In light of that reality, the FTC's decisions to close the investigations into Facebook's acquisitions do not provide a basis to grant the company's Motion. The Commission could have decided to close the investigations for many reasons, and it would be improper to draw a merits conclusion about the legality of the mergers on the basis of those decisions, especially at the motion-to-dismiss stage. Cf Steves & Sons, Inc. v. JELD-WEN, Inc., 988 F.3d 690, 713-14 (4th Cir. 2021) (affirming district **[**50]** court's exclusion of evidence relating to Department of Justice's investigation of merger without challenging it and holding that Department's "decision not to pursue the matter isn't probative as to the merger's legality because many factors may motivate such a decision, including the Department's limited resources").

In sum, the Court concludes that Count I of the Amended Complaint adequately alleges both elements of the offense of unlawful monopoly maintenance under Section 2 of the Sherman Act: (1) Facebook's monopoly power in the market for PSN services; and (2) the company's willful maintenance of that power via anticompetitive acquisitions. See Microsoft 253 F.3d at 50.

2. *Count II*

That leaves Count II, which alleges that Facebook "has willfully maintained its monopoly power through its course of conduct that includes both anticompetitive acquisitions and its anticompetitive conditional dealing practices, and maintaining and enforcing anticompetitive agreements relating to Facebook Platform to deter competitive threats to its personal social networking monopoly." Redacted Am. Compl., ¶ 238 (emphases added). Primarily relying on the Court's first Opinion, Defendant urges dismissal of this count.

Because the prior Opinion's **[**51]** lengthy discussion of Plaintiff's challenges to the Platform policies forms the backdrop for the **[*58]** instant dispute, it is worth briefly reviewing the key points of that decision. In its initial Complaint, the FTC alleged the following:

> Facebook adopted and enforced a number of anticompetitive policies governing the use of its [application programming interfaces]. Most prominently, in 2013 it announced a policy of refusing to allow third-party, freestanding apps . . . to access those APIs if they replicate[d] [Facebook's] core functionality — *i.e.*, if they competed with Facebook Blue. Facebook then enforced that policy against a number of freestanding apps, revoking API permissions after having previously offering them access.

*Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *14* (internal quotation marks and citations omitted). The Court sided with the company, however, and explained that these allegations did not provide "a viable basis for an injunction under Section 13(b) of the FTC Act." Id. That holding was buttressed by three conclusions: (1) "Facebook's general policy of refusing to provide API access to its competitors does not itself violate *Section 2*"; (2) "although specific instances in which Facebook revoked a competitor's API permissions **[**52]** (after previously providing it access) might have violated *Section 2*, the last alleged instance occurred in 2013, so there is no way in which Facebook 'is violating' or 'is about to violate' the antitrust laws, which is a necessary condition for an injunction under Section 13(b)"; and (3) "Plaintiff has failed to plead facts to support a 'conditional dealing' theory." Id. (citation omitted).

In response to the FTC's Amended Complaint, Facebook suggests that the Court should not even engage with the new allegations surrounding the Platform policies because Plaintiff was not invited to replead on that issue. See MTD at 33. Such a position is not without support. See *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *2* ("Regardless of whether the FTC can amend its Complaint to plausibly allege market power and advance this litigation, then, the conduct it has alleged regarding Facebook's interoperability policies cannot form the basis for *Section 2* liability."). The Court need not decide whether the FTC was allowed to replead these allegations, however, because in any event it has failed to successfully do so. Similarly, while the parties further dispute whether the Platform-related allegations are barred by the law of the case, the Court can sidestep any **[**53]** analysis of the technical elements of that doctrine. Regardless of whether the law of the case formally applies, the FTC has supplied no persuasive justification for departing from the sensible ethos that the doctrine embodies — *viz.*, for reaching a different result on the ultimate question of whether there is a "viable basis for an injunction under Section 13(b)." *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *14*; see *LaShawn A. v. Barry, 87 F.3d 1389, 1393, 318 U.S. App. D.C. 380 (D.C. Cir. 1996)* ("[T]he same issue presented a second time in the same case in the same court should lead to the same result.") (emphasis omitted).

In other words, the Court concludes that even if the Amended Complaint's new allegations satisfied the exacting requirements previously set forth for showing that a *Section 2* violation occurred at some point in the past, that would not be enough under Section 13(b). This is because, as the Court previously explained, "While it is possible that Facebook's implementation of th[ose] polic[ies] as to certain specific competitor apps may have violated *Section 2*, such finding would not change the outcome here: all such revocations of access occurred in 2013, seven years before this suit was filed, and the FTC lacks statutory authority to seek an injunction 'based on **[*59]** [such] long-past conduct.'" *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *2* (quoting *FTC v. Shire ViroPharma, Inc., 917 F.3d 147, 156 (3d Cir. 2019)*). Put **[**54]** differently, the Court held that "to the extent that Facebook's Platform-related conduct is actionable, it occurred nearly eight years ago, rendering an injunction under Section 13(b) unavailable as a matter of law." *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *8*.

Plaintiff has not put forth material new allegations requiring the Court to change tack on its Section 13(b) conclusion. As discussed at length in the prior Opinion, Section 13(b) allows the FTC to "bring suit in a district court of the United States to enjoin" allegedly unlawful conduct only where it has "reason to believe . . . that any person, partnership, or corporation is violating, or is about to violate, any provision of law enforced by the [FTC]." *15 U.S.C. § 53(b)*. ***HN19***[] Section 13(b) therefore contemplates only "relief that is prospective, not retrospective." *AMG Cap. Mgmt., LLC v. FTC, 141 S. Ct. 1341, 1348, 209 L. Ed. 2d 361 (2021)*; see *FTC v. Credit Bureau Ctr., LLC, 937*

F.3d 764, 774 (7th Cir. 2019) ("Section 13(b) serves a . . . forward-facing role: enjoining ongoing and imminent future violations."). It "does not permit the FTC to bring a claim based on long-past conduct without some evidence that the defendant 'is' committing or 'is about to' commit another violation." Shire ViroPharma, Inc., 917 F.3d at 156.

Here, as before, "the FTC cannot use 13(b) to challenge Facebook's Platform-related conduct because it has not pleaded that any actual Section 2 violation is **[**55]** ongoing or about to occur." Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *18. The closest the agency comes is its allegation that, "[h]aving suspended its anticompetitive platform policies [in December 2018] in response to anticipated public scrutiny, Facebook is likely to reinstitute such policies if such scrutiny passes." Redacted Am. Compl., ¶ 151. Astute readers will recognize that allegation as identical, word-for-word, to the one that the Court already deemed insufficient for purposes of Section 13(b). Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *18 (quoting Redacted Compl., ¶ 149). To be sure, the FTC now mentions an additional developer that was allegedly subject to the API restrictions in 2016, whereas the last such instance alleged in the initial Complaint was in 2013. Compare Redacted Am. Compl., ¶ 158(d), with Redacted Compl., ¶¶ 152-56. But that in no way affects the Court's previous conclusion that the FTC has not alleged that Facebook's enforcement of the Platform policies "is violating, or is about to violate, any provision of law enforced by the [FTC]." 15 U.S.C. § 53(b). Once again, the temporal gap between the complained-of conduct and this lawsuit is "fatal to the agency's claim for injunctive relief under Section 13(b) here . . . because it means that no actionable violation **[**56]** is either ongoing or about to occur." Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *18.

* * *

This conclusion requires resolution of one remaining issue with respect to Count II. As mentioned above, the count is not limited to Facebook's Platform policies; rather, the FTC combines its challenge to those policies with its allegations concerning the contested acquisitions. See Redacted Am. Compl., ¶¶ 238-40. (Count I, conversely, deals with only the acquisitions.) The agency contends that the Court thus may not dismiss Count II because "the Instagram and WhatsApp acquisitions form the basis for Count 2 as well as Count 1." Redacted FTC Opp. at 36. In other words, where a claim contains valid and invalid components, dismissal is not appropriate. It is certainly true that the acquisitions could be subject to Section **[*60]** 13(b); indeed, the Court previously held that "an injunction under Section 13(b) is a theoretically available remedy in a Section 2 challenge to long-ago mergers so long as the defendant still holds the purchased assets or stock, as is the case here," Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *23 — a proposition the company does not contest this time around. Compare MTD at 37-38 (arguing that Platform policies cannot be challenged under Section 13(b)), with id. at 20-33 (no mention **[**57]** of similar challenge to the acquisitions). The question therefore is what to do with Count II: should the Court dismiss the portion that encompasses challenges to the Platform policies, or must it allow the count to remain given its incorporation of the acquisitions?

The Court concludes that the latter is the better course, with an important caveat. ***HN20***[] Although the D.C. Circuit does not appear to have weighed in on the issue, a chorus of other courts has held that a "motion to dismiss under Rule 12(b)(6) doesn't permit piecemeal dismissals of parts of claims." BBL, Inc. v. City of Angola, 809 F.3d 317, 325 (7th Cir. 2015) (citation omitted). Rather, "the question at this stage is simply whether the complaint includes factual allegations that state a plausible claim for relief." Id.; see also, e.g., FTC v. Nudge, LLC, 430 F. Supp. 3d 1230, 1246 (D. Utah 2019) ("As many courts have recognized, parties may not use rule 12(b)(6) to dismiss only parts of a claim . . . . And because Defendants' asserted defenses do not dispose of the Division's claims in their entirety, those claims cannot be dismissed at this stage."); Redwind v. W. Union, LLC, No. 18-2094, 2019 U.S. Dist. LEXIS 118297, 2019 WL 3069864, at *4 (D. Or. June 21, 2019) (same and collecting cases). That conclusion flows from the plain language of Rule 12(b)(6), which permits a party to seek dismissal for "failure to state a claim upon which relief can be granted." See, e.g., Charles v. Front Royal Volunteer Fire and Rescue Dep't, Inc., 21 F. Supp. 3d 620, 629 (W.D. Va. 2014) ("A plain reading of Rule 12(b)(6) **[**58]** indicates that the rule may be used only to dismiss a 'claim' in its entirety.") (internal quotation marks and citation omitted); Doe v. Napa Valley Unified Sch. Dist., No. 17-3753, 2019 U.S. Dist. LEXIS 118297, 2018 WL 4859978, at *2 (N.D. Cal. Apr. 24, 2018) ("By its own terms, there does not appear to be any way to grant partial dismissal of a claim under Fed. R. Civ. P. 12(b)(6).") (internal quotation marks and citation omitted).

HN21[] In sum, at the motion-to-dismiss stage, once a court determines that a claim states a viable basis for relief, it cannot further parse out whether other portions of the claim would suffice on their own. Since the allegations relating to Facebook's acquisitions state a plausible claim for relief, even though the Platform-policy ones do not, Count II should not be dismissed.

Of course, "[s]ummary judgment is different." BBL, Inc., 809 F.3d at 325. In stark contrast to Rule 12(b)(6), Rule 56 "explicitly allow[s] for '[p]artial [s]ummary [j]udgment' and require[s] parties to 'identif[y] each claim or defense—or the part of each claim or defense—on which summary judgment is sought.'" Id. (quoting Fed. R. Civ. P. 56(a)). "At the summary-judgment stage, the court can properly narrow the individual factual issues for trial by identifying the material disputes of fact that continue to exist." Id. (emphasis omitted); see Nudge, 430 F. Supp. 3d at 1246 ("[I]f Defendants wish to challenge only parts of Plaintiffs' claims, such a challenge would be appropriate at summary judgment."). The Platform portion of Count **[**59]** II can thus be sliced out at summary judgment.

