Defendants also argue that Patrawalla's optimistic estimate of the amount of business plaintiff could expect to do at IGH was too slender a basis on which to award "lost profit" damages of twenty-five percent. We will not interfere with the award. ***HN36***[] Mere uncertainty as to damages will not preclude recovery as long as a wrong has been committed and damages have resulted. *Tessmar v. Grosner, 23 N.J. 193, 203, 128 A.2d 467 (1957)*. Defendants' tortious interference with plaintiff's application **[*257]** damaged him as he was wrongly precluded from practicing his profession **[***93]** at IGH. The judge arrived at a figure of twenty-five percent presumably based on all the evidence she heard at trial, both from Patrawalla and from defendant. The judge did not err, but the damages must be recalculated consistent with this opinion.

On remand, the judge must consider yet another element of damages. That is whether plaintiff should also be compensated for the referrals he lost at IGH for the period following the grant of his privileges, but before he resigned. We have remanded on the issue of Mountainside damages; we likewise remand on this issue and consideration as to whether he is entitled to compensation for his lost IGH referrals for that period.

Defendants have also raised the issue of whether plaintiff must elect between treble damages and punitive damages. *See* *St. James v. Future Finance, 342 N.J. Super. 310, 343, 776 A.2d 849 (App.Div.)* (holding that a plaintiff could not collect both treble damages under RICO and punitive damages under a breach of fiduciary duty claim), *certif. denied, 170 N.J. 388, 788 A.2d 773 (2001)*. Punitive damages are still viable, and a punitive damage award of $ 250,000 may stand independently. The issue of damage **[***94]** election is now moot but the punitive award cannot reflect the now rejected antitrust claim. This, too, must be addressed on remand.

Since we have dismissed the antitrust claim, we need not address the issue of IGH's immunity as raised on plaintiff's cross-appeal. Moreover, we have carefully considered plaintiff's contention that the judge erred in dismissing the breach of contract cause of action and conclude that such claim is without merit. *R. 2:11-3(e)(1)(E)*.

Finally, we decline to order that this matter on remand be assigned to a different **[**841]** judge. Since we remand solely on the issue of damages, we perceive of no basis for assigning the matter to a new judge. The trial judge heard the evidence, and may **[*258]** supplement the record as she deems appropriate to arrive at a just damage award consistent with this opinion.

Affirmed in part; reversed in part and remanded for consideration of damages consistent with this opinion. We do not retain jurisdiction.

Judges: A. Howard Matz, United States District Judge.

Opinion by: A. Howard Matz

Opinion

ORDER DISMISSING COMPLAINT WITHOUT PREJUDICE

On February 26, 2004, VeriSign filed a complaint against Defendant Internet Corp. for Assigned Names and Numbers ("ICANN") alleging causes of action for: (1) violation of *Section 1* of the Sherman Act, (2) injunctive relief for breach of contract, (3) damages for breach of contract, (4) interference with contractual relations, (5) specific performance of contract and injunctive relief, (6) damages for breach of contract, and (7) declaratory judgment. Subject matter jurisdiction **[*2]** is premised on federal questions arising under the Sherman Act and the Declaratory Judgment Act. Compl. P 8. Now ICANN has moved to dismiss claims one through six of Plaintiff's Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, and also has moved to strike the second through sixth claims as strategic lawsuits against public participation, pursuant to *Cal. Civ. Proc. Code Section 425.15*.

The Court GRANTS ICANN's motion to dismiss the antitrust claim without prejudice. At this stage, the Court elects not to rule on the motion to dismiss the remaining state law claims because if VeriSign fails to state an antitrust claim in any First Amended Complaint ("FAC") or chooses not to file a FAC, the Court will decline to exercise supplemental jurisdiction. The Court also defers any ruling on the Special Motion to Strike until VeriSign's ability to state a viable federal claim has been conclusively resolved.

FACTUAL ALLEGATIONS

ICANN is a non-profit corporation that was organized in 1998 "in response to a plan by the [Department of Commerce] to introduce competition into the field of domain name registration, among **[*3]** other objectives." Compl. P 18. The Internet is comprised of numerous top level domains ("TLDs") - some are generic TLDs ("gTLDs") like .com, .net, .gov, and .biz, while others are country code TLDs ("ccTLDs") such as .uk and .ca. [1] *Id.* P 12. Each TLD has a "registry" or operator, single entity responsible for keeping the records and a directory of all the domain names registered within that TLD. *Id.* P 15. A person seeking to register a domain name within any given TLD must do so through a "registrar" for that TLD. *Id.* P 16. There are approximately 250 TLDs throughout the world that compete with each other, through their respective registries, to attract registrars and registrants. *Id.* PP 12, 32.

One of ICANN's functions is to enter into registry agreements **[*4]** that authorize an entity to act as the registry for a particular gTLD. *Id.* P 20. The Complaint describes how ICANN functions:

> ICANN is governed by and acts through an international Board of Directors that is elected by members of various constituencies within the Internet community. Among the members of these groups are operators of gTLDs that compete with each other and with VeriSign; domain name registrars that are present or potential competitors of each other and of VeriSign for certain services; foreign governments and foreign registries that have ccTLDs that compete with the gTLD registries operated by VeriSign; and others. ICANN also operates in cooperation with various industry boards that are comprised of existing or potential competitors of VeriSign. ICANN frequently carries out its activities, including the conduct alleged herein, through the collective action of these constituent groups.

Id. P 18. In 2001, VeriSign and ICANN entered into a registry agreement authorizing VeriSign to act as the sole registry for the .com gTLD. *Id.* PP 22-23 Under the agreement, VeriSign must provide certain "registry services" to accredited registrars in accordance **[*5]** with ICANN's specifications. *Id.* P 24.

The core of this dispute is that ICANN allegedly has taken actions to: (1) prohibit or otherwise restrict VeriSign from offering services valuable to Internet users, [2] (2) impose improper conditions on the offering of such services by VeriSign, (3) regulate and set the prices at which such services may be offered, and/or (4) delay the introduction of new services. *Id.* P 1. Because ICANN has allegedly blocked, delayed, and restricted the "value-added" services VeriSign has sought to offer its customers, VeriSign is "at a competitive disadvantage" since other TLD registries have been able to introduce similar services without restriction or delay. *Id.* PP 77-78. VeriSign claims that ICANN's various actions have breached their 2001 registry agreement, *Id.* PP 92-104, 111-126; interfered with a contract VeriSign had with an unidentified third party, *Id.* PP 105-110; and violated the antitrust laws, *Id.* PP 83-91.

[*6] APPLICABLE LEGAL STANDARD

On a motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* for failure to state a claim, the allegations of the complaint must be accepted as true and are to be construed in the light most favorable to the nonmoving party. *Wyler Summit P'ship v. Turner Broad. Sys., Inc., 135 F.3d 658, 661 (9th Cir. 1998)*. A *Rule 12(b)(6)* motion tests the legal sufficiency of the claims asserted in the complaint. Thus, if the complaint states a

---

[1] ICANN does not claim to have any power to regulate ccTLDs. *Id.* P 78. Nonetheless, 10 of the approximately 240 ccTLDs have entered into registry agreements with ICANN. *Id.* P 81. "ccTLDs" compete with other TLD registries. *Id.* P 20.

[2] In particular, the services to which VeriSign refers are Site Finder (described at PP 33-34 of the Complaint), Wait Listing Service (PP 40-42), ConsoliDate (PP 48-50), Internationalized Domain Names (PP 56-60), and the Incentive Marketing Program (P 66).

claim under any legal theory, even if the plaintiff erroneously relies on a different legal theory, the complaint should not be dismissed. *Haddock v. Bd. of Dental Examiners, 777 F.2d 462, 464 (9th Cir. 1985)*. On the other hand, dismissal is proper where "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*; *Moore v. City of Costa Mesa, 886 F.2d 260, 262 (9th Cir. 1989)* (employing *Conley v. Gibson* standard). Where a motion to dismiss is granted, a district court should **[*7]** provide leave to amend unless it is clear that the complaint could not be saved by any amendment. *Chang v. Chen, 80 F.3d 1293, 1296 (9th Cir. 1996)*.

"Generally, a district court may not consider any material beyond the pleadings in ruling on a *Rule 12(b)(6)* motion. . . . However, material which is properly submitted as part of the complaint may be considered" on a motion to dismiss. *Hal Roach Studios, Inc. v. Richard Feiner & Co., 896 F.2d 1542, 1555 n.19 (9th Cir. 1990)* (citations omitted). Similarly, "documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading, may be considered in ruling on a *Rule 12(b)(6)* motion to dismiss" without converting the motion to dismiss into a motion for summary judgment. *Branch v. Tunnell, 14 F.3d 449, 454 (9th Cir. 1994)* (*citing* *Romani v. Shearson Lehman Hutton, 929 F.2d 875, 879 n.3 (1st Cir. 1991))*. If the documents are not physically attached to the complaint, they may be considered if their "authenticity…is not contested" and "the plaintiff's complaint necessarily relies" on them. *Parrino v. FHP, Inc., 146 F.3d 699, 705-06 (9th Cir. 1998).* **[*8]** "The court will not accept as true allegations that are contradicted by facts that can be judicially noticed or by other allegations or exhibits attached to or incorporated in the pleading." 5A Wright & Miller, *Fed. Prac. and Pro.* § 1363 (2d. ed. 1990).

DISCUSSION

VeriSign's antitrust claim is brought under *Section 1* of the Sherman Act, which states, in pertinent part, that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. The elements required to allege a Section 1 violation are: "(1) an agreement or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intend to harm or restrain competition; and (3) which actually injures competition." *Les Shockley Racing, Inc. v. Nat'l Hot Rod Assoc., 884 F.2d 504, 507 (9th Cir. 1989)*. [3] Although Section 1 claims are not subject to a heightened pleading standard, the plaintiff must plead facts to support each element of the claim. Von Kalinowski, Sullivan & McGuirl, ***Antitrust Law*** *and* **[*9]** *Trade Regulation* § 164.01 (Matthew Bender 2002). "The pleader may not evade these requirements by merely alleging a bare legal conclusion; if the facts do not at least outline or adumbrate' a violation of the Sherman Act, the plaintiffs 'will get nowhere merely by dressing them up in the language of antitrust.'" *Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 736 (9th Cir. 1987)*.

Section 4 of the Clayton Act, pursuant to which VeriSign seeks to recover treble damages for the alleged Sherman Act violation, authorizes a private individual to bring suit under the antitrust laws if that individual has been "injured in his business or property by reason of anything forbidden in the antitrust **[*10]** laws." *15 U.S.C. § 15*. The Supreme Court has interpreted this language to mean that "Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. These requirements are referred to as "antitrust standing." *See, e.g.,* *Pool Water Prods. v. Olin Corp., 258 F.3d 1024, 1034 (9th Cir. 2001)*. There is no antitrust violation "[i]f the injury flows from aspects of the defendant's conduct that are beneficial or neutral to competition…[A]n act is deemed *anticompetitive*…only when it harms both allocative efficiency *and* raises the prices of goods above competitive levels or diminishes their quality."

---

[3] The parties jointly proceed in treating this case under the "rule of reason" standard rather than the "per se" rule reserved for presumptively illegal practices such as price-fixing, and the Court does the same. *See* *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 n.3 (9th Cir. 1988)*.

Rebel Oil Co., Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995), *cert. denied*, *516 U.S. 987, 116 S. Ct. 515, 133 L. Ed. 2d 424 (1995)* (emphasis in original).

VeriSign alleges that "the collective **[*11]** and conspiratorial acts of ICANN and its members, including constituent groups within ICANN and members of those groups," have "unreasonably restrained and restricted competition in the market for the operation of TLD registries and submarkets thereof, and have deprived consumers of the benefits of free and open competition…" Compl. PP 85-86. In a recurring manner, VeriSign alleges that ICANN's conduct "has deprived consumers of a beneficial new service and VeriSign of revenues and profits it would generate…" Compl. P 39; *see also* PP 47, 55, 65, 69, 72, 86. By making "the registration of domain names within the .com gTLD more desirable and attractive," these new services are alleged to be important to enable "VeriSign to compete more effectively with operators of competitive gTLD and ccTLD registries that are offering or intend to offer a similar service." *Id.* P 69; *see also* P 32. While VeriSign has been blocked, delayed, or restricted from offering these new services, other gTLD registries regulated by ICANN "have been allowed to offer and market similar, competitive services…" *Id.* P 77; *see also* PP 35, 45, 65, 68. In particular, VeriSign alleges that ICANN **[*12]** has facilitated ".museum," one of its gTLD competitors, in offering a service similar to VeriSign's Site Finder. *Id.* P 35. In addition, ccTLD registries, which constitute some 240 out of 250 of all TLDs, are not regulated by ICANN and "are free to offer, and are offering, new and improved services to registrars and registrants…" *Id.* PP 12, 20, 78. VeriSign does not allege how the market for these services operates or the pricing structure for such services.

ICANN argues that VeriSign has not, and cannot, sufficiently plead antitrust standing or facts supporting *any* of the elements of a Section 1 claim. Def.'s Mot., pp. 8-17. VeriSign disagrees with each of these assertions. Pl.'s Opp'n, pp. 5-15.

A. Conspiracy Allegations

ICANN summarizes the defects in the allegations concerning the first required element of a Section I violation as follows:

> . VeriSign argues that it has alleged that ICANN's competitors exercised control over ICANN, but there are *no* such allegations in the complaint.
>
> . VeriSign argues that these unnamed competitors consist of a "finite group," but the complaint alleges *multiple* groups of conspirators, as well as the **[*13]** undefined phrase "*and others*."
>
> . VeriSign argues that the "conspiracy" - the terms of which are not defined - has had an anticompetitive effect because it has resulted in a decrease in efficiency, increase in prices, and unavailability of products, but the complaint contains no such allegations and, instead, alleges that products similar to VeriSign's *are* available to consumers.

Def.'s Reply, 1:11-22 (emphasis in original).

Trade associations or industry groups that set standards or promulgate regulations, such as ICANN, can be held liable for Section 1 violations because "[t]here is no doubt that the members of such associations often have economic incentives to restrain competition and that the product standards set by such associations have a serious potential for anticompetitive harm." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 500, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*. As the Supreme Court explained in *Am. Soc'y of Mech. Eng'rs v. Hydrolevel Corp., 456 U.S. 556, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982)*:

> Although, undoubtedly, most [officials] serve [the industry organization] without concern for the interests of their corporate employers, some may well **[*14]** view their positions…, at least in part, as an opportunity to benefit their employers. When the great influence of [the organization's] reputation is placed at their disposal, the less altruistic of [the organization's] agents have an opportunity to harm their employers' competitors through manipulation of [the organization's] codes.

Id. at 571. The Ninth Circuit elaborated on the issue of organizational conspiracies in *Hahn v. Oregon Physicians' Serv., 868 F.2d 1022, 1029*, holding that "the proper inquiry is whether [decisionmakers] sharing substantially similar economic interests collectively exercised control of [the organization] under whose auspices they have reached agreements which work to the detriments of competitors."

Thus, in order to sufficiently plead a conspiracy, VeriSign must allege that ICANN's decisionmaking process was controlled or greatly influenced by economic competitors who have agreed to injure VeriSign. Instead, VeriSign simply alleges that "ICANN is governed by and acts through an international Board of Directors that is elected by members of various constituencies within the Internet community…that **[*15]** compete with each other and with VeriSign" and that "ICANN also operates in cooperation with various industry boards that are comprised of existing or potential competitors." Compl. P 18. VeriSign also claims that ICANN's decisions regarding the various services it seeks to offer were "made in conjunction with and at the behest of various constituent groups within ICANN and other businesses that compete with VeriSign," *Id.* P 38, and this has benefitted "businesses who have combined and conspired with ICANN." *Id.* P 47; *see also* 44-45, 65.

ICANN properly notes that VeriSign's factual allegations fall far short of the mark. There is not even an allegation (much less factual allegations supporting it) that the Board of ICANN has actually conspired with any of VeriSign's competitors. Nor are there sufficient allegations that competitors control or influence ICANN. VeriSign has not alleged how ICANN operates, makes decisions, and regulates Internet registries and registry services. For all these reasons, VeriSign has not sufficiently alleged a Section 1 conspiracy. [4] *Am. Soc'y of Mech. Eng'rs, supra.*

[*16] B. Antitrust Standing

ICANN argues that VeriSign does not have antitrust standing because even if it has been injured by being put at a competitive disadvantage, that injury is not one that the antitrust laws were designed to address. Def.'s Mot, 15:18-16:15. ICANN relies on many key cases, including *McGlinchy, supra*, which held that a plaintiff's claim that its business had been injured did not amount to an antitrust injury because "the antitrust laws were enacted for the protection of *competition*, not *competitors*." *Id. at 811-13* (internal citations omitted, emphasis in original). VeriSign, in turn, contends that its .com gTLD customers have not been able to purchase its "new innovative value-added services" and that some Ninth Circuit cases have found antitrust standing where only one competitor is harmed "because consumers faced fewer product or service choices…from the remaining competitors." Pl.'s Opp'n, 12:10-14:7. In *Hasbrouck v. Texaco, Inc., 842 F.2d 1034, 1040 (9th Cir. 1988)*, aff'd *496 U.S. 543, 110 S. Ct. 2535, 110 L. Ed. 2d 492 (1990)*, the Ninth Circuit cautioned courts not to be too dismissive of an injury to one competitor: **[*17]**

> The purpose of drawing a distinction between harm to competition and harm to competitors is to point out that not all acts that harm competitors harm competition. However, the converse is *not* true. Injury to competition necessarily entails injury to at least some competitors. Competition does not exist in a vacuum; it consists of rivalry among competitors. Clearly, injury to competitors may be probative of harm to competition, although the weight to be attached to such evidence depends on its nature and on the nature of the challenged conduct. The aphorism may not be invoked blindly in response to a showing that competitors have been harmed; otherwise it would often serve to shield unlawful conduct that adversely affects competition.

Id.; *see also* *USA Petroleum Co. v. Atl. Richfield Co., 859 F.2d 687, 696 (9th Cir. 1988)*, rev'd *495 U.S. 328, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*.

ICANN cites several Ninth Circuit cases dismissing Section 1 antitrust claims that fail to allege the requisite injury to competition in the relevant market. *See, e.g., Les Shockley Racing, supra at 508* (removal of one competitor from market does not injure competition **[*18]** without allegation of unreasonable disruption in pricing, resource

[4] ICANN argues that its bylaws, which outline how ICANN and its Board of Directors function, preclude VeriSign from ever being able to plead conspiracy. *See* Def.'s Request for Judicial Notice, Exh. B. The Court declines, at this stage, to determine whether these documents would preclude VeriSign from alleging a conspiracy against ICANN.

allocation, market entry, or output); McGlinchy, supra at 811-12 (injury to competitor is not injury to competition); Rutman Wine Co., supra at 734-35 (same). [5] Occasionally, of course, there are situations of "convergence of injury to a market competitor and injury to competition…when the relevant market is both narrow and discrete and the market participants are few." Les Shockley Racing, Inc., supra, at 508-09 (citation omitted). None of the cases VeriSign cites changes this analysis.

[*19] VeriSign relies on three cases where courts found that an antitrust claim was stated by one competitor: Pinhas v. Summit Health, Ltd., 894 F.2d 1024, 1032 (9th Cir. 1990), *aff'd* 500 U.S. 322, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991); Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1448 (9th Cir. 1988); and Industrial Bldg. Materials, Inc. v. Interchemical Corp., 437 F.2d 1336, 1342-43 (9th Cir. 1971). ICANN correctly notes that the plaintiffs in these three cases *did* sufficiently allege impacts on services, prices, or the number of entrants in the marketplace to allege an injury to competition. Def.'s Reply, p. 8 n.10.

VeriSign alleges that ICANN's conduct "has deprived consumers of a beneficial new service and VeriSign of revenues and profits it would generate…" Compl. P 39; *see also* PP 47, 55, 65, 69, 72, 86. These new services are important to enable "VeriSign to compete more effectively with operators of competitive gTLD and ccTLD registries that are offering or intend to offer a similar service" by making "the registration of domain names within the .com gTLD more desirable and attractive." *Id.* P 69; *see also* P 32. Thus, the **[*20]** crux of VeriSign's injury is that it is being placed at a "competitive disadvantage" *vis-a-vis* other TLDs since ICANN prevents, delays, or restricts VeriSign's ability to make new services its competitors offer from being made available to customers in the .com gTLD it operates. *Id.* PP 77-78.

VeriSign's very theory of damage depends on and arises out of the fact that it has vigorous competitors who will be able to compete more vigorously. Moreover, this is not a case in which the marketplace is small and the participants are few. To the contrary, VeriSign defines the relevant market as the operation of TLD registries worldwide, both gTLD and ccTLD. Compl. P 84. There are approximately 250 TLDs throughout the world and numerous registries operating those TLDs and competing to attract domain name registrations, most of which are ccTLDs unregulated by ICANN. *Id.* PP 12, 20, 32. By VeriSign's own account, many of its competitors already offer (or plan to offer) similar or competitive services. *Id.* PP 77-78. Its Complaint seems to be based on the unstated assumption that ICANN has a duty to help it compete more effectively. VeriSign has not alleged anything more than injury **[*21]** to its own business and therefore, does not have antitrust standing.

The Court DISMISSES the first cause of action for violation of Section 1 of the Sherman Act without prejudice. ICANN states that VeriSign "has not adequately pled an antitrust claim against ICANN and could never do so," suggesting that leave to amend would be futile. Def.'s Mot., 17:10-11. Although VeriSign has not requested leave to amend, it is entitled to attempt to cure the defects. If VeriSign can do so with a good faith basis and consistent with the obligations of Fed. R. Civ. P. 11, it may have until June 7, 2004 to file a FAC. If VeriSign does not timely amend and cure all defects, the antitrust claim will be dismissed with prejudice and the Court will decline to exercise supplemental jurisdiction.

CONCLUSION

---

[5] For similar results at the summary judgment stage, *see also* Pool Water Prods., supra at 1035-36 (neither decreased prices nor a competitor's decreased market share are antitrust injuries harming competition); Adaptive Power Solutions, LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 952 (9th Cir. 1998), *cert. denied*, ***525 U.S. 875, 119 S. Ct. 175, 142 L. Ed. 2d 143 (1998)*** (in missile component market with only two or three competitors, forced exclusion of plaintiff resulting in temporary decline in number of competitors not a significant restraint of trade entitling antitrust injury); ***McDaniel v. Appraisal Inst., 117 F.3d 421, 423 (9th Cir. 1997)***, *cert. denied*, ***523 U.S. 1022, 118 S. Ct. 1305, 140 L. Ed. 2d 470 (1998)*** (real estate appraiser who was not certified was at competitive disadvantage, but no harm to competition); Rebel Oil Co., Inc., supra at 1444 (below-cost pricing by competitor who lacks market power is a "boon to consumers," not an antitrust injury).

For the foregoing reasons, the Court hereby GRANTS Defendant's motion to dismiss claim one of the Complaint, without prejudice. [6] The Court declines to rule on the remainder of the motion to dismiss, which addresses the state law claims two through six. If, in any FAC, VeriSign sufficiently states an antitrust claim, but does not change any of the allegations **[*22]** pertaining to claims two through six, the parties shall incorporate into their respective motion papers the precise language and arguments they made in their respective current motion papers. As to the Special Motion to Strike, in order to provide for docketing clarity, the Court ORDERS that it be withdrawn from the active calendar, without prejudice to it being renewed. [7] If the Court eventually rules on a dismissal motion directed at counts two through six, it will also rule on the motion to strike. In that event, regardless of whether VeriSign amends any or all of the second through sixth claims in any FAC, ICANN may incorporate into a renewed motion to strike the facts and arguments it relied on in the current set of motion papers regarding the original Complaint.

In light of this ruling, the Court need not rule on the parties' various requests for judicial notice and related disputes.

This Order is not intended for publication.

IT IS SO ORDERED.

DATE: **[*23]** May 18, 2004

A. Howard Matz

United States District Judge

[6] Docket No. 16.

[7] Docket No. 19.

G&R Moojestic Treats Inc. v. MaggieMoo's Int'l, LLC

United States District Court for the Southern District of New York

May 19, 2004, Decided ; May 19, 2004, Filed

03 Civ. 10027 (RWS)

Reporter

2004 U.S. Dist. LEXIS 8806 *; 2004-2 Trade Cas. (CCH) P74,485; 2004 WL 1110423

G&R MOOJESTIC TREATS INC., GEORGE LISI, ROSEMARIE LISI, WATARU IWATA, JI INTERNATIONAL, LLC, and JUN IWATA, Plaintiffs, - against - MAGGIEMOO'S INTERNATIONAL, LLC, Defendant.

Subsequent History: Motion denied by *G&R Moojestic Treats, Inc. v. Maggiemoo's Int'l, LLC, 2004 U.S. Dist. LEXIS 9480 (S.D.N.Y., May 27, 2004)*

Related proceeding at, Motion granted by, Stay granted by *Maggiemoo's Int'l, LLC v. G&R Moojestic Treats, Inc., 2004 U.S. Dist. LEXIS 32059 (D. Md., June 14, 2004)*

Disposition: MMI's motion to transfer claims of Franchisee Plaintiffs to the United States District Court for the District of Maryland was granted, except for the common law fraud claim, each of Wataru Iwata's claims were dismissed for failure to state a claim. MMI's motion for attorney's fees against Waturu Iwata was denied. Plaintiffs' motion to stay and order MMI to dismiss its lawsuits in the District of Maryland was denied.

LexisNexis® Headnotes

Admiralty & Maritime Law > Practice & Procedure > Forum Selection

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

HN1[] **Practice & Procedure, Forum Selection**

Forum selection clauses are prima facie valid and should be enforced unless enforcement is shown by the resisting party to be unreasonable under the circumstances. This rule has been extended to diversity and other non-admiralty cases. The United States Court of Appeals for the Second Circuit has a strong policy in favor of giving effect to such a clause.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Contracts Law > Defenses > Public Policy Violations

HN2[] **Contract Conditions & Provisions, Forum Selection Clauses**

Forum selection clauses are considered unreasonable (1) if their incorporation into the agreement was the result of fraud or overreaching, (2) if the complaining party will for all practical purposes be deprived of his day in court, due to the grave inconvenience or unfairness of the selected forum, (3) if the fundamental unfairness of the chosen law may deprive the plaintiff of a remedy, or (4) if the clauses contravene a strong public policy of the forum state.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Contracts Law > Contract Conditions & Provisions > General Overview

Contracts Law > Defenses > General Overview

HN3[] **Contract Conditions & Provisions, Forum Selection Clauses**

A forum-selection clause in a contract is not enforceable if the inclusion of that clause in the contract was the product of fraud or coercion. In other words, a claim of fraud in the inducement of a contract is insufficient to invalidate a forum selection clause found in that contract. Rather, it is the inclusion of those specific clauses plaintiffs seek to avoid that must have been induced by fraud. The party seeking to invalidate a forum selection clause on grounds of fraud or coercion must specifically prove that but for the drafter's misconduct, it would not have been included in the agreement.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

HN4[] **Contract Conditions & Provisions, Forum Selection Clauses**

Conclusory statements of duress are insufficient to show fraud or overreaching in agreeing to a forum selection clause.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Adhesion Contracts

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Agreements

Contracts Law > Defenses > Unconscionability > Adhesion Contracts

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Contracts Law > Defenses > Unconscionability > General Overview

HN5[] **Types of Contracts, Adhesion Contracts**

An unconscionable bargain is one which no man in his senses and not under delusion would make on the one hand, and no honest and fair man would accept on the other. The fact that a franchise agreement was presented on a take it or leave it basis and was not subject to negotiation renders it neither a contract of adhesion nor unconscionable.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN6[] **Contract Conditions & Provisions, Forum Selection Clauses**

A district court may dismiss on the grounds that the parties have agreed in advance that some other forum is the more convenient location for resolution of the dispute. Resolution of this issue is determined by weighing in each case whether dismissal or transfer is the most efficient and just means of enforcing the clause.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

Civil Procedure > Dismissal > General Overview

HN7[] **Contract Conditions & Provisions, Forum Selection Clauses**

The presence of a forum-selection clause does not deprive the disfavored forum of jurisdiction or venue, where the conditions of subject matter and in personam jurisdiction are otherwise met. Therefore, dismissal may be based on either the court's inherent power to decline jurisdiction, by analogy to the traditional doctrine of forum non conveniens, or on the power under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN8[] Contract Conditions & Provisions, Forum Selection Clauses

An enforceable forum selection clause is not dispositive as to transfer under *28 U.S.C.S. § 1404(a)*, and a court must still take account of factors other than those that bear solely on the parties' private ordering of their affairs, such as the convenience of the witnesses and other factors. However, it is clear that such clauses are not lightly disregarded; a party opposing enforcement of a forum selection clause must demonstrate exceptional facts explaining why he should be relieved from his contractual duty. A valid forum-selection clause should be given controlling weight in all but the most exceptional cases.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN9[] Motions to Dismiss, Failure to State Claim

In reviewing a *Fed. R. Civ. P. 12(b)(6)* motion, courts must accept as true the factual allegations of the complaint, and draw all inferences in favor of the pleader. However, legal conclusions, deductions, or opinions couched as factual allegations are not given a presumption of truthfulness. A complaint may only be dismissed when it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Review must be limited to the complaint and documents attached or incorporated by reference thereto. In this context, the United States Court of Appeals for the Second Circuit has held that a complaint is deemed to include documents that the plaintiffs either possessed or knew about and upon which they relied in bringing the suit.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN10[] Federal & State Interrelationships, Choice of Law

A federal court sitting in diversity must apply the choice-of-law rules of the forum state. The first step in any case presenting a potential choice of law issue is to determine whether there is an actual conflict between the laws of the jurisdictions involved. Where no such conflict exists there is no reason to engage in a choice of law analysis.

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

Energy & Utilities Law > Oil, Gas & Mineral Interests > Implied Covenants > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

HN11[] Sales (Article 2), Form, Formation & Readjustment

The elements of a contract claim are the same in Pennsylvania, New York and Maryland, and in each jurisdiction a claim for breach of an implied duty of good faith cannot be brought in the absence of an underlying contract.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Torts > Procedural Matters > Conflict of Law > General Overview

HN12[] Business Torts, Fraud & Misrepresentation

Fraud claims are governed by the laws of the jurisdiction where the injury is deemed to have occurred which usually is where the plaintiff is located. If conflict-regulating laws are at issue, the law of the jurisdiction where the tort occurred will generally apply because that jurisdiction has the greatest interest in regulating behavior within its borders. Indeed, the traditional view has been that when a person sustains loss by fraud, the place of wrong is where the loss is sustained, not where fraudulent misrepresentations are made.

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

HN13[] Sales (Article 2), Form, Formation & Readjustment

In order to recover on a claim for breach of contract, a plaintiff must allege, among other elements, the existence of a valid contract.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Contracts Law > Breach > General Overview

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN14[] Types of Contracts, Covenants

In the absence of a valid contract, a claim for a breach of an implied covenant of good faith must also be dismissed.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

Business & Corporate Law > Distributorships & Franchises > General Overview

Business & Corporate Law > Distributorships & Franchises > Disclosure & Registration > Requirements

HN15[] Distributorships & Franchises, Causes of Action

See *Md. Bus. Reg. Code Ann. § 14-227(a)(1)*.

Business & Corporate Law > Distributorships & Franchises > Disclosure & Registration > Enforcement of Franchise Requirements

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Fraud & Misrepresentation

Business & Corporate Law > Distributorships & Franchises > Remedies > General Overview

HN16[] Disclosure & Registration, Enforcement of Franchise Requirements

The plain language of the Maryland Franchise Registration and Disclosure Law, *Md. Bus. Reg. Code Ann. §§ 14-201 to 14-233*, grants a civil remedy only to purchasers and grantees. The purchase requirement simply recognizes that a non-purchaser does not rely on an unregistered or fraudulent prospectus, and hence, does not suffer the type of injury that Maryland franchise law, and similar laws in other states, are designed to prevent.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Real Property Law > Torts > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

HN17[] Affirmative Defenses, Fraud & Misrepresentation

While it is well-established under New York law that, where a plaintiff alleges only economic damage resulting from a defendant's alleged negligence, defendants owe no duty to plaintiffs with whom they are not in contractual privity, the doctrine does not extend to tort claims for fraud. A cause of action sounding in fraud does not require the existence of a relationship of privity or something close to privity between the parties.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN18[] Business Torts, Fraud & Misrepresentation

To state a claim for fraud under New York law, a plaintiff must allege: (1) a misrepresentation or a material omission of fact which was false and known to be false by defendant, (2) made for the purpose of inducing the other party to rely upon it, (3) justifiable reliance of the other party on the misrepresentation or material omission, and (4) injury.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN19[] Heightened Pleading Requirements, Fraud Claims

Under *Fed. R. Civ. P. 9(b)*, the circumstances constituting fraud shall be stated with particularity. However, malice, intent, knowledge, and other condition of mind may be averred generally. To satisfy *Rule 9(b)*'s particularity requirement, a plaintiff's complaint must: (1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN20[] Business Torts, Fraud & Misrepresentation

The fact that a representation was not made directly to a plaintiff is not fatal to a fraudulent misrepresentation claim where he has alleged that he relied upon it to his detriment, and that the defendant intended the misrepresentation to be conveyed to him.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN24[] Private Actions, Racketeer Influenced & Corrupt Organizations

The Racketeer Influenced and Corrupt Organizations Act, 18 U.S.C.S. § 1961 et seq., is a specialized statute requiring a particular configuration of elements. These elements cannot be incorporated loosely from a previous narration, but must be tightly particularized and connected in a complaint. Parroting statutory language while generally referring the reader back to the previous 100 paragraphs in a complaint is inadequate.

Civil Procedure > Sanctions > General Overview

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN25[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 11 has been violated, and sanctions are appropriate where it is patently clear that a claim has absolutely no chance of success under the existing precedents, and where no reasonable argument can be advanced to extend, modify or reverse the law as it stands.

Counsel: [*1] MITCHELL J. KASSOFF, ESQ., Attorney for Plaintiffs, South Orange, NJ.

NIXON PEABODY, Attorneys for Defendant, Boston, MA, By: ARTHUR L. PRESSMAN, ESQ., GREGG A. RUBENSTEIN, ESQ., Of Counsel.

Judges: ROBERT W. SWEET, U.S.D.J.

Opinion by: ROBERT W. SWEET

Opinion

Sweet, D.J.

Defendant MaggieMoo's International, LLC ("MMI"), has moved to stay, dismiss and/or transfer the claims of plaintiffs G&R Moojestic Treats, Inc. ("G&R"), George Lisi, Rosemarie Lisi, JI International, LLC, Jun Iwata and Wataru Iwata (collectively, "Franchisee Plaintiffs") and to dismiss the claims of plaintiff Wataru Iwata for failure to state a claim upon which relief may be granted pursuant to *Fed. R. Civ. P. 12(b)(6)*, and for attorney's fees. All plaintiffs have moved to stay or dismiss the suit brought by MMI in the District of Maryland.

Parties

MMI is a Delaware limited liability company with its principal offices in Columbia, Maryland. MMI is a franchisor of specialty ice cream stores.

G&R is a New York corporation with its principal offices in Syracuse, New York. George Lisi and Rosemarie Lisi are citizens of New York and are the sole shareholders and **[*2]** officers of G&R. On April 10, 2001, a Franchise Agreement was executed between MMI and G&R (the "G&R Franchise Agreement").

Jun Iwata resides in Pennsylvania and is a member of JI International, LLC ("JI"), a Pennsylvania limited liability company with its principal offices in Pennsylvania. On March 25, 2002, a Franchise Agreement was executed between MMI and Jun Iwata, on behalf of an entity to be later named (the "JI Franchise Agreement"). The entity to be later named was JI. JI is an intended beneficiary of the Franchise Agreement.

Wataru Iwata, a citizen of New York, is the brother of Jun Iwata and is alleged by Plaintiffs to be the provider of funds for the purchase of the franchise by Jun Iwata and a "silent partner" in the franchise, although his name is not on the JI Franchise Agreement.

Prior Proceedings

On December 11, 2003, Plaintiffs filed an action in this Court alleging that MMI breached both Franchise Agreements, committed fraud, breached an implicit covenant of good faith, caused Plaintiffs not to pursue other business opportunities, and violated the Federal Trade Commission Rule on Franchising, the *Sherman Anti-Trust Act*, the *Clayton Act*, the *Robinson-Patman **[*3]** Act* and the *Racketeer Influenced and Corrupt Organizations Act*.

In addition, G&R, George Lisi, and Rosemarie Lisi allege that MMI violated *Article 33 of the New York State General Business Laws*. JI, Jun Iwata, and Wataru Iwata allege that MMI violated the Maryland Franchise Registration and Disclosure law.

On February 13, 2004, MMI commenced separate actions in the United States District Court for the District of Maryland to compel mediation pursuant to identical mediation clauses in the Franchise Agreements of both sets of Plaintiffs, captioned *Maggiemoo's International, LLC v. G&R Moojestic Treats Inc., et. al.*, WMN-04-392, and *Maggiemoo's International, LLC v. JI International, Inc., et. al.*, WMN-04-393, respectively. On March 8, 2004, the Honorable William M. Nickerson of the District of Maryland ordered that:

> In the interests of judicial economy, I will delay the scheduling of a hearing concerning MMI's Motion(s) to Compel Mediation until after Judge Robert Sweet of the Southern District of New York has had a chance to hear arguments and make rulings on related motions before him on March 31st, 2004.

On March 22, 2004, Judge Nickerson denied the motion **[*4]** of MMI to reconsider the March 8 Order.

On February 28, 2004, Plaintiffs filed an amended complaint. Following the filing of the amended complaint, MMI then filed amended versions of its briefs in support of its two motions. On March 26, 2004, MMI's interim motion to stay discovery pending the determination of the instant motions was denied.

Following the submission of briefs, oral argument on the motion was heard on March 31, 2004. On April 26, 2004, MMI's motion to supplement its memorandum of law in support of the motion to stay, dismiss or transfer the action was granted, at which time the motion was deemed fully submitted.

Facts

The following facts are drawn from Plaintiffs' amended complaint (the "Amended Complaint") and accompanying exhibits and do not constitute findings of fact by the Court.

The Amended Complaint alleges that after G&R entered the Franchise Agreement with MMI, MMI rejected more than fifteen sites that were submitted by G&R, George Lisi and Rosemarie Lisi to open the franchise, effectively taking their money and refusing to allow an opening of a franchise. Because another ice cream specialty store subsequently signed a lease for one of the **[*5]** spots they had chosen, Plaintiffs claim that the competitive nature of the business was forever altered, damaging their ability to successfully introduce MMI's franchise system in the area.

The Amended Complaint also alleges that MMI intended to deceive Jun Iwata with a misleading Uniform Franchise Offering Circular ("UFOC"), and intended to deceive any lenders Jun Iwata would employ, such as Wataru Iwata. Further, the lack of support from MMI in granting approval for a site led to another specialty ice cream store signing a lease for the site chosen by JI, thereby damaging Plaintiffs' ability to successfully introduce MMI's franchise system in the area. Upon executing a lease at another location, JI claims that losses were incurred in the amount of rental payment made during months when construction of the store could not begin due to MMI's actions and that construction estimates were more than 51% higher than MMI's UFOC had disclosed, forcing them to terminate the lease.

Paragraph 24.2 of both the G&R and the JI Franchise Agreements provides that "all controversies, disputes, and claims arising out of or related to this Agreement (including any claim that the Agreement or any of **[*6]** its provisions is invalid, illegal, or otherwise voidable or void) . . . shall first be subject to non-binding mediation."

Paragraph 24.4 of both the G&R and the JI Franchise Agreements provide that, "Any legal action brought by Franchisee against Franchisor in any forum or court, whether federal or state, shall be brought exclusively in the federal district court covering the location at which Franchisor has its principal place of business at the time of the action."

MMI's Motion to Stay, Dismiss and/or Transfer the Claims of G&R, George Lisi, Rosemarie Lisi, JI and Jun Iwata

MMI has moved to stay the instant litigation or to dismiss the claims on the basis of the mediation clauses in both the G&R and the JI Franchise Agreements. However, because of the pending actions in the District of Maryland and the forum selection clause providing that all litigation between MMI and the Franchisee Plaintiffs must be brought in that District, MMI's motion to dismiss or transfer pursuant to the forum selection clause will be considered first.

The Forum Selection Clause is Enforceable

HN1[] Forum selection clauses are prima facie valid and should be enforced unless **[*7]** enforcement is shown by the resisting party to be unreasonable under the circumstances. *See* *The Bremen v. Zapata Off-Shore Co., 407 U.S. 1, 10, 32 L. Ed. 2d 513, 92 S. Ct. 1907 (1972)*. This rule has been extended to diversity and other non-admiralty cases. *See* *Jones v. Weibrecht, 901 F.2d 17 (2d Cir. 1990)*; *Karl Koch Erecting Co. v. New York Convention Center Dev. Corp., 838 F.2d 656, 659 (2d Cir. 1988)*. "The Second Circuit, moreover, has a 'strong policy' in favor of giving effect to such a clause." *Sun Forest Corp. v. Shvili, 152 F. Supp. 2d 367, 380-81 (S.D.N.Y. 2001)* (citing *Weiss v. Columbia Pictures Sys. of America, 801 F. Supp. 1276, 1278 (S.D.N.Y. 1992))*.

HN2[] Forum selection clauses are considered "unreasonable" (1) if their incorporation into the agreement was the result of fraud or overreaching, (2) if the complaining party "will for all practical purposes be deprived of his day in court," due to the grave inconvenience or unfairness of the selected forum, (3) if the fundamental unfairness of the chosen law may deprive the plaintiff of a remedy, or (4) if the clauses contravene a strong public policy of the **[*8]** forum state. *See* *Roby v. Corporation of Lloyd's, 996 F.2d 1353, 1363 (2d Cir. 1993)* (citations omitted).

The Franchisee Plaintiffs have not challenged the forum selection clause on the basis of hardship and contest only the first factor of the reasonableness test, claiming that they were fraudulently induced into accepting the forum selection clauses, that the forum selection clause is unconscionable and unenforceable, and that all plaintiffs were coerced into accepting the forum selection clause. Amended Complaint, PP 13-16, 90-93. In addition, the Franchisee Plaintiffs argue that the entire Franchise Agreement is a contract of adhesion.

HN3[] A "forum-selection clause in a contract is not enforceable if the inclusion of that clause in the contract was the product of fraud or coercion." *Scherk v. Alberto-Culver Co., 417 U.S. 506, n.14, 41 L. Ed. 2d 270, 94 S. Ct. 2449 (1974)* (citing *Prima Paint Corp. v. Flood & Conklin Mfg. Co., 388 U.S. 395, 18 L. Ed. 2d 1270, 87 S. Ct. 1801, (1967)*. In other words, "[a] claim of fraud in the inducement of a contract is insufficient to invalidate a forum selection . . . clause found in that contract. Rather, it is the inclusion of **[*9]** those specific clauses plaintiffs seek to avoid that must have been induced by fraud." *Stamm v. Barclays Bank of New York, 960 F. Supp. 724, 729 (S.D.N.Y. 1997)*. The party seeking to invalidate a forum selection clause on grounds of fraud or coercion "must specifically prove that but for the drafter's misconduct, it would not have been included in the agreement." *Sun Forest, 152 F. Supp. 2d at 381*.

The forum selection clause in both Franchise Agreements is labeled "Applicable Law," and is set apart in a separate numbered paragraph. The language of the clause itself provides that "any legal action . . . shall be brought exclusively in the federal district court covering the location at which Franchisor has its principal place of business at the time of the action." Plaintiffs have made no claim that they were not on notice as to the provision.

The Franchisee Plaintiffs have not made the "strong showing" required to prove that the forum selection clause was the result of fraud or coercion. *The Bremen, 407 U.S. at 12*. Rather, Plaintiffs have made conclusory allegations of fraud and coercion. Such bare bones allegations are insufficient **[*10]** to invalidate the forum selection clause. *See*, *e.g.*, *National School Reporting Services, Inc. v. National Schools of California, Ltd., 924 F. Supp. 21, 24 (S.D.N.Y. 1996)* ***HN4***[] ("conclusory statements of duress are insufficient to show fraud or overreaching in agreeing to the forum selection clause"); *Composite Holdings v. Westinghouse Elec. Corp., 992 F. Supp. 367, 371 (S.D.N.Y. 1988)* (refusing to invalidate forum selection clause where allegation of fraud "is entirely conclusory . . . No facts are set forth that logically give rise to an inference of fraudulent intent, particularly given that the designated forum is [where defendant] is headquartered and thus a quite natural selection for entirely ordinary reasons.")).

The Franchisee Plaintiffs' arguments that the forum selection clause is unconscionable and that it is a contract of adhesion may be taken together. ***HN5***[] "An unconscionable bargain is one which no man in his senses and not under delusion would make on the one hand, and . . . no honest and fair man would accept on the other." *Doctor's Associates, Inc. v. Jabush, 89 F.3d 109, 113 (2d Cir. 1996)* (quoting *Hume v. United States, 132 U.S. 406, 411, 33 L. Ed. 393, 10 S. Ct. 134 (1889)).* **[*11]** The fact that the Franchise Agreement was presented on a take it or leave it basis and was not subject to negotiation renders it neither a contract of adhesion nor unconscionable. *See, e.g.*, *Novak v. Overture Services, Inc., 309 F. Supp. 2d 446, 2004 U.S. Dist. LEXIS 5277, CV 02-5164, 2004 WL 613001 (E.D.N.Y. Mar. 25, 2004*) ("An 'agreement cannot be considered procedurally unconscionable, or a contract of adhesion, simply because it is a form contract.'") (quoting *Rosenfeld v. Port Authority of New York and New Jersey, 108 F. Supp. 2d 156, 164 (E.D.N.Y. 2000))*; *Stamm, 960 F. Supp. at 733* (finding forum selection clause not unconscionable despite the fact that the clause is "now disadvantageous to Plaintiffs" and that it was presented to plaintiffs on a take it or leave it basis).

The Franchisee Plaintiffs also argue that even if the forum selection is enforceable, the clause does not cover their non-contractual claims. The clause states that "any legal action brought by Franchisee against Franchisor" is subject to the clause. Reading this broad clause to apply at least to actions arising from the Franchise Agreement, non-contractual claims are deemed to arise from the agreement **[*12]** for the purposes of the forum selection clause. *See* *Bense v. Interstate Battery System of America, Inc., 683 F.2d 718, 720 (2d Cir. 1982)* (holding that plaintiff's action arises from the agreement "although the complaint was brought pursuant to federal ***antitrust law***, the gist of [plaintiff's] claim is that [defendant] wrongfully terminated the agreement, thereby damaging [plaintiff].").
In *Young Women's Christian Ass'n of U.S., Nat. Bd. v. HMC Entertainment, Inc., 1992 U.S. Dist. LEXIS 14713, 91 Civ. 7943, 1992 WL 279361, at *4 (S.D.N.Y. Sept. 25, 1992),* the court found that plaintiff's claims for a declaratory judgment with respect to defendant's potential unfair competition, trademark infringement, misappropriation and implied contract claims arose pursuant to the contract, and were therefore within the scope of the forum selection

clause because "any determination with respect to plaintiff's claims will require consideration of the contract and of the parties' respective rights pursuant to the contract." The Franchisee Plaintiffs have conceded that the causes of action in "the Amended Complaint that concern the defendant's breach of contract are inextricably woven with **[*13]** the other actions of defendant." Franchise Plaintiff's Mem. of Law in Opposition to Def.'s Motion to Stay, Dismiss and/or Transfer at 6. It is therefore determined that the forum selection clause agreed to by the Franchisee Plaintiffs (other than Waturu Iwata) is enforceable and that each of Plaintiffs' claims is within the scope of the clause.

The Franchisee Plaintiffs Claims are Transferred to the District of Maryland

Having found the forum selection clause enforceable as to Plaintiffs' claims, it remains to decide whether to dismiss the case pursuant to the forum selection clause or to transfer it pursuant to *28 U.S.C. § 1404(a)*. [1] ***HN6***[] "A district court may 'dismiss on the grounds that the parties have agreed in advance that some other forum is the more convenient location for resolution of the dispute.'" *GMAC Commercial Credit, LLC v. Dillard Dep't Stores, Inc., 198 F.R.D. 402, 405 (S.D.N.Y. 2001)* (quoting *Licensed Practical Nurses, Technicians & Healthcare Workers of N.Y., Inc. v. Ulysses Cruises, Inc., 131 F. Supp. 393, 408 (S.D.N.Y. 2000)*). Resolution of this issue shall be determined by "weighing in each case whether dismissal or transfer is the most efficient and just means of enforcing the clause." **[*14]** *Ulysses Cruises, 131 F. Supp. 2d at 409*. The forum selection clause in this case specifies that any litigation between franchisee and franchisor shall be brought in the "federal district court" where franchisor has its place of business, which is the District of Maryland. JI and G&R Franchise Agreements, P 24.2. Transfer of the claims of the Franchisee Plaintiffs to the District of Maryland is therefore the most "appropriate remedy for effectuating [the] forum-selection clause." *Ulysses Cruises, 131 F. Supp. 2d. at 407*.

[*15] ***HN8***[] An enforceable forum selection clause is "*not* dispositive as to transfer under *§ 1404(a)*", *Falconwood Financial Corp. v. Griffin, 838 F. Supp. 836, 840 (S.D.N.Y. 1993)* (citing *Stewart Organization, Inc. v. Ricoh Corp., 487 U.S. 22, 29-30, 101 L. Ed. 2d 22, 108 S. Ct. 2239 (1988))*, and "the court must still 'take account of factors other than those that bear solely on the parties' private ordering of their affairs,' such as the convenience of the witnesses and . . . other factors . . ." *Mpower Communs. Corp. v. Voipld.com, Inc., 304 F. Supp. 2d 473, 475 (W.D.N.Y. 2004)* (quoting *Stewart, 487 U.S. at 30*). However, "it is clear that such clauses are not lightly disregarded; a party opposing enforcement of a forum selection clause must "demonstrate exceptional facts explaining why he should be relieved from his contractual duty." *Id.* (quoting *Weiss, 801 F. Supp. at 1278*); *see also Stewart, 487 U.S. at 33* ("a valid forum-selection clause [should be] given controlling weight in all but the most exceptional cases") (Kennedy, J., concurring)). The Franchisee Plaintiffs have not shown any exceptional **[*16]** facts, arguing only that the plaintiffs' choice of forum is entitled to deference. As the Franchise Agreements show, however, the Franchisee Plaintiffs' contractual choice of forum is the District of Maryland. Accordingly, the claims of the Franchisee Plaintiffs will be transferred there.

MMI's Motion to Dismiss the Claims of Wataru Iwata

Because Waturu Iwata was not a party to a Franchise Agreement, his claims are not bound by the terms of the forum selection clause. MMI has not moved to transfer Waturu Iwata's claims to the District of Maryland and has instead moved to dismiss under *Fed. R. Civ. P. 12(b)(6)*.

HN9[] In reviewing a *12(b)(6)* motion, courts must "accept as true the factual allegations of the complaint, and draw all inferences in favor of the pleader." *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1174 (2d Cir. 1993)* (citing *IUE AFL-CIO Pension Fund v. Herrmann, 9 F.3d 1049, 1052 (2d Cir. 1993)*. However, "legal conclusions,

---

[1] Following the instructive discussion by the Honorable Gerard E. Lynch in Licensed Practical Nurses, Technicians and *Health Care Workers of New York, Inc. v. Ulysses Cruises, Inc., 131 F. Supp. 2d 393, 402-09 (S.D.N.Y. 2000)*, it is determined that ***HN7***[] "the presence of a forum-selection clause does not deprive the disfavored forum of jurisdiction or venue, where the conditions of subject matter and *in personam* jurisdiction are otherwise met." *Id. at 409*. Therefore, "dismissal may be based on either the court's inherent power to decline jurisdiction, by analogy to the traditional doctrine of forum non conveniens, or on the power under *Rule 12(b)(6)* for failure to state a claim." *Id.* Although MMI does not specify by what authority it seeks transfer as an alternative remedy, it is presumed to invoke the Court's power to transfer pursuant to *§ 1404(a)*. *Id.*

deductions or opinions couched as factual allegations are not given a presumption of truthfulness." *L'Europeene de Banque v. La Republica de Venezuela, 700 F. Supp. 114, 122 (S.D.N.Y. 1988).* **[*17]** The complaint may only be dismissed when "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1956)*; *see also* *Bernheim v. Litt, 79 F.3d 318, 321 (2d Cir. 1996)*.

Review must be limited to the complaint and documents attached or incorporated by reference thereto. *Kramer v. Time Warner, Inc., 937 F.2d 767, 773 (2d Cir. 1991)*. In this context, the Second Circuit has held that a complaint is deemed to "include . . . documents that the plaintiffs either possessed or knew about and upon which they relied in bringing the suit." *Rothman v. Gregor, 220 F.3d 81, 88 (2d Cir. 2000)*.

Choice of Law

As an initial matter, it must be determined what law applies to Waturu Iwata's state law claims for breach of contract, breach of an implied contract of good faith and fair dealing, and fraud. MMI's briefs cite to New York law without addressing the issue. Waturu Iwata is a resident of New York. However, the parties to the contract, JI and MMI, are residents of Pennsylvania and Maryland, respectively, **[*18]** and the proposed franchise location is in Pennsylvania.

HN10[] A federal court sitting in diversity must apply the choice-of-law rules of the forum state, in this instance New York. *See* *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496-97, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*. "The first step in any case presenting a potential choice of law issue is to determine whether there is an actual conflict between the laws of the jurisdictions involved. Where no [such] conflict exists . . . there is no reason to engage in a choice of law analysis." *Smith v. Mitlof, 148 F. Supp. 2d 279, 285 (S.D.N.Y. 2001)* (quoting *Elson v. Defren, 283 A.D.2d 109, 114, 726 N.Y.S.2d 407, 411 (1st Dep't 2001))*. ***HN11***[] The elements of a contract claim are the same in Pennsylvania, New York and Maryland, *see Morgan Stanley High Yield Securities v. Seven Circle Gaming Corp., 269 F. Supp. 2d 206, 213 (S.D.N.Y. 2003)*; *J.F. Walker Co., Inc. v. Excalibur Oil Group, Inc., 2002 PA Super 39, 792 A.2d 1269, 1272 (Pa. Super. 2002)*; *Yousef v. Trustbank Sav., F.S.B., 81 Md. App. 527, 568 A.2d 1134, 1137 (Md. App. 1990)*, and in **[*19]** each jurisdiction a claim for breach of an implied duty of good faith cannot be brought in the absence of an underlying contract. *See Sheth v. New York Life Ins. Co., 273 A.D.2d 72, 73, 709 N.Y.S.2d 74 (1st Dep't 2000)*; *Landmesser v. United Air Lines, Inc., 102 F. Supp. 2d 273, 280 (E.D. Pa. 2000)*; *Swedish Civil Aviation Admin. v. Project Mgmt. Enters., Inc., 190 F. Supp. 2d 785, 794 (D. Md. 2002)*. In the absence of a conflict, New York law will be applied to the contract claims.

Without comparing the substantive doctrine with respect to common law fraud claims in the various jurisdictions, New York law applies because

> ***HN12***[] "fraud claims are governed by the laws of the jurisdiction where the injury is deemed to have occurred which usually is where the plaintiff is located." *Pinnacle Oil Co. v. Triumph Oklahoma, L.P., 1997 U.S. Dist. LEXIS 8985, 93 Civ. 3434, 1997 WL 362224, at *1 (S.D.N.Y. Jun. 27, 1997)* (citing *Sack v. Low, 478 F.2d 360, 366 (2d Cir. 1973)* (Friendly, J.)); *Cooney v. Osgood March., Inc., 81 N.Y.2d 66, 72, 595 N.Y.S.2d 919, 612 N.E.2d 277 (1993)* ("If conflict-regulating laws are at issue, the **[*20]** law of the jurisdiction where the tort occurred will generally apply because that jurisdiction has the greatest interest in regulating behavior within its borders."). Indeed, "the traditional view has been that … when a person sustains loss by fraud, the place of wrong is where the loss is sustained, not where fraudulent misrepresentations are made." *Sack, 478 F.2d at 366* (citations omitted).

*PPI Enterprises (U.S.), Inc. v. Del Monte Foods Co., 2003 U.S. Dist. LEXIS 16006, 99 Civ. 3794, 2003 WL 22118977, at *17 (S.D.N.Y. Sept. 11, 2003).* Because Waturu Iwata is a New York resident, any alleged loss was sustained in New York, making New York law applicable.

A. *Breach of Contract*

HN13[] In order to recover on a claim for breach of contract, Waturu Iwata must allege, among other elements, the existence of a valid contract. *See Morgan Stanley High Yield Securities v. Seven Circle Gaming Corp., 269 F. Supp. 2d 206, 213 (S.D.N.Y. 2003)*. The relevant contract is the JI Franchise Agreement. Although a copy of the Agreement was not attached to the Amended Complaint, it is clearly incorporated by reference, and may be considered on a motion to dismiss. **[*21]** *See* *Rothman, 220 F.3d at 88*. On March 25, 2002, MMI entered into the Franchise Agreement with Jun Iwata on behalf of an entity to be named later. *See* Declaration of Gregg Rubenstein, Exhibit 1. That entity is JI. Waturu Iwata is not a party to the JI Franchise Agreement, although he is alleged to be Jun Iwata's lender, and to have reviewed and relied upon the information in the UFOC. Amended Complaint P 99. The Amended Complaint alleges, however, that Waturu Iwata is a "silent partner," and "is more than simply a provider of funds for the purchase of the franchise." *Id.* at PP 100, 101. As a silent partner, Waturu Iwata is alleged to be "the equivalent of an owner of the franchise," and to have the "equivalent of a contractual relationship" with MMI and "the equivalent of a direct relationship" with MMI. *Id.* at PP 102-104.

The allegations in the Amended Complaint are insufficient to establish that there was a valid contract between Waturu Iwata and MMI. The term "silent partner" is not defined in the complaint, but there is no allegation that a contractual relationship was formed. Nor does the allegation that Waturu Iwata and MMI **[*22]** had "the equivalent of a contractual relationship" give rise to a legally recognizable relation. In his brief, Waturu Iwata argues that he "had the same possibility of loss due to an improper action or inaction on the part of" MMI as Jun Iwata. Memorandum of Waturu Iwata in Opposition to Defendant's Motion to Dismiss, at 3. Such a theory of contract liability would give standing to sue for breach of contract to every creditor to a party to a contract. Waturu Iwata has cited no caselaw to support his theory. Accordingly, the breach of contract claim is dismissed.

B. *Breach of Implicit Covenant of Good Faith*

HN14[] In the absence of a valid contract, Waturu Iwata's claim for a breach of an implied covenant of good faith must also be dismissed. *See Sheth v. New York Life Ins. Co., 273 A.D.2d 72, 73, 709 N.Y.S.2d 74 (1st Dep't 2000)* ("cause of action for breach of the implied covenant of good faith and fair dealing . . . may not be used as a substitute for a nonviable claim of breach of contract."); *Lakeville Pace Mech., Inc. v. Elmar Realty Corp., 276 A.D.2d 673, 676, 714 N.Y.S.2d 338 (2d Dep't 2000)* ("there can be no covenant of good faith and fair **[*23]** dealing implied where there is no contract").

C. *Claim for Violation of the Maryland Franchise Registration and Disclosure Law*

Waturu Iwata has alleged that MMI violated the Maryland Franchise Registration and Disclosure Law ("MFRDL"). *See* Md. Bus. Reg. Code Ann. *§§ 14-201 to 14-233*. *Section 14-227(a)(1) of the MFRDL* provides that ***HN15***[] "A person who sells or grants a franchise is civilly liable to the person who buys or is granted a franchise if the person who sells or grants a franchise offers to sell or sells a franchise. . ." There is no allegation in the Amended Complaint that Waturu Iwata was sold or granted a franchise by MMI. Accordingly, this claim is dismissed for lack of standing. *See* *Matterhorn Group, Inc. v. SMH (U.S.) Inc. (In re Matterhorn Group), 2000 Bankr. LEXIS 915, 2000 WL 1174215 (Bankr. S.D.N.Y. Aug. 17, 2000)* ***HN16***[] ("The plain language of the [MFRDL] grants a civil remedy only to purchasers and grantees . . . The 'purchase' requirement simply recognizes that a non-purchaser does not rely on an unregistered or fraudulent prospectus, and hence, does not suffer the type of injury that Maryland franchise law, and similar laws in other states, are designed to prevent."); **[*24]** *Flynn v. Everything Yogurt, 1993 U.S. Dist. LEXIS 15722, C.A. No. HAR92-3421, 1993 WL 454355, at *4-5 (D. Md. Sept. 14, 1993)* (dismissing MFRDL claim by plaintiff whose "only connection with the circumstances that gave rise to the matter at bar is his pledge of certain security in connection with the loan obtained by [franchisees] to purchase the franchise.").

D. *Lost Opportunities*

Waturu Iwata has alleged a claim for lost opportunities. Waturu Iwata has not cited any caselaw supporting the existence of a distinct claim for lost opportunities. Accordingly, the claim for lost opportunities is dismissed.

E. *Fraud*

MMI argues that the fraud claim can be dismissed because, under New York law, tort claim liability based solely on economic loss is limited to those in privity with the alleged tortfeasor. Because Waturu Iwata has no direct relationship to the defendant, MMI argues, he is not entitled to relief on his fraud claim. ***HN17***[] While "it is well-established under New York law that, where a plaintiff alleges only economic damage resulting from a defendant's alleged negligence, defendants owe no duty to plaintiffs with whom they are not in contractual privity,"*The Jordan (Bermuda) Inv. Co., Ltd. v. Hunter Green Invs. Ltd, 2003 U.S. Dist. LEXIS 5182, 00 Civ. 9214, 2003 WL 1751780,* ***[*25]*** *at *11 (S.D.N.Y. Apr. 1, 2003)* (quoting *Land Mine Enters. v. Sylvester Builders, Inc. 74 F. Supp. 2d 401, 407 (S.D.N.Y. 1999)*, *aff'd*, *234 F.3d 1262 (2d Cir. 2000))*, the doctrine does not extend to tort claims for fraud. *See Metral v. Horn, 213 A.D.2d 524, 526, 624 N.Y.S.2d 177 (2d Dep't 1995)* ("a cause of action sounding in fraud does not require the existence of a relationship of privity or something close to privity between the parties.") (citing *Credit Alliance Corp. v Andersen & Co., 65 N.Y.2d 536, 547, 493 N.Y.S.2d 435, 483 N.E.2d 110 (1985))*; *Shafran v. Kule, 159 A.D.2d 263, 552 N.Y.S.2d 263, 265 (1st Dep't 1990)* ("Lack of privity is not a viable defense to fraud.").

MMI also argues that Waturu Iwata fails to allege a viable fraud claim. ***HN18***[] To state a claim for fraud under New York law, a plaintiff must allege: "(1) a misrepresentation or a material omission of fact which was false and known to be false by defendant; (2) made for the purpose of inducing the other party to rely upon it; (3) justifiable reliance of the other party on the misrepresentation or material omission; and (4) injury." *Flash Electronics, Inc. v. Universal Music & Distribution Corp., 312 F. Supp. 2d 379, 2004 U.S. Dist. LEXIS 6018, CV01-979, 2004 WL 764584,* ***[*26]*** *at *19 (E.D.N.Y. Mar. 31, 2004)* (citing *AUSA Life Ins. Co. v. Ernst and Young, 206 F.3d 202, 208 (2d Cir. 2000)*. ***HN19***[] Under *Fed. R. Civ. P. 9(b)*, "the circumstances constituting fraud . . . shall be stated with particularity." However, "malice, intent, knowledge, and other condition of mind may be averred generally." *Id.* "To satisfy *Rule 9(b)*'s particularity requirement, a plaintiff's complaint must: '(1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.'" *Flash Electronics, 2004 U.S Dist. LEXIS 6018, [WL] at *20* (quoting *Stevelman v. Alias Research Inc., 174 F.3d 79, 84 (2d Cir. 1999))*.

Drawing all inferences in favor of Waturu Iwata, the Amended Complaint states a valid claim for fraud. The alleged fraudulent misrepresentation made by MMI was the inaccurate estimates of construction and equipment costs for the operation of the franchise, and was made in the UFOC provided to Jun Iwata on January 19, 2002 at MMI headquarters. Amended Complaint PP 145-48. ***HN20***[] The fact that **[*27]** the representation was not made directly to Waturu Iwata is not fatal to the claim because he has alleged "that he relied upon it to his detriment, and that the defendant[] intended the misrepresentation to be conveyed to him." *Cement & Concrete Workers Dist. Council Welfare Fund v. Lollo, 148 F.3d 194, 196 (2d Cir. 1998)* (quoting *Rosen v. Spanierman, 894 F.2d 28, 33 (2d Cir. 1990))*; *see also* *Eaton, Cole & Burnham Co. v. Avery, 83 N.Y. 31, 33-34 (1880)* ("it is not essential that a representation should be addressed directly to the party who seeks a remedy for having been deceived and defrauded by means thereof."). The Amended Complaint also alleges that MMI knew that Jun Iwata was going to finance the purchase of the franchise and that the lender would review the information in the UFOC. Amended Complaint PP 95, 97. It is also alleged that MMI knew the UFOC to be inaccurate, and intended to deceive any lenders reviewing the information. *Id.* at PP 96, 165-66. Finally, it is alleged that Waturu Iwata reviewed and relied on the information, and that he was injured as a result. *Id.* at PP 99, 168.

[*28] F. *Claim for Violation of Federal Trade Commission Rules*

Waturu Iwata alleges that MMI violated Federal Trade Commission ("FTC") regulations, in particular the "Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventres," *16 C.F.R. §§ 436.1-438.10*, promulgated pursuant to the *Federal Trade Commission Act* ("FTCA"), *15 U.S.C. §§ 41-58*, by failing to provide accurate information in the UFOC. ***HN21***[] The FTC disclosure requirements provide that "it is an unfair or deceptive act or practice" to fail to furnish any prospective franchisee with accurate information related to the terms of the franchise agreement and the financial condition of the franchisor. *16 C.F.R. § 436.1*. However, there is no private right of action to enforce the Disclosure Requirements of § 436, or any other regulation promulgated under the Federal Trade Commission Act. *See* *Alfred Dunhill Ltd. v. Interstate Cigar Co., 499 F.2d 232, 237 (2d Cir. 1974)* ("Nowhere does the [FTCA] bestow upon either competitors or consumers standing to enforce its provisions."); *Brill v. Catfish Shaks of America, Inc., 727 F. Supp. 1035, 1041 (E.D. La. 1989)* **[*29]** ("there is no private right of action for violation of the FTC's franchise disclosure rules") (citing *Freedman v. Meldy's, Inc., 587 F. Supp. 658 (E.D. Pa. 1984))*.

In the brief by the Franchisee Plaintiffs in opposition to MMI's motion to stay, dismiss and/or transfer, it is argued that plaintiffs are not alleging that they can sue for violation of FTC regulations, but the allegation is made to provide "information to the Court" to show that MMI committed fraud by failing to follow the rule's requirements. While the existence of the FTC regulations is hereby noted, Waturu Iwata's claim for violation of the rule is dismissed for failure to state a claim.

G. *Claims for Violations of Antitrust Laws*

Waturu Iwata has alleged violations of the Section Two of the Sherman Act, *15 U.S.C. § 2*, the Clayton Act, *15 U.S.C. §§ 14* and*15*, and the Robinson-Patman Act, *15 U.S.C. § 13*. Waturu Iwata has alleged that he provided substantial funding to JI and that the damages sustained by JI "are the equivalent of losses sustained by . . . Waturu Iwata." Amended Complaint PP 108, 110.

HN22[] The Second Circuit has held **[*30]** that "merely derivative injuries sustained by . . . creditors of an injured company do not constitute antitrust injury sufficient to confer antitrust standing." *G.K.A. Beverage Corp. v. Honickman, 55 F.3d 762, 766-67 (2d Cir. 1995)*; *see also* Schwimmer Corp. v. Sony Corp. of America, 637 F.2d 41, 46-47 (2d Cir. 1980) ("it is recognized that treble damage actions, effective and attractive as they are in deterring violations of the federal antitrust laws, must have some boundaries. Consequently, the standing requirement is designed, in essence, to limit access to treble recovery to a target of the anticompetitive conduct. Thus, the standing rules exclude a non-target whose damages are more difficult to prove and, in all likelihood, highly speculative."). Each of Waturu Iwata's antitrust claims must be dismissed because he has failed to plead a direct injury or to show that he was a target of anticompetitive conduct, and therefore lacks standing under the antitrust laws.

H. *RICO Claims*

Waturu Iwata has alleged that defendants violated the Racketeer Influenced and Corrupt Organizations ("RICO") Act, *18 U.S.C. § 1961,* ***[*31]*** *et seq.*

> ***HN23***[] To state a RICO claim under *§ 1962(b)and (c)*, a plaintiff must plead seven elements: "(1) that the defendant (2) through the commission of two or more acts (3) constituting a 'pattern' (4) of 'racketeering activity' (5) directly or indirectly invests in, or maintains an interest in, or participates in (6) an 'enterprise' (7) the activities of which affect interstate or foreign commerce."

The Jordan (Bermuda) Inv. Co., Ltd. v. Hunter Green Invs. Ltd, 154 F. Supp. 2d 682, 690 (S.D.N.Y. 2001) (quoting *Moss v. Morgan Stanley, Inc., 719 F.2d 5, 17 (2d Cir. 1983)*. Moreover, "RICO ***HN24***[] is a specialized statute requiring a particular configuration of elements. These elements cannot be incorporated loosely from a previous narration, but must be tightly particularized and connected in a complaint. Parroting statutory language while generally referring the reader back to the previous 100 paragraphs in a complaint is inadequate." *Lesavoy v. Lane, 304 F. Supp. 2d 520, 532 (S.D.N.Y. 2004)* (quoting *Zaro Licensing, Inc. v. Cinmar, Inc., 779 F. Supp. 276, 284 (S.D.N.Y. 1991))*.

Waturu Iwata's RICO allegations **[*32]** are insufficient to state a valid claim. No particularized allegation is made. Instead, the factual information is incorporated by reference from the previous paragraphs in the complaint, and the enumeration of the statutory elements are conclusorily alleged. The entities alleged to have conspired with MMI are not named, the predicate acts alleged to form the basis of the claim are not specified, and it is not alleged that "the predicate acts are related and that they amount to, or pose a threat of, continuing criminal activity." *GICC Capital Corp. v. Technology Fin. Group, Inc., 67 F.3d 463, 465 (2d Cir. 1995)*. Accordingly, Waturu Iwata's RICO claim is dismissed.

MMI's Motion for Attorney's Fees is Denied

MMI argues that it should be awarded attorney's fees for responding to Waturu Iwata's complaint. *Federal Rule of Civil Procedure 11* **HN25**[] has been violated, and sanctions are appropriate "where it is patently clear that a claim has absolutely no chance of success under the existing precedents, and where no reasonable argument can be advanced to extend, modify or reverse the law as it stands." *Eastway Constr. Corp. v. City of New York, 762 F.2d 243, 254 (2d Cir. 1985).* **[*33]** While several of Waturu Iwata's claims have been dismissed for failure to state a claim upon which relief can be granted, his fraud claim has been validly pleaded. MMI's motion for attorney's fees is therefore denied.

Plaintiffs' Motion to Stay or Order Defendant to Dismiss Suits Brought in the District of Maryland

The plaintiffs argue that MMI may not institute new actions duplicating existing litigation and that the actions in federal court in Maryland should therefore be stayed and MMI should be ordered to dismiss the Maryland actions. No adequate basis for a stay has been submitted, and the request is accordingly denied.

Conclusion

MMI's motion to transfer the claims of the Franchisee Plaintiffs to the United States District Court for the District of Maryland is granted. Except for the common law fraud claim, each of Wataru Iwata's claims are dismissed for failure to state a claim. MMI's motion for attorney's fees against Waturu Iwata is denied. Plaintiffs' motion to stay and order MMI to dismiss its lawsuits in the District of Maryland is denied.

It is so ordered.

New York, NY

HN2[] **Exemptions & Immunities, Collectives & Cooperatives**

Section 292 of the Capper-Volstead Act, 7 U.S.C.S. § 291 et seq., authorizes the Secretary of Agriculture to take action against an agricultural cooperative that monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is unduly enhanced. 7 U.S.C.S. § 292.

Governments > Legislation > Interpretation

HN3[] Legislation, Interpretation

When statutory interpretation is at issue, the plain and unambiguous meaning of a statute prevails in the absence of clearly expressed legislative intent to the contrary.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

HN4[] Collectives & Cooperatives, Capper-Volstead Act

The Capper-Volstead Act, *7 U.S.C.S. § 291 et seq.*, is plain and unambiguous in its reference to "persons." No limitation on the ordinary meaning of that word is stated or implied. The term "persons" refers to foreign farmers as well as American farmers.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Clayton Act

Business & Corporate Law > Foreign Corporations > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

HN5[] Collectives & Cooperatives, Clayton Act

Under the Clayton Act, "persons" is expressly defined as including foreign entities. *15 U.S.C.S. § 12*.

Antitrust & Trade Law > Clayton Act > General Overview

HN6[] Antitrust & Trade Law, Clayton Act

Section 6 of the Clayton Act- which opens with the statement that the labor of a human being is not a commodity or article of commerce--provides that the antitrust laws are not to be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit. *15 U.S.C.S. § 17*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

HN7[] Collectives & Cooperatives, Capper-Volstead Act

According to the United States Supreme Court, from the standpoint of agricultural cooperatives, the principal defect in that exemption was that it applied only to nonstock organizations. The Capper-Volstead Act, *7 U.S.C.S. § 291 et* seq., was therefore adopted to clarify the exemption for agricultural organizations and to extend it to cooperatives having capital stock.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

HN8[] Antitrust & Trade Law, Sherman Act

Section 1 of the Clayton Act defines "person" and "persons" wherever used in the Clayton Act as including corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country. *15 U.S.C.S. § 12*. The Sherman Act defines "person" and "persons" in the same way. *15 U.S.C.S. § 7*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Clayton Act

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

HN9[] Collectives & Cooperatives, Capper-Volstead Act

The meaning of the term "persons" under the Capper Volstead Act, *7 U.S.C.S. § 291 et seq.*, is as broad as the definition set forth in the Clayton Act. A review of the Clayton Act as a whole demonstrates that the exemption contained in § 6 of the Clayton Act applies to cooperatives that include foreign farmers; likewise, the Capper-Volstead Act applies to cooperatives that include foreign farmers.

Governments > Legislation > Interpretation

HN10[] Legislation, Interpretation

Where Congress uses the same term in the same way in two statutes with closely related goals, basic canons of statutory construction suggest a presumption that Congress intended the term to have the same meaning in both contexts.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Business & Corporate Law > Cooperatives > Member Duties & Liabilities

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

Business & Corporate Law > Cooperatives > General Overview

HN11[] **Collectives & Cooperatives, Capper-Volstead Act**

All of the members of a cooperative claiming immunity under the Capper Volstead Act, *7 U.S.C.S. § 291 et seq.*, must be "engaged in the production of agricultural products. *7 U.S.C.S. § 291*.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Governments > Legislation > Interpretation

HN12[] **Antitrust & Trade Law, Exemptions & Immunities**

Exemptions to the antitrust laws should be narrowly construed. The rule neither requires nor permits a court to disregard the plain language of the statute when interpreting an exemption. Courts have repeatedly rejected proposed narrow interpretations of statutory exemptions from the antitrust laws where those interpretations are inconsistent with the plain language of the statute.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

HN13[] **Collectives & Cooperatives, Capper-Volstead Act**

The Fisherman's Collective Marketing Act (FCMA) defines "aquatic products" as all commercial products of aquatic life in both fresh and salt water, as carried on in the several States, the District of Columbia, the several Territories of the United States, the insular possessions, or other places under the jurisdiction of the United States. While it is true that the Capper-Volstead Act, *7 U.S.C.S. § 291 et seq.*, is similar to the FCMA in several respects, it differs in a significant respect: Congress did not define "agricultural products" as referring only to products grown in the United States or in places under the jurisdiction of the United States.

Governments > Legislation > Interpretation

HN14[] **Legislation, Interpretation**

When one statute contains limiting language and a related statute does not, the court should presume that the difference was intentional.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Governments > Legislation > Interpretation

Business & Corporate Compliance > ... > Title VII Discrimination > Scope & Definitions > Extraterritorial Application

HN15[] **Collectives & Cooperatives, Capper-Volstead Act**

Under the presumption against extraterritorial application of United States law, courts presume that federal legislation is primarily concerned with domestic conditions, absent a clear expression of congressional intent to the contrary. The presumption serves to protect against unintended clashes between United States laws and those of other nations which could result in international discord.

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

HN16[] **International Aspects, International Application of US Law**

There is no question that the federal antitrust laws apply to conduct outside of the territorial borders of the United States when that conduct affects competition within the United States.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

HN17[] **Collectives & Cooperatives, Capper-Volstead Act**

The rationale for the presumption against extraterritorial application of United States law is inapplicable where the statute at issue is an exemption from United States law rather than a statute imposing requirements or standards of conduct on persons in other countries. By its very nature, an exemption from a prescriptive law of the United States eliminates any conflict between that prescriptive law and the law of another country. The Capper-Volstead Act, *7 U.S.C.S. § 291 et seq.*, in no way impedes the ability of another sovereign to forbid its citizens to engage in conduct that is permissible under the laws of the United States.

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

Governments > Legislation > Interpretation

Administrative Law > Judicial Review > Standards of Review > General Overview

HN18[] **Standards of Review, Deference to Agency Statutory Interpretation**

The question of whether a court should defer to an agency's interpretation of a statute only arises where the statute is ambiguous. If the intent of Congress is clear, that is the end of the matter; for the court, as well as the agency, must give effect to the unambiguously expressed intent of Congress.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

HN19[] **Exemptions & Immunities, Collectives & Cooperatives**

The term "persons" in the Capper-Volstead Act, *7 U.S.C.S. § 291 et seq.*, unambiguously refers to foreign farmers as well as American farmers.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

Business & Corporate Compliance > ... > Business & Corporate Law > Cooperatives > Formation

International Trade Law > General Overview

Business & Corporate Law > Cooperatives > General Overview

HN20[] **Exemptions & Immunities, Collectives & Cooperatives**

Congress has expressly built a safeguard for American consumers into the Capper-Volstead Act, *7 U.S.C.S. § 291 et seq.*, by authorizing the Secretary of Agriculture to bring proceedings against any cooperative that monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is unduly enhanced by reason thereof. *7 U.S.C.S. § 292*.

Opinion

[*223] SPECIAL MASTER'S RECOMMENDATION ON CROSS-MOTIONS FOR PARTIAL SUMMARY JUDGMENT CONCERNING CAPPER-VOLSTEAD ACT AND FOREIGN MEMBERSHIP IN OCEAN SPRAY'S AGRICULTURAL COOPERATIVE

Upon consideration of the plaintiffs' Motion for Summary Judgment on the Inapplicability of the Capper-Volstead Act to the Antitrust Allegations of the Complaint and Ocean Spray's Cross-Motion for Partial Summary Judgment

Regarding Capper-Volstead Applicability, the Special Master recommends that the Court **DENY** the plaintiffs' Motion. The Special Master recommends that the Court **ALLOW** Ocean Spray's Cross-Motion to the extent that Ocean Spray seeks a determination that the inclusion of foreign members in its agricultural cooperative does not prevent **[**3]** Ocean Spray from asserting the antitrust exemption set forth in the Capper-Volstead Act, *7 U.S.C. § 291, et seq.* as an affirmative defense to the Amended Complaint.

Ocean Spray has not expressly moved for summary judgment as to the effect of the Capper-Volstead Act on any of the plaintiffs' claims against Ocean Spray. Therefore, the Special Master makes no recommendation on that issue.

The Nature of the Case

This is an antitrust case brought by a current independent seller of cranberry products (Northland Cranberries, Inc.) and a former independent seller of cranberry products (Clermont, Inc.) against Ocean Spray Cranberries, Inc. Ocean Spray is an agricultural cooperative of cranberry growers. The plaintiffs allege that the agreements between Ocean Spray and its members constitute unlawful restraints on competition, and that Ocean Spray has engaged in unlawful, anticompetitive activities "that have harmed, and continue to harm, competition for the sale of cranberry products in the United States." (Amended Complaint, P 1).

As its Second Defense, Ocean Spray alleges that it is "an association of agricultural **[*224]** producers who collectively process, **[**4]** prepare for market, handle and market in interstate and foreign commerce their agricultural products, and thus the plaintiffs' claims are barred in whole or in part by various statutory exemptions for agricultural cooperatives and associations of producers including, but not limited to, the Capper-Volstead Act, *7 U.S.C. § 291, et seq.*; the Agricultural Marketing Agreement Act of 1937, *7 U.S.C. § 601, et seq.*; and the Cooperative Marketing Act of 1926, *7 U.S.C. § 451, et seq.*"

The plaintiffs allege that Ocean Spray is not entitled to claim immunity under the Capper-Volstead Act, because Ocean Spray's members include cranberry growers outside of the United States. The plaintiffs argue that in order for Ocean Spray to claim immunity under the Capper-Volstead Act, all of its members must be growers in the United States.

The issue presented is an issue of first impression. No court has addressed the question of whether the term "persons" in the Capper-Volstead Act includes foreign farmers.

The Undisputed Material Facts

Ocean Spray is a Delaware corporation with its principal place of business in **[**5]** Massachusetts. (Pls' Statement of Undisputed Facts, No. 3, admitted by Ocean Spray; Amended Complaint and Answer thereto, P 16.) Ocean Spray is an agricultural cooperative whose members include 800 cranberry growers. (Pls' Statement of Undisputed Facts, No. 3, admitted by Ocean Spray.) Approximately 75 to 100 of Ocean Spray's members are located outside of the United States. (Pls' Statement of Undisputed Facts, Nos. 3 and 4, admitted by Ocean Spray). [1] The plaintiffs do not allege that any of the foreign members are not cranberry producers; it is undisputed for purposes of summary judgment that all of the foreign members are cranberry producers.

[6]** **The Special Master's Ruling**

[1] The parties dispute the amount of cranberries delivered to Ocean Spray by growers outside of the United States. The Plaintiffs claim that Ocean Spray's Canadian members contribute approximately 20% of Ocean Spray's total cranberry production. (Pls' Statement of Undisputed Facts, No. 5.) Ocean Spray claims that as of August, 2003 approximately 16% of Ocean Spray's total cranberry acreage was located outside the United States and that approximately 17% of the total cranberries delivered to Ocean Spray in the 2002 harvest consisted of cranberries grown outside of the United States. (Ocean Spray's Statement of Undisputed Facts, No. 5.) This dispute is immaterial to the cross-motions for partial summary judgment.

Section 291 of the Capper-Volstead Act (*7 U.S.C. § 291*) provides as follows:

> ***HN1***[] Persons engaged in the production of agricultural products as farmers, planters, ranchmen, dairymen, nut or fruit growers may act together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce, such products of persons so engaged. Such associations may have marketing agencies in common; and such associations and their members may make the necessary contracts and agreements to effect such purposes: *Provided, however*, That such associations are operated for the mutual benefit of the members thereof, as such producers, and conform to one or both of the following requirements:
>
> **First.** That no member of the association is allowed more than one vote because of the amount of stock or membership capital he may own therein, or,
>
> **[*225] Second.** That the association does not pay dividends on stock or membership capital in excess of 8 per centum per annum.
> And in any case to the following:
>
> **Third. [**7]** That the association shall not deal in the products of nonmembers to an amount greater in value than such as are handled by it for members.

HN2[] Section 292 of the Act authorizes the Secretary of Agriculture to take action against an agricultural cooperative that "monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is unduly enhanced[.]" *7 U.S.C. § 292*.

HN3[] "When statutory interpretation is at issue, the plain and unambiguous meaning of a statute prevails in the absence of clearly expressed legislative intent to the contrary." *In re Alappat, 33 F.3d 1526, 1531 (Fed. Cir. 1994)* (citing *Mansell v. Mansell, 490 U.S. 581, 592, 104 L. Ed. 2d 675, 109 S. Ct. 2023 (1989))*. ***HN4***[] The Capper-Volstead Act is plain and unambiguous in its reference to "persons." No limitation on the ordinary meaning of that word is stated or implied. The term "persons" refers to foreign farmers as well as American farmers.

The conclusion that "persons" includes foreign farmers is confirmed by Congress' purpose in adopting the Capper-Volstead Act. As discussed below, Congress adopted the Capper-Volstead Act (in 1922) in order **[**8]** to extend to agricultural cooperatives having capital stock the exemption from the antitrust laws that Congress had granted (in 1914) to agricultural cooperatives not having capital stock, in *Section 6 of the Clayton Act*. See *Case-Swayne Co. v. Sunkist Growers, Inc., 389 U.S. 384, 390-391, 19 L. Ed. 2d 621, 88 S. Ct. 528 (1967)*. As discussed below, ***HN5***[] under the *Clayton Act*, "persons" is expressly defined as including foreign entities. *15 U.S.C. § 12*.

HN6[] Section 6 of the Clayton Act -- which opens with the statement that "the labor of a human being is not a commodity or article of commerce" -- provides that the antitrust laws are not to be "construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit[.]" *15 U.S.C. § 17*.

HN7[] According to the United States Supreme Court, "From the standpoint of agricultural cooperatives, the principal defect in that exemption was that it applied only to nonstock organizations." *Case-Swayne Co., 389 U.S. at 391*. The Capper-Volstead Act was therefore adopted "to clarify the exemption **[**9]** for agricultural organizations and to extend it to cooperatives having capital stock." Id. See also *Maryland & Virginia Milk Producers Ass'n. v. United States, 362 U.S. 458, 464-468, 4 L. Ed. 2d 880, 80 S. Ct. 847 (1960)* (discussing the history and purpose of the Capper-Volstead Act at length).

HN8[] Section 1 of the Clayton Act defines "'person' and persons' wherever used in this Act" as including "corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country." *15 U.S.C. § 12* (emphasis added). *The Sherman Act* defines "person" and "persons" in the same way. *15 U.S.C. § 7*.

The Special Master concludes that ***HN9***[] the meaning of the term "persons" under the Capper Volstead Act is as broad as the definition set forth in the Clayton Act. A review of the Clayton Act as a whole demonstrates that the exemption contained in *Section 6 of the Clayton Act* applies to cooperatives that include foreign farmers; **[*226]** likewise, the Capper-Volstead Act applies to cooperatives that include foreign farmers. See *New Hampshire v. Ramsey, 366 F.3d 1, 2004 WL 912603, *17 (1st Cir. 2004)* **[**10]** ***HN10***[] ("where Congress uses the same term in the same way in two statutes with closely related goals, basic canons of statutory construction suggest a presumption that Congress intended the term to have the same meaning in both contexts"). [2]

The plaintiffs offer several arguments for the proposition that, notwithstanding the plain meaning of the word "persons," and notwithstanding the fact that the Capper-Volstead Act was enacted to clarify and extend the exemption set forth in *Section 6 of the Clayton Act*, the term "persons" as used in the Capper-Volstead Act does not have **[**11]** the same meaning as the term "persons" as used in the Clayton Act. The Special Master is not persuaded by those arguments.

For example, the plaintiffs cite the statement in *National Broiler Marketing Ass'n v. United States, 436 U.S. 816, 822, 56 L. Ed. 2d 728, 98 S. Ct. 2122 (1978)* that in order for the cooperative in that case (concerned with the production of broiler chickens) to enjoy protection under the Capper-Volstead Act, "all its members must be qualified to act collectively" (emphasis in original). As a review of that case makes clear, however, the statement simply means that ***HN11***[] all of the members of a cooperative claiming immunity under the Capper-Volstead Act must be "engaged in the production of agricultural products." *7 U.S.C. § 291*. The cooperative in that case was not entitled to immunity because its membership included persons who were not "engaged in the production of agricultural products," i.e., persons who did not own a breeder flock or hatchery and did not maintain any facility for raising chickens. *National Broiler Marketing, 436 U.S. at 822*. Nothing in that case suggests that foreign persons who are "engaged in the production of agricultural **[**12]** products" are not "qualified to act collectively" under the Capper-Volstead Act.

The plaintiffs also cite the rule that ***HN12***[] exemptions to the antitrust laws should be narrowly construed. See, e.g., *Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 231, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979)*. Application of that rule does not, however, support the plaintiffs' proposed limitation on the meaning of "persons": the rule neither requires nor permits a court to disregard the plain language of the statute when interpreting an exemption. Courts have repeatedly rejected proposed narrow interpretations of statutory exemptions from the antitrust laws where those interpretations are inconsistent with the plain language of the statute. See, e.g., *United States v. Tucor Int'l, Inc., 189 F.3d 834, 837 (9th Cir. 1999)* (rejecting the government's proposed construction of the antitrust exemption in the Shipping Act of 1984 as applying only to "ocean common carriers": "the government's construction ignores the Act's plain language and cannot be interpreted consistently with the statute as a whole"); *Int'l Raw Materials, Ltd. v. Stauffer Chem. Co., 978 F.2d 1318, 1319 (3rd Cir. 1992)* **[**13]** (refusing to limit the term "associations" contained in the *Webb-Pomerene Act* (an antitrust exemption applicable to export associations) to associations of American-owned firms); **[*227]** *Treasure Valley Potato Bargaining Ass'n v. Ore-Ida Foods, Inc., 497 F 2d 203, 214-215 (9th Cir. 1974)* (interpreting the term "marketing" in the Capper-Volstead Act and rejecting a proposed interpretation of the term that would limit it to the "sale" of agricultural products).

In a related vein, the plaintiffs argue that the Court should conclude that "persons" under the Capper-Volstead Act does not include foreign persons, because in another statutory exemption, the Fisherman's Collective Marketing Act (the "FMCA"), Congress included a territorial limitation in the definition of "aquatic products." *15 U.S.C. § 521*. ***HN13***[] (The statute defines "aquatic products" as "all commercial products of aquatic life in both fresh and salt water, as carried on in the several States, the District of Columbia, the several Territories of the United States, the insular possessions, or other places under the jurisdiction of the United States.") While it is true that the Capper-Volstead Act **[**14]** is similar to the FCMA in several respects, it differs in a significant respect: Congress did not

---

[2] Plaintiffs cite various statements made in the legislative debates which they claim demonstrate that Congress intended to exclude foreign farmers from the definition of "persons." None of the statements support the plaintiffs' position. At most, the statements show that certain legislators argued that foreign competition was likely to prevent exempt agricultural cooperatives from achieving a monopoly position.

define "agricultural products" as referring only to products grown in the United States or in places under the jurisdiction of the United States. ***HN14***[] When one statute contains limiting language and a related statue does not, the court should presume that the difference was intentional. Compare *B.F.P. v. Resolution Trust Corp., 511 U.S. 531, 537, 128 L. Ed. 2d 556, 114 S. Ct. 1757 (1994)* ("it is generally presumed that Congress acts intentionally and purposely when it includes particular language in one section of a statute but omits it in another").

In arguing that "persons" as used in the Capper-Volstead Act does not include foreign farmers, the plaintiffs also cite the presumption against extraterritorial application of United States law. ***HN15***[] Under this presumption, courts presume that federal legislation is "primarily concerned with domestic conditions," absent a clear expression of congressional intent to the contrary. See *EEOC v. Arabian American Oil Co., 499 U.S. 244, 248, 113 L. Ed. 2d 274, 111 S. Ct. 1227 (1991)* (internal citation and quotation marks omitted) (holding that the protections of Title VII did not apply to United **[**15]** States citizens employed by American employers outside of the United States). [3] The presumption "serves to protect against unintended clashes between our laws and those of other nations which could result in international discord." Id.

The plaintiffs' reliance on this presumption is misplaced. First, ***HN16***[] there is no question that the federal antitrust laws apply to conduct outside of the territorial borders of the United States when that conduct affects competition within the United States. See, e.g., *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 796, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* ("it is well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States"). To the extent that the instant case involves extraterritorial application of the antitrust laws, the plaintiffs themselves allege that the conduct at issue has **[**16]** had a substantial effect within the United States. (Amended Complaint, P 1.)

Furthermore, ***HN17***[] the rationale for the presumption is inapplicable where the statute at issue is an exemption from United States law rather than a statute imposing requirements or standards of conduct on persons in other countries. By its very nature, an exemption from a prescriptive law of the United States eliminates any **[*228]** conflict between that prescriptive law and the law of another country. The Capper-Volstead Act in no way impedes the ability of another sovereign to forbid its citizens to engage in conduct that is permissible under the laws of the United States. Compare *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 799, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* (rejecting the argument of London reinsurers that the application of federal ***antitrust law*** to their conduct would conflict with British law: "the London reinsurers do not argue that British law requires them to act in some fashion prohibited by the law of the United States, . . . or claim that their compliance with the laws of both countries is otherwise impossible") (internal citation omitted).

The plaintiffs also claim that the United States Department **[**17]** of Justice (the "DOJ") has taken the position in certain antitrust actions that the Capper-Volstead Act does not apply to agricultural cooperatives that include foreign members, and that the Court should defer to the DOJ's interpretation of the statute. Both Ocean Spray and the National Council of Farmer Cooperatives, amicus curiae, counter that the United States Department of Agriculture (the "USDA") has issued numerous publications stating that Capper-Volstead immunity extends to cooperatives with foreign members and that American farmers can realize substantial economic benefits by associating with foreign farmers (for example, an extended growing season). [4]

[18]** Ocean Spray also counters that the plaintiffs have misinterpreted the DOJ's statements; that statements by the DOJ in the context of litigation are not entitled to deference; and that the USDA's position, rather than the DOJ's

---

[3] This holding was superseded by statute. *42 U.S.C. 2000e(f) (2000)*.

[4] See, e.g., James A. Jacobs, Fruit and Vegetable Cooperatives, Farmer Cooperatives in the United States, Cooperative Information Report 1, Sectio, United States Department of Agriculture, Agricultural Cooperative Service, issued September 1978, revised November 1990, p. 59 (Appendix in Support of Ocean Spray's Memorandum ("Ocean Spray's Appendix"), Ex. 10); Tracey L. Kennedy and Karen J. Spatz, "Over There: Cooperatives Going Global to Enhance Marketing Position," Farmer Cooperatives (USDA: October 1993), pp. 14-15 (Ocean Spray's Appendix, Ex. 18); Cooperatives in International Trade, p. 6 (USDA: April 1997) (Ocean Spray's Appendix, Ex. 14, p. OCS 0173A-0287).

position, is entitled to deference. The Special Master does not address these issues, because ***HN18***[] the question of whether a court should defer to an agency's interpretation of a statute only arises where the statute is ambiguous. See *Chevron U.S.A. Inc. v. NRDC, 467 U.S. 837, 842-843, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984)* ("if the intent of Congress is clear, that is the end of the matter; for the court, as well as the agency, must give effect to the unambiguously expressed intent of Congress"). The Special Master has concluded that ***HN19***[] the term "persons" in the Capper-Volstead Act unambiguously refers to foreign farmers as well as American farmers.

The plaintiffs also argue that the conclusion that "persons" includes foreign farmers would lead to "absurd results." (Pls' Memo at 19.) The plaintiffs argue that this interpretation would "permit producers throughout the world to cartelize any agricultural commodity," to the detriment of American consumers. (Pls' **[**19]** Memo at 19.) The plaintiffs further argue that a ruling by the Court that "persons" includes foreign farmers "would provide a huge incentive and cause non-cooperative agricultural entities to restructure into cooperatives so that they could fit within the Act's protection of price fixing." (Pls' Memo at 20). Ocean Spray counters that the scenario described by the plaintiffs has not come to pass notwithstanding the fact that the USDA has, for the past several **[*229]** years, encouraged agricultural cooperatives in the United States to add foreign members. (See publications cited in note 4 infra.)

The plaintiffs' argument does not persuade the Special Master that he can or should disregard the plain meaning of the word "persons." ***HN20***[] Congress has expressly built a safeguard for American consumers into the statute, by authorizing the Secretary of Agriculture to bring proceedings against any cooperative that "monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is unduly enhanced by reason thereof[.]" *7 U.S.C. § 292* (emphasis added).

For the reasons stated above, the Special Master the recommends **[**20]** that the Court **DENY** the plaintiffs' Motion for Summary Judgment on the Inapplicability of the Capper-Volstead Act to the Antitrust Allegations of the Complaint. The Special Master recommends that the Court **ALLOW** Ocean Spray's Cross-Motion to the extent that Ocean Spray seeks a determination that the inclusion of foreign members in its agricultural cooperative does not prevent Ocean Spray from asserting the antitrust exemption set forth in the Capper-Volstead Act, *7 U.S.C. § 291, et seq.* as an affirmative defense to the Amended Complaint.

Gael Mahony, Special Master

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Standards of Review, De Novo Review**

The appeals court's review of a district court's dismissal of a complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* is de novo. In ruling on the sufficiency of the complaint, the appeals court must accept as true the allegations contained in the complaint and draws all reasonable inferences in favor of the nonmoving party. The review is generally limited to the facts and allegations that are contained in the complaint and in any documents that are either incorporated into the complaint by reference or attached to the complaint as exhibits. But the court may also look to public records, including complaints filed in state court, in deciding a motion to dismiss. A dismissal pursuant to *Rule 12(b)(6)* is inappropriate unless it appears beyond doubt that the plaintiff can prove no set of facts which would entitle him or her to relief.

HN4[] **Standing, Clayton Act**

Although the Robinson-Patman Act, *15 U.S.C.S. § 13*, has frequently been the subject of enforcement actions by the Federal Trade Commission, it does not itself provide a private right of action for treble damages. Such a right is granted only by § 4 of the Clayton Act, *15 U.S.C.S. § 15(a)*, which authorizes private suits by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws.

HN5[] **Robinson-Patman Act, Coverage**

Competitive injury is an element of a claim under § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*. *Section 13(a)* prohibits price discrimination where the effect of such discrimination may be substantially to lessen competition or to injure, destroy, or prevent competition with any person involved in the discrimination. There are three types of competitive injury that may result from such price discrimination: A primary-line violation occurs where the discriminating seller's price discrimination adversely impacts competition with his--the seller's--competitors. In contrast, a secondary-line violation occurs where the discriminating seller's price discrimination injures competition among his customers, that is, purchasers from him. Finally, a tertiary violation may exist where even though the purchasers of the discriminating seller did not compete directly, their customers competed within a unified market region.

HN7[] **Robinson-Patman Act, Claims**

Subsections 2(c), (d), (e) of the Robinson-Patman Act, *15 U.S.C.S. § 13(c)*, *(d)*, *(e)*, unqualifiedly make unlawful certain business practices other than price discriminations. The proscriptions of *§ 13(c)*, *(d)*, *(e)* are absolute. Unlike § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, none of them requires, as proof of a prima facie violation, a showing that the illicit practice has had an injurious or destructive effect on competition.

HN8[] **Remedies, Damages**

While competitive injury is not an element of a prima facie violation of § 2(c) of the Robinson-Patman Act, *15 U.S.C.S. § 13(c)*, a private litigant seeking treble damages for such a violation under § 4 of the Clayton Act, *15 U.S.C.S. § 15(a)*, must nevertheless allege an antitrust injury. Antitrust injury and competitive injury are conceptually distinct. While "competitive injury" concerns the potential effect certain conduct may have on competition generally or on the business opportunities of a defined class of competitors, the focus of "antitrust injury" is on whether the challenged conduct has actually caused harm to the plaintiff.

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN9[] **Clayton Act, Claims**

To establish antitrust injury, a private litigant must prove injury in its business or property by reason of the violation and that the violation was at least a material cause of the plaintiff's injury. In other words, a plaintiff must show: (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the statute. With respect to the latter requirement, the United States Supreme Court has held that a private plaintiff may not recover damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15(a)*, merely by showing injury causally linked to an illegal presence in the market. Instead, a plaintiff must prove the existence of antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. This requirement applies to all private actions filed under *§ 15(a)* regardless of the type of antitrust claim involved or whether the challenged conduct constitutes a per se violation.

Criminal Law & Procedure > ... > Bribery > Commercial Bribery > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN10[] **Types of Price Discrimination, Brokerage, Commissions & Compensation**

Section 2(c) of the Robinson-Patman Act, *15 U.S.C.S. § 13(c)*, was enacted primarily to target the practice of "dummy brokerages" whereby large retail buying groups--such as large grocery store chains, which, unlike smaller stores, did not need to use intermediary brokers to purchase their merchandise--would require suppliers to pay fees to "dummy brokers," who then passed the fees on to the large retailer, effectively reducing the price the retailer paid for the goods. Some courts, applying *§ 13(c)* to circumstances far removed from the paradigmatic "dummy brokerage" scheme, have held that *§ 13(c)* also proscribes commercial bribery. The United States Court of Appeals for the Second Circuit has never reached the question of whether--and under what circumstances--commercial bribery can form the basis of a claim under *§ 13(c)*.

HN11[] **Types, Employees & Employers**

Commercial bribery cannot be committed unilaterally by an alleged bribe receiver: one cannot be guilty of receiving a commercial bribe unless someone else is guilty of paying it. In New York, for instance, commercial bribery is defined as conferring, or offering or agreeing to confer, any benefit upon any employee, agent or fiduciary without the consent of the latter's employer or principal, with intent to influence his conduct in relation to his employer's or principal's affairs. *N.Y. Penal Law § 180.00*. The essence of bribery is in the "intent" to influence improperly the conduct of another by bestowing a benefit, and the essence of bribe receiving is in the "agreement or understanding" that the recipient's conduct will be influenced by the benefit.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN13[] **Types of Price Discrimination, Brokerage, Commissions & Compensation**

The sine qua non of a violation of § 2(c) of the Robinson-Patman Act, 15 U.S.C.S. § 13(c), is an improper payment, that is, a payment of a commission, brokerage, or discount other than for services actually rendered. The fact that a direct payment or indirect discount passes from one party to another party does not compel the conclusion that the payment or discount violates § 13(c). If vendor payments themselves do not violate § 13(c), then they cannot be transformed into a § 13(c) violation simply because an agent of the vendee retained the payments. For purposes of § 13(c), it is irrelevant whether an improper payment that is given to a purchaser's agent is kept by the agent for personal gain rather than transferred to the purchaser.

DANIEL BROWN (William A. Brewer III, James S. Renard, Jeremy R. Wilson, Bickel & Brewer, on the brief), New York, NY, for Defendants-Appellees.

Judges: Before: WALKER, Chief Judge, CALABRESI, Circuit Judge, and KORMAN, Chief Judge. *

Opinion by: JOHN M. WALKER, JR.

Opinion

[*214] JOHN M. WALKER, JR., *Chief Judge*:

Plaintiffs-appellants Blue Tree Hotels Investment (Canada), Ltd., Edmonton Plaza Hotel, Inc., Caesar Park Hotels & Resorts Tucson Company, and Caesar Park Hotels & Resorts Hilton Head Limited Partnership (collectively, "Blue Tree Owners") are owners of seven Westin Hotels in Canada **[**2]** and the United States ("Hotels"). Defendants-appellees Starwood Hotels & Resorts Worldwide, Inc., Starwood Hotels & Resorts, Westin Canada Management Co., Westin Ottawa Management Co., and Westin North America Management Co. (c ollectively, "Starwood") are a group of related companies that own and/or manage numerous hotels throughout the world (including Westin Hotels, W Hotels, Four Points Hotels, St. Regis Hotels, and Sheraton Hotels). In a complaint filed pursuant to § 4 of the Clayton Act, 15 U.S.C. § 15(a), the Blue Tree Owners alleged that Starwood, acting in its capacity as the manager of their Hotels, has engaged in commercial bribery by receiving and retaining various rebates and discounts in **[*215]** connection with its purchasing activities on behalf of the Hotels and the other hotels Starwood owns and/or manages. Asserting that this conduct violates § 2(c) of the Robinson-Patman Act, 15 U.S.C. § 13(c), the Blue Tree Owners claim treble damages and attorneys' fees.

The United States District Court for the Southern District of New York (Charles L. Brieant, Jr., *District Judge*) entered judgment dismissing the complaint under Fed. R. Civ. P. 12(b)(6) **[**3]** for failure to state a claim. The district court ruled that the Blue Tree Owners lacked standing to seek treble damages for the alleged violation, concluding that the only parties who would be able to allege an antitrust injury arising from this type of § 2(c) violation would be vendors who directly compete with the vendors who paid the alleged commercial bribes to Starwood. The Blue Tree Owners appeal.

While we conclude that the district court erred in holding that proof of competitive injury was a necessary component of a § 2(c) violation, we nevertheless find that appellants have failed to allege a violation of § 2(c). Accordingly, we affirm the district court's dismissal of the complaint.

BACKGROUND

---

* The Honorable Edward R. Korman, Chief Judge of the United States District Court for the Eastern District of New York, sitting by designation.

In 1995, Starwood purchased the entire chain of Westin hotels with the exception of the Hotels owned by the Blue Tree Owners. Prior to Starwood's purchase of the Westin chain, each of the Blue Tree Owners had entered into management agreements (the "Management Agreements") with the Westin Hotel Company ("Westin"), pursuant to which Westin operated the Hotels on behalf of the Blue Tree Owners. As part of its purchase of the Westin chain, Starwood acquired Westin's interest in **[**4]** the Management Agreements.

Under the Management Agreements, Starwood is obligated to operate the Hotels on behalf of the Blue Tree Owners in exchange for management fees, reimbursement for expenses incurred by Starwood for the Blue Tree Owners' accounts, and payment of a percentage of the Westin chain's overhead costs. Each Management Agreement grants Starwood discretion to purchase for the Hotels any operating supplies and fixtures it deems advisable. In addition, all but one of the Management Agreements permit Starwood to "implement [its] standard administrative, accounting, budgeting, marketing, personnel, and operational policies and practices relating to or affecting hotel operations, as those policies may be amended from time to time, but all of which [the Blue Tree Owners] agree [] to accept."

In July 2000, Starwood filed a complaint against the Blue Tree Owners in New York State Supreme Court asserting several claims, including breach of contract, tortious interference with business relationships, and fraud. [1] In October 2000, the Blue Tree Owners and others filed a complaint against Starwood, also in New York State Supreme Court, asserting claims of commercial bribery, **[**5]** fraud, negligent misrepresentation, conversion, breach of contract, and breach of fiduciary duty. [2] As of the date of oral argument in this case, both of these state court cases were still pending.

The Blue Tree Owners filed this federal action in April 2002, asserting a private **[*216]** antitrust claim pursuant to § 4 of the Clayton Act, *15 U.S.C. § 15(a)*, based on allegations that Starwood has engaged in a commercial bribery scheme that violates § 2(c) of the Robinson-Patman Act, *15 U.S.C. § 13(c)*. Specifically, the Blue Tree Owners allege that (1) one of Starwood's responsibilities under the Management Agreements is to act as a purchasing agent for the Hotels; (2) it performs such purchasing activities in conjunction **[**6]** with its purchases for the other hotels it owns or manages; (3) it has "entered into agreements with vendors to provide the Hotels with the goods, wares and merchandise that the Hotels require"; and (4) pursuant to these agreements, Starwood has "sought and obtained undisclosed Kickbacks" from the vendors, thereby engaging in an "unlawful Kickback scheme." The Blue Tree Owners define these "Kickbacks" as "allowances, bonuses, charges, commissions, credits, discounts, fees, incentives, profits, rebates, and/or kickbacks."

The Blue Tree Owners acknowledge that they have no involvement in or control over the negotiation and execution of the purchasing agreements between Starwood and its vendors. They complain, however, that Starwood has "intentionally failed to disclose and/or fraudulently concealed [its] receipt and retention of [the] Kickbacks [as well as] the amount of Kickbacks [it has] received and retained in the aggregate, and with respect to each of the Hotels individually." In addition, the Blue Tree Owners allege, Starwood "intended to retain [and] did retain . . . the Kickbacks for [its] own account and to profit therefrom to the detriment of the Hotels and in **[**7]** violation of [its fiduciary] duties and obligations to [the Blue Tree Owners]."

The complaint further alleges that, as a consequence of the "Kickback scheme," Starwood is acting as a "dishonest competitor[]" because the Hotels compete with the other hotels Starwood owns and manages, including the Westin and Sheraton brands. The Blue Tree Owners assert that they have been injured by the "Kickback scheme" because (1) it has deprived them of the opportunity to obtain advantageous prices and terms that would otherwise be available from vendors who did not participate in the "Kickback scheme"; and (2) it has increased the cost of goods to the Blue Tree Owners while simultaneously reducing the cost of goods and generating profits for Starwood. The Blue Tree Owners seek treble damages and attorneys' fees. They also seek permanent injunctive relief prohibiting

---

[1] *Starwood Hotels & Resorts Worldwide, Inc. v. Aoki Corp.,* Index No. 602908-00 (Sup. Ct., N.Y. County 2000).

[2] *Blue Tree Hotels Inv. (Canada), Ltd. v. Starwood Hotels & Resorts Worldwide, Inc.*, Index No. 604295-00 (Sup. Ct., N.Y. County 2000).

Starwood from continuing (a) to obtain and retain "Kickbacks" and (b) to impede the Blue Tree Owners' access to the Hotels' financial and operating information.

Attached to the complaint are copies of the seven Management Agreements, as well as a series of letters dating from December 1998 to June 2000 that were sent on behalf **[**8]** of the Blue Tree Owners to Starwood and its accountants. The initial letters sent to Starwood in 1998 and 1999 requested information concerning, *inter alia*, Starwood's "treatment of rebates and commissions," including the total amount of rebates, "the way in which Starwood expects to use rebates to offset the cost of [Starwood's] purchasing function," and the proportion of rebates that would be allocated to the Hotel's marketing fund. In subsequent letters to Starwood, the Blue Tree Owners objected to Starwood's retention of rebates and other compensation it obtained from its purchasing activities, asserting that "rebates are owned by the [Blue Tree Owners]."

In May 2002, Starwood moved to dismiss the complaint. The district court granted Starwood's motion on the ground that, as a matter of law, the Blue Tree **[*217]** Owners did not have standing to pursue a *§ 2(c)* claim based on the alleged commercial bribery scheme. As an initial matter, the district court noted that whether commercial bribery falls within the ambit of *§ 2(c)* was an open question in this circuit. On the assumption that *§ 2(c)* comprehends commercial bribery, however, the district court held that a plaintiff seeking **[**9]** to file a private cause of action for treble damages and attorneys' fees would nevertheless have to allege an antitrust injury in accordance with the requirements of *§ 4 of the Clayton Act*, because *§ 2(c)* does not itself create a private cause of action.

Next the district court observed that the legislative history of the *Robinson-Patman Act* showed that *§ 2(c)* "was enacted to remedy . . . the abuses . . . [of] price discrimination obtained through brokerage schemes[] and the unfair advantage over a competing seller who could not or would not pay kickbacks." The district court concluded that in light of this purpose, the only plaintiffs with standing to file a private action based on the alleged scheme would be the vendors of hotel supplies who directly competed with the vendors who paid the "Kickbacks" to Starwood. The district court reasoned that competing vendors would be the only parties who could allege an antitrust injury as a result of the competitive advantage obtained by the vendors who paid "Kickbacks." Finding that the Blue Tree Owners could not assert such an antitrust injury, the district court dismissed their complaint for failure to state a federal claim upon **[**10]** which relief can be granted. The Blue Tree Owners appealed.

DISCUSSION

I. *Standard of Review*

HN1[] Our review of a district court's dismissal of a complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* is *de novo*. *Gryl ex rel. Shire Pharms. Group PLC v. Shire Pharms. Group PLC, 298 F.3d 136, 140 (2d Cir. 2002)*. In ruling on the sufficiency of the complaint, we must accept as true the allegations contained in the complaint and draw all reasonable inferences in favor of the nonmoving party. *See id.* Our review is generally limited to the facts and allegations that are contained in the complaint and in any documents that are either incorporated into the complaint by reference or attached to the complaint as exhibits. *See Taylor v. Vt. Dep't of Educ., 313 F.3d 768, 776 (2d Cir. 2002)*; *Chambers v. Time Warner, Inc., 282 F.3d 147, 152-54 (2d Cir. 2002)*; *Hayden v. County of Nassau, 180 F.3d 42, 54 (2d Cir. 1999)*. But we may also look to public records, including complaints filed in state court, in deciding a motion to dismiss. *See Taylor, 313 F.3d at 776*; *Pani v. Empire Blue Cross Blue Shield, 152 F.3d 67, 75 (2d Cir. 1998).* **[**11]** A dismissal pursuant to *Rule 12(b)(6)* "is inappropriate unless it appears beyond doubt that the plaintiff can prove no set of facts which would entitle him or her to relief." *Sweet v. Sheahan, 235 F.3d 80, 83 (2d Cir. 2000)*.

On appeal, the Blue Tree Owners contend that the district court erred in concluding that they lacked standing to bring a claim for violation of *§ 2(c) of the Robinson-Patman Act* on the basis of the alleged commercial bribery. They assert that (1) commercial bribery constitutes a *per se* violation of *§ 2(c)*; (2) *§ 2(c)* does not require proof of competitive injury; and (3) even if competitive injury is required for a private action under *§ 2(c)*, appellants alleged competitive injury in their complaint. Addressing these arguments, we conclude that, while the district court did err in imposing a competitive injury requirement, the complaint was nevertheless properly dismissed because it fails to allege a violation of *§ 2(c)* on the basis of commercial bribery or otherwise.

[*218] II. *The Robinson-Patman Act*

Section 2(c) of the Robinson-Patman Act **HN2**[] provides

> It shall be unlawful for any person engaged in commerce, in the course **[**12]** of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

15 U.S.C. § 13(c). As Justice Frankfurter observed in Automatic Canteen Co. of Am. v. FTC, 346 U.S. 61, 65, 97 L. Ed. 1454, 73 S. Ct. 1017, 49 F.T.C. 1763 (1953), **HN3**[] "precision of expression is not an outstanding characteristic of the Robinson-Patman Act." Nevertheless, the statute appears to parse out as follows:

It is unlawful for any person to

(1)pay (or receive)-

> a. anything of value as a commission, brokerage, or other compensation, *or*
>
> b. any allowance or discount in lieu of brokerage, *except* for services rendered in connection with a sale or purchase **[**13]** of goods,

(2) when the payment is made to (or by)
- a. the other party to the transaction, or
- b. an agent, representative or other intermediary where the intermediary is
  - (i) acting for or in behalf of, or
  - (ii) subject to the direct or indirect control of any party to the transaction other than the person by whom the compensation is paid.

HN4[] Although the Robinson-Patman Act has frequently been the subject of enforcement actions by the Federal Trade Commission, *see*, *e.g.*, FTC v. Henry Broch & Co., 363 U.S. 166, 168-69, 4 L. Ed. 2d 1124, 80 S. Ct. 1158 (1960); Biddle Purchasing Co. v. FTC, 96 F.2d 687, 690-92, 26 F.T.C. 1511 (2d Cir. 1938), it does not itself provide a private right of action for treble damages. Such a right is granted only by § 4 of the Clayton Act, 15 U.S.C. § 15(a), which authorizes private suits by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." Schwimmer v. Sony Corp. of Am., 637 F.2d 41, 46 (2d Cir. 1980) (holding that standing to raise a claim under § 2(a) of Robinson-Patman Act "is derived from Section 4 of the Clayton Act **[**14]** "); *see also* J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 568, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981).

III. *Antitrust Injury and Standing Under Robinson-Patman*

In dismissing the Blue Tree Owners' complaint, the district court held that the only plaintiffs who would have standing to sue for the alleged § 2(c) violation arising from the challenged vendor payments would be those vendors of hotel supplies who directly compete with the vendors who made the payments. We agree with the Blue Tree Owners that, in so holding, the district court erroneously imposed the "competitive injury" requirement applicable to a prima facie violation **[*219]** of § 2(a) [3] **[**16]** of the Robinson-Patman Act, 15 U.S.C. § 13(a). [4]

---

[3] Section 2(a) states in relevant part:

> **HN6**[]

See, *e.g.*, FTC v. Simplicity Pattern Co., 360 U.S. 55, 65-67, 3 L. Ed. 2d 1079, 79 S. Ct. 1005 (1959); Best Brands Beverage, Inc. v. Falstaff Brewing Corp., 842 F.2d 578, 584 (2d Cir. 1987) **HN5**[] (holding that competitive injury is an element of a § 2(a) claim). Section 2(a) prohibits price discrimination "where the effect of such discrimination may be substantially to lessen competition or . . . to **[**15]** injure, destroy, or prevent competition with any person" involved in the discrimination. 15 U.S.C. § 13(a). We have identified three types of competitive injury that may result from such price discrimination:

> A primary-line violation occurs where the discriminating seller's price discrimination adversely impacts competition with his - the seller's - competitors. In contrast, a secondary-line violation occurs where the discriminating seller's price discrimination injures competition among his customers, i.e., purchasers from him. Finally, . . . a tertiary violation [may exist] . . . where even though the purchasers of the discriminating seller did not compete directly, their customers competed within a unified market region.

Best Brands Beverage, 842 F.2d at 584 n.1 (internal citations omitted). The district court's holding in this case that only competing vendors would have standing to sue on the basis of the challenged vendor payments effectively imposed a "primary line" competitive injury requirement on the Blue Tree Owners' § 2(c) claim.

As the Supreme Court explained in *Simplicity Pattern*, however,

> **HN7**[]
>
> subsections (c), (d), and (e) [of § 2 of the 9 Robinson-Patman Act] unqualifiedly make unlawful certain business practices other than price discriminations . . . . The proscriptions of these three subsections are absolute. Unlike § 2(a), none of them requires, as proof of a prima facie violation, a showing that the illicit practice has had an injurious or destructive effect on competition.

360 U.S. at 65 (holding that absence of competitive injury **[**17]** was not a defense to prima facie violation of § 2(e)); *see also* Biddle, 96 F.2d at 690 (noting that the competitive injury requirement of § 2(a) does not apply to § 2(c)); *see also* 14 Herbert Hovenkamp, ***Antitrust Law***, P 2362, at 233-34 & nn.64-65, 235, 239 (1999) [hereinafter, "Hovenkamp"] (asserting that § 2(a)'s competitive injury requirement does not apply to § 2(c) claims).

HN8[] While competitive injury is not an element of a prima facie violation of ***[*220]*** § 2(c), a private litigant seeking treble damages for such a violation under § 4 of the Clayton Act must nevertheless allege an antitrust injury. *See In* Town Hotels Ltd. P'ship v. Marriott Int'l, Inc., 246 F. Supp. 2d 469, 475 (S.D. W. Va. 2003); Abernathy v. Bausch & Lomb, Inc., 97 F.R.D. 470, 476 (N.D. Tex. 1983); Hovenkamp, P 2362, at 234-35; *see also* Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 335, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990) (rejecting

---

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce … and *where the effect of such discrimination may be substantially to lessen competition* or tend to create a monopoly in any line of commerce, *or to injure, destroy, or prevent competition with any person* who either grants or knowingly receives the benefit of such discrimination, or the customers of either of them[.]

15 U.S.C. § 13(a) (emphasis added).

[4] Other courts have made similar errors. *See, e.g.,* Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266, 272 (5th Cir. 1979) (limiting standing under § 2(c) to violator's competitors); Hansel 'N Gretel Brand v. Savitsky, 1997 U.S. Dist. LEXIS 13324, No. 94 Civ. 4027(CSH), 1997 WL 543088, at *9 (S.D.N.Y. Sept. 3, 1997) (importing competitive injury requirement of § 2(a) to § 2(c) claim); Bunker Ramo Corp. v. Cywan, 511 F. Supp. 531, 533 (N.D. Ill. 1981) (requiring proof of competitive injury in § 2(c) claim).

argument that proof of a *per se* violation obviated requirement that private litigant prove antitrust injury). Antitrust injury and competitive injury are conceptually distinct. *See generally* Hovenkamp, **[**18]** Chap. 23D-1, P 2371(b) (discussing distinctions at length); *see also* J. Truett Payne, 451 U.S. 557 at 561 at 561-62, 68 L. Ed. 2d 442 (explaining some distinctions between § 2(a)'s competitive injury requirement and § 4's antitrust injury requirement); *In* Town Hotels Ltd. P'ship, 246 F. Supp. 2d at 474-81 (S.D. W. Va. 2003) (discussing distinction between types of injury in case involving similar facts). While competitive injury concerns the potential effect certain conduct may have on "competition generally" or "on the business opportunities of a defined class of competitors," Schwartz v. Sun Co., Inc. (R & M), 276 F.3d 900, 904 (6th Cir. 2002), the focus of "antitrust injury" is on whether the challenged conduct has actually caused harm to the plaintiff, J. Truett Payne, 451 U.S. 557 at 561 at 561-62, 68 L. Ed. 2d 442.

HN9[] To establish antitrust injury, a private litigant must "prove . . .'injur[y] in its business or property' by reason of the violation . . . [and that] the violation was at least a material cause of the plaintiff's injury." Bohack Corp. v. Iowa Beef Processors, Inc., 715 F.2d 703, 710-11 (2d Cir. 1985). **[**19]** In other words, a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the statute. Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977); *see* Hovenkamp, P 2362, at 234-35. With respect to the latter requirement, the Supreme Court has held that

> [a] private plaintiff may not recover damages under § 4 of the Clayton Act merely by showing "injury causally linked to an illegal presence in the market." Instead, a plaintiff must prove the existence of "antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful."

Atlantic Richfield Co., 495 U.S. at 334 (quoting Brunswick Corp. 429 U.S. at 489 (internal citations omitted)); *see also* J. Truett Payne, 451 U.S. at 562. (holding that to have standing to bring a § 2(a) Robinson-Patman claim, a private plaintiff "must make some showing of actual injury attributable to something the antitrust laws were designed to prevent."). This **[**20]** requirement applies to all private actions filed under § 4, "regardless of the type of antitrust claim involved," Atlantic Richfield Co., 495 U.S. at 340, or whether the challenged conduct constitutes a *per se* violation, id. at 341-42.

In the instant case, the Blue Tree Owners assert that their complaint pleads the necessary antitrust injury based on their allegations that the Hotels compete with Starwood's hotels under the Westin and other brand names and that, as a result of the vendor payments, Starwood is a "dishonest competitor." They further allege that the vendor payments preclude the Blue Tree Owners from negotiating advantageous prices and terms with vendors who do not make such payments, and that **[*221]** they increase the cost of goods to the Blue Tree Owners while reducing the cost of the same goods for Starwood, resulting in an anti-competitive advantage for Starwood. We need not - and do not - decide whether these specific allegations would qualify as an antitrust injury as required by § 4 of the Clayton Act because, as we explain below, we conclude that plaintiffs have failed to state a claim for a substantive violation of § 2(c).

IV. **[**21]** *Robinson-Patman Violations*

Courts and commentators are in agreement **HN10**[] that § 2(c) was enacted primarily to target the practice of "dummy brokerages" whereby large retail buying groups - such as large grocery store chains, which, unlike smaller stores, did not need to use intermediary brokers to purchase their merchandise - would require suppliers to pay fees to "dummy brokers," who then passed the fees on to the large retailer, effectively reducing the price the retailer paid for the goods. *See*, *e.g.*, Henry Broch & Co., 363 U.S. at 168-69; Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988, 992 (4th Cir. 1990); Biddle, 96 F.2d at 690-92; Hovenkamp, P 2362, at 217-18.

Some courts, applying § 2(c) to circumstances far removed from the paradigmatic "dummy brokerage" scheme, have held that § 2(c) also proscribes commercial bribery. *See, e.g.,* Environmental Tectonics v. W.S. Kirkpatrick, Inc., 847 F.2d 1052, 1066; Grace v. E. J. Kozin Co.,538 F.2d 170, 173; Rangen, Inc. v. Sterling Nelson & Sons, Inc.,351 F.2d 851, 858; Fitch v. Kentucky-Tennessee Light & Power, 136 F.2d 12 (6th Cir. 1943). *But see* Seaboard Supply Co. v. Congoleum Corp., 770 F.2d 367, 372 (3d Cir. 1985) **[**22]** ("There is good reason to question whether Congress intended to sweep commercial bribery within the ambit of section 2(c).").

The Second Circuit has never reached the question of whether - and under what circumstances - commercial bribery can form the basis of a claim under § 2(c). And we find that we need not decide the issue here. Even assuming that a § 2(c) claim could be based on commercial bribery, a necessary requirement for stating such a claim would be allegations sufficient to establish commercial bribery. *See, e.g.*, Excel Handbag Co. v. Edison Bros. Stores, Inc., 630 F.2d 379, 387-88 (5th Cir. 1980) (holding that a § 2(c) claim based on commercial bribery requires proof of commercial bribery). We conclude that the allegations in the Blue Tree Owners' complaint fail to meet this threshold requirement.

A. *Plaintiffs' Allegations of Commercial Bribery*

The Blue Tree Owners allege that Starwood and its vendors entered into purchase agreements pursuant to which the vendors would pay "allowances, bonuses, charges, commissions, credits, discounts, fees, incentives, profits, rebates, and/or kickbacks" to Starwood. Based on these allegations, **[**23]** the Blue Tree Owners contend that Starwood and its vendors engaged in a "Kickback Scheme" that constituted commercial bribery. This claim, however, is premised entirely on the tautology created by the fact that the Blue Tree Owners have labeled the payments made by vendors "Kickbacks": because the vendors pay kickbacks to Starwood, they are engaged in commercial bribery, and because the parties are engaged in commercial bribery, the payments made by vendors are kickbacks. Substituting the Blue Tree Owners' repeated use in their complaint of the freighted word "Kickback" with the more benign "vendor payment" reveals that the Blue Tree Owners have not alleged any improper intent or conduct on the part of the vendors who made the payments to Starwood.

[*222] To be sure, Starwood's failure to turn vendor payments over to the Blue Tree Owners may constitute a breach of its fiduciary duties under the Management Agreements, an issue as to which we express no view. But ***HN11***[] commercial bribery cannot be committed unilaterally by an alleged bribe receiver: one cannot be guilty of receiving a commercial bribe unless someone else is guilty of paying it. In New York, for instance, commercial bribery is defined **[**24]** as "confer[ring], or offer[ing] or agree[ing] to confer, any benefit upon any employee, agent or fiduciary without the consent of the latter's employer or principal, with intent to influence his conduct in relation to his employer's or principal's affairs." [5] N.Y. Penal L. § 180.00. As New York Judge William Donnino has explained in his commentary to this statute, "the essence of bribery, as defined in this article, is in the 'intent' to influence improperly the conduct of another by bestowing a benefit, and the essence of bribe receiving is in the 'agreement or understanding' that the recipient's conduct will be influenced by the benefit." William C. Donnino, Practice Commentary, appended to N.Y. Penal L. § 180.00 (McKinney's 1998).

[25]** In the absence of any allegations that the vendor payments were, in fact, bribes - that is, that they were paid by the vendors with the intent to improperly influence or corrupt Starwood's conduct on behalf of the Blue Tree Owners - Starwood's alleged breach of its fiduciary duties is insufficient to establish commercial bribery. No such allegations appear in the Blue Tree Owners' complaint, however.

---

[5] Bribe receiving is similarly defined:

> ***HN12***[] An employee, agent or fiduciary is guilty of commercial bribe receiving in the second degree when, without the consent of his employer or principal, he solicits, accepts or agrees to accept any benefit from another person upon an agreement or understanding that such benefit will influence his conduct in relation to his employer's or principal's affairs.

N.Y. Penal L. 180.03.

Improper intent on the part of the vendors might be inferred from the Blue Tree Owners' allegation that vendors who were unwilling or unable to make the vendor payments were precluded from competing for the Hotels' business and, as a result, the Blue Tree Owners were unable to negotiate advantageous prices and terms with such vendors. But such an inference is belied by the letters attached to the Blue Tree Owners' complaint in which the Blue Tree Owners objected to the manner in which Starwood was allocating vendor payments. These letters contain no assertion that vendor payments are illegal or made pursuant to illicit agreements between Starwood and the vendors to act contrary to the Blue Tree Owners' interests. Rather, they demonstrate that as of December 1998, if not earlier, the **[**26]** Blue Tree Owners were aware that Starwood was receiving vendor payments as a result of its volume purchasing power.

Because the Blue Tree Owners' complaint does not allege that the vendor payments themselves were improper, the Blue Tree Owners have failed to allege facts constituting commercial bribery. *Compare* *Excel Handbag Co., 630 F.2d at 386-87* (holding that evidence did not establish commercial bribery because there was no "proof of inducement"); *United Magazine Co. v. Murdoch Magazines Distrib., Inc., 146 F. Supp. 2d 385, 397 (S.D.N.Y. 2001)* (holding that allegation that discounts or payments passed from one business to another does not implicate bribery) *with* *Envtl. Tectonics, 847 F.2d at 1054, 1066* (finding bribery based on payments to government official to induce award of government **[*223]** contract); *Rangen, 351 F.2d at 854-55 (9th Cir. 1965)* (payments to state agent to maintain exclusive sales contract were bribes); *Fitch, 136 F.2d at 13-14* (finding bribery based on payments to company's president to induce him to enter contract with vendor); *Hansel 'N Gretel Brand, 1997 U.S. Dist. LEXIS 13324, 1997 WL 543088, at *1, *7* **[**27]** (finding commercial bribery scheme based on allegations that vendors overcharged principal and returned excess profits to principal's agent); *Federal Paper Bd. Co. v. Amata, 693 F. Supp. 1376, 1380* (agent purchased only from vendors who agreed to pay bribes, and bribes were incorporated into principal's prices); *Gregoris Motors v. Nissan Motor Corp., 630 F. Supp. 902, 905-06, 909* (payment of kickbacks to agent in order to induce him to accept falsified sales reports constituted bribery); *Bunker Ramo Corp., 511 F. Supp. at 533* (finding bribery established where purchasing agent accepted payments in exchange for processing false invoices for goods never received by agent's principal).

B. *Other Types of Robinson-Patman Violations*

Of course, commercial bribery does not exhaust the factual scenarios that might state a claim based on a *§ 2(c)* violation. [6] Nevertheless, we find that the Blue Tree Owners' failure to allege improper conduct by the vendors is equally fatal to any *§ 2(c)* claim that might be brought on grounds other than commercial bribery.

[28]** As we have explained above, the Blue Tree Owners do not contend that the vendor payments themselves were improper. Indeed, the gravamen of their complaint is not that the vendors are making these payments, but that Starwood is retaining them in breach of its fiduciary obligations. The Blue Tree Owners concede as much in their reply brief on appeal, where they state:

> The monies at issue are rebates to the Owners who are entitled to them but become kickbacks to the Managers [Starwood], when they retain that which belongs to their principals. In other words, the kickbacks are illegal in the hands of the Managers but are legal rebates in the hands of the Owners.

Appellants' Reply Br. at 25.

HN13[] The *sine qua non* of a *§ 2(c)* violation, however, is an improper payment, *i.e.*, a payment of a commission, brokerage, or discount other than for services actually rendered. *See* *Intimate Bookshop, Inc. v. Barnes & Noble, Inc., 88 F. Supp. 2d 133, 140 (S.D.N.Y. 2000)* ("The fact that a direct payment or indirect discount passes from one party to another party does not compel the conclusion that the payment or discount violates *Section 2(c)*.") (citing **[**29]** *Henry Broch & Co., 363 U.S. at 175*). If, as plaintiffs concede, the vendor payments themselves did not violate *§ 2(c)*, [7] then they cannot be transformed into a *§ 2(c)* violation simply because Starwood, an agent of

[6] Indeed, as we have observed, it remains an open question in this circuit whether commercial bribery can even form the basis of a *§ 2(c)* claim.

the Blue Tree Owners, retained the payments. [8] **[**30]** See ***[*224]*** *Fitch, 136 F.2d at 15*. Indeed, for purposes of *§ 2(c)*, it is irrelevant whether an improper payment that is given to a purchaser's agent is kept by the agent for personal gain rather than transferred to the purchaser. *See id.* In light of the Blue Tree Owners' affirmative statement that the payments at issue here were proper, [9] their complaint fails to state a claim and, thus, was properly dismissed.

[31]** CONCLUSION

For the foregoing reasons, we affirm the judgment of the district court dismissing the Blue Tree Owners' complaint.

End of Document

---

[7] We express no view as to whether the facts contained in plaintiffs' complaint could support a substantive violation of *§ 2(c)* in circumstances where a plaintiff alleges that the payments at issue are themselves improper.

[8] Indeed, it is unclear whether Starwood's status as an agent of the Blue Tree Owners is even relevant to the *§ 2(c)* analysis. *Section 2(c)*'s proscription on payments to agents applies only to "an agent . . . of any [other] party to [the] transaction." *15 U.S.C. § 13(c)*. The plaintiffs have not alleged that they are parties to the transactions that give rise to the vendor payments. In fact, in their complaint they concede that they have "no involvement in the negotiation and execution of [the] purchasing contracts." Compl. P 25. If in fact Starwood, rather than the Blue Tree Owners, is the "other party to the transaction," then the Blue Tree Owners' *§ 2(c)* claim is even more tenuous because they are neither parties to the transaction nor competing purchasers.

[9] We note that even if the Blue Tree Owners had not expressly conceded the propriety of the vendor payments, it is unlikely that this pleading deficiency could be cured by amending the complaint: Any assertion in an amended complaint that the vendor payments themselves were improper would negate the claim that the Blue Tree Owners, not Starwood, were the rightful recipients of the vendor payments. As we have stated, the proscriptions of *§ 2(c)* apply regardless of whether the improper payment is made to the purchaser or its agent. *See* *15 U.S.C. § 13(c)*. "It shall be unlawful for any person . . . to pay . . . anything of value . . . *either* to the other party to such transaction or [that party's] agent . . . .") (emphasis added); *see* *Biddle, 96 F.2d at 691* ("Congress must have intended that payments by sellers should not be made to buyers through any one acting as agent for the buyer. . . . It may not be said that payments to buyers are in any different category than those to agents or those who act for or under the control of the buyers."); *see also* *Fitch, 136 F.2d at 13*. Thus, the illegality of the vendor payments would not be cured by simply handing them over to the Blue Tree Owners, who have not alleged that *they* render any services to the vendors. Rather, a transfer of the payments from Starwood to the Blue Tree Owners would simply result in the precise "evil" Congress sought to curb: the practice of vendors paying fees to a "dummy broker" - *i.e.*, a buyer's agent - who, in turn, passes the fees over to the buyer. *See* *Henry Broch & Co., 363 U.S. at 168-69*; *Stephen Jay Photography, 903 F.2d at 992* (observing that *§ 2(c)* was directed primarily to the practice whereby "a large buyer with economic clout might insist that in order to do business sellers must pay a fee to a designated 'broker' . . . [who] would then turn the money over to the large buyer").

Insurance Law > Industry Practices > Unfair Business Practices > General Overview

HN1[] **Regulated Practices, Trade Practices & Unfair Competition**

The Unfair Insurance Practices Act, *Cal. Ins. Code, § 790 et seq.*, does not create a private cause of action against insurers who violate its provisions. This rule applies to both first party and third party claims. While insurance companies are subject to California laws generally applicable to other businesses, including laws governing unfair business practices, *Cal. Ins. Code, § 1861.03(a)*, parties cannot plead around Moradi-Shalal's holding by merely relabeling their cause of action as one for unfair competition.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Insurance Law > Industry Practices > Unfair Business Practices > General Overview

HN2[] **Regulated Practices, Trade Practices & Unfair Competition**

Merely alleging that certain acts constitute unfair business practices under the unfair competition law is insufficient to overcome Moradi-Shalal.

Business & Corporate Compliance > ... > Industry Practices > Unfair Business Practices > Private Causes of Action

Insurance Law > Industry Practices > Unfair Business Practices > General Overview

HN3[] **Unfair Business Practices, Private Causes of Action**

The California Legislature did not intend to create new causes of action when it described unlawful insurance business practices in *Cal. Ins. Code § 790.03*, and therefore that section did not create a private cause of action under the Unfair Insurance Practices Act, *Cal. Ins. Code, § 790 et seq.*

Insurance Law > Industry Practices > Unfair Business Practices > General Overview

HN4[] **Industry Practices, Unfair Business Practices**

Given the supreme court's disapproval of State Farm's amorphous definition of unfair practices and its focus on legislatively declared public policy, reliance on general common law principles to support a cause of action for unfair competition is unavailing.

Civil Procedure > ... > Jury Trials > Verdicts > General Verdicts

Civil Procedure > ... > Jury Trials > Verdicts > General Overview

Civil Procedure > ... > Jury Trials > Verdicts > Special Verdicts

HN5[] **Verdicts, General Verdicts**

The distinction between a general and special verdict is that under the former a jury pronounces generally upon all or any of the issues, while the latter is one by which the jury find the facts only, leaving the judgment to the court.

Cal Code Civ. Proc. § 624. In a case where a special finding of facts is inconsistent with the general verdict, the former controls the latter, and the court must give judgment accordingly. Cal Code Civ. Proc. § 625.

HN7[] **Liability & Performance Standards, Bad Faith & Extracontractual Liability**

Brandt holds that attorney fees reasonably incurred to compel payment of policy benefits tortiously withheld by an insurer are recoverable as an element of damages. When an insurer's tortious conduct reasonably compels the insured to retain an attorney to obtain the benefits due under a policy, it follows that the insurer should be liable in a tort action for that expense. The attorney's fees are an economic loss - damages - proximately caused by the tort.

HN9[] **Costs & Attorney Fees, Costs**

Cal. Code Civ. Proc. § 1032 defines prevailing party to include a defendant in whose favor a dismissal is entered, a defendant where neither plaintiff nor defendant obtains any relief, and a defendant as against those plaintiffs who do not recover any relief against that defendant. In situations other than as specified, a prevailing party shall be as determined by a court, and under those circumstances, a court, in its discretion, may allow costs or not and, if allowed may apportion costs between the parties on the same or adverse sides. Cal. Code Civ. Proc. § 1032(a)(4). Cases applying this statute hold that where one of multiple, jointly-represented defendants presenting a unified defense prevails in an action, the trial court has discretion to award or deny costs to that party.

Torts > Procedural Matters > Multiple Defendants > Distinct & Divisible Harms

HN12[] Evidence, Burdens of Proof

Consistent with the general rule imposing on a party the burden of proving the existence or nonexistence of each fact essential to a claim or defense Cal. Evid. Code § 500, a defendant seeking an offset against a money judgment has the burden of proving the offset.

Contracts Law > Third Parties > Subrogation

Insurance Law > Claim, Contract & Practice Issues > Subrogation > General Overview

HN13[] Third Parties, Subrogation

With respect to a plaintiff's contractual recovery, an insured is entitled to receive compensation in accordance with the policy terms, and an insurer cannot reduce the amount recoverable merely because the insured has collateral contracts or relations with third persons which relieve him wholly or partly from the loss against which the insurance company agreed to indemnify him. An insurer's right to recoup payment of policy benefits is covered by the principle of subrogation. To qualify for subrogation, the insurer must pay the insured's loss.

Torts > Procedural Matters > Multiple Defendants > Joint & Several Liability

HN14[] **Multiple Defendants, Joint & Several Liability**

A party cannot obtain double recovery for the same wrong where joint or concurrent tortfeasors are jointly and severally liable for the same wrong. It has long been recognized that if one tortfeasor pays partial compensation to the plaintiff, the liability of other tortfeasors will be correspondingly reduced: payments by one tortfeasor on account of a harm for which he and another are each liable, diminish the amount of the claim against the other whether or not it was so agreed at the time of payment and whether the payment was made before or after judgment. Since the plaintiff can have but one satisfaction, evidence of such payments is admissible for the purpose of reducing pro tanto the amount of the damages he may be entitled to recover.

Torts > ... > Multiple Defendants > Concerted Action > General Overview

Torts > Procedural Matters > Multiple Defendants > Joint & Several Liability

HN15[] **Multiple Defendants, Concerted Action**

Where tortious acts by separate persons produce the same indivisible injury, each person is liable for the whole loss even if they did not act in concert.

Torts > ... > Employers > Activities & Conditions > General Overview

HN19[] Management Duties & Liabilities, Causes of Action

In amending Cal. Civ. Code § 3294, the California Legislature intended to limit corporate punitive damage liability to those employees who exercise substantial independent authority and judgment over decisions that ultimately determine corporate policy. Cal. Civ. Code § 3294(b), places "managing agent" next to the terms "officer" and "director," intending that a managing agent be more than a mere supervisory employee. The managing agent must be someone who exercises substantial discretionary authority over decisions that ultimately determine corporate policy. Thus, by selecting the term "managing agent," and placing it in the same category as "officer" and "director," the legislature intended to limit the class of employees whose exercise of discretion could result in a corporate employer's liability for punitive damages. The critical factor is the degree of discretion the employees possess in making decisions that will ultimately determine corporate policy.

***HN20*[] Damages, Punitive Damages**

While the United States Supreme Court recognizes the broad discretion possessed by the states with respect to the imposition of punitive damages. The federal Constitution's due process clause requires that a party potentially subject to such an award receive adequate notice of both the conduct that would support it and the severity of the penalty which could be imposed. Thus, the federal due process prohibits the States from imposing grossly excessive punishments on tortfeasors.

Torts > ... > Punitive Damages > Measurement of Damages > Determinative Factors

Torts > ... > Types of Damages > Punitive Damages > Aggravating Circumstances

***HN21*[] Damages, Punitive Damages**

In determining if a punitive damage award in a particular case is grossly disproportional to the gravity of defendants' offenses, a reviewing court must conduct a thorough, independent review of the award, considering three guideposts: (1) the degree of reprehensibility of the defendant's misconduct; (2) the disparity between the actual or potential harm suffered and the punitive damages award; and (3) the difference between the punitive damages awarded by the jury and the civil penalties authorized or imposed in comparable cases. The first guidepost, described as the most important indicium of the reasonableness of a punitive damage award, requires an appellate court to consider several factors. They include whether: the harm caused was physical as opposed to economic; the tortious conduct evinced an indifference to or a reckless disregard of the health or safety of others; the target of the conduct had financial vulnerability; the conduct involved repeated actions or was an isolated incident; and the harm was the result of intentional malice, trickery, or deceit, or mere accident.

Torts > Vicarious Liability > Employers > General Overview

HN22[] **Damages, Punitive Damages**

Imposing punitive damages on a corporate entity under the respondeat superior doctrine based on its agent's fraudulent conduct does not violate the federal Constitution's due process clause.

Civil Procedure > Remedies > Damages > Punitive Damages

Torts > ... > Types of Damages > Punitive Damages > Aggravating Circumstances

Torts > ... > Types of Damages > Punitive Damages > General Overview

HN23[] **Damages, Punitive Damages**

Due process does not permit courts, in the calculation of punitive damages, to adjudicate the merits of other parties' hypothetical claims against the defendant under the guise of reprehensibility analysis.

Civil Procedure > Remedies > Damages > Punitive Damages

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Torts > ... > Punitive Damages > Measurement of Damages > Constitutional Requirements

Civil Procedure > Remedies > Damages > General Overview

Torts > ... > Types of Damages > Punitive Damages > General Overview

Torts > ... > Punitive Damages > Measurement of Damages > General Overview

HN24[] **Damages, Punitive Damages**

The second guidepost used in determining if a punitive damage award in a particular case is grossly disproportional to the gravity of defendants' offenses focuses on the disparity between the actual or potential harm suffered by the plaintiff and the punitive damages award. The United States Supreme Court has reiterated its reluctance to identify concrete constitutional limits on the ratio between compensatory and punitive damages, declaring the precise award in any case must be based upon the facts and circumstances of the defendant's conduct and the harm to plaintiff. Nonetheless, the court identified certain guidelines to apply in determining whether the punitive damage award is reasonable and proportionate to the harm suffered by the plaintiff. Citing centuries of legislative history providing for sanctions of double, treble, or quadruple damages to deter and punish, the United States Supreme court has noted that jurisprudence and the principles it has now established demonstrate, however, that, in practice, few awards exceeding a single-digit ratio between punitive and compensatory damages, to a significant degree, will satisfy due process.

Civil Procedure > Remedies > Damages > Punitive Damages

Torts > ... > Types of Damages > Compensatory Damages > General Overview

Torts > ... > Types of Damages > Punitive Damages > General Overview

Torts > ... > Punitive Damages > Measurement of Damages > General Overview

HN25[] **Damages, Punitive Damages**

In the usual case, i.e., a case in which the compensatory damages are neither exceptionally high nor low, and in which a defendant's conduct is neither exceptionally extreme nor trivial, the outer constitutional limit on the amount of punitive damages is approximately four times the amount of compensatory damages.

Civil Procedure > Remedies > Damages > Punitive Damages

Contracts Law > ... > Damages > Types of Damages > Punitive Damages

Torts > ... > Types of Damages > Compensatory Damages > General Overview

Torts > ... > Types of Damages > Punitive Damages > General Overview

HN27[] **Damages, Punitive Damages**

Cal. Civ. Code § 3294 allows the recovery of punitive damages in any action for the breach of an obligation not arising from contract, where it is proven the defendant has been guilty of oppression, fraud, or malice. A consideration of the disparity between compensatory and punitive damage awards must focus on the compensatory damages awarded on only the causes of action providing a basis for punitive damages.

Civil Procedure > Remedies > Damages > Punitive Damages

Criminal Law & Procedure > Sentencing > Fines

Torts > ... > Types of Damages > Punitive Damages > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN28[] **Damages, Punitive Damages**

The third guidepost used in determining if a punitive damage award in a particular case is grossly disproportional to the gravity of defendants' offenses concerns the difference between the punitive damages awarded by the jury and the civil penalties authorized or imposed in comparable cases.

Civil Procedure > Remedies > Damages > Punitive Damages

Torts > ... > Types of Damages > Punitive Damages > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN29[] **Damages, Punitive Damages**

While the existence of a criminal penalty does have bearing on the seriousness with which a State views the wrongful action, when a criminal penalty is used to determine the dollar amount of the award, it has less utility. Great care must be taken to avoid use of the civil process to assess criminal penalties that can be imposed only after the heightened protections of a criminal trial have been observed, including, of course, its higher standards of proof. Punitive damages are not a substitute for the criminal process, and the remote possibility of a criminal sanction does not automatically sustain a punitive damages award.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

HN33[] **Affirmative Defenses, Unclean Hands**

The misconduct that brings the unclean hands doctrine into play must relate directly to the cause at issue. Past improper conduct or prior misconduct that only indirectly affects the problem before the court does not suffice. The determination of the unclean hands defense cannot be distorted into a proceeding to try the general morals of the parties.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A financial corporation sued a fire insurance company, the insurance company's claims adjuster, its managing agent, and an independent insurance brokerage firm for breach of contract, breach of the implied covenant of good faith and fair dealing, and fraud arising from the insurance company's refusal to honor a claim for insurance benefits concerning property damage to a commercial bus in which the financial corporation held a security interest. The financial corporation also sought injunctive and restitutionary relief under *Bus. & Prof. Code, § 17200 et seq.*, against the insurance company and its claims adjuster for engaging in unfair business practices, although the trial court sustained the insurance company's demurrers to this cause of action without leave to amend. The trial court entered judgment for the claims adjuster on the financial corporation's fraud claim. With respect to the remaining causes of action, the jury returned a verdict awarding the financial corporation $ 165,414.40 in compensatory damages and $ 10 million in punitive damages; however, in postjudgment proceedings, the trial court remitted the punitive damages award to $ 1.7 million. (Superior Court of Orange County, No. 734096, Nancy Wieben Stock and Raymond J. Ikola, Judges.) The Court of Appeal affirmed the judgment and trial court's postjudgment orders in their entirety. The United States Supreme Court granted the insurance company's petition for a writ of certiorari, vacated the judgment of the Court of Appeal, and remanded the case to the Court of Appeal for further consideration. The Court of Appeal issued a second opinion, again affirming the judgment and postjudgment orders in their entirety. The insurance company again petitioned for a writ of certiorari. The United States Supreme Court granted the petition, vacated the second opinion of the Court of Appeal, and remanded to the Court of Appeal for further consideration.

The Court of Appeal affirmed the trial court's orders denying the insurance company's motion for judgment notwithstanding the verdict, awarding costs to the claims adjuster, and denying the financial corporation recovery of its expert witness fees; reversed the trial court's order remitting the punitive **[*1062]** damages award to $ 1.7 million; affirmed the portions of the judgment in favor of the claims adjuster and awarding the financial corporation compensatory damages; and modified the portion of the judgment awarding the financial corporation punitive damages by reducing the award to $ 360,000. The court held the financial corporation failed to state a cause of action against the insurance company and the claims adjuster for unfair business practices. The trial court properly entered judgment for the claims adjuster on the fraud claim. The absence of an intent to defraud on the part of the claims adjuster defeated the financial corporation's fraud claim against the claims adjuster. With respect to recovery of attorney fees, the trial court properly limited the financial corporation's damage award to the percentage specified in the contingency agreement between the financial corporation and its legal counsel. The trial court also properly denied recovery of expert witness fees to the financial corporation under *Code Civ. Proc., § 998*, as the claims adjuster was deemed the prevailing party. The record supported the trial court's denial of the insurance company's request to have settlement amounts the financial corporation received from the insurance company's managing agent and the brokerage firm offset against the damages the financial corporation recovered from the insurance company. With respect to punitive damages, the insurance company, through its managing agent, engaged in reprehensible conduct supporting an award of punitive damages under the due process clause of the United States Constitution. However, the amount of the punitive damage award, even as reduced by the trial court, was excessive. Finally, pursuant to *Code Civ. Proc, § 908*, the insurance company was entitled to recover interest on the constitutionally excessive portion of the punitive damage award from the date of the insurance company's payment of the judgment. (Opinion by Rylaarsdam, J., with Sills, P. J., and O'Leary, J., concurring.)

Headnotes

CA(1)[] **(1)**

Insurance Companies § 12—Unfair Insurance Practices Act—Private Cause of Action Against Insurers Not Created.

The Unfair Insurance Practices Act, *Ins. Code, § 790 et seq.*, does not create a private cause of action against insurers who violate its provisions. This rule applies to both first party and third party claims. While insurance companies are subject to state laws generally applicable to other businesses, including laws governing unfair business practices (*Ins. Code, § 1861.03, subd. (a)*), parties cannot plead around this rule by merely relabeling their cause of action as one for unfair competition.

CA(2)[] **(2)**

Insurance Companies § 12—Unfair Insurance Practices Act—Private Cause of Action Against Insurers Not Created.

Merely **[*1063]** alleging that an insurer's purported acts constitute unfair business practices under the unfair competition law is insufficient to overcome the rule that the Unfair Insurance Practices Act, *Ins. Code, § 790 et seq.*, does not create a private cause of action against insurers who violate its provisions.

CA(3)[] **(3)**

Fraud and Deceit § 10—Knowledge—Scienter.

A representation made recklessly without knowledge of its falsity is sufficient to establish scienter.

CA(4)[] **(4)**

Fraud and Deceit § 11—Intent.

An intent to induce reliance on a misrepresentation or nondisclosure by the plaintiff is essential to establish liability for either an intentional misrepresentation or concealment of a material fact. The absence of this element defeated a financial corporation's fraud claim against an insurance company's claims adjuster, which made representations recklessly but without knowing the statements were false.

CA(5)[] **(5)**

Costs § 13—Attorney Fees—Payment of Policy Benefits Tortiously Withheld by Insurer—Recoverable as Element of Damages.

Attorney fees reasonably incurred to compel payment of policy benefits tortiously withheld by an insurer are recoverable as an element of damages.

CA(6)[] **(6)**

Costs § 6—Award—Multiple, Jointly Represented Parties—Discretion of Trial Court to Award or Deny Costs.

Under *Code Civ. Proc., § 1032, subd. (a)(4)*, where one of multiple, jointly represented defendants presenting a unified defense prevails in an action, the trial court has discretion to award or deny costs to that party.

CA(7)[] **(7)**

Costs § 33—Attorney Fees—Postjudgment Fees, Appeal, and Review—Postjudgment Fees—Award of Expert Witness Fees to Prevailing Party.

Code Civ. Proc., § 998, subd. (d), authorizes the court to award a prevailing plaintiff its expert witness fees if the plaintiff made timely pretrial offer to compromise which the defendant does not accept, and the defendant fails to obtain a more favorable judgment.

CA(8)[] **(8)**

Damages § 3—Compensatory Damages—Offset—Burden of Proving.

Consistent with the general rule imposing on a party the burden of proving the existence or nonexistence of each fact essential to a claim or defense (*Evid. Code, § 500*), a defendant seeking an offset against a money judgment has the burden of proving the offset.

CA(9)[] **(9)**

Insurance Contracts and Coverage § 121—Subrogation.

An insured is entitled to receive compensation in accordance with the policy terms, **[*1064]** and an insurer cannot reduce the amount recoverable merely because the insured has collateral contracts or relations with third persons which relieve the insured wholly or partly from the loss against which the insurance company agreed to indemnify the insured. An insurer's right to recoup payment of policy benefits is covered by the principle of subrogation. To qualify for subrogation, the insurer must pay the insured's loss.

CA(10)[] **(10)**

Torts § 9—Persons Liable—Joint and Several Tortfeasors—Double Recovery.

Generally, a party cannot obtain double recovery for the same wrong where joint or concurrent tortfeasors are jointly and severally liable for the same wrong.

CA(11)[] **(11)**

Torts § 9—Persons Liable—Joint and Several Tortfeasors.

Where tortious acts by separate persons produce the same indivisible injury, each person is liable for the whole loss even if they did not act in concert. Thus, where a financial corporation sued an insurance company for breach of contract, breach of the implied covenant of good faith and fair dealing, and fraud after the insurance company refused to honor a claim for insurance benefits concerning property damage to a commercial bus in which the financial corporation held a security interest, but only sought damages against other defendants for negligence, the injury the financial corporation suffered was the same.

CA(12)[] **(12)**

Damages § 11—Compensatory Damages—Attorney Fees—Burden of Proof.

Generally, a party seeking to recover litigation costs under the rule that a person who through the tort of another has been required to act in the protection of his or her interests to bring or defend an action against a third person is entitled to recover compensation for the reasonably necessary loss of time, attorney's fees, and other expenditures thereby suffered or incurred must plead and prove the claim.

CA(13)[] **(13)**

Damages § 22.2—Punitive Damages—Availability—Insurance Company's Managing Agent.

An agency agreement between an insurance company and its managing agent and other evidence supported a jury's conclusion the managing agent was the insurance company's agent, thereby subjecting the managing agent to punitive damages under *Civ. Code, § 3294*, where the managing agent had broad discretion over the insurance company's bus insurance program; the managing agent could solicit, bind, write, and administer insurance policies, and could exercise its independent judgment as to the time, place, and manner of soliciting insurance and servicing policyholders; the insurance company's claims adjuster directed its employees to contact the managing agent when seeking coverage verification; the managing agent participated in issuing a policy to the insured, in subsequently canceling it, and then reinstating **[*1065]** a modified version of it; the managing agent initially issued a coverage determination when the insured submitted a claim, but then prepared an endorsement deleting the vehicle from the policy and advised the claims adjuster to deny the claim; and the managing agent's president was in contact with both the claims adjuster and the senior management of the insurance company division handling the bus insurance program when a claim was being considered, and participated in the ultimate decision to deny it.

Stephan, Oringher, Richman & Theodora and Robert M. Dato for Plaintiff and Appellant.

Judges: Rylaarsdam, J., with Sills, P. J., and O'Leary, J., concurring.

Opinion by: RYLAARSDAM

Opinion

[590] RYLAARSDAM, J.**—This is our third review of the present case. Plaintiff Textron Financial Corporation sued defendant National Union Fire Insurance Company of Pittsburgh, Pennsylvania and others for breach of contract, breach of the implied covenant of good faith and fair dealing, and fraud arising from defendant's refusal to honor a claim for insurance benefits concerning property damage to a commercial bus in which plaintiff held a security interest. The jury returned a verdict awarding plaintiff $ 165,414.40 in compensatory damages and $ 10 million in punitive damages, but in postjudgment proceedings the trial court remitted the latter award to $ 1.7 million.

[*2]** Both plaintiff and defendant appealed. In a January 2001 unpublished opinion, we affirmed the judgment and postjudgment orders in their entirety. Our first opinion rejected plaintiff's attacks on a pretrial order striking a cause of action for unfair business practices, the portion of the judgment in favor of defendant's claims adjuster, the amount of compensatory damages awarded on the insurance bad faith claim, plus the postjudgment orders awarding **[**591]** costs to the claims adjuster and denying its request for expert witness fees. We also rejected defendant's attack on the trial court's refusal to offset the sums plaintiff received in pretrial settlements, and both parties' objections to the punitive damage award.

The United States Supreme Court granted defendant's petition for a writ of certiorari, vacated our judgment, and remanded the case to us for further consideration in light of *Cooper Industries, Inc. v. Leatherman Tool Group, Inc. (2001) 532 U.S. 424 [149 L. Ed. 2d 674, 121 S. Ct. 1678]*. After reviewing the matter in accordance with the United States Supreme Court's direction, **[*1067]** we issued a second opinion in June 2002, again affirming the judgment and postjudgment **[***3]** orders in their entirety. Defendant again petitioned the United States Supreme Court for a writ of certiorari. The Supreme Court granted the petition, vacated our second opinion, and remanded the case to this court for further consideration in light of *State Farm Mut. Auto. Ins. Co. v. Campbell (2003) 538 U.S. 408 [155 L. Ed. 2d 585, 123 S. Ct. 1513]*.

Except for the issues raised concerning the punitive damage award, we again affirm the trial court's rulings and judgment. For the reasons expressed below, we now conclude, based on the facts of this case, that plaintiff's recovery of punitive damages, in relation to the amount of compensatory damages awarded on the insurance bad faith and fraud claims and the nature of those damages, must be reduced. Consequently, we shall reverse the order remitting the amount of punitive damages and modify the judgment to award plaintiff punitive damages of $ 360,000.

FACTS

Il Sung Ko operated a tour bus company, Taeguk Tour and Sightseeing (Taeguk). Plaintiff loaned Ko funds to purchase a bus, receiving in return a security interest in the vehicle. The security agreement required Ko to insure the bus. Ko obtained a National **[***4]** Union liability insurance policy through D.W. Ferguson & Associates, Inc. (Ferguson), an independent insurance brokerage. The policy was issued through TRM International, Inc. (TRM), a company appointed by defendant to solicit, bind, write, and administer policies for its commercial bus program. The policy listed plaintiff as a loss payee and required defendant to mail plaintiff notice in advance if it cancelled the policy.

Taeguk suffered a downturn in business and Ko failed to timely pay his insurance premiums. In October 1992, TRM sent Ko notice it intended to cancel the policy. TRM did not send a copy of the cancellation notice to plaintiff. The policy terminated November 27.

Beginning in late October and throughout November, Ferguson and Taeguk discussed reducing the insurance premiums by deleting coverage for some of Ko's vehicles. Ferguson also corresponded with a TRM underwriter about the situation, proposing the issuance of a new policy covering only some of Ko's busses. The underwriter suggested an alternative whereby TRM would reinstate the original policy and give Ko a credit against his policy's premium if he agreed to certain conditions, which included delivering **[***5]** the license plates of two buses to Ferguson and temporarily suspending use of those vehicles. Plaintiff presented expert testimony that, unlike a transaction where a vehicle is deleted from a policy, the alternative approach implemented a procedure **[*1068]** described as lay-up credit. Under a lay-up credit, the insured maintains coverage on a vehicle while it is not being operated.

Ko agreed to this proposal, and on December 1, TRM retroactively reinstated **[**592]** the policy effective November 27. The bus encumbered by plaintiff's security interest was one of the vehicles Ko intended not to use. Plaintiff did not receive notice of the policy reinstatement with the endorsement that reflected Ko's business received a premium credit due to the vehicle's nonuse. National Union claimed it sent a copy of this endorsement to plaintiff, but plaintiff denied receiving it.

In January 1993, the bus encumbered by plaintiff's lien suffered extensive damage when it collided with another vehicle on a public highway. At Taeguk's request, Ferguson submitted a notice of claim to defendant's claims adjuster, American International Adjustment Company, Inc. (AIAC). On February 4, TRM sent AIAC a notice verifying **[***6]** coverage for the vehicle and confirming plaintiff as a loss payee. However, after further correspondence with Taeguk and TRM, AIAC denied the claim, asserting the bus had been deleted from the policy before the accident. TRM prepared an endorsement deleting the bus from the policy (Number 8) on February 16. This endorsement purported to be effective as of December 1, 1992.

In late 1993, Ko defaulted on plaintiff's loan. Plaintiff then learned about the accident and contacted Ferguson concerning insurance benefits to repair the vehicle. Ferguson informed plaintiff the bus had been removed from the policy before the accident. Plaintiff sued Ko, recovering a judgment against him and incurring $ 3,859.50 in legal fees in the process. However, Ko filed bankruptcy and discharged the debt.

Plaintiff submitted a claim to defendant for benefits under the insurance policy. At that time, it possessed only a certificate of insurance, not a copy of the policy.

AIAC also handled plaintiff's claim. TRM informed AIAC the encumbered bus had been deleted from the policy before the accident and sent it a copy of endorsement Number 8. A certificate of mailing on that copy covered the part of the **[***7]** endorsement reflecting the date TRM had prepared it. After an AIAC claims manager discussed the matter with John Lavin, a senior underwriter with the division handling defendant's bus program, and Tom Spangenberg, TRM's president, AIAC advised plaintiff the claim was being denied. The basis of the denial was that Ko deleted the bus from the policy before the accident, and TRM and AIAC concluded defendant's policy did not obligate it to give plaintiff advance notice of the deletion. Defendant did not send plaintiff a copy of the policy until August 1994. Again, the mailing certificate covered the portion of endorsement Number 8 displaying the date on which it had been prepared.

[*1069] PROCEDURAL BACKGROUND

The trial's first phase dealt with plaintiff's breach of contract cause of action against defendant. The court found, as a matter of law, the insurance contract's loss-payable clause constituted a separate agreement between plaintiff and defendant, obligating defendant to provide 30 days' notice of the policy's cancellation or the bus's deletion from it, and that defendant failed to comply with this requirement. The jury subsequently awarded plaintiff $ 61,513.80 under the policy.

[*8]** The second phase involved plaintiff's claims for bad faith against defendant and fraud against both defendant and AIAC. The jury returned a special verdict finding defendant violated the policy's implied covenant of good faith and fair dealing and that it acted with oppression, malice, and fraud in doing so. The jury also returned a special verdict finding defendant liable for intentional misrepresentation and concealment and awarded plaintiff $ 3,859.80 in **[**593]** damages. Based on its interpretation of the jury's answers in the special verdict, the trial court entered judgment for AIAC on the fraud count.

During this phase, the trial court also ruled plaintiff could recover $ 30,268.16 in attorney fees as damages under *Brandt v. Superior Court (1985) 37 Cal.3d 813 [210 Cal. Rptr. 211, 693 P.2d 796]*. The parties stipulated plaintiff was entitled to $ 55,616.34 in costs pursuant to *Brandt*. Subsequently, the court denied defendant's request to offset the pretrial settlements plaintiff received from Ferguson ($ 26,500) and TRM ($ 62,500) against the compensatory award imposed on it.

The trial's third phase dealt with punitive damages. The jury awarded $ 10 million in punitive damages **[***9]** against defendant which the trial court subsequently reduced to $ 1.7 million. In addition, the judgment awarded plaintiff compensatory damages, consisting of the policy benefits plus interest, the legal expenses recoverable under *Brandt v. Superior Court, supra, 37 Cal.3d 813*, and the damages for fraud. Finally, the court awarded AIAC $ 10,277.52 in costs against plaintiff.

DISCUSSION

PLAINTIFF'S APPEAL

Demurrer to the Unfair Business Practices Cause of Action

The complaint's fourth count sought injunctive and restitutionary relief under *Business and Professions Code section 17200 et seq.* against defendant and AIAC for “engag[ing] in unfair competition” in the “handling [of plaintiff's] **[*1070]** claim, and the claims of other persons.” Plaintiff alleged defendant, “aided and abetted” by AIAC, “used misleading documents to falsely suggest that it would provide insurance … where it had no intention to do so,” “falsely suggested that it would … provid[e] timely notice of [policy] cancellations,” “misrepresented the terms and meaning of its policies … to provide a pretext for its refusal to provide timely notice,” and “engaged in a pattern **[***10]** and practice of wrongful and false cancellations of insurance policies … .”

Relying on *Moradi-Shalal v. Fireman's Fund Ins. Companies (1988) 46 Cal.3d 287 [250 Cal. Rptr. 116, 758 P.2d 58]*, defendant and AIAC generally demurred to this count. The trial court sustained the demurrers without leave to amend. Citing *State Farm Fire & Casualty Co. v. Superior Court (1996) 45 Cal.App.4th 1093 [53 Cal. Rptr. 2d 229]*, plaintiff contends the trial court's ruling was erroneous.

CA(1)[] **(1)** *Moradi-Shalal* held ***HN1***[] the Unfair Insurance Practices Act (*Ins. Code, § 790 et seq.*; UIPA) does not create a private cause of action against insurers who violate its provisions. (*Moradi-Shalal v. Fireman's Fund Ins. Companies, supra, 46 Cal.3d at pp. 304–305*.) This rule applies to both first party and third party claims. (*Maler v. Superior Court (1990) 220 Cal. App. 3d 1592, 1597–1598 [270 Cal. Rptr. 222]*; *Zephyr Park v. Superior Court (1989) 213 Cal. App. 3d 833, 836–838 [262 Cal. Rptr. 106]*.) While insurance companies are subject to California laws generally applicable to other businesses, including laws governing unfair business practices (*Ins. Code, § 1861.03, **[***11]** subd. (a)*), parties cannot plead around *Moradi-Shalal*'s holding by merely relabeling their cause of action as one for unfair competition. (*Manufacturers Life Ins. Co. v. Superior Court (1995) 10 Cal.4th 257, 283–284 [41 Cal. Rptr. 2d 220, 895 P.2d 56]*; *Maler v. Superior Court, supra, 220 Cal. App. 3d at p. 1598*; *Safeco Ins. Co. v. Superior Court (1990) 216 Cal. App. 3d 1491, 1494 [265 Cal. Rptr. 585]*.)

[594]** ***CA(2)***[] **(2)** The specific allegations of wrongful conduct contained in plaintiff's fourth cause of action, using misleading documents and misrepresenting both the terms of the insurance policies and its obligations under them for its own benefit, are the type of activities covered by the UIPA. (*Ins. Code, § 790.03, subds. (a) & (h)*.) In *Safeco Ins. Co. v. Superior Court, supra, 216 Cal. App. 3d 1491*, the court ordered dismissal of an action which included a request for injunctive relief under *Business and Professions Code section 17200 et seq.* based on an insurer's allegedly unfair claims settlement practices. (*216 Cal. App. 3d at pp. 1493–1494*.) "Though the issue is one of first impression, we have no difficulty in deciding the Business and Professions Code **[***12]** provides no toehold for scaling the barrier of *Moradi-Shalal* … . To permit plaintiff to maintain this action would render *Moradi-Shalal* meaningless." (*Id. at p. 1494*.) Under the foregoing cases, ***HN2***[] merely alleging these purported acts **[*1071]** constitute unfair business practices under the unfair competition law is insufficient to overcome *Moradi-Shalal*.

In a few cases, the Supreme Court has allowed an action against an insurance company under the unfair competition law where the alleged conduct constituted an unlawful restraint on trade under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), even though it also violated the UIPA. (*Quelimane Co. v. Stewart Title Guarantee Co. (1998) 19 Cal.4th 26, 43–44 [77 Cal. Rptr. 2d 709, 960 P.2d 513]*; *Manufacturers Life Ins. Co. v. Superior Court, supra, 10 Cal.4th at pp. 283–284*.) "This conclusion does not compromise the rule of *Moradi-Shalal* in any way. The court concluded there that ***HN3***[] the Legislature did not intend to create new causes of action when it described unlawful insurance business practices in *section 790.03*, and therefore that section did not create a private cause of action under the UIPA. The court **[***13]** did not hold that by identifying practices that are unlawful in the insurance industry, practices that violate the Cartwright Act, the Legislature intended to bar Cartwright Act causes of action based on those practices." (*Manufacturers Life Ins. Co. v. Superior Court, supra, 10 Cal.4th at p. 284*.)

The case on which plaintiff relies, *State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th 1093*, held the plaintiff-insureds had sufficiently alleged a cause of action against their insurer under the unfair competition law based on allegations of conduct constituting common law fraud and breach of the implied covenant of good faith and fair dealing, even though the same conduct violated the UIPA. "While *Moradi-Shalal* clearly held that the Legislature did not intend to create new causes of action when it enacted *section 790.03*, it is also clear that the Legislature did not intend in any way to circumscribe the previously existing common law right of an insured to seek redress for an insurer's fraudulent deception or breach of the covenant of good faith implied in the policy. … Thus, … common law claims remain as a firm legal **[***14]** basis on which an insured may rely to seek redress against an insurer." (*State Farm Fire & Casualty, at pp. 1107–1108*.)

The persuasiveness of *State Farm Fire & Casualty* has been undercut by the Supreme Court's subsequent disapproval of its definition of "unfair" business practices. Quoting from *People v. Casa Blanca Convalescent Homes, Inc. (1984) 159 Cal. App. 3d 509 [206 Cal. Rptr. 164]*, *State Farm* declared: "The test of whether a business practice is unfair 'involves an examination of [that practice's] impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In **[**595]** brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim … . [Citations.]' … . [A]n 'unfair' business practice occurs when that practice 'offends an established public policy or **[*1072]** when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.' [Citation.]" (*State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th at pp. 1103–1104, fn. omitted*.)

But *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163 [83 Cal. Rptr. 2d 548, 973 P.2d 527]* **[***15]** found this definition is "too amorphous and provid[es] too little guidance to courts and businesses." (*Id. at p. 185*.) While *Cel-Tech Communications* limited its discussion to the context of an action between competitors, the court concluded that, "any finding of unfairness to competitors under section 17200 be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition," and that under Business and Professions Code section 17200, "the word 'unfair' … means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law … ." (*Cel-Tech Communications at pp. 186–187, fn. omitted*; see also *Schnall v. Hertz Corp. (2000) 78 Cal.App.4th 1144, 1165–1167 [93 Cal. Rptr. 2d 439]* [applying *Cel-Tech Communications*'s standard in vehicle lessee's action against rental agency for allegedly concealing or obscuring the rental agreement's fuel service charge].)

Harmonizing *Moradi-Shalal*'s holding with the foregoing decisions supports a conclusion the trial court properly sustained the **[***16]** demurrers to plaintiff's unfair competition claim. First, the holding in *Safeco Ins. Co. v. Superior Court, supra, 216 Cal. App. 3d 1491*, supports this result. Second, this case is distinguishable from *Quelimane* and *Manufacturers Life* in two respects. Neither decision involved an action by an insured or a third party based on the insurer's alleged failure to comply with a policy or to provide benefits. In *Quelimane*, parties who acquired real estate at tax sales sued title insurance companies for refusing to issue policies on their property. *Manufacturers Life* concerned an insurance agency's action against insurance companies for boycotting the agency. Also, in both cases the plaintiff alleged a Cartwright Act violation as the basis for its unfair competition cause of action. Finally, ***HN4***[] given the Supreme Court's disapproval of *State Farm*'s "amorphous" definition of "unfair" practices and its focus on legislatively declared public policy, reliance on general common law principles to support a cause of action for unfair competition is unavailing.

Under these circumstances, the trial court properly found plaintiff failed to state a cause of action against **[***17]** defendant and AIAC for unfair business practices.

[*1073] *The Jury's Phase Two Findings*

During the second phase, the jury returned a special verdict containing findings on the elements of two theories of deceit, intentional misrepresentation and concealment of a material fact. The jury's responses reflect it found both defendant and AIAC made representations of a material fact on which plaintiff justifiably relied to its injury and that both defendants made the representations "recklessly without knowing whether [they were] true or false." However, the jury concluded AIAC did not know the representations were false and did not make them with the intent to defraud plaintiff. On the concealment **[**596]** theory, the jury found both defendants concealed or suppressed a material fact which resulted in injury to plaintiff, but also found AIAC did not intentionally conceal or suppress a material fact with the intent to defraud plaintiff. In addition, the jury concluded both defendants were "guilty of fraud, malice, or oppression in the conduct upon which [it] based [its] finding of liability … ."

When the jury returned its special verdict, the court discussed the inconsistency in the **[***18]** findings with counsel and ultimately ruled AIAC "is not liable for fraud or concealment." Plaintiff argues the trial court erred by construing the jury's findings to exonerate AIAC.

HN5[] The distinction between a general and special verdict is that under the former a jury "pronounce[s] generally upon all or any of the issues," while the latter is one "by which the jury find the facts only, leaving the judgment to the court." (*Code Civ. Proc., § 624*.) In a case "[w]here a special finding of facts is inconsistent with the general verdict, the former controls the latter, and the court must give judgment accordingly." (*Code Civ. Proc., § 625*; see also *Tavaglione v. Billings (1993) 4 Cal.4th 1150, 1156–1157 [17 Cal. Rptr. 2d 608, 847 P.2d 574]*; *Bond v. DeWitt (1954) 126 Cal. App. 2d 540, 544 [272 P.2d 561]*.)

HN6[] ***CA(3)***[] **(3)** The jury's findings that AIAC made representations recklessly but without knowing the statements were false are inherently inconsistent. A representation made recklessly without knowledge of its falsity is sufficient to establish scienter. (5 Witkin, Summary of Cal. Law (9th ed. 1988) Torts, § 705, p. 806.) However, on both fraud theories the jury found AIAC did not act with an intent to defraud **[***19]** plaintiff. ***CA(4)***[] **(4)** An intent to induce reliance on a misrepresentation or nondisclosure by the plaintiff is essential to establish liability for either an intentional misrepresentation or concealment of a material fact. (*Lovejoy v. AT&T Corp. (2001) 92 Cal.App.4th*

85, 93 [111 Cal. Rptr. 2d 711]; Conrad v. Bank of America (1996) 45 Cal.App.4th 133, 157 [53 Cal. Rptr. 2d 336]; 5 Witkin, Summary of Cal. Law, *supra,* §§ 706, 710, pp. 807, 810.) The absence of this element defeats plaintiff's fraud claim against AIAC. Furthermore, the finding relevant to defendants' punitive **[*1074]** damages liability was in the nature of a general verdict and is subordinate to the jury's specific finding of no intent to defraud. Thus, the trial court properly entered judgment for AIAC on the fraud claim.

Plaintiff contends AIAC could be found liable either as a coconspirator of defendant or on a theory of negligent misrepresentation. These contentions lack merit.

First, since plaintiff did not assert the latter theory at trial, and the court did not instruct the jury on it, it is now too late to do so. (Overgaard v. Johnson (1977) 68 Cal. App. 3d 821, 826 [137 Cal. Rptr. 412].) Second, while the court did instruct **[***20]** the jury on conspiracy as a basis for imposing liability, as plaintiff concedes, the jury was not asked to return a special verdict on this allegation. Had the jury concluded AIAC was liable as a coconspirator with defendant, it should have returned a finding of an intent to defraud.

A review of plaintiff's closing argument also reflects it relied on the representations and conduct of AIAC's employees, not conspiracy, to support its fraud claim. In fact, while discussing the question of whether defendant acted with malice, plaintiff's counsel suggested no conspiracy existed. “An insurance company whose job is to … investigate the situation thoroughly, concealing information which it knows is going to lead to a discovery that there's coverage—even concealing that information **[**597]** from its own claims people so that they won't have a guilty conscience about denying the claim—that's malice.”

The trial court properly entered judgment for AIAC on the fraud claim.

The Brandt Damage Award

Plaintiff retained legal counsel under an agreement requiring it to pay counsel 40 percent of all amounts recovered in the case. After a lengthy discussion, the trial court limited the sum **[***21]** plaintiff could recover as damages under Brandt v. Superior Court, supra, 37 Cal.3d 813, to 40 percent of the amount recovered as policy benefits during the trial's first phase. Plaintiff attacks this ruling and claims it should have been allowed to recover the reasonable value of counsel's services which it calculates is nearly $ 300,000 greater than the amount awarded by trial court. This contention lacks merit.

HN7[] ***CA(5)***[] **(5)** *Brandt* held attorney fees reasonably incurred to compel payment of policy benefits tortiously withheld by an insurer are recoverable as an element of damages. (Brandt v. Superior Court, supra, 37 Cal.3d at pp. 815, 817.) “When an insurer's tortious conduct reasonably compels the insured to retain an attorney to obtain the benefits due under a policy, it follows that the **[*1075]** insurer should be liable in a tort action for that expense. The attorney's fees are an economic loss—damages—proximately caused by the tort. [Citation.]” (Id. at p. 817.)

The retainer agreement required plaintiff to pay counsel 40 percent of all sums recovered in this action. It had no further legal obligation to pay counsel for the legal services **[***22]** rendered to it. *Brandt* held the ***HN8***[] “fees recoverable … may not exceed the amount attributable to the attorney's efforts to obtain the rejected payment due on the insurance contract.” (Brandt v. Superior Court, supra, 37 Cal.3d at p. 819.) Plaintiff cites no authority permitting a posttrial modification of the retainer agreement. The trial court did not err by limiting the damage award under Brandt v. Superior Court, supra, 37 Cal.3d at page 813, to the percentage specified in the parties' contingency agreement.

The Costs Award

Plaintiff attacks the trial court's postjudgment rulings concerning the award of costs on two grounds. Both arguments lack merit.

First, it disputes the court's finding AIAC was a prevailing party. Plaintiff argues that since defendant and AIAC filed a joint answer to the complaint and were represented by the same counsel during trial, they held a unity of interest, which precludes AIAC from acquiring this status.

Code of Civil Procedure section 1032 ***HN9***[] defines prevailing party to include "a defendant in whose favor a dismissal is entered, a defendant where neither plaintiff nor defendant obtains any relief, and a **[***23]** defendant as against those plaintiffs who do not recover any relief against that defendant. … [I]n situations other than as specified, the 'prevailing party' shall be as determined by the court, and under those circumstances, the court, in its discretion, may allow costs or not and, if allowed may apportion costs between the parties on the same or adverse sides … ." (*Code Civ. Proc., § 1032, subd. (a)(4)*.) ***CA(6)***[] **(6)** Cases applying this statute hold that where one of multiple, jointly represented defendants presenting a unified defense prevails in an action, the trial court has discretion to award or deny costs to that party. (*Webber v. Inland Empire Investments, Inc.* ***[**598]*** *(1999) 74 Cal.App.4th 884, 920 [88 Cal. Rptr. 2d 594]*; *Slavin v. Fink (1994) 25 Cal.App.4th 722, 725–726 [30 Cal. Rptr. 2d 750]*; *Smith v. Circle P Ranch Co. (1978) 87 Cal. App. 3d 267, 272 [150 Cal. Rptr. 828]*.)

Plaintiff asserts the trial court did not exercise its discretion in this case, citing a statement by the trial judge during the hearing on the motion to strike AIAC's cost bill. However, the court made that comment in response to **[*1076]** plaintiff's contention "no evidence" exists "to support any particular allocation" **[***24]** between AIAC and Defendant, and that the latter entity presumably "fronted" AIAC's trial expenses. The record as a whole does not support a conclusion the trial court failed to exercise its discretion concerning AIAC's status and its recovery of costs.

The related arguments also fail. Contrary to plaintiff's assertion, this is not a case where it established wrongdoing against AIAC, but simply failed to recover a monetary award. The jury found AIAC did not commit fraud. Furthermore, since the injunctive relief claim had been previously dismissed, this was an action for damages. Thus, the evidence indicating AIAC subsequently modified its operating procedures concerning claims handling does not preclude it from being deemed a prevailing party.

Second, plaintiff contends the trial court erred by denying its recovery of expert witness fees under *Code of Civil Procedure section 998*. Nearly a year before trial, plaintiff served on defendant and AIAC an unsuccessful pretrial offer to compromise proposing "to allow judgment be taken … against defendants" for $ 626,489.26. In denying plaintiff's request for expert witness fees, the court cited *Taing v. Johnson Scaffolding Co. (1992) 9 Cal.App.4th 579 [11 Cal. Rptr. 2d 820].* **[***25]**

CA(7)[] **(7)** *Code of Civil Procedure section 998, subdivision (d)* ***HN10***[] authorizes the court to award a prevailing plaintiff its expert witness fees if the plaintiff made a timely pretrial offer to compromise which the defendant does not accept, and "the defendant fails to obtain a more favorable judgment … ." In *Taing*, the court reversed an award of costs, declaring, ***HN11***[] "if a plaintiff elects to submit a *section 998* offer in cases involving multiple defendants, the offer to any defendant against whom the plaintiff seeks to extract penalties for nonacceptance must be sufficiently specific to permit that individual defendant to determine the exact amount plaintiff is seeking from him or her." (*Taing v. Johnson Scaffolding Co., supra, 9 Cal.App.4th at p. 586*.) *Taing* explained its rule as follows: "[A]n unapportioned offer by a single plaintiff to multiple defendants … requires any defendant who wants to accept to obtain the concurrence of his or her codefendants. This places a reasonable defendant at the mercy of codefendants whose refusal to settle may be unreasonable." (*Id. at p. 584*.)

Defendant and AIAC were not jointly and severally liable to plaintiff. **[***26]** (Cf. *Steinfeld v. Foote-Goldman Proctologic Medical Group, Inc. (1996) 50 Cal.App.4th 1542, 1547–1549 [58 Cal. Rptr. 2d 371]*.) The complaint sought recovery against defendant on theories of breach of contract, bad faith, and fraud. AIAC was alleged to be liable only on the latter theory. Furthermore, the evidence relating to each defendant's liability for fraud was separate. **[*1077]** Thus, the trial court did not err by exercising its discretion to deny recovery of expert witness fees in this case.

DEFENDANT'S APPEAL

Denial of an Offset

Defendant moved to have the settlement amounts plaintiff received from **[**599]** Ferguson and TRM offset against the damages plaintiff recovered from it. The trial court issued a lengthy written order denying the request as to both the contractual damages and the tort damages recovered by plaintiff. Defendant contends the trial court erred by denying an offset in this case.

