetts law on behalf of plaintiff Gallato is DISMISSED WITH LEAVE TO AMEND. Any amended complaint shall be filed within thirty days of this Order.

GEHA's antitrust claim under Rhode Island law is DISMISSED WITH PREJUDICE.

GEHA's consumer protection claims under Alaska, Arkansas, District of Columbia, and Idaho, Maine, Massachusetts, **[**79]** Michigan, Minnesota, Montana, New Hampshire, Oregon, Pennsylvania, South Dakota, West Virginia law are DISMISSED WITH PREJUDICE.

GEHA's unjust enrichment claims under Alabama, Alaska, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Montana, New Jersey, New York, North Dakota, Oklahoma, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Texas, Virginia, Washington and Wyoming law are DISMISSED WITH PREJUDICE.

In all other respects, defendants' motion is DENIED.

IT IS SO ORDERED.

Dated: May 5, 2015

LexisNexis® Headnotes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Strike

HN1[] **Defenses, Demurrers & Objections, Motions to Strike**

A court may strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter. *Fed. R. Civ. P. 12(f)*. A defense is insufficient if as a matter of law, the defense cannot succeed under any circumstances. A *Rule 12(f)* motion is also proper if it aids in eliminating spurious issues before trial, thereby streamlining the litigation. Generally, however, a *Rule 12(f)* motion should not be granted if the insufficiency of the defense is not clearly apparent, or if it raises factual issues that should be determined on a hearing on the merits.

Motions seeking to strike an affirmative defense are disfavored and should be used sparingly. As observed by the Sixth Circuit, a motion to strike is a drastic remedy to be resorted to only when required for purposes of justice. The motion to strike should be granted only when the pleading to be stricken has no possible relation to the controversy.

Contracts Law > Defenses > Illegal Bargains

HN2[ ] **Defenses, Illegal Bargains**

The U.S. Supreme Court has twice addressed when a contract's illegality under antitrust laws and regulations can serve as an affirmative defense in a contract-enforcement action. The two opinions are in seeming conflict with each other. The earlier of the cases, Kelly v. Kosuga, holds, at its broadest, that the illegality of a contract under federal antitrust laws does not serve as a defense to a contract enforcement action. The later of the opinions, Kaiser Steel Corp. v. Mullins, at its broadest, distinguishes Kosuga and holds that, under certain conditions, the illegality of a contract under federal ***antitrust law*** can furnish an affirmative defense of illegality.

Contracts Law > Defenses > Illegal Bargains

HN3[ ] **Defenses, Illegal Bargains**

Illegality under antitrust laws is not a defense when the illegality is not related to the transaction seeking to be enforced.

Antitrust & Trade Law > Sherman Act > Scope

HN4[ ] **Antitrust & Trade Law, Sherman Act**

Sections 1 and *2 of the Sherman Act* prohibit contracts, combinations, and conspiracies in restraint of trade, as well as monopolization and attempts to monopolize.

Contracts Law > Defenses > Illegal Bargains

HN5[ ] **Defenses, Illegal Bargains**

If a contract provision is patently illegal and is not severable from the sued-upon provision, the defense of illegality is permitted.

Contracts Law > Defenses > Illegal Bargains

HN6[ ] **Defenses, Illegal Bargains**

The question that courts must ask is not simply whether the agreement to be enforced is illegal under federal antitrust laws (the Kosuga question) but whether the agreement to be enforced is itself a mechanism to enforce a collateral agreement or provision that violates federal antitrust laws.

Business & Corporate Compliance > ... > Standards of Performance > Impossibility of Performance > Frustration of Purpose

HN7[] **Impossibility of Performance, Frustration of Purpose**

The doctrines of frustration of purpose and supervening impossibility/impracticability are related excuses for nonperformance of contractual obligations and are governed by similar principles.

Business & Corporate Compliance > ... > Standards of Performance > Impossibility of Performance > Frustration of Purpose

HN8[] **Impossibility of Performance, Frustration of Purpose**

For a party to avail itself of the defense of frustration of purpose under Michigan law it must prove the following conditions: (1) the contract must be at least partially executory; (2) the frustrated party's purpose in making the contract must have been known to both parties when the contract was made; (3) this purpose must have been basically frustrated by an event not reasonably foreseeable at the time the contract was made, the occurrence of which has not been due to the fault of the frustrated party and the risk of which was not assumed by him.

Contracts Law > Defenses > Affirmative Defenses

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Affirmative Defenses

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Strike

HN9[] Affirmative defenses, even if predicated on facts found insufficient or inadequate to withstand scrutiny on a dispositive motion, will only be stricken on a *Fed. R. Civ. P. 12(f)* motion when the pleading to be stricken has no possible relation to the controversy.

Civil Procedure > Discovery & Disclosure > Disclosure > Motions to Compel

Civil Procedure > Discovery & Disclosure > Discovery > Relevance of Discoverable Information

HN10[] **Disclosure, Motions to Compel**

Parties are permitted under *Fed. R. Civ. P. 37* to move for an order compelling disclosure or discovery. The Federal Rules of Civil Procedure are in place to facilitate discovery of all relevant evidence. *Fed. R. Civ. P. 26* authorizes a broad scope of discovery, provided the material sought has some probative value in proving or disproving a claim or defense.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN11[] **Amendment of Pleadings, Leave of Court**

A court should freely give leave to amend when justice so requires. *Fed. R. Civ. P. 15(a)(2)*. Undue delay in filing, lack of notice to the opposing party, bad faith by the moving party, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party, and futility of amendment are all factors which may affect the decision. Delay by itself is not sufficient reason to deny a motion to amend. A court must also evaluate the notice and possible prejudice to the opposing party when considering whether to permit amendment. Decisions as to when justice requires amendment are left to the sound discretion of the trial judge.

Counsel: **[**1]** For Hemlock Semiconductor Corporation, Plaintiff: Colin M. Battersby, Emma T. Chen, Richard C. Sanders, Miller, Canfield, Detroit, MI; Craig W. Horn, Braun, Kendrick, Saginaw, MI.

For Deutsche Solar GmbH, formerly known as Deutsche Solar AG, Defendant: Anthony Cillo, David F. Russey, Cohen & Grigsby, P.C., Pittsburgh, PA; Daniel P. Malone, Butzel Long (Detroit), Detroit, MI; Joseph E. Richotte, BUTZEL LONG, P.C., Bloomfield Hills, MI; Larry K. Elliott, Cohen & Grisgsby, Pittsburgh, PA.

Judges: Honorable THOMAS L. LUDINGTON, United States District Judge.

Opinion by: THOMAS L. LUDINGTON

Opinion

[*820] ORDER GRANTING IN PART AND DENYING IN PART MOTION TO STRIKE, STRIKING AFFIRMATIVE DEFENSES, GRANTING IN PART AND DENYING IN PART MOTION TO COMPEL, DIRECTING PRODUCTION, ADJOURNING DISCOVERY CUTOFF, DENYING MOTION FOR LEAVE TO AMEND, AND DIRECTING SUBMISSION OF SCHEDULING PROPOSALS

Hemlock Semiconductor and Deutsche Solar are each significant actors in the **[*821]** global solar energy industry. Their immediate dispute arises from a series of contracts for the sale of large quantities of industrial-grade polycrystalline silicon from Hemlock to Deutsche Solar. Following changes in global solar market conditions, Deutsche Solar ceased making **[**2]** polycrystalline silicon purchases under the Supply Agreements with Hemlock, some of which continued until 2019. When Deutsche Solar discontinued making further purchases or payments under the Supply Agreements, Hemlock initiated this suit.

Hemlock filed its complaint on March 7, 2013. The parties engaged in discovery until August 22, 2014, at which point the parties requested a status conference. During the conference, the parties informed the Court of a dispute regarding discovery requests that could potentially relate to a number of Deutsche Solar's affirmative defenses. These defenses, as identified in Deutsche Solar's Answer, are:

> 6. The Supply Contracts as Plaintiff seeks to enforce them are illegal, and/or the enforcement of the Supply Contracts would make the Court a party to a violation of European Union ***antitrust law***.
> . . .
> 12. Any required performance on the part of Deutsche Solar is excused by the doctrine of commercial impracticability.
> 13. Any required performance on the part of Deutsche Solar is excused by the doctrine of frustration of purpose.
> 14. Any required performance on the part of Deutsche Solar is excused by the doctrine of force majeure.
>
> 15. Any required performance **[**3]** on the part of Deutsche Solar is excused by the supervening intervention of one or more third parties.
> 16. Any required performance on the part of Deutsche Solar is excused by the illegal dumping of solar panels by the Chinese Government and Chinese producers, which caused a fundamental disruption in the market that was not foreseen or foreseeable by the parties at the time of their agreements.

Def.'s Answer, ECF No. 14 at 11-12.

Hemlock indicated that it had insufficient information regarding these defenses and would, on that basis, not be making the requested disclosures. As a result, on September 24, 2014, Deutsche Solar filed a Motion to Compel. ECF No. 30. In response, and as contemplated in conference with the Court, Hemlock cross-moved to strike

Deutsche Solar's affirmative defenses upon which its discovery requests were predicated. ECF No. 36. Those motions are now before the Court.

I.

Hemlock Semiconductor, Plaintiff in this action, is a Michigan corporation involved in the manufacture and sale of polycrystalline silicon and photovoltaic solar cells and modules. ECF No. 1 at ¶¶ 2, 3, 7.

Deutsche Solar GmbH, Defendant in this action, is a German limited liability company involved **[**4]** in the production of multicrystalline silicon wafers, "which are the building blocks of photovoltaic solar cells and modules." ECF No. 1 at ¶ 8.

A.

Hemlock and Deutsche Solar, beginning "[i]n or about August 2005, . . . entered into [four] Long Term Supply Agreement[s], pursuant to which Deutsche Solar agreed to purchase and Hemlock agreed to supply, polycrystalline silicon[.]" ECF No. 1 at ¶ 9. Deutsche Solar agreed to purchase certain defined quantities of polycrystalline silicon in accordance with a schedule outlined in the agreements. *Id.* The parties agree that the effective dates found in the supply agreements are as follows:

> **[*822]** The first Long Term Supply Agreement . . . is effective from August 30, 2005 to December 31, 2015. The second Long Term Supple Agreement . . . is effective from June 10, 2006 to December 31, 2018. The third Long Term Supply Agreement . . . is effective from June 27, 2007 to December 31, 2019. The fourth Long Term Supply Agreement . . . was effective from January 1, 2010 to December 31, 2012.

ECF No. 1 at ¶ 10.

Hemlock alleges that these agreements took the form of "take or pay" contracts "such that Deutsche Solar is required to pay the full purchase price for [polycrystalline **[**5]** silicon] scheduled to be purchased each year, regardless of whether Deutsche Solar actually takes delivery of the product." ECF No. 1 at ¶ 11. Under this construction of the agreements, "Deutsche Solar's scheduled purchases over the respective terms of the four Supply Agreements totaled 24,390,000 kilograms" of polycrystalline silicon. Id. at ¶12.

Deutsche Solar denies that the Supply Agreements were of the "take or pay" type and so also contests the amount of polycrystalline silicon they agreed to take in delivery. ECF No. 14 at ¶¶ 11, 12. According to Deutsche Solar, the parties "subsequently modified the agreements by agreement and by their conduct." *Id.* at ¶ 10. Hemlock confirms in its motion to strike that "[t]he parties occasionally amended and restated the Supply Agreements between 2008 and 2011." ECF No. 36 at 1.

B.

In March of 2012, Deutsche Solar communicated with Hemlock that it was no longer comfortable with the pricing terms of the Supply Agreements. The parties disagree as to the interpretation of the two letters, sent by Deutsche Solar's CEO to Hemlock management, attached to Hemlock's complaint as Exhibits 5 & 6. The parties do agree, however, that "Deutsche Solar . . . has **[**6]** not purchased any [polycrystalline silicon] from Hemlock since March 31, 2012 and that it has placed no purchase orders for [polycrystalline silicon] with Hemlock." ECF No. 14 at ¶ 18.

On October 12, 2012, Hemlock sent a letter to Deutsche Solar seeking "adequate assurance that Deutsche Solar will fully perform its obligations under its four [Supply Agreements with Hemlock.]" ECF No. 8, Ex. 7. On October 16, 2012, Deutsche Solar responded to Hemlock's letter and stated, among other things, that "Deutsche Solar is committed to fulfill its obligations under the Long Term Supply Agreements as amended from time to time." *Id.*, Ex. 8. In a reply to this letter, Hemlock expressed its belief that Deutsche Solar's assurances were inadequate and that

"Deutsche Solar's October 16 response fails to provide the requisite assurances contemplated by *MCLA § 440.2609* and applicable Michigan law[.]" *Id.*, Ex. 9.

Five months later, on March 4, 2013, Hemlock issued Deutsche Solar an invoice in the amount of $83,971,500.00, which it believed represented the value of polycrystalline silicon that Deutsche Solar did not purchase during 2012. ECF No. 1 at ¶ 25. Hemlock alleges that "on March 5, 2013, Deutsche Solar responded **[**7]** by letter, formally objected to the invoice, and claimed the Supply Agreements are 'null and void.'" *Id.*[1] Deutsche Solar admits that Hemlock issued such an invoice and that it "disputed the accuracy and validity of the invoice." ECF No. 14 at ¶ 25.

II.

HN1[] A "court may strike from a pleading an insufficient defense or any redundant, **[*823]** immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. A defense is insufficient "if as a matter of law, the defense cannot succeed under any circumstances." *Hahn v. Best Recovery Servs., LLC, 2010 U.S. Dist. LEXIS 116136, 2010 WL 4483375, *2 (E.D. Mich. Nov. 1, 2010)* (internal quotation marks and citations omitted). A *Rule 12(f)* motion is also proper "if it aids in eliminating spurious issues before trial, thereby streamlining the litigation." *Id.* (internal quotation marks and citation omitted). "Generally, however, a *Rule 12(f)* motion should not be granted if the insufficiency of the defense is not clearly apparent, or if it raises factual issues that should be determined on a hearing on the merits." *Id.* (internal quotation marks and citation omitted). Motions seeking to strike an affirmative defense are disfavored and should be used sparingly. As observed by the Sixth Circuit, a motion to strike "is a drastic remedy to be resorted **[**8]** to only when required for purposes of justice. The motion to strike should be granted only when the pleading to be stricken has no possible relation to the controversy." *Brown & Williamson Tobacco Corp. v. United States, 201 F.2d 819, 822 (6th Cir. 1953)* (internal quotation marks and citations omitted).

III.

Although the current round of briefing before the Court was set in motion by Deutsche Solar's Motion to Compel, Hemlock's Motion to Strike is analytically precedent. If Hemlock's motion succeeds in striking certain affirmative defenses from Deutsche Solar's answer, then Deutsche Solar would no longer have a ground on which to advance the relevance of its discovery request. Because of the posture of the motions, Hemlock's Motion to Strike will be considered first and then, if any of Deutsche Solar's affirmative defenses survive, its Motion to Compel will be taken up.

Hemlock attacks Deutsche Solar's affirmative defenses in two groups. First, Hemlock takes up Deutsche Solar's affirmative defense of illegality. The grounds for that illegality, according to Deutsche Solar, lie in European Union ***antitrust law***. Deutsche Solar alleges that its contract with Hemlock violates EU antitrust laws and so should not be enforced by this Court. Hemlock answers this assertion in **[**9]** its motion to strike by claiming that illegality under foreign antitrust laws is not the type of illegality cognizable as an affirmative defense. As a result, Hemlock claims, the affirmative defense is legally insufficient and should be stricken.

Hemlock next challenges a series of Deutsche Solar's defenses, all of which are based in a single nucleus of facts. Deutsche Solar contends that their performance under the Supply Agreements was excused because of China's illegal intervention into the international solar market, which led to the decline and eventual collapse of the market. Deutsche Solar suggests that the risk associated with China's conduct is thus, appropriately, allocated to Hemlock. Hemlock responds that a price collapse is not a recognized basis for defenses to contract actions in Michigan and so the defenses related to that set of facts should be stricken.

A.

---

[1] A copy of this letter was not attached to Hemlock's complaint.

HN2[] The Supreme Court has twice addressed when a contract's illegality under antitrust laws and regulations can serve as an affirmative defense in a contract-enforcement action. The two opinions, in seeming conflict with each other, have engendered a great degree of discussion in the lower federal courts. The earlier of **[**10]** the cases, *Kelly v. Kosuga, 358 U.S. 516, 79 S. Ct. 429, 3 L. Ed. 2d 475 (1959)*, holds, at its broadest, that the illegality of a contract under federal antitrust laws does not serve **[*824]** as a defense to a contract enforcement action. The later of the opinions, *Kaiser Steel Corp. v. Mullins, 455 U.S. 72, 102 S. Ct. 851, 70 L. Ed. 2d 833 (1982)*, at its broadest, distinguishes *Kosuga* and holds that, under certain conditions, the illegality of a contract under federal ***antitrust law*** can furnish an affirmative defense of illegality.

Hemlock relies on the applicability of *Kosuga* to the current dispute. According to Hemlock, *Kosuga* bars Deutsche Solar from asserting its illegality affirmative defense. Hemlock reads *Kosuga* to hold that permitting the affirmative defense of illegality, where the illegality arises under antitrust laws, is the equivalent of a court enforcing antitrust laws. Enforcing EU antitrust laws is, Hemlock claims, something United States courts have refused to do on the grounds of international comity. Deutsche Solar, in response, argues that the interplay between *Kosuga* and *Kaiser Steel* is important to addressing Hemlock's motion. Deutsche Solar argues that *Kaiser Steel*, not *Kosuga*, controls the analysis in this case. After *Kaiser Steel*, the affirmative defense of illegality under antitrust laws is expressly permitted.

As **[**11]** discussed further hereafter, the reasons offered by Hemlock for why Deutsche Solar's affirmative defense of illegality should be stricken are without merit. There is, however, sufficient independent authority requiring that the defense be stricken. Specifically, *Kaiser Steel* and later cases foreclose the defense. For that reason, Hemlock's motion will be granted. The authority generated by *Kaiser Steel* and its conclusion that Deutsche Solar's affirmative defense cannot succeed will be analyzed first. Due to Hemlock's assertion of the interrelatedness of its argument and the grounds on which the affirmative defense will indeed be stricken, the alternative argument advanced by Hemlock will be addressed as well.

1.

The starting point in this analysis requires understanding the relationship between *Kosuga* and *Kaiser Steel. Kosuga* concerned two individuals involved in the onion trade. The respondent, Kosuga, brought suit against Kelly when Kelly "fail[ed] to complete payment of the purchase price of 50 cars of onions which the respondent had sold to the petitioner in December 1955." *Kosuga, 358 U.S. at 516*. "The petitioner interposed the defense that the sale was made pursuant to and as an indivisible part of an agreement **[**12]** which violated *§ 1 of the Sherman AntiTrust [sic] Act*." *Id.* (internal statutory citations omitted). The petitioner was an onion grower who had purchased onions from the respondent in the past. The petitioner alleged that the basis of his agreement with respondent was a threat by respondent and respondent's business associate that they were in control of large quantities of onions and would flood the market (thus depressing prices) if onion growers such as the petitioner did not purchase from them. *Id. at 517*.

Eventually, the petitioner and other growers agreed to purchase a percentage of the respondent's onion store in exchange for the respondent agreeing not to flood the market. *Id.* The portion of the agreement applicable to the petitioner contemplated that the petitioner would purchase 50 cars of onions from the respondent. *Id. at 518*. The petitioner began making payments on that purchase but eventually fell into default and repudiated the agreement. *Id.* The respondent then brought suit for the unpaid purchase price (and the cost of storing the cars of onions of which the petitioner did not take physical possession). *Id.*

[*825] The concern expressed by the Supreme Court in *Kosuga* was for the potential of **[**13]** upsetting a contract dispute because an unrelated provision of the contract that may violate federal antitrust laws. *Id.* ("As a defense to an action based on contract, the plea of illegality based on violation of the *Sherman Act* has not met with much favor in this Court."). Thus, the Supreme Court held for the respondent in deciding that it would not nullify an agreement between the parties where the alleged violation of the *Sherman Act* was unrelated to the immediate transaction. *Id. at 520-21*. The Court wrote that "[p]ast the point where the judgment of the Court would itself be enforcing the precise conduct made unlawful by the Act, the courts are to be guided by the overriding general policy, as Mr. Justice Holmes put it, 'of preventing people from getting other people's property for nothing when they purport to be buying it.'" *Kosuga, 358 U.S. at 520-21* (quoting *Cont'l Wall Paper Co. v. Louis Voight & Sons Co., 212 U.S. 227, 271, 29 S. Ct. 280, 53 L. Ed. 486, 6 Ohio L. Rep. 665, (1909)* (Holmes, J. dissenting).

Kosuga generated confusion in the lower federal courts because it did not completely foreclose the possibility that the affirmative defense of illegality could be sustained when it relates to illegality under antitrust laws. In *Kosuga*, the Court noted that it was only enforcing the agreed-upon sale of onions. *Id.* The Court held that it **[**14]** "c[ould] hardly be said to enforce a violation of the Act to give legal effect to a completed sale of onions at a fair price." *Id.* By contrast, "the nondelivery agreement between the parties could not be enforced by a court if its unlawful character under the *Sherman Act* be assumed." *Id.* That is, the Court would not be able to enforce a provision of the contract if the provision itself is unlawful under the *Sherman Act*. *Id.* Courts are not barred from enforcing a separable provision—in *Kosuga* the agreement to sell onions—merely because that provision appears in a contract alongside a provision that is unlawful under the *Sherman Act*. *Id.* Thus, *Kosuga* only holds that ***HN3***[] illegality under antitrust laws is not a defense when the illegality is not related to the transaction seeking to be enforced. *358 U.S. at 521*.

When and under what circumstances an illegal promise contained in the sued-upon contract could be said to be sufficiently related to the promise seeking to be enforced, such that the two rise and fall together, was a question that was left unaddressed by *Kosuga*. The question was taken up twenty-three years later when *Kaiser Steel* was decided. As the Supreme Court explained:

> Respondents construe *Kosuga* as **[**15]** standing for two general propositions: first, that when a contract is wholly performed on one side, the defense of illegality to enforcing performance on the other side will not be entertained; and second, that the express remedies provided by the *Sherman Act* are not to be added to by including the avoidance of contracts as a sanction. It is apparent from the opinion in that case, however, that both propositions were subject to the limitation that the illegality defense should be entertained in those circumstances where its rejection would be to enforce conduct that the antitrust laws forbid. In *Kosuga*, there were two promises, one to pay for purchased onions and the other to withhold onions from the market. The former was legal and could be enforced, the latter illegal and unenforceable.

Kaiser Steel, 455 U.S. at 81-82 (footnotes omitted).

Kaiser Steel involved an agreement "between the United Mine Workers of America ("UMW") and hundreds of coal producers, including steel companies such as **[*826]** petitioner Kaiser Steel Corp." *Id. at 74*. The agreement—the National Bituminous Coal Wage Agreement of 1974—"required signatory employers to contribute to specified employee health and retirement funds." *Id.* A subsection of the agreement **[**16]** "required employers to pay specified amounts for each ton of coal produced and for each hour worked by covered employees." *Id.* That subsection also "included a purchased-coal clause [that] requir[ed] employers to contribute to the trust specified amounts" for each ton of post-production coal that the employers acquired from other coal producers that had not already made UMW trust contributions on that coal. *Id. at 74-75*. In other words, if employers acquired coal that they did not produce, they had to pay specified amounts into the employee trust to compensate for the amounts they would have paid in if that coal had been produced by their own UMW workers.

Kaiser Steel Corporation "operate[d] a steel mill in California and coal mines in Utah and New Mexico. Its mines produce[d] only high-volatile coal, so it [had to] purchase mid-volatile coal used in steel manufacturing from another producer." *Id. at 75*. The employees of the producer from which Kaiser Steel purchased mid-volatile coal were not represented by UMW. *Id.* As a result, Kaiser Steel was required to "report the coal that it acquired from others or make contributions based on such purchased coal." *Id. at 76*. It did not. When the agreement between UMW and the coal producers expired, **[**17]** "the trustees of the UMW Health and Retirement Funds . . . sued Kaiser seeking to enforce the latter's obligation to report and contribute with respect to coal not produced by Kaiser but acquired from others." *Id.*

Kaiser Steel conceded that it violated the agreement "but defended on the ground, among others, that the agreement in these respects was void and unenforceable as violative of §§ 1 and 2 of the Sherman Act[.]" *Id.*[2] **HN4**[] "Sections 1 and 2 of the Sherman Act prohibit contracts, combinations, and conspiracies in restraint of trade, as well as monopolization and attempts to monopolize." *Id. at 78*. According to Kaiser Steel, the purchased-coal clause was an unlawful restraint on trade "because it puts non-UMW producers at a disadvantage in competing for sales to concerns like Kaiser and because it penalizes Kaiser for shopping among sellers for the lowest available price." *Id. at 78*. Kaiser Steel argued that it would not be able to search the market for the most affordable post-production coal because non-UMW coal came with a market-distorting surcharge: the payment by Kaiser Steel of monies into the union funds. The district court and the court of appeals both "declined to pass on the legality of the purchased-coal **[**18]** clause under . . . the Sherman Act." *Id. at 78*.

The Supreme Court reversed. First, the Court noted that, assuming the purchased-coal agreement were unlawful under the Sherman Act, a court could not enforce the related promise by Kaiser Steel to pay money into the UMW trust. *Id. at 79*. The UMW trustee argued that, in isolation, the requirement that Kaiser Steel, and other employers, pay money into the UMW trust is not illegal. *Id.* But the Court observed that "Kaiser . . . did not make a naked promise to pay money to the union funds." *Id.* The **[*827]** promise to pay money into the union funds under the purchased-coal agreement was inseparable from the conditions of contribution that offended the Sherman Act. "The purchased-coal provision obligated [Kaiser Steel] to pay only if it purchased coal from other employers and then only if contributions to the UMW funds had not been made with respect to that coal." *Id.* If a court directed Kaiser Steel to pay money into the union fund it would be "command[ing] conduct **[**19]** that assertedly renders the promise an illegal undertaking under the federal statutes." *Id. at 79*.

The Court next turned to an analysis of *Kosuga*. It rejected respondent Mullins' assertion that the case compelled a holding that Kaiser Steel's defense should be rejected. Rather, the *Kaiser Steel* court explained, *Kosuga* addressed a situation where there were two separate and distinct promises contained in a single contract. One promise "was legal and could be enforced, the [other] illegal and unenforceable." *Id. at 82*. The *Kosuga* court did not confront a situation where the promise being enforced would result in, at a minimum, the condonation of behavior offensive to the Sherman Act. The Court recognized that *Kosuga* did, however, note that such a situation was distinct from the facts before it:

> The [*Kosuga*] Court went on to say that "[p]ast the point where the judgment of the Court would itself be enforcing the precise conduct made unlawful by the Act, the courts are to be guided by the overriding general policy . . . of preventing people from getting other people's property for nothing when they purport to be buying it."

Kaiser Steel, 455 U.S. at 80 (quoting *Kosuga, 358 U.S. at 520-21*) (internal quotation marks omitted). After making this observation, the **[**20]** *Kaiser Steel* court noted that *Kosuga* held it was not "inappropriate or violative of the intent of the parties to give it effect even though it furnished the occasion for a restrictive agreement of the sort here in question." *Id. at 80-81* (quoting *Kosuga, 358 U.S. at 521*). The Court in *Kaiser Steel* concluded its analysis of *Kosuga* by stating that "*Kosuga* thus contemplated that the defense of illegality would be entertained in a case such as this." *Id. at 82*.

Thus, by the time *Kaiser Steel* was decided, the question of when patent illegality in a contract could be used as a defense to a collateral contract provision was settled.***HN5***[] If the provision is patently illegal and is not severable from the sued-upon provision, the defense of illegality is permitted. The next issue to be resolved, and one that is important for this case, is the types of illegality that are cognizable by the defense. Put differently, could something short of patent illegality substantiate the defense? While *Kaiser Steel* is helpful, it is not dispositive of situations where a sued-upon contract provision has an inextricably intertwined collateral obligation that is not patently illegal, but which could be illegal if certain conditions are met. Thus, could **[**21]** the conditions that would render that collateral obligation illegal be so certain to actualize that a court should permit the defense in light of *Kaiser Steel*?

[2] Kaiser Steel also argued that the agreement was illegal under the *National Labor Relations Act*, but the Court's adjudication of that argument is not germane to the present case so discussion of it has been omitted.

That question confounds this case. Deutsche Solar contends that the illegality of the supply agreements under EU law is sufficient under *Kaiser Steel* to sustain their affirmative defense of illegality. But *Kaiser Steel* did not sweep so broadly. Indeed, the Court held: "Here, employer contributions to union welfare funds may be quite legal more often than not, but an agreement linking contributions to purchased coal, if illegal, is subject to the defense of illegality." *Id.* Thus, the Court specifically noted the direct linkage in the **[*828]** substance of the agreement between the promise and the illegal condition. In *Kaiser Steel*, the infirmity was the actual linkage (with no concern for the propriety of the employer contribution payments), not the fact that employer contributions themselves could be illegal. That issue remained for another day.

Here, there is no patent illegality in the supply agreements. Rather, Deutsche Solar argues that if Hemlock meets certain market capitalization requirements the take-or-pay supply agreement would **[**22]** violate EU ***antitrust law***. The District of Columbia Circuit addressed contracts that do not contain patent antitrust illegality in *National Souvenir Center, Inc. v. Historic Figures, Inc., 728 F.2d 503, 234 U.S. App. D.C. 222 (D.C. Cir. 1984)*. That appeal arose out of "a series of pre-trial rulings by the district court in three consolidated anti-trust cases involving wax museums[.]" *Id. at 506*. The origin of the dispute was an agreement between a wax museum in Washington, D.C. and a supplier of wax figures. *Id.* The supplier entered an agreement with the operating company "to provide the figures for the Washington museum and to assist in installing them in appropriate historical settings. In return, [the museum] agreed to purchase figures exclusively from [the supplier] and, for a five year period, to act as [the supplier's] sales agent to other wax museums." *Id. at 506-07*.

The museum began franchising museums throughout the United States. The first franchise was established by an agreement between the franchisee and a subsidiary of the original museum. *Id. at 507*. That agreement obligated the franchisor to provide the franchisee with figures from the supplier at cost and to furnish other services related to establishing the franchisee museum. *Id.* The franchisee contended that the franchisor also had to provide certain **[**23]** franchisor services over the life of the 20-year franchise agreement. *Id.* During that period the franchisee agreed to pay 5% of its annual gross receipts. *Id.*

The franchisor then established two more franchisee museums. *Id.* The agreements with these museums were similar in their required royalty payments. *Id.* The agreements varied, however, in how the franchisees would acquire wax figures. The second franchise did not acquire the figures through the franchisor but instead leased them directly from the supplier. The third franchise agreement did not specify how the museum would acquire wax figures.

The franchisee museums[3] eventually challenged the franchise agreements. They claimed that the agreements violated the *Sherman Act* because they impermissibly tied the supplier's figures to the museum franchise. *Id. at 506*. The second franchisee, the museum required to lease figures directly from the supplier, argued that the franchisor and its owner "unlawfully exercised their monopoly power in the wax figure market to require leasing rather than selling the figures." *Id.* "Upon filing suit, [the franchisees] stopped paying the franchise fees and rents required by the allegedly illegal agreements. **[*829]** Appellees **[**24]** then counterclaimed for recovery of overdue payments and interest." *Id. at 506*.

The franchisees defended against the franchisor and owners' contract counterclaim by alleging that the agreements were illegal tying agreements under the *Sherman Act*. The district court dismissed the franchisees' affirmative claims under federal antitrust laws because they were barred by the *Clayton Act's* statute of limitations. *Id. at 509*. The district court also granted summary judgment on the franchisor's contract **[**25]** counterclaim. *Id. at 508-09*. Despite dismissing the franchisees' affirmative antitrust claims as untimely, the district court analyzed the validity of

---

[3] The opinion does not make clear whether only the first and second franchisees—the museums that were obligated to acquire wax figures from the franchisor or supplier, respectively—or all franchisees challenged the agreements. It would appear that only the first franchisee, or possibly just the first and second franchisee, would have standing to challenge the agreements since there is no reference in the opinion to the fact that the third franchisee's franchise agreement contained any requirements that the third franchise museum acquire wax figures from the franchisor or the supplier. While the opinion is not clear on this point, it is not material to the discussion of the District of Columbia Circuit's analysis.

their affirmative defense to the contract counterclaim of illegality under federal ***antitrust law***. The district court concluded that, under *Kaiser Steel*, the defense could not be sustained because "the promise being sued on is not itself illegal under the antitrust laws, [and so] *Kaiser* did not require recognition of the defense. *Id. at 508* (quoting opinion below) (internal quotation marks omitted). The District of Columbia Circuit affirmed the district court's dismissal of the franchisees' illegal tying claims as time-barred. The circuit court reversed the district court's ruling that the second franchisee's monopoly leasing claims—related to leasing the wax figures—were time barred. The court then turned to the issue of the contract counterclaim and the franchisees' defense of illegality.

Although the District of Columbia Circuit affirmed the dismissal of the franchisees' antitrust claims as untimely brought, the issue of the franchisees' affirmative defense of illegality was not mooted. The time bar on the antitrust claims was not a merits determination **[**26]** of the agreements' legality. Thus, it was possible for the franchisees to contend that even though their affirmative cause of action could not be brought, a judgment in favor of the franchisor would still "require[] a federal court to enforce an illegal contract and that result is contrary to the rule governing antitrust defenses recently laid down in *Kaiser Steel*[.]" *Id. at 514*. The district court had rejected the franchisees' affirmative defense because it "read [*Kaiser Steel*] as allowing antitrust defenses to contract suits only where the promise being sued on is itself illegal under the antitrust laws." *Id.* (quoting opinion below) (internal quotation marks omitted). The District of Columbia Circuit affirmed, albeit on a different rationale.

The circuit court analyzed the interplay between *Kosuga* and *Kaiser Steel* and concluded that "*Kosuga* was generally viewed as permitting antitrust defenses in only a very narrow class of contract suits, courts being understandably hesitant to interpose complex antitrust issues in a simple suit for breach of contract." *Id.* In fact, the District of Columbia Circuit was tasked with applying this rationale from *Kosuga* when it heard the first appeal of Kaiser **[**27]** Steel as it made its way to the Supreme Court. *See* *Mullins v. Kaiser Steel Corp., 642 F.2d 1302, 206 U.S. App. D.C. 334 (D.C. Cir. 1980)*. In Mullins, the court "read *Kosuga* to limit antitrust defenses to situations where the requested enforcement was of agreements not to compete or other direct market restrictions, *that* made 'the court . . . a party to an anticompetitive scheme.'" *Nat'l Souvenir Ctr., Inc., 728 F.2d 503, 514-15 (D.C. Cir. 1984)* (quoting *Mullins, 642 F.2d at 1310*).

Since, in *Mullins*, "the promise to contribute to the welfare fund would not have directly impeded competition at that point in time[,]" enforcement by the court would not have made it a party to an antitrust violation. As such, the District of Columbia Circuit reasoned, *Kosuga* was not offended. *Id. at 515*. But the court acknowledged **[*830]** that this understanding was corrected by *Kaiser Steel* when the Supreme Court allowed the defense to proceed: "[I]n permitting the defendant to raise its antitrust defense in [*Kaiser Steel*], the Court opened the window only a notch to antitrust defenses, i.e., it refused to enforce a promise to pay that was itself a mechanism to police anticompetitive conduct." *Id.* Thus,***HN6***[] the question that courts must ask following *Kaiser Steel* is not simply whether the agreement to be enforced is illegal under federal antitrust laws (the *Kosuga* question) but whether the agreement **[**28]** to be enforced is itself a mechanism to enforce a collateral agreement or provision that violates federal antitrust laws.

In the case before it, the District of Columbia Circuit determined that "the promises to pay franchise fees in this case do not appear on their face to be primarily means to enforce the allegedly illegal tie-ins between the wax figures and start-up services." *Id.* Rather, they appeared to be merely consideration for goods and services, or nothing more than an inoffensive market transaction. *Id.* Importantly, the court held:

> To transform the contracts here into illegal tie-ins would require complex proof of monopoly power in the tying market and leverage of that power in the tied market. Even then, their vice would extend only to the amount that the agreed prices exceeded the fair value of the goods and services received and consumed—the portion of the prices that could be traced to the illegal practice. The complexity of proof and speculative nature of appellants' defenses seem to us to place them outside of the [*Kaiser Steel*] exception and clearly within the ambit of disfavor for such defenses articulated in *Kosuga*.

Id. at 515-16. Stated differently, not only was the promise **[**29]** the court was asked to enforce not illegal, fulfilling the promise did not force the franchisees to comply with another portion of the agreement that itself was illegal. Any illegality under a collateral provision of the agreement would only arise under the presence of specific market conditions external to the agreement and upon which the agreement does not rely.

The situation that Deutsche Solar alleges exists here is no different. Deutsche Solar does not claim that the market transactions contemplated under the agreements are inherently illegal under EU ***antitrust law***.[4] Instead, Deutsche Solar claims that the agreements are illegal under EU ***antitrust law*** *if* Hemlock's market conduct transgresses certain EU-defined market conditions. As a result, it requests discovery on that point. But this is the exact type of "complex proof of monopoly power" that *National Souvenir* held to be outside the narrow exception to *Kosuga* that *Kaiser Steel* created. *National Souvenir, 728 F.2d at 515*. For Deutsche Solar's affirmative defense to be sustainable they would need to show that that the take-or-pay transaction requirement under the agreements was inherently offensive to antitrust laws (the *Kosuga* prohibition) or that it is inextricably **[**30]** intertwined with a provision that is offensive to antitrust laws (the *Kaiser Steel* prohibition) such that it operates as a means of enforcing the illegal collateral provision. Deutsche Solar has not made this claim.

Deutsche Solar only argues that the take-or-pay agreement—that is, the bare transaction requirement—would be offensive **[*831]** to EU antitrust laws if Hemlock's European market capitalization exceeds the size restriction in the EU's take-or-pay prohibition.[5] In that respect the present case is distinguishable from *Kaiser Steel* and *National Souvenir* because the illegality would be inherent in the very transaction Hemlock seeks to enforce. In *Kaiser Steel* and *National Souvenir*, the illegality was present in a collateral provision that is intertwined with the transaction to be enforced.

This is a distinction without a difference. First, neither *Kaiser Steel* nor *National Souvenir* held that a situation where contingent antitrust illegality is present in the enforceable transaction, rather than a collateral transaction, is outside the scope of *Kosuga*. Second, *National Souvenir* does specifically address such a situation. In *National Souvenir* the claim by appellants was that the franchise contracts were illegal tying agreements. The nature of a tying agreement is such that the act of purchasing the tying product forces the acquisition of the tied product. So in that case, as would be the case here, the primary transaction itself would be illegal. But the District of Columbia Circuit did not find that distinction to be of relevance to the *Kosuga-Kaiser Steel* inquiry since the agreements could not be said to be per se illegal tying agreements. It was the contingency of the illegality that drew the case within *Kosuga'*s prohibition. Here, the agreements are not per se illegal. The Supreme Court has determined that in such circumstances, the possibility of illegality, when that illegality resides in a violation of antitrust **[**32]** laws, cannot sustain an affirmative defense of illegality. Deutsche Solar's defense will be stricken.

2.

Rather than directly addressing the application of *Kosuga* and *Kaiser Steel* Hemlock proposes what it believes is an independent bar to Deutsche Solar's affirmative defense. Because this separate line of authority that Hemlock argues would lead to Deutsche Solar's affirmative defense being stricken Hemlock devotes no attention to the applicability of *Kaiser Steel*. But Hemlock's alternative argument rests on an interpretation of *Kelly v. Kosuga* which is less than compelling.

Hemlock relies on *Kosuga* for a narrower point, seemingly left undisturbed by *Kaiser Steel*. Hemlock asserts that, separate from any distinction made by *Kaiser Steel, Kelly v. Kosuga* stands for the proposition that permitting an affirmative defense of illegality under antitrust laws is the equivalent of enforcing antitrust laws. *Kosuga, 358 U.S. at 520*. *Kaiser Steel'*s holding, Hemlock proceeds, does nothing to upset this proposition. In fact, according to Hemlock, *Kaiser Steel* endorses it. *455 U.S. at 80-83*.

---

[4] These are the transactions whereby Duetsche Solar must pay for and take delivery of certain quantities of polycrystalline silicon or otherwise pay Hemlock the value of the agreed upon amount in the event it does not take delivery.

[5] The European Union's antitrust laws make it illegal for firms above a certain European market capitalization to enter into take-or-pay contracts. Treaty Establishing the European **[**31]** Community, Rome Treaty, March 25, 1957, Articles 81 & 82.

In the present case the illegality alleged by Deutsche Solar is of an altogether different character than that considered in any case from the *Kosuga* - *Kaiser* **[**33]** *Steel* line because it arises under EU, not United States, ***antitrust law***. Because permitting the affirmative defense of antitrust illegality is the equivalent of enforcing antitrust laws, Hemlock's argument runs, allowing Deutsche Solar's defense would be enforcing EU antitrust laws. And doing so is something from which United States courts have abstained for reasons of international comity. As a result, the application of *Kosuga* and *Kaiser Steel* need not be reached. If, in the first instance, this **[*832]** Court cannot, or will not, enforce foreign law that could purportedly govern the contracts, the outcome of the *Kosuga-Kaiser Steel* analysis would be unduly burdensome since the international comity issue would still need to be confronted.

Indeed, if the law is as Hemlock states, this principle from *Kosuga* would clearly pose a separate and distinct preliminary hurdle for Deutsche Solar's affirmative defense to clear. But *Kosuga* does not speak as clearly as Hemlock contends to the issue of whether permitting an affirmative defense actually places a court in a position equivalent to that of actively enforcing antitrust laws. In *Kosuga*, the Supreme Court wrote: "If the defense of illegality is **[**34]** to be allowed as a collateral method of enforcement of the antitrust laws, as the breadth of the petitioner's argument suggests, it must be said that his theory creates a very strange class of private attorneys general." *Kosuga, 358 U.S. at 520*. But this sounds as a hypothetical assumption in light of the arguments petitioner, Kelly, had made in support of his claim that his affirmative defense should be permitted. Indeed, the Court followed this remark and opened its next paragraph: "In any event, an analysis of the narrow scope in which the defense is allowed in respect of the *Sherman Act* indicates that the principle of distinction is not what the petitioner claims it to be." *Id.*

Nothing in the language of the *Kosuga* opinion supports Hemlock's assertion that the Supreme Court intended to, or did, hold that an affirmative defense of illegality grounded in the antitrust laws necessarily equates to enforcing antitrust laws. The Supreme Court was specifically addressing the manner in which Kelly was attempting to construe authority that addressed the affirmative defense of illegality. Kelly took the position those seemingly applicable prior cases actually involved defendants who were not a party to the illegal **[**35]** agreement nevertheless attempting to use the agreement's illegality against the plaintiff/seller. Here, Kelly claimed, he was a party to the illegal agreement and the illegal agreement bore at least some relation to the suit. Because of this distinction his defense should be sustained. *Id. at 519*.

But in the passage Hemlock cites, the Court was merely noting that Kelly's position would permit any party to allege, in defense of a contract action, that an agreement violated the antitrust laws as long as that agreement bore some cognizable factual relation to the dispute, even though the agreement was otherwise legally irrelevant to the claim. That was the very conclusion Kelly sought. While the transaction upon which Kosuga brought suit was contemplated by the same instrument that contained a provision that violated the *Sherman Act*, neither provision had any legal relevance to the enforcement of the other. Kelly still thought the agreement's illegality should sustain his affirmative defense. But, to support his affirmative defense Kelly proposed a rule even broader than necessary to apply to his own circumstance. His rule would have allowed a defendant to interpose a claim that some tangentially **[**36]** related agreement violated the antitrust laws. This would leave federal courts with what was actually an antitrust violation counterclaim lurking in the guise of an affirmative defense. The Court observed that permitting such a defense would be closer to deputizing private individuals as antitrust regulators than it would be an appropriate extension of the contract illegality defense. The Court was not articulating a general rule that entertaining an affirmative defense of antitrust illegality is always the equivalent of enforcing antitrust laws. Instead, it was actively warning against the adoption of theories **[*833]** producing that result, such as the rule proposed by Kelly.

Thus, the starting-point for Hemlock's argument is without merit. Kosuga does not hold that by allowing an affirmative defense of illegality under ***antitrust law*** a court is essentially enforcing the antitrust laws. But, because there is an independent ground that requires Deutsche Solar's affirmative defense be stricken, the fact that Hemlock's argument is not meritorious is not fatal to its motion.

B.

In further response to Deutsche Solar's Motion to Compel, Hemlock moves to strike a number of other contract defenses of **[**37]** Deutsche Solar's. Specifically, Deutsche Solar contends that it should be excused from performance of its contractual obligations, at least temporarily, because of the conduct of the Chinese government and the altered polycrystalline silicon market. Deutsche Solar manifested this theory as five distinct affirmative defenses:

> 12. Any required performance on the part of Deutsche Solar is excused by the doctrine of commercial impracticability.
> 13. Any required performance on the part of Deutsche Solar is excused by the doctrine of frustration of purpose.
> 14. Any required performance on the part of Deutsche Solar is excused by the doctrine of force majeure.
> 15. Any required performance on the part of Deutsche Solar is excused by the supervening intervention of one or more third parties.
> 16. Any required performance on the part of Deutsche Solar is excused by the illegal dumping of solar panels by the Chinese Government and Chinese producers, which caused a fundamental disruption in the market that was not foreseen or foreseeable by the parties at the time of their agreements.

ECF No. 14 at 12. Hemlock claims that all of these defenses are legally insufficient and should, like Deutsche Solar's **[**38]** illegality defense, be stricken.

1.

Hemlock, in its Motion to Strike, argues that Deutsche Solar's fourteenth affirmative defense of force majeure should be stricken because majeure is not a recognized contract defense under Michigan law. ECF No. 36 at 19. In its response, "Deutsche Solar concedes that the defense of force majeure is inapplicable and withdraws that defense[.]" ECF No. 53 at 1. The defense will be deemed withdrawn and need not be addressed.

2.

Hemlock's arguments for striking Deutsche Solar's defenses numbered twelve, thirteen, fifteen, and sixteen all relate to Deutsche Solar's assertion that "dumping" activities by China and possibly other third party actors caused objectively unforeseeable market disruptions that excuse its contractual performance. Accordingly, it claims that the risk of loss associated with China's conduct should be allocated to Hemlock. Hemlock counters that Deutsche Solar's theory is legally insufficient to substantiate any of these four excuses to performance, pled as affirmative defenses, and so they must be stricken. Hemlock, in its motion to strike, addressed defenses twelve, thirteen, and sixteen as a single group. Hemlock addressed defense fifteen **[**39]** separately and claims that "Supervening Intervention of Third Parties" does not exist as a defense under Michigan Law. ECF No. 36 at 20. But as Deutsche Solar construes the defense they contend that "intervention in the market by a third party may result in impracticability or frustration of purpose." ECF No. 53 at 20. Since Deutsche Solar does not **[*834]** view illegal intervention in a market as a distinct excuse to contract performance, but instead a description of circumstances that give rise to a legally cognizable defense, it will be addressed in conjunction with defenses twelve, thirteen, and sixteen.

Hemlock contends that Deutsche Solar may not be excused because "deteriorating market conditions cannot, as a matter of law, satisfy the requirements of either impracticability of [sic: or] frustration of purpose." ECF No. 36. Deutsche Solar identifies impracticability and frustration of purpose as defenses twelve and thirteen. Defenses fifteen and sixteen, it alleges, describe factual circumstances that can establish impracticability and frustration of purpose. Indeed, ***HN7***[] "[t]he doctrines of frustration of purpose and supervening impossibility/impracticability are related excuses for nonperformance **[**40]** of contractual obligations and are governed by similar principles." *Liggett Rest. Grp., Inc. v. City of Pontiac, 260 Mich. App. 127, 676 N.W.2d 633, 637 (Mich. Ct. App. 2003)*. Thus, the central question presented by Hemlock's motion to strike is whether Michigan recognizes either one or both of those two defenses.

Hemlock argues that Michigan law does not recognize either of these defenses as excuses for contract performance when they are predicated on a change in market price for a product or the financial inability of a party to meet its commitments. ECF No. 36 at 16. Deutsche Solar counters that this principle gives way "in situations where a contracting party was the source of the frustrating event . . . [or][6] where the frustrating event was the result of an action outside the contracting parties' control." ECF No. 53 at 20 (citations omitted). ***HN8***[] For a party to avail itself of the defense of frustration of purpose under Michigan law it must prove the following conditions:

> (1) the contract must be at least partially executory; (2) the frustrated party's purpose in making the contract must have been known to both parties when the contract was made; (3) this purpose must have been basically frustrated by an event not reasonably foreseeable at the time the contract was made, the occurrence **[**41]** of which has not been due to the fault of the frustrated party and the risk of which was not assumed by him.

Molnar v. Molnar, 110 Mich. App. 622, 313 N.W.2d 171, 173 (Mich. Ct. App. 1981). Deutsche Solar's claim, as currently pled, in less than clear particular terms, appears to be that the entry of China and the Chinese solar industry into the global solar market was not reasonably foreseeable when Deutsche Solar and Hemlock entered into the supply agreements. Deutsche Solar believes that it may be able to offer evidence that China's conduct and its impact on the market was completely unforeseeable and more than a simple market risk, even to a sophisticated industry participant.

Hemlock responds that asserting a defense of frustration of purpose and supervening impossibility/impracticability of performance fails as a matter of law when the argument supporting the defense is that a contracting party did not anticipate events having an impact on a product's price. While the facts Deutsche Solar currently contends support defenses twelve, thirteen, fifteen, and sixteen may not withstand later scrutiny, the consideration of such facts is inappropriate at this stage given the standard of review. ***HN9***[] Affirmative defenses, **[**42]** even if predicated on facts found insufficient or inadequate to withstand scrutiny on a dispositive motion, will only be stricken on a *Rule 12(f)* motion "when the pleading to be stricken **[*835]** has no possible relation to the controversy." *Brown & Williamson Tobacco Corp. v. United States, 201 F.2d 819, 822 (6th Cir. 1953)* (internal quotation marks and citations omitted). All that needs be demonstrated at this stage is that Michigan recognizes frustration of purpose and supervening impossibility/impracticability as excuses to contract performance and that the underlying controversy bears some relation to that defense. Presently, the ambit of review when considering a motion to strike is limited to the pleadings and documents incorporated therein. *See, e.g., Woodfield v. Bowman, 193 F.3d 354, 362 (5th Cir. 1999)* (explaining that affirmative defenses are subject to the same plain statement standards as the complaint but recognizing that simply naming affirmative defenses may be sufficient). The infirmities with the defense theory that Hemlock identifies depend on issues of fact "that should be determined on a hearing on the merits." *Hahn v. Best Recovery Servs., LLC, 2010 U.S. Dist. LEXIS 116136, 2010 WL 4483375, *2 (E.D. Mich. Nov. 1, 2010)* (internal quotation marks and citations omitted). But such a determination would be premature when deciding a motion to strike. Hemlock's motion will be denied with respect to defenses twelve, thirteen, fifteen, **[**43]** and sixteen.

Deutsche Solar notes in its response to Hemlock's motion that its affirmative defense of impracticability also relates to its claims regarding illegality under European Union antitrust regulations. ECF No. 53 at 24. This argument has already been addressed, *supra* § III.A, and has been found to be without merit. Thus, Deutsche Solar's affirmative defense of impracticability is stricken to the extent it relates to illegality under EU antitrust laws or regulations.

IV.

After resolving Hemlock's motion to strike, Deutsche Solar's motion to compel may now be properly considered. In its motion Deutsche Solar moves this Court to compel the production of answers to interrogatories and documents requested by Deutsche Solar of Hemlock. Deutsche Solar believes that this information is relevant or could

---

[6] In its brief Deutsche Solar employs a disjunctive "and".

reasonably lead to the discovery of material relevant to its affirmative defenses and legal theories that correspond to those defenses. ECF No. 30.

HN10[] Parties are permitted under *Federal Rule of Civil Procedure 37* to move for an order compelling disclosure or discovery. "The Federal Rules of Civil Procedure are in place to facilitate discovery of all relevant evidence. *Rule 26* authorizes a broad scope of discovery, provided the **[**44]** material sought has some probative value in proving or disproving a claim or defense." *Gamby v. First Nat'l Bank of Omaha, 06-11020, 2009 U.S. Dist. LEXIS 29582, 2009 WL 963116 (E.D. Mich. Apr. 8, 2009)* (citing *FED. R. CIV. P. 26(b)(1)*).

A.

Because Deutsche Solar's affirmative defense of illegality and its affirmative defense of impracticability relating to the Supply Agreements violating EU antitrust laws will be stricken, Deutsche Solar's corresponding discovery requests will be denied. Deutsche Solar's motion to compel will also be denied with respect to Hemlock's general objections concerning Deutsche Solar's EU antitrust theory. ECF No. 30 at 5-6. Finally, Deutsche Solar's motion to compel will also be denied with respect to its Second Interrogatory No. 1, Second Interrogatory No. 2, and Second Request for Production No. 1, which all seek European market-share information. ECF No. 30 at 6-11.

B.

By contrast, Deutsche Solar's motion to compel will be granted with respect to the **[*836]** information it seeks pertaining to its general contract defenses and its theory that a third party, China, rendered its performance under the Supply Agreements impracticable. Specifically, Deutsche Solar requests the production by Hemlock of

> . . . all documents submitted by or on behalf of Hemlock in **[**45]** the trade proceeding before the People's Republic of China's Ministry of Commerce . . . referenced in a letter from Hemlock to Deutsche Solar . . . that refer, reflect, or relate to Deutsche Solar or any of its affiliates or to any agreement between the parties.

ECF No. 30 at 11.

Hemlock contends that "a review of [its] production shows that these requested documents have been produced in response to other requests." ECF No. 37 at 14. Deutsche Solar responds by claiming that Hemlock did not produce the documents they seek but instead "produced a list of documents maintained in a data room and, apparently, copies of certain schedules it provided [the Chinese Ministry of Commerce.]" ECF No. 46 at 5. To avoid the difficulties that this disagreement could pose, Hemlock will be directed to produce the documents consistent with those materials sought by Deutsche Solar in its Second Request for Production No. 2.[7]

C.

Lastly, Deutsche Solar seeks to compel Hemlock's quarterly and annual financial statements from January 1, 2005 to December 31, 2013. "Deutsche Solar believes that the financial statements contain information related to Hemlock's claim for damages and to its decision to terminate the contracts, an act that Deutsche Solar contends was made in bad faith." ECF No. 30 at 16. Deutsche Solar believes that "Hemlock's decision to terminate the contracts was motivated by financial concerns and not by any breach on the part of Deutsche Solar" and that Hemlock's financial statements evidence this ulterior motive. *Id.*

---

[7] Hemlock briefly makes a subsidiary argument in its response to Deutsche Solar's Motion to Compel that "if there remains something that Deutsche Solar wants, the request is improper, because it has no viable defense premised on the 'trade cases.'" ECF No. 37 at 14. To the extent that **[**46]** this argument mirrors Hemlock's argument in its motion to strike it is either meritless or premature. In either event, Deutsche Solar's request is, at this stage, relevant to its affirmative defenses.

Hemlock, however, argues that Deutsche Solar's request for this information was untimely and should be denied. Deutsche Solar argues that its first Request for Production was sufficiently specific to encompass all of Hemlock's financial statements that it now seeks to compel. That Request reads, in relevant part:

> 3. All Documents and Communications Concerning, Referring or Related to **[**47]** (i) the negotiation, execution, or amendment of the Supply Agreements; (ii) Deutsche Solar's performance or non-performance under the Supply Agreements; and (iii) Deutsche Solar's purchase of Product under the Supply Agreements.
> 6. Copies of all Documents relating to all sales and deliveries of silicon by Hemlock to Deutsche Solar from the inception of the Supply Agreements to date.
> 13. All Documents that support the damages claimed by Hemlock.

ECF No. 37 at 12. Nothing in these requests can be read as specifically relating to financial statements of Hemlock that are unrelated to its dealings with Deutsche Solar. Hemlock represents in its response **[*837]** to Deutsche Solar's motion that the unproduced financial statements "contain no references to Deutsche Solar, any amounts paid by Deutsche Solar, or the Supply Agreements." ECF No. 37 at 12.

Hemlock further claims that to the extent the request can be considered, the financial statements have no bearing on the contract dispute since the Supply Agreements were "take or pay" contracts. ECF No. 37 at 12-13. The "take or pay" nature of the Agreements means that no reference needs to be made to Hemlock's financials to make a damage determination; **[**48]** the damages are evident on the face of the Agreements.

Deutsche Solar believes that the issue of damages is more nuanced. It has made, it claims, "millions of dollars in prepayments" which will only be apparent on review of Hemlock's financial statements. ECF No. 30 at 16. If this is the case, however, it is not clear how Deutsche Solar's own accounting records would not be an equally adequate point of reference for quantifying those prepayments.

As final reason for why the documents should be produced Deutsche Solar claims that Hemlock terminated the Supply Agreements in bad faith because it was experiencing financial hardship. ECF No. 30 at 16. Deutsche Solar does not explore this argument and states only that "[t]he financial statements . . . will show that Hemlock's decision to terminate the contracts was motivated by financial concerns and not by any breach on the part of Deutsche Solar." *Id.* But Deutsche Solar does not explain how the financial statements can themselves prove Hemlock's corporate motivation or even that they might reasonably lead to information that forms such proofs.

Since Deutsche Solar does not advance a theory that supports the production of Hemlock's remaining financial **[**49]** statements from the period of January 1, 2005 to December 31, 2013, Deutsche Solar's motion will be denied as to those materials.

V.

The last matter to be addressed is a motion for leave to file an amended answer, filed by Deutsche Solar on February 19, 2015. ECF No. 56. Deutsche Solar seeks to amend its answer to incorporate a counterclaim for declaratory relief. *Id.*, Ex. A. It claims that this amendment should be granted because it adds nothing to what was not already plain on the face of their affirmative defenses. Hemlock argues that the motion should be denied because it would cause them undue prejudice and Deutsche Solar should have availed itself earlier of the ability to amend if it indeed knew all facts pertinent to its counterclaim.

HN11[] A court should "freely give leave" to amend "when justice so requires." *FED. R. CIV. P. 15(a)(2)*. "Undue delay in filing, lack of notice to the opposing party, bad faith by the moving party, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party, and futility of amendment are all factors which may affect the decision." *Hageman v. Signal L.P. Gas, Inc., 486 F.2d 479, 484 (6th Cir. 1973)*. "Delay by itself is not sufficient reason to deny a motion to amend." *Id.* A court must also **[**50]** evaluate the notice and possible prejudice to the opposing party when considering whether to permit amendment. *Id.* "Decisions as to when justice requires amendment are left to the sound discretion of the trial judge[.]" *Robinson v. Michigan Consol. Gas Co. Inc., 918 F.2d 579, 591 (6th Cir. 1990)*.

Deutsche Solar's amendment will not be allowed. Although no dispositive action has been taken by the parties, discovery has long been closed. The disposition of the motions adjudicated in this **[*838]** opinion will require reopening discovery, but that will be done only for a limited purpose. While Deutsche Solar believes that Hemlock will not require discovery to defend against its proposed declaratory judgment action. But permitting a late pleading that has the effect of transforming a party from a plaintiff fielding affirmative defenses to defending a claim for declaratory relief—relief which, if successful, could lead to a judgment in the amount of $100 million—bespeaks prejudice. If the case were in its infancy, the prejudice would be minimized by the exploratory posture of the parties. By now, the legal theories and tactics employed by the parties should be known.

Furthermore, Deutsche Solar admits that its legal theories and tactics have been known: it claims that this **[**51]** counterclaim differs from its affirmative defenses only in the relief sought. This, it claims, should have had Hemlock on notice from the day Deutsche Solar first filed its Answer and Affirmative Defenses. But the inverse is true. While Deutsche Solar's Answer may have put Hemlock on notice of a possible counterclaim for return of the prepayments made on the agreements, the excess of eighteen months that have passed since that time have had the opposite effect.

This is not a situation where Deutsche Solar attempts only to "remedy pleading deficiencies" or refine its arguments. *Inge v. Rock Fin. Corp., 281 F.3d 613, 626 (6th Cir. 2002)*. Instead, it seeks to add an altogether new claim and fundamentally alter the adversarial posture of the parties. *See id.* (expressing concern with late amendments that sought to incorporate new claims). Such an amendment will not be permitted at this stage in the litigation. Deutsche Solar's motion will be denied.

VI.

Accordingly, it is **ORDERED** that Plaintiff Hemlock's Motion to Strike, ECF No. 36, is **GRANTED in part** and **DENIED in part**.

It is further **ORDERED** that Defendant Deutsche Solar's Affirmative Defense No. 6, ECF No. 14, is **STRICKEN**.

It is further **ORDERED** that Defendant Deutsche Solar's Motion to Compel, ECF **[**52]** No. 30, is **GRANTED in part** and **DENIED in part**.

It is further **ORDERED** that Plaintiff Hemlock is **DIRECTED** to produce all documents relevant and responsive to Defendant Deutsche Solar's requests relating to its defenses that rely on the theory of the illegal market intervention of a third party.

It is further **ORDERED** that these productions be completed **on or before May 29, 2015**.

It is further **ORDERED** that the discovery cutoff in this matter is adjourned until **May 29, 2015** for the limited purpose of completing the transfer of documents outlined in this order.

It is further **ORDERED** that Defendant Deutsche Solar's Motion for Leave to Amend, ECF No. 56, is **DENIED**.

It is further **ORDERED** that the parties are **DIRECTED** to submit to the Court, through the utilities function of CM/ECF or via facsimile, proposals for the scheduling of currently adjourned dates in this matter.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Congress wrote into the Hatch-Waxman Act (*21 U.S.C. § 355*) a substantial incentive for generic drug manufacturers to enter markets earlier by offering a 180-day exclusivity period to the first generic filer, and only that filer, to challenge a patent (*21 U.S.C. § 355(j)(5)(B)(iv)*).

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN2[] **Regulated Practices, Price Fixing & Restraints of Trade**

The legislature enacted the state's principal ***antitrust law***, the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), to rein in the burgeoning power of monopolies and cartels. The act's principal goal is the preservation of consumer welfare. The Act, like ***antitrust law*** in general, rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of economic resources, the lowest prices, the highest quality, and the greatest material progress, while at the same time providing an environment conducive to the preservation of democratic political and social institutions. At its heart is a prohibition against agreements that prevent the growth of healthy, competitive markets for goods and services and the establishment of prices through market forces. The Act generally outlaws any combinations or agreements that restrain trade or competition or that fix or control prices, and declares that, with certain exceptions, every trust is unlawful, against public policy and void.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Governments > Courts > Common Law

HN3[] **Regulated Practices, Price Fixing & Restraints of Trade**

The trusts the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) prohibits include any combination by two or more persons to create or carry out restrictions in trade or commerce (*Bus. & Prof. Code, § 16720, subd. (a)*) or to prevent competition in manufacturing, making, transportation, sale or purchase of merchandise, produce or any commodity (*§ 16720, subd. (c)*). Also prohibited is any contract by which two or more entities agree to pool, combine or directly or indirectly unite any interests that they may have connected with the sale of any such article or commodity, that its price might in any manner be affected. (*§ 16720, subd. (e)(4)*). Agreements in violation of the Act are absolutely void and not enforceable at law or in equity (*Bus. & Prof. Code, §§ 16722*, *16726*). Though the Cartwright Act is written in absolute terms, in practice not every agreement within the four corners of its prohibitions has been deemed illegal. *Bus. & Prof. Code, §§ 16720*, *16722*, and *16726*, draw upon the common law prohibition against restraints of trade.

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN4[] **Regulated Practices, Intellectual Property**

The patent laws are in pari materia with the antitrust laws and modify them pro tanto to that extent. To promote investment in invention and the public disclosure of new discoveries, Congress has seen fit to grant inventors limited statutory monopolies and the right to exclude competition in the manufacture, use, or sale of the patent's subject (*35 U.S.C. § 154(a)*). Accordingly, the issuance of a federal patent creates an exception to the general rule against monopolies and to the right of access to a free and open market. While the limited monopolies granted to patent owners do not exempt them from the prohibitions of ***antitrust law***, in a given case, possession of a patent may provide a defense to liability. Courts thus must reconcile the two bodies of law, making an adjustment between the lawful restraint on trade of the patent monopoly and the illegal restraint prohibited broadly by ***antitrust law***.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Governments > Legislation > Interpretation

HN5[] **Regulated Practices, Price Fixing & Restraints of Trade**

Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes enacted by California's sister states around the turn of the twentieth century.

Patent Law > Jurisdiction & Review > General Overview

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN6[] **Regulated Practices, Price Fixing & Restraints of Trade**

The United States Supreme Court is the final arbiter of questions of patent law and the extent to which interpretations of ***antitrust law***--whether state or federal--must accommodate patent law's requirements, and Actavis is its latest word on the subject. If, under Actavis, patent law demands extensive deference to patents' presumed validity and the consecration of a broad range of agreements otherwise facially illegal under state law, the California Supreme Court must abide by that judgment. Conversely, if the accommodation necessitated by patent policy is somewhat narrower than previously understood, the California Supreme Court again must treat that determination as conclusive and reconsider the proper domain of state ***antitrust law*** in light of that cession of territory.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Preclusion > Collateral Estoppel

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN7[] Inequitable Conduct, Anticompetitive Conduct

A finding that a patent is invalid operates in rem and estops the patentee from asserting validity against the world. In contrast, a finding that a patent is valid operates only on the parties and does not extend from one infringement case to the next. A future challenger with new or better information may subsequently raise, and succeed on, an invalidity defense to a charge of infringement. If the assertion of patent rights leads to a court injunction excluding a competitor from the marketplace, there is no antitrust problem. If instead the assertion leads to a private settlement agreement, there is a potential antitrust problem. With a settlement, any restraint arises directly from the private agreement and only indirectly from the patent, which remains in the background, motivating the parties' actions according to their assessments of its strength. That a patent has not (yet) been invalidated may allow some confidence about its fundamental enforceability, but does not allow a court to skip entirely an antitrust analysis of competitive restraints within the patent's scope on the assumption that its validity has been established. The scope of the patent test is flawed precisely because it assumes away whatever level of uncertainty a given patent may be subject to.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Governments > Legislation > Interpretation

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Patent Law > Infringement Actions > Exclusive Rights > General Overview

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

HN8[] Regulated Practices, Price Fixing & Restraints of Trade

The scope of the patent test insulates from antitrust scrutiny virtually any agreement that restrains trade no more than the patent itself would have, if valid. State law must yield to federal, but courts cannot under the guise of patent law carve into the legislature's enactments a larger exception than federal law dictates, and Actavis shows such a broad exemption is not required. Accordingly, the scope of the patent test is inapplicable to Cartwright Act (Bus. & Prof. Code, § 16700 et seq.) claims.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the traditional rule of reason, inquiry is limited to whether the challenged conduct promotes or suppresses competition. To determine whether an agreement harms competition more than it helps, a court may consider the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, and the history of the restraint and the reasons for its adoption. In a typical case, this may entail expert testimony on such matters as the definition of the relevant market and the extent of a defendant's market power. Rule of reason inquiry is not required in every case; the California Supreme Court and the United States Supreme Court have partially simplified the analysis by identifying categories of agreements or practices that can be said to always lack redeeming value and thus qualify as per se illegal. The per se rule reflects an irrebuttable presumption that, if the court were to subject the conduct in question to a full-blown inquiry, a violation would be found under the traditional rule of reason.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

HN10[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Under the quick look rule of reason analysis, applicable to cases where an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets, a defendant may be asked to come forward with procompetitive justifications for a challenged restraint without the plaintiff having to introduce elaborate market analysis first. There is generally no categorical line to be drawn between restraints that give rise to an intuitively obvious inference of anticompetitive effect and those that call for more detailed treatment. What is required, rather, is an inquiry meet for the case, looking to the circumstances, details, and logic of a restraint. The emergence of quick look rule of reason analysis did not signal the supplanting of the traditional per se/rule of reason dichotomy with a new trichotomy, but rather a shift to something of a sliding scale in antitrust analysis.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Governments > Courts > Common Law

Governments > Legislation > Interpretation

HN11[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Nothing in the text of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) dictates the precise details of the per se and rule of reason approaches; these are but useful tools the courts have developed over time to carry out the broad purposes and give meaning to the general phrases of the antitrust statutes. It is consistent with the common law tradition at the root of the antitrust laws to describe, as the United States Supreme Court now has, the analytic approach as involving a continuum, with the circumstances, details, and logic of a particular restraint dictating how the courts that confront the restraint should analyze it. In lieu of an undifferentiated one-size-fits-all rule of reason, courts may devise rules for offering proof, or even presumptions where justified, to make the rule of reason a fair and efficient way to prohibit anticompetitive restraints and to promote procompetitive ones. It follows that courts must consider not simply whether per se or rule of reason analysis applies to reverse payment patent settlements. To the extent rule of reason analysis applies, courts must also consider how the analysis should be structured to most efficiently differentiate between reasonable and unreasonable restraints of trade in this context.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN12[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

Agreements to establish or maintain a monopoly are restraints of trade made unlawful by the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*). Under general antitrust principles, a business may permissibly develop monopoly power, i.e., the power to control prices or exclude competition, through the superiority of its product or business acumen. To acquire or maintain that power through agreement and combination with others, however, is quite a different matter. Pursuant to this rule, businesses may not engage in a horizontal allocation of markets, with would-be competitors dividing up territories or customers. Such allocations afford each participant an enclave, free from the danger of outside incursions, in which to exercise monopoly power and extract monopoly premiums. Similarly, a firm may not pay its only potential competitor not to compete in return for a share of the profits that firm can obtain by being a monopolist.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN13[] **Cartels & Horizontal Restraints, Price Fixing**

Antitrust law condemns a patentee's payment to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market. This is so even when the patent is likely valid: The owner of a particularly valuable patent might contend that even a small risk of invalidity justifies a large payment. But, be that as it may, the payment (if otherwise unexplained) likely seeks to prevent the risk of competition. That consequence constitutes the relevant anticompetitive harm.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Infringement Actions > Exclusive Rights > Limitations

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN14[] **Actual Monopolization, Anticompetitive & Predatory Practices**

For antitrust purposes, patents are no longer to be treated as presumptively ironclad. This means the period of exclusion attributable to a patent is not its full life, but its expected life had enforcement been sought. This expected life represents the baseline against which the competitive effects of any agreement must be measured. Because the relevant baseline is the result that would have occurred in the absence of any agreement, it is not a cognizable harm simply to show the parties might have elected a different settlement agreement more favorable to competition and consumers. There is no statutory right to have parties enter the agreement most favorable to competition, only a prohibition against entering agreements that harm competition. If an agreement only replicates the likely average result of litigation, any exclusion is a function of the underlying patent strength; if it extends exclusion beyond that point, this further exclusion from the marketplace-and the attendant anticompetitive effect-is attributable to the agreement. A patent owner cannot extend his statutory grant by contract or agreement. A patent affords no immunity for a monopoly not fairly or plainly within the grant. The measure of the statutory grant, and the limit on the monopoly that may be preserved by agreement, is the average expected duration that would have resulted from judicial testing.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN15[] **Regulated Practices, Price Fixing & Restraints of Trade**

Every antitrust case involves a comparison of a challenged agreement against a prediction about--a probabilistic assessment of--the expected competition that would have arisen in its absence. Every restraint of trade condemned for suppressing market entry involves uncertainties about the extent to which competition would have come to pass. No matter; the law does not condone the purchase of protection from uncertain competition any more than it condones the elimination of actual competition. The antitrust laws foreclose agreements eliminating the risk of competition-the competitive market that might have been. Purchasing freedom from the possibility of competition, whether done by a patentee or anyone else, is illegal. An agreement to exchange consideration for elimination of any portion of the period of competition that would have been expected had a patent been litigated is a violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*).

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN16[] **Regulated Practices, Price Fixing & Restraints of Trade**

A third-party plaintiff challenging a reverse payment patent settlement must show four elements: (1) the settlement includes a limit on the settling generic challenger's entry into the market; (2) the settlement includes cash or equivalent financial consideration flowing from the brand to the generic challenger; and the consideration exceeds (3) the value of goods and services other than any delay in market entry provided by the generic challenger to the brand, as well as (4) the brand's expected remaining litigation costs absent settlement. That a plaintiff challenging a reverse payment settlement must establish the settlement limits the challenging generic's entry is self-evident. If the settlement contains no component of delay and permits the generic to enter the market and compete fully and immediately, there is no restraint of trade and no potential for antitrust concern.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN17[] **Regulated Practices, Price Fixing & Restraints of Trade**

A third-party plaintiff challenging a reverse payment patent settlement must establish a reverse payment-financial consideration flowing from the brand to the generic challenger. In the absence of payment, one would expect rational parties that settle to select a market entry point roughly corresponding to their joint expectation as to when entry would have occurred, on average, if the patent's validity and infringement had been fully litigated. If market entry were substantially later than the generic thought it could obtain through litigation, the generic would be unwilling to settle and forgo the additional profits it thought it could earn from an earlier entry; conversely, if the entry were substantially earlier than the brand thought it could obtain through litigation, the brand would not settle and forgo an additional period of monopoly. Absent payment, one can accept an agreement to postpone market entry as a fair approximation of the expected level of competition that would have obtained had the parties litigated; absent payment, any delay in entry may be attributed to the effective strength of the challenged patent, rather than the settlement agreement.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

The concern that a reverse payment raises will depend in part on its independence from other services for which it might represent payment. A payment may reflect compensation for other services that the generic has promised to perform-such as distributing the patented item or helping to develop a market for that item. If payment is no more than would be expected as compensation for additional products or services, then the reverse payment patent agreement includes no additional consideration for delay and courts can trust that any limit on competition is a legitimate consequence of the patent's strength and the contracting parties' expectations concerning its exclusionary power. Considerable caution is in order in evaluating settlements that include side agreements for generic products or services. A side agreement involving difficult-to-value assets might conceivably be added to a patent settlement to provide cover for the purchase of additional freedom from competition. Side deals should not be permitted to serve as fig leaves for agreements to eliminate competition.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN19[] **Regulated Practices, Price Fixing & Restraints of Trade**

A third-party plaintiff challenging a reverse payment patent settlement must establish the amount of the payment, over and above the value of collateral products or services from the generic, also exceeds the brand's anticipated future litigation costs. In some cases, a reverse payment may amount to no more than a rough approximation of the litigation expenses saved through the settlement. Where a reverse payment reflects traditional settlement considerations, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement. In such cases, the parties may have provided for a reverse payment without having sought or brought about anticompetitive consequences. A rational brand might be indifferent as between (1) actually litigating or (2) settling, with market entry at the point expected, on average, from asserting its patent in litigation and a payment to the generic in an amount up to what would have been spent in that litigation. It is thus necessary to evaluate the reverse payment's scale in relation to the payor's anticipated future litigation costs.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Evidence > Burdens of Proof > Allocation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN20[] **Private Actions, State Regulation**

Unless a challenged reverse payment patent settlement agreement includes both a restraint on generic competition and a reverse payment to the generic in excess of both brand litigation costs and generic collateral products and services, there is no reason to assume the settlement includes any element of purchased freedom from competition, as opposed to a limit on competition flowing naturally, and lawfully, from the perceived strength of the brand's patent. Accordingly, the burden of proof as to these elements rests with the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) plaintiff.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Burdens of Proof > Allocation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

HN21[] **Regulated Practices, Price Fixing & Restraints of Trade**

Where the evidence necessary to establish a fact essential to a claim lies peculiarly within the knowledge and competence of one of the parties, that party has the burden of going forward with the evidence on the issue although it is not the party asserting the claim. This is so with regard to both a settling party's own litigation costs and the existence and value of any collateral products or services provided as part of a patent settlement; these are matters about which the settling parties will necessarily have superior knowledge. Accordingly, once a plaintiff has shown an agreement involving a reverse payment and delay, the defendants have the burden of coming forward with evidence of litigation costs and the value of collateral products and services. If the defendants fail to do so, because, e.g., there was no side agreement or because they do not dispute the collective amounts fall short of any payment to the generic, the plaintiff has satisfied its burden on these points. If instead the defendants do so, the plaintiff must carry the ultimate burden of persuasion that any reverse payment exceeds litigation costs and the value of collateral products or services.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN22[] **Regulated Practices, Price Fixing & Restraints of Trade**

A showing of the four elements for challenging a reverse payment patent settlement is not only necessary but also sufficient to make out a prima facie case that the settlement is anticompetitive. If a brand is willing to pay a generic more than the costs of continued litigation, and more than the value of any collateral benefits, in order to settle and keep the generic out of the market, there is cause to believe some portion of the consideration is payment for exclusion beyond the point that would have resulted, on average, from simply litigating the case to its conclusion. Otherwise, the brand would have had little incentive to settle at such a high price. Moreover, the larger the gap, the stronger the inference one can draw.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN23[] **Private Actions, State Regulation**

Ordinarily, the fact that a large, unjustified reverse payment risks antitrust liability does not prevent litigating parties from settling their lawsuit. Parties can still use financial considerations to bridge small gaps arising from differing subjective perceptions of their probabilities of success in litigation; what they cannot do is use money to bridge their differences over the point when competitive entry is economically desirable, for that gap is not one ***antitrust law*** permits would-be competitors to bridge by agreement: If the basic reason the parties prefer a reverse payment settlement is a desire to maintain and to share patent-generated monopoly profits, then, in the absence of some other justification, the antitrust laws are likely to forbid the arrangement. That some settlements might no longer be possible absent a payment in excess of litigation costs is no concern if the ones now barred would simply have facilitated the sharing of monopoly profits.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Inferences & Presumptions > Presumptions > Creation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN24[] **Regulated Practices, Price Fixing & Restraints of Trade**

Proof of a reverse payment in excess of litigation costs and collateral products and services raises a presumption that the settling patentee has market power sufficient for the reverse payment patent settlement to generate significant anticompetitive effects.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Evidence > Burdens of Proof > Burden Shifting

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN25[] **Private Actions, State Regulation**

Once a plaintiff has made out a prima facie case that a reverse payment patent settlement has anticompetitive effects, a court must weigh these anticompetitive effects against the possible justifications for the challenged restraint. At this point, it is appropriate to shift the burden to the defendants to offer legitimate justifications and come forward with evidence that the challenged settlement is in fact procompetitive. *Bus. & Prof. Code, § 16725*, provides that it is not unlawful to enter an agreement to promote, encourage, or increase competition. An antitrust defendant cannot argue a settlement is procompetitive simply because it allows competition earlier than would have occurred if the brand had won the patent action; the relevant baseline is the average period of competition that would have obtained in the absence of settlement.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN26[] **Regulated Practices, Price Fixing & Restraints of Trade**

Reverse payment patent agreements must be assessed as of the time they are made, at which point the patent's validity is unknown and unknowable. Just as later invalidation of a patent does not prove an agreement when made was anticompetitive, later evidence of validity will not automatically demonstrate an agreement was procompetitive. ***Antitrust law*** condemns the purchase of freedom from competition; what matters is whether a settlement postpones market entry beyond the average point that would have been expected at the time in the absence of agreement. To determine whether such a settlement has occurred under state law, as under federal law, it is normally not necessary to litigate patent validity. An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market-the very anticompetitive consequence that underlies the claim of antitrust unlawfulness. In a word, the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Evidence > Burdens of Proof > Allocation

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN27[] **Regulated Practices, Price Fixing & Restraints of Trade**

The ultimate burden throughout rests with the plaintiff to show that a challenged reverse payment patent settlement agreement is anticompetitive. Once the plaintiff has made out a prima facie case that a reverse payment patent settlement is anticompetitive, however, the plaintiff thereafter need only show that any procompetitive justifications proffered by the defendants are unsupportable. The ultimate question in reverse payment settlement cases is whether an agreement involves significant unjustified anticompetitive consequences. The prima facie case requires the plaintiff to eliminate the possibility that litigation costs or other products or services could explain the consideration paid the generic. If a plaintiff does so and thereafter can dispel each additional justification the defendants put forward to explain the consideration, the conclusion follows that the settlement payment must include, in part, consideration for additional delay in entering the market. That payment for delay is condemned by the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), as by federal ***antitrust law***, and its purchase as part of a settlement agreement is an unlawful restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Rule Tests

Evidence > Burdens of Proof > Allocation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN28[] **Per Se Rule & Rule of Reason, Per Se Rule Tests**

Under the structure of the rule of reason applicable to reverse payment patent settlements, to make out a prima facie case that a challenged reverse payment patent agreement is an unlawful restraint of trade, a plaintiff must show the agreement contains both a limit on the generic challenger's entry into the market and compensation from the patentee to the challenger. The defendants bear the burden of coming forward with evidence of litigation costs or valuable collateral products or services that might explain the compensation; if the defendants do so, the plaintiff has the burden of demonstrating the compensation exceeds the reasonable value of these. If a prima facie case has been made out, the defendants may come forward with additional justifications to demonstrate the settlement agreement nevertheless is procompetitive. A plaintiff who can dispel these justifications has carried the burden of demonstrating the settlement agreement is an unreasonable restraint of trade under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*).

Constitutional Law > Supremacy Clause > Federal Preemption

HN29[] **Supremacy Clause, Federal Preemption**

Obstacle preemption arises when, under the circumstances of a particular case, the challenged state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Constitutional Law > Supremacy Clause > Federal Preemption

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN30[] **Trade Practices & Unfair Competition, State Regulation**

State ***antitrust law*** ordinarily is fully compatible with federal law. States have regulated against monopolies and unfair competition for longer than the federal government, and federal law is intended only to supplement, not displace, state antitrust remedies. The Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) is broader in range and deeper in reach than the federal Sherman Act (*15 U.S.C. § 1 et seq.*); this greater domain has never been thought to pose Supremacy Clause problems. To the contrary, in light of the established state role, a presumption against preemption applies.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Rule Tests

Constitutional Law > Supremacy Clause > Federal Preemption

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN31[] **Per Se Rule & Rule of Reason, Per Se Rule Tests**

Where the choice of a test rests solely on economic analysis, no patent law preemption concerns arise. Instead, the issue reduces to a problem in the relation between federal and state ***antitrust law***, and there the United States Supreme Court has been quite clear that states may depart from federal rules--or accept an invitation to develop a gap in the law explicitly left by the Supreme Court--absent evidence of a clear congressional purpose to the contrary. The structured rule of reason applicable to reverse payment patent settlements adopted by the California Supreme Court is consistent with, not an obstacle to, congressional patent and health care goals in two specific ways. First, considerable research and analysis suggests the broad availability of reverse payment settlements favors weak patents and channels investment resources toward suboptimal innovation prospects. To the extent careful scrutiny of such settlements promotes the very innovation the patent laws were intended to promote, it cannot stand as an obstacle to congressional objectives. Second, a fundamental goal of the Hatch-Waxman Act (*21 U.S.C. § 355*) is to enhance generic competition and thereby lower prices. By ferreting out anticompetitive agreements that limit generic market entry and sustain costly monopolies, a structured rule of reason serves those goals and poses no obstacle to congressional objectives.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A reverse payment settlement between a brand-name drug manufacturer and a would-be generic competitor relating to a patent on the active ingredient in one of the manufacturer's antibiotic drugs resulted in nine coordinated class action suits brought against them by indirect purchasers of the drug in California. The purchasers alleged the settlement violated the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), the unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*), and the common law prohibition against monopolies. The trial court granted a defense summary judgment. (Superior Court of San Diego County, Nos. JCCP 4154 and 4220, Richard E. L. Strauss, Judge.) The Court of Appeal, Fourth Dist., Div. One, No. D056361, affirmed, holding that agreements restraining competition within the scope of a patent are lawful unless the patent was procured by fraud or the suit to enforce it was objectively baseless.

The Supreme Court reversed the Court of Appeal's judgment and remanded for further proceedings. The court held that the scope of the patent test is inapplicable to Cartwright Act claims. The patent test accords excess weight to the policies motivating patent law and gives insufficient consideration to the concerns animating ***antitrust law***. The court observed that, under federal ***antitrust law***, reverse payment settlements, under which brand-name drug manufacturers make reverse payments to generic drug manufacturers in exchange for the generics dropping their patent challenges and consenting to stay out of the market, are not immune from scrutiny, even if they limit competition no more than a valid patent would have. The court concluded the **[*117]** same is true under state ***antitrust law***. Some patents are valid; some are not. Sometimes competition would infringe; sometimes it would not. A third party plaintiff challenging a reverse payment patent settlement must show four elements: (1) the settlement includes a limit on the settling generic challenger's entry into the market; (2) the settlement includes cash or equivalent financial consideration flowing from the brand to the generic challenger; and the consideration exceeds (3) the value of goods and services other than any delay in market entry provided by the generic challenger to the brand, as well as (4) the brand's expected remaining litigation costs absent settlement.

Parties illegally restrain trade when they privately agree to substitute consensual monopoly in place of potential competition that would have followed a finding of invalidity or noninfringement. The court concluded that the structured rule of reason it adopted was consistent with, not an obstacle to, congressional patent and health care goals. Accordingly, the trial court and the Court of Appeal erred in treating the patent at issue as ironclad and using the entire period until its expiration as the relevant benchmark in order to assess whether the parties' settlement agreement had anticompetitive effects. (Opinion by Werdegar, J., expressing the unanimous view of the court.)

Headnotes

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1)[] **(1)**

Patents § 1—Hatch-Waxman Act—Generic Filer.

Congress wrote into the Hatch-Waxman Act (*21 U.S.C. § 355*) a substantial incentive for generic drug manufacturers to enter markets earlier by offering a 180-day exclusivity period to the first generic filer, and only that filer, to challenge a patent (*21 U.S.C. § 355(j)(5)(B)(iv)*).

CA(2)[] **(2)**

Monopolies and Restraints of Trade § 6—Cartwright Act—Scope.

The Legislature enacted the state's principal ***antitrust law***, the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), to rein in the burgeoning power of monopolies and cartels. The act's principal goal is the preservation of consumer welfare. The act, like ***antitrust law*** in general, rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of economic resources, the lowest prices, the highest quality, and the greatest material progress, while at the same time providing an environment conducive to the preservation of democratic political and social institutions. At its heart is a prohibition against agreements that prevent the growth of healthy, competitive markets for goods and services and the establishment of prices through market forces. The act generally outlaws any combinations or agreements that restrain trade or competition or that fix or control prices, and declares that, with certain exceptions, every trust is unlawful, against public policy and void.

[*118]

CA(3)[] **(3)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Prohibited Agreements and Combinations, Generally.

The trusts the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) prohibits include any combination by two or more persons to create or carry out restrictions in trade or commerce (*Bus. & Prof. Code, § 16720, subd. (a)*) or to prevent competition in manufacturing, making, transportation, sale or purchase of merchandise, produce or any commodity (*§ 16720, subd. (c)*). Also prohibited is any contract by which two or more entities agree to pool, combine or directly or indirectly unite any interests that they may have connected with the sale of any such article or commodity, that its price might in any manner be affected. (*§ 16720, subd. (e)(4)*). Agreements in violation of the act are absolutely void and not enforceable at law or in equity (*Bus. & Prof. Code, §§ 16722*, *16726*). Though the Cartwright Act is written in absolute terms, in practice not every agreement within the four corners of its prohibitions has been deemed illegal. *Bus. & Prof. Code, §§ 16720*, *16722*, and *16726*, draw upon the common law prohibition against restraints of trade.

CA(4)[] **(4)**

Patents § 1—Construction With Antitrust Laws.

The patent laws are in pari materia with the antitrust laws and modify them pro tanto to that extent. To promote investment in invention and the public disclosure of new discoveries, Congress has seen fit to grant inventors limited statutory monopolies and the right to exclude competition in the manufacture, use, or sale of the patent's subject (*35 U.S.C. § 154(a)*). Accordingly, the issuance of a federal patent creates an exception to the general rule against monopolies and to the right to access to a free and open market. While the limited monopolies granted to patent owners do not exempt them from the prohibitions of ***antitrust law***, in a given case, possession of a patent may provide a defense to liability. Courts thus must reconcile the two bodies of law, making an adjustment between the lawful restraint on trade of the patent monopoly and the illegal restraint prohibited broadly by ***antitrust law***.

CA(5)[] **(5)**

Monopolies and Restraints of Trade § 1—Federal *Antitrust Law* Interpretations—Effect on State Law.

Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes enacted by California's sister states around the turn of the twentieth century.

CA(6)[] **(6)**

Courts § 39—Doctrine of Stare Decisis—Opinions of United States Supreme Court—Patent Law—Interpretations of *Antitrust Law*.

The United States Supreme Court is the final arbiter of questions of **[*119]** patent law and the extent to which interpretations of ***antitrust law***—whether state or federal—must accommodate patent law's requirements, and *Actavis* is its latest word on the subject. If, under *Actavis*, patent law demands extensive deference to patents' presumed validity and the consecration of a broad range of agreements otherwise facially illegal under state law, the California Supreme Court must abide by that judgment. Conversely, if the accommodation necessitated by patent policy is somewhat narrower than previously understood, the California Supreme Court again must treat that determination as conclusive and reconsider the proper domain of state ***antitrust law*** in light of that cession of territory.

CA(7)[] **(7)**

Patents § 1—Validity—Antitrust Issues—Patent Test.

A finding that a patent is invalid operates in rem and estops the patentee from asserting validity against the world. In contrast, a finding that a patent is valid operates only on the parties and does not extend from one infringement case to the next. A future challenger with new or better information may subsequently raise, and succeed on, an invalidity defense to a charge of infringement. If the assertion of patent rights leads to a court injunction excluding a competitor from the marketplace, there is no antitrust problem. If instead the assertion leads to a private settlement agreement, there is a potential antitrust problem. With a settlement, any restraint arises directly from the private agreement and only indirectly from the patent, which remains in the background, motivating the parties' actions according to their assessments of its strength. That a patent has not (yet) been invalidated may allow some confidence about its fundamental enforceability, but does not allow a court to skip entirely an antitrust analysis of competitive restraints within the patent's scope on the assumption that its validity has been established. The scope of the patent test is flawed precisely because it assumes away whatever level of uncertainty a given patent may be subject to.

CA(8)[] **(8)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Applicability of Patent Test.

The scope of the patent test insulates from antitrust scrutiny virtually any agreement that restrains trade no more than the patent itself would have, if valid. State law must yield to federal, but courts cannot under the guise of patent law carve into the Legislature's enactments a larger exception than federal law dictates, and *FTC v. Actavis* shows such a broad exemption is not required. Accordingly, the scope of the patent test is inapplicable to Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) claims.

CA(9)[] **(9)**

Monopolies and Restraints of Trade § 2—Rule of Reason.

Under the traditional rule of reason, inquiry is limited to whether the challenged conduct promotes or suppresses competition. To determine whether an **[*120]** agreement harms competition more than it helps, a court may consider the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, and the history of the restraint and the reasons for its adoption. In a typical case, this may entail expert testimony on such matters as the definition of the relevant market and the extent of a defendant's market power. Rule of reason inquiry is not required in every case; the California Supreme Court and the United States Supreme Court have partially simplified the analysis by identifying categories of agreements or practices that can be said to always lack redeeming value and thus qualify as per se illegal. The per se rule reflects an irrebuttable presumption that, if the court were to subject the conduct in question to a full-blown inquiry, a violation would be found under the traditional rule of reason.

CA(10)[] **(10)**

Monopolies and Restraints of Trade § 2—Quick Look Rule of Reason.

Under the quick look rule of reason analysis, applicable to cases where an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets, a defendant may be asked to come forward with procompetitive justifications for a challenged restraint without the plaintiff having to introduce elaborate market analysis first. There is generally no categorical line to be drawn between restraints that give rise to an intuitively obvious inference of anticompetitive effect and those that call for more detailed treatment. What is required, rather, is an inquiry meet for the case, looking to the circumstances, details, and logic of a restraint. The emergence of quick look rule of reason analysis did not signal the supplanting of the traditional per se/rule of reason dichotomy with a new trichotomy, but rather a shift to something of a sliding scale in antitrust analysis.

CA(11)[] **(11)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Antitrust Analysis—Reverse Payment Patent Settlements.

Nothing in the text of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) dictates the precise details of the per se and rule of reason approaches; these are but useful tools the courts have developed over time to carry out the broad purposes and give meaning to the general phrases of the antitrust statutes. It is consistent with the common law tradition at the root of the antitrust laws to describe, as the United States Supreme Court now has, the analytic approach as involving a continuum, with the circumstances, details, and logic of a particular restraint dictating how the courts that confront the restraint should analyze it. In lieu of an undifferentiated one-size-fits-all rule of reason, courts may devise rules for offering proof, or even presumptions where justified, to make the rule of reason a fair and efficient way to prohibit anticompetitive restraints and to promote procompetitive ones. It follows that courts must consider not **[*121]** simply whether per se or rule of reason analysis applies to reverse payment patent settlements. To the extent rule of reason analysis applies, courts must also consider how the analysis should be structured to most efficiently differentiate between reasonable and unreasonable restraints of trade in this context.

CA(12)[] **(12)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Prohibited Agreements and Combinations.

Agreements to establish or maintain a monopoly are restraints of trade made unlawful by the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*). Under general antitrust principles, a business may permissibly develop monopoly power, i.e., the power to control prices or exclude competition, through the superiority of its product or business acumen. To acquire or maintain that power through agreement and combination with others, however, is quite a different matter. Pursuant to this rule, businesses may not engage in a horizontal allocation of markets, with would-be competitors dividing up territories or customers. Such allocations afford each participant an enclave, free from the danger of outside incursions, in which to exercise monopoly power and extract monopoly premiums. Similarly, a firm may not pay its only potential competitor not to compete in return for a share of the profits that firm can obtain by being a monopolist.

CA(13)[] **(13)**

Monopolies and Restraints of Trade § 3—Agreements Between Patentees and Challengers.

Antitrust law condemns a patentee's payment to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market. This is so even when the patent is likely valid: The owner of a particularly valuable patent might contend that even a small risk of invalidity justifies a large payment. But, be that as it may, the payment (if otherwise unexplained) likely seeks to prevent the risk of competition. That consequence constitutes the relevant anticompetitive harm.

CA(14)[] **(14)**

Patents § 1—Period of Exclusion—Antitrust Analysis.

For antitrust purposes, patents are no longer to be treated as presumptively ironclad. This means the period of exclusion attributable to a patent is not its full life, but its expected life had enforcement been sought. This expected life represents the baseline against which the competitive effects of any agreement must be measured. If an agreement only replicates the likely average result of litigation, any exclusion is a function of the underlying patent strength; if it extends exclusion beyond that point, this further exclusion from the marketplace-and the attendant anticompetitive effect-is attributable to the agreement. *FTC v. Actavis* thus represents an application of the settled principle that the owner of a patent cannot extend the owner's statutory grant by contract or agreement. A patent affords no **[*122]** immunity for a monopoly not fairly or plainly within the grant. The measure of the statutory grant, and the limit on the monopoly that may be preserved by agreement, is the average expected duration that would have resulted from judicial testing.

CA(15)[] **(15)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Agreements Eliminating Risk of Competition—Patents.

Every antitrust case involves a comparison of a challenged agreement against a prediction about—a probabilistic assessment of—the expected competition that would have arisen in its absence. Every restraint of trade condemned for suppressing market entry involves uncertainties about the extent to which competition would have come to pass. No matter; the law does not condone the purchase of protection from uncertain competition any more than it condones the elimination of actual competition. The antitrust laws foreclose agreements eliminating the risk of competition-the competitive market that might have been. Purchasing freedom from the possibility of competition, whether done by a patentee or anyone else, is illegal. An agreement to exchange consideration for elimination of any portion of the period of competition that would have been expected had a patent been litigated is a violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*).

CA(16)[] **(16)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges—Elements.

A third party plaintiff challenging a reverse payment patent settlement must show four elements: (1) the settlement includes a limit on the settling generic challenger's entry into the market; (2) the settlement includes cash or equivalent financial consideration flowing from the brand to the generic challenger; and the consideration exceeds (3) the value of goods and services other than any delay in market entry provided by the generic challenger to the brand, as well as (4) the brand's expected remaining litigation costs absent settlement. That a plaintiff challenging a reverse payment settlement must establish the settlement limits the challenging generic's entry is self-evident. If the settlement contains no component of delay and permits the generic to enter the market and compete fully and immediately, there is no restraint of trade and no potential for antitrust concern. As well, plaintiff must establish a reverse payment-financial consideration flowing from the brand to the generic challenger. In the absence of payment, one would expect rational parties that settle to select a market entry point roughly corresponding to their joint expectation as to when entry would have occurred, on average, if the patent's validity and infringement had been fully litigated. If market entry were substantially later than the generic thought it could obtain through litigation, the generic would be unwilling to settle and forgo the additional profits it thought it could earn from an earlier entry; conversely, if the **[*123]** entry were substantially earlier than the brand thought it could obtain through litigation, the brand would not settle and forgo an additional period of monopoly. Absent payment, one can accept an agreement to postpone market entry as a fair approximation of the expected level of competition that would have obtained had the parties litigated; absent payment, any delay in entry may be attributed to the effective strength of the challenged patent, rather than the settlement agreement.

CA(17)[] **(17)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Consideration—Side Agreements.

The concern that a reverse payment raises will depend in part on its independence from other services for which it might represent payment. A payment may reflect compensation for other services that the generic has promised to perform—such as distributing the patented item or helping to develop a market for that item. If payment is no more than would be expected as compensation for additional products or services, then the agreement includes no additional consideration for delay and courts can trust that any limit on competition is a legitimate consequence of the patent's strength and the contracting parties' expectations concerning its exclusionary power. Considerable caution is in order in evaluating settlements that include side agreements for generic products or services. A side agreement involving difficult to value assets might conceivably be added to a patent settlement to provide cover for the purchase of additional freedom from competition. Side deals should not be permitted to serve as fig leaves for agreements to eliminate competition.

CA(18)[] **(18)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Amount of Payment—Anticompetition Challenges.

A third party plaintiff challenging a reverse payment patent settlement must establish the amount of the payment, over and above the value of collateral products or services from the generic, also exceeds the brand's anticipated future litigation costs. In some cases, a reverse payment may amount to no more than a rough approximation of the litigation expenses saved through the settlement. Where a reverse payment reflects traditional settlement considerations, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement. In such cases, the parties may have provided for a reverse payment without having sought or brought about anticompetitive consequences. A rational brand might be indifferent as between (1) actually litigating or (2) settling, with market entry at the point expected, on average, from asserting its patent in litigation and a payment to the generic in an amount up to what would have been spent in that litigation. It is thus necessary to evaluate the reverse payment's scale in relation to the payor's anticipated future litigation costs.

[*124] *CA(19)*[] **(19)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges—Burden of Proof.

Unless a challenged reverse payment patent settlement agreement includes both a restraint on generic competition and a reverse payment to the generic in excess of both brand litigation costs and generic collateral products and services, there is no reason to assume the settlement includes any element of purchased freedom from competition, as opposed to a limit on competition flowing naturally, and lawfully, from the perceived strength of the brand's patent. Accordingly, the burden of proof as to these elements rests with the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) plaintiff.

CA(20)[] **(20)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges—Burden of Proof.

Where the evidence necessary to establish a fact essential to a claim lies peculiarly within the knowledge and competence of one of the parties, that party has the burden of going forward with the evidence on the issue although it is not the party asserting the claim. This is so with regard to both a settling party's own litigation costs and the existence and value of any collateral products or services provided as part of a patent settlement; these are matters about which the settling parties will necessarily have superior knowledge. Accordingly, once a plaintiff has shown an agreement involving a reverse payment and delay, the defendants have the burden of coming forward with evidence of litigation costs and the value of collateral products and services. If the defendants fail to do so, because, e.g., there was no side agreement or because they do not dispute the collective amounts fall short of any payment to the generic, the plaintiff has satisfied its burden on these points. If instead the defendants do so, the plaintiff must carry the ultimate burden of persuasion that any reverse payment exceeds litigation costs and the value of collateral products or services.

CA(21)[] **(21)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges—Prima Facie Case.

A showing of the four elements for challenging a reverse payment patent settlement is not only necessary but also sufficient to make out a prima facie case that the settlement is anticompetitive. If a brand is willing to pay a generic more than the costs of continued litigation, and more than the value of any collateral benefits, in order to settle and keep the generic out of the market, there is cause to believe some portion of the consideration is payment for exclusion beyond the point that would have resulted, on average, from simply litigating the case to its conclusion. Otherwise, the brand would have had little incentive to settle at such a high price. Moreover, the larger the gap, the stronger the inference one can draw.

[*125] *CA(22)*[] **(22)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Reverse Payment Patent Settlements.

Ordinarily, the fact that a large, unjustified reverse payment risks antitrust liability does not prevent litigating parties from settling their lawsuit. Parties can still use financial considerations to bridge small gaps arising from differing subjective perceptions of their probabilities of success in litigation; what they cannot do is use money to bridge their differences over the point when competitive entry is economically desirable, for that gap is not one ***antitrust law*** permits would-be competitors to bridge by agreement: If the basic reason the parties prefer a reverse payment settlement is a desire to maintain and to share patent-generated monopoly profits, then, in the absence of some other justification, the antitrust laws are likely to forbid the arrangement. That some settlements might no longer be possible absent a payment in excess of litigation costs is no concern if the ones now barred would simply have facilitated the sharing of monopoly profits.

CA(23)[] **(23)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Presumptions.

Proof of a reverse payment in excess of litigation costs and collateral products and services raises a presumption that the settling patentee has market power sufficient for the reverse payment patent settlement to generate significant anticompetitive effects.

CA(24)[] **(24)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges—Burden of Proof—Shifting.

Once a plaintiff has made out a prima facie case that a reverse payment patent settlement has anticompetitive effects, a court must weigh these anticompetitive effects against the possible justifications for the challenged restraint. At this point, it is appropriate to shift the burden to the defendants to offer legitimate justifications and come forward with evidence that the challenged settlement is in fact procompetitive. *Bus. & Prof. Code, § 16725*, provides that it is not unlawful to enter an agreement to promote, encourage or increase competition. An antitrust defendant cannot argue a settlement is procompetitive simply because it allows competition earlier than would have occurred if the brand had won the patent action; the relevant baseline is the average period of competition that would have obtained in the absence of settlement.

CA(25)[] **(25)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Amount of Payment.

Consideration of whether a reverse payment patent agreement is justified as procompetitive will not turn on whether the patent would ultimately have been proved valid or invalid. Agreements must be assessed as of the time they are made, at which point the patent's validity is unknown and unknowable. Just as later invalidation of a patent does not prove an agreement when made **[*126]** was anticompetitive, later evidence of validity will not automatically demonstrate an agreement was procompetitive. ***Antitrust law*** condemns the purchase of freedom from competition; what matters is whether a settlement postpones market entry beyond the average point that would have been expected at the time in the absence of agreement. To determine whether such a settlement has occurred under state law, as under federal law, it is normally not necessary to litigate patent validity. An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness. In a word, the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself.

CA(26)[] **(26)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges—Burden of Proof—Prima Facie Case.

The ultimate burden throughout rests with the plaintiff to show that a challenged reverse payment patent settlement agreement is anticompetitive. Once the plaintiff has made out a prima facie case that a reverse payment patent settlement is anticompetitive, however, the plaintiff thereafter need only show that any procompetitive justifications proffered by the defendants are unsupportable. The ultimate question in reverse payment settlement cases is whether an agreement involves significant unjustified anticompetitive consequences. The prima facie case requires the plaintiff to eliminate the possibility that litigation costs or other products or services could explain the consideration paid the generic. If a plaintiff does so and thereafter can dispel each additional justification the defendants put forward to explain the consideration, the conclusion follows that the settlement payment must include, in part, consideration for additional delay in entering the market. That payment for delay is condemned by the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), as by federal ***antitrust law***, and its purchase as part of a settlement agreement is an unlawful restraint of trade.

CA(27)[] **(27)**

Monopolies and Restraints of Trade § 7—Cartwright Act—Reverse Payment Patent Settlements—Rule of Reason—Anticompetition Challenges—Burden of Proof—Prima Facie Case.

Under the structure of the rule of reason applicable to reverse payment patent settlements, to make out a prima facie case that a challenged reverse payment patent agreement is an unlawful restraint of trade, a plaintiff must show the agreement contains both a limit on the generic challenger's entry into the **[*127]** market and compensation from the patentee to the challenger. The defendants bear the burden of coming forward with evidence of litigation costs or valuable collateral products or services that might explain the compensation; if the defendants do so, the plaintiff has the burden of demonstrating the compensation exceeds the reasonable value of these. If a prima facie case has been made out, the defendants may come forward with additional justifications to demonstrate the settlement agreement nevertheless is procompetitive. A plaintiff who can dispel these justifications has carried the burden of demonstrating the settlement agreement is an unreasonable restraint of trade under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*).

CA(28)[] **(28)**

Constitutional Law § 34—Distribution of Powers—Between Federal and State Governments—Obstacle Preemption.

Obstacle preemption arises when, under the circumstances of a particular case, the challenged state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

CA(29)[] **(29)**

Monopolies and Restraints of Trade § 1—Relation Between Federal and State Law—Presumption Against Preemption.

State ***antitrust law*** ordinarily is fully compatible with federal law. States have regulated against monopolies and unfair competition for longer than the federal government, and federal law is intended only to supplement, not displace, state antitrust remedies. The Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) is broader in range and deeper in reach than the federal Sherman Act (*15 U.S.C. § 1 et seq.*); this greater domain has never been thought to pose supremacy clause problems. To the contrary, in light of the established state role, a presumption against preemption applies.

CA(30)[] **(30)**

Monopolies and Restraints of Trade § 1—Relation Between Federal and State Law—Obstacle Preemption—Reverse Payment Patent Settlements—Structured Rule of Reason.

Where the choice of a test rests solely on economic analysis, no patent law preemption concerns arise. Instead, the issue reduces to a problem in the relation between federal and state ***antitrust law***, and there the United States Supreme Court has been quite clear that states may depart from federal rules—or accept an invitation to develop a gap in the law explicitly left by the Supreme Court—absent evidence of a clear congressional purpose to the contrary. The structured rule of reason applicable to reverse payment patent settlements adopted by the California Supreme Court is consistent with, not an obstacle to, congressional patent and health care goals in two specific ways. First, considerable research and analysis suggests the broad availability of reverse payment settlements favors weak patents and channels investment resources toward suboptimal innovation prospects. To the **[*128]** extent careful scrutiny of such settlements promotes the very innovation the patent laws were intended to promote, it cannot stand as an obstacle to congressional objectives. Second, a fundamental goal of the Hatch-Waxman Act (*21 U.S.C. § 355*) is to enhance generic competition and thereby lower prices. By ferreting out anticompetitive agreements that limit generic market entry and sustain costly monopolies, a structured rule of reason serves those goals and poses no obstacle to congressional objectives.

CA(31)[] **(31)**

Monopolies and Restraints of Trade § 3—Reverse Payment Patent Settlements—Anticompetition Challenges.

The trial court and Court of Appeal treated a drug manufacturer's patent on the active ingredient in one of its antibiotic drugs as ironclad and used the entire period until its expiration as the relevant benchmark in order to assess whether a reverse payment patent settlement agreement between the drug manufacturer and a would-be competitor had anticompetitive effects. That was error.

Opinion by: Werdegar

Opinion

*

[*638] [**850] WERDEGAR, J.**—To protect competition in the marketplace, ***antitrust law*** prohibits agreements that create or perpetuate monopolies. Patent law, in **[*130]** contrast, grants temporary monopolies to inventors to encourage the development of useful innovations. We consider here a crucial question at the intersection of these two bodies of law: What limits, if any, does ***antitrust law*** place on the ability of a patent holder to make agreements restricting competition during the life of its patent? In particular, when another entity tries to invalidate a patent and enter the marketplace, can the patentee pay the would-be competitor to withdraw its challenge and refrain from competing until at or near the natural expiration of the potentially invalid patent's life?

The answer to this is of special moment to the pharmaceutical industry, which has seen a raft of **[****4]** suits in which generic drug manufacturers (generics), seeking to introduce lower priced alternatives to patented **[***639]** brand-name drugs, raise patent invalidity as a defense to claims of infringement. With increasing frequency these cases have settled, with the plaintiff brand-name drug manufacturer (brand) making a "reverse payment" to the defendant generic in exchange for the generic dropping its patent challenge and consenting to stay out of the market. This case involves just such a settlement agreement.

Under federal ***antitrust law***, these settlements are not immune from scrutiny, even if they limit competition no more than a valid **[**851]** patent would have. (*FTC v. Actavis, Inc. (2013) 570 U.S. ___, ___ [186 L. Ed. 2d 343, 356, 133 S. Ct. 2223, 2230]* (*Actavis*).) We conclude the same is true under state ***antitrust law***. Some patents are valid; some are not. Sometimes competition would infringe; sometimes it would not. Parties illegally restrain trade when they privately agree to substitute consensual monopoly in place of potential competition that would have followed a finding of invalidity or noninfringement. The Court of Appeal ruled to the contrary; we reverse.

FACTUAL AND PROCEDURAL BACKGROUND

Bayer AG and Bayer Corporation (collectively Bayer) market Cipro, an antibiotic that has been **[****5]** among the most prescribed and best-selling drugs in the world. (*Arkansas Carpenters Health & Welfare Fund v. Bayer AG (2d Cir. 2010) 604 F.3d 98, 100*; *In re Ciprofloxacin Hydrochloride Antitrust Litigation (E.D.N.Y. 2003) 261 F. Supp. 2d 188, 194*; *In re Ciprofloxacin Hydrochloride Antitrust Litigation (E.D.N.Y. 2001) 166 F. Supp. 2d 740, 743*.) In 1987, Bayer was issued a United States patent on the active ingredient in Cipro, ciprofloxacin hydrochloride, a patent that expired in December 2003. (U.S. Patent No. 4,670,444, col. 22, 11. 32–34, claim 12 (the '444 patent); see *In re Ciprofloxacin Hydrochloride Antitrust Litigation (Fed. Cir. 2008) 544 F.3d 1323, 1327–1328*.) A subsidiary and licensee of Bayer obtained Food and Drug Administration (FDA) approval to market Cipro in the United States. (*In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d at p. 1328*; *In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra,* ***[*131]*** *166 F. Supp. 2d at p. 743*.) Between 1987 and 2003, Bayer was the sole producer of Cipro in the United States and, between 1997 and 2003 alone, Cipro generated more than $ 6 billion in gross sales.

At one time, pioneer drugs like Cipro and the generic drugs that followed them were governed by the same FDA approval process. [1] Subjecting generic drugs to the same "cumbersome drug approval process [as pioneer drugs]

---

* The nine coordinated cases whose appeals are addressed in this case are: *McGaughey v. Bayer Corp.* (Super. Ct. San Diego County, No. GIC752290); *Relles v. Bayer Corp.* (Super. Ct. L.A. County, No. BC239083); *Samole v. Bayer AG* (Super. Ct. S.F. City and County, No. 316349); *Garber v. Bayer AG* (Super. Ct. S.F. City and County, No. 316518); *Lee v. Bayer AG* (Super. Ct. S.F. City and County, No. 316670); *Patane v. Bayer AG* (Super. Ct. S.F. City and County, No. 318457); *Moore v. Bayer Corp.* (Super. Ct. Sonoma County, No. SCZ228356); *Moore v. Bayer Corp.* (Super. Ct. Sonoma County, No. 228384); *Senior Action Network v. Bayer AG* (Super. Ct. S.F. City and County, No. 400750).

[1] A generic drug is a drug designed to be identical to an already-FDA-approved pioneer drug in active ingredients, safety, and efficacy, and thus therapeutically equivalent to its brand-name counterpart. (See *PLIVA, Inc. v. Mensing (2011) 564 U.S. 604, 612, fn. 2 [180 L. Ed. 2d 580, 588, fn. 2, 131 S. Ct. 2567, 2574, fn. 2]*.)

delayed the entry of relatively inexpensive generic drugs into the market place," at substantial cost to consumers and the government. (*Mylan Pharmaceuticals, Inc. v. Shalala (D.D.C. 2000) 81 F. Supp. 2d 30, 32*; see H.R.Rep. No. 98-857, 2d Sess., pt. 1, p. 17 (1984), reprinted in 1984 U.S. Code Cong. & Admin. News, p. 2650.) To expedite the availability of low-cost generic drugs, Congress authorized an abbreviated approval process for drugs whose active ingredients had already been proven safe and effective **[****6]** in earlier clinical trials. (Drug Price Competition and Patent Term Restoration Act of 1984, *Pub.L. No. 98-417, tit. I, §§ 101–106 (Sept. 24, 1984) 98 Stat. 1585, 1585–1597*, codified as amended at *21 U.S.C. § 355* (the Hatch-Waxman **[***640]** Act); see H.R.Rep. No. 98-857, 2d Sess., pt. 1, pp. 14, 16–17 (1984), reprinted in 1984 U.S. Code Cong. & Admin. News, pp. 2647, 2649–2650.)

Under the *Hatch-Waxman Act*, a prospective generic drug manufacturer may file a streamlined application asserting the generic drug's bioequivalence with an existing pioneer drug, thus piggybacking on the safety and efficacy data already submitted to the FDA in connection with its approval of the original drug. (*21 U.S.C. § 355(j)(2)(A)(ii)*, *(iv)*; see *Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 354, 133 S. Ct. at p. 2228]*.) With respect to the patent implications of the application, the generic drug manufacturer must make one of four certifications: There is no patent for the underlying drug, the patent is expired, the patent will expire, or (relevant here) the patent is invalid or will not be infringed by the proposed manufacture and sale **[****7]** of the generic drug. (*21 U.S.C. § 355(j)(2)(A)(vii)*; *Actavis, at pp. ___–___ [186 L. Ed. 2d at pp. 353–354, 133 S. Ct. at p. 2228]*.) An applicant that certifies the affected patent is invalid or will not be infringed (a "paragraph IV" certification) must give notice to all affected patent owners. (*21 U.S.C. § 355(j)(2)(B)*.) Submission of an application to manufacture a generic version of a drug covered by a patent is a technical act of infringement (*35 U.S.C. § 271(e)(2)(A)*; *Actavis, at pp. ___–___ [186 L. Ed. 2d at p. 354, 133 S. Ct. at p. 2228]*); **[**852]** to stay approval of the generic version, a patent owner must file an infringement lawsuit against the generic drug manufacturer **[*132]** within 45 days (*21 U.S.C. § 355(j)(5)(B)(iii)*). To provide an incentive to assume the risks of exposure to such litigation, the first generic manufacturer to file an application and prevail is granted a potentially lucrative 180-day exclusivity window in which to market its drug without competition from any other generic manufacturer. (*21 U.S.C. § 355(j)(5)(B)(iv)*; *Actavis, at p. ___–___ [186 L. Ed. 2d at p. 354, 133 S. Ct. at pp. 2228–2229]*.)

In 1991, twelve years before the scheduled expiration of the '444 patent, defendant Barr Laboratories, Inc., filed an application to market a generic version of Cipro. (*In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d at p. 1328*.) Barr's application included a paragraph IV certification that the '444 patent was invalid and unenforceable. (*Arkansas Carpenters Health & Welfare Fund v. Bayer AG, supra, 604 F.3d at pp. 101–102*; see *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*.) Barr's statutory notice to Bayer contended Cipro's derivation was obvious in light of prior art, the '444 patent was an invalid double patent, and the patent was the product of inequitable **[****8]** conduct based on Bayer's withholding of information about preexisting patents from the patent examiner. (See *35 U.S.C. §§ 102*, *103*; *In re Longi (Fed. Cir. 1985) 759 F.2d 887, 892–893*.) Bayer responded with a patent infringement suit, staying FDA approval, and Barr counterclaimed for a declaratory judgment that the '444 patent was invalid. [2]

In early 1997, Bayer and Barr settled. Under the terms of the settlement, Barr agreed to postpone marketing a generic **[***641]** version of Cipro until the '444 patent expired. It also agreed to a consent judgment affirming the patent's validity and to modification of the certification in its FDA application from a paragraph IV certification, alleging invalidity, to a "paragraph **[****9]** III" certification, seeking to market a generic drug upon patent expiration. (*Arkansas Carpenters Health & Welfare Fund v. Bayer AG, supra, 604 F.3d at p. 102*; see *21 U.S.C. § 355(j)(2)(A)(vii)(III)*; *21 C.F.R. § 314.94(a)(12)(i)(A)(3) (2014)*.) In return, Bayer agreed to make payments to Barr and to supply it with Cipro for licensed resale beginning six months before patent expiration. (See *In re*

---

[2] While the litigation was ongoing, Barr agreed to accept contribution to its litigation costs from another generic drug manufacturer, defendant The Rugby Group, Inc., a then subsidiary of defendant Hoechst Marion Roussel, Inc., in exchange for a share of the benefits of any settlement, judgment, or sale of generic ciprofloxacin hydrochloride. (*In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d at p. 1328*.) In 1998, The Rugby Group, Inc., was acquired by defendant Watson Pharmaceuticals, Inc. Generic defendants Barr Laboratories, Inc., The Rugby Group, Inc., Watson, and Hoechst Marion Roussel, Inc., are referred to collectively as Barr.

Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d at pp. 1328–1329.) This head start mirrored the 180-day duopoly the Hatch-Waxman Act would have provided Barr if it had succeeded in showing invalidity or noninfringement of Bayer's patent. (21 U.S.C. § 355(j)(5)(B)(iv).) Barr was to receive Cipro from Bayer at 85 percent of current price. **[*133]**

Pursuant to the settlement, between 1997 and 2003, Bayer paid Barr $ 398.1 million. In that same period, Bayer's profits from sales of Cipro exceeded $ 1 billion. (*In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 261 F. Supp. 2d at p. 194*.)

The 1997 settlement between Bayer and Barr produced a wave of state and federal antitrust suits. (*Arkansas Carpenters Health & Welfare Fund v. Bayer AG, supra, 604 F.3d at p. 102*.) This case arises from nine such coordinated class action suits brought by indirect purchasers of Cipro in California against Bayer and Barr. (See *In re Cipro Cases I & II (2004) 121 Cal.App.4th 402, fn. *, 406–407 [17 Cal. Rptr. 3d 1]*.) The operative complaint in these coordinated proceedings alleges the Bayer-Barr reverse payment settlement violated the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), unfair competition law (*id.*, *§ 17200 et seq.*), and common law prohibition against monopolies. The gravamen of the complaint is that the 1997 agreement preserved **[****10]** Bayer's monopoly and ability to charge supracompetitive **[**853]** prices at the expense of consumers, and Bayer in turn split these monopoly profits with Barr. Class certification was granted and upheld on appeal. (*In re Cipro Cases I & II, at p. 418*.) Thereafter, the parties stayed this action pending resolution of consolidated federal challenges to the Bayer-Barr settlement.

Following a Federal Circuit ruling in favor of Bayer and Barr on federal antitrust claims (*In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d 1323*), [3] the trial court granted a defense summary judgment. It found decisional law under the federal Sherman Act (*15 U.S.C. § 1 et seq.*) dispositive and held that because the settlement agreement did not restrain competition longer than the exclusionary scope of the ’444 patent, it did not violate the Cartwright Act. The Court of Appeal affirmed, holding that agreements restraining competition within the scope of a patent are lawful unless the patent was procured by fraud or the suit to enforce it was objectively baseless. The court held further that, even if there were a disputed issue of material fact as to whether Bayer's suit to enforce the ’444 patent was objectively baseless, litigation **[***642]** of that theory would be foreclosed by exclusive federal court patent jurisdiction.

We granted review to resolve important unsettled issues of state ***antitrust law***. While the case was pending before this court, we entered an order formalizing Bayer's dismissal from the proceedings pursuant to an approved settlement. Barr remains as respondent.
[*134]

DISCUSSION

I. *Reverse Payment Settlements Under the Hatch-Waxman Act*

CA(1)[] **(1)** The Hatch-Waxman Act illustrates the law of unintended consequences. ***HN1***[] Congress wrote into the act a substantial incentive for generics to enter markets earlier by offering a 180-day exclusivity period to the first generic filer, and only that filer, to challenge a patent. (*21 U.S.C. § 355(j)(5)(B)(iv)*; see Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem* (2006) *81 N.Y.U. L.Rev. 1553, 1566, 1578–1579, 1583*.) The theory was that a generic would be more likely to challenge dubious patents if offered the carrot of an enormously valuable six-month period in which only it and the brand could produce a drug. (Carrier, *Unsettling Drug Patent Settlements: A Framework for Presumptive Illegality* (2009) *108 Mich. L.Rev. 37, 47*; Bulow,

[3] As discussed **[****11]** below, both *In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d 1323* and a second decision rejecting a federal antitrust challenge to the Cipro settlement, *Arkansas Carpenters Health & Welfare Fund v. Bayer AG, supra, 604 F.3d 98*, were decided under principles later rejected by the United States Supreme Court in *Actavis, supra, 570 U.S. ___ [186 L. Ed. 2d 343, 133 S. Ct. 2223]*.