In the meantime, the Court will not award the FTC a discovery windfall for using Count II as a Trojan horse to smuggle in the Platform policies. Instead, **[*61]** it will not permit what would certainly be time-consuming and costly discovery on such policies. HN22[] "A trial court enjoys considerable discretion over discovery matters." TIG Ins. Co. v. Firemen's Ins. Co. of Washington, D.C., 718 F. Supp. 2d 90, 95 (D.D.C. 2010) (citing Friedman v. Bache Halsey Stuart Shields, Inc., 738 F.2d 1336, 1341, 238 U.S. App. D.C. 190 (D.C. Cir. 1984)). Here, in light of the Court's conclusion that the Platform-related allegations are legally infirm, there is no reason "that discovery should be allowed of information that has no conceivable bearing on the case." Food Lion, Inc. v. United Food & Com. Workers Int'l Union, AFL-CIO-CLC, 103 F.3d 1007, 1012, 322 U.S. App. D.C. 301 (D.C. Cir. 1997) (quoting 8 Wright, Miller & Marcus, Federal Practice and Procedure: Civil 2d § 2008 (1994)). Even if discovery fully corroborated Plaintiff's allegations about the Platform policies, there still would be no basis for a trial on that portion of Count II. While Facebook may argue that this is why dismissal is appropriate now, the Court does not read Rule 12(b)(6) to permit such a result. In any event, the discovery bar means that Facebook is not prejudiced by the Court's ruling. Such a determination is one that best balances judicial economy and the parties' time with fidelity to the Federal Rules of Civil Procedure. **[**60]**

C. Recusal of Chair Khan

Rebuffed on its frontal assault on the updated allegations, Facebook last assays a flanking maneuver. It requests that this Court either dismiss the Amended Complaint as "not properly authorized by the Commission" or require that the FTC address the merits of a petition that Defendant filed with the agency seeking the recusal of Chair Khan. See MTD at 40. The company contends that Khan's participation in the vote to authorize the Amended Complaint violated federal law given her extensive past work on antitrust issues involving major technology platforms, including "purported factual findings and legal conclusions to the effect that Facebook has violated Section 2 of the Sherman Act" in a Report of the House Judiciary Committee's Subcommittee on Antitrust, Commercial, and Administrative Law. See ECF No. 83-3 (Petition for Recusal) at 20.

Khan served as counsel to the Subcommittee and "led the congressional investigation into digital markets and the publication of [the] final report." Id. (citing to Lina M. Khan, Bio (link no longer active)). Among the report's conclusions were that Facebook had "monopoly power" in the "social networking market" and had acquired both Instagram and **[**61]** WhatsApp to further that market dominance. Id. at 11-12 (citing Majority Staff of H. Subcomm. on Antitrust, Com. & Admin. Law of the Comm. on the Judiciary, 116th Cong., Investigation of Competition in Digital Markets: Majority Staff Report and Recommendations, at 12, 13, 151, 154-55 (Oct. 2020)). Khan's academic and other writing prior to joining the FTC also addressed at length the question of whether certain platforms, including Facebook, are anticompetitive. These include tweets about the initial filing of this case. See, e.g., ECF No. 83-4 at 63-82 (Expert Declaration of Professor Daniel B. Rodriguez (Appendix of Statements by Chair Lina M. Khan)); Petition for Recusal, Exh. D at 76-78. The Court takes judicial notice of these publications, Defendant's Petition for Recusal, and statements of the agency relating to the Petition. See Washington Post v. Robinson, 935 F.2d 282, 291, 290 U.S. App. D.C. 116 (D.C. Cir. 1991) ("[C]ourt may take judicial notice of the existence of newspaper articles"); Connecticut v. Dep't of the Interior, 344 F. Supp. 3d 279, 306 n.23 (D.D.C. 2018) (court can "take judicial notice of . . . correspondence from the Department").

[*62] The FTC did not address the Petition's merits, but instead dismissed it as improperly filed since the Commission has no process for addressing the "disqualification or recusal of a Commissioner" **[**62]** other than when she is involved in either a rulemaking or an adjudication. See ECF No. 83-9 (Email from April J. Tabor, Office of the Sec'y, FTC, to Geoffrey M. Klineberg (Aug. 19, 2021)); see also Redacted FTC Opp. at 43. Because Khan was not recused, Facebook believes that the FTC did not properly make the decision through a vote of the Commission to "bring suit in a district court of the United States." *15 U.S.C. § 53(b)*. The FTC rejoins that the decision to dismiss the Petition was proper and that there was no need for Khan's recusal. The Court concurs.

Before addressing the specific legal arguments that the parties raise, the Court notes that Khan's vote to authorize the Amended Complaint hardly occurred on a blank slate. The FTC originally filed its Complaint in this case in December 2020, well before she joined the Commission in June 2021. See Redacted Compl.; FTC, Lina M. Khan Sworn in as Chair of the FTC, https://bit.ly/3JDleyK (June 15, 2021). When this Court dismissed the Complaint in June 2020, its Opinion expressly recognized that the FTC might well refile. *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *8* ("[t]o promote clarity and efficiency going forward in the event Plaintiff amends its Complaint"); *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *14* ("Whether and how the agency chooses **[**63]** to [replead] is up to it."). It was hardly surprising when the FTC did in fact replead, moving to file an Amended Complaint in August 2021. See ECF No. 76-2 (Unredacted Amended Complaint). Like the original Complaint, the FTC's authorization of the Amended Complaint came down to a 3-2 vote among the five Commissioners, this time with Khan among the three who voted to authorize. See FTC Alleges Facebook Resorted to Illegal Buy-or-Bury Scheme to Crush Competition After String of Failed Attempts to Innovate, https://bit.ly/3q8Ku76. Although the Court recognizes the importance of her vote, it is an exaggeration to treat Kahn as the sole instigator of the current case.

The Court also notes the unique circumstances in which the FTC operates as an agency that may bring suit, conduct rulemaking, and act as an adjudicator. In selecting a chair for a Commission with these diverse responsibilities — as with choosing the head of any agency — it is natural that the President will select a candidate based on her past experiences and views, including on topics that are likely to come before the Commission during her tenure, and how that administrator will implement the Administration's priorities. **[**64]** *Ass'n of Nat. Advertisers, Inc. v. FTC, 627 F.2d 1151, 1174, 201 U.S. App. D.C. 165 (D.C. Cir. 1979)* ("An administrator's presence within an agency reflects the political judgment of the President and Senate."). Courts must tread carefully when reviewing cases in this area lest we "eviscerate the proper evolution of policymaking were we to disqualify every administrator who has opinions on the correct course of his agency's future action." Id.

1. *Chair Khans Role*

Turning to the specific legal arguments, Facebook gets off on the wrong foot by asserting that "[b]inding D.C. Circuit precedent requires an FTC Commissioner's recusal where 'a disinterested observer' would 'conclude that [she] has in some measure adjudged the facts as well as the law of a particular case in advance.'" MTD at 40 (quoting *Cinderella Career Coll. & Finishing Schs., Inc. v. FTC, 425 F.2d 583, 591, 138 U.S. App. D.C. 152 (D.C. Cir. 1970)*). What Defendant fails to note is that both Cinderella Career Colleges **[*63]** and a similar out-of-Circuit case, *American Cyanamid Co. v. FTC, 363 F.2d 757, 763 (6th Cir. 1966)*, deal with an agency official adjudicating the merits of a case, not authorizing the filing of one. See Redacted FTC Opp. at 42.

In *American Cyanamid Co.*, then-FTC Chair Paul Rand Dixon had conducted work similar to Khan's because he had "played an 'active role' in an investigation by [a Senate] Subcommittee of many of the same facts and issues and of the same parties as are involved in this [FTC] proceeding, **[**65]** and participated in the preparation of the report of the Subcommittee on the same facts, issues and parties." *363 F.2d at 763, 767*. That case — unlike this one — involved "[t]he question of when a judicial officer is disqualified to sit in judgment in a particular case," *id. at 763* (emphasis added), not whether Dixon could have voted to authorize a suit filed in district court. Similarly, in Cinderella Career Colleges, then-Chair Dixon took part in the Commission's review and reversal of the decision of a hearing examiner. See *425 F.2d at 589*. ***HN23***[] Adjudication has its own unique ethical requirements; as a result, our Circuit has held that "the *Cinderella* standard is not applicable" to non-adjudicatory proceedings, and that courts "must not impose judicial roles upon administrators when they perform functions very different from those of judges." *Ass'n of Nat. Advertisers, 627 F.2d at 1154, 1168*. The FTC thus has the better of the argument that these cases are not relevant because it was not acting there as an adjudicatory body as provided under 15 U.S.C. § 45(b), but instead simply filing a case in federal court. Id. at § 53(b); see Redacted FTC Opp. at 42.

HN24[] To be sure, even when not acting as an adjudicator, an FTC Commissioner is not absolved of all ethical constraints. For instance, when a Commissioner is engaged **[**66]** in the rulemaking process, she should be disqualified when "there has been a clear and convincing showing that the agency member has an unalterably closed mind on matters critical to the disposition of the proceeding." Ass'n of Nat. Advertisers, 627 F.2d at 1170; see also Reply at 23. When considering potential prejudgment in the context of a rulemaking, however, courts have not generally objected to statements made "prior to the initiation of agency action" and have recognized that "[a]dministrators, and even judges, may hold policy views on questions of law prior to participating in a proceeding." Ass'n of Nat. Advertisers, 627 F.2d at 1173-74. Although Khan has expressed views on Facebook's monopoly status and even on this specific case before she joined the FTC, she "remained free, both in theory and in reality, to change h[er] mind upon consideration of" the suit given her new role and other factors. Id. at 1172; see also Consumers Union of U.S., Inc. v. FTC, 801 F.2d 417, 427, 255 U.S. App. D.C. 203 (D.C. Cir. 1986) (rejecting challenge to FTC Chairman's impartiality, as articulation of his "own considered position" "gives no indication of a mind that has been closed to the evidence in the past or that would disregard any significant new material subsequently introduced"). In any event, it is not clear that the same rulemaking standard would necessarily apply to an administrator's **[**67]** vote to authorize the filing of a lawsuit in federal court.

So what role does provide the best analogy for analyzing Chair Khan's actions in voting to file this case? The Court concludes it is that of a prosecutor. **HN25**[] "[T]he standards of neutrality for prosecutors are not necessarily as stringent as those applicable to judicial or quasi-judicial officers. . . . [, and they] may require a stronger showing for a prosecutor than a judge in order to conclude that a conflict of **[*64]** interest exists." Young v. U.S. ex rel. Vuitton et Fils S.A., 481 U.S. 787, 810-11 (1987), 107 S. Ct. 2124, 95 L. Ed. 2d 740. In particular, given prosecutors' duties, they "are necessarily permitted to be zealous in their enforcement of the law." Marshall v. Jerrico, Inc., 446 U.S. 238, 248, 100 S. Ct. 1610, 64 L. Ed. 2d 182 (1980). Of course, this does not waive prosecutors' ethical obligations, as they "too must serve the public interest," and their behavior is not "immunize[d] from judicial scrutiny in cases in which the enforcement decisions of an administrator were motivated by improper factors or were otherwise contrary to law." Id. at 249. Facebook maintains that this is just such a case, in that Khan has "an 'axe to grind' against the defendant or [is] not otherwise impartial" given the views articulated in her past work. See MTD at 43 (quoting Wright v. United States, 732 F.2d 1048, 1056 (2d Cir. 1984)).

Although Khan has undoubtedly expressed views about Facebook's **[**68]** monopoly power, these views do not suggest the type of "axe to grind" based on personal animosity or financial conflict of interest that has disqualified prosecutors in the past. See, e.g., Wright, 732 F.2d at 1055 ("appearance of impropriety" found because prosecutor's wife was both "a political opponent of [the defendant's]" and had, among other actions, brought multiple "complaints to federal authorities [about the defendant] that could have resulted in criminal charges against him . . . and who almost certainly harbored personal animosity against [the defendant]"); State v. Snyder, 256 La. 601, 605, 237 So. 2d 392 (1970) (requiring recusal of district attorney who expressed views in mayoral campaign that "relator was guilty of criminal offenses"); State v. Hohman, 138 Vt. 502, 505, 420 A.2d 852 (1980), overruled on other grounds by Jones v. Shea, 148 Vt. 307, 532 A.2d 571 (1987) (defendant prejudiced at plea-bargaining stage as state's attorney's advertisement during campaign stated that he would "vigorously prosecute [defendant] and obtain a second conviction" because past conviction improperly overturned). Here, there is no allegation that Khan has a personal animosity against Facebook beyond her own views about ***antitrust law***, nor does she have a financial conflict of interest. Rather, her situation is more analogous — although not a perfect fit — to one **[**69]** in which an individual has "simultaneous involvement in investigative and prosecutorial aspects of federal enforcement proceedings." In re Perlin, 589 F.2d 260, 265 (7th Cir. 1978) (quoting United States v. Dondich, 460 F. Supp. 849, 856 (N.D. Cal. 1978)). This has not been found "to present the kind of conflict of interest" from which prosecutors are barred. Id.