HN12[] *CA(8)*[] **(8)** Consistent with the general rule imposing on a party the burden of proving the existence or nonexistence of each fact essential to a claim or defense (*Evid. Code, § 500*), "[a] defendant seeking an offset against a money judgment has the burden of proving the offset. [Citation.]" (*Conrad v. Ball Corp. (1994) 24 Cal.App.4th 439, 444 [29 Cal. Rptr. 2d 441]*.) **[***27]**

HN13[] *CA(9)*[] **(9)** With respect to plaintiff's contractual recovery, an insured is entitled to receive compensation in accordance with the policy terms, and an insurer cannot reduce the amount recoverable "merely because [the insured] has 'collateral contracts or relations with third persons which relieve him wholly or partly from the loss against which the insurance company agreed to indemnify him.' [Citations.]" (*Strickland v. Federal Ins. Co. (1988) 200 Cal. App. 3d 792, 801 [246 Cal. Rptr. 345]*, quoting *Hughes v. Potomac Ins. Co. (1962) 199 Cal. App. 2d 239, 251 [18 Cal. Rptr. 650]*, disapproved on another ground in *Sabella v. Wisler (1963) 59 Cal.2d 21, 34 [27 Cal. Rptr. 689, 377 P.2d 889]*.) An insurer's right to recoup payment of policy benefits is covered by the principle of subrogation. To qualify for subrogation, the insurer must pay the insured's loss. (*Sapiano v. Williamsburg Nat. Ins. Co. (1994) 28 Cal.App.4th 533, 538 [33 Cal. Rptr. 2d 659]*; *Chase v. National Indemnity Co. (1954) 129 Cal. App. 2d 853, 861–862 [278 P.2d 68]*.)

Defendant refused to pay any policy benefits to plaintiff. The cases on which it relies to establish an offset against the contract **[***28]** damages involve an insured's recovery of tort damages and whether the collateral source rule applied. Its contention the trial court "misread" *Kardly v. State Farm Mut. Auto. Ins. Co. (1989) 207 Cal. App. 3d 479 [255 Cal. Rptr. 40]* is incorrect. Contrary to defendant's claim, *Kardly* did not hold the insurer waives the right of subrogation by breaching the insurance contract. The part of the *Kardly* opinion defendant quotes refers to the facts of another appellate decision. (*Id. at p. 489*.) Thus, the trial court properly refused to offset the Ferguson and TRM settlements against the contractual damage award.

[*1078] As for plaintiff's recovery of tort damages, the trial court agreed the collateral source doctrine did not apply because Ferguson and TRM could not be deemed collateral sources under the facts of this case. However, the court detailed the potential liability facing Ferguson and TRM, and found their potential liability exceeded $ 261,000, which included nonduplicative exposure exceeding $ 96,000. Applying the tort of another doctrine, the court concluded the settlement sums paid by Ferguson and TRM should not be offset against plaintiff's **[***29]** recovery from defendant.

CA(10)[] **(10)** Generally, *HN14*[] a party cannot obtain double recovery for the same wrong where joint or concurrent tortfeasors are jointly and severally liable for the same wrong. (6 Witkin, Summary of Cal. Law*, supra,* Torts, § 1322, p. 779.) "[I]t has long been recognized that if one tortfeasor pays partial compensation to the plaintiff, the liability of other tortfeasors will be correspondingly reduced: '… payments by one tortfeasor on account of a harm for which he and another are each liable, diminish the amount of the claim against the other whether or not it was so agreed at the time of payment and whether the payment **[**600]** was made before or after judgment. Since the plaintiff can have but one satisfaction, evidence of such payments is admissible for the purpose of reducing *pro tanto* the amount of the damages he may be entitled to recover.' [Citations.]" (*Krusi v. Bear, Stearns & Co. (1983) 144 Cal. App. 3d 664, 673 [192 Cal. Rptr. 793]*.)

HN15[] *CA(11)*[] **(11)** Where tortious acts by separate persons produce the same indivisible injury, each person is liable for the whole loss even if they did not act in concert. (*Sanchez v. Bay General Hospital (1981) 116 Cal. App. 3d 776, 796 [172 Cal. Rptr. 342]*.) **[***30]** Thus, while plaintiff sued defendant for breach of contract, breach of the implied covenant of good faith and fair dealing, and fraud, but only sought damages against Ferguson and TRM for negligence, the injury it suffered was the same.

However, the court did find the tort of another doctrine applicable to this case. ***HN16***[] "A person who through the tort of another has been required to act in the protection of his interests by bringing or defending an action against a third person is entitled to recover compensation for the reasonably necessary loss of time, attorney's fees, and other expenditures thereby suffered or incurred. [Citations.]" (*Prentice v. North Amer. Title Guar. Corp. (1963) 59 Cal.2d 618, 620 [30 Cal. Rptr. 821, 381 P.2d 645]*.)

CA(12)[] **(12)** Generally, a party seeking to recover litigation costs under this rule must plead and prove the claim. (*Hsu v. Abbara (1995) 9 Cal.4th 863, 869, fn. 4 [39 Cal. Rptr. 2d 824, 891 P.2d 804]*.) While plaintiff did not do so here, the potential for its recovery of damages from Ferguson and TRM was made known to them during pretrial discovery. Furthermore, had it not settled with **[*1079]** Ferguson and TRM, plaintiff could have amended the complaint to assert its right to recover **[***31]** the fees and expenses incurred in its action against defendant.

The record supports the trial court's denial of defendant's request for an offset.

PUNITIVE DAMAGES

Introduction

Both parties attack the punitive damage award. However, in light of our conclusion concerning the validity of the amount of the award, the only issues that need to be considered are defendant's challenges to the sufficiency of the evidence supporting the recovery of exemplary damages and the constitutionality of the amount awarded to plaintiff, plus its claim for interest on the constitutionally excessive portion of the sum previously paid to plaintiff.

Sufficiency of the Evidence

Defendant claims its own conduct was not oppressive, fraudulent, or malicious, TRM's activity cannot be attributed to it, and it did not ratify TRM's actions.

Civil Code section 3294 ***HN17***[] authorizes the award of punitive damages in any "action for the breach of an obligation not arising from contract, where it is proven by clear and convincing evidence that the defendant has been guilty of oppression, fraud, or malice … ." (*Civ. Code, § 3294, subd. (a)*.) In *Egan v. Mutual of Omaha Ins. Co. (1979) 24 Cal.3d 809 [169 Cal. Rptr. 691, 620 P.2d 141]* **[***32]** (*Egan*), the Supreme Court upheld an award of punitive damages against an insurer based on evidence two employees, a claims manager and a claims adjuster, failed to adequately investigate the insured's claims under a disability insurance policy. "The determination whether employees act in a managerial capacity, however, does not necessarily hinge on their 'level' in the corporate hierarchy. Rather, the critical inquiry is the degree of discretion **[**601]** the employees possess in making decisions that will ultimately determine corporate policy. When employees dispose of insureds' claims with little if any supervision, they possess sufficient discretion for the law to impute their actions concerning those claims to the corporation." (*Id. at pp. 822–823*.)

Subsequently, the Legislature amended *Civil Code section 3294* to provide, ***HN18***[] "[A]n employer shall not be liable for [punitive] damages … based upon acts of an employee of the employer, unless the employer had advance knowledge of the unfitness of the employee and employed him or her with a conscious **[*1080]** disregard of the rights or safety of others or authorized or ratified the wrongful conduct for which the damages are awarded or was **[***33]** personally guilty of oppression, fraud, or malice. With respect to a corporate employer, the advance knowledge and conscious disregard, authorization, ratification or act of oppression, fraud, or malice must be on the part of an officer, director, or managing agent of the corporation." (*Civ. Code, § 3294, subd. (b)*.)

In *White v. Ultramar, Inc. (1999) 21 Cal.4th 563 [88 Cal. Rptr. 2d 19, 981 P.2d 944]*, the Supreme Court considered the effect of this amendment in an action for wrongful termination. A manager who was responsible for eight stores, covering 65 employees, had fired the plaintiff, a convenience store employee. The jury awarded plaintiff both compensatory and punitive damages.

In affirming, the Supreme Court concluded that ***HN19***[] "in amending *section 3294*, the Legislature intended (like *Egan, supra, 24 Cal.3d at p. 823*) to limit corporate punitive damage liability to those employees who exercise substantial independent authority and judgment over decisions that ultimately determine corporate policy." (*White v. Ultramar, Inc., supra, 21 Cal.4th at p. 573*.) The court noted, "*section 3294, subdivision (b)*, placed ['managing agent'] next to the terms 'officer' **[***34]** and 'director,' intending that a managing agent be more than a mere supervisory employee. The managing agent must be someone who exercises substantial discretionary authority over decisions that ultimately determine corporate policy. Thus, by selecting the term 'managing agent,' and placing it in the same category as 'officer' and 'director,' the Legislature intended to limit the class of employees whose exercise of discretion could result in a corporate employer's liability for punitive damages." (*Ibid.*) The critical factor " ' "is the degree of discretion the employees possess in making decisions that will ultimately determine corporate policy." [Citation.]' " (*Id. at p. 574*.)

CA(13)[] **(13)** The agency agreement between defendant and TRM and the evidence in this case shows TRM had broad discretion over defendant's bus insurance program. TRM could "solicit, bind, write and administer insurance" policies, and "exercise [its] independent judgment as to the time, place and manner of soliciting insurance and servicing policyholders." There was evidence AIAC directed its employees to contact TRM when seeking coverage verification. In this case, TRM participated in issuing **[***35]** the policy to Ko, in subsequently canceling it, and then reinstating a modified version of it. Later, when Ko submitted a claim on the bus, TRM initially issued a coverage determination, but then prepared an endorsement deleting the vehicle from the policy, and advised AIAC to deny the claim. Furthermore, TRM's president was in contact with both AIAC and the senior management of the division handling defendant's bus program when plaintiff's **[**602]** claim was being considered, and participated in the ultimate decision to deny it. This evidence **[*1081]** supports the jury's conclusion TRM was defendant's managing agent, thereby subjecting it to punitive damages under *Civil Code section 3294*. (*White v. Ultramar, Inc., supra, 21 Cal.4th at p. 577*; *Egan v. Mutual of Omaha Ins. Co., supra, 24 Cal.3d at p. 823*.)

In light of this conclusion it is unnecessary to consider defendant's additional claims concerning instructional error and alleged insufficiency of the evidence based on its own conduct.

Validity of the Award

Defendant contends even the $ 1.7 million punitive damage award is unconstitutional and excessive. In both our original and second opinions, we upheld **[***36]** the punitive damage award. The United States Supreme Court has directed us to reconsider this decision for a third time in light of its recent decision in *State Farm Mut. Auto. Ins. Co. v. Campbell, supra, 538 U.S. 408* (hereinafter *State Farm*).

HN20[] ***CA(14)***[] **(14)** The rationale underlying punitive damages is to punish the wrongdoer and deter similar future wrongful conduct. (*State Farm, supra, 538 U.S. at p. 416*; *Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 432*; *PPG Industries, Inc. v. Transamerica Ins. Co. (1999) 20 Cal.4th 310, 317 [84 Cal. Rptr. 2d 455, 975 P.2d 652]*.) While the United States Supreme Court recognizes "the broad discretion" possessed by the states "with respect to the imposition of … punitive damages" (*Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 433*; see also *State Farm, supra, 538 U.S. at p. 416*), the federal Constitution's due process clause requires that a party potentially subject to such an award receive adequate notice of both the conduct that would support it and the severity of the penalty which could be imposed. (*State Farm, supra, 538 U.S. at p. 417*; **[***37]** *BMW of North America, Inc. v. Gore (1996) 517 U.S. 559, 574 [134 L. Ed. 2d 809, 116 S. Ct. 1589]*.) Thus, the Supreme Court has held federal due process "prohibits the States from imposing 'grossly excessive' punishments on tortfeasors [citations]." (*Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 434*.)

HN21[] ***CA(15)***[] **(15)** In determining if the punitive damage award in a particular case is " 'grossly disproportional to the gravity of … defendant[s'] offense[s]' " (*Cooper Industries, Inc. v. Leatherman Tool Group,* *Inc., supra, 532 U.S. at p. 434*), a reviewing court must conduct a "thorough, independent review" of the award (*id. at p. 441*), considering "three guideposts: (1) the degree of reprehensibility of the defendant's misconduct; (2) the disparity between the actual or potential harm suffered … and the punitive damages award; and (3) the difference between the punitive damages awarded by the jury and the civil **[*1082]** penalties authorized or imposed in comparable cases. [Citation.]" (*State Farm, supra, 538 U.S. at p. 418*; see also *BMW of North America, Inc. v. Gore, supra, 517 U.S. 559 at pp. 574–575*.) **[***38]**

The first "guidepost," described as "the most important indicium of the reasonableness of a punitive damages award" (*BMW of North America, Inc. v. Gore, supra, 517 U.S. at p. 575*; see also *State Farm, supra, 538 U.S. at p. 419*), requires an appellate **[**603]** court to consider several factors. They include "whether: the harm caused was physical as opposed to economic; the tortious conduct evinced an indifference to or a reckless disregard of the health or safety of others; the target of the conduct had financial vulnerability; the conduct involved repeated actions or was an isolated incident; and the harm was the result of intentional malice, trickery, or deceit, or mere accident. [Citation.]" (*State Farm, supra, 538 U.S. at p. 419*; see also *BMW of North America, Inc. v. Gore, supra, 517 U.S. at pp. 575–576*.)

The evidence clearly supports a conclusion TRM, defendant's managing agent, employed trickery and deceit in attempting to hide defendant's potential liability for plaintiff's claim. TRM began the fraudulent concealment scheme shortly after the bus accident by preparing and backdating a false deletion certificate. On **[***39]** at least two occasions, TRM submitted copies of this document to plaintiff with the date of preparation hidden behind a certificate of mailing. Plaintiff also presented evidence that TRM removed documents from the claims file. In addition, the record reflects this misconduct was not merely an isolated incident. Defendant continued to deny plaintiff's entitlement to benefits during the course of this litigation. Recently, this court considered a similar issue in an analogous context in *Diamond Woodworks, Inc. v. Argonaut Ins. Co. (2003) 109 Cal.App.4th 1020 [135 Cal. Rptr. 2d 736]*. In finding the defendant-insurer's refusal to provide workers compensation benefits to one of plaintiff's employees constituted reprehensible conduct, we concluded the insurer engaged in repeated misconduct conduct because it "persisted in its denial of a defense for [the plaintiff-employer] and its denial of coverage for [the injured employee] for a period of 18 months." (*Id. at p. 1054*.)

HN22[] ***CA(16)***[] **(16)** Thus, the record confirms the existence of two factors supporting a conclusion that defendant, through its managing agent, engaged in reprehensible conduct supporting an award of punitive damages under the **[***40]** due process clause. (*State Farm, supra, 538 U.S. at p. 419*.) Defendant again repeats its claim that TRM, not it, committed the wrongdoing and its liability for TRM's actions is merely vicarious. But as we have repeatedly explained, TRM "<cised">exercise[d] substantial discretionary authority over decisions … ultimately determin[ing] corporate policy" for defendant's bus insurance program (*White v. Ultramar, Inc., supra, 21 Cal.4th at p. 573*), and thus constituted **[*1083]** defendant's managing agent. Imposing punitive damages on a corporate entity under the respondeat superior doctrine based on its agent's fraudulent conduct does not violate the federal Constitution's due process clause. (*Pacific Mut. Life Ins. Co. v. Haslip (1991) 499 U.S. 1, 14–15 [113 L. Ed. 2d 111, 1 S. Ct. 1032]*.) Simply describing its liability as vicarious does not militate against imposing a proportionately appropriate punitive damage award against defendant based on TRM's wrongdoing.

But plaintiff suffered only economic harm in the form of defendant's denial of policy benefits and the expense incurred to enforce its rights under the policy. Nor can plaintiff be **[***41]** described as a financially vulnerable victim of defendant's wrongful conduct. While plaintiff contends defendant's conduct reflected its indifference or reckless disregard as to the health and safety of Ko and any individuals potentially injured in the bus accident, this lawsuit concerns only defendant's wrongdoing as it relates to plaintiff. *State Farm* recognized that ***HN23***[] **[**604]** "[d]ue process does not permit courts, in the calculation of punitive damages, to adjudicate the merits of other parties' hypothetical claims against a defendant under the guise of reprehensibility analysis … . [Citation.]" (*State Farm, supra, 538 U.S. at p. 423*.)

HN24[] The second "guidepost" focuses on the disparity between the actual or potential harm suffered by the plaintiff and the punitive damages award. In *State Farm*, the Supreme Court reiterated its "reluctan[ce] to identify concrete constitutional limits on the ratio between" compensatory and punitive damages (*State Farm, supra, 538*

U.S. at p. 424), declaring "[t]he precise award in any case … must be based upon the facts and circumstances of the defendant's conduct and the harm to the plaintiff." **[***42]** (*Id. at p. 425*.) Nonetheless, the court identified certain guidelines to apply in determining whether the punitive damage award is reasonable and proportionate to the harm suffered by the plaintiff. Citing centuries of "legislative history … providing for sanctions of double, treble, or quadruple damages to deter and punish" (*ibid*.), the Supreme Court noted, "Our jurisprudence and the principles it has now established demonstrate, however, that, in practice, few awards exceeding a single-digit ratio between punitive and compensatory damages, to a significant degree, will satisfy due process." (*Ibid*.)

Again, our recent opinion in *Diamond Woodworks, Inc. v. Argonaut Ins. Co., supra, 109 Cal.App.4th 1020,* is instructive. After discussing *State Farm* and earlier Supreme Court decisions, we concluded they "suggest that ***HN25***[] in the usual case, i.e., a case in which the compensatory damages are neither exceptionally high nor low, and in which the defendant's conduct is neither exceptionally extreme nor trivial, the outer constitutional limit on the amount of punitive damages is approximately four times the amount of compensatory damages." (*Diamond Woodworks, at p. 1057*.) **[***43]**

[*1084] ***CA(17)***[] **(17)** This case falls within the foregoing rule. The wrongdoing attributed to defendant is sufficiently reprehensible to support a punitive damage award. But, contrary to plaintiff's claim, the compensatory damages awarded to it gave plaintiff full recovery for its loss in this case. (See *State Farm, supra, 538 U.S. at p. 419*.) Plaintiff cites defendant's purported wealth and complains an award smaller than the trial court's 10-to-1 ratio would "render the award laughable." But ***HN26***[] our review of the punitive damages award must ensure the recovery comports with due process. The Supreme Court has recognized that "[t]he wealth of a defendant cannot justify an otherwise unconstitutional punitive damages award. [Citations.]" (*State Farm, supra, 538 U.S. at p. 427*; see also *Diamond Woodworks, Inc. v. Argonaut Ins. Co., supra, 109 Cal.App.4th at p. 1056*.)

As a corollary to its attack on the constitutionality of the punitive damage award, defendant argues consideration of the proportionality of the punitive damages to compensatory damages must focus on the amount awarded for breach of the implied covenant of good faith and fair dealing and for fraud **[***44]** ($ 89,744), excluding the sum plaintiff recovered on the contract claim ($ 75,670.40). This argument has merit.

Civil Code section 3294, subdivision (a) ***HN27***[] allows the recovery of punitive damages "[i]n an action for the breach of an obligation not arising from contract, where it is proven … the defendant has been guilty of oppression, fraud, or malice … ." *Diamond Woodworks* also recognized a consideration of the disparity between compensatory and punitive damage awards **[**605]** must focus on the compensatory damages awarded on "only [the] cause[s] of action providing a basis for punitive damages in this case." (*Diamond Woodworks, Inc. v. Argonaut Ins. Co., supra, 109 Cal.App.4th at p. 1056, fn. 35*.) Here, the parties held separate trials on the breach of contract count and the tort claims and the jury returned separate awards on them. In addition, the jury's finding that defendant acted with oppression, fraud, or malice applied solely to the latter two counts. Thus, our consideration of the disparity between plaintiff's actual harm and the punitive damage award must be limited to its tort relief.

HN28[] The third "guidepost" concerns "the difference between the **[***45]** punitive damages awarded by the jury and the civil penalties authorized or imposed in comparable cases. [Citation.]" (*State Farm, supra, 538 U.S. at pp. 418, 428*.) Defendant notes the Insurance Code only imposes a maximum fine of $ 10,000 for willful misconduct by insurers. (*Ins. Code, § 790.035*.) Plaintiff cites us to the potential criminal penalties contained in *Penal Code section 550*. But this latter provision is of little assistance here. In *State Farm*, the Supreme Court noted that, ***HN29***[] while "[t]he existence of a criminal penalty does have bearing on the seriousness with which a State views the wrongful **[*1085]** action," when a criminal penalty is "used to determine the dollar amount of the award," it "has less utility." (*State Farm, supra, 538 U.S. at p. 428*.) "Great care must be taken to avoid use of the civil process to assess criminal penalties that can be imposed only after the heightened protections of a criminal trial have been observed, including, of course, its higher standards of proof. Punitive damages are not a substitute for the criminal process, and the remote possibility of a criminal sanction does not automatically sustain a punitive **[***46]** damages award." (*Ibid*.)

Applying the United States Supreme Court's "guideposts" to this case, we conclude the punitive damage award, even as reduced by the trial court, is excessive and violates the federal Constitution's due process clause.

Accordingly, we shall reverse the order remitting punitive damages to $1.7 million and modify the judgment to reduce the punitive damage award to $360,000, a sum approximating four times the compensatory damages awarded on the claims for breach of the implied covenant of good faith and fair dealing and fraud.

Restitution

Defendant claims that, on June 8, 2001, subsequent to the finality of our original judgment, it paid the outstanding judgment when plaintiff threatened to execute on it. Citing *Code of Civil Procedure section 908*, defendant argues it is entitled to not only recover the constitutionally excessive portion of the punitive damage award, but interest on it from the date of payment. Plaintiff opposes the payment of interest contending it is inequitable and "would only add insult to injury."

Code of Civil Procedure section 908 declares, ***HN30***[] "When the judgment or order is reversed or modified, the reviewing court may direct that the parties be returned so **[***47]** far as possible to the positions they occupied before the enforcement of or execution on the judgment or order. In doing so, the reviewing court may order restitution on reasonable terms and conditions of all property and rights lost by the erroneous judgment or order, so far as such restitution is consistent with rights of third parties and may direct the entry of a money judgment sufficient to compensate for property or rights not restored. The reviewing court may take evidence and make findings concerning such matters or **[**606]** may, by order, refer such matters to the trial court for determination."

CA(18)[] **(18)** As plaintiff recognizes, ***HN31***[] our power to award interest under *Code of Civil Procedure section 908* is discretionary and interest may be denied if an award would be inequitable under the circumstances. (*Holmes v. Williams (1954) 127 Cal. App. 2d 377, 379 [273 P.2d 931]*.) The only bases plaintiff cites for denying recovery of interest on the excess portion of the punitive **[*1086]** damage award are the litigation expenses it has incurred during this lawsuit, plus defendant's fraudulent conduct underlying this litigation. Neither claim supports denying restitution to defendant. The general rule is that, " **[***48]** ***HN32***[] [e]xcept as attorney's fees are specifically provided for by statute, the measure and mode of compensation of attorneys … is left to the agreement … of the parties … ." (*Code Civ. Proc., § 1021*.) If an opponent's cost of litigating a matter constitutes a basis for denying restitution under *Code of Civil Procedure section 908*, few parties would be entitled to relief.

Plaintiff's unclean hands defense fares no better. ***HN33***[] "The misconduct that brings the unclean hands doctrine into play must relate directly to the cause at issue. Past improper conduct or prior misconduct that only indirectly affects the problem before the court does not suffice. The determination of the unclean hands defense cannot be distorted into a proceeding to try the general morals of the parties. [Citations.]" (*Kendall-Jackson Winery, Ltd. v. Superior Court (1999) 76 Cal.App.4th 970, 979 [90 Cal. Rptr. 2d 743]*.) Defendant's fraudulent conduct occurred in the events leading to this litigation. There is no indication it engaged in inequitable conduct in the postjudgment proceedings. Defendant paid the judgment apparently when plaintiff threatened to execute on it. Had plaintiff chosen to await termination **[***49]** of the proceedings in the United States Supreme Court before seeking recovery, it would be entitled to interest on the sum finally awarded. To deny defendant recovery of interest on the excessive portion of the punitive damage award would be inequitable.

DISPOSITION

The orders denying defendant's motion for judgment notwithstanding the verdict, awarding costs to AIAC, and denying plaintiff recovery of its expert witness fees are affirmed. The order remitting punitive damages to $ 1.7 million is reversed. The portions of the judgment in favor of AIAC and awarding plaintiff compensatory damages are affirmed. The portion of the judgment awarding plaintiff punitive damages is modified to reduce the award to $ 360,000. As so modified, the judgment is affirmed. Each party shall bear its own costs on appeal.

Sills, P. J., and O'Leary, J., concurred.

A petition for a rehearing was denied June 18, 2004, and the opinion was modified to read as printed above. The petition of appellant Textron Financial Corporation for review by the Supreme Court was denied September 15, 2004.

HN17[] **Constitutional Law, Supremacy Clause**

The Airline Deregulation Act, *49 U.S.C.S. § 41713(b)(1)*, is "broadly preemptive," reaching any state laws or enforcement actions having a connection with or reference to airline rates, routes, or services.

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Pensions & Benefits Law > ERISA > Federal Preemption > State Laws

Transportation Law > Air & Space Transportation > Airline Deregulation Act > Preemption

Opinion

[*281] FABE, Justice.

I. INTRODUCTION

This appeal is the culmination of a series of customer service disputes between Stuart Hallam and Alaska Airlines. Hallam sued the airline, alleging that by failing to honor various terms of his plane tickets, it breached a series of contracts. He also alleged, on behalf of a class of passengers, that the airline's standard ticket terms and policies violate *Alaska's Unfair Trade Practices Act* and state ***antitrust law***. After a bench trial, the superior court ruled in **[**2]** favor of Alaska Airlines on all counts, and Hallam appeals. Most of his arguments on appeal challenge the superior court's factual findings, which we conclude were not clearly erroneous. We therefore affirm the superior court.

II. FACTS AND PROCEEDINGS

A. Factual History

Hallam's claims are based on several transactions he had with Alaska Airlines. The bulk of his appeal is devoted to challenging the factual findings supporting the superior court's judgment on these claims. We outline the incidents here and describe them in greater detail as we examine each in Parts III.B-F below.

First, Hallam claims that he purchased from Alaska Airlines's website a ticket labeled "unrestricted" that turned out to be restricted. Believing that he could change **[*282]** the ticket without incurring a fee, he attempted to change his travel dates, but was told that he would be charged. The fee was later waived, but Hallam chose not to use the ticket. In the second incident, Hallam bought a ticket to fly to Puerto Vallarta. Two charges, for differing amounts, appeared on his credit card bills. The greater of the two charges was credited back to him. Later, Hallam was informed that the charge **[**3]** was being reinstated, but that he could continue to contest it. In the third incident, Hallam attempted to use a Permanent Fund Dividend (PFD) voucher to purchase a ticket to fly from Seattle to Juneau. At the Seattle airport, Hallam was informed that his voucher had expired and that he would have to purchase his ticket some other way. Fourth, Hallam claimed below that he was denied a first class seat for which he had a reserved ticket. He therefore chose not to take the flight; he claimed that the denial of the first class seat was a breach. Finally, Hallam purchased a pair of tickets from the airline's website. He claims that he was charged an amount much greater than what appeared on the screen, and called the airline to complain. The airline refunded all but nine dollars of the alleged overcharge.

B. Procedural History

Hallam's Second Amended Complaint was filed January 18, 2000. He brought a series of contract and conversion claims based on the incidents described above and defamation claims arising from one of his more energetic encounters with Alaska Airlines personnel, along with both class and individual claims under the Alaska Unfair Trade Practices Act [1] and **[**4]** state ***antitrust law***. [2] On March 7, 2000, the superior court dismissed the unfair trade practices and antitrust claims on the ground that Hallam, as a pro se litigant, could not represent the class. The complex procedural history of these claims is laid out in Part F below. In short, Hallam moved for reconsideration of the dismissal of his individual claims. When reconsideration was denied, he moved to amend his complaint to reinstate his individual unfair trade practices and antitrust claims. The superior court eventually denied this motion in November 2000, citing federal preemption under the Airline Deregulation Act [3] as grounds for rejecting the amendment.

---

[1] *AS 45.50.471*.

[2] *AS 45.50.562, 564*.

[3] *49 U.S.C. § 41713*.

Meanwhile, discovery closed on May 1, 2000 and in June and July the parties filed cross-motions for summary judgment. Upon receiving Alaska Airlines's summary judgment memorandum, Hallam moved on August **[**5]** 22 to reopen discovery and for a continuance under *Alaska Rule of Civil Procedure 56(f)*, arguing that the airline's motion evidenced "both document tampering and perjury." After the superior court gave Hallam a chance to explain what he was looking for, it denied the motion. The superior court then granted Alaska Airlines summary judgment on some of the defamation claims, based on statute of limitations and privilege grounds, and on Hallam's failure to present evidence that one of the allegedly defamatory statements was published. On all other claims, the superior court declined to enter summary judgment. The case was tried to the bench before Judge Patricia A. Collins, who had handled the case throughout. In late November, and in March 2001 the superior court entered findings of fact and conclusions of law, finding for Alaska Airlines on all claims. Hallam moved for reconsideration, and the motion was denied. Final judgment was entered in April 2001, at which time the superior court awarded fees and costs to Alaska Airlines. Hallam made several further motions for reconsideration or relief from the judgment, including one asking Judge Collins to recuse herself "if the court cannot **[**6]** be unbiased and impartial." All were denied.

Hallam appeals to this court challenging: the superior court's factual findings on claims concerning the incidents described above; the superior court's dismissal of his individual Unfair Trade Practices Act and antitrust claims and its denial of his motion to amend his complaint to add those claims after they were dismissed; the superior court's refusal to reopen discovery; Judge Collins's failure **[*283]** to recuse herself; and the superior court's award of costs and fees to Alaska Airlines.

III. DISCUSSION

A. Standards of Review

HN1[] This court "reviews the trial court's factual findings . . . under a 'clearly erroneous' standard. A finding is clearly erroneous if it leaves this court with a definite and firm conviction on the entire record that a mistake has been made." [4] ***HN2***[] A motion to dismiss is reviewed de novo. [5] ***HN3***[] The denial of a motion for leave to amend a complaint is reviewed for abuse of discretion. [6] ***HN4***[] A motion to reopen discovery is also reviewed for abuse of discretion, [7] as is ***HN5***[] the denial of a *Rule 56(f)* motion. [8] ***HN6***[] "The refusal by a judge to be recused from a case is reviewed for an abuse of discretion." [9] In each **[**7]** of these instances, ***HN7***[] the court "will find an abuse of discretion when we are left with a definite and firm conviction after reviewing the whole record that the trial court erred in its ruling." [10] Finally, ***HN8***[] "an award of attorney's fees will be overturned only upon a showing of abuse of discretion or a showing that the award is manifestly unreasonable." [11]

[8] B. The Superior Court Properly Entered Judgment in Favor of Alaska Airlines on Hallam's Claim Relating to "Unrestricted Tickets."**

Hallam claims that he purchased a ticket labeled "unrestricted" or "U," which Alaska Airlines held out as requiring no fee to change the dates of travel. The airline, he alleges, breached a contract with him when it refused to change the dates without a fee. [12] The superior court found for the airline because Hallam "had not been denied unrestricted travel to date and, in fact, has changed the tickets without charge." He therefore could not show any breach.

Alaska Airlines argues that Hallam has not shown that the "U" designation actually means that the ticket may be changed without a fee, a claim Hallam goes to great lengths to dispute. The superior court's finding on breach, however, is dispositive -- if Hallam cannot show a breach **[**9]** of the terms as he describes them, his claim must fail. And the court's finding that there was no breach of those terms is fully supported by the evidence. The record contains a Post Departure Information report (PDI), showing all of the activity concerning the ticket in question. The PDI shows that the change fee to which Hallam objects was waived at least once. Although Hallam testified at trial that his attempts to change the ticket or get a refund were met by demands that he pay a fee, the superior court found that his testimony was not credible. ***HN9***[] Because "it is the function of the trial court, not of this court, to judge witnesses' credibility," [13] **[**10]** this court must give "due regard" [14] to the superior court's credibility judgments. Hallam offers no documentation of any failed attempts to change the ticket without a fee, nor any other reason to believe that any contract term was breached. [15] The superior court's finding that there was no breach of contract was not clearly erroneous and we affirm its judgment in favor of Alaska Airlines on this claim.

[*284] C. The Superior Court Properly Entered Judgment in Favor of Alaska Airlines on Hallam's Claim Relating to His Ticket to Puerto Vallarta.

Hallam claims that he was charged more than once for a single ticket to Puerto Vallarta that he purchased in August 1998. The cause of the double charge remains unexplained, but that is immaterial. The superior court found that "Hallam suffered no damages as a result" of the incident. The court therefore concluded that "no award of damages for this claim is appropriate." These findings are well supported by the evidence.

Hallam's credit card was billed $ 160.25 for the ticket on September 22. It was charged again, for $ 190.32, on February 20. The PDI for the ticket indicates that these charges are for the same ticket, as the ticket numbers associated with the two transactions on the credit card statements both appear on the PDI. On October 5, 1998, Hallam wrote to the credit card company **[**11]** to dispute the $ 190 charge. His credit card was credited for that amount on October 20. [16] An August 1999 letter from the credit card company says that Alaska Airlines asked to reinstate the $ 190 charge. The letter gives Hallam an opportunity to continue disputing the charge, but there is no evidence of how he responded. By Hallam's own admission, there is similarly no evidence showing that the charge ever actually reappeared on a bill. At trial, Hallam was unable to say whether the charge ever reappeared on his credit card bill and if so, whether he paid it or continued to contest it. He therefore did not prove that the contract was ever breached. We affirm the superior court's dismissal of this claim.

---

[12] Hallam pled several of his claims as both contract and conversion claims, but only discusses them before this court in contract terms.

[13] *Parker v. Northern Mixing Co., 756 P.2d 881, 892 (Alaska 1988)*.

[14] *Barios v. Brooks Range Supply, Inc., 26 P.3d 1082, 1085 (Alaska 2001)*.

[15] Nor is there any indication that any breach is forthcoming.

[16] The evidence of this credit is what appears to be a letter from the credit card company or an intermediary to Alaska Airlines. There is no credit card bill showing the credit, but Hallam does not on appeal dispute that the amount was credited.

D. The Superior Court Properly Entered Judgment in Favor [12] of Alaska Airlines on Hallam's Claim Relating to His Attempt To Use a PFD Ticket in Seattle.**

Hallam claims that Alaska Airlines breached another contract with him in March 1999 when it refused to honor a ticket from Seattle to San Francisco that he purchased with a Permanent Fund Dividend voucher. The airline acknowledges that it prevented Hallam from boarding the flight, but defends its action by claiming that the ticket had been purchased with a 1998 voucher and was good only for travel through December 15, 1998. The superior court found that the ticket had expired, and that there was therefore no breach of contract.

Hallam makes much of the fact that an Alaska Airlines employee said in an affidavit that he attempted to board the flight on March 9 while strong evidence argues that it happened on March 8. The exact date of the incident is immaterial. If the ticket's expiration date was December 15, 1998, there was no breach. The superior court's finding that the ticket had expired is well supported by the evidence.

Hallam points to a notation on the PDI for the disputed ticket, which states that it is good for travel through December 15, 1999. The airline explains this through **[**13]** the testimony of employee Jeanne Hightower, who described how that notation would have been generated. She explained that it was placed in the ticket's record because he made a change to the ticket in 1999, and the "reservation agent has no idea what tickets he was actually using." Once he got to the airport, the ticket agent would have tried to confirm that it was a current ticket, and found that it had expired.

Faced with the conflicting testimony, the trial court disbelieved Hallam's assertion that he thought the ticket was still good in March 1999. The court held that he "failed to prove that it was more likely than not that he purchased a valid ticket for the travel on the date in question." ***HN10***[] "In a bench trial, the judge is the trier of fact, determining the credibility of witnesses and deciding how to **[*285]** weigh the evidence presented." [17] Hallam gives us no reason to overturn the trial court's weighing of the evidence. We therefore affirm the superior court's judgment for Alaska Airlines on this claim.

[14] E. The Superior Court Properly Entered Judgment in Favor of Alaska Airlines on the "Bumping" Claim.**

Hallam claimed below that a contract was breached when the airline refused on November 29, 1997 to seat him in first class, despite his reservation. He does not challenge any of the findings underlying the superior court's conclusion that he "failed to prove it is more likely than not he was ever promised a First Class seat on the flight he alleges." These findings are primarily credibility determinations **--** the court found that he "was not credible in his claim of being denied First Class passage on the flight of his choosing. Rather, it is more likely that Hallam voluntarily changed his travel plans . . . ." We find no clear error in this determination and affirm the superior court's judgment in favor of Alaska Airlines on this claim.

F. The Superior Court Properly Entered Judgment in Favor of Alaska Airlines on Hallam's Claim Relating to the Purported Overcharge for Tickets He Bought from the Airline's Website.

Hallam claims that he was overcharged for tickets he purchased through the Alaska Airlines website in June 1997. He claims that the website advertised **[**15]** a total ticket price of $ 180 but his credit card was charged $ 697 for it. Alaska Airlines refunded all but nine dollars of the difference. He has sued for the nine dollars.

The superior court held that Hallam had not proved that the charge on his credit card was a breach because he "failed to prove he was promised a fare at the [lower] rate he asserts." The court based this conclusion on several factual findings, most of which Hallam challenges. Most importantly, the court did not believe Hallam's testimony.

---

[17] *Wasserman v. Bartholomew, 38 P.3d 1162, 1166-67 (Alaska 2002)*.

"Hallam," the court found, "was not particularly credible in his claim that he actually reserved or purchased a ticket for the price he claimed." The superior court also relied in part on the testimony of an Alaska Airlines customer service employee who testified that her internal investigation found no evidence "confirming that . . . he reserved at [the lower] fare or that Alaska Airlines even offered this fare." The employee also testified that Hallam's was the only complaint of this sort that she heard. Finally, the court noted that while federal law requires the publication of airline prices, the official publication had no record of the price Hallam claimed.

In evaluating **[**16]** Hallam's testimony, the court relied on his failure "to present documentation of any ticket(s) or ticket confirmation of any travel reserved or purchased at the alleged fare." The court found that the documentation Hallam did produce was "a letter that he drafted that purported to duplicate a web fare advertisement for travel at the lower rate." Hallam asserts that the document in the record is in fact a printout of the web page itself; Alaska Airlines makes no claim as to whether the document is authentic or not. The authenticity of the document, however, is immaterial. Even if it is authentic, it does not establish Hallam's claim. The document states: "To proceed in holding a reservation or purchasing Instant Travel, click 'Continue.' " This shows only that Hallam saw the lower price. It does not establish decisively that he purchased a ticket at the lower price.

Hallam points out that the customer service employee was at the top of a long chain and that all complaints would not necessarily be communicated to her. The employee did, however, testify that she "would be surprised if [she] didn't hear about" a problem like his. The superior court was entitled to credit the witness. **[**17]** [18]

Hallam attacks the superior court's reliance on the fact that the official publication for airline fares had no record of the fare Hallam claimed to have purchased. He compares **[*286]** the prices offered on the website on a given day with those published in the official publication for airline fares on the same day and shows that the official publication does not always match the website fares. This casts some doubt on the weight the superior court should have given this evidence, but is insufficient to undermine the superior court's conclusion that Hallam did not purchase this fare.

Finally, Hallam points to the PDI for this ticket, which appears to say that he received a refund due to an incorrect Internet fare. This may suggest that someone at the airline at one time thought that Hallam had been overcharged. The superior court apparently found that other evidence outweighed it, and decided that Hallam had not shown that he bought the ticket at the lower fare. ***HN11***[] "We ordinarily will not disturb findings **[**18]** of fact made upon conflicting evidence." [19] In view of all the evidence and the superior court's findings, we are not left "with a definite and firm conviction on the entire record that a mistake has been made." [20] The superior court's findings are not clearly erroneous and we therefore affirm its judgment in favor of Alaska Airlines on this claim.

G. The Superior Court Properly Denied Hallam's Motion for Further Time Under *Rule 56(f)*.

After Alaska Airlines filed its motion for summary judgment, Hallam moved to "reopen" discovery. The court denied his motion. Hallam now appeals that denial. He treats the superior court's action as the denial of a motion under *Alaska Rule of Civil Procedure 56(f)*, claiming that he had the right to conduct discovery to oppose summary judgment. ***HN12***[] The rule "allows a party opposing summary judgment to seek additional **[**19]** time to gather and submit evidence to justify the party's opposition." [21] Specifically, ***HN13***[] when the party opposing summary judgment demonstrates to the court's satisfaction that the party "cannot for reasons stated present by affidavit facts essential to justify the party's opposition," the court may choose one of two remedies -- it may decline to grant summary judgment or it may grant a continuance. Although the superior court denied Hallam's *Rule 56(f)* motion, it

[18] *See id.*

[19] *In re Friedman, 23 P.3d 620, 625 (Alaska 2001)*.

[20] *City of Hydaburg, 858 P.2d at 1135* (quotation marks omitted).

[21] *Gamble v. Northstore Partnership, 907 P.2d 477, 484-85 (Alaska 1995)*.

did not enter summary judgment against him on any of the ticketing claims for which he claims he needed further discovery. He therefore was not harmed by the denial of his *Rule 56(f)* motion.

Hallam further claims that discovery should have been reopened because Alaska Airlines failed to produce documents that they were required to produce in the initial discovery period. [22] ***HN14***[] Deciding whether or not to reopen discovery is within the trial court's discretion, and **[**20]** is subject to harmless error review. [23] Hallam only identifies two of the "missing documents," neither of which makes a case for reopening discovery.

The first concerns the Puerto Vallarta ticket. In its summary judgment motion, the airline suggested that one of the charges was for a ticket issued to Hallam himself; at a deposition, an Alaska Airlines attorney suggested the extra charge was for a ticket issued to one Anna Salyer. Hallam wants the airline to produce documentation for these theories. As described above, however, the question of how the **[**21]** extra charges came to be on Hallam's credit card is immaterial because Hallam never proved he paid them. Any error associated with this failure is harmless. [24]

[*287] The other example of missing documents Hallam provides is the documentation surrounding the expired PFD ticket: if the airline claims he exchanged a 1998 voucher for the original ticket, he argues, it should have produced the voucher. Hallam knew that the voucher would be subject to proof long before Alaska Airlines filed its summary judgment motion. The voucher was, in fact, part of his theory of the case. He could have specifically requested the documentation or made a motion to compel during discovery. The superior court was entirely justified in determining that Hallam's requests following the summary judgment motion "involved discovery that could have (and should have) been made long ago." The court's refusal to reopen discovery at that time was not an **[**22]** abuse of discretion.

H. The Superior Court Properly Dismissed Hallam's Individual Claims Brought Under the Alaska Unfair Trade Practices Act and Alaska *Antitrust Law* and Properly Denied Hallam Leave To Amend His Complaint To Include Them.

Hallam's complaint includes both individual and class claims based on alleged violations of state ***antitrust law*** and the Unfair Trade Practices Act. The superior court dismissed these claims on the ground that Hallam, as a pro se litigant, could not represent the class; it held that the question whether the unfair trade practices claims are preempted by federal law was mooted by its class-representation decision. Hallam moved for reconsideration in order to reinstate the individual aspect of these claims. The court denied his motion without explanation. The court then noted that "neither Mr. Hallam's motion to amend nor the proposed amended complaint make clear how the actions [Hallam alleged] violate the cited [statutory] provisions." This order gave Hallam five days to submit a statement explaining how the conduct alleged in his contract and conversion claims violated the cited statutes. His response, although it contains some **[**23]** language suggesting he may have abandoned his motion to amend, detailed the actions he alleged violated the statutes. The superior court denied the motion for leave to amend "for the reasons set forth in [its initial ruling], the opposition memorandum by Alaska Airlines and the summary judgment order entered on this date as it relates to preemption of state statutory consumer protection claims related to airline services." Hallam appeals both the dismissal of the individual claims and the superior court's denial of leave to amend the complaint to add them.

---

[22] Hallam also raises the airline's failure to produce certain documents as a distinct point on appeal. He did not, however, make any motion before the superior court to compel production of these "missing" documents. Without a motion to compel, there is no decision for this court to review. We therefore consider this argument only in the context of his motion to reopen discovery.

[23] *Taylor v. Johnston, 985 P.2d 460, 466 (Alaska 1999)*.

[24] *See Walden v. Dep't of Transp., State, 27 P.3d 297, 307-08 (Alaska 2001)*.

"Even when the court concludes that no portion of the action is maintainable as a class action, the individual plaintiff[] may continue it on an individual basis . . . ." [25] Hallam claims that he should have been allowed to amend his complaint to reinstate the individual claims after they were dismissed along with the class claims. The superior court correctly denied his motion for leave to amend because amendment would be futile as the claims were clearly preempted by the federal Airline Deregulation Act. [26] ***HN15***[] "If the proposed change clearly is frivolous or advances a claim or defense that is legally insufficient on its face, **[**24]** the court may deny leave to amend." [27]

The federal statute's preemption provision provides that ***HN16***[] "a State . . . may not enact or enforce a law, regulation, or other provision having the force and effect of law related to a price, route, or service of an air carrier." [28] ***HN17***[] The provision is "broadly preemptive," [29] **[**26]** reaching any state **[**25]** laws or **[*288]** enforcement actions "having a connection with or reference to airline rates, routes, or services." [30] In *American Airlines v. Wolens*, the United States Supreme Court held that the Airline Deregulation Act preempted a claim under the Illinois analog to the Unfair Trade Practices Act challenging an airline's changes to its frequent-flier program. [31] *Wolens* requires an analysis of the particular claims in question. Here, Hallam's claims plainly relate to a price, route, or service of an air carrier. He challenges the airline's policy of classifying tickets as refundable or non-refundable; he challenges the airline's policy of overbooking flights; and he challenges the terms included in all tickets, relating to timetables, routes, departure and arrival times, and fares. His Unfair Trade Practices Act claims are preempted and the superior court properly denied him leave to add them.

Hallam's antitrust claims are similarly preempted. He argues under *AS 45.50.562* and *AS 45.50.564* that Alaska Airlines "has attempted to contract, conspire, and combine" with other airlines "to monopolize air travel in this region" and "restrain[] free trade." He does not describe how this restraint of trade and monopoly manifest themselves, despite the superior court's order requiring him to state the facts underlaying the claims. It is hard to imagine that they do not relate to airline rates, routes, or services. We assume that these claims resemble those in the rest of his complaint, all of which involve the airline's ticketing, ticket pricing, or boarding procedures and would be preempted if made the subject of an antitrust charge. Hallam waived his opportunity to convince the superior court otherwise when he failed to take the opportunity for clarification offered to him by the court. The superior court properly held his antitrust **[**27]** claims were preempted and refused to grant him leave to amend his complaint.

I. The Superior Court Properly Refused Recusal.

Hallam asserts that Judge Collins should have recused herself because "the evidence on record is overwhelming in showing a bias" on her part. He also refers, without documentation, to "statements" Judge Collins made "at the

---

[25] 7B WRIGHT, MILLER & KANE, FEDERAL PRACTICE & PROCEDURE § 1785, at 117; *see also* *Mead v. Parker, 464 F.2d 1108, 1112 (9th Cir. 1972)* ("Nothing in *Rule 23, F.R.Civ.P.* contemplates that an action shall be dismissed if the court determines that it cannot be maintained as a class action. In all actions, whether determined to be class actions or not, there are individuals who bring the action asserting claims for relief in their own behalf.").

[26] *49 U.S.C. § 41713*.

[27] *Taylor, 985 P.2d at 464* (quoting 6 WRIGHT, MILLER & KANE, FEDERAL PRACTICE & PROCEDURE § 1487 (2d ed.1990)).

[28] *49 U.S.C. § 41713(b)(1)*.

[29] *American Airlines, Inc. v. Wolens, 513 U.S. 219, 225, 130 L. Ed. 2d 715, 115 S. Ct. 817 (1995)*; *see also* *Morales v. Trans World Airlines, Inc., 504 U.S. 374, 383-84, 119 L. Ed. 2d 157, 112 S. Ct. 2031 (1992)* ***HN18***[] (analogizing Airline Deregulation Act preemption to "broad scope" and "expansive sweep" of preemption under ERISA, *29 U.S.C. § 1144(a)*).

[30] *Morales, 504 U.S. at 384* (citation omitted).

[31] *513 U.S. at 226-28*.

pretrial conference regarding her failure to administratively transfer this case when she dismissed the class claims, as a result of the dollar value involved." He finally refers to an incident involving another, unrelated case before Judge Collins, *Hallam v. Alaska Travel Adventures*, in which, he alleges, "Judge Collins went out of her way to interfere with production of the electronic record in that case."

HN19[] "Recusal was never intended to enable a discontented litigant to oust a judge because of adverse rulings made." [32] Judge Collins gave Hallam many chances to clarify motions and prove his case. The fact that he did not prove it does not show bias on her part. His claim is "little more than an expression of [his] dissatisfaction with the superior court's rulings." [33] There was no abuse of discretion in Judge Collins's decision **[**28]** to remain on the case.

J. The Superior Court Did Not Abuse Its Discretion in Awarding Fees and Costs to Alaska Airlines.

Hallam makes a cursory argument that Alaska Airlines should not have been awarded fees and costs because "they failed to respond honestly to requests for admissions." He identifies no specific failures or dishonesty. Even giving this argument the liberal reading due pro se plaintiffs, we find no abuse of discretion.

[*289] IV. CONCLUSION

For the foregoing reasons, the judgment of the superior court is AFFIRMED in its entirety.

369 F.3d 124 *; 2004 U.S. App. LEXIS 10171 **; 174 L.R.R.M. 3185; 149 Lab. Cas. (CCH) P10,345; 2004-1 Trade Cas. (CCH) P74,422

MAURICE CLARETT, Plaintiff-Appellee, v. NATIONAL FOOTBALL LEAGUE, Defendant-Appellant.

Subsequent History: US Supreme Court certiorari denied by *Clarett v. NFL, 544 U.S. 961, 125 S. Ct. 1728, 161 L. Ed. 2d 602, 2005 U.S. LEXIS 2979 (2005)*

Related proceeding at *National Football League v. Vigilant Ins. Co., 2006 N.Y. App. Div. LEXIS 13446 (N.Y. App. Div. 1st Dep't, Nov. 14, 2006)*

Prior History: **[**1]** Defendant-appellant National Football League ("NFL") appeals from a judgment of the United States District Court of the Southern District of New York (Scheindlin, J.) granting summary judgment in favor of plaintiff-appellee Maurice Clarett on his claim that the NFL's eligibility rules, which prevent him from entering the NFL draft because he is not more than three football seasons removed from high school, violate the antitrust laws. We hold that the challenged rules are shielded from the antitrust laws by the non-statutory labor exemption and on that basis REVERSE and REMAND for the district court to enter judgment in favor of defendant. As the NFL is entitled to summary judgment, we further VACATE the district court's order declaring Clarett eligible to participate in the 2004 NFL draft that was stayed pending appeal.

Clarett v. NFL, 306 F. Supp. 2d 379, 2004 U.S. Dist. LEXIS 1396 (S.D.N.Y., 2004)

Disposition: Reversed in part, vacated in part and remanded.

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

HN2[] Collectives & Cooperatives, Clayton Act

Although the interaction of the antitrust laws and federal labor legislation is an area of law marked more by controversy than by clarity, it has long been recognized that in order to accommodate the collective bargaining process, certain concerted activity among and between labor and employers must be held to be beyond the reach of the antitrust laws. Courts, therefore, have carved out two categories of labor exemptions to the antitrust laws: the so-called statutory and non-statutory exemptions. The non-statutory exemption has been inferred from federal labor statutes, which set forth a national labor policy favoring free and private collective bargaining; which require good-faith bargaining over wages, hours, and working conditions; and which delegate related rulemaking and interpretive authority to the National Labor Relations Board (NLRB). The exemption exists not only to prevent the courts from usurping the NLRB's function of determining, in the area of industrial conflict, what is or is not a reasonable practice, but also to allow meaningful collective bargaining to take place by protecting some restraints on competition imposed through the bargaining process from antitrust scrutiny.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

HN3[] Antitrust & Trade Law, Exemptions & Immunities

While a union may make wage agreements with a multi-employer bargaining unit and may in pursuance of its own union interests seek to obtain the same terms from other employers without incurring antitrust liability, a union forfeits its exemption from the antitrust laws when it is clearly shown that it has agreed with one set of employers to impose a certain wage scale on other bargaining units.

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

Labor & Employment Law > Collective Bargaining & Labor Relations > Federal Preemption > Primacy of Labor Policy

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

HN4[] Labor, Nonstatutory Exemptions

The United States Court of Appeals for the Second Circuit has never regarded the United States Court of Appeals for the Eighth Circuit's test in Mackey as defining the appropriate limits of the non-statutory exemption. Moreover, the Second Circuit disagrees with the Eighth Circuit's assumption in Mackey that the United States Supreme Court's decisions in Connell, Jewel Tea, Pennington, and Allen Bradley dictate the appropriate boundaries of the non-statutory exemption for cases in which the only alleged anticompetitive effect of the challenged restraint is on a labor market organized around a collective bargaining relationship. Indeed, the Second Circuit has previously recognized that these decisions are of limited assistance in determining whether an athlete can challenge restraints on the market for professional sports players imposed through a collective bargaining process, because all involved injuries to employers who asserted that they were being excluded from competition in the product market.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

HN5[] Regulated Industries, Sports

The nonstatutory labor exemption waives antitrust liability for restraints on competition imposed through the collective bargaining process, so long as such restraints operate primarily in a labor market characterized by collective bargaining.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

HN6[] Exemptions & Immunities, Labor

The non-statutory exemption applies where restraint alleged is not a direct restraint on the business market but rather a direct restraint on the labor market, with only tangential effects on the business market.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

HN7[] Scope, Exemptions

The term nonstatutory exemption is a shorthand description of an interpretation of the Sherman Act, making that statute inapplicable to restraints imposed in the interest of lawful union monopoly power in the labor market.

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

HN8[] **Collective Bargaining & Labor Relations, Bargaining Subjects**

Because the National Football League (NFL) players have unionized and have selected the NFL Players Association as its exclusive bargaining representative, labor law prohibits an individual player from negotiating directly the terms and conditions of his employment with any NFL club, and an NFL club would commit an unfair labor practice were it to bargain with the player individually without the union's consent. The terms and conditions of the player's employment are instead committed to the collective bargaining table and are reserved to the NFL and the players union's selected representative to negotiate.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

HN9[] **Regulated Industries, Sports**

To be sure, in sports leagues, unionized players generally engage in individual bargaining with teams. However, it must be emphasized that such individual bargaining is not an exercise of a right to free competition under the antitrust laws; rather, it is an exercise of a right derived from collective bargaining itself.

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

Labor & Employment Law > Collective Bargaining & Labor Relations > Duty of Fair Representation

HN10[] **Collective Bargaining & Labor Relations, Bargaining Subjects**

The National Football League (NFL) players' union's representative possesses powers comparable to those possessed by a legislative body both to create and restrict the rights of those whom it represents. In seeking the best deal for NFL players overall, the representative has the ability to advantage certain categories of players over others, subject of course to the representative's duty of fair representation. The union representative may, for example, favor veteran players over rookies, and can seek to preserve jobs for current players to the detriment of new employees and the exclusion of outsiders. This authority and exclusive responsibility is vested in the players' representative once a mandatory collective bargaining relationship is established and continues throughout the relationship. For the duration of that relationship, federal labor law then establishes a soup-to-nuts array of rules, tribunals and remedies to govern the collective bargaining process.

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

Governments > Courts > Judicial Precedent

HN11[] **Collective Bargaining & Labor Relations, Bargaining Subjects**

Though tailored to the unique circumstance of a professional sports league, the eligibility rules for the draft represent a quite literal condition for initial employment and for that reason alone might constitute a mandatory bargaining subject. But moreover, the eligibility rules constitute a mandatory bargaining subject because they have tangible effects on the wages and working conditions of current National Football League players. Because the unusual economic imperatives of professional sports raise numerous problems with little or no precedent in standard industrial relations, the United States Court of Appeals for the Second Circuit has recognized that many of the arrangements in professional sports that, at first glance, might not appear to deal with wages or working conditions are indeed mandatory bargaining subjects.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

HN12[] **Regulated Industries, Sports**

The preservation of jobs is within the area of proper union concern, and union activity having as its object the preservation of jobs for union members is not violative of the anti-trust laws.

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

Governments > Legislation > Effect & Operation > General Overview

HN13[] **Collective Bargaining & Labor Relations, Bargaining Subjects**

But simply because the National Football League's eligibility rules work a hardship on prospective rather than current employees does not render them impermissible. The eligibility rules in this respect are not dissimilar to union demands for hiring hall arrangements that have long been recognized as mandatory subjects of bargaining. In such hiring hall arrangements, the criteria for employment are set by the rules of the hiring hall rather than the employer alone. Nevertheless, such an arrangement constitutes a permissible, mandatory subject of bargaining despite the fact that it concerns prospective rather than current employees.

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

HN14[] **Collective Bargaining & Labor Relations, Bargaining Subjects**

In the context of this collective bargaining relationship, the National Football League and its players union can agree that an employee will not be hired or considered for employment for nearly any reason whatsoever so long as they do not violate federal laws such as those prohibiting unfair labor practices, *29 U.S.C.S. § 201 et seq.*, or discrimination, *42 U.S.C.S. § 2000e et seq.* Any challenge to those criteria must be founded on labor rather than ***antitrust law***.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN15[] **Regulated Industries, Sports**

In the context of collective bargaining, federal labor policy permits the National Football League (NFL) teams to act collectively as a multi-employer bargaining unit in structuring the rules of play and setting the criteria for player employment. Such concerted action is encouraged as a matter of labor policy and tolerated as a matter of ***antitrust law***, despite the fact that it plainly involves horizontal competitors for labor acting in concert to set and to implement terms of employment. Multi-employer bargaining in professional sports, moreover, offers the added advantage of allowing the teams to agree with one another and, as required, bargain with the union over the host of uniform rules needed for the successful operation of the league, such as the number of games, length of season, playoff structures, and roster size and composition. The fact that the challenged rules govern eligibility for the NFL draft, thereby excluding some potential employees from consideration, does not render the NFL's adherence to its eligibility rules as a multi-employer bargaining unit suspect.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN16[] **Regulated Practices, Monopolies & Monopolization**

The primary objective of all the antitrust legislation has been to preserve business competition and to proscribe business monopoly.

Judges: Before: SACK, SOTOMAYOR, Circuit Judges, and KAPLAN, District Judge. *

Opinion by: SOTOMAYOR

Opinion

---

* The Honorable Lewis A. Kaplan, Judge of the United States District Court for the Southern District of New York, sitting by designation.

[*125] SOTOMAYOR, *Circuit Judge*:

Defendant-appellant National Football League ("NFL" or "the League") appeals from a judgment of the United States District Court for the Southern District of New York (Scheindlin, J.) ordering plaintiff-appellee Maurice Clarett ("Clarett") eligible to enter this year's NFL draft on the ground that the NFL's eligibility rules requiring Clarett to wait at least three full football seasons after his high school graduation before entering the draft violate antitrust laws. In reaching its conclusion, the district court held, *inter alia*, that the eligibility rules are not immune from **[**4]** antitrust scrutiny under the non-statutory labor exemption. [1] We disagree and reverse.

BACKGROUND

Clarett, former running back for Ohio State University ("OSU") and Big Ten **[*126]** Freshman of the Year, is an accomplished and talented amateur football player. [2] After gaining national attention as a high school player, Clarett became the first college freshman since 1943 to open as a starter at the position of running back for OSU. He led that team through an undefeated season, even scoring the winning touchdown in a double-overtime victory in the 2003 Fiesta Bowl to claim the national championship. [3] Prior to the start of his second college **[**5]** season, however, Clarett was suspended from college play by OSU for reasons widely reported but not relevant here. [4] Forced to sit out his entire sophomore season, Clarett is now interested in turning professional by entering the NFL draft. Clarett is precluded from so doing, however, under the NFL's current rules governing draft eligibility.

Founded in 1920, the NFL today is comprised of 32 member clubs and is by far the most successful professional football league in North America. [5] Because of the League's fiscal success and tremendous public following, a career as an NFL player "represents an unparalleled **[**6]** opportunity for an aspiring football player in terms of salary, publicity, endorsement opportunities, and level of competition." *Clarett, 306 F. Supp. 2d at 384*. But since 1925, when Harold "Red" Grange provoked controversy by leaving college to join the Chicago Bears, [6] the NFL has required aspiring professional football players to wait a sufficient period of time after graduating high school to accommodate and encourage college attendance before entering the NFL draft. For much of the League's history, therefore, a player, irrespective of whether he actually attended college or not, was barred from entering the draft until he was at least four football seasons removed from high school. The eligibility rules were relaxed in 1990, however, to permit a player to enter the draft three full seasons after that player's high school graduation.

[7]** Clarett "graduated high school on December 11, 2001, two-thirds of the way through the 2001 NFL season" and is a season shy of the three necessary to qualify under the draft's eligibility rules. Clarett Decl. at P 6. Unwilling to forego the prospect of a year of lucrative professional play or run the risk of a career-compromising injury were his entry into the draft delayed until next year, Clarett filed this suit alleging that the NFL's draft eligibility rules are an unreasonable restraint of trade in violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*, and Section 4 of the Clayton Act, *15 U.S.C. § 15*.

---

[1] Because we find that the eligibility rules are immune from antitrust scrutiny under the non-statutory labor exemption, we do not express an opinion on the district court's legal conclusions that Clarett alleged a sufficient antitrust injury to state a claim or that the eligibility rules constitute an unreasonable restraint of trade in violation of the antitrust laws.

[2] These facts, except where otherwise noted, are undisputed and taken from the opinion of the district court. *See* *Clarett v. Nat'l Football League, 306 F. Supp. 2d 379, 382 (S.D.N.Y. 2004)*.

Because the major source of the parties' factual disputes is the relationship between the challenged eligibility rules and the current collective bargaining agreement governing the terms and conditions of employment for NFL players, some elaboration on both the collective bargaining agreement and the eligibility rules is warranted. The current collective bargaining agreement **[*127]** between the NFL and its players union was negotiated between the NFL Management Council ("NFLMC"), which is the NFL member clubs' multi-employer bargaining unit, **[**8]** and the NFL Players Association ("NFLPA"), the NFL players' exclusive bargaining representative. This agreement became effective in 1993 and governs through 2007. Despite the collective bargaining agreement's comprehensiveness with respect to, *inter alia*, the manner in which the NFL clubs select rookies through the draft and the scheme by which rookie compensation is determined, the eligibility rules for the draft do not appear in the agreement.

At the time the collective bargaining agreement became effective, the eligibility rules appeared in the NFL Constitution and Bylaws, which had last been amended in 1992. [7] Specifically, Article XII of the Bylaws ("Article XII"), entitled "Eligibility of Players," prohibited member clubs from selecting any college football player through the draft process who had not first exhausted all college football eligibility, graduated from college, or been out of high school for five football seasons. Clubs were further barred from drafting any person who either did not attend college, or attended college but did not play football, unless that person had been out of high school for four football seasons. Article XII, however, also included an **[**9]** exception that permitted clubs to draft players who had received "Special Eligibility" from the NFL Commissioner. In order to qualify for such special eligibility, a player was required to submit an application before January 6 of the year that he wished to enter the draft and "at least three NFL seasons must have elapsed since the player was graduated from high school." The Commissioner's practice apparently was, and still is, to grant such an application so long as three full football seasons have passed since a player's high school graduation. [8] Appellant's Brief, at 7 n.3.

[10]** Although the eligibility rules do not appear in the text of the collective bargaining agreement, the NFL Constitution and Bylaws that at the time of the agreement's adoption contained the eligibility rules are mentioned in three separate provisions relevant to our discussion. First, in Article III, Section 1 (Scope of Agreement), the collective bargaining agreement states:

> This Agreement represents the complete understanding of the parties as to all subjects covered herein, and there will be no change in the terms and conditions of this Agreement without mutual consent . . . . The NFLPA and the Management Council waive any rights to bargain with one another concerning any subject covered or not covered in this Agreement for the duration of this Agreement, *including the provisions of the NFL Constitution and Bylaws*; provided, however, that if any proposed change in the NFL Constitution and Bylaws during the term of this Agreement could significantly affect the terms and conditions of employment of NFL players, then the [NFLMC] will give the NFLPA notice of and negotiate the proposed change in good faith.

[*128] (emphasis added). Second, Article IV, Section 2 (No **[**11]** Suit) provides generally that "neither [the NFLPA] nor any of its members" will sue or support a suit "relating to the presently existing provisions of the Constitution and Bylaws of the NFL as they are currently operative and administered." Third, Article IX, Section 1 (Non-Injury Grievance) makes "any dispute . . . involving the interpretation of, application of, or compliance with, . . . any applicable provision of the NFL Constitution and Bylaws pertaining to terms and conditions of employment of NFL players" subject to the grievance procedures afforded under the collective bargaining agreement.

Before the collective bargaining agreement became effective, a copy of the Constitution and Bylaws, as amended in 1992, was provided by the NFL to the NFLPA along with a letter, dated May 6, 1993, that "confirm[ed] that the attached documents are the presently existing provisions of the Constitution and Bylaws of the NFL referenced in

---

[7] After the Constitution and Bylaws were amended in 1992, a revised copy was sent by the NFL Commissioner to all club owners, presidents and general managers. A memorandum from the Commissioner that accompanied the revised Constitution and Bylaws noted that changes had been made to the eligibility rules.

[8] At oral argument, counsel for Clarett clarified that his challenge is not limited to the "Special Eligibility" rule, as his papers on appeal might suggest, but extends to any and all of the eligibility rules that would keep Clarett from entering the NFL draft this year. We refer to these rules collectively as "the eligibility rules."

Article IV, Section 2, of the Collective Bargaining Agreement." The May 6 letter was signed by representatives of the NFL and the NFLPA. The only other evidence presented to the district court by the NFL concerning the negotiation of the collective bargaining **[**12]** agreement were the two declarations of Peter Ruocco, Senior Vice President of Labor Relations at the NFLMC. In the second declaration, Ruocco attests that "during the course of collective bargaining that led to the [collective bargaining agreement], the [challenged] eligibility rule itself was the subject of collective bargaining." Ruocco Decl. at P 8.

In 2003, ten years into the life of the collective bargaining agreement, Article XII was amended. Although the substance of most of the eligibility rules was retained, the "Special Eligibility" provision was removed and substituted with the following [9]:

> If four seasons have not elapsed since the player discontinued high school, he is ineligible for selection, but may apply to the Commissioner for special eligibility.

The Bylaws then refer to a separate memorandum issued by the Commissioner on February 16, 1990 - three years before the current collective bargaining agreement became effective - pursuant to his authority under the Bylaws to establish necessary policies and procedures. That memorandum states that "applications for special eligibility for the 1990 draft will be accepted only from college players **[**13]** as to whom three full *college* seasons have elapsed since their high school graduation." (emphasis added). [10] It is this version of the eligibility rules that the NFL relies upon in refusing Clarett special eligibility for this year's draft, and it is this version of **[*129]** the eligibility rules that Clarett seeks to invalidate.

[14]** After Clarett filed this suit in September 2003, the parties conducted limited discovery and thereafter moved for summary judgment. Clarett sought summary judgment on the merits of his antitrust claim. The NFL asserted that Clarett lacked "antitrust standing" and that, as a matter of law, the eligibility rules were immune from antitrust attack by virtue of the non-statutory labor exemption. On February 5, 2004, the district court granted summary judgment in favor of Clarett and ordered him eligible to enter this year's draft. *Clarett, 306 F. Supp. 2d at 410-11*. First, relying on the test articulated by the Eighth Circuit in *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*, the district court rejected the NFL's argument that the antitrust laws are inapplicable to the eligibility rules because they fall within the non-statutory labor exemption to the antitrust laws. *Clarett, 306 F. Supp. 2d at 397*. Specifically, the district court held that the exemption does not apply because the eligibility rules: 1) are not mandatory subjects of collective bargaining, 2) affect only "complete strangers to the bargaining relationship, **[**15]** " and 3) were not shown to be the product of arm's-length negotiations between the NFL and its players union. *Id. at 393-97*.

Second, the district court ruled against the NFL on its contention that Clarett lacked standing because he had not demonstrated a sufficient "antitrust injury" to maintain this suit, holding that the "inability to compete in the market" for NFL players' services is sufficient injury for antitrust purposes. *Id. at 403*.

Third, on the merits of Clarett's antitrust claim, the district court found that the eligibility rules were so "blatantly anticompetitive" that only a "quick look" at the NFL's procompetitive justifications was necessary to reach the conclusion that the eligibility rules were unlawful under the antitrust laws. *Id. at 408*. The NFL had argued that because the eligibility rules prevent less physically and emotionally mature players from entering the league, they justify any incidental anticompetitive effect on the market for NFL players. *Id.* In so doing, according to the NFL, the eligibility rules guard against less-prepared and younger players entering the League and risking injury to

[9] Although Article III, Section 1 of the collective bargaining agreement obligates the NFL to notify the players union of, and to bargain over, any change to the Bylaws that "could significantly affect the terms and conditions" of players' employment, the record is silent as to whether the NFL or the players union considered the changes to Article XII significant, whether the NFL notified the players union of these changes, or whether the changes were bargained over.

[10] Whereas the pre-2003 version of the Constitution and Bylaws authorized special eligibility for players after the passing of "three NFL seasons," the current eligibility rules as established by the Bylaws and the Commissioner's memorandum require that "three full college seasons" have elapsed. Clarett is neither three NFL seasons nor three college seasons out of high school. Because the difference is immaterial for our purposes, we use the less specific "three football seasons" when referring to the amount of time after graduating high school a player must wait before entering the draft.

themselves, **[**16]** prevent the sport from being devalued by the higher number of injuries to those young players, protect its member clubs from having to bear the costs of such injuries, and discourage aspiring amateur football players from enhancing their physical condition through unhealthy methods. *Id. at 408-09*. The district court held that all of these justifications were inadequate as a matter of law, concluding that the NFL's purported concerns could be addressed through less restrictive but equally effective means. *Id. at 410*. Finding that the eligibility rules violated the antitrust laws, the district court entered judgment in favor of Clarett, and, recognizing that this year's draft was then just over two months away, issued an order deeming Clarett eligible to participate in the draft.

The NFL subsequently moved for a stay pending appeal, which the district court denied. *Clarett v. Nat'l Football League, 306 F. Supp. 2d 411 (S.D.N.Y. 2004)*. After filing a notice of appeal, the NFL petitioned to have the appeal heard on an expedited basis and again moved to stay the district court's order pending appeal. On March 30, 2004, we agreed to hear **[**17]** the appeal on an expedited basis and set a substantially compressed briefing schedule. Following oral argument on April 19, we granted the NFL's motion to stay the **[*130]** district court's order, citing the NFL's "likelihood of success on the merits" and noting that the resulting harm to Clarett was mitigated by the NFL's promise to "hold a supplemental draft for [Clarett] and all others similarly situated" were the district court's judgment affirmed. Order of April 19, 2004. Clarett thereafter made successive applications to two Justices of the Supreme Court to lift this Court's stay order. Both applications were denied. Clarett did not participate in the NFL draft held on April 24 and 25, 2004.

DISCUSSION

Clarett argues that the NFL clubs are horizontal competitors for the labor of professional football players and thus may not agree that a player will be hired only after three full football seasons have elapsed following that player's high school graduation. That characterization, however, neglects that the labor market for NFL players is organized around a collective bargaining relationship that is provided for and promoted by federal labor law, and that the NFL clubs, as a **[**18]** multi-employer bargaining unit, can act jointly in setting the terms and conditions of players' employment and the rules of the sport without risking antitrust liability. For those reasons, the NFL argues that federal labor law favoring and governing the collective bargaining process precludes the application of the antitrust laws to its eligibility rules. We agree.

HN1[] The district court's denial of the NFL's motion for summary judgment is reviewed *de novo*, and all factual inferences are drawn in favor of Clarett. *See* *Amnesty America v. Town of West Hartford, 361 F.3d 113, 122 (2d Cir. 2004)*.

I.

HN2[] Although "the interaction of the [antitrust laws] and federal labor legislation is an area of law marked more by controversy than by clarity," *Wood v. Nat'l Basketball Ass'n, 809 F.2d 954, 959 (2d Cir. 1987)* (citing R. Gorman, *Labor Law, Unionization and Collective Bargaining* 631-35 (1976)), it has long been recognized that in order to accommodate the collective bargaining process, certain concerted activity among and between labor and employers must be held to be beyond the reach of the antitrust laws. *See* *United States v. Hutcheson, 312 U.S. 219, 85 L. Ed. 788, 61 S. Ct. 463 (1941)*; **[**19]** *Apex Hosiery Co. v. Leader, 310 U.S. 469, 84 L. Ed. 1311, 60 S. Ct. 982 (1940)*. Courts, therefore, have carved out two categories of labor exemptions to the antitrust laws: the so-called statutory and non-statutory exemptions. [11] We deal here only with the non-statutory exemption.

---

[11] The statutory exemption, so named because it is derived from the texts of the Clayton Act, *15 U.S.C. § 17*, *29 U.S.C. § 52*, and the Norris-LaGuardia Act, *29 U.S.C. § 101 et seq*., shields from the antitrust laws certain unilateral conduct of labor groups such as boycotts and picketing. *See* *H.A. Artists & Assocs., Inc. v. Actors' Equity Ass'n, 451 U.S. 704, 714-15, 68 L. Ed. 2d 558, 101 S. Ct. 2102 (1981)*. Because the statutory exemption does not provide any protection for "concerted action or agreements between unions and nonlabor parties," *Connell Constr. Co. v. Plumbers & Steamfitters Local No. 100, 421 U.S. 616, 622, 44 L. Ed. 2d 418, 95 S. Ct. 1830 (1975)*, the NFL does not rely on the statutory exemption in arguing that its eligibility rules are immune from the antitrust laws.

[20]** The non-statutory exemption has been inferred "from federal labor statutes, which set forth a national labor policy favoring free and private collective bargaining; which require good-faith bargaining over wages, hours, and working conditions; and which delegate related rulemaking and interpretive authority to the National Labor Relations Board." *Brown v. Pro Football, Inc., 518 U.S. 231, 236, 135 L. Ed. 2d 521, **[*131]** 116 S. Ct. 2116 (1996)* (internal citations omitted). The exemption exists not only to prevent the courts from usurping the NLRB's function of "determin[ing], in the area of industrial conflict, what is or is not a 'reasonable' practice," but also "to allow meaningful collective bargaining to take place" by protecting "some restraints on competition imposed through the bargaining process" from antitrust scrutiny. *Id. at 237*.

The Supreme Court has never delineated the precise boundaries of the exemption, and what guidance it has given as to its application has come mostly in cases in which agreements between an employer and a labor union were alleged to have injured or eliminated a competitor in the employer's business or product market. In the face of **[**21]** such allegations, the Court has largely permitted antitrust scrutiny in spite of any resulting detriment to the labor policies favoring collective bargaining.

In the first case to deal squarely with the non-statutory exemption, *Allen Bradley Co. v. Local No. 3, International Brotherhood of Electrical Workers, 325 U.S. 797, 89 L. Ed. 1939, 65 S. Ct. 1533 (1945)*, the New York City electrical workers union negotiated a series of agreements in which local manufacturers and contractors agreed to deal only with other manufacturers and contractors that employed the union's members. *Id. at 799-800*. A non-local manufacturer that was excluded from the market as a result successfully sued under the antitrust laws, establishing that these agreements were "but one element in a far larger program in which contractors and manufacturers united with one another to monopolize all the business in New York City, to bar all other business men from that area, and to charge the public prices above a competitive level." *Id. at 809*. Although the Court recognized that the union sought the agreements out of "a desire to get and hold jobs for themselves at good wages and under **[**22]** high working standards," it held that the non-statutory exemption did not apply where unions "combine with employers and with manufacturers of goods to restrain competition in, and to monopolize the marketing of, such goods." *Id. at 798*.

Twenty years later, the Court considered two cases dealing with the non-statutory exemption. Although the Court again refused to apply the non-statutory exemption in the first, *United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*, it did apply the exemption in *Local No. 189, Amalgamated Meat Cutters & Butcher Workmen v. Jewel Tea Co., 381 U.S. 676, 14 L. Ed. 2d 640, 85 S. Ct. 1596 (1965)*. In *Pennington*, a small coal mine operator claimed that a miners union violated the antitrust laws by agreeing with large coal mine companies that the union would demand a higher wage scale from small coal mine operators in an effort to drive the small mine operators from the market. Echoing its decision in *Allen Bradley*, the Court held that ***HN3***[] while "a union may make wage agreements with a multi-employer bargaining unit and may in pursuance of its own union interests seek to obtain the same terms from other **[**23]** employers" without incurring antitrust liability, "a union forfeits its exemption from the antitrust laws when it is clearly shown that it has agreed with one set of employers to impose a certain wage scale on other bargaining units." *Pennington, 381 U.S. at 665*.

The Court, however, reached a different result in *Jewel Tea*, which involved a challenge to a collective bargaining agreement between the butchers union and meat sellers in Chicago, whereby the meat sellers **[*132]** agreed to limit the operation of meat counters to certain hours. *See Jewel Tea, 381 U.S. at 679-80*. The union sought the restriction not only to cabin the hours in the workday but also to diminish the threat posed to members' job security by evening sales of prepackaged meat and the nighttime use of unskilled labor. *Id. at 682*. Jewel Tea was one of the meat sellers that signed the agreement. It did so, however, only under pressure from the union and then challenged the hours restriction on antitrust grounds. Jewel Tea notably did not allege that the hours restriction eliminated competition among the meat sellers that made up the bargaining unit or that the union sought **[**24]** the hours restriction from Jewel Tea at the behest of other meat sellers. *Id. at 688*.

A majority of the Court agreed that the hours restriction fell within the non-statutory exemption, but the Justices disagreed as to the reason for applying the exemption. Justice White, writing for himself and two other Justices, advocated that the application of the non-statutory exemption should be determined by balancing the "interests of union members" served by the restraint against "its relative impact on the product market." *Id. at 690 n.5*. Applying that test, Justice White held that the hours restriction was

> so intimately related to wages, hours and working conditions that the unions' successful attempt to obtain that provision through bona fide, arm's-length bargaining in pursuit of their own labor union policies, and not at the behest of or in combination with nonlabor groups, falls within the protection of the national labor policy and is therefore exempt from the Sherman Act.

Id. at 689-90. [12]

[25]** Concurring in *Jewel Tea* but dissenting in *Pennington*, Justice Goldberg, writing for himself and two Justices, found that no such balancing was necessary. Because federal labor law obligates the union and employer to bargain in good faith and permits unions to strike over those issues that relate to workers' wages, hours, or terms and conditions of employment, Justice Goldberg found that it would "stultify the congressional scheme" to expose collective bargaining agreements on these so-called mandatory bargaining subjects to antitrust liability. *Id. at 712*. Therefore, according to Justice Goldberg, all "collective bargaining activity concerning mandatory subjects of bargaining under the [labor laws] is not subject to the antitrust laws." *Id. at 710*.

Another ten years later, in *Connell Construction Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 44 L. Ed. 2d 418, 95 S. Ct. 1830 (1975)*, the Court held the non-statutory exemption did not protect a union's agreement with a contractor that bound the contractor to deal only with subcontractors that employed the union's members. The challenged agreement was not a collective bargaining agreement, **[**26]** and the union did not represent the contractor's employees; rather, the contractor acceded to the agreement only after the union picketed one of its facilities. *Id. at 619*. The Court refused to apply the exemption to this "kind of direct restraint on the business market[, which] has substantial **[*133]** anticompetitive effects, both actual and potential, that would not follow naturally from the elimination of competition over wages and working conditions." *Id. at 625*.

Contending that these cases establish the applicable boundaries of the non-statutory exemption to be applied in the present case, Clarett argues that the NFL's eligibility rules lack all of the characteristics that led Justice White to apply the exemption in *Jewel Tea*. Clarett, furthermore, maintains that the boundaries of the exemption were properly identified in, and thus we should follow, the Eighth Circuit's decision in *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*. *Mackey* involved a challenge brought by NFL players to the League's so-called "Rozelle Rule," which required NFL clubs to compensate any club from which they hired away a player whose **[**27]** contract had expired. *Id. at 609*. Presenting arguments not dissimilar from those made in the present case, the players in *Mackey* alleged that the Rozelle Rule constituted an unlawful conspiracy amongst the NFL clubs to restrain players' abilities freely to contract their services. The NFL, for its part, asserted that the Rozelle Rule was exempt from the antitrust laws by virtue of its inclusion in the League's collective bargaining agreement with the players union. Noting that the Supreme Court had to that point applied the non-statutory exemption only in *Jewel Tea*, the Eighth Circuit gleaned from the Court's decisions, and Justice White's opinion in *Jewel Tea* in particular, that in order to fall within the non-statutory exemption, a restraint must: 1) primarily affect only the parties to the collective bargaining relationship, 2) concern a mandatory subject of collective bargaining, and 3) be the product of bona fide arm's-length bargaining. *Id. at 614*. Although the Eighth Circuit found that the Rozelle Rule satisfied the first two prongs, it nonetheless refused to apply the exemption after finding that the Rozelle Rule was not the product **[**28]** of arm's-length negotiations. *Id. at 615-16*. Noting that the Rozelle Rule predated the advent of the collective bargaining relationship between the NFL and its players union, the Eighth Circuit found that the

[12] When confronted with allegations that agreements between labor and employers damaged competition in the business or product market, we have previously regarded Justice White's decision in *Jewel Tea* as setting forth the "classic formulation" of the non-statutory exemption. See *Local 210, Laborers' Int'l Union v. Labor Relations Div. Associated Gen. Contractors of Am., 844 F.2d 69, 79 (2d Cir. 1988)*; *Berman Enterprises, Inc. v. Local 333, United Marine Div., etc.,644 F.2d 930, 935 n. 8 (2d Cir. 1981)*.

record lacked sufficient evidence to conclude that the players union had received some *quid pro quo* in exchange for including the Rule in the collective bargaining agreement. *Id. at 616*. For that reason, the Eighth Circuit held that the Rozelle Rule did not fall within the non-statutory exemption, and the Rule was invalidated on antitrust grounds. *Id. at 621-22*.

Relying on *Mackey*, the district court below held that the non-statutory exemption provides no protection to the NFL's draft eligibility rules, because the eligibility rules fail to satisfy any of the three *Mackey* factors. *Clarett, 306 F. Supp. 2d at 397*. Specifically, the district court found that the rules exclude strangers to the bargaining relationship from entering the draft, do not concern wages, hours or working conditions of current NFL players, and were not the product of bona fide arm's-length negotiations during the process that **[**29]** culminated in the current collective bargaining agreement. *Id. at 395-97*.

HN4[] We, however, have never regarded the Eighth Circuit's test in *Mackey* as defining the appropriate limits of the non-statutory exemption. See*Local 210, Laborers' Int'l Union, 844 F.2d at 80 n.2* (declining to follow *Mackey* in favor of balancing test articulated in *Jewel Tea*); *see also United States Football League v. Nat'l Football League, 842 F.2d 1335, 1372 (2d Cir. 1988)* (recognizing *Mackey* is "not consistent with our decision in *Wood v. National Basketball Ass'n*"). Moreover, we disagree with the Eighth Circuit's assumption in *Mackey* that the Supreme Court's decisions **[*134]** in *Connell*, *Jewel Tea*, *Pennington*, and *Allen Bradley* dictate the appropriate boundaries of the non-statutory exemption for cases in which the only alleged anticompetitive effect of the challenged restraint is on a labor market organized around a collective bargaining relationship. Indeed, we have previously recognized that these decisions are of limited assistance in determining whether an athlete can challenge restraints on the market for professional **[**30]** sports players imposed through a collective bargaining process, because all "involved injuries to *employers* who asserted that they were being excluded from competition in the product market." [13] *Wood v. Nat'l Basketball Ass'n, 809 F.2d 954, 963 (2d Cir. 1987)* (emphasis in original). [14]

[31]** Clarett does not contend that the NFL's draft eligibility rules work to the disadvantage of the NFL's competitors in the market for professional football or in some manner protect the NFL's dominance in that market. *Compare N. Am. Soccer League v. Nat'l Football League, 670 F.2d 1249 (2d Cir. 1982)*. He challenges the eligibility rules only on the ground that they are an unreasonable restraint upon the market for players' services. *See Clarett, 306 F. Supp. 2d at 399*. Thus, we need not decide here whether the *Mackey* factors aptly characterize the limits of the exemption in cases in which employers use agreements with their unions to disadvantage their competitors in the product or business market, because our cases have counseled a decidedly different approach where, as here, the plaintiff complains of a restraint upon a unionized labor market characterized by a collective bargaining relationship with a multi-employer bargaining unit. *See Caldwell v. Am. Basketball Ass'n, 66 F.3d 523 (2d Cir. 1995)*; *Nat'l Basketball Ass'n v. Williams, 45 F.3d 684 (2d Cir. 1995)*; *Wood v. Nat'l Basketball Ass'n, 809 F.2d 954 (2d Cir. 1987).* **[**32]** Moreover, as the discussion below makes clear, the suggestion that the *Mackey* factors provide the proper guideposts in this case simply does not comport with the Supreme Court's most recent

---

[13] Although Justice White in his opinion in *Jewel Tea* stated that the plaintiff had "not allege[d] that it ha[d] been injured by the elimination of competition among the other employers within the unit with respect to marketing hours," *Jewel Tea, 381 U.S. at 688*, Justice Goldberg in his concurrence noted that it was conceded on that record that the uniform hours restriction challenged in that cases aided "small employers at the expense of the large," *id. at 699*.

[14] We are not the only circuit to have drawn this distinction. *See, e.g.,* ***Brown v. Pro Football, 311 U.S. App. D.C. 89, 50 F.3d 1041, 1056 (D.C. Cir. 1995)***, *aff'd*, *518 U.S. 231, 135 L. Ed. 2d 521, 116 S. Ct. 2116 (1996)* ***HN5***[] ("The nonstatutory labor exemption waives antitrust liability for restraints on competition imposed through the collective bargaining process, so long as such restraints operate primarily in a labor market characterized by collective bargaining."); *Mid-America Reg'l Bargaining Ass'n v. Will County Carpenters Dist. Council, 675 F.2d 881, 893 (7th Cir. 1982)* ***HN6***[] ("[Non-statutory exemption applies where] restraint . . . alleged is not a 'direct restraint on the business market' but rather a direct restraint on the labor market, with only tangential effects on the business market."); *Consol. Express, Inc. v. N.Y. Shipping Ass'n, 602 F.2d 494, 513 (3d Cir. 1979)*, *vacated on other grounds*, ***448 U.S. 902, 65 L. Ed. 2d 1131, 100 S. Ct. 3040 (1980)*** ***HN7***[] ("The term nonstatutory exemption . . . is a shorthand description of an interpretation of the Sherman Act, making that statute inapplicable to restraints imposed in the interest of lawful union monopoly power in the labor market.").

treatment of the non-statutory labor exemption in *Brown v. Pro Football, Inc., 518 U.S. 231, 135 L. Ed. 2d 521, 116 S. Ct. 2116 (1996)*.

II.

Our decisions in *Caldwell*, *Williams*, and *Wood* all involved players' claims that the **[*135]** concerted action of a professional sports league imposed a restraint upon the labor market for players' services and thus violated the antitrust laws. In each case, however, we held that the non-statutory labor exemption defeated the players' claims. Our analysis in each case was rooted in the observation that the relationships among the defendant sports leagues and their players were governed by collective bargaining agreements and thus were subject to the carefully structured regime established by federal labor laws. We reasoned that to permit antitrust suits against sports leagues on the ground that their concerted action imposed a restraint upon the labor market would seriously undermine many of the policies embodied by these labor laws, including the **[**33]** congressional policy favoring collective bargaining, the bargaining parties' freedom of contract, and the widespread use of multi-employer bargaining units. Subsequent to our decisions in this area, similar reasoning led the Supreme Court in *Brown v. Pro Football, Inc., 518 U.S. 231, 135 L. Ed. 2d 521, 116 S. Ct. 2116 (1996)*, to hold that the non-statutory exemption protected the NFL's unilateral implementation of new salary caps for developmental squad players after its collective bargaining agreement with the NFL players union had expired and negotiations with the union over that proposal reached an impasse. We need only retrace the path laid down by these prior cases to reach the conclusion that Clarett's antitrust claims must fail.

A.

The plaintiff in *Wood*, O. Leon Wood, was a star college basketball player who, after being drafted by the Philadelphia 76ers, sued the NBA alleging that its policies regarding, *inter alia*, the entry draft process and team salary caps constituted unlawful agreements among horizontal competitors to eliminate competition for college players. [15] *Wood, 809 F.2d at 956-58*. All of the challenged policies, however, were included **[**34]** in a collective bargaining agreement and memorandum of understanding between the NBA and its players union. *Id. at 957-58*. Because these agreements were the result of the federally mandated bargaining process through which the union and the NBA, in light of the unique economic imperatives of professional basketball, negotiated a host of creative solutions to settle their differences, we held that to permit Wood to challenge particular aspects of their agreement on antitrust grounds would "subvert fundamental principles of our federal labor policy." *Id. at 959*.

Specifically, we found that Wood's claim that the NBA's agreements prevented him from becoming a free agent and negotiating directly with the teams for the best salary contravened the principle of federal labor law that once a majority **[**35]** of employees votes to unionize and elects a representative, individual employees - whether in the bargaining unit or not - no longer possess the right to negotiate with the employer for the best deal possible. *Id. at 959-60* (citing *29 U.S.C. § 159(a)*). Rather, the union representative is charged with the responsibility of seeking the best overall deal for employees, which often means that some employees or prospective employees may fare worse than they would in a competitive market free from restraints. *Id.* We further rejected Wood's contention that the non-statutory exemption did not preclude his challenge because he was not a member of the union when the collective bargaining agreement became **[*136]** effective, observing that new union members often find themselves disadvantaged vis-a-vis more senior union members and that collective bargaining units commonly disadvantage employees outside of, or about to enter, the union. *Id. at 960*.

We also reasoned that to allow Wood to cherry-pick the particular policies with which he took issue would run counter to the "freedom of contract" that labor law intends unions and employers to **[**36]** have during the collective bargaining process, because Wood could negate aspects of the "unique bundle of compromises" struck between the NBA and its players on their way to a peaceful and efficient resolution of their differences. *Id. at 961*. Particularly because Wood challenged agreements concerning mandatory subjects of bargaining, to which labor

[15] The challenge to the NBA draft in *Wood*, as with the challenge in *Williams*, discussed *infra*, did not include any claim against the rules governing eligibility for the draft.

law attaches a host of rights and obligations, we saw no place for the application of the antitrust laws and found the non-statutory exemption applicable. *Id. at 962*.

Eight years later, in *Williams*, a class of professional basketball players again brought an antitrust suit challenging, *inter alia*, the NBA's draft process and salary caps. *Williams, 45 F.3d at 685-86*. This time, however, the restraints challenged by the players were not encompassed in any effective agreement between the NBA and its players union, because the collective bargaining agreement had expired. *Id. at 686*. The challenged policies were implemented unilaterally by the NBA after negotiations with the players union on these subjects reached an impasse. *Id.* We nevertheless held that the NBA's **[**37]** conduct fell within the non-statutory exemption. *Id. at 693*. Foremost, we found that the players' antitrust claims were inconsistent with federal labor law because they imperiled the legitimacy of multi-employer bargaining, "a process by which employers band together to act as a single entity in bargaining with a common union." *Id. at 688*. From the standpoint of our labor and antitrust laws, we explained that such multi-employer bargaining units are a long-accepted and commonplace means of giving employers the tactical and practical advantages of collective action. *Id. at 688-93*. Moreover, in the context of sports leagues, we observed that multi-employer bargaining units serve the additional, important purpose of allowing the teams to establish and demand uniformity in the rules necessary for the proper functioning of the sport. *Id. at 689*. Second, we found that legality of conduct undertaken in the course of negotiations over a collective bargaining agreement is an issue committed to the specialized knowledge of the National Labor Relations Board, for which federal labor law provides a "soup-to-nuts array of rules **[**38]** and remedies." *Id. at 693*. Because permitting courts to police that same conduct under the auspices of the antitrust laws would disrupt that remedial scheme, we held that the non-statutory exemption was applicable. *Id. at 693*.

That same year, in *Caldwell*, we heard the appeal of Joe L. Caldwell, a former professional basketball player who after four successful seasons of play was suspended from his team in 1974 and never returned to the game. *Caldwell, 66 F.3d at 525-26*. While a basketball player, Caldwell represented the players in labor negotiations with the league and claimed to have incurred the scorn of his league, the American Basketball Association ("ABA"), as a result. *Id. at 526*. He alleged that the teams consequently agreed among themselves, in violation of the antitrust laws, that he should be fired and then blacklisted from professional play. *Id.* Despite the district court's finding that the case could "be entirely resolved without any reference whatsoever to the" collective bargaining agreement between the ABA and its players union, *id.* ***[*137]*** *at 529 n. 1*, we held that the non-statutory **[**39]** exemption defeated Caldwell's claims, *id. at 527*.

In *Caldwell*, our analysis began with the observation that "the inception of a collective bargaining relationship between employees and employers irrevocably alters the governing legal regime." *Id. at 527-28* (quoting *Brown v. Pro Football, 311 U.S. App. D.C. 89, 50 F.3d 1041, 1054 (D.C. Cir. 1995)*, *aff'd* 518 U.S. 231, 135 L. Ed. 2d 521, 116 S. Ct. 2116 (1996)). We found that as a consequence of the collective bargaining relationship between the ABA and its players union, Caldwell's claims, insofar as they concerned the "circumstances under which an employer may discharge or refuse to hire an employee," involved a mandatory bargaining subject. *Id. at 529*. Thus, federal labor law afforded Caldwell a host of administrative and judicial remedies to contest the parties' agreements on the subject, as well as his firing and any team's refusal to rehire him. *Id.* Drawing upon our discussion of multi-employer bargaining units in *Williams*, we then observed that the legality *vel non* of his treatment did not become a question of ***antitrust law*** simply because the "employers **[**40]** acted jointly in refusing employment." *Id.* Because such issues are remediable under labor law, we concluded that the non-statutory exemption applied.

The following year, in *Brown*, the Supreme Court was presented with facts similar to *Williams*, and eight Justices agreed that the non-statutory exemption precludes antitrust claims against a professional sports league for unilaterally setting policy with respect to mandatory bargaining subjects after negotiations with the players union over those subjects reach impasse. *Brown, 518 U.S. at 240-42*. There, a class of professional football players challenged the NFL's unilateral institution of a policy that permitted each team to establish a new squad of developmental players and capped those players' weekly salaries after negotiations with the players union over that proposal became deadlocked. *Id. at 234-35*. Approaching the issue largely as a "matter of logic," *id. at 237*, the Court found that to permit antitrust liability in such a case would call into question a great deal of conduct, such as multi-employer bargaining, that federal labor policy promotes and for which labor **[**41]** law provides an array of rules and remedies, *id. at 237-42*. The Court held that the non-statutory labor exemption necessarily applied not only to protect such labor policies but also to prevent "antitrust courts" from usurping the NLRB's responsibility for policing the collective bargaining process. *Id. at 240-42*.

The Court also rejected a number of potential limits on the exemption that were raised by the players and their supporters. First, the Court held that the exemption was not so narrow as to protect only agreements between the parties that are embodied in an existing collective bargaining agreement. *Id. at 243-44*. Second, in finding that the League's post-impasse action was protected by the exemption, the Court dismissed the suggestion that the exemption should insulate the concerted action of employers only up to the point at which negotiations reach impasse or a "reasonable time" thereafter. *Id. at 244-47*. Third, the Court rejected the notion that courts in applying the exemption could distinguish between bargaining "tactics," which the players argued should be exempt, and unilaterally imposed "terms." **[**42]** *Id. at 247-48*. Finally, the Court refused the players' contention that the labor of professional sports players was unique and that the market for players' services therefore should be treated differently than other **[*138]** organized labor markets for purposes of the non-statutory exemption. *Id. at 248-49*.

Although the Court in *Brown* held that the non-statutory exemption applied, it left the precise contours of the exemption undefined. *Id. at 250*. In so doing, the Court found it unnecessary to embrace, and indeed expressed some reservations about, the broader holding of the court of appeals that the non-statutory exemption "waiv[es] antitrust liability for restraints on competition imposed through the collective-bargaining process, so long as such restraints operate primarily in a labor market characterized by collective bargaining." *Id. at 235*.

Clarett argues that his case differs in material respects from *Brown*, but he does not argue, nor do we find, that the Supreme Court's treatment of the non-statutory exemption in that case gives reason to doubt the authority of our prior decisions in *Caldwell*, *Williams* **[**43]** , and *Wood*. Because we find that our prior decisions in this area fully comport - in approach and result - with the Supreme Court's decision in *Brown*, we regard them as controlling authority. In light of the foregoing jurisprudence, we therefore proceed to the merits of this appeal.

B.

Clarett argues that he is physically qualified to play professional football and that the antitrust laws preclude the NFL teams from agreeing amongst themselves that they will refuse to deal with him simply because he is less than three full football seasons out of high school. Such an arbitrary condition, he argues, imposes an unreasonable restraint upon the competitive market for professional football players' services, and, because it excludes him from entering that market altogether, constitutes a *per se* antitrust violation. The issue we must decide is whether subjecting the NFL's eligibility rules to antitrust scrutiny would "subvert fundamental principles of our federal labor policy." *Wood, 809 F.2d at 959*. For the reasons that follow, we hold that it would and that the non-statutory exemption therefore applies.

Although the NFL has maintained draft eligibility **[**44]** rules in one form or another for much of its history, the "inception of a collective bargaining relationship" between the NFL and its players union some thirty years ago "irrevocably alter[ed] the governing legal regime." *Caldwell, 66 F.3d at 527*. Our prior cases highlight a number of consequences resulting from the advent of this collective bargaining relationship that are relevant to Clarett's litigation. For one, prospective players no longer have the right to negotiate directly with the NFL teams over the terms and conditions of their employment. That responsibility is instead committed to the NFL and the players union to accomplish through the collective bargaining process, and throughout that process the NFL and the players union are to have the freedom to craft creative solutions to their differences in light of the economic imperatives of their industry. Furthermore, the NFL teams are permitted to engage in joint conduct with respect to the terms and conditions of players' employment as a multi-employer bargaining unit without risking antitrust liability. The arguments Clarett advances in support of his antitrust claim, however, run counter to each of these **[**45]** basic principles of federal labor law.

HN8[] Because the NFL players have unionized and have selected the NFLPA as its exclusive bargaining representative, labor law prohibits Clarett from negotiating directly the terms and conditions of his employment with any NFL club, *see* NLRB v. Allis-Chalmers Mfg. Co., 388 U.S. 175, 180, 18 L. Ed. 2d **[*139]** 1123, 87 S. Ct. 2001 (1967), and an NFL club would commit an unfair labor practice were it to bargain with Clarett individually without the union's consent, *see* Medo Photo Supply Corp. v. NLRB, 321 U.S. 678, 683, 88 L. Ed. 1007, 64 S. Ct. 830 (1944). [16] The terms and conditions of Clarett's employment are instead committed to the collective bargaining table and are reserved to the NFL and the players union's selected representative to negotiate. Allis-Chalmers Mfg. Co., 388 U.S. at 180.

[46]** ***HN10***[] The players union's representative possesses "powers comparable to those possessed by a legislative body both to create and restrict the rights of those whom it represents." Trans World Airlines, Inc. v. Indep. Fed'n of Flight Attendants, 489 U.S. 426, 458-59, 103 L. Ed. 2d 456, 109 S. Ct. 1225 (1989) (quoting Steele v. Louisville & Nashville R. Co., 323 U.S. 192, 202, 89 L. Ed. 173, 65 S. Ct. 226 (1944)). In seeking the best deal for NFL players overall, the representative has the ability to advantage certain categories of players over others, subject of course to the representative's duty of fair representation. *See* Vaca v. Sipes, 386 U.S. 171, 177, 17 L. Ed. 2d 842, 87 S. Ct. 903 (1967). The union representative may, for example, favor veteran players over rookies, *see* Ford Motor Co. v. Huffman, 345 U.S. 330, 338-39, 97 L. Ed. 1048, 73 S. Ct. 681 (1953), and can seek to preserve jobs for current players to the detriment of new employees and the exclusion of outsiders, *see* Fibreboard Paper Prods. Corp v. NLRB, 379 U.S. 203, 210-15, 13 L. Ed. 2d 233, 85 S. Ct. 398 (1964); Wood, 809 F.2d at 960 & n.3. This authority and exclusive responsibility is vested in **[**47]** the players' representative "once a mandatory collective bargaining relationship is established and continues throughout the relationship." Caldwell, 66 F.3d at 528. For the duration of that relationship, federal labor law then establishes a "'soup-to-nuts array' of rules, tribunals and remedies to govern [the collective bargaining] process." Id. at 529 (quoting Williams, 45 F.3d at 693).

Clarett's argument that ***antitrust law*** should permit him to circumvent this scheme established by federal labor law starts with the contention that the eligibility rules do not constitute a mandatory subject of collective bargaining and thus cannot fall within the protection of the non-statutory exemption. Contrary to the district court, however, we find that the eligibility rules are mandatory bargaining subjects. [17] ***HN11***[] Though tailored to the unique circumstance of a professional sports league, the eligibility rules for the draft represent a quite literal condition for initial employment and for that reason alone might constitute a mandatory bargaining subject. *See* Caldwell, 66 F.3d at 529 (describing the mandatory bargaining subject **[**48]** "pertinent" to that case as "the circumstances **[*140]** under which an employer may . . . refuse to hire an employee"); R. Gorman, *Labor Law* at 504 ("In accordance with the literal language of the Labor Act, the parties must bargain about the requirements or 'conditions' of initial employment."). But moreover, the eligibility rules constitute a mandatory bargaining subject because they have tangible effects on the wages and working conditions of current NFL players. Because the unusual economic imperatives of professional sports raise "numerous problems with little or no precedent in standard industrial relations," Wood, 809 F.2d at 961, we have recognized that many of the arrangements in professional sports that, at first glance, might not appear to deal with wages or working conditions are indeed mandatory bargaining subjects, *see* Silverman v. Major League Baseball Player Relations Comm., Inc., 67 F.3d 1054, 1061 (2d Cir. 1995). In *Silverman*, for example, we recognized that "[a] mix of free agency and reserve clauses combined with other provisions [such as a rookie draft and salary caps] is the universal method by which leagues and players unions **[**49]** set individual salaries in professional sports." *Id.* We therefore held that the issues of free agency, an anti-collusion provision in players' contracts, and major league baseball's reserve system are mandatory bargaining subjects in the context of professional baseball. *Id.* Similarly, the complex scheme by which individual salaries in the NFL are set, which involves, *inter alia*, the NFL draft, league-wide salary pools for rookies, team salary caps, and

[16] ***HN9***[] "To be sure, in sports leagues, unionized players generally engage in individual bargaining with teams. However, it must be emphasized that such individual bargaining is not an exercise of a right to free competition under the antitrust laws; rather, it is an exercise of a right derived from collective bargaining itself." Caldwell, 66 F.3d at 528.

[17] Because we conclude that the eligibility rules are mandatory subjects of collective bargaining, we have no occasion to address whether, or in what circumstances, the non-statutory exemption extends to permissive bargaining subjects. *See* Feather v. United Mine Workers, 711 F.2d 530, 542 (3d. Cir. 1983) ("[Non-statutory exemption] generally applies when a union, acting with a non-labor party, seeks to attain goals which are mandatory or *permissive* subjects of bargaining under the National Labor Relations Act, unless the Union acts with a predatory anti-competitive purpose." (emphasis added and footnote omitted)).

free agency, was built around the longstanding restraint on the market for entering players imposed by the eligibility rules and the related expectations about the average career length of NFL players. The eligibility rules in other words cannot be viewed in isolation, because their elimination might well alter certain assumptions underlying the collective bargaining agreement between the NFL and its players union.

[50]** Furthermore, by reducing competition in the market for entering players, the eligibility rules also affect the job security of veteran players. *See* *Fibreboard, 379 U.S. at 210-15* (recognizing union members' "vital concern" in preserving jobs for union members); *see also* *Intercontinental Container Transp. Corp. v. N.Y. Shipping Ass'n, 426 F.2d 884, 887-88 (2d Cir. 1970)* ***HN12***[] ("The preservation of jobs is within the area of proper union concern, and union activity having as its object the preservation of jobs for union members is not violative of the anti-trust laws." (internal citations omitted)). Because the size of NFL teams is capped, the eligibility rules diminish a veteran player's risk of being replaced by either a drafted rookie or a player who enters the draft and, though not drafted, is then hired as a rookie free agent. *See* Michael S. Jacobs & Ralph K. Winter, Jr., *Antitrust Principles and Collective Bargaining by Athletes: Of Superstars in Peonage*, 81 Yale L.J. 1, 16 (1971) (recognizing that entry of new players through draft "has an enormous effect on those already in the unit and the collective agreement which governs them"). **[**51]** Consequently, as was true in *Silverman*, we find that to regard the NFL's eligibility rules as merely permissive bargaining subjects "would ignore the reality of collective bargaining in sports." *Silverman, 67 F.3d at 1061-62*.

Clarett, however, argues that the eligibility rules are an impermissible bargaining subject because they affect players outside of the union. ***HN13***[] But simply because the eligibility rules work a hardship on prospective rather than current employees does not render them impermissible. *See* *Wood, 809 F.2d at 960*. The eligibility rules in this respect are not dissimilar to union demands for hiring hall arrangements **[*141]** that have long been recognized as mandatory subjects of bargaining. *See* *Associated Gen. Contractors of America, Houston Chapter, 143 N.L.R.B. 409, 412*, *enforced*, *349 F.2d 449 (5th Cir. 1965)* ("'Employment' connotes the initial act of employing as well as the consequent state of being employed."). In such hiring hall arrangements, the criteria for employment are set by the rules of the hiring hall rather than the employer alone. *See* R. Gorman, *Labor Law* at 666-70. Nevertheless, **[**52]** such an arrangement constitutes a permissible, mandatory subject of bargaining despite the fact that it concerns prospective rather than current employees. *Wood, 809 F.2d at 960*.

As a permissible, mandatory subject of bargaining, the conditions under which a prospective player, like Clarett, will be considered for employment as an NFL player are for the union representative and the NFL to determine. Clarett, however, stresses that the eligibility rules are arbitrary and that requiring him to wait another football season has nothing to do with whether he is in fact qualified for professional play. But Clarett is in this respect no different from the typical worker who is confident that he or she has the skills to fill a job vacancy but does not possess the qualifications or meet the requisite criteria that have been set. ***HN14***[] In the context of this collective bargaining relationship, the NFL and its players union can agree that an employee will not be hired or considered for employment for nearly any reason whatsoever so long as they do not violate federal laws such as those prohibiting unfair labor practices, *29 U.S.C. § 201 et seq.*, or discrimination, **[**53]** *42 U.S.C. § 2000e et seq.* *See* *Reliance Ins. Cos. v. NLRB, 415 F.2d 1, 6 (8th Cir. 1969)* ("[Employer is usually free to] pick and choose his employees and hire those he thinks will best serve his business interests."). Any challenge to those criteria must "be founded on labor rather than ***antitrust law***." *Caldwell, 66 F.3d at 530*.

Even accepting that an individual club could refuse to consider him for employment because he is less than three full seasons out of high school, Clarett contends that the NFL clubs invited antitrust liability when they agreed amongst themselves to impose that same criteria on every prospective player. As a consequence of the NFL's unique position in the professional football market, of course, such joint action deprives Clarett of the opportunity to pursue, at least for the time being, the kind of high-paying, high-profile career he desires. ***HN15***[] In the context of collective bargaining, however, federal labor policy permits the NFL teams to act collectively as a multi-employer bargaining unit in structuring the rules of play and setting the criteria for player employment. Such concerted action is encouraged **[**54]** as a matter of labor policy and tolerated as a matter of ***antitrust law***, *see* *Williams, 45 F.3d at 693*, despite the fact that it "plainly involve[s] horizontal competitors for labor acting in concert to set and to implement terms of employment," *Caldwell, 66 F.3d at 529*. Multi-employer bargaining in professional sports, moreover, offers the added advantage of allowing the teams to agree with one another and, as required, bargain with the union over the host of uniform rules needed for the successful operation of the league, such as the "number of games, length of season, playoff structures, and roster size and composition." Williams, 45 F.3d at 689. The fact that the challenged rules govern eligibility for the NFL draft, thereby excluding some potential employees from consideration, does not render the NFL's adherence to its eligibility rules as a multi-employer bargaining unit suspect.

[*142] The threat to the operation of federal labor law posed by Clarett's antitrust claims is in no way diminished by Clarett's contention that the rules were not bargained over during the negotiations that preceded the current collective bargaining agreement. **[**55]** The eligibility rules, along with the host of other NFL rules and policies affecting the terms and conditions of NFL players included in the NFL's Constitution and Bylaws, were well known to the union, and a copy of the Constitution and Bylaws was presented to the union during negotiations. Given that the eligibility rules are a mandatory bargaining subject for the reasons set out above, the union or the NFL could have forced the other to the bargaining table if either felt that a change was warranted. *See* NLRB v. Katz, 369 U.S. 736, 743, 8 L. Ed. 2d 230, 82 S. Ct. 1107 (1962). Indeed, according to the declaration from the NFLMC's Vice President for Labor Relations, Peter Ruocco, this is exactly what the NFL did.

Although this declaration was the only evidence on this point and went uncontradicted by Clarett below, the district court found that this evidence was insufficient to entitle the NFL to a non-statutory exemption defense as a matter of law. [18] *See* Clarett, 306 F. Supp. 2d at 396-97. But even disregarding this evidence entirely, the collective bargaining agreement itself makes clear that the union and the NFL reached an agreement with respect to how the **[**56]** eligibility rules would be handled. In the collective bargaining agreement, the union agreed to waive any challenge to the Constitution and Bylaws and thereby acquiesced in the continuing operation of the eligibility rules contained therein - at least for the duration of the agreement. The terms of that waiver not only keep the eligibility rules in effect for the length of the agreement but also leave the NFL in control of any changes to the eligibility rules on the condition that any significant change potentially affecting the terms and conditions of players' employment would be preceded by notice to the union and an opportunity to bargain. The value of such a clause to the NFL is obvious, as control over any changes to the eligibility rules is left in the hands of management at least until the expiration of the collective bargaining agreement. Although it is entirely possible that the players union might not have agreed entirely with the eligibility rules, the union representative might not have regarded any difference of opinion with respect to the eligibility rules as sufficient to warrant the expenditure of precious time at the bargaining table in light of other important issues. **[**57]**

Clarett would have us hold that by reaching this arrangement rather than fixing the eligibility rules in the text of the collective bargaining agreement or in failing to wrangle over the eligibility rules at the bargaining table, the NFL left itself open to antitrust liability. Such a holding, however, would completely contradict prior decisions recognizing that the labor law policies that warrant withholding antitrust scrutiny are not limited to protecting only terms contained in collective bargaining agreements. *See* Brown, 518 U.S. at 243-44; **[**58]** Caldwell, 66 F.3d at 528-29 & n.1. The reach of those policies, rather, extends as far as is necessary to **[*143]** ensure the successful operation of the collective bargaining *process* and to safeguard the "unique bundle of compromises" reached by the NFL and the players union as a means of settling their differences. [19] Wood, 809 F.2d at 961. It would disregard those policies completely to hold that some "particular *quid pro quo* must be proven to avoid antitrust liability," id. at 962 n.5, or to allow Clarett to undo what we assume the NFL and its players union regarded as the most appropriate or expedient means of settling their differences, id. at 961. We have cautioned before that "to the extent that courts prohibit

---

[18] We do not here address whether the district court was correct to regard the non-statutory exemption as an affirmative defense for which the defendant bore the burden of proof. *Cf.* USS-POSCO Indus. v. Contra Costa County Bldg. & Constr. Trades Council, 31 F.3d 800, 805 n. 3 (9th Cir. 1994) (noting that although defendants typically bear burden of proving entitlement to exception from the antitrust laws, "statutory exemption is not an affirmative defense").

[19] We therefore need not determine whether as a matter of law the Constitution and Bylaws that contained the eligibility rules were incorporated by reference into the current collective bargaining agreement.

particular solutions for particular problems, they reduce the number and quality of compromises available to unions and employers for resolving their differences." *Id.* Clarett would have us disregard our own good advice.

[59]** The disruptions to federal labor policy that would be occasioned by Clarett's antitrust suit, moreover, would not vindicate any of the antitrust policies that the Supreme Court has said may warrant the withholding of the non-statutory exemption. This is simply not a case in which the NFL is alleged to have conspired with its players union to drive its competitors out of the market for professional football. *See* *Pennington, 381 U.S. at 665*. Nor does Clarett contend that the NFL uses the eligibility rules as an unlawful means of maintaining its dominant position in that market. *See* *Allen Bradley Co. v. Local Union No. 3, International Brotherhood of Electrical Workers, 325 U.S. 797, 89 L. Ed. 1939, 65 S. Ct. 1533* ***HN16***[] ("The primary objective of all the Anti-trust legislation has been to preserve business competition and to proscribe business monopoly."). This lawsuit reflects simply a prospective employee's disagreement with the criteria, established by the employer and the labor union, that he must meet in order to be considered for employment. Any remedies for such a claim are the province of labor law. Allowing Clarett to proceed with his antitrust suit would subvert "principles that have been familiar to, and accepted by, the nation's workers for **[**60]** all of the NLRA's [sixty years] in every industry except professional sports." *Caldwell, 66 F.3d at 530*. We, however, follow the Supreme Court's lead in declining to "fashion an antitrust exemption [so as to give] additional advantages to professional football players . . . that transport workers, coal miners, or meat packers would not enjoy." *Brown, 518 U.S. at 249*.

CONCLUSION

For the foregoing reasons, the judgment of the district court is REVERSED and the case REMANDED with instructions to enter judgment in favor of the NFL. The order of the district court designating Clarett eligible to enter this year's NFL draft is VACATED.

Opinion

[*652] MEMORANDUM [*]

This is an appeal from the district court's grant of summary judgment for **[*653]** defendants. The parties are familiar with the factual and procedural background of this case, so we recount it here only as necessary to explain our decision. Macpherson's, Inc. and Macpherson's Property Management, Inc. (collectively, "Macpherson") are a real estate brokerage and property management firm under common ownership.

The many defendants in this action fall into two categories. The first category consists of Windermere Real Estate Services Company and its independently owned franchisees (collectively "Windermere"). Macpherson alleges that these defendants conspired in **[**3]** various ways to restrain trade in violation of federal antitrust laws. The second group of defendants consists of Windermere South, a Windermere franchisee offering property management services, and a group of individuals who left the employ of Macpherson Property Management to work at Windermere South. Macpherson alleges, inter alia, against these defendants breach of contract and misappropriation of trade secrets under Washington law, invoking the district court's supplemental jurisdiction under *28 U.S.C. § 1367(a)*.

The district court granted summary judgment as to all defendants on the antitrust and trade secret claims. It granted summary judgment as to individual defendants Eldridge and Verdi on the breach of contract claim. Macpherson met each summary judgment motion with a request for a continuance under *Federal Rule of Civil Procedure 56(f)*. The district court denied each of these requests. Macpherson appeals these summary judgments, denial of its three *Rule 56(f)* motions, and a number of the district court's other discovery rulings. We have jurisdiction over this matter as a timely appeal from the district court's **[**4]** final judgment. *28 U.S.C. § 1291*. We affirm the district court in all respects.

I.

HN1[] We review the district court's denials of Macpherson's *Rule 56(f)* motions for abuse of discretion. *See United States v. Kitsap Physicians Serv., 314 F.3d 995, 1000 (9th Cir. 2002)*. ***HN2***[] We review the district court's other discovery rulings for abuse of discretion as well. *See Kulas v. Flores, 255 F.3d 780, 783 (9th Cir. 2001)*. ***HN3***[] As to the merits of the case, we examine the grants of summary judgment de novo. *See Coszalter v. City of Salem, 320 F.3d 968, 973 (9th Cir. 2003)*; *County of Toulomne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1154 (9th Cir. 2001)*.

II.

[*] This disposition is not appropriate for publication and may not be cited to or by the courts of this circuit except as provided by *Ninth Circuit Rule 36-3*.

HN4[] A district court abuses its discretion under *Rule 56(f)* only where "the movant diligently pursued its previous discovery opportunities, and if the movant can show how allowing additional discovery would have precluded summary judgment." *Panatronic USA v. AT&T Corp., 287 F.3d 840, 846 (9th Cir. 2002)* (internal quotations omitted). An examination of the record and of the voluminous filings made by the plaintiffs in this case reveals that **[**5]** additional discovery would not have aided Macpherson to avoid summary judgment on any of the three motions. Macpherson has not identified any specific evidence that it sought with further discovery and their difficulties in opposing summary judgment were more related to an inability to timely file evidence than to its unavailability. The district court was within its discretion in denying the *Rule 56(f)* motions.

The same is true with respect to the district court's other challenged discovery rulings. ***HN5***[] "Broad discretion is vested in the trial court to permit or deny discovery and its decision to deny discovery will not be disturbed except upon the clearest showing that denial of discovery results in actual **[*654]** and substantial prejudice to the complaining litigant." *Sablan v. Dep't of Fin., 856 F.2d 1317, 1321 (9th Cir. 1988)*. There has been no showing of prejudice to Macpherson. Accordingly, we affirm the district court's discovery rulings, and move on to its orders granting summary judgment.

III.

Macpherson failed to raise a triable issue of fact with respect to its antitrust standing. ***HN6***[] Antitrust violations not causing injury to the plaintiff are not cognizable **[**6]** in a private suit. *Matsushita Electric Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 582-83, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. ***HN7***[] Antitrust standing requires that a plaintiff show: 1) unlawful conduct; 2) causing injury to plaintiff; 3) that flows from that which makes the conduct unlawful; 4) and is the type of injury that ***antitrust law*** guards against. *Am. Ad Mgmt. v. GTE Cal., 190 F.3d 1051, 1054 (9th Cir. 1999)*.

Macpherson failed on points one and two. First, much of the conduct alleged, even if illegal, could not be injurious to Macpherson. For example, Macpherson alleged a conspiracy to fix prices *above* what the market would set. Absent monopoly power on the part of Windermere (of which Macpherson provided no evidence), this price fix would actually aid Macpherson's business by exerting upward pressure on the market price. The second problem with Macpherson's antitrust claim was that it provided no evidence of what Windermere was actually doing. Macpherson provided much speculation and opinion about what is possible, but no evidence of collusion between Windermere franchisees. Macpherson did not raised a triable issue of fact on its antitrust claim.

[7]** Similarly, Macpherson's breach of contract claim against Verdi and Eldridge fails. Macpherson admitted pending discovery that Verdi and Eldridge had not signed a written agreement. Neither side produced an agreement and Macpherson never attempted to modify its admission. There was no evidence before the district court that any agreement contained the allegedly breached term. There was insufficient evidence to support a triable issue of fact on this claim as well.

Finally, Macpherson did not demonstrate an issue of fact as to its trade secret claim. The trade secret claim centered around former Macpherson employees soliciting business from Macpherson property management clients. ***HN8***[] Washington law affords trade secret protection to customer lists where the list is 1) a compilation of information; 2) valuable because it is unknown to others; 3) subject to reasonable efforts to maintain its secrecy. *Ed Nowogroski Ins. Co. v. Rucker, 137 Wn.2d 427, 971 P.2d 936, 944 (Wash. 1999)*. The record shows that Macpherson sold nearly all of the information on its customer lists to appraisers. The remaining information was sufficiently easy for an interested competitor to discover **[**8]** that the lists cannot be protected as trade secrets. *See id.*

IV.

Windermere requested sanctions on appeal under *Federal Rule of Appellate Procedure 38*. While Macpherson has not prevailed, we cannot say that their arguments were so wholly without merit or that the outcome of this appeal was obvious. *See* *Taylor v. Sentry Life Ins. Co., 729 F.2d 652, 656 (9th Cir. 1984)*. As to the merits of this appeal, the district court is in all respects,

AFFIRMED.

Masimo Corp. v. Tyco Health Care Grp., L.P.

United States District Court for the Central District of California

For Tyco Health Care Group L.P., a Delaware partnership, Mallinckrodt Incorporated, a Delawre corporation, Defendants: Bruce A Blefeld, John P DeGeeter, John L Murchison, Jr, LEAD ATTORNEYS, Vinson & Elkins, Houston, TX; Christopher D Dusseault, Heather Lynn Richardson, LEAD ATTORNEYS, Gibson Dunn and Crutcher, Los Angeles, CA; Craig Nevin Hentschel, LEAD ATTORNEY, Dykema Gossett LLP, Los **[*2]** Angeles, CA; Dominic Surprenant, LEAD ATTORNEY, Quinn Emanuel Urquhart Oliver & Hedges, Los Angeles, CA; James J Donato, LEAD ATTORNEY, Shearman & Sterling LLP, San Francisco, CA; John Francis Young, Neil J Stephens, LEAD ATTORNEYS, Cooley Godward Kronish, San Francisco, CA; Linda A F Callison, LEAD ATTORNEY, Cooley Godward Kronish, Palo Alto, CA; Stephen C Neal, LEAD ATTORNEY, Cooley LLP, Palo Alto, CA.

Judges: Honorable Mariana R. Pfaelzer, United States District Judge.

Opinion by: Mariana R. Pfaelzer

Opinion

MEMORANDUM OF DECISION RE: Motions in Limine

The parties have filed several motions in limine in anticipation of the trial of this matter. The Court has read and considered the parties' submissions on these motions, and has determined that oral argument would not assist the Court in its decisions. Accordingly, for the reasons discussed below, this Court rules as follows:

Masimo's consolidated motion in limine is **denied in part** and **granted in part**: reference to any other lawsuit involving any party other than this lawsuit will be excluded, Topic 4 will be excluded, and Topics 2 and 6 are not excluded. Tyco's Motion to Exclude any Reference to Patent case is **granted**. Tyco's motions to exclude the reports and **[*3]** testimony of Mr. Einer Elhauge, Ms. Patti King, and Dr. Steven Barker are **denied**.

ANALYSIS

Masimo filed a consolidated motion in limine seeking to exclude five topics from the trial.[1] Tyco has four pending motions in limine.[2] Both parties seek determination of how the verdict from the patent case may be used at this trial, Masimo seeks to exclude defenses that it believes are improper as a matter of law, and Tyco seeks to exclude three of Masimo's expert witnesses.

I. Patent Case

Both parties filed motions related to the patent case. Masimo seeks to exclude three topics that raise issues related to the patent trial:[3]

> <u>Topic 1</u>: Any reference to any other lawsuit involving any party other than this lawsuit and the patent infringement case styled *Mallinckrodt, Inc. et al. v. Masimo Corp.*, No. CV 00-6506-MRP (C.D. Cal.) (hereinafter the "patent trial").[4]
>
> <u>Topic 2</u>: Evidence or argument challenging the jury's findings of infringement in the patent trial.

---

[1] Masimo actually seeks to exclude evidence about or reference to thirteen topics, but Tyco does not oppose eight of these. The topics that the parties agree should be excluded are: 1) references to trebling or treble damages, 2) references to witness preparation for witnesses with whom a party has a privilege, 3) references to any stipulations declined or refused, 4) use of videotaped deposition without affording opposing counsel an opportunity to review, except for purposes of impeachment, 5) references to any party's motions in limine or responses to contested motions in limine, 6) any questioning in an attempt to elicit testimony that is privileged for any reason because such an attempt might unfairly create the appearance **[*4]** that the witness was hiding information from the jury, 7) any question or comment in the presence of the jury which could cause a witness to claim a recognized privilege, 8) any commentary or testimony that constitutes direct or indirect comment on the law firm or lawyers representing any party including, without limitation, references to the size of the law firm, the geographic location of the law firm's offices, or other clients or types of clients represented by the law firm or lawyers representing any party. *See* Plaintiff Masimo Corporation's Consolidated Notice of Motion and Motion in Limine (filed May 7, 2004) ("Notice"), pp.3-5.

[2] Tyco actually filed another motion in limine, its "Motion to Exclude Reference to the Alleged Criminal Fraud of Former Tyco Executives." Motion to Exclude Reference to Alleged Criminal Fraud of Former Tyco Employees. (filed May 7, 2004). This motion is not discussed in this memorandum because Masimo agrees that excluding reference to alleged fraud by former Tyco executives Kozlowski and Swartz would be appropriate. Plaintiff Masimo Corporation's Response to Defendants' Motion to Exclude Reference to the Alleged Criminal Fraud of Former Tyco Executives **[*5]** (filed May 11, 2004).

[3] *See* Plaintiff Masimo Corporation's Consolidated Notice of Motion and Motion in Limine, at 3 (filed May 7, 2004)("Masimo Notice"); *see also* Plaintiff Masimo Corporation's Memorandum of Points and Authorities in Support of Its Consolidated Motions in Limine, at 2-4 (filed May 7, 2004)("Masimo Motion"); Plaintiff **[*6]** Masimo Corporation's Reply to Tyco's Opposition to Plaintiff's Motion in Limine re Patent Case (filed May 13, 2004) ("Masimo Patent Reply").

[4] Tyco does not object to excluding reference to other lawsuits, but only to allowing reference to the patent case. Only the contested portion of Masimo's Topic 1 is decided by this memorandum as the parties have agreed that all other litigation will not be referenced.

Topic 3: Evidence or argument that the motion tolerant technology in Tyco's products is the result of innovation because any such evidence and argument is barred by collateral estoppel by the jury verdict in the patent trial.

Tyco opposes excluding these topics.[5] Tyco seeks to exclude any reference to the patent trial during this case.[6] Masimo opposes excluding reference to the patent case.[7]

For the reasons discussed below, neither party will be permitted to discuss the patent jury's verdict, the patent trial, or the issues of patent **[*7]** infringement and/or validity.

A. Issue Preclusion

The jury's verdict in the patent case does not have issue preclusive effect because it is not a final judgment. *Amadeo v. Principal Mut. Life Ins. Co., 290 F.3d 1152, 1159 (9th Cir. 2002)*(noting that collateral estoppel attaches only when an issue has been "determined by a valid and final judgment"). The Court's Judgment in the patent case specifically noted that it was interlocutory, and stated that it "does not constitute entry of final judgment for any purpose."

Some courts have held that "a final judgment is not a prerequisite for issue preclusion when a jury has rendered a conclusive verdict." *Recoveredge v. Pentecost, 44 F.3d 1284, 1295 (5th Cir. 1995)*. This line of reasoning is inapplicable here, however, because the jury's verdict in the patent case is not conclusive. To be used for collateral estoppel a jury verdict must be "sufficiently firm to be accorded conclusive effect." *Id.* (quoting *Restatement (Second) of Judgments §13* (1982)). The pending indefiniteness and inequitable conduct defenses and motions for judgment as a matter of law prevent the jury's verdict in the patent case from being "sufficiently firm" to have preclusive effect.

B. *Seventh Amendment*

Neither party in this case will be permitted, to discuss patent infringement or validity, as those issues have been taken up and decided in separate cases, **[*8]** with separate damage awards for any infringement found to exist. As this case will focus solely on antitrust issues, and will not involve testimony or evidence on any of the patent issues litigated in other cases, the *Seventh Amendment* will not be implicated.

C. Hearsay

If offered into evidence, the patent verdict will be excluded as hearsay that meets neither the exception in *Federal Rules of Evidence (FRE) Rule 803* nor *Rule 807*. Masimo's reliance on a criminal case from South Dakota is misplaced. *See United States v. Waldman, 172 F.Supp.2d 1222 (D.S.D. 2001)*. However, even *Waldman* suggests the reliability of the previous judgment is a significant consideration under both *Rules 803* and *807*. *Id. at 1222-24*. The verdict in the patent trial is not reliable because the pending equitable defenses and motions for judgment as a matter of law may disturb the patent jury's verdict. The verdict therefore does not fulfill the exceptions of *Rules 803* and *Rule 807*.

---

[5] *See* Tyco's Opposition to Plaintiff's Motion in Limine Re Patent Case (filed May 11, 2004) ("Tyco Patent Opposition").

[6] *See* Motion to Exclude Reference to Patent Case (filed May 7, 2004)("Tyco Infringement Motion"); Declaration of Neal J. Stephens in Support of Defendants' Motion to Exclude Any Reference to the Nellcor Patent Case ("Stephens Decl."); Tyco's Reply in Support of Motion to Exclude Any Reference to the Nellcor Patent Case (filed May 13, 2004) ("Tyco Patent Reply").

[7] *See* Masimo Corporation's Opposition to Defendants' Motion to Exclude any References to the Nellcor Patent Case (filed under seal May 11, 2004) ("Masimo Patent Opposition").

D. Relevance

Although there is ample support for considering baseless patent infringement suits to be anticompetitive conduct, Masimo has not cited and this Court has not found any case where patent infringement has been considered anticompetitive conduct.[8] If the patent verdict stands Masimo will be compensated for its losses due to patent infringement. There is no authority to support allowing Masimo **[*9]** to be doubly compensated by allowing the same conduct for which Masimo will be compensated in the patent case to serve as the basis of an antitrust claim. In addition to Masimo's failure to assert patent infringement as a basis of its Section 2 claim until its opposition for summary judgment and the fact that infringement has not been definitively determined because the judgment in the patent case is not final, that no legal authority supports basing a patentee's antitrust case on a finding of patent infringement dictates that the infringement verdict is not relevant to consideration of whether anticompetitive conduct has occurred.

Not only is the verdict from the patent trial irrelevant, but any discussion of patent infringement and validity is irrelevant. Determination of patent infringement and/or validity will not help the antitrust jury determine whether Tyco's innovations or its anticompetitive conduct explains its market dominance. If the jury determines superior products and not anticompetitive conduct is the explanation for Tyco's market dominance, it will be irrelevant that Tyco's products may infringe Masimo's patents. Masimo will receive compensation for infringement from the patent case. That an innovation is infringing will not change the fact **[*11]** that the infringing innovation, and not anticompetitive conduct, explains market dominance.

E. Prejudice

Introduction of prior judgments may be unfairly prejudicial. *See* *United States v. Bejar-Matrecios, 618 F.2d 81, 84 (9th Cir. 1980)*(holding that a district court committed reversible error by allowing introduction of a prior judgment relevant to showing that the defendant accused of illegal reentry was an alien because it was unfairly prejudicial); *Mendenhall v. Cedarapids, Inc., 5 F.3d 1557, 1573-75* (affirming a district court's decision not to allow admission of a prior judgment of validity regarding the patents at issue in the district court's case, in part because the possibility of prejudice to the defendant was very high).

In this case, the danger of prejudice is particularly high because the antitrust jury would hear only the patent jury's verdict, not the Court's final judgment on the patent case. Without a presentation of the equitable issues and motions for judgment as a matter of law, the jury would be very likely to conclude that the verdict in the patent case means, conclusively, that Nellcor willingly infringed Masimo's patents. Because the issues remaining in the patent case are more complex than a simple presentation of the jury's verdict would suggest, allowing the antitrust jury **[*12]** to hear the patent jury's verdict would be unfairly prejudicial.

II. Legal Issues

---

[8] The one case that Masimo cites does not support the proposition that patent infringement may support antitrust claims brought by the patentee. *See* *Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 787-88 (6th Cir. 2002)*. In fact, *Conwood* does not discuss patent infringement at all. Instead, it analyzes whether tortious acts committed by one competitor against another competitor's display racks in retail shops may constitute anticompetitive conduct supporting a Section 2 claim. Masimo tries to draw an analogy between its intellectual property and the property (display racks) at **[*10]** issue in *Conwood*, and argues that it was the taking of property that created the antitrust violation in *Conwood*. This analogy is strained and inaccurate. The *Conwood* Court is considering tort, not property, and is not analogous to the case at hand. The *Conwood* Court's concern was whether the Defendant's acts should be considered isolated tortious acts, which would not be an antitrust violation, or an exclusionary pattern, which would support an antitrust claim. *Conwood* does not offer guidance as to whether patent infringement may support an antitrust claim.

The remaining two topics that Masimo seeks to exclude relate to defenses that Masimo argues are legally improper:[9]

Topic 4: Evidence or argument that *42 C.F.R. §1001.952*, which provides that certain administrative fees are not criminal, authorizes any of the conduct at issue in this case for purposes of the antitrust laws.

Topic 6: Evidence or argument that the fact that an agreement is "voluntary" means that it is lawful.

Tyco opposes excluding these topics.[10] For the reasons discussed below, this Court will exclude Topic 4, but not Topic 6.

A. Administrative Fees

Conduct expressly authorized by federal regulation can serve as the basis of antitrust liability. Absent clear congressional **[*13]** intent, antitrust immunity is not implied when a federal statute or regulation authorizes conduct. *National Gerimedical Hosp. v. Blue Cross of Kansas City, 452 U.S. 378, 388, 101 S. Ct. 2415, 69 L. Ed. 2d 89 (1981)*; *Northrop Corp. v. McDonnell Douglas Corp., 705 F.2d 1030, 1056 (9th Cir. 1983)*. Tyco has not made the necessary "showing of clear repugnancy" between *42 C.F.R. 1001.952* and the antitrust laws. *National Gerimedical, 452 U.S. at 388*. When "relationships are governed in the first instance by business judgment and not regulatory coercion, courts must be hesitant to conclude that Congress intended to override the fundamental national policies embodied in antitrust laws." *Northrop, 705 F.2d at 1057*. Because this argument contradicts the law, Tyco will not be permitted to argue that *42 C.F.R. 1001.952* immunizes administrative fees from the antitrust laws.

Nevertheless, if Masimo argues that the administrative fees are evidence of anticompetitive conduct, Tyco may properly defend this practice as standard in the industry and reference to *42 C.F.R. 1001.952* may be necessary to that argument, thus this ruling does not exclude any reference to *42 C.F.R. 1001.952* but merely argument that the regulation authorizes the fees for the purpose of ***antitrust law***.

B. Voluntary Agreements

If this Court correctly understands Tyco's position, Tyco does not argue that voluntariness immunizes agreements from antitrust liability, but instead contends that voluntariness affects whether the agreements **[*14]** can be considered exclusionary and whether they foreclose Masimo from the market. This position is not contrary to any law that has been brought to the attention of the Court. *See National Assn. of Broadcasters, 536 F. Supp. 149, 164 (D.D.C. 1982)* (suggesting that as all anticompetitive agreements are voluntary in the sense of not being legally enforceable, voluntariness is not a defense to Section 1 claims, but not addressing whether voluntariness affects whether agreements are exclusionary).

III. Expert Witnesses

Tyco has filed motions in limine seeking to exclude the reports and testimony of three witnesses: Mr. Einer Elhauge,[11] Ms. Patti King,[12] and Dr. Steven Barker.[13] Masimo opposes these motions.[14] None of these witnesses will be excluded.

---

[9] *See* Masimo Notice, at 3-4; *see also* Masimo Motion, at 4-7; Plaintiff Masimo Corporation's Reply Memorandum in Support of Its Motion in Limine Regarding Administrative Fees and the Purportedly Voluntary Nature of the Challenged Agreements (filed May 13, 2004)("Masimo Legal Reply").

[10] *See* Tyco's Opposition to Plaintiff's Motions in Limine Regarding Payment of Administrative Fees and the Voluntary Nature of the Challenged Agreements (filed May 11, 2004)("Tyco Legal Opposition").

A. Mr. Einer Elhauge

1. Qualifications

Economic analysis of law was a part of Mr. Elhauge's education and is an area that he has followed in the literature and relied upon in his own academic work. *See* Expert Report of Professor Einer Elhauge, Stephens Decl. **[*16]** Ex. A, pp. 1-2; CV of Einer Richard Elhauge, Stephens Decl. Ex C. Thus, despite his lack of an economics degree, Mr. Elhauge's "knowledge, skill, experience, training, or education" gives him special expertise in the area in which he seeks to testify. *FRE Rule 702*.

2. Independence

That Mr. Elhauge may have been an advocate for Masimo could impact his credibility, but that is not sufficient reason for this Court to exclude him. His potential lack of objectivity is an issue that can easily be addressed via cross examination.

3. Speculation and Legal Conclusions

Even if it is true that some of Mr. Elhauge's opinions are speculative or are legal rather than factual conclusions, these are issues best addressed at trial. This Court may exclude speculative or legal testimony if it is presented to the jury, but will not use the potential that such testimony will be offered to exclude this witness entirely.

B. Ms. Patti King

1. Qualifications

Masimo seeks to offer Ms. King as an expert based on her "specialized knowledge" of group purchasing organizations ("GPOs"). Her CV indicates significant management experience in the healthcare industry and her report suggests that much of this experience includes negotiations **[*17]** with or investigations of GPOs. *See* CV of Patti King, Stephens Decl. Ex. B, pp. 40-41; Expert Report of Patti King, Stephens Decl. Ex B. pp. 26. To the extent

---

[11] *See* Memorandum of Points and Authorities in Support of Defendants' Motion to Exclude Reports and Testimony of Einer Elhauge ("Tyco Elhauge Motion") (filed under seal April 22, 2004); Declaration of Neal J. Stephens [re Einer Elhauge] (filed under seal April 22, 2004); Reply [re Einer Elhauge] (filed under seal May 10, 2004).

[12] *See* Defendants' Motion to Exclude the Reports and Testimony of Patti King ("Tyco King Motion") (filed under seal April 22, 2004); Declaration of Neal J. Stephens [re Patti King] (filed under seal April 22, **[*15]** 2004) ; Reply [re Patti King] (filed under seal May 10, 2004).

[13] *See* Motion to Exclude the Expert Report and Testimony of Dr. Barker (filed May 7, 2004)("Tyco Barker Motion"); Reply [re Steven Barker] (filed under seal May 13, 2004)("Tyco Barker Reply").

[14] *See* Memorandum of Points and Authorities in Opposition to Defendant's Motion to Exclude Reports, and Testimony of Einer Elhauge (filed under seal May 3, 2004)("Masimo Elhauge Opposition"); Memorandum of Points and Authorities in Opposition to Defendant's Motion to Exclude Reports and Testimony of Patti King (filed under seal May 3, 2004)("Masimo King Opposition"); Plaintiff Masimo Corporation's Memorandum of Points and Authorities in Opposition to Defendants' Motion to Exclude the Report and Testimony of Dr. Steven Barker (filed under seal May 11, 2004) ("Masimo Barker Opposition"); Declaration of Stephen E. Morrisey [re Steven Barker](filed under seal May 11, 2004) ("Morrissey Decl.")

that Ms. King's testimony is confined to her specialized knowledge of healthcare management and GPOs, she is qualified to offer this testimony.

2. Scope

An industry expert is qualified to offer opinions that would help the jury understand, how the industry works and the factors that influence business decisions in that industry. Most of the "opinions" upon which Tyco bases its assertion that Ms. King is offering economic conclusions are not her original opinions but merely restatements of the facts upon which she relied, including citations to the documents from which she drew those facts. She does not, for example, conduct her own analysis of what share of the market Tyco controls; she states conclusions about market share drawn from other sources and then offers her opinion as to the industry factors that led to that market share. Expert Report of Patti King, Stephens Decl. Exh. B. at 7. This type of opinion is not beyond the scope of her expertise. To the extent that Ms. King may offer opinions that stray beyond her area of **[*18]** expertise, they may be challenged on cross examination during trial.

3. Analysis and Methods

"*Rule 702* generally is construed liberally" when an expert's testimony is based on her "other specialized knowledge." *United States v. Hankey, 203 F.3d 1160, 1169 (9th Cir. 2000)*. "The *Daubert* factors (peer review, publication, potential error rate, etc.) simply are not applicable to the kind of testimony whose reliability depends heavily on the knowledge and experience of the expert, rather than the methodology or theory behind it." *Id.* (citing *Kumho Tire Co. Ltd. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*("relevant reliability concerns may focus upon personal knowledge or experience"). Ms. King's testimony is based on her knowledge and experience, thus its reliability is not undermined by her failure to satisfy the factors specifically discussed in *Daubert*.

4. Conclusions re "Penalties" and "Foreclosure"

Ms. King's report does not draw legal conclusions about "penalties." Ms. King's report discusses vendors' contracts with GPOs and states that hospitals that chose to go outside of the sole source contracts or bundling arrangements would not receive the discounts available to hospitals that complied with those contracts. She does not draw legal conclusions about whether forgoing a discount constitutes a penalty under ***antitrust*** **[*19]** ***law***.

Ms. King's report also does not rely upon incorrect legal conclusions about foreclosure. It is not the case that in "the absence of total exclusivity, contracts providing discounts in exchange for purchase commitments do not violate antitrust laws." Tyco King Motion at 10 (citation omitted). Contracts that have the "practical effect" of preventing a hospital from purchasing from competitors may be exclusive dealing contracts, even if they do not require a 100% commitment. *United Shoe Machinery Corp. v. United States, 258 U.S. 451, 458, 42 S. Ct. 363, 66 L. Ed. 708 (1922)*.

5. Prejudice

Tyco argues that the overview of the GPO industry contained in the initial pages of her report is irrelevant and prejudicial. However, as this case is focused entirely on the GPO industry and the interactions among the stakeholders in that industry an overview of the industry seems particularly relevant. More even than in other areas of law, an antitrust case requires consideration of an entire market, including players that are not involved in the litigation. Although it would likely not be helpful to spend a great deal of trial time discussing the GPO industry in a very general way, this Court does not find Ms. King's industry overview to be irrelevant.

Tyco's argument that Ms. King's generalized **[*20]** opinions on the, GPO industry are prejudicial are not a reason to exclude her testimony. Tyco complains about general statements that mimic the claims that Masimo makes against Tyco in this case. Ms. King's opinion appears to be that Tyco fits the model of other large vendors that she has worked with in this industry. That she starts by suggesting that large manufacturers in general behave similarly to the way Tyco is accused of behaving in this case does not support excluding her testimony. It is impossible to believe that the factfinder will not be able to draw the link between, for example, Ms. King's general statement that "[b]y leveraging their power with GPOs, large manufacturers have successfully foreclosed competition" and her specific opinions that Tyco has leveraged its power with GPOs to foreclose Masimo's attempts to gain market share. *See* Expert Report of Patti King, Stephens Decl. Exh. B. at 7, et seq. That Tyco does not agree with Masimo's claims in this case or Ms. King's opinions in support of those claims does not make her opinions prejudicial. Certainly any prejudicial effect found to exist could be countered via cross examination or through Tyco's presentation of its **[*21]** defense.

C. Dr. Steven Barker

Although this Court's concern is the reliability of Dr. Barker's opinions, not Tyco's notice of them, Masimo is correct in suggesting that Tyco's motion should be considered in the context of the recent patent trial. In that trial, Dr. Barker testified extensively and described his methodology. *See* Trial Transcript 2/23/04 pp. 529-606; Trial Transcript 3/17/04 pp. 3217-3240. Although it would have saved everyone a great deal of effort if Dr. Barker had identified which of the numerous publications listed in his CV formed the bases of his conclusions, the Court finds it difficult to believe that, after two opportunities to cross examine Dr. Barker in the patent trial, Tyco has any real doubts about what his methods were. The Court remembers them quite well. The Court is satisfied that Dr. Barker's testimony and the methods upon which it is based are sufficiently reliable that the Court is not required to exclude his reports and testimony under the Daubert line of cases. *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 593-94, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)* (describing the factors courts should consider to determine whether proffered expert opinions are reliable).

CONCLUSION

In light of the Court's consideration of the parties' submissions, and **[*22]** based upon the foregoing analysis, Masimo's consolidated motion in limine is **denied in part** and **granted in part** (reference to any other lawsuit involving any party other than this lawsuit will be excluded, Topic 4 will be excluded, and Topics 2 and 6 are not excluded), Tyco's Motion to Exclude Reference to the Patent Case is **granted**, Tyco's Motion to Exclude Report and Testimony of Einer Elhauge is **denied**, Tyco's Motion to Exclude Reports and Testimony of Patti King is **denied**, and Tyco's Motion to Exclude Report and Testimony of Dr. Barker is **denied**.

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

The granting of a preliminary injunction is an extraordinary remedy that will not issue unless the right to such relief is clearly established by the movant. In evaluating a motion for preliminary injunction, the court must consider: (A) the threat of irreparable harm to the moving party; (B) the balance of hardships should the injunction issue; (C) the probability that the moving party will succeed on the merits; and (D) the public interest. No single factor is dispositive, and the United States Court of Appeals for the Eighth Circuit favors a flexible approach.

Civil Procedure > Remedies > Damages > Monetary Damages

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Damages, Monetary Damages**

The basis of injunctive relief in the federal courts has always been irreparable harm and inadequacy of legal remedies. Generally, irreparable harm is suffered when monetary damages are difficult to ascertain or are inadequate. When the failure to grant preliminary relief creates the possibility of permanent loss of customers to a competitor or the loss of goodwill, the irreparable injury prong may be satisfied.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Injunctions, Preliminary & Temporary Injunctions**

Harm to reputation and goodwill is difficult, if not impossible, to quantify in terms of dollars.

Contracts Law > Contract Interpretation > General Overview

HN4[] **Contracts Law, Contract Interpretation**

As a general rule, a contract will be strictly construed if its words are clear and unambiguous.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN5[] **Contract Interpretation, Good Faith & Fair Dealing**

A duty of good faith and fair dealing is imposed in the performance and enforcement of a contract. Encompassed within this duty is an obligation not to do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

Two basic elements must exist to establish a case under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*: (a) possession of monopoly power in the relevant market; and (b) the willful acquisition or maintenance of that power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

The United States Supreme Court has defined monopoly power as the power to control prices or exclude competition. There are two ways of proving market power. The first is by defining the relevant market in geographic and product terms and by showing that the defendant's share exceeds a reasonable threshold under the circumstances. The second is through direct evidence of anti-competitive effects.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN9[] **Monopolies & Monopolization, Actual Monopolization**

The relevant product market must be defined so as to capture the competitive realities of the market place -- the "area of effective competition." In defining the product market, courts consider whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Courts have generally found that a 50 to 60 percent market share is insufficient to create a monopoly. Even assuming 50 to 60 percent was sufficient, however, evidence of market share alone is not conclusive as to whether monopoly power exists because market share may not reflect actual power to control price or exclude competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

A company may not be found guilty of completed monopolization in violation of the *§ 2* of the Sherman Anti-Trust Act, *15 U.S.C.S. § 2* without proof of actually attaining market dominance or monopoly power.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN12[] **Sherman Act, Claims**

A claim of attempted monopolization requires a plaintiff to prove that the defendant (1) specifically intended to control prices or destroy competition in some part of commerce; (2) engaged in predatory or anti-competitive conduct directed to accomplishing the unlawful purpose; and (2) a dangerous probability of success.

Opinion

ORDER

I. BACKGROUND

Plaintiff Mid-America Real Estate Company d/b/a Coldwell Banker Mid-America Group, Realtors ("Coldwell Banker") filed its Complaint against defendants Iowa Realty Company, Inc. ("Iowa Realty") and First Realty, Ltd. ("First Realty") (together referred to as the "Iowa Realty Group") on March 25, 2004, seeking to enjoin defendants from excluding other real-estate agents from showing and selling homes listed by defendant Iowa Realty under its Passport Plus program. [1] In the Complaint, **[*2]** Coldwell Banker alleged the following: Count I breach of contract; Count II breach of implied covenant of Good Faith and Fair Dealing; Count III monopolization; and Count IV Attempt to Monopolize. The matter now before the Court is Coldwell Banker's request for a preliminary injunction that would preclude Iowa Realty Group from taking such action during the pendency of the lawsuit.

Pursuant to a stipulated temporary restraining order ("TRO") defendants are presently prohibited from: (1) failing to comply with the August 30,2002 Co-Marketing Agreement, (2) failing to deliver their listing information to the Des Moines Area Association of Realtors' ("DMAAR") Multiple Listing Service in accordance with the Agreement executed by Iowa **[*3]** Realty, First Realty, Coldwell Banker, and the Des Moines Area Association of Realtors, (3) signing exclusive listing contracts with, and offering exclusive listing contracts to, clients pursuant to the Passport Plus program, (4) refusing to split commissions with Coldwell in accordance with the parties' established course of dealing, (5) advertising the Passport Plus program, and (6) otherwise implementing the Passport Plus program. Subsequent to the issuance of the TRO, the parties engaged in discovery, exchanged documents, and took depositions.

---

[1] Coldwell Banker initially sought a temporary restraining order ("TRO") until the Court could rule on its request for a preliminary injunction. The parties then agreed to the issuance of a stipulated TRO on March 29, 2004 until the preliminary injunction request could be resolved.

Defendants resisted plaintiff's motion for a preliminary injunction on April 14, 2004 and plaintiff filed its response on the same day. This Court held a preliminary injunction hearing on April 15-16, 2004. Both parties submitted additional filings to the Court on April 30, 2004. The motion for preliminary injunction is now fully submitted.

II. FINDINGS OF FACT

A. Parties

Plaintiff Coldwell Banker is a licensed full-service real-estate brokerage firm in the greater Des Moines area. Coldwell Banker is owned by Mid-America Group, Ltd. The president of Coldwell Banker is Carolyn Helmlinger.

Defendant Iowa Realty is a licensed full-service **[*4]** real-estate brokerage firm in the greater Des Moines area. Iowa Realty is owned by Home Services of America, Inc. The president of Iowa Realty is Michael Knapp.

Defendant First Realty is a licensed full-service real-estate brokerage firm in the greater Des Moines area. First Realty is a wholly-owned subsidiary of Iowa Realty. First Realty is a separately-licensed broker distinct from Iowa Realty. Michael Knapp is also the president of First Realty.

B. Des Moines Real Estate Market

The relevant geographic market for purposes of the present dispute consists of the greater Des Moines area, essentially Warren, Dallas and Polk counties. The Co-Marketing Agreement refers to the "Des Moines metropolitan market" in Section I.A.2.

C. DMAAR

All parties to this case are members of the Des Moines Area Association of Realtors ("DMAAR"). DMAAR operates a multiple listing service ("MLS") and publishes Rules and Regulations for the participation in and operation of the MLS. Those rules are implemented and enforced by the standing DMAAR MLS Committee and the DMAAR Board of Directors.

D. Multiple Listing Services

A multiple listing service is a common database where member companies submit listings **[*5]** to facilitate the exchange of information about one another's listings so agents can cross company lines to sell one another's houses and can show clients all houses on the market, not just those homes listed with their own company. There are two multiple listing services in the Des Moines area: Rapattoni and MLXchange. DMAAR operates the Rapattoni MLS. Rapattoni is a web-based MLS database software system. All DMAAR members except Iowa Realty, First Realty and Coldwell Banker enter their listing information directly into the Rapattoni MLS software and view that listing information through the Rapattoni software.

Iowa Realty, First Realty and Coldwell Banker use a multiple listing service separate from Rapattoni known as MLXchange. Iowa Realty has the exclusive license in the Des Moines area real-estate market for the MLXchange software. Coldwell Banker has access to MLXchange pursuant to the 2002 Co-Marketing Agreement detailed below. All home listings from Iowa Realty, First Realty and Coldwell Banker are listed on MLXchange and each day this information is shared with the DMAAR Rapattoni system and vice versa. Consequently, other DMAAR members have access to MLXchange listing data **[*6]** through Rapattoni and Coldwell Banker, Iowa Realty, and First Realty have access to Rapattoni listings through MLXchange.

E. Co-Marketing Agreement

In early 2002, Coldwell Banker approached Interealty, the owner of the MLXchange software, to purchase a license and was informed that Iowa Realty has the exclusive license for MLXchange in the Des Moines area. Consequently, in the summer of 2002, Coldwell Banker approached Michael Knapp, President of Iowa Realty, about the possibility of sublicensing the MLXchange software. Ms. Helmlinger of Coldwell Banker was told that Iowa Realty would grant a sublicense of the MLXchange software for a fee but only on the condition that Coldwell Banker also participate and help fund a saturated mass marketing ("SMM") mailer (known as Des Moines Ads at Home) that would contain 16 pages of advertisements for residential homes listed by Iowa Realty, First Realty and Coldwell Banker.

On August 30, 2002, the parties signed the Co-Marketing Agreement. In Section I.A.1 of the Co-Marketing Agreement, Iowa Realty grants Coldwell Banker a non-exclusive license to use the MLXchange software. Section I.A1 provides:

> Iowa Realty grants to Coldwell a non-exclusive **[*7]** sub-license to use the MLXchange software all as further set forth in this Agreement. The MLXchange software shall include the MLXchange system (real estate listing information management system), Passport Plus program (distribute desktop software designed to function as an offline listing database), Designer Tool (report creation tool), Datalink (data and photo download tool), Photolink (photo upload tool), (all hereinafter collectively referred to as 'the MLXchange Software')

The Iowa Realty Group also granted Coldwell Banker a nonexclusive license to use all the listing information on MLXchange. Section I.A.2 of the Co-Marketing Agreement provides:

> Subject to the restrictions set forth in Section I(C)(1) Restrictions on Use-Coldwell, Iowa Realty Group hereby grants to Coldwell a non -exclusive license to use the listing information, including listings, sales, pending/closed sales, expirations and modifications thereto related to residential real estate located in the Des Moines metropolitan market ('Listings and Listing Information') that Iowa Realty Group shall enter into the MLXchange Software ("Iowa Realty Group Listings and Listing Information").

In reciprocation, **[*8]** Coldwell Banker granted the Iowa Realty Group a nonexclusive license to use all its listings information on MLXchange in section I.A.3.

The Co-Marketing Agreement also contains a termination clause, VII.C., which provides in part:

> Termination without Cause. In the event either party desires to cancel this Agreement for any reason other than provided under Section VII(B) prior to the expiration of the term of this Agreement, either party may provide to the other, a written notice delivered at least twelve (12) months prior to the desired cancellation date … The MLXchange Software and the SMM program will continue to be made available to Coldwell during any such twelve (12) month notice cancellation period; however, upon the expiration of such twelve (12) month notice period, all licenses, sub-licenses, and any services previously made available to Coldwell will cease.

Plaintiff's Appendix II, PX1 at 10.

F. Passport Plus Program

In an attempt to bolster its share of the Des Moines real estate market Iowa Realty developed and had originally planned on implementing its Passport Plus program in the early spring of 2004. The program's implementation, as previously **[*9]** mentioned, was delayed pursuant to the parties stipulated TRO until the resolution of Coldwell Banker's preliminary injunction request.

The Passport Plus program was designed to be exclusive to the Iowa Realty Group. The complete listing information for homes listed in this program will only be available to Iowa Realty and First Realty agents and there is no commission sharing with non-Iowa Realty Group agents. Passport Plus program homes may only be shown by Iowa Realty agents and all buyers must be represented by a First Realty or Iowa Realty agent. The program offers home sellers the choice to enter into an exclusive listing agreement with Iowa Realty in return for several incentives. As incentives to sign up for the Passport Plus program, Iowa Realty will offer prominent advertising for Passport Plus listings, a one-year home warranty on the property, financing incentives through Iowa Realty's mortgage company, a free appraisal and a quarter percent discount or reduction in the cost of the loan origination fees through the mortgage company, and abstract updating immediately upon listing of the home.

III. APPLICABLE LAW AND ANALYSIS

Coldwell Banker now requests that this **[*10]** Court grant a preliminary injunction enjoining Iowa Realty from implementing its Passport Plus program. *HN1*[] The granting of a preliminary injunction is an extraordinary remedy that will not issue unless the right to such relief is clearly established by the movant. *Ferry-Morse Seed Co. v. Food Corn, Inc., 729 F.2d 589, 593 (8th Cir. 1984)*. In evaluating a motion for preliminary injunction, the Court must consider: (A) the threat of irreparable harm to the moving party; (B) the balance of hardships should the injunction issue; (C) the probability that the moving party will succeed on the merits; and (D) the public interest. *Dataphase Sys., Inc. v. C.L. Sys., Inc., 640 F.2d 109, 114 (8th Cir. 1981)* (en banc). No single factor is dispositive, and the Eighth Circuit favors a flexible approach *Calvin Klein Cosmetics Corp. v. Lenox Lab., 815 F.2d 500, 503 (8th Cir. 1987)*.

A. Irreparable Harm

HN2[] "The basis of injunctive relief in the federal courts has always been irreparable harm and inadequacy of legal remedies." *Watkins Inc. v. Lewis, 346 F.3d 841, 844 (8th Cir. 2003)*. Generally, irreparable harm is suffered when monetary damages **[*11]** are difficult to ascertain or are inadequate. *See Roland Machinery Co. v. Dresser Industries, 749 F.2d 380, 386 (7th Cir. 1984)* (preliminary injunction may be granted upon a showing that an award of damages will be inadequate). When the failure to grant preliminary relief creates the possibility of permanent loss of customers to a competitor or the loss of goodwill, the irreparable injury prong may be satisfied. *See United Healthcare Ins. Co. v. AdvancePCS, 316 F.3d 737, 741 (8th Cir.2002)* ("Loss of intangible assets such as reputation and goodwill can constitute irreparable injury.").

In the present case, Coldwell Banker argues that it faces immediate and irreparable harm from Iowa Realty's Passport Plus program that cannot be later compensated fully by monetary damages. Coldwell Banker contends that it will sustain lost customers, lost agents, lost reputation, and lost goodwill if the preliminary injunction is not granted. Ms. Helmlinger, Coldwell Banker's President, testified that Coldwell Banker's "reputation would be damaged because [Coldwell] could no longer show [potential clients] a hundred percent of the market," resulting in the loss **[*12]** of customers. Transcript at 111:15-25. Potential clients of Coldwell Banker will have a strong incentive to use Iowa Realty or First Realty, because they will be the only agents that can show all homes in the MLXchange database. [2] Ms. Helmlinger also testified that if the preliminary injunction is not granted, she expects Coldwell Banker agents to leave the company and go to work for Iowa Realty or First Realty so they can show clients all of the listings in the Des Moines area market. Transcript at 179:16-20.

Iowa Realty Group, on the other hand, contends that any harm to Coldwell **[*13]** is wholly speculative and any future harm could be fully compensated by an award of money damages. This Court disagrees. There is little doubt that Coldwell Banker's inability to continue to show all of the homes listed by Iowa Realty will adversely affect Coldwell Banker's business and will likely result in a significant loss of agents. While Ms. Helmlinger admitted that it may be possible to calculate some elements of Coldwell Banker's economic loss incurred as a result of Passport Plus, ***HN3***[] "harm to reputation and goodwill is difficult, if not impossible, to quantify in terms of dollars." *Medicine Shoppe Intern., Inc. v. S.B.S. Pill Dr., Inc., 336 F.3d 801, 805 (8th Cir. 2003)*. Harm to Coldwell Banker's reputation and goodwill has the potential to be especially damaging in this case, where the parties' business practices and marketing campaigns have been developed with the understanding that the parties will be able to access each others' listings. The one year termination clause contained in the Co-Marketing Agreement was an obvious acknowledgment that a material change by one party under the agreement would require a significant time period to explore alternative **[*14]** marketing strategies by the other party. The Court therefore finds this factor weighs in favor of granting preliminary injunctive relief.

B. Balance of Hardships

As detailed more fully above, Coldwell Banker has indicated that it will be adversely affected if its motion for a preliminary injunction is denied and Iowa Realty were to implement the Passport Plus program. Conversely, Iowa Realty Group has presented little evidence that it would be harmed by a decision of the Court granting an injunction

---

[2] The Court notes that because of the presence of office exclusive listings and for-sale-by-owner homes, no real estate agents have the ability to show *all* homes in the Des Moines area market. Nevertheless, the homes listed in the MLXchange database comprise a substantial portion -- approximately 85 percent -- of the Des Moines area market. Transcript at 58:4-7 (DMAAR sales represent 85 percent of the Des Moines area market).

maintaining the status quo. Iowa Realty Group contends only that the issuance of a preliminary injunction will impede Iowa Realty's ability to respond to increasing competitive pressure in the marketplace. This concern does not outweigh the aforementioned consequences that the Passport Plus program could have on Coldwell Banker's business. Under these circumstances, the balance of harms tips in favor of granting preliminary injunctive relief.

C. Likelihood of Success on the Merits

1. Count I: Breach of Contract

Coldwell Banker alleges that Iowa Realty's use of the Passport Plus program will breach several provisions of the Co-Marketing Agreement. The most relevant provisions of the **[*15]** Co-Marketing Agreement are set forth below. Section I.A. 1 provides in part:

> MLXchange and Related Software. Iowa Realty grants to Coldwell a non-exclusive sub-license to use the MLXchange software all as further set forth in this Agreement. The MLXchange software shall include the MLXchange system (real estate listing information management system), Passport Plus program (distribute desktop software designed to function as an offline listing database), Designer Tool (report creation tool), Datalink (data and photo download tool), Photolink (photo upload tool), (all hereinafter collectively referred to as 'the MLXchange Software').

Plaintiff's Appendix II, PX1 at 1. Section I.A.2 provides:

> Iowa Realty Group Listing and Listing Information. Subject to the restrictions set forth in Section I(C)(1) Restrictions on Use-Coldwell, Iowa Realty Group hereby grants to Coldwell a non-exclusive license to use the listing information, including listings, sales, pending/closed sales, expirations and modifications thereto related to residential real estate located in the Des Moines metropolitan market ('Listings and Listing Information') that Iowa Realty Group **[*16]** shall enter into the MLXchange Software ("Iowa Realty Group Listings and Listing Information").

Plaintiff's Appendix II, PX1 at 1-2. Section I.B.2 provides, in part: "Coldwell users will have access to all application data on MLXchange." Plaintiff's Appendix II, PX1 at 3.

Coldwell Banker contends that the Co-Marketing Agreement requires Iowa Realty to share all of the information that it enters into the MLXchange. At the hearing, Mr. Knapp admitted that Passport Plus listings would be entered into the MLXchange, but that they would be entered in such a way that Coldwell Banker would not be able to see the information. Transcript at 355:19-22, 360:21-23, 362:11-13. Coldwell Banker argues that by barring them from seeing or using the Passport Plus listings in the MLXchange database, Iowa Realty Group is denying them "access to all application data in MLXchange," section I.B.2, for the "purpose of assisting Coldwell clients … interested in listing, selling, or buying residential real estate … or for developing comparative market analyses … [or for] conducting residential real estate appraisals," section I..C.1, in breach of sections I.A.2, I.B.2, I.C.1 and I.C.2.

Iowa **[*17]** Realty Group argues that the Co-Marketing Agreement does not require Iowa Realty to make available their office exclusive listings. [3] Iowa Realty Group notes that there is no language in the Co-Marketing Agreement that addresses the sharing of office exclusive listing information. The parties negotiated and entered into the Co-Marketing Agreement against a backdrop of industry standards providing that office exclusive listing information

---

[3] The parties disagree as to whether Iowa Realty's Passport Plus homes are properly classified as office exclusive listings. An office exclusive listing is one in which a customer directs his or her broker to market the seller's property only to those brokers and agents the customer specifically authorizes. Transcript at 170:24-172:1. Coldwell Banker makes several arguments that Iowa Realty's Passport Plus listings are not truly office exclusive. Essentially, Coldwell Banker contends that the Passport Plus homes cannot be "office exclusive" because Iowa Realty shares the listing information with First Realty and thus does not keep the listings exclusive to its office. The Court finds this argument unpersuasive. As noted above, a realtor will list a property as an office exclusive when "it is the desire of the seller that a listing not be filed with the [MLS]." Handbook on Multiple Listing Policy of the National Association of Realtors, Plaintiff's Appendix II, PX245 at 6-6. It appears under the guidelines that Iowa Realty may share the listing with any other realtor, as long as it is authorized by and is the "desire of" the seller. In the present case, sellers who sign up for the Passport Plus program authorize Iowa Realty and its subsidiaries -- i.e. First Realty -- to market office exclusive listings. Defendants' Appendix, Exhibit G at G.021.

shall not be disseminated to MLS members while the listing is pending. Section 1.1(a) of the Rules and Regulations of the MLS of the Bylaws of the DMAAR, Defendants' Appendix, Exhibit D at D.023. Iowa Realty Group contends that under these circumstances, the parties did not intend the Co-Marketing Agreement to create any obligation to each other with respect to information sharing for office exclusive listing agreements. *See Peoples Bank & Trust Co. v. Lala, 392 N.W.2d 179, 184 (Iowa Ct. App. 1986)* (the court should "absolutely never give effect to the meaning of words that neither party in fact gave them.").

[*18] ***HN4***[] As a general rule, a "contract will be strictly construed if its words are clear and unambiguous." *SDG Macerich Props., L.P. v. Stanek, Inc., 648 N.W.2d 581, 586 (Iowa 2002)*. Under the Co-Marketing Agreement, Iowa Realty expressly gave Coldwell Banker the right to "all application data on MLXchange." Plaintiff's Appendix II, PX1 at 3. The fact that the Passport Plus program homes may be classified as office exclusive listings does not create ambiguity in the Co-Marketing Agreement, nor does it require Iowa Realty to choose between violating its commitment to its office exclusive clients or breaching the Co-Marketing Agreement. If a client of Iowa Realty desires an office exclusive listing, Iowa Realty should honor that request by simply not putting the listing in the MLXchange where, under the Co-Marketing Agreement, other realtors have full access to it. It is for the aforementioned reasons that this Court finds the record sufficient to support a finding that Iowa Realty Group would breach the Co-Marketing Agreement by denying Coldwell Banker access to information about Passport Plus homes listed on MLXchange. Accordingly, the Court finds Coldwell Banker likely to **[*19]** succeed on the merits of its breach of contract claims.

2. Count II: Implied Covenant of Good Faith and Fair Dealing

Coldwell Banker also argues that by refusing to share commissions, in contradiction to decades of reciprocity and cooperation, Iowa Realty Group is violating its duty of good faith and fair dealing. Coldwell Banker contends Iowa Realty has shared commissions for over thirty years with other brokers and that the continued cooperation among brokers is part of the essential purpose of the Co-Marketing Agreement. Transcript at 350:4-10.

The Supreme Court of Iowa has adopted the *Restatement (Second) of Contracts § 205* (1981), which ***HN5***[] imposes a duty of good faith and fair dealing in the performance and enforcement of a contract. *See Engstrom v. State, 461 N.W.2d 309, 314 (Iowa 1990)*. Encompassed within this duty is an obligation not to do anything "which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract." *Pittman v. Blackhawk Rock & Gravel, Inc.,* 1999 WL 823544, *2 (Iowa Ct. App. Oct. 15, 1999) (quoting *17A Am.Jur.2d Contracts § 380* **[*20]** (1991)).

Iowa Realty Group claims that the parties did not intend the Co-Marketing Agreement to regulate its obligations with respect to commission sharing or sharing of office exclusive listings. Furthermore, Iowa Realty Group argues that a finding that the Passport Plus program would violate the implied covenant of good faith and fair dealing would essentially impose unbargained for obligations upon the parties. This Court disagrees.

As Coldwell Banker points out, Mr. Knapp admitted that the purpose of Section I.C. 1 of the Co-Marketing Agreement is to let Coldwell Banker and Iowa Realty Group use each other's data for the purpose of listing, selling, buying residential real estate, and doing comparables and appraisals. Transcript at 365:5-16. The Court notes that the effect of Iowa Realty's decision to actively solicit office exclusive listings would be to limit Coldwell Banker's access to many of Iowa Realty Group's listings. Iowa Realty Group has not contested Coldwell Banker's contention that office exclusive listings have traditionally been used in situations where the seller has personal reasons for not wanting the fact known that the property was being offered for sale. **[*21]** *See* Handbook on Multiple Listing Policy of the National Association of Realtors, Plaintiff's Appendix II, PX245 at 6-6; Transcript at 68:20-24, 204:16-22. Thus, it appears that the active solicitation of office exclusive listings is contrary to the parties' established course of dealing under the Co-Marketing Agreement. By limiting the open exchange of listing information between the parties, Iowa Realty Group restricts an essential purpose of the Co-Marketing Agreement, thereby breaching the implied covenant of good faith and fair dealing. Thus, the Court finds that as long as the Co-Marketing Agreement remains in effect, implementation of the Passport Plus program would deny Coldwell Banker its rights to the "fruits of the contract."

Assuming, however, that Iowa Realty Group had properly terminated the Co-Marketing Agreement, there would be nothing in this doctrine that would prevent Iowa Realty Group from trying to increase its share of the market by soliciting office exclusive listings. Prior to the Co-Marketing Agreement the parties had been operating for years in a market that included office exclusive listings, albeit a small number. Plaintiff's Proposed Findings of Fact **[*22]** at 10 ("At most, Iowa Realty executed 9 office exclusive sales in 2003."). The presence of these office exclusive listings must be taken into account when considering the parties course of dealings. While Iowa Realty's decision to advertise its ability to take office exclusive listings with the Passport Plus program may be a departure from past practices, aside from the implied duty of good faith and fair dealing created by the Co-Marketing Agreement, nothing would prevent Iowa Realty Group from attempting to increase its share of the Des Moines area real estate market by soliciting office exclusive listings. Under these circumstances, Iowa Realty Group's acceptance of office exclusive listings would not violate the implied covenant of good faith and fair dealing any more than when it executed a limited number of office exclusive sales in the past.

For the aforementioned reasons, the Court finds that as long as the Co-Marketing Agreement remains in effect, Coldwell Banker is likely to succeed on the merits of its claim for breach of implied covenants of good faith and fair dealing.

3. Count III: Monopolization

Coldwell Banker alleges that Iowa Realty Group's Passport Plus program **[*23]** will effectively create a monopoly in the Des Moines area real estate market in the in violation of *§ 2* of the Sherman Act. *Section 2* of the Sherman Act provides that it is unlawful to: ***HN6***[] "…monopolize, or attempt to monopolize or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states …." *15 U.S.C. Section 2*. ***HN7***[] Two basic elements must exist to establish a case under *section 2 of the Sherman Act*: (a) possession of monopoly power in the relevant market; and (b) the willful acquisition or maintenance of that power. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *Paschall v. Kansas City Star Co., 727 F.2d 692, 695-96 (8th Cir. 1984)*, *cert. denied, 469 U.S. 872, 83 L. Ed. 2d 152, 105 S. Ct. 222 (1984)*.

a. Monopoly Power

In *United States v. E. I. du Pont De Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*, ***HN8***[] the Supreme Court defined monopoly power as "the power to control prices or exclude competition." There are two ways of proving market power. The first is by defining the relevant market in geographic and **[*24]** product terms and by showing that the defendant's share exceeds a reasonable threshold under the circumstances. *See, e.g., United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; *United States v. Grinnell Corp., 384 U.S. 563, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. The second is through direct evidence of anti-competitive effects. *See FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* ("the finding of actual, sustained adverse effects on competition in those areas where IFD dentists predominated, viewed in light of the reality that markets for dental services tend to be relatively localized, is legally sufficient to support a finding that the challenged restraint was unreasonable even in the absence of elaborate market analysis.").

(1) Relevant market and market share

The parties have stipulated that the relevant geographical market is the greater Des Moines area. ***HN9***[] The relevant product market must be defined so as to capture the competitive realities of the market place -- the "area of effective competition." *United States v. E. I. du Pont De Nemours II, 353 U.S. 586, 593, 1 L. Ed. 2d 1057, 77 S. Ct. 872 (1957).* **[*25]** In defining the product market, courts consider "whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other." *Hayden Pub. Co. v. Cox Broadcasting Corp., 730 F.2d 64, 70 n.8 (2nd Cir.1984)*.

Coldwell Banker contends that the relevant product market is residential real estate brokerage services, which does not include flat-fee brokers or for-sale-by-owner homes. The Court disagrees. [4] Coldwell Banker's proposed definition of the product market places undue emphasis on the differences between the product offered by a full-service broker, and a flat fee or for-sale-by-owner home. Full-service brokers are clearly in competition with flat-fee brokers and a persuasive argument can be made that they are also competing with for-sale-by-owner homes. While full-service brokers may offer additional services, in each case the fundamental purpose is the marketing and sale of a residential home.

[*26] Given the Court's aforementioned determination of the relevant product market, Iowa Realty Group represents an approximately 50 percent share of the Des Moines area real estate market. [5] ***HN10***[] Courts have generally found that a 50 to 60 percent market share is insufficient to create a monopoly. *See, e.g., Colorado Interstate Gas Co. v. Natural Gas Pipeline Company of America, 885 F.2d 683 (10th Cir. 1989)* ("While the Supreme Court has refused to specify a minimum market share necessary to indicate a defendant has monopoly power, lower courts generally require a minimum market share of between 70% and 80%.", citing 2 E. Kintner, Federal ***Antitrust Law*** § 12.6 (1980)); *see also* Areeda & Turner, ***Antitrust Law***, P 518.3c ("There is substantial merit in a presumption that market shares below 50 or 60 percent do not constitute a monopoly."); *but see Hayden Publishing Co. v. Cox Broadcasting Corp., 730 F.2d 64, 69 n.7 (2nd Cir. 1984)* ("a party may have monopoly power in a particular market, even though its market share is less than 50%."). Even assuming 50 to 60 percent was sufficient, however, evidence of market share alone is not conclusive as to whether **[*27]** monopoly power exists because market share "may not reflect actual power to control price or exclude competition." *Reazin v. Blue Cross & Blue Shield, Inc., 899 F.2d 951, 967 (10th Cir. 1990)*; *see also Broadway Delivery Corp. v. United Parcel Serv. of America, 651 F.2d 122, 128 (2nd Cir. 1981)* ("The trend of guidance from the Supreme Court and the practice of most courts endeavoring to follow that guidance has been to give only weight and not conclusiveness to market share evidence.").

[*28] Because Iowa Realty Group does not have a materially significant market share -- only controlling approximately 50 percent -- the Court will not infer that Iowa Realty Group has monopoly power unless there is a direct evidence that they have actual power to control price or exclude competition. *See Tops Maekets, Inc. v. Quality Markets, Inc., 142 F.3d 90 (2nd Cir. 1998)* (holding that despite evidence of 72 percent market share, consideration of other relevant factors did not support a finding of monopoly power); *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)* (finding that mere showing of substantial or even dominant market share alone cannot prove monopoly power, plaintiff must show that dominant firm can control price or exclude competition); *Nat'l Reporting Co. v. Alderson Reporting Co., 763 F.2d 1020 (8th Cir. 1985)* (holding that 100 percent market share fails to prove monopoly power where dominant firm had not power to control price).

(2) Direct evidence of monopoly power

Coldwell Banker alleges that Iowa Realty Group has caused sustained adverse effects on competition by maintaining supracompetitive **[*29]** prices, has excluded competition by forcing adverse commission splits on other realtors, and has coerced Coldwell Banker into buying advertising under the Co-Marketing Agreement. If true, these

---

[4] The Court disagrees for the purposes of this motion only. At later stages in this litigation it may be necessary for the parties to revisit both the issue of whether for-sale-by-owner and flat-fee broker homes should be included in the relevant product market and whether Iowa Realty's market share should be considered separately or combined with First Realty.

[5] The parties did not provide data showing Iowa Realty Group's share of the entire relevant product market. However, in 2003 DMAAR sales accounted for approximately 85 percent of the Des Moines area real estate market, Transcript at 58:4-7, and Iowa Realty Group had an approximately 60 percent share of DMAAR sales, Plaintiff's Appendix II, PX64 at IR01436.

Even assuming the relevant product market did not include for-sale-by-owner homes, Iowa Realty Group would only have an approximately 60 percent share of the market. *See generally* Transcript at 57:22-58:3 (flat-fee brokers represented approximately 2 to 3 percent of the Des Moines area real estate market in 2002), Transcript at 58:4-7, Plaintiff's Appendix II, PX64 at IR01436.

actions would be indicative of monopoly power, however, the record currently before the Court is insufficient to support Coldwell Banker's allegations.

There is nothing in the record suggesting that Iowa Realty Group has the power to control prices in the Des Moines area market. In fact, Coldwell Banker's own expert indicated that Iowa Realty cannot control prices. Transcript at 257:7-15. There is also insufficient evidence in the record showing that Iowa Realty Group has the power to exclude competition from the market. Coldwell Banker's allegation that Iowa Realty Group imposed adverse commission splits against RE/MAX is unpersuasive in that it only addresses harm to a specific competition and not to competition generally. *See* *Los Angeles Land Co., 6 F.3d 1422, 1426-27 (9th Cir. 1993)*; *Davies v. Genesis Medical Center, 994 F. Supp. 1078, 1097 (S.D. Iowa 1998)*. Moreover, it appears that the market has sustained a significant number of real estate businesses, **[*30]** Transcript at 135:19-136:1, while Iowa Realty Group's share of the market has decreased over the last several years, *see* Iowa Realty and First Realty Share of Completed MLS Transactions for 1996-2003, Defendant's Exhibit DDD. For the aforementioned reasons, the Court finds that there is no convincing direct evidence in the present record that Iowa Realty Group has monopoly power.

b. Willful Acquisition or Maintenance of Monopoly Power

As detailed above, Coldwell Banker was required to show both that Iowa Realty Group has monopoly power and that it willfully utilized that power. The Court found the record insufficient to support of finding that Iowa Realty Group has monopoly power. Consequently, the Court need not determine whether Iowa Realty Group willfully acquired or maintained monopoly power. *See* *National Reporting Co. v. Alderson Reporting Co., Inc., 763 F.2d 1020 (8th Cir. 1985)* ***HN11***[] (company may not be found guilty of completed monopolization in violation of the *Sherman Anti-Trust Act § 2* without proof of actually attaining market dominance or monopoly power). The Court finds Coldwell Banker unlikely to succeed on the merits of its monopolization claim.

[*31] 4. Count IV: Attempted Monopolization

Coldwell Banker also claims that Iowa Realty Group's implementation of the Passport Plus program is an attempt to monopolize in violation of *§ 2 of the Sherman Act*. ***HN12***[] A claim of attempted monopolization requires Coldwell Banker to prove that Iowa Realty Group: "(1) specifically intended to control prices or destroy competition in some part of commerce; (2) engaged in predatory or anti-competitive conduct directed to accomplishing the unlawful purpose; and (2) a dangerous probability of success." *H.J., Inc. v. Int'l Tel. & Telegraph Corp., 867 F.2d 1531, 1540-41 (8th Cir. 1989)*.

a. Specific intent to control prices or eliminate competition

As indicated above, the Court has already concluded that it is unlikely that Coldwell Banker will be able to prove that Iowa Realty Group has the ability to control prices or eliminate competition. Similarly, Coldwell Banker has not provided sufficient evidence in the record to support a finding that Iowa Realty Group implemented the Passport Plus program with the specific intent to control prices or eliminate competition from the market. Instead of attempting to create a monopoly, it appears **[*32]** that Iowa Realty Group was simply trying to reverse its recent trend of losing market share. *See* Iowa Realty and First Realty Share of Completed MLS Transactions for 1996-2003, Defendant's Exhibit DDD.

Because the Court has found insufficient evidence to support a finding of Iowa Realty Group's specific intent, the Court need not consider the remaining two factors for determining attempted monopoly. Based on the current record, the Court finds that Coldwell Banker is not likely to succeed on its attempted monopolization claim.

5. Conclusion: Likelihood of Success on the Merits

As detailed above, the Court found that Coldwell Banker is likely to succeed on its contract claims (Counts I and II), but that the record is insufficient to support a finding that Coldwell Banker is likely to succeed on its monopolization claims (Counts III and IV). Nevertheless, because Coldwell Banker is likely to succeed on its breach of contract claims this factor weighs in favor of granting preliminary relief on a limited basis.

D. Public Interest

Finally, the Court must consider whether the issuance of a preliminary injunction serves the public interest. The parties disagree as to whether implementation **[*33]** of the Passport Plus program will increase or decrease consumer choice. Iowa Realty Group argues that Passport Plus provides home sellers with additional choices regarding the listing and selling of their homes. Conversely, Coldwell Banker contends that if the Passport Plus program is enacted, buyers will no longer be able to select a realtor of their choice if they choose to purchase a Passport listed home. Coldwell Bankers also asserts that because buyers and sellers not represented by Iowa Realty Group will not have access to listing information, they will be unable to price homes competitively and do comparisons in the market.

As the Court has indicated above, the ability of the consumer to choose an office exclusive listing has been around long before the Passport Plus program. The success of Iowa Realty's promotion of office exclusive listings ultimately will be driven by the consumer. Despite the fact that Iowa Realty may advertise its Passport Plus program, it will be up to the seller of the home to decide whether an office or MLS listing is preferable. Under these circumstances, Coldwell Banker has the burden to present sufficient evidence to convince the Court that Iowa **[*34]** Realty Group's solicitation of office exclusive listings will in fact limit overall consumer choice. Coldwell Banker has not sustained its burden and the Court finds this factor neutral with regard to the Court's decision to grant preliminary injunctive relief.

IV. CONCLUSION

For the reasons outlined above and after weighing all relevant factors, IT IS HEREBY

ORDERED THAT:

I. Pending judgment after a trial, defendants, defendants' officers, servant, employees, and attorneys and all those acting in active concert or participation with them, will refrain from:

A. Failing to comply with the August 30, 2002 Co-Marketing Agreement executed by defendants and plaintiff; specifically by denying plaintiff access to information listed in the MLXchange database;

B. Failing to deliver listings and listing information to the Des Moines Area Association of Realtors' Multiple Listing Service in accordance with the Agreement executed by defendants, plaintiff, and the Des Moines Area Association of Realtors, Inc.;

C. Actively offering to or soliciting exclusive listing contracts from clients pursuant to the Passport Plus program; nothing in this Order precludes defendants **[*35]** from entering into exclusive listing contracts in accordance with the established course of dealing between the parties;

D. Refusing to cooperate with plaintiff and other real-estate brokers in the greater Des Moines area in the sharing of listing information or in the showing, selling, or buying of residential real estate; and

E. Refusing to split commissions with plaintiff and other real-estate brokers in the greater Des Moines area in accordance with the established course of dealing.

II. Nothing in this Order is to be interpreted to prevent defendants from offering benefits and incentive programs that are not exclusionary and that otherwise do not breach the Co-Marketing Agreement.

III. Nothing in this Order precludes defendants from exercising its right to terminate the Co-Marketing Agreement pursuant to VII.C. If Iowa Realty Group determines that it is in its best interest to give notice and terminate the Co-Marketing Agreement in accordance with the contract, the injunction shall only remain in effect until one year after the date notice of termination is given.

IV. In conjunction with this Preliminary Injunction Order, plaintiff has filed a bond **[*36]** in the amount of one hundred thousand dollars ($ 100,000).

The injunction will remain in effect until after the trial. [6] However, if Iowa Realty Group determines that it is in its best interest to give notice and terminate the Co-Marketing Agreement in accordance with the contract, the injunction shall only remain in effect until one year after the date notice of termination is given.

IT IS ORDERED.

Dated this 28th day of May, 2004.