*The Gaming **[****12]** of Pharmaceutical Patents* in 4 Innovation Policy and the Economy (Jaffe et al. edits., 2004) 145, 163; Hemphill, *An Aggregate Approach to Antitrust: Using New Data and Rulemaking to Preserve Drug Competition* (2009) 109 Colum. L.Rev. 629, 651.) Otherwise, "free rider" problems might arise: every generic would have an incentive to hold back and let some other generic be the one to shoulder the risk and litigation costs associated with challenging a patent. (Lemley & Shapiro, *Probabilistic Patents* (2005) 19 J. Econ. Persp. 75, 88; Hemphill, *Paying for Delay*, at p. 1605.)

This solution may well have encouraged more generics to file patent challenges, but not without creating a series of new problems. In other settings, a patentee might have little incentive to buy off a challenger in order to preserve its monopoly and continue reaping monopoly profits, for the simple reason that paying off the first challenger would simply encourage another challenger, and then another, and then another. (See *Actavis, supra, 570 U.S. at pp. ___–___ [186 L. Ed. 2d at pp. 361–362, 133 S. Ct. at p. 2235]*.) Two features of the Hatch-Waxman Act change this dynamic. First, the 180-day exclusivity period created a bottleneck; no one else could receive FDA approval until after its expiration. (*21 U.S.C. § 355(j)(5)(B)(iv)(I)*; Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem, supra, 81 N.Y.U. L.Rev. at pp. 1560–1561, 1586–1587*.) Second, other generics tempted to challenge **[****13]** a patent in the wake **[**854]** of a settlement with the first-filing generic would have to wait out an automatic 30-month stay the brand could obtain just by opposing their requests for FDA approval. (*21 U.S.C. § 355(j)(5)(B)(iii)*; *Actavis, at pp. ___–___ [186 L. Ed. 2d at pp. 361–362, 133 S. Ct. at p. 2235]*; Bulow, *The Gaming of Pharmaceutical Patents* in 4 Innovation Policy and the Economy, *supra*, at p. 164.) As a result, the brand could effectively pick off "'the most motivated challenger, and the one closest to introducing competition'" **[*135]** (*Actavis, at pp. ___–___ [186 L. Ed. 2d at pp. 361–362, 133 S. Ct. at p. 2235]*, quoting Hemphill, *Paying for Delay, at p. 1586*), with all others stuck in line behind that generic (Cotter, *Refining the "Presumptive Illegality" Approach to Settlements of Patent Disputes Involving Reverse Payments: A Commentary on Hovenkamp, Janis & Lemley* (2003) *87 Minn. L.Rev. 1789, 1801*). [4]

[*643]** This legal regime means that, regardless of the degree of likely validity of a patent, the brand and first-filing generic have an incentive to effectively establish a cartel through a reverse **[****14]** payment settlement. (12 Areeda & Hovenkamp, ***Antitrust Law***, *supra*, ¶ 2046, pp. 341–345; Hovenkamp, *Anticompetitive Patent Settlements and the Supreme Court's Actavis Decision (2014) 15 Minn. J. L. Sci. & Tech. 3, 8–13*; see Carrier, *Unsettling Drug Patent Settlements: A Framework for Presumptive Illegality*, *supra*, *108 Mich. L.Rev. at p. 73* [under Hatch-Waxman, "[g]enerics have powerful incentives to file the first patent challenge but little incentive to pursue the litigation"].) Rather than expend litigation costs on either side, the brand and generic can reach a settlement that reflects the likely validity or invalidity of the patent (stronger patent, smaller settlement; weaker patent, bigger settlement), grants the generic a share of monopoly profits, and leaves the brand the sole manufacturer of the product. (Hovenkamp, *Anticompetitive Patent Settlements and the Supreme Court's Actavis Decision, at pp. 12–13*.)

It is likely for this reason that reverse payment settlements, practically unheard of before the *Hatch-Waxman Act*, have proliferated in the years since its enactment. (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2235]*; Hovenkamp, *Anticompetitive Patent Settlements and the Supreme Court's Actavis Decision, supra, 15 Minn. J. L. Sci. & Tech. at pp. 13–16*; Hemphill, *An Aggregate Approach to Antitrust: Using New Data and Rulemaking to Preserve Drug Competition, supra, 109 Colum. L.Rev. at pp. 647–656*.) This is probably not what Congress intended. (*Actavis, at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2235]* [the Hatch-Waxman Act's provisions have "no doubt unintentionally … created special incentives for collusion"]); *570 U.S. at p. ___ [186 L. Ed. 2d at p. 360, 133 S. Ct. at p. 2234]* [quoting remarks of Sen. Hatch and Rep. Waxman decrying as an

---

[4] Amendments to the Hatch-Waxman Act postdating the settlement in this case may have partially alleviated the complete bottleneck problem (Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem*, *supra*, *81 N.Y.U. L.Rev. at p. 1587*), although not issues arising from the 30-month stay or the reduced incentives for other generics, without the carrot of 180 days of duopoly, to bring patent challenges (12 Areeda & Hovenkamp, ***Antitrust Law*** (3d ed. 2012) ¶ 2046, p. 341).

unintended consequence of their legislation collusive agreements to delay competition].) The issue for us is what, if anything, state ***antitrust law*** has to say about these **[****15]** problems.
[*136]

II. *The Intersection Between Antitrust and Patent Law*

A. *The Cartwright Act*

HN2[] ***CA(2)***[] **(2)** The Legislature enacted the state's principal ***antitrust law***, the Cartwright Act, to rein in the burgeoning power of monopolies and cartels. (*Clayworth v. Pfizer, Inc. (2010) 49 Cal.4th 758, 772 [111 Cal. Rptr. 3d 666, 233 P.3d 1066]*.) The act's principal goal is the preservation of consumer welfare. (*Cianci v. Superior Court (1985) 40 Cal.3d 903, 918 [221 Cal. Rptr. 575, 710 P.2d 375]*; *Marin County Bd. of Realtors, Inc. v. Palsson (1976) 16 Cal.3d 920, 935 [130 Cal. Rptr. 1, 549 P.2d 833]*.) The act, like ***antitrust law*** in general, "rest[s] 'on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress, while at the same time providing an environment conducive to the preservation of our **[**855]** democratic political and social institutions.'" (*Marin County Bd., at p. 935*; see *National Soc. of Professional Engineers v. U. S. (1978) 435 U.S. 679, 695 [55 L. Ed. 2d 637, 98 S. Ct. 1355]*.) **[***644]** At its heart is a prohibition against agreements that prevent the growth of healthy, competitive markets for goods and services and the establishment of prices through market forces. (See *Speegle v. Board of Fire Underwriters (1946) 29 Cal.2d 34, 44 [172 P.2d 867]*.) "The act 'generally outlaws any combinations or agreements which restrain trade or competition or which fix or control prices' [citation], and declares that, with certain exceptions, 'every trust is unlawful, against public policy and void … .'" (*Pacific Gas & Electric Co. v. County of Stanislaus (1997) 16 Cal.4th 1143, 1147 [69 Cal. Rptr. 2d 329, 947 P.2d 291]*.)

HN3[] ***CA(3)***[] **(3)** The "trust[s]" the act prohibits include any "combination … by **[****16]** two or more persons" to "create or carry out restrictions in trade or commerce" (*Bus. & Prof. Code, § 16720, subd. (a)*) or to "prevent competition in manufacturing, making, transportation, sale or purchase of merchandise, produce or any commodity" (*id., subd. (c)*). Also prohibited is any contract by which two or more entities "[a]gree to pool, combine or directly or indirectly unite any interests that they may have connected with the sale … of any such article or commodity, that its price might in any manner be affected." (*Id., subd. (e)(4)*.) Agreements in violation of the act are "absolutely void and … not enforceable at law or in equity." (*Id.*, *§ 16722*; see *id.*, *§ 16726*.)

Though the Cartwright Act is written in absolute terms, in practice not every agreement within the four corners of its prohibitions has been deemed illegal. (*Morrison v. Viacom, Inc. (1998) 66 Cal.App.4th 534, 540 [78 Cal. Rptr. 2d 133]*.) *Business and Professions Code sections 16720*, *16722*, and *16726* draw upon the common law prohibition against restraints of trade. **[*137]** (*Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal.3d 842, 852 [94 Cal. Rptr. 785, 484 P.2d 953]*; *People v. Building Maintenance etc. Assn. (1953) 41 Cal.2d 719, 727 [264 P.2d 31]*; *Speegle v. Board of Fire Underwriters, supra, 29 Cal.2d at p. 44*.) The earliest common law decisions imposed an absolute rule, voiding "all contracts … which in any degree tended to the restraint of trade." (*Wright v. Ryder (1868) 36 Cal. 342, 357*.) But the common law rule was soon modified and "as relaxed, tolerated such [restraints of trade] as were restricted in their operations within reasonable limits." (*Ibid.*; see *Vulcan Powder Co. v. Hercules Powder Co. (1892) 96 Cal. 510, 512 [31 P. 581]*.) **[****17]** The United States Supreme Court looked to the common law in embracing a rule of reason for determining which agreements violated federal ***antitrust law*** (see *Standard Oil Co. v. United States (1911) 221 U.S. 1, 60 [55 L. Ed. 619, 31 S. Ct. 502]*), and this court thereafter followed suit: "[I]t may be assumed that the broad prohibitions of the Cartwright Act are subject to an implied exception similar to the one that validates reasonable restraints of trade under the federal Sherman Antitrust Act." (*Building Maintenance etc. Assn., at p. 727*; see *Marin County Bd. of Realtors, Inc. v. Palsson, supra, 16 Cal.3d at p. 930*; *Corwin, at p. 853*.) [5] What was true under the common law, **[***645]** however, is true today: "[T]he difficulty lies in determining what are reasonable and what unreasonable restrictions … ." (*Wright, at p. 358*.)

---

[5] As we noted in *People v. Building Maintenance etc. Assn., supra, 41 Cal.2d at pages 726–727*, a separate section of the Cartwright Act effectively codifies this principle: "It is not unlawful to enter into agreements or form associations or combinations,

B. *Patent Law*

CA(4)[] **(4)** That difficulty is all the greater because ***antitrust law*** does not exist in a vacuum. **HN4**[] The patent laws "are *in pari materia* with the antitrust laws and modify them *pro tanto* [(to that extent)]." (*Simpson v. Union Oil Co. (1964) 377 U.S. 13, 24 [12 L. Ed. 2d 98, 84 S. Ct. 1051]*.) To promote investment in invention and the public **[****18]** disclosure of new discoveries, Congress has seen fit to grant inventors limited statutory monopolies and the right to exclude competition in the **[**856]** manufacture, use, or sale of the patent's subject. (*35 U.S.C. § 154(a)*; see *Bonito Boats, Inc. v. Thunder Craft Boats, Inc. (1989) 489 U.S. 141, 150–151 [103 L. Ed. 2d 118, 109 S. Ct. 971]*; *Dawson Chemical Co. v. Rohm & Haas Co. (1980) 448 U.S. 176, 215 [65 L. Ed. 2d 696, 100 S. Ct. 2601]*; *Sears, Roebuck & Co. v. Stiffel Co. (1964) 376 U.S. 225, 229 [11 L. Ed. 2d 661, 84 S. Ct. 784]*.) Accordingly, the issuance of a federal patent creates "an exception to the general rule against monopolies and to the right to access to a free and open market." (*Precision Co. v. Automotive Co. (1945) 324 U.S. 806, 816 [89 L. Ed. 1381, 65 S. Ct. 993]*.) While "[t]he limited **[*138]** monopolies granted to patent owners do not exempt them from the prohibitions" of ***antitrust law*** (*Standard Oil Co. v. United States (1931) 283 U.S. 163, 169 [75 L. Ed. 926, 51 S. Ct. 421]*; see *United Shoe Mach. Co. v. United States (1922) 258 U.S. 451, 463–464 [66 L. Ed. 708, 42 S. Ct. 363]* ["the rights secured by a patent do not protect the making of contracts in restraint of trade"]), in a given case possession of a patent may provide a defense to liability (*United States v. Gen. Elec. Co. (1926) 272 U.S. 476, 488–490 [71 L. Ed. 362, 47 S. Ct. 192]*; *Valley Drug Co. v. Geneva Pharmaceuticals (11th Cir. 2003) 344 F.3d 1294, 1307*). Courts thus must reconcile the two bodies of law, making "an adjustment between the lawful restraint on trade of the patent monopoly and the illegal restraint prohibited broadly by" ***antitrust law***. (*United States v. Line Material Co. (1948) 333 U.S. 287, 310 [92 L. Ed. 701, 68 S. Ct. 550]*.)

At the extremes, this is easy. If a patent were known to be invalid, a private agreement nevertheless giving it effect would be plainly illegal. (See *Bus. & Prof. Code, §§ 16720*, *16722*, *16726*.) Conversely, if a patent were known to be valid, an agreement foreclosing competition no more than the statutory monopoly would not restrain trade beyond what federal law permitted, **[****19]** and the rights patent law affords the patentee would supersede any state law prohibition. Difficulties emerge when we move from a hypothetical patent known to be determinately valid or invalid to the real world, where validity may be unclear. When assessing the antitrust implications of an agreement arising from a patent, the truth about the patent's validity cannot always be known. The issue is how antitrust and patent law should accommodate each other under these conditions of uncertainty.

III. *The Scope of the Patent Test*

A. *The Court of Appeal and the Scope of the Patent Approach*

The particular accommodation this case calls for arises from an issue of virtual first impression under the Cartwright Act: how to apply the statutory bar against restraints of trade to patent settlement agreements that limit competition, but no more broadly than an injunction enforcing the patent would have, had one been obtained. (Cf. *In re Cardizem CD Antitrust Litigation (6th Cir. 2003) 332 F.3d 896, 904, fn. 8, 906–909* **[***646]** [deciding the issue under both federal law and the Cartwright Act, but without independently analyzing state law].) Rejecting plaintiffs' argument that agreements of this sort should be deemed uniformly illegal, the Court of Appeal resolved the issue by adopting one of several **[****20]** competing approaches courts had developed **[*139]** to solve the problem under federal ***antitrust law***, the scope of the patent test. [6] Under that test, the Court of Appeal held, "a settlement of a lawsuit to enforce a patent does not violate the Cartwright Act if the settlement restrains competition only within the scope of the patent, unless the patent was procured by fraud or the suit for its enforcement was objectively baseless." The scope of the patent test thus gives wide effect to patents by essentially presuming their validity in most cases. We conclude, as more recent United States Supreme Court authority has now made clear, that this

---

the purpose and effect of which is to promote, encourage or increase competition in any trade or industry, or which are in furtherance of trade." (*Bus. & Prof. Code, § 16725*.)

[6] See *In re Tamoxifen Citrate Antitrust Litigation (2d Cir. 2006) 466 F.3d 187*; cf. *In re Cardizem CD Antitrust Litigation, supra, 332 F.3d at pages 907–909* (adopting per se rule); *In re K-Dur Antitrust Litigation (3d Cir. 2012) 686 F.3d 197* (adopting quick look rule of reason analysis).

test accords excess weight to the policies motivating patent law, gives insufficient consideration to the concerns animating ***antitrust law***, and must be rejected.

The federal cases the Court of Appeal followed identify three core rationales for **[**857]** concluding a patent litigation settlement restricting competition no more than a valid patent would is generally lawful. First, patents are presumed valid. (*35 U.S.C. § 282(a)*.) Given this presumption, many lower federal courts reasoned, an agreement that **[****21]** does not extend monopoly beyond what a patent grants imposes no additional injury to competition and, in the absence of anticompetitive effects, generally survives antitrust scrutiny. (See *In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d at p. 1337*; *In re Tamoxifen Citrate Antitrust Litigation, supra, 466 F.3d at pp. 212–213*; *Schering-Plough Corp. v. FTC (11th Cir. 2005) 402 F.3d 1056, 1066–1068*.)

[858]** Second, the fundamental purpose of patent law is to promote innovation and the disclosure of inventions so that ultimately new discoveries may benefit the public at large. (*Bonito Boats, Inc. v. Thunder Craft Boats, Inc., supra, 489 U.S. at pp. 150–151*.) To subject exclusions within the scope of a patent to scrutiny and potential liability would, lower courts feared, chill innovation and give inventors pause in deciding whether to share their creations with the public. (See *In re Tamoxifen Citrate Antitrust Litigation, supra, 466 F.3d at p. 203*; *Schering-Plough Corp. v. FTC, supra, 402 F.3d at p. 1075*; *Valley Drug Co. v. Geneva Pharmaceuticals, supra, 344 F.3d at p. 1308*.)

Third, there is a general policy in favor of settlement, perhaps more so in patent litigation. (*In re Ciprofloxacin Hydrochloride Antitrust Litigation, supra, 544 F.3d at p. 1333*; *In re Tamoxifen Citrate Antitrust Litigation, supra, 466 F.3d at p. 202*; *Schering-Plough Corp. v. FTC, supra, 402 F.3d at pp. 1072–1073*.) Patent litigation settlements “may benefit the public by introducing a new rival into the market, facilitating competitive production, **[*140]** and encouraging further innovation.” (*Schering-Plough Corp., at p. 1075*.) Conversely, a legal regime that hampers settlement “may actually decrease product innovation by amplifying the period of uncertainty around a drug manufacturer's ability to research, develop, and market the patented product or allegedly infringing product.” (*Ibid.*; see *In re Tamoxifen Citrate Antitrust **[****22]** Litigation, at p. 203*.)

[*647]** B. Federal Trade Commission v. Actavis

The Court of Appeal's adoption of the scope of the patent test was the product not of an analysis of the Cartwright Act's text, policy, or history, but of an assessment of procedural and policy-based aspects of patent law. The soundness of its choice of test thus depends on the extent to which that patent law assessment was sound. In *Actavis, supra, 570 U.S. ___ [186 L. Ed. 2d 343, 133 S. Ct. 2223]*, issued after the Court of Appeal's decision and after our grant of review, the Supreme Court reversed a federal decision holding Hatch-Waxman reverse payment settlement agreements “‘immune from antitrust attack so long as [their] anticompetitive effects fall within the scope of the exclusionary potential of the patent.’” (*570 U.S. at p. ___ [186 L. Ed. 2d at p. 353, 133 S. Ct. at p. 2227]*.) In the course of its opinion, the Supreme Court dismantled the underpinning of each of the cases the Court of Appeal had found persuasive.

First, the Supreme Court rejected the scope of the patent test's foundational presumption that the holder of a challenged patent enjoys all the rights attendant to ownership of a valid patent: “to refer … simply to what the holder of a valid patent could do does not by itself answer the antitrust question. The patent here may or may not be **[****23]** valid, and may or may not be infringed.” (*Actavis, supra, 570 U.S. at pp. ___ – ___ [186 L. Ed. 2d at p. 356, 133 S. Ct. at pp. 2230–2231]*.) To be sure, a valid patent allows the patentee to exclude others from the market, “[b]ut an *invalidated* patent carries with it no such right.” (*Id. at p. ___ [186 L. Ed. 2d at p. 356, 133 S. Ct. at p. 2231]*.) Patent litigation “put[s] the patent's validity at issue, as well as its actual preclusive scope”; simply because a settlement curtails testing and ultimate resolution of that issue, courts should not thereafter treat patent law and its presumptions as conclusively establishing the challenged patent's legitimate scope. (*Id. at p. ___ [186 L. Ed. 2d at p. 357, 133 S. Ct. at p. 2231]*.)

Second, the core policies underlying patent law are more nuanced than the cases applying a scope of the patent test had recognized, and the incentives to innovate far sturdier than those courts had feared. Patents carry with them a frequent cost—monopoly premiums the public must bear. (See *Lear, Inc. v. Adkins (1969) 395 U.S. 653, 670 [23 L. Ed. 2d 610, 89 S. Ct. 1902]*.) The willingness to pay that cost depends upon a quid pro quo: "'[T]he public **[*141]** interest in granting patent monopolies' exists only to the extent that 'the public is given a novel and useful invention' in 'consideration for its grant.'" (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 358, 133 S. Ct. at p. 2232]*.) Accordingly, patent policy does not support unquestioned protection of every inventor's rights, but instead favors "eliminating unwarranted patent grants so the **[****24]** public will not 'continually be required to pay tribute to would-be monopolists without need or justification.' " (*Id. at p. ___ [186 L. Ed. 2d at p. 359, 133 S. Ct. at p. 2233]*.) Vigorous testing for validity is thus desirable in order to weed out patents that shield a monopoly without offering corresponding public benefits. (See *Aronson v. Quick Point Pencil Co. (1979) 440 U.S. 257, 264 [59 L. Ed. 2d 296, 99 S. Ct. 1096]*; *United States v. Glaxo Group Ltd. (1973) 410 U.S. 52, 58 [35 L. Ed. 2d 104, 93 S. Ct. 861]*; *Katzinger Co. v. Chicago Mfg. Co. (1947) 329 U.S. 394, 400–401 [91 L. Ed. 374, 67 S. Ct. 416]*.) [7]

Third, the Supreme Court explained that while the policy favoring settlement of **[***648]** patent litigation offers some support for limiting scrutiny of agreements restraining competition only within the scope of a patent, it ultimately is not dispositive. (*Actavis, supra, 570 U.S. at pp. ___, ___ [186 L. Ed. 2d at pp. 360, 364, 133 S. Ct. at pp. 2234, 2238]*.) Settlements are generally a positive good, but not always; settlements of the sort challenged in *Actavis*, the court observed, can amount to "payment in return for staying out of the market" and permit **[****25]** monopoly premiums still to be charged and simply divided up between the patent holder and patent challenger; "[t]he patentee and the challenger gain; the consumer loses." (*Id. at pp. ___, ___ [186 L. Ed. 2d at p. 361, 133 S. Ct. at pp. 2234, 2235]*.) Such anticompetitive effects will not always be justified, and an antitrust action to test a settlement's legality may be warranted and feasible. (*Id. at pp. ___–___ [186 L. Ed. 2d at pp. 361–364, 133 S. Ct. at pp. 2235–2237]*].) Fears of chilling even legitimate settlements are overstated; all that allowing antitrust scrutiny does is remove the incentive to settle as a way to split monopoly profits. (*Id. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2237]*.) Because the scope of the patent test overvalues the policies underlying patent law at the expense of the equally relevant policies underlying ***antitrust law***, the court concluded, it cannot stand under federal law. (*Id. at p. ___ [186 L. Ed. 2d at p. 357, 133 S. Ct. at p. 2231]*.) **[*142]**

C. *The Scope of the Patent Test's Validity Under State Law*

Barr contends *Actavis* is distinguishable because it involved a public prosecution under the Federal Trade Commission Act (*15 U.S.C. § 45 et seq.*), not a private antitrust suit, and this court should embrace the scope of the patent test as a matter of state ***antitrust law***.

CA(5)[] **(5)** We agree *Actavis* is not dispositive on matters of state law. Indeed, even if *Actavis* had been a private Sherman Act case, its conclusions would not dictate how the Cartwright **[****26]** Act must be read. ***HN5***[] "Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act, given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes enacted by California's sister states around the turn of the 20th century." (*Aryeh v. Canon Business Solutions, Inc. (2013) 55 Cal.4th 1185, 1195 [151 Cal. Rptr. 3d 827, 292 P.3d 871]*; **[**859]** see *State of California ex rel. Van de Kamp v. Texaco, Inc. (1988) 46 Cal.3d 1147, 1164 [252 Cal. Rptr. 221, 762 P.2d 385]*.) That said, nothing in the United States Supreme Court's discussion of the legal rules at the boundary between antitrust and patent law hinged on the happenstance that the case under review involved a public prosecutor. Accordingly, that circumstance neither adds to nor detracts from the persuasive force the discussion would otherwise have.

CA(6)[] **(6)** What does affect the weight to be accorded *Actavis* is the extent to which its analysis establishes the metes and bounds of patent law and policy. Patent law is federal law. (*U.S. Const., art. I, § 8, cl. 8*; see *Bonito*

[7] As commentators have noted, an excess of invalid patents is one of the principal problems in modern patent law. (See Ford, *Patent Invalidity Versus Noninfringement* (2013) *99 Cornell L.Rev. 71, 74* & fn. 11 [discussing substantial scholarship on the point].) The pro-patent-challenge policy is particularly strong in the Hatch-Waxman Act setting, given the 180-day exclusivity bounty Congress adopted as an incentive to bring such challenges. (See *21 U.S.C. § 355(j)(5)(B)(iv)*; 12 Areeda & Hovenkamp, ***Antitrust Law***, *supra*, ¶ 2046, p. 340; Carrier, *Unsettling Drug Patent Settlements: A Framework for Presumptive Illegality*, *supra*, *108 Mich. L.Rev. at pp. 43, 64*; *ante*, at p. 134.)

Boats, Inc. v. Thunder Craft Boats, Inc., supra, 489 U.S. at pp. 146–157.) **HN6**[] **[***649]** The United States Supreme Court is the final arbiter of questions of patent law and the extent to which interpretations of ***antitrust law***—whether state or federal—must accommodate patent law's requirements, and *Actavis* is its latest word on the subject. If under *Actavis* patent law demands extensive deference to patents' presumed validity and the consecration **[****27]** of a broad range of agreements otherwise facially illegal under state law, we must abide by that judgment. Conversely, if the accommodation necessitated by patent policy is somewhat narrower than previously understood, we again must treat that determination as conclusive and reconsider the proper domain of state ***antitrust law*** in light of that cession of territory.

Barr asserts *Actavis* is alternatively distinguishable on the ground the underlying patent there was far weaker than the underlying patent here. [8] But **[*143]** *Actavis*'s analysis was not contingent on a particular level of uncertainty surrounding the patent before it. Instead, the court simply recognized that any patent might, or might not, be valid. (Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 356, 133 S. Ct. at p. 2231]; see id. at p. ___ [186 L. Ed. 2d at p. 367, 133 S. Ct. at p. 2240] (dis. opn. of Roberts, C. J.) [recognizing the problem "that we're not quite certain if the patent is actually valid, or if the competitor is infringing it," a problem "that is always the case" in patent disputes].) Indeed, a critical insight undergirding *Actavis* is that patents are in a sense probabilistic, rather than ironclad: they grant their holders a potential but not certain right to exclude.

The uncertainty concerning a patent's validity is a by-product of the realities surrounding patent issuance and the legal regime Congress and the courts have established for patent enforcement. In the first instance, a patent "simply represents a legal conclusion reached by the Patent Office. Moreover, the legal conclusion is predicated on factors as to which reasonable men can differ widely. Yet the Patent Office is often obliged to reach its decision in an *ex parte* proceeding, without the aid of the arguments which could be advanced by parties interested in proving patent invalidity." (Lear, Inc. v. Adkins, supra, 395 U.S. at p. 670.) That decision is constrained by time and resource pressures; facing an enormous backlog, patent examiners may average less than 20 hours spent on each application. (Ford, *Patent Invalidity Versus Noninfringement*, *supra*, 99 Cornell L.Rev. at pp. 87–89; Lemley & Shapiro, *Probabilistic Patents*, *supra*, 19 J. Econ. Persp. at p. 79; Lemley, *Rational Ignorance at the Patent Office* (2001) 95 Nw.U. L.Rev. 1495, 1499–1500.) Given this underlying reality, Congress has elected not to make the issuance of a patent conclusive but, rather, subject to validation or invalidation in court proceedings. (35 U.S.C. § 282; see, e.g., **[****29]** Alice Corp. v. CLS Bank Int'l (2014) 573 U.S. ___ [189 L. Ed. 2d 296, 134 S. Ct. 2347]; Walker, Inc. v. Food Machinery (1965) 382 U.S. 172, 176 [15 L. Ed. 2d 247, 86 S. Ct. 347].) A patent is, in effect, a right to ask the government to exercise its power to keep others from **[**860]** using an invention without consent. (Zenith Corp. v. Hazeltine (1969) 395 U.S. 100, 135 [23 L. Ed. 2d 129, 89 S. Ct. 1562].) Whether a court will do **[***650]** so—whether it will issue an injunction—will depend on actual proof of validity.

CA(7)[] **(7)** The non-uniform application of collateral estoppel adds another layer of uncertainty. **HN7**[] A finding that a patent is invalid operates in rem and estops the patentee from asserting validity against the world. (Blonder-Tongue v. University Foundation (1971) 402 U.S. 313, 349–350 [28 L. Ed. 2d 788, 91 S. Ct. 1434].) In contrast, a finding that a patent is valid operates only on the parties and does not extend from one infringement case to the next. A future challenger with new or better information may subsequently raise, and succeed on, an invalidity defense to a charge of infringement. (In re Swanson (Fed. Cir. 2008) 540 F.3d 1368, 1377; Ethicon, Inc. v. Quigg (Fed. Cir. 1988) **[*144]** 849 F.2d 1422, 1429, fn. 3 [" 'A patent is not held valid for all purposes but, rather, not invalid on the record before the court'" and "'simply remains valid until another challenger carries'" the burden of showing invalidity.].) Each case may show only that a patent has not been invalidated, yet.

If the assertion of patent rights leads to a court injunction excluding a competitor from the marketplace, there is no antitrust problem. If instead the assertion leads to a private settlement **[****30]** agreement, there is a potential antitrust problem. With a settlement, any restraint arises directly from the private agreement and only indirectly from the patent, which remains in the background, motivating the parties' actions according to their assessments of its

---

[8] After the settlement, Bayer submitted the '444 patent to the Patent and Trademark **[****28]** Office for reexamination and obtained reaffirmation that it was not invalid. (See 35 U.S.C. § 302.) Later patent challenges by litigants other than Barr were unsuccessful. (See In re Ciprofloxacin Hydrochloride Antitrust Litigation (E.D.N.Y. 2005) 363 F. Supp. 2d 514, 519–520.)

strength. That a patent has not (yet) been invalidated may allow some confidence about its fundamental enforceability, but does not allow a court to skip entirely an antitrust analysis of competitive restraints within the patent's scope on the assumption that its validity has been established. The scope of the patent test is flawed precisely because it assumes away whatever level of uncertainty a given patent—the '444 patent here, no less than the one at issue in *Actavis*—may be subject to. [9]

Aside from its attempts to distinguish *Actavis*, Barr argues a 1953 California decision predating the recent federal Hatch-Waxman Act decisions favors the scope of the patent test for Cartwright Act challenges to patent settlements. (See Fruit Machinery Co. v. F. M. Ball & Co. (1953) 118 Cal. App. 2d 748, 758 [258 P.2d 852].) We do not read that opinion so broadly.

In *Fruit Machinery*, six canning companies formed a corporation and licensed to it rights under a fruit pitter patent owned by one of the companies. In turn, the licensee contracted with each of the six, sublicensing to them the right to build and own a specified number of pitters and to lease additional pitters in exchange for payment of royalties. A dispute over nonpayment **[***651]** of royalties arose between the licensee and one of the six companies. The company raised as a defense to payment that the contractual arrangements **[*145]** gave the six companies an unlawful **[****32]** monopoly on pitter ownership and were thus unenforceable. The Court of Appeal found no antitrust violation, explaining: "Defendant has not shown that the parties, in executing and carrying out the sublicense agreement in suit, exercised rights or powers not accorded them by the patent law *or abused any rights or powers accorded them by that law*." **[**861]** (*Fruit Machinery Co. v. F. M. Ball & Co., supra, 118 Cal. App. 2d at p. 762*, italics added.) The Court of Appeal distinguished other cases involving antitrust violations as involving a "patentee or his assignee [who] went beyond that which was necessary or incidental to the scope of his patent and brought himself within the proscription of the antitrust laws." (*Id. at p. 763*.)

Fruit Machinery does not stand for the proposition that any restraints of trade within the scope of a patent are valid. Rather, it recognizes trade restraints that exceed those authorized by a patent may be invalid and, moreover, that the "abuse[]" of patent rights may *also* run afoul of ***antitrust law***. (*Fruit Machinery Co. v. F. M. Ball & Co., supra, 118 Cal. App. 2d at p. 762*.) The court responded to the concern that the corporate licensee might use its exclusive patent rights to charge far higher royalties for leased than owned pitters not by saying such a differential would automatically be lawful, as within the scope of **[****33]** any patent rights, but by saying only "that such has not happened yet" and it would not presume a "[f]uture violation … of the antitrust laws." (*Ibid.*)

CA(8)[] **(8)** No other California authority Barr has cited, nor any we have found, establishes the scope of the patent test is applicable under the Cartwright Act. Even if such precedent existed, we would be forced to reexamine it in light of *Actavis*. ***HN8***[] The scope of the patent test insulates from antitrust scrutiny virtually any agreement that restrains trade no more than the patent itself would have, if valid. State law must yield to federal, but we cannot under the guise of patent law carve into the Legislature's enactments a larger exception than federal law dictates, and *Actavis* shows such a broad exemption is not required. Accordingly, we conclude the scope of the patent test is inapplicable to Cartwright Act claims.

IV. *Analysis of Reverse Payment Patent Settlements*

---

[9] The *Actavis* treatment of patents as in some sense probabilistic rests on a substantial body of scholarship suggesting patents are best understood this way. (See, e.g., Lemley & Shapiro, *Probabilistic Patents*, *supra*, 19 J. Econ. Persp. at pp. 75–76, 95; Shapiro, *Antitrust Analysis of Patent Settlements Between Rivals* (Summer 2003) 17 Antitrust 70, 75; Leffler & Leffler, *The Probabilistic Nature of Patent Rights: In Response to Kevin McDonald* (Summer 2003) 17 Antitrust 77; Shapiro, *Antitrust limits to patent settlements* (2003) 34 RAND J. Econ. 391, 395.) Others, including the *Actavis* dissenters, have disagreed, insisting a patent ultimately is always only valid or invalid, whether we know it yet **[****31]** or not. (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 372, 133 S. Ct. at p. 2244*] (dis. opn. of Roberts, C. J.); Schildkraut, *Patent-Splitting Settlements and the Reverse Payment Fallacy* (2004) 71 Antitrust L.J. 1033; McDonald, *Hatch-Waxman Patent Settlements and Antitrust: On "Probabilistic" Patent Rights and False Positives* (Spring 2003) 17 Antitrust 68.) The Supreme Court majority's views are conclusive as to which side of this philosophical divide over the proper treatment of patents is correct, and we follow them.

Having joined the United States Supreme Court in rejecting the scope of the patent test, we consider what rubric courts should instead apply under state law to reverse payment patent settlements.

A. *Antitrust Analysis Under the Cartwright Act*

As discussed, although the prohibitions of the **[****34]** Cartwright Act are framed in superficially absolute language, deciding antitrust illegality is not as simple as **[*146]** identifying whether a challenged agreement involves a restraint of trade. (See *Chicago Board of Trade v. United States (1918) 246 U.S. 231, 238 [62 L. Ed. 683, 38 S. Ct. 242]* [pointing out that "[*e*]*very* agreement concerning trade … restrains" (italics added)].) Instead, the Cartwright Act and Sherman Act carry forward the common law understanding that "only unreasonable restraints of trade are prohibited." (*Marin County Bd. of Realtors, Inc. v. Palsson, supra, 16 Cal.3d at p. 930*.)

HN9[] ***CA(9)***[] **(9)** Under the traditional rule of reason, "inquiry is limited to whether the challenged conduct promotes or suppresses **[***652]** competition." (*Fisher v. City of Berkeley (1984) 37 Cal.3d 644, 672 [209 Cal. Rptr. 682, 693 P.2d 261]*, affd. *sub nom.* *Fisher v. Berkeley (1986) 475 U.S. 260 [89 L. Ed. 2d 206, 106 S. Ct. 1045]*.) To determine whether an agreement harms competition more than it helps, a court may consider "the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, and the history of the restraint and the reasons for its adoption." (*United States v. Topco Associates (1972) 405 U.S. 596, 607 [31 L. Ed. 2d 515, 92 S. Ct. 1126]*; see *Corwin v. Los Angeles Newspaper Service Bureau, Inc., supra, 4 Cal.3d at p. 854*.) In a typical case, this may entail expert testimony on such matters as the definition of the relevant market (*Corwin, at p. 855*) and the extent of a defendant's market power (*Fisherman's Wharf Bay Cruise Corp. v. Superior Court (2003) 114 Cal.App.4th 309, 334–339 [7 Cal. Rptr. 3d 628]*; *Roth v. Rhodes (1994) 25 Cal.App.4th 530, 542–543 [30 Cal. Rptr. 2d 706]*).

Rule of reason inquiry is not required in every case; we and the United States Supreme Court have partially simplified **[**862]** the analysis by identifying categories of agreements **[****35]** or practices that can be said to always lack redeeming value and thus qualify as per se illegal. (See *Northern Pac. R. Co. v. United States (1958) 356 U.S. 1, 5 [2 L. Ed. 2d 545, 78 S. Ct. 514]*; *Marin County Bd. of Realtors, Inc. v. Palsson, supra, 16 Cal.3d at pp. 930–931*; *Oakland-Alameda County Builders' Exchange v. F. P. Lathrop Constr. Co. (1971) 4 Cal.3d 354, 360–362 [93 Cal. Rptr. 602, 482 P.2d 226]*.) "The per se rule reflects an irrebuttable presumption that, if the court were to subject the conduct in question to a full-blown inquiry, a violation would be found under the traditional rule of reason." (*Fisher v. City of Berkeley, supra, 37 Cal.3d at p. 666*.)

CA(10)[] **(10)** More recently, a third category, quick look rule of reason analysis, has emerged. (*California Dental Assn. v. FTC (1999) 526 U.S. 756, 769–770 [143 L.Ed.2d 935, 119 S.Ct. 1604]*; see *FTC v. Indiana Federation of Dentists (1986) 476 U.S. 447, 459–460 [90 L. Ed. 2d 445, 106 S. Ct. 2009]*; *NCAA v. Board of Regents of Univ. of Okla. (1984) 468 U.S. 85, 109–110 [82 L.Ed.2d 70, 104 S.Ct. 2948]*.) ***HN10***[] Under the quick look approach, applicable to cases where "an observer with even a rudimentary understanding of economics **[*147]** could conclude that the arrangements in question would have an anticompetitive effect on customers and markets," a defendant may be asked to come forward with procompetitive justifications for a challenged restraint without the plaintiff having to introduce elaborate market analysis first. (*California Dental Assn., at p. 770*.)

There was a time when this court and the United States Supreme Court treated the choice between per se and rule of reason analysis as a necessary threshold inquiry involving rigidly distinct analytic boxes. In more recent years, however, the Supreme Court has explained, "[t]he truth is that our categories of analysis of anticompetitive effect are less fixed **[****36]** than terms like '*per se*,' 'quick look,' and 'rule of reason' tend to make them appear." (*California Dental Assn. v. FTC, supra, 526 U.S. at p. 779*.) "[T]here is generally no categorical line to be drawn between restraints that give rise to an intuitively obvious inference of anticompetitive effect and those that call for more detailed treatment. What is required, rather, is an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint." (*Id. at pp. 780–781*.) **[***653]** The emergence of quick look rule of reason analysis did not signal the supplanting of the traditional per se/rule of reason dichotomy with a new trichotomy (*Polygram Holding, Inc. v. FTC (D.C. Cir. 2005) 416 F.3d 29, 35)*, but rather a shift to """something of a sliding scale"""" in antitrust analysis. (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2237]*.)

CA(11)[] **(11)** This more nuanced approach makes equal sense for claims under the Cartwright Act. Like the federal antitrust statutes, **HN11**[] nothing in the text of the Cartwright Act dictates the precise details of the per se and rule of reason approaches; these are but useful tools the courts have developed over time to carry out the broad purposes and give meaning to the general phrases of the antitrust statutes. (See *National Soc. of Professional Engineers v. U. S., supra, 435 U.S. at p. 688*.) It is consistent with the common law tradition at the root of our antitrust laws to describe, as the United States Supreme Court now has, **[****37]** the analytic approach as involving a continuum, with the "the circumstances, details, and logic" of a particular restraint (*California Dental Assn. v. FTC, supra, 526 U.S. at p. 781*) dictating how the courts that confront the restraint should analyze it. In lieu of an undifferentiated one-size-fits-all rule of reason, courts may "devise rules … for offering proof, or even presumptions where justified, to make the rule of reason a fair and efficient way to prohibit anticompetitive restraints and to promote procompetitive ones." (*Leegin Creative Leather Products, Inc. v. PSKS, Inc. (2007) 551 U.S. 877, 898–899 [168 L. Ed. 2d 623, 127 S. Ct. 2705]*; see *Fisher v. City of Berkeley, supra, 37 Cal.3d at pp. 671–677* [tailoring the rule of reason to account for differences between private and municipal government actions].)
[*148]

[863]** It follows that we must consider not simply whether per se or rule of reason analysis applies to reverse payment patent settlements. To the extent rule of reason analysis applies, as we will conclude it does, we must also consider how the analysis should be structured to most efficiently differentiate between reasonable and unreasonable restraints of trade in this context. (See *California Dental Assn. v. FTC, supra, 526 U.S. at p. 781*.)

B. *The Competitive Harm from Purchasing an Extension of Monopoly*

CA(12)[] **(12)** We begin with the proposition that **HN12**[] agreements to establish or maintain a monopoly are restraints of trade made unlawful by the Cartwright Act. (*Lowell v. Mother's **[****38]** Cake & Cookie Co. (1978) 79 Cal. App. 3d 13, 23 [144 Cal. Rptr. 664]*; *Dimidowich v. Bell & Howell (9th Cir. 1986) 803 F.2d 1473, 1478*.) Under general antitrust principles, a business may permissibly develop monopoly power, i.e., "the power to control prices or exclude competition" (*United States v. du Pont & Co. (1956) 351 U.S. 377, 391 [100 L. Ed. 1264, 76 S. Ct. 994]*), through the superiority of its product or business acumen. To acquire or maintain that power through agreement and combination with others, however, is quite a different matter. (*United States v. Grinnell Corp. (1966) 384 U.S. 563, 570–571 [16 L. Ed. 2d 778, 86 S. Ct. 1698]*.)

Pursuant to this rule, businesses may not engage in a horizontal allocation of markets, with would-be competitors dividing up territories or customers. (*United States v. Topco Associates, supra, 405 U.S. at pp. 608, 612*; *Vulcan Powder Co. v. Hercules Powder Co., supra, 96 Cal. at pp. 514–515*; **[***654]** *Guild Wineries & Distilleries v. J. Sosnick & Son (1980) 102 Cal. App. 3d 627, 633–635 [162 Cal. Rptr. 87]*.) Such allocations afford each participant an "enclave … , free from the danger of outside incursions," in which to exercise monopoly power and extract monopoly premiums. (*United States v. Sealy, Inc. (1967) 388 U.S. 350, 356 [18 L. Ed. 2d 1238, 87 S. Ct. 1847]*.)

Similarly, a firm may not "pay[] its only potential competitor not to compete in return for a share of the profits that firm can obtain by being a monopolist." (*Valley Drug Co. v. Geneva Pharmaceuticals, supra, 344 F.3d at p. 1304*.) In *Palmer v. BRG of Georgia, Inc. (1990) 498 U.S. 46 [112 L. Ed. 2d 349, 111 S. Ct. 401]*, for example, two competing bar review course providers did just that. One provider agreed to withdraw from a particular state market in exchange for the second provider paying the withdrawing provider a share of subsequent profits and agreeing in return not to compete outside that state market. In a *per curiam* opinion, the United States Supreme Court **[****39]** summarily declared the agreement unlawful on its face. (*Id. at pp. 49–50*; see *Getz Bros. & Co. v. Federal Salt Co. (1905) 147 Cal. 115, 119 [81 P. 416]* [payment for **[*149]** agreement not to compete and to discourage others from competing is illegal]; *Wright v. Ryder, supra, 36 Cal. at p. 359* [agreement not to compete in Cal. market violates common law prohibition on restraints of trade].)

CA(13)[] **(13)** Second, these principles extend into the patent arena to prohibit a patentee's purchase of a potential competitor's consent to stay out of the market. **HN13**[] ***Antitrust law*** condemns a patentee's payment "to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.) This is so even when the patent is likely valid: "The owner of a particularly valuable patent might contend, of course, that even a small risk of invalidity justifies a large payment. But, be that as it may, the payment (if otherwise unexplained) likely seeks to prevent the risk of competition. And, as we have said, that consequence constitutes the relevant anticompetitive harm." (*Ibid*.)

Actavis embraces the insights of Professor Carl Shapiro and others that the relevant benchmark in evaluating reverse payment patent settlements should be no different from the benchmark in evaluating **[****40]** any other challenged agreement: What would the state of competition have been without the agreement? In the case of a reverse payment **[**864]** settlement, the relevant comparison is with the average level of competition that would have obtained absent settlement, i.e., if the parties had litigated validity/invalidity and infringement/noninfringement to a judicial determination. (Shapiro, *Antitrust limits to patent settlements*, *supra*, 34 RAND J. Econ. at p. 396; see Addanki & Butler, *Activating Actavis: Economic Issues in Applying the Rule of Reason to Reverse Payment Settlements (2014) 15 Minn. J. L. Sci. & Tech. 77, 93*; Lemley & Shapiro, *Probabilistic Patents*, *supra*, 19 J. Econ. Persp. at p. 94; Willig & Bigelow, *Antitrust policy toward agreements that settle patent litigation* (2004) 49 Antitrust Bull. 655, 664, 677–679.) Consider a patent with a 50 percent chance of being upheld. After litigation, on average, consumers would be subject to a monopoly for half the remaining life of the patent. A settlement that allowed a generic market entry at the midpoint of the time remaining until expiration would replicate the expected level of competition; the period of exclusion would reflect the patent's **[***655]** strength. But a settlement that delayed entry still longer would extend the elimination of competition beyond what the patent's strength warranted; to the extent it did, the additional elimination of the possibility of **[****41]** competition would constitute cognizable anticompetitive harm. (See *Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.)

CA(14)[] **(14)** Barr argues that the procompetitive or anticompetitive effects of a settlement must be measured by comparison to the entire remaining life of a patent. We disagree. *Actavis* makes clear that ***HN14***[] for antitrust purposes patents are no longer to be treated as presumptively ironclad. This means the period **[*150]** of exclusion attributable to a patent is not its full life, but its expected life had enforcement been sought. This expected life represents the baseline against which the competitive effects of any agreement must be measured. [10] If an agreement only replicates the likely average result of litigation, any exclusion is a function of the underlying patent strength; if it extends exclusion beyond that point, this further exclusion from the marketplace—and the attendant anticompetitive effect—is attributable to the agreement. *Actavis* thus represents an application of the settled principle that "[t]he owner of a patent cannot extend his statutory grant by contract or agreement. A patent affords no immunity for a monopoly not fairly or plainly within the grant." (*U. S. v. Masonite Corp. (1942) 316 U.S. 265, 277 [86 L.Ed. 1461, 62 S.Ct. 1070]*.) The measure of the statutory grant, and the limit on the monopoly that **[****42]** may be preserved by agreement, is the average expected duration that would have resulted from judicial testing.

CA(15)[] **(15)** This method of analysis, and of assessing anticompetitive harm, is not materially different from that applied in any other garden-variety antitrust case. ***HN15***[] Every case involves a comparison of a challenged agreement against a prediction about—a probabilistic assessment of—the expected competition that would have arisen in its absence. (Shapiro, *Antitrust Analysis of Patent Settlements Between Rivals*, *supra*, 17 Antitrust at p. 70.) Every restraint of trade condemned for suppressing market entry involves uncertainties about the extent to which competition would have come to pass. (Hemphill, *An Aggregate Approach to Antitrust: Using New Data and Rulemaking to Preserve Drug Competition*, *supra*, *109 Colum. L.Rev. at p. 637*.) No matter; as the leading antitrust treatise notes, "the law does not condone the purchase of protection from uncertain competition any more **[****43]** than it condones the elimination of actual competition." (12 Areeda & Hovenkamp, ***Antitrust Law***, *supra*, ¶ 2030b, p. 220; see *U.S. v. Microsoft Corp. (D.C. Cir. 2001) 253 F.3d 34, 79* (en banc) ["it would be inimical to the purpose of the Sherman Act to allow monopolists free reign to squash nascent, albeit unproven, competitors at will …"].) The antitrust laws foreclose agreements eliminating "the risk of competition"—the competitive market that "might **[**865]** have been." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.) Purchasing freedom from the possibility of competition, whether done by a patentee or anyone else, is illegal. An

---

[10] To be clear, because the relevant baseline is the result that would have occurred in the absence of any agreement, it is not a cognizable harm simply to show that the parties might have elected a different settlement agreement more favorable to competition and consumers. There is no statutory right to have parties enter the agreement most favorable to competition, only a prohibition against entering agreements that harm competition.

agreement to exchange consideration for elimination of any portion of the period of **[***656]** competition that would have been expected had a patent been litigated is a violation of the Cartwright Act.
[*151]

C. *The Structure of the Rule of Reason as Applied to Patent Settlements*

We consider next how to identify whether the parties' settlement agreement eliminates competition beyond the point at which competition would have been expected in the absence of an agreement. Only if the agreement limits competition beyond that point, the point the strength of the patent would have justified, is there an antitrust issue.

1. *Plaintiff's Prima Facie Case*

CA(16)[] **(16)** We conclude ***HN16***[] a third party plaintiff challenging a reverse payment patent settlement **[****44]** must show four elements: (1) the settlement includes a limit on the settling generic challenger's entry into the market; (2) the settlement includes cash or equivalent financial consideration flowing from the brand to the generic challenger; and the consideration exceeds (3) the value of goods and services *other* than any delay in market entry provided by the generic challenger to the brand, as well as (4) the brand's expected remaining litigation costs absent settlement. We explain these elements in turn.

That a plaintiff challenging a reverse payment settlement must establish the settlement limits the challenging generic's entry is self-evident. If the settlement contains no component of delay and permits the generic to enter the market and compete fully and immediately, there is no restraint of trade and no potential for antitrust concern.

As well, ***HN17***[] a plaintiff must establish a reverse payment—financial consideration flowing from the brand to the generic challenger. [11] In the absence of payment, one would expect rational parties that settle to select a market entry point roughly corresponding to their joint expectation as to when entry would have occurred, on average, if the patent's **[****45]** validity and infringement had been fully litigated. (Hovenkamp et al., *Anticompetitive Settlement of Intellectual Property Disputes* (2003) *87 Minn. L.Rev. 1719, 1762*.) If market entry were substantially later than the generic thought it could obtain through litigation, the generic would be unwilling to settle and forgo the additional profits it thought it could earn from an earlier entry; conversely, if the entry were **[*152]** substantially earlier than the brand thought it could obtain through litigation, the brand would not settle and forgo an additional period of monopoly. Absent payment, one can accept an agreement to postpone market entry as a fair approximation of the expected level of competition that would have obtained had the parties litigated; absent payment, any delay in entry may be attributed to the effective strength of the challenged patent, rather than the settlement agreement. (See *ibid.*; Carrier, *Payment After* Actavis (2014) *100 Iowa L.Rev. 7, 17*.)

CA(17)[] **(17)** **[***657]** Third, a plaintiff must establish the consideration to the generic challenger exceeds the value of any other collateral products or services provided by the generic to the brand. As the Supreme Court noted, ***HN18***[] the concern that a reverse payment raises will depend in part on "its independence from other services for which it might represent payment." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2237]*.) A "payment may reflect compensation for other services that the generic has promised to perform—such as distributing the patented item or helping to develop a market for that item." (*Id. at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2236]*.) **[**866]** If payment is no more than would be expected as compensation for additional products or services, then the agreement includes no additional consideration for delay and we can trust that any limit on competition is a legitimate consequence of the patent's strength and the contracting parties' expectations concerning its exclusionary power.

[11] To some extent, the settlement agreement challenged here is a relic. Cash reverse payments were not uncommon in the 1990s, but shortly thereafter brands and generics began using a wide range of other forms of consideration to accomplish reverse payment. (See Hemphill, *An Aggregate Approach to Antitrust: Using New Data and Rulemaking to Preserve Drug Competition, supra, 109 Colum. L.Rev. at pp. 647–658*.) Because **[****46]** the Cipro settlement involved cash, we need not define precisely what noncash forms of consideration will qualify, but courts considering Cartwright Act claims should not let creative variations in the form of consideration result in the purchase of freedom from competition escaping detection.

Considerable caution is in **[****47]** order in evaluating settlements that include side agreements for generic products or services. Historically, it appears brands and generics have engaged in business dealings outside the settlement context far less often than in it. (Hemphill, *An Aggregate Approach to Antitrust: Using New Data and Rulemaking to Preserve Drug Competition, supra, 109 Colum. L.Rev. at pp. 663–668*.) A side agreement involving difficult to value assets might conceivably be added to a patent settlement to provide cover for the purchase of additional freedom from competition. (*Id. at pp. 632–633, 669*; Bulow, *The Gaming of Pharmaceutical Patents* in 4 Innovation Policy and the Economy, *supra*, at pp. 169–171; Carrier, *Unsettling Drug Patent Settlements: A Framework for Presumptive Illegality*, *supra*, *108 Mich. L.Rev. at p. 79*.) This court long ago established that side deals should not be permitted to serve as fig leaves for agreements to eliminate competition. In *Getz Bros. & Co. v. Federal Salt Co., supra, 147 Cal. 115*, the parties entered an agreement to exchange money for (1) an agreement not to compete and to discourage competition in the salt trade and (2) more than 1,000 pounds of salt. Precisely how much of the payment was attributable to the actual provision of salt we could not say, but so long as any portion of the payment was attributable to the covenant not to compete—and we viewed it as "plain … that part of it, at least, was"—the deal as a whole was an illegal restraint of trade. (*Id. at p. 118*.)

[*153]

HN19[] ***CA(18)***[] **(18)** Fourth, a plaintiff must establish that the amount of the payment, over and above the **[****48]** value of collateral products or services from the generic, also exceeds the brand's anticipated future litigation costs. In some cases, a "reverse payment … may amount to no more than a rough approximation of the litigation expenses saved through the settlement. … Where a reverse payment reflects traditional settlement considerations, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement. In such cases, the parties may have provided for a reverse payment without having sought or brought about the anticompetitive consequences we mentioned above." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2236]*.) A rational brand might be indifferent as between (1) actually litigating or (2) settling, with market entry at the point expected, on average, from asserting its patent in litigation and a payment to the generic in an amount up to what would have been spent in that litigation. **[***658]** It is thus necessary to evaluate the reverse payment's "scale in relation to the payor's anticipated future litigation costs." (*Id. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2237*].)

CA(19)[] **(19)** We consider briefly the allocation of burdens of proof and production. **[****49]** ***HN20***[] Unless a challenged settlement agreement includes both a restraint on generic competition and a reverse payment to the generic in excess of both brand litigation costs and generic collateral products and services, there is no reason to assume the settlement includes any element of purchased freedom from competition, as opposed to a limit on competition flowing naturally, and lawfully, from the perceived strength of the brand's patent. Accordingly, the burden of proof as to these elements rests with the Cartwright Act plaintiff. (See *Aguilar v. Atlantic Richfield Co. (2001) 25 Cal.4th 826, 861 [107 Cal. Rptr. 2d 841, 24 P.3d 493]*.)

CA(20)[] **(20)** The burden of producing evidence (see *Evid. Code, §§ 110*, *550*) is a slightly different matter. ***HN21***[] "'Where the evidence necessary to establish a fact essential to a claim lies peculiarly within the knowledge and competence of one of the parties, that party has the burden of going forward with the evidence on the issue although it is not the party asserting the claim.'" (*Sanchez v. Unemployment Ins. Appeals Bd. (1977) 20 Cal.3d 55, 71 [141 Cal. Rptr. 146, 569 P.2d 740]*.) **[**867]** This is so with regard to both a settling party's own litigation costs and the existence and value of any collateral products or services provided as part of a patent settlement; these are matters about which the settling parties will necessarily have superior knowledge. [12] Accordingly, **[*154]** once a plaintiff has shown **[****50]** an agreement involving a reverse payment and delay, the defendants have the burden of coming forward with evidence of litigation costs and the value of collateral products and services. [13] If the defendants fail to do so, because, e.g., there was no side agreement or because they do not

[12] We do not suggest a defendant's testimony concerning the value conveyed in side agreements is entitled to any more weight than the plaintiff's, only that the defendants have the initial burden of introducing evidence of agreements for the purchase of other products or services sufficiently valuable to explain any payment.

dispute the collective amounts fall short of any payment to the generic, the plaintiff has satisfied its burden on these points. If instead the defendants do so, the plaintiff must carry the ultimate burden of persuasion that any reverse payment exceeds litigation costs and the value of collateral products or services.

CA(21)[] **(21)** We further conclude that ***HN22***[] a **[****51]** showing of the above elements is not only necessary but also sufficient to make out a prima facie case that the settlement is anticompetitive. If a brand is willing to pay a generic more than the costs of continued litigation, and more than the value of any collateral benefits, in order to settle and keep the generic out of the market, there is cause to believe some portion of the consideration is payment for exclusion beyond the point that would have resulted, on average, from simply litigating the case to its conclusion. Otherwise, the brand would have had little incentive to settle at such a high price. Moreover, the larger the gap, the stronger the inference one can draw.

A wealth of economic scholarship and analysis supports this inference. Because **[***659]** the profit that can be earned under monopoly conditions is greater than the combined profit that can be earned under duopoly conditions, [14] a brand and a generic have a substantial incentive to settle at the latest market entry date possible, with the brand paying a portion of monopoly profits to compensate the generic for what it would have earned with an earlier entry. [15] If the parties can share monopoly profits through a reverse payment **[****52]** from the **[*155]** brand to the generic, the generic no longer has motivation to hold out for its best estimate of the average entry point it could obtain through litigation. Instead, the parties' interests align in favor of maximizing their combined wealth by extending the monopoly for as long as possible. Once payment to the generic exceeds what the brand is otherwise receiving from it in **[**868]** products and services or would have spent to litigate, a court may fairly presume the settling parties have engaged in such conduct and should be put to the burden of coming forward with a procompetitive justification for their settlement. (Elhauge & Krueger, *Solving the Patent Settlement Puzzle*, *supra*, *91 Tex. L.Rev. at pp. 297–304*; see Edlin et al., *Activating* Actavis (2013) 28 Antitrust 16, 22, appen.; Lemley & Shapiro, *Probabilistic Patents*, *supra*, 19 J. Econ. Persp. at p. 93; Shapiro, *Antitrust limits to patent settlements*, *supra*, 34 RAND J. Econ. at p. 408.)

Barr argues this degree of scrutiny will stifle innovation. But Congress was not authorized to, and did not, grant inventors eternal monopolies; instead, it approved a scheme that presumptively represents the appropriate balance between promoting innovation and allowing competition. Reverse payment patent settlements may enable the parties to extend the monopoly beyond that point. (Elhauge & Krueger, *Solving the Patent Settlement Puzzle, supra, 91 Tex. L.Rev. at pp. 295–304*; Lemley & Shapiro, *Probabilistic Patents*, *supra* **[****54]** , 19 J. Econ. Persp. at p. 93; Leffler & Leffler, *Efficiency Trade-Offs in Patent Litigation Settlements: Analysis Gone Astray?* (2004) *39 U.S.F. L.Rev. 33, 37–38*; Shapiro, *Antitrust Analysis of Patent Settlements Between Rivals*, *supra*, 17 Antitrust at p.

---

[13] Here, the brand, Bayer, settled out of the antitrust case, and Barr would not be in a superior position with regard to knowledge of Bayer's future patent litigation costs, so the burden of production on this point would remain with plaintiffs.

[14] While this is a broadly shared economic tenet, it has also been empirically demonstrated by the FDA in the current context. (See FDA, Center for Drug Evaluation and Research, Generic Competition and Drug Prices (2010) online at <*http://www.fda.gov/AboutFDA/CentersOffices/Officeofmedicalproductsandtobacco/CDER/ucm129385.htm*> [as of May 7, 2015].) Indeed, in its briefing Barr effectively concedes this is the case here: "[E]ach day of early entry would have cost **[****53]** Bayer more given the price of its branded product than it would have benefitted Barr given the price of its generic product."

[15] *Actavis, supra, 570 U.S. at pages ___–___ [186 L. Ed. 2d at pages 361–362, 133 S. Ct. at pages 2234–2235]*; see, e.g., Hovenkamp, *Anticompetitive Patent Settlements and the Supreme Court's* Actavis *Decision*, *supra*, *15 Minn. J. L. Sci. & Tech. at pages 8–13*; Mungan, *Reverse Payments, Perverse Incentives* (2013) *27 Harv. J. Law & Tech. 1, 5–6, 27, 34*; Elhauge & Krueger, *Solving the Patent Settlement Puzzle* (2012) *91 Tex. L.Rev. 283, 289*; Kades, *Whistling Past the Graveyard: The Problem with the* Per Se *Legality Treatment of Pay-for-Delay Settlements* (2009) 5 Competition Pol'y Int'l 143, 148–150; Leffler & Leffler, *Settling the Controversy over Patent Settlements: Payments by the Patent Holder Should Be Per Se Illegal* in ***Antitrust Law*** and Economics (Kirkwood edit., 2004) 475, 480–484; Willig & Bigelow, *Antitrust policy toward agreements that settle patent litigation*, *supra*, 49 Antitrust Bull. at page 659; Bulow, *The Gaming of Pharmaceutical Patents* in 4 Innovation Policy and the Economy, *supra*, at page 166; Shapiro, *Antitrust limits to patent settlements*, *supra*, 34 RAND J. Econ. at pages 394–395.

73.) Indeed, insufficient scrutiny of such settlements has the potential to hamper innovation by allowing weak patents to offer the exact same exclusionary potential and monopoly possibilities as **[***660]** strong ones, [16] thus steering innovator incentives away from more costly true innovation and toward cheaper, less socially valuable pseudoinnovation. (See Mungan, *Reverse Payments, Perverse Incentives, supra, 27 Harv. J. Law & Tech. at pp. 42–44*; Elhauge & Krueger, *Solving the Patent Settlement Puzzle, at pp. 294–295*.)
[*156]

Relatedly, Barr expresses concern that close scrutiny of reverse payment settlements will chill some generics from challenging patents, to the detriment of consumers. But any challenge that results in the brand simply paying the generic not to compete—a potentially common outcome absent scrutiny—does nothing to enhance competition, and deterring such challenges accordingly represents no loss to consumers. Moreover, standard economic theory suggests reducing unfettered access to reverse payment settlements would chill generic challenges to strong, **[****55]** likely valid patents more than challenges to weak patents. The effect would be to increase the value of strong patents, while still leaving generics incentives to challenge weak patents. (Mungan, *Reverse Payments, Perverse Incentives*, *supra*, *27 Harv. J. Law & Tech. at p. 7*.) This consequence presents no reason to scale back scrutiny of these settlements.

CA(22)[] **(22)** Finally, Barr argues that in some cases only a reverse payment can bridge the differences between the brand and the generic challenger and make settlement possible. Perhaps; but as the Supreme Court has made clear, ***HN23***[] ordinarily "the fact that a large, unjustified reverse payment risks antitrust liability does not prevent litigating parties from settling their lawsuit." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2237]*.) Parties can still use financial considerations to bridge small gaps arising from differing subjective perceptions of their probabilities of success in litigation; what they cannot do is use money to bridge their differences over the point when competitive entry is economically desirable, for that gap is not one ***antitrust law*** permits would-be competitors to bridge by agreement: "If the basic reason [the parties prefer a reverse payment settlement] is a desire to maintain and to share patent-generated monopoly **[****56]** **[**869]** profits, then, in the absence of some other justification, the antitrust laws are likely to forbid the arrangement." (*Ibid.*) That some settlements might no longer be possible absent a payment in excess of litigation costs is no concern if the ones now barred would simply have facilitated the sharing of monopoly profits.

Barr relies on one commentary showing that some theoretically possible settlements involving payments exceeding the sum of expected litigation costs and the value of other products and services might enhance consumer welfare. (Harris et al., *Activating* Actavis*: A More Complete Story* (2014) 28 Antitrust 83.) The principal conclusion is that introducing brand risk aversion into the settlement model opens up a region of possible settlements involving supralitigation cost payments that nevertheless increase consumer welfare by enabling **[***661]** earlier generic market entry dates. [17] What is not shown is that such **[*157]** settlements are at all likely in practice. Although a brand and generic may through payment of money be able to settle on an earlier entry date than would arise from litigation, their incentive (if left undeterred by the antitrust regime) remains to settle on a far later entry date for still larger sums of money, as even some of the leading **[****57]** economists highlighting the relevance of risk aversion

---

[16] See *In re Tamoxifen Citrate Antitrust Litigation, supra, 466 F.3d at page 211* (noting the "troubling dynamic" that "[t]he less sound the patent or the less clear the infringement, and therefore the less justified the monopoly enjoyed by the patent holder, the more a rule permitting settlement is likely to benefit the patent holder by allowing it to retain the patent"); Hemphill, *An Aggregate Approach to Antitrust: Using New Data and Rulemaking to Preserve Drug Competition, supra, 109 Colum. L.Rev. at page 638* (treating patents as conclusively valid until expiration "produces the absurd result that an ironclad patent and a trivial patent have the same exclusionary force"); Bulow, *The Gaming of Pharmaceutical Patents* in Innovation Policy and the Economy, volume 4, *supra*, at page 167.

[17] The Harris model also addresses the effects of asymmetric information, but different perspectives on the likelihood of success are unlikely to alone render it possible for a supralitigation costs reverse payment settlement to be efficient. (Elhauge & Krueger, *Solving the Patent Settlement Puzzle, supra, 91 Tex. L.Rev. at pp. 300–303, 325–329*.) Money may be needed to bridge the gap between the parties' expectations, but a rational brand asked to pay more than its litigation costs to persuade a generic with different perceptions would, in the ordinary case, presumably just litigate.

recognize. (Willig & Bigelow, *Antitrust policy toward agreements that settle patent litigation*, *supra*, 49 Antitrust Bull. at p. 659.) Attempts to quantitatively estimate the frequency with which risk aversion would produce an efficient settlement despite payment in excess of litigation costs suggest such occurrences would be exceedingly rare. (Leffler & Leffler, *The Probabilistic Nature of Patent Rights: In Response to Kevin McDonald*, *supra*, 17 Antitrust at pp. 79–80; Leffler & Leffler, *Settling the Controversy over Patent Settlements: Payments by the Patent Holder Should Be Per Se Illegal* in ***Antitrust Law*** and Economics, *supra*, at p. 504; see Bulow, *The Gaming of Pharmaceutical Patents* in 4 Innovation Policy and the Economy, *supra*, at p. 167.) Thus, while we do not discount the possibility, it affords no reason to expand plaintiff's prima facie case beyond the elements discussed.

CA(23)[] **(23)** We also observe that the outlined prima facie showing will suffice, without more, **[****58]** to raise a presumption of the patentee's market power. Proving that a restraint has anticompetitive effects often requires the plaintiff to "'delineate a relevant market and show that the defendant plays enough of a role in that market to impair competition significantly,'" i.e., has market power. (*Roth v. Rhodes, supra, 25 Cal.App.4th at p. 542*.) Here, proof of a sufficiently large payment is a surrogate: "the 'size of the payment from a branded drug manufacturer to a prospective generic is itself a strong indicator of power'—namely, the power to charge prices higher than the competitive level." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2236*].) Logically, a patentee would not pay others to stay out of the market unless it had sufficient market power to recoup its payments through supracompetitive pricing. (*Ibid*.) Consequently, ***HN24***[] proof of a reverse payment in excess of litigation costs and collateral products and services raises a presumption that the settling patentee has market power sufficient for the settlement to generate significant anticompetitive effects.

2. *Defendants' Rebuttal*

HN25[] ***CA(24)***[] **(24)** Once a plaintiff has made out a prima facie case that a reverse payment patent settlement has anticompetitive effects, a court "must weigh these anticompetitive effects against the possible justifications" **[****59]** for the challenged restraint. (*Marin County Bd. of Realtors, Inc. v. Palsson, supra, 16 Cal.3d at p. 937*.) At this point, we deem it appropriate to shift the burden to the defendants to offer legitimate justifications and come forward with **[*158]** evidence that the challenged settlement **[**870]** is in fact procompetitive. (See *Bus. & Prof. Code, § 16725* ["[i]t is not unlawful to enter" an agreement "to promote, encourage or increase **[***662]** competition"]; *Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2236]* ["An antitrust defendant may show in the antitrust proceeding that legitimate justifications are present … ."].) [18]

Plaintiffs argue we should declare every reverse payment in excess of litigation costs and collateral products and services a per se violation of the Cartwright Act. We are unwilling to declare every settlement payment of a certain size illegal. Like the United States Supreme Court, we cannot say with reasonable certainty—yet—that we have posited every possible justification that might render a particular reverse payment settlement procompetitive. (See *Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 362, 133 S. Ct. at p. 2236*].) The theoretical possibility that a settlement in excess of litigation costs and collateral services could be procompetitive, while insufficient to alter the plaintiff's prima facie case, is nevertheless **[****60]** sufficient for us to reject a categorical rule and instead afford defendants the opportunity to demonstrate a given settlement is the exception.

This does not mean any justification will do. An antitrust defendant cannot argue a settlement is procompetitive simply because it allows competition earlier than would have occurred if the brand had won the patent action; as *Actavis* and our previous discussion make clear, the relevant baseline is the average period of competition that would have obtained in the absence of settlement. (See *Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.) [19]

---

[18] See *FTC v. Indiana Federation of Dentists, supra, 476 U.S. at pages 459–461*; *National Soc. of Professional Engineers v. U. S., supra, 435 U.S. at page 693*; 7 Areeda & Hovenkamp, ***Antitrust Law*** (3d ed. 2010) ¶¶ 1504b, 1507c, pages 402–403, 430.

[19] This point also addresses Barr's argument that causation is lacking in reverse payment cases because absent a settlement, the parties would have litigated, the patentee would likely or surely have won, and consumers would have been no better off. At the time of settlement, the outcome of future litigation is uncertain, and an agreement that "seeks to prevent the risk of

CA(25)[] **(25)** Likewise, consideration of whether the agreement is justified as procompetitive will not turn on whether the patent would ultimately have been proved valid or invalid. ***HN26***[] Agreements must be assessed **[****61]** as of the time they are made (*Valley Drug Co. v. Geneva Pharmaceuticals, supra, 344 F.3d at p. 1306*), at which point the patent's validity is unknown and unknowable. Just as later invalidation of a patent does not prove an agreement when made was anticompetitive (*id. at pp. 1306–1307*), later evidence of validity will not **[*159]** automatically demonstrate an agreement was procompetitive. [20] ***Antitrust law*** condemns the purchase of freedom from competition; what matters is whether a settlement postpones market entry beyond the average point that would have been expected at the time in the absence of agreement. (See *In re Aggrenox Antitrust Litigation (D.Conn. 2015) 94 F.Supp.3d 224, 241* ["The salient question is not whether the fully-litigated patent would ultimately be found valid or invalid—that may never be known—but whether the settlement included a large and unjustified reverse payment leading to the **[***663]** inference of profit-sharing to avoid the risk of competition."].)

To determine whether such a settlement has occurred under state law, as under federal **[****62]** law, "it is normally not necessary to litigate patent validity … ." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.) "An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger **[**871]** rather than face what might have been a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness. … In a word, the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself." (*Id. at pp. ___–___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at pp. 2236–2237]*.)

3. *The Plaintiff's Ultimate Burden*

HN27[] ***CA(26)***[] **(26)** The ultimate burden throughout rests with the plaintiff to show that a challenged settlement agreement is anticompetitive. (*Bert G. Gianelli Distributing Co. v. Beck & Co. (1985) 172 Cal. App. 3d 1020, 1048 [219 Cal. Rptr. 203]*.) Once the plaintiff has made out a prima facie case that a reverse payment patent settlement is anticompetitive, however, the plaintiff thereafter need only show that any procompetitive justifications proffered by the defendants are unsupportable. (See *Polygram Holding, Inc. v. FTC, supra, 416 F.3d at pp. 37–38*.)

The ultimate question in reverse payment settlement cases **[****63]** is whether an agreement involves "significant unjustified anticompetitive consequences." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2238]*.) The prima facie case requires the plaintiff to eliminate the possibility that litigation costs or other products or services could explain the consideration paid the generic. If a plaintiff does so and thereafter can dispel each additional justification the defendants put forward to explain the consideration, the conclusion follows that the settlement payment must include, in **[*160]** part, consideration for additional delay in entering the market. That payment for delay is condemned by the Cartwright Act, as by federal ***antitrust law***, and its purchase as part of a settlement agreement is an unlawful restraint of trade.

* * *

CA(27)[] **(27)** We summarize ***HN28***[] the structure of the rule of reason applicable to reverse payment patent settlements. To make out a prima facie case that a challenged agreement is an unlawful restraint of trade, a plaintiff must show the agreement contains both a limit on the generic challenger's entry into the market and compensation from the patentee to the challenger. The defendants bear the burden of coming forward with evidence of litigation costs or valuable collateral products or services that **[****64]** might explain the compensation; if the defendants do so, the plaintiff has the burden of demonstrating the compensation exceeds the reasonable value of these. If a prima facie case has been made out, the defendants may come forward with additional justifications to demonstrate

---

competition" causes, i.e., has as a "consequence … the relevant anticompetitive harm." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.)

[20] Some kinds of evidence may also be suspect: Once a brand and a generic challenger settle, their incentives align in favor of arguing that the patent was stronger and more clearly infringed than it may have appeared at the time.

the settlement agreement nevertheless is procompetitive. A plaintiff who can dispel these justifications has carried the burden of demonstrating the settlement agreement is an unreasonable restraint of trade under the Cartwright Act.

D. *Preemption*

CA(28)[] **(28)** Barr argues federal preemption concerns narrowly constrain how reverse **[***664]** payment patent settlements must be analyzed under state law. According to Barr, any rule more stringent than the traditional, unstructured rule of reason would fall prey to ***HN29***[] obstacle preemption, which "arises when '"under the circumstances of [a] particular case, [the challenged state law] stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress."'" (*Viva! Internat. Voice for Animals v. Adidas Promotional Retail Operations, Inc. (2007) 41 Cal.4th 929, 936 [63 Cal. Rptr. 3d 50, 162 P.3d 569]*.) We disagree; the rule we adopt is in harmony with *Actavis*, which offered only broad outlines and explicitly left to other courts the task of developing a framework for analyzing the anticompetitive effects **[****65]** of reverse payment patent settlements. (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2238]*.)

HN30[] ***CA(29)***[] **(29)** State ***antitrust law*** ordinarily is fully compatible with federal law. States have regulated against monopolies and unfair competition for longer than the federal government, and federal law is intended only "to supplement, not displace, state antitrust remedies." (*California v. ARC America Corp. (1989) 490 U.S. 93, 102 [104 L. Ed. 2d 86, 109 S. Ct. 1661]*; see *id. at pp. 101–102* & fn. 4; *Partee v. San Diego Chargers Football Co. (1983) 34 Cal.3d 378, 382 [194 Cal. Rptr. 367, 668 P.2d 674]*.) **[**872]** "[T]he Cartwright Act is broader in range and deeper in reach than the Sherman Act." (*Cianci v. **[*161]** Superior Court, supra, 40 Cal.3d at p. 920*); this greater domain has never been thought to pose supremacy clause problems. To the contrary, in light of the established state role, a presumption against preemption applies. (*ARC America Corp., at p. 101*.)

Barr argues that to avoid conflicting with federal patent law, state ***antitrust law*** must cohere with the federal rule that patents are presumed valid. (See *35 U.S.C. § 282*.) But as we have discussed, the patent act's allocation of a burden of proof is no more than a procedural device. It does not insulate settlements of patent disputes from federal antitrust scrutiny (*Actavis, supra, 570 U.S. at pp. ___–___ [186 L. Ed. 2d at p. 356, 133 S. Ct. at pp. 2230–2231]*), nor does it insulate them from state antitrust scrutiny. The agnostic stance toward patent validity our structured rule of reason adopts is identical to that embraced by the United States Supreme Court under federal ***antitrust law***: a **[****66]** patent may or may not be valid or infringed. (*Ibid.*) What matters instead is simply whether a payoff to eliminate the possibility of competition has occurred. (*Id. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2236]*.) If federal ***antitrust law*** can conduct that inquiry without offense to patent law, so too can the state ***antitrust law*** it was designed to supplement.

Additionally, Barr argues the rule we adopt must be no more favorable to reverse payment patent settlement challenges than would be the case under *Actavis*. The supposed rationale is that *Actavis* identifies precisely the accommodation patent law requires of ***antitrust law***, such that deviation would pose an obstacle to congressional patent objectives.

If *Actavis* had established a special rule limiting antitrust scrutiny of reverse payment settlements in order to preserve the incentives created by the patent system, we might agree. But the lesson of *Actavis* is that nothing in the patent laws or the Hatch-Waxman Act dictates such a special rule; that a settlement resolves a patent dispute does not "immunize the agreement from antitrust attack." (*Actavis, supra, 570 U.S. at p. ___ [186 L. Ed. 2d at p. 356, 133 S. Ct. at p. 2230]*.) **[***665]** Instead, such agreements may, like any other form of agreement restraining trade, be examined for unjustified anticompetitive effects. (*Id. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2238]* **[****67]** .) As for how such an examination is to be conducted, *Actavis* reverts solely to antitrust considerations. (*Id. at pp. ___–___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at pp. 2237–2238]*.) In selecting a test to apply—to the extent the Supreme Court does, as opposed to "leav[ing] to the lower courts the structuring of the present rule-of-reason antitrust litigation" (*id. at p. ___ [186 L. Ed. 2d at p. 364, 133 S. Ct. at p. 2238]*)—the court looks to whether its experience with the economics of reverse payment settlements is sufficient to allow it, yet, to require particular modifications to rule of reason analysis (*id. at p. ___ [186 L. Ed. 2d at p. 363, 133 S. Ct. at p. 2237]*).

[*162]

HN31[] ***CA(30)***[] **(30)** Where the choice of a test rests solely on economic analysis, no patent law preemption concerns arise. Instead, the issue reduces to a problem in the relation between federal and state ***antitrust law***, and there the Supreme Court has been quite clear that states may depart from federal rules—or, here, accept an invitation to develop a gap in the law explicitly left by the Supreme Court—absent evidence of a clear congressional purpose to the contrary. (*California v. ARC America Corp., supra, 490 U.S. at p. 103*.)

We note as well that the structured rule of reason we adopt is consistent with, not an obstacle to, congressional patent and health care goals in two specific ways. First, considerable research and analysis suggests the broad availability of reverse payment settlements favors weak patents and channels investment resources toward suboptimal innovation prospects. (See *ante*, at p. 155.) To the extent careful scrutiny of such settlements promotes the very innovation the patent laws were intended to promote, it cannot stand as an obstacle to congressional objectives.

[873]** Second, a fundamental goal of the Hatch-Waxman Act is to enhance generic competition and thereby lower prices. **[****68]** Congress rued the "serious anti-competitive effects" of existing rules for generic drug approval, rules that resulted in "the practical extension of the monopoly position of the patent holder beyond the expiration of the patent." (H.R.Rep. No. 98-857, 2d Sess., pt. 2, p. 4 (1984), reprinted in 1984 U.S. Code Cong. & Admin. News, p. 2688.) The substantial reworking of those rules to ease generic approval was designed to "make available more low cost generic drugs" (*Id*., pt. 1, at p. 14, reprinted in 1984 U.S. Code Cong. & Admin. News, at p. 2647) and reduce costs for consumers and government-funded health care alike (*id*. at p. 17, reprinted in 1984 U.S. Code Cong. & Admin. News, at p. 2650). By ferreting out anticompetitive agreements that limit generic market entry and sustain costly monopolies, a structured rule of reason serves those goals and poses no obstacle to congressional objectives. [21]

[*666]** E. *Application*

CA(31)[] **(31)** The trial court and Court of Appeal treated the '444 patent as ironclad and used the entire period until its expiration as the relevant **[*163]** benchmark in order to assess whether the parties' settlement agreement had anticompetitive effects. This was error.

Barr argues we nevertheless should affirm because in the course of their respective opinions the trial court and Court of Appeal purported to apply the rule of reason in addition to the scope of the patent test. But the rule of reason these courts applied is not the structured rule of reason for reverse payment patent settlements we articulate today to effectuate the purposes of the Cartwright Act. Rather, in each instance the courts simply concluded that because the agreement did not exclude competition beyond what the '444 patent would have permitted (assuming it were valid), the agreement necessarily had no anticompetitive effect and was not unlawful under the rule of reason. The same misapprehension underlying the lower courts' scope of the patent analysis, that for antitrust purposes patents are ironclad, also underlay their rule of reason analysis. Accordingly, we must reverse.

V. *Unfair Competition Law and Common Law Monopoly* ***[****70]*** *Claims*

---

[21] A second federalism concern raised by the Court of Appeal, that state antitrust scrutiny would intrude on the exclusivity of federal court patent jurisdiction (see *28 U.S.C. § 1338(a)*), likewise presents no issue. This exclusive jurisdiction does not prevent state courts from deciding state law claims incidentally touching on the validity **[****69]** of a patent. (*Caldera Pharmaceuticals, Inc. v. Regents of University of California (2012) 205 Cal.App.4th 338, 353–356 [140 Cal. Rptr. 3d 543]*.) Moreover, the "slim category" of state law claims subject to exclusive federal patent jurisdiction includes only those that "'necessarily raise'" a federal patent issue. (*Gunn v. Minton (2013) 568 U.S. ___, ___ [185 L.Ed.2d 72, 79, 133 S.Ct. 1059, 1065]*.) As we have discussed, it is entirely possible to resolve an antitrust challenge to a reverse payment patent settlement without adjudicating the patent's validity.

The trial court entered judgment against plaintiffs on their unfair competition and common law monopoly claims using the same reasoning it applied to the Cartwright Act claim. Because that reasoning was erroneous, we reverse on these claims as well.

Disposition

We reverse the Court of Appeal's judgment and remand for further proceedings consistent with this opinion.

Cantil-Sakauye, C. J., Chin, J., Corrigan, J., Liu, J., Cuéllar, J., and Kruger, J., concurred.

The petition of respondent Watson Pharmaceuticals, Inc., for a rehearing was denied July 8, 2015.

Opinion

ORDER

This case is before the court on Plaintiffs Alcon Laboratories, Inc.'s ("Alcon") (Dkt. No. 5), Johnson & Johnson Vision Care, Inc.'s ("JJVC") (Dkt. No. 27), and Bausch & Lomb, Inc.'s ("B&L") (Dkt. No. 28) (collectively "Plaintiffs") motions for preliminary injunction. Plaintiffs' consolidated motions ask this court to enjoin enforcement of recently enacted *Utah Code Section 58-16a-905.1* ("*section 905.1*" or "the statute") pending final adjudication of its constitutionality. Plaintiffs assert that *section 905.1* is an unconstitutional overreach of state legislative powers in that it impermissibly **[*4]** interferes with the nationwide contact lens market in violation of the *Commerce Clause of the United States Constitution*. Absent an injunction, *section 905.1* is scheduled to take effect on May 12, 2015.

The court heard argument on the Plaintiffs' preliminary injunction motions on May 5, 2015. At the hearing, Plaintiff Alcon was represented by David R. Marriott, Jared Jenson, Amy Sorenson and Amber Mettler. Plaintiff JJVC was represented by Jonathan F. Cohn, Kwaku Akowuah and Tim Conde. Plaintiff B&L was represented by Clifford M. Sloan and Erik Christiansen. Defendant Sean D. Reyes, in his official capacity as Attorney General of Utah ("Utah"), was represented by Parker Douglas. Intervenor 1-800 CONTACTS, Inc. ("1-800") was represented by Paul G. Cassell, Brent Hatch, Garth Vincent and Greg Sergi. Intervenor Costco Wholesale Corporation ("Costco") was represented by Shylah R. Alfonso and Mark Bettilyon.

At the conclusion of the hearing the court took the matter under advisement. Since then, the court has further considered the law and facts relating to the motions and the arguments presented by counsel. Now, being fully advised, the court issues the following Memorandum Decision and Order.

BACKGROUND

The contact lens industry in the United States **[*5]** is roughly a $4 billion dollar-per-year industry. (Alcon Mem. in Supp. at 5.) It is controlled by four primary contact lens manufacturers — Alcon, JJVC, B&L, and CooperVision, Inc. (collectively the "Manufacturers") — who maintain an almost 100% market share of the industry. (Costco Opp'n at viii.) None of the four manufacturers are located in Utah.

The contact lens industry has two features that make it particularly susceptible to anticompetitive conduct. First, contact lenses may be sold only pursuant to a valid prescription from an eye care professional ("ECP"), and each prescription from the ECP is brand and model specific. Except in limited circumstances, neither the consumer nor a contact lens retailer has the power to substitute an alternative or cheaper option to the prescribed brand, such as a generic equivalent. Second, "[u]nlike medical doctors who are prohibited from selling the drugs they prescribe, [ECPs] . . . are able to fill the contact lens prescriptions they write." (1-800 Opp'n at 2-3.) In other words, an ECP is both a contact lens prescriber and a contact lens retailer. H.R. Rep. No. 108-318, at 5 (Fairness to Contact Lens Consumers Act) (Oct. 15, 2003). "In almost no other **[*6]** medical context does the prescriber of a medical device have the power to control both the brand the patient must use and also sell the particular medical device in the same breath." (Costco Opp'n at ix.)

Once prescribed, however, contact lenses may be purchased from either the prescribing ECP or from eye care retailers (e.g., LensCrafters), mass merchandise retailers (e.g., Costco, Wal-Mart), internet retailers (e.g., 1-800 Contacts), pharmacies, or any other person who sells the prescribed lenses.[1] However, because non-ECP retailers are unable to compete with ECPs by providing a different brand of contact lens than prescribed (such as a generic equivalent), the non-ECP retailer's only means of competing with an ECP retailer is to offer lower prices on the same brands and types of lenses.

Non-ECP retailers, such as Intervenors 1-800 and Costco, assert that because ECPs are the only contact lens retailers that are dual-positioned to both prescribe and sell contact lenses to consumers, **[*7]** ECPs can "leverage their control over prescriptions and brand selection to also control and monopolize contact lens sales." (Costco Opp'n at x.) The non-ECP retailers further assert that because of this control over the market, contact lens manufacturers have a strong interest in "incentivizing ECPs to prescribe their brands by assisting in various methods of shielding ECPs from retail competition by discounters." (1-800 Opp'n at 3.)

Conversely, the Manufacturers claim that they, alone, are burdened with the task of educating ECPs about innovative products and developments in the industry so that the ECPs can pass that information along to their patients. Accordingly, to foster good relationships with the ECPs, the Manufacturers have invested in programs that are extended only to ECPs and retailers associated with ECPs. These programs include but are not limited to manufacturer rebates, free trial lenses for ECPs, and launching new products exclusively with ECPs. (See Alcon Mem. in Supp. at 7.) According to the Manufacturers, these programs "improve patient access to better information and new technologies, and enhance access to better eye care." (Id.)

Prior Legislation and Litigation **[*8]**

Given the unique features of the contact lens business, the industry has a significant history of litigation and legislation. For example, in the 1990s, attorneys general from 32 states (including Utah) and a national class of consumers brought actions against the American Optometric Association and the contact lens manufacturers for conspiring with ECPs and others to restrain competition with "alternative retailers" such as online companies, pharmacies and big box retailers. See In re Disposable Contact Lens Antitrust Litig., MDL No. 1030, 2001 WL 493244 (M.D. Fla Feb. 1, 2001). In 2001 — after nearly seven years of litigation — MDL 1030 culminated in a settlement, with the contact lens manufacturers paying a substantial cash settlement to consumers and agreeing to broad injunctive relief requiring the Manufacturers to sell contact lenses to non-ECP retailers in a "commercially reasonable" and "nondiscriminatory" manner for at least five years. (See 1-800 Opp'n at 4.) After the injunctive provisions of the consent decree expired, the Utah Legislature, in 2006, essentially codified the "anti-discrimination" provisions of the MDL through the enactment of *Utah Code Section 58-16a-904*. See *Utah Code Ann. § 58-16a-904* (providing "a manufacturer of contact lenses doing business in the state" shall certify contact lenses to be "made available **[*9]** in a commercially reasonable and nondiscriminatory manner").

[1] Under Federal law, the ECP is required to give the patient her prescription so the patient can purchase the contact lenses from the retailer of her choice based on price and convenience, among other factors. *15 U.S.C. § 7601(a)*; *16 C.F.R. § 315.3*.

The business practices of the contact lens industry have also yielded federal legislation. In 2003, in response to allegations that the Manufacturers and ECPs were impeding consumers' ability to purchase contact lenses from discounters by (1) preventing consumers from obtaining copies of their prescriptions to purchase lenses elsewhere, and (2) erecting obstacles to non-ECP retailers' attempts to verify prescriptions, Congress enacted the Fairness to Contact Lens Consumers Act ("FCLCA").[2] The FCLCA requires that a contact lens prescriber, "whether or not requested by the patient, shall provide to the patient a copy of the contact lens prescription," and establishes a prescription verification process allowing retailers to sell lenses if the ECP does not respond to a verification request within a certain time period. *15 U.S.C. §§ 7601* & *7603*.

Manufacturer Uniform Pricing Policies ("UPPs")

Approximately two years ago, the Manufacturers began implementing unilateral resale pricing policies ("UPPs").[3] These UPPs set a minimum retail price below which retailers **[*10]** may not sell certain contact lenses to consumers. If a retailer thereafter sells or prices that particular contact lens below the manufacturer's UPP, the manufacturer punishes the retailer by terminating supply of contact lenses for one year.

The Manufacturers claim that the UPPs benefit everyone by "allow[ing] [ECPs] to refocus the critical doctor/patient conversation on eye health and product performance, rather than cost." (Angelini Letter). According to Alcon, the Manufacturers face the challenge of "educating ECPs, who alone are authorized to write prescriptions, about the attributes of the products, and of encouraging them, in turn, to inform patients of their potential benefits." (Alcon Mem. in Supp. at 7.) Alcon suggests that "ECPs may be reluctant to undertake these efforts if, once the patient receives a prescription, it may be filled by a low-cost contact lens reseller whose business model does not include those investments and who 'free rides' on the professional services the ECPs provide." (Id.) Additionally, the Manufacturers claim the UPPs are beneficial because **[*11]** they "eliminate[] the need for discussions with eye doctors about other retailers' prices. Consumers are assured that if their [ECP] or any other retailer is charging the minimum price, there is no need to shop around for a better bargain." (JJVC Mem. in Supp. at 4.)

Non-ECP retailers, such as Intervenors Costco and 1-800, contend that the practical and intended effect of the UPPs is to divert sales from more efficient, lower-cost retailers. (Costco Opp'n at xiv.) They claim that by restricting retail price competition, consumers now have fewer resulting in less competition and higher margins for ECPs. (Costco Opp'n at xv.) They claim that the Manufacturers' justifications for implementing the UPPs are pretextual given that the UPPs do not require or even encourage ECPs to invest in tangible or intangible services or promotional efforts that might improve patient care. (Costco Opp'n at xvi.)

Since implementation, the Manufacturers' UPPs have generated scrutiny. On July 30, 2014, the U.S. Senate Committee on the Judiciary, Subcommittee for Antitrust, Competition Policy and Consumer Rights held a hearing to examine the use of resale price maintenance programs (or UPPs) in the contact lens **[*12]** industry. The Committee noted their intent to revisit the issue once further evidence develops showing the impact of such policies on competition and consumer pricing. (1-800's Opp'n at 8 (providing citation to Senate's website for video recording of Senate hearing).) Additionally, in recent months roughly 40 consumer class action complaints have been filed, across the United States, against the Manufacturers, alleging violations of federal and/or state antitrust laws by engaging in an unlawful conspiracy to fix contact lens prices.[4]

Section 905.1

---

[2] See H.R. Rep. No. 108-318, at 4; Pub. L. 108-164, Fairness to Contact Lens Consumer Act (2003), codified at *15 U.S.C. § 7601 et seq.*

[3] The State of Utah and the Intervenors refer to the Plaintiffs' UPPs as minimum resale price maintenance ("RPM") policies.

[4] There are motions pending to coordinate or consolidate the actions into a multidistrict litigation forum. In re Disposable Contact Lens Antitrust Litigation, MDL No. 2626 (2015).

On March 10, 2015, the Utah Legislature amended the Contact Lens Consumer Protection Act through the addition of *section 58-16a-905.1*. In doing so, Utah became the first state to enact legislation attempting to restrict UPPs for contact lenses. Similar legislation has been proposed in Mississippi, Washington, Arizona, Florida, New York, Idaho, Oregon, Illinois and California. (Costco Opp'n at xviii.)

Section 905.1 of the Contact Lens Consumer Protection Act provides as follows:

> A contact lens manufacturer or a contact **[*13]** lens distributor may not:
> (1) take any action, by agreement, unilaterally, or otherwise, that has the effect of fixing or otherwise controlling the price that a contact lens retailer charges or advertises for contact lenses; or
> (2) discriminate against a contact lens retailer based on whether the contact lens retailer:
> (a) sells or advertises contact lenses for a particular price;
> (b) operates in a particular channel of trade;
> (c) is a person authorized by law to prescribe contact lenses; or
> (d) is associated with a person authorized by law to prescribe contact lenses.

Utah Code Ann. Section 58-16a-905.1.

The Utah Legislature also amended *section 58-16a-906*, to provide that "the attorney general may bring a civil action or seek an injunction and a civil penalty" against any person "who violates *section 58-16a-905.1*." Id. Before approving *section 905.1*, the Utah Legislature held hearings with views presented from the various conflicting interests, including Alcon and JJVC, various Utah retailers, the Utah Real Merchants Association, the Utah Manufacturers Association, and the Utah Optometric Association.

The Present Lawsuit

On April 13, 2015, Alcon initiated a declaratory judgment action seeking to have *section 905.1* declared unconstitutional. Alcon accompanied the filing of its declaratory **[*14]** judgment action with the instant motion for preliminary injunctive relief. (Dkt. Nos. 2 & 5, respectively.) The next day, JJVC and B&L filed similar lawsuits and requests for injunctive relief. On April 21, 2015, the three separate actions were consolidated. (Dkt. No. 26.)

The State of Utah and Intervenors 1-800 and Costco assert that *section 905.1* — which they perceive as simply prohibiting Plaintiffs from fixing the retail price of contact lenses in Utah — merely restores fair competition and will result in lower contact lens prices for consumers. They claim *section 905.1* is akin to countless state statutes "enacted pursuant to the traditional powers in the area of antitrust and unfair competition to regulate conduct that directly affects in-state consumers and business." (1-800 Opp'n at 2.)

The Manufacturers assert that *section 905.1* violates the *Commerce Clause of the United States Constitution* because it impermissibly interferes with commercial conduct outside of Utah, discriminates against interstate commerce, and imposes an excessive burden on interstate commerce. (Alcon's Mem. in Supp. at 13-20.) They claim *section 905.1* will have the effect of removing Utah-based retailers, and only Utah-based retailers, from the scope of national policies like the UPP, allowing in-state retailers **[*15]** to sell at lower prices than out-of-state retailers who try to serve Utah customers. (See Alcon's Mem. in Supp. at 3.) The Manufacturers assert that *section 905.1* is unconstitutional and the injuries they will suffer when *section 905.1* goes into effect will be irreparable. Accordingly, the Manufacturers assert they are entitled to a preliminary injunction, to have effect only for so long as is necessary for this court to issue a final judgment.

DISCUSSION

"[A] preliminary injunction is an extraordinary remedy; it is the exception rather than the rule." *General Motors Corp. v. Urban Gorilla, LLC, 500 F.3d 1222, 1226 (10th Cir. 2007)* (internal quotation marks omitted). The movant must show: "(1) a substantial likelihood of success on the merits; (2) irreparable harm to the movant if the injunction is denied; (3) [that] the threatened injury outweighs the harm that the preliminary injunction may cause the opposing party; and (4) [that] the injunction, if issued, will not adversely affect the public interest." Id. "The party seeking the preliminary injunction must show that the . . . factors weigh heavily and compellingly in its favor" and "[t]he right to relief in a preliminary injunction must be clear and unequivocal." *VR Acquisitions LLC v. Wasatch County, 2015 U.S. Dist. LEXIS 11465, 2015 WL 417895, at *7 (D. Utah Jan. 30, 2015)* (internal quotation marks omitted). In the context of a request for a preliminary **[*16]** injunction against enforcement of a state law, enacted in the public interest, these already-demanding standards are applied rigorously. See *Heideman v. South Salt Lake City, 348 F.3d 1182, 1189 (10th Cir. 2003)*.

1. Likelihood of Success on the Merits

Plaintiffs have failed to convince the court that they are likely to succeed on the merits of this case. Plaintiffs argue that *section 905.1* clearly violates the *Commerce Clause*, which grants Congress the exclusive power to regulate interstate commerce. (Alcon Reply at 6.) Specifically, Plaintiffs assert that the statute has impermissible extraterritorial effects, impermissibly discriminates against out-of-state economic interests, and imposes excessive burdens on interstate commerce. (Id.)

Extraterritorial Effects

The court is not persuaded that Plaintiffs are likely to succeed in demonstrating that *section 905.1* has impermissible extraterritorial effects. The United States Supreme Court summarized what constitutes impermissible extraterritorial effects in *Healy v. Beer Inst., 491 U.S. 324, 336, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*: "[T]he '*Commerce Clause* . . . precludes the application of a state statute to commerce that takes place wholly outside of the State's borders, whether or not the commerce has effects within the State.'" Id. (quoting *Edgar v. MITE Corp., 457 U.S. 624, 642-43, 102 S. Ct. 2629, 73 L. Ed. 2d 269 (1982))*.

Any assertion that *section 905.1* would impose such effects is circumvented by the Utah Supreme Court's recent **[*17]** explanation that, "[u]nder a deeply rooted and longstanding canon of construction, statutes are presumed not to have extraterritorial effect. This presumption is a gapfiller, operating under a 'clear statement' rule. It provides that unless a statute gives a 'clear indication of an extraterritorial application, it has none.'" *Nevares v. M.L.S., 2015 UT 34, 345 P.3d 719, 727 (Utah 2015)* (quoting *Morrison v. Nat'l Austl. Bank Ltd., 561 U.S. 247, 262-65, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010))* (internal citation omitted). The court sees no clear indication of an extraterritorial application in the statute at issue here and, thus, no such application can be assumed at this point in the case.

Discrimination

Similarly, the court is not persuaded that Plaintiffs are likely to succeed in demonstrating that *section 905.1* inappropriately discriminates against out-of-state economic interests. The United States Supreme Court has stated that state laws are discriminatory and "violate the *Commerce Clause* if they mandate 'differential treatment of in-state and out-of-state economic interests that benefits the former and burdens the latter.'" *Granholm v. Heald, 544 U.S. 460, 472, 125 S. Ct. 1885, 161 L. Ed. 2d 796 (2005)* (quoting *Oregon Waste Systems, Inc. v. Department of Environmental Quality of Ore., 511 U.S. 93, 99, 114 S. Ct. 1345, 128 L. Ed. 2d 13 (1994)*; see also *New Energy Co. of Indiana v. Limbach, 486 U.S. 269, 273, 108 S. Ct. 1803, 100 L. Ed. 2d 302 (1988)* ("This 'negative' aspect of the *Commerce Clause* prohibits economic protectionism — that is, regulatory measures designed to benefit in-state economic interests by burdening out-of-state competitors.") However, "[n]ot every benefit or burden will suffice **[*18]** — only one that 'alters the competitive balance between in-state and out-of-state firms.'" *Kleinsmith v. Shurtleff, 571 F.3d 1033, 1041 (10th Cir. 2009)*.

Plaintiffs concede that "read literally, *[section 905.1]* applies to manufacturers and distributors both within and outside Utah . . . ." (Alcon Mem. in Supp. at 19.) See *Ass'n des Eleveurs de Canards et D'oies du Quebec v. Harris, 729 F.3d 937, 948 (9th Cir. 2013)*, cert. denied, *135 S. Ct. 398, 190 L. Ed. 2d 249 (2014)* ("A statute that 'treats all private companies exactly the same' does not discriminate against interstate commerce. . . . This is so even when only out-of-state businesses are burdened because there are no comparable in-state businesses.") (citing *United Haulers Ass'n, Inc. v. Oneida-Herkimer Solid Waste Mgmt. Auth., 550 U.S. 330, 342, 127 S. Ct. 1786, 167 L. Ed. 2d 655 (2007)*; *Exxon Corp. v. Gov. of Maryland, 437 U.S. 117, 119, 125, 98 S. Ct. 2207, 57 L. Ed. 2d 91))*. Plaintiffs argue instead that the statute is discriminatory because it "protects 'a [Utah] contact lens retailer,' but not a non-Utah contact lens retailer, from manufacturer pricing policies . . . [and] entitles 'a [Utah] contact lens retailer,' but not a non-Utah contact lens retailer, to manufacturer programs that are designed for some kinds of retailers and not others." (Alcon Reply at 10.)

However, the record before the court supports Defendants' claim that "the fact that retail sales outside of Utah could be higher because of the [UPPs] is entirely the result of Plaintiffs' pricing policies—not any action taken by Utah." (Costco Opp'n **[*19]** at 14.) Indeed, the purported burden that out-of-state retailers face as a result of the statute is simply that they may continue to be subject to UPPs and other policies implemented by contact lens manufacturers, whereas instate retailers will not. *Section 905.1* in no way requires or anticipates that out-of-state retailers will continue to be subject to UPPs. Instead, the statute merely protects Utah retailers and consumers from activity that the State of Utah believes violates principles of fair competition.

Antitrust law "is an area traditionally regulated by the States." *California v. ARC America Corp., 490 U.S. 93, 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. "Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies." *Id. at 102*. As such, federal ***antitrust law*** sets a floor below which states cannot go, but states are free to legislate and regulate certain transactions more aggressively. See, e.g., *Exxon Corp. v. Gov. of Maryland, 437 U.S. 117, 129-32, 98 S. Ct. 2207, 57 L. Ed. 2d 91 (1978)*. The statute at issue here is nothing more than a state antitrust statute, tailored to a specific industry, which the state has the power to enact. *Id. at 133-34*.

In Exxon, the Maryland legislature—in response to evidence that oil producers and refiners were favoring company-operated gasoline stations during the 1973 petroleum shortage—enacted a statute prohibiting **[*20]** petroleum producers and refiners from operating retail service stations within the State of Maryland and requiring that all temporary price reductions be extended uniformly to all service stations supplied within the state. *Id. at 117*. The plaintiffs in Exxon argued, similarly to Plaintiffs in the present case, that the Maryland statute discriminated against interstate commerce, unduly burdened interstate commerce, and imposed "controls on a commercial activity of such an essentially interstate character that it [was] not amenable to state regulation." *Id. at 125*. The United States Supreme Court rejected all three arguments, holding that the statute did not violate the *Commerce Clause*. *Id. at 125-29*. The Court noted that the *Commerce Clause* does not "protec[t] the particular structure or methods of operation in a retail market" nor does it invalidate a duly enacted state statute simply because the statute "causes some business to shift from one interstate supplier to another." *Id. at 127*. As in Exxon, the statute at issue here attempts to remedy a significant market issue—retail price fixing by contact lens manufacturers.

Based on the record before the court, *section 905.1* appears to be no more restrictive than the statute upheld in Exxon. In Exxon, the statute required **[*21]** producers to provide uniform discounts to all service stations. Here, the statute merely requires that manufacturers refrain from mandating price fixing within the state of Utah and from discriminating against Utah retailers for reasons related to price fixing. This Utah statute, like the statute in Exxon, appears to be an appropriately tailored antitrust statute within the legislative authority of the state. See *ARC America Corp., 490 U.S. at 101-02*; see also *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 993-94 (9th Cir. 2000)* (holding that "California may apply its antitrust and unfair competition statutes consistent with the *Commerce Clause*" to a price fixing scheme in Wisconsin that affected prices in California).

Plaintiffs argue that the legislation at issue here is unique because "unlike traditional state antitrust, consumer protection, and public safety laws, . . . [the statute] forces out-of-state manufacturers and distributors who want to withdraw from commerce with a state resident...to continue engaging in interstate commerce with them." (Alcon Reply at 7.) Plaintiffs assert that Section 2 of the statute, which prohibits "discrimination" against retailers, essentially "instructs the Attorney General to penalize a manufacturer for deciding not to ship contact lenses to Utah . . . ." (Id.) At this early **[*22]** stage of the proceedings, a pre-enforcement request for preliminary injunction, Plaintiffs' constitutional concerns are premature and speculative.

First, a Utah statute that has been in effect since 2006 already expressly penalizes contact lens manufacturers that fail to make contact lenses available to retailers in a nondiscriminatory and commercially reasonable manner. *Utah Code Ann. § 58-16a-904*. Plaintiffs have presumably complied with this statute since 2006, and nothing in the record before this court indicates that the statute has been enforced in a way that impermissibly compels or effects interstate commerce.

Second, because *section 905.1* has not yet taken effect, the Utah Attorney General's Office has not had the opportunity to offer its interpretation of the statute in connection with an actual enforcement action. At oral argument, the Attorney General's representative expressed some uncertainty as to how and to what extent the law will be enforced. At this early stage, the court presumes the Utah Attorney General will enforce the statute in a manner that does not violate the *Commerce Clause*. See, e.g., *Nevares v. M.L.S., 2015 UT 34, 345 P.3d 719, 727 (Utah 2015)* (providing that duly enacted state statutes are presumed to be constitutional). At this stage, the court does not find that **[*23]** Plaintiffs have established that this statute is significantly different from other state antitrust statutes that have been upheld.

Burden on Interstate Commerce

The court is also unpersuaded that Plaintiffs are likely to succeed in demonstrating that the burden imposed on interstate commerce by the statute is clearly excessive in relation to the putative local benefits. Even if a state statute does not improperly discriminate or have impermissible extraterritorial effects, it will violate the *Commerce Clause* if it imposes a burden on interstate commerce that is "clearly excessive in relation to the putative local benefits." *Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 90 S. Ct. 844, 25 L. Ed. 2d 174 (1970)*. This inquiry requires the court to consider "(1) the nature of the putative local benefits advanced by the Ordinance; (2) the burden the Ordinance imposes on interstate commerce; (3) whether the burden is "clearly excessive in relation to" the local benefits; and (4) whether the local interests can be promoted as well with a lesser impact on interstate commerce." *Blue Circle Cement, Inc. v. Bd. of Cnty Comm'rs, 27 F.3d 1499, 1512 (10th Cir. 1994)*.

The putative local benefit is that *section 905.1* "would return intrabrand competition to the Utah contact lens marketplace, allowing Utah contact lens retailers to provide lower prices to Utah consumers." (Costco Opp'n at 13.) As **[*24]** discussed above, this is exactly the type of benefit states are permitted to advance through state antitrust laws.

The purported burden on interstate commerce is that out-of-state manufacturers would have to "participate in interstate commerce, under circumstances which they otherwise would choose not to . . ." and that retailers in Utah, but not retailers in the other 49 States, would be exempt from certain manufacturer policies. (Alcon Reply at 13-14.) This purported burden appears to be no greater than the burden imposed by any other state ***antitrust law***. Indeed, as with apparent competitive advantages that may be gained by in-state businesses through other state antitrust laws, any competitive advantages obtained by Utah contact lens retailers through this statute will be negated if other states enact similar antitrust laws of their own. As noted above, such legislation is presently under consideration in at least 9 states. Consequently, Plaintiffs are not likely to demonstrate that the burden on interstate commerce imposed by the statute is "clearly excessive in relation to" the local benefits.

2. Irreparable Harm if the Injunction is Denied

Similarly, Plaintiffs have failed to convince **[*25]** the court that they will suffer irreparable harm if the injunction is denied. Establishing irreparable harm is not an "easy burden to fulfill." *Greater Yellowstone Coalition v. Flowers, 321 F.3d 1250, 1258 (10th Cir. 2003)*. "To constitute irreparable harm, an injury must be certain, great, actual and not theoretical." *Heideman v. South Salt Lake City, 348 F.3d 1182, 1189 (10th Cir. 2003)*.

Plaintiffs claim they will suffer two primary forms of irreparable harm absent an injunction—constitutional injury and economic injury. (Alcon Mem. in Supp. at 22.) Plaintiffs' claimed constitutional injury is the "[d]eprivation of the rights guaranteed under the *Commerce Clause*[.]" *ACLU v. Johnson, 194 F.3d 1149, 1163 (10th Cir. 1999)*. As discussed in detail above, these constitutional injuries are speculative at this stage and, as such, Plaintiffs have failed to establish injuries that are certain, actual and imminent, as required for a preliminary injunction. See *Heideman, 348 F.3d at 1189* ("[T]he party seeking injunctive relief must show that the injury complained of is of such *imminence* that there is a clear and present need for equitable relief to prevent irreparable harm.").

Plaintiffs' claimed economic injuries include "financial loss that cannot be recovered because of the state's sovereign immunity from suits for damages" and the possibility that the Plaintiffs' inability to enforce UPPs will "suppress [Plaintiffs'] incentives and ability to invest **[*26]** in research and development." (Alcon Mem. in Supp. at 23.) These injuries, like Plaintiffs' claimed constitutional injuries, rely on Plaintiffs' speculation, both as to the monetary amounts of such injuries, and how *section 905.1* will be enforced. Such hypothetical injuries are insufficient to constitute irreparable harm. See *Goldammer v. Fay, 326 F.2d 268, 270 (10th Cir. 1964)* ("Injunction is a drastic remedy to be exercised with caution, and should be granted only is cases where the necessity therefore is clearly established."); *Voile Mfg. Corp. v. Dandurand, 551 F. Supp. 2d 1301, 1307 (D. Utah 2008)* (holding that a "probable loss in market share" was not the type of damage that amounts to irreparable harm). Accordingly, the court concludes that Plaintiffs have failed to meet their burden of establishing irreparable harm.

3. The Balance of Hardships & Public Interest

Finally, the balance of hardships and public interest factors also weigh against granting a preliminary injunction in this case. Utah's ability "to enact and enforce measures it deems to be in the public interest is [] an equity to be considered in the balance of hardships." *Heideman, 348 F.3d at 1191*. Entering an injunction in this case would prevent enforcement of a law that the Utah Legislature determined was necessary to protect consumers and promote free competition in the **[*27]** retail market for contact lenses. Indeed, according to Costco, the UPPs have forced Costco "to raise contact lens prices by as much as 35%, while undermining Costco Wholesale's business model, reducing product choice, foreclosing retail competition, and damaging its goodwill." (Costco Opp'n at 16.) In contrast, as the court has previously explained, any alleged harm to Plaintiffs is speculative.

Similarly, although Plaintiffs appeal to the public interest of upholding the Constitution as a basis for granting the preliminary injunction, as explained by the court more fully above, Plaintiffs have failed to persuade the court that they are likely to succeed on their claim that *section 905.1* is, in fact, unconstitutional.

Section 905.1 was enacted by the elected representatives of the people of Utah after a determination that it was in their best interest. See *Utah Gospel Mission v. Salt Lake City Corp., 316 F. Supp. 2d 1201, 1223 (D. Utah 2004)*, aff'd, *425 F.3d 1249 (10th Cir. 2005)* (denying motion for preliminary injunction and finding public interest would be impaired because it would "undermine the public process by nullifying the decision . . . [by] elected officials. The [democratic] process . . . was extensive, time consuming, very public and often wrenching and divisive. A compromise was reached through democratic means, **[*28]** and it would not be in the public interest to set this process aside."). After extensive public hearings and legislative debates, wherein Plaintiffs were provided a fair opportunity to present their positions, the people of Utah chose to enact *section 905.1* to eliminate price fixing in favor of free competition.

For these reasons, Plaintiffs have failed to satisfy the court that enjoining *section 905.1* would be in the best interests of the public.

CONCLUSION

Based on the foregoing, Plaintiffs' consolidated motions for preliminary injunction are DENIED. Plaintiffs have failed to satisfy the court that they have met the requirements for a preliminary injunction. Specifically and significantly, the court is not persuaded at this stage in the litigation that the Plaintiffs are likely to succeed on the merits.

Dated this 11th day of May, 2015.

Opinion

[*1179] ORDER DENYING PLAINTIFFS' MOTION FOR A PRELIMINARY INJUNCTION; ORDER DENYING DEFENDANT'S MOTION TO STRIKE

Plaintiffs American Hotel & Lodging Association and Asian American Hotel Owners Association ("Hotel Associations" or "Hotels" **[**2]** or "Plaintiffs") have filed a motion for a preliminary injunction (Dkt. No. 23), seeking an order staying the effective date and enjoining the enforcement of a Los Angeles minimum wage ordinance on the ground that it is preempted by the *National Labor Relations Act*.

There has been no shortage of briefing on this motion. Defendant City of Los Angeles ("City") and Defendant-in-Intervention UNITE HERE Local 11 ("Local 11") (collectively "Defendants") filed opposition briefs, as well as a supplemental brief to notify the Court of a recently decided case from the Second Circuit on a similar issue. (Dkt. Nos. 56, 76, 82.) Plaintiffs filed reply briefs, including an objection and response to Defendants' supplemental brief. (Dkt. No. 71, 81, 84.) The United States Chamber of Commerce and the Coalition for a Democratic Workplace filed a brief as amici curiae in support of Plaintiff' preliminary injunction motion. (Dkt. No. 78.)

Separately, the City filed objections to the evidence submitted in support of Plaintiffs' pending motion (Dkt. No. 60), as well as a motion to strike the same evidence addressed in the objections. (Dkt. No. 62.) Plaintiffs filed a response to the objections (Dkt. No. 72) **[**3]** and a brief in opposition to the City's motion to strike. (Dkt. No. 68.) The City filed a reply brief in support of its motion to strike. (Dkt. No. 70.)

A lengthy hearing was held on April 6, 2015. Having considered the materials and argument submitted by the parties, and for the reasons indicated below, the Court hereby **DENIES** Plaintiffs' motion for a preliminary injunction. (Dkt. No. 23.)

I. BACKGROUND

At issue in this case is Los Angeles Ordinance No. 183241, Citywide Hotel Worker Minimum Wage Ordinance ("Wage Ordinance"), which the City passed in October 2014. (Dkt. No. 24, Azlin Decl., ¶ 2, Exhibit 1 ("WO").) The Wage Ordinance provides minimum wage and compensated time off protections for workers at large hotels (hotels with more than 150 rooms) in Los Angeles.

A. Prior Wage-Related Ordinances

The Wage Ordinance is not the first of its kind. In 1997, the City adopted a "living wage" ordinance, which mandates, among other things, that employers who employ airport workers and perform certain contract or subcontract work for the City pay their employees a minimum living wage (hereinafter referred to as the "Airport LWO") above and beyond that required by the then-state minimum wage. **[**4]** *See* L.A. Admin Code § 10.37 *et seq.; see also* Dkt. No. 57 City's Request for Judicial Notice ("City's RJN"), Exhibits 1-2.[1] **[*1180]** As of 2013, the Airport LWO required subject employers to pay their employees a minimum wage of $15.37 per hour if the

[1] The City seeks judicial notice of several Los Angeles ordinances and the corresponding administrative code sections that codify those ordinances. (Dkt. No. 57, City's RJN, Exhibits 1-6.) Under *Federal Rule of Evidence 201*, a court may take judicial notice of laws, regulations, and rules because they are matters of public records and therefore "not subject to reasonable dispute in that [they are] capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned." *See* *Santa Monica Food Not Bombs v. City of Santa Monica, 450 F.3d 1022, 1025 n.2 (9th Cir. 2006)* (quoting *Fed. R. Evid. 201*). The Court grants the City's unopposed request with respect to RJN Exhibits 1-7.

employer offered no fringe benefits or $10.71 per hour if fringe benefits were valued at least $4.67 per hour. (Mohrfeld Decl. ¶ 16.)[2]

In 2006 and 2007, the City adopted two ordinances regulating large hotels in the "LAX Corridor," a stretch of Century Boulevard near the Los Angeles International Airport.[3] In 2006, the City enacted the Hotel Service Charge Reform Ordinance ("Service Charge Ordinance"), Ordinance No. 178084, which "require[d] LAX-area hotels to pass along service charges to those hotel service workers who actually rendered the services for which the charges are collected." (City's RJN, Exhibits 3-4.) The ordinance was passed following the City's determination that service workers had experienced decreased income as a result of hotel customers assuming that mandatory service charges are paid to the workers and therefore opting not to leave gratuities.

In 2007, the City passed the Airport Hospitality Zone Enhancement Ordinance ("AHZE Ordinance"), **[**6]** Ordinance No. 178432, which included a living-wage provision that established minimum wages for employees of covered hotels. (City's RJN, Exhibits 5-6.) As of 2013, the AHZE Ordinance living wage was $11.03 per hour if the employer provided fringe benefits valued at $1.25 per hour, or $12.28 per hour if the employer provided no fringe benefits.[4] (Mohrfeld Decl. ¶¶ 15-16.)

B. Events Leading up to the Passage of Wage Ordinance

On February 18, 2014, several Los Angeles City councilmembers made a motion to secure a study and provide for public input of the Citywide economic impacts of imposing a living wage of $15.37 per hour for hotel employees at hotels with more than 100 rooms. (Dkt. No. 58, Dickinson Decl., ¶ 5, Exhibit 2.)

The City commissioned Blue Sky Consulting Group to conduct the study, which was completed and delivered to the City in June 2014. (*Id. at ¶ 6*, Exhibit 3.) Blue Sky's executive summary explained that while an increased minimum wage would increase hotel workers' wages, only a fraction of those increased wages would be spent within city limits (thereby benefitting **[*1181]** the economy), and any benefits to the increased minimum wage would be offset by the detriments to the economy:

> [I]n response to the minimum wage increase, hotel profits would likely decline, and so too would the value of existing hotels; some hotels might be forced to sell or otherwise restructure their investments. Hotel owners would also seek ways to minimize the effects of a minimum wage increase, but most of the Los Angeles hotels subject to the **[**8]** new requirement would be limited in their ability to pass along any increased labor costs in the form of higher room rates. The result would therefore likely be reductions in staffing levels and reductions in certain purchases of goods and services in the local economy. Both of these effects would lead to reductions in

---

[2] In 2012, an LAX contractor sued the City, alleging, among other things, that the Airport LWO was preempted by the federal *Railway Labor Act*, among other claims. The district court rejected the plaintiff's preemption theory and granted summary judgment in favor **[**5]** of the City. *See* *Calop Bus. Sys., Inc. v. City of Los Angeles, 984 F. Supp. 2d 981, 990 (C.D. Cal. 2013)* (Ninth Circuit appeal pending).

[3] These ordinances define terms like "Hotel," "Hotel Employer," "Hotel Worker," and "Service Charges," and the ordinances include exemptions for collective bargaining agreements. The definitions and collective bargaining exemptions are identical to those included in the Wage Ordinance at issue in this case and are reproduced below.

[4] In 2008, an airport hotel subject to the AHZE Ordinance filed a lawsuit, arguing among other things that the ordinance was preempted under the *National Labor Relations Act*. The district court granted the City's motion to dismiss, holding that the ordinance was not preempted because it "simply set[] the rate of the 'living wage' and then allow[ed] the hotels to enter into a collective bargaining agreement if they wish[ed to do so]. The [ordinance imposed] no restrictions on the terms of the collective bargaining agreement [but rather] allowed a collective bargaining agreement to set wages at a rate higher or lower than the wage set by the Ordinance." *Fortuna Enterprises, L.P. v. City of Los Angeles, 673 F. Supp. 2d 1000, 1005-06 (C.D. Cal. 2008)*. The *Fortuna* plaintiff initially appealed the district court's order, but the appeal was voluntarily dismissed pursuant to a stipulation by the parties. *See id.*, No. CV 08-4373 **[**7]** SVW (MANx) at docket entry 32.

> economic activity which would at least partially offset any gains in economic activity generated by increased spending by those hotel workers who received a raise under the policy.

(*Id.*) The City also received several reports and comment letters from members of the public and interested parties regarding the proposed minimum wage, many of which expressed strong opposition to the proposal. (*Id. at ¶ 7*, Exhibit 4.) These reports and letters were submitted to the City before Blue Sky completed its report, and Blue Sky considered them in its analysis. (*Id.*)

The City then asked three economist firms — PFK Consulting, Economic Roundtable, and Beacon Economics — to analyze the economic impact of the proposed hotel workers minimum wage. In September 2014, the City Economic Development Committee prepared a report, summarizing the firms' findings. (*Id. at ¶ 10*, Exhibit 7.) PFK Consulting **[**9]** concluded that while the minimum wage increase would positively impact hotel employees, there would be a negative impact on hotels that would have to compensate for the higher wages by cutting costs and reducing operations and a negative impact on hotel employees who might, as a result, be laid off or have their hours reduced. Beacon Economics concluded that the minimum wage ordinance would result in job losses and questioned whether the proposed wage ordinance was the appropriate method for improving wages. Economic Roundtable concluded that the minimum wage ordinance is a prudent method to raise wages for hotel workers, who are some of the lowest paid workers in Los Angeles. The City Economic Development Committee's report also summarized the public comments on the proposed minimum wage ordinance, which included concerns that the minimum wage ordinance would disproportionately affect smaller hotels, that food and beverage operators within hotels would be at a competitive disadvantage to similar operations outside of hotels, and that hotels and hotel employees would be negatively impacted by reduced operations, employee layoffs, and possible closure as a result of absorbing the higher **[**10]** wage costs. Despite these negative concerns, the Economic Development Committee recommended that the City adopt the Wage Ordinance (subject to an amendment that the ordinance only apply to hotels with 150 rooms or more), largely because the increased wage rate would positively affect thousands of hotel employees and their families. (*Id.*)

Having considered the input from the public and interested parties, as well as the various consulting and economist firms, the City Council adopted the Wage Ordinance and signed the final version into law in October 2014. (*Id. at ¶ 11*, Exhibit 8.)