The very caselaw on which Defendant relies makes clear that, "[o]f course, a prosecutor need not be disinterested on the issue [of] whether a prospective defendant has committed the crime with which he is charged. . . . **HN26**[] True disinterest on the issue of such a defendant's guilt is the domain of the judge and the jury — not the prosecutor." Wright, 732 F.2d at 1056. There is no indication that Chair Khan's decision to seek reinstatement of the FTC's suit against Facebook was based on anything other than her belief in the validity of the allegations. Such behavior does not necessitate recusal.

2. *Other Ethical Issues*

Facebook also contends that Khan's behavior independently violated federal ethics rules — namely, 5 C.F.R. § 2635.501(a), which instructs a federal employee "to avoid an appearance of loss of impartiality in the performance of [her] official duties" by not participating in "a particular matter involving specific parties **[*65]** which [s]he knows is likely to affect the financial **[**70]** interests of a member of h[er] household, or in which [s]he knows a person with whom [s]he has a covered relationship is or represents a party, if [s]he determines that a reasonable person with knowledge of the relevant facts would question [her] impartiality in the matter." Id; see also 5 C.F.R. § 2635.101(b)(14) ("Employees shall endeavor to avoid any actions creating the appearance that they are violating the law or the ethical standards set forth in this part."); Reply at 24.

Here, there is no indication that this case would affect "the financial interests of a member of [Khan's] household" or that an individual with whom she has a covered relationship is involved in the case. To the extent that Facebook is making an appearance-of-impropriety argument, the Court believes that its above discussion lays that to rest. Although Khan has worked extensively on matters relating to antitrust and technology, including expressing views about Facebook's market dominance, nothing the company presents suggests that her views on these matters stemmed from impermissible factors. Indeed, she was presumably chosen to lead the FTC in no small part because of her published views. The Court thus concludes that Khan's participating **[**71]** in the FTC's vote did not violate ethical rules; as a result, the Amended Complaint was properly authorized.

IV. Conclusion

For the foregoing reasons, the Court will deny Facebook's Motion to Dismiss. A separate Order so stating will issue this day.

/s/ James E. Boasberg

JAMES E. BOASBERG

United States District Judge

Date: January 11, 2022

ORDER

For the reasons set forth in the accompanying Memorandum Opinion, the Court ORDERS that:

1. Defendant's Motion to Dismiss is DENIED; and
2. Defendant shall file its Answer to Plaintiff's Amended Complaint by January 25, 2022.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN1[] **Conspiracy to Monopolize, Sherman Act**

The Texas Free Enterprise and Antitrust Act, Tex. Bus. & Com. Code Ann. §§ 15.01-15.22, provides that it shall be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes. Tex. Bus. & Com. Code Ann. § 15.05(a) is comparable to, and indeed taken from 15 U.S.C.S. § 1. The United States Supreme Court has held that to survive a motion for summary judgment, a plaintiff seeking damages for a violation of § 1 must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN2[] **Trade Practices & Unfair Competition, State Regulation**

The Texas Antitrust Act's (Act) stated purpose is to maintain and promote economic competition in trade and commerce in the state and to provide the benefits of that competition to consumers. Tex. Bus. & Com. Code Ann. § 15.04. To the extent consistent with that purpose, the Act's provisions should be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] **Public Enforcement, State Civil Actions**

Tex. Bus. & Com. Code Ann. § 15.05(a) states that every contract, combination, or conspiracy in restraint of trade or commerce is unlawful. Tex. Bus. & Com. Code Ann. § 15.21 authorizes any person whose business or property has been injured by a violation of § 15.05 to sue for damages and injunctive relief.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN4[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Like the language of its federal counterpart, the broad language of Tex. Bus. & Com. Code Ann. § 15.05(a) indicates that every conspiracy in restraint of trade is unlawful. Yet the United States Supreme Court has, since its earliest decisions, recognized that 15 U.S.C.S. § 1 was intended to prohibit only unreasonable restraints of trade. Some kinds of conspiratorial agreements—a horizontal agreement to fix prices—are considered per se illegal. Most, however, are evaluated on a case-by-case basis under the rule of reason, which requires the court to determine whether a restraint is unreasonable by examining a defendant's purpose in implementing the restraint and the restraint's effect on competition as well as all factors relevant to that examination.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN5[] **Regulated Practices, Price Fixing & Restraints of Trade**

Tex. Bus. & Com. Code Ann. § 15.21 authorizes any person whose business or property has been injured by reason of any conduct declared unlawful under Tex. Bus. & Com. Code Ann. § 15.05 to sue for damages or injunctive relief.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN6[] Conspiracy to Monopolize, State Regulation

When an appeal arises from a summary judgment for a party, the lower courts' judgments are reviewed de novo, taking as true all evidence favorable to the mother party and indulging every permissible inference in its favor. But when federal ***antitrust law*** guides construction of the Texas Free Enterprise and Antitrust Act, Tex. Bus. & Com. Code Ann. §§ 15.01-15.22, examination of the evidence must also take into account federal caselaw limiting what inferences are reasonable when the plaintiff's evidence is ambiguous and the alleged conspiracy is not plausible.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] Sherman Act, Claims

For anticompetitive conduct to give rise to liability under 15 U.S.C.S. § 1 or Tex. Bus. & Com. Code Ann. § 15.05(a), of the Texas Antitrust Act, the conduct must stem from an agreement, tacit or express, rather than from independent action. Because ***antitrust law*** does not prohibit unreasonable restraints of trade as such—but only restraints effected by a contract, combination, or conspiracy—it leaves untouched a single firm's anticompetitive conduct (short of threatened monopolization) that may be indistinguishable in economic effect from the conduct of two firms. Thus, ***antitrust law*** generally distinguishes between unilateral and multilateral conduct, treating multilateral conduct as the more dangerous and more likely to warrant judicial intervention. In the federal context, challenges to multilateral conduct are brought under § 1 of the Sherman Act (the federal analogue to § 15.05(a)), and challenges to unilateral conduct are brought under 15 U.S.C.S. § 2 (the federal analogue to § 15.05(b)).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] Per Se Rule & Rule of Reason, Per Se Violations

Because a 15 U.S.C.S. § 1 claim challenges multilateral conduct, its very essence is the existence of an agreement. Indeed, the relevant danger or activity that warrants § 1 scrutiny is the sudden joining of two independent sources of economic power previously pursuing separate interests. After a plaintiff establishes the existence of an illegal contract or combination, it must then proceed to demonstrate that the agreement constituted an unreasonable restraint of trade either per se or under the rule of reason. However, the question whether an arrangement is a contract, combination, or conspiracy is different from and antecedent to the question whether it unreasonably restrains trade.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Burden Shifting

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

With rare exceptions, courts use a three-step, burden-shifting framework to evaluate 15 U.S.C.S. § 1 claims under the rule of reason. First, the plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. Second, if the plaintiff succeeds, the burden shifts to the defendant to establish the pro-competitive redeeming virtues of the action. Third, should the defendant carry this burden, the plaintiff must then show that the same pro-competitive effect could be achieved through an alternative means that is less restrictive of competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

Business & Corporate Compliance > ... > Contract Formation > Acceptance > Meeting of Minds

Evidence > Inferences & Presumptions > Inferences

HN10[] **Conspiracy to Monopolize, Elements**

A 15 U.S.C.S. § 1 agreement may be found when the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. Such proof may come in the form of direct evidence, e.g., an explicit admission from a participant that an antitrust conspiracy existed, or circumstantial evidence. Whether a factfinder can properly infer the existence of an agreement or conspiracy from ambiguous or circumstantial evidence will vary with the plausibility of the plaintiffs' theory and the dangers associated with such inferences.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] **Sherman Act, Claims**

With regard to antitrust actions, courts should not permit factfinders to infer conspiracies when such inferences are implausible because the effect of such practices is often to deter procompetitive conduct. If the factual context of the alleged conspiracy renders the plaintiff's claim implausible—if the claim is one that simply makes no economic sense—the plaintiff must come forward with more persuasive evidence to survive a motion for summary judgment than would otherwise be necessary. More evidence is required the less plausible the charge of collusive conduct. A corollary to this rule is that conduct that is just as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN12[] **Entitlement as Matter of Law, Genuine Disputes**

The absence of any plausible motive to engage in the conduct charged is highly relevant to whether a genuine issue for trial exists.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN13[] **Motions to Dismiss, Failure to State Claim**

In order to survive a motion to dismiss under Fed. R. Civ. P. 12(b)(6), a plaintiff's conspiracy allegations must be plausible on their face.

Civil Rights Law > Protection of Rights > Conspiracy Against Rights > Elements

HN14[] **Conspiracy Against Rights, Elements**

Parallel business conduct, even if consciously undertaken, is ambiguous: it is just as consistent with conspiracy as with competitive actions unilaterally prompted by common perceptions of the market. At the summary judgment stage evidence of ambiguous conduct is not enough; rather, a 15 U.S.C.S. § 1 plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Business & Corporate Law > ... > Meetings & Voting > Voting Shares > Proxy Agreements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN15[] **Conspiracy to Monopolize, Elements**

With regard to antitrust actions, caselaw teaches that (1) parallel business conduct, alone, is insufficient to raise a fact issue on the existence of a conspiracy; (2) when the conspiracy alleged is implausible, more persuasive evidence will be required to survive summary judgment; and (3) the plaintiff's evidence must tend to exclude the possibility that the defendants acted independently. Lower federal courts have fleshed out these principles by requiring plaintiffs who base their claim on consciously parallel business behavior to demonstrate the existence of plus factors. These factors serve as proxies for direct evidence of an agreement. There is no definitive list of plus factors, but the following have been listed: (1) actions that would be against the defendants' self-interest if the defendants were acting independently, but consistent with their self-interest if they were acting in concert; (2) a motive to conspire; (3) an opportunity to conspire; (4) market concentration and structure conducive to collusion; (5) pretextual explanations for anticompetitive conduct; (6) sharing of price information; (7) signaling; and (8) involvement in other conspiracies. A plausible allegation that the parallel conduct was not in the alleged conspirators' independent self-interest absent an agreement is generally considered the most important plus factor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN16[] **Conspiracy to Monopolize, Elements**

A court's task in evaluating the propriety of summary judgment is to view all the evidence and take the plus factors into consideration and determine if the evidence tips the scales in favor of a conspiracy by tending to exclude the possibility that the alleged coconspirators acted independently or based upon legitimate business purposes. The quantum of evidence required to exclude the possibility of independent action or legitimate business purposes is directly related to the plausibility of the plaintiff's theory. If the plaintiff advances a strong, plausible theory then the quantum of evidence tending to exclude independent action is not as great as if the plaintiff advances a weak or implausible theory. Likewise, when there is a risk that the threat of antitrust liability will chill legitimate, procompetitive conduct by market participants, the quantum of evidence is also high.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN17[] **Private Actions, Sherman Act**

With regard to antitrust actions, one must not characterize a firm's sacrifice of short-run interest in favor of long-run interest as contrary to self-interest. Rather, the inquiry the first plus factor invites is whether the conduct at issue would be against the defendant's self-interest if it were acting independently, but consistent with the defendant's self-interest if it were acting in concert with another.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Inferences & Presumptions > Inferences

HN18[] **Conspiracy to Monopolize, Elements**

With regard to antitrust actions, allegations of general contacts or even specific contacts that are abstract or vague in nature are not enough to support a reasonable inference of conspiracy under federal law.

Opinion by: Nathan L. Hecht

Opinion

[*201] Respondents allege that petitioners conspired to restrain trade in the movie-theater market in violation of *Section 15.05(a)* of the Texas Free Enterprise and Antitrust Act ("Texas Antitrust Act").[1] ***HN1***[] The Act provides that it "shall be construed in harmony with federal judicial interpretations of comparable federal antitrust **[**2]** statutes".[2] "*Section 15.05(a)* is comparable to, and indeed taken from, *section 1 of the Sherman Antitrust Act*".[3] **[*202]** The United States Supreme Court has held that "[t]o survive a motion for summary judgment . . . , a plaintiff seeking damages for a violation of *§ 1* must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently."[4] The parties agree that this requirement governs in cases brought under the Texas Act; they disagree on its application in this case. The court of appeals held that respondents satisfied this requirement and reversed the trial court's summary judgment for petitioners.[5] We disagree and thus reverse and render judgment for petitioners.