RONALD E. LONGSTAFF, Chief Judge

United States District Court

---

[6] Nothing in the Court's preliminary injunction order precludes Iowa Realty Group from exercising its termination right under the Co-Marketing Agreement pursuant to VII.C.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN1[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

In the context of an antitrust suit, a horizontal agreement is "naked" if it is formed with the objectively intended purpose or likely effect of increasing price or decreasing output in the short run, with output measured by quantity or quality.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

HN2[] Appellate Review, Standards of Review

An appellate court reviews a district court's grant of summary judgment de novo.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN3[] Entitlement as Matter of Law, Genuine Disputes

In the context of a motion for summary judgment, taking the evidence in the light most favorable to the nonmovant, a court must consider whether there are any genuine issues of material fact and whether the district court properly applied the pertinent substantive law. All inferences must be drawn in favor of the nonmovant. In antitrust cases, these general standards are applied even more stringently and summary judgments granted more sparingly. As the United States Supreme Court explained in Poller v. Columbia Broadcasting Sys. Inc.: Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

For an agreement to constitute a violation of § 1 of the Sherman Act, 15 U.S.C.S. § 1, a conscious commitment to a common scheme designed to achieve an unlawful objective must be established.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN5[] Sherman Act, Defenses

No antitrust violation is more abominated than the agreement to fix prices. With few exceptions, price-fixing agreements are unlawful per se under the Sherman Act and no showing of so-called competitive abuses or evils which those agreements were designed to eliminate or alleviate may be interposed as a defense. The dispositive question generally is not whether any price fixing was justified, but simply whether it occurred.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN6[] Antitrust & Trade Law, Sherman Act

The Sherman Antitrust Act makes illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 1*. The United States Supreme Court has declined to read this language literally. Instead, the Court has created a two-tiered mode of analysis. In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality--they are "illegal per se." In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. In either event, the purpose of the analysis is to form a judgment about the competitive significance of the restraint; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of members of an industry, subject to exceptions defined by statute, that policy decision has been made by the Congress.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Quick look analysis applies when per se review is inapplicable but when an observer with even a rudimentary understanding of economics could conclude that the arrangements in question have an anti-competitive effect on customers and markets. Much like per se treatment, quick-look analysis applies when the great likelihood of anticompetitive effects can easily be ascertained.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

If the plaintiffs can establish that the defendants' conduct falls within the range of conduct considered illegal per se, it does not matter whether the particular application of the per se rule appears inefficient or unfair. As the United States Supreme Court has explained, the costs of judging business practices under the rule of reason have been reduced by the recognition of per se rules. Once experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that the restraint is unreasonable. As in every rule of general application, the match between the presumed and the actual is imperfect. For the sake of business certainty and litigation efficiency, it has tolerated the invalidation of some agreements that a full-blown inquiry might have proved to be reasonable. The Court has held consistently that the injustice of the rule's broad and uniform application must be addressed to Congress, not the judiciary.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN9[] Regulated Practices, Price Fixing & Restraints of Trade

Price fixing is among the practices which the courts have heretofore deemed to be unlawful in and of themselves.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN10[] Regulated Practices, Price Fixing & Restraints of Trade

Price fixing is the quintessential example of a per se violation of *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN11[] Regulated Practices, Price Fixing & Restraints of Trade

It is plain that *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, blanket prohibition on price fixing, like the Act itself, cannot be read literally. There are some price fixing arrangements that violate the letter of the Sherman Act but are legal nonetheless.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Joint Ventures > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN12[] **Types of Contracts, Joint Contracts**

It is not the case that the mere existence of a bona fide joint venture means that participating companies may use the enterprises to do anything they please with full immunity from per se analysis under *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, including price fixing. The issue with respect to legitimate joint ventures is whether the price fixing is "naked" (in which case the restraint is illegal) or "ancillary" (in which case it is not).

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN13[] **Types of Contracts, Joint Contracts**

The United States Supreme Court has continued to enforce the Sherman Act's per se prohibition on price fixing, and has scrutinized joint ventures to ensure that they do not contain "naked" restraints on trade. Nothing in the cases suggests that the Court would overrule Citizen Publishing in its entirety, abandon its holding that the price fixing in which the joint venture engaged was illegal per se, or eliminate the rule that "naked" price-fixing by a joint venture violates the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

Even a small conspirator may be able to impede competition and conspirators need not achieve the dimensions of a monopoly to warrant condemnation under the antitrust laws.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] **Types of Contracts, Joint Contracts**

The proper inquiry for a per se analysis of price fixing is not simply whether the joint venture itself is anti-competitive. Nor is the relevant question simply whether the defendants intended to destroy competition.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Business & Corporate Law > Joint Ventures > Formation

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Joint Ventures > General Overview

HN16[] **Types of Contracts, Joint Contracts**

The United States Supreme Court has upheld joint ventures and other corporate combinations involving fixed prices, but generally has done so only when it appeared plain to the Court that the restraints undertaken by the joint ventures were "necessary" to the legitimate aims of the joint venture. Courts have engaged in this "essentiality query," in order to ensure that a joint venture has a legitimate justification--other than the desire to enhance profits and market control--for adopting a particular restraint that would otherwise violate the Sherman Act. Thus, whether the per se rule applies to a legitimate joint venture's allegedly anticompetitive conduct depends first and foremost on a determination of whether the specific restraint is sufficiently important to attaining the lawful objectives of the joint venture that the anti-competitive effects should be disregarded.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN17[] Types of Contracts, Joint Contracts

Once a court finds the joint venture proper, it can easily determine the appropriateness of any related competitive restraints among the parties to the venture. A court should simply consider whether such restraints are necessary to promote the venture's procompetitive purposes. If a joint venture itself is procompetitive, the courts should uphold any restrictions on competition necessary to achieve its legitimate purposes. The defendant should have the burden of proving that a competitive restraint is required to further a venture's efficiency objectives. If a defendant fails to meet this burden, a court should preclude the restraint without any further inquiry.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN18[] Robinson-Patman Act, Claims

Under Robinson-Patman, *15 U.S.C.S. § 13*, sellers may not sell the same product at different prices on the basis of the identity of the buyer. The Act explicitly excludes price differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered. *15 U.S.C.S. § 13(a)*. But in adopting the Act, Congress did not intend to outlaw price differences that result from or further the forces of competition.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN19[] Antitrust & Trade Law, Robinson-Patman Act

See *15 U.S.C.S. § 13(a)*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN20[] Regulated Practices, Price Fixing & Restraints of Trade

The "fairness" of uniform pricing is not a relevant consideration in an antitrust case; consumers are presumed to prefer lower prices to the satisfaction of knowing they paid the same inflated price as everyone else.

Opinion

[*1110] REINHARDT, Circuit Judge:

Plaintiffs Fouad N. Dagher, et al., appeal from the district court's award of summary judgment to the defendants, Texaco, Inc., Shell Oil Co., and Saudi Refining, Inc. (SRI), et al. The plaintiffs represent a class of 23,000 Texaco and Shell service station owners who allege that the defendants conspired to fix the nationwide prices for the Shell and Texaco brands of gasoline **[**2]** through the creation of a national alliance consisting of two joint ventures. The district court granted two summary judgment motions: one to dismiss defendant SRI because the plaintiffs lacked antitrust standing; the other to dismiss the complaint against the remaining defendants because the plaintiffs failed to raise a triable issue of fact as to whether the *Sherman Antitrust Act*'s *per se* prohibition against price fixing is applicable to the economic arrangements between the defendants. We affirm the district court's ruling as to the plaintiffs' standing to sue SRI, but reverse the district court's decision that the plaintiffs failed to create a triable issue of fact under the Sherman Act.

I. Factual and Procedural History

A. Factual History

Texaco, Inc., and Shell Oil Co. were once fierce competitors in the national oil and gasoline markets. They competed at both wholesale and retail levels, and in both upstream and downstream operations. [1] The two companies generally operated by independently refining gasoline and then selling the gas either to licensed Texaco **[*1111]** and Shell service stations or to wholesale distributors.

[3]** From 1989 to 1998, defendants Saudi Refining, Inc. (SRI) and Texaco sold gas on the East Coast through Star Enterprise, a joint venture "engaged in the refining and marketing of gasoline under the Texaco brand." Both Shell and Texaco sensed intensified competition in the downstream operations of their industry -- they similarly believed that "the oil industry was about to enter a period of consolidation." To respond to the heightened competition in the oil and gas industry, Shell approached Texaco in 1996 about several potential corporate combinations designed to enhance efficiency and reduce competition between the two companies with respect to the downstream refining and marketing of gasoline. In 1998, preliminary discussions yielded an agreement to form a nationwide alliance (hereinafter: "the alliance") [2] **[**5]** consisting of two separate joint ventures. [3] One joint venture was named "Equilon Enterprises" (Equilon); it combined Shell's and Texaco's downstream operations in the western United States. The other venture, formed by Texaco, Shell, and SRI, was named "Motiva Enterprises" (Motiva); it combined the three companies' downstream operations in the eastern United States. The alliance **[**4]** had a national market share of 15% of all gasoline sales, on the West Coast, Equilon's market share exceeded 25%.

There is a voluminous record documenting the economic justifications for creating the joint ventures. After analysis by teams made up of representatives of all three companies, the defendants concluded that numerous synergies and cost efficiencies would result. The defendants concluded that nation-wide there would be up to $ 800 million in cost savings annually. The Federal Trade Commission and several State Attorneys General approved the formation of the joint ventures, subject to modifications demanded by both the federal agency and the various Attorneys General.

The creation of the alliance ended competition between Shell and Texaco throughout the nation in the areas of downstream refining and marketing of gasoline. Texaco and Shell signed non-competition agreements which prohibited **[**6]** them from competing with either Equilon or Motiva and committed them "not to engage in the manufacturing and marketing of certain products in the [relevant] geographic areas, including fuel, synthetic gasoline, and electricity." The two joint ventures established fixed ratios for profit sharing and for bearing the risk of

---

[1] The parties have explained in their joint stipulations that "crude oil is the raw product from which gasoline is made at a refinery. Upstream operations consist of exploring for and producing crude oil, and downstream operations consist of refining crude into gasoline and other products and marketing the finished products."

[2] Defendants dispute that an "alliance" existed and characterize Equilon and Motiva as distinct entities. Appellees' Brief, at 46. While the defendant corporations did not create a new legal entity called "The Alliance," the record establishes beyond dispute that representatives of Texaco and Shell generally referred to the two joint ventures as part of a single project to combine the two companies' nationwide refining and marketing operations. Moreover, the record confirms that the single project was often referred to as "an alliance," and frequently called "The Alliance," by representatives of Texaco, Shell, and SRI, and by Board Members from the two joint ventures, "Equilon Enterprises" (Equilon) and "Motiva Enterprises" (Motiva). When we refer to "the alliance," we therefore refer to the combined national refining and marketing operation consisting of Equilon and Motiva -- an enterprise which was created, developed, and maintained collectively by the individual defendant corporations.

[3] The district court explained the massive scope of the alliance: "the downstream assets in Equilon and Motiva include twelve refineries, twenty-three lubricant plants, two research laboratories, 22,000 branded service stations, over 24,000 miles of pipeline, 107 terminals, and approximately 24,000 employees."

losses. **[*1112]** In Equilon, Shell has a 56% interest while Texaco owns 44%. In Motiva, Shell owns 35%, while SRI and Texaco each own 32.5%.

Despite the collective assumption of risk and resource pooling in the joint ventures, Shell and Texaco continued to operate as distinct corporations. Each retained its own trademarks and kept control over its own brands pursuant to separate Brand Management Protocols, each of which prohibited the joint ventures from giving preferential treatment to either brand. Under the joint venture agreements, Equilon and Motiva market Shell and Texaco gasoline under licensing agreements governing both the sale of the products and the use of the Shell and Texaco trademarks. Each company maintained its ability to return to individual sales and marketing -- the joint ventures contain provisions allowing for dissolution at any time by mutual consent **[**7]** or, after five years time, by unilateral dissolution with two years advance notice.

The various agreements between the oil companies allowed Texaco and Shell to consolidate and unify the pricing of the Texaco and Shell gasoline brands within the Equilon and Motiva joint ventures. Before creating the two joint ventures, Shell, Texaco, and Star all independently set prices for their wholesale and retail sales, generally through decisions made by their corporate pricing units. Testimony in the record reveals that, either immediately before the formation of the joint ventures or sometime shortly thereafter, "a decision was made that the Shell and Texaco brands would have the same price in the same market areas." The decision to charge the same price for the two distinct brands "was developed as sort of an operating requirement right from the very start or near to the very start of the alliance." Equilon and Motiva integrated this pricing decision into a project named "The Strategic Marketing Initiative" (SMI), which sought to develop ways in which the alliance could produce and promote both brands more competitively. There is some evidence in the record establishing that the decision **[**8]** to set one price for the two brands was conceived of in the SMI even before Motiva was formed. [4]

The alliance consolidated pricing of the Texaco and Shell brands such that a single individual at each joint venture was responsible for setting a coordinated price for the two brands. The joint ventures did, however, continue to adjust the pegged price of the brands to each unique geographic sale area. The pricing was consolidated **[**9]** despite the fact that Texaco and Shell maintained each brand as a distinct product -- each brand has its own unique chemical composition (the gasoline is differentiated by separate packages of "additives"), trademark, and marketing strategy -- and competed for customers "at the pump." The companies, and the joint ventures, continued to target each brand at a different customer base -- "Texaco customers tend to be more blue-collared and rural than Shell customers, who are more affluent and urban."

The price optimization program may have allowed Equilon and Motiva to raise gasoline prices at a time when the price of crude oil was low and stable. During a **[*1113]** time when crude oil prices reached near-historic lows -- the price of crude oil decreased from $ 10 to $ 12 per barrel between September 1998 and February 1999 -- Equilon raised its prices $ .40 per gallon in Los Angeles and $ .30 per gallon in both Seattle and Portland.

B. Procedural History

The plaintiffs commenced this civil action in the United States District Court for the Central District of California. They brought suit on behalf of themselves and approximately 23,000 Shell and Texaco service station owners, alleging **[**10]** that defendants SRI, Texaco, Shell, Motiva, Equilon, Equiva Trading Co., and Equiva Services, LLC, engaged in a price fixing scheme to raise and fix gas prices through the alliance and the two joint ventures, Motiva and Equilon, in violation of *Section 1 of the Sherman Antitrust Act*, *15 U.S.C. § 1*. The plaintiffs disclaimed any

[4] The record does not establish with certainty whether the decision to price the two brands together was actively discussed during the SMI. The evidence does show that the SMI included a "price optimization" program. And there is some evidence in the record that the price optimization program ratified the unofficial decision to move toward unitary pricing -- one witness testified that the price optimization program included "a policy or a procedure to charge the same prices to both -- to similar classes of trade in the same marketing areas and to effect those -- to effect those changes."

reliance on the traditional "rule of reason" test, instead resting their entire claim on either the per se rule or a "quick look" theory of liability.

The defendants moved to dismiss under *FED. R. CIV. P. 12(b)(6)*. The issue with respect to the *12(b)(6)* motion was "whether the alleged agreement among Saudi, Shell, and Texaco is an unreasonable restraint of trade . . . under either the *per se* rule or a 'quick look' rule of reason analysis." The district court denied the motion. The court found that although the *per se* rule against price fixing plainly does not make all price-restraining joint ventures illegal, neither does "an agreement to fix prices . . . merit full rule of reason treatment solely because it is part of a broader joint venture agreement." The court explained that "price fixing **[**11]** can still be illegal per se even if it accompanies an efficient, integrated joint venture. If the joint venture could function perfectly well without price fixing, then the price fixing amounts to no more than an extraneous, anticompetitive restraint that does not merit rule of reason analysis." The district court found that the plaintiffs' complaint alleged sufficient facts to demonstrate that the alliance's price setting regime was a naked, rather than an ancillary, restraint on trade. [5] The district court disposed of the plaintiffs' alternative theories of liability -- the plaintiffs originally alleged a "market division" theory and a "manipulation of leases" theory to support their *per se* *Section 1* violation -- but gave plaintiffs leave to amend.

[12]** The parties filed cross-motions for summary judgment. The district court decided the motions in two separate orders. The first order granted SRI's motion for summary judgment on the ground that the plaintiffs lacked antitrust standing because no plaintiff had ever bought gasoline, or other products, from the Motiva joint venture or directly from SRI and because the plaintiffs lacked "direct or circumstantial evidence 'sufficiently unambiguous to permit a trier of fact to find that [SRI] conspired' to fix prices in the western United States absent 'any apparent motive to do so.'" (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 597, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986))*.

The second order granted the remaining defendants' motion for summary judgment on the ground that the rule of reason, not the *per se* or "quick look" rules, governed the Sherman Act analysis of the joint ventures. The district court applied its own analytical framework, consisting of two **[*1114]** questions: "(1) whether a reasonable trier of fact could conclude that Equilon and Motiva are either mere window-dressings for a price fixing conspiracy or (2) whether they are otherwise patently **[**13]** anticompetitive." The court concluded -- relying on the detailed and costly negotiations leading up to the creation of the joint ventures -- that Equilon and Motiva were plainly not "fly-by-night" operations designed to cover up an elaborate price-fixing scheme. Moreover, the court found that Motiva and Equilon produced sufficient efficiencies and were sufficiently integrated to constitute indisputably legitimate joint ventures under either the *per se* rule or a "quick look" analysis. Finally, the district court concluded that, because every joint venture "must, at some point, set prices for the products they sell" (citation omitted), a theory which made it illegal for a joint venture to fix prices of its various brands would "act as a per se rule against joint ventures between companies that produce competing products."

II. Standard of Review

HN2[↑] We review a district court's grant of summary judgment *de novo*. *United States v. City of Tacoma, 332 F.3d 574, 578 (9th Cir. 2003)*. ***HN3***[↑] Taking the evidence in the light most favorable to the nonmovant, we must consider whether there are any genuine issues of material fact and whether the district court properly **[**14]** applied the pertinent substantive law. *City of Tacoma, 332 F.3d at 578*; *Abdul-Jabbar v. General Motors Corp., 85 F.3d 407, 410 (9th Cir. 1996)*. All inferences must be drawn in favor of the nonmovant. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. "In antitrust cases, these general standards are applied even more stringently and summary judgments granted more sparingly." *Beltz Travel Service, Inc. v.*

[5] ***HN1***[↑] A "horizontal agreement [is] 'naked' if it is formed with the objectively intended purpose or likely effect of increasing price or decreasing output in the short run, with output measured by quantity or quality." XI HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 1905, at 210 (1998) (hereinafter: HOVENKAMP).

International Air Transport Ass'n., 620 F.2d 1360, 1364 (9th Cir. 1980) (citations omitted). As the Supreme Court explained in *Poller v. Columbia Broadcasting Sys. Inc., 368 U.S. 464, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*:

> Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised.

Id. at 473.

III. Standing

The district **[**15]** court found that the plaintiffs lacked standing to sue SRI. The court's decision was based upon two considerations: first, none of the named plaintiffs had ever purchased any products from SRI or from Motiva; and second, the plaintiffs failed to produce sufficient evidence linking SRI to a conspiracy to fix prices in the Western United States. There is no dispute that the plaintiffs never purchased any products from SRI, or from Motiva. Nor is there any doubt that SRI did not sign any of the documents establishing Equilon, did not refine or market gasoline in the Western United States, and had no motive to conspire with Shell and Texaco to fix those brands' prices in the West. Yet the plaintiffs maintain that SRI engaged in a nationwide price-fixing conspiracy with Texaco and Shell through its participation in Motiva, and therefore is liable for all of the acts of each conspiracy member. *See Beltz Travel, 620 F.2d at 1367*; *see also Appellants' Brief, at 42.*

The plaintiffs rest their theory of standing on the existence of a national **[*1115]** conspiracy -- and, in this case, defendants Texaco, Shell, Equilon, and Motiva have admitted that they fixed prices by charging the **[**16]** same price for the Texaco and Shell brands. But the plaintiffs do not establish standing under our precedent simply by showing that SRI was involved to some extent in the planning of certain aspects of the alliance. Rather, ***HN4***[] "for an agreement to constitute a violation of *section 1 of the Sherman Act*, a 'conscious commitment to a common scheme designed to achieve an unlawful objective' must be established. *Toscano v. PGA, 258 F.3d 978, 983 (9th Cir. 2001)* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464, (1984))*.

The plaintiffs did proffer evidence showing that Equilon and Motiva were formed as the result of a series of negotiations designed to create a national alliance. Apparently, Shell originally approached the other parties with "ideas about a larger alliance" and explored the possibility of a nationwide alliance. The record contains clear evidence showing that Equilon and Motiva were conceived of as a single strategy to create a national operating structure, separated solely for the sake of efficiency. Moreover, the plaintiffs point to substantial evidence that Equilon and Motiva made pricing decisions together **[**17]** via cooperation through their marketing departments.

Still, the plaintiffs have failed to provide evidence sufficiently implicating SRI in the nationwide price-fixing scheme. The district court found that SRI had "no apparent motive to conspire with Shell and Texaco with respect to Equilon and the Western United States," largely because SRI "would not benefit from any potential anticompetitive effects in Equilon's territory." The plaintiffs have offered no evidence to the contrary. In fact, the record shows unequivocally that SRI's interests were limited to the operation of Motiva and the refining and marketing of gasoline in the Eastern portion of the nation, and that, even there, SRI vigorously protested the domination of the Motiva Board by Shell and Texaco representatives. SRI lamented that the Motiva Board members, who were corporate representatives of Texaco and Shell, and many of whom were also members of the Equilon Board, appeared to be making their decisions for the nationwide "alliance" rather than for the individual joint ventures. [6] The record thus demonstrates

---

[6] One board member who represented SRI in Motiva observed that, "once the Equilon Board takes a position on an issue common to both Motiva and Equilon, Shell and Texaco will have a strong desire to have the same action taken in Motiva." The member further stated:

that -- far from engaging in a nationwide conspiracy -- SRI had little interest in acceding to the "cooperative" **[**18]** efforts by "common Motiva and Equilon Board members, from Shell and Texaco." In short, the plaintiffs failed to produce evidence that SRI had a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto, 465 U.S. at 764*. Although the issue is a close one, we affirm the district court's holding that the plaintiffs failed to establish that SRI participated in the operation of a nation-wide **[*1116]** price-fixing alliance or in the fixing of prices in the Western region of the United States.

[**19] IV. Liability under the Sherman Antitrust Act

HN5[] "No antitrust violation is more abominated than the agreement to fix prices. With few exceptions, 'price-fixing agreements are unlawful *per se* under the Sherman Act and . . . no showing of so-called competitive abuses or evils which those agreements were designed to eliminate or alleviate may be interposed as a defense.' The dispositive question generally is not whether any price fixing was justified, but simply whether it occurred." *Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1144 (9th Cir. 2003)* (citations omitted) (alteration in original). The question we confront in this case, however, is not whether two companies engaged in run-of-the-mill price fixing. Instead, the defendants have asked us to find an exception to the *per se* prohibition on price-fixing where two entities have established a joint venture that unifies their production and marketing functions, yet continue to sell their formerly competitive products as distinct brands. In doing so, the companies fixed the prices of those two brands of gasoline, Texaco and Shell, by agreeing *ex ante* to charge the exact same price for **[**20]** each. We think the exception the defendants seek is inconsistent with the Sherman Act as it has been understood to date.

HN6[] The Sherman Antitrust Act makes illegal "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations[.]" *15 U.S.C. § 1*. The Supreme Court has declined to read this language literally. *See* *Nat'l Soc'y of Prof'l Engineers v. United States, 435 U.S. 679, 687, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)* (noting that *§ 1 of the Sherman Act* "cannot mean what it says"). Instead, the Court has created a two-tiered mode of analysis.

> In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality -- they are "illegal *per se*." In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. In either event, the purpose of the analysis is to form a judgment about the competitive significance of the restraint; it **[**21]** is not to decide whether a policy favoring competition is in the public interest, or in the interest of members of an industry. Subject to exceptions defined by statute, that policy decision has been made by the Congress.

Prof'l Engineers, 435 U.S. at 692. All parties agree that the relevant question in this case is whether the defendants' conduct falls under the first category of analysis. [7]

> As is exhibited by Motiva's incorrect reference to the Alliance, rather than Motiva, at the bottom of page 7 and the top of page 8 of the attached Business Plan writeup, the 'focus on Motiva' message will have to be repeated often to get it accepted. The more we allow "Alliance" to dominate, the greater the likelihood that personal behavior will favor "Alliance" over Motiva and the greater the likelihood that sub-optimizations of Motiva, in favor of the Alliance, will occur. We are on alert in this regard but the "Alliance" force is a large one.

[7] The plaintiffs have also suggested that if we reject their *per se* approach, we should employ the "quick look" theory of review to find defendants liable. ***HN7***[] Quick look analysis applies when *per se* review is inapplicable but when "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question have an anti-competitive effect on customers and markets." *California Dental Ass'n v. Federal Trade Commission, 526 U.S. 756, 770, 143 L. Ed. 2d 935, 119 S. Ct. 1604 (1999)*. As the district court rightly noted, "much like per se treatment, quick-look analysis applies 'when the great likelihood of anticompetitive effects can easily be ascertained.'" (quoting *California Dental, 526 U.S. at 770*). Because we hold that the plaintiffs have made a sufficient showing with respect to the illegality of the alliance's price fixing system under the *per se* rule, we need not decide whether that scheme would survive "quick look" review.

[22]** **[*1117]** ***HN8***[] If the plaintiffs can establish that the defendants' conduct falls within the range of conduct considered illegal *per se*, it does not matter whether the particular application of the *per se* rule appears inefficient or unfair. As the Court has explained,

> The costs of judging business practices under the rule of reason, however, have been reduced by the recognition of per se rules. Once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that the restraint is unreasonable. As in every rule of general application, the match between the presumed and the actual is imperfect. For the sake of business certainty and litigation efficiency, we have tolerated the invalidation of some agreements that a fullblown inquiry might have proved to be reasonable.

Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 343-44, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982) (citations omitted). [8] The Court has held consistently that the injustice of the rule's broad and uniform application must be addressed to Congress, not the judiciary. *See* *Prof'l Engineers, 435 U.S. at 692.* **[**23]**

HN10[] Price fixing is the quintessential example of a *per se* violation of *§ 1*. Numerous cases support this basic principle. *See* *Fed. Trade Comm'n v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 433, 107 L. Ed. 2d 851, 110 S. Ct. 768 (1990)* (explaining that there is a *per se* rule against price fixing having the "same force and effect as any other statutory commands"); *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents, 468 U.S. 85, 107-08, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)* ("Restrictions on price and output are the paradigmatic examples of restraints of trade that the Sherman Act was intended to prohibit.") (citation omitted) (hereinafter: *NCAA*); *Maricopa County, 457 U.S. at 351* **[**24]** ("The anticompetitive potential inherent in *all* price-fixing agreements justifies their facial invalidation even if procompetitive justifications are offered for some. Those claims of enhanced competition are so unlikely to prove significant in any particular case that we adhere to the rule of law that is justified in its general application."); *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)* ("It has long been settled that an agreement to fix prices is unlawful per se. It is no excuse that the prices fixed are themselves reasonable.") (citations omitted); *Prof'l Engineers, 435 U.S. at 692* (noting that "price is the 'central nervous system of the economy'" and holding that "an agreement that 'interferes with the setting of price by free market forces' is illegal on its face") (citation and alteration omitted).

Notwithstanding the above, ***HN11***[] it is plain that *§ 1*'s blanket prohibition on price fixing, like the Act itself, cannot be read literally. *Cf.* *Prof'l Engineers, 435 U.S. at 687* (*§ 1 of the Sherman Act* "cannot mean what it says"). There are *some* price fixing arrangements that violate the **[**25]** letter of the Sherman Act but are legal nonetheless. For instance, when two competing companies agree to merge and **[*1118]** to combine their product lines, or to eliminate the old product lines and create an entirely new one, they generally agree to adopt a uniform pricing scheme. The Supreme Court has permitted such arrangements. In addition, in *Maricopa County*, the Supreme Court noted in dicta that in joint ventures where "persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit," the ventures are considered, for some purposes at least, to be "single firms competing with other sellers in the market." *457 U.S. at 356*; *see also* *Broad. Music, Inc. v. Columbia Broad. Sys. Inc., 441 U.S. 1, 9, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)* ("When two partners set the price of their goods or services they are literally 'price fixing,' but they are not per se in violation of the Sherman Act.") (hereinafter: *BMI*) (citation omitted).

HN12[] It is not the case, however, that the mere existence of a bona fide joint venture means that participating companies may use the enterprises to do anything they please with full immunity **[**26]** from *per se* analysis under *§ 1*, including price fixing. As the district court correctly stated when ruling on the motion to dismiss, the issue with respect to legitimate joint ventures is whether the price fixing is "naked" (in which case the restraint is illegal) or "ancillary" (in which case it is not). *Accord* XI HOVENKAMP P 1908, at 228-30 (arguing that "a restraint does not qualify as 'ancillary' merely because it accompanies some other agreement that is itself lawful" and that "a restraint

[8] The *Maricopa* Court noted in a footnote that ***HN9***[] price fixing is "among the practices which the courts have heretofore deemed to be unlawful in and of themselves." *Id. at 344 n.15* (quoting *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958))* (parallel citation omitted).

is not saved from the 'naked' classification simply because it is included in some larger joint venture arrangement that is clearly efficient"). For instance, if in reliance on the existence of a valid joint venture between Coca Cola and Pepsi designed to research new types of soda flavors, the two companies imposed a price floor on all soda sold nationwide, the price fixing would constitute an illegal "naked restraint on trade." Along these lines, the Supreme Court has recognized that even joint ventures that are lawful in their general operations may violate the Sherman Act when they engage in specific anticompetitive conduct. *See* *NCAA, 468 U.S. at 110* (holding that **[**27]** an agreement among NCAA schools restricting the broadcasting of football games was an invalid "naked restraint on price and output" but not questioning the validity of the association itself); *BMI, 441 U.S. at 23* (holding that joint ventures are not "*usually* unlawful, at least not . . . where the agreement on price is *necessary* to market the product at all") (emphasis added); *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 95 L. Ed. 1199, 71 S. Ct. 971 (1951)* ("The fact that there is common ownership or control of the contracting corporations does not liberate them from the impact of the anti-trust laws. . . . Agreements between legally separate persons and companies to suppress competition among themselves and others [cannot] be justified by labeling the project a 'joint venture.'") (citation omitted); *see also* XI HOVENKAMP P 1908, at 228-29 (1998) (noting that the Supreme Court has often condemned joint ventures' price- or output-fixing provisions while leaving "the balance of the joint venture intact").

The defendants' argument to the contrary -- that joint ventures such as Equilon and Motiva are incapable of violating the Sherman **[**28]** Act -- ignores the lesson of *Citizen Publishing Co. v. United States, 394 U.S. 131, 22 L. Ed. 2d 148, 89 S. Ct. 927 (1969)*, as well as that of *NCAA*, *BMI*, and *Timken*. In *Citizen Publishing*, the Supreme Court confronted a joint venture similar to the one between Equilon and Motiva. The defendants in that case were the two daily newspapers in Tucson, Arizona. **[*1119]** They entered into a joint venture agreement, which "provided that each paper should retain its own news and editorial departments, as well as its corporate identity." *394 U.S. at 133*. The joint venture established a new company, Tucson Newspapers, Inc., "which was to manage all departments of their business except the news and editorial units. The production and distribution equipment of each paper was transferred to TNI." *Id. at 133-34*. The purpose of the agreement, like the purpose of the Alliance, was "to end any business or commercial competition between the two papers." *Id. at 134*. [9]

[29]** The Supreme Court held that the confluence of these anti-competitive restraints, in the context of a joint venture between two formerly-vigorous competitors in the market area targeted by the venture, constituted a *per se* violation of the Sherman Act.

> The *§ 1* violations are plain beyond peradventure. Price-fixing is illegal per se. Pooling of profits pursuant to an inflexible ratio at least reduces incentives to compete for circulation and advertising revenues and runs afoul of the Sherman Act. The agreement not to engage in any other publishing business in Pima County was a division of fields also banned by the Act. The joint operating agreement exposed the restraints so clearly and unambiguously as to justify the rather rare use of a summary judgment in the antitrust field.

Id. at 135 (internal citations omitted). Cases like *Maricopa County* and *BMI* do seem to suggest that the Court, if confronted with a similar joint venture today, might not find the enterprise as a whole unlawful. ***HN13***[] The Court has, however, continued to enforce the Sherman Act's *per se* prohibition on price fixing, and has scrutinized joint ventures to ensure that **[**30]** they do not contain "naked" restraints on trade. *See, e.g.*, *NCAA, 468 U.S. at 109*. Nothing in the cases suggests that the Court would overrule *Citizen Publishing* in its entirety, abandon its holding that the price fixing in which the joint venture engaged was illegal *per se*, or eliminate the rule that "naked" price-fixing by a joint venture violates the Sherman Act.

The district court distinguished *Citizen Publishing* in three ways. Each is unsatisfactory. First, the court found that the Tucson newspapers in *Citizen Publishing* effectively eliminated "all competition," whereas Equilon and Motiva "continue to compete with several major oil companies in their relevant markets." This distinction runs contrary to

---

[9] Also similar to the agreements forming Equilon and Motiva, the *Citizen Publishing* agreement imposed several anticompetitive controls: first, the joint venture consolidated pricing and set joint subscription and advertising rates; second, the venture pooled all profits and losses pursuant "to an agreed ratio"; and third, the two parent corporations agreed not to compete against each other or the joint venture in the relevant market areas. *Id.*

Supreme Court precedent. *See* *Fed. Trade Comm'n, 493 U.S. at 434, 436* (noting that ***HN14***[] even "a small conspirator may be able to impede competition" and holding that "conspirators need not achieve the dimensions of a monopoly, or even a degree of market power any greater than that already disclosed by this record, to warrant condemnation under the antitrust laws"). [10]

[31] [*1120]** Second, the district court found that the *Citizen Publishing* newspapers "combined for the specific purpose of restricting competition and fixing prices," in contrast to a complete lack of evidence establishing such intent for the alliance ventures. That distinction, if true, would speak only to the validity of Equilon and Motiva as a whole -- it would not justify the defendants' adoption of a price fixing scheme. Moreover, the court's finding was contrary to its obligation to accept the version of disputed facts most favorable to the plaintiffs. Several of the defendants' witnesses admitted during depositions that the decision to unify the pricing of the Texaco and Shell brands was made contemporaneously with the formation of the alliance, but before the actual joint ventures officially existed, and that the very purpose of the alliance was to eliminate competition in order to realize efficiency gains and gain market share. [11] The plaintiffs created a sufficient issue of material fact as to whether the intended purpose of the unified pricing scheme was to restrict competition.

[32]** Third, the district court believed that the only reason the non-competition agreement in *Citizen Publishing* was unlawful was because the agreement joined the only two competitors in the market. The Western oil market, by contrast, is a diverse market with "several competitors," while the Equilon joint venture has a much narrower non-competion agreement. This distinction returns to an analysis of market power, an analysis which the Supreme Court has held is inappropriate in this type of case. *See* *Federal Trade Comm'n, 493 U.S. at 434-35*; *NCAA, 468 U.S. at 110* ("We have never required proof of market power in such a case."). Moreover, the record shows both that Equilon exercised a substantial amount of control over the Western gasoline market, and that the two joint ventures helped divide the gasoline consumer field by jointly promoting and targeting the Texaco and Shell brands to better capture their relevant markets. None of the district court's distinctions is sufficient to justify ignoring *Citizen Publishing* and that decision's condemnation of price fixing by former competitors even when adopted as part of a joint venture arrangement.

[33]** In granting the defendants' summary judgment motion, the district court ruled that "a reasonable trier of fact could not find that the Defendants formed Equilon and Motiva merely to achieve an ulterior anticompetitive purpose or that the ventures are patently anticompetitive." [12] **[*1121]** Even were that true, the district court stopped short of completing the requisite inquiry. ***HN15***[] The proper inquiry for a *per se* analysis of price fixing is not simply whether the joint venture itself is anti-competitive. Nor is the relevant question simply whether the defendants intended to destroy competition. *See* *Paladin Associates, Inc. v. Montana Power Co., 328 F.3d 1145, 1153-54 (9th Cir. 2003)* (holding that evidence of an intent to destroy competition or engage in predatory price controls is not essential to demonstrating the existence of an illegal agreement). Rather, if the answer to those questions is in the

---

[10] *See also* *NCAA, 468 U.S. at 109-10* ("As a matter of law, the absence of proof of market power does not justify a naked restraint on price or output. . . . This naked restraint on price and output requires some competitive justification even in the absence of a detailed market analysis.").

[11] Thus, contrary to our dissenting colleague's understanding, the pricing decision was not made by a single economic entity. *See* Post, at 6901, *id.* at 6902 ("Nothing more radical is afoot than the fact that an entity, which now owns all of the production, transportation, research, storage, sales and distribution facilities for engaging in the gasoline business, also prices its own products. It decided to price them the same, as any other entity could."). At this stage of the litigation, we are required to draw all reasonable inferences in favor of the plaintiffs. Viewing the evidence in that light, there is at least a triable issue of fact as to whether Texaco and Shell agreed in advance to charge the same price for their two distinct gasoline brands as an initial operating requirement of the alliance. The decision by Texaco and Shell to include in their joint ventures a unified pricing scheme was not a decision made by a single economic entity -- it was a decision made by competitors. Whether the agreement constituted "a conspiracy [] in restraint of trade," *15 U.S.C. § 1*, or whether such a conspiracy would exist regardless of when the decision to engage in unified pricing was made, is for the district court to determine on remand.

[12] The district court asked whether "Equilon and Motiva are either mere window-dressings for a price fixing conspiracy or . . . are otherwise patently anticompetitive."

negative, we must then decide whether the defendants' conduct -- setting one, unified price for both the Texaco and Shell brands of gasoline instead of setting each brand's price independently on the basis of normal market factors [13] -- is reasonably necessary to further the **[**34]** legitimate aims of the joint venture. *See* *Freeman, 322 F.3d at 1151* (holding that plainly anticompetitive conduct by otherwise valid joint ventures must be "reasonably ancillary to the legitimate cooperative aspects of the venture") (citation omitted).

HN16[] The Supreme Court has upheld joint ventures and other corporate combinations involving fixed prices, but generally has done so only when it appeared plain to the Court that the restraints undertaken by the joint ventures were "necessary" to the legitimate aims of the joint venture. *See* *BMI, 441 U.S. at 23* (approving an otherwise invalid price restraint only because "the agreement on price is necessary to market the product at all"); **[**35]** *NCAA, 468 U.S. at 117* ("Our decision not to apply a per se rule to this case rests in large part on our recognition that a certain degree of cooperation is necessary if the type of competition that petitioner and its member institutions seek to market is to be preserved."); *468 U.S. at 101* ("what is critical is that this case involves an industry in which horizontal restraints on competition are essential if the product is to be available at all"); *accord* XI HOVENKAMP P 1908, at 236 ("Joint sales endeavors may require joint price setting, particularly when the jointly produced product, such as the "blanket" license in *BMI*, is something individual participants could not produce at all."). Courts have engaged in this "essentiality query," *id.* at 228, in order to ensure that a joint venture has a legitimate justification -- other than the desire to enhance profits and market control -- for adopting a particular restraint that would otherwise violate the Sherman Act. Thus, whether the *per se* rule applies to a legitimate joint venture's allegedly anticompetitive conduct depends first and foremost on a determination of whether the specific restraint **[**36]** is sufficiently important to attaining the lawful objectives of the joint venture that the anti-competitive effects should be disregarded. [14]

[37] [*1122]** In considering the relationship of the enterprise's pricing actions to the venture's legitimate objectives, we find it significant that the defendants here did not simply consolidate the pricing decisions within the joint ventures -- they *unified* the pricing of the two brands from the time the alliance was formed by designating one individual in each joint venture to set a single price for both brands. [15] Normally, a business determines the prices it will charge for its various products by considering numerous factors, just a few of which include the costs of production and marketing and the contours of the relevant product markets. In this case, the defendants have stressed that, in addition to the differences in the product themselves, the gasolines marketed under the Texaco and Shell labels have different reputations and consumer bases. It thus seems likely that independent price analyses would result, at least in some circumstances, in the rational decision to sell the different brands at different prices. Instead, the defendants chose to fix those prices uniformly.

[38]** The defendants have thus far failed to offer any explanation of how their unified pricing of the distinct Texaco and Shell brands of gasoline served to further the ventures' legitimate efforts to produce better products or capitalize on efficiencies. Nor does the record contain facts sufficient to warrant our drawing any such inference. To

---

[13] We assume that normal market factors would include the cost of production and marketing, supply, demand, and the like.

[14] As one commentator has explained,

> ***HN17***[] Once a court finds the joint venture proper, it can easily determine the appropriateness of any related competitive restraints among the parties to the venture. A court should simply consider whether such restraints are necessary to promote the venture's procompetitive purposes. If a joint venture itself is procompetitive, the courts should uphold any restrictions on competition necessary to achieve its legitimate purposes. . . . The defendant should have the burden of proving that a competitive restraint is required to further a venture's efficiency objectives. If a defendant fails to meet this burden, a court should preclude the restraint without any further inquiry.

Thomas A. Piraino, Jr., *A Proposed Antitrust Approach to Collaborations Among Competitors*, *86 Iowa L. Rev. 1137, 1188-89 (2001)*.

[15] As stated earlier, this single price was subject to variations depending upon geographic markets, such that the price of the Texaco and Shell brands might be higher in San Diego, California than it was in Lincoln, Nebraska. The two brands, however, were always priced together in each geographic market -- the price never varied as between the two.

the contrary, the record before us reveals that the alliance never considered unified pricing to be relevant to product improvement or efficiency gains. As one oil company executive explained, all of the anticipated cost savings, which were calculated prior to formation of the joint ventures, had "nothing to do with pricing." The absence of persuasive evidence showing a procompetitive justification for initiating the price-fixing scheme, when viewed along with the plaintiffs' evidence showing anti-competitive effects, convinces us that the plaintiffs have made a sufficient showing as to the applicability of the *per se* rule. [16]

[39]** The defendants offer only two justifications for the unitary pricing scheme. First, the defendants argue -- as does our dissenting colleague -- that, as a general rule, any bona fide joint venture must be able to set prices for its products at whatever level it chooses: "without the ability to price its products, neither venture would have had the authority to make fundamental decisions affecting its financial performance." Appellees' Brief, at 16. Second, the defendants argue that Equilon and Motiva fixed uniform Texaco and Shell prices in order to "prevent issues of price discrimination from arising under the *Robinson-Patman Act*[.]" *Id.* We address the latter justification first.

A cursory examination of the Robinson-Patman Act, *15 U.S.C. § 13*, [17] which was **[*1123]** designed to prevent sellers from engaging in price discrimination, reveals its inapplicability here. ***HN18***[] Under Robinson-Patman, sellers may not sell the same product at different prices on the basis of the identity of the buyer. [18] But in adopting the Act, "Congress did not intend to outlaw price differences that result from or further the forces of competition." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 220, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993).* **[**40]** Robinson-Patman was aimed at evils entirely absent here. As another Circuit has explained,

> The [Act] was . . . motivated by concerns for small, independent distributors, which in the 1930's were threatened by the arrival of chain stores. It marked "the high-water mark of the anti-chain-store movement." Although the *Clayton Act* had prohibited certain price discriminations, it was seen as ineffective in stopping the discriminatory prices granted chain stores by virtue of their size. So far as purchasing was concerned, this discrimination put the more normal "mom and pop" merchants of the day at a competitive disadvantage. Congress [enacted Robinson-Patman] to alleviate the disadvantage by putting the new age retailing behemoths on a level "playing-field" with small independent merchants and businessmen. . . .
>
> As is obvious from this brief summary of the RPA's history, "it is fairness, as Congress perceives it, that Robinson-Patman is all about." The Act's goal is to abolish unwarranted favoritism among all functional competitors, big or small. Its objective is to assure "that businessmen at the same functional level start on equal competitive footing so far as price **[**41]** is concerned"; "to assure that all sellers regardless of size, competing directly for the same customers . . . receive evenhanded treatment from their suppliers" . . . .

Alan's of Atlanta, Inc. v. Minolta Corp., 903 F.2d 1414, 1422 (11th Cir. 1990) (internal citations, alterations, and footnote omitted).

The quoted passage makes it clear that the defendants' Robinson-Patman argument is wholly **[**42]** without merit. The Act would unquestionably be inapplicable to a decision by the defendants to sell the distinct Texaco and Shell

---

[16] Indeed, the record is close to establishing that the price-fixing scheme was sufficiently unrelated to accomplishing the legitimate objectives of the joint venture as to justify granting the plaintiffs' motion for summary judgment. However, given the complexity of the economic arrangements at issue, the sparseness of the record, the district court's failure to apply the appropriate test, and our general presumption against granting summary judgment in such cases, we conclude that the denial of both sides' motion for summary judgment is appropriate here.

[17] The Act provides that ***HN19***[] "it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality[.]" *15 U.S.C. § 13(a)*.

[18] The Act explicitly excludes price differentials "which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered[.]" *15 U.S.C. § 13(a)*.

brands of gasoline at different prices. Any such decision would necessarily be predicated on the differences between the two brands, not upon the identity of the buyers. The record shows that the alliance never intended to market or sell the two brands as the same product. Rather, it went to great lengths to differentiate carefully between the brands. Mostly, this took place at the additive stage -- where generic "fungible" gasoline is transformed into a specific brand. But it also took place at the marketing stage, where the Texaco and Shell brands of gasoline were always targeted at different groups of consumers. The defendants cite no precedent or provision of statutory law that would support applying Robinson-Patman to a decision to use different prices for distinct, though similar, products. Finally, this Circuit has rejected "the argument relying on the 'underlying notion of fairness of offering the same services at the same prices to all participants.' ***HN20***[] The 'fairness' of uniform pricing is not a relevant consideration in an antitrust **[*1124]** case; consumers **[**43]** are presumed to prefer lower prices to the satisfaction of knowing they paid the same inflated price as everyone else." *Freeman, 322 F.3d at 1151*.

The first of the defendants' two arguments -- that a joint venture must be able to set whatever price it chooses for its products -- proves too much. If that were true, any number of companies could create joint ventures as fronts for price-fixing. The simple answer is that ***HN21***[] the Supreme Court has declined to immunize joint ventures from *per se* antitrust scrutiny. *See* *NCAA, 468 U.S. at 109*; *BMI, 441 U.S. at 23*; *Citizen Publishing, 394 U.S. at 135*; *Timken, 341 U.S. at 598*. We too have rejected the plaintiffs' proposed rule. *See* *Freeman, 322 F.3d at 1148* (holding that the fact that joint ventures "pursue the common interests of the whole" does not necessarily immunize them from antitrust scrutiny and noting that "cases finding joint ventures to be incapable of conspiracy are the 'exception'"). The leading treatise in the field has also expressed similar disapproval of the defendants' claim. *See* XI HOVENKAMP P 1908, at 229 ("Such a rule **[**44]** could protect cartels from the heightened scrutiny attending naked restraints through the simple device of attaching the cartel agreement to some other, independently lawful transaction.").

Finally, the defendants claim -- as does our dissenting colleague -- that an application of the *per se* rule here would mean that joint ventures could not set prices for their products. We reject this argument. We of course recognize that joint ventures may price their products; that is not the question. The question is whether two former (and potentially future) competitors may create a joint venture in which they unify the pricing, and thereby *fix* the prices, of two of their distinct product brands. We have held that the Sherman Act's *per se* rule applies when the defendant fails to demonstrate a sufficient relationship between the price fixing scheme and furthering the legitimate aims of the joint venture -- a relationship that justifies the otherwise prohibited price restraints. Thus far in this litigation, the defendants have failed to produce sufficient evidence demonstrating that their price fixing scheme was ancillary rather than naked and, thus, that they are entitled to summary **[**45]** judgment.

The result we reach here allows joint ventures to set prices for their products within the limits of the Sherman Act. Our analysis would be different if we confronted a joint venture in which former competitors agreed jointly to research, produce, market, and sell a new product, or a joint venture in which competitors agreed to merge their current product lines into one collective brand. Nor would we necessarily reach the same result if the defendants had independently decided to charge the same price for Texaco and Shell gasoline after conducting separate price analyses for each brand, or had they come forward with persuasive evidence that the setting of a single, fixed price was important to accomplishing the legitimate aims of the joint ventures.

We do not share the defendants' concern that validating the application of the *per se* rule to the pricing decisions of joint ventures will risk invalidating countless economically efficient business integrations. The plaintiffs have come forward with sufficient evidence to create a triable issue of fact as to whether the defendants engaged in a naked restraint on trade, prohibited *per se* by the Sherman Act. Whether the **[**46]** defendants will be found liable at trial remains to be seen. But if they are, and if that individual application of the *per se* rule is economically inefficient, that concern **[*1125]** must be addressed to Congress, not the judiciary. *See* *Maricopa County, 457 U.S. at 354-55*; *Professional Engineers, 435 U.S. at 692*. [19]

---

[19] Congress's response to *Citizen Publishing* further convinces us that we should not carve out an exception to the Sherman Act simply because the type of venture at issue here may be economically efficient. Shortly after the decision, Congress passed the Newspaper Preservation Act, *15 U.S.C. §§ 1801-1804*, which specifically exempted from the Sherman Act newspaper operating

[47]** We therefore hold that the district court erred in finding no triable issue of fact with respect to the plaintiffs' *per se* claim. The plaintiffs have presented sufficient evidence to create a triable issue of fact as to whether the alliance's unified pricing scheme was a *per se* violation of *§ 1 of the Sherman Act*.

CONCLUSION

For the reasons stated above, we AFFIRM the district court's award of summary judgment to defendant Saudi Refining, Inc., REVERSE the district court's award of summary judgment against the Plaintiffs-Appellants, and REMAND for further proceedings consistent with this opinion.

Concur by: FERNANDEZ (In Part)

Dissent by: FERNANDEZ (In Part)

Dissent

FERNANDEZ, Circuit Judge, Concurring and Dissenting:

I agree that the plaintiffs lacked standing as to SRI and, therefore, concur in the result of part III of the majority opinion. However, I dissent from part IV.

While this case does involve a very complicated set of transactions, it presents a rather straightforward ***antitrust law*** question. That is, where former competitors create a bona fide joint venture to which all of their assets and operations in segments of their businesses are contributed, will there be **[**48]** a *per se* violation of the antitrust laws, if the joint venture entity sets the prices of the goods it sells? I think the answer is no.

Here, Shell and Texaco formed Equilon Enterprises, LLC in the western United States, and Motiva Enterprises, LLC in the eastern United States. [1] **[**49]** There can be no doubt that each of the new entities is a true, bona fide, economically integrated joint venture. Refineries, lubricant plants, research laboratories, thousands of service stations, thousands of miles of pipeline, thousands of employees, and over 100 terminals were contributed to the ventures. Upon those transfers, Shell and Texaco ceased refining and marketing operations in both the western and the eastern United States. They were no longer in those businesses within the United States; the joint ventures were. [2] In other words, **[*1126]** Equilon now manufactured, inventoried, transported, and marketed the products. It ran the refinery; it had the research facilities; it transported products; and it dealt with the station operators and other buyers. It also priced the products, and set the same price for *its* Shell and Texaco brands.

---

arrangements like the one in *Citizen Publishing*. *See* *Hawaii Newspaper Agency v. Bronster, 103 F.3d 742, 744-45 (9th. Cir. 1996)*. After surveying the relevant "economic conditions," Congress determined that the specific type of joint venture at issue was beneficial and even necessary in a "large majority of American communities." H.R. Rep. No. 91-1193, 91st Cong., 2d Sess. (1970), *reprinted in* 1970 U.S.C.C.A.N. 3547, 3548. Those economic conditions, in Congress's view, justified more lenient antitrust review of newspaper industry joint ventures than the Court had applied in *Citizen Publishing*. Congress has made no such findings, nor has it passed any similar law, relevant to the oil and gasoline industry, which certainly is not without its supporters in the Legislative and Executive Branch. If Congress wishes to exempt oil and gasoline enterprises from the Sherman Act's *per se* prohibition of price fixing, it may certainly do so, but it is beyond our authority to read new exceptions into the Act.

[1] Henceforth, I shall only refer to Equilon because it is the entity that directly affects plaintiffs in this case -- Independent Operators.

[2] We have previously had occasion to describe the nature of Equilon. *See* *Abrahim & Sons Enters. v. Equilon Enters., LLC, 292 F.3d 958, 960 (9th Cir. 2002)*. As we stated, an LLC is an entity truly distinct from its members and its acts "are deemed independent of the acts of its members." *Id. at 962*. It is a separate juridical person. *Id.* LLCs are much like corporations, and, though controlled by their members, "LLCs remain separate and distinct from their members." *Id.*

While Independent Operators do not assert that the placing of the whole manufacturing, transport and marketing functions in a single entity violated 15 U.S.C. § 1, they do assert that having the pricing function in Equilon did violate the antitrust laws *per se*. The majority thinks that might be true; I do not.

It is plain enough that the mere creation of a joint venture is not a *per se* antitrust violation. No doubt, like mergers, joint ventures are combinations of business assets but "such combinations are judged under a rule of reason" analysis. Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 2740, 81 L. Ed. 2d 628 (1984). **[**50]** Especially should that be true of the LLC type of venture, which is not only a separate entity, but which also functions as a separate economic unit for all practical purposes. *See Northrop Corp.*

v. McDonnell Douglas Corp., 705 F.2d 1030, 1053 (9th Cir. 1983). In fact, to slightly paraphrase the Supreme Court statement in Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 356, 102 S. Ct. 2466, 2479, 73 L. Ed. 2d 48 (1982):

> [Equilon is] . . . analogous to partnerships or other joint arrangements in which persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit. In such joint ventures, the partnership is regarded as a single firm competing with other sellers in the market.

Nor does the mere fact that Equilon sets prices for the products it manufactures and sells suffice to demonstrate that its actions were price fixing for antitrust purposes. *See* Broad. Music, Inc., v. Columbia Broad. Sys., Inc., 441 U.S. 1, 8-9, 99 S. Ct. 1551, 1556-57, 60 L. Ed. 2d 1 (1979). Rather, "literalness is overly simplistic and often overbroad. When two partners set the **[**51]** price of their goods or services they are literally 'price fixing,' but they are not *per se* in violation of the Sherman Act." Id. at 9, 99 S. Ct. at 1557. So just what could make the operation of Equilon a *per se* violation of the antitrust laws? Surely it is not a claim that the venture is a sham. *See* Addamax Corp. v. Open Software Found., Inc., 152 F.3d 48, 52 (1st Cir. 1998). No one seriously asserts *that*.

Nor can it be that this is a case like Citizen Publ'g Co. v. United States, 394 U.S. 131, 89 S. Ct. 927, 22 L. Ed. 2d 148 (1969). There, two newspapers formed a third corporation for the principal purpose of eliminating competition, but each remained in the same business in the same area, and retained the production of the true product -- news and editorials -- in its own hands. Id. at 133, 89 S. Ct. at 928. Moreover, the newspapers themselves -- not the new entity -- jointly set the subscription and advertising rates. Id. at 134, 89 S. Ct. at 928. None of that is true here. Equilon owned all of the assets, all of the obligations, and, in a word, the whole business. It set the prices. **[**52]** It was a separate entity; a fact that the Independent Operators seem unable or unwilling to grasp.

[*1127] But, Independent Operators argue, in this case the fixing of prices by the venture is neither essential nor "reasonably ancillary to the legitimate cooperative aspects of the venture." Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1151 (9th Cir. 2003). The majority agrees; I cannot understand why. The situation here is far from the kind of situation we faced in *Freeman*. There, the reason for the venture was the unifying of disparate multiple listing databases. Id. at 1140-41. That done, there was a new database entity, and the corporations that formed it for that purpose went on operating their own businesses. But they all also agreed to fix a price for support services. That was essentially unrelated to the database itself, and was unnecessary, and unjustified. Id. at 1151. It was the latter "price fix" that ran afoul of antitrust principles. Here we have nothing of the kind.

In this case, nothing more radical is afoot than the fact that an entity, which now owns all of the production, transportation, research, storage, **[**53]** sales and distribution facilities for engaging in the gasoline business, also prices its own products. It decided to price them the same, as any other entity could. What could be more integral to the running of a business than setting a price for its goods and services? I am at a loss for an answer to that question, and nothing written about this case to date imparts additional wisdom or better information.

Yet Independent Operators insist that the setting of the prices is a violation. That is, separate juridical business entity though it is, Equilon can really only be the semblable of a true business, for if it, like any other economic actor, desires to price its own goods, its members may well be subject not merely to commination, but to outright denunciation by the courts as *per se* violators of the antitrust laws. It means that this entity must ask a separate juridical entity -- for example, Shell, which does not itself own any of the facilities or products -- to decide what price should be charged by Equilon. [3] Again, the majority thinks that might be so; I do not.

[54]** We now have an exotic beast, no less strange than a manticore, roaming the business world. This beast would otherwise be a true business, but when it acts like a true business -- sets prices for its own goods -- it subjects its otherwise insulated members to the severe sting of antitrust liability. While it has the head of a business man and the body of an entrepreneurial lion, it has the tail of a liability scorpion. I suppose I am as taken with stories of exotic beasts as the next person, but I prefer to leave them in the realm of the unknown; I would rather not confront them in the marketplace.

In short, I do not believe that the Independent Operators have pointed to a *per se* antitrust violation, [4] and they do not even attempt to assert a full rule of reason claim.

[55]** Thus, I respectfully dissent as to part IV of the majority opinion.

[3] Shell, by the way, is a mere member of Equilon and is shielded from liability for the debts or obligations of Equilon, just as corporate share-holders are shielded. *See* *Cal. Corp. Code § 17101*.

[4] Similarly, no "quick look" violation is shown. *See* *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 1612, 143 L. Ed. 2d 935 (1999)*; *Bogan v. Hodgkins, 166 F.3d 509, 514 n.6 (2d Cir. 1999)*.

HN3[] **In Personam Actions, Minimum Contacts**

A Minnesota court may assume jurisdiction over nonresident defendants only to the extent permitted by Minnesota's long-arm statute and by the Due Process Clause of the Fourteenth Amendment. Because Minnesota's long-arm statute is coextensive with the constitutional limits of due process, the inquiry necessarily focuses on the personal-jurisdiction requirements of the federal constitution. To satisfy the Due Process Clause, a plaintiff must show that a defendant has "minimum contacts" with a forum state such that maintaining jurisdiction there does not offend "traditional notions of fair play and substantial justice." There must be some act by which the defendant purposefully avails itself of the privilege of conducting activities within the forum state, thus invoking the benefits and protections of its laws. The defendant must reasonably anticipate the possibility of being haled into the state's courts.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN4[] **Jurisdiction, Subject Matter Jurisdiction**

Minnesota courts use a five-factor test to determine whether the exercise of personal jurisdiction is proper: (1) The quantity of the contacts with the forum state, (2) The nature and quality of the contacts, (3) The source and connection of the cause of action with these contacts, (4) The interest of the state in providing a forum, (5) The convenience of the parties. There is a distinction between specific and general personal jurisdiction. Specific jurisdiction exists when the cause of action arises out of or is related to the defendant's contacts with the forum. Specific jurisdiction can exist as the result of a single contact with the forum if the cause of action arose out of that contact. General jurisdiction exists when a defendant has "continuous and systematic" contacts with the forum state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN5[] **In Personam Actions, Minimum Contacts**

In judging minimum contacts for purposes of assessing whether the exercise of specific jurisdiction is appropriate, a court focuses on the relationship among the defendant, the forum, and the litigation. Specific jurisdiction may be found when the nonresident defendant has purposefully directed its activities at residents of the forum and the litigation results from alleged injuries that "arise out of or relate to" those activities.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN6[] **In Personam Actions, Minimum Contacts**

But for specific jurisdiction to exist, a plaintiff must show a more direct connection between his alleged injury and the defendant's contacts with the forum state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN8[] **In Personam Actions, Minimum Contacts**

The Court of Appeals of Minnesota emphasizes that the personal jurisdiction analysis must precede, and proceed independently of, the question whether a substantive statute has been violated.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN9[] **In Rem & Personal Jurisdiction, In Personam Actions**

The Minnesota Supreme Court has held that a nonresident supplier does not have contacts with Minnesota that would support the exercise of personal jurisdiction by selling raw material to a nonresident manufacturer when (1) the manufacturer incorporated the raw material into a different product that the manufacturer then sold in Minnesota in accordance with its own business plans and (2) there was no showing that the supplier delivered its product into the stream of commerce with the expectation that it would be purchased by customers in Minnesota.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN10[] **In Rem & Personal Jurisdiction, In Personam Actions**

The United States Supreme Court has explained that the placement of a product into the stream of commerce, without more, is not an act of the defendant purposefully directed toward the forum state. The U.S. Supreme Court has held that a showing is needed of "additional conduct" by a defendant evidencing an "intent or purpose" to serve the market in the forum state.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN11[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

General jurisdiction exists when a nonresident defendant's contacts with the forum are so substantial and are of such a nature that the state may assert jurisdiction over the defendant even for causes of action unrelated to the defendant's contacts with the forum state. Conduct of single or isolated items of activities in a state in a corporation's behalf are not enough to subject it to general jurisdiction. Only when a defendant's continuous corporate operations within a state are thought so substantial and of such a nature as to justify suit against it on causes of action arising from dealings entirely distinct from those activities may a court assert general jurisdiction over a defendant. The United States Supreme Court has held that a defendant corporation's contacts with the forum state, which included the temporary physical presence of a corporate officer for contract negotiations, regular purchases of equipment and training services from a business in the forum, and personnel training in the forum, were not sufficiently continuous and systematic so that the attempted exercise of general jurisdiction would satisfy the requirements of due process.

Syllabus

An out-of-state corporation's simple commercial contacts, unrelated to the plaintiff's claims, do not, standing alone, constitute continuous and systematic business contacts in Minnesota that form a basis for personal jurisdiction.

Counsel: Garrett D. Blanchfield, Jr., Mark Reinhardt, Reinhardt Wendorf & Blanchfield, St. Paul, MN, (for respondent).

William L. Greene, David R. Crosby, Leonard Street and Deinard, PA, Minneapolis, MN; and James D. Slear, Gibson, Dunn & Crutcher, LLP, Washington, D.C., (for appellants).

Judges: Considered and decided by Wright, Presiding Judge; Schumacher, Judge; and Willis, Judge.

Opinion by: WILLIS

Opinion

[*576]

WILLIS, Judge

On appeal from a district court order denying appellants' motion to dismiss for lack of personal jurisdiction, appellants argue that the district court erroneously concluded that it could exercise personal jurisdiction over appellants. Because we conclude that respondent has not shown sufficient contacts for the exercise of either specific or general jurisdiction, we reverse.

FACTS

Respondent Diane Lorix's amended class-action complaint alleges that appellants **[**2]** Flexsys NV and Flexsys America LP (collectively "Flexsys") conspired with the other named defendants to fix the prices of certain rubber-processing products, in violation of *Minn. Stat. §§ 325D.49-.66D* (2002), the Minnesota ***Antitrust Law***. The complaint alleges that Flexsys, along with the other defendants, produce most of the rubber-processing chemicals sold in the United States and, in turn, sell most of those chemicals to automobile-tire manufacturers. Lorix brought suit in Minnesota district court on behalf of a putative class consisting of "all persons who purchased tires in the State of Minnesota other than for resale from January 1, 1994 to the present which were manufactured using rubber-processing chemicals sold by Defendants." In her amended class-action complaint, Lorix maintains that (1) the alleged price-fixing conspiracy had the "effect of fixing, raising, stabilizing, and maintaining the price for rubber-processing chemicals sold to tire manufacturers," (2) **[*577]** the tire manufacturers passed the supracompetitive price on to consumers, and (3) thus, Minnesota consumers paid more for tires manufactured with Flexsys's rubber-processing chemicals than **[**3]** they would have paid absent the conspiracy. The complaint seeks recovery of the overcharges paid by Minnesota consumers as a result of the alleged conspiracy; similar actions have been filed against the same defendants in 18 other jurisdictions. [1]

Flexsys NV is headquartered in Belgium and Flexsys America LP, which is the United States subsidiary of Flexsys NV, is a Delaware limited partnership with its headquarters located in Akron, Ohio. Neither is licensed to do business in Minnesota or has any employees, sales agents, or business operations in Minnesota. Flexsys moved to dismiss **[**4]** Lorix's claim on the ground that the Minnesota district court lacks personal jurisdiction over Flexsys. The district court denied the motion, and this appeal follows.

ISSUE

Did the district court err by denying appellants' motion to dismiss for lack of personal jurisdiction?

ANALYSIS

HN1[] An order denying a motion to dismiss for lack of personal jurisdiction is appealable as a matter of right. *Stanek v. A.P.I., Inc., 474 N.W.2d 829, 831 (Minn. App. 1991)*, *review denied* (Minn. Oct. 31, 1991).

HN2[] Determining whether personal jurisdiction exists is a question of law, and this court need not defer to the district court's decision. *Id. at 832*. "When jurisdiction is challenged, the plaintiff bears the burden of proving that sufficient contacts exist with the forum state to support personal jurisdiction." *V.H. v. Estate of Birnbaum, 543 N.W.2d 649, 653 (Minn. 1996)*.

HN3[] A Minnesota court may assume jurisdiction over nonresident defendants only to the extent permitted by Minnesota's long-arm statute and by the *Due Process Clause of the Fourteenth Amendment*. *Marshall v. Inn on Madeline Island, 610 N.W.2d 670, 673 (Minn. App. 2000).* **[**5]** Because Minnesota's long-arm statute is coextensive with the constitutional limits of due process, the inquiry necessarily focuses on the personal-jurisdiction requirements of the federal constitution. *Valspar Corp. v. Lukken Color Corp., 495 N.W.2d 408, 410-11 (Minn. 1992)*. To satisfy the *Due Process Clause*, a plaintiff must show that a defendant has "minimum contacts" with a forum state such that maintaining jurisdiction there does not offend "traditional notions of fair play and substantial justice." *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 158, 90 L. Ed. 95 (1945)*. There must be

[1] Under the Supreme Court decision in *Illinois Brick Co. v. Illinois*, indirect purchasers have no recourse under federal law. *431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Lorix's counsel stated at oral argument that the 18 other jurisdictions in which actions similar to this have been brought are states that permit indirect purchasers to recover for injuries as a result of violations of state ***antitrust law***.

"some act by which the defendant purposefully avails itself of the privilege of conducting activities within the forum state, thus invoking the benefits and protections of its laws." *Hanson v. Denckla, 357 U.S. 235, 253, 78 S. Ct. 1228, 1240, 2 L. Ed. 2d 1283 (1958)*. The defendant must reasonably anticipate the possibility of being haled into the state's courts. *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 297, 100 S. Ct. 559, 567, 62 L. Ed. 2d 490 (1980)*.

HN4[] **[*578]** Minnesota courts use a five-factor test to determine **[**6]** whether the exercise of personal jurisdiction is proper:

(1) The quantity of the contacts with the forum state,

(2) The nature and quality of the contacts,

(3) The source and connection of the cause of action with these contacts,

(4) The interest of the state in providing a forum,

(5) The convenience of the parties.

Vikse v. Flaby, 316 N.W.2d 276, 282 (Minn. 1982). There is a distinction between specific and general personal jurisdiction. *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 414, 80 L. Ed. 2d 404, 104 S. Ct. 1868* nn.8-9, *466 U.S. 408, 80 L. Ed. 2d 404, 104 S. Ct. 1868, 1872* nn.8-9, *466 U.S. 408, 80 L. Ed. 2d 404, 104 S. Ct. 1868 (1984)*; *Valspar, 495 N.W.2d at 411*. Specific jurisdiction exists when the cause of action arises out of or is related to the defendant's contacts with the forum. *Helicopteros Nacionales, 466 U.S. at 414 n.8, 104 S. Ct. at 1872 n.8*. Specific jurisdiction can exist as the result of a single contact with the forum if the cause of action arose out of that contact. *See* *McGee v. Int'l Life Ins. Co., 355 U.S. 220, 223, 78 S. Ct. 199, 201, 2 L. Ed. 2d 223 (1957)*. General jurisdiction exists when a defendant has "continuous and **[**7]** systematic" contacts with the forum state. *Helicopteros Nacionales, 466 U.S. at 415-16, 104 S. Ct. at 1872-73*.

The district court denied Flexsys's motion to dismiss, finding that it could exercise personal jurisdiction over Flexsys; the district court, however, did not articulate whether it found that it had specific or general jurisdiction over Flexsys. Flexsys argues that its contacts with Minnesota were not related to the cause of action so as to establish specific jurisdiction and are not of a sufficient quantity or quality to establish general jurisdiction.

1. Specific Jurisdiction

Flexsys argues that it is not subject to specific jurisdiction because (1) its in-state sales are unrelated to Lorix's claim and (2) its out-of-state sales to tire manufacturers are not a purposeful contact directed at Minnesota. ***HN5***[] In judging minimum contacts for purposes of assessing whether the exercise of specific jurisdiction is appropriate, a court focuses on the "relationship among the defendant, the forum, and the litigation." *Id. at 414, 104 S. Ct. 1872*. Specific jurisdiction may be found when the nonresident defendant has "purposefully directed [its] **[**8]** activities at residents of the forum and the litigation results from alleged injuries that 'arise out of or relate to' those activities." *Burger King Corp. v. Rudzewicz, 471 U.S. 462, 472, 105 S. Ct. 2174, 2182, 85 L. Ed. 2d 528 (1985)* (citation omitted).

Flexsys argues first that because its only sales of rubber-processing chemicals in Minnesota were to 3M and HCI Worum, which used them to make products other than tires, there is no connection between Flexsys's sales in Minnesota and Lorix's alleged injury. Thus, Flexsys argues, its sales to 3M and HCI Worum did not provide "fair warning" of being sued in Minnesota for injuries resulting from the sales of tires because Lorix's claim does not "involve" and is not "connected with" or "directly related to" appellants' sales to 3M and Worum.

Lorix contends, however, that there must only be a "reasonably close connection" between the cause of action and the defendant's contacts with the forum state to support a finding of specific jurisdiction. Lorix argues that the sale of rubber-processing chemicals to Minnesota corporations to manufacture products other than tires is sufficiently related to a suit alleging that **[**9]** downstream indirect purchasers paid a supracompetitive price for tires that **[*579]** contained those same rubber-processing chemicals. ***HN6***[] But for specific jurisdiction to exist, a plaintiff must show a more direct connection between his alleged injury and the defendant's contacts with the forum state. *See* *Marshall, 610 N.W.2d at 676* (holding "entering into a contract with a Minnesota resident can justify the exercise of specific jurisdiction but only where the dispute involves the contract"); *Behm v. John Nuveen & Co., 555 N.W.2d 301, 307 (Minn. App. 1996)* (holding that specific jurisdiction requires plaintiff to show that defendant's forum contacts be "related directly" to the subject of the lawsuit). Because Flexsys's Minnesota sales were to companies that used the chemicals to make products other than tires, we conclude that Lorix's claim that Minnesota consumers were overcharged for tires did not arise out of or relate to Flexsys's Minnesota sales and, thus, do not constitute a basis for the exercise of specific jurisdiction.

Flexsys further argues that its out-of-state sales of rubber chemicals to tire manufacturers do not constitute a contact with Minnesota **[**10]** that would provide a basis for specific jurisdiction. Lorix counters that Flexsys could "clearly anticipate being haled into court in Minnesota" based on these sales because it would have had "full knowledge that the effects of [its] actions would likely be passed on through the chain of commerce to Minnesota consumers" and estimates that since 1994, Flexsys has indirectly derived more than $ 12.4 million in revenue from Minnesota based on its sales to tire manufacturers that sold to Minnesota tire purchasers. [2] **[**11]** Lorix asserts that the *Minnesota **Antitrust Law*** provides an avenue of redress for indirect purchasers and maintains that because the United States Supreme Court recognized in *Calif. v. ARC Am. Corp.* that the term "indirect purchaser" includes persons injured by the fixing of prices for a component part of a finished product, it is irrelevant that Flexsys's products were incorporated into tires before being sold to Minnesota consumers. [3] *490 U.S. 93, 97, 109 S. Ct. 1661, 1663, 104 L. Ed. 2d 86 (1989)*.

Lorix argues that it is "irrelevant" whether Flexsys's products were incorporated into tires before being sold to Minnesota consumers because it "is precisely this type of remote transgressor that the *Minnesota **Antitrust Law*** was intended to reach," and that, thus, it is appropriate for Minnesota courts to exercise specific jurisdiction over Flexsys. We disagree. While the *Minnesota **Antitrust Law*** may confer subject-matter jurisdiction, the issue here is personal jurisdiction. And it would put the cart before the horse to conclude that the entire constitutionally-mandated minimum contacts analysis may simply be jettisoned whenever a legislature enacts a statute which is intended to have extraterritorial application. On the **[**12]** contrary, ***HN8***[] we emphasize that the personal jurisdiction analysis must precede, and proceed independently of, the question whether a substantive [] statute has been violated.

See *Holder v. Haarmann & Reimer Corp., 779 A.2d 264, 276 n.13 (D.C. Cir. 2001)*.

HN9[] **[*580]** The Minnesota supreme court has held that a nonresident supplier does not have contacts with Minnesota that would support the exercise of personal jurisdiction by selling raw material to a nonresident manufacturer when (1) the manufacturer incorporated the raw material into a different product that the manufacturer then sold in Minnesota in accordance with its own business plans and (2) there was no showing that the supplier delivered its product into the stream of commerce with the expectation that it would be purchased by customers in Minnesota. *In re Minn. Asbestos Litigation, 552 N.W.2d 242, 246-47 (Minn. 1996)*. The supreme court stated that because there was no showing that the manufacturer's contacts with the forum were "on behalf of [the supplier] or with [the supplier's] approval," the manufacturer's actions in selling its finished product in Minnesota did not constitute a contact **[**13]** by the supplier that would permit Minnesota courts to exercise personal jurisdiction over the supplier. *Id. at 247*.

---

[2] Lorix states that this estimated figure was arrived at "by comparing the value of the proportionate share of tire shipments in Minnesota with [Flexsys's] total [market] share of rubber-processing chemicals in the United States."

[3] *Minn. Stat. § 325D.57* provides that ***HN7***[] "any person, any governmental body, or the state of Minnesota or any of its subdivisions or agencies, injured directly or indirectly by a violation of *sections 325D.49 to 325D.66*, shall recover three times the actual damages sustained, together with costs and disbursements, including reasonable attorneys' fees."

Lorix argues that *Minn. Asbestos* is distinguishable, however, because the plaintiff there sought to exercise personal jurisdiction over a defendant company that had no direct contacts with Minnesota and asserts that, here, Flexsys had direct contacts with Minnesota through its sales to two Minnesota businesses and its website. [4] But the holding in *Minn. Asbestos* does not rest on the fact that the supplier did not have direct contacts with the forum; rather *Minn. Asbestos* held that the contacts that a manufacturer may have with the forum may not be imputed to a supplier when there is no showing that (1) the supplier intended to directly or indirectly market its product in the forum or that the supplier delivered its product into the stream of commerce with the expectation that it would be purchased by customers in the forum or (2) the manufacturer's actions were done "on behalf of [the supplier] or with [the supplier's] approval." *See id*. Because Flexsys sells its product to tire manufacturers located outside of Minnesota, which **[**14]** produce their own products and then sell in accordance with their own business plans, we conclude that any contacts that the tire manufacturers have with Minnesota may not be imputed to Flexsys.

This conclusion is supported by *Asahi Metal Indus. Co. v. Superior Court*, in which a plurality of ***HN10***[] the United States Supreme Court explained **[**15]** that the "placement of a product into the stream of commerce, without more, is not an act of the defendant purposefully directed toward the forum state." *480 U.S. 102, 112, 107 S. Ct. 1026, 1032, 94 L. Ed. 2d 92 (1987)*. *Asahi* holds that a showing is needed of "additional conduct" by a defendant evidencing an "intent or purpose" to serve the market in the forum state. *Id.* And, here, Lorix has not shown that Flexsys's out-of-state sales to tire manufacturers include any "additional conduct" by Flexsys, such as designing a product for the Minnesota market, advertising in Minnesota, or marketing the product through a distributor who had agreed to serve as a sales agent in Minnesota. *Id.* Thus, we conclude that Flexsys's out-of-state sales of rubber-processing chemicals to tire manufacturers **[*581]** are not a basis for the exercise of specific jurisdiction over Flexsys by a Minnesota court.

2. General Jurisdiction

Flexsys argues next that its contacts with Minnesota do not support the exercise of general jurisdiction over Flexsys by Minnesota courts. ***HN11***[] General jurisdiction exists when a nonresident defendant's contacts with the forum are so substantial and are of such **[**16]** a nature that the state may assert jurisdiction over the defendant even for causes of action unrelated to the defendant's contacts with the forum state. *See Valspar, 495 N.W.2d at 411*. "Conduct of single or isolated items of activities in a state in [a] corporation's behalf are not enough to subject it to [general jurisdiction]." *Int'l Shoe, 326 U.S. at 317, 66 S. Ct. at 159*. Only when a defendant's "continuous corporate operations within a state [are] thought so substantial and of such a nature as to justify suit against it on causes of action arising from dealings entirely distinct from those activities" may a court assert general jurisdiction over a defendant. *Id. at 318, 66 S. Ct. at 159*. For example, in *Helicopteros Nacionales*, the Supreme Court held that a defendant corporation's contacts with the forum state, which included the temporary physical presence of a corporate officer for contract negotiations, regular purchases of equipment and training services from a business in the forum, and personnel training in the forum, were not sufficiently continuous and systematic so that the attempted exercise of general jurisdiction **[**17]** would satisfy the requirements of due process. *466 U.S. at 418-19, 104 S. Ct. at 1874*; *cf. Perkins v. Benguet Consol. Mining Co., 342 U.S. 437, 445, 447-48, 72 S. Ct. 413, 418, 419, 96 L. Ed. 485, 63 Ohio Law Abs. 146 (1952)* (holding that the exercise of general jurisdiction over a foreign corporation was "reasonable and just" when the corporation's president maintained an office in the forum where he conducted activities on behalf of the company, such as keeping company files, holding directors' meetings, carrying on business correspondence, and distributing salary checks drawn on forum bank accounts).

---

[4] Although the record includes no information regarding the Flexsys website, Lorix alleges that Flexsys's website promotes its products in Minnesota, asserting that the website states "Flexsys is committed to developing web applications that benefit our customers and improve business efficiency. We offer our customers fast, secure, around-the-clock on-line ordering and access to the information you want - when you want it." Flexsys asserts, however, that its website is "aimed at no particular place in the world" and does not actually sell products to Internet users but instead gives existing customers who have user-identification numbers and passwords the ability to order online.

While the record shows that Flexsys sold its products directly to two Minnesota companies, Flexsys maintains that these sales, which amounted to $ 633,424 from January 2000 to December 2002 and represented 0.01% of Flexsys's gross annual sales, were "simple commercial contacts" and were not continuous and substantial contacts justifying the exercise of general jurisdiction. In *Burlington Indus., Inc. v. Maples Indus., Inc.*, the eighth circuit court of appeals held that a foreign corporation's sales to forum retailers, which were unrelated to the plaintiff's claims, constituted **[**18]** "simple commercial contacts" that were insufficient to form the basis of general jurisdiction in the forum, even though officers of the foreign corporation went to the forum to obtain business and the foreign corporation used machines built in the forum to manufacture its products. *97 F.3d 1100, 1103 (8th Cir. 1996)*. Thus, Flexsys maintains that "simple commercial contacts" unrelated to a plaintiff's claim are not transformed into an adequate constitutional basis for jurisdiction, even when the sales are of a much greater dollar volume than Flexsys's sales in Minnesota. *See* *Nichols v. G.D. Searle & Co., 991 F.2d 1195, 1198 (4th Cir. 1993)* (finding insufficient to support the exercise of general jurisdiction defendant's annual sales of $ 9-13 million in the forum state over a five-year period, which constituted 2% of defendant's total sales, employment of sales people in the forum state, and purchases in the forum state); *Metro. Life Ins. Co. v. Robertson-Ceco Corp., 84 F.3d 560, 573* ***[*582]*** *(2nd Cir. 1996)* (holding that "standing alone," defendant's $ 4 million in sales in the forum state over a seven-year period "may not have been sufficient" **[**19]** to support the exercise of general jurisdiction but that the numerous other contacts with the forum in the case, including advertising, relationships with dealers, and more than 150 visits "tipped the balance" and led the court to conclude that there were sufficient contacts to allow the exercise of general jurisdiction).

Lorix counters that Flexsys misstates the relevant test by arguing that the exercise of general jurisdiction is inappropriate because its in-state sales constituted only approximately 0.01% of its total sales and asserts that, instead, a general-jurisdiction analysis must focus on whether the defendant's contacts with the forum are substantial. *See* *Lakin v. Prudential Secs., 348 F.3d 704, 709 (8th Cir. 2003)* (stating that the "percentage of a company's sales in a given state [is] generally irrelevant . . . our relevant inquiry is not whether the percentage of a company's contacts is substantial for that company; rather, our inquiry focuses on whether the company's contacts are substantial for the forum"). We agree that the percentage of a company's sales in a particular state is generally irrelevant, but we conclude that, standing alone, **[**20]** Flexsys's contacts with 3M and HCI Worum are not substantial enough to justify the exercise of general jurisdiction. Thus, we must determine whether Flexsys has other contacts with Minnesota that would "tip the balance" and lead us to conclude that the exercise of general jurisdiction is appropriate.

Lorix asserts that Flexsys's out-of-state sales to tire manufacturers are substantial and continuous contacts with Minnesota because Flexsys elected to serve the Minnesota market indirectly by selling its products to tire manufacturers that it "knew would then sell those tires to Minnesota residents." But we do not find Lorix's argument persuasive because the evidence does not show (1) that Flexsys targeted Minnesota consumers for these sales, (2) apart from Lorix's own estimate, how much, if any, revenue Flexsys indirectly derived from Minnesota consumers as the result of its sales of rubber-processing chemicals to out-of-state tire manufacturers, or (3) that Flexsys used the tire manufacturers as its agents or distributors in Minnesota.

Lorix then argues that by having an interactive website, Flexsys had substantial and continuous contact with Minnesota, citing *Quality Improvement* **[**21]** *Consultants, Inc. v. Williams* for the proposition that the use of an interactive website has been recognized as a means to purposefully direct activities at Minnesota residents. No. Civ. 02-3994, 2003 WL 543393, *5-*6 (D. Minn. Feb. 24, 2003) (holding that interactive websites that permit users to exchange information with a host computer fall in the middle of the active-passive spectrum of commercial Internet activity and may support a finding of personal jurisdiction). Flexsys notes, however, that *Quality Improvement* further states that if every website that is accessible by the residents of a state formed a basis for jurisdiction, nearly every business in the world would be subject to suit in every state for any lawsuit and that, thus, without any evidence that an interactive website was used to conduct actual commercial transactions with forum residents, the website, standing alone, is not enough to satisfy the minimum-contacts standard. *Id.* at *6.

Courts have rejected efforts to undermine constitutional protections by invoking a defendant's mere presence on the Internet as reason for doing so:

[*583] This theory [of accessibility] simply cannot hold water. **[**22]** Indeed, under this view, personal jurisdiction in Internet-related cases would almost always be found in any forum in the country. We do not believe that the advent of advanced technology, say, as with the Internet, should vitiate long-held and inviolate principles of federal court jurisdiction. The *Due Process Clause* exists, in part, to give a degree of predictability to the legal system that allows potential defendants to structure their primary conduct with some minimum assurance as to where that conduct will and will not render them liable to suit. *In the context of the Internet, [the defendant]'s expansive theory of personal jurisdiction would shred these constitutional assurances out of practical existence. Our sister circuits have not accepted such an approach, and neither shall we.*

Multi-Tech Sys., Inc. v. Vocaltec Communications, Inc., 122 F. Supp. 2d 1046, 1050 (D. Minn. 2000) (brackets and italics in original text; internal quotations omitted) (quoting *GTE New Media Servs., Inc. v. Bellsouth Corp., 339 U.S. App. D.C. 332, 199 F.3d 1343, 1350 (D.C. Cir. 2000))*. Because there is no evidence that any Minnesota resident has accessed the **[**23]** Flexsys website or that the Flexsys website targets Minnesota residents, we conclude that the website is not a contact with Minnesota supporting a finding of general jurisdiction. Thus, because Lorix has not shown that Flexsys's out-of-state sales and its website are contacts that would "tip the balance" in favor of finding that Flexsys has continuous and systematic contacts with Minnesota, we conclude that there is no basis for the exercise of general jurisdiction over Flexsys by Minnesota courts.

DECISION

Because Lorix has not shown sufficient contacts that would warrant the exercise of either specific or general jurisdiction over Flexsys by Minnesota courts, the district court erred by denying Flexsys's motion to dismiss for lack of personal jurisdiction.

Reversed.

Masimo Corp. v. Tyco Health Care Group, L.P.

United States District Court for the Central District of California

June 9, 2004, Decided ; June 10, 2004, Filed

CASE No. CV 02-4770 MRP

Reporter
2004 U.S. Dist. LEXIS 26916 *; 2004 WL 5907538

Masimo Corporation, Plaintiff, v. Tyco Health Care Group, L.P. and Mallinckrodt, Inc., Defendant.

Subsequent History: Summary judgment denied by *Masimo Corp. v. Tyco Health Care Group, L.P., 2004 U.S. Dist. LEXIS 26915 (C.D. Cal., Dec. 15, 2004)*

Prior History: *Masimo Corp. v. Tyco Health Care Grp., L.P., 2004 U.S. Dist. LEXIS 32404 (C.D. Cal., May 28, 2004)*

Disposition: Defendants' objections to declarations overruled; defendants' motions for summary judgment granted in part and denied in part.

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

Summary judgment is appropriate when the submissions show that there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56 (c)*. A defendant moving for summary judgment satisfies the initial burden of production by providing evidence negating any essential element of the nonmovants' claims or by showing that there is an absence of evidence to support the non-moving party's case. Once the moving party carries its burden of production, the nonmoving party must come forward with specific facts to support its claims. If the nonmoving party fails to produce enough evidence to create a genuine issue of material fact, the moving party wins the motion for summary judgment. But if the nonmoving party produces enough evidence to create a genuine issue of material fact, the nonmoving party defeats the motion.

HN2[] **Attempts to Monopolize, Elements**

Section 2 of the Sherman Antitrust Act prohibits monopolies, attempts to form monopolies, and combinations and conspiracies to do so. *15 U.S.C.S. § 2*. To establish a violation of *§ 2*, a plaintiff must show that (1) the defendant possessed monopoly power in the relevant market and (2) the defendant willfully acquired or maintained that power through "anticompetitive conduct" as opposed to gaining that power as a consequence of a superior product, business acumen, or historical accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN3[] **Monopolies & Monopolization, Actual Monopolization**

The possession of monopoly power in and of itself does not amount to a *§ 2* of the Sherman Antitrust Act, *15 U.S.C.S. § 2*, violation; the monopoly power must be maintained unlawfully.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Evidence > Admissibility > Circumstantial & Direct Evidence

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power is defined as the power to control prices or exclude competition. Market power can be proved by either direct evidence of the "injurious exercise of market power" or through circumstantial evidence. When proving monopoly power by circumstantial evidence, the plaintiff must establish more than just market share; the plaintiff must: (1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry and that existing competitors lack the capacity to increase their output in the short run.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Sherman Act, Defenses**

A market share exceeding 65 percent will support a rebuttable presumption of monopoly power for purposes of *§ 2* of the Sherman Antitrust Act, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Sherman Act, Claims**

The second element of a § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, monopoly claim, referred to as the "conduct" element, addresses the question of whether a defendant used its monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor. To prove a § 2 violation, the plaintiff must show that the defendant willfully acquired or maintained monopoly power. In addition, anticompetitive conduct does not invoke the Sherman Act until it harms consumer welfare.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

The United States District Court for the Central District of California has previously considered § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, violations and has found it improper to focus on specific individual acts of an accused monopolist while refusing to consider their overall combined effect.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

The specific intent of an accused monopolist need not be proved by direct admissions of wrongdoing. Rather, the actions of the defendant, taken as a whole, can and should be considered. But this does not allow for clearly legal acts to be thrown into the mix to bolster a plaintiff's § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, antitrust case.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

In assessing the antitrust liability of a defendant the court may look to the overall effects of a defendant's conduct in the relevant market. A district court acts properly in aggregating a defendant's contracts in the relevant market in order to assess the Sherman Act violations resulting from those contracts.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

The United States Court of Appeals for the Ninth Circuit distinguishes between volume discount contracts and exclusive dealing contracts in violation of *§ 2* of the Sherman Antitrust Act, *15 U.S.C.S. § 2*, and holds that volume discount contracts, which do not foreclose consumers from entering into contracts with other delivery service providers, are legal under ***antitrust law***.

HN15[] Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing

Section 3 of the Clayton Act prohibits companies from making contracts on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods of a competitor or competitors for the lessor or seller where the effect may be to substantially lessen competition or tend to create a monopoly in any line of commerce. 15 U.S.C.S. § 14.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN16[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Section 3 of the Clayton Act, 15 U.S.C.S. § 14, seeks to prevent the anticompetitive effects of exclusive dealing arrangements. To fall within the purview of § 14, the contract must be "truly an exclusive dealing one." Exclusivity alone is not sufficient to establish antitrust violation under §14; the contract must also foreclose competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN17[] Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing

Exclusivity and foreclosure for purposes of § 3 of the Clayton Act, 15 U.S.C.S. § 14, are typically considered together, since virtually every contract is arguably "exclusive." Once a contract is found to be exclusive, the first step -- or the "controlling factor" in the discussion -- must be to define the relevant competitive market area.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN18[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

In determining the relevant market for purposes of § 3 of the Clayton Act, *15 U.S.C.S. § 14*, the line of commerce (i.e., the type of goods, wares, or merchandise, etc.) involved must be specified. This inquiry is a question of fact, so where there is a dispute as to the line of commerce, the issue may not be resolved as a matter of law. Next, the area of effective competition in the known line of competition must be charted by careful selection of the market area in which the seller operates, and to which the purchaser can practically turn for supplies. The relevant market must be defined before the court can move on to the next part of the inquiry and assess whether competition has been foreclosed in a substantial share of the relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN19[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Courts have analyzed foreclosure in § 3 of the Clayton Act, *15 U.S.C.S. § 14*, under a "rule of reason" analysis, meaning that only those arrangements whose probable effect is to foreclose competition in a substantial share of the line of commerce affected will violate *§ 14*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN20[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

The United States Supreme Court has accepted de facto exclusivity for purposes of § 3 of the Clayton Act, *15 U.S.C.S. § 14*. In clarifying what qualifies as an exclusive dealing contract, the Supreme Court has explained that even though a contract does not contain specific agreements not to use the goods of a competitor, if the practical effect is to prevent such use it comes within the condition of the section as to exclusivity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN21[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Determining the relevant product market is a highly fact intensive discussion for purposes of § 3 of the Clayton Act, *15 U.S.C.S. § 14*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] **Sherman Act, Claims**

It is easier to meet the threshold of foreclosure for a § 3 of the Clayton Act, *15 U.S.C.S. § 14*, violation than it is for a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, violation.

Antitrust & Trade Law > Sherman Act > Claims

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Sherman Act > General Overview

HN23[] **Sherman Act, Claims**

Section 1 of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. To prove a *§ 1* violation, a plaintiff must show an agreement in the form of a contract, combination, or conspiracy imposes an unreasonable restraint on trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN24[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

The unreasonableness of a restraint on trade under *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, is determined using either a per se standard or a rule of reason test that examines all of the circumstances. The United States Court of Appeals for the Ninth Circuit has found that exclusive dealing arrangements challenged under *§ 1* cannot be considered as per se violations. Thus, a court may not find that a defendant's alleged exclusive dealings are per se in violation of *§ 1*.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN25[] **Antitrust & Trade Law, Sherman Act**

Under the rule of reason test, three principal criteria are used to evaluate the reasonableness of a contractual arrangement, including the extent to which competition has been foreclosed in a substantial share of the relevant market, the duration of any exclusive arrangement, and the height of entry barriers. There is a similarity between the *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, rule of reason analysis and the § 3 of the Clayton Act, *15 U.S.C.S. § 14*, rule of reason analysis.

Opinion by: Mariana R. Pfaelzer

Opinion

MEMORANDUM OF DECISION RE: Defendant's Motion for Summary Judgment

BACKGROUND

Plaintiff Masimo Corporation ("Masimo") brings this antitrust action against Tyco Healthcare Group, L.P. and Mallinckrodt, Inc. (collectively "Tyco") alleging that Masimo "has been effectively shut out of a substantial portion of the market for pulse oximetry sensors **[*2]** and patient cables" through Tyco's use of "exclusive dealing arrangements," "strong-arm" tactics, and other "anticompetitive agreements" with hospital group purchasing organizations ("GPOs"), hospitals, Integrated Health Networks ("IHNs") and original equipment manufacturers ("OEMs") in violation of *Sections 1* and *2 of the Sherman Antitrust Act*, and *Section 3 of the Clayton Act*. Complaint at PP 17, 18, 24. [1]

[*3] Tyco brings this Motion for Summary Judgment on the grounds that: (1) Masimo's first cause of action for violations of *Section 2 of the Sherman Antitrust Act* fails because Tyco did not possess monopoly power in any relevant market and did not engage in any wrongful conduct to maintain its market position; (2) Masimo's second cause of action for violations of *Section 1 of the Sherman Act* fails because Masimo does not state a claim under *Section 3 of the Clayton Act* in that the challenged contracts are neither exclusive nor do they foreclose a substantial share of any relevant market; and (3) Masimo's third cause of action for violations of *Section 3 of the Clayton Act* fails because the challenged contracts are neither exclusive nor do they foreclose a substantial share of any relevant market. *See* Defendants' Notice of Motion and Motion for Summary Judgment ("Motion")(filed under seal Mar. 22, 2004). Tyco contends that there is no genuine issue as to any material fact and that Defendants are entitled to judgment as a matter of law.

The Court has read and considered the parties' submissions on this Motion, and has determined that oral argument would not assist the Court in its decisions. **[*4]** Accordingly, for the reasons discussed below, this Court rules as follows:

[1] Masimo's lawsuit follows a six week jury trial, during which various patents issued by Masimo and Nellcor (a subsidiary of Tyco) were litigated. The trial was bifurcated into stages, beginning with infringement and validity and then damages. The Court also heard equitable issues outside the presence of the jury. The jury found for Masimo on all claims, finding that Nellcor infringed either literally or through the doctrine of equivalents all of Masimo's patents at issue. Consequently, the jury awarded $ 134,528,960 in damages to Masimo in reasonable royalties and lost profits. Nellcor has since petitioned for judgment as a matter of law (JMOL) on several issues, and this Court is currently considering Nellcor's motions.

Tyco's Motion for Summary Judgment is DENIED with respect to Plaintiff Masimo's *Section 2 Sherman Act* claims regarding Tyco's (1) loyalty discounts in compliance-based agreements, (2) sole-source agreements, (3) bundled rebates, (4) equipment financing programs, and (5) co-marketing agreements because genuine issues of fact remain as to whether these acts, when viewed in combination, amount to exclusionary anticompetitive conduct. Tyco's Motion for Summary Judgment with respect to the remaining two *Section 2* claims, patent infringement and product disparagement, is GRANTED because as a matter of law such acts do not amount to anticompetitive conduct. Finally, Tyco's Motion for Summary Judgment with respect to Plaintiff Masimo's *Section 3 Clayton Act* claims and *Section 1 Sherman Act* claims is DENIED because genuine issues of fact remain as to whether Tyco's contracts create *de facto* exclusivity that substantially forecloses the relevant market.

I. Parties Filings

Tyco filed this Motion for Summary Judgment on March 22, 2004. *See* Defendants' Memorandum of Points and Authorities in Support **[*5]** of Motion for Summary Judgment ("Tyco Mot.") (filed under seal Mar. 22, 2004); *see also* supporting declarations (Neal J. Stephens (I) Declaration ("NJS I") and Neal J. Stephens (II) Declaration ("NJS II")) (filed under seal Mar. 22, 2004). At the same time, Tyco filed a separate statement of uncontroverted facts in support of its Motion for Summary Judgment. *See* Defendants' Separate Statement of Uncontroverted Facts in Support of Motion for Summary Judgment (filed under seal Mar. 22, 2004).

Masimo filed its Opposition under seal on April 19, 2004. *See* Memorandum of Points and Authorities in Opposition to Defendants Motion for Summary Judgment ("Masimo Opp."). In support of its Opposition, Masimo filed a number of Declarations under seal. *See* Declaration of Kevin Mosher ("Mosher Decl.") (filed April 19, 2004); Declaration of Joe E. Kiani ("Kiani Decl.") (filed April 19, 2004); Declaration of Professor Einer Elhauge ("Elhauge Decl.") (filed April 19, 2004); Declaration of Bradley R. Langdale ("Landgale Decl.") (filed April 20, 2004); Declaration of Frederick A. Robertson, M.D. ("Robertson Decl.") (filed April 20, 2004); Declaration of Dr. Jeffrey Leitzinger ("Leitzinger **[*6]** Decl.") (filed April 20, 2004); Declarations of Stephen E. Morrissey Volumes I-VII, Exhibits 1-269 ("Morrissey Decl.") (filed April 20, 2004).

In addition to the Opposition and Declarations, Masimo filed a statement of genuine issues of material fact. *See* Statement of Genuine Issues in Opposition of Defendants' Motion for Summary Judgment ("GI") (filed under seal April 19, 2004). Masimo also responded to Defendants' Separate Statement of Uncontroverted Facts. *See* Response to Defendants' Separate Statement of Uncontroverted Facts in Opposition to Motion for Summary Judgment ("Masimo Response to Uncontroverted Facts") (filed under seal April 20, 2004) and Corrected Response to Defendants' Separate Statement of Uncontroverted Facts in Opposition to Motion for Summary Judgment ("Masimo Corr. Response to Uncontroverted Facts") (filed under seal April 20, 2004).

On May 3, 2004, Tyco filed (under seal) a Reply (see Reply in Support of Motion for Summary Judgment ("Tyco Reply")) and Declaration (see Neal J. Stephens (III) Declaration ("NJS III"). In addition, Tyco replied to Masimo's response regarding uncontroverted facts. *See* Tyco's Reply to Masimo's Response Re: Undisputed **[*7]** Facts in Opposition to Motion for Summary Judgment ("Tyco's Reply Re: Undisput. Facts") (filed under seal May 3, 2003).

II. Masimo's Claims

Masimo alleges that Tyco monopolizes the U.S. market for pulse oximetry and has unlawfully abused its monopoly power to exclude competition. Masimo asserts that Tyco, through its exclusionary anticompetitive conduct, has worked to foreclose Masimo and other rivals from over 70% of the relevant market. The specific anticompetitive conduct that Masimo alleges Tyco engages in includes: (1) providing "loyalty discounts" to hospitals in exchange for a hospital's commitment to purchase not more than a specified percentage of the hospital's requirements for oximetry products (5%-15%) from Masimo or other rivals; (2) entering into "sole-source exclusive dealing arrangements" with hospital GPOs and IHNs that effectively prevent Masimo and other competitors from selling oximetry products to GPO and IHN member hospitals; (3) offering "bundled rebates" in which discounts on oximetry products were linked with discounts on completely unrelated Tyco products; (4) entering into oximetry "equipment financing programs" that impose financial penalties **[*8]** on hospitals who switch to rival products; (5) entering into contracts with OEMs that effectively foreclose rivals; (6) depriving Masimo of the competitive advantage of its technological advances by introducing products that infringed Masimo's patents; and (7) making false statements to potential customers about Masimo and its products. Masimo Opp. at 1; *see also* Complaint at PP 18, 21, 22, 24, 26, 27. Masimo alleges that these anticompetitive acts were in violation of *Section 2 of the Sherman Act*.

Masimo further alleges that Tyco's agreements with GPOs, IHNs, and OEMs created a *de facto* exclusivity that substantially foreclosed Masimo from entering the market in violation of both *Section 3 of the Clayton Act* and *Section 1 of the Sherman Act*. *See* Masimo Opp. at 2; *see also* Complaint at P 29 (alleging that "Tyco has used its GPO contracts and other anticompetitive agreements to lock-up more than 90% of the domestic market[]", substantially foreclosing the market for pulse oximetry from competition).

LEGAL STANDARD FOR SUMMARY JUDGMENT

HN1[] Summary judgment is appropriate when the submissions show that "there is no genuine issue as to any material fact and . . . **[*9]** the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56 (c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322-26, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. A defendant moving for summary judgment satisfies the initial burden of production by providing evidence negating any essential element of the nonmovants' claims or by showing ". . . that there is an absence of evidence to support the non-moving party's case." *Id. at 325*; *Nissan Fire & Marine Ins. Co. v. Fritz Cos., 210 F.3d 1099, 1102-05 (9th Cir. 2000)*. Once the moving party carries its burden of production, the nonmoving party must come forward with specific facts to support its claims. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *Nissan Fire & Marine, 210 F.3d at 1103*. If the nonmoving party fails to produce enough evidence to create a genuine issue of material fact, the moving party wins the motion for summary judgment. *Celotex Corp., 477 U.S. at 322*; *Nissan Fire & Marine, 210 F.3d at 1103*. But if the nonmoving party produces "enough evidence to create a genuine issue of material fact, **[*10]** the nonmoving party defeats the motion." *Nissan Fire & Marine, 210 F.3d at 1103*.

ANALYSIS

I. Section 2 of the Sherman Antitrust Act (*15 U.S.C. § 2*)

HN2[] *Section 2 of the Sherman Antitrust Act* prohibits monopolies, attempts to form monopolies, and combinations and conspiracies to do so. *15 U.S.C. § 2*. To establish a violation of *Section 2 of the Sherman Antitrust Act*, a plaintiff must show that (1) the defendant possessed monopoly power in the relevant market and (2) the defendant willfully acquired or maintained that power through "anticompetitive conduct" as opposed to gaining that power as a "consequence of a superior product, business acumen, or historical accident." *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202, 1208 (9th Cir. 1997)*.

HN3[] The possession of monopoly power in and of itself does not amount to a *Section 2* violation; the monopoly power must be maintained unlawfully. *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, L.L.P., 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872, 879 (2004)*.

A. Monopoly Power

HN4[] Monopoly power is defined as the "power to control **[*11]** prices or exclude competition." *Image Tech. Servs., Inc., 125 F.3d at 1202* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*); *see also* *United States v. Syufy Enters., 903 F.2d 659, 664 (9th Cir. 1990)*. Market power can be proved by either direct evidence of the "injurious exercise of market power" or through circumstantial evidence. *Image Tech. Servs., Inc., 125 F.3d at 1208*. When proving monopoly power by circumstantial evidence, the plaintiff must establish more than just market share; the plaintiff must: "(1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry and . . . that existing competitors lack the capacity to increase their output in the short run." *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)*.

In this Motion, Tyco argues that it does not possess the requisite monopoly power necessary for any claim under *Section 2*. Tyco Mot. at 16. Tyco concedes that it is "clearly a leader in the pulse oximetry market", but subsequently contends that it neither **[*12]** has the power to control prices nor to exclude competition. *Id.* Tyco offers evidence of how Masimo's appearance in the market drove Tyco's prices down 30%. Tyco Mot. at 16; NJS I Ex. A at M44747 (explaining that "Nellcor has already given up at least $ 100M annually in pricing to fight Masimo"). According to Tyco, "[t]his pricing history . . . is dispositive evidence of Tyco's lack of pricing discretion, and it completely negates any reasonable inference of monopoly power." Tyco Mot. at 16-17.

Tyco's arguments, however, fail to address controlling Ninth Circuit case law, which indicates that ***HN5***[] a market share exceeding 65% will support a rebuttable presumption of monopoly power. *See Image Tech. Servs., Inc., 125 F.3d at 1206* (explaining that proof of 65% market share establishes *a prima facie* case of monopoly power) (citing *American Tobacco Co. v. United States, 328 U.S. 781, 797, 90 L. Ed. 1575, 66 S. Ct. 1125 (U.S. 1946))*; *Avery Dennison Corp. v. Acco Brands, Inc., 2000 U.S. Dist. Lexis 3938, at *38 (C.D. Cal. Feb. 22, 2000)* ("Courts have generally found that a 65% market share establishes a *prima facie* case of market power.") (internal citations omitted). **[*13]**

Based upon this precedent, Masimo argues that Tyco possessed market power because Tyco's market share averaged 80% at all relevant times. Masimo's GI 11; see Morrissey Decl., Ex. 209 at TH225628; Ex. 91 at TH 53550; Ex. 76 at TH 0031089; Ex. 74 TH30646.1; Masimo Opp. at 20 (noting Tyco's "self-described" 79% market share through 2002, Tyco's share of total installed sockets [2] which exceeded 80% from 1997 through 2000, as well as Tyco's share of total U.S. revenue, which averaged approximately 80% between 1996 and 2002).

Masimo further cites Tyco's alleged gross profit margins from 1997 to 2003 (GI 12-13), Tyco's alleged practices of price discrimination and discretion among different categories of purchasers (GI 14), Tyco's alleged power to exclude rivals (GI 16), and Tyco's **[*14]** alleged acts in creating substantial barriers to entry in the pulse oximetry market as further circumstantial proof of Tyco's market power (GI 17). The alleged barriers to entry that Masimo cites include: (1) significant up-front costs and lead times for research and development, to obtain FDA approval, and to achieve learning curve economies; (2) high capital costs to enter the market as compared to Tyco's "low cost manufacturing advantage"; (3) Tyco's brand recognition and brand loyalty produced by its long-standing dominance in sales and its installed base; (4) the tendency of hospitals to standardize their product choices in any given product category; (5) network effects that increase the minimum market share needed to compete efficiently in the oximetry market; (6) Tyco's intellectual property rights protecting sensor sales on its installed base of Nellcor-compatible sockets; and (7) Tyco's exclusionary agreements with oximetry purchasers, GPOs and IHN's. *Id.*

Masimo argues that all of the above factors provide at least circumstantial evidence of Tyco's monopoly power. Given the relevant case law and the evidence presented, this Court finds that there is at least a genuine **[*15]** issue of fact as to whether Tyco possessed monopoly power.

B. Wrongful Maintenance of Monopoly Power

HN6[] The second element of a *Section 2* monopoly claim, referred to as the "conduct" element, addresses the question of whether Tyco used its "monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *Image Tech. Servs., Inc., 125 F.3d at 1208* (internal quotations omitted). To prove a *Section 2* violation, the plaintiff must show that the defendant "willfully acquired or maintained [monopoly] power". *City of*

---

[2] Installed sockets have been described to mean any device into which an oximetry sensor can be plugged by means of a connecting cable, such as multi-parameter patient monitoring systems ("MPPMs"), stand-alone monitors, and hand-held units.

Anaheim v. Southern Cal. Edison Co., 955 F.2d 1373, 1376 (9th Cir. 1992). In addition, anticompetitive conduct "does not invoke the Sherman Act until it harms consumer welfare." *Rebel Oil Co., 51 F.3d at 1433*.

Masimo has alleged that Tyco engaged in anticompetitive conduct including (1) exclusionary loyalty discounts, (2) sole-source contracts with GPOs and IHNs, (3) bundled rebates, (4) equipment financing programs, (5) *de facto* exclusive dealing with OEMs, (6) patent infringement, and (7) product disparagement. Masimo Opp. at 25-26.

Masimo's theory of anticompetitive conduct **[*16]** relies heavily upon the "combined effect" of these acts when taken together. *See* Masimo Opp. at 27-28 (citing *LePage's Inc. v. Minnesota Mining & Manufacturing Co., 324 F.3d 141, 162 (3rd Cir. 2003))* (explaining that "[t]he relevant inquiry is the anticompetitive effect of [Tyco's] practices taken together"); *see also* Masimo Opp. at 2 ("The central issue in this case, however, is whether Tyco has unlawfully maintained monopoly power through the *combined effect* of its various anticompetitive practices.") (emphasis in original).

HN7[] This Court has previously considered *Section 2* violations and has found it improper "to focus on specific individual acts of an accused monopolist while refusing to consider their overall combined effect." *See City of Anaheim, 955 F.2d at 1378* (affirming the lower court's decision); *see also City of Mishawaka v. American Electric Power, 616 F.2d 976, 986 (7th Cir. 1981)* (explaining that where a monopolist has engaged in a broad array of exclusionary conduct to maintain its monopoly, it is improper to consider "each aspect of [the monopolist's] conduct separately and in a vacuum"; rather "[i]t is the **[*17]** mix of various ingredients . . . in a monopoly broth that produces the unsavory flavor").

Masimo, however, takes the rationale in *City of Anaheim and Mishawaka* too far; Masimo throws into the "mix" every potential allegation of misconduct without regard as to whether such conduct is truly anticompetitive. Despite this Court's willingness to consider a "monopoly broth", this Court cannot allow Masimo to stretch these holdings beyond their intended purpose. The holding in *City of Anaheim* specifically discusses the need to show specific *intent* when proving specific acts of unlawful monopolistic conduct. *See id. at 1378* ("[W]e emphasize that ***HN8***[] the specific intent need not be proved by direct admissions of wrongdoing. Rather, the actions of the [defendant], taken as a whole, can and should be considered."). The holding does not allow for clearly legal acts to be thrown into the mix to bolster a plaintiff's antitrust case. *See id.* ("[I]f all we are shown is a number of perfectly legal acts, it becomes much more difficult to find overall wrongdoing.").

Nonetheless, the *Anaheim* Court does allow for some flexibility in deciding whether an act could be considered in the **[*18]** mix. *See id.* ("[A] finding of some slight wrongdoing in certain areas need not by itself add up to a violation. We are not dealing with a mathematical equation. We are dealing with what has been called the 'synergistic effect' of the mixture of the elements.").

1. Exclusionary Contracts/Agreements

Masimo alleges that Tyco, in response to the Masimo threat, has engaged in "a multi-faceted strategy to maintain its market domination and preserve its monopoly profits." Masimo Opp. at 7. As part of this strategy, Masimo claims that Tyco (1) imposed exclusionary contracts on hospitals, GPOs, and IHNs, that "severely restricted the ability of hospitals to buy Masimo's oximetry products;" and (2) provided financial incentives to OEMs to "ensure that the top MPPM (multi-parameter patient monitors) brands would only manufacture Tyco-compatible oximetry products and enter[] into agreements with OEMs that precluded the use of non-Tyco sensors with Tyco-compatible sockets." *Id.* Tyco's alleged exclusionary agreements include: sole-source contracts with GPOs and IHNs, market share volume/loyalty discounts in compliance-based contracts, bundled rebates, equipment financing **[*19]** programs, and co-marketing agreements with OEMs.

In assessing Tyco's potential liability for a *Section 2* violation, this Court considers the effect of all the contracts in the aggregate. *See Twin City Sportservice, Inc. v. Finley & Co., Inc., 676 F.2d 1291, 1302 (9th Cir. 1982)* (holding that ***HN9***[] in assessing the antitrust liability of a defendant the Court may look to the "overall effects of a defendant's conduct in the relevant market" and finding that the district court acted properly in aggregating defendant's contracts in the relevant market in order to assess the Sherman Act violations resulting from those contracts). When the contracts are analyzed together it becomes impossible for this Court to find as a matter of law that these agreements could not amount to anticompetitive conduct.

a. *Volume Share Discounts in Compliance-Based Agreements*

Tyco offered market share volume discounts to members of the following GPOs: Amerinet, Consorta, MedAssets, Novation and Premier. Masimo alleges that Tyco based "the availability of discounts on the condition that the hospitals refrain from purchasing competing products." Complaint at P 59. Specifically, these **[*20]** compliance-based contracts granted substantial discounts to Tyco customers in exchange for a contractual commitment: (1) to purchase no more than a small percentage (usually about 10%) of sensors from Tyco's rivals and the remaining percentage (usually about 90%) from Tyco; and (2) to utilize Tyco monitors or Tyco compatible monitors throughout 90% (or whatever the commitment level) of the hospital. Masimo Opp. at 7.

Masimo argues that "Tyco's loyalty discounts have helped Tyco to foreclose Masimo from 50% of the relevant market." GI 38; *see* Morrissey Decl. Ex. 228, TH284964; Leitzinger Decl., Ex A P 10; *see also* Masimo Opp. at 23. Masimo cites *LePage's*, a Third Circuit case, for the proposition that "a jury could reasonably find that these loyalty discounts are a *core component* of Tyco's unlawful effort to exclude Masimo from the oximetry market because they reflect pricing terms that are based on terms that operate to exclude competition rather than to reflect the supply and demand for Tyco's products on their own merits." Masimo Opp. at 23 (emphasis added) (citing *LePage's, 324 F.3d at 157-59*) (holding that evidence of discounts "designed to induce" **[*21]** key customers "to award business to 3M to the exclusion of LePage's" supported jury verdict on a monopolization claim).

Masimo relies upon Third Circuit authority, but fails to address Ninth Circuit case law on this issue. In *Western Parcel Express*, the Ninth Circuit discusses the viability of volume discount contracts within the meaning of *Section 2*. *See* *Western Parcel Exp. v. United Parcel Express Serv., 190 F.3d 974, 976 (9th Cir. 1999)*. The Western Parcel Court found that the contracts were not exclusive dealings contracts that preclude competition in violation of the Sherman Antitrust Act because a company which entered into one of these contracts with UPS could "nevertheless contract with another carrier for parcel delivery service." *See id.* Thus, *Western Parcel* ***HN10***[] distinguishes between volume discount contracts and exclusive dealing contracts in violation of *Section 2*, and holds that volume discount contracts, which do not foreclose consumers from entering into contracts with other delivery service providers, are "legal under ***antitrust law***". *Id.*

This Court finds that the holdings in *Western Parcel* and *LePage's* are not at odds; both holdings **[*22]** highlight the importance of exclusivity and foreclosure in a *Section 2 Sherman Act* anticompetitive conduct analysis. *See* *Western Parcel, 190 F.3d at 976* (explaining that since the volume discounts contacts "did not foreclose consumers from entering into contracts with other delivery service providers" they were not in violation of the Sherman Act); *LePage's, 324 F.3d at 159* ("The foreclosure of markets through exclusive dealing contracts is of concern under the antitrust laws . . . '[U]nilaterally imposed quantity discounts can foreclose the opportunities of rivals when a dealer can obtain its best discount only by dealing exclusively with the dominant firm.') (quoting 3A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 768b2, at 148 (2d Ed. 2002)).

Thus, whether Tyco's discounts are considered to be anticompetitive conduct will turn, in part, on the factual question of whether the discounts had the practical effect of making the contracts exclusive agreements that substantially foreclosed the market from competitors. Tyco offers evidence against exclusivity, showing that in 2002, 40% of Tyco's Premier accounts opted not to buy from Tyco at **[*23]** the highest level of discounts and 28% of Tyco's customers purchasing under the Novation contact opted not to participate in any share volume discounts. *See* Willig Report (NJS I Ex. J) at 42-43.

Despite Tyco's evidence, Masimo asserts that these compliance based discounts, in conjunction with the sole-source agreements, created *de facto* exclusivity that substantially foreclosed Masimo from 50% of the market. *See* Morrissey Decl. Ex. 228, TH284964; Leitzinger Decl., Ex A P 10; *id.* at 39-44 (arguing that "a customer facing even a relatively modest price break for maintaining 90% Nellcor compliance would find it very expensive to switch more than 10% of its sensor purchases to a competitor"). Thus, Masimo argues that the "compliance-based pricing structure provided a major roadblock to any would-be competitor, with or without actual customer commitments to be compliant." Leitzinger Decl., Ex. A, at 41.

Therefore, given the factual questions that remain as to whether the discounts offered in Tyco's compliance-based contracts actually became exclusive in practice and had the effect of substantially foreclosing the market, it would be premature for this Court to remove these **[*24]** compliance-based discounts from the monopoly mix.

b. *Sole-Source Contracts with GPOs and IHNs*

During the relevant time period, Tyco allegedly had "sole-source" contracts with three GPOs: Premier, Novation and Consorta. *See* Premier Contract, Decl. of Neal J. Stephens (II) ("NJS II") Ex. II. P0001-P0102; Novation Contract, NJS II, Ex. JJ, NOV000927-NOV001014; Consotra Contract, NJSII, Ex. KK, TH0019793-TH0019855. Masimo argues that Tyco's sole-source contracts have created a "strong disincentive" for GPO members and IHNs to deal with Tyco's competitors and have the "effect of excluding Masimo from a substantial portion of the oximetry market." Masimo Opp. at 24; *see also* Morrissey Decl., Ex. 127, at TH0102021 (explaining that in an internal presentation, Tyco stated of its Novation sole-source agreement: "Not only did this provide an opportunity to grow the existing installed base business, but more importantly shutout our competitor from gaining a stronghold within this key GPO").

Tyco argues that the sole-source agreements cannot qualify as exclusionary anticompetitive conduct because the agreements allow the hospitals to purchase "off contract", making them **[*25]** non-exclusive; nonetheless, as discussed *infra*, this Court should find that there is a genuine issue of material fact as to exclusivity and foreclosure regarding these contracts. *See* Masimo Opp. at 9 (alleging that "even if hospitals could technically buy "off contract," Tyco understood that hospitals generally did not"); *see also* Leitzinger Decl., Ex. A, at 41 (Nellcor's own documents note that: "GPOs continue to dictate a hospital's direction. Any attempts at business outside of a GPO contract has [sic] been very difficult and usually not worth the time and effort it takes to get them off contract.").

Thus, since this Court is not able to conclude as a matter of law that Tyco's sole-source agreements do not amount to exclusionary anticompetitive conduct, this Court will not remove the sole-source agreements from the monopoly broth.

c. *Bundled Rebates*

Tyco has "bundled" rebate programs within Premier and Novation. Tyco Mot. at 8; *see also* Letzinger Decl. Ex. A, at 44-47. Masimo alleges that by 2002, over 75% of Tyco's sensor sales to Premier members were to customers who were receiving bundled rebates across pulse oximetry and other unrelated product **[*26]** categories. *See* Leitzinger Decl. Ex. A, at 53 (observing that "the portion of Nellcor's oximetry sales that involved bundling arrangements increased substantially as Masimo was trying to enter the market").

Masimo argues that "Tyco introduced bundled discount programs that sought to leverage Tyco's dominant position in other products with its dominant position in pulse oximetry." Masimo Opp. at 10-11. Consequently, Masimo claims that Tyco bundled its oximetry products with non-oximetry markets, thereby creating an inducement to buy from Tyco that Masimo could not match because Masimo only offers oximetry. *See* Masimo Opp. at 24 (arguing that "[b]ecause Tyco's customers would lose significant discounts on oximetry products and other products if they bought Masimo's oximetry products, Masimo cannot efficiently compete against Tyco for the customers who are subject to Tyco's bundled rebate programs"). Finally, Masimo contends that these bundled rebates have "created a powerful disincentive for hospitals to buy Masimo's oximetry products for reasons that have nothing to do with the relative merits of the competing oximetry systems." *Id.*

Tyco does not deny that it offers these **[*27]** programs. Instead it argues that the rebates are "entirely voluntary" and no more exclusive than procompetitive lawful discount programs; Tyco asserts that "Masimo has always been free to seek these hospitals' business by offering a better deal." *See* Tyco Mot. at 8. Tyco further claims that since Masimo's own profit margins were between 45% and 83%, it was "well within Masimo's capabilities to offer a discount that exceeded the rebates provided by the bundled programs." *Id.*

Masimo cites *LePage's* for the proposition that when offered by a monopolist, bundled rebates may foreclose the market to competitors who do not offer a similarly diverse product line. *See* *LePage's, 324 F.3d at 155* ("The principal anticompetitive effect of bundled rebates as offered by [the defendant] is that when offered by a monopolist they may foreclose portions of the market to a potential competitor who does not manufacture an equally diverse group of products and who therefore cannot make a comparable offer.").

At the core of the Third Circuit's holding on bundled rebates is the idea that the defendant in that case "linked a product on which it faced competition with products **[*28]** on which it faced no competition." *Id. at 156* (citing with approval the Court's rationale in *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1065 (3d Cir. 1978))*. Such a practice, the Court explained, had the effect of "magnifying" the 3% rebate to a discount that was in actuality much larger, thereby "insulating" the defendant's product "from true price competition with [its competitor]". *See id.* ("The effect of the 3% bundled rebate was magnified by the volume of [defendant's] products sold, so that in order to offer a rebate of the same net dollar amount as [defendant's], [plaintiff] had to offer purchasers of [plaintiff's product] rebates of some 16% to hospitals of average size, and 35% to larger volume hospitals.") (internal quotations omitted).

Such bundled rebates have been compared to "packaging discounts" by Philip Areeda in his treatise on ***Antitrust Law***. Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 794, at 83 (Supp. 2002). This treatise discusses the anticompetitive effect of packaging discounts as follows:

> The anticompetitive feature of package discounting is the strong incentive it gives buyers to take **[*29]** increasing amounts or even all of a product in order to take advantage of a discount aggregated across multiple products. In the anticompetitive case, which we presume is in the minority, the defendant rewards the customer for buying its product B rather than the plaintiff's *B*, not because defendant's B is better or even cheaper. Rather, the customer buys the defendant's B in order to receive a greater discount on *A*, which the plaintiff does not produce. In that case the rival can compete in *B* only by giving the customer a price that compensates it for the foregone *A* discount. . . . Depending on the number of products that are aggregated and the customer's relative purchases of each, even an equally efficient rival may find it impossible to compensate for lost discounts on products that it does not produce.

Id. at 83-84.

While none of the law cited by Masimo is binding on this Court, neither Tyco nor this Court's independent research has revealed any controlling authority in this Circuit. Thus, given the similarity of the facts in this case to those in *LePage's*, this Court finds the Third Circuit's holding that ***HN11***[] bundled rebates may qualify as anticompetitive **[*30]** conduct within the meaning of *Section 2 of the Sherman Act* to be instructive.

Thus, the question becomes one of fact as to whether the bundled rebates act to foreclose the relevant market. On this issue, Tyco argues that "no more than 26% of total U.S. sales of pulse oximetry consumables in any single year were made by hospitals participating in bundled rebate programs." Tyco Mot. at 8; *see also* Willig Report, NJS I, Ex. J, at 37 Figure 4. Masimo argues in response that Tyco's expert failed to include Tyco's bundling programs with GPOs such as Amerinet, HSCA and VHA (Novation's predecessor) and with a number of IHNs. Masimo asserts that when the sales under these programs are included, Masimo was foreclosed from at least 31% of oximetry sales subject to programs that bundled oximetry discounts within other products. Masimo Opp at 12.

Given that ***HN12***[] the Ninth Circuit has held that 24% foreclosure for an "unreasonable length of time" can constitute a Sherman Act violation (*see* *Twin City, 676 F.2d at 1304*), it would be premature for this Court to decide at this stage that as a matter of law the bundled rebates cannot constitute anticompetitive conduct. Thus, the bundled **[*31]** rebates will be allowed to be shown as a possible part of the monopoly mix.

d. *Equipment Financing Programs*

Masimo claims that Tyco used its equipment financing programs with GPO and non-GPO hospitals, such as Co-OP and OTIS, to foreclose competition in the relevant market. Under Tyco's Co-OP program, hospitals that signed a written commitment to purchase a high percentage (80-95%) of their oximetry equipment from Tyco could receive new monitoring equipment without paying any cash at the outset. Tyco's OTIS program functioned in a similar fashion; Tyco would provide new monitors with no cash payment required to any hospital that was willing to trade in on a rival's product. Hospitals that participated in these two programs were required to purchase Tyco sensors for all their new and existing Tyco monitors. *See* Morrissey Decl., Ex. 200 at TH220359-70; EX 215 at TH228118.

Masimo claims that Tyco's system of not demanding monitor payment up front, but instead tacking it onto sensor sales paid slowly over time, is anticompetitive because to switch to a competitor the hospital would have to pay the remaining cost of the monitor. Masimo is unable to offer any authoritative **[*32]** legal basis for its contention that Tyco's equipment financing programs are anticompetitive within *Section 2 of the Sherman Act*. Instead, Masimo directs the Court to D.C. Circuit's decision in *Microsoft; Microsoft* holds that an exclusive dealing arrangement will not violate antitrust laws unless it has the effect of blocking a competitor's access to potential customers. *United States v. Microsoft Corp., 253 F.3d 34, 59-64, 346 U.S. App. D.C. 330 (D.C. Circuit 2001)*.

While this Court recognizes the general importance of that holding, this Court is not convinced by Masimo's attempt to use *Microsoft* to suggest that Tyco's equipment financing programs are anticompetitive. Masimo argues that approximately 40% of Tyco's sensor revenues came from hospitals who had entered into OTIS and Co-OP; the evidence seems to indicate that the actual percentage may between 30% to 40%. Leitzinger Decl., Ex A at 47-48 (estimating 30%); Morrissey Decl., Ex 143 at TH142543 (estimating 40%); *see also* GI 74. When considered on their own, Tyco's equipment financing programs are arguably not exclusive. Nonetheless, when viewed in conjunction with the sole-source agreements, compliance discounts, and bundled **[*33]** rebates discussed above, it is possible that a jury could find the overall combined effect is *de facto* exclusive and substantially forecloses the market. *See* *Twin City, 676 F.2d at 1302* (finding that the district court acted properly in aggregating defendant's contracts in the relevant market in order to assess the Sherman Act violations resulting from those contracts). Thus, this Court finds that Tyco's equipment financing programs should be considered as a possible part of the mix.

e. *Co-Marketing Agreements with OEMs*

Masimo argues that Tyco's co-marketing agreements with OEMs have prevented the OEMs from offering Masimo products, and have denied Masimo access to "vital" channels of the market. Masimo Opp. at 25. Masimo provides evidence that Tyco's standard form agreements to provide OEMs with modules for use in MPPMs "require that OEMs in their product manuals recommend only Tyco sensors for use with those modules, and state that no other sensors should be used (including sensors not manufactured by [Tyco])'". Elhauge Decl., Ex. A at 65. Masimo contends that these OEM agreements had the "effect of foreclosing the use of rival sensors with **[*34]** oximetry monitors that used Tyco technology even in those cases where use of rival sensors was, or could have been, technologically possible." *Id.* at 66.

Masimo also alleges that Tyco's standard license precluded technical innovations that designed around Tyco's patented oximetry technology, such as Masimo's Radical. GI 76. Specifically Masimo argues that the Radical could be used with Tyco's oximetry technology without violating Tyco's RCAL sensor patent and was "an efficient way for a competitor to sell sensors to Tyco's installed base of sockets." *Id.* Finally Masimo contends that Tyco's contracts with OEMs prohibited the OEMs from selling or using the Radical, even though the Radical could be utilized without violating Tyco's patents. *Id.*

Tyco counters that the co-marketing agreements did not contain any exclusivity provisions, and provides evidence that purports to show that "Tyco's OEMs could and did offer the pulse oximetry of other vendors (including Masimo's) at the same time they offered Tyco Oximetry on some of their patient monitors." Tyco Mot. at 9; *see* Bednarski Depo., NJS I Ex. 0, at 345 (arguing that the clause "[e]ndorsement of NPB brand sensors only" **[*35]** in the OEM co-marketing agreement did not preclude the use of competitor's sensors, and explaining that such a "condition" merely meant that the OEM would only be "*compensated* for endorsing NPB branded adhesive sensors" over other competitor's sensors) (emphasis added).

Tyco also asserts that Masimo's complaints about being shut out of the OEM channel by Tyco's OEM agreements are disingenuous, given the press release that Masimo issued proclaiming its own success in the pulse oximetry market. *See* Masimo Press Release (Dec. 1, 2003), NJS I, Ex. P ("To date, Masimo has licensed its Signal Extraction Pulse Oximetry Technology to over 35 international patient monitoring system providers, which make up over 70% of the world's pulse oximeter shipments.").

Tyco's evidence is shaky at best. First, Tyco is only able to provide deposition testimony of one person (Bednarski) as evidence in support of Tyco's claims that the OEM agreements were not exclusive. Further, Bednarski's testimony purports to evaluate only the plain meaning of the text and "conditions" of the agreement, rather than the preclusive effect that the agreement may have had on competitors. Such testimony about the **[*36]** literal interpretation of the OEM agreements is not helpful in light Masimo's claims that the agreements created *de facto* exclusivity.

Masimo's press release provides somewhat more compelling evidence against foreclosure of Masimo's SET technology from the market; presumably if Masimo is able to license technology to OEMs that represent over 70% of the world's pulse oximeter shipments, Masimo has not been foreclosed from the OEM channel as they suggest. Nonetheless, the press release, which was dated December, 2003 may not be reflective of Masimo's potential foreclosure from the market, as Masimo argues that it was only able to enter into OEM agreements with these OEMs after Tyco terminated its co-marketing agreements.

While this Court is not completely convinced that these OEM agreements taken in isolation would be anticompetitive, when placed within the overall context of the volume discounts and sole-source agreements discussed above, it is possible that given the material facts, a jury could find that such contracts create *de facto* exclusivity and thus violate the Sherman Act.

Thus, this Court finds that the *combined effect* of Tyco's (1)exclusionary loyalty discounts, **[*37]** (2) sole-source contracts with GPOs and IHNs, (3) bundled rebates, (4) equipment financing programs, and (5) *de facto* exclusive dealing with OEMs creates a genuine issue of fact as to whether these agreements constitute exclusionary anticompetitive conduct that is in violation of *Section 2 of the Sherman Act*. This Court therefore DENIES Summary Judgment as to these agreements.

2. Patent Infringement

Masimo claims that Tyco wrongfully appropriated Masimo's market share by infringing Masimo's technology. Masimo has not cited and this Court has not found any case where patent infringement has been considered anticompetitive conduct. The only case Masimo cites, *Conwood Co. v. U.S. Tobacco Co.*, is irrelevant. *See* *Conwood, 290 F.3d 768 (6th Cir. 2002)*. The *Conwood* Court considers whether tortious acts committed by one competitor against another competitor's display racks in retail shops may amount to anticompetitive conduct supporting a *Section 2* claim. *See* *id. at 787-88*. The case does not, as Masimo suggests, support the proposition that patent infringement may support antitrust claims brought by the patentee. Importantly, **[*38]** *Conwood* does not discuss patent infringement at all. Further, the analogy that Masimo aims to draw between its intellectual property and the property (display racks) at issue in *Conwood* is weak. As explained in this Court's prior Memorandum of Decision RE: Motions in Limine (issued May 28, 2004), the *Conwood* Court's concern was whether the Defendant's acts should be considered isolated tortious acts, which would not be an antitrust violation, or an exclusionary pattern, which would support an antitrust claim. *Conwood* is not analogous to this case. Thus, this Court does not find *Conwood* to be instructive on whether patent infringement may support an antitrust claim.

Further, Masimo's argument that Nellcor's patent infringement amounts to anticompetitive conduct was not a claim asserted in Masimo's Complaint or in any filing prior to its opposition to Tyco's Motion for Summary Judgment. *See* Tyco Reply at 14 (explaining that this theory of liability "first surfaced in Masimo's Opposition memorandum, long after the close of discovery and the Court's deadline of August 4, 2003 for amending the pleadings"). To allow Masimo to assert such a new theory of liability **[*39]** at this late stage would prejudice Tyco. *See* *Coleman v. Quaker Oats Co., 232 F.3d 1271, 1292 (9th Cir. 2000)* (reasoning that ***HN13***[] to add a new theory of liability at the summary judgment stage would prejudice the defendant who faces new burdens and defenses).

Thus, for the reasons explained here and in this Court's prior Memorandum of Decision RE: Motions in Limine (issued May 28, 2004), this Court GRANTS summary judgment against Masimo on Masimo's *Section 2* patent infringement claim because ***HN14***[] as a matter of law such acts do not amount to anticompetitive conduct.

3. Product Disparagement

Masimo alleges that to persuade customers to purchase its products instead of Masimo's products, Tyco "has repeatedly made false and disparaging statements about the quality of Masimo's products." Masimo Opp. at 26. Specifically, Masimo contends that Tyco has (1) "circulated a false rumor that a baby in an Ohio hospital suffered cardiac arrest while being monitored by a Masimo pulse oximeter"; (2) "distributed an outdated letter from Philips concerning the compatibility of Masimo's Radical with Philips monitors, even though an updated letter stating that Masimo is compatible **[*40]** had been circulated by Philips"; and (3) "falsely told customers that Masimo was not a superior technology, even though Tyco privately conceded that Masimo was better." GI 88. Masimo concludes that such disparagement amounts to exclusionary anticompetitive conduct in violation of *Section 2 of the Sherman Act*. *See* Masimo Opp. at 26 (citing *Conwood, 290 F.3d at 787* for the proposition that misrepresentations to retailers could be exclusionary conduct).

As with Masimo's allegation of patent infringement, Masimo will not be allowed to present product disparagement as anticompetitive conduct supporting Masimo's *Section 2* claim. First, Masimo's argument that Tyco's "widespread disparagement of Masimo's products" amounts to anticompetitive conduct was not a claim asserted in Masimo's Complaint or in any filing prior to its Opposition to Tyco's Motion for Summary Judgment. *See* Tyco Reply at 14. Because adding a theory of liability at the summary judgment stage would prejudice the defendant (as discussed above in relation to Masimo's patent infringement theory), this Court will not allow Masimo's product disparagement theory to be added to the mix. *Coleman, 232 F.3d at 1292.* **[*41]**

Further, Masimo has not cited and this Court has not found any persuasive case law holding mere product disparagement to be anticompetitive conduct. Again, the one Sixth Circuit case that Masimo cites, *Conwood*, does not offer guidance because, as discussed above, the issues in that case are not analogous. *Conwood, 290 F.3d at 787*. Thus, this Court GRANTS summary judgment with respect to Masimo's product disparagement theory of liability.

II. Section 3 of the Clayton Act (*15 U.S.C. § 14*)

HN15[] *Section 3 of the Clayton Act* prohibits companies from making contracts "on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods . . . of a competitor or competitors for the lessor or seller" where the effect "may be to substantially lessen competition or tend to create a monopoly in any line of commerce." *15 U.S.C. § 14*.

HN16[] *Section 3 of the Clayton Act* seeks to prevent the anticompetitive effects of exclusive dealing arrangements. *See* *Twin City, 676 F.2d at 1302*. To fall within the purview of *Section 3*, the contract must be "truly an exclusive dealing **[*42]** one." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 329-30, 5 L. Ed. 2d 580, 81 S. Ct. 623*. Exclusivity alone is not sufficient to establish antitrust violation under *Section 3*; the contract must also foreclose competition. *See* *Tampa Elec. Co., 365 U.S. at 327* (explaining that even though a contract may be found to be an exclusive dealing arrangement, it does not violate *Section 3* unless the court "believes it probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected") (emphasis added); *see also* *Omega Envtl. v. Gilbarco, 127 F.3d 1157, 1162 (9th Cir. 1997)* ("[T]he main antitrust objection to exclusive dealing is its tendency to foreclose existing competitors or new entrants from competition in the covered portion of the relevant market during the term of the agreement").

HN17[] Exclusivity and foreclosure are typically considered together, since the Ninth Circuit has recognized that "virtually every contract" is arguably "exclusive." *Gilbarco, 127 F.3d at 1162* (explaining that "virtually every contract to buy 'forecloses' or 'excludes' alternative sellers from *some* portion of the **[*43]** market, namely the portion consisting of what was bought"). Once a contract is found to be exclusive, the first step -- or the "controlling factor" in the discussion -- must be to define the relevant competitive market area. *See* *Tampa Elec. Co., 365 U.S. at 329*.

HN18[] In determining the relevant market, the line of commerce (i.e., the type of goods, wares, or merchandise, etc.) involved must be specified. *Id. at 327*. This inquiry is a question of fact, so where there is a dispute as to the line of commerce, the issue may not be resolved as a matter of law. *See id.* Next, the "area of effective competition in the known line of competition must be charted by careful selection of the market area in which the seller operates, and to which the purchaser can practically turn for supplies." *Id.* (explaining that "the threatened foreclosure of competition must be in relation to the market affected").

The relevant market must be defined before the court can move on to the next part of the inquiry and "assess whether competition has been foreclosed in a substantial share of the relevant market." *Twin City, 676 F.2d at 1302*.

HN19[] Courts have analyzed foreclosure **[*44]** in *Section 3* under a "rule of reason" analysis, meaning that "only those arrangements whose probable effect is to foreclose competition in a substantial share of the line of commerce affected will violate *Section 3*." *Gilbarco, 127 F.3d at 1162* (indicating through citation to *Twin City* that the rule of reason analysis used to determine a *Section 1 Sherman Act* violation is also the appropriate test for a *Clayton Section 3* violation); *see also* *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 45, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* (O'Connor, J. concurring) ("Exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are frozen out of a market by the exclusive deal.").

A. Exclusivity

Masimo asserts that Tyco's exclusive dealing contracts with its hospitals foreclose a significant portion of the relevant market and consequently violate *Section 3*. Tyco argues that for a contract to be deemed exclusive, it must "completely preclude a consumer from dealing with the competition." Tyco Mot. at 4. As a result, Tyco argues that since none of its agreements require total commitment, none of them can be considered **[*45]** to be "exclusive" within the meaning of *Section 3*. *Id.* Tyco cites to several circuit court opinions in an attempt to justify its narrow definition of exclusivity. *See e.g.,* *Western Parcel Express., 190 F.3d at 976* ("An exclusive dealing contract involves a commitment by a buyer to deal only with a particular seller."); *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039 (8th Cir. 2000)* (explaining that because consumers "were not required to either purchase 100% from Brunswick or to refrain from purchasing from competitors in order to receive the discount" and because consumers "were free to walk away from Brunswick's discounts at any time," there was no basis for antitrust injury).

This Court is hesitant to accept Tyco's quick dismissal of the *Section 3* violations for several reasons. First, Tyco's strong reliance upon both *Concord Boat* and *Western Parcel* is less persuasive because neither case deals specifically with a *Section 3* violation. *See* *Concord Boat, 207 F.3d 1039* (addressing exclusivity in the context of the Sherman Act); *see* *Western Parcel, 190 F.3d 974* (same). In addition, the facts in the **[*46]** present case are distinguishable from the facts in *Concord Boat* because this case involves an alleged monopolist who has engaged in a broad range of exclusionary conduct, while *Concord Boat* involved "only one product" and "no allegations of tying or bundling with another product." *Concord Boat, 207 F.3d at 1062*. Further, in *Western Parcel*, the court's holding on exclusivity is based largely upon the "short duration and easy terminability" of the contract as opposed to any purchase provision requiring 100% commitment. *See* *Western Parcel, 190 F.3d at 976*.

Finally, and most importantly, this Court does not find Tyco's exclusivity arguments convincing in light of **HN20**[] the Supreme Court's acceptance of *de facto* exclusivity. In clarifying what qualifies as an exclusive dealing contract; the Supreme Court has explained that "even though a contract does 'not contain specific agreements not to use the [goods] of a competitor,' if 'the *practical effect* . . . is to prevent such use' it comes within the condition of the section as to exclusivity.'" *Tampa Elec. Co., 365 U.S. at 329-30* (emphasis added) (quoting *United Shoe Machinery Corp. v. United States, 258 U.S. 451, 66 L. Ed. 708, 42 S. Ct. 363 (1922))* **[*47]** (explaining that *de facto* exclusivity is sufficient to qualify under *Section 3*).

Masimo has argued that Tyco's contracts are *de facto* exclusive. *See, infra* at 15 (discussing the potential exclusivity of the agreements in the *Section 2* analysis); *see also Leitzinger Decl.*, Ex. A, at 41 (explaining that

Nellcor's own documents recognize the *de facto* exclusivity of the agreements when they concede that the contractual ability to buy "off-contract" does not guarantee the practical ability to do so).

For this Court to find that the contracts are not de facto exclusive would require this Court to embark upon a factual inquiry into the question of whether Tyco's contracts in practice effectively result in a 100% commitment level, even though in actuality they only require commitment levels up to 95%. Such an inquiry presents a genuine issue of material fact, and is not appropriate for resolution on a motion for summary judgment.

Thus, this Court will not use exclusivity as a basis to grant summary judgment with respect to the *Section 3* claims. Instead this Court inquires into the second part of the analysis to see whether the potentially exclusive contracts are anticompetitive **[*48]** (i.e. to see whether they foreclose a substantial part of the relevant market).

B. Foreclosure

Tyco argues in the alternative that even if their contracts were considered to be exclusive dealing arrangements, they would not violate *Section 3* because they do not foreclose a substantial part of the relevant market. The Supreme Court has made clear that the first part of this inquiry must be to determine the relevant market. *See* *Tampa Elec. Co., 365 U.S. at 329*. Tyco makes no effort to specifically define the relevant product market; instead, Tyco proceeds on the assumption that the market is limited to sale of products to "intermediate-level entities, such as GPO's or distributors." *See Tyco* Mot. at 11. From that assumption, Tyco uses Ninth Circuit case law to argue that when intermediaries compose the market, "the required foreclosure showing is even higher." Tyco Mot. at 11 Tyco (*citing* *Gilbarco, 127 F.3d at 1162* for the proposition that "exclusive dealing arrangements imposed on distributors rather than end-users are generally less cause for anticompetitive concern").

Tyco argues that "if the allegedly foreclosed competitor could **[*49]** access end-users through alternate distribution channels, or if the allegedly restrictive covenants (assuming they were exclusive) were easily terminable, the market is not foreclosed." Tyco Mot at 12; *See* *Gilbarco, 127 F.3d at 1163* (explaining that if the competitor is "free to sell directly, to develop alternative distributors, or to compete for the services of the existing distributors[,] [a]ntitrust laws require no more.").

While Tyco makes legitimate points, their ultimate argument fails because of their assumptions regarding the relevant market. First, Tyco fails to specifically define the relevant product market. Tyco describes it as the pulse oximetry market; while Masimo argues that the "relevant product market involves two complementary products (the monitors and the sensors) that form a pulse oximetry system. GI 7. Masimo also suggests that oximetry sensors can be considered a separate antitrust product market. GI 8. ***HN21***[] Determining the relevant product market is a highly fact intensive discussion. *See* *Image Tech. Servs., Inc., 125 F.3d at 1203* ("Ultimately what constitutes a relevant market is a factual determination for the jury."). Thus, failure **[*50]** to designate, without dispute, the relevant product market precludes the granting of summary judgment.

Further, if this Court were to find that the relevant product market was not a genuine issue of material dispute, then the analysis turns to the question of whether Tyco engaged in anticompetitive conduct, meaning whether the market was substantially foreclosed. This too is a factual dispute depending upon to what extent Tyco's sales actually foreclosed the market. *See infra*, at 15 (discussing whether Tyco's compliance-based volume discounts in connection with bundled rebates and sole-source agreements foreclose 50% of the market); *id.* at 20 (evidencing that Tyco's bundled rebates alone arguably foreclose from 26%-31%). As noted, a court in the Ninth Circuit has held that a contract restricting 24% of the relevant market resulted in a cognizable foreclosure in a *Section 1* case. *See* *Twin City, 676 F.2d at 1298, 1304* (noting that the appropriate foreclosure analysis is to consider all exclusionary contracts in the aggregate). The Ninth Circuit has also explained that ***HN22***[] it is easier to meet the threshold of foreclosure for a *Section 3* violation than it is for **[*51]** a *Section 1* violation. *See* *id. at 1304, n.9* (noting that "a greater showing of anticompetitive effect is required to establish a Sherman Act violation than a *Section 3 Clayton Act* violation in exclusive-dealing cases").

Thus, given that substantially less than complete foreclosure can, in some cases, constitute an antitrust violation, a reasonable jury could find that Tyco's agreements have foreclosed a substantial portion of the relevant market in violation of *Section 3 of the Clayton Act*. This Court, therefore, DENIES Summary Judgment on the *Section 3 Clayton Act* claims.

III. Section 1 of the Sherman Act (*15 U.S.C. § 1*)

HN23[] *Section 1 of the Sherman Antitrust Act* prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *See 15 U.S.C. § 1*; *see also Twin City, 676 F.2d at 1304* (explaining that *Section 1 of the Sherman Act* seeks to prevent exclusive dealing arrangements that place an unreasonable restraint on trade). To prove a *Section 1* violation, a plaintiff must show an agreement in the form of a contract, combination, or conspiracy **[*52]** imposes an unreasonable restraint on trade. *See id.* (explaining that "any particular exclusive dealing arrangement does not violate *Section 1* unless it is found to be unreasonable").

HN24[] The unreasonableness of a restraint on trade is determined using either a per se standard or a rule of reason test that examines all of the circumstances. *See id.* The Ninth Circuit has found that "exclusive dealing arrangements challenged under *Section 1 of the Sherman Act* cannot be considered as per se violations." *Id.*, n.9 (citing *Tampa Elec. Co., 365 U.S. at 327*). Thus, this Court may not find that Tyco's alleged exclusive dealings are per se in violation of *Section 1*. *See Tampa Elec. Co., 365 U.S. at 327*.

HN25[] Under the rule of reason test, three principal criteria are used to evaluate the reasonableness of a contractual arrangement, including the extent to which competition has been foreclosed in a substantial share of the relevant market, the duration of any exclusive arrangement, and the height of entry barriers. *See Twin City, 676 F.2d at 1304*. However, given the similarity between the *Section 1* Sherman rule of reason analysis and the **[*53]** *Section 3* Clayton rule of reason analysis, this Court need not engage in an involved discussion of the *Section 1* claims. *See infra*, at 29; *see also Gilbarco, 127 F.3d at 1162*.

This Court recognizes that the Ninth Circuit has held that a contract restricting as little as 24% of the relevant market resulted in a cognizable foreclosure in a *Section 1* case (*see Twin City, 676 F.2d at 1298, 1304)*. Thus, this Court may not grant summary judgment as a matter of law on the *Section 1* claims since Tyco's alleged exclusionary agreements arguably foreclose up to 50% of the relevant market. This Court, therefore, DENIES Summary Judgment on the *Section 1 Sherman Act* claims.

TYCO'S OBJECTIONS

Tyco objects, pursuant to *Federal Rule of Civil Procedure 56(e)*, to the declarations of Joe E. Kiani, Kevin Mosher, Bradley R. Langdale, and Frederick A. Robertson, M.D., offered by Masimo in opposition to Defendants' Motion for Summary Judgment. The Court has read and considered the parties' submissions on this Objection. The Court did not rely upon any of the questionable statements in reaching its conclusion to DENY Summary Judgement. Consequently, the Court **[*54]** rules as follows:

Tyco's Objection regarding the declaration of Joe E. Kiani is OVERRULED.

Tyco's Objection regarding the declaration of Kevin Mosher is OVERRULED.

Tyco's Objection regarding the declaration of Bradley R. Langdale is OVERRULED.

Tyco's Objection regarding the declaration of Frederick A. Robertson, M.D. is OVERRULED.

CONCLUSION

For the foregoing reasons: this Court DENIES Defendant Tyco's Motion for Summary Judgment with respect to Plaintiff Masimo's *Section 2 Sherman Act* claims regarding Tyco's (1) loyalty discounts in compliance-based agreements, (2) sole-source agreements, (3) bundled rebates, (4) equipment financing programs, and (5) co-marketing agreements. This Court GRANTS Defendant Tyco's Motion for Summary Judgment with respect to Plaintiff Masimo's remaining *Section 2 Sherman Act* claims, including patent infringement and product disparagement. This Court DENIES Defendant Tyco's Motion for Summary Judgment with respect to Plaintiff Masimo's *Section 3 Clayton Act* claims and *Section 1 Sherman Act* Claims.

This Court also OVERRULES Tyco's objections to the declarations of Joe E. Kiani, Kevin Mosher, Bradley R. Langdale, and Dr. Frederick A. Robertson.

HN1[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

In considering a motion to dismiss for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1), federal courts need not accept as true contested jurisdictional allegations. As the party seeking to invoke the subject matter jurisdiction of the district court, the plaintiff bears the burden of demonstrating that there is subject matter jurisdiction in the case.

HN2[] International Aspects, International Application of US Law

Section 44(h) of the Lanham Act, *15 U.S.C.S. § 1126(h)*, entitles foreign nationals of countries that are party to certain international conventions with the United States the right to effective protection against unfair competition. To guarantee this protection, *§ 1126(h)* makes available the remedies provided in the Lanham Act so far as they may be appropriate in repressing acts of unfair competition.

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Trademark Law > Foreign & International Protection > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN3[] International Aspects, International Application of US Law

While § 44(h) of the Lanham Act, *15 U.S.C.S. § 1126(h)*, plainly extends protection against unfair competition to foreign nationals, it does not apply extraterritorially to unfair competition occurring in foreign countries. The benefits of the Lanham Act are limited to application within the United States. It is true that they are not expressly so limited, but it seems inconceivable that Congress meant to extend to all foreign nationals a remedy in the United States against unfair competition occurring in their own countries.

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

HN4[] Private Actions, Racketeer Influenced & Corrupt Organizations

Although the United States Court of Appeals for the Second Circuit has not specified a precise standard regarding the extraterritorial application of the Racketeering Influenced and Corrupt Organizations Act (RICO), courts in the Second Circuit have generally applied two alternative tests derived from transnational and antitrust cases in RICO extraterritoriality cases: the "conduct test" and the "effects test." Because it is not clear which test should be used in the context of RICO, jurisdiction will exist where either test is satisfied.

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN5[] International Aspects, International Application of US Law

Under the conduct test, for purposes of extraterritorial application of the Racketeering Influenced and Corrupt Organizations Act, subject matter jurisdiction exists only where conduct material to the completion of the fraud occurred in the United States. The conduct in the United States must have "directly caused" the loss for subject matter jurisdiction to exist. Mere preparatory activities, and conduct far removed from the consummation of the fraud, will not suffice to establish jurisdiction.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

International Law > Authority to Regulate > Securities

HN6[] Private Actions, Racketeer Influenced & Corrupt Organizations

There are two versions of the effects test for purposes of extraterritorial application of the Racketeering Influenced and Corrupt Organizations Act. One version is derived from securities cases and the other is derived from ***antitrust law***. Under the effects test borrowed from securities cases, jurisdiction exists over a predominantly foreign transaction when it has substantial effects within the United States. Remote and indirect effects do not qualify as substantial. The "effect" must be a direct and foreseeable result of the conduct alleged. In antitrust cases, liability may attach when the extraterritorial conduct is intended to and actually does have an effect on United States imports or exports which the state reprehends. Under both versions of the effects test, the reasoning behind the test is to protect domestic markets from corrupt foreign influences.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN7[] Jurisdiction, Jurisdictional Sources

When the federal claims in a case are dismissed, leaving only state law claims, it is within the discretion of the district court to exercise supplemental jurisdiction over the remaining state law claims. 28 U.S.C.S. § 1367(c)(3). When all bases for federal jurisdiction have been eliminated, the federal court should ordinarily dismiss the state claims.

Opinion

MEMORANDUM DECISION

CHIN, D.J.

In this unfair competition case, plaintiffs Roquette Freres ("Roquette") and Roquette America, Inc. ("RAI") assert claims under § 44(h) of the Lanham Act, *15 U.S.C. § 1126(h)*, and the Racketeering Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1962(c)* and*1964*. Plaintiffs also bring state law claims **[*2]** alleging breach of contract, breach of fiduciary duty, conversion of confidential information, misappropriation of trade secrets, intentional interference with contract, and procurement of breach of fiduciary duty. Before the Court are defendants' motions to dismiss. For the reasons set forth below, this Court lacks jurisdiction over plaintiffs' federal claims. The federal claims are therefore dismissed with prejudice and the state law claims are dismissed without prejudice.

STATEMENT OF THE CASE

I. *The Facts*

A. *The Parties*

Roquette is a French corporation that manufactures starch-derived food ingredients and other starch-based products, including sorbitol and maltitol. (Compl. P 2). [1] Roquette is the parent company and sole owner of RAI, an American subsidiary incorporated in Delaware with its principal place of business in Keokuk, Iowa. (Compl. P 1).

Defendant Tate & Lyle PLC ("Tate & Lyle") is a **[*3]** United Kingdom limited company, with its principal place of business in London, England. (Compl. P 3). Tate & Lyle is the parent company of defendants Amylum N.V. ("Amylum"), a Belgian company, and A.E. Staley Manufacturing Company, Inc. ("Staley"), a Delaware corporation with its principal place of business in Illinois. (Compl. PP 3-5).

Amylum is the parent of a group of companies (the "Amylum Group"). (*Id.* P 4). One of Amylum's subsidiaries is defendant Amylum France SAS ("Amylum France"), a French company. (*Id.*).

Individual defendant Carole Piwnica is a Belgian citizen domiciled in France. (*Id.* P 7). During the relevant time period, she was the Chairman of the Board of the Amylum Group and a member of the Staley and Tate & Lyle Boards. (*Id.* P 7).

Individual defendant Laurent Gerber is a French citizen living in Belgium. (*Id.* P 6). Gerber worked for Roquette from 1976 to 1982 as an engineer in Roquette's manufacturing facilities in France. (*Id.* P 32). From 1982 to 1988, and again from 1993 to 1997, Gerber worked for RAI in Illinois and Iowa. (*Id.* P 32, 34). In 1997, Gerber returned to France where he continued to work for Roquette until his resignation **[*4]** in 1998. (*Id.* P 42).

B. *Gerber's Non-Compete and Non-Disclosure Agreement*

In March 1994, during his assignment with RAI in Iowa, Gerber signed a standard RAI non-competition/non-disclosure agreement. (*Id.* PP 38-39). The language of the agreement is as follows:

---

[1] References to "Compl." are to the First Amended Complaint filed on July 30, 2003.

> 1. No employee of [RAI] shall, during his employment or at any time after his termination, disclose to any third party any proprietary information relating to the business of … [Roquette] or any of [its] affiliates obtained by the employee while in its … employ without … [written consent] … and upon leaving the employ of [RAI] no employee shall take with him, without like consent, any drawing, blueprint or other reproduction, or any special data, formulae, know-how, or any tables, calculations, letters or other documents, or copies of any thereof, or any proprietary information pertaining to … [Roquette] or any of [its] affiliates or any of the activities thereof.
>
> 3. No employees of [RAI] shall, during his employment and for two years thereafter, without … written consent …, engage in any other employment or business, directly or indirectly, alone or as a member of **[*5]** a partnership or as an officer or employee of or consultant to a corporation, firm or business, engaged in the manufacture or sale of sorbitol … or any other products developed by … [Roquette or any of its affiliates].

(*Id.* P 39).

C. *Amylum's "Master Plan" and the Decision to Recruit Gerber*

In 1994-95, Amylum conceived a "Master Plan," encompassing the Amylum Group, with the ultimate goal of entering the sorbitol market on a global basis. (*Id.* P 46). In furtherance of the plan, Amylum formed a joint venture in 1996 with SPI Polyols, Inc. ("SPI"), a Delaware company chosen for its technology, know-how, and customer base. (*Id.* P 50). The Amylum/SPI joint venture then began construction of a $ 400,000,000 powder sorbitol plant in Nesle, France (the "Nesle Plant"). (*Id.* PP 47, 50).

In March 1998, Amylum provided sorbitol samples to Warner-Lambert, one of the largest world-wide purchasers of powder sorbitol. (*Id.* P 52). Warner-Lambert rejected these samples because the sorbitol produced by Amylum was not in conformity with the requirements of the European market. (*Id.*). Amylum determined that the technology supplied by SPI for the Nesle **[*6]** Plant was only capable of producing a type of powder sorbitol acceptable in the North American market. (*Id.*). Amylum then decided that the objectives of its joint venture with SPI could be achieved only through technology capable of varying the characteristics of powder sorbitol so that it would be suitable for both the European and North American markets. (*Id.* P 53). Allegedly, Amylum knew that only the Roquette group possessed such technology. (*Id.*).

In March 1998, at an Amylum Group Policy Board meeting, Larry Pillard, the CEO of Tate & Lyle, Roderick Burden, Amylum Group's Managing Director, and Piwnica decided to recruit Gerber to work as Amylum's "Vice President-Technical." (*Id.* PP 54-55). Pillard, Burden, and Piwnica knew and intended that by recruiting Gerber they would be obtaining plaintiffs' highly confidential and proprietary information. (*Id.* P 55).

Amylum retained a corporate recruiting firm whose representatives contacted Gerber and met with him on April 4, 1998. (*Id.* 56-57). Subsequently, representatives of Amylum met with Gerber on eight separate occasions. (*Id.* P 58). On July 30, 1998, Gerber accepted a position as the Vice-President **[*7]** Technical of the Amylum Group. (*Id.* P 71). A few days later Gerber resigned from Roquette. (*See id.* P 62). [2]

D. *Gerber Seeks and Obtains Confidential Information From Roquette*

1. *The MBH-Sorbitol Plan*

On June 29 or 30, 1998, RAI's director of polyols and sweeteners, Richard O'Hara, was in France visiting Roquette. (*Id.* P 60). While O'Hara was in France, Gerber asked him for a copy of a document entitled the Mass Balance of Hydrogenation (the "MBH-sorbitol plan"). (*Id.* P 60). The MBH-sorbitol plan is a highly confidential document that provides a complete description of RAI's proprietary processes for production of its various grades and qualities of liquid sorbitol. (*Id.*). When O'Hara returned to RAI's Keokuk plant, he directed the author of the MBH-sorbitol plan, John McAndrew, to download a copy for **[*8]** delivery to Gerber. (*Id.* P 62). On August 5 or 6, 1998, O'Hara

---

[2] Although the First Amended Complaint does not specifically allege where these meetings in the spring and early summer of 1998 took place, they must have occurred in Europe.

returned to France with McAndrew. (*Id.*). Although Gerber had tendered his resignation a few days earlier, he met with O'Hara and McAndrew and received a copy of the MBH-sorbitol plan, apparently in France. (*Id.*). At the time, neither O'Hara nor McAndrew was aware of Gerber's resignation. (*Id.*).

2. *Information Regarding Raw Materials*

On July 27, 1998, three days before accepting the job as Vice President-Technical, Gerber telephoned Phillippe Rousseaux, Roquette's purchasing director of raw materials. [3] (*Id.* P 67). From his office in France, Gerber questioned Rousseaux in detail regarding the net cost and sources of wheat and corn as projected to 2003. (*See id.* P 67). After about 15 or 20 minutes, Rousseaux told Gerber that he did not have time to talk because he was preparing to leave on vacation. (*Id.* P 68). Rousseaux advised Gerber that he could get the information he wanted from some documents. (*Id.*). Gerber, however, did not officially have access to these documents and asked Rousseaux for copies. (*Id.*). Rousseaux refused because his secretary had left for the day and **[*9]** he did not have time to make copies for Gerber. (*Id.*).

3. *The MBH-Maltitol Plan*

Gerber also attended an internal Roquette working group meeting on August 5 or 6, 1998. (*Id.* P 63). The meeting focused on a project to construct a maltitol plant using highly confidential and proprietary technology developed jointly by RAI and Roquette. (*Id.*). During the meeting, Gerber asked detailed questions regarding the size of the equipment installed in the new plant, the status of the construction, and the new technology involved. (*Id.*). Gerber also obtained a highly confidential document that effectively provided instructions for the production of maltitol using RAI's and Roquette's proprietary technology (the "MBH-maltitol plan").

E. *Gerber Joins Amylum*

Gerber's July 30, 1998 employment agreement with Amylum provided that Gerber would assume the duties of "Group Vice President-Technical" **[*10]** as of November 4, 1998. (*Id.* P 71). [4] The agreement also obligated Amylum to indemnify Gerber "for any legal claims and costs" brought against him by Roquette or its affiliates. (*Id.* P 72).

Amylum was concerned that Gerber's non-compete/non-disclosure agreement could lead to litigation. To conceal the nature of Gerber's work for Amylum, the July 30, 1998 employment agreement was cancelled. (*Id.* P 74). In its place, Amylum and Gerber executed an agreement making Gerber the Technical Director of Orsan, an entity that produces monosodium gluconate ("MSG"). (*Id.* P 75). Gerber had no experience producing MSG during his twenty-three year career with Roquette. (*Id.*). A second agreement made Gerber the Group Vice President-Technical of the Amylum Group starting September 2, 1999 -- the same day his **[*11]** non-competition/non disclosure agreement expired. (*Id.* P 74). As part of an additional effort to conceal Gerber's involvement in Amylum's sorbitol production, Amylum allegedly assigned the internal code "FKP" to refer to Gerber in all internal documents until September 2, 1999. (*Id.* P 76).

F. *Gerber's Role at Amylum*

From the very beginning of his employment by Amylum, Gerber was actively involved in Amylum's sorbitol production. (*Id.* P 79). As a result, Amylum adopted technology substantially identical to Roquette's and RAI's unique process for manufacturing powder sorbitol. (*Id.* P 84). Once Amylum began using the new process, it was able to qualify its sorbitol for sale to Warner-Lambert for use in its gum products in all of its global locations. (*Id.* at 85).

G. *Amylum's Efforts to Enter the United States Sorbitol Market*

---

[3] The First Amended Complaint does not indicate where Rousseaux was located when he received Gerber's call.

[4] The First Amended Complaint does not specifically allege the location of Gerber's job with Amylum, but because Amylum is a Belgian company with offices in France, Gerber must have worked in Europe.

In June 1999 Amylum began negotiations with Ashland Inc. ("Ashland"), one of the largest distributors in North America, to distribute sorbitol produced by Amylum France. (*Id.* P 88). At the time, RAI was also in negotiations with Ashland. (*Id.*). On February 18, 2000, Ashland informed RAI that Amylum was offering its **[*12]** sorbitol at a lower price. (*Id.*). As a result, RAI was forced to lower its price to compete. (*Id.* P 91). Although Amylum eventually withdrew from its negotiations with Ashland, RAI remained obligated to sell its sorbitol at the lower price.

H. *Roquette I*

On March 25, 1999, plaintiffs sued Gerber, Amylum, and Piwnica in Iowa state court alleging common law claims ("Roquette I"). (Compl. P 92). During discovery, Amylum, Piwnica, and Gerber allegedly submitted a number of false and improperly redacted documents in an effort to perpetuate and conceal their scheme to misappropriate Roquette's and RAI's technology. (*Id.* P 94). Specifically, each of these defendants submitted false interrogatory responses indicating that Gerber's work for the Amylum Group was limited to Orsan. (*Id.*). Despite these false responses, the Iowa trial court found that Gerber functioned as the Group Vice President-Technical and was responsible for all of Amylum's operations. (*Id.*).

Roquette I was subsequently dismissed by the Iowa Court of Appeals for lack of personal jurisdiction. (*Id.* P 100).

I. *Roquette II*

In August 2000, Tate & Lyle acquired control over Amylum's **[*13]** board of directors and began operating Amylum as a unit or division of Tate & Lyle. (*Id.* P 102). As the parent company of Staley, Tate & Lyle's acquisition of control over Amylum enabled it to transfer information from Amylum to Staley. (*Id.* P 116). On November 17, 2000, while the Roquette I appeal was pending, Roquette and RAI commenced a second lawsuit in Iowa state court ("Roquette II") seeking to enjoin the transfer of Roquette's and RAI's trade secrets from Amylum to Staley. (D'Amore Decl., Exh. 2). After eight months of discovery, and three and one half days of live testimony, the Iowa court denied the motion for injunctive relief on December 27, 2001. (*Id.,* Exh. 3). Plaintiffs did not appeal the decision and on January 2, 2003, Roquette II was dismissed for want of prosecution. (*Id.,* Exh. 5).

II. *Procedural History*

Plaintiffs filed this action on January 17, 2003. After defendants moved to dismiss the original complaint, plaintiffs filed the First Amended Complaint on July 30, 2003 asserting claims under *Section 44(h) of the Lanham Act*, RICO and RICO conspiracy claims, breach of the non-competition covenant, breach of the non-disclosure covenant, **[*14]** breach of fiduciary duty, conversion of confidential information, misappropriation of trade secrets, intentional interference with contract, and procurement of breach of fiduciary duty. Defendants' motions to dismiss the original complaint were denied as moot on August 11, 2003.

Defendants filed new motions to dismiss the First Amended Complaint for lack of subject matter jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(1)*, for lack of personal jurisdiction under *Fed. R. Civ. P. 12(b)(2)*, and for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. [5] These motions are now before the Court. For the reasons set forth below, plaintiffs' claims are dismissed.

DISCUSSION

A. *Subject Matter Jurisdiction*

HN1[] In considering a motion to dismiss **[*15]** for lack of subject matter jurisdiction under *Rule 12(b)(1)*, federal courts "need not accept as true contested jurisdictional allegations." *Jarvis v. Cardillo, No. 98 Civ. 5793(RWS), 1999 U.S. Dist. LEXIS 4310, at *7 (S.D.N.Y. Apr. 5, 1999)*. As the party "seeking to invoke the subject matter

[5] Tate & Lyle, Amylum, Amylum France, Staley, Gerber, and Piwnica each submitted separate motion papers in support of the motion to dismiss.

jurisdiction of the district court," the plaintiff bears the burden of demonstrating that there is subject matter jurisdiction in the case. *Scelsa v. City Univ. of New York, 76 F.3d 37, 40 (2d Cir. 1996)*.

B. *The Lanham Act Claim*

1. *Applicable Law*

Plaintiffs' first claim for relief is brought pursuant to Section 44(h) of the Lanham Act, *15 U.S.C. § 1126(h)*. ***HN2***[] *Section 44(h)* entitles foreign nationals of countries that are party to certain international conventions with the United States the right to "effective protection against unfair competition." To guarantee this protection, *Section 44(h)* makes available "the remedies provided in this chapter ... so far as they may be appropriate in repressing acts of unfair competition." *15 U.S.C. § 1126(h) (2002)*.

HN3[] While *Section 44(h)* plainly extends protection **[*16]** against unfair competition to foreign nationals, it does not apply extraterritorially to unfair competition occurring in foreign countries. The benefits of the Lanham Act "are limited to application within the United States. It is true that they are not expressly so limited, but it seems inconceivable that Congress meant ... to extend to all foreign nationals a remedy in the United States against unfair competition occurring in their own countries." *Vanity Fair Mills, Inc. v. T. Eaton Co., 234 F.2d 633 (2d. Cir. 1956)*; *see also* *Am. White Cross Labs., Inc. v. H.M. Cote, Inc., 556 F. Supp. 753, 758 (S.D.N.Y. 1983)*("I regard *Vanity Fair Mills* as controlling authority for the proposition that insofar as [plaintiff] alleges ... unfair competition occurring [outside the United States], the complaint does not state a claim arising under the laws of the United States.").

2. *Application*

Each of the parties here is either a European corporation, a subsidiary of a European corporation, or a European citizen. (*See* Compl. P 1). The decision to recruit Gerber allegedly was made at a meeting of the Amylum Group Policy Board. (*Id.* P 55). **[*17]** Amylum is a European corporation and plaintiffs do not claim that this meeting took place in the United States. Moreover, the allegations of unfair competition focus predominately on the actions of Gerber, a French citizen who worked in France for a French company throughout the relevant time period. (*Id.* PP 42-45). Gerber's acts of misappropriation occurred in Europe. His alleged efforts to obtain information from Rousseaux and his misappropriation of information regarding Roquette's planned maltitol production plant took place entirely in Europe. (*Id.* P 63, 67, 68). Even crediting plaintiff's allegations that Gerber used O'Hara as an "instrumentality" to obtain the MBH-sorbitol plan from RAI in the United States, the fact remains that Gerber and O'Hara were both in France when Gerber allegedly requested and then later received the plan. (*Id.* PP 60-62).

Staley, the only American defendant, is not alleged to have been involved in the recruitment of Gerber. In fact, Staley's only interaction with Gerber occurred when its CEO, John Doxsie, along with the CEO of Tate & Lyle and the managing director of the Amylum Group, attended a "meeting/interview" with Gerber on September 27, 1998 -- **[*18]** almost two months after Gerber's resignation from Roquette. (*See id.* PP 54, 55, 58, 62). Even assuming this meeting is somehow relevant to plaintiffs' claims, the meeting is not alleged to have taken place in the United States.

Plaintiffs' allegation that Staley has received or may receive plaintiffs' proprietary information (*id.* P 115-20) does not change the overwhelmingly European nature of plaintiffs' complaint. [6] Staley is wholly owned and controlled by European-based Tate & Lyle, and it allegedly received the information not from Gerber but from Tate & Lyle, its parent company. Moreover, Tate & Lyle did not even acquire control over Amylum until well after the alleged misappropriation.

---

[6] Notably, the Iowa court in Roquette II expressed its view that plaintiffs' allegations against Staley are baseless: "Despite voluminous discovery from the March 1999 filing of [Roquette I] until the July 3, 2001 hearing [in Roquette II], the plaintiffs have found no clear evidence that any of their proprietary information has found its way directly or indirectly to Staley." (D'Amore Decl., Ex. 3 at P 44).

[*19] Finally, there is no allegation that any of the defendants ever engaged in unfair competition in the United States by selling any product manufactured using plaintiffs' trade secrets. (*See id.* P 88). Although Amylum allegedly tried to sell sorbitol to a distributor in the United States, it withdrew from negotiations a few months later. [7] (*Id.* P 90).

The gravamen of this complaint is a dispute between European rivals, Roquette and Amylum, that arose in Europe. Despite some arguable minor connections to the United States, the crucial acts of unfair competition all took place in Europe. Because the *Lanham Act* does not apply extraterritorially, plaintiffs' Lanham Act claim must be dismissed for lack of subject matter jurisdiction.

[*20] C. *The RICO Claims*

1. ***Applicable Law***

The Second Circuit has noted that "the RICO statute is silent as to any extraterritorial application." *North South Fin. Corp. v. Al-Turki, 100 F.3d 1046, 1051 (2d Cir. 1996)*. Although "a corporate defendant that is a foreign entity is not for that reason alone shielded from the reach of RICO," the Second Circuit has acknowledged ambiguity as to the "character and amount of activity in the United States that will justify RICO subject matter jurisdiction over a foreign entity." *Id. at 1052* (citing *Alfadda v. Fenn, 935 F.2d 475, 479 (2d Cir. 1991))*. The Second Circuit has noted that "guidance [regarding the extraterritorial application of RICO] is furnished by precedents concerning subject matter jurisdiction for international securities transactions and antitrust matters." *North South Fin., 100 F.3d at 1052*. The Second Circuit, however, has not specified the test for extraterritorial applications of RICO. "The ultimate inquiry is … whether 'Congress would have wished the precious resources of United States courts and law enforcement agencies to be devoted **[*21]** to [foreign transactions] rather than leave the problem to foreign countries.'" *Id.* (quoting *Bersch v. Drexel Firestone, Inc., 519 F.2d 974, 985 (2d Cir. 1975))*.

HN4[] Although the Second Circuit has not specified a precise standard, courts in this circuit have generally applied two alternative tests derived from transnational and antitrust cases in RICO extraterritoriality cases: the "conduct test" and the "effects test." *See* *North South Fin., 100 F.3d at 1051-52* (affirming district court's dismissal of RICO action for lack of subject matter jurisdiction for absence of U.S. conduct material to fraud); *Wiwa v. Royal Dutch Petroleum Co.,2002 U.S. Dist. LEXIS 3293, No. 96 Civ. 8386 (KMW), 2002 WL 319887, at *21 (S.D.N.Y. Feb. 28, 2002)*; *Giro v. Banco Espanol De Credito, S.A., 1999 U.S. Dist. LEXIS 9673, No. 98 CIV. 6195 (WHP), 1999 WL 440462, at *2 (S.D.N.Y. June 28, 1999)*; *Madanes v. Madanes, 981 F. Supp. 241, 250 (S.D.N.Y. 1997)*. "Because it is not clear which test should be used in the context of RICO, jurisdiction will exist where either test is satisfied." *Johnson Elec. N. Am. Inc. v. Mabuchi Motor Corp., 98 F. Supp. 2d 480, 486-87 (S.D.N.Y. 2000).* **[*22]**

HN5[] Under the conduct test, subject matter jurisdiction exists "only where conduct material to the completion of the fraud occurred in the United States." *Giro, 1999 U.S. Dist. LEXIS 9673, 1999 WL 440462, at *3* (citing *Alfadda, 935 F.2d at 479*); *see also* *Madanes, 981 F. Supp. at 251*; *but see* *C.A. Westel de Venezuela v. Am. Tel. & Tel. Co., 1993 U.S. Dist. LEXIS 16857, No. 90 Civ. 6665 (PKL), 1993 WL 497971, at *4 (S.D.N.Y. 1993)* (rejecting conduct and effects tests in RICO context but asserting jurisdiction because predicate acts occurred in U.S.). The conduct in the United States must have "directly caused" the loss for subject matter jurisdiction to exist. *North South Fin., 100 F.3d at 1050* (citing *Psimenos v. E.F. Hutton & Co., 722 F.2d 1041, 1046 (2d Cir. 1983)* (quoting *Bersch, 519 F.2d at 993*)). "Mere preparatory activities, and conduct far removed from the consummation of the fraud, will not suffice to establish jurisdiction." *North South Fin., 100 F.3d at 1051* (quoting *Psimenos, 722 F.2d at 1046*)).

HN6[] There are two versions of the effects test. *Id. at 1051-52*. One version **[*23]** is derived from securities cases and the other is derived from ***antitrust law***. *Id.* Under the effects test borrowed from securities cases, jurisdiction exists over a predominantly foreign transaction when it has "substantial effects within the United States."

---

[7] Plaintiffs allege that Amylum only withdrew from negotiations because of litigation commenced by RAI and Roquette. (*Id.* P 90). Even if true, the fact remains that Amylum is not alleged to have sold any sorbitol in the United States in competition with plaintiffs.

North South Fin., 100 F.3d at 1051; *see also* Giro, 1999 U.S. Dist. LEXIS 9673, 1999 WL 440462, at *3; Madanes, 981 F. Supp. at 250 (quoting Consol. Gold Fields PLC v. Minorco, S.A., 871 F.2d 252, 261-62 (2d Cir. 1989)). "Remote and indirect effects" do not qualify as substantial. North South Fin., 100 F.3d at 1052. The "effect" must be a "direct and foreseeable result" of the conduct alleged. Consol. Gold Fields, 871 F.2d at 261-62. In antitrust cases, liability may attach when the extraterritorial conduct is "intended to and actually does have an effect on United States imports or exports which the state reprehends." North South Fin., 100 F.3d at 1052. Under both versions of the effects test, "the reasoning behind the test is 'to protect … domestic markets from corrupt foreign influences.'" Wiwa, 2002 U.S. Dist. LEXIS 3293, 2002 WL 319887, at *21 **[*24]** (quoting Madanes, 981 F. Supp. at 250).

2. *Application*

I. *The Conduct Test*

The allegations underlying the RICO claim do not satisfy the conduct test for extraterritorial application of RICO. As discussed above in reference to plaintiff's Lanham Act claims, the crucial events comprising plaintiffs' allegations took place in Europe. Indeed, plaintiffs do not even argue that the RICO claims asserted in this action satisfy the conduct test for extraterritorial application of RICO. (*See* Plts.' Opp. Br. at 26-30). [8] Accordingly, the RICO claims must satisfy the effects test to withstand dismissal.

[*25] ii. *The Effects Test*

a. *The Securities Effects Test*

The alleged effects of the RICO claim in the United States were not substantial or direct. The direct results of the RICO allegations were Gerber's immediate involvement in Amylum's sorbitol production in France, his alleged disclosure of plaintiffs' confidential and proprietary information to Amylum, and the creation of the Orsan and "FKP" schemes to conceal Gerber's role at Amylum. (Compl. PP 74-84). These "effects" occurred in Europe.

Although Amylum allegedly entered into negotiations to sell sorbitol in the United States, there is no allegation that Amylum ever actually sold sorbitol here. In fact, the only alleged effect of Amylum's negotiations with Ashland is that RAI, on a single occasion, was allegedly forced to "lower its sorbitol price to meet Amylum's offer." (Compl. P 91). This falls short of the "substantial effects" set forth in cases applying the securities-based effects test and is, at worst, a remote and indirect effect that is not sufficient. *See e.g.,* Johnson Elec. North Am., Inc. v. Mabuchi Motor Am. Corp., 98 F. Supp. 2d 480, 486-87 (S.D.N.Y. 2000) (holding that a loss of sales **[*26]** in the United States constitutes a substantial effect sufficient to justify extraterritorial application of RICO).

Plaintiffs also claim that the alleged transfer of their proprietary information from Amylum to Staley, an American corporation and competitor of RAI, had a substantial effect in the United States. (Plts.' Opp. Br. at 29). Although plaintiffs allege that the result of this transfer is "severe damage to RAI's market position and possible elimination of RAI as a polyols manufacturer" (Compl. P 113), the allegations of the First Amended Complaint do not support this claim. Because plaintiffs do not allege a single instance of Staley, or any other defendant, ever selling anything in the United States manufactured using plaintiffs' trade secrets, the alleged damage to RAI's market position is purely speculative.

Furthermore, Amylum's corporate relationship to Staley is so attenuated that the transfer of plaintiffs' proprietary information from Amylum to Staley cannot be considered a direct effect. As the parent company of both Amylum and Staley, Tate & Lyle served as an intermediary of any information that passed between its subsidiaries. (*See* Compl. PP 3-5). Because **[*27]** of defendants' corporate structure, plaintiffs' proprietary information would have to pass from Gerber to Amylum France, to Amylum N.V., and then to Tate & Lyle before it could be transferred to

---

[8] Plaintiffs do argue that their allegations satisfy the Second Circuit's test for personal jurisdiction in a section of their opposition brief entitled "Amended Complaint Satisfies The 'Conduct' Test." (Plts.' Opp. Br. at 6-7). This test, however, differs from the conduct test used to determine RICO's extraterritorial application. Because plaintiffs' claims fail to adequately allege this Court's subject matter jurisdiction, I do not address the merits of their arguments for personal jurisdiction.

Staley. Moreover, Tate & Lyle did not even acquire Amylum until after the alleged misappropriation. Accordingly, Staley's receipt of the proprietary information is too far removed from the fraud allegations underlying the RICO claims to be considered a direct effect. (*See id.* P 115).

b. *The Antitrust Effects Test*

Plaintiffs' RICO allegations do not satisfy the antitrust effects test. First, the complaint does not allege that the defendants' extraterritorial conduct was intended to cause an effect in the United States. The scheme to recruit Gerber and misappropriate plaintiffs' trade secrets was allegedly conceived to further Amylum's "Master Plan" to enter the global sorbitol market. (*Id.* P 46). At the time of the decision to recruit Gerber, Amylum was already capable of producing a type of powder sorbitol acceptable in the North American Market. (*Id.* P 52). Amylum's inability to develop a powder sorbitol for sale in Europe prompted its decision to seek plaintiffs' trade **[*28]** secrets from Gerber. (*See id.* PP 52-55). Therefore, Amylum's scheme to obtain plaintiffs' trade secrets was intended to cause its greatest effect in Europe by enabling Amylum to sell sorbitol there.

Second, plaintiffs fail to adequately allege that defendants' extraterritorial conduct had an effect on United States imports or exports. Not only is there no allegation that defendants ever sold any product in the United States using plaintiffs' misappropriated trade secrets, plaintiffs also fail to allege that defendants' extraterritorial conduct interfered in any way with exports from the United States.

For these reasons, plaintiffs' allegations fail to satisfy either the antitrust-based or the securities-based effects test for extraterritorial application of RICO. Based on the facts alleged, a European tribunal is the proper forum for resolution of plaintiffs' claims. Accordingly, plaintiffs' RICO claims are dismissed for lack of subject matter jurisdiction.

C. *State Law Claims*

HN7[] When, as here, the federal claims in a case are dismissed, leaving only state law claims, it is within the discretion of the district court to exercise supplemental jurisdiction over the **[*29]** remaining state law claims. *See* *28 U.S.C. § 1367(c)(3)*; *Purgess v. Sharrock, 33 F.3d 134, 138-39 (2d Cir. 1994)*. "When all bases for federal jurisdiction have been eliminated … the federal court should ordinarily dismiss the state claims." *Bhd. of Locomotive Eng'rs Div. 269 v. Long Island R.R. Co., 85 F.3d 35, 39 (2d Cir. 1996)* (quoting *Baylis v. Marriott Corp., 843 F.2d 658, 665 (2d Cir. 1988))*. Here, I decline to exercise supplemental jurisdiction over plaintiffs' state law claims. Accordingly, the claims for breach of contract, breach of fiduciary duty, conversion of confidential information, misappropriation of trade secrets, intentional interference with contract, and procurement of breach of fiduciary duty are dismissed without prejudice.

CONCLUSION

For the reasons set forth above, defendants' motions to dismiss are granted. The First Amended Complaint is dismissed, with prejudice as to the federal claims and without prejudice as to the state law claims (or any claims under foreign law brought in the appropriate court).

The Clerk of Court shall enter judgment accordingly.

SO ORDERED.

HN1[] **Federal Arbitration Act, Arbitration Agreements**

9 U.S.C.S. § 3 of the Federal Arbitration Act provides that a court can stay proceedings upon being satisfied that claims are referable to arbitration under an agreement. The court has the power to stay the action pursuant to § 3, and the power to stay is not conditioned on the power to compel arbitration under 9 U.S.C.S. § 4.

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

International Trade Law > Dispute Resolution > International Commercial Arbitration > Arbitration

Civil Procedure > ... > Arbitration > Federal Arbitration Act > General Overview

HN3[] Alternative Dispute Resolution, Judicial Review

A federal district court's power to review an arbitration panel award is quite limited; indeed, it is among the narrowest known to the law. A court may only vacate an arbitration award for reasons enumerated in § 10 of the Federal Arbitration Act, 9 U.S.C.S. § 10, or for a handful of judicially created reasons. Section 10 allows vacation of an arbitration award only where (1) the award was procured by corruption, fraud, or undue means; (2) there was evidence of partiality or corruption on the part of the arbitrators; (3) the arbitrators were guilty of misconduct; or (4) the arbitrators exceeded or imperfectly executed their powers. A judicially created reason to set aside an arbitration award exists when an award violates public policy, is based upon a manifest disregard of the law, or the arbitrators did not conduct a fundamentally fair hearing. If an arbitration award is not vacated, modified or corrected, the award must be confirmed.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Judicial Review

Civil Procedure > ... > Arbitration > Federal Arbitration Act > General Overview

HN4[] Alternative Dispute Resolution, Judicial Review

A manifest disregard of the law means willful inattentiveness to the governing law. Mere error or misunderstanding of law is not enough for a finding of manifest disregard; instead, the record must show that the arbitrators knew the law and explicitly disregarded it.

HN5[] **Clayton Act, Claims**

To recover treble damages, a plaintiff must make some showing of actual injury attributable to something the antitrust laws were designed to prevent and must prove more than a violation of § 2(a) of the Robinson-Patman Act, since such proof only establishes that injury may result. Moreover, a plaintiff is required not only to show actual injury, but that injury must have been causally linked to the violation.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN6[] **Remedies, Damages**

A plaintiff is required under *§ 4* of the Clayton Act to show more than a violation of the antitrust laws; rather, it must present some direct evidence of injury to support an award of damages. The direct evidence may be evidence of lost sales, evidence that substantial price discrimination reflected in the resale prices of the favored competitors directly resulted in the plaintiff losing certain sales and losing profits on others, or an expert report outlining the magnitude of the price difference. Additionally, once the fact of damage has been shown, the burden of showing the precise amount of injury is eased somewhat because the vagaries of the marketplace make it difficult to ascertain business damages.