C. Local 11's Current Role as the Only Union for Hotel Workers in Los Angeles

Currently, Local 11 is the only union representative for hotel workers in Los **[*1182]** Angeles, and Local 11 has a practice of organizing hotel workers only when the employer consents to card-check recognition and "neutrality" agreements. (*See, e.g.*, Dkt. No. 37, Wlodkowski Decl. ¶ 16; Dkt. No. 28, Gleason Decl. ¶¶ 26-27.) In its most basic form, a neutrality agreement involves an employer's agreement to remain neutral during the union campaign and election process, *i.e.*, neither encouraging nor discouraging employees to unionize, despite the **[**11]** employer's right under federal labor law to speak out for or against unionization. A card-check recognition agreement involves an employer's agreement to forego its right under the *National Labor Relations Act* to demand an NLRB-sponsored secret ballot election and instead voluntarily recognize the union so long as a majority of the bargaining unit employees sign union authorization cards. (*See generally* Dkt. No. 26, Eigen Decl. ¶¶ 38-46.)

Local 11 concededly lobbied for the passage of the Wage Ordinance. (Dkt. No. 76, Local 11 Opp. at 2-3; *see also* Dkt. No. 25, Mohrfeld Decl. ¶¶ 12-13.)

D. Substantive Terms of the Wage Ordinance

1. Stated purpose

The City's official stated purpose for passing the Wage Ordinance is to promote "an employment environment that protects government resources," and to promote "the health, safety and welfare of thousands of hotel workers by ensuring they receive decent compensation for the work they perform." (WO at 1-2.) Specifically, the Wage Ordinance provides:

> The City has made significant financial investments to create a climate that has allowed the hospitality industry to thrive in Los Angeles. . . . Because hotels receive benefits from City assets and investments **[**12]** and because the City and its tourist industry benefit from hotels with experienced and content workers with low turnover, it is fair and reasonable that hotels pay their employees a fair wage. . . .
> 43 percent of the people who work in hotels in Los Angeles earn wages that put them below the federal poverty line. Wages paid to hotel employees are economically restrictive and prevent many hospitality employees from exercising purchasing power at local businesses, which takes a toll on the local economy. . . . [T]he City has an interest in promoting an employment environment that protects government resources. In requiring the payment of a higher minimum wage [to hotel workers], this article benefits that interest.
> . . .
> Income equality is one of the most pressing economic, social and civil rights issues facing Los Angeles. By proceeding incrementally and applying a minimum wage to hotel workers at larger hotels . . . the City seeks to promote the health, safety and welfare of thousands of hotel workers by ensuring they receive decent compensation for the work they perform.
>
> A large hotel, one containing more than 150 rooms, is in a better position to absorb the cost of paying living wages to **[**13]** its employees and also to absorb costs without layoffs.

(*Id.*)

2. Relevant definitions

The Wage Ordinance contains the following definitions that are relevant to the Court's analysis:

> **"Hotel"** means a residential building that is designated or used for lodging and other related services for the public, and containing 150 or more guest rooms, or suites of rooms (adjoining rooms do not constitute a suite of rooms).
>
> **[*1183] "Hotel Employer"** means a Person who owns, controls and/or operates a Hotel in the City, or a Person who owns, controls and/or operates any contracted, leased, or sublet premises connected to or operated in conjunction with the Hotel's purpose, or a Person who provides services at the Hotel.
>
> **"Hotel Worker"** means any individual whose primary place of employment is at one or more Hotels and who is employed directly by the Hotel Employer, or by a Person who has contracted with the Hotel Employer to provide services at the Hotel. "Hotel Worker" does not include a managerial, supervisory, or confidential employee. . . .
>
> **"Service Charge"** means all separately-designated amounts, regardless of name or label, collected by a Hotel Employer from a customer for service by Hotel Workers, or described **[**14]** in such a way that customers might reasonably believe that the amounts are for the service including, but not limited to those charges designated on receipts under the term "service charge," "delivery charge" or "porterage charge."

(*Id.* at 3-4.)

3. Substantive terms

The substantive terms of the Wage Ordinance relevant to the instant motion are the minimum wage and service-charge pass-through provisions, as well as the exemption and waiver provisions for collective bargaining agreements.

Minimum Wage. The minimum wage provision requires Hotels to pay Hotel Workers a minimum wage of $15.37 per hour, to be adjusted annually, "not including gratuities, Service Charge distributions or bonuses," and not including any off-sets for employer fringe-benefit contributions. (*Id.* at 4.) The wage provision is set to go into effect on July 1, 2015 for Hotels with 300 rooms or more and on July 1, 2016 for Hotels with 150 rooms or more. (*Id.* at 6.)

Service-Charge Pass-Through. The service-charge provision requires Hotel Employers to pay Service Charges in their entirety to the "Hotel Worker(s) performing services for the customers from whom the Service Charges are collected." (*Id.*) Hotel Employers are further required to pay the **[**15]** Hotel Worker(s) "equitably and according to the services that are related to the description of the Service Charges given . . . to the customer." (*Id.*)

Enforcement Provision. The Wage Ordinance includes a private right of action for Hotel Workers alleging violations of the ordinance and allows recovery of treble damages, attorney's fees, and costs. (*Id.* at 7-8.)

Exemption for Collective Bargaining Agreements. The Wage Ordinance includes an exemption for Hotel Workers whose employment is covered by a collective bargaining agreement:

> All of the provisions of this article, or any part of this article, may be waived in a bona fide collective bargaining agreement, but only if the waiver is explicitly set forth in that agreement in clear and unambiguous terms. Unilateral implementation of terms and conditions of employment by either party to a collective bargaining relationship shall not constitute or be permitted as a waiver . . . .

(*Id.* at 8.)

One-Year Waiver for Certain Hotel Employers. The Wage Ordinance provides that it is "not intended to cause reduction in employment or work hours for Hotel Workers." (*Id.*) Accordingly, Hotel Employers can obtain one-year waivers from the Wage Ordinance with a showing that **[**16]** compliance would force the employer, "in order to avoid bankruptcy or a shutdown of the Hotel, to reduce its workforce by more than 20 percent or curtail its **[*1184]** Hotel Workers' total hours by more than 30 percent." (*Id.*)

4. Instant motion for a preliminary injunction

The Hotel Associations seek an order staying the effective date and enjoining the enforcement of the Wage Ordinance on the sole ground that it is preempted by the *National Labor Relations Act*. According to Plaintiffs, the ordinance interferes with collective bargaining, union organizing, and labor relations at all Los Angeles hotels subject to the ordinance by "improperly aid[ing]" Local 11 in its efforts to organize employees at non-union hotels, and disrupting the balance of economic power between Local 11 and unionized hotels by giving the union an economic weapon for which it would otherwise have to bargain. Thus, Plaintiffs argue, the Wage Ordinance is preempted because it improperly regulates a zone of activity that Congress intended to leave unregulated and subject to the free play of economic forces. (Dkt. No. 23, Mot. at 1.)

II. LEGAL STANDARD

"A preliminary injunction is an extraordinary and drastic remedy." *Pom Wonderful LLC v. Hubbard, 775 F.3d 1118, 1124 (9th Cir. 2014)* (quoting *Munaf v. Geren, 553 U.S. 674, 689, 128 S. Ct. 2207, 171 L. Ed. 2d 1 (2008))*. To obtain **[**17]** a preliminary injunction, a plaintiff "must establish that he is likely to succeed on the merits, that he is likely to suffer irreparable harm in the absence of preliminary relief, that the balance of hardships tips in his favor, and that an injunction is in the public interest." *Winter v. Natural Res. Defense Council, Inc., 555 U.S. 7, 20, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*; *Marlyn Nutraceuticals, Inc. v. Mucos Pharma GmbH & Co., 571 F.3d 873, 877 (9th Cir. 2009)*. The *Winter* factors are considered in conjunction with the Ninth Circuit's "sliding scale" approach, which provides that "the elements of the preliminary injunction test are balanced, so that a stronger showing of one element may offset a weaker showing of another." *Vanguard Outdoor, LLC v. City of Los Angeles, 648 F.3d 737, 739 (9th Cir. 2011)*.

"In one version of the 'sliding scale,' a preliminary injunction could issue where the likelihood of success is such that serious questions going to the merits were raised and the balance of hardships tips sharply in [plaintiff's] favor." *Id. at 740* (internal quotation marks omitted; brackets in original) (noting that the "serious questions" test survives *Winter*). Therefore, "serious questions going to the merits and a hardship balance that tips sharply in the plaintiff's favor can support issuance of an injunction, so long as the plaintiff also shows a likelihood of irreparable injury and that the injunction is in the public interest." *Id.* (internal **[**18]** quotation marks omitted).

III. DISCUSSION

A. Objections and Motion to Strike Plaintiffs' Evidence

The City objected to and moved to strike nearly every aspect of every piece of evidence submitted by the Plaintiffs in support of the pending motion. (Dkt. Nos. 60, 62.) The objections generally concern standard evidentiary issues, such as hearsay, foundation, improper opinion, personal knowledge, speculation, and relevance. To cover their bases, Plaintiffs submitted lengthy responses, spanning hundreds of pages, to the City's objections and motion to strike. (Dkt. Nos. 68, 72.)

It is well established that trial courts can consider otherwise inadmissible evidence in deciding whether to issue a preliminary injunction. *See* *Univ. of Texas v. Camenisch, 451 U.S. 390, 395, 101 S. Ct. 1830, 68 L. Ed. 2d 175 (1981)* ("[A] preliminary injunction is customarily **[*1185]** granted on the basis of procedures that are less formal and evidence that is less complete than in a trial on the merits"); *Flynt Distributing Co. v. Harvey, 734 F.2d 1389, 1394 (9th Cir. 1984)* ("The urgency of obtaining a preliminary injunction necessitates a prompt determination and makes it difficult to obtain affidavits from persons who would be competent to testify at trial. The trial court may give even inadmissible evidence some weight, when to do so serves the purpose of preventing irreparable **[**19]** harm before trial"). "Indeed, district courts have considerable discretion to consider otherwise inadmissible evidence when ruling on the merits of an application for a preliminary injunction." *Garcia v. Green Fleet Sys., LLC, 2014 U.S. Dist. LEXIS 168196, 2014 WL 5343814, *5 (C.D. Cal. Oct. 10, 2014)* (citing *Flynt, 734 F.2d at 1394*; *Republic of the Philippines v. Marcos, 862 F.2d 1355, 1363 (9th Cir. 1988)* (observing that the rules of evidence do not strictly apply to preliminary injunction proceedings)). While district courts may consider inadmissible evidence in the context of a preliminary injunction, this does not mean that evidentiary issues have no relevance to this proceeding. Such issues, however, properly go to weight rather than admissibility. *Id.*

The Court has reviewed each of the City's objections and Plaintiffs' responses. The Court finds the City's objections largely to be "boilerplate recitations of evidentiary principles or blanket objections without analysis." *Capitol Records, LLC v. BlueBeat, Inc., 765 F. Supp. 2d 1198, 1200 n.1 (C.D. Cal. 2010)*. Thus, it would be both "unnecessary and impractical" for the Court "to methodically scrutinize each objection and give a full analysis of each argument raised." *Id.* Accordingly, and in light of the relaxed evidentiary standard at this stage in the proceedings, the Court summarily holds that evidentiary objections inconsistent with this ruling and/or not discussed in the text of this order are **OVERRULED**. All **[**20]** other objections are **SUSTAINED**. The City's motion to strike (Dkt. No. 62) is **DENIED** as moot, as it is duplicative in substance to the City's objections and largely overlaps with the legal arguments made in the City's opposition brief.

The Court now turns to the substance of Plaintiffs' motion for a preliminary injunction.

B. Plaintiffs Have Not Shown a Likelihood of Success On the Merits

1. *Machinists* preemption

Two preemption doctrines carry out the federal labor policy that Congress created when it passed the *National Labor Relations Act ("NLRA")*. The first doctrine is known as *Garmon* preemption, *see* *San Diego Bldg. Trades Council v. Garmon, 359 U.S. 236, 79 S. Ct. 773, 3 L. Ed. 2d 775 (1959)*, which "is intended to preclude state interference with the National Labor Relations Board's interpretation and active enforcement of the integrated scheme of regulation established by the *NLRA*." *Golden State Transit Corp. v. City of Los Angeles, 475 U.S. 608, 613, 106 S. Ct. 1395, 89 L. Ed. 2d 616 (1986)* (quotations omitted); *Dillingham Const. N.A., Inc. v. County of Sonoma, 190 F.3d 1034, 1041 (9th Cir. 1999)* ("[*Garmon]* preempts state laws that attempt to regulate conduct [that] is either arguably protected or prohibited by the *NLRA*.").

The second doctrine, *Machinists* preemption, is at issue in this case. *See* *Machinists v. Wisconsin Employment Relations Comm'n, 427 U.S. 132, 140, 96 S. Ct. 2548, 49 L. Ed. 2d 396 (1976)*. *Machinists* prohibits states from regulating conduct that Congress intended to be "controlled by the free play of economic forces." *Id.* ("[In enacting the *NLRA*], Congress **[**21]** struck a balance of protection, prohibition, and laissez-faire in respect to union **[*1186]** organization, collective bargaining, and labor disputes"); *Dillingham, 190 F.3d at 1038* ("Under the *Machinists* preemption doctrine, the *NLRA* preempts state laws and state causes of action that regulate activity Congress intended to leave unregulated."). "States are therefore prohibited from imposing additional restrictions on economic weapons of self-help, such as strikes or lockouts, unless such restrictions presumably were contemplated by Congress." *Golden State Transit Corp., 475 U.S. at 614-15* (citations omitted). "Whether self-help economic activities are employed by employer or union, the crucial inquiry regarding pre-emption is the same: whether 'the exercise of plenary state authority to curtail or entirely prohibit self-help would frustrate effective implementation of the Act's processes.'" *Id.* Thus, *Machinists* preemption "turns on the actual content of [the ordinance] and its real effect on federal rights." *Chamber of Commerce of the United States v. Brown ("Brown"), 554 U.S. 60, 69, 128 S. Ct. 2408, 171 L. Ed. 2d 264 (2008)* (quoting *Livadas v. Bradshaw, 512 U.S. 107, 119, 114 S. Ct. 2068, 129 L. Ed. 2d 93 (1994))*.

2. Application of *Machinists* to the Wage Ordinance

Plaintiffs argue that — with one exception — the Wage Ordinance is preempted not because of any single provision but based on how various **[**22]** provisions of the ordinance interact with one another. In summary fashion, Plaintiffs argue the following provisions and their effects render the Wage Ordinance preempted.

- The $15.37 per hour minimum wage provision — which does not include gratuities, service charge distributions, bonuses, or off-sets for fringebenefit contributions — is so onerous that it is not the type of "minimum" labor standard contemplated by *Machinists* case law. (Mot. at 14; Reply to City's Opp. at 10.)
- The minimum wage provision's onerous dollar amount is augmented by its disregard of the hotel industry's distinction between tipped and nontipped employees, which creates exceedingly costly compensation schemes inconsistent with hotel economies and in effect requires hotels to increase compensation for their most highly compensated employees who already earn more than $15.37 per hour. (Mot. at 5; Reply to City's Opp. at 11.)
- The waiver provision empowers unions to waive the Wage Ordinance's economically "onerous" wage requirements, while affirmatively denying non-union employees that same option. (Mot. at 4-5; Reply to City's Opp. at 11.)

- The provision banning "unilateral implementation" of a collective bargaining **[**23]** agreement's terms disrupts the balance of economic power as contemplated under federal labor law.[5] (Mot. at 17-18; Reply to City's Opp. at 11.)

---

[5] Plaintiffs assert that this provision — the ban on unilateral implementation — in and of itself renders the Wage Ordinance preempted under the *Machinists* doctrine.

- By virtue of the aforementioned provisions, the Wage Ordinance purportedly "exerts extraordinary economic pressure" on non-union hotels to accept union demands for card-check recognition and neutrality agreements. (Mot. at 7, 13; Reply to City's Opp. at 11.)

At the April 6, 2015 hearing, the Plaintiffs again emphasized that the Court should not conduct the *Machinists* preemption analysis by looking at the Wage **[*1187]** Ordinance provisions individually but instead should only consider how the various provisions, in the aggregate, interact with one another. While the Court agrees that the preemption analysis requires consideration of how the various provisions work together, the analysis ends (but does not begin) with this consideration. Rather, because the so-called "whole" of the Wage Ordinance is no greater than the sum of its "parts," the Court first considers each of the purported problematic **[**24]** provisions and then considers whether, in the aggregate, those provisions interact in a way that compels preemption.

3. $15.37 per hour minimum wage provision

The parties agree that minimum labor standards are not subject to *Machinists* preemption, so long as they are laws of general applicability (affecting union and nonunion employees alike), and they neither encourage nor discourage collective bargaining or self-organizing. (Mot. at 21; City Opp. at 10-12; Local 11 Opp. at 7.) The general principle that governments can pass minimum labor standards pursuant to their police power without running afoul of federal labor law was established in *Metropolitan Life Ins. Co. v. Massachusetts ("Metropolitan Life"), 471 U.S. 724, 105 S. Ct. 2380, 85 L. Ed. 2d 728 (1985)*, and affirmed in *Fort Halifax Packing Co. v. Coyne ("Fort Halifax"), 482 U.S. 1, 107 S. Ct. 2211, 96 L. Ed. 2d 1 (1987)*. The Ninth Circuit has since held that in extreme cases, "substantive requirements could be so restrictive as to virtually dictate the results of the [collective bargaining and self-organizing process]." *Chamber of Commerce of U.S. v. Bragdon ("Bragdon"), 64 F.3d 497, 501 (9th Cir. 1995)*.

The instant motion for a preliminary injunction begs the obvious question that the Ninth Circuit left open in *Bragdon*: where does the Court draw the line for "extreme" cases? When **[**25]** does a substantive minimum labor standard in this case, a minimum wage provision — become so onerous and restrictive that it dictates what otherwise would be the result of the free-play of economic forces?

To answer this question, the Court turns to the basic principle of feasible economic alternatives and — to put a finer point on the guidance of *Bragdon* — holds that a minimum wage standard is not preempted so long as (1) paying the minimum wage and (2) entering into a collective bargaining agreement are both economically feasible, such that the parties have a meaningful choice as between the two alternatives. Under these circumstances, the substantive dollar amount of a minimum wage provision is not so onerous and extreme so as to virtually dictate what would otherwise be the result of the free-play of economic forces. Said another way — and at the risk of mixing metaphors — a minimum labor standard that simply "alters the playing field" does not compel preemption; but when a minimum labor standard not only "alters the playing field" but also "forces the hand" of one or both parties, then *Machinists* preemption applies. As articulated below, the Plaintiffs have failed to meet their **[**26]** burden that the Wage Ordinance's $15.37 per hour minimum wage is economically unfeasible, such that it deprives Hotel Employers from having a meaningful choice as between paying the minimum wage and entering into a collective bargaining agreement, thereby forcing the hand of non-union hotels to unionize.

Because the facts of *Metropolitan Life* and its progeny are central to the analysis, the Court begins with a review of the pertinent case law and then addresses Plaintiffs' various arguments.

[*1188] a. *Metropolitan Life*

In *Metropolitan Life*, the Supreme Court considered whether federal labor law preempted a Massachusetts law that required specific minimum mental-health care benefits to be provided under general insurance policies and employee healthcare plans. *471 U.S. at 727*. The Massachusetts Attorney General brought an enforcement action against an insurance company. The insurance company argued as a defense that the state law was preempted because "welfare benefits are a mandatory subject of bargaining" under federal labor law, and the law at issue would affect the terms of subsequent collective bargaining agreements between employers and employees. Id. at 751-52. The Supreme Court rejected the defendant's argument **[**27]** and held that regulations "establishing minimum terms of employment" are not preempted under Machinists. Id. at 754. The Supreme Court explained:

> The evil Congress was addressing [in passing the NLRA] was entirely unrelated to local or federal regulation establishing minimum terms of employment. Neither inequality of bargaining power nor the resultant depressed wage rates were thought to result from the choice between having terms of employment set by public law or having them set by private agreement. No incompatibility exists, therefore, between [the NLRA] and state or federal legislation that imposes minimal substantive requirements on contract terms negotiated between parties to labor agreements, at least so long as the purpose of the state legislation is not incompatible with these general goals of the NLRA.

Id. at 754-55. Thus, because the Massachusetts law affected union and non-union employees equally and neither encouraged nor discouraged collective bargaining and the right to self-organization, the Supreme Court held that the Massachusetts law survived *Machinists* preemption. Id. at 755.

b. *Fort Halifax*

Two years after deciding *Metropolitan Life*, the Supreme Court again considered the issue in Fort Halifax, 482 U.S. 1, 107 S. Ct. 2211, 96 L. Ed. 2d 1 (1987). *Fort Halifax* involved **[**28]** a Maine statute that required employers to provide a one-time severance payment to processing plant employees when a subject plant closed in the state. Id. at 4. Subject employers were exempt from the statute's severance requirements if an affected employee was covered by an "express contract providing for severance pay." Id. at 4 n.1. In defending an enforcement suit by former employees and state officials, the defendant processing plant argued that the severance statute was preempted on the grounds that the law "intrudes on the bargaining activities of the parties because the prospect of a statutory obligation undercuts an employer's ability to withstand a union's demand for severance pay." Id. at 20. The Supreme Court again rejected this preemption argument:

> This argument — that a State's establishment of minimum substantive labor standards undercuts collective bargaining — was considered and rejected in [*Metropolitan Life*]. . . . It is true that the Maine statute gives employees something for which they otherwise might have to bargain. That is true, however, with regard to *any* state law that substantively regulates employment conditions.

Id. at 20-21 (citations omitted) (emphasis added). The Supreme Court explained **[**29]** that employers and employees come to the bargaining table with state law rights that form a "backdrop" for their negotiations. Id. at 21. Absent a collective-bargaining **[*1189]** agreement, "state common law generally permits an employer to run the work-place as it wishes," and the "employer enjoys this authority *without* having to bargain for it." Id. at 21 (emphasis added). The parties are free to negotiate around the state law backdrop, but "if impasse is reached, [then] the employer may rely on pre-existing state law to justify its authority to make employment decisions. . . ." Id. "[T]he mere fact that a state statute pertains to matters over which the parties are free to bargain cannot support a claim of pre-emption, for there is nothing in the NLRA which expressly forecloses all state regulatory power with respect to those issues that may be the subject of collective bargaining." *Id.* (internal quotation marks, citations, and alterations omitted).

The *Fort Halifax* defendant sought, unsuccessfully, to distinguish the Maine severance statute from the Massachusetts mental-health care insurance statute in *Metropolitan Life*, arguing that the severance statute was not a "genuine minimum labor standard" because **[**30]** it only applied in the absence of an agreement covering severance pay. Id. at 22. The Supreme Court flatly rejected this argument:

> The fact that the parties are free to devise their own severance pay arrangements . . . *strengthens* the case that the statute works no intrusion on collective bargaining. Maine has sought to balance the desirability of a particular substantive labor standard against the right of self-determination regarding the terms and conditions

> of employment. If a statute that permits no collective bargaining on a subject escapes NLRA pre-emption, *see Metropolitan Life*, surely one that permits such bargaining cannot be pre-empted.

Id. (emphasis added). Thus, the Supreme Court held, the severance statute was not preempted but a "valid and unexceptional exercise of the State's police power." *Id.*

In this case, the Hotel Associations argue that the statutes at issue in *Metropolitan Life* (mental-health care benefits) and *Fort Halifax* (severance pay) were upheld not because they were minimum labor standards but rather because, as a result of their being *minimal* requirements, they did not actually interfere with collective bargaining. (Mot. at 20-24; Reply to City's Opp. at 11.) Here, **[**31]** in contrast (the Plaintiffs' argument goes), the wage provision is 70% higher than the current California minimum wage of $9 per hour, and therefore it is not the type of "minimum" standard contemplated by *Metropolitan Life* and *Fort Halifax*. (Mot. at 14.) To support their argument, the Hotel Associations direct the Court to *Bragdon, 64 F.3d 497 (9th Cir. 1995)*.

c. *Bragdon* and *Fortuna*

In *Bragdon*, the Ninth Circuit held that the *Machinists* doctrine preempted a Contra Costa County ordinance that required construction employers to pay "prevailing wages" on certain private industrial construction projects. *Id. at 498*. The prevailing wage determination was made "by reference to established collective-bargaining agreements within the locality in which the public work [was] to be performed." *Id.* In analyzing whether the prevailing wage ordinance was "incompatible with the goals of the NLRA," the Ninth Circuit noted that while "minimal substantive requirements" are not subject to *Machinists* preemption (citing *Metropolitan Life)*, more onerous substantive requirements could affect the collective bargaining process:

> Viewed in the *extreme*, the substantive requirements could be so restrictive as to virtually dictate the results of the contract. **[**32]** The objective of allowing the bargaining process to be controlled by **[*1190]** the free-play of economic forces can be frustrated by the imposition of substantive requirements. . . . The question then becomes the extent of the substantive requirements that the state may impose on the bargaining process.

Id. at 501. In this context, the Ninth Circuit held that the prevailing wage ordinance was preempted because it "does much more than the type of state regulation that has previously been held not preempted." *Id.* Unlike minimum wage statutes, the prevailing wage concept was "derived from the combined collective bargaining of third parties in a particular locality." *Id. at 502*. The prevailing wage was neither a fixed statutory or regulatory minimum nor "the result of the bargaining of those employers and employees actually involved in the selected construction projects." *Id.* In this regard, the prevailing wage left employers with a false choice: in either scenario, employers could only ever pay a union bargained-for wage, and they were deprived of the freedom to choose something different.

Defendants argue that the Wage Ordinance is *not* an extreme case and direct the Court to the 2008 district court decision in **[**33]** *Fortuna*, which considered the applicability of *Bragdon* to the City's AHZE Ordinance, a regulation nearly identical to the Wage Ordinance at issue here. *Fortuna, 673 F. Supp. 2d 1000 (C.D. Cal. 2008)*. As mentioned above (*see supra* note 4), the AHZE Ordinance established a minimum wage for Hotel Workers in the LAX Corridor. In analyzing *Bragdon*, the *Fortuna* district court noted that "[f]irst, and most importantly," the AHZE Ordinance was distinguishable from the one at issue in *Bragdon* because the AHZE Ordinance was not a prevailing wage statute; "that is to say, it is not tied to collective bargaining agreements entered into by third parties." *Id. at 1009*. The *Fortuna* district court went on to explain:

> In *Bragdon*, the prevailing wage rate was determined by averaging the rates in collective bargaining agreements in the specific locality. As a result, employers were completely deprived of the ability to pay anything other than the rate that the few major unions had established in that locality. The employer either had to enter into a collective bargaining agreement and pay the collective bargaining rate, or it could pay the prevailing wage, which was determined with reference to collective bargaining agreements established between third parties. **[**34]** Thus, the employers were faced with two options without a distinction, and the end result was to completely eviscerate the purpose of collective bargaining negotiations.

Id. The AHZE Ordinance, in contrast, "is a fixed number that is not tied in any way to collective bargaining agreements between third parties. As a result, an employer can choose to pay the living wage, or it can enter into a collective bargaining agreement." *Id. at 1010*. The critical distinction from *Bragdon* is that in *Fortuna*, "the parties had the opportunity to negotiate freely," and thus "the substantive requirements of the [AHZE] Ordinance are not so 'restrictive as to virtually dictate the results of the contract,' as was the case in *Bragdon*." *Id.*

The *Fortuna* district court, while distinguishing *Bragdon* in substance, accepted the premise that there are "legitimate concerns" that employees and unions will petition the local government for localized ordinances in order to target individual businesses, which, in extreme cases, could result in ordinances "with such onerous terms that business owners are virtually forced to enter into a collective bargaining agreement in order to pay lower wages." *Id.* (quoting *Bragdon, 64 F.3d at 504*). The *Fortuna* ***[**35]*** district court held that the AHZE Ordinance was not such an extreme case because the minimum wage **[*1191]** was only a few dollars per hour more than the then-state minimum wage, and it provided an economic hardship exemption for hotels facing reduction in their workforces, reduction in hours, bankruptcy, or shut down. Thus, "the apparent intent of the [AHZE] Ordinance is not to strong-arm hotels into entering into collective bargaining agreements, but rather to provide a living wage to the extent that the hotels can afford to do so." *Id.*

d. Applying *Metropolitan Life* and its progeny to the Wage Ordinance at issue in this case, the $15.37 per hour minimum wage does not compel *Machinists* preemption

The only difference between the text of the AHZE Ordinance,[6] which the *Fortuna* district court upheld as not preempted, and the Wage Ordinance at issue here is the dollar amount of the minimum wage. The AHZE Ordinance was approximately $2 per hour over the then-state minimum wage, while the Wage Ordinance here is just over $6 per hour over the current state minimum wage. At the April 6, 2015 hearing, the Court posed the question to Plaintiffs' counsel: what about the $15.37 per hour dollar amount makes **[**36]** the minimum wage provision an extreme case that compels *Machinists* preemption? Plaintiffs' only response was that there is "no single line" to be drawn to identify extreme cases, and that the absence of a "line" is immaterial because the Court must consider the minimum wage provision in the context of the Wage Ordinance's other provisions, *i.e.*, the failure to distinguish between tipped and non-tipped employees, service-charge pass through restrictions, the union-waiver provision, and the ban on unilateral implementation. Plaintiffs' response is wholly insufficient.

A key point of Plaintiffs' preemption argument is that the $15.37 per hour wage provision is not the type of "minimum" standard contemplated by *Metropolitan Life* and *Fort Halifax* because the wage is so high. This necessarily requires the Court to consider the substantive dollar amount of the minimum wage provision and whether that dollar amount presents Hotel Employers with an economically feasible alternative to union organizing in order to determine how high is too high for purposes of *NLRA* preemption. By directing the Court's attention away from this critical question, Plaintiffs attempt to **[**37]** obfuscate the issue. Notably, Plaintiffs cannot identify a single case where any court held that a minimum labor standard was so onerous that it rendered the statute preempted.[7] This makes sense. Establishing preemption in this context is hard to do, and the Supreme Court has cautioned that "preemption should not be lightly inferred in this area, since the establishment of labor standards falls within the traditional police power of the State." *Fort Halifax, 482 U.S. at 21*. The Court ventures to guess that a minimum

[6] *See* City's RJN, Exhibits 5-6.

[7] In this regard, the distinction between cases involving substantive minimum labor standards, on the one hand, and cases involving statutes or regulations affecting labor relations, on the other hand, is both relevant and critical. *Compare, e.g., Brown, 554 U.S. 60, 128 S. Ct. 2408, 171 L. Ed. 2d 264 (2008)* (holding preempted two provisions of a California statute where the provisions precluded the use of state funds "to assist, promote, or deter union organizing"), *and Golden State Transit Corp., 475 U.S. at 611-12* (holding preempted the City of Los Angeles's decision to condition **[**38]** the renewal of a taxi cab franchise on the taxi cab company resolving a pending labor dispute with its union), *with Metropolitan Life, 471 U.S. 724, 105 S. Ct. 2380, 85 L. Ed. 2d 728* (holding not preempted a substantive minimum labor standard), *and Fort Halifax, 482 U.S. 1, 107 S. Ct. 2211, 96 L. Ed. 2d 1* (same).

wage standard would need to have a degree of outrageousness — an **[*1192]** amount that is completely arbitrary and has no rational basis with respect to its intended purpose — for it to be considered an extreme case that compels preemption.

For reasons similar to those articulated in the *Fortuna* decision, the Court finds that Plaintiffs have failed to satisfy their burden in establishing that the Wage Ordinance's $15.37 per hour minimum wage is so onerous that it is inconsistent with the legislative goals and purposes of the *NLRA* and therefore preempted. As with the AHZE Ordinance, the Wage Ordinance minimum wage provision is not tied in any way to third party agreements, and so a Hotel Employer can choose to pay the minimum wage, or it can enter into a collective bargaining agreement. Either way, the parties can "negotiate freely." *Fortuna, 673 F.Supp.2d at 1010*. That the Wage Ordinance changes the backdrop for the negotiations is not significant because that would be the case with respect to *any* change in the minimum wage dollar amount. *See* *Fort Halifax, 482 U.S. at 21*. Additionally, as with the AHZE Ordinance, the economic hardship exemption allows Hotel Employers to obtain relief from the Wage Ordinance if implementation of its terms would result in a 20% reduction of workforce or a **[**39]** 30% curtail in workers' hours, bankruptcy, or shut down. The hardship exemption, in essence, operates to give non-union Hotel Employers the necessary "out" before their compliance with $15.37 per hour minimum wage becomes so economically unfeasible as to compel preemption.

The Plaintiffs' own evidence disproves its preemption argument with respect to the Wage Ordinance's minimum wage provision. For example, in the declaration of Michael Wlodkowski — general manager for the Renaissance LAX, a non-union hotel in the LAX Corridor — Mr. Wlodkowski explains the economic impact of the hotel's prior compliance with the AHZE Ordinance beginning in 2007, as well as the anticipated economic impact of the hotel's compliance with the Wage Ordinance come July 1, 2015. (Dkt. No. 37, Wlodkowski Decl.) Because the Renaissance LAX does not have a collective bargaining relationship with any union, it was not and is not eligible for a waiver from the AHZE and Wage Ordinance's minimum wage provisions. Mr. Wlodkowski explains that the Renaissance LAX's estimated cost of compliance with the Wage Ordinance will be approximately $260,000 per year. (*Id. at ¶¶ 14, 19*.) This additional cost of compliance may **[**40]** put Renaissance LAX at a competitive disadvantage as compared to union hotels that are eligible for a waiver. (*Id. at ¶¶ 17-20*.) Critically, Mr. Wlodkowski's declaration suggests that Renaissance LAX will opt to absorb the economic cost of compliance rather than yield to Local 11 demands for card-check recognition and neutrality agreements. (*Id.*) Were Renaissance LAX to yield to Local 11's demands, the hotel would have a likely chance of unionizing (*see generally* Eigen Decl. ¶ 46), which in turn would make the hotel eligible for a Wage Ordinance waiver. Other declarations by representatives of nonunion Hotel Employers provide accounts that are similar to that of Renaissance LAX, *i.e.*, they concede that compliance with the Wage Ordinance's $15.37 per hour minimum wage, though undesirable, is economically feasible. (*See, e.g.*, Dkt. No. 29, Hannigan Decl. re Palomar Westwood; Dkt. No 30, Hsu Decl. re Hilton LAX Towers; Dkt. No. 32, Mora Decl. re LAX Courtyard Marriott; Dkt. No. 33, Roberts Decl. re Beverly Hills Crowne Plaza; Dkt. No. 34, Robey Decl. re Holiday Inn Torrance; Dkt. No. 35, Rowling Decl. re Omni Los Angeles; Dkt. No. 36, Stigter Decl. re Four Seasons; Dkt. No. 38, Zen Decl. **[**41]** re Holiday Inn Torrance.) Notably, none of the declarations provide that, as a result of the Wage Ordinance, any given non-union Hotel Employer will be forced to (*i.e.*, it **[*1193]** will have no other option but to) yield to Local 11's demands for card-check recognition and neutrality agreement.

Plaintiff's biggest concern with the $15.37 per hour minimum wage provision is that it is bad economic policy.[8] There are certainly grounds for this concern. More than one of the City's own economic consultants opined that the $15.37 per hour minimum wage would have detrimental effects on the economy. And, as stated above, the gravamen of the hotel-representative declarations is that implementation of the minimum wage will have damaging effects on the non-union hotels' ability to compete in the marketplace. It takes little effort to realize that this policy discussion is not unique to hotel workers at large hotels in Los Angeles. Nearly every day, the Los Angeles Times and other local and national news outlets are reporting on efforts to implement significant city- and county-wide wage increases for *all* workers, not just hotel workers.[9] On April 14, 2015, hundreds of home health care workers

[8] At the April 6, 2015 hearing, Plaintiffs' counsel conceded the Hotel Associations made (and lost) an economic-policy argument to the legislature.

marched through **[**42]** downtown Los Angeles, rallying for a $15 per hour minimum wage.[10] On April 15, 2015, there were wide reports of nearly 1,000 fast-food workers, Wal-Mart employees, and union members in Los Angeles that joined nationwide protests, also calling for a $15 per hour minimum wage.[11] April 15, 2015 also marked the first day of a fifteen-day hunger strike held outside the Los Angeles City Hall designed to pressure City officials into approving a city-wide $15 per hour minimum wage.[12] On May 1, 2015, protesters **[*1194]** marched through downtown Los Angeles as part of an annual May Day rally, a main theme of which was a $15 per hour minimum wage.[13] The point is this: it is not the role of the courts to interject into matters of legislative economic policy under the guise of *NLRA* preemption, and Plaintiffs have not met their burden that the Wage Ordinance's $15.37 per hour minimum wage provision is anything but a permissible exercise of the City's power to institute such economic policy.

e. Plaintiffs' attempt to couch their *Machinists* preemption argument as anything but a facial challenge to the Wage Ordinance fails

The Hotel Associations argue that this case is distinguishable from *Fortuna* because in *Fortuna* the plaintiff asserted only a *facial* challenge to the AHZE Ordinance and conceded that state minimum labor standards are not subject to preemption; whereas here the Plaintiffs have provided the Court with a detailed factual record and make no "ill-advised concession as to blanket immunity from *Machinists* preemption. . . ." (Reply to City's Opp. at 15 n.7.) The Court does not see the logic in this argument. As an initial matter, the Court does not read *Fortuna* to suggest that the plaintiff made any sort of concession that minimum labor standards have blanket immunity from *Machinists* preemption. More importantly, however, any attempt to distinguish *Fortuna* as a "facial" challenge is a red herring. The nomenclature of a facial challenge — versus an as-applied one — simply **[**45]** implicates the two ways a court may declare a statute unconstitutional, *i.e.*: (1) the court may declare a statute invalid on its face, such that a

state may not enforce it under any circumstance; or (2) the court may find the statute unconstitutional as applied to a particular set of circumstances, allowing the state to enforce the statute in other circumstances. *See generally*, Michael C. Dorf, *Facial Challenges to State and Federal Statutes*, *46 Stan. L. Rev. 235, 236 (1994)*. Here, the Plaintiffs' seek an order enjoining the City from implementing and enforcing the Wage Ordinance under any circumstance, and therefore they indisputably assert a facial challenge against the Wage Ordinance.

That Plaintiffs submitted myriad declarations and other evidence in support of the instant motion (*see* Dkt. Nos. 24-38) does not change the analysis. To the extent these declarations are relevant to the analysis, they do not speak to the legal issue before the Court. For example, and as discussed above, each of the declarations provide detailed accounts of how implementation of the $15.37 per hour minimum wage will increase salary costs and may require the non-union Hotels to offset those costs — including by passing **[**46]** the costs on to customers through higher prices — in ways that make the non-union Hotels less competitive as compared to neighboring hotels that are either unionized (and therefore eligible for a waiver) or located outside the city limits (and therefore not subject to the Wage Ordinance). As a result, the declarants provide, any given non-union Hotel "could face economic pressure to strike a deal with the Union to obtain a waiver that will allow it to remain competitive in its market." (*See, e.g.*, Dkt No. 29, Hannigan Decl. ¶ 29.)[14] The problem with **[*1195]** these declarations is that similar statements could be made no matter what the dollar amount of the minimum wage, whether it is $2 per hour or $10 per hour over the current state minimum wage. Thus, the Plaintiffs have not satisfied their burden to show that the "difference in degree" as between the AHZE Ordinance minimum wage and the Wage Ordinance minimum wage amounts to a "difference in kind."

f. Local 11's role in lobbying [47] for the passage of the Wage Ordinance does not alter the analysis**

The Hotel Associations also attempt to capitalize on *Bragdon*'s warning that employees and unions may "seek to set minimum wage and benefit packages with political bodies," substituting "the free-play of political forces for the free-play of economic forces that was intended by the *NLRA*." *Bragdon, 64 F.3d at 504 (9th Cir. 1995)*. (*See* Reply to Local 11's Opp. at 8.) Plaintiffs make much of the fact that Local 11 lobbied the City Council in passing the Wage Ordinance, and that the Hotel Associations (and other third parties with aligned interests) were not given equal access during the legislative process. (*See, e.g.*, Mot. at 4.) To support their argument that Local 11's lobbying efforts are relevant to the preemption analysis, Plaintiffs direct the Court to the dissent in *Chamber of Commerce of U.S. v. Lockyer ("Lockyer"), 463 F.3d 1076, 1098 (9th Cir. 2006)* *rev'd sub nom.* *Chamber of Commerce of U.S. v. Brown, 554 U.S. 60, 128 S. Ct. 2408, 171 L. Ed. 2d 264 (2008)*. The Ninth Circuit's *Lockyer* dissent suggested that the entire assembly bill at issue (AB 1889) was preempted because it was "sponsored by the California Labor Federation, ALF-CIO, and supported by a phalanx of labor unions." *Id. at 1102* (Beezer, J. dissenting). Plaintiff's reliance on the *Lockyer* dissent is misplaced for at least three reasons. **[**48]** First (and most obviously), the *Lockyer* dissent is just that, a dissent, and therefore it is not now, and never has been, controlling authority on this Court. Second, as the Ninth Circuit's *Lockyer* majority pointed out, evidence of union sponsorship is an "irrelevant" consideration because it is "not up to [the courts] to impugn the California's legislature's motives." *Id. at 1097 n.21*; *see also* *Livadas, 512 U.S. at 120* (citing *Golden State Transit Corp., 475 U.S. at 613* (noting that the City's desire to remain "neutral" in labor dispute does not determine pre-emption)).[15] The *Lockyer* majority, thus, is consistent

---

[14] The Court has quoted the declaration of Robert Hannigan, Director of Operations for Hotel Palomar Westwood, only as an example. The other declarations by representatives for non-union Hotels provide similar accounts.

[15] The Court recognizes that Plaintiffs cite *Golden State* for the opposite point, *i.e.*, that legislative motive is in fact relevant to the preemption analysis. (*See* Reply to City's Opp. at 19.) Plaintiffs' reliance on *Golden State* for this proposition is misplaced. At issue in *Golden State* was not the legislature's motive in passing an otherwise facially neutral ordinance (as is the case here) but rather the undisputed fact that the City explicitly conditioned the renewal of a taxi cab franchise agreement on the employer settling a labor dispute with its union. The Supreme Court held that the City's threat to withhold the franchise renewal absent a resolution of the labor dispute encroached on the employer's "essential weapon of economic strength — the ability to wait out the strike." *Golden State Transit Corp., 475 U.S. at 611-12*; *see also* *id. at 615* (explaining that both parties were permissibly using economic weapons as a legitimate part of their collective-bargaining process — *e.g.*, the union striking at a time the City

with Plaintiffs' own position that NLRA preemption is determined by an analysis of the "actual content of [the ordinance] and its real effects on federal rights," (Mot. at 10 (quoting Brown, 554 U.S. at 69)), as opposed to any interest- **[*1196]** group lobbying efforts and/or the legislature's apparent motive in passing the ordinance. Finally, though the Supreme Court reversed the Ninth Circuit *Lockyer* majority — in effect agreeing with the general conclusion of the Ninth Circuit *Lockyer* dissent that the two statutory provisions were preempted — the Supreme Court's reasoning for doing so had nothing to do with the union's lobbying efforts in passing AB 1889 (these efforts were not mentioned **[**49]** at all in the opinion). Plaintiff's attempt to use the *Lockyer* dissent as persuasive authority that Local 11's lobbying efforts are somehow relevant to the preemption analysis falls short.

Accordingly, because Plaintiffs have not satisfied their burden that the $15.37 per hour minimum wage is anything but a valid exercise of the City's police power, the substantive dollar amount of the minimum wage provision, on its face, does not support a finding of *Machinists* preemption.

4. Failure to distinguish between tipped and non-tipped employees

In conjunction with their arguments regarding the Wage Ordinance's $15.37 per hour minimum wage, Plaintiffs make much of the fact that the ordinance fails to distinguish between tipped and non-tipped employees and does not permit Hotel Employers to include gratuities or Service Charges to the minimum wage calculation. (Mot. at 5, 14 (citing Dkt. No. 29, Hannigan Decl. ¶¶ 16-22; Dkt No. 35, Rowling Decl. ¶¶ 21-22.) Plaintiffs state that typically in the hotel industry (and presumably in other service industries), tipped employees receive lower hourly wages because, as a result of their tips, they **[**51]** are often the highest paid employees at hotels. In order to maintain this pay structure once the Wage Ordinance goes into effect, Hotel Employers may have to raise non-tipped employees' hourly wages significantly higher than the $15.37 per hour minimum wage, which in turn will result in "exceedingly costly compensation schemes inconsistent with hotel economies." (Mot. at 14.)

The response to this argument is simple. The California Labor Code prohibits the state and municipalities from establishing minimum wages that distinguish between tipped and non-tipped workers. Cal. Labor Code § 351; *see also* Henning v. Industrial Welfare Commission, 46 Cal.3d 1262, 1279, 252 Cal. Rptr. 278, 762 P.2d 442 (1988) (holding that a two-tier minimum wage provision is invalid because it "purports to allow an employer to pay a tipped employee a wage lower than he would be obligated to pay if the employee did not receive tips"). Plaintiffs do not dispute that California law prohibits the City from making such a distinction in setting minimum wages. Thus, Plaintiffs' argument here is really a nuanced version of Plaintiffs' argument discussed above, *i.e.*, that the dollar amount of the $15.37 per hour minimum wage is so onerous that it is not the type of minimum labor standard contemplated by *Metropolitan Life* and *Fort Halifax* **[**52]** . For the reasons articulated above (the Court will not repeat them here), this argument is without merit.

5. Waiver provision

The Hotel Associations next argue that giving unions the "exclusive" power to grant waivers of the Wage Ordinance's terms disrupts the balance of power between labor and management because it gives unions an "economic weapon" that the union would not otherwise have. (Mot. at 14.) The Hotel Associations further argue that because the ordinance does not automatically exempt hotels with collective bargaining agreements but instead requires parties to renegotiate their existing agreements to include the waiver, the ordinance **[*1197]** amounts to government "meddling" in collective bargaining. (*Id.*)

Plaintiffs' arguments regarding the waiver provision fall short. Exemptions for collective bargaining agreements with respect to any minimum labor standard are par for the course, as they are nearly guaranteed to be present in any labor-related statute. Plaintiffs' counsel conceded as much at the April 6, 2015 hearing. The Supreme Court has

---

was considering the franchise **[**50]** renewal, and the employer waiting out the strike in an attempt to obtain bargaining concessions — but that the bargaining process was "thwarted when the city in effect imposed a positive durational limit to the exercise of economic self-help").

made clear that the NLRA "cast[s] no doubt on the validity of these familiar and narrowly drawn opt-out provisions." Livadas, 512 U.S. at 132. It is simply "[not] plausible **[**53]** to suggest that Congress meant to pre-empt such opt-out laws as 'burdening' the statutory right of employees not to join unions by denying nonrepresented employees the 'benefit' of being able to 'contract out' of such standards. *Id.* at n.26; *see also* Babler Bros., Inc. v. Roberts, 995 F.2d 911, 915 (9th Cir. 1993) (applying the reasoning in *Fort Halifax* to find that a statute was not preempted where it exempted union employers from paying overtime wages). Further, the Ninth Circuit has rejected the argument that a collective bargaining agreement waiver is preempted simply because it may incentivize non-union employers to unionize. *See* Viceroy Gold Corp. v. Aubry, 75 F.3d 482 (9th Cir. 1996).

At issue in *Viceroy* was California Labor Code § 750 et seq., which set a maximum workday of eight hours for persons engaged in mining and smelting, unless the workers were covered by a valid collective bargaining agreement that "expressly provides for the wages, hours of work, and working conditions of the employees." Id. at 486. The employer, which operated a non-union facility, argued that the labor code was preempted because it put the facility "at a competitive disadvantage relative to union mines and that 'operational efficiency, safety and employee morale are all adversely impacted" by the interpretation and enforcement of the statute." Id. **[**54]** The district court found that the opt-out provision was preempted under Machinists because "[a]ny attempt to characterize the eight-hour shift limitation as a 'minimum-benefit' for mine workers is disingenuous in light of the overwhelming evidence that the prohibition is highly onerous to [non-union] employees and employers of the mining industry." Id. at 489. The Ninth Circuit reversed, holding that while the eight-hour work day requirement may be "burdensome," the statute "undoubtedly provides some minimum protection to non-union mine workers, while permitting a longer work day through the protections provided by the collective bargaining or the [union] election process. . . ." Id. at 489-90.

The Hotel Associations attempt to distinguish *Viceroy* on the grounds that California Labor Code § 750 does not require the waiver to be "clear and unambiguous" like the Wage Ordinance at issue here; and that the *Viceroy* opt-out provision was not exclusive to collective bargaining agreements, as it allowed employees to waive the labor code requirements if a two-thirds majority of the affected employees of a particular employer voted to adopt an alternative policy (subject to certain restrictions). (*See* Reply to City Opp. at 17 n.10; Reply to Local 11 Opp. at 7.) Plaintiffs' arguments are not persuasive. The Supreme Court has already held that collective bargaining agreement waivers need to be "clear and unmistakable" to be given effect. *See* Livadas, 512 U.S. at 125. And this makes perfect sense. The right to $15.37 per hour minimum wage belongs to the affected hotel workers. Thus, because California law requires that "the valid waiver of a right presupposes an actual and demonstrable knowledge of the very right being waived," **[*1198]** *Jones v. Brown, 13 Cal. App. 3d 513, 519, 89 Cal. Rptr. 651 (1970)*, the Wage Ordinance's requirement of a "clear and unambiguous" waiver is unremarkable. That non-union Hotel Workers cannot **[**55]** waive the provisions of the Wage Ordinance — as could the employees subject to California Labor Code § 750 in *Viceroy* — is likewise unremarkable: a minimum wage is categorically different than an hours-per-day maximum imposed for safety reasons, and the City has deemed that waiver of the rights by any Hotel Worker *not* covered by a collective bargaining agreement "shall be deemed contrary to public policy and shall be void and unenforceable." (WO at 8.) Again, this makes sense. Both California statute and case law recognize that the rights to minimum wage and overtime payments are not waivable. *See* Cal. Labor Code § 1194; Gentry v. Superior Court, 42 Cal.4th 443, 455, 64 Cal. Rptr. 3d 773, 165 P.3d 556 (2007). While "[a]nyone may waive the advantage of a law intended solely for his benefit . . . a law established for a public reason cannot be contravened by a private agreement." Sonic—Calabasas A, Inc. v. Moreno, 51 Cal. 4th 659, 679, 121 Cal. Rptr. 3d 58, 247 P.3d 130, 247 P.3d 130 (2011) (internal quotation marks omitted).

Plaintiffs' argument that the waiver provision gives unions an "economic weapon" that it would not otherwise have is equally unpersuasive. As Local 11 pointed out at the April 6, 2015 hearing, there is no evidence before the Court with respect to which party (the employer or the union) has the upper hand in bargaining power. California has enacted a vast array of regulations governing labor standards that form the "backdrop" **[**56]** of employee and employer state law labor rights. Some of these regulations ostensibly favor employers. For example, California law presumes all employees are at-will employees absent contract terms specifying otherwise. Guz v. Bechtel Nat. Inc., 24 Cal. 4th 317, 335, 100 Cal. Rptr. 2d 352, 8 P.3d 1089 (2000) (citing Cal. Labor Code § 2922) ("An atwill employment may be ended by either party 'at any time without cause,' for any or no reason, and subject to no procedure except the statutory requirement of notice."). Typically, collective bargaining agreements contract around California's at-will employment policy and contain for-cause termination clauses. Plaintiffs' argument with respect to the waiver provision is akin to a union arguing that California's at-will employment policy (or any other seemingly pro-employer regulation) is subject to *Machinists* preemption because it provides employers with an economic weapon for which it might otherwise have to bargain. The Court assumes no party to this litigation would suggest that to be the case. Thus — reminding Plaintiffs that "*any* state [or local] law that substantively regulates employment conditions" gives one party or the other something for which it otherwise might have to bargain, *Fort Halifax, 482 U.S. at 21* (emphasis added) — the Court finds that the Wage Ordinance's **[**57]** waiver provision and its effects are consistent with the *NLRA's* legislative goals and purposes and do not implicate *Machinists* preemption.

6. Ban on unilateral implementation

The Hotel Associations' waiver arguments are part and parcel of their arguments regarding the so-called ban on unilateral implementation. To review, the Wage Ordinance provides that "[u]nilateral implementation of terms and conditions of employment by either party to a collective bargaining relationship shall not constitute or be permitted as a waiver of all or any part of the provisions of this article." (WO at 8.) The Hotel Associations argue that this provision provides an independent basis for preemption because unilateral implementation is "an integral part of the bargaining process" in labor management relations, and requiring hotels to **[*1199]** implement statutory minimums during negotiations would interfere with collective bargaining as it typically occurs upon expiration of the CBA. (Mot. at 17.)

Plaintiffs rely on *Barnes v. Stone Container Corporation, 942 F.2d 689 (9th Cir. 1991)* to support their argument. (*See* Mot. at 19.) In *Barnes*, the collective bargaining agreement between Barnes' employer and his union had expired. After several months of unsuccessful negotiations, the parties reached an impasse. **[**58]** Following the expiration of the collective bargaining agreement but before the parties reached an impasse, the employer fired Barnes for harassment after he sprayed two replacement employees with water when they crossed the picket line. The union filed an unfair labor practice charge on Barnes' behalf, asserting that the stated reason for his discharge was pretextual and that the employer fired him for his union activity. The NLRB investigated and found no basis for the retaliation charge, and the union withdrew the complaint. Barnes then filed a state law action under the Montana wrongful discharge act ("WDA"), which provides that an employee discharge is "wrongful" if the termination is not for "good cause," except when the employee is covered by a collective bargaining agreement. The employer moved for summary judgment, arguing that Barnes' wrongful discharge lawsuit was preempted under *Machinists* because it "would impose a just cause term where one did not exist (*i.e.*, under the expired CBA), thus affecting the relations between employer and its represented employees after contract-termination and prior to impasse," a time period during which "the *NLRA* contemplates relations free **[**59]** of state interference." *Id. at 691*. The district court denied summary judgment, but the Ninth Circuit — relying on a Second Circuit case, *Derrico v. Sheehan Emergency Hosp., 844 F.2d 22 (2d Cir. 1988)* — reversed.

In *Derrico*, the plaintiff — who was also discharged after expiration of the collective bargaining agreement but before the union and employer had bargained to impasse — filed a state court action, alleging that he had been fired without just cause. His theory was that the expired bargaining agreement contained a just cause provision which, after contract expiration and prior to impasse, resulted in an implied contract between each union employee and the employer that there would be no discharge without cause. The Second Circuit affirmed the district court's dismissal of the plaintiff's case under *Machinists*, explaining that the theory of an implied contract resulting from an expired collective bargaining agreement created "substantial potential for friction" with the "delicate machinery of the *NLRA*," and permitting the plaintiff's lawsuit would "artificially limit" the parties' post-expiration options. *Id. at 28*. The Second Circuit explained:

> When bargaining alone does not produce consensus, the *NLRA* contemplates that both sides will resort to "economic **[**60]** weapons." Such resort is an integral part of the balance the *NLRA* strikes between labor and management. The possibility that a term of an expired CBA might become an "implied" contract under state law

> would tie the parties' hands in a manner inimical to this facet of the NLRA's collective bargaining process. Exposure to liability at state law for breach of contract under circumstances of this case would significantly alter the labor-management relationship that follows expiration of a CBA. [The plaintiff's] theory would [also] significantly affect the collective bargaining process that lies at the heart of the NLRA. Expiration of a CBA plainly works a significant change in the parties' relationship. Just as plainly, the prospect of that change and the mutual awareness of the tactics to which either side may thereafter resort provide the parties **[*1200]** with incentives to negotiate. To allow a CBA provision to linger on after the contract's expiration in the form of an implied contract would dilute these effects.

Id. at 29 (internal citations omitted).

Relying on the Second Circuit's reasoning in *Derrico*, the Ninth Circuit panel in *Barnes* found that the plaintiff's state law wrongful discharge lawsuit **[**61]** was preempted under *Machinists*:

> [T]he incidental effect of allowing Barnes to pursue his WDA action after contract expiration, but prior to a bargaining impasse, is precisely the sort of entanglement the Supreme Court sought to avoid in *Machinists*. Permitting WDA actions during this period would have the untoward effect of imposing a contract term on the parties and thus altering incentives to negotiate. . . . We believe [the *Derrico]* reasoning applies as well to a term imposed by a state statute as it does to a term implied via contract theory derived from case law.
>
> Unlike the unemployment compensation in *New York Telephone*[16] and the health benefits in *Metropolitan Life*, we view the imposition of a just cause term by the WDA on the parties negotiating a contract as meddling at the heart of the employer-employee relationship at a time when such interference is most harmful. Issues of hiring and firing are often central to CBA negotiations and the NLRA, as interpreted in *Machinists*, intended to allow the parties to resolve these matters without the unsettling effect of state regulation.

Id. at 693.

There are two unique aspects of *Barnes* that render its reasoning inapplicable to the facts in this case. First, the Ninth Circuit acknowledged that the Montana WDA is a substantive minimum labor standard different in kind than the minimum labor standards at issue in, for example, *Metropolitan Life* and *Fort Halifax*,[17] because "[i]ssues of hiring and firing are often central to CBA negotiations and the NLRA, as interpreted in *Machinists*, intended to allow the parties to resolve these matters without the unsettling effect of state regulation." *Id. at 693*. Second, and more importantly, *Barnes* makes clear that this preemption scenario is limited to a narrow set of circumstances, *i.e.*, the sensitive time period between post-expiration and pre-impasse negotiations. *Id.; see also National Broadcasting Co., Inc. v. Bradshaw ("NBC"), 70 F.3d 69, 73 (9th Cir. 1995)* (explaining that because a state statutory remedy was not invoked until after bargaining impasse was reached, "the type of interference with negotiations frowned upon in *Barnes* did not occur"). In this regard, *Barnes* involves the preemption of an individual lawsuit under a particular set of circumstances.[18] It has nothing to do with whether — post-expiration of a collective bargaining **[**63]** agreement — the NLRA prohibits employers from implementing statutory minimums during negotiations;[19] and it certainly does

---

[16] *See New York Tel. Co. v. New York State Dep't of Labor, 440 U.S. 519, 540-546, 99 S. Ct. 1328, 59 L. Ed. 2d 553 (1979)* (holding that the NLRA does not preempt a state law providing unemployment benefits to striking workers). **[**62]**

[17] The Ninth Circuit acknowledged this distinction in the context of affirming the principles of *Metropolitan Life. See Barnes, 942 F.2d at 693* ("The policies underlying the NLRA, restoration of equality of bargaining power and encouragement of collective bargaining, are not affected by the kind of the minimum standards contained in the Massachusetts law [at issue in *Metropolitan Life*].").

[18] Notably, *Barnes* involved what would appropriately be referred to as an "as applied" challenge to the Montana WDA.

[19] The Ninth Circuit has since held that it is entirely permissible (and not preempted under the NLRA) for an employer to be liable for the difference between a higher statutory minimum wage rate and a lower negotiated rate during the interim period between

not support the Plaintiffs' **[*1201]** contention that the entire Wage Ordinance is preempted simply because, hypothetically, a hotel worker might, at some indefinite point in the future, bring a private enforcement action under the Wage Ordinance under the narrow circumstances at issue in *Barnes*.

Plaintiffs reliance on *Brown v. Pro Football, Inc. ("Pro Football"), 518 U.S. 231, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)* (*see* Mot. at 19-20), does not change the analysis. *Pro Football* involved the extent to which the non-statutory labor exemption to antitrust laws shielded the National Football League ("NFL") club owners' unilateral implementation of new salary caps ($1,000 per week) for developmental squad players after the league's collective bargaining agreement with the players union had expired and negotiations had reached an impasse. It was undisputed that the club owners' unilateral implementation — absent the labor exemption — would have constituted an unlawful restraint of trade. In holding that the exemption applied to the club owners' conduct at issue in the case — *i.e.*, their post-impasse imposition of a proposed employment term concerning a mandatory subject of bargaining — **[**65]** the Supreme Court explained that "[a]s a matter of logic, it would be difficult, if not impossible, to require groups of employers and employees to bargain together, but at the same time to forbid them to make among themselves or with each other *any* of the competition-restricting agreements potentially necessary to make the process work or its results mutually acceptable." *Id. at 237* (emphasis in original); *see id. at 242* ("All this is to say that to permit antitrust liability here threatens to introduce instability and uncertainty into the collective-bargaining process, for ***antitrust law*** often forbids or discourages the kind of joint discussions and behavior that the collective-bargaining process invites or requires.").[20] While *Pro Football* had nothing to do with *Machinists* preemption, the players union argued that the exemption should not apply in this context because antitrust laws are akin to "general 'backdrop' statutes," such as the statutes involved in *Metropolitan Life* and *Fort Halifax*, which apply in the absence of an effective collective bargaining agreement. *Id. at 248*. The Supreme Court rejected this argument, explaining that the minimum labor standard statutes, like the ones at issue in *Metropolitan **[**66]** Life* and *Fort Halifax*, were categorically distinct from federal antitrust laws because they "neither encouraged nor discouraged the collective-bargaining process that are the subject of the federal labor laws," and they do not "come accompanied with antitrust's labor-related history." *Id.* (internal quotation marks and alterations omitted). It would be a different story had the *Pro Football* club owners unilaterally implemented a weekly salary cap less than any of the applicable state minimum wages.[21] Absent that, however, *Pro Football* **[*1202]** has no application to this case, and Plaintiffs have failed to establish that the Wage Ordinance's ban on unilateral implementation is inconsistent with the *NLRA's* legislative goals and purposes.

7. Pressure to engage in neutrality/card check agreements

The Hotel Associations finally argue that because (1) non-union Hotels must enter into collective bargaining agreements as a statutory predicate to receive a waiver, and (2) Local 11 is the only union for hotel workers in Los Angeles and organizes exclusively through card-check/neutrality agreements, then Hotel Employers are effectively required to acquiesce to Local 11's neutrality demand to be eligible for a waiver. Thus, the Plaintiffs argue, "the City has doubly rejiggered the economic calculus as to whether or not to acquiesce to the Union's demand for card-check recognition," which in turn compels *Machinists* preemption. (Mot. at 12-14; Reply to City's Opp. at 11.) This argument is not persuasive.

---

effective collective bargaining agreements when the subsequent **[**64]** agreement is not retroactive to cover the gap period. *See NBC, 70 F.3d at 71-72* (holding that a state cannot "withhold its minimum benefit protections from employees solely on the ground that they were bound by a collective bargaining agreement," and union employees are allowed "the full protection of the minimum standard, absent any agreement for something different").

[20] *Pro Football* provides a detailed and comprehensive analysis of the many nuanced issues at the intersection of federal antitrust and labor laws, particularly with respect to multi-employer collective bargaining. For the most part, the analysis is not relevant to the issues in this case, and therefore the Court does not discuss it here.

[21] The Court surmises that when *Pro Football* was decided in 1996, $1,000 per week (roughly $25 per hour for a 40-hour work week) was well **[**67]** above each of the applicable then-state minimum wages.

As discussed in detail above, the Wage Ordinance's minimum wage and waiver provisions do not interfere with collective bargaining and labor relations, and they do not otherwise conflict with the NLRA's legislative goals and purposes. Nothing in the Wage Ordinance requires any Hotel Employer to unionize, enter into a cardcheck/ neutrality agreement,[22] or forego any rights to which **[**68]** it is otherwise entitled under federal labor law. The Wage Ordinance is completely silent on these issues. Simply because the Wage Ordinance may have "rejiggered" the economic calculus — again, this would be the case for any change in any substantive minimum labor standard — that does not compel preemption.

C. Absent a Showing of Success on the Merits, Plaintiffs Cannot Establish Irreparable Harm or That The Balance of Hardships Tip In Plaintiffs' Favor

In summary, the Plaintiffs have failed to show any likelihood of success on the merits. As stated at the beginning of this analysis, the whole of the Wage Ordinance is no greater than the sum of its parts. On its face, the Wage Ordinance is a minimum labor standard that neither encourages nor discourages collective bargaining. The minimum wage provision operates simply as part of the backdrop for collective bargaining negotiations — to the extent **[**69]** the parties opt to partake in such negotiations — and it is otherwise part of the minimum labor standard landscape that provides state law rights that the parties enjoy without having to bargain for them. Nothing about the waiver provision (including the ban on unilateral implementation) warrants preemption: the Supreme Court and Ninth Circuit have held that such opt-out provisions are valid and that union employees are entitled to the full protections of minimum standards absent a valid collective bargaining agreement for something different, including during any gap periods between such agreements.

Because Plaintiffs have not shown any likelihood of success on the merits, they cannot make the necessary showing of irreparable harm. Thus, under any version of the sliding scale approach, Plaintiffs have not satisfied their high burden for the **[*1203]** extraordinary and drastic remedy that is a preliminary injunction.

IV. CONCLUSION

Plaintiffs seek a preliminary injunction staying the effective date and enjoining enforcement of the City's Wage Ordinance, mandating a $15.37 per hour minimum wage for Hotel Workers at large Hotels in Los Angeles, which is scheduled to go into effect on July 1, 2015. **[**70]** Plaintiffs argue that the Wage Ordinance is preempted under the NLRA. A review of Plaintiffs' arguments and evidence, however, make clear that Plaintiffs' biggest concern with the Wage Ordinance is that it is bad economic policy. However, it is not the role of the Court to interject into matters of legislative economic policy under the guise of NLRA preemption. When Plaintiffs' arguments and evidence are considered against the backdrop of the NLRA preemption legal standard, Plaintiffs have not satisfied their high burden for the extraordinary and drastic remedy of preliminary injunctive relief.

Metropolitan Life and its progeny provide that, under *Machinists* preemption, minimum labor standards are presumptively valid, so long as they are laws of general applicability and neither encourage nor discourage collective bargaining or selforganizing. While the Ninth Circuit has recognized that in an extreme case, the substantive requirements of a minimum labor standard could be so restrictive as to virtually dictate the results of the collective bargaining and self-organizing process, this occurs only where one or both parties are deprived of a meaningful choice as between complying with the **[**71]** substantive requirements and entering into a collective bargaining agreement. Here, Plaintiffs have failed to meet their burden that the Wage Ordinance's $15.37 per hour minimum wage is so onerous that it is economically unfeasible and therefore forces the hand of non-union hotels to unionize. Plaintiffs' own evidence establishes that Hotel Employers have a meaningful choice as between paying the $15.37 per hour minimum wage and entering into collective bargaining agreements, and so the Wage

---

[22] While, currently, Local 11 is the only union representing hotel workers in the Los Angeles area, there is nothing preventing another union — one that does not organize exclusively vis-à-vis card-check/neutrality agreement — from organizing hotel workers at any given hotel in the City in the future.

Ordinance's minimum wage provision does not compel preemption. Similarly, Plaintiffs have failed to meet their burden that the Wage Ordinance's waiver provision interferes with collective bargaining and labor relations or is otherwise inconsistent with the *NLRA's* legislative goals and purposes. Union opt-out provisions are also presumptively valid, and union employees are entitled to the full protections of minimum labor standards absent a collective bargaining agreement for something different, including during any gap periods between such agreements. Accordingly, the Hotel Associations have failed to show any likelihood of success on the merits of their *NLRA* preemption claim, and their motion **[**72]** for a preliminary injunction staying the effective date and enjoining enforcement of the Wage Ordinance is **DENIED**. (Dkt. No. 23.)

The City's motion to strike (Dkt. No. 62) is **DENIED** as moot, as it is duplicative in substance to the City's separately filed objections.

ORDER GRANTING MOTION TO DISMISS WITHOUT LEAVE TO AMEND AND DENYING MOTIONS FOR SANCTIONS

Re: Dkt. Nos. 34, 44, 57

Before the Court are BFI's motion to dismiss the first amended complaint, BFI's motion for sanctions, and Dutra's cross-motion for sanctions. This is the second time Dutra has sued BFI over his dissatisfaction with a settlement agreement the parties entered into in 2009. Now, Dutra alleges that BFI has entered into an agreement with Recology to bar plaintiff from employment with Recology. The Court finds Dutra's antitrust allegations and breach of the covenant of good faith and fair dealing are meritless and GRANTS defendant's **[*2]** motion to dismiss without leave to amend. However, the Court does not find that sanctions are appropriate and DENIES both BFI's and Dutra's motions for sanctions.

I. BACKGROUND

Plaintiff Harold Dutra is a former employee of defendant, BFI (now Republic), a waste management service company. Dkt. No. 30 at ¶ 9. Dutra was a driver who collected waste in San Mateo County. *Id.* BFI terminated Dutra in 2007, and the parties engaged in arbitration, ultimately, ending in a settlement agreement in 2009. *Id.* at ¶¶ 11-14. The settlement agreement provided a $35,000 monetary payment for Dutra, and required Dutra to relinquish all employment rights with BFI including right to seek re-employment with BFI and its successors. *Id.* at ¶ 14.

In June 2012, Dutra sued BFI for a variety of claims, seeking to overturn the settlement agreement. *Id.* at ¶ 15. The district court dismissed Dutra's complaint in July 2013. *Id.* at ¶ 16.

After July 2013, Dutra applied for a job with Recology, another waste disposal company. *Id.* at ¶ 18. Dutra alleges that he was deemed qualified by Recology, and he believes that his application was rejected because of communications between Recology and BFI. *Id.* at ¶ 18.

II. DISCUSSION [*3]

Before the Court are two separate motions, which the Court will address in turn. First, defendant's motion to dismiss argues that this Court should dismiss the complaint without leave to amend because the complaint is meritless. Dkt. No. 34. Second, defendant moves for sanctions under *Rule 11*, *28 U.S.C. § 1927*, and the Court's inherent power, and asks the Court to award it attorney's fees. Dkt. No. 44. Plaintiff filed a cross-motion for sanctions, seeking recovery of attorney's fees in defending the motion for sanctions. Dkt. No. 57.

A. Motion To Dismiss

A motion to dismiss for failure to state a claim under Rule 12(b)(6) tests the legal sufficiency of a complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. On a motion to dismiss, all allegations of material fact are taken as true and construed in the light most favorable to the non-movant. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. The Court, however, need not accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*. Although a complaint need not allege detailed factual allegations, it must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible when it "allows the court to draw the reasonable inference **[*4]** that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

If a court grants a motion to dismiss, leave to amend should be granted unless the pleading could not possibly be cured by the allegation of other facts. *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)*. However, dismissal without leave to amend is proper if it is clear that the complaint could not be saved by amendment. *Eminence Capital, LLC v. Aspeon, Inc., 316 F.3d 1048, 1052 (9th Cir. 2003)*.

Dutra sues for (1) a violation of the Sherman Antitrust Act *§ 1* alleging a conspiracy to restrict trade; (2) a violation of the Sherman Antitrust Act *§ 2*, alleging an unlawful monopoly; (3) the Cartwright Antitrust Act; and (4) breach of covenant of good faith and fair dealing.

1. Sherman Antitrust Act § 1

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. In antitrust claims, the Supreme Court has required a heightened pleading standard:

> In applying these general standards to a § 1 claim, we hold that stating such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to

> infer an agreement does not impose a probability requirement at the pleading **[*5]** stage; it simply calls for enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.... [A]n allegation of parallel conduct and a bare assertion of conspiracy will not suffice.

Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 556-57, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). "This is because discovery in antitrust cases frequently causes substantial expenditures and gives the plaintiff the opportunity to extort large settlements even where he does not have much of a case." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1046-47 (9th Cir. 2008)*.

To state a claim under *Section 1 of the Sherman Act*, claimants must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition. *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*; *Les Shockley Racing Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507 (9th Cir.1989)*; *see also* *Twombly, 550 U.S. at 553-56*. To satisfy the first prong, a plaintiff may not simply allege an agreement or conspiracy, but rather must provide information as to the "specific time, place, or person involved in the alleged conspiracies." *Twombly, 550 U.S. at 564*; *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1046-47 (9th Cir. 2008)*.

Here, Dutra alleges that sometime after the July 22, 2013 dismissal, he applied for a job with Recology. Dkt. No. 30 at **[*6]** ¶ 18. "[O]n information and belief, after communications between Recology and BFI (Republic), Plaintiff's application was rejected." *Id.* Dutra alleges that he learned in late 2013 and early 2014 "of the collusion between BFI (Republic) and Recology as that collusion or conspiracy relates to Plaintiff's re-employment." *Id.* at ¶ 21. These allegations do not include any factual information to give rise to plausible grounds that a conspiracy exists. The Court finds that such allegations are exactly the sort that the *Twombly* court rejected, and so too, this Court rejects the conspiracy claim as insufficiently pled.

On the restraint of trade, Dutra alleges "[b]y locking up certain markets, with fixed rates and single company locales, BFI (Republic) and Recology are able to harm persons seeking employment, consumers of their products, and others." *Id.* at ¶ 26. Dutra alleges that BFI and Recology control all of the San Francisco Bay Area's waste management services, and "have divided the Area into sections or regions within which there is no competition." *Id.* at ¶ 5. "BFI and Recology set wages, rates for collection, and dictate hiring and collection practices throughout the Bay Area." *Id.*

On a motion **[*7]** to dismiss, the Court may take judicial notice of matters of public record. *Harris v. County of Orange, 682 F.3d 1126, 1132 (9th Cir. 2012)*. BFI has provided public record information that Bay Area municipalities, such as San Mateo County and the City of San Francisco, grant exclusive licenses to both companies within particular boundaries. Dkt. No. 34 at 9. Thus, Dutra's restraint of trade claims are both unsupported legal conclusions and factually inaccurate statements. Dutra's Sherman Antitrust Act § 1 claim is dismissed.

2. Sherman Antitrust Act § 2

Section 2 of the Sherman Act requires allegations that the defendant (1) possesses monopoly power in a valid relevant market; and (2) willfully acquired, maintained, or used that power by anti-competitive or exclusionary means. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. To satisfy the first prong, a plaintiff must allege that the defendant has market power within a legally cognizable relevant market. *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008)*. "[T]he plaintiff must allege both that a 'relevant market' exists and that the defendant has power within that market." *Id.; see also Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)*("Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim"). A plaintiff must delineate a relevant market and show that the defendant plays enough of a role in that market to impair competition **[*8]** significantly. *Bhan v. NME Hospitals, Inc., 929 F.2d 1404,* *1413 (9th Cir. 1991)*. Additionally, antitrust laws are intended to protect only those activities that have anticompetitive effects on the market as a whole. *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 23, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; *Eichorn v. AT&T Corp., 248 F.3d 131, 148 (3d Cir. 2001)*, *as amended* (June 12, 2001).

Here, Dutra alleges that BFI possesses a monopoly on the "waste labor market," but also that BFI and Recology together control the market. Dkt. No. 30 at ¶¶ 5, 17. Additionally, Dutra alleges that the relevant market is "waste drivers and related industries in the Bay Area and throughout the State." *Id.* at ¶ 26. Finally, Dutra does not allege any specific injury to anyone but himself. Together, these legal conclusions do not support a claim of § 2 antitrust liability. Dutra has not alleged a cognizable relevant market or alleged BFI's role in the market with any specificity. Plaintiff has proffered no further facts in briefing or at the hearing that could provide even a plausible allegation of monopoly power or antitrust liability. Therefore, the Court dismisses the Sherman Antitrust Act § 2 claim.

3. Cartwright Antitrust Act

"The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act, *Cal. Bus. & Prof.Code § 16700 et seq.*, was modeled after the Sherman Act." *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*. Because plaintiff's Sherman **[*9]** Antitrust Act claims lack merit, so too does his Cartwright Antitrust Act claim. This claim is also dismissed.

4. Breach of the Implied Covenant of Good Faith and Fair Dealing

The covenant of good faith and fair dealing is implied in a contract and requires the party to uphold the contract's purposes and the parties' legitimate expectations. *Carma Developers (Cal.), Inc. v. Marathon Dev. Cal., Inc., 2 Cal.4th 342, 373, 6 Cal. Rptr. 2d 467, 826 P.2d 710 (1992)*.

Dutra claims that BFI breached its duty of good faith by refusing to set aside part of the settlement agreement between the parties. Dkt. No. 30 at ¶ 35. This statement is at odds with the law of good faith and fair dealing, which requires parties to *uphold* contract terms, not to set them aside. Additionally, Dutra claims that BFI breached a duty by "interfer[ing] in Plaintiff's efforts to gain hire with another company." Dkt. No. 30 at ¶ 36. Again, such a claim is not properly within the scope of the law, as plaintiff does not claim that BFI was obligated to refrain from any actions in the parties' settlement agreement.

5. Conclusion

Although generally, leave to amend should be granted freely, plaintiff has not proffered any additional facts that could cure the deficiencies in the complaint. Instead, at hearing, plaintiff noted that a different cause of action, **[*10]** interference with prospective economic advantage, might be more appropriate. This was not presented in briefing, and the Court declines to rule on the permissibility of that claim because, brought alone, it is not a federal claim within the Court's jurisdiction. In addition, plaintiff has amended the complaint once with the benefit of defendant's pending motion to dismiss, so he was put on notice of defendant's arguments and had an opportunity to cure the complaint's deficiencies. Therefore, the Court believes amendment would be futile and dismisses without leave to amend. *See* *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1051-52 (9th Cir. 2008)*(finding amendment of the complaint futile when plaintiff proffered no additional facts or discovery that could be conducted to cure the complaint).

B. Sanctions

"Three primary sources of authority enable courts to sanction parties or their lawyers for improper conduct: (1) *Federal Rule of Civil Procedure 11*, which applies to signed writings filed with the court, (2) *28 U.S.C. § 1927*, which is aimed at penalizing conduct that unreasonably and vexatiously multiplies the proceedings, and (3) the court's inherent power." *Fink v. Gomez, 239 F.3d 989, 991 (9th Cir. 2001)*.

Federal Rule of Civil Procedure 11(b) provides in part that "[b]y presenting to the court a pleading, written motion, or other paper," an attorney certifies that "to the best of the person's **[*11]** knowledge, information, and belief, formed after an inquiry reasonable under the circumstances": "it is not being presented for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation"; and "the factual contentions have evidentiary support or, if specifically so identified, will likely have evidentiary support after a reasonable opportunity for further investigation or discovery." *Fed. R. Civ. P. 11(b)*.

For *§ 1927* sanctions to apply, "if a filing is submitted recklessly, it must be frivolous, while if it is not frivolous, it must be intended to harass . . . . [R]eckless nonfrivolous filings, without more, may not be sanctioned." *B.K.B. v. Maui Police Dep't, 276 F.3d 1091, 1107 (9th Cir. 2002)* (quoting *In re Keegan Mgmt. Co., Sec. Lit., 78 F.3d 431, 436 (9th Cir. 1996))*.

Under its inherent powers, a court may impose sanctions in the form of attorneys' fees when the losing party has acted "in bad faith, vexatiously, wantonly, or for oppressive reasons." *Primus Auto. Fin. Servs., Inc. v. Batarse, 115 F.3d 644, 648 (9th Cir. 1997)* (quoting *Alyeska Pipeline Serv. Co. v. Wilderness Soc'y, 421 U.S. 240, 258-59, 95 S. Ct. 1612, 44 L. Ed. 2d 141 (1975))*. However, "because of their very potency, inherent powers must be exercised with restraint and discretion." *See* *B.K.B., 276 F.3d at 1108* (quoting *Chambers v. NASCO, Inc., 501 U.S. 32, 44, 111 S. Ct. 2123, 115 L. Ed. 2d 27 (1991))*. "[A]n attorney's reckless misstatements of law and fact, when coupled with an improper purpose . . . are sanctionable under a court's inherent power." *Fink, 239 F.3d at 994*.

The Ninth Circuit instructs courts to be reluctant in imposing sanctions, **[*12]** "especially errors in papers filed before an opportunity for discovery." *Greenberg v. Sala, 822 F.2d 882, 887 (9th Cir. 1987)*. "The court is expected to avoid using the wisdom of hindsight and should test the signer's conduct by inquiring what was reasonable to believe at the time the pleading . . . was submitted." *Id.*

The Court denies BFI's request to impose sanctions because it finds that the requested relief is disproportionate to the sanctions requested and not in the interest of justice. BFI's motion is premised in large part on argument that the 2012 case was frivolous. This is irrelevant to the inquiry that this Court is permitted to entertain on the current case, except as it may demonstrate Dutra or his counsel's intent to harass. Here, the action is only at the pleading stage, and BFI only had to engage in one round of pleading. Additionally, the complaint is short, lacking in factual matter, and generally straightforward. Therefore, the Court does not agree that BFI was required to expend significant time and money to defend the action. In addition, BFI argues that Dutra required BFI to spend unnecessary time and money preparing for two motions to dismiss; however, the Court notes, and BFI acknowledges, that the original complaint **[*13]** and the first amended complaint were substantially similar and suffered from the same flaws. Thus, there was no need for defendant engage in an extensive effort to submit the second motion to dismiss. Finally, although the action is meritless, the Court does not find evidence of intention to harass.

The Court also denies plaintiff's motion for sanctions. "A motion for sanctions must be made separately from any other motion and must describe the specific conduct that allegedly violates *Rule 11(b)*." *Fed. R. Civ. P. 11(c)(2)*. Dutra moved for sanctions under *Rule 11* at the end of his opposition to BFI's sanctions, not on a separate motion. Dkt. No. 57 at 16-17. Dutra does not describe BFI's conduct that merits sanctions, except to suggest that BFI's motion for sanctions is meritless. *Id.* Thus, Dutra has not complied with the procedural requirements for bringing a motion for sanctions under *Rule 11*. Additionally, Dutra must demonstrate that BFI's motion was filed for an improper purpose, such as to harass, which he has not done. *Fed. R. Civ. P. 11(b)*. The Court disagrees with Dutra's arguments because his complaint did lack factual and legal merit, so BFI's motion was not improper. Therefore, Dutra's motion for sanctions is denied.

III. CONCLUSION

In conclusion, **[*14]** the Court dismisses the complaint without leave to amend and denies all motions for sanctions.

IT IS SO ORDERED.

ORDER DENYING MOTION TO EXCLUDE AND GRANTING IN PART MOTION TO CERTIFY CLASS AND FOR APPOINTMENT OF CLASS COUNSEL

UNDER SEAL

Docket 240, 259

Plaintiffs[1] bring the instant putative class action against SanDisk Corporation ("SanDisk") **[*3]** alleging claims for relief under *§ 2* of the *Sherman Antitrust Act ("Sherman Act"), 15 U.S.C. § 2*. The parties are presently before the Court on Plaintiffs' motion to certify class and for appointment of class counsel under *Rule 23 of the Federal Rules of Civil Procedure*. SanDisk opposes the motion. Also before the Court is SanDisk's motion to exclude the report and testimony of Plaintiffs' expert, Ryan Sullivan, Ph.D. ("Dr. Sullivan"), under *Rule 702 of the Federal Rules of Evidence* and *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. Plaintiffs oppose the motion. Having read and considered the papers filed in connection with these matters and being fully informed, the Court hereby DENIES SanDisk's motion to exclude and GRANTS IN PART Plaintiffs' motion to certify class and for appointment of class counsel, for the reasons stated below. The Court, in its discretion, finds these matters suitable for resolution without oral argument. See *Fed.R.Civ.P. 78(b)*; N.D. Cal. Civ. *L.R. 7-1(b)*.

I. BACKGROUND

The parties are familiar with the facts of this case, which are summarized herein only to the extent they are pertinent to the motions pending before the Court.

SanDisk is a Delaware corporation headquartered in Milpitas, California. It designs, develops, and manufactures data storage solutions using flash memory, controller firmware, and software technologies. SanDisk **[*4]** owns numerous patents on aspects of NAND flash memory and related technology. SanDisk relies on its patents to manufacture and sell NAND flash memory products. Through its joint venture with Toshiba Corporation ("Toshiba"), SanDisk manufactures NAND flash memory chips that it either: (1) sells directly to manufacturers or retailers; or (2) combines with other components into final flash products that it sells to retailers who then sell the products to consumers. Plaintiffs are direct purchasers of final flash products from SanDisk, which include solid state drives ("SSD"), memory cards, wireless memory, USB storage, embedded storage (for devices such as mobile phones and tablets), and music and video players.

NAND flash memory is a form of non-volatile[2] erasable memory that can store large amounts of data. NAND flash memory comes in two forms: flash chips and final flash products. NAND flash chips are basic flash memory. They function by storing "bits" of data in "cells" contained on the chip. NAND flash chips come in the form of a wafer, die, or packaged die. NAND flash chips can be combined with additional components, software, or firmware to make final flash products that are eventually **[*5]** sold to consumers. NAND flash memory is incorporated into a variety of end-user products, including mobile phones, tablets, global positioning systems, portable and home gaming systems, and personal computers.

---

[1] The named Plaintiffs in this action are Alfred T. Giuliano, Chapter 7 Trustee to the Ritz Estate ("Ritz"), CPM Electronics Inc. ("CPM"), E.S.E. Electronics, Inc. ("ESE"), and MFLASH, Inc. ("MFLASH") (collectively, "Plaintiffs").

[2] Flash memory is non-volatile, meaning that data is not lost when there is no power.

Worldwide sales of NAND flash chips increased from $200 million in 1997 to $18.1 billion in 2009 to $33.1 billion in 2013. Over the same period, the price per gigabit ("Gb") of NAND flash chips decreased from $952.60 in 1997 to $0.27 in 2009 to $0.08 in 2013. Due to rapidly declining prices and the adoption of NAND flash for more applications, total NAND flash output increased from 0.0002 billion Gb in 1997 to 67.7 billion Gb in 2009 to 412.9 billion Gb in 2013.

In the instant action, Plaintiffs bring claims against SanDisk for monopolization and attempted monopolization in violation of *§ 2* of the Sherman Act. Plaintiffs' antitrust claims are known as Walker Process claims because they are predicated on SanDisk's alleged use of fraudulently procured patents to obtain or attempt to obtain monopoly power. In *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, the Supreme Court "established that antitrust liability under *section 2* of the Sherman Act may arise when a patent has been procured by knowing and willful fraud, the patentee has market **[*6]** power in the relevant market, and has used its fraudulently obtained patent to restrain competition." *C.R. Bard, Inc. v. M3 Systems, Inc., 157 F.3d 1340, 1367 (Fed. Cir. 1998)*.

As relevant to the motions before the Court, Plaintiffs allege that at least 75% of all NAND flash chips and final flash products imported into or sold in the United States are either: (a) manufactured and sold by SanDisk or its controlled and licensed joint venture with Toshiba; or (b) manufactured by other licensees of patents for NAND flash memory technology claimed to be owned by SanDisk. Plaintiffs assert that SanDisk has maintained a monopoly in the relevant market for final flash products,[3] or has attempted to monopolize this market, by fraudulently procuring two patents relating to flash memory technology,[4] and using those patents (collectively, "the Disputed Patents") to restrain competition by asserting their infringement. Specifically, Plaintiffs assert that SanDisk relied on its patents, including the Disputed Patents, to "force" other flash memory manufacturers to enter into license agreements in exchange for royalty fees, and to exclude any competitors that SanDisk had not granted a license. According to Plaintiffs' expert, Dr. Sullivan, by the end **[*7]** of the licensing negotiations, SanDisk was receiving royalties and profits on 88% to 100% of all final flash products sold worldwide. Plaintiffs allege that, by virtue of SanDisk's restraint on competition through the enforcement of the Disputed Patents, purchasers of final flash products from SanDisk paid supra-competitive, monopoly prices for such products.

Plaintiffs' theory of monopoly power is that SanDisk was able to charge supra-competitive prices and restrict output in the upstream final flash product market by raising its competitors' costs in the downstream NAND flash chip market through the enforcement of the Disputed Patents and the extraction of royalty payments from its competitors in that market. According to Plaintiffs, the increased costs from the royalties SanDisk charged to its competitors in the NAND flash chip market were passed through to manufacturers of final flash products who, in turn, passed through the increased costs to consumers of final flash products. Plaintiffs assert that SanDisk responded to the increased prices charged by its competitors in the final flash market by raising its prices for final flash products and "pocket[ing] the overcharge."[5] Plaintiffs **[*8]** maintain that SanDisk's market power in the upstream NAND flash chip market allowed it to exercise monopoly power in the downstream final flash product market because it controlled the cost of a necessary input in the downstream market, i.e., NAND flash chips.

Plaintiffs define the relevant product market for final flash products as "the market for final flash products, the manufacture, sale, or importation of which is subject to the reach of the U.S. patent laws." The market for final flash

---

[3] While Plaintiffs allege that SanDisk has maintained a monopoly in the relevant market for NAND flash chips, or has attempted to monopolize this market, they only move to certify a class of direct purchasers of final flash products.

[4] The Disputed Patents are U.S. Patent No. 5,172,338 ("the '338 patent"), and U.S. Patent No. 5,991,517 ("the '517 patent"). The '338 patent was issued in 1992, while the '517 patent was issued in 1999. Both patents expired in 2009. Plaintiffs contend that SanDisk procured the Disputed Patents by intentionally making material misrepresentations to, and withholding prior art from, the Patent and Trademark Office ("PTO").

[5] According to Plaintiffs, "[b]ecause SanDisk and its licensees made up more than 88% of the market, SanDisk was able to raise its own prices. . . . Essentially, if all its licensees charged a higher price, SanDisk could too. But, because it did not have to pay a royalty itself, SanDisk could keep these supra-competitive profits."

products includes the following submarkets based on product categories: SSD, memory cards, wireless memory, USB storage, embedded storage, and music and video players. Similarly, Plaintiffs define the relevant product market for NAND flash chips as "the market for flash chips, the manufacture, sale, or importation of which is subject to the reach of the U.S. patent laws." Plaintiffs allege that purchasers of NAND flash chips and final flash products may buy such products only from SanDisk or its licensees, or must buy products that do not practice any SanDisk patent. Plaintiffs further allege that because purchasers of NAND flash chips and final flash products do not regard other types of memory **[*9]** as substitutes for NAND flash memory, they could not switch to other types of memory in response to a small but significant increase in the price of NAND flash memory in the relevant product markets. According to Plaintiffs, with its controlled and licensed Toshiba joint venture and its other controlled licensees of NAND patented technology, SanDisk had the power to control prices in, and restrict entry into, the relevant product markets during the class period, and maintained a monopoly in the relevant product markets during the class period for NAND flash chips and final flash products.

Plaintiffs define the relevant geographic market for the purchase of NAND flash chips and final flash products as worldwide. Plaintiffs refer to the "relevant markets" as: (1) the worldwide market for NAND flash chips, the manufacture, sale, or importation of which is subject to the reach of the United States patent laws; and (2) the worldwide market for final flash products, the manufacture, sale, or importation of which is subject to the reach of the United States patent laws. Plaintiffs allege that the relevant markets are characterized by high barriers to entry and expansion as a result of, among **[*10]** other things, SanDisk's claimed ownership of United States patents covering the technology necessary to manufacture NAND flash memory; SanDisk's unlawful assertion of the Disputed Patents to control entry and expansion within the relevant markets; and the extremely high costs necessary to enter the relevant markets. According to Plaintiffs, the construction of a flash memory fabrication facility can cost billions of dollars, and the plant may need to be retooled every five years.

Through this action, Plaintiffs seek to recover damages for the supra-competitive prices they and the absent class members allegedly paid for SanDisk's final flash products due to the anticompetitive royalty that SanDisk imposed using the Disputed Patents. Plaintiffs assert that "but for" the Disputed Patents, members of the proposed class would have paid less for final flash products purchased from SanDisk. According to Plaintiffs, SanDisk overcharged the putative class members at least $72 million on sales of final flash products.

Pursuant to *Rule 23*, Plaintiffs now move for certification of a "Final Flash Product Class" defined, in part, as: "All persons and entities residing in the United States who, on or after **[*11]** July 1997,[6] directly purchased from SanDisk, or from its controlled and licensed joint venture with Toshiba Corporation, final flash products."[7] In addition to seeking class certification, Plaintiffs also move for an order appointing class counsel. In support of their motion for class certification, Plaintiffs have submitted the expert report of Dr. Sullivan to show, among other things, that antitrust impact and damages can be proved through evidence common to the proposed class. SanDisk opposes Plaintiffs' motion for class certification, and has filed a motion to exclude the expert report and testimony of Dr. Sullivan under *Rule 702* and Daubert.

II. LEGAL STANDARDS

[6] The operative complaint defines the Final Flash Products Class, in part, as all "persons residing in the United States who, on or after *June 25, 2006*, directly purchased from SanDisk, or from its controlled and licensed joint venture with Toshiba Corporation, final flash products using technology claimed to be patented by SanDisk ('Final Flash Product Class')." (Emphasis added). Below, the Court will discuss whether it is proper for Plaintiffs to seek to certify a class that is broader than the class defined in the operative complaint.

[7] The proposed class definition further states: "Such products include, without limitation, those that SanDisk sold to retail firms, OEMs, and distributors. Purchases of final flash products that contain a microcontroller - a semiconductor that interfaces with electronic equipment and operates the flash memory - are included in the class. Purchases of flash memory combined with dynamic random access memory ('DRAM'), flash memory combined with static random access memory ('SRAM'), or flash memory combined with a microprocessor ('system on a chip') are excluded from the class."

A. Expert Testimony

When an expert report is challenged at the class certification stage, the evidentiary standard set forth in Daubert applies. *Ellis v. Costco Wholesale Corp., 657 F.3d 970, 982 (9th Cir. 2011)*. Under Daubert, the trial court must act as a "gatekeeper" to exclude junk science that does not meet the requirements set forth in *Federal Rule of Evidence 702*. Id.

Rule 702 provides:

> [A] witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
>
> (a) the expert's scientific, technical, or other specialized knowledge will help **[*12]** the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed.R.Evid. 702.

The trial court performs a "gatekeeping" function to ensure that the expert's proffered testimony is both reliable and relevant to the task at hand. *Daubert, 509 U.S. at 592-593*. In performing its gatekeeping function, the trial court is required to make "a preliminary assessment of whether the reasoning or methodology underlying the testimony is scientifically valid and of whether that reasoning or methodology properly can be applied to the facts in issue." Id.; see also *Ellis, 657 F.3d at 982* ("Under Daubert, the trial court must act as a 'gatekeeper' to exclude junk science that does not meet *Federal Rule of Evidence 702*'s reliability standards by making a preliminary determination that the expert's testimony is reliable"). "Daubert does not require a court to admit or to exclude evidence based on its persuasiveness; rather it requires a court to admit or exclude evidence based on its scientific reliability and relevance. Thus, an expert's 'inference or assertion must **[*13]** be derived by the scientific method' to be admissible." *Ellis, 657 F.3d at 982*.

A trial court has broad latitude in determining whether an expert's testimony is reliable and in deciding how to determine the testimony's reliability. *Ellis, 657 F.3d at 982*; The reliability factors identified in Daubert - testing, peer review, error rates, and acceptability in the relevant scientific community - are not exhaustive; the Court's task is not to apply Daubert as "a definitive checklist or test," but to "make certain that an expert . . . employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the field." See *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 152, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. Evidence should be excluded as unreliable if it "suffer[s] from serious methodological flaws." *Obrey v. Johnson, 400 F.3d 691, 696 (9th Cir. 2005)*.

To be relevant, expert testimony must "assist the trier of fact." *Daubert, 509 U.S. at 591*. "'Expert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful.'" Id. Expert testimony must be sufficiently tied to the facts of the case such that it will aid in determining a fact in issue. Id. This consideration has been described as one of "fit." Id. "'Fit' is not always obvious, and scientific validity for one purpose is not necessarily scientific validity for other, **[*14]** unrelated purposes." Id.

The inquiry envisioned by *Rule 702* is a flexible one. Its overarching subject is the scientific validity and thus the evidentiary relevance and reliability of the principles that underlie a proposed submission. *Daubert, 509 U.S. at 594-595*. The focus must be solely on principles and methodology, not on the conclusions that they generate." *Id. at 595*; see *Primiano v. Cook, 598 F.3d 558, 564 (9th Cir. 2010)* ("The test under Daubert is not the correctness of the expert's conclusions but the soundness of his methodology."). The proponent of expert testimony has the burden of establishing that the requirements for admissibility are met by a preponderance of the evidence. *Fed.R.Evid. 702*, Advisory Committee's Note to the 2000 Amendments. When the expert meets the threshold established by *Rule 702* as explained in Daubert, the expert may offer testimony and the jury decides how much weight to give that testimony. *Primiano, 598 F.3d at 565*. "Shaky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, not exclusion." *Id. at 564*.

B. Class Certification

A class action is "an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only." *Califano v. Yamasaki, 442 U.S. 682, 700-701, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)*. To come within the exception, the party seeking to maintain a class action "must affirmatively" demonstrate compliance with *Rule 23*. *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 131 S.Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011)*. *Rule 23* **[*15]** "does not set forth a mere pleading standard." Id. Rather, a party must "be prepared to prove that there are in fact sufficiently numerous parties, common questions of law or fact," typicality of claims or defenses, and adequacy of representation, as required by *Rule 23(a)*. Id. The party must also satisfy through evidentiary proof at least one of the provisions of *Rule 23(b)*. *Comcast Corp. v. Behrend, 569 U.S. 27, 133 S.Ct. 1426, 1432, 185 L. Ed. 2d 515 (2013)*. As relevant here, *Rule 23(b)* permits certification if the Court finds that common questions of law or fact predominate, and that a class action is superior to other available methods of adjudication. *Fed.R.Civ.P. 23(b)(3)*.

The district court must conduct a "rigorous analysis" to determine whether the plaintiff has met his or her burden under *Rule 23*. *Mazza v. American Honda Motor Co., Inc., 666 F.3d 581, 588 (9th Cir. 2012)*. This "rigorous" analysis applies to both *Rule 23(a)* and *Rule 23(b)*, and may entail some overlap with the merits of the plaintiffs' underlying claims because "class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's [claims]." *Comcast, 133 S.Ct. at 1432*; *Amgen Inc. v. Conn. Ret. Plans and Trust Funds, 568 U.S. 455, 133 S.Ct. 1184, 1194, 185 L. Ed. 2d 308 (2013)*. Nevertheless, "*Rule 23* grants courts no license to engage in free-ranging merits inquiries at the certification stage." *Amgen, 133 S.Ct. at 1194-1195*. "Merits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Id. at 1195*. If a court concludes that the moving party has met its burden of proof, then the court has broad discretion to certify the class. *Zinser v. Accufix Research Institute, Inc., 253 F.3d 1180, 1186 (9th Cir. 2001)*.

III. DISCUSSION

A. Motion to Exclude

Before addressing Plaintiffs' motion to certify class and for appointment of class counsel, the Court will consider SanDisk's motion to exclude the expert report and testimony of Dr. Sullivan. Plaintiffs retained Dr. Sullivan to provide an economic and econometric analysis of **[*16]** whether the antitrust price injury (i.e., antitrust impact) alleged in the operative complaint is common to all members of the proposed class, and whether "common formulaic proof" of the existence of some price injury will be available at trial for all putative class members. Sullivan Rep. ¶ 11. Dr. Sullivan's report provides his opinions relating to the common antitrust injury caused by allegations that SanDisk has fraudulently procured and enforced the Disputed Patents against its competitors. Id. ¶ 12.

Dr. Sullivan's methodology in evaluating class-wide antitrust injury involved four steps. First, he evaluated "direct" evidence of SanDisk's market power in the markets for NAND flash chips and final flash products by analyzing SanDisk's licensing revenues obtained from competitors through SanDisk's enforcement of the Disputed Patents and SanDisk's licensing practices.[8] Sullivan Rep. ¶¶ 39-46, 60-87; Sullivan Decl. ¶ 13. Second, Dr. Sullivan evaluated the impact of the Disputed Patents on SanDisk's licensing revenue (i.e., royalty payments) by analyzing

---

[8] According to Dr. Sullivan, he corroborated this direct evidence with economic evaluation of market definition, substitutability across products, and market concentration. See Sullivan Decl. ¶ 13.

the facts and circumstances of SanDisk's license agreements, the growth of SanDisk's patent portfolio over time, and changes in royalties **[*17]** that occurred when the Disputed Patents expired in 2009.[9] Sullivan Rep. ¶¶ 60-87; Sullivan Decl. ¶ 14. Third, he used SanDisk's sales data to create an econometric regression model[10] of SanDisk prices for final flash products, which he asserts explains more than 93% of the variation in SanDisk's pricing[11] and provides the effect of competitors' costs on SanDisk prices equal to 80.1%, i.e., a $1.00 increase in competitors' costs increases SanDisk final flash product prices by $0.801. Sullivan Rep. ¶¶ 92-101; Sullivan Decl. ¶ 15. Fourth, Dr. Sullivan combined the results from his licensing analysis with his econometric model to determine a specific overpayment for each final flash product sold by SanDisk, which is specific to each customer, product, and time period. Sullivan Rep. ¶¶ 113-123; Sullivan Decl. ¶ 16. According to Dr. Sullivan, his econometric model directly measures the effects of SanDisk's competitors' costs on SanDisk's pricing for final flash products. Sullivan Decl. ¶ 59. He asserts that his empirical analysis uses a reduced form approach to measure the total effect of competitor costs on SanDisk. Id. He then used the royalty payments to determine the increase in competitor **[*18]** costs and SanDisk's pricing for final flash products on a product-by-product basis for each SanDisk customer and time period. Id.

Dr. Sullivan concluded that each putative class member suffered some antitrust injury (i.e., overpaid for final flash products) because SanDisk's licensing program, which was driven in large part by the Disputed Patents, resulted in SanDisk raising its prices (i.e., charging supra-competitive prices) on final flash products in response to the increased prices charged by its competitors due to royalties on NAND flash chips. See Sullivan Rep. ¶¶ 21, 88, 95. According to Dr. Sullivan, his economic analysis shows that a common methodology can be applied to establish common antitrust price injury from SanDisk's alleged anti-competitive behavior. Id. ¶ 22. Dr. Sullivan claims that his econometric analysis of SanDisk's sales confirms the relationship between SanDisk's competitors' costs and the elevated prices SanDisk charged for its final flash products, and that an application of his licensing analysis in the "but-for" world allows for the formulaic calculation of common price impact and actual damages for purchasers of SanDisk's final flash products. Id. ¶ **[*19]** 88. In other words, Dr. Sullivan claims that his methodology demonstrates that antitrust impact and damages can be proven on a class-wide basis through common proof.

Pursuant to *Rule 702* and Daubert, SanDisk moves to exclude the expert report and testimony of Dr. Sullivan on the ground that Dr. Sullivan's opinions are unreliable and irrelevant for various reasons.[12] In support of its motion, SanDisk submitted an expert report prepared by Michael Keeley, Ph.D. ("Dr. Keeley"). Dr. Keeley purports to identify flaws in Dr. Sullivan's economic analysis and conclusions. Below, the Court will address SanDisk's arguments for excluding Dr. Sullivan's expert report and testimony.

1. Dr. Sullivan's Direct Evidence Opinion

---

[9] Dr. Sullivan claims that such an analysis allows for a determination of the magnitude of royalties that would have occurred "but for" the Disputed Patents. Sullivan Decl. ¶ 14.

[10] "A regression analysis is a common statistical tool . . . designed to isolate the influence of one particular factor - e.g. sex - on a dependent variable - e.g. salary." *Equal Employment Opportunity Comm'n v. Gen. Tel. Co. of Northwest, Inc., 885 F.2d 575, 577 n. 3 (9th Cir. 1989)*.

[11] In other words, Dr. Sullivan claims that his econometric model provides explanatory factors that explain the vast majority of differences in final flash product prices across different products, purchasers, and time periods. Sullivan Rep. ¶ 114.

[12] SanDisk does not challenge Dr. Sullivan's qualifications as an expert. Having reviewed Dr. Sullivan's curriculum vitae, the Court finds that he is qualified to render expert opinions in the field of antitrust economics. It is undisputed that Dr. Sullivan earned his B.A., M.A., and Ph.D. in economics from the University of California, San Diego, and that Dr. Sullivan has published economic research in peer-reviewed academic journals as well as articles on calculating lost profits and reasonable royalty damages. Sullivan Decl. ¶ 7; see also Sullivan Rep. ¶ 7, Exh. A-1. It is also undisputed that Dr. Sullivan has provided professional economic consulting services since 1992, including economic analyses on issues such as monopolization, restraints of trade, lost profits, and reasonable royalty. Sullivan Decl. ¶¶ 1-3, 8; see also Sullivan Rep. ¶ 8, Exh. A-1.

Dr. Sullivan opines that SanDisk's patent enforcement and licensing practices are direct evidence of the existence and use of market power by SanDisk that is common to all putative class members. Sullivan Rep. ¶¶ 45-46. According to Dr. Sullivan, "SanDisk's ability to earn significant licensing revenue in the marketplace provides direct evidence of the market power of SanDisk by way of its patents." Id. ¶ 45. SanDisk contends that Dr. Sullivan's direct evidence opinion should **[*20]** be excluded because it is contrary to law as Dr. Sullivan failed to analyze whether SanDisk restricted market-wide output or imposed supra-competitive prices, and because Dr. Sullivan did not define or identify the relevant market in which he asserts there is direct evidence of SanDisk's market power. In addition, SanDisk contends that exclusion of Dr. Sullivan's direct evidence opinion is appropriate because Dr. Sullivan analyzed evidence relating to the wrong market, i.e., the market for NAND flash chips rather than the market for final flash products.

The Court rejects SanDisk's arguments. Contrary to SanDisk's contention, Dr. Sullivan specifically identified the relevant market in which he claims there is direct evidence of SanDisk's market power. Citing to the operative complaint, Dr. Sullivan identifies the relevant market as "the market for final flash products, the manufacture, sale, or importation of which is subject to the reach of U.S. patent laws."[13] Sullivan Rep. ¶ 47. Further, Dr. Sullivan specifically analyzed SanDisk's ability to raise prices to supra-competitive levels in the market for final flash products through its enforcement and licensing of its patents, i.e., SanDisk's **[*21]** exclusionary conduct.[14] See id. §§ 5-6. In doing so, Dr. Sullivan noted that a patent provides a patent holder the right to exclude, and that his "[p]reliminary calculations indicate that between 88% and 100% of worldwide sales of NAND flash memory were subject to SanDisk's pricing or royalty impact." See e.g., id. ¶¶ 45, 55-59, 68-87. Dr. Sullivan opines that: "Royalties paid by SanDisk's licensees are one cost that increases competitors' costs of production, increases competitors' prices, and thus increases the residual demand for SanDisk's products. As a result of greater residual demand for SanDisk's products, SanDisk was able to sell products at higher prices and greater quantities that it otherwise would have." Sullivan Rep. ¶ 90. According to Dr. Sullivan, his econometric model demonstrates that increased NAND flash chip costs from the payment of royalties resulted in higher SanDisk prices for final flash products from a combination of restricted market-wide output or supra-competitive prices.[15] Sullivan Decl. ¶ 19.

Finally, contrary to SanDisk's contention, Dr. Sullivan did not limit his analysis to evidence from the "wrong market," i.e., the NAND flash chip market. Nor **[*22]** does Dr. Sullivan's report "utterly fail[] to explain" how evidence relating to NAND flash chips is connected to his conclusions regarding final flash products. Dr. Sullivan's report explains that NAND flash chips are a fundamental and substantial component of final flash products. Sullivan Rep. ¶¶ 36-38. Further, Dr. Sullivan analyzed both the NAND flash chip market and the final flash product market. See id. §§ 4, 6. According to Dr. Sullivan, an analysis of both markets shows that SanDisk used the Disputed Patents to raise costs in the NAND flash chip market, which raised its competitors' costs and prices in the final flash product and allowed SanDisk to sell its final flash products at higher prices and in greater quantities than it otherwise would have. See id.

---

[13] Dr. Sullivan's report also identifies the submarkets set forth in the operative complaint. Sullivan Rep. ¶ 47.

[14] Enforcement of a patent obtained by fraud constitutes an unlawful exclusionary act. See Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 705e (3d ed. 2008). Such enforcement is not limited to infringement actions, it can also include refusing to license or "licensing and thus increasing rivals' costs." Id.

[15] To determine the impact of SanDisk's competitors' costs on SanDisk's prices for final flash products, Dr. Sullivan utilized linear regression analysis to measure the statistical relationship between SanDisk's prices and the costs of its competitors, controlling for other factors. See Sullivan Rep. ¶¶ 96-97. Dr. Sullivan used the statistical relationships to determine the extent to which higher competitor costs from royalties earned by the Disputed Patents resulted in higher prices paid by consumers for final flash products sold by SanDisk. Id. ¶ 96. Dr. Sullivan asserts that "[s]uch a reduced form [econometric] approach to measuring the effects of costs on prices is supported by published economic literature," and that "[t]he regressions for determining the effect of competitor costs on SanDisk are based upon economic theory, statistical evaluation, and economic literature." Id. ¶¶ 96-97. Dr. Sullivan further asserts that a reduced form approach, which is an econometric technique that measures the overall impact of one variable on another without requiring separate structural modeling of intermediate variables or steps, is well-accepted and well supported in published economics literature for estimating the impact of costs on prices, and is economically appropriate here because separate structural estimation of restricted output and supra-competitive prices, individually, is not needed to determine the overall impact of royalties on SanDisk prices. Sullivan Decl. ¶ 20.

¶¶ 88, 90-91; Sullivan Decl. ¶¶ 25-27. To the extent SanDisk challenges the factual basis of Dr. Sullivan's direct evidence opinion, questions regarding the evidence relied upon by Dr. Sullivan go to the weight, not the admissibility, of his opinion. *Hangarter v. Provident Life and Acc. Ins. Co., 373 F.3d 998, 1017 n. 14 (9th Cir. 2004)*; see also *Manpower, Inc. v. Ins. Co. of Pennsylvania, 732 F.3d 796, 808-809 (7th Cir. 2013)* (an expert's reliance on faulty information is a matter to be explored on cross-examination; it does not go to admissibility).

2. Dr. Sullivan's Market Concentration [*23] Opinions

In evaluating whether SanDisk had sufficient market power to impose price increases in the marketplace, Dr. Sullivan considered market concentration. Sullivan Rep. ¶ 55. According to Dr. Sullivan, the most common approach to evaluating concentration in the market is known as the Herfindahl-Hirschman Index ("HHI").[16] Id. ¶ 57. Dr. Sullivan opines that SanDisk, through its own sales and that of its licensees, likely impacted a very high share of the relevant market. Id. ¶ 58. Specifically, Dr. Sullivan states that his "[p]reliminary calculations indicate that between 88% and 100% of worldwide sales of NAND flash memory were subject to SanDisk's pricing or royalty impact." Id. SanDisk contends that Dr. Sullivan's market concentration opinions should be excluded for three reasons: (1) Dr. Sullivan predicates his analysis on sales of NAND flash chips rather than final flash products; (2) Dr. Sullivan's opinions are contrary to law because SanDisk's market share of the final flash products market did not exceed 15.3% during the relevant period; and (3) Dr. Sullivan's analysis of the HHI is unhelpful to the trier of fact because such an analysis is irrelevant in a *§ 2* Sherman Act case. **[*24]**

The Court rejects SanDisk's arguments. First, as discussed above, Dr. Sullivan's economic analysis is not limited to sales of NAND flash chips. Dr. Sullivan specifically analyzed final flash product sales and the relationship between NAND flash chips costs and SanDisk's final flash product sales. See Sullivan Rep. ¶¶ 36-37 & §§ 4, 6. Second, SanDisk has not shown that Dr. Sullivan's market concentration opinions are contrary to law. While Courts generally require a 65% market share to establish a prima facie case of market power, *Image Technical Services, Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1206 (9th Cir. 1999)*, monopoly power in the context of a Walker Process claim can be shown by proof that the fraudulently acquired patent dominated a relevant antitrust market, and thus conveyed substantial power or, in an attempt case, had the potential to do so. See Areeda, et al., ***Antitrust Law*** ¶ 705f (patents may facilitate the creation of market power by excluding entry in refusal to license cases, or by raising rivals' costs in the case of actual licensing). Finally, SanDisk has not cited any authority demonstrating that the HHI, which is "[a] commonly used metric for determining market share," see *Saint Alphonsus Medical Center-Nampa Inc. v. St. Luke's Health System, Ltd., 778 F.3d 775, 786 (9th Cir. 2015)*; see also *F.T.C. v. PPG Industries, Inc., 798 F.2d 1500, 1503, 255 U.S. App. D.C. 69 (D.C. Cir. 1986)* ("Market power or the lack of it is often measured by the HHI."), **[*25]** is inapplicable to the facts of this case such that Dr. Sullivan's opinions regarding market concentration should be excluded as unhelpful to the trier of fact.

3. Dr. Sullivan's Opinions Regarding Impact and Damages

SanDisk contends that Dr. Sullivan's theory of impact and damages hinges on his determination that SanDisk would have collected $1.5 billion less in license fees and royalties in the "but-for" world. SanDisk asserts that an essential aspect of this determination is that, in 1997, SanDisk's licensees would not have been willing to enter into any cross-license agreement with SanDisk absent the '338 patent. SanDisk argues that Dr. Sullivan's opinion "regarding the intent and mental states of SanDisk's licensees underlying their decisions to enter into cross-licensees with SanDisk" is improper. According to SanDisk, Dr. Sullivan's impact and damages opinions should be excluded because Dr. Sullivan impermissibly opines on the intent of SanDisk's licensees in reaching his conclusion regarding the royalties attributable to the Disputed Patents. The Court disagrees.

---

[16] It is undisputed that the HHI is a widely accepted method used by economists to measure market concentration. *ProMedica Health System, Inc. v. F.T.C., 749 F.3d 559, 568 (6th Cir. 2014)*. The HHI is calculated by summing the squares of the individual firms' market shares. Id. HHI data is used to classify markets into three types: unconcentrated markets, moderately concentrated markets, and highly concentrated markets. Id.

Contrary to SanDisk's contention, Dr. Sullivan does not impermissibly offer an opinion regarding the intent of any entity that **[*26]** entered into a licensing agreement with SanDisk. Instead, Dr. Sullivan offers his opinions as to how the Disputed Patents impacted the royalties obtained by SanDisk, including what the royalties would have been if SanDisk had not obtained the Disputed Patents. According to Dr. Sullivan, the Disputed Patents played a significant role in SanDisk's ability to earn licensing revenues from its NAND flash technology. Sullivan Rep. ¶ 68. Dr. Sullivan opines that SanDisk's license agreements were driven primarily by the successful enforcement of the '338 patent, and that SanDisk's licensing program would have been significantly impaired without the Disputed Patents. Id. ¶¶ 68-73. Dr. Sullivan concluded that "but-for" SanDisk's alleged fraudulent obtainment of the Disputed Patents, it is "plausible" that SanDisk would have received very little licensing revenues, if any, from its NAND flash technology licensing. Id. ¶ 68. In reaching his opinions regarding how the Disputed Patents impacted the royalties obtained by SanDisk, Dr. Sullivan analyzed SanDisk's licensing agreements, evidence relating to SanDisk's licensing program, SanDisk demand letters, litigation involving SanDisk's patents, the value of **[*27]** SanDisk's foreign patents compared to its U.S. patents, published literature, and the decline in royalties when the Disputed Patents expired. Id. ¶¶ 69-77. Dr. Sullivan asserts that public research confirms that economic value is commonly concentrated in a relatively small number of patents within a larger patent portfolio. Id. ¶ 75. SanDisk, for its part, failed to proffer any authority or analysis demonstrating that Dr. Sullivan's impact or damages opinions should be excluded on the ground that he impermissibly opines on the intent of SanDisk's licensees.[17]

4. Dr. Sullivan's Opinions Regarding Pass-Through and SanDisk's Competitive Response

SanDisk contends that Dr. Sullivan's testimony regarding "pass-through" is inadmissible because it is based on unsupported assumptions about how royalty costs purportedly attributable to the Disputed Patents were passed through the distribution chain and SanDisk's competitive response. Specifically, SanDisk argues that Dr. Sullivan impermissibly assumes the following based solely on economic theory: (1) SanDisk's NAND flash chip manufacturer licensees passed on 100% of the allegedly unlawful overcharge attributable to the Disputed Patents to flash **[*28]** product manufacturers; (2) flash product manufacturers, in turn, raised their prices on final flash products; and (3) SanDisk always raised its prices for final flash products in response to the increased prices charged by its competitors. According to SanDisk, Dr. Sullivan's impact and damages opinions should be excluded as unreliable because Dr. Sullivan failed to evaluate whether there is any "real-world" evidence to support his assumptions. In addition, SanDisk argues that Dr. Sullivan's impact and damages opinions should be excluded because his assumptions do not fit the facts of the case as they are inconsistent with "real-world" evidence regarding conditions in the flash memory industry.

The Court finds SanDisk's arguments unpersuasive. As an initial matter, SanDisk failed to show that Dr. Sullivan's opinions are predicated on the assumption of 100% pass-through or the assumption that SanDisk always raised its own prices for final flash products in response to the increased prices of its competitors. Indeed, a review of Dr. Sullivan's report reveals that he did not assume 100% pass-through; rather, he calculated the overall pass-through rate to be 80.1% using regression analysis. **[*29]** See Sullivan Rep. § 6. Further, Dr. Sullivan did not rely solely on "economic theory" in rendering his impact and damages opinions. As set forth above, Dr. Sullivan utilized linear regression analysis to measure the extent to which higher competitors' costs from royalties earned from the Disputed Patents resulted in higher prices paid by consumers for SanDisk's final flash products. See id. § 6.2.3. Dr. Sullivan's methodology, which is described in detail on pages 48-54 of his report, indicates that his analysis for determining the effect of competitors' costs on SanDisk prices for final flash products is based on economic theory, economic literature, and statistical evaluation. Id. In performing his regressions, Dr. Sullivan relied upon SanDisk's sales data and NAND flash chip sales data provided by Semico Research Corp. ("Semico"), a semiconductor marketing and consulting research company that provides, among other things, the marketplace price of purchasing NAND flash chips for use in final flash products.[18] Id. ¶¶ 79, 97. SanDisk has failed to show that Dr. Sullivan's

[17] To the extent SanDisk objects to portions of Dr. Sullivan's deposition testimony, the Court will not address those objections. Plaintiffs do not rely on Dr. Sullivan's deposition testimony to satisfy any of *Rule 23*'s requirements.

methodology suffers from serious flaws such that his impact and damages opinions should be excluded as unreliable. SanDisk's **[*30]** arguments regarding Dr. Sullivan's flawed assumptions go to the weight, not the admissibility, of his impact and damages opinions. See *Cotton v. City of Eureka, Cal., 2010 U.S. Dist. LEXIS 136270, 2010 WL 5154945, at *13 (N.D. Cal. 2010)* ("The matter of whether the assumptions underlying Dr. Bonnell's opinions are accurate is germane to the weight, as opposed to the admissibility, of his opinions.") (citing *Hangarter, 373 F.3d at 1017 n. 14*; *Bergen v. F/V St. Patrick, 816 F.2d 1345, 1352 n. 5 (9th Cir. 1987))*.

Finally, the Court rejects SanDisk's argument that Dr. Sullivan's impact and damages opinions should be excluded on the ground that his 100% pass-through assumptions do not fit the facts of this case because they are contrary to market realities. According to SanDisk, Dr. Sullivan's opinions are inconsistent with Dr. Keeley's empirical analysis, which illustrates that SanDisk frequently did not raise its NAND flash chip prices when its costs of NAND flash chip production increased and often did not raise prices for its final flash products in response to cost increases. SanDisk's objection goes to the weight, not the admissibility, of Dr. Sullivan's opinions. Disputes over the results reached and assumptions made with respect to competing methodologies are issues to be decided by the trier of fact. See *In re Online DVD Rental Antitrust Litigation, 2010 U.S. Dist. LEXIS 138558, 2010 WL 5396064, at *10 (N.D. Cal. 2010)*. At the class certification stage, the issue is not which expert is the **[*31]** most credible, or the most accurate modeler, but rather whether the plaintiffs have advanced a plausible methodology to demonstrate that antitrust injury can be proved on a class-wide basis. Id.