I

A

AMC[6] and its competitor Regal[7] own the two largest movie-theater chains in North America, with hundreds of theaters each.[8] Both chains specialize in megaplexes—large theaters with 20 or more screens and traditional amenities such as popcorn, soft drinks, and candy.

iPic[9] owns a chain of boutique theaters in the United States. iPic's theaters—there were 13 at the time of the trial court proceedings, and around 15 today—offer an upscale experience with reclining seats situated in pods, full-service waitstaff, chef-prepared meals, **[**3]** and specialty cocktails. A "premium plus" ticket at an iPic theater costs more than twice the typical ticket at an AMC or Regal megaplex.

iPic alleges that starting in early 2013, AMC and Regal conspired to eliminate iPic from the markets in Houston and Frisco, just north of Dallas, by "clearing" a proposed iPic theater near Regal Greenway in central Houston and another near AMC Stonebriar in Frisco. iPic's allegations require an understanding of the film industry.

[7] By "Regal" we refer to Regal Entertainment Group.

[8] AMC and Regal are two-thirds of the "Big Three" U.S. movie-theater chains, the third being Cinemark.

[9] By "iPic" we refer to respondents iPic-Gold Class Entertainment, LLC and iPic Texas, LLC.

AMC, Regal, and iPic are movie *exhibitors*. Historically, exhibitors licensed movies from third-party *distributors*, which acted as liaisons between exhibitors and the production studios. Today, the six largest production studios—Walt Disney Studios, Warner Brothers Entertainment, 20th Century Fox, Paramount Pictures, Sony Pictures, and Universal Studios—act as their own distributors. But there remain independent distributors too, such as Lionsgate, Focus, the Weinstein Company, Bleeker Street, Broad Green, and Open Road Films.

Open Road is an independent distributor formed in 2011 as a joint venture between AMC and Regal. Open Road has since **[*203]** een sold, but at all times relevant to this lawsuit, it was owned by AMC and Regal, **[**4]** and executives of both companies sat on its board.

When theaters in close proximity show the same first-run (new release) film, they are playing the film *day-and-date*. To prevent playing day-and-date with a competitor, a theater can request that a film's distributor grant it a *clearance*—an exclusive license to show the film for a period of time. Clearance practices are traceable to the earliest days of the film industry. Because theaters had only a handful of screens, they could not play every first-run film available. Theaters nearby one another thus bid against each other to secure the exclusive license to play a particular film. In exchange for that exclusive license, a theater would pay the distributor a guaranteed sum and take responsibility for advertising and promoting the film in the area.

The parties disagree about what role clearances have played in the industry in more recent history. At a pretrial hearing in the trial court, iPic presented witness testimony that clearances began phasing out in the 1980s when distributors moved to an allocation system. Later, when megaplexes began sprouting up in the mid-1990s, allocating films was no longer necessary because a megaplex can **[**5]** play every first-run movie available.

Regal is no longer a party to this case, but its historical clearance practices are central to iPic's conspiracy allegations against AMC. Regal CEO Amy Miles testified that when she joined the company in 1999, Regal already had a general policy of seeking clearances against theaters in proximity to a Regal theater. Miles explained that Regal recognizes 70 clearance zones across the country in which Regal seeks clearances against any class of theater within three miles, and distributors therefore allocate first-run films between Regal and the theater nearby. In Houston, for example, Regal Greenway sought clearances against the River Oaks Theatre beginning in 1999 when the Greenway opened.[10]

In 17 of Regal's clearance zones, Regal clears a theater owned by AMC. In 15, one Regal theater clears another Regal theater. One example is a clearance zone in northern Virginia, where a 20-screen Regal theater clears one of Regal's smaller theaters that offers luxury amenities similar to those offered by iPic. Another example occurs in northwest Austin, where Regal's Gateway 16 does not play day-and-date with its Arbor 8 theater.

Miles **[**6]** testified that Regal believes clearances are beneficial to the entire film-industry ecosystem, including theaters and customers, because clearances ultimately facilitate more films being shown in a geographic area and for longer. Miles projected that without clearance zones, theaters would devote most of their screens to blockbusters, which would play through the theaters faster, resulting in less choice for consumers and less revenue for distributors and theaters.

Miles acknowledged, however, that Regal has made some exceptions to its three-mile policy over the years. Regal usually does not seek clearances in densely populated areas such as Manhattan, where a three-driving-miles rule of thumb does not make sense. Regal's clearance practices have also varied when it has acquired an existing theater. "[I]f we acquire a theater that didn't assert a clearance prior to the **[*204]** cquisition, we don't go back and try to change that, post-acquisition", Miles explained.

In 2008, Regal declined to clear a dine-in theater within its Redmond, Washington clearance zone that later became an iPic. In 2010, Regal declined to clear the iPic Austin, which opened less than three miles from Regal's Gateway **[**7]** 16 and Arbor 8 theaters. Miles testified that these exceptions to Regal's three-mile policy were tests

---

[10] The historic River Oaks Theatre opened in Houston's River Oaks District in 1939 and closed permanently in March 2021. The theater was a Houston landmark known for playing *The Rocky Horror Picture Show* on Saturdays.

conducted at the request of distributors to determine whether luxury theaters—then a new and innovative concept—would truly compete with traditional ones. There is conflicting evidence on what the data from the Redmond and Austin tests show, but Miles testified that once luxury theaters took off, Regal came around to viewing them as competitors to Regal's more traditional theaters.

B

Before 2012, AMC had never requested clearances against competing theaters. But that year it adopted its own corporate policy of requesting clearances against theaters within roughly three miles of an AMC theater. An internal report prepared by AMC in November 2012 reflects AMC's determination that asserting clearances could help fend off "competitive encroachment".

In December 2012, AMC made a presentation on the new policy to various studios and to Open Road personnel. Written materials from that presentation project that without a change in clearance policy, new competition would negatively affect AMC's revenue. The materials reflect that AMC had considered the matter "carefully" and would "stand behind" **[**8]** the decision to start asserting clearances "for the long-term health of [its] . . . business".

In January 2013, Regal's president and COO, Greg Dunn, who also sat on the board of Open Road, directed Regal's head film buyer, Ted Cooper, to clear all luxury or dine-in theaters within three miles of a Regal theater. Around the same time, Regal learned that iPic planned to build a theater in Houston within three miles of Regal Greenway. In April 2013, Regal's Ted Cooper told iPic executive Clark Woods at an industry conference that Regal planned to clear iPic's new Houston theater. A few days later, iPic's CEO, Hamid Hashemi, emailed a colleague that "Regal . . . just told us they are clearing us in Houston", characterizing Regal's decision as "[n]o biggie". Also in April 2013, iPic opened a new theater in Los Angeles within three miles of an AMC theater. Despite its new policy, AMC declined to clear iPic Los Angeles, and the two theaters play day-and-date. It was not until several months later, around December 2013, that iPic began making plans for a Frisco theater.

In April 2014, AMC learned that iPic was in the process of negotiating a lease for a space in Frisco located within three **[**9]** miles of AMC Stonebriar. An internal AMC email characterized the forthcoming iPic as "[a]n obvious clearance situation" and expressed AMC's intention to "move quickly" to communicate its clearance request to distributors. An internal email between AMC personnel dated May 16, 2014, contained this draft clearance request to distributors for the anticipated iPic Frisco:

> Dear XXXXXXXXX,
>
> iPic, a movie exhibition company, is planning a new theatre at Forum at Wade Park located at the corner of Lebanon Rd and Parkwood Blvd in Frisco, TX. This new development is 1.75 direct miles and 2.2 driving miles north of our AMC Stonebriar theatre, with no geographic barriers. This theatre, if it were to play first-run movies, would be in **[*205]** ubstantial competition with AMC Stonebriar 24. In the last twelve months, AMC Stonebriar 24 has grossed $X [amount redacted] and has more than enough capacity to fully serve movie-going demand in this zone that has a 3-mile population of 82,651 people.
>
> Accordingly, AMC will not license [Distributor's] films to be played day-and-date with this proposed new theatre, but instead requests that each film be licensed pursuant to clearances in this particular film licensing **[**10]** zone. Clearances in this zone would clearly be deemed reasonable under the well-established jurisprudence governing the legality of clearances.
>
> We have enjoyed a productive business relationship with [Distributor name] at the Stonebriar 24 since AMC opened this location on 8/4/00. We look forward to continuing that ongoing relationship in this zone.

The letters were not sent out immediately. AMC executive Bob Lenihan testified by deposition that the lack of urgency in sending the requests—construction on iPic Frisco had not even begun—and AMC's being "a big company with a lot of bureaucracy" were the likely reasons for the delay. Another AMC executive, Nathan Reid, testified by deposition that AMC's film department received final approval to send out the requests in late June and that a two-month delay from drafting to sending a clearance request was "[n]ot at all" unusual.

On June 20, AMC's head film buyer, Ryan Wood, forwarded the draft clearance letter to colleagues with a note that the "[p]lan will be to send on Tuesday (7/1)". Still, the letters were not sent out on the 1st. iPic points to calendar entries in the record indicating that on July 2, Lenihan had lunch with Open Road **[**11]** personnel and that an AMC executive had a phone call scheduled with a Regal executive about Open Road matters. There is no evidence that clearances against iPic were discussed at the meeting or on the call.

Ryan Wood testified by deposition that distribution of the letters was delayed by the holiday weekend. "[P]hone calls needed to be made to each of the contacts [AMC was] sending [the letters] to", and it was too "close to July 4th weekend where [AMC and] a lot of the [distributors] were [going to be] closed for certain days". Woods explained that it was AMC's practice not to send a clearance letter until AMC had reached the recipient by telephone first; that with respect to certain distributors, AMC needed to make calls to multiple people; and that this process required "a phone conversation", "not just a voicemail left".

AMC finally started sending out its clearance requests on July 8. That same day, Regal began calling distributors to communicate that it wanted to clear iPic Houston. In these phone calls, Regal communicated to several distributors that it would refuse to play any movie at its Greenway theater that the distributor also offered to iPic Houston. AMC's clearance letters **[**12]** communicated the same message with respect to iPic Frisco.

No distributor bit on AMC's requests to clear iPic Frisco. Each either denied the request outright or refused to address it until iPic solidified its plans for a Frisco theater. In January 2017, AMC emailed all the distributors that it had sent clearance requests to for iPic Frisco and formally withdrew those requests. iPic Frisco was never built for reasons unrelated to this lawsuit, and iPic has not claimed any damages related to that proposed theater.

In response to Regal's requests, three distributor-studios—Sony, Universal, and Fox—decided to allocate their films between **[*206]** egal Greenway and iPic Houston. The rest denied or ignored Regal's request.

C

iPic filed this suit against Regal and AMC in November 2015, just a few weeks after iPic Houston opened. iPic initially alleged several antitrust claims under *Section 15.05* of the Texas Antitrust Act as well as a common-law claim for tortious interference with iPic's business.

In January 2016, the trial court temporarily enjoined Regal from making further clearance requests against iPic Houston or communicating to distributors that it would not play day-and-date with iPic Houston. After that **[**13]** order was affirmed on appeal,[11] Regal settled, leaving AMC as the only defendant. iPic alleges damages in the form of lost revenue and goodwill during the first few months that iPic Houston was open, before the trial court's temporary injunction order.

AMC filed a traditional and no-evidence motion for summary judgment on all claims against it. The trial court granted the motion without stating its reasons and rendered judgment dismissing all iPic's claims. iPic appealed the court's judgment with respect to one claim alleging a horizontal conspiracy between Regal and AMC to restrain trade under *Section 15.05(a)*. The court of appeals reversed the summary judgment and remanded the case for trial.[12] We granted AMC's petition for review.

---

[11] *Regal Ent. Grp. v. iPic-Gold Class Ent., LLC, 507 S.W.3d 337 (Tex. App.—Houston [1st Dist.] 2016, no pet.)*.

[12] *592 S.W.3d 946 (Tex. App.—Houston [1st Dist.] 2019)*.

HN2[] The Texas Antitrust Act's stated "purpose . . . is to maintain and promote economic competition in trade and commerce" in the state and "to provide the benefits of that competition to consumers".[13] "[T]o the extent consistent with [that] purpose", the Act's provisions should "be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes".[14]

iPic's sole remaining claim alleges a horizontal conspiracy between Regal and AMC under Section 15.05(a) of the **[**14]** Act to "crush iPic with clearances" in order to put iPic out of business in Houston and Frisco. Even though all iPic's damages were sustained by iPic Houston, and AMC only tried to clear the rumored-but-never-built iPic Frisco, iPic argues that under ***antitrust law***, AMC is liable as Regal's co-conspirator for damages to iPic Houston.