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

HN12[] **Alternative Dispute Resolution, Judicial Review**

Absent a fundamentally fair hearing, an arbitration award may be set aside. In the Tenth Circuit, a fundamentally fair hearing requires only notice, opportunity to be heard and to present relevant and material evidence and argument before the decisionmakers, and that the decisionmakers are not infected with bias. Thus, every exclusion of relevant evidence does not require vacatur of an arbitration award. Vacatur is only required when the refusal to consider the proffered evidence so affects the rights of the party so as to deny a fair hearing. Neither the arbitrators' refusal to admit cumulative or irrelevant evidence provides a basis to set aside an arbitration award.

Opinion

[*1215] MEMORANDUM AND ORDER DENYING MOTION TO VACATE AND GRANTING MOTION TO CONFIRM ARBITRATION AWARD

This matter comes before the Court on Chaparral Steel Midlothian, L.P.'s (Midlothian) Petition for Order Confirming Arbitration Award (Case No. 03-2664 - Doc. 1) and B-S Steel of Kansas, Inc.'s (B-S Steel) Answer and Opposition to Confirm and Suggestions in Support of Vacating Arbitration Award (Case No. 01-2410 - Doc. 291). B-S Steel also filed a Motion to Vacate the Arbitration Award in the Northern District of Texas, which has since been transferred to this Court (Case No. 04-4053 - Doc. 1) and will be addressed in this Order. For the reasons **[*1216]** stated below, Midlothian's motion to confirm the arbitration award is granted and B-S Steel's motion to vacate the award is denied.

I. Background

On August 15, 2001, B-S **[**3]** Steel filed suit in Case No. 01-2410, naming as defendants Texas Industries, Inc. and Chaparral Steel Company. B-S Steel filed an amended complaint on December 6, 2001, naming as additional defendants Chaparral Steel Texas, Inc. and Midlothian. B-S Steel's amended complaint alleged that the four defendants committed various violations of state and federal law by entering into a "secret deal" to sell steel at a lower price to B-S Steel's competitors. By its Order dated September 3, 2002, [1] (September 2002 Order) this Court referred B-S Steel's claims against Midlothian, which were based on transactions occurring before April 3, 2001, to arbitration pursuant to the Conditions of Sale Contract between B-S Steel and Midlothian. This Court found in its Order that the Conditions of Sale Contract signed in February 1997 and effective after July 1, 1996 was "valid and enforceable."

B-S Steel voluntarily dismissed **[**4]** Midlothian from Case No. 01-2410 on September 17, 2002. On that same day, B-S Steel informed Midlothian by letter that it was unwilling to proceed to arbitration. Subsequently, Midlothian filed a Demand for Arbitration with the American Arbitration Association seeking an order declaring that Midlothian was not liable to B-S Steel on its claims against Midlothian. On November 6, 2002, B-S Steel filed counterclaims against Midlothian in the arbitration, which were based on the same transactions and representations that the original claims in B-S Steel's Amended Complaint were based upon. A three member panel of arbitrators was appointed, and after a nine day hearing and the designation of many exhibits, the arbitrators issued a reasoned award.

Initially, Midlothian sought to confirm the arbitration award by filing a Motion for Order Confirming Arbitration Award in Case No. 01-2410, but then Midlothian voluntarily dismissed the motion and filed a new action. In the new action, Case No. 03-2664, Midlothian sought only a Petition for Order Confirming Arbitration Award, which was nearly a verbatim recitation of its previously filed Motion to Confirm in Case No. 01-2410. Subsequently, Case **[**5]** Nos. 01-2410 and 03-2664 were consolidated.

On December 31, 2003, the same day Midlothian filed its original motion to confirm the arbitration award, B-S Steel filed in the Northern District of Texas a motion to vacate the arbitration award. Subsequently, Midlothian petitioned the Texas court for a motion to transfer B-S Steel's motion to vacate the award to the District of Kansas, pursuant to *28 U.S.C. § 1404*. On May 10, 2004, Judge Sam Lindsay ordered the Texas case transferred to the District of Kansas. Midlothian's motion to confirm and B-S Steel's motion to vacate the arbitration award are now before the Court.

II. Discussion

---

[1] *B-S Steel of Kansas, Inc v. Texas Indus, Inc., 229 F. Supp. 2d 1209 (D. Kan. 2002)*.

B-S Steel argues that the Court should vacate the arbitration award because 1) the reasoned award is void ab initio due to this Court's and the arbitrators' lack of jurisdiction; 2) the underlying claims were not arbitrable in the first place; and 3) the arbitration was fundamentally flawed and unfair.

A. This Court Lacks Jurisdiction

B-S Steel suggests that the arbitration award is void ab initio because this Court **[*1217]** lacked jurisdiction to stay proceedings and refer the case to arbitration in the first place **[**6]** based upon a forum selection clause, which B-S claims makes the Northern District of Texas the only proper forum for its claims. Additionally, B-S Steel argues that the arbitration award is void because this Court did not have jurisdiction to "compel" arbitration pursuant to *9 U.S.C. § 4*. Since the arbitrators based their jurisdiction on the Court's Order staying the proceedings to refer the case to arbitration, B-S Steel avers that the arbitrators did not have jurisdiction either.

The Court has already considered B-S Steel's suggestion that the Court lacked jurisdiction and noted that the forum selection clause raises concerns not of subject matter jurisdiction but of venue. [2] **[**7]** Further, the Court rejected B-S Steel's argument, noting that B-S Steel originally chose this forum when it filed suit in Case No. 01-2410, that B-S Steel had originally argued that venue was proper in the District of Kansas, and that B-S Steel long ago waived venue. [3] The Court's prior ruling that it has jurisdiction is law of the case; [4] consequently, the Court rejects B-S Steel's misguided suggestion that jurisdiction is lacking due to the forum selection clause.

Likewise, B-S Steel's contention that this Court compelled arbitration pursuant to *§ 4 of the Federal Arbitration Act* [5] (FAA) in its September 2002 Order is mistaken. The only mention of compelling arbitration is in the caption to the Court's Order, "Memorandum & Order . . . Granting in Part Chaparral Steel Midlothian's Motion to Stay and Compel Arbitration." The text of the Order, however, states that "the Court grants Chaparral Midlothian's motion to stay and refer to arbitration claims with respect to transactions occurring before April 3, 2001." [6] Moreover, the Order discusses only *§ 3 of the FAA*, [7] which ***HN1***[] provides that a court can stay proceedings upon being satisfied that claims are referable to arbitration under an agreement. **[**8]** The Court clearly had the power to stay the action pursuant to *§ 3*, and the power to stay is not conditioned on the power to compel arbitration under *§ 4 of the FAA*. [8]

---

[2] *B-S Steel of Kansas, Inc. v. Texas Indus., Inc., 2004 U.S. Dist. LEXIS 7736, 2004 WL 946894 at *2 (D. Kan. April 29, 2004)* ("B-S Steel's contention that this Court's subject matter jurisdiction is somehow implicated by the forum selection clause . . . defies reason.").

[3] *Id. 2004 U.S. Dist. LEXIS 7736 at *3-4*.

[4] *United States v. Monsisvais, 946 F.2d 114, 115 (10th Cir. 1991)* ("The law of the case doctrine posits that when a court decides upon a rule of law, that decision should continue to govern the same issues in subsequent stages in the same case."); *Wilson v. Meeks, 98 F.3d 1247, 1250 (10th Cir. 1996)*.

[5] *9 U.S.C. § 4*.

[6] *B-S Steel of Kansas, Inc., 229 F. Supp. 2d at 1213*. This statement appears under the heading "Relief to be Given to Defendants." Further, the Court ordered that Midlothian's "Motion to Stay Proceedings and to Refer Case to Arbitration" be granted. *Id. at 1229*.

[7] *9 U.S.C. § 3*.

[8] *See* *Shanferoke Coal & Supply Corp. v. Westchester Serv. Corp., 293 U.S. 449, 453, 55 S. Ct. 313, 79 L. Ed. 583 (1935)* ("We think the Court of Appeals was clearly right in concluding that there is no reason to imply that the power to grant a stay is conditioned upon the existence of power to compel arbitration in accordance with *section 4* of the [FAA].").

The Court never addressed *§ 4*, which allows a district court to compel arbitration when **[**9]** a party has been aggrieved by the refusal of another to arbitrate under a written agreement, because Midlothian did not ask the Court to compel arbitration as contemplated by *§ 4*. Indeed, B-S Steel has stated that it was not even aware of an **[*1218]** arbitration agreement until the motion to stay and refer the matter to arbitration was filed. Thus, at the time Midlothian filed its motion for a stay, it had not yet asked B-S Steel to arbitrate the claims, and therefore could not have been aggrieved by B-S Steel's refusal to arbitrate. In sum, not only was the Court's Order devoid of a directive compelling arbitration pursuant to *§ 4*, it would have been improper for the Court to have done so because B-S Steel had not yet refused to arbitrate the claims. [9]

[10] B. The Underlying Claims were not Arbitrable**

B-S Steel argues that the underlying claims were not arbitrable because the 1997 Agreement, containing the arbitration clause, does not apply to the dispute, the claims are not arbitrable under the 1997 Agreement, and, alternatively, that the 2001 Agreement, which contains no arbitration clause, superceded the 1997 Agreement. Finally, B-S Steel suggests that *Clary v. The Stanley Works* [10] demonstrates that there was no agreement to arbitrate in the first instance.

B-S Steel first argues that the 1988 Conditions of Sale, which does not contain an arbitration clause, applies to the dispute, rather than the 1997 Agreement. The Court notes that the validity and scope of the 1997 Agreement were before the Court in its September 2002 Order and the Court found the 1997 Agreement to be valid and enforceable and to apply to shipments after its effective date and until the effective **[**11]** date of the 2001 Agreement. This determination is law of the case, and B-S Steel's argument must fail.

Even if the Court were to entertain B-S Steel's argument that the 1988 Conditions of Sale applies to the disputed claims because the "1997 Agreement never complied with Paragraph 19 of the 1988 Conditions of Sale: to wit, the 1997 Agreement was not "executed by both parties," as required by the 1988 Conditions of Sale," B-S Steel would still fall short. The 1997 Agreement was not a modification of the 1988 Conditions of Sale such that it was required to be "executed by both parties." Rather, the 1997 Agreement was a new contract. Paragraph 22 of the 1997 Agreement provides:

> This agreement constitutes the entire understanding of the parties with respect to the subject matter hereof, *supplant and supercedes any prior agreements* or understandings and may only be amended or modified by an agreement in writing executed by both parties. (emphasis added).

Thus, by its own terms, the integration clause in the 1997 Agreement supplanted and superceded the 1988 Conditions of Sale. [11]

[12]** The Court has also previously held that B-S Steel's antitrust claims are arbitrable under the 1997 Agreement. In the Court's September 2002 Order, it stated that the **[*1219]** arbitration clause of the 1997 Agreement was "quite broad." [12] "It covers not only claims or controversies tied to the parties' conduct, but to any

---

[9] *See* *9 U.S.C. § 4* (requiring a party seeking to compel arbitration to be aggrieved); *Hartford Acc. & Indem. Co. v. Equitas Reinsurance Ltd., 200 F. Supp. 2d 102, 108 (D. Conn. 2002)* ("Absent a refusal by the other party to arbitrate, arbitration cannot be compelled under *section 4*" because the party seeking to compel arbitration would not have been aggrieved).

[10] *2003 U.S. Dist. LEXIS 12747, 2003 WL 21728865 (D. Kan. July 24, 2003)*.

[11] *See* ***Wayman v. Amoco Oil Co., 923 F. Supp. 1322, 1338 (D. Kan. 1996)*** ("The credit card contracts . . . have an integration clause. It provides that all prior agreements and understandings pertaining to the subject matters covered in the credit card contracts are cancelled and superseded and that there are no other agreements, written or oral, between the parties pertaining to those matters. Hence, the credit card contracts . . . are 'final expressions' and cannot be contradicted by evidence of any prior agreement.").

[12] *B-S Steel of Kansas, Inc., 229 F. Supp. 2d at 1226*.

other transactions between the parties, And, it covers transactions that are related, even if they don't arise out of the contract. Such broad language covers [B-S Steel's] antitrust and tort claims . . . ." [13] B-S Steel's arguments therefore fail as this Court's prior holding is controlling.

B-S Steel's suggestion that the 2001 Agreement, which contained no arbitration clause, superceded the 1997 Agreement was also previously considered and rejected by this Court. The Court held that:

> The 2001 Agreement, signed on April 3, 2001, is expressly limited to *future transactions."* Thus its subject matter **[**13]** is entirely separate and distinct from the 1997 agreement, which is limited to transactions after its effective date, but before the effective date of the 2001 agreement. Because transactions pre-dating April 3, 2001 are still subject to the terms of the 1997 contract, the arbitration clause applies. [14]

Because the Court finds no error in its September 2002 Order, it declines to modify its prior holding.

Finally, B-S Steel argues that *Clary v. The Stanley Works,* which was decided in July 2003, after this Court's September 2002 Order, demonstrates that there was no agreement to arbitrate in the first instance. The *Clary* court first noted that ***HN2***[] "as a general rule, arbitration agreements do not require a signature, so long as the agreement is in writing." [15] But, the contract at issue in *Clary* expressly required the signature of both parties before becoming effective. [16] Only one party signed the contract and the court held that because the contract required **[**14]** both parties' signature, "no enforceable, written agreement to arbitrate ever came into existence." [17] In contrast to the contract in *Clary,* the 1997 Agreement does not require signatures of both parties to become effective. Thus, the general rule applies and Midlothian need not have signed the 1997 Agreement for the arbitration clause to be effective. [18]

Nor is B-S Steel's argument that the 1988 Agreement contained an express signature requirement, which mandated that the 1997 Agreement be signed by both parties, persuasive. B-S Steel points to paragraph 19 of the 1988 Agreement which states that it could "only be amended or modified **[**15]** by an agreement in writing executed by both parties." But, as previously discussed, the 1997 agreement is not an amendment of the 1988 agreement; rather, it is an entirely new agreement. Moreover, the Court has already determined that the 1997 Agreement is valid and enforceable.

C. The Arbitration was Fundamentally Flawed and Unfair

B-S Steel argues that the arbitration award is fundamentally flawed because the arbitrators manifestly disregarded the applicable law, the award was procured by fraud, the arbitrators were partial to Midlothian, and the arbitrators created a fundamentally **[*1220]** unfair arbitration process by excluding specific evidence.

[18] *See Med. Dev. Corp. v. Indus. Molding Corp., 479 F.2d 345, 348 (10th Cir. 1973)*; *Clary, 2003 U.S. Dist. LEXIS 12747, 2003 WL 21728865 at *3* (distinguishing *Clary,* which contained an express signature requirement from *Medical Development,* which contained no such requirement)).

HN3[] The Court's power to review an arbitration panel award is quite limited; indeed, it is "among the narrowest known to the law." [19] A court may only vacate an arbitration award for reasons enumerated in § 10 of the FAA, [20] or for a handful of judicially created reasons. [21] Section 10 allows vacation of an arbitration award only where 1) the award was procured by corruption, fraud, or undue means; 2) there was evidence of partiality or corruption on the part of the arbitrators; 3) the arbitrators were guilty of misconduct; or 4) the **[**16]** arbitrators exceeded or imperfectly executed their powers. [22] A judicially created reason to set aside an arbitration award exists when an award violates public policy, is based upon a manifest disregard of the law, or the arbitrators did not conduct a fundamentally fair hearing. [23] If an arbitration award is not vacated, modified or corrected, the award must be confirmed. [24]

1. The Arbitrators Acted with Manifest Disregard for the Law

B-S Steel suggests that the arbitration award must be vacated because "in making the award the arbitrators **[**17]** acted with manifest disregard for the law." HN4[] A manifest disregard of the law means "willful inattentiveness to the governing law." [25] Mere error or misunderstanding of law is not enough for a finding of manifest disregard; instead, the record must show that "the arbitrators knew the law and explicitly disregarded it." [26]

The Arbitrators Ignored ***Antitrust Law***

Specifically, B-S Steel avers that the arbitrators were presented with the applicable standards for proving antitrust injury in the Robinson-Patman Act context, but despite being presented with these standards, the arbitrators disregarded them. B-S Steel asserts that the arbitrators required it "to show, through direct evidence or admissions, that the Favored Buyers passed through some or all of the discount they received from Midlothian before antitrust injury could occur," rather than allowing B-S Steel to show antitrust injury through other **[**18]** methods.

B-S Steel blurs the standard for recovering antitrust damages by citing cases discussing the standards for proving antitrust injury pursuant to § 2(a) of the Robinson-Patman Act, but yet seeking treble damages under § 4 of the Clayton Act. It is well-settled that HN5[] "to recover treble damages . . . a plaintiff must make some showing of actual injury attributable to something the antitrust laws were designed to prevent . . . [and] must prove more than a violation of § 2(a), since such proof only establishes that injury may result." [27] **[**19]** Moreover, B-S Steel was required not only to show actual injury, but that injury must have been causally linked to the violation. [28] **[*1221]**

[26] Id.

[27] J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981); World of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467, 1479 (10th Cir. 1985).

The arbitrators recognized this when they wrote: "Accordingly B-S Steel faces a much higher standard in order to prove injury for purposes of recovering damages under its *Clayton Act* claim; it must, of course, be able to show a causal connection between the price discrimination in violation of the Act and the injury suffered."

The arbitrators also correctly stated the quantum of proof in a *§ 4* claim. ***HN6***[] B-S Steel was required to show more than a violation of the antitrust laws; rather, it must have presented some direct evidence of injury to support an award of damages. [29] **[**20]** The direct evidence may be evidence of lost sales, evidence that substantial price discrimination reflected in the resale prices of the favored competitors directly resulted in B-S Steel losing certain sales and losing profits on others, or an expert report outlining the magnitude of the price difference. [30] Additionally, once the fact of damage has been shown, the burden of showing the precise amount of injury is eased somewhat because the vagaries of the marketplace make it difficult to ascertain business damages. [31]

After carefully synthesizing the law and considering B-S Steel's evidence, the arbitrators determined that the injuries asserted by B-S Steel, its lost sales and margin squeeze damages, "fell far short of the quality of evidence needed to demonstrate that any lost sales or margin squeeze was materially caused by Chaparral's conduct." The Court finds no error in the arbitrators' determination that B-S Steel failed to carry its burden of proving antitrust injury or damages, as required by *Payne* and its progeny, given the Court's limited power to review an arbitration award. B-S Steel's contention that the arbitrators required it to show that the favored buyers passed through the discounts they received misconstrues the arbitrators' award. The arbitrators simply noted that because BS-Steel was unable to establish that the favored buyers passed on the discounts, B-S Steel had failed to prove the requisite *causal connection* between the discounts and B-S Steel's **[**21]** damages. As discussed above, a causal connection is a necessary component of a *§ 4 Act* claim.

B-S Steel's suggestion that the arbitrators acted with manifest disregard by failing to discuss the cases cited in its briefs or the testimony of Dr. White, is also misplaced. It is established that the ***HN7***[] arbitrators need not discuss every case cited by a party; in fact, arbitrators need not explain their reasons for an award. [32] And, B-S Steel has not indicated how the arbitrators' failure to discuss the testimony of Dr. White, Midlothian's expert, was in error. More importantly, even if the arbitrators erred, B-S Steel has presented no evidence that such error would amount to a "willful inattentiveness to the governing law." Thus, B-S Steel's suggestion that the arbitrators acted with a manifest disregard for the law must fail.

[22]** *The Arbitrators Failed to Apply Texas Law to the Fraud Claims*

B-S Steel also argues that the arbitrators acted with manifest disregard for the parties choice of Texas law when resolving B-S Steel's fraud claims. Because this Court in its September 2002 Order found the 1997 Agreement valid and enforceable and that "the parties chose Texas **[*1222]** as their choice of law in this 1997 Agreement," B-S Steel suggests that the arbitrators erred when they applied Kansas law to the fraud claims.

[32] *See Wilko v. Swan, 346 U.S. 427, 436, 74 S. Ct. 182, 98 L. Ed. 168 (1953), overruled on other grounds by Rodriguez de Quijas v. Shearson/American Express, Inc., 490 U.S. 477, 109 S. Ct. 1917, 104 L. Ed. 2d 526 (1989)*.

Because this case was arbitrated in Texas, the choice of law rules for Texas applied to determine the substantive law governing B-S Steel's claims for fraud. [33] **[**23]** *HN8*[] Texas courts do not apply contract choice of law provisions to claims sounding in tort, but rather use the Restatement's "most significant relationship test." [34] The arbitrators determined that Kansas was the state with the most significant relationship to B-S Steel's fraud claims, and therefore applied Kansas law. Thus, the arbitrators correctly applied Texas choice of law rules. Even if the arbitrators erred in their application of Texas choice of law rules, *HN9*[] mere error does not constitute "manifest disregard for the law."

2. Midlothian Procured the Arbitration Award through Fraud

B-S Steel urges that the arbitration award be vacated because the award was procured through fraud. Essentially, B-S Steel argues that Midlothian misrepresented that it was the true seller of steel, and once B-S Steel added Midlothian as a party, Midlothian took advantage of its fraud by filing a motion to stay proceedings and refer the matter to arbitration.

HN10[] Under the FAA, a court may vacate an arbitration award where the "award was procured by corruption, fraud, or undue means." [35] However, "to protect the finality of arbitration decisions, courts must be slow to vacate an arbitration award on the ground of fraud." [36] "The party asserting fraud must establish it by clear and convincing evidence, and must show that due diligence could not have resulted in the discovery of the fraud prior to the arbitration." [37] Tellingly, B-S Steel does not discuss the due diligence standard. The Court concludes that, through due diligence, B-S Steel **[**24]** could have discovered the true seller of steel, between August 15, 2002, when the case was first filed, and July 28, 2003, when the arbitration hearing occurred. Thus, the Court rejects B-S Steel's suggestion that the award be vacated due to fraud.

3. The Arbitrators were Partial to Midlothian

B-S Steel next suggests that the arbitration award must be vacated because the arbitrators were improperly impartial to Midlothian. As evidence of impartiality, B-S Steel notes that the arbitrators failed to award it damages for its fraud or *Texas Deceptive Trade Practices Act* claims, "sua sponte bickered with B-S Steel's damage expert," and made other "derogatory and/or loaded remarks" during the arbitration.

HN11[] Pursuant to *9 U.S.C. § 10(a)(1)*, an arbitration award may be vacated when "there was evident partiality or corruption in the arbitrators." Evident **[**25]** partiality requires something more than the appearance of bias, but literal proof of bias is not required either. [38] To set aside an award, **[*1223]** the evidence of bias or interest of an arbitrator must be direct, definite and capable of demonstration rather than remote, uncertain or speculative. [39]

"Evident partiality will be found where a reasonable person would have to conclude that the arbitrators were partial to one party to the arbitration." [40]

[26]** B-S Steel has failed to demonstrate that the arbitrators acted with "evident partiality." B-S Steel's complaint that the arbitrators failed to award certain damages is not evidence of bias; rather it is simply an attack on the validity of the arbitration award. [41] Nor do B-S Steel's other complaints demonstrate impartiality. Essentially B-S Steel claims that the arbitrators were rude, but rudeness is not a basis to vacate an arbitration award. [42] B-S Steel has failed to show that a reasonable person would have to conclude that the arbitrators were partial to Midlothian.

[27]** *4. The Arbitration Process was Fundamentally Unfair*

B-S Steel suggests that, by excluding certain evidence, the arbitrators stripped it of a fundamentally fair hearing. Specifically, B-S Steel complains that the exclusion of Exhibit 570 created such an unfair hearing that the arbitration award must be vacated. B-S Steel states that the exclusion was "tantamount to denying B-S Steel's antitrust claim," and if Exhibit 570 had been admitted, "even the arbitrators would have been forced to find that B-S Steel was harmed by the illegal discounts . . . ."

HN12[] Absent a fundamentally fair hearing, an arbitration award may be set aside. [43] The Tenth Circuit has outlined what constitutes a fundamentally fair hearing: "the courts seem to agree that a fundamentally fair hearing requires only notice, opportunity to be heard and to present relevant and material evidence and argument before the decisionmakers, and that the decisionmakers are not infected with bias." [44] Thus, every exclusion of relevant evidence does not require vacatur of an arbitration award. [45] Vacatur is only required when the refusal to consider the proffered evidence "so affects the rights of the party" so as to deny **[**28]** a fair hearing. [46] Neither the arbitrators refusal to admit cumulative or irrelevant evidence provides a basis to set aside an arbitration award. [47]

The exclusion of Exhibit 570 did not deny B-S Steel a fair hearing. The arbitrators **[*1224]** excluded Exhibit 570 because B-S Steel missed the deadline for filing exhibits, and the arbitrators had "a problem allowing this document in at this late stage of the game." Absent self-serving argument **[**29]** as to the importance of Exhibit 570, B-S Steel has not demonstrated that the exclusion of a single exhibit deprived it of a fundamentally fair hearing, particularly in light of the large amount of evidence presented to the arbitrators. [48] If Exhibit 570 was indeed so pivotal that its exclusion resulted in an unfair hearing, how could B-S Steel have missed the deadline for filing such

a key exhibit? Far from working an injustice upon B-S Steel, the arbitrators' admission of Exhibit 570, in violation of clearly established deadlines, would have worked an injustice upon Midlothian. In sum, B-S Steel has fallen far short of satisfying its burden that it was denied a fundamentally fair hearing.

III. Conclusion

A **[**30]** primary purpose behind arbitration agreements is to avoid the expense and delay of court proceedings. [49] If an arbitration award is not vacated, modified, or corrected, it must be confirmed. [50] B-S Steel has not demonstrated that any statutory basis exists for vacating the arbitration award. Nor has B-S Steel convinced the Court that application of a limited judicial exception to set aside the award is proper. Consequently, the Court must confirm the arbitration award.

IT IS THEREFORE ORDERED BY THE COURT that Midlothian's Petition for Order Confirming Arbitration Award (Doc. 1) originally filed in Case No. 03-2664, which has been consolidated with Case No. 01-2410, shall be GRANTED.

IT IS FURTHER ORDERED BY THE COURT that B-S Steel's Motion to Vacate the Arbitration Award (Doc **[**31]** 1) in Case No. 04-4053 shall be DENIED, and Case No. 04-4053 shall be dismissed.

IT IS SO ORDERED.

Dated this 14th of June, 2004.

Judge Julie A. Robinson

HN1[] Regulated Practices, Price Fixing & Restraints of Trade

The Foreign Trade Antitrust Improvements Act of 1982 excludes from the Sherman Act's reach much anticompetitive conduct that causes only foreign injury. It does so by setting forth a general rule stating that the Sherman Act shall not apply to conduct involving trade or commerce with foreign nations. *15 U.S.C.S. § 6a*. It then creates exceptions to the general rule, applicable where (roughly speaking) that conduct significantly harms imports, domestic commerce, or American exporters.

HN3[] International Aspects, Foreign Trade Antitrust Improvements Act

The Foreign Trade Antitrust Improvements Act (FTAIA) seeks to make clear to American exporters (and to firms doing business abroad) that the Sherman Act does not prevent them from entering into business arrangements (say, joint-selling arrangements), however anticompetitive, as long as those arrangements adversely affect only foreign markets. It does so by removing from the Sherman Act's reach, (1) export activities and (2) other commercial activities taking place abroad, unless those activities adversely affect domestic commerce, imports to the United States, or exporting activities of one engaged in such activities within the United States.

HN8[] **Antitrust & Trade Law, Exemptions & Immunities**

Courts hold that application of federal antitrust laws to foreign anticompetitive conduct is reasonable, and hence consistent with principles of prescriptive comity, insofar as they reflect a legislative effort to redress domestic antitrust injury that foreign anticompetitive conduct has caused.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN9[] **Private Actions, Standing**

A government plaintiff bringing a Sherman Act claim, unlike a private plaintiff, must seek to obtain the relief necessary to protect the public from further anticompetitive conduct and to redress anticompetitive harm. And a government plaintiff has legal authority broad enough to allow it to carry out this mission. *15 U.S.C.S. § 25*. Private plaintiffs, by way of contrast, are far less likely to be able to secure broad relief.

Lawyers' Edition Display

Decision

[*226]** Alleged price-fixing activity held excluded from reach of Sherman Act (15 USCS §§ 1 et seq.) by Foreign Trade Antitrust Improvements Act of 1982 (15 USCS § 6a) where plaintiff's claim rested solely on independent foreign harm.

Summary

The Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) (*15 USCS § 6a*) excludes from the reach of the Sherman Act (*15 USCS §§ 1 et seq.*) much anticompetitive conduct that causes only foreign injury, by (1) setting forth a general exclusionary rule that the Sherman Act "shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations"; and (2) creating a domestic-injury exception bringing such conduct back within the Sherman Act's reach, provided that the conduct (a) has a "direct, substantial, and reasonably foreseeable effect" on American domestic, import, or (certain) export commerce, and (b) such effect gives rise to a Sherman Act claim.

In the United States District Court for the District of Columbia, a purported class action was filed on behalf of foreign and domestic purchasers of vitamins under provisions including § 1 of the Sherman Act (*15 USCS § 1*). The complaint alleged that the defendants, foreign and domestic vitamin manufacturers and distributors, had engaged in a price-fixing conspiracy, raising the price of vitamin products to customers in the United States and to customers in foreign countries. The manufacturers and distributors moved to dismiss the suit as to some foreign-purchaser plaintiffs--vitamin distributors located in Ukraine, Australia, Ecuador, and Panama--each of which allegedly bought vitamins for delivery outside the United States. The District Court applied the FTAIA and dismissed the foreign purchasers' claims.

[*227]** On appeal, the United States Court of Appeals for the District of Columbia Circuit--in reversing, vacating the judgment against the foreign purchasers, and ordering a remand--expressed the view that (1) the FTAIA's general exclusionary rule applied to the case at hand, but (2) the FTAIA's domestic-injury exception also applied (*354 U.S. App. D.C. 257, 315 F.3d 338*).

On certiorari, the United States Supreme Court vacated and remanded. In an opinion by Breyer, J., joined by Rehnquist, Ch. J., and Stevens, Kennedy, Souter, and Ginsburg, JJ., it was held that:

(1) On the assumption, for the purposes of decision, that the alleged anticompetitive price-fixing activity was in significant part foreign, caused some domestic antitrust injury, and independently caused separate foreign injury, this alleged price-fixing activity fell within the FTAIA's general exclusionary rule.

(2) Moreover, on this assumption--and on consideration of the FTAIA's basic purposes, international comity, and Sherman Act history--such alleged price-fixing activity did not fall within the FTAIA's domestic-injury exception where a plaintiff's Sherman Act claim rested solely on the independent foreign harm.

(3) The foreign-purchaser plaintiffs in the case at hand remained free to ask the Court of Appeals, on remand, to consider the plaintiffs' argument that the foreign injury alleged in the case at hand was not independent.

Scalia, J., joined by Thomas, J., concurring in the judgment, expressed the view that (1) the FTAIA's language was readily susceptible of the interpretation which the Supreme Court provided; and (2) only this interpretation was consistent with the principle that federal statutes ought to be read in accord with the customary deference to the application of foreign countries' laws within their own territories.

O'Connor, J., did not participate.

Headnotes

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.7 > -- price fixing -- exclusion -- foreign trade > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]

On the assumption, for the purposes of decision under the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) (*15 USCS § 6a*), that alleged anticompetitive price-fixing activity was in significant part foreign, caused some domestic antitrust injury, and independently caused separate foreign injury, this alleged price-fixing activity fell within the FTAIA's general exclusionary rule that the Sherman Act (*15 USCS §§ 1 et seq.*) did "not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations." Moreover, on this assumption, such alleged price-fixing activity did not fall within the FTAIA's domestic-injury exception--which made the Sherman Act nonetheless applicable when conduct within the general rule (1) had a "direct, substantial, and reasonably foreseeable effect" on American domestic, import, or (certain) export commerce, and (2) such **[***228]** effect gave rise to a Sherman Act claim--where a plaintiff's Sherman Act claim rested solely on the independent foreign harm. Thus, in a scenario in which it was assumed, for the purposes of decision, that vitamin sellers around the world had agreed to fix prices, leading to higher vitamin prices in the United States and independently leading to higher vitamin prices in other countries such as Ecuador, (1) a purchaser in the United States could properly bring a Sherman Act claim under the FTAIA on the basis of the asserted domestic injury; but

(2) a purchaser in Ecuador could not properly bring a Sherman Act claim under the FTAIA on the basis of the asserted foreign harm.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.7 > -- price fixing -- exclusion -- foreign trade > Headnote:
LEdHN[2A][] [2A]***LEdHN[2B]***[] [2B]***LEdHN[2C]***[] [2C]

On the assumption, for purposes of decision under the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) (*15 USCS § 6a*), that alleged anticompetitive price-fixing activity was in significant part foreign, caused some domestic antitrust injury, and independently caused separate foreign injury, this alleged price-fixing activity fell within the FTAIA's general exclusionary rule that (subject to a domestic-injury exception) the Sherman Act (*15 USCS §§ 1 et seq.*) did "not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations," for the general rule (1) placed all (non-import) activity involving foreign commerce outside the Sherman Act's reach; (2) did not apply to only conduct involving exports; and (3) applied where the anticompetitive conduct at issue was foreign.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.7 > -- price fixing -- exclusion -- independent foreign harm > Headnote:
LEdHN[3A][] [3A]***LEdHN[3B]***[] [3B]***LEdHN[3C]***[] [3C]***LEdHN[3D]***[] [3D]***LEdHN[3E]***[] [3E]***LEdHN[3F]***[] [3F]***LEdHN[3G]***[] [3G]***LEdHN[3H]***[] [3H]***LEdHN[3I]***[] [3I]

On the assumption, for purposes of decision under the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) (*15 USCS § 6a*), that alleged anticompetitive price-fixing activity was in significant part foreign, caused some domestic antitrust injury, and independently caused separate foreign injury, the alleged activity did not fall within the FTAIA's domestic-injury exception--to the FTAIA's general exclusionary rule that the Sherman Act (*15 USCS §§ 1 et seq.*) did "not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations"--where a plaintiff's Sherman Act claim rested solely on the independent foreign harm. The United States Supreme Court's reading of the domestic-injury exception in this manner furthered the FTAIA's basic purposes, properly reflected considerations of international comity, and was consistent with Sherman Act history, for:

(1) The domestic-injury exception made the Sherman Act nonetheless applicable when conduct within the general exclusionary rule (a) had a "direct, substantial, and reasonably foreseeable effect" on American domestic, import, or (certain) export commerce, and (b) such effect gave rise to a Sherman Act claim.

(2) No one denied that America's antitrust laws, when applied to foreign conduct, could interfere with a foreign nation's ability independently to regulate its own commercial affairs.

[*229]** (3) While federal courts had long held that application of America's antitrust laws to foreign anticompetitive conduct was nonetheless reasonable, and hence consistent with principles of prescriptive comity, insofar as America's antitrust laws reflected a legislative effort to redress domestic antitrust injury that foreign anticompetitive conduct caused, it was not reasonable to apply those antitrust laws to foreign conduct insofar as (a) that conduct caused independent foreign harm, and (b) that foreign harm alone gave rise to a plaintiff's claim.

(4) A proposed alternative approach, under which courts would take account of comity considerations case by case, was too complex to prove workable in this antitrust situation.

(5) The FTAIA's language and history suggested that Congress had designed the FTAIA to clarify, perhaps to limit, but not to expand in any significant way, the Sherman Act's scope as applied to foreign commerce.

(6) The Supreme Court had found no significant indication that at the time Congress had written the FTAIA, American courts would have thought the Sherman Act applicable in this antitrust situation.

(7) While some linguistic arguments might show, at most, that a contrary reading of the FTAIA's language was the more natural one, those arguments did not show that the Supreme Court had to accept the contrary reading.

(8) The answer to some conflicting policy arguments was neither clear enough, nor of such likely empirical significance, as to change the Supreme Court's conclusion.

(Scalia and Thomas, JJ., dissented in part from this holding.)

APPEAL §1750.6 > -- civil antitrust case -- issues left open > Headnote:
LEdHN[4A][] [4A]***LEdHN[4B]***[] [4B]***LEdHN[4C]***[] [4C]***LEdHN[4D]***[] [4D]

Given that, for the purposes of decision under the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) (*15 USCS § 6a*), the United States Supreme Court had assumed that alleged price-fixing activity was in significant part foreign, caused some domestic antitrust injury, and independently caused separate foreign injury, the Supreme Court, in holding that the FTAIA excluded such conduct from the reach of the Sherman Act (*15 USCS §§ 1 et seq.*) where a plaintiff's claim rested solely on the independent foreign harm--and in reversing a Federal Court of Appeals' judgment in favor of the foreign-purchaser plaintiffs in the case at hand--left those plaintiffs free to ask the Court of Appeals, on remand, to consider the plaintiffs' argument that the foreign injury alleged in the case at hand was not independent. In such circumstances, the Court of Appeals might properly determine whether the plaintiffs properly preserved the argument, and, if so, the Court of Appeals might properly consider the argument and decide the issue.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > -- foreign trade > Headnote:
LEdHN[5A][] [5A]***LEdHN[5B]***[] [5B]***LEdHN[5C]***[] [5C]

The Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) (*15 USCS § 6a*) seeks to make clear to American exporters--and to firms doing business abroad--that the Sherman Act (*15 USCS §§ 1 et seq.*) does not prevent them from entering into business arrangements (such as joint-selling arrangements), however anticompetitive, as long as those arrangements adversely affect only foreign markets. For this purpose, the FTAIA excludes from the Sherman **[***230]** Act's reach much anticompetitive conduct that causes only foreign injury, by (1) setting forth a general exclusionary rule that the Sherman Act "shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations"; and (2) creating a domestic-injury exception which brings such conduct back within the Sherman Act's reach, provided that the conduct both (a) sufficiently affects American commerce, by having a "direct, substantial, and reasonably foreseeable effect" on American domestic, import, or (certain) export commerce, and (b) has an effect of a kind that ***antitrust law*** considers harmful, by giving rise to a Sherman Act claim. Thus, the FTAIA seeks to release domestic and foreign anticompetitive conduct from Sherman Act constraints when that conduct causes foreign harm, while making an exception when that conduct also causes domestic harm.

STATUTES §82 > -- noninterference with foreign sovereign authority > Headnote:
LEdHN[6][] [6]

The United States Supreme Court ordinarily construes ambiguous federal statutes to avoid unreasonable interference with the sovereign authority of other nations. This rule of statutory construction (1) reflects principles of customary international law that the Supreme Court assumes Congress ordinarily seeks to follow; (2) cautions federal courts to assume that legislators take account of the legitimate sovereign interests of other nations when legislators write American laws; and (3) thereby helps the potentially conflicting laws of different nations to work together in harmony.

CONFLICT OF LAWS §3 > -- comity > Headnote:
LEdHN[7][] [7]

With respect to regulation of the commercial affairs of the United States and foreign nations, principles of comity provide Congress greater leeway when Congress seeks to control through legislation the actions of United States companies.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §74 > -- relief -- factors > Headnote:
LEdHN[8][] [8]

In antitrust cases under the Sherman Act (*15 USCS §§ 1 et seq.*), a Federal Government plaintiff, unlike a private plaintiff, must seek to obtain the relief necessary to protect the public from further anticompetitive conduct and to redress anticompetitive harm. Moreover, under *15 USCS § 25*, a Federal Government plaintiff has legal authority broad enough to allow the plaintiff to carry out this mission, while private plaintiffs are far less likely to be able to secure broad relief.

Syllabus

[*231]** *The Foreign Trade Antitrust Improvements Act of 1982*

(FTAIA or Act) provides that the *Sherman Act* "shall not apply to conduct involving trade or commerce . . . with foreign nations," *15 USC § 6a* [*15 USCS § 6a*], but creates exceptions for conduct that significantly harms imports, domestic commerce, or American exporters. In this case, vitamin purchasers filed a class action alleging that vitamin manufacturers and distributors had engaged in a price-fixing conspiracy, raising vitamin prices in the United States and foreign countries, in violation of the *Sherman* and Clayton Acts. As relevant here, defendants **[****2]** (petitioners) moved to dismiss the suit as to the *foreign* purchasers (respondents), foreign companies located abroad, who had purchased vitamins only outside United States commerce. In dismissing respondents' claims, the District Court applied the FTAIA and found none of its exceptions applicable. The Court of Appeals reversed, concluding that the FTAIA's exclusionary rule applied, but so did its exception for conduct that has a "direct, substantial and reasonably foreseeable effect" on domestic commerce that "gives rise to a [*Sherman Act*] claim," *§§ 6a(1)(A), (2)*. Assuming that the foreign effect, *i.e.,* higher foreign prices, was independent of the domestic effect, *i.e.,* higher domestic prices, the court nonetheless concluded that the Act's text, legislative history, and policy goal of deterring harmful price-fixing activity made the lack of connection between the two effects inconsequential.

Held:

Where the price-fixing conduct significantly and adversely affects both customers outside and within the United States, but the adverse foreign effect is independent of any adverse domestic effect, the FTAIA exception does not apply, and thus, neither does the **[****3]** *Sherman Act,* to a claim based solely on the foreign effect. Pp. 161-175

(a) Respondents' threshold argument that the transactions fall outside the FTAIA because its general **[***232]** exclusionary rule applies only to conduct involving exports is rejected. The House Judiciary Committee changed the bill's original language from "export trade or export commerce," H. R. 5235, to "trade or commerce (other than import trade or import commerce)" deliberately to include commerce that did not involve American exports but was wholly foreign. Pp. 162-163

(b) The FTAIA exception does not apply here for two reasons. *First*, this Court ordinarily construes ambiguous statutes to avoid unreasonable interference with other nations' sovereign authority. This rule of construction reflects customary international law principles and cautions courts to assume that legislators take account of other nations' legitimate sovereign interests when writing American laws. It thereby helps the potentially conflicting laws of different nations work together in harmony. While applying America's antitrust laws to foreign conduct can interfere with a foreign nation's ability to regulate its own commercial affairs, courts have **[****4]** long held such application nonetheless reasonable, and hence consistent with prescriptive comity principles, insofar as the laws reflect a legislative effort to redress domestic antitrust injury caused by foreign anticompetitive conduct. However, it is not reasonable to apply American laws to foreign conduct insofar as that conduct causes independent foreign harm that alone gives rise to a plaintiff's claim. The risk of interference is the same, but the justification for the interference seems insubstantial. While some of the anticompetitive conduct alleged here took place in America, the higher foreign prices are not the consequence of any domestic anticompetitive conduct sought to be forbidden by Congress, which rather wanted to release domestic (and foreign) anticompetitive conduct from *Sherman Act* constraint when that conduct causes foreign harm. Contrary to respondents' claim, the comity concerns remain real as other nations have not in all areas adopted antitrust laws similar to this country's and, in any event, disagree dramatically about appropriate remedies. Respondents' alternative argument that case-by-case comity analysis is preferable to an across the board exclusion of **[****5]** foreign injury cases is too complex to prove workable. *Second*, the FTAIA's language and history suggest that Congress designed the Act to clarify, perhaps to limit, but not to expand, the *Sherman Act*'s scope as applied to foreign commerce. There is no significant indication that at the time Congress wrote the FTAIA courts would have thought the *Sherman Act* applicable in these circumstances, nor do the six cases on which respondents rely warrant a different conclusion. Pp. 163-173

(c) Respondents' additional linguistic arguments might show a natural reading of the statute, but the comity and history considerations previously discussed make clear that respondents' reading is not consistent with the FTAIA's basic intent. Their deterrence-based policy argument is also unavailing in light of the contrary arguments by the antitrust enforcement agencies. Pp. 173-175

(d) On remand, the Court of Appeals may consider whether respondents properly preserved their alternative argument that the foreign injury here was not in fact independent of the domestic effects; and, if so, it may consider and decide the related claim. P. 175

[*233]** *354 U.S. App. D.C. 257, 315 F.3d 338*, vacated and remanded. **[****6]**

Counsel: Stephen M. Shapiro argued the cause for petitioners.

R. Hewitt Pate argued the cause for the United States, as amicus curiae, by special leave of court.

Thomas C. Goldstein argued the cause for respondents.

Judges: Breyer, J., delivered the opinion of the Court, in which Rehnquist, C. J., and Stevens, Kennedy, Souter, and Ginsburg, JJ., joined. Scalia, J., filed an opinion concurring in the judgment, in which Thomas, J., joined. O'Connor, J., took no part in the consideration or decision of the case.

Opinion by: BREYER

Opinion

[*158] **[**2363]** Justice **Breyer** delivered the opinion of the Court.

LEdHN[1A][] [1A]***LEdHN[2A]***[] [2A]***LEdHN[3A]***[] [3A]***LEdHN[4A]***[] [4A]***LEdHN[5A]***[] [5A]*The Foreign Trade Antitrust Improvements Act of 1982* (FTAIA) ***HN1***[] excludes from the *Sherman Act*'s reach much anticompetitive conduct that causes only foreign injury. It does so by setting forth a general rule stating that the Sherman Act "shall not apply to conduct involving trade or commerce . . . with foreign nations." 96 Stat 1246, *15 USC § 6a* [*15 USCS § 6a*]. It then creates exceptions to the general rule, applicable where (roughly speaking) that conduct significantly harms imports, domestic commerce, or American exporters.

We here focus upon anticompetitive price-fixing activity that is in significant part foreign, that causes some domestic antitrust injury, and that independently causes separate foreign injury. We ask two questions about the price-fixing conduct and the foreign injury that it causes. First, does **[****7]** that conduct fall within the FTAIA's general rule excluding the Sherman Act's application? That is to say, does the price-fixing activity constitute "conduct involving trade or commerce . . . with foreign nations"? We conclude that it does.

[*159] Second, we ask whether the conduct nonetheless falls within a domestic-injury exception to the general rule, an exception that applies (and makes the Sherman Act nonetheless applicable) where the conduct (1) has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce, and (2) "such effect gives rise to a [Sherman Act] claim." *§§ 6a(1)(A), (2)*. We conclude that the exception does not apply where the plaintiff's claim rests solely on the independent foreign harm.

To clarify: The issue before us concerns (1) significant foreign anticompetitive conduct with (2) an adverse domestic effect and (3) an independent foreign effect giving rise to the claim. In more concrete terms, this case involves vitamin sellers around the world that agreed to fix prices, leading to higher vitamin prices in the United States and independently leading to higher vitamin prices in other countries such as Ecuador. ***HN2***[] We conclude that, in this scenario, **[****8]** a purchaser in the United States could bring a Sherman Act claim under the FTAIA based on domestic injury, but a purchaser in Ecuador could not bring a Sherman Act claim based on foreign harm.

I

The plaintiffs in this case originally filed a class-action suit on behalf of foreign and domestic purchasers of vitamins under, *inter alia*, § 1 of the Sherman Act, 26 Stat 209, as amended, *15 U.S.C. § 1* [*15 USCS § 1*], and §§ 4 and 16 of the Clayton Act, 38 Stat 731, 737, as amended, *15 U.S.C. §§ 15*, *26* [*15 USCS §§ 15*, *26*]. Their complaint alleged that petitioners, foreign and domestic vitamin manufacturers and distributors, had **[***234]** engaged in a price-fixing conspiracy, raising the price of vitamin products to customers in the United States and to customers in foreign countries.

As relevant here, petitioners moved to dismiss the suit as to the *foreign* purchasers **[**2364]** (the respondents here), five foreign vitamin distributors located in Ukraine, Australia, Ecuador, and Panama, each of which bought vitamins from petitioners **[*160]** for delivery outside the United States. *No. Civ. 001686TFH, 2001 U.S. Dist. LEXIS 20910, 2001 WL 761360, *4 (D. D. C., June 7, 2001)* (describing the relevant transactions as "wholly foreign"). Respondents **[****9]** have never asserted that they purchased any vitamins in the United States or in transactions in United States commerce, and the question presented assumes that the relevant "transactions occurr[ed] entirely outside U. S. commerce", Pet. for Cert. (i). The District Court dismissed their claims. *2001 U.S. Dist. LEXIS 20910, 2001 WL 761360, at *4*. It applied the FTAIA and found none of the exceptions applicable. *Id., 2001 U.S. Dist. LEXIS 20910 at *3-*4*. Thereafter, the *domestic* purchasers transferred their claims to another pending suit and did not take part in the subsequent appeal. *354 U.S. App. D.C. 257, 315 F.3d 338, 343 (CADC 2003)*.

A divided panel of the Court of Appeals reversed. *354 U.S. App. D.C. 257, 315 F.3d 338*. The panel concluded that the FTAIA's general exclusionary rule applied to the case, but that its domestic-injury exception also applied. It basically read the plaintiffs' complaint to allege that the vitamin manufacturers' price-fixing conspiracy (1) had "a direct, substantial, and reasonably foreseeable effect" on ordinary domestic trade or commerce, *i.e.*, the conspiracy brought about higher domestic vitamin prices, and (2) "such effect" gave "rise to a [Sherman Act] claim," *i.e.*, an injured *domestic* customer could have brought a Sherman Act suit, *15 USC §§ 6a(1)*, *(2)* [*15 USCS §§ 6a* **[****10]** *(1)*, *(2)*]. Those allegations, the court held, are sufficient to meet the exception's requirements. *315 F.3d at 341*.

The court assumed that the foreign effect, *i.e.*, higher prices in Ukraine, Panama, Australia, and Ecuador, was independent of the domestic effect, *i.e.*, higher domestic prices. *Ibid.* But it concluded that, in light of the FTAIA's text, legislative history, and the policy goal of deterring harmful price-fixing activity, this lack of connection does not matter. *Ibid.* The District of Columbia Circuit denied rehearing *en banc* by a 4-to-3 vote. App. to Pet. for Cert. 44a.

We granted certiorari to resolve a split among the Courts of Appeals about the exception's application. Compare *Den **[*161]** Norske Stats Oljeselskap As v. HeereMac Vof, 241 F.3d 420, 427 (CA5 2001)* (exception does not apply where foreign injury independent of domestic harm), with *Kruman v. Christie's Int'l PLC, 284 F.3d 384, 400 (CA2 2002)* (exception does apply even where foreign injury independent); *315 F.3d at 341* (similar).

II

LEdHN[1B][] [1B] ***LEdHN[2B]***[] [2B] ***LEdHN[3B]***[] [3B] ***LEdHN[4B]***[] [4B] ***LEdHN[5B]***[] [5B] ***HN3***[] The FTAIA seeks to make clear to American exporters (and to firms doing business abroad) that the **[****11]** Sherman Act does not prevent them from entering into business arrangements (say, joint-selling arrangements), however anticompetitive, as long as those arrangements adversely affect only foreign markets. See H. R. Rep. No. 97-686, pp 1-3, 9-10 (1982) (hereinafter House Report). It does so by removing from the Sherman Act's reach, (1) export activities and (2) other commercial **[***235]** activities taking place abroad, *unless* those activities adversely affect domestic commerce, imports to the United States, or exporting activities of one engaged in such activities within the United States.

The FTAIA says:

> ***HN4***[] "*Sections 1 to 7* of this title [the Sherman Act] shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless--
>
> **[**2365]** "(1) such conduct has a direct, substantial, and reasonably foreseeable effect--
>
> "(A) on trade or commerce which is not trade or commerce with foreign nations [*i.e.*, domestic trade or commerce], or on import trade or import commerce with foreign nations; or
>
> "(B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States [*i.e.* **[****12]** , on an American export competitor]; and
>
> **[*162]** (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.
>
> "If *sections 1 to 7* of this title apply to such conduct only because of the operation of paragraph (1)(B), then *sections 1 to 7* of this title shall apply to such conduct only for injury to export business in the United States." *15 U.S.C. § 6a* [*15 USCS § 6a*].

This technical language initially lays down a general rule placing *all* (nonimport) activity involving foreign commerce outside the Sherman Act's reach. It then brings such conduct back within the Sherman Act's reach *provided that* the conduct *both* (1) sufficiently affects American commerce, *i.e.*, it has a "direct, substantial, and reasonably foreseeable effect" on American domestic, import, or (certain) export commerce, *and* (2) has an effect of a kind that ***antitrust law*** considers harmful, *i.e.*, the "effect" must "giv[e] rise to a [Sherman Act] claim." *§§ 6a(1), (2)*.

We ask here how this language applies to price-fixing activity that is in significant part foreign, that has the requisite domestic effect, and that also has independent foreign **[****13]** effects giving rise to the plaintiff's claim.

III

LEdHN[2C][] [2C] Respondents make a threshold argument. They say that the transactions here at issue fall outside the FTAIA because the FTAIA's general exclusionary rule applies only to conduct involving exports. The rule says that the Sherman Act "shall not apply to conduct involving trade or commerce (other than import trade or import commerce) *with* foreign nations." *§ 6a* (emphasis added). The word "with" means *between* the United States and foreign nations. And, they contend, commerce between the United States and foreign nations that is not import commerce must consist of export commerce--a kind of commerce irrelevant to the case at hand.

[*163] The difficulty with respondents' argument is that the FTAIA originated in a bill that initially referred only to "export trade or export commerce." H. R. 5235, 97th Cong., 1st Sess., *§ 1* (1981). But the House Judiciary Committee subsequently changed that language to "trade or commerce (other than import trade **[***236]** or import commerce)." *15 U.S.C. § 6a* [*15 USCS § 6a*]. And it did so deliberately to include commerce that did not involve American exports but which was wholly foreign.

The House Report **[****14]** says in relevant part:

> "The Subcommittee's 'export' commerce limitation appeared to make the amendments inapplicable to transactions that were neither import nor export, *i.e.*, transactions within, between, or among other nations. . . . *Such foreign transactions should, for the purposes of this legislation, be treated in the same manner as export transactions*--that is, there should be no American antitrust jurisdiction absent a direct, substantial and reasonably foreseeable effect on domestic commerce or a domestic competitor. The Committee amendment therefore deletes references to 'export' trade, **[**2366]** and substitutes phrases such as 'other than import' trade. *It is thus clear that wholly foreign transactions as well as export transactions are covered by the amendment,* but that import transactions are not." House Report, at 9-10 (emphases added).

For those who find legislative history useful, the House Report's account should end the matter. Others, by considering carefully the amendment itself and the lack of any other plausible purpose, may reach the same conclusion, namely, that ***HN5***[] the FTAIA's general rule applies where the anticompetitive conduct at issue is foreign.

IV

LEdHN[3C][] [3C] ***LEdHN[4C]***[] [4C] We **[****15]** turn now to the basic question presented, that of the exception's application. Because the underlying antitrust **[*164]** action is complex, potentially raising questions not directly at issue here, we reemphasize that we base our decision upon the following: ***HN6***[] The price-fixing conduct significantly and adversely affects both customers outside the United States and customers within the United States, but the adverse foreign effect is independent of any adverse domestic effect. In these circumstances, we find that the FTAIA exception does not apply (and thus the *Sherman Act* does not apply) for two main reasons.

LEdHN[6][] [6] *First*, ***HN7***[] this Court ordinarily construes ambiguous statutes to avoid unreasonable interference with the sovereign authority of other nations. See, *e.g., McCulloch v. Sociedad Nacional de Marineros de Honduras, 372 U.S. 10, 20-22, 9 L. Ed. 2d 547, 83 S. Ct. 671 (1963)* (application of *National Labor Relations Act* to foreign-flag vessels); *Romero v. International Terminal Operating Co., 358 U.S. 354, 382-383, 3 L. Ed. 2d 368, 79 S. Ct. 468 (1959)* (application of Jones Act in maritime case); *Lauritzen v. Larsen, 345 U.S. 571, 578, 97 L. Ed. 1254, 73 S. Ct. 921 (1953)* (same). This rule of construction reflects principles **[****16]** of customary international law--law that (we must assume) Congress ordinarily seeks to follow. See *Restatement (Third) of Foreign Relations Law of the United States §§ 403(1), 403(2)* (1986) (hereinafter Restatement) (limiting the unreasonable exercise of prescriptive jurisdiction with respect to a person or activity having connections with another State); *Murray v. Schooner Charming Betsy, 6 U.S. 64, 2 Cranch 64, 2 L. Ed. 208 (1804)* ("[A]n act of Congress ought never to be construed to violate the law of nations if any other possible **[***237]** construction remains"); *Hartford Fire Insurance Co. v. California, 509 U.S. 764, 817, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* (Scalia, J., dissenting) (identifying rule of construction as derived from the principle of "prescriptive comity").

This rule of statutory construction cautions courts to assume that legislators take account of the legitimate sovereign interests of other nations when they write American laws. It thereby helps the potentially conflicting laws of different nations work together in harmony--a harmony particularly **[*165]** needed in today's highly interdependent commercial world.

LEdHN[3D][] [3D] No one denies that America's antitrust laws, when applied to foreign conduct, **[****17]** can interfere with a foreign nation's ability independently to regulate its own commercial affairs. But our ***HN8***[] courts have long held that application of our antitrust laws to foreign anticompetitive conduct is nonetheless reasonable, and hence consistent with principles of prescriptive comity, insofar as they reflect a legislative effort to redress *domestic* antitrust injury that foreign anticompetitive conduct has caused. See *United States v. Aluminum Co. of **[**2367]** America, 148 F.2d 416, 443-444 (CA2 1945)* (L. Hand, J.); 1 P. Areeda & D. Turner, ***Antitrust Law*** P 236 (1978).

But why is it reasonable to apply those laws to foreign conduct *insofar as that conduct causes independent foreign harm and that foreign harm alone gives rise to the plaintiff's claim?* Like the former case, application of those laws creates a serious risk of interference with a foreign nation's ability independently to regulate its own commercial affairs. But, unlike the former case, the justification for that interference seems insubstantial. See *Restatement § 403(2)* (determining reasonableness on basis of such factors as connections with regulating nation, harm to that nation's interests, extent **[****18]** to which other nations regulate, and the potential for conflict). Why should American law supplant, for example, Canada's or Great Britain's or Japan's own determination about how best to protect Canadian or British or Japanese customers from anticompetitive conduct engaged in significant part by Canadian or British or Japanese or other foreign companies?

LEdHN[3E][] [3E] ***LEdHN[5C]***[] [5C] ***LEdHN[7]***[] [7] We recognize that principles of comity provide Congress greater leeway when it seeks to control through legislation the actions of *American* companies, see *Restatement § 402*; and some of the anticompetitive price-fixing conduct alleged here took place in *America.* But the higher foreign prices of which the foreign plaintiffs here complain are not the consequence **[*166]** of any domestic anticompetitive conduct *that Congress sought to forbid*, for Congress did not seek to forbid any such conduct insofar as it is here relevant, *i.e.*, insofar as it is intertwined with foreign conduct that causes independent foreign harm. Rather Congress sought to *release* domestic (and foreign) anticompetitive conduct from Sherman Act constraints when that conduct causes foreign harm. Congress, of course, did make an exception where that conduct **[****19]** also causes domestic harm. See House Report 13 (concerns about American firms' participation in international cartels addressed through "domestic injury" exception). But any independent domestic harm the foreign conduct **[***238]** causes here has, by definition, little or nothing to do with the matter.

LEdHN[3F][] [3F] We thus repeat the basic question: Why is it reasonable to apply this law to conduct that is significantly foreign *insofar as that conduct causes independent foreign harm and that foreign harm alone gives rise to the plaintiff's claim?* We can find no good answer to the question.

The Areeda and Hovenkamp treatise notes that under the Court of Appeals' interpretation of the statute

> "a Malaysian customer could . . . maintain an action under United States law in a United States court against its own Malaysian supplier, another cartel member, simply by noting that unnamed third parties injured [in the United States] by the American [cartel member's] conduct would also have a cause of action. Effectively, the United States courts would provide worldwide subject matter jurisdiction to any foreign suitor wishing to sue its own local supplier, but unhappy with its own sovereign's provisions for **[****20]** private antitrust enforcement, provided that a different plaintiff had a cause of action against a different firm for injuries that were within U. S. [other-than-import] commerce. It does not seem excessively rigid to infer that Congress would not have **[*167]** intended that result." P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 273, pp 51-52 (Supp 2003).

We agree with the comment. We can find no convincing justification for the extension **[**2368]** of the Sherman Act's scope that it describes.

Respondents reply that many nations have adopted antitrust laws similar to our own, to the point where the practical likelihood of interference with the relevant interests of other nations is minimal. Leaving price fixing to the side, however, this Court has found to the contrary. See, *e.g., Hartford Fire, 509 U.S., at 797-799, 125 L. Ed. 2d 612, 113 S. Ct. 2891* (noting that the alleged conduct in the London reinsurance market, while illegal under United States antitrust laws, was assumed to be perfectly consistent with British law and policy); see also, *e.g.*, 2 W. Fugate, Foreign Commerce and the Antitrust Laws § 16.6 (5th ed. 1996) (noting differences between European Union and United States law on vertical restraints).

[**21]** Regardless, even where nations agree about primary conduct, say, price fixing, they disagree dramatically about appropriate remedies. The application, for example, of American private treble-damages remedies to anticompetitive conduct taking place abroad has generated considerable controversy. See, *e.g.*, 2 ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments 1208-1209 (5th ed. 2002). And several foreign nations have filed briefs here arguing that to apply our remedies would unjustifiably permit their citizens to bypass their own less generous remedial schemes, thereby upsetting a balance of competing considerations that their own domestic antitrust laws embody. *E.g.*, Brief for Government of Federal Republic of Germany et al. as *Amici Curiae* 2 (setting forth German interest "in seeing that German companies are not subject to the extraterritorial reach of the United States' antitrust laws by private foreign plaintiffs--whose injuries were sustained in transactions entirely outside United States commerce--seeking treble damages in private **[***239]** lawsuits against German companies"); Brief for Government **[*168]** of Canada as *Amicus Curiae* 14 ("treble damages remedy would supersede" Canada's **[****22]** "national policy decision"); Brief for Government of Japan as *Amicus Curiae* 10 (finding "particularly troublesome" the potential "interfere[nce] with Japanese governmental regulation of the Japanese market").

These briefs add that a decision permitting independently injured foreign plaintiffs to pursue private treble-damages remedies would undermine foreign nations' own antitrust enforcement policies by diminishing foreign firms' incentive to cooperate with antitrust authorities in return for prosecutorial amnesty. Brief for Government of Federal Republic of Germany et al. as *Amici Curiae* 28-30; Brief for Government of Canada as *Amicus Curiae* 11-14. See also Brief for United States as *Amicus Curiae* 19-21 (arguing the same in respect to American antitrust enforcement).

Respondents alternatively argue that comity does not demand an interpretation of the FTAIA that would exclude independent foreign injury cases *across the board.* Rather, courts can take (and sometimes have taken) account of comity considerations case by case, abstaining where comity considerations so dictate. Cf., *e.g.*, *Hartford Fire, supra, at 797, n. 24, 125 L. Ed. 2d 612, 113 S. Ct. 2891*; *United States v. Nippon Paper Industries Co., 109 F.3d 1, 8 (CA1 1997)*; **[****23]** *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287, 1294-1295 (CA3 1979)*.

In our view, however, this approach is too complex to prove workable. The Sherman Act covers many different kinds of anticompetitive agreements. Courts would have to examine how foreign law, compared with American law, treats not only price fixing but also, say, information-sharing agreements, patent-licensing price conditions, territorial product resale limitations, **[**2369]** and various forms of joint venture, in respect to both primary conduct and remedy. The legally and economically technical nature of that enterprise means lengthier proceedings, appeals, and more proceedings--to the point where procedural costs and delays could **[*169]** themselves threaten interference with a foreign nation's ability to maintain the integrity of its own antitrust enforcement system. Even in this relatively simple price-fixing case, for example, competing briefs tell us (1) that potential treble-damages liability would help enforce widespread anti-price-fixing norms (through added deterrence) and (2) the opposite, namely that such liability would hinder antitrust enforcement (by reducing incentives to enter amnesty **[****24]** programs). Compare, *e.g.*, Brief for Certain Professors of Economics as *Amici Curiae* 2-4 with Brief for United States as *Amicus Curiae* 19-21. How could a court seriously interested in resolving so empirical a matter--a matter potentially related to impact on foreign interests--do so simply and expeditiously?

We conclude that principles of prescriptive comity counsel against the Court of Appeals' interpretation of the FTAIA. Where foreign anticompetitive conduct plays a significant role and where foreign injury is independent of domestic effects, Congress might have hoped that America's antitrust laws, so fundamental a component of our own economic system, would commend themselves to **[***240]** other nations as well. But, if America's antitrust policies could not win their own way in the international marketplace for such ideas, Congress, we must assume, would not have tried to impose them, in an act of legal imperialism, through legislative fiat.

Second, the FTAIA's language and history suggest that Congress designed the FTAIA to clarify, perhaps to limit, but not *to expand* in any significant way, the Sherman Act's scope as applied to foreign commerce. See House Report, at **[****25]** 2-3. And we have found no significant indication that at the time Congress wrote this statute courts would have thought the Sherman Act applicable in these circumstances.

The Solicitor General and petitioners tell us that they have found no case in which any court applied the *Sherman Act* to redress foreign injury in such circumstances. Tr. of Oral Arg. 21; Brief for United States as *Amicus Curiae* 13; Brief **[*170]** for Petitioners 13; see also *Den Norske, 241 F.3d at 429* ("[W]e have found no case in which jurisdiction was found in a case like this--where a foreign plaintiff is injured in a foreign market with no injuries arising from the anticompetitive effect on a United States market"). And respondents themselves apparently conceded as much at a May 23, 2001, hearing before the District Court below. *2001 U.S. Dist. 20910, 2001 WL 761360, at *4*.

Nevertheless, respondents now have called to our attention six cases, three decided by this Court and three decided by lower courts. In the first three cases the defendants included both American companies and foreign companies jointly engaged in anticompetitive behavior having both foreign and domestic effects. See **[****26]** *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 595, 95 L. Ed. 1199, 71 S. Ct. 971 (1951)* (agreements among American, British, and French corporations to eliminate competition in the manufacture and sale of antifriction bearings in world, including United States, markets); *United States v. National Lead Co., 332 U.S. 319, 325-328, 91 L. Ed. 2077, 67 S. Ct. 1634 (1947)* (international cartels with American and foreign members, restraining international commerce, including United States commerce, in titanium pigments); *United States v. American Tobacco Co., 221 U.S. 106, 171-172,* ***[**2370]*** *55 L. Ed. 663, 31 S. Ct. 632 (1911)* (American tobacco corporations agreed in England with British company to divide world markets). In all three cases the plaintiff sought relief, including relief that might have helped to protect those injured abroad.

LEdHN[3G][] [3G] ***LEdHN[8]***[] [8] In all three cases, however, the plaintiff was the Government of the United States. ***HN9***[] A Government plaintiff, unlike a private plaintiff, must seek to obtain the relief necessary to protect the public from further anticompetitive conduct and to redress anticompetitive harm. And a Government plaintiff has legal authority broad enough to allow it to carry out this mission. *15 U.S.C. § 25* [*15 USCS § 25*]; **[****27]** see also, *e.g.*, *United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 334, 6 L. Ed. 2d 318, 81 S. Ct. 1243 (1961)* ("[I]t is well settled that once the Government has **[*171]** successfully borne the considerable burden of establishing a violation of law, all doubts as to the remedy are to be resolved in its favor"). Private plaintiffs, by way of contrast, are far less likely to be able to secure **[***241]** broad relief. See *California v. American Stores Co., 495 U.S. 271, 295, 109 L. Ed. 2d 240, 110 S. Ct. 1853 (1990)* ("Our conclusion that a district court has the power to order divestiture in appropriate cases brought [by private plaintiffs] does not, of course, mean that such power should be exercised in every situation in which the Government would be entitled to such relief"); 2 P. Areeda, H. Hovenkamp, & R. Blair, ***Antitrust Law*** PP 303d-303e, pp 40-45 (2d ed. 2000) (distinguishing between private and government suits in terms of availability, public interest motives, and remedial scope); Griffin, Extraterritoriality in U. S. and EU Antitrust Enforcement, 67 Antitrust L. J. 159, 194 (1999) ("[P]rivate plaintiffs often are unwilling to exercise the degree of self-restraint and consideration of foreign governmental **[****28]** sensibilities generally exercised by the U. S. Government"). This difference means that the Government's ability, in these three cases, to obtain relief helpful to those injured abroad tells us little or nothing about whether this Court would have awarded similar relief at the request of private plaintiffs.

Neither did the Court focus explicitly in its opinions on a claim that the remedies sought to cure only independently caused foreign harm. Thus the three cases tell us even less about whether this Court then thought that foreign private plaintiffs could have obtained foreign relief based solely upon such independently caused foreign injury.

LEdHN[3H][] [3H] Respondents also refer to three lower court cases brought by private plaintiffs. In the first, *Industria Siciliana Asfalit, Biutmi, S.p.A. v. Exxon Research & Engineering Co., No. 75 Civ. 5828-CSH, 1977 U.S. Dist. LEXIS 17851, 1977 WL 1353 (SDNY, Jan. 18, 1977)*, a District Court permitted an Italian firm to proceed against an American firm with a *Sherman Act* claim based upon a purely foreign injury, *i.e.*, an injury suffered in Italy. The court made clear, however, that the foreign injury was "*inextricably* ***[*172]*** *bound up with . . . domestic restraints of trade*," and **[****29]** that the plaintiff *"was injured . . . by reason of an alleged restraint of our domestic trade,"* *id., 1977 U.S. Dist. LEXIS 17851 at *11, *12* (emphasis added), *i.e.*, the foreign injury was dependent upon, *not independent of*, domestic harm. See Part VI, *infra.*

In the second case, *Dominicus Americana Bohio v. Gulf & Western Industries, Inc., 473 F. Supp. 680 (SDNY 1979)*, a District Court permitted Dominican and American firms to proceed against a competing American firm and the Dominican Tourist Information Center with a Sherman Act claim based upon injury apparently suffered in the Dominican Republic. The court, in finding the Sherman Act **[**2371]** applicable, weighed several different factors, including the participation of American firms in the unlawful conduct, the partly domestic nature of both conduct and harm (to American tourists, a kind of "export"), and the fact that the domestic harm depended in part upon the foreign injury. *Id., at 688*. The court did not separately analyze the legal problem before it in terms of independently caused foreign injury. Its opinion simply does not discuss the matter. It consequently cannot be taken as significant support for **[****30]** application of the Sherman Act here.

The third case, *Hunt v. Mobil Oil Corp., 550 F.2d 68, 72 (CA2 1977)*, involved a claim by Hunt, an independent oil producer with reserves in Libya, that other major oil producers in Libya and the Persian Gulf **[***242]** (the "seven majors") had conspired in New York and elsewhere to make it more difficult for Hunt to reach agreement with the Libyan Government on production terms and thereby eliminate him as a competitor. The case can be seen as involving a primarily foreign conspiracy designed to bring about foreign injury in Libya. But, as in *Dominicus,* the court nowhere considered the problem of independently caused foreign harm. Rather, the case was about the "act of state" doctrine, and the sole discussion of Sherman Act applicability--one brief paragraph--refers to other matters. *550 F.2d at 72*, and n 2. **[*173]** We do not see how Congress could have taken this case as significant support for the proposition that the Sherman Act applies in present circumstances.

The upshot is that no pre-1982 case provides significant authority for application of the Sherman Act in the circumstances we here assume. Indeed, a leading **[****31]** contemporaneous lower court case contains language suggesting the contrary. See *Timberlane Lumber Co. v. Bank of America, N.T. & S.A., 549 F.2d 597, 613 (CA9 1976)* (insisting that the foreign conduct's domestic effect be "sufficiently large to present a cognizable injury *to the plaintiffs*" (emphasis added)).

Taken together, these two sets of considerations, the one derived from comity and the other reflecting history, convince us that Congress would not have intended the FTAIA's exception to bring independently caused foreign injury within the Sherman Act's reach.

V

LEdHN[3I][] [3I] Respondents point to several considerations that point the other way. For one thing, the FTAIA's language speaks in terms of the Sherman Act's *applicability* to certain kinds of *conduct.* The FTAIA says that the Sherman Act applies to foreign "conduct" with a certain kind of harmful domestic effect. Why isn't that the end of the matter? How can the Sherman Act both *apply to the conduct* when one person sues but *not apply to the same conduct* when another person sues? The question of who can or cannot sue is a matter for other statutes (namely, the *Clayton Act*) to determine.

Moreover, the exception **[****32]** says that it applies if the conduct's domestic effect gives rise to "*a* claim," not to "*the plaintiff's* claim" or "*the* claim *at issue.*" *15 U.S.C. § 6a(2)* [*15 USCS § 6a(2)*] (emphases added). The alleged conduct here did have domestic effects, and those effects were harmful enough to give rise to "a" claim. Respondents concede that this claim is not their own claim; it is someone else's claim. But, linguistically **[*174]** speaking, they say, that is beside the point. Nor did Congress place the relevant words "gives rise to a claim" in the FTAIA to suggest any geographical limitation; rather it did so for a here neutral reason, namely, in order to make clear that the domestic effect must be an *adverse* (as opposed to a beneficial) effect. **[**2372]** See House Report 11 (citing *National Bank of Canada v. Interbank Card Asso., 666 F.2d 6, 8 (CA2 1981))*.

Despite their linguistic logic, these arguments are not convincing. Linguistically speaking, a statute can apply and not apply to the same conduct, depending upon other circumstances; and those other circumstances may include the nature of the lawsuit (or of the related underlying harm). It also makes linguistic **[***243]** sense **[****33]** to read the words "a claim" as if they refer to the "plaintiff's claim" or "the claim at issue."

At most, respondents' linguistic arguments might show that respondents' reading is the more natural reading of the statutory language. But those arguments do not show that we *must* accept that reading. And that is the critical point. The considerations previously mentioned--those of comity and history--make clear that the respondents' reading is not consistent with the FTAIA's basic intent. If the statute's language reasonably permits an interpretation consistent with that intent, we should adopt it. And, for the reasons stated, we believe that the statute's language permits the reading that we give it.

Finally, respondents point to policy considerations, namely, that application of the Sherman Act in present circumstances will (through increased deterrence) help protect Americans against foreign-caused anticompetitive injury. Petitioners and supporting enforcement-agency *amici,* however, have made important experience-backed arguments (based upon amnesty-seeking incentives) to the contrary. We cannot **[****34]** say whether, on balance, respondents' side of this empirically based argument or the enforcement agencies' side is correct. But we can say that the answer to the dispute is neither **[*175]** clear enough, nor of such likely empirical significance, that it could overcome the considerations we have previously discussed and change our conclusion.

For these reasons, we conclude that petitioners' reading of the statute's language is correct. That reading furthers the statute's basic purposes, it properly reflects considerations of comity, and it is consistent with Sherman Act history.

VI

LEdHN[4D][] [4D] We have assumed that the anticompetitive conduct here independently caused foreign injury; that is, the conduct's domestic effects did not help to bring about that foreign injury. Respondents argue, in the alternative, that the foreign injury was not independent. Rather, they say, the anticompetitive conduct's domestic effects were linked to that foreign harm. Respondents contend that, because vitamins are fungible and readily transportable, without an adverse domestic effect (*i.e.*, higher prices in the United States), the sellers could not have maintained their international price-fixing arrangement and respondents **[****35]** would not have suffered their foreign injury. They add that this "but for" condition is sufficient to bring the price-fixing conduct within the scope of the FTAIA's exception.

The Court of Appeals, however, did not address this argument, *315 F.3d at 341*, and, for that reason, neither shall we. Respondents remain free to ask the Court of Appeals to consider the claim. The Court of Appeals may determine whether respondents properly preserved the argument, and, if so, it may consider it and decide the related claim.

For these reasons, the judgment of the Court of Appeals is vacated, and the case is remanded for further proceedings consistent with this opinion.

[2373]** It is so ordered.

Justice **O'Connor** took no part in **[***244]** the consideration or decision of this case.

Concur by: SCALIA,

Concur

[*176] Justice **Scalia,** with whom Justice **Thomas** joins, concurring in the judgment.

I concur in the judgment of the Court because the language of the statute is readily susceptible of the interpretation the Court provides and because only that interpretation is consistent with the principle that statutes should be read in accord with the customary deference to the application of foreign countries' laws within their own **[****36]** territories.

GOLKA v. AWNINGS

Court of Appeal of California, Fourth Appellate District, Division Three

June 14, 2004, Filed

G031952

Reporter
2004 Cal. App. Unpub. LEXIS 5676 *

DANIEL J. GOLKA, Plaintiff and Appellant, v. ELEGANT AWNINGS, Defendant and Respondent.

Notice: [*1] NOT TO BE PUBLISHED IN OFFICIAL REPORTS. CALIFORNIA RULES OF COURT, RULE 977(a), PROHIBIT COURTS AND PARTIES FROM CITING OR RELYING ON OPINIONS NOT CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED, EXCEPT AS SPECIFIED BY RULE 977(B). THIS OPINION HAS NOT BEEN CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED FOR THE PURPOSES OF RULE 977.

Prior History: Appeal from a judgment of the Superior Court of Orange County. Super. Ct. No. 00CC07501. James P. Gray, Judge.

Disposition: Affirmed.

Core Terms

awnings, antitrust, franchise, buy, trade-marked, Chicken, economic power, market power, install, tying arrangement, patented, products, consumers, fast-food, mobile, seller, cases

Counsel: Daar & Newman and Barry R. Laubscher for Plaintiff and Appellant.

Tredway, Lumsdaine & Doyle, Michael A. Lanphere and Shannon M. Jenkins for Defendant and Respondent.

Judges: SILLS, P.J.; MOORE, J., FYBEL, J. concurred.

Opinion by: SILLS

Opinion

Seldom do we see an easier case in such a tough area of law.

This is a franchise tying case under state ***antitrust law***. Daniel Golka, the plaintiff, an installer of retractable awnings, was an installer for Home Base -- note, Home *Base*, which is in bankruptcy, not Home *Depot*, which is currently going great guns (at least judging by its advertising). Golka, however, refused to purchase awnings exclusively from defendant Elegant Awnings and was terminated for it. He then sued both Home **[*2]** Base and Elegant. With Home Base's bankruptcy, Golka and Home Base settled and he was allowed to press his claim against Elegant, a small manufacturer of awnings which, at the relevant time, had all of ten employees.

Two preliminary explanations are in order at this point in the opinion. First, a quick word on "tying" claims: They are the most common nonprice antitrust claims in franchise cases. (See Allan P. Hillman, *Franchise Tying Claims: Revolution or Just a "Kodak Moment"?* (2001) 21 Sum. Franchise L. J. 1, 1.) In their simplest form, of course, they present a self-explanatory model: To get a product you want (the *tying* product), you are forced to buy a product you don't want (the *tied* product). In the franchise context, however, the nomenclature can get confusing because the tying "product" is the abstract opportunity to become a franchisee, and the tied product is something that the would-be franchisee must buy to operate that franchise. Thus what we are really talking about is the market among entrepreneurs who want to operate franchised hamburger stands rather than the market among the much larger class of general consumers for hamburgers.

Second, an almost as **[*3]** quick word on proof of antitrust violations. There are two ways to establish antitrust violations -- the hard way and the easy way. The hard way is known as the "rule of reason" approach, which involves highly factual economic data about the anticompetitive effects of a given practice. (See *Chicago Board of Trade v. United States (1918) 246 U.S. 231, 238, 62 L. Ed. 683* [listing general factors needed to show violation under rule of reason, including "the nature of the restraint and its effect, actual or probable"].) At trial counsel for Golka readily acknowledged that he had not even attempted to produce evidence of an antitrust violation using the rule of reason approach, because the "economic analysis" would be an "unbearable task for a small plaintiff" like Golka.

The easy way is a "per se" violation, where a practice, e.g., price fixing, is *presumed* to be illegal because of its history of anticompetitive effects. (See *U.S. v. Realty Multi-List (5th Cir. 1980) 629 F.2d 1351, 1363* ["The per se rule is the trump card of ***antitrust law***. When an antitrust plaintiff successfully plays it he need only tally his score."].)

In *Jefferson Parish Hosp. Dist. No. 2 v. Hyde (1984) 466 U.S. 2, 80 L. Ed. 2d 2*, **[*4]** the United States Supreme Court made showing a per se violation in tying arrangements difficult, by requiring that a "substantial volume of commerce" or "market power" on the seller's (the ty-er's) part be shown. [1] (See *id. at pp. 16* ["we have refused to condemn tying arrangements unless a substantial volume of commerce is foreclosed thereby" and the "same strict rule is appropriate in other situations in which the existence of market power is probable"], 17-18 [when the "seller does not have either the degree or the kind of market power that enables him to force customers to purchase a second, unwanted product in order to obtain the tying product, an antitrust violation can be established only by" the rule of reason, i.e., "evidence of an unreasonable restraint on competition in the relevant market"], 18 ["In sum, any inquiry into the validity of a tying arrangement must focus on the market or markets in which the two products are sold, for that is where the anticompetitive forcing has its impact."]; see also *Lloyd Design Corp. v. Mercedes Benz-of North America, Inc. (1998) 66 Cal.App.4th 716, 721* ["'sufficient economic power'" required to **[*5]** make tying arrangements per se illegal under *Business and Professions Code section 16727*].)

Commentators have noted that in the wake of *Jefferson Parish*, antitrust tying claims have dried up except in situations where the seller of the tying product has a very large share of the relevant market or has a unique product. (See Allan P. Hillman, *Franchise Tying Claims: Revolution or Just a "Kodak Moment"?, supra,* 21 Sum. Franchise L. J. at p. 31 **[*6]** ["But under Jefferson Parish, except in the most extraordinary circumstances involving a patented or 'unique' product, unless the seller (or franchisor) has more than a 30 percent share of the relevant market for the tying (desired) product, the courts will not presume anticompetitive effects of the tie on the market for the tied (undesired) product, and the per se rule will not apply."].)

So now we come to the appeal before us. After the parties rested, the trial judge granted a motion for nonsuit on Golka's antitrust cause of action because of the absence of evidence that Home *Base* had any appreciable market power in the market for home awnings, much less the market for what are in effect home awning installation franchises. Furthermore, the trial judge noted that there was no evidence that Home Base's "SFI" program -- for

---

[1] *Jefferson Parish* is not mentioned in appellant Golka's briefs. There are two reasons we know the omission was deliberate: One, Golka's counsel is clearly extremely learned in ***antitrust law***, and would naturally know of the case in any event; and, two, it was discussed at oral argument on the nonsuit motion which led to this appeal. We presume that he has not discussed the case on the assumption that it is inapplicable because it does not involve franchisors with valuable trade names, a point we discuss in a few more paragraphs.

"sell, furnish and install," geared to contractors who wanted to install awnings sold by Home Base -- was in any sense a trademark.

The jury disposed of the remainder of Golka's claims against Elegant (for violation of the Unfair Practices Act and inducing Home Base to breach its contract with Golka). This appeal involves only the nonsuit of the antitrust **[*7]** claim.

We affirm. Clearly *Jefferson Parish* is dispositive. The absence of any evidence that a substantial volume of commerce was affected (or potentially affected) by a requirement that awning installation contractors who wanted to work out of Home Base hardware stores had to use Elegant awnings is fatal. There was no evidence that Home Base had any sort of perceptible market share among would-be installers of retractable awnings, or home awnings themselves, for that matter. (After all, there is obviously going to be some corrolation between the market for McDonald's franchises and the market for Big Macs.) Indeed, Home Base was two years away from bankruptcy at the time it terminated Golka from its program.

At trial Golka's counsel argued that *Jefferson Parish* was inapplicable because it didn't involve a trade name (true, it involved anesthesiological services at a hospital), further asserting that under *Siegel v. Chicken Delight, Inc. (9th Cir. 1971) 448 F.2d 43*, the existence of a trade name creates a presumption of economic power, a point which is the centerpiece of the appeal before us. We reject application of *Siegel* for no less than five reasons. **[*8]**

In the first place, *Siegel* was decided prior to *Jefferson Parish*, which did not limit its discussion of tying cases to those where no trade names were involved. Thus it is not surprising that the case has not been followed by federal courts after *Jefferson Parish*. (E.g., *Valley Products Company v. Landmark (6th Cir. 1997) 128 F.3d 398, 405* [*Siegel* no longer considered reliable]; *Tominaga v. Shepard (C.D. Cal. 1988) 682 F. Supp. 1489, 1494* [noting academic criticism].)

In the second place, the idea that trademarks by themselves can be the basis of per se violations has been disowned by the very court that decided *Siegel*. (See *Mozart v. Mercedes-Benz of North America, Inc. (9th Cir. 1987) 833 F.2d 1342, 1346* [even a "prestigious trademark is not itself persuasive evidence of economic power"].)

In the third place, the idea that a trade name *by itself* is enough to create a presumption of economic power is easily shown to be untrue. Just ask any former Yugo dealer.

In the fourth place, *Siegel's* internal analysis is flawed. The case involved the requirement that franchisees buy certain kitchen equipment **[*9]** and dry-mix food items to operate a fast-food chicken franchise. The discussion of economic power is found on pages 49 through 51 of the opinion. Most of that discussion is merely devoted to refuting the idea that market *dominance* is required for a per se violation, a point with which it is compatible with *Jefferson Parish* but otherwise establishes nothing. (Even if a seller lacks market *dominance* it can still have *substantial* market power.)

The *Siegel* court next says that it could "hardly be denied" that the Chicken Delight "trade-mark is distinctive" and Chicken Delight "possesses goodwill and public acceptance unique to it and not enjoyed by other fast food chains." (*Siegel, supra, 448 F.2d at p. 50*.) Bookmark that thought for a second. The phrase "Good will and public acceptance unique" overstates the "unique" desirability of the product at issue in *Siegel*. No doubt there are a few connoisseurs of fast-food chicken out there, but the *Siegel* court could not logically have been talking about them. If there is any "unique" goodwill to a Chicken Delight franchise, it is to the devotees of fast-food *Chicken Delight* chicken -- the sort **[*10]** of folks who whose brand loyalty will cause them to drive past the Popeye's and KFC.

Next, the *Siegel* decision makes its fatal wrong turn. The court notes that "sufficient economic power" is presumed if the tying product is "patented or copyrighted" (*Siegel, supra, 448 F.2d at p. 50*) and from that observation leaps to the conclusion that there is "no reason why the presumption that exists in the case of the patent and copyright does not equally apply to the trade-mark." (*Ibid*.)

Arguing from a "no reason why not" position is always tenuous, because it carries an insinuated, unarticulated preference not overtly disclosed by the arguer. Deconstructed, the logic goes like this: "This idea is so good that unless there is a reason not to do it, let's do it, and since we don't see any reason not to do it, we should do it." It is a logic of exhaustion of alternatives, and it necessarily collapses upon the discovery of any good contrary reason not to select the insinuated course of action.

And as regards the *Siegel* case, there is at least one very good reason that did not occur to the Siegel panel not to apply the rule which governs patented and copyrighted **[*11]** products to trade-marked products: The latter do *not* involve truly "unique" products in the way that the former do.

Let's take a copyrighted product -- say books. People don't buy "books" just to be buying books (unless, to paraphrase an old joke, they are literally buying "self-respect," i.e., books just to put on the shelf). They buy specific books. If you are looking to buy David McCullough's book on John Adams, you want to buy *that* book. Only in very rare cases might Richard Brookhiser's book on Alexander Hamilton serve as a market substitute (e.g., you have to do a book report on an American founding father); in most cases it won't do at all.

But when it comes to trade-marked products, the possibility of market substitutes are much wider, and therefore the "unique" value of the trade-marked product tends to be much less important relative to the "unique" nature of a patented or copyrighted product. Accordingly, consumer demand for a trade-marked product is likely to be much less intense than it is for patented or copyrighted products. Buyers of McCullough's book generally want only McCullough's book, but few people are so droolingly loyal to a trade mark that they will **[*12]** go hungry rather than accept a KFC drumstick if a Chicken Delight drumstick is unavailable.

And finally, even if despite all we have said, *Siegel* were still a viable case, it is distinguishable from the one before us. Fast-food implicates a different set of dynamics than retractable awnings, where consumer brand preferences are, if anything, quite *un*intense indeed. There may indeed be a few people whose fealty to Burger King is so strong that their lips will never ever touch a Big Mac, but *nobody* has that kind of subjective brand preference for awnings. When it comes to awnings, customers generally have objective sets of preferences: They want the cheapest, or the longest lasting, or what is available, or the right color, or whatever suits their needs under the circumstances. Compare that with the kind of subjective preferences that might, under *Siegel*, argubly lead a fast-food customer to bypass 17 secret herbs and spices in favor of Chicken Delight's "special batter."

At oral argument before this court Golka stressed another case, *Suburban Mobile Homes, Inc. v. AMFAC Communities, Inc. (1980) 101 Cal. App. 3d 532, 161 Cal. Rptr. 811*. *Suburban* **[*13]** , however, cannot be considered good law in the wake of *Jefferson Parish*, which it antedated by about four years.

Insofar as the market power element of antitrust tying law is concerned, *Suburban* clearly articulated a rule at odds with *Jefferson Parish*. Specifically, the *Suburban* court relied on a model of antitrust tying law in which the ty-er need only have "sufficient economic power in the tying market to coerce the purchase of the tied product." (*Suburban, supra, 101 Cal. App. 3d at p. 542*.) And, as *Suburban* stated two pages later, sufficient economic power could be found even if only "some buyers in the market" are affected. (*Id. at p. 544*.) Contrast that model with the substantially higher thresholds for market power quoted above from *Jefferson Parish*. The clincher is that *Suburban* itself specifically looked to then-existent federal law to develop its model. (See *id. at p. 540* ["federal cases interpreting the Sherman Act are applicable to problems arising under the Cartwright Act"].)

Moreover, even if *Suburban* were currently viable, it is easily distinguishable from the case at hand. *Suburban* **[*14]** involved a truly scarce, indeed "unique" resource -- land sites in a "five-star" mobile home park in Daly City, i.e., within commuting distance of San Francisco. The tying arrangement was that of 501 sites in a newly developed "five-star" mobile home park, 288 were exclusively reserved for four dealers (57 percent of the lots). Given the geography involved, one could practically take judicial notice that if a dealer wasn't one of the favored four, not only would *its* sales be hurt, but there would be a relatively huge impact on the market for the sales of mobile homes in the San Francisco area. After all, how many people in living in the San Francisco area in the early 1970's were prepared to spend a large sum of money on a mobile home *unless* they had access to a coveted spot in a well-maintained mobile home park -- it would be a task more daunting than trying to find a parking spot on Columbus Street in North Beach. In a small sailing pond you can have a big effect if you cordone off about 57 percent of it for just your friends. Contrast that situation with the market for awnings in Southern California. Awnings are available to consumers at every corner hardware store and any **[*15]** number of other places. Correspondingly, the market for awning *installers* is not significantly affected if one moribund hardware store chain enters into a tying arrangement with one small awning manufacturer.

Our analysis obviates the need to consider another question which often dominates antitrust tying analysis, the one-product two-product distinction: The idea is that if you are only dealing with a product that is an integrated whole, like a Mercedes Benz, consumers don't care about the right to component parts like their own floormats. Thus there is no tying to begin with if the company decides to make floormats standard equipment instead of being an optional accessory. (E.g., *Lloyd Design Corp. v. Mercedes-Benz of North America, Inc., supra, 66 Cal.App.4th at p. 721* [no illegal tying arrangement where customers are "forced" to buy Mercedes' cars standard floormats].) Here, since we conclude that the absence of evidence of market power on the part the "franchisor" is dispositive, there is no need to address the unitary product issue.

The judgment is affirmed. Respondent shall recover its costs on appeal.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Sherman Act, Claims**

A successful claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, requires proof that (1) a contract, combination, or conspiracy between two or more persons (2) to restrain interstate commerce in the relevant market (3) caused an injury of the sort Congress intended to prevent by enacting the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > Restraints of Trade

HN6[] **Antitrust & Trade Law, Sherman Act**

An antitrust claim requires an improper purpose, an anticompetitive effect, and an effect on interstate commerce. The interstate commerce requirement is jurisdictional in antitrust suits, and the trial court must assure itself from allegations in the complaint that it is not about to hear a case that it is not supposed to have the power to hear. In diversity suits, for example, the complaint must allege the citizenship of the parties and the amount in controversy, not just that the claim is within the diversity jurisdiction. But when the jurisdictional prerequisite is effect on interstate commerce, the pleading of a conclusion should be good enough, since the number of cases that fail at that threshold has become minuscule.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN7[] **Per Se Rule & Rule of Reason, Per Se Violations**

An antitrust conspiracy requires an agreement between two or more persons to restrain trade in a given market. Usually, as in a per se violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, the conspirators are direct competitors in the market. Sometimes, however, as in the case of a clothing manufacturer attempting to eliminate competition among retailers of its products, a single individual may attempt, by conspiring with market competitors, to control a market from the outside. In the latter case, the non-market conspirator must have some kind of "market power," or ability to raise prices above a competitive level without losing its business, to be found capable of restraining trade in the relevant market.

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > Takeovers & Tender Offers > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

An antitrust injury is an injury caused by the kind of conduct that the antitrust laws seek to prevent. The antitrust injury doctrine was created as a way to screen out complaints by competitors and others who were hurt not by anticompetitive practices, but by productive efficiencies, higher output, and lower prices, the very things antitrust laws are designed to encourage. Thus, a plaintiff competitor who seeks a kind of relief that would injure customers, such as less competition or higher prices for his product, does not suffer antitrust injury. Similarly, a defendant competitor who undertakes to squeeze out his market competitors by underbidding them or increasing output or discounting prices does not cause an antitrust injury, unless his activities are undertaken in concert with another competitor and involve anticompetitive conduct like fixing prices, shorting supply, or tying.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN9[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Price-fixing, in general terms, occurs when competitors in a given market get together and agree to sell at a uniform price.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN10[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Bid-rigging has a more specialized meaning in ***antitrust law*** and is analogous to bid rotation. Bid rigging or bid rotation occurs when two or more competitors agree which of them should be the low bidder for a particular job, and the others submit higher bids to make sure the designated bidder wins.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN11[] **Heightened Pleading Requirements, Fraud Claims**

To state a cause of action under the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, a plaintiff must allege with particularity (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity, and that plaintiffs' injury occurred "by reason of" defendants' racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN12[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

To recover under the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, a plaintiff must show some direct relation between the injury asserted and the injurious conduct alleged. Thus, a plaintiff who complains of harm flowing merely from the misfortunes visited upon a third person by defendant's acts is generally said to stand at too remote a distance to recover. For plaintiff to satisfy RICO's requirement of proximate causation, it must allege a relation between its injury and defendant's violation that is neither indirect nor remote.

Opinion

MEMORANDUM OPINION AND ORDER

Before the court are defendants' motions to dismiss plaintiffs' Alpha School Bus Co.'s ("Alpha") and Cook-Illinois **[*2]** Corp.'s ("Cook-Illinois") Third Amended Complaint for failure to state a claim and for lack of subject matter jurisdiction. Addressing the jurisdictional arguments first, *Baker v. IBP, Inc., 357 F.3d 685, 687* ("subject matter jurisdiction is the first question . . . in all suits filed in federal court"), defendants Southwest Transit, Inc. ("Southwest"), Southwest Leasing, L.L.C. ("Southwest Leasing"), Chicago Bear Bones Leasing, Inc. ("Bear Bones Leasing"), Barbara Ann Hackel, Michael Wagner, and Leroy Meister contend that this court lacks jurisdiction because plaintiffs fail to establish a violation of federal law in their allegations that defendants violated the Sherman Act, *15 U.S.C. § 1, et seq.*, and the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1961-68*. [1] For the reasons that follow, defendants' motions to dismiss are granted.

[1] The remaining named defendants in this case, Sunrise Southwest, L.L.C., and Sunrise Transportation, Inc., filed a motion to dismiss the state law claims against them for failure to state a claim. However, since they were not named in plaintiffs' Sherman Act or RICO claims, they did not join the other defendants in moving to dismiss the claims for lack of jurisdiction. Therefore, unless otherwise specified, all references to "defendants" in this case refer only to Southwest, Southwest Leasing, Bear Bones Leasing, Hackel, Wagner, and Meister.

[*3] I. Background

Alpha is a school bus contractor located in Crestwood, Illinois, and is a wholly owned subsidiary, along with twelve other subsidiaries licensed as interstate carriers of passengers, of Cook-Illinois. Alpha provides student transportation services for a number of school districts in the greater Chicago and Cook County, Illinois, area. At issue in this case are the 2003-2006 contracts for busing services for the Chicago Board of Education non-public routes, Southwest Cook County Cooperative Association for Special Education, and Oak Lawn School District 218 (collectively, the "School Bus Contracts"). In the spring of 2003, when Alpha prepared and submitted its bids to the Chicago Board of Education, Southwest Cook County Cooperative Association for Special Education, and Oak Lawn Board of Education (collectively, the "School Districts"), Michael Wagner and Leroy Meister were employed by Alpha as General Manager and Director of Operations, respectively. According to Alpha, both men had access to confidential Alpha business information, including details of Alpha's past and present contracts with the School Districts (for many years prior to 2003, Alpha provided **[*4]** busing services to all three districts), and both helped prepare Alpha's bid for the School Bus Contracts for 2003-2006.

In addition to incumbent contract holder Alpha, a number of other transportation companies also bid for the 2003-2006 School Bus Contracts; the winner was Southwest. Southwest is an Illinois corporation, owned and controlled by Barbara Hackel, that provides busing services in competition with Alpha. Southwest Leasing, an Illinois limited liability company, and Bear Bones Leasing, a *de jure or de facto* Illinois corporation, are owned and controlled by Wagner and operate to lease buses to Southwest. Plaintiffs allege that Hackel, Wagner, and Meister contracted to form Southwest and the leasing companies, and that together they conspired to underbid Alpha for the School Bus Contracts and eliminate Alpha as a competitor in the special education student transportation business.

According to the complaint, Wagner and Meister were still employed by Alpha when they stole Alpha's confidential bid information and gave it to Hackel and Southwest, who then used it to prepare Southwest's bid for the School Bus Contracts. As a result of Wagner's, Meister's, Hackel's and **[*5]** Southwest's allegedly unlawful conduct, Southwest submitted a lower bid to the School Districts and won the 2003-2006 contracts. Soon after the contracts were awarded to Southwest, Wagner and Meister notified Alpha of their intent to retire and began working for Southwest and the leasing company defendants.

In summer of 2003 Plaintiffs filed suit in federal court, arguing that defendants' conduct amounted to forbidden restraint of trade under the federal and state antitrust laws, civil conspiracy, violation of Illinois trade secret laws, tortious interference with business opportunity, breach of fiduciary duty, racketeering, and fraudulent transfer of assets. Defendants moved to dismiss all claims against them. Because federal jurisdiction in this case depends on the existence of a claim under either the Sherman Act or RICO, the court's opinion will address these claims first.

II. Discussion

A. Standard of Review

HN1[] In considering a motion to dismiss for lack of jurisdiction, the court must accept as true all well-pleaded factual allegations and draw all reasonable inferences in favor of the plaintiff. *Alicea-Hernandez v. Catholic Bishop of Chicago, 320 F.3d 698, 701 (7th Cir. 2003).* **[*6]** Plaintiffs here assert that federal jurisdiction exists because defendants violated the Sherman Act, *15 U.S.C. § 1*, and RICO, *18 U.S.C. § 1962*. *See* *28 U.S.C. § 1337*. Defendants, however, contend that this court is without jurisdiction because plaintiffs have failed to state a claim under either federal statute.

Plaintiffs' federal claims are subject to two different standards of pleading under the Federal Rules of Civil Procedure. ***HN2***[] For plaintiffs' antitrust claim to survive, it must provide a short and plain statement which demonstrates that plaintiffs suffered an injury caused by defendants' restraint of interstate commerce. *Midwest Gas Servs. v. Indiana Gas Co., 317 F.3d 703, 711 (7th Cir. 2003)*; *FED. R. CIV. P. 8(a)*. Importantly, plaintiffs' injury must be an "antitrust injury -- which is to say, injury by reason of those things that make the practice unlawful, such as reduced output and higher prices," as opposed to mere economic loss. *Gypsum Co. v. Indiana Gas Co., 350 F.3d 623, 626-27 (7th Cir. 2003)*; *Loeb Indus. v. Sumitomo Corp., 306 F.3d 469, 481 (7th Cir. 2001).* **[*7]** ***HN3***[] For plaintiffs' RICO claims alleging predicate acts of mail and wire fraud to survive, they must describe with particularity "the identity of the person who made the misrepresentation, the time, place, and content of the misrepresentation, and the method by which the misrepresentation was communicated to the plaintiff." *Slaney v. International Amateur Athletic Fed'n, 244 F.3d 580, 599 (7th Cir. 2001)*; *FED. R. CIV. P. 9(b)*. A successful RICO claim also requires a plaintiff to show that his injury was proximately caused by defendants' racketeering activity. *Holmes v. Securities Investor Prot. Corp., 503 U.S. 258, 268-69, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*. Since plaintiffs fail to state a claim under either federal law and they assert no other basis for federal jurisdiction, this case must be dismissed pursuant to *FED. R. CIV. P. 12(h)(3)*.

B. Sherman Act Antitrust Claim

Section 1 of the Sherman Act, which defendants' act of underbidding Alpha for the School Bus Contracts by using Alpha's confidential information is alleged to violate, ***HN4***[] forbids conspiracies in restraint of **[*8]** trade or commerce among the states or with foreign nations. *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 654 (7th Cir. 2002)*. Though all an antitrust claim need allege to survive a motion to dismiss is that a plaintiff suffered an injury due to a defendant's unlawful restraint of interstate commerce, *Midwest Gas, 317 F.3d at 711*, it is quite possible for a plaintiff to plead himself out of court by alleging facts that could not under any circumstances constitute an antitrust violation, *Hammes v. AAMCO Transmissions, Inc., 33 F.3d 774, 782 (7th Cir. 1994)*. Plaintiffs in this case have done exactly that.

HN5[] A successful claim under *§ 1 of the Sherman Act* requires proof that (1) a contract, combination, or conspiracy between two or more persons (2) to restrain interstate commerce in the relevant market (3) caused an injury of the sort Congress intended to prevent by enacting the antitrust laws. *See* *Denny's Marina Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*; *Hammes, 33 F.3d at 782*. Defendants here argue that plaintiffs fail to establish a *§ 1* violation in all respects, **[*9]** including (1) failure to plead a sufficient nexus with interstate commerce, (2) failure to show a conspiracy among market competitors, and (3) failure to allege an antitrust injury.

Though not artfully pleaded, plaintiffs' allegations of a nexus with interstate commerce are sufficient to withstand defendants' motions to dismiss. ***HN6***[] An antitrust claim requires an improper purpose, an anticompetitive effect, and an effect on interstate commerce. *See* *BCB Anesthesia Care v. Passavant Memorial Area Hosp. Ass'n, 36 F.3d 664, 666 (7th Cir. 1994)*. The interstate commerce requirement is jurisdictional in antitrust suits, *United Phosphorus, Ltd. v. Angus Chem. Co., 322 F.3d 942, 948 (7th Cir. 2003)*, and the court must assure itself from allegations in the complaint that it is not about to hear a case that it is not supposed to have the power to hear. *Hammes, 33 F.3d at 778*. In diversity suits, for example, the complaint must allege the citizenship of the parties and the amount in controversy, not just that the claim is within the diversity jurisdiction. *Id.* "But when the jurisdictional prerequisite is effect on interstate commerce, the pleading of a conclusion **[*10]** should be good enough, since the number of cases that fail at that threshold has become minuscule." *Id.* Here, plaintiffs claim that "Student transportation services [including the School Bus contracts at issue] . . . and the competitive bidding process to let those contracts, affect interstate commerce." Given the low threshold for satisfying the interstate commerce nexus in antitrust suits, *see* *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 333, 114 L. Ed. 2d 366, 111 S. Ct. 1842 (1991)*, and liberal federal pleading standards, plaintiffs' allegations in this case are sufficient to establish this court's jurisdiction.

Defendants also argue that plaintiffs' Sherman Act claim must be dismissed for failure to allege a conspiracy. Plaintiffs contend that defendants Wagner, Meister, Southwest Leasing, and Bear Bones Leasing conspired with Hackel and Southwest to restrain trade. The complaint also asserts that Wagner and Meister were employed by Alpha at the time of the alleged conspiracy. It appears from the complaint, and plaintiffs' brief confirms, that Wagner and Meister acted solely to benefit Southwest, Hackel, and the leasing defendants. Thus, defendants argue, Wagner and Meister **[*11]** are either agents acting on behalf Southwest and therefore cannot conspire with their principal, or are employees of Alpha and therefore Alpha cannot recover for damages incurred through its own conspiracy with Southwest. Plaintiffs' response to defendants' argument is confounding, as it argues simultaneously that Wagner and Meister are not agents of Southwest because they are Alpha employees and that Alpha is not responsible for their actions because Wagner and Meister were acting on behalf of Southwest. The court need not decipher this illogic, however, because as explained below, there is a possibility, however slight, that the complaint alleges a conspiracy between Southwest and the leasing defendants to restrain trade.

HN7[] An antitrust conspiracy requires an agreement between two or more persons to restrain trade in a given market. *Denny's Marina, 8 F.3d at 1220*. Usually, as in a *per se* violation of *§ 1*, the conspirators are direct competitors in the market. Sometimes, however, as in the case of a clothing manufacturer attempting to eliminate competition among retailers of its products, a single individual may attempt, by conspiring with market competitors, **[*12]** to control a market from the outside. *See, e.g., 42nd Parallel North v. E Street Denim Co., 286 F.3d 401 (7th Cir. 2002)*. In the latter case, the non-market conspirator must have some kind of "market power," or ability to raise prices above a competitive level without losing its business, to be found capable of restraining trade in the relevant market. *Id. at 404-5*.

Of all the named defendants in this case, only Southwest actually competes with Alpha in the relevant market. The complaint does not specifically define the market, but the court presumes from facts therein that it is the market for special education student transportation services in the greater Chicago and Cook County, Illinois, area. Though plaintiffs charge the individual defendants, Meister and Wagner, and the leasing company defendants, Southwest Leasing and Bear Bones Leasing, with conspiring to restrain trade, none of these defendants provides student transportation services and none of them is alleged to have the kind of market power that would enable them to control competition in the busing market. If this is true, only Alpha and Southwest would be capable of the "bid-rigging" **[*13]** and "price-fixing" conduct complained of here, and Alpha would have no cause of action to recover for its own illegal activities. *See 42nd Parallel North, 286 F.3d at 405* ("antitrust laws protect competition, not competitors").

But the court cannot draw this inference against plaintiffs in ruling on a motion to dismiss. Plaintiffs allege repeatedly that "Wagner, Meister, Chicago Bear Bones and Southwest Leasing together with Hackel and Southwest" conspired to restrain trade. Since the court must take this and other facts in the complaint as true, and since plaintiffs need not allege the market power of potential conspirators to state a claim under *§ 1*, the court must assume that the individual and leasing company defendants were in fact capable of conspiring with Southwest and Hackel to commit the alleged antitrust violation.

Though the court finds that plaintiffs have pleaded an interstate commerce nexus and a conspiracy, their antitrust claim still must fail because plaintiffs have not alleged an antitrust injury. ***HN8***[] An antitrust injury is an injury caused by the kind of conduct that the antitrust laws seek to prevent. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977).* **[*14]** The antitrust injury doctrine was created as a way to screen out complaints by competitors and others who were hurt not by anticompetitive practices, but by productive efficiencies, higher output, and lower prices -- the very things antitrust laws are designed to encourage. *Gypsum, 350 F.3d at 627*. Thus, a plaintiff competitor who seeks a kind of relief that would injure customers, such as less competition or higher prices for his product, does not suffer antitrust injury.*Id.* Similarly, a defendant competitor who undertakes to squeeze out his market competitors by underbidding them or increasing output or discounting prices does not cause an antitrust injury, *unless* his activities are undertaken in concert with another competitor and involve anticompetitive conduct like fixing prices, shorting supply, or tying.

In the instant case, defendants' acts of pilfering Alpha's proprietary information in order to undercut Alpha's bid and win the School Bus Contracts is not the kind of wrongful conduct that the antitrust laws forbid. Though plaintiffs label defendants' activities as "price-fixing" and "bid-rigging," two practices that are considered *per se* violations **[*15]** of *§ 1*, the conduct alleged in the complaint belies such description. ***HN9***[] Price-fixing, in general terms, occurs when competitors in a given market get together and agree to sell at a uniform price. *Khan v. State Oil Co., 93 F.3d 1358, 1361 (7th Cir. 1996) rev'd on other grounds, 522 U.S. 3, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)*; *United States v. Heffernan, 43 F.3d 1144, 1149 (7th Cir. 1994)*. ***HN10***[] Bid-rigging has a more specialized meaning in ***antitrust law*** and is analogous to bid rotation. *Heffernan, 43 F.3d at 1150*. Bid rigging or bid rotation occurs when two or more competitors agree which of them should be the low bidder for a particular job, and the others submit higher bids to make sure the designated bidder wins. *Id. at 1146*.

What happened in this case, at least as far as the complaint describes, amounts neither to price-fixing nor bid-rigging. *See* *BCB Anesthesia Care, 36 F.3d at 667* ("pinning a label on conduct, such as 'tying' or 'boycott,' is not enough if the conduct does not necessarily have the pernicious effect the label suggests"). Plaintiffs allege that Meister and Wagner secretly conspired **[*16]** with Hackel and Southwest to use Alpha's confidential bid information, which Meister and Wagner compiled while still working for Alpha, in preparing Southwest's bid for the School Bus Contracts. This conduct is not price-fixing because there is no allegation that any two market competitors (and there are only two actual market competitors named in this case, Alpha and Southwest) conspired to submit noncompetitive bids or to sell their student transportation services at a uniform price. *See* *United States v. Brighton Bldg. & Maint. Co., 598 F.2d 1101, 1106 (7th Cir. 1979)*.

Nor is the complained-of conduct bid-rigging since there is no allegation that Alpha or Southwest agreed in advance of submitting their bids that one of them would offer a higher bid in order for the other to win the contracts. *See* *Heffernan, 43 F.3d at 1146*. Instead, the complaint repeatedly asserts that Southwest *secretly* underbid Alpha and that, had Alpha known it was going to be underbid, it would have lowered its own bid to win the contracts. Plaintiffs do not contend and no inference can be drawn from these allegations that Southwest and Alpha had any kind of agreement in **[*17]** place to rotate their bids on the School Bus Contracts.

Because the complaint does not allege a *per se* violation of *§ 1* and is otherwise devoid of any allegation that defendants' conduct restrained trade in a manner prohibited by the antitrust laws, it fails to state an antitrust claim and is therefore dismissed. *See, e.g.,* *BCB Anesthesia Care, 36 F.3d at 666* ("only unreasonable restraints of trade are illegal" under *§ 1*); *42nd Parallel North, 286 F.3d at 404* (upholding dismissal of *§ 1* claim due to lack of anticompetitive effect on the market).

C. RICO Mail and Wire Fraud Claims

Plaintiffs also charge defendants with conspiring to and committing numerous acts of mail and wire fraud in violation of RICO, *18 U.S.C. § 1962 (a)-(d)*. Plaintiffs allege that defendants are associated in fact and constitute an enterprise within the meaning of *§ 1962(d)* and that defendants' mail and wire fraud constitute a pattern of racketeering activity, the purpose of which was to "rig-bids" on the School Bus Contracts and acquire the contracts and Alpha's property "by fraudulent, deceptive and illegal means." ***HN11***[] To state a cause of action **[*18]** under RICO a plaintiff must allege with particularity (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity, *Slaney, 244 F.3d at 597*, and that plaintiffs' injury occurred "by reason of" defendants' racketeering activity, *Holmes v. Securities Investor Prot. Corp., 503 U.S. 258, 268-69, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*. Defendants in this case argue that plaintiffs' RICO claims fail as a matter of law because (1) plaintiffs fail to plead the predicate mail and wire fraud claims with the specificity required by *FED. R. CIV. P. 9(b)*, (2) the racketeering allegations do not establish a "pattern," and (3) plaintiffs' injury did not occur by reason of defendants' alleged racketeering activity.

As an initial matter, plaintiffs' RICO claims do not satisfy *Rule 9(b)*'s particularity requirements. Federal rules require mail and wire fraud, the predicate acts underlying plaintiffs' RICO claims in this case, to be pleaded with particularity. *FED. R. CIV. P. 9(b)*; *Slaney, 244 F.3d at 597*. This means that plaintiffs must allege the time, place, and **[*19]** content of the misrepresentations as well as the method by which they were communicated to plaintiffs. *Slaney, 244 F.3d at 597*; *Pizzo v. Bekin Van Lines Co., 258 F.3d 629, 631 (7th Cir. 2001)*. Here, plaintiffs' complaint enumerates 13 separate instances of mail and wire fraud and not one of them contains all of the factual specificity required by *Rule 9(b)*. Most are infirm because they do not explain how defendants' fraud was communicated to plaintiffs, and some are inadequate because they do not specify when the alleged misrepresentation occurred. However, even if plaintiffs were to cure the pleading deficiencies, their RICO claims cannot be salvaged because it is clear from the facts in the complaint that plaintiffs' alleged injury -- monetary losses in excess of $ 3,000,000 due to the lost School Bus Contracts -- was not proximately caused by defendants' alleged racketeering activity.

HN12[] To recover under RICO a plaintiff must show some direct relation between the injury asserted and the injurious conduct alleged. *See Associated Gen. Contractors of Cal., Inc. v. California State Council of Carpenters, 459 U.S. 519, 532-33, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*; **[*20]** *Boim v. Quranic Literacy Inst., 291 F.3d 1000, 1012 (7th Cir. 2002)*. "Thus, a plaintiff who complain[s] of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts is generally said to stand at too remote a distance to recover." *Holmes, 503 U.S. at 268-69*. For plaintiffs in this case to satisfy RICO's requirement of proximate causation, they must allege a relation between their injury and the defendants' violation that is neither indirect nor remote. *Loeb Indus., 306 F.3d at 496*. Plaintiffs allegations fall well short of establishing this necessary relationship.

From the face of the complaint, it is evident that plaintiffs view their injury as the loss of the School Bus Contracts due to defendants' theft of Alpha's proprietary bid information and "bid-rigging." Plaintiffs portray defendants' alleged racketeering activity, however, as fraudulent use of the mail and wires to incorporate, secure loans, solicit investment income, recruit employees, and obtain insurance. In most of these allegations, plaintiffs assert that because of defendants' deception of others -- including banks, investors, insurance **[*21]** companies, and accounting firms -- defendants were able to create their racketeering enterprise. This is too remote a connection for plaintiffs to recover under RICO. If this court were to find otherwise, any individual who reads in the newspaper that a racketeering enterprise was created by falsely incorporating and swindling investors could recover under RICO whether or not the enterprise's illegal activities caused any direct harm to that individual. This kind of ephemeral injury is not the sort that RICO is designed to prevent.

Two other of plaintiffs' allegations come closer to making a direct connection between plaintiffs' injury and defendants' "racketeering" actions. Specifically, plaintiffs allege that "In or about January 2003 the defendants used emails sent through the interstate wires to solicit bid bonds and performance bonds for bids for the school district contracts" and that "defendants used the wires and mails to submit rigged bids" to the School Districts. The first of these does not help plaintiffs' case because it contains no allegation of fraud with respect to the solicitation of bid bonds or performance bonds. The accusation does not suggest that defendants were **[*22]** not entitled to obtain the bonds, and the complaint does not contain anything that would permit the court to so infer.

As for the second allegation, that defendants submitted a rigged bid, the court has already explained that defendants did not as a matter of law engage in "bid-rigging" as that term is meant in ***antitrust law***. Moreover, even if defendants used the mail or wires to submit their bid to the School Districts, and even if the bid was fraudulent, one act of fraud does not establish a "pattern" of racketeering sufficient to state a claim under RICO, especially where there is no evidence that defendants intended to repeat the criminal activity in the future. *See Pizzo, 258 F.3d at 633* (finding that two disputes of fraud five months apart with no other evidence of ongoing criminal activity were not sufficient to establish a pattern of fraudulent activity required under RICO). Plaintiffs' RICO claims are therefore dismissed for failure to state a claim.

III. Conclusion

Plaintiffs have failed to allege any facts that would entitle them to relief under either *§ 1 of the Sherman Act* or *§ 1962 of RICO*, so defendants' motions to dismiss are granted. As **[*23]** plaintiffs' remaining claims all seek recovery for violations of state law and no other basis for federal jurisdiction exists, the court will not address the merits of plaintiffs' state law claims. Case dismissed for lack of jurisdiction.

JOAN B. GOTTSCHALL

United States District Judge

DATED: June 15, 2004

JUDGMENT IN A CIVIL CASE

Decision by Court. This action came to trial or hearing before the Court. The issues have been tried or heard and a decision has been rendered.

IT IS HEREBY ORDERED AND ADJUDGED that this matter is dismissed for lack of subject matter jurisdiction. Defendant Meister's motion to dismiss and defendants Wagner's, Hackel's, Bear Bones Leasing, Inc.'s, Southwest Transit, Inc.'s, and Southwest Leasing L.L.C.'s motion to dismiss are granted. Because plaintiffs fail to state a claim under federal law and there is no other basis for this court's jurisdiction, the court will not address the merits of plaintiffs' state law claims.

Date: 6/15/2004

Champagne Metals v. Ken-Mac Metals, Inc.

United States District Court for the Western District of Oklahoma

June 15, 2004, Decided ; June 15, 2004, Entered

No. CIV-02-528-C

Reporter
2004 U.S. Dist. LEXIS 27313 *

CHAMPAGNE METALS, an Oklahoma limited liability company, Plaintiff, v. KEN-MAC METALS, INC., an Ohio corporation; SAMUEL, SON & CO., LIMITED, an Ontario, Canada, corporation; SAMUEL SPECIALTY METALS, INC., a New Jersey corporation; METAL WEST, L.L.C., an Alabama limited liability company; INTEGRIS METALS, INC., a New York corporation; EARLE M. JORGENSEN COMPANY, a Delaware corporation; and RYERSON TULL, INC., an Illinois corporation, Defendants.

Subsequent History: Motion granted by, in part, Motion denied by, in part, Costs and fees proceeding at *Champagne Metals v. Ken-Mac Metals, Inc., 2005 U.S. Dist. LEXIS 3194 (W.D. Okla., Feb. 22, 2005)*

Prior History: *Champagne Metals v. Ken-Mac Metals, Inc., 2002 U.S. Dist. LEXIS 27722 (W.D. Okla., Oct. 1, 2002)*

Disposition: Defendants' motions for summary judgment granted, and judgment entered on behalf of all Defendants.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

Summary judgment is proper only if the moving party shows there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN2[] **Summary Judgment, Entitlement as Matter of Law**

On a motion for summary judgment, an issue of fact is "material" if under the substantive law it is essential to the proper disposition of the claim.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Entitlement as Matter of Law, Genuine Disputes**

On a motion for summary judgment, an issue is "genuine" if there is sufficient evidence on each side so that a rational trier of fact could resolve the issue either way.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Summary Judgment, Entitlement as Matter of Law**

When deciding whether summary judgment is appropriate, the court views the evidence in the light most favorable to the nonmoving party and draws all reasonable inferences in that party's favor.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN5[] **Entitlement as Matter of Law, Genuine Disputes**

At the summary judgment stage, the court's function is not to weigh the evidence but to determine whether there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN6[] **Summary Judgment, Burdens of Proof**

When the nonmovant will bear the burden of proof at trial, summary judgment is avoided only by going beyond the pleadings and presenting evidence sufficient to establish the existence, as a triable issue, of an essential and contested element of the case.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

Civil Procedure > ... > Discovery > Methods of Discovery > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN7[] Supporting Materials, Affidavits

At summary judgment, evidence does not need to be in a form that would be admissible at trial, but the content or substance must be. Thus, the court may consider affidavits, interrogatory answers, admissions, and deposition testimony to the extent that they are based on personal knowledge and do not contain otherwise inadmissible hearsay. *Fed. R. Civ. P. 56*.

Evidence > Authentication > General Overview

HN8[] Evidence, Authentication

Transcripts must be properly authenticated before they can be admitted.

Evidence > ... > Exceptions > State of Mind > General Overview

HN9[] Exceptions, State of Mind

Admission under *Fed. R. Evid. 803(3)* does not include a statement of memory or belief to prove the fact remembered or believed.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN10[] Summary Judgment, Entitlement as Matter of Law

On a motion for summary judgment, a third party may not simply describe another witness's supposed testimony and such descriptions are not suitable grist for the summary judgment mill.

Mergers & Acquisitions Law > Liabilities & Rights of Successors > General Overview

Mergers & Acquisitions Law > Liabilities & Rights of Successors > Mere Continuation

HN13[] **Liabilities & Rights of Successors, De Facto Mergers**

Generally a successor corporation or the purchaser of assets is not responsible for the debts and liabilities of its predecessor. However, the rule is subject to four exceptions. A purchaser is liable for its predecessors' liabilities if: (1) there is an express or implied agreement to assume the other companies' debts and obligations; (2) the transaction was fraudulent; (3) there was a de facto consolidation or merger of companies; or (4) the purchasing company was a mere continuation of the selling company.

Mergers & Acquisitions Law > Liabilities & Rights of Successors > General Overview

HN14[] **Mergers & Acquisitions Law, Liabilities & Rights of Successors**

In the context of a successor liability determination, consolidation occurs when two or more corporations are combined to form a new corporation after the previous corporate entities are dissolved. The descriptions used by the entities themselves to describe the combination are not controlling.

Evidence > ... > Exemptions > Statements by Party Opponents > General Overview

Evidence > ... > Hearsay > Exemptions > General Overview

HN15[] Exemptions, Statements by Party Opponents

Despite the admission of statements made by a predecessor-in-interest or employees of a predecessor at common law as "against a party opponent" under the concept of "privity of interest," commentators agree that this practice did not survive the enactment of the Federal Rules of Evidence.

Evidence > ... > Exceptions > Residual Exception > General Overview

Evidence > ... > Hearsay > Exceptions > Statements Against Interest

Evidence > ... > Hearsay > Rule Components > Statements

HN16[] Exceptions, Residual Exception

Statements by predecessors-in-interest are commonly admitted as statements against interest or under the residual clause. *Fed. R. Evid. 804(b)(3)* & *807*. However, both of these hearsay exceptions are only applicable under certain conditions. *Fed. R. Evid. 804* requires that the declarant be unavailable before the statement is admitted. *Fed. R. Evid. 807* requires that the plaintiff make a showing as to the probative value of the statement and the plaintiff's efforts to obtain the evidence from other sources.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN17[] Antitrust & Trade Law, Sherman Act

15 U.S.C.S. § 1 prohibits agreements that unreasonably, restrain trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN18[] Antitrust & Trade Law, Sherman Act

Whether an agreement constituted an unreasonable restraint of trade under either a per se or rule of reason analysis follows a determination of whether sufficient evidence of agreement exists.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN19[] Monopolies & Monopolization, Conspiracy to Monopolize

By its terms, *15 U.S.C.S. § 1* covers contracts, combinations, or conspiracies in restraint of trade. Courts and commentators frequently employ the short-hand "concerted action" to describe the prohibited conduct. Regardless of the nominative term, the essence of a *§ 1* claim is the agreement. Although less than what would be required to form a contract, the agreement must be a conscious commitment to a common scheme. In other words, the participants or conspirators must have a unity of purpose or a common design and understanding or a meeting of minds in an unlawful arrangement. In contrast, unilateral acts, regardless of their motivation, will not support a § 1 violation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN20[] Monopolies & Monopolization, Conspiracy to Monopolize

15 U.S.C.S. § 1, as opposed to 15 U.S.C.S. § 2 of the Sherman Act, is unconcerned with businesses acting independently, even where a single firm's restraints directly affect prices and would have comparable economic effects as concerted action.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN21[] Monopolies & Monopolization, Conspiracy to Monopolize

In a 15 U.S.C.S. § 1 case, to survive summary judgment, the plaintiff must adduce significant probative evidence tending to exclude the possibility of independent action by the defendants.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN22[] Monopolies & Monopolization, Conspiracy to Monopolize

An antitrust plaintiff may demonstrate the existence of an agreement with either direct or circumstantial evidence.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN23[] Monopolies & Monopolization, Conspiracy to Monopolize

Direct evidence in a 15 U.S.C.S. § 1 conspiracy must be evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN24[] Monopolies & Monopolization, Conspiracy to Monopolize

Although a 15 U.S.C.S. § 1 antitrust plaintiff may, and often must, establish a conspiracy with circumstantial evidence, that evidence must tend to exclude the possibility of independent action.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Evidence > Relevance > Preservation of Relevant Evidence > Exclusion & Preservation by Prosecutors

Evidence > Inferences & Presumptions > General Overview

HN25[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Antitrust law limits the range of permissible inferences that may be drawn from ambiguous evidence in order to avoid indiscriminately chilling potentially procompetitive conduct. Thus, the United States Court of Appeals for the Tenth Circuit has articulated a two-part evidentiary test. First, the court considers whether the plaintiff's conspiracy evidence is ambiguous, that is, as consistent with the defendants' permissible independent interests as with an illegal conspiracy. If so, the court considers whether there is evidence tending to exclude the possibility that the defendants were merely pursuing those independent interests. To rebut the defendants' claim that they were acting unilaterally, the plaintiff might identify additional facts that are consistent with concerted action but not with their proffered business justification or facts demonstrating that their explanation is pretext. No triable issue of fact exists if independent and concerted actions are equally reasonable explanations on the record.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Evidence > Inferences & Presumptions > General Overview

HN26[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The range of acceptable inferences that may be drawn from circumstantial evidence in any given *15 U.S.C.S. § 1* case will depend on the plausibility of a plaintiff's economic theory and the danger associated with such inferences. The absence of any plausible motive to engage in the conduct charged is highly relevant to whether a "genuine issue for trial" exists within the meaning of *Fed. R. Civ. P. 56(e)*. Lack of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence: if the defendants had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN27[] **Sherman Act, Claims**

The requirement that a *15 U.S.C.S. § 1* antitrust claim make economic sense does not introduce a special burden on plaintiffs facing summary judgment. Throughout, the focus remains on the plaintiff's evidence and whether it tends to exclude the possibility of independent action. Antitrust defendants are not entitled to summary judgment merely by showing that there is a plausible explanation for their conduct. The explanations offered by both plaintiffs and defendants must accurately reflect the actual market. When a theory makes little economic sense, the plaintiff's burden of production is higher. If the plaintiff's theory is economically senseless, no reasonable jury could find in its favor, and summary judgment should be granted. Similarly, a plausible theory, but nothing more, will not suffice to create a triable issue. Ultimately, the court must ascertain whether the plaintiff has presented evidence that is sufficiently unambiguous showing that the defendants conspired.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Evidence > Inferences & Presumptions > General Overview

HN28[] **Monopolies & Monopolization, Conspiracy to Monopolize**

In the context of a *15 U.S.C.S. § 1* case, ambiguous evidence, that is, evidence that is equally consistent with independent as with concerted action, still cannot reasonably support an inference of a conspiracy.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Evidence > Inferences & Presumptions > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN29[] **Summary Judgment, Entitlement as Matter of Law**

In passing on a motion for summary judgment, even where the underlying facts are undisputed, it is hornbook law that the court must indulge every reasonable inference from those facts in favor of the party opposing the motion. Insofar as any weighing of inferences from given facts is permissible, the task of the court is not to weigh these against each other but rather to cull the universe of possible inferences from the facts established by weighing each against the abstract standard of reasonableness, casting aside those which do not meet it and focusing solely on those which do. If a frog be found in the party punch bowl, the presence of a mischievous guest but not the occurrence of spontaneous generation may reasonably be inferred.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Evidence > ... > Lay Witnesses > Opinion Testimony > General Overview

Evidence > ... > Testimony > Lay Witnesses > General Overview

HN30[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Even a defendant's reference to "the rules" or to its agreement with competitors is not "smoking gun" evidence of a *15 U.S.C.S. § 1* conspiracy if there is an alternative explanation for the reference.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN31[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Tacit agreements, although within the scope of *15 U.S.C.S. § 1*, are of questionable viability. The court requires evidence tending to establish an explicit agreement.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN32[] Monopolies & Monopolization, Conspiracy to Monopolize

In the context of a *15 U.S.C.S. § 1* claim, "conscious parallelism," without more, is insufficient to support a reasonable inference of agreement or concerted action. Simply put, a defendant may, in pursuing its own business interests, take parallel or "synchronous" actions with the expectation or belief that its competitors will do the same without violating *15 U.S.C.S. § 1*. Conscious parallelism occurs when a company predicates a decision on the conduct of its competitors. Parallel action is a common and often legitimate phenomenon, because similar market actors with similar information and economic interests will often reach the same business decisions. Thus, there must be some "plus factor" or additional evidence from which an understanding among the parties may be inferred. The additional evidence might be a showing that actions were against individual business interests (i.e., contrary to a good faith business judgment) or that there was a strong motive to conspire.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN33[] Monopolies & Monopolization, Conspiracy to Monopolize

In the context of a *15 U.S.C.S. § 1* claim, mere complaints are not sufficient proof of a conspiracy where the complaints are equally consistent with both an independent and a collusive interpretation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN34[] Monopolies & Monopolization, Conspiracy to Monopolize

In the context of a *15 U.S.C.S. § 1* claim, liability for acts of the entire conspiracy accrues only after showing joinder with knowledge of the enterprise and action in furtherance of it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN35[] Monopolies & Monopolization, Conspiracy to Monopolize

Pressuring a supplier not to deal with a rival is not actionable under *15 U.S.C.S. § 1* unless the supplier and competitor conspire (which is not alleged here) or a horizontal conspiracy among competitors exists.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN36[] **Monopolies & Monopolization, Conspiracy to Monopolize**

In the context of a *15 U.S.C.S. § 1* claim, a plaintiff cannot, as a matter of law, survive summary judgment by pointing to behavior as consistent with the defendants' individual business interests as with a collective effort.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN37[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Under *15 U.S.C.S. § 1*, a defendants' concern about a price-cutting/customer-coveting competitor does not supply a sufficiently strong motive to compensate for the considerable economic evidence that suggests a group boycott would offer few benefits and considerable risk to the defendants.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN38[] **Public Enforcement, State Civil Actions**

Although similar to its federal counterpart in many respects, Oklahoma's statutory regime is unique in that it reaches purely unilateral acts in restraint of trade. *Okla. Stat. tit. 79, § 203(A)*. Therefore, even absent evidence of a conspiracy, defendants' independent acts may support state antitrust liability.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN39[] **Public Enforcement, State Civil Actions**

Notwithstanding the Oklahoma Act's more expansive reach, it, like *15 U.S.C.S. § 1*, only applies to unreasonable restraints of trade. The fundamental test of the reasonableness of an action, which, by its nature, restrains trade, is its effect on the public. To amount to an unreasonable restraint of trade the anticompetitive conduct must have an effect greater than its effect upon the plaintiffs business. That is, the conduct must have an adverse impact on the competitive conditions in general as they exist within the field of commerce in which the plaintiff is engaged. An antitrust plaintiff must show that the challenged conduct adversely impacts competition in general because the antitrust laws were enacted for the protection of competition, not competitors.

Torts > ... > Commercial Interference > Contracts > General Overview

HN40[] **Intentional Interference, Defenses**

In Oklahoma, to state a claim for tortious interference, a plaintiff must allege that: (1) the plaintiff had a business or contractual right that was interfered with by the defendants; (2) the interference was malicious and wrongful and was neither justified, privileged, nor excusable; and (3) that the plaintiff suffered damage that was proximately caused by the complained-of interference.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > ... > Commercial Interference > Contracts > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN41[] Statute of Limitations, Time Limitations

In Oklahoma, a claim for tortious interference is governed by a two-year statute of limitations. *Okla. Stat. tit. 12, § 95(3)*. The limitations period begins to run as soon as the interference is fully accomplished.

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN42[] Commercial Interference, Business Relationships

In Oklahoma, in a claim for tortious interference with a business relationship, the business right interfered with is equivalent to a property right, not an expectation of future profits.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN43[] Intentional Interference, Elements

In Oklahoma, to state a claim for tortious interference with prospective business relationship, a plaintiff must prove that: (1) it had a valid business relation or expectancy; (2) defendants knew of the relationship or expectancy; (3) defendants intentionally and improperly interfered with the relationship or expectancy and such interference was not privileged; (4) this interference caused a breach or termination of the relationship or expectancy; and (5) the plaintiff suffered damage as a proximate result.

Governments > Legislation > Effect & Operation > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Defenses

Torts > ... > Business Relationships > Intentional Interference > Defenses

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN44[] Legislation, Effect & Operation

In Oklahoma, on a claim for tortious interference with prospective business relationship, even if acts are considered "interference," the plaintiff must also present evidence that the interference was malicious and wrongful, and neither justified, privileged nor excusable. It is not necessary to show that the defendants were actually motivated by ill will to demonstrate malice, but rather that they intentionally committed an unreasonable and unlawful act without justification or excuse. Therefore, it appears that the use of the term "malicious" in this context adds no additional element of proof other than that the defendants committed the wrongful and unjustified act intentionally. The defendants acted intentionally if they acted with the sole or primary purpose of inflicting an injury by interfering in the business relationship.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN45[] Commercial Interference, Contracts

In Oklahoma, on a claim for tortious interference with prospective business advantage, in addition to being malicious, the interference must also be wrongful in either its objective or in the means employed to accomplish the objective. The interference is wrongful if it was unlawful or unfair or enacted by lawful means without justification. Actions such as fraud or misrepresentation or physical or moral intimidation or persuasion may be considered unlawful or unfair.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

HN46[] Commercial Interference, Contracts

It is not unlawful for an entity to use fair and lawful argument and persuasion to interfere with another's contractual relations so long as it was done to protect or better one's own business and not done with the primary objective of destroying honest competition. A competitor may exert economic pressure on or refuse to deal with third persons so long as the pressure is not intended to illegally restrain competition. If the plaintiff cannot demonstrate that the defendants' actions rise to an unreasonable restraint of trade, as a matter of law, it cannot overcome the competitor's privilege on a tortious interference claim.

Opinion

ORDER

Defendants filed, either individually or collectively, seven motions for summary or partial summary judgment. The issues and arguments have been debated in no less than 350 pages of opening, response, reply, and surreply briefs. Moreover, a number of relevant evidentiary points have been raised or elaborated on in the numerous pretrial motions that are now at issue. Having carefully **[*3]** considered the evidence in the light most favorable to Plaintiff and the relevant legal issues, the Court holds that summary judgment in Defendants' favor is appropriate on Plaintiff's federal antitrust, Oklahoma antitrust, and tortious interference claims. The reasons for this decision are set out below.

BACKGROUND

In 1996, Mike Champagne started Champagne Metals, a metals service center, out of his home. Pl.'s Resp. P 4, at 2. Earle M. Jorgensen Company ("EMJ"), Mike Champagne's employer before that time, was de-emphasizing sales to the horse trailer industry, and he "saw an opportunity to parlay [his] good relationship in the industry into a successful new service center." Pl.'s Ex. 1 (Champagne Aff.) P 3, at 1. Plaintiff's subsequent difficulties acquiring necessary aluminum products at a competitive price is the principle focus of this case. Specifically, Plaintiff claims that its competitors conspired to deny it access to necessary suppliers (i.e., the leading domestic aluminum mills) by threatening to move their business away from mills that dealt with Plaintiff. According to Plaintiff, the conspiracy's aim was not only to ruin Plaintiff but also to deter others from **[*4]** entering the market, thus maintaining prices and market share. [1] Plaintiff asserts claims against Defendants for unreasonable restraint of trade, as well as for tortious interference with business relations.

Like Plaintiff, Defendants EMJ, Ken-Mac Metals, Inc., Samuel Son & Co. Limited and Samuel Specialty Metals, Inc. (collectively "Samuel"), Metalwest, Inc., Integris Metals, Inc., and Ryerson Tull are metals service centers. Service centers purchase aluminum products in a variety of alloys and finishes to sell to original equipment manufacturers ("OEMs") and other customers. Pl.'s Resp. at 1 n.3. Service centers provide an important link in the aluminum

[1] Defendants' expert uses the term "upstream market" to refer to sales between mills and service centers, and "downstream market" to refer to sales (by mills and service centers) to end users. The Court finds the nomenclature helpful and uses it accordingly.

distribution chain by offering sales coverage for smaller accounts, serving an inventory and a just-in-time **[*5]** delivery function, and providing processing services, which are frequently to tighter-than-standard mill tolerances. Campbell Report at 2-3; Pl.'s Resp. at 1 n.3. [2] However, they compete with mills and other service centers for the sales to end users. See Pl.'s Ex. 98 (Murry Report) at 1; Murry Dep. at 229-32.

Approximately 60% of sales to end users are made by the mills directly. Campbell Report at 3; Pl.'s Ex. 97 (Wilsey Report) P 6, at 2 (reporting that distributors sell about 35% of aluminum sheet, plate, rod, bar, wire, extrusions, pipe, and tube to end users and more than 40% of sheet and plate). Although estimates vary, there are at least 65 service centers (and possibly more than a hundred) operating in North America **[*6]** in more than 750 locations. Wiggins Report P 86, at 29; Murry Dep. at 190 (agreeing that there are more than 100 different service centers in the United States). Defendants' expert, Dr. Wiggins, identifies 41 service centers operating at 150 locations in this region. Wiggins Report P 87, at 29; Wiggins Ex. C (covering Colorado, Kansas, Missouri, Illinois, New Mexico, Texas, Arkansas, and Louisiana). Plaintiff contends that not all of those service centers compete directly with one another on the same aluminum products or for the same business. See Pl.'s Resp. at 46. "For example, there are a limited number of companies that go after the horse trailer business." Id. Plaintiff identifies the Defendants as its day-to-day competitors. Pl.'s Ex. 9 (Champagne Dep.) at 113 (listing Ryerson, Integris, Ken-Mac, Metalwest, and Samuel) & 89 (explaining that EMJ has a plant in Oklahoma); see also Pl.'s Ex. 29 (Sneigle Dep., Vol. II) at 71-72 (explaining that the horse trailer market covers Texas, Oklahoma, and Kansas).

The leading mills in North America are Alcan Aluminum Corporation, Alcoa Inc., Kaiser Aluminum Corporation, Ormet Corporation, Pechiney, and Commonwealth Industries, Inc. Compl. **[*7]** P 11, at 3. Each mill specializes in one or more of the following categories of aluminum products: (1) mill finish common alloy aluminum (i.e., sheet and .250 plate); (2) heat-treated aluminum; (3) common alloy tread; (4) common alloy painted aluminum; and (5) aluminum roof. Pl.'s Ex. 98 (Murry Report) at 2. The parties sell other aluminum products in addition to those listed. Murry Dep. at 149. However, "a great amount of tread, painted, and roof coil" is used in the horse trailer manufacturing industry. Pl.'s Ex. 97 (Wilsey Report) P 12, at 3. The Plaintiff contends the five products are not readily exchangeable. Pl.'s Ex. 98 (Murry Report) at 2. For this reason, and because customers have certain mill preferences and because more sourcing options allow a service center to negotiate a better price, Plaintiff argues that access to more than one mill is critical to its ability to compete in the downstream market. See Pl.'s Ex. 97 (Wilsey Report) P 6, at 2 (explaining that access to multiple mills provides a competitive advantage in terms of price and product availability).

Although a number of factors contribute to whether an end user will buy directly from a mill or particular service **[*8]** center, Plaintiff's supply and sourcing options are the focus of this case. See Pl.'s Ex. 97 (Wilsey Report) P 7, at 2 (explaining that service centers compete on availability, price, quality, responsiveness/service timeliness, and delivery); Campbell Report at 3. The leading domestic mills have select or appointed distribution networks. Id. at 4. Thus, although they have reduced their total number of distributors in recent years, each continues to sell to multiple service centers. Id.; Pl.'s Ex. 98 (Murry Report) at 2. No Defendant is a distributor for all of the mills but each is recognized by at least two mills. However, even among a mill's distributors, prices may vary. [3] **[*9]** In addition to mill purchases, a service center might purchase aluminum from brokers, mill depots, other service

---

[2] Steven N. Wiggins' full report and John R. Campbell's report are included in Volume II of Samuel's summary judgment appendix (Dkt. No. 171). Donald Murry's full deposition transcript is included in the appendix to Defendants' motion to preclude his testimony (Dkt. No. 230) as exhibit 3.

[3] A key pricing component of aluminum is the spot price of aluminum ingot, which is set on international commodity markets. Wiggins Report P 46, at 15; Murry Report at 2. "[A] conversion factor covering the cost of converting aluminum ingot into a product such as coiled sheet" is added to the ingot price. Wiggins Report P 46, at 15. In addition, various "contractual mechanisms" including list prices, contract prices, special terms contracts, and annual contracts affect mill prices. Wiggins Report P 47, at 15. Volume discounts, incumbency policies, and rebates also affect the prices a mill will offer to a particular service center. See Pl.'s Ex. 97 (Wilsey Report) P 13, at 3; Pl.'s Resp. P 74, at 38-39.

centers, or foreign mills. [4] However, those options are frequently less desirable because of upcharges, as well as extended lead times and quality concerns. See Pl.'s Ex. 97 (Wilsey Report) P 12, at 3.

After some initial set-backs, Plaintiff was able to begin buying from Commonwealth and was subsequently recognized by it as a distributor. Plaintiff has purchased limited products from Kaiser and Pechiney in the past and from other mills through a third party, but is not a recognized distributor. Nevertheless, Plaintiff claims that difficulties securing competitively priced products (and the resulting problems winning end user business) have prevented it from operating at full capacity. Even so, Plaintiff has remained in business and experienced continued growth. Murry Dep. at 175.

STANDARD

HN1[] Summary judgment is proper only if the moving party shows "there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. ***HN2***[] "An issue of fact is 'material' if under the substantive law it is essential **[*10]** to the proper disposition of the claim." See *Adler v. Wal-Mart Stores, Inc., 144 F.3d 664, 670 (10th Cir. 1998)* (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986))*. ***HN3***[] "An issue is 'genuine' if there is sufficient evidence on each side so that a rational trier of fact could resolve the issue either way." Id. (citing *Anderson, 477 U.S. at 248*). ***HN4***[] When deciding whether summary judgment is appropriate, the Court views the evidence in the light most favorable to the nonmoving party and draws all reasonable inferences in that party's favor. See *Anderson, 477 U.S. at 255*; *Simms v. Oklahoma ex rel. Dep't of Mental Health, 165 F.3d 1321, 1326 (10th Cir. 1999)*. ***HN5***[] At the summary judgment stage, the Court's function is not to weigh the evidence but to determine whether there is a genuine issue for trial. *Willis v. Midland Risk Ins. Co., 42 F.3d 607, 611 (10th Cir. 1994)*. ***HN6***[] When the nonmovant will bear the burden of proof at trial, summary judgment is avoided only by going beyond the pleadings and presenting evidence sufficient to establish the existence, as a triable **[*11]** issue, of an essential and contested element of the case. Perry v. Woodward, *199 F.3d 1126, 1131 (10th Cir. 1999)*.

DISCUSSION

As noted, Defendants collectively challenge each of Plaintiffs claims on multiple grounds. Due to the number of motions and their considerable overlap, this section is organized around Plaintiff's claims and the key arguments without reference to particular filings. Before reaching the substance of those challenges, however, it is necessary to resolve a few outstanding issues and address Integris' successor liability argument.

1. Preliminary Issues

A. Summary Judgment Evidence

HN7[] At summary judgment, evidence does not need to be in a form that would be admissible at trial, but the content or substance must be. See *Thomas v. Int'l Bus. Machs., 48 F.3d 478, 485 (10th Cir. 1995)*. Thus, the Court may consider affidavits, interrogatory answers, admissions, and deposition testimony to the extent that they are based on personal knowledge and do not contain otherwise inadmissible hearsay. See *Fed. R. Civ. P. 56*; *Thomas, 48 F.3d at 485*; *Gross v. Burggraf Constr. Co., 53 F.3d 1531, 1541 (10th Cir. 1995).* **[*12]**

Because there are a number of evidentiary issues raised in the summary judgment briefs and subsequent pretrial filings that merit consideration, the Court considers the most pertinent below. First, Plaintiff offers a number of

[4] Plaintiff also claims to have purchased metal from its customers, but at a markup. See Pl.'s Resp. at 38 n.31 (referring to Merritt Equipment Company and Sundowner Trailers).

transcribed conversations as evidence. These conversations present both hearsay and authentication concerns. See *Fed. R. Evid. 801(c)* and *901*; *United States v. Devous, 764 F.2d 1349, 1354-55 (10th Cir. 1985)* (stating that ***HN8***[] "transcripts . . . must be properly authenticated before they can be admitted."). Altposes of summary judgment, that Plaintiff could authenticate the transcripts, they are not admissible because their contenthough the Court is willing to assume, for pur is undeniably hearsay. Similarly, the non-deposition statements of mill representatives are hearsay. [5] Nevertheless, the Court will consider all deposition testimony, when available and accurately cited by Plaintiff, as to what those individuals observed and what they have previously said, if adopted. See *Fed. R. Evid. 801(d)(1)* advisory committee's note. Hearsay statements **[*13]** of mill representatives may be considered for the non-hearsay purpose of showing the state of mind of mill decision makers (to the extent relevant), but not for the purpose of showing why the mills were concerned. See *Fed. R. Evid. 803(3)* (stating that ***HN9***[] admission under this exception does not include a statement of memory or belief to prove the fact remembered or believed); *United States v. Joe, 8 F.3d 1488, 1493 (10th Cir. 1993)*.

[*14] Second, Plaintiff attaches a number of internal memoranda, E-mails, or reports to its response. The Court assumes that those documents are authentic and would meet the requirements of *Fed. R. Evid. 803(6)* to be admissible at trial as records of regularly conducted activity.

Third, Plaintiff offers a number of statements about how the aluminum industry works as "lay opinion." Without deciding whether those opinions would more aptly fall under *Fed. R. Evid. 702*, the Court finds adequate assurance in the record that Mike Champagne and Lewis Krausse are sufficiently familiar with the aluminum business to offer their opinions about its operation and are able to relay their own perceptions and experiences.

Fourth, some Defendants, notably EMJ, challenge whether statements by an employee constitute admissions by a party opponent. Under *Fed. R. Evid. 801(d)(2)*, a statement may be offered against a party if it was made by the party's agent or servant during the existence of that relationship and concerns a matter within the scope of the agency or employment. There is sufficient support in the record to assume that the **[*15]** relevant statements regarding Champagne Metals and the effect of a mill's recognition of it were related to the individual's employment. With the exception of Craig Coyler, all appear to have been current employees at the time they made those statements. Similarly, the Court will consider statements as admissions by a party opponent if, under the circumstances, they appear reasonably attributable to a Defendant's employee and related to his or her duties, even if a deponent was unable to specifically identify the declarant.

Finally, the parties fiercely dispute whether complaints or threatening statements by one Defendant to a mill are admissible against the other Defendants. Plaintiff argues that they are either admissible under *Fed. R. Evid. 801(d)(2)(E)* as co-conspirator statements made in furtherance of the conspiracy or as verbal acts. ***HN11***[] A threat may be deemed non-hearsay as a "verbal act" because the fact that the words were uttered has independent legal significance. See *Fed. R. Evid. 801(c)* advisory committee's note (stating, "if the significance of an offered statement lies solely in the fact that it was **[*16]** made, no issue is raised as to the truth of anything asserted, and the statement is not hearsay"); *Echo Acceptance Corp. v. Household Retail Servs., Inc., 267 F.3d 1068, 1087 (10th Cir. 2001)*. Thus, apart from the co-conspirator exception, statements that may be fairly characterized as threats may be admitted as probative of the operation of the conspiracy (as opposed to the truth of what was said). See *29*

---

[5] Plaintiff offers no explanation of why it did not acquire the sworn affidavits of these witnesses and chose instead to rely solely on the hearsay testimony of Mike Champagne and Plaintiff's employees. Relayed in such a manner, the underlying statements are clearly hearsay. Notwithstanding this, Plaintiff argues that these statements should be considered as he can produce the declarants at trial. See *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 470 (3d Cir. 1998)*. To consider these statements would run contrary to Tenth Circuit precedent. See *Thomas, 48 F.3d at 485* (stating that ***HN10***[] a third party may not simply describe another witness's supposed testimony and such descriptions are "not suitable grist for the summary judgment mill."). However, in more than one instance, other witnesses, who Plaintiff alleges made similar statements to those made by the mill representatives, deny during deposition having made those statements at all or clarify and explain the statements in a way that is directly opposite to the meaning assigned to the statement by Plaintiff. This, of course, just underscores the reliability concerns surrounding the admission of hearsay, the risk of inaccuracies in perception, memory, or narration, deliberate or otherwise. See 30 Charles Alan Wright & Kenneth W. Graham, Jr., Federal Practice and Procedure § 6324 (1997).

Am. Jur. 2d Evidence § 665. The applicability of the co-conspirator exception is a more difficult matter in this case because there is no clearly unambiguous, independent evidence of a conspiracy. However, to ensure that Plaintiff's evidence has not been unfairly limited, the Court will consider statements that might not rise to the level of a threat (and thus admissible as a verbal act) but would nonetheless be in furtherance of the alleged conspiracy when evaluating whether, when viewed as a whole, the evidence makes the existence of a conspiracy more likely than not.

Additional objections will be addressed, to the extent necessary, in the body of the text. Integris' hearsay objections also are discussed below.

B. Mike [*17] Champagne's Affidavit

Defendants also argue that Mike Champagne's affidavit conflicts with his deposition testimony regarding his conversation with Ken-Mac's Larry Parsons and should be disregarded at summary judgment. In his affidavit, Mike Champagne explains that he and Mr. Parsons discussed "the fact that EMJ and some of the other service centers had gotten together and the resulting problems [Champagne Metals] had experienced being recognized by Commonwealth." Pl.'s Ex. 1 (Champagne Aff.) P 9, at 2. Such language clearly suggests that Mr. Parsons was aware of some collective action by the other service centers to foil Commonwealth's recognition of Champagne Metals. However, during his deposition, Mr. Champagne was asked about that conversation and did not include this aspect in his answers. Moreover, he was specifically asked whether he had "heard anything to suggest that Ken-Mac ever communicated with any of the other defendants about any threats or pressure or actions to cause mills not to supply Champagne." Pl.'s Ex. 9 (Champagne Dep.) at 264. In response, Mr. Champagne explained that he was not aware of any evidence of communication between Ken-Mac and the other Defendants. **[*18]** Id. at 264-65. Thus, that portion of the affidavit either contradicts Mr. Champagne's deposition testimony or is simply intended to convey what *he* told Larry Parsons. Plaintiff explains in its Surreply that the affidavit "did not say that Parsons brought up this subject or EMJ specifically." Surreply at 2. Accordingly, the Court will not rely on that portion of the affidavit as evidence of an agreement.

In his affidavit, Mr. Champagne also explains, "Mr. Parsons made the comment that he would have gotten it done, meaning kept Commonwealth from selling to Champagne Metals." Pl.'s Ex. 1 (Champagne Aff.) P 9, at 2. During his deposition, he explained that Mr. Parsons had said "he'd have stopped" Champagne Metals but did not specify exactly how he would have achieved that end. Pl.'s Ex. 9 (Champagne Dep.) at 262-64. However, Mr. Champagne assumed he was referring to "telling the mills not to sell [to] us." Id. at 263. The Court agrees that Mr. Champagne's affidavit presents a much less hesitant accounting of what was actually said. Nevertheless, in both instances, Mr. Champagne explains what he understood the import of Mr. Parsons' statements to be under the circumstances. **[*19]** Moreover, to the extent there is a conflict, it is insufficient to warrant exclusion. See *Burns v. Bd. of County Comm'rs of Jackson County, 330 F.3d 1275, 1281-82 (10th Cir. 2003)* (discussing circumstances in which inconsistent affidavit should be excluded).

C. Integris

Integris raises a successor liability argument and hearsay objections that must be addressed before proceeding to the Defendants' other arguments. Integris was formed in November 2001 following an "asset contribution" by NAMD (a BHP Billinton subsidiary) and Reynolds Metals Company (an Alcoa subsidiary), which consisted of RASCO and Vincent Metal Goods ("VMG") (plus other Reynolds' subsidiaries). See Integris Ex. 1A (Agreement). Both RASCO and VMG were metals distribution businesses which Integris was to hold and operate collectively. Id. at 1. Although Integris continues those businesses, the Contribution and Dissolution Agreement specifically limited the liabilities it assumed. NAMD was dissolved except for limited existence to respond to liabilities, but Reynolds Metals survived.

Regardless of the argument's merit, Integris' failure to raise it in its answer precludes further consideration, **[*20]** at summary judgment or at trial. *Fed. R. Civ. P. 8(c)* provides that a party must set forth any "matter constituting an avoidance or affirmative defense" in a responsive pleading. Notwithstanding the debate regarding what generally falls under this catchall provision, Integris' contention that it is not liable for its predecessors' actions clearly qualifies as such a defense in this instance. See generally 5 Charles Allen Wright & Arthur R. Miller, Federal Practice and Procedure § 1271 (West 2004) (critiquing the logical inference approach and explaining that considerations of policy, fairness, and even probability often determine whether a defense should be plead); Kelly J. Williams, Allocating the Burden of Pleading Successor Corporation Status in Texas Products Liability Cases, *48 Baylor L. Rev. 529, 534 (Spring 1996)* (considering access to evidence, unusual circumstances, and the underlying substantive law). Nothing about Plaintiff's claims suggests that the rule against imposing successor liability on purchasing companies would apply. Moreover, information publically available characterized Integris as the product **[*21]** of a "merger" of VMG and RASCO. Because Integris' argument constitutes an affirmative defense to liability (as opposed to, for example, merely disputing Plaintiffs allegations), it was waived. *Youren v. Tintic Sch. Dist., 343 F.3d 1296, 1302 (10th Cir. 2003)*; *Radio Corp. of Am. v. Radio Station KYFM, Inc., 424 F.2d 14, 17 (10th Cir. 1970)* (explaining that ***HN12***[] *Rule 8(c)* defenses are waived if not affirmatively pleaded, asserted under *Fed. R. Civ. P. 12(b)*, or tried by consent).

There is absolutely no reason why Integris should have waited to assert this defense (as opposed to seeking summary judgment immediately and avoiding the expenses of discovery). In this regard, the Court is not persuaded that its intent to preserve the defense is evident in its answer. Integris' affirmative defense number 10 generically states, "Plaintiffs claims against Integris are barred because the alleged injuries or damages, if any, were not the result of any act or omission by Integris, but were due to the acts or omissions of others over whom Integris had no control, or by other superseding interventions outside Integris' control. **[*22]** " Integris' Ex. 22 (Answer) at 6. Absent some indication that Integris had merely purchased assets from VMG's and RASCO's respective parent companies, the general wording of this defense was insufficient to put Plaintiff on notice. A contrary decision would be particularly unfair because Integris produced RASCO and VMG documents during discovery, referred to itself as the result of a merger, and did not disclose the agreement detailing transaction specifics until after the close of fact discovery. Pl.'s Resp. at 41-43. Under the circumstances, Integris is estopped from arguing that it has no successor liability.

Even so, the evidence indicates that the de facto merger or consolidation exception to the general rule against successor liability applies. [6] Integris is correct that ***HN13***[] generally a successor corporation or the purchaser of assets is not responsible for the debts and liabilities of its predecessor. See, e.g., *R.C.M. Executive Gallery Corp. v. Rols Capital Co., 901 F. Supp. 630, 635 (S.D.N.Y. 1995)*; *Elmer v. Tenneco Resins, Inc., 698 F. Supp. 535, 540 (D. Del. 1988)*. However, the rule is subject to four exceptions. A purchaser is liable for **[*23]** its predecessors' liabilities if. (1) there is an express or implied agreement to assume the other companies' debts and obligations; (2) the transaction was fraudulent; (3) there was a de facto consolidation or merger of companies; or (4) the purchasing company was a mere continuation of the selling company. *Diaz v. South Bend Lathe Inc., 707 F. Supp. 97, 99-100 (E.D.N.Y. 1989)*; *Elmer, 698 F. Supp. at 540*; see also *Pulis v. U.S. Elec. Tool Co., 1977 OK 36, 561 P.2d 68, 69*.

Although the transaction was structured as an asset contribution between NAMD and **[*24]** Reynolds, the contributed assets were incorporated businesses which were consolidated into a new entity and ceased to exist. ***HN14***[] A consolidation occurs when two or more corporations are combined to form a new corporation after the previous corporate entities are dissolved. See William Meade Fletcher, 15 Fletcher Cyclopedia of the Law of Private Corporations § 7077 (West 2003). The descriptions used by the entities themselves to describe the combination are not controlling. *Ladjevardian v. Laidlaw-Coggeshall, Inc., 431 F. Supp. 834, 838 (S.D.N.Y. 1977)*. As a practical matter, then, it appears that Integris would be liable for VMG's and RASCO's actions under the de facto

---

[6] Plaintiff also argues that Integris impliedly assumed VMG's and RASCO's liability by "agreeing to a highly inclusive definition of liabilities." Pl.'s Resp. at 119. However, the agreement is quite clear that only certain liabilities were assumed. See Integris' Ex. 1A. The expansive definition of liabilities does not eviscerate those provisions. Therefore, the implied assumption exception would not apply.

consolidation or merger exception. Moreover, notwithstanding the parties' treatment of the issue, it is not clear to the Court on what basis Plaintiff could hold the parent companies or corporate shareholders of RASCO and VMG, the alleged conspirators, liable under these facts. Therefore, Integris' motion is denied with respect to the successor liability issue.

However, this ruling does not decide the hearsay objections raised in Integris' motion in limine. See Integris Mot. (Dkt. No. 238). As **[*25]** correctly noted by Integris, statements made by a predecessor-in-interest or employees of a predecessor are not admissible under *Fed. R. Evid. 801(d)(2)*. See *Calhoun v. Baylor, 646 F.2d 1158, 1162-63 (6th Cir. 1981)*; *Huff v. White Motor Corp., 609 F.2d 286 (7th Cir. 1979)*. ***HN15***[] Despite the admission of these statements at common law under the concept of "privity of interest," commentators agree that this practice did not survive the enactment of the Federal Rules of Evidence. See 30B Michael H. Graham, Federal Practice & Procedure § 7019 (3d Interim ed. 2000); Christopher B. Mueller and Laird C. Kirkpatrick, Federal Evidence § 430 (2d ed. 2003); Jack B. Weinsten and Margaret A. Berger, Weinstein's Evidence Manual Student Edition § 15.02[5] (5th ed. 2001). The Court acknowledges the contrary result in the unpublished case of *Sherif v. Astrazeneca, 2002 U.S. Dist. LEXIS 11408, No. CIV.A. 00-3285, 2002 WL 32350023 (E.D. Pa. May 9, 2002)*, but notes that the Sherif court did not explain why it was departing from the widely accepted view articulated above except to say that "to decline to accept these statements as **[*26]** admissions against a party-opponent solely because [the successor company] is the only named party would elevate form over substance." *Sherif, 2002 U.S. Dist. LEXIS 11408, [WL] at *3*. In the absence of any legal analysis to support this minority position, the Court declines to depart from the majority view.

The fact that the statements made by Integris' predecessors-in-interest are not admissible under *Fed. R. Evid. 801 (d)(2)* does not mean that all predecessor statements are inadmissible against Integris. For instance, some of the statements may be admissible as verbal acts because they do not rely on the truth of the statement for their probative value, but on the very fact that the statement was made. See *29 Am. Jur. 2d Evidence § 665*. Most commonly, these statements are threats by RASCO or VGM employees directed at the mills. [7]

[*27] II. Federal Antitrust Claim

HN17[] *Section 1* prohibits agreements that unreasonably, restrain trade. See *15 U.S.C. § 1*; *SCFC, ILC. v. Visa USA, Inc., 36 F.3d 958, 962 (10th Cir. 1994)*. As indicated above, Plaintiff alleges that the Defendants conspired to exclude it as a competitor by agreeing to pressure mills not to deal with Plaintiff. Specifically, Defendants allegedly engaged in a group boycott effort to cut off Plaintiff's access to essential suppliers by collectively threatening to move their business away from noncompliant mills. Although Defendants advance a number of arguments in their briefs why summary judgment on Plaintiffs *Section 1* claim is proper, the Court begins with whether there is sufficient evidence that an agreement among the Defendants existed. See *AD/SAT v. AP, 181 F.3d 216, 232 (2d Cir. 1999)* (explaining that ***HN18***[] whether an agreement constituted an unreasonable restraint of trade under either a per se or rule of reason analysis follows a determination of whether sufficient evidence of agreement exists).

Agreement in Restraint of Trade

[7] ***HN16***[] Statements by predecessors-in-interest are commonly admitted as statements against interest or under the residual clause. See *Fed. R. Evid. 804(b)(3)* & *807*. However, both of these hearsay exceptions are only applicable under certain conditions, and Plaintiff has not attempted to argue that it will be able to satisfy those conditions. See *Fed. R. Evid. 804* (requiring that the declarant be unavailable before the statement is admitted); *Fed. R. Evid. 807* (requiring that the Plaintiff make a showing as to the probative value of the statement and Plaintiff's efforts to obtain the evidence from other sources); see also *Herrick v. Garvey, 298 F.3d 1184, 1192 (10th Cir. 2002)* (discussing the burdens on a party when seeking to admit evidence under *Fed. R. Evid. 807*); *United States v. Tome, 61 F.3d 1446, 1452 (10th Cir. 1995)* (emphasizing that admitting evidence under the residual exception is reserved for "extraordinary circumstances").

HN19[] By its terms, *Section 1* covers contracts, combinations, or **[*28]** conspiracies in restraint of trade. Courts and commentators frequently employ the short-hand "concerted action" to describe the prohibited conduct. Regardless of the nominative term, the essence of a *Section 1* claim is the agreement. *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 999 (3d Cir. 1994)*. Although less than what would be required to form a contract, the agreement must be a conscious commitment to a common scheme. *Monsanto Co. v. Spray-Rite Svc. Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*; 1 ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments 5 (5th ed. 2002). In other words, the participants or conspirators must have a "unity of purpose or a common design and understanding or a meeting of minds in an unlawful arrangement." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* (internal quotations and citation omitted). In contrast, unilateral acts, regardless of their motivation, will not support a *Section 1* violation. See *Monsanto, 465 U.S. at 761*; *InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 159 (3d Cir. 2003)*. ***HN20***[] *Section 1*, as **[*29]** opposed to *Section 2 of the Sherman Act*, is unconcerned with businesses acting independently, even where a single firm's restraints directly affect prices and would have comparable economic effects as concerted action. *Fisher v. City of Berkeley, 475 U.S. 260, 266, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986)*.

Defendants contend that their actions were entirely consistent with their individual business interests and that Plaintiff has no evidence of any agreement among them. Thus, ***HN21***[] to survive summary judgment, Plaintiff must adduce significant probative evidence tending to exclude the possibility of independent action by the Defendants. *Monsanto, 465 U.S. at 768*; *Key Financial Planning Corp. v. ITT Life Ins. Corp., 828 F.2d 635, 638* (quotation omitted). ***HN22***[] An antitrust plaintiff may demonstrate the existence of an agreement with either direct or circumstantial evidence. *Mitchael v. Intracorp., Inc., 179 F.3d 847, 857 (10th Cir. 1999)*. Plaintiff attempts to do both.

A. Direct Evidence

Plaintiff contends that certain statements by different Defendant representatives constitute direct evidence of the alleged conspiracy. Plaintiff identifies **[*30]** the following three statements in its Response: (1) comments by Larry Parsons (of Ken-Mac) during a 1999 buyout negotiation with Mike Champagne, in which he referred to the service centers' power over Champagne Metals, stating that he would have stopped Champagne Metals from securing recognition from Commonwealth had he known about it, and implied that the others had messed up but that "he could get everyone together to make it happen;" (2) statements by EMJ's Debbie Veale to Commonwealth representative Bill Thomas in 1996 that she had been in contact with her counterparts at NAAD [8] **[*31]** , that none were happy about Commonwealth's relationship with Champagne Metals, and that they had enough clout to make Commonwealth listen; [9] and (3) repeated complaints by Ryerson's Phil Wiley to Commonwealth representative Matthew Zundel from 1998 to 1999 that Commonwealth's recognition of Champagne Metals hurt the industry and would cause Ryerson and other distributors in the area to source their metal elsewhere. Pl.'s Resp. at 80-82. For the reasons set out below, these admissions are not direct evidence of an agreement among the Defendants.

Although the statements suggest contact among service centers and/or seemingly appreciate their collective strength or influence over mills, there is a gap between what was said and the conclusion that a conspiracy existed. *HN23*[] "Direct evidence in a *Section 1* conspiracy must be evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted." *Jacob Blinder & Sons, Inc. v. Gerber Prods. Co. (In re Baby Food Antitrust Litig.), 166 F.3d 112, 118 & 122 (3d Cir. 1999)* (explaining that direct evidence evinced only an exchange of information and not a price-fixing conspiracy). In *Rossi v. Standard Roofing, Inc., 156 F.3d 452 (3d Cir. 1998)*, a case upon which Plaintiff relies heavily for its characterization of this evidence, a conspirator's threat constituted direct evidence that a conspiracy or unlawful agreement existed. There, Rossi testified, ". **[*32]** . . Joe

---

[8] NAAD is the National Association of Aluminum Dealers. Pl.'s Ex. 1 (Champagne Aff.) P 10, at 2. It was an invitation-only organization that has since merged with the Metals Service Center Institute. Id.

[9] Because Bill Thomas was unsure that Debbie Veale actually referred to a "circling of the wagons" during their conversation, the Court does not consider that as part of her statement. See Pl.'s Ex. 34 (Thomas Dep.) at 121.

Licciardello came over and threatened me that if I went into business that he and Arzee Supply would do anything they could, stop supplies, cut the prices, whatever they had to do they were going to do to keep me out of business." *Id. at 468*. In contrast, although Mike Champagne may have attributed a similar meaning to Larry Parsons' words and implications, what was actually said is notably different. [10]

[*33] Similarly, Debbie Veale's and Paul Wylie's statements to Commonwealth representatives do not necessarily indicate an agreement among the Defendants to boycott (or to threaten to boycott) mills who supplied Plaintiff. They may merely be recognitions that other service centers would likely complain and/or refuse to deal with Commonwealth, neither of which would be surprising in this industry. If a statement is reasonably susceptible to an alternative, legal explanation, which may include the acknowledgment of a competitive reality, it is important circumstantial evidence of a conspiracy but not direct evidence. See *Richards v. Neilson Freight Lines, 810 F.2d 898, 903 (9th Cir. 1987)* (explaining that seemingly incriminating statement may have been mere acknowledgment of an "industrywide acceptance of the competitive reality that back solicitation was an abuse of the interlining relation"). Because this evidence lacks the requisite "clarity" to constitute direct evidence, the Court is unable to conclude that a jury could reasonably find a conspiracy existed based on those statements alone. See *InterVest, Inc., 340 F.3d at 162-163* (listing examples of **[*34]** direct evidence in other *Section 1* cases).

B. Circumstantial Evidence

HN24[] Although an antitrust plaintiff may, and often must, establish a conspiracy with circumstantial evidence, that evidence must tend to exclude the possibility of independent action. ***HN25***[] "***Antitrust law*** limits the range of permissible inferences" that may be drawn from ambiguous evidence in order to avoid indiscriminately chilling potentially procompetitive conduct. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587-88, 89 L. Ed. 2d 538, 106 S. Ct. 1348*. Thus, the Tenth Circuit has articulated a two-part evidentiary test. First, the Court considers whether the Plaintiff's conspiracy evidence is ambiguous, that is, as consistent with the Defendants' permissible independent interests as with an illegal conspiracy. See *Gibson v. Greater Park City Co., 818 F.2d 722, 724 (10th Cir. 1987)*. If so, the Court considers whether there is evidence tending to exclude the possibility that the Defendants were merely pursuing those independent interests. See id. To rebut Defendants' claim that they were acting unilaterally, Plaintiff might identify additional facts that are consistent **[*35]** with concerted action but not with their proffered business justification or facts demonstrating that their explanation is pretext. See 1 J. Von Kalinowski, Antitrust Laws and Trade Regulation § 11.02[2] (2d ed.); see also *Key Financial Planning Corp., 828 F.3d at 639*. No triable issue of fact exists if independent and concerted action are equally reasonable explanations on the record. See *Lemelson v. Bendix Corp., 621 F. Supp. 1122, 1130 (D. Del. 1985)*.

Importantly, ***HN26***[] the range of acceptable inferences that may be drawn from circumstantial evidence in any given case will depend on the plausibility of a plaintiff's economic theory and the danger associated with such inferences. See *Mitchael, 179 F.3d at 858*.

> The absence of any plausible motive to engage in the conduct charged is highly relevant to whether a "genuine issue for trial" exists within the meaning of *Rule 56(e)*. Lack of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence: if [the defendants] had no rational economic motive to conspire, and if their conduct is consistent with other, **[*36]** equally plausible explanations, the conduct does not give rise to an inference of conspiracy.

---

[10] The following description of group boycott mechanics underscores the qualitative difference between Plaintiff's examples and direct evidence of a conspiracy:

The boycotting group members, in effect, say to their suppliers . . ., "If you don't stop dealing with non-group members, we will stop dealing with you." If continued trade with group members is more important to a supplier . . . than is trading with non-group members, this threat will be effective.

L. Sullivan, Handbook of the Law of Antitrust § 83, at 230 (1977) (quoted in *Weiss v. York Hosp., 745 F.2d 786 (3d Cir. 1984))*.

Matsushita, 475 U.S. at 596-97. However, ***HN27***[] the requirement that an antitrust claim make economic sense does not introduce a special burden on plaintiffs facing summary judgment. *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 468, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*. Throughout, the focus remains on the Plaintiff's evidence and whether it tends to exclude the possibility of independent action. "Antitrust defendants are [not] entitled to summary judgment merely by showing that there is a plausible explanation for their conduct." *InterVest, 340 F.3d at 160* (quoting *Rossi, 156 F.3d at 466*). The explanations offered by both Plaintiff and Defendants must accurately reflect the actual market. See *Eastman Kodak Co., 504 U.S. at 468*.

When a theory makes *little* economic sense, the plaintiffs burden of production is higher. See, e.g., *Merck-Medco Managed Care, Inc. v. Rite Aid Corp., 22 F. Supp. 2d 447, 458 (D. Md. 1998)* (considering whether group boycott theory made economic **[*37]** sense in context). "If the plaintiff's theory is economically *senseless,* no reasonable jury could find in its favor, and summary judgment should be granted." *Eastman Kodak Co., 504 U.S. at 468-69* (emphasis added). Similarly, a plausible theory, but nothing more, will not suffice to create a triable issue. See See *Matsushita, 475 U.S. at 597 n.21*. Ultimately, the Court "must ascertain whether [Plaintiff has] presented evidence that is sufficiently unambiguous showing that the Defendants conspired." *InterVest, 340 F.3d at 160* (internal quotations and citations omitted).

1. Economic Theory [11]

[*38] The Court turns first to the vigorously debated issue of whether Plaintiff's theory makes economic sense. Defendants argue that they would have no motive to participate in a group boycott because they lack the power to raise prices or to decrease output in the downstream market. Dr. Wiggins explains that, absent a competitive benefit, the risk of antitrust liability would make it irrational for service centers to collude. Wiggins Report P 117, at 40. In its Response, Plaintiff argues that the Defendants were not attempting to maintain supracompetitive prices but rather to avoid price cutting and to maintain their respective market share. It describes the conspiracy as a "joint campaign . . . to preserve the allocation and price structure in the industry by making it clear to the world that new entrants are not acceptable, and savaging any who dare try to enter." Pl.'s Resp. at 86-87. However, notwithstanding the allegations that Defendants were concerned about prices and market allocation, Plaintiff does not allege that the group boycott was formed to enforce a separate price-fixing or market allocation agreement. Cf. *Rossi, 156 F.3d at 472* (explaining that group **[*39]** boycott was motivated to destroy a competitor who would not cooperate in effort to raise prices above their competitive levels). Nor is there any evidence of collusion on supply or price. See Murry Dep. at 204-05 & 211-12. To the contrary, there is ample evidence of fierce competition in the downstream market and among the Defendants themselves. See id. at 214-15 (agreeing Defendants competed "hammer and tongs"); Pl.'s Ex. 9 (Champagne Dep.) at 261-62. During his deposition, Dr. Murry begrudgingly agreed that, absent collusion on price and assuming a strict theoretical microeconomic interpretation of the market, colluding service centers attempting to keep out a new entrant would not achieve any "sustained benefit." Murry Dep. at 216-24. The significance of that concession, with its caveats, is not entirely clear.

Nonetheless, Dr. Murry was also unwilling to opine as to whether any Defendant had sufficient market power (in the upstream market) to influence the mills. He was unsure whether the biggest Defendants could *not* affect price but made no effort to calculate the market share among the service centers purchasing from the mills. Murry Dep. at 173 & 211. This uncertainty **[*40]** is particularly distressing because Plaintiff's theory is premised on the idea that the Defendants needed to work together in order to reach all of the domestic mills (to accomplish the alleged objective of destroying Plaintiff). [12] In addition, because the different mills produce different products, and because

---

[11] In its Response, Plaintiff cites authority for the proposition that when the alleged conduct is "facially anticompetitive and exactly the harm the antitrust laws aim to prevent, no special care need be taken in assigning inferences to circumstantial evidence." Pl.'s Resp. at 82-83. However, ***HN28***[] ambiguous evidence, that is, evidence that is equally consistent with independent as with concerted action, still cannot reasonably support an inference of a conspiracy. Thus, notwithstanding the plausibility issues identified below, the Court would be unwilling to characterize the Defendants' actions, on this record, as facially anticompetitive. See *InterVest, 340 F.3d at 163*. To do so, would risk allowing unsupported group boycott allegations to pass summary judgment without any evidentiary support.

of customer preferences, it is not clear whether a smaller, more strategically designed group could have been formed to accomplish the alleged objective. Certainly, what Metalwest contributed to the "campaign" is not readily apparent.

Under the circumstances, the Court cannot help but conclude that, at a minimum, Plaintiff has failed to substantiate its claim that its group boycott **[*41]** theory is economically sound. Cf. *Mitchael, 179 F.3d at 859-60* (agreeing that the plaintiffs theories were unsupported by the evidence). Incredibly, Plaintiff failed to cite any evidence in its Response in support of its theory. Plaintiffs predicament is exacerbated because, to the extent that it might have wanted to rely on Dr. Murry's report, the Court has determined, by separate order, that those opinions are deficient under *Fed. R. Evid. 702* and would be unhelpful to the jury. Faced with uncontroverted evidence that the benefits of collusion in this instance are outweighed by its risks, the Court would have no qualms granting summary judgment for Defendants on the ground that Plaintiff's theory does not make economic sense.

However, the Court is willing, for the purpose of testing Plaintiff's evidence, to assume that the theory makes "some" sense. With a plausible but weak economic theory, a plaintiff must adduce more than minimal circumstantial evidence. See *Merck-Medco, 22 F. Supp.2d at 459* (explaining that plausible but weak economic theory required more than minimal circumstantial evidence to support an **[*42]** inference of conspiracy). Plaintiff's non-economic evidence is considered below.

2. Non-Economic Evidence

The extensive briefing and number of exhibits in this case, though not unexpected in an antitrust case, is considerable. In an effort to duly consider each piece of evidence and mindful that liability must be established for each Defendant, the Court has carefully sifted through the record. Although the following discussion invariably focuses on particular statements or actions, the Court is not, as Plaintiff cautions against, tightly compartmentalizing the evidence or, more generally, losing the forest for the trees. Moreover, although the Court does not weigh the evidence or make credibility determinations, it is required to determine what inferences are reasonable as a matter of law. *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1304 (11th Cir. 2003)*. [13]

[*43] In a nutshell, Plaintiff's circumstantial evidence of a conspiracy consists of: the threats that Commonwealth would lose business from more than one service center because of its relationship with Plaintiff (discussed above); complaints or threats by each of the Defendants to one or more of the leading mills regarding Plaintiff; buy-out offers by two of the Defendants; the unauthorized presence of two of the Defendants' representatives in Champagne Metals' plant; EMJ's drastically reduced price quote to a customer for which Plaintiff was doing some sample work; a Metalwest representative's statement to a customer that Plaintiff could not secure Ormet products; and EMJ's refusal to sell its cut-to-length ("CTL") line directly to Plaintiff after agreeing to do so. Plaintiff contends that this evidence, when viewed against the backdrop of service centers' historic hostility towards new competitors,

---

[12] Plaintiff also contends that collective action was necessary because of the risk associated with moving business or threatening mills. Because that argument attempts to undercut the Defendants' contention that their complaints and threats were consistent with independent business judgments, it is addressed more fully below.

[13] The Fifth Circuit explains:

HN29[] In passing on motion for summary judgment, even where the underlying facts are undisputed, it is hornbook law that the court must indulge every Reasonable inference from those facts in favor of the party opposing the motion. Insofar as any weighing of inferences from given facts is permissible, the task of the court is not to weigh these against each other but rather to cull the universe of possible inferences from the facts established by weighing each against the abstract standard of reasonableness, casting aside those which do not meet it and focusing solely on those which do. If a frog be found in the party punch bowl, the presence of a mischievous guest but not the occurrence of spontaneous generation may reasonably be inferred.

A T & T v. Delta Communications Corp., 590 F.2d 100, 101-02 (5th Cir. 1979).

tips the balance towards a conspiracy being the more likely explanation for Defendants' actions than their making similar business judgments independently. For the reasons set forth below, the Court does not agree.

a. A "Mature Conspiracy"

The Court begins with the notion of a "mature **[*44]** conspiracy" or established industry doctrine briefly described above. In fleshing out this idea, Plaintiff argues:

> Champagne does not contend a concerted plan of action had to be newly created, specifically in response to Champagne's attempt to start a new aluminum service center, and requiring extended meetings, discussions, or correspondence among the existing service centers and mill suppliers. Although there have been some consolidations or changes in corporate form over the years, the major players in the aluminum service center industry have been in place for many, many years. This mature industry has begotten a mature conspiracy, in which there is little need for direct discussions, let alone face to face meetings, to enforce behavior which has been fully understood and repeated for decades. The evidence which has been uncovered here, shows that spoken reminders--or what Defendants euphemistically would refer to as "buzz" in the industry--together with the occasional withholding of business or transfer of mill orders when a reminder is ignored, are more than sufficient to assure each participant that new entrants will be denied access to the same sources of mill supply. **[*45]**

Pl.'s Resp. 77-78 (footnotes omitted); see also Pl.'s Resp. at 71 (referring to the established doctrine that "new entries were not allowed among the ranks of aluminum distributors").

Whatever evidentiary value this history may have, Plaintiff has offered insufficient evidence that the "mature conspiracy" is itself a conspiracy for *Section 1* purposes. Plaintiff suggests that it is decades old, includes not only those service centers interested, like Plaintiff, in courting the horse trailer business, but at least a significant number of the many other service centers currently in existence, and has followed the major mills through their many "permutations." To borrow from the Third Circuit, "it stretches credibility to suggest that they all agreed on rules' in a manner approximating an illegal conspiracy." *InterVest, 340 F.3d at 162*. Plaintiff offers anecdotal evidence that service centers have complained in the past, not just about new entrants but about each other, and that mills "fear" their distributors. See Pl.'s Resp. P 24, at 11-12 (recounting industry "stories" of existing distributors pressuring mills in the past). Furthermore, the Court is **[*46]** invited to see a conspiracy at work because only two "green-fielding" service centers have succeeded in the last twenty years. Given the highly competitive nature of the service center business, as well as the mills' consolidation of their distribution networks and the financial difficulties affecting even established mills and service centers in recent years, those numbers are far from striking. See Wiggins Report PP 51-54, at 16-17; Murry Dep. at 185-87 (agreeing that given a competitive industry without super competitive profits it would be improper to infer that barriers or deterrents exist simply because there is no entry) & 209.

Finally, even a "good ol' boy" business in which service centers are proprietary about their mill relationships should not be heedlessly labeled an "established doctrine" against new entrants. As additional support for its characterization of service centers as a powerful club or force over mills, Plaintiff refers to testimony from Mike Champagne and Lewis Krausse. Mike Champagne testifies that he "knew that new service center entrants were unwelcome and that the major service centers exercised leverage over the mills to dictate to whom they sold" **[*47]** and "it was common knowledge … that [independent service centers could not enter the market] because the major service centers controlled the mills and did not allow new entrants." Pl.'s Ex. 1 (Champagne Aff.) P 2, at 1. Similarly, Louis Krausse recounts his own difficulties securing mill recognition for Professional Metals (an independent service center ultimately acquired by Metals USA) and explains his view that a mill had to have "the blessing of the other service centers" before it recognized a new distributor. Pl.'s Ex. 19 (Krausse Dep.) at 29-30. [14]

This "lay opinion" evidence is unavailing. The perception that service centers controlled the mills, that mills needed the blessing of their service center customers, or even that the service centers were a "club" is circumstantial

[14] The Court considers this evidence as Mr. Krausse's opinion based on his twenty-some year experience in the industry, rather than as repeating what unidentified mill representatives had actually told him in the past.

evidence. **[*48]** [15] ***HN30***[] Even a Defendant's reference to "the rules" or to *its* agreement with competitors is not "smoking gun" evidence of a conspiracy if there is an alternative explanation for the reference. See *Richards, 810 F.2d at 902* (recognizing alternative explanations for defendant's admission that there was a rule or gentlemen's agreement against back solicitation); *InterVest, 340 F.3d 144 at 162-63* (construing reference to "the rules" as a reference to the operation of the bond market as a whole, rather than an agreement to unreasonably restrain trade). Here, there is evidence already in the record that the mills considered the reaction of their existing service centers in deciding whether to recognize a competing service center. See, e.g., Pl.'s Ex. 8 (Campbell Dep.) at 82-84. That admission is neither surprising nor suggestive of a conspiracy. There is also considerable evidence to the effect that mills did not afford undue weight to distributor complaints. See, e.g., id.

[*49] Thus, the probative value of Champagne's and Krausse's observations, when considered in context, is minimal. This is especially so with respect to Mike Champagne's testimony. To the extent that he recognized that new entrants were not allowed but considered himself exempt because of his good relationships and because EMJ was exiting the horse trailer business suggests, at a minimum, that the "rules" were not as rigid as Plaintiff now contends. See Pl.'s Ex. 1 (Champagne Aff.) PP 3-4, at 1. There is simply insufficient evidence that the entire U.S. aluminum industry adheres to strict rules designed to artificially limit the number of service centers that can compete. See *InterVest, 340 F.3d at 149* (refusing to believe that the entire bond market--including thousands of broker--dealers trading various types of securities--can fairly be described as a conspiracy).