5. Dr. Sullivan's Linear Regression Analysis

SanDisk contends that Dr. Sullivan's linear regression analysis should be excluded as unreliable because it is incapable of analyzing the impact of competitors' NAND flash chip costs on SanDisk's prices for final flash products (i.e., the very relationship he purports to study). According to Dr. Keeley, the average NAND flash chip price that Dr. Sullivan derives from the Semico data has no impact on the results of his regression analysis because the results of Dr. Sullivan's econometric model are the same when the price derived from the Semico data is removed from the model and replaced with a value equal to one. In addition, SanDisk contends that Dr. Sullivan's regression analysis should be excluded because his econometric model cannot establish any relationship between royalties paid to SanDisk and the prices of SanDisk's final flash products as Dr. Sullivan's analysis neither includes any measure of SanDisk's royalties nor estimates a relationship **[*32]** between SanDisk's royalties and the price of SanDisk's final flash products.

The Court finds that SanDisk has failed to demonstrate that Dr. Sullivan's linear regression analysis should be exlcuded. SanDisk does not dispute that regression analysis is a reliable methodology that is well-accepted in the field of antitrust economics. See, e.g., *In re High-Tech Employee Antitrust Litigation, 2014 U.S. Dist. LEXIS 47181, 2014 WL 1351040, at *14 (N.D. Cal. 2014)* (nothing that courts have recognized that "regression analysis is generally a reliable method for determining damages in antitrust cases and is 'a mainstream tool in economic study'"). Instead, SanDisk argues that Dr. Sullivan's regression analysis is inadequate because of the data he used, i.e., the Semico data. However, such an objection goes to the weight, not the admissibility, of Dr. Sullivan's opinions. See *Hemmings v. Tidyman's Inc., 285 F.3d 1174, 1188 (9th Cir. 2002)* ("[I]n most cases, objections to the inadequacies of a study are more appropriately considered an objection going to the weight of the evidence rather than its admissibility."); see also *Obrey, 400 F.3d at 696* (same). As noted above, the question at this juncture is not whether Dr. Sullivan's regression analysis is correct or supported by reliable facts but rather whether his analysis is the product of a generally accepted method for demonstrating antitrust **[*33]** impact and damages through common evidence. *In re Online DVD Rental, 2010 U.S. Dist. LEXIS 138558, 2010 WL 5396064, at *10*; see *In re Aftermarket Automotive Lighting Products Antitrust Litigation, 276 F.R.D. 364, 373-374 (C.D. Cal. 2011)* ("the Court is not supposed to decide at the certification stage which expert analysis or model is better"). SanDisk's objection to the

---

[18] The Semico data includes worldwide revenue, units, and average selling prices for NAND chips on a monthly basis. Sullivan Rep. ¶ 79. The Semico data also includes worldwide revenues, units, and average selling prices for USB drives, memory cards, solid state hard drives, MP3 players, and portable media players on a quarterly basis. Id.

data used by Dr. Sullivan raises an issue to be decided by the trier of fact. *In re Online DVD Rental, 2010 U.S. Dist. LEXIS 138558, 2010 WL 5396064, at *10*.[19]

Similarly, SanDisk's objection regarding Dr. Sullivan's failure to establish a relationship between royalties paid to SanDisk and the prices of SanDisk's final flash products is not a proper basis to exclude Dr. Sullivan's regression analysis. While Dr. Sullivan does not include royalties as a separate variable in his regression analysis, his econometric model evaluates the effects of competitors' costs on SanDisk's pricing for final flash products. Dr. Sullivan then used the royalty payments to establish a relationship between the royalties paid to SanDisk and the prices of SanDisk's final flash products on a product-by-product basis for each customer and time period, i.e., Dr. Sullivan used the royalty payments to determine the increase in competitors' costs and prices for San Disk's final flash products on a product-by-product basis for each customer and time period. See Sullivan Rep. ¶¶ 97-99; **[*34]** Sullivan Decl. ¶ 59.[20] To the extent SanDisk criticizes Dr. Sullivan for not including royalties as a separate variable in his regression analysis, this criticism does not justify exclusion. The selection of variables to include in a regression analysis is normally a question that goes to weight of the expert's analysis rather than its admissibility. *Rudebusch v. Hughes, 313 F.3d 506, 516 (9th Cir. 2002)* (citing *Bazemore v. Friday, 478 U.S. 385, 400, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)* ("Normally, failure to include variables will affect the analysis' probativeness, not its admissibility."); *Maitland v. Univ. of Minnesota, 155 F.3d 1013, 1017 (8th Cir. 1998)* (if a regression analysis omits variables, it is for the finder of fact to consider the variables that have been left out of an analysis, and the reasons given for the omissions, and then to determine the weight to accord the study's results)); see *In re TFTLCD (Flat Panel) Antitrust Litigation, 267 F.R.D. 583, 604 (N.D. Cal. 2010)* (plaintiffs are not required to prove the merits of their case-in-chief at the class certification stage; they need not demonstrate that their multiple regression analysis captures all the proper variables and thus reaches the "right" answer). SanDisk has not shown that Dr. Sullivan's regression analysis suffers from serious methodological flaws such that it should be excluded.

Finally, to the extent Dr. Keeley used a "version" of Dr. Sullivan's model and determined **[*35]** that the royalties paid to SanDisk did not have any positive effect on the prices for SanDisk's final flash products when Dr. Sullivan's competitors' NAND flash chip cost variable is reduced by the amount of royalties that Dr. Sullivan asserts that SanDisk received, this is not a proper basis to exclude Dr. Sullivan's opinions. When experts reach different conclusions at the class certification stage, it is not for the Court to decide which expert's analysis is correct. See *In re Aftermarket Automotive Lighting Products, 276 F.R.D. at 373-374*; *Apple Inc. v. Motorola, Inc., 757 F.3d 1286, 1314 (Fed. Cir. 2014)* ("A judge must be cautious not to overstep its gatekeeping role and weigh facts, evaluate the

---

[19] In its reply brief, SanDisk reiterates its argument that Dr. Sullivan's econometric model is incapable of determining any effect of the Semico data. SanDisk contends that the fatal flaw in Dr. Sullivan's "methodology" is "caused by a well-recognized error known as 'perfect collinearity.'" Contrary to SanDisk's contention, this "error" is not a sufficient basis to exclude Dr. Sullivan's regression analysis. Regressions have been admitted in the face of expert disagreement regarding whether collinearity posed a problem. See *In re High Fructose Corn Syrup Antitrust Lit., 295 F.3d 651, 660-661 (7th Cir. 2002)*; see also *In re High-Tech Employee, 2014 U.S. Dist. LEXIS 47181, 2014 WL 1351040, at *21 n. 51* (noting that the admission of such regressions "is not surprising given that the concept of collinearity is not a *methodology*, but a common phenomenon that results when using the methodology of regression analysis") (emphasis in original) (citing *Daubert, 509 U.S. at 595* ("The focus [of the admissibility inquiry], of course, must be solely on principles and methodology, not on the conclusions that they generate.")).

[20] Dr. Sullivan calculated his competitor NAND flash chip costs variable by multiplying the number of gigabytes per SanDisk product by the price per gigabyte derived from the market-wide data on NAND flash [chip] sales provided by Semico. Sullivan Rep. ¶ 97(d). Dr. Sullivan then calculated royalties per gigabyte in the worldwide NAND marketplace over time and connected them to the SanDisk sales data based on the time period and capacity of each SanDisk product. Id. ¶ 99. According to Dr. Sullivan, royalties calculated in this way for each SanDisk sale represent the actual royalties paid by competitors and the royalties that would have been paid by competitors but for SanDisk's alleged fraudulent obtainment of the patents-at-issue. Id. Dr. Sullivan opines that the coefficients from the regression model can be combined with the percentage decrease in competitor NAND flash chip costs resulting from lower royalties to calculate the overpayment associated with each sale in the SanDisk data. Id. Dr. Sullivan concludes that damages to any individual customer can be determined based on the sum total of this overpayment across all NAND flash products purchased from SanDisk. Id.

correctness of conclusions, impose its own preferred methodology, or judge credibility, including the credibility of one expert over another. These tasks are solely reserved for the fact finder.").

6. Dr. Sullivan's Damages Calculations

SanDisk contends that Dr. Sullivan's opinion as to damages outside the class period defined in the operative complaint (i.e., prior to June 25, 2006) should be excluded because it is irrelevant. In addition, SanDisk contends that Dr. Sullivan's opinion regarding prejudgment interest prior to the filing of the complaint should be excluded as contrary to law. The Court finds SanDisk's objections **[*36]** to be premature. Whether Plaintiffs are entitled to recover damages prior to June 25, 2006 or prejudgment interest prior to the filing of the complaint is irrelevant for purposes of determining whether class certification is appropriate. As such, the Court will not reach the merits of SanDisk's objections.

7. Conclusion

For the reasons stated above, the Court finds that SanDisk has failed to demonstrate that Dr. Sullivan's expert report or any of his opinions should be excluded as unreliable or irrelevant. Accordingly, because Plaintiffs have sustained their burden to show that the requirements for admissibility under *Rule 702* and Daubert have been met by a preponderance of the evidence, SanDisk's motion to exclude is DENIED.

B. Motion for Class Certification

Plaintiffs contend that class certification is appropriate because the requirements of *Rule 23(a)* are satisfied, and because this action meets the requirements of *Rule 23(b)(3)*, i.e., common questions of law or fact predominate and a class action is superior to other available methods of adjudication. SanDisk disagrees, arguing that class certification should be denied because Plaintiffs have failed to establish that common issues will predominate or that Plaintiffs **[*37]** are adequate and typical class representatives. Thus, SanDisk does not dispute that *Rule 23(a)*'s numerosity, ascertainability, and commonality requirements have been met. Below, the Court will address the requirements of *Rule 23* in turn.

1. *Rule 23(a)*

To satisfy *Rule 23(a)*, the party seeking class certification must show: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed.R.Civ.P. 23(a)*.

a. Numerosity and Ascertainability

Rule 23(a)(1) requires that the class must be "so numerous that joinder of all members is impracticable." *Fed.R.Civ.P. 23(a)(1)*. In addition, the class should be "ascertainable," *Mazur v. eBay Inc., 257 F.R.D. 563, 567 (N.D. Cal. 2009)*, meaning that the class definition must be "definite enough so that it is administratively feasible for the court to ascertain whether an individual is a member," *O'Connor v. Boeing N. Am., Inc., 184 F.R.D. 311, 319 (C.D. Cal. 1998)*. Here, SanDisk's records establish that there were 285 direct purchasers of final flash products during the class period defined in the operative complaint. Keeley Rep. ¶ 44. This is sufficient to satisfy the numerosity **[*38]** and ascertainability requirements. In general, courts find that the numerosity factor is satisfied when the class includes 40 or more members. See *Jordan v. Los Angeles County, 669 F.2d 1311, 1319 (9th Cir.)*, vacated on other grounds, *459 U.S. 810, 103 S. Ct. 35, 74 L. Ed. 2d 48 (1982)*; see also *Consolidated Rail Corp. v. Town of Hyde Park, 47 F.3d 473, 482 (2d Cir. 1995)* ("numerosity is presumed at a level of 40 members").

b. Commonality

Rule 23(a)(2) requires that "there are questions of law or fact common to the class." *Fed.R.Civ.P. 23(a)(2)*. "Commonality focuses on the relationship of common facts and legal issues among class members." *Hanlon v. Chrysler Corp., 150 F.3d 1011, 1021 (9th Cir. 1998)*. The commonality requirement of *Rule 23(a)(2)* is met where "the class member' claims 'depend upon a common contention' such that 'determination of its truth or falsity will resolve an issue that is central to the validity of each [claim] with one stroke.'" *Mazza, 666 F.3d at 588* (citation omitted). Thus, plaintiffs seeking to certify a class must "demonstrate 'the capacity of classwide proceedings to generate common answers' to common questions of law or fact that are 'apt to drive the resolution of the litigation.'" Id. "The commonality preconditions of *Rule 23(a)(2)* are less rigorous than the companion [predominance] requirements of *Rule 23(b)(3)*." *Hanlon, 150 F.3d at 1019*. "[C]ommonality only requires a single significant question of law or fact." *Mazza, 666 F.3d at 589*.

The Court finds that the commonality requirement has been satisfied. Common questions of law and fact **[*39]** are involved in determining whether SanDisk is liable for violating *§ 2* of the Sherman Act predicated on a Walker Process theory of liability. Common questions amenable to resolution on a class-wide basis exist as to whether SanDisk fraudulently procured the Disputed Patents, used those patents to facilitate the creation of market power by raising its competitors' costs through licensing agreements and royalty payments, and charged supra-competitive prices for its final flash products in response to its competitors raising their prices for such products due to the royalty payments. These questions are subject to generalized proof and are capable of class-wide resolution. SanDisk does not dispute that Plaintiffs have satisfied the commonality requirement. Instead, SanDisk argues that Plaintiffs have failed to demonstrate that common questions of law or fact predominate. This issue is discussed below.

c. Typicality and Adequacy

Rule 23(a)(3) requires the representative party to have claims that are "typical of the claims . . . of the class." *Fed.R.Civ.P. 23(a)(3)*. In order for a court to find typicality, "[a] class representative must be part of the class and possess the same interest and suffer the same injury as the class **[*40]** members." *Dukes, 131 S.Ct. at 2550*; see *Prado-Steiman ex rel. Prado v. Bush, 221 F.3d 1266, 1279 (11th Cir. 2000)* (typicality may not be established unless the named representative has individual standing to raise the legal claims of the class); *Turcios v. Carma Laboratories, Inc., 296 F.R.D. 638 (C.D. Cal. 2014)* (same). Typicality is satisfied "when each class member's claim arises from the same course of events, and each class member makes similar legal arguments to prove the defendant's liability." Rodriguez v. Hayes, *591 F.3d 1105, 1124 (9th Cir. 2010)* (citations omitted). The typicality requirement is permissive and requires only that the representative's claims are "reasonably co-extensive with those of the absent class members; they need not be substantially identical." *Hanlon, 150 F.3d at 1020*.

Rule 23(a)(4) requires that "the representative parties will fairly and adequately protect the interests of the class." *Fed.R.Civ.P. 23(a)(4)*. Resolution of two questions determines whether this requirement has been satisfied: (1) do the named plaintiffs and their counsel have any conflicts of interest with other class members; and (2) will the named plaintiffs and their counsel prosecute the action vigorously on behalf of the class? *Hanlon, 150 F.3d at 1020*. The adequacy requirement "serves to uncover conflicts of interest between named parties and the class they seek to represent." *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 625, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (citations omitted). A district court must "ensure that the named plaintiffs have incentives **[*41]** that align with those of absent class members so as to assure that the absentees' interests will be fairly represented." *Prado—Steiman, 221 F.3d at 1279*. Proposed class representatives have a conflict of interest with the absent putative class members if they do not have standing to assert certain claims that may be available to the absent class members. See *Lierboe v. State Farm. Mut. Auto. Ins. Co., 350 F.3d 1018, 1022-1023 (9th Cir. 2003)* (finding that class representatives must have standing to bring all claims held by the putative class to which they belong and which they purport to represent).

SanDisk contends that ESE and MFLASH are not adequate class representatives because they did not purchase any SanDisk products during the class period defined in the operative complaint. In addition, SanDisk contends that Ritz and CPM are not typical or adequate class representatives because they lack standing. Specifically, SanDisk argues that Ritz and CPM do not have standing because they did not purchase products in the SSD, wireless memory, and embedded storage markets, and because they did not suffer injury in the market where competition was allegedly being restrained, i.e., the NAND flash chip market. Finally, SanDisk contends that Ritz and CPM's claims are not typical **[*42]** of the claims of the proposed class members because their purchases were substantially smaller and based on different terms than the high-volume retailers and distributors that account for the bulk of the putative class members' damages.

In response, Plaintiffs do not dispute that neither ESE nor MFLASH purchased final flash products during the class period defined in the operative complaint, i.e., on or after June 25, 2006. Instead, they argue that ESE and MFLASH purchased final flash products during the class period defined in the instant motion, i.e., on or after July 1997. The Court rejects Plaintiffs' attempt to dramatically expand the class period defined in the operative complaint by nearly nine years. Plaintiffs have not cited any authority demonstrating that it is proper for the Court to make such a major change to the class definition at this late stage of the litigation without an amendment of the operative complaint. Courts addressing this issue have refused to consider certifying a class beyond the definition provided in the operative complaint. See *Johnson v. Harley-Davidson Motor Co. Group, LLC, 285 F.R.D. 573, 577 n. 2 (E.D. Cal. 2012)* (court is bound by the class definition provided in the complaint); *Costelo v. Chertoff, 258 F.R.D. 600, 604 (C.D. Cal. 2009)* ("The Court is bound to class definitions provided in **[*43]** the complaint and, absent an amended complaint, will not consider certification beyond."); *Berlowitz v. Nob Hill Masonic Management, Inc., 1996 U.S. Dist. LEXIS 22599, 1996 WL 724776, at *2 (N.D. Cal. 1996)* (refusing to consider a broader class definition than that which was contained in the complaint; stating that the court was "bound by the class definition provided in the complaint" and that it would "not consider certification of the class beyond the definition provided in the complaint unless plaintiffs choose to amend it). Accordingly, because it is undisputed that neither ESE nor MFLASH purchased final flash products during the class period defined in the operative complaint, ESE and MFLASH do not have standing to assert claims on behalf of the proposed class. As such, the typicality and adequacy requirements are not satisfied as to these Plaintiffs. *Solis v. Regis Corp., 2006 U.S. Dist. LEXIS 77327, 2006 WL 2925682, at *8 (N.D. Cal. 2006)* ("Because Plaintiff is not a member of the putative . . . class, she is neither a typical nor an adequate representative of that class."); see *General Telephone Co. of Southwest v. Falcon Falcon, 457 U.S. 147, 156, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)* ("We have repeatedly held that a class representative must be part of the class")

As for SanDisk's contention that Ritz and CPM lack standing, the Court is unpersuaded by this argument. SanDisk's argument that Ritz and CPM lack standing because they did not suffer injury in the market where competition **[*44]** was allegedly being restrained (i.e., the NAND flash chip market) is without merit. Plaintiffs' theory of monopoly power is predicated on anti-competitive conduct that affected both the NAND flash chip market and the final flash product market. As discussed above, Plaintiffs contend that SanDisk raised its competitors' costs in the upstream market for final flash products by enforcing the Disputed Patents and extracting royalties from participants in the downstream NAND flash chip market. According to Plaintiffs, because NAND flash chips are critical components for all final flash products, SanDisk's enforcement of the Disputed Patents in the NAND flash chip market raised its competitors' costs in the market for final flash products because SanDisk's competitors paid more for flash chips. Plaintiffs further assert that, in response to the higher prices charged by its competitors in the final flash product market, SanDisk was able to raise its prices for final flash products, causing the proposed class members to pay an unlawful overcharge.

The Court also rejects SanDisk's argument that Ritz and CPM lack standing because they did not purchase SSD, wireless memory, or embedded storage. **[*45]** While it is undisputed that neither of these Plaintiffs purchased such products, Ritz and CPM's claims are reasonably co-extensive with those of the absent class members to satisfy the typicality requirement. Ritz and CPM's claims, like the putative class members' claims, arise from the same course of events and are based on the same Walker Process antitrust theory of liability. *Pecover v. Electronic Arts Inc., 2010 U.S. Dist. LEXIS 140632, 2010 WL 8742757, at *11 (N.D. Cal. 2010)* ("In antitrust cases, typicality usually 'will be established by plaintiffs and all class members alleging the same antitrust violations by defendants."); see *In re TFT-LCD, 267 F.R.D. at 593* ("The typicality requirement does not mandate that the products purchased, methods of purchase, or even damages of the named plaintiffs must be the same as those of the absent class members. . . . [T]he various products purchased and the different amount of damage sustained by individual plaintiffs do not negate a finding of typicality, provided the cause of those injuries arises from a common wrong."). Ritz and CPM possess the same interest and have suffered the same alleged injury as the absent class members, i.e., overpayment for final flash products. They will seek to prove that they were harmed by the same course of allegedly unlawful conduct in **[*46]** the same way as the putative class members. As such, their interests are fully consistent with those of the proposed class.[21]

Finally, SanDisk has failed to demonstrate that Ritz and CPM's claims are not typical of the claims of the absent class members because their purchases were substantially smaller and based on different terms than the high-volume retailers and distributors that account for the bulk of the putative class members' damages. SanDisk has not directed the Court to any evidence in the record showing that Ritz's or CPM's purchases were substantially smaller and based on different terms than the retailers and distributors that purportedly account for the bulk of the putative class' damages. But even if it had, SanDisk has failed to show that such disparities defeat typicality. Ritz and CPM possess the same interest and have suffered the same injury as the absent class members based on conduct which is not unique to them. To prove their claims, Ritz and CPM will have to show that the prices putative class members paid for SanDisk final flash products were artificially inflated by the anti-competitive conduct of SanDisk, i.e., the enforcement of the Disputed Patents. SanDisk **[*47]** has not cited any authority supporting the conclusion that the typicality requirement has not been met. The two district court cases SanDisk cited (but failed to analyze) are factually distinguishable, and do not support a finding that Ritz's or CPM's claims are not typical of the claims of the absent class members. Ritz and CPM's theory of liability is the same as the absent class members and there has been no showing that either of their individual circumstances are markedly different from the circumstances of the putative class members to defeat typicality.

In sum, the Court finds that Plaintiffs have satisfied the typicality requirement as to Ritz and CPM. This action is based on conduct which is not unique to them, and the putative class members have been injured by the same course of conduct. *Hanon, 976 F.2d at 508*. The Court also finds that Plaintiffs have satisfied the adequacy requirement. SanDisk failed to demonstrate that Ritz or CPM is an inadequate class representative because they lack standing. Further, there is no evidence demonstrating that Ritz, CPM, or their counsel has any conflicts of interest with other putative class members. Nor is there any evidence showing that Ritz's, CPM's, or **[*48]** their counsel's interest in this case is insufficient to ensure vigorous prosecution of this action on behalf of the proposed class. Ritz and CPM's counsel has extensive experience with class actions and complex litigation, Pls.' Mot. Exhs., H-K, and the record reflects that they have vigorously litigated this action in furtherance of the interests of the absent class members. SanDisk does not challenge the experience of Ritz and CPM's counsel or their capability of vigorously prosecuting this litigation.

d. Conclusion

The Court finds that Plaintiffs have demonstrated that the four requirements of *Rule 23(a)* have been met. Plaintiffs have shown that the proposed class is ascertainable and so numerous that joinder of all members is impracticable,

---

[21] Without citation to authority or legal analysis, SanDisk asserts that Ritz and CPM are not adequate representatives of class members whose claims are barred by a prior settlement. The Court rejects SanDisk's unsupported argument. It is not the role of the Court to make the parties' arguments for them. See *Indep. Towers of Wash. v. Wash., 350 F.3d 925, 929 (9th Cir. 2003)*. That aside, SanDisk's argument fails on the merits. Even if some of the absent class members' claims are barred by a prior settlement, SanDisk has failed to show how such circumstances demonstrate that Ritz's or CPM's interests are antagonistic to any member of the proposed class or that either entity will be unable to prosecute this action vigorously on behalf of the proposed class.

there are questions of law and fact common to the class, the claims of the Ritz and CPM are typical of the claims of the putative class members, and that Ritz, CPM, and their counsel will fairly and adequately protect the interests of the class.

2. *Rule 23(b)(3)*

Under *Rule 23(b)(3)*, a plaintiff must demonstrate the superiority of maintaining a class action and show "that the questions of law or fact common to class members predominate over any questions affecting only individual **[*49]** members." *Fed.R.Civ.P. 23(b)(3)*. SanDisk does not contend that Plaintiffs have failed to demonstrate the superiority of maintaining a class action. Rather, SanDisk argues that Plaintiffs have not shown that common issues will predominate.

a. Predominance

Rule 23(b)(3) "permits certification only if 'the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members.'" *Comcast, 133 S.Ct. at 1430*. This requirement must be satisfied "through evidentiary proof." *Id. at 1431*. The predominance criterion is far more demanding than *Rule 23(a)*'s commonality requirement. *Amchem, 521 U.S. at 623-624*. The predominance analysis focuses on "the legal or factual questions that qualify each class member's case as a genuine controversy" in order to determine "whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Id. at 623*. "*Rule 23(b)(3)* requires a showing that *questions* common to the class predominate, not that those questions will be answered, on the merits, in favor of the class." *Amgen, 133 S.Ct. at 1191* (emphasis in original). "[T]he office of a *Rule 23(b)(3)* certification ruling is not to adjudicate the case; rather, it is to select the 'metho[d]' best suited to adjudication of the controversy 'fairly and efficiently.'" Id.

The test for predominance **[*50]** is met when there exists generalized evidence which proves or disproves an issue or element on a simultaneous, class-wide basis, since such proof obviates the need to examine each class members' individual position. *In re Optical Disk Drive Antitrust Litigation, 303 F.R.D. 311, 318 (N.D. Cal. 2014)*. The Ninth Circuit has held that "'there is clear justification for handling the dispute on a representative rather than an individual basis' if 'common questions present a significant aspect of the case and they can be resolved for all members of the class in a single adjudication. . . .'" *Mazza, 666 F.3d at 589*. In the Ninth Circuit, "damage calculations alone cannot defeat certification." *Leyva v. Medline Indus. Inc., 716 F.3d 510, 513 (9th Cir. 2013)*; see also *Yokoyama v. Midland Nat. Life Ins. Co., Yokoyama v. Midland Nat. Life Ins. Co., 594 F.3d 1087, 1094 (9th Cir. 2010)*.

"Considering whether 'questions of law or fact common to class members predominate' begins . . . with the elements of the underlying cause of action." *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 131 S.Ct. 2179, 2181, 180 L. Ed. 2d 24 (2011)*. Under a Walker Process theory of antitrust liability, the plaintiff must show that the defendant procured the relevant patents by knowing and willful fraud on the PTO, and must prove all the elements otherwise necessary to establish a Sherman Act monopolization charge. *Ritz Camera & Image, LLC v. SanDisk Corp., 700 F.3d 503, 506 (Fed. Cir. 2012)*. These elements include: (1) an antitrust violation; (2) antitrust "impact" or injury resulting from the antitrust violation; and (3) damages sustained as a result **[*51]** of the antitrust violation. *In re Hydrogen Peroxide Antitrust Litigation, 552 F.3d 305, 311 (3d Cir. 2008)*.

i. Antitrust Violation

To establish an antitrust violation under *§ 2* of the Sherman Act, a plaintiff must show that: (1) the defendant possessed monopoly power in the relevant market; and (2) the defendant willfully acquired or maintained that power through "anti-competitive conduct," as opposed to gaining that power as a "consequence of a superior product, business acumen, or historical accident." *Image Tech. Serv., Inc. v. Eastman Kodak Co., 125 F.3d 1195,* 1202, 1208 (9th Cir. 1997) (willful acquisition or maintenance of monopoly power involves exclusionary conduct); see also Delano Farms Co. v. Cal. Table Grape Comm'n, 655 F.3d 1337, 1351 (Fed. Cir. 2011) ("To establish the antitrust portion of a Walker Process allegation, a plaintiff must show that the defendant held monopoly power in the relevant market and willfully acquired or maintained that power by anticompetitive means."). Monopoly power in the context of a Walker Process claim can be shown by proof that the fraudulently acquired patent dominated a relevant antitrust market, and thus conveyed substantial power or, in an attempt case, had the potential to do so. See Areeda, et al., ***Antitrust Law*** ¶ 705f (patents may facilitate the creation of monopoly power by excluding entry in refusal to license cases, or by raising rivals' costs in the case of actual licensing). **[*52]**

SanDisk contends that class certification should be denied because Plaintiffs cannot establish an antitrust violation with common proof.[22] Specifically, SanDisk argues that Plaintiffs offer no evidence - much less a class-wide methodology - for establishing market power. In addition, SanDisk argues that "[e]ven if Plaintiffs had demonstrated a class-wide means of establishing that SanDisk possessed market power, they would have had to demonstrate that the market power flows from the Disputed Patents." According to SanDisk, Plaintiffs failed to do so because Dr. Sullivan did not analyze the exclusionary scope of the Disputed Patents.

The Court finds that Plaintiffs have satisfied the predominance requirement with respect to the antitrust violation element of their monopolization claim. The question of whether there has been an antitrust violation is a common issue rather than an individual one. In no event will the individual circumstances of particular class members be relevant to the inquiry of whether such a violation has occurred. The adjudication of this issue will turn on common legal and factual issues. The claims of Plaintiffs and the absent class members arise out of the same course **[*53]** of events and are based on the same Walker Process theory of antitrust liability. Plaintiffs will rely on common evidence to establish an antitrust violation, i.e., to show that the Disputed Patents were fraudulently procured and used by SanDisk to acquire and maintain monopoly power in the final flash product market. SanDisk does not dispute that the issue of whether the Disputed Patents were fraudulently procured is a common question that can be resolved for all members of the class through generalized evidence. Further, contrary to SanDisk's contention, Plaintiffs have offered a plausible class-wide methodology to establish market power. To show market power through common evidence, Plaintiffs have offered the economic analysis of Dr. Sullivan. While SanDisk raises various objections to the adequacy of Dr. Sullivan's analysis regarding market power, these objections do not show that individual issues predominate. SanDisk's objections go to the merits of Dr. Sullivan's analysis. The relevant inquiry, however, is whether market power is capable of being proved at trial through common evidence. The Court finds that Plaintiffs have sufficiently made this showing. The issue of market **[*54]** power can be resolved for all members of the class in a single adjudication through generalized evidence.

ii. Antitrust Impact and Damages

Antitrust impact or antitrust injury is the damage that results from an antitrust violation. In re High-Tech Employee, 985 F.Supp.2d at 1192. "'It is the causal link between the antitrust violation and the damages sought by plaintiffs.'" Id. To satisfy the predominance requirement, Plaintiffs must show: (1) that the existence of individual injury arising from the SanDisk's alleged actions is "capable of proof at trial through evidence . . . common to the class rather than individual to its members[;]" and (2) that "the damages resulting from that injury [are] measurable 'on a class-wide basis' through the use of a 'common methodology.'" Comcast, 133 S.Ct. at 1430 (citation omitted). At the class certification stage, "any model supporting a plaintiff's damages case must be consistent with its liability case." Id. at 1433. Thus, a court can only certify a Rule 23(b)(3) class if there is evidence demonstrating the existence of a

---

[22] SanDisk asserts that Plaintiffs' failure to demonstrate that they can establish the market power element of their antitrust claims on a class-wide basis with common proof is discussed in detail in their motion to exclude, which "SanDisk hereby incorporates by reference." The Court rejects SanDisk's attempt to incorporate arguments by reference that it made in its motion to exclude. Allowing litigants to engage in such conduct would provide an effective means of deliberately circumventing page limits on briefs set forth in the Civil Local Rules and this Court's Civil Standing Orders. This Court only considers arguments that are specifically and distinctively raised by the parties in their briefs. In any event, the Court has already considered and rejected the arguments SanDisk seeks to incorporate by reference.

class-wide method of awarding relief that is consistent with the Plaintiffs' theory of liability. *Astiana v. Ben & Jerry's Homemade, Inc., 2014 U.S. Dist. LEXIS 1640, 2014 WL 60097, at *12 (N.D. Cal. 2014)*.

The Court finds that Plaintiffs have satisfied the predominance requirement with respect to the antitrust impact and damages **[*55]** elements of their monopolization claim. Plaintiffs have shown that questions common to the proposed class predominate and that the proposed class is sufficiently cohesive to warrant certification. Plaintiffs have advanced a plausible methodology (i.e., Dr. Sullivan's economic analysis) to show that the existence of antitrust injury arising from SanDisk's alleged anticompetitive conduct is capable of proof at trial through evidence common to the proposed class, and that the damages resulting from the antitrust injury are measurable through the use of a common methodology. SanDisk has not offered any authority or analysis showing that the predominance requirement has not been met. SanDisk does not dispute that regression analysis is a standard way to show antitrust impact and damages. See *In re TFT-LCD, 267 F.R.D. at 605-606*; *In re Live Concert Antitrust Litigation, 247 F.R.D. 98, 145-146 (C.D. Cal. 2007)* (citing cases). Nor has SanDisk argued that Dr. Sullivan's econometric model supporting Plaintiffs' damages case is inconsistent with Plaintiffs' liability case. Instead, SanDisk argues that Dr. Sullivan's economic analysis is fundamentally and fatally flawed for various reasons identified by its expert, Dr. Keeley.[23] SanDisk's arguments in this regard are similar to the arguments SanDisk made in connection **[*56]** with its motion to exclude. To the extent these arguments are directed to the merits of Dr. Sullivan's economic analysis and conclusions, they are insufficient to support a finding that individual issues predominate. As noted above, the relevant question is whether Plaintiffs have advanced a plausible methodology to demonstrate that antitrust injury and damages can be proven on a class-wide basis through the use of a common methodology. *California v. Infineon Technologies AG, 2008 U.S. Dist. LEXIS 81251, 2008 WL 4155665, at *9 (N.D. Cal. 2008)*. In situations where a court is confronted with two opposing expert analyses or econometric models, the Court is not at liberty to decide at the certification stage which expert analysis or model is better. See *In re Aftermarket Automotive Lighting Products, 276 F.R.D. at 373-374* (the Court's inquiry at the class certification stage is limited to determining whether plaintiffs have made a sufficient showing that the evidence they intend to present concerning antitrust impact will be made using generalized proof common to the class and that these common issues will predominate); *In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litigation, 256 F.R.D. 82, 100 (D. Conn. 2009)* ("[T]he issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of damages through generalized proof."); **[*57]** *Natchitoches Parish Hosp. Serv. Dist. v. Tyco Intern., Ltd., 247 F.R.D. 253, 270 (D. Mass. 2008)* ("To determine predominance, a court need not plunge into the weeds of an expert dispute about potential technical flaws in an expert methodology."). While SanDisk has raised numerous objections to Dr. Sullivan's economic analysis and conclusions, it has not shown that Dr. Sullivan's methodology is so flawed as to preclude class certification. SanDisk has not shown that Plaintiffs have failed to offer a plausible way to demonstrate antitrust impact and damages on a class-wide basis.

As for SanDisk's remaining arguments, the Court finds that they are insufficient to show that the predominance requirement has not been satisfied. SanDisk argues that individualized proof is required to determine whether a putative class member was impacted because the "bulk" of its final flash product sales were made pursuant to individually negotiated transactions. The Court rejects this argument. Courts have held that even if there is considerable individual variety in pricing because of individual price negotiations, plaintiffs may succeed in proving class-wide impact by showing that the minimum baseline for beginning negotiations, or the range of prices which

[23] For example, SanDisk argues that Dr. Sullivan's opinion as to the impact of the Disputed Patents is not grounded in economic reality because, among other things, his methodology for interpolating the Disputed Patents' royalty share between 1998 and 2008 is fundamentally flawed, and because he assumes, without empirical support, that the value of the Disputed Patents was common across licensees. In addition, SanDisk argues that Dr. Sullivan's pass-through opinion is "riddled" with flawed assumptions, and that Dr. Sullivan failed to perform empirical analysis that would support his assumption that SanDisk responded to supposed final flash product increases by its competitors by raising prices of its own products. SanDisk also argues that Dr. Sullivan's regression model provides no evidence that competitors' costs affect SanDisk's final flash product prices, and that Dr. Sullivan's model improperly assumes common impact and cannot be used to establish a relationship to estimate the impact of royalties attributable to the Disputed Patents on SanDisk's prices because royalty data is not used in the regression.

resulted from negotiation, was artificially **[*58]** raised by anti-competitive actions of the defendant. See, e.g., *In re Commercial Tissue Products Antitrust Litigation, 183 F.R.D. 589, 595 (N.D. Fla. 1998)*; *In re Industrial Diamonds Antitrust Litigation, 167 F.R.D. 374, 383 (S.D.N.Y. 1996)*; *In re NASDAQ Mkt.-Makers Antitrust Litigation, 169 F.R.D. 493, 523 (S.D.N.Y. 1996)*. Here, Plaintiffs' theory of antitrust liability is predicated on SanDisk's fraudulent procurement and use of the Disputed Patents to raise competitors' costs in the upstream final flash products market by extracting royalty payments from participants in the downstream flash chip market. Thus, under Plaintiffs' theory of liability, the baseline for price negotiations for SanDisk's final flash products was artificially inflated by the royalty payments. In other words, Plaintiffs claim that the prices which resulted from the SanDisk's price negotiations were artificially raised by SanDisk's anti-competitive conduct.

The Court also rejects SanDisk's argument that class certification should be denied on the ground that Dr. Sullivan's model is unreliable because he used aggregated and averaged data to establish antitrust impact. SanDisk contends that Dr. Sullivan's use of averages "masks" substantive variation in the proposed class. Courts have rejected similar arguments and held that averaged and aggregated data is not fatal to econometric models used to measure the extent of pass-through of component costs in the prices **[*59]** paid for enduse products. See *In re TFT-LCD, 267 F.R.D. at 605* ("a number of courts have held that averaged and aggregated data may be used to demonstrate pass-through"); see also *In re Static Random Access memory (SRAM) Antitrust Litigation, 264 F.R.D. 603, 614 (N.D. Cal. 2009)*; *In re Cathode Ray Tube (CRT) Antitrust Litigation, 2013 U.S. Dist. LEXIS 137946, 2013 WL 5391159, at *8 (N.D. Cal. 2013)*.

Finally, the Court rejects SanDisk's conclusory argument that antitrust impact cannot be established on a class-wide basis because SanDisk's alleged "anti-competitive conduct was directed to a component of the overall price of a product." SanDisk did not cite any controlling authority supporting its position. Further, SanDisk failed to provide any elaboration or analysis of the district court cases it cited. The Court finds SanDisk's undeveloped argument uncompelling. See *Indep. Towers of Wash., 350 F.3d at 929*. That aside, a review of the cases cited by SanDisk reveals that they are readily distinguishable from the facts of this case, and none of them holds, as SanDisk appears to suggest, that antitrust impact cannot be shown on a class-wide basis where the alleged anti-competitive conduct is directed at a component of a product.

b. Superiority

Rule 23(b)(3) requires that a class action be "superior to other methods for the fair and efficient adjudication of the controversy." *Hanlon, 150 F.3d at 1023*. Under *Rule 23(b)(3)*, the Court must consider four non-exclusive factors in evaluating whether **[*60]** a class action is a superior method of adjudicating Plaintiffs' claims: (1) the interest of each class member in individually controlling the prosecution or defense of separate actions; (2) the extent and nature of any litigation concerning the controversy already commenced by or against the class; (3) the desirability of concentrating the litigation of the claims in the particular forum; and (4) the difficulties likely to be encountered in the management of a class action. *Zinser, 253 F.3d at 1190-1192*. Where individual class members' possible recoveries are so small that no other practical method of adjudication exists, superiority is often satisfied. See *Amchem, 521 U.S. at 617*.

The Court finds that the superiority requirement is satisfied. In an antitrust action, when common questions are found to predominate, "courts generally have ruled that the superiority prerequisite of *Rule 23(b)(3)* is satisfied." See *In re Cathode Ray Tube (CRT) Antitrust Litigation, 2013 U.S. Dist. LEXIS 137945, 2013 WL 5429718, at *23 (N.D. Cal. 2013)* (citing Wright, Miller & Kane, Federal Practice and Procedure: Civil Procedure § 1781, at 254-255 (3d ed. 2004)). Here, given the common legal and factual issues involved in this case, and given that it is undisputed that the possible recoveries for many of the putative class members are too small to justify the costs of litigating their claims **[*61]** individually, the Court finds that class treatment is superior to other methods for the fair and efficient adjudication of this case. See *In re Static Random Access (SRAM) Antitrust Litigation, 2008 U.S. Dist. LEXIS 107523, 2008 WL 4447592, at *10 (N.D. Cal. 2008)* ("In antitrust cases such as this, the damages of individual direct purchasers are likely to be too small to justify litigation, but a class action would offer those with small claims the opportunity for meaningful redress."). SanDisk does not contend that any of the relevant factors weigh in favor of a finding that a class action is not the superior method for adjudicating the claims alleged in the operative complaint.

c. Conclusion

The Court finds that Plaintiffs have demonstrated that the superiority and predominance requirements of *Rule 23(b)(3)* have been met. Plaintiffs have shown the superiority of maintaining a class action, and that questions of law and fact common to the proposed class predominate over any questions affecting only individual members. Accordingly, Plaintiffs' motion for class certification is GRANTED IN PART. The Court certifies the class defined in the operative complaint.

C. Appointment of Class Representatives

Plaintiffs seek an order appointing Ritz, CPM, ESE, and MFLASH as class representatives. As discussed above, ESE and MFLASH do **[*62]** not have standing to bring claims on behalf of the class defined in the operative complaint. As such, Plaintiffs request to appoint ESE and MFLASH as class representatives is DENIED. However, Plaintiffs request to appoint Ritz and CPM as class representatives is GRANTED. For the reasons set forth above, the Court finds that Ritz and CPM are adequate class representatives.

D. Appointment of Class Counsel

"[A] court that certifies a class must appoint class counsel." *Fed.R.Civ.P. 23(g)(1)*. In appointing class counsel, the court must consider: "(i) the work counsel has done in identifying or investigating potential claims in the action; (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class." *Fed.R.Civ.P. 23(g)(1)(A)*. A court may also "consider any other matter pertinent to counsel's ability to fairly and adequately represent the interests of the class." *Fed.R.Civ.P. 23(g)(1)(B)*.

Plaintiffs request the Court appoint Kellogg, Huber, Hansen, Todd, Evans & Figel P.L.L.C., Berry Law P.L.L.C., and Stueve, Siegel, Hanson LLP as class counsel. Plaintiffs also request the **[*63]** Court appoint Morgan, Duffy-Smith & Tidalgo LLP as liaison counsel. SanDisk does not challenge the adequacy of Plaintiffs' counsel or otherwise object to Plaintiffs' request for appointment of counsel. Having reviewed the evidence submitted by Plaintiffs in connection with their request for appointment of counsel, the Court finds that Plaintiffs' counsel possess sufficient experience, knowledge of the applicable law, and resources to represent the proposed class in this matter. See Pls.' Mot., Exhs. H-K. In addition, the record reflects that Plaintiffs' counsel has expended considerable resources investigating and litigating the claims alleged in this action. Finally, there is no evidence suggesting that Plaintiffs' counsel will not fairly or adequately represent the interests of the class. Accordingly, the Court appoints Kellogg, Huber, Hansen, Todd, Evans & Figel P.L.L.C., Berry Law P.L.L.C., and Stueve, Siegel, Hanson LLP as class counsel. In addition, the Court appoints Morgan, Duffy-Smith & Tidalgo LLP as liaison counsel.

IV. CONCLUSION

For the reasons stated above, IT IS HEREBY ORDERED THAT:

1. Plaintiffs' motion to certify class and for approval of class counsel is GRANTED IN PART. **[*64]** The Court certifies the following class: "All persons residing in the United States who, on or after June 25, 2006, directly purchased from SanDisk, or from its controlled and licensed joint venture with Toshiba Corporation, final flash products using technology claimed to be patented by SanDisk ("Final Flash Product Class"). Such products include, without limitation, those SanDisk sold to retail firms, original equipment manufacturers ("OEMs"), and distributors. Purchases of final flash products that contain a microcontroller, a semiconductor that interfaces with electronic

equipment and operates the flash memory, are included in the Final Flash Product Class. Purchases of flash memory combined with dynamic random access memory ("DRAM"), flash memory combined with static random access memory ("SRAM"), or flash memory combined with a microprocessor ("system on a chip") are excluded from the Class."

2. Ritz and CPM are appointed as class representatives.

3. Kellogg, Huber, Hansen, Todd, Evans & Figel P.L.L.C., Berry Law P.L.L.C., and Stueve, Siegel, Hanson LLP are appointed as class counsel. Morgan, Duffy-Smith & Tidalgo LLP is appointed as liaison counsel.

4. SanDisk's motion to exclude **[*65]** the expert report and testimony of Dr. Sullivan is DENIED.

5. Because this Order may contain information within the scope of the parties' protective order, this Order shall remain under seal pending further Order of the Court. By no later than May 29, 2015, the parties shall jointly advise the Court which facts, if any, they contend should be redacted from the public version of this ruling. To the extent any party seeks redaction of any portion of the Court's ruling, such party shall provide the Court with the legal authority for such request and a proposed redacted order for public disclosure.

6. This Order terminates Docket 240 and Docket 259.

IT IS SO ORDERED.

Dated: May 14, 2015

Opinion by: RYA W. ZOBEL

Opinion

MEMORANDUM OF DECISION

ZOBEL, J.

This is a putative antitrust class action brought by a group of cranberry growers. Their suit accuses the largest purchaser and processor of raw cranberries, defendant Ocean Spray Cranberries, Inc. ("Ocean Spray"), and its wholly-owned subsidiary, defendant Ocean Spray Brands, L.L.C. ("OSB"), of violating *Section 2* of the Sherman

Act, *15 U.S.C. § 2*, and the Massachusetts Consumer Protection Act, Mass. Gen. Laws ch. 93A, by engaging in predatory **[*6]** pricing and price fixing in the cranberry-products industry.

Last year, I allowed defendants' motion to dismiss nine of the thirteen counts in plaintiffs' complaint, including claims for violations of the Capper-Volstead Act, *7 U.S.C. § 291*, and *Section 1* of the Sherman Act; conspiracy to violate the Sherman Act; and certain derivative actions under Chapter 93A. Docket # 78. Now, the parties both seek summary judgment on the remaining claims. Ocean Spray moves for summary judgment on all remaining counts, basing its argument on plaintiffs' alleged lack of antitrust standing and the absence of disputed facts on plaintiffs' Chapter 93A claims. Docket # 115. Plaintiffs are less ambitious, seeking partial summary judgment on liability (but not damages) for their Sherman Act monopolization claim and its derivative Chapter 93A claim. Docket # 102. The parties have also filed several motions that are related to their summary judgment motions. See Docket ## 118, 139, 140.

I. Background

The claims in this case all relate to allegedly improper activities in the cranberry-products industry. There are three relevant levels in this industry: the growers, who sit at the origin of the cranberry product supply chain; the handlers, **[*7]** who convert raw cranberries received from the growers into both end-user products (e.g., cranberry juice and dried cranberries) and downstream ingredients (e.g., cranberry concentrate); and the consumers, who are either households (for the end-user products) or food and beverage companies (for the ingredient products).

Ocean Spray, as the largest handler, sits at the center of the industry. It holds itself out as a cooperative of more than 700 cranberry and grapefruit growers in the United States, Canada, and Chile.[1] Ocean Spray has contracts with its growers. Those contracts, broadly speaking, require the growers to deliver the fruit that they grow to Ocean Spray[2] and Ocean Spray, in turn, to process the fruit into a variety of different products, including shelf-stable beverages, commodity concentrate, puree and powders, and dried cranberries. Ocean Spray must then market and sell those products, returning a percentage of the proceeds to the growers.

According to the allegations in plaintiffs' Third Amended Complaint ("TAC," Docket # 44), historically, all Ocean Spray growers earned returns on their crop based on the returns from sales of Ocean Spray's branded products, **[*8]** like Craisins® and Ocean Spray brand juices. The amount the growers received was proportionate to the volume of fruit delivered to Ocean Spray, less administrative and sales expenses. In early 2006, Ocean Spray divided the cooperative into two classes of growers: the A Pool and the B Pool.[3] Since then, the A Pool growers have delivered their fruit to Ocean Spray for use in Ocean Spray's branded and value-added products, and Ocean Spray has paid them a return based upon its sales of those products. The B Pool growers, on the other hand, have delivered their fruit to Ocean Spray for use as non-value added, commodity products, such as cranberry concentrate and frozen whole and sliced cranberries, for sale primarily to the ingredient market.[4] Ocean Spray has paid the B Pool growers a return based upon its sales of those products. The two groups are at economic cross-

---

[1] Plaintiffs dispute whether Ocean Spray is a true agricultural cooperative. Docket # 137 ¶ 1. I will refer to it as such because it holds itself out that way and because many other courts have called it a cooperative. See, e.g., ***Northland Cranberries, Inc. v. Ocean Spray Cranberries, Inc., 382 F. Supp. 2d 221, 223 (D. Mass. 2004)***; see also *Ocean Spray Cranberries, Inc. v. PepsiCo, Inc., 160 F.3d 58, 59 (1st Cir. 1998)*. But, because I do not need to make a finding about Ocean Spray's precise business form to decide these motions, I do not do so.

[2] The parties dispute whether Ocean Spray purchases or takes title to the fruit. The court does not find this distinction to be relevant to resolving the pending motions.

[3] Ocean Spray alleges that the B Pool consists of former independent growers, including former Ocean Spray growers. Cranberry growers joining Ocean Spray must join as B Pool growers. According to the operative complaint, Ocean Spray's Board of Directors is comprised of only A Pool growers.

[4] The parties dispute whether there is any mixing of A and B Pool fruit. That dispute is not material to the resolution of these motions.

purposes: A Pool growers want the price of cranberries to be low so they enjoy a higher profit margin, but B Pool growers want the price to be high so more money passes through to them.

Since July 2009, Ocean Spray has sold cranberry concentrate through an auction process in which Ocean Spray sets the opening prices. The revenue **[*9]** generated by the cranberry auction determines, in part, the payment that B Pool growers receive for their fruit. Plaintiffs allege that Ocean Spray deliberately manipulated the market price for cranberry concentrate by manipulating the cranberry auction (e.g., by driving the starting price of the auction lower with each auction).

Although Ocean Spray is the dominant handler in the industry, it does not have complete control of the cranberry market. There are some cranberry growers that are not Ocean Spray cooperative members—so-called "independent growers"—and there are independent handlers that can process these independent growers' fruit. Those independent handlers purchase (or take title to) raw fruit from growers at market-determined prices and then use the fruit as raw ingredients for the processing and manufacturing of the handlers' products that they sell to third parties. Ocean Spray competes with these independent handlers to sell finished cranberry products to customers, like food and beverage companies. According to plaintiffs, even though independent handlers do not participate in the cranberry auction, the auction plays a significant role in setting the price that the independent **[*10]** handlers can charge for their products.

II. Standard of Review

Summary judgment will be granted if there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. The court must view the record in the light most favorable to the nonmovant and draw all justifiable inferences in that party's favor. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The moving party initially bears the burden of demonstrating the absence of a genuine issue of material fact. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586 n.10, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. If the moving party has carried its burden, to defeat the motion, the nonmovant must then "come forward with 'specific facts showing that there is a genuine issue for trial.'" *Id. at 587* (quoting *Fed. R. Civ. P. 56(e)* (emphasis omitted)). The "mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment." *Anderson, 477 U.S. at 247-48*. "When opposing parties tell two different stories, one of which is blatantly contradicted by the record, so that no reasonable jury could believe it, a court should not adopt that version of the facts for purposes of ruling on a motion for summary judgment." *Scott v. Harris, 550 U.S. 372, 380, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*.

III. Defendants' Summary Judgment Motion (Docket # 115)

Defendants move for summary judgment on all remaining claims. They **[*11]** premise their arguments for the antitrust claims on plaintiffs' alleged lack of antitrust standing. They also contend that these deficiencies in the antitrust claims doom the derivative consumer protection claim, and that the consumer protection claim for retaliation is flawed as a matter of law. I will address these issues in turn.

First, however, I address defendants' recent motion to file a seven-page reply brief. That motion (Docket # 139) is denied. The court's order staying class certification proceedings (Docket # 138) instructed the parties that reply briefs for all pending motions were not necessary. Defendants offer no persuasive arguments for why the court was incorrect in reaching that conclusion. The parties are all reminded that replies may not be filed as of right in this court, and that any arguments they wish the court to consider should be raised in their primary briefs.

A. Antitrust Standing (Counts VIII and IX)

Two of the remaining four claims in this case, those about monopolization and monopsonization, arise under *Section 4* of the Clayton Act, *15 U.S.C. § 15(a)*. *Section 4*, which says that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust **[*12]** laws may sue . . . and shall recover threefold the damages by him sustained," establishes a private cause of action for damages under the federal antitrust laws. *Section 4* imposes certain threshold criteria upon plaintiffs bringing antitrust claims. First, a plaintiff must meet the statutory definition of "person" found in *15 U.S.C. § 12*. The plaintiff must also prove not only that it suffered injury in fact, but also that it suffered "antitrust injury." And the plaintiff finally must prove that its antitrust injury is not too remote from the alleged antitrust violation to allow for recovery. This last element, which focuses on "whether the plaintiff is a proper party to bring a private antitrust action," has also been called "antitrust standing." *Associated Gen. Contractors of Calif., Inc. v. Calif. State Council of Carpenters ("AGC"), 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Defendants' motion contends that this is the missing element in plaintiffs' antitrust claims.[5]

The remoteness inquiry is a judicial exception to antitrust liability, premised on the "assum[ption] that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury **[*13]** to his business or property." *Blue Shield of Va. v. McCready, 457 U.S. 465, 477, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. Courts use a multi-factor inquiry to probe remoteness, focusing on "(1) the causal connection between the antitrust violation and the harm to the plaintiff, and whether the harm was intended; (2) the nature of the injury, including whether the plaintiff is a consumer or competitor in the relevant market; (3) the directness of the injury, and whether the damages are too speculative; (4) the potential for duplicative recovery, and whether the apportionment of damages would be too complex; and (5) the existence of more direct victims." 1 Am. Bar Ass'n, ***Antitrust Law*** Developments 824 (6th ed. 2007); see also *AGC, 459 U.S. at 537-44*; *Serpa Corp. v. McWane, Inc., 199 F.3d 6, 10 (1st Cir. 1999)* (same but breaking first factor into two separate inquiries). These factors are guides from the court's analysis, but "the infinite variety of claims that may arise [in an antitrust case] make it virtually impossible to announce a black-letter rule that will dictate the result [of the antitrust standing inquiry] in every case." *AGC, 459 U.S. at 536*. But, despite its complexities, the AGC multi-factor test makes one thing clear: a critical threshold question for resolving antitrust standing issues is defining, with particularity, what the alleged antitrust violations **[*14]** are and what the markets where these violations occur look like. I will begin there, then proceed to the multi-factor analysis for each violation.

1. The Alleged Antitrust Violations

Plaintiffs assert two separate antitrust claims, both alleging violations of *Section 2* of the Sherman Act. *Section 2* generally prohibits individual market players from engaging in monopolization in any of its forms. See, e.g., *Verizon Comm'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. One of plaintiffs' *Section 2* claims is styled as "monopolization" and the other as "monopsonization." Monopolization, in the traditional sense, describes the consolidation of a market into one seller. That seller then uses its power to produce at a sub-competitive level, causing fewer goods to be sold at a greater price. This sub-competitive production results in less consumer surplus and greater deadweight loss. Monopsonization is monopolization of a supply market—it is essentially the "mirror image" of traditional monopolization. See, e.g., *Todd v. Exxon Corp., 275 F.3d 191, 202 (2d Cir. 2001)*. Monopsonization describes consolidation of a market into one buyer. See U.S. Dep't of Justice & Fed. Trade Comm'n, Horizontal Merger Guidelines 32-33 (Aug. 19, 2010). That

[5] Defendants style their challenge as one to the antitrust injury element, but the case law they cite is about the remoteness element. This confusion comes, in part, from cases that blend the antitrust injury and antitrust standing inquiries. Compare *SAS of Puerto Rico, Inc. v. Puerto Rico Tel. Co., 48 F.3d 39, 43 (1st Cir. 1995)* (suggesting that antitrust injury and standing inquiries are the same), with *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110 n.5, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* ("A showing of antitrust injury is necessary, but not always sufficient, to establish standing under *§ 4*."). Here, I use "antitrust injury" in the narrow sense, i.e., whether an injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful," *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, and I use "antitrust standing" to refer to the remoteness inquiry.

buyer then uses its power to consume at a sub-competitive level, resulting in fewer goods sold **[*15]** at a lower price. Like a traditional monopoly, a monopsony results in less consumer surplus and greater welfare loss. Both monopolization in the traditional sense and monopsonization are violations of *Section 2*. See, e.g., *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 320, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)*.

Because Ocean Spray sits in the middle of the three-tiered cranberry-products industry, it may be the subject of either monopsonization or traditional monopolization claims. In the first market, the one for raw cranberries, growers are the sellers and handlers, like Ocean Spray, are buyers. This is the market in which Ocean Spray might behave as a monopsonist. In the second market, the one for cranberry products, handlers, like Ocean Spray, are sellers and cranberry product consumers are the buyers. This is the market in which Ocean Spray might behave as a traditional monopolist. Plaintiffs' "monopsonization" claim therefore must refer to the grower—handler market, and their "monopolization" claim must refer to the handler—consumer market.

As to the monopsonization claim, plaintiffs allege that Ocean Spray has a 70-80% share of the grower—handler market. TAC ¶ 67. Although plaintiffs' explanation of the alleged exclusionary conduct in this market is somewhat muddled, it seems **[*16]** to turn on Ocean Spray's decision to form the B Pool. See, e.g., id. at 2 ("Defendants accomplished their illegal scheme, in part, by creating a second-class membership within the cooperative, the 'B Pool,' . . . ."). The B Pool guaranteed growers an outlet for their fruit but did not guarantee them a particular price. If market conditions in the downstream handler—consumer market were to cause independent handlers to decrease their demand for fruit (e.g., because of predatory pricing by Ocean Spray in that market, which forms the basis of plaintiffs' other claim), independent growers would be "force[d] . . . to either join the B Pool or to exit the cranberry market altogether." Id. ¶ 49. By getting more independent growers to join the B Pool, Ocean Spray would enhance its monopsony power. This, plaintiffs allege, is a violation of *Section 2*.

As to the traditional monopolization claim, the complaint also alleges that Ocean Spray is a monopolist in the handler—consumer market. Id. ¶¶ 119-23. Plaintiffs allege that Ocean Spray engaged in predatory pricing in that market by artificially depressing the auction price for cranberry concentrate. That predatory pricing, which plaintiffs allege was below Ocean **[*17]** Spray's costs in contravention of *Section 2*, drove down prices paid to independent handlers.

These are two separate antitrust violations. Because plaintiffs must have antitrust standing to seek recovery for each of them, I will examine them in turn.

2. Antitrust Standing for the Monopsonization Claim (Count IX)

There is a clear causal connection between the lower market price of raw cranberries and the antitrust violation alleged in plaintiffs' monopsonization claim. That violation, price fixing at a sub-competitive level in the market for cranberries, directly affected the price at which the growers could sell their cranberries to handlers. This, in turn, affected the revenue that the plaintiffs could generate and encouraged them to consolidate their sales to only Ocean Spray. Plaintiffs have alleged, and at this point defendants do not contest, that the defendants' conduct was meant to cause the harm that followed. Id. ¶¶ 125, 127. Because the A Pool, representing Ocean Spray's leadership, is at economic cross-purposes with the B Pool, see Docket # 78 at 2-3, plaintiffs' claim that the alleged harm was intentional is reasonable on its face.

The nature of the harms from the antitrust violation **[*18]** is the type of harm that the antitrust laws are intended to remedy. One of the alleged harms is market consolidation—by its very nature, a competition-reducing effect that prevents the market from allocating resources to their most valued uses. According to plaintiffs (and yet unchallenged by defendants), the alleged price fixing caused reductions in the price for cranberries across the market. Smaller independent handlers, allegedly unable to sustain their operations at these prices, reduced their demand for cranberries. This made joining Ocean Spray's B Pool a more attractive option for many independent growers, increasing defendants' monopsony power in the cranberry market. In fact, plaintiffs have offered evidence that "[a]t the conclusion of 2009 (the first year of the [alleged] price-fixing), Ocean Spray added 80 new grower-members to the Cooperative" and lost none. TAC ¶ 54, Ex. 14. The plaintiffs are the direct sellers of cranberries to

Ocean Spray and other handlers.[6] Although they are not customers or competitors of Ocean Spray, as sellers in a monopsonistic market, they walk in the same shoes as customers in a traditional monopolistic market.[7] See, e.g., Roger D. Blair & Jeffrey **[*19]** L. Harrison, Antitrust Policy and Monopsony, *76 Cornell L. Rev. 297, 337 (1991)*.

Plaintiffs' harms in this case are not speculative. Plaintiffs seek damages to undo the price fixing that Ocean Spray allegedly introduced into the cranberry market to drive independent growers into its B Pool. These damages may be measured, for example, based on past market prices or related yardsticks. For members of the B Pool, no entity is better situated to pursue this antitrust claim. The B Pool members were direct sellers to Ocean Spray at the price that Ocean Spray allegedly set; no intermediaries were involved. Independent growers, though one step removed from Ocean Spray, are also well situated to pursue this antitrust claim. They sold their product to independent handlers, allegedly receiving a lower price because Ocean Spray had fixed prices in its large segment of the market. In theory, either the independent growers or the independent handlers could bring a claim against Ocean Spray for its allegedly anticompetitive tactics. Yet, reality suggests otherwise. There are no allegations that independent handlers suffered harm from Ocean Spray's conduct in the grower—handler market.[8] Indeed, it is plausible that **[*20]** they did not, because they were able to piggyback on Ocean Spray's attempted monopsonization to pay less for their cranberries. Although the independent growers are one step removed from the anticompetitive conduct, this is not a case like *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, where the plaintiffs' harm is derivative of harm to a better situated plaintiff. Here, the independent growers are at least as well situated as the independent handlers to bring an antitrust claim, and they may even be the only plaintiffs that can sustain one. To the extent that there is any overlap in damages claims, apportionment of damages between the independent handlers and independent growers would not be difficult because past dealings between the independent growers and independent handlers provide benchmarks.

Having considered all of the *AGC* factors, I find that the plaintiffs have antitrust standing to pursue their monopsonization claim—i.e., that defendants' formation of the B Pool, coupled with their alleged price fixing in the grower—handler market, enhanced their monopsony power and decreased competition in that market. I also note that allowing the grower plaintiffs to pursue this claim is consistent with scholarly commentary on antitrust **[*21]** standing in the monopsony context. See, e.g., IIA Phillip E. Areeda et al., ***Antitrust Law*** ¶¶ 350a & 350b (4th ed. 2014) ("[Where] Defendants are the plaintiff's customers and . . . create an illegal monopsony . . . plaintiff has standing."); Roger D. Blair & Jeffrey L. Harrison, Antitrust Policy and Monopsony, *76 Cornell L. Rev. 297, 336-37 (1991)*. Defendants' motion for summary judgment for lack of antitrust standing on Count IX is denied.

3. Antitrust Standing for the Monopolization Claim (Count VIII)

---

[6] Defendants' argument that one B Pool plaintiff, Stacy Preston Winters, lacks standing because the scheme was designed for her benefit is unpersuasive. The harm that Winters complains of in the monopsony claim is consolidation of the grower—handler market, leading to reduced competition among handlers. This would lead to more allocative inefficiency for all growers not in the A Pool, whether B Pool members or independent. That Winters may have benefited from the other alleged antitrust violation, predatory pricing in the handler—consumer market, does not undermine Winters' monopsony claim.

[7] Defendants contend that they are entitled to summary judgment because plaintiffs are neither consumers nor competitors of Ocean Spray in the relevant markets. They cite a string of First Circuit authority limiting antitrust standing to such groups in traditional monopolization cases. See, e.g., *Serpa, 199 F.3d at 10*; *SAS, 48 F.3d at 44*. But defendants' rote recitation of that case law ignores the nature of plaintiffs' claim—it is one for monopsonization, not monopolization. In this context, the proper focus is on sellers, not customers. See *Mandeville Island Farms, Inc. v. Am. Crystal Sugar Co., 334 U.S. 219, 235, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* ("It is clear that the agreement is the sort of combination condemned by the [Sherman] Act, even though the price-fixing was by purchasers, and the persons specially injured under the treble damages claim are sellers, not customers or competitors.") (footnotes omitted); cf. *Weyerhaeuser, 549 U.S. at 321* (noting "close theoretical connection between monopoly and monopsony" and adopting "mirror image" analytical approach).

[8] There are, of course, allegations that independent handlers were harmed by Ocean Spray's alleged predatory pricing behavior in the handler—consumer market, but that is not relevant to this inquiry.

As with plaintiffs' monopsonization claim, there is a clear causal link between the alleged violation in the handler—consumer market (i.e., predatory pricing) and the harm to plaintiffs (i.e., less competition in the handler market and lower cranberry prices). Predatory pricing "occurs when a firm sets its prices temporarily below its costs, with the hope that the low price will drive a competitor out of business." *Clamp-All Corp. v. Cast Iron Soil Pipe Inst., 851 F.2d 478, 483 (1st Cir. 1988)*. If Ocean Spray priced its refined cranberry products, and cranberry concentrate in particular, below its costs, this would cause the quantity of Ocean Spray product demanded to increase to the detriment of the independent handlers. The independent handlers would then either be forced to lower their prices to **[*22]** compete with Ocean Spray, thereby placing limits on what they could pay independent growers for their raw cranberries, or reduce their output. If they chose the latter course, they would necessarily require a lower volume of raw cranberries, thus shrinking the buyer market for independent growers. Plaintiffs allege, and at this point defendants do not dispute, that this was the intended effect of defendants' conduct. And, because this injury results in less competition in both the grower—handler and handler—consumer markets, it is the type of injury that the antitrust laws were intended to remedy.

Yet, despite successfully satisfying these two factors of the AGC test, the remainder of the analysis weighs against permitting plaintiffs to pursue a claim for this violation. Plaintiffs' injuries are indirect—they are harmed because the independent handlers are harmed. Plaintiffs are neither competitors nor customers of Ocean Spray in the handler—consumer market.[9] Under First Circuit law, this creates a presumption that they are not proper antitrust plaintiffs. See, e.g., *Serpa, 199 F.3d at 10* ("Competitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs **[*23]** to allege antitrust injury."); *SAS, 48 F.3d at 44*. Plaintiffs' damage for Ocean Spray's behavior in the handler—consumer market also present difficult apportionment problems. Plaintiffs would need to show, with respect to each independent handler, just how much the handler's demand for raw cranberries decreased as a result of defendants' conduct and how much more the handler would have paid for raw cranberries but for Ocean Spray's predatory pricing. This would require a detailed analysis of the internal cost structures of each of the independent handlers. And, since the independent handlers undeniably would have a claim against Ocean Spray for the alleged predatory pricing, the potential for duplicative recovery from faulty apportionment is high. The independent handlers, the direct victims of defendants' alleged predatory pricing scheme, are better situated to pursue damages claims for that conduct.

As suppliers to Ocean Spray's competitors in the handler—consumer market, plaintiffs's claims are entirely derivative of claims that the competitors themselves could bring. As defendants rightly point out, "[t]he First Circuit has made it clear that suppliers are not preferred plaintiffs." *In re Compact Disc Minimum Advertised Price Antitrust Litig., 456 F. Supp. 2d 131, 146 (D. Me. 2006)*. **[*24]** Again, scholarly commentary supports this approach. IIA Phillip E. Areeda et al., ***Antitrust Law*** ¶¶ 350a & 350d (4th ed. 2014) ("[Where] [a]n immediate victim of illegal conduct by the defendant(s) is the plaintiff's customer, who then buys fewer inputs from the plaintiff[,] . . . [t]he plaintiff generally lacks standing unless the plaintiff competes with the defendant."). Having considered the AGC factors here, I conclude that plaintiffs do not have antitrust standing to pursue their monopolization claim—i.e., that defendants' predatory pricing caused anticompetitive harms in the handler—consumer market. The defendants' motion for summary judgment is therefore allowed on Count VIII of the Third Amended Complaint.[10]

B. Chapter 93A Claim (Count IV)

---

[9] To the extent plaintiffs contend that they are competitors with Ocean Spray because the Ocean Spray cooperative is the same thing as the Ocean Spray growers, the court disagrees. Agricultural cooperatives are generally distinct corporate entities from the growers that have a stake in them. See, e.g., *Kuntz v. Lamar Corp., 385 F.3d 1177, 1183 (9th Cir. 2004)*. Here, that is particularly true because defendants are distinct corporate entities, i.e., a Delaware corporation and a Delaware limited liability company. Plaintiffs have not offered sufficient evidence to allow a reasonable jury to conclude that the cooperative is an alter ego of its members or that any other corporate veil-piercing doctrines apply here.

[10] Having concluded that no plaintiffs have antitrust standing to bring their monopolization claim, I do not separately consider whether the one B Pool plaintiff, Stacy Preston Winters, is barred from bringing this claim as an intended beneficiary of the anticompetitive conduct.

Defendants next contend that plaintiffs[11] lack standing to bring their claims under Massachusetts General Laws chapter 93A ("93A"). Violations of the federal antitrust laws, including *Section 2* of the Sherman Act, are cognizable under 93A. *F. Ciardi v. Hoffmann-LaRoche Ltd., 436 Mass. 53, 762 N.E.2d 303, 307-08 (Mass. 2002)*. Chapter 93A is in some ways broader than the federal antitrust laws though, so a plaintiff may be able to bring a 93A claim even if it is unable to bring a statutory antitrust claim. *Id. at 312*. *Section 11* of 93A, which applies to business-to-business **[*25]** transactions like the ones here, requires a plaintiff to show that the alleged unfair practice (1) is within at least the penumbra of some common-law, statutory or other established concept of unfairness; (2) is immoral, unethical, oppressive, or unscrupulous; and (3) causes substantial injury to consumers, competitors, or other businesspeople. *Mass. Eye & Ear Infirmary v. QLT Phototherapeutics, Inc., 552 F.3d 47, 69 (1st Cir. 2009)* (quotation and citation omitted).

As an initial matter, although plaintiffs pleaded their 93A claim broadly, alleging "price-fixing, attempting to monopolize and monopsonize, monopolization and monopsonization of trade in commerce," TAC ¶ 109, defendants contend that the court should construe the claim to be based on three acts: (1) violation of *Section 2* of the Sherman Act; (2) violation of the 1957 Final Judgment; and (3) violation of Ocean Spray's contractual obligations to plaintiffs. I am not convinced that plaintiffs have so limited their claim. They have alleged numerous facts to support claims for unfair trade practices leading to the monopolization and monopsonization of the cranberry fruit and concentrate markets. Defendants cannot evade those allegations simply by adopting their own narrow construction of the complaint. Yet, even assuming **[*26]** that plaintiffs' 93A claims are based on these three narrow grounds, defendants' summary judgment motion fails.

The survival of one of plaintiffs' Sherman Act claims necessarily means that summary judgment is inappropriate on the 93A claim that is premised upon that Sherman Act claim. See, e.g., *RSA Media, Inc. v. Media Grp., Inc., 260 F.3d 10, 16 (1st Cir. 2003)*. Because I have concluded that plaintiffs have standing to bring a monopsonization claim under the Sherman Act based on defendants' alleged conduct in the grower—handler market, they may also bring a 93A claim based on that conduct. Of course, because I have concluded that plaintiffs do not have standing to bring a monopolization claim under the Sherman Act based on defendants' alleged conduct in the handler—consumer market, plaintiffs may not bring a 93A claim that is premised only upon that alleged violation of the antitrust laws. But even under defendants' narrow reading of plaintiffs' complaint, plaintiffs do not do that—they rest their 93A claim for conduct in the handler—consumer market on additional grounds.

One of those other grounds is that defendants' conduct allegedly contravened the competitive standards set out in the 58-year-old consent decree.[12] In 1957, this court entered a final **[*27]** judgment in an antitrust lawsuit filed by the United States against five defendants, including the National Cranberry Association (which is Ocean Spray's corporate predecessor) and two of its grower-members. See Final Judgment, *United States v. Nat'l Cranberry Ass'n, C.A. No. 55-418-3, 1957 U.S. Dist. LEXIS 4199 (D. Mass. Oct. 28, 1957)* (TAC Ex. 3) (the "1957 Final Judgment"). The relevant fairness standard, according to plaintiffs, is found in Section VI(A) of that document:

> Defendants ADM, United, Markpeace and Urann are jointly and severally enjoined and restrained from: (A) Purchasing cranberries from others and reselling or otherwise disposing of them to artificially raise, depress or stabilize market price levels of fresh or processed cranberries.

1957 Final Judgment at 5. Although Ocean Spray's predecessor was not bound by this provision, it indisputably had notice of the consent decree. A consent decree involving Ocean Spray's predecessor and prohibiting the "class of conduct" of which plaintiffs complain—"[p]urchasing cranberries from others and reselling . . . them to artificially . . . depress . . . market price levels of fresh or processed cranberries"—may undoubtedly form the basis for a claim under **[*28]** *section 11* of 93A. See *In re TJX Cos. Retail Sec. Breach Litig., 564 F.3d 489, 497 (1st Cir. 2009)* (relying on "a substantial body of FTC complaints and consent decrees focus[ing] on a class of conduct" to find that conduct unfair within the meaning of 93A).

---

[11] This count is brought only on behalf of independent growers, not members of the B Pool.

[12] Plaintiffs do not brief this point in their opposition, but they do advance this theory in their own motion for summary judgment, and defendants addressed it in their motion.

Another ground on which plaintiffs base their 93A claim is that defendants engaged in unfair trade practices by breaching contracts with independent handlers to which the independent growers are third-party beneficiaries. The record at this stage shows that genuine issues of material fact remain about whether the independent growers are in fact third-party beneficiaries to these contracts. For that reason alone, summary judgment is inappropriate. But, even if the independent growers are not third-party beneficiaries of those agreements, they still may have a claim under 93A because defendants' alleged breach of their contracts with independent handlers may result in competitive harms to plaintiffs within the meaning of 93A. In other words, plaintiffs need not necessarily be third-party beneficiaries of the contracts to sustain a claim under 93A for their breach. See, e.g., *Cooper v. Charter Commc'ns Entm'ts I, LLC, 760 F.3d 103, 112 (1st Cir. 2014)*. Defendants do not address such a claim at all in their briefs and therefore have not shown that they are entitled to summary judgment.

C. Retaliation [*29] Claim (Count XIII)

Plaintiffs Barry K. Winters and Paul D. Sogn individually entered into a three-year cranberry marketing agreement with Ocean Spray. TAC ¶¶ 147-48. In a separate count, they claim that after the complaint was filed, Ocean Spray sent them a letter terminating the agreements because they are named plaintiffs in this action. Id. ¶ 150. The termination letters state:

> This Notice of Termination is based on the fact that you and BKW Farms are named plaintiffs in a lawsuit recently filed against Ocean Spray in the United States District Court for the District of Massachusetts (C.A. No. 1:12-CV-12016-RWZ). Because you have elected to participate in this action against Ocean Spray, we are no longer interested in doing business with you or with BKW Farms.

Id. Exs. 22 & 23. These plaintiffs claim that defendants terminated their contracts to intimidate and coerce them, frustrate the pending litigation, and discourage other "B Pool" members from joining the suit.

I declined to dismiss this count last year, concluding that plaintiffs had stated a 93A claim within the "penumbra" of the established standard of unfairness for breach of contract. Docket # 78 at 16-17. Now, on summary **[*30]** judgment, defendants offer facts to support their framing of the events as "declining to renew" the contracts, in a non-breaching manner, rather than "terminating" them. Regardless of which framing is correct, plaintiffs' claim still survives. Non-breaching termination of an at-will contract or non-renewal of a contract may, under some circumstances, constitute a 93A violation. See, e.g., 52 Mass. Practice § 9.1; cf. *Zapatha v. Dairy Mart, Inc., 381 Mass. 284, 408 N.E.2d 1370, 1374-78 (Mass. 1980)*. A finding that the termination or non-renewal is lawful under the contract does not end the 93A inquiry. The critical question is whether the circumstances surrounding the termination or non-renewal demonstrate unfair trade practices as determined by the three-part test described above. See *Mass. Eye & Ear Infirmary, 552 F.3d at 69*. For example, unfair trade practices in this context may include breaches of the implied covenant of good faith and fair dealing, *Anthony's Pier Four, Inc. v. HBC Assocs., 411 Mass. 451, 583 N.E.2d 806, 820 (Mass. 1991)*, motives contrary to public policy, *Buster v. George W. Moore, Inc., 438 Mass. 635, 783 N.E.2d 399, 412 (Mass. 2003)* (finding 93A violation where lawful foreclosure auction was retribution for the refusal of a witness to testify), or stringing along that causes detrimental reliance, *Lambert v. Fleet Nat'l Bank, 449 Mass. 119, 865 N.E.2d 1091, 1098 (Mass. 2007)*. Because defendants' motion is premised upon the legality of the termination or non-renewal being dispositive, and it does not address plaintiffs' broader **[*31]** unfairness allegation, which I have already once found sufficient to support their 93A claim, Docket # 78 at 16-17, it is denied.

IV. Plaintiffs' Summary Judgment Motion (Docket # 102)

Plaintiffs move for summary judgment on liability for their monopolization and 93A claims (Counts IV and XIII). Their motion is denied with respect to the monopolization claim (Count XIII) because I have concluded that they lack standing to pursue it. I therefore address only their 93A claim on the merits.

A. Chapter 93A Claim (Count IV)

Plaintiffs contend that summary judgment should enter in their favor on liability for their 93A claim because (1) defendants' conduct runs afoul of the concept of fairness established by the 1957 Final Judgment and the best efforts rule of contract law; (2) the conduct was oppressive to growers; and (3) it caused injury to growers, as competitors of Ocean Spray. From the showing in plaintiffs' motion and defendants' opposition, however, a reasonable jury may conclude that defendants' conduct did not violate an established concept of fairness or that it did not cause plaintiffs' harms.

Whether particular conduct constitutes an unfair practice under Chapter 93A is a question **[*32]** of fact. *James L. Miniter Ins. Agency v. Ohio Indem. Co., 112 F.3d 1240, 1251 (1st Cir. 1997)*. Conduct that is unfair in one market may not be fair in another. *Baker v. Goldman Sachs & Co., 771 F.3d 37, 50 (1st Cir. 2014)*. Plaintiffs' allegations of unfairness are reasonable on their face and supported by facts in the record. Defendants, however, also offer credible evidence, in the form of an expert declaration from an economist, that purports to show that the type of auction that Ocean Spray uses is common in commodities markets. See Docket # 117. A genuine dispute of fact exists, therefore, about whether the Ocean Spray cranberry concentrate auction is unfair.

Similarly, "causation [is] a necessary element of a successful 93A claim." *RSA Media, 260 F.3d at 16*. Plaintiffs must also demonstrate the absence of genuine fact disputes about causation to be entitled to summary judgment. Although plaintiffs have credibly alleged and produced documents to show that the price of cranberry concentrate would have been higher if Ocean Spray had conducted the concentrate auction differently, Ocean Spray's economics expert has offered evidence to the contrary. Because the conflicting causation evidence offered by each party tells a plausible story, summary judgment is inappropriate. Plaintiffs' motion is denied.

B. Defendants' Motion to Defer Under *Rule 56(d)* and to Strike [*33] New Evidence and Argument in Plaintiffs' Reply (Docket ## 118 and 140)

Defendants move the court under *Rule 56(d)* to defer considering plaintiffs' summary judgment motion until more discovery is complete. They also move to strike allegedly new evidence and argument in plaintiffs' reply brief, including a new theory of liability, an expert declaration, and several fact declarations. Having now considered the merits of plaintiffs' summary judgment motion and found them wanting even with the allegedly improper evidence, both of these related motions (Docket ## 118 and 140) are DENIED AS MOOT.

V. Stays

Throughout this litigation, the court has allowed numerous requests for stays. Although those requests may have been supported by good cause at the time, they no longer are. All stays that are in place are hereby vacated.

Of particular note is the court's recent stay of plaintiffs' motion for class certification (Docket # 138). Because this summary judgment order has affected the issues remaining in the case, the class certification motion (Docket # 130) is DENIED AS MOOT. Within two weeks of this order, plaintiffs shall either re-file that motion or, if appropriate, file a revised version that accounts **[*34]** for the court's rulings on the summary judgment motions.[13] Defendants shall file their opposition within two weeks of plaintiffs' motion, and plaintiffs may file a three-page reply within one week of defendants' opposition. The court expects to schedule a hearing on the motion promptly. The court will

---

[13] The court is concerned that the class certification motion, as last filed, is not in final form. For example, it includes a significant amount of yellow highlighting, and is written, in part, in the first person. See Docket # 129 at 13-15. Given the inherently complex nature of this antitrust case, the court expects the parties to make efforts to ensure that their arguments are complete and efficiently presented.

schedule a status conference by separate order. To help get this now three-year-old case moving, all counsel of record shall participate in that status conference.[14]

VI. Conclusion

For reasons explained above, defendants' motion for summary judgment (Docket # 115) is ALLOWED IN PART with respect to Count VIII and DENIED IN PART with respect to Counts IV, IX, and XIII. Plaintiffs' motion for partial summary judgment (Docket # 102) is DENIED, and defendants' motions to defer consideration (Docket # 118) and to strike parts of plaintiffs' reply (Docket # 140) are DENIED AS MOOT. All stays currently in place are HEREBY VACATED. Class certification briefing shall proceed as outlined above.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* tests the sufficiency of the claims. All allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. However, the court need not accept conclusory allegations as truthful. Rather, to state a plausible claim for relief, the complaint must contain sufficient allegations of underlying facts to support its legal conclusions.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* will be granted if a plaintiff alleges the "grounds" of his entitlement to relief with nothing more than labels and conclusions, and a formulaic recitation of the elements of a cause of action. Factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all the allegations in the complaint are true (even if doubtful in fact).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face, meaning when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Additionally, only a complaint that states a plausible claim for relief survives a motion to dismiss. A complaint must contain well-pleaded facts which permit the court to infer more than the mere possibility of misconduct.

Antitrust & Trade Law > Sherman Act > Scope

HN4[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. *15 U.S.C.S. § 1*. Congress designed the Sherman Act as a consumer welfare prescription. Consumer welfare is maximized when economic resources are allocated to their best use and when consumers are assured competitive price and quality. A restraint that has the effect of reducing the importance of consumer preference in setting price and output is not consistent with this fundamental goal of ***antitrust law***. Congress sought to ensure that competitors not cut deals aimed at stifling competition and at permitting higher prices to be charged to consumers than would be expected in a competitive environment, or permitting lower prices to be paid to those from whom competitors bought materials than a fair market rate.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] **Per Se Rule & Rule of Reason, Sherman Act**

Agreements of competitors, whether express or implicit, whether by formal agreement or otherwise, in restraint of trade are outlawed. However, the U.S. Supreme Court has repeatedly recognized that by the language of the Sherman Act, Congress intended to outlaw only unreasonable restraints. Most antitrust claims are analyzed under a "rule of reason," according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors. The rule of reason is the presumptive or default standard, and it requires the antitrust plaintiff to demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive. The rule of reason weighs legitimate justifications for a restraint against any anticompetitive effects. The court reviews all the facts, including the precise harms alleged to the competitive markets, and the legitimate justification provided for the challenged practice, and determines whether the anticompetitive aspects of the challenged practice outweigh its procompetitive effects.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6[] **Sherman Act, Claims**

In order to state a *§ 1* of the Sherman Act claim under the rule of reason, plaintiffs must plead facts which, if true, will prove (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition; and (4) that they were harmed by the defendant's anti-competitive contract, combination, or conspiracy, and that this harm flowed from an anti-competitive aspect of the practice under scrutiny. This fourth element is generally referred to as "antitrust injury" or "antitrust standing."

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Sherman Act, Claims**

Section 2 of the Sherman Act provides: Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other persons, to monopolize any part of the trade or commerce shall be deemed guilty of a felony. *15 U.S.C.S. § 2*. In order to state a claim for monopolization under *§ 2* of the Sherman Act, a plaintiff must prove: (1) possession of monopoly power in the relevant market; (2) willful acquisition or maintenance of that power; and (3) causal antitrust injury. The following elements are required to establish an attempt to monopolize claim: (1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct to accomplish the monopolization; (3) dangerous probability of success; and (4) causal antitrust injury. To prove a conspiracy to monopolize in violation of *§ 2* of the Sherman Act, a plaintiff must show four elements: (1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) the specific intent to monopolize; and (4) causal antitrust injury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] **Per Se Rule & Rule of Reason, Sherman Act**

While the rule of reason is the default standard to analyze allegedly anticompetitive conduct, some types of restraints have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se. Such restraints are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Per se treatment is proper only once experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it. A departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than upon formalistic line drawing. To justify per se condemnation, a challenged practice must have manifestly anticompetitive effects and lack any redeeming virtue. The U.S. Supreme Court has expressed reluctance to adopt per se rules where the economic impact of certain practices is not immediately obvious.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] **Per Se Rule & Rule of Reason, Sherman Act**

Per se and rule-of-reason analyses are two methods of determining whether a restraint is "unreasonable"; in other words, whether its anticompetitive effects outweigh its procompetitive effects. While the per se rule determines whether or not the Sherman Act was violated, antitrust injury must be shown even for per se claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Motion Practice

HN10[] Motions to Dismiss, Failure to State Claim

The doctrine of incorporation by reference allows a district court to consider documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the plaintiff's pleading. Because these documents have essentially been adopted as part of the complaint, the court may consider them without converting a motion to dismiss into a motion for summary judgment.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN11[] Sherman Act, Claims

Antitrust injury is an element of all antitrust suits. Accordingly, the lack of antitrust injury serves as an independent basis for dismissal.

Antitrust & Trade Law > Sherman Act > Claims

HN12[] Sherman Act, Claims

To assert a claim under *§ 1* and *§ 2* of the Sherman Act, a plaintiff must have suffered an "antitrust injury," meaning an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendant's acts unlawful. Plaintiff must prove that its loss flows from an anticompetitive aspect or effect of the defendant's behavior, since it is inimical to the antitrust laws to award damages for losses stemming from acts that do not hurt competition.

Antitrust & Trade Law > Sherman Act > Claims

HN13[] Sherman Act, Claims

Because Congress designed the Sherman Act to protect consumers or purchasers of goods in a market, the focus of the antitrust injury analysis is the direct result of anticompetitive conduct on consumers. Hence the often repeated phrase—antitrust laws were enacted for the protection of competition, not competitors. A plaintiff must demonstrate injury to competition in the market as a whole, not merely injury to itself as a competitor.

Antitrust & Trade Law > Sherman Act > Claims

HN14[] Sherman Act, Claims

Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.

Antitrust & Trade Law > Sherman Act > Claims

HN15[] **Sherman Act, Claims**

Certainly, decreased innovation and choice can be relevant to a court's finding of antitrust injury. However, an allegation of diminished quality alone is not sufficient to establish injury.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN16[] **Motions to Dismiss, Failure to State Claim**

An insistence on specificity of facts is warranted before permitting a case to proceed into costly and protracted discovery in an antitrust case because of the potential great expense of discovery.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN17[] **Amendment of Pleadings, Leave of Court**

If the court dismisses a complaint, it must decide whether to grant leave to amend. *28 U.S.C.S. § 1653*. The Ninth Circuit has repeatedly held that dismissal without leave to amend is improper, even if no request to amend the pleading was made, unless it is clear that the defective pleading cannot possibly be cured by the allegation of additional facts.

Judges: MARCO A. HERNÁNDEZ, United States District Judge.

Opinion by: MARCO A. HERNÁNDEZ

Opinion

[*1140] OPINION & ORDER

HERNÁNDEZ, District Judge:

Plaintiff CollegeNET, Inc. brings this antitrust action against Defendant The Common Application, Inc., contending that Defendant violated the Sherman Act, *15 U.S.C. §§ 1*, *2*. Plaintiff alleges collusion among competitor colleges[1]

[1] Plaintiff defines "college" for the purpose of this action as "a regionally accredited, not-for-profit educational institution in the United States that offers four-year (baccalaureate), full-time programs." Am. Compl. ¶ 17.

and conspiracy with their joint-venture entity, Defendant, to monopolize and restrain trade and foreclose rival providers in the admissions and online college application processing markets. Plaintiff brings the following claims in its First Amended Complaint[2] : (1) Horizontal Restraint of Trade in the Admissions Markets; (2) Horizontal Restraint of Trade in the Online College Application **[**2]** Processing Market; (3) Exclusive Dealing; (4) Tying; (5) Monopolization; (6) Attempted Monopolization; and (7) Conspiracy to Monopolize.

Defendant moves to dismiss Plaintiff's Amended Complaint. Because Plaintiff fails to adequately allege antitrust injury, a required element for each of Plaintiff's claims, the Court grants Defendant's motion.

BACKGROUND

Plaintiff is a Portland, Oregon-based company that provides "web-based on-demand technologies to institutions of higher education and non-profits." Am. Compl. ¶ 35. Plaintiff offers a "suite of web-based administrative services, including customized online application forms and processing services and contact management services." Id. at ¶ 6.

Defendant is an association of 549 non-profit member colleges and universities. Id. at ¶ 7. According to Plaintiff, **[**3]** Defendant is not a single entity, but rather a "consortium of competitors." Id. at ¶ 84. Defendant was formed in 1975 to assist students by simplifying the college admissions process by providing one "common" student application form (the "Common Application") for students to submit basic background information in a standardized way as they applied to member colleges. Id. at ¶¶ 13, 38. Defendant provided a common, standardized (paper) application **[*1141]** form for use at each of the member institutions. Id. at ¶ 38. Applicants could fill out this Common Application once, photocopy it, and submit it to any member institution. Id. Membership was limited to "selective" colleges. Id. at ¶ 42.

Over time, Defendant has grown to be a "dominant online college application processing provider," as colleges join the association in order to access Defendant's "national pipeline of applicants" and use Defendant as their common application developer and processor. Id. at ¶¶ 14, 23, 48. Today, membership is open to almost any college. Id. at ¶ 83. As Defendant's membership ranks grow, so do the number of student applicants using that service and, therefore, the number of applications members receive. Colleges **[**4]** compete to attract applicants not only to secure "high-value students" but also because an increase in the number of applications increases the application fees a college generates and lowers its admission rate, thereby raising its selectivity rating and college ranking. Id. at ¶ 31. Defendant has a three-tiered membership structure. Id. at ¶ 74. All members must (1) use

Defendant's Common Application for all form and payment processing—including Institutional Supplements—for Common Applicants; (2) accept all Common Applicant evaluation forms (including final transcripts) online, for schools that choose to send them online; and (3) accept the Common Application fee waiver. Id. at ¶ 75. In addition, "Exclusive I" members must also use the Common Application as their only admission application for full-time, undergraduate, degree-seeking applicants, and "Exclusive II" members must further (1) establish uniform fees for all applicants; (2) use the Common Application as their only transfer application; and (3) use Slideroom.com for their Arts Supplement (if they offer one). Id. at ¶¶ 76, 77. According to Plaintiff, the "penalties"[3] for choosing to be a Non-Exclusive versus Exclusive II member **[**5]** are "extreme." Id. at ¶ 78.

Plaintiff alleges that Defendant's agreements with its members have reduced "Net Output," which Plaintiff defines as the net value derived from Online College Application Processing services by both Colleges and applicants:

---

[2] On November 3, 2014, the Court dismissed Plaintiff's 103-page Complaint under *Rule 8*. Plaintiff submitted the present 55-page Amended Complaint [75] on November 24, 2014.

[3] There is a $2 difference per application between Exclusive and Non-Exclusive members. Am. Compl. ¶ 78. Plaintiff characterizes this as a "penalty" on Non-Exclusive members. Id. Defendant characterizes it as a "modest, two-tiered incentive discount" for Exclusive members. Def.'s Mot. 24.

> Net Output increases as the quality, functionality, features, ease of use, and level of innovativeness of Online College Application Processing services improve. Net Output also increases as those services better enable Colleges to discover and matriculate students who are good matches for their College, applicants to discover and matriculate at Colleges that are good matches for them, and Colleges to predict yield (how many accepted applicants will matriculate). Net Output decreases as the amount of resources (e.g. money and time) expended by Colleges and applicants in connection with using Online College Application Processing services in the college admissions **[**6]** process increases.

Id. at ¶ 21. Plaintiff alleges that Defendant has reduced Net Output by imposing the following membership restrictions and restraints (thereinafter, "Challenged Restraints"): tying and bundling/forced purchase requirements, exclusivity restrictions, an "equal treatment" requirement, and uniformity requirements. Id. at ¶ 15. According to Plaintiff, Defendant's Challenged **[*1142]** Restraints have led to a significant growth in Defendant's membership and revenue, yet none of them are necessary to achieve any legitimate or procompetitive goal. Id. at ¶ 16.

Plaintiff hosted Common Application Institutional Supplements[4] and supported Common Application member colleges in a variety of ways prior to Defendant's adoption and enforcement of the "Challenged Restraints." Id. Plaintiff alleges that it has been injured because it has been prevented or significantly limited in its ability to offer customized application processing services to colleges and applicants. Id. at ¶ 160. Plaintiff alleges that it has lost over 200 college customers to Defendant in the last 10-15 years due to Defendant's "anticompetitive and exclusionary conduct." Id. at ¶ 37.

As to the tying and bundling/forced purchase requirements, Plaintiff alleges that Defendant has tied access to the applicant pipeline generated by its Standard College Application Data service to members' use of Common Application's Online College Application Processing services. Id. at ¶ 153. Plaintiff contends that Defendant's tying arrangement harms competition in the relevant markets by limiting college choice, limiting the scope of services and price competition available to student applicants, and foreclosing rival providers from capturing colleges' and applicants' business. Id. at ¶ 153.

Plaintiff alleges that Defendant's exclusivity provisions have further disadvantaged and foreclosed rival providers by making it prohibitively expensive for members to use and offer to applicants those rivals' services. Id. at ¶ 154. The exclusivity provisions charge a lower per-application fee for members who agree to use the Common Application exclusively. Id. at ¶ 47.

Defendant's "equal treatment" requirement requires members to encourage the use of the Common Application by ensuring that the fee for **[**8]** Common Applicants is no more than for other accepted applications, providing an equally prominent link to the Common Application Online whenever the college posts a link to another online application, and offering any special benefits to students regardless of what kind of application they choose.[5] Id. at ¶ 46. Plaintiff alleges that Defendant's "equal treatment" requirement is "tantamount to an agreement among members to suppress demand for Online College Application Processing services" and also operates as a group boycott agreement among members, pursuant to which they agree not to promote rival providers' applications. Id. at ¶ 152.

Finally, Plaintiff alleges that Defendant's uniformity requirements have forced colleges to limit the content and standardize the look and feel of their **[**9]** applications and to limit applicants' ability to upload documents, customize their applications to different colleges, and otherwise showcase themselves. Id. at ¶ 155. This has resulted in reduced competition, depressed Net Output, and has foreclosed competitors. Id.

---

[4] "Institutional Supplements" are member-specific **[**7]** supplements which many members require in addition to the Common Application. Am. Compl. ¶ 15.

[5] While Plaintiff's Amended Complaint says that members are required to "not explicitly offer special benefits," Am. Compl. ¶ 46 (emphasis added), this must have been a typographical error on Plaintiff's part because Defendant's 2013 Membership Profile Form for Non-Exclusive members states that members are required "to explicitly offer special benefits." Def.'s Request for Judicial Notice, Ex. 2 at 4, [82].

[*1143] Plaintiff identifies four relevant markets in which to analyze its claims: (1) Online College Application Processing Market; (2) College Market for Standard College Application Data Services; (3) Student Application Market; and (4) College Admissions Market (markets (3) and (4) collectively, the "Admissions Markets"). Id. at ¶ 90. Alternatively, Plaintiff argues that the Admissions Markets may be limited to "Elite Colleges,"—top ranked colleges. Id. at ¶¶ 132, 141.

The Online College Application Processing Market is the market for online application and evaluation forms and processing services offered to colleges and applicants. Id. ¶ 20. Online College Application Processing providers develop a college's online application and evaluation forms, host those forms online, process applicants' form submissions, process applicants' transcripts, and/or process applicants' application fee payments. Id. Plaintiff estimates that **[**10]** Defendant's share of this market is "at least 60%." Id. at ¶ 115. Plaintiff further estimates that Defendant's share of each of this market's submarkets—those for (1) online application forms and processing, (2) online evaluation forms and processing, (3) transcript processing, and (4) payment processing—is at least 60%, "except perhaps in transcript processing market." Id. at ¶¶ 20, 115. Therefore, according to Plaintiff, Defendant has market and monopoly power in these submarkets. Id. at ¶ 116.

The Standard College Application Data Service market is the market for a generic, text-based data entry form for applicants to input their background information as required by more than one college. Id. at ¶ 118. The market includes full application form development and processing. Id. According to Plaintiff, Defendant's share of this market is in excess of 90%. Id. at ¶ 122.

The Student Application market encompasses the market for student applications to full-time, four-year degree programs at colleges. Id. at ¶ 32. This market does not include the market for student applications to non-U.S. colleges, graduate student programs, two-year and/or part-time degree programs, unaccredited institutions, **[**11]** or for-profit institutions. Id. at ¶ 127. According to Plaintiff, Defendant has market power because its members will process at least 40-45% of college applications in the 2014-2015 year. Id. at ¶ 129. Alternatively, Plaintiff states that the Student Application Market may be limited to the Elite Student Application Market—the market for student applicants for admission to Elite Colleges. Id. at ¶ 132. Plaintiff alleges that Defendant will process approximately 70% of Elite Colleges' freshman admissions applications in the 2014-2015 year. Id. at ¶ 141.

The College Admissions market is the market for students to enroll in full-time, four-year degree programs at colleges. Id. at ¶ 138. As with the Student Application market, Plaintiff excludes from the College Admissions market the market for student applications to non-U.S. colleges, graduate student programs, two-year and/or part-time degree programs, unaccredited institutions, or for-profit institutions. Id. at ¶ 139. Additionally, Plaintiff alleges Defendant's market share and market power are the same as in the Student Application Market, and that the market can similarly be limited to Elite Colleges. Id. at ¶¶ 140-41.

STANDARDS

[**12] I. Motion to Dismiss

HN1[] A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* tests the sufficiency of the claims. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. "All **[*1144]** allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party." *Am. Family Ass'n, Inc. v. City & Cnty. of S.F., 277 F.3d 1114, 1120 (9th Cir. 2002)*. However, the court need not accept conclusory allegations as truthful. See *Warren v. Fox Family Worldwide, Inc., 328 F.3d 1136, 1139 (9th Cir. 2003)* ("[W]e are not required to accept as true conclusory allegations which are contradicted by documents referred to in the complaint, and we do not necessarily assume the truth of legal conclusions merely because they are cast in the form of factual allegations") (internal quotation marks, citation, and alterations omitted). Rather, to state a plausible claim for relief, the complaint "must contain sufficient allegations of underlying facts" to support its legal conclusions. *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*.

HN2[] A motion to dismiss under *Rule 12(b)(6)* will be granted if a plaintiff alleges the "grounds" of his "entitlement to relief" with nothing "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action[.]" *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "Factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all the allegations in the complaint are true (even if doubtful in fact)[.]" Id. (citations and footnote **[**13]** omitted).

HN3[] To survive a motion to dismiss, a complaint "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face[,]" meaning "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation marks omitted). Additionally, "only a complaint that states a plausible claim for relief survives a motion to dismiss." *Id. at 679*. A complaint must contain "well-pleaded facts" which "permit the court to infer more than the mere possibility of misconduct[.]" *Id. at 679*.

II. Antitrust Analysis

HN4[] *Section 1* of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. "Congress designed the Sherman Act as a consumer welfare prescription." *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)* (internal quotation marks omitted). "Consumer welfare is maximized when economic resources are allocated to their best use" and when "consumers are assured competitive price and quality." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*. "A restraint that has the effect of reducing the importance of consumer preference in setting price and output is not consistent with **[**14]** this fundamental goal of ***antitrust law***." *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 107, 104, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. Congress sought to ensure that competitors not cut deals aimed at stifling competition and at permitting higher prices to be charged to consumers than would be expected in a competitive environment, or permitting lower prices to be paid to those from whom competitors bought materials than a fair market rate. *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1132-34 (9th Cir. 2011)*.

HN5[] Agreements of competitors, whether express or implicit, whether by formal agreement or otherwise, in restraint **[*1145]** of trade are outlawed. However, the Supreme Court has repeatedly recognized that by the language of the Sherman Act, "'Congress intended to outlaw only *unreasonable* restraints.'" *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. "[M]ost antitrust claims are analyzed under a 'rule of reason,' according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors[.]" *State Oil, 522 U.S. at 10*. The rule of reason is the presumptive or default standard, and it requires the antitrust plaintiff to "demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive." *Dagher, 547 U.S. at 5*. "The rule of reason weighs legitimate justifications for a restraint against any anticompetitive effects." **[**15]** *Paladin Associates, Inc. v. Montana Power Co., 328 F.3d 1145, 1156 (9th Cir. 2003)*. The court reviews all the facts, including the precise harms alleged to the competitive markets, and the legitimate justification provided for the challenged practice, and determines whether the anticompetitive aspects of the challenged practice outweigh its procompetitive effects. Id.

HN6[] In order to state a Section 1 claim under the rule of reason, plaintiffs must plead facts which, if true, will prove "(1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition;" and (4) that they were harmed by the defendant's anti-competitive contract, combination, or conspiracy, and that this harm flowed from an "anti-competitive aspect of the practice under scrutiny." *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)* (citations omitted); see also *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. This fourth element is generally referred to as "antitrust injury" or "antitrust standing." Id.

HN7[] Section 2 of the Sherman Act provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other persons, to monopolize any part of the trade or commerce ... shall be deemed **[**16]** guilty of a felony...." 15 U.S.C. § 2. "In order to state a claim for monopolization under Section 2 of the Sherman Act, a plaintiff must prove: (1) possession of monopoly power in the relevant market; (2) willful acquisition or maintenance of that power; and (3) causal antitrust injury." SmileCare Dental Grp. v. Delta Dental Plan of California, Inc., 88 F.3d 780, 783 (9th Cir. 1996) (citation omitted). The following elements are required to establish an attempt to monopolize claim: "(1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct to accomplish the monopolization; (3) dangerous probability of success; and (4) causal antitrust injury." Id. To prove a conspiracy to monopolize in violation of Section 2, a plaintiff must show four elements: (1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) the specific intent to monopolize; and (4) causal antitrust injury. Paladin, 328 F.3d at 1158.

HN8[] While the rule of reason is the default standard to analyze allegedly anticompetitive conduct, "[s]ome types of restraints . . . have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful *per se*." **[*1146]** State Oil, 522 U.S. at 10. Such restraints "'are conclusively presumed to be unreasonable **[**17]** and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.'" Nw. Wholesale Stationers, 472 U.S. at 289 (quoting N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)). *Per se* treatment is proper only "[o]nce experience with a particular kind of restraint enables the [c]ourt to predict with confidence that the rule of reason will condemn it." Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982). "[A] 'departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than ... upon formalistic line drawing.'" Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007) (second alteration in original) (quoting Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 58-59, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)). To justify *per se* condemnation, a challenged practice must have "manifestly anticompetitive" effects and lack "any redeeming virtue." Id. at 886 (internal quotation marks omitted). The Supreme Court has "'expressed reluctance to adopt *per se* rules where the economic impact of certain practices is not immediately obvious.'" Dagher, 547 U.S. at 5 (quotation marks and ellipses omitted) (quoting State Oil, 522 U.S. at 10).

In sum,HN9[] *per se* and rule-of-reason analyses are two methods of determining whether a restraint is "unreasonable"; in other words, whether its anticompetitive effects outweigh its procompetitive effects. Atl. Richfield Co., 495 U.S. at 341-42 n.12 (1990) ("Both *per se* rules and the Rule of Reason are employed 'to form a judgment about the competitive significance of the restraint.' [W]hether the **[**18]** ultimate finding is the product of a presumption or actual market analysis, the essential inquiry remains the same-whether or not the challenged restraint enhances competition.") (internal quotations and citations omitted). While the *per se* rule determines whether or not the Sherman Act was violated, antitrust injury must be shown even for *per se* claims. Id. at 341 ("The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior. The need for this showing is at least as great under the *per se* rule as under the rule of reason.") (emphasis in original).

DISCUSSION

I. Incorporation by Reference

HN10[] The doctrine of incorporation by reference allows "a district court to consider documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the plaintiff's pleading." In re Silicon Graphics, Inc. Sec. Litig. (SGI), 183 F.3d 970, 986 (9th Cir. 1999) (internal quotation omitted). Because these documents have essentially been adopted as part of the complaint, the Court may consider them without converting the motion to dismiss into a motion for summary judgment. United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003) ("Even if a document is not attached to a complaint, **[**19]** it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim.").

Defendant asks the Court to incorporate by reference: (1) a letter to Defendant's board members and (2) a copy of Defendant's **[*1147]** 2013 Membership Profile Form for Non-Exclusive Members. Plaintiff does not oppose Defendant's request. Because both documents are referred to in the Amended Complaint and form part of the basis of Plaintiff's claims, the Court incorporates them by reference.

II. Antitrust Injury

HN11[] Antitrust injury "is an element of all antitrust suits." *Rebel Oil, 51 F.3d at 1433*. Accordingly, the lack of antitrust injury serves as an independent basis for dismissal. *LiveUniverse, Inc. v. MySpace, Inc., 304 F. App'x 554, 557 (9th Cir. 2008)*. The Court grants Defendant's motion to dismiss in its entirety because Plaintiff fails to adequately plead an antitrust injury.[6]

HN12[] To assert a claim under *§ 1* and *§ 2* of the Sherman Act, a plaintiff must have suffered an "antitrust injury," meaning an injury "of the type the antitrust laws were intended to prevent and that **[**20]** flows from that which makes the defendant's acts unlawful." *Brunswick Corp v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Plaintiff "must prove that [its] loss flows from an anticompetitive aspect or effect of the defendant's behavior, since it is inimical to the antitrust laws to award damages for losses stemming from acts that do not hurt competition." *Rebel Oil Co., 51 F.3d at 1433 (9th Cir. 1995)* (citing *Atlantic Richfield Co., 495 U.S. at 334*); see also, *Metro Indus., Inc. v. Sammi Corp., 82 F.3d 839, 847 (9th Cir. 1996)* ("a plaintiff must allege 'antitrust injury,' that is, that the agreement at issue actually caused injury to competition within a market, beyond its impact on the plaintiff.").

HN13[] Because Congress designed the Sherman Act to protect consumers or purchasers of goods in a market, *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*, the focus of the antitrust injury analysis is the direct result of anticompetitive conduct on consumers. *Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 266 (7th Cir. 1984)*. Hence the often repeated phrase—antitrust laws were enacted for "the protection of competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; see also *Gorlick Distribution Centers, LLC v. Car Sound Exhaust Sys., Inc., 723 F.3d 1019, 1024-25 (9th Cir. 2013)*. A plaintiff must demonstrate injury to competition in the market as a whole, not merely injury to itself as a competitor. *Gorlick, 723 F.3d at 1024-25*; see also *Brantley, 675 F.3d at 1200*.

As discussed in the Background section of this Opinion & Order, Plaintiff alleges that Defendant engages in unlawful conduct in the form of four Challenged Restraints. Plaintiff alleges that it has lost over 200 college customers to Defendant **[**21]** in the last 10-15 years. Id. at ¶ 37. According to Plaintiff, these losses "were directly caused by [Defendant's] anticompetitive and exclusionary conduct." Id. Plaintiff contends that Defendant has foreclosed a substantial amount of competition, is likely to further foreclose a substantial amount of competition, and has excluded Plaintiff from competing in the Online College Application Processing Market and submarkets. Id. at ¶¶ 180-81. Plaintiff claims that Defendant has artificially suppressed Plaintiff's output and profits and foreclosed possible customers from retaining Plaintiff. Id. at ¶ 176. Furthermore, Plaintiff claims that is has been injured by **[*1148]** being foreclosed from competing with Defendant to provide Online College Application Processing services and from earning the profits it would have earned but for Defendant's unlawful conduct. Id at ¶¶ 186, 198, 205, 211, 218.

Plaintiff tries to translate its individual harm into harm to competition by alleging that Defendant's Challenged Restraints injure both colleges and applicants. However, the Amended Complaint lacks sufficient factual allegations of harm to either group of consumers.

---

[6] Because the lack of antitrust injury disposes of the entire case, the Court declines to reach the parties' additional arguments regarding the merits of specific claims.

Defendant's Challenged Restraints have led **[**22]** to an increase in applicants applying to colleges. See Am. Compl. ¶ 50 ("For example, between 2010 and 2011, the percentage of students applying to at least three Colleges rose from 77% to 79% (more than 10% more than in 2000) and the percentage of students applying to at least seven colleges rose from 25% to 29% (both of which are more than double the percentage of such students a decade earlier."). Nevertheless, Plaintiff contends that this increase in output of applications harms applicants and colleges when quality, and not just quantity, is accounted for.

Plaintiff uses the concept of "Net Output" as a framework for understanding the injury to consumers. Plaintiff contends that antitrust laws allow for "output" to encompass factors beyond quantity, such as quality, efficiency, and innovation. Taking those factors into account, Plaintiff contends that "Net Output" from Online College Application Processing services accounts for the costs of submitting, processing, and reviewing applications. Am. Compl. ¶ 32. While colleges are receiving more and more applications, the online application processing services are allegedly of an inferior quality because there is a lack of competition, **[**23]** resulting in a more expensive and time-consuming process for applicants and colleges. Id. ¶¶ 68-72, 137, 149-56, 159, 166-67. Plaintiff argues that Defendant's Challenged Restraints have decreased "Net Output," as seen by the anticompetitive effects of the Challenged Restraints—specifically, worse college matching, reduced choice, lower-quality, less innovative college application processing services, and higher effective prices to students. According to Plaintiff, "customization and information exchange in the college application process result in greater-quality matches with less application churn." Pl.'s Opp. 16. Colleges and applicants would save time and money by submitting and processing less meaningless applications, which would improve services and result in better matches. Id.

Plaintiff's concept of Net Output fails, however, because it is based on the assumption that colleges and applicants do not want to participate in an increased "application churn." Plaintiff's position rests upon the conclusion that colleges and applicants are harmed by a system that increases the number of applications to colleges, regardless of an applicant's likelihood of acceptance to any particular **[**24]** college. However, Plaintiff's opinion about what is best for applicants and colleges cannot suffice to establish antitrust injury. The Court finds it equally probable that the "application churn" is precisely what colleges and applicants desire—a system that facilitates increased applications in an efficient way. Even Plaintiff concedes that colleges want an increase in applications because they "secure a boost in members' applications, application fees, and rankings." Am. Compl. ¶157(c). "This in turn allows the College to attract even more (and higher-value) applicants, greater alumni donations, and better professors, increases the College's creditworthiness, and lowers its borrowing costs." Id. ¶ 31.

Contrary to Plaintiff's assertions, the product at issue here is unlike dating websites **[*1149]** that advertise to help people find their *one* match or services in the real estate market that help a buyer find *one* house. The product here aims to do precisely what Plaintiff alleges is occurring—increasing the ease and efficiency by which applicants can apply to many colleges and by which colleges can receive many applications.

Furthermore, Plaintiff alleges that Defendant's Challenged Restraints **[**25]** have suppressed prices for online college applications processing services "below competitive levels." Am. Compl. ¶ 172. According to Plaintiff, the Challenged Restraints "enable members to spend below-competitive levels on Online College Application Processing services without losing applicants" and Defendant's "equal treatment" requirement has "lower[ed] prevailing prices for" Online College Application Processing services. Id. at ¶¶ 157(a), 151. Notably, Plaintiff does not allege that Defendant has set prices below-cost. An allegation of prices merely "below competitive levels," (as opposed to predatory pricing), does not form the basis of an antitrust claim. See *Atl. Richfield, 495 U.S. at 340* (***HN14***[] "Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.").

Plaintiff does not offer, and this Court does not find, support for the proposition that an injury solely based on less innovation and choice is sufficient to state a claim for antitrust injury. ***HN15***[] Certainly, decreased innovation and choice can be relevant to a court's finding of antitrust injury. However, an allegation of diminished **[**26]** quality alone is not sufficient to establish injury in any of the cases cited by Plaintiff. See, e.g., *Rebel Oil, 51 F.3d at 1433* (an act is deemed anticompetitive under the Sherman Act only when it harms *both* allocative efficiency *and* raises the prices of goods above competitive levels or diminishes their quality) (emphasis added). The Court declines to make new law here and open the door for antitrust claims to be brought by any plaintiff who claims to have a higher quality product that consumers *should* be choosing.

Both parties cite *Sewell Plastics, Inc. v. Coca-Cola Co., 720 F. Supp. 1196 (W.D.N.C. 1989)* aff'd and remanded, *912 F.2d 463 (4th Cir. 1990)*, in support of their arguments. In Sewell, a plastic bottle manufacturer (Sewell) brought an action against soft drink bottlers and Southeastern Container, a plastic bottle manufacturing cooperative formed by the defendant bottlers, alleging violations of federal ***antitrust law*** (among other allegations). Id. Prior to the defendant bottlers forming their manufacturing cooperative, they had purchased over 90% of their bottles from Sewell. *Id. at 1199*. After forming their own bottling manufacturing facility, defendant bottlers bought only about 17% of their bottle requirements from Sewell. Id. The court found that the "economic consequences in the relevant market of the **[**27]** bottle-making defendants were dramatic." Id. Prices for plastic bottles dropped, production of plastic bottles increased, production processes became more efficient, the number of competitors in the market remained the same but market concentration decreased, and—most importantly—"although some competit*ors* may be making less profit, there has been no adverse effect on competit*ion*." Id. (emphasis in original). Because antitrust laws were enacted to protect competition, not competitors, the court granted the defendants summary judgment because the plaintiff could not establish an antitrust injury. Id.

[*1150] Plaintiff argues that Sewell is distinguishable because the court found that there were no anticompetitive effects—price to consumers had decreased, consumer choice had increased, and innovation had increased. *Id. at 1196, 1211, 1213, 1218-1219, 1222*. Because Plaintiff alleges anticompetitive effects here, Plaintiff argues that its Complaint survives the motion to dismiss. However, in evaluating a motion to dismiss, the court looks not just at Plaintiff's allegations, but at the factual support underlying those allegations. As discussed above, Plaintiff fails to allege any facts to support a claim that Defendant's Challenged Restraints **[**28]** have had an anticompetitive effect that has injured consumers. As the Supreme Court has emphasized, ***HN16***[] an insistence on specificity of facts is warranted before permitting a case to proceed into costly and protracted discovery in an antitrust case because of the potential great expense of discovery. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 558, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; see also *Somers v. Apple, Inc., 729 F.3d 953, 966 (9th Cir. 2013)*. Because the Court fails to find facts to support an allegation of antitrust injury, Plaintiff's Amended Complaint is dismissed.

III. Leave to Amend

HN17[] If the court dismisses a complaint, it must decide whether to grant leave to amend. See *28 U.S.C. § 1653*. The Ninth Circuit has repeatedly held that dismissal without leave to amend is improper, even if no request to amend the pleading was made, unless it is clear that the defective pleading cannot possibly be cured by the allegation of additional facts. *Snell v. Cleveland, Inc., 316 F.3d 822, 828 n. 6 (9th Cir. 2002)* (citing *Lee v. City of Los Angeles, 250 F.3d 668, 692 (9th Cir. 2001))*; *Lopez v. Smith, 203 F.3d 1122, 1130-31 (9th Cir. 2000)*. Accordingly, the Court grants Plaintiff leave to amend.

CONCLUSION

Defendant's Motion to Dismiss [80] and Amended Request Seeking Judicial Consideration of Documents Incorporated by Reference [82] are GRANTED. Plaintiff is granted leave to amend the First Amended Complaint to allege facts sufficient to demonstrate an antitrust injury. If Plaintiff chooses to amend its complaint, it must do **[**29]** so within 14 days of the date below.

IT IS SO ORDERED.

Dated this 15 day of May, 2015.

HN1[] **Complaints, Requirements for Complaint**

In reviewing the sufficiency of a complaint, a district court must accept all well-plead facts as true and draw all permissible inferences in favor of the plaintiff. The Federal Rules of Civil Procedure require only that a complaint provide the defendant with fair notice of what the claim is and the grounds upon which it rests. The Supreme Court has described this notice-pleading standard as requiring a complaint to contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. While factual allegations must be accepted as true, legal conclusions may not be considered.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Antitrust & Trade Law, Procedural Matters**

The pleading standard under *Fed. R. Civ. P. 8(a)*, as applied in the antitrust context, does not require heightened fact pleading of specifics, but only enough facts to state a claim to relief that is plausible on its face. A plaintiff must plead facts that "raise a reasonable expectation that discovery will reveal evidence of illegal agreement. And, of course, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely. The fact that the allegations undergirding a claim could be true is no longer enough to save a complaint from being dismissed; the complaint must establish a nonnegligible probability that the claim is valid; but the probability need not be as great as such terms as preponderance of the evidence connote.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Governments > Federal Government > Claims By & Against

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Heightened Pleading Requirements, Fraud Claims**

In addition to meeting the *Fed. R. Civ. P. 8(a)* requirements, fraud-based claims brought under the False Claims Act, *31 U.S.C.S. § 3729 et seq.*--an anti-fraud statute--are subject to the heightened pleading standard of *Fed. R. Civ. P. 9(b)*. *Rule 9(b)* says that in alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally. *Fed. R. Civ. P. 9(b)*. While the precise level of particularity required under *Rule 9(b)* depends upon the facts of the case, the pleading ordinarily requires describing the who, what, when, where, and how of the fraud.

Governments > State & Territorial Governments > Claims By & Against

HN4[] **State & Territorial Governments, Claims By & Against**

The Illinois Whistleblower Reward and Protection Act, *740 ILCS 175/1 et seq.*, is identical to the federal false-claims statute except with respect to which governmental entity served as the target for the fraud (i.e., federal or state). Courts generally apply the same pleading standard for both federal and state False Claims Act, *31 U.S.C.S. § 3729 et seq.*, claims.

Governments > Federal Government > Claims By & Against

Governments > State & Territorial Governments > Claims By & Against

HN5[] **Federal Government, Claims By & Against**

The False Claims Act, *31 U.S.C.S. § 3729 et seq.*, and the Illinois Whistleblower Reward and Protection Act, *740 ILCS 175/1 et seq.*, impose liability on any person who: (A) knowingly presents, or causes to be presented, a false or fraudulent claim for payment or approval; (B) knowingly makes, uses, or causes to be made or used, a false record or statement material to a false or fraudulent claim; (C) conspires to commit a violation of subparagraph (A) or (B). *31 U.S.C.S. § 3729(a)(1)(A)-(C)*; *740 ILCS 175/3(a)(1)(A)-(C)*.

Governments > Federal Government > Claims By & Against

HN6[] **Federal Government, Claims By & Against**

Each and every claim submitted under a contract, loan guarantee, or other agreement which was originally obtained by means of false statements or other corrupt or fraudulent conduct constitutes a false claim.

Governments > Federal Government > Claims By & Against

HN7[] **Federal Government, Claims By & Against**

Where a relator argues that a defendant's false claims were predicated on a fraudulently induced contract, in order to survive a motion to dismiss, the relator need only provide a plausible basis for believing that the defendant entered into a government contract with the intent not to perform or with the knowledge that it could not preform as promised. Simple breach of contract is not fraud, but making a promise while planning not to keep it is fraud. If a false statement is integral to a causal chain leading to payment, it is irrelevant how the federal bureaucracy has apportioned the statements among layers of paperwork. This approach comports with the Supreme Court's instruction that the False Claims Act, *31 U.S.C.S. § 3729 et seq.*, be construed broadly so as to reach all types of fraud, without qualification, that might result in financial loss to the Government; the Court has consistently refused to accept a rigid, restrictive reading of the Act.

Governments > Federal Government > Claims By & Against

HN8[] **Federal Government, Claims By & Against**

Making a false promise in order to obtains something of value is fraud, and can be the basis of a claim under the False Claims Act, *31 U.S.C.S. § 3729 et seq.*, and emphasizing the need for a relator to show that the defendant knew that the promise was false when making it.

Governments > Federal Government > Claims By & Against

HN9[] **Federal Government, Claims By & Against**

A material statement (in the context of a False Claims Act, *31 U.S.C.S. § 3729 et seq.*, claim) is one that has the potential to influence the government's decision to pay or approve a false claim. But under a fraudulent-inducement theory, relator must show not only that defendants' misrepresentations had the potential to induce government action, but actually did induce (or cause) the government to act, thus invoking the legal principles of causation, reliance, and inducement. In essence, the essential element of inducement or reliance is one of causation. At the pleading stage, relator's allegations of materiality and inducement need only be plausible.

Governments > Federal Government > Claims By & Against

HN10[] **Federal Government, Claims By & Against**

To plead False Claims Act, *31 U.S.C.S. § 3729 et seq.*, and Illinois Whistleblower Reward and Protection Act, *740 ILCS 175/1 et seq.*, claims, relator must show that defendants presented fraudulent claims to the government in order to obtain governmental funding; both federal and state.

Public Health & Welfare Law > ... > Medicaid > Providers > Payments & Reimbursements

HN11[] **Providers, Payments & Reimbursements**

Under Medicaid, the state pays health care providers for services rendered to Medicaid recipients, and it is reimbursed for a significant portion of those funds by the federal government after demonstrating compliance with a number of federal regulations.