HN3[] Section 15.05(a) states that "[e]very contract, combination, or conspiracy in restraint of trade or commerce is unlawful."[15] Section 15.21 authorizes "[a]ny person . . . whose business or property has been injured" by a violation of Section 15.05 to sue for damages and injunctive relief.[16] These provisions are "comparable to, and indeed taken from," Sections 1 and 15 of the Sherman Antitrust Act, respectively.[17] Because "our own caselaw [on the Texas Antitrust Act] is limited," we must "rely heavily on the jurisprudence of the federal courts" in Sherman Act cases to resolve **[*207]** he issues presented here.[18]

HN4[] Like the language of its federal counterpart, the broad language of Section 15.05(a) indicates that *every* conspiracy in restraint of trade is unlawful. Yet the United States Supreme Court has, since its earliest decisions, "recognized that [Section 1] was intended to prohibit only unreasonable restraints of trade."[19] Some kinds of conspiratorial agreements—a horizontal **[**15]** agreement to fix prices, for example—are considered per se illegal.[20] Most, however, are evaluated on a case-by-case basis under the "rule of reason," which requires the court to determine whether a restraint is unreasonable by "examining a defendant's purpose in implementing the restraint and the restraint's effect on competition" as well as all factors relevant to that examination.[21]

The seminal antitrust case on movie-theater clearances is *United States v. Paramount Pictures*.[22] There, the Supreme Court did not reach the issue of whether clearances are unlawful per se under the Sherman Act because the Department of Justice had not appealed the district court's ruling that they are not.[23] But the Supreme Court

noted the district court's conclusion that a clearance asserted to protect a theater's revenue interest in a film is likely reasonable if the clearance does "not unduly extend[] as to area or duration",[24] and the theaters affected are in "substantial competition" with one another.[25]

AMC and iPic vigorously dispute whether iPic is in substantial competition with megaplexes like AMC and Regal. But we need not make that determination because iPic did not raise the issue in its motion **[**16]** for summary judgment.[26] AMC's motion instead **[*208]** ocused on the remaining elements of iPic's claim: (1) whether AMC and Regal made an agreement to "crush iPic with clearances"; and (2) if they did, whether that agreement caused injury to iPic Houston.[27] We need only address the first issue.

III

iPic alleges a conspiratorial agreement between AMC and Regal to "crush iPic with clearances"—i.e., to put iPic out of business in Houston and Frisco by preventing it from obtaining first-run films in those markets. ***HN6***[] Because this appeal arises from a summary judgment for AMC, we review the lower courts' judgments de novo, taking as true all evidence favorable to iPic and indulging every permissible inference in its favor.[28] But because federal

[23] *Id. at 145*.

[24] *Id.*

[25] *Id. at 146*.

[26] We express no opinion whether the Supreme Court's statements about substantial competition in *Paramount Pictures* survive the Court's subsequent decisions clarifying the scope of the *Sherman Act* and defining the relevant market for antitrust purposes. *Compare Regal Ent. Grp. v. iPic-Gold Class Ent., LLC, 507 S.W.3d 337, 348 (Tex. App.—Houston [1st Dist.] 2016, no pet.)* ("Whether theaters are in substantial competition turns on whether they sell a reasonably interchangeable product in the same geographic area."), *with United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 593, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)* ("Determination of the relevant market is a necessary predicate to a finding of a violation of the *Clayton Act* because the threatened monopoly must be one which will substantially lessen competition within the area of effective competition. Substantiality can be determined only in terms of the market affected." (footnote and quotation marks omitted)), and *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* ("The boundaries of [a well-defined submarket within a broader product market] may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.").

We note, however, that—outside of an inquiry into whether a proposed merger's effect "may be substantially to lessen competition" under the *Clayton Act, 15 U.S.C. § 18*—the words "substantial competition" have not appeared in an antitrust decision from the Supreme Court since *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*, a decision that also predates the Court's seminal opinions in *Du Pont* and *Brown Shoe*. *Cf. FTC v. Actavis, Inc., 570 U.S. 136, 159, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* ("In *California Dental*, we held (unanimously) that abandonment of the 'rule of reason' in favor of presumptive rules (or a 'quick-look' approach) is appropriate only where 'an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets.'" (quoting *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*)); *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("[W]e decline to resolve this case by forcing the Federation's policy into the 'boycott' pigeonhole and invoking the *per se* rule.").

[27] ***HN5***[] *See Tex. Bus. & Com. Code § 15.21* (authorizing any person "whose business or property has been injured by reason of any conduct declared unlawful" under *Section 15.05* to sue for damages or injunctive relief); *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585-586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* ("To survive petitioners' motion for summary judgment, respondents must establish that there is a genuine issue of material fact as to whether petitioners entered into an illegal conspiracy that caused respondents to suffer a cognizable injury." (footnote and citation omitted) (citing *FED. R. CIV. P. 56(e)*)).

antitrust law guides our construction of the Texas Antitrust Act, our examination of the evidence must also take into account federal caselaw limiting what inferences are reasonable when the plaintiff's evidence is ambiguous and the alleged conspiracy is not plausible.[29] We begin with an overview of the different types of antitrust claims available under Texas and federal law and the elements **[**17]** required to establish the claim alleged here.

A

HN7[] For anticompetitive conduct to give rise to liability under *Section 1 of the Sherman Act* or *Section 15.05(a)* of the Texas Antitrust Act, the conduct must "stem[] . . . from an agreement, tacit or express", rather than from independent **[*209]** ction.[30] Because ***antitrust law*** "does not prohibit unreasonable restraints of trade as such—but only restraints effected by a contract, combination, or conspiracy—it leaves untouched a single firm's anticompetitive conduct (short of threatened monopolization) that may be indistinguishable in economic effect from the conduct of two firms".[31] Thus, ***antitrust law*** generally distinguishes between unilateral and multilateral conduct, treating multilateral conduct as the more dangerous and more likely to warrant judicial intervention.[32] In the federal context, challenges to multilateral conduct are brought under *Section 1 of the Sherman Act* (the federal analogue to *Section 15.05(a) of the Texas Antitrust Act*), and challenges to unilateral conduct are brought under *Section 2 of the Sherman Act* (the federal analogue to *Section 15.05(b)*).[33]

HN8[] Because a *Section 1* claim challenges multilateral conduct, its "very essence . . . is the existence of an agreement."[34] Indeed, the relevant danger or "activity that warrants *§ 1* scrutiny" is the "sudden joining of two independent **[**18]** sources of economic power previously pursuing separate interests".[35]

After a plaintiff "establishes the existence of an illegal contract or combination, it must then proceed to demonstrate **[*210]** hat the agreement constituted an unreasonable restraint of trade either per se or under the rule of reason."[36] However, "[t]he question whether an arrangement is a contract, combination, or conspiracy is different from and antecedent to the question whether it unreasonably restrains trade."[37]

HN10[] "A *§ 1* agreement may be found when 'the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.'"[38] "Such proof may come in the form of direct evidence, e.g., an explicit admission from a participant that an antitrust conspiracy existed, or circumstantial evidence."[39] Whether a factfinder can properly infer the existence of an agreement or conspiracy from ambiguous or circumstantial evidence will "vary with the plausibility of the plaintiffs' theory and the dangers associated with such inferences."[40]

B

HN11[] In *Matsushita Electric Industrial Co. v. Zenith Radio Corp.*, the Supreme Court warned that "courts should not permit factfinders **[**19]** to infer conspiracies when such inferences are implausible[] because the effect of such practices is often to deter procompetitive conduct."[41] The Court explained that "if the factual context [of the alleged conspiracy] renders [the plaintiff's] claim implausible—if the claim is one that simply makes no economic sense—[the plaintiff] must come forward with more persuasive evidence to [survive a motion for summary judgment] than would otherwise be necessary."[42] A corollary to this rule is that "conduct [that is just] as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy."[43]

---

predicated on a defendant's unilateral actions, no matter its anticompetitive motivations."); *Cap. Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)* ("[A] plaintiff claiming a *§ 1* violation must first establish a combination or some form of concerted action between at least two legally distinct economic entities.").

[35] *Copperweld Corp., 467 U.S. at 771*.

[36] *Cap. Imaging Assocs., 996 F.2d at 542*. ***HN9***[] With rare exceptions, courts use a three-step, burden-shifting framework to evaluate *Section 1* claims under the rule of reason. *See, e.g., K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 127 (2d Cir. 1995)* ("Establishing a violation of the rule of reason involves three steps.").

First, the plaintiff "bears the initial burden of showing that the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market." *Id.* (quoting *Cap. Imaging Assocs., 996 F.2d at 543*). Second, "[i]f the plaintiff succeeds, the burden shifts to the defendant to establish the pro-competitive redeeming virtues of the action." *Id.* (internal quotation marks omitted) (quoting *Cap. Imaging Assocs., 996 F.2d at 543*). Third, "[s]hould the defendant carry this burden, the plaintiff must then show that the same pro-competitive effect could be achieved through an alternative means that is less restrictive of competition." *Id.* (citing *Cap. Imaging Assocs., 996 F.2d at 543*).

[42] *Id. at 587*; *see also* *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 661 (7th Cir. 2002)* ("More evidence is required the less plausible the charge of collusive conduct.").

Matsushita involved an allegation by American TV manufacturers that a group **[*211]** f Japanese manufacturers had conspired over a 20-year period to drive the American firms from the market by fixing artificially high prices in Japan and artificially low prices in the U.S. The American firms' theory was that once their businesses collapsed, the Japanese firms would raise prices in the U.S. to recoup their losses from the artificially low prices they had imposed previously. The plaintiffs' evidence consisted largely of the prices themselves. The **[**20]** district court concluded that evidence did not raise a fact issue on the existence of a conspiracy and granted summary judgment for the defendants. The court of appeals reversed.

The Supreme Court pointed to several reasons why the plaintiffs' conspiracy theory was implausible. One was that if the conspiracy did exist, it was a failure. Twenty years after the conspiracy was alleged to have commenced, two American firms, including lead plaintiff Zenith, retained the largest shares of the American market. The Court noted that "[t]he alleged conspiracy's failure to achieve its ends in the two decades of its asserted operation is strong evidence that the conspiracy [did] not in fact exist."[44] A conspiracy among the defendant firms would also be "incalculably more difficult to execute than an analogous plan undertaken by a single predator."[45] "[S]uccess [would be] speculative and depend[] on a willingness to endure losses for an indefinite period".[46] Moreover, "each conspirator [would have] a strong incentive to cheat, letting its partners suffer the losses necessary to destroy the competition while sharing in any gains if the conspiracy succeed[ed]."[47] Thus, the Court explained, the defendants **[**21]** "had no motive to enter into the alleged conspiracy."[48] ***HN12***[] "[T]he absence of any plausible motive to engage in the conduct charged is highly relevant to whether a 'genuine issue for trial' exists", the Court said.[49]

The Court reversed the court of appeals' judgment and remanded for that court to reconsider the evidence in light of the standards announced.[50] The Court directed the court of appeals to determine whether there was any evidence that was "sufficiently unambiguous to permit a trier of fact to find that petitioners conspired to price predatorily for two decades despite the absence of any apparent motive to do so."[51] Evidence offered to defeat summary judgment "must 'ten[d] to exclude the possibility' that [the defendants] underpriced [the plaintiffs] to compete for business rather than to implement an economically senseless conspiracy", the Court said.[52] Absent evidence meeting that strict standard, the Court explained, "there [was] no 'genuine issue for trial'" under *Federal Rule of Civil Procedure 56(e)*, and the Japanese firms were entitled to summary judgment.[53]

53 *Id. at 598*.