Nevertheless, it appears that Plaintiff offers this history as a surrogate for an explicit agreement or at least as a kind of "plus factor" to shade otherwise ambiguous conduct or substitute for the lack of evidence of any communication. ***HN31***[] Tacit agreements, although within the scope of *Section 1*, are of **[*50]** questionable viability. See *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 654 (7th Cir. 2002)*, cert. denied, *537 U.S. 1188, 154 L. Ed. 2d 1019, 123 S. Ct. 1254 (2003)* (noting general belief that an express, manifested agreement involving actual, verbalized communication must be proved); *JTC Petroleum Co. v. Piasa Motor Fuels, Inc., 190 F.3d 775, 780 (7th Cir. 1999)* (describing tacit agreement argument as "novel" and requiring the advocate to offer explanation and support). Absent any persuasive argument by Plaintiff on this point, the Court requires evidence tending to establish an *explicit* agreement. [16] **[*52]** Likewise, even if there were evidence that any Defendant had participated in a prior conspiracy, the Court does not agree that past collusion makes current collusion more likely than not. Compare *Williamson Oil Co., 346 F.3d at 1317-18*, aff'g *Holiday Wholesale Grocery Co. v. Philip Morris Inc., 231 F. Supp. 2d 1253, 1305 (N.D. Ga. 2002)* (discounting tobacco industry's history of collusion), with *In re High Fructose Corn Syrup Antitrust Litig, 295 F.3d 651* (finding company's price fixing agreements **[*51]** related to other products relevant). Here, there is no admissible evidence that any of the Defendants participated in a larger, concerted effort

---

[15] Elsewhere, Plaintiff refers to John Guest's testimony about the "rules of the game" which require a service center to be a member of a "club" before it would be recognized by a mill. The Court has been unable to locate that testimony in the excerpted deposition transcript. Plaintiff cites to pages 9 and 10 in its motion in limine response, but those pages were not included as part of the summary judgment materials. See Pl.'s Resp. (Dkt. No. 260) at 16. The memo from Mr. Guest recommending that Alcoa not recognize Champagne Metals, which is attached as summary judgment evidence, may lend support to Plaintiff's theories about a club and rules, but it does not specifically employ such terms. See Pl.'s Ex. 57 (Guest Memo) (identifying Champagne Metals as a competitor of VMG, RASCO, and Ryerson "with respect to market coverage" and noting, "Ideally, [Champagne Metals] would be a location to recognize, if one of our existing distributors acquired them."). Regardless, such evidence is inconclusive as to the critical issue of whether a long- standing agreement or understanding existed among service centers and would not alter the conclusion reached above.

[16] Because Plaintiff never directly asserts that the Defendants engaged in a tacit agreement, the Court is loathe to construct an argument on its behalf. Nevertheless, the Court is mindful that the Tenth Circuit has given tacit agreements at least a passing nod. In *Reazin v. Blue Cross & Blue Shield of Kansas, Inc., 899 F.2d 951, 963 (10th Cir. 1990)*, the Court observed that a challenged *Section 1* agreement "need not be in writing or even be explicit." However, except for that single sentence, which was unrelated to the issues on appeal, the Court is not aware of anything to suggest that the Circuit's views are contrary to those identified above. Thus, had Plaintiff intended to pursue a tacit agreement theory, it should have done so explicitly and provided argument and authority for that result in addition to the colorful references to history.

to keep out entrants in the past. The only evidence possibly linking any Defendant to this mature conspiracy is their actions regarding Plaintiff. [17]

Notwithstanding its protests to the contrary, Plaintiff's strongest evidence of a conspiracy is that all of the Defendants complained about Plaintiff to mills and/or threatened to move or to withhold business from mills that dealt with Plaintiff. Debbie Veale's statement to Bill Thomas and Phil Wiley's comments to Matthew Zundel suggest that at least EMJ and Ryerson recognized that other similarly situated service centers might react negatively to Commonwealth's recognition of Plaintiff. However, ***HN32***[] "conscious parallelism," without more, is insufficient to support a reasonable inference of agreement or concerted action. Simply put, a defendant may, in pursuing its own business interests, take parallel or "synchronous" (*Williamson Oil Co., 346 F.3d at 1302*) actions with the expectation or belief that its competitors will do the same without violating *Section 1*. See, e.g., *Merck-Medco, 22 F. Supp. 2d at 469 n.50* **[*53]** (explaining that conscious parallelism occurs when a company predicates a decision on the conduct of its competitors).

"Parallel action is a common and often legitimate phenomenon, because similar market actors with similar information and economic interests will often reach the same business decisions." *Twombly v. Bell Atlantic Corp., 313 F. Supp. 2d 174, 2003 WL 22304824, at *4 (S.D.N.Y. 2003)*. Thus, there must be some "plus factor" or " additional evidence from which an understanding among the parties may be inferred.'" *Monument Builders of Greater Kansas City, Inc. v. Am. Cemetery Association of Kansas, 891 F.2d 1473, 1481 (10th Cir. 1989)* (quoting 2 J. Von Kalinowski, Antitrust Laws and Trade Regulation § 6.01[3][a][ii] at 6-36 (1989)). The additional evidence might be a showing that actions were against individual business interests (i.e., contrary to a good faith business judgment) or that there was a strong motive to conspire. See *Monument, 891 F.2d at 1481 (10th Cir. 1989)*.

Plaintiff attempts to discredit the Defendants' representations that they each acted independently **[*54]** and in their own profit-maximizing interest when they complained to or threatened mills. Plaintiff makes two arguments, notably without any cited support. See Pl.'s Resp. at 86. First, a rational service center would not move business away from the vendor-of-choice for purely retaliatory reasons and thereby disadvantage itself in the downstream market, as compared to non-retaliating service centers. Second, a service center's risk of spoiling its mill relationships with threats and incivility is lessened when other service centers behave similarly. Thus, the critical question is whether unilateral action was so risky that it would not have been rational for any service center, acting alone, to have acted the way it did. Stated differently, are Defendants' seemingly independently motivated complaints and pressuring of mills explicable only if there were an agreement that all would act?

Given the highly competitive, low margin nature of downstream market, Plaintiff s first argument has initial appeal. However, there is minimal evidence that Defendants actually followed through with their threats. See Pl.'s Ex. 25 at 46-48 (Pierce Dep.) (explaining that he was unsuccessful "in really **[*55]** increasing" sales with Ryerson after Wylie's. warning that Commonwealth's recognition of Champagne Metals was not good for the industry and would cost Commonwealth potential customers); Pl.'s Ex. 13 (Fruhwirth Dep.) at 76-79 (suggesting that Commonwealth was subjected to verbal abuse and "punished" but unable to confirm any lost business as a result); Pl.'s Ex. 43 (Zundel Dep.) at 57 (explaining that Commonwealth did not get VMG's Sooner Trailer business); but see Pl.'s Ex. 75 (showing that VMG/Integris remained a major Commonwealth customer). Moreover, because there are a number of unknown variables that would affect whether those isolated instances were, in fact, contrary to a Defendant's business interests, Plaintiffs argument fails.

Although there is considerably more evidence of Defendants complaining and/or threatening to relocate or to withhold business, Plaintiff makes no effort to quantify this risk and only haphazardly refers to the Defendants' industry expert John Campbell's admission that threats involve a "certain risk." Pl.'s Resp. at 86. Again, the Court recognizes that incivility is seldom appreciated or rewarded in any context. Yet, the evidence suggests that **[*56]** the Defendants faced little danger of harming, in any appreciable sense, their mill relationships and, even so, those risks were outweighed by the possible benefits. All parties seem to agree that threats and complaints are rather

[17] Plaintiff's evidence regarding Ryerson's alleged complaints to Alcoa regarding EMJ 15 years ago is hearsay. See Pl.'s Ex. 31 (Stevenson Dep.) at 20, 183-93 & 286-87.

common and that everyone complains about everyone else. See, e.g., Pl.'s Resp. P 24, at 11-12; Samuel's Ex. 37 (Mize Dep.) at 112-116 (explaining that Mike Champagne threatened to cause Sundowner Trailers to move its business from Alcoa if Alcoa did not recognize Champagne Metals as a distributor). More importantly, the experts, even Plaintiff's Dr. Murry, agree that it would not be irrational for a service center to threaten its mills regardless of whether other service centers did the same. Murry Dep. at 209 (agreeing that he could not say that any particular threat by any of the Defendants individually would be irrational); Wiggins Report P 116, at 40 & P 125, at 43 (explaining that the Defendants' conduct was consistent with individual profit-maximizing behavior).

Without some additional evidence tending to show that Defendants were not acting independently, Plaintiff has not made a threshold showing that a conspiracy existed. The Court considers **[*57]** the evidence with respect to each Defendant to determine whether such additional evidence is present.

b. EMJ

Plaintiffs evidence that EMJ participated in a conspiracy to drive Champagne Metals out of business and to send a message to other potential entrants consists of EMJ's refusal to sell its CTL line directly to Champagne Metals after stating that it would likely do so, complaints by EMJ representatives to Commonwealth in 1996 and 1997, and EMJ's attempt in April 1999 to ensure that Auto Crane did not move its business away from EMJ by quoting drastically reduced prices. [18] In response, EMJ explains that it never had a formal agreement to sell its CTL line to Champagne Metals and that it had no motivation to join an anti-Champagne Metals conspiracy because it left the aluminum sheet market in April 1997. Furthermore, EMJ argues that its complaints to Commonwealth are insufficient to raise an inference of a conspiracy. Although the Court accepts Plaintiff's contention that EMJ had a motive to conspire because it continued to compete with Champagne Metals in some regard (see Pl.'s Resp. at 7 n.6), Plaintiff's evidence nonetheless falls short.

[*58] i. Complaints by EMJ Representatives

Plaintiff presents evidence of complaints by two EMJ Representatives to Commonwealth regarding Plaintiff. Debbie Veale's statements to Bill Thomas at the time Plaintiff was setting up its business were summarized above. In brief, she expressed displeasure that Commonwealth was recognizing Plaintiff and asserted that she "had been in contact with her counterparts [at] the National Association of Aluminum Distributors group . . . and that they were not at all happy about [Commonwealth recognizing Plaintiff] and they had more clout and [Commonwealth] . . . would have to listen to them." Pl.'s Ex. 34 (Thomas Dep.) at 79. In addition, Max Rigdon, a sales manager at EMJ, allegedly told Thomas that he wished Commonwealth would not sell to Plaintiff. Id. at 85. However, Rigdon's comments were not intimidating, and he was "nice" about the situation. Id.

As already explained, Ms. Veale's reference to her counterparts' clout with Commonwealth is not direct evidence of a conspiracy. There is a reasonable, legal interpretation for what was said, which, when viewed in context, seems as plausible as the interpretation advocated by Plaintiff. **[*59]** Even her exploitation of Commonwealth's concern about other lost business does not tend to establish that the Defendants conspired. ***HN33***[] "Mere complaints are not sufficient proof [of a conspiracy] where the complaints are equally consistent with both an independent and a collusive interpretation." *Dunnivant v. Bi-State Auto Parts, 851 F.2d 1575, 1582 (11th Cir. 1988)*. At most, her statements are evidence that EMJ (or at least Debbie Veale on EMJ's behalf) was discussing Champagne Metals with other competitors and that none were happy about it. [19] However, Veale testifies that she did not know who at the Defendants were her "counterparts" and did not discuss Champagne Metals with anyone at those companies. EMJ's Ex. 6 (Veale Aff.) PP 3-4. Absent evidence from Plaintiff that Ms. Veale was referring to the Defendants, the

---

[18] Statements by Bruce Colin and Ron McClure regarding Kaiser's concern that EMJ would retaliate if Kaiser sold to Champagne Metals are hearsay and inadmissible to show that EMJ actually threatened Kaiser. Similarly, Plaintiff has offered no hearsay analysis with respect to EMJ's alleged call to Commonwealth reporting that Samuel would not be selling its CTL line to Champagne Metals as described in Mike Champagne's affidavit. See Pl.'s Ex. 1 (Champagne Aff) P 5, at 1-2. Therefore, the Court will not consider that testimony.

[19] The Court treats Ms. Veale's reference to her counterparts' unhappiness as non-hearsay for purposes of summary judgment.

probative value of her statement is greatly reduced. Moreover, to the extent that Ms. Veale was threatening Commonwealth, it was short-lived. According to Mr. Thomas, EMJ continued to purchase from Commonwealth and his subsequent conversations with Ms. Veale were "strictly business." Pl.'s Ex. 34 (Thomas Dep.) at 84.

[*60] Max Rigdon's statements are even less suggestive. According to Bill Thomas, Mr. Rigdon expressed his wish that Commonwealth would not sell to Champagne Metals pleasantly. Because these statements are not inconsistent with EMJ acting independently, Plaintiff must identify additional circumstantial evidence that would tend to establish that a conspiracy is a more likely explanation for EMJ's actions.

ii. The Auto Crane Incident & EMJ's Refusal to Sell Its CTL Line

Plaintiff identifies two other pieces of evidence to show that EMJ acted to thwart Champagne Metals' success. The first relates to EMJ's alleged promise to sell Mike Champagne its CTL line in 1996. Pl.'s Ex. 1 (Champagne Aff.) P 3, at 1. EMJ contends that the agreement to which Mr. Champagne refers was based on an EMJ employee's speculation that he was 99% sure that EMJ would sell to Mr. Champagne. EMJ's Reply at 1-2 (citing Champagne Dep. at 904). Although Plaintiff ultimately purchased the line at a higher price and through a broker, there is nothing about this incident to suggest that EMJ was working in tandem with the other Defendants to drive Plaintiff out of business. See also Wiggins Report P 167, at 57 **[*61]** (citing EMJ documents as showing that EMJ received a higher price for its CTL line from the broker than Mike Champagne had offered to pay).

Moreover, EMJ's aggressive tactics to please a customer being courted by Plaintiff are equally inconclusive. In April 1999, Auto Crane, an EMJ customer, asked Champagne Metals to do a test cut on a part in order to evaluate its performance. [20] Pl.'s Ex. 2 (Holloway Aff.) P 2, at 1. When EMJ learned that Plaintiff was in contact with Auto Crane, Chris Mathey of EMJ called Theresa Holloway, the metal buyer for Auto Crane, and "asked what EMJ was doing wrong, and why EMJ was not getting the business that Champagne Metals apparently had." Id. PP 1 & 3, at 1. Ms. Holloway's subsequent attempt to confirm EMJ's availability and prices was met with drastically reduced pricing. Id. P 4, at 1. John Reid, an EMJ salesperson, confirmed that he was told to do whatever it took to ensure that Champagne Metals did not get Auto Crane's business. Id. P 6, at 2. In referring to Mr. Champagne, Mr. Reid added that he couldn't "stand that little son of a bitch." Id.

[*62] Both the Auto Crane incident and EMJ's refusal to sell its CTL to Plaintiff suggest that EMJ was protective of its customer base and, possibly, hoping not to give Champagne Metals any competitive advantage or assistance. Such sentiment is hardly unexpected or contrary to legitimate business decision-making, especially if EMJ continued to compete with Plaintiff. Even when considered in conjunction with its complaints to Commonwealth in 1996 and 1997, Plaintiff's evidence against EMJ is wholly consistent with independent business practices and does not tend to establish the existence of a conspiracy or EMJ's participation in it.

c. Ryerson

Plaintiff's evidence that Ryerson participated in a conspiracy includes complaints to Commonwealth about its relationship with Champagne Metals, a Ryerson employee's presence in Champagne Metals' plant, and Alcoa's concern that recognizing Champagne. Metals might result in lost business from Ryerson and Integris. [21] Ryerson, in turn, contends that there is no evidence that it participated in any concerted activity regarding Plaintiff. Again, the Court agrees.

---

[20] Auto Crane manufactures cranes, crane service bodies, hydraulic air compressors, and crane accessories. Pl.'s Ex. 2 (Holloway Aff.) P 1, at 1.

[21] Craig Colyer's statements to Mike Champagne are hearsay. Plaintiff has not provided an affidavit or indicated that Mr. Coyler would testify at trial about his experiences in the industry and how the "game" works. Moreover, Plaintiff's evidence that Ryerson threatened Alcoa in the past not to recognize EMJ is hearsay. Pl.'s Ex. 31 (Stevenson Dep.) at 20, 183-93 & 286-87. However, Defendants' effort to rely on that evidence to show that the Defendants were adversarial is contrary to their evidentiary objection. Nevertheless, even if stipulated to, its probative value on the conspiracy issue is minimal. Finally, Mr. Champagne's recounting of what Janet Kazinski of Acme Engineering told him is hearsay. Pl.'s Ex. 9 (Champagne Dep.) at 1127-29 (reporting that Ryerson told Acme that Champagne Metals "would not be able to buy metal or compete in that business").

[*63] i. Complaints by Ryerson Representatives

Although Gary Fehr of Ryerson reportedly told Tom Warner that Ryerson wished Commonwealth "had come to [Ryerson] to try to penetrate further in that market," Pl.'s Ex. 36 (Werner Dep.) at 17-18, most of Plaintiff's evidence centers around the statements made by Ryerson representative, Phil Wylie. Wylie was apparently "incredulous" that Commonwealth was doing business with Champagne Metals and apparently had several conversations with Matthew Zundel of Commonwealth, complaining:

> That he felt mainly that the price that Champagne Metals would take to the marketplace would be such that margins as a whole for everyone that needed to compete at that price would compress to such a narrow number that it would be im - impossible to compete and still make a profit.
>
> . . .
>
> He felt that -- he felt that by [Commonwealth's] participation with Champagne Metals, that himself and other potential customers within the industry would find that Commonwealth selling to Champagne, they -- they would find that as, again, not in the best interest of the industry, and would cause other distributors in that area of the country to source their **[*64]** metal from other mill sources, and that by developing a relationship with Champagne Metals, we would be putting other business with other potential customers at risk.

Pl.'s Ex. 43 (Zundel Dep.) at 22-24. No specific customers were mentioned by name. Id. at 24-25.

Later, after Garry Pierce took over Mr. Zundel's accounts, he and Wylie also had an "impassioned discussion" about Champagne Metals. Pl.'s Ex. 25 (Pierce Dep.) at 41-42. Mr. Wiley reiterated his belief that Plaintiff did not meet the distributor criteria, that there was already adequate product coverage, and that the most likely result of recognition would be to bring prices down. Id. at 42. Wiley apparently implied that Commonwealth would find it difficult to sell to Ryerson in the future, and Pierce suggested that he was unsuccessful increasing sales afterwards. Id. at 46-48.

For the reasons already explained, Ryerson's complaints and even a decision not to increase its business with Commonwealth as "punishment" are consistent with Ryerson's independent business interests. Again, like Debbie Veale's statements, Wylie may just as likely have been commenting on the likelihood that other service centers **[*65]** were equally concerned about Champagne Metals when he said that Commonwealth risked losing potential customers because of that relationship. That Wylie referred to the industry in general terms rather than a specific group of current customers does nothing to aid Plaintiff. See *Mitchael, 179 F.3d at 860* (finding common concern about costs inconclusive, even when coupled with information sharing and parallel use of third party review). Moreover, even if Ryerson withheld certain business, it had been a major Commonwealth customer through 2001. See Pl.'s Ex. 75. Thus, notwithstanding its representative's passion, Ryerson's purchasing practices appeared largely unaffected.

ii. Ryerson Employee at Plaintiff's Plant

Additionally, the Ryerson employee speeding away from Champagne Metals' plant (followed by an "embarrassed" call from Ryerson's General Manager) does not indicate that Ryerson was participating in a conspiracy. See Pl.'s Ex. 9 (Champagne Dep.) at 1179-80, 1182-85 & Pl.'s Ex. 16 (Hull Dep.) at 104-08. In Rossi, the monitoring and enforcement evidence supported an inference of conspiracy when viewed together with other evidence (including direct) **[*66]** tending to show that the defendants had conspired to cut off the plaintiff's supply. *156 F.3d at 470*. However, in this case, spying is as consistent with a zealous competitor acting independently as it is with a conspiracy theory.

Alcoa's Concern About Losing Business

Finally, Alcoa's decision-making process about whether to develop a relationship with Champagne Metals does not suggest that its major distributors engaged in a concerted campaign against recognition. John Guest, an Alcoa district manager, was aware that Plaintiff competed with Integris and Ryerson and was concerned that recognizing

Plaintiff would result in a net loss of business. See Pl.'s Ex. 57 (Guest Memo). Specifically, Guest wrote, "Relative to market coverage, [Champagne Metals does] compete with Ryerson, RASCO, VMG and we risk losing more than we would gain." Id. In his deposition, Guest explained that Alcoa had lost business from a disgruntled distributor (i.e., Reliance Steel) years before and that selling to Plaintiff would have been inconsistent with Alcoa's recent consolidation of its distribution network. See Pl.'s Ex. 14 (Guest Dep.) at 92. Moreover, Mr. Guest could not **[*67]** recall any communication between himself and a Ryerson representative regarding Plaintiff. Id. at 104-105.

Regardless, it does not follow from Alcoa's acknowledgment that its distributors could react negatively to such a change that Ryerson and Integris were in cahoots to pressure Alcoa and the other mills into refusing to deal with Champagne Metals. Even in cases of a vertical conspiracy allegation, courts recognize a supplier's right to bow to customer pressure as long as it acts independently. See *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1226 n.4 (10th Cir. 1986)* (permitting a manufacturer to weigh the threat of losing dealer loyalty when making distributorship decisions); *Garment Dist., Inc. v. Belk Stores Servs., Inc., 799 F.2d 905, 909 (4th Cir. 1986)* (requiring additional evidence of a price-fixing conspiracy even if competing distributor is terminated as a result of complaints that "constitute economic duress, coercion, and threats"). Here, Plaintiff repeatedly disclaims any allegation that the mills were co-conspirators or otherwise complicit in a price maintenance scheme. Thus, even in the aggregate, there is no evidence **[*68]** connecting Ryerson to a conspiracy.

d. Ken-Mac

With respect to Ken-Mac, Plaintiff's evidence of its involvement in a conspiracy consists of complaints to Commonwealth and Ormet, Larry Parsons' threat to stop Champagne Metals, and the attempt to purchase the business in 1999. Like the prior Defendants, Ken-Mac characterizes Plaintiff's case as a composite of ambiguous circumstantial evidence and argues that it, in particular, had no motive to conspire because it made relatively few sales in the region.

i. Complaints to Mills

In 1996, Dean Sturges (then with Ken-Mac) told Bill Thomas that Ken-Mac wished Commonwealth would not recognize Champagne Metals, but was not intimidating. Pl.'s Ex. 34 (Thomas Dep.) at 181-82. Like Max Rigdon's statement discussed above, nothing about Mr. Sturges' comment is extraordinary or indicative of a conspiracy.

However, Plaintiff offers more extensive evidence that Ken-Mac was interested in Ormet's consideration of Champagne Metals as a distributor in 2001 and 2002. [22] Harry Sneigle of Ormet testified that he received innuendos, comments, and posturing from Larry Parsons about Champagne Metals but denied that Parsons specifically pressured **[*69]** him not to recognize Plaintiff as a distributor. Pl.'s Exs. 28 (Sneigle Dep., Vol. I) at 123 & 29 (Sneigle Dep., Vol. II) at 18-19. Mr. Sneigle also had a series of discussions with Clark Borgelt of Champagne Metals in which he attempted to explain Ormet's hesitation in selling to Champagne Metals directly. Mr. Sneigle testified that there was "constant pressure in the marketplace" and that he would have to explain to customers, including Larry Parsons, why Ormet was recognizing Champagne Metals, it if did. Pl.'s Ex. 28 (Sneigle Dep., Vol. I) at 122-23. He also admits that he told Mr. Borgelt that Ormet would be "punished" if it sold to Champagne Metals and, specifically, that "they"ll punish us," but explains that none of the service centers ever threatened to "pull pounds" because of sales to Champagne Metals. Id. at 124; Pl.'s Ex. 29 (Sneigle Dep., Vol. II) at 42. Sneigle confirmed that he proposed that Ormet sell to Champagne Metals through a third party, at least partly to evaluate Champagne Metals as a long-term partner, but that he probably would have stopped the process had there been complaints. Pl.'s Ex. 28 (Sneigle Dep., Vol.I) at 119-121.

[*70] Ormet's Keith Forniss confirmed during his deposition that a key issue in recognizing Champagne Metals was the "potential fallout from Samuel, Metalwest and possibly Ken-Mac." Pl.'s Ex. 53 (Call Report). However, it appears that Mr. Champagne's candid comments about what he considered the "uproar" from competitors may

---

[22] Apparently, Ormet had previously considered and rejected Champagne Metals as a distributor in 1998. See Pl.'s Ex. 9 (Champagne Dep.) at 406.

have been the impetus for Mr. Forniss' specific reference rather than his own appreciation of the risks or any communication from the Defendants. See id.

Thus, although Ken-Mac engaged in posturing and innuendo, there is no basis to find that displeasure or complaints escalated to a direct threat. Moreover, even if they had, Ken-Mac would not have been acting against its own interests. Complaints by Ken-Mac to Commonwealth and Ormet were rational expressions of its not wanting another competitor to have relationships with the same mills that it did. To the extent that Ormet was afraid of Ken-Mac "punishing" it for recognizing Champagne Metals, those concerns do not suggest that its distributors were complaining as part of a concerted effort. That Ormet personnel were concerned about losing business from more than one Defendant or referred to them collectively as **[*71]** "they" might suggest that each was complaining but does not tend to show, on this record, that any or all of the Defendants were acting together.

ii. Buy-Out Attempt and Larry Parsons' Comments

Between the time Mr. Sturges expressed his disappointment to Bill Thomas in 1996 and Champagne Metal's 2001 efforts to become an Ormet distributor, Ken-Mac attempted to purchase Champagne Metals. According to Mike Champagne, during the meeting:

> Mr. Parsons made the comment that he would have gotten it done, meaning kept Commonwealth from selling to Champagne Metals. It is common knowledge that Larry Parsons wields substantial power in the aluminum industry. Mr. Parsons further stated that Champagne Metals was the biggest mistake in his career, and that if he would have known about Champagne Metals, it would have been stopped. Mr. Parsons implied that the other service centers had messed up, but he could get everyone together to make it happen. Mr. Parsons also stated that if Ken-Mac owned Champagne Metals, Champagne Metals would have access to domestic aluminum mills, which would affect Champagne's bottom line instantly with a better buying price for aluminum-seven to nine or **[*72]** ten percent better.

Pl.'s Ex. 1 (Champagne Aff.) P 9, at 2.

Plaintiff places significant emphasis on Larry Parsons' statements as suggesting that a conspiracy existed. Although inculpatory as to attempts to disrupt or prevent Commonwealth's dealings with Champagne Metals early on, the comments may show that Parsons intended to form or to join a subsequent effort to stop Champagne Metals. Plaintiff's best argument, it would seem, would be that that implication combined with Ormet's bowing to pressure from its major customers (which included Ken-Mac, Samuels, and Metalwest) tends to establish a conspiracy. Were there more than Mr. Parsons' implications during a buy-out attempt and some evidence of a threat to Ormet (rather than shoptalk and innuendo), Plaintiff might have tipped the balance towards a conspiracy being more likely than not, at least with respect to Ken-Mac. However, given Ken-Mac's comparably low sales in the region and the absence of any strong motive to conspire (detailed above), a finding that such a conspiracy existed would be speculation rather than reasonable inference. See Wiggins Report P 68, at 57-58 (discussing Ken-Mac's sales).

e. Metalwest

[*73] Plaintiff's evidence with respect to Metalwest includes negative statements to Commonwealth and Ormet, Ormet's concern about losing Metalwest's business, and comments to a customer regarding Champagne Metals' ability to secure required products. [23] Metalwest contends that Plaintiffs evidence does not reasonably support an inference that Metalwest joined an existing conspiracy after it entered the aluminum business in 1998.

i. Complaints to Mills

Although Metalwest expressed displeasure regarding Commonwealth's relationship with Champagne Metals, there is no evidence that it was threatening or acting contrary to independent business interests. Bill Thomas explained

---

[23] The Court does not consider Clark Borgelt's "belief' that Metalwest probably exerted pressure on Ormet. It is either hearsay or pure speculation.

that he was told, in a non-intimidating way, that Metalwest wished Commonwealth would not sell to Champagne Metals. Pl.'s Ex. 34 (Thomas Dep.) at 104. Pam Fruhwirth of Commonwealth admitted that **[*74]** she told Mike Champagne that "people asked [her] to do something about [Mr. Champagne], and … that pretty much everywhere [she] went people were throwing rocks at him." Pl.'s Ex. 13 (Fruhwirth Dep.) at 65-66. With respect to Metalwest in particular:

> The rock throwing … was more like target practice rather than a buckshot. If there was a specific event, Dean [Sturges] would get, you know, pretty negative about the fact that they were selling--that we were selling [to] Champagne Metals, but I don't know. I would say that on this scale he swung both--you know, went from one extreme to the other.

Id. at 89. By "target practice," she was referring to competitor's displeasure when Champagne Metals received an OEM contract, and "buckshot" encompassed "the general whining about Mike's personality, the fact that we recognized him, the prices that were being sold in the market." Id. at 89-90. However, although he made buying decisions for Metalwest for a time, Mr. Sturges never suggested that he might use his authority to the detriment of Commonwealth, and Ms. Fruhwirth had "zero concern" about losing Metalwest business. Id. at 92-96.

Ormet's Harry **[*75]** Sneigle testified that he received innuendos, comments, posturing and position posturing from Metalwest's Carol McSwain. Pl.'s Ex. 29 (Sneigle Dep., Vol. II) at 18. However, Ms. McSwain apparently told Sneigle, "Harry, it's your business, and you need to do what you want to do with it." Metalwest's Ex. 22 (Sneigle Dep., Vol. II) at 53. Except for a single conversation, Mr. Sneigle heard no other complaints from Ms. McSwain, even after Ormet began selling to Plaintiff through Metal Exchange. Id. at 52-53.

ii. Comments to a Customer and Ormet's Concern

In addition, Plaintiff argues that Metalwest used Plaintiff's supply limitations to secure customers. Dean Sturges admits that he told Mel Pierce of Exiss Trailers that Plaintiff could not supply the requisite painted product because Ormet would not sell painted product to Champagne Metals. Pl.'s Ex. 32 (Sturges Dep.) at 120-21. As his reason, Mr. Sturges described an incumbency practice the gist of which is that mills "protect the people that currently have the business." Id. at 122. Plaintiff does not suggest that Mr. Sturges' comments were untrue. Nor does there appear to be anything about them to indicate an agreement **[*76]** among the Defendants. Plaintiff also cites Ormet's concern about losing business, including from Metalwest. The same analysis set forth above with respect to Ken-Mac applies here.

In sum, Plaintiff fails to show that Metalwest acted in any manner inconsistent with its own best interests. Moreover, Plaintiff offers no explanation why Metalwest, representing such a small share of the market, would be brought into the conspiracy after entering the aluminum business in 1998. Under the circumstances, there is insufficient evidence that Metalwest knowingly joined a conspiracy and acted to further its objectives. See *Hall v. United Air Lines, Inc., 296 F. Supp. 2d 652, 663 (E.D.N.C. 2003)* (explaining that ***HN34***[] liability for acts of the entire conspiracy accrues only after showing joinder with knowledge of the enterprise and action in furtherance of it).

f. Samuel

Except for the 1996 purchase offer, the evidence against Samuel consists of statements to mills later in Plaintiff's history and two mills' concerns about lost Samuel's business if they recognized Champagne Metals as a distributor. As before, Samuel claims that Plaintiff has insufficient evidence that a conspiracy **[*77]** existed.

i. Complaints to Mills

Plaintiff attaches an October 2000 E-mail to Kevin Yonker of Pechiney Rolled Products from Samuel's Gary Rea inquiring about its recognition of Champagne Metals and forwarding an internal E-mail from Brenda MacInnis to Rea stating in part, "Hope it's not true!" Pl.'s Ex. 62. Later that year, Ms. MacInnis discussed Ormet's potential recognition of Champagne Metals with Keith Forniss, at which time she suggested that Samuel would view the recognition of Champagne Metals negatively. See Pl.'s Exs. 12 (Forniss Dep.) at 46-50 & 48 (12/20/01 E-mail). In internal correspondence, Forniss referred to the potential fallout from Samuel (and Ken-Mac and Metalwest) and cautioned, "this could be a very sticky situation with MacInnis/Samuels. . . . We must tread very lightly on this one." Pl.'s Exs. 12 (Forniss Dep.), 50 (12/6/01 E-mail) & 53 (12/19/01 Call Report).

Paul Sutcliffe of Samuel also testified during his deposition that he was in contact with Ormet representatives during this time regarding its consideration of a Champagne Metals distributorship. Pl.'s Ex. 33 at 71 (Sutcliffe Dep.). Sutcliffe also E-mailed Wayne Basset, President and CEO of **[*78]** Samuel, Son & Co., suggesting, "Perhaps a word with Emmett [Boyle, Ormet's Chairman and CEO] would help?" Pl.'s Ex. 61 (1/21/02 E-mail). However, Mr. Boyle testified that no distributor has ever complained to him or expressed concern about sales to a new customer. EMJ's Ex. 28 (Boyle Dep.).

Viewing all the evidence in the light most favorable to Plaintiff does not support a reasonable inference of conspiracy. ***HN35***[] Pressuring a supplier not to deal with a rival is not actionable under *Section 1* unless the supplier and competitor conspire (which is not alleged here) or a horizontal conspiracy among competitors exists. There is no evidence of collaboration or agreement among the Defendants apart from their similar behavior towards the mills. Without more, a jury could not reasonably find that a conspiracy existed. Moreover, there are also indications that Samuel's animus was not simply the product of concern about Mike Champagne's reputation for aggressive pricing, but involved Plaintiff's courting a Samuel employee and coveting its business. See Pl.'s Exs. 48 (12/20/01 E-mail), 50 (12/6/01 E-mail), 61 (1/21/02 E-mail), 33 (Sutcliffe Dep.) at 76-77.

ii. Early Purchase Offer

[*79] Samuel's purchase offer adds nothing. Mike Champagne testifies that Paul Sutcliffe offered to purchase his business within its first week for "upwards to a million dollars." Pl.'s Ex. 9 (Champagne Dep.) at 257-58. It is not inherently irrational for a company to attempt to purchase a potential rival at its inception, even for an inflated amount. To the extent that Plaintiff is suggesting that Samuel's price (which incidentally was rejected) was too high and contrary to sound business judgment, the Court cannot agree. As it stands, the Court is not prepared to second guess Samuel's judgment or view its offer as indicative of a conspiracy. See *Williamson Oil Co., 346 F.3d at 1310* (warning that prudence must be exercised before labeling a given action as being contrary to the actor's economic interests); *In re Citric Acid Litig., 191 F.3d 1090, 1101 (9th Cir. 1999)*. Consolidation and merger may be common in this industry, for the reasons outlined in the experts' reports or otherwise, but Samuel's failed buy-out attempt does not tend to establish an agreement among the Defendants to drive Plaintiff out of business.

iii. Mill Concern

Again, Keith **[*80]** Forniss' reference to potential fallout from recognizing Champagne Metals as a distributor does not show that the Defendants were complaining or that, if so, they were engaged in a campaign of complaining. Similarly, the fact that Ravenwood (pre-Pechiney acquisition) was concerned about potential loss of Samuel and VMG business and that this concern played a part in its decision not to recognize Champagne Metals as a distributor does not alter the above conclusion. Scott Easter of Ravenwood testified that neither Samuel nor VMG voiced a concern or threatened to move business if sales were made to Champagne Metals. Pl.'s Ex. 11 (Easter Dep.) at 31-33.

g. Integris

Finally, Plaintiff's evidence against Integris consists of threats against Commonwealth, Guy Stoker's presence in Champagne Metals' plant, and mills' concern about potential lost business. Arguing that Plaintiff's evidence is fatally deficient, Integris contends that the only evidence linking it to the alleged conspiracy are threats directed at Commonwealth, which failed to have any effect on the mill's relationship with Champagne Metals.

i. Threats and Complaints to Mills

In 1998 and 1999, VMG's sales manager **[*81]** was particularly vocal about Commonwealth's business relationship with Champagne Metals. Pl.'s Ex. 43 (Zundel Dep.) at 34. The objections included disbelief:

> that Commonwealth would do business with Champagne Metals, that Commonwealth is hurting the amount of business that [it does] with Vincent Metals Goods as a result of doing business with Champagne Metals, and

> referenced several specific pieces of business … that [Commonwealth] would never see that or never have an opportunity to participate in that business with Vincent Metal Goods as long as that relationship with Champagne was in effect.

Id. The particular piece of business in question was with Sooner Trailer. Id. at 56-57. Matthew Zundel believes that VMG sourced the business with Alcan, and, although he did not know Alcan's price, he believes Commonwealth's prices were extremely competitive. Id. at 58-59. Stephen Williamson of Commonwealth also heard comments about market impact and market position from representatives of VGM and RASCO that he characterized as implied threats. Pl.'s Ex. 39 (Williamson Dep.) 19-25, 32.

In 2001, Henry Spies of VMG also told Commonwealth's Garry Pierce that there **[*82]** would be "a price to pay" for selling to Champagne Metals. Pl.'s Ex. 25 (Pierce Dep.) at 58, 84, 119-20. [24] Spies and Al Hunter admit that they expressed concern and were disappointed about Champagne Metals' recognition as a Commonwealth distributor. Pl.'s Exs. 17 (Hunter Dep.) at 19-22 & 30 (Spies Dep.) at 39-40. Pam Fruhwirth also included Mr. Spies and Mr. Hunter among those who were "throwing rocks" at Mike Champagne. See Pl.'s Ex. 13 (Fruhwirth Dep.) at 65, 87-89.

However, since 1996, Integris or its predecessors collectively have been an important Commonwealth customer. See Pl.'s Ex. 75. Notwithstanding these threats, Commonwealth renegotiated its annual supply contract with Plaintiff with favorable pricing. See Integris **[*83]** Reply Br. at 2. Under the circumstances, it hardly seems reasonable to assign much significance to those threats much less to consider them as part of a collective effort.

ii. Monitoring and Mill Concern

Plaintiff's remaining evidence specific to Integris includes VMG's Guy Stoker's presence in Champagne Metals' plant in 1998 and Alcoa and Ormet's concern about lost business. [25] **[*84]** As with Ryerson's alleged spying, Mr. Stoker's unauthorized presence at Plaintiff's facility is not suggestive of a conspiracy. Moreover, Alcoa's concern about jeopardizing its business with Integris and Ryerson was also addressed above. See Ryerson discussion, supra, pp. 45-47. Similarly, it is unnecessary to repeat the analysis regarding Scott Easter's testimony regarding the concern Ravenwood had about recognizing Champagne Metals as a distributor. [26] None of this evidence, viewed in isolation or collectively, tends to exclude the possibility that Integris' predecessors were acting independently. In sum, there is insufficient evidence that Integris or its predecessors participated in a conspiracy to harm Plaintiff with Commonwealth or any other mill.

Conclusion

HN36[] Plaintiff cannot, as a matter of law, survive summary judgment by pointing to behavior as consistent with the Defendants' individual business interests as with a collective effort. ***HN37***[] Defendants' concern about a price-cutting/customer-coveting competitor does not supply a sufficiently strong motive to compensate for the considerable economic evidence that suggests a group boycott would offer few benefits and considerable risk to the Defendants. Furthermore, the failure to achieve the alleged objective is strong evidence that the conspiracy did not exist. See *Matsushita, 475 U.S. at 592*.

[24] The Court considers only statements made before November 2001 that could be characterized as threats in conformity with the hearsay ruling above. Plaintiff explains that Pierce's conversations with Henry Spies and Dave Nuccetelli occurred in mid-2001. Pl.'s Resp. P 59, at 31.

[25] Because Mr. Stoker's alleged statements were not threats, they are not considered under the verbal act exception.

[26] The Court does not consider Alcan documents referring to Rasco and VMG's "displeasure" at Commonwealth's recognition of Champagne Metals for the truth of those references. Pl.'s Exs. 68 & 69. Plaintiff fails to lay a proper foundation for their admission.

Viewed in the light most favorable to Plaintiff, the evidence does not tend to establish that the Defendants agreed to act together, or that their individual actions were likely part of a coordinated effort. In short, **[*85]** Plaintiff fails to rebut evidence that Defendants acted rationally and in accordance with their own profit-maximizing interests or to adduce other evidence that tends to exclude the possibility of independent action. Ultimately, Plaintiff paints a picture of a highly competitive business that is historically inhospitable to new. entrants--one that Mike Champagne not only knowingly entered after more than twenty years in the business but also in which he has managed to build a profitable business at a time when others have failed or suffered financial setbacks. Even when every piece of evidence is considered against the Defendants collectively, Plaintiff fails to offer significant probative evidence that a conspiracy is a more likely explanation for the Defendants' statements and conduct than not. Therefore, summary judgment on Plaintiff's *Section 1* claim is granted in Defendants' favor.

III. *Oklahoma Antitrust Reform Act*

In addition to its *Section 1* claim, Plaintiff argues that Defendants' conduct violated the Oklahoma Antitrust Act. ***HN38***[] Although similar to its federal counterpart in many respects, Oklahoma's statutory regime is unique in that it reaches purely unilateral acts **[*86]** in restraint of trade. *Harolds Stores, Inc. v. Dillard Dep't Stores, Inc., 82 F.3d 1533, 1550 (10th Cir. 1996)*; *79 Okla. Stat. § 203(A)*. [27] Therefore, even absent evidence of a conspiracy, Defendants' independent acts may support state antitrust liability.

A. Unilateral Restraints of Trade

Notwithstanding their extensive briefing, the parties have done little to flesh out arguments made in the context of the federal claim but incorporated and relevant as to the Oklahoma antitrust claim. Specifically, no effort is made to discuss whether a common law continuing violation theory could be a viable exception to the four-year statute of limitations. Absent persuasive argument to the contrary, the Court considers **[*87]** only those acts that could reasonably be considered restraints of trade occurring within the four years preceding the filing of the Complaint. Based on Plaintiffs presentation of the facts, and affording Plaintiff every possible benefit, only Ryerson, Integris, Samuel, Metalwest, and Ken-Mac arguably acted in restraint of trade during that time period. Specifically, those Defendants allegedly pressured or threatened mills not to do business with Champagne Metals.

B. Injury to Competition

However, there is no evidence that those individual acts harmed competition. Defendants' arguments against a rule of reason approach in the context of *Section 1* analysis apply to the state statutory claim with equal, if not greater, force. ***HN39***[] Notwithstanding the Oklahoma Act's more expansive reach already identified, it, like *Section 1*, only applies to *unreasonable* restraints of trade. See *Fine Airport Parking, Inc. v. City of Tulsa, 2003 OK 27, P 13, 71 P.3d 5, 10*; *Harolds Stores, 82 F.3d at 1548*.

> The fundamental test of the reasonableness of an action, which, by its nature, restrains trade, is its effect on the public. To amount to an unreasonable **[*88]** restraint of trade the anticompetitive conduct must have an effect greater than its effect upon the plaintiffs business. That is, the conduct must have an adverse impact on the competitive conditions in general as they exist within the field of commerce in which the plaintiff is engaged. An antitrust plaintiff must show that the challenged conduct adversely impacts competition in general because the antitrust laws were enacted for the protection of competition, not competitors.

Harolds Stores, 82 F.3d at 1548 (internal quotations and citations omitted).

---

[27] The Court notes that the conclusion that the Oklahoma Antitrust Act reaches unilateral acts has not actually been decided by an Oklahoma appellate court. However, it has been so interpreted by the Tenth Circuit and that interpretation is binding on this Court.

In response, Plaintiff argues competition is injured because Defendants' concerted effort to harm it (and the long-standing practice of service centers pressuring mills) deters entry. Plaintiff observes, "Competitors may not concertedly exclude another from their market because they want to keep it for themselves . . . . Freedom of entry is independently an antitrust value. It is entitled to protection irrespective of allocative consequences or impact on output and prices." Pl.'s Resp. at 70-71 (quoting Sullivan and Grimes, The Law of Antitrust: An Integrated Handbook, Boycotts & Other Concerted Refusal **[*89]** to Deal, § 5.8, p. 269 (West 2000)). Dr. Murry confirms that, here, the relevant "competitive harm" would be to other potential entrants in the service center business. Murry Dep. at 192.

Although Plaintiff's recitation of antitrust principles is correct, its theory lacks evidentiary support in this instance. Dr. Murry did not consider to what extent others in the industry were aware of Champagne Metals' supply problems and the Defendants' alleged role in causing those difficulties. Murry Dep. at 181-84. Dr. Murry also could not identify a particular, potential entrant that was discouraged from entering the market because of Champagne Metals' experiences. Id. Regardless of industry rumor and speculation, to the extent that Plaintiff remains in business and continues to grow, whatever theoretical deterrent value Defendants' actions might have had appears lost.

Moreover, Dr. Murry agreed that, in competitive markets in which no super competitive profits are available, the lack of entry is not necessarily evidence of a barrier to entry. Id. at 185-87; see also Wiggins Report P 105, at 35. The evidence available suggests, as discussed in greater depth above, that service **[*90]** centers compete among themselves and against mills for end users and that the products are largely homogeneous, customers are sophisticated buyers, and profit margins are low. Thus, this description of the industry seemingly fits the parameters defined by Dr. Murry. There is no evidence or reason to believe that Defendants could control price or output (Wiggins-Report PP 109-114, at 37-38), yet Plaintiff attempts to argue itself out of this corner. "Defendants' argument that price and output are not affected by their exclusionary conduct depends on the supposed absence of barriers to entry." Pl.'s Resp. at 69. But, again, there is no evidence of any barriers, natural or artificial. There was no effort by Dr. Murry to verify whether Champagne Metals was not actually receiving competitive prices. Murry Dep. at 154-162. Nor is there evidence that any mill or end user would be harmed by Champagne Metals' failure. Id. at 192-93 (explaining that he did not investigate any potential impact on mills) & 191 (explaining that he did not attempt to quantify an impact on customers). [28]

[*91] Finally, and most importantly, perhaps, with respect to the state antitrust claim, Plaintiff offers no argument or evidence regarding what deterrent or anticompetitive effect the Defendants' individual acts had on competition. The evidence in this case stands in sharp contrast to that in Harolds Stores, where the same Dr. Murry had testified that competition was harmed by Dillard's copyright infringement not only because of a free rider concern but also because of Dillard's size. *82 F.3d at 1549*. The net effect was to send "a signal to anybody else that wants to enter this market, that if you come in here, you're going to get squashed because this big company will exercise its power and take your copyrights." Id. Similarly, in Reazin, Blue Shield's threatened termination of its competitor's affiliate hospital excluded competition because it inhibited Kansas hospitals from pursuing alternative delivery systems, which would have benefitted consumers by causing lower future health care costs. *899 F.2d at 966 & 971*. [29] Notably, Blue Shield's size or dominance in the market translated into "clout" over hospitals, giving it the power to exclude competition **[*92]** in this way.

Here, whatever problems Plaintiff has endured in securing necessary aluminum products at "competitive" prices, it has remained in business and experienced continued growth. There is no evidence that any Defendant, as it existed at the time of the alleged restraint, had the ability to influence mills or to deter prospective competitors. See Wiggins Report P 107, at 36 (explaining that Dr. Murry overstated market share by failing to account for competition with mills); Murry Dep. at 211 (refusing to say that any Defendant could alter price in his relevant market). Thus,

---

[28] These and additional problems with Dr. Murry's opinions, including those related to his definition of the relevant market, are detailed in the Court's separate Daubert Order.

[29] Blue Cross engaged in a horizontal conspiracy by conspiring with certain hospitals to harm their competitor, another hospital. *899 F.2d at 965*.

Plaintiff has failed to identify evidence of an actual injury to competition attributable to any Defendant. Therefore, summary judgment on the state antitrust claims is granted in favor of all Defendants.

IV. Tortious Interference

Plaintiff has additionally asserted **[*93]** a state-law claim against Defendants for tortious interference with business relations. ***HN40***[] To state a claim for tortious interference, Plaintiff must allege that: (1) Plaintiff had a business or contractual right that was interfered with by Defendants; (2) the interference was malicious and wrongful and was neither justified, privileged, nor excusable; and (3) that Plaintiff suffered damage that was proximately caused by the complained-of interference. *Morrow Dev. Corp. v. Am. Bank & Trust Co., 1994 OK 26 P 10, 875 P.2d 411, 416*.

HN41[] The claim for tortious interference is governed by a two-year statute of limitations. *12 Okla. Stat. § 95(3)*; *Neff v. Willmott, Roberts & Looney, 1935 OK 119 P 10, 170 Okla. 460, 41 P.2d 86, 88*. The limitations period begins to run as soon as the "interference [is] fully accomplished." *Neff, 1935 OK 119 at P 10, 41 P.2d at 88*; see also *Metro Oil Co., Inc. v. Sun Refining & Marketing Co., 936 F.2d 501, 504 (10th Cir. 1991)* (explaining that statute begins to run the day the tortious act occurred). Therefore, the Court will consider only evidence of alleged acts of interference that **[*94]** occurred after April 22, 2000. After a careful review of Plaintiff's evidence, it appears that the alleged acts of interference were directed at Plaintiff's relationship with two mills - Ormet and Commonwealth. [30] As none of these alleged acts involve EMJ, summary judgment for Plaintiff's tortious interference claim against EMJ is granted.

A. Alleged Interference with Plaintiff's Business Relationship with Ormet

Plaintiff's claims for tortious interference with its business relationship with Ormet never gets off the ground because Plaintiff cannot establish that it had a business "right" to a distributorship with Ormet. ***HN42***[] In a claim for tortious interference with a business relationship, the **[*95]** business right interfered with is equivalent to a property right, not an expectation of future profits. *Schonwald v. Ragains, 1912 OK 210 P 4, 32 Okla. 223, 122 P. 203, 205*; *Overbeck v. Quaker Life Ins. Co., 1984 OK CIV APP 44 P 4, 757 P.2d 846, 847-48*, cited with approval in *Gaylord Ent. Co. v. Thompson, 1998 OK 30 P 49 n.96, 958 P.2d 128, 150*.

The claim for tortious interference with prospective business advantage appears to be more appropriate for these facts. ***HN43***[] To state a claim for tortious interference with prospective business advantage, Plaintiff must prove that: (1) it had a valid business relation or expectancy; (2) Defendants knew of the relationship or expectancy; (3) Defendants intentionally and improperly interfered with the relationship or expectancy and such interference was not privileged; (4) this interference caused a breach or termination of the relationship or expectancy; and (5) Plaintiff suffered damage as a proximate result. See *Gaylord, 1998 OK 30 at P 30 n.96, 958 P.2d at 150 n.96*; *Boyle Servs., Inc. v. Dewberry Design Group, Inc., 2001 OK CIV APP 63 at P 6, 24 P.3d 878, 880*; *Overbeck, 1984 OK CIV APP 44 P 4, 757 P.2d at 848-49.* **[*96]**

However, Plaintiff does not ask the Court to construe its claim as one for tortious interference with prospective business advantage. In fact, in its Response, Plaintiff denies that it needs to bring a claim for prospective economic advantage, choosing instead to rely solely on its claim for unreasonable interference with a contract or business right. [31] Pl.'s Resp. at 113. However, under either theory, Plaintiff's claim must fail.

---

[30] Although Plaintiff has presented evidence that in July 2000 Alcoa considered designating Plaintiff as a distributor but decided against it, at least in part, because Alcoa stood to lose business from Ryerson and Integris, it did not present any evidence of communication, much less interference by the Defendants.

[31] However, Plaintiff goes onto cite cases that were analyzing claims of tortious interference with prospective business advantage for support that it can state a claim for relief for interference in business relationships that have not been reduced to a contract. From this analysis, Plaintiff does not appear to appreciate the distinction between these two claims. Nonetheless, Plaintiff is unable to state a claim for these Defendants' interference with its relationship with Ormet under either theory.

Plaintiff presented evidence that Ormet received "innuendos and comments and . **[*97]** .. position posturing" from Ken-Mac, Metalwest, and Samuel. Pl.'s Ex. 29 (Sniegle Dep., Vol. II) at 19. However, Ormet's mill representative, Harry Sneigle, testified that none of these Defendants ever threatened to pull their business or punish Ormet if Ormet were to recognize Plaintiff as a distributor. Id. at 42. Ormet considered the innuendos and position-posturing as ordinary business "buzz," or "shoptalk" in which all competitors engage. Id. at 90-91, 96. In addition, Plaintiff has presented evidence that Samuel indicated to Ormet that it would view with disfavor any recognition of Champagne Metals as a distributor. Pl.'s Ex. 12 (Forniss Dep.) at 49-50. However, the evidence indicates that the threat of ramifications stemmed from bad blood between Samuel and Plaintiff; specifically, Plaintiff's courting and hiring away an employee of Samuel's and its desire to take over one or more of Samuel's existing accounts. Pl.'s Exs. 48 (12/20/01 E-mail), 50 (12/6/01 E-mail), 61(1/21/02 E-mail), 33 (Sutcliffe Dep.) at 76-77.

HN44[] Even if these acts were considered "interference," Plaintiff must also present evidence that the interference was *"malicious* and wrongful, *and ...* **[*98]** neither justified, *privileged* nor excusable." *Morrow Dev. Corp., 1994 OK 26 at P 10, 875 P.2d at 416*. It is not necessary to show that these Defendants were actually motivated by ill will to demonstrate malice, but rather that they intentionally committed an unreasonable and unlawful act without justification or excuse. Id. Therefore, it appears that the use of the term "malicious" in this context adds no additional element of proof other than that these Defendants committed the wrongful and unjustified act *intentionally.* These Defendants acted intentionally if they acted with the sole or primary purpose of inflicting an injury by interfering in the business relationship. Id.; *Boyle Servs., Inc., 2001 OK CIV APP 63 P 6, 24 P.3d at 880*.

HN45[] In addition to being malicious, the interference must also be wrongful in either its objective or in the means employed to accomplish the objective. *Gaylord Ent. Co., 1998 OK 30 at P 30 n.96, 958 P.2d at 150*. The interference is wrongful if it was unlawful or unfair or enacted by lawful means without justification. Id. Actions such as "fraud or misrepresentation or physical or moral **[*99]** intimidation or persuasion" may be considered unlawful or unfair. See *Schonwald, 1912 OK 210 at P 30, 122 P. at 210*.

HN46[] It is not unlawful for an entity to use fair and lawful argument and persuasion to interfere with another's contractual relations so long as it was done to protect or better one's own business and not done with the primary objective of destroying honest competition. Id. A competitor may exert economic pressure on or refuse to deal with third persons so long as the pressure is not intended to illegally restrain competition. See *Restatement (Second) of Torts § 768 cmts. e* & *f*. If Plaintiff cannot demonstrate that these Defendants' actions rise to an unreasonable restraint of trade, as a matter of law, it cannot overcome the competitor's privilege on a tortious interference claim. *Krebsbach v. Henley, 1986 OK 58 P 32, 725 P.2d 852, 859*.

Plaintiff has not produced any evidence that suggests that the acts of Ken-Mac, Metalwest, and Samuel in relation to Ormet were anything other than self-protective. Nothing about these Defendants' position-posturing suggests that they were acting with the primary **[*100]** purpose of injuring Plaintiff. Thus, Plaintiff is unable to demonstrate that any alleged interference by these parties was malicious. Further, Samuel's threat to view negatively any recognition of Plaintiff by Ormet is protected by the competitor's privilege. Samuel may threaten or refuse to deal with Ormet so long as Samuel's actions do not rise to the level of an unreasonable restraint on trade. As discussed in the previous sections, they do not. Therefore, Plaintiff's claims against Ken-Mac, Metalwest, and Samuel for tortious interference with Plaintiff's business relationship with Ormet, even if construed as claims for tortious interference with prospective economic advantage, fail as a matter of law. See *Krebsbach v. Henley, 1986 OK 58 at P 32, 725 P.2d at 859*. Accordingly, Ken-Mac, Metalwest, and Samuel are all entitled to summary judgment on Plaintiff's claim of tortious interference.

B. Alleged Interference with Plaintiff's Relationship with Commonwealth

Plaintiff has presented evidence of alleged interference with its relationship with Commonwealth by only two Defendants--Integris and Ryerson. The evidence against both Defendants stems from the deposition **[*101]** testimony of Gary Pierce, a Commonwealth representative. [32] Pierce testified that Henry Spies, of Integris' predecessor, VGM, told him that "there would be a price to pay" for selling to Plaintiff. Pl.'s Ex. 25 (Pierce Dep.) at 58, 84, 119-20. Pierce further testified that, to the extent of his knowledge, Integris has not subsequently reduced its purchases through Commonwealth. Id. at 85. As to Ryerson, Pierce testified that he and Phil Wiley of Ryerson had an "impassioned discussion" and that Wiley felt that the recognition of Plaintiff by Commonwealth would loot the marketplace and bring the prices down. Id. at 41-42. Pierce also testified that while he serviced the Ryerson account, it was not a great account and he was unable to increase the sales. Id. at 47. Pierce felt that this lack of growth in his sales to Ryerson was due, in part, to Commonwealth's decision to continue to recognize Plaintiff as a distributor. Id. at 48.

[*102] Integris' threat that there would be a "price to pay" for Commonwealth's recognition of Champagne Metals is an act of interference. Plaintiff has not suggested that this threat was a threat of physical violence; instead it argues that the threat was one of retaliation against Commonwealth by pulling Integris' business if Commonwealth continued to recognize Plaintiff as a distributor. As previously discussed, a competitor may threaten to, or, in fact, refuse to deal with a third party so long as it does not rise to the level of an unreasonable restraint of trade. As the evidence does not support a claim of unreasonable restraint of trade, it cannot support a claim for tortious interference against Integris and summary judgment is therefore granted.

Similarly, nothing about the impassioned discussion between Ryerson and Commonwealth supports an inference that Ryerson was acting outside its competitors' privilege. Ryerson's concerns that recognizing Plaintiff would result in flooding the market and bring prices down are legitimate business concerns. The fact that Pierce was unable to increase his sales to Ryerson after this discussion does not operate to defeat Ryerson's privilege for **[*103]** the reasons previously discussed. Therefore, Plaintiff's tortious interference claim against Ryerson also fails and Ryerson is entitled to summary judgment on this claim.

CONCLUSION

Accordingly, Defendants' individual motions for summary judgment (Dkt. Nos. 159, 169, 172, 178, 181, and 183) are GRANTED. No genuine issue exists for trial on any of Plaintiff's claims. All pending motions are stricken, as moot. Judgment shall enter forthwith.

IT IS SO ORDERED this 15th day of June, 2004.

Entered in Judgment 6/15/04

JUDGMENT

Upon consideration of the pleadings herein, the Court finds that Defendants' motions for summary judgment (Dkt. Nos. 159, 169, 172, 178, 181, and 183) should be granted, and judgment is therefore entered on behalf of all Defendants and against Plaintiff.

DATED this 15th day of June, 2004.

ROBIN J. CAUTHRON

United States District Judge

Entered in Judgment 6/15/04

---

[32] Although there are additional statements made by Integris' predecessors-in-interest which are relevant to this claim, these statements are hearsay and, as discussed above, not subject to the statutory exclusion provided by *Fed. R. Evid. 801(d)(2)*. Therefore, they are not admissible and are not considered.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss is appropriate only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. A court must presume all well-pleaded factual allegations in the complaint to be true and draw all reasonable inferences from those allegations in favor of the nonmoving party in applying *Fed. R. Civ. P. 12(b)(6)*. In evaluating a *Rule 12(b)(6)* motion to dismiss, the court is limited to considering facts alleged in the complaint, any documents either attached to or incorporated in the complaint, matters of which the court may take judicial notice, and matters of public record. Factual allegations in briefs or memoranda of law may not be considered when deciding a *Rule 12(b)(6)* motion, particularly when the facts they contain contradict those alleged in the complaint.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Adhesion Contracts

Contracts Law > Defenses > Unconscionability > Adhesion Contracts

Contracts Law > Defenses > Unconscionability > General Overview

HN2[] **Types of Contracts, Adhesion Contracts**

A contract of adhesion is defined generally as one imposed upon a powerless party, usually a consumer, who has no real choice but to accede to its terms. Even if a contract is one of adhesion, it is enforceable unless it is deemed unconscionable upon judicial scrutiny. The party seeking to establish unconscionability must prove not only that one of the parties lacked a meaningful choice but also that the terms of the contract are unreasonably favorable to the other party. A contract is not unconscionable merely because the parties to it are unequal in bargaining position.

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > General Overview

Copyright Law > ... > Civil Infringement Actions > Defenses > General Overview

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

HN3[] Misuse of Rights, Copyright & Trademark Misuse Defenses

The doctrine of copyright misuse, which has its historical roots in the unclean hands defense, bars a culpable plaintiff from prevailing on an action for an infringement of the misused copyright.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Copyright & Trademark Misuse Defenses

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN4[] Misuse of Rights, Copyright & Trademark Misuse Defenses

The doctrine of copyright misuse forbids the use of a copyright to secure an exclusive right or limited monopoly not granted by the U.S. Copyright Office and which is contrary to public policy to grant. The copyright misuse defense is analogous to the patent misuse defense. Whereas copyright law seeks to increase the store of human knowledge and arts by rewarding authors with the exclusive rights to their works for a limited time, the granted monopoly power does not extend to property not covered by the copyright. Misuse often exists where the patent or copyright holder has engaged in some form of anticompetitive behavior.

Civil Procedure > ... > Equity > Maxims > Clean Hands Principle

Civil Procedure > Preliminary Considerations > Equity > General Overview

Civil Procedure > ... > Equity > Maxims > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

HN5[] **Maxims, Clean Hands Principle**

The unclean hands defense closes the doors of a court of equity to a party tainted with inequitableness or bad faith relative to the matter in which she seeks relief and derives from the equitable maxim that one who comes into equity must come with clean hands.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Copyright Law > Scope of Copyright Protection > Ownership Rights > General Overview

HN6[] **Pleadings, Amendment of Pleadings**

Ordinarily, absent a formal motion to amend the complaint, a court does not treat the contents of an opposition to a motion to dismiss as an amendment to a complaint.

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

HN7[] **Unfair Competition, Federal Unfair Competition Law**

In trademark law, the mark holder usually does not have the ability to destroy competition. The holder can only keep competitors from using the mark, and, in most circumstances, cannot keep them from selling a directly competing product.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Copyright & Trademark Misuse Defenses

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

HN8[] **Misuse of Rights, Copyright & Trademark Misuse Defenses**

The doctrine of unclean hands is recognized only rarely in copyright cases, where the copyright holder's transgression is of serious proportions and relates directly to the subject matter of the infringement action.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Copyright & Trademark Misuse Defenses

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

HN9[] Misuse of Rights, Copyright & Trademark Misuse Defenses

The absence of evidence of an antitrust violation requires a party alleging copyright misuse to show that there has been an illegal extension of monopoly or other violation of the public policy underlying copyright law.

Copyright Law > ... > Elements > Copying by Defendants > Access

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > General Overview

HN10[] Copying by Defendants, Access

Although dissemination of creative works is a goal of the Copyright Act (the Act), *17 U.S.C.S. § 101 et seq.*, the Act creates a balance between the artist's right to control the work during the term of the copyright protection and the public's need for access to creative works. The copyright term is limited so that the public will not be permanently deprived of the fruits of an artist's labors. Nothing in the Act prevents an author from hoarding all of his works during the term of the copyright. A copyright owner has the capacity arbitrarily to refuse to license one who seeks to exploit the work.

Opinion by: Henry H. Kennedy, Jr.

Opinion

[*13] MEMORANDUM OPINION AND ORDER

Charging The Princeton Review, Inc. ("Princeton Review") with copyright infringement, misappropriation of trade secrets and fraud, the Association of American Medical Colleges ("AAMC"), brings this action alleging that Princeton Review unlawfully compromised the confidentiality and security of AAMC's Medical College Admission Test ("MCAT"). This action is brought under the Copyright Act, *17 U.S.C. § 101 et seq.* **[**2]** Princeton Review asserts two counterclaims, alleging that restrictions AAMC seeks to impose on (1) MCAT test takers and (2) purchasers of released MCAT questions are unenforceable because they constitute contracts of adhesion, violate the *First Amendment* and public policy, and because AAMC misused its copyright. Princeton Review also raises several affirmative defenses.

Before the court is AAMC's motion to dismiss Princeton Review's counterclaims and to strike five of Princeton Review's affirmative defenses [# 10]. Upon consideration of the motion, the opposition thereto, and the record of this case, the court concludes that the motion must be granted in part and denied in part.

I. BACKGROUND INFORMATION

AAMC is a nonprofit education association comprised of medical schools, teaching hospitals, faculty, medical students and residents. AAMC develops, administers, and owns all rights in and to the MCAT, a standardized test taken by applicants to medical and other health professions schools in the United States. Medical school admissions committees use the standardized MCAT score to compare the qualifications of medical school applicants. These **[**3]** committees generally consider the score in combination with other information, such as undergraduate records, references, and personal interviews to make admissions decisions.

AAMC administers the MCAT in April and August each year at test centers throughout the United States. Designed to assess the mastery of certain skills and concepts for the practice of medicine, the **[*14]** MCAT covers basic concepts in biology, chemistry, organic chemistry, and physics; facility with problem solving and critical thinking; and writing skills. The MCAT contains 221 questions in four sections: Verbal Reasoning, Physical Science, Biological Science, and a Writing Sample. With the exception of the Writing Sample, the sections consist of multiple choice questions. According to AAMC, it costs $ 250,000 to develop each MCAT test form.

AAMC registers its MCAT test forms and questions (including the answer choices) with the Register of Copyrights pursuant to the "secure test" regulations issued by the U.S. Copyright Office. *37 C.F.R. § 202.20*. Under the Copyright Act, AAMC has certain exclusive rights with respect to the test forms and the test questions, including the exclusive **[**4]** right to copy, distribute, display, publish and prepare derivative works. *17 U.S.C. § 106*.

AAMC endeavors to protect the secure nature of the MCAT test forms and questions by imposing certain restrictions ("MCAT Prohibitions"). Before administering the MCAT, exam proctors tell test takers that they are not allowed to "duplicate, record, or memorize any part of the MCAT." Compl. P 20. AAMC also requires test takers to write out in longhand and certify by signature on their answer form that they "agree to the conditions set forth in the MCAT Announcement." *Id.* P 21. The MCAT Announcement is a booklet that contains the policies and procedures for taking the MCAT. It contains the following language under the heading "Test Center Regulations and Procedures":

> The MCAT is confidential and contains copyrighted material. All test materials, including test books and answer documents, are the property of the MCAT Program Office and AAMC and must be returned to the test supervisor after each administration. No portion of such materials may be retained by examinees. Pages or covers of test books are not to be torn out of or separated from the test books in **[**5]** any way. Additionally, **test takers are not permitted to duplicate or record (by copying, photographing, memorizing, or any other means) any part of the MCAT.**

Ex. A to PL's Reply at 10 (emphasis in original). At the time of testing, test takers are required to sign a statement agreeing not to "disclose -- in whole or in part -- any exam questions or answers to anyone during or after the exam." *Id.* at 5. The "Who May Register" section of the MCAT Announcement sets forth AAMC's policy that only individuals who are preparing to apply to a health professions school should take the MCAT, absent special permission from AAMC. *Id.* An individual who wants to take the MCAT for reasons other than applying to a health profession school must send a written request to AAMC stating her reason(s) for wanting to take the test. AAMC reviews these requests on a case-by-case basis.

AAMC also sells MCAT practice materials to the public, including copies of previous actual test questions that have been "retired" and are no longer used ("MCAT Released Questions"). Compl. P 50.

Princeton Review is a private corporation that provides test preparation courses and tutoring for post-secondary **[**6]** and graduate admissions tests, including the MCAT. AAMC alleges that Princeton Review arranged to have its employees and/or agents take the MCAT, specifically the April and August 2002 examinations, in order to memorize test questions rather than for the purpose of preparing to enroll in a health professions school. AAMC also alleges that Princeton Review assembled, copied and distributed "tap reports" to its instructors for use in Princeton Review's **[*15]** MCAT preparation classes. Compl. P 33. A "tap report" is a detailed report that allegedly reconstructs the content of the MCAT's questions and answers by compiling the reports of those who memorized sections of the MCAT.

In defense of this action, Princeton Review asserts two counterclaims and nineteen affirmative defenses. In its first counterclaim, Princeton Review claims that the MCAT Prohibitions are unenforceable as to MCAT test takers because they are contracts of adhesion, constitute misuse of copyright, violate public policy and are contrary to the *First Amendment*. In its second counterclaim, Princeton Review claims that the MCAT Prohibitions are unenforceable as to purchasers of MCAT Released Questions **[**7]** for the same reasons.

II. ANALYSIS

AAMC moves to dismiss defendant's counterclaims for failure to state a claim under *FED. R. CIV. P. 12(b)(6)*. AAMC also moves to strike Princeton Review's fifth, seventh, eighth, twelfth, and fourteenth affirmative defenses pursuant to *FED. R. CIV. P. 12(f)*. The affirmative defenses at issue are: (1) that Princeton Review's conduct is protected by the *First Amendment* and principles underlying truth in testing laws; (2) that *Section 301(a) of the Copyright Act*, *17 U.S.C. § 301(a)* preempts AAMC's misappropriation of trade secrets claim; (3) that AAMC's misappropriation of trade secrets claim is barred because it has misused its copyrights; (4) that AAMC's fraud claim is barred because the MCAT Prohibitions are unenforceable contracts of adhesion; and (5) that AAMC's fraud claim is barred by the statute of frauds.

A. Standard for Motion to Dismiss

HN1[] A motion to dismiss is appropriate "only if it is clear that no relief could be granted under any set of facts that could be proved consistent with **[**8]** the allegations." *Martin v. Ezeagu, 816 F. Supp. 20, 23 (D.D.C. 1993)* (internal quotations omitted); *see* *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)* (stating that a complaint should not be dismissed "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief"). The court must presume all well-pleaded factual allegations in the complaint to be true and draw all reasonable inferences from those allegations in favor of the non-moving party in applying *Rule 12(b)(6)*. *See* *Kowal v. MCI Communications Corp., 305 U.S. App. D.C. 60, 16 F.3d 1271, 1276 (D.C. Cir. 1994)*; *Schuler v. United States, 199 U.S. App. D.C. 23, 617 F.2d 605, 608 (D.C. Cir. 1979)* (stating that the court must give the plaintiff "the benefit of all inferences that can be derived from the facts alleged"). In evaluating a *Rule 12(b)(6)* motion to dismiss, the court is limited to considering facts alleged in the complaint, any documents either attached to or incorporated in the complaint, **[**9]** matters of which the court may take judicial notice, *EEOC v. St. Francis Xavier Parochial School, 326 U.S. App. D.C. 67, 117 F.3d 621, 624 (D.C. Cir. 1997)*, and matters of public record, *Marshall County Health Care Authority v. Shalala, 300 U.S. App. D.C. 263, 988 F.2d 1221, 1226 n.6 (D.C. Cir. 1993)*. Factual allegations in briefs or memoranda of law may not be considered when deciding a *Rule 12(b)(6)* motion, particularly when the facts they contain contradict those alleged in the complaint. *Henthorn v. Dep't of Navy, 308 U.S. App. D.C. 36, 29 F.3d 682, 688 (D.C. Cir. 1994)*. In this case, because AAMC seeks to dismiss Princeton Review's counterclaims, the court will treat Princeton Review's Answer and the factual allegations therein the same way it would treat a plaintiff's complaint in the usual motion to dismiss scenario.

B. Counterclaims

AAMC argues that Princeton Review's counterclaims should be dismissed because **[*16]** they fail to state a claim upon which relief can be granted. [1] Both counterclaims will be addressed together because the legal issues presented by AAMC's motion overlap.

[10] 1. Unenforceable Contracts of Adhesion**

Princeton Review alleges that any agreement to the MCAT Prohibitions by test takers, or purchasers of MCAT Released Questions, is not voluntarily given, is unconscionable, and therefore is an unenforceable contract of adhesion.

HN2[] A contract of adhesion is defined generally as one "imposed upon a powerless party, usually a consumer, who has no real choice but to accede to its terms." *Chinnery v. Frank E. Basil, Inc. , 1988 U.S. Dist. LEXIS 19438, 1988 WL 4803, at *1 n.2 (D.D.C. Jan. 13, 1988)*. Even if a contract is one of adhesion, it is enforceable unless it is deemed unconscionable upon judicial scrutiny. *See* *Smith, Bucklin & Assocs., Inc. v. Sonntag, 317 U.S. App. D.C. 364, 83 F.3d 476, 480 (D.C. Cir. 1996)*. The party seeking to establish unconscionability must prove "not only that one of the parties lacked a meaningful choice but also that the terms of the contract are unreasonably favorable to the other party." *Id.* (quoting *Riggs Nat'l Bank of Wash., D.C. v. Dist. of Columbia, 581 A.2d 1229, 1251 (D.C. 1990))*. A contract is "not unconscionable merely because the parties to **[**11]** it are unequal in bargaining position. . . ." *RESTATEMENT (SECOND) OF CONTRACTS § 208 cmt. d. (1981); see also* *Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 33, 114 L. Ed. 2d 26, 111 S. Ct. 1647 (1991)* ("Mere inequality in bargaining power, however, is not a sufficient reason to hold that arbitration agreements are never enforceable in the employment context.").

---

[1] Relying on *North Central F.S., Inc. v. Brown, 951 F. Supp. 1383, 1412 n.22 (N.D. Iowa 1996)*, and *EEOC v. Mike Fink Corp.*, 1998 WL 34078445, at *6 (M.D. Term. July 17, 1998), Princeton Review argues that because its counterclaims seek a declaration of rights that are the "mirror image" of the relief AAMC seeks, there is no basis for dismissal of its counterclaims on the face of the pleading. Def.'s Opp'n at 11. Princeton Review's argument is without merit and its reliance on *North Central, 951 F. Supp. at 1412 n.22*, and *Mike Fink Corp.*, 1998 WL 34078445, at *6, is misplaced.

AAMC argues that even if the MCAT Prohibitions are contracts of adhesion, they are not unconscionable. AAMC acknowledges that MCAT test takers may not have a choice as to whether or not they will agree to the MCAT Prohibitions if they desire to sit for the exam. AAMC contends, however, that the MCAT Prohibitions do not unreasonably favor AAMC because they merely ask test takers to take the test for legitimate reasons and to respect the confidentiality of the secure test questions.

The court finds that Princeton Review adequately states a claim that the MCAT Prohibitions are unenforceable and unconscionable contracts of adhesion. Princeton Review alleges that AAMC coerces test takers into agreeing to the MCAT Prohibitions. Answer P 117(a). On a motion to dismiss, **[**12]** the court must make all inferences in favor of the nonmoving party and assume that the MCAT Prohibitions are contracts of adhesion. Although the next step in the unconscionability analysis requires Princeton Review to establish that "one of the parties lacked a meaningful choice but also that the terms of the contract are unreasonably favorable to the other party," *Smith, Bucklin & Assocs., Inc., 83 F.3d at 480* (citation omitted), Princeton Review is not required to prove its claim in the complaint. The Federal Rules of Civil Procedure do not require a claimant to set out in detail the facts upon which she bases her claim. *See* *Conley, 355 U.S. at **[*17]** 47* (stating that a claim need not be detailed but simply provide fair notice of the claim and the grounds on which it rests). AAMC's arguments regarding contracts of adhesion go to the merits of the claim, not whether Princeton Review failed to state a claim. Because Princeton Review adequately pled the basis for this counterclaim, the court denies AAMC's motion to dismiss for failure to state a claim on this ground.

2. Copyright Misuse

Princeton Review also brings its counterclaims on the basis **[**13]** of copyright misuse. AAMC moves to dismiss the counterclaims on the grounds that copyright misuse cannot be the basis of an affirmative claim.

HN3[] The doctrine of copyright misuse, which has its historical roots in the unclean hands defense, [2] "bars a culpable plaintiff from prevailing on an action for an infringement of the misused copyright." *Lasercomb Am., Inc. v. Reynolds, 911 F.2d 970, 972 (4th Cir. 1990)*; *see* *Practice Mgmt. Info. Corp. v. AMA, 121 F.3d 516, 520 & n.9 (9th Cir. 1997)* (adopting the rule that copyright misuse is a defense to copyright infringement); *DSC Communications Corp. v. DGI Techs., Inc., 81 F.3d 597, 601 (5th Cir. 1996)* (same); *Nat'l Cable Television Ass'n, Inc. v. Broad. Music, Inc., 772 F. Supp. 614, 651 (D.D.C. 1991)* (stating that "copyright misuse is an affirmative, equitable defense to infringement that has grown out of the recognized doctrine of patent misuse"). ***HN4***[] The doctrine forbids the use of the copyright to secure an exclusive right or limited monopoly not granted by the Copyright Office and which is contrary to public policy to grant. *See* *Lasercomb, 911 F.2d at 977* **[**14]** . The *Lasercomb* court found the copyright misuse defense analogous to the patent misuse defense, which the Supreme Court originally recognized in *Morton Salt Co. v. G.S. Suppiger Co., 314 U.S. 488, 492-93, 86 L. Ed. 363, 62 S. Ct. 402, 1942 Dec. Comm'r Pat. 733 (1942)*. [3]*Lasercomb, 911 F.2d at 977*. As the first court to extend the rationale beyond patent misuse to copyrights, the Fourth Circuit explained in *Lasercomb* that whereas "copyright law seeks to increase the store of human knowledge and arts by rewarding . . . authors with the exclusive rights to their works for a limited time. . . . The granted monopoly power does not extend to property not covered by the . . . copyright." *911 F.2d at 976*. Other courts have since affirmed that misuse often exists where the patent or copyright holder has engaged in some form of anti-competitive behavior. *See* *Video Pipeline, Inc. v. Buena Vista Home Entm't, Inc., 342 F.3d 191, 204 (3d Cir.*

---

[2] ***HN5***[] The unclean hands defense closes the doors of a court of equity to a party tainted with inequitableness or bad faith relative to the matter in which she seeks relief and derives from the equitable maxim that one '"who comes into equity must come with clean hands."' *United States v. Philip Morris Inc., 300 F. Supp. 2d 61, 74 (D.D.C. 2004)* (quoting *Precision Instrument Mfg. Co. v. Auto. Maint. Mach. Co., 324 U.S. 806, 814, 89 L. Ed. 1381, 65 S. Ct. 993, 1945 Dec. Comm'r Pat. 582 (1945))*.

[3] In this landmark patent infringement action, the Supreme Court held that a patent operates to create and grant to the patentee an exclusive right to make, use and vend the particular device described in and claimed in the patent, but does not grant immunity for a monopoly not within the grant. *Morton Salt, 314 U.S. at 491*. Thus, the court stated that use of a patent to suppress the sale of an unpatented article may preclude the patentee from prevailing on an infringement claim because equity requires that a party have "clean hands." *Id. at 491-92*.

2003) (explaining the history and public policy behind the copyright misuse defense); Nat'l Cable Television, 772 F. Supp. at 652 (stating that patent misuse occurs **[**15]** when a patent holder "uses **[*18]** its right to violate the antitrust laws or otherwise abuses the monopoly power granted it by the patent").

[16]** Princeton Review expressly disavows that it is asserting misuse of copyright as a defense to copyright infringement. *See* Def.'s Opp'n at 13. Instead, Princeton Review argues that it can bring an affirmative claim of copyright misuse, relying on *Electronic Data Systems Corp. v. Computer Associates International, Inc., 802 F. Supp. 1463 (N.D. Tex. 1992)*, in which the court permitted the assertion of copyright misuse both as a defense to copyright infringement, and as an independently actionable claim. *Id. at 1466*.

Electronic Data provides scant support for Princeton Review's position because it is distinguishable from the instant case on in several respects. First, Princeton Review is not asserting misuse of copyright as a defense to copyright infringement, but is disputing the enforceability of the MCAT Prohibitions under D.C. law. Second, it appears that the court in *Electronic Data* permitted an independent copyright misuse claim to proceed because the copyright misuse claim alleged violations of *§ 2 of the Sherman Act. Elec. Data, 802 F. Supp. at 1466* (stating that the court would deny the motion **[**17]** to dismiss the plaintiff's copyright misuse claim because the defendant had "failed to establish that [the plaintiffs] copyright misuse claim . . . does not allege violations of *§ 2 of the Sherman Act*"). Princeton Review, however, does not allege any *Sherman Act* or other antitrust violations. [4] **[**18]** [5]

Courts have generally recognized **[**19]** misuse of copyright as a defense to copyright infringement and not as an affirmative claim. *See Schoolhouse, Inc. v. Anderson, 2000 U.S. Dist. LEXIS 22524, 2000 WL 1640081, at *7 (D. Minn. Nov. 8, 2000)* (stating that "abuse of copyright is generally recognized as an equitable defense to a copyright infringement claim and is rarely recognized as an independently justiciable cause of action"); *Sony Pictures Entm't, Inc. v. Fireworks Entm't Group, Inc., 156 F. Supp. 2d 1148, 1167 n.28 (C.D. Cal. 2001)* (noting that to the extent the defendants asserted misuse of copyright, the defendants had to bring such a claim as an affirmative defense, not as a counterclaim), *vacated pursuant to* ***[*19]*** *settlement*, *2002 WL 32387901 (C.D. Cal. Nov 5, 2002)*; *Warner/Chappel Music, Inc. v. Pilz Compact Disc, Inc., 1999 U.S. Dist. LEXIS 17161, 1999 WL 999332, at *6 n.5 (E.D. Pa. Oct. 26, 1999)* (refusing to allow an affirmative claim of copyright abuse to proceed because there was "no authority in [the Third] Circuit for such a claim, and virtually no authority in any Circuit for such a claim either"). These cases, however, do not discuss **[**20]** the rationale for limiting the doctrine of copyright misuse for use as a defense to infringement. Thus, the court will look to cases involving other types of intellectual property in which courts have confined the doctrine of misuse to a defense.

In *Transitron Electronic Corp. v. Hughes Aircraft Co., 487 F. Supp. 885 (D. Mass. 1980)*, the court held that patent misuse was not an actionable tort because it was developed as "an equitable defense, analogous to the clean hands defense, against an infringement action." *Id. at 893*. "That the doctrine does not create an independent

---

[4] The court acknowledges that Princeton Review asserts in its opposition that "AAMC seeks to leverage its membership monopoly as well as its monopoly over the [MCAT] to extend its rights beyond those granted to it pursuant to *Section 106 of the Copyright Act*" and "abuses the monopoly power granted by the copyrights." Def.'s Opp'n at 13, 16. However, neither of Princeton Review's counterclaims asserts a violation of ***antitrust law***. ***HN6***[] "Ordinarily, absent a formal motion to . . . amend the complaint, a court does not treat the contents of an opposition to a motion to dismiss as an amendment to a complaint." *Rohrbaugh v. Inv. Co. Inst., 2002 U.S. Dist. LEXIS 13401, 2002 WL 31100821, at *5 n.10 (D.D.C. July 2, 2002)* (citing *Confederate Mem'l Ass'n v. Hines, 301 U.S. App. D.C. 395, 995 F.2d 295, 299 (D.C. Cir. 1993)*; ***Ali v. Dist. of Columbia, 349 U.S. App. D.C. 327, 278 F.3d 1, 8 (D.C. Cir. 2002))***.

[5] Princeton Review refers the court to *Assessment Technologies of WI, LLC, v. WIREdata, Inc., 350 F.3d 640 (7th Cir. 2003)*, in arguing that a copyright misuse counterclaim is not limited to antitrust violations. *Id. at 647* (stating that the argument for applying misuse of copyright beyond the bounds of antitrust is that an "abuse of process" has occurred). *Assessment Technologies*, however, is not analogous to the present case. First, *Assessment Technologies* is a case "about the attempt of a copyright owner to use copyright law to block access to data that not only are neither copyrightable nor copyrighted, but were not created or obtained by the copyright owner." *Id. at 641*. The instant lawsuit involves AAMC's MCAT test forms and questions, which *are* copyrighted materials. Second, *Assessment Technologies* addresses copyright misuse as a defense to infringement and does not discuss whether the doctrine could be recognized as an independent claim or counterclaim. *See id. at 647*.

cause of action for the alleged infringer is implicit in the black letter statement of the effect of finding patent misuse: 'Misuse of a patent merely suspends the owner's right to recover for infringement of a patent.'" *Id.* (quoting CHISUM, PATENTS 19-91 (1978)). In the context of trademarks, at least one court has rejected trademark misuse as an affirmative defense. *Juno Online Servs. v. Juno Lighting, Inc., 979 F. Supp. 684, 690 (N.D. Ill. 1997)*. In *Juno*, the court noted that an "affirmative claim for patent misuse has a suspect history to begin with" **[**21]** and further stated:

> The fear expressed in cases such as *Morton Salt* is that the holder of a government monopoly will use the monopoly to the detriment of the public by destroying competition. By contrast, ***HN7***[] in trademark law, the mark holder usually does not have the ability to destroy competition. The holder can only keep competitors from using the mark, and, in most circumstances, cannot keep them from selling a directly competing product. Therefore, there appears to be less of a justification for extending a trademark misuse doctrine than there is in the patent area.

Id. Because the policy reasons underlying the development of the equitable doctrine of copyright misuse are grounded in the unclean hands doctrine, permitting copyright misuse as an independent, affirmative claim would be contrary to the purpose of the doctrine. This court has previously indicated that copyright misuse should be used only in narrow circumstances. ***HN8***[] "Unclean hands is recognized 'only rarely' in copyright cases, where the copyright holder's 'transgression is of serious proportions and relates directly to the subject matter of the infringement action.'" *Nat'l Cable Television, 772 F. Supp. at 652* **[**22]** (quoting *Broad. Music, Inc. v. Hearst/ABC Viacom Entm't, 746 F. Supp. 320, 329 (S.D.N.Y. 1990))* (internal citation omitted).

Furthermore, although an antitrust violation is not a "prerequisite to showing misuse," "failure to show [a] violation of the antitrust laws makes it more difficult" for the court to find copyright misuse. *Nat'l Cable Television, 772 F. Supp. at 652*. ***HN9***[] The absence of an antitrust violation requires plaintiffs to show that there has been an illegal extension of monopoly or other violation of the public policy underlying copyright law. *Id.* Princeton Review's counterclaims do not allege an antitrust violation or an illegal extension of monopoly. Indeed, Princeton Review is not a direct competitor of AAMC, but profits from AAMC's development and administration of the MCAT. Although Princeton Review contends that the MCAT Prohibitions are against public policy because they are contrary to the goals of truth in **[*20]** testing laws and the principles of the *First Amendment*, these public policies are not the public policies underlying copyright law. The purpose of copyright law as set out in the Constitution's Copyright Clause **[**23]** is to "promote the Progress of . . . useful Arts, by securing for limited Times to Authors . . . the exclusive Right to their respective Writings. . . ." *U.S. CONST. art. I, § 8, cl. 8*; *see also* *Sony Corp. of Am. v. Universal Studios, Inc., 464 U.S. 417, 432, 78 L. Ed. 2d 574, 104 S. Ct. 774 (1984)* ("The immediate effect of our copyright law is to secure a fair return for an 'author's' creative labor. But the ultimate aim is, by this incentive, to stimulate artistic creativity for the general public good."). In *Stewart v. Abend, 495 U.S. 207, 109 L. Ed. 2d 184, 110 S. Ct. 1750 (1990)*, the Supreme Court stated:***HN10***[]

> Although dissemination of creative works is a goal of the Copyright Act, the Act creates a balance between the artist's right to control the work during the term of the copyright protection and the public's need for access to creative works. The copyright term is limited so that the public will not be permanently deprived of the fruits of an artist's labors.

Id. at 228. The Court further stated that "nothing in the copyright statutes would prevent an author from hoarding **[**24]** all of his works during the term of the copyright. In fact, this Court has held that a copyright owner has the capacity arbitrarily to refuse to license one who seeks to exploit the work." *Id. at 228-29.* In light of these pronouncements by the Supreme Court, Princeton Review's argument that the MCAT Prohibitions contravene the Copyright Act is without merit. Accordingly, the court concludes that copyright misuse does not form the basis of an affirmative claim and dismisses Princeton Review's counterclaims for failure to state a claim on this ground.

3. *First Amendment* and Public Policy

Princeton Review further claims that the MCAT Prohibitions are unenforceable because they contravene the *First Amendment* and public policy behind truth in testing laws. AAMC argues that its efforts to protect its tests by imposing the MCAT Prohibitions do not violate the *First Amendment* or public policy. The court agrees with AAMC.

a. *First Amendment*

HN11[] The *First Amendment* does not require that copyrighted **[**25]** works be published or made available to particular persons. *Stewart, 495 U.S. at 228-29*. The Copyright Act gives a copyright holder the exclusive right to determine whether to reproduce or distribute her work. *17 U.S.C. § 106*. [6] Thus, AAMC's imposition of the MCAT Prohibitions does not contravene the Copyright Act. The Supreme Court has stated that "copyright law contains built-in *First Amendment* accommodations" because copyright law distinguishes between ideas **[*21]** and expression, and protects only expression. *Eldred v. Ashcroft, 537 U.S. 186, 219, 154 L. Ed. 2d 683, 123 S. Ct. 769 (2003)*; *see* *Harper & Row Publishers, Inc. v. Nation Enters., 471 U.S. 539, 556, 85 L. Ed. 2d 588, 105 S. Ct. 2218* (stating that "copyright's idea/expression dichotomy strikes a definitional balance between the *First Amendment* and the Copyright Act by permitting free communication of facts while still protecting an author's expression") (internal quotation marks and citation omitted). In addition, the *Eldred* Court stated that the "fair use" defense in copyright **[**26]** law, which permits the public to use expression itself in certain circumstances, further accommodates the *First Amendment*. *Eldred, 537 U.S. at 219*; *see* *17 U.S.C. § 107* ("The fair use of a copyrighted work, including such use by reproduction in copies . . ., for purposes such as criticism, comment, news reporting, teaching . . ., scholarship, or research, is not an infringement of copyright."). Therefore, the court does not find that the MCAT Prohibitions violate the *First Amendment* and will grant AAMC's motion to dismiss Princeton Review's counterclaims on this ground.

[27] b. Public Policy**

Princeton Review relies on truth in testing laws from New York, California, and Arizona to argue that the MCAT Prohibitions are unenforceable because they violate public policy. *See* *N.Y. EDUC. LAW § 340 et seq.*; *CAL. EDUC. CODE § 99150 et seq.*; *ARIZ. REV. STAT. § 15-747*. While these laws seek to promote fairness and accuracy in the use of standardized testing, *see, e.g.*, *CAL. EDUC. CODE § 99150*, the court does not find that these public policies render the MCAT Prohibitions unenforceable. In arguing that public policy may serve as grounds for a *First Amendment* claim, Princeton Review misapplies *Warner/Chappel Music*, which holds that a copyright misuse defense may be raised if there is a violation of "the public policy embodied *in the grant of a copyright*." *1999 U.S. Dist. LEXIS 17161, 1999 WL 999332, at *5* (emphasis added). Public policies underlying truth in testing laws are not those embodied in the grant of a copyright, and thus cannot be used to invalidate **[**28]** AAMC's imposition of the MCAT Prohibitions. Furthermore, state truth in testing laws do not -- and cannot -- infringe on rights afforded to copyright holders under federal law. [7] To the extent state law and federally-created rights

---

[6] Moreover, under federal regulations, the very definition of a secure a secure test, such as the MCAT, requires restricted access to the test. *37 C.F.R. § 202.20(b)(4)* provides:

> ***HN12***[] A secure test is a nonmarketed test administered under supervision at specified centers on specific dates, all copies of which are accounted for and either destroyed or returned to restricted locked storage following each administration. For these purposes a test is not marketed if copies are not sold but it is distributed and used in such a manner that ownership and control of copies remain with the test sponsor or publisher.

Id. The Library of Congress does not retain a copy of secure tests. *37 C.F.R. § 202.20(c)(2)(vi)*.

[7] Among the specific state statutes Princeton Review cites, California's truth in testing laws expressly state that ***HN13***[] "nothing in this section shall be construed to diminish or authorize the infringement of any rights protected by law relating to copyright." *CAL. EDUC. CODE § 99162*. ***HN14***[] Arizona's truth in testing law exempts from its scope any nationally standardized test that is copyrighted and would be deprived of value if the questions or answers become known to pupils before the test. *ARIZ. REV. STAT. § 15-747(A)*. Arizona law also prohibits "any other activities that would violate the copyright protection afforded by federal law to the copyright holders of the tests." *ARIZ. REV. STAT. § 15-747(B)*.

directly conflicted, state law would be preempted. *See Camps Newfound/Owatonna, Inc. v. Town of Harrison, 520 U.S. 564, 616, 137 L. Ed. 2d 852, 117 S. Ct. 1590 (1997)*; *Waterview Mgmt. Co. v. FDIC, 323 U.S. App. D.C. 82, 105 F.3d 696, 698 (D.C. Cir. 1997)*. The Copyright Act has given AAMC broad rights regarding distribution of its secure tests; therefore the court does not find that the MCAT Prohibitions are unenforceable as contrary to public policies underlying state truth in testing laws. Accordingly, the court will grant AAMC's motion to dismiss Princeton Review's counterclaims on this ground.

[29]**

C. Standard for Motion to Strike

HN15[] *FED. R. CIV. P. 12(f)* provides that the court may, upon motion of a party or *sua* ***[*22]*** *sponte*, strike "any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter" from any pleading. [8] *See FED. R. CIV. P. 12(f)*. Courts disfavor motions to strike.

Stabilisierungsfonds Fur Wein v. Kaiser Stuhl Wine Distributors Pty., Ltd., 207 U.S. App. D.C. 375, 647 F.2d 200, 201 & n.1 (D.C. Cir. 1981) (citing 5C CHARLES ALAN WRIGHT & ARTHUR R. MILLER, FEDERAL PRACTICE & PROCEDURE § 1380, at 783 (1969)). However, such motions "should be granted where it is clear that the affirmative defense is irrelevant and frivolous and its removal from the case would avoid wasting unnecessary time and money litigating the invalid defense." *SEC v. Gulf & W. Indus., Inc., 502 F. Supp. 343, 345 (D.D.C. 1980)*. A court has liberal discretion to strike such filings as it deems appropriate under *Rule 12(f)*. *Pigford v. Veneman, 215 F.R.D. 2, 4 (D.D.C. 2003)* (quoting *Stanbury Law Firm v. IRS, 221 F.3d 1059, 1063 (8th Cir. 2000)).* **[**30]**

$**D. Affirmative Defenses**

1. Fifth Affirmative Defense: *First Amendment*

AAMC moves to strike Princeton Review's fifth affirmative defense, which asserts that the *First Amendment* protects Princeton Review's conduct. For the reasons stated above in Section II.B.3.a, Princeton Review cannot assert *First Amendment* protection for accessing and communicating information about AAMC's copyrighted and secure tests. *See also Dallas Cowboys Cheerleaders, Inc. v. Scoreboard Posters, Inc., 600 F.2d 1184, 1187-88 (5th Cir. 1979)* (stating that "the *first amendment* is not a license to trammel on legally recognized rights in intellectual property"); *Chicago Sch. Reform Bd. of Trustees v. Substance, Inc., 79 F. Supp. 2d 919, 929 (N.D. Ill. 2000)* **[**31]** (finding no set of circumstances that would afford the defendants *First Amendment* protection to publish copyrighted tests). Therefore, the court will strike Princeton Review's fifth affirmative defense.

2. Seventh Affirmative Defense: Preemption by Copyright Act

AAMC moves to strike Princeton Review's seventh affirmative defense, which asserts that *section 301(a) of the Copyright Act*, *17 U.S.C. § 301(a)*, preempts AAMC's cause of action for misappropriation of trade secrets. *Section 301(a)* provides that "all legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright as specified by *section 106* . . . are governed exclusively by this title." *Id.* ***HN16***[] Preemption under the Copyright Act has both subject matter and equivalency requirements; to be preempted, state law must not only relate to the type of work protected by copyright law, but it must be equivalent to any of the exclusive rights protected by the Copyright Act. *17 U.S.C. § 301(b)(1)*,*(3)* **[**32]** . The D.C. Circuit has held that:

---

[8] A "pleading" includes a complaint, answer, reply to a counterclaim, answer to a cross-claim, third-party complaint, or third-party answer. *FED. R. CIV. P. 7(a)*.

> If an extra element is required instead of or in addition to the acts of reproduction, performance, distribution or display in order to constitute a state created cause of action, there is no preemption, provided that the extra element changes the nature of the action so that it is qualitatively different from a copyright infringement claim.

Sturdza v. United Arab Emirates, 350 U.S. App. D.C. 154, 281 F.3d 1287, 1304 (D.C. Cir. 2002) (citing *Wrench LLC v. Taco Bell Corp., 256 F.3d 446, 456 (6th Cir. 2001))*.

The court must examine and compare the elements of a copyright infringement **[*23]** claim and a trade secret misappropriation claim to determine whether the misappropriation claim contains an extra element. ***HN17***[] The elements of a copyright infringement claim are: (1) ownership of a valid copyright by the plaintiff and (2) copying of the original elements of the copyrighted work by the defendant. *Feist Pubs., Inc. v. Rural Tel. Serv. Co., 499 U.S. 340, 361, 113 L. Ed. 2d 358, 111 S. Ct. 1282 (1991)*. Under D.C. law, ***HN18***[] misappropriation of a trade secret [9] is:

> (A) Acquisition of a trade secret **[**33]** of another by a person who knows or has reason to know that the trade secret was acquired by improper means; or
> (B) Disclosure or use of a trade secret of another without express or implied consent by a person who:
> (i) Used improper means to acquire knowledge of the trade secret; or
> (ii) At the time of disclosure or use, knew or had reason to know that the trade secret was:
> (I) Derived from or through a person who had utilized improper means to acquire it;
> (II) Acquired under circumstances giving rise to a duty to maintain its secrecy or limit its use;
> (III) Derived from or through a person who owed a duty to the person seeking relief to maintain its secrecy or limit its use; or
> (iii) Before a material change in his or her position, knew or had reason to know that the information was a trade secret and knowledge of the trade secret had been acquired by accident or mistake.

D.C. Code § 36-401. ***HN19***[] A trade secret misappropriation claim, unlike a copyright infringement claim, requires a showing of improper acquisition of secret material or a breach of confidentiality. *See id.; Park v. Arnott, 1992 U.S. Dist. LEXIS 9903, 1992 WL 184521, at *3 (D.D.C. July 14, 1992)* **[**34]** ; *Westech Gear Corp. v. Dep't of Navy*, 1988 WL 170558, at *2 (D.D.C. May 9, 1988). In *Trandes Corp. v. Guy F. Atkinson Co., 996 F.2d 655 (4th Cir. 1993),* the Fourth Circuit compared the elements of a trade secret misappropriation claim and copyright infringement claim and held that because the misappropriation claim required a breach of trust or confidence, *§ 301 of the Copyright Act* did not preempt the claim. *Id. at 660*. Similarly, other courts have held that trade secret misappropriation claims based on breaches of confidential relationships are not preempted because the breach of confidentiality is an extra element. *See Dun & Bradstreet Software Servs., Inc. v. Grace Consulting, Inc., 307 F.3d 197, 218 (3d Cir. 2002)* (stating that a trade secrets misappropriation claim based on a breach of confidentiality contains an extra element that avoids preemption); *Data Gen. Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147, 1165 (1st Cir. 1994)* (stating that "[a] trade secrets claim that requires proof of a breach of a duty of confidentiality . . . [is] not preempted because **[**35]** participation in the breach of a duty of confidentiality -- an element that forms no part of a copyright infringement claim-represents unfair competitive conduct qualitatively different from mere unauthorized copying"); *Computer **[*24]** Assocs. Int'l, Inc. v. Altai, Inc., 982 F.2d 693, 717 (2d Cir. 1992)* (holding that unfair competition claims based on breaches of confidentiality or trade secrets satisfy the extra element test and are not preempted); *Warrington Assocs., Inc. v. Real-Time Eng'g Sys., Inc., 522 F. Supp. 367, 369 (N.D. Ill. 1981)* (holding that the Copyright Act did not preempt common law trade secret misappropriation claims based on a breach of trust or confidentiality). However, misappropriation claims based solely on the copying

---

[9] ***HN20***[] A trade secret is information that "(A) Derives actual or potential independent economic value, from not being generally known to, and not being readily ascertainable by, proper means by another who can obtain economic value from its disclosure or use; and (B) Is the subject of reasonable efforts to maintain its secrecy." *D.C. Code § 36-401(4)*; *see also RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 39 (1995)* ("A trade secret is any information that can be used in the operation of a business or other enterprise and that is sufficiently valuable and secret to afford an actual or potential economic advantage over others.").

of copyrighted work are preempted. *See Computer Assocs., 982 F.2d at 717*; *Alcatel USA, Inc. v. DGI Techs., Inc., 166 F.3d 772, 788-89 (5th Cir. 1999)*.

[36]** In the instant action, AAMC alleges that Princeton Review acquired and disclosed its trade secrets, i.e., the contents of the secure MCAT test forms, through improper means. AAMC claims that Princeton Review's employees and agents falsely certified that they would not duplicate or record any portion of the MCAT. The court finds that the MCAT Prohibitions that AAMC imposed, if they are not found to be contracts of adhesion, would impose a duty on Princeton Review to maintain the confidentiality of the MCAT questions, and breach of the MCAT Prohibitions would be an improper acquisition. Thus, this extra element would preclude the trade secrets misappropriation claim from preemption by the Copyright Act.

Princeton Review characterizes the "extra element" in AAMC's trade secrets misappropriation claim as secrecy, and contends that because the MCAT questions are not kept secret, the misappropriation claim merely duplicates the copyright infringement claim. Princeton Review claims that the MCAT test forms are not "secure" trade secrets because AAMC has widely disseminated and disclosed its MCAT questions to test takers and students. The question of whether registration of the MCAT test **[**37]** forms under the secure test regulations is sufficient to establish the secrecy required in a trade secrets misappropriation claim goes to the merits of AAMC's claim, and does not address whether the Copyright Act would preempt the misappropriation claim. [10] Accordingly, the court will strike Princeton Review's seventh affirmative defense.

3. Eighth Affirmative Defense: Copyright Misuse

AAMC seeks to strike Princeton Review's eighth affirmative defense, which asserts that AAMC's misappropriation of trade secrets claim is barred by AAMC's copyright misuse in violation of public policy. AAMC argues that Princeton Review has not pled facts that show copyright misuse and that there is no authority for the proposition that copyright misuse is a cognizable defense **[**38]** to a misappropriation of trade secrets claim.

Princeton Review responds that it has sufficiently pled facts to show copyright misuse by AAMC. Princeton Review maintains that AAMC's secure test materials were not in fact trade secrets, and thus AAMC's attempts to prevent the disclosure of the MCAT questions violate public policy underlying truth in testing laws. As discussed above in Section II.B.3.b, public policies underlying truth in testing laws do not make the MCAT Prohibitions unenforceable. Princeton Review also reiterates its argument that AAMC has attempted to extend its monopoly beyond rights afforded under the Copyright Act. As discussed above in Section II.B.2, **[*25]** AAMC's actions do not contravene the Copyright Act. Princeton Review has pled no other facts to show copyright misuse by AAMC. As a result, the court concludes that Princeton Review has failed to plead facts sufficient to support this affirmative defense.

Furthermore, while courts have recognized copyright misuse as an equitable defense to copyright infringement claims, *see, e.g., Lasercomb, 911 F.2d at 977*, the court could find no legal authority that has applied copyright misuse or an unclean **[**39]** hands defense to a trade secrets misappropriation claim. Courts that have considered the issue have found that an unclean hands defense does not bar a trade secrets misappropriation claim. *See Alcatel USA, 166 F.3d at 797* (holding that under the circumstances, the unclean hands defense did not bar injunctive relief based on trade secrets misappropriation); *Telex Corp. v. IBM, 510 F.2d 894, 930 (10th Cir. 1975)* (holding that where there were no antitrust violations, an unclean hands defense did not apply to bar a trade secrets misappropriation claim); *Wyeth v. Natural Biologics, Inc., 2003 U.S. Dist. LEXIS 17713, 2003 WL 22282371, at *24 (D. Minn. Oct. 2, 2003)* (concluding that the equitable unclean hands defense did not apply to a trade secrets misappropriation claim). *Cf. Data Gen., 36 F.3d at 1170* (stating that the case did not require the court to determine whether Massachusetts law recognized an unclean hands defense to a trade secrets misappropriation claim); *Nalco Chem. Co. v. Hydro Techs., Inc., 149 F.R.D. 686, 695 (E.D. Wis. 1993)* (permitting discovery related to an unclean hands defense **[**40]** in a trade secrets misappropriation case). Therefore, because there appears to be no legal

---

[10] Princeton Review also raises its argument regarding truth in testing laws in connection with this affirmative defense. Because the court found this argument to be without merit in Section II.B.S.b, the court will not consider the argument here.

authority to support the application of copyright misuse as an affirmative defense to a trade secrets misappropriation claim, and because Princeton Review has not pled sufficient facts to establish copyright misuse, the court will strike the eighth affirmative defense.

4. Twelfth Affirmative Defense: Contracts of Adhesion

_ AAMC moves to strike Princeton Review's twelfth affirmative defense, which asserts that the MCAT Prohibitions are unenforceable contracts of adhesion. As discussed above in Section II.B.1, Princeton Review has pled facts sufficient to state a claim that the MCAT Prohibitions are contracts of adhesion. Although AAMC argues that the MCAT Prohibitions are not unconscionable, this argument goes to the merits of the affirmative defense and at this stage of the proceedings, does not establish that the affirmative defense is "insufficient" under *fed. R. CIV. P. 12(f)*. Accordingly, the court will deny AAMC's motion to strike the twelfth affirmative defense.

5. Fourteenth Affirmative Defense: Statute of Frauds

Finally, AAMC **[**41]** moves to strike Princeton Review's fourteenth affirmative defense, which claims that AAMC's fraud claim is barred by the statute of frauds. [11] AAMC argues that Princeton Review cannot assert and pursue an affirmative defense that is only viable to a breach of contract allegation when AAMC has pled a fraud -- not breach of contract-claim. A **[*26]** statute of frauds defense is proper only when a plaintiff has alleged a breach of contract claim. *See D.C. Code Ann. § 28-3502*. Princeton Review argues that its statute of frauds defense should not be stricken because AAMC's fraud claim is "more accurately" characterized as a breach of contract claim. Def.'s Opp'n at 30. The court disagrees. Princeton Review cites no legal authority to support its argument that the court should consider AAMC's fraud claim as a breach of contract claim. Accordingly, the court will strike Princeton Review's fourteenth affirmative defense.

[**42] III. CONCLUSION

For the foregoing reasons, AAMC's motion to dismiss counterclaims and to strike affirmative defenses must be granted in part and denied in part. Accordingly, it is this 22nd day of June, 2004, hereby:

ORDERED, that AAMC's motion to dismiss counterclaims and to strike affirmative defenses is **GRANTED** in part and **DENIED** in part. Princeton Review's counterclaims are **DISMISSED** to the extent that they are based on copyright misuse and violations of the *First Amendment* and public policy. Princeton Review's fifth, seventh, eighth, and fourteenth affirmative defenses are **STRICKEN.** AAMC's motion is denied in all other respects.

Henry H. Kennedy, Jr.

United States District Judge Assigned to: Judge Henry H. Kennedy

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Standards of Review, De Novo Review**

Appellate courts review a grant of summary judgment de novo, applying the same standard used by the district court.

Civil Procedure > ... > Discovery > Methods of Discovery > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN2[] **Discovery, Methods of Discovery**

Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Summary Judgment, Entitlement as Matter of Law**

On a motion for summary judgment, courts construe the facts and inferences therefrom in the light most favorable to the non-moving party.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Regulated Practices, Private Actions**

Summary judgment in antitrust cases should be used sparingly because motive and intent play leading roles in the analysis. However, the usual rules governing summary judgment still apply in antitrust cases.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN5[] **Complaints, Requirements for Complaint**

A complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. The statement must give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN6[] **Pleadings, Rule Application & Interpretation**

A plaintiff should not be prevented from pursuing a claim simply because of a failure to set forth in the complaint a theory on which the plaintiff could recover, provided that a late shift in the thrust of the case will not prejudice the other party in maintaining its defense. The liberalized pleading rules, however, do not permit plaintiffs to wait until the last minute to ascertain and refine the theories on which they intend to build their case.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN7[] **Pleadings, Rule Application & Interpretation**

A fundamental statutory citation is not a mere fact and, if incorrect, may topple the structure of the complaint, particularly where the citation appears to represent the legal theory upon which the plaintiff relies.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN9[] **Private Actions, State Regulation**

Okla. Stat. tit. 79, § 205(A) provides for injunctive relief and monetary damages to any person injured by a violation of the Oklahoma Antitrust Reform Act, *Okla. Stat. tit. 79, § 201 et seq.*

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN10[] **Standards of Review, Abuse of Discretion**

Appellate courts review a district court's denial of a motion to treat a complaint as amended for abuse of discretion.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Conforming Pleadings to Evidence

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN11[] **Amendment of Pleadings, Conforming Pleadings to Evidence**

See *Fed. R. Civ. P. 15(b)*.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Conforming Pleadings to Evidence

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN12[] **Amendment of Pleadings, Conforming Pleadings to Evidence**

Fed. R. Civ. P. 15(b) contains two mechanisms for amending the complaint to conform to the evidence. First, a complaint may be impliedly amended under *Fed. R. Civ. P. 15(b)* if an issue has been tried with the express or implied consent of the parties and not over objection. A party impliedly consents to the trial of an issue not contained within the pleadings either by introducing evidence on the new issue or by failing to object when the opposing party introduces such evidence. However, implied consent cannot be based on the introduction of evidence that is relevant to an issue already in the case when there is no indication that the party presenting the evidence intended to raise a new issue.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Evidence > ... > Procedural Matters > Objections & Offers of Proof > Objections

HN13[] **Pleadings, Amendment of Pleadings**

Upon objection by the opposing party, the party wishing to amend the pleadings must employ the second mechanism of *Fed. R. Civ. P. 15(b)*. Pursuant to that mechanism, the pleadings may be amended if the party files a motion to amend the complaint and the objecting party fails to satisfy the court that it will be prejudiced by the amendment. *Fed. R. Civ. P. 15(b)*. The party must expressly move under *Fed. R. Civ. P. 15(b)* for such an amendment. A court may not sua sponte invoke the second portion of *Fed. R. Civ. P. 15(b)*. Accordingly, when proper objections have been made but no *Fed. R. Civ. P. 15(b)* motion has been filed, the lack of prejudice to a party does not provide a basis for an amendment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN14[] **Monopolies & Monopolization, Attempts to Monopolize**

The Oklahoma Antitrust Reform Act, *Okla. Stat. tit. 79, § 201 et seq.*, is construed in accordance with federal ***antitrust law***. *Okla. Stat. tit. 79, § 212*. *Okla. Stat. tit. 79, §§ 203(B)* and *203(C)* of the Oklahoma Antitrust Reform Act, *Okla. Stat. tit. 79, § 201 et seq.*, both require that the plaintiff prove a relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > State Regulation

HN15[] **Conspiracy to Monopolize, State Regulation**

See *Okla. Stat. tit. 79, § 203(B)*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] Sherman Act, Claims

To establish liability under *Okla. Stat. tit. 79, § 203(B)*, a plaintiff must first define the relevant market. *Okla. Stat. tit. 79, § 203(D)(1)(a)*. Without a definition of that market there is no way to measure a defendant's ability to lessen or destroy competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN17[] Monopolies & Monopolization, Attempts to Monopolize

Under *Okla. Stat. tit. 79, § 203(C)*, it is unlawful for any person in control of an essential facility to unreasonably refuse to give a competitor or customer of an entity controlling an essential facility access to it upon reasonable terms if the effect of such denial is to injure competition. *Okla. Stat. tit. 79, § 203(C)*. Pursuant to the statute, an "essential facility" is a facility which, inter alia, is controlled by an entity that possesses monopoly power. *Okla. Stat. tit. 79, § 203(D)(3)(a)*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN18[] Monopolies & Monopolization, Attempts to Monopolize

"Monopoly power" is the power to control market prices or exclude competition. *Okla. Stat. tit. 79, § 203(D)(2)*. To prove monopoly power, the plaintiff must first define the relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN19[] Regulated Practices, Market Definition

Both *Okla. Stat. tit. 79, § 203(B)* and *Okla. Stat. tit. 79, § 203(C)* require proof of a relevant market. The relevant market inquiry has two components: geographic market and product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN20[] Regulated Practices, Market Definition

A relevant product market consists of products that have reasonable interchangeability for the purposes for which they are produced - price, use and qualities considered. The interchangeability of products is measured by, and is substantially synonymous with, cross-elasticity. A market is "cross-elastic" if rising prices for one product causes consumers to switch to the other product. Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > Federal Circuit Court

HN21[] **Regulated Practices, Market Definition**

The boundaries of a submarket within a larger product market are defined by such factors as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, and sensitivity to price changes and specialized vendors. The same proof which establishes the existence of a relevant product market also shows (or fails to show) the existence of a product submarket.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN22[] **Regulated Practices, Market Definition**

In general, a manufacturer's own products do not themselves comprise a relevant product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN23[] **Regulated Practices, Market Definition**

Where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist merely because the product said to be monopolized differs from others.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN24[] **Monopolies & Monopolization, Actual Monopolization**

A company does not violate the Sherman Act by virtue of the natural monopoly it holds over its own product.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN25[] **Regulated Practices, Market Definition**

Products of a single manufacturer may in rare circumstances constitute a relevant product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN26[] Regulated Practices, Market Definition

The United States Supreme Court has acknowledged in dicta that the soft drink industry is a prototypical example of an industry in which products are so interchangeable that control over one brand cannot be an illegal monopoly.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN27[] Regulated Practices, Market Definition

A "cluster market" exists where a seller provides a full line of products or services that create a separate product market consisting of that "cluster" of products or services.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN28[] Regulated Practices, Market Definition

A cluster market exists only when the "cluster" is itself an object of consumer demand. In other words, the cluster approach is only appropriate where the product package is significantly different from, and appeals to buyers on a different basis from, the individual products considered separately.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN29[] Relevant Market, Product Market Definition

The fact that an entity distributes a number of different products does not of itself give it monopoly power in a cluster market; it merely defines the product(s)/service(s) offered by the distributor as a package and then limits the relevant product market to those entities that can offer a competitive package.

Counsel: Keith A. Ward, (Nancy C. Curtis with him on the briefs) Richardson, Stoops, Richardson & Ward, Tulsa, Oklahoma, for Plaintiffs-Appellants.

Jon E. Brightmire, (James P. McCann and R. Charles Wilkin III, with him on the brief) Doerner, Saunders, Daniel & Anderson, L.L.P., Tulsa, Oklahoma, for Defendants-Appellees.

Judges: Before EBEL, BALDOCK, and KELLY, Circuit Judges.

Opinion by: EBEL

Opinion

[*1277] EBEL, Circuit Judge.

Plaintiffs, retail grocery stores operating in the Tulsa, Oklahoma area, brought this diversity action under the *Oklahoma Antitrust Reform Act* against their local distributor of Pepsi and affiliated beverage products and its holding company ("Bottling Group" and "Holdings"). Plaintiffs alleged that Bottling Group unlawfully discontinued sales to Plaintiffs in response to a price discrimination lawsuit Plaintiffs had previously brought against Bottling Group's predecessor-in-interest. The district court granted summary judgment in favor of Bottling Group and Holdings. On appeal, Plaintiffs primarily challenge the district court's definition of the relevant **[**2]** product market. We exercise jurisdiction pursuant to *28 U.S.C. § 1291* and AFFIRM.

BACKGROUND

Plaintiffs are corporations that operate grocery stores, each owned in whole or in part by either Steven Davis or Brian Honel. Plaintiff Brissa, Inc. (operated by Mr. Honel) and Plaintiff Plaza Redbud Inc. (operated by Mr. Davis) had purchased Pepsi and affiliated beverage products from Beverage Products Corporation ("BPC"), the exclusive distributor of these products in the Tulsa area. By 1997, Mr. Honel and Mr. Davis had recognized that they were often unable to sell their Pepsi products at prices competitive with other **[*1278]** area grocery stores. Mr. Honel and Mr. Davis compared their invoices from BPC and discovered that BPC had been charging them different wholesale prices for the beverage products it distributed. On January 5, 1999, Plaintiffs Brissa and Plaza Redbud sued BPC for price discrimination under Oklahoma antitrust laws.

On February 8, BPC transferred all assets, liabilities, and stock to Bottling Group Holdings, Inc. ("Holdings"), which the same day transferred the same assets, liabilities, and stock to Bottling Group, LLC ("Bottling Group"). Bottling **[**3]** Group is majority owned by Holdings, and Holdings is indirectly wholly owned by The Pepsi Bottling Group, Inc.

On February 11, Bottling Group discontinued sales to Plaintiffs Brissa and Plaza Redbud because of a "distinct decrease in the level of trust" between Bottling Group and each grocery store stemming from the pending price discrimination lawsuit. Bottling Group has also refused to distribute its products to other Plaintiff grocery stores that Mr. Honel and Mr. Davis have acquired. Plaintiffs therefore have no access, other than retail purchase, to the 155 Pepsi and affiliated beverage products distributed by Bottling Group.

Plaintiffs filed this lawsuit against both Bottling Group and Holdings under *§§ 203 and 205* of the Oklahoma Antitrust Reform Act, *Okla. Stat. tit. 79, § 201 et seq*. The complaint alleged monopolization, attempt to monopolize, and conspiracy to monopolize under *§ 203(B)* and denial of access to an essential facility under *§ 203(C)*, and requested injunctive relief and monetary damages under *§ 205*. All allegations were predicated on Bottling Group's refusal to deal with Plaintiffs following Plaintiffs' initiation of the **[**4]** price discrimination lawsuit against BPC.

The district court denied Plaintiffs' request for a preliminary injunction and granted summary judgment in favor of Bottling Group and Holdings. The district court held that Plaintiffs had not pled a claim under *§ 203(A) of the Oklahoma Antitrust Reform Act*, which prohibits unilateral acts in restraint of trade, and that their claims under *§§ 203(B) and 203(C)* of the Act failed because Plaintiffs had not proven that the beverage products distributed by Bottling Group comprised a relevant product market.

Plaintiffs timely filed this appeal. Plaintiffs argue that the complaint stated a claim under *§ 203(A)* and, in the alternative, that the complaint should have been treated by the district court as constructively amended, under *Federal Rule of Civil Procedure 15(b)*, to include a *§ 203(A)* claim. Plaintiffs also argue that the district court erred in requiring Plaintiffs to offer proof of a relevant product market and, in the alternative, in rejecting Plaintiffs' narrow definition of the relevant product market.

DISCUSSION

HN1[] We review a grant of summary judgment *de novo,* applying the same **[**5]** standard used by the district court. *State of Utah v. Babbitt, 53 F.3d 1145, 1148 (10th Cir. 1995)*. ***HN2***[] Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. ***HN3***[] We construe the facts and inferences therefrom in the light most favorable to the non-moving party. *Babbitt, 53 F.3d at 1148*. [1]

[6] [*1279] A. Whether Plaintiffs Properly Pled a *§ 203(A)* Claim**

1. The complaint

HN5[] A complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. The statement must give the defendant "fair notice of what the plaintiff's claim is and the grounds upon which it rests." *Conley v. Gibson, 355 U.S. 41, 47, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*.

HN6[] A plaintiff should not be prevented from pursuing a claim simply because of a failure to set forth in the complaint a theory on which the plaintiff could recover, provided that a late shift in the thrust of the case will not prejudice the other party in maintaining its defense. *Evans v. McDonald's Corp., 936 F.2d 1087, 1090-91 (10th Cir. 1991)*. The liberalized pleading rules, however, do not permit plaintiffs to wait until the last minute to ascertain and refine the theories on which they intend to build their case. *Id. at 1091*. This practice, if tolerated, "would waste the parties' resources, as well as judicial resources, on discovery aimed at ultimately unavailing legal theories and **[**7]** would unfairly surprise defendants, requiring the court to grant further time for discovery or continuances." *Id.* (affirming district court's determination precluding plaintiff from litigating new legal theory raised for first time in response to defendant's motion for summary judgment).

In Dunn v. Ewell (In re Santa Fe Downs), the complaint cited one section of the *Bankruptcy Act* but the plaintiffs attempted to introduce evidence pertaining to a second section. *611 F.2d 815, 816 (10th Cir. 1980)*. We held that the plaintiffs had not properly stated a claim under that second section. See id. We noted that "we cannot say that the incorrect statutory citation was an unimportant detail implicitly corrected by the facts alleged in the complaint." *Id.* ***HN7***[] "[A] fundamental statutory citation is not a mere fact and, if incorrect, may topple the structure of the complaint, particularly where the citation appears to represent the legal theory upon which the plaintiff relies." *Id.*

In this case, Plaintiffs did not mention *§ 203(A)* in their complaint but referred only to *§§ 203(B), 203(C), and 205*. [2] Plaintiffs' allegations focused exclusively on alleged monopolization **[**8]** under *§ 203(B)* and denial of access to

---

[1] ***HN4***[] Summary judgment in antitrust cases should be used sparingly because motive and intent play leading roles in the analysis. *Sports Racing Servs., Inc. v. Sports Car Club of Am., Inc., 131 F.3d 874, 882 (10th Cir. 1997)*; ***Dreiling v. Peugeot Motors of Am., Inc., 850 F.2d 1373, 1379 (10th Cir. 1988)***. However, the usual rules governing summary judgment still apply in antitrust cases. *Sports Racing, 131 F.3d at 882*.

[2] *Section 203 of the Oklahoma Antitrust Reform Act* provides in relevant part:

> ***HN8***[] A. Every act, agreement, contract, or combination in the form of a trust, or otherwise, or conspiracy in restraint of trade or commerce within this state is hereby declared to be against public policy and illegal.
>
> B. It is unlawful for any person to monopolize, attempt to monopolize, or conspire to monopolize any part of trade or commerce in a relevant market within this state.
>
> C. Without limiting any other section of Title 79 of the Oklahoma Statutes or applicable sections of Title 17 of the Oklahoma Statutes, it is unlawful for any person in control of an essential facility to unreasonably refuse to give a competitor or customer of an entity controlling an essential facility access to it upon reasonable terms if the effect of such denial is to injure competition. An injured competitor or customer may bring an action under Section 5 of this act to enforce the provisions of this section only when such injured competitor or customer does not have a remedy before the Corporation Commission.

Okla. Stat. tit. 79, § 203(A)-(C). ***HN9***[] *Section 205* provides for injunctive relief and monetary damages to any person injured by a violation of the Act. Id. *§ 205(A)*.

an essential facility under *§ 203(C)*. Plaintiffs failed to mention **[*1280]** *§ 203(A)*, which prohibits unilateral acts in restraint of trade, either in form or in substance.

[9]** As in Dunn, we cannot say that this omission was "an unimportant detail." See *611 F.2d at 816*. The complaint did not place Defendants Bottling Group and Holdings on notice of the need to defend against a *§ 203(A)* claim, as was demonstrated by Defendants' failure to offer any defense to a *§ 203(A)* claim in their initial motion for summary judgment. Plaintiffs' citation to *§ 203(A)* in their response to Defendants' motion did not cure that error. See *Evans, 936 F.2d at 1091*. A claim for unilateral acts in restraint of trade is sufficiently distinguishable from either a monopolization or an essential facilities claim that Plaintiffs should have mentioned the claim in the complaint. Accordingly, the district court did not err in holding that Plaintiffs had not pled a *§ 203(A)* claim in their complaint.

2. *Rule 15(b)*

HN10[] We review a district court's denial of a motion to treat the complaint as amended for abuse of discretion. *Koch v. Koch Indus., Inc., 203 F.3d 1202, 1216 (10th Cir. 2000)*. *Federal Rule of Civil Procedure 15(b)* provides:

> ***HN11***[] When issues not raised by the pleadings are **[**10]** tried by express or implied consent of the parties, they shall be treated in all respects as if they had been raised in the pleadings. Such amendment of the pleadings as may be necessary to cause them to conform to the evidence and to raise these issues may be made upon motion of any party at any time, even after judgment; but failure so to amend does not affect the result of the trial of these issues. If evidence is objected to at the trial on the ground that it is not within the issues made by the pleadings, the court may allow the pleadings to be amended and shall do so freely when the presentation of the merits of the action will be subserved thereby and the objecting party fails to satisfy the court that the admission of such evidence would prejudice the party in maintaining the party's action or defense upon the merits. The court may grant a continuance to enable the objecting party to meet such evidence.

Fed. R. Civ. P. 15(b). *Rule 15(b)* is "intended to promote the objective of deciding cases on their merits rather than in terms of the relative pleading skills of counsel[.]" Wright et al., Federal Practice and Procedure **[**11]** , § 1491, at 5 (2d ed. 1990) (quoted with approval in *Brandon v. Holt, 469 U.S. 464, 471 n.19, 83 L. Ed. 2d 878, 105 S. Ct. 873 (1985))*.

Rule 15(b) ***HN12***[] contains two mechanisms for amending the complaint to conform to the evidence. First, a complaint may be impliedly amended under *Rule 15(b)* "if an issue has been tried with the express or implied consent of the parties and not over objection." *Hardin v. Manitowoc-Forsythe Corp., 691 F.2d 449, 456 (10th Cir. 1982)*. A party impliedly consents to the trial of an issue not contained within the pleadings either by introducing evidence on the new issue or by failing to object when the opposing party introduces such evidence. *Koch, 203 F.3d at 1217*. However, implied consent cannot be based on the introduction of evidence that is relevant to an issue already in the case when there is no indication that the party presenting the evidence intended to raise a new issue. *Moncrief v. Williston Basin Interstate Pipeline Co., 174 F.3d 1150, 1162 (10th Cir. 1999)*.

This mechanism for implying an amendment is not available if the opposing party objects to evidence pertaining to a new claim. *Dunn, 611 F.2d at 817.* **[**12]** Instead, ***HN13***[] upon objection by the opposing party, the party wishing to amend the pleadings must employ the second mechanism of **[*1281]** *Rule 15(b)*. Pursuant to that mechanism, the pleadings may be amended if the party files a motion to amend the complaint and the objecting party fails to satisfy the court that it will be prejudiced by the amendment. *Fed. R. Civ. P. 15(b)*. The party must expressly move under *Rule 15(b)* for such an amendment. *Moncrief, 174 F.3d at 1163 n.7* ("A court may not sua sponte invoke the second portion of *Rule 15(b)*."). Accordingly, when proper objections have been made but no *Rule 15(b)* motion has been filed, the lack of prejudice to a party does not provide a basis for an amendment. *Dunn, 611 F.2d at 817*.

In the instant case, Plaintiffs referenced *§ 203(A)* only three times in their motions below or in response to Bottling Group and Holdings' motion for summary judgment. Each reference involved a mere citation to or quotation of *§ 203(A)* and was unaccompanied by any evidence that differed from the evidence offered in support of their *§§*

203(B) and 203(C) claims. Significantly, Bottling Group **[**13]** and Holdings objected to Plaintiffs' attempt to raise a § 203(A) claim on the ground that the claim was not pled in the complaint. In light of this objection, the first mechanism of Rule 15(b) is inapplicable. See Dunn, 611 F.2d at 817. Because a court can invoke the second mechanism of Rule 15(b) only in response to a Rule 15(b) motion and because Plaintiffs filed no such motion, the second mechanism of Rule 15(b) is likewise inapplicable. See Moncrief, 174 F.3d at 1163 n.7.

Accordingly, the district court did not abuse its discretion in refusing to treat Plaintiffs' complaint as amended under Rule 15(b) to include a § 203(A) claim.

B. The Relevant Product Market

HN14[] The Oklahoma Antitrust Reform Act is construed in accordance with federal ***antitrust law***. Okla. Stat. tit. 79, § 212; see also Teleco, Inc. v. Ford Indus., Inc., 1978 OK 159, 587 P.2d 1360, 1362 (Okla. 1978). Sections 203(B) and 203(C) of the Oklahoma Antitrust Reform Act both require that the plaintiff prove a relevant market.

HN15[] Under § 203(B), "it is unlawful for any person to monopolize, attempt to monopolize, or conspire to monopolize **[**14]** any part of trade or commerce in a relevant market within this state." Okla. Stat. tit. 79, § 203(B). Accordingly, ***HN16***[] to establish liability under § 203(B), a plaintiff must first define the relevant market. Id. § 203(D)(1)(a); see also Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965) ("Without a definition of that market there is no way to measure [a defendant's] ability to lessen or destroy competition."); Smalley & Co. v. Emerson & Cuming, Inc., 13 F.3d 366, 368 (10th Cir. 1993) (to establish § 2 Sherman Act violation for monopolization or attempted monopolization, plaintiff must define relevant market).

HN17[] Under § 203(C), "it is unlawful for any person in control of an essential facility to unreasonably refuse to give a competitor or customer of an entity controlling an essential facility access to it upon reasonable terms if the effect of such denial is to injure competition." Okla. Stat. tit. 79, § 203(C). Pursuant to the statute, an "essential facility" is a facility which, inter alia, "is controlled by an entity that possesses **[**15]** monopoly power." Id. § 203(D)(3)(a). ***HN18***[] "Monopoly power" is "the power to control market prices or exclude competition." Id. § (D)(2); see also United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). To prove monopoly power, the plaintiff must first define the relevant market. See Walker Process Equip., 382 U.S. at 177.

Accordingly, ***HN19***[] both § 203(B) and § 203(C) require proof of a relevant market. The **[*1282]** relevant market inquiry has two components: geographic market and product market. Telecor Communications, Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1130 (10th Cir. 2002). Only the latter is an issue in this appeal.

The Supreme Court articulated the standard for defining the relevant product market in United States v. E.I. du Pont de Nemours & Co., 351 U.S. at 404. ***HN20***[] A relevant product market consists of "products that have reasonable interchangeability for the purposes for which they are produced - price, use and qualities considered." Id.; Teleco, 587 P.2d at 1364. The interchangeability of products is measured by, and is substantially synonymous **[**16]** with, cross-elasticity. Telecor, 305 F.3d at 1131. A market is "cross-elastic" if rising prices for one product causes consumers to switch to the other product. Id.; see also du Pont, 351 U.S. at 393 ("Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another.").

The Supreme Court has also recognized the existence of submarkets within a larger product market. Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962). ***HN21***[] The boundaries of such a submarket are defined by such factors as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, and sensitivity to price changes and specialized vendors. Id. "The same proof which establishes the existence of a relevant product market also shows (or…fails to show) the existence of a product submarket." 1 ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments 521 (4th ed. 1997) **[**17]** (quoting H.J., Inc. v. Int'l Tel. &

Tel. Corp., 867 F.2d 1531, 1540 (8th Cir. 1989)). Thus, the general standard articulated in du Pont, in conjunction with the specific factors announced in Brown Shoe, provides the applicable standard for defining the relevant product market.

1. Products of a single manufacturer or brand

HN22[] In general, a manufacturer's own products do not themselves comprise a relevant product market. 1 ABA Section of ***Antitrust Law***, supra, 527-28. As the Supreme Court stated in du Pont:

> ***HN23***[] Where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist merely because the product said to be monopolized differs from others. If it were not so, only physically identical products would be a part of the market.

351 U.S. at 394. Similarly, we have said that ***HN24***[] "a company does not violate the *Sherman Act* by virtue of the natural monopoly it holds over its own product." *TV Communications Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1025 (10th Cir. 1992)* (holding that TNT is not relevant product market for purposes of Sherman **[**18]** Act). Even where brand loyalty is intense, courts reject the argument that a single branded product constitutes a relevant market. *Disenos Artisticos E. Industriales, S.A. v. Work, 714 F. Supp. 46, 47-48 (E.D.N.Y. 1989)* (defining relevant product market as market for high quality decorative giftware, despite "intense brand loyalty" among some customers for certain brand of porcelain figurine); see also *Grappone, Inc. v. Subaru of New England, Inc., 858 F.2d 792, 797 (1st Cir. 1988)* (Although "virtually every seller of a branded product has *some* customers who especially prefer its product," that fact alone does not show market power (emphasis in original).).

[*1283] Nonetheless, ***HN25***[] products of a single manufacturer may in rare circumstances constitute a relevant product market. *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481-82, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*. In Eastman Kodak Co. v. Image Technical Services, Inc., the Supreme Court held that the relevant product market must be defined in terms of the choices of products and services available to Kodak equipment owners. *Id.* Because Kodak equipment owners were locked **[**19]** into Kodak parts and services, Kodak parts and services were not interchangeable with the parts and services of other manufacturers. See *id. at 482*. Accordingly, only those companies that serviced Kodak machines comprised the relevant product market. *Id.* [3]

HN26[] The Supreme Court has acknowledged in dicta that the soft drink industry is a prototypical example of an industry in which products are so interchangeable that control over one brand cannot be an illegal monopoly. The Court said that "this power that…soft-drink manufacturers **[**20]** have over their trademarked products is not the power that makes an illegal monopoly." du *Pont, 351 U.S. at 393*. "There are certain differences in the formulae for soft drinks but one can hardly say that each one is an illegal monopoly." *Id.*; see also *Coca-Cola Bottling Co. of Shreveport, Inc. v. Coca-Cola Co., 696 F. Supp. 97, 131 (D. Del. 1988)* ("There can be no serious dispute that Coca-Cola products are in competition with many other soft drinks."); *Barq's Inc. v. Barq's Beverages, Inc., 677 F. Supp. 449, 455 (E.D. La. 1987)* ("Based upon the theory of interchangeability, which allows for closely related product substitutes to be considered in the relevant market, the appropriate unit here is all soft drinks. Barq's root beer is merely one soft drink in a market of competing soft drinks.").

Accordingly, Pepsi branded beverage products cannot alone comprise a relevant product market. Plaintiffs attempt to avoid this conclusion by offering evidence that consumers are "brand loyal" to Pepsi branded products. Mr. Davis, one of the grocery store owners in this case, testified that in his experience, people are brand loyal to Pepsi **[**21]** because instead of substituting Coke if they do not find Pepsi on the grocery store shelves they look

---

[3] See also *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of the Univ. of Okla., 468 U.S. 85, 111-12, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)* (holding that distinct market exists for NCAA college football broadcasts); *Int'l Boxing Club of N.Y., Inc. v. United States, 358 U.S. 242, 249-52, 3 L. Ed. 2d 270, 79 S. Ct. 245 (1959)* (holding that relevant market was properly defined as promotion of championship boxing contests, not all professional boxing events).

elsewhere for Pepsi. Brand loyalty of consumers to particular soft drinks is an insufficient basis for concluding that Pepsi constitutes a relevant product market. Plaintiffs have offered no other evidence to show that Pepsi products are not reasonably interchangeable with Coke products or other branded soft drinks.

Nor have Plaintiffs offered any evidence pertaining to the specific factors listed by the Supreme Court in Brown Shoe, such as evidence that Pepsi prices are insensitive to price changes in other branded soft drinks. See *370 U.S. at 325*. In short, Plaintiffs have offered no evidence - other than their own testimony pertaining to brand loyalty - to prove that Pepsi branded products constitute a market distinct from other soft drink products.

2. Cluster markets

Courts also recognize the existence of "cluster markets." ***HN27***[] A "cluster market" exists where a seller provides a full line of products or services that create a separate product market consisting of **[*1284]** that "cluster" of products or services. See *United States v. Phillipsburg Nat'l Bank & Trust Co., 399 U.S. 350, 360-61, 26 L. Ed. 2d 658, 90 S. Ct. 2035 (1970)* **[**22]** (holding that products and services offered by full-service banks constituted cluster market); *United States v. Grinnell Corp., 384 U.S. 563, 572-73, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)* (holding that central station protective services including automated burglar alarms, automated fire alarms, sprinkler services, and watch signal services constituted cluster market); *United States v. Phila. Nat'l Bank, 374 U.S. 321, 356-57, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)* (holding that products and services offered by commercial banks constituted cluster market).

HN28[] A cluster market exists only when the "cluster" is *itself* an object of consumer demand. See *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1221 (10th Cir. 1986)* (rejecting cluster market approach where cluster was not itself the object of consumer demand). In other words, the cluster approach is only appropriate where "'the product package is significantly different from, and appeals to buyers on a different basis from, the individual products considered separately.'" *Id.* (quoting *JBL Enterprises, Inc. v. Jhirmack Enterprises, Inc., 698 F.2d 1011, 1016-17 (9th Cir. 1983)).* **[**23]**

Plaintiffs argue that even if Pepsi products themselves cannot constitute a relevant product market, Bottling Group distributes a full line of beverage products that together constitute a cluster market over which Bottling Group has monopoly power. Specifically, Plaintiffs point out that Bottling Group distributes approximately 60 Pepsi branded products, approximately 25-30 Dr. Pepper branded products, and other branded apple juices, teas, sport drinks, and water products. In total, Bottling Group distributes approximately 155 branded beverage products.

There are two problems with Plaintiffs' argument. First, Plaintiffs have presented no evidence that the 155 different products distributed by Bottling Group together constitute a cluster that is *itself* the object of consumer demand, as our precedent requires. See *Westman, 796 F.2d at 1221*. Plaintiffs offer no evidence establishing that the package of grocery products distributed by Bottling Group appeals to grocery stores on a different level than Pepsi, Dr. Pepper, Slice, etc. considered separately. They have not offered evidence, for example, that Plaintiffs' customers enter the store with the intent to purchase **[**24]** both Pepsi and Dr. Pepper together and the absence of one of those products would cause the customer to go to another store to purchase both. Nor have they introduced evidence that grocery stores significantly benefit from purchasing Dr. Pepper products and Pepsi products as a package rather than individually.

Second, Plaintiffs do not argue that Bottling Group has monopoly power even if the product market is defined as a cluster market. If a cluster market exists, then presumably that market would include all distributors who provide a similar cluster of soft drink or other beverage products and affiliated services to grocery stores for retail sale in the relevant geographic market. Plaintiffs have come forward with no evidence demonstrating that Bottling Group has monopoly power even in this more narrowly defined product market. [4] Plaintiffs appear to misunderstand the

[4] Plaintiffs did offer evidence of the market share of the individual products distributed by Bottling Group; however, evidence of the market share of the products *as a product cluster* is not provided.

significance of a cluster market - *HN29*[] the fact that an entity distributes a number of different products does not of itself give it monopoly power in a "cluster market"; it merely defines the product(s)/service(s) offered by **[*1285]** the distributor as a package and then limits the relevant product market to those entities that **[**25]** can offer a competitive package.

Accordingly, the district court did not err in holding that the products exclusively distributed by Bottling Group in the Tulsa area cannot, as a matter of law, constitute a relevant product market. [5]

CONCLUSION

We hold that Plaintiffs failed to **[**26]** plead a claim under *§ 203(A) of the Oklahoma Antitrust Reform Act, and* that their claims under *§§ 203(B) and 203(C)* of the Act require proof of a relevant product market. We further hold that Plaintiffs have failed to establish a genuine dispute that the products distributed by Bottling Group alone constitute a relevant product market. Accordingly, the district court's grant of summary judgment in favor of Bottling Group and Holdings is AFFIRMED.

---

[5] Plaintiffs may have argued below that Bottling Group had monopoly power in a product market more broadly defined as the market for all soft drink and other beverage products distributed to retail grocers. By failing to re-assert this argument on appeal, however, Plaintiffs have waived it, and, in any event, the record does not support such a theory.

United States v. Northern Trust Co.

United States Court of Appeals for the Seventh Circuit

June 8, 2004, Argued ; June 22, 2004, Decided

HN13[] **Duties & Liabilities of Parties, Forgery, Fraud & Mistake**

Because "misrepresentation" appears in the same sentence as the word "fraud" in 26 U.S.C.S. § 6532(b), it must mean some less culpable state of mind.

Counsel: For UNITED STATES OF AMERICA, Plaintiff - Appellant: Charles Bricken, DEPARTMENT OF JUSTICE, Washington, DC USA; Thomas P. Walsh, OFFICE OF THE UNITED STATES ATTORNEY, Chicago, IL USA.

For NORTHERN TRUST COMPANY, as Trustee of the Caterpillar Incorporated Master Trust, Defendant - Appellee: Jeffrey E. Stone, MCDERMOTT, WILL & EMERY, Chicago, IL USA.

Judges: Before EASTERBROOK, KANNE, and DIANE P. WOOD, Circuit Judges.

Opinion by: EASTERBROOK

Opinion

[*887] EASTERBROOK, *Circuit Judge*. Closed-end mutual funds pay federal income tax on income and capital gains, then notify their investors, to which the tax burden passes through. A shareholder that is tax exempt (such as a pension trust or a university endowment) can claim a refund of the taxes that the mutual fund paid on account of its proportionate investment. Taxable investors get income coupled with a credit for tax the mutual fund has paid. Two pension trusts (for employees of Inland Steel and Caterpillar) were shareholders of record in Quest for Value Dual Purpose Fund, a closed-end mutual fund. Quest reported to Northern Trust Co., as trustee of these pension trusts, the gains **[**2]** and taxes attributable to these shares. Northern Trust then filed tax returns and claimed refunds on behalf of the pension funds. During 1991 through 1995, the tax years at issue in this litigation, Northern Trust received more than $ 6 million in refunds for the benefit of these pension plans.

The United States wants the money back. It contends that, with the permission of the two pension funds, Northern Trust "lent" the Quest shares to "borrowers" that held all economic incidents of ownership--the right to any dividends on the shares, the right to vote the shares, even the entitlement to sell them and keep the profits. If a borrower elected to return the shares at the end of the term, it retained any capital gain or loss. For this set of rights, it paid the pension funds 102% of the market price of the Quest shares on the date the "loans" were made. As the United States sees things, these transactions were sales carrying a misleading label designed to allow the pension funds to reap tax benefits on shares that they no longer owned--while the "borrowers," though taxable entitles, avoided the economic incidence of taxes on the mutual fund's undistributed income and capital gains.

[3]** These suits (one for each pension fund) were filed late in 1998, less than two years from the date the refund of 1995 taxes had been paid, but more than two after the refunds for the other tax years had been disbursed. Section 6532(b) of the Internal Revenue Code, 26 U.S.C. § 6532(b), ***HN1***[] gives the United States only two years to commence proceedings to recover erroneously paid refunds, "except that such suit may be brought at any time within 5 years from the making of the refund if it appears that any part of the refund was induced by fraud or misrepresentation of a material fact." The complaint alleged that the five-year period applies because Northern Trust misrepresented that the two pension trusts were Quest's "shareholders" and thus eligible for refunds. On Northern Trust's motion under Fed. R. Civ. P. 12(b)(6), the district court dismissed the complaint (with respect to tax years 1991 through 1994) for failure to state a claim on which relief may be granted. 93 F. Supp. 2d 903 (N.D. Ill. 2000). As the court saw things, status as a shareholder is a mixed question of law and fact, **[**4]** and thus not a "fact" as § 6532(b) uses that term; and a "misrepresentation" occurs only if the taxpayer acts with a deceptive state of mind, which the complaint did not allege. Four years later the parties settled the United States' claim with respect to the 1995 tax year--Northern Trust eventually paid 100 [cent] on the dollar--and the district **[*888]** court entered a final judgment, from which the United States appealed.

Dismissal under Rule 12(b)(6) was irregular, for ***HN2***[] the statute of limitations is an affirmative defense. See Fed. R. Civ. P. 8(c). ***HN3***[] A complaint states a claim on which relief may be granted whether or not some defense is potentially available. This is why ***HN4***[] complaints need not anticipate and attempt to plead around defenses. See, e.g., *Gomez v. Toledo, 446 U.S. 635, 64 L. Ed. 2d 572, 100 S. Ct. 1920 (1980)*; *United States Gypsum Co. v. Indiana Gas Co., 350 F.3d 623 (7th Cir. 2003)*. So it is irrelevant that the complaint did not plead that Northern Trust set out to deceive the Internal Revenue Service, or was negligent (or grossly negligent) in applying for refunds. Resolving defenses comes after the complaint stage. **[**5]** Even ***HN5***[] with respect to elements of the plaintiff's claim, complaints need not plead facts or legal theories. See, e.g., *Swierkiewicz v. Sorema N.A., 534 U.S. 506, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002)*; *Bartholet v. Reishauer A.G. (Zurich), 953 F.2d 1073 (7th Cir. 1992)*.

HN6[] "Misrepresentation" differs from "fraud;" otherwise *§ 6532(b)* would be redundant. Understandably, therefore, Northern Trust does not contend that the United States had to plead with particularity under *Fed. R. Civ. P. 9(b)*. Yet if the normal approach of *Rule 8(a)* applies, this complaint is unimpeachable. Indeed, it goes beyond what is necessary, for the complaint *does* anticipate the limitations defense and meet it with a claim that Northern Trust made a "misrepresentation of a material fact." What more could be required? If, as the district court believed, the word "misrepresentation" connotes a culpable state of mind, then the complaint *pleads* that state of mind by using the word "misrepresentation," for ***HN7***[] under *Rule 9(b)* "malice, intent, knowledge, and other condition of mind . . . may be averred generally." And if, as the United States contends, negligent **[**6]** errors may be called "misrepresentations," again the complaint is sufficient. Instead of jettisoning the complaint, the district judge should have invited the parties to file motions for summary judgment or held a bench trial; then we would know what state of mind the persons who prepared these tax returns had, and we could determine whether that was enough under the statute. Precipitate dismissal of the complaint has prolonged this litigation needlessly.

There remains a possibility that this complaint contained too much rather than too little--that the United States has pleaded itself out of court by alleging things that, if true, devastate its claim. The complaint alleges that the "misrepresentation" was Northern Trust's statement that the pension funds were "shareholders" in Quest. The district court saw this as conclusive in defendant's favor, for status as a "shareholder" is not a "fact" but a legal characterization of facts. This is a subject we can address now, and we disagree with the district court's view that only the most concrete statements about the world are "facts" for purposes of *§ 6532(b)*. The word "fact" is a staple of the legal system, and no one suggests that **[**7]** it has a special meaning in the Internal Revenue Code. There is no linguistic problem in saying that a characterization ("shareholder") derived from combining an undisclosed view of the law with undisclosed details about the terms of the "loan" is itself a "fact" (or a mixed question of law and fact, which is treated as a fact for many purposes). "Facts" are not limited to those things that can be described by Newton's three laws of motion. Those ***HN8***[] case-specific details that serve as minor premises in the legal syllogism and thus determine the outcome are what we normally **[*889]** understand by "facts" (or "adjudicative facts") in the judicial process.

Consider some parallels. Is "discrimination" under Title VII a "fact"? Ascertaining the existence of "discrimination" requires the application of legal rules to events in the workplace (was someone of a different race promoted under similar circumstances?, and so on). The Supreme Court nonetheless held in *Pullman-Standard v. Swint, 456 U.S. 273, 72 L. Ed. 2d 66, 102 S. Ct. 1781 (1982)*, that ***HN9***[] "discrimination" is a matter of fact for purposes of *Fed. R. Civ. P. 52* and appellate review. We know from *Icicle Seafoods, Inc. v. Worthington, 475 U.S. 709, 89 L. Ed. 2d 739, 106 S. Ct. 1527 (1986),* **[**8]** that ***HN10***[] a person's status as a "seaman" is an issue of fact, and from *National Collegiate Athletic Association v. University of Oklahoma, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*, that ***HN11***[] the definition of a "market" in ***antitrust law*** is an issue of fact. Why should the identification of a "shareholder" differ? All of these are characterizations arrived at by applying legal rules to events that may or may not be in dispute. If the district court articulates the wrong legal rule, it makes an error of law on the way to its finding of fact, but this does not render the characterization itself a proposition of "law."

One could see the same thing through the lens of defamation law. Suppose someone points a finger and shouts: "That man is a shareholder of Quest!" The statement could be defamatory if it implied disreputable conduct--if, for example, the person were a judge who had just rendered a decision in favor of Quest rather than recusing himself. ***HN12***[] Statements that imply propositions that can be true or false are statements of "fact" rather than "opinion" in tort law. See, e.g., *Stevens v. Tillman, 855 F.2d 394 (7th Cir. 1988)* (discussing this doctrine). The proposition "the Inland **[**9]** Steel Industries Pension Trust is a shareholder of Quest" implies things that can be true or false--

at a minimum, that the pension fund owned shares (as opposed to bonds or warrants) during the taxable year in question, and that it was the beneficial rather than bare legal owner of the shares (in other words, that it did not hold them as trustee, let alone as bailee, pledgee, or custodian). The United States contends, however, that the pension fund did *not* enjoy beneficial ownership in these shares. That may be true or false; and if the pension fund transferred beneficial ownership of the shares, then the statement that it remained a "shareholder" is a misrepresentation of fact. It is no different from the assertion "the Inland Steel Industries Pension Trust owns 100,000 shares of Quest" when as a result of sales and other transfers to third parties it owned only 10,000. That misstatement, which would increase the tax refund by an order of magnitude, would be one of fact.

Nothing else in the complaint had any potential to scuttle the claim. Thus we must remand. We have learned enough about *§ 6532(b)* to say that, when ruling on motions for summary judgment or holding a bench trial, **[**10]** the district court should not treat the word "misrepresentation" as limited to intentional deception. Only one appellate opinion to date has discussed that word's meaning. *Lane v. United States, 286 F.3d 723 (4th Cir. 2002)*--which considers and disapproves the district court's opinion in this litigation--holds that ***HN13***[] because "misrepresentation" appears in the same sentence as the word "fraud," it must mean some less culpable state of mind. The fourth circuit thought that gross negligence would do; we need not decide whether even that much is essential. One way to understand *§ 6532(b)* as a whole might be that, when the return discloses enough that all the IRS has to do is check the calculations and apply the law, then the period of limitations is two years; but if the IRS must independently discover **[*890]** facts that contradict the return, then it has an extra three years to do the legwork. Then if Northern Trust had represented that "the Inland Steel Industries Pension Trust owns 100,000 shares of Quest" when it owned only 10,000, that statement would be a "misrepresentation" even if it was just a typographical error (the addition of an extra zero). The only way to identify **[**11]** such an error would be to ask the pension fund or Quest for original records, a step that may not occur even in an audit (itself a rare event). Many dictionaries define "misrepresentation" to include both intentional and inadvertent misstatements. Whether that is the best way to treat this word in this statutory context is a question that need not yet be answered, for the United States tells us that it is prepared to demonstrate that Northern Trust committed gross negligence, or worse. Only if it comes up short will it be necessary to pin down the word's meaning.

REVERSED AND REMANDED

Benson v. State

Circuit Court of Maryland, Baltimore City

June 23, 2004, Decided

HN2[] **State & Territorial Governments, Claims By & Against**

Maryland Courts have recognized that, substantial compliance with the requirements of the Maryland Tort Claims Act, Md. Code Ann., State Gov't § 12-207(a)(1)-(5), is sufficient to satisfy the condition precedent to the State's waiver of sovereign immunity. Additionally, the Court of Special Appeals has acknowledged that while Maryland had never, addressed the issue of substantial compliance in the context of a deviation from the required form or content of a notice. There is a great deal of support, however, in the decisions of other states for the proposition that, where compliance with a statutory requirement is technically defective, but nevertheless accomplishes the purposes of the statute itself, the actions taken may be held sufficient.

HN3[] **State & Territorial Governments, Claims By & Against**

The purpose of Maryland Tort Claims Act, Md. Code Ann., State Gov't § 12-207(a)(1)-(5), is to provide the relevant agency with notice of a claim. The notice must inform the agency of the circumstances of the incident so that it may investigate, determine its possible liability, negotiate a settlement, or prepare a defense. If the notification facilitates the fulfillment of those statutory objectives, the plaintiffs have substantially complied.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Torts > Public Entity Liability > Immunities > Sovereign Immunity

Governments > State & Territorial Governments > Claims By & Against

HN12[] Deceptive & Unfair Trade Practices, State Regulation

The doctrine of sovereign immunity bars individuals from bringing actions against the State, thus protecting it from interference with governmental functions and preserving its control over its agencies and funds. The doctrine is applicable to the State's agencies and instrumentalities, unless the legislature has waived governmental immunity explicitly or by implication. Maryland Code, Title 13 of the Commercial Law Act, entitled the Consumer Protection Act, Md. Code Ann., *Com. Law § 13-301 et seq.*, grants no waiver of the State's sovereign immunity. Furthermore, there is no Maryland case in which a consumer protection claim was tolerated against the State where the Plaintiff had failed to persuade the court that such a claim should be allowed therein.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN13[] Civil Conspiracy, Elements

Maryland Court's have defined civil conspiracy as a tort in which, a combination of two or more persons by an agreement or understanding to accomplish an unlawful act or to use unlawful means to accomplish an act not in itself illegal, with the further requirement that the act or the means employed must result in damages to the plaintiff.

Constitutional Law > Separation of Powers

HN14[] Constitutional Law, Separation of Powers

Md. Const. Decl. Rights art. 8 provides: That the Legislative, Executive and Judicial Powers of Government ought to be forever separate and distinct from each other; and no person exercising the functions of one of said Departments shall assume or discharge the duties of any other.

Administrative Law > Separation of Powers > Legislative Controls > Scope of Delegated Authority

Constitutional Law > Separation of Powers

HN15[] Legislative Controls, Scope of Delegated Authority

Although the statutory language in *Md. Const. Decl. Rights art. 8* concerning the separation of powers seems strict and absolute, the Maryland Court of Appeals have, on a number of occasions, stressed that Article Eight of the

Maryland Declaration of Rights does not impose a complete separation between the branches of government, and that one may constitutionally delegate legislative power to the executive branch where the legislature provides sufficient safeguards in order to guide the executive branch in the administration of the statute.

Civil Rights Law > Protection of Rights > Prisoner Rights > Welfare

Administrative Law > Agency Rulemaking > Rule Application & Interpretation > Validity

Governments > State & Territorial Governments > Finance

HN17[] Rule Application & Interpretation, Validity

A regulatory measure may produce revenue, but in such a case the amount must be reasonable and have some definite relation to the purpose of the Act. A revenue measure, on the other hand, may also provide for regulation, but if the raising of revenue is the primary purpose, the amount of the tax is not reviewable by the courts. There is no set rule when determining whether an Act is primarily a regulatory measure or a revenue measure. In general, it may be said that when it appears from the Act itself that revenue is its main objective, and the amount of the tax supports that theory, the enactment is a revenue measure. The Brennan court also establishes that, in a regulatory Act formed under the guise of a revenue-raising Act, when the amount charged is left to the discretion of an administrative official, it is not a valid exercise of the State's police power. That is, the state cannot use its taxing power to validate a measure that would be void under its power to regulate.

Civil Rights Law > Protection of Rights > Prisoner Rights > Welfare

Antitrust & Trade Law > General Overview

Governments > Federal Government > Claims By & Against

HN24[] Antitrust & Trade Law

The United States District Court for the District of Columbia held that federal officials and federal entities were immune from being sued under federal antitrust laws. The Court has explained therein that antitrust laws were not intended to restrain governmental action.

Antitrust & Trade Law > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN25[] Antitrust & Trade Law

Maryland antitrust laws were created to compliment the federal antitrust laws, and federal courts have held that state actions, including the actions of its agencies, are exempt from federal antitrust suits under the state action doctrine. Federal courts have also held that antitrust laws forbid only those trade restraints and monopolizations that are created, or attempted, by the acts of individuals or combinations of individuals or corporations. In addition, states and other public agencies do not violate the antitrust laws by charging fees or taxes that exploit the monopoly of force that is the definition of government. Accordingly, federal jurisdictions have ruled that valid governmental actions do not violate ***antitrust law***. Thus, analyzing federal ***antitrust law***, one would conclude that the State of Maryland is immune from liability. Hence, the State is also immune from its own antitrust laws which are complementary to the federal laws. A Maryland trial court must conclude that the State cannot be a person within the meaning of the Maryland Antitrust Act and need not be exempted by any section of the Act since it withstands the authority of the Act.

Antitrust & Trade Law > Regulated Practices

Governments > State & Territorial Governments > Claims By & Against

HN26[] **Antitrust & Trade Law, Regulated Practices**

Although the actions of the State may not be found to be unlawful pursuant to the Maryland Antitrust Act, Md. Code Ann., *Com. Law § 11-202 et seq.*, state actions that threaten to restrict trade or cause monopolization must be valid actions. Valid state actions, for the purposes of antitrust immunity, must be clearly articulated and affirmatively expressed as state policy, and be actively supervised by the State itself.

Governments > State & Territorial Governments > Finance

HN27[] **State & Territorial Governments, Finance**

See *Md. Const. art. III, § 32*.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Money Had & Received

HN28[] **Breach of Contract Actions, Money Had & Received**

Money Had and Received is merely a particularized restitution action or a form of quasi-contractual action derived from the theory of unjust enrichment. The count is commonly said to be equally remedial with a bill in equity, and, in general terms, lies whenever the defendant has obtained possession of money which, in equity and good conscience, he ought not to be allowed to retain.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN29[] **Procedural Due Process, Scope of Protection**

See *Md. Const. Decl. Rights art. 24*.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN30[] Civil Conspiracy, Elements

Under Maryland law, one can establish a cause of action for a civil conspiracy where: (1) a confederation of two or more persons by agreement or understanding; (2) engage in some unlawful or tortious act done in furtherance of the conspiracy or engage in an unlawful and tortious means to accomplish an act not in itself illegal; with (3) actual legal damage resulting to the plaintiff.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN31[] Sherman Act, Claims

Conspiracy has been defined in the anticompetitive or monopolistic context as follows: To maintain a cause of action under the Sherman Act, *15 U.S.C.S. § 1*, a party must set forth the following allegations: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anticompetitive effects within relative product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal and (4) that the Plaintiff was injured as a proximate result of that conspiracy.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN32[] Civil Conspiracy, Elements

Maryland Courts have consistently held that conspiracy is not a separate tort capable of independently sustaining an award of damages in the absence of other tortious injury to the plaintiff. No action in tort lies for conspiracy to do something unless the acts actually done, if done by one person, would constitute a tort.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN33[] Regulated Practices, Price Fixing & Restraints of Trade

The field-rate doctrine, which is based on both historical antipathy to rate setting by courts, deemed a task they are inherently unsuited to perform competently, and on a policy of forbidding price discrimination by public utilities and common carriers, forbids a court to revise a public utility's or common carrier's filed tariff, which is to say the terms of sale that the carrier has filed with the agency that regulates the carrier's service.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN34[] Regulated Practices, Price Fixing & Restraints of Trade

It is permissible for a customer or a competitor to challenge a tariff before the appropriate state agency and, if they are disappointed with the response of the agency, they can seek judicial review, *47 U.S.C.S. §§ 204(a)(2)(C)* and *402*. But, the customer or competitor cannot ask the court in a suit such as a civil rights or antitrust suit, to invalidate or modify a tariff or seek damages based upon the difference between the actual tariff and some lawful, hypothetical tariff.

Judges: [*1] Thomas E. Noel, Judge.

Opinion by: Thomas E. Noel

Opinion

MEMORANDUM AND ORDER

Plaintiffs Sandra Benson and Mary Ann Dean, both individually and on behalf of persons similarly situated, bring these class actions against the State of Maryland, Office of the State Treasurer, Office of the Comptroller of the Treasury, and the State Department of Public Safety and Correctional Services[1]. Both Ms. Benson and Ms. Dean, the relatives of Maryland inmates, allege that they have been required to pay excessive charges for collect calls received from their inmate relatives, due to an illegal scheme carried out by the Defendants.

I. Facts

The facts of this case are undisputed. In 1989, Maryland personnel, after a competitive **[*2]** bidding process, contracted exclusively with Verizon Communications, Inc. (operating as Bell Atlantic at the time) and AT&T[2] to provide pay phones and telephone carrier services in its prisons[3]. In Maryland, inmates of penal institutions are allowed to make only outgoing collect telephone calls if they wish to speak to persons outside of their confines[4]. Those family members or friends of the inmates, who choose to accept the collect calls are charged at a greater rate than the rates charged to the general public.

Under the conditions of the contract between Maryland and AT&T, the State receives as much as 42% of the amount charged for outgoing long distance telephone calls and 20% of the amount Verizon charges for outgoing local calls from the prisons. The carrier, however, does not reduce its profits to accommodate the State's percentage. Recipients of inmate calls are charged a rate that consists of the State's percentage in addition to the fee it charges for the actual service.[5]

---

[1] Plaintiff's original pleadings also named Richard N. Dixon, former Maryland State Treasurer, and William Donald Schaefer, Comptroller of the Treasury as Defendants. This court, held an initial motions hearing on August 28, 2002, at which time defendants were reduced to the State of Maryland, Office of the State Treasurer, Office of the Comptroller of the Treasury and the State Department of Public Safety and Correctional Services. Herein, "State" and/or "Maryland" will refer to some and/or all Defendants.

[2] According to Plaintiff's Exhibit 1 for Motion for Partial Summary Judgment, (e.g. Defendant's Answers to Plaintiff's Interrogatories), there is one contract for all state agencies. Verizon carries all local calls and AT&T carries each long distance call.

[3] This contract was extended for six months in June of 2002 according to Plaintiff's Exhibit 1 for her third amended complaint (e.g. statements made by a Prince George's County Delegate in the November 28, 2001, Daily Record article entitled "Try that number again: Suit challenges prison phone rates.")

[4] In a collect call situation the caller, through a "live" or "automated" operator, places a call to the recipient. The operator communicates **[*3]** to the recipient that a collect call has been placed to them by the caller. The recipient is asked whether or not they will accept the charges for the call, as they will be responsible for the charges.

[5] Maryland, reportedly, is projected to receive as much as $6,600,000.00 annually in revenue from these contracts. This revenue is paid by Verizon Communications, Inc. and AT&T to the State in monthly installments. The State deposits these monies into their Inmate Welfare Fund. Plaintiff's Exhibit 1 (Defendant's Answer to Plaintiff's Interrogatories) explains that the funds in the Inmate Welfare Fund are spent for education, medical care support, life skills programming, commissary operations, religious services, some inmate **[*4]** wages and inmate litigation. Defendant provided the Inmate Welfare Fund's fiscal year 2000 expenditure break down which accounted for $5,046,000.

The State Office of Legislative Audits has confirmed that long distance collect calls received from Maryland's inmates costs the recipient $3.45 for the first minute and $.45 for each additional minute, while each local call was billed at a flat rate of $.85. Ms. Benson, has produced telephone bills from an eight-day period in February of 2001, in which 46 collect phone calls were made to her from a Maryland prison, for which she was charged $344.35.

The instant class actions seek legal and equitable remedies for the above-mentioned charges for collect calls made from Maryland inmates to members of their families and friends. Plaintiffs allege that the State of Maryland entered into exclusive contracts with the aforementioned telephone companies and that, stemming from these contracts, family and friends of inmates were charged excessive rates for collect calls. Inmates are only allowed to make collect calls through this arrangement and the telephone companies reaped a substantial percentage of the telephone charges to the State of Maryland. **[*5]**

As for the *Benson* action, it was originally filed by Sandra Benson, who was the parent of a Maryland inmate. Ms. Benson alleged that she was required to pay excessive charges for collect calls placed to her by her son who was an inmate at a correctional facility in the State of Maryland. Sandra Benson is now deceased, and Crystal Benson, the personal Representative of Sandra Benson's Estate, is the substituted Plaintiff in *Benson's* Fifth Amended Complaint. The parallel *Dean* case has been recently filed and seeks the same relief as the *Benson* case.

Numerous Motions to Dismiss, a Motion for Summary Judgment, and various oppositions to said motions, have been previously filed in the *Benson* case. However, the current *Benson* and *Dean* Complaints include new causes of action and have been organized differently than the previously filed complaints. Hence, Defendants have filed the instant consolidated motion to dismiss to address the new and amended complaints. In addition, by stipulation of the parties, all served and produced discovery in the *Benson* case has been fully adopted in the *Dean* case.

II. Discussion

Plaintiffs' Benson and Dean, in their respective complaints, have challenged the legality **[*6]** of the Maryland inmate telephone system on nine (9) grounds including:

(1) *Article Eight (8) of the Maryland Declaration of Rights*, Separation of Powers;
(2) Unjust Enrichment;

(3) *Article Fourteen (14) of the Maryland Declaration of Rights*, Unauthorized Tax;
(4) Maryland Antitrust Act;
(5) Maryland Consumer Protection Act;

(6) *Article III, section 32 of the Maryland Constitution*, Unlawful Appropriation;
(7) Money Had and Received;

(8) *Article 24 of the Maryland Declaration of Rights*, Unlawful Taking; and
(9) Civil Conspiracy.

Defendants, in their Consolidated Motions to Dismiss, argue that the complaints should be dismissed due to their failure to state a claim upon which relief may be granted as to each of the nine (9) counts. Furthermore, Defendants contend that, in some respects, the Plaintiffs' claims are barred by the provisions of the Maryland Tort Claims Act.

A. Maryland Tort Claims Act

Plaintiffs, Sandra Benson and Mary Ann Dean have initiated this action under Maryland Code, Title 12, Subtitle 1 of the State Government Article, entitled the "Maryland Tort Claims Act" (hereinafter "MTCA"), on behalf of themselves and the proposed class. The MTCA was created to ensure that parties injured by the State could seek redress despite sovereign immunity. Maryland Code, *§12-207(a)(1)-(5)* of the State Government Article ***HN1***[] outlines the form in which a claim against the **[*7]** State may be raised:

(1) contain a concise statement of facts that sets forth the nature of the claim, including the date and place of the alleged tort;
(2) demand specific damages;
(3) state the name and address of each party;
(4) state the name, address, and telephone number of counsel for the claimant, if any; and
(5) be signed by the claimant, or the legal representative or counsel for claimant.

On October 25, 2001, Plaintiff Benson sent a letter, via certified mail, return-receipt requested, to the Office of the State Treasurer for Maryland pursuant to *§12-207(a)* of the Article[6]. On May 28, 2002, Plaintiff Dean's counsel, Marshall N. Perkins, Esquire, sent a letter, via certified mail, return-receipt requested, to the Office of the State Treasurer for Maryland pursuant to *§12-207(a)* of the Article. The Treasurer, or his designee, as directed by Title 12 of the Article, is to consider such claims and settle or deny them[7]. Defendant challenges the sufficiency of Plaintiffs' claims alleging failure to meet the requirements of the MTCA.

As to the allegation of failure to specify damages sought, Defendant is correct **[*8]** to the extent that Plaintiffs have not claimed a specific dollar amount[8]. Nevertheless, ***HN2***[] Maryland Courts have recognized that, "substantial compliance with the requirements of the MTCA is sufficient to satisfy the condition precedent to the State's waiver of sovereign immunity." *Simpson v. Moore, 323 Md. 215, 225, 592 A.2d 1090 (1991)*. Additionally, the Court of Special Appeals acknowledged that while Maryland had never, "addressed the issue of substantial compliance in the context of a deviation from the required form or content of a notice[9]. . . [t]here is a great deal of support, however, in the decisions of other states for the proposition that, where compliance with a statutory requirement is technically defective, but nevertheless accomplishes the purposes of the statute itself, the actions taken may be held sufficient . . ." *Conaway v. State, 90 Md. App. 234, 243, 600 A.2d 1133 (1992)*.

Conaway, was a case in which a prisoner injured in the Maryland Division **[*9]** of Correction, filed negligence claims against the State pursuant to the MTCA. The State denied Conaway's claim on the grounds that the notice provided was defective. Conaway filed his Complaint after the time period allowed in the MTCA had expired and failed to demand specific damages. The Court following the rule set forth in *Gardner v. State, 77 Md. App. 237, 247, 549 A.2d 1171 (1988)* which held that Maryland courts are to look to the Federal Tort Claims Act (hereinafter FTCA) in interpreting the MTCA. The aforementioned court found resolution in the claimant's failure by contrasting the two acts. The *Conaway* Court reasoned that, although both acts "require a specific demand for damages, the FTCA also states that, once the agency denies the claim, the claimant may not file a lawsuit for a greater amount of damages than was claimed before the agency . . .". This provision provides the agency with a certain degree of precision in investigating the claim, in that it will know the magnitude of the government's potential liability at all times. The MTCA provides no such limitation on the claimant's eventual action for damages; thus, the specific demand for damages, so critical in federal cases, is of far less relevance in Maryland. The Court **[*10]** reversed the decision to dismiss Conaway's claim because it found he had substantially complied with the notice provision of the MTCA.

In the case at bar, Plaintiffs claim actual damages equal to the amount that Maryland received from the communication carriers. ***HN3***[] The statute's purpose is to provide the relevant agency with notice of a claim. The notice must inform the agency of the circumstances of the incident so that it may investigate, determine its possible

---

[6] Plaintiff supplemented her claim with the Treasurer on November 29, 2001 and December 17, 2001.

[7] *§12-107(c)* & *(d)* discuss settlements and final denials respectively.

[8] Plaintiff prays for (1) permanent injunctive relief to enjoin Defendants from charging, invoicing and collecting on the calls, (2) an award of attorney's fees, (3) compensatory and punitive damages, (4) litigation costs, pre- and post-judgment interest, and (5) any other relief the court deems required.

[9] The "notice" alluded to is the claim itself.

liability, negotiate a settlement, or prepare a defense. If the notification facilitates the fulfillment of these statutory objectives, the Plaintiffs have substantially complied. This court finds that Plaintiffs substantially complied by alleging damages that were sufficient for the Treasurer or his designee to begin an investigation into the matter.

In adherence with the rulings of the guiding federal authority this court must, *sua sponte*, deny Plaintiff's class certification as to the MTCA claims. The issue of whether a class action may be filed pursuant to the MTCA is an issue of first impression. Hence, this court will follow Gardner rule by looking to the FTCA for direction. As such, the court reviewed several federal cases **[*11]** which addressed class certifications in cases brought under the FTCA. The majority of these cases held that each individual member of a purported class, prior to certification of an action brought pursuant to the FTCA, 28 USCA § 2675, must satisfy the jurisdictional prerequisites found in the Act. The full text of 28 U.S.C.A. § 2675(a) reads as follows:

> §2675. Disposition by federal agency as prerequisite; evidence
>
> **HN4**[] (a) An action shall not be instituted upon a claim against the United States for money damages for injury or loss of property or personal injury or death caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment, unless the **claimant shall have first presented the claim to the appropriate Federal agency and his claim shall have been finally denied by the agency in writing and sent by certified or registered mail. The failure of an agency to make final disposition of a claim within six months after it is filed shall, at the option of the claimant any time thereafter, be deemed a final denial of the claim for purposes of this section**. The provisions of this subsection shall not apply to such claims as may be asserted under the Federal **[*12]** Rules of Civil Procedure by third party complaint, cross-claim, or counterclaim.

The MTCA's prerequisites are the equivalent of those found in the FTCA. Maryland Code, §12-106(b) of the State Government Article, sets forth the following analogous prerequisites:

> **HN5**[] (b) *Claim and denial required*. — A claimant may not institute an action under this subtitle unless:
> (1) the claimant submits a written claim to the Treasurer or a designee of the Treasurer within 1 year after the injury to person or property that is the basis of the claim;
> (2) the Treasurer or designee denies the claim finally[10]; and
> (3) the action is filed within 3 years after the cause of action arises.

This court's review of federal case law begins with Kantor v. Kahn, 463 F. Supp. 1160 (S.D.N.Y. 1979), in which a class action was brought by plaintiffs to recover damages under the FTCA on behalf of 40,000 consumers alleging **[*13]** that the Civil Aeronautics Board (hereinafter "CAB") failed to regulate a chartered tour group. The Court found an absence of subject matter jurisdiction because the named plaintiffs bore the burden to supply the CAB with the names of the individual claimants in order for the agency to facilitate settlement negotiations. The plaintiffs also failed to state their authority or the authority of their attorney to act as representative on behalf of the class. The Court stated that a class action could be maintained under the Act if each class member filed an individual claim with the agency or if each individual claimant was named with an assertion that would establish the authority of the named claimant to represent claims on behalf of the class members. The court also determined that plaintiffs failed to meet the sum certain requirement because their demand for a lump sum payment did not indicate that each class member suffered the same damages.

Similarly, in Harrigan v. United States, 63 F.R.D. 402 (D. C. Pa. 1974), the Court dismissed an attempted class action instituted by plaintiff, a paralyzed veteran, seeking to represent a class of paralyzed veterans who had undergone urological surgery, on the basis of misleading information. The surgeries **[*14]** were performed in

---

[10] §12-107(d) **HN6**[] states that a claim is denied finally: (1) if, by certified mail, return receipt requested, under a postmark of the United States Postal Service, the Treasurer or designee sends the claimant, or the legal representative or counsel for the claimant written notice of denial; or (2) if the Treasurer or designee fails to give notice of a final decision within 6 months after the filing of the claim.

government hospitals and several of the veterans sustained injuries. The Court held that the class action failed to comply with the jurisdictional requirements of the FTCA. Although the purported class filed an administrative claim, the Court did not have jurisdiction over the unnamed members of the purported class who had not filed an administrative claim. The Court reasoned that to allow waivers of the administrative claim prerequisites for unnamed plaintiffs would constitute a prohibited expansion of the jurisdiction of the federal courts. Therefore, the class had to be limited to only those members who had filed administrative claims. After this reduction the class action could no longer be maintained.

Finally, in this discourse, we have *Caidin v. United States, 564 F.2d. 284 (9th Cir. Cal 1977)*, in which a shareholder of a bank brought an action on behalf of himself and all persons similarly situated seeking damages from the federal government as a result of the failure of the national bank. The Court held that the administrative claim filed on behalf of the shareholders as a class was insufficient to fulfill the jurisdictional prerequisites of the FTCA because plaintiff had no express authority to represent the purported **[*15]** class. The Court explained that since it was the objective of the administrative claim requirements to facilitate settlement of cases, it was necessary to require that the existence of such authority be asserted contemporaneously with the filing of the claim by one who files on behalf of a class of claimants. Furthermore, evidence of authority need be presented in regard to each individual claimant who has not filed on his or her own behalf. The Court also found that the Plaintiffs individual claim failed because the only sum requested was for the class as a whole. *Cf. Luria v. Civil Aeronautics Board, 473 F.Supp. 242 (S.D.N.Y. 1919)*; *Pennsylvania by Sheppard v. National Assoc. Of Flood Insurers, 520 F.2d 11 (CA3 1975)*; *Lunsford v. United States, 418 F.Supp. 1045 (D. S.D. 1976)*; *Founding Church of Scientology, Inc. v. Director, Federal Bureau of Investigation, 459 F. Supp. 748 (D.D.C. 1978)*.

The FTCA ***HN7***[] case law clearly demonstrates that a plaintiff pursuing a class action under it or an analogous tort claims act, such as Maryland's, must be able to (1) name each individual claimant, so that settlement negotiations may be facilitated; and (2) provide evidence that each member of the class has exhausted his or her administrative remedies, or (3) when filing the administrative claim provide evidence of the authority either of plaintiff, or plaintiff's counsel, to present claims on behalf of each individual class member.

In these two (2) cases at issue, Plaintiffs have failed each of these enumerated requirements. **[*16]** Plaintiffs Benson and Dean, first and foremost, have failed to name any other similarly situated persons on whose behalf they are acting and any alleged damages suffered by said class members. As previously stated the objective of the MTCA's filing requirement is to afford the State the opportunity to investigate the claims to determine its possible liabilities, and negotiate settlements or prepare defenses. Without the names of these other individuals that Plaintiffs desire to represent and the alleged damages suffered by those class members, the Treasurer is unable to investigate the implicit additional claims. The Treasurer is also incapable of determining the State's possible liability to these unnamed persons, and therefore can neither negotiate settlements, nor prepare defenses to claims of unknown people, which are at this point, only insinuated by Plaintiffs.

In addition, Plaintiffs have offered nothing to suggest that each individual member of the proposed classes have exhausted his or her administrative remedies. The MTCA dictates that no tort claim against the State may be brought into court until there has been a final denial of the claim by the Treasurer. Therefore, Plaintiffs **[*17]** must be able to demonstrate that each of the persons they wish to represent has fried a claim with the Treasurer which has been finally denied, as defined in the MTCA. Finally, Plaintiffs must provide some evidence of their authority to represent the class, but they have offered none. For all of the preceding reasons, Plaintiffs' class action certifications must be denied.

Plaintiffs' prayers for punitive damages also must be denied. Maryland Code, *§5-522(a)(1) of Courts and Judicial Proceedings Article* ***HN8***[] states that Maryland's immunity "is not waived under *§12-104 of the State Government Article*," for punitive damages. Thus, punitive damages may not be awarded against the State-pursuant to the MTCA.

Defendants, in their Consolidated Motion to Dismiss, raise a material argument against Plaintiff Benson's MTCA action. Plaintiff Benson has not illustrated that her Complaint complies with the Tort Claims Act for the reason that there is no allegation that the Treasurer has finally denied the claim. Maryland Code, *§12-106(b)(2) of the State*

Government Article HN9[] states that a claimant may not institute a court action under the MTCA until "the Treasurer or designee denies the claim finally."

A final denial, as spelled out in §12-107(d) of the Article, occurs either when (1) claimant receives written notice of denial, or (2) **[*18]** the Treasurer or designee fails to give notice of the final decision within six months of the filing. Plaintiff Benson, in this case, filed her claim with the Treasurer on October 25, 2001 and subsequently filed suit in the Circuit Court for Baltimore City on November 26, 2001. Plaintiff Benson has not evidenced nor alleged that her claim was finally denied, before she filed suit. This court concludes that Plaintiff Benson's suit, brought only one month after filing her claim with the Treasurer, is premature. Plaintiff's actions preempted the objectives of the MTCA notice requirements from being fulfilled. The filing with the court disrupted the Treasurer's capacity to investigate the matter, determine any State liability, and negotiate a settlement or prepare a defense to the claim. Thus, there can be no finding of substantial compliance here.

Plaintiff Benson's premature filing with the court after only one month is closer to an outright failure than it is to substantial compliance. Moreover, HN10[] Maryland case law decrees that this court "dismiss the action" when a plaintiff has made the appropriate claim with the an agency "but filed a court action before the claim was denied or the **[*19]** six-month period for agency consideration has run". Gardner v. State, 77 Md. App. 237, 248, 549 A.2d 1171 (1988).

Although, §12-102 of the Article states," [t]his subtitle shall be construed broadly, to ensure that injured parties have a remedy," Plaintiff Benson's claim against Maryland is barred by her failure to comply with §12-106(b) of the State Government Article. *See* Williams v. Maryland Department of Human Resources, 136 Md. App. 153, 176, 764 A.2d 351 (2000). The statute commands that the Treasurer be given six months free of litigation to consider and attempt to resolve the matter. Ultimately, Plaintiff's premature court action constitutes a jurisdictional defect that leaves this court with no subject matter jurisdiction over any of Plaintiff's tort claims under the MTCA.

In addition, Plaintiff Dean's MTCA Notice and Complaint were also not timely filed. The MTCA HN11[] requires that notice is to be filed within one (1) year after the occurrence of the injury that is the basis of the claim and suit is to be filed within three (3) years after the cause of action arose. Md. Code Ann., State Government § 12-106(b) (1985). In the Dean case, notice was filed on May 28, 2002 and suit was filed on June 11, 2003. Plaintiff Dean was on notice of her alleged injuries as early as January 1, 1999.[11] Therefore, Plaintiff Dean's claim was not filed with this court within three (3) years after the cause of action arose.

Hence, Defendant's motion to dismiss Plaintiff Benson's claims for failure to comply with the MTCA is granted in part. Plaintiff Benson's failure to attain a final denial from the Treasurer or his designee as mandated in the MTCA will preclude her tort claims. However, those claims that could have been brought independent of the MTCA shall survive for further consideration.

In addition, Defendant's motion to dismiss Plaintiff Dean's Complaint is granted in full. In addition to Plaintiff Dean's failure to timely file a MTCA notice and Complaint, Plaintiff Dean has failed to state any claim in her Complaint that alleges any fact to support the contention that she has suffered any injury. Although Plaintiff Dean's phone records are attached as exhibits to Plaintiff Benson's First Amended Class Action Complaint, nowhere in Dean's Complaint does she allege that she accepted and paid for any collect calls from any Maryland inmate nor has she supplied phone records as exhibits to her Class Action Complaint. The only specific allegations in her Complaint relate to Plaintiff Benson. Plaintiff Dean's Complaint **[*21]** only contains general allegations that she was the victim of a scheme perpetrated by the State to raise revenue from recipients of collect calls from Maryland inmates. Therefore, Plaintiff Dean's Complaint is dismissed in its entirety.

The court must now determine which, if any, of Plaintiff Benson's claims are dismissed by her MTCA failures. First, the court considers Plaintiff Benson's antitrust claim, to determine if it is precluded by her MTCA failure. This court

---

[11] Plaintiff Dean was **[*20]** receiving phone bill for collect calls to a Maryland inmate as early as January 1, 1999.

finds that Plaintiff's Antitrust claim is not dismissed as it is not raised subject to the MTCA; moreover, this court believes there are significant issues raised by the claim that justify substantial consideration.

Second, the court considers Plaintiff Benson's Declaration of Rights claims to determine if they are precluded. The court finds that Plaintiff's *Article 8* and *Article 14* claims are dismissed. These claims, specific to this action, are state constitutional fort claims in the opinion of this court. Plaintiff's *Article 8* and *Article 14* claims allege a violation of her constitutional rights brought about by the exclusive State contracts that result in high phone charges for the collect calls she has accepted from an inmate. Any alleged violation of a constitutional **[*22]** right involves a violation of a duty imposed by law.

A tort, as defined in Black's Law Dictionary, is a violation of a duty owed to the plaintiff, as long as the duty is imposed by law rather than by agreement or contract. Thus, under such a broad definition of torts all violations of constitutional rights that result in harm to plaintiffs are encompassed. Furthermore, the MTCA's waiver of sovereign immunity is not limited to a specific short list of tort actions; it applies to "tort actions generally." *See Simpson v. Moore, 323 Md. 215, 219, 592 A.2d 1090 (1991)*. Plaintiff's Declaration of Rights claims are torts encompassed by the MTCA and Plaintiff may not sue the State because of her prerequisite failures.

In addition, Plaintiffs' claims of Unjust enrichment, violations *Art. III, section 32*, (Unlawful Appropriations), Money Had and Received and violations of *Art. 24 of Maryland Declaration of Rights* (Unlawful Taking) are also dismissed pursuant to the MTCA due to the fact that they are torts as defined *supra*.

Next, the court considers Plaintiff Benson's Consumer Protection Act (hereinafter CPA) to determine if it shall survive her MTCA failure. ***HN12***[] "[T]he doctrine of sovereign immunity bars individuals from bringing actions against the State, thus protecting it from interference with governmental functions **[*23]** and preserving its control over its agencies and funds." *Katz v. Washington Sub. San. Comm'n. 284 Md. 503, 507, 397 A.2d 1027 (1979)*, The doctrine is applicable to the State's agencies and instrumentalities, unless the legislature has waived governmental immunity explicitly or by implication. *Godwin v. County Comm'rs, 256 Md. 326, 334, 260 A.2d 295 (1970)*. Maryland Code, Title 13 of the Commercial Law Act, entitled the Consumer Protection Act grants no waiver of the State's sovereign immunity. Furthermore, there is no Maryland case in which a consumer protection claim was tolerated against the State where the Plaintiff had failed to persuade the court that such a claim should be allowed therein. Accordingly, Plaintiff's CPA claim is dismissed.