Governments > Federal Government > Claims By & Against

HN12[] Federal Government, Claims By & Against

The definition of the word "claim" as defined by the False Claims Act, *31 U.S.C.S. § 3729 et seq.*, includes, in part: any request or demand for money presented to an officer, employee, or agent of the United States; or is made to a contractor, grantee, or other recipient, if the money is to be spent or used on the Government's behalf or to advance a Government program or interest, and if the United States Government provides or has provided any portion of the money requested or demanded; or will reimburse such contractor, grantee, or other recipient for any portion of the money requested or demanded. *31 U.S.C.S. § 3729(b)(2)(A)*. The pre-2009 version of the statute is somewhat narrower, but the relevant language is still the same.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN13[] Heightened Pleading Requirements, Fraud Claims

The particularity requirement of *Fed. R. Civ. P. 9(b)* must be relaxed where the plaintiff lacks access to all facts necessary to detail his claim.

Governments > Federal Government > Claims By & Against

HN14[] Federal Government, Claims By & Against

In the Seventh Circuit, a relator does not need to have actually witnessed the specific request for payment or to have had access to paperwork submitted to the government. It is not essential for a relator to produce the invoices (and accompanying representations) at the outset of the suit.

Governments > Federal Government > Claims By & Against

HN15[] Federal Government, Claims By & Against

The False Claims Act (FCA), *31 U.S.C.S. § 3729 et seq.*, confers liability on those who conspire to commit a violation of the FCA. *31 U.S.C.S. § 3729(C)*. *31 U.S.C.S. § 3729(a)(3) (pre-2009)* confers liability on those who conspire to defraud the Government by getting a false or fraudulent claim allowed or paid.

Governments > Federal Government > Claims By & Against

HN16[] Federal Government, Claims By & Against

Unique to a conspiracy claim, the relator must establish that the conspirators agreed that the false record or statement would have a material effect on the Government's decision to pay the false or fraudulent claim.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN17[] Heightened Pleading Requirements, Fraud Claims

Claims premised on a course of fraudulent conduct are subject to *Rule 9(b)*'s particularity requirement.

Governments > Federal Government > Claims By & Against

HN18[] Federal Government, Claims By & Against

The U.S. Court of Appeals for the Seventh Circuit has recognized bid-rigging as a basis for a False Claims Act, *31 U.S.C.S. § 3729 et seq.*, violation.

Governments > Federal Government > Claims By & Against

HN19[] Federal Government, Claims By & Against

Courts in the Northern District of Illinois have recognized false inducement as a basis for alleging a False Claims Act, *31 U.S.C.S. § 3729 et seq.*, violation.

Antitrust & Trade Law > Sherman Act > Claims

HN20[] Sherman Act, Claims

The Sherman Act exists to protect consumers from injury that results from anticompetitive behavior. The successful pleading of a claim under *§ 1* of the Sherman Act requires proof of three elements: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN21[] Per Se Rule & Rule of Reason, Sherman Act

Where the alleged anticompetitive conduct does not amount to a per se violation of the Sherman Act, defendants' conduct is assessed under the Rule of Reason analysis, under which the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. The test of legality under the Rule is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. The Rule requires not only that the plaintiff allege and prove anticompetitive effects, but additionally, as with all antitrust claims, that the injury complained of be of a type that the antitrust laws were designed to guard against, and further that the antitrust violation be the direct cause of plaintiff's injury. Plaintiff must show that defendants' conduct had an anticompetitive effect in a relevant market, and that the defendants have market power in that market. Plaintiff must allege, not only an injury to himself, but an injury to the market as well. Finally, a plaintiff must also establish "antitrust standing" to raise an antitrust claim (i.e., whether a party injured by an antitrust violation may recover under the antitrust laws), which is an inquiry separate and apart from whether a plaintiff has Article III standing.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN22[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Vertical price restraints are to be judged by the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Allocation

HN23[] **Per Se Rule & Rule of Reason, Sherman Act**

The first requirement in every suit based on the Rule of Reason is market power, without which the practice cannot cause those injuries (lower output and the associated welfare losses) that matter under the federal antitrust laws. Because the antitrust laws do not purport to afford remedies for all torts committed by or against persons engaged in interstate commerce, plaintiffs must allege that the anticompetitive conduct at issue actually impacted competition in a relevant market; a loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market. Otherwise the mere fact that one party bid successfully against another party for a contract would be equivalent to an anticompetitive effect and would raise the specter of an antitrust action being used as a remedy for any tortious conduct during the course of the competition. A plaintiff must also show that the defendant has market power in the relevant market, which means that it can raise prices above a competitive level without losing its business.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Allocation

HN24[] **Per Se Rule & Rule of Reason, Sherman Act**

Under the Rule of Reason, the plaintiff bears the burden to define the relevant market and to establish the defendants' market power. If the plaintiff meets this burden, the defendant can show that the restraint in question actually has a procompetitive effect on balance, while the plaintiff can dispute this claim or show that the restraint in question is not reasonably necessary to achieve the procompetitive objective.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN25[] **Per Se Rule & Rule of Reason, Sherman Act**

A loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market. It is the function of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, to compensate the unfortunate only when their demise is accompanied by a generalized injury to the market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN26[] **Sherman Act, Claims**

The concept of "antitrust injury" has both a ubiquitous and amorphous presence in antitrust jurisprudence, and can be found (1) as a prima facie element of Sherman Act claims, (2) as a factor under the Rule of Reason analysis, and (3) as a factor in the determining whether a plaintiff has "antitrust standing. But regardless of its contextual surroundings, the "antitrust injury" inquiry always remains relatively the same: Plaintiffs must prove more than injury causally linked to an illegal presence in the market. Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be 'the type of loss that the claimed violations would be likely to cause. A plaintiff must demonstrate that her claimed injuries are of the type the antitrust laws were intended to prevent and reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN27[] **Clayton Act, Claims**

Although the standing provision in § 4 of the Clayton Act is broad—permitting civil suits by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws, *15 U.S.C.S. § 15*—the Supreme Court has endorsed several limiting principles such that not every person, however tangentially injured by an antitrust violator, has standing to sue.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN28[] **Clayton Act, Claims**

The Supreme Court has incorporated traditional common-law tort principles into the evolving antitrust-standing inquiry, thereby adding a proximate cause element into § 4 of the Clayton Act, *15 U.S.C.S. § 15*, actions such that a plaintiff does not have standing to sue under § 4 if its injuries were indirect and speculative. The result is a six-factor test for examining the link between a plaintiff's harm and a defendant's wrongdoing that has become the predominant test for assessing antitrust standing, focusing on: (1) the causal connection between the violation and the harm; (2) the presence of improper motive; (3) the type of injury and whether it was one Congress sought to redress; (4) the directness of the injury; (5) the speculative nature of the damages; and (6) the risk of duplicate recovery or complex damage apportionment.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN29[] **Private Actions, State Regulation**

Illinois courts have adopted a common-law harmonization provision, meaning that they interpret their antitrust laws in harmony with federal-court decisions interpreting federal ***antitrust law***. Federal precedent is both relevant and helpful in determining the adequacy of antitrust allegations. While federal precedent is not binding on Illinois courts, the relevant statutes are very similar.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN30[] Intentional Interference, Elements

Under Illinois law, the elements of a claim for tortious interference with prospective business relations are (1) plaintiff's reasonable expectancy of entering into a valid business relationship; (2) defendant's knowledge of that expectancy; (3) defendant's intentional and unjustifiable interference that induced or caused a breach or termination of the expectancy; and (4) damage to plaintiff resulting from defendant's conduct.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN31[] Intentional Interference, Elements

The fact that the plaintiff was asked to bid implies that the contract was up for competitive bidding and thus it cannot be said that the plaintiff had an expectancy of future business relations. Twombly does require that the plaintiff set forth facts that make it plausible that she had a reasonable expectancy.

Opinion

[*908] MEMORANDUM OPINION AND ORDER

Before the Court are Defendants' motions to dismiss [94, 96, 99, 102, **[**2]** 103] Relator's and Plaintiff's amended complaint [88]. Defendants' motions are denied as to Counts I-IV and granted as to Counts V—VII. Counts V—VII of the amended complaint are dismissed without prejudice. Relator and Plaintiff should inform the court within 14 days as to whether they intend to file a second amended complaint repleading Counts V—VII, at which time the Court will set a status hearing to discuss scheduling moving forward.

I. Background[1]

On November 11, 2011, Relator Matthew Blaum brought this *qui tam* action on behalf of the United States and the State of Illinois, alleging violations of the False Claims Act, *31 U.S.C. § 3729 et seq.* ("FCA"),[2] and the Illinois Whistleblower Reward and Protection Act, *740 ILCS 175/1 et seq.* ("IWRPA"). In addition, Plaintiff Hot Shots NM, LLC alleged that Defendants violated state and federal antitrust laws, and tortiously interfered with its prospective business opportunities. The federal government declined to intervene [15] on October 28, 2013, prompting the court to unseal the complaint [16]. In April 2014, Defendants filed individual **[**3]** motions to dismiss the complaint, which were mooted three months later when Relator Blaum and Plaintiff Hot Shots filed an amended complaint [88]. Now before the Court are Defendants' motions to dismiss the amended complaint.

Originally there were seven named Defendants in this case. On January 12, 2015, Relator and Plaintiff filed a Rule 41 stipulation of voluntary dismissal with prejudice of individual Defendants Faisal Sami and Sarah Faisal (keeping as a Defendant Sami Distributors, Inc.), and the Court subsequently entered an order dismissing only those two defendants [126].[3] Each of remaining five Defendants filed an individual motion to dismiss the amended **[*909]** complaint: Dr. Trepashko [95], Covidien [97], Triad Isotopes [100], Mr. Giba (adopting Covidien and Triad Isotopes' arguments) [102], and Sami Distributors [104]. Relator and Plaintiff filed **[**4]** a single response brief [110], and each Defendant filed an independent reply [115, 117, 119, 120, 121].

A. Cook County Health and Hospital System and Radiopharmaceuticals

Relator alleges that from at least 2008 through 2011, Defendants defrauded Cook County, Illinois and the Cook County Health and Hospitals System ("CCHHS") by making false statements and false claims regarding the sale of radiopharmaceutical drugs. CCHHS, formerly known as the Cook County Bureau of Health Services, oversees a comprehensive and integrated healthcare system covering Chicago and suburban Cook County, composed of hospitals, ambulatory and community health network clinics, a public health department, **[**5]** a correctional healthcare facility, and an outpatient infectious disease center. Specific facilities within the healthcare conglomerate include John H. Stroger Jr. Hospital, Provident Hospital, Oak Forest Hospital, Cook County Department of Public Health, Cermak Health Services, the Ruth Rothstein CORE Center, and 16 ambulatory and Community Health Network clinics.

CCHHS's annual revenues exceed $900 million. The majority of that revenue comes from patient services, and approximately 39 percent of CCHHS's patient revenue comes from the federal Medicare and Medicaid programs. Because CCHHS serves all patients, it has a substantial shortfall each year between its expenses and the revenue generated by patient care, and that shortfall is made up with funding from Cook County. In 2011, for example, Cook County provided CCHHS with approximately $368 million in funding. CCHHS spends approximately $2 million per year on radiopharmaceutical drugs.

---

[1] The Court accepts as true the facts alleged in Relator's and Plaintiff's amended complaint and makes all reasonable inferences in their favor. See *McReynolds v. Merrill Lynch & Co., 694 F.3d 873, 879 (7th Cir. 2012)*.

[2] The FCA was amended in 2009, and various sections of the FCA became effective at different times. See, *e.g., United States ex rel. Frawley v. McMahon, 2015 U.S. Dist. LEXIS 423, 2015 WL 115763, at *8 (N.D. Ill. Jan. 5, 2015)*. Here, the allegedly fraudulent conduct relating to the 2008 and 2010 CCHHS contracts took place both before and after the FCA amendments went into effect, meaning that most likely both the pre- and post-amendment statutes are relevant here.

[3] Sami Distributors argues in its reply brief that Relator's claims against it are barred by *res judicata* based on Relator's voluntary dismissal of individual Defendants Faisal Sami and Sarah Faisal. [See 121, at 1-4.] But *res judicata* has no application here. The preclusive effect of the voluntary dismissal with prejudice means that Relator is barred from raising similar claims against Faisal Sami and Sarah Faisal in a separate lawsuit; it does not release Sami Distributors from the claims currently pending against it.

Radiopharmaceutical drugs, which fall within the nuclear pharmacy industry, are used to treat certain medical conditions (such as cancer) and to perform radiological testing (such as CT scans and MRIs). The purchase, storage, and sale of these drugs **[**6]** are highly regulated by several federal and state industries, and distributors must hold a license to provide radiopharmaceuticals.

B. 2008 and 2010 Contracts

Defendant Dr. Trepashko is a nuclear radiologist for CCHHS. As head of the Nuclear Medicine department at CCHHS, he has substantial control over the awarding of CCHHS's annual contract for nuclear medicine. Dr. Trepashko had a close relationship with Defendant Mr. Giba, a sales representative for global healthcare-products provider Covidien, Inc. (which also is a Defendant here). Relator alleges that in 2008—when Relator himself was a Sales Specialist at Covidien—Dr. Trepashko provided Mr. Giba with insider information about how to ensure that Covidien obtained CCHHS's 2008 radiopharmaceutical contract. Specifically, Dr. Trepashko formulated a plan that would have Sami Distributors—a Minority- or Woman-Owned Business Entity ("M/WBE") with no experience or qualifications in providing radiopharmaceutical drugs—submit a bid on its own behalf, when in fact the plan was to have Covidien fulfill the terms of the contract. In **[*910]** that scenario, Sami was slated to be a "pass-through" entity that would handle some paperwork (*e.g.*, billing CCHHS), **[**7]** but would provide no commercially useful functions regarding the purchase, storage, or sale of radiopharmaceuticals. All parties benefitted from this arrangement: Sami won (on paper) the contract, earning it a cut of the proceeds; Covidien won (in reality) the contract, earning it the bulk of the proceeds; CCHHS was a step closer to complying with Cook County's aspirational goal that 35 percent of all contracts for professional and consulting services be with M/WBEs; and Dr. Trepashko was in the good graces of Covidien and Sami, who rewarded him with expensive dinners and lucrative speaking engagements.

According to the amended complaint, Dr. Trepashko passed the torch to Mr. Giba to carry out the scheme. Just prior to the 2008 bid submissions, Mr. Giba met with Faisel Sami of Sami Distributors at Mr. Sami's home to secure his participation in the plan. After reaching an agreement, Mr. Giba went to a nearby restaurant, where—utilizing insider information provided to him by Dr. Trepashko—he prepared the bid form that Sami would ultimately submit to CCHHS. The bid form itself listed a number of radiopharmaceutical drugs and the quantities of those drugs that CCHHS anticipated using in **[**8]** the upcoming year. Bidders were required to provide a per-dose price for each drug and, if awarded the contract, a bidder would be required to honor its contract price regardless of the quantities actually ordered by CCHHS during the contract term. Mr. Giba's tactic, informed by Dr. Trepashko, was to lower Sami's bid price for one specific drug, which had the effect of making Sami the overall lowest bidder in the lot. Sami approved and submitted this bid on August 11, 2008, and CCHHS awarded Sami the 2008 radiopharmaceutical contract on December 5, 2008.

In addition to this price-fixing scheme, Sami made a number of misrepresentations calculated to ensure that it would win the contract, including (1) that it would maintain an inventory allowing same-day delivery (or one-hour delivery in emergency situations), (2) that it would meet certain transportation and delivery requirements relating to radiopharmaceuticals as dictated by Illinois law, (3) that it would pick-up expended radioactive syringes, (4) that it would maintain a current license from the State of Illinois, Department of Nuclear Safety, Radioactive Material License pursuant to the Illinois Radiation Protection Act and Regulations **[**9]** for Radiation Protection, allowing it to receive, acquire, own, possess, and transfer radioactive materials, (5) that it would not subcontract the CCHHS radiopharmaceutical contract, and (6) that it would spend $625,000.00 of the contract funds with other M/WBE contractors (specifically, MedRx Distributors, Inc. and Beverly A. Simpson, Inc.). Relator alleges that Sami never intended to perform any of these functions; instead, it was the conspirators' plan all along to have Covidien execute all radiopharmaceutical services directly with CCHHS, with Sami acting only as a pass-through entity. Nonetheless, after obtaining the contract, Sami proceeded to submit hundreds of invoices to CCHHS for the sale of radiopharmaceuticals as if it were performing under the contract, even though the bulk of those proceeds were funneled to Covidien.

On December 17, 2009, Sami submitted a bid to retain the CCHHS radiopharmaceutical contract. The bidding process did not change, and the conspirators put forth a nearly identical bid. Two months later, CCHHS again awarded Sami the radiopharmaceutical contract. One key difference is that in the 2010 bid, Sami represented that its earnings under the contract **[**10]** **[*911]** would satisfy the county's M/WBE ordinance (which requires the entity to perform a "commercially useful function"). Because Sami maintained its passive role as a pass-through entity, it didn't perform any commercially useful functions, and thus knowingly misrepresented itself in order to induce CCHHS into awarded it the contract.

C. 2011 Contract

Several changes occurred between the bidding periods for CCHHS's 2010 and 2011 radiopharmaceutical contracts. First, Triad Isotopes—a nationwide radiopharmaceutical company based in Orlando, Florida—acquired Covidien's radiopharmaceutical business (in a deal that they announced in December 2009 and finalized in June 2010), prompting Mr. Giba to transition over as a Triad Isotopes employee. Second, in 2010, Relator left Covidien and joined a competing radiopharmaceutical provider called Hot Shots as their Director of Business Development. Third, CCHHS enlisted Pricewaterhouse Coopers to revamp the bidding process for their radiopharmaceutical process. Specifically, while CCHHS still used a similar RFP that listed certain radiopharmaceutical drugs and expected usage quantities, the bidding itself would be accomplished through an online auction **[**11]** system run by Electronic Auction Services, Inc., meant to ensure same-time, blind bidding wherein the lowest bidder would be awarded the contract.

Because of the change in the bidding process for the CCHHS radiopharmaceutical contract, Defendants were forced to rejigger their scheme to ensure that Dr. Trepashko's chosen provider, Mr. Giba (now with Triad Isotopes) would win the contract. Due to the added scrutiny over the bidding process (and at Triad Istopes' insistence), Sami was dropped as the middle-man in the scheme. Instead, Triad Isotopes submitted a bid on its own. But because the new bidding process meant that Triad Isotopes would be bidding without any insider knowledge as to where its competitors' bids would be, the conspirators had to devise a new way of ensuring victory. Their solution was to alter the bid form itself by raising the expected usage quantities of infrequently used (but expensive) drugs. For example, Triad Isotopes bid $20 per dose for the drug Tc99 (WBC), and Hot Shots and Cardinal Health bid $1,120.00 and $1,763.98 per dose, respectively. The quantity listed in the bid was 75 doses, when CCHHS's actual usage in prior years had been approximately 2-3 doses **[**12]** annually. Similarly, Triad Isotopes bid $100 per dose for the drug Sm-153 Quadramet 90 mCi, and Hot Shots and Cardinal Health bid $5,250 and $7,301 per dose for that same drug. And again, the quantity requested, 35, far exceeded CCHHS's historical usage.

This bidding tactic dramatically lowered Triad Isotopes bottom line pricing, which allowed it to raise its prices on commonly-used drugs. For example, for Tc99m Sestamibi, of which CCHHS purchases approximately 2000 doses per year, Triad Isotopes bid $68/dose while Hot Shots bid $40/dose. Similarly, CCHHS purchases approximately 2000 doses of TL-201 4 mCi annually, and Triad Isotopes' and Hot Shots' respective bid prices were $80/dose and $60/dose.

Triad Isotopes had the overall lowest bid (and thus won the contract), and Hot Shots had the second lowest bid. Relator alleges that absent Defendants' fraudulent alteration of the bid form, Hot Shots would have won the contract, and would have saved CCHHS over $300,000. Reflecting on his role in the multi-year conspiracy, Dr. Trepashko said to Relator that he didn't care what happened to the money or how much **[*912]** the drugs cost; it was CCHHS's money, not his.

II. Legal Standard

HN1[] In reviewing the **[**13]** sufficiency of a complaint, a district court must accept all well-plead facts as true and draw all permissible inferences in favor of the plaintiff. *Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 334 (7th Cir. 2012)*. The Federal Rules of Civil Procedure require only that a complaint provide the defendant with "fair notice of what the * * * claim is and the grounds upon which it rests." *Erickson v. Pardus, 551 U.S. 89, 93, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. The Supreme Court has described this notice-pleading standard as requiring a complaint to "contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). While factual allegations must be accepted as true, legal conclusions may not be considered. *Id.*

HN2[] The pleading standard under *Federal Rule of Civil Procedure 8(a)*, as applied in the antitrust context, "do[es] not require heightened fact pleading of specifics, but only enough facts to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A plaintiff must plead facts that "raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id. at 556* ("And, of course, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and 'that a recovery is very remote and unlikely.'" (citation omitted)); *In re Text Messaging Antitrust Litig., 630 F.3d 622, 629 (7th Cir. 2010)* ("The fact **[**14]** that the allegations undergirding a claim could be true is no longer enough to save a complaint from being dismissed; the complaint must establish a nonnegligible probability that the claim is valid; but the probability need not be as great as such terms as 'preponderance of the evidence' connote.").

HN3[] In addition to meeting the *Rule 8(a)* requirements, fraud-based claims brought under the False Claims Act—an anti-fraud statute—are subject to the heightened pleading standard of *Rule 9(b)*. *United States ex rel. Gross v. Aids Research Alliance-Chicago, 415 F.3d 601, 604 (7th Cir. 2005)*. *Rule 9(b)* says that "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally." *Fed. R. Civ. P. 9(b)*. "While the precise level of particularity required under *Rule 9(b)* depends upon the facts of the case, the pleading 'ordinarily requires describing the who, what, when, where, and how of the fraud.'" *Camasta v. Jos. A. Bank Clothiers, Inc., 761 F.3d 732, 737 (7th Cir. 2014)* (quoting *AnchorBank, FSB v. Hofer, 649 F.3d 610, 615 (7th Cir. 2011))*.

III. Analysis

A. False Claims Act Claims

Relator alleges that Defendants' conduct surrounding (a) the 2008 and 2010 CCHHS radiopharmaceutical contracts and (b) the 2011 CCHHS radiopharmaceutical contract violated both the federal False Claims Act ("FCA") and ***HN4***[] the Illinois Whistleblower Reward and Protection **[**15]** Act ("IWRPA"), which is identical to the federal false-claims statute except with respect to which governmental entity served as the target for the fraud (*i.e.*, federal or state). Because courts generally apply the same **[*913]** pleading standard for both federal and state FCA claims, see, *e.g.*, *United States ex rel. Upton v. Family Health Network, Inc., 900 F. Supp. 2d 821, 828 (N.D. Ill. 2012)*; *United States ex rel. Goldberg v. Rush Univ. Med. Ctr., 929 F. Supp. 2d 807, 816 (N.D. Ill. 2013)*, the Court will assess Relator's federal and state claims simultaneously.

HN5[] The False Claims Act and IWRPA impose liability on any person who:

> (A) knowingly presents, or causes to be presented, a false or fraudulent claim for payment or approval;
> (B) knowingly makes, uses, or causes to be made or used, a false record or statement material to a false or fraudulent claim;
> (C) conspires to commit a violation of subparagraph (A) [or] (B) * * *.

31 U.S.C. § 3729(a)(1)(A)-(C); *740 Ill. Comp. Stat. 175/3(a)(1)(A)-(C)*; see also *United States ex rel. Yannacopoulos v. Gen. Dynamics, 652 F.3d 818, 822 (7th Cir. 2011)*; *United States ex rel. Crews v. NCS Healthcare of Ill., Inc., 460 F.3d 853, 856 (7th Cir. 2006)*.

Relator's theory for liability under the FCA and IWRPA is that Defendants' fraudulently induced CCHHS to enter into the 2008, 2010, and 2011 radiopharmaceutical contracts by making contractual promises without intending to perform them, and thus, while the individual claims for payment on those contracts were not themselves false, they were predicated on the fraudulently-induced underlying contracts, thus bringing them within the sphere of prohibited **[**16]** claims under the FCA statutes (*i.e.*, a fraudulent-inducement theory of liability). Each of the five

Defendants seeks dismissal of these claims on multiple grounds, many of which overlap. For simplicity, the Court will address Defendants' arguments relating to the 2008 and 2010 contracts first, followed by Defendants' arguments related to the 2011 contract.

1. The 2008 and 2010 Contracts

a. False Statement

The most prevalent objection to Relator's FCA claims regarding the 2008 and 2010 CCHHS contracts is that Relator failed to identify any claim for payment that was actually *false*. In other words, Defendants focus on the actual invoices that Sami sent to CCHHS seeking payment for the radiopharmaceuticals that were provided (by Covidien, as it turned out) under the 2008 and 2010 contracts, and argue that Relator did not (and cannot) allege that any of those individual invoices was false. Relator counters by arguing that this approach is too myopic and ignores the fact that Sami bid on these contracts to provide radiopharmaceuticals knowing that it was in no way fit to do so; instead, Sami served as a paradigmatic middle-man. Although Covidien supplied the radiopharmaceuticals directly to **[**17]** CCHHS, Covidien and CCHHS (with help from Defendants Giba and Trepashko) filtered the paperwork through Sami so that CCHHS could reap the benefits of contracting with a minority-owned business. The question, then, is whether Sami's misrepresentations in obtaining the 2008 and 2010 contracts pollute its subsequent invoices so as to transform those invoices into false claims under the FCA. See, *e.g.*, *United States ex rel. Marcus v. Hess, 317 U.S. 537, 543-44, 63 S. Ct. 379, 87 L. Ed. 443 (1943)* ("This fraud did not spend itself with the execution of the contract. Its taint entered into every swollen [invoice] which was the basic cause for payment of every dollar paid by the [government] * * *. The initial fraudulent action and every step thereafter taken, pressed ever to the ultimate goal—payment of government money to persons who had caused it **[*914]** to be defrauded."); S. Rep. No. 99-345, at 9 (1986), reprinted in 1986 U.S.C.C.A.N. at 5226, 5274 ("**HN6**[] [E]ach and every claim submitted under a contract, loan guarantee, or other agreement which was originally obtained by means of false statements or other corrupt or fraudulent conduct * * * constitutes a false claim.").

HN7[] Where a relator argues that a defendant's false claims were predicated on a fraudulently induced contract, in order to survive **[**18]** a motion to dismiss, the relator need only "provide[] a plausible basis for believing that the defendant entered into a government contract with the intent not to perform or with the knowledge that it could not preform as promised." *United States ex rel. Wildhirt v. AARS Forever, Inc., 2011 U.S. Dist. LEXIS 127735, 2011 WL 5373985, at *1 (N.D. Ill. Nov. 4, 2011)* (citing *United States ex rel. Lusby v. Rolls-Royce Corp., 570 F.3d 849, 853-54 (7th Cir. 2009)* ("Simple breach of contract is not fraud, but making a promise while planning not to keep it *is* fraud.")); see also *United States ex rel. Main v. Oakland City Univ., 426 F.3d 914, 916 (7th Cir. 2005)* ("If a false statement is integral to a causal chain leading to payment, it is irrelevant how the federal bureaucracy has apportioned the statements among layers of paperwork."); *United States ex rel. Schwedt v. Planning Research Corp., 59 F.3d 196, 199, 313 U.S. App. D.C. 200 (D.C. Cir. 1995)* (suggesting that an FCA claim based on misrepresentations regarding the defendant's ability to perform the terms of the contract would be actionable). This approach comports with the Supreme Court's instruction that the False Claims Act be construed broadly so as "to reach all types of fraud, without qualification, that might result in financial loss to the Government[;][4] * * * the Court has consistently refused to accept a rigid, restrictive reading" of the act. *United States v. Neifert-White Co., 390 U.S. 228, 232 (1968)*; *Cook Cnty., Ill. v. United States ex rel. Chandler, 538 U.S. 119, 129, 123 S. Ct. 1239, 155 L. Ed. 2d 247 (2003)* (discussing the legislative history of the FCA and its focus on protecting the federal fisc).

---

[4] Exactly how, or if, Defendants' fraudulent **[**19]** inducement resulted in a financial loss to the government is unclear from Relator's complaint. But "whether harm to the public fisc is an essential element of a *qui tam* action" is unclear, as the Supreme Court failed to address that issue after granting certiorari on that very question. See *Hughes Aircraft Co. v. United States ex rel. Schumer, 520 U.S. 939, 945, 117 S. Ct. 1871, 138 L. Ed. 2d 135 (1997)*. Regardless, Defendants did not raise this issue, and so the Court need not resolve it here.

Here, Relator alleges that Sami falsely represented to CCHHS that it would store and provide radiopharmaceuticals in accordance with the terms of the contract—knowing that Covidien would actually be the one performing Sami's contractual obligations—thereby fraudulently inducing CCHHS into contracting with Sami. Relator claims that Sami was simply a "pass-through" entity that did not perform any "commercially useful functions" but nonetheless received a cut of the contract funds for its middle-man function. Relator does not allege that any of Sami's actual invoices to CCHHS were fraudulent, but that those invoices were tainted by the underlying fraudulent inducement. This is sufficient to state an FCA claim under a fraudulent-inducement theory.[5] **[*915]** See, *e.g.*, *United States ex rel. Longhi v. Lithium Power Techs., Inc., 575 F.3d 458, 468 (5th Cir. 2009)* ("Under a fraudulent inducement theory, although **[**20]** the Defendants' subsequent claims for payment made under the contract were not literally false, [because] they derived from the original fraudulent misrepresentation [in the grant proposals], they, too, became actionable false claims." (alterations in original)).

Expanding on his fraudulent-inducement theory of liability, Relator describes several additional misrepresentations that Sami (with the help of Defendants) made to the government knowing at the time that their statements were false: (1) that Sami promised in the 2008 contract to spend $625,000.00 of the contract with M/WBEs despite having no intention to do so, (2) that Sami promised in the 2010 contract that its earnings under the contract would satisfy the county's M/WBE ordinance (which requires the entity to perform a "commercially useful function"),[6] and (3) that Sami obtained both the 2008 and 2010 the contracts through bid-rigging, which is a form of fraudulent inducement.[7] These allegations also serve as potential grounds for FCA liability under Relator's fraudulent-inducement theory. See, *e.g.*, *United States ex rel. Grenadyor v. Ukrainian Vill. Pharmacy, Inc., 772 F.3d 1102, (7th Cir. 2014)* (noting that "***HN8***[] [m]aking a false promise in order to obtains something of value is fraud, and **[**22]** can be the basis of a claim under the False Claims Act," and emphasizing the need for a relator to show that the defendant knew that the promise was false when making it (internal citation omitted)).

b. Materiality, Reliance, Causation, and Inducement

Defendants volley a number of additional attacks on Relator's false-claims allegations, intertwining arguments **[**23]** that invoke the somewhat-related issues of materiality, reliance, causation, and inducement. Starting with materiality, ***HN9***[] a material **[*916]** statement (in the context of an FCA claim) is one that has the

---

[5] Defendants pose somewhat of a straw man argument when they argue in response that "a mere breach of contract does not give rise to liability under the False Claims Act." *United States ex rel. Yannacopoulos v. Gen. Dynamics, 652 F.3d 818, 824 (7th Cir. 2011)* ("If the breaching party falsely claims to be in compliance with the contract to obtain payment, however, there may be an actionable false claim."). This principle exists outside of the fraud-in-the-inducement cases, and instead applies where a party misrepresents to the government that it is in compliance with a statute, regulation, or contract in order to induce a government benefit. These so-called "false certification" cases turn on the extent of the breach and whether the certification of compliance was a prerequisite to government payment, such that "minor technical regulatory violations do not make a claim 'false' for purposes of the FCA." *United States ex rel. Gross v. AIDS Research Alliance-Chicago, 415 F.3d 601, 604 (7th Cir. 2005)*. But a mere breach of contract (or noncompliance with a regulation or statute) is different in kind from a fraudulently **[**21]** induced contract, where at the outset a contracting party has no intention of complying with its contractual obligations. Additionally, Relator confirmed that he "is not pursuing a theory [of liability] based on false certifications, whether such certifications are express or implied." [110, at 10 n.5.]

[6] Cook County's M/WBE ordinance allows an M/WBE to function as a broker, which is essentially the role that Relator claims Sami filled. But using an M/WBE as a broker only entitles the user to a credit equal to 10 percent of the value of the goods that the M/WBE brokers, not the 100 percent that Sami allegedly represented. See Cook County Code § 34-281.

[7] See *Harrison, 176 F.3d at 787-88* (noting that, based on the language in the Supreme Court case of *Marcus v. Hess*, "courts have found False Claims Act violations in [various] bid-rigging situations"); *United States v. CFW Const. Co., Inc., 649 F. Supp. 616, 618 (D.S.C. 1986)* ("The conspiracy to rig bids on two federal funded * * * treatment projects falls within the proscription of [*31 U.S.C. § 3729(b)(1)(C)*]. In addition, the claims for payment submitted to the United States under the rigged contract that resulted from the conspiracy are false claims subjecting them to liability under [*31 U.S.C. § 3729(b)(1)(A)*]." (internal citations omitted)).

potential to influence the government's decision to pay or approve a false claim. See *Yannacopoulos, 652 F.3d at 828*. But under a fraudulent-inducement theory, Relator must show not only that Defendants' misrepresentations had *the potential* to induce government action, but actually *did* induce (or cause) the government to act, thus invoking the legal principles of causation, reliance, and inducement.[8] See, *e.g., Marcus, 317 U.S. at 543-44*; *United States ex rel. Thomas v. Siemens AG, 991 F. Supp. 2d 540, 569-71 (E.D. Pa. 2014)* ("In essence, the essential element of inducement or reliance is one of causation."). At the pleading stage, Relator's allegations of materiality and inducement need only be plausible. *Lusby, 570 F.3d at 854*.

Defendants argue that dismissal of Relator's **[**24]** FCA claims is appropriate because Relator failed to plead that CCHHS actually relied on any false statement in awarding the 2008 and 2010 contracts to Sami (or, put another way, that Defendants' statements did not induce—or cause—CCHHS to contract with Sami). Essentially Defendants' argument is that Dr. Trepashko knew about Sami's pass-through role and the other alleged misrepresentations and, acting on behalf of CCHHS, he contracted with Sami anyway. But Defendants fail to appreciate a major factual component of Relator's complaint: that CCHHS's decisionmaker (Dr. Trepashko) was part of the vertical bid-rigging conspiracy. Accordingly, it is no surprise that Dr. Trepashko approved of the middle-man set-up despite "kn[owing] full well how the arrangement would work in practice" because, according to Relator, he orchestrated it. [See 120, at 9.]

Regardless, the Court's focus at this stage is on Relator's allegations, and Relator clearly alleges that Defendants' false statements were material, were intended to induce CCHHS into contracting with Sami, and actually induced CCHHS into contracting with Sami. [Am. Compl., 88, ¶¶ 43, 49.] In addition to these high-level allegations, Relator sets forth in **[**25]** detail each material misrepresentation, and explains how each misrepresentation was a calculated effort on the part of the conspiracy to ensure that CCHHS would select Sami as the recipient of the radiopharmaceutical contracts. Relator's allegations are plausible because if these misrepresentations were not necessary to induce CCHHS into selecting Sami, why would Dr. Trepashko, the purported decisionmaker, have pushed for their inclusion?

In a related argument, Defendant Covidien claims that Relator failed to plead "that any statement or claim by Covidien *caused* CCHHS to make a payment it would not have otherwise made," arguing that this precludes Relator from meeting its burden to show that "if [Defendants'] statement or claim had not been 'false,' the government would not have issued payment." [97, at 18.] Relator did not respond directly to this argument, nor did Covidien reraise it in their reply brief. This argument was likely mooted by Relator's focus on his fraudulent-inducement theory of liability, wherein Relator alleges that CCHHS wouldn't have made *any* payments to Defendants had it not been **[*917]** fraudulently induced into entering the Sami contracts in the first place, meaning **[**26]** that Defendants' statements made to induce the contracts did in fact cause CCHHS to make payments it would not have otherwise made. Whether Covidien abandoned this argument or not, it is not an appropriate ground for dismissal.

c. Governmental Funding

HN10[] To plead FCA and IWRPA claims, Relator must show that Defendants presented fraudulent claims *to the government* in order to obtain governmental funding; here, both federal and state. Relator alleged the following:

> CCHHS['s] annual revenues exceed $900 million. The majority of that revenue comes from payments for services, including payments from the [federal] Medicare and Medicaid programs. Approximately 39 percent of CCHHS's patient revenue comes from Medicare and Medicaid. Because CCHHS serves all patients, it has a substantial shortfall each year between its expenses and the revenue generated by patient care. This shortfall

---

[8] Even though materiality and reliance/inducement are separate inquiries, because the latter is essentially a more demanding version of the former, and because Defendants' arguments related to both issues are based on the same set of facts, the Court will address these arguments simultaneously. See, *e.g., United States ex rel. Thomas v. Siemens AG, 991 F. Supp. 2d 540, 569-71 (E.D. Pa. 2014)* (discussing the difference between the materiality and reliance/inducement standards).

> is made up by the County directly. In 2011, for example, the County provided CCHHS approximately $368 million to make up for its shortfall.

[Am. Compl., 88, ¶ 22.] Relator also cites to specific invoices, including dates and amounts, that Sami submitted to the government for payment based on services rendered under the **[**27]** fraudulently-induced contracts. [*Id.*, ¶¶ 44, 50.]

To be clear, Relator does not allege that Sami submitted claims directly to the federal government.[9] Instead, Relator argues that Sami presented its fraudulent claims to an officer or employee of the government (*i.e.*, CCHHS),[10] and that at least some portion of CCHHS's payments to Sami were *reimbursed* by federal Medicare and Medicaid programs (or, regarding Relator's IWRPA claim, by funding from Cook County). "***HN11***[] Under Medicaid, the state pays health care providers for services rendered to Medicaid recipients, and it is reimbursed for a significant portion of those funds by the federal government after demonstrating compliance with a number of federal regulations." *United States ex rel. Tyson v. Amerigroup Ill., Inc., 2005 U.S. Dist. LEXIS 24032, 2005 WL 2667207, at *2 (N.D. Ill. Oct. 17, 2005)* (denying a motion to dismiss on presentment grounds where relator alleged that defendants submitted fraudulent claims to the Illinois Department of Public Aid, which was reimbursed by federal Medicare and Medicaid programs); *United States ex rel. West v. Ortho-McNeil Pharm., Inc., 2007 U.S. Dist. LEXIS 52666, 2007 WL 2091185, at *2 (N.D. Ill. July 20, 2007)* ("[C]laims submitted to state Medicaid agencies are considered claims presented to the federal government and may give rise to liability under the FCA.").

Relator relies on ***HN12***[] the definition of the word "claim" as defined by the FCA to support his "reimbursement" theory, which includes, in part:

> any request or demand * * * for money * * * presented to an officer, employee, or agent of the United States; or is made to a contractor, grantee, or other recipient, if the money * * * is to be spent or used on the Government's behalf or to advance a Government program or interest, and if the United **[*918]** States Government provides or has provided any portion of the money * * * requested or demanded; *or will reimburse such contractor, grantee, or other recipient for any portion of the money * * * requested or demanded*.

31 U.S.C. § 3729(b)(2)(A) (emphasis added). The pre-2009 version of the statute is somewhat narrower, but the relevant language is still the same:

> any request or demand * * * for money * * * which is made to a contractor, grantee, or other recipient if the United States Government provides any portion of the money * * * demanded, *or if* ***[**29]*** *the Government will reimburse such contractor, grantee, or other recipient for any portion of the money * * * which is requested or demanded*.

31 U.S.C. § 3729(c) (pre-2009 version) (emphasis added).[11]

---

[9] Defendants do not object to Relator's allegations that Sami submitted claims to the Illinois government.

[10] A private **[**28]** entity that "serve[s] a public function" in the administration of the Medicare program is "an 'officer or employee' of the United States." *Bodimetric Health Servs., Inc. v. Aetna Life & Cas., 903 F.2d 480, 487-88 (7th Cir. 1990)*. As applied here, CCHHS is thus an officer, employee, or agent of the United States for FCA purposes.

[11] As mentioned above, the allegedly fraudulent activity here is likely governed by both the current FCA statute (amended in 2009), and the pre-amendment statute. In briefing their respective motions to dismiss, the parties failed to commit to a particular version of the statute, citing cases that apply both versions and implying that there are no relevant differences here (at least at this stage). One distinction worth noting, however, is Congress's amending of the definition of "claim," which was meant to "clarify and correct erroneous interpretations of the law that were decided in *Allison Engine Co. v. United States ex rel. Sanders, 553 U.S. 662, 128 S.Ct. 2123, 170 L. Ed. 2d 1030 (2008)*, and *United States ex rel. Totten v. Bombardier Corp., 380 F.3d 488, 363 U.S. App. D.C. 180 (D.C. Cir. 2004)*." S. Rep. No. 111-10, at 10-11 (2009), reprinted in 2009 U.S.C.C.A.N. 430, 438. The goal of the amendment was to bring within the proscription of the FCA those who submit false claims to non-governmental entities that are funded by or reimbursed by the federal government. See, *e.g., id.* at 11 (clarifying that the amended FCA

Defendants argue that Relator failed to adequately plead that the money CCHHS used to pay for radiopharmaceuticals actually came from (or was reimbursed by) the government. The Court disagrees. Regarding federal funding, Relator alleges that a "majority" of CCHHS's $900 million annual revenue (*i.e.*, more than $450 million) comes from payments for patient care, and that 39 percent of patient revenue comes from Medicare and Medicaid. That means at least $175 million (or 19.5 percent) of CCHHS's annual revenue is paid by (or reimbursed by) federal funding. While Relator does not say specifically what portion (if any) of CCHHS's approximately $2 million annual budget on radiopharmaceuticals is reimbursed by Medicare and Medicaid, Relator provides enough information about CCHHS's relationship to the federal government to **[**31]** allow an inference that at least some of CCHHS's radiopharmaceutical expenditures were reimbursed by federal funding. See *Corley v. Rosewood Care Ctr., Inc., 142 F.3d 1041, 1051 (7th Cir. 1998)* ("***HN13***[] [T]he particularity requirement of *Rule 9(b)* must be relaxed where the plaintiff lacks access to all facts necessary to detail his claim.").[12] Furthermore, Relator is not required at this stage to provide individual patient information to show which radiopharmaceutical prescriptions were covered **[*919]** by Medicare or Medicaid. See *Goldberg v. Rush Univ. Med. Ctr., 929 F. Supp. 2d 807, 817 (N.D. Ill. 2013)* ("Whether claims were actually submitted to Medicare is information that is inaccessible to Relators."); see also *United States ex rel. Geschrey v. Generations Healthcare, LLC, 922 F. Supp. 2d 695, 705 (N.D. Ill. 2012)* ("***HN14***[] In this circuit, a relator does not need to have actually witnessed the 'specific request for payment' or to have had access to paperwork submitted to the government." (citing *Lusby, 570 F.3d at 854* (explaining that it is not "essential for a relator to produce the invoices (and accompanying representations) at the outset of the suit"))). Accordingly, Relator has met his burden.

d. *Rule 9(b)*

Defendants also seek dismissal of Relator's FCA and IWRPA claims based on a purported failure to state those claims **[**32]** with the requisite particularity required under *Rule 9(b)*. The familiar paradigm for assessing the sufficiency of a pleading is to determine whether the relator spelled out the "who, what, when, where, and how of the fraud.'" *Camasta, 761 F.3d at 737*. Relator's amended complaint accomplishes this feat in spades. The "who" in Relator's story are the conspiring Defendants, who engaged in a vertical bid-rigging scheme to win CCHHS contracts for radiopharmaceuticals (that's the "what"). When, where, and how? At various times and locations preceding the 2008 CCHHS contract bid the co-conspirators met (*e.g.*, at Faisel Sami's home, and at a nearby restaurant [Am. Compl. 88, ¶¶ 29-30]), at which time CCHHS insider Dr. Trepashko (a) told Covidien that it wanted to use Sami as a pass-through (knowing that Sami was not qualified to carry out the terms of the contract) and instructed Covidien's representative, Mr. Giba, to work with Sami, (b) provided Mr. Giba with insider bidding information, and (c) doctored Sami's bid to ensure that Sami would win the contract, which it did. [Am. Compl. 88, ¶¶ 25-31.] Relator alleges that Defendants duplicated their hoax by submitting a similarly fraudulent bid to retain the CCHHS contract **[**33]** in December of 2009.[13] [Am. Compl. 88, ¶ 46.] Relator's allegations exceed the particularity requirements of *Rule 9(b)*.

---

reaches "all false claims submitted to State administered Medicaid programs"). Importantly, though, even pre-amendment, **[**30]** courts regularly interpreted the FCA to apply to false claims made to Medicare and Medicaid providers. See, *e.g.*, *United States ex rel. Tyson v. Amerigroup Ill., Inc., 2005 U.S. Dist. LEXIS 24032, 2005 WL 2667207, at *2 (N.D. Ill. Oct. 17, 2005)* ("Indeed, several courts have highlighted the substantial role played by the federal government in its funding and enforcement of Medicare and Medicaid programs, and have found frauds upon such programs to fall squarely within the protections of the FCA.").

[12] Defendants' presentment argument can be construed as either a Rule 8 or a *Rule 9(b)* issue. The Court addresses both arguments here, and thus will not revisit this issue in the *Rule 9(b)* section.

[13] Defendants argue that Relator should be required to plead the who, what, where, when, and why regarding the fraud leading up to the 2010 contract, as Relator did in connection with the 2008 contract. But this misconstrues Relator's allegations. Relator claims that Defendants' fraudulent scheme arose prior to the 2008 contract, and Defendants merely duplicated (or continued) that scheme in obtaining the 2010 contract. Relator distinguishes these contracts with the 2011 contract, where CCHHS implemented a new bidding system, thus requiring Defendants to devise and implement a new fraudulent scheme to win that contract (and thus requiring Relator to set forth with particularity the details of that new scheme).

Defendants also argue—responding to Relator's allegations that Covidien rewarded Dr. Trepashko's role in the conspiracy by wining and dining him and providing him with lucrative speaking engagements [see Am. Compl. 88, ¶ 32]—that Relator failed to allege with sufficient particularity any violation of the federal Anti-Kickback Statute. [See 97, at 21.] This argument was effectively **[**34]** mooted by Relator's endorsement of his fraudulent-inducement theory of liability. Either way, the Court agrees that Relator has failed to state with particularity that Dr. Trepashko violated any anti-kickback statutes, but the Court interprets Relator's allegations regarding kickbacks [see Am. Compl. 88, ¶ 32] as rhetorical information to explain why Dr. Trepashko elected to devise and participate in this scheme.

[*920] e. Co-Conspirator Liability

While it's clear that Relator has stated a claim against Sami under his fraud-in-the-inducement theory, the next question is whether Relator's theory extends to Covidien, Mr. Giba, and Dr. Trepashko. Relator advances two arguments to bring these remaining Defendants into the fold: (1) that they are directly liable for causing the submission of the false claims and statements, and (2) that they are liable as co-conspirators under *31 U.S.C. § 3729(a)(1)(C)* and *740 ILCS 175/3(a)(1)(C)*.[14]

As to the former theory, Relator contends that FCA liability extends to those persons or entities that knowingly assisted in the submission of a false claim to the government. See, *e.g., Marcus, 317 U.S. at 544-45* ("These [FCA] provisions, considered together, indicate a purpose to reach any person who knowingly assisted in causing the government to pay claims which were grounded in fraud * * *."); *United States ex rel. McCready v. Columbia/HCA Healthcare Corp., 251 F. Supp. 2d 114, 116 (D.D.C. 2003)* ("The False Claims **[**36]** Act extends beyond the person making a false claim to one who engages in a fraudulent course of conduct that induces payment by the government."); *United States ex rel. Sikkenga v. Regence Bluecross Blueshield of Utah, 472 F.3d 702, 715 (10th Cir. 2006)* (finding direct FCA liability for those who took critical actions in furtherance of the fraud); *United States ex rel. Tran v. Computer Sciences Corp., 2014 U.S. Dist. LEXIS 90757, 2014 WL 2989948, at *14-15 (D.D.C. July 3, 2014)* (citing cases); *United States ex rel. Smith v. Yale Univ., 415 F. Supp. 2d 58, 90 (D. Conn. 2006)* (holding that a relator must allege "knowing assistance" or "cooperation" to survive a motion to dismiss); *United States ex rel. Schmidt v. Zimmer, Inc., 386 F.3d 235, 243 (3d Cir. 2004)* (applying the "knowingly assisted" standard as articulated in *Marcus*).

Because the "false claims" here are actually predicated on the underlying fraudulent inducement of the contracts, the Court looks to whether Relator alleged that each Defendant played a role in the causal chain leading up to the actual inducement, which they all did. Specifically, Dr. Trepashko was the driving force behind the scheme, providing insider information to Covidien and Sami about the bidding process (and allegedly received kickbacks in return); Covidien and Mr. Giba worked with Dr. Trepashko and Sami to prepare the fraudulent bids; and Sami submitted the bids (and the invoices derived from those bids). This is more than a simple conspiracy, as each Defendant played a specific role in forwarding the allegedly fraudulent bids, and their actions **[**37]** were substantial factors in causing Sami's submission of the false bid and the subsequent false claims.

As to the latter theory, Defendants argue that Relator "fails to plead **[*921]** any facts whatsoever supporting an actionable conspiracy." [97, at 23.] This is a bold (and inaccurate) bit of hyperbole. ***HN15***[] The FCA confers

[14] There is a question as to whether Relator's claims related to the 2008 and 2010 CCHHS contracts apply to Defendant Triad Isotopes. In his Amended Complaint, Relator alleges in Counts I and II that *all* Defendants violated the FCA and the IWRPA with regards to the 2008 and 2010 CCHHS contracts. However, **[**35]** Relator also alleges that CCHHS awarded the later of the two contracts (*i.e.*, the 2010 contract) to Sami on February 19, 2010, which was four months before Defendant Triad Isotopes completed its acquisition of Covidien's radiopharmacy business. [Am. Compl., 88, ¶¶ 17, 48.] Relator does not allege that Triad Isotopes participated in any of the allegedly fraudulent bidding practices related to these contracts, or that Triad Isotopes assumed any preexisting liabilities of Covidien. In responding to Triad Isotopes' motion to dismiss, Relator agreed to dismiss Triad Isotopes from Counts I and II, but requested that the dismissal be without prejudice in the event that discovery reveals a basis for liability. The Court agrees and dismisses Defendant Triad Isotopes from Counts I and II without prejudice.

liability on those who "conspire to commit a violation" of the FCA. *31 U.S.C. § 3729(C)*; see also *31 U.S.C. § 3729(a)(3) (pre-2009)* (conferring liability on those who "conspire[] to defraud the Government by getting a false or fraudulent claim allowed or paid"). Arguably this is a lower threshold that the direct-liability showing just discussed, pursuant to which Relator had to plead that each Defendant "knowingly assisted" in the furtherance of the fraudulent scheme. But***HN16***[] unique to a conspiracy claim, Relator must establish that the conspirators "agreed that the false record or statement would have a material effect on the Government's decision to pay the false or fraudulent claim." *Allison Engine Co., Inc. v. United States ex rel. Sanders, 553 U.S. 662, 673, 128 S. Ct. 2123, 170 L. Ed. 2d 1030 (2008)*. The Court has covered this point already, noting that the thrust of the scheme was to construct a collection of knowing misrepresentations with the sole purpose of procuring the CCHHS radiopharmaceutical contracts. Relator alleged that each misrepresentation **[**38]** was material, and this allegation makes sense, for why else would the parties include the misrepresentations in the bid but-for their impact on winning the bid? Whether any of these allegations is true remains to be seen, but Relator has more than adequately pled a conspiracy among these Defendants.

These allegations are also sufficiently particular so as to satisfy the requirements of *Rule 9(b)*. See *Borsellino v. Goldman Sachs Grp., Inc., 477 F.3d 502, 507 (7th Cir. 2007)* (noting that ***HN17***[] claims premised on a course of fraudulent conduct are subject to *Rule 9(b)*'s particularity requirement). Unlike the relator in *Goldberg v. Rush University Medical Center*, Relator here provided more than conclusory allegations of conspiracy, going beyond just the "who" and the "what" by referencing actual instances where the alleged co-conspirators met to devise their scheme (*e.g.*, at Faisel Sami's home, and at a nearby restaurant [Am. Compl. 88, ¶¶ 29-30]). *Goldberg, 929 F. Supp. 2d at 825*. Perhaps most importantly, Relator alleges in detail the "how" of the story, describing the various misrepresentations that the conspirators ginned up to put Sami in the pole position for securing the contracts. Cognizant of the "great harm to the reputation of a business" that a fraud lawsuit can bring, see *Borsellino v. Goldman Sachs Grp., Inc., 477 F.3d 502, 507 (7th Cir. 2007)* (citation omitted), the Court **[**39]** nonetheless finds that Relator has engaged in sufficient pre-complaint investigation so as to present a particularized and plausible complaint adequate to allow Relator to proceed beyond the motion-to-dismiss stage.

2. The 2011 Contract

The Court addresses Relator's FCA and IWRPA claims regarding the 2011 CCHHS contract (*i.e.*, Counts III and IV in the amended complaint) separately based on several factual distinctions that distinguish the 2011 contract from the 2008 and 2010 contracts. First, because Triad Isotopes had acquired Covidien's radiopharmaceutical business by that time, Relator dropped Covidien from Counts III and IV and replaced it with Triad Isotopes. In addition, CCHHS implemented a new electronic bidding process for the 2011 contract, requiring Defendants to tweak their tactics in order to continue their conspiracy (including dropping Sami as part of the conspiracy), and consequently Relator dropped Sami from Counts III and IV. More specifically, Relator alleges that Dr. Trepashko and Mr. Giba (a Triad Isotopes employee post-acquisition) rigged **[*922]** the bid form for the 2011 contract so that it included high quantities of expensive drugs that CCHHS was unlikely to use. To complete **[**40]** the ruse, Triad Isotopes submitted impossibly low bids for these expensive drugs (while submitting artificially high prices on the more common drugs), giving Triad Isotopes the lowest overall bid and thus allowing it to win the contract. Relator alleges that absent this fraudulent scheme, Hot Shots would have been the low bidder and thus would have won the 2011 CCHHS contract and saved CCHHS at least $300,000.

While the facts surrounding the 2011 contract differ from the 2008 and 2010 schemes, the legal principles governing the associated FCA and IWRPA claims are the same. Relator again pursues liability under a fraudulent-inducement theory, arguing that because the 2011 contract was fraudulently induced (through the presentation of artificially low numbers pursuant to the vertical bid-rigging scheme between Dr. Trepashko, Mr. Giba, and Triad Isotopes), all subsequent invoices submitted from Triad Isotopes to CCHHS were tainted with that fraud and therefore qualify as false statements made to the government for payment. Relator's presentment argument is also the same, in that CCHHS continued to receive federal funding from Medicare and Medicaid and state funding from Cook County. As **[**41]** such, any duplicate arguments that Triad Isotopes makes regarding these issues fail for the same reasons that Defendants' arguments failed relating to the 2008 and 2010 contracts.

Triad Isotopes does advance two unique theories for dismissal of Counts III and IV, neither of which is persuasive. First, Triad Isotopes argues that Relator failed to provide examples of any allegedly false claims. [100, at 14.] But (a) based on a fraudulent-inducement theory, *all* invoices submitted pursuant to the underlying fraudulent contract are false claims, and (b) Relator need not provide this information anyway. See *Lusby, 570 F.3d at 854* (explaining that it is not "essential for a relator to produce the invoices (and accompanying representations) at the outset of the suit"). Second, Triad Isotopes argues that Relator failed to allege an actionable bid-rigging scheme that could give rise to liability under the FCA or IWRPA. But whether Defendants' conduct surrounding the 2011 contract is more accurately described as a government agency exercising its discretion or a conspiracy to defraud the government is a fact issue that is off-limits at this stage in the litigation. Relator *alleged* a plausible bid-rigging scheme (with **[**42]** particularity), and that is all that is required to defeat a motion to dismiss. See, *e.g., United States ex rel. McGee v. IBM Corp., 81 F. Supp. 3d 643, 2015 U.S. Dist. LEXIS 22972, 2015 WL 877458, at *12 (N.D. Ill. Feb. 26, 2015)* ("***HN18***[] [T]he Seventh Circuit has recognized bid-rigging as a basis for an FCA violation." (citing *United States v. Azzarelli Const. Co., 647 F.2d 757 (7th Cir. 1981)))*; *2015 U.S. Dist. LEXIS 22972, 2015 WL 877458 at *11* ("***HN19***[] Courts in this district have recognized false inducement as a basis for alleging an FCA violation." (citing *United States ex rel. Danielides v. Northrop Grumman Sys. Corp., 2014 U.S. Dist. LEXIS 150855, 2014 WL 5420271, at *5 (N.D. Ill. Oct. 23, 2014)))*.

Finally, Dr. Trepashko argues that (a) Relator failed to plead that Dr. Trepashko had any personal involvement in the submission of false claims to the government such that he should not be held directly liable for any FCA violations, and (b) Relator failed to plead that Dr. Trepashko played a role in any conspiracy to defraud the government.[15] [95, at 13-16.] Dr. Trepashko's arguments fail for **[*923]** the same reasons that Defendants' similar arguments failed regarding the 2008 and 2010 contracts. In short, as to the former argument, Relator alleged that Dr. Trepashko knowingly assisted his co-Defendants in inducing CCHHS into contracting with Triad Isotopes (*i.e.*, knowingly assisting Triad Isotopes in furthering the fraud via his doctoring of the bid form), and that is sufficient to state a claim under *31 U.S.C. § 3729(a)(1)(A)* or *(B)*. To the latter argument, Relator provided a detailed account of the conspiracy surrounding the **[**43]** 2011 CCHHS contract, stating who was involved and exactly how they devised to rig the bidding process, including names of individuals who can allegedly corroborate these allegations, and the material misrepresentations that they concocted to ensure that Triad Isotopes won the contract. [See Am. Compl., 88, ¶¶ 60-64.] Relator sufficiently stated a claim of conspiracy amongst Triad Isotopes, Mr. Giba, and Dr. Trepashko regarding the 2011 CCHHS contract.

B. Antitrust Claims

HN20[] The Sherman Act exists to protect consumers from injury that results from anticompetitive behavior. See *Banks v. NCAA, 977 F.2d 1081, 1087 (7th Cir. 1992)*. The successful pleading of a claim under *§ 1* of the Sherman Act "requires proof of three elements: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury." *Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*.

Regarding the second element,***HN21***[] where, as here, the alleged anticompetitive conduct does not amount to a *per se* violation of the Sherman Act, courts assess the defendants' conduct under the Rule of Reason analysis,[16] under which "the factfinder weighs all of the circumstances of a case in deciding whether **[**44]** a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Leegin, 551 U.S. at 885*; see also *FTC v. In. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("'[The] test of legality [under the Rule of Reason] is whether the restraint imposed is such as merely regulates and perhaps

[15] Triad Isotopes and Mr. Giba do not object to Relator's conspiracy allegations.

[16] Defendants allege that the vertical bid-rigging allegation here should be analyzed under the Rule of Reason, which Plaintiff Hot Shots does not dispute. The Court agrees with Defendants. See *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 881, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* ("***HN22***[] [V]ertical price restraints are to be judged by the rule of reason.").

thereby promotes competition or whether it is such as may suppress or even destroy competition.'" (quoting *Chi. Bd. of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918))*). The Rule of Reason "requires not only that the plaintiff allege and prove anticompetitive effects, but additionally, as with all antitrust claims, that the injury complained of be of a type that the antitrust laws were designed to guard against, and further that the antitrust violation be the direct cause of plaintiff's injury." *Havoco of Am., Ltd. v. Shell Oil Co., 626 F.2d 549, 556 (7th Cir. 1980)* (citations omitted). More specifically, a plaintiff must show that the defendants' conduct had an anticompetitive effect in a relevant market, and that the defendants have market power in that market. *Menasha Corp. v. News Am. Mktg. In-Store, Inc., 354 F.3d 661, 663 (7th Cir. 2004)*; see also *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)* ("[T]he plaintiff must allege, not only an injury to himself, but an injury to the market as well."). Finally, a plaintiff must also establish "antitrust **[*924]** standing" to raise an antitrust claim (*i.e.*, whether a party injured by an antitrust violation may recover under the antitrust laws), which is an inquiry **[**45]** separate and apart from whether a plaintiff has Article III standing. See *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("*ACG*").

In Counts V and VI of the amended complaint, Plaintiff Hot Shots alleges that Defendants Triad Isotopes, Mr. Giba, and Dr. Trepashko conspired to rig the bidding process for the 2011 CCHHS radiopharmaceutical contract to ensure that CCHHS awarded the contract to Triad Isotopes (and thus not to Hot Shots, who was the second-lowest bidder for the contract), in violation of state and federal antitrust laws. Defendants moved to dismiss Hot Shots' claims, arguing that (1) Hot Shots failed to allege harm in a relevant market as required under the Rule of Reason, (2) Hot Shots failed to plead an antitrust injury to support antitrust standing, (3) vertical bid-rigging conspiracies are *per se* invalid where the plaintiff was not the low bidder, and (4) Hot Shots lacks antitrust standing. The Court reviews each argument in turn.

1. Injury in a Relevant Market and [**46] Triad Isotopes' Market Power

HN23[] "The first requirement in every suit based on the Rule of Reason is market power, without which the practice cannot cause those injuries (lower output and the associated welfare losses) that matter under the federal antitrust laws." *Menasha, 354 F.3d at 663*.[17] Because the antitrust laws do "not purport to afford remedies for all torts committed by or against persons engaged in interstate commerce," *Hunt v. Crumboch, 325 U.S. 821, 826, 65 S. Ct. 1545, 89 L. Ed. 1954 (1945)*, plaintiffs must allege that the anticompetitive conduct at issue actually impacted competition in a relevant market; "a loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market." *Havoco, 626 F.2d at 558*. "Otherwise the mere fact that one party bid successfully against another party for a contract would be equivalent to an anticompetitive effect and would raise the specter of an antitrust action being used as a remedy for any tortious conduct during the course of the competition." *Id.* A plaintiff must also show that the defendant has market power in the relevant market, which means that "it can raise prices above a competitive level without losing its business." See *42nd Parallel North v. E Street Denim Co., 286 F.3d 401, 404 (7th Cir. 2002)*.***HN24***[] The plaintiff bears the burden to define the relevant market and **[**47]** to establish the defendants' market power. *Spectrum Sports v. McQuillan, 506 U.S. 447, 455, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. If the plaintiff meets this burden, "the defendant can show that the restraint in question actually has a procompetitive effect on balance, while the plaintiff can dispute this claim or show that the restraint in question is not reasonably necessary to achieve the procompetitive objective." *Agnew, 683 F.3d at 335-36*.

The relevant market here, according to Hot Shots, is the Chicago-area marketplace for radiopharmaceuticals. Regarding **[*925]** the market impact of Defendants' allegedly anticompetitive behavior, Hot Shots argues that the lucrative 2011 CCHHS contract—covering $1.6 million in sales of radiopharmaceuticals—provided windfall profits to

[17] A relevant market is comprised of those "commodities reasonably interchangeable by consumers for the same purposes." *United States v. E.I. Du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. "In making this determination, the trier must decide whether the product is unique or has close substitutes, as to which there are substantial cross-elasticities of demand." *Fishman v. Estate of Wirtz, 807 F.2d 520, 531 (7th Cir. 1986)*.

a single provider in the Chicago-area market (Triad Isotopes) whilst simultaneously locking out other market participants (Hot Shots and Cardinal Health), thereby dampening the competitiveness of the radiopharmaceutical market throughout Chicagoland. **[**48]** [See Am. Compl. 88, ¶ 95 ("Pursuant to their unlawful conspiracy, Defendants have reduced competition among providers of radiopharmaceutical services in the Chicago-area market by preventing legitimate low-cost bidders such as Plaintiff from competing equally for the CCHHS radiopharmaceutical contract and thereby depriving them of the opportunity to win the contract.").]

The Court is not persuaded. Simply put, Hot Shots cannot escape the Seventh Circuit's holding that "***HN25***[] a loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market." *Havoco, 626 F.2d at 558*; see also *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1109 (7th Cir. 1984)* (noting that "it is the function of *§ 1* to compensate the unfortunate only when their demise is accompanied by a generalized injury to the market"). While Defendants' actions clearly had an anticompetitive effect, that effect extended only to a single (albeit substantial) contract. Hot Shots fails to explain how Defendants' actions with regards to the 2011 CCHHS contract impacted any other participants or any other contracts in the Chicagoland radiopharmaceutical market. Even under the generous *Rule 8(a)* notice-pleading standard, Hot Shots' complaint cannot be construed to allege a deleterious **[**49]** impact on the market. Instead, Hot Shots clearly states that Defendants' anticompetitive conduct affected only one contract: "Defendants have reduced competition in the Chicago-area market by preventing legitimate low-cost bidders such as Plaintiff from competing equally *for the CCHHS radiopharmaceutical contract."* [Am. Compl. 88, ¶ 95 (emphasis added).] The Seventh Circuit affirmed the dismissal of an antitrust claim under similar circumstances in *Havoco*, noting that while the complaint "detail[ed] a scenario of unsavory and reprehensible business practices," the plaintiff nonetheless failed to state a claim for relief under the Sherman Act. *Havoco, 626 F.2d at 559*. Such is the case here. While the bid-rigging allegations here are distasteful, Plaintiff fails to plead enough facts to plausibly explain how Defendants' conduct impacted the relevant market, thus putting Hot Shots' claim beyond the bounds of the Sherman Act.[18]

2. Antitrust Injury

HN26[] The concept of "antitrust injury" has both a ubiquitous and amorphous presence in antitrust jurisprudence, and can be found (1) as a *prima facie* element of Sherman Act claims, (2) as a factor under the Rule of Reason analysis, and (3) as a factor in the determining whether a plaintiff has "antitrust standing." See, *e.g., Denny's Marina, 8 F.3d at 1220* (listing **[*926]** "antitrust injury" as a necessary element of a Sherman Act claim); *Atl. Richfield Co. v. USA Petro. Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (noting that a showing of "antitrust standing" is required in both *per se* and Rule of Reason cases); *Havoco, 626 F.2d at 556* (same in the Rule of Reason context); *AGC, 459 U.S. at 538* (listing antitrust injury as one of several nondispositive factors for assessing "antitrust standing"). But regardless of its contextual surroundings, the "antitrust injury" inquiry always remains relatively the same:

> [Plaintiffs] must prove more than injury causally linked to an illegal presence in the market. Plaintiffs must prove antitrust injury, which is to **[**51]** say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be 'the type of loss that the claimed violations * * * would be likely to cause.

Brunswick Corp., 429 U.S. at 489 (quoting *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969))*; see also *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391,*

---

[18] Hot Shots does not explicitly plead that Triad Isotopes has market power in the Chicago-area radiopharmaceutical market, but Hot Shots does allege that Triad Isotopes obtained the 2011 CCHHS contract despite not having the lowest "actual" bid, implying that Triad Isotopes can "raise prices above a **[**50]** competitive level without losing its business." See *42nd Parallel North, 286 F.3d at 404*. Because Hot Shots failed to establish that Defendants' conduct impacted a relevant market, the Court need not decide whether Plaintiff met its burden to show that Triad Isotopes had market power in the relevant market.

395 (7th Cir. 1993); Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 716 (7th Cir. 2006) ("[A plaintiff] must demonstrate that her 'claimed injuries are 'of the type the antitrust laws were intended to prevent' and 'reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation.''" (quoting Tri-Gen Inc. v. Int'l Union of Operating Eng'rs, Local 150, 433 F.3d 1024, 1031 (7th Cir. 2006))).

The Achilles' heel for most vertical bid-rigging conspiracies with regards to antitrust injury is the fact that the conspiracy actually *increases* competition such that plaintiffs' injuries are not of the type that the antitrust laws were meant to prevent. Such was the case in *James Cape & Sons*, where the defendants in a bid-rigging scheme had insider knowledge of their competitors' bids, allowing them to lower their bids to ensure victory, such that "their bid-rigging activities actually *increased*, rather than restricted, competition, albeit in **[**52]** an illegal manner." James Cape & Sons v. PCC Const., 453 F.3d 396, 399 (7th Cir. 2006). But Hot Shots doesn't have this problem. Instead, Hot Shots alleges that the conspirators rigged the RFP in such a way that Triad Isotopes was actually the highest bidder, even though on paper it appeared to be the lowest. Thus, the bid-rigging activities here genuinely did decrease competition (and increase prices to the consumer—here, CCHHS), meaning that Hot Shots' injury is related to CCHHS's injury, and those injuries are precisely the sort of injuries that the antitrust laws were meant to prevent. See, *e.g.,* Stamatakis Indus., Inc. v. King, 965 F.2d 469, 471 (7th Cir. 1992) (noting that to establish antitrust injury a plaintiff must show "that its loss comes from acts that reduce output *or raise prices to consumers*" (emphasis added)).

Somewhat relatedly, Defendants argue that Hot Shots failed to plead antitrust injury because its purported injury—*i.e.*, lost profits from its failure to secure the 2011 CCHHS contract—is not the type of injury that the antitrust laws were intended to prevent. See, *e.g.,* Brunswick, 429 U.S. at 488 ("The antitrust laws * * * were enacted for 'the protection of competition not competitors.'" (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))); Atl. Richfield Co., 495 U.S. at 342 ("The purpose of the **[*927]** antitrust injury requirement is * * * [to] ensure that the harm claimed by the plaintiff corresponds **[**53]** to the rationale for finding a violation of the antitrust laws in the first place * * *."); Ehredt Underground, Inc. v. Commonwealth Edison Co., 90 F.3d 238, 240 (7th Cir. 1996) ("Over and over, we stress that antitrust is designed to protect consumers from producers, not to protect producers from each other or to ensure that one firm gets more of the business."). To be sure, this argument is cut from the same cloth as Defendants' argument regarding Hot Shots' failure to allege an anticompetitive effect in a relevant market. But the Court is careful not to conflate these two inquiries. The real problem with Hot Shots' allegation is its lack of an anticompetitive impact *on a relevant market*, not its anticompetitive nature in general. The Court cannot overlook the fact that Defendants' alleged behavior did have an anticompetitive impact on at least one consumer. And were Hot Shots able to remedy its pleading deficiency as to the market impact of Defendants' anticompetitive conduct, its complaint would not fail due to a lack of antitrust injury.[19]

3. Vertical Bid-Rigging Conspiracies

---

[19] Also unpersuasive is Defendant Trepashko's argument that Hot Shots failed to plead the causation component of antitrust injury. See Greater Rockford Energy, 998 F.2d at 395 (noting that "[a]ntitrust injury involves a causation requirement"). Defendant's argument hinges on a literal **[**54]** interpretation of Hot Shots' allegation that it "had the lowest overall bid among the *legitimate* bidders," [Am. Compl., 88, at ¶ 69 (emphasis added)], and Defendant claims ignorance as to what Hot Shots means to imply with this "arbitrary, qualifying language." [95, at 10.] But read in context of the complaint as a whole, the clear inference is that Triad Isotopes is the "illegitimate" bidder, meaning that but-for Defendants' rigging of the RFP, Hot Shots would have been the lowest bidder, and thus would have won the 2011 contract. Defendant Triad Isotopes also argues that "Hot Shots does not allege any *facts* to show that its lost profits resulted from the alleged reduction in competition." [100, at 23-24.] This is not true. Hot Shots alleges that (1) Dr. Trepashko and Mr. Giba worked together to change the expected quantities for various drugs in the RFP to ensure that Triad Isotopes would have the lowest bid among all bidders (which included Hot Shots), and (2) if the drug usage amounts in the RFP reflected actual usage instead of the deliberately skewed usage, Hot Shots' bid—which was the second-lowest overall—would have been approximately $300,000 less than Triad Isotopes' bid. **[**55]** [Am. Compl., 88, at ¶¶ 64-69.] Hot Shots adequately pled causation.

Defendants argue that bid-rigging conspiracies are not actionable under the Sherman Act where the contract at issue is awarded to the lowest bidder. [See, *e.g.*, 100, at 20 (citing *Expert Masonry, Inc. v. Boone Cnty., Ky., 440 F.3d 336, 343-48 (6th Cir. 2006)*.] The Court disagrees with Defendants that there is a categorical ban on such cases. The legal principle motivating the court in *Expert Masonry*—the only case that Defendants cite in support of their argument—is that buyers are free to buy from whomever they choose, and courts are not fit to second-guess such business judgments. *Expert Masonry* realizes that "salesmen battle and strive to curry favor and close the deal," and "whether the parties exercise wise business judgment in any given transaction is not a concern of the antitrust laws." *Id. at 347*. And "[t]o allow any auction, bidding, or other competitive sales process to be challenged whenever one potential supplier is distraught because it did not win the sale would be to outlaw competition and salesmanship, for companies and their staffs could not reasonably be expected to compete to win sales, projects, and new clients if, in so doing, they risk treble damages **[**56]** and even imprisonment when even one rival is disappointed with the results." *Id. at 348-49*.

First of all, the decision in *Expert Masonry* is better understood as one involving **[*928]** a plaintiff's failure to identify anticompetitive behavior, and should not be read as a categorical ban on vertical bid-rigging schemes. Regardless, while there are hints of the *Expert Masonry* fact pattern present here (*i.e.*, a distraught seller in a single transaction), the two cases are really quite different. The issue here has nothing to do with CCHHS's freedom to contract with the seller of its choice; of course CCHHS has that freedom, and it would be beyond the Court's bailiwick to question CCHHS's business judgments in that regard. But here, the terms of the 2011 CCHHS radiopharmaceutical RFP eliminated much of CCHHS's discretion by stating that the low bidder would receive the contract. And Hot Shots alleges that (after accounting for the fraudulent usage numbers included in the RFP) *it*, and not Triad Isotopes, was the low bidder. This is anticompetitive behavior, for absent the conspiracy, competition increases. To be sure, the principles articulated in *Expert Masonry* are sounds ones, they just don't translate into **[**57]** the bright-line rule that Defendants' assert here. To put a categorical ban on Defendants' behavior would be contrary to the core mission of the antitrust laws, and for that reason, this argument fails.[20]

4. Antitrust Standing and Antitrust Injury

HN27[] Although the standing provision in *§ 4* of the Clayton Act is broad—permitting civil suits by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws," *15 U.S.C. § 15*—the Supreme Court has endorsed several limiting principles such that not every person, however tangentially injured by an antitrust violator, has standing **[**58]** to sue. See *Blue Shield of Va. v. McCready, 457 U.S. 465, 472-75, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*; *Hawaii v. Standard Oil Co., 405 U.S. 251, 263 n.3, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)* (observing that the lower federal courts were "virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation").

In *AGC*,***HN28***[] the Supreme Court incorporated traditional common-law tort principles into the evolving antitrust-standing inquiry, thereby adding "a proximate cause element into *§ 4* actions [such] that a plaintiff does not have standing to sue under *§ 4* if its injuries were indirect and speculative." *Greater Rockford Energy & Tech. Corp. v. Shell Oil co., 998 F.2d 391, 395 (7th Cir. 1993)*. The result was a six-factor test for examining the link between a plaintiff's harm and a defendant's wrongdoing that has become the predominant test for assessing antitrust standing, focusing on: (1) the causal connection between the violation and the harm; (2) the presence of improper motive; (3) the type of injury and whether it was one Congress sought to redress; (4) the directness of the injury; (5)

[20] In a swing-for-the-fences moment, Defendant Trepashko also argues, more fundamentally, that Hot Shots failed to plead direct allegations of a conspiracy. [See 95, at 3-4.] But in addition to its express allegations of conspiracy [Am. Compl. 88, ¶¶ 55, 70], Hot Shots pled a wealth of facts describing the agreement between Triad Isotopes, Mr. Giba, and Dr. Trepashko regarding the 2011 CCHHS contract [*Id.* ¶¶ 9, 60-65], which are consistent with Plaintiffs other allegations regarding the nefarious relationship between these Defendants. [*Id.* ¶¶ 18-19, 25-33.] Hot Shots sufficiently pled a conspiracy.

the speculative nature of the damages; and (6) the risk of duplicate recovery or complex damage apportionment. *Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 484 (7th Cir. 2002)* (citing *AGC, 459 U.S. at 537-45*).

[*929] a. Antitrust Injury

Defendants argue that Hot Shots lacks antitrust standing **[**59]** because it failed to state a cognizable "antitrust injury," *i.e.*, a type of injury that Congress sought to redress. Defendants' arguments here do not differ from their other arguments regarding antitrust injury, which the Court has already addressed. The Court need not repeat its analysis here.

b. Causation

Defendant Trepashko argues separately that Hot Shots did not plead that the alleged anticompetitive conduct at issue here (*i.e.*, bid rigging) was the "but for" cause of Hot Shots' injury, based on the "tenuous" assumption that Hot Shots would have won the 2011 bidding process but-for the alleged anticompetitive behavior. [See 95, at 12.] While Hot Shots' allegation may be tenuous, it is still sufficient. Indeed, Hot Shots expressly alleged but-for causation: "If the drug usage amounts in the RFP reflected actual usage instead of the deliberately skewed usage, Hot Shots' bid * * * which [was] the lowest overall bid among the legitimate bidders * * * would have been approximately $300,000 less than Triad's Bid," and thus Defendants' conspiracy "prevent[ed] Hot Shots * * * from winning the CCHHS contract." [Am. Compl., 88, at ¶¶ 69-70.] Hot Shots sufficiently pled causation.

c. Directness

Finally, Defendant **[**60]** Trepashko also argues that Hot Shots fails under the directness inquiry because it failed to plead that the alleged bid-rigging has in fact resulted in increased prices to radiopharmaceutical consumers. [See 95, at 12.] This is a misapplication of the directness inquiry, which is meant to assess the plaintiff's proximity to the harm in comparison to other (actual or potential) plaintiffs, as often contemplated in the direct-purchaser versus indirect-purchaser context. Defendant's argument is really just another way of saying that Hot Shots failed to allege an anticompetitive impact on a relevant market, which the Court has addressed with belt and suspenders at this point.

5. Application to Illinois State *Antitrust Law*

The Court's antitrust analysis thus far has been solely with regard to Hot Shots' federal antitrust claim (Count V), not Hot Shots' state antitrust claim under Illinois statute *740 ILCS 10/3* (Count VI). The question is whether the Court's analysis under federal law applies to the state-law claim at issue. The parties did not address this issue in their briefs.

HN29[] Illinois courts have adopted a common-law harmonization provision, meaning that they interpret their antitrust laws in harmony with **[**61]** federal-court decisions interpreting federal ***antitrust law***. See, *e.g., People v. Crawford Distrib. Co., 53 Ill. 2d 332, 291 N.E.2d 648, 652-53 (Ill. 1972)* (noting that federal antitrust precedent is a "useful guide to our court"); *People ex rel. Scott v. College Hills Corp., 91 Ill. 2d 138, 435 N.E.2d 463, 467, 61 Ill. Dec. 766 (Ill. 1982)* ("Federal precedent is both relevant and helpful in determining the adequacy of antitrust allegations."). While federal precedent is not binding on Illinois courts, the relevant statutes are very similar, and the Court has not identified any case law indicating that the Illinois Supreme Court would differ in any way from the analysis set forth herein.[21] See, *e.g.,* **[*930]** *Popp v. Cash Station, Inc., 244 Ill. App. 3d 87, 613 N.E.2d 1150,*

---

[21] In interpreting state statutes, the Court looks to decisions from the state's highest court for guidance. See *Erie R.R. Co. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*; *Jean v. Dugan, 20 F.3d 255, 260 (7th Cir. 1994)*. "In the

1158, 184 Ill. Dec. 558 (Ill. App. Ct. 1992) (citing federal ***antitrust law*** in defining "antitrust injury"); Intercontinental Parts, Inc. v. Caterpillar, Inc., 260 Ill. App. 3d 1085, 631 N.E.2d 1258, 1268, 197 Ill. Dec. 799 (Ill. Ct. App. 1994) (citing federal law in assessing the market-power requirement); see also Holzrichter v. Yorath, 2013 IL App (1st) 110287, 987 N.E.2d 1, 27-29, 369 Ill. Dec. 659 (Ill. Ct. App. 2013).

The only potential hiccup in this inquiry relates to the Court's antitrust-standing analysis under the *AGC* six-factor test. The problem is that *AGC* was derivative of an earlier **[**62]** antitrust-standing opinion (Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)) that multiple state legislatures—including the Illinois legislature—repealed (in what have come to be known as *Illinois Brick* repealer statutes). See 740 ILCS 10/7. The question, then, is whether Illinois' *Illinois Brick* repealer statute (which repealed one antitrust-standing opinion) would motivate Illinois courts to decline to follow *AGC* (a subsequent antitrust-standing opinion). While the Illinois Supreme Court has yet to decide the issue, the Illinois Appellate Court has cited *AGC* approvingly, see County of Cook v. Philip Morris, Inc., 353 Ill. App. 3d 55, 817 N.E.2d 1039, 1045, 288 Ill. Dec. 389 (Ill. App. Ct. 2004), and the Seventh Circuit has stated affirmatively that federal antitrust standing rules apply under the Illinois Antitrust Act. O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1066 (7th Cir. 1997). Thus, the Court sees no reason why the Illinois Supreme Court would not follow *AGC*. However, because the Court rejected Defendants' antitrust-standing arguments, the issue is simply academic at this point.

Because the Court finds that the Illinois Supreme Court would interpret its antitrust statute consistent with this Court's interpretation of federal ***antitrust law***, Hot Shots' state-law antitrust claim fails for the same reasons that its federal antitrust claim fails. Thus, the Court must dismiss both Count V and Count VI of Plaintiffs' amended **[**63]** complaint.

C. Tortious Interference with Prospective Business Claim

In addition to its state and federal antitrust claims, Hot Shots also makes a tortious interference claim against the Trepashko-Giba-Triad Isotopes group of defendants regarding their role in the 2011 CCHHS radiopharmaceutical bid process. Specifically, Hot Shots argues that, through their purposeful manipulation of the RFP, Defendants intentionally interfered to prevent Hot Shots' legitimate expectancy of entering into a contractual relationship with CCHHS from ripening. [Am. Compl. 88, ¶¶ 107-111.]

HN30[] Under Illinois law, the elements of a claim for tortious interference with prospective business relations are "(1) plaintiff's reasonable expectancy of entering into a valid business relationship; (2) defendant's knowledge of that expectancy; (3) defendant's intentional and unjustifiable interference that induced or caused a breach or termination of the expectancy; and (4) damage to plaintiff resulting from defendant's conduct." F:A J Kikson v. Underwriters Labs., Inc., 492 F.3d 794, 800 (7th Cir. 2007) (citing Voyles v. Sandia Mortg. Corp., 196 Ill. 2d 288, 751 N.E.2d 1126, 1133-34, 256 Ill. Dec. 289 (Ill. 2001)); Botvinick v. Rush Univ. Med. Center, 574 F.3d 414, 417 (7th Cir. 2009).

[*931] Hot Shots stumbles out of the gate. Because this was a blind bid (*i.e.*, where all bidders submitted anonymous bids), all competitors theoretically had an equal expectancy of winning the **[**64]** contract. Hot Shots alleges that it was a "highly qualified bidder," but that allegation alone is insufficient to allow the Court to infer that Hot Shots expected to win the contract. And Hot Shots' allegation that it ultimately had the lowest "legitimate" bid is also unavailing, as this is an *ex post* observation that says nothing of Hot Shots' pre-bid expectations. Because this was a blind bidding process where the contract would go to the lowest bidder, Hot Shots has a tough row to hoe to establish an *ex ante* expectancy of winning—perhaps if Hot Shots had a long history of underbidding its competitors (which presupposes that Hot Shots knew who its competitors were pre-bid), or if Hot Shots had been the only bidder. Clearly Hot Shots had a reasonable expectancy of entering into *a fair bidding process*, but this is not the same as a reasonable expectancy of entering into *a business relationship*. And while Hot Shots was surely hopeful

---

absence of guiding decisions by the state's highest court, [federal courts] consult and follow the decisions of intermediate [state] appellate courts unless there is a convincing reason to predict [that] the state's highest court would disagree." ADT Sec. Servs., Inc. v. Lisle-Woodridge Fire Prot. Dist., 672 F.3d 492, 498 (7th Cir. 2012).

of winning the contract, it must show "more than a mere hope" to establish a tortious interference, and Hot Shots failed to plead any basis for its expectation of success. See, *e.g.,* *Quadro Enters., Inc. v. Avery Dennison Corp., 2000 U.S. Dist. LEXIS 11568, 2000 WL 1029176, at *10 (N.D. Ill. July 26, 2000)* ("***HN31***[] The fact that [plaintiff] was asked to bid implies that the contract **[**65]** was up for competitive bidding and thus it cannot be said that [plaintiff] had an expectancy of future business relations."). Even at the pleading stage, Hot Shots threadbare allegations are insufficient to state a claim, thus requiring dismissal. See *Del Monte Fresh Produce, N.A., Inc. v. Kinnavy, 2010 U.S. Dist. LEXIS 28687, 2010 WL 1172565, at *6 (N.D. Ill. Mar. 22, 2010)* ("*Twombly* does require that [plaintiff] set forth facts that make it plausible that she had a reasonable expectancy * * *."); *Huon v. Breaking Media, LLC, 75 F. Supp. 3d 747, 2014 U.S. Dist. LEXIS 168265, 2014 WL 6845866, at *16 (N.D. Ill. Dec. 4, 2014)* (same); *Myers v. Phillips Chevrolet, Inc., 2004 U.S. Dist. LEXIS 21635, 2004 WL 2403126, at *3-4 (N.D. Ill. Oct. 26, 2004)* (same); *Emery v. Ne. Ill. Reg'l Commuter R.R. Corp., 2003 U.S. Dist. LEXIS 16403, 2003 WL 22176077, at *10 (N.D. Ill. Sept. 18, 2003)* (same).

IV. Conclusion

For the foregoing reasons, Defendants' motions to dismiss [94, 96, 99, 102, 103] are denied as to Counts I-IV and granted as to Counts V—VII. Counts V—VII of the amended complaint are dismissed without prejudice. Relator and Plaintiff should inform the court within 14 days as to whether they intend to file a second amended complaint repleading Counts V—VII, at which time the Court will set a status hearing to discuss scheduling moving forward.

HN5[] Appeals, Standards of Review

For *Fed. R. Civ. P. 12* and summary judgment alike, a court of appeals views the facts and inferences in the light most favorable to the non-movant.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN6[] Racketeer Influenced & Corrupt Organizations, Claims

18 U.S.C.S. § 1962(c) and *(d)* of the Racketeer Influenced and Corrupt Organizations Act (RICO) prohibit, respectively, participation in a racketeering enterprise or conspiring to do the same. U.S. Court of Appeals for the Fifth Circuit precedent requires a RICO plaintiff to show a conclusive financial loss and not harm to mere expectancy or intangible interests.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN7[] **Racketeer Influenced & Corrupt Organizations, Claims**

The Racketeer Influenced and Corrupt Organizations Act's (RICO's) civil provision creates a cause of action for any person injured in his business or property by reason of a violation of any of the statute's prohibited activities. *18 U.S.C.S. § 1964*. The plaintiff's injury must be "conclusive" and cannot be "speculative." Injury to mere expectancy interests or to an intangible property interest is not sufficient to confer RICO standing.

Civil Procedure > ... > Justiciability > Standing > General Overview

Governments > Legislation > Statutory Remedies & Rights

HN8[] **Justiciability, Standing**

Although whether a legislative enactment authorizes a plaintiff to sue is sometimes referred to as "statutory standing," courts should avoid using that term. "Statutory standing" is a misleading label since the absence of a valid cause of action does not implicate subject-matter jurisdiction.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN9[] **Racketeer Influenced & Corrupt Organizations, Claims**

A Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, plaintiff need not demonstrate legal entitlement.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN10[] **Racketeer Influenced & Corrupt Organizations, Claims**

Although the vagueness of terms like "expectancy" may have created some confusion, the context of the U.S. Court of Appeals for the Fifth Circuit's Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, cases makes clear that the test for injury is a factual one. Damage to a plaintiff's subjective expectations cannot form the basis of a RICO claim.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN11[] **Racketeer Influenced & Corrupt Organizations, Claims**

Loss of a legal entitlement is sufficient but not invariably necessary to sustain a Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, claim. A plaintiff need not show that the other party would have been obliged to confer a benefit, only that the other party would have conferred the benefit.

Civil Procedure > Appeals > Standards of Review > General Overview

HN12[] **Appeals, Standards of Review**

Although a court of appeals may decide a case on any ground that was presented to the trial court, it is not required to do so.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN13[] **Racketeer Influenced & Corrupt Organizations, Claims**

Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, claims require showing that the unlawful behavior proximately caused the plaintiff's injuries.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Education Law > Civil Liability > General Overview

Civil Procedure > Remedies > Damages > Punitive Damages

Education Law > Immunities From Liability > School District Immunity

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

HN14[] **Racketeer Influenced & Corrupt Organizations, Claims**

School districts are not proper Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, defendants for two reasons. First, RICO requires demonstrating an underlying criminal act, which entails a mens rea requirement that a governmental entity cannot form. Second, municipal entities enjoy common law immunity from punitive damages, and, whatever else it is, RICO's treble-damages provision is at least partially punitive.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

Civil Procedure > Remedies > Damages > Punitive Damages

Governments > Local Governments > Claims By & Against

HN15[] **Racketeer Influenced & Corrupt Organizations, Remedies**

To overcome municipal immunity from punitive damages, Congress must clearly express its intention. No such clear intent to overcome governmental immunity appears in the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, provision for treble damages.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

Governments > Local Governments > Claims By & Against

HN16[] **Racketeer Influenced & Corrupt Organizations, Remedies**

The U.S. Supreme Court's characterization of Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, treble damages as "remedial" in PacifiCare Health Sys., Inc. v. Book cannot substitute for an express congressional abrogation of municipal immunity from treble damages, which, whatever the characterization, exceed actual provable damages. Nothing in PacifiCare contravenes the Court's earlier holdings that treble-damages provisions serve both compensatory and punitive functions. There is convincing authority that Congress authorized civil RICO's powerful treble damages provision to serve a punitive purpose. PacifiCare has no bearing on the liability of governmental entity defendants for treble damages under RICO.

Governments > Courts > Authority to Adjudicate

Governments > Legislation > General Overview

HN17[] **Courts, Authority to Adjudicate**

A court lacks power to revise federal statutes.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

HN18[] **Racketeer Influenced & Corrupt Organizations, Remedies**

The civil Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, requires that a successful plaintiff be awarded treble damages.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN19[] **Contract Interpretation, Good Faith & Fair Dealing**

Texas law rejects an implied duty of good faith except in the context of special relationships.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

HN20[] **Consideration, Promissory Estoppel**

Promissory estoppel may be asserted by a plaintiff as an affirmative ground for relief. To succeed on a promissory estoppel cause of action, a plaintiff must show: (1) a promise, (2) foreseeability of reliance thereon by the promisor, and (3) substantial reliance by the promisee to his detriment. This cause of action, however, presumes no contract exists. If a valid contract between the parties covers the alleged promise, the plaintiff cannot recover for the promise under promissory estoppel.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

HN21[] **Consideration, Promissory Estoppel**

It is the existence of a contract that makes promissory estoppel inappropriate, not the viability of any contract claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Estoppel

Contracts Law > ... > Estoppel > Equitable Estoppel > General Overview

HN22[] **Affirmative Defenses, Estoppel**

Quasi estoppel is not a freestanding cause of action but a procedural device or affirmative defense. Unlike equitable estoppel, quasi estoppel requires no showing of a false representation or detrimental reliance but describes certain legal bars, such as ratification, election, acquiescence or acceptance of benefits. This concept was developed to prevent a party from retaining a benefit by asserting a position to the disadvantage of another and then asserting a right which is inconsistent with that previous position.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Estoppel

HN23[] **Affirmative Defenses, Estoppel**

Quasi-estoppel requires (1) a previous action and (2) a subsequent inconsistent action which is thereby sought to be estopped.

Torts > ... > Liability > State Tort Claims Acts > Construction & Interpretation

Torts > ... > Liability > State Tort Claims Acts > General Overview

Torts > ... > Liability > State Tort Claims Acts > Employees

HN24[] **State Tort Claims Acts, Construction & Interpretation**

The Texas Tort Claims Act (TTCA) waives the state's immunity from suit in certain circumstances. The TTCA also covers all tort theories that may be alleged against a governmental entity whether or not it waives that immunity. Further, if a suit is filed under this chapter against both a governmental unit and any of its employees, the employees shall immediately be dismissed on the filing of a motion by the governmental unit. *Tex. Civ. Prac. & Rem. Code Ann. § 101.106(e)*. The state supreme court has interpreted this language to mean that if a plaintiff brings virtually any state common law tort claim against both a governmental unit and its employees, *§ 101.106(e)* will allow the employee defendants to be dismissed if the governmental unit so moves.

Torts > ... > Liability > State Tort Claims Acts > Employees

HN25[] **State Tort Claims Acts, Employees**

The Texas Tort Claims Act (TTCA) defines an employee as a person, including an officer or agent, who is in the paid service of a governmental unit by competent authority but excludes a person who performs tasks the details of which the governmental unit does not have the legal right to control. *Tex. Civ. Prac. & Rem. Code Ann. § 101.001(2)*.

Education Law > Administration & Operation > Elementary & Secondary School Boards > General Overview

Education Law > Immunities From Liability > Statutory Immunity

HN26[] Administration & Operation, Elementary & Secondary School Boards

Provisions of the Texas Education Code define a school board trustee as an employee, *Tex. Educ. Code Ann. § 22.051*, and grant immunity to "employees" for any act that is incident to or within the scope of the duties of the employee's position and that involves the exercise of judgment or discretion. *Tex. Educ. Code Ann. § 22.0511(a)*.The same Education Code provision limits personal liability for any act that is incident to or within the scope of the duties of the employee's position of employment and that involves the exercise of judgment or discretion on the part of the employee. *Tex. Educ. Code Ann. § 22.0511*.

Education Law > Administration & Operation > Elementary & Secondary School Boards > General Overview

HN27[] Administration & Operation, Elementary & Secondary School Boards

The Texas Education Code defines a "professional employee of a school district" to include a member of the board of trustees of an independent school district. *Tex. Educ. Code Ann. § 22.051(a)(5)*.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN28[] Intentional Interference, Elements

The Texas Supreme Court has defined the elements of tortious interference with prospective business relations. The common law cause requires that (1) there was a reasonable probability that the plaintiff would have entered into a business relationship with a third party; (2) the defendant either acted with a conscious desire to prevent the relationship from occurring or knew the interference was certain or substantially certain to occur as a result of the conduct; (3) the defendant's conduct was independently tortious or unlawful; (4) the interference proximately caused the plaintiff injury; and (5) the plaintiff suffered actual damage or loss as a result.

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN29[] Equal Protection, Nature & Scope of Protection

The *Equal Protection Clause* forbids state actors from treating similarly situated individuals differently for a discriminatory purpose and without a rational basis. "Discriminatory purpose" implies more than intent as volition or intent as awareness of consequences. An equal protection claim requires showing that the decisionmaker selected or reaffirmed a particular course of action at least in part "because of," not merely "in spite of," its adverse effects.

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN30[] Equal Protection, Nature & Scope of Protection

An equal protection claim depends on either identifying a class or showing that the aggrieved party is a "class of one." However, the class-of-one rationale does not apply to forms of state action which by their nature involve discretionary decision-making based on a vast array of subjective, individualized assessments. The discretionary-decision-making principle applies most clearly in the employment context, for employment decisions are quite often subjective and individualized, resting on a wide array of factors that are difficult to articulate and quantify. The government has wider constitutional latitude when it is acting as employer than as sovereign.

Opinion by: EDITH H. JONES

Opinion

[*404] EDITH H. JONES, Circuit Judge:

This case, involving multiple causes of action based on allegations of bribery to procure construction contracts, was filed against Houston Independent School District ("HISD" or "the District"), former trustee Lawrence Marshall and his consulting company, alleged coconspirator Joyce Moss Clay and her consulting company, and two of the plaintiff's competitors (RHJ-JOC and Fort Bend Mechanical), and their respective owners. The district court ably resolved most of these kaleidoscopic claims against Plaintiff-Appellants Gil Ramirez, Jr. and the Gil Ramirez Group, L.L.C. (collectively "GRG"), but we conclude GRG has met its summary judgment burden with respect to its RICO claims (against all defendants except HISD) and has sufficiently supported those elements of its claims for tortious interference with business relations that the district court ruled on. For those claims, we reverse and remand for further proceedings. This decision requires resolving two novel issues in this circuit—whether HISD is a proper **[**3]** RICO defendant (it is not), and whether Appellee Marshall, a former elected HISD trustee, may invoke state sovereign immunity principles against the state law claims (he cannot).

BACKGROUND[1]

Defendant Houston Independent School District is one of the largest school districts in the nation, serving over 200,000 students. A nine-member Board of Trustees governs the district; the administrative staff is led by the Superintendent. The District procures some construction and facilities services through a job-order contract ("JOC") program. Under this program, the District periodically solicits requests for proposals ("RFPs"), following which a committee of HISD administrators (the "selection committee") evaluates vendors' bids against predetermined criteria and selects as many qualifying vendors as current needs require. The single most important factor in the

[1] For purposes of reviewing the pretrial orders on appeal, the evidence is recited in the light most favorable to Appellants.

selection process is the vendor's pricing coefficient—a percentile that reflects the difference between the standard price set in a pricing manual and the price a contractor agrees to charge. Pricing coefficients **[**4]** are assigned for several categories of work and are combined to determine the vendor's weighted average. The selection committee forwards its recommendations to the Board of Trustees, which then votes on whether to offer JOC contracts to the suggested vendors.

HISD outsourced the assignment and management of JOC projects to several independent project managers, each of which covered specific facilities. The District would inform the relevant project manager of its need and the project manager would solicit cost estimates from the JOC vendors, evaluate the estimates, assign the jobs, and manage their progress.

Ramirez alleges that he and his company GRG were punished for refusing to participate in the corruption of municipal authorities. Defendant Lawrence Marshall, for many years an administrator at HISD until he was elected Trustee in 1997, masterminded questionable business arrangements in which he served as a paid **[*405]** consultant for several organizations that did business with the District. When the District explicitly prohibited that conduct, those companies hired Marshall's business associate Joyce Moss Clay (together with her company, "Clay"), whose company began paying Marshall a **[**5]** share of its consulting fees.

Ramirez and Marshall crossed paths during an RFP initiated in May 2008 (the "2008 RFP") to expand the HISD's contractor capacity and increase vendor diversity. GRG bid in this RFP along with ten other companies, including Defendants Fort Bend Mechanical ("FBM") and RHJ-JOC ("RHJ") (collectively, with their owners, the "vendor defendants"). The vendor defendants both hired Clay as a consultant, in RHJ's case "to provide moral support." RHJ paid Clay over $2,000 per month for several years, but neither RHJ nor Clay could explain what work Clay actually performed. FBM's owner Pete Medford avers that he wanted to make donations to specific schools and hired Clay to help him negotiate the rules and regulations governing those donations. Clay's explanation for forwarding Marshall 65% of her consulting fees is that he was her "mentor."

Once the initial bids were in, an employee in HISD's procurement department (who also served on the selection committee) advised several companies to reallocate their pricing coefficients. No bidding vendor was permitted to change its overall coefficient; such a change would have given that vendor an unfair advantage.[2] On its first **[**6]** cut, the selection committee recommended approving the two companies with the lowest overall price: RHJ and Kellogg Brown & Root Services, Inc. ("KBR"). GRG ranked ninth and the selection committee summarily eliminated it along with several other companies. Senior HISD administrators reviewed the proposal and, based on an internal policy, disqualified RHJ because of a then-pending lawsuit between the vendor and another school district.

Left with only one proposed vendor, HISD Superintendent Dr. Abelardo Saavedra and Chief Business Operations Officer Richard Lindsay unilaterally added four vendors to the list that went before the Board of Trustees: FBM for its HVAC expertise, and the other three, including GRG, to increase JOC "diversity." The Board approved this slate of five vendors, only one of which (KBR) had the approval of the selection committee. It is noteworthy that the selection committee passed over GRG, and HISD administrators added the company solely for diversity reasons.[3] Shortly after learning that it was not among HISD's selected **[**7]** JOC group, RHJ fired Clay.

GRG and the other contractors executed one-year contracts, renewable at HISD's sole discretion, thus constituting the 2009 JOC program. When the District began assigning projects the following summer, GRG received more project funds than any other vendor. GRG maintains that it was a JOC vendor *par excellence*, completing jobs properly, ahead of schedule, and under budget. Appellees dispute this. The District reports that it "experienced a

---

[2] GRG alleges that even this communication was improper; the District maintains that reapportioning coefficients could not improve a vendor's score.

[3] Lindsay testified that the District's goals in the 2008 RFP were, among others, "to diversify the available skillsets of JOC vendors" and "to increase the number of minority-owned businesses within the JOC program." Lindsay recommended adding FBM for the former kind of diversity and the other three companies for the latter.

number of performance issues with GRG **[*406]** . . . including false starts on construction projects, failure to obtain proper bonding and insurance, and failure to timely submit documents required under" the JOC program.

Marshall became president of the Board of Trustees in January 2009. The next month, Superintendent Saavedra announced his resignation, effective at the end of August of that year. In August, Saavedra **[**8]** recommended that the Board reconsider RHJ because its lawsuit with the other school district was over. The Board agreed and added RHJ to the approved JOC list. Saavedra testified that he was "very hesitant" to recommend RHJ for approval and that Marshall was putting "tremendous pressure" on other senior administrators.[4] He also testified that he had lost Marshall's support by disqualifying RHJ earlier in the process.

According to GRG, **[**9]** the trouble began after August 2009. Once RHJ was in the mix, GRG saw a sharp decline in the volume of JOC work it received, though it continued to receive assignments until its contract expired. Ramirez testified that Ricardo Aguirre, a janitorial services consultant and mutual associate of Marshall and Ramirez's father, visited Ramirez's office. Aguirre told Ramirez that GRG would need to hire Clay as Marshall's "bag lady" in order to protect its JOC business.[5] GRG suggests that Ramirez's expression of disapproval to Aguirre was the triggering event for the decrease in GRG's JOC assignments.

In the February before the election, FBM paid for Marshall to attend the Super Bowl in Tampa, Florida. Medford admitted on tape that he had given Marshall approximately $150,000 since 2008. When Marshall faced a reelection contest in autumn 2009, the owners of RHJ and FBM donated to Marshall's campaign, in amounts totaling over $50,000. GRG did not contribute to Marshall's reelection campaign or otherwise support him, but there is no indication that Marshall or anyone **[**10]** else asked GRG or Ramirez to do so.

Also in August 2009, a District internal auditor noticed the non-recommended vendors on the Board of Trustees meeting agenda. He investigated the 2008 procurement process, concluding that HISD administrators failed to follow proper procedure and that the final JOC configuration did not provide the best value for the District. His report recommended voiding the contracts for noncompliance with state law. GRG attacks this report as a "smokescreen to enable Marshall and allied board members to steer more of the JOC work to his favored contractors." GRG asserts that an independent agency gave HISD's auditors low marks in a general review, and that the audit did not result in changes to future RFPs.[6]

[*407] In January 2010, based on the auditor's report, the District's Inspector General brought the 2008 noncompliance to the Board's attention and intimated that the conduct might be criminal. Presumably because the initial contract terms for the 2008 JOC vendors were at an end, the business administrator recommended rebidding **[**11]** the entire JOC program. Just a few days before the meeting at which the Board was scheduled to vote on renewal of the JOC contracts, the new Superintendent Terry Grier removed the matter from the agenda. Superintendent Grier later called for Lindsay's resignation when Lindsay was unable to explain his conduct in the 2008 RFP. Because the Board did not renew any contracts, most of the 2008 JOC contracts expired by February 2010; RHJ's contract remained in force until October 1, 2010, since it started much later than the others. All vendors had to bid in the 2010 RFP if they wanted to continue to be part of the JOC program.

---

[4] GRG also argues that there is evidence suggesting that RHJ was supposed to supplant GRG. The only evidence to which it directs us is the former procurement manager's obscure reference to "substitut[ing] a supplier," but the context suggests he is referring to the improprieties with the 2008 vendor recommendations, not RHJ's later addition. GRG also identifies an email from an internal auditor referring to GRG's JOC proposal and admonishing "the replacement JOC contractor to do their own scope and proposal." The evidence also shows, however, that the program manager that handled GRG's contract testified that he never heard anyone refer to RHJ as a replacement contractor. The agenda item by which the Board approved the addition says it is "to supplement" the JOC program.

[5] When asked whether he was involved in bribery schemes involving Marshall, Aguirre invoked his *Fifth Amendment* right against self-incrimination.

[6] GRG identifies no specific defects within the report, the purpose of which was to urge conformity to established procedures, not to change them.

The 2010 RFP selection process evaluated vendors' bids according to a pre-established set of criteria that, as in the 2008 RFP, was mostly a function of price. This time, the selection committee recommended KBR, RHJ, FBM, and Jamail & Smith, the last of which had been a JOC participant since before the 2008 expansion RFP. RHJ rehired Clay two days after its selection. The committee did not recommend GRG, which ranked tenth out of thirteen bidders because as in the previous RFP, its work was not competitively priced. The Board approved the selection committee's slate **[**12]** of vendors. GRG alleges, not without dispute by the Appellees, that the ranking system and selection process were pretextual.

Ramirez and GRG sued in December 2010, alleging that their refusal to bribe Marshall harmed their business, both in the reduction in assignments under the 2008 JOC and in GRG's nonselection under the 2010 RFP. GRG brought an array of federal and state law claims against the various defendants. Against HISD, plaintiffs alleged 1) violations of the Racketeer Influenced Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1961 et seq.*; 2) infringement of their *First* and *Fourteenth Amendment* rights (through *42 U.S.C. § 1983*); and 3) state law claims for breach of contract, estoppel, and civil conspiracy. Against Marshall and Clay (and their respective consulting companies), GRG alleged the same RICO violations, in addition to tortious interference with prospective contract, tortious interference with existing contract, and civil conspiracy (but not the estoppel or breach of contract claims). The vendor defendants were also named in the RICO and tortious interference claims. Extensive discovery was conducted.

The District, Marshall, and Clay moved for summary judgment on all claims. The District also moved to dismiss the RICO and state **[**13]** law tort claims under *Fed. Rules of Civ. Pro. 12(b)(6)* and *12(c)*. The district court granted these motions in its Memorandum and Order of November 18, 2013. The district court first dismissed the state law claims against Marshall as barred by the election of remedies provision of the Texas Tort Claims Act, *Tex. Civ. Prac. & Rem. Code § 101.106*. It then held that GRG was not a proper RICO plaintiff; that GRG could not make out any constitutional violations, even if it could overcome various immunity obstacles; and that HISD and Clay were entitled to summary judgment or dismissal on the state law claims. The district court dismissed the civil conspiracy charges because it had resolved the underlying tort **[*408]** claims, leaving no illegal conduct for a conspiracy. After additional briefing, the district court granted summary judgment for the vendor defendants. Final judgment was entered on December 13, 2013. GRG timely appealed.

STANDARDS OF REVIEW

The district court dismissed the state law claims against Marshall under *Fed. R. Civ. Pro. 12(b)(6)* and *12(c)*. ***HN1***[] We review both types of motion de novo. *Jebaco, Inc. v. Harrah's Operating Co., Inc., 587 F.3d 314, 318 (5th Cir. 2009)*. ***HN2***[] "To survive a *Rule 12(b)(6)* motion to dismiss, the plaintiff must plead enough facts 'to state a claim to relief that is plausible on its face.'" *Bustos v. Martini Club Inc., 599 F.3d 458, 461 (5th Cir. 2010)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009))*.

The district court disposed of the other claims on summary **[**14]** judgment. ***HN3***[] "This court reviews the district court's grant of summary judgment de novo, applying the same standards as the district court." *Depree v. Saunders, 588 F.3d 282, 286 (5th Cir. 2009)*. ***HN4***[] "Summary judgment is proper when no issue of material fact exists and the moving party is entitled to judgment as a matter of law." *Cronn v. Buffington, 150 F.3d 538, 541 (5th Cir. 1998)*. "The standard of review is not merely whether there is a sufficient factual dispute to permit the case to go forward, but whether a rational trier of fact could find for the non-moving party based upon the record evidence before the court." *James ex rel. James v. Sadler, 909 F.2d 834, 837 (5th Cir. 1990)* (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 1356, 89 L. Ed. 2d 538 (1986))*.

HN5[] For *Rule 12* and summary judgment alike, we view the facts and inferences in the light most favorable to the non-movant. *Cronn, 150 F.3d at 541*; *Jebaco, 587 F.3d at 318*.

DISCUSSION

In this appeal, Appellants challenge the district court's adverse judgment on all but one of their claims.[7] We address each cause of action in turn.

I. Racketeer Influenced and Corrupt Organizations Act

GRG sued all defendants under **HN6**[] §§ 1962(c) and (d) of RICO, which prohibit, respectively, participation in a racketeering enterprise or conspiring to do the same. In the district court, HISD objected that it was not a proper RICO defendant because as a municipal **[**15]** corporation it cannot form the *mens rea* of any of RICO's predicate offenses and is not susceptible to RICO's treble damages, which the District characterizes as "punitive." Several other arguments were raised by HISD and other defendants, but the court found instead that GRG failed to assert or prove a cognizable RICO claim. We disagree in part. Our precedent requires a RICO plaintiff to show a "conclusive financial loss" and not harm to "mere expectancy" or "intangible" interests. *Price v. Pinnacle Brands, Inc., 138 F.3d 602, 607 (5th Cir. 1998)* (per curiam). GRG has created a genuine issue of material fact on this issue. Appellants may not, however, sue HISD for RICO violations, because the District is immune from treble damages.

A. Ramirez and GRG as Plaintiffs

1. The Standard

HN7[] RICO's civil provision creates a cause of action for "any person injured in his business **[*409]** or property by reason of a violation" of any of the statute's prohibited activities. *18 U.S.C. § 1964*. At issue here is the injury requirement. The plaintiff's injury must be "conclusive" and cannot be "speculative." *In re Taxable Mun. Bond Sec. Litig., 51 F3d 518, 523 (5th Cir. 1995)*. "Injury to mere expectancy interests or to an 'intangible property interest' is not sufficient to confer RICO standing." *Pinnacle Brands, 138 F.3d at 607* (quoting *In re Taxable Mun. Bond Sec. Litig., 51 F.3d at 523*).[8] The district court held that GRG's alleged injuries **[**16]** were uncertain and intangible because JOC job assignments and contract renewal were at the sole discretion of HISD. "Thus," the district court concluded, "any injury can only be the loss of an expectation interest and therefore speculative[.]"

Appellants contend that they were not required to demonstrate legal entitlement to JOC assignments or job orders, but only the *fact* of loss. That is, although HISD *could* stop assigning GRG jobs and end the business relationships, it *would* not have done so but for the alleged corruption. The district court appears to have interpreted GRG as showing only that HISD *might* have continued favoring GRG.

GRG is correct that **HN9**[] a RICO plaintiff need not demonstrate legal entitlement, a point the Supreme Court made clear in *Bridge v. Phoenix Bond & Indemnity Co., 553 U.S. 639, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*. The plaintiffs in Bridge were "regular participants **[**17]** in Cook County's tax sales[,]" in which bids often ended in a tie. *Id. at 643, 128 S. Ct. at 2135*. The county would then allocate the auctioned property on a rotational basis. *Id. at 642, 128 S. Ct. at 2135*. In order to make this process fair, each bidder was permitted only one simultaneous bid. *Id. at 643, 128 S. Ct. at 2135*. The plaintiffs alleged that a competing corporate bidder had arranged for false-flag bidders to channel additional allocations. *Id.* The *Bridge* plaintiffs had no legal entitlement to the subject matter of the auction. Nevertheless, the Supreme Court held that "[a]s a result of petitioners' fraud, respondents lost valuable

---

[7] GRG has not briefed and has therefore waived its claim for tortious interference with an existing contract.

[8] Following *Pinnacle Brands, 138 F.3d at 606*, the district court referred to this as "RICO Act standing." **HN8**[] Although whether a legislative enactment authorizes a plaintiff to sue is sometimes referred to as "statutory standing," courts should avoid using that term. *See* *Lexmark Int'l, Inc. v. Static Control Components, Inc., 134 S. Ct. 1377, 1387-88, 188 L. Ed. 2d 392 & n.4 (2014)* ("statutory standing" is a misleading label "since 'the absence of a valid . . . cause of action does not implicate subject-matter jurisdiction'") (quoting *Verizon Md., Inc. v. Pub. Serv. Comm'n of Md., 535 U.S. 635, 642-43, 122 S. Ct. 1753, 1758, 152 L. Ed. 2d 871 (2002))*.

liens they otherwise would have been awarded." *Id. at 649, 128 S. Ct. at 2139*. Because the *fact* of loss was certain, the plaintiffs could state a RICO claim.

HN10[] Although the vagueness of terms like "expectancy" may have created some confusion, the context of our cases makes clear that the test is a factual one. In *Pinnacle Brands,* for instance, plaintiffs complained that the random inclusion of valuable "chase" cards in packs of baseball cards constituted "illegal gambling." *138 F.3d at 605*. This court held that the plaintiffs could not show injury under RICO because they suffered no harm to a property interest; the card packs they bought were exactly what they bargained for. *Id. at 607*. ***[**18]*** *Pinnacle Brands* thus stands for the unremarkable proposition that a RICO plaintiff must demonstrate harm. The court's rejection of "mere expectancy interests" appears to have been directed at the notion that the plaintiff was injured by not having any luck in drawing a chase card. *See id.* That is, damage to **[*410]** a plaintiff's subjective expectations cannot form the basis of a RICO claim.

Likewise, in *In re Taxable Municipal Bond Securities Litigation,* the plaintiff (for himself and others similarly situated) claimed that corruption in a state-authorized municipal bond program injured certain farmers and ranchers who might have applied for loans under that program. *51 F.3d at 521-22*. The loans under the program were loans of last resort, unavailable to those who could obtain other credit. *Id. at 522*. At least some of the farmers and ranchers had pursued and secured other loans with higher interest rates, which disqualified them for loans under the bond program. *Id.* The court held that the farmers and ranchers "have suffered no injury from not receiving what they were ineligible to receive." *Id. at 522*. The court further held that the plaintiff had not demonstrated detrimental reliance, and that a lost opportunity to obtain **[**19]** a loan was too speculative. *Id. at 522-523*. Importantly, the plaintiff "ha[d] not alleged lost profits" or "that [the farmers and ranchers] ha[d] ever lost money as a result of the RICO scheme." *Id. at 523*. GRG alleges both. *Accord* *Tel-Instrument Elecs. Corp. v. Teledyne Indus., Inc., No. 90-1549, 1991 U.S. App. LEXIS 12209, 1991 WL 87194 (4th Cir. May 28, 1991)*.[9]

The rule that emerges from these cases is that ***HN11***[] loss of a legal entitlement is sufficient but not invariably necessary to sustain a RICO claim. A plaintiff need not show that the other party *would have been obliged* to confer a benefit, only that the other party *would have conferred* the benefit. That HISD retained discretion to award fewer contracts, or no contracts at all, does not prohibit GRG from demonstrating that but for corruption, it would have continued to receive awards.

2. The Evidence

The standard now clarified, it remains to determine whether GRG has marshaled competent summary judgment **[**20]** evidence that its business was injured. The proof covers two periods of time, differentiated by GRG's status as a JOC contractor in 2009 and its subsequent failure to be chosen in the 2010 RFP process.

The district court acknowledged that evidence of factual loss might be sufficient, but found that GRG had not met this burden with respect to the contract renewal. GRG points to evidence that several Board members and a high-level administrator led Ramirez to believe that GRG's contract was on the verge of renewal. As the district court noted, "[t]hese assurances [] were made before it was revealed to the HISD Board's audit committee that the same highlevel administrator had bypassed the JOC contract procurement process unilaterally to award GRG with a contract in the first place." GRG challenges that audit of the 2008 RFP as improperly motivated, but does not undermine the fact that the initial RFP was tainted nor does it allege that re-bidding the program was the wrong course of action. GRG also faults the District's decision to select only four JOC vendors. Even viewed in the light most favorable to GRG, however, none of this evidence shows that GRG would have been chosen in the 2010 RFP **[**21]** but for corruption. Indeed, GRG's tenth-place ranking was so low that even if HISD had selected seven

---

[9] Marshall cites this case for the proposition that "the denial of a government contract that plaintiff expected to receive, but for a competitor's alleged bribery of public officials, did not give rise to a cognizable RICO injury." What he fails to mention in his brief is that our sister court explicitly found that the plaintiff "would not have been awarded the [government] contract regardless." *1991 U.S. App. LEXIS 12209, [WL] at *2*.

[*411] vendors and eliminated the vendor defendants, GRG still would not have been selected.[10] In short, GRG has not adduced sufficient evidence to overcome summary judgment as to its nonselection in the 2010 RFP.

The sudden decline in JOC assignments in 2009, however, is another matter. The District assigned GRG more work than any other contractor in the initial honeymoon period of the 2009 JOC program, and GRG won 42 of the 64 projects it "bid on" in 2009. The confluence of events in August 2009—Superintendent Saavedra's testimony that his resignation was driven by his dispute with Marshall, RHJ's latter-day and questionable addition to the JOC program, the drop-off in assignments to GRG—would **[**22]** allow a jury to infer that undue influence on and by Marshall harmed GRG's business.

Appellees offer plausible explanations why GRG's assignments dropped off, but none of these positively displaces the possible inference of corrupt influence. For example, vendors not alleged to have bribed Marshall continued to receive work after RHJ entered the picture. But GRG has produced evidence suggesting that Marshall's preferred vendor RHJ was displacing GRG after Ramirez spurned Marshall. Further, Appellees' expert noted that if GRG had continued to receive work at the same rate as it did the first two months, it would have been awarded over 100% of all JOC expenditures. But the drop off in total JOC volume may itself have been part of the alleged scheme. These are matters for the factfinder. We hold only that the evidence creates a fact issue as to the cause of the loss of GRG's JOC assignments.

Appellees urge many other grounds for affirming summary judgment on the RICO claims. ***HN12***[] "Although this court may decide a case on any ground that was presented to the trial court, we are not required to do so." *Breaux v. Dilsaver, 254 F.3d 533, 538 (5th Cir. 2001)*. Because the issues require consideration of a voluminous record, "we decline to decide these **[**23]** complex issues as they are better addressed by the district court in the first instance." *Lone Star Nat'l Bank, N.A. v. Heartland Payment Sys., Inc., 729 F.3d 421, 427 (5th Cir. 2013)*.[11]

B. HISD as a Defendant

HISD contends that ***HN14***[] school districts are not proper RICO defendants for **[*412]** two reasons. First, RICO requires demonstrating an underlying **[**24]** criminal act, which entails a *mens rea* requirement that a governmental entity cannot form. *Lancaster Cmty. Hosp. v. Antelope Valley Hosp. Dist., 940 F.2d 397, 404 (9th Cir. 1991)*; *see also* *Pedrina v. Chun, 97 F.3d 1296, 1300 (9th Cir. 1996)* (reaffirming *Lancaster*).[12] Second, municipal

---

[10] After oral argument, Appellants called to our attention an internal audit HISD released on March 10, 2015. While it may be true that "this report contradicts HISD's position in this case that their re-bid of JOC contracts cleaned up the demonstrated favoritism shown in 2008," GRG still does not challenge the facts that the 2010 re-bid was an appropriate response, or that GRG would not have been selected.

[11] By noting two particular issues that will be pertinent on remand, we do not presume to eliminate others raised by the Appellees. First, ***HN13***[] RICO claims require showing that the unlawful behavior proximately caused the plaintiff's injuries. *Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 1317, 117 L. Ed. 2d 532 (1992)*. A threat to a finding of proximate cause here may lie in HISD's use of third-party project managers to administer its JOC assignments. The factfinder will have to determine whether GRG's injury "flows" from the RICO violations. ***Khurana v. Innovative Health Care Sys., Inc., 130 F.3d 143, 150 (5th Cir. 1997)***, *abrogated on other grounds by* *Beck v. Prupis, 529 U.S. 494, 120 S. Ct. 1608, 146 L. Ed. 2d 561 (2000)*. Second, the permissible scope and extent of damages is also a matter for the district court to determine on remand. GRG's expert estimates the company lost 18 jobs—JOC assignments GRG would have received but for Marshall's improper influence—totaling $177,307. Based on the same data, a defense expert calculated the range of damages between $16,776.76 and $145,032.96. The defendants also challenge the reliability and thus admissibility of GRG's expert report.

[12] Several district courts in this circuit have also recognized "strong authority that governmental entities, such as counties or government agencies, cannot be proper RICO defendants." *Dale v. Mo. Governor Jay Nixon's Office, No. CIV.A. C-11-114, 2011 U.S. Dist. LEXIS 50304, 2011 WL 1810321, at *3 (S.D. Tex. May 10, 2011)*; *see also* *Nationwide Pub. Ins. Adjusters Inc. v. Edcouch-Elsa I.S.D., 913 F. Supp. 2d 305, 308 (S.D. Tex. 2012)*; *Dammon v. Folse, 846 F. Supp. 36, 38 (E.D. La. 1994)*; *La. Power & Light Co. v. United Gas Pipe Line Co., 642 F. Supp. 781, 806 (E.D. La. 1986)*.

entities enjoy common law immunity from punitive damages, and, whatever else it is, RICO's treble-damages provision is at least partially punitive. Genty v. Resolution Trust Corp., 937 F.2d 899, 908 (3d Cir. 1991). These reasons have proven persuasive to other courts.[13] We agree with these holdings.