HN13[] The Supreme Court extended the plausibility requirement to the pleading stage in *Bell Atlantic Corp. v. Twombly*, where it held that in order to survive a motion **[**22]** to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, a plaintiff's conspiracy allegations **[*212]** ust be "plausible on [their] face."[54] In that case, the Court held that the plaintiffs' factual allegations "[came] up short"[55] and failed to "nudge[] their claims across the line from conceivable to plausible"[56] because the allegations rested "on descriptions of parallel conduct and not on any independent allegation of actual agreement among the [defendants]."[57] *HN14*[] The Court reiterated that parallel business conduct, even if consciously undertaken, is ambiguous: it is just as consistent with conspiracy as with competitive actions "unilaterally prompted by common perceptions of the market."[58] "[A]t the summary judgment stage", the Court reminded, evidence of ambiguous conduct is not enough; rather, "a *§ 1* plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently".[59]

C

Matsushita *HN15*[] and *Twombly* teach that (1) parallel business conduct, alone, is insufficient to raise a fact issue on the existence of a conspiracy;[60] (2) when the conspiracy alleged is implausible, more persuasive evidence will be required to survive summary judgment;[61] and (3) the plaintiff's evidence must tend to exclude the possibility **[**23]** that the defendants acted independently.[62]

Lower federal courts have fleshed out these principles by requiring plaintiffs who base their claim on consciously parallel business behavior to demonstrate the existence of "plus factors".[63] These "factors serve as proxies for direct evidence of an agreement" by "ensur[ing] that courts punish 'concerted action'—an actual agreement—instead of the 'unilateral, independent conduct of competitors.'"[64] There is no definitive list of plus factors,[65] but one district court has listed these eight:

> (1) actions that would be against the defendants' self-interest if the defendants were acting independently, but **[*213]** onsistent with their self-interest if they were acting in concert; (2) a motive to conspire; (3) an opportunity to conspire; (4) market concentration and structure conducive to collusion; (5) pretextual explanations for anticompetitive conduct; (6) sharing of price information; (7) signaling; and (8) involvement in other conspiracies.[66]

"A plausible allegation that the parallel conduct was not in the alleged conspirators' independent self-interest absent an agreement **[**24]** is generally considered the most important 'plus factor.'"[67]

HN16[] A court's task in evaluating the propriety of summary judgment is to "[v]iew[] all the evidence and tak[e] the plus factors into consideration" and determine if the evidence tips the scales in favor of a conspiracy by "tend[ing] to exclude the possibility that the alleged coconspirators acted independently or based upon legitimate business purposes."[68] "[T]he quantum of evidence required to exclude the possibility of independent action or legitimate business purposes is directly related to the plausibility of the plaintiff's theory."[69] "If the plaintiff advances a strong, plausible theory then the quantum of evidence tending to exclude independent action is not as great as if the plaintiff advances a weak or implausible theory. Likewise, when there is a risk that the threat of antitrust liability will chill legitimate, procompetitive conduct by market participants, the quantum of evidence is also high."[70]

IV

We turn to the allegations and evidence in this case.

A

iPic alleges that AMC and Regal conspired to "crush iPic with clearances" in order to "eliminate" it "from the **[**25]** markets of Houston and Frisco." iPic alleges that the conspiracy was formed in January 2013 when, after hearing

---

[65] *See id.* ("The question then becomes, what are 'plus factors' that suffice to defeat summary judgment? There is no finite set of such criteria; no exhaustive list exists.").

Antitrust Litig., 906 F.2d 432, 439 (9th Cir. 1990)* ("*Matsushita* establishes that a trial judge should not permit an inference of antitrust conspiracy from circumstantial evidence where to do so would have the effect of deterring significant procompetitive conduct.").

AMC's presentation to Open Road, Regal president Greg Dunn directed Regal's film department to **[*214]** lear any luxury or dine-in theater concept within three miles of a Regal theater. iPic further alleges that the conspiracy culminated with AMC and Regal's near simultaneous clearance requests on July 8, 2014. iPic claims no damages with respect to iPic Frisco—the theater was never built due to failed lease negotiations, and AMC eventually withdrew its clearance requests with respect to that theater. Rather, iPic alleges that Regal's requests to clear iPic Houston resulted in lost revenue and goodwill to that theater and that AMC is vicariously liable for those losses as Regal's co-conspirator.

In our view, the "factual context" of this case "renders [iPic's] claim implausible".[71] The first problem is that the timeline of events makes the existence of an AMC—Regal agreement to target iPic seem farfetched. Regal first told iPic that its Greenway theater would seek clearances against iPic Houston in April 2013, eight months before iPic even began discussing the possibility of a Frisco **[**26]** theater, and a year before AMC learned about iPic's plans for a Frisco theater.

It is also hard to see why AMC and Regal would have any motive to conspire to seek the specific clearances they sought together as a unit rather than independently.[72] There is no nonspeculative basis in the record for concluding that both exhibitors' participation was essential for either to "recover[], in the form of later monopoly profits, more than the losses suffered."[73] To the contrary, Regal did not need AMC's help to clear iPic in Houston. And when AMC requested clearances against iPic Frisco in July 2014, it was implementing a policy that AMC had unilaterally adopted more than a year-and-a-half earlier, before the conspiracy is alleged to have begun.

iPic argues that by teaming up and making their formal requests on the same day, Regal and AMC would have a greater chance of success with distributors. But it is hard to see why Regal's requests for clearances in Houston would have any impact on a distributor's decision how to allocate films 270 miles away in Frisco, or vice versa.

iPic also contends that Regal and AMC's teaming up sends a stronger message to iPic than either exhibitor's requesting **[**27]** clearances alone would have. But the clearance requests target only two iPics, one of which was never built. Except for iPic Houston, all iPic's theaters have had access to all first-run films since the day they opened their doors. One of these, iPic Los Angeles, opened within a three-mile radius of an AMC theater in April 2013—after the conspiracy allegedly began—and AMC declined to clear it. If AMC and Regal did conspire in January 2013 to "crush iPic with clearances", the conspiracy **[*215]** as a failure.[74]

B

iPic nonetheless contends that it has presented evidence of several plus factors that collectively tip the scales in favor of a conspiracy. We start with the "most important" one: whether the clearance requests "would be against

---

[71] *Matsushita, 475 U.S. at 587*.

[72] *Cf. Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 906 F.2d at 444* (noting that "even in highly concentrated markets, a unilateral price hike might be too risky to make without advance agreement if the increase could not be readily reversed without a significant loss of goodwill").

[73] *Matsushita, 475 U.S. at 589*; *accord Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 319, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)* ("Without . . . a reasonable expectation [of recouping its investment in the long run], a rational firm would not willingly suffer definite, short-run losses."); *Interstate Cir. v. United States, 306 U.S. 208, 226, 59 S. Ct. 467, 83 L. Ed. 610 (1939)* ("Each distributor was advised that the others were asked to participate; each knew that cooperation was essential to successful operation of the plan.").

[74] *See Matsushita, 475 U.S. at 592* ("The alleged conspiracy's failure to achieve its ends in the two decades of its asserted operation is strong evidence that the conspiracy does not in fact exist.").

[AMC's] self-interest if [it] were acting independently, but consistent with [AMC's] self-interest if [it] were acting in concert" with Regal.[75] iPic relies primarily on three categories of evidence to establish this plus factor:

(1) internal analyses by AMC projecting that a clearance zone in which films are allocated between an AMC theater and a nearby iPic may result in substantially more revenue loss to AMC than its theater's playing day-and-date with a nearby **[**28]** iPic would;
(2) deposition testimony of Regal executive Ted Cooper that the results of Regal's "test" decision not to clear iPic Redmond in 2008 indicated that having an iPic-type luxury theater's playing day-and-date with a nearby Regal theater would actually increase attendance at the Regal theater; and
(3) data indicating that Regal Greenway lost substantial revenue in November 2015 when it refused to play a new Star Wars movie that the studio offered to both iPic and Greenway in defiance of Regal's clearance request.[76]

This evidence supports iPic's assertion that it is against an exhibitor's economic interest—in the short term, at least—to refuse to play day-and-date with a competitor. The court of appeals recognized as much but then leapt to the conclusion that the first and "most important" plus factor had been established.[77] iPic mostly parrots this analysis, and it is incorrect.

There is nothing illegal about a company's pursuing action that trades short-term financial loss for long-term gain. ***HN17***[] Commentators have warned that "[o]ne must not characterize a firm's sacrifice of short-run interest in favor of long-run interest as contrary to self-interest. Such a sacrifice by **[**29]** itself tells us nothing about possible conspiracy[] because a firm often **[*216]** akes this choice . . . ."[78] Rather, the inquiry the first plus factor invites is whether the conduct at issue would be against the defendant's self-interest *if it were acting independently*, but consistent with the defendant's self-interest if it were acting in concert with another.

iPic argues that "a reasonable jury could find that AMC and Regal would only expose themselves to such an economic hit, in tandem with one another, if they expected to jointly drive their new premium boutique competitor out of business in Frisco, Houston, and around the country." But that is simply not a rational inference in the factual context of this case, where it is undisputed that both Regal and AMC have sought other clearances independently. iPic claims that a conspiracy between Regal and AMC to harm iPic's business in Houston and Frisco "would radically expand the area in which iPic [would be] precluded from competing", but the record does not support that assertion. Regal may have been trying to harm iPic's **[**30]** Houston theater, and AMC was undoubtedly trying to preclude an iPic Frisco from even being built. But nothing about the economics of the July 2014 clearance requests

---

[75] *In re Pool Prods. Distrib. Mkt. Antitrust Litig., 988 F. Supp. 2d 696, 711 (E.D. La. 2013)*; *see also* Nat'l Hockey League Players Ass'n v. Plymouth Whalers Hockey Club, 419 F.3d 462, 475 (6th Cir. 2005) (phrasing this plus factor as "whether the defendants' actions, if taken independently, would be contrary to their economic self-interest"); *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 570 n.33 (11th Cir. 1998)* ("[W]e read this reference to a defendant's 'economic self-interest' as a reference to what that defendant's legitimate economic self-interest would be under the assumption that it acted alone . . . .").

[76] iPic also argues that "[t]he studios . . . acted against their own interests in allocating films between iPic and Regal" because their stated preference would have been to license films to both Greenway and iPic Houston simultaneously. But iPic has not named any studio as a co-conspirator, and one could just as easily argue that keeping Regal happy would be in a studio's long-term interest.

[77] *See 592 S.W.3d 946, 957 (Tex. App.—Houston [1st Dist.] 2019)* ("Summary-judgment evidence showed that clearances were not necessarily profitable in the short run but could help exhibitors avoid overall losses in the long run. Thus, AMC was acting against its short-term economic interest by seeking a clearance of the proposed iPic Frisco . . . .").

[78] 6 PHILIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION 110 (3d ed. 2010); *see also* *Williamson Oil Co. v. Philip Morris USA, 346 F.3d 1287, 1310 (11th Cir. 2003)* ("[W]e must exercise prudence in labeling a given action as being contrary to the actor's economic interests, lest we be too quick to second-guess well-intentioned business judgments of all kinds.").

suggests that they were made pursuant to an otherwise "economically senseless" agreement.[79] Thus, iPic's "concept of 'action against self-interest' . . . merely constitute[s] a restatement of interdependence."[80]

iPic argues that it has also presented evidence of several plus factors found by the court of appeals: motive and opportunity to conspire, communications between the parties, a pretextual explanation for anticompetitive conduct, and facts consistent with a traditional conspiracy.[81] The evidence iPic points to in support of these factors fits roughly into three buckets.

The first bucket consists of evidence of communications between AMC and Regal between 2012 and 2014, sometimes through their joint venture, Open Road. In May 2012, Rich Boynton at AMC emailed his contacts at Open Road and asked them to find out whether Regal would be clearing a dine-in theater called Studio Movie Grill that was rumored to be opening near Regal Greenway. Open Road's Elliot Slutzky responded that Regal had informed him that it would **[**31]** not be clearing that theater. iPic alleges that this exchange violated Open Road's information-sharing guidelines, which forbade AMC and Regal from sharing "competitively sensitive information" about their film-exhibition businesses in order to avoid antitrust allegations.[82]

[*217] he record also contains an internal AMC report dated November 2012 that lists theaters planned by competitors along with a recommendation whether to seek a clearance against each theater. One page of the report analyzes a new Regal theater being built in the Atlanta area and expected to open in 2014. The clearance-recommendation section states: "Further conversation needed with Regal". An email circulated internally at AMC in June 2014 reflects that AMC had decided not to clear that Atlanta Regal and states: "[W]e are going to tell Regal since we decided not to clear you here you should un-clear us at Shirlington."

The second bucket holds the timeline of AMC's and Regal's decisions to start clearing dine-in theaters and their communications with studios about clearing iPic. Included are the facts that AMC and Regal sent their requests to clear iPic on the same day and that each exhibitor's request stated that its **[**32]** theater would refuse to play first-run films offered to iPic—statements that iPic characterizes as "threats".