Finally, Plaintiff Benson's claim of civil conspiracy is also dismissed pursuant to the MTCA. ***HN13***[] Maryland Court's have defined civil conspiracy as a tort in which, "a combination of two or more persons by an agreement or understanding to accomplish an unlawful act or to use unlawful means to accomplish an act not in itself illegal, with the further requirement that the act or the means employed must result in damages to the plaintiff." *Green v. Washington Sub. San. Comm'n., 259 Md. 206, 269 A.2d 815 (1970)*. The tort of civil conspiracy may not be maintained due to Plaintiff Benson's previously explained MTCA deficiencies: (1) failure to prove receipt **[*24]** of written notice of a final denial and (2) if no final denial, failure to wait until six months after filing with the Treasurer to file a complaint with the court.

Nevertheless, this Court will address each count of Plaintiff Benson's Complaint independent of its analysis pursuant to the Maryland Tort Claims Act. This analysis will encompass each count regardless of its viability under the Maryland Tort Claims Act and will provide a ruling as to the dismissal of each count based upon their merits independent of the Maryland Tort Claims Act analysis.[12]

B. Article Eight of the Maryland Declaration of Rights

---

[12] As mentioned *supra*, this Court has already dismissed a number of Plaintiff Benson's counts in her Fifth Amended Complaint, as well as, Plaintiff Dean's initial Complaint in its entirety.

> Article 8 of the Maryland Declaration of Rights HN14[] provides: "That the Legislative, Executive and Judicial Powers of Government ought to be forever separate and distinct from each other; and no person exercising the functions of one of said Departments shall assume or discharge the duties of any other."

HN15[] Although this statutory language concerning the separation of powers seems strict and absolute, the Maryland Court of Appeals have, on a number of occasions, **[*25]** stressed that Article Eight of the Maryland Declaration of Rights does not impose " a complete separation between the branches of government," and that one may constitutionally delegate legislative power to the executive branch where the legislature provides sufficient safeguards in order to guide the executive branch in the administration of the statute. Judy v. Schaefer, 331 Md. 239, 261, 627 A.2d 1039, 1050 (1993).

In the case at issue, the Maryland State Legislature has generally approved the Department of Corrections' collection of telephone commissions for the benefit of the Inmate Welfare Fund (IWF) through enaction of the legislation which authorizes the creation of the IWF. Section 10-503(a)(2)(i) of the Correctional Services Article, Md. Ann. Code (1999) provides that:

> HN16[] "Each fund consists of (1) profits received from the sale of goods through the commissary operation and telephone and vending machine commissions; and (2) subject to subparagraph (ii) of this paragraph, money received from other sources."

The Issue is whether this general approval, short of an approval of a particular dollar amount by the Maryland State Legislature, is enough approval to give the executive the power to charge families and friends of Maryland State inmates the amount specified in the Prison Telephone Premium. The **[*26]** case, Maryland Theatrical Corp. v. Brennan, 180 Md. 377, 24 A.2d 911 (1942) points out an important distinction that this court must consider before determining its ruling on this particular issue.

Maryland Theatrical involved a statute that permitted the Baltimore Police Commissioner to charge a fee for permits required by businesses that arranged dances. The permit fee was not fixed by statute and could range from $5 to $100 at the discretion of the Police Commissioner. The Police Commissioner was utilizing this statute to regulate the activities of certain organizations by imposing the maximum fee upon them.[13] The court made an important distinction in this case between fees for regulatory purposes and fees for revenue purposes. This distinction was important to the court because different rules apply to each. The court stated:

> HN17[] "A regulatory measure may produce revenue, but in such a case the amount must be reasonable and have some definite relation to the purpose of the Act. A revenue measure, on the other hand, may also provide for regulation, but if the raising of revenue is the primary purpose, the amount of the tax is not reviewable by the courts." Id. at 381.

The court stated that there was no set rule when determining whether an Act is primarily a regulatory measure or a revenue measure. *Id*. "In general, it may be said that when it appears from the Act itself that revenue is its main objective, and the amount of the tax supports that theory, the enactment is a revenue measure." Id. The *Brennan* court also established that, in a regulatory Act formed under the guise of a revenue-raising Act, when the amount charged is left to the discretion of an administrative official, it is not a valid exercise of the State's police power. Id. at 385. That is, the state cannot use its taxing power to validate a measure that would be void under its power to regulate. *Id*.

As mentioned *supra*, Brennan was a case involving an Act that permitted the Baltimore City Police Commissioner to issue permits and determine fees ranging from $5 to $100 for dances within the city. And as mentioned previously, although the purpose stated in the Act was "to provide additional revenue for the Special Fund of the Board of Police Commissioners for the City of Baltimore", the Baltimore City Commissioner used it as a regulatory tool to

[13] The Commissioner was utilizing the $100 fee to curtail dances where women charged men a certain **[*27]** amount of money per dance to dance with them.

ensure **[*28]** that the fee was prohibitive for certain events, namely, events where men would pay women to dance with them for a fee. The Police Commissioner would set the permit fee at its highest rate ($100) in order to discourage these types of undesirable dances or soirees.

The present case is easily distinguished from *Brennan* because the Prison Telephone Premium is in no way a regulatory measure. The purpose of the instant legislation is to raise revenue for the Inmate Welfare Fund. Furthermore, and as pointed out by Defendants in their Consolidated Motion to Dismiss, the present case is also distinguishable from *Brennan* because the revenue raised in the instant case does not come from an arbitrarily set fee or tax but from a negotiated and competitively bid contract with a number of telephone service providers already established in the community and the legislature authorized the Department of Corrections to enter into these contracts. Therefore, as stated *supra*, the instant measure is one of revenue-raising and not of a regulatory nature. Hence, the amount of the Prison Telephone Premium is not review able by this court.

Defendants have cited a number of cases including: *Christ v. Maryland Department of Natural Resources, 335 Md. 427, 644 A.2d 34 (1994)*(regulation banning **[*29]** the use of personal water craft by persons under 14); *Department of Transportation v. Armacost, 311 Md. 64, 532 A.2d 1056 (1987)* (regulatory measure ensuring clean air though the Vehicle Emission Inspection Program); and *Lussier v. Maryland Racing Commission, 343 Md. 681, 684 A.2d 804 (1996)* (regulatory measure to govern racing and betting on racing in the state) which, although they deal with regulatory measures and not revenue-raising measures, have showed a trend towards a greater flexibility in the delegation of authority to regulatory agencies. Although inapplicable to the instant case, they illustrate the limits that Maryland Courts have set as they pertain to the delegation of legislative authority to an administrative agency.

As mentioned *supra*, Maryland Courts have taken a more flexible approach concerning the separation of powers doctrine in this context. *Metropolitan Life Ins. Co. v. Insurance Comm. Of Md., 58 Md. App. 457, 472, 473 A.2d 933, 941*, *cert. denied*, *300 Md. 795, 481 A.2d 239 (1984)*. In *Lussier*, there was a broad legislative delegation to the Maryland Racing Commission of the authority to "adopt regulations...to govern racing and betting on racing in the State," imposing civil penalties of up to five-thousand dollars ($5000.00). The court held this broad legislative delegation was proper in the context of separation of powers.

Similarly, in the instant case, the legislature has acknowledged and approved the Department's collection **[*30]** of telephone commissions for the benefit of the Inmate Welfare Fund (IWF) by enacting *§ 10-503(a)(2)(i)(1) of the Correctional Services Article*, Md. Ann. Code (1999)("CS").[14] Both in *Lussier* and the instant case, the legislature has provided no express guidelines as to the actual amount of the commission, but, as the *Lussier* case illustrates, express guidelines are not required.

Furthermore, the instant case can be distinguished from the cited aforementioned cases in that it does not address the exercise by an agency of regulatory power delegated by the legislature Instead, this case involves the collateral and indirect consequences of contracts between the Department and the telephone companies in order to provide a discretionary service to Maryland inmates.

For these reasons, Plaintiffs have failed to state a claim upon which relief may be granted under *Article 8 of the Declaration of Rights.* That is, assuming the truth of the well-pleaded facts in this case and, in addition, the inferences drawn from them in considering a motion to dismiss for failure to state a claim under *Maryland Rule 2-322(b)(2)*, Plaintiff Benson's claim as to this **[*31]** count is dismissed.[15] Furthermore, and as previously mentioned, Plaintiff's claim under *Article Eight of the Maryland Declaration of Rights* is dismissed pursuant to the MTCA.

---

[14] This section provides: ***HN18***[] "Each fund consists of...profits derived from the sale of goods through the commissary operation and telephone and vending machine commissions...".

[15] As mentioned *supra*, this count is also dismissed pursuant to the Maryland Tort Claims Act.

C. Unjust Enrichment

HN19[] The elements of the tort of unjust enrichment are as follows:

> (1) a benefit conferred upon the defendant by the plaintiff;
>
> (2) knowledge by the defendant of the benefit; and
>
> (3) the acceptance or retention by the defendant of the benefit under such circumstances as to make it inequitable for the defendant to retain the benefit without payment of its value. *County Comm'rs of Caroline County v. Roland Dashiell & Sons, Inc., 358 Md. 83, 95 n. 7, 747 A.2d 600, 609 n. 7 (2000)*.

As to the instant case, the benefit conferred to the Defendant by the Plaintiffs is the amount of the Prison Telephone Premium and the State had knowledge of the benefit conferred. The question remains whether the acceptance or retention by the defendant of the benefit under such circumstances would make it inequitable for the defendant to retain the benefit without payment of its value.

Plaintiffs argue that the retention of the benefit is inequitable for reasons including the fact that the State executive's collecting and retention of those funds is an impermissible **[*32]** delegation of legislative authority. As this court has ruled *supra*, that contention is ill-founded and there is no impermissible delegation of legislative authority in this case. Furthermore, and as mentioned *supra*, Plaintiffs' reliance on *Maryland Theatrical Corp. v. Brennan, 180 Md. 377, 24 A.2d 911 (1942)* is misplaced.

In addition, the Restatement (Second) of Restitution (Tent. Draft No. 1, 1983), § 1, cmt. C, at 10, sets forth three characteristic circumstances of situations that could support a right to restitution to avoid unjust enrichment which include: (1) a voluntary transaction, not fully effective; (2) wrongdoing against the claimant's interest; and (3) mistake.

Defendants argue that, Plaintiffs' complaints do not make out a claim for unjust enrichment that meets this above-mentioned test in addition to the previous test cited. They claim that the instant situation is no different than a situation where an everyday consumer thinks that the asking price is too high but, nonetheless, pays that price. They claim that the families and friends of Maryland inmates have simply made use of an optional service, despite its high price. Despite Plaintiff's argument recognizing the flexible nature of the unjust enrichment cause of action, Plaintiff Benson's Complaint **[*33]** does not allege facts that establish a claim of unjust enrichment pursuant to the tests mentioned *supra*.

Also, Defendants argue that Plaintiffs' claims of unjust enrichment should be dismissed due to the application of two common law defenses, namely, the voluntary payments rule and the change of position defense. ***HN20***[] The voluntary payments rule establishes that, absent a special statutory remedy, an action to reclaim money voluntarily paid will not lie even where the charge is alleged to be illegal. *Washington Suburban Sanitary Comm'n v. C.I. Mitchell & Best Co., 303 Md. 544, 572, 495 A.2d 30 (1985)*. The prerequisites of the voluntary payment rule are that: (1) payment must be voluntary and (2) it must be made with knowledge of all the facts. *Halle Development, Inc. v. Anne Arundel Co., 371 Md. 312, 322-23 n. 16, 808 A.2d 1280, 1286 n. 16 (2002)*.

The Plaintiffs, in this case, allege that they were being charged an unlawful premium on telephone calls between themselves and Maryland inmates but yet they voluntarily paid the charges despite their beliefs that the charged were illegally imposed. Although this seems to be sufficient to satisfy the voluntary payments rule, the doctrine does not apply when "the right to recover....is provided for by statute." *Dua v. Comcast Cable of Maryland, Inc., 370 Md. 604, 646, 805 A.2d 1061, 1085*. And, as discussed *supra*, the MTCA specifically provides a remedy to Plaintiffs.

In addition, Plaintiffs argue that Defendants have failed **[*34]** to establish that a voluntary payment was made with full-knowledge of all the facts. This court finds that there is no evidence that Plaintiffs or any member of the proposed class had full knowledge of the Prison Telephone Premium billed by non-parties. Therefore, this Court rejects Defendants "voluntary payment" defense for the two reasons previously mentioned.

The change of position defense bars an action for restitution for unjust enrichment and is explained by professor Dan. B. Dobbs as follows:

> "When the benefit [conferral of which on the defendant is alleged to have amounted to unjust enrichment] is consumed or expended in ways that (a) do not increase assets or educe liabilities and (b) the expenditure or consumption is one that the recipient would not have indulged except for the mistake, a strong equity appears in favor of the recipient and the defense may be effective to bar restitution". Dan B. Dobbs, *Handbook of the Law of Remedies* (2d ed. 1993), at 450.

Defendants contend that this defense applies to the instant case because the money paid to the State by the Plaintiffs was used to pay for inmate welfare services. Furthermore, Defendants claim that, if the State had suspected that the source of these funds was illegal, they **[*35]** may not have gone forward with imposing the prison telephone premium.

This court is unimpressed by this argument. There is no showing as to any "change in circumstances" by Defendants and Defendants have presented no evidence that would tend to show that the State has done something that it would have otherwise not done. Hence, this court rejects Defendants "change in position" defense.

Nevertheless, Plaintiff Benson's claim of unjust enrichment is dismissed due to the fact that the Complaint fails to state a claim upon which relief may be granted and, as mentioned *supra*, pursuant to the Maryland Tort Claims Act.

D. ***Article 14 of the Maryland Declaration of Rights***

Article 14 of the Maryland Declaration of Rights ***HN21***[] states: "[t]hat no aid, charge, tax, burthen or fees ought to be rated or levied, under any pretense, without the consent of the Legislature."

In their Consolidated Motion to Dismiss, Defendants raise a number of arguments to support their contention that Plaintiffs fail to state a claim upon which relief may be granted pursuant to *Maryland Rule 2-322(b)(2)*. First, Defendants argue that the State has the power to enter into contracts to provide and charge for amenities which include outgoing telephone service. Defendants claim that the aforementioned power to enter into these contracts is provided by the **[*36]** legislation creating DPSCS and empowering it to operate state prisons, namely Md. Code Ann., *Corr. Serv, § 2-101 et seq*.. Second, Defendants contend that the inmate telephone surcharge is not a fee or tax within the meaning of *Article 14 of the Maryland Declaration of Rights.* Defendants argue that it is a voluntarily incurred charge for a service provided to inmates and their family and friends, which the recipients of these calls may decline.

Third, Defendants claim that the Maryland Legislature has consented to and sanctioned the inmate telephone system. Defendant support this argument by citing Md. Code Ann., *Corr. Serv, § 10-501 et seq*, which provides generally for inmate welfare funds consisting in part of "profits derived from the sale of goods through the commissary operation and telephone and vending machine commissions."

Fourth, Defendants argue that the purported problem with the inmate telephone system was presented to the General Assembly during the 2002 session. House Bill 839 would have barred the state from receiving commissions on inmate telephone calls but was reported unfavorably by the House Commerce and Governmental Matters Committee and no further legislative action was taken on the matter. Hence, the inmate telephone system as been recently examined **[*37]** in the legislative arena and the legislature, through their inaction, has, in essence, approved the subject telephone system. Furthermore, this legislative inaction lends credence to Defendants' argument that Plaintiffs' Article 14 argument is without merit.

In opposition to Defendants' Consolidated Motion to Dismiss, Plaintiffs claim that the Prison Telephone Premium is invalid under *Article 14 of the Maryland Declaration of Rights* because it is an aid, burthen, fee or other charge imposed administratively "without the consent of the Legislature". Furthermore, Plaintiffs argue that the PTP is not voluntarily incurred because it is a hidden, coerced kickback and is not a user fee because the amount collected by the State does not go to pay for the telephone system or service.

First, Plaintiffs allege that Defendants contention that "the power to enter into contracts to provide and charge for amenities such as outgoing telephone service to inmates must be considered inherent in the very legislation creating the Department....and empowering it to operate the States prisons," contains a false premise. Plaintiffs argue that the PTP is not a charge for an amenity such as outgoing telephone service but, in actuality, is general revenue money, and purely for **[*38]** profit and extorted from third parties. They claim that *Section 2-101 et seq. of the Correctional Services Article* is generic enabling legislation that is painted in the broadest of strokes and authorizes virtually nothing specific. It is Plaintiffs' contention that, if this general enabling legislation were sufficient to justify a general revenue measure; then *article 14 of the Maryland Declaration of Rights* would become a dead letter since every administrative agency is born from similar generic legislation.

Second, Plaintiffs cite *Eastern Diversified Properties, Inc. v. Montgomery County, 319 Md. 45, 570 A.2d 850 (1990)* to illustrate that the PTP is an aid, burthen or charge prohibited by *Article 14 of the Maryland Declaration of Rights*, The issue in *Eastern Diversified* was whether "a 'development impact fee' imposed by ch. 49A of the Montgomery County Code (1984) for road construction, was a valid regulatory fee under the County's home rule power or is a tax which the County is without authority to impose." *Id. at 46, 570 A.2d at 851*. Hence, this case addressed the question of whether a revenue measure was a tax or a fee and, therefore, subject to consent of the Maryland General Assembly pursuant to *Article 14 of the Maryland Declaration of Rights.* *Id*.

Per the reasoning of *Eastern Diversified*, Plaintiffs claim that, in this case: (1) raising revenue is the sole objective of the Prison Telephone Premium; (2) the amount of raised revenue supports that inference; (3) the State "involuntarily **[*39]** exacts" money via the PTP; (4) recipients of collect calls have no choice but to pay the charge; and (5) the PTP funds are treated and applied as general revenue funds.

Plaintiffs also make a lengthy historical argument to make the point that the framers of *Article 14* were aware of the perceived dangers of allowing executive officials to generate revenue via administrative action.

After careful consideration of the pleadings and the applicable law, it is this court's decision that Plaintiffs fail to state a claim upon which relief may be granted, reasoning that, although the Prison Telephone Premium is a fee as contemplated by *Article 14 of the Maryland Declaration of Rights*, the Maryland legislature has consented to said fee via *§ 10-501 et seq*. of the Correctional Services Article. Furthermore, and although not a legal justification for dismissal, the General assembly has given "approval by silence" of the PTP by failing to take action in 2002 when presented with House Bill 839. Additionally, and as mentioned *supra*, Plaintiffs' claim regarding Defendants' violation of *Article 14 of the Maryland Declaration of Right* is dismissed for Plaintiffs' failures under the Maryland Tort Claims Act.

E. Maryland Antitrust Act

Although this court believes that Plaintiff's antitrust claims are likewise barred by sovereign immunity, Plaintiff's **[*40]** arguments warrant discussion. Plaintiffs' antitrust claims raise three significant issues: (1) whether the State of Maryland is a "person" within the meaning of Maryland Code, *§11-201(f) of the Commercial Law Article*; (2) whether the State of Maryland is exempted by *§11-203* of the Article; and (3) whether the actions of the State, complained of herein, are unlawful pursuant to *§11-204* of the Article.

Maryland Code, *§11-201(f) of the Commercial Law Article* states in full:

> ***HN22***[] Person. — "Person" includes an individual, corporation, business trust, estate, trust, partnership, association, two or more persons having a joint or common interest, or any other legal or commercial entity.

This definition leaves room for two very distinct, yet valid points of view. First, that the State is a "person" in accordance with several State and Federal cases that have held such, when interpreting statutes with similar broad definitions. *See* City of Lafayette v. Louisiana Power & Light, 435 U.S. 389, 394-95, 98 S.Ct. 1123, 55 L. Ed. 2d 364, (1978). And alternatively, that the legislature would have included some term explicitly identifying the State, when constructing such a definition in an act that waives the State's sovereign immunity from liability. This court finds no declaration as to whether Maryland is a "person" under the Maryland Antitrust Act, within the wording of the statute nor in any State case law. However, **[*41]** the legislature did provide a key to understanding the antitrust subtitle within the statute itself. Maryland Code, §11-202(a)(1) & (2) of the Article, entitled "Purpose, interpretation, and construction," states in part:

> **HN23**[] (1) The General Assembly of Maryland declares that the purpose of this subtitle is to complement the body of federal law governing restraints of trade, unfair competition, and unfair, deceptive, and fraudulent acts or practices in order to protect the public and foster fair and honest intrastate competition.
> (2) It is the intent of the General Assembly that, in construing this subtitle, the courts be guided by the interpretation given by the federal courts to the various federal statues dealing with the same or similar matters . . .

Accordingly, this court looks to federal holdings for direction. In Sea-Land Service, Inc. v. The Alaska Railroad, 212 U.S. App. D.C. 197, 659 F.2d 243, (D.C. Cir. 1981), **HN24**[] the United States District Court for the District of Columbia held that federal officials and federal entities were immune from being sued under federal antitrust laws. The Court explained therein that antitrust laws were not intended to restrain governmental action.

The plaintiffs in *Sea-Land* were two shipping companies that brought suit against two private corporations, and three federal **[*42]** agencies and their chief officers. The plaintiffs alleged that the federal government was giving preferential rates to their competitors. The Court dismissed the case ruling that a restraint on trade or a monopolization resulting from a valid governmental action did not violate federal ***antitrust law***. The Court further ruled that the case was at its root a complaint about rates that was best left to the governing agency, the Interstate Commerce Commission, which held primary jurisdiction. This court is in agreement with the reasoning used by the Sea-Land Court and its ruling.

The United States government and its agencies may not be sued without their consent under the doctrine of sovereign immunity, just as the Maryland and its agencies may not be sued in state court without their consent under the doctrine. Plaintiff contends that the state antitrust laws constitute legislative consent to sue Maryland for violations of those laws. However, even the most liberal reading of §11-201(f) of the Commercial Law Article will not conclusively lead one to believe that the legislature has waived the State's sovereign immunity to antitrust suits.

Furthermore, Plaintiff has not drawn the court's attention to any case where the **[*43]** State has been subject to suit under the Maryland Antitrust Act, and this court can find none. **HN25**[] Our antitrust laws were created to compliment the federal antitrust laws, and federal courts have held that state actions, including the actions of its agencies, are exempt from federal antitrust suits under the state action doctrine. *See* Parker v. Brown, 317 U.S. 341, 63 S.Ct. 307, 87 L. Ed. 315 (1943). Federal courts have also held that antitrust laws forbid only "those trade restraints and monopolizations that are created, or attempted, by the acts of 'individuals or combinations of individuals or corporations.'" Eastern Railroad Presidents Conference, et al. v. Noerr Motor Freight, Inc., et al., 365 U.S. 127, 135-136, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1962) *citing* Standard Oil v. United States, 221 U.S. 1, 51-52, 31 S. Ct. 502, 55 L. Ed. 619 (1910). In addition, "[s]tales and other public agencies do not violate the antitrust laws by charging fees or taxes that exploit the monopoly of force that is the definition of government." Arsberry v. Illinois, 244 F.3d 558, 2001 U.S. App. LEXIS 4044, 2001-1 Trade Cas. (CCH) P73,205.

Accordingly, federal jurisdictions have ruled that valid governmental actions do not violate ***antitrust law***. Thus, analyzing federal ***antitrust law***, one would conclude that the State of Maryland is immune from liability. Hence, the State is also immune from its own antitrust laws which are complementary to the federal laws. *See* Baltimore Scrap Corp. v. David J. Joseph Co., 81 F. Supp. 2d 602 (D. Md. 2000) (Defendants immune from federal antitrust liability, were likewise immune from liability under Maryland's antitrust statute based on **[*44]** case law and §11-202 of the Commercial Law Article). This court must conclude that the State cannot be a "person" within the meaning of the

Maryland Antitrust Act and need not be exempted by any section of the Act since it withstands the authority of the Act.

HN26[] Although the actions of the State may not be found to be unlawful pursuant to the Act, state actions that threaten to restrict trade or cause monopolization must be valid actions. Valid state actions, for the purposes of antitrust immunity, must be (1) clearly articulated and affirmatively expressed as state policy, and (2) be actively supervised by the State itself. *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1979)*. The challenged state actions herein are Maryland's contracting with phone utility companies to provide outgoing collect call services from its prisons, and the State's collection of a percentage of the charges paid by recipients of collect calls made from its prisons, which result in the recipients of these calls being charged a higher rate than recipients of collect calls not made from prisons.

However, Maryland may enter into an exclusive licensing contract with a party without offending federal or state antitrust laws. *Murdock v. City of Jacksonville, 361 F. Supp. 1083, 1973 U.S. Dist. LEXIS 12943, 1973-2 Trade Cas. (CCH) P74842 (M.D. Fla. 1973)*. Furthermore, Maryland Code, *§2-103 of the Correctional Services Article*, gives the Secretary of the Department of **[*45]** Public Safety and Correctional Services (hereinafter Department), the power to "establish guidelines and procedures to promote the orderly and efficient administration of the Department."

The Secretary, in turn, appoints a Commissioner to run the Division of Corrections. This Commissioner may "adopt regulations for the operation and maintenance of the units in the Division," under *§3-205* of the Article and the "Division controls the financial affairs of each unit in the Division," pursuant to *§3-220* of the Article. Additionally, *COMAR §§ 21.02.01.04H* authorizes the Department to award specific types of procurement contracts, and for those procurement contracts not specified therein, *COMAR §§ 21.02.01.05A(1)* provides that, "the Board [of Public Works] shall review and approve the award of those procurement contracts not delegated under this chapter, before execution"[16].

In sum, the collect call phone system rises out of Maryland's power to contract and its sovereign power to operate its penal institutions. Moreover the legislature created the Department to forward the policy found in *§2-103 of the Correctional Services Article*, i.e. the orderly **[*46]** and efficient administration of the Department[17]. The challenged contracts are actively supervised by the State through the Board of Public works under *COMAR §§ 21.02.01.06*. Thus, the court can find no invalid governmental action here, as the Department is acting in a subject matter area in which it is authorized to act Consequently, this court can find no antitrust claim.

As the District Court for the District of Columbia stated in *Sea-Land*, and as courts have found in antitrust challenges to exclusive prison telephone service arrangements across the country, the core of this Plaintiffs complaint would be best left to the proper regulatory agency. In order for this court to find for the Plaintiff and grant injunctive relief there would have to be a judicial finding that the telephone rates are unjust and unreasonable. If there is no finding that the rates are unjust and unreasonable, there can be no finding of the alleged injury that is the crux of Plaintiff, i.e. excessive billing. If the Plaintiff has no injury, she has no standing, and so on.

However, rate fixing is not a function of the court. The Maryland **[*47]** legislature created the Public Service Commission (hereinafter PSC) to regulate public service companies such as Verizon Communications, Inc. and AT&T, that conduct business in this state. By law the PSC is the State entity that must insure that the rates are "just and reasonable"[18], and, by law, the utility companies must submit a "tariff schedule" detailing their rates and charges to consumers, to the PSC[19]. The PSC is the only government actor equipped and designated to find a

---

[16] Additionally, *COMAR §§ 21.02.01.06* commands that procurement contracts for services and supplies with terms that extend beyond one fiscal year are subject to review and approval procedures outlined in the chapter.

[17] The Department in this instance meaning all of its subdivisions including the Division of Corrections.

[18] *See, §4-201 of the Public Utilities Companies Article.*

billing rate as "excessive". For this reason, this court is not the proper body for determining the excessiveness of phone rates and the phone rates are the heart of this issue. Therefore, Plaintiff Benson's claim alleging violation of the Maryland Antitrust Act is dismissed.

F. Maryland Consumer Protection Act

Count Five (5) of Plaintiff Benson's Complaint alleges that the named defendants instituted and implemented the Prison Telephone Premium which constitutes "unfair" trade practices (PTP) in violation of the Maryland Consumer Protection Act, *CL § 13-301 et seq*.. The Maryland courts have established three-pronged definition of an "unfair trade practice. An "unfair" trade practice is one that: (1) causes **[*48]** significant harm; (2) provides no countervailing benefit to consumers or the marketplace; and (3) consumers cannot reasonably avoid. *Legg v. Castruccio, 100 Md. App. 748, 771, 642 A.2d 906 (1994)*.

Plaintiffs argue that "the injury suffered is substantial; is not outweighed by any countervailing societal interest; and is not an injury that an unsophisticated consumer could have avoided because of the State's monopolistic practices". Defendants contend that the telephone system for Maryland inmates does not fit the definition of an "unfair" trade practice because the inmates can avoid making the phone calls and their friends and family members can decline to accept the calls in non-emergency situations. In addition, Defendants contend that the inmate telephone system also provides countervailing benefits in the form of proceeds used for the inmates benefit.[20] Finally, Defendants contend that the system does not cause significant harm because: (1) the Plaintiffs have provided no evidence to show that the prices charged to inmates families for collect calls would be substantially lower if the State did not receive its commission; and (2) the families and friends of inmates could simply refuse to accept the calls from Maryland inmates.

After careful consideration of the above-mentioned arguments, it is the determination of this court that, taking into consideration the pleadings submitted by both sides and all inferences drawn from said pleadings, that Plaintiffs have failed to state a claim upon which relief may be granted. Plaintiffs have failed to state a claim sufficiently alleging that the inmate telephone system causes any significant harm to friends and families of Maryland inmates who accept collect calls from said inmates. Furthermore, the commissions derived from the PTP are utilized to provide valuable services to Maryland inmates which indirectly provides countervailing benefits to the friends and family members of the Maryland Inmates. Finally, friends and family members of Maryland inmates can reasonably avoid the instant charges by simply not accepting these non-emergency phone calls from the inmates.

The Plaintiffs CPA count should also be dismissed because: (1) the State's retention of commissions from the inmate telephone system is not a direct sale of consumer goods and, hence, is not subject to the Maryland **[*50]** Consumer Protection Act[21]; (2) the Plaintiffs have failed to establish any actual loss which is an essential element under the Maryland Consumer Protection Act[22]; (3) alleged monopolistic overpricing is not an unfair or deceptive trade practice as defined by the Maryland Consumer protection Act[23]; and (4) as mentioned *supra*, the instant

---

[19] *See, §4-202 of the Public Utilities Companies Article.*

[20] The Inmate Welfare **[*49]** Fund (IWF) is used to fund recreational and educational activities for Maryland inmates.

[21] *See Morris v. Osmose Wood Preserving, 340 Md. 519, 541, 667 A.2d 624, 635 (1995)*.

[22] *CitaraManis v. Hallowell, 328 Md. 142, 151-53, 613 A.2d 964 (1992)*; *DeReggi Constr. Co. v. Mate, 130 Md. App. 648, 665, 747 A.2d 743 (2000)*. Plaintiffs, in the instant matter, simply speculate as to what rates should apply to the inmate telephone system and it is certainly not the role of this court to determine what a fair and reasonable charge would be for this inmate telephone system.

[23] *Davidson v. Microsoft Corp., 143 Md. App. 43, 57, 792 A.2d 336*, *cert. denied*, ***369 Md. 571, 801 A.2d 1032 (2002)*** (computer software pricing); *Miller v. Pacific Shore Funding, 224 F.Supp.2d 977 (D. Md. 2002)* (loan processing charges).

Consumer Protection Act claim is barred by the doctrine of sovereign immunity. Therefore, Plaintiffs' CPA claim is dismissed.

G. *Section 32 of Article III of the Maryland Constitution* (Unlawful Appropriation)

Section 32 of Article III of the Maryland Constitution states that:

> ***HN27***[] "No money shall be drawn from the Treasury of the State, by any order or resolution, nor except in accordance with any appropriation by law; and every such law shall distinctly specify the sum appropriated, and the object, to which it shall be applied; provided, that nothing herein contained, shall prevent the General Assembly from placing a contingent fund at the disposal **[*51]** of the Executive, who shall report to the General Assembly, at each Session, the amount expended, and the purposes to which it was applied. An accurate statement of the receipts and expenditures of the public money, shall be attached to, and published with the Laws, after each regular Session of the General Assembly ".

In their Consolidated Motion to Dismiss, Defendants contend that Plaintiffs' allegation that the use of commission money from the inmate telephone system violates *Section 32 of Article III of the Maryland Constitution* fails to state a claim upon which relief may be granted. Defendants claim that CS *§§10-501 to 10-504* authorize the use of telephone commissions for inmate welfare funds. Defendants further contend that, and as evidenced by Defendant's Exhibit 2 (Selected pages from the FY 2003 State Operating Budget), all inmate welfare fund receipts are specially accounted in each institution's annual appropriation. Therefore, defendants claim that the annual budget specifies how much is to be appropriated to the special CS *§ 10-503* fund for each institution and is, thus, in compliance with *Article III, Section 32 of the Maryland Constitution.* Additionally, Defendants argue that the Plaintiffs in this matter do not have standing to contest the accounting of inmate welfare funds in the budget.

In opposition, **[*52]** Plaintiffs claim that Defendants, through the introduction of the aforementioned Exhibit 2, are attempting to impermissibly convert a dismissal motion to a motion for summary judgment without affording the Plaintiffs an opportunity for meaningful discovery. *See* *Green v. H & R Block, 355 Md. 488, 502, 735 A.2d 1039, 1047 & n.3 (1999)*. Hence, Plaintiffs pray that this court reject this allegedly improper practice.

This court is impressed with Plaintiffs' contention and, assuming the truth of facts presented and the inferences drawn from them in considering a motion to dismiss for failure to state a claim under *Maryland Rule 2-322(b)(2)*, this court declines to dismiss Plaintiffs' claim alleging a violation of *Article III, Section 32 of the Maryland Constitution* for Plaintiffs' failure to state a claim upon which relief may be granted. Although Defendants claim and have presented evidence to establish that they have fully complied with *Article III, Section 32 of the Maryland Constitution*, Plaintiffs have, nonetheless stated a claim upon which relief may be granted. Plaintiffs are correct in their assertion that Defendants, through their introduction of the above-mentioned evidence, are attempting to covert a dismissal motion into a motion for summary judgment without allowing Plaintiffs the benefit of any meaningful discovery. But, nevertheless, Plaintiffs' claim is still dismissed **[*53]** pursuant to the MTCA for Plaintiff Benson's failure to attain a final denial from the Treasurer or his designee.

H. Money Had and Received

HN28[] "Money Had and Received" is merely a particularized restitution action or a form of quasi-contractual action derived from the theory of unjust enrichment *See* Dan B. Dobbs, *Handbook of the Law of Remedies* (2d ed. 1993), at 377. "This count is commonly said to be equally remedial with a bill in equity, and, in general terms, lies whenever the defendant has obtained possession of money which, in equity and good conscience, he ought not to be allowed to retain" *See Poe's Pleading and Practice*, § 117 at 143. Hence, this cause of action is no different than that of unjust enrichment.

Therefore, for the reasons stated *supra* regarding Plaintiff's claim for unjust enrichment, Plaintiffs' claim of Money Had and Received is dismissed for Plaintiffs' failure to state a claim upon which relief may be granted.

I. *Article 24 of the Maryland Declaration of Rights* (Unlawful Taking)

Article 24 of the Maryland Declaration of Rights states:

> ***HN29***[] "That no man ought to be taken or imprisoned or disseized of his freehold, liberties or privileges, or outlawed, or exiled, or, in any manner, destroyed, or deprived of his life, liberty or property, but by the judgment of his peers, or by the Law of the land".

In Plaintiff Benson's Fifth **[*54]** Amended Class Action Complaint, Plaintiffs contend that *Article 24 of the Maryland Declaration of Rights* prohibits the State from taking private property for public use without just compensation and that, regarding the PTP, Defendants' actions have violated these legal protections by retaining the money comprising the PTP. In their Opposition to Defendants' Consolidated Motion to Dismiss, Plaintiffs claim that they have articulated a legally cognizable property interest in the funds seized per the Prison Telephone premium (PTP).

Defendants, in their Consolidated Motion to Dismiss, claim that Plaintiffs' claim fails and, hence, must be dismissed, because plaintiffs have failed to establish that there was an actual government of any cognizable property interest and, without a valid property interest, there can be no unconditional taking. *See* *Phillips v. Washington Legal Foundation, 524 U.S. 156, 118 S. Ct. 1925, 141 L. Ed. 2d 174 (1998)*(analyzing whether interest on IOLTA accounts was property of clients); *University of Maryland Medical System v. Mallory, 143 Md. App. 327, 354-55, 795 A.2d 107 (2001)*, *cert. denied*, *368 Md. 527, 796 A.2d 696 (2002)* (no property interest injury verdict infringed by statutory damages cap). Defendants also contend that money paid for phone bills cannot be property taken by the State because: (1) Plaintiffs do not pay the State the money; and (2) the money was voluntarily paid and not taken.

Taking into consideration all pleadings **[*55]** and any reasonable inferences drawn from said pleadings, it is the determination of this court that Plaintiffs have failed to state a claim upon which relief may be granted for their claim of unlawful taking in violation of *Article 24 of the Maryland Declaration of Rights.* It is ludicrous for Plaintiffs to claim that Defendants have unlawfully taken Plaintiffs' property by charging Defendants a high price for accepting collect calls from Maryland inmates. *See* *Arsberry v. Illinois, 244 F.3d 558, 565 (7th Cir.)* (Posner, J.), *cert. denied*, *534 U.S. 1062, 122 S. Ct. 661, 151 L. Ed. 2d 576 (2001)* ("And the contention that by charging a high price for phone calls the defendants have taken the plaintiffs' property and must pay just compensation is downright absurd."). Therefore, Plaintiffs have failed to establish: (1) a legally cognizable property interest; and (2) any unlawful taking. Thus, and as mentioned *supra*, Plaintiffs' claim for an unlawful taking in violation of *Article 24 of the Maryland Declaration of Rights* is dismissed.

J. Civil Conspiracy

HN30[] Under Maryland law, one can establish a cause of action for a civil conspiracy where: (1) a confederation of two or more persons by agreement or understanding (2) engage in some unlawful or tortious act done in furtherance of the conspiracy or engage in an unlawful and tortious means to accomplish an act not in itself illegal, with (3) actual **[*56]** legal damage resulting to the plaintiff. *See* SANDLER & ARCHIBALD, PLEADING CAUSES OF ACTION IN MARYLAND 333 (2nd ed. 1998).

Additionally, ***HN31***[] conspiracy has been defined in the anticompetitive or monopolistic context as follows:

> "To maintain a cause of action under *§ 1* of the Sherman Act, a party must set forth the following allegations: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anticompetitive effects within relative product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal and (4) that the Plaintiff was injured as a proximate result of that conspiracy." *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81 (3rd Cir. 1977)*, *cert. denied*, *436 U.S. 913, 98 S.Ct. 2253, 56 L.Ed.2d 413 (1978)*; *Defino v. Civic Center*

> *Corp.., 718 S.W.2d 505, 510 (Mo. Ct. App. 1986)*; *324 Liquor Corp. v. Duffy, 479 U.S. 335, 345 n.8, 107 S.Ct. 720, 726 n.8, 93 L.Ed.2d 667 (1987)*.

Furthermore, ***HN32***[] Maryland Courts have consistently held that "'conspiracy' is not a separate tort capable of independently sustaining an award of damages in the absence of other tortious injury to the plaintiff". *Alexander v. Evander, 336 Md. 635, 645 n. 8, 650 A.2d 260, 265 n. 8 (1994)*. "No action in tort lies for conspiracy to do something unless the acts actually done, if done by one person, would constitute a tort". *Alleco v. Weinberg Foundation, 340 Md. 176, 190, 665 A.2d 1038 (1995)*; *Kimball v. Harman, 34 Md. 407, 409 (1871)*; *Miller v. Preston, 174 Md. 302, 312, 199 A. 471 (1938)*.

Defendants rely upon the aforementioned authority and claim that there is no such tort as civil conspiracy in Maryland. **[*57]** Defendants further contend that Plaintiffs' instant claim of civil conspiracy fails under the MTCA because the State has not waived its immunity for said acts. *Baltimore Police Dept. v. Cherkes, 140 Md. App. 282, 314 n. 7, 780 A.2d 410 (2001)*. Plaintiffs argue that, although a plaintiff may not be able to independently recover damages on a conspiracy claim alone, civil conspiracy is still a viable cause of action.

Plaintiffs' instant cause of action for civil conspiracy is dismissed. As mentioned *supra*, all of Plaintiffs' other tort causes of action have been dismissed, and, therefore, this claim of civil conspiracy cannot be held as a separate cause of action. Furthermore, as raise by Defendants and mentioned *supra*, this count of civil conspiracy fails under the MTCA because of Plaintiffs' failure to provide adequate notice under the MTCA.

K. Filed Rate Doctrine

HN33[] "The field-rate doctrine, which is based on both historical antipathy

> to rate setting by courts, deemed a task they are inherently unsuited to perform competently, and on a policy of forbidding price discrimination by public utilities and common carriers, forbids a court to revise a public utility's or common carrier's filed tariff, which is to say the terms of sale that the carrier has filed with **[*58]** the agency that regulates the carrier's service." *AT&T Co. v. Central Office Telephone, Inc., 524 U.S. 214, 223, 118 S.Ct. 1956, 141 L.Ed.2d 222 (1998)*; *Maislain Industries, U.S., Inc. v. Primary Steel, Inc., 497 U.S. 116, 110 S.Ct. 2759, 111 L.Ed.2d 94 (1990)*; *Arkansas Louisiana Gas Co. v. Hall, 453 U.S. 571, 577-78, 101 S.Ct. 2925, 69 L.Ed.2d 856 (1981)*; *Cahnmann v. Sprint Corp., 133 F.3d 484, 487 (7th Cir. 1998)*; *Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17 (2d. Cir. 1994)*.

HN34[] It is permissible for a customer or a competitor to challenge a tariff before the appropriate state agency and, if they are disappointed with the response of the agency, they can seek judicial review, *47 U.S.C. §§ 204(a)(2)(C)*, *402*. But, the customer or competitor cannot ask the court in a suit such as a civil rights or antitrust suit, to invalidate or modify a tariff or seek damages based upon the difference between the actual tariff and some lawful, hypothetical tariff. *Arsberry v. Illinois, 244 F.3d 558, 562 (7th Cir. 2001)*. A requirement for this court to determine a lawful tariff would not be proper because it is not the role of this court to set rates. *Arsberry, 244 F.3d at 562*; *Wegoland Ltd., 27 F.3d at 19-21*.

Defendants contend that Plaintiffs claims are barred by the filed rate doctrine. They point out that the Plaintiffs have not filed suit directly against the telephone companies involved in the PTP but have actually filed suit against the state for the undifferentiated and unspecified portion of their phone bills which the state receives. In this context, Defendants claim that the filed rate doctrine still applies in that all of Plaintiffs' claims are based on the notion that the higher rates charged to Maryland inmates are provided for in filed tariffs, **[*59]** *Md. Public Utilities Companies Code Ann. § 4-202* (1998, 2002 Supp.). Defendants claim that Plaintiffs are asking this court to engage in rate-making which is not a function of this court.

In response, Plaintiffs argue that the federal filed rate doctrine has been expressedly repealed and is a defense to nothing. *Ting v. AT&T, 319 F.3d 1126, 1139-40 (9th Cir. 2003)*. Plaintiffs also contend that Defendants' reliance on the Maryland filed rate doctrine is inapplicable for a number of reasons.

First, Plaintiffs claim that applying this state filed rate doctrine would violate federal law because the federal government has made the policy determination that rates are to be de-tariffed. *Id*. Hence, the Maryland filed rate doctrine is preempted and prohibited by federal law. Second, Plaintiffs contend that Defendants have cited no Maryland authority for the application of the Maryland filed rate doctrine.

Third, Plaintiffs argue that the state filed rate doctrine does not apply in this case because Defendants have filed no tariffs. Plaintiff illustrated that, even Defendants concede in their Consolidated Motion to Dismiss that the PTP "is not paid to the State by the Plaintiffs". Fourth, Defendants contend that Plaintiffs have provided no evidence that an applicable tariff has even been filed. **[*60]**

Fifth, Plaintiffs claim that a state filed rate doctrine has no application in the context of claims alleging violations of the Maryland Constitution. *Maryland Green Party v. Maryland Bd. of Elections, 377 Md. 127, 832 A.2d 214 (2003)*. Sixth, Plaintiffs contend that the state filed rate doctrine must yield to causes of action arising pout of express public policy mandates such as the Maryland Antitrust Act or Maryland Consumer Protection Act. *Kirkwood v. Union Electrical Co., 671 F.2d 1173, 1178-79 (8th Cir. 1982)*, *cert. denied*, *459 U.S. 1170, 103 S. Ct. 814, 74 L. Ed. 2d 1013 (1983)*.

Taking into consideration the arguments made by both parties and any reasonable inferences drawn from said arguments, it is this court's determination that the filed rate doctrine does not apply to the case at issue. First, and as illustrated in the *Ting* case, the federal courts have determined that rates are to be de-tariffed. Therefore, the application of a state filed rate doctrine is preempted and prohibited by federal law. Second, Defendants have cited no Maryland authority for the application of a Maryland filed rate doctrine and, furthermore, this court could not find such authority.

III. Conclusion

For the reasons explained in this opinion, both Plaintiffs Dean and Benson's claims are dismissed in their entirety.

ORDER

It is hereby **ORDERED**, on this 23 day of June, 2004, that Plaintiffs' Benson and Dean's **[*61]** claims are DISMISSED in their entirety.

HN1[ ] **Standards of Review, De Novo Review**

Rulings on summary judgment and directed verdicts are reviewed de novo. The standard for review of rulings excluding evidence depends on the nature of the underlying issue (fact, law, judgment call).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN2[] **Per Se Rule & Rule of Reason, Sherman Act**

Antitrust claims under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, ordinarily require a burdensome multi-part showing: that the alleged agreement involved the exercise of power in a relevant economic market, that this exercise had anti-competitive consequences, and that those detriments outweighed efficiencies or other economic benefits. This is the so-called rule of reason calculus. This calculus is bypassed if the collusive arrangement falls instead within one of several categories (e.g., naked horizontal price fixing) in which liability attaches without need for proof of power, intent or impact. For that reason plaintiffs typically try to bring their claims within per se rubrics. Whether a plaintiff's alleged facts comprise a per se claim is normally a question of legal characterization that can often be resolved by the judge on a motion to dismiss or for summary judgment.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN3[] **Practices Governed by Per Se Rule, Boycotts**

The most important per se categories are naked horizontal price-fixing, market allocation, and output restrictions. Sometimes group boycotts are called per se violations, but the label here is only minimally useful since many arrangements that are literally concerted refusals to deal have potential efficiencies and are judged under the rule of reason. Minimum retail price fixing is a rare vertical arrangement still comprising a per se violation--that is why car makers only "suggest" a retail price to dealers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Bid rigging of a certain kind is a per se violation of the antitrust laws, but this refers to horizontal price fixing whereby two or more suppliers (or occasionally purchasers) secretly fix the price at which they will bid.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

HN5[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The antitrust laws are not meant to police bad management; the market (or the insurance regulator) is expected to do that.

Business & Corporate Law > Joint Ventures > General Overview

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN6[] Business & Corporate Law, Joint Ventures

Joint ventures involving direct competitors not infrequently exclude other competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Restraints that are truly ancillary to a larger efficiency-gaining enterprise are not normally condemned per se without looking at likely consequences.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN8[] Practices Governed by Per Se Rule, Boycotts

To the extent the group boycott label is useful at all to describe a per se violation, it is principally a warning against anticompetitive secondary boycotts--e.g., manufacturers who agree not to supply a store that buys from a discounting manufacturer.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Harm does not mean a simple loss of business or even the demise of a competitor but an impairment of the competitive structure of the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN10[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

For exclusive dealing, foreclosure levels are unlikely to be of concern where they are less than 30 or 40 percent. But while low numbers make dismissal easy, high numbers do not automatically condemn, but only encourage closer scrutiny.

Opinion by: BOUDIN

Opinion

[*59] BOUDIN, *Chief Judge*. Stop & Shop Supermarket Company ("Stop & Shop") and Walgreen Eastern Co., Inc., ("Walgreen") brought an antitrust suit against a number of defendants primarily based on *section 1 of the Sherman Act,* **[**2]** *15 U.S.C. § 1 (2000)*, lost certain of their claims on summary judgment, and then suffered a directed verdict at the jury trial held on the balance of their claims. They now appeal on several grounds as to certain defendants (the other defendants settled). We begin with a description of background events and proceedings in the district court.

Blue Cross and Blue Shield of Rhode Island ("Blue Cross") is the major health insurer in that state, offering various plans that cover, among other medical expenses, the cost of prescription drugs. Until 1997, Blue Cross managed drug benefits itself and provided a substantially "open" pharmacy system--that is to say, most subscribers could buy drugs at any pharmacy. Blue Cross determined what drugs it would reimburse, set (by negotiation) what would be paid to the pharmacies, and processed subscriber claims.

Beginning in 1997, Blue Cross decided to use a pharmacy benefits manager to administer its prescription drug benefits. Such managers often set up a "closed" network of pharmacies, providing greater insurance coverage to those subscribers who use network pharmacies. In exchange for inclusion in the network, and therefore **[**3]**

* Of the District of Massachusetts, sitting by designation.

increased volume of drug sales, the network pharmacies typically agree to provide drugs at lower prices, resulting in lower costs to the insurer.

In this case, Blue Cross invited bids from managers and received three, one of which Blue Cross disqualified. The second manager was PharmaCare, a subsidiary of CVS, a well known major drug store chain (52 pharmacies in Rhode Island). The third manager, Wellpoint, proposed a closed network limited to pharmacies operated by Stop & Shop (18 pharmacies) and Walgreen (15 pharmacies). After obtaining further bids from Wellpoint and PharmaCare, in December 1997 Blue Cross selected PharmaCare to manage a closed network that initially included the CVS pharmacies and most independent pharmacies in Rhode Island.

During this period, PharmaCare was itself negotiating with yet another benefit manager--Provider Health Services, Inc. ("Provider"). Provider managed a closed network, comprised mainly of Brooks Pharmacies (42 pharmacies in the state), serving another insurer--United Healthcare of New England, Inc. ("United")--doing business in Rhode Island. In February 1998, Provider agreed to allow CVS stores to join the United/Provider network; and in **[**4]** May 1998, PharmaCare allowed Brooks and other Provider pharmacies to join the Blue Cross/PharmaCare closed network.

Ancillary to these arrangements, Brooks and Provider's other pharmacies agreed--obviously for PharmaCare's benefit--not to join other networks competing for Blue Cross' business. PharmaCare in turn agreed not to admit into the Blue Cross/PharmaCare network new drug stores (beyond CVS, the independents, and the pharmacies in the United/Provider network). Blue Cross consented to the enlargement of its closed network and in November 1998 signed a formal three-year contract with PharmaCare.

Not all Blue Cross customers are covered by plans that effectively restrict them to closed network pharmacies. Blue Cross offers multiple plans, and one set allows customers to fill prescriptions at any pharmacy without economic penalty. Blue Cross' counsel estimated in oral argument **[*60]** that perhaps two-thirds of Blue Cross' customers are restricted to its closed network; our own review of the record suggests that the number--which obviously varies over time--may be closer to three-quarters.

Unhappy with losing the opportunity to serve many Blue Cross customers on competitive terms, Stop **[**5]** & Shop brought the present action on June 9, 1999, against Blue Cross, PharmaCare and CVS, charging violations of federal and state antitrust laws; in March 2000, Walgreen joined as co-plaintiff and an amended complaint was filed on May 2, 2000. United Health, Provider, and Brooks were also initially defendants but, they were dropped after agreeing to admit plaintiffs to the United/Provider network.

On motions for summary judgment, the district court wrote a detailed opinion rejecting plaintiffs' claims that any per se violation of the antitrust laws had been plausibly shown. *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 239 F. Supp. 2d 180, 195 (D.R.I. 2003)*. It rejected claims that any of the arrangements comprised naked horizontal restraints such as a group boycott. *Id. at 189-91*. However, the court ruled that factual issues precluding summary judgment were raised as to whether any of defendants' conduct was actionable under the rule of reason. *Id. at 193*.

At this time, the district court said that Blue Cross represented about 60 percent of the customers in Rhode Island whose retail drug purchases were reimbursed; **[**6]** and United provided such benefits to about 25 percent. *Stop & Shop, 239 F. Supp. 2d at 183*. These figures were the lynch-pin of the pretrial report by plaintiffs' expert witness, Dr. Bruce Stangle, who stressed the 85 percent figure in concluding that "an out-of-network entrant would be precluded from competing in a substantial portion of the relevant market."

Thereafter the district court considered *in limine* motions filed by Blue Cross. Subject to reconsideration at trial, the court granted a motion to exclude certain evidence as to the bidding process leading to PharmaCare's selection and the related decisions of PharmaCare and Provider to expand their respective closed networks to include each other's present pharmacy members. The court denied, again subject to reconsideration at trial, a motion to exclude key testimony from plaintiffs' expert witness, Dr. Stangle.

Trial began in June 2003. On the sixth day of trial, the district court upheld a defense objection to Dr. Stangle's proposed testimony concerning the proper definition of the relevant market. Plaintiffs tendered a summary of the proposed testimony as an offer of proof and rested. The district **[**7]** court then granted a defense motion for judgment as a matter of law, holding (in an oral ruling from the bench) that absent an adequate market definition, the plaintiffs could not make out a rule of reason claim under the antitrust laws.

The plaintiffs now appeal, arguing that the district court erred in granting partial summary judgment on the per se claims, in excluding several items of evidence including Dr. Stangle's testimony on market definition, and in directing a verdict. ***HN1***[] Rulings on summary judgment and directed verdicts are reviewed *de novo*, *Wolinetz v. Berkshire Life Ins. Co., 361 F.3d 44, 47 (1st Cir. 2004)* (summary judgment); *Ahern v. Scholz, 85 F.3d 774, 793 (1st Cir. 1996)* (directed verdict); the standard for review of rulings excluding evidence depends on the nature of the underlying issue (fact, law, judgment call), *see* *Blake v. Pellegrino, 329 F.3d 43, 46 (1st Cir. 2003)*.

[*61] *Per se claims*. Plaintiffs begin their brief by contesting the district court's summary judgment ruling that no legitimate per se claims were presented. As our prior decisions have explained, ***HN2***[] antitrust claims under *section 1 of the Sherman Act* **[**8]** ordinarily require a burdensome multi-part showing: that the alleged agreement involved the exercise of power in a relevant economic market, that this exercise had anti-competitive consequences, and that those detriments outweighed efficiencies or other economic benefits. This is the so-called rule of reason calculus. *See, e.g.*, *Eastern Food Servs. v. Pontifical Catholic Univ. Servs. Ass'n, 357 F.3d 1, 5 (1st Cir. 2004)*; *Fraser v. Major League Soccer, L.L.C., 284 F.3d 47, 59 (1st Cir. 2002)*, *cert. denied*, *537 U.S. 885, 154 L. Ed. 2d 144 (2002)*.

This calculus is bypassed if the collusive arrangement falls instead within one of several categories (*e.g.*, naked horizontal price fixing) in which liability attaches without need for proof of power, intent or impact. *Eastern Food Servs., 357 F.3d at 4* & n.1. For that reason plaintiffs typically try to bring their claims within per se rubrics. Whether a plaintiff's alleged facts comprise a per se claim is normally a question of legal characterization that can often be resolved by the judge on a motion to dismiss or for summary judgment. *See, e.g.*, *Addamax Corp. v. Open Software Found., Inc., 152 F.3d 48, 50-51 (1st Cir. 1998).* **[**9]**

HN3[] The most important per se categories are naked horizontal price-fixing, market allocation, and output restrictions. Sometimes group boycotts are called per se violations, but the label here is only minimally useful since many arrangements that are literally concerted refusals to deal have potential efficiencies and are judged under the rule of reason. *See* *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 593 (1st Cir. 1993)*. Minimum retail price fixing is a rare vertical arrangement still comprising a per se violation--that is why car makers only "suggest" a retail price to dealers--but this offense is not charged by plaintiffs in this case. [1]

Because the defendants moved for summary judgment, the complaint **[**10]** allegations did not have to be taken as true, *see* *R.W. Intern Corp. v. Welch Food, Inc., 13 F.3d 478, 487 (1st Cir. 1994)*, but the plaintiffs were entitled to the benefit of the doubt: specifically, reasonable inferences were to be drawn in their favor and genuine factual disputes were properly reserved for trial so far as plaintiffs' sworn version of the facts conflicted with the defendants' sworn version. *See* *Fed. R. Civ. P. 56(c)*; *Douglas v. York County, 360 F.3d 286, 290 (1st Cir. 2004)*. However, broadly speaking *what happened* in this case is largely undisputed, although some of the details are obscure.

In a nutshell, the arrangements that concern plaintiffs were two. First, Blue Cross contracted for a closed network for its subscribers that excluded the plaintiffs after a bidding contest that plaintiffs say was flawed and that they should have won. Second, Blue Cross and its pharmacy benefits manager agreed with United and its manager that their respective network pharmacies would be admitted to each other's closed networks; these arrangements included exclusionary restrictions and (plaintiffs suggest) **[**11]** other more sinister collaboration as to price.

[1] The per se categories are discussed with relevant citations in *Eastern Food Servs, 357 F.3d at 4-5 & n.1*, and other of our decisions. On minimum vertical price fixing, see *Augusta News Co. v. Hudson News Co., 269 F.3d 41, 47 (1st Cir. 2001)*.

We start with the creation of Blue Cross' closed network. The alleged unfair **[*62]** bidding aside, this is nothing other than an exclusive dealing arrangement, slightly complicated by the involvement of three or four sets of parties rather than the usual two. Blue Cross, either directly or indirectly, is buying prescription drugs for its subscribers. *See Kartell v. Blue Shield of Mass., Inc., 749 F.2d 922, 924-25 (1st Cir. 1984)*, *cert. denied*, *471 U.S. 1029, 85 L. Ed. 2d 322 (1985)*. Blue Cross' closed network effectively gives certain drug stores the exclusive right to supply such drugs to most of its customers.

This certainly inconveniences Blue Cross subscribers for whom more outlets are a benefit. But, if Blue Cross is a competent negotiator, the closed network should lower the cost to Blue Cross of supplying drugs to customers (because most suppliers will cut prices in exchange for increased volume, *cf. U.S. Healthcare, 986 F.2d at 591*). Blue Cross might pass the savings on to customers (lower premiums, smaller co-payments, broader coverage) or keep the savings itself and pay its executives **[**12]** more (if competition among health insurers is inadequate and state regulation absent).

Either way, the closed network is simply an exclusive dealing arrangement which is not a per se violation of the antitrust laws. *See Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327-29, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*; *Eastern Food Servs., 357 F.3d at 8*. The arrangement might still be unlawful under the rule of reason depending upon the particular circumstances--that is, depending upon the balance between efficiencies gained and any harm to competition that could be shown, *id. at 5*, but we are concerned for the moment only with whether per se treatment was warranted. It was not.

Nothing is changed by plaintiffs' claim that the bidding was unfair. "***HN4***[] Bid rigging" of a certain kind is a per se violation of the antitrust laws, *e.g.*, *JTC Petroleum Co. v. Piasa Motor Fuels, Inc., 190 F.3d 775, 777 (7th Cir. 1999)* (Posner, C.J.); but this refers to horizontal price fixing whereby two or more suppliers (or occasionally purchasers) secretly fix the price at which they will bid. *See id.* When Blue Cross, through its benefits manager, **[**13]** gave exclusive rights to CVS and certain other pharmacies, it was not bidding at all; it was inviting bids and making its own decision as to which bid to accept.

Ordinarily, it would be in Blue Cross' interest to accept the lowest cost bid, assuming services were equivalent. Plaintiffs say that Blue Cross manipulated the bidding (*e.g.*, by giving CVS information about Wellpoint's bid), which conceivably could happen if Blue Cross were corrupt or incompetent (an alternative, benign reason would be to press PharmaCare to improve its offer). But ***HN5***[] the antitrust laws are not meant to police bad management; the market (or the insurance regulator) is expected to do that.

This brings us to the first part of the second transaction, namely, the agreements that let the Blue Cross and United pharmacies serve in each other's closed networks. These are undoubtedly horizontal agreements, Blue Cross and United being competitors (as are PharmaCare and Provider), and so draw closer scrutiny. But on their face, they are not exclusionary or otherwise anti-competitive: they allow *more* pharmacies to compete for the same consumer's business (*e.g.*, Brooks can supply Blue Cross customers) and give **[**14]** customers *more* options.

The main anti-competitive threat, to the extent it exists, lies not in admission of new pharmacies but in ancillary provisions that might exclude others by agreement. It appears that the United/Provider network remained free to admit other pharmacies: **[*63]** it did in fact admit the plaintiffs as part of an agreement to settle this lawsuit. But the district court says that the contracts precluded the Blue Cross/PharmaCare network from admitting any *other* new pharmacies (beyond the United/Provider pharmacies), *Stop & Shop, 239 F. Supp. 2d at 184*, so the contracts did for some period restrict Blue Cross/PharmaCare from admitting plaintiffs.

Like the original exclusive dealing contract, this is a possible antitrust violation, but it is not a per se violation. The reason is that the closed pharmacy arrangement is valuable to participating pharmacies in part because it directs volume to them; thus, the United/Provider pharmacies had a direct interest, in exchange for allowing CVS to compete for their captive subscribers, in not only being allowed to compete for Blue Cross' customers but in making sure that yet additional new member pharmacies **[**15]** did not unreasonably dilute this benefit.

This does *not* mean that the ancillary restriction is lawful but only that per se condemnation is not appropriate. ***HN6***[] Joint ventures involving direct competitors not infrequently exclude other competitors. *Cf. N.W. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 296-97, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)*. Imagine a research and development consortium between a dozen small manufacturers that by agreement excluded any new entrants; the arrangement might enhance competition with larger manufacturers, and yet the original members might be unwilling to commit resources to the venture if *other* competitors--even small ones--were able to enter at will and share in the inventions. *See* XIII Hovenkamp, ***Antitrust Law*** P 2115a (1999).

A further explicit provision of the reciprocal expansions barred the United/Provider pharmacies from participating in other networks competing for Blue Cross' business. *Stop & Shop, 239 F. Supp. 2d at 184*. This, too, is not a per se violation. By admitting the Brooks pharmacies into its own closed network, Blue Cross and PharmaCare were in effect including them **[**16]** in a joint venture. There are sometimes legitimate reasons why one party to a joint venture can insist as the price of entry that a new member limit its existing competitive freedom. XIII Hovenkamp P 2213.

Here, PharmaCare was creating and administering a network for Blue Cross and, in the course of doing so, it would be providing favored access to network pharmacies, bolstering their connection with subscribers, and conceivably giving them information valuable in their servicing of the customers. PharmaCare might legitimately be unwilling to expand the network to include pharmacies who were at the same time preparing to join a new consortium to *replace* PharmaCare as Blue Cross' manager.

Despite plaintiffs' looser description, the restraint does not prevent Brooks pharmacies from joining other networks but only from involving themselves in attempts to supplant PharmaCare with Blue Cross. The restraint might still be unjustified--with efficiency gains outweighed by competitive harm--and so perish after a rule of reason analysis. But ***HN7***[] restraints that are truly ancillary to a larger efficiency-gaining enterprise--here, the expanded closed network--are not normally condemned per se **[**17]** without looking at likely consequences. *Addamax Corp., 152 F.3d at 52*; *see* XIII Hovenkamp P 2213c(1).

If the rhetoric of older group boycott cases were taken at face value, such agreements might appear to fall within a per se ban. *Cf. Associated Press v. United States, 326 U.S. 1, 13-14, 18,* ***[*64]*** *89 L. Ed. 2013, 65 S. Ct. 1416, 1419 (1945).* After all, in two different aspects, the ancillary agreements are promises by one competitor or group of competitors to another not to deal with a third competitor (CVS, through PharmaCare, not to include Stop & Shop and Walgreen in the PharmaCare network; Brooks not to consort with Stop & Shop and Walgreen to compete for the Blue Cross contract). But the rhetoric cannot be taken literally.

After all, every joint venture among competitors that limits membership fits the lay definition of "an agreement not to deal," and at least in recent years the Supreme Court has flatly rejected the per se label for those that have some efficiency achieving benefits. *N.W. Wholesale Stationers, 472 U.S. at 295-98*. ***HN8***[] To the extent the group boycott label is useful at all to describe a per se violation, it is principally a warning **[**18]** against anticompetitive secondary boycotts--*e.g.*, manufacturers who agree not to supply a store that buys from a discounting manufacturer. *Cf. Fashion Originators' Guild of Am., Inc. v. FTC, 312 U.S. 457, 465-67, 85 L. Ed. 949, 61 S. Ct. 703, 32 F.T.C. 1856 (1941)*; *U.S. Healthcare, 986 F.2d at 593*.

This brings us finally to the intimations in plaintiffs' brief of more sinister collaboration. In attacking the dismissal of per se claims, the plaintiffs accuse the district court of "ignoring compelling evidence of *per se* illegal, horizontal agreements and their anticompetitive motives and effects," a statement followed by bullet points that cross-reference back to the briefs' statement of facts. Putting aside the bid rigging and ancillary-agreement charges already dealt with above, the pertinent factual charge is as follows:

> After Blue Cross's selection of PharmaCare's bid in late 1997, representatives of CVS and representatives of PharmaCare, engaged in a series of meetings, discussions, and written correspondence with representatives of competing pharmacies Brooks and the independent pharmacy members of Provider. (J.A. 210-217, Stmt. PP 89-113). As a result, these competitors **[**19]** agreed to set identical prescription reimbursement rates, both directly and by an equalizing mechanism that entailed payments by CVS to Brooks and Provider's

> independent pharmacies for each United prescription that CVS filled. (J.A. 216, 218-19, Stmt. PP 108-10, 120; J.A. 1987-89; J.A. 3053-54; J.A. 3081-84; J.A. 3129-32.) The parties likewise discussed identical co-payment levels. (J.A. 2923.)

This description insinuates wrongdoing but without the precision needed to advance the argument. Obviously any arrangement that reciprocally admitted United's pharmacies into the Blue Cross network and Blue Cross' into United's would involve some arrangements as to various payment matters. This would not permit CVS and Brooks to agree in general on prices at which prescription drugs could be sold to the public. But the respective insurers and their benefit managers would be entitled to discuss with newly entering pharmacies reimbursement and co-payment rates; and there would be nothing startling about new-comers expecting the same reimbursement as earlier network members. [2]

[20]** **[*65]** Partial integration of the two networks--each operating at three levels, insurer, benefit manager, and retailer--involves settling on component payments which--at least within each network--may well involve identical payments to all participating pharmacies. It was plaintiffs' job to explain in detail to us just what the arrangements were and *why* they plausibly constituted antitrust violations. In the context of partial integration, simply to refer to "identical principal reimbursement rates," "an equalization mechanism," and "identical co-payment levels" is to substitute innuendo for analysis.

This fatal obscurity has one exception. Immediately after the paragraph quoted above, there is a further paragraph describing a February 1998 meeting between PharmaCare and two Stop & Shop representatives. PharmaCare had recently won the Blue Cross contract, and it was then negotiating with United pharmacies for reciprocal inclusion. Stop & Shop was asking to be included as well. According to a memorandum describing the meeting prepared by a Stop & Shop representative, the PharmaCare president said no.

The memorandum says that the reasons PharmaCare gave for this refusal were that the **[**21]** negotiations to set up the new PharmaCare network had been difficult, that it had required "horse trading" (apparently a reference to the United/Provider negotiations), and that adding a "third" chain (apparently referring to Stop & Shop on top of CVS and Brooks) would make the situation even more complex. The memorandum concluded its recitation by saying:

> [The PharmaCare president] also lectured John and I about our industry not being farsighted [sic] to stick together on pricing issues and that we had only ourselves to blame for the extremely low reimbursement rates in the market.

In their opening brief, plaintiffs describe this last statement as "another reason" for plaintiffs' exclusion from the expanded Blue Cross network. The intimation (by a benefits manager owned by CVS) that the retail pharmacies in general ought to stick together to raise reimbursement rates paid to them by insurers might well interest the Antitrust Division, but plaintiffs have a grievance only if their refusal to adhere was "another reason" for their exclusion. This claim is unsupported by the language of the memorandum or the follow-up depositions of the participants which we have ourselves **[**22]** read.

The trial. The absence of plausible per se claims in no way dooms the plaintiffs' case. The initial core arrangement--the creation of a closed network by Blue Cross and PharmaCare comprising CVS and various independent pharmacies--is a classic exclusive dealing arrangement. To simplify slightly (and without repeating details) Blue Cross, in exchange for better prices, gave its business exclusively to one group of pharmacies, agreeing for three years not to deal with others including Walgreen and Stop & Shop.

---

[2] As for the "equalization" payments by CVS to Brooks and Provider's independent pharmacies, Blue Cross/Pharmacare apparently reimburses its pharmacies for certain prescription drugs at lower rates than those at which United/Provider reimburses its pharmacies for the same drugs. To compensate United's pharmacies for agreeing to the lower reimbursement rates, CVS and the other Blue Cross pharmacies agreed to pay United's pharmacies $ .25 for every United subscriber's prescription that they filled. This might or might not be a permissible arrangement, but it is not naked price fixing by competitors.

Such agreements are not universally forbidden by the Sherman Act--indeed, they are quite common--but may, depending on the circumstances, unreasonably restrain trade. XI Hovenkamp, ***Antitrust Law*** PP 1802-07, 1810-1814, 1821 (1998). Because such agreements can achieve legitimate economic benefits (reduced cost, stable long-term supply, predictable prices), no presumption against such agreements exists today. *Compare* *Standard Oil Co. of Cal. v. United States, 337 U.S. 293, 306-307, 313-14, 93 L. Ed. 1371, 69 S. Ct. 1051 (1949)*, **[*66]** *with* *Tampa Elec. Co., 365 U.S. at 334*.

Indeed, courts tend to be skeptical of such claims because it is not in the long-term **[**23]** interest of the company that grants the "exclusive deal" to drive out of business competitors of the grantee. Here, Blue Cross would be disserved by making CVS a monopolist, which could then exploit Blue Cross by demanding higher reimbursement. Still, an excluded supplier remains free to offer evidence that, in the individual instance, the anti-competitive consequences of an exclusive contract outweigh the benefits.

This almost always requires a showing of injury to competition; some savings are likely or else the buyer would ordinarily not agree to forego dealing with other suppliers, and in any event an agreement that caused no harm would not be worth condemning. But ***HN9***[] harm does not mean a simple loss of business or even the demise of a competitor but an impairment of the competitive structure of the market. *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 344, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*.

If an exclusive dealing contract cuts off stores like Walgreen from an unduly large portion of the available market for its goods, it and others like it might cease to provide prescription drugs. And if this led or was likely to lead to a shortage of competing drug stores (and new **[**24]** entry was difficult), the few remaining existing competitors might then be able to conspire or otherwise misbehave without being disciplined by competition. Where such foreclosure and negative effects are the result of an agreement, the Sherman Act may condemn the agreement as unreasonable. *Eastern Food Servs., 357 F.3d at 8*; *see* XI Hovenkamp P1802b.

Accordingly, at trial, it was critical to any attack on the exclusive dealing arrangement--and almost any other non-per-se claim one could imagine--that plaintiffs establish a relevant market and harm within it. For the exclusive dealing contract, the first step would be to show the extent of foreclosure resulting from the Blue Cross contract with CVS and others in the PharmaCare network, taking account of other existing foreclosures (*e.g.*, by United/Provider until its settlement with plaintiffs). *Cf.* *Tampa Elec. Co., 365 U.S. at 327-29*; *Eastern Food Servs., 357 F.3d at 8*.

Plaintiffs sought to offer their market definition evidence primarily, as is typical, through an economist, Dr. Stangle. Dr. Stangle's position in his pretrial report was that the relevant market was "the retail **[**25]** sale of health care financed or insurance reimbursed pharmaceutical products" (the product dimension of the market) in Rhode Island (the geographic dimension). Obviously, excluding retail sales that are not financed or reimbursed increases the percentage size of the foreclosed market.

In explaining why he distinguished between reimbursed purchases and all others, Dr. Stangle pointed to the much smaller direct cost to the Blue Cross customer who purchased the same drug from a closed network pharmacy (*e.g.*, CVS) as opposed to a non-network pharmacy (*e.g.*, Walgreen). The defendants protested that this ignored the customer's "true" cost of the CVS drugs which included a share of the insurance premium that the subscriber (or his employer) paid to Blue Cross and also ignored other elements affecting the comparison, such as partial reimbursement for out-of- network purchases.

Pointing to these supposed flaws in Dr. Stangle's market definition, the district court refused to allow the jury to consider it. Then, as already recounted, the plaintiffs made a proffer of the testimony for **[*67]** the record and rested, the defense moved for a directed verdict, and the judge granted the motion and **[**26]** entered judgment for the defendants. The judge said that any remaining evidence in the record supporting the plaintiffs' market definition was too thin to permit the jury to find the proposed market in the absence of expert testimony.

Plainly, for high-cost prescription drugs, whether insurance will cover purchases at a particular pharmacy tends to be crucial to consumer choice, and Dr. Stangle was correct in retorting to the defense that a customer who has paid his insurance premium (or had it paid for him) will--at least for high priced drugs--seek out closed network pharmacies if reimbursement is higher and shun those not within the insurer's closed network. At the point of sale, the customer is interested in what he pays and gets reimbursed, not some imputed (and now sunk) insurance premium cost.

Unfortunately for Dr. Stangle's market definition, the concern in an ordinary exclusive dealing claim by a shut-out supplier is with the available market *for the supplier*. Here, for Walgreen and Stop & Shop, their potential customers are presumptively *all* retail customers for prescription drugs--not just that smaller sub-group who are insured or reimbursed. To say that some sub-group **[**27]** of customers is foreclosed proves nothing by itself about the impact on pharmacies. [3]

This is the same defect we recently addressed in Eastern Food Services. There, as here, a shut-out supplier complained that the foreclosed customers (in *Eastern*, they were students and faculty seeking food services on a university campus) were foreclosed by the university's exclusive dealing contract with another vendor. 357 F.3d at 3-4, 6-7. But the impact of the foreclosure on *the supplier* depended not on the impact on the students and faculty but on how many unforeclosed vending machine customers remained elsewhere. Id. at 6-7.

Walgreen and Stop & Shop sell prescription drugs to lots of customers **[**28]** including those whose purchases are not reimbursed. Conceivably, the latter could be so small a group that foreclosure of a large percentage of reimbursed customers would still be fatal, or there might be some special circumstance that made separate consideration of the sub-group appropriate. But the former possibility would still have to be proved, normally by a proper market definition; and of the latter, there is no hint in this case.

Conceivably, some adjustment to account for the omission of self-paying customers could be devised from existing evidence: plaintiffs say that Blue Cross and United insure 70 percent of Rhode Islanders. But even if a figure representing the entire market could be derived, the number foreclosed by Blue Cross (and formerly by United) remains unknown because a significant portion of Blue Cross' customers have policies that do not effectively restrict them to the closed network. Nor is it our job to build plaintiffs' case for them.

The plaintiffs refer to other record evidence that they say was available to the jury to establish the same reimbursed-drugs product market *without* testimony from Dr. Stangle. The evidence is described in some detail; **[**29]** for example, the Stop & Shop executive in charge of pharmacy **[*68]** products testified to the same large differential in out of pocket costs to reimbursed and unreimbursed customers. But this simply repeats the same mistake in focus without the Ph.D.

It may be worth adding that even a high number would not necessarily establish an antitrust violation. XI Hovenkamp PP 1820b at 147, 1820d. How much of the market must remain open to support decent competition depends on scale economies (retail pharmacies are different than car makers), on ease of re-entry, and on other factors. *Cf. id.* at P 1820d. The still somewhat useful Learned Hand formula for monopoly power has no counterpart in exclusive dealing law. United States v. Aluminum Co. of America, 148 F.2d 416, 424 (2d Cir. 1945). But reliable numbers are an essential starting point and were not supplied.

HN10[] For exclusive dealing, foreclosure levels are unlikely to be of concern where they are less than 30 or 40 percent. *See* Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45-46, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984) (O'Connor, J., concurring); Hovenkamp, *Federal Antitrust Policy* 436-37 & nn. 43-45 (2d ed. 1999) **[**30]** (collecting cases). But while low numbers make dismissal easy, high numbers do not automatically condemn, but only encourage closer scrutiny based on factors just mentioned. There are a few cases to the contrary, Hovenkamp, *Federal Antitrust Policy*, at 437 n. 49, but they cannot be reconciled with Tampa, 365 U.S. at 329, 333; *see also* Roland Machinery Co. v. Dresser Indus., Inc., 749 F.2d 380, 393-94 (7th Cir. 1984) (Posner, J.); XI Hovenkamp, P 1820b at 147, 1821d.

---

[3] One of the defendants suggests that Rhode Island is too large a geographic market because customers shop locally. Reflection will reveal that--whatever the correct market--this argument is a different version of the same mistake of focusing on the customer rather than the supplier.

The plaintiffs also complain that the district court should have permitted them to offer at trial evidence on two other matters: "[first] that Blue Cross manipulated its bidding process and the selection of PharmaCare to manage its closed pharmacy network . . . [and second] evidence showing the mutual, concerted expansion of the defendants' closed pharmacy networks." This evidence, say the plaintiffs, was relevant to their broad rule of reason case even if neither incident was a per se violation.

Plaintiffs devote only three paragraphs (and one long quotation from an old warhorse) to explaining why or how this evidence might be relevant to their "broader challenge to the defendants' **[**31]** course of conduct . . . ." The warhorse is the reminder in *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*, since repeated in other cases, that in assessing a restraint, a broad array of prior history of the restraint, motive, surrounding conditions and the like may be pertinent. Whether evidence was wrongly excluded depends in part on what it was offered to prove. Plaintiffs' brief says that the two excluded incidents were relevant to show "deliberate, concerted action by the defendants" and "that the concerted action unreasonably restrained or tended to restrain trade in the relevant market." The former proposition is admitted (there are explicit agreements); and the latter is simply an abstract description of the Sherman Act's rule of reason and is not a honed antitrust theory for which specific evidence might or might not be relevant.

Chicago Board of Trade is not an endorsement of kitchen-sink antitrust in which anything that might alarm a jury is made admissible. Plaintiffs had, so far as appears, only one substantial and relevant antitrust theory--namely, that Blue Cross had adopted a competitively harmful exclusive dealing **[**32]** arrangement, made more fearsome by its reciprocal expansion and coupled with overbroad ancillary restraints. For this, collaboration was patent--no one **[*69]** denied the existence of the contracts. The allegedly flawed bidding process added nothing to proof of collaboration and had no demonstrated antitrust significance.

In their brief on appeal, plaintiffs suggest that the bid process evidence showed that Blue Cross was determined to exclude plaintiffs for the indefinite future and "would have permitted an inference that the three-year terms of the network agreements were illusory." The only "restraint" within the meaning of the Sherman Act was the *contractual* limitation on Blue Cross' ability to add new pharmacies; any unilateral decision thereafter to exclude plaintiffs would not extend the pertinent "restraint."

The reciprocal expansion incident was arguably more relevant. It did not affect the extent of total foreclosure--United had not previously included plaintiffs; but (merely as an example) some of the ancillary terms seemingly made it harder for the plaintiffs to join either network or start a competing network. Yet the district judge's *in limine* ruling did not exclude **[**33]** proof of the terms--only proof of the details of negotiations, and at trial the district judge apparently reversed the tentative exclusion and allowed in some of the details.

There is yet another problem. As already noted, neither the alleged sham bidding process nor the reciprocal expansion of closed networks was a per se violation although the latter, particularly with its ancillary restraints, had a bearing on any rule of reason attack on the core exclusive dealing arrangement. It is not easy to think of a rule of reason analysis that does not depend on showing adverse effects on competition in a properly defined relevant market. *Cf. Augusta News Co., 269 F.3d at 47*. This predicate failed with Dr. Stangle's testimony.

Some antitrust cases are intrinsically hopeless because (as in *Eastern*) they merely dress up in antitrust garb what is, at best, a business tort or contract violation. By contrast, Blue Cross' adoption of a closed network whose impact was arguably reinforced by its reciprocal expansion coupled with ancillary restraints, might be an unreasonable foreclosure of a properly defined market. However, as plaintiffs omitted the proof, one simply cannot **[**34]** tell.

Whether or not there was an antitrust violation affecting the plaintiffs, some of Blue Cross' customers will doubtless be inconvenienced by restricting their purchases to the closed network. If use of a closed network reduces costs for Blue Cross and *also* reduces or holds down the price of a closed market policy, this may be a legitimate outcome--especially if an open market policy is also an available option. There are few free lunches in the world of commerce.

The possibility always remains that a dominant company may act inefficiently or may unfairly exploit its customers. The usual check for such abuses is competition (here, United is an obvious competitor for Blue Cross) but competition may sometimes be inadequate. In such cases antitrust may not always offer customers much protection, *Aluminum Co. of America, 148 F.2d at 429*; but state regulation--sometimes wisely and sometimes not--is usually free to fill the gap.

Affirmed.

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) authorizes the court to dismiss a claim on the basis of dispositive law. When ruling on a *Rule 12(b)(6)* motion to dismiss, the court must accept the plaintiff's factual allegations as true, and view these allegations in a light most favorable to the plaintiff. In a *Rule 12(b)(6)* motion, the court should not look beyond the pleadings. A 12(b)(6) motion should not be granted unless it appears beyond a doubt that the plaintiff can prove no set of facts in support of his claim which entitle him to relief. The question before the court in examining a *Rule 12(b)(6)* motion is whether the plaintiff's complaint states any valid claim for relief. Since federal courts simply require "notice pleading," the court construes plaintiff's pleading liberally, and lack of detail does not constitute a sufficient ground to dismiss a complaint under *Rule 12(b)(6)*.

HN3[] **Remedies, Damages**

In order to recover under § 1 of the Sherman Act, 15 U.S.C.S. § 1, a plaintiff must prove (1) the existence of an agreement (2) which unreasonably restrains trade (3) to the damage of the plaintiff. Section one applies only to concerted action; unilateral conduct is excluded from its purview. To prove a conspiracy or concerted action, the plaintiff must prove that the conspirators had a conscious commitment to a common scheme designed to achieve an unlawful objective.

HN5[] **Monopolies & Monopolization, Actual Monopolization**

Section 2 of the Sherman Act, 15 U.S.C.S. § 2 denounces three actions: monopolization, attempt to monopolize, and conspiracy to monopolize.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN6[] Actual Monopolization, Monopoly Power

Under § 2 of the Sherman Act, 15 U.S.C.S. § 2, the offense of monopoly consists of two elements: the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Specifically, the monopoly power element concerns the power to control prices or exclude competition.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN9[] Standing, Clayton Act

Section 4 of the Clayton Act 15 U.S.C.S. § 15, provides a private right of action to enforce the Sherman Act and requires a plaintiff to seek recovery for injury "in his business or property." In order to show standing, the private claimant must demonstrate injury to business and property of a type that antitrust laws were intended to prevent. Pleadings need not explain how the injury occurred; that the claimant sustained injury to business or property is a sufficient allegation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN10[] Clayton Act, Claims

Private antitrust liability under § 4 of the Clayton Act, 15 U.S.C.S. § 15, requires the showing of (1) a violation of the antitrust laws, (2) that it was the defendant's conduct that actually caused injury to his business or property, and (3) some indication of the amount of damage. The plaintiff need only provide a just and reasonable estimate of the damage based on relevant data.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Filed Rate Doctrine

HN11[] Regulated Practices, Price Fixing & Restraints of Trade

The filed rate doctrine bars antitrust recovery by parties claiming injury from the payment of a filed rate for goods or services. The doctrine holds that any filed rate -- that is, one approved by the governing regulatory agency -- is per se reasonable and unassailable in judicial proceedings brought by ratepayers. In other words, the filed rate doctrine bars suits against regulated utilities grounded on the allegation that the rates charged by the utility are unreasonable. Moreover, application of the filed rate doctrine in any particular case is not determined by the culpability of the defendant's conduct or the possibility of inequitable results.

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Regulated Industry Mergers

Mergers & Acquisitions Law > Antitrust > Remedies

HN17[] **Antitrust & Trade Law, Exemptions & Immunities**

The filed rate doctrine does not provide immunity from antitrust liability. Instead, the doctrine only acts to bar private antitrust suits seeking damages stemming from rates paid to a regulated utility. Companies that engage in illegal antitrust activities regarding filed rates are still subject to criminal sanctions or equitable relief. Furthermore, the filed rate doctrine does not bar antitrust challenges based on mergers or sales of assets by regulated utilities. Therefore, in accordance with the intent of the Texas Legislature in enacting *Tex. Util. Code Ann. § 39.158(b)*, the filed rate doctrine does not confer immunity from federal or state antitrust laws.

HN20[] **Filed Rate Doctrine, Public Utilities & Telecommunications Carriers**

The filed rate doctrine applies to market based rates. Rates are considered filed rates and subject to agency review if the responsible regulatory agency is charged with "ensuring just and reasonable rates." However, if rates are truly left to the market, with no filing requirement or Federal Energy Regulatory Commission supervision at all, the filed rate doctrine would by its terms no longer operate.

Sections 15.01 et seq. of the Texas Free Enterprise and Antitrust Act (TFEAA) are the state law counterparts to federal ***antitrust law***. The Texas legislature mandates that Texas ***antitrust law*** be harmonized with federal ***antitrust law***. *Tex. Bus. & Com. Code Ann. § 15.04*. As a result, there is no need for federal courts to analyze TFEAA claims separately from Sherman Act claims.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN24[] **Business Torts, Fraud & Misrepresentation**

Under Texas law, to recover for fraud, the plaintiff must establish: (1) a material representation; (2) it was false when made; (3) the speaker either knew it was false or asserted it without knowledge of its truth; (4) the speaker intended that it be acted upon; (5) the party acted in reliance; and (6) the party was injured as a result.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Retail Rates

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN25[] **Exemptions & Immunities, Filed Rate Doctrine**

A regulated entity's alleged fraud does not create a right to a reasonable rate that exists independently of agency action. Thus, even if a filed rate is obtained through fraud, it remains true that one does not suffer the predicate "injury to business or property" by paying the filed rate.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > General Overview

HN26[] **Fraud & Misrepresentation, Negligent Misrepresentation**

To prevail in a negligent misrepresentation action in Texas, the plaintiff must prove: (1) the defendant made a representation in the course of his business, or in a transaction in which he had a pecuniary interest, (2) the defendant supplied false information for the guidance of others in their business, (3) the defendant did not exercise reasonable care or competence in obtaining or communicating the information, and (4) the plaintiff suffered pecuniary loss by justifiably relying on the representation.

Torts > ... > Defamation > Elements > General Overview

Torts > ... > Defamation > Public Figures > Voluntary Public Figures

Torts > ... > Contributory Negligence > Limits on Application > Intentional Torts

HN30[] **Public Figures, Actual Malice**

To state a defamation claim in Texas, the plaintiff must prove that the defendant: (1) published a statement; (2) that was defamatory concerning the plaintiff; (3) while acting with either actual malice, if the plaintiff was a public official or public figure, or negligence, if the plaintiff was a private individual, regarding the truth of the statement.

Torts > Intentional Torts > Defamation > Procedural Matters

Torts > Intentional Torts > Defamation > General Overview

HN31[] **Defamation, Procedural Matters**

A statement is defamatory if it exposes a person to public contempt or financial injury, or if it impeaches a person's reputation. Whether a statement is capable of a defamatory meaning is initially a question for the court. The court construes the statement as a whole in light of surrounding circumstances based upon how a person of ordinary intelligence would perceive the entire statement. A statement may be false, abusive, unpleasant, or objectionable to the plaintiff and still not be defamatory in light of the surrounding circumstances. However, when a publication is of ambiguous or doubtful import, the jury must determine its meaning.

Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution

Torts > ... > Defamation > Public Figures > Actual Malice

Torts > Intentional Torts > Defamation > General Overview

Torts > ... > Defamation > Public Figures > Limited Purpose Public Figure

Torts > ... > Defamation > Public Figures > Voluntary Public Figures

HN32[] **Burdens of Proof, Prosecution**

Whether or not a statement was published by the defendant while acting with actual malice focuses on the defendant's state of mind at the time of publication. To prove actual malice it must be shown that the defendant made a statement with knowledge that it was false or with reckless disregard of whether it was true or not. For a public figure to establish reckless disregard, the defendant must have entertained serious doubts as to the truth of his publication.

Torts > Business Torts > Trade Libel > Remedies

Torts > Intentional Torts > Defamation > General Overview

Torts > ... > Defamation > Remedies > Damages

HN33[] **Trade Libel, Elements**

The elements of a claim for business disparagement are: (1) publication by the defendant (2) of disparaging words (3) which are false; (4) published with malice; (5) published without privilege; and (6) special damages to the plaintiff. To prove special damages, a plaintiff must provide evidence of direct, pecuniary loss attributable to the false communications of the defendants. A claim for business disparagement is similar to a claim for defamation, but defamation actions chiefly serve to protect the personal reputation of an injured party, while a business disparagement claim protects economic interest.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN34[] **Conspiracy, Elements**

Under Texas law, five elements are necessary to establish an actionable claim for civil conspiracy: (1) two or more persons; (2) an object to be accomplished; (3) a meeting of minds on the object or course of action; (4) one or more unlawful, overt acts; and (5) damages as the proximate result. In addition, a plaintiff must plead an underlying tort for its civil conspiracy claim to be actionable.

Opinion

ORDER GRANTING IN PART DEFENDANTS' MOTIONS TO DISMISS

On this day came on to be heard: (1) "Defendant Electric Reliability Council of Texas, Inc.'s Motion to Dismiss Second Amended Complaint, or, in the Alternative, to Stay Proceedings," (2) "TXU Defendants' Motion to Dismiss TCE's Second Amended Complaint and Brief in Support," (3) "Texas Genco Defendants' Motion to Dismiss Plaintiff's Second Amended Complaint and Brief in Support," (4) "Defendants TECO EnergySource, Inc. and Frontera Generation L.P.'s Motion to Dismiss Plaintiff's Second Amended Complaint and Brief in Support," (5) "American Electric Power Defendants' Motion to Dismiss the Second Amended. Complaint and Memorandum in Support," (6) "Defendant APX's Motion to Dismiss the Second Amended Complaint and Brief in Support," (7) "TIE Defendants' Motion to Dismiss Plaintiff's Second Amended Complaint and Brief in Support," (8) "Reliant Resources Defendants' Motion to Dismiss Plaintiff's Second Amended Complaint and Supporting Memorandum, **[*7]** " (9) "Defendant Tractebel Energy Marketing, Inc.'s Motion to Dismiss Second Amended Complaint and Memorandum in

Motion to Dismiss Second Amended Complaint and Memorandum in Support," and all corresponding responses and replies. For the reasons stated below, this Court GRANTS these motions in part and DISMISSES Plaintiff's Second Amended Complaint.

I. JURISDICTION

This Court has federal question jurisdiction over this antitrust action pursuant to *28 U.S.C. § 1331*, and supplemental jurisdiction over Plaintiff's state law claims pursuant to *28 U.S.C. § 1367*.

II. FACTS AND PROCEEDINGS

Plaintiff Texas Commercial Energy ("TCE") began selling electric power to retail customers in Texas in January 2002. Initially, TCE entered into bilateral contracts with wholesale providers of electricity to obtain the electric power it sold in the consumer market. However, TCE increasingly: relied on the Balancing Energy Service ("BES") market, a bid-based market for short-term power, to meet its electricity needs. In early 2003, prices in the BES market for electricity increased substantially, and as a result, TCE sustained **[*8]** extensive losses before eventually declaring bankruptcy in March 2003. TCE claims that Defendants contributed to the rise in BES market prices through federal and state antitrust violations, fraud, negligent misrepresentation, breach of contract, defamation, business disparagement, civil conspiracy, and malicious and willful/flagrant conduct.

A. REGULATORY BACKGROUND

The state of Texas operates an independent and self-contained electric production and transmission grid that serves nearly 85 percent of the state. The Federal Energy Regulatory Commission ("FERC") does not regulate Texas' independent electric grid and electric utility companies operating in the Texas electricity market are exempt from the *Federal Power Act*. The. Public Utility Commission of Texas ("PUCT") regulates the Texas electric and transmission grid.

Historically, electric power in Texas was generated and sold by integrated electric utilities that supplied specific geographic areas, and retail rates for electricity were set by the state. But in 1999, the Texas Legislature, with the passage of Senate Bill 7, amended the Public Utility Regulatory Act ("PURA"), and began the deregulation of the Texas electricity **[*9]** market. The law required that rates for electric power in Texas be set by a competitive market, and called for each integrated electric utility to partition itself into three companies: (1) a Power Generation Company ("PGC"), (2) a Transmission and Distribution Provider ("TDSP"), and (3) a Retail Electric Provider ("REP",) . Senate Bill 7 did not require a full divestiture by each electric utility, but each of the three resulting companies was required, to be operated by separate management. The Texas Legislature also granted PUCT jurisdiction over the Texas electricity market.

ERCOT, under a contract with PUCT, is the Independent System Operator ("ISO") of the Texas electricity market, and is charged with insuring (1) system reliability, (2) nondiscriminatory access to transmission and distribution systems, (3) access to market information, and (4) clearance of all market transactions. The ERCOT protocols, which are created and adopted by the ERCOT board, provide the framework for the administration of the Texas electricity market. These protocols divide participants in Texas' wholesale electricity market into three categories: (1) Load Serving Entities ("LSE"), (2) Qualified Scheduling **[*10]** Entities ("QSE"), and (3) Resource Entities ("RE"). LSEs (which include REPs, municipal electric utilities, and co-op electric utilities) sell electricity, REs (which include PGCs) generate electricity, and QSEs serve as intermediaries between LSEs and REs. QSEs are responsible for submitting both (1) schedules of procured energy for LSEs to ERCOT and (2) resource plans for REs to ERCOT. In addition, QSE's must possess either an investment grade credit rating or post collateral with ERCOT in the form of letters of credit or cash equivalents.

Prior to November 2002, the ERCOT protocols required that QSEs submit a "Balance Schedule" demonstrating that the scheduled generation of the REs that a QSE represents is equal to the retail obligations of the LSEs that the QSE represents However, on November 1, 2002, ERCOT implemented the Relaxed Balancing Schedules protocol. This new protocol eased restrictions in the Texas electric market by eliminating the requirement that the scheduled generation of a QSE match its obligations in the retail power market. This revision was designed to increase competition in the market by allowing REPs to also serve their retail load requirements through purchases **[*11]** in the BES market.

The wholesale electricity market in Texas is for both electric power and electric capacity, both of which are available through (1) bilateral agreements among market participants and (2) the BES market. Forward power contracts for future electricity are available only through bilateral agreements, and bilateral agreements are the only source of (1) short-term, one-day to one-month, and (2) long-term, over one-month wholesale purchases. The BES market is a market for same day purchases made in fifteen-minute intervals. Prices in the BES market are capped at $ 1,000.00 per MWh.

In addition, the ERCOT wholesale market is divided into a number of Congestion Zones ("CZ"). The geographic area of each CZ is re-determined each year, and is established according to three factors: (1) transmission capacity, (2) generation capacity, and (3) electricity demand. Each CZ participates in both the bilateral market and the BES market. Both bilateral market prices and BES market prices are separately quoted for each of the CZs. Before 2004, there were four CZs in Texas; a fifth CZ was added in 2004.

Electric capacity, an Ancillary Service, is a critical component of the wholesale **[*12]** market, and each LSE is required to supply reserve capacity, an Ancillary Service Requirement. Ancillary Services are purchased either through (1) bilateral agreements with other market participants, or (2) directly through ERCOT in the Ancillary Services market, a bid-based market. In both the BES market and the Ancillary Services market, ERCOT serves as an intermediary, matching offers and bids. A REP can buy or sell energy on the BES market as the need arises to satisfy its retail obligations. ERCOT also administers a day-ahead capacity market.

Senate Bill 7 requires that PUCT monitor and remedy market power abuses. PUCT, through injunctions, fines, and the revocation of the right to participate in the market, possesses the authority to punish those who abuse their market power. PUCT also created the Market Oversight Division ("MOD") to ensure compliance with the statutory requirements of the amended PUPA. The MOD itself does not possess decision-making power, but reports directly to PUCT. As part of its compliance activities, in June 2002 the MOD required all participants in the Texas electricity market to file an affidavit with PUCT pledging that they would not engage in market **[*13]** manipulation. These affidavits were a direct response to market manipulation that occurred during August 2001 as a result of improper scheduling practices. The MOD also required market participants to return the $ 30,000,000.00 obtained as a result of these improper practices.

B. FACTUAL BACKGROUND

TCE began operating as a REP in the State of Texas on January 1, 2002. As a REP, TCE purchased energy and electric capacity from other market participants, and then sold this energy directly to retail customers. Initially, TCE purchased its supply of energy through a bilateral contract with Bryan Texas Utilities. However, on June 20, 2002, TCE became a certified QSE, and began to both purchase electric power directly from ERCOT in the BES market and self-schedule bilateral purchase agreements for power in the wholesale market.

During January 2003, TCE noted that the percentage of electricity in the ERCOT-controlled electric market supplied by the BES market began to rise. During January and February 2003, TCE regularly observed price spikes in the BES market that were three to five times the price of day-ahead power. Concerned about these observations, TCE met with the MOD, and **[*14]** alleged that both anticompetitive bids and manipulation of scheduled generation drove prices in the BES market to $ 241.15 per MWh on January 25, 2003. [1] On that day, the price for day-ahead power was $ 40.30 per MWh. As a result of these price spikes, TCE paid higher prices in the BES market, and was forced to withdraw credit-based collateral from its bilateral partners to meet its increasing collateral requirements with ERCOT.

TCE claims that these high prices occurred as a result of market manipulation by Defendants, and notes that TXU controlled 75 percent of the BES market on February 24, 2003, 99 percent of the BES market on February 25, 2003, and 85 percent of the BES market on February 26, 2003. On February 24, 2003, TCE contends that

---

[1] TCE alleges that prices spiked to $ 241.15 per MWh on January 25, 2003 (SAC P 186), but then later alleges that prices rose to $ 273.64 per MWh at 10:30 a.m. on January 25, 2003. (SAC P 191.)

Defendants implemented a squeeze on the market for short-term and BES energy. **[*15]** The BES market price for the 8:30 a.m. interval initially cleared $ 990.01 per MWh before being recalled from the market. Then at 6:00 p.m., the price for BES energy cleared $ 990.01 per MWh for ten intervals. TCE alleges that on February 25, 2003, Defendants TXU and Reliant, despite possessing excess generation capacity, withheld energy from the market in order to manipulate BES market prices. At 7:00 a.m. on February 25, 2003, the BES market ran out of offers, and the market-clearing price for energy ("MCPE") was again $ 990.00 per MWh. As a result, at 7:30 a.m., ERCOT issued a market advisory and requested additional upbalancing bids in an effort to provide more electricity in the BES market. TCE contends that throughout the day, ERCOT gave several verbal dispatch instructions to Defendant TXU to raise its level of electric power output into the system. TCE alleges that these verbal instructions failed to follow ERCOT protocols requiring ERCOT to identify the specific generation unit of a plant that is to be raised or lowered. TCE also contacted the Thief Operating Officer ("COO") of ERCOT, and requested an explanation for the price spikes in the BES market that morning. ERCOT's **[*16]** COO could not explain the price spikes given that generation and load forecasts were correct, a weather emergency had not been declared, there were no natural gas curtailments, the transmission system suffered from no operational problems, and there were no generation unit outages.

During the week of February 25, 2003, with the rise in BES market prices, TCE was forced to increase its posted collateral with ERCOT from $ 16,200,000.00 to approximately $ 24,000,000.00. In addition, to have complied with ERCOT protocols when the invoice for the last week of February was to come due in March 2003, TCE would have had to increase its collateral with ERCOT from approximately $ 24,000,000.00 to $ 102,000,000.00. On February 25, 2003, TCE began to contact other market participants in attempt to sell all or part of its customer portfolio. TCE obtained Confidentiality Agreements from these contacted market participants, and alleges that several Defendants violated their Confidentiality Agreements by distributing sensitive and proprietary financial information in an effort to defame and disparage TCE.

On March 3, 2003, the MOD issued "Report on February 24-26, 2003 Balancing Energy Price Spikes, **[*17]** " and concluded that market manipulation had increased the price of energy in the BES market by two to three times, at an additional cost to the market of $ 17,000,000.00. During this week, ERCOT agreed to give TCE until March 6, 2003 to post additional collateral. Then on March 4, 2003, ERCOT offered to reduce TCE's credit requirement to roughly $ 59,000,000.00. However, on March 5, 2003, despite ERCOT's agreement to wait until March 6, 2003, ERCOT tendered TCE's Letters of Credit for payment. On March 6, 2003, TCE filed for Chapter 11 bankruptcy and requested a Temporary Restraining Order ("TRO") to prevent ERCOT from drawing upon its Letters of Credit.

On March 7, 2003, TCE and ERCOT agreed to the terms of an injunction during the hearing for the TRO. The agreement provided that TCE transfer customers representing 80 percent of its revenue to other REPs participating in the Texas electricity market. In return, ERCOT agreed to release TCE's Letters of Credit and assist TCE in collecting its accounts receivable. In addition, during a March 10, 2003 meeting with representatives of participants in the Texas electricity market, two additional requirements were incorporated into the agreement: **[*18]** (1) TCE would no: be allowed to purchase more than 10 percent of its energy requirements in the BES market and (2) the largest of TCE's released customers would be placed on Provider of Last Resort ("POLR") rates. [2] TCE alleges that the second additional requirement is a violation of PUCT rules.

In late March 2003, the Chief Executive Officer ("CEO") of ERCOT issued a number of public statements about TCE. TCE alleges that these statements violated ERCOT protocols by releasing 2 POLR rates are indexed to the MCPE of the BES market. Confidential financial and business information. In addition, TCE contends that these statements were false and intentionally misleading.

In a report issued on May 19, 2003, the MOE' reported that "bidders using the APX QSE and Mirant 'acknowledged that their extreme bids did not reflect production costs during the weather event, but claimed that the sporadic windfall revenues were intended to improve the long-term profitability **[*19]** of a plant.'" (Pl.'s Second Amend. Compl. ("SAC") P 292.) On January 27, 2004, the MOD published "Staff Inquiry into Allegations made by Texas

---

[2] POLR rats are indexed to the MCPE of the BES market.

Commercial Energy regarding ERCOT Market Manipulation." TCE alleges that this report supports its allegations of market manipulation. The MOD continues to investigate TCE's allegations of market manipulation.

C. PROCEDURAL BACKGROUND

TCE filed its Second Amended Complaint ("SAC") on February 3, 2004. In its SAC, TCE sues twenty-four defendants that can be classified into ten groups: (1) TXU Energy, Inc., TXU Generation Services Company, L.P., TXU Portfolio Management Company, L.P., and TXU Energy Solutions Management Company (collectively the "TXU Defendants"); (2) American Electric Power, Inc., AEP Texas Central Company, AEP Texas North Company, American Electric: Power Service Corp., and AEP Texas Commercial Industrial Retail, L.P. (collectively the "AEP Defendants"); [3] (3) CenterPoint Energy, Inc., CenterPoint Energy Houston Electric, L.L.C., and Texas Genco, L.P. (collectively the "Texas Genco Defendants"); [4] **[*21]** (4) Reliant Resources, Inc., Reliant Energy Electric Solutions, L.L.C., Reliant Energy Retail Services, L.L.C., and Reliant **[*20]** Energy Solutions, L.L.C. (collectively the "Reliant Defendants"); [5] (5) Automated Power Exchange, Inc. ("APX"); (6) the Electric Reliability Counsel of Texas ("ERCOT"); (7) TECO Energy Source, Inc. ("IES"); (8) Texas Independent Energy, L.P., Odessa-Ector Power Partners, L.L.P., and Guadalupe Power Partners, L.P. (collectively the "TE Defendants"); (9) Frontera Generation L.P. ("Frontera"); and (10) Tractebel Energy Marketing, Inc. ("Tractebel") . In its SAC, TCE alleges violations of *§§ 1* and *2* of the Sherman Antitrust Act, *§ 15.05(a)*, *(c)* and *§ 15.10* of the *Texas Free Enterprise and Antitrust Act* ("TFEAA"), fraud, negligent misrepresentation, breach of contract, defamation, business disparagement, civil conspiracy, and malicious and willful/flagrant conduct. [6]

ERCOT filed "Defendant Electric Reliability Council of Texas, Inc.'s Motion to Dismiss Second Amended Complaint, or in the Alternative, to Stay Proceedings, **[*22]** " on March 15, 2004. The TXU Defendants filed their Motion to Dismiss on March 15, 2004. The Texas Genco Defendants, Frontera, TES, the AEP Defendants, APX, the TIE Defendants, the Reliant Defendants, and Tractebel filed their Motions to Dismiss on March 16, 2004. TCE filed "TCE's Response to Defendants' Motions to Dismiss and, in the Alternative, Motion for Leave to Amend" on April 15, 2004. [7] The Court held a hearing on the motions on May 20, 2004. This Court now considers the motions.

III. DISCUSSION

---

[3] The AEP Defendants contend that TCE's Bankruptcy Plan, P 4.4.1(11), dismissed AEP Texas central company and AEP Texas North Company from this action. (AEP's Reply at 3 n.l.)

[4] In its Response to Defendants' Motions to Dismiss, TCE states that it "respectively agrees with Centerpoint's argument that TCE's bankruptcy counsel, Harlin Womble, apparently released centerpoint during the bankruptcy proceedings. Accordingly, TCE agrees with Centerpoint that it should be dismissed." (Pl.'s Resp. to Def.'s Mot. to Dismiss at 140 n.511.) However, TCE fails to state which one of the two CenterPoint companies is to be dismissed. In its Reply to TCE's Response to Defendants' Motions to Dismiss, the Texas Genco Defendants state that the company in question is CenterPoint Energy Houston Electric, L.L.C. (Def.'s Reply at 2.)

[5] In its SAC, TXU collectively refers to CenterPoint Energy, Inc., CenterPoint Energy Houston Electric, L.L.C., Texas Genco, L.P., Reliant Resources, Inc., Reliant Energy Electric Solutions, L.L.C., Reliant Energy Retail Services, L.L.C., and Reliant Energy Solutions, L.L.C. as the "Reliant Defendants." However, the Texas Genco Defendants and the Reliant Defendants contend that they are separate entities and filed separate motions to dismiss. As a result, this Order will also refer to the Texas Genco Defendants and the Reliant Defendants separately. Therefore, whenever TCE, in its SAC, refers to the Reliant Defendants, this Court will assume that TCE is referring to both the Texas Genco Defendants and the Reliant Defendants.

[6] In its SAC, TCE references *§§ 1, 2, 3and 13a* of the Sherman Antitrust Act. (SAC P 337.) In its response, TCE clarifies that it is asserting only §§ 1 and 2 Sherman Act claims. (Pl.'s Resp. at 76 n.253.)

[7] This Court struck TCE's response on April 27, 2004. However, the court is aware of TCE's arguments and has fully addressed them herein TCE refiled its response on April 28, 2004.

A. MOTION TO DISMISS

Rule 12(b) (6) of the Federal Rules of Civil Procedure ***HN1***[] authorizes the court to dismiss a claim on the basis of dispositive law. *Neitzke v. Williams, 490 U.S. 319, 326, 109 S. Ct. 1827, 1832, 104 L. Ed. 2d 338 (1989)*. When ruling on **[*23]** a 12(b) (6) motion to dismiss, the Court must accept the plaintiff's factual allegations as true, and view these allegations in a light most favorable to the plaintiff. *Capital Parks, Inc. v. S.E. Adver. & Sales Sys., 30 F.3d 627, 629 (5th Cir. 1994)*. In a 12(b) (6) motion, the Court should not look beyond the pleadings. *McCartney v. First City Bank 970 F.2d 45, 47 (5th Cir. 1992)*. A 12(b) (6) motion should not be granted "unless it appears beyond a doubt that the plaintiff can prove no set of facts in support of his claim which entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 102, 2 L. Ed. 2d 80 (1957)*; *Mitchell v. McBryde, 944 F.2d 229, 230 (5th Cir. 1991)*. The question before the Court in examining a Rule 12(b)(6) motion is whether the plaintiff's complaint states any valid claim for relief. *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 102, 2 L. Ed. 2d 80 (1957)*; *Lowrey v. Texas A&M Univ. Sys., 117 F.3d 242, 247 (5th Cir. 1997)*. Since federal courts simply require "notice pleading," the Court construes Plaintiff's pleading liberally, and lack of **[*24]** detail does not constitute a sufficient ground to dismiss a complaint under *Rule 12(b)(6)*. *Strauss v. City of Chicago, 760 F.2d 765, 767 (7th Cir. 1985)*.

B. FEDERAL ANTITRUST CLAIMS

In its SAC, TCE alleges that Defendants violated *§§ 1and 2* of the Sherman Antitrust Act. Specifically, TCE alleges that the TXU Defendants, the AEP Defendants, the Texas Genco Defendants, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel violated the Sherman Antitrust Act by engaging in economic withholding, physical withholding, and market manipulation. TCE further alleges that the TXU Defendants, the AEP Defendants, the Texas Genco Defendants, and the Reliant Defendants violated the Sherman Antitrust Act by exercising monopoly power, attempting to monopolize, and/or conspiring to monopolize. Defendants move to dismiss TCE's federal antitrust claims under the filed rate doctrine.

1. The Sherman Antitrust Act Generally

a. Section 1 of the Sherman Antitrust Act

Section 1 of the Sherman Act states that ***HN2***[] "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, **[*25]** or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. ***HN3***[] In order to recover under *§ 1 of the Sherman Act*, a 'plaintiff must prove (1) the existence of an agreement (2) which unreasonably restrains trade (3) to the damage of the plaintiff.' *J.T. Gibbons, Inc. v. Crawford Fitting Co., 704 F.2d 787, 791 (5th Cir. 1983)*. "Section one applies only to concerted action; unilateral conduct is excluded from its purview." *Johnson v. Hosp. Crp. of Am., 95 F.3d 383, 392 (5th Cir. 1996)*. To prove a conspiracy or concerted action, the plaintiff must prove that the conspirators had a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Spectators' Communication Network v. Colonial Country Club, 253 F.3d 215, 220 (5th Cir. 2001)*

b. Section 2 of the Sherman Antitrust Act

Section 2 of the Sherman Act states that ***HN4***[] "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony ...." *15 U.S.C. § 2*. **[*26]** ***HN5***[] This section of the Sherman Act denounces three actions: "monopolization, attempt to monopolize, and conspiracy to monopolize." *N. Mississippi Communications, Inc. v. Jones, 792 F.2d 1330, 1335 (5th Cir. 1986)*

HN6[] Under *§ 2 of the Sherman Act*, the offense of monopoly consists of two elements: "the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Alcatel USA, Inc. v. DGI Technologies, Inc., 166 F.3d 772, 781 (5th Cir. 1999). Specifically, the monopoly power element concerns the "power to control prices or exclude competition." Stewart Glass & Mirror, Inc. v. U.S. Auto Glass Disc. Ctrs., Inc., 200 F.3d 307, 315 (5th Cir. 2000)

HN7[] An attempted monopoly in violation of Section 2 consists of three elements: "(1) that the defendant engaged in predatory or exclusionary conduct, (2) that the defendant possessed the specific intent to monopolize, and (3) that there was a dangerous probability that the defendant would succeed in his attempt." Bell Atl. Corp. v. AT&T Corp., 339 F.3d 294, 302 (5th Cir. 2003). **[*27]**

HN8[] A conspiracy to monopolize can be established only through proof of "(1) the existence of specific intent to monopolize; (2) the existence of a combination or conspiracy to achieve that end; (3) overt acts in furtherance of the combination or conspiracy; and (4) an effect upon a substantial amount of interstate commerce." Stewart Glass & Mirror, Inc., 200 F.3d at 316.

c. Private Causes of Action

Section 4 of the Clayton Act, 15 U.S.C. § 15, **HN9**[] provides a private right of action to enforce the Sherman Act and requires a plaintiff to seek recovery for injury "in his business or property." Dillard v. Merrill Lynch, 961 F.2d 1148, 1159 (5th Cir. 1992). In order to show standing, the private claimant must demonstrate injury to business and property of a type that antitrust laws were intended to prevent. *Id.* Pleadings need not explain how the injury occurred; that the claimant sustained injury to business or property is a sufficient allegation. *Id.*

HN10[] Private antitrust liability under Section 4 of the Clayton Act requires the showing of (1) a violation of the antitrust laws, (2) that it was the defendant's conduct that **[*28]** actually caused injury to his business or property, and (3) some indication of the amount of damage. Bell Atl. Corp., 339 F.3d at 302; Nichols v. Mobile Bd. of Realtors, Inc., 675 F.2d 671, 675 (5th Cir. 1982). The plaintiff need only provide "a just and reasonable estimate of the damage based on relevant data." Bell Atl. Corp., 339 F.3d at 303.

2. The Filed Rate Doctrine Generally

HN11[] The filed rate doctrine "bars antitrust recovery by parties claiming injury from the payment of a filed rate for goods or services." County of Stanislaus v. Pac. Gas and Elec. Co., 114 F.3d 858, 862 (9th Cir. 1997) (holding that the filed rate doctrine barred federal antitrust price fixing claims brought under § 1 of the Sherman Antitrust Act); *see also* Square D Co. v. Niagara Frontier Tariff Bureau, Inc., 476 U.S. 409, 424, 106 S. Ct. 1922, 1931, 90 L. Ed. 2d 413 (1986) (holding that the filed rate doctrine barred federal antitrust claims brought under § 1 of the Sherman Antitrust Act); Town of Norwood, Massachusetts v. New England Power Co., 202 F.3d 408, 419 (1st Cir. 2000) (holding that the **[*29]** filed rate doctrine barred federal antitrust claims brought under §§ 1and 2 of the Sherman Antitrust Act). The doctrine "holds that any filed rate -- that is, one approved by the governing regulatory agency -- is per se reasonable and unassailable in judicial proceedings brought by ratepayers." Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 18 (2nd Cir. 1994). In other words, "the filed rate doctrine bars suits against regulated utilities grounded on the allegation that the rates charged by the utility are unreasonable." *Id.* Moreover, "application of the filed rate doctrine in any particular case is not determined by the culpability of the defendant's conduct or the possibility of inequitable results." Marcus v. AT&T Corp., 138 F.3d 46, 58 (2nd Cir. 1998).

One legal scholar traces the Supreme Court's analysis of filed rates to 1906 when the Court reasoned that the Interstate Commerce Act had the purpose "to secure equality of rates as to all and to destroy favoritism." Jim Rossi, *Lowering the Filed Tariff Shield: Judicial Enforcement for a Deregulatory Era,* 56 VANO L. REV. 1591, 1599 (Nov. 2003) *(quoting* New York, New Haven & Hartford R.R. v. Interstate Commerce Comm'n, 200 U.S. 361, 50 L. Ed. 515, 26 S. Ct. 272 (1906). **[*30]** The Supreme Court first articulated the filed rate doctrine as a defense to antitrust liability in Keogh v. Chicago N.W. Ry. Co., 260 U.S. 156, 43 S. Ct. 47, 67 L. Ed. 183 (1922). In *Keogh,* the plaintiff alleged that shipping rates filed by the defendant interstate freight carriers with the Interstate Commerce Commission ("ICC") were fixed at arbitrary and unreasonable high levels as a result of a conspiracy in violation of §

7 of the Anti-Trust Act of July 2, 1890. *Keohg, 260 U.S. at 159-60*. The Supreme Court held that since the shipping rates in question had been filed with and approved by the ICC, the plaintiff failed to state a cause of action under the Anti-Trust Act. *Id. at 162*.

In rejecting the plaintiff's antitrust claim, the Court in *Keogh* articulated a number of reasons in support of its holding. First, the regulatory structure governing rates charged by carriers provided a mechanism for the recovery of damages. *Id. at 162*. Second, antitrust liability requires an injury or violation of a legal right. "The legal rights of shipper as against carrier in respect to a rate are measured by the published **[*31]** tariff," and the plaintiff suffered no injury as a result of paying the published tariff. *Id. at 163*. Third, the award of antitrust damages to the plaintiff "might, like a rebate, operate to give [the plaintiff] a preference over his trade competitors." *Id.* Fourth, determining damages would require the court to "reconstitute the whole rate structure for many articles moving in an important section of the country." *Id. at 164*. Finally, "the damages alleged [by the plaintiff were] purely speculative." *Id.*

Since *Keogh,* the Supreme Court has revisited the filed rate doctrine on a number of occasions. *See e.g.,* *Montana-Dakota Utils. Co. v. Northwestern Pub. Serv. Co., 341 U.S. 246, 71 S. Ct. 692, 95 L. Ed. 912 (1951)*; *Arkansas Louisiana Gas Co. v. Hall, 453 U.S. 571, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981)*; *Maislin Indus., U.S. v. Primary Steel, Inc., 497 U.S. 116, 110 S. Ct. 2759, 111 L. Ed. 2d 94 (1990)*. In these decisions, the Supreme Court has been concerned with two corresponding interests: (1) "potential 'discriminations in rates as between ratepayers," *Wegoland, 27 F.3d at 19,* **[*32]** and (2) "the 'justiciability' of determining reasonable rates." *Id.*

The filed rate doctrine was established to protect consumers from discrimination by monopolies. Rossi, *56 VAND. IL. REV, at 1599*. Price discrimination is condemned because "it maximizes the monopolist's profits … while also encouraging the monopolist to waste resources in maintaining its dominant market position." *Id. at 1600*. ***HN12***[] "A utility with a filed tariff is prohibited from offering customers rebates and discounts that are at odds with the filed (and often approved) tariff." Jim Rossi, *Beynd Goldwasser: Ex Post Judicial Enforcement in Deregulated Markets,* *2003 MICH. ST. DCL L. REV. 717, 720 (Fall 2003)*. With respect to rate discrimination, the filed rate doctrine prohibits a party "from recovering damages measured by comparing the filed rate and the rate that might have been approved absent the conduct in issue." *H.J. Inc. v. N.W. Bell Tel. Co., 954 F.2d 485, 488 (8th Cir. 1992)*.

As the Supreme Court explained in *Keogh,* any attempt by a court to determine relief from previously assessed rates would lead to complaining parties paying less than those who are not suing. **[*33]** *Keogh, 260 U.S. at 163*. Therefore, the filed rate doctrine prevents price discrimination between suing and non-suing parties. *Wegoland, 27 F.3d at 21*. In addition, the *Keogh* decision reasoned, "uniform treatment would not result, even if all [customers] sued, unless the highly improbably happened, and the several juries and courts gave to each the same measure of relief." *Keogh, 260 U.S. at 163*.

As a practical matter, the availability of class action litigation has developed since the *Keogh* decision and uniform treatment is more readily available now. *Square D, 476 U.S. at 423*. Additionally, "the greater sophistication in evaluating damages, might mitigate the expressed fears about the speculative nature" of antitrust damages. *Id.* "To be sure, the concerns for discrimination are substantially alleviated in … putative class actions." *Wegoland, 27 F.3d at 22*.

In regards to the justiciability of determining reasonable rates, the filed rate doctrine "preserves the exclusive role of agencies in approving rates for … services that are reasonable by keeping courts out of the rate-making issues. **[*34]** " *Marcus v. AT&T Corp., 138 F.3d 46, 58 (2nd Cir. 1998)*. As explained by the Second Circuit in *Sun City Taxpayers' Ass'n v. Citizens Utils. Co.,45 F.3d 58, 62 (2nd Cir. 1995)*, "(1) legislatively appointed regulatory bodies have institutional competence to address rate-making issues; (2) courts lack the competence to set utility rates; and (3) the interference of courts in the rate-making process would subvert the authority of rate-setting bodies and undermine the regulatory regime." *Sun City, 45 F.3d at 62*.

In light of criticisms, the Supreme Court directly addressed the continuing viability of the filed rate doctrine in antitrust actions in *Square D Co. v. Niagara Frontier Tarif: Bureau, Inc., 476 U.S. 409, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986)*. In *Square D,* the Supreme Court admitted that it could assume "the *Keogh* decision was unwise as a matter of policy." *Id. at 420*. Nonetheless, the Court declined to overrule *Keogh,* stating, "*[s]tare* decisis is usually the wise policy because in most matters, it is more important that the applicable rule of law be settled than that it be settled **[*35]** right." *Id. at 424*. "If there is to be an overruling of the *Keogh* rule, it must come from Congress, rather than from this Court." *Square D Co., 476 U.S. at 424, 106 S. Ct. at 1931*.

3. The Texas Electric Industry is a Regulated Industry

TCE contends that the filed rate doctrine does not apply to the instant action since FERC possesses no regulatory authority over the Texas electricity market. TCE describes the filed rate doctrine as a consequence of Congressional intent to vest exclusive jurisdiction over federal power issues to FERC. (Pl.'s Resp. P 2.18.) "Because Texas' electric power supply is strictly 'intrastate', FERC has no authority pursuant to the *Interstate Commerce Clause*" [8] (Pl.'s Resp. at 11) and the Court "should look to the Texas legislature's statutory intent not to invoke the filed rate doctrine." *(Id.* 91 2.18.)

[*36] ***HN13***[] Although the filed rate doctrine is commonly used to uphold rates approved by federal agencies such as FERC or the ICC, the doctrine was developed as a common law defense to federal antitrust litigation. *See Keogh, 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47* (discussed in Section III.B.2 above). "The rationale underlying the filed rate doctrine applies whether the rate in question is approved by a federal or state agency." *H.J. Inc., 954 F.2d at 494*; *see also Wegoland, 27 F.3d at 20*; *M.R. Taffet v. S. Co., 967 F.2d 1483, 1494 (11th Cir. 1992)*

PUCT, as the regulatory agency charged with overseeing the Texas electricity market, possesses the institutional competence to address rate-making issues in the BES market, one of the principles underlying the filed rate doctrine. *See Sun City, 45 F.3d at 62*. ***HN14***[] Upon a finding of market power abuse by a participant in the Texas electricity market, PUCT is empowered by the Texas Legislature to remedy the situation by "seeking an injunction or civil penalties as necessary to eliminate or to remedy the market power abuse or violation as authorized by Chapter 15, by imposing an administrative **[*37]** penalty as authorized by Chapter 15, or by suspending, revoking, or amending a certificate or registration as authorized by *Section 39.356*." *TEX. UTIL. CODE § 39.157(a)*. PUCT has demonstrated its institutional competence in addressing ratemaking issues when the MOD ordered market participants to return $ 30 million in illicit profits obtained as a result of abusive and improper scheduling practices in the BES market during August 2001. It must also be noted that MOD continues to investigate the market abuses alleged by TCE.

4. Savings Clause Does Not Bar Filed Rite Defense

The arguments of TCE focused on the savings clause and the intent of the Texas Legislature in drafting Senate Bill 7. TCE alleges that the filed rate doctrine should not apply to the Texas electricity market since the Texas Legislature did not intend for the restructuring of the Texas electricity market to prohibit civil antitrust lawsuits. Specifically, TCE cites to the savings clause in *Section 39.158(b) of the Texas Public Utility Code*:

> ***HN15***[] Nothing in [the chapter governing the restructuring process of the Texas electricity market] shall be construed to confer immunity **[*38]** from state or federal antitrust laws. This chapter is intended to complement other state and federal antitrust provisions. Therefore, antitrust remedies may also be sought in state or federal court to remedy anticompetitive activities.

TEX. UTIL. CODE § 39.158(b). The Fifth Circuit has stated that ***HN16***[] "the primary rule in statutory interpretation [is] that a court must give effect to legislative intent." *Zer-Ilan v. Frankford (In re CPDC, Inc.), 337 F.3d 436, 442 (5th Cir. 2003)*. TCE's argument is that the savings clause expresses the Texas Legislature's intent that

[8] TCE's emphasis on the intra-state nature of the Texas energy market is noteworthy given that TCE is suing under federal antitrust laws. If the Texas energy market is truly intra-state, then this Court has no jurisdiction over the Sherman Antitrust Act Claims that require a nexus to interstate commerce. *15 U.S.C. §§ 1* and*2* (protecting "trade and commerce among the several states").

the filed rate doctrine does not apply because nothing in the Act "shall be construed to confer immunity from state or federal antitrust laws." TEX. UTIL. CODE § 39.158(b).

As an initial matter, **HN17**[] the filed rate doctrine does not provide *immunity* from antitrust liability. Square D Co. v. Niagara Frontier Tariff Bureau, Inc., 476 U.S. 409, 422, 106 S. Ct. 1922, 1929, 90 L. Ed. 2d 413 (1986) . Instead, the doctrine only acts to bar private antitrust suits seeking damages stemming from rates paid to a regulated utility. Id. Companies that engage in **[*39]** illegal antitrust activities regarding filed rates are still subject to criminal sanctions or equitable relief, neither of which TCE has sought in the instant suit. *Id.* Furthermore, the filed rate doctrine does not bar antitrust challenges based on mergers or sales of assets by regulated utilities. Town of Norwood, 202 F.3d at 422. Therefore, in accordance with the intent of the Texas Legislature, the filed rate doctrine does not confer immunity from federal or state antitrust laws.

In arguments before the Court, TCE relied on Verizon Communs., Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872 (2004) for the proposition that the savings clause found in § 39.158(b) precludes the application of the filed rate doctrine in the instant action. In *Verizon Communications, Inc.,* a case not involving the filed rate doctrine, the Supreme Court interpreted the following antitrust savings clause from the Telecommunications Act of 1996: "nothing in this Act or the amendments made by this Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust laws. **[*40]** " Verizon Communications, Inc., 124 S. Ct. at 878 (citing 47 U.S.C. § 152). The Supreme Court found that the Telecommunication Act's savings clause "barred a finding of implied immunity," *Id.,* and "preserves those claims that satisfy established antitrust standards." *Id.* The Supreme Court further stated that "just as the 1996 [Telecommunication] Act preserves claims that satisfy existing antitrust standards, it does not create new claims that go beyond existing antitrust standards; that would be equally inconsistent with the saving clause's mandate that nothing in the Act 'modify, impair, or supersede the applicability' of the antitrust laws." *Id.*

TCE argues that the savings clause found in § 39.158(b) should be interpreted in the same manner as the savings clause found in the Telecommunications Act of 1996. The Court agrees with TCE's contention. By its own terms, the savings clause in § 39.158(b) does not purport to modify the application of existing state and federal antitrust provisions that include the well-established common law defense of the file rate doctrine.

The Fifth Circuit has held that **HN18**[] for a legislature to **[*41]** "abrogate a federal common law provision … [the legislature] must speak directly to the question addressed by the common law." Resolution Trust Corp. v. Miramon, 22 F.3d 1357, 1360 (5th Cir, 1994). TCE argues that in absence of FERC regulation, the Court must look to the state legislative intent to determine the applicability of the filed rate doctrine. What TCE fails to address is that **HN19**[] the filed rate doctrine is a recognized part of federal ***antitrust law*** and the United States Congress is best situated to abrogate the filed rate doctrine. Seeing no amendments to the Sherman Antitrust Act addressing the filed rate doctrine, the Court concludes that the legislative intent of the United States Congress is that the filed rate doctrine is a valid defense to federal antitrust claims.

In conclusion, application of the filed rate doctrine in the instant action does not contravene the intent of the Texas Legislature because it does not confer immunity against antitrust liability. Additionally, the legislative intent of the Sherman Antitrust Act presumably is that the file rate doctrine is a valid defense to liability.

5. Rates Paid in the BES Market are Filed Rates

[*42] TCE also asserts that the filed rate doctrine does not bar its antitrust claims since the Texas legislature did not include a filed rate requirement in the BES market. Prior to the 1999, electricity rates were set by the state, but Senate Bill 7 created market-based rates. The First Circuit has stated that **HN20**[] the filed rate doctrine applies to market based rates. Town of Norwood, Massachusetts v. New England Power Co., 202 F.3d 408, 419 (1st Cir. 2000); *see also* Pub. Util. Dist. No. 1 v. Dynegy Power Mktg., Inc.(In re Cal. Wholesale Elec. Antitrust Litig.), 244 F. Supp. 2d 1072, 1079-80 (S.D. Cal. 2003); T&E Pastorino Nursery v. Duke Energy Trading & Mktg., L.L.C., 2003 U.S. Dist. LEXIS 16352, No. MDI 1405, 2003 WL 22110491, *4 (S.D. Cal. Aug 27, 2003); Campbell v. San Diego Gas & Elec. Co., 2001 U.S. Dist. LEXIS 24297, No. Civ. 00-2382-RHW, 2001 WL 1860381, *3 (E.D. Wash. Sept. 19, 2001). As explained in *Town of Norwod,* rates are considered filed rates and subject to agency review if the responsible regulatory agency is charged with "ensuring just and reasonable rates." *Id.* However, the court in *Town of Norwood* recognized that if "rates were truly left to the market, with no filing requirement or FERC supervision **[*43]** at all, the filed rate doctrine would by its terms no longer operate." *Id.*

In contrast, the Ninth Circuit had to decide whether insurance rates filed with Arizona and Wisconsin state regulatory agencies were entitled to protection under the filed rate doctrine. *Brown v. Ticor Title Ins. Co., 982 F.2d 386, 394 (9th Cir. 1992)*. In both states, insurance companies were required to file their insurance rates with state regulatory agencies that have the power to disprove the rates. *Id. at 393*. The Court observed that the "absence of meaningful state review allows the insurers to file any rates they want." *Id. at 394*. "If those rates were the product of unlawful activity prior to their being filed and were not subjected to meaningful review by the state, then the fact that they were filed does not render them immune from challenge." *Id.* Therefore, the filed rate doctrine was not applicable.

Unlike the insurance rates at issue in *Ticor Title,* the BES market based rates are subjected to meaningful review by PUCT. ***HN21***[] PUCT is required to ensure "safe, reliable, and reasonably priced electricity." *TEX. UTIL. CODE § 39.101(a)(1)* **[*44]** . PUCT is also required to ensure that Ancillary Services are available at "reasonable prices with terms and conditions not unreasonably preferential, prejudicial, discriminatory, predatory, or anticompetitive." *TEX. UTIL. CODE § 39.004(e)*. In addition, rates in the BES market are capped at $ 1,000 per MWh. Therefore, wholesale power rates in Texas continue to be filed with PUCT since PUCT is charged with ensuring reasonably priced electricity, and the filed rate doctrine applies to market based rates in the ERCOT-administered electricity market.

6. The Competitor Exception to the Filed Rate Doctrine Does Not Apply to TCE's Claims

Finally, TCE asserts that its antitrust claims are exempt from the filed rate doctrine as a result of the "competitor exception" to the doctrine. ***HN22***[] The "competitor exception" to the filed rate doctrine holds that "an anticompetitive practice embodied in a [filed] tariff may violate the antitrust laws if it ... impacts upon competitors as opposed to customers." *City of Groton v. Connecticut Light & Power Co., 662 F.2d 921, 929 (2nd Cir. 1981)*. As explained in *City of Groton,* "if a utility that competes **[*45]** with a wholesale customer engages in a price squeeze bi charging the wholesale customer more than its retail customers, the filed rate doctrine may not be applicable." *Id.* However, TCE does not complain of a price squeeze. "The traditional price squeeze involves a defendant who as a monopolist supplies the plaintiff at one level (e.g., wholesale), competes at another (e.g., retail), and seeks to destroy the plaintiff by holding up the wholesale price to the plaintiff while depressing the retail price to common customers." *Town of Norwood, 202 F.3d at 418*. TCE only complains of rates paid for electricity as a wholesale customer in the BES market.

TCE cites *Essential Communications Sys., Inc. v. Am. Tel. & Tel Co., 610 F.2d 1114, 1122 (3rd Cir. 1979)*, for its support of the competitor exception. In *Essential Communications,* the Third Circuit justified the competitor exception by stating:

> In this case the plaintiff is not suing in the capacity of a customer for communication services. Essential seeks recovery for injury to its business or property from actions taken by the defendants in formulating a tariff, and in rendering customer **[*46]** services. The Bell System will not be asked to disgorge to any customers any revenues derived under the filed tariff. Indeed, it can continue to collect those revenues until a new tariff is filed. There is no policy conflict, actual or potential, therefore, between the Section 4 Clayton Act remedy and the antidiscrimination purposes of the filed tariff rule.

Essential Communications, 610 F.2d at 1122. The instant suit can be distinguished from the action in *Essential Communications.* Here, TCE is requesting damages based on the rate it paid for wholesale electricity in the BES market, and Defendants will be "asked to disgorge to [TCE] any revenues derived under the filed tariff." *Id.* Therefore, the competitor exception to the filed rate doctrine does not preclude the application of the doctrine to the instant case.

7. Conclusion

TCE's federal antitrust claims are barred by the filed rate doctrine. *See e.g.,* *County of Stanislaus, 114 F.3d at 862*; *Square D Co., 476 U.S. at 424, 106 S. Ct. at 1931*; *Keogh, 260 U.S. at 165, 43 S. Ct. at 50*. In the instant action, TCE claims that it was damaged by **[*47]** having to pay higher prices for electricity in the BES market as a result of Defendant's alleged economic withholding, physical withholding, market manipulation, monopolization, attempted monopolization and/or conspiracy to monopolize.

The filed rate doctrine applies to state regulatory agencies such as PUCT and PUCT provides meaningful review 1.0 the rates on the BES market. *H.J. Inc., 954 F.2d at 494*. Therefore, the filed rate doctrine bars TCE's federal antitrust claims based on the rates it paid in Texas's regulated energy market. Accordingly, this Court grants Defendants' Motions to Dismiss TCE's Sherman Antitrust Act and Clayton Act claims pursuant to the filed rate doctrine.

C. STATE ANTITRUST CLAIMS

In its SAC, TCE alleges that Defendants violated *§ 15.10* of the TFEAA. *Sections 15.01 et seq.* of the TFEAA ***HN23***[] are the state law counterparts to federal ***antitrust law***. *Apani Southwest, Inc. v. Coca-Cola Enters., 300 F.3d 620, 628 (5th Cir. 2002)*. The Texas legislature mandates that Texas ***antitrust law*** be harmonized with federal ***antitrust law***. *TEX. BUS. & COMM. CODE § 15.04*; *see also* *Apani, 300 F.3d at 628*. **[*48]** As a result, there is no need for federal courts to analyze TFEAA claims separately from Sherman Act claims. *Johnson v. Hosp. Corp. of Am., 95 F.3d 383, 391 n.7 (5th Cir. 1996)*. Therefore, TCE's state antitrust claims under TFEAA must be dismissed pursuant to the filed rate doctrine as the Sherman Act claims have been dismissed.

D. FRAUD

HN24[] Under Texas law, to recover for fraud, the plaintiff must establish: "(1) a material representation; (2) it was false when made; (3) the speaker either knew it was false or asserted it without knowledge of its truth; (4) the speaker intended that it be acted upon; (5) the party acted in reliance; and (6) the party was injured as a result." *Malacara v. Garber, 353 F.3d 393, 403-04 (5th Cir. 2003)*

TCE alleges that the TXU Defendants, the AEP Defendants, the Texas Genco Defendants, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel committed fraud by making fraudulent and misleading statements and representations in their affidavits to the MOD. TCE contends that as a result of Defendants' fraudulent affidavits TCE continued to participate in the ERCOT and BES markets for electricity. **[*49]** Defendants move to dismiss TCE's fraud claim under the filed rate doctrine.

As with TCE's antitrust claims, TCE's fraud claim is barred by the filed rate doctrine. *Taffet, 967 F.2d at 1494-95* ***HN25***[] ("A regulated entity's alleged fraud does not create a right to a reasonable rate that exists independently of agency action. Thus, even if the filed rate is obtained through fraud, it remains true that one does not suffer the predicate 'injury to business or property' by paying the filed rate.") . The alleged damage suffered by ICE as a result of participating in the Texas electricity market stems from the rates TCE paid for electricity. Any measure of harm suffered by TCE as a result of Defendants' fraud could only be determined by calculating the amount TCE overpaid for electricity, a result barred by the filed rate doctrine. *See Transmission Agency v. Sierra Pac. Power Co., 295 F.3d 918, 933 (9th Cir. 2002)*. As the Second Circuit explained in *Wegoland:*

> If courts were licensed to enter this process under the guise of ferreting out fraud in the rate-making process, they would unduly subvert the regulating agencies authority and **[*50]** thereby undermine the stability of the system. For only by determining what world be a reasonable rate absent the fraud could a court determine the extent of the damages. And it is this judicial determination of a reasonable rate that the filed rate doctrine forbids.

Wegoland, 27 F.3d at 21.

Therefore, as a result of the filed rate doctrine, this Court grants Defendants' Motions to Dismiss TCE's fraud claim.

E. NEGLIGENT MISREPRESENTATION

HN26[] To prevail in a negligent misrepresentation action in Texas, the plaintiff must prove:

> (1) the defendant made a representation in the course of his business, or in a transaction in which he had a pecuniary interest, (2) the defendant supplied false information for the guidance of others in their business, (3) the defendant did not exercise reasonable care or competence in obtaining or communicating the information, and (4) the plaintiff suffered pecuniary loss by justifiably relying on the representation.

Great Plains Trust Co. v. Morgan Stanley Dean Witter & Co., 313 F.3d 305, 318 (5th Cir. 2002).

TCE's negligent misrepresentation claim mirrors its fraud claim. TCE claims that the **[*51]** TXU Defendants, the AEP Defendants, the Texas Genco Defendants, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel supplied false information in their affidavits filed with the MOD. TCE contends that it relied upon Defendant's affidavits to its detriment by continuing to participate in the ERCOT and BES markets fo electricity. Defendants move to dismiss TCE's negligent misrepresentation claim pursuant to the filed rate doctrine.

TCE's negligent misrepresentation claim is also barred by the filed rate doctrine. *Marcus v. AT&T Corp., 138 F.3d 46, 57-58, 64 (2nd Cir. 1998)* (stating that a claim for negligent misrepresentation was barred by the filed rate doctrine). Any award of damages on TCE's negligent misrepresentation claim would require the court to determine what the rate for electricity would have been absent Defendant's alleged conduct, a practice barred by the filed rate doctrine. *See* H.J. Inc., 954 F.2d at 488.

Therefore, pursuant to the filed rate doctrine, this Court grants Defendants' Motions to Dismiss TCZ's negligent misrepresentation claim.

F. BREACH OF CONTRACT

TCE alleges breach of contract claims **[*52]** against the TXU Defendants, the Texas Genco Defendants, the Reliant Defendants, and ERCOT. **HN27**[] The elements for breach of contract in Texis are: "1) the existence of a valid contract; 2) performance or tendered performance by the plaintiff; 3) breach of the contract by the defendant; and 4) damages to the plaintiff resulting from the breach." *Lewis v. Bank of Am., 343 F.3d 540, 545 (5th Cir. 2003)*.

1. TCE's Breach of Contract Claim against the TXU Defendants

TCE's breach of contract claim against the TXU Defendants stems from Confidentiality Agreements entered into between TCE and the TXU Defendants on August 6, 2002 and October 15, 2002. The TXU Defendants move to dismiss TCE's breach of contract claim under the filed rate doctrine. However, **HN28**[] the filed rate doctrine only applies to claims regarding the reasonableness of rates filed by a regulated industry, *see* Wegoland Ltd., 27 F.3d at 18, and TCE's breach of contract claim against the TXU Defendants does not implicate the prices it paid for electricity in the BES market.

In the instant action, TCE states a claim for relief against the TXU Defendants for breach of contract. TCE alleges that: **[*53]** (1) there were valid contracts between TCE and the TXU Defendants; (2) TCE satisfied all conditions precedent to the Confidentiality Agreements; (3) the TXU Defendants breached their confidentiality Agreements by disclosing TCE's financial and business status to both existing and prospective customers of TCE; and (4) TCE sustained damage to its business and financial reputation, lost income, lost business, and lost profits as a result of the breach by the TXU Defendants. *See* *Lewis, 343 F.3d at 545*. Therefore, TXU's Motion to Dismiss TCE's breach of contract claim pursuant to the filed rate doctrine is denied.

2. TCE's Breach of Contract Claim against the Texas Genco Defendants

The Texas Genco Defendants move for dismissal of TCE's breach of contract claim on the grounds that TCE had no contract with the Texas Genco Defendants. TCE fails to allege that a Confidentiality Agreement or any other valid contract was entered into with the Texas Genco Defendants. Therefore, TCE's breach of contract claim against the Texas Genco Defendants is dismissed for failure to allege the existence of a valid contract. *See* *Lewis, 343 F.3d at 545*. Therefore, the **[*54]** Texas Genco Defendants' Motion to Dismiss TCE's breach of contract claim is granted.

3. TCE's Breach of Contract Claim against the Reliant Defendants

The breach of contract claim against the Reliant Defendants arises from a Confidentiality Agreement entered into between TCE and the Reliant Defendants on February 27, 2003 The Reliant Defendants fail to address the breach of contract claims brought against them in their Motion to Dismiss, therefore, the Reliant Defendants' Motion to Dismiss the breach of contract claim is denied.

4. TCE's Breach of Contract Claims Against ERCOT

TCE bases its breach of contract claims against ERCOT on the "Standard Form Load Serving Entity Agreement" entered into on October 24, 2001, and the "Standard Form Qualified Scheduling Entity Agreement" entered into on July 5, 2002. TCE asserts two separate breach of contract claims against ERCOT: (1) that the defamatory statements made by Tom Noel, ERCOT's CEO, violated TCE's agreements with ERCOT and (2) that ERCOT's verbal dispatch instructions on February 25, 2003 to Defendant TXU for additional power violated TCE's agreements with ERCOT. ERCOT's Motion to Dismiss fails to address the first **[*55]** claim regarding the defamatory statements made by Tom Noel, therefore, ERCOT's Motion to Dismiss this claim is denied.

ERCOT moves to dismiss TCE's second breach of contract claim on the grounds that ERCOT did not violate its own protocols. However, TCE's breach of contract claim stemming from ERCOT's verbal dispatch instructions on February 25, 2003 to the TXU Defendants for additional power is barred by the filed rate doctrine. *See e.g.,* *ICOM Holding, Inc. v. MCI Worldcom, Inc., 238 F.3d 219, 222-23 (2nd Cir 2001)* (finding that a breach of contract claim is barred by the filed rate doctrine); *Fax Telecommunicaciones Inc. v. AT&T, 138 F.3d 479, 488 (2nd Cir. 1998)*. TCE alleges that it suffered damages in the form of higher prices in the BES energy market as a result of ERCOT's failure to follow its own protocols. Any award of damages on TCE's breach of contract claim would require the court to determine what the rate for electricity would have been absent ERCOT's alleged breach, a practice barred by the filed rate doctrine. *See* *H.J. Inc., 954 F.2d at 488*. Therefore, the Court *sua sponte* dismisses TCE's second breach of contract **[*56]** claim against ERCOT pursuant to the filed rate doctrine. It is well settled that ***HN29***[] the Court may dismiss a complaint on its own initiative for failure to state a claim where the inadequacy of the claim is apparent as a matter of law. *Guthrie v. Tifco Indus., 941 F.2d 374, 379 (5th Cir. 1991)*.

In conclusion, this Court dismisses TCE's breach of contract claim against the Texas Genco Defendants and TCE's breach of contract claim against ERCOT regarding ERCOT's verbal dispatch instructions to the TXU Defendants.

G. DEFAMATION

TCE alleges that ERCOT committed defamation when ERCOT's CEO, Tom Noel, made the following statements to the press: (1) "He doesn't know of any other company as active as TCE in the spot electricity market" (SAC P 394); (2) "TCE was in financial trouble almost a month before" (SAC P 394); (3) "TCE was briefly buying 100% of its power demand at that price, and was finally unable to meet its financial obligations" (SAC P 394); and (4) "TCE, which relied on the balancing energy market for its entire load during some periods, had charges of more than $ 5-million when balancing energy prices in ERCOT spiked." (SAC P 397.)

HN30[] To state a defamation **[*57]** claim in Texas, "the plaintiff must prove that the defendant: (1) published a statement; (2) that was defamatory concerning the plaintiff; (3) while acting with either actual malice, if the plaintiff was a public official or public figure, or negligence, if the plaintiff was a private individual, regarding the truth of the statement." *WFAA-TV, Inc. v. McLemore, 978 S.W.2d 568, 571, 41 Tex. Sup. Ct. J. 1394 (Tex. 1998)*. ERCOT moves for dismissal on the grounds that Tom Noel's statements were not defamatory or malicious.

1. Defamatory

HN31[] A statement is "defamatory if it exposes a person to public contempt or financial injury, or if it impeaches a person's reputation." *Basic Capital Mgmt., Inc. v. Dow Jones & Co., Inc., 96 S.W.3d 475, 480 (Tex. App.-Austin 2002, no pet.)*. Whether a statement is "capable of a defamatory meaning is initially a question for the court." *Turner v. KTRK Television, Inc., 38 S.W.3d 103, 114, 44 Tex. Sup. Ct. J. 244 (Tex. 2000)*. "The court construes the statement as a whole in light of surrounding circumstances based upon how a person of ordinary intelligence would perceive the entire statement." *Columbia Valley Reg'l Med. Ctr. v. Bannert, 112 S.W.3d 193, 198 (Tex. App. -Corpus Christi 2003, no pet)*. **[*58]** A statement "may be false, abusive, unpleasant, or objectionable to the plaintiff and still not be defamatory in light of the surrounding circumstances." *Columbia Valley, 112 S.W.3d at 198*. However, "when a publication is of ambiguous or doubtful import, the jury must determine its meaning." *Turner, 38 S.W.3d at 114*.

2. Mens Rea

Both TCE and ERCOT contend that the appropriate standard to be used in evaluating TCE's defamation claim is the malice standard for a public official or figure. Therefore, this court will limit its analysis to the question of whether or not ERCOT's statements were published with malice. ***HN32***[] Whether or not a statement was published by the defendant while acting with actual malice "focuses on the defendant's state of mind at the time of publication." *Forbes v. Granada Biosciences, Inc., 124 S.W.3d 167, 173, 47 Tex. Sup. Ct. J. 162 (Tex. 2003)*. To prove actual malice it must be shown that the "defendant made a statement with knowledge that it was false or with reckless disregard of whether it was true or not." *Id. at 171*. For a public figure to establish reckless disregard, **[*59]** the defendant must have "entertained serious doubts as to the truth of his publication." *Id.*

3. TCE's Defamation Claim

TCE states a claim for relief for defamation against ERCOT. In the instant case TCE alleges that ERCOT published statements; ERCOT's statements were defamatory since they injured TCE's business and financial reputation by casting TCE's financial and business position in a negative light; and ERCOT's statements were malicious since they were false, and ERCOT, as the entity under contract with PUCT to administer the BES market, had direct knowledge of TCE's financial affairs. This Court makes no prospective judgment on the merits of TCE's claim, only that TCE's claim has been adequately stated and pled. *Fed. R Civ. P. 8(a)*. Therefore, TCE states a valid claim for relief, and ERCOT's Motion to Dismiss TCE's defamation claim must be denied.

H. BUSINESS DISPARAGEMENT

TCE asserts a business disparagement claim against ERCOT. ***HN33***[] The elements of a claim for business disparagement are: (1) publication by the defendant (2) of disparaging words (3) which are false; (4) published with malice; (5) published without privilege; and (6) special damages to the plaintiff. **[*60]** *C.P. Interests, Inc. v. California Pools, Inc., 238 F.3d 690, 694 (5th Cir. 2001)*. "To prove special damages, a plaintiff must provide evidence of direct, pecuniary loss attributable to the false communications of the defendants." *Johnson v. Hosp. Corp. of Am., 95 F.2d 383, 391 (5th Cir. 1996)*. A claim for business disparagement is similar to a claim for defamation, but "defamation actions chiefly serve to protect the personal reputation of an injured party, while a business disparagement claim protects economic interest." *Forbes, 124 S.W.3d at 170*. ERCOT moves for dismissal on tie grounds that Tom Noel's statements were not defamatory, were not malicious, and did not cause special damages.

Similar to TCE's claim for defamation, TCE states a valid claim for business disparagement against ERCOT. TCE alleges that ERCOT published statements that were false, disparaging and malicious. Furthermore, ERCOT fails to allege that it had a privilege to publish the statements. TCE alleges that it suffered special damages in the form of damage to its business and financial reputation, lost income, lost business, and lost profits. Again, this Court **[*61]** makes no prospective judgment on the Merits of TCE's claim, only that TCE's claim for business displacements has been adequately stated and pled. *Fed. R. Civ. P. 8(a)*. Therefore, TCE states a valid claim for relief, and ERCOT's Motion to Dismiss TCE's business disparagement claim must be denied.

I. CIVIL CONSPIRACY

TCE alleges that the TXU Defendants, AEP Defendants, Reliant Defendants, APX, Odessa-Ector Power Partners, Guadalupe Power Partners, Frontera Generation, Tractabel Energy Marketing, Inc., and ERCOT committed civil conspiracy. ***HN34***[] Under Texas law, five elements are necessary to establish an actionable claim for civil conspiracy: "(1) two or more persons; (2) an object to be accomplished; (3) a meeting of minds on the object or course of action; (4) one or more unlawful, overt acts; and (5) damages as the proximate result." *Apani S.W., Inc. v. Coca-Cola Enters., Inc., 300 F.3d 620, 635 (5th Cir. 2002)*. In addition, TCE must plead an underlying tort for its civil conspiracy claim to be actionable. *See Tilton v. Marshall, 925 S.W.2d 672, 681, 39 Tex. Sup. Ct. J. 985 (Tex. 1996)*

The TXU Defendants move to dismiss TCE's civil **[*62]** conspiracy claim pursuant to the filed rate doctrine. The AEP Defendants, the Texas Genco Defendants, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel move to dismiss TCE's civil conspiracy claim for failure to plead an underlying tort. In its SAC, TCE alleges that the underlying tort supporting its civil conspiracy claim against the TXU Defendants, the AEP Defendants, the Texas Genco Defendants, the Reliant Defendants. APX, TES, the TIE Defendants, Frontera, and Tractebel is fraud. Is stated above, TCE's fraud claim has been dismissed, and the AEP Defendants, the Texas Genco Defendants, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel's Motions to Dismiss TCE's civil conspiracy claim must be granted. *See Tilton, 925 S.W.2d at 681*. In addition, the Court *sua sponte* dismisses TCE's civil conspiracy claim against the TXU Defendants for failure to plead an underlying tort.

ERCOT moves to dismiss TCE's conspiracy claim on the grounds that TCE's underlying tort claim fails and TCE failed to set forth facts demonstrating that Defendants had a meeting of minds. TCE alleges that the underlying tort supporting its **[*63]** civil conspiracy claim against ERCOT is both defamation and business disparagement. Since TCE's defamation and business disparagement claims against ERCOT are not dismissed, TCE succeeds in pleading an underlying tort. In addition, TCE pleads that ERCOT had a meeting of the minds with Defendants to remove TCE from the Texas electricity market, and that TCE suffered damage as a result of ERCOT's defamation and business disparagement. *See Apani, 300 F.3d at 635*. Therefore, ERCOT's Motion to Dismiss TCE's civil conspiracy claim is denied.

J. ERCOT' S MOTION TO STAY

ERCOT moves to stay the instant case pursuant to either the doctrine of primary jurisdiction or the *Burford* abstention doctrine. In light of the fact that this Court is dismissing TCE's complaint, this Court denies ERCOT's Motion to Stay the proceedings as moot.

K. TCE's MOTION TO AMEND

TCE requests leave to amend its complaint. *Rule 15(a) of the Fed. R. Civ. P.* ***HN35***[] states that leave "shall be freely given when justice so requires." *Fed. R. Civ. P. 15(a)*. TCE does not explain what amendments it would like to make to the SAC and how any amendment would **[*64]** save the claims that are dismissed by this Order. Given the fact that TCE has twice previously amended its complaint, the Court does not find granting TCE leave to amend its complaint a third time to be in the interest of justice. *See United States v. Regents of the Univ. of California, 363 F.3d 398. 403 (5th Cir. 2004)* (stating that leave to amend may be denied for "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc."). Therefore, TCE's request for leave to amend its complaint is denied.

IV. CONCLUSION

For the reasons stated above, Defendants' Motions to Dismiss are granted in part. This Court DISMISSES the following claims: TCE's *§§ 1and 2* of the Sherman Antitrust Act, and *§ 15.05 (a)-(c)* and *§ 15.10 of the TFEAA* claims against all Defendants; TCE's fraud claims against all Defendants; TCE's negligent misrepresentation claims against all Defendants; TCE's breach of contract claim against the Texas Genco Defendants; TCE's breach of contract claim against **[*65]** ERCOT regarding ERCOT's verbal dispatch instructions to TXU; and TCE's civil conspiracy claim against the TXU Defendants, the AEP Defendants, the Texas Genco Defendant, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel.

Because the federal action has been dismissed, this Court declines supplemental jurisdiction over TCE's remaining state law claims. *See 28 U.S.C. § 1367(c) (3)*; *see also Priester v. Lowndes County, 354 F.3d 414, 425 (5th Cir. 2004)*. In addition, this Court does not possess diversity jurisdiction over TCE's remaining state law claims since TCE, the TXU Defendants, and ERCOT are all citizens of Texas. See *28 U.S.C. § 1332 (a)(1)*; *see also Corfield v. Dallas Glen Hills LP, 355 F.3d 853, 857 (5th Cir. 2003)*. Therefore, the following causes of action are DISMISSED *without* prejudice: TCE's breach of contract claims against the TXU Defendants, the Reliant Defendants, and ERCOT regarding Tom Noel's statements; TCE's defamation claim against ERCOT; TCE's business disparagement claim against ERCOT; and TCE's civil conspiracy claim against ERCOT. In addition, **[*66]** both ERCOT's Motion to Stay and TCE's Motion to Amend are DENIED.

SIGNED and ENTERED on this the *24th* day of June, 2004.

/s/ JANIS GRAHAM JACK

UNITED STATES DISTRICT JUDGE

FINAL JUDGMENT

Pursuant to this Court's Order Granting in Part Defendants' Motions to Dismiss, the Court hereby ENTERS Final Judgment.

The following causes of action are dismissed: TCE's *§§ 1and 2* of the Sherman Antitrust Act, and *§ 15.05(a)-(c)* and *§ 15.10 of the TFEAA* claims against all Defendants; TCE's fraud claims against all Defendants; TCE's negligent misrepresentation claims against all Defendants; TCE's breach of contract claim against the Texas Genco Defendants; TCE's breach of contract claim against ERCOT regarding ERCOT's verbal dispatch instructions to TXU; and TCE's civil conspiracy claim against the TXU Defendants, the AEP Defendants, the Texas Genco Defendants, the Reliant Defendants, APX, TES, the TIE Defendants, Frontera, and Tractebel.

The following causes of action are DISMISSED *without* prejudice: TCE's breach of contract claims against the TXU Defendants, the Reliant Defendants, and ERGOT regarding Tom Noel's statements; TCE's defamation claim against ERGOT; TCE's **[*67]** business disparagement claim against ERGOT; and TCE's civil conspiracy claim against ERGOT.

SIGNED and ENTERED on this the *24th* day of June, 2004.

Opinion

[*1046] ON REMAND FROM THE SUPREME COURT OF THE UNITED STATES

BARKETT, Circuit Judge:

[*] Honorable Shelby Highsmith, United States District Judge for the Southern District of Florida, sitting by designation.

After our decision in this case was issued on August 2, 2002, *Covad Communications Co. v. BellSouth Corp., 299 F.3d 1272 (11th Cir. 2002)*, the Supreme Court vacated our judgment and remanded for further consideration in light of its recent decision in *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872 (2004)*. Having carefully reviewed this opinion, we find that *Trinko*'s interpretation of *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*, the leading case finding liability under *§ 2 of the Sherman Act* for refusal to cooperate with a rival, now forecloses several **[**2]** (but not all) of Covad's claims. Other claims are now barred by our recent en banc decision in *BellSouth Telecommunications, Inc. v. MCIMetro Access Transmission Services, Inc., 317 F.3d 1270 (11th Cir. 2003)* ("MCIMetro II").

This suit was brought by Covad, a DSL internet service provider, against BellSouth, a regional telephone service provider that also sells DSL service. Covad and BellSouth entered into an interconnection agreement pursuant to the 1996 Federal Telecommunications Act ("FTCA") to allow Covad to provide DSL service over BellSouth's existing telephone lines. Covad alleged that BellSouth had engaged in exclusionary conduct that violated the Sherman Antitrust Act, the FTCA, and various state anti-monopoly statutes. Covad also made various state breach of contract and tortious interference with business relations claims. [1]

[3]** On BellSouth's 12(b)(6) motion to dismiss for failure to state a claim, the trial judge threw out all of the counts relating to the Sherman Act except for two, allowing Covad to proceed with its allegations of predatory advertising and monopoly leveraging. The district court also allowed Covad's counts under state ***antitrust law*** and state law for tortious interference with business relations. [2] All other causes of action, the district court found, addressed **[*1047]** conduct implicated by the FTCA, and as such failed to state claims under the Sherman Act.

On appeal, we held first that the FTCA's savings clause, [3] as well as evidence of congressional and executive intent, unambiguously showed that there was no plain repugnancy between the FTCA and the Sherman Act, and thus that there could be no implied repeal of or immunity from the antitrust **[**4]** laws.

Second, in reviewing the district court's ruling that Covad had failed to state an antitrust claim, we found that Covad's causes of action under the Sherman Act fell into three kinds of alleged anticompetitive conduct: denial of the use of "essential facilities" (the network of phone lines); a refusal to deal; and price squeezing. [4] The first two categories of conduct (essential facilities and refusal to deal) relied on the same set of alleged facts: sometimes an outright denial of access to BellSouth's network and facilities, sometimes a denial of access on reasonable terms, with monopolistic intent. We concluded that, on a motion to dismiss, Covad had pleaded facts sufficient to meet the "exceedingly low" threshold for stating an antitrust **[**5]** claim with respect to all three categories of conduct. *Quality Foods de Centro Am., S.A. v. Latin Am. Agribusiness Dev. Corp., S.A., 711 F.2d 989, 995 (11th Cir. 1983)*. We also reversed the district court's dismissal of Covad's breach of contract, FTCA, and tortious interference with business relations claims. [5] We now revisit Covad's claims in light of Trinko.

---

[1] Only one of Covad's twenty-four counts relied directly and explicitly on the FTCA: count four, misappropriation of confidential customer information.

[2] The parties later stipulated to the dismissal with prejudice of all of these surviving counts. A judgment dismissing the action in its entirety was issued on October 11, 2001.

[3] ***HN1***[] The FTCA provides that "nothing in this Act or the amendments made by this Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust laws." ***Telecommunications Act of 1996, sec. 601(b)(1), § 152 note, 110 Stat. 56, 143 (1996)***.

[4] We treated Covad's monopoly leveraging claim as a theory that applied to all three categories of BellSouth's alleged anticompetitive conduct, rather than as a distinct count. As for Covad's predatory advertising claim, we note only that Trinko does not seem to bar Covad from proceeding with this cause of action, assuming that it not implicate any duties under the FTCA.

[5] The district court dismissed the breach of contract and FTCA claims for lack of jurisdiction, finding that they must first be presented to state public service commissions (PSCs). In reversing these dismissals, we relied on *BellSouth Telecomms., Inc. v.*

[6]** I. Trinko

We begin by noting that the Court in Trinko approved our view that ***HN2***[] the FTCA savings clause barred a finding of implied antitrust immunity. *Trinko, 124 S. Ct. at 878*. Thus, it is now clear that the FTCA and the Sherman Act were expressly intended to coexist. Emphasizing that the FTCA also does not create new claims that go beyond existing antitrust standards, id., the Court then proceeded to consider whether the conduct of which Trinko complained violated the Sherman Act.

Trinko originated in a complaint brought by AT&T and other competitive local exchange carriers ("CLECs") before the New York Public Service Commission ("PSC") and the Federal Communications Commission ("FCC"). The complaint alleged that Verizon, the incumbent LEC in New York state, had failed to fulfill its obligations under *47 U.S.C. § 251(c)(3)* to provide access to Verizon's operations support systems ("OSS"), one of several "unbundled **[*1048]** network elements." OSS access allows a CLEC to relay orders for service through an electronic interface with Verizon's ordering system, thus enabling a CLEC to fill its customers' orders. Trinko alleged that **[**7]** Verizon had delayed the filling of, or neglected to fill at all, CLEC customer orders. The FCC and the New York PSC opened parallel investigations of Verizon that led to a series of PSC orders and an FCC consent decree. The day after Verizon entered its consent decree with the FCC, one of AT&T's customers, the Trinko law firm, brought a claim under *§ 2 of the Sherman Act*. Trinko argued that Verizon's failure to fulfill its *§ 251(c)(3)* obligations was part of an anti-competitive scheme to discourage customers from becoming or remaining clients of CLECs. Such conduct, Trinko alleged, constituted a refusal to deal with rival firms under *§ 2 of the Sherman Act*. As the Supreme Court describes it, Trinko's complaint set forth only a single example of the alleged failure to provide adequate access: the discriminatory handling of CLEC customer orders that led to the PSC and FCC investigations.

The Court held, first, that Trinko failed to state a recognized Sherman Act claim under existing refusal-to-deal precedents. *Trinko, 124 S. Ct. at 880*. The Court found that Verizon's failure to provide OSS assistance to AT&T did not amount to an effort at monopolization. Rejecting **[**8]** Trinko's reliance on Aspen, the Court noted that Aspen was "at or near the outer boundary of § 2 liability." *Id. at 879*. The case before the Court involved none of the Aspen indicators of anticompetitive conduct and so did not fit within Aspen's "limited exception." *Id. at 880*.

In particular, the Court observed that Aspen involved a unilateral termination of a "voluntary (*and thus presumably profitable*) course of dealing." Id. (emphasis in original). But Trinko's complaint, the Court noted, "does not allege that Verizon voluntarily engaged in a course of dealing with its rivals, or would ever have done so absent statutory compulsion." Thus, Verizon's "prior conduct sheds no light upon the motivation of its refusal to deal." Id. Furthermore, the two cases differed in terms of pricing behavior. In Aspen the defendant's rejection of an offer to sell its services to a competitor "*even if compensated at retail price*," id. (emphasis in original), could support the requisite inference of monopolistic intent. By contrast, Verizon's reluctance to interconnect at the cost-based rate of compensation under *§ 251(c)(3)* **[**9]** is a neutral fact that does not support an inference of monopolistic intent. Id.

More fundamentally, the Court found that Aspen involved a defendant whose failure to sell even at retail cost to a competitor was a failure to sell otherwise publicly marketed services. In the case before it, the Trinko Court noted, "the services allegedly withheld are not otherwise marketed or available to the public." *Id. at 880*. The FTCA had created a "brand new" sharing obligation: "the wholesale market for leasing network elements." Id. (quoting *Verizon Communs., Inc. v. FCC, 535 U.S. 467, 528, 152 L. Ed. 2d 701, 122 S. Ct. 1646 (2002)*).

In support of its § 2 claims, Trinko also argued that Bell Atlantic failed to provide AT&T with access to its "essential facilities." The Trinko Court rejected this argument to the extent that it was distinct from Trinko's general § 2 argument. *Trinko, 124 S. Ct. at 881*. Despite having been invoked by some lower courts, observed Justice Scalia, this doctrine has never been recognized by the Supreme Court as established law, and in any case AT&T was not in fact deprived of such access. *Id. at 880-81* **[**10]** (relying on P. Areeda **[*1049]** & H. Hovenkamp, ***Antitrust***

MCIMetro Access Transmission Servs. , 278 F.3d 1223 (11th Cir. 2002) ("MCIMetro I"), which held that the state PSCs did *not* have jurisdiction to interpret and enforce interconnection agreements under the FTCA. Having found that the FTCA savings clause did not supersede other state or national laws, we reversed the trial judge's dismissal of the state law tortious interference claims as preempted by the FTCA.

Law (2003 Supp.), for the proposition that essential facilities claims should be denied where a state or federal agency has the power to compel and regulate sharing).

In the final part of its opinion, the Court observed that the FTCA created a broad and detailed regulatory environment that effectively abrogated the need for antitrust scrutiny in the case before it. The PSC and FCC investigations, orders, and consent decree in Trinko showed that the FTCA's distinctive regulatory regime was working just as Congress intended it to. The Court stated that federal courts are ill-equipped to handle cases alleging violations of 251(c)(3) duties to provide access because such allegations involve complex and constantly changing interactions between competitive and incumbent LECs. Antitrust courts should not be in the business of supervising highly detailed decrees on an ongoing basis. The Court noted that the FTCA does not authorize judges to invoke the Sherman Act in this context; rather, the 1996 act is itself an effective and even more ambitious mechanism for regulating the telecom industry. *Trinko, 124 S. Ct. at 881-83.* **[**11]** The FTCA attempts nothing less than to "eliminate the monopolies enjoyed by the inheritors of AT&T's local franchises." *Id. at 883* (quoting *Verizon, 535 U.S. at 476*). By contrast, *§ 2 of the Sherman Act* seeks merely "to prevent *unlawful monopolization*." *Trinko, 124 S. Ct. at 883* (emphasis in original). [6]

II. Covad's Claims after Trinko

As noted, we grouped Covad's Sherman Act claims into three forms of alleged anticompetitive conduct: refusal to deal, essential facilities, and price squeezing.

Trinko requires us, first, to reconsider whether Covad's refusal-to-deal allegations, if true, would state an antitrust claim under the "limited exception" of Aspen. *Trinko, 124 S. Ct. at 880*. In our earlier opinion, we distinguished Aspen from the instant case by **[**12]** noting that Covad was both customer and competitor of BellSouth, whereas the Aspen parties were solely competitors of each other. *Trinko*, however, treats the interconnection agreement between AT&T and Verizon as a mandatory accord between competitors, not a voluntary agreement between customers. *Trinko, 124 S. Ct. at 880*. That Verizon also supplies wholesale unbundled network elements at a cost-based rate to AT&T does not, in the Court's view, make the relationship a non-competitive one. ***HN3***[] Moreover, Trinko now effectively makes the unilateral termination of a voluntary course of dealing a requirement for a valid refusal-to-deal claim under Aspen. The relationship between AT&T and Verizon was mandated by the FTCA, and thus cannot be said to have initiated a "voluntary" course of dealing, profitable or otherwise. For the same reason, Verizon cannot be said to have failed to make available to AT&T otherwise publicly marketed services, whether at retail or a lower cost. Trinko emphasizes the coercive effect of the FTCA on incumbent LECs such as Verizon who - but for the FTCA - would not be required to make their network elements (including OSS) available **[**13]** to third parties such as AT&T. In short, Covad's refusal-to-deal claims do not survive Trinko and must be dismissed.

We consider next whether our application of the essential facilities doctrine to Covad's claims under this theory satisfies *Trinko*. Our earlier opinion quoted *Blue Cross & Blue Shield United of Wisconsin* ***[*1050]*** *v. Marshfield Clinic, 65 F.3d 1406, 1413 (7th Cir. 1995)*, to the effect that the essential facilities doctrine has been endorsed by the Supreme Court and remains valid until rejected by it. In Trinko, however, the Court stated that it would neither endorse nor reject the essential facilities doctrine. *Trinko, 124 S. Ct. at 881*. By contrast, the Court does endorse the view of two antitrust scholars that ***HN4***[] the doctrine is only viable where there is indeed unavailability of access. Id. Where a state or federal agency is authorized to compel access to a competitor's infrastructure, as under the FTCA, Trinko states that an essential facilities claim should be denied. Id. Thus, Covad's allegations under the essential facilities doctrine also fail to survive Trinko.

Third, we must consider whether Covad's price squeezing **[**14]** allegations are now a matter for FTCA regulatory enforcement rather than ***antitrust law***. As to these allegations, Trinko does not offer any definitive guidance. The plaintiffs' amended complaint in Trinko did not state any price squeezing claims, and the Court did not specifically address the issue in its opinion. BellSouth argues that the Fourth Circuit dismissed a price squeezing claim similar

---

[6] In a concurring opinion, Justices Stevens, Souter, and Thomas found that Trinko had no standing to bring an antitrust claim in this case. Only AT&T could do so.

to Covad's in *Cavalier Telephone, LLC v. Verizon Virginia, Inc., 330 F.3d 176, 181, 190 (4th Cir. 2003)*, and that the Supreme Court's denial of certiorari in that case, *124 S. Ct. 1144, 157 L. Ed. 2d 1041 (2004)*, supports affirming the district court's judgment in the instant case. But ***HN5***[] the "denial of a writ of certiorari imports no expression of opinion upon the merits of the case." *United States v. Carver, 260 U.S. 482, 43 S. Ct. 181, 182, 67 L. Ed. 361 (1923)*.

We believe Covad's price squeezing claim survives because it is based on traditional antitrust doctrine and is not specifically barred by *Trinko*. As such, however, ***HN6***[] Covad's complaint must contain allegations that the two basic prerequisites for a showing of price predation under *§ 2 of the Sherman Act* **[**15]** have been met. *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (finding that the prerequisites for recovery on a claim of price predation under *§ 2 of the Sherman Act* are the same as those for recovery on a claim of price discrimination under the Robinson-Patman Price Discrimination Act, *15 U.S.C. § 13(a)*). First, Covad must allege that "the prices complained of are below an appropriate measure of its rival's costs." *Brooke Group, 509 U.S. at 222*. Second, Covad must allege that BellSouth had "a dangerous probability[] of recouping its investment in below-cost prices." *Id. at 224*. Rereading Covad's complaint, we find that the allegations contained therein, although not as closely tied to these two prerequisites as they could have been, are sufficient to state a claim under *§ 2 of the Sherman Act*.

With respect to the first requirement, Covad alleges that

> The wholesale prices BellSouth offers to ISPs for DSL service, as well as its retail prices for combined DSL and Internet access service, are set so low relative to its unbundled wholesale loop **[**16]** prices that Covad cannot meet BellSouth's wholesale or retail prices and still make a reasonable return on its investment. If Covad charged retail DSL/Internet access customers the same price as BellSouth does, or charged comparable wholesale DSL prices, Covad could not recover the cost of providing the service, e.g., loop costs, collocation costs, transport costs, corporate overhead and sales and market costs.

[*1051] Covad Complaint at P 92. Whether the last sentence in this passage reflects "an appropriate measure of [BellSouth's] costs," *Brooke Group, 509 U.S. at 222*, is a factual matter for the district court to determine at a later stage of proceedings. For purposes of the pleading stage, Covad's complaint meets the first *Brooke Group* prerequisite for a showing of price predation.

With respect to the recoupment requirement, Covad alleges that

> If BellSouth had charged itself the same wholesale price for loops, BellSouth could not make a profit from its DSL service at current prices. . . BellSouth achieves the unlawful price squeeze by allocating costs so as to apportion only a *de minimis* cost to the loops over which it provides its own DSL service. **[**17]** . . As the costs are presently allocated, BellSouth must necessarily realize a significantly higher profit margin on its wholesale sales (for which it faces no competition) than it does on the corresponding retail sales (for which Covad is attempting to compete). BellSouth intended this artifical cost allocation to harm Covad, and it did.

Covad Complaint at PP 93-95. These allegations suggest that BellSouth is compensating for deliberately reduced profits on the retail end of its operations with correspondingly greater profits on the wholesale side, in order to stifle competition from firms such as Covad that are both wholesale customers and retail rivals. We find that these allegations are sufficient to allege "a dangerous probability" that BellSouth will "recoup[] its investment in below-cost prices." *Brooke Group, 509 U.S. at 224*. Whether the facts contained in Covad's complaint and in the record will bear out the recoupment allegation against BellSouth is also a matter for the district court to determine at a later stage, not on the basis of a motion to dismiss for failure to state a claim. Taken together, Covad's price predation allegations meet the **[**18]** "exceedingly low" threshold of sufficiency that a complaint must meet to survive a 12(b)(6) motion. *Quality Foods, 711 F.2d at 994-95* (finding that ***HN7***[] "we must accept the facts pleaded as true and construe them in a light favorable to plaintiffs").

Nor are Covad's price squeezing claims barred by Trinko's discussion of the FTCA's regulatory priority over ***antitrust law*** enforcement. See *Trinko, 124 S. Ct. at 882* (finding the FTCA regime to be "an effective steward of the antitrust function"). The Trinko Court observed that *HN8*[] federal courts are ill-equipped to manage the complicated disputes over *§ 251(c)(3)* duties that frequently arise out of telecom interconnection agreements. *Id. at 882-83* (finding that the costs of antitrust intervention in this context exceed the benefits and stating that "an antitrust court is unlikely to be an effective day-to-day enforcer of [the FTCA's] detailed sharing obligations"). Instead, courts should defer to the FTCA's preexisting regulatory framework rather than try to adjudicate complex Sherman Act lawsuits in the telecommunications area.

Here, we find that Covad's price squeezing claims depend **[**19]** upon Covad's FTCA-mandated interconnection agreement with BellSouth only in a circular sense. Covad alleges that the wholesale prices BellSouth charges ISPs for DSL service, and the retail prices it charges individual customers for combined DSL and Internet access service, are significantly lower than the unbundled wholesale loop prices BellSouth charges Covad and other CLECs pursuant to the interconnection agreement. If it is true that the wholesale prices BellSouth is charging ISPs for DSL service, and the **[*1052]** retail prices it is charging individual customers for combined DSL and Internet service, are "below an appropriate measure of [BellSouth's] costs," *Brooke Group, 509 U.S. at 222*, that fact suffices to satisfy the first prong of a price predation offense under *§ 2 of the Sherman Act. As* noted above, whether the unbundled wholesale loop prices BellSouth charges Covad pursuant to the interconnection agreement are the "appropriate measure of [BellSouth's] costs" is a matter for the trier of fact to determine. That these two measures may be the same does not somehow immunize BellSouth from the application of traditional antitrust principles. The unbundled wholesale **[**20]** loop prices that BellSouth charges Covad are made available to Covad pursuant to *§ 251(c)(3)* and *§ 252* of the FTCA. *HN9*[] *Section 251(c)(3)* requires BellSouth

> to provide . . . nondiscriminatory access to network elements on an unbundled basis . . . on rates . . . that are just, reasonable, and nondiscriminatory in accordance with . . . this section and section 252 of this title.

Section 252(d)(1), in turn, provides that

> *HN10*[] determinations by a State commission of the just and reasonable rate for . . . network elements for purposes of subsection (c)(3) of [section 251] shall be based on the cost (determined without reference to a rate-of-return or other rate-based proceeding) of providing the . . . network element . . . and nondiscriminatory, and may include a reasonable profit.

As this language makes clear, *HN11*[] the FTCA employs the same baseline standard - namely, "cost" - for determining the validity of an ILEC's prices as does the Brooke Group antitrust test of price predation, which asks whether "the prices complained of are below an appropriate measure of its rival's costs." *Brooke Group, 509 U.S. at 222*. Thus, the at-cost measure that **[**21]** Covad invokes for purposes of stating a predatory pricing claim is tied to the FTCA only in a very formal, circular sense. To say that Covad's price squeezing claim defines the "appropriate measure of [BellSouth's] costs," id., in terms of an obligation created by the FTCA is to say very little when the FTCA itself relies upon "cost" as the appropriate measure by which to determine interconnection and network element rates. We conclude that Covad's price squeezing claim is based on traditional antitrust standards. As the Trinko Court noted, *HN12*[] while the FTCA "does not create new claims that go beyond existing antitrust standards," it also "preserves claims that satisfy existing antitrust standards." *Trinko, 124 S. Ct. at 878*. Our responsibility under Trinko to harmonize the Sherman Act and the FTCA does not entail excluding facially valid antitrust claims at the pleadings stage. [7]

[22]** We turn next to Covad's FTCA and state law breach of contract causes of action. Neither of these is affected by the Trinko decision. As noted earlier, the district court dismissed these claims on the ground that they

---

[7] It is true that the same set of facts that Covad cites in support of its price squeezing claim might also be actionable under the FTCA. If BellSouth has sold (or is now selling) wholesale DSL service to ISPs at prices lower than those it charges Covad, as Covad alleges, BellSouth may well have violated the *§ 252(d)(1)* requirement of "nondiscriminatory" pricing for unbundled network elements. But such a claim - which Covad has not made in this case - would involve a dispute over the terms of the FTCA-mandated interconnection agreement between BellSouth and Covad. As we explain below, pursuant to MCIMetro II, a claim directly under the FTCA must be brought in the first instance before the relevant state PSCs.

must first be brought before a state PSC. In our initial opinion **[*1053]** in this case, we reversed the trial court's dismissal in light of our holding in *MCIMetro I, 278 F.3d at 1237* (holding that state PSCs are not authorized by *§ 252* of the FTCA to interpret interconnection agreements). In a subsequent en banc opinion, however, we overturned this judgment and held that ***HN13***[] state PSCs do have jurisdiction to adjudicate disputes over and interpret the terms of FTCA-mandated interconnection agreements. *MCIMetro II, 317 F.3d 1270*. Covad may now bring those claims before the relevant state PSCs, and judicial review of state PSC determinations is available in the federal courts pursuant to *47 U.S.C. § 252(e)(6)*. Accordingly, we now affirm the trial court's dismissal of Covad's FTCA and state law breach of contract causes of action.

Finally, we find that Covad's state law claims for tortious interference with business relations **[**23]** are wholly untouched by Trinko. These claims do not implicate any obligations arising under Covad's interconnection agreement with BellSouth, and so Covad may proceed with those claims after Trinko as before.

To summarize, in light of *Trinko* we now affirm the district court's dismissal of Covad's refusal to deal and essential facilities claims. In light of *MCIMetro II*, we now also affirm the district court's dismissal of Covad's FTCA and state law breach of contract claims. As in our earlier opinion, however, we reverse the district court's dismissal of Covad's price squeezing and tortious interference with business relations claims. This case is now remanded to the district court for further proceedings consistent with this opinion.

AFFIRMED IN PART, REVERSED IN PART, AND REMANDED.

HN2[] **Defenses, Demurrers & Objections, Affirmative Defenses**

The purpose of a special defense is to plead facts that are consistent with the allegations of the complaint but demonstrate, nonetheless, that the plaintiff has no cause of action. The purpose of a motion to strike is to contest the legal sufficiency of any answer, including any special defense contained therein. *Conn. Gen. Prac. Book, R. Super. Ct. § 10-39(a)(5)*.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN3[] **Standards of Review, De Novo Review**

Because a motion to strike challenges the legal sufficiency of a pleading and, consequently, requires no factual findings by a trial court, an appellate court's review of the court's ruling on a plaintiff's motion is plenary. The appellate court takes the facts to be those alleged in the complaint that has been stricken and it construes the complaint in the manner most favorable to sustaining its legal sufficiency. Thus, if facts provable in the complaint would support a cause of action, the motion to strike must be denied. Moreover, what is necessarily implied in an allegation need not be expressly alleged. It is fundamental that in determining the sufficiency of a complaint challenged by a defendant's motion to strike, all well-pleaded facts and those facts necessarily implied from the allegations are taken as admitted. Indeed, pleadings must be construed broadly and realistically, rather than narrowly and technically. Where the legal grounds for such a motion are dependent upon underlying facts not alleged in the plaintiff's pleadings, the defendant must await the evidence which may be adduced at trial, and the motion should be denied.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN12[] **Consumer Protection, State Law**

The Federal Credit Reporting Act recognizes that a consumer may bring an action under state common law for defamation, slander or invasion of privacy, and negligence, but only if the consumer proves malice or willful intent to injure such consumer. That is, *15 U.S.C.S. § 1681h(e)* grants consumer reporting agencies, users of consumer reports, and furnishers of information qualified immunity from state law claims of this nature. *Section 1681h(e)* is therefore not a grant of federal subject matter jurisdiction, but rather creates a defense a consumer must overcome to succeed on a state law claim against someone acting in a capacity that is regulated by the Act.

Banking Law > Consumer Protection > Fair Credit Reporting > General Overview

Torts > Negligence > Proof > General Overview

Torts > Negligence > General Overview

HN13[] **Consumer Protection, Fair Credit Reporting**

Some courts have held that applying *15 U.S.C.S. § 1681h(e)* to a negligence claim would require a plaintiff to show that a defendant acted negligently and with malice or willful intent to injure. This results in a requirement that a plaintiff prove intentional or malicious negligence. This level of negligence is inherently contradictory in that negligence does not include an element of intent. In fact, intentional negligence is an oxymoron. A wilful and malicious injury is one inflicted intentionally without just cause or excuse. It does not necessarily involve the ill will or malevolence shown in express malice. Nor is it sufficient to constitute such an injury that the act resulting in the injury was intentional in the sense that it was the voluntary action of the person involved. Not only the action producing the injury but the resulting injury must be intentional. A wilful or malicious injury is one caused by design. Willfulness and malice alike import intent. Its characteristic element is the design to injure either actually entertained or to be implied from the conduct and circumstances.

Torts > Intentional Torts > Invasion of Privacy > Defenses

Torts > Procedural Matters > Preemption > General Overview

Torts > Public Entity Liability > Immunities > Qualified Immunity

HN14[] **Consumer Protection, Fair Credit Reporting**

The Federal Credit Reporting Act's two separate preemption provisions are contained in *15 U.S.C.S. § 1681t(b)(1)(F)*, which provides furnishers of credit with absolute immunity when filling their obligations under *15 U.S.C.S. § 1681s-2*; and *15 U.S.C.S. § 1681h(e)*, which provides furnishers of credit information with qualified immunity from suits "proceeding in the nature of defamation, invasion of privacy, or negligence." Importantly, Congress added the first, more sweeping, *15 U.S.C.S. § 1681t(b)(1)(F)* language in a series of 1996 amendments. Those amendments made no mention of the earlier *15 U.S.C.S. § 1681h(e)* language. The tension between these two provisions therefore results from the fact that *§ 1681h(e)* permits state tort claims, but requires a higher standard of proof for those in the nature of defamation, slander, or invasion of privacy, while *15 U.S.C.S. § 1681t(b)(1)(F)* prohibits all state claims covered by *15 U.S.C.S. § 1681s-2*.

Banking Law > Consumer Protection > Fair Credit Reporting > General Overview

Constitutional Law > Supremacy Clause > General Overview

Torts > Procedural Matters > Preemption > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN15[] **Consumer Protection, Fair Credit Reporting**

Several district courts around the country have considered how and when to apply each preemption provision of the Federal Credit Reporting Act (FCRA) to pendent state common-law claims. Three approaches have emerged from these district courts. The first approach is to interpret *15 U.S.C.S. § 1681t(b)(1)(F)*, which was added to the FCRA after *15 U.S.C.S. § 1681h(e)*, as completely subsuming *§ 1681h(e)*. This approach, which would call for preemption of all pendent state law claims, has been rejected by at least one court because Congress left *§ 1681h(e)* in place when it added *15 U.S.C.S. § 1681t(b)(1)(F)*. The second approach is to read *15 U.S.C.S. § 1681h(e)* as applying to state tort actions and *15 U.S.C.S. § 1681t(b)(1)(F)* as applying to state statutory regulation. The third approach, called the temporal approach, has been applied most often.