A particularly good reason for rejecting governmental RICO liability stems from judicial reluctance to impose punitive damages on the public fisc. The Supreme Court has held that a municipality's liability for § 1983 damages does not thereby subject it to punitive damages, from which government entities were historically immune. City of Newport v. Fact Concerts, Inc., 453 U.S. 247, 263, 101 S. Ct. 2748, 2758, 69 L. Ed. 2d 616 (1981). *City of Newport* emphasized that because a public entity itself "can have no malice independent of the malice of its officials," 453 U.S. at 267, 101 S. Ct. at 2760, punishment by punitive damages would be inequitably assessed against the public. Moreover, "the deterrence rationale of § 1983 does not justify making punitive damages available against municipalities." Id. at 268, 101 S. Ct. at 2760.[14]

City of Newport held that, ***HN15***[] to overcome municipal immunity from punitive damages, Congress must clearly express its intention. Id. at 263, 101 S. Ct. at 2749. No such clear intent to overcome governmental immunity appears in the RICO provision for treble damages.

GRG, however, fastens hope on the Supreme Court's ambiguity about treble damages, "which have a compensatory **[*413]** side, serving remedial purposes in addition to punitive objectives." Cook Cnty., Ill. v. U.S. ex rel. Chandler, 538 U.S. 119, 130, 123 S. Ct. 1239, 1246, 155 L. Ed. 2d 247 (2003). The Supreme Court locates "different statutory treble-damages provisions on different points along the spectrum between purely compensatory and strictly punitive awards." PacifiCare Health Sys., Inc. v. Book, 538 U.S. 401, 405, 123 S. Ct. 1531, 1535, 155 L. Ed. 2d 578 (2003). Treble damages provisions designedly go well beyond the amount of actual harm, but the Supreme Court has "repeatedly acknowledged that the treble-damages provision contained in RICO itself is remedial in nature." PacifiCare, 538 U.S. at 406, 123 S. Ct. at 1535.

The Court's ambivalence about punitive damages complicates analysis here, but we believe PacifiCare cannot salvage a claim against HISD. First, ***HN16***[] the Supreme Court's characterization of **[**27]** RICO treble damages as "remedial" in *PacifiCare* cannot substitute for an express Congressional abrogation of municipal immunity from treble damages, which, whatever the characterization, exceed actual provable damages. To hold otherwise would mock *City of Newport.* Second, nothing in *PacifiCare* contravenes the Court's earlier holdings that treble-damages provisions serve both compensatory and punitive functions. *See* Shearson/Am. Exp., Inc. v. McMahon, 482 U.S. 220, 240, 107 S. Ct. 2332, 2345, 96 L. Ed. 2d 185 (1987); *accord* Genty, 937 F. 2d at 910 ("there is convincing authority that Congress authorized civil RICO's powerful treble damages provision to serve a punitive purpose").[15] Third, the narrow question posed in *PacifiCare* was whether an arbitration agreement's ban on

---

[13] Either of these theories—the inability to form a *mens rea* or immunity from punitive damages—might suffice to remove HISD from RICO's ambit in this case. There are also sound policy reasons for this conclusion:

> [T]he . . . theories for refusing to hold a municipal entity liable under RICO are not mutually exclusive—indeed, it can be said that they are two sides of the same concept. In an abstract but doctrinal sense, a corporation in and of itself cannot form *mens rea.* Similarly, a corporation, that is, the institutional construct itself, cannot be deterred; deterrence **[**25]** can only be achieved by targeting the behavior of the people who determine corporate conduct. Thus, if punitive damages would not operate to encourage innocent and essentially powerless taxpayers to prevent RICO's condemned activity by municipal officials, short of the election process, it would seem inappropriate to hold the municipal corporation liable.

Dammon, 846 F. Supp. at 38.

[14] When the Supreme Court held that municipal entities were liable under federal ***antitrust law***, it "understandably [left] open the question whether municipalities may be liable for treble damages[.]" **[**26]** Cmty. Commc'ns Co. v. City of Boulder, Colo., 455 U.S. 40, 65, 102 S. Ct. 835, 848, 70 L. Ed. 2d 810 (1982) (Rehnquist, J., dissenting). Before there was occasion for the high court to resolve that question, Congress exempted governmental units from all monetary damages. Local Government Antitrust Act of 1984, Pub. L. No. 98-544, 98 Stat. 2750 (1984), *codified at* 15 U.S.C. §§ 34-36

punitive damages included RICO treble damages. The Court refused to interpret the private parties' agreement, holding that threshold duty for an arbitrator. *PacifiCare* has no bearing on the liability of governmental entity defendants for treble damages under RICO.

For these reasons, we conclude that GRG cannot proceed against HISD under RICO's mandatory **[**28]** treble damage provision. Because Congress wrote no single-damage alternative, and ***HN17***[] we lack power to revise federal statutes, Appellants fail to state a cognizable RICO claim against HISD. *See Cullen v. Margiotta, 811 F.2d 698, 713 (2d Cir. 1987)* (***HN18***[] "civil RICO requires that a successful plaintiff be awarded treble damages").

II. State Law Claims

A. Breach of Contract and Estoppel Theories

GRG appeals the district court's summary judgment rejecting its state law claims against HISD for breach of contract and estoppel. GRG's breach of contract argument relies on ***HN19***[] an implied duty of good faith, which, as the district court noted, Texas law rejects except in the context of special relationships. *See Hall v. Resolution Trust Corp., 958 F.2d 75, 79 (5th Cir. 1992)*; *see also City of Midland v. O'Bryant, 18 S.W.3d 209, 215 (Tex. 2000)*. The case that GRG cites to the contrary is inapposite, as the court relied expressly on the Texas Uniform Commercial Code, which imposes a duty of good faith in contracts for sales of goods, a condition plainly not met here. *See Mailing & **[*414]** Shipping Sys., Inc., v. Neopost USA, Inc., 937 F. Supp. 2d 879 (W.D. Tex. 2013)*. Indeed, *Neopost* admonished that there is no general duty of good faith in contracts in Texas. *Id. at 889*.

GRG also argues that "HISD breached its promise to GRG to permit GRG to *seek* JOC projects[.]" However, it cites neither a contractual provision nor other evidence of a promise. Consequently, GRG identifies no obligation **[**29]** that HISD failed to perform.[16]

GRG's promissory estoppel and quasi estoppel claims fare no better. The district court held that the promissory estoppel claim failed because the JOC contract covered the subjects of dispute, and that the quasi estoppel claim failed because GRG did not create a genuine, material fact issue on the elements of that claim. Both of these holdings are correct.

HN20[] Promissory estoppel "may be asserted by a plaintiff as an affirmative ground for relief." *Fertic v. Spencer, 247 S.W.3d 242, 250 (Tex. App. 2007)*. To succeed on a promissory estoppel cause of action, a plaintiff must show: "(1) a promise, (2) foreseeability of reliance thereon by the promisor, and (3) substantial reliance by the promisee to his detriment." *English v. Fischer, 660 S.W.2d 521, 524 (Tex. 1983)*. This cause of action, however, "presumes no contract exists[.]" *Subaru of Am., Inc. v. David McDavid Nissan, Inc., 84 S.W.3d 212, 226 (Tex. 2002)*. "If . . . a valid contract between the parties covers the alleged promise, the plaintiff cannot recover for the promise under promissory estoppel." *Fertic, 247 S.W.3d at 250*. GRG's JOC contract here covered both the terms for the assignment of JOC work and the parties' rights in renewal. By its terms, the contract **[**30]** did not oblige HISD to

---

[15] Albeit in non-precedential opinions, the Third Circuit has continued to apply *Genty* since *PacifiCare* was decided. *Tengood v. City of Philadelphia, 529 F. App'x 204, 209 n.4 (3d Cir. 2013)* (unpublished) (rejecting argument that *PacifiCare* abrogated *Genty*); *Heinemeyer v. Twp. of Scotch Plains, 198 F. App'x 254, 256 (3d Cir. 2006)*; *Kadonsky v. New Jersey, 188 F. App'x 81, 85 (3d Cir. 2006)*. *See also Cranberry Promenade, Inc. v. Cranberry Twp., No. CIV. A. 09-1242, 2010 U.S. Dist. LEXIS 15077, 2010 WL 653915, at *4 (W.D. Pa. Feb. 22, 2010)*.

[16] HISD urges several grounds to reject the contract claim other than those on which the district court relied. We need not and do not address these arguments.

assign JOC work, and the contract was renewable for successive years at HISD's sole discretion. Promissory estoppel is utterly displaced.[17]

HN22[] Quasi estoppel, on the other hand, is not a freestanding cause of action but a procedural device or affirmative defense. *See* Deutsche Bank Nat'l Trust Co. v. Stockdick Land Co., 367 S.W.3d 308, 311 (Tex. App. 2012). "Unlike equitable estoppel, quasi estoppel requires no showing of a false representation or detrimental reliance" but describes "certain legal bars, such as ratification, election, acquiescence or acceptance of benefits." Steubner Realty 19, Ltd. v. Cravens Rd. 88, Ltd., 817 S.W.2d 160, 164 (Tex. App. 1991) (citing 31 C.J.S. *Estoppel* § 107 (1964)). "This concept was developed to prevent a party from retaining a benefit by asserting a position to the disadvantage of another and then asserting a right which is inconsistent with that previous position." Stimpson v. Plano Indep. Sch. Dist., 743 S.W.2d 944, 946 (Tex. App. 1987, writ denied).

GRG cannot prevail on **[**31]** quasi-estoppel either. **HN23**[] Quasi-estoppel "requires (1) a previous action and (2) a subsequent inconsistent action which is thereby sought to be estopped." Mulvey v. Mobil Producing Tex. & N.M Inc., 147 S.W.3d 594, 607 (Tex. App. 2004). GRG argues that HISD should be "estopped to deny GRG's rights **[*415]** consistent with the parties' contractual relationships" and it accurately recites the elements of quasi-estoppel. GRG does not, however, identify HISD's prior inconsistent action or the alleged benefit that it received at GRG's expense. Its reply brief refers to "the promise relevant to the quasi-estoppel claim," but, as just discussed, quasi-estoppel needs no promise. The district court found that "HISD did not take inconsistent positions[;] it merely acted according to the JOC contract." Even if GRG's expectations were defeated by a bribery scheme, HISD's contract is not inconsistent with its actions regarding GRG.[18]

B. Tortious Interference with Prospective Business Relations

GRG brought tortious interference with prospective business relations claims against Marshall, Clay, and the vendor defendants and appeals the district court's rejection of those claims. We hold, contrary to the district court, that Marshall is not entitled to dismissal on state law grounds, nor is summary judgment appropriate for these defendants.

1. Election of Remedies for Claims Against Marshall

Marshall contends that he is immune from GRG's state law claims for tor tortious interference and conspiracy for two reasons. First, he argues that (a) the Texas Tort Claims Act ("TTCA") requires an election of remedies where a plaintiff has sued both a governmental entity and its employee **[**33]** and (b) that he is an "employee" of HISD

---

[17] GRG argues that the district court dismissed its estoppel claims "on the basis that GRG had a contract with HISD. But if the Court holds that no contract claim is stated, it should necessarily reinstate GRG's estoppel and quasi-estoppel claims." However, **HN21**[] it is the existence of a *contract* that makes estoppel inappropriate, not the viability of any contract *claim.* Further, GRG pressed only quasi-estoppel in its reply brief.

[18] In affirming these conclusions, we, like the district court, reserve judgment on whether public entities like HISD can be held liable at all under theories of estoppel. Texas law generally immunizes municipalities from estoppel for governmental (as opposed to proprietary) functions, but the decisions seem to be split over whether a school district ever exercises **[**32]** proprietary functions. *Compare* S.W. ex rel. A.W. v. Arlington Indep. Sch. Dist., 435 S.W.3d 414, 421 & n.10 (Tex. App. 2014), *with* Galveston Indep. Sch. Dist. v. Clear Lake Rehab. Hosp., L.L.C., 324 S.W.3d 802, 809 (Tex. App. 2010). And while Texas courts have contemplated exceptions in certain extreme cases, *see* Bowman v. Lumberton Indep. Sch. Dist., 801 S.W.2d 883, 888 (Tex. 1990); City of Hutchins v. Prasifka, 450 S.W.2d 829, 835-36 (Tex. 1970), we decline to explore the scope of these exceptions except to note that the cases address estoppel to deny agency, normally in the employment context. *See, e.g.,* Hudspeth v. Chapel Hill I.S.D., No. 03-06-00243-CV, 2007 Tex. App. LEXIS 4506, 2007 WL 1647818, at *4 (Tex. App. June 8, 2007); La Villa Indep. Sch. Dist. v. Gomez Garza Design, Inc., 79 S.W.3d 217, 221 (Tex. App. 2002) (finding agency authority by estoppel); Bowman, 801 S.W.2d at 888. It is unhelpful to talk about "estoppel" *simpliciter* when the different types of estoppel implicate different analyses.

under a statutory definition, *Tex. Educ. Code § 22.051(a)(5)*, and therefore falls within the protection of the election of remedies provision of the TTCA. Second, Marshall argues that he is separately entitled to professional immunity under the *Texas Education Code § 22.0511*. The district court granted summary judgment in Marshall's favor on the first basis. We disagree with that conclusion and also find Marshall ineligible for the professional immunity provision.

HN24[] The TTCA waives the state's immunity from suit in certain circumstances. Importantly for present purposes, the TTCA also covers all tort theories that may be alleged against a governmental entity whether or not it waives that immunity. *Mission Consol. Indep. Sch. Dist. v. Garcia, 253 S.W.3d 653, 658 (Tex. 2008)*. Further, "[i]f a suit is filed under this chapter against both a governmental unit and any of its employees, the employees shall immediately be dismissed on the filing of a motion by the governmental unit." *Tex. Civ. Prac. & Rem. Code § 101.106(e)*. The **[*416]** state supreme court interpreted this language to mean that "if a plaintiff brings virtually any state common law tort claim against both a governmental unit and its employees, *§ 101.106(e)* will allow the employee defendants to be dismissed if the governmental unit so moves." *Bustos v. Martini Club, Inc., 599 F.3d 458, 463* (citing *Garcia, 253 S.W.3d at 658*). In *Bustos*, this court held that **[**34]** where state law claims against the municipality based on negligent hiring and supervision were joined with claims against police officer defendants for excessive force, the claims against the city were "rooted in the same alleged common law violations." *Id. at 464*. Accordingly, the court was bound to grant the city's motion to dismiss the officers pursuant to *§ 101.106(e)*.

In this case, the district court assumed that Marshall was an HISD employee and, based on TTCA *§ 101.106(e)* and *Bustos*, granted HISD's motion to dismiss both state law conspiracy claims filed against HISD and Marshall and the tortious interference claims brought against Marshall alone. The court concluded that the tortious interference claims were "rooted in the same alleged common law violations" as the global conspiracy claims. Why HISD would have wanted to shield Marshall from GRG's suit in this fashion, given the seriousness of the allegations and the state of proof, is unclear. Nevertheless, in this posture it becomes critical to determine whether Marshall was an "employee" of HISD who could be statutorily shielded. Because we conclude that he was not, there is no need to reach the question whether *Bustos* compels the dismissal of claims brought **[**35]** against Marshall but not HISD.

HN25[] The TTCA defines an employee as "a person, including an officer or agent, who is in the paid service of a governmental unit by competent authority" but excludes "a person who performs tasks the details of which the governmental unit does not have the legal right to control." *Tex. Civ. Prac. & Rem. Code § 101.001(2)*. Marshall, an elected school board trustee, was neither in HISD's paid service nor did the District have any right to control him. He is not an employee under the TTCA.

To overcome this deficiency, Marshall asserts that he was an "employee" pursuant to the recent decision of the Texas Supreme Court in *Franka v. Velasquez, 332 S.W.3d 367 (Tex. 2011)*. One defendant in *Franka* was a medical resident who did not fit TTCA's definition of employee, because she "was not both paid by and subject to the legal control of the same governmental unit[.]" *Franka, 332 S.W.3d at 373*. The court deemed her an employee under the TTCA, however, pursuant to a provision of the Texas Health and Safety Code, which designated medical residents as employees "for purposes of determining liability[.]" *Id. at 374*. Marshall analogizes his position to that of the medical resident in *Franka*. ***HN26***[] Provisions of the Texas Education Code define a school board trustee as an employee, *Tex. Educ. Code § 22.051*,[19] and grant immunity **[**36]** to "employees" for "any act that is incident to or within the scope of the duties of the employee's position . . . and that involves the exercise of judgment or discretion[.]" *Tex. Educ. Code § 22.0511(a)*. On the basis of this analogy, Marshall urges us to rely on the Education Code's definition of employee.

But even if some "employees" under these Education Code provisions might fall **[*417]** within the scope of *Franka,* Marshall does not. The same Education Code provision limits personal liability "for any act *that is incident to or within the scope of the duties* of the employee's position of employment and that involves the exercise of judgment or discretion on the part of the employee[.]" *Tex. Educ. Code § 22.0511* (emphasis added). Marshall is not alleged

---

[19] ***HN27***[] The statute defines a "professional employee of a school district" to include "a member of the board of trustees of an independent school district[.]" *Tex. Educ. Code § 22.051(a)(5)*.

to have been acting "within the scope" of his duties. To the contrary, bribery and peddling influence are not within the scope of a trustee's duty. He was allegedly defiling his position and wholly outside the legitimate scope of a trustee's duties if he accepted bribes in exchange for advancing the interests of certain contractors. Marshall's **[**37]** rationalization that getting involved with contracting and procurement decisions is "minimally" within the scope of his duties, particularly when he served as HISD Board President in 2009, cannot stand against GRG's detailed evidence of the pay-to-play scheme. Marshall is not entitled to immunity under the TTCA or the Education Code.

2. Tortious Interference with Prospective Business Relations

Next to consider is whether summary judgment was appropriate on GRG's claim for tortious interference with prospective business relations against Marshall, the vendor defendants and Clay. GRG contends that there was a reasonable probability that it would have entered into additional contracts with HISD and that Marshall, Clay, and the vendor defendants "intentionally interfered with the relationship."

HN28[] The Texas Supreme Court has recently defined the elements of tortious interference with prospective business relations. The common law cause requires that

> (1) there was a reasonable probability that the plaintiff would have entered into a business relationship with a third party; (2) the defendant either acted with a conscious desire to prevent the relationship from occurring or knew the interference **[**38]** was certain or substantially certain to occur as a result of the conduct; (3) the defendant's conduct was independently tortious or unlawful; (4) the interference proximately caused the plaintiff injury; and (5) the plaintiff suffered actual damage or loss as a result.

Coinmach Corp. v. Aspenwood Apartment Corp., 417 S.W.3d 909, 923 (Tex. 2013). The second element in this list—the requisite mental state—was the deciding factor for the district court, which found that any bribery on the part of competing vendors did not have as its object the interference with GRG's status as a JOC contractor. The district court relied on *Bradford v. Vento*, in which the Texas Supreme Court adopted the explanation of the Second Restatement of Torts that when a defendant "had no desire to effectuate the interference by his action but knew that it would be a mere incidental result of conduct he was engaging in for another purpose, the interference may be found to be not improper." *48 S.W.3d 749, 757* (quoting *RESTATEMENT (SECOND) OF TORTS § 766B cmt. d* (1979)).

Bradford is distinguishable on its facts. The plaintiff in *Bradford* claimed he had bought a particular store from its previous owner. The defendant mall administrator had allegedly interfered with the plaintiff's sales by stating, in response to a police inquiry, that the previous owner **[**39]** still owned the store. *Bradford, 48 S.W.3d at 754-55*. The Texas Supreme Court found that "the interference was at most only an incidental result of Bradford's legitimate conduct." *Id. at 758*. *Bradford* dealt with statements made in good faith, whereas these defendants' actions hardly occurred in good faith.

[*418] GRG bolsters its argument by citing *Strickland v. Joeris*, an unpublished Texas court of appeals case. *No. 04-11-00626-CV, 2012 Tex. App. LEXIS 9841, 2012 WL 6013423 (Tex. App. Nov. 30, 2012)* (mem. op.) (unpublished). The plaintiff in *Strickland* contended he was fired because of a dispute he had with one of the firm's largest clients over a transaction unrelated to the firm's business. Shortly after the dispute, the client called the firm and complained about the employee. The plaintiff introduced evidence that the client "made it clear" that the plaintiff's dispute "could possibly jeopardize all current and future work." *2012 Tex. App. LEXIS 9841, [WL] at *4*. The court held that this was sufficient to create a triable fact issue as to whether the client intended to jeopardize the employee's future with the firm. *Id.* GRG contends that the evidence here likewise supports the inference that its competitors "instructed Marshall to get rid of GRG[.]"

In *Strickland,* the defendant actually made statements to a party in the business relationship about **[**40]** the plaintiff, and circumstantial evidence strongly supported an inference that the statement was designed to harm the plaintiff.[20] In contrast, there is in this case no direct evidence of communications between any vendor defendant and any HISD official on the subject of GRG. The nature of the alleged bribery scheme, however, was to fix the contracting process in favor of the vendor defendants. Where only a limited number of JOC contractors would be selected, all of the participants in the scheme "knew the interference was substantially certain to occur as a result of the conduct." *See* *Coinmach Corp., 417 S.W.3d at 923*. This reasoning would apply to GRG's claim as regards the decrease in projects under the 2009 contract and the non-renewal of GRG's JOC contract in the 2010 RFP process.[21] That this one element of the claim survives summary judgment does not, of course, resolve questions concerning the other elements on which the court did not rule.

III. Civil Conspiracy Claims

Our partial reinstatement of the RICO claim and the claim for interference with prospective business relations requires reinstatement of the civil conspiracy claim against the defendants targeted thereby (except HISD) pending further developments on remand.

IV. Constitutional Claims

GRG and Ramirez brought equal protection, *First Amendment*, and due process claims under the Civil Rights Act, *42 U.S.C. § 1983* against HISD and Marshall. The *First Amendment* claim fails for essentially the reasons stated by the district court: Appellants did not "speak" or intend to convey a particular message, and no one would have "reasonably apprehended" that they so intended, when they refused to pay bribes to Marshall. *See* *Cabrol v. Town of Youngsville, 106 F.3d 101, 108 (5th Cir. 1997)*. The due process claim fares no better. GRG identifies no constitutionally protected liberty or property interest. *See* *Bd. of Regents of State* **[*419]** *Colls. v. Roth, 408 U.S. 564, 92 S. Ct. 2701, 33 L. Ed. 2d 548 (1972)*.

GRG's equal protection claim also lacks support.[22] ***HN29***[] The *Equal Protection Clause* forbids state **[**42]** actors from treating similarly situated individuals differently *for a discriminatory purpose* and without a rational basis. GRG argues that the zero-sum nature of the JOC program meant that Marshall and HISD knew that favoring bribers would harm those who refused to bribe, and that a plaintiff must only "show that the decisionmakers were aware" of potential harm to disfavored individuals. "'Discriminatory purpose,' however, implies more than intent as volition or intent as awareness of consequences." *Pers. Adm'r of Mass. v. Feeney, 442 U.S. 256, 279, 99 S. Ct. 2282, 2296, 60 L. Ed. 2d 870 (1979)*. The district court concluded that GRG failed to demonstrate that Marshall or HISD discriminated against GRG "because of" and not "in spite of" its refusal to pay bribes. *See id.* (equal protection claim requires showing that "the decisionmaker . . . selected or reaffirmed a particular course of action at least in part 'because of,' not merely 'in spite of,' its adverse effects"). Nothing in the record suggests that Marshall or any of his collaborators acted to harm non-bribers. *See* *SECSYS, LLC v. Vigil, 666 F.3d 678, 687 (10th Cir. 2012)* (rejecting equal protection claim arising out of pay-off scheme involving state contracts when harm was "at most a foreseen (but unintended) side effect"). That Marshall may have perverted HISD's procurement **[**43]** processes to cause HISD to discriminate *in favor of* RHJ and FBM is not sufficient to show that GRG was discriminated *against. See* *Club Italia Soccer & Sports Org., Inc. v. Charter Twp. of Shelby, Mich., 470 F.3d 286,*

---

[20] *See also* *Lee v. Levi Strauss & Co., 897 S.W.2d 501 (Tex. App. 1995)*, in which a letter from the defendant led the plaintiff's employer to believe he had to fire the plaintiff. *Id. at 504-05*.

[21] Appellees strenuously contend that GRG's claim also fails for lack of evidence that it would have become a JOC contractor following the 2010 RFP. This contention **[**41]** was not addressed by the district court, and we do not address it either. Assessing the "likelihood" of "prospective business relations" under Texas law suggests different considerations than the RICO inquiry we discussed earlier herein, which is whether HISD "would have" entered into a 2010 JOC arrangement with GRG.

[22] At the outset, we reject HISD's unpalatable argument that there was no disparate treatment since all vendors were given an opportunity to bribe a trustee.

299 (6th Cir. 2006) (rejecting equal protection claim when one vendor "was treated beneficially, but no party was discriminated against").

Further, ***HN30***[] an equal protection claim depends on either identifying a class, *Washington v. Davis, 426 U.S. 229, 240, 96 S. Ct. 2040, 48 L. Ed. 2d 597 (1976)*, or showing that the aggrieved party is a "class of one," *Village of Willowbrook v. Olech, 528 U.S. 562, 564, 120 S. Ct. 1073, 1074, 145 L. Ed. 2d 1060 (2000)*. Ramirez does not claim that he was discriminated against on the basis of his membership in any particular class and therefore must rely on the class of one theory. However, the class-of-one rationale does not apply to "forms of state action . . . which by their nature involve discretionary decision-making based on a vast array of subjective, individualized assessments." *Engquist v. Oregon Dep't of Agr., 553 U.S. 591, 603, 128 S. Ct. 2146, 2154, 170 L. Ed. 2d 975 (2008)*. *Engquist* held that the discretionary-decision-making "principle applies most clearly in the employment context, for employment decisions are quite often subjective and individualized, resting on a wide array of factors that are difficult to articulate and quantify." *Id. at 604, 128 S. Ct. at 2154*; *see also* *Harris v. Quinn, 134 S. Ct. 2618, 2653, 189 L. Ed. 2d 620 (2014)* ("the government **[**44]** has wider constitutional latitude when it is acting as employer than as sovereign"). HISD calls our attention to the "obvious parallels between government employees and government contractors." *Engquist* is not dispositive of GRG's class of one theory but cuts against it. In any event, even if GRG's dealings with HISD fall within a class of one for equal protection purposes, **[*420]** the absence of discriminatory intent dooms its claim.

For the foregoing reasons, GRG cannot sustain its constitutional claims.[23]

CONCLUSION

The district court commendably dealt with novel claims in this troubling case with a long and complex record. Based on the foregoing discussion, we AFFIRM the judgment dismissing HISD from liability for RICO and federal constitutional violations and state law claims. We AFFIRM the judgment dismissing Marshall from liability for constitutional violations. We REVERSE and REMAND, for further proceedings consistent herewith, the summary judgment dismissing the RICO claims against the (non-HISD) Appellees insofar as they allege injury covering the remainder of the 2009 JOC contract period. **[**45]** We REVERSE and REMAND for further proceedings consistent herewith the summary judgment dismissing the claim against the (non-HISD) Appellees for tortious interference with prospective business relations and the civil conspiracy claims.

AFFIRMED IN PART, REVERSED and REMANDED IN PART.

End of Document

---

[23] We do not reach HISD's assertion that these *§ 1983* claims do not justify imposing municipal liability.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: (IN CHAMBERS) **Order Granting in Part and Denying in Part Defendant's Motion for Judgment on the Pleadings**

Defendant Swisher International, Inc. ("Swisher") moves the Court to enter judgment on the pleadings on the first, second, fifth, eight, and ninth claims against it as alleged by Plaintiffs Trendsettah USA, Inc. and Trend Settah, Inc. (collectively, "Trendsettah"). (Docket No. 33.) Trendsettah opposes. (Docket No. 34.) Swisher has replied. (Docket No. 35.)

As set forth below, the Court GRANTS IN PART and DENIES IN PART Swisher's motion.

I. BACKGROUND

Swisher is a manufacturer of cigars and "cigarillos," a type of cigar. (Compl. ¶ 11.) Effective January 20, 2011, Trendsettah entered into a supply agreement (the "Private Label Agreement") with Swisher whereby Swisher would produce a private-label brand of cigarillos to be sold by Trendsettah under the "Splitarillos" brand. (Id. ¶ 20.) The Private Label Agreement ("PLA") contains a choice-of-law clause that indicates that "this Agreement shall be governed by the laws of the State of **[*2]** Florida." (Opp'n Mot. J. Pleadings 14; see also Laquidara Decl., Ex A, Docket No. 16-1.)

Although Splitarillos sold well, in 2012, Swisher allegedly began refusing to fulfill Trendsettah's orders for Splitarillos. (Compl. ¶ 23-24.) At the same time, Swisher allegedly falsely told Trendsettah's wholesale customers that Trendsettah was going out of business and would no longer make Splitarillos. (Id. ¶¶ 36-37.) Swisher employees also allegedly removed Splitarillo products and marketing materials from wholesalers and individual retailers during site visits. (Id. ¶¶38-39.) As a result, Trendsettah claims that sales of Splitarillos sharply dropped. (Id. ¶ 41.)

On October 14, 2014, Trendsettah filed a Complaint with this Court, asserting the following claims against Swisher: (1) violation of the Sherman Act, *15 U.S.C. § 2*; (2) violation of Florida ***Antitrust Law***, *Fl. Stat. § 542.19*; (3) breach of contract; (4) breach of the implied covenant of good faith and fair dealing; (5) trade libel; (6) tortuous interference with contract; (7) intentional interference with prospective economic relations; (8) negligent interference with prospective economic relations; and (9) violation of California's Unfair Competition Law ("UCL"), **[*3]** *Cal. Bus. & Prof. Code § 17200 et seq.* (Docket No. 1.)

II. LEGAL STANDARD

Under *Federal Rule of Civil Procedure 12(c)*, "[a]fter the pleadings are closed—but early enough not to delay trial—a party may move for judgment on the pleadings." A motion for judgment on the pleadings should be granted only if "taking all the allegations in the pleading as true, the moving party is entitled to judgment as a matter of law." *McSherry v. City of Long Beach, 423 F.3d 1015, 1021 (9th Cir. 2005)*. A *Rule 12(c)* motion asserting a failure to state a claim is governed by the same standard as a *Rule 12(b)(6)* motion to dismiss. *United States ex rel. Cafasso v. Gen. Dynamics C4 Sys., Inc., 637 F.3d 1047, 1054 n.4 (9th Cir. 2011)*; *Chavez v. United States, 683 F.3d 1102, 1108 (9th Cir. 2012)*.

In resolving a *12(b)(6)* motion, the Court must follow a two-pronged approach. First, the Court must accept all well-pleaded factual allegations as true, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Nor must the Court "accept as true a legal conclusion couched as a factual allegation." Id. (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). Second, assuming the veracity of well-pleaded factual allegations, the Court must "determine whether they plausibly give rise to an entitlement to relief." *Id. at 679*. This determination is context-specific, requiring the Court to draw on its experience and common sense, but there is no plausibility "where the well-pleaded facts do not permit the **[*4]** court to infer more than the mere possibility of misconduct." Id.

III. DISCUSSION

A. Antitrust Claims

Swisher argues that it is entitled to judgment on the pleadings because Trendsettah has failed to allege an "antitrust injury" sufficient to state a claim for illegal monopolization or attempted monopolization in violation of *§2* of the Sherman Act and Florida ***Antitrust Law*** (*Fl. Stat. § 542.19*). (Mot. J. Pleadings 5-11.) The Court analyzes the claims in tandem because "[f]ederal and Florida antitrust laws are analyzed under the same rules and case law." *All Care Nursing Serv., Inc. v. High Tech Staffing Servs., Inc., 135 F.3d 740, 745 n.11 (11th Cir. 1998)*.

In order to state a monopolization claim under *§ 2* of the Sherman Antitrust Act, a plaintiff must allege facts sufficient to demonstrate "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." See *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. In order to state an attempted monopolization claim under *§ 2*, a plaintiff must allege facts sufficient to demonstrate "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly **[*5]** power." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2007)*. "Anticompetitive conduct is behavior that tends to impair the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way." Id. (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605 n. 32, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*).

A private plaintiff seeking redress for violation of federal ***antitrust law*** must sufficiently allege "causal antitrust injury" under *§ 4* of the Clayton Act. See *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*. "Antitrust injury" is not merely an injury caused by violation of ***antitrust law***, but rather is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 371 (9th Cir. 2003)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*). In other words, a plaintiff must allege facts sufficient to show an injury to competition, not just injury to competitors. *Glen Holly, 352 F.3d at 372* (citing *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 107, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*).

Swisher argues that Trendsettah has not adequately alleged an antitrust injury but rather has merely alleged injury to itself as Swisher's competitor. (See Mot. J. Pleadings 5-11.) Specifically, Swisher argues that Trendsettah has failed to allege that Swisher's conduct "resulted in higher prices or decreased output for the consuming public." (Mot. J. Pleadings. 9, citing *Streamcast Networks, Inc. v. Skype Techs., S.A., 547 F. Supp. 2d 1086, 1096-98 (C.D. Cal. 2007)*.)

However, Trendsettah's Complaint alleges that Swisher's conduct caused harm to competition **[*6]** by (1) maintaining a supracompetitive price for cigarillos (Compl. ¶¶ 50-52) and (2) decreasing output available to consumers (id. ¶ 29, 41, 51, 52). Trendsettah supports its allegation that the cigarillo market price is supracompetitive by alleging that the cigarillo market has "high profitability margins" and "major barriers to entry." (Id. ¶¶ 12-13.) Trendsettah also alleges that because the PLA was exclusive, Swisher was unilaterally able to constrain output of Splitarillos cigarillos to consumers despite their capacity to meet demand. (Id. ¶¶ 22, 26-30.) These allegations describe a plausible injury to competition, not merely an injury to Trendsettah alone.

Swisher argues that Trendsettah's "injury to competition" allegations should not be entitled to the assumption of truth in light of Trendsettah's acknowledgment that it lost business to non-party competitors as a result of Swisher's actions. (Mot. J. Pleadings 8-9; Compl. ¶¶ 29, 66, 77, 83.) The Court disagrees. At this stage, the Court must draw all inferences in favor of Trendsettah, the nonmoving party. Accordingly, the Court finds that Trendsettah has pled facts that, if true, state a claim for a cognizable antitrust injury. **[*7]**

Accordingly, Swisher is not entitled to judgment in its favor on Trendsettah's antitrust claims.[1]

B. Trade Libel, Negligent Interference, and UCL Claims

Swisher argues that the Court should grant judgment in its favor on Trendsettah's trade libel, negligent interference with prospective economic relations, and California UCL claims. (Mot. J. Pleadings 11.) As a threshold issue, Swisher argues that Florida law governs these claims because the parties' PLA contains a Florida choice-of-law clause. (Id.) Trendsettah disagrees. (Opp'n Mot. J. Pleadings 12-14.) Thus, the Court must first determine whether California or Florida law applies to each of the aforementioned claims.

"In a federal question action where the federal court is exercising supplemental jurisdiction over state claims, the federal court applies the choice-of-law rules of the forum state[.]" *Paracor Finance, Inc. v. Gen. Elec. Capital Corp., 96 F.3d 1151, 1164 (9th Cir. 1996)*. Here, as in *Paracor*, the forum state is California. Id. Trendsettah does not dispute that the choice-of-law clause is enforceable but does dispute whether the clause requires the Court to apply

---

[1] Swisher does not raise any other aspect of the antitrust claims, and the Court expresses no opinion beyond the issue of antitrust injury.

Florida law to its trade libel, negligent interference with prospective economic relations, and UCL claims. (Opp'n Mot. J. Pleadings 13-14, 16.) **[*8]**

Under California law, "[a] valid choice-of-law clause, which provides that a specified body of law 'governs' the 'agreement' between the parties, encompasses all causes of action arising from or related to that agreement, regardless of how they are characterized, including tortious breaches of duties emanating from the agreement or the legal relationships it creates." *Nedlloyd Lines B.V. v. Superior Court, 3 Cal. 4th 459, 470, 11 Cal. Rptr. 2d 330, 834 P.2d 1148 (1992)*). Here, the Florida choice-of-law clause is phrased similarly to the clause in *Nedlloyd*, providing that the PLA "shall be governed by the laws of the State of Florida." (Opp'n Mot. J. Pleadings 14; see also Laquidara Decl., Ex A, Docket No. 16-1.)

The Court will consider the applicability of the choice-of-law clause to each claim in turn.

1. Trade libel

Swisher and Trendsettah dispute whether Trendsettah's trade libel claim falls within the scope of the PLA's choice-of-law clause. (Mot. J. Pleadings 11-12; Opp'n Mot. J. Pleadings 13-14.)

The Court finds that Florida law applies to Trendsettah's trade libel claim. In holding that a contractual choice-of-law provision governs "all causes of action arising from or related to that agreement, regardless of how they are characterized," the California Supreme Court in Nedlloyd further **[*9]** explained:

> When a rational businessperson enters into an agreement establishing a transaction or relationship and provides that disputes arising from the agreement shall be governed by the law of an identified jurisdiction, the logical conclusion is that he or she intended the law to apply to all disputes arising out of the transaction or relationship. We seriously doubt that any rational businessperson, attempting to provide by contract for an efficient and business-like resolution of possible future disputes, would intend that the laws of multiple jurisdictions would apply to a single controversy having its origin in a single, contract-based relationship.

Nedlloyd, 3 Cal. 4th at 469-70 (emphasis added). Upon examination of the facts alleged in the Complaint, it is evident that the trade libel claim is a cause of action related to the parties' contract-based relationship even though it is not predicated on the PLA itself. The present dispute is based on a single controversy regarding Swisher's alleged failure to perform under the PLA in order to stifle competition. Trendsettah's trade libel claim specifically alleges that Swisher made false statements about the quality and future availability of products that it **[*10]** was contractually obligated to produce on Trendsettah's behalf, implicating questions of the PLA's interpretation and the parties' contractual relationship. See *Olinick v. BMG Entm't, 138 Cal. App. 4th 1286, 1299-1300, 42 Cal. Rptr. 3d 268 (2006)* (choice-of-law clause controlled Fair Employment and Housing Act ("FEHA") and tortious wrongful discharge case because interpretation of employment contract was central issue, although clams were not predicated on contract's existence). Like the California Supreme Court in *Nedlloyd*, here the Court seriously doubts that Trendsettah and Swisher intended to apply the laws of multiple jurisdictions to what is a single controversy arising from their PLA relationship.

Having concluded that Florida law applies to Trendsettah's trade libel claim, the Court must now consider whether Swisher is entitled to judgment on the pleadings.

Swisher argues that Trendsettah has failed to allege facts sufficient to state a trade libel claim under Florida law. (Mot. J. Pleadings 12-14.) To state a Florida trade libel (or "injurious falsehood") claim, a plaintiff must allege "(1) a falsehood (2) has been published, or communicated to a third person, (3) when the defendant-publisher knows or reasonably should now that it will likely result in inducing **[*11]** others not to deal with the plaintiff; (4) in fact, the falsehood does play a material and substantial part in inducing others not to deal with the plaintiff; and (5) special damages are proximately caused as a result of the published falsehood." *National Numismatic Certification, LLC v. eBay, Inc., No. 6:08-cv-42-Orl-19GJK, 2008 U.S. Dist. LEXIS 109793, 2008 WL 2704404, at *19-*20 (M.D. Fla. July 8, 2008)* (quoting *Border Collie Rescue, Inc. v. Ryan, 418 F. Supp. 2d 1330, 1348 (M.D. Fla. 2006)*).

The parties dispute what level of specificity is required to state a trade libel claim. (Mot. J. Pleadings 12-14; Opp'n Mot. 14-16.) A federal court follows federal procedural rules, including their pleading requirements, even when considering the sufficiency of an allegation of violation of state substantive law. See *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1102* (noting that "[t]he Federal Rules of Civil Procedure apply irrespective of the source of subject matter jurisdiction, and irrespective of whether the substantive law at issue is state or federal," citing *Hanna v. Plumer, 380 U.S. 460, 85 S. Ct. 1136, 14 L. Ed. 2d 8 (1965)*); see also *Caster v. Hennessey, 781 F.2d 1569, 1570 (11th Cir. 1986)*. In fact, the 11th Circuit has specifically noted that Florida's strict pleading requirements for defamation claims[2] exceed the requirements of *Fed. R. Civ. P. 8(a)(2)*, which simply requires that a complaint contain "a short and plain statement of the claim showing that the pleader is entitled to relief." Id.; see also *Caruso v. Galencare, Inc., No. 8:14-cv-539-T-33AEP, 2014 U.S. Dist. LEXIS 62468, 2014 WL 1796684, at *4-*5 (M.D. Fla. May 6, 2014)* **[*12]** . This distinction was not lost on the court in Caruso, which correctly identified that it is the pleading standard of *Rule 8*, not Florida's heightened pleading requirements, that guide a federal court's analysis of claims. See *2014 WL 1796684, at *4-*5*.

Swisher maintains that a trade libel claim is generally subject to more "stringent standards" than those applied under *Rule 8* in Caruso (see Reply 18) and that a plaintiff "must allege certain facts such as the identity of the speaker, a description of the statement, and provide a time frame within which the publication occurred." See *Fowler v. Taco Viva, Inc., 646 F. Supp. 152, 157-58 (S.D. Fla. 1986)*. However, Swisher cites no authority that holds that this is what *Rule 8* requires for a trade libel claim. Rather, "*Rule 8* does not require 'detailed factual allegations,' but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*).

Swisher correctly notes, however, that a plaintiff must plead its allegations of special damages pursuant to *Federal Rule of Civil Procedure 9(g)*, which provides that "[i]f an item of special damage is claimed, it must be specifically stated." See *eBay, 2008 WL 2704404, at *19-*20* ("Florida law requires a plaintiff claiming trade libel to prove special damages by establishing a 'pecuniary loss that has been realized or liquidated, as in the case of **[*13]** specific lost sales . . . *Rule 9(g)* unequivocally states '[i]f an item of special damage is claimed, it must be specifically stated.").

Here, Trendsettah alleges that during the second quarter of 2012, Swisher representatives falsely told wholesalers and distributors of Splitarillo products that Splitarillo products were low quality, that Trendsettah would no longer receive Splitarillo products, and that Trendsettah was going out of business. (Compl. ¶¶ 36-37, 71-73.) Trendsettah alleges that Swisher knew the statements were false or acted with reckless disregard as to their truth. (Id. ¶ 74.) Trendsettah further alleges that Swisher knew or should have recognized that wholesalers and distributors might rely on these statements to cause Trendsettah financial loss, and that their reliance did, in fact, cause Trendsettah financial loss because the wholesalers and distributors reduced or ceased orders of Splitarillo products. (Id. ¶¶ 75-76.) As a result, Trendsettah argues that it has lost "millions of dollars in lost profits from reduced or lost orders and has experience a diminution of its value because its economic growth dramatically slowed once its customers permanently turned to other cigarillo **[*14]** alternatives that copied the Splitarillo product." (Id. ¶ 77.)

The Court concludes that Trendsettah has adequately stated a Florida trade libel claim under the liberal pleading standard of *Rule 8* and has specifically identified its proximately-caused special damages pursuant to *Rule 9(g)*. In its Reply, Swisher argues for judgment in its favor based on *Rule 9(g)* for the first time. While Swisher's argument may be viable, raising new legal arguments in a reply is improper. *U.S. ex rel. Giles v. Sardie, 191 F. Supp. 2d 1117, 1127 (C.D. Cal. 2000)* ("It is improper for a moving party to introduce new facts or different legal arguments in the reply brief than those presented in the moving papers.") (citing *Lujan v. Nat'l Wildlife Fed'n, 497 U.S. 871, 894-95, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990)*). Accordingly, the Court declines to grant judgment in Swisher's favor on Trendsettah's trade libel claim.

---

[2] Swisher argues that the pleading standard for Florida defamation claims is the same as that for trade libel claims because the claims have the same elements. (See Mot. J. Pleadings 12-14.)

2. Negligent interference with prospective economic relations

Swisher moves for judgment in its favor on Trendsettah's negligent interference with prospective economic relations claim because Florida law governs the parties' agreement and Florida law does not recognize such a claim. (Mot. J. Pleadings 22-23, citing *Fla. Power & Light Co. v. Fleitas, 488 So. 2d 148, 151 (Fla. 3d DCA 1986)*). Trendsettah disputes that Florida law applies to the claim, but does not dispute that Florida does not recognize a negligent interference with prospective economic **[*15]** relations claim. (Opp'n Mot. J. Pleadings 16.)

The Court agrees that Florida law governs this claim. Here, Trendsettah alleges that Swisher negligently interfered with its prospective economic relations with third parties by failing to "act with reasonable care" when conducting itself in the manner described by the Complaint. (See Compl. ¶¶ 93-97, incorporating all previous paragraphs.) This claim clearly implicates matters of the PLA's interpretation and emanates, at least in part, from Swisher's obligations under it. See *Olinick, 138 Cal. App. 4th at 1299-1300*.

Therefore, given that Florida law applies to this claim and does not recognize it, Swisher is entitled to judgment in its favor on Trendsettah's negligent interference with prospective economic relations claim. See Householder Group LLLP v. Fuss, No. C 07-573 SI, 2007 WL 1650933, at *7 (N.D. Cal. June 4, 2007) (dismissing negligent interference with prospective economic relations claim when chosen state law did not recognize such a claim).

3. California UCL

Swisher argues that Trendsettah cannot state a California UCL claim because Florida law applies to this dispute.

Again, Trendsettah does not dispute that the choice-of-law clause is enforceable. (Opp'n Mot. J. Pleadings **[*16]** 16-17.) Instead, it argues that the UCL claim falls outside its scope because it is predicated in part on a violation of federal ***antitrust law***. (Id.)

Swisher cites authority indicating that courts applying California choice-of-law rules dismiss California UCL claims when an enforceable choice-of-law clause selects the law of a different state. *Abat v. Chase Bank USA, N.A., 738 F. Supp. 2d 1093, 1096 (C.D. Cal. 2010)*; *It's Just Lunch Int'l LLC v. Island Park Enter. Group, Inc., No. EDCV 08-367-VAP, 2008 U.S. Dist. LEXIS 89194, 2008 WL 4683637, at *6 (C.D. Cal. Oct. 21, 2008)*; *Century 21 Real Estate LLC v. All Prof'l Realty, Inc., 889 F. Supp. 2d 1198, 1217 n.15 (E.D. Cal. 2012)*. Trendsettah cites no authority in support of its argument that a UCL claim based in part on violation of federal ***antitrust law*** is outside the scope of the choice-of-law clause.

The Court concludes, as above, that Trendsettah's UCL claim falls within the scope of the choice-of-law clause and that Florida law applies. Here, although Trendsettah's claim is not necessarily predicated upon the PLA, it is indisputable that substantial questions relating to the PLA's interpretation and enforcement will be central to the resolution of the claims on which Trendsettah's UCL claim is based. See *Olinick, 138 Cal. App. 4th at 1299-1300 (2006)*.

Accordingly, the selection of Florida law bars Trendsettah's UCL claim as a matter of law. Swisher is entitled to judgment in its favor on Trendsettah's UCL claim.

IV. CONCLUSION

As set **[*17]** forth above, the Court GRANTS IN PART Swisher's motion for judgment on the pleadings in its favor with respect to Trendsettah's intentional interference with prospective economic relations and UCL claims. Swisher's motion is otherwise DENIED IN PART.

IT IS SO ORDERED.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN1[] **Entitlement as Matter of Law, Appropriateness**

The court of appeals reviews de novo a district court's grant of summary judgment, viewing all facts and evidence in the light most favorable to the non-moving party. It applies the same standard as the district court in the first instance.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN2[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment is appropriate if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A genuine dispute of material fact exists when the evidence is such that a reasonable jury could return a verdict for the nonmoving party.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN3[] **Private Actions, Standing**

A plaintiff has standing to pursue an antitrust suit only if he or she shows: (1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct, (2) antitrust injury, and (3) proper plaintiff status, which assures that other parties are not better situated to bring suit. Injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] **Private Actions, Standing**

This antitrust injury requirement of antitrust standing is sometimes confused with injury to competition, which is often a component of substantive liability. In the standing context, injury should be viewed from the perspective of the plaintiff's position in the marketplace, not from the merits-related perspective of the impact of a defendant's conduct on overall competition.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN5[] **Standing, Clayton Act**

Typically, parties with antitrust injury are either competitors, purchasers, or consumers in the relevant market. But standing is not necessarily limited to this group. Section 4 of the Clayton Act does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers.

Energy & Utilities Law > Royalties > General Overview

HN6[] **Energy & Utilities Law, Royalties**

A royalty-interest owner's alleged injury of decreased royalty payments due to a conspiracy among oil companies is not antitrust injury.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN7[] **Civil Conspiracy, Elements**

Under Mississippi law, the elements of civil conspiracy are (1) two or more persons or corporations, (2) an object to be accomplished, (3) a meeting of the minds on the object or course of action, (4) one or more unlawful overt acts, and (5) damages as the proximate result. Mississippi follows the rule of almost all jurisdictions in uniformly requiring that civil conspiracy claims be predicated upon an underlying tort that would be independently actionable.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN8[] Actual Fraud, Elements

A Mississippi fraud claim has nine elements: (1) a representation, (2) its falsity, (3) its materiality, (4) the speaker's knowledge of its falsity or ignorance of its truth, (5) his or her intent that it should be acted on by the hearer and in the manner reasonably contemplated, (6) the hearer's ignorance of its falsity, (7) his or her reliance on its truth, (8) his or her right to rely thereon, and (9) his or her consequent and proximate injury.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN9[] Amendment of Pleadings, Leave of Court

A party who neglects to ask the district court for leave to amend cannot expect to receive such a dispensation from the court of appeals. A bare request in an opposition to a motion to dismiss, without any indication of the particular grounds on which the amendment is sought, does not constitute a motion within the contemplation of *Fed. R. Civ. P. 15(a)*.

Counsel: For James A. Waggoner, J.W.W. Oil And Gas Exploration, Incorporated, Plaintiffs - Appellants: Dunbar Dowdy Watt, Charles Wayne Dowdy, Esq., Dowdy, Cockerham & Watt, Magnolia, MS.

Judges: Before DENNIS, PRADO, and HIGGINSON, Circuit Judges.

Opinion

[*735] PER CURIAM:*

James Waggoner owns a working interest in a carbon-dioxide well in Mississippi entitling him to a percentage of the proceeds from Denbury Resources, Incorporated's sales of the carbon dioxide. Waggoner sued Denbury and its subsidiaries for antitrust violations and civil conspiracy alleging that Denbury sells the carbon dioxide to its subsidiaries at low prices to decrease the royalties it has **[**2]** to pay. The district court granted summary judgment to Denbury because Waggoner 1) lacked "antitrust injury" for standing purposes and 2) failed to allege the elements of fraud, the underlying tort for his conspiracy claim. We affirm.

I. FACTUAL AND PROCEDURAL BACKGROUND

This case concerns royalty interests owned by Plaintiffs—Appellants James Waggoner and his family-owned company, J.W.W. Oil and Gas Exploration, Incorporated (collectively "Waggoner"). In 1984, J.W.W. acquired an oil,

* Pursuant to ***5TH CIR. R. 47.5***, the court has determined that this opinion should not be published and is not precedent except under the limited circumstances set forth in ***5TH CIR. R. 47.5.4***.

gas, and mineral lease in Rankin County, Mississippi. Rankin County is the location of a carbon-dioxide (CO_2) formation known as the Jackson Dome.

After Shell Western E&P, Incorporated successfully petitioned the Mississippi State Oil and Gas Board to pool the interests in a large tract of land including J.W.W.'s leases, J.W.W. entered into a Farmin Agreement with Shell. Under the agreement, J.W.W. placed its 77 acres into the pooled unit and received a 6.25% overriding royalty interest (ORRI) in the well until payout. At payout, J.W.W. retained the option to convert the ORRI into a 40% working interest.[1] The parties also executed an Operating Agreement that provided that the price for CO_2 would be the "volume **[**3]** weighted average price." When the well paid out, J.W.W. exercised its option to convert the ORRI into a working interest. As a working-interest owner, J.W.W. was entitled to take either its proportionate share of the CO_2 or its proportionate share of the volume-weighted average price of CO_2 that Shell received in the area. J.W.W. chose the latter and later sold this interest to Waggoner.

Shell sold the field unit to Airgas Carbonic Enterprises. Shell also sold several of its enhanced oil recovery (EOR) fields to J.P. Oil. EOR is a process that uses CO_2 to enhance oil output from older oil fields. Airgas and J.P. Oil entered into a purchase agreement under which Airgas would sell CO_2 to J.P. Oil at an agreed-upon price for use at the EOR fields. They also agreed that the treatment and transport costs would be borne by the owner of the field unit. In 1999, J.P. Oil **[*736]** sold its fields to Defendant-Appellee Denbury Resources, Incorporated. Denbury continued to purchase CO_2 from Airgas under the purchase agreement. In 2001, Airgas sold the field unit to Denbury. According to Waggoner, this acquisition made Denbury the owner of "the **[**4]** entire carbon dioxide supply in Mississippi."

In 2012, Waggoner sued Defendants-Appellees Denbury Onshore, LLC, Denbury Gulf Coast Pipelines, LLC, and Denbury Resources, Incorporated (collectively "Denbury"), for, *inter alia*, antitrust violations under *Mississippi Code Annotated §§ 75-21-1*, *75-21-3(b)*, and *75-21-3(e)* and civil conspiracy. Waggoner alleges that "Denbury Onshore pays the royalty and working interest owners in the Jackson Dome based upon the price Denbury Onshore receives from the Denbury subsidiary for the CO_2. Denbury then pipes the CO_2 to oilfields . . . to be used by Denbury in tertiary oil recovery operations." Waggoner alleges that "Denbury Onshore 'sells' the CO_2 to its subsidiary . . . at an artificially low price . . . and pays its royalty owners based on that artificially low price."

Denbury filed a Motion to Dismiss and for Summary Judgment. The district court granted summary judgment to Denbury on the antitrust claims for lack of antitrust standing and on the civil-conspiracy claim for failure adequately to plead the underlying tort of fraud.

II. DISCUSSION

The district court had diversity jurisdiction under *28 U.S.C. § 1332(a)*. We have jurisdiction to review the district court's final judgment pursuant to *28 U.S.C. § 1291*.

HN1[] This Court reviews de novo **[**5]** a district court's grant of summary judgment, viewing "all facts and evidence in the light most favorable to the non-moving party." *Juino v. Livingston Parish Fire Dist. No. 5, 717 F.3d 431, 433 (5th Cir. 2013)*. It applies the same standard as the district court in the first instance. *Turner v. Baylor Richardson Med. Ctr., 476 F.3d 337, 343 (5th Cir. 2007)*.

HN2[] Summary judgment is appropriate if "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine dispute of material fact exists when the "evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Royal v. CCC & R Tres Arboles, L.L.C., 736 F.3d 396, 400 (5th Cir. 2013)* (quoting *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986))*.

[1] Working interests are cost-bearing interests, unlike ORRIs.

A. Antitrust

HN3[] A plaintiff has standing to pursue an antitrust suit only if he shows: "1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit." *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. Alliance, Inc., 123 F.3d 301, 305 (5th Cir. 1997)*.[2]

> **[*737]** injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations . . . would be likely to cause." **[**6]**

Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) (alteration in original) (quoting *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1975))*.[4]

The principal issue in this case is the second requirement, antitrust injury,[3] which is

HN5[] Typically, parties with antitrust injury are either competitors, purchasers, or consumers in the relevant market. *See, e.g.*, John J. Miles, 1 *Health Care and **Antitrust Law*** § 9:7 & n.30 (2014) (collecting cases). But standing is not necessarily limited to this group. *See Blue Shield of Va. v. McCready, 457 U.S. 465, 472, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* ("As we have recognized, '[§ 4 of the Clayton Act] does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers . . . .'" (quoting *Mandeville Island Farms, Inc. v. Am. Crystal Sugar Co., 334 U.S. 219, 236, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* (alteration in original)); *cf. Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 112, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (extending the antitrust injury requirements of Clayton Act § 4 claims for damages to § 16 claims for injunctive relief).

In *Jebaco, Inc. v. Harrah's Operating Co., 587 F.3d 314 (5th Cir. 2009)*, this Court addressed an assertion of antitrust standing similar to Waggoner's—decreased fees from the downstream **[**8]** anticompetitive conduct of the payor. Harrah's, which owned two gaming licenses, leased two berths for its riverboat casinos. *Id. at 316*. Pursuant to a settlement agreement, the plaintiff was entitled to a portion of that rent in per-patron fees. *Id.* Harrah's proceeded to sell the casinos, gaming licenses, and interests in the berths to another company, Pinnacle. *Id.* Pinnacle applied to the state regulatory agency to use the two gaming licenses at berths in which the plaintiff had no interest, which would have deprived the plaintiff of all per-patron fees. *Id. at 317*.

---

[2] Although the antitrust claim in this case was brought under Mississippi law, the parties agree that Mississippi antitrust claims are "analytically identical" to federal antitrust claims; therefore, Plaintiffs lack standing to maintain their Mississippi antitrust claim if they lack standing under federal ***antitrust law***. Thus, we analyze their claim under federal law.

[4] Both the district court and Waggoner's brief quote the following from *Bell v. Dow Chemical Co.*: "In making the determination, courts may assess several factors: 1) the nature of plaintiff's alleged injury; 2) the directness of the **[**7]** injury; 3) the speculative measure of the harm; 4) the risk of duplicative recovery; and 5) the complexity in apportioning damages." *847 F.2d 1179, 1183 (5th Cir. 1988)*. While these factors are indeed appropriate in the *overall* standing inquiry, the antitrust-injury standing requirement is analogous to the first *Dow* factor: the nature of the plaintiff's injury. This is evident from *Dow's* citation to *Brunswick* for the proposition that, "[r]egarding the first factor, plaintiff's injury must be the type that the antitrust laws were intended to prevent," *id.*

[3] ***HN4***[] This antitrust injury requirement of antitrust standing is sometimes confused with "injury to competition[,] . . . which is often a component of substantive liability." *Doctor's Hosp., 123 F.3d at 305*. In the standing context, injury "should be viewed from the perspective of the plaintiff's position in the marketplace, not from the merits-related perspective of the impact of a defendant's conduct on overall competition." *Id.* In this opinion, "antitrust injury" refers only to the antitrust standing requirement.

The plaintiff sued Harrah's and Pinnacle, alleging, *inter alia*, antitrust violations for dividing the Louisiana casino market. *Id. at 318*. The plaintiff argued that the loss of fees constituted antitrust injury. *Id.* In determining whether this constituted antitrust injury, we analogized to landlord-tenant and supplier-customer law. *Id. at 320*. Noting that these relationships **[*738]** "when terminated or modified by a byproduct of 'downstream' anticompetitive conduct, have rarely been held to inflict antitrust injury," we held that the loss of per-patron fees did not amount to antitrust injury and affirmed the dismissal on antitrust standing grounds. *Id. at 320-21, 323*.

Additionally, **[**9]** we have explicitly held that ***HN6***[] a royalty-interest owner's alleged injury of decreased royalty payments due to a conspiracy among oil companies is not antitrust injury. In *Bailey v. Shell Western E&P, Inc.*, the holder of an ORRI in CO_2 in the McElmo Dome in Colorado brought an antitrust suit against Shell. *609 F.3d 710, 715-16, 727 (5th Cir. 2010)*. The interest holder's alleged antitrust injury was the decrease in royalty payments resulting from an alleged conspiracy between Shell and other unit operators. *Bailey v. Shell W. E & P, Inc., 555 F. Supp. 2d 767, 769, 776 (S.D. Tex. 2008)*.[5] We reasoned that "if Shell were to raise the price of gas [on which the royalty payments were based] Bailey would benefit because his royalty payments would increase." *609 F.3d at 727*. Because the royalty holder "suffered no antitrust injury," we affirmed summary judgment. *Id. at 729*.

Waggoner's attempt to distinguish *Bailey* is unavailing.[6] First Waggoner notes that that the oil companies in *Bailey* owned only 87% of the CO_2 in the McElmo dome, *555 F. Supp. 2d at 769*, but Denbury allegedly owns 100% of the CO_2 in Mississippi. Additionally, Waggoner asserts that in *Bailey* Shell was **[**10]** selling the gas to third parties. The case does not support this assertion, and even if this were true, it would not render *Bailey* inapplicable. Neither the district court's nor our reasoning in *Bailey* depends on Shell's share of the market or on the identity of the CO_2 purchasers.

Jebaco and *Bailey* decide this issue. As with the decrease in per-patron fees in *Jebaco*, Waggoner's decrease in royalties is the result of downstream conduct by the payor, in a market in which Waggoner is not a participant. *See 587 F.3d at 320*. More importantly, Waggoner's alleged antitrust injury is exactly the same as that **[*739]** alleged in *Bailey*—decreased royalty payments on CO_2 as a result of a conspiracy between oil companies (here, between Denbury and its affiliates). This Court unequivocally held that this is not antitrust injury. **[**12]** *609 F.3d at 727*. Because Waggoner has failed to raise a fact issue as to antitrust standing, we affirm the district court's grant of summary judgment for Denbury on the antitrust claims.

B. Civil Conspiracy

---

[5] We cite the district court opinion for these facts and not for its reasoning because our opinion deals with numerous issues and therefore provides a limited discussion of the antitrust claim. *See Bailey, 609 F.3d at 727*.

[6] Waggoner attempts to analogize this case to *McCready*. In that case, a beneficiary of an insurance policy purchased by her employer alleged that the insurance company's practice of denying coverage for treatment by psychologists while covering treatment by psychiatrists was part of a conspiracy to restrain competition in the market. *457 U.S. at 467*. The defendants argued that the plaintiff lacked antitrust standing because her injury did not "reflect the 'anticompetitive' effect of the alleged" conspiracy, stressing that she did not claim that psychiatry costs were higher because of the alleged conspiracy. *Id. at 481-82*. The Court disagreed, finding she had standing because she was forced into the "Hobson's choice" of being treated by a psychiatrist and forfeiting reimbursement or forgoing treatment by the practitioner of her choice. *Id. at 483*. The Court held her injury "was inextricably intertwined with the injury the conspirators sought **[**11]** to inflict on psychologists and the psychotherapy market." *Id. at 484*.

The most salient distinction between *McCready* and the instant case is that Waggoner is not a consumer, directly or indirectly, in the CO_2 market. Moreover, the alleged antitrust behavior in that case was the pressure on subscribers to choose treatment from psychiatrists rather than psychologists to limit competition against psychiatrists. *Id.* Here Waggoner's alleged injury stems from the monopolist's power to "control price or exclude competition." The Defendant's sale of CO_2 for *low* prices is hardly the type of harm that "Congress sought to redress in providing a private remedy for" antitrust violations, *id. at 483*.

In addition to the antitrust claims, Waggoner alleged Denbury engaged in a conspiracy

> to create a fraudulent scheme, by which Denbury has been underpaying CO_2 royalty owners in the Jackson Dome, including the Plaintiffs, and as part of their fraudulent scheme, the Defendants have been over-charging working interest owners for CO_2 used in the tertiary recovery oil fields operated by Denbury in Southwest Mississippi and Louisiana.

HN7[] Under Mississippi law, the elements of civil conspiracy are "(1) two or more persons or corporations; (2) an object to be accomplished; (3) a meeting of the minds on the object or course of action; (4) one or more unlawful overt acts; and (5) damages as the proximate result." *Gallagher Bassett Servs., Inc. v. Jeffcoat, 887 So. 2d 777, 786 (Miss. 2004)*. "Mississippi follows the rule of almost all jurisdictions in uniformly requiring that civil conspiracy claims be predicated upon an underlying tort that would be independently actionable." *Ward v. Life Investors Ins. Co. of Am., 383 F. Supp. 2d 882, 890 (S.D. Miss. 2005)* (citing *Wells v. Shelter Gen. Ins. Co., 217 F. Supp. 2d 744, 755 (S.D. Miss. 2002))*.[7]

Waggoner alleges the underlying tort of fraud. ***HN8***[] A Mississippi fraud claim has nine elements: "(1) a representation, (2) its falsity, (3) its materiality, (4) the speaker's knowledge of its falsity or ignorance of its truth, (5) his intent that it should be acted on by the hearer and in the manner reasonably contemplated, (6) the hearer's ignorance of its falsity, (7) his reliance on its truth, (8) his right to rely thereon, and (9) his consequent and proximate injury." *Martin v. Winfield, 455 So. 2d 762, 764 (Miss. 1984)*.

This Court, in an unpublished decision, affirmed a judgment as a matter of law on a Mississippi civil-conspiracy claim based on a fraud claim when the plaintiff failed to present any evidence of a false statement. *Aiken v. Rimkus Consulting Grp., Inc., 333 F. App'x 806, 811-12 (5th Cir. 2009)* (per curiam).[8] So too here: Waggoner's complaint contains no allegation of a false statement, much less any of the other elements of fraud.[9] Additionally, Waggoner points to no summary-judgment evidence that suggests Denbury made a fraudulent statement.

Waggoner does not contend that it properly pleaded the elements of fraud. Rather, it argues that instead of granting summary judgment, the court should have **[*740]** granted Waggoner leave to amend the complaint. Waggoner did not file a motion for leave to amend; it simply stated at the end of its response to Denbury's motion: "If the Court finds that the Plaintiffs have failed to plead particular elements of a claim (or that they have alleged facts without enough specificity), then the Plaintiffs would request the opportunity to amend their complaint." The district court never expressly addressed this request.

HN9[] "A party who neglects to ask the district court for leave to amend cannot expect to receive such a dispensation from the court of appeals." *United States ex rel Willard v. Humana Health Plan of Tex. Inc., 336 F.3d 375, 387 (5th Cir. 2003)*. A "bare request in an opposition to a motion to dismiss—without any indication of the particular grounds on which the amendment is sought—does not constitute **[**15]** a motion within the contemplation of *Rule 15(a)*." *Id.* (citations and internal quotation marks omitted).

In *Willard*, this court affirmed dismissal with prejudice in part on the grounds that the plaintiff's purported request for leave to amend did not satisfy the requirements of *Rule 15*. *Id.* The plaintiff, in his response to a motion to dismiss

---

[7] The Mississippi Supreme Court has not spoken on whether a civil-conspiracy claim can stand where no underlying **[**13]** tort is alleged. *See* *Wells, 217 F. Supp. 2d at 755* (surveying other states' laws).

[8] In *Aiken*, it was unclear what tort the conspiracy claim was based on, but the Court assumed it was fraud. *333 F. App'x at 812*.

[9] The complaint states:

> Defendants herein, have conspired to create a fraudulent scheme, by which Denbury **[**14]** has been underpaying CO_2 royalty owners in the Jackson Dome, including the Plaintiffs, and as part of their fraudulent scheme, the Defendants have been over-charging working interest owners for CO_2 used in the tertiary recovery oil fields operated by Denbury in Southwest Mississippi and Louisiana.

stated: "In any event, the only relief possibly available to it at this stage of the case is that relator replead. A court should not dismiss a plaintiff's complaint under Rule 9(b) unless the plaintiff has already been given the opportunity to amend." *Id.* The district court dismissed the complaint, stating the plaintiff "has not requested leave to amend." Id. at 386. Willard never filed a motion to reconsider "as part of which he could have moved to amend his complaint." Id. at 387. This Court affirmed for three reasons, one of which was that the statement did in the response did "not expressly request that [the plaintiff] be given leave to amend and does not provide any indication of the grounds on which such an amendment should be permitted." *Id.*

On the other hand, this Court has found sufficient under Rule 15 a statement in a response to a motion to dismiss that sought leave to "fix any **[**16]** infirmity" based on "information obtained during depositions of two former . . . [employees of the defendant] taken in a California state court proceeding." Cent. Laborers' Pension v. Integrated Elec. Servs. Inc., 497 F.3d 546, 555-56 (5th Cir. 2007). In *Central Labrorers' Pension*, the district court "did not explicitly address this request but implicitly rejected it by entering a judgment of dismissal with prejudice." *Id.* While "discoruag[ing] litigants from moving to amend in haphazard fashion," we construed the statement as a "proper motion to amend" because it "was not devoid of any indication of the grounds for amendment." Id. at 556.

We hold that the district court did not abuse its discretion in implicitly denying Waggoner's request for leave to amend. *See* Central Laborers' Pension, 497 F.3d at 555 ("The district court . . . implicitly rejected [the request to amend] by entering a judgment of dismissal with prejudice."). Ordinarily, "outright refusal to grant the leave without any justifying reason appearing for the denial is . . . [an] abuse of discretion and inconsistent with the spirit of the Federal Rules." Foman v. Davis, 371 U.S. 178, 181-82, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962). But here, unlike the request in Central Laborers' Pension, Waggoner's request for leave to amend was tacked on to the end of its response to Denbury's motion to dismiss and gave no indication of the grounds for amendment. **[**17]** This "bare request in an opposition to a motion to dismiss—without any indication of the particular grounds on which the amendment is sought—does not constitute a motion within the contemplation **[*741]** of Rule 15(a)," Willard, 336 F.3d at 387 (citations and internal quotation marks omitted). And, as in *Willard*, Waggoner did not file a motion to reconsider in which it could have requested leave to amend, attached a proposed amended complaint, or otherwise explained how it could allege a false statement. Waggoner compounds this error on appeal by neglecting to explain to this Court how it could or would allege a false statement were leave to amend granted. *See id*. ("[T]here is no indication in [the plaintiff's] briefs to this court that he will be able to allege the necessary 'who, what, when, where, and how' of the alleged fraud."). Thus, it appears leave to amend would be futile.

III. CONCLUSION

For the foregoing reasons, we AFFIRM.

Civil Procedure > ... > Discovery > Privileged Communications > General Overview

Evidence > Types of Evidence > Documentary Evidence > Affidavits

Civil Procedure > ... > Writs > Common Law Writs > Mandamus

Civil Procedure > ... > Discovery > Misconduct During Discovery > Motions to Compel

Evidence > Inferences & Presumptions > Inferences

HN1[ ] **Discovery, Privileged Communications**

Mandamus is proper when the trial court erroneously orders the disclosure of privileged information because the trial court's error cannot be corrected on appeal. Pleading and producing evidence establishing the existence of a privilege is the burden of the party seeking to avoid discovery. The party asserting the privilege must establish by testimony or affidavit a prima facie case for the privilege. The party need produce only the minimum quantum of evidence necessary to support a rational inference that the allegation of fact is true, and tender the documents to the trial court, at which point, the trial court must conduct an in camera inspection of the documents before deciding to compel production.

Civil Procedure > Discovery & Disclosure > Discovery

Evidence > ... > Preliminary Questions > Admissibility of Evidence > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

HN2[] **Discovery & Disclosure, Discovery**

A reviewing court may not substitute its judgment for that of the trial court regarding the resolution of fact issues or matters committed to the trial court's discretion. The scope of discovery and the admission of evidence is principally within the discretion of the trial court. The relator must establish that the trial court failed to reach the only reasonable conclusion on such matters. A less deferential standard applies to the trial court's determination of the legal principles governing the discovery.

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN3[] **Peer Review, Peer Review Statutes**

A medical peer review committee includes a committee of a health care entity including a hospital licensed under Tex. Health & Safety Code Ann. ch. 241 or 577, or the medical staff of a health care entity that: (1) operates under written bylaws approved by either the policy-making or governing board of the health care entity; and (2) is authorized to evaluate the quality of medical and health care services or the competence of physicians. *Tex. Occ. Code Ann. §§ 151.002(a)(8)*, *151.002(a)(5)*.

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN4[] **Peer Review, Peer Review Statutes**

All proceedings and records of a medical peer review committee are confidential, and all records of, determinations of, and communications to a committee are privileged and are not discoverable, with certain exceptions. *Tex. Occ. Code Ann. § 160.007(a)* The provision of confidentiality extends to the committee's initial and subsequent credentialing decisions, as well as to documents generated by a committee or prepared by or at the direction of the committee for committee purposes. The minutes and recommendations of the committee as well as the committee's inquiries about a physician to outside sources and responses thereto are also protected. However, simply passing a document through a peer review committee does not make it privileged. The privilege does not prevent a party from discovering from a nonprivileged source material that has been presented to the committee.

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN5[] **Peer Review, Peer Review Statutes**

Healthcare Law > Business Administration & Organization > Facility & Personnel Licensing > Revocation & Suspension

HN6[] **Business Administration & Organization, Hospital Privileges**

Tex. Occ. Code Ann. § 160.007's provisions expressly delineate and limit the circumstances under which the records of and communications to a peer review committee may or must be accessed. The committee may disclose its records and proceedings, and communications made by the committee to other medical peer review committees, appropriate governmental agencies, national accreditation bodies, the Texas Medical Board, and another state's board of registration or licensing of physicians. Tex. Occ. Code Ann. § 160.007(c). The committee may disclose to a physician under its review confidential information relevant to the matter without waiving confidentiality. Tex. Occ. Code Ann. § 160.007(d). The committee must provide the physician with a written copy of its recommendation and final decision for certain actions, including those that could result in censure, suspension, restriction, limitation, revocation, or denial of membership or privileges in a health care entity. Tex. Occ. Code Ann. § 160.007(d).

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

Civil Procedure > Discovery & Disclosure > Discovery > Subpoenas

HN7[] **Discovery, Privileged Communications**

Certain parties are entitled to use the confidential information from a peer review committee in their defense or in rebuttal to such a defense. Tex. Occ. Code Ann. § 160.007(f). Otherwise, the records and determinations of a medical peer review committee, as well as communications to the committee, are not subject to subpoena or discovery and are not admissible as evidence in any civil judicial or administrative proceeding without waiver of the privilege of confidentiality executed in writing by the committee. Tex. Occ. Code Ann. § 160.007(e).

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN8[] **Regulated Practices, Trade Practices & Unfair Competition**

Under certain circumstances, the information from a peer review committee may not be confidential, in which case it would not be subject to a privilege. For example, the records made or maintained in the regular course of business by a hospital or medical organization are not covered by Tex. Occ. Code Ann. § 160.007 and therefore are not confidential under § 160.007. Tex. Health & Safety Code Ann. § 161.032(f). In addition, Tex. Occ. Code Ann. § 160.007(b) provides a limited exception to confidentiality for proceedings, records, or communications that are relevant to an anticompetitive action.

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN9[] **Business Administration & Organization, Covenants not to Compete**

See Tex. Occ. Code Ann. § 160.007(b).

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

HN10[] **Business Administration & Organization, Peer Review**

The peer review privilege protects the products of the peer review process: reports, records -- including those produced for the committee's review as part of the investigative review process, and deliberations.

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

HN11[] **Business Administration & Organization, Peer Review**

With one exception set forth in Tex. Occ. Code Ann. § 151.002(a)(8)(B), the medical peer review committee privilege affords confidential status to the records of, proceedings of, and communications to a medical peer review committee regardless of whether the individual record, proceeding, or communication relates to a peer review action. Tex. Occ. Code Ann. § 151.002(a)(7).

Civil Procedure > Appeals > Standards of Review > De Novo Review

Governments > Legislation > Interpretation

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN12[] **Standards of Review, De Novo Review**

Statutory construction is a question of law that is reviewed de novo. The appellate court's objective is to determine and give effect to the legislature's intent, and the truest manifestation of what lawmakers intended is what they enacted. Proper construction requires reading the statute as a whole rather than interpreting provisions in isolation. Courts should not give an undefined statutory term a meaning out of harmony or inconsistent with other provisions, although it might be susceptible of such a construction if standing alone. The court presumes that the legislature chooses a statute's language with care, and the court will not ignore the statute's use of a term that carries a particular meaning.

Civil Procedure > ... > Discovery > Privileged Communications > General Overview

HN13[] **Discovery, Privileged Communications**

Privileges are not favored in the law and are strictly construed.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

Civil Rights Law > General Overview

HN14[] **Regulated Practices, Trade Practices & Unfair Competition**

For purposes of the anticompetitive action exception to the medical peer review committee privilege, the legislature intended the term "anticompetitive" in *Tex. Occ. Code Ann. § 160.007* to denote an overall substantially adverse effect on competition, rather than the existence of some negative effects. However, the term "anticompetitive action" is not synonymous with "antitrust action." Although the term anticompetitive describes the type of conduct or circumstances generally targeted by antitrust laws, the term itself is broader because the law of antitrust does not encompass all conduct that could substantially lessen competition in a particular market. For example, certain conduct—regardless of its overall impact on competition—is immune from ***antitrust law*** under the state action doctrine, the exemption for political activity, or the exemptions, both implicit and explicit, for labor unions. The terms anticompetitive and antitrust are therefore not inherently coextensive, and the court cannot ignore the legislature's use of the broader term, particularly in juxtaposition to *§ 160.007(b)*'s specificity regarding its application to civil rights proceedings.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Evidence > Relevance > Relevant Evidence

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN15[] **Regulated Practices, Trade Practices & Unfair Competition**

A litigant may not successfully rely on *Tex. Occ. Code Ann. § 160.007(b)* simply by adding a gratuitous allegation that the conduct at issue is anticompetitive. *Section 160.007(b)* requires a preliminary finding that a proceeding or record of a medical peer review committee or a communication made to the committee is relevant to an anticompetitive action, and provides that the proceeding, record, or communication is not confidential to the extent it is considered relevant. Relevance cannot be determined in isolation of the elements of an asserted cause of action.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

Civil Rights Law > Protection of Rights > Section 1983 Actions > General Overview

Governments > Legislation > Interpretation

HN16[] **Regulated Practices, Trade Practices & Unfair Competition**

The court has equated the term "action" with "suit," which is a demand of one's rights in court. For purposes of the anticompetitive action exception to the medical peer review committee privilege under *Tex. Occ. Code Ann. § 160.007(b)*, had the legislature intended the focus to be on the defendant's conduct apart from any asserted cause of action, it would have been more natural to say "an anticompetitive act" or "anticompetitive conduct." But the legislature chose the term "action," which is a well-established legal term of art synonymous with lawsuit. This meaning also better fits the parallelism of the phrases "anticompetitive action" and "a civil rights proceeding" in *Tex. Occ. Code Ann. § 160.007(b)*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Evidence > Relevance > Relevant Evidence

Governments > Legislation > Interpretation

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN17[] Regulated Practices, Trade Practices & Unfair Competition

For purposes of the anticompetitive action exception to the medical peer review committee privilege under *Tex. Occ. Code Ann. § 160.007(b)*, the reference to relevance confirms that the legislature intended the term action to refer to a "civil or criminal judicial proceeding." *Tex. R. Evid. 401* provides that evidence is relevant if it has any tendency to make a fact more or less probable than it would be without the evidence, and if that fact is of consequence in determining the action. A purely voluntary showing that the defendant's conduct is anticompetitive cannot constitute a fact of consequence in a lawsuit—the limited waiver of confidentiality for proceedings, records, and communications "relevant to an anticompetitive action" under *Tex. Occ. Code Ann. § 160.007(b)* can only apply if the plaintiff asserts a cause of action that requires proof of anticompetitive conduct or effects.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

Governments > Legislation > Interpretation

HN18[] Regulated Practices, Trade Practices & Unfair Competition

The exception to the medical peer review committee privilege for anticompetitive actions under *Tex. Occ. Code Ann. § 160.007(b)* applies when the plaintiff asserts a cause of action that requires proof that the conduct at issue has a tendency to reduce or eliminate competition that is not offset by countervailing procompetitive justifications.

Civil Procedure > ... > Discovery > Privileged Communications > General Overview

Civil Procedure > Discovery & Disclosure > Discovery > Relevance of Discoverable Information

HN19[] Discovery, Privileged Communications

Determinations of potential relevancy or privilege typically do not require a litigant to produce evidence on the merits of his claim—as opposed to the merits of the privilege. It is counter to the notion that affording parties full discovery promotes the fair resolution of disputes by the judiciary, to condition access to documents that could substantiate a plaintiff's claim on the plaintiff's ability to substantiate his claim without the documents' aid.

Civil Procedure > Sanctions > Baseless Filings > Bad Faith Motions

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

Civil Procedure > Discovery & Disclosure > Discovery > Protective Orders

Civil Procedure > Discovery & Disclosure > Discovery > Undue Burdens in Discovery

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

HN20[] Baseless Filings, Bad Faith Motions

By permitting defendants to recover costs incurred from defending against frivolous or bad faith pleadings, *Tex. Occ. Code Ann. § 160.008(c)* discourages the addition of groundless allegations of injury to competition for purposes of the exception to the medical peer review committee privilege. Second, nothing in *Tex. Occ. Code Ann. § 160.007* prevents defendants from seeking, as they do in all civil cases, to limit discovery on the grounds that the discovery sought is unreasonably cumulative or duplicative, or is obtainable from some other source that is more convenient, less burdensome, or less expensive. *Tex. R. Civ. P. 192.4(a)*. Defendants may also assert that the burden or expense of the proposed discovery outweighs its likely benefit, taking into account the needs of the case the importance of the issues at stake in the litigation, and the importance of the proposed discovery in resolving the issues. *Tex. R. Civ. P. 192.4(b)*. Defendants may also seek protective orders to protect themselves from undue burden, unnecessary expense, harassment, annoyance, or invasion of personal, constitutional, or property rights. *Tex. R. Civ. P. 192.6(b)*.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > Discovery & Disclosure > Discovery > Relevance of Discoverable Information

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN22[] **Regulated Practices, Trade Practices & Unfair Competition**

For purposes of the exception to the medical peer review committee privilege for anticompetitive actions, because *Tex. Occ. Code Ann. § 160.007(b)* provides that information is not confidential to the extent it is considered relevant, the exception's scope is still narrower than the otherwise applicable scope of discovery, which permits discovery of information that appears reasonably calculated to lead to the discovery of admissible evidence. *Tex. R. Civ. P. 192.3(a)*. Defendants may further limit the scope of discovery through the judicious use of special exceptions, which are the appropriate vehicle by which an adverse party may force clarification of vague pleadings, thereby narrowing the range of facts that will be of consequence in the action.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > Pleading & Practice > Pleadings > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

Governments > Courts > Judges

HN23[] Regulated Practices, Trade Practices & Unfair Competition

For purposes of the exception to the medical peer review committee privilege for anticompetitive actions, judges are to determine a *Tex. Occ. Code Ann. § 160.007(b)* "preliminary finding" on the basis of the plaintiff's pleadings.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

Governments > Legislation > Interpretation

Governments > Courts > Judicial Precedent

HN24[] Trade Practices & Unfair Competition, State Regulation

The Supreme Court of Texas construes Texas Free Enterprise and Antitrust Act of 1983, *Tex. Bus. & Com. Code Ann. § 15.01 et seq.*, in harmony with federal antitrust caselaw to promote competition for consumers' benefit. *Tex. Bus. & Com. Code Ann. § 15.04*. Because Texas caselaw is limited, the court relies heavily on the jurisprudence of the federal courts.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN25[] Regulated Practices, Monopolies & Monopolization

The Texas Free Enterprise and Antitrust Act of 1983 (TFEAA), *Tex. Bus. & Com. Code Ann. § 15.01 et seq.*, declares that every contract, combination, or conspiracy in restraint of trade or commerce is unlawful, and that it is unlawful for any person to monopolize, attempt to monopolize, or conspire to monopolize any part of trade or commerce. *Tex. Bus. & Com. Code Ann. § 15.05(a)-(b)*. However, the TFEAA does not operate as a qui tam provision, but rather limits the ability to bring suit under the TFEAA to persons whose business or property has been injured by reason of any conduct declared unlawful in *Tex. Bus. & Com. Code Ann. § 15.05(a)*, *(b)*, or *(c)*. *Tex. Bus. & Com. Code Ann. § 15.21(a)(1)*. Thus, courts have held that standing to pursue an antitrust suit exists only if a plaintiff shows (1) injury-in-fact, an injury to the plaintiff proximately caused by the defendant's conduct; (2) antitrust injury; and (3) proper plaintiff status, which assures that other parties are not better situated to bring suit.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN26[] Regulated Practices, Monopolies & Monopolization

On its own, the elimination of a single competitor does not constitute proof of an anticompetitive effect for every market and context. Claims of improper restraint of trade require a plaintiff to plead a reduction of competition in the market in general and not mere injury to their own positions as competitors in the market. However, the United States Supreme Court has forbidden as a matter of law, a defense based upon a claim that only one small firm, not competition itself, had suffered injury, because monopoly can as surely thrive by the elimination of such small businessmen, one at a time, as it can by driving them out in large groups.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > Trials > General Overview

HN27[] **Regulated Practices, Trade Practices & Unfair Competition**

In order to successfully allege injury to competition, a claimant may not merely recite the bare legal conclusion that competition has been restrained unreasonably. At a minimum, the claimant must sketch the outline of the antitrust violation with allegations of supporting factual detail. Whether the practice constitutes an improper restraint of trade will depend upon whether the plaintiff's allegations suggest a market in which the removal of a single competitor from the pool of competing sellers would adversely and unreasonably affect overall competitive conditions. Under the rule of reason, courts consider a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. As such, the adequacy of a plaintiff's contentions regarding the effect on competition is typically resolved after discovery, either on summary judgment or after trial.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN28[] **Actual Monopolization, Claims**

A successful claim of monopoly requires proof of (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. The term "relevant market" encompasses notions of geography as well as product use, quality, and description. The geographic market extends to the area of effective competition where buyers can turn for alternate sources of supply.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN29[] **Attempts to Monopolize, Elements**

Demonstrating attempted monopolization requires proof (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Antitrust & Trade Law > Regulated Practices > Market Definition

HN30[] **Regulated Practices, Monopolies & Monopolization**

Under either a claim for monopoly or attempted monopolization, it is necessary to consider the relevant market and the defendant's ability to lessen or destroy competition in that market. However, the disposition of the question of a dangerous probability of achieving monopoly power is typically one that is not resolved at the pleading stage unless it is clear on the face of the complaint that the dangerous probability standard cannot be met as a matter of law. Defining the relevant market is a factual inquiry ordinarily reserved for the jury.

Governments > Legislation > Enactment

Governments > Legislation > Interpretation

HN31[] Legislation, Enactment

To the extent possible, the court will construe different provisions in a way that harmonizes rather than conflicts. *Tex. Gov't Code Ann. §§ 311.025*, *311.026(a)*. When the provisions are irreconcilable, the general rule is that the terms of the later-enacted statute should control. *Tex. Gov't Code Ann. § 311.025(a)*. However, conflicts between general and specific provisions favor the specific, and when the literal terms of the two provisions cannot both be true, the terms of the specific provision ordinarily will prevail. *Tex. Gov't Code Ann. § 311.026(b)*. The court will construe the general provision as controlling only when the manifest intent is that the general provision will prevail and the general provision is also the later-enacted statute. *Tex. Gov't Code Ann. § 311.026(b)*.

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

HN32[] Business Administration & Organization, Peer Review

Tex. Health & Safety Code Ann. § 161.032 broadly defines a "medical committee" to include any committee, including a joint committee of certain types of entities, including a hospital or a medical organization. Medical committees may be appointed ad hoc to conduct a specific investigation, or established under the bylaws or rules of the organization or institution.

Civil Procedure > Discovery & Disclosure > Discovery > Subpoenas

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN33[] Discovery, Subpoenas

The records and proceedings of a medical committee are governed by *Tex. Health & Safety Code Ann. § 161.032*. With the exception of records maintained in the regular course of business by a hospital or medical organization, medical committees and their members may use the committee's records and proceedings only in the exercise of proper committee functions. Subject to the same exception, the records and proceedings of a medical committee are confidential and are not subject to court subpoena. *Tex. Health & Safety Code Ann. § 161.032(a)*.

Governments > Legislation > Interpretation

Healthcare Law > Business Administration & Organization > Peer Review > Organizations

HN34[] Legislation, Interpretation

Tex. Health & Safety Code Ann. § 161.032 suggests that medical committees are at least potentially distinct from medical peer review committees. However, the definitions of the two committees contain significant overlap. Provided that the other statutory requirements are met, the definition of a medical peer review committee includes committees of a health care entity, the governing board of a health care entity, or the medical staff of a health care entity. But any entity that provides or pays for medical care or health services, and follows a formal peer review process to further quality medical care or health care will be considered a health care entity.

Healthcare Law > Business Administration & Organization > Peer Review > Organizations

HN35[] **Peer Review, Organizations**

Although the committees of some health care entities may not be medical committees, every committee of every entity listed in the definition of a medical committee that follows a formal peer review process to further quality medical care or health care under *Tex. Occ. Code Ann. § 151.002(a)(5)(B)(ii)* will be considered a medical peer review committee—unless the committee does not operate under written bylaws approved by the policy-making board or the governing board of the health care entity. By extension, no medical committee that satisfies these two additional provisions necessary to be deemed a medical peer review committee can credibly claim that its records and proceedings are not governed by *Tex. Occ. Code Ann. § 160.007*.

Civil Procedure > Discovery & Disclosure > Discovery > Subpoenas

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

HN36[] **Discovery, Subpoenas**

See *Tex. Health & Safety Code Ann. § 161.032(a)*.

Civil Procedure > ... > Discovery > Privileged Communications > General Overview

HN37[] **Discovery, Privileged Communications**

For purposes of discovery, a record or proceeding is either confidential or not; it cannot be both.

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

HN38[] **Peer Review, Peer Review Statutes**

The records and proceedings of a dual medical committee and medical peer review committee do not enjoy any greater confidentiality under *Tex. Health & Safety Code § 161.032(a)* than they do under *Tex. Occ. Code Ann. § 160.007(b)*.

Opinion

[*695] ON PETITION FOR WRIT OF MANDAMUS

A decade ago, we observed: "While the medical privileges are important in promoting free discussion in the evaluation of health care professionals and health services, the right to evidence is also important, and therefore privileges must be strictly construed."[1] In this original proceeding—involving a heart surgeon who claims his former hospital retaliated against him for joining a competing hospital—we must determine **[**2]** whether either the medical committee privilege or the medical peer review committee privilege protects certain documents from disclosure. The trial court concluded the documents sought were discoverable, and the court of appeals denied relief, prompting the parties resisting production to seek mandamus relief here. We hold that some of the documents are protected, and we conditionally grant mandamus relief as to them. But we are unconvinced that the remainder of the documents are confidential under either privilege.

BACKGROUND

Plaintiffs Miguel A. Gomez, III, M.D. and Miguel A. Gomez, M.D., P.A. (collectively, "Dr. Gomez") filed suit against defendants Memorial Hermann Hospital System,[2] Memorial Hermann Physician Network, Michael P. Macris, M.D., Michael P. Macris, M.D., P.A.,[3] and Keith Alexander[4] (collectively, "defendants" or "Memorial Hermann") on September 17, 2012. Dr. Gomez's original petition asserted causes of action for business disparagement, defamation, tortious interference with prospective business relations, and improper restraint of trade under the Texas Free Enterprise and Antitrust Act of 1983 ("TFEAA").

Dr. Gomez is a cardiothoracic surgeon who practiced at Memorial Hermann Memorial City Medical Center ("Memorial City")[5] from 1998 until 2012 when he resigned his privileges with Memorial City.[6] During his years of practice at Memorial City, Dr. Gomez built a reputation in the "West Houston and Katy community" for "quality patient care, technical excellence, and outstanding professionalism in heart and general surgery."

---

[1] *In re Living Ctrs. of Tex., Inc., 175 S.W.3d 253, 258 (Tex. 2005)*.

[2] Memorial Hermann Hospital System is a business entity organized under **[**3]** the laws of the State of Texas that controls and manages a number of hospitals, out-patient facilities, and other health care service centers throughout the Houston Metropolitan area, including Memorial Hermann Memorial City Medical Center.

[3] Michael P. Macris, M.D., P.A. is a professional association organized under the laws of Texas, and Michael P. Macris, M.D. is its principal officer.

[4] Mr. Alexander is the Chief Executive Officer of Memorial Hermann Memorial City Medical Center.

[5] Memorial City is one of Memorial Hermann Hospital System's medical campuses.

[6] The facts described in this section are drawn from allegations in Dr. Gomez's live petition and attached exhibits. They are presented in the light most favorable to the trial court's finding.

Dr. Gomez's "skills and specialized **[**4]** abilities" for patients who require heart and general surgeries range from "'basic' open heart surgery to advanced robotic-assisted surgical procedures." Robotic heart surgery "eliminates the need to mechanically crack open a patient's chest." Robotic heart surgery always involves significantly less recovery time than its non-robotic surgical analogue, and depending on the particular **[*696]** procedure, can spare the patient up to six days of recovery time in the hospital. Robotic heart surgery therefore has the potential to save an individual patient $50,000 or more in medical expenses.

In the Houston medical community, Dr. Gomez "pioneer[ed] implementation of 'off-pump' surgery and robotic-assisted heart surgeries." Memorial City heavily promoted robotic heart surgery as well as Dr. Gomez himself—the only heart surgeon at Memorial City who was capable of performing robotic heart surgeries. The hospital invested in a million dollar "DA VINCI" machine, and spent significant advertising dollars promoting the robotic-assisted surgical procedures.

Referrals from other physicians are extremely important to surgeons and specialists. The primary means for a physician "to build his practice is . . . actually going **[**5]** out on his own to doctor's offices, meeting the doctors, [and] developing relationships" in order to get referrals from physicians. The success of a surgeon's practice depends on his ability to attract referrals, and cardiologists are a cardiovascular surgeon's primary referral source. In turn, the surgeon's decision to perform his surgeries at one hospital over another directly impacts the profitability of the hospitals.

In 2009, another hospital—Methodist West Houston Hospital—was in the process of opening, which caused a change in the atmosphere at Memorial City. There was a growing fear at Memorial City that staff would leave to go to Methodist West. Around this time, the then-CEO of Memorial City and the Chief of Staff[7] met with at least one of Memorial City's physicians, Dr. Jo Pollack, in order to express disapproval of Dr. Pollack's pattern of referring her patients to non-affiliated facilities and physicians. According to Dr. Pollack's affidavit, she was told she would be "committing political suicide" and her practice "could be in jeopardy" if she did not refer her patients to the Memorial City affiliated medical oncologists, radiation oncologists and imaging. Memorial City **[**6]** also began holding "Town Hall" meetings in order to "gain information about who wanted to leave and to attempt to persuade people to stay at Memorial City."

Of the heart surgeons who practiced at Memorial City, Dr. Gomez was the first to agree to practice at Methodist West. Dr. Gomez asserts that, because of his complaints about staffing and equipment dysfunctions as well as Memorial City's priorities regarding patient care, Memorial City knew he would perform his surgeries at Methodist West in the future. Consequently, despite having invested heavily in promoting robotic-assisted heart surgery, Memorial City would no longer be the sole Houston hospital offering robotic-assisted heart surgeries. Memorial City faced sharing, or worse, losing that distinction to Methodist West.

When the defendants learned that Dr. Gomez was willing to associate himself with Methodist West, the defendants began conducting a "whisper campaign" against Dr. Gomez. According to Dr. Gomez, the purpose of the campaign was "to cast doubt **[**7]** on robotic heart surgery procedures," throughout the entire city of Houston and "evaporate" the "robotic heart surgery market." If the campaign was successful, it would inoculate Memorial City from the advantage Methodist West would otherwise gain from the ability to offer the superior procedure.

[*697] Rumors began spreading across the Memorial City campus that Dr. Gomez was "having problems" with his mortality rate, and the marketing director at Memorial City did an "about-face" regarding Dr. Gomez. Portia Willis, who was then employed in Memorial City's marketing department, had scheduled speaking engagements and other promotional engagements for Dr. Gomez on behalf of Memorial City. But amidst the rumors, Ms. Willis was told not to push forward with any type of marketing or promotion of Dr. Gomez indefinitely. Although the reasons for the marketing hiatus were not explained, Ms. Willis had the impression that the move was related to the rumors that Dr. Gomez was "a crappy surgeon." By this point, rumors had become "rampant" that Dr. Gomez "wasn't the surgeon

---

[7] At the time of the meeting, Dave Jones was the CEO of Memorial City and Dr. Joel Abramowitz was the Chief of Staff. Shortly after the meeting took place, Mr. Alexander became CEO.

that [the Hospital workers] thought he was," and the hospital's employees began to wonder how much longer Dr. Gomez's practice could **[**8]** endure.

At a "Cardiovascular and Thoracic CPC" meeting on November 1, 2011, Dr. Macris displayed "false data and statements regarding Dr. Gomez's practice and mortality rates of his patients to an entire room filled with Dr. Gomez's professional colleagues, intending that it be thereafter widely disseminated." The presentation "create[d] the appearance that patients were more likely to die in Dr. Gomez's care." Dr. Macris had "manipulated" the presented data, eschewing generally accepted methodologies for proper peer review comparison as well as basic scientific principles. Although the "true" peer review committee at Memorial Hermann[8] intervened and ultimately determined Dr. Macris's comparative data could not be relied upon for any legitimate purpose, the defendants continued to disseminate the manipulated data within the medical community. This spread the false impression of Dr. Gomez's practice. After Dr. Gomez's abilities were assessed in the cardiology section meeting, his "referral patterns were ruined," and he lost his status as one of the most sought-after surgeons.

At a January 2012 meeting, Mr. Alexander publicly ridiculed Dr. Gomez's skills as a heart surgeon. Mr. Alexander let the physicians, nurses, and administrators in the room "know that he had targeted Dr. Gomez because of his affiliation with Methodist West." Mr. Alexander "made clear . . . he would not tolerate physicians taking business to Methodist West." Destroying Dr. Gomez's reputation "served as a preemptive warning" to other physicians considering an affiliation with Methodist West.

Dr. Gomez brought suit on the claims described above and moved to compel the production of certain documents. Memorial Hermann asserted the documents were protected from discovery under the medical committee privilege and the medical peer review committee privilege. Following an in camera inspection, the trial court ordered Memorial Hermann to produce certain documents. After the court of appeals denied Memorial Hermann's petition for writ of mandamus,[9] Memorial Hermann sought mandamus relief in this Court.

DISCUSSION

I. Standard of review

HN1[] "Mandamus is proper when the trial court erroneously orders the disclo **[*698]** sure of privileged information because the trial court's error cannot be **[**10]** corrected on appeal."[10] Pleading and producing evidence establishing the existence of a privilege is the burden of the party seeking to avoid discovery.[11] The party asserting the privilege must establish by testimony or affidavit a prima facie case for the privilege.[12] The party need produce "only the 'minimum quantum of evidence necessary to support a rational inference that the allegation of

---

[8] Dr. Gomez disputes whether the committee to which Dr. Macris presented the data falls within the definition of a medical **[**9]** peer review committee.

[9] *In re Mem'l Hermann Hosp. Sys., 2014 Tex. App. LEXIS 2424, 2014 WL 866069 (Tex. App.—Houston [1st Dist.] March 4, 2014, orig. proceeding)*.

[12] *In re Living Ctrs. of Tex., Inc., 175 S.W.3d at 261*; *Lowry, 802 S.W.2d at 671*.

fact is true,'" and tender the documents to the trial court, at which point, "the trial court must conduct an in camera inspection of [the] documents before deciding to compel production."[13]

HN2[] A reviewing court may not substitute its judgment for that of the trial court regarding "the resolution of fact issues or matters committed to the trial court's discretion."[14] "The scope of discovery and the admission of evidence is principally within the discretion of the trial court."[15] The relator must establish that the trial court failed to reach the only reasonable conclusion on such matters.[16] A less deferential standard applies to the trial court's determination of the legal principles governing the discovery, however.[17]

II. The trial court did not abuse its discretion in holding that the "anticompetitive action" exception to the medical peer review committee privilege applied.

A. Under certain circumstances, the medical peer review committee privilege limits the accessibility of the records of, proceedings of, and communications to a medical peer review committee.

HN3[] A medical peer review committee includes "a committee of a health care entity [including a hospital licensed under Chapter 241 or 577 of the Health and Safety Code] . . . or the medical staff of a health care entity" that (1) "operates under written bylaws" approved by either the policy-making or governing board of the health care entity, and (2) "is authorized to evaluate the quality of medical and health care services or the competence of physicians." **[**12]** [18]

HN4[] "All proceedings and records of a medical peer review committee are confidential, and all records of, determinations **[*699]** of, and communications to a committee are privileged and are not discoverable, with certain exceptions. . . ."[19] The provision of confidentiality extends to the committee's initial and subsequent credentialing decisions,[20] as well as to documents "generated" by a committee or "prepared by or at the direction of the committee for committee purposes."[21] The minutes and recommendations of the committee as well as the committee's inquiries about a physician to outside sources and responses thereto are also protected.[22] However,

Moye, 893 S.W.2d 585, 589 (Tex. App.—Dallas 1994, orig. proceeding)* ("When a trial court's interpretation of discovery law is at issue, we treat the trial court's order as a legal conclusion. We review the legal conclusion with limited deference to the trial court.").

[18] *Tex. Occ. Code § 151.002(a)(8)*; *see also id.* *§ 151.002(a)(5)* (defining "Health care entity").

[19] *In re Univ. of Tex. Health Ctr. at Tyler, 33 S.W.3d 822, 825 (Tex. 2000)*; *see also* ***HN5***[] *Tex. Occ. Code § 160.007(a)* ("Except as otherwise provided by this subtitle, each proceeding or record of a medical peer review committee is confidential, and any communication made to a medical peer review committee is privileged.").

[20] *Mem'l Hosp.—The Woodlands v. McCown, 927 S.W.2d 1, 3-5 (Tex. 1996)*.

[21] *Id. at 10*; *see also* *In re Living Ctrs. of Tex., Inc., 175 S.W.3d at 257*.

"simply passing a document through a peer review committee does not make it privileged."[23] The privilege does not prevent a party from discovering from a nonprivileged source material that has been presented to the committee.[24]

HN6[] Texas Occupations Code section 160.007's provisions **[**13]** "expressly delineate and limit the circumstances under which the records of and communications to a peer review committee may [or must] be accessed."[25] The committee may disclose its records and proceedings, and communications made by the committee to other medical peer review committees, appropriate governmental agencies, national accreditation bodies, the Texas Medical Board, and another state's board of registration or licensing of physicians.[26] The committee may disclose to a physician under its review confidential information relevant to the matter without waiving confidentiality.[27] The committee must provide the physician with a written copy of its recommendation and final decision for certain actions, including those that could result in "censure, suspension, restriction, limitation, revocation, or denial of membership or privileges in a health care entity."[28]HN7[] Certain parties are entitled to use the confidential information in their defense or in rebuttal to such a defense.[29] Otherwise, the records and determinations of a medical peer review committee, as well as communications to the committee, are "not subject to subpoena or discovery and [are] not admissible as evidence in any civil **[**14]** judicial or administrative proceeding without waiver of the privilege of confidentiality executed in writing by the committee."[30]

However, HN8[] under certain circumstances, the information may not be confidential, in which case it would not be subject to a privilege. For example, the "records made or maintained in the regular course of business by a hospital . . . [or] medical organization" are not covered by section 160.007 and therefore are not confidential **[*700]** under that section.[31] In addition, section 160.007(b) provides a limited exception to confidentiality for proceedings, records, or communications that are relevant to an anticompetitive action. HN9[] The anticompetitive action exception provides in full:

> If a judge makes a preliminary finding that a proceeding or record of a medical peer review committee or a communication made to the committee is relevant to an anticompetitive action, or to a civil rights proceeding brought under 42 U.S.C. Section 1983, the proceeding, record, or communication is not confidential to the extent it is considered relevant.[32]

The parties dispute the applicability of this exception.

[32] *Tex. Occ. Code § 160.007(b)*.

B. The committees at issue are medical peer review committees.

As an initial matter, Dr. Gomez disputes that Memorial Hermann proved the relevant committees are medical peer review committees. The trial court found "that the anticompetitive exception to the medical peer review committee privilege applies," which inherently implies a finding that the relevant committees were medical peer review committees. Dr. Gomez argues that Memorial Hermann failed to establish that the investigations were performed for the purpose of quality assessment, or that the committee was established by bylaws.

HN11[] With one exception,[33] the medical peer review committee privilege affords confidential status to the records of, proceedings of, and communications to a medical peer review committee regardless of whether the individual record, proceeding, or communication relates to a peer review action.[34] Memorial Hermann submitted the committees' **[**16]** bylaws as well as affidavits stating that the committees engaged in peer review. Although Dr. Gomez points us to evidence to the contrary, the trial court had sufficient evidence before it to make a reasonable finding that the committees are medical peer review committees. We will not disturb that finding.

C. An "anticompetitive action" is one that requires proof of a net negative impact on competition within a defined market.

The trial court found that the documents at issue "are relevant to an anticompetitive action." Before we can resolve the parties' dispute regarding the correctness of this finding, we must first determine the meaning of the statutory phrase "relevant to an anticompetitive action."[35]

HN12[] Statutory construction is a question of law we review de novo.[36] Our objective is to determine and give effect to the Legislature's intent,[37] and "the truest manifestation of what lawmakers intended **[*701]** is what they enacted."[38] Proper construction requires reading the statute as a whole rather than interpreting provisions in isolation.[39] "[C]ourts should not give an undefined statutory term **[**17]** a meaning out of harmony or inconsistent with other provisions, although it might be susceptible of such a construction if standing alone."[40] "We presume that the Legislature chooses a statute's language with care," and we will not ignore the statute's use of a term that carries a "particular meaning."[41] ***HN13***[] "Privileges are not favored in the law and are strictly construed."[42]

Neither section 160.007 nor any other peer review committee privilege that incorporates the phrase "anticompetitive action" defines the term.[43] Black's Law Dictionary defines "anticompetitive" as "[h]aving a tendency to reduce or eliminate competition" in contrast to the term procompetitive.[44] Procompetitive is in turn defined as "[i]ncreasing, encouraging, or preserving competition."[45] Competition itself is defined as "[t]he struggle for commercial advantage; the effort or action of two or more commercial interests to obtain the same business from third parties."[46] The dictionary also notes that the term anticompetitive "describes the type of conduct or circumstances generally targeted by antitrust laws,"[47] although the statement is "not purely definitional."[48]

This framework accurately maps out the meaning afforded the term "anticompetitive" in court decisions in the antitrust context. As noted by the Supreme Court of the United States, to restrain competition is the "very essence" of every agreement and regulation of trade.[49] Therefore, regarding restraints of trade, "[t]he true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition."[50] As **[*702]** such, an "abbreviated or 'quick-look' analysis" is appropriate only when "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets."[51] The goal of judicial scrutiny of restraints on trade is to "distinguish[] between restraints with anticompetitive effect that are **[**19]** harmful to the consumer and restraints stimulating competition that are in the consumer's best interest."[52]

Judicial scrutiny in other areas of ***antitrust law*** confirms that the antitrust laws were designed as a "consumer welfare prescription" that requires consideration of both anticompetitive and procompetitive effects.[53] Thus, proof that a firm's dominant position is the "consequence of a superior product, business acumen, or historic accident"—

[53] Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Ok., 468 U.S. 85, 107, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) (internal quotation marks omitted). *See also* Tex. Bus. & Comm. Code § 15.04 ("The purpose of this Act is to maintain and promote economic competition in trade and commerce occurring wholly or partly within the State of Texas and to provide the benefits of that competition to consumers in the state.").

circumstances that either benefit the consumer or are outside the firm's control—will **[**20]** defeat a claim of monopoly.[54] Claims of attempted monopolization require the further showing that the defendant "pose[s] a danger of monopolization," because judging unilateral conduct absent actual potential to achieve a monopoly would "risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur."[55] Similarly, in scrutinizing a proposed merger, the "economic efficiencies produced by the merger must be weighed against anticompetitive consequences in the final determination whether the *net effect* on competition is substantially adverse."[56] Ultimately, the "use of the word 'competition' [is] a shorthand for the invocation of the benefits of a competitive market,"[57] and ***antitrust law*** acknowledges that "it is sometimes difficult to distinguish robust competition from conduct with long-run anticompetitive effects."[58]

We have no trouble holding that ***HN14***[] the Legislature intended the term "anticompetitive" in *section 160.007* to denote an overall substantially adverse effect on competition, rather than the existence of some negative effects. However, we reject Memorial Hermann's characterization of the term "anticompetitive action" as synonymous with "antitrust action." Although we agree that the term anticompetitive "describes the type of conduct or circumstances **[*703]** *generally* targeted by antitrust laws,"[59] the term itself is broader because the law of antitrust does not encompass *all* conduct that could substantially lessen competition in a particular market. For example, certain conduct—regardless of its overall impact on competition—is immune from ***antitrust law*** under the state action doctrine,[60] the exemption for political activity,[61] or the exemptions, both implicit and explicit, for labor unions.[62] The terms anticompetitive and antitrust are therefore not inherently coextensive, and we cannot ignore the Legislature's

Ed. 2d 521 (1996)* ("[T]he implicit exemption recognizes that, to give effect to federal labor laws and policies and to allow meaningful collective bargaining to take place, some restraints on competition imposed through the bargaining process must be shielded from antitrust sanctions."); *Connell Constr. Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 621-22, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)* (holding that certain federal statutes "declare that labor unions are not combinations or conspiracies in restraint of trade, and exempt specific union activities, including secondary picketing and boycotts, from the operation of the antitrust laws").

use of the broader term, particularly in juxtaposition to *section 160.007(b)*'s specificity regarding its application **[**22]** to civil rights proceedings.[63]

However, this does not mean that***HN15***[] a litigant may successfully rely on *subsection (b)* simply by adding a gratuitous allegation that the conduct at issue is anticompetitive. *Section 160.007(b)* requires a "preliminary finding that a proceeding or record of a medical peer review committee or a communication made to the committee *is relevant to an anticompetitive action*" and provides that "the proceeding, record, or communication is not confidential *to the extent it is considered relevant*."[64] Relevance cannot be determined in isolation of the elements of an **[**24]** asserted cause of action.

Dr. Gomez's contrary construction treats the terms action and conduct as synonymous,[65] but as we have previously noted, **[*704]** ***HN16***[] this Court has "equated 'action' with 'suit."[66] Although we have not previously discussed the meaning of the word action in this particular context, we have held that generally the term is "synonymous with 'suit,' which is a demand of one's rights in court."[67] Had the Legislature intended the focus to be on the defendant's conduct apart from any asserted cause of action, it would have been more natural to say "an anticompetitive act" or "anticompetitive conduct." But the Legislature chose the term "action," which is a well-established legal term of art synonymous with lawsuit.[68] This meaning also better fits the parallelism of the phrases "anticompetitive action"[69] and "a civil rights proceeding"[70] in *subsection (b)*.

At any rate, ***HN17***[] the exception's reference to relevance confirms that the Legislature intended the term action to refer to a "civil or criminal judicial proceeding."[71] Our rules of evidence provide that evidence is relevant if "it has any tendency to make a fact more or less probable than it would be without the evidence" and if that "fact is *of consequence* in determining the action."[72] A purely voluntary showing that the defendant's conduct is anticompetitive cannot constitute a fact of consequence in a lawsuit—the limited waiver of confidentiality for proceedings, records, and communications "relevant to an anticompetitive action"[73] can only apply if the plaintiff asserts a cause of action that requires proof of anticompetitive conduct or effects.[74]

[73] *Tex. Occ. Code § 160.007(b)*.

In light of the rarity of claims that require proof of a net anticompetitive effect, as a practical matter, our interpretation will not greatly expand the scope of an "anticompetitive action" beyond valid antitrust claims. However, our caselaw has already identified at least one cause of action that potentially falls within the interstice between anticompetitive and antitrust—tortious interference with prospective business relations.[75] As we have **[*705]** previously held, recovery for tortious interference with a prospective business relation requires a plaintiff to "prove that the defendant's conduct was independently tortious or wrongful" as an element of the cause of action.[76] Thus, even without asserting a cause of action under the TFEAA,[77] a plaintiff who asserts that a defendant's conduct is independently wrongful because it violates the laws of antitrust[78] would, as part of proving the violation, be required to show a negative effect on competition.

Such a plaintiff would still need to plead a valid antitrust *violation*, however, he would not need to plead a valid antitrust *claim*.[79] The TFEAA grants a private right of action to bring suit, but only to persons "whose business or property has been injured by reason of any conduct declared unlawful" in the Act.[80] This requires a plaintiff to prove "antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful."[81] Furthermore, permissible recovery is limited to "actual **[**29]** damages

---

[74] As already illustrated in our brief review of the meaning of "anticompetitive," there is no practical difference between the terms anticompetitive conduct and anticompetitive **[**26]** effects as used in the caselaw, because we do not deem conduct anticompetitive unless it has a net anticompetitive effect.

[75] Memorial Hermann argues that our decision in *Irving Healthcare Sys. v. Brooks, 927 S.W.2d 12 (Tex. 1996)*, forecloses argument that *section 160.007(b)*'s anticompetitive action exception encompasses routine **[**27]** business torts, including interference with prospective business relations. In *Brooks*, we noted that "the statute provides that if a court makes a preliminary finding that a medical peer review committee's proceedings, records, or communications are relevant to an anticompetitive action . . . they are not confidential," but that "a similar provision for a libel action in which the plaintiff claims malice" was "[n]oticeably absent from the statute." *927 S.W.2d at 16*. We also held that the statute did not "explicitly exclude from its confidentiality provisions any of [the plaintiff's] other causes of action." *Id.*

The plaintiff in *Brooks* sued for libel, slander, "intentional infliction of mental anguish," and interference with business relations. *Id. at 14-15*. The plaintiff alleged that the defendant had "intentionally and maliciously supplied false information, thereby damaging or destroying [the plaintiff's] ability to gain admittance to the medical staffs of the hospitals to which he applied." *Id.* Thus, *Brooks* did not require us to review the applicability of *subsection (b)*, because the trial court never made the required preliminary finding of relevance to an anticompetitive action. Furthermore, although the plaintiff's **[**28]** "other causes of action," included an allegation that the defendant tortiously interfered with prospective business relations, the plaintiff did not allege that the conduct was independently wrongful because the provision of false information had a negative effect on competition and constituted an antitrust violation. Our decision today is therefore consistent with our holding in *Brooks*.

[77] *Tex. Bus. & Comm. Code § 15.01 et seq.*

[78] *See* *Sturges, 52 S.W.3d at 726* ("[A] plaintiff could recover for tortious interference by showing an illegal boycott, although a plaintiff could not recover against a defendant whose persuasion of others not to deal with the plaintiff was lawful.").

[79] *See generally* Phillip Areeda, *Antitrust Violations Without Damages Recoveries*, 89 HARV. L. REV. 1127 (1976) (discussing "three superficially paradoxical possibilities," each of which hypothesizes circumstances under which a plaintiff might be able to prove an antitrust violation, but not be able to recover damages under the antitrust laws).

[80] *Tex. Bus. & Comm. Code § 15.21(a)(1)*.

[81] *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *see also* *Austin v. Blue Cross & Blue Shield of Ala., 903 F.2d 1385, 1389-90 (11th Cir. 1990)* ("'The antitrust injury concept . . . requires the private antitrust plaintiff to show that his own injury coincides with the public detriment tending to result from the alleged violation. This requirement increases the likelihood that public and private enforcement of the antitrust laws will further the same goal of increased competition.'" (quoting P. Areeda and H. Hovenkamp, ***Antitrust Law***, 335.1, at 261 (Supp. 1987)).

sustained" as a result of the unlawful conduct.[82] The damages must "reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation"[83] —in other words, "the type of loss that the claimed violations of the antitrust laws would be likely to cause."[84]

[*706] In contrast, tortious interference with business relations "provides a remedy for injurious **[**30]** conduct that other tort actions might not reach . . . but only for conduct that is already recognized to be wrongful under the common law or by statute."[85] Thus, in *Wal-Mart Stores, Inc. v. Sturges*, we provided the example of "a defendant who threatened a customer with bodily harm if he did business with the plaintiff."[86] We stated that such a defendant would be liable because the defendant's "conduct toward the customer—assault—was independently tortious," even though the plaintiff would not be able to sue the defendant for the assault itself.[87]

In sum, we hold that ***HN18***[] the exception to the medical peer review committee privilege for anticompetitive actions applies when the plaintiff asserts a cause of action that requires proof that the conduct at issue has "a tendency to reduce or eliminate competition"[88] that is not offset by countervailing procompetitive justifications.[89]

D. Subsection [31] (b) requires a plaintiff to plead, not present evidence of, an anticompetitive action**.

We also reject Memorial Hermann's contention that *section 160.007(b)* conditions its exception to confidentiality on the plaintiff's satisfaction of an evidentiary burden. The Legislature knows how to provide this type of gatekeeping function,[90] and *subsection (b)* is devoid of any language indicating intent to do so. The statute does not reference expert reports,[91] affidavits,[92] or categories of evidence to be considered.[93] Significantly, other than requiring a

Code §§ 14.004(a)* ("An inmate who files an affidavit or unsworn declaration of inability to pay costs shall file a separate affidavit or declaration. . . ."); *150.002(a)* ("In any action or arbitration proceeding for damages arising out of the provision of professional services by a licensed or registered professional, the plaintiff shall be required to file

"preliminary finding" that the **[*707]** material be "relevant to an anticompetitive action,"[94] *subsection (b)* contains no indication of a threshold quantum of proof.[95] ***HN19***[] Determinations of potential relevancy or privilege typically do not require a litigant to produce evidence on the merits of his claim—as opposed to the merits of the privilege.[96] Furthermore, it is counter to the notion that "[a]ffording parties full discovery promotes the fair resolution of disputes by the judiciary,"[97] to condition access to documents that could substantiate a plaintiff's claim on the plaintiff's ability to substantiate his claim without the documents' aid.

Although Memorial Hermann's concern that plaintiffs may circumvent the privilege through artful pleading is a compelling one, defendants are not left without protection. First, ***HN20***[] by permitting defendants to recover costs incurred from defending against frivolous or bad faith pleadings, *section 160.008(c)* discourages the addition of groundless allegations of injury to competition.[98] Second, nothing in *section 160.007* prevents defendants from seeking, as they do in all civil cases, to limit discovery on the grounds that "the discovery sought is unreasonably cumulative or duplicative, or is **[**35]** obtain[able] from some other source that is more convenient, less burdensome, or less expensive."[99] Defendants may also assert that "the burden or expense of the proposed discovery outweighs its likely benefit, taking into account the needs of the case . . . the importance of the issues at stake in the litigation, and the importance of the proposed discovery in resolving the issues."[100] Defendants may also seek protective orders to protect themselves "from undue burden, unnecessary expense, harassment, annoyance, or invasion of personal, constitutional, **[*708]** or property rights."[101]

[95] *Compare* *Tex. Civ. Prac. & Rem. Code § 27.005(c)* ("The court may not dismiss a legal action under this standard if the party bringing the legal action establishes by *clear and specific* evidence a prima facie case for each essential element of the claim in question." (emphasis added)); *Tex. Health & Safety Code § 841.102(c)* ("The judge shall set a hearing if the judge determines at the biennial review that . . . *probable cause* exists to believe that the person's behavioral abnormality has changed to the extent that the person is no longer likely to engage in a predatory act of sexual violence." (emphasis added)).

[96] *Cf.* *Tex. R. Civ. P. 193.4(a)* ("The party making the objection or asserting the privilege must present any evidence necessary *to support the objection or privilege*." (emphasis added)); ***[**34]*** *see also* ***Lunsford v. Morris, 746 S.W.2d 471, 473 (Tex. 1988)*** ("Absent a privilege or specifically enumerated exemption, our rules permit discovery of any 'relevant' matter; thus, there is no evidentiary threshold a litigant must cross before seeking discovery.").

[97] *See* *Lowry, 802 S.W.2d at 673* ("[A]ll of the information sought to be discovered was gathered by the State during the investigation that led to the filing of this antitrust enforcement action. The State has refused to provide materials requested by the insurers that could lead to evidence supporting their defense. It is difficult for the insurers to make a more particularized showing of need for these documents, the contents of which are unknown to them.").

[98] *See* ***HN21***[] *Tex. Occ. Code § 160.008(c)* ("A defendant subject to this section may file a counterclaim in a pending action or may prove a cause of action in a subsequent action to recover defense costs, including court costs, attorney's fees, and damages incurred as a result of the civil action, if the plaintiff's original action is determined to be frivolous or brought in bad faith.").

[99] ***Tex. R. Civ. P. 192.4(a)***.

[100] ***Tex. R. Civ. P. 192.4(b)***.

[101] ***Tex. R. Civ. P. 192.6(b)***.