The third bucket holds a shred of evidence involving Regal's post-clearance-request conduct. In a November 2015 email, Alan Davy, the Regal executive who made the July 2014 clearance requests, reported to the general manager of Regal's MarqE megaplex that iPic "tanked" on *The Peanuts Movie* and then said: "The problem was Studio 30 didn't get the benefit." Studio 30 was an AMC megaplex (now closed) that was located about five miles from both Regal Greenway and iPic Houston.

Taking iPic's evidence together and in the light most favorable to iPic, we conclude that it does not raise a genuine issue of material fact that the conspiracy iPic alleges ever existed. The national clearance strategy that AMC adopted in late 2012 became public knowledge when it was presented directly to distributors around the same time that it was presented to Open Road. It may be that AMC and Regal were monitoring each other's clearance strategies, but there is no evidence that Regal and AMC ever communicated with one another about clearing iPic.

---

[79] *Matsushita, 475 U.S. at 596-597*.

[80] *In re Baby Food Antitrust Litig., 166 F.3d 112, 122 (3d Cir. 1999)*; *see also* *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("Tacit collusion, sometimes called oligopolistic price coordination or conscious parallelism, describes the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power . . . by recognizing their shared economic interests and their interdependence with respect to price and output decisions.").

[81] *592 S.W.3d at 958*.

[82] AMC disputes that clearance decisions are "competitively sensitive information" and contends that it could have obtained the same information from distributors, Studio Movie Grill, or industry reports.

HN18[] Allegations of general contacts or even specific contacts **[**33]** that are abstract or vague in nature are not enough to support a reasonable inference of conspiracy under federal law.[83] That is all iPic has here. The **[*218]** pen Road email chain shows only that AMC obtained information (perhaps wrongfully) about Regal's intentions with respect to *another* dine-in theater in Houston. This exchange occurred a year before iPic even started making plans for a Frisco theater. Other evidence shows that AMC and Regal may have engaged in some horse trading with respect to clearances between their own theaters. That may be normal industry behavior or it may be improper. Regardless, it is not evidence of a conspiracy directed towards iPic. Alan Davy's November 2015 email comment that AMC's Studio 30 "didn't get the benefit" of iPic's poor performance on *The Peanuts Movie* is certainly odd, but there is no link in the evidence between this email and AMC's request to clear iPic Frisco.

* * * *

The conspiracy that iPic has alleged is implausible, and its case rests on parallel conduct and suspicion. That is not enough to survive summary judgment under federal ***antitrust law*** because it does not tend to exclude the possibility that AMC acted independently. **[**34]** [84] Because we construe the Texas Antitrust Act in harmony with federal law, iPic's evidence is not enough to survive summary judgment under the Texas Act either.[85] We reverse the court of appeals' judgment and render judgment for AMC.

Opinion by: DENISE COTE

Opinion

[*589] OPINION AND ORDER

[*590]

DENISE COTE, District Judge:

In 2015, Martin Shkreli raised the price of the life-saving pharmaceutical Daraprim by 4,000% and initiated a scheme to block the entry of generic drug competition so that he could reap the profits from Daraprim sales for as long as possible. Through his tight control of the distribution of Daraprim, Shkreli prevented generic drug companies from getting access to the quantity of Daraprim they needed to conduct testing demanded by the Food and Drug Administration ("FDA"). Through exclusive supply agreements, Shkreli also blocked off access to the two most important manufacturers of the active pharmaceutical ingredient ("API") for Daraprim. Through these strategies, Shkreli delayed the entry of generic competition for at least eighteen months. Shkreli and his companies profited over $64 million from this scheme.

The Federal Trade Commission ("FTC") and seven States[1] (the "States"; collectively, **[*591]** "Plaintiffs") **[**4]** filed this action in 2020. At a bench trial held over seven days between December 14 and 22, 2021, the Plaintiffs carried their burden to establish that Shkreli violated federal and state laws that ban anticompetitive conduct. Based on the trial evidence, Shkreli will be barred for life from participating in the pharmaceutical industry and is ordered to disgorge $64.6 million in net profits from his wrongdoing. This Opinion contains the Findings of Fact and Conclusions of Law from the trial.

Procedural History

The Plaintiffs filed this action on January 27, 2020 and brought claims for violations of *§§ 1* and *2 of the Sherman Act*, *15 U.S.C. §§ 1-2*, *§ 5(a) of the FTC Act, 15 U.S.C. § 45(a)*, and various state statutes.[2] They brought these

---

[1] The seven state plaintiffs are the States of New York, California, Ohio, Illinois, and North Carolina, and the Commonwealths of Pennsylvania and Virginia.

[2] The States pursuing statutory claims sue under the *Sherman Act* and under the *California Cartwright Act, Cal. Bus. & Prof. Code § 16700*, and California Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200*; *Illinois Antitrust Act, Ill. Comp. Stat. 10/3(3)*; the *New York Donnelly Act, N.Y. Gen. Bus. Law § 340 et seq.*, and New York Executive Law, *N.Y. Exec. Law § 63(12)*;

claims against Shkreli, Vyera Pharmaceuticals, LLC and its parent company Phoenixus AG ("Phoenixus"; together, "Vyera"), and Kevin Mulleady ("Mulleady"), former Vyera CEO and member of the Phoenixus Board of Directors (collectively, "Defendants"). The Defendants' motion to dismiss was largely denied through an Opinion of August 18, 2020.[3] See *Fed. Trade Comm'n v. Vyera Pharms., LLC, 479 F. Supp. 3d 31 (S.D.N.Y. 2020)*.

Two decisions in 2021 addressed the Plaintiffs' requests for equitable monetary relief.[4] A June 2, 2021 Order granted the FTC's motion for leave to withdraw its prayer for **[**5]** equitable monetary relief pursuant to the Supreme Court's decision in *AMG Cap. Mgmt., LLC v. Fed. Trade Comm'n, 141 S. Ct. 1341, 1352, 209 L. Ed. 2d 361 (2021)*. An Opinion of September 24 denied the Defendants' motion for partial summary judgment on the nationwide scope of the States' prayer for equitable monetary relief, and granted the Plaintiffs' cross-motion for summary judgment on the same issue. See *Fed. Trade Comm'n v. Vyera Pharms., LLC, No. 20CV00706 (DLC), 2021 U.S. Dist. LEXIS 183303, 2021 WL 4392481, at *5 (S.D.N.Y. Sept. 24, 2021)*.

Only Shkreli proceeded to trial; on the eve of trial Vyera and Mulleady settled with both the FTC and the States. Before those settlements were reached, the parties' submitted their Joint Pretrial Order, proposed findings of fact and conclusions of law, motions in limine, and pretrial memoranda on October 20. Following rulings on redactions, these submissions were filed on November 29.

As is customary for this Court's non-jury proceedings, and with consent of the parties, the direct testimony of those witnesses under a party's control were submitted with the Joint Pretrial Order.[5] The parties also served copies of all exhibits **[*592]** and deposition testimony that they intended to offer as evidence in chief at trial.[6]

Prior to trial, the motions in limine were decided. On November 5, Shkreli's motion in limine to preclude evidence relating to Retrophin, Inc. ("Retrophin"), a pharmaceutical **[**6]** company that Shkreli and Mulleady founded in 2011, was denied. Id., *2021 U.S. Dist. LEXIS 214751, 2021 WL 5154119 (S.D.N.Y. Nov. 5, 2021)*. On November 10, motions by Shkreli and Mulleady to exclude the testimony of current and former employees of Vyera were addressed in an Opinion that set forth the standards that would govern the admissibility of such testimony. Id., *2021 U.S. Dist. LEXIS 218530, 2021 WL 5236333 (S.D.N.Y. Nov. 10, 2021)*. An Opinion of November 12 denied the Defendants' motion to exclude certain testimony of Plaintiffs' expert Professor C. Scott Hemphill ("Hemphill"), an economist and Professor of Law at New York University, and granted the Plaintiffs' motion to exclude certain opinions offered by Dr. Anupam B. Jena ("Dr. Jena"), a physician, economist, Professor of Health Care Policy and Medicine at Harvard Medical School, and Internal Medicine Specialist in the Department of Medicine at Massachusetts General Hospital. Id., *2021 U.S. Dist. LEXIS 219493, 2021 WL 5279465 (S.D.N.Y. Nov. 12, 2021)*. Opinions of November 15 granted the Plaintiffs' motion to exclude designated deposition testimony of *Rule 30(b)(6), Fed. R. Civ. P.*, deponents that were not based on personal knowledge, id., *2021 U.S. Dist. LEXIS 219964, 2021 WL 5300019 (S.D.N.Y. Nov. 15, 2021)*, and excluded testimony from Defendants' expert Justin McLean, id., *2021 U.S. Dist. LEXIS 221384, 2021 WL 5300031 (S.D.N.Y. Nov. 15, 2021)*. An Opinion of November 16 struck most of the testimony offered by Defendants' **[**7]** expert Sheldon Bradshaw. Id., *2021 U.S. Dist. LEXIS 222166, 2021 WL*

North Carolina Unfair or Deceptive Practices Act, N.C. Gen. Stat. § 75-1 et seq.; *Ohio Valentine Act, Ohio Rev. Code Ann. § 1331*; and Virginia Antitrust Act, Va. Code Ann. § 59.1 et seq. Pennsylvania sues under the *Sherman Act* and its common law doctrine against restraint of trade.

[3] Pennsylvania's statutory claim under the Pennsylvania Unfair Trade Practices and Consumer Protection Law, *73 P.S. §§ 201-1 et seq.*, was dismissed.

[4] On March 30, 2021, the Plaintiffs waived their right to money damages and therefore their right to a jury trial.

[5] These affidavits were ordered to be filed on the day on which the witness testified or was deemed to have testified at trial.

[6] The Court's procedures for non-jury trials were discussed in detail at a conference of December 10, 2021. As the parties were informed, the Court prepared a draft opinion in advance of the bench trial based on the witness affidavits and other documents submitted with the Pretrial Order and the arguments of counsel in their trial memoranda. At trial, the affiants swore to the truth of the contents of their affidavits and were tendered for cross and redirect examination, and the other trial evidence was formally received.

5336949 (S.D.N.Y. Nov. 16, 2021).[7] On November 18, the Plaintiffs' motion to exclude portions of testimony by Defendants' expert John S. Russell ("Russell"), Managing Partner for ASDO Consulting Group, a pharmaceutical consulting company, was largely granted. Id., 2021 U.S. Dist. LEXIS 224146, 2021 WL 5403749 (S.D.N.Y. Nov. 18, 2021).

At trial, eleven fact witnesses and four expert witnesses called by the Plaintiffs testified. The Plaintiffs' fact witnesses included one current Vyera executive -- Nicholas Pelliccione ("Pelliccione"), Vyera's Senior Vice President of Research and Development ("R&D") -- and four former executives and employees: Howard Dorfman, Vyera's General Counsel between December 2014 and August 2015; Christina Ghorban, Vyera's Head of Marketing and Business Analytics between April 2015 and October 2016; Dr. Eliseo Salinas ("Dr. Salinas"), Vyera's President of R&D between June 2015 and April 2017 and interim CEO between April and July 2017; and Mulleady, who worked at Vyera from October 2014 to June 2016, was appointed to Vyera's Board in June 2017, served as Executive Director and then CEO between October 2017 and February 2019, and was chairman of the Phoenixus **[**8]** Board of Directors until December 2020. The Plaintiffs called six additional fact witnesses: Frank DellaFera ("DellaFera"), CEO and founder of Fera Pharmaceuticals, Inc. ("Fera"); Susan McDougal ("McDougal"), Fera's Vice President; Abhishek Mukhopadhyay ("Mukhopadhyay"), **[*593]** Head of Business Development at Dr. Reddy's Laboratories, Inc. ("Dr. Reddy's"); Nilesh Patel ("Patel"), co-founder and Compliance and Regulatory Officer of InvaTech Pharmaceuticals LLC ("InvaTech"); Manish Shah ("Shah"), co-founder and President of Cerovene Health, Inc. ("Cerovene"); and Satya Valiveti ("Valiveti"), co-founder and co-owner of Reliant Specialty LLC ("Reliant").