Banking Law > Consumer Protection > Fair Credit Reporting > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN16[] **Consumer Protection, Fair Credit Reporting**

The temporal analysis approach to determining preemption of state common-law claims under the Federal Credit Reporting Act relies on the language of *15 U.S.C.S. § 1681t(b)(1)(F)* itself to conclude that *§ 1681t(b)(1)(F)* should only be used to preempt state actions premised upon a credit furnisher's conduct occurring after the furnisher receives notice of a dispute. *Section 1681t(b)(1)(F)* states, in part, that no requirement or prohibition may be imposed under the laws of any State with respect to any subject matter regulated under *15 U.S.C.S. § 1681s-2*, relating to the responsibilities of persons who furnish information to consumer reporting agencies. *Section 1681s-2*, in turn, only regulates conduct of furnishers of information after the furnishers have been either notified by the consumer that specific information is inaccurate, or notified by a consumer reporting agency that a dispute over the accuracy of information has arisen. Because the conduct regulated by *§ 1681s-2* has a temporal component and *15 U.S.C.S. § 1681t(b)(1)(F)* is based on *15 U.S.C.S. § 1681s-2*, it follows that the application of *15 U.S.C.S. § 1681t(b)(1)(F)* likewise depends on when the furnisher of information received notice of a dispute.

Banking Law > Consumer Protection > Fair Credit Reporting > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN17[] **Consumer Protection, Fair Credit Reporting**

The bottom line of the temporal analysis approach to determining preemption of state common-law claims under the Federal Credit Reporting Act is that preemption of state law claims arising before the furnisher of information receives notice of the dispute is governed by *15 U.S.C.S. § 1681h(e)* and preemption of state law claims arising after such a time is governed by *15 U.S.C.S. § 1681t(b)(1)(F)*.

Banking Law > Consumer Protection > Truth in Lending > Liability for Violations

Governments > Legislation > Statute of Limitations > Time Limitations

Banking Law > Consumer Protection > Truth in Lending > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN24[] **Truth in Lending, Liability for Violations**

A consumer's rights under the Truth in Lending Act, *15 U.S.C.S. § 1601 et seq.*, are subject to a one-year limitation period that begins to run "from the date of the occurrence of the violation." *15 U.S.C.S. § 1640(e)*. Most of the reported cases which have considered the limitation provision of the Act have done so in the context of "close end" credit transactions. As a general rule the disclosures required by the Act are revealed to the consumer at the time the contract for the extension of credit is executed or, at the very latest, at the time of performance. Thus there is a specific time at which a violation occurs and a court can use that occurrence as the point from which the limitation period begins to run.

Banking Law > Consumer Protection > Truth in Lending > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN25[] Consumer Protection, Truth in Lending

An open end credit arrangement is distinguishable on several grounds from a close end transaction and necessitates a different rationale in applying the limitation provision of the Truth in Lending Act, *15 U.S.C.S. § 1601 et seq.* The Act defines open end credit plan in *15 U.S.C.S. § 1602(i)*: The term open end credit plan means a plan under which the creditor reasonably contemplates repeated transactions, which prescribes the terms of such transactions, and which provides for a finance charge which may be computed from time to time on the outstanding unpaid balance. As a practical matter, when a consumer applies for and is issued a credit card under an open end credit plan, there is no extension of credit from a lender to a potential borrower, because no debt has yet accrued. With the free ride period permitted under most credit cards, it is only when the first finance charge is imposed that a consumer usually becomes aware that a violation of the Act has occurred. This may be many months after the application for and issuance of the card. Under these circumstances it appears evident that the purpose of the Act - to ensure the informed use of credit - is best served if the starting point for the limitation period is deemed to be the date when there has been a finance charge which puts the consumer on notice that a violation has occurred.

HN27[] Antitrust & Trade Law, Clayton Act

Although the Racketeer Influenced and Corrupt Organization (RICO) statute does not contain a statute of limitations, the U.S. Supreme Court has held that the four-year statute of limitations of the Clayton Act, *15 U.S.C.S. § 1 et seq.*, is analogous and therefore applicable to federal racketeering causes of action. Because of the RICO Act's unique "pattern of racketeering activity" requirement, the development of accrual theories for RICO causes of action has taken a somewhat different path to reach today what is by and large the same rule as that applied in ***antitrust law***.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN28[] **Tying Arrangements, Clayton Act**

The Clayton Act, *15 U.S.C.S. § 1 et seq.*, is a federal law enacted to deal with antitrust regulation and practices engaged in for the purpose of restraining trade. The Clayton Act prohibits activity such as price discrimination, tying and exclusive dealing contracts, mergers, and interlocking directorates, where the purpose is to lessen competition or to create a monopoly within an industry.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Discovery Rule

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Discovery & Disclosure > General Overview

HN29[] **Tolling of Statute of Limitations, Discovery Rule**

Three distinct approaches have emerged to determine when the four-year period of time commences to run under a Racketeer Influenced and Corrupt Organization (RICO) claim. Some Circuits, like the United States Court of Appeals for the Fifth Circuit, have applied an injury discovery accrual rule starting the clock when a plaintiff knew or should have known of his injury. Some circuits have applied the injury and pattern discovery rule, under which a civil RICO claim accrues only when the claimant discovers, or should discover, both an injury and a pattern of RICO activity. The United States Court of Appeals for the Third Circuit has applied a last predicate act rule. Under this rule, the period began to run as soon as the plaintiff knew or should have known of the injury and the pattern of racketeering activity, but began to run anew upon each predicate act forming part of the same pattern.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Statute of Limitations

Civil Procedure > Discovery & Disclosure > General Overview

Governments > Legislation > Statute of Limitations > Extensions & Revivals

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

HN30[] **Racketeer Influenced & Corrupt Organizations, Statute of Limitations**

The United States Court of Appeals for the Third Circuit has held that the injury discovery accrual rule applies to civil Racketeer Influenced and Corrupt Organization (RICO) claims. The Court reasoned that by tying the start of the limitations period to a plaintiff's reasonable discovery of a pattern rather than to the point of injury or its reasonable discovery, the rule would extend the potential limitations period for most civil RICO cases well beyond the time when a plaintiff's cause of action is complete. A limitations period that would have begun to run only eight years after a claim became ripe would bar repose, prove a godsend to stale claims, and doom any hope of certainty in identifying potential liability. The fact that difficulty in identifying a pattern is inherent in civil RICO only reinforces the courts' reluctance to parlay the necessary complexity of RICO into worse trouble in applying its limitations rule.

Banking Law > Consumer Protection > Fair Credit Reporting > General Overview

HN31[] **Consumer Protection, Fair Credit Reporting**

Immunity will not attach to common-law claims where a credit reporting agency has furnished false information with malice or willful intent to injure.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Governments > Legislation > Statute of Limitations > General Overview

Torts > Procedural Matters > Statute of Limitations > General Overview

HN35[] **Statute of Limitations, Time Limitations**

Conn. Gen. Stat. § 52-577 is an occurrence statute, meaning that the time period within which a plaintiff must commence an action begins to run at the moment the act or omission complained of occurs. The Connecticut Supreme Court has held that in construing the general tort statute of limitations, *§ 52-577*, which allows for an action to be brought within three years from the date of the act or omission complained of, the Court has concluded that the history of that legislative choice of language precludes any construction thereof delaying the start of the limitation period until the cause of action has accrued or the injury has occurred.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > General Overview

Torts > Procedural Matters > Statute of Limitations > General Overview

HN37[] **Legislation, Statute of Limitations**

The three-year limitation of *Conn. Gen. Stat. § 52-577* is applicable to all actions founded upon a tort which do not fall within those causes of action carved out of *§ 52-577* and enumerated in *Conn. Gen. Stat. § 52-584* or another section. Because negligent misrepresentation is not specifically enumerated in *§ 52-584*, that section is inapplicable to cases of negligent misrepresentation.

Civil Procedure > Preliminary Considerations > Equity > General Overview

Real Property Law > Financing > Foreclosures > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

HN38[] **Preliminary Considerations, Equity**

The unclean hands doctrine may be asserted as a special defense in a foreclosure action. Connecticut jurisprudence has recognized that those seeking equitable redress in the courts must come with clean hands. The doctrine of unclean hands expresses the principle that where a plaintiff seeks equitable relief, he must show that his conduct has been fair, equitable and honest as to the particular controversy in issue. For a complainant to show that he is entitled to the benefit of equity he must establish that he comes into court with clean hands. The clean hands doctrine is applied not for the protection of the parties but for the protection of the court. It is applied for the advancement of right and justice. The party seeking to invoke the clean hands doctrine to bar equitable relief must show that his opponent engaged in wilful misconduct with regard to the matter in litigation. The trial court enjoys broad discretion in determining whether the promotion of public policy and the preservation of the courts' integrity dictate that the clean hands doctrine be invoked.

Opinion by: D'Andrea

Opinion

MEMORANDUM OF DECISION RE MOTION TO STRIKE (# 322)

In the present action, pursuant to the *Connecticut Practice Book § 10-39(a)(5)*, [1] Vincent Larobina (Larobina), moves to strike all of First Union National Bank's (First Union) special defenses. The facts alleged leading up to this action are as follows. On September 25, 1986, Larobina established a line of credit with Union Trust Bank (Union Trust) in the amount of $ 55,000. This line of credit was secured by a second mortgage on Larobina's home. The note was for ten years with an effective maturity date of September 25, 1996. At some point in 1991, Union Trust assigned the note and mortgage to First Fidelity Bank of Connecticut (Fidelity). On November 1, 1994, Larobina

---

[1] *Section 10-39(a)(5)* states, in pertinent part, that: ***HN1***[] "Whenever any party wishes to contest . . . the legal sufficiency of any answer to any complaint, counterclaim or cross complaint, or any part of that answer including any special defense contained therein, that party may do so by filing a motion to strike the contested pleading or part thereof."

and Fidelity agreed to extend the maturity date on the note. [2] In 1996, Fidelity assigned the agreement and the mortgage to the defendant, First Union. From the time of the execution of the re-age agreement in 1994 through the time of the note's original **[*2]** maturity date of September 1996 and until October 1998, Larobina received regular and proper monthly statements and substantially complied with the agreement by tendering payments.

On July 20, 1998, Larobina received a letter from First Union stating that the note had **[*3]** matured as of September 25, 1996, and that the entire balance was due. Larobina alleges that he contacted First Union to inform them of his agreement with First Fidelity to extend the repayment date. In response, Larobina asserts that First Union claimed that the new minimum payment due was almost the entire balance of the note. Larobina further alleges that this new minimum balance due violated the terms of his agreement with Fidelity which stated that "your minimum installment payment will be 1/240th of your outstanding balance plus any finance charges owed on your account."

Larobina, filed a thirteen-count substitute complaint against First Union, on December 28, 2001. Therein he alleges breach of contract/(counts one through three), negligence by refusing to expunge false information from the plaintiff's credit report/(count four), defamation by publishing false information to the credit agencies/(count five), violation of *15 U.S.C. § 1647(a)* (*General Statutes § 36a-678(a)*), which requires home equity loans to be based on an index or rate of interest which is publicly available/(count six), mail fraud in violation of *18 U.S.C. § 1341* **[*4]** /(count seven), negligent infliction of emotional distress/(count eight), violation of the implied covenant of fair dealing pursuant to *General Statutes § 42a-1-203*/(count nine), violation of the Connecticut Unfair Trade Practices Act (CUIPA), specifically, *General Statutes § 42-110a(3)* and *(4)*/(count ten), negligent misrepresentation/(count eleven), promissory estoppel/(count twelve) and specific performance/(count thirteen).

On December 27, 2002, First Union filed an answer and special defenses to Larobina's substituted complaint. On October 3, 2003, Larobina moved to strike all of First Union's special defenses. The court, Hiller, J., granted Larobina's motion to strike all 11 special defenses. Larobina v. First Union National Bank, Superior Court, judicial district of Stamford, Docket No CV 990170845 (January 14, 2004, Hiller, J.). On January 30, 2004, First Union filed its substitute answer and special defenses. On February 13, 2004, Larobina filed another motion to strike First Union's special defenses.

In his memorandum in support, Larobina argues that First Union's special defenses contain "no subordinate facts from which **[*5]** [a] legal conclusion can flow." Larobina submits that all First Union has done, in this instance, is enhance each defense by quoting the allegations of his complaint. Larobina argues that First Union has, therefore, failed to present independent subordinate facts from which the legal conclusion of each defense can flow. On February 25, 2004, First Union filed its memorandum of law in opposition, in which it argues that Larobina's motion to strike lacks legal merit. The motion was heard on the short calendar on March 1, 2004.

HN2[] "The purpose of a special defense is to plead facts that are consistent with the allegations of the complaint but demonstrate, nonetheless, that the plaintiff has no cause of action." (Internal quotation marks omitted.) *Fidelity Bank v. Krenisky, 72 Conn.App. 700, 718, 807 A.2d 968*, cert. denied, *262 Conn. 915, 811 A.2d 1291 (2002)*. The purpose of a motion to strike is "to contest . . . the legal sufficiency of any answer . . . including any special defense contained therein . . ." *Practice Book § 10-39(a)(5)*.

HN3[] "Because a motion to strike challenges the legal sufficiency of a pleading and, consequently, requires no factual findings **[*6]** by the trial court, our review of the court's ruling on the [plaintiff's motion] is plenary . . . We take the facts to be those alleged in the complaint that has been stricken and we construe the complaint in the manner most favorable to sustaining its legal sufficiency . . . Thus, if facts provable in the complaint would support a cause of action, the motion to strike must be denied . . . Moreover . . . what is necessarily implied [in an allegation] need not be expressly alleged . . . It is fundamental that in determining the sufficiency of a complaint challenged by

[2] Specifically, in consideration of the extension, Larobina agreed to forfeit any further right to obtain any additional loans under the note, and in exchange, Fidelity expressly modified the term of the note by allowing Larobina to pay each monthly installment of interest and principal as defined under paragraph 2.2 of the note, until such time as the then existing balance was paid in full.

a defendant's motion to strike, all well-pleaded facts and those facts necessarily implied from the allegations are taken as admitted . . . Indeed, pleadings must be construed broadly and realistically, rather than narrowly and technically . . . Where the legal grounds for such a motion are dependent upon underlying facts not alleged in the plaintiff's pleadings, the defendant must await the evidence which may be adduced at trial, and the motion should be denied." (Citations omitted; internal quotation marks omitted.) *Commissioner of Labor v. C.J.M. Services, Inc., 268 Conn. 283, 292-93, 842 A.2d 1124 (2004)*. **[*7]**

HN4[] "The granting of a motion to strike a special defense is not a final judgment and is therefore not appealable." *Mechanics Savings Bank v. Townley Corp., 38 Conn.App. 571, 573, 662 A.2d 815 (1995)*.

A. First Special Defense to Count Three, Breach of Contract Claim

First Union's first special defense to count three states that Larobina's claim is preempted by the provisions of *15 U.S.C. § 1681h(e)*. [3] In support of this defense First Union cites the following from Larobina's complaint dated December 28, 2001. In paragraph sixteen, Larobina alleges that "starting in October 1998, and continuing until even date herewith, [First Union] has reported to Experian, Trans Union and Equifax credit reporting agencies that the plaintiff is in default under the Note." Larobina further alleges, in paragraph seventeen, that "in making said reports, [First Union] has failed, refused or neglected to report to said credit reporting agencies that the plaintiff disputed [First Union's] allegation of default, although [First Union] has due notice of the same. By its failure, refusal and/or neglect to report the plaintiff's dispute to said agencies, [First **[*8]** Union] violated the expressed terms of the Note as set forth in the penultimate un-numbered paragraph in the instrument." Larobina further alleges that "[First Union's] failure to report the plaintiff's dispute to the credit reporting agencies constitutes a breach of contract from which the plaintiff suffered damages." First Union argues, therefore, that despite the characterization of count three as a breach of contract claim, in reality, the claim is one sounding in defamation, invasion of privacy, or negligence, any of which is preempted by *§ 1681h(e)*.

[*9] ***HN6***[] "The elements of a breach of contract action are the formation of an agreement, performance by one party, breach of the agreement by the other party and damages." (Internal quotation marks omitted.). *Rosato v. Mascardo, 82 Conn.App. 396, 411, 844 A.2d 893 (2004)*.

In the present case, Larobina alleges that First Union's failure to comply with various obligations under the note constitutes a breach of contract. In a prior decision on a motion to strike, Judge Hiller determined that Larobina stated a claim for breach of contract and that First Union may not relitigate the legal sufficiency of that count by way of special defenses. *Larobina v. First Union National Bank, supra*, Superior Court, Docket No. CV 99-0170845. Further, in another decision on a motion to strike, Judge Karazin also determined that Larobina, in count three, had sufficiently alleged a cause of action for breach of contract. Larobina v. First Union National Bank; Superior Court, judicial district of Stamford/Norwalk at Stamford, Docket No. CV 99-0170845 (December 13, 2001, Karazin, J.). He noted that Larobina had alleged an agreement, performed the agreement, First Union breached the agreement and that, **[*10]** as a result of that breach, Larobina suffered damages. Based upon the determinations by both Judge Hiller and Judge Karazin that count three is a contracts claim, this court is not inclined to disturb their judgment.

HN7[] "The purpose of a special defense is to plead facts that are consistent with the allegations of the complaint . . ." (Emphasis added; internal quotation marks omitted.) *Fidelity Bank v. Krenisky, supra, 72 Conn.App. 718*. Moreover, ***HN8***[] the language of *§ 1681h(e)* does not apply to preempt common-law claims alleging a breach of

---

[3] *15 U.S.C. § 1681h(e)* states that: ***HN5***[] "(e) Limitation of liability-Except as provided in *sections 1681n* and *1681o* of this title, no consumer may bring any action or proceeding in the nature of defamation, invasion of privacy, or negligence with respect to the reporting of information against any consumer reporting agency, any user of information, or any person who furnishes information to a consumer reporting agency, based on information disclosed pursuant to *section 1681g*, *1681h*, or *1681m* of this title, or based on information disclosed by a user of a consumer report to or for a consumer against whom the user has taken adverse action, based in whole or in part on the report except as to false information furnished with malice or willful intent to injure such consumer."

contract and is, consequently, inapplicable to count three. Therefore, Larobina's motion to strike First Union's first special defense to count three is granted.

B. Second Special Defense to Count Three, Breach of Contract Claim

First Union's second special defense to count three states that Larobina's claim relates solely to the responsibilities imposed on First Union pursuant to 15 U.S.C. § 1681s-2 [4] **[*12]** and, therefore, is preempted by a second preemption provision in 15 U.S.C. § 1681t(b)(1)(F). [5] In support of this defense, First Union argues that it "is a person who furnishes information **[*11]** to consumer reporting agencies." Further, First Union incorporates the same allegations from its first special defense which rely on paragraphs sixteen through eighteen of count three of

---

[4] 15 U.S.C. § 1681s-2 states, in pertinent part:

HN9[] (a) Duty of Furnishers of Information to Provide Accurate Information-

(1) Prohibition-

(A) Reporting Information wit Actual Knowledge of Errors-A person shall not furnish any information relating to a consumer to any consumer reporting agency if the person knows or has reasonable cause to believe that the information is inaccurate.

(B) Reporting Information After Notice and Confirmation of Errors-A person shall not furnish information relating to a consumer to any consumer reporting agency if-

(i) the person has been notified by the consumer, at the address specified by the person for such notices, that specific information is inaccurate; and (ii) the information is, in fact, inaccurate . . .

(2) Duty to Correct and Update Information-A person who-

(A) regularly and in the ordinary course of business furnishes information to one or more consumer reporting agencies about the person's transactions or experiences with any consumer; and (B) has furnished to a consumer reporting agency information that the person determines is not complete or accurate, shall promptly notify the consumer reporting agency of that determination and provide to the agency any corrections to that information, or any additional information, that is necessary to make the information provided by the person to the agency complete and accurate, and shall not thereafter furnish to the agency any of the information that remains not complete or accurate.

(3) Duty to Provide Notice of Dispute-If the completeness or accuracy of any information furnished by any person to any consumer reporting agency is disputed to such person by a consumer, the person may not furnish the information to any consumer reporting agency without notice that such information is disputed by the consumer . . .

(b) Duties of Furnishers of Information upon Notice of Dispute-

(1) In General-After receiving notice pursuant to section 1681i(a)(2) of this title of a dispute with regard to the completeness or accuracy of any information provided by a person to a consumer reporting agency, the person shall-

(A) conduct an investigation with respect to the disputed information;

(B) review all relevant information provided by the consumer reporting agency pursuant to section 1681i(a)(2) of this title;

(C) report the results of the investigation to the consumer reporting agency;

(D) if the investigation finds that the information is incomplete or inaccurate, report those results to all other consumer reporting agencies to which the person furnished the information and that compile and maintain files on consumers on a nationwide basis . . .

[5] 15 U.S.C. § 1681t(b)(1)(F) states, in pertinent part: **HN10**[] "General Exceptions-No requirement or prohibition may be imposed under the laws of any State-(1) with respect to any subject matter regulated under . . . (F) section 1681s-2 of this title, relating to the responsibilities of persons who furnish information to consumer reporting agencies . . ." This preemption provision "provides furnishers of credit with absolute immunity when fulfilling their obligations under § 1681s-2." Stafford v. Cross Country Bank, 262 F. Supp. 2d 776, 784 (W.D.Ky 2003).

the complaint. Larobina argues that, other than conclusory statements, First Union has not alleged that its conduct falls within the subject matter regulated by § 1681s-2.

HN11[] "The [Federal Credit Reporting Act] FCRA governs the use of and the procedures related to credit reports. It sets forth responsibilities related to consumer reporting agencies and also the responsibilities of furnishers of information to consumer reporting agencies. The FCRA provides for civil liability due to both willful and negligent non-compliance, Title 15 U.S.C. § 1681n and 1681o." Washington v. Direct General Ins. Agency, Inc., 130 F. Supp. 2d 820, 824 (S.D.Miss. 2000). **[*13]**

It has been determined, as previously noted, that count three has been sufficiently alleged as a breach of contract claim. Since the purpose of a special defense is to "plead facts that are consistent with the allegations of the complaint," Fidelity Bank v. Krenisky, supra, 72 Conn.App. 718, Title 15 U.S.C. §§ 1681s-2 and 1681t(b)(1)(F) do not apply to breach of contract claims. Therefore, Larobina's motion to strike First Union's second special defense to count three is granted.

C. First Special Defense to Count Four, Negligence Claim

First Union's first special defense to count four states that Larobina's claim of negligence is preempted by the provisions of 15 U.S.C. § 1681h(e) [6] because the claim alleges negligence with respect to the reporting of information to consumer agencies. First Union states that the allegations from paragraph one of its first special defense to count three is incorporated by reference in this special defense regarding the reporting of Larobina's default on the note. First Union argues that in his complaint, "Larobina alleges that 'starting in April 1999, [First Union] reported to Experian, **[*14]** Trans Union and Equifax credit reporting agencies that it had instituted foreclosure proceedings against the plaintiff through its attorney [and that] the defendant's actions constitute negligence from which the plaintiff has suffered damages." Larobina argues that his negligence claim falls within the exceptions to preemption as stated in § 1681h(e).

HN12[] "The FCRA . . . recognizes that a consumer may . . . bring an action proceeding under state common law for defamation, slander or invasion of privacy, [and negligence] but only if the consumer proves malice [or willful intent to injure such consumer]. That is, § 1681h(e) grants consumer reporting agencies, users of consumer reports, and furnishers of information qualified immunity from state law claims of this nature. Section 1681h(e) is therefore not a grant of federal subject matter jurisdiction, but rather creates a defense a consumer must overcome to succeed on a state law claim against someone acting in a capacity that is regulated **[*15]** by the Act." Stafford v. Cross Country Bank, supra, 262 F. Supp. 2d 782.

HN13[] Some courts have held that "applying § 1681h(e) to [a] negligence claim would require [a] plaintiff to show that [a] defendant . . . acted negligently and with malice or willful intent to injure. 15 U.S.C. § 1681h(e) (2003). This results in a requirement that [a] plaintiff prove intentional or malicious negligence. This level of negligence is inherently contradictory in that negligence does not include an element of intent. In fact, intentional negligence is an oxymoron." (Internal quotation marks omitted.) Carlson v. Trans Union, LLC, 261 F. Supp. 2d 663, 665 (N.D.Tex. 2003).

"A wilful and malicious injury is one inflicted intentionally without just cause or excuse. It does not necessarily involve the ill will or malevolence shown in express malice. Nor is it sufficient to constitute such an injury that the act resulting in the injury was intentional in the sense that it was the voluntary action of the person involved. Not only the action producing the injury but the resulting injury must be intentional . . . A wilful or malicious injury is one caused **[*16]** by design. Wilfulness and malice alike import intent . . . [Its] characteristic element is the design to injure either actually entertained or to be implied from the conduct and circumstances." (Citation omitted; internal quotation marks omitted.) Mingachos v. CBS, Inc., 196 Conn. 91, 102, 491 A.2d 368 (1985).

[6] See footnote 3.

Count four alleges a cause of action against First Union for [damages] due to its negligent credit reporting. First Union could be exempt from such action by virtue of the FCRA statute and case law; see Bank of New York v. Conway, Superior Court, judicial district of Hartford, Docket No. CV 02 0815603 (September 23, 2003, Freed, J.T.R.); see also *§ 1681h(e)*; unless "the credit reporting (agency) has furnished false information with malice or willful intent to injure." (Internal quotation marks omitted.) *New York Times v. Sullivan, 376 U.S. 254, 279-80, 84 S. Ct. 710, 11 L. Ed. 2d 686 (1964)*.

Since negligence and willful and/or malicious intent to injure are alleged by Larobina in the fourth count notwithstanding contradictory implications, *§ 1681h(e)* could provide immunity for First Union if wilfulness or malice is not proven. Therefore, **[*17]** Larobina's motion to strike the first special defense to count four is denied.

D. Second Special Defense to Count Four, Negligence Claim

First Union's second special defense to count four states that it is subject to the FCRA's *§ 1681s-2* [7] and Larobina's claim is, therefore, preempted by the provisions of *§ 1681t(b)(1)(F)*. [8] In addition to incorporating paragraphs one through three of First Union's first special defense to count four as support for the reporting of Larobina's default on the note, First Union again submits that it is a person who furnishes information to consumer reporting agencies. Additionally, First Union cites to paragraphs eighteen [9] and nineteen [10] of count four of the complaint to bolster its argument that these activities plainly illustrate that *§ 1681s-2* is applicable to this dispute.

[*18] ***HN14***[] "The FCRA's two separate preemption provisions are contained in *§ 1681t(b)(1)(F)*, which provides furnishers of credit with absolute immunity when filling their obligations under *§ 1681s-2*; and *§ 1681h(e)*, which provides furnishers of credit information with qualified immunity from suits 'proceeding in the nature of defamation, invasion of privacy, or negligence.' Importantly, Congress . . . added the first, more sweeping, *§ 1681t(b)(1)(F)* language in a series of 1996 amendments. Those amendments made no mention of the earlier *§ 1681h(e)* language. The tension between these two provisions therefore results from the fact that *§ 1681h(e)* permits state tort claims, but requires a higher standard of proof for those in the nature of defamation, slander, or invasion of privacy, while *§ 1681t(b)(1)(F)* prohibits all state claims covered by *§ 1681s-2*." *Stafford v. Cross Country Bank, supra, 262 F. Supp. 2d 784-85*.

In *Bank One, N.A. v. Colley, 294 F. Supp. 2d 864, 868 (M.D.La 2003)*, the court was faced with this very same issue, whether a state law claim was preempted by *§ 1681t(b)(1)(F)*. The court stated that "the question of preemption of state common-law **[*19]** claims under the FCRA has not yet been addressed by a Circuit Court. However, ***HN15***[] several district courts around the country have considered how and when to apply each preemption provision to pendent state common-law claims. Three approaches have emerged from these district courts. The first approach is to interpret *§ 1681t(b)(1)(F)*, which was added to the FCRA after *§ 1681h(e)*, as completely subsuming *§ 1681h(e)*. This approach, which would call for preemption of all pendent state law claims, has been rejected by at least one court because Congress left *§ 1681h(e)* in place when it added *§ 1681t(b)(1)(F)*. The second approach is to read *§ 1681h(e)* as applying to state tort actions and *§ 1681t(b)(1)(F)* as applying to state statutory regulation. The third approach, called the temporal approach, has been applied most often.

HN16[] The temporal analysis relies on the language of *§ 1681t(b)(1)(F)* itself to conclude that *§ 1681t(b)(1)(F)* should only be used to preempt state actions premised upon a credit furnisher's conduct occurring after the furnisher receives notice of a dispute. *[Section] 1681t(b)(1)(F)* states, in relevant part, 'no requirement or prohibition

---

[7] See footnote 4.

[8] See footnote 5.

[9] "The defendant had never instituted any litigation of any sort against the plaintiff since the beginning of the world until even date herewith."

[10] Notwithstanding the fact that the defendant was well aware that it had not instituted foreclosure proceedings against the plaintiff and that plaintiff was not in default of the Note, the defendant intentionally caused said false reporting to remain on the plaintiff's credit report from April 1999-December 1999."

may be imposed under the **[*20]** laws of any State with respect to any subject matter regulated under . . . *section 1681s-2* of this title, relating to the responsibilities of persons who furnish information to consumer reporting agencies . . .' *[Section] 1681s-2*, in turn, only regulates conduct of furnishers of information after the furnishers have been either 'notified by the consumer . . . that specific information is inaccurate' or notified by a consumer reporting agency that a dispute over the accuracy of information has arisen. Because the conduct regulated by *§ 1681s-2* has a temporal component and *§ 1681t(b)(1)(F)* is based on *§ 1681s-2*, it follows that the application of *§ 1681t(b)(1)(F)* likewise depends on when the furnisher of information received notice of a dispute. Thus, ***HN17***[] the bottom line of the temporal analysis is that preemption of state law claims arising before the furnisher of information receives notice of the dispute is governed by *§ 1681h(e)* and preemption of state law claims arising after such a time is governed by *§ 1681t(b)(1)(F)*." *Bank One, N.A. v. Colley, supra, 294 F. Supp. 2d 868-69*.

In the present case, the court finds that count four may be preempted by *§ 1681t(b)(1)(F)*. **[*21]** Based upon the reasoning in Bank One, N.A. v. Colley, and the facts alleged by First Union in its second special defense, a defense of preemption under a temporal analysis may apply to a furnisher of information whose conduct is regulated by *§ 1681s-2* and who has been notified by the consumer that specific information is inaccurate or notified by a consumer reporting agency that a dispute over the accuracy of the information has arisen. Therefore, Larobina's motion to strike the second special defense to count four of the complaint is denied.

E. First Special Defense to Count Five, Defamation Claim

First Union's first special defense to count five states that Larobina's claim is preempted by the provisions of *§ 1681h(e)*. Count five of Larobina's complaint reincorporates count four in its entirety and contends that First Union's conduct rises to the level of defamation. First Union, therefore, reincorporates its argument set forth in section C. The cause of action in the present count, however, is defamation, not negligence.

Section 1681h(e) ***HN18***[] explicitly states that it is applicable to causes of action sounding in defamation. Based upon the language of *§ 1681h(e)*, this court finds **[*22]** that First Union has pleaded sufficient facts to withstand a motion to strike. Therefore, Larobina's motion to strike *§ 1681h(e)* as a defense to count five is denied.

F. Second Special Defense as to Count Five, Defamation Claim

First Union's second special defense to count five states that Larobina's claim is preempted by the provisions of *§ 1681t(b)(1)(F)*. First Union reincorporates its argument set forth in sections B and D.

Based upon the facts alleged by First Union in its special defense and the reasoning in section D, this court finds that *§ 1681t(b)(1)(F)* could be a special defense. Therefore, Larobina's motion to strike the second special defense to count five of the complaint is denied.

G. First Special Defense to Count Six, Violation of *15 U.S.C. § 1647* Claim

First Union's first special defense to count six states that Larobina's claim is time barred by the provisions of *General Statutes § 36a-683(e)*. [11] **[*24]** First Union contends that Larobina's claim under the Federal Truth in Lending Act, *15 U.S.C. § 1601, et seq.*, or more specifically, *§ 1647(a)*, [12] is untimely. ***HN19***[] The provisions of

---

[11] *General Statutes § 36a-683(e)* states: ***HN20***[] "Time limit for bringing action-Any action under this section shall be brought in any court of competent jurisdiction within one year from the date of the occurrence of the violation. This subsection does not bar a person from asserting a violation of *sections 36a-675 to 36a-685*, inclusive, in an action to collect the debt which was brought more than one year from the date of the occurrence of the violation as a matter of defense by recoupment or set-off in such action." Emphasis added.) See also *15 U.S.C. § 1640(e)*.

[12] *15 U.S.C. § 1647(a)* states: ***HN21***[] "(a) Index requirement-In the case of extensions of credit under an open end consumer credit plan which are subject to a variable rate and are secured by a consumer's principal dwelling, the index or other rate of interest to which changes in the annual percentage rate are related shall be based on an index or rate of interest which is publicly available and is not under the control of the creditor."

this act **[*23]** are applicable to creditors in Connecticut pursuant to *General Statutes § 36a-678(a)*. [13] First Union's special defense provides the following facts. The note was executed as part of the loan transaction between Larobina and Union Trust, which occurred on September 25, 1986. *Section 36a-683(e)* requires that all actions based on violations of the Connecticut Truth in Lending Act be commenced within one year of the date of the occurrence. Larobina's claims in count six are based on the note and first accrued on September 25, 1986. The cause of action asserted in count six was first alleged by Larobina in the revised complaint filed September 10, 1999. First Union states that these allegations clearly show that Larobina did not bring his claim within the one-year time period.

Larobina argues that First Union already presented its legal position as to the applicability of *§ 1640(e)* [14] at oral argument. At that time, the court concluded that "the statute of limitations began to run on the date that the plaintiff was first put on notice of a violation and not, as the defendant argues from **[*25]** the date that the note was executed fourteen years ago." (Internal quotation marks omitted.) *Larobina v. First Union National Bank, supra*, Superior Court, Docket No. CV 99 0170845.

HN24[] "A consumer's rights under the [Truth in Lending] Act are subject to a one-year limitation period that begins to run 'from the date of the occurrence of the violation.' *15 U.S.C. § 1640* **[*26]** (e). Most of the reported cases which have considered the limitation provision of the Act have done so in the context of 'close end' credit transactions . . . As a general rule the disclosures required by the Act are revealed to the consumer at the time the contract for the extension of credit is executed or, at the very latest, at the time of performance. Thus there is a specific time at which a violation occurs and a court can use that occurrence as the point from which the limitation period begins to run." *Baskin v. G. Fox & Co., 550 F. Supp. 64, 66 (D.Conn. 1982)*.

"However, ***HN25***[] an open end credit arrangement . . . is distinguishable on several grounds from a close end transaction and necessitates a different rationale in applying the limitation provision. The Act defines open end credit plan in *§ 1602(i)*: The term open end credit plan means a plan under which the creditor reasonably contemplates repeated transactions, which prescribes the terms of such transactions, and which provides for a finance charge which may be computed from time to time on the outstanding unpaid balance. As a practical matter, when a consumer applies for and is issued a credit card under an open **[*27]** end credit plan, there is no extension of credit from a lender to a potential borrower, because no debt has yet accrued. With the free ride period permitted under most credit cards, it is only when the first finance charge is imposed that a consumer usually becomes aware that a violation of the Act has occurred. This may be many months after the application for and issuance of the card." (Emphasis added; internal quotation marks omitted.) *Id., 66-67*.

"Under these circumstances it appears evident that the purpose of the Act-to ensure the informed use of credit-is best served if the starting point for the limitation period is deemed to be the date when there has been a finance charge which puts the consumer on notice that a violation has occurred." (Emphasis added.) *Id., 67*.

In the present case, Larobina alleges in count six that he had an open-end extension of credit. Judge Karazin stated, in a previous opinion, that "the statute of limitations began to run on the date that the plaintiff was first put on notice of a violation and not, as the defendant argues, from the date that the note was executed, fourteen years ago. [First Union] makes no argument that **[*28]** the plaintiff instituted this action more than one year from the date

[13] *General Statutes § 36a-678(a)* states: ***HN22***[] "(a) Except as otherwise provided in *sections 36a-675 to 36a-685*, inclusive, or regulations adopted by the commissioner, each person shall comply with all provisions of the Consumer Credit Protection Act (*15 U.S.C. § 1601 et seq.*) which apply to such person."

[14] *15 U.S.C. § 1640(e)* states, in pertinent part: ***HN23***[] "(e) Jurisdiction of courts; limitations on actions; State attorney general enforcement-Any action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within one year from the date of the occurrence of the violation. This subsection does not bar a person from asserting a violation of this subchapter in an action to collect the debt which was brought more than one year from the date of the occurrence of the violation as a matter of defense by recoupment or set-off in such action, except as otherwise provided by State law." (Emphasis added.)

he was first put on notice of a violation. Therefore, the motion to strike count six is hereby denied. " *Larobina v. First Union National Bank, supra*, Superior Court, Docket No. CV99 0170845. This court is inclined to agree with Judge Karazin and treat the credit as open ended as well. Therefore, the statute of limitations begins to run when Larobina was put on notice. Further, this special defense fails to submit any facts which would support the notion that this action was instituted more than a year from the date Larobina was first put on notice nor does First Union make that argument. Larobina's motion to strike First Union's first special defense to count six is granted.

H. First Special Defense to Count Seven, Mail Fraud Claim

First Union's first special defense to count seven states that Larobina's Racketeer Influenced and Corrupt Organization (RICO) claim in count seven is time barred pursuant to *15 U.S.C. § 15b*. [15] First Union argues that Larobina did not raise a claim of civil RICO until the filing of the revised complaint on December 28, 2001, and that his allegations point to **[*29]** a variety of acts, occurring prior to December 28, 1997, more than four years before asserting this count. Based upon the caselaw, the statute of limitations runs from when Larobina discovered or should have discovered the injury.

HN27[] "Although the RICO statute does not contain a statute of limitations, the Supreme Court has held that the four-year statute of limitations of the Clayton Act [16] is analogous and therefore applicable to federal racketeering causes of action . . . Because of the Racketeer Influenced and Corrupt Organization Act's unique 'pattern of racketeering activity' requirement, the development of accrual theories for RICO causes of action has taken a somewhat different path to reach **[*30]** today what is by and large the same rule as that applied in ***antitrust law***." (Citation omitted.) *Astoria Entertainment, Inc. v. Edwards, 159 F. Supp. 2d 303, 325 (E.D.La. 2001)*.

HN29[] Three distinct approaches have emerged to determine when the four-year period of time commences to run. "Some Circuits, like the Fifth . . . applied an injury discovery accrual rule starting the clock when a plaintiff knew or should have known of his injury.

Some applied the injury and pattern discovery rule . . . under which a civil RICO claim accrues only when the claimant discovers, or should discover, both **[*31]** an injury and a pattern of RICO activity.

The Third Circuit applied a last predicate act rule . . . Under this rule, the period began to run as soon as the plaintiff knew or should have known of the injury and the pattern of racketeering activity, but began to run anew upon each predicate act forming part of the same pattern." (Citations omitted; internal quotation marks omitted.). *Rotella v. Wood, 528 U.S. 549, 553-54, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000)*.

The Court held, in rejecting the two latter theories, that ***HN30***[] the injury discovery accrual rule applied to civil RICO claims. [17] *Id., 558*. The Court reasoned that "by tying the start of the limitations period to a plaintiff's reasonable discovery of a pattern rather than to the point of injury or its reasonable discovery, the rule would extend the potential limitations period for most civil RICO cases well beyond the time when a plaintiff's cause of action is complete . . . A limitations period that would have begun to run only eight years after a claim became ripe would bar repose, prove a godsend to stale claims, and doom any hope of certainty in identifying potential liability . . . The fact . **[*32]** . . that difficulty in identifying a pattern is inherent in civil RICO . . . only reinforces our reluctance to parlay the necessary complexity of RICO into worse trouble in applying its limitations rule." (Citation omitted.) *Id., 558-59*.

---

[15] *15 U.S.C. § 15b* states that: ***HN26***[] "Any action to enforce any cause of action under *section 15*, *15a*, or *15c* of this title shall be forever barred unless commenced within four years after the cause of action accrued. No cause of action barred under existing law on the effective date of this Act shall be revived by this Act."

[16] ***HN28***[] The Clayton Act is a federal law enacted to deal with antitrust regulation and practices engaged in for the purpose of restraining trade. The Clayton Act prohibits activity such as price discrimination, tying and exclusive dealing contracts, mergers, and interlocking directorates, where the purpose is to lessen competition or to create a monopoly within an industry. See *15 U.S.C. § 1 et seq.*

[17] That rule requires starting the clock when a plaintiff knew or should have known of his injury.

In the present case, First Union cites to facts alleged by Larobina in his complaint. Along with these facts First Union alleges that they occurred prior to December 28, 1997, and more than four years prior to the assertion of this count on December 28, 2001. First Union may assert this special defense to count seven provided, however, that First Union is able to prove specific instances where Larobina knew or should have known of his damages. Therefore, Larobina's motion to strike First Unions first special defense to count seven is denied.

I. First Special Defense to Count Eight, Negligent Infliction of Emotional Distress Claim

First Union's first special defense **[*33]** to count eight states that Larobina's claim is preempted by *§ 1681h(e)* because the claim alleges negligent infliction of emotional distress. First Union reincorporates its arguments made in section C. Larobina, also, reincorporates his arguments against First Union's first substitute defense to count four to this count.

Count eight alleges a cause of action against First Union for emotional distress due to its negligent credit reporting. Here again, the plaintiff could be exempt from such action by virtue of the FCRA statute and case law. See *§ 1681h(e)*. ***HN31***[] "Immunity will not attach to common-law claims where the credit reporting (agency) has furnished false information with malice or willful intent to injure." (Citation omitted; internal quotation marks omitted.) Bank of New York v. Conway, supra, Superior Court, Docket No. CV 02 0815603.

Based upon this court's reasoning in section C, *§ 1681h(e)* may provide a defense for First Union to count eight. Therefore, Larobina's motion to strike First Union's first special defense to count eight is denied.

J. Second Special Defense to Count Eight, Negligent Infliction of Emotional Distress Claim

First Union's second special defense to **[*34]** count eight states that Larobina's claim is preempted by the provisions of *§ 1681t(b)(1)(F)*. First Union reincorporates its argument set fort in sections B, D and F. Additionally, First Union states that: "Paragraph [twenty-two] of count [eight] further reinforces the position articulated above. Specifically, Mr. Larobina alleges that '[First Union's] refusal to comply with its obligations to notify the major credit reporting agencies of [Larobina's] dispute pertaining to [First Union's] allegation of default, in its refusal to expunge a false report of default and its refusal to expunge a false report for a foreclosure litigation purportedly pending against [Larobina], caused, and continues to cause, [Larobina] emotional distress.' This purported misconduct unequivocally falls within the scope of *Section 1681s-2*." Larobina states that the arguments raised as to the second special defense to count four be incorporated in this count against First Union.

Based upon the facts alleged by First Union in its special defense and reasoning in sections D and F, this court finds that *§ 1681t(b)(1)(F)* could be used as a special defense by First Union in this count. Therefore, **[*35]** Larobina's motion to strike the second special defense to count eight of the complaint is denied.

K. First Special Defense to Count Ten, CUTPA Claim

First Union's first special defense to count ten states that Larobina's claim under the Connecticut Unfair Trade Practices Act (CUTPA) is barred by the provisions of *General Statutes § 42-110g(f)*. In support, First Union states that "Larobina alleges in count ten that First Union has taken various actions that constitute violations of [CUTPA]. Further, First Union states that many of the alleged violations occurred more than three years prior to the date when the complaint was filed. Larobina states that "even if [First Union's] claim was valid, the fact that [First Union] admits that some of the violations did occur inside the three-year limitations period is a significant enough admission to render this defense legally insufficient. Beyond that, however, as set forth in the count, all of the alleged violations occurred only after the bank refused to acknowledge and abide by the re-age agreement which occurred in October 1998. The CUTPA action was filed in January 1999, inside the limitations period. **[*36]** "

"*Section 42-110g(f)* ***HN32***[] provides that an action alleging unfair trade practices under CUTPA may not be brought more than three years after the occurrence of a violation . . . The three-year limitations period for a CUTPA claim is a substantive rather than procedural limitation . . ." (Internal quotation marks omitted.) Chasin v. Pasicki, Superior Court, judicial district of Ansonia/Milford at Milford, Docket No. CV 02 0079444 S (April 2, 2004, Bear, J.).

First Union states that many of the violations occurred more than three years prior to the date when the complaint was filed. First Union has not pinpointed one particular occurrence or one date on which a particular occurrence transpired. If any of these various allegations were to have occurred, however, more than three years prior to the filing of the complaint then First Union would have a defense to that occurrence.

HN33[] "In determining whether a motion to strike should be granted, the sole question is whether, if the facts alleged are taken to be true, the allegations provide a cause of action or a defense." *County Federal Savings & Loan Ass'n v. Eastern Associates, 3 Conn.App. 582, 585, 491 A.2d 401*. There are enough facts present **[*37]** to deny Larobina's motion to strike First Union's first special defense to count ten.

L. First Special Defense to Count Eleven, Negligent Misrepresentation Claim

First Union's first special defense to count eleven states that Larobina's claim of negligent misrepresentation is time barred by the provisions of *General Statutes § 52-577*. First Union argues that the cause of action asserted in count eleven was first alleged in the filing of an amended complaint on September 10, 1999. Further, First Union argues that the cause of action occurred more than three years prior to September 10, 1999. Larobina argues that a tort claim does not accrue until a plaintiff discovers or should have discovered that he has been injured and that First Union has not alleged facts in its special defense consistent with the complaint.

General Statutes § 52-577 provides that: ***HN34***[] "No action founded upon a tort shall be brought but within three years from the date of the act or omission complained of." *General Statutes § 52-577*. "*Section 52-577* ***HN35***[] is an occurrence statute, meaning that the time period within which a plaintiff must commence **[*38]** an action begins to run at the moment the act or omission complained of occurs. Our Supreme Court stated in *Fichera v. Mine Hill Corp., 207 Conn. 204, 212, 541 A.2d 472 (1988)*: In construing our general tort statute of limitations, *General Statutes § 52-577*, which allows for an action to be brought within three years from the date of the act or omission complained of, we have concluded that the history of that legislative choice of language precludes any construction thereof delaying the start of the limitation period until the cause of action has accrued or the injury has occurred." (Internal quotation marks omitted.) *Rosenfield v. Rogin, Nassau, Caplan, Lassman & Hirtle, LLC, 69 Conn.App. 151, 158-59, 795 A.2d 572 (2002)*.

In the present case, Larobina argues that the complaint affirmatively alleges facts that indicate that the earliest conceivable date that the plaintiff could have discovered his injury was on October 28, 1998, [18] the date of a letter from First Union indicating that Larobina's mortgage was payable in full. Larobina filed this action in February 1999, and amended the complaint to the current thirteen counts in **[*39]** January 2000, within the time prescribed by the subject statute of limitations. Larobina alleges that the negligent misrepresentation occurred in October of 1998, when he received a statement demanding the entire loan balance. First Union states that the cause of action asserted in count eleven occurred prior to September 10, 1996, and, therefore, should be barred by *§ 52-577*. There is clearly a dispute as to when notice was given to Larobina so as to commence the running of the statute of limitations. If the statute began to run on the date alleged by Larobina, he would clearly be within the time window for filing a complaint. If the date alleged by First Union proves to be valid, however, and the limitations period was to commence prior to that date then there would be merit to the applicability of the statute thus barring Larobina's claim.

Taking First Union's facts alleged as true, a statute of limitations defense under *§ 52-577* would **[*40]** be applicable if this cause of action for negligent misrepresentation was filed in Larobina's amended complaint in February of 2000. There are enough facts present to deny Larobina's motion to strike First Union's first special defense to count ten.

M. Second Special Defense to Count Eleven, Negligent Misrepresentation Claim

---

[18] This is the date of the bank's alleged repudiation of the re-age agreement.

First Union's second special defense to count eleven states that Larobina's claim of negligent misrepresentation is time barred also by the provision of *General Statutes § 52-584*. [19] First Union argues that pursuant to *§ 52-584*, any action based on negligence must be commenced within three years from the date of the act complained of. First Union contends that the cause of action in count eleven was first alleged in the filing of the complaint on September 10, 1999. Since the allegation occurred prior to September 10, 1996, this count must be barred.

[*41] ***HN37***[] "The three-year limitation of *§ 52-577* is applicable to all actions founded upon a tort which do not fall within those causes of action carved out of *§ 52-577* and enumerated in *§ 52-584* or another section." (Internal quotation marks omitted.) *Rosato v. Mascardo, 82 Conn.App. 396, 407, 844 A.2d 893 (2004)*. Because negligent misrepresentation is not specifically enumerated in *§ 52-584*, that section is inapplicable to cases of negligent misrepresentation. Id. In the present case, *§ 52-577* is the applicable statute of limitations to a cause of action sounding in negligent misrepresentation and *§ 52-584* is not. Therefore, Larobina's motion to strike First Union's second special defense to count eleven is granted.

N. First Special Defense to Count Thirteen, Specific Performance Claim

First Union's first special defense to count thirteen, seeking specific performance, states that Larobina has failed and neglected to make any payments under either the note or the alleged re-age agreement since, at least, February of 1999. It further maintains that Larobina is not ready, willing and able to perform under the terms of the re-age agreement and by his own admission is in **[*42]** breach of the agreement. Therefore, First Union argues that the foregoing demonstrates that Larobina has unclean hands and cannot obtain the equitable relief he seeks.

HN38[] The unclean hands doctrine may be asserted as a special defense in a foreclosure action. *Thompson v. Orcutt, 257 Conn. 301, 777 A.2d 670 (2001)*. "Our jurisprudence has recognized that those seeking equitable redress in our courts must come with clean hands. The doctrine of unclean hands expresses the principle that where a plaintiff seeks equitable relief, he must show that his conduct has been fair, equitable and honest as to the particular controversy in issue . . . For a complainant to show that he is entitled to the benefit of equity he must establish that he comes into court with clean hands . . . The clean hands doctrine is applied not for the protection of the parties but for the protection of the court . . . It is applied . . . for the advancement of right and justice . . . The party seeking to invoke the clean hands doctrine to bar equitable relief must show that his opponent engaged in wilful misconduct with regard to the matter in litigation . . . The trial court enjoys broad discretion in determining **[*43]** whether the promotion of public policy and the preservation of the courts' integrity dictate that the clean hands doctrine be invoked." (Citations omitted; emphasis added; internal quotation marks omitted.) *Ridgefield v. Eppoliti Realty Co., 71 Conn.App. 321, 334-35, 801 A.2d 902*, cert. denied, *261 Conn. 933, 806 A.2d 1070 (2002)*.

In this case, First Union alleges that Larobina is not entitled to the equitable remedy of specific performance because he has unclean hands. First Union alleges, in support of this special defense, that Larobina established a line of credit with Union Trust in the amount of $ 55,000 on September 25, 1986, which is set forth in the "Home Equity Line of Credit Agreement." Further, First Union alleges that "on or about November 1, 1994, by document captioned, Secured Credit Line Re-age Agreement, . . . the plaintiff and First Fidelity mutually agreed to extend said maturity date. Specifically, in consideration of the extension, the plaintiff agreed to forfeit any further right to obtain any additional loans under the Note, and in exchange, Fidelity expressly modified the terms of the Note by allowing the plaintiff to pay each monthly **[*44]** installment of interest and principal as defined under Paragraph 2.2 of the Note, until such time as the then existing balance was paid in full." Further, First Union alleges that the plaintiff has

---

[19] *General Statutes § 52-584* states: ***HN36***[] "No action to recover damages for injury to the person, or to real or personal property, caused by negligence, or by reckless or wanton misconduct, or by malpractice of a physician, surgeon, dentist, podiatrist, chiropractor, hospital or sanatorium, shall be brought but within two years from the date when the injury is first sustained or discovered or in the exercise of reasonable care should have been discovered, and except that no such action may be brought more than three years from the date of the act or omission complained of, except that a counterclaim may be interposed in any such action any time before the pleadings in such action are finally closed." (Emphasis added.)

made monthly payments pursuant to the note and the re-age agreement from the inception date of the note through February 1999.

Based upon these facts, First Union has essentially asserted that Larobina engaged in wilful misconduct with regard to the matter in litigation by ceasing to pay under the note from February of 1999 to the present. Therefore, Larobina's motion to strike the first special defense to count thirteen is denied.

Accordingly, Larobina's motion to strike First Union's special defenses is granted as to the first and second special defenses to count three, the first special defense to count six and the second special defense to count eleven. Larobina's motion to strike the remaining special defenses is denied.

D'ANDREA, Judge Trial Referee

Ferrell v. Wyeth-Ayerst, Labs., Inc.

United States District Court for the Southern District of Ohio, Western Division

June 30, 2004, Decided

Case No. C-1-01-447

Opinion

ORDER

Before the Court are the following motions:
Defendants motion to dismiss and to strike (Doc. 8); and
Defendants motion for partial dismissal (Doc. 39);
Plaintiffs opposition thereto (Doc. 43 and 44); and Defendants reply (Doc. 47).

BACKGROUND

Wyeth [1] **[*5]** manufactures Premarin, an estrogen replacement product that has been sold since 1943. (Compl.P 25) [2] The FDA approved Premarin for several uses, including relief from menopausal vasomotor symptoms, vulvar and vaginal atrophy, and prevention of osteoporosis. Premarin is used for both estrogen replacement therapy ("ERT") and hormone replacement therapy ("HRT"). Duramed Pharmaceuticals manufactures Cenestin. After Duramed unsuccessfully sought FDA approval to market Cenestin as a generic substitute for Premarin, it sought approval for Cenestin as a new, branded product. On March 24, 1999, the FDA approved Cenestin for a single indication: the treatment of vasomotor symptoms of menopause.

Duramed later filed suit against Wyeth in this district, contending that Wyeth engaged in monopolistic and anti-competitive practices designed to keep Cenestin from the market and/or from gaining market share. (Case No. C-1-00-735) Other lawsuits against Wyeth followed Duramed's, including the "direct purchaser" action (Case No. C-1-01-704); and these consolidated actions brought by "indirect purchasers" (or "end payors") of Premarin.

The Complaint generally alleges that, both before and after the FDA approved Cenestin, Wyeth engaged in a public campaign to tout the benefits of Premarin, while unfairly and untruthfully denigrating Cenestin. (Compl.P 46-50) Plaintiffs allege that, after Cenestin gained FDA approval, Wyeth engaged in a systematic attempt to keep Cenestin from growing market share, by entering into "exclusive" contracts with health insurers and pharmacy benefit managers (PBMs) in the United States. These exclusive contracts require **[*6]** that Premarin be the only conjugated estrogen product on the plans' drug formulary. Wyeth is able to procure these exclusive contracts by offering rebates, discounts, fees and other financial incentives to the plans and PBMs. (Compl. P61) Thus, Plaintiffs allege, the plans or PBMs would incur substantial financial losses by adding Cenestin to their formularies, as they would lose their bargained for rebates, discounts or fees if the plans failed to meet their sales targets for Premarin.

The "indirect purchaser" Plaintiffs in this case generally allege that Wyeth's monopolistic and anti-competitive conduct relative to Duramed's marketing of Cenestin has injured them in two ways: (1) Wyeth's conduct caused plaintiffs to pay more for conjugated estrogens than they otherwise would have paid, and (2) Wyeth's conduct excluded Duramed (and other unnamed potential competitors) from the market, "thereby restricting consumers' access to alternative conjugated estrogen products." (Compl. P35 (b) and (c))

ANALYSIS

I. Wyeth's Motion to Dismiss Or Strike.

Wyeth's first motion to dismiss and to strike (Doc 8) was addressed to Plaintiff's original Complaint (Doc 1). The motion **[*7]** to strike was directed to allegations in Paragraphs 41-46 of the original Complaint relating to Wyeth's activities in petitioning the FDA, on the grounds that those allegations are barred by the *Noerr-Pennington* doctrine. The Corrected Consolidated Amended Complaint (Doc. 31) omits the objectionable allegations concerning Wyeth's activities with the FDA. The Court has reviewed the Complaint, and is satisfied that its allegations do not run afoul of *Noerr-Pennington,* nor of this Court's order in *Duramed v. Wyeth.* Therefore, the motion to strike is denied as moot.

Wyeth's first motion to dismiss also asked this Court to decline jurisdiction over Counts III (various state antitrust claims) and Count IV (unjust enrichment claims) of the Complaint. Wyeth does not dispute that this Court has jurisdiction under *28 U.S.C. § 1331* over Plaintiffs' federal antitrust claims in Counts I and II. ***HN1***[ ] *28 U.S.C. § 1367* permits the exercise of supplemental jurisdiction over the state law claims that arise from a "common nucleus of operative facts." The allegations of Wyeth's monopolistic and/or anticompetitive conduct lie at the heart of all claims **[*8]** raised in the Complaint.

[1] Unless otherwise indicated and for ease of reference, "Wyeth" refers to the defendants Wyeth-Ayerst Laboratories Inc. and American Home Products Corporation (the latter apparently now known simply as "Wyeth").

[2] All references to the Complaint (or "Compl.") are to the Corrected Consolidated Amended Class Action Complaint (Doc. 31), unless otherwise indicated.

The Court notes that the federal claims are properly limited to a prayer for injunctive relief, while Counts III and IV seek money damages. This fact alone does not justify a refusal to exercise supplemental jurisdiction over the state law claims. ***HN2***[] But it is important to assure that the state law claims, and the issues they raise, do not "swallow" the federal claims. See, e.g., *De Asencio v. Tyson Foods, Inc., 342 F.3d 301, 309 (3rd Cir. 2003)*, noting that a "federal tail" wagging a "state dog" raises sufficient grounds to deny supplemental jurisdiction over state law claims that are the "real" purpose of the lawsuit.

The Court cannot conclude that the state law antitrust and unjust enrichment claims are the "real" or dominant purpose of Plaintiffs' lawsuit at this stage. The allegations concerning Wyeth's alleged anti-competitive conduct, if accepted by the trier of fact, could form the basis for substantial injunctive relief under federal law. (See Compl. P70 and 75) Therefore, the Court denies the motion to dismiss Counts III and IV in their entirety based on *28 U.S.C. § 1367*.

II. Wyeth's Motion for Partial **[*9]** Dismissal

After Plaintiffs filed their Consolidated Amended Complaint, Wyeth filed a second motion to dismiss (Doc. 39). In this motion, Wyeth seeks dismissal with prejudice of the state law claims arising under the laws of states other than those in which the named Plaintiffs reside. Wyeth contends that the named Plaintiffs lack standing to pursue those claims.

Wyeth also seeks the dismissal of Count IV, Plaintiffs' state law "unjust enrichment" claim, in its entirety. Wyeth argues that such a remedy is inappropriate in states that do not permit antitrust indirect purchaser suits. And, in those states that do recognize such suits, Wyeth argues that the adequate remedy at law provided by the state antitrust statute makes equitable relief unavailable.

A. Count III (State Law Antitrust Claims).

Subsequent to the filing of the Consolidated Complaint (Doc. 31), seven of the eight named individual Plaintiffs were withdrawn as class representatives. (See Doc. 49) The remaining named Plaintiffs are: (1) Marjorie Ferrell, a resident of the state of Florida; (2) the United Food & Commercial Workers Midwest Health Benefits Fund ("UFCW Fund"), headquartered in Illinois, which pays for **[*10]** or reimburses its beneficiaries in the states of Arizona, California, Florida, Illinois, Kansas, Kentucky, Louisiana, Minnesota, Missouri, Michigan, Nevada, North Carolina, New York, Tennessee and Wisconsin (Compl. P20); and (3) the Twin Cities Bakery Workers Health & Welfare Fund ("TCBW Fund"), headquartered in Minnesota, which pays for or reimburses its beneficiaries in the states of Indiana, Minnesota, North Dakota, South Dakota, and Wisconsin. (Compl. P23) (Plaintiff McDermott in Case No. 01-878, consolidated with this action, is also a resident of Florida.)

1. Standing of the Individual Named Plaintiff

Wyeth argues that Ms. Ferrell lacks Article III standing to prosecute state law claims on behalf of residents in states other than Florida. (Wyeth does not contest Ms. Ferrell's standing to prosecute her own claims, both federal and state.)

HN3[] It is important to distinguish the issue of a plaintiff's standing to sue the defendant, from the issue of whether that plaintiff can properly prosecute absent class members' claims. *See* *Fallick v. Nationwide Mutual Ins. Co., 162 F.3d 410, 422 (6th Cir. 1998)*. Standing is established when a potential plaintiff (1) has **[*11]** suffered an injury in fact, an invasion of a legally protected interest that is concrete and actual; (2) can demonstrate that a causal connection exists between the injury and the conduct of which the plaintiff complains; and (3) can demonstrate the likelihood, and not merely the speculative possibility, that the injury will be redressed by the requested relief. *Fallick, supra* (quoting from *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992))*.

Wyeth relies on *In re Terazosin Hydrochloride Antitrust Litigation, 160 F. Supp. 2d 1365 (S.D. Fla. 2001)*, where the district court dismissed antitrust claims arising under the laws of states in which no named plaintiffs resided or purchased the drug at issue, relying on *Griffin v. Dugger, 823 F.2d 1476 (11th Cir. 1987)* and *Prado-Steiman ex rel.*

Prado v. Bush, 221 F.3d 1266 (11th Cir. 2000). (*Griffin* and *Prado-Steiman* generally held that a claim cannot be asserted on behalf of a class unless the named plaintiff has "suffered the injury" that gives rise to that claim.) But in *Terazosin,* the district court had dismissed with **[*12]** prejudice the named plaintiffs' federal law claims, leaving **only** a collection of state law claims brought by individual plaintiffs under various state statutes. It was therefore proper to assure that each named plaintiff had actual standing to bring a claim against the defendant. Moreover, to the extent that *Griffin* and *Prado-Steiman* differ from *Fallick* (which the Court does not conclude), this Court is bound to follow *Fallick.*

Ms. Ferrell unquestionably has standing to prosecute her own claims against Wyeth. The propriety of her representation of other individual consumers residing in states other than Florida should be analyzed under Rule 23.

2. Standing of the Funds

Wyeth argues that the Funds have standing to raise state law claims only in the states where the funds are "located," thus limiting them to claims brought under Illinois law (UFCW Fund) and Minnesota law (TCBW Fund). Wyeth cites Maiden v. Biehl, 582 F. Supp. 1209, 1218 (S.D.N.Y. 1984). That case is inapposite, as it discusses application of a New York borrowing statute to determine the appropriate state's statute of limitation in a securities fraud case.

Here, the Complaint **[*13]** alleges that the Funds have paid (or co-paid) for Premarin on behalf of their members residing in various states. The Court rejects Wyeth's argument that they lack standing to prosecute claims anywhere but in their "home" states, because the **purchase** of Premarin - the critical event causing the alleged antitrust injury - did not take place only in Illinois or Minnesota. The actual purchase allegedly took place in the various states where the Funds' members reside.

The Court finds that the Funds have alleged sufficient facts to establish their Article III standing to pursue state law claims in the "Indirect Purchaser States" where their members purchased Premarin. Thus, UFCW Fund has standing to prosecute state law claims in Arizona, Florida, Kansas, Louisiana, Minnesota, Michigan, Nevada, North Carolina, New York, Tennessee, and Wisconsin. TCBW has standing to prosecute state law claims in Minnesota, North Dakota, South Dakota, and Wisconsin. [3]

[*14] 3. New Jersey, Louisiana, Arizona, Tennessee and Maine State Antitrust Claims.

Wyeth next argues that, if the Count III claims survive its standing challenge, claims under these five states' laws must be dismissed for failure to state a claim under those states' laws.

HN4[] New Jersey does not permit an "indirect purchaser" action under the state's antitrust statute, N.J.S.A. § 56:9-1 et seq. While Plaintiffs mention that statute in their opposition memo (Doc. 43, p. 12), the cases they cite deal with the New Jersey "consumer fraud" statute, N.J.S.A. § 56:8-1, et seq., which is not pled in the Complaint. The Court will not widen the scope of the claims at issue here in this fashion. Moreover, the Court has reviewed the two unpublished opinions from New Jersey trial courts which take diametrically opposed positions on the question of whether the "consumer fraud" statute can support an antitrust indirect purchaser action: *Kieffer v. Mylan Laboratories,* Case No. BER-L-365-99-EM (N.J. Super. Ct. Law Div., Sept. 9, 1999), and *Cement Masons Local Union No. 699 v. Mylan Laboratories,* No. MER-L-000431-99 (N.J. Super. Ct. Law Div., April 18, 2000). Given these facts, the Court will **[*15]** decline to exercise pendent jurisdiction over the Count III New Jersey claim, and that claim is dismissed without prejudice.

This Court follows the Fifth Circuit in finding that **HN5**[] Louisiana law does not recognize an indirect purchaser's claim for damages under the state's antitrust statute. Free v. Abbott Lab., 176 F.3d 298 (5th Cir. 1999), *aff'd on*

[3] UFCW has members in the states of Illinois, Kentucky, and Missouri, and TCBW in Indiana, but these four states are not included in the "Indirect Purchaser States" identified in the Complaint. Plaintiffs expressly exclude California from this action.

other grounds, 529 U.S. 333, 146 L. Ed. 2d 306, 120 S. Ct. 1578 (2000). The Count III claim under Louisiana law is dismissed with prejudice.

HN6[] The Arizona Supreme Court has held that the Arizona antitrust statute permits indirect purchaser suits. Bunkers Glass Co. v. Pilkington PLC, 206 Ariz. 7, 75 P.3d 99 (Ariz. 2003). The motion to dismiss the Count III claim under Arizona law is therefore denied, and the UCBW Fund has standing to prosecute that claim.

The Tennessee antitrust statute has been described as applying to conduct occurring within the state, or "predominantly intrastate transactions." See, e.g., Lynch Display Corp. v. National Souvenir Center, Inc., 640 S.W.2d 837, 840 (Tenn. Ct. App. 1982). A more recent decision clarifies the scope of the statute for indirect purchaser actions. **[*16]** See, Sherwood v. Microsoft Corp., 2003 Tenn. App. LEXIS 539, at *73 (Tenn. Ct. App. July 31, 2003) [Tennessee statute applies to conduct that "substantially affects commerce within this state."] While Wyeth contends this decision is "wrong," this Court is not inclined to second-guess the thoughtful determination by a state intermediate appellate court applying state law to the issue of indirect purchaser suits. [4]

The Complaint alleges UFCW Fund's relationship to its subscribers in Tennessee included paying, or copaying, for Premarin on behalf of those subscribers. Therefore, the Tennessee claim should proceed. A more developed factual record is needed concerning whether the conduct occurring within **[*17]** the state falls within the standards articulated by the Tennessee court. The same analysis apparently applies to the Maine antitrust statute. See In re Microsoft Antitrust Litig., 2001 Me. Super. Lexis 47 (Super.Ct. March 26, 2001). The motion to dismiss the Tennessee and Maine claims is denied.

B. Count IV (Unjust Enrichment)

Wyeth argues that the "unjust enrichment" claims in states that follow *Illinois Brick* and preclude antitrust damages claims by indirect purchasers must be dismissed, because the claim attempts to evade state law. Wyeth also seeks dismissal of the unjust enrichment claims in those states that permit indirect purchaser actions, arguing that the antitrust statutes in those states provide a "complete and adequate" remedy at law.

Plaintiffs cite In re Cardizem CD Antitrust Lit., 105 F. Supp.2d 618, 669-670 (E.D. Mich. 2001), to argue that their claims for unjust enrichment, purportedly brought under the laws of all fifty states, should survive. But the facts in *Cardizem* were far different. There, the individual plaintiffs were residents of just ten states who brought unjust enrichment claims in those ten states (along **[*18]** with state antitrust claims in eight of the ten). The case also involved an alleged per se illegal agreement between Cardizem's manufacturer and its generic competitors, involving many millions of dollars paid by the manufacturer to forestall the introduction of generic substitutes for Cardizem. The plaintiffs sought disgorgement of those payments under unjust enrichment principles.

In contrast, the district court in *In re Terazosin Hydrochloride Antitrust Lit., 160 F. Supp. 2d 1365 (S.D. Fla. 2001)* addressed a similar omnibus claim for unjust enrichment, brought under the common law of "every state." The district court dismissed the claim (without prejudice), describing it as an "end run" around state laws that do not permit indirect purchaser damage suits. The court permitted the claim to proceed only in states that also permit indirect purchasers to sue for antitrust damages.

As with the Count III claims, the named Plaintiffs must have standing to prosecute an unjust enrichment claim. Ms. Ferrell's claim under Florida law appears to be a valid alternative remedy to her statutory claim. While there is some Florida authority suggesting that unjust enrichment is not **[*19]** available if plaintiff has an "adequate legal remedy" (see, e.g., Martinez v. Weyerhaeuser Mortgage Co., 959 F. Supp. 1511 (S.D. Fla 1996) and cases cited therein), those cases are based on written contracts, which provide the "adequate legal remedy" to the aggrieved party. Moreover, in a more recent opinion, the *Terazosin* court certified both antitrust and unjust enrichment claims under

---

[4] *See* Meridian Mutual Ins. Co. v. Kellman, 197 F.3d 1178, 1181 (6th Cir. 1999): "A federal court should not disregard the decisions of intermediate appellate state courts unless it is convinced by other persuasive data that the highest court of the state would decide otherwise …"

Florida law. See, *In Re Terazosin Antitrust Lit., 220 F.R.D. 672, 2004 U.S. Dist. LEXIS 6176 (S.D. Fla., April 8, 2004)*.

Similarly, in the states in which the two Funds have standing to pursue the state law antitrust claims, Wyeth has not shown that an unjust enrichment claim is barred as a matter of law as an alternate remedy.

This Court is not persuaded that the unjust enrichment claims, which plaintiffs admit are pled as an alternate remedy to their state ***antitrust law*** claims, should be dismissed under *Rule 12*. As with the Count III claims, the question of whether the named Plaintiffs may prosecute their unjust enrichment claims on behalf of a class of "all" consumers in "all" fifty states is analyzed under *Rule 23*.

CONCLUSION

The Court denies **[*20]** Wyeth's motion to dismiss and to strike (Doc. 8). The Court grants in part and denies in part Wyeth's motion for partial dismissal (Doc. 39).

Civil Procedure > ... > Justiciability > Standing > General Overview

HN12[] Remedies, Damages

Pass-through purchasers of a defendant's products do not have standing to bring suit under the federal ***antitrust law***, § 1 of the Sherman Act. Only direct purchasers could bring such a suit under the Sherman Act, reasoning that the allowance of indirect suits would add whole new dimensions of complexity to treble-damages suits and seriously undermine their effectiveness. To allow indirect plaintiffs to bring suit would be unfair as defendants are prohibited from setting forth the pass-through argument as an affirmative defense.

Governments > Legislation > Interpretation

HN13[] Legislation, Interpretation

It is basic in the construction of legislation that every effort should be made to harmonize the law relating to the same subject matter.

Opinion by: MINIMAN

Opinion

[*175] **[**1014]** MINIMAN, J.S.C.

The matter before the court involves a class action lawsuit initiated against defendant, Minnesota Mining and Manufacturing Company ("3M"), by plaintiffs, Island Mortgages of New Jersey and Perennial Lawn Care, Inc., and other companies that purchased 3M-brand Scotch tape ("plaintiffs"). Plaintiffs allege that defendant's conduct constitutes unconscionable commercial **[**1015]** practice and a violation of the *Consumer Fraud Act.* Defendant now moves to dismiss plaintiffs' complaint for failure to state a claim pursuant to *R. 4:6-2*.

HN1[] Motions to dismiss a plaintiff's complaint should be "approach[ed] with great caution" and should only be granted in "the rarest of instances." *Printing Mart-Morristown v. Sharp Electronics Corp., 116 N.J. 739, 771-72, 563 A.2d 31, 48 (1989).* **[***2]** Despite this caveat, a court must dismiss a plaintiff's complaint if it has failed to articulate a legal basis entitling plaintiff to relief. *Camden County Energy Recovery Assoc., L.P. v. New Jersy Dep't of Envtl. Prot., 320 N.J.Super. 59, 64, 726 A.2d 968, 970 (App. Div. 1999)*. ***HN2***[] On a motion to dismiss, the plaintiff's obligation is "not to prove the case but only to make allegations, which, if proven, would constitute a valid cause of action." *Leon v. Rite Aid Corp., 340 N.J.Super. 462, 472, 774 A.2d 674, 680 (App.Div.2001)*. This court must determine whether plaintiffs have pled a viable cause of action under the *Consumer Fraud Act*.

The complaint alleges that plaintiffs represent a class of persons "who purchased invisible and transparent tape (collectively "transparent tape") products for home and office use in New Jersey during the period commencing four years prior to the filing of the Complaint through the date of the Complaint (the 'Class Period')." Paragraph 3 of the complaint states:

> To increase its profits and protect its powerful and extremely profitable position, 3M engaged in a course of unconscionable conduct aimed at restricting the access of plaintiffs **[***3]** and the class to lower-priced transparent tape offered by 3M competitors, such as LePage's Inc. ("Lepage's"). 3M's tactics prevented competitors from gaining or maintaining large volume sales by stifling growth of private label tape **[*176]** and by coordinating efforts aimed at large distributors to keep retail prices for Scotch tape high.

Plaintiffs allege that rival companies, such as Lepage's, only had a limited market share but still presented a threat to 3M's market dominance.

Paragraph 6 of plaintiff's complaint alleges:

> 3M's strategy was to tie retailers up in exclusive dealing arrangements which prohibited or, at the very least inhibited, retailers from purchasing private label Scotch tape. 3M offered retailers large lump-sum cash payments, promotional allowances and other cash incentives to encourage them to enter into exclusive dealing arrangements with 3M. 3M also lured retailers with a "bundled" rebate structure that rewarded retailers for refusing to carry private label Scotch tape. The effect of such arrangements was to prevent retailers from offering lower cost private label Scotch tape to plaintiffs and the class.

Plaintiffs allege that defendant's bundled **[***4]** rebates, exclusive dealing, and coercive activity "have caused significant harm to class members by increasing the price they have paid for transparent tape above competitive levels and/or by denying them a free choice in a competitive market, as well as the benefits of innovation."

HN3[] The purpose of the *Consumer Fraud Act* is to "prevent deception, fraud, or falsity, whether by acts of commission or omission." *Fenwick v. Kay American Jeep, Inc., 72 N.J. 372, 376, 371 A.2d 13, 15 (1977)*. The act specifically provides that

> ***HN4***[] The act, use or employment by any person of any unconscionable commercial practice, deception, fraud, false pretense, false promise, misrepresentation, or the knowing concealment, suppression, or omission of any material fact with intent that the others rely upon **[**1016]** such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise . . . is declared to be an unlawful practice.
>
> [*N.J.S.A. 56:8-2*]

HN5[] Consistent with its expansive language, the *Consumer Fraud Act* must be "applied broadly in order to accomplish its remedial purpose, namely to root out consumer fraud." *Lemelledo v. Beneficial Mgmt. Corp. of America, 150 N.J. 255, 264, 696 A.2d 546, 551 (1997).* **[***5]**

Plaintiffs allege that defendant's coercive activities constitute unconscionable commercial practices. There is no allegation in the complaint that defendant has used deception, fraud or **[*177]** misrepresentations or has concealed material facts regarding the sale of its Scotch tape to plaintiff consumers. There is no allegation that suggests that defendant had any direct contact with any consumer in plaintiffs' class. Plaintiffs' sole legal theory is that defendant's alleged monopolistic conduct is, in itself, an unconscionable commercial practice as contemplated by the *Consumer Fraud Act*.

New Jersey courts have consistently held that ***HN6***[] the heart of an unconscionable commercial practice is the "capacity to mislead." *Fenwick, supra, 72 N.J. at 378, 371 A.2d 13*; *New Jersey Citizen Action v. Schering-Plough Corporation, 367 N.J.Super. 8, 13, 842 A.2d 174 (App.Div.)*, *certif. denied, 178 N.J. 249, 837 A.2d 1092 (2003)*. *Leon, supra, 340 N.J.Super. at 470, 774 A.2d 674*; In *Leon, supra, 340 N.J.Super. at 471-72, 774 A.2d 674* the court found that defendant drug store's use of a tiered pricing system whereby it charged more to certain customers while advertising **[***6]** its products as having the "best and lowest price" had the capacity to mislead customers. The court noted several times that defendant's pricing policies were relevant only in comparison with their advertisements and that the juxtaposition of the policy and the advertisement constituted a violation of the *Consumer Fraud Act.* *Ibid.* Likewise in *Fenwick, supra, 72 N.J. at 378, 371 A.2d 13* the Court found that the failure of a used car dealership to disclose the mileage of a vehicle in its advertisement could mislead a potential purchaser into believing that the vehicle had only been driven for an average number of miles when it could have been driven a far greater number of miles. The court finds the holdings in *Fenwick, Leon,* and *New Jersey Citizen Action* to be controlling. Plaintiffs have failed to set forth any factual allegation that would satisfy the requirement that a claim for unconscionable commercial practices demonstrate "a capacity to mislead." Even if plaintiffs' factual allegations were true, they have failed to demonstrate a valid cause of action.

The court also finds that even if plaintiffs had alleged a viable claim under the Consumer Fraud Act, plaintiffs **[***7]** lack standing **[*178]** to pursue their claim. Despite the wide reach of the Consumer Fraud Act, the New Jersey Supreme Court has held that in certain cases the Act is inapplicable. In *Daaleman v. Elizabethtown Gas Co., 77 N.J. 267, 271-73, 390 A.2d 566, 568-70 (1978)*, the Supreme Court held that a private utility could not be held liable under the Consumer Fraud Act for fraudulently raising rates. The Court ruled that the pervasive control that the Public Utilities Commission exercised over the industry barred application of the Consumer Fraud Act. The Court articulated its concern regarding the "real possibility of conflicting determinations, rulings and regulations affecting the identical subject matter." *Id. at 272, 390 A.2d at 569*.

The standard set by the Court in *Daaleman* does not rest on how many agencies or separate statutes govern the same practice. ***HN7***[] A "court must look to whether a 'real [**1017] possibility' of conflict would exist if the CFA were to apply to a particular practice." *Lemelledo, supra, 150 N.J. at 269, 696 A.2d at 553*. Applying the *Daaleman* analysis to the present matter, the court finds that the application of the Consumer Fraud Act in this case materially conflicts [***8] with *New Jersey's Antitrust Act*.

There is no dispute that plaintiffs' allegations of unconscionable commercial practices clearly fall within the jurisdiction of the New Jersey's Antitrust Act, which provides: ***HN8***[] "Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce, in this State, shall be unlawful." *N.J.S.A. 56:9-3*. ***HN9***[] The purpose of the act is to prevent trade-restraining practices, which ordinarily deprive the public of the benefits of a competitive market. *E Z Sockets, Inc. v. Brighton-Best Socket Screw Mfg. Inc., 307 N.J.Super. 546, 704 A.2d 1364 (Ch.1996)*, *aff'd* *307 N.J.Super. 438, 704 A.2d 1309 (App.Div. 1996)*. However, as stated in *Daaleman* and *Lemelledo,* overlapping jurisdiction does not *necessarily* mean that the CFA should not also apply to the present matter.

In its motion papers and at oral argument, defendant argued that the application of the CFA would impermissibly conflict with [*179] the standing requirements of the New Jersey Antitrust Act. There are no published New Jersey cases that support defendant's position. However, federal ***antitrust law*** does provide guidance [***9] for this court. *N.J.S.A. 56:9-18* provides: ***HN10***[] "This act shall be construed in harmony with ruling judicial interpretations of comparable Federal antitrust statutes."

HN11[] The statute clearly provides that New Jersey courts must look to federal case law for interpretation of the New Jersey statutes where New Jersey case law is silent. *Kugler v. Koscot Interplanetary, Inc., 120 N.J.Super. 216, 293 A.2d 682 (Ch.Div.1972)*.

In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S.Ct. 2061, 52 L.ED.2D 707 (1977)*, the State of Illinois, on behalf of 700 municipalities brought an antitrust treble damages suit under *§ 4 of the Clayton Act* alleging that concrete block manufacturers had fixed prices in violation of *§ 1 of the Sherman Act.* As in the case before the court, plaintiffs did not purchase directly from defendants. Instead plaintiffs purchased masonry structures from general contractors who purchased from masonry contractors who purchased from defendants. The Court held that plaintiffs, as ***HN12***[] pass-through purchasers of defendants' products, did not have standing to bring suit under federal ***antitrust law***. The Court held that [***10] only direct purchasers could bring such suit under the Act, reasoning that the allowance of indirect suits would "add whole new dimensions of complexity to treble-damages suits and seriously undermine their effectiveness." *Id. at 737, 97 S.Ct. at 2070*.

The Court also determined that to allow indirect plaintiffs to bring suit would be unfair as defendants are prohibited from setting forth the pass-through argument as an affirmative defense. *See* *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 20 L.Ed.2d 1231, 88 S.Ct. 2224 (1968)*, (where the Court held that defendant manufacturers could not argue that purchaser/retailer plaintiffs had mitigated their damages by passing on a portion of their increased costs to consumers).

[*180] In the instant matter, the record clearly demonstrates that plaintiffs' class is constituted of indirect or pass-through purchasers. Plaintiffs allege that they bought 3M products through independent retailers rather than directly from defendant. The holding in *Illinois Brick* clearly stands for the proposition that the instant [**1018] plaintiffs would be barred from bringing suit under federal antitrust statutes. *N.J.S.A. 56:9-18* [***11] incorporates *Illinois Brick* into New Jersey antitrust jurisprudence and bars plaintiffs from bringing suit under the New Jersey Antitrust Act.

This court finds that plaintiffs' attempt to bring suit under the Consumer Fraud Act is in direct conflict with the well-founded policies interpreting federal and New Jersey ***antitrust law***. Plaintiffs in this case allege conduct that is traditionally classified under ***antitrust law***. Although the CFA should be broadly applied, in this instance, allowing plaintiffs to move forward with their suit would undermine the standing requirements of the New Jersey Antitrust Act. ***HN13***[] "It is basic in the construction of legislation that every effort should be made to harmonize the law relating to the same subject matter." *State v. Green, 62 N.J. 547, 554-55, 303 A.2d 312, 316 (1973)*.

The court finds that plaintiffs have no standing to bring suit under the Consumer Fraud Act. As such, defendant's motion to dismiss the complaint for failure to state a claim is granted.

Massachusetts v. Microsoft Corp.

United States Court of Appeals for the District of Columbia Circuit

November 4, 2003, Argued ; June 30, 2004, Decided

HN1[] **Settlements, Antitrust Procedures & Penalties Act**

The Tunney Act, *15 U.S.C.S. § 16(b)-(h)*, provides the district court with several procedural options to aid it in making its determination whether a proposed consent decree is in the public interest. The court may take testimony of Government officials or experts as it deems appropriate, *15 U.S.C.S. § 16(f)(1)*; authorize participation by interested persons, including appearances by amici curiae, *15 U.S.C.S. § 16(f)(3)*; review comments and objections filed with the Government concerning the proposed judgment, as well as the Government's response thereto, *15 U.S.C.S. § 16(f)(4)*; and take such other action in the public interest as the court may deem appropriate, *15 U.S.C.S. § 16(f)(5)*.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN2[] **Standards of Review, Clearly Erroneous Review**

The appellate court reviews a federal district court's findings of fact for clear error, but resolve issues of law de novo.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

HN3[] **Standards of Review, Abuse of Discretion**

And appellate court reviews the district court's decision whether to grant equitable relief only for abuse of discretion. The district court is clothed with "large discretion" to fit its decree to the special needs of the individual case.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] **Private Actions, Standing**

It is axiomatic that the antitrust laws were passed for the protection of competition, not competitors.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > ... > Proof > Custom > Expert Testimony

HN5[] **Antitrust & Trade Law, Sherman Act**

In the context of fashioning an antitrust remedy, compliance with industry standards is largely a subjective undertaking, such that full compliance with a standard is often a difficult and ambiguous process.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

In fashioning an antitrust remedy, although a district court is empowered to fashion appropriate restraints on the antitrust violator's future activities both to avoid a recurrence of the violation and to eliminate its consequences, the resulting relief must represent a reasonable method of eliminating the consequences of the illegal conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

In reviewing an antitrust remedy, the appellate court should be particularly disinclined to require more disclosure where the district court is adopting a forward-looking provision addressing conduct not previously held to be anticompetitive.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Courts > Authority to Adjudicate

HN8[] **Antitrust & Trade Law, Sherman Act**

Where the effect of a broad antitrust remedy upon an antitrust violator's incentive to innovate would be substantial, not even the broad remedial discretion enjoyed by the district court extends to the adoption of provisions so likely to harm consumers.

Antitrust & Trade Law > Sherman Act > General Overview

International Trade Law > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

In the context of fashioning an antitrust remedy, when the purpose to restrain trade appears from a clear violation of law, it is not necessary that all of the untravelled roads to that end be left open and that only the worn one be closed. True enough, but when the district court undertakes to block the untravelled roads by adopting a forward-looking provision, its discretion is necessarily less broad because, without liability findings to mark the way, it is in danger of imposing restrictions that prevent the defendant from forging new routes to serve consumers.

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > Injunctions

HN10[] **Remedies, Injunctions**

To ensure that antitrust relief is effectual, otherwise permissible practices connected with the acts found to be illegal must sometimes be enjoined.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Private Actions, Standing**

Antitrust laws designed to protect competition, not competitors.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Private Actions, Remedies**

In the antitrust context, where the court views proposed relief as structural, it applies a test of causation wherein the district court is to consider whether divestiture is an appropriate remedy in light of the causal connection between the defendant's anticompetitive conduct and its dominant position in the market for operating systems. Structural relief is designed to eliminate the monopoly altogether and requires a clearer indication of a significant causal connection between the conduct and creation or maintenance of market power.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Private Actions, Remedies**

Among the objectives the United States Supreme Court deems relevant to fashioning relief in an antitrust case is to deny to the defendant the fruits of its statutory violation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] **Private Actions, Remedies**

The fruits of an antitrust violation must be identified before they may be denied.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] Private Actions, Remedies

A district court certainly does not abuse its discretion by adopting a remedy that denies an antitrust violator the ability to take the same or similar actions to limit competition in the future rather than a remedy aimed narrowly at redressing the harm suffered by specific competitors in the past. This distinction underlies the difference between a case brought in equity by the Government and a damage action brought by a private plaintiff.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Parties > Intervention > General Overview

Civil Procedure > Parties > Intervention > Permissive Intervention

HN16[] Settlements, Consent Judgments

Fed. R. Civ. P. 24 governs intervention for purpose of filing appeal under Tunney Act.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Parties > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

Civil Procedure > Parties > Intervention > General Overview

HN17[] Settlements, Antitrust Procedures & Penalties Act

Once a common question of fact or law is found, *Fed. R. Civ. P. 24(b)(2)* says that the district court, in exercising its discretion regarding intervention, shall consider whether the intervention will unduly delay or prejudice the adjudication of the rights of the original parties. The "delay or prejudice" standard presumably captures all the possible drawbacks of piling on parties; the concomitant issue proliferation and confusion will result in delay as parties and court expend resources trying to overcome the centrifugal forces springing from intervention, and prejudice will take the form not only of the extra cost but also of an increased risk of error. Further, the "delay or prejudice" standard of *Rule 24(b)(2)* appears to force consideration of the merits of the would-be intervenor's claims.

Civil Procedure > Parties > Intervention > Motions to Intervene

Civil Procedure > Parties > Intervention > General Overview

HN18[] Intervention, Motions to Intervene

Procedural defects in connection with intervention motions should generally be excused by a court.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN19[] Settlements, Antitrust Procedures & Penalties Act

Under the Tunney Act, *15 U.S.C.S. § 16(b)-(h)*, the district court's "public interest" inquiry into the merits of the consent decree is a narrow one: The district court should withhold its approval of the decree only if any of the terms appear ambiguous, if the enforcement mechanism is inadequate, if third parties will be positively injured, or if the decree otherwise makes a 'mockery of judicial power. Such limited review is obviously appropriate for a consent decree entered into before a trial on the merits because the court's authority to review the decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN20[] Settlements, Antitrust Procedures & Penalties Act

The Tunney Act, *15 U.S.C.S. § 16(b)-(h)*, does not distinguish between pre- and post-trial consent decrees; the Act simply requires the district court, "before entering any consent judgment" in a Government antitrust case, to determine that the entry of such judgment is in the public interest. *15 U.S.C.S. § 16(e)*.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN21[] Settlements, Consent Judgments

Although the district court may not ignore the grounds upon which the defendant was held liable, neither should it reject a consent decree simply because it believes the Government could have negotiated a more exacting decree. Any settlement, even one negotiated after a trial on the merits, may reflect a concession the government made in bargaining, and yet be within the reaches of the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN22[] **Settlements, Consent Judgments**

A district court has a continuing responsibility for interpretation of the consent decree, and it is entitled to insist on that degree of precision concerning the resolution of known issues as to make its task, in resolving disputes, reasonably manageable. A consent decree is not ambiguous in the sense disallowed in MSL merely because it contains words that are not defined therein, or because the intervenors think certain words could be defined differently or with greater specificity.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN23[] **Settlements, Consent Judgments**

The district court must withhold approval of a consent decree if the enforcement mechanism is inadequate.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN24[] **Settlements, Consent Judgments**

Compliance with the procedural requirements of the Tunney Act, *15 U.S.C.S. § 16(b)-(h)*, ensures the district court has before it the information it needs in order to make an informed determination whether the decree is in the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > US Department of Justice Actions > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN25[] **Settlements, Antitrust Procedures & Penalties Act**

In the context of a consent decree in an antitrust action initiated by the United States Government, *15 U.S.C.S. § 16(b)(6)* calls only for a description and evaluation of alternatives to a proposal actually considered by the United States. It does not call for a "complete" description of all the Government's options, nor for any discussion of an alternative not "actually considered" by the Government.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN26[] **Settlements, Antitrust Procedures & Penalties Act**

The Tunney Act, *15 U.S.C.S. § 16(b)-(h)*, requires the defendant to file with the district court all written or oral communications by or on behalf of such defendant with any officer or employee of the United States concerning or relevant to a proposed consent decree. *15 U.S.C.S. § 16(g)*.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Governments > Federal Government > US Congress

HN27[] **Settlements, Consent Judgments**

15 U.S.C.S. § 16(g) required an antitrust defendant to disclose its communications with "any officer or employee of the United States." Reference is made to "United States" 18 times in the Tunney Act, *15 U.S.C.S. § 16(b)-(h)*. In all 17 references other than the one in *§ 16(g)* the term plainly denotes only the Executive Branch.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN28[] **Settlements, Consent Judgments**

See *15 U.S.C.S. § 16(b)*.

Governments > Legislation > Interpretation

HN29[] **Legislation, Interpretation**

It is a commonplace of statutory construction that identical words used in different parts of the same act are intended to have the same meaning.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN30[] **Settlements, Consent Judgments**

Because only the Executive Branch can settle an antitrust case, only contacts with the Executive Branch are relevant to the purpose of the Tunney Act, *15 U.S.C.S. § 16(b)-(h)* -- namely, to block settlements that are not in the public interest. The United States Court of Appeals for the District of Columbia Circuit therefore concludes that the term "United States" as used in *15 U.S.C.S. § 16(g)* refers only to the Executive Branch.

Counsel: Steven R. Kuney argued the cause for appellant Commonwealth of Massachusetts, ex rel., in No. 02-7155. With him on the briefs were Brendan V. Sullivan, Jr., Thomas F. Reilly, Attorney General, Attorney General's Office of the Commonwealth of Massachusetts, and Glenn S. Kaplan, Assistant Attorney General. John E. Schmidtlein and Nicholas J. Boyle entered appearances.

Kenneth W. Starr, Robert H. Bork, David M. Gossett, Elizabeth S. Petrela, David M. Falk, and Mitchell S. Pettit were on the brief of amici curiae The Computer and Communications Industry Association, et al., in support of appellant in No. 02-7155. Glenn B. Manishin entered an appearance.

Deborah P. Majoras, Deputy Assistant Attorney General, U.S. Department of Justice, argued the cause for appellee United States of America in No. 03-5030. With her **[***2]** on the brief were R. Hewitt Pate, Assistant Attorney General, and Catherine G. O'Sullivan and David Seidman, Attorneys.

Michael Lacovara and Steven L. Holley argued the causes for appellees. With them on the briefs were John L. Warden, Richard J. Urowsky, Richard C. Pepperman II, Bradley P. Smith, Thomas W. Burt, David A. Heiner, Jr., Charles F. Rule, and Dan K. Webb.

Judges: Before: GINSBURG, Chief Judge, and EDWARDS, SENTELLE, RANDOLPH, ROGERS, and TATEL, Circuit Judges. Opinion for the Court filed by Chief Judge GINSBURG.

Opinion by: [*1203] [156]** GINSBURG

Opinion

* * *

GINSBURG, *Chief Judge*: In *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34 (D.C. Cir. 2001)* (*Microsoft III*), we affirmed in part and reversed in part the judgment of the district court holding Microsoft had violated *§§ 1 and 2* of the Sherman Antitrust Act, vacated the associated remedial order, and directed the district court, on the basis of further proceedings, to devise a remedy "tailored to fit the wrong creating the occasion" therefor, *id. at 107, 118-19*. On remand, the United States and certain of the plaintiff states entered into a settlement agreement with Microsoft. Pursuant to the Antitrust Procedures and Penalties (Tunney) Act, *15 U.S.C. §§ 16(b)-(h)*, the district court held the parties' proposed consent decree, as amended to allow the court to act *sua sponte* to enforce the decree, was in "the **[*1204]** **[**157]** public interest." Meanwhile, the Commonwealth **[***4]** of Massachusetts and several other plaintiff states refused to settle with Microsoft and instead litigated to judgment a separate remedial decree. The judgment entered by the district court in their case closely parallels the consent decree negotiated by the United States.

Massachusetts alone appeals the district court's entry of that decree. It argues the district court abused its discretion in adopting several provisions Microsoft proposed while rejecting several others Massachusetts and the other litigating states proposed. Massachusetts also challenges a number of the district court's findings of fact. Based upon the record before us in *Microsoft III* and the record of the remedial proceedings following remand, we affirm the district court's remedial decree in its entirety.

The Computer and Communications Industry Association (CCIA) and the Software and Information Industry Association (SIIA) separately appeal the district court's denial of their motion, following the district court's approval of the consent decree between the United States and Microsoft, to intervene in the case for the purpose of appealing the district court's public-interest determination. They argue the **[***5]** factors the district court was to consider in determining whether to allow them to intervene weighed in their favor. We agree and reverse the district court's denial of their motion to intervene for the purpose of appealing that court's public-interest determination.

CCIA and SIIA make various arguments -- some overlapping those raised by Massachusetts -- that the consent decree between the United States and Microsoft is not in the public interest. They also argue the parties did not satisfy the procedural requirements of the Tunney Act. For these reasons, they seek vacatur of the district court's order approving the consent decree and a remand for entry of "a proper remedy." We find no merit in any of CCIA's and SIIA's objections, substantive or procedural. We therefore uphold the district court's approval of the consent decree as being in the public interest.

I. Background

The facts underlying the present appeals have been recounted several times. *See New York v. Microsoft Corp., 224 F. Supp. 2d 76 (D.D.C. 2002)* (*States' Remedy*); *United States v. Microsoft Corp., 231 F. Supp. 2d 144 (D.D.C. 2002)* (*U.S. Consent Decree*); *see also Microsoft* **[***6]** *III*. We therefore limit our discussion of the facts and of the proceedings to a brief review of events prior to our remand in 2001 and a more detailed account of what has transpired since then.

In May 1998 the United States filed a complaint against Microsoft alleging violations of federal antitrust laws. At the same time, a number of states and the District of Columbia filed a complaint against Microsoft alleging violations of both federal and state antitrust laws. The two complaints, which the district court consolidated, sought various forms of relief, including an injunction against certain of Microsoft's business practices.

After a lengthy bench trial the district court entered findings of fact, *United States v. Microsoft Corp., 84 F. Supp. 2d 9 (D.D.C. 1999)* (*Findings of Fact*), and held Microsoft had violated *§§ 1 and 2* of the Sherman Act by illegally maintaining its monopoly in the market for "Intel-compatible PC operating systems," by attempting to monopolize the browser market, and by tying its Windows operating system to its Internet Explorer (IE) browser. *United States v. Microsoft Corp., 87 F. Supp. 2d 30 (D.D.C. 2000)* (*Conclusions* **[***7]** *of Law*). The **[*1205]** **[**158]** district court also held Microsoft violated the antitrust laws of the several states. *Id. at 56*. Based upon its findings of fact and conclusions of law, the district court decreed that Microsoft would be split into two separate companies, one selling operating systems and one selling program applications. *See United States v. Microsoft Corp., 97 F. Supp. 2d 59 (D.D.C. 2000)* (*Remedy I*). Microsoft appealed the decisions of the district court, alleging several legal and factual errors.

We upheld the district court's ruling that Microsoft violated *§ 2 of the Sherman Act* by the ways in which it maintained its monopoly, but we reversed the district court's finding of liability for attempted monopolization, and we remanded the tying claim to the district court to apply the rule of reason rather than the rule of *per se* illegality. *See Microsoft III*. We also vacated the district court's remedial decree, for three reasons: "First, [the district court had] failed to hold an evidentiary hearing despite the presence of remedies-specific factual disputes"; "second, the court did not provide adequate reasons for its decreed remedies"; **[***8]** and third, we had "drastically altered the scope of Microsoft's liability, and it [was] for the District Court in the first instance to determine the propriety of a specific remedy for the limited ground of liability which we had upheld." *Id. at 107*.

On remand the district court ordered the parties to file a Joint Status Report. This they did in September 2001, whereupon the district court ordered them to undertake settlement discussions. *See United States v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272 (D.D.C. Sept. 28, 2001)*. As a result, the United States and the States of Illinois, Louisiana, Maryland, Michigan, New York, North Carolina, Ohio, and Wisconsin, and the Commonwealth of Kentucky, agreed to enter into a consent decree with Microsoft. On November 6, 2001 the settling parties filed a Revised Proposed Final Judgment, 1 Joint Appendix in No. 03-5030 (hereinafter J.A. (I)) at 113-30, for the district court's review. The States of California, Connecticut, Florida, Iowa, Kansas, Minnesota, Utah, and West Virginia, the Commonwealth of Massachusetts, and the District of Columbia refused to enter into the consent decree. The district court **[***9]** therefore bifurcated the remaining proceedings: On "Track I" was the district court's "public interest" review of the proposed consent decree, as required by the Tunney Act whenever the Government proposes to settle a civil antitrust case, *see 15 U.S.C. § 16(e)*; on "Track II" was the continuing litigation between the nonsettling states (hereinafter "the States") and Microsoft concerning the remedy.

Track I

On November 15, 2001 the Government filed its Competitive Impact Statement (CIS), 1 J.A. (I) at 136-202, as required by the Act, *15 U.S.C. § 16(b)*, and on November 28, 2001 it published in the Federal Register both the Revised Proposed Final Judgment and the CIS for public comment. *66 Fed. Reg. 59,452 (Nov. 28, 2001)*. In February 2002 the Government filed with the district court its response to the more than 32,000 public comments it had received, along with a Second Revised Proposed Final Judgment, 6 Joint Appendix in No. 02-7155 (hereinafter J.A. (II)) at 3664-81, reflecting modifications agreed to by the settling parties in the light of the public comments.

The public comments, which the Government made available **[***10]** at its website in March 2002, were subsequently published in the Federal Register as well. *67 Fed. Reg. 23,654 (May 3, 2002)*. The Tunney Act also requires the defendant to file with the district court "any and all written or oral communications … with any officer or employee of the United **[*1206]** **[**159]** States" relating to the proposed consent judgment. *15 U.S.C. § 16(g)*. Microsoft made such a filing in December 2001 and again in March 2002. *See* Part III.C.2.

HN1[] The Tunney Act provides the district court with several procedural options to aid it in making its determination whether the proposed consent decree is in the public interest. The court may "take testimony of Government officials or experts" as it deems appropriate, *15 U.S.C. § 16(f)(1)*; authorize participation by interested persons, including appearances by *amici curiae*, *id.* *§ 16(f)(3)*; review comments and objections filed with the Government concerning the proposed judgment, as well as the Government's response thereto, *id*. *§ 16(f)(4)*; and "take such other action in the public interest as the court may deem appropriate," *id*. *§ 16(f)(5)*. The district court exercised **[***11]** several of these options. It held a hearing with the purpose of having the parties provide to the court information it needed to decide whether to approve the Second Revised Proposed Final Judgment. The district court denied CCIA's request to intervene in the case, *see id*. *§ 16(f)(3)*, but it did allow CCIA and SIAA to participate in the hearing as *amici curiae*. In July 2002 the district court concluded both the Government and Microsoft had complied with the requirements of the Tunney Act and held that the matter was ripe for the court to determine whether the decree was in the "public interest." *United States v. Microsoft Corp., 215 F. Supp. 2d 1, 23 (D.D.C. 2002)* (*Tunney Act Proceedings*).

On November 1, 2002 the district court ruled the Second Revised Proposed Final Judgment would be in the public interest if modified in one respect: The parties would have to provide for the district court to "retain jurisdiction to take action *sua sponte* in conjunction with the enforcement of the decree." *U.S. Consent Decree, at 202*. This they did in a Third Revised Proposed Final Judgment, which the district court duly entered. *United States v. Microsoft Corp., 2002 U.S. Dist. LEXIS 22861, 2002 WL 31654530 **[***12]** (D.D.C. Nov. 12, 2002)* (*Final Consent Decree*). [1]

On December 20, 2002 CCIA and SIIA filed a joint motion for leave to intervene, as of right or alternatively by permission, *see* *FED. R. CIV. P. 24*, for the purpose of appealing the district court's **[***13]** judgment that the consent decree was in the "public interest." The district court denied their motion, *United States v. Microsoft Corp., 2003 U.S. Dist. LEXIS 1480, 2003 WL 262324 (D.D.C. Jan. 11, 2003)* (*Order Denying Intervention*), and the movants now appeal both the district court's denial of their motion for leave to intervene and, if allowed, the district court's public-interest determination under the Tunney Act.

Track II

Pursuant to the district court's scheduling order of September 28, 2001, Microsoft and the States submitted competing remedial proposals in December of that year. This time the States did not propose to divide Microsoft but, as discussed in Part II.A.6, they did include proposals the district court considered structural in nature, including requirements that Microsoft offer "open source licensing for Internet Explorer" and "auction to a third party the **[*1207]** **[**160]** right to port Microsoft Office to competing operating systems." Microsoft objected to the States' proposed remedy and offered as an alternative the Revised Proposed Final Judgment to which it had agreed in the Track I proceedings. Both sides later submitted revised proposals. In February 2002 Microsoft submitted **[***14]** the Second Revised Proposed Final Judgment, and in March the States submitted a Second Proposed Remedy (SPR), 6 J.A. (II) at 3160-3201. The Second Revised Proposed Final Judgment and the SPR are the two proposals the district court ultimately reviewed.

---

[1] The district court also held the "public interest" standard made applicable to the Government's case by the Tunney Act should be applied to the settlement between the settling states and Microsoft in order to meet the generally applicable requirement of circuit law that any consent decree "fairly and reasonably resolve[] the controversy in a manner consistent with the public interest." *New York v. Microsoft Corp., 231 F. Supp. 2d 203, 205 (D.D.C. 2002)* (citing *Citizens for a Better Env't v. Gorsuch, 231 U.S. App. D.C. 79, 718 F.2d 1117, 1126 (D.C. Cir. 1983))*. The district court's public-interest determination in the settling states' case is not at issue in the current appeals.

After an expedited discovery schedule, the hearing on remedies began in March 2002 and ran for 32 trial days spanning three months, over which time the court reviewed written direct testimony and heard live testimony from dozens of witnesses. [2] *States' Remedy, at 87*. The district court issued its findings of fact and its legal conclusions in a combined opinion. The final judgment in the proceedings on Track II -- that is, the remedy adopted by the district court -- is attached as an appendix to the district court's opinion. *See States' Remedy, at 266-77*.

[*15]** Massachusetts alone among the States appeals. We address the Commonwealth's appeal in Part II below and CCIA's and SIIA's appeal in Part III.

II. *Commonwealth of Massachusetts v. Microsoft*, No. 02-7155

Cir. 1996)*; *see also* FED. R. CIV. P. 52(a) ("findings of fact … shall not be set aside unless clearly erroneous"), but resolve issues of law *de novo*, *Modern Elec., Inc., 81 F.3d at 244*. ***HN3***[] We review the district court's decision whether to grant equitable relief only for abuse of discretion. *See Microsoft III, at 105*; *see also Ford Motor Co. v. United States, 405 U.S. 562, 573, 31 L. Ed. 2d 492, 92 S. Ct. 1142* (district court "clothed with 'large discretion' to fit the decree to the special needs of the individual case").

A. Remedial Proposals

Massachusetts objects to several provisions the district court included in the remedial decree. The Commonwealth also appeals the district court's refusal to adopt certain other provisions proposed **[***16]** by the States.

1. Commingling

In *Microsoft III* we upheld the district court's finding that Microsoft's integration of IE and the Windows operating system generally "prevented OEMs from pre-installing other browsers and deterred consumers from using them." *253 F.3d at 63-64*. Because they could not remove IE, installing another browser meant the OEM would incur the costs of supporting two browsers. *Id. at 64*. Accordingly, OEMs **[*1208]** **[**161]** had little incentive to install a rival browser, such as Netscape Navigator. Relying upon the district court's findings of fact, we determined that Microsoft took three actions to bind IE to Windows: (1) it excluded IE from the "Add/Remove Programs" utility; (2) it commingled in the same file code related to browsing and code used by the operating system so that removal of IE files would cripple Windows; and (3) it designed Windows in such a manner that, in certain circumstances, a user's choice of an internet browser other than IE would be overridden. *Id. at 64-65*. Although all three acts had anticompetitive effects, only the first two had no offsetting justification and, therefore, "constituted exclusionary conduct[] in violation **[***17]** of § 2." *Id. at 67*. As for overriding the user's choice of an internet browser, we held the plaintiffs had neither rebutted Microsoft's proffered technical justification nor demonstrated that its justification was outweighed by the anticompetitive effect. We therefore concluded Microsoft was not "liable for this aspect of its product design." *Id*.

On remand, turning to the commingling of IE and Windows code, the district court stated that an appropriate remedy "must place paramount significance upon addressing the exclusionary effect of the commingling, rather than the mere conduct which gives rise to the effect." *States' Remedy, at 156*. The court was concerned about adopting any remedy that would require Microsoft to remove Windows software code -- as the States' proposed remedy would do -- based upon what it perceived to be a very difficult, even if not "technologically impossible," task. *Id. at 157*. For instance, the court found the States did not offer a reasonable method of distinguishing "operating

[2] The States presented the testimony of thirteen fact witnesses: Peter Ashkin, James Barksdale, John Borthwick, Anthony Fama, Richard Green, Mitchell Kertzman, Dr. Carl Ledbetter, Michael Mace, Steven McGeady, Larry Pearson, David Richards, Jonathan Schwartz, and Michael Tiemann; and of two expert witnesses: Dr. Andrew Appel and Dr. Carl Shapiro. Microsoft presented the testimony of fifteen fact witnesses: Dr. James Allchin, Linda Wolfe Averett, Scott Borduin, David Cole, Heather Davisson, Brent Frei, William Gates III, James Thomas Greene, Chris Hofstader, Christopher Jones, Will Poole, W.J. Sanders III, Robert Short, Gregg Sutherland, and Richard Ulmer; and of four experts: Dr. John Bennett, Dr. Kenneth Elzinga, Dr. Stuart Madnick, and Dr. Kevin Murphy.

system" code from "nonoperating system" code, such as code that provides middleware functionality. [3] *Id*. Moreover, based upon "testimony of various [independent **[***18]** software vendors (ISVs)] that the quality of their products would decline if Microsoft were required to remove code from Windows," the court concluded both ISVs and consumers would be harmed if Microsoft were forced to redesign Windows by removing software code. *Id. at 158*. Finally, the district court was alert to "the admonition [in the case law] that it is not a proper task for the Court to undertake to redesign products." *Id.*; *see also* *United States v. Microsoft Corp., 331 U.S. App. D.C. 121, 147 F.3d 935, 948 (D.C. Cir. 1998)* (*Microsoft II*) ("Antitrust scholars have long recognized the undesirability of having courts oversee product design"). Accordingly, the district court instead approved the proposed requirement that Microsoft "permit OEMs to remove end-user access to aspects of the Windows operating system which perform middleware functionality." *States' Remedy, at 159*. Specifically, § III.H of the decree requires Microsoft to "allow end users … and OEMs … to enable or remove access to each Microsoft Middleware Product or Non-Microsoft Middleware Product …." *Id. at 270*.

[*19]** **[*1209]** **[**162]** Massachusetts maintains the district court erred by addressing the remedy to the exclusionary effect of commingling and not to the commingling itself. In response, Microsoft points out that in the liability proceedings the plaintiffs were concerned primarily with end-user access and that the decree originally entered by the district court likewise addressed Microsoft's binding its middleware to its operating system; the remedy was to allow both OEMs and end users to remove access to Microsoft middleware. *Remedy I, at 68*. That is why on remand the district court observed that "nothing in the rationale underlying the commingling liability finding requires removal of software code to remedy the violation." *States' Remedy, at 158*. We agree; the district court's remedy is entirely consistent with its earlier finding that "from the user's perspective, uninstalling Internet Explorer [with the Add/Remove Programs utility is] equivalent to removing the Internet Explorer program from Windows." *Findings of Fact P 165, at 51*.

The district court's decision to fashion a remedy directed at the effect of Microsoft's commingling, rather than to prohibit commingling, was within **[***20]** its discretion. The end-user access provision does this, and it avoids the drawbacks of the States' proposal requiring Microsoft to redesign its software. Allowing an OEM to block end-user access to IE gives the OEM control over the costs associated with supporting more than one internet browser. Indeed, had Microsoft not removed IE from the Add/Remove Programs utility in the first place, OEMs would have retained a simple and direct method of avoiding such costs. *See, e.g.,* Direct Testimony of Dr. Stuart Madnick P 177*,* 5 J.A. (II) at 2887.

Massachusetts says there is unrebutted testimony in the record indicating the removal of end-user access is insufficient "to reduce OEMs' disincentives to install rival middleware." Not so. The cited testimony is that end-users "may accidentally trigger one program when they mean to trigger another. This is especially so when, under Microsoft's Proposed Remedy, Windows is allowed to launch Microsoft middleware on a system on which a consumer has not chosen Microsoft's program to be the default version of the application." Direct Testimony of Peter Ashkin P 78*,* 5 J.A. (II) at 3100; *see also* PP 77, 79-80, *id*. at 3100-01. First, **[***21]** this testimony indicates only that removal of end-user access to IE may not eliminate every last "accidental" invocation of IE, not that the incidence will not be reduced, as it no doubt will be. Second, under § III.H.2 end users and OEMs may "designate a Non-Microsoft Middleware Product to be invoked in place of [a] Microsoft Middleware Product … in any case where the Windows Operating System Product would otherwise launch the Microsoft Middleware Product …," *States' Remedy § III.H.2, at 270-71*, which apparently provides OEMs a method to address the conduct about which Massachusetts is concerned.

---

[3] As we explained in *Microsoft III*, the term "middleware" refers to software products that expose their "Applications Programming Interfaces," upon which software developers rely in writing applications. *253 F.3d at 53*; *see also Findings of Fact P 28, at 17*. The middleware at issue in *Microsoft III* was primarily web-browsing software. The district court's remedy in this case, however, covers a far broader array of middleware. Accordingly, the district court was at pains to define Microsoft's middleware and that of its rivals. ***See States' Remedy §§ VI.J, VI.K, VI.M, VI.N, at 275-76***. We need not here recount the district court's extensive treatment of those definitions, *see* ***States' Remedy, at 112-21***, but the definitions are discussed as needed below.

Finally, the accidental invocations claimed in the cited testimony do not reflect the nature of the concerns OEMs had at the time the district court made its *Findings of Fact*. The district court found Microsoft had combined commingling of code and removal of IE from the Add/Remove Programs utility in a manner that ensured the presence of IE on the Windows desktop. *See Findings of Fact P 241, at 69*. The lack of any way to remove end-user access to IE -- now squarely addressed in § III.H of the decree -- made the IE icon an "unavoidable presence" on the Windows desktop; **[***22]** that was what led "to confusion among novice users." *Id. P 217, at 63*. More, that is, was involved than the occasional invocation of IE by **[*1210]** **[**163]** accident; IE was always present because Microsoft prevented OEMs from removing both the code and the end-user's access to it. The accidental invocations of Microsoft middleware claimed in the Ashkin testimony -- to the extent not already resolved by § III.H.2 -- are hardly likely to generate the level of support costs OEMs faced when the IE icon was on every desktop. Certainly the cited testimony is no evidence of such significant costs.

The district court fashioned a remedy aimed at reducing the costs an OEM might face in having to support multiple internet browsers. The court thereby addressed itself to Microsoft's efforts to reduce software developers' interest in writing to the Application Program Interfaces (APIs) exposed by any operating system other than Windows. Far from abusing its discretion, therefore, the district court, by remedying the anticompetitive effect of commingling, went to the heart of the problem Microsoft had created, and it did so without intruding itself into the design and engineering of the Windows operating system. **[***23]** We say, Well done!

But soft! Massachusetts and the *amici* claim the district court nonetheless erred in rejecting a "code removal" remedy for Microsoft's commingling, principally insofar as the court was concerned with "Microsoft's ability to provide a consistent API set," which Microsoft referred to as the problem of Windows' "fragmentation." [4] They argue that any effort to keep software developers writing to Microsoft's APIs -- and thereby avoiding "fragmentation" -- is not procompetitive but rather "an argument against competition."

The **[***24]** district court raised its concern about fragmentation in connection with the States' proposal that Microsoft be required to remove its middleware code from the code of its Windows operating system, as follows:

> Microsoft shall not, in any Windows Operating System Product … it distributes … Bind any Microsoft Middleware Product to the Windows Operating System unless Microsoft also has available to license, upon the request of any Covered OEM licensee or Third-Party Licensee, and supports both directly and indirectly, an otherwise identical but "unbound" Windows Operating System Product ….

SPR § 1, 6 J.A. (II) at 3166. In other words, Microsoft would be required to make it possible for OEMs and end users to "readily remove or uninstall [from Windows] the binary code" of any Microsoft Middleware Product (as that term is defined in the States' proposal). *Id.* §§ 22.d & 22.e, 6 J.A. (II) at 3193. The district court found evidence the States' proposal "would hinder, or even destroy Microsoft's ability to provide a consistent API set." *States' Remedy, at 252*. This evidence included testimony that it would be

> impossible for Microsoft to maintain the same **[***25]** high level of operating-system balance and stability on which software developers and customers rely. Developers will be less likely to write software programs to an unstable or unpredictable operating system based on the risk that their programs will not function as designed, thereby reducing customer satisfaction.

[*1211] **[**164]** Direct Testimony of Scott Borduin P 61, 2 J.A. (II) at 1327. [5] The district court concluded, "The weight of the evidence indicates the fragmentation of the Windows platform would be significantly harmful to Microsoft, ISVs, and consumers." *States' Remedy, at 253*.

---

[4] Massachusetts also argues the district court erred insofar as it rejected the States' proposal because the proposal did not provide adequate guidance for determining which code constitutes Microsoft middleware and was otherwise too difficult technically. The district court's findings, however, discussed in part at the outset of this section, fully support its reasons for rejecting the States' unbinding remedy. ***See States' Remedy, 245-52***; *see also* *id. at 255*.

[5] *See also* Madnick P 197, 5 J.A. (II) at 2899 ("To the extent that licensees used the non-settling States' remedies to create multiple versions of Windows with differing combinations of APIs, applications developers and consumers would lose one of the

[*26]** Massachusetts argues the district court's finding "ignores and is at odds with this Court's holding that Microsoft's desire to keep developers focused on its APIs was merely another way of saying it 'wants to preserve its power in the operating system market,'" citing *Microsoft III, at 71*. Indeed, as we stated in *Microsoft III*, "Microsoft's only explanation for its exclusive dealing [contracts with Internet Access Providers (IAPs)] is that it wants to keep developers focused upon its APIs -- which is to say, it wants to preserve its power in the operating system market." *Id.* We went on to state, however, that this "is not an unlawful end, but neither is it a procompetitive justification for the specific means here in question, namely, exclusive dealing contracts with IAPs." *Id.*

Massachusetts would turn our observation about Microsoft's rationale for its exclusive contracts with IAPs into a critique of the district court's concern with the extreme fragmentation of Windows the court found was likely to occur if it adopted the States' code removal proposal. But the two points cannot be equated. The States made a proposal the district court found might have resulted **[***27]** in there being "more than 1000" versions of Windows. *See States' Remedy, at 253* (citing Direct Testimony of Dr. John Bennett PP 47, 55, 5 J.A. (II) at 2997-98, 3001). Letting a thousand flowers bloom is usually a good idea, but here the court found evidence, as discussed above, that such drastic fragmentation would likely harm consumers. *See also* Direct Testimony of Dr. Kenneth Elzinga P 102, 5 J.A. (II) at 2739-40 ("Lowering barriers to entry by destroying … real benefits … harms consumers and is not pro-competitive"). Although it is almost certainly true, as both Massachusetts and the *amici* claim, that such fragmentation would also pose a threat to Microsoft's ability to keep software developers focused upon its APIs, addressing the applications barrier to entry in a manner likely to harm consumers is not self-evidently an appropriate way to remedy an antitrust violation. *See Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* ***HN4***[] ("It is axiomatic that the antitrust laws were passed for 'the protection of *competition*, not *competitors*,' " quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* **[***28]** (emphases in original)).

The district court's end-user access provision fosters competition by opening the channels of distribution to non-Microsoft middleware. It was Microsoft's foreclosure of those channels that squelched nascent middleware threats and furthered the dominance of the API set exposed by its operating system. The exclusive contracts into which Microsoft entered with IAPs were likewise aimed at foreclosing channels through which rival middleware might otherwise have been distributed. Prohibiting Microsoft from continuing those exclusive arrangements, *see States' Remedy § III.G, at 269-70*, would not have the **[*1212]** **[**165]** same deleterious effect upon consumers as would the fragmentation of Windows.

Amici CCIA and SIIA seem to view fragmentation as merely competition by another name. Accordingly, they see fragmentation as a natural, if only temporary, consequence of economic forces: "Competition of any kind will lead to a multiplicity of standards, at least temporarily." The redesign of Windows required by the States' proposal, however, would not be the result of competition on the merits, as CCIA and SIIA seem to suggest. Certainly they point to no economic force that would **[***29]** prompt (or, if such a redesign were mandated, sustain) the degree of fragmentation the States' proposal is predicted to produce. Nor do they explain how such fragmentation would, as they claim, "spark innovation that benefits consumers." They instead quote *National Society of Professional Engineers (NSPE) v. United States, 435 U.S. 679, 689, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*, for the proposition that the Supreme Court has "foreclosed the argument that because of the special characteristics of a particular industry, monopolistic arrangements will better promote trade and commerce than competition." But that case provides no support for CCIA's and SIIA's argument here. Like the two cases the Supreme Court cited in making the statement just quoted, *see United States v. Trans-Missouri Freight Ass'n, 166 U.S. 290, 41 L. Ed. 1007, 17 S. Ct. 540 (1897)*; and *United States v. Joint Traffic Ass'n, 171 U.S. 505, 43 L. Ed. 259, 19 S. Ct. 25 (1898)*, *NSPE* involved an agreement among competitors limiting the output of their services. Those arrangements, which were analyzed under *§ 1 of the Sherman Act*, are not analogous to Microsoft's monopoly of the market for operating systems, **[***30]** which is due not only to the exclusionary practices we found unlawful in *Microsoft III* but also to "positive network effects," *see Findings of Fact, at 20*. Moreover, in *NSPE* the district court made no findings there were any potential benefits from the profession's "ethical prohibition against competitive bidding." *435 U.S. at 686*.

greatest benefits of Windows -- a platform for applications that supports new functionality while providing backward compatibility for most existing applications").

In sharp contrast, here the district court made extensive findings both about the potential harm to consumers from fragmentation and about the dubious benefits of the States' proposal. [6] From these findings the court concluded, "There is no indication that there is any competitive or economic advantage to [the degree of fragmentation entailed in the States' proposal] and, quite to the contrary, such a result would likely be detrimental to the consumer." *States' Remedy, at 252-54*. Although we understand that competition on the merits itself would likely elicit multiple standards -- recall the competition between the VHS and Beta videotape standards -- or even that some as yet unimagined technology might reduce the harm to consumers from fragmentation, CCIA and SIIA fail to demonstrate the district court was unduly concerned **[***31]** about the extent of fragmentation likely to arise from the States' proposal.

Finally, Massachusetts argues the district court's findings relating to fragmentation "fail to respect" the findings of fact **[*1213]** **[**166]** made in the liability proceedings. Specifically, the Commonwealth points to *Findings of Fact P 193, at 56-57*: "Microsoft's contention that offering OEMs the choice of **[***32]** whether or not to install certain browser-related APIs would fragment the Windows platform is unpersuasive." That statement was addressed to the unbinding of IE and Windows, not to the States' proposal, from which the court anticipated far more extensive fragmentation. The district court's rejection of the States' proposal, therefore, is not inconsistent with any of the findings of fact in the liability proceedings.

Relatedly, the *amici* point to "Microsoft's *own* fragmentation" of Windows through the publication of successive versions, such as Windows 98, Windows 2000, and Windows XP. The district court addressed this concern and found such fragmentation to be of "relatively small degree" because "Microsoft is able to work towards maintaining backward compatibility with previous versions." *States' Remedy, at 253*.

To be sure, the remedy the district court adopted does not prevent all fragmentation of the Windows operating system; indeed, it adopted the end-user access provision, which allows OEMs to install rival browsers and other non-Microsoft middleware, with their associated APIs, and to remove the end user's access to IE. Accordingly, fragmentation may yet occur, **[***33]** but if so it will be caused by OEMs competing to satisfy the preferences of end users, not forced artificially upon the market as it would be under the States' proposal.

2. Java deception

Massachusetts argues the district court erred in not including a remedy addressed specifically to Microsoft's deception of Java software developers. Unbeknownst to Java software developers, Microsoft's Java developer tools included certain words and directives that could be executed only in Windows' Java runtime environment. We held this deception "served to protect [Microsoft's] monopoly of the operating system in a manner not attributable either to the superiority of the operating system or to the acumen of its makers, and therefore was anticompetitive." *Microsoft III, at 77*. Because Microsoft failed to provide a procompetitive explanation for its deception of software developers -- indeed, there appears to be no purpose at all for the practice that would not itself be anticompetitive -- we held its conduct was exclusionary, in violation of *§ 2 of the Sherman Act*. *Id.*

On remand the district court found a lack of "any evidence" Microsoft's previous Java deception was a continuing threat **[***34]** to competition. *States' Remedy, at 265*. The Java deception "concerned a single, very specific incident of anticompetitive conduct by Microsoft," which conduct Microsoft had ceased in accordance with a consent decree into which it had entered in another case in another court. *Id.* For these reasons, the district court did not include a provision in the remedial decree addressed to this unlawful but now terminated conduct.

Massachusetts, quoting *United States v. W.T. Grant Co., 345 U.S. 629, 632, 97 L. Ed. 1303, 73 S. Ct. 894 (1953)*, claims that without specific relief prohibiting such deception, Microsoft is "free to return to [its] old ways." Microsoft

[6] For example, the court found that ISVs would "fare worst" under the proposal because they "would not have any assurance that a particular functionality was present in any given configuration of the new unbound Windows [which,] at least in the short term … would likely cause existing applications to fail. [In the longer run there is the risk that] software code distributed with one ISV's application would conflict with that distributed with another ISV's application, leading to the so-called 'DLL Hell' problem that results when multiple versions of the same basic components try to coexist on a single PC." ***States' Remedy, at 253-54***.

responds that Massachusetts does not make a showing of the type of abuse contemplated by the Supreme Court in *W.T. Grant*. We agree. That case involved an interlocking directorate allegedly unlawful under *§ 8 of the Clayton Act.* Soon after the Government filed suit, the common director voluntarily resigned from the relevant boards, **[*1214]** **[**167]** after which the district court refused the Government's request for an injunction prohibiting him and the corporations from violating *§ 8* in the future. The Supreme Court held the defendants' **[***35]** sworn profession of an intention not to revive the interlock was insufficient to moot the case. However, the Court also held -- and this is key -- the district court was in the best position to determine whether there was a "significant threat of [a] future violation," and it had not abused its discretion in refusing to award injunctive relief. *Id. at 635-36*. Far from supporting Massachusetts' argument, therefore, *W.T. Grant* confirms the district court's broad discretionary power to withhold equitable relief as it reasonably sees fit.

Massachusetts maintains the district court abused its discretion insofar as it found "no evidence that this deception, or any similar deception, has persisted." *States' Remedy, at 190*. Massachusetts here claims Microsoft's Chairman and Chief Software Architect, William Gates III, in testimony "admitted that Microsoft routinely makes knowingly inaccurate claims regarding its compliance with industry standards," into which the district court should have inquired further. The cited testimony in fact concerns Microsoft's efforts to *comply* with frequently changing standards. [7] Not surprisingly, nothing Gates said suggests anything **[***36]** in the least nefarious.

Despite its failure to demonstrate any continuing competitive threat from Microsoft's previous deception of Java software developers, Massachusetts presses the States' proposed "truth in standards" provision, which would regulate certain business practices that were not at issue in *Microsoft III*. Specifically, the States' proposal would require Microsoft to (1) continue supporting any industry standard it has publicly claimed to support "until it publicly disclaims such support or the standard itself expires or is rescinded by the standardsetting body," and (2) "continue to support an industry standard any time it makes a proprietary alteration to the standard. **[***37]** " *Id. at 190*; *see also* SPR § 16, 6 J.A. (II) at 3183. As an initial matter, our holding the district court did not abuse its discretion in refusing to enjoin a recurrence of Microsoft's Java deception casts grave doubt upon the need for a broad provision applicable not only to Java but to all industry standards. Be that as it may, we address Massachusetts' arguments in favor of such a provision.

First Massachusetts claims the district court erred as a matter of law insofar as it regarded the proposed truth-in-standards provision as being "unrelated to the violation found by this court." That is not, however, how the district court saw the matter. Addressing only the first requirement quoted in the previous paragraph, the district court specifically referred to Microsoft's deception of Java developers in holding there was no showing a "broad order" prohibiting any similar deception was "either appropriate or necessary." *See States' Remedy, at 190*. It never said that requirement was "unrelated" to the violations found by this court in *Microsoft III*. That much we think is unarguable.

As Microsoft correctly points out, it was the second aspect of the truth-in-standards **[***38]** provision the district court deemed "unrelated to any finding of liability," *id. at 190, 263-64*, and correctly so. Indeed, this court held that Microsoft's development of **[*1215]** **[**168]** the Windows Java Virtual Machine (JVM), which was incompatible with Sun's JVM, did not violate the antitrust laws. *Microsoft III, at 75*. It was only Microsoft's having misled software developers into thinking the two were compatible that had an anticompetitive effect. *Id. at 76-77*. We therefore hold the district court permissibly refused to require that Microsoft continue to support a standard after making a proprietary modification to it, even if the modification makes the standard incompatible with the original.

Massachusetts also complains the record does not support the district court's other reasons for rejecting the proposed truth-in-standards provision. We disagree. The district court found no evidence the "industry standard" provision would "enhance competition in the monopolized market" for Intel-compatible PC operating systems. *States' Remedy, at 264* & n.134. ***HN5***[] Compliance with industry standards is "largely a subjective undertaking,"

---

[7] *See* 4/24/02 pm Tr. at 4988-89 (Gates trial testimony), 6 J.A. (II) at 3141-42; *see also* Direct Testimony of Dr. Andrew Appel P 145, 2 J.A. (II) at 1303-04 (stating Microsoft has ability to mislead third parties with respect to standards, but giving neither instances nor any indication of likelihood of such conduct).

id. at 190, such that "full compliance with a standard **[***39]** is often a difficult and ambiguous process," *id. at 264* (quoting Madnick P 208, 5 J.A. (II) at 2905). Massachusetts points to no specific instance in which competition would have been or would be enhanced by compelling Microsoft to support an industry standard after it made a proprietary alteration thereto. Instead Massachusetts invokes expert testimony that Microsoft's proprietary control over "important interfaces" would make it "harder" for rival operating systems to compete with Windows. Direct Testimony of Dr. Carl Shapiro P 185, 2 J.A. (II) at 860. This is far too general a statement from which to infer the proposed truth-in-standards provision would enhance competition rather than merely assist competitors -- and perhaps retard innovation. The district court found that industry standards can "vary widely in complexity and specificity, such that various implementations of a particular standard are often incompatible." *States' Remedy, at 264* (quoting Madnick P 207, 5 J.A. (II) at 2904). Microsoft, therefore, may not be able to comply with some of the industry standards contemplated by the States' proposal. And the States' own economic expert testified that "slow-moving **[***40]** standards bodies" are commonly unable to keep up with rapidly changing technology markets. 4/14/02 pm Tr. at 3677 (Shapiro trial testimony), 8 J.A. (II) at 4572; *see also* CARL SHAPIRO & HAL R. VARIAN, INFORMATION Rules 240 (1999) (advocating business strategy that does not "freeze … activities during the slow standard-setting process").

The district court aptly described the problems with the States' truth-in-standards proposal and correctly concluded the proposed remedy went beyond the liability contemplated by this court. The court did not abuse its discretion, therefore, in refusing to adopt the proposal.

3. Forward-looking provisions

The district court exercised its discretion to fashion appropriate relief by adopting what it called "forward-looking" provisions, which require Microsoft to disclose certain of its APIs and communications protocols. Although nondisclosure of this proprietary information had played no role in our holding Microsoft violated the antitrust laws, "both proposed remedies recommended the mandatory disclosure of certain Microsoft APIs, technical information, and communications protocols for the purposes of fostering interoperation." *States' Remedy* ***[***41]*** *, at 171*. In approving a form of such disclosure -- while, as discussed below, rejecting the States' proposal for vastly more -- the district court explained "the remedy [must] not [be] so expansive as to be unduly regulatory or provide a blanket prohibition on all future anticompetitive conduct." *Id.* (citing *Zenith* ***[*1216] [**169]*** *Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 133, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969))*. We are also mindful that, ***HN6***[] although the district court is "empowered to fashion appropriate restraints on [Microsoft's] future activities both to avoid a recurrence of the violation and to eliminate its consequences," *NSPE, 435 U.S. at 697*, the resulting relief must "represent[] a reasonable method of eliminating the consequences of the illegal conduct," *id. at 698*.

a. Disclosure of APIs

The district court recognized the "hallmark of the platform threat" to the Windows monopoly posed by rival middleware is the ability to run on multiple operating systems: The "ready ability to interoperate with the already dominant operating system will bolster the ability of such middleware to support a wide range of applications so as to **[***42]** serve as a platform." *States' Remedy, at 172*. In order to facilitate such interoperation the district court required Microsoft to disclose APIs "used by Microsoft Middleware to interoperate with a Windows Operating System Product." *Id.* § III.D, at 268.

Massachusetts objects to this provision on several grounds. First, the Commonwealth argues "the middleware covered by § III.D lacks the platform potential of the middleware threat that Microsoft thwarted" and, therefore, "will necessarily be inadequate to restore competition." The validity of Massachusetts' objection depends upon the meaning of "Microsoft Middleware."

Microsoft Middleware is defined as "software code" that:

1. Microsoft distributes separately from a Windows Op-erating System Product to update that Windows Operating System Product;
2. is Trademarked or is marketed by Microsoft as a major version of any Microsoft Middleware Product …; and
3. provides the same or substantially similar functionali-ty as a Microsoft Middleware Product.

Id. § VI.J, at 275. A "Microsoft Middleware Product" includes, among other things, "the functionality provided by Internet Explorer, Microsoft's **[***43]** Java Virtual Machine, Windows Media Player, Windows Messenger, Outlook Express and their successors in a Windows Operating System Product." *Id.* § VI.K, at 275.

In support of its argument, Massachusetts notes that Microsoft's own experts "doubted the platform potential of several forms of middleware included in what became the remedy's definition." [8] In response, Microsoft points out that the definition of "Microsoft Middleware" adopted by the district court is not faulty simply because Microsoft's experts discounted as platform threats some of the middleware products it covers. The logic of that response is obvious, which makes it unsurprising that Massachusetts makes no reply.

[*44]** *Amici* CCIA and SIIA take a different tack, claiming the definition is defective because Microsoft itself determines which software code to distribute separately. Microsoft responds that the *amici* "ignore[] the thousands of Windows APIs **[*1217]** **[**170]** that Microsoft publicly discloses in the ordinary course of business," and cites testimony, most of it conclusory, extolling the adequacy of those APIs for software developers. *See, e.g.,* Direct Testimony of Brent Frei of Onyx Software PP 18-22, 6 J.A. (II) at 3413-15; Direct Testimony of Chris Hofstader of Freedom Scientific PP 57-59, 9 J.A. (II) at 5453-55. Be that as it may, the district court considered arguments by the States similar to the one now advanced by the *amici*, and it rejected the related testimony of the States' witnesses. *States' Remedy, at 116-17*. The court instead found "Microsoft often distributes separately certain technologies which are included in new releases of Windows because such distribution enables users of previous Windows versions to take advantage of the latest improvements to these technologies." *Id. at 117* (citing Direct Testimony of Microsoft's Christopher Jones P 61, 5 J.A. (II) at 2532, **[***45]** and Will Poole P 76, 5 J.A. (II) at 2493). The court explained:

> Such distribution benefits Microsoft, as it permits Microsoft to continually improve the quality of its products, even after they are sold, and to expand the user base of new technology without waiting for consumers to purchase an entirely new operating system.

Id. These benefits would be lost to Microsoft if it were to "manipulate its products to exclude specific code from the definition" of middleware. *Id.*

The *amici* do not deny Microsoft has routinely distributed its middleware separately from Windows. Instead, they speculate Microsoft may henceforth avoid separate distribution in order to avoid the disclosure contemplated by § III.D. They claim an expanded definition of middleware, such as that proposed by the States, is necessary to "prevent[] Microsoft from defining its obligations into meaningless superficiality."

Microsoft points to the district court's finding, supported by evidence in the record, that it is not necessary or even desirable, in order to remove the artificial impediments erected by Microsoft to the establishment of a platform threat to Windows, to expand the definition **[***46]** of Microsoft middleware to cover all software that "exposes even a single API." *Id. at 118-19*. The district court rejected the States' broader definition of middleware in part because it wanted "bright lines by which Microsoft can determine what portions of Windows code are affected by the remedy." *Id. at 117*. The *amici* do not respond to the district court's concerns about the expansive scope of the States' definition of middleware. Nor do they explain how the States' proposal would "identify the specific pieces of Windows," *id.*, constituting middleware for the purpose of Microsoft's disclosure obligation. Instead, they merely claim the States' proposal "adds sufficient precision to identify and enforce a concrete obligation." This unreasoned assertion is hardly a ground upon which to overturn the district court's reasoned explanation for adopting a "bright line[]" approach to Microsoft's disclosure obligation. Further, the *amici* fail to refute the district court's reasoning that "economic forces … countervail the likelihood" that Microsoft would stop separately distributing its software code in order to avoid having to disclose APIs pursuant to § III.D. **[***47]** *Id.*

---

[8] *E.g.*, Direct Testimony of Dr. Kevin Murphy P 176, 5 J.A. (II) at 2648 ("the definition of 'Middleware' includes some products that pose no apparent (even nascent) threat to the operating system"); Elzinga P 135, *id.* at 2754 ("particularly implausible that an email client (such as Outlook Express) or instant messaging software (such as Windows Messenger) will become a platform threat").

We hold the district court did not abuse its discretion in delineating the middleware covered for the purposes of disclosure. As discussed, the term "Microsoft Middleware" both includes and extends beyond the functionality of the middleware at issue in this case. *Id.* §§ VI.J & VI.K, at 275-76; *see also id. at 115*. The *amici* merely **[*1218]** **[**171]** speculate that the middleware covered by § III.D will not provide a serious platform threat. Moreover, the district court's reasons for believing economic self-interest deters Microsoft from avoiding separate distribution of its software code are persuasive. And ***HN7***[] we should be particularly disinclined to require more disclosure where, as here, the district court is adopting a forwardlooking provision addressing conduct not previously held to be anticompetitive. *See generally,* Frank H. Easterbrook, *The Limits of Antitrust, 63 TEX. L. REV. 1, 14-15 (1984)* (supporting use of presumptions in ***antitrust law*** to avoid condemning procompetitive practices). Nonetheless, out of an abundance of caution the district court provided that, in the event Microsoft were to "make a practice" of sacrificing the advantages of separate distribution **[***48]** in order to frustrate the purpose of the remedy, Massachusetts "could petition the Court for relief on this point." [9] *States' Remedy, at 117 n.34*.

[*49]** Massachusetts further argues the district court made no finding the required disclosure of APIs under the decree would "meaningfully assist" developers of middleware. Massachusetts objects both to the breadth of disclosure -- that is, the number of APIs to be disclosed under § III.D -- and to the "depth" or detail of the disclosure, with respect to which Massachusetts claims "the remedy fails to require the disclosure of sufficient information to ensure that the mandated disclosure may be effectively utilized."

As to breadth, § III.D by its terms expands the scope of required disclosure beyond the functionality of the middleware at issue in our decision on liability, as discussed above. Such expanded but not unlimited disclosure "represents a reasonable method" of facilitating the entry of competitors into a market from which Microsoft's unlawful conduct previously excluded them, *NSPE, 435 U.S. at 698*, particularly in view of the inherently uncertain nature of this forwardlooking provision.

Moreover, in laying claim to still broader disclosure of APIs, Massachusetts simply ignores the district court's findings with respect to the economic and technological effects **[***50]** of disclosure. As Microsoft points out, however, these findings reflect the district court's concern that a forward-looking provision requiring overly broad disclosure could undermine Microsoft's incentive **[*1219]** **[**172]** to innovate and, more particularly, that the States' proposed disclosure provision could enable competitors to "clone" Windows. The extremely broad scope of the States' proposal bears out the district court's concern. First, "interoperate" is defined in a way that makes it essentially synonymous with "interchange." *See States' Remedy, at 227* (citing Madnick P 86, 5 J.A. (II) at 2836-37). Meanwhile, § 4 of the SPR would require Microsoft to disclose "all APIs" that enable any "Microsoft Middleware Product," Microsoft application, or Microsoft software program to interoperate with "Microsoft Platform Software." 6 J.A. (II) at 3172-73. Finally, "Microsoft Middleware Product" and "Microsoft Platform Software" are defined so broadly that, when required to "interoperate" with one another, they include essentially any two pieces of Microsoft software on a PC. *See States' Remedy, at 227-28*; *see also* Gates P 296, 8 J.A. (II) at 4772-73; Madnick WW 148-49, 151, 5 J.A. (II) at **[***51]** 2870, 2872. As a result, the district court found the broad scope of the APIs required to

---

[9] Massachusetts also argues the district court abused its discretion by refusing to define Microsoft's Common Language Runtime (CLR) as a Microsoft Middleware Product and hence subject to the API-disclosure requirement of § III.D. The district court described the CLR as middleware similar to Java but a part of Microsoft's new ".NET framework," a Web-services initiative comprising "server-based applications that can be accessed directly by other software programs, as well as by the consumer through a variety of devices, including the PC, cellular phone, and handheld device." ***States' Remedy, at 126***; *see also* Borduin P 80, 2 J.A. (II) at 1333 (explaining importance of CLR in .NET initiative). As discussed in Part II.A.4 below, the district court refused to address Web services in the remedial decree, stating that "this case cannot be used as a vehicle by which to fight every potential future violation of the antitrust laws by Microsoft envisioned by Microsoft's competitors." ***States' Remedy, at 133***. Just so, and the district court therefore did not abuse its discretion by refusing to list the CLR along with the other functionalities specified in the definition of Microsoft Middleware Product. *See* ***id. at 275***. Because Microsoft's Web-services initiative and Microsoft Middleware are not mutually exclusive categories, however, the CLR may yet become subject to the disclosure requirement of § III.D if it satisfies the definition of Microsoft Middleware in the decree, ***see States' Remedy § VI.J, at 275***. That definition requires, among other things, the middleware to be "distributed separately" from Windows; according to Microsoft's counsel at oral argument, there is record evidence that has already occurred.

be disclosed under the States' proposal would give rivals the ability to clone Microsoft's software products; [10] and cloning would allow them to "mimic" the functionality of Microsoft's products rather than to "create something new." *States' Remedy, at 229*. They could also "develop products that implement Microsoft's Windows technology at a far lower cost [than Microsoft itself] since they would have access to all of Microsoft's research and development investment." *Id.* ***HN8***[] The effect upon Microsoft's incentive to innovate would be substantial; not even the broad remedial discretion enjoyed by the district court extends to the adoption of provisions so likely to harm consumers.

[*52]** The *amici* claim the district court's "concern about 'cloning' … rested in part on a misunderstanding of what an API is." This assertion is simply at odds with the testimony upon which the district court relied in concluding competitors could clone Microsoft's software and mimic its functionality. [11] Moreover, the *amici* fail entirely to address the district court's conclusion, based upon findings of fact, that cloning would deny "Microsoft the returns from its investment in innovation." [12] *Id. at 176*.

[*53]** Microsoft also points to the adverse technological effects that would have ensued from broader disclosure of its internal interfaces. The district court found overly broad disclosure of APIs would limit **[*1220]** **[**173]** Microsoft's ability to modify interfaces, a limitation that "threatens to stifle innovation and product flexibility." *Id. at 177*. The court also found that disclosure of internal interfaces, which the States' proposal would require, would force Microsoft to publish APIs where the interfaces are unstable. *Id. at 230-31*. That "could pose a substantial threat to the security and stability of Microsoft's software," *id. at 231*; reliance upon such interfaces may "cause third-party software not to work or Windows to crash," *id. at 230*. Massachusetts does not challenge any of these findings, although they clearly support the district court's refusal to require the broad disclosure of APIs proposed by the States.

Massachusetts also insists the depth of Microsoft's required disclosure under § III.D is "inadequate." The Commonwealth first argues the depth of Microsoft's disclosure obligation is unclear because the definition of "API" is circular and non-specific. The term is **[***54]** defined in § VI.A as an "application programming interface, including any interface that Microsoft is obligated to disclose pursuant to III.D." *Id. § VI.A, at 274.* Massachusetts points to the testimony of the States' computer science expert, who said "Microsoft's definition of 'API' is almost entirely a circular reference to Section III.D, and it therefore does not adequately define what information must be provided as part of the API disclosure." Appel P 60, 2 J.A. (II) at 1269. We note that most of this expert's testimony regarding the definition of API is a legal analysis rather than the opinion of a computer scientist and is therefore beyond the "knowledge, skill, experience, training, or education" for which he was qualified as an expert. *FED. R. EVID. 702*. In any event, his legal analysis is wrong; the definition of API is not circular. API is defined in two places in the decree. The definition quoted above and cited by the States' computer expert is the one found in the "Definitions" section of the decree for the use of the term in every section of the decree other than § III.D. *See States' Remedy § VI.A, at 274*. The term is defined **[***55]** separately in § III.D, for the purpose of Microsoft's disclosure obligation under that section, as "the interfaces, including any associated callback interfaces," that permit Microsoft Middleware to obtain "services" from Windows. Microsoft clearly understood, as the States' computer

---

[10] *See, e.g.,* ***States' Remedy, at 227*** (citing 5/10/02 pm Tr. at 7111-12 (Bennett trial testimony), 6 J.A. (II) at 3596 ("Well, if you read [the definition of Interoperate], it says: Effectively, access, utilize and/or support the full features and functionality of one another. That, to me, taken in its entirety … means the ability to clone.")).

[11] *See, e.g.,* ***States' Remedy, at 229*** (citing Gates WW 289-90, 8 J.A. (II) at 4770-71 ("Once provided with the equivalent of the blueprints for Windows, competitors … would have little trouble writing their own implementation of everything valuable that Windows provides today, including the capabilities it provides to developers via APIs")).

[12] In a footnote to its argument concerning the disclosure of communications protocols, Massachusetts asserts the district court clearly erred in suggesting the States' proposed definition could lead to cloning, for which assertion it cites the opinion of Dr. Appel that "the States' Remedy does not allow such copying," P 99, 2 J.A. (II) at 1284; *see also* PP 100-07, *id*. at 1284-88. This testimony, although contrary to the district court's finding that the States' broad definition of interoperation could lead to cloning, is hardly sufficient for us to conclude the district court's finding is clearly erroneous. *See* *Microsoft III, at 66* ("In view of the contradictory testimony in the record, some of which supports the District Court's finding …, we cannot conclude that the finding was clearly erroneous").

expert apparently did not, the latter definition is the one applicable to Microsoft's disclosure of APIs under the decree. [13]

Second, Massachusetts claims there is unrebutted testimony in the record indicating the depth of disclosure mandated by § III.D is not "adequate for those whose innovative software **[***56]** constitutes a potential threat to Windows." The cited testimony, however, does not cast doubt upon the district court's decision. The witnesses expressed concern that the extent of Microsoft's obligation to disclose file formats, registry settings, and similar information is unclear and explained the type of enhanced disclosure software developers would like, but the testimony amounts to no more than conclusory statements. [14] **[*1221]** **[**174]** That software developers prefer more, rather than less, expansive and detailed disclosure of APIs and technical information is hardly surprising, but the testimony is not sufficient to support Massachusetts' implication that the disclosures required by § III.D will not materially assist developers of potential middleware threats to Windows. Recall the district court did not undertake to assure the viability of Microsoft's rivals. Rather, the court settled upon a level of disclosure that would "bolster" the ability of rival middleware to serve as a platform threat to Microsoft; "help" rival middleware interoperate with Windows; and "have the potential to increase the ability of competing middleware to threaten [Windows]." *Id. at 172*.

[*57]** Finally, Massachusetts argues the disclosure mandated by § III.D need not be timely made. In the case of a "new major version of Microsoft Middleware," § III.D requires disclosure "no later than the last major beta test release of that Microsoft Middleware." For a new version of Windows, disclosure must occur in a "Timely Manner," defined as the time of the first release of a beta test version of Windows through the Microsoft Developer Network or upon the distribution of 150,000 or more copies of the beta version. *Id. § VI.R, at 276*.

Massachusetts nonetheless insists "the remedy is at odds with the record on timeliness." Microsoft responds by pointing to evidence that requiring disclosure "before the software code underlying those APIs has been fully developed and tested, as the … States requested, would create serious logistical problems for both Microsoft and third-party software developers." *See, e.g.,* Direct Testimony of Microsoft's Linda Wolfe Averett P 18, 6 J.A. (II) at 3261 ("Until Microsoft is confident that it has figured out how to provide a particular functionality, it does not want third-party developers building products that rely on our functionality"). **[***58]** Although clearly favoring the definitions of timeliness adopted by the district court, Microsoft's evidence is not required in this instance because the testimony Massachusetts cites itself underscores Microsoft's "strong incentive" to disclose its APIs in a timely fashion so that software developers will write applications based upon them. *See, e.g.,* Borduin P 35, 2 J.A. (II) at 1318-19. Without timely disclosure, "there would be far fewer and lower quality programs written for Microsoft's operating systems." *Id.* Microsoft's incentive to make timely disclosure of APIs is obvious: the ability of software developers to write applications that rely upon Microsoft's APIs depends upon the developers having access to them. As the district court found in the liability phase, "Microsoft must convince ISVs to write applications that take advantage of the new APIs, so that existing Windows users will have [an] incentive to buy an upgrade." *Findings of Fact P 44, at 21-22*. The court also found Microsoft offered inducements to software developers to ensure they "promptly develop new versions of their applications adapted to the newest version of Windows." *Id*. Massachusetts points **[***59]** to no evidence, and offers no reason to think, this incentive is insufficient to induce timely disclosure under § III.D of the decree. To the contrary, the evidence Massachusetts offers merely confirms the economic incentives Microsoft faces in re **[*1222]** **[**175]** leasing its APIs to ISVs in a timely manner.

---

[13] *See* ***States' Remedy, at 235***; *see also* 5/2/02 pm Tr. at 6128 (Poole trial testimony) (stating in response to question whether he knew "exactly" which APIs Microsoft is obliged to disclose under § III.D: "Yes. We know how to look for the list of points they [sic] make their interfaces, associated call back interfaces, et cetera, and ensure that we are in compliance relative to the code that we separately distribute.").

[14] For instance, one developer requested disclosure of certain "complicated interfaces" that Microsoft "had not anticipated" software developers needing. 3/26/02 pm Tr. at 1452-53 (trial testimony of Steven McGeady), 6 J.A. (II) at 3375-76; *see also* 3/20/02 pm at Tr. at 732-35 (trial testimony of David Richards of RealNetworks), *id.* at 3404-05 (requesting further disclosure of technical information and APIs); Direct Testimony of David Richards P 65 & n.11, 2 J.A. (II) at 1081-83 (same); Direct Testimony of Richard Green P 161, *id.* at 982 (same). Massachusetts also cites testimony concluding the depth of Microsoft's disclosure obligation is "not clear." *E.g.*, Richards P 90, *id.* at 1099-1100.

In sum, the district court's findings are fully adequate to support its decision with respect to disclosure. They are comprehensive and sufficiently detailed to provide a clear understanding of the factual basis for the court's decision. *See Folger Coffee Co. v. M/V Olivebank, 201 F.3d 632, 635 (5th Cir. 2000)*; *see also* 9A CHARLES ALAN WRIGHT & ARTHUR R. MILLER, FEDERAL PRACTICE AND PROCEDURE § 2571 (2d ed. 1995). We do not find persuasive Massachusetts' arguments that the district court overstated or misapprehended the significance of the disclosure required by the decree. In light of the forward-looking nature of the API disclosure provision, the court reasonably balanced its goal of enhanced interoperability with the need to avoid requiring overly broad disclosure, which it determined could have adverse economic and technological effects, including the cloning of Microsoft's **[***60]** software. Moreover, we cannot overlook the threat -- as documented in the district court's findings of fact in the liability phase -- posed by Netscape and Java, which relied upon Microsoft's then more limited disclosure of APIs. Microsoft managed to squelch those threats, at least for a time, but that does not diminish the competitive significance of the disclosure of Microsoft's APIs, a disclosure enhanced by the decree.

We therefore hold the district court did not abuse its discretion in fashioning the remedial provision concerning Microsoft's disclosure of APIs.

b. Disclosure of communications protocols

The district court also included in the decree a provision requiring Microsoft to disclose certain communications protocols. *See States' Remedy § III.E, at 269*. As with APIs, we did not hold Microsoft's disclosure practices with respect to communications protocols violated *§ 2 of the Sherman Act*. Communications protocols involve technologies -- servers and server operating systems -- that are not "middleware" as we used that term in our prior decision. *See Microsoft III, at 53-54*. It is therefore not surprising the district court described the provision requiring the **[***61]** disclosure of communications protocols as the "*most* forward-looking" in the decree. *States' Remedy, at 173* (emphasis in original).

Communications protocols provide a common "language" for "clients" and "servers" in a computing network. A network typically involves interoperation between one or more large, central computers (the servers) and a number of PCs (the clients). By interoperating with the server, the clients may communicate with each other and store data or run applications directly on the server. The district court found that servers may use any of several different operating systems, *id. at 121* (citing Direct Testimony of Robert Short P 22, 6 J.A. (II) at 3528-29; Madnick P 44, 5 J.A. (II) at 2814-15), but most clients run a version of Windows, *id.* (citing Madnick P 44, 5 J.A. (II) at 1814-15). In a "heterogeneous network," that is, one comprising different types of hardware and of operating systems, interoperation can be difficult. One method of addressing the difficulty is to specify use of a "common language" understood by all the computing elements of the network. The district court specified one such language, known as "native communication," in § **[***62]** III.E of the decree. [15] **[*1223]** **[**176]** That section requires Microsoft to make available to third parties "on reasonable and non-discriminatory terms … any Communications Protocol that is … (i) implemented in a Windows Operating System Product installed on a client computer, and (ii) used to interoperate, or communicate, natively (i.e., without the addition of software code to the client operating system product) with a Microsoft server operating system product."

Native communication differs from other forms of communication because it does not require that additional software be installed on the client. Other approaches may require adding "software to the server to make the client computer **[***63]** 'think' it is communicating in a homogeneous network," *id. at 122* (citing Madnick PP 68-75, 5 J.A. (II) at 2826-29), or adding "software code to the client which enables the client to communicate more effectively with the server," *id.* (citing Madnick PP 68, 76-82, 5 J.A. (II) at 2826-27, 2829-35). As the district court stated, "Interoperation made possible by software added onto Microsoft's PC operating system products is less clearly related to the facts of this case because it expands beyond the relevant market of Intel-compatible PC operating

[15] Examples of native communication include "basic Internet protocols like Transmission Control Protocol/Internet Protocol ('TCP/IP'), HyperText Transfer Protocol ('HTTP') and File Transfer Protocol ('FTP'), all of which are supported natively in both Windows clients and non-Microsoft servers." *See* Short P 36, 6 J.A. (II) at 3535-36.

systems to address the ability of an *application* to interoperate with a server." *Id. at 173* (emphasis in original). The court therefore held Microsoft need not disclose communications protocols used to interoperate non-natively.

In determining the scope of the remedy, the district court acknowledged that network and server-based applications are not middleware in the sense that "the software physically resides on the PC and functions as a platform for other applications." *Id. at 129*. Still, the court reasoned that such applications are capable of functioning in a manner similar to that of middleware "by providing a layer **[***64]** between the operating system and top-level applications." *Id*. The court's reasoning is supported by its finding that "software developers are increasingly writing programs that rely, or 'call,' on APIs exposed by server operating systems such that the server operating system provides the 'platform' for applications." *Id. at 123* (citing Direct Testimony of Novell, Inc.'s Dr. Carl Ledbetter PP 47-48, 2 J.A. (II) at 1163-64; Direct Testimony of Richard Green P 76, 2 J.A. (II) at 956; 5/27/02 am Tr. at 1508-09 (Ledbetter trial testimony)). For these reasons the district court, in extending Microsoft's disclosure to communications protocols, concluded "server operating systems can perform a function akin to that performed by traditional middleware." *Id. at 172*.

Massachusetts argues § III.E will not enhance interoperability and there is no evidence, and the district court made no finding, that it will. Microsoft responds that "a substantial degree of interoperability already exists between Windows desktop operating systems and non-Microsoft server operating systems" and the ability of third parties to license those protocols from Microsoft pursuant to § III.E will enhance **[***65]** interoperability. The parties' divergent predictions point up the difficulties inherent in crafting a forward-looking provision concerning a type of business conduct as to which there has not been a violation of the law.

To be sure, as the Supreme Court observed in *International Salt Co. v. United States, 332 U.S. 392, 400, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*, ***HN9***[] "When the purpose to restrain trade appears from a clear violation of law, it is not necessary that all of the untraveled roads to that end be left open and that only the worn one be closed." True enough, but when the district **[**177]** **[*1224]** court undertakes to block the untraveled roads by adopting a forward-looking provision, its discretion is necessarily less broad because, without liability findings to mark the way, it is in danger of imposing restrictions that prevent the defendant from forging new routes to serve consumers.

Massachusetts objects that the district court should not have limited the disclosure requirement of § III.E to protocols for native communications, which the district court found is only "one of at least five basic approaches to achieving interoperability between Windows client operating systems and non-Microsoft **[***66]** server operating systems." *States' Remedy, at 234* (*citing* Short P 35, 6 J.A. (II) at 3535). We think the district court prudently sought not to achieve complete interoperability but only to "advance" the ability of non-Microsoft server operating systems to interoperate with Windows and thereby serve as platforms for applications. It was not an abuse of discretion for the court not to go further; indeed, to have done so in the absence of related liability findings would have been risky.

Massachusetts points to the testimony underlying the States' proposed findings for its claim that the disclosure required by § III.E "would not provide a level of interoperability sufficient to give competing software the opportunity to gain marketplace acceptability." Those proposed findings, however, called for "full" and "seamless" interoperability, *e.g.,* States' Proposed Findings PP 700, 708, 3 J.A. (II) at 1613, 1615, and, more specifically, for disclosure of the "proprietary protocols" for certain of Microsoft's software products, including the protocols that allow Microsoft's server-based email software (Microsoft Exchange) to interoperate with its PCbased email software (Microsoft **[***67]** Outlook), P 704, *id* at 1614. Microsoft responds that, though Massachusetts may want to extend the remedy to these products, the district court did not abuse its discretion by "refusing to extend the remedy so far beyond the liability determinations affirmed on appeal." We agree. It was not inappropriate for the district court to require only the disclosures necessary to provide a basic link between non-Microsoft operating systems and PCs running Windows. That there are other methods for achieving the same or an even greater degree of interoperability -- perhaps even methods allowing the "full" and "seamless" interoperability claimed by Massachusetts -- does not render insufficient what is already the "most forward-looking" provision in the decree.

Finally, Massachusetts argues the district court erred by failing to define the term "interoperate" in the decree. The district court found "the term 'interoperate' captures a continuum[] rather than an absolute standard.... The Court's remedial decree utilizes a very simple definition of the term which is intended to capture the reasonable spectrum of the continuum." *States' Remedy, at 172 n.75*. Evidence in the record supports **[***68]** the district court's finding. [16] The court rejected the States' proposed definition, which, as we have seen, the court found equates "interoperate" with "interchangeable" and would give others the ability to clone many of Microsoft's products. *Id. at 227* (citing 5/10/02 pm Tr. at 7111-12 (Bennett trial testimony), 6 J.A. (II) at 3596). In light of the conflicting testimony in the record, some of which clearly supports the district court's finding that "interoperation" **[*1225]** **[**178]** is reasonably understood not as a binary concept, meaning two network elements either do or do not interoperate, but rather as a "continuum," meaning their communication is a matter of degree, we cannot hold the district court's finding to be clearly erroneous. *Microsoft III, at 66*.

[*69]** In sum, the district court did not abuse its discretion or otherwise err in adopting a provision limiting to native communication Microsoft's obligation to disclose communications protocols.

4. Web Services

Massachusetts next argues the district court erred by failing to adopt a remedy addressed to Web services. In particular, Massachusetts claims the court should have extended Microsoft's disclosure obligation beyond interoperation of server operating systems and PCs running Windows to reach interoperation among "other nodes of the network encompassed by network-based computing and the Web services paradigm, such as multiple servers or handheld devices." [17] Microsoft responds by pointing out there was no mention of Web services in the liability phase of this case, and by claiming it has no monopoly power in the market for Web services, "if such a [market] exists." Also, the district court found "Web-browsing software of the type addressed during the liability phase will play no role in the creation, delivery, or use of many Web services." *States' Remedy, at 127*.

[*70]** Although the district court encountered "substantial disagreement" about what constitutes a Web service, *id. at 126*, it found the middleware at issue in *Microsoft III*, namely, Web-browsing software, "is not integral to the functioning of Web services because many Web services will involve direct communications between devices or programs and will not be accessed by an end user at all." *Id. at 126-27* (citing Direct Testimony of Dr. James Allchin PP 43-45, 2 J.A. (II) at 1218-19). Far from ignoring this area of rapid innovation, as Massachusetts claims, the district court concluded Web services are simply too far removed from the source of Microsoft's liability in this case -- as to which the relevant market is operating systems for Intel-compatible PCs -- to be implicated in the remedy. *Id. at 133* ("mere importance of Web services to Microsoft and the industry as a whole is not sufficient to justify extending the remedy in this case to regulate Microsoft's conduct in relation to Web services"). Nor did the court think the States had sufficiently "explained how the increase in the use of non-PC devices in conjunction with Web services will reduce Microsoft's monopoly **[***71]** in the market for PC operating systems." *Id. at 134*.

Massachusetts claims the district court excluded Web services based upon the clearly erroneous premise "that this new paradigm is a threat to the PC, and not to Windows." For a correct understanding Massachusetts points us to the testimony of Jonathon Schwartz, Chief Strategy Officer at Sun Microsystems: "So long as consumers can access Web services using competing devices and operating systems, they are free to switch away from Windows if competing alternatives are more attractive." Direct Testimony P 37, 2 J.A. (II) at 882; *see also* Direct Testimony of **[*1226]** **[**179]** John Borthwick P 74, 7 J.A. (II) at 4117 (if "developers of web services adopt industry standard protocols," then applications will not rely upon Windows and users will therefore be less reliant upon Windows). According to Massachusetts, the district court acknowledged as much when it stated:

---

[16] *See, e.g.,* 5/10/02 pm Tr. at 7110 (Bennett trial testimony), 6 J.A. (II) at 3596 (explaining required disclosure as portion of continuum or spectrum of interoperability that allows "two programs [to] exchange and make effective use of each other's data").

[17] Although Massachusetts does not mention it, the States' proposal would have done just that, *see* SPR § C, 6 J.A. (II) at 3172; *see also* SPR § 4, *id.* at 3172-73, extending Microsoft's disclosure obligation to interoperability with respect to, among others, "Handheld Computing Devices" -- a term defined in the SPR to include "cellular telephones, personal digital assistants, and Pocket PCs," SPR § 22.k, *id.* at 3194.

> The Chief Strategy Officer for Sun Microsystems, Inc., Jonathon Schwartz, testifying on behalf of Plaintiffs … theorized that "if the most popular applications are delivered as Web services, instead of [as] stand-alone PC applications, the applications barrier protecting **[***72]** Windows could be substantially eroded."

States' Remedy, at 127 (brackets in original). Clearly, however, the district court expressed its view that Schwartz was "theorizing," not stating a conclusion based upon fact. In any event, the district court was primarily -- and correctly -focused upon whether a provision addressing Web services could be linked to Microsoft's liability in *Microsoft III*; it could not.

Moreover, it does not follow that, because a proposed requirement could reduce the applications barrier to entry, it must be adopted. Recall the applications barrier to entry arose only in part because of Microsoft's unlawful practices; it was also the product of "positive network effects." *84 F. Supp. 2d at 20*. If the court is not to risk harming consumers, then the remedy must address the applications barrier to entry in a manner traceable to our decision in *Microsoft III*. This the decree does by opening the channels of distribution for non-Microsoft middleware. The district court reasonably determined, based upon evidence in the record, a provision addressing Web services might not be so benign. *States' Remedy, at 134*.

Massachusetts also **[***73]** complains (albeit only in a footnote) that, because the district court included a remedy affecting servers, there is "no basis for distinguishing Web services," which are part of the same, new platform threat. We disagree. Disclosure of communications protocols is a "*most* forward-looking remedy," *id. at 173* (emphasis in original); the district court, which was not compelled to venture even that far from its moorings in *Microsoft III*, was well within its discretion, therefore, not to go further.

5. Market Development Programs

Massachusetts argues the remedy should be modified to prevent Microsoft from offering to OEMs discounts, known as Market Development Programs (MDPs). The Commonwealth's claim is based in part upon its concern that Microsoft will use MDPs "to ensure that OEMs will not exercise whatever flexibility the remedy provides" them. On its face, Massachusetts' concern appears to be that the new freedoms provided to OEMs under the decree will be ineffectual because Microsoft has retained the ability to offer OEMs favorable discounts. Be that as it may, the district court rejected the States' proposal to prevent Microsoft from offering discounts, *see* SPR **[***74]** § 2.a, 6 J.A. (II) at 3168, noting this court "did not condemn Microsoft's use of MDPs and, in fact, steadfastly refused to condemn practices which, at their core, 'offered a customer an attractive deal.' " *States' Remedy, at 166* (quoting *Microsoft III, at 68*). The district court also cited evidence in the record -- testimony both of Microsoft's and of the States' economic experts -- that MDPs may be employed procompetitively. *Id. at 211*. Upon weighing the evidence, the district court concluded "the weight of the economic testimony favors preservation of Microsoft's ability to offer MDPs, provided that Microsoft cannot impose the MDPs in a discriminatory or retaliatory manner." *Id.*; *see also id. at 166* (MDPs must be **[*1227]** **[**180]** "based upon reasonable, objective criteria, which are enforced uniformly and without discrimination").

Massachusetts argues the district court "committed an error of law" by failing to prohibit all MDPs, referring us to *United States v. Loew's, Inc., 371 U.S. 38, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*, for the proposition that ***HN10***[] "to ensure … that relief is effectual, otherwise permissible practices connected with the acts found to be illegal must **[***75]** sometimes be enjoined," *id. at 53*. In *Loew's*, several major film distributors had violated *§ 1 of the Sherman Act* by "block-booking," or tying popular films with less popular films in licensing agreements with television stations. *Id. at 40-41*. The district court enjoined the practice but did not accept the Government's proposal to enjoin certain "otherwise permissible practices" that could be used to "subject[] prospective purchasers to a 'run-around' on the purchase of individual films." *Id. at 55*. Although the Supreme Court ultimately adopted the Government's proposed modifications because they would help "to prevent the recurrence of the illegality," *id. at 56*, the Court pointed out that "the trial judge's ability to formulate a decree tailored to deal with the violations existent in each case is normally superior to that of any reviewing court," *id. at 52*. Here the district court did impose restraints upon Microsoft's "otherwise permissible practices" by requiring that any MDPs be both uniform and nondiscriminatory. *States' Remedy, at 166*. Massachusetts has not shown that any additional **[***76]** restraint is necessary.

Massachusetts also argues the district court clearly erred in determining MDPs are procompetitive because "this directly contradicts its own findings regarding Microsoft's ability to frustrate the remedy." The Commonwealth here relies upon testimony that Microsoft conditioned MDPs upon an OEM's compliance with certain technical requirements, including a specified configuration of hardware and software, restrictions on the boot-up sequence, and a specified allocation of computer memory. *See*, *e.g.*, Ashkin PP 119-22, 5 J.A. (II) at 3114-16. That testimony, however, reflects the competitive landscape as it was prior to the adoption of the remedy now in place. Whereas an OEM licensing Windows from Microsoft previously had little flexibility to include rival middleware, now it may choose either to distribute non-Microsoft middleware or to get a discount from Microsoft, as it sees fit. True, this choice may be skewed if Microsoft offers deep discounts, but the district court required Microsoft to offer MDPs to all comers on the same uniform and non-discriminatory terms; it cannot target a discount solely at an OEM that dallies with rival middleware. Massachusetts **[***77]** gives us no reason to think Microsoft is likely to pursue a deep discount strategy seemingly made bootless by those conditions.

Without a clear indication that Microsoft can or will use its discounts in a fashion that, as Massachusetts claims, "subverts" the other provisions of the remedy, we again refuse to condemn a practice that "offer[s the] customer an attractive deal." *Microsoft III, at 68*. Accordingly, we hold the district court did not abuse its discretion by refusing to prohibit, rather than placing protective conditions upon, Microsoft's offer of discounts.

6. Open Source Internet Explorer

Massachusetts argues the district court abused its discretion in rejecting the States' "open-source IE" provision, which would require that

> Microsoft … disclose and license all source code for all Browser software **[*1228]** [**[**181]** and that the license] grant a royalty-free, non-exclusive perpetual right on a non-discriminatory basis to make, use, modify and distribute without limitation products implementing or derived from Microsoft's source code….

SPR § 12, 6 J.A. (II) at 3178. Microsoft responds that this type of remedy is unnecessary because the decree already proscribes **[***78]** the anticompetitive conduct by which Microsoft had unlawfully raised the applications barrier to entry and thereby diminished the threat posed by platforms rivaling Microsoft's operating system.

The district court rejected the States' proposal for three reasons. First, the open-source IE proposal "ignores the theory of liability in this case," which was directed at Microsoft's unlawful "response to cross-platform applications, not operating systems," *States' Remedy, at 185*; the proposed remedy would directly benefit makers of non-Microsoft operating systems, even though the harm, if any, to them was indirect. Second, the proposal would "provide [a] significant benefit to competitors but [has] not been shown to benefit competition." *Id.* Finally, the proposal would work a "de facto divestiture" and therefore should be analyzed as a structural remedy pursuant to this court's opinion on liability. *Id. at 186*; *see also* *Microsoft III, at 106* ("In devising an appropriate remedy, the District Court also should consider whether plaintiffs have established a sufficient causal connection between Microsoft's anticompetitive conduct and its dominant position in the OS market"). **[***79]** Here the court carefully considered the "causal connection" between Microsoft's anticompetitive conduct and its dominance of the market for operating systems, and held the causal link insufficient to warrant a structural remedy. *States' Remedy, at 186*.

Massachusetts argues the district court "improperly ignored evidence that IE's dominance is competitively important for Microsoft" and complains that Microsoft "advantages its own middleware by using the browser to limit the functionality of competing products." These are not objections, however, to the district court's reasons for rejecting the States' proposal. Rather, they are criticisms of what Massachusetts terms the district court's "implicit determination that [certain] facts were not relevant" to its analysis of the opensource IE provision. For instance, Massachusetts points to the testimony of David Richards of RealNetworks stating there would be "substantial end user benefit" if Microsoft disclosed enough APIs to allow competitors such as RealNetworks to create their own versions of the "Media Bar," one of Microsoft's recent additions to the IE interface. *See* Direct Testimony PP 79-84, 2 J.A. (II) at 1094-99. According **[***80]** to Richards, the Media Bar is a version of Microsoft's Windows Media Player "embedded as the default media player" in IE. P 79, *id.* at 1094-95. If Microsoft were to disclose the internal architecture of the Media Bar, including the APIs upon which it relies, he says, then end users could "play back more digital formats within the [IE] browser than [Microsoft's] Windows Media Player, including our own RealAudio and RealVideo formats." PP 81, 82, *id.* at 1098.

Massachusetts argues the district court's disregard of this testimony "was wrong as a matter of law," for which proposition it cites *FTC v. Texaco, Inc., 180 U.S. App. D.C. 390, 555 F.2d 862 (D.C. Cir. 1977)*. As an initial matter, Massachusetts' reliance upon *Texaco* is misplaced. In *Texaco* we said "the appellate court has the authority -- and the duty -- to determine the proper legal premise and to correct the legal error of the trial judge, without limitation by the doctrines of 'clearly erroneous' and 'abuse **[*1229]** **[**182]** of discretion' that are applicable to review of factual determinations." *Id. at 876 n.29*. Here the district court did not, as Massachusetts claims, commit an error of law "in assessing **[***81]** the link between Microsoft's unlawful acts and its control of the dominant browser." To be sure, Richards' testimony makes clear Microsoft's competitors would benefit from Microsoft's disclosure of the APIs necessary for them to replicate Microsoft's Media Bar. Neither that nor any other testimony Massachusetts cites, however, indicates the district court relied upon an improper "legal premise" in its "implicit determination" of relevance.

The district court's premise, as discussed more fully below, was that the fruit of Microsoft's unlawful conduct was not the harm particular competitors may have suffered but rather Microsoft's freedom from platform threats posed by makers of rival middleware. *See* Part II.B.1. The district court properly focused, therefore, upon opening the channels of distribution to such rivals; facts tending to show harm to specific competitors are not relevant to that task. Also recall the district court was properly concerned with avoiding a disclosure requirement so broad it could lead to the cloning of Microsoft's products. That, in essence, appears to be what the cited testimony would require with respect to Microsoft's Media Bar.

Massachusetts next **[***82]** argues the district court "misunderstood" that the States' open-source IE proposal could "reestablish a cross-platform browser," thereby allowing applications to be written to APIs exposed by IE and, as a result, lower the applications barrier to entry. As discussed in preceding sections of this opinion, the decree the district court approved includes several provisions addressed directly to Microsoft's efforts to extinguish nascent threats to its operating system. Specifically, the decree restores the conditions necessary for rival middleware to serve as a platform threat to Windows and thereby speaks directly to our holding with respect to liability. *See* *Microsoft III*. Moreover, the district court found the States' open-source IE proposal ignores the theory of liability in this case not because the court "misunderstood" the implications of the proposal but because the proposal would most likely benefit makers of competing operating systems, namely, Apple and Linux, rather than restore competitive conditions for potential developers of rival middleware. *States' Remedy, at 242-43*. [18] That is why the court concluded the open-source IE proposal would help specific competitors **[***83]** but not the process of competition. *See id. at 185, 244*; *see also* Elzinga P 85, 5 J.A. (II) at 2732 (open-source IE provision is a "transparent 'IP grab' " that would "help competitors but harm competition"). Massachusetts would refute the court's conclusion with the testimony of the States' economic expert, who said open-source IE would "lower the applications barrier." Shapiro P 101, 2 J.A. (II) at 829. But that conclusory statement, even if an accurate prediction, does not point up any error on the part of the district court in refusing to adopt the open-source proposal. There is more than **[*1230]** **[**183]** one way to redress Microsoft's having unlawfully raised the applications barrier. And it was certainly within the district court's discretion to address the applications barrier to entry as it did, namely, by restoring the conditions in which rival makers of middleware may freely compete with Windows. Indeed, to have addressed itself narrowly to aiding specific competitors, let alone competitors that were not the target of Microsoft's unlawful efforts to maintain its monopoly, could well have put the remedy in opposition to the purpose of the antitrust laws. *See* *Brooke Group, 509 U.S. at 224* **[***84]** ***HN11***[] (antitrust laws designed to protect "competition, not competitors").

[18] As an economic matter, of course, the source of the threat to Microsoft's monopoly of the market for Intel-compatible PC operating systems, whether it be rival middleware or rival operating systems, is not important. In remedying Microsoft's violations of the antitrust laws, however, it was reasonable for the district court to focus upon the restoration of competitive conditions facing makers of rival middleware rather than lending a hand to makers of rival operating systems; it was middleware with the potential to create a platform threat, not rival operating systems, against which Microsoft acted unlawfully. *Findings of Fact, at 28-30*.

Massachusetts also complains the district court, in rejecting the open-source IE provision, erred by probing the causal connection between Microsoft's unlawful acts and harm to consumers. In response Microsoft points out that the district ***HN12***[] court viewed the States' proposed relief as structural and therefore **[***85]** applied a test of causation along the lines we set out in *Microsoft III*. *See* *253 F.3d at 106-07*. Our instruction to the district court was to consider on remand whether divestiture was an appropriate remedy in light of the "causal connection between Microsoft's anticompetitive conduct and its dominant position in the … market [for operating systems]." *Id. at 106*. Structural relief, we cautioned, "is designed to eliminate the monopoly altogether … [and] requires a clearer indication of a *significant causal connection* between the conduct and creation or maintenance of market power." *Id.* (emphasis in original) (*citing* 3 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 91-92 (1996)).

As Massachusetts correctly notes, we were there addressing the district court's order to split Microsoft into two separate companies, whereas on remand, the district court was addressing the States' open-source IE proposal. But the district court reasonably analogized that proposal to a divestiture of Microsoft's assets. *States' Remedy, at 185, 244*. The court pointed to testimony both of Microsoft's and of the States' economic experts characterizing **[***86]** the open-source IE remedy as "structural" in nature. *Id. at 244* (citing Elzinga P 104, 5 J.A. (II) at 2740-41; 4/11/02 am Tr. at 3324 (Shapiro trial testimony), 8 J.A. (II) at 4502). Although Microsoft could continue to use its intellectual property under the opensource IE proposal, the "royalty-free, non-exclusive perpetual right" of others to use it as well would confiscate much of the value of Microsoft's investment, which Gates put at more than $ 750 million, P 128, 8 J.A. (II) at 4714, and the court clearly found to be of considerable value. *See States' Remedy, at 241, 244*.

Massachusetts claims *United States v. National Lead Co., 332 U.S. 319, 91 L. Ed. 2077, 67 S. Ct. 1634 (1947)*, upheld compulsory licensing as a remedy while at the same time rejecting the need for divestiture. The licenses in *National Lead*, however, were not to be free; on the contrary, the Supreme Court specifically pointed out that reducing "all royalties automatically to a total of zero … appears, on its face, to be inequitable without special proof to support such a conclusion." *Id. at 349*. (The Court left open the possibility that royalties might be set at zero or at a nominal **[***87]** rate, but only where the patent was found to be of nominal value.) Here the States proposed Microsoft be required to license IE "royalty-free," SPR § 12, 6 J.A. (II) at 3178. Therefore, *National Lead* is worse than no support for the States' proposal; it tells us that proposal is "on its face … inequitable." *332 U.S. at 349*.

[*1231] **[**184]** Finally, Massachusetts claims the district court erred in rejecting the open-source IE proposal on the ground it "is predicated not upon the causal connection between Microsoft's illegal acts and its position in the PC operating system market, but rather the connection between the illegal acts and the harm visited upon Navigator." This plainly misstates the issue as we remanded it. We were concerned a drastic remedy, such as divestiture, would be inappropriate if Microsoft's dominant position in the operating system market could not be attributed to its unlawful conduct. *Microsoft III, at 106-07*. The district court did not abuse its discretion by insisting that an analogous form of structural relief -- namely, divesting Microsoft of much of the value of its intellectual property -- likewise meets the test of causation. Massachusetts' statement **[***88]** that the open-source IE provision "is predicated … [upon] the connection between the illegal acts and the harm visited upon Navigator" highlights precisely why the district court was right to reject that provision: The remedy in this case must be addressed to the harm to competition, not the harm visited upon a competitor.

The district court's remedy is appropriately addressed to the channels of distribution for non-Microsoft middleware, including rival browsers such as Netscape Navigator. The court did not abuse its discretion by refusing to adopt the States' proposed open-source IE provision for the benefit of Microsoft's competitors.

7. Java must-carry

Massachusetts argues the district court erred in refusing to require Microsoft to distribute with Windows or IE a Suncompliant Java runtime environment, as the States had proposed. Consider:

> For a period of 10 years from the date of entry of the Final Judgment, Microsoft shall distribute free of charge, in binary form, with all copies of its Windows Operating System Product and Browser … a competitively

> performing Windows-compatible version of the Java runtime environment ... compliant with the latest Sun Microsystems **[***89]** Technology Compatibility Kit.

SPR § 13, 6 J.A. (II) at 3179-80. The district court rejected this proposal because it did not think appropriate a remedy that "singles out particular competitors and anoints them with special treatment not accorded to other competitors in the industry." *States' Remedy, at 189*. Microsoft adds that the proposal would give "Sun's Java technology a free-ride on Microsoft's OEM distribution channel."

Massachusetts argues the district court was wrong as a matter of law in thinking that mandated distribution of Java would benefit a competitor and not competition: "If the district court were correct that broad distribution of Java did not benefit competition, then this Court could not have held that Microsoft's undermining of Java's distribution was anticompetitive." Not surprisingly, this *non sequitur* misrepresents the reasoning of the district court. That court focused upon remedying Microsoft's unlawful foreclosure of distribution channels for rival middleware, not upon propping up a particular competitor. Massachusetts also complains that if any measure that helps a "would-be competitor of a monopolist" is rejected out of hand, then "competition **[***90]** can never be restored to a monopolized market." There is a real difference, however, between redressing the harm done to competition by providing aid to a particular competitor and redressing that harm by restoring conditions in which the competitive process is revived and any number of competitors may flourish (or not) based upon the merits of their offerings. Even in the latter instance, of **[*1232]** **[**185]** course, a competitor identifiable *ex ante* may benefit but not because it was singled out for favorable treatment.

Massachusetts also complains the district court ignored evidence "that the widespread availability of the crossplatform Java runtime environment on PCs would reduce the applications barrier to entry." According to Massachusetts, only if Java is available on PCs at "a percentage that approaches the percentage of PCs running Windows" will developers write to it. Testimony cited by Massachusetts extolling the benefits of Java ubiquity, *e.g.,* Green P 53, 2 J.A. (II) at 949; Shapiro P 131, *id.* at 840, does not, however, call into question the district court's rejection of the States' proposal as "market engineering," *States' Remedy, at 262* (quoting Murphy P 239, 5 J.A. **[***91]** (II) at 2678), aimed at benefitting a specific competitor.

B. Cross-cutting Objections

Massachusetts also raises arguments that pertain to multiple provisions of the remedial decree. One such objection goes to the district court's overall approach to fashioning a remedy.

1. "Fruits"

Massachusetts also objects that, because the district court did not require open-source IE licensing and mandatory distribution of Sun's Java technology, the decree fails to "deny Microsoft the fruits of its exclusionary conduct." As recounted in Part I above, we rejected the remedy at issue in *Microsoft III* in part because the district court had "failed to provide an adequate explanation for the relief it ordered." *253 F.3d at 103*. We had expected the district court to discuss the ***HN13***[] "objectives the Supreme Court deems relevant" to fashioning relief in an antitrust case. *Id.* One of those objectives, as Massachusetts notes, is to "deny to the defendant the fruits of its statutory violation." *Id.* (citing *United States v. United Shoe Mach. Corp., 391 U.S. 244, 250, 20 L. Ed. 2d 562, 88 S. Ct. 1496 (1968))*. The district court's omission of any discussion addressed to this objective **[***92]** was particularly troublesome because that court had ordered the break-up of a company that was not the product of mergers or acquisitions, *see, e.g., id. at 99, 106*, much less unlawful mergers or acquisitions. In any event, ***HN14***[] the fruits of a violation must be identified before they may be denied. This would be a difficult, not to say imprudent, task for a reviewing court to undertake in the first instance when the remedy requires a divestiture but there are no clear lines of perforation. We could not, for instance, "go[] into the record far enough to be confident" what had been identified as fruits were actually "the products of the unlawful practices which the defendants have inflicted on the industry," as the Supreme Court could in identifying "at least some" of the defendant's acquisitions as "the fruits of [the] monopolistic practices or restraints of trade" being remedied in *United States v. Paramount Pictures, Inc., 334 U.S. 131, 152, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)*.

The present decree, however, does not require that Microsoft be broken up. Nor did the district court adopt any other of the States' proposals it deemed structural in nature -- open-source IE, as discussed **[***93]** above, and the "porting" of Microsoft Office. The district court also specifically rejected the idea that IE was the fruit of Microsoft's anticompetitive conduct, finding, "neither the evidentiary record from the liability phase, nor the record in this portion of the proceeding, establishes that the present success of IE is attributable entirely, or even in predominant part, to Microsoft's illegal conduct." *States' Remedy, at 185-86 n.81*; *see also id. at 244 n.121*. **[*1233]** **[**186]** Rather, the fruit of its violation was Microsoft's freedom from the possibility rival middleware vendors would pose a threat to its monopoly of the market for Intelcompatible PC operating systems. The district court therefore reasonably identified opening the channels of distribution for rival middleware as an appropriate goal for its remedy. By "prying open" these channels, *International Salt, 332 U.S. at 401*, the district court denied Microsoft the ability again to limit a nascent threat to its operating system monopoly. ***HN15***[] The district court certainly did not abuse its discretion by adopting a remedy that denies Microsoft the ability to take the same or similar actions to limit competition in the **[***94]** future rather than a remedy aimed narrowly at redressing the harm suffered by specific competitors in the past. This distinction underlies the difference between a case brought in equity by the Government and a damage action brought by a private plaintiff.