Finally, ***HN22***[] because the statute provides that information "is not confidential *to the extent it is considered relevant*,"[102] the exception's scope is still narrower than the otherwise applicable scope of discovery, which permits **[**36]** discovery of information that "appears reasonably calculated *to lead* to the discovery of admissible evidence."[103] Defendants may further limit the scope of discovery through the judicious use of special exceptions, which are "the appropriate vehicle . . . by which an adverse party may force clarification of vague pleadings,"[104] thereby narrowing the range of facts that will be of consequence in the action.[105]

As such, we hold that ***HN23***[] judges are to determine a *subsection (b)* "preliminary finding" on the basis of the plaintiff's pleadings. We now turn to the application of *subsection (b)* to Dr. Gomez's pleadings.

E. Dr. Gomez pleaded an anticompetitive action.

Dr. Gomez alleged that the defendants intentionally interfered with his "longstanding and continuous relationships with referring physicians in the West Houston and Katy medical community" and that the defendants' acts constituted a "concerted **[**37]** effort . . . to restrain competition in and monopolize surgical procedures." Dr. Gomez also asserted that the defendants' acts "constitute illegal monopolization, attempted monopolization, and/or conspiracy to monopolize under applicable Texas law."

Memorial Hermann does not dispute that Dr. Gomez alleged that Memorial Hermann violated the TFEAA, but rather, argues Dr. Gomez failed to plead a valid antitrust claim. Memorial Hermann challenges the sufficiency of Dr. Gomez's allegations, taken as true, to establish (1) a legally cognizable injury to competition, and (2) an adverse effect on competition in the relevant market. The crux of Memorial Hermann's argument is its contention that caselaw overwhelmingly establishes that a claim for an injury to a single physician at a single hospital is insufficient. We disagree with Memorial Hermann's characterization of Dr. Gomez's allegations as well as its characterization of the law.

HN24[] We "construe the TFEAA in harmony with federal antitrust caselaw to promote competition for consumers' benefit."[106] "Because our own caselaw is limited, we rely heavily on the jurisprudence of the federal courts."[107]

[*709] ***HN25***[] The TFEAA declares that "[e]very contract, combination, or conspiracy in restraint of trade or commerce is unlawful," and that "it is unlawful for any person to monopolize, attempt to monopolize, or conspire to monopolize any part of trade or commerce."[108] As discussed above, however, the TFEAA does not operate as a

[107] *Coca-Cola Co., 218 S.W.3d at 688-89*. *Accord Caller-Times Pub. Co. v. Triad Commc'ns, Inc., 826 S.W.2d 576, 580 (Tex. 1992)* ("Because **[**38]** *section 15.05(b)* of the Texas Antitrust Act is comparable to *section 2 of the Sherman Antitrust Act*, we look to federal law interpreting *section 2 of the Sherman Act* for guidance in interpreting *section 15.05(b)* of the Texas Antitrust Act."); *DeSantis v. Wackenhut Corp., 793 S.W.2d 670, 687 (Tex. 1990)* ("*Section 15.05* is comparable to, and indeed taken from, *section 1 of the Sherman Antitrust Act*, *15 U.S.C. § 1 (1988)*. Accordingly, we look to federal judicial interpretations of *section 1 of the Sherman Act* in applying *section 15.05(a)* of our state ***antitrust law***.").

[108] *Tex. Bus. & Comm. Code § 15.05(a)—(b)*.

qui tam provision,[109] but rather limits the ability to bring suit under the TFEAA to persons "whose business or property has been injured by reason of any conduct declared unlawful in Subsection (a), (b), or (c) of Section 15.05 of [the] Act."[110] Thus, courts have held that standing to pursue an antitrust suit exists only if a plaintiff shows (1) injury-in-fact, an injury to the plaintiff proximately caused by the defendant's conduct; (2) antitrust injury; and (3) proper plaintiff status, which assures **[**39]** that other parties are not better situated to bring suit.[111]

HN26[] On its own, the elimination of a single competitor does not constitute proof of an anticompetitive effect for every market and context.[112] Claims of improper restraint of trade require a plaintiff to "plead . . . a reduction of competition in the market in general and not mere injury to their own positions as competitors in the market."[113] However, it is also well established that the United States Supreme Court has "forb[idden] as a matter of law, a defense based upon a claim that only one small firm, not competition **[**40]** itself, had suffered injury,"[114] because "[m]onopoly can as surely thrive by the elimination of such small businessmen, one at a time, as it can by driving them out in large groups."[115]

HN27[] "In order to successfully allege injury to competition, a . . . claimant may not merely recite the bare legal conclusion **[*710]** that competition has been restrained unreasonably."[116] At a minimum, the claimant must "sketch the outline of the antitrust violation with allegations of supporting factual detail."[117] Whether the practice constitutes an **[**41]** improper restraint of trade will depend upon whether the plaintiff's allegations "suggest[] a market in which the removal of [a single competitor] from the pool of competing sellers would adversely and unreasonably affect overall competitive conditions."[118] Under the rule of reason,[119] courts consider "a variety of

Healthsource, Inc., 986 F.2d 589, 597 (1st Cir. 1993) ("Ultimately the issue turns upon antitrust policy, where a permanent tension prevails between the 'no sparrow shall fall' concept of antitrust . . . and the ascendant view that antitrust protects 'competition, not competitors.'").

[116] Les Shockley Racing, Inc., 884 F.2d at 508.

[117] *Id.*

[118] Id. at 509. *Compare* Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 7, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984) (affirming dismissal of the claim where the defendant was only one hospital of several in a large metropolitan area) *with* Full Draw Prods. v. Easton Sports, Inc., 182 F.3d 745, 754 (10th Cir. 1999) (holding that the loss of one or two competitors alleged

factors, including 'specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.'"[120] As such, "the adequacy of a physician's contentions regarding the effect on competition is typically resolved after discovery, either on summary judgment or after trial."[121]

HN28[] A successful claim of monopoly requires proof of "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident."[122] "The term 'relevant market' encompasses notions of geography as well as product use, quality, and description. The geographic market extends to the 'area of effective competition' . . . where buyers can turn for alternate sources of supply."[123] HN29[] Demonstrating attempted monopolization requires proof "(1) **[**43]** that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power."[124]

HN30[] Under either claim, it is "necessary to consider the relevant market and **[*711]** the defendant's ability to lessen or destroy competition in that market."[125] However, the disposition of the question of "a dangerous probability of achieving monopoly power" is "typically one that is not resolved at the pleading stage unless it is clear on the face of the complaint that the 'dangerous probability' standard cannot be met as a matter of law."[126]

Here, Dr. Gomez is not complaining that the defendants have prevented him from obtaining privileges at any of the hospitals in the area, but rather that the defendants have prevented him from obtaining referrals.[127] According to Dr. Gomez's petition, the number one source of referrals for a cardiovascular surgeon is a cardiologist, and his ability to compete—regardless of whether he has staff privileges with one hospital or another—is contingent upon his reputation with those cardiologists. **[**44]** [128] The alleged injury to Dr. Gomez's reputation is therefore not

---

an injury to competition where "[t]he allegation describes the anticompetitive effect of the boycott to be the loss of competition through the elimination of AMMO's sole archery trade show competitor and the resultant loss in exhibition space output") *and* Oltz v. St. Peter's Comm. Hosp., 861 F.2d 1440, 1446-47 (9th Cir. 1988) (exclusion of a single nurse anesthetist from a single hospital constituted an unreasonable **[**42]** restraint of trade where that hospital "enjoyed the overwhelming majority of the market for general surgery" and "there was no evidence that patients could effectively turn outside [the hospital] for alternate sources of anesthesia services").

[119] We note that "[o]nce experience with a particular kind of restraint enables [courts] to predict with confidence that the rule of reason will condemn it, [courts will] appl[y] a conclusive presumption that the restraint is unreasonable." Arizona v. Maricopa Cnty. Med. Soc., 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982). Dr. Gomez has not alleged that the conduct at issue falls within a category of behavior deemed unreasonable *per se*, however.

[125] *Id.*

[126] Brader, 64 F.3d at 876; *see also* Oltz, 861 F.2d at 1446 ("Defining the relevant market is a factual inquiry ordinarily reserved for the jury.").

[127] *See* Brader, 64 F.3d at 877 ("[T]he type of injury alleged by Brader (the loss of income due to an inability to practice in the relevant market area) is directly related to the illegal activity in which the defendant allegedly engaged: a conspiracy to exclude Brader from the relevant market.").

confined to a single hospital,[129] particularly if Dr. Gomez is able to show that Memorial Hermann has the capacity to impact a substantial number of the market's cardiologists' willingness to refer patients to him.[130]

Dr. Gomez also alleges that by disseminating false information about his mortality rate, Memorial Hermann cast doubt on robotic heart surgery procedures throughout Houston, inoculating itself from competition from a medical service that Memorial Hermann could no longer offer. The deposition excerpts attached to and quoted in Dr. Gomez's petition suggest that "referral patterns changed" and that Dr. Gomez used to be the "Number One" physician, but that following the conduct at issue, another physician, a Dr. Gibson, received more referrals.[131] Dr. Gomez also suggests in his briefing that Dr. Macris may have improperly benefitted from an increase in patients due to Dr. Gomez's decrease in patients.

Dr. Gomez alleges **[**46]** that as a result of the loss of trust in robotic heart surgery, patients **[*712]** would incur $50,000 or more in medical expenses due to longer hospital stays.[132] Dr. Gomez also disputes the existence of any procompetitive justifications for presenting manipulated mortality data.[133] As Dr. Gomez has not yet had an opportunity to obtain full discovery, we are not in a position to predict whether he will ultimately be able to sustain his burden of proof on these issues, however, his petition sufficiently alleges an injury to competition under the TFEAA.[134]

As for Memorial Hermann's arguments regarding Dr. Gomez's identification of a relevant market in which the alleged injury to competition occurred, we hold that Dr. Gomez's petition sufficiently pleads viable markets. It may

[128] *See, e.g., Fuentes v. S. Hills Cardiology, 946 F.2d 196, 202 (3d Cir. 1991)* ("Fuentes alleges that the defendants acted in concert to deny Fuentes, a provider of cardiological services, access to the Pittsburgh cardiological market. Consequently, Fuentes asserts, that by eliminating him as a competitor, the boycott successfully reduced competition for the defendants' cardiological services."). *Compare BCB Anesthesia Care, Ltd. v. Passavant Mem'l Area Hosp. Ass'n, 36 F.3d 664, 668 (7th Cir. 1994)* ("The plaintiffs can practice at Passavant or elsewhere—they are not disabled from practicing wherever they choose.").

[129] *Cf. Bolt v. Halifax Hosp. Med. Ctr., 891 F.2d 810, 820 (11th Cir. 1990)* ("[A]s the defendants' own arguments suggest, a negative decision at one hospital could affect the decision at another hospital; therefore . . . a negative decision by one hospital could be tantamount **[**45]** to excluding a doctor from the profession as a whole." (internal quotation marks omitted)), *overruled in part on other grounds by City of Columbia v. Omni Outdoor Adver., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*.

[130] *Compare Coca-Cola Co., 218 S.W.3d at 688* (reversing a jury verdict where "there is only evidence of harm in relatively isolated instances and no evidence of substantial foreclosure or anti-competitive effect in any relevant market").

[131] *Compare id.* ("There must be evidence of demonstrable economic effect, not just an inference of *possible* effect." (internal quotation marks omitted)).

[132] *Cf. Leegin Creative Leather Prods., Inc., 551 U.S. at 886* (holding that the goal of judicial scrutiny is to "distinguish[] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest").

[133] We note that there may be procompetitive justifications for allowing the presentation of even misleading data, such as allowing for freer and more informed discussions—particularly in light of procedures available to physicians to challenge the peer review process. For example, ensuring that the data cannot be challenged might delay the hospital's ability to respond to concerns raised by the data. It may be that such increased **[**47]** responsiveness is of greater value than the interim damage to a physician's reputation.

As we have already discussed, the inclusion and wording of the anticompetitive exception to the medical peer review committee privilege does not condition the exception on a pre-determination that the behavior at issue is indeed anticompetitive. It requires only that the action seeks to establish that the behavior is anticompetitive. This case presents itself to us at the discovery phase rather than summary judgment. The procompetitive value of allowing for the presentation of false data is a factual determination—one likely requiring the aid of expert reports—and it is not a determination that we can make as a matter of law.

[134] *See Brader, 64 F.3d at 876*.

be unlikely that the relevant market for a valid injury to competition can be limited to the market for robotic-assisted heart surgery. For example, if Memorial Hermann does not have a heart surgeon capable of performing those surgeries, then Memorial **[**48]** Hermann could not have hoped to capture the patients who would otherwise have gone to Dr. Gomez.[135] On the other hand, if those patients are willing to substitute traditional heart surgery procedures, then a cross-elasticity of demand between the two types of procedures must exist, in which case review of the competitive impact cannot be limited to robotic-assisted heart procedures.[136]

However, although the trial court noted that Dr. Gomez alleged that Memorial Hermann's actions "impacted the referral market for heart surgeons specializing in robotic-assisted heart surgeries in Houston," the trial court did not **[**49]** base its conclusion that the anticompetitive exception applied on a finding of a particular market. **[*713]** Dr. Gomez's petition alleges multiple service markets, including the market for surgical procedures, the heart surgery market, and the referral market. Precisely because Dr. Gomez alleged so many different potential markets for his claims—as Memorial Hermann itself complains[137]—the flaw at this stage can only be with the state of evidence regarding the relevant market and not with Dr. Gomez's pleadings. The same criticism applies to Memorial Hermann's complaints about Dr. Gomez having alternatively pleaded different geographies for the relevant market for services.

Finally, Dr. Gomez's allegations suggest that Memorial Hermann targeted not only his own ability to compete for surgeries, but also Methodist **[**50]** West's competitive position. Dr. Gomez claims the destruction of his reputation served to deter Memorial Hermann's other physicians from practicing at Methodist West or from referring patients to physicians who are not affiliated with Memorial Hermann.[138] Dr. Gomez's allegations, taken as true, suggest that Memorial Hermann may have attempted to (1) intimidate a number of physicians from making referrals to specialists at Methodist West, thus cutting off Methodist West's patient base, and (2) intimidate other doctors—Methodist West's "supply" for its services—from practicing at Methodist West.[139] Even if Dr. Gomez himself would not have standing to bring a suit under the TFEAA based on antitrust injury to Methodist West,[140] Dr. Gomez could

Ed. 2d 510 (1962)* ("The primary vice of a vertical merger *or other arrangement* tying a consumer to a supplier is that, by foreclosing the competitors of either party from a **[**51]** segment of the market otherwise open to them, the arrangement may act as a 'clog on competition.'" (emphasis added)); *Klors, Inc., 359 U.S. at 209* ("The concerted refusal to deal with Klor's has seriously handicapped its ability to compete and has already caused it a great loss of profits, goodwill, reputation and prestige.").

[140] *See* *Doctor's Hosp. of Jefferson, Inc., 123 F.3d at 305* (holding that standing to bring suit for antitrust requires "proper plaintiff status, which assures that other parties are not better situated to bring suit").

rely on the violation to show that the interference with his prospective business relations was independently wrongful.[141]

We hold that Dr. Gomez's petition presents multiple viable anticompetitive actions.

F. The trial court did not abuse its discretion in making a preliminary finding that the documents in question are relevant to the anticompetitive actions pleaded by Dr. Gomez.

The trial court ordered Memorial Hermann to produce a number of documents. We review the trial court's preliminary finding of relevance to each set of documents in the sealed record for an abuse of discretion.[142]

Memorial Hermann argues that the various categories of documents are not relevant **[*714]** to Dr. Gomez's alleged anticompetitive action because (1) a number of the documents predate November 2011, which Dr. Gomez **[**52]** identified in his deposition as the relevant time period for the case; (2) Dr. Gomez's action involves the purportedly improper publication of false material through different peer review committees, but he has not alleged that the documents themselves were publicly disseminated; (3) certain documents do not discuss individual or aggregated physician mortality rates, instead focusing on physician volume; (4) certain documents do not refer to Dr. Gomez; and (5) with regard to one particular slide, the slide is not relevant to any actionable antitrust conduct under Texas law. We conclude that the majority of the documents in the sealed record are relevant to essential elements of the anticompetitive causes of actions that Dr. Gomez has asserted.

Before discussing the relevance of otherwise protected documents, however, we note that some of the documents included in the sealed record do not qualify for protection under the medical peer review committee privilege. Any affidavits prepared for and submitted to the trial court are neither records nor proceedings of the committees at issue nor communications to that committee. They therefore receive no protection under either the medical peer **[**53]** review committee privilege or the medical committee privilege. The committee bylaws attached as exhibits to the affidavits also do not qualify as a record of, proceeding of, or communication to the committee, and are therefore not protected.[143] However, the remaining documents in the sealed record are records or proceedings of the committees, or communications to the committee.

Dr. Gomez alleges that Memorial Hermann manipulated and disseminated data on his mortality rates in order to harm his ability to compete for surgical procedures as well as to intimidate other doctors from defecting to Methodist West. As such, the withheld documents are relevant if they would tend to make more or less probable Dr. Gomez's allegations that Memorial Hermann disseminated manipulated data on Dr. Gomez's mortality rates, that the dissemination caused Dr. Gomez's referral rates to decline, or that other doctors were fearful that they could also be targeted **[**54]** in such a fashion. These fact issues are at the core of Dr. Gomez's claims that Memorial Hermann violated the TFEAA and tortiously interfered with his prospective business relations.

A number of the documents at issue are relevant because they either contain data on mortality rates of cardiovascular surgeons, discuss obtaining or direct others to obtain mortality rates of cardiovascular surgeons, establish plans to review mortality data, or reference appropriate parameters for calculating mortality data. Even if Memorial Hermann never published some of the documents that contain data on mortality rates, the data could still be relevant to the veracity of any data that Memorial Hermann did publish, particularly if discrepancies appeared between the different reports of the data. Similarly, evidence establishing that Memorial Hermann did not follow

---

[141] *See* Sturges, 52 S.W.3d at 713.

[142] All page references in this section are to the sealed record.

[143] *See* Brownwood Reg'l Hosp. v. Eleventh Court of Appeals, 927 S.W.2d 24, 27 (Tex. 1996) (holding "the bylaws, rules, and regulations of [the hospital's] medical staff or Board of Trustees . . . are not records, reports, or proceedings of a hospital or medical peer review committee, nor do they reveal communications to such a committee").

what it knew to be the appropriate parameters for calculating mortality data could support an inference that Memorial Hermann intended to cast doubt on Dr. Gomez's ability as a surgeon.

[*715] The documents discussing physician volume are relevant. Memorial Hermann's argument that these documents lack any discussion of Dr. Gomez's mortality rates does **[**55]** not negate the documents' potential relevance to Dr. Gomez's allegations that he suffered a loss of referrals. The documents could also tend to prove or disprove a corresponding increase in referrals to Memorial Hermann's other physicians, which could support Dr. Gomez's allegations that Memorial Hermann violated the TFEAA. Furthermore, although the data on physician volume predates the time period in which Dr. Gomez alleges his referral rate declined, such data could still provide a baseline for measuring the effect of the alleged conduct. Documents relating to referral patterns, either of particular physicians or Memorial Hermann itself, are also relevant for the same reasons.

We note that the data on mortality and physician volume are associated with assigned numbers rather than the names of particular physicians in a number of the documents. However, although Memorial Hermann would be free to present evidence suggesting that the code effectively concealed the physicians' identities, the existing overlap between some of the coded and un-coded documents is sufficient to support a preliminary finding that the presentations' audiences as well as a judicial fact finder would be able **[**56]** to understand which physicians' rates and volumes appear in the documents.

Other documents are relevant because they discuss Memorial Hermann's plans to differentiate itself from other hospitals' cardiovascular surgery departments. This focus could make more or less probable the likelihood that Dr. Gomez's unique services were of sufficient importance to provide the impetus for the alleged improper conduct.

Another category of relevant documents consists of maps that identify the locations of doctors or hospitals in the surrounding geographic area, and maps demarcating the geographic areas from which Memorial Hermann draws its patients. Because they provide a basis for determining the feasibility of alternatives for patients in the area, these documents—in conjunction with expert testimony—could make a particular geographic market for Dr. Gomez's claims under the TFEAA more or less probable.

On the other hand, Exhibit B to E. Leticia Mireles' affidavit, which consists of an email to a number of persons, is not relevant to Dr. Gomez's allegations. The body of the email does not include any information that would make any of Dr. Gomez's allegations more or less probable. Although the email **[**57]** includes an attachment, nothing before us suggests that a record of the sending of this particular attachment to a number of persons would make Dr. Gomez's allegations more or less probable, because the attachment itself does not contain any data about Dr. Gomez or a relevant competitive market. This email, appearing on pages 365-68 of the sealed record, is therefore not relevant to an anticompetitive action, and retains its protection under the medical peer review committee privilege.

In addition, the documents appearing on pages 119, 122-23, 129-30, 135, 138, 140, 142, 145, 154-55, 160-61, 166-67, 174-75, 180-81, 188-89, 195-98, and 243 of the sealed record also retain their protection under the medical peer review committee privilege. These documents do not discuss any data on mortality rates, physician volume, or referral pattern. Nor do they discuss plans to disseminate such data, any staffing concerns of the hospital, or the competitive positions of the hospital or Dr. Gomez. These documents lack any apparent **[*716]** relevance to Dr. Gomez's claims, and we hold the trial court therefore abused its discretion in compelling Memorial Hermann to produce them.

However, the trial court did not **[**58]** abuse its discretion in making a preliminary finding that the other materials in the record are relvant to an anticompetitive action. We therefore turn to whether these documents enjoy any residual protection under the medical committee privilege.

III. When both are applicable, the anticompetitive exception to the medical peer review committee privilege limits the provision of confidentiality under the medical committee privilege.

This question is contingent on the extent to which overlapping provisions of two different statutes can concurrently operate.[144] *HN31*[] To the extent possible, we will construe the different provisions in a way that harmonizes rather than conflicts.[145] When the provisions are irreconcilable, the general rule is that the terms of the later-enacted statute should control.[146] However, conflicts between general and specific provisions favor the specific, and when the literal terms of the two provisions cannot both be true, the terms of the specific provision ordinarily will prevail.[147] We will construe the general provision as controlling only when the manifest intent is that the general provision will prevail and the general provision is also the later-enacted statute.[148]

HN32[] *Section 161.031 of the Health and Safety Code* broadly defines a "medical committee" to include "any committee, including a joint committee" of certain types of entities, including "a hospital" or "a medical organization."[149] Medical committees may be "appointed ad hoc to conduct a specific investigation or established . . . under the bylaws or rules of the organization or institution."[150]

HN33[] The records and proceedings of a medical committee are governed by *section 161.032 of the Health and Safety Code*. With the exception of "records maintained in the regular course of business by a hospital . . . [or] medical organization,"[151] medical committees and their members may use the committee's records and proceedings "only in the exercise of proper committee functions."[152] Subject to the same exception,[153] the "records and proceedings of a medical committee are confidential and are not subject to court subpoena."[154]

[*717] *HN34*[] *Section 161.032 of the Health and Safety Code* suggests that medical committees are at least potentially distinct from medical peer review committees.[155] However, the definitions of the two committees contain

---

144 *See City of Waco v. Lopez, 259 S.W.3d 147, 153 (Tex. 2008)*.

145 *Tex. Gov't Code §§ 311.025*, *311.026(a)* **[**59]** ; *Tex. Indus. Energy Consumers v. CenterPoint Energy Hous. Elec., LLC, 324 S.W.3d 95, 107 (Tex. 2010)*.

147 *Tex. Gov't Code § 311.026(b)*; *TracFone Wireless, Inc. v. Comm'n on State Emergency Commc'ns, 397 S.W.3d 173, 181 (Tex. 2013)*.

148 *Tex. Gov't Code § 311.026(b)*; *Lopez, 259 S.W.3d at 153*.

149 *Tex. Health & Safety Code § 161.031(a)*. The other categories of entities include university medical schools and health science centers, health maintenance organizations licensed under *Chapter 843 of the Insurance Code*, extended care facilities, hospital districts, and hospital authorities. *Id.* *§ 161.031(a)(3)-(7)*.

150 *Id.* *§ 161.031(b)*.

151 *Id.* *§ 161.032(f)*.

152 *Id.* *§ 161.032(d)*.

153 *Id.* *§ 161.032(f)* **[**60]** .

154 *Id.* *§ 161.032(a)*.

155 *See id.* *§ 161.032(b)(1)* (proving that "a proceeding of a medical peer review committee . . . *or* medical committee" may be held in a closed meeting (emphasis added)); *id.* *§ 161.032(b)(2)* (providing for closed meetings of the governing board of certain hospitals or health maintenance organizations if at the meeting, "the governing body receives records, information, or reports provided by a medical committee [*or*] medical peer review committee"); *id.* *§ 161.032(c)* (providing that the "[r]ecords, information, or reports of a medical committee [*or*] medical peer review committee" as well as "records, information **[**61]** or

significant overlap. Provided that the other statutory requirements are met,[156] the definition of a medical peer review committee includes committees "of a health care entity, the governing board of a health care entity, or the medical staff of a health care entity."[157] But any "entity . . . that provides or pays for medical care or health services" and "follows a formal peer review process to further quality medical care or health care" will be considered a health care entity.[158]

As such, ***HN35***[] although the committees of some health care entities may not be medical committees,[159] every committee of every entity listed in the definition of a medical committee that "follows a formal peer review process to further quality medical care or health care"[160] will be considered a medical peer review committee—unless the committee does not "operate[] under written bylaws approved by the policy-making board or the governing board of the health care entity."[161] By extension, no medical committee that satisfies these two additional provisions necessary to be deemed a medical peer review committee can credibly **[**62]** claim that its records and proceedings are not governed by *section 160.007 of the Occupations Code*.[162]

[*718] Here, because Memorial Hermann stipulated that the relevant committees are medical peer review committees, the documents at issue cannot be considered confidential under *section 161.032(a) of the Health and Safety Code* without ignoring *section 160.007 of the Occupations Code*. Memorial Hermann's argument that a document should enjoy the combined protection of all applicable privileges relies on our previous references to *section 161.032 of the Health and Safety Code* and *section 160.007 of the Occupations Code* as "the medical committee privilege" and "the medical peer review committee privilege," respectively.[163] However, the statutes

reports provided by a medical committee [*or*] medical peer review committee . . . to the governing board of a public hospital, hospital district, or hospital authority" are exempt from the disclosure provisions of Chapter 552 of the Government Code).

[156] In order to be considered a medical peer review committee, the committee must (1) "operate[] under written bylaws approved by the policy-making board or the governing board of the health care entity" and (2) be "authorized to evaluate the quality of medical and health care services or the competence of physicians." *Tex. Occ. Code § 151.002(a)(8)*.

[157] *Id.*

[158] *Id. § 151.002(a)(5)*.

[159] By way of example, "a health care collaborative certified under Chapter 848, Insurance Code" is specifically designated as a health care entity, *Tex. Occ. Code § 151.002(a)(5)(E)*, but such entities would not fall neatly within any of the entity categories listed in the definition of a medical committee. *Compare id. with Tex. Health & Safety Code § 161.031(a)(1)-(7)*. *But see Brooks, 927 S.W.2d at 20* ("[T]he statutory definition of "medical committee" is broad . . . That definition encompasses a medical peer review committee. . . .").

[160] *Tex. Occ. Code § 151.002(a)(5)(B)(ii)*.

[161] *Id. § 151.002(a)(8)*. In other words, any medical committee that both "operates under written bylaws" approved by either its policy-making or governing board, and follows a formal peer review process will also be considered a medical peer review committee. *Id.*

[162] There is only one potential exception to this rule, and that exception applies to the records and proceedings of governing bodies of "public hospital[s] owned or operated by a governmental entity, . . . hospital authorit[ies] created under Chapter 262 or 264, Health and Safety Code, . . . [or] hospital district[s] created under Article IX, Texas Constitution." *Tex. Occ. Code § 151.002(a)(8)(B)*. These governing bodies are considered to be medical peer review committees only in relation to their **[**63]** evaluation of the quality of the medical and health care services they provide or a physician's competence—and only "to the extent that the evaluation . . . involves discussions or records that specifically or necessarily identify an individual patient or physician." *Id. § 151.002(a)(8)(B)(i)—(ii)*. Thus, none of the governing bodies' records or proceedings that does not "specifically or necessarily identify an individual patient or physician," *id. § 151.002(a)(8)(B)(ii)*, would be subject to *section 160.007 of the Occupations Code*, although they would still enjoy the protections of *section 161.032 of the Health and Safety Code*.

[163] *See, e.g., In re Living Ctrs. of Tex., Inc., 175 S.W.3d at 256*.

themselves confer confidentiality on records and proceedings—not the committee itself.[164] Because the records and proceedings here are subject to both sections, both sections' provisions regarding confidentiality apply. That the records **[**64]** and proceedings of some medical peer review committees may not be considered records and proceedings of a medical committee—or the reverse—has no bearing on the question before us, because such documents would never be subject to both sections.

Because the documents are subject to both sections, any reconcilable provisions will apply in concert.[165] For example, a medical committee that is also a medical peer review committee could not use its records or proceedings in the exercise of improper committee functions simply because *section 160.007* does not explicitly forbid it.[166] By the same token, a dual medical committee and medical peer review committee could not rely on the provision of confidentiality in *section 161.032(a)* to shirk its duty under *section 160.007(d)* to provide a physician with a written copy of its recommendation to suspend **[**65]** the physician's privileges.[167]

However, ***HN37***[] a record or proceeding is either confidential or not; it cannot be both. As we have already discussed at length, the majority of the documents that Dr. Gomez seeks are relevant to an anticompetitive action. Because Memorial Hermann has stipulated that those documents are the records and proceedings of a medical peer review committee, *section 160.007(b)* provides that those documents are "not confidential to the extent [they are] considered relevant."[168] It is impossible to reconcile that provision with a provision stating that the same documents "are confidential and are not subject to court **[*719]** subpoena."[169] *Section 160.007* is both the later enacted statute as well as the more specific regarding when records and proceedings are confidential.[170] We therefore hold that ***HN38***[] the records and proceedings of a dual medical committee and medical peer review committee do not enjoy any greater confidentiality under *section 161.032(a)* than they do under *section 160.007(b)*.

CONCLUSION

We hold that the trial court abused its discretion in ordering Memorial Hermann to produce pages 119, 122-23, 129-30, 135, 138, 140, 142, 145, 154-55, **[**66]** 160-61, 166-67, 174-75, 180-81, 188-89, 195-98, 243, and 365-68 of the sealed record. We conditionally grant Memorial Hermann's writ of mandamus, directing the trial court to modify its discovery order insofar as the order compelled production of those documents. We are confident the trial court will comply, and the writ will issue only if it does not. In all other respects, Memorial Hermann's petition for writ of mandamus is denied.

Don R. Willett

Justice

OPINION DELIVERED: May 22, 2015

Mian v. General Manager, Baltimore-Washington Manheim Auction

United States District Court for the District of Maryland

May 22, 2015, Decided; May 22, 2015, Filed

Civil Action No. TDC-14-2534

Reporter

2015 U.S. Dist. LEXIS 67054 *; 2015 WL 3369366

MOHAMMAD A. MIAN, Plaintiff, v. GENERAL MANAGER, BALTIMORE-WASHINGTON MANHEIM AUCTION, Defendant.

Subsequent History: Affirmed by *Mian v. Gen. Manager, Baltimore-Washington Manheim Auction, 2016 U.S. App. LEXIS 6688 (4th Cir. Md., Apr. 13, 2016)*

Core Terms

purchaser, commodity, alleges, motion to dismiss, dealers, motion to strike, consumer, unfair, resale, deceptive, practices, wholesale, discriminatory, bought, auction, retail, terms, dismissal with prejudice, cause of action, misleading, pleadings, stockyard, deceived, supplier

Counsel: **[*1]** Mohammad A. Mian, Plaintiff, Pro se, Silver Spring, MD.

For Baltimore-Washington Manheim Auction, Defendant: Gerin Brendan Ballard, LEAD ATTORNEY, Sutherland Asbill and Brennan LLP, Washington, DC; Jason S McCarter, PRO HAC VICE, Sutherland Asbill and Brennan LLP, Atlanta, GA.

Judges: THEODORE D. CHUANG, United States District Judge.

Opinion by: THEODORE D. CHUANG

Opinion

MEMORANDUM OPINION

This matter is before the Court on a Motion to Dismiss, ECF No. 9, tiled by Defendant Manheim Remarketing. Inc. d/b/a/ Manheim Baltimore-Washington ("Manheim").[1] The issue before the Court is whether the Complaint filed by Plaintiff Mohammad A. Mian ("Mian") sufficiently states a cause of action upon which relief may be granted. The Court has reviewed the Complaint and briefs and has determined that no hearing is warranted. *See* Local Rule 105.6 (D. Md. 2014). For the following reasons, the Motion is GRANTED.

---

[1] The Complaint names "General Manager, Baltimore-Washington Manheim Auction" as the defendant. Manheim Baltimore-Washington is owned by Manheim Remarketing, Inc., which reserves its rights with respect to deficiencies both in the pleadings and in service of process, but has filed the present Motion to Dismiss and consented to a ruling on the **[*2]** merits of the sufficiency of the Complaint as pleaded.

BACKGROUND

The instant *pro se* civil action was filed on August 11, 2014 by Mian, the former owner and operator of Mid-Atlantic Automotive Supply Company ("Mid-Atlantic"), a wholesale used car dealership in Silver Spring, Maryland. While Mian was the owner of Mid-Atlantic, he sold his cars at Manheim's weekly car auction in Baltimore. Mian alleges that for "[y]ears before," Manheim ran its auctions on a "first come first serve system," meaning that as soon as a car entered Manheim's main gates, it was entered into the computer system and placed automatically in the row and run number generated by the computer, but that at some point, Manheim began to assign the row and run numbers manually. Compl. ¶ 5, ECF No. 1. Mian alleges that this new system was unfair and discriminatory, because, as was common knowledge to the dealers, those cars with the earliest assignments tended to sell quickly and for competitive prices, while those cars with later assignments did not. Mian alleges that he filed complaints with Manheim's General Manager on August 8, 2012 and January 18, 2013, but that he eventually lost his business in February 2013.

Mian also **[*3]** alleges that, in response to his complaints. Manheim explained that "placement of cars in the auction lanes on quantity basis was their privilege," and that they had put his cars at the end of the auction because of his relatively small inventory. *Id.* ¶ 11. Mian alleges that these practices are in violation of federal and state laws against unfair or deceptive trade practices. Specifically, the Complaint states: The applicable law here is *7 U.S. Code Section 213* which provides Prevention of unfair, discriminatory, or deceptive practice.'" *Id.* ¶ 13. It also references the Maryland Consumer Protection Act ("MCPA"), *Md. Code Ann., Com. Law §§ 13-301-501* (West 2014), and the Maryland Antitrust Act ("MAA"), *Md. Code Ann., Com. Law §§ 11-201-213*.

On October 2, 2014, Manheim filed its Motion to Dismiss Pursuant to *Rules 12(b)(6)* and *12(b)(5)*. In response, on October 22, 2014, Mian filed a "Motion to Strike Defendant's Motion with his Memorandum of Law" (hereinafter "Opp. Mot. Dismiss"), in which he both requested that the Court strike Manheim's Motion to Dismiss and made substantive arguments refuting Manheim's contention that the Complaint failed to state a claim. The Court treats Mian's filing as both a Motion to Strike and a Memorandum in Opposition to the Motion to Dismiss. Both **[*4]** the Motion to Dismiss and the Motion to Strike have been fully briefed and are ripe for adjudication.

DISCUSSION

I. Plaintiff's Motion to Strike

The Court first addresses Mian's Motion to Strike the Motion to Dismiss. Under *Federal Rule of Civil Procedure 12(f)*, the court "may strike from a pleading any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. In this case, the Motion to Dismiss is neither a pleading, *see* *Thomas v, Bet Sound-Stage Rest./Brett Co, Inc., 61 F. Supp. 2d. 448, 458 (D. Md. 1999)* ("As motions to dismiss are not pleadings. Plaintiff's motions to strike are inappropriate."), nor is it redundant, immaterial, impertinent, or scandalous in its content. Mian argues that the Court should strike the Motion because Manheim did not answer the Complaint, as required by *Federal Rule of Civil Procedure 8(b)(1)(B)*, and "instead, adopted an irregular way in the answer to mislead the Court with redundant and impertinent material." Opp. Mot. Dismiss at 2. Mian is correct that Manheim's Motion to Dismiss is not an answer under Rule 8(b)(1)(B), However, under *Federal Rule of Civil Procedure 12(b)*, a defendant is permitted, before filing its answer, to assert various defenses by motion, including a motion to dismiss for failure to state a claim upon which relief can be granted, *Fed. R. Civ. P. 12(b)(6)*. Manheim's Motion to Dismiss is properly filed, and its content is not redundant, immaterial, impertinent, **[*5]** or scandalous. *See* *Schultz v. Braga, 290 F. Supp. 2d 637, 654-55 (D. Md. 2003)* (explaining that motions to strike "should be denied unless the allegations have no possible relation to the controversy and may cause prejudice to one of the parties") (citation and internal quotation marks omitted)). Thus, Mian's Motion to Strike is denied.

II. Defendant's Motion to Dismiss

In its Motion to Dismiss, Manheim argues that the Complaint should be dismissed under both *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim and under *Rule 12(b)(5)* for insufficient service of process. Although Mian does not number his causes of action, the Complaint invokes three statutes: *7 U.S.C. § 213*, the MCPA, and the MAA. The Court addresses each in turn and concludes that Mian does not state a cause of action under any of the three. Because the Court dismisses the Complaint with prejudice for failure to state a claim, the Court does not reach the question whether service was insufficient in this case.

A. Legal Standard

In order to defeat a *Federal Rule of Civil Procedure 12(b)(6)* motion, a complaint must allege enough facts to state a plausible claim for relief. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is plausible when "the plaintiff pleads *factual content* that allows the Court to draw the reasonable inference that the defendant is liable for **[*6]** the misconduct alleged." *Iqbal, 556 U.S. at 678* (emphasis added). In assessing whether this standard has been met, the Court must examine the complaint as a whole, consider the factual allegations in the complaint as true. and construe the factual allegations in the light most favorable to the plaintiff. *Albright v. Oliver, 510 U.S. 266, 268, 114 S. Ct. 807, 127 L. Ed. 2d 114 (1994)*: *Lambeth v. Bd. of Comm'rs of Davidson Cnty., 407 F.3d 266, 268 (4th Cir. 2005)*. However, legal conclusions or conclusory statements do not suffice and are not entitled to the assumption of truth. *Iqbal, 556 U.S. at 678*. Notably, "a document filed *pro se* is to be liberally construed, and a *pro se* complaint, however manfully pleaded, must be held to less stringent standards than formal pleadings drafted by lawyers." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (citations omitted).

B. *7 U.S.C. § 213*

In the Complaint. Mian pleads that 'Vile applicable law here is *7 U.S. Code Section 213* which provides 'Prevention of unfair, discriminatory, or deceptive practice." Compl. ¶ 13. However. *7 U.S.C. § 213* is a subsection of the Packers and Stockyards Act of 1921. *7 U.S.C. §§ 181-231 (2012)*. and applies only to persons engaged in the business of conducting or operating a livestock stockyard. The text of *§ 213* states:

> It shall be unlawful for any stockyard owner, market agency, or dealer to engage in or use any unfair, unjustly discriminatory, or deceptive practice or device in connection **[*7]** with determining whether persons should be authorized to operate at the stockyards, or with the receiving., marketing, buying, or selling on a commission basis or otherwise, feeding, watering, holding, delivery, shipment, weighing, or handling of livestock.

7 U.S.C. § 213. The definition a stockyard under the statute is any place, establishment, or facility" that is "conducted, operated, or managed" as a "public market for livestock producers, feeders, market agencies. and buyers, consisting of pens, or other inclosures, and their appurtenances, in which live cattle, sheep, swine, horses, mules, or goats are received, held, or kept for sale or shipment in commerce." *Id.* *§ 202*. Because, as the Complaint alleges, Manheim is engaged in the sale of cars, not livestock, any claim under *7 U.S.C. § 213* is dismissed with prejudice.

C. The Maryland Consumer Protection Act

Mian also alleges that Manheim violated the MCPA. Specifically, the Complaint cites § 13-301(1) of the MCPA, a provision of the statute that defines "unfair or deceptive trade practices." However, any attempt by Mian to state a cause of action under the MCPA is unsuccessful for several reasons.

First, the MCPA specifically prohibits those practices that deceive or mislead "consumers." **[*8]** The MCPA defines a consumer as an actual or prospective purchaser, lessee, or recipient of consumer goods, consumer services, consumer realty, or consumer credit." *Md. Code Ann., Com. Law § 13-101(d)(1)*. It further defines "consumer" goods, services, realty, and credit, as those that "are primarily for personal, household, family, or agricultural purposes." *Id. § 13-101(d)(1)*. In this case, the Complaint alleges that Mian was a "wholesale used car dealer" doing business with Manheim to sell his cars through Manheim's auction services. Compl. at 1-2. Thus, Mian does not, and cannot allege that the services were for personal, household, family or agricultural purposes. Because Mian is not a "consumer' under the MCPA. his claim will be dismissed with prejudice.

Furthermore, even if Mian were a "consumer" under the statute, his claim would be dismissed because he fails sufficiently to state a claim. In order to state a claim under the MCPA, a plaintiff must adequately plead that (1) the defendant engaged in an unfair or deceptive practice or misrepresentation, (2) the plaintiff relied upon the representation, and (3) doing so caused the plaintiff actual injury. *Currie v. Wells Fargo Bank, 950 F. Supp. 2d 788, 796 (D. Md. 2013)* (citation omitted). The MCPA defines an "unfair or deceptive trade practice" **[*9]** as a "false, falsely disparaging, or misleading oral or written statement, visual description, or other representation of any kind which has the capacity, tendency, or effect of deceiving or misleading consumers." *Md. Code Ann., Com. Law § 13-301(1)*. Because an MCPA claim involves fraud, it is subject to the heightened pleading standards of *Federal Rule of Civil Procedure 9(b)*. *Spaulding v. Wells Fargo Bank. N.A., 714 F.3d 769, 781 (4th Cir. 2013)*. Under *Rule 9(b)*, a plaintiff must plead with particularity the circumstances of the fraud, including "the time, place, and contents of the false representations, as well as the identity of the person making the misrepresentation and what he obtained thereby." *Harrison v. Westinghouse Savannah River Co., 176 F.3d 776, 783-84 (4th Cir. 1999)* (citations omitted).

In this case, Mian takes issue with Manheim's practice of assigning earlier lane placements on its lot to those sellers with higher-volume inventories, but he does not allege that Manheim ever made any false representations regarding its practices, or that Manheim otherwise misled or deceived Mian in any way. Instead, Mian believes that Manheim's assignment practice was unfair to those smaller dealers with fewer units, like himself, and that it should therefore fall within the ambit of the MCPA's prohibition against unfair or deceptive trade practices. As explained above, however, to state an MCPA claim, a plaintiff **[*10]** must allege there was a false or misleading representation or some kind. which had the effect of *deceiving* the plaintiff. Mian's allegations establish that, while he disagreed with Manheim's policies as a matter of principle, he was never deceived by any representations Manheim made, and that, to the contrary, he was fully aware of their practices. Such allegations are insufficient to state a claim under the MCPA. Mian's claim is therefore dismissed.

D. The Maryland Antitrust Act

Finally. Mian alleges that Manheim's practices violate the MAA. The Complaint does not cite to a specific provision or the MAA, but in his Opposition, Mian argues that Manheim was in violation of *Md. Code Ann.. Com. Law §§ 11-204(a)(3)*. 11-204(a)(4). and 11-204(a)(5). Mian fails to state a claim under any of these provisions.

Subsections 11-204(a)(3) and 11-204(a)(4) do not apply in this case because they deal with prohibited price discrimination. Subsection 11-204(a)(3) would prohibit Manheim from directly or indirectly discriminating in price among its dealers, if the effects of the discrimination may substantially lessen competition, tend to create a monopoly, or injure, destroy, or prevent competition. *Md. Code Ann., Com. Law § 11-204(a)(3)(i)—(iii)*. Subsection 11-204(a)(4) **[*11]** would prohibit Manheim from making payments or any other compensation to a dealer, unless the payment "is available on proportionally equal terms to all other 'dealers] competing in the distribution of the service or commodity." *Id. § 11-204(a)(4)*. Here, Mian does not allege anywhere in the Complaint that Manheim charged him a discriminatory price, or that Manheim made any payments to dealers on an unequal basis. Because there are no factual allegations in the Complaint from which it can be inferred that Manheim was engaged in price discrimination, any claim under *§ 11-204(a)(3)* or *§ 11-204(a)(4)* is dismissed.

As for *§ 11-204(a)(5)*, that subsection provides that a person may not:

> Discriminate in favor of one purchaser against another purchaser of a commodity bought for resale by contracting to furnish, furnishing, or contributing to the furnishing of any service or facility connected with the processing, handling, sale, or offering for sale of the commodity on terms not accorded to all purchasers on proportionally equal terms.

Id. § 11-204(a)(5).

Mian cannot allege a plausible claim under this provision because it bars discrimination relating to the provision of services or facilities in favor of one purchaser against another purchaser of a commodity bought **[*12]** for resale." *Id.*, "Commodity" is defined as "goods, wares, merchandise, machinery, supplies, or any other articles in trade or commerce." *Id.* § 11-201(c). This provision is designed to address the situation where a wholesaler or retailer purchases goods from a supplier to then be resold to wholesale or retail customers, but is subjected to discrimination by the supplier in the provision of advertising, promotional. or merchandising services or facilities. See *Hinkleman v. Shell Oil Co., 962 F.2d 372. 380 (4th Cir. 1992)*; *Ludwig v. Am. Greetings Corp., 264 F.2d 286, 288-89 (6th Cir. 1959)* (finding, a violation of *§ 2(e)* of the Robinson-Patman Act. a parallel provision of federal ***antitrust law***, where a greeting card payment "is available on proportionally equal terms to all other [dealers] competing in the distribution of the service or commodity." *Id.* *§ 11-204(a)(4)*. Here, Mian does not allege anywhere in the Complaint that Manheim charged him a discriminatory price, or that Manheim made any payments to dealers on an unequal basis. Because there are no factual allegations in the Complaint from which it can be inferred that Manheim was engaged in price discrimination, any claim under *§ 11-204(a)(3)* or *§ 11-204(a)(4)* is dismissed.

As for *§ 11-204(a)(5)*, that subsection provides that a person may not:

> Discriminate in favor of one purchaser against another purchaser of a commodity bought **[*13]** for resale . . . by contracting to furnish, furnishing, or contributing to the furnishing of any service or facility connected with the processing, handling, sale, or offering for sale of the commodity on terms not accorded to all purchasers on proportionally equal terms.

Id. *§ 11-204(a)(5)*.

Mian cannot allege a plausible claim under this provision because it bars discrimination relating to the provision of services or facilities "in favor of one purchaser against another purchaser of a commodity bought for resale." *Id.* "Commodity" is defined as "goods, wares, merchandise, machinery, supplies, or any other articles in trade or commerce." *Id.* § 11-201(c). This provision is designed to address the situation where a wholesaler or retailer purchases goods from a supplier to then be resold to wholesale or retail customers, but is subjected to discrimination by the supplier in the provision of advertising, promotional, or merchandising services or facilities. *See* *Hinkleman v. Shell Oil Co., 962 F.2d 372, 380 (4th Cir. 1992)*; *Ludwig v. Am. Greetings Corp., 264 F.2d 286, 288-89 (6th Cir. 1959)* (finding a violation of *§ 2(e)* of the Robinson-Patman Act, a parallel provision of federal ***antitrust law***, where a greeting card supplier unfairly provided free greeting card displays to certain retailers as an improper inducement to disadvantage a wholesaler). **[*14]** [2]

Although a used car would qualify as a "commodity," Mid-Atlantic and the other dealers doing business with Manheim were not purchasing cars from Manheim for resale, nor was Manheim purchasing cars from the dealers. Rather, as Mian alleges, Manheim is engaged in the business of providing a service to car dealers such as Mid-Atlantic, in that it "provides auction services to wholesale and retail dealers registered with them . . . charging commission on sold cars and no-sale charges on unsold cars." Compl. ¶ 3. Significantly, although the language of *§ 11-204(a)(3)* prohibits price discrimination "among purchasers of commodities or services," and *§ 11-204(a)(4)* prohibits discriminatory payments made in connection with the sale of "any service or commodity," the language of *§ 11-204(a)(5)* prohibits discrimination against a purchaser of a "commodity bought for resale" only, and notably

[2] In analyzing state claims under *§ 11-204(a)(5)*, the United States Court of Appeals for the Fourth Circuit has looked to cases construing § 2(e) of the Robinson-Patman Act, codified as *15 U.S.C. § 13(e)*, because the statutory language in the two provisions is nearly identical. *See* *Hinkleman, 962 F.2d at 379*.

does not cover purchasers of services. *Md. Code Ann., Com. Law § 11-204(a)(3)-(5)*. Because neither Mian nor Mid-Atlantic was a "purchaser of a commodity." **[*15]** much less a "purchaser of a commodity bought for resale," in the context of their interactions with Manheim, there can be no cause of action under *§ 11-204(a)(5)*. *See Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 546-47 (9th Cir. 1983)* (dismissing a claim under *§ 2(e)* of the Robinson-Patman Act because the plaintiff's allegation that it had been subject to discrimination in relation to photofinishing equipment it had purchased for use in its operations, rather than for resale to customers, failed sufficiently to assert that it was a "purchaser of a commodity bought for resale" as required to state a claim). Because Mian has not and cannot state a plausible claim under *§ 11-204(a)(5)* or any of the other cited provisions of the MAA, his MAA claim is dismissed with prejudice,

CONCLUSION

For the foregoing reasons, the Motion to Strike the Motion to Dismiss is DENIED, and the Motion to Dismiss is GRANTED. The Complaint shall be dismissed with prejudice. A separate Order follows.

Date: May 22, 2015

/s/ Theodore D. Chuang

THEODORE D. CHUANG

United States District Judge

ORDER

For the reasons stated in the foregoing Memorandum Opinion, it is hereby ORDERED that:

1. The Motion to Strike the Motion to Dismiss, ECF No. 13, filed by Plaintiff Mohammad A. Mian is DENIED;

2. The Motion to Dismiss, ECF No. **[*16]** 9, filed by Defendant Manheim Remarketing, Inc., d/b/a Manheim Baltimore-Washington, is GRANTED; and
3. The Complaint is DISMISSED with prejudice.

Date: May 22, 2015

No. 14-4624

Reporter

787 F.3d 638 *; 2015 U.S. App. LEXIS 8809 **; 2015-1 Trade Cas. (CCH) P79,178

PEOPLE OF THE STATE OF NEW YORK, by and through ERIC T. SCHNEIDERMAN, Attorney General of the State of New York, Plaintiff-Appellee, v. ACTAVIS PLC, FOREST LABORATORIES, LLC, Defendants-Appellants.

Subsequent History: US Supreme Court certiorari dismissed by *Allergan PLC v. New York, 136 S. Ct. 581, 193 L. Ed. 2d 421, 2015 U.S. LEXIS 7671 (U.S., 2015)*

Prior History: **[**1]** Appeal from the United States District Court for the Southern District of New York. No. 14 Civ. 7473 Robert W. Sweet, Judge.

The State of New York brought this antitrust action against Defendant-Appellant Actavis plc and its wholly-owned subsidiary Forest Laboratories, LLC (collectively, "Defendants"). New York alleges that as Namenda IR, Defendants' twice-daily drug designed to treat moderate-to-severe Alzheimer's disease, neared the end of its patent exclusivity period in July 2015, Defendants introduced a new once-daily version called Namenda XR. The patents on XR ensure exclusivity, and thus prohibit generic versions of XR from entering the market, until 2029. Faced with the prospect of competition from generic IR, Defendants decided to withdraw virtually all Namenda IR from the market in order to force Alzheimer's patients who depend on Namenda IR to switch to XR before generic IR becomes available. Because generic competition depends heavily on state drug substitution laws that allow pharmacists to substitute generic IR for Namenda IR—but not for XR, New York alleges that Defendants' forced-switch scheme would likely impede generic competition for IR. Moreover, the substantial transaction **[**2]** costs of switching from once-daily XR back to twice-daily IR therapy would likely further ensure that Defendants would maintain their effective monopoly in the relevant drug market beyond the time granted by their IR patents.

The United States District Court for the Southern District of New York (Robert W. Sweet, Judge) issued a preliminary injunction barring Defendants from restricting access to Namenda IR prior to generic IR entry. We conclude that the district court did not abuse its discretion by granting New York's motion for a preliminary injunction because New York has demonstrated a substantial likelihood of success on the merits of its claim under the Sherman Act, *15 U.S.C. § 2*, and has made a strong showing of irreparable harm to competition and consumers in the absence of a preliminary injunction. Accordingly, we affirm the district court's order issuing a preliminary injunction.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

In compliance with the Federal Food, Drug, and Cosmetic Act, *21 U.S.C.S. § 301 et seq.*, when a pharmaceutical manufacturer seeks to bring a new drug to market, it must submit a New Drug Application (NDA) for approval by the U.S. Food and Drug Administration. *21 U.S.C.S. § 355*. An NDA must contain scientific evidence that demonstrates the drug is safe and effective, which inevitably requires a long, comprehensive, and costly testing process. NDA-approved drugs are generally referred to as brand-name or brand drugs. An approved brand drug enjoys a period of patent exclusivity in the market at the end of which one or more generic drugs, exhibiting the same characteristics as the brand drug, may enter the market at a lower price to compete with the brand drug.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN2[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Drug Price Competition and Patent Term Restoration Act, Pub. L. No. 98-417, 98 Stat. 1585, promotes competition from generic substitute drugs. It permits a manufacturer that seeks to market a generic version of an approved New Drug Application (NDA) drug to file what is known as an Abbreviated New Drug Application (ANDA). *21 U.S.C.S. § 355(j)*. An ANDA allows a generic manufacturer to rely on the studies submitted in connection with the already-approved brand drug's NDA to show that the generic is safe and effective, provided that the ANDA certifies that the generic drug has the same active ingredients as and is biologically equivalent or bioequivalent to the already-approved drug. *§ 355(j)(2)(A)(iv)*. A generic drug is bioequivalent to a brand drug if the rate and extent of absorption of the active ingredient is the same as that of the brand drug. *§ 355(j)(8)(B)(i)*. In other words, two drugs are bioequivalent if they deliver the same amount of the same active ingredient content into a patient's blood stream over the same amount of time.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN3[] **Standards of Review, Abuse of Discretion**

An appellate court reviews a district court's grant of a preliminary injunction for abuse of discretion. A district court has abused its discretion if it based its ruling on an error of law or a clearly erroneous assessment of the evidence, or if its decision cannot be located within the range of permissible decisions. The appellate court reviews legal conclusions, such as the appropriate standard for relief, de novo.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] **Remedies, Injunctions**

Section 16 of the Clayton Act entitles a party to obtain injunctive relief against threatened loss or damage by a violation of the antitrust laws. A party seeking a preliminary injunction must ordinarily establish: (1) irreparable harm; (2) either (a) a likelihood of success on the merits, or (b) sufficiently serious questions going to the merits of its claims to make them fair ground for litigation, plus a balance of the hardships tipping decidedly in favor of the moving party; and (3) that a preliminary injunction is in the public interest. A court holds the movant to a heightened standard where: (i) an injunction is mandatory; or (ii) the injunction will provide the movant with substantially all the relief sought and that relief cannot be undone even if the defendant prevails at a trial on the merits. When either condition is met, the movant must show a clear or substantial likelihood of success on the merits, and make a strong showing of irreparable harm, in addition to showing that the preliminary injunction is in the public interest.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN5[] **Attempts to Monopolize, Elements**

Section 2 of the Sherman Act makes it an offense to monopolize, or attempt to monopolize, any part of the trade or commerce among the several states. *15 U.S.C.S. § 2*. To establish monopolization in violation of *§ 2*, a plaintiff must prove not only that the defendant possessed monopoly power in the relevant market, but that it willfully acquired or maintained that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct. In order to show attempted monopolization, the plaintiff must prove: (1) that the defendant has engaged in predatory or anticompetitive conduct; (2) with a specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power. Attempted monopolization, unlike monopolization, requires a finding of specific intent.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN6[] **Actual Monopolization, Claims**

Once a plaintiff establishes that a monopolist's conduct is anticompetitive or exclusionary, the monopolist may proffer non-pretextual pro-competitive justifications for its conduct. The plaintiff may then either rebut those justifications or demonstrate that the anticompetitive harm outweighs the pro-competitive benefit.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN7[] **Actual Monopolization, Anticompetitive & Predatory Practices**

As a general rule, courts are properly very skeptical about claims that competition has been harmed by a dominant firm's product design changes. Product innovation generally benefits consumers and inflicts harm on competitors, so courts look for evidence of exclusionary or anticompetitive effects in order to distinguish between conduct that defeats a competitor because of efficiency and consumer satisfaction and conduct that impedes competition through means other than competition on the merits. Product redesign is anticompetitive when it coerces consumers and impedes competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN8[] **Actual Monopolization, Anticompetitive & Predatory Practices**

When a monopolist combines product withdrawal with some other conduct, the overall effect of which is to coerce consumers rather than persuade them on the merits, and to impede competition, its actions are anticompetitive under the Sherman Act.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Patent Law > General Overview

HN9[] **Misuse of Rights, Patent Misuse Defense**

A patent does not confer upon the patent holder an absolute and unfettered right to use its intellectual property as it wishes, and intellectual property rights do not confer a privilege to violate the antitrust laws.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

HN10[] **Remedies, Injunctions**

Irreparable harm is injury that is neither remote nor speculative, but actual and imminent and that cannot be remedied by an award of monetary damages. To obtain injunctive relief under § 16 of the Clayton Act, that injury must be an injury of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.

Judges: Before: WALKER, RAGGI, and DRONEY, Circuit Judges.

Opinion by: JOHN M. WALKER, JR.

Opinion

[*642] JOHN M. WALKER, JR., *Circuit Judge*:

The State of New York brought this antitrust action against Defendant-Appellant Actavis plc and its wholly-owned subsidiary Forest Laboratories, LLC (collectively, "Defendants"). New York alleges that as Namenda IR, Defendants' twice-daily drug designed to treat moderate-to-severe Alzheimer's disease, neared the end of its patent exclusivity period in July 2015, Defendants introduced a new once-daily version called Namenda XR. The patents on XR ensure exclusivity, and thus prohibit generic versions of XR from entering the market, until 2029. Faced with the prospect of competition from generic IR, Defendants decided to withdraw virtually all Namenda IR from the market in order to force Alzheimer's patients who depend on Namenda IR to switch to XR before generic IR becomes available. Because **[**4]** generic competition depends heavily **[*643]** on state drug substitution laws that allow pharmacists to substitute generic IR for Namenda IR—but not for XR, New York alleges that Defendants' forced-switch scheme would likely impede generic competition for IR. Moreover, the substantial transaction costs of switching from once-daily XR back to twice-daily IR therapy would likely further ensure that Defendants would maintain their effective monopoly in the relevant drug market beyond the time granted by their IR patents.

The United States District Court for the Southern District of New York (Robert W. Sweet, *Judge*) issued a preliminary injunction barring Defendants from restricting access to Namenda IR prior to generic IR entry. We conclude that the district court did not abuse its discretion by granting New York's motion for a preliminary injunction because New York has demonstrated a substantial likelihood of success on the merits of its claim under the Sherman Act, *15 U.S.C. § 2*, and has made a strong showing of irreparable harm to competition and consumers in the absence of a preliminary injunction. Accordingly, we affirm the district court's order issuing a preliminary injunction.

BACKGROUND

This case raises **[**5]** a novel question of ***antitrust law***: under what circumstances does conduct by a monopolist to perpetuate patent exclusivity through successive products, commonly known as "product hopping,"[2] violate the Sherman Act, *15 U.S.C. §§ 1* and *2*. This question is an issue of first impression in the circuit courts. Determining whether Defendants' actions are unlawfully anticompetitive requires some understanding of the idiosyncratic market characteristics of the complex and highly-regulated pharmaceutical industry, as well as some peculiar characteristics of treatment for Alzheimer's disease. We begin by describing several key features of the pharmaceutical industry.

I. FDA Requirements, the Hatch-Waxman Act, and State Drug Substitution Laws

HN1[] In compliance with the Federal Food, Drug, and Cosmetic Act, *21 U.S.C. §§ 301-399f*, when a pharmaceutical manufacturer seeks to bring a new drug to market, it must submit a New Drug Application ("NDA") for approval by the U.S. Food and **[**6]** Drug Administration ("FDA"). *21 U.S.C. § 355*. An NDA must contain scientific evidence that demonstrates the drug is safe and effective, which inevitably requires "a long, comprehensive, and costly testing process." *F.T.C. v. Actavis, Inc., 133 S. Ct. 2223, 2228, 186 L. Ed. 2d 343 (2013)*. NDA-approved drugs are generally referred to as brand-name or brand drugs. An approved brand drug

[2] The term "product hopping" was coined by Herbert Hovenkamp. *See* Alan Devlin, *Exclusionary Strategies in the Hatch-Waxman Context*, *2007 Mich. St. L. Rev. 631, 658 (2007)* (citing Herbert Hovenkamp et al., *IP and Antitrust: An Analysis of Antitrust Principals Applied to Intellectual Property Law* (2002)).

enjoys a period of patent exclusivity in the market at the end of which one or more generic drugs,[3] exhibiting the same characteristics as the brand drug, may enter the market at a lower price to compete with the brand drug.

In 1984, Congress amended the Federal Food, Drug, and Cosmetic Act by enacting the Drug Price Competition and Patent Term Restoration Act (the "Hatch-Waxman Act" or "Hatch-Waxman"), Pub. L. **[*644]** No. 98-417, 98 Stat. 1585. Hatch-Waxman was designed to serve the dual purposes of both encouraging generic drug competition in order to lower drug prices and incentivizing brand drug manufacturers to innovate through patent extensions. To incentivize **[**7]** innovation, Hatch-Waxman grants brand manufacturers opportunities to extend their exclusivity period beyond the standard 20-year patent term: it allows a brand manufacturer to seek a patent extension of up to five years to compensate for time that lapsed during the FDA regulatory process, *35 U.S.C. § 156*, and an additional six-month period of "pediatric exclusivity" if the manufacturer conducts certain pediatric studies, *21 U.S.C. § 355a*. Defendants applied for, and received, both extensions for Namenda IR.

HN2[] Hatch-Waxman also promotes competition from generic substitute drugs. It permits a manufacturer that seeks to market a generic version of an NDA-approved drug to file what is known as an Abbreviated New Drug Application ("ANDA"). *See* *21 U.S.C. § 355(j)*; *see also* *In re Adderall XR Antitrust Litig., 754 F.3d 128, 130 (2d Cir. 2014)*. An ANDA allows a generic manufacturer to rely on the studies submitted in connection with the already-approved brand drug's NDA to show that the generic is safe and effective, provided that the ANDA certifies that the generic drug has the same active ingredients as and is "biologically equivalent" or "bioequivalent" to the already-approved drug.[4] *21 U.S.C. § 355(j)(2)(A)(iv)*; *see also* *Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S, 132 S. Ct. 1670, 1676, 182 L. Ed. 2d 678 (2012)* (citing *21 U.S.C. §§ 355(j)(2)(A)(ii)*, *(iv)*).

A generic drug is bioequivalent to a brand drug if "the rate and extent of absorption" of the active ingredient is the same as that of the brand drug. *21 U.S.C. § 355(j)(8)(B)(i)*. In other words, two drugs are bioequivalent if they deliver the same amount of the same active ingredient content into a patient's blood stream over the same amount of time. By enabling generic manufacturers to "piggy-back" on a brand drug's scientific studies, Hatch-Waxman "speeds the introduction of low-cost generic drugs to market, thereby furthering drug competition." *Actavis, 133 S. Ct. at 2228* (internal quotation marks, alteration, and citation omitted); *see also* H.R. Rep. No. 98-857, pt. 2, at 9 (1984) (stating the Hatch-Waxman Act's "policy objective" was to "get[] safe and effective generic substitutes on the market as quickly as possible after the expiration of the patent").

By the time Congress enacted the Hatch-Waxman Act, many states had enacted drug substitution laws to further encourage generic competition.[5] Today, all 50 states and the District of Columbia have drug substitution laws.[6] Although **[*645]** the specific terms of these laws vary by state, drug substitution laws either permit or require pharmacists **[**9]** to dispense a therapeutically equivalent, lower-cost generic drug in place of a brand drug absent express direction from the prescribing physician that the prescription must be dispensed as written.[7] For example,

---

[3] Generic drugs "are copies of brand-name drugs and are the same as those brand name drugs in dosage form, safety, strength, route of administration, quality, performance characteristics and intended use." FDA, *Understanding Generic Drugs*, *http://1.usa.gov/1SjEIso* (last visited Apr. 14, 2015).

[4] An ANDA also requires a manufacturer to demonstrate other measures of equivalence between the brand **[**8]** and generic drugs, which are not relevant here. *21 U.S.C. § 355(j)(2)(A)*.

[5] *See* Alison Mason & Robert L. Steiner, Fed. Trade Comm'n, *Generic Substitution and Prescription Drug Prices: Economic Effects of State Drug Product Selection Laws* 1 (1985), *available at* *http://1.usa.gov/1IS44Ju* ("FTC, *Generic Substitution*").

[6] Michael A. Carrier, *A Real-World Analysis of Pharmaceutical Settlements: The Missing Dimension of Product Hopping*, *62 Fla. L. Rev. 1009, 1017 (2010)* ("Carrier, *A Real-World Analysis*"); *see also* Jessie Cheng, Note, *An Antitrust Analysis of Product Hopping in the Pharmaceutical Industry*, *108 Colum. L. Rev. 1471, 1479-80 (2008)* ("Cheng, *Product Hopping*").

[7] The FTC, like the district court, has found that only a "modest[]" difference in the frequency of substitution rates exists between states with mandatory substitution laws and states with permissive substitution laws. *See* FTC, *Generic Substitution*, at 99.

New York's drug substitution law requires a pharmacist to "substitute a less expensive drug product containing the same active ingredients, dosage form and strength as the drug product prescribed" provided certain conditions are met. *N.Y. Educ. Law § 6816-a(1)*.

All state drug substitution **[**10]** laws prohibit pharmacists from substituting generic drugs that are not therapeutically equivalent to the brand drug, but state laws do not all define therapeutic equivalence in the same way.[8] Thirty states, including New York and the District of Columbia, adopt the FDA's definition of therapeutically equivalent and only allow generic substitution if the FDA designates the generic as "AB-rated" in a publication commonly referred to as the "Orange Book."[9] *N.Y. Education Law § 6816-a(1)*; *N.Y. Public Health Law § 206(1)(o)*. To receive an AB-rating, a generic must not only be bioequivalent but pharmaceutically equivalent to the brand drug, meaning it has the same active ingredient, dosage form, strength, and route of administration as the brand drug. U.S. Dep't of Health & Human Servs., FDA, *Approved Drug Products with Therapeutic Equivalence Evaluations* vii-x (35th ed. 2015), *available at* *http://1.usa.gov/1PzbMxF* (the "Orange Book"). The AB-rating requirement is designed to provide guidance regarding which drugs are therapeutically equivalent, but, as has been observed, it also provides an opportunity for brand manufacturers to "game" the system.[10] S.A. 28.

Hatch-Waxman and state substitution laws were enacted, in part, because the pharmaceutical market is not a well-functioning market. In a well-functioning market, a consumer selects and pays for a product after evaluating the price and quality of the product. In the prescription **[*646]** drug market, however, the party who selects the drug (the doctor) does not fully bear its costs, which creates a price disconnect. Moreover, a patient can only obtain a prescription drug if the doctor writes a prescription for that particular drug. The doctor selects the drug, but the patient, or in most cases a third-party payor such as a public or private health insurer, pays for the drug. As a result, the doctor may not know or even care about the price and generally has no incentive to take the price into account. *See* American Antitrust Institute *Amicus* Brief in Support of Appellee ("AAI Br.") at 6; *see also* Intellectual Property and Antitrust Professors *Amicus* Brief in Support of Appellee ("IP and Antitrust Prof. Br.") at 12. As the Federal Trade **[**13]** Commission has explained:

> The basic problem is that the forces of competition do not work well in a market where the consumer who pays does not choose, and the physician who chooses does not pay. Patients have little influence in determining which products they will buy and what prices they must pay for prescription.

Fed. Trade Comm'n Bureau of Consumer Prot., *Drug Product Selection* 2-3 (1979), *available at* *http://bit.ly/1JqKd4G*. ("FTC, Drug Product Selection"). State substitution laws are designed to correct for this price

[9] Some states explicitly require generic drugs to have an AB-rating, some states adopt the requirements of an AB-rating without using the term, some states develop formularies that list permissible or impermissible drug substitutes, and some states give discretion to individual pharmacists as long as the drugs are pharmaceutically equivalent. *See* Vivian, *Generic-Substitution Laws* tbl.2.

[10] *See, e.g.*, Stacey L. Dogan & Mark A. Lemley, ***Antitrust Law*** *and Regulatory Gaming*, *87 Tex. L. Rev. 685, 709 (2009)* (explaining that the regulatory framework that governs the pharmaceutical industry "presents a perfect storm for regulatory gaming"); Cheng, *Product Hopping, at 1494* ("Product hopping itself amounts to little more than a thinly disguised scheme to game the pharmaceutical industry's regulatory system."); Intellectual Property and Antitrust Professors *Amicus* Brief in Support of Appellee ("IP and Antitrust Prof. Br.") at 3 (explaining that product hopping "presents a paradigmatic case of a regulatory game. . . . [It] exploits the product-approval process precisely because of its exclusionary effects and converts it into a tool for suppressing competition" (alterations in original)); American Antitrust Institute *Amicus* Brief in Support of Appellee **[**12]** ("AAI Br.") at 6, 10-11 (explaining that branded manufacturers can game the system by changing the form of the brand product before generics enter the market).

disconnect by shifting drug selection, between brand drugs and their corresponding generics from doctors, to pharmacists and patients, who have greater financial incentives to make price comparisons.[11] *See* AAI Br. at 8-9.

II. The Relevant Market

The **[**14]** relevant market, undisputed on appeal, is the memantine-drug market in the United States. Defendants manufacture Namenda, a memantine hydrochloride-based[12] ("memantine") drug designed to treat moderate-to-severe Alzheimer's disease. Namenda is currently available in two formulations: a twice-daily immediate-release drug, Namenda IR, and a once-daily extended-release drug, Namenda XR. When Forest introduced Namenda IR tablets **[*647]** in January 2004, Namenda IR was the first medication approved for individuals suffering from moderate-to-severe Alzheimer's disease.[13] Namenda IR became one of Forest's best-selling drugs—generating approximately $1.5 billion in annual sales in 2012 and 2013. The FDA approved Namenda XR in June 2010, and Forest began marketing XR in 2013. The two drugs are the only memantine therapies in their class—N-Methyl D-Aspartate ("NMDA") receptor antagonists—currently on the market.[14]

Namenda IR and Namenda XR have the same active ingredient and the same therapeutic effect. The relevant medical difference between the two is that IR, which is released immediately into the bloodstream, is taken twice a day while XR, which is released gradually, is taken once a day.[15] All other Alzheimer's disease treatments are administered once a day.

The non-medical difference between IR and XR relates to their patent protection. Defendants' patents on Namenda IR prohibit any manufacturer from marketing a generic version of IR until July 11, 2015 (Namenda IR's "exclusivity period").[16] The exclusivity period for Namenda XR does not expire until 2029. A brand drug's exclusivity period is

---

[11] Perhaps counter-intuitively, pharmacists have an incentive to dispense lower-cost generic drugs because pharmacies typically realize higher profit margins on generic drugs due to health plan incentives. *See* Antitrust Economists *Amicus* Brief in Support of Appellants ("Antitrust Economists Br.") at 12; *see also* Carrier, *A Real-World Analysis, at 1017* ("[State drug product selection] laws carve out a role for pharmacists, who are much more sensitive to prices than doctors.").

[12] Memantine is an N-Methyl D-Aspartate ("NMDA") receptor antagonist that affects the glutamate pathway in the brain. As expert Dr. Alan Jacobs, a neurologist in private practice, explained at the preliminary injunction hearing:

> Neurons in the brain communicate by signaling each other. Some of these **[**15]** signals are transmitted through an influx of calcium into a molecule on the surface of neurons called the NMDA receptor. This influx of calcium is triggered when glutamate, an excitatory neurotransmitter, docks at the NMDA receptor, causing the calcium influx. When patients enter the moderate stage of Alzheimer's disease, there can be overexcitation of the NMDA receptor by glutamate.

S.A. 16. Memantine-based drugs, like Namenda, partially block the brain's NMDA receptor in order to prevent "overexcitation" of that receptor, "which can cause toxicity to neurons in the brain." S.A. 17.

In contrast, the three other FDA-approved drugs on the market to treat Alzheimer's disease—Aricept, Exelon, and Razadyne—are all acetylcholinesterase inhibitors ("CIs"). CIs reduce the breakdown of acetylcholine, a chemical messenger that transmits information between nerve cells, in the brain. Rather than work on the glutamate pathway, like Namenda, CIs work on the acetylcholine pathway. CIs are generally prescribed to patients experiencing the early stage of Alzheimer's disease, and are prescribed in conjunction with—but not independently of—Namenda during the moderate-to-severe stages of Alzheimer's disease. **[**16]**

[13] Defendants also introduced a twice-daily liquid version of Namenda IR in 2005.

[14] Because CIs perform different functions, Aricept, Exelon, and Razadyne are not substitutes for Namenda.

[15] Additionally, Namenda IR and Namenda XR have different dosage forms. J.A. 673 n.57. Namenda IR is marketed in tablet form, whereas Namenda XR is marketed in capsule form. *Id.; see also Dosing for Patients Currently Taking NAMENDA*, *http://www.namendaxrhcp.com/patients-currently-taking-namenda.aspx* (last visited Apr. 16, 2014).

significant because when that period ends and generic versions enter **[**17]** the market, the brand drug often loses more than 80 to 90% of the market within six months. This period following the end of patent exclusivity has been referred to in this litigation and throughout the industry as the "patent cliff."

III. Defendants' Introduction of Namenda XR and Withdrawal of Namenda IR

Namenda IR and Namenda XR currently occupy the entire memantine-drug market. However, five generic versions of IR have tentative FDA approval to enter the market on July 11, 2015, and seven others may enter the market as early as October 2015. Because Namenda XR has a different strength and daily dosage regimen—Namenda IR involves two immediate-release tablets of 10mg each and Namenda XR involves one 28mg extended-release capsule[17]—the generic IR versions that are poised to enter the market will be therapeutically equivalent under FDA regulations to Namenda IR, but not to Namenda XR. Therefore, **[**18]** pharmacists are prohibited from substituting generic IR for Namenda XR under most, if not all, state drug substitution laws.

When Defendants brought Namenda XR to market in July 2013 (approximately three years after it was approved), they **[*648]** adopted so-called "product extension" strategies to convert patients from Namenda IR to Namenda XR and, thus, to avoid the patent cliff. Initially, Defendants sold both Namenda IR and XR but stopped actively marketing IR. During that time, they spent substantial sums of money[18] promoting XR to doctors, caregivers, patients, and pharmacists. They also sold XR at a discounted rate, making it considerably less expensive[19] than Namenda IR tablets, and issued rebates to health plans to ensure that patients did not have to pay higher co-payments for XR than for IR. The parties have referred to Defendants' efforts to transition patients to XR while IR was still on the market as the "soft switch," and we will adopt that term.

In early 2014, Defendants decided on a more direct approach. They were **[**19]** concerned that they would be unable to convert a significant percentage of Alzheimer's patients dependent upon memantine therapy from IR to XR prior to the entry of generic IR. Defendants' internal projections estimated that only 30% of Namenda IR users would voluntarily switch prior to July 2015. On February 14, 2014, Defendants publicly announced that they would discontinue Namenda IR on August 15, 2014, notified the FDA of their plans to discontinue Namenda IR, and published letters on their websites urging caregivers and healthcare providers to "discuss switching to Namenda XR" with their patients. S.A. 51-52. Defendants also sought to convert Namenda IR's largest customer base, Medicare patients, to XR by sending a letter to the Centers for Medicare & Medicaid Services requesting that the agency remove IR from the formulary list, so that Medicare health plans would not cover it. Their planned discontinuance was delayed by a disruption in XR production, and in June 2014, Defendants announced that Namenda IR would be available until the fall of that year.

But before Defendants withdrew IR entirely, intervening events again prompted them to modify their plans. In September 2014, New **[**20]** York State filed a complaint alleging that Defendants' planned withdrawal of Namenda IR violated the antitrust laws. Defendants subsequently entered into an agreement with Foundation Care, a mail-order-only pharmacy, to provide for limited access to Namenda IR if medically required. Under the terms of the agreement, Foundation Care is authorized to dispense Namenda IR tablets only after receiving a form from a doctor stating that it is "medically necessary" for the patient to take Namenda IR. Defendants estimated internally that less than 3% of current Namenda IR users would be able to obtain IR through Foundation Care. S.A. 67.

---

[16] Defendants' patents on Namenda IR prohibit generic entry until October 2015. But in 2009 and 2010, in order to resolve patent litigation, Forest entered into licensing agreements permitting ten generic competitors to enter the market three months before Namenda IR's official exclusivity period ends.

[17] *See Dosing for Patients Currently Taking NAMENDA*, Namenda XR, *http://www.namendaxrhcp.com/patients-currently-taking-namenda.aspx* (last visited Apr. 16, 2014).

[18] The original numbers have been redacted.

[19] The original numbers have been redacted.

Although the agreement with Foundation Care makes IR available to a limited number of patients, Defendants' actions effectively withdrew Namenda IR from the market. The parties have referred to Defendants' efforts to withdraw Namenda IR from the market as the "hard switch" or "forced switch," terms we also adopt. The hard switch began on February 14, 2014 with the announcement of Defendants' intention to withdraw Namenda IR and was suspended in September 2014 when Defendants agreed to a "standstill" during the litigation proceedings described below. Because **[**21]** a manufacturer does not simply withdraw a drug at once, absent pressing safety concerns, announcing the imminent discontinuation of a drug is tantamount to withdrawal.

[*649] IV. Procedural History

In September 2014, New York State filed a complaint in the District Court for the Southern District of New York (Robert W. Sweet, *Judge)* alleging that Defendants were violating the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*, as well as New York's Donnelly Act, *N.Y. Gen. Bus. Law § 340 et seq.*, and seeking a permanent injunction and damages. New York also sought a preliminary injunction barring Defendants from restricting access to Namenda IR during the course of the litigation.

New York's theory of antitrust liability, in substance, is as follows. As Namenda IR neared the end of its exclusivity period, Defendants introduced Namenda XR and, before generic IR was available, withdrew Namenda IR in order to force patients to switch from IR to XR (for which generic IR will not be substitutable under most states' laws). In doing so, Defendants intended to thwart generic entry into and competition in the memantine-drug market in order to maintain their monopoly in that market.

The district court held a five-day hearing on the preliminary-injunction **[**22]** motion, during which it received testimony from 24 witnesses and reviewed over 1,400 exhibits. After considering that evidence, the district court made several key findings. (1) Withdrawing Namenda IR from the market prior to generic entry forces Alzheimer's patients dependent on memantine therapy to switch to Namenda XR because it is the only available alternative; (2) The generic versions of IR poised to enter the market in July and October of 2015 will not be AB-rated to XR because they have different strengths and dosages; (3) Pharmacists will not be permitted to substitute generic IR for Namenda XR under New York and many other states' substitution laws because generic IR is not therapeutically equivalent to Namenda XR; (4) If Defendants forced Alzheimer's patients to switch to Namenda XR prior to generic entry, those patients would be very unlikely to switch back to twice-daily IR therapy even after less-expensive generic IR becomes available, due to the high transaction costs associated with Alzheimer's patients first switching from one formulation of a drug to a new formulation and then back to the original formulation ("reverse commuting"); (5) Preventing generic IR from competing **[**23]** under state drug substitution laws would likely thwart generic entry into and competition in the memantine-drug market; and (6) In withdrawing Namenda IR from the market, Defendants' explicit purpose was to impede generic competition and to avoid the patent cliff—which occurs at the end of a drug's exclusivity period when generics gain market share through state substitution laws.

Based on those findings, the district court granted New York's request for a preliminary injunction. The district court concluded that New York raised serious questions regarding the merits of its claims under *Sections 1* and *2* of the Sherman Act and the Donnelly Act, demonstrated the potential for irreparable harm, and concluded that the balance of the equities favored an injunction. The injunction states:

> 1. During the Injunction Term . . . the Defendants shall continue to make Namenda IR (immediate-release) tablets available on the same terms and conditions applicable since July 21, 2013 . . .
>
> 2. Defendants shall inform healthcare providers, pharmacists, patients, caregivers, and health plans of this injunction . . . and the continued availability of Namenda IR . . .
>
> **[*650]** 3. The Defendants shall not impose a "medical necessity" **[**24]** requirement or form for the filling of prescriptions of Namenda IR during the Injunction Term.

S.A. 137-38. The injunction is effective from the date of issuance, December 15, 2014, until "thirty days after July 11, 2015 (the date when generic memantine will first be available) (the 'Injunction Term')." S.A. 138. Defendants timely appealed the grant of the preliminary injunction, and we granted expedited review.

DISCUSSION

HN3[] We review a district court's grant of a preliminary injunction for abuse of discretion. *Faiveley Transp. Malmo AB v. Wabtec Corp., 559 F.3d 110, 116 (2d Cir. 2009)*. A district court has abused its discretion if it based its ruling on an error of law or a clearly erroneous assessment of the evidence, or if its "decision . . . cannot be located within the range of permissible decisions." *Id.* (internal quotation marks omitted). We review legal conclusions, such as the appropriate standard for relief, *de novo. See Somoza v. N.Y.C. Dep't of Educ., 538 F.3d 106, 112 (2d Cir. 2008)*.

On appeal, Defendants argue that (1) the district court applied the wrong legal standard for a preliminary injunction; (2) product hopping is not anticompetitive or exclusionary under *§ 2* of the Sherman Act; (3) Defendants' patent rights foreclose antitrust liability; (4) the agreement with Foundation Care does not violate *§ 1* of the Sherman **[**25]** Act; (5) New York failed to show irreparable harm; and (6) the injunction is vague and overbroad.

I. The Applicable Preliminary Injunction Standard

Defendants argue that the district court erred by applying the ordinary standard for a preliminary injunction, rather than a heightened standard, because the injunction provides New York with "substantially all the relief sought." Defendants' Brief ("Defs. Br.") at 25. We agree that a heightened standard applies.

HN4[] Section 16 of the Clayton Act entitles a party to obtain injunctive relief "against threatened loss or damage by a violation of the antitrust laws." *California v. Am. Stores Co., 495 U.S. 271, 280, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)* (quoting *15 U.S.C. § 26*). A party seeking a preliminary injunction must ordinarily establish (1) "irreparable harm"; (2) "either (a) a likelihood of success on the merits, or (b) sufficiently serious questions going to the merits of its claims to make them fair ground for litigation, plus a balance of the hardships tipping decidedly in favor of the moving party"; and (3) "that a preliminary injunction is in the public interest." *Oneida Nation of New York v. Cuomo, 645 F.3d 154, 164 (2d Cir. 2011)* (internal quotation marks omitted).

We have held the movant to a heightened standard where: (i) an injunction is "mandatory," or (ii) the injunction "will provide the movant with substantially **[**26]** all the relief sought and that relief cannot be undone even if the defendant prevails at a trial on the merits." *Tom Doherty Assocs., Inc. v. Saban Entm't, Inc., 60 F.3d 27, 33-34 (2d Cir. 1995)*. When either condition is met, the movant must show a "clear" or "substantial" likelihood of success on the merits, *Beal v. Stern, 184 F.3d 117, 123 (2d Cir. 1999)*, and make a "strong showing" of irreparable harm, *Doe v. N.Y. Univ., 666 F.2d 761, 773 (2d Cir. 1981)*, in addition to showing that the preliminary injunction is in the public interest.

The injunction issued by the district court in this case remains in place until 30 days after generics enter the market, and therefore "grant[s] plaintiffs substantially all the relief they ultimately sought, in effect, as if the injunction had **[*651]** been permanent." *Eng v. Smith, 849 F.2d 80, 82 (2d Cir. 1988)*. The district court found that Defendants' plan is contingent on switching patients to Namenda XR before generic IR enters the market. S.A. 20. The injunction, however, bars Defendants from withdrawing IR, and thus forcing a switch, "until thirty days after July 11, 2015 (the date when generic memantine will first be available)." S.A. 138. Because the injunction prevents Defendants' hard switch from succeeding, the injunction "render[s] a trial on the merits largely or partly meaningless." *Tom Doherty Assocs., 60 F.3d at 35*.[20] Accordingly, the heightened standard applies.

That conclusion, however, is of little import in this case because New York has satisfied the heightened standard. The district court did not abuse its discretion in granting a preliminary injunction because New York has demonstrated a substantial likelihood of success on the merits of its monopolization and attempted monopolization

[20] Although New York also seeks a permanent injunction, **[**27]** disgorgement, civil penalties, and damages, the preliminary injunction is the gravamen of the complaint.

claims under *§ 2* of the Sherman Act, *see* *Beal, 184 F.3d at 123*, and has made a strong showing that Defendants' conduct would cause irreparable harm to competition in the memantine-drug market and to consumers, *Doe, 666 F.2d at 773*. The district court's factual findings, which were based, for the most part, on Defendants' own internal documents, cannot be said to be clearly erroneous, and its injunction prohibiting Defendants from withdrawing Namenda IR prior to generic entry was not an abuse of discretion as being outside the range of permissible decisions.

II. Monopolization and Attempted Monopolization Under *§ 2* of the Sherman Act

HN5[] *Section 2* of the Sherman Act makes it an offense to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States." *15 U.S.C. § 2*; *see also* *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 495 (2d Cir. 2004)*. To establish **[**28]** monopolization in violation of *§ 2*, a plaintiff must prove not only that the defendant possessed monopoly power in the relevant market, but that it willfully acquired or maintained that power "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. "To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct." Id.* In order to show attempted monopolization, the plaintiff must prove: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. Attempted monopolization, unlike monopolization, requires a finding of specific intent. *See, e.g., Delaware & Hudson Ry. Co. v. Consol. Rail Corp., 902 F.2d 174, 180 (2d Cir. 1990)*.

Defendants' patents on Namenda IR indisputably grant them a legal monopoly in the U.S. memantine-drug market until July 11, 2015.[21] The parties do not dispute the district court's factual findings that the **[*652]** relevant market is the memantine-drug market in the United States and that Namenda IR and XR represent 100% of that market. S.A. 108-10. Consequently, **[**29]** the parties do not dispute that Defendants possess monopoly power. *See* *Geneva Pharms., 386 F.3d at 500* (monopoly power can be "proven directly through evidence of control over prices or the exclusion of competition," or "inferred from a firm's large percentage share of the relevant market").

Given that Defendants' monopoly power has been established, this case turns on whether Defendants willfully sought to maintain or attempted to maintain that monopoly in violation of *§ 2*. In *United States v. Microsoft Corp., 253 F.3d 34, 58-60, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc), the D.C. Circuit, sitting en banc, established a helpful framework for determining when a product change violates *§ 2* based on the rule-of-reason test articulated by the Supreme Court in *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*, and generally applied to antitrust claims. *See also* *Paycom Billing Servs., Inc. v. Mastercard Int'l, Inc., 467 F.3d 283, 289-90 (2d Cir. 2006)* (explaining that courts analyze most antitrust claims under the rule of reason).[22] Under the *Microsoft* framework, ***HN6***[] once a plaintiff establishes that a monopolist's conduct is anticompetitive or exclusionary, the monopolist may proffer "nonpretextual" procompetitive justifications for its conduct. *253 F.3d at 58-59*. The plaintiff may then either rebut those justifications or demonstrate that **[**30]** the anticompetitive harm outweighs the procompetitive benefit. *Id.*

---

[21] *See* *Precision Instrument Mfg. Co. v. Auto. Maint. Mach. Co., 324 U.S. 806, 816, 65 S. Ct. 993, 89 L. Ed. 1381, 1945 Dec. Comm'r Pat. 582 (1945)* ("[A] patent is an exception to the general rule against monopolies and to the right to access to a free and open market.").

[22] *See also* *Mid-Texas Commc'ns Sys., Inc. v. Am. Tel. & Tel. Co., 615 F.2d 1372, 1389 n.13 (5th Cir. 1980)* ("It is clear, however, that the analysis under *section 2* is similar to that under *section 1* regardless whether the rule of reason label is applied per se." (citing *Byars v. Bluff City News Co., 609 F.2d 843, 860 (6th Cir. 1979))*); *Cal. Computer Prods., Inc. v. Int'l Bus. Machs. Corp., 613 F.2d 727, 737 (9th Cir. 1979)* ("[U]nder *§ 2* attempt as with *§ 1* monopolization individual conduct is measured against the same 'reasonableness' standard governing concerted and contractual activity under *§ 1*.").

a. Anticompetitive and Exclusionary Conduct

HN7[] "As a general rule, courts are properly very skeptical about claims that competition has been harmed by a dominant firm's product design changes." *Microsoft, 253 F.3d at 65*; *see also* *Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 544-45 (9th Cir. 1983)*. Product innovation generally benefits consumers and inflicts harm on competitors, so courts look for evidence of "exclusionary or anticompetitive effects" in order to "distinguish 'between conduct that defeats a competitor because of efficiency and consumer satisfaction'" and conduct that impedes competition through means other than competition on the merits. *Trans Sport, Inc. v. Starter Sportswear, Inc., 964 F.2d 186, 188-89 (2d Cir. 1992)* (quoting *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1359 (2d Cir. 1988))*.

Well-established case law makes clear that product redesign is anticompetitive when it coerces consumers and impedes competition.[23] The leading case in **[*653]** our circuit for *§ 2* liability based on product redesign is *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)*. In that case, Kodak simultaneously **[**31]** introduced its new Kodacolor II film and new Kodak 110 camera, which was designed so that it could only be used with the Kodacolor II film (the "110 system"). *Id. at 277-78*. Kodak, which possessed a lawful monopoly in film but not in cameras, heavily advertised Kodacolor II film as "a remarkable new film," and for 18 months, Kodak made Kodacolor II film only for the 110 camera. *Id. at 278*. Berkey Photo, Inc. ("Berkey"), a smaller camera manufacturer, alleged that Kodak unlawfully used its monopoly in film to increase camera sales and monopolize the camera market. *Id.* We rejected that claim and held that the introduction of the 110 system and advertising of the Kodacolor II film did not violate the Sherman Act because "[Kodak's] success was not based on any form of coercion." *Id. at 287*. But, of significance to the case before us, we cautioned that "the situation might be completely different if, upon the introduction of the 110 system, Kodak had ceased producing film in the 126 size, thereby compelling camera purchasers to buy a Kodak 110 camera." *Id. at 287 n.39*.[24]

---

[23] Our emphasis on consumer coercion in evaluating a monopolist's product redesign is in accord with several of our sister circuits. *See* *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 994 (9th Cir. 2010)* ("A monopolist's discontinuation **[**32]** of [an old product] may violate *§ 2* if it effectively forces customers to adopt its new [product]."); *Microsoft, 253 F.3d at 65* (explaining that Microsoft's redesign of its operating system was anticompetitive because the redesign impeded competition "not by making Microsoft's own browser more attractive to consumers but, rather, by discouraging [manufacturers] from distributing rival products"); *cf.* *Multistate Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns, Inc., 63 F.3d 1540, 1550 (10th Cir. 1995)* (noting that illegal tie-ins under *Section 1* may "qualify as anticompetitive conduct for *Section 2* purposes"). Similarly, the other district courts that have considered product hopping cases also examined consumer coercion. And those district courts that have ruled in favor of plaintiffs alleging antitrust violations stemming from product hopping have found consumer coercion. *See* *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., No. 13-MD-2445, 64 F. Supp. 3d 665, 2014 U.S. Dist. LEXIS 167204, 2014 WL 6792663, at *12 (E.D. Pa. Dec. 3, 2014)* (plaintiffs alleged exclusionary conduct under *§ 2* where the brand manufacturer coerced patients into switching from the tablet form of a drug—for which their patent was set to expire—to a new film version of the drug by raising allegedly false safety concerns about the tablet and announcing that it would soon be withdrawn from the market); *Abbott Labs. v. Teva Pharms. USA, Inc., 432 F. Supp. 2d 408, 430 (D. Del. 2006)* (plaintiffs alleged antitrust violations **[**33]** where the defendants introduced new drug formulations and withdrew the prior versions whose exclusivity period would soon expire). In contrast, in cases in which there is no evidence of coercion, district courts have rejected such claims. *See* *Mylan Pharms. Inc. v. Warner Chilcott PLC et al., No. Civ. 12-3824, 2015 U.S. Dist. LEXIS 50026, 2015 WL 1736957, at *13 (E.D. Pa. Apr. 16, 2015)* (noting that because generics had already entered the market at the time of defendants' product reformulation, "doctors remained free to prescribe generic Doryx; pharmacists remained free to substitute generics when medically appropriate; and patients remained free to ask their doctors and pharmacists for generic versions of the drug"); *Walgreen Co. v. AstraZeneca Pharm. L.P., 534 F. Supp. 2d 146, 151 (D.D.C. 2008)* (dismissing a case alleging attempted market monopolization because unlike in *Abbott Labs*, "there is no allegation that AstraZeneca eliminated any consumer choices. Rather, AstraZeneca . . . introduced a new drug to compete with already-established drugs—both its own and others'—and with the generic substitutes for at least one of the established drugs").

[24] We also noted that restricting Kodacolor II to the 110 format for 18 months may have been anticompetitive conduct, but we did not decide the question because there was no proof of injury to Berkey. *Berkey Photo, 603 F.2d at 290*.

In this case, Defendants argue that withdrawing a product is **[**34]** not anticompetitive or exclusionary conduct, especially when the new product is superior to the old product.[25] Certainly, neither product **[*654]** withdrawal nor product improvement alone is anticompetitive. But under *Berkey Photo*, ***HN8***[] when a monopolist *combines* product withdrawal with some other conduct, the overall effect of which is to coerce consumers rather than persuade them on the merits, *id. at 287*, and to impede competition, *id. at 274-75*, its actions are anticompetitive under the Sherman Act.[26] *Cf. Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)* (noting that when an antitrust conspiracy involves multiple acts, "[t]he character and effect of [the] conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole" (internal quotation marks omitted)). Here, Defendants' hard switch—the combination of introducing Namenda XR into the market and effectively withdrawing Namenda IR—forced Alzheimer's patients who depend on memantine therapy to switch to XR (to which generic IR is not therapeutically equivalent) and would likely impede generic competition by precluding generic substitution through state drug substitution laws.

i. Consumer Coercion

Defendants' hard switch crosses the line from persuasion to coercion and is anticompetitive. As long as Defendants sought to persuade patients and their doctors to switch from Namenda IR **[**36]** to Namenda XR while both were on the market (the soft switch) and with generic IR drugs on the horizon, patients and doctors could evaluate the products and their generics on the merits in furtherance of competitive objectives.

By effectively withdrawing Namenda IR prior to generic entry, Defendants forced patients to switch from Namenda IR to XR—the only other memantine drug on the market.[27] S.A. 49; Tr. 183:22-184:17 (Stitt) ("So the unique thing [about the Namenda IR hard switch] I think is that there's really no place for prescribers to, to go with a drug to treat that condition."). In fact, the district court found that Defendants devised the hard switch because they projected that only 30% of memantine-therapy patients would voluntarily switch to Namenda XR prior to generic entry. S.A. 56-57. Defendants' hard switch was expected to transition 80 to 100% of Namenda IR patients to XR prior to generic entry, S.A. 81, and thereby impede generic competition.

Defendants **[**37]** argue that courts should not distinguish between hard and soft switches. But this argument ignores one of *Berkey Photo*'s basic tenets: the market **[*655]** can determine whether one product is superior to another only "so long as the free choice of consumers is preserved." *603 F.2d at 287*. Had Defendants allowed Namenda IR to remain available until generic entry, doctors and Alzheimer's patients could have decided whether the benefits of switching to once-daily Namenda XR would outweigh the benefits of adhering to twice-daily therapy using less-expensive generic IR (or perhaps lower-priced Namenda IR). By removing Namenda IR from the market prior to generic IR entry, Defendants sought to deprive consumers of that choice. In this way, Defendants could avoid competing against lower-cost generics based on the merits of their redesigned drug by forcing Alzheimer's

---

[25] Whether XR is superior to IR is not significant in this case. When there is coercion, "the technological **[**35]** desirability of the product change . . . bear[s] on the question of monopolistic intent," *id. at 287 n.39*, rather than the permissibility of the defendant's conduct. Here, there is no genuine dispute that Defendants intended to avoid the patent cliff. *See, e.g.*, J.A. 132, 155.

[26] Several other courts have held that product redesign violates *§ 2* when combined with other conduct and the combined effect is anticompetitive or exclusionary. *See Allied Orthopedic, 592 F.3d at 1000* (explaining that *§ 2* is violated when "some conduct of the monopolist associated with its introduction of a new and improved product design constitutes an anticompetitive abuse or leverage of monopoly power, or a predatory or exclusionary means of attempting to monopolize the relevant market" (internal quotation marks omitted)); *In re Suboxone, 2014 U.S. Dist. LEXIS 167204, 2014 WL 6792663, at *10* ("The key question is whether the defendant combined the introduction of a new product with some other wrongful conduct, such that the comprehensive effect is likely to stymie competition, prevent consumer choice and reduce the market's ambit.").

[27] As previously noted, the other available Alzheimer's drugs, all CIs, are not substitutes for Namenda because they perform different medical functions and are not designed to treat moderate-to-severe Alzheimer's disease.

patients to take XR,[28] with the knowledge that transaction costs would make the reverse commute by patients from XR to generic IR highly unlikely.

ii. Impedes Competition

As the district court concluded, Defendants' hard switch would likely have anticompetitive and exclusionary effects **[**38]** on competition in the memantine market, creating a "dangerous probability" that Defendants would maintain their monopoly power after generics enter the market. *Spectrum Sports, 506 U.S. at 456*. Based on careful consideration of the unique characteristics of the pharmaceutical market, the district court found that "[p]rice competition at the pharmacy, facilitated by state substitution laws, is the principal means by which generics are able to compete in the United States." S.A. 26.

We agree with the district court's analysis. Forcing patients to switch to XR would prevent generic substitution because generic versions of IR are not AB-rated to Namenda XR. And if, as Defendants' own internal predictions estimate, the hard switch successfully converted 80 to 100% of IR patients to XR prior to generic entry, there would be "few to no prescriptions" left for which generics would be eligible to compete. S.A. 82. Because Defendants' forced switch "through something other than competition on the merits[] has the effect of significantly reducing usage of rivals' products and hence protecting its own . . . monopoly, it is anticompetitive." *Microsoft, 253 F.3d at 65*.

Defendants and their *amici* argue that generics can successfully compete by persuading third-party **[**39]** payors and prescription-benefit managers to promote generic IR through the use of formularies, tiered-drug structures, step programs, and prior-authorization requirements.[29] But, as the district court determined, competition through state drug substitution laws is the only cost-efficient means of competing **[*656]** available to generic manufacturers.[30] S.A. 78. For there to be an antitrust violation, generics need not be barred "from all means of distribution" if they are "bar[red] . . . from the cost-efficient ones." *Microsoft, 253 F.3d at 64*; *see also* *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 191 (3d Cir. 2005)* ("The test is not total foreclosure, but whether the challenged practices bar a substantial number of rivals or severely restrict the market's ambit."). Moreover, as the district court found, additional expenditures by generics on marketing would be impractical and ineffective because a generic manufacturer promoting a product would have no way to ensure that a pharmacist would substitute its product, rather than one made by one of its generic competitors.

Although in theory, Alzheimer's patients would be free to switch back to IR therapy after generic entry, the district court found that, in practice, such a reverse commute would be a highly unlikely occurrence. As one of Defendants'

---

[28] Alternatively, patients could discontinue memantine-therapy entirely.

[29] Formularies, tiered-drug structures, step programs, and prior-authorization requirements are all tools that third-party payors may use to incentivize patients to take less-expensive drugs. A formulary is a list of approved drugs **[**40]** that a health plan will pay for, either in whole or in part. S.A. 19. A tiered-drug structure divides the drugs listed on a plan's formulary into categories or "tiers." S.A. 20. Typically, health plans use a three-tiered system, which reserves tier 1 for generic drugs, tier 2 for preferred branded drugs, and tier 3 for non-preferred branded drugs. The portion of the cost of the drug that the patient is responsible for paying, known as the "co-payment" or "co-pay," increases with each tier. A step program requires a patient to first try a preferred, and usually less expensive, drug. Only if that treatment is unsuccessful will the health plan pay for the patient's drug of choice. S.A. 20. A prior authorization policy requires a patient to obtain the third-party payor's approval for payment prior to taking a particular drug. Antitrust Economists Br. at 14.

[30] The district court found that the regulatory context makes it impractical and uneconomical for generic manufacturers to market their products to doctors or pharmacists because, among other reasons, marketing costs severely impact generic manufacturers' ability to offer the lower prices upon which they compete. S.A. 78. Two other district **[**41]** courts confronted with product hopping cases concluded that plaintiffs plausibly alleged that the unique characteristics of the pharmaceutical industry "make generic substitution the cost-efficient means of competing for companies selling generic pharmaceuticals." *In re Suboxone, 2014 U.S. Dist. LEXIS 167204, 2014 WL 6792663, at *12*; *see also* *Abbott Labs., 432 F. Supp. 2d at 423* (same).

own executives explained during a January 21, 2014 earnings call: "if we do the hard switch and we convert patients and caregivers to once-a-day therapy versus twice a day, it's very difficult for the generics then to reverse-commute back." S.A. 51. This is because there are high transaction costs associated with reverse commuting. Any patient who wants to switch back to twice-daily IR therapy must first obtain a new prescription from a doctor. But, as the district court found, the nature of Alzheimer's disease makes moderate-to-severe Alzheimer's patients especially vulnerable to changes in routine, and makes doctors and caregivers very reluctant to change a patient's medication **[**42]** if the current treatment is effective. As a result, if Defendants forced patients to switch from twice-daily Namenda IR to once-daily XR, those patients would be very unlikely to switch back to twice-daily generic IR even if generic IR is more cost-effective.[31] Moreover, third-party payors are reluctant to require patients to switch from a drug they are currently taking to a new drug, so health plans would be unlikely to require patients to switch to less-expensive generic IR.

Defendants and their *amici* argue that the district court's focus on AB-ratings **[**43]** is misplaced because up to 20 states do not impose an AB-rating requirement and thus "*may* let pharmacists unilaterally substitute generic IR for Namenda XR." **[*657]** Defs. Br. at 13 (emphasis added). Defendants' argument, however, exaggerates the variance in state substitution laws. Many states that do not explicitly require generic drugs to have the same AB-rating effectively require the same degree of therapeutic equivalence. For example, Defendants cite *Iowa Code § 155A.32* as an example of a state law that "do[es] not rely on the Orange Book." Defs. Br. at 13. *Section 155A.32(1)* permits pharmacists to substitute a generic drug if it has the same "demonstrated bioavailability" as the brand drug, *Iowa Code Ann. § 155A.32(1)*, but *Section 155A.3(9)* clarifies that a generic is only considered to have the same "demonstrated bioavailability" if it has the same "rate and extent of absorption of a drug or drug ingredient from a specified dosage form," *Iowa Code Ann. § 155A.3(9)*. Because the dosage and absorption rates of generic IR differ from that of XR, the drugs are not bioequivalent under Iowa law. Moreover, because generic IR is manufactured in tablet form and Namenda XR is marketed in capsule form, they do not have the same dosage form.[32] As a result, as in New York and the 29 other states that require **[**44]** an AB-rating, Iowa pharmacists will not be permitted to substitute generic IR for XR.[33]

---

[31] The Department of Health and Human Services ("HHS") reached this same conclusion, explaining:

> The unique nature of this patient population—Alzheimer's patients with moderate-to-severe dementia—makes it likely that a switch from the twice-daily Namenda IR to the once-daily Namenda XR would be a permanent one for practical purposes, as providers, patients, and families would be reluctant to switch back to twice-a-day therapy even if they believed that it represented a better value.

HHS, Office of the Assistant Sec'y for Planning and Evaluation, *Some Observations Related to the Generic Drug Market* 5 (2015), *available at* http://aspe.hhs.gov/sp/reports/2015/GenericMarket/ib_GenericMarket.pdf (HHS, *Some Observations*).

[32] Generic IR is manufactured in 5 and 10 mg tablet dosage formulations whereas Namenda XR is marketed in 7, 14, 21, and 28 mg capsule dosage formulations. J.A. 673 n.57. As Dr. Ernest R. Berndt, Ph.D. explains in his declaration, "tablets and capsules are not the same 'dosage form.'" *Id.*

[33] Defendants argue that up to 20 states may allow pharmacists to substitute generic IR for Namenda XR; however, throughout their briefs, Defendants and their experts point to 21 different states. Of the states identified by Defendants and their experts, 16 require the same dose and/or dosage form and thus will not allow generic IR to be substituted for Namenda XR. *See Ala. Code § 34-23-8*; *Alaska Stat. Ann. §§ 08.80.295(a)*, *08.80.480(11)*; *Ark. Code Ann. §§ 17-92-503(a)(1)*, *17-92-101(6)*, *(11)*; *Cal. Bus. & Prof. Code §§ 4073(a)*, *4052.5(a)*, *(f)*; Colo. Rev. Stat. Ann. §§ 12-42.5-122(1)(a), *as amended by* 2015 Colo. Legis. Serv. Ch. 77 (S.B. 15-071), 12-42.5-102(40); *Conn. Gen. Stat. Ann. § 20-619(b)*; *Fla. Stat. Ann. §§ 465.025(2)*, *(1)(b)*; *Ga. Code Ann. § 26-4-81(a)*; *Mo Ann. Stat. § 338.056(1)*; *Mont. Code Ann. § 37-7-505(1)*; *Neb. Rev. Stat. §§ 71-5403(1)*, *71-5402(1)*, *(5)*, *(6)*, *as amended by* 2015 Nebraska Laws L.B. 37; *N.C. Laws Ann. § 333.17755(1)* allows for substitution of "generically equivalent" drugs, which courts in Michigan have interpreted to require "chemical equivalence," meaning that the drugs "contain the same active ingredients and are identical in strength, dosage form and route of administration." *Pennwalt Corp. v. Zenith Labs., Inc., 472 F. Supp. 413, 417 (E.D. Mich. 1979)*. Oklahoma **[**45]** prohibits substitution "without authority of the prescriber or purchaser," so we cannot determine whether generic IR will be substituted for Namenda XR under Oklahoma law. *See Okla. Stat. Ann. tit. 59, § 353.13(D)*. Of the states that allow pharmacists

Defendants argue that their conduct was not anticompetitive because preventing "free riding" is a legitimate business purpose. But what Defendants call "free riding"—generic substitution by pharmacists following the end of Namenda IR's exclusivity period—is authorized by law; is the explicit goal of state substitution laws; and furthers the goals of the Hatch-Waxman Act by promoting drug competition, *Actavis, 133 S. Ct. at 2228*, and by preventing the "practical extension of [brand drug **[*658]** manufacturers'] monopoly . . . beyond the expiration of the[ir] patent[s]," H.R. Rep. No. 98-857, pt. 2, at 4 (1984).

Defendants also argue that ***antitrust law*** is not a vehicle for enforcing the "spirit" of drug laws. Defs. Br. at 46. But the Supreme Court **[**46]** has made clear that "[a]ntitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue." *Trinko, 540 U.S. at 411*. Leading antitrust authorities have encouraged courts to acknowledge market defects, such as a price disconnect and the exclusivity of patents, in their antitrust analysis.[34] And in other Hatch-Waxman contexts, this court has recognized that efforts to manipulate aspects of the Hatch-Waxman incentive structure to exclude competition could state an antitrust claim. *See, e.g., Arkansas Carpenters Health & Welfare Fund v. Bayer AG, 604 F.3d 98, 106 (2d Cir. 2010)* ("[A] plaintiff can have antitrust claims" where a pharmaceutical manufacturer "manipulate[s] the [Hatch-Waxman-conferred] 180-day exclusivity period in a manner that bars subsequent challenges to the patent or precludes the generic manufacturer from marketing non-infringing products unrelated to the patent."), *abrogated on other grounds by Actavis, 133 S. Ct. at 2231*. Therefore, we conclude that the district court appropriately considered the unique market characteristics of the pharmaceutical industry in concluding that ***antitrust law*** "requires [Defendants] to allow generic competitors a fair opportunity to compete using state substitution laws." S.A. 95-96.

b. Procompetitive Justifications

All of Defendants' procompetitive justifications for withdrawing IR are pretextual. The record is replete with evidence showing that Defendants were, in the words of Defendants' own CEO, "trying to . . . put up barriers or obstacles" to generic competition. J.A. 132; *see also* S.A. 49 ("We need to transition volume to XR to protect our Namenda revenue from generic penetration in 2015 when we lose IR patent exclusivity."); J.A. 155 ("[W]hat we're trying to do is make **[**48]** a cliff disappear and rather have a long—a prolonged decline. And we believe that by potentially doing a forced switch, we will hold on to a large share of our base users."); S.A. 49 ("Our mission is to convert to Namenda XR and lift the franchise . . . . We need to convert as much IR business to Namenda XR as quickly as possible."). Based largely on Defendants' own documents, New York has rebutted Defendants' procompetitive justifications.

c. Procompetitive Benefits v. Anticompetitive Harms

Because we have determined that Defendants' procompetitive justifications are pretextual, we need not weigh them against the anticompetitive harms. But in any event, New York has shown that whatever procompetitive benefits exist are outweighed by the anticompetitive harms. **[*659]** Defendants argue that their conduct is procompetitive because "[l]aunching a new product . . . advances competition by adding a better product to the market and by

---

to substitute generic drugs without consulting the prescribing physician, four states *may*—but will not necessarily—allow substitution of generic IR for Namenda XR. *See* ***Minn. Stat. Ann. § 151.21 Subd. 3***; *Minn. R. 9505.0340* Subp.3(H); *N.D. Cent. Code Ann. §§ 19-02.1-14.1(3)*, *(1)(g)*; *Vt. Stat. Ann. tit. 18, § 4605(a)*, *4601(4)*; *Wash. Rev. Code Ann. § 69.41.120*; *69.41.110(4)*. Those four states account for less than 6% of the U.S. population. J.A. 673.

[34] *See* IIIB Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis* ***[**47]*** *of Antitrust Principles and Their Application* ¶ 776c, at 297 (3d ed. 2008); Herbert Hovenkamp et al., *IP and Antitrust: An Analysis of Antitrust Principles Applied to Intellectual Property Law* § 15.3, at 25 (2012); C. Scott Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem*, *81 N.Y.U. L. Rev. 1553, 1557 (2006)* ("A particular regulatory regime sets the boundaries of feasible anticompetitive conduct."); Jonathan Jacobson, et al., *Predatory Innovation: An Analysis of Allied Orthopedic v. Tyco in the Context of Section 2 Jurisprudence*, *23 Loy. Consumer L. Rev. 1, 8 (2010)* ("There are two scenarios where an exclusionary redesign may be especially harmful: (a) in the context of networked markets . . . and (b) in pharmaceutical markets . . . .").

paving the way for further innovation." Defs. Br. at 51. While *introducing* Namenda XR may be procompetitive, that argument provides no procompetitive justification for *withdrawing* Namenda IR.

Defendants argue that withdrawing IR was procompetitive because it would maximize their **[**49]** return on their investment in XR. But in deciding to take IR off the market, Defendants were willing to give up profits they would have made selling IR—Forest's best-selling drug. This "willingness to forsake short-term profits to achieve an anticompetitive end" is indicative of anticompetitive behavior. *In re Adderall, 754 F.3d at 135* (internal quotation marks omitted). Moreover, Defendants fail to explain why the potential [TEXT REDACTED BY THE COURT] in additional XR sales that they stood to earn—which is less than the approximately $1.5 billion in annual sales they have made from Namenda IR in recent years—makes economic sense in the absence of the benefit derived from eliminating generic competition. *See* *id. at 133* (stating that anticompetitive effects could be shown where defendants' conduct "makes sense only because it eliminates competition"). As a result, we agree with the district court that:

> Defendants' short-term loss of [TEXT REDACTED BY THE COURT] in IR sales, translating to [TEXT REDACTED BY THE COURT] in income, is most rationally construed as an investment in moving the memantine market in [their] favor [through impeding generic competition], yielding [D]efendants [TEXT REDACTED BY THE COURT] in income over the course **[**50]** of the next [TEXT REDACTED BY THE COURT] years.

S.A. 74.

Finally, Defendants have presented no evidence to support their argument that antitrust scrutiny of the pharmaceutical industry will meaningfully deter innovation. To the contrary, as the American Antitrust Institute *amici* argue, immunizing product hopping from antitrust scrutiny may deter significant innovation by encouraging manufacturers to focus on switching the market to trivial or minor product reformulations rather than investing in the research and development necessary to develop riskier, but medically significant innovations.

In sum, we conclude that the combination of withdrawing a successful drug from the market and introducing a reformulated version of that drug, which has the dual effect of forcing patients to switch to the new version and impeding generic competition, without a legitimate business justification, violates *§ 2* of the Sherman Act.

III. Patent Rights as a Defense to Liability

Defendants argue that their patent rights under Namenda IR and Namenda XR shield them from antitrust liability. To be sure, there is tension between the antitrust laws' objective of enhancing competition by preventing unlawful monopolies **[**51]** and patent laws' objective of incentivizing innovation by granting legal patent monopolies. *See In re Adderall, 754 F.3d at 133*; *see also* *SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1205 (2d Cir. 1981)*.

But in its recent landmark antitrust case, *F.T.C. v. Actavis, Inc.*, the Supreme Court made clear that "patent and antitrust policies are both relevant in determining the scope of the patent monopoly—and consequently ***antitrust law*** immunity—that is conferred by a patent." *133 S. Ct. at 2231* (internal quotation marks omitted); *see also* *United States v. Gypsum Co., 333 U.S. 364, 390-91, 68 S. Ct. 525, 92 L. Ed. 746 (1948)* (indicating that courts must "balance the privileges of [the patent holder] **[*660]** and its licensees under the patent grants with the prohibitions of the Sherman Act against combinations and attempts to monopolize").

The Court's decision in *Actavis* reaffirmed the conclusions of circuit courts that ***HN9***[] a patent does not confer upon the patent holder an "absolute and unfettered right to use its intellectual property as it wishes," *Microsoft, 253 F.3d at 63*, and "[i]ntellectual property rights do not confer a privilege to violate the antitrust laws," *In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1325 (Fed. Cir. 2000)*. *See also* *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 998 (9th Cir. 2010)* ("[C]hanges in product design are not immune from antitrust scrutiny and in certain cases may constitute an unlawful means of maintaining a monopoly under *Section 2*.").

Defendants argue that their conduct does not violate ***antitrust law*** because they have merely "exercised rights **[**52]** afforded by the Patent Act." Defs. Br. at 34. But patent law gives Defendants a temporary monopoly on individual drugs—not a right to use their patents as part of a scheme to interfere with competition "beyond the limits of the patent monopoly." *United States v. Line Material Co., 333 U.S. 287, 308, 68 S. Ct. 550, 92 L. Ed. 701 (1948)*. Defendants have essentially tried to use their patent rights on Namenda XR to extend the exclusivity period for all of their memantine-therapy drugs. As explained above, it is the *combination* of Defendants' withdrawal of IR and introduction of XR in the context of generic substitution laws that places their conduct beyond the scope of their patent rights for IR or XR individually.

IV. The Sherman Act § 1 and the Donnelly Act

In light of New York's substantial likelihood of success on the merits of its monopolization and attempted monopolization claims, we need not address the merits of its Sherman Act *§ 1* or Donnelly Act claims, which are based on the agreement between Defendants and Foundation Care. We do note, however, that an agreement related to a party's violation of *§ 2* does not trigger liability under *§ 1* unless the agreement *itself* unreasonably restrains trade, *Geneva Pharms., 386 F.3d at 506*, and there is mutual anticompetitive intent, *see id. at 507* ("[L]ack of intent by one party . . **[**53]** . precludes a conspiracy to monopolize."). Conduct that satisfies the unreasonable restraint prong under *§ 2* does not necessarily violate *§ 1* absent evidence that the agreement furthers the anticompetitive conduct. *Id. at 506*.

V. Irreparable Harm

New York has made a "strong" showing that competition and consumers will suffer irreparable harm in the absence of the injunction. *Doe, 666 F.2d at 773*. ***HN10***[] Irreparable harm is "injury that is neither remote nor speculative, but actual and imminent and that cannot be remedied by an award of monetary damages." *Forest City Daly Hous., Inc. v. Town of N. Hempstead, 175 F.3d 144, 153 (2d Cir. 1999)* (internal quotation marks omitted). To obtain injunctive relief under § 16 of the Clayton Act, that injury must be an injury "of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful." *Consol. Gold Fields PLC v. Minorco, S.A., 871 F.2d 252, 257* (internal quotation marks omitted), *amended by 890 F.2d 569 (2d Cir. 1989)*.

As the district court concluded, "[p]ermanent damage to competition in the memantine market can . . . result from Defendants' planned hard switch **[*661]** strategy."[35] S.A. 131. If generics cannot compete with Defendants' drugs via state substitution laws, they "cannot compete effectively for sales of a branded drug in the same class, such as Namenda XR, even if the price of the generics is much lower than **[**54]** the brand." S.A. 80-81; *see also* IP and Antitrust Prof. Br. at 13-14 (explaining that absent substitution at the pharmacy, "the market for generics will collapse"). Moreover, generics cannot simply move into the market for generic XR. To become substitutable for Namenda XR, generic manufacturers must develop new once-daily Namenda tablets, begin the ANDA-approval process all over again, and await the end of XR's patent exclusivity period in 2029. Because Defendants' conduct does not simply harm a competitor or two, but threatens to "reduce competition in the [memantine-drug] market[,] . . . [it] is precisely the type that the antitrust laws were designed to protect against." *Consol. Gold, 871 F.2d at 257-58*.

The district court also found that, in addition to harming consumer choice, Defendants' hard switch would cause economic harm to consumers. Based on Defendants' own data, the district court found **[**55]** that consumers would pay almost $300 million more and third-party payors would pay almost $1.4 billion more for memantine therapy if Defendants were permitted to switch patients to Namenda XR before generic IR entry. And HHS reports that Defendants' withdrawal of Namenda IR prior to generic entry would cost Medicare and its beneficiaries a

---

[35] *See also LePage's Inc. v. 3M, 324 F.3d 141, 159 (3d Cir. 2003)* ("When a monopolist's actions are designed to prevent one or more new or potential competitors from gaining a foothold in the market by exclusionary, i.e. predatory, conduct, its success in that goal is not only injurious to the potential competitor but also to competition in general.").

minimum of $6 billion over the next ten years.[36] "Threaten[ed] economic harm to . . . consumers . . . is plainly sufficient to authorize injunctive relief." Am. Stores Co., 495 U.S. at 283.[37]

Defendants argue that the district court erred in finding *irreparable* harm because any increase in costs to consumers and third-party payors is "compensable and readily quantifiable." Defs. Br. at 26. But compensating the approximately 500,000 Alzheimer's patients who take Namenda IR tablets, and an unknown number of public and private third-party payors, for an ongoing harm would impose "the **[**56]** task of disentangling overlapping damages claims [which] is not lightly to be imposed upon potential antitrust litigants, or upon the judicial system." Blue Shield of Va. v. McCready, 457 U.S. 465, 475 n.11, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982); *see also* Salinger v. Colting, 607 F.3d 68, 81 (2d Cir. 2010) ("Harm might be irremediable, or irreparable, for many reasons, including that a loss is difficult to replace . . . .").[38] **[*662]** In addition, many of the victims of Defendants' hard switch, such as patients and health plans, may be prevented from direct recovery for their antitrust losses because of the "indirect purchaser" rule, which bars those who do not directly purchase a product from recovering antitrust damages, thus further supporting New York's claim of irreparable injury. *See* Illinois Brick Co. v. Illinois, 431 U.S. 720, 745-46, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977).

Additionally, we agree with the district court, and the parties do not dispute, that the preliminary injunction serves the public's interest in a competitive market for memantine drugs. *See* United States v. Siemens Corp., 621 F.2d 499, 506 (2d Cir. 1980) (finding that the government represents the public's interest in a competitive marketplace in seeking to enjoin a merger under § 7 of the Clayton Act); *see also* Register.com, Inc. v. Verio, Inc., 356 F.3d 393, 424 (2d Cir. 2004) ("[G]overnment action taken in furtherance of a regulatory or statutory scheme . . . is presumed to be in the public interest").

VI. The Preliminary Injunction

Defendants argue that the injunction provision requiring them to make Namenda IR tablets available on the same terms and conditions applicable since July 21, 2013 is vague because the terms and conditions have shifted over the past 17 months. We disagree. The injunction plainly prohibits Defendants from charging more for Namenda IR

---

[36] HHS, *Some Observations*, at 7.

[37] Given that we conclude that the district court did not abuse its discretion in granting a preliminary injunction based on the harm to competition and economic harm to consumers, we need not consider whether the district court's findings related to medical harm to patients provided a basis for injunctive relief.

[38] Defendants also argue that the district court erred in discounting the harm that they will suffer as a result of the injunction. We need not consider the balance of the hardships given that New York has demonstrated a substantial likelihood of success on the merits. In any event, we agree with the district court that the balance of the hardships tips decidedly in New York's favor.

Defendants argue that they will be injured if they cannot convert patients to Namenda XR prior to July 2015, but that argument begets the question of whether their conduct **[**57]** is lawful. Certainly, courts do not consider the harm a party suffers from being prevented from violating the law.

Defendants also argue that they "had stopped making IR batches and ha[d] been implementing plans to limit distribution for months." Defs. Br. at 25. Ordering Defendants to manufacture IR, Defendants argue, impedes production of XR and delays the development of Namzaric, an even newer Alzheimer's drug, because the FDA has only certified one plant to produce IR, XR, and Namzaric. This argument is belied by the record. At the preliminary injunction hearing, one of Defendants' executives testified that the plant could manufacture IR while manufacturing XR. J.A. 533. Defendants also informed the district court that there was no cap on the amount of IR that would be supplied through Foundation Care and that the supply could be "adjusted as necessary based on demand." J.A. 904. Another of Defendants' experts testified that the "biggest problem [Defendants] have with [manufacturing both IR and XR] is the labor force," but "the equipment is completely different equipment." J.A. 202. Defendants' expert clarified that they need skilled labor but, at most, he explained that there might **[**58]** be some delay caused by training employees to use the new XR equipment where employees who had manufactured IR would be able to transition more quickly. J.A. 203.

than it did during the specified timeframe and from restricting access to IR. If Defendants need additional clarification, they can seek it in the district court.

Defendants also argue that the injunction is overbroad **[**59]** because there is no antitrust violation in the 20 states in which drug substitution laws *might* allow pharmacists to substitute generic IR for Namenda XR. Defendants did not raise this argument before the district court, and therefore have forfeited it. *See, e.g., Zalaski v. City of Hartford, 723 F.3d 382, 395 (2d Cir. 2013)* ("[P]laintiffs failed to raise the argument in the district court, thereby forfeiting it on appeal."). In any event, that argument is not persuasive because, as explained above, it exaggerates the extent to which state substitution laws differ. Defendants have not brought to our attention a single state in which drug substitution laws will definitively allow pharmacists to submit generic IR for Namenda XR, and have thus failed to identify any state for which there is no antitrust violation.

[*663] CONCLUSION

For the reasons stated above, we AFFIRM the District Court's order granting New York's motion for a preliminary injunction.

HN1[] Motions to Dismiss, Failure to State Claim

To comply with the pleading requirements of *Fed. R. Civ. P. 8(a)(2)* and survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a plaintiff must allege enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. In evaluating a motion to dismiss, the court must assume that the plaintiff's allegations are true and must draw all reasonable inferences in his or her favor. However, the court need not accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences. If the court dismisses a complaint, it should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact).

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Sherman Act, Claims

A conspiracy claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Motions to Dismiss, Failure to State Claim

The task of the district court is not to sustain or dismiss a complaint based on whether the court feels it is a winner or has curb appeal. The court's task is to determine whether the facts alleged in the complaint rise above mere speculation, even if the court has doubts about them, and whether they plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] **Sherman Act, Claims**

There simply is no requirement that an antitrust plaintiff draw the boundaries of the alleged conspiracy (or conspiracies) in a complaint with the precision of a diamond cutter. And mere size or breadth alone is not a reason to peremptorily jettison a conspiracy allegation.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

HN6[] **Tolling of Statute of Limitations, Fraudulent Concealment**

To toll the statute of limitations under a fraudulent concealment theory, a plaintiff must plead facts showing that defendants affirmatively misled it, and that plaintiff had neither actual nor constructive knowledge of the facts giving rise to its claim despite its diligence in trying to uncover those facts. Conclusory statements are not enough, and plaintiffs must instead plead with particularity the circumstances of the concealment and the facts supporting their due diligence. It is generally inappropriate to resolve the fact-intensive allegations of fraudulent concealment at the motion to dismiss stage, particularly when the proof relating to the extent of the fraudulent concealment is alleged to be largely in the hands of the alleged conspirators.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN7[] **Sherman Act, Claims**

While detailed "defendant by defendant" allegations are not necessary, an antitrust complaint must allege that each individual defendant joined the conspiracy and played some role in it because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it.

Mergers & Acquisitions Law > Liabilities & Rights of Successors

HN8[] **Mergers & Acquisitions Law, Liabilities & Rights of Successors**

A purchaser of a company does not assume the seller's liabilities unless: (1) there is an express or implied agreement of assumption; (2) the transaction amounts to a merger or consolidation of the corporations; (3) the purchasing corporation is a mere continuation of the seller; or (4) the transfer of assets to the purchaser is for the fraudulent purpose of escaping liability for the seller's debts.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN9[] **Sherman Act, Claims**

An antitrust complaint must allege that each individual defendant joined the conspiracy and played some role in it.

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

HN10[] **Existence, Distinct & Separate Legal Entity**

A parent corporation is not liable for the acts of its subsidiaries.

Antitrust & Trade Law > Procedural Matters

Governments > Legislation > Interpretation

HN11[] **Antitrust & Trade Law, Procedural Matters**

The California Supreme Court has been careful to emphasize that the state's antitrust laws are not mere clones of federal law subject to federal court opinions. Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act, given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes enacted by California's sister states around the turn of the 20th century.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

Civil Procedure > Special Proceedings > Class Actions

HN12[] **Federal & State Interrelationships, Choice of Law**

The law of any particular state may not be applied to a nationwide class unless (1) the chosen state's law does not conflict with the law of another jurisdiction that has an interest in the case, and (2) the chosen state has a significant contact or significant aggregation of contacts to claims asserted by each member of the plaintiff class such that the choice of that state's law is not arbitrary or unfair.

Civil Procedure > Pleading & Practice > Pleadings

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN13[] **Pleading & Practice, Pleadings**

Unjust enrichment is a remedy and is properly pled in the Prayer for Relief.

Opinion

[*1058] ORDER ON MOTIONS TO DISMISS

Re: Dkt. Nos. 474, 475, 479, 480

Direct and indirect purchasers in these consolidated antitrust class actions allege price-fixing conspiracies in the capacitor market. The direct purchaser plaintiffs ("DPPs") allege that defendant manufacturers in Japan, Taiwan, Germany and the United States have participated in a single overarching conspiracy since 2003 to artificially raise prices and suppress price competition for aluminum, tantalum and film capacitors. In a separate complaint, the indirect purchaser plaintiffs ("IPPs") allege two conspiracies running over different times for the same products. The defendants are largely the same in the DPP and IPP cases, and include overseas parent companies and United States subsidiaries. Defendants move to dismiss the DPP complaint mainly for failing to state a plausible price-fixing claim. They concede the plausibility **[**15]** of the antitrust claim in the IPP complaint, but challenge it on standing and state law grounds.

The Court denies the motions for the most part. The DPP complaint provides enough factual allegations to state a price-fixing claim. The IPP complaint also survives defendants' primary challenges. In both cases, the Court grants defendants' request to dismiss certain entities who were sued because they belong to an alleged family of conspirators rather than on the basis of specific allegations against them individually. DPPs and IPPs will have an opportunity to amend.

BACKGROUND

The technology at issue here is straightforward. As alleged in both complaints, capacitors are one of the most basic functional units in electronic circuits. While they can vary considerably in specific application, capacitors generally operate to store energy on a short-term basis, like a temporary battery, and smooth out the flow of energy to avoid surges and deficits. Capacitors are classified as "passive" components, which means they do not generate power but store and condition it. At heart, a capacitor consists of two electrical plates, one positively and one negatively charged, that are sandwiched together with **[**16]** a non-conductive insulator called a dielectric between them. They are used universally in circuits. As the result, virtually every electronic device we use, from toasters to cellphones, has capacitors in it.

Capacitors can be electrolytic or electrostatic. As the IPPs allege, electrolytic capacitors are "asymmetrical, polarized constructions," while electrostatic capacitors are "symmetrical, non-polarized constructions." Dkt. No. 400 ¶¶ 128, 129. Capacitors made with a dielectric of aluminum or tantalum are electrolytic capacitors. Those made with a plastic film or ceramic dielectric are electrostatic capacitors.

The DPPs and IPPs bring their antitrust claims in the context of the global market for these ubiquitous components. Unsurprisingly, there is a high degree of overlap between the consolidated complaints, although the IPP complaint does a deeper dive into some areas. *See* Dkt. Nos. 400, 401. Both complaints allege that the defendant capacitor manufacturers, many of whom are based in Japan, engaged in a multi-year price-fixing conspiracy for electrolytic and film capacitors. Both complaints trumpet multiple government antitrust investigations underway in the United States and overseas **[**17]** into possible anticompetitive practices in the capacitor industry. In the United States, the Department of Justice is leading the charge from its San Francisco office. *See* Dkt. No. 401 ¶¶ 274-93; Dkt. No. 400 ¶¶ 13-18. And both complaints highlight **[*1059]** that one of the defendants, Panasonic Corporation, has applied for leniency under the DOJ's Corporate Leniency Program pursuant to the Antitrust Criminal Penalty Enhancement and Reform Act ("ACPERA"). Dkt. No. 400 ¶¶ 15-16; Dkt. No. 401 ¶¶ 278-79.

But the complaints also have some substantial differences. The four named direct purchaser plaintiffs -- Chip-Tech, Ltd., a New York corporation; Dependable Component Supply Corporation, a Florida corporation; eIQ Energy, Inc., a California corporation; and Walker Component Group, Inc., a Colorado corporation, Dkt. No. 401 ¶¶ 25-28 -- allege a single, overarching conspiracy "in aluminum, tantalum and film capacitors" with a class period of January 1, 2003 to the present. *Id.* ¶¶ 1, 111. Each DPP states that it "directly purchased capacitors from one or more defendants during the class period." *Id.* Defining the proposed class to comprise "[a]ll persons in the United States that purchased capacitors . . **[**18]** . directly from any of the defendants" during the class period, *id.* ¶ 111, the DPPs assert a single claim for restraint of trade in violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*. For this claim, the DPPs seek, among other things, treble damages under Section 4 of the Clayton Act, *15 U.S.C. § 15*, and an injunction. *Id.* at 67-68 (Demand for Judgment).

The indirect purchaser plaintiffs, on the other hand, allege two "massive and separate conspiracies" to fix the prices of "electrolytic and film capacitors, respectively." Dkt. No. 400 ¶ 1. The IPPs assert that the "electrolytic class period" has a start date of January 1, 2003, and the "film class period" one of January 1, 2007. *Id.* ¶¶ 2-3. The named IPPs include "First-Level Indirect Purchaser Plaintiffs" -- five named plaintiffs who allege that they purchased capacitors as stand-alone products from one or more distributors, who in turn purchased the capacitors as stand-alone products from defendants. *Id.* ¶¶ 29-34.[1]

The consolidated IPP complaint also included "Consumer Indirect Purchaser Plaintiffs" -- thirty-one plaintiffs hailing from twenty-two states who purchased such varied products as laptops, televisions, tablets, cell phones, printers, game consoles, MP3 players, power tools, dishwashers and auto parts, all of which allegedly contained price-fixed capacitors manufactured by one or more defendants during the respective class periods. *Id.* ¶¶ 35-65. This putative consumer group was the only group to allege claims on the basis of finished goods that included capacitors. In response to the Court's discussion with the interim lead counsel for the putative indirect purchaser plaintiff class at the hearing on the motions to dismiss, counsel filed a Notice of Voluntary Dismissal that dismissed without prejudice all thirty-one of the Consumer Indirect Purchaser Plaintiffs and their claims from the IPPs' first consolidated complaint. Dkt. No. 594. Those plaintiffs and claims are no longer a part of this case and unless otherwise noted, all references to the "indirect purchaser **[**20]** plaintiffs" are references to the "First-Level Indirect Purchaser Plaintiffs" only. In the event the IPPs amend their complaint in response to this order, they are directed to remove the consumer group parties and allegations from the next version.

[*1060] The IPPs allege different dates and types of conduct by the defendants. Some defendants are alleged to have participated only in the electrolytic capacitor cartel, some in only the film capacitor cartel, and some in both. Dkt. No. 400 ¶ 10. The lengthy cast of the IPP defendants largely matches the DPPs' cast, with some variations.

Alleging that each and every capacitor purchased by the IPPs is "traceable to an entity owned and/or controlled by a defendant because it bears the defendant's markings (*e.g.*, name, logo, series)," *id.* ¶ 4, the IPPs assert claims under: (i) the Sherman Act, *15 U.S.C. § 1*; (ii) the California Cartwright Act, *Cal. Bus. & Prof. Code § 16720*; and (iii) the California Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200* ("UCL"). *Id.* ¶¶ 349-379. For the Sherman Act claim, the IPPs seek an injunction only; they seek treble damages under the Cartwright Act and "restitution and/or disgorgement" for the UCL claim. *Id.* ¶¶ 359, 367, 379. The complaint seeks nationwide application of California's **[**21]** Cartwright Act and UCL. *Id.* ¶¶ 368, 379.[2]

Before the Court are four separate motions to dismiss the DPP and IPP complaints. The "joint" motions assert arguments in which all moving defendants join. Dkt. Nos. 474, 479. The "consolidated" motions are compilations of various defendants' individual arguments, *i.e.*, arguments that are specific to why the allegations against that moving **[**22]** defendant should be dismissed. Dkt. Nos. 475, 480.

DISCUSSION

Well-established standards govern these motions. ***HN1***[] To comply with the pleading requirements of *Federal Rule of Civil Procedure 8(a)(2)* and survive a *Rule 12(b)(6)* motion to dismiss, a plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662,*

---

[1] One of the named First-Level Indirect Purchaser Plaintiffs is Alfred H. Siegel, the Liquidating Trustee of the Circuit City Stores, Inc. Liquidating Trust. Dkt. No. 400 ¶ 33. Circuit City Stores, Inc. is alleged to have "indirectly purchased capacitors as stand-alone products **[**19]** and as components of products containing electrolytic and/or film capacitors from one or more of the Defendants." *Id.* ¶ 34.

[2] The complaint also asserts claims for violations of (iv) state antitrust and restraint of trade laws ("in the event that the Court does not apply California law on a nationwide basis"); and (v) state consumer protection and unfair competition laws (again "in the event that the Court does not apply California law on a nationwide basis"). Dkt. No. 400 ¶¶ 380-412. Because the First-Level Indirect Purchaser Plaintiffs are two California residents, two California companies and the trustee of a trust that was established in connection with the bankruptcy of a Virginia corporation, and because no Virginia state law claim is included in the fourth or fifth claims for relief, the Court deems all state claims other than those under California law to have been voluntarily dismissed by the indirect purchaser plaintiffs.

678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (citing *Twombly at 556*). In evaluating a motion to dismiss, the Court must assume that the plaintiff's allegations are true and must draw all reasonable inferences in his or her favor. *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. However, the Court need not "accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*. If the Court dismisses a complaint, it "should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)* (internal quotation marks and citation omitted).

[*1061] I. DIRECT PURCHASER PLAINTIFFS' COMPLAINT

A. *Twombly* Plausibility

The defendants' main attack on the DPP complaint is that it falls short of plausibility **[**23]** under *Twombly*. Specifically, defendants seize upon the one vs. two conspiracy theories in the DPP and the IPP complaints. Defendants concede that they "as a general matter do not challenge the sufficiency of the IPP Complaint's allegations of two separate conspiracies" for electrolytic and film capacitors. Dkt. No. 479 at 2. They attack the DPPs because they do not follow the same approach, and argue that the DPPs' "central allegation of a single overarching conspiracy involving both electrolytic and film capacitors is implausible on its face." *Id.* at 6.

The DPPs defend their complaint with heavy reliance on the fact that the Panasonic/SANYO entities have "admitted to the conduct and provided information about it." Dkt. No. 519 at 1. They say they make highly detailed allegations of conspiracy on the basis of that information, and that these "direct allegations of a conspiracy must be taken as true and establish, without any need for inference, the key facts of the conspiracy." *Id.*

In essence, defendants argue that the DPPs' single conspiracy is just too big to plead, and DPPs contend that where there's smoke, there's fire. The Court finds that both sides exaggerate their positions but that **[**24]** overall the DPP complaint has sufficient grounding in fact to go forward. Panasonic's "admission" does not have the dispositive weight ascribed to it by the direct purchaser plaintiffs. But more importantly for purposes of this motion, defendants limn far too bleak a picture -- and one that does not fairly reflect the DPPs' complaint -- when they argue that the DPPs' allegations are too "conclusory" and "bare-bones" to satisfy *Twombly*, or that size alone can doom conspiracy allegations. Dkt. No. 479 at 11.

The specific pleading standards stated by the Supreme Court in *Twombly* drive these findings. ***HN2***[] "While a complaint attacked by a Rule 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *550 U.S. at 555* (internal citations omitted). "Factual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Id. at 555-56* (same).

The Court has the added benefit that *Twombly* was itself a Sherman Act § 1 antitrust **[**25]** case. In that context, the same as here, the Supreme Court held that ***HN3***[] a conspiracy claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *Id. at 556*. "Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id.*

These standards were not met in *Twombly* because the complaint left "no doubt that plaintiffs rest[ed] their § 1 claim on descriptions of parallel conduct and not on any independent allegation of actual agreement" among defendants. *Id. at 564*. That omission is not true of the DPP complaint. The DPP complaint makes these substantive agreement allegations:

• "Defendants agreed to concertedly fix, raise, maintain and/or stabilize the **[*1062]** prices for aluminum, tantalum and film capacitors." Dkt. No. 401 ¶ 183. Defendants shared and exchanged with each other "confidential and competitively sensitive information pertaining to their product pricing" either through correspondence or during in-person meetings. *Id.* Pricing agreements were reached both in "regular, organized meetings" **[**26]** as well as through "ad hoc meetings and correspondence." *Id.* ¶ 185. Defendants also "agreed to quote similar or identical production lead times to purchasers on a concerted basis," as well as "to restrain their output." *Id.* ¶¶ 188-89.

• At least by the beginning of 2003, the defendant cartel members had "formally organized meetings among themselves to serve as a forum for the discussion and exchange of competitively sensitive information." *Id.* ¶ 194. These meetings were known variously as "ATC," "MK" or "JFC" meetings, and they were "generally organized by the types of capacitors to be discussed"; ATC and MK for aluminum and tantalum capacitors, and JFC meetings for film capacitors. *Id.* ¶ 196.

• Defendants generally held "monthly one-day meetings that were usually attended by manager-level employees," as well as "two-day meetings" twice a year that were "generally attended by defendants' more senior officials." *Id.* ¶¶ 201-02. For specific defendant groups such as the film capacitor manufacturers, meetings were held less frequently, *i.e.*, every one to three months. *Id.* ¶ 203.

• "Based on the recommendations and agreements reached at these different cartel meetings, the defendant attendees **[**27]** intended to and did agree to price capacitors collusively, stand united against price reduction demands, and set production and delivery dates to collusively control supply in the aluminum and tantalum capacitors markets." *Id.* ¶ 204.

• The complaint also describes, by way of example, organized "cartel meetings" that took place in ten different time periods, as well as a number of informal meetings among defendants that took place during the class period. *Id.* ¶¶ 208-18. Included are allegations of the identities of the defendants companies whose representatives attended each meeting, and defendant attendees are alleged, among other things, to have discussed "their plans to increase film capacitor prices" at a "cartel meeting" in the 4th quarter of 2007, discussed "implementing film capacitor price increases" at a meeting in the 4th quarter of 2008, and "agreed among themselves to resist price decreases and stabilize their film capacitor prices" at a meeting in the 1st quarter of 2009. *Id.* ¶ 208(a), (d), (e).

• Finally, the complaint alleges -- with specific price data -- that defendants' "concerted and collusive actions . . . artificially inflated the prices of capacitors," and "defendants' **[**28]** conspiracy permitted the defendant manufacturers of aluminum, tantalum and film capacitors to slow, negate and even reverse the market-driven decline in price for their products, and to fix prices at supra-competitive levels." *Id.* ¶ 219-23.

These allegations are enough to avoid dismissal. As an initial matter, they add up to much more than the superficial generalities about the "absence of any meaningful competition" and "parallel course of conduct" that sank the complaint in *Twombly.* **[*1063]** *550 U.S. at 564-65*. Defendants strongly deny the allegations and attack them as impossible or wrong but that objection clearly is irrelevant to this motion to dismiss. Whether the DPPs will carry their burden of proof on the price-fixing claim is a decidedly different issue from whether they have alleged enough facts under *Rule 8* to stay in court. Like others before them, defendants ask this Court to treat *Twombly* as a license to resolve a *Rule 12(b)(6)* challenge on an impressionistic assessment of a complaint's merits. But ***HN4***[] the task of the district court is not to sustain or dismiss a complaint based on whether the Court feels it is a winner or has curb appeal. The Court's task is to determine whether the facts alleged in the complaint rise above **[**29]** mere speculation, even if the Court has doubts about them, *Twombly, 550 U.S. at 555-56*, and whether they "plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*; *see also* *Twombly, 550 U.S. at 556* (standard simply calls for "enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement."). The DPP complaint passes this test.

In using the IPP complaint against the DPPs', defendants also overstate the differences between the pleadings. Despite the allegation of two separate conspiracies, the IPPs acknowledge that some defendants (Hitachi, NCC, Rubycon and Panasonic) participated in both, and that "discovery may reveal that there was one overarching conspiracy due to the overlapping defendants and customers." Dkt. No. 400 at 5 & 1 n.2. The DPPs similarly acknowledge that "[w]hile there was substantial overlap between and among defendants who participated in discussions, communications and agreements concerning electrolytic (aluminum and tantalum) capacitors, on the one hand, and film capacitors, on the other, much still needs to be discovered." Dkt. No. 401 ¶ 181. The DPPs have nevertheless **[**30]** taken the step of alleging one overarching conspiracy, but, like the IPPs, the DPPs identify "Nippon Chemi-Con, Rubycon, Hitachi AIC and Panasonic/SANYO" as having played a "key role" because "each of these defendant companies manufactured both electrolytic capacitors (*i.e.*, aluminum and/or tantalum) and film capacitors and are dominant manufacturers of these capacitors." *Id.* ¶ 199.

Not only are the factual allegations between the two complaints not as dissimilar as defendants contend,***HN5***[] there simply is no requirement that an antitrust plaintiff draw the boundaries of the alleged conspiracy (or conspiracies) in a complaint with the precision of a diamond cutter. *See* In re Lithium Ion Batteries Antitrust Litigation ("Batteries I"), No. 13-MD-2420 YGR, 2014 U.S. Dist. LEXIS 7516, 2014 WL 309192, at *2 (N.D. Cal. Jan. 21, 2014) ("The question in this case is not whether any conspiracy existed, only how far it reached. That question is ultimately one of fact, and cannot be resolved in the present procedural posture, where the Court tests only the sufficiency of the pleadings."). And mere size or breadth alone is not a reason to peremptorily jettison a conspiracy allegation. Defendants cite In re Optical Disk Drive Antitrust Litigation, No. 3:10-md-2143 RS, 2011 U.S. Dist. LEXIS 101763, 2011 WL 3894376 (N.D. Cal. Aug. 3, 2011), for the purported rule **[**31]** that "a single overarching conspiracy" is inherently implausible. Dkt. No. 479 at 7. But the case does not stand for that proposition at all. There, the court was reacting to an allegation of conspiracy that stretched from stand-alone disk drives to products that incorporated the drives into other devices. 2011 U.S. Dist. LEXIS 101763, 2011 WL 3894376, at *6. None of **[*1064]** the device makers were named as defendants and they participated in a broad range of markets and marketing channels that the named drive conspirators would somehow need to have controlled. *Id.* For that reason, the court expressed plausibility concerns. But that reason does not, of course, exist in this case, which involves only stand-alone capacitors. So long as an alleged conspiracy is supported by enough facts to make it plausible, as it is here, it is of no matter whether it involves three conspirators or a score or more.

Significantly, defendants do not attack the plausibility of the IPPs' complaint, which alleges a film capacitor conspiracy beginning in 2007 and an electrolytic capacitor conspiracy beginning in 2003. While defendants seek to make much of the fact that the DPP complaint puts the starting date of the film capacitor conspiracy at 2003 (because it alleges **[**32]** a single conspiracy from 2003 for all the named products), defendants did not explain in their papers or at the hearing how, if at all, this difference would have any impact on the scope or cost of discovery. *Cf.* Twombly, 550 U.S. at 559 ("it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive"). The DPPs' allegations "give a defendant seeking to respond to [the] allegations of [] conspiracy an idea of where to begin," and defendants cannot with a straight face claim otherwise. Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008).

The Court finds that the DPP complaint has met the bar set by Twombly after considering, as it must, the DPPs' complaint as a whole. The Court makes clear, however, that the government investigations alleged by plaintiffs carry no weight in that holistic analysis. Dkt. No. 401 ¶¶ 275-76, 280-83 (describing investigations by the U.S. DOJ Antitrust Division, the People's Republic of China's National Development and Reform Commission, and Fair Trade Commissions of Japan, South Korea, Taiwan and the European Commission's competition authority). "It is unknown whether the[se] investigation[s] will result in indictments or nothing at all." **[**33]** In re Graphics Processing Units Antitrust Litigation ("GPU"), 527 F. Supp. 2d 1011, 1024 (N.D. Cal. 2007). Moreover, at least some, and possibly all, of these investigations are being conducted in secret, and consequently, "the scope of the investigation is pure speculation. It may be broader or narrower than the allegations at issue." *Id.*

Panasonic's leniency application through ACPERA is in the same boat. Dkt. No. 401 ¶¶ 277-79. While substantively different from a mere investigation, the ACPERA application also entails a lack of transparency that vitiates its utility in a pleading. The parties agreed at the hearing that there is no pertinent case law on this issue, and that this case presents a rather unusual factual circumstance in that the ACPERA application (and corresponding assistance to the private plaintiffs) came early in the timeline. DPPs ask the Court to treat Panasonic's application as the equivalent of a guilty plea that admits all facts. They assert that Panasonic must "admit to price fixing" by statute and DOJ policy in order to receive leniency under ACPERA. *Id.* ¶ 279. Panasonic did not dispute this, and further acknowledged that it must sufficiently cooperate with both plaintiff groups in order to avoid both **[**34]** treble damages and joint and several liability pursuant to ACPERA. But as Panasonic pointed out, and plaintiffs agreed, the ACPERA process is not transparent. There is in fact no guilty plea or similar formal acknowledgement of wrongdoing that plaintiffs, and more critically **[*1065]** the Court, can see and evaluate. While it is tempting to ascribe a higher value to the application than to an investigation, its contents are unknown and the same concerns about the lack of transparency in investigative proceedings applies here. It is not possible for the Court to delimit the actual scope of Panasonic's alleged admissions and how they map on to the DPP civil complaint. Consequently, Panasonic's ACPERA application is a non-factor in the Court's analysis. The Court understands that Panasonic has proffered facts about its scope of conduct and documents to both groups of plaintiffs, but otherwise the Court finds that it is not particularly different from the other defendants for present purposes. Panasonic's application certainly is not the be-all and end-all confession that DPPs' motion to dismiss opposition suggests.

B. Statute of Limitations

Defendants also seek dismissal of the DPPs' claim at least **[**35]** "to the extent it accrued before July 18, 2010," pursuant to the Clayton Act's four-year statute of limitations. Dkt. No. 479 at 20 (citing *15 U.S.C. § 15b*). Defendants argue that the DPPs' allegation that the statute was tolled by defendants' fraudulent concealment is insufficient because the DPPs have alleged "no specific facts that would satisfy *Rule 9(b)* to support their conclusory allegations," such as the dates, time or locations of any "secret discussions" or when, how, where and why any "coded language" was used. *Id.* at 21.

HN6[] To toll the statute of limitations under a fraudulent concealment theory, a plaintiff "must plead facts showing that [defendants] affirmatively misled it, and that [plaintiff] had neither actual nor constructive knowledge of the facts giving rise to its claim despite its diligence in trying to uncover those facts." *Conmar Corp. v. Mitsui & Co. (U.S.A.), 858 F.2d 499, 502 (9th Cir. 1988)*. Conclusory statements are not enough, and plaintiffs must instead "plead with particularity the circumstances of the concealment and the facts supporting [their] due diligence." *Id.* "[I]t is generally inappropriate to resolve the fact-intensive allegations of fraudulent concealment at the motion to dismiss stage, particularly when the proof relating to the extent of the fraudulent **[**36]** concealment is alleged to be largely in the hands of the alleged conspirators." *In re Cathode Ray Tube (CRT) Antitrust Litigation, 738 F. Supp. 2d 1011, 1024 (N.D. Cal. 2010)*.

The Court finds that the DPPs have made specific allegations of fraudulent concealment. They allege that defendants generally "agreed not to discuss publicly the nature of the scheme" and "did not take or distribute official minutes or record" the meetings alleged. Dkt. No. 401 ¶¶ 295-96. And plaintiffs quote from a 2006 e-mail from a SANYO employee, stating: "[E]xchanging information is useful . . . . However, it maybe [*sic*] become a double-edged sword at times. To the extent possible, try to exchange verbally so that no evidence is left behind. Especially pricing figures and important presentation materials." *Id.* ¶297. Plaintiffs also allege a SANYO employee's comments in an e-mail requesting "utmost care in handling" reports attached to the e-mail because the "gathering[s] should not be disclosed to the public." *Id.* ¶ 299. Other e-mails among SANYO employees and NEC-TOKIN employees are alleged to have included the instruction, "Once you read this email, please delete it." *Id.* ¶ 300.

These allegations are sufficiently particularized to support the allegation of fraudulent concealment at this stage. The Court denies defendants' **[**37]** request to dismiss plaintiffs' claim to the extent it accrued before July 18, 2010.

[*1066] C. SUFFICIENCY OF ALLEGATIONS FOR EACH DEFENDANT'S MEMBERSHIP AND ROLE

Defendants' third and final "joint" argument is that the direct purchaser plaintiffs have not sufficiently alleged each defendant's membership and role in the alleged conspiracy. Dkt. No. 479 at 16. Defendants make this argument in two ways.

Defendants argue that the DPPs "ignore corporate separateness and fail to sufficiently allege the involvement of the U.S. subsidiaries." *Id.* at 17. Defendants say the DPP complaint "does not contain a single, solitary allegation linking the majority of the defendant U.S. subsidiaries to the alleged conspiracy." *Id.* The Court agrees with the general principle that, ***HN7***[] while detailed "'defendant by defendant' allegations" are not necessary, an antitrust complaint "must allege that each individual defendant joined the conspiracy and played some role in it because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it." *In re TFT-LCD (Flat Panel) Antitrust Litigation, 586 F. Supp. 2d 1109, 1117 (N.D. Cal. 2008)*. But this case involves twenty-two different defendant groups, Dkt. No. 491 ¶¶ 7-107, and defendants have done little to identify who is **[**38]** in the "majority" they reference. The Court declines the invitation to do the heavy lifting on its own time and resources to figure out which defendants fall into the "majority" and which do not. The Court resolves the separate motions to dismiss brought by individual defendants and defendant groups below, but it denies defendants' joint motion to dismiss the "majority" of the defendant U.S. subsidiaries for lack of specificity.

Defendants also argue that "[e]qually fatal to the DPPs' complaint is its failure to identify the role each defendant played in the alleged conspiracy." Dkt. No. 479 at 19. This argument, too, is made on behalf of all moving defendants with no further specification. *Id.* at 19-20. But not only is there no particularity requirement akin to *Rule 9(b)* to explain each defendant's own, unique role, defendants have identified no basis for dismissing all defendants for this alleged failure. The Court denies this request as well.

D. Individual Defendants' Motions

The Court turns to the twelve separate motions brought by individual defendants and defendant groups. Dkt. No. 480. The Court grants these motions in part and denies them in part.

a. AVX Corporation

The Court grants AVX Corporation's motion **[**39]** to dismiss with leave to amend. AVX Corporation is not alleged to have participated in or even been informed of the "cartel's regular meetings," Dkt. No. 401 ¶ 198, nor is it alleged to have participated in any cartel "sub-groups" or in any specific cartel meetings. The only substantive allegation against AVX is that it "worked to coordinate pricing strategy" with other defendants, *id.* ¶¶ 215-16, but these allegations fall short of alleging "an agreement and a conscious decision" by AVX to join it. *TFT-LCD, 586 F. Supp. 2d at 1117*.

Also insufficient are the allegations about AVX's February 2013 acquisition of "Nichicon's tantalum capacitor production facilities in Japan and China." Dkt. No. 401 ¶ 64. Plaintiffs assert that the acquired facility is a "mere continuation of" the unit as it was organized and operated by Nichicon, and that AVX is consequently the "successor in interest" to all assets and liabilities, including those arising from the unit's alleged violations of § 1 of the Sherman Act. *Id.* ¶ 65. However,***HN8***[] "[a] purchaser of a company does not **[*1067]** assume the seller's liabilities unless: (1) there is an express or implied agreement of assumption; (2) the transaction amounts to a merger or consolidation of the corporations; **[**40]** (3) the purchasing corporation is a mere continuation of the seller; or (4) the transfer of assets to the purchaser is for the fraudulent purpose of escaping liability for the seller's debts." *GPU, 527 F. Supp. 2d at 1031* (citing *Ray v. Alad Corp., 19 Cal. 3d 22, 28, 136 Cal. Rptr. 574, 560 P.2d 3 (1977))*. Here, plaintiffs have made nothing but the conclusory allegation of "mere continuation." That is not enough. *See, e.g., No Cost Conf., Inc. v. Windstream Commc'ns., Inc., 940 F. Supp. 2d 1285, 1299 (S.D. Cal. 2013)* (finding that even though liberal requirements of *Rule 8(a)(2)* apply to successor-in-interest allegations, conclusory allegation that defendant assumed all rights and responsibilities as result of merger was insufficient, because plaintiff "must plead the existence of a contract [and] its terms which establish the obligation [in] issue") (internal quotation marks omitted).

b. EPCOS AG, EPCOS Inc., TDK-EPC Corporation and TDK U.S.A. Corporation

The Court denies the motion to dismiss by EPCOS AG, but grants the motions of EPCOS Inc., TDK-EPC Corporation and TDK U.S.A. Corporation with leave to amend.

Plaintiffs filed a chart identifying the specific paragraphs in their consolidated complaint for each defendant. *See* Dkt. No. 520-2. For EPCOS AG, the chart shows that the only substantive allegations are paragraphs 213 and 214 of the consolidated complaint. Paragraph 213, however, alleges **[**41]** that during the class period, "SANYO and EPCOS met at a trade show to discuss their tantalum capacitors, conducted an exchange of competitively sensitive information, [and] *agreed to make such exchanges in the future so that they could cooperate on future pricing*." Dkt. No. 401 ¶ 213 (emphasis added). This allegation is enough to meet the *Twombly* pleading standard, and EPCOS AG's motion is denied. *See* *In re Citric Acid Litig., 191 F.3d 1090, 1103 (9th Cir. 1999)* (Supreme Court held in *U.S. v. Container Corp. of America, 393 U.S. 333, 89 S. Ct. 510, 21 L. Ed. 2d 526 (1969)* that "the reciprocal exchange of price information pursuant to an agreement by the defendants was concerted action sufficient to establish a price-fixing conspiracy.").

As plaintiffs' chart shows, paragraph 213 is not identified as applying to EPCOS AG's subsidiary companies, *i.e.*, EPCOS Inc., TDK-EPC Corporation and TDK U.S.A. Corporation. *See* Dkt. No. 520-2. The allegations that do relate to those companies are too paltry to go forward and those companies are dismissed with leave to amend.

c. Fujitsu Components America, Inc.

The Fujitsu family of defendants includes three entities, but only Fujitsu Components America, Inc. ("FCA") has filed a separate motion to dismiss. FCA argues that the DPP complaint fails to allege that it joined the conspiracy and played a **[**42]** role in it. The Court agrees. Plaintiffs' chart acknowledges that paragraphs 54 and 123 of the consolidated complaint are the only ones that mention FCA. Paragraph 54 generally alleges that FCA "sold and distributed to United States purchasers aluminum and/or tantalum and/or film capacitors manufactured by business units . . . of its corporate parent, Fujitsu." Dkt. No. 401 ¶ 54. Paragraph 123 alleges in a vague and conclusory manner that FCA is one of the defendants that "assisted its respective corporate parent defendants with the sale and/or delivery to United States purchasers of the parents' **[*1068]** respective aluminum, tantalum and film capacitors to United States purchasers." *Id.* ¶ 123.

Plaintiffs argue that they are not required to "plead the precise role in the conspiracy of each individual company in each corporate family," and try to rely on their general allegations against the "larger Fujitsu corporate family." Dkt. No. 519 at 38-39. That is not a sound approach. ***HN9***[] An antitrust complaint "must allege that each individual defendant joined the conspiracy and played some role in it." *TFT-LCD, 586 F. Supp. 2d at 1117*. The cases that found adequate pleading against subsidiaries contained much more than is present here. **[**43]** *See* *CRT, 738 F. Supp. 2d at 1019* (noting allegations that "employees engaged in conspiratorial meetings on behalf of members of their corporate families, that participants did not always know the corporate affiliation of their counterparts and did not distinguish between the entities within a corporate family," and finding as a result that "the entire corporate family was represented in meetings and discussions . . . and was a party to the agreements reached in them."); *see also* *In re Lithium Ion Batteries Antitrust Litig. ("Batteries II"), No. 13-MD-2420 YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *34 (N.D. Cal. Oct. 2, 2014)* (plausible to infer "that generic references to NEC in documents generated by defendants themselves implicate both NEC Corp. and NEC Tokin"). FCA is dismissed from the direct purchaser plaintiffs' complaint with leave to amend.

d. Holy Stone Enterprise Co., Ltd. and HolyStone International

Defendants Holy Stone Enterprise Co., Ltd. and HolyStone International (who refer to themselves collectively as "Holy Stone") move for dismissal "for failure to offer facts plausibly suggesting that Holy Stone joined and participated in the alleged 'global' conspiracy." Dkt. No. 480 at 19. But while Holy Stone argues that the DPPs' complaint offers "only a single, conclusory allegation **[**44]** regarding Holy Stone" in paragraph 208(j), the complaint mentions Holy Stone in at least one other substantive paragraph. In paragraph 198, the complaint alleges that "meeting rosters during the period from 2003 to 2008 indicate that officers, managers and/or employees of the following defendant companies participated in or were informed of the cartel's regular meetings: . . . Holy Stone . . . ." Dkt. No. 401 ¶ 198. The complaint further alleges that "[b]ased on the recommendations and agreements reached at these different cartel meetings, the defendant attendees intended to and did agree to price capacitors collusively, stand united against price reduction demands, and set production and delivery dates to collusively control supply in the aluminum and tantalum capacitors markets." *Id.* ¶ 204. In addition to these allegations, the consolidated complaint alleges that "[r]epresentatives of NEC TOKIN, Nippon Chemi-Con, Rubycon, Matsuo, ELNA, ROHM and Holy Stone attended cartel meetings held in the 2nd Quarter of 2010." *Id.* ¶ 208(j).

The Court finds that the allegations against Holy Stone are sufficient under *Twombly*, and denies Holy Stone's motion to dismiss.

e. KEMET Corporation and KEMET Electronics Corporation [45]**

Like Holy Stone, KEMET Corporation is named in paragraph 198 of the consolidated complaint and in at least one of the subparagraphs of paragraph 208. Dkt. No. 401 ¶¶ 198, 208(c). In addition, KEMET Corporation is specifically alleged to have "joined the conspiracy at least by 2008 and perhaps by 2005, if not earlier." *Id.* ¶ 217. Although KEMET Corporation argues that "[i]t does not make sense that KEMET, an American company, was invited **[*1069]** to attend or attended" meetings which were presumably "conducted in Japanese," this argument misunderstands the standards that apply at this stage of the proceedings. KEMET Corporation's motion to dismiss is denied.

Its subsidiary, KEMET Electronics Corporation ("KEC"), is a different story. The four paragraphs that plaintiffs identify as relating to KEC -- paragraphs 38 through 41 of the consolidated complaint -- establish only that KEC acquired a controlling majority voting interest in NEC TOKIN and as a result, "KEC has, since early 2012, sold and distributed NEC TOKIN's aluminum and/or tantalum capacitors, directly or through its business units, subsidiaries, agents or affiliates, to United States purchasers." Dkt. No. 401 ¶¶ 38-41. These allegations **[**46]** do nothing to establish that KEC itself joined the conspiracy. KEC is dismissed with leave to amend.

f. Nichicon Corporation and Nichicon (America) Corporation

The allegations against Nichicon Corporation are sufficient and its motion to dismiss is denied. Among other things, Nichicon Corporation is alleged to have participated in the "cartel's regular meetings"; the defendant attendees are alleged to have "intended to and did agree to price capacitors collusively [and] stand united against price reduction demands"; and representatives from "Nichicon" are alleged to have attended at least four separate "cartel meetings." Dkt. No. 401 ¶¶ 198, 204, 208 (f)-(i). These are enough.

Nichicon (America) Corporation ("Nichicon America"), however, is dismissed with leave to amend. Plaintiffs' chart shows that paragraphs 58 and 123 of the consolidated complaint are the only ones that relate to Nichicon America. Dkt. No. 250-2 at 2. As discussed, these allegations are insufficient.

g. Okaya Electric Industries Co., Ltd. and Okaya Elec tric America Inc.

Okaya Electric America Inc. ("Okaya America") is similarly situated to Nichicon America. *See* Dkt. No. 520-2 at 2 (identifying only paragraphs 93 and **[**47]** 123 of the consolidated complaint as relating to Okaya America). The Court grants its motion to dismiss with leave to amend.

Okaya Electric Industries Co., Ltd., on the other hand, impermissibly re-argues a point already raised in defendants' joint motion. *See* Dkt. No. 480 at 31 (attacking plausibility of one overarching conspiracy encompassing both film capacitors and electrolytic capacitors). It is denied for the same reasons the Court has denied defendants' joint motion.

h. ROHM Co., Ltd. and ROHM Semiconductor U.S.A., LLC

ROHM Semiconductor U.S.A. LLC is in the same boat as defendants Okaya America and Nichicon America. *See* Dkt. No. 520-2 at 2 (identifying only paragraphs 85 and 123 of the consolidated complaint as relating to ROHM Semiconductor U.S.A.). It is dismissed with leave to amend for the same reasons.

Its parent company, ROHM Co., Ltd., presents a closer call. While the allegations against it are thin, and the Court finds that reference to its membership in trade associations (Dkt. No. 401 ¶¶ 268-69) adds nothing to the analysis here, the Court concludes plaintiffs have alleged enough to get past the *Twombly* pleadings bar. ROHM is alleged to be included in "[m]eeting rosters during **[**48]** the period from 2003 to 2008" for "cartel meetings," and its representatives are alleged to have attended at least one meeting in the 2nd quarter of 2010. *Id.* ¶¶ 198, 208(j).

[*1070] i. Shinyei Kaisha, Shinyei Capacitor Co., Ltd. and Shinyei Corporation of America, Inc.

Defendants Shinyei Capacitor Co., Ltd. and Shinyei Corporation of America are identified as having only one and two allegations, respectively, in the consolidated complaint that relate to them. Dkt. No. 520-2 at 2-3 (identifying paragraph 99 for Shinyei Capacitor Co., Ltd. and paragraphs 100 and 123 for Shinyei Corporation of America). These paragraphs have no substance -- certainly none that shows these defendants as having joined the conspiracy -- and these defendants are dismissed with leave to amend.

Shinyei Kaisha is similarly situated as ROHM Co., Ltd. and Holy Stone, discussed above, except that it is alleged to have participated in at last four meetings (which, it should be noted, are described by way of example and not as constituting an exhaustive list of all cartel meetings). *See* Dkt. No. 401 at ¶ 208(b), (c), (d), (e). Its motion to dismiss is denied.

j. Soshin Electric Co., Ltd. and Soshin Electronics of America, Inc. [49]**

The allegations against Soshin Electronics of America, Inc. (*see* Dkt. No. 520-2 at 3, identifying only paragraphs 105 and 123) are insufficient to show that it joined the conspiracy. The Court grants Soshin Electronics of America, Inc.'s motion to dismiss with leave to amend.

Soshin Electric Co., Ltd.'s motion otherwise repeats arguments made in the defendants' joint motion, which the Court declined. While the Court has some concern that Soshin is not alleged to have participated in a single, specific meeting (Dkt. No. 520-2 at 3, identifying only paragraphs 104, 198, 208 and 268), the list of specific meetings is intended to be a sampling only. The Court consequently concludes that plaintiffs have pled enough to proceed as against Soshin Electric Co., Ltd. and denies its motion to dismiss.

k. United Chemi-Con, Inc.

United Chemi-Con, Inc. ("UCC"), a U.S. subsidiary of Nippon Chemi-Con Corporation, is the only defendant in its corporate family to seek dismissal. Dkt. No. 401 ¶ 45. As with the other U.S. subsidiaries dismissed above, plaintiffs' chart shows that only paragraphs 45 and 123 relate to UCC. Dkt. No. 520-2 at 3. That is not enough, and UCC is dismissed with leave to amend.

I. [50] Vishay Intertechnology, Inc.**

Plaintiffs' chart identifies six paragraphs of the consolidated complaint that relate to Vishay Intertechnology, Inc. ("Vishay"). Dkt. No. 520-2 at 3. Two of these can be dispensed with easily. Paragraph 269 alleges membership in a trade association, and paragraph 307 alleges that "in 2010 and 2011, defendants Vishay and Panasonic each made a number of public statements to industry and technology media attributing supply limitations and pricing adjustments for their tantalum electrolytic capacitors to raw materials supply issues." Dkt. No. 401 ¶¶ 269, 307. Neither of these allegations advances the ball in the slightest towards alleging Vishay's participation in the alleged conspiracy.

The other four paragraphs, 76, 79, 80 and 82, all relate to Vishay's acquisition of Holy Stone Polytech -- Hitachi AIC's tantalum and niobium capacitors division, which was acquired by Holy Stone -- on or about June 11, 2014. Dkt. No. 401 ¶¶ 76, 80. The division was renamed "Vishay Polytech Co., Ltd." and Vishay Polytech is alleged to be a successor in interest to Holy Stone Polytech's liabilities, including those alleged under § 1 of the Sherman Act. *Id.* ¶ 81. Vishay itself, however, **[**51]** is not alleged to be such a successor in interest. Although Vishay Polytech is itself **[*1071]** named as a defendant, it does not seek dismissal.

For Vishay, it is alleged to have "effectively purchased a participant in the unlawful cartel alleged herein and [to have] thereby joined and participated in defendants' conspiracy through Vishay Polytech's acts taken in furtherance of the conspiracy." Dkt. No. 401 ¶82. But***HN10***[] a parent corporation "is not liable for the acts of its subsidiaries." *In re Cal. Title Ins. Antitrust Litig., No. C 08-01341 JSW, 2009 U.S. Dist. LEXIS 43323, 2009 WL 1458025, at *7 (N.D. Cal. May 21, 2009)* (quoting *United States v. Bestfoods, 524 U.S. 51, 61, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1988))*. Plaintiffs have identified no reason why this "general principle of corporate law deeply ingrained in our economic and legal systems" is inapplicable here. Defendant Vishay Intertechnology, Inc. is dismissed with leave to amend.

II. INDIRECT PURCHASER PLAINTIFFS' COMPLAINT

Also pending before the Court are "joint" and "consolidated" motions to dismiss the indirect purchaser plaintiffs' complaint. Dkt. Nos. 474, 475. Those motions are easier to resolve because defendants do not contest the plausibility of the indirect purchaser plaintiffs' allegations, and because plaintiffs voluntarily dismissed the indirect consumer purchaser plaintiffs after the hearing. **[**52]** Dkt. No. 594.

A. Article III Standing

Defendants make two standing arguments under Article III of the United States Constitution. They argue that the indirect purchaser plaintiffs lack standing because they have "failed to allege the necessary pass through of injury down the complicated distribution and product chains applicable to the different IPPs," and because they "fail to allege facts sufficient to show that their claimed injury is traceable to *any* defendant." Dkt. No. 474 at 5-6.

If the multi-level consumer IPPs were still in the case, defendants' arguments might have some punch. But the consumers have been voluntarily dismissed, and so the thrust of these arguments has been substantially blunted. To the extent they are applicable at all to the remaining "first-level" IPPs, they are unpersuasive. These IPPs allege that "[e]lectrolytic and film capacitors are discrete and identifiable component parts that pass through the chain of distribution in substantially the same form from defendants to consumers when purchased as part of electronic products." Dkt. No. 400 ¶ 151. Moreover, "[a] capacitor is traceable to an entity owned and/or controlled by a defendant because it bears the defendant's markings (*e.g.*, name, logo, series)." *Id.* The first-level **[**53]** indirect purchaser plaintiffs further allege that they "purchased electrolytic and/or film capacitors as stand-alone products from one or more distributors that purchased such capacitors as stand-alone products from one or more defendants during the respective class periods," *id.* ¶ 29, and paid supracompetitive prices for them, *id.* ¶¶ 286-87. These allegations are sufficient to establish injury in fact fairly attributable to the defendants for standing purposes. *See* *TFT-LCD, 586 F. Supp. 2d. at 1122-23* (sustaining IPP claims on similar allegations). Defendants' reliance on *Easter v. American West Financial, 381 F.3d 948 (9th Cir. 2004)*, in no way undercuts this conclusion. That case involved a summary judgment motion under Washington state laws on usury in bank loan agreements where the "borrowers presented no evidence that their alleged injuries were the result of a conspiracy or concerted scheme between the trust defendants." *Id. at 962*. It has no application here.

[*1072] Defendants also argue under Article III that the complaint "lacks representative plaintiffs for the Consumer IPPs' Michigan claim and the First-Level IPPs' claims for all states other than California, and the Consumer IPPs have also failed to allege facts that they purchased products affected by either of the claimed conspiracies." **[**54]** Dkt. No. 474 at 5. Obviously, these arguments are mostly mooted by the voluntary dismissal of the Consumer IPPs. The four remaining first-level IPPs hail from only two states, California and Virginia, and the IPPs' complaint does not assert any claim under Virginia state law. Consequently, the Court finds that the only live question is whether California law can be applied nationwide, which the Court resolves shortly.[3]

B. *AGC*

Defendants spent substantial effort attacking standing under the prudential considerations in *Associated General Contractors of California v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("*AGC*"). They argued that "[a]ccording to the legislatures or courts of eighteen of the nineteen states at issue here, *AGC* or analogous principles apply to determine standing under their respective antitrust laws," and the claims brought under those states' laws should therefore be dismissed. Dkt. No. 551 at 5. But now that the Consumer IPPs are no longer a part of the case and no Virginia state law claim has been asserted, the only state whose laws can be invoked is California. **[**55]**

The application of *AGC* to California state antitrust claims has recently become murky, and that murkiness persuades the Court *AGC* should not be applied. As an initial matter, *AGC* is a creature of federal law and sets out standards for federal antitrust standing. *See* *AGC, 459 U.S. at 521* ("question presented is whether the complaint sufficiently alleges that the unions have been 'injured in [their] business or property by reason of anything forbidden in the ***antitrust law***' and may therefore recover treble damages under § 4 of the Clayton Act"). Defendants include California in their list of states where the legislature or highest court has "indicated that federal ***antitrust law*** should be followed in determining standing." Dkt. No. 474 at 10. This is a mighty overstatement of California law. Defendants fail to cite any California statute showing that the California legislature has made that indication. Defendants' characterization of a decision by the California Supreme Court is equally shaky. Defendants cite *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066 (2010)*, for the proposition that the California Supreme Court applies and follows *AGC*. But that case did not involve a question of standing under the California antitrust laws, and the court's reference to *AGC* ***[**56]*** was at most a passing one made in discussing an intermediate appellate court's opinion. *Id. at 774*. *Clayworth* is not at all a definitive decision holding that *AGC* applies to California antitrust claims.

To the contrary, since *Clayworth*,***HN11***[] the California Supreme Court has been careful to emphasize that the state's antitrust laws are not mere clones of federal law subject to federal court opinions. "Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act, given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes **[*1073]** enacted by California's sister states around the turn of the 20th century." *Aryeh v. Canon Bus. Solutions, Inc., 55 Cal. 4th 1185, 1195, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)*. The California Supreme Court just reiterated that teaching in a very recent

[3] For these same reasons, the Court finds as inapplicable defendants' state-specific arguments (which do not relate to either California or Virginia), and denies those arguments on that basis. Dkt. No. 474 at 27-31.

decision on reverse payment settlement agreements. *See* In re Cipro Cases I & II, No. S198616, 61 Cal. 4th 116, 187 Cal. Rptr. 3d 632, 348 P.3d 845, 2015 Cal. LEXIS 2486, 2015 WL 2125291, at *10 (Cal. May 7, 2015).

The Ninth Circuit has recognized this development in California law. Samsung Electronics Co. v. Panasonic Corp., 747 F.3d 1199, 1205 (9th Cir. 2014) (finding that it is "no longer the law in California" that "the interpretation of California's antitrust statute [is] coextensive with the Sherman Act."). Defendants do not cite any persuasive authority calling this fact into question. The Ninth Circuit case cited by defendants, **[**57]** Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000), pre-dates both *Aryeh* and *Samsung* by more than a decade, and the Court disregards it for that reason. The Court also disregards defendants' cite to a California Court of Appeals case, Vinci v. Waste Management, Inc., 36 Cal. App. 4th 1811, 1814, 43 Cal. Rptr. 2d 337 (Ct. App. 1995), because it was issued neither by California's legislature or highest court. *See* GPU, 540 F. Supp. 2d at 1097 (finding it proper to apply *AGC* to those states where the supreme court had "explicitly endorsed using the test," but finding the law "less clear cut" in California where the "Cartwright Act contains a harmonization provision, and some California appellate courts have used the *AGC* test as well").

Consequently, the Court joins the other courts in this district that have concluded that the federal standing test under *AGC* has not been clearly applied by the California Supreme Court to claims brought under California's Cartwright Act. *See, e.g.,* TFT-LCD, 586 F. Supp. 2d at 1123 ("inappropriate to broadly apply the *AGC* test" to states like California); Batteries II, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *10-11 (stating after detailed analysis that "the Court cannot conclude on the authorities now before it that California applies *AGC* in the manner urged by defendants"). Defendants' arguments under *AGC* are therefore denied.

C. Nationwide Claims Under California Law

The IPPs' complaint does allege claims under California **[**58]** law, specifically the Cartwright Act and the UCL, and seeks to assert these claims on behalf of a nationwide class. Dkt. No. 400 ¶¶ 360-379. Defendants argue that a national application of California law would be unconstitutional and impermissible under Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 821-22, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985). Dkt. No. 474 at 22-23. As was the case in *GPU*, the Court finds that defendants "in effect move to strike all references to a nationwide class in these claims because extraterritorial application of California's ***antitrust law*** would violate due process." 527 F. Supp. 2d at 1027. Under *Shutts*,***HN12***[] the law of any particular state may not be applied to a nationwide class unless (1) the chosen state's law does not conflict with the law of another jurisdiction that has an interest in the case, and (2) the chosen state has a significant contact or significant aggregation of contacts to claims asserted by each member of the plaintiff class such that the choice of that state's law is not arbitrary or unfair. *Id.* (citing Shutts, 472 U.S. at 821-22).

Here, as in *GPU*, the Court finds that the potential conflict with the laws of other states (which surely would have an interest in this case if the Court were to certify a nationwide class) "looms large." ***[*1074]*** 527 F. Supp. 2d at 1027. This is because "some states allow their citizens **[**59]** to sue for antitrust injuries as indirect purchasers (like California) and some do not." *Id.* Furthermore, "[e]ach state had the ability to repeal *Illinois Brick* as to its local law. Some chose yes. Some chose no." *Id.* As in GPU, here, too, plaintiffs have not shown that California has a greater interest in applying its law than any other state, and consequently, any Cartwright Act class that may ultimately be certified would, at most, have to be limited to states with laws like California's.

On the significant contacts question as well, the IPPs' complaint alleges hardly any contacts at all with the state of California. Most of the defendants are headquartered abroad, and the meetings and conduct at issue are also mostly alleged to have taken place outside of the United States.

Although plaintiffs argue that it would be "premature for this Court to rule on the application of California law to a nationwide class," Dkt. No. 516 at 27, the Court finds "merit in disposing of this issue at an early stage of the litigation, particularly where the issue of whether the different state's laws conflict will not change significantly as this action progresses." GPU, 527 F. Supp. 2d at 1028. Defendants' motion is granted in this **[**60]** regard, and all references to a nationwide class in indirect purchasers' claims under California's Cartwright Act and Unfair Competition Law are stricken.

D. Unjust Enrichment

Both sides agree, correctly, in the Court's view, that unjust enrichment is a remedy, and not an independent claim. Dkt. No. 474 at 31-32; 516 at 37-38 (***HN13***[] "unjust enrichment is a remedy and is properly pled in the Prayer for Relief"). The Court has previously held that unjust enrichment is not a claim. *See, e.g., Callaghan v. BMW of N. Am., LLC, No. 13-CV-04794-JD, 2014 U.S. Dist. LEXIS 164290, 2014 WL 6629254, at *4 (N.D. Cal. Nov. 21, 2014)* (finding that "to the extent plaintiffs are seeking to rely on California law, the claim must be dismissed for the separate and additional reason that unjust enrichment is not an independent cause of action"). To the extent the complaint can be read to allege a stand-alone claim for unjust enrichment, that claim is dismissed with prejudice.

E. Statute of Limitations

Defendants argue that the IPPs' complaint, too, is "barred by the applicable statutes of limitations for any injuries that took place outside the limitation periods," and that plaintiffs' "allegations regarding fraudulent concealment are insufficient under *Rule 9(b)*." Dkt. No. 474 at 32. But as was the case **[**61]** with the DPPs' complaint, the IPPs' complaint, too, includes specific allegations that are enough to satisfy the pleading standards for fraudulent concealment. *See, e.g.*, Dkt. No. 400 ¶¶ 170 ("In a Spring 2009 e-mail from a SANYO employee to other SANYO employees, he began with: 'Once you read this email, plead delete it.'"; sender also used "Company N" as code name to refer to NEC TOKIN); 172 (again using code name and asking recipient to "please discard this e-mail"). The Court denies defendants' motion on this issue.

F. Individual Defendants' Arguments

For the IPPs' complaint, there are five separate motions to dismiss in addition to the joint motion. Dkt. No. 475.

a. U.S. Subsidiaries

The IPPs' complaint names fewer defendants overall, and fewer U.S. subsidiaries, than its DPP counterpart. For example, the IPPs have not named the KEMET or Fujitsu groups of companies **[*1075]** at all, and in the case of Taitsu, Shinyei and Soshin, have not named the U.S. subsidiary. In the first separately-filed motion, five U.S. subsidiaries which were named in the IPPs' complaint jointly seek dismissal for the same reason. The five subsidiaries are ELNA America Inc., Hitachi Chemical Co. America, Ltd., NEC **[**62]** TOKIN America, Inc., Nichicon (America) Corp., and Rubycon America, Inc. Dkt. No. 475 at 1. Their joint argument for dismissal is that the IPPs have "fail[ed] to make any non-conclusory factual allegations whatsoever about the involvement of any of them in either" the film conspiracy or the electrolytic conspiracy. *Id.* The subsidiaries assert that "[t]here is not a single factual allegation in the complaint that any particular U.S. subsidiary engaged in any collusive conduct." *Id.*

Plaintiffs respond that their allegations are sufficient, and point in particular to paragraphs 152 to 187, and paragraph 368 of their complaint. Dkt. No. 517 at 5. Paragraphs 152 to 186, however, generically refer to defendant corporate groups on a family basis, without distinguishing between parent and subsidiary. *See, e.g.*, Dkt. No. 400 ¶ 158 ("The Elna, NCC, Nichicon, Panasonic, Rubycon defendants generally attended these other pre-ATC meetings.").

Neither paragraph 187 nor 368 helps supply the missing link. Paragraph 187 alleges that "defendants' Japanese parent companies" generally "attended the conspiratorial meetings," but defendants' U.S. subsidiaries "also engaged in some bilateral discussions that included exchanges **[**63]** of sensitive information." Paragraph 368 alleges merely that "four of the eight U.S.-based defendants (Hitachi Chemical Co. America, Ltd., SANYO

Electronic Device (U.S.A.) Corp., Elna America Inc., NEC TOKIN America Inc.), are headquartered in California, conspiratorial acts occurred in California, and the conspirators targeted their price-fixing activities at large purchasers . . . in California, such as Apple Inc., Intel Corp., and Hewlett Packard Co."

These paragraphs contain no allegation that these five U.S. subsidiaries joined the conspiracy and played some role in it. As was the case with many of the U.S. subsidiaries who were named by the DPPs' complaint, there is a large gap between the IPPs' allegations and the allegations in those cases where the allegations against subsidiaries were found to be sufficient. *See* *CRT, 738 F. Supp. 2d at 1019* (noting allegations that "employees engaged in conspiratorial meetings on behalf of members of their corporate families, that participants did not always know the corporate affiliation of their counterparts and did not distinguish between the entities within a corporate family," and finding as a result that "the entire corporate family was represented in meetings **[**64]** and discussions . . . and was a party to the agreements reached in them."); *see also* *Batteries II, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *34* (plausible to infer "that generic references to NEC in documents generated by defendants themselves implicate both NEC Corp. and NEC Tokin").

The U.S. subsidiaries who have moved for dismissal are dismissed with leave to amend.

b. Nichicon Corporation

Nichicon Corporation, the Japanese parent company of Nichicon (America) Corporation (who is one of the five moving U.S. subsidiaries discussed directly above), moves separately for dismissal. Dkt. No. 475 at 6-8. Nichicon Corporation argues that the IPPs' allegations are insufficient either to establish "that Nichicon Japan entered into an agreement with any other defendant" or that Nichicon Japan bears liability as a successor based on its **[*1076]** acquisition of a capacitor business from Fujitsu Media Devices (Suzhou) Ltd. *Id.*

Nichicon argues that it is alleged to have participated in "only" five types of meetings: "ECC meetings; KCC/Hananoki meetings; 'other' meetings 'similar to industry gatherings or trade association meetings;' ATC meetings; and Shimotsuki Kai meetings." *Id.* at 6. But this is just about every type of meeting identified by the IPPs, whose complaint **[**65]** defendants have not challenged on *Twombly* grounds. The Court finds that most importantly, Nichicon is alleged to have participated in ATC meetings, which are alleged to have been "conspiratorial in nature." Dkt. No. 400 ¶ 158. Nichicon is specifically alleged to have been listed as a member of these meetings in a "Summer 2003 ATC Meeting Roster," and the ATC meetings are at the core of the IPPs' complaint for the electrolytic conspiracy, as these meetings are alleged to have served as the "regular conspiratorial meetings." *Id.* ¶¶ 10, 159.

These allegations alone are enough to defeat Nichicon's motion, but the Court further notes that Nichicon is not alleged simply to have taken on successor liability as a result of its acquisition from FMD. Rather, the IPPs' complaint alleges that "[t]he Nichicon defendants joined [Marketing Study Group] meetings in 2008 when it acquired FMD." *Id.* ¶ 167. These meetings are alleged to have been "conspiratorial [in] nature" and to have consisted of high-level employees attending to "agree upon prices." *Id.* ¶¶ 160, 166.

Nichicon's motion is denied.

c. Shinyei Technology Co., Ltd. and Shinyei Capacitor Co., Ltd.

Shinyei Technology Co., Ltd. and Shinyei Capacitor **[**66]** Co., Ltd. separately seek dismissal. Dkt. No. 475 at 10-11. The Court denies the request.

Both are Japanese corporations. Shinyei Technology Co., Ltd. is alleged to have established Shinyei Capacitor Co., Ltd. on February 3, 2011, to take over Shinyei Technology Co., Ltd.'s capacitor business. Dkt. No. 400 ¶¶ 103-05. The Court will therefore refer to both defendants collectively as "Shinyei," as defendants themselves do. Dkt. No. 475 at 10.

Shinyei is alleged only to have participated in the film capacitor conspiracy. The Japan Film Capacitor (JFC) meetings are alleged to have been the foundational, "regular conspiratorial meetings" for that conspiracy. Dkt. No. 400 ¶ 10. The Shinyei defendants are alleged to have "generally attended the JFC meetings," at which "[m]embers often shared price intentions that resulted in price agreements." *Id.* ¶ 181. Shinyei is even alleged to have been included in a fall 2008 chart created by Panasonic which stated that each listed defendant "discussed negotiating for price increases," and at the bottom of which "Panasonic wrote, 'We decided to accept the film price hike effective on April 1.'" *Id.* ¶ 183.

Based on these allegations, the Court finds that Shinyei **[**67]** Technology Co., Ltd. and Shinyei Capacitor Co., Ltd. do "belong in this case," Dkt. No. 475 at 10, and their motion to dismiss is denied.

d. Soshin Japan

Defendant Soshin Electric Co., Ltd. ("Soshin Japan") separately moves for dismissal on the ground that the complaint "does not give fair notice of the claims made against Soshin Japan" and because the complaint "fails to adequately allege that Soshin Japan entered into the allegedly conspiracy." Dkt. No. 475 at 13.

The first argument rests on the premise that the IPPs have insufficiently alleged "what [Soshin] did, to whom, where and when." *Id.* The Court finds that this level of detail is not required, and in any event, it is inconsistent with defendants' joint position that the IPPs' complaint generally passes the *Twombly* pleading standard, a **[*1077]** view the Court agrees with. The argument is rejected.

The second argument, too, is denied. Like Shinyei discussed above, Soshin Japan, too, is alleged to have been a participant of the foundational JFC meetings at which price agreements were entered into. Dkt. No. 400 ¶ 181. This is enough for now. Soshin Japan's motion is denied.

e. United Chemi-Con, Inc.

The final separate motion was brought by **[**68]** United Chemi-Con, Inc. ("UCC"). Dkt. No. 475 at 16-17. UCC is the U.S. subsidiary of Nippon Chemi-Con. Dkt. No. 400 ¶ 72.

UCC is generally situated similarly to the other U.S. subsidiaries which are discussed above, but the one way in which it is different — and, the Court suspects, the reason it is moving separately — is that there is one substantive paragraph in the complaint that addresses UCC directly. That paragraph is paragraph 186 and it figures largely in both UCC's motion and plaintiffs' response to it. Dkt. Nos. 475 at 16-17; 517 at 15-16.

The question, then, is whether that paragraph alone is enough to compel a different conclusion as to UCC than the other U.S. subsidiaries. The Court concludes the answer is no. Paragraph 186 alleges that "[t]here were bilateral meetings and discussions involving film capacitor cartel members during the Film Class Period, including those: (1) involving the NEC TOKIN, Panasonic, Rubycon, and United Chemi-Con, Inc. defendants from 2002 to 2013 regarding film capacitors sold to Dell Inc. . . . ." Dkt. No. 400 ¶ 186. The alleged participation in "meetings and discussions" about "film capacitors sold to Dell" does not establish that UCC joined the conspiracy. **[**69]** The Court dismisses UCC with leave to amend.

CONCLUSION

Defendants' motions are denied in part and granted in part.

For the DPPs' complaint, the following defendants are dismissed for the reasons stated above, with leave to amend: AVX Corporation; EPCOS Inc.; TDK-EPC Corporation; TDK U.S.A. Corporation; Fujitsu Components America, Inc.; KEMET Electronics Corporation; Nichicon (America) Corporation; Okaya Electric America Inc.; ROHM Semiconductor U.S.A. LLC; Shinyei Capacitor Co., Ltd.; Shinyei Corporation of America; Soshin Electronics of America, Inc.; United Chemi-Con, Inc.; and Vishay Intertechnology, Inc. Defendants' motions to dismiss the DPPs' complaint are denied in all other respects.

For the IPPs' complaint, the Court strikes all references to a nationwide class in indirect purchasers' claims under California's Cartwright Act and Unfair Competition Law. In addition, the following defendants are dismissed with leave to amend: ELNA America Inc.; Hitachi Chemical Co.; NEC TOKIN America, Inc.; Nichicon (America) Corp.; Rubycon America, Inc.; and United Chemi-Con, Inc. Defendants' motions to dismiss the IPPs' complaint are denied in all other respects.

The DPPs and IPPs are each directed **[**70]** to file either an amended complaint that conforms to this order or a notice of intent not to amend by June 16, 2015.

IT IS SO ORDERED.

Dated: May 26, 2015

Opinion by: THOMAS N. O'NEILL, JR.

Opinion

MEMORANDUM

Before me in this antitrust litigation are: certain defendants' motion to adjudicate plaintiffs' antitrust claims under the rule of reason[1] (Dkt. No. 492), plaintiffs' opposition to defendants' motion seeking application of the rule of reason

[1] Moving defendants are: **[*18]** the Eastern Mushroom Market Cooperative (EMMC), Robert A. Feranto, Jr. t/a Bella Mushroom Farms; Brownstone Mushroom Farms, Inc.; Brownstone Farms, Inc.; Brownstone Mushroom Farm; To-Jo Fresh Mushrooms, Inc.; Country Fresh Mushroom Co.; Gino Gaspari & Sons, Inc.; Kaolin Mushroom Farms, Inc.; South Mill Mushroom Farms, Inc.; Southmill Mushroom Sales, Inc.; Modern Mushroom Farms, Inc.; C&C Carriage Mushroom Co.; Sher-Rockee Mushroom Farm,

and cross-motion for partial summary judgment on their Sherman Act § 1 claim (Dkt. No. 495) and the responses and replies to each motion (Dkt. Nos. 496, 498, 501-08, 511).[2] I held oral argument on the motions on February 4, 2014. Following oral argument, plaintiffs filed a letter brief (Dkt. No. 624) and defendants filed a letter response. (Dkt. No. 630.) After considering all of the above, and as is further set forth below, I will grant in part and deny in part moving defendants' motion. I will deny plaintiffs' cross-motion for partial summary judgment.

BACKGROUND

Plaintiffs in this putative antitrust class action are purchasers of mushrooms. **[*19]** Dkt. No. 185 (Revised Consolidated Class Action Compl.) at ¶ 1.[3] The putative "direct purchaser class consists of more than a thousand purchasers of agaricus mushrooms." Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 1. Defendants include the Eastern Mushroom Marketing Cooperative and other entities that were members of the EMMC or were affiliates of members of the EMMC. See Dkt. No. 496 (Pls.' Statement of Facts) at ¶¶ 27-28. Under the 2001 EMMC membership agreement, the stated "objective of the Cooperative" was:

> to improve conditions in the mushroom industry for the mutual benefit of its members as producers by promoting, fostering and encouraging the intelligent and orderly marketing of mushrooms through cooperation; eliminating speculation, waste and fluctuating prices, making the distribution of agricultural byproducts between producers and consumers as direct as can be efficiently done, thereby eliminating any manipulation of the price by middlemen, stabilizing the marketing of agricultural products, encouraging efficiency and economy in marketing; preventing the demoralizing of markets resulting from dumping and predatory practices; mitigating the recognized evils of a marketing **[*20]** system under which prices are set for the entire industry by the weakest producer; and fostering the ability of the members of this Cooperative to obtain prices for their mushrooms in competitive markets, which are fair prices but not prices inflated beyond the reasonable value of such products by reason of artificially created scarcity of such products or other predatory trade practices which would injure the public interest.

Dkt. No. 497, Ex. 50 (Executed Membership Agreement for Bella Farms) at 2.

In their revised consolidated class action complaint, **[*21]** plaintiffs claim, inter alia, that in seeking to achieve their objective, defendants violated *Section 1 of the Sherman Act* through the EMMC's implementation of a supply control scheme — purchasing and leasing mushroom farms in order to place deed restrictions on the properties prohibiting the conduct of business related to the production of mushrooms. Dkt. No. 185 at ¶ 94; see also id. at ¶¶ 69, 73-81. Specifically, plaintiffs claim that

> [t]hrough membership dues and a "Supply Control Assessment," EMMC collected approximately $6 million from its members during 2001-2002. EMMC, acting as an agent of its members, then spent approximately $3 million to purchase four mushroom farms and to acquire lease options on two additional mushroom farms in the eastern United States for the purpose of shutting them down and reducing the mushroom production capacity available for nonmember non-conspirators to grow mushrooms in competition with the Defendants.

LLC; Oakshire Mushroom Farm, Inc.; Phillips Mushroom Farms, Inc.; Louis M. Marson, Jr., Inc.; Monterey Mushrooms, Inc.; and John Pia (Dkt. No. 513). Pursuant to a stipulation filed on November 13, 2014, plaintiffs' claims against defendants Gaspari Bros., Inc., LRP Mushrooms, Inc., and Michael Pia have been dismissed with prejudice. Dkt. No. 613.

[2] Also now pending in this action are several motions in limine seeking to exclude expert testimony, various other motions for summary judgment and the direct purchaser class plaintiffs' motion for class certification of the putative class of direct purchasers. Dkt. Nos. 513, 514, 515, 516, 518, 520, 521, 583, 584, 638, 641.

[3] Pursuant to my Order of June 5, 2006 consolidating seven previously filed antitrust class actions and one non-class action, on June 26, 2006, plaintiffs filed a consolidated amended class action complaint against defendants. Dkt. No. 49. On November 13, 2007, plaintiffs filed a revised consolidated class action amended complaint (Dkt. No. 185) pursuant to my Order of November 9, 2007 (Dkt. No. 184) which granted plaintiffs leave to file a complaint consolidating the June 26, 2006 complaint and an October 27, 2006 complaint by former class representative Theodore J. Katsiroubas — which were brought on behalf of the same putative class.

Id. at ¶ 72. Defendants do not contest "that the EMMC, despite various members' contrary opinions, did buy and/or lease certain properties that, at some point in time, were operated as mushroom farms that were unprofitable and closed at the time of the EMMC's purchase." **[*22]** Dkt. No. 505 (Defs.' Counter-Statement of Material Facts) at 7. Nor do they contest "that deed restrictions were imposed on these properties when they were later sold by the EMMC." Id. Defendants contend, however, that "not all EMMC members supported or participated in the supply control program." Id.[4]

Plaintiffs also claim that defendants violated *Section 1 of the Sherman Act* by "conspir[ing] among themselves and in conjunction with nonmember distributors to set artificially-inflated prices" for mushrooms. See Dkt. No. 185 at ¶ 93. On January 9, **[*23]** 2001, the EMMC held "a general membership meeting to discuss and sign the membership agreement." Dkt. No. 497, Ex. 27 (EMMC January 9, 2001 Meeting Minutes) at 1. "Pricing policies and minimum pricing for fresh mushroom products by region were discussed. Minimum price for individual products were discussed and agreed to by region." Id. Members of the EMMC agreed "not to sell or otherwise dispose of mushrooms except as provided under the terms of [the membership] Agreement and the Articles of Incorporation and Bylaws of the Cooperative." Dkt. No. 497, Ex. 50 (Executed Membership Agreement for Bella Farms) at 4, ¶ 6. EMMC members agreed "to sell mushrooms to all customers only on the terms authorized by the Cooperative." Id. at 5, ¶ 7. They also agreed "to handle and market all crops of mushrooms under [their] control during the term of [the membership] Agreement, pursuant to the terms and conditions of [the membership] Agreement and the Articles of Incorporation and Bylaws of the Cooperative." Id. at 4, ¶ 3 (emphasis added). Members agreed that they would "arrange or negotiate with buyers for the sale of mushrooms produced by or for [the member]." Id. at 4, ¶ 4.

Effective February 2001, the EMMC adopted a minimum pricing policy that established minimum pricing for various types, grades, sizes and packaging modes of mushrooms. See Dkt. No. 497, Ex. 9 (EMMC Current Policies, Revision **[*24]** Date Feb. 13, 2001). The agreement with respect to pricing applied to "sales to the retailers, wholesalers and to the non-members." Dkt. No. 497, Ex. 33 (A. David Carroll, Jr. Dep.) at 130:5-18; see also Dkt. No. 497 at Ex. 37 (Michael Basciani Dep.) at 75:18-24 ("Q. . . . one of the policies that the EMMC adopted was to try to set prices for — the downstream price that shippers got when they sold their product to wholesalers and retailers, correct? A. Yes, sir."). In other words, the EMMC set floor pricing for mushrooms that came out of packaging operations, not for mushrooms that came out of growing operations. See Dkt. No. 497 at Ex. 39 (Michael P. Cardile Dep. at 145:9-147:4.).

Under the policy which was revised effective February 13, 2001, members agreed, inter alia, that "[t]he pricing listed for each product is the minimum price for that product delivered to a customer in a region." Dkt. No. 497, Ex. 9 (EMMC Current Policies, Revision Date Feb. 13, 2001) at 1. The policy provided that the

> FOB[5] pricing minimum for each product is equal to $.50 less than the delivered price for the region [in which] the farm is located. For example, the minimum FOB price for a farm in the Mid Atlantic region is $.50 less than the delivered price for that product **[*25]** in the Mid Atlantic region.

Id. The policy provided that "[n]on-member mushroom farms are to be sold to at the same FOB price as customers." Id. Under the policy, "[n]o pricing is set for member-to-member (sideways sales within the cooperative. The members buying and selling will agree individually to the pricing for each sideway[s] sale." Id. The policy also

---

[4] On December 16, 2004, the United States Department of Justice filed an antitrust complaint against the EMMC after an eighteen-month investigation of the EMMC's membership activities, qualifications as a cooperative and marketing practices. See United States v. E. Mushroom Mktg. Coop., Inc., No. 04-5829 (E.D. Pa. Dec. 16, 2004). On September 9, 2005, the EMMC and the DOJ entered into a consent judgment that required the EMMC to nullify deed restrictions that had been placed on six properties that the EMMC had sold or transferred. See Dkt. No. 497, Ex. 21. The consent judgment also prohibited the EMMC from placing restrictions on other properties for ten years. Id.

[5] FOB or "free on board" means that goods are "delivered free of charge on the means of conveyance, such as air, rail, or sea." Free on board, Black's Law Dictionary (10th ed. 2014). The term allocates "the rights and duties of the buyer and the seller of goods with respect to delivery, payment, and risk of loss, whereby the seller must clear the goods for export, and the buyer must arrange for transportation." Id.

provided that "[m]embers with off site Distribution Facilities" — "defined as off site distribution facilities owned (51% or greater ownership by the member and whose sales pricing is controlled by the member)" — "must sell to other wholesalers at or above the minimum pricing for that product." Id.

When the EMMC met on March 12, 2002, "[a] pricing list for every product sold was distributed." Dkt. No. 497, Ex. 28 (EMMC Meeting Minutes March 12, 2002) **[*26]** at 2. At the March meeting the cooperative discussed a Budget Audit Committee which was "to do mandatory individual audits on members. They will take the minimum pricing list and match it to members' books." Id. at 1. The EMMC met again on April 9, 2002, where, inter alia, "[a] motion was made, seconded and so adopted to increase the price of retail washed, sliced mushrooms by $.20 per [p]ound and have the product so labeled by a vote of 20 to 4." Dkt. No. 497, Ex. 29 (EMMC Meeting Minutes April 9, 2002) at 3. Under the EMMC policy revised on April 24, 2002, members were "never permitted to offer pricing below EMMC minimums to obtain the current business of a non-member in an new or shared account." Dkt. No. 497, Ex. 11 (EMMC Current Policies, Revision Date, Apr. 24, 2002) at 4. Members were "never permitted to offer prices below the EMMC minimums to counter a purported offer from an EMMC member." Id. The policy also set forth a procedure to petition for matching price permission for members wishing to make offers below EMMC minimum prices. Id. at 4-5. In light of the above, plaintiffs assert that "[d]efendants engaged in naked-price fixing [sic]." Dkt. No. 185 at ¶ 93.

Moving defendants do not contest the EMMC's implementation **[*27]** of a minimum pricing policy.[6] Dkt. No. 505 (Defs.' Counter-Statement of Material Facts) at 2 ("it is not disputed that the EMMC issued minimum price lists and distributed them to [] the member Defendants"). Instead, they assert that "the EMMC made little or no effort to enforce the regulations regarding the Minimum Pricing Policy." Id. They contend that "the EMMC minimum pricing policy was not actually followed by each and every member of the EMMC." Id. at 4-5. They contend that "[t]he evidence of record does not substantiate Plaintiffs' contention that EMMC pricing applied to all sales made by all non-EMMC distributor entities as opposed to the grower member entities."[7] Id. at 5. Moving defendants also contend that the EMMC was "an attempt to stabilize prices for fresh mushrooms in order to prevent the industry from turning to an oligopoly, controlled by [] three or four large-scale producers rather than a large number of smaller, family owned farms." Dkt. No. 501 (Defs.' Rule of Reason Reply) at 5. They assert that dire market conditions existed for mushrooms at the time of the EMMC's formation, including the Sixth Circuit's voiding of the Mandatory Assessment Provisions of the Mushroom Promotion Research **[*28]** and Consumer Information Act of 1990 (a statute that had funded the advertising and promotion of mushrooms) and the bankruptcy and closing of Money's Mushrooms, then the largest mushroom producer in United States and Canada. See Dkt. No. 492 (Defs.' Rule of Reason Mot.) at ¶¶ 6, 7. Finally, moving defendants assert that

> [t]hey formed the EMMC pursuant to the advice of counsel and under the good faith belief that under the Capper-Volsted Act, they could as constituted act cooperatively to promote and jointly market their mushrooms and stabilize the prices [for mushrooms] paid by the large retail and institutional middlemen without exposure to antitrust liability.

Dkt. No. 492 (Defs.' Rule of Reason Mot.) at ¶ 9.[8]

---

[6] Defendant M.D. Basciani & Sons contests plaintiffs' contentions that "the EMMC adopted and amended various minimum pricing policies for mushrooms" and that "all EMMC members agreed to follow the EMMC minimum pricing policies." Dkt. No. 502 (M.D. Basciani & Sons, Inc.s' Resps. To Pls.' Statement of Undisputed Facts) at 1-2. It contends instead that "[d]uring the time that M.D. Basciani was a member of the EMMC, the EMMC provided it with documents labeled 'EMMC Current Policies,' which documents, **[*29]** being in writing, speak for themselves." Id.

[7] Moving defendants also contend that the members of the EMMC "voted to voluntarily abandon the Minimum Pricing Policy in August of 2005 . . . ." Dkt. No. 492 (Defs.' Rule of Reason Mot.) at ¶ 12.

[8] Plaintiffs argue that "absent Capper-Volstead immunity, [d]efendants' conduct is simply naked price fixing subject to condemnation under the per se rule." Dkt. No. 624 (Pls. Letter Br.) at 3. Moving defendants, in support of their motion seeking application of the rule of reason, assert that "the DOJ concluded that the EMMC was an agricultural cooperative organized pursuant to the Capper-Volsted Act . . . and did not challenge the EMMC's Minimum Pricing Policy." See Dkt. No. 492 (Defs.' Rule of Reason Mot.) at ¶ 12. I am not bound by the DOJ's conclusion with respect to the applicability of the Capper-Volsted Act immunity and, as is set forth below, have previously found that the protections of the Capper-Volsted Act were not available to

Under the EMMC membership agreement, each member agreed that it was "one of numerous producers engaged in the production and marketing of mushrooms." Dkt. No. 497, Ex. 50 (Executed Membership Agreement for Bella Farms) at 1. Each member "expressly represent[ed] and warrant[ed] that it [was then] engaged in **[*32]** the production of mushrooms, that it [was] in a position to control the mushrooms subject to [the] Agreement and that it [would] be able to perform according to [the] Agreement." Id. at 7, ¶ 14. Each member also agreed that it "competes with other members for the same customers." Id. at 4, ¶ 4.

Plaintiffs contend that "the EMMC's membership did not include solely growers [of mushrooms]. The EMMC's membership included . . . non-grower members . . . . In addition, the members of the EMMC included several integrated companies that processed, packaged, shipped and marketed mushrooms in addition to growing mushrooms." Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 3 (citations omitted). At oral argument, plaintiffs' counsel explained that "some of the EMMC members were also distributors . . . . [T]he members of the EMMC, some of them were growers and distributors, [and] some of them were just growers and had . . . relationships with distributors." Dkt. No. 628 (Oral Arg. Tr.) at 55:12-18; see also Dkt. No. 497, Ex. 9 (EMMC Current Policies, Revision Date Feb. 13, 2001) at 1 (addressing pricing for EMMC "[m]embers with off site Distribution Facilities"). As was explained in a January 23, 2001 letter from then-EMMC counsel to John Pia, President **[*33]** of the EMMC:[9]

> Among the EMMC membership there are several different organizational structures used for the conduct of business. As we know, all EMMC members are "producers", i.e. mushroom growers and farmers.[10] However,

---

the EMMC. See *In re Mushroom Direct Purchaser Antitrust Litig., 655 F.3d 158, 162 (3d Cir. 2011)* ("Neither DOJ determination — that EMMC acted anticompetitively or that EMMC was a properly formed Capper-Volstead cooperative — is binding upon the District Court or th[e] Court [of Appeals].").

On March 26, 2009, after **[*30]** the close of Phase I discovery, I denied certain defendants' motions for summary judgment and plaintiffs' cross motion for summary judgment on the issue of Capper-Volstead immunity. I found that the inclusion of Mario Cutone Mushroom Co. Inc. (M. Cutone), a non-grower distributor, in the EMMC's membership was sufficient to destroy Capper-Volstead immunity. *In re Mushroom Direct Purchaser Antitrust Litig., 621 F. Supp. 2d 274, 283-86 (E.D. Pa. 2009)*. I also found that the Act's exemption did not extend to protect cooperatives that conspire with entities not engaged in agricultural production as was the case with Kaolin/South Mill and its distribution entities and LRP-M/ Manfredini Enterprises. *Id. at 286-91 (E.D. Pa. 2009)* ("for the EMMC and its members to fix prices with affiliated distributors when the distribution entities are not a single economic unit with their affiliated member grower constitutes a conspiracy that destroys the EMMC's Capper-Volsted exemption"). I denied defendants' request to certify my Order for appeal pursuant to *28 U.S.C. § 1292(b)*. Dkt. No. 315. Defendants then filed an interlocutory appeal which was dismissed by the Court of Appeals for the Third Circuit on August 23, 2011. The Court of Appeals found that a prejudgment order denying the protections of the Capper-Volstead Act was not a collateral **[*31]** order subject to interlocutory appeal. *In re Mushroom, 655 F.3d at 167*.

On January 6, 2014, certain defendants filed a motion seeking reconsideration of my March 26, 2009 Capper-Volstead decision. On October 14, 2014, I denied defendants' motion for reconsideration. *In re Mushroom Direct Purchaser Antitrust Litig., 54 F. Supp. 3d 382, 395 (E.D. Pa. 2014)*. I found that neither *American Needle, Inc. v. National Football League et al., 560 U.S. 183, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*, nor *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820 (3d Cir. 2010)*, required reversal of my prior finding that the membership of M. Cutone in the EMMC destroyed the EMMC's immunity from antitrust liability under the Capper-Volstead Act. *In re Mushroom, 54 F. Supp. 3d, at *390-91*. I also found that reconsideration did not require reversal of my prior finding that EMMC member-grower Kaolin and the non-EMMC member South Mill distribution entities do not constitute a single economic entity. *Id. at 388-89*.

I certified my reconsideration decision on the Capper-Volsted questions for interlocutory appeal pursuant to *28 U.S.C. § 1292(b)*. *Id. at 394-95*. On December 2, 2014, the Court of Appeals denied M.D. Basciani, Inc. and the EMMC's petitions for leave to file an interlocutory appeal. Dkt. No. 614.

[9] The letter was produced pursuant to a "limited waiver of the attorney-client privilege." Dkt. No. 492 (Defs.' Rule of Reason Mem.) at 12 n. 3.

[10] Of course, subsequent to this letter, the Court determined that not all of the EMMC members were producers given the inclusion of M. Cutone, a non-grower distributor, in the EMMC's membership, an inclusion that I found was sufficient to destroy Capper-Volstead **[*35]** immunity. See *In re Mushroom, 621 F. Supp. 2d at 289-90*; see also *In re Mushroom, 54 F. Supp. 3d at 391* ("M. Cutone was a non-grower member [of the EMMC] who had the power to participate in the control and policymaking of

> because of internal operational/organizational choices or relationships with affiliates and/or wholly owned operational/organizational choices or relationships with affiliates and/or wholly owned subsidiaries, almost all of the producer/member organizations also either process, package, market and or sell mushrooms. Generally speaking, this is accomplished in the following ways:
> a. by a single legal entity performing all related tasks;
> b. by a parent, and a wholly owned-subsidiary which separate the growing and sales function into separate but related legal entities;
> c. by related legal entities which share common or similar ownership and which are generally operated by a core family control group; and
> d. in the case of the Mushroom Alliance, on a cooperative basis similar to, but smaller than, EMMC.

Dkt. No. 492, Ex. A. at 1-2. The letter further explained that

> EMMC is organized in a "non-traditional" sense in terms of the "classic" cooperative. Most, but not all, agricultural **[*34]** cooperatives differ from EMMC in that they tend to combine grower organizations for the collective purpose of consolidating and sharing the "getting-to-market" function for agricultural products, i.e., processing, handling, sales and marketing. These "classic" coops include organizations like Land O'Lakes, Sunmaid, Welch's, Sunkist and Ocean Spray. EMMC is not like those cooperatives given that EMMC members will continue to conduct independent businesses.

Id. at 3. Plaintiffs assert that "although certain owners of the growing companies may have created downstream packaging and distribution companies for various reasons, in some instances the owners of packaging and distribution companies created growing operations in order to participate in the EMMC." Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 2.

On the record now before the Court, the members of the EMMC included both grower-only entities and vertically integrated entities whose operations included both growing and distribution of mushrooms. See Dkt. No. 492, Ex. A. at 1-2 ("almost all of the producer/member organizations also either process, package, market and/or sell mushrooms"); Dkt. No. 497, Ex. 1 at EMMC-DOJ-03544-45 (EMMC Response to Civil Investigative Demand No. 22366, identifying "each member's business activities since January 1, 2000"). As I have previously found the EMMC members also included one non-grower distributor for a non-EMMC member grower: Mario Cutone Mushroom Co. Inc.[11] *In re Mushroom Direct Purchaser Antitrust Litig., 621 F. Supp. 2d 274, 285 (E.D. Pa. 2009)*.

Specifically, defendants include the following entities which plaintiffs **[*36]** claim "[j]oined the EMMC at some time during the period from 2001 to 2005": (1) Robert A. Feranto, Jr., t/a Bella Mushroom Farms; (2) Brownstone Mushroom Farms; (3) Cardile Mushrooms, Inc.; (4) Country Fresh Mushroom Co.; (5) Forest Mushrooms Inc.; (6) Franklin Farms Inc.; (7) Gino Gaspari & Sons; Inc., (8) Giorgi Mushroom Company; (9) Kaolin Mushroom Farms, Inc.; (10) Leone Pizzini & Son, Inc.; (11) LRP-M Mushrooms, Inc.;[12] (12) Modern Mushroom Farms, Inc.; (13) Oakshire Mushroom Farm, Inc.; (14) Phillips Mushroom Farms, Inc.; (15) Harvest Fresh Farms, Inc.; (16) Louis M. Marson, Inc.; (17) Mario Cutone Mushroom Co. Inc.; (18) M.D. Basciani & Sons, Inc.; (19) Monterey Mushrooms, Inc.; (20) Masha & Toto, Inc.; (21) W&P Mushroom, Inc.; (22) Mushroom Alliance, Inc.;[13] (23) Kitchen Pride

---

the association through voting. . . . M. Cutone cannot become a grower for the purposes of satisfying the Capper-Volsted Act's requirements by asserting the single-entity defense in this context.")

[11] M. Cutone was a distributor for grower and non-EMMC member, non-defendant M&V Enterprises. Unlike the other EMMC members, it was not itself a grower of mushrooms.

[12] "LRP-M sold all of the mushrooms it grew to Manfredini Enterprises, its affiliated distributor." *In re Mushroom, 54 F. Supp. 3d at 389*. To date, the Court has not been presented with facts which would be "determinative of whether LRP-M and Manfredini Enterprises are separate decisionmakers pursuing separate economic interests." **[*37]** Id.

[13] The Mushroom Alliance, Inc. was a small cooperative whose members included Country Fresh (who was also an EMMC member on its own for some period of time), JM Farms, Kitchen Pride and Creekside.

Mushrooms; (24) JM Farms, Inc.; and (25) United Mushroom Farms Cooperative, Inc.[14] Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 27.

Defendants also include the following non-members of the EMMC who are "distributors who were affiliated with members of the EMMC": Cardile Brothers Mushroom Packaging, Inc.; C&C Carriage Mushroom, Co.; To-Jo Mushrooms, **[*38]** Inc.;[15] Sher-Rockee Mushroom Farm; and South Mill Mushroom Sales, Inc.[16] Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 28. Moving defendants assert that "it is significant that the downstream affiliate Defendants were never members of the EMMC and did not themselves agree to follow any of its rules and regulations regarding pricing." Dkt. No. 505 (Defs.' Counter-Statement of Material Facts) at 2, ¶ 16. Sher-Rockee Mushroom Farm is another non-EMMC member defendant, but it is not a distributor. Instead, it "is a grower that sold mushrooms exclusively to C&C Carriage Co. or Modern Mushroom Farms." Dkt. No. 505 (Defs.' Counter-Statement of Material Facts) at 12, ¶ 28.[17]

STANDARD OF REVIEW

Moving defendants move under *Rules 16(c)(2)(A)* and (D) of the Federal Rules of Civil Procedure for a pre-trial order "providing that Plaintiffs' antitrust claims against Defendants be adjudicated under the Rule of Reason." Dkt. No. 492 (Defs.' Rule of Reason Mot.) at 1. *Rule 16(c)(2)* provides, in relevant part, that "[a]t any pretrial conference, the court may consider and take appropriate action on . . . formulating and simplifying the issues, and eliminating frivolous claims or defenses" and "avoiding unnecessary proof and cumulative evidence, and limiting the use of testimony under *Federal Rule of Evidence 702*." *Fed. R. Civ. P. 16(c)(2)(A)* and (D). Moving defendants argue that their motion is necessary to "formulat[e] and simplify[] the issues" and avoid "unnecessary proof" and contend that it concerns the resolution of a "purely legal question" as to the standard to be used to adjudicate plaintiffs' claims. Dkt. No. 492 (Defs.' Rule of Reason Mem.) at 3-4. In support of their motion, moving defendants cite to *North Jackson Pharmacy, Inc. v. Caremark RX, Inc., 385 F. Supp. 2d 740 (N.D. Ill. 2005)*, where **[*40]** the Court decided to apply the rule of reason to the plaintiff's antitrust claim pursuant to Rule 16. Dkt. No. 492 (Defs.' Rule of Reason Mem.) at 3-4. In North Jackson, the Court explained that "the proper standard to be applied to North Jackson's Sherman Act claim[]is one of law that can be resolved based on the allegations of the [complaint] and facts that neither party disputes." *385 F. Supp. 2d at 743* (emphasis added); see also *Procaps S.A. v. Patheon Inc., 36 F. Supp. 3d 1306, 1323 (S.D. Fla. 2014)* ("Determining whether the rule of reason analysis or per se analysis applies in a given case is a question of law for the Court."); *In re Se. Milk Antitrust Litig., 801 F. Supp. 2d 705, 718 (E.D. Tenn. 2011)* ("the weight of authority supports defendants' argument that determination of the appropriate rule of

---

"Creekside has negotiated a settlement with both the class plaintiffs and the individual Giant Eagle and Publix plaintiffs. Stipulations of dismissal have been entered in the individual actions, and Creekside is currently working with the class plaintiffs to prepare a Motion for Preliminary Approval of the class settlement." Dkt. No. 218 at ECF p. 2 n.3; see also Dkt. No. 213.

[14] Moving defendants assert that "many of the Defendants listed above resigned from the EMMC during the time period in question. Dkt. No. 505 (Defs.' Counter-Statement of Material Facts) at ¶ 27. Defendants contend that "[t]hese resignations began shortly after the EMMC was formed, beginning with Defendants[] Cutone, M&T, and the Mushroom Alliance (including Country Fresh, Creekside, Kitchen Pride and JM)." Id. at ¶ 27.

[15] To-Jo Fresh Mushrooms, Inc. is an affiliate of EMMC member Brownstone Mushroom Farms. See Dkt. No. 497, Ex. 3 (Linda Pizzini Johnson Dep.) at 191:6-24 (explaining that ToJo was a packager/shipper and Brownstone was the grower).

[16] I previously decided that "Kaolin/South Mill and its distribution entities are separate decisionmakers pursuing separate economic interests" and that they "cannot constitute a single entity . . . ." *In re Mushroom, 54 F. Supp. 3d at 389*; see also *In re Mushroom, 621 F. Supp. 2d at 279* ("The Kaolin/South Mill distribution centers were not EMMC members, did not grow mushrooms but sold mushrooms grown by defendant **[*39]** Kaolin.").

[17] Except as is set forth herein, I will not here further specify whether any specific defendant was a grower-only, a distributor-only or an integrated grower-distributor because I find that questions of fact remain with respect to the organizational structure of many of the defendants.

law to be applied is a question of law to be decided by the Court"). At the same time, "while the mode of analysis is certainly a question of law, 'underpinning that purely legal decision are numerous factual questions.'" *In re Blue Cross Blue Shield Antitrust Litig., 26 F.Supp.3d 1172, 1186 (N.D. Ala. 2014)*, quoting *In re Wholesale Grocery Prods. Antitrust Litig., 752 F.3d 728, 733-34 (8th Cir. 2014)*.

Plaintiffs contend in their initial brief that moving defendants' Rule 16 motion is instead akin to a motion for "partial summary judgment" which "should be judged pursuant to the standards of *Fed. R. Civ. P. 56(a)*." Dkt. No. 498 (Pls.' Opp'n Mem.) at 5. Plaintiffs also ask me to enter partial summary judgment in their favor finding that the EMMC and **[*41]** its members along with distributors affiliated with EMMC members engaged in a per se illegal horizontal conspiracy to fix prices and restrict supply." Dkt. No. 495 at 1. Summary judgment will be granted "against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The party moving for summary judgment bears the burden of demonstrating that "there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; see *Celotex, 477 U.S. at 322-23*. If the movant sustains its burden, the nonmovant must set forth facts demonstrating the existence of a genuine dispute. See *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A dispute as to a material fact is genuine if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." Id. A fact is "material" if it might affect the outcome of the case under governing law. Id.

At oral argument counsel for plaintiffs noted plaintiffs' "agree[ment] that the facts are undisputed with respect to whether the rule of reason or the per se rule applies" and conceded that "the result is going to be the same" whether the question is analyzed **[*42]** under *Rule 56* or Rule 16. Dkt. No. 628 (Oral Arg. Tr.) at 26:5-11. Given that the parties are in accord that there are no relevant facts in dispute, I will proceed to select the appropriate mode of antitrust analysis as a question of law. See *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 829 n.7 (3d Cir. 2010)* ("The selection of a mode of antitrust analysis is a question of law.").

DISCUSSION

I. Rule of Reason vs. Per Se Rule

Section 1 of the Sherman Act provides in relevant part that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. To establish their claim under *Section 1*, plaintiffs must show: (1) that each defendant was "a party to a contract, combination . . . or conspiracy" and (2) "that the conspiracy to which the defendant was a party imposed an unreasonable restraint on trade." *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 315 (3d Cir. 2010)* (citations omitted). The reasonableness of a restraint of trade under *Section 1 of the Sherman Act* is judged according to the rule of reason, the per se rule or the intermediate quick look analysis. "[T]he three modes of analysis should be viewed as a single inquiry that, depending on the circumstances, may sometimes be conducted by applying various presumptions." *Deutscher Tennis Bund, 610 F.3d at 831*. "[T]here is generally no categorical **[*43]** line to be drawn between restraints that give rise to an intuitively obvious inference of anticompetitive effect and those that call for more detailed treatment." *California Dental Ass'n v. Federal Trade Comm'n, 526 U.S. 756, 780-81, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*; see also *Nat'l Coll. Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 104 n.26, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* (noting that no "bright line separat[es] per se from Rule of Reason analysis"). "[I]n deciding what rubric to apply, the Court is engaged more in art than science. An overly-formalistic and literal approach is to be avoided." *In re ATM Fee Antitrust Litig., 554 F. Supp. 2d 1003, 1016 (N.D. Cal. 2008)*, citing *Broad. Music, Inc. v. Columbia Broad., 441 U.S. 1, 9, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; see also *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 887, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (citation and internal quotation omitted) ("[A] departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than . . . upon formalistic line drawing."); *United States v. Brown Univ. in Providence in State of R.I., 5 F.3d 658, 670 (3d Cir. 1993)* ("the test for determining what constitutes per se unlawful price-fixing is one of substance, not semantics"). "Regardless of the standard used, the purpose of the inquiry is always to assess the effect of the conduct on competition . . . 'whether or not the challenged restraint enhances competition.'" *Deutscher Tennis Bund, 610 F.3d at 830*, quoting *NCAA, 468 U.S. at 104*. The determination of whether a challenged practice warrants treatment under the rule of reason or the per se rule is important because that determination affects the quantum of proof plaintiffs must offer to sustain their claim. See *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 461 (3d Cir. 1998)* **[*44]** .

The Supreme "Court presumptively applies rule of reason analysis, under which antitrust plaintiffs must demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (citations omitted); see also *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* (holding that whether a restraint is unreasonable and in conflict with the Act is normally evaluated under the "rule of reason"); *Cont'l Airlines, Inc. v. United Airlines, Inc., 277 F.3d 499, 509 (4th Cir. 2002)* ("if the reasonableness of a restraint cannot be determined without a thorough analysis of its net effects on competition in the relevant market, courts must apply a full rule-of-reason analysis"). "[T]here is a strong presumption in favor of the rule of reason because applying the per se rule carries the risk of condemning activity that promotes competition." *Procaps, 36 F. Supp. 3d at 1323*.

> [C]ourts cannot act perfunctorily when distinguishing restraints that merit a per se approach from those that deserve rule of reason analysis, and only if a restraint clearly and unquestionably falls within one of the handful of categories that have been collectively deemed per se anticompetitive can a court be justified in failing to apply an appropriate economic analysis to make this determination.

Expert Masonry, Inc. v. Boone Cnty., Ky., 440 F.3d 336, 343 (6th Cir. 2006).

"The rule of reason requires **[*45]** the fact-finder to 'weigh [] all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.'" *Deutscher Tennis Bund, 610 F.3d at 830*, quoting *Brown Univ., 5 F.3d at 668*. Analysis under the rule of reason requires application of a burden shifting framework that first obligates a plaintiff to show that the challenged conduct has produced anti-competitive effects within the market. *Brown Univ., 5 F.3d at 668*. When a plaintiff meets this burden, the burden shifts to the defendants to show that the challenged conduct promotes a sufficiently procompetitive justification; upon this showing, the plaintiff may rebut by showing that the restraint was not reasonably necessary to achieve the procompetitive objective. Id. In applying the rule of reason, the fact finder "must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil, 522 U.S. at 10*. The inquiry focuses on whether the restraint "is one that promotes competition or one that suppresses competition." *Deutscher Tennis Bund, 610 F.3d at 830*, quoting **[*46]** *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 691, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

Certain conduct "presumed to unreasonably restrain competition" is not analyzed under the rule of reason, but rather is analyzed as per se illegal "without elaborate inquiry as to the precise harm [it has] caused or the business excuse for [its] use." *In re Flat Glass Antitrust Litig., 385 F.3d 350, 356 (3d Cir. 2004)*, quoting *Rossi, 156 F.3d at 461*. "[P]er se analysis, permits courts to make 'categorical judgments' that certain practices, including [some types of] price fixing,[18] horizontal output restraints, and market-allocation agreements, are illegal per se. *Cont'l Airlines, Inc., 277 F.3d at 509*. "Per se rules of illegality are judicial constructs . . . and are based in large part on economic predictions that certain types of activity will more often than not unreasonably restrain competition." *Brown Univ., 5 F.3d at 670* (citations omitted). "For the sake of business certainty and litigation efficiency, [the Supreme Court has] tolerated the invalidation of some agreements that a fullblown inquiry might have proved to be reasonable." *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. But, "[o]ver the past

---

[18] Continental Airlines was decided prior to the Supreme Court's decision in *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 882, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*, which held that vertical price restraints, once found to be per se illegal, are to be "judged by the rule of reason," as is further set forth herein.

several decades, the Supreme Court has narrowed the applicability of per se analysis expressing a reluctance to apply this standard 'in the context of business relationships where the economic impact of certain practices is not immediately obvious.'" **[*47]** *RDK Truck Sales & Serv. Inc. v. Mack Trucks, Inc., No. 04-4007, 2009 U.S. Dist. LEXIS 43245, 2009 WL 1441578, at *4 (E.D. Pa. May 19, 2009)*, quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* (further citations omitted); see also *Behrend v. Comcast Corp., No. 03-6604, 2012 U.S. Dist. LEXIS 51889, 2012 WL 1231794, at *11* ("The authorities agree that this 'modern approach' to antitrust analysis should apply where the rationale of the per se rule does not neatly fit the industry involved.") (E.D. Pa. April 12, 2012); *In re Se. Milk, 801 F. Supp. 2d at 719* ("the category of agreements to be analyzed under a per se analysis has been shrinking over the last few years"). "Per se liability is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Texaco, 547 U.S. at 5* (internal quotation and citation omitted); see also *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 103-04, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* ("Per se rules are invoked when [the] surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified further examination of the challenged conduct."). "[T]he per se rule is appropriate only after courts have had considerable experience with the type of restraint at issue . . . and only if courts can predict with confidence that it would be invalidated in all or almost all instances under the rule of reason." *Leegin, 551 U.S. at 886-87* (citations omitted); see also *In re Sulfuric Acid Antitrust Litig., 703 F.3d 1004, 1011-12 (7th Cir. 2012)* ("The per se rule is designed for cases in which experience has convinced **[*48]** the judiciary that a particular type of business practice has no (or trivial) redeeming benefits ever."). This form of analysis is applied where a "practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; see also *Major League Baseball Props. Inc. v. Salvino, Inc., 542 F.3d 290, 340 n.10 (2d Cir. 2008)* (Sotomayor, J., concurring) ("When empirical analysis is required to determine a challenged restraint's net competitive effect, neither a per se nor a quick-look approach is appropriate . . . ."). "To justify a per se prohibition a restraint must have manifestly anticompetitive effects, and lack . . . any redeeming virtue." *Leegin, 551 U.S. at 886* (internal quotations omitted); see also *In re Se. Milk, 801 F. Supp. 2d at 717* ("A per se rule is inappropriate where the effects of a particular restraint are unclear, even where aspects of the restraint may appear to be facially anti-competitive.") (citation omitted).[19]

A. Price Fixing Claim

To determine whether the rule of reason or the per se rule applies to the claimed agreements to fix prices and restrict the supply of mushrooms, I must first consider **[*50]** the nature of the relationships between the parties to the agreements. Whether any agreement by defendants to restrain the trade of mushrooms is horizontal or vertical in nature is relevant to my determination of whether the rule of reason or the per se rule should be applied to plaintiffs' Sherman Act Section 1 claim. See *In re Se. Milk Antitrust Litig., 739 F.3d 262, 272 (6th Cir. 2014)* ("When determining whether to use the per se rule or the rule of reason, courts must consider the type of restraint at issue — whether it is horizontal or vertical."). "The labels attached to the conduct by the [parties] are not determinative . . ., i.e. that plaintiffs repeatedly state that the conspiracy they allege is a horizontal, per se illegal conspiracy to fix prices . . . does not make it so." *In re Se. Milk, 801 F. Supp. 2d at 718*.

---

[19] An abbreviated rule of reason analysis, "quick look," is applied in those cases where the per se rule is inappropriate but where "no elaborate **[*49]** industry analysis is required to demonstrate the anticompetitive character of an inherently suspect restraint." *Brown Univ., 5 F.3d at 669* (internal quotation marks omitted). The "quick look" analysis is used in cases where "[s]ome restraints of trade are 'highly suspicious' yet 'sufficiently idiosyncratic that judicial experience with them is limited.'" *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 317 (3d Cir. 2010)*, quoting 11 Herbert Hovenkamp, ***Antitrust Law*** ¶ 1911a (2d ed. 2005). Under this "intermediate" standard, "the competitive harm is presumed, and 'the defendant must promulgate some competitive justification' for the restraint." *Deutscher Tennis Bund, 610 F.3d at 830*, quoting *Brown Univ., 5 F.3d at 669*. The Court presumes "adverse competitive impact prevails and [] condemns the practice without ado" if the defendant provides no legitimate competitive justifications, but "must proceed to weigh the overall reasonableness of the restraint using a full-scale rule of reason analysis" if "sound procompetitive justifications" are set forth. *Deutscher Tennis Bund, 610 F.3d at 830*, quoting *Brown Univ., 5 F.3d at 669*. Neither plaintiffs nor defendants have argued that a quick look analysis is warranted in this case.

"'An arrangement is said to be 'horizontal' when its participants are (1) either actual or potential rivals at the time the agreement is made; and (2) the agreement eliminates some avenue of rivalry among them.'" *In re Sulfuric Acid Antitrust Litig., 743 F. Supp. 2d 827, 867 (N.D. Ill. 2010)*; quoting 11 H. Hovenkamp, ***Antitrust Law*** ¶ 1901b, p. 203 (2d ed. 2005). Horizontal price fixing is conduct wherein "competitors at the same market level agree to fix or control the prices they will charge for their respective foods or services." *Brown Univ., 5 F.3d at 670* (emphasis added); **[*51]** see also *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* ("Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints."). Horizontal price fixing has generally been held to be per se illegal. *Brown Univ., 5 F.3d at 670*, citing *F.T.C. v. Superior Ct. Trial Lawyers Ass'n, 493 U.S. 411, 435-36, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*; see *Leegin, 551 U.S. at 886* ("Restraints that are per se unlawful include horizontal agreements among competitors to fix prices."); *In re Flat Glass, 385 F.3d at 356* (finding horizontal price fixing to be per se unreasonable); see also *Maricopa Cnty. Med. Soc'y, 457 U.S. at 344-47* ("We have not wavered in our enforcement of the per se rule against price fixing."); *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* ("Under the Sherman Act a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se."). However, "[n]ot all arrangements among actual or potential competitors that have an impact on price are per se violations of the Sherman Act or even unreasonable restraints." *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 23, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. The Supreme Court has explained that

> Mergers among competitors eliminate competition, including price competition, but they are not per se illegal, and many of them withstand attack under any existing antitrust standard. Joint ventures and other cooperative arrangements are also not usually unlawful, at **[*52]** least not as price-fixing schemes, where the agreement on price is necessary to market the product at all.

Id.

"Vertical conspiracies, on the other hand, involve agreements among actors at different levels of market structure to restrain trade, 'such as agreements between a manufacturer and its distributors to exclude another distributor from a given product and geographic market.'" *In re Se. Milk, 801 F. Supp. 2d at 718*, quoting *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. 1988)*. Vertical price restraints, once also found to be per se illegal, are now "judged by the rule of reason." *Leegin, 551 U.S. at 882*; see also *Mooney v. AXA Advisors, L.L.C., 19 F. Supp. 3d 486, 498 (S.D.N.Y. 2014)* ("agreements between persons or entities at different levels of a market structure, such as between a manufacturer and distributor — commonly referred to as 'vertical restraints' — are analyzed under the rule of reason"). In Leegin, the Supreme Court overturned its prior precedent which had permitted the application of per se liability to vertical restraints.[20] It found that "a manufacturer might be able to achieve the procompetitive benefits of resale price maintenance by integrating downstream and selling its products directly to consumers." *551 U.S. at 903*. The Supreme Court explained that its prior precedent,

> tilts the relative costs of vertical integration and vertical agreement by making the **[*53]** former more attractive based on the per se rule, not on real market conditions. . . . This distortion might lead to inefficient integration that would not otherwise take place, so that consumers must again suffer the consequences of the suboptimal distribution strategy. And integration, unlike vertical price restraints, eliminates all intrabrand competition.

Id. Accordingly, the Supreme Court determined that continued adherence to the per se rule against vertical price restraints was inappropriate. Id. The Supreme Court explained:

> [a] horizontal cartel among competing manufacturers or competing retailers that decreases output or reduces competition in order to increase price is, and ought to be, per se unlawful. . . . To the extent a vertical

---

[20] In *Dr. Miles Med. Co. v. John D. Park & Sons Co., 220 U.S. 373, 408, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*, the plaintiff, a manufacturer of medicines, sold its products only to distributors who agreed to resell them at set prices. The Supreme Court found the manufacturer's control of resale prices to be unlawful, explaining that the pricing agreements would advantage the **[*54]** distributors, not the manufacturer, and thus the arrangement was analogous to a combination among competing distributors, which the law treated as void. *Dr. Miles, 220 U.S. at 407-08*.

> agreement setting minimum resale prices is entered upon to facilitate either type of cartel, it, too, would need to be held unlawful under the rule of reason.

Leegin, 551 U.S. at 893 (2007) (citation omitted).

In their motion, moving defendants contend that the conspiracy alleged by plaintiffs "is more akin to a vertical agreement between the Defendant growing companies who were members of the EMMC and their downstream packaging and distribution companies (most of which are also defendants in this case) who actually sold mushrooms to customers." Dkt. No. 492 (Defs.' Rule of Reason Mot.) at ¶ 13. They argue that "the essential alleged price-fixing activity complained of here involved a vertical agreement to sell mushrooms at EMMC minimum prices between the corporate defendants who were EMMC member/growers and the corporate defendants and non-defendants who were the downstream packagers and distributors of the mushrooms." Dkt. No. 492 (Defs.' Rule of Reason Mem.) at 2. In their response to plaintiffs' motion, moving defendants assert that "there were a series of vertical arrangements between the EMMC member companies and the separately incorporated downstream non-EMMC member companies that packaged and sold the mushrooms but were not, themselves **[*55]** subject to the EMMC's policies and regulations." Dkt. No. 501 (Defs.' Rule of Reason Reply) at 4. Moving defendants argue that "[s]ince the non-member downstream companies actually sold most of the mushrooms to the purchasers, these vertical arrangements were essential to the success of the EMMC's minimum pricing policy." Id. Moving defendants contend that because the claimed conspiracy to fix prices typifies a vertical, rather than a horizontal conspiracy, it should be subject to analysis under the rule of reason. Id. They contend that

> it is well-established that the Rule of Reason applies where the claims of price-fixing involve agreements that are vertical in nature, precisely like those between the Cutone family-owned grower and the Cutone family-owned distributor, between Kaolin/Southmill and its distribution companies in Texas, Louisiana and Georgia and between LRPM (the grower) and its packager and distributor, Manfredini Enterprises, Inc.

Dkt. No. 492 (Defs.' Rule of Reason Mem.) at 10-11.

Plaintiffs contend, in their response to moving defendants' motion, that there was "a horizontal conspiracy among mushroom growers and distributors to fix prices and restrict the supply of mushrooms." **[*56]** Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 3. They assert that "the growers, packagers and shippers [in the EMMC] are horizontal competitors, not parts of a vertical distribution chain." Id. at ¶ 3; see also Dkt. No. 498 (Pls.' Opp'n Mem.) at 8. Plaintiffs assert that their "claim is that horizontal competitors consisting of growers and their associated distributors conspired to sell at fixed prices and restrict supply. In contrast, a resale price maintenance claim would challenge prices independently set by the growers and imposed on downstream resellers." Dkt. No. 508 (Pls.' Reply in Support of Cross-Motion) at 4 n.3. In support of their argument plaintiffs note that the EMMC's written policies referred to transactions between members — to which minimum pricing did not apply — as 'sideways' sales." Dkt. No. 496 (Pls.' Statement of Facts) at ¶ 3. Plaintiffs assert that "[t]he fact that some members of the EMMC had vertical relationships with distributors who were bound to sell at EMMC prices does not change the fact that the EMMC brought together horizontal competitors to fix prices and restrict supply." Id. They argue that "[w]hile the 'vertical' relationships of some EMMC members with non-member distributors destroyed the EMMC's Capper-Volsted **[*57]** immunity," Dkt. No. 498 (Pls.' Opp'n Mem.) at 3-4, the growers, packagers and shippers in the EMMC "are horizontal competitors, not parts of a vertical distribution chain." Id. at 8. Plaintiffs contend that "[t]he fact that a horizontal conspiracy among competitors has 'vertical aspects' . . . does not transform a horizontal agreement subject to per se condemnation into a vertical agreement." Id. at 9.

At oral argument, however, the parties painted a picture of a more complex conspiracy — one which is neither purely vertical or purely horizontal. Moving defendants argued that the alleged price fixing conspiracy is "a hybrid . . . . [T]here is a horizontal conspiracy amongst the members of the EMMC, which are the growers, and then they sold through their distributors. And we're saying that those resale price agreements were each vertical between each grower and each distributor." Dkt. No. 628 (Oral Arg. Tr.) at 7:4-9. Moving defendants argued that

> the growers and their distributors are two separate levels of commerce. The growers do not sell to the class or the individual Plaintiffs except for those few growers [who] are fully integrated vertically. . . . [T]he distributors don't grow what they sell to the class. . . .

> To the extent **[*58]** that a distributor agreed to sell at a minimum price, that was an agreement between itself and the grower who was a member of the EMMC. . . . [W]ith the exception of [non-grower] Cutone as a member of the EMMC, with that exception there is no evidence that a distributor had an agreement with the EMMC about minimum prices. The only evidence may be that there was an agreement between — that a grower instructed its distributor to sell at the EMMC price. That's a vertical resale price maintenance agreement and nothing more.

Id. at 10:2-17 (emphasis added). Moving defendants conceded that "there is a[n] . . . alleged horizontal conspiracy among the EMMC members, but with respect to those who use distributors, that those are each individual vertical resale price maintenance agreements as they're alleged." Id. at 7:14-18. Moving defendants further argued that "we have a situation where you have an agreement at the producer level which is in large part carried out through some unknown agreements with [distributors] — on a vertical basis" and that, "there's virtually no evidence that there was any evidence that there was any conspiracy at the distributor level." Id. at 45:23-24, 46:7-9.

Plaintiffs agreed **[*59]** with moving defendants at oral argument "that this is a hybrid agreement, it's a horizontal agreement with facilitating vertical agreements. So those vertical agreements between the growers and the distributors facilitated the horizontal agreement between the growers to fix the prices." Id. at 26:16-21. Plaintiffs argued, however, that the horizontal element to their claims is what matters: "the agreement of the EMMC members to set prices and limit supply." Id. at 31:10-12. They argued that the

> growers in the EMMC all got together and horizontally agreed to set the price. And the price that they agreed to set was not the price that they sold to the distributor, but they agreed that when they had a relationship with a distributor, they would set that distributor's price. And that's that horizontal agreement between the growers to impose this . . . price on [their] distributors.

Id. at 29:18-23. Plaintiffs characterize the conspiracy which is subject to their claims as "an agreement where competitors with distribution interests entered into a horizontal conspiracy to fix distribution prices." Dkt. No. 624 (Pls.' Letter Br.) at 4 (emphasis added). They argue that "the membership of a distributor **[*60]** in the EMMC only serves to reinforce that the EMMC was a front for horizontal distributor-level price fixing. . . . [T]he EMMC was used to coordinate the horizontal-distributor-level prices of mushrooms either by the EMMC members themselves or their related distributors." Id. (emphasis added). Plaintiffs also assert that

> the fact that M. Cutone was a member of the EMMC does not alter the fact that the EMMC fixed the prices of horizontal competitors. The EMMC was formed by growers *and* their related distributors to fix *distribution* prices. This is horizontal conduct by competitors at the same level of distribution to fix prices, not the kind of vertical resale price maintenance imposed by a manufacturer that is potentially precompetitive and entitled to be considered under the rule of reason.

Id. at 2.

I find that there are both horizontal and vertical agreements in play in the alleged conspiracy in this case and am thus faced with the question of what rule of decision to apply in such a circumstance. Plaintiffs have argued that "when you have [a] hybrid a[greement] involving both horizontal — a horizontal agreement facilitated by vertical agreements [—] that the horizontal part of that agreement is subject **[*61]** to the per se rule." Dkt. No. 628 (Oral Arg. Tr.) at 27:1-4. They assert that "[t]he law is that the horizontal part of the agreement is judged by the per se rule. If there's an attack on [the] vertical part of the agreement, that vertical part of the agreement is subject to the rule of reason." Id. at 30:18-25. Moving defendants contend that "the vertical aspect of the resale price maintenance agreements to facilitate the alleged horizontal agreement . . . requires the rule of reason to be applied in this case . . . ." Id. at 12:4-7. Two post-Leegin cases from the Court of Appeals are instructive.