Massachusetts also complains the district court erred in applying a "stringent but-for test" of causation in determining whether "advantages gained by Microsoft could be considered a fruit of Microsoft's illegality." Here it points to a footnote in which the district court, in the course of rejecting the States' open-source IE proposal, questioned the extent to which the success of IE could be traced to Microsoft's unlawful conduct. *See States' Remedy, at 242* & n.119. We have already determined the district court properly refused to impose that structural remedy without finding a significant causal connection "between Microsoft's anticompetitive conduct and its dominant position in the … market [for operating systems]." *Microsoft III, at 106*; *see also* Part II.A.6. More important, the fruit of Microsoft's unlawful conduct, as mentioned, was its ability to deflect nascent threats to its operating system by limiting **[***95]** substantially the channels available for the distribution of non-Microsoft middleware. Therefore, to quote a leading treatise, regardless whether the "maximum feasible relief" in this case could have included either open-source IE or Java must-carry or both, the district court clearly did not abuse its discretion by adopting a more "tailored remedy" that directly addressed the fruit of Microsoft's unlawful conduct. 3 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 650, at 67-68 (2d ed. 2002). Finally, even if stunting Navigator and Java specifically were deemed the fruits of Microsoft's violations, the decree would still be adequate because it opens the way to their distribution, both directly through the end-user access provision in § III.H and generally through the other conduct prohibitions found in § III of the decree.

2. Presumption

Finally, Massachusetts charges the district court improperly indulged but did not acknowledge an "apparent presumption" in favor of Microsoft's proposed remedy, "while holding the States to a quantum of proof it did not demand of Microsoft." The district court's obligation in fashioning a remedial decree was, as we said in reviewing the **[***96]** original decree in the Government's case, "to enter that relief it calculates will best remedy the conduct it has found to be unlawful," *Microsoft III, at 105*. The district court brings broad discretion to its discharge of this obligation, again as we have explained before.

In this case, the district court was presented with two remedial proposals: The States made their proposal and Microsoft proposed the decree it had negotiated with the Government in the Track I proceedings. The district court considered both proposals and rejected most of the provisions the States proposed on the ground they went far beyond this court's rationale **[*1234]** **[**187]** in holding Microsoft had violated the antitrust laws. If that ground holds, then no "unspoken presumption" need be conjured up to explain the district court's decision.

Our review both of Microsoft's and of the States' proposals confirms the district court was on solid ground: Its reasoning was based upon evidence in the record, was sound, and involved no abuse of discretion. Some of the States' proposals exceeded, under any reasonable interpretation, our liability holding in *Microsoft III*. For instance, the open-source IE provision approached **[***97]** the type of structural relief we singled out when cautioning the district court against relief that exceeds evidence of a causal connection between Microsoft's anticompetitive conduct and its dominance in the operating systems market.

Massachusetts also claims the district court expressed concern about the "supposed lack of economic analysis" supporting the States' remedy without remarking the lack of economic analysis supporting the remedy it adopted. Massachusetts' claims are demonstrably incorrect.

As our review has shown, there is ample evidence in the record to support the district court's findings. Likewise, there was substantial economic testimony to support the district court's conclusions. We need not revisit each of the issues we have already addressed in order to reject the Commonwealth's broad, unsubstantiated claims to the contrary.

III. *CCIA and SIIA v. United States & Microsoft*, No. 03-5030

CCIA and SIIA seek to intervene for the purpose of appealing the district court's determination that the consent decree between the Government and Microsoft is in the "public interest," as required by the Tunney Act. They raise several of the issues we addressed in Part II **[***98]** and they raise a number of issues unique to the settlement proceedings, including the Government's and Microsoft's compliance with the procedural requirements of the Act.

A. Intervention

The district court denied the joint motion of CCIA and SIIA to intervene for purposes of appealing the court's public-interest determination in *U.S. Consent Decree*. They argue the district court erred in denying intervention because their "claim or defense and the main action have a question of law or fact in common," as required for permissive intervention pursuant to *Federal Rule of Civil Procedure 24(b)(2)*. *See also* *Massachusetts School of Law at Andover, Inc. (MSL) v. United States, 326 U.S. App. D.C. 175, 118 F.3d 776, 779 (D.C. Cir. 1997)* ***HN16***[] (Rule 24 governs intervention for purpose of filing appeal under Tunney Act). The district court had also to "consider whether the intervention will unduly delay or prejudice the adjudication of the rights of the original parties." *FED. R. CIV. P. 24(b)(2)*. In denying CCIA's and SIIA's motion, the district court was concerned only with this latter requirement, to which we **[***99]** shall return in a moment. First, we examine whether the would-be intervenors' claim does have a question of law or fact in common with the underlying action.

CCIA and SIIA say they have a "claim or defense" in common with the main action in this case because their members Netscape and Sun Microsystems -- "the very firms this Court identified as the victims of Microsoft's anticompetitive conduct" -- have brought "antitrust claims that overlap with the Government's case." *See Netscape Communications Corp. v. Microsoft Corp.*, No. 02-00097 (D.D.C., filed Jan. 22, 2002); *Sun Microsystems, Inc. v. Microsoft Corp.*, No. 02-01150 (N.D. Cal., filed March 8, 2002). Unable **[*1235]** **[**188]** to deny that point, the Government and Microsoft instead argue CCIA's and SIIA's intervention in this case would not produce the type of efficiency gains that ordinarily make intervention worthwhile when there are common issues because, unlike in *MSL*, there is no possibility in this case of a "trial on the merits." *MSL, 118 F.3d at 782*. Of course, there has already been a trial on the merits. Still, if we determine the consent decree is not in the public interest and remand the case for further **[***100]** proceedings on the remedy, then there is a possibility the final court-ordered remedy will provide some additional relief addressed to the issues Netscape and Sun have raised in their private actions.

The Government further contends permissive intervention in this case is inappropriate because Netscape and Sun, having sued Microsoft, may protect their rights apart from this proceeding. The Government cites *Roe v. Wade, 410 U.S. 113, 125-27, 35 L. Ed. 2d 147, 93 S. Ct. 705 (1973)*, in support of its claim that the "pendency of another action in which an applicant can protect its rights ordinarily counsels against permissive intervention." In *Roe*, however, the Supreme Court denied intervention because the intervenor -- a doctor seeking declaratory and injunctive relief in federal court "with respect to the same statutes under which he stands charged in criminal prosecutions simultaneously pending in state court," *id. at 126* -- had made "no allegation of any substantial and immediate threat to any federally protected right that cannot be asserted in his defense against the state prosecutions." *Id.* Intervention was therefore denied pursuant to the "national policy **[***101]** forbidding federal courts to stay or enjoin pending state court proceedings except under special circumstances." *Younger v. Harris, 401 U.S. 37, 41, 27 L. Ed. 2d 669, 91 S. Ct. 746 (1971)*. No such policy suggests the would-be intervenors in this case should be limited to another forum for airing their grievances. On the contrary, as in *MSL*, because the private antitrust claims of the associations' members overlap substantially with those here in suit, intervention "might produce efficiency gains." *118 F.3d at 782*.

Turning to the second requirement for intervention, recall what we said in *MSL*:

> ***HN17***[] Once a common question of fact or law is found, *Rule 24(b)(2)* says that the district court, in exercising its discretion, "shall consider whether the intervention will unduly delay or prejudice the adjudication of the rights of the original parties." The "delay or prejudice" standard presumably captures all the possible drawbacks of piling on parties; the concomitant issue proliferation and confusion will result in delay as parties and court expend resources trying to overcome the centrifugal forces springing from intervention, and prejudice will take the form not **[***102]** only of the extra cost but also of an increased risk of error.

118 F.3d at 782. Further, "the 'delay or prejudice' standard of *Rule 24(b)(2)* appears to force consideration of the merits of the would-be intervenor's claims." *Id.* Hence, the district court in this case noted CCIA's and SIIA's arguments regarding "defects" in the consent decree were "identical to those made in their Tunney Act filings." *Order Denying Intervention, 2003 U.S. Dist. LEXIS 1480, [WL] at *4*. And having once reviewed those filings in making its public-interest determination and finding them "not to fatally undermine" the proposed consent decree, the court held them insufficient to warrant intervention. *Id.*

CCIA and SIIA now argue that, if they are allowed to intervene, "There will be no **[*1236]** **[**189]** delay caused by [their] appeal because this Court will have to decide the proper remedy for Microsoft's antitrust violations in [Massachusetts'] appeal regardless of what happens here." The Government acknowledges there would be no "undue delay" because the "consent decree is currently in force, as is an identical and unchallenged decree in the litigation between Microsoft and the settling states."

We think it sufficient **[***103]** the consent decree was already in place in the settling states' case when CCIA and SIIA sought intervention in December 2002: Allowing them to appeal from the Tunney Act proceeding will not delay "adjudicating … the rights of the original parties," *FED. R. CIV. P. 24(b)*, because the settling states' decree requires Microsoft to conduct itself in the same manner as it must under the decree it entered into with the Government. *See* *New York v. Microsoft Corp., 231 F. Supp. 2d 203, 205-06 (D.D.C. 2002)*. Nor will the parties be otherwise prejudiced by the intervenors' appeal. CCIA and SIIA had already participated extensively in the proceedings before the district court by submitting public comments in response to the proposed consent decree, *see* Comments of CCIA (Jan. 28, 2002), 2 J.A. (I) at 455-598; Comments of SIIA (Jan. 28, 2002), 3 J.A. (I) at 990-1057, and appearing as *amici* in the hearing on the proposed decree, *see* 3/6/02 pm Tr. at 156-65, 3 J.A. (I) at 1536-45. Because the district court already confronted CCIA's and SIIA's arguments in rendering its decision, there is no reason to fear "issue proliferation, **[***104]** " "confusion," "extra cost," or "an increased risk of error," *see* *MSL, 118 F.3d at 782*, if the associations are allowed to appeal the district court's publicinterest determination. Thus do the unusual procedural and substantive circumstances in this case converge to obviate any undue "delay or prejudice" that might otherwise have attended CCIA's and SIIA's appeal. Accordingly, we reverse the order of the district court denying intervention and permit CCIA and SIIA to intervene for the purpose of appealing the district court's public-interest determination. [19]

---

[19] The Government and Microsoft claim CCIA and SIIA may not intervene because they did not include with their motion to intervene "a pleading setting forth the claim or defense for which intervention is sought." *FED. R. CIV. P. 24(c)*. Neither the Government nor Microsoft explains what type of pleading the would-be intervenors could have filed in a case such as this, where a judgment had already been rendered. In any event, ***HN18***[] "procedural defects in connection with intervention motions should generally be excused by a court." *McCarthy v. Kleindienst, 239 U.S. App. D.C. 247, 741 F.2d 1406, 1416 (D.C. Cir. 1984)*. The Government acknowledged as much at oral argument, stating, "this Court and other courts have not been hypertechnical, actually, in making sure that … potential intervenors do file a pleading." The Government and Microsoft make no claim they had inadequate notice of the intervenors' appeal, and we find no reason to bar intervention based solely upon this technical defect, if defect it be.

[*105]** B. The Public Interest Finding

HN19[] Under the Tunney Act, the district court's "public interest" inquiry into the merits of the consent decree is a narrow one: The district court should withhold its approval of the decree "only if any of the terms appear ambiguous, if the enforcement mechanism is inadequate, if third parties will be positively injured, or if the decree otherwise makes a 'mockery of judicial power.' " *MSL, 118 F.3d at 783*; *see also* *United States v. Microsoft, 312 U.S. App. D.C. 378, 56 F.3d 1448, 1462 (D.C. Cir. 1995)* (*Microsoft I*). Such limited review is obviously appropriate for a consent decree entered into before a trial on the merits because the "court's authority to review the decree depends entirely on the government's exercising **[*1237]** **[**190]** its prosecutorial discretion by bringing a case in the first place." *Microsoft I, at 1459-60*.

In a footnote CCIA and SIIA claim that in *Microsoft I* this court "suggested that the 'mockery' standard either does not apply or is met where, as here, a *post-trial* decree fails to comply with an existing 'judicial mandate.' " [20] (Emphasis in original.) Not surprisingly, however, we gave **[***106]** no consideration in *Microsoft I* to the standard we would apply to the district court's review of a consent decree entered into after a trial on the merits because that case did not involve a posttrial consent decree. In any event, ***HN20***[] the Tunney Act does not distinguish between pre- and post-trial consent decrees; the Act simply requires the district court, "before entering any consent judgment" in a Government antitrust case, to "determine that the entry of such judgment is in the public interest." *15 U.S.C. § 16(e)*.

[*107]** Moreover, if the district court approves a consent decree that "fails to comply" with our mandate, then the resulting consent decree surely does make a "mockery of judicial power"; hence, the "mockery" standard is no less appropriate merely because a consent decree is entered into after a trial on the merits. Finally, ***HN21***[] although the district court may not ignore the grounds upon which the defendant was held liable, neither should it reject a consent decree simply because it believes the Government could have negotiated a more exacting decree. Any settlement, even one negotiated after a trial on the merits, may reflect "a concession the government made in bargaining," *Microsoft I, at 1461*, and yet be "within the reaches of the public interest." *Id. at 1458*.

In the unusual posture of this case, we review the district court's public-interest determination not against the untested allegations of a complaint but rather against the findings of fact and conclusions of law entered by the district court and left undisturbed by our review in *Microsoft III*. This we do pursuant to the deferential standard we set out in *MSL, 118 F.3d at 783*.

1. Issues overlapping Massachusetts' **[***108]** case

CCIA and SIIA raise several objections to the district court's determination the consent decree is in the public interest. We addressed most of these issues in our disposition of Massachusetts' appeal, and we shall avoid, to the extent possible, duplicating here the analysis in Part II. Some repetition is necessary, however, because the overlap between the cases is neither complete nor exact. Most important, the district court in the Commonwealth's case was required to determine, in its broad discretion, the form of relief that would "best remedy the conduct … found to be unlawful." *Microsoft III, at 105*. For that purpose the district court had the benefit of the extensive factual record **[*1238]** **[**191]** compiled on remand per the instruction of this court. *Id. at 103*. In this Tunney Act case the court was charged not with fashioning its own remedy but with determining whether the consent decree agreed to by the

---

[20] We are at something of a loss to understand the appellants' allusion; the phrase "judicial mandate" appears in *Microsoft I* only in some legislative history quoted in support of this court's statement that there were no cases prior to the Tunney Act in which "an appellate court had approved a trial court's rejection of a consent decree as outside the public interest." *56 F.3d at 1458* (citing *Antitrust Procedures and Penalties Act: Hearings on S.782 and S.1088 Before the Subcomm. on Antitrust and Monopolies of the Senate Comm. on the Judiciary*, 93d Cong., 1st Sess. 92 (1973) (Statement of Thomas E. Kauper, Assistant Attorney General, Antitrust Div., Dep't of Justice) ("Except in cases where a previous judicial mandate is involved and the consent decree fails to comply with that mandate, or where there is a showing of bad faith or malfeasance, the courts have allowed a wide range of prosecutorial discretion")).

Government and Microsoft is in the public interest. The district court's decision was to be based not upon the record of an evidentiary hearing but rather upon the information generated by the settling parties in compliance with the Tunney Act, as well as the submissions of **[***109]** other interested parties and of the public.

Despite the differences between the two proceedings, there was substantial overlap in both the legal and the factual issues presented. For instance, the public comments received in the Tunney Act proceedings raised several of the same issues the district court addressed in the States' litigation over the remedy in their case. [21] The overlap is further reflected in the similarity of the issues raised in CCIA's and SIIA's amicus brief in No. 02-7155 and the issues they raise in their briefs as intervenors in this case. With these similarities and differences in mind, we turn to the substance of CCIA's and SIIA's claims.

[*110]** a. Commingling

CCIA and SIIA first object to the consent decree on the ground it does not address our having held Microsoft's commingling of IE and Windows code was anticompetitive and unlawful. They argue in this case, as they did as *amici* in No. 02-7155, that securing the "user's ability to remove IE icons" is not an adequate remedy for Microsoft's unlawful integration of IE and Windows because, from a software developer's perspective, "the existence (or not) of a particular icon on a user's desktop is immaterial." They also disparage end-user access as an appropriate provision to address the applications barrier to entry.

The Government and Microsoft argue the provisions of the decree permitting end-user access to non-Microsoft middleware, namely, §§ III.C and III.H, effectively address our concern about Microsoft's integration of IE and Windows. Section III.C allows OEMs, among other things, to alter the configuration of the desktop, including "installing[] and displaying icons" of non-Microsoft middleware, and § III.H permits OEMs and end users to invoke non-Microsoft middleware in place of Microsoft middleware.

The district court accepted the view the Government espoused **[***111]** during the Tunney Act proceedings that the proper goal of the remedy is to avoid the anticompetitive effect, not necessarily to prohibit further instances, of commingling. *U.S. Consent Decree, at 180-81*. Indeed, the district court agreed with the Government that "it is not at all clear that the practice of commingling would be of antitrust concern" in the future. *Id. at 180*. In the past Microsoft's commingling had prevented OEMs from removing IE, thereby deterring them "from installing a second browser because doing so increased [their] product testing and support costs." *Microsoft III, at 66*. Going forward, however, the decree allows OEMs to disable end-user access to IE, and thereby to avoid the costs of having to support both IE and a rival browser. As a result, OEMs are more likely to install a rival browser based upon market determinants, **[*1239]** **[**192]** such as consumer demand. In this way, the decree removes the disincentive facing software developers otherwise interested in writing programs to APIs exposed by rival middleware. *See* Part II.A.1.

The Government reasonably predicted that OEMs' new freedom to respond to market demand would enhance competition between Microsoft **[***112]** and other manufacturers of middleware. *See U.S. Consent Decree, at 181*; *see also* CIS at 29-33, 45-48, 1 J.A. (I) at 163-67, 179-82. Whether CCIA's and SIIA's proposed alternative, prohibiting any commingling of code, would strengthen further the ability of rival platforms to attract software developers is irrelevant; the question before us is whether the remedy approved by the district court is within the reaches of the public interest. A consent decree that addresses the disincentive software developers faced but does not altogether prohibit commingling -- which would not be without its costs -- surely qualifies.

b. Java

---

[21] *See, e.g.,* Comments of CCIA, 2 J.A. (I) at 455-598; Comments of SIIA, 3 J.A. (I) at 990-1057; *see also* Comments of Robert Litan, Roger Noll & William Nordhaus (Jan. 17, 2002), 1 J.A. (I) at 208-84; Comments of Am. Antitrust Inst. (Jan. 24, 2002), *id.* at 285-328; Comments of AOL Time Warner (Jan. 28, 2002), *id.* at 329-426; Comments of Project to Promote Competition & Innovation in the Digital Age (Jan. 28, 2002), 2 J.A. (I) at 650-813; Comments of SBC Communications Inc. (Jan. 28, 2002), *id.* at 814-989.

CCIA and SIIA next argue the consent decree is not in the public interest because it does not address Microsoft's efforts to prevent the emergence of Java as a competitor to Windows. Those efforts included the use of exclusive (so-called First Wave) agreements with ISVs; threatening Intel for its cooperation with Sun and Netscape in developing a Java runtime environment; and the deception of Java software developers discussed in Part II.A.2 above. *See* *Microsoft III, at 74-78*.

The Government and Microsoft respond that §§ III.F and III.G of the consent **[***113]** decree address Microsoft's attempts to exclude Sun's Java technology from the market. Section III.F provides that Microsoft shall "not retaliate against any ISV or [Independent Hardware Vendor (IHV)] … [for] distributing, promoting or supporting any software that competes with Microsoft Platform Software[.]" *Final Consent Decree, 2002 U.S. Dist. LEXIS 22861, [WL] at *3*. Section III.G prohibits Microsoft from entering into any agreement with an IAP, Internet Content Provider, ISV, IHV, or OEM to distribute, promote, use, or support Windows or Microsoft middleware exclusively. *2002 U.S. Dist. LEXIS 22861, [WL] at *4*. The district court concluded that " §§ III.F and III.G not only prohibit the anticompetitive conduct identified by the appellate court with regard to ISVs, IAPs, and IHVs, but these provisions extend further, to address Microsoft's conduct with other participants in the industry even though Microsoft's dealings with these entities did not give rise to liability in this case." *U.S. Consent Decree, at 186*.

Despite their failure to offer more than conclusory assertions that the provisions of the consent decree addressing Microsoft's exclusionary agreements and its retaliatory conduct are inadequate, CCIA and SIIA argue **[***114]** the absence of a requirement that Windows carry a Sun-compliant Java platform or, indeed, of any Java-specific remedy, "alone renders the settlement insufficient to satisfy the public interest." CCIA and SIIA misapprehend the district court's limited role under the Tunney Act in determining whether a consent decree is in the public interest. That court's "function is not to determine whether the resulting array of rights and liabilities is the one that will *best* serve society, but only to confirm that the resulting settlement is within the *reaches* of the public interest." *Microsoft I, at 1460* (emphases in original). Although the district court cannot ignore this court's liability holding in making its public-interest determination, neither can it be faulted for not insisting upon a provision that clearly is not required by our holding. *See* Part II.A.7.

Nor did the Government ignore our liability holding in negotiating the decree. In its response to public comments the **[*1240]** **[**193]** Department of Justice explained its decision not to pursue the States' proposed Java must-carry provision: "It is not the proper role of the government to bless one competitor over others, or one potential **[***115]** middleware platform over others." Response of the United States to Public Comments on the Revised Proposed Final Judgment (*U.S. Response to Public Comments*) P 431, at 215 (Feb. 27, 2002), 3 J.A. (I) at 1349. The Government instead negotiated provisions -- §§ III.F and III.G -- that prohibit use of the First Wave Agreements and the various tactics Microsoft had used against Java and Intel. The district court therefore reasonably deferred to the Government's rejection of the Java mustcarry provision.

c. Disclosure of APIs

CCIA and SIIA argue the consent decree will not prevent Microsoft from driving new middleware threats from the market. Because Microsoft is required to disclose only APIs used by Microsoft Middleware to interoperate with Windows, they claim Microsoft's competitors can "never offer middleware for use on Windows that does more than comparable Microsoft middleware." [22] The Government responds that such disclosure nonetheless prevents rival middleware "from being 'disadvantaged by comparison to Microsoft's middleware technology' … by insuring that non-Microsoft middleware can use the same APIs as the Microsoft middleware with which it competes," quoting *U.S.* ***[***116]*** *Consent Decree, at 187*. According to the Government, that disadvantage, which had prevented rival middleware from posing a platform threat to Windows, was the focus of its case for liability.

Like Massachusetts, CCIA and SIIA would have us overlook the district court's findings of fact -- crucial to holding Microsoft had stifled competition -- documenting the threat posed by Netscape and Java, both of which relied only upon the more limited set of APIs Microsoft then disclosed. *See* *Findings of Fact, at 28-30*; *see also U.S. Response*

---

[22] They also point to provisions allowing Microsoft to prohibit certain modifications of the user interface, a matter we take up in Part III.B.2.b, below.

to Public Comments P 280, at 141, 3 J.A. (I) at 1275 (1994 development of Mosaic, a non-Microsoft Web browser, did not rely upon APIs used by IE because IE did not then exist). Moreover, the district court correctly recognized Microsoft's financial incentive -- noted during the settlement proceedings both by Microsoft **[***117]** and by the Government -- to make its APIs available to software developers. *U.S. Consent Decree, at 189*; *see also* Part II.A.3.a above. It was therefore appropriate for the district court to approve the decree without requiring the expansive disclosure sought by CCIA and SIIA.

CCIA and SIIA also note (actually, they footnote) that the decree, particularly the API disclosure provision, focuses only upon interoperability with Windows and "does not make Windows API specifications available to direct … competitors" in the market for operating systems, nor does it require Microsoft to disclose "API specifications" for Microsoft middleware that exposes APIs. The intervenors argue the lack of such disclosure "will only increase the applications barrier and reinforce the Windows monopoly by remaining Microsoftcentric." The Government responds that the disclosure of API specifications demanded by CCIA and SIIA is unrelated to the theory of liability in this case. Microsoft echoes the Government in claiming its violation of the antitrust laws did not involve practices directed at the developers of rival operating systems but **[*1241]** **[**194]** rather conduct directed at rival middleware, such as Netscape **[***118]** Navigator.

Although CCIA's and SIIA's argument is insufficiently developed to constitute a serious challenge to the district court's approval of the consent decree, *see* *Hutchins v. District of Columbia, 338 U.S. App. D.C. 11, 188 F.3d 531, 539 n.3 (D.C. Cir. 1999)* ("We need not consider cursory arguments made only in a footnote"), we note the Government considered concerns similar to those raised by CCIA and SIIA and rejected the sort of broad disclosure they seek. *See, e.g.*, *U.S. Response to Public Comments*, at 142-43, 148, 3 J.A. (I) at 1276-77, 1282. The district court likewise considered various criticisms of the extent of disclosure required by § III.D and reasonably concluded they did not require it to disapprove that provision. *See U.S. Consent Decree, at 187-89*.

In sum, CCIA and SIIA neither point to any defects in the district court's reasons for approving the disclosure required by the consent decree, nor do they raise any other concern not already addressed above in Part II.A.3. We conclude, therefore, the district court reasonably held the degree of API disclosure required by the consent decree is consonant with the public interest.

d. Adequacy **[***119]** of definitions

CCIA and SIIA argue the consent decree is not in the public interest because it fails to define terms "critical to its enforceability." Specifically, they complain the definitions of "Windows Operating System Product" and "Microsoft Middleware" are vague, and they object to the absence of a definition of "server operating system product" and of "interoperate." Here they remind us the district court, in considering a proposed consent decree, "should pay special attention to the decree's clarity," *Microsoft I, at 1461*, and should withhold its approval "if any of the terms appear ambiguous." *MSL, 118 F.3d at 783*. The intervenors seek a greater degree of precision lest Microsoft itself be able to dictate which middleware is covered by the decree. Ultimately they are concerned with the disclosure of APIs required by § III.D, the extent to which communications protocols are covered by § III.E, and interoperability.

The district court specifically addressed various criticisms of the precision with which the consent decree was drafted. For instance, it rejected as unfounded the concern that Microsoft could falsely identify as part of Windows the software **[***120]** code of a separate middleware product and thereby avoid disclosing the APIs exposed by that product. That concern appears to have arisen out of the last sentence of the definition of "Windows Operating System Product," which states, "The software code that comprises a Windows Operating System Product shall be determined by Microsoft in its sole discretion." *Final Consent Decree § VI.U, 2002 U.S. Dist. LEXIS 22861, [WL] at *15*. The district court explained that the terms Windows Operating System Product and Microsoft Middleware Product -- the latter of which is nested in the definition of Microsoft Middleware, and where it helps define Microsoft's obligation to disclose APIs -- are not mutually exclusive: "Software code can simultaneously fall within both." *U.S. Consent Decree, at 166*. Therefore, Microsoft cannot avoid its disclosure obligation merely by deeming particular software code a part of Windows; if that code likewise has the functionality of a Microsoft Middleware Product, then it will be treated as such for the purpose of disclosure under § III.D. Therefore, Microsoft's obligation under that section is unaffected by its ability to determine which software code is part of Windows. *Accord U.S. Response* **[***121]** *to Public Comments* PP 121, 122, at 65-66, 3 J.A. (I) at 1199-1200.

[*1242] [195]** CCIA's and SIIA's complaint that the decree leaves undefined the terms "interoperate" and "server operating system product" is not a source of concern to the court. The intervenors suggest Microsoft may determine unilaterally what the former term means, but this, of course, overlooks the district court's retention of jurisdiction to interpret and to enforce the decree. *Final Consent Decree, 2002 U.S. Dist. LEXIS 22861, [WL] at *16*. Moreover, the district court explained how the undefined term "interoperate" is used in §§ III.D and III.E. *See U.S. Consent Decree, at 190-92*, *see also* Part II.A.3 above. We find nothing in CCIA's and SIIA's arguments that requires additional comment upon that term or, more broadly, upon the adequacy of the disclosures required by the consent decree.

As for the term "server operating system product," which is found in § III.E of the decree, CCIA and SIIA argue the absence of a definition leaves Microsoft's disclosure obligation indeterminate. As Microsoft correctly points out, however, the Government addressed this same concern in its response to public comments, stating the coverage of Microsoft servers **[***122]** was "broadened" in the decree to include not only the "Windows 2000 Server" but also other server products such as the "Windows 2000 Datacenter Server" and the "Windows 2000 Advanced Server." *U.S. Response to Public Comments* P 318, at 159-60, 3 J.A. (I) at 1293-94. Not only did the Government insist upon expanding the range of servers covered under the decree by including a term left intentionally undefined, but the district court viewed § III.E as "forwardlooking" and capable of addressing the "rapidly growing server segment of the market." *U.S. Consent Decree, at 189*. CCIA and SIIA offer no reason to think the district court would construe the term "server operating system product" narrowly, and thus narrow the disclosure required under § III.E. Rather, in this instance the absence of a definition is more likely to broaden than to narrow the range of server operating systems to which the decree applies.

HN22[] The district court has a continuing responsibility for interpretation of the consent decree, and it is "entitled to insist on that degree of precision concerning the resolution of known issues as to make [its] task, in resolving disputes, reasonably manageable." *Microsoft* ***[***123]*** *I, at 1461-62*. The consent decree is not ambiguous in the sense disallowed in *MSL* merely because it contains words that are not defined therein, or because the intervenors think certain words could be defined differently or with greater specificity. We do not find in the decree the kind of glaring ambiguities that might call into question the wisdom of the district court's having affixed its imprimatur. In sum, CCIA and SIIA offer no convincing reason the decree will not be construed so as to serve the public interest. We therefore hold the district court did not err in approving it.

e. "Fruits"

CCIA and SIIA lodge several broad objections to the district court's approval of a consent decree they claim fails to "terminate the illegal monopoly" or deprive Microsoft of the fruits of its violations. In their view the decree should include several of the remedies the district court rejected in the States' case, such as requiring Microsoft to "disentangle" its browser from its operating system code and imposing "more robust API and disclosure obligations requiring the 'open source' distribution of IE code." CCIA and SIIA do not make any arguments with respect to these proposals **[***124]** that we have not already addressed in connection with the district court's decision in the States' litigation. The intervenors also make a passing reference to the desirability of requiring Microsoft **[**196] [*1243]** to sell the right to "port" Microsoft Office to other operating system platforms. But they do not discuss the merits of such a provision, wherefore neither do we.

Finally, we pause to mention that CCIA's and SIIA's discussion of the "fruits" of Microsoft's unlawful conduct is misdirected (as was that of Massachusetts): As we explained in Part II.B.1, depriving an antitrust violator of the fruits of its violation does not entail conferring a correlative benefit upon the particular competitor harmed by the violation. Rather, as the Government explained in its response to public comments:

> The key to the proper remedy in this case is to end Microsoft's restrictions on potentially threatening middleware, prevent it from hampering similar nascent threats in the future, and restore the competitive conditions created by similar middleware threats. In this context, the fruit of Microsoft's unlawful conduct was

> Microsoft's elimination of the ability of potentially threatening middleware **[***125]** to undermine the applications barrier to entry.... The [proposed judgment] addresses and remedies precisely this issue.

U.S. Response to Public Comments P 17, at 9, 3 J.A. (I) at 1143. Just so.

2. Non-overlapping issues

CCIA and SIIA also raise issues that are either specific to the consent decree or that Massachusetts did not raise.

a. Enforcement

Section IV of the consent decree deals with compliance and enforcement. The Government and the settling states "have exclusive responsibility for enforcing the decree." *Final Consent Decree § IV.A.1, 2002 U.S. Dist. LEXIS 22861, [WL] at *7*. They have broad investigative powers, including, among other things, assured "access ... to inspect any and all source code" and to interview Microsoft's employees and officers about matters contained in the decree. *Id.* § IV.A.2. Section IV also sets up a threemember "Technical Committee" of "experts in software design and programming" to assist in enforcement of and compliance with the decree. *Id. § IV.B.1, 2002 U.S. Dist. LEXIS 22861, [WL] at *8*. The Committee has "the power and authority to monitor Microsoft's compliance with its obligations" under the decree. *Id. § IV.B.8.a, 2002 U.S. Dist. LEXIS 22861, [WL] at *9*. As the district court explained, "the committee **[***126]** is answerable to the government," *U.S. Consent Decree, at 197*; for instance, it must report in writing every six months "the actions it has undertaken in performing its duties pursuant to [the decree], including the identification of each business practice reviewed and any recommendations made by the [Committee]." *Final Consent Decree § IV.B.8.e, 2002 U.S. Dist. LEXIS 22861, [WL] at *10*. The Committee also has an independent reporting obligation "when [it] has reason to believe that there may have been a failure by Microsoft to comply with any term" of the decree. *Id.* § IV.B.8.f. As the district court pointed out, however, "Nothwithstanding all of the procedures in place with regard to the Technical Committee, ultimately the power to enforce the terms of the decree rests with the government." *U.S. Consent Decree, at 198*.

CCIA and SIIA object to the role of the "Technical Committee" and the adequacy of the enforcement provisions. They argue the Committee's enforcement role is illusory because the decree gives Microsoft and the Government "equal say in the Committee's membership"; the members lack legal expertise; its means for collecting and processing third-party complaints are inadequate; **[***127]** and the Committee's findings or recommendations may not be used in proceedings before the district court.

Although ***HN23***[] the district court must withhold approval of a consent decree if "the enforcement mechanism is inadequate," **[*1244]** **[**197]** *MSL, 118 F.3d at 783*, CCIA's and SIIA's arguments to that effect are unpersuasive. The Government addressed similar criticisms in its response to public comments. It explained there that a primary purpose of the Committee is to

> facilitate the resolution of potentially complex and technologically nuanced disputes between Microsoft and others over the practical workings of the [decree]. The [Committee] is not intended to have independent enforcement authority; that authority remains with the Plaintiffs and the Court.

U.S. Response to Comments P 386, at 190, 3 J.A. (I) at 1324. This was the district court's understanding as well: "The Technical Committee is not intended as a substitute for the enforcement authority of the United States." *U.S. Consent Decree, at 199*.

The intervenors do not explain why they think the design of the Committee is ill-suited to its structural purpose. The Committee is to play a leading role in **[***128]** providing technical competence to the Government in its enforcement of the decree -- a perfectly sensible division of labor -- and, we note, nothing in the decree precludes the Committee from enlisting expertise beyond its own membership. *See, e.g., U.S. Response to Public Comments* P 387, at 191, 3 J.A. (I) at 1325 (the Committee "can and should have available to it expertise broader than purely technical matters"). In sum, CCIA and SIIA offer no basis for doubting the ability of the Committee to inform and assist the Government in its enforcement efforts.

CCIA's and SIIA's criticisms of the process for collecting third-party complaints and of the inadmissibility of the Committee's findings in proceedings before the court seem entirely misconceived. They complain that "the most that can happen" when a meritorious third-party complaint is received by the Committee is that the Committee "shall advise Microsoft and the Plaintiffs of its conclusion and its proposal for cure." *See Final Consent Decree § IV.D.4.c, 2002 U.S. Dist. LEXIS 22861, [WL] at *12*. Having no reason to believe the plaintiffs will not pursue Microsoft on a valid complaint, into court if necessary, we agree with the district court that the **[***129]** decree provides for an appropriate method of receiving and of acting upon third-party complaints. Moreover, as the district court correctly noted, "third-party concerns cannot supplant the ultimate enforcement role of the government, nor should third-party complaints burden mechanisms established for the government's and ultimately the Court's benefit." *U.S. Consent Decree, at 199*.

The limitation the decree places upon the use of the Committee's findings is also appropriate considering its purpose: "By ensuring that Microsoft's and third parties' communications will not be used directly against Microsoft, the [Committee] will benefit from heightened candor and information disclosure by Microsoft employees and others." *U.S. Response to Public Comments* P 385, at 190, 3 J.A. (I) at 1324. In addition, as the district court explained:

> The limitation on the use of Technical Committee work product does not preclude the government from "utilizing, relying on, or making derivative use of the [Technical Committee's] work product" in conjunction with its own enforcement activities, … nor does the provision preclude Plaintiffs from obtaining Microsoft documents from the **[***130]** committee for use in … enforcement proceedings.

U.S. Consent Decree, at 200.

Thus, viewed in context, the Government's ability to enforce the decree is clearly strengthened, not diminished, by the existence and composition of the Technical Committee.

[*1245] **[**198]** b. User interface

CCIA and SIIA next object to two provisions in the consent decree they claim "limit what competitor products [can] do," namely: § III.C.3, which provides that rival middleware may be launched automatically at the conclusion of the initial boot sequence or upon connection to or disconnection from the internet, but only if a Microsoft Middleware Product provides similar functionality and the rival middleware displays either no user interface or a user interface similar in size and shape to that of the corresponding Microsoft Middleware Product; and § III.C.5, which allows an OEM to "present[] in the initial boot sequence its own IAP offer provided that the OEM complies with reasonable technical specifications established by Microsoft." The intervenors express concern that Microsoft may attempt to "limit middleware competition only to the circumstances in which its own products launch," and that it **[***131]** may establish technical specifications that limit the capabilities of competing software and thus inhibit competition from non-Microsoft middleware.

These objections are moot because the limitations on the relief provided in §§ III.C.3 and III.C.5 of the consent decree are not included in the States' remedial decree; therefore, Microsoft may not implement or enforce them. The States' remedial decree allows Microsoft to restrict the launch of non-Microsoft middleware only if it would "drastically alter" the user interface; it does not limit automatic launches to situations in which a Microsoft Middleware Product provides similar functionality. *Compare States' Remedy § III.C.3, at 268*, *with Final Consent Decree § III.C.3, 2002 U.S. Dist. LEXIS 22861, [WL] at *2.* Nor does the remedial decree require an OEM to comply with Microsoft's "reasonable technical specifications" in order to present an IAP offer in the initial boot sequence. *Compare States' Remedy § III.C.5, at 268*, *with Final Consent Decree § III.C.5, 2002 U.S. Dist. LEXIS 22861, [WL] at *3*.

At oral argument when the court suggested the intervenors' challenge to §§ III.C.3 and III.C.5 had been rendered moot by the judgment in *States' Remedy*, counsel demurred only to the **[***132]** extent of stating that, "if a state settled with Microsoft, the only thing that would be available would be the decree in this case." But that is not correct. If CCIA and SIIA cannot convince even one of the states that is a party to that case to take up their cause, then the complainant may itself bring the alleged violation to the attention of the district court, which retained jurisdiction specifically so it "may act *sua sponte* to issue further orders or directions" to enforce the judgment or to punish violations thereof. *States' Remedy, at 277*. In any event, it is speculative at best to suggest the States will not be vigilant and energetic in the pursuit of anything Microsoft may do in violation of the remedial decree. [23]

[*133]** We therefore conclude the intervenors' complaint that Microsoft might attempt to manipulate the user interface has been mooted by the judgment in *States' Remedy*.

c. Anti-retaliation

CCIA and SIIA also argue (again in a footnote) the decree is inadequate to **[*1246]** **[**199]** prevent Microsoft from improperly terminating an OEM's license. Section III.A forbids Microsoft from retaliating against an OEM for developing, distributing, promoting, using, selling, or licensing software that competes with Windows or with Microsoft middleware; shipping a personal computer with both Windows and a non-Microsoft operating system installed; or exercising any other option available to it under the consent decree. *Final Consent Decree § III.A, 2002 U.S. Dist. LEXIS 22861, [WL] at *1*. If Microsoft moves for any legitimate reason to terminate an OEM's license for Windows, then it must first give the OEM an opportunity to "cure" the reason for the proposed termination. *Id.* Microsoft may terminate an OEM's license without giving it the opportunity to cure only if Microsoft has previously given the OEM two or more notices of proposed termination.

The intervenors object only to the last-mentioned part of § III.A, on the ground it may serve **[***134]** as a way for Microsoft still to retaliate against OEMs, apparently because the terms of a Windows license are "inherently complex." They claim "it would not be difficult to find an OEM in breach of multiple technical requirements," thereby giving Microsoft a pretext for terminating the OEM's license in apparent compliance with § III.A. They offer no details, however, and no example of how the "inherent[] complexity" of the license may be used unfairly against a licensee that, by hypothesis, is "in breach of multiple technical requirements." Their narrow focus also ignores both the overall effectiveness of § III.A and the severity of other prohibitions intended to prevent Microsoft's manipulation of the decree. We conclude the district court therefore did not err in approving § III.A.

C. Procedural Claims

CCIA and SIIA also claim both the Government and Microsoft have failed to comply with various of the procedural requirements of the Tunney Act: (1) the Government failed to identify and explain "any unusual circumstances giving rise to [the decree]," as required by *15 U.S.C. § 16(b)(3)*; (2) the CIS does not provide a "description and evaluation of **[***135]** alternatives" to the decree, as required by *15 U.S.C. § 16(b)(6)*; (3) the CIS does not adequately disclose the documents the Government considered to be "determinative" in formulating its proposal, *see id. § 16(b)*; and (4) Microsoft failed to satisfy its obligation under *§ 16(g)* to disclose all communications it had with the "United States," as that term is used in the Tunney Act. According to the intervenors, these alleged procedural defects "preclude a determination that the District Court engaged in the requisite 'independent' and 'informed' review of the consent decree."

HN24[] Compliance with the procedural requirements of the Tunney Act ensures the district court has before it the information it needs in order to make an informed determination whether the decree is in the public interest. According to the Government, the district court should evaluate the parties' discharge of their procedural obligations for substantial rather than for strict compliance, *see* *United States v. Bechtel Corp., 648 F.2d 660, 664 (9th Cir. 1981)*. As the Government correctly states, the district court's evaluation "inherently involves judgment and discretion. **[***136]** " Therefore, the Government urges us to review the district court's evaluation of the parties' compliance only for abuse of discretion. Meanwhile, CCIA and SIIA argue for a less deferential standard, claiming the Government's approach "assumes away the entire purpose of the disclosures." We need not decide which

[23] Indeed, the plaintiff states have set up a web site "established for coordinated state enforcement of federal court judgments against the Microsoft Corporation for Microsoft's unlawful monopoly conduct." *Coordinated State Enforcement of Microsoft Antitrust Judgments*, *at* http://www.microsoft-antitrust.gov. The site includes "an on-line complaint form that may be used by the public to report suspected violations of the judgments." *Id.*

standard to apply, however, because the district court was clearly correct in determining **[*1247] [**200]** both parties met the requirements of the Act.

1. Government's disclosure

CCIA and SIIA preface their objections to the Government's disclosures in this case with the claim that even "technical and formalistic failures to comply" with the procedural requirements of the Tunney Act are grounds for denying entry of a proposed judgment. For this counter-intuitive proposition they cite *United States v. Central Contracting Co., 527 F. Supp. 1101 (E.D. Va. 1981)*, but not surprisingly the procedural facts of that case bear no resemblance to those of the present case: The defects in the Government's compliance with the Act in *Central Contracting* were neither "technical" nor "formalistic"; rather, they frustrated the whole purpose of the Act. Indeed, the record was "devoid of **[***137]** any indication that any of the procedures [of the Tunney Act] other than the original filing had been complied with." *Id. at 1102*. It appeared the Government had not even published the CIS and the proposed consent decree in the Federal Register and newspapers of general circulation, as specifically required by *§ 16(b)*. *Id. at 1104*. As seen below, no similarly material defects mar the Government's disclosure here; *Central Contracting* is therefore no help to CCIA and SIIA in this case.

The intervenors' first objection to the Government's disclosure is that the CIS does not provide "an explanation of any unusual circumstances giving rise" to the proposed judgment, as required by *§ 16(b)(3)*. Specifically, they complain the CIS failed to satisfy *§ 16(b)(3)* because it did not include a discussion of the "unusual and perhaps unprecedented" circumstance that the consent decree was entered after a full trial on the merits and appellate review. The Government simply denies the alleged shortcoming.

As an initial matter we acknowledge, as did the district court, the Government's thorough discussion in the CIS of the substance of the consent decree. **[***138]** That document clearly reflects the Government's extensive study of the likely effects of the consent decree, and its consideration of the more than 32,000 comments submitted by the public.

CCIA's and SIIA's criticism of the Government's disclosure is narrowly focused upon the "unusual circumstances" requirement of *§ 16(b)(3)*. Although the Government nowhere in the CIS characterized the proceedings in this case as "unusual," it did explain fully the circumstances from which the consent decree arose, pointing out specifically that the parties settled only after this court had held that Microsoft violated *§ 2 of the Sherman Act*. The Government also explained in the CIS that our holding in *Microsoft III* substantially narrowed the grounds upon which Microsoft had been held liable by the district court, *see* CIS at 7-8, 1 J.A. (I) at 142-43, wherefore:

> [The] provisions in the Proposed Final Judgment are modeled after [the interim conduct provisions of the final judgment entered in June 2000, *see Remedy I*], with modifications, additions and deletions that take into account the current and anticipated changes in the computer industry, as well as the decision of the **[***139]** Court of Appeals, which reversed certain of the District Court's liability findings.

Id. at 61-62, 1 J.A. (I) at 195-96. The Government's discussion of this procedural context fully conveyed the "unusual" nature of the circumstances giving rise to the consent decree, as required by *§ 16(b)(3)*.

CCIA and SIIA next argue "the CIS fails to provide a complete description of **[*1248] [**201]** the settlement's conduct remedies or the requisite 'evaluation of alternatives' to the proposal submitted for approval." *See 15 U.S.C. § 16(b)(6)*. They also argue the Government's "failure to explain its decision to adopt conduct remedies less stringent than the interim conduct relief entered by the previous district judge evidences an even greater statutory breach." The Government defends the sufficiency of its disclosure and suggests the intervenors "misconceive the nature of the CIS, treating it as if it were an end in itself." According to the Government, the "CIS begins a public dialog [sic], and as the [district] court pointed out, the volume and quality of the public comments it stimulated shows it accomplished its purpose," citing *Tunney Act Proceedings, at 13*. **[***140]**

The intervenors clearly do attribute to the Tunney Act more than the statute requires. ***HN25***[] *Section 16(b)(6)* calls only for "a description and evaluation of alternatives to such proposal actually considered by the United

States." It does not call for a "complete" description of all the Government's options, as CCIA and SIIA claim, nor for any discussion of an alternative not "actually considered" by the Government. In this case the CIS set out the Government's contemplation (and rejection) of its obvious alternative, namely, litigating to judgment the tying claim and the question of the remedy. The Government explained its decision to forego further litigation based upon "the need for prompt relief in a case in which illegal conduct has long gone unremedied; the strength of the parties' respective positions in a remedies hearing and the uncertainties inherent in litigation; and the time and expense required for litigation of the remedy." CIS at 60-61, 1 J.A. (I) at 194-95. The CIS also addresses the Government's decision not to pursue a "structural break-up of Microsoft into separate operating system and applications businesses," *id.* at 61, 1 J.A. (I) at 195, based upon both our decision **[***141]** narrowing Microsoft's liability and the Government's desire "to obtain prompt, certain and effective relief," *id.*

The CIS did set out the various proposals made by industry participants and other interested individuals. These include requirements that Microsoft "license the Windows source code to OEMs" and allow them to modify it and distribute the modified versions; "disclose the entire source code" for Windows and Microsoft middleware; include certain non-Microsoft middleware, such as the Java Virtual Machine, with its distribution of Windows; manufacture and distribute Windows without Microsoft middleware; continue to support industry standards upon adopting them or "extending or modifying their implementation"; and waive its rights to intellectual property "in related APIs, communication interfaces and technical information" if the court finds Microsoft exercised such rights in order "to prevent, hinder, impair, or inhibit middleware from interoperating with the operating system or other middleware." *Id.* at 62-63, 1 J.A. (I) at 196-97. The Government rejected these proposals in part because, like the others contemplated in the CIS, they did not, in the Government's estimation, **[***142]** provide the effective, certain, and timely relief afforded by the consent decree.

The Government set out in the CIS all the realistic options it had in determining whether to enter into the consent decree with Microsoft. Even if the Government did not set out for each option the "complete evaluation" desired by CCIA and SIIA, it did fairly describe its options in a manner that informed public comment. That is what the Act requires and all that it requires. We therefore hold the district court did not err in approving the Government's disclosure in the CIS.

[*1249] **[**202]** Finally, CCIA and SIIA argue the Government failed to make available all "materials and documents which [it] considered determinative in formulating [the settlement] proposal." *See* 15 U.S.C. § 16(b). In the CIS, the Government stated, "No materials and documents of the type described in [§ 16(b) of the Tunney Act] were considered in formulating the Proposed Final Judgment." CIS at 68, 1 J.A. (I) at 202. The district court, relying upon our decision in *MSL*, concluded "the record of this case supports the government's position that there exists no document so significant that it could be considered **[***143]** alone, or in combination with other documents, to be a 'smoking gun.' " *Tunney Act Proceedings, at 12*.

The intervenors claim the Government's statement that no documents were determinative cannot be accurate: "Even in antitrust cases that are not nearly as complex as this one, courts have found similar disclaimers 'to be almost incredible,' " they say, quoting *Central Contracting, 527 F. Supp. at 1104*. As mentioned above, however, the record in *Central Contracting* was nearly "devoid" of any indication that either the Government or the defendant had complied with the procedures required by the Act. *Id. at 1102*. In that context it is not surprising the district court viewed a "silent record" as raising the "specter" of questionable practices the Tunney Act was intended to expose. *Id.* (citing 119 Cong. Rec. 24,598 (1973)). At any rate, this court has no basis for doubting the Government's characterization of what "[it] considered determinative" in this case, particularly when one recalls that we have previously held § 16(b) reaches "at the most to documents that are either 'smoking guns' or the exculpatory opposite." *MSL, 118 F.3d at 784.* **[***144]** On the contrary, given the complexity of this case, which involved thousands of documents, it is not at all surprising that the Government considered no particular "materials [or] documents" determinative.

In sum, we are not persuaded by any of CCIA's and SIIA's objections to the Government's compliance with the procedural requirements of the Tunney Act. We hold, therefore, the district court did not err in approving the Government's compliance with § 16(b).

2. Microsoft's disclosure

HN26[] The Tunney Act requires the defendant to file with the district court "all written or oral communications by or on behalf of such defendant … with any officer or employee of the United States concerning or relevant" to a proposed consent decree. *15 U.S.C. § 16(g)*. Microsoft first made the required disclosure under *§ 16(g)* on December 10, 2001; it included communications from September 28, 2001 forward. At a hearing held in March 2002 the district court questioned whether *§ 16(g)* required disclosure of contacts only as of the date the court ordered the parties to engage in settlement discussions -- September 28, 2001 -- or whether it extended back to the date this court remanded **[***145]** the case, namely, August 24, 2001. In response to the court's concern, Microsoft disclosed one additional communication, a September 27 meeting of counsel for the parties, which was also attended by an employee of Microsoft in order "to provide a demonstration of Windows XP and to answer questions about its functionality."

Asserting "it is widely known that since 1998 Microsoft has comprehensively lobbied both the legislative and executive branches of the federal government to end this case," CCIA and SIIA first claim the Tunney Act requires that Microsoft disclose all those contacts. The district court, however, limited Microsoft's obligation to disclosure of contacts the company had **[*1250]** **[**203]** with the Executive Branch, starting at the time this court remanded the case to the district court for further proceedings. *Tunney Act Proceedings, at 20-21*. We agree with that interpretation and application of the Act.

HN27[] *Section 16(g)*, as mentioned above, required Microsoft to disclose its communications with "any officer or employee of the United States." The question is whether that includes members or employees of the Legislative Branch. Reference is made to "United States" 18 times in the Tunney **[***146]** Act. *See* §§ *15 U.S.C. 16(b)-(h)*. In all 17 references other than the disputed one in *§ 16(g)* the term plainly denotes only the Executive Branch. *See, e.g., id. § 16(b)* HN28[] ("Any proposal for a consent judgment submitted by the United States for entry in any civil proceeding brought by or on behalf of the United States under the antitrust laws shall be filed with the district court … and published by the United States in the Federal Register"). HN29[] It is a commonplace of statutory construction that "identical words used in different parts of the same act are intended to have the same meaning." *See Commissioner v. Lundy, 516 U.S. 235, 250, 133 L. Ed. 2d 611, 116 S. Ct. 647 (1996)*. CCIA and SIIA offer no reason to believe the reference in *§ 16(g)* to communications between Microsoft and "any officer or employee of the United States" uniquely extends the latter term beyond the Executive Branch. Moreover, HN30[] because only the Executive Branch can settle an antitrust case, only contacts with the Executive Branch are relevant to the purpose of the Tunney Act -- namely, to block settlements that are not in the public interest. We therefore conclude, as did **[***147]** the district court, the term "United States" as used in *§ 16(g)* refers only to the Executive Branch.

The intervenors also object to Microsoft's having disclosed "only meetings that occurred during the last round of settlement negotiations ordered by the Court." Microsoft responds:

> The Consent Decree was a direct outgrowth of the intense settlement discussions ordered by the District Court [on remand]. Any [settlement] discussions occurring prior to that time period did not concern and were not relevant to the Consent Decree ultimately agreed to by the parties…. Previous failed settlement discussions are irrelevant to the Consent Decree, which focuses on remedying the liability determinations affirmed on appeal.

We agree. The parties' relative positions were considerably changed by our decision in *Microsoft III*. Therefore the only communications "concerning or relevant" to the consent decree are those that took place after our remand to the district court. *See 15 U.S.C. § 16(g)*.

CCIA and SIIA offer no persuasive reason to believe Microsoft's disclosures do not comply with *§ 16(g)*. Those disclosures fully informed the district court **[***148]** of the communications relevant to the district court's public-interest determination, and that court did not err in approving them.

IV. Conclusion

The remedial order of the district court in No. 02-7155 is affirmed. In No. 03-5030, the order denying intervention is reversed and the order approving the consent decree in the public interest is affirmed.

So ordered.

HN1[] Entitlement as Matter of Law, Genuine Disputes

Fed. R. Civ. P. 56(c) authorizes summary judgment where the pleadings, depositions, answers to interrogatories and admissions on file, together with affidavits, if any, show that there is no genuine dispute as to any material fact and that the moving party is entitled to judgment as a matter of law. The existence of a material question of fact is itself a question of law that the district court is bound to consider before granting summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] Entitlement as Matter of Law, Appropriateness

A judge's function at the summary judgment stage is not himself to weigh the evidence and determine the truth of the matter, but to determine whether there is a genuine issue for trial. There is no issue for trial unless there is sufficient evidence favoring the non-moving party for a jury to return a verdict for that party. If the evidence is merely colorable, or is not significantly probative, summary judgment may be granted.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN3[] Entitlement as Matter of Law, Genuine Disputes

Although *Fed. R. Civ. P. 56* is peculiarly adapted to the disposition of legal questions, it is not limited to that role. The mere existence of a disputed factual issue, therefore, does not foreclose summary judgment. The dispute must be genuine, and the facts must be material. With regard to "materiality", only those disputes over facts that might affect the outcome of the lawsuit under the governing substantive law will preclude summary judgment. Where the summary judgment evidence establishes that one of the essential elements of the plaintiffs cause of action does not exist as a matter of law, all other contested issues of fact are rendered immaterial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] Summary Judgment, Entitlement as Matter of Law

In making its determinations of fact on a motion for summary judgment, a court must view the evidence submitted by the parties in a light most favorable to the non-moving party.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

***HN5*[]** **Summary Judgment, Burdens of Proof**

In the summary judgment context, a moving party has the duty to demonstrate the lack of a genuine issue of material fact and the appropriateness of judgment as a matter of law to prevail on his motion. The movant accomplishes this by informing the court of the basis of its motion, and by identifying portions of the record which highlight the absence of genuine factual issues.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

***HN6*[]** **Summary Judgment, Opposing Materials**

Fed. R. Civ. P. 56 contemplates a shifting burden: the nonmovant is under no obligation to respond unless the movant discharges its initial burden of demonstrating entitlement to summary judgment. Summary judgment cannot be supported solely on the ground that a plaintiff has failed to respond to defendants' motion for summary judgment, even in light of a local rule of the court mandating such for failure to respond to an opposed motion.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Supporting Materials > Memoranda of Law

***HN7*[]** **Entitlement as Matter of Law, Appropriateness**

Once a properly supported motion for summary judgment is presented, the nonmoving party must rebut with "significant probative" evidence. In other words, the nonmoving litigant is required to bring forward "significant probative evidence" demonstrating the existence of a triable issue of fact. To defend against a proper summary judgment motion, one may not rely on mere denial of material facts nor on unsworn allegations in the pleadings or arguments and assertions in briefs or legal memoranda. The nonmoving party's response, by affidavit or otherwise, must set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN8[] Summary Judgment, Burdens of Proof

While generally the burden to discover a genuine issue of fact is not on the court, Fed. R. Civ. P. 56 does not distinguish between documents merely filed and those singled out by counsel for special attention-the court must consider both before granting a summary judgment.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN9[] Intellectual Property, Misuse of Rights

On the one hand, intellectual property rights do not confer a privilege to violate the antitrust laws. On the other, conduct permissible under the patent laws cannot trigger any liability under the antitrust laws. The patent laws are in pari materia with the antitrust laws and modify them pro tanto. On balance, a patent holder may be held accountable under the antitrust laws only if its conduct falls outside the ambit of protection afforded by the patent laws.

Business & Corporate Compliance > ... > Ownership > Conveyances > Royalties

HN10[] Conveyances, Royalties

The patent laws permit a patentee to exact royalties as high as he can negotiate with the leverage of that patent monopoly.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Antitrust & Trade Law, Sherman Act

See 15 U.S.C.S. § 1.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN12[] Antitrust & Trade Law, Sherman Act

Recovery for a violation of § 1 of the Sherman Act, 15 U.S.C.S. § 1 requires proof of (1) a contract, combination or conspiracy (2) affecting interstate commerce (3) which imposes an unreasonable restraint of trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Antitrust & Trade Law, Sherman Act

The analytical approach to a § 1 of the Sherman Act, 15 U.S.C.S. § 1 claim differs depending on the nature of the challenged conduct. Certain arrangements are conclusively presumed to be unreasonable restraints of trade, simply by virtue of their obvious and necessary effect on competition. Conduct of this type is per se illegal. All other activities are subject to more laborious scrutiny under what is known as the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Contracts Law > Personal Property > Personalty Leases > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Contracts Law > Types of Contracts > Lease Agreements > General Overview

HN14[] Tying Arrangements, Per Se Rule

A tying arrangement is the sale or lease of one product on the condition that the buyer or lessee purchase a second product. The desired product is called the "tying" product; the other is the "tied" product. The essence of a tying claim is forcing. To prove a per se tying claim, a plaintiff must show: (1) the involvement of two separate products or services; (2) the sale of one product or service is conditioned on the purchase of another; (3) the seller has sufficient economic power in the market for the tying product; and (4) an effect on a not insubstantial amount of interstate commerce in the tied product.

Business & Corporate Compliance > ... > Environmental Law > Hazardous Wastes & Toxic Substances > Pesticides

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Disease & Pest Control

HN15[] Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products

Federal Insecticide, Fungicide and Rodenticide Act prohibits the use of any herbicide in a manner inconsistent with, its labeling. 7 U.S.C.S. § 136j(2)(G).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN16[] Price Fixing & Restraints of Trade, Tying Arrangements

It is only when the buyer's freedom to choose a given product is restricted that the tying doctrine comes into play: so long as the buyer is free to take either product by itself there is no tying problem.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN17[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

When conducting a rule of reason analysis, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. In the event the claimants bring forward evidence that an entity's actions have unreasonably restrained trade, the inquiry devolves to a balancing act: The court must then balance the anticompetitive evils of a restrictive practice against any procompetitive benefits or justifications within the confines of the relevant market. Proof that a defendant's activities, on balance, have adversely affected competition in the appropriate product and geographic markets is essential to recovery under the rule of reason.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > Trials > Burdens of Proof > Defense

HN18[] Attempts to Monopolize, Elements

Section 2 of the Sherman Act, 15 U.S.C.S. § 2 proscribes unlawful monopolization and attempted monopolization. In order to prevail on a § 2 claim, claimants must prove that an entity possesses monopoly power in a relevant market; and that the entity has acquired or maintained that power wilfully (by means of anti-competitive practices) instead of competition on the merits.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN19[] Monopolies & Monopolization, Actual Monopolization

Cross-elasticity of demand, i.e., a rise in a price for a good within a relevant product market tends to create a greater demand for other like goods in that market, is the focal inquiry in determining what produces make up the relevant market for purposes of monopolization claims. Products need not be perfect substitutes to be included in the relevant market: Interchangeability implies that one product is roughly equivalent to another for the use to which it is put; while there may be some degree of preference for the one over the other, either would work effectively.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN20[] **Monopolies & Monopolization, Actual Monopolization**

After defining the relevant market, defendants must then prove that an entity wields monopoly power in the relevant market. Monopoly power is defined as the power to control prices or exclude competition. Although several factors determine whether a firm possesses monopoly power in a relevant market, one of the most crucial is a firm's market share.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN21[] **Monopolies & Monopolization, Actual Monopolization**

The final step in a monopolization claim, is that claimants must show the willful acquisition or maintenance of alleged monopoly power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident in the relevant market.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN22[] **Inequitable Conduct, Anticompetitive Conduct**

A patent is an exception to the general rule against monopolies and the right to access to a free and open market. Consequently, a patentee cannot be held liable under the antitrust, laws for the natural monopoly afforded under the Patent Act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN23[] **Monopolies & Monopolization, Actual Monopolization**

A 25.6 percent market share in the United States market for soybean seeds and a 0 percent share in the market for cotton seeds are insufficient to support a § 2 of the Sherman Act, 15 U.S.C.S. § 2, claim as a matter of law.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN24[] **Monopolies & Monopolization, Actual Monopolization**

To prevail on a monopolization claim, the claimants must be able to demonstrate that an entity has engaged in behavior that not only (1) tends to impair opportunities of rivals, but also (2) either does not further competition on the merits or does so in an unnecessarily restrictive way.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

HN25[] **Misuse of Rights, Patent Misuse Defense**

Regarding the patent misuse doctrine, the pivotal question is, whether, by imposing conditions that derive their force from the patent, the patentee has impermissible broadened the scope of the patent grant with anticompetitive effect. Where a restriction is reasonably within the patent grant, the defense cannot succeed.

Opinion

[*571] **MEMORANDUM OPINION**

This cause is before the Court on Monsanto's Motion for Summary Judgment on Counts Six, Seven, Eight and Nine of Defendants' Counterclaim (Defendants' Antitrust Claims) [401-1]. The Court, having reviewed the motion, the response, the briefs of the parties, the authorities cited and being otherwise fully advised in the premises, finds as follows, to-wit:

[*572] FACTUAL BACKGROUND

In the mid-1990's, Monsanto launched revolutionary new agricultural technologies. The new technologies have been described ad infinitum in other Memorandum Opinions issuing from the Court, as has the defendants' unauthorized use and replication of seed containing Monsanto's patented **[**3]** biotechnology. When Monsanto sued them for patent infringement, the Scruggses categorically denied liability for their conduct and turned the tables on Monsanto by alleging that Monsanto's commercial practices not only violated federal and state antitrust laws, but also constituted patent-misuse. The allegations, if proven true, are an absolute defense to Monsanto's infringement action.

The defendants target the gamut of Monsanto's marketing strategies as they pertain to Roundup Ready and Bollgard traits, Roundup Ready and Bollgard seed and the entire Line of Roundup herbicide products. Very broadly broken down, the principal foci of the Scruggses' attack are Monsanto's agreements with its seed partners, Monsanto's agreements with seed and herbicide dealers and Monsanto's dealings with individual growers. They contend Monsanto imposed restrictive terms at each level of the market for its technologies and that those restrictive terms amounted to unlawful restraints on trade. That same conduct, they argue, enabled Monsanto to extend its monopoly power in the markets for traits, seed and glyphosate herbicide.

After ample opportunity for discovery, Monsanto filed its Motion for Summary **[**4]** Judgment. The motion seeks dismissal of the defendants' federal and state antitrust claims as denominated in Counts Six, Seven and Nine. The motion also seeks judgment as a matter of law on the Scruggses' affirmative defense of patent misuse as denominated in Count Eight. The motion has been fully briefed and the Court is ready to rule.

STANDARD OF REVIEW

HN1[] *Rule 56(c) of the Federal Rules of Civil Procedure* authorizes summary judgment where "the pleadings, depositions, answers to interrogatories and admissions on file, together with affidavits, if any, show that there is no genuine dispute as to any material fact and that the moving party is entitled to judgment as a matter of law. *Celotex Corporation v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265,106 S. Ct. 2548 (1986)*. The existence of a material question of fact is itself a question of law that the district court is bound to consider before granting summary judgment. *Johny State of La. (Bd. Of T. for State C. & U., 757 F.2d 698, 712 (5th Cir 1985)*.

HN2[] A judge's function at the summary judgment stage is not himself to weigh the evidence and determine the truth of the matter, but to determine whether **[**5]** there is a genuine issue for trial. There is no issue for trial unless there is sufficient evidence favoring the non-moving party for a jury to return a verdict for that party. If the evidence is merely colorable, or is not significantly probative, summary judgment may be granted. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

HN3[] Although *Rule 56* is peculiarly adapted to the disposition of legal questions, it is not limited to that role. *Prof'l Managers, Inc. v. Fawer, Brian, Hardy & Zatzkis, 799 F.2d 218, 222 (5th Cir. 1986)*. "The mere existence of a disputed factual issue, therefore, does not foreclose summary judgment. The dispute must be genuine, and the facts must be material." Id. "With regard to 'materiality', only those disputes over facts that might affect the outcome of the lawsuit under the governing substantive law will **[*573]** preclude summary judgment. *Phillips Oil Co. v. OKC Corp., 812 F.2d 265, 272 (5th Cir. 1987)*. Where "the summary judgment evidence establishes that one of the essential elements of the plaintiffs cause of action does not exist as a matter of law, **[**6]** … all other contested issues of fact are rendered immaterial. See *Celotex, 477 U.S. at 323, 106 S. Ct. at 2552*. *Topalian v. Ehrman, 954 F.2d 1125,. 1138 (5th Cir. 1992)*.

HN4[] In making its determinations of fact on a motion for summary judgment, the Court must view the evidence submitted by the parties in a light most favorable to the non-moving party. *McPherson v. Rankin, 736 F.2d 175, 178 (5th Cir. 1984)*.

HN5[] The moving party has the duty to demonstrate the lack of a genuine issue of material fact and the appropriateness of judgment as a matter of law to prevail on his motion. *Union Planters Nat Leasing v. Woods, 687 F.2d 117 (5th Cir. 1982)*. The movant accomplishes this by informing the court of the basis of its motion, and by identifying portions of the record which highlight the absence of genuine factual issues. *Topalian 954 F.2d at 1131*.

HN6[] "Rule 56 contemplates a shifting burden: the nonmovant is under no obligation to respond unless the movant discharges [its] initial burden of demonstrating [entitlement to summary judgment]." John, 757 F.2d at 708. "Summary judgment cannot be supported **[**7]** solely on the ground that [plaintiff] failed to respond to defendants' motion for summary judgment," even in light of a Local Rule of the court mandating such for failure to respond to an opposed motion. Id. at 709.

However, HN7[] once a properly supported motion for summary judgment is presented, the nonmoving party must rebut with "significant probative" evidence. Ferguson v. National Broadcasting Co. Inc., 584 F.2d 111, 114 (5th Cir. 1978). In other words, "the nonmoving litigant is required to bring forward 'significant probative evidence' demonstrating the existence of a triable issue of fact." In Re Mun. Bond Reporting Antitrust Litig., 672 F.2d 436, 440 (5th Cir. 1982). To defend against a proper summary judgment motion, one may not rely on mere denial of material facts nor on unsworn allegations in the pleadings or arguments and assertions in briefs or legal memoranda. The nonmoving party's response, by affidavit or otherwise, must set forth specific facts showing that there is a genuine issue for trial. Rule 56(e), Fed. R. Civ. P. See also Union Planters Nat Leasing v. Woods, 687 F.2d at 119.

HN8[] While generally **[**8]** "the burden to discover a genuine issue of fact is not on [the] court, (Topalian 954 F.2d at 1137), "Rule 56 does not distinguish between documents merely filed and those singled out by counsel for special attention-the court must consider both before granting a summary judgment." John, 757 F.2d at 712, quoting Keiser v. Coliseum Properties, Inc., 614 F.2d 406, 410 (5th Cir. 1980).

LEGAL ANALYSIS

Antitrust Counterclaims

Monsanto's motion launches a two-pronged attack on the Scruggses' antitrust claims. In the first instance, they allege that the defendants lack standing to bring their federal antitrust claims. In the second, they urge that the defendants' claims also fail on their merits. The Court will address each of these arguments in turn.

I. Federal Antitrust Claims

A. Standing Inquiry

The defendants' counterclaim seeks both damages and injunctive relief under the federal antitrust laws. At oral argument, counsel for Monsanto conceded defendants' **[*574]** standing to seek injunctive relief under § 16 of the Clayton Act. 15 U.S.C. § 26. Monsanto's motion attacks only the defendants' standing to bring a **[**9]** private damages action under § 4 of the Clayton Act. 15 U.S.C. § 15. In light of the Court's decision on the merits of the antitrust counterclaims, infra, it is unnecessary to address Monsanto's standing argument.

B. Merits Inquiry

1. Conduct Falling Within the Patent Grant

This case implicates the peculiar intersection between the public interest in rewarding and encouraging innovation protected by the patent laws and the public interest in safeguarding competition protected by the antitrust laws. HN9[] On the one hand, "intellectual property rights do not confer a privilege to violate the antitrust laws." CSU, L.L.C. v. Xerox Corp. (In re Indep. Serv. Orgs. Antitrust Litig.), 203 F.3d 1322, 1325 (Fed. Cir. 2000). On the other, "conduct permissible under the patent laws cannot trigger any liability under the antitrust laws." SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1206 (2d Cir. 1981). "The patent laws … are in pari materia with the antitrust laws and modify them pro tanto." Simpson v. Union Oil Co. Of CaL., 377 U.S. 13, 24, 12 L. Ed. 2d 98, 84 S. Ct. 1051 (1964). On balance, a patent holder may be held accountable under the antitrust laws only **[**10]** if its conduct falls outside the ambit of protection afforded by the patent laws. U.S. v. Line Material Co., 333 U.S. 287, 308, 92 L. Ed. 701, 68 S. Ct. 550 (1948). Two questions are paramount. What conduct do the Scruggses condemn as anticompetitive? Is that conduct protected under the patent laws?

Since introducing its biotechnology in 1996, Monsanto has always imposed certain requirements on growers through licensing provisions in its contracts with seed partners and individual formers. The agreements have always: a) required growers to only use seed containing Monsanto's biotechnology for planting a single crop; b) prohibited transfer or re-use of seed containing the biotechnology for replanting; and c) required payment of a royalty fee. Exhibits A and B to Monsanto's Motion for Summary Judgment.

Monsanto's no replant policy and its decision to charge growers a uniform technology fee are among the many practices the Scruggses target as anti-competitive. Monsanto urges its licensing provisions are a valid exercise of its rights under the patent laws. With regard to the ban on seed saving, Monsanto characterizes the restriction as nothing more than a limited use **[**11]** license, a practice permitted under the patent laws. *Mallinckrodt Inc. v. Medipart. Inc., 976 F.2d 700, 703 (Fed. Cir. 1992)*. This Court adopted that position in ruling on Monsanto's motion for a preliminary injunction, *Monsanto Co. v. Scruggs, 249 F. Supp.2d 746, 754 (N.D. Miss. 2001)*. In the interim since that, decision, the Federal Circuit Court of Appeals considered the identical no replant policy and held that "the restrictions in the Technology Agreement prohibiting the replanting of the second generation of ROUNDUP READY(R) soybeans do not extend Monsanto's rights under the patent starute." *Monsanto Co. v. McFarling, 363 F.3d 1336, 1343 (Fed. Cir. 2004)*. Accordingly, Monsanto's no replant policy is not subject to challenge under the antitrust laws.

With respect to Monsanto's imposition of uniform technology fees on all growers, the defendants contend Monsanto's practice is merely a guise for an illegal price fixing scheme. Monsanto urges its technology fees are simply royalties and that the patent laws permit it to charge any royalty it chooses. *Brulotte v. Thys Co., 379 U.S. 29, 13 L. Ed. 2d 99, 85 S. Ct. 176 **[*575]** (1964).* **[**12]** Monsanto's position is correct. ***HN10***[] The patent laws permit a patentee to "exact royalties as high as he can negotiate with the leverage of that [patent] monopoly." *Id. at 33*. Because its collection of a uniform technology fee is within the scope of the patent grant, Monsanto cannot be liable for a violation of the antitrust laws.

Defendants also attack Monsanto's refusal to license its soybean seed partners to stack the Roundup Ready trait with transgenic traits developed by Monsanto's competitors, as well as the provision expressly limiting the license grant by forbidding its seed partners from "engaging in any research or experimentation with 'Monsanto Know-How And Biological Material' or 'Licensed Patent Rights.'" Defendants' Memorandum at p. 17. The Court declines the defendants' invitation to scrutinize these restrictions; they are clearly field of use restrictions which fall within the scope of the patent monopoly and are, therefore, lawful. *B. Braun Medical. Inc. v. Abbott Laboratories, 124 F.3d 1419, 1426 (Fed. Cir. 1997)*.

2. *Sherman Act § 1* Claims

The Scruggses challenge numerous other aspects of Monsanto's business conduct as violative **[**13]** of *§ 1* of the Sherman Act. ***HN11***[] *Section 1* provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. ***HN12***[] Recovery for a violation of *§ 1* requires proof of 1) a contract, combination or conspiracy 2) affecting interstate commerce 3) which imposes an unreasonable restraint of trade. *Dillard v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 961 F.2d 1148, 1158 (5th Cir. 1992)*.

HN13[] The analytical approach to a *§ 1* claim differs depending on the nature of the challenged conduct. "Certain arrangements are conclusively presumed to be unreasonable restraints of trade, simply by virtue of their obvious and necessary effect on competition." *E. A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Comm., 467 F.2d 178, 186 (5th Cir. 1972)*. Conduct of this type is per se illegal. All other activities are subject to more laborious scrutiny under what is known as the rule of reason. Defendants' urge their right to recover for violations of *§ 1* under both analytical models. [1] The Court will address **[**14]** each claim in turn.

a. Per Se Analysis

[1] Still other conduct may fall into a hybrid category known as a "quick look" *§ 1* case. Other than Monsanto's no replant policy already addressed supra, defendants do not contend that any of Monsanto's conduct fails the "quick look" test.

HN14[] "A tying arrangement is the sale or lease of one product on the condition that the buyer or lessee purchase a second product." *Breaux Bros. Farms, Inc. v. Teche Sugar Co., Inc., 21 F.3d 83, 86 (5th Cir. 1994)*. The desired product is called the 'tying' product; the other is the 'tied' product." *United Farmers Agents Ass'n., Inc. v. Fanners Ins. Exch., 89 F.3d 233.236 n. 2 (5th Cir. 1996)* (citing 9 Phillip E. Areeda, **Antitrust Law** P 1700a (1991)). The essence of a tying claim is forcing. *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 13, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*. To prove a per se tying claim, a plaintiff must show: 1) the involvement of two separate **[**15]** products or services; 2) the sale of one product or service is conditioned on the purchase of another; 3) the seller has sufficient economic power in the market for the tying product; and 4) an effect on a not insubstantial amount of interstate commerce in the tied product. *Eastman Kodak Co. v. Image Tech. Serv.,* ***[*576]*** *Inc., 504 U.S. 451. 461-62, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

Defendants allege Monsanto engaged in illegal tying on four fronts. [2] They claim Monsanto tied the purchase of seed to the purchase of Roundup through its grower license agreements and grower incentive agreements, as well as its seed partner agreements. As a further matter, the Scruggses argue that Monsanto illegally tied the Roundup and Bollgard traits in cotton seed. The Court will address each of these arguments in turn.

[16]** i. Monsanto's Grower License Agreements

Defendants contend that the grower license agreements utilized by Monsanto from 1996 to 1998 employed a blatant tie between seed containing Monsanto's patented Roundup Ready trait and Roundup herbicide. The pertinent portion of the 1996 technology agreement reads:

> The Grower further agrees that if the Grower uses any glyphosate . . . containing herbicide in connection with the soybean crop produced, from this seed, the herbicide will be a ROUNDUP(R) BRANDED HERBICIDE (or other Monsanto authorized glyphosate-containing herbicide) labeled for use on ROUNDUP READY(R) soybeans. No other glyphosate containing herbicide may be used with this patent-protected seed.

Exhibit A to Monsanto's Motion for Summary Judgment. The 1997 and 1998 agreements provided: "If a herbicide containing the same active ingredient as Roundup Ultra herbicide (or one with a similar mode of action) is used over the top of Roundup Ready crops, you agree to use only Roundup branded, herbicide." Exhibit 2 to Scruggses' Supplemental Submission in Opposition to Monsanto's Motion for Summary Judgment.

Defendants contend the above-quoted language coerced growers **[**17]** into using Monsanto's Roundup line of herbicides when they may have preferred other brands of glyphosate-based herbicide. Monsanto contends, first and foremost, that nothing in the grower license agreements compelled farmers to purchase Roundup. Growers could choose not to use any herbicide "over-the-top" of Roundup Ready crops. They could also choose to use any non-glyphosate herbicide "over-the-top" of Roundup Ready crops. With regard to its prohibition on glyphosate-based herbicides other than Roundup, Monsanto avers that the restriction was necessary to assure compliance with the mandates of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). *7 U.S.C. § 136 et seq.* **HN15**[

[2] Defendants also alleged that Monsanto's no replant policy creates a de facto tie between traits and germ plasm; however, the Federal Circuit considered precisely the same argument in McFarling and found it insufficient as a matter of law:

> We need not plumb the complexities of tying …, however, to determine that the district court correctly granted summary judgment for Monsanio. McFarling does not raise a typical tying allegation, and the mere recitation of the word "tying" is not sufficient….
>
> McFarling's "tying" argument instead centers on his desire to replant the entire seed, including the genetic modifications, and on Monsanto's refusal to grant him permission to do so. … At its simplest, McFarling effectively argues . . . that he should be granted a compulsory license to use the patent rights in conjunction with the second-generation ROUNDUP READY(R) soybeans in his possession after harvest. We decline to hold that Mosquito's raw exercise of its' right to exclude from the patented invention by itself is a "tying arrangement"…..

McFarling, 363 F.3d at 1342. The defendants also claimed that Monsanto tied the use of its traits to the purchase of seed in subsequent years. This, too, is an attack on Monsanto's no replant policy. It likewise fails.

] FIFRA prohibits the use of any herbicide **[*577]** in a manner inconsistent with, its labeling. *7 U.S.C § 136j(a)(2)(G)*. Because Roundup was the only product labeled for use "over-the-top" of Roundup Ready crops between 1996 and 1998, it was the only EPA-approved herbicide that could be used on Roundup Ready crops during that period. Beginning in 1999, Monsanto's license agreements and/or technology use guides authorized the use of any competing glyphosate-herbicide which mat-met E.P.A labeling **[**18]** requirements for "over-the-top" use as a permissible alternative to Roundup.

Defendants contend in their supplemental submission that the language in the 1996 technology license prohibits Any use of non-Roundup glyphosate herbicide, not just "over-the-top" use. Read in isolation, defendant's interpretation might be reasonable. However, defendants1 own submissions belie that interpretation. Defendant's Exhibit 59 also relates to the 1996 licensing restriction. It reads: "The Grower will use only Roundup branded herbicide if a herbicide containing glyphosate or any other EPSP synthase inhibitor is used over the top of Roundup Ready soybeans." Exhibit 59 to Defendant's Opposition to Monsanto's Motion for Summary Judgment (emphasis added). Defendants tout the fact that competing herbicides Glyfos and Touchdown were approved for certain uses with soybean crops as early as 1996, but they cannot disavow the fact that neither herbicide met the labeling requirements for "over-the-lop" use during the growing season. Nor is there any evidence before the Court from which a reasonable trier of fact could conclude that Monsanto's license agreement prohibited the application of competing **[**19]** glyphosate products for burndown or as a mere harvest aid. Based on the record before the Court, defendants have failed to meet their burden of producing significant probative evidence that Monsanto forced Farmers who wanted to purchase Roundup Ready seeds to purchase Roundup as well. [3]

[20]** ii. Monsanto's Grower Incentive Programs

The Scruggses also find fault with the Roundup Rewards program Monsanto offers to farmers. They assert that this program too constitutes an illegal tying scheme between Roundup Ready seed and Roundup herbicide. This claim is easily disposed of Defendants cannot demonstrate the coercion necessary to a tie-in. Growers who participate in the incentive program receive additional, voluntary benefits if they elect Roundup agricultural herbicides as the only systemic, non-selective herbicide to be used for burndown or in-crop applications on crops containing Monsanto traits. The program is entirely **[*578]** optional; customers who participate do so because they benefit from the incentives, not because Monsanto compels them to do so. Since the sale of Roundup Ready seed is not conditioned upon the purchase of Roundup herbicide, there is no tying arrangement.***HN16***[] "It is only when the buyer's freedom to choose a given product is restricted that the tying doctrine comes into play: so long as the 'buyer is free to take either product by itself there is no tying problem.'" *Ungar v. Dunkin Dounts of Amcr. Inc., 531 F.2d 1211, 1226(3dCir. 1976)* (quoting **[**21]** *N. Pac. Ry. v. United States, 356 U.S. 1,6 n. 4,2 L. Ed. 2d 545, 78 S. Ct. 514 (1958))*.

iii. Monsanto's Seed Partner Agreements [4]

---

[3] The same is true with regard to the defendants' challenge to Monsanto's grower license agreements since 1999. The Court categorically rejects the assertion that Monsanto's failure to list all approved non-Roundup glyphosate herbicides in the technology agreement causes consumer confusion and unduly bolsters Monsanto's branded products. The agreement provides: "Grower agrees … to use on Roundup Ready crops only a Roundup(R) agricultural herbicide or other authorized non-selective herbicide which could not be used in the absence of the Roundup Ready gene (see TUG [Technology Use Guide] for details on authorized non-selective products)." The language used communicates that glyphosate-based herbicides other than Roundup may be used with Roundup Ready crops and that additional information about alternative glyphosate-based herbicides may be obtained from the TUG. The 2003 TUG provides: "You may use another glyphosate herbicide, but only if it has been approved for use over Roundup Ready crops, and it has been labeled for this use by all required governmental agencies." The farmer need only consult the label of any competing glyphosate product to determine whether the product is suitable for use over-the-top of Roundup Ready crops.

[4] The Court doubts defendants' standing to challenge this aspect of Monsanto's seed partner agreements. A party who seeks injunctive relief under the antitrust laws must demonstrate some threatened loss or damage to his own interests. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 111, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. Defendants have made no showing that

Defendants also attack the terms of Monsanto's agreements with its seed partners. They contend Monsanto conditions the extension of licenses to its seed partaers on, an agreement to use Roundup herbicide. Among the Scruggses' exhibits are numerous copies of licensing **[**22]** agreements with various seed partners. An excerpt from Monsanto's with Griffith Seed Company is representative:

> 3.10
>
> If **GRIFFITH,** directly or indirectly, used any **GLYPHOSATE** containing herbicide or any other **EPSP** synthase inhibitor herbicide in connection with the **SOYBEAN** crop produced from **LICENSED COMMERCIAL SEED,** the herbicide shall be a **ROUNDUP[at] HERBICIDE** labelled for use on ROUNDUP READY **SOYBEANS.** No other **GLYPHOSATE** or other EPSP synthase inhibitor herbicide may be used with the patent-protected seed. This provision shall not limit the use of herbicides other than **GLYPHOSATE** on such **SOYBEAN** germ plasm.

Exhibit 16 to Defendants' Supplemental Submission in Opposition to Monsanto's Motion for Summary Judgment at p. 2.

Defendants fall short of demonstrating that Monsanto forces its seed partners to buy Roundup herbicide in order to obtain a desired license. Although the provision at issue forecloses seed partners from using glyphosate-based herbicides other than Roundup, Monsanto's seed partners are under no compulsion to buy Roundup. The seed partners remain free to refrain from the use of any glyphosate-based **[**23]** herbicide. They are likewise free to use any non-glyphosate herbicide they choose.

Furthermore, the nature of the business relationship between Monsanto and its seed partners provides an additional basis for a refusal to extend per se treatment to any alleged lie. The contract expressly provides that the parties seek "arrangements under which **MONSANTO** would license soybean growers the right to use **LICENSED COMMERCIAL SEED** exhibiting such resistance to **ROUNDUP(R) HERBICIDE…** and **GRIFFITH** (or its dealers or distributors) would produce and sell **LICENSED COMMERCIAL SEED** to soybean growers." Exhibit 16 alp. 1. All of the seed produced pursuant to the agreement bears Monsanto's Roundup Ready trademark-in essence warranting the product's suitability for use with Roundup. Accordingly, Monsanto has a vested **[*579]** interest in ensuring that seed so marketed is, indeed, tolerant to Roundup. The tie, if there be a tic, is not appropriate for per se treatment.

iv. Monsanto's Stacked Trait Cotton

Defendants also raise a tying claim in relation to stacked trait cotton. The Scruggses allege that Monsanto tied the sale of cotton containing the Roundup Ready trait to cotton **[**24]** containing the Bt trait. No lengthy analysis is necessary to dispose of this claim.

Nothing in the record remotely suggests that growers who wanted to purchase Roundup Ready cotton seed also had to purchase Bollgard seed. Instead, the defendants complain that Monsanto's required its seed partners to focus on stacked trait cotton (seed containing both the Roundup Ready and Bollgard traits) to the exclusion of single trait seed, e.g., cotton seed containing only the Roundup Ready gene. There are numerous problems with defendants' argument. In the first instance, it is unlikely that defendants can demonstrate the requisite tie between two products -- as opposed to a bundling of desirable traits into a single product offered to the consumer.

But beyond that,the record does not support the defendants' claim that Monsanto engineered a shortage of single trait cotton seed which "forced" growers to buy stacked trait seed when they would have preferred to purchase single trait Roundup Ready seed. Monsanto offered the affidavits of Don Threet and Randy Deaton to dispel the defendants' assertions in that regard. Exhibits C and K in Opposition to Defendants' Motion to Reconsider Preliminary **[**25]** Injunction. Mr. Threet, Vice President of U.S. Business of Emergent Genetics US, Inc. (formerly Stonevillac Pedigreed Seed Company), testified that his company began offering single trait Roundup Ready cottonseed in 2001 and the number of cotton lines containing the Roundup Ready trait alone has steadily increased since that time. He further testified that his company has no awareness of a "shortage" of cottonseed containing only the Roundup Ready trait; Emergent knows there is a demand for single trail cottonseed and the company

---

they are in a position to market competing glyphosate-based herbicides to any of Monsanto's seed partners, and the Court cannot conceive of any other harm which might inure to defendants from the complained of provisions.

plans to continue offering single trait Roundup Ready seed so long as that demand continues. Mr. Deaton, Director of Monsanto's Global Cotton Business, testified to the meaning of the allegedly nefarious 75% provision in the Research Agreement between Monsanto and Delta & Pine Land Company (DPL). His testimony absolutely lays waste to the defendants' argument that the agreement forces DPL to incorporate Monsanto's Bollgard and Roundup Ready traits in three quarters of all cotton produced-allegedly restricting the output of both conventional and single trait Roundup Ready seed. Instead, the provision merely requires that DPL include Monsanto's slacked traits **[**26]** in at least 75% of new cotton lines offered in a given year. "The purpose of this provision [is] lo ensure that DPL gives growers the option of purchasing its newest cottonseed lines in the stacked trait version." [5] Exhibit K to Monsanto's Opposition to Motion to Reconsider Preliminary Injunction. Defendants offered no contrary evidence to refute the testimony of either gentleman; **[*580]** accordingly, their claim that Monsanto illegally "tied" its Roundup Ready trait to its Bollgard trait fails.

[27]** b. Rule of Reason

Simply put, defendants argue that Monsanto implemented a seed cartel through its vast web of contractual agreements with seed partners (of which there are close to three hundred). By means of the cartel, Monsanto and its seed partners control the markets for cottonseed and soybean seed, thereby enabling Monsanto and its seed partners to charge supra-competitive price for seed. Other than the practices identified above, [6] defendants specifically attack Monsanto's "any third party" clause, which binds distributors and dealers in the downstream markets to the same restrictions Monsanto imposes on its seed partners. Defendants also target aspects of Monsanto's financial incentive program with its seed partners, dealers and distributors; they contend that the incentives effectively shield Monsanto from competition in the markets for traits, seed and glyphosate.

[28]** ***HN17***[] When conducting a rule of reason analysis, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)*. In the event the defendants bring forward evidence that Monsanto's actions unreasonably restrained trade, the inquiry devolves lo a balancing act: "The court must then balance the "anticompetitive evils of a restrictive practice … against any procompetitive benefits or justifications within the confines of the relevant market. Proof that the defendant's activities, on balance, adversely affected competition in the appropriate product and geographic markets is essential to recovery under the rule of reason." *Aparu Southwest, Inc., v. Coca-Cola Interprises, Inc., 300 F.3d 620, 627 (5th Cir. 200)* (quoting from *Doctor's Hosp. of Jefferson, Inc., v. Southeast Med. Alliance, Inc., 123 F.3d 301, 307* ***[**29]*** *(5th Cir. 1997)*.

Having reviewed the "any third party" clause in its context, the Court concludes That it cannot reasonably be construed as an unreasonable restraint on trade. The clause simply reiterates the limited nature of the seed partners' license, limits which this Court found valid in section L.B.I.

---

[5] Deaton's affidavit also declares:

> This provision does not mean that 75% of all new varieties of cottonseed sold by DPL must contain the stacked trait gene by 2003. For example, DPL is Tree to offer the same new line of cottonseed in several versions, each of which is called a separate variety -- conventional, Roundup Ready(R) only, Roundup Randy(R)/Bollgard(R) stacked trait, or Bollgard(R) only-and still be in compliance with this agreement. Moreover, this provision contains no limitation on the quantity of seed without the stacked trait that DPL may sell.

Exhibit K at p. 2.

[6] The Court concludes that defendants' evidence of the "tying" practices fails manifestly to demonstrate an unreasonable restraint on trade. Furthermore, to the extent that, the "tying" practices might, under a tortured interpretation, be considered undue restraints, the pro-competitive justifications offered by Monsanto offset any adverse effects on competition-real or potential.

Likewise, Monsanto's seed partner agreements do not, contrary to defendants' assertions, require that its soybean licensees "exceed ninety percent (90%) of aggregate Herbicide -Resistant it Soybean Products sold…." Defendants' experts stop short of characterizing Monsanto's financial incentive program with its seed partners as exclusive dealing arrangements and with good reasons. Monsanto does not require its seed partners to incorporate Monsanto trails in a certain percentage&c of all commercial seed sold. The provision is merely a financial incentive offered by Monsanto in the event they do reach target sales levels, the seed partners receive a discount on applicable technology fees. However, seed partners are under no compulsion to reach a minimum sales level. The financial incentive agreements **[*581]** do not foreclose competition in a substantial share of the relevant product **[**30]** marke(s). The same analysis applies to the Scruggses1 financial incentive programs with its dealers and distributors. The defendants' *§ 1* rule of reason claims fail. [7]

3. *Sherman Act § 2* Claims

Next, the defendants repackage much of the previously complained of conduct and assert it as violative of *§ 2* of the Sherman Act. ***HN18***[] *Section 2* proscribes unlawful monopolization and attempted monopolization. *15 U.S.C. § 2*. In order to prevail on their *§ 2* claim, defendants must prove that Monsanto possessed monopoly power in a relevant market; and that Monsanto acquired or maintained that power wilfully (by means of anti-competitive practices) instead of competition on the merits. *Aspen Skiing Co., v. Aspen Highlands Skiing Corp., 472 U.S. 585, 596 n. 19, 86 L. Ed. 2d 467, 105* ***[**31]*** *S. Ct. 2847(1985)*.

As a prerequisite to recovery, the Scruggses must first prove (define) the relevant market(s). *Queen City Pizza Inc., v. Domino's Pizza, Inc., 124 F.3d 430, 437 (3d Cir. 1997)*. ***HN19***[] Cross-elasticity of demand, i.e., a rise in a price for a good within a relevant product market tends to create a greater demand for other like goods in that market, is the focal inquiry in determining what produces make up the relevant market. *United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 400, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. Products need not be perfect substitutes to be included in the relevant market: "Interchangeability implies that one product is roughly equivalent to another for the use to which it is put; while there may be some degree of preference for the one over the other, either would work effectively." *Queen City Pizza. 124 F.3d at 437*.

HN20[] After defining the relevant market, defendants must then prove That Monsanto wields monopoly power in the relevant market. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. Monopoly power is defined as "the power to control prices **[**32]** or exclude competition" *Fineman v. Armstrong World Indus., 980 F.2d 171, 201 (3d Cir. 1992)*, cert denied, *507 U.S. 921, 122 L. Ed. 2d 677, 113 S. Ct. 1285 (1993)*. Although several factors determine whether a firm possesses monopoly power in a relevant market, one of the most crucial is a firm's market share. *U.S. Anchor Mfg. v. Rule Indus., 7 F.3d 986, 999 (11'" Cir. 1993)*. cert denied, *512 U.S. 1221, 129 L. Ed. 2d 837, 114 S. Ct. 2710 (1994)*; *Pa. Dental Ass'n v. Med. Serv. Ass'n, 745 F.2d 248, 260 (3d Cir. 1984)*, cert denied, *471 U.S. 1016, 85 L. Ed. 2d 303, 105 S. Ct. 2021 (1985)*.

HN21[] Finally, defendants must show the willful acquisition or maintenance of alleged monopoly power "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident in the relevant market. *Grinnell, 384 U.S. at 570-71*.

Monsanto asserts the Scruggses cannot produce sufficient proof on any of these points to withstand summary judgment. In the first instance, the relevant markers proposed by the defendants' experts conflict with those plead in the Scruggses' **[**33]** counterclaim. In the second instance, the experts' proposed product markets conflict with one another. Beyond that, Monsanto asserts, the defendants are incapable of showing Monsanto possesses monopoly power or that it **[*582]** engaged in any anti-competitive conduct. The Court agrees with Monsanto on every point.

---

[7] Defendants also raise a § I conspiracy claim in their Counterclaim, It suffers from the same evidentiary deficiencies as the Scruggses' other *§ 1* claims. There being no genuine issues of material fact, Monsanto is entitled to summary judgment on the conspiracy claim as well.

a. Failure to Define the Relevant Product Markets

In the first instance, the Scruggses' experts offer testimony which markedly contradicts the product markets alleged in the defendants' Counterclaim. The defendants' own pleadings state that the relevant markets are:

1. The United States markets for Roundup Ready cotton seed and Roundup Ready soybean seeds;
2. The United Slates markets for Roundup Ready cotton technology and Roundup Ready soybean technology and/or the relevant regional or geographically smaller submarkets within the United States; and
3. The United States and/or the relevant regional submarket for all cotton seed and soybean seeds. [8]

[34]** In marked contrast, defendants' various economic experts proffer at least six different market definitions. And those market definitions conflict with one another. Nothing in the record indicates that the defendants ever sought leave to amend their pleadings to alter their proposed market definitions; the Court refuses to countenance defendants' failure to do so by permitting proof of product markets other than those pleaded in their Counterclaim. Defendants are "saddled with their [Counterclaim] as filed in this Court." *Continental Trend Res. Inc., v. OXY USA Inc., 44 F.3d 1465,1482 n. 19 (10th Cir. 1995)*. And, in a similar vein, the conflict in the experts" proposed market definitions is fatal as well: "The fact that [defendant] has offered two experts who endorse . . . different market definitions seriously compromises [defendant's] claim to have defined any relevant markets at all" *Bepco Inc., v Allied Signal Inc., 106 F. Supp. 2d 814, 824 (M.D.N.C. 2000)*.

b. Failure to Demonstrate Monopoly Power

i. Market for Roundup Ready Technology

One of the proposed markets alleged in defendants' counterclaim is the market for Roundup Ready technology. This **[**35]** claim fails as a matter of law because the proposed mark et definition cannot state an antitrust claim. Monsanto holds patents on Roundup Ready cotton and soybean technology. ***HN22***[] "[A] patent is an exception to the general rule against monopolies and the right to access to a free and open market." *Precision Instrument Mfg., Co. v. Autorriotive Mamtenance Machinery Co., 324 U.S. 806, 816,89 L. Ed. 1381, 65 S. Ct. 993, 1945 Dec. Comm'r Pat. 582 (1945)*. Consequently, a patentee cannot be held liable under the antitrust, laws for the natural monopoly afforded under the *Patent Act*. See *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 488 (5th Cir. 1984)* (refusing to define market in terms of defendant's own product). See also *TV Communs. Network, Inc. v. Turner Network TV, Inc.. 964 F.2d 1022, 1025 (10th Cir. 1992)* (dismissing complaint for failure to allege a relevant market over which TNT was capable of exercising a monopoly in violation of the antitrust laws). Defendants cannot prevail on their claim that Monsanto monopolized and/or attempted lo monopolize the markets for Roundup ready soybean and cotton technology.

[*583] ii. Markets for Soybean Seed and Cottonseed

[36]** The other markets proposed by defendants arc the markets for Roundup Ready soybean seed and cotton seed and the overall markets for cotton and soybean seed. The defendants' evidence is insufficient to show a triable issue of fact as to Monsanto's possession of monopoly power any of the proposed markets. As noted supra, monopoly power is the power to control prices and exclude-competition. Defendants' experts never take that leap. Instead, Ian Ayers avers that Monsanto "affects" the price of soybeans and cotton. This is simply insufficient. Furthermore, Dr. Ayers' conclusion rests on a flawed basis. He, and the defendants' other experts, all assume the propriety of including the market shares of Monsanto's seed partners in determining Monsanto's share of the relevant market. No Legal precedent supports such a remarkable position. Monsanto's market share must be determined solely on the quantity of goods and/or services Monsanto sold to consumers. *Anchor, 7 F.3d at 999*. At best, only the market shares of Monsanto's wholly owned subsidiaries are to be included. *Grinnell, 384 U.S. 563*. After excluding Monsanto's seed partners, Monsanto possesses **[**37]** only ***HN23***[] a 25.6% market share in the

---

[8] Defendants alleged a fourth relevant market: the United Staves market and/or the relevant regional submarket for glyphosate herbicide. Monsanto does not find fault with this proposed market definition. The Scruggses1 claims that Monsanto monopolized and/or attempted to monopolize the glyphosate market are addressed infra.

United States market for soybean seeds and a 0% share in the market for cotton seeds. Such market shares are insufficient to support a *§ 2* claim as a matter of law. *Jefferson Parish, 466 U.S. at 26-27*. Accordingly, no reasonable trier of fact could conclude that Monsanto possesses monopoly power in the proposed markets for cotton and soybean need. [9]

c. Failure to Demonstrate Anti-Competitive Conduct in Glyphosate Market

The Scruggses rely solely on the evidence discussed in relation to the defendants' *§ 1* claim to support their claim that Monsanto monopolized or attempted to monopolize the glyphosate market. ***HN24***[] To prevail on their claim, the defendants must be able to demonstrate that Monsanto engaged in "behavior that not only 1) tends to impair opportunities of rivals, but also 2) either does not further competition on the merits or does so in an unnecessarily **[**38]** restrictive way." *Aspen Skiing, 472 U.S. at 605 n. 32* (quoting 3 P. Areeda & D. Turner, ***Antitrust Law*** 78 (1978)). The same rule of reason analysis applies to a monopolization claim as an unreasonable restraint of trade claim. Having concluded that none of Monsanto's conduct, e.g., its grower license agreements, grower incentive programs and its dealer incentives, could reasonably be considered anti-competitive, no further discussion is necessary. Monsanto is entitled to summary judgment on the defendants' glyphosate monopolization claim. [10]

II. State Law Antitrust Claims

Defendants also seek recovery under *Miss. Code Annotated § 75-21-1*, ct seq., for violations of Mississippi's antitrust laws. Just as Monsanto is entitled to judgment as a matter of law on defendants' federal **[**39]** antitrust claims, they are also entitled to summary judgment well."). on defendants' state law antitrust claims. See *Hardy Bros. Body Shop v. State Farm Mut. Auto. Ins. Co., 848 F. Supp. 1276, 1290 (S.D. Miss. 1994)*("Where a **[*584]** court finds no federal antitrust violations, allegations of state law antitrust violations may be dismissed as well."). See also *Futurevision Cable Sys. v. Multivision Cable TV Corp., 789 F. Supp. 760, 780 (S.D Miss. 1992)*.

Patent Misuse Defense

As the Federal Circuit recognized in McFarling, the purpose of the patent misuse doctrine is "to prevent a patentee from, using the patent to obtain market benefit beyond that which inures in the statutory patent right." *Mallinckrodt, Inc. v. Medipart, Inc., 976 F.2d 700, 704 (Fed .Cir. 1992)*. ***HN25***[] The pivotal question is, "whether, by imposing conditions that derive their force from the patent, the patentee has impermissible broadened the scope of the patent grant with anticompetitive effect. "*C.R. Bard, Inc. v. M3 Sys.., 157 F.3d 1340,1372 (Fed.Cir.1998)*. Where a restriction is reasonably within the patent grant, the defense **[**40]** cannot succeed. See *Gen2 Talking Pictures Corp. v. W. Elec. Co., 305 U.S. 124, 127, 83 L. Ed. 81, 59 S. Ct. 116, 1938 Dec. Comm'r Pat. 841 (1938)*. As the lengthy analysis, supra, shows, there is no evidence that Monsanto used its patents to secure rights beyond the scope of its lawful patent monopoly. Defendants' patent misuse defense thus fails.

CONCLUSION

Based on the foregoing facts and analysis, the Court concludes Monsanio's Motion for Summary Judgment on Counts Six, Seven, Eight and Mine of Defendants' Counterclaim (Defendants' Antitrust Claims) [401-1] is well-taken and should be granted. An Order will issue accordingly.

This, the 30th day of June, 2004.

W. ALLEN PEPPER, JR.

UNITED STATE DISTRICT JUDGE

---

[9] Nor could one reasonably conclude that Monsanto had a dangerous probability of acquiring monopoly power.

[10] Defendants aver in their brief to Monsanto's control over the glyphosate molecule market; however, the Scruggses' counsel conceded at oral argument that the defendants had not pursued those issues in discovery.

ORDER

This cause is before the Court on the plaintiff's Motion for Summary Judgement on Counts Six, Seven, Eight and Nine of Defendant's Counterclaim (Defendant's Antitrust Claims) [401-1]. The Court, having considered the motion and being otherwise fully advised in the permises, finds as follows, to-wit:

In accordance with the Memorandum Opinion entered this day, the Court finds that the plaintiff's Motion is well-taken and should be sustained.

IT IS, THEREFORE, **[**41]** ORDERED AND ADJUDGED that the plaintiff's Motion for Summary Judgement on Counts Six, Seven, Eight and Nine of Defendants' Counterclaim (Defendant's Antitrust Claims) [401-1] is well-taken and should be, and hereby is, GRANTED.

This, the 30th day of June, 2004.

W. ALLEN PEPPER, JR.

UNITED STATE DISTRICT JUDGE

N.Y. Mercantile Exch., Inc. v. IntercontinentalExchange, Inc.

United States District Court for the Southern District of New York

HN1[] **Pleadings, Crossclaims**

On a motion to dismiss a counterclaim, the allegations in the counterclaim are accepted as true. In deciding a motion to dismiss a counterclaim, all reasonable inferences must be drawn in the counter-plaintiff's favor. A court's function on a motion to dismiss is not to weigh the evidence that might be presented at trial but merely to determine whether the complaint itself is legally sufficient.

Evidence > Judicial Notice > General Overview

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > ... > Pleadings > Crossclaims > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

In deciding a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, a court may consider documents that are referenced in counterclaims, documents that a counter-plaintiff relies on in bringing suit and that are either in the counter-plaintiff's possession or that the counter-plaintiff knows of when bringing suit, or matters of which judicial notice may be taken. However, in antitrust cases, where the proof is largely in the hands of the alleged conspirators, dismissals prior to giving a counter-plaintiff ample opportunity for discovery should be granted very sparingly.

15 U.S.C.S. § 2 of the Sherman Act makes it unlawful to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations. Private parties are granted the right to sue for, and seek injunctive relief against, violations of the antitrust laws by § 4 and § 16 of the Clayton Act. 15 U.S.C.S. §§ 15 and 26.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] Sherman Act, Claims

To make out a monopolization claim under 15 U.S.C.S. § 2 of the Sherman Act, a plaintiff must establish (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN5[] Sherman Act, Claims

The elements of an essential facility claim under 15 U.S.C.S. § 2 of the Sherman Act are: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

HN6[] Sherman Act, Claims

The mere possession of monopoly power, and the concomitant charging of monopoly prices, does not constitute anticompetitive conduct that would establish the second element of a 15 U.S.C.S. § 2 of the Sherman Act monopolization claim. Because this requirement preserves the opportunity to charge monopoly prices, if only for a short period, it also preserves inducements to innovate and apply business acumen. For similar reasons, monopolists are generally permitted by the Sherman Act to choose those with whom they will deal. Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate 15 U.S.C.S. § 2, but the United States Supreme Court has been very cautious in recognizing such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

The indispensable requirement for invoking an essential facility claim under *15 U.S.C.S. § 2* of the Sherman Act is the unavailability of access to the "essential facilities"; where access exists, the doctrine serves no purpose. Thus, it is said that essential facility claims should be denied where a state or federal agency has effective power to compel sharing and regulate its scope and terms.

HN15[] **Agriculture & Food, Commodity Exchange Act**

The Commodity Futures Trading Commission (CFTC), under the terms of the Commodity Exchange Act, specifically *7 U.S.C.S. § 19(a)(2)(B)*, is charged with making rules and regulations that take into consideration the interests of the antitrust laws and, among other things, the efficiency, competitiveness, and financial integrity of futures markets. The United States Supreme Court has instructed that antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue. One factor of particular importance is the existence of a regulatory structure designed to deter and remedy anticompetitive harm. Where such a structure exists, the additional benefit to competition provided by antitrust enforcement will tend to be small, and it will be less plausible that the antitrust laws contemplate such additional scrutiny.

HN16[] **Monopolies & Monopolization, Actual Monopolization**

The standard in the United States Court of Appeals for the Second Circuit for a monopoly leveraging claim has been that the plaintiff must establish that the defendant (1) possesses monopoly power in one market; (2) has used that power to gain a competitive advantage in another distinct market; and (3) has caused injury by such anticompetitive conduct. However, the United States Supreme Court has held that this standard is erroneous to the extent it dispenses with a requirement that there be a "dangerous probability of success" in monopolizing a second market.

Opinion

[*560] ***OPINION and ORDER***

JOHN G. KOELTL, District Judge:

The **[**2]** plaintiff, New York Mercantile Exchange, Inc. ("NYMEX"), brings this action against the defendant, IntercontinentalExchange, Inc. ("ICE"), for copyright infringement, service mark infringement, dilution of the plaintiff's marks, and tortious interference with contract.

ICE has also filed counterclaims. Its First Amended Counterclaims allege four causes of action seeking certain declaratory relief and asserting that NYMEX engaged in monopoly maintenance and monopoly leveraging in violation of *§ 2 of the Sherman Act.* ICE's first cause of action alleges that NYMEX has engaged in anticompetitive conduct to maintain its monopoly power in two relevant markets: (1) the market for intermediation services for cleared contracts for the purchase and sale of Henry Hub natural gas, and (2) the market for intermediation services for cleared contracts for the purchase and sale of West Texas Intermediate ("WTI") crude oil. ICE's second cause of action seeks a declaratory judgment that NYMEX's settlement prices for cleared contracts in these commodities are an essential facility and that ICE has the right to obtain, refer to, and use NYMEX's settlement prices on the same terms as other members of **[**3]** the public. ICE's third cause of action alleges, in the alternative, that if the Court finds that there are separate markets for the intermediation of futures contracts based on these commodities and for the intermediation of cleared over-the-counter ("OTC") contracts based on the same commodities, that NYMEX violated *§ 2 of the Sherman Act* by leveraging its monopoly in the former market to gain an unlawful competitive advantage in the latter market. ICE's fourth cause of action seeks a declaratory judgment that NYMEX does not have a copyright in its settlement prices, or, alternatively, that NYMEX cannot enforce such a copyright against ICE, or that ICE has not infringed any such copyright.

NYMEX moves pursuant to *Federal Rules of Civil Procedure 12(b)(1)and 12(b)(6)* to dismiss ICE's First Amended **[*561]** Counterclaims. [1] In its memorandum of law in opposition to this motion, ICE characterizes its *§ 2* counterclaims as follows: "NYMEX has violated *Section 2 of the Sherman Act* by (1) engaging in sham litigation and creating publicity of such litigation, and (2) attempting to deny ICE access to an essential **[**4]** facility." (ICE's Mem. Opp. Mot. Dismiss at 8.) At the argument of the motion, ICE conceded that it could not prevail on its claim alleging sham litigation and accompanying publicity, and it agreed to withdraw the claim. (Transcript of Hearing dated June 7, 2004 ("Tr.") at 38.) Also at the argument of the motion, ICE asserted that its allegations comport with the *§ 2* refusal-to-deal claims recognized by the Supreme Court in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*, and *Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*.

I

HN1[] On a motion to **[**5]** dismiss a counterclaim, the allegations in the counterclaim are accepted as true. *See* *Universal Acupuncture Pain Services, P.C. v. State Farm Mutual Automobile Ins. Co., 196 F. Supp. 2d 378, 382 (S.D.N.Y. 2002)*; *see also* *Grandon v. Merrill Lynch & Co., 147 F.3d 184, 188 (2d Cir. 1998)*. In deciding a motion to dismiss a counterclaim, all reasonable inferences must be drawn in the counterplaintiff's favor. *See* *Universal Acupuncture, 196 F. Supp. 2d at 382*; *see also* *Gant v. Wallingford Bd. of Educ., 69 F.3d 669, 673 (2d Cir. 1995)*; *Cosmas v. Hassett, 886 F.2d 8, 11 (2d Cir. 1989)*. The Court's function on a motion to dismiss is "not to weigh the evidence that might be presented at trial but merely to determine whether the complaint itself is legally sufficient." *Goldman v. Belden, 754 F.2d 1059, 1067 (2d Cir. 1985)*. Therefore, NYMEX's present motion should be granted only if it appears that ICE can prove no set of facts in support of its claims that would entitle ICE to relief. *See* *Swierkiewicz v. Sorema, N.A., 534 U.S. 506, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002)*; *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*; **[**6]** *Grandon, 147 F.3d at 188*; *Goldman, 754 F.2d at 1065*.

HN2[] In deciding a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, the Court may consider documents that are referenced in the counterclaims, documents that the counterplaintiff relied on in bringing suit and that are either in the counterplaintiff's possession or that the counterplaintiff knew of when bringing

[1] For the reasons explained below in the text, the motion can be decided solely on the basis of *Rule 12(b)(6)*, and the Court need not reach the arguments that NYMEX makes under *Rule 12(b)(1)*. NYMEX's motion does not address ICE's fourth cause of action relating to NYMEX's copyright claim to its settlement prices, and therefore that cause of action cannot be dismissed.

suit, or matters of which judicial notice may be taken. *Chambers v. Time Warner, Inc. 282 F.3d 147, 153 (2d Cir. 2002)*; *see also* *Brass v. Am. Film Techs., Inc., 987 F.2d 142, 150 (2d Cir. 1993)*; *Cortec Indus., Inc. v. Sum Holding L.P., 949 F.2d 42, 47-48 (2d Cir. 1991)*; *I. Meyer Pincus & Assoc., P.C. v. Oppenheimer & Co., Inc., 936 F.2d 759, 762 (2d Cir. 1991)*; *Skeete v. IVF, Inc., 972 F. Supp. 206, 208 (S.D.N.Y. 1997)*; *Vtech Holdings Ltd. v. Lucent Techs., Inc., 172 F. Supp. 2d 435, 437 (S.D.N.Y. 2001)*. However, "in antitrust cases, where 'the proof is largely in the hands of the alleged conspirators,' dismissals prior to giving **[**7]** the [counter] plaintiff ample opportunity for discovery should be granted very sparingly." *Hosp. Bldg. Co. v. Trs. of Rex Hosp., 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)* (quoting *Poller v. Columbia Broad., 368 U.S. 464, 473,* ***[*562]*** *7 L. Ed. 2d 458, 82 S. Ct. 486 (1962))*.

II

ICE's First Amended Counterclaims allege the following relevant facts. NYMEX is a Designated Contract Market--the statutory term for a regulated futures exchange--that is subject to the *Commodity Exchange Act* ("CEA") and the jurisdiction of the Commodity Futures Trading Commission ("CFTC"). (First Amended Counterclaims ("FAC") P8.) NYMEX operates as an "open-outcry" system, in which brokers and traders transact with each other by physical communications on a physical trading "floor." (FAC PP8-9.)

NYMEX is the only Designated Contract Market that offers an active trading market for North American natural gas and crude oil futures contracts, among other commodities. (FAC P9.) Two of NYMEX's most successful futures contracts are its Henry Hub natural gas and WTI crude oil contracts. (FAC P10.) NYMEX's Henry Hub contract, which provides for delivery of natural gas at the Henry Hub natural gas pipeline **[**8]** in Louisiana, is the only actively traded natural gas futures contract in the United States. (FAC P10.) Similarly, the only actively traded crude oil futures contract in the United States is the NYMEX contract based on WTI light sweet crude oil, which provides for delivery in Oklahoma. (FAC P10.)

The Henry Hub natural gas and WTI crude oil contracts traded on NYMEX, like other futures contracts on physical commodities, provide for the purchase and sale of the underlying commodity at an agreed-upon price in a specified delivery month. (FAC P11.) Although physical delivery is possible under a futures contract, only a very small percentage of futures contracts traded on NYMEX result in physical delivery. (FAC P12.) In most cases, each party enters into an equal and offsetting transaction for the same contract prior to delivery, thereby liquidating the original contract and obviating the need for physical delivery. (FAC P12.)

Futures contracts are executed on the floor of the exchange, or through an electronic trading system, by the matching of buyers and sellers wishing to transact in the same quantities and at the same prices. (FAC P13.) Once a match occurs, a transaction is automatically **[**9]** novated to the NYMEX clearing house, which interposes itself between the original parties and becomes the buyer to every seller and the seller to every buyer. (FAC P13.) The clearing house thus assumes' the credit risk of each party to the transaction by effectively guaranteeing each party's performance obligations. (FAC P13.) Each party must deposit initial margin, which serves as a "performance bond" to secure its performance under the contract. (FAC P13.) On each day that the contract remains open, each party pays or receives additional variation margin based on changes in the value of the contract. (FAC P13.) The changes in the value of the contract are determined by reference to the settlement prices each day. (FAC P13.)

The settlement prices for Henry Hub natural gas and WTI crude oil futures contracts are determined by NYMEX's "settlement committee" at the end of each trading day. (FAC P15.) After NYMEX's floor closes at 2:30 p.m. each day, the trades executed during the closing range, which is usually the five minutes of trading prior to the close, are tabulated and circulated to the members of the settlement committee. (FAC P15.) The settlement committee then determines the **[**10]** NYMEX market price pursuant to the NYMEX Exchange Rules, a process that ICE alleges is mechanical and formulaic, **[*563]** not creative or original. (FAC P15.) NYMEX is alleged to have consistently represented that its settlement prices reflect actual trading activity and are not produced by NYMEX. (FAC P16.)

NYMEX's settlement prices play an important role in the economy by disclosing the market price for various commodities. (FAC P18.) The CEA requires that NYMEX report its settlement prices, among other data, to the public. (FAC P18.) NYMEX makes its settlement prices available to the public on an almost instantaneous basis by reporting them on its website and transmitting them to its "market data vendors"--third parties to whom NYMEX has granted worldwide, non-exclusive licenses to redistribute NYMEX market data. (FAC P19.) Some market data vendors provide NYMEX market data to their subscribers for a fee, while others provide the data to the public at no charge and with no restrictions. (FAC P19.) Members of the public can obtain settlement prices for free and without restriction from publicly accessible websites and in various national newspapers. (FAC P19.)

NYMEX does restrict the use **[**11]** of its settlement prices when subscribers receive the data on a "real time" basis, which is generally within thirty minutes of the data's release by NYMEX. (FAC P20.) NYMEX requires that subscribers who receive the settlement prices on a real-time basis enter into a "uniform subscriber addendum," which purports to limit the subscriber's use of NYMEX's real-time market data to its own "internal" business use and requires the subscriber to agree not to use NYMEX's real-time prices in competition with NYMEX. (FAC P20.) NYMEX does not impose these restrictions on subscribers who receive data on a "delayed" basis, which is generally one half hour after its release by NYMEX. (FAC P20.)

Because NYMEX is the only Designated Contract Market that offers an active trading forum for Henry Hub natural gas and WTI crude oil, trading liquidity for these contracts is concentrated on NYMEX, and NYMEX's settlement prices for these contracts have gained acceptance as the market prices for the underlying commodities. (FAC P21.) Third-party market participants thus use NYMEX settlement prices in transactions executed outside of NYMEX because NYMEX prices are considered benchmarks and because NYMEX has **[**12]** actively encouraged third parties to use its prices. (FAC P23.) For example, NYMEX encouraged the International Swaps and Derivatives Association ("ISDA") to adopt the NYMEX settlement prices for Henry Hub natural gas and WTI crude oil as price references in standard form ISDA contracts, which are widely used in over-the-counter ("OTC") transactions. (FAC P23.) NYMEX allegedly encouraged the adoption of its prices as standard terms in ISDA's forms, but has never licensed ISDA to use NYMEX's name or to refer to NYMEX's settlement prices. (FAC P24.) NYMEX is also alleged to be aware that participants in OTC transactions use and reference NYMEX prices in their agreements and when marking their positions to market. (FAC P25.) Other futures exchanges, including the Goldman Sachs Commodity Index on the Chicago Mercantile Exchange, also use NYMEX settlement prices to settle and clear certain contracts that they offer for trading, and NYMEX has allegedly never objected to these uses of its settlement prices or required the relevant parties to license their use. (FAC P26.)

As an alternative to purchasing and selling futures contracts, market participants may enter into off-exchange OTC transactions **[**13]** to purchase or sell the same underlying commodities. (FAC P27.) OTC transactions serve the same purposes as **[*564]** futures contracts because they allow parties to hedge against or speculate on the prices of the relevant commodities. (FAC P27.) Market participants have traditionally engaged in telephone negotiations to enter into OTC transactions that are then memorialized on a master agreement and a related confirmation. (FAC P28.) The parties in such instances deal directly with each other and are responsible for all aspects of the settlement of the transaction, including payment, delivery, and credit terms. (FAC P28.) Parties to OTC contracts may also execute their transactions through "voice brokers," who act as intermediaries and allow parties to find counterparties more efficiently. (FAC P28.) OTC contracts, like futures contracts, may be settled through offsetting contracts, rather than delivery, and many OTC contracts by their terms provide for settlement through cash payments rather than delivery. (FAC P29.)

Traditional OTC contracts are nonetheless distinct from futures contracts in a number of respects. (FAC P30.) Futures contracts are executed on a regulated exchange and may be **[**14]** traded by any market participant, including members of the general public. (FAC P30.) OTC contracts, by contrast, are traded outside regulated exchanges and are entered into between commercial and institutional entities. (FAC P30.) The most significant difference between futures contracts and traditional OTC contracts is that futures contracts are always cleared through a central clearing house, while OTC contracts generally have been settled bilaterally between the parties to the transactions, without any centralized clearing. (FAC P30.)

ICE was organized in 2000 to operate an Internet-based, electronic trading platform for OTC transactions in physical commodities and derivative products based on such commodities. (FAC P31.) ICE's electronic platform, which can be accessed through ICE's website, provides eligible participants with the ability to post bids and offers for transactions in a variety of products and to execute transactions against bids and offers posted by other participants. (FAC P31.) All of the participants on ICE's trading platform are required to be "eligible commercial entities" under the CEA, which defines the term to include commercial and institutional market **[**15]** participants that satisfy certain requirements. (FAC P32.)

ICE's goal is to provide participants in the OTC commodity markets with a more efficient means of trading. (FAC P33.) ICE allows market participants to trade with each other through an electronic platform, rather than through bilateral telephone negotiations or the use of voice brokers. (FAC P33.) From the commencement of trading on ICE in October 2000 through March 2002, ICE offered market participants an "execution only" facility, with no clearing alternative. (FAC P34.) Participants would post bids and offers and be matched according to time and price, and once the parties executed a transaction they were responsible for all settlement and clearing functions. (FAC P34.) At that point, ICE had no further role in the transaction. (FAC P34.)

Like ISDA and others in the OTC industry, ICE has referenced NYMEX contracts in its description of the products traded on its electronic platform since it commenced trading in October 2000. (FAC P35.) NYMEX contracts allegedly serve as the benchmark for both price and contract specifications, which market participants use when entering into most of their transactions. (FAC P35.) Market **[**16]** participants are therefore unwilling to trade an OTC Henry Hub or WTI contract unless its terms refer to NYMEX settlement prices. (FAC P35.)

[*565] OTC contracts have generally not been cleared, because parties to OTC contracts typically settled their transactions bilaterally, with each party responsible for its own performance and each party exposed to the risk of the other party's non-performance. (FAC P36.) ICE alleges that, in the past three years, especially following the collapse of Enron Corporation, market participants have been increasingly concerned with counterparty credit risk, and they have begun to demand OTC intermediation services that substantially reduce or eliminate direct counterparty credit risk. (FAC P37.) ICE alleges that, as a result of these developments, many participants in the OTC market demanded that providers of OTC intermediation services offer clearing as an alternative. (FAC P37.)

In 2001, ICE entered into an agreement with the London Clearing House ("LCH") to provide ICE participants with the opportunity to clear cash-settled OTC transactions executed on ICE in the Henry Hub natural gas "fixed for floating swap" and the WTI crude oil "bullet swap." (FAC **[**17]** P38.) The terms of these two contracts are substantially similar to NYMEX's futures contracts on Henry Hub natural gas and WTI crude oil. (FAC P38.) ICE's contractual arrangement and data connections with LCH allow ICE to provide its participants with both execution and clearing services that result in cleared OTC transactions. (FAC P39.) ICE alleges that, from the perspective of market participants, these contracts are considered economic substitutes of the NYMEX futures contracts based on the same commodities because both hedge the same price risks and eliminate counterparty credit risk. (FAC P39.)

A cleared contract must be marked-to-market on the basis of the market price for the underlying commodity. (FAC P40.) Because the prices of NYMEX's Henry Hub natural gas and WTI crude oil futures contracts are accepted benchmark prices for those commodities, ICE alleges that it must take these prices into account when it determines the prices at which ICE's cleared OTC contracts based on those commodities settle and clear. (FAC P40.) In determining its own settlement prices, ICE's settlement committee reviews both the NYMEX settlement prices, which it receives lawfully from a licensed **[**18]** market data vendor after the prices are made available to the public, as well as certain trading activity on ICE. (FAC P41.) Because NYMEX's prices are generally accepted as the market prices for Henry Hub natural gas and WTI crude oil, ICE's settlement prices are generally substantially similar to the NYMEX settlement prices. (FAC P41.) At maturity, a transaction executed on ICE and cleared through LCH is settled at the corresponding NYMEX settlement price. (FAC P42.) Market participants generally require this procedure because the NYMEX settlement price is the industry benchmark, and because virtually all other OTC transactions in the energy market are settled against this price. (FAC P42.) ICE alleges that if it did not finally settle its cleared contracts against the NYMEX price, the contracts would have little value to market participants, because even a small discrepancy results in the introduction of unacceptable "basis risk," which is the risk of incorrectly matching offsetting transactions. (FAC P42.)

III

ICE alleges that these facts state claims for violations of § 2 of the Sherman Act. **HN3**[] Section 2 of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, **[**19]** or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations. . . ." **[*566]** 15 U.S.C. § 2. Private parties are granted the right to sue for, and seek injunctive relief against, violations of the antitrust laws by § 4 and § 16 of the Clayton Act. 15 U.S.C. §§ 15,26. ICE asserts claims of monopoly maintenance and monopoly leveraging against NYMEX.

ICE alleges that NYMEX has long recognized the threat of electronic trading, and that when ICE began trading OTC contracts in late 2000 NYMEX viewed ICE as an emerging competitor. (FAC PP43-44.) ICE further alleges that in December 2001, when ICE announced that it would begin trading cleared OTC contracts, NYMEX realized that ICE had become a direct competitor in the same market for which NYMEX operated. (FAC P44.) ICE alleges that because both ICE and NYMEX charge a fee for transactions executed through them, decisions by market participants to execute and clear contracts through ICE, rather than through NYMEX, reduces NYMEX's revenues. (FAC P44.)

ICE alleges that NYMEX has responded to ICE's competition by **[**20]** threatening to prevent ICE from using NYMEX's settlement prices, and by publicizing NYMEX's claims to copyright protection in the settlement prices and this copyright infringement action, all in an alleged effort to cast doubt on ICE's future ability to use NYMEX settlement prices. (FAC P45.) ICE further alleges that in November 2002, just more than a week before NYMEX filed its complaint in this action, NYMEX announced that it would begin offering new contracts on its prior electronic platform, NYMEX ACCESS, that were designed to appeal to OTC market participants. (FAC P60.) ICE alleges that these contracts included contracts that resemble popular OTC contracts such as "swaps" based on the NYMEX price for Henry Hub natural gas and WTI crude oil, but that are actually exchange-traded futures contracts that are indistinguishable from the futures contracts already traded on NYMEX. (FAC P60.) In January 2003, NYMEX launched a new electronic platform, ClearPort, on which NYMEX's OTC-like contracts are now traded. (FAC P60.) ICE alleges that NYMEX took these actions to undermine the credibility and long-term viability of ICE's electronic platform in the eyes of market participants. (FAC **[**21]** P61.) ICE alleges that it has been harmed by NYMEX's actions because customers who might otherwise use ICE's services have turned elsewhere, in particular to NYMEX. (FAC P61.)

ICE alleges that the relevant markets for its antitrust claims are (1) the market for the intermediation of cleared contracts for the purchase and sale of Henry Hub natural gas, and (2) the market for the intermediation of cleared contracts for the purchase and sale of WTI crude oil. (FAC P62.) ICE alleges that the customers for these markets are located worldwide. (FAC P62.) ICE alleges that both ICE and NYMEX are intermediaries in transactions in Henry Hub natural gas and WTI crude oil, because they each provide a forum in which market participants can execute transactions based on these commodities. (FAC P63.) ICE alleges that NYMEX's forum is principally an open-outcry exchange, while ICE's forum is an Internet-based matching system, and that both NYMEX and ICE charge fees for contracts executed on their forums as well as fees for clearing those contracts (which fees are paid to LCH when the contracts are executed on ICE). (FAC P63.)

ICE alleges that futures and cleared OTC contracts are fungible economic **[**22]** substitutes. (FAC P64.) Both are contracts to purchase or sell a specified quantity of a commodity at an agreed-upon price in the future, and both therefore allow parties to the contracts to hedge or assume price **[*567]** risks. (FAC P64.) Both futures and cleared OTC contracts are cleared through a clearing house that acts as a counterparty in every transactions and thus obviates the risk of non-performance by a counterparty. (FAC P64.) By contrast, bilateral OTC contracts, according to ICE, are different from futures and cleared OTC contracts, because bilateral OTC contracts are not cleared through a clearing house and thus expose market participants to counterparty credit risk. (FAC P64.)

ICE alleges that NYMEX possesses monopoly power in both relevant markets, that ICE and NYMEX are the only two competitors in the relevant markets, and that there are substantial barriers to entry into the relevant markets. (FAC P67-68.) ICE also alleges that there are a number of barriers to entry to the relevant markets, because entrants incur significant capital costs in developing and operating an Internet-based trading platform, because entrants incur contracting costs in developing a relationship **[**23]** with one of the few clearing houses in the industry, and because entrants must demonstrate that their contracts and intermediation services will satisfy market participants' risk management needs. (FAC P70-72.) ICE alleges that a market participant's risk management needs can be met only if the entrant settles and clears its contracts at the market price for the given commodity. (FAC P72.) Because a new entrant will not have sufficient liquidity on its trading platform, ICE alleges that a new entrant is not able to determine its own prices based solely on its own trading. (FAC P72.) ICE alleges that this "network effect" raises a substantial barrier to any prospective entrants to the relevant markets. (FAC P72.)

ICE alleges that these barriers to entry allow NYMEX to control prices and restrict or eliminate competition. (FAC P73.) ICE alleges that a new entrant could mitigate the network effect between market prices and liquidity by referring to established market prices, which for the relevant markets are NYMEX's settlement prices for Henry Hub natural gas and WTI crude oil. (FAC P74.) ICE thus alleges that these conditions make NYMEX's settlement prices for Henry Hub natural gas **[**24]** and WTI crude oil an essential facility. (FAC P75.) ICE alleges that the market prices for these commodities, which NYMEX reports, cannot be reasonably duplicated, and that competitors must be permitted to use NYMEX's settlement prices if they are to compete in the relevant markets. (FAC P75.)

NYMEX moves pursuant to *Rule 12(b)(6)* to dismiss ICE's antitrust counterclaims for failure to state a claim upon which relief can be granted.

A

ICE's first cause of action alleges that NYMEX has engaged in conduct designed to maintain its monopoly in the following relevant markets: (1) the market for intermediation services for cleared contracts for the purchase and sale of Henry Hub natural gas, and (2) the market for intermediation services for cleared contracts for the purchase and sale of WTI crude oil.

HN4[] To make out a monopolization claim under *§ 2 of the Sherman Act*, a plaintiff must establish "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; **[**25]** *see also Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 61 (2d Cir. 1997)*. ICE alleges that NYMEX has violated *§ 2* by (1) engaging in sham litigation and creating publicity **[*568]** of such litigation, and (2) attempting to deny ICE the use of an essential facility. (FAC P3; ICE's Mem. Opp. Mot. Dismiss at 8.) As explained above, ICE withdrew its *§ 2* sham litigation claim at the argument of the motion. Also at the argument of the motion, ICE asserted that it has stated viable *§ 2* claims under the Supreme Court's decisions in *Aspen Skiing* and *Otter Tail,* as well as under the essential facilities doctrine.

HN5[] The elements of an essential facility claim under *§ 2* are: "'(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.'" *Twin Labs., Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir. 1990)* (quoting *MCI Communications Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1132-33 (7th Cir. 1983))*. NYMEX contends that ICE has failed **[**26]** adequately to allege the first two elements of an essential facility claim.

In *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872 (2004)*, which reached the Supreme Court on a motion to dismiss, the Court explained some of the constraints imposed on the essential facility doctrine. First, the Court emphasized that ***HN6***[] the "mere possession of monopoly power, and the concomitant charging of monopoly prices," does not constitute anticompetitive conduct that would establish the second element of a *§ 2* monopolization claim. *Trinko, 124 S. Ct. at 879*. Because this requirement preserves the opportunity to charge monopoly prices, if only for a short period, it also preserves inducements to innovate and apply business acumen. *See id.* For similar reasons, monopolists are generally permitted by the Sherman Act to choose those with whom they will deal. *Id.* (citing *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919))*. "Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *§ 2*," but the Supreme Court has been **[**27]** "very cautious in recognizing such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm." *Id.*

The Supreme Court in *Trinko* rejected the determination by the Court of Appeals for the Second Circuit that the plaintiff had made out an essential facilities claim. *Id. at 880-81*. The Supreme Court noted that it had never recognized or rejected the essential facilities doctrine, but that to the extent such a doctrine exists, the plaintiff's allegations concerning Verizon's provision of services to rivals did not make out an essential facilities claim. "It suffices for present purposes to note that ***HN7***[] the indispensable requirement for invoking the doctrine is the unavailability of access to the 'essential facilities'; where access exists, the doctrine serves no purpose. Thus, it is said that 'essential facility claims should . . . be denied where a state or federal agency has effective power to compel sharing and regulate its scope and terms.'" *Id. at 881* (quoting P. Areeda & H. Hovenkamp, ***Antitrust Law***, p. 150, P773e (2003 Supp.)). Under the circumstances in *Trinko,* "the 1996 **[**28]** [Telecommunications] Act's extensive provision for access makes it unnecessary to impose a judicial doctrine of forced access." *Id.*

So, too, in this case, where access to the alleged "essential facility" is regulated by the CFTC, a federal agency with effective power to compel sharing of NYMEX's settlement prices and regulate the scope and terms of such sharing. When asked by the Court at the argument of the motion whether the CFTC has the power **[*569]** under the CEA to regulate the use to which NYMEX's settlement prices can be put by others, ICE's counsel responded, "I think they do, frankly." (Tr. 42.) Indeed, ***HN8***[] various provisions of the CEA require exchanges--which are designated "contract markets" under the Act--to disclose information, including settlement prices, in a prescribed fashion. ***HN9***[] *Section 6g(e) of the CEA* requires: "Before the beginning of trading each day, the exchange shall, insofar as is practicable and under terms and conditions specified by the Commission, make public the volume of trading on each type of contract for the previous day and such other information as the Commission deems necessary in the public interest and prescribes by rule, order, or regulation." *7 U.S.C. § 6g **[**29]** (e).* ***HN10***[] *Section 7(d) of the CEA* sets forth "core principles" with which designated contract markets such as NYMEX must comply in order to maintain their designation as contract markets. *See 7 U.S.C. § 7(d)(1)*. ***HN11***[] Core Principle 8 provides that a designated contract market "shall make public daily information on settlement prices, volume, open interest, and opening and closing ranges for actively traded contracts on the contract market." *7 U.S.C. § 7(d)(8)*.

HN12[] Through regulation, the CFTC has provided that contract markets must make their settlement prices "readily available to the news media and the general public no later than the business day following the day to which the [settlement prices] pertain[]." *17 C.F.R. § 16.01(b)(2)*. The CFTC's "application guidance" for compliance with Core Principal 8 states that "[a] contract market should provide to the public information regarding settlement prices . . ., as determined by the Commission, on a fair, equitable and timely basis." 17 C.F.R. Pt. 38, App. B, Core Principle 8.

HN13[] The CEA also provides that, before promulgating regulations under the Act, the CFTC should consider **[**30]** the costs and benefits of the CFTC's action as well as any implications for the antitrust laws. *7 U.S.C. § 19*. *Section 19(a) of the CEA* provides that the costs and benefits of CFTC action must be evaluated in light of, among other factors, "protection of market participants and the public"; "the efficiency, competitiveness, and financial integrity of futures markets"; and "price discovery." *7 U.S.C. § 19(a)(2)*. *Section 19(b)* requires that the CFTC "take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means of achieving the objective of this chapter" when the CFTC adopts rules and regulations or issues orders under the CEA. *7 U.S.C. § 19(b)*.

Given the CFTC's authority to regulate the scope and terms of access to NYMEX's settlement prices, ICE cannot make out a claim under the essential facilities doctrine. As the Supreme Court explained in *Trinko,* ***HN14***[] "where access exists, the [essential facility] doctrine serves no purpose," and essential facility claims should be denied "where a state or federal agency has effective power to compel sharing and **[**31]** regulate its scope and terms." *Trinko, 124 S. Ct. at 881* (internal quotation marks and citation omitted). This result is based, as the Court observed in *Trinko,* on the sound reasons that exist for leaving it to regulatory agencies, rather than antitrust courts, to regulate the terms of any forced access. As the Court noted, "enforced sharing . . . requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing--a role for which they are ill-suited. Moreover, compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion." *Trinko, 124 S. Ct. at 879*.

[*570] Indeed, while the Supreme Court indicated in *Trinko* that the essential facility doctrine "serves no purpose" where access exists, ICE does not deny that it has access to NYMEX's settlement prices. At argument, ICE candidly conceded that it had access to the data: "We have access to the data." (Tr. 40.) It concedes it has access to the data, and there are lots of sources of the data. Its complaint is the uses to which it can put the data to which it unquestionably has access, but under *Trinko,* that is **[**32]** not a viable essential facility claim.

Moreover, ***HN15***[] the CFTC, under the terms of the CEA, is also charged with making rules and regulations that take into consideration the interests of the antitrust laws and, among other things, "the efficiency, competitiveness, and financial integrity of futures markets." *7 U.S.C. §§ 19(a)(2)(B)*. The Court in *Trinko* instructed that "antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue." *Trinko, 124 S. Ct. at 881*. "One factor of particular importance is the existence of a regulatory structure designed to deter and remedy anticompetitive harm. Where such a structure exists, the additional benefit to competition provided by antitrust enforcement will tend to be small, and it will be less plausible that the antitrust laws contemplate such additional scrutiny." *Id.* Here, not only does the CFTC regulate the dissemination of settlement prices, which are alleged to be an essential facility, but it must design its rules and regulations after taking into consideration the competitiveness of the futures markets and the interests of the antitrust laws generally. **[**33]** Because the CFTC has the authority to regulate the scope and terms of access to NYMEX's settlement prices, the essential facilities doctrine serves no purpose in the circumstances of this case. Furthermore, the CFTC is in a better position than a general antitrust court to determine the scope and terms of any forced sharing of settlement prices among the exchanges that it regulates, and then to oversee and enforce any such sharing of settlement prices. Because ICE has failed to make out a claim under the essential facilities doctrine, the counterclaim must be dismissed.

B

As explained above, at the argument of the motion, ICE asserted that its monopolization claims also fall under the category of claims recognized by the Supreme Court in *Aspen Skiing* and *Otter Tail.* These two cases were not cited, much less argued, in ICE's brief in opposition to NYMEX's motion to dismiss. They could hardly be construed as an independent basis for a claim, and any such argument would be waived. But, in any event, the arguments have no merit.

Though the Supreme Court in *Aspen Skiing* found *§ 2* liability based on a refusal to deal with a rival, the Court in *Trinko* instructed that " **[**34]** *Aspen Skiing* is at or near the outer boundary of *§ 2* liability." *Trinko, 124 S. Ct. at 879*. In *Aspen Skiing,* the defendant owned three of the four mountains that made up the Aspen downhill skiing market, and the plaintiff owned the fourth mountain. For a number of years, the defendant and the plaintiff had cooperated in marketing a joint ticket to skiers that provided admission to all four mountains. *Aspen Skiing, 472 U.S. at 590-91*. The defendant repeatedly and unsuccessfully demanded a larger share of the proceeds from the joint ticket, and eventually refused to continue the cooperative arrangement. *Id. at 591-93*. The plaintiff tried to market its own multi-mountain ticket to replace the joint ticket, and even offered to buy the defendant's tickets at retail price, an offer the defendant **[*571]** rejected. *Id. at 593-94*. The Supreme Court observed that:

> The monopolist did not merely reject a novel offer to participate in a cooperative venture that had been proposed by a competitor. Rather the monopolist elected to make an important change in a pattern of distribution that had originated in a competitive market **[**35]** and had persisted for several years.

Id. at 603. The Court also noted that "it seems appropriate to infer that such [joint] tickets satisfy consumer demand in free competitive markets"--that is, that competition in the Aspen skiing market required some level of cooperation, because consumers demanded it. *Id.* Because the defendant's cooperation with the plaintiff would have entailed no cost to the defendant and indeed would have provided it with immediate benefits, and because consumers preferred the cooperative arrangement, the only apparent justification for the defendant's refusal to deal was anticompetitive malice: "Thus the evidence supports an inference that [the defendant] was not motivated by efficiency concerns and that it was willing to sacrifice short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *Id. at 610-11*.

The allegations of a refusal to deal in this case do not fit "within the limited exception recognized in *Aspen Skiing*." *Trinko, 124 S. Ct. at 880*. The course of conduct by the defendant in *Aspen Skiing* that raised an inference of anticompetitive **[**36]** conduct is not present in this case. There is no history of cooperation between ICE and NYMEX in sharing the use of NYMEX's settlement prices. Therefore, NYMEX's "prior conduct sheds no light upon the motivation of its refusal to deal." *Id.* There is no indication that NYMEX is flouting consumer demand and foregoing short-term profits by refusing to cooperate with ICE. And unlike the defendant in *Aspen Skiing,* NYMEX has proffered a legitimate business justification for its refusal to deal with ICE. (Tr. 21-23.) NYMEX has a legitimate business interest in preventing its competitor, ICE, from free-riding on NYMEX's settlement prices. NYMEX's settlement prices have value because they are viewed as proxies for market prices, and NYMEX has a legitimate interest in preventing rivals from free-riding on this reputation. In any event, because the indicia of anticompetitive conduct that the Supreme Court located in *Aspen Skiing* are not present in the facts alleged in this case, ICE's *§ 2* claims of a refusal to deal do not fit the rubric of claims recognized by the Supreme Court in *Aspen Skiing.*

The other case that ICE invoked at oral argument is *Otter Tail,* although ICE **[**37]** provided no specific arguments about how the allegations in this case would state a *§ 2* claim under *Otter Tail.* Indeed, it is plain for several reasons that this is not an *Otter Tail* case. In *Otter Tail,* the Supreme Court found that the defendant--a private, highly-regulated utility company with monopoly power in the wholesale power market--had "sought to substitute for competition anticompetitive uses of its dominant economic power." *Otter Tail, 410 U.S. at 380*. The defendant utility sold electric power at retail in Midwestern towns under short-term municipally granted franchises. Because each town could accommodate only one power distribution system, each town formed a natural monopoly for the retail sale of electric power. When faced with efforts by the towns to displace the defendant with their own municipal distribution systems, the defendant engaged in such wrongful conduct as refusing to sell power to the towns at wholesale and refusing to "wheel," or transfer, power to the towns along its transmission lines, which were the only lines available, **[*572]** from other wholesalers. *Id. at 369-71*. The Supreme Court affirmed the district court's **[**38]** finding that "Otter Tail's refusals . . . to wheel were solely to prevent municipal power systems from eroding its monopolistic position." *Id. at 378*.

The allegations in this case do not fit the rubric of *Otter Tail.* NYMEX is not alleged to possess a natural monopoly, as the defendant possessed in *Otter Tail.* The allegations in this case also do not raise an inference that NYMEX's refusal to deal with ICE was animated "solely" by an exclusionary purpose. As explained above, NYMEX has a legitimate interest in preventing competitors from free riding on its settlement prices. Most significantly, however, this case differs from *Otter Tail* in that the Supreme Court there found that the Federal Power Commission, the applicable regulatory agency, lacked the authority to order the defendant to wheel the power, and thus break the bottleneck created by the defendant's monopoly of the transmission lines. *See id. at 375-76*. As explained above, the CFTC has the power to compel disclosure of the settlement prices and to regulate the scope and terms of such disclosure. For these reasons, *Otter Tail* provides no assistance to ICE.

Therefore, ICE has **[**39]** failed to make out a monopolization claim under *§ 2 of the Sherman Act*, and its first counterclaim for monopoly maintenance is dismissed. [2]

C

ICE's monopoly leveraging claim, its third counterclaim, is pleaded in the alternative in the event the Court determines that there are separate markets for the intermediation of futures contracts and for the intermediation of cleared OTC contracts in Henry Hub natural gas **[**40]** and WTI crude oil. ***HN16***[] The standard in the Second Circuit for a monopoly leveraging claim has been that the plaintiff must establish that the defendant "(1) possessed monopoly power in one market; (2) used that power to gain a competitive advantage . . . in another distinct market;

[2] Because ICE's second counterclaim seeks a declaratory judgment that NYMEX's settlement prices are an essential facility, which, for the reasons explained in the text, they are not, that counterclaim is dismissed. However, NYMEX has not made any arguments in this motion that would support dismissing ICE's fourth counterclaim, which seeks a declaratory judgment that NYMEX does not have a copyright in its settlement prices, or, alternatively, that NYMEX cannot enforce such a copyright against ICE, or that ICE has not infringed any such copyright. Therefore, ICE's fourth counterclaim is not dismissed.

and (3) caused injury by such anticompetitive conduct." *Virgin Atl. Airways v. British Airways, 257 F.3d 256, 272 (2d Cir. 2001)*. However, the Supreme Court in *Trinko* held that this standard was erroneous to the extent it "dispensed with a requirement that there be a 'dangerous probability of success' in monopolizing a second market." *Trinko, 124 S. Ct. at 883 n.4* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993))*.

In this case, ICE alleged that NYMEX used its monopoly power in the market for intermediation of futures contracts to gain an "unlawful competitive advantage" in the separate market for intermediation of cleared OTC contracts. (FAC P90.) At the time the counterclaims were asserted, a monopoly leveraging claim could be made out in this Circuit by alleging that the defendant used its monopoly power in one **[**41]** market to gain an unlawful "competitive advantage" in another distinct market. But the Supreme Court has made clear that a monopoly leveraging claim must allege that there was a "dangerous probability of success" in the defendant's attempt to monopolize the second market. **[*573]** ICE's counsel conceded at the argument of the motion that this claim is "dead in the water" after *Trinko,* and ICE voluntarily withdrew the claim. [3] (Tr. 37.)

CONCLUSION

For the reasons explained above, NYMEX's motion to dismiss ICE's First Amended Counterclaims is granted with respect to ICE's first, second, and third counterclaims.

SO ORDERED.

Dated: New York, New York

June 30, 2004

John G. Koeltl

[42] United States District Judge**

End of Document

[3] Because ICE's antitrust counterclaims are either voluntarily withdrawn or dismissed for failure to state a claim, there is no need to reach NYMEX's alternative arguments concerning implied repeal, antitrust standing, failure to allege harm to competition, and insufficiency of the alleged relevant markets.

HN1[] **Remedies, Damages**

Under *15 U.S.C.S. §§ 1* and *2*, an antitrust plaintiff must show harm to competition in general, rather than merely damage to an individual competitor. The purpose of the Sherman Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself. It does so not out of solicitude for private concerns but out of concern for the public interest.

HN2[] **Motions to Dismiss, Failure to State Claim**

An appellate court reviews de novo a district court decision to dismiss an antitrust complaint under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim. The appellate court accepts the factual allegations in the complaint as true and makes all reasonable inferences in favor of the non-moving party. The threshold of sufficiency that a complaint must meet to survive a motion to dismiss is exceedingly low, and *Rule 12(b)(6)* dismissals are particularly disfavored in fact-intensive antitrust cases. The complaint should only be dismissed with prejudice if it appears beyond doubt that the plaintiff can prove no set of facts which would entitle it to relief.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] **Price Fixing & Restraints of Trade, Vertical Restraints**

15 U.S.C.S. § 1 prohibits combinations and conspiracies that restrain interstate or foreign trade. *Section 1* applies both to agreements between companies that directly compete with one another, called "horizontal" agreements, and to agreements between businesses operating at different levels of the same product's production chain or distribution chain, known as "vertical" agreements. In addition, although some restraints on trade remain illegal per se, such as certain agreements to fix prices, most asserted antitrust violations now require the finder of fact to decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. Section 1 claims that do not allege per se antitrust violations are analyzed under this "rule of reason," and the claims fail if the restraint on trade is reasonable. Section 1 applies only to agreements between two or more businesses; it does not cover unilateral conduct.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Under United States Court of Appeals for the Eleventh Circuit case law, alleged 15 U.S.C.S. § 1 agreements analyzed under the rule of reason require a plaintiff to prove (1) the anticompetitive effect of the defendant's conduct on the relevant market, and (2) that the defendant's conduct has no pro-competitive benefit or justification. In alleging the anticompetitive effect of the defendant's conduct, an antitrust plaintiff must show harm to competition rather than to competitors. That is, the "anticompetitive effects" are measured by their impact on the market rather than by their impact on competitors. In order to prove this anticompetitive effect on the market, the plaintiff may either prove that the defendants' behavior had an actual detrimental effect on competition, or that the behavior had the potential for genuine adverse effects on competition.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] Antitrust & Trade Law, Sherman Act

In alleging an anticompetitive effect, a plaintiff at a minimum is required to define the relevant market and establish that the defendants possessed power in that market. Market power alone cannot be sufficient to show the potential for genuine adverse effects on competition. The burden of proving unreasonable effects in a rule of reason case rests with the antitrust plaintiff. Therefore, the plaintiff, after crossing the threshold of showing the defendant's market power, is required to establish that the interbrand market structure was such that intrabrand competition was a critical source of competitive pressure on price, and hence of consumer welfare. Courts require specific allegations linking market power to harm to competition in that market.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] International Aspects, Commerce With Foreign Nations

15 U.S.C.S. § 2 makes it a crime to monopolize, to attempt to monopolize, or to conspire to monopolize any part of interstate or foreign trade. Section 2 covers behavior by a single business as well as coordinated action taken by several businesses.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN9[] Monopolies & Monopolization, Attempts to Monopolize

Attempted monopolization involves three distinct elements: (1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Antitrust & Trade Law, Sherman Act

Like claims under 15 U.S.C.S. § 1, 15 U.S.C.S. § 2 claims require harm to competition that must occur within a "relevant", that is, a distinct market, with a specific set of geographical boundaries and a narrow delineation of the products at issue. Under 15 U.S.C.S. § 1, this "relevant market" must have been harmed by an unreasonable restraint on trade, while under 15 U.S.C.S. § 2, the alleged monopolist must possess enough power or potential power in this "relevant market" in order to harm competition.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Antitrust & Trade Law, Sherman Act

One company's minority ownership interest in another company is not sufficient by itself to make the owner a competitor, for purposes of the antitrust laws, of the subsidiary's rivals. To be a competitor at the level of the subsidiary, the parent must have substantial control over the affairs and policies of the subsidiary.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN12[] **Monopolies & Monopolization, Attempts to Monopolize**

The first element of an attempted monopolization claim requires a plaintiff to allege facts that show that the defendant has engaged in predatory or anticompetitive conduct. This anticompetitive conduct criterion captures the critical antitrust idea of harm to competition, rather than to competitors. Regardless of the defendant's power or intent, its conduct may be incapable of producing monopoly, and thus unable to satisfy the attempt requirement. In fact, the conduct requirement is arguably the single most important aspect of attempted monopolization.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

As with *15 U.S.C.S. § 1* claims, conduct that injures individual firms rather than competition in the market as a whole does not violate *15 U.S.C.S. § 2*. Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws. Cases from the United States Court of Appeals for the Eleventh Circuit recognize that injury to a competitor need not always result in injury to competition. The use of unfair means resulting in the substitution of one competitor for another without more does not violate the antitrust laws.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN16[] **Relief From Judgments, Altering & Amending Judgments**

Under the Federal Rules of Civil Procedure, leave to amend shall be freely given when justice so requires. *Fed. R. Civ. P. 15(a)*. In the absence of any apparent or declared reason--such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc.--the leave sought should, as the rules require, be freely given. In the United States Court of Appeals for the Eleventh Circuit, these same standards apply when a plaintiff seeks to amend after a judgment of dismissal has been entered by asking the district court to vacate its order of dismissal pursuant to *Fed. R. Civ. P. 59(e)*.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN17[] **Antitrust & Trade Law, Sherman Act**

A court must accept the facts pleaded in a proposed amended complaint as true and construe them in the light most favorable to the plaintiff. An antitrust complaint need only meet an "exceedingly low" threshold of sufficiency in order to state a claim for relief and survive a motion to dismiss. The court must not assume that the plaintiff can prove facts not alleged or that defendants have violated the antitrust laws in ways not alleged. Moreover, even in the liberal pleading regime, antitrust plaintiffs must allege facts in support of each element of an antitrust violation. The United States Supreme Court has indicated that a complaint should not be dismissed unless it is found to be wholly frivolous. This is not to say that liberal pleading requirements negate the need to draft an antitrust complaint in a careful and thoughtful fashion. An antitrust complaint must comprehend a so-called prima facie case, and enough data must be pleaded so that each element of the alleged antitrust violation can be properly identified. Conclusory allegations that defendant violated the antitrust laws and plaintiff was injured thereby will not survive a motion to dismiss if not supported by facts constituting a legitimate claim for relief. However, the alleged facts need not be spelled out with exactitude, nor must recovery appear imminent.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN18[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Conspiracy under United States Court of Appeals for the Eleventh Circuit law requires (1) an agreement in restraint of trade (2) deliberately entered into with the specific intent of achieving a monopoly (3) which could have had an anticompetitive effect and (4) at least one overt act in furtherance of the conspiracy.

Opinion by: BARKETT

Opinion

[*1068] BARKETT, Circuit Judge:

Spanish Broadcasting System ("SBS") appeals the dismissal with prejudice of its First Amended Complaint under *Sections One and Two of the Sherman Act* against Clear Channel ("CC") and the Hispanic **[*1069]** Broadcasting Corporation ("HBC"). SBS and HBC are the two largest owners of Spanish-language radio stations in the United States. SBS owns fourteen stations in seven Spanish-language radio markets, including five of the top ten U.S. Spanish-language radio markets, while HBC owns fifty-five stations and operates in each of the top ten Spanish-language markets. CC owns the largest network of English-language radio stations in the United States, covering some 1200 stations in more than 300 markets. CC also owns 26% of HBC. SBS sued CC and HBC, claiming that they had attempted to limit the ability of SBS to compete in the Spanish-language radio market **[**2]** and sought to drive SBS out of business by engaging in numerous practices made unlawful by the *Sherman Act*.

Congress passed the *Sherman Act*, the first major piece of antitrust legislation, in 1890. Following the Civil War, rapid industrialization under relatively limited governmental regulation allowed large firms and coordinated groups in several industries to amass considerable economic power at the expense of smaller rivals. Congress sought to restore a competitive environment and limit the formation, persistence, and power of large, anticompetitive combinations. See, e.g., *Apex Hosiery Co. v. Leader, 310 U.S. 469, 491-95, 84 L. Ed. 1311, 60 S. Ct. 982 & n.15 (1940)* (discussing legislative history). *Section One of the Act* prohibits contracts, combinations and conspiracies in restraint of trade, while Section Two prohibits monopolization, attempted monopolization and conspiracy to monopolize. *15 U.S.C. §§ 1-2*. Although Congress has also barred specific practices through subsequent legislation, and although the interpretation and enforcement of these provisions has varied considerably over time, the *Sherman Act* remains the basic cornerstone of ***antitrust*** **[**3]** ***law***.

Because the *Sherman Act* contains only general language, courts have played an extremely important role in shaping the reach of the Act and the requirements for stating a cause of action under each section. Critically, ***HN1***[] under both sections, an antitrust plaintiff must show harm to competition in general, rather than merely damage to an individual competitor. See *Am. Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1579 n.8 (11th Cir. 1985)* ("Harm to competition is a necessary element of all private antitrust suits under *Sections 1 and 2 of the Sherman Act*. . . ."). As the Supreme Court has explained:

> The purpose of the *[Sherman] Act* is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself. It does so not out of solicitude for private concerns but out of concern for the public interest.

Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993). This case turns in large part on whether SBS has met **[**4]** its obligation to allege facts that would support a showing of this harm to competition, rather than merely to itself.

---

* Honorable Frank J. Magill, United States Senior Judge for the Eighth Circuit, sitting by designation.

The complaint [1] contained claims against both CC and HBC as follows: (1) CC and **[*1070]** HBC have conspired to adversely affect SBS's stock price by pressuring analysts not to cover SBS stock, by leaking confidential information about an attempted acquisition of SBS, and by encouraging investors to sell SBS stock; (2) CC and HBC have conspired to make it more difficult for SBS to acquire new radio stations by bidding up prices and by wrongfully appropriating business opportunities created by SBS; and (3) CC and HBC have induced various SBS employees to breach their contracts and join HBC. In addition, the complaint contained specific claims against CC alone: (4) CC hindered SBS's ability to raise capital by spreading rumors about an SBS executive and by threatening to withdraw CC's own business from an underwriting firm if it worked with SBS; and (5) CC leveraged its ownership of both concert venues and a Hispanic entertainment company in order to discourage advertisers from purchasing time on SBS.

[5]** SBS alleged that these practices constituted an agreement between CC and HBC to restrain trade in violation of *Section One of the Sherman Act* as well as attempted monopolization by both CC and HBC of the major Spanish-language radio markets in violation of *Section Two of the Act*. In addition to federal antitrust violations, SBS claimed causes of action under Florida and California statutes and under various common law theories.

The district court dismissed SBS's complaint with prejudice, pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, after concluding that SBS could not meet the requirements necessary to maintain a Sherman antitrust suit. On appeal, SBS argues that the district court erred as a matter of law in dismissing the complaint, abused its discretion in failing to grant leave to amend the complaint, and erred in dismissing the complaint with prejudice.

HN2[] We review de novo a district court decision to dismiss an antitrust complaint under *Rule 12(b)(6)* for failure to state a claim. *Lowell v. Am. Cyanamid Co., 177 F.3d 1228, 1229 (11th Cir. 1999)*. We accept the factual allegations in the complaint as true and **[**6]** make all reasonable inferences in favor of the non-moving party. The threshold of sufficiency that a complaint must meet to survive a motion to dismiss is exceedingly low, and *Rule 12(b)(6)* dismissals are particularly disfavored in fact-intensive antitrust cases. *Quality Foods de Centro America, S.A. v. Latin American Agribusiness Dev. Corp., S.A., 711 F.2d 989, 994-95 (11th Cir. 1983)*. The complaint should only be dismissed with prejudice if it appears beyond doubt that SBS can prove no set of facts which would entitle it to relief. *St. Joseph's Hosp., Inc. v. Hosp. Corp. of Am., 795 F.2d 948, 953 (11th Cir. 1986)*.

In this case, neither the complaint nor the appellate briefs are models of clarity in defining the precise claims brought under the antitrust laws or describing how the factual allegations in the complaint satisfy the necessary elements of each specific claim. Nonetheless, we will attempt to categorize the claims in terms of existing antitrust case law.

[*1071] I. *Sherman Act Section One*

Section One of the Sherman Act provides:

> ***HN3***[] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or **[**7]** commerce among the several States or with foreign nations, is declared to be illegal.

15 U.S.C. § 1. ***HN4***[] Thus, Section One prohibits combinations and conspiracies that restrain interstate or foreign trade. This provision applies both to agreements between companies that directly compete with one another, called

---

[1] Unless otherwise noted, "complaint" in this opinion refers to the First Amended Complaint. SBS filed the First Amended Complaint before the defendants filed a response in order to cure technical difficulties with its original pleadings. The district court also treated allegations made at the oral hearing as part of this complaint. The court "allowed SBS to rectify orally the facial deficiencies in its Amended Complaint because at this procedural stage, the Court must draw all reasonable inferences in the Plaintiff's favor and consider, in the interests of justice and efficiency, the Plaintiff's best arguments." Order of Jan. 31, 2003 at 1 n.1. We have previously allowed district courts to consider allegations made in oral argument on the motion to dismiss. See, e.g., *Oxford Asset Mgmt. v. Jaharis, 297 F.3d 1182, 1194-95 (11th Cir. 2002)*. As discussed below, SBS also attempted to file a Second Amended Complaint with its motion for reconsideration.

"horizontal" agreements, and to agreements between businesses operating at different levels of the same product's production chain or distribution chain, known as "vertical" agreements. In addition, although some restraints on trade remain illegal per se, such as certain agreements to fix prices, most asserted antitrust violations now require "the finder of fact [to] decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)* (emphasis added). Section One claims that do not allege per se antitrust violations are analyzed under this **[**8]** "rule of reason," and the claims fail if the restraint on trade is reasonable. Both parties accept that the rule of reason applies to the Section One claims raised by SBS in this case.

Section One applies only to agreements between two or more businesses; it does not cover unilateral conduct. *Fisher v. City of Berkeley, 475 U.S. 260, 266, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986)* ("Even where a single firm's restraints directly affect prices and have the same economic effect as concerted action might have, there can be no liability under *§ 1* in the absence of agreement."). Thus, for the purposes of our Section One analysis, we only consider the alleged conspiracy between CC and HBC. Unfortunately, SBS does not specify the precise nature of the agreement alleged in its complaint or connect it to any particular anti-trust theory identified in the case law. Even if we were to assume that CC and HBC acted in concert for purposes of Section One, however, we would still affirm here, given that SBS failed to allege sufficient anticompetitive effect, a critical component of any antitrust claim.

HN5[] Under Eleventh Circuit case law, alleged Section One agreements analyzed under the rule of reason **[**9]** require a plaintiff "to prove (1) the anticompetitive effect of the defendant's conduct on the relevant market [2], and (2) that the defendant's conduct has no pro-competitive benefit or justification." *Levine v. Cent. Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1551 (11th Cir. 1996)*. In alleging "the anticompetitive effect of the defendant's conduct," an antitrust plaintiff must show harm to competition rather than to competitors. That is, the "anticompetitive effects" are measured by their impact on the market rather than by their impact on competitors. See, e.g., *Dickson v. Microsoft Corp., 309 F.3d 193, 206 (4th Cir. 2002)* ("To have an 'anticompetitive effect,' conduct 'must harm the competitive process and thereby harm consumers **[*1072]** . . . Harm to one or many competitors will not suffice.'") (quoting *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 58 (D.C. Cir. 2001))*. In order to prove this anticompetitive effect on the market, the plaintiff "may either prove that the defendants' behavior had an actual detrimental effect on competition, or that the behavior had the potential for genuine adverse effects on competition. **[**10]** " *Levine, 72 F.3d at 1551* (internal quotations omitted).

In an attempt to meet this burden, SBS focuses upon the harm it allegedly suffered at the hands of HBC and CC, such as weakened stock prices, restricted access to capital markets, loss of employees, damaged reputation, and loss of advertising revenue. None of these allegations assert damage to competition itself rather than damage to SBS, one competitor in the Spanish-language advertising market. As the district court indicated, the amended complaint contains no allegations at all about a factual connection between the conduct alleged and overall impact on the advertising market. Indeed, **[**11]** at oral argument before the district court, SBS stated that CC worked to keep Spanish-language advertising rates *lower* in order to maximize English-language advertising revenues.

In *Aquatherm Industries v. Florida Power & Light Co., 145 F.3d 1258 (11th Cir. 1998)*, we upheld a *Rule 12(b)(6)* dismissal of a claim that the defendant's actions, including the dissemination of false information, violated the *Sherman Act*. We emphasized that damage to a single competitor, even as a result of deliberate misinformation, does not state a claim under *Section One of the Sherman Act*:

> Aquatherm does not show, or even claim, that the actions by FPL harmed competition in the [relevant] market. Its only claim is FPL acted unfairly by disseminating false information, and this unfair competition in turn harmed Aquatherm's business. This claim of unfair competition is *not* sufficient to support a claim under *§ 1* or

---

[2] SBS asserted that it considered the relevant market to be advertising purchased in the top ten Spanish-language markets and that HBC earned 51 of the advertising revenue in that market. For the purposes of the 12(b)(6) motion, the district court assumed that a relevant market had been shown for the Section One claims. We make the same assumption here.

> any other federal antitrust provision. As long as no restraint on competition occurred, there is no cause of action under *§ 1*.

Aquatherm, 145 F.3d at 1263 (emphasis in original). Here, as well, we find that although SBS may have alleged **[**12]** "unfair" competitive practices, it did not adequately allege actual harm to competition.

On appeal, the plaintiffs argue that because SBS is the primary competitor of HBC in the Spanish-language advertising market, any damage it suffers inherently damages competition in that market. They rely upon *Full Draw Productions v. Easton Sports, Inc., 182 F.3d 745 (10th Cir. 1999)*, and *Caribbean Broadcasting System, Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080 (D.C. Cir. 1998)*, as examples of complaints that survived motions to dismiss despite alleging damage to only one competitor. However, in those two cases, the plaintiffs also alleged harm to competition in general by pointing to the specific damage done to consumers in the relevant market. See *Full Draw, 182 F.3d at 753-54* (discussing the reduction in exhibition space at archery trade shows following the complete elimination of the sole competitor); *Carribean Broad. Sys. v Cable & Wireless PLC, 148 F.3d 1080, 1086-87, 331 U.S. App. D.C. 226* (discussing allegations that the defendants' complete monopoly on Caribbean English-language FM radio advertising actually caused consumers to pay higher prices **[**13]** and that the defendants' deceptive practices and frivolous objections to the plaintiff's license application helped sustain that monopoly). In both cases, the defendants' anticompetitive practices achieved a complete monopoly in the relevant market, leaving consumers with no alternative. That is simply not the case here. Although damage to a critical competitor ***[*1073]*** *may* also damage competition in general, SBS bears the burden of drawing that implication with specific factual allegations. It has not done so here. [3]

[14]** Concluding that no "actual damage to competition" has been sufficiently alleged in the plaintiff's amended complaint, we turn to the alternative method for alleging an anticompetitive effect: the "potential for genuine adverse effects on competition." *Levine, 72 F.3d at 1551*. ***HN6***[] At a minimum, this requires a plaintiff to "define the relevant market and establish that the defendants possessed power in that market." *Maris Distrib. Co. v. Anheuser-Busch, Inc., 302 F.3d 1207, 1213 (11th Cir. 2002)*; see also *Levine, 72 F.3d at 1551*. For this claim, we assume without deciding, as did the district court, that the plaintiffs have alleged adequate market power in the relevant market. However, market power alone cannot be sufficient to show the potential for genuine adverse effects on competition. In *FTC v. Indiana Federation of Dentists, 476 U.S. 447, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*, the case from which the Eleventh Circuit drew its test, see *Levine, 72 F.3d at 1551*, the Supreme Court never stated that market power alone could establish the potential for genuine adverse effects on competition. Rather, because the Court **[**15]** found "actual, sustained adverse effects on competition," there was no need for additional inquiry into market power. *476 U.S. at 460-61*. Similarly, in an earlier case on vertical price restraints in this circuit, we noted that market power would not be enough to state a Section One claim under the rule of reason:

> The burden of proving unreasonable effects in a rule of reason case rests with the antitrust plaintiff. Therefore, [the plaintiff], after crossing the threshold of showing [the defendant's] market power, was required to establish that the interbrand market structure was such that intrabrand competition was a critical source of competitive pressure on price, and hence of consumer welfare.

Graphic Prods. Distribs., Inc. v. Itek Corp., 717 F.2d 1560, 1573 (11th Cir. 1983) (internal citations and punctuation omitted). Other courts of appeals have reached the same conclusion and required specific allegations linking market power to harm to competition in that market. As the Second Circuit recently stated:

> Even assuming this market share data implies that [the defendant] possessed market power, [the plaintiff] still **[**16]** would fail to satisfy its burden under the adverse-effect requirement. Market power, while necessary to show adverse effect indirectly, alone is insufficient. A plaintiff seeking to use market power as a proxy for

---

[3] We also note that the market for Spanish-language radio advertising is not limited to two competitors, as the argument by SBS implies. According to the numbers provided by SBS to the district court, some 26 of the market is not controlled by either HBC or SBS. That 26 includes the 10 market share belonging to Entravision, which is one-third owned by Univision, HBC's new merger partner. SBS made these factual allegations at the hearing on the motion to dismiss before the district court. Tr. at 20-23. See also supra note 1 (explaining the district court's consideration of allegations made at the hearing on the motion to dismiss).

> adverse effect must show market power, plus some other ground for believing that the challenged behavior could harm competition in the market, such as the inherent anticompetitive nature of the defendant's behavior or the structure of the interbrand market.

Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 97 (2d Cir. 1998) (citations omitted); see also *Dickson, 309 F.3d at 205-07*.

[*1074] In this case, SBS has not described how the defendants' alleged behavior would be likely to harm competition. In fact, as the district court noted, SBS has expanded considerably over the past few years, has a share of the New York, Chicago and Miami markets somewhat comparable to that of HBC, and was itself engaged in merger talks with HBC. By its own admission, advertisers continue to shift larger portions of their budget toward the Spanish-language market as that market grows. SBS admitted that consumers currently pay less for Spanish-language advertising **[**17]** than they might in the absence of CC's activities. Given these alleged facts, [4] and in the absence of specific allegations detailing the threat to the Spanish-language advertising market, SBS did not state a claim for relief against CC or HBC under Section One, and the district did not err in dismissing the Section One claims of the First Amended Complaint.

II. *Sherman Act Section Two*

Section Two of the Sherman Act provides:

> ***HN7***[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . . .

15 U.S.C. § 2. Thus, ***HN8***[] Section Two makes it a crime to monopolize, to attempt to monopolize, or to conspire to monopolize any part of interstate or foreign trade. This provision covers behavior by a single business as well as coordinated **[**18]** action taken by several businesses.

The First Amended Complaint alleged only ***HN9***[] attempted monopolization, which involves three distinct elements: "(1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, 506 U.S. at 456*.

HN10[] Like claims under Section One, Section Two claims require harm to competition that must occur within a "relevant", that is, a distinct market, with a specific set of geographical boundaries and a narrow delineation of the products at issue. See *U.S. Anchor Mfg. v. Rule Indus., 7 F.3d 986, 995 (11th Cir. 1993)* ("Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability--actual or potential--to take significant amounts of business away from each other."). [5] Under Section One, this "relevant market" must have been harmed by an unreasonable restraint on trade, *L.A. Draper & Son v. Wheelabrator-Frye, Inc., 735 F.2d 414, 421 (11th Cir. 1984)*, while under Section Two, the alleged monopolist **[**19]** must possess enough power or potential power in this "relevant market" in order to harm competition. *Morris Communications Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1293-94 (11th Cir. 2004)*. As noted above, SBS explained that it considered the relevant market to be advertising purchased in the top ten Spanish-language markets and that HBC earned 51% of the advertising revenue in that market.

[*1075] We first address the allegations as they pertain to CC. There is no question that CC does not participate in the Spanish-language radio market. Thus, CC cannot attempt to monopolize that market. See *Aquatherm, 145 F.3d at 1261* (rejecting an attempted monopolization claim against a defendant who did not compete in the relevant market). SBS attempts to overcome this hurdle by pointing out that CC owns **[**20]** 26% of HBC, implying that this

---

[4] See Amended Complaint P 12; Tr. at 20-23, 34-38.

[5] Many antitrust cases turn on the precise definition of this market, as defendants contest whether they possess market power or whether the restraint at issue affected the market as a whole.

either makes CC an effective participant in the relevant market or at least gives CC sufficient control over HBC to permit attempted monopolization. We reject this contention. Absent allegations of significant control over the policies of a subsidiary, a minority ownership share does not convert a parent corporation into a competitor. In Caribbean Broadcasting, a case heavily relied upon by SBS, the D.C. Circuit specifically rejected a claim against a parent corporation grounded upon a 27% ownership interest in the plaintiff's direct competitor. *148 F.3d at 1088*. As the court noted, ***HN11***[] "one company's minority ownership interest in another company is not sufficient by itself to make the owner a competitor, for purposes of the antitrust laws, of the subsidiary's rivals. To be a competitor at the level of the subsidiary, the parent must have substantial control over the affairs and policies of the subsidiary." Id.

Although the complaint alleges that CC has "veto power" over HBC merger and stock decisions, the complaint contains no allegations with respect to control over day-to-day operations or general corporate policies. [6] In fact, **[**21]** the (sealed) Second Amended Complaint contains factual allegations inconsistent with that level of influence. SBS has pointed to no case in which a minority shareholder can attempt to monopolize a market on behalf of its subsidiary, nor can we locate one. Thus, the only Section Two claim available against CC might be conspiracy to monopolize, which was not raised in the First Amended Complaint. [7] Accordingly, because CC does not participate in the relevant market, SBS's attempted monopolization claim against CC was properly dismissed.

[22]** We therefore turn to the attempted monopolization claim against HBC. ***HN12***[] The first element of this claim requires a plaintiff to allege facts that show that the defendant has engaged in predatory or anticompetitive conduct. This anticompetitive conduct criterion captures the critical antitrust idea of harm to competition, rather than to competitors. "Regardless of the defendant's power or intent, its conduct may be incapable of producing monopoly, and thus unable to satisfy the attempt requirement." Areeda & Hovenkamp, IIIA ***Antitrust Law*** P 806 (2002). In fact, "the conduct requirement is arguably the single most important aspect" of attempted monopolization. *Northeastern Tel. Co. v. Am. Tel. & Tel. Co., 651 F.2d 76, 85 (2d Cir. 1981)*.

HN13[] As with Section One claims, conduct that injures individual firms rather than competition in the market as a whole does not violate Section Two. The Supreme **[*1076]** Court has explained that "even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993).* **[**23]** In this circuit, we have affirmed a directed verdict on an attempted monopolization claim in part because the plaintiff "failed to demonstrate any cognizable anticompetitive effect of [the defendant's] unfair competition." *Mfg. Research Corp. v. Greenlee Tool Co., 693 F.2d 1037, 1043 (11th Cir. 1982)*. We noted that "our cases have recognized that injury to a competitor need not always result in injury to competition. The use of unfair means resulting in the substitution of one competitor for another without more does not violate the antitrust laws." Id. Similarly, the Ninth Circuit upheld the dismissal of an attempted monopolization claim for failure to state a claim because the complaint merely alleged an attempt to eliminate two firms from the market rather than injury to competition:

> Nowhere in their AFA complaint, however, do appellants allege injury to the competitive market for PB [polybutylene]. Instead, they allege that the actions between Shell Oil defendants and their overseas affiliates "were taken for the purpose of eliminating [appellants] as representatives of Shell Chemical and as sellers of PB and PB-related products, and for the financial **[**24]** benefit of defendant Shell Chemical and the parties acting in concert with such defendant." Thus appellants fail to state an antitrust claim based on defendants' conduct with respect to PB and PB-related products. It is injury to the market or to competition in general, not merely injury to individuals or individual firms that is significant.

---

[6] The complaint notes that the Department of Justice considered the two companies "sufficiently related" so as to block the transfer of radio stations. This does not imply control over day-to-day operations. Similarly, the allegation that CC executives acted "on behalf of HBC" may imply an agreement or conspiracy but not control such that CC should be considered a participant in the market.

[7] Moreover, even if SBS had alleged sufficient control over HBC by CC to state a claim for attempted monopolization by CC, this would not have cured the complaint's failure to allege harm to competition rather than harm to SBS alone.

McGlinchy v. Shell Chem. Co., 845 F.2d 802, 812-13 (9th Cir. 1988); see also Joseph Bauer & William H. Page, II Kintner's Federal ***Antitrust Law*** P 14.35 (2002) (noting that "practices that harm other firms without harming competition . . . cannot constitute unlawfully exclusionary conduct in the attempt context.")

Careful examination of the First Amended Complaint reveals no allegations of anticompetitive conduct that could sustain a claim under Section Two. With respect to HBC, SBS alleges that HBC leveraged its relationship with CC to obtain preferential treatment from auditors and investors, discouraged analysts and investors from dealing with SBS, misrepresented the state of SBS's finances in order to adversely affect SBS's stock price, and engaged in a bidding war with SBS over a Los Angeles radio station. **[**25]** As with the Section One claims, SBS essentially urges us to equate harm to it with harm to competition as a matter of law. We do not believe the law supports this proposition. While some of these specific practices might be characterized as unsavory, or even illegal under other laws, [8] **[**26]** they do not give rise to a federal antitrust claim without factual allegations specifically addressing how these practices have harmed competition. As the Supreme Court has stated, ***HN14***[] the antitrust laws "do not create a federal law of unfair competition or purport to afford remedies for all torts committed by or against persons engaged in interstate commerce." *Brooke Group, 509 U.S. at 225* (internal quotation marks omitted). Because SBS has not alleged any harm to competition in the market, nor explained how any of the actions taken by HBC **[*1077]** could lead to monopolization of that market, SBS has not alleged anticompetitive conduct and thus has not stated a claim against HBC under Section Two. [9]

III. The Second Amended Complaint

Following the dismissal of its amended complaint with prejudice, SBS filed a motion for reconsideration along with a proposed Second Amended Complaint. The court conducted a "careful review of the proposed Second Amended Complaint" and concluded that SBS "cannot allege facts to survive dismissal." Order of Aug. 6, 2003, at 3 n.3 & 5. The court therefore denied the motion.

HN15[] We review the denial of leave to amend for abuse of discretion. *Long v. Satz, 181 F.3d 1275, 1278 (11th Cir. 1999)*; *O'Neal v. Kennamer, 958 F.2d 1044, 1047 (11th Cir. 1992)*. ***HN16***[] Under the Federal Rules of Civil Procedure, leave to amend "shall be freely given when justice so requires." *Fed. R. Civ. P. 15(a)*. The Supreme Court has emphasized that leave to amend must be granted absent **[**27]** a specific, significant reason for denial:

> In the absence of any apparent or declared reason - such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc.--the leave sought should, as the rules require, be freely given.

Foman v. Davis, 371 U.S. 178, 182, 9 L. Ed. 2d 222, 83 S. Ct. 227 (1962) (internal quotation marks omitted). In this circuit, these "same standards apply when a plaintiff seeks to amend after a judgment of dismissal has been entered by asking the district court to vacate its order of dismissal pursuant to *Fed. R. Civ. P. 59(e)*." *Thomas v. Town of Davie, 847 F.2d 771, 773 (11th Cir. 1988)*. The district court found that the proposed amendments were futile because the Second Amended Complaint still failed to state a claim. Our review of the denial of leave to amend therefore turns on our assessment of whether the proposed complaint indeed failed to state a claim for relief.

As with the First Amended Complaint, **[**28]** ***HN17***[] we must accept the facts pleaded in the proposed Second Amended Complaint as true and construe them in the light most favorable to the plaintiffs. An antitrust complaint need only meet an "exceedingly low" threshold of sufficiency in order to state a claim for relief and survive a motion to dismiss. *Covad Communications Co. v. BellSouth Corp., 299 F.3d 1272, 1279 (11th Cir. 2002)*, vacated on other

[8] We need not decide whether any of these alleged practices would give rise to state law claims. We merely note that they do not automatically give rise to an antitrust claim.

[9] As with the Section One claims, SBS also argues that, as the principal competitor of HBC in the market, harm to it inherently constitutes harm to competition. For the reasons stated in the previous section, we reject this argument.

grounds by *157 L. Ed. 2d 1040, 124 S. Ct. 1143 (Jan. 20, 2004)*. Of course, "we must not . . . assume plaintiffs can prove facts not alleged or that defendants have violated the antitrust laws in ways not alleged." *Quality Foods, 711 F.2d at 995*. Moreover, even in our liberal pleading regime, antitrust plaintiffs must allege facts in support of each element of an antitrust violation:

> The Supreme Court has indicated that a complaint should not be dismissed unless it is found to be wholly frivolous. . . . This is not to say that liberal pleading requirements negate the need to draft an antitrust complaint in a careful and thoughtful fashion. An antitrust complaint must comprehend a so-called prima facie case, and enough data must be pleaded so that each **[**29]** element of the **[*1078]** alleged antitrust violation can be properly identified. Conclusory allegations that defendant violated the antitrust laws and plaintiff was injured thereby will not survive a motion to dismiss if not supported by facts constituting a legitimate claim for relief. However, the alleged facts need not be spelled out with exactitude, nor must recovery appear imminent.

Id. (citations and internal quotation marks omitted). With these principles in mind, we turn to the allegations of the proposed Second Amended Complaint, which, in addition to the claims discussed above, contains the further claim that HBC and CC conspired to monopolize the market for Spanish-language radio advertising in violation of *Section Two of the Sherman Act*. [10]

[30]** ***HN18***[] Conspiracy under Eleventh Circuit law requires (1) an agreement in restraint of trade (2) deliberately entered into with the specific intent of achieving a monopoly (3) which could have had an anticompetitive effect and (4) at least one overt act in furtherance of the conspiracy. *U.S. Anchor, 7 F.3d at 1001*. As with the Section One allegations in the first complaint, we agree with the district court that SBS has not alleged facts that would support a finding of "anticompetitive effect" in the relevant market. That is, we still do not believe that SBS has alleged facts sufficient to support a finding of harm to competition.

In dismissing the previous complaint with prejudice, the district court noted that "the Plaintiff has amended its complaint once already. The Court gave the Plaintiff extensive time to address the injury to competition element at oral argument. Still, SBS could only provide one vague and conclusory allegation of injury to general competition." Order of Jan. 31, 2003, at 21. SBS now argues that it has added language sufficient to overcome this finding by including specific references to "injury to competition." We disagree.

Careful review of the **[**31]** proposed complaint reveals only two general, conclusory statements about current injury to competition. [11] The complaint states that "Defendants' **[*1079]** exploitation of their dominance of those markets has caused injury to competition by limiting alternatives available to advertisers, performers and the

---

[10] In its original order, the district court denied a previous request by SBS to amend the complaint and add a conspiracy allegation after finding that a non-participant in the market could not conspire with a participant. The court relied upon our statement in Aquatherm that "equally fatal to Aquatherm's conspiracy allegation is the fact that no authority exists holding a defendant can conspire to monopolize a market in which it does not compete." *145 F.3d at 1262 n.4*. However, in Aquatherm the plaintiffs did not name (or even identify) the alleged co-conspirators who participated in the relevant market. In this case, SBS alleges a conspiracy between HBC, a clear market participant, and CC. Nothing in our case law suggests that a conspiracy must be limited solely to market participants so long as the conspiracy also involves a market participant and the non-participant has an incentive to join the conspiracy. Cf. *Spectators' Communication Network, Inc. v. Colonial Country Club, 253 F.3d 215, 222 (5th Cir. 2001)* ("We conclude that there can be sufficient evidence of a combination or conspiracy when one conspirator lacks a direct interest in precluding competition, but is enticed or coerced into knowingly curtailing competition by another conspirator who has an anticompetitive motive."). In its brief, CC correctly points out that Spectators involved a group boycott with multiple conspirators, thereby giving the non-participant defendant the power to injure the plaintiff. Appellee CC Br. at 18-19. However, the case turned upon the ability and motive of the defendant to injure the plaintiff (and competition in general), not whether that power came from more than one co-conspirator.

[11] The proposed complaint adds significant detail to the allegations of unsavory behavior by CC and HBC described in the First Amended Complaint as well as additional detail on the market for Spanish-language radio advertising. Largely because of this detail, the proposed complaint remains under seal. We therefore do not describe these additional factual allegations with specificity.

listening audience." Proposed Compl. at P 108. The complaint also states that "[defendants'] conduct has and will continue to affect prices for advertisements, the quality of programming, and the prices for advertisers' products." Id. at P 112. We note that neither statement claims that prices have actually risen or that the quantity of available Spanish-language advertising time has actually decreased. Nor is it clear what is meant by "limiting alternatives." Neither of these statements alleges actual harm to competition.