The Plaintiffs' expert witnesses were James R. Bruno, managing director of Chemical and Pharmaceuticals Solutions, Inc., a pharmaceutical consulting company; Edward V. Conroy, President and Chief Operating Officer of Ed Conroy & Associates, a pharmaceutical consulting firm; Dr. W. David Hardy, a physician and Adjunct Clinical Professor of Medicine in the Division of Infectious Diseases at the Keck School of Medicine at the University of Southern California and former Chair of the Board of Directors of the HIV Medicine Association ("HIVMA") of **[**9]** the Infectious Diseases Society of America ("IDSA"); and Hemphill.[8]

The Plaintiffs also intended to call at trial three additional fact witnesses to testify: Shkreli; Eve Costopoulos ("Costopoulos"), Vyera's former General Counsel from November 2015 to July 2017; and Anne Kirby ("Kirby"), a member of Vyera's sales team from June 2015 to late 2018, CEO from late 2018 to early 2019, and current Executive Vice President of Commercial and Operations. Shkreli is incarcerated in federal prison, serving a sentence on an unrelated federal conviction.[9] He opted not to attend the trial. The parties agreed that the affidavit that he had prepared to present as his direct testimony would be received at the trial and that his cross-examination and redirect examination would be conducted through the designation of his pretrial deposition testimony.

Neither Kirby nor Costopoulos appeared at trial. The parties agreed that Kirby's affidavit would be received as her direct testimony and that cross-examination and redirect would be conducted by deposition designation. The parties also agreed to designate portions of Costopoulos' deposition to serve as her trial testimony.

At the time the Pretrial Order was **[**10]** submitted, Shkreli intended to call eleven of the Plaintiffs' witnesses in his own case in addition to testifying on his own behalf: Mulleady, Pelliccione, Kirby, Costopoulos, Dr. Salinas, DellaFera, McDougal, Mukhopadhyay, Patel, Shah, and Valiveti.[10] Affidavits constituting the direct testimony of

---

[7] Thereafter, Shkreli withdrew the testimony of Bradshaw and the Plaintiffs withdrew the testimony of their rebuttal expert, Mansoor A. Khan.

[8] The Plaintiffs filed affidavits constituting the direct testimony of five of their fact witnesses and all of their experts. The five fact witnesses were DellaFera, McDougal, Mukhopadhyay, Patel, and Shah.

[9] Shkreli was arrested in December 17, 2015 on federal criminal charges. A jury convicted him on August 4, 2017. He was sentenced on March 8, 2018, principally to a term of imprisonment of eighty-four months (seven years). Shkreli was remanded to federal custody on September 13, 2017. He is currently scheduled to be released on October 11, 2023, or one year earlier pending successful completion of an early release program.

defense witnesses Shkreli, Mulleady, Pelliccione, and Kirby were received into evidence. Shkreli also called two expert witnesses: Russell and Dr. Jena.

The parties offered excerpts from the depositions of the following additional witnesses associated with Vyera: Jonathan Haas, Vyera's Former Director of Patient Access; Christopher Lau ("Lau"), Vyera's Director of Analytics and Business Intelligence; Akeel Mithani ("Mithani"), Senior **[*594]** Vice President of Business Development of Vyera and former member of the Phoenixus Board of Directors; Averill Powers, CEO and former Chairman of the Phoenixus Board, and Vyera's General Counsel; Marco Polizzi, CEO of Vyera subsidiary Oakrum Pharma, LLC; Nancy Retzlaff ("Retzlaff"), Vyera's former Chief Commercial Officer; Michael Smith ("Smith"), co-founder of Vyera and former member of the Business Development team; and Ron Tilles ("Tilles"), Vyera's former **[**11]** CEO and Chairman of the Phoenixus Board. They also offered excerpts from the depositions of seventeen additional fact witnesses: Nilaben Desai, former manager at ASD Healthcare ("ASD"); Michael Hatch, Head of Global Project Management for R&D for Mylan N.V. ("Mylan") affiliate Viatris Inc.; Courtney Johnson, former Director of Global Sourcing & Business Development for Cardinal Specialty ("Cardinal"); Hamilton Lenox, Senior Vice President of Business Development at LGM Pharma; Amanda Lopez, Clinical Trial Supervisor for Durbin USA; Jacob Mathew, Chairman of RL Fine Chem. Pvt. Ltd. ("RL Fine"); Ravi Patel, part-owner of Espee Biopharma & Fine Chem; Donovan Quill, founder and CEO of Optime Care, Inc. ("Optime"); Paula Raese, Senior Director of API Sourcing for Mylan; A.R. Ramachandra, General Manager of Marketing and Sales at RL Fine; Dennis Saadeh, Chief of Formulation Strategy for Harrow Health, parent company of Imprimis; Dr. Lucas Schulz, Clinical Coordinator for Infectious Diseases in the Department of Pharmacy at the University of Wisconsin Health; Devang Shah, Director of Aadivignesh Chem.; Dr. Eric Sredzinski, formerly the head of clinical affairs and quality assurance for Avella; **[**12]** Dr. John Vande Waa, Division Director of the Division of Infectious Diseases for the University of South Alabama Health; and Kevin Wessels, Senior Director of Trade Relations at Zinc Health Services, a subsidiary of CVS Health ("CVS").[11]

As noted, the bench trial was held from December 14 to December 22, 2021, and this Opinion presents the Court's findings of fact and conclusions of law. The findings of fact appear principally in the Background section, but also appear in the remaining sections of the Opinion.

Background

I. FDA Drug Approval Process for Generic Drugs

Shkreli's scheme unfolded against the backdrop of the U.S. regulatory process for the approval and sale of pharmaceutical drugs. The FDA is the federal agency that approves the sale of branded and generic drugs in the United States. The *Drug Price Competition and Patent Term Restoration Act of 1984, Pub. L. No. 98-417, 98 Stat. 1585*, commonly known as the *Hatch-Waxman Act*, allows a generic manufacturer of an already approved brand-name drug to obtain expedited approval from the FDA to market the generic equivalent by filing an Abbreviated New Drug Application, or ANDA. See *FTC v. Actavis, Inc., 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* ("*Actavis*"). The ANDA process is designed to help expedite market introduction of low-cost generic drugs in order to further competition. Id.

Any pharmaceutical company applying **[**13]** for FDA approval of a generic competitor to a branded drug must obtain the API used in the branded drug -- that is, the drug's critical ingredient that provides its therapeutic effect -- from an approved supplier. The API to be used in the generic **[*595]** drug is evaluated for impurities and stability. *21 C.F.R. §§ 211.165*, *211.170*.

---

[10] The parties had agreed that each witness would take the stand a single time at trial. To the extent Shkreli had also intended to call the witness on his own case, his "cross-examination" of the witness was not restricted by the scope of the direct testimony.

[11] Excerpts of the deposition of a witness from an API manufacturer, the name of which has been sealed, were also received into evidence.

An API supplier's manufacturing process must also comply with FDA standards known as current Good Manufacturing Practices ("cGMPs"). FDA regulations set minimum standards for the methods, facilities, controls, and documentation for manufacturing, processing, and packing of the pharmaceutical, including its API.

A pharmaceutical company may demonstrate that the manufacturing process of the API used in its drug product complies with cGMPs either by supplying that information to the FDA in the ANDA itself or, more commonly, by referencing information filed by an API supplier with the FDA in a standalone drug master file ("DMF"). The FDA categorizes DMFs for APIs as Type II DMFs. To file a Type II DMF, an API supplier must pay a fee and submit enough materials, including confidential documents about the manufacturer's facilities, processing, packaging, and storing of human drug products, to permit **[**14]** the FDA to conduct a full scientific review for any ANDAs that reference the DMF. The FDA conducts a completeness assessment of an API supplier's newly-filed DMF at the time it is submitted, but does not fully review a DMF's documented manufacturing process for cGMPs compliance until the DMF is referenced in a new drug application ("NDA") or ANDA. *21 CFR § 314.420(a)*.

In order to obtain the API for a particular drug product a pharmaceutical company may invest in developing an API supplier's manufacturing processes, or it may shorten the process significantly by partnering with an API supplier that has already filed a DMF for the API. Because developing and documenting a cGMPs-compliant API manufacturing process from scratch is time-consuming and expensive -- it can take twelve to eighteen months or more and may cost over $1 million -- generic pharmaceutical companies prefer to use a supplier that already has an FDA-approved DMF for the API.

Therefore, any generic company that seeks to launch a product as fast as possible generally attempts to partner with a DMF-holding supplier whose API is already in use in another FDA-approved product. A less desirable option is partnering with an API manufacturer that **[**15]** currently produces the API but does not have a DMF filed in the U.S. The least attractive option is to develop a cGMPs-compliant manufacturing process from scratch, which is costly and can take years.

Proof of therapeutic equivalency is also central to the ANDA process. A generic manufacturer applying for approval of its drug must demonstrate that the generic drug "has the same active ingredients as, and is biologically equivalent to, the already-approved brand-name drug." *Actavis, 570 U.S. at 142* (citation omitted); see also *21 C.F.R. §§ 314.92(a)(1)*, *314.3(b)*.

Bioequivalence ("BE") testing compares the generic product to samples of the branded drug, commonly referred to as the reference listed drug ("RLD"). BE studies are used to evaluate whether there is any significant difference in the rate and extent to which the product's active ingredient becomes available in the body.[12] *21 C.F.R. § 320.33*. BE testing demonstrates to the FDA that the proposed generic **[*596]** drug product is safe, effective, and comparable to the RLD.

In a BE study, human subjects are given dosages of the generic drug and the RLD. These studies, which take two to six weeks to complete, are typically run by a third-party clinical organization concurrently with the FDA-required shelf stability testing **[**16]** for the first batch of the finished generic product. The stability testing can take three to six months.

In order to conduct BE testing, a generic drug applicant must procure sufficient quantities of the brand-name drug or RLD and retain those quantities before and after approval of an ANDA. FDA regulations require applicants to retain at least five times the amount of the RLD needed to perform BE testing. *21 C.F.R. § 320.38(c)*.

---

[12] FDA regulations define bioequivalence as "the absence of a significant difference in the rate and extent to which the active ingredient or active moiety in pharmaceutical equivalents or pharmaceutical alternatives becomes available at the site of drug action when administered at the same molar dose under similar conditions in an appropriately designed study." *21 CFR §§ 320.1*, *314.3(b)*.

The RLD used in the testing must come from the same manufacturing lot and be unexpired. Obtaining sufficient quantities of RLD usually takes only a few days or, at most, a month.

Consistent with its policy of encouraging price competition for prescription pharmaceuticals, the FDA expresses the view that "a path to securing samples of brand drugs for the purpose of generic drug development should always be available."[13] By utilizing an RLD license permitting them to buy prescription drugs without a prescription, pharmaceutical companies often procure the RLD samples needed to develop generic drug products through drug wholesalers or specialty pharmacies.

If the FDA determines that a proposed generic drug is therapeutically equivalent to the brand-name drug listed in the FDA's "Orange **[**17]** Book,"[14] the agency assigns an "AB" rating to that drug. But if the FDA finds major deficiencies in an ANDA and the applicant does not address its inquiries during the review period, the FDA sends the applicant a complete response letter detailing the identified deficiencies.

To foster price competition among pharmaceuticals, the law provides various incentives to pharmaceutical companies. See *Generic Drug User Fee Act, 21 U.S.C. § 356h*. These include the FDA's prioritization of its review of the first generic entrant to file an ANDA. The first generic drug product to enter a market in competition against the brand name drug is known in the pharmaceutical industry as the "first-to-market" generic.

As generic drugs typically enter a market at a discount, the entry of the first generic competitor generally results in price erosion of approximately 30% to 40% from the prevailing price of the brand-name drug. The brand name drug's sales volume also experiences a significant decline of approximately 60% to 70% when the first generic enters the market. Six months after generic entry, the brand name drug's sales will typically have fallen by 80%. The branded drug's sales volume **[**18]** and price usually continue to decline as additional generic products enter the market. The full decline in the price of the **[*597]** drug usually occurs after three or four generic drugs have entered the market.

II. Distribution of Prescription Drugs in the U.S.

When introducing a branded drug or its generic equivalent into the U.S. market, the manufacturer can choose to distribute it with fewer or more restrictions. The poles of this spectrum are referred to in the pharmaceutical industry as open distribution, representing the least restrictive means, and specialty distribution, which can range from minor limitations to severe restrictions on how freely a drug is sold. Restrictions are set by the manufacturer in agreements with its distribution partners.

Seventy percent of prescription drugs sold in the U.S. is in open distribution. In an open system, the manufacturer typically partners with a major distributor to deliver the product to licensed dispensaries such as retail pharmacies, hospitals, clinics, and nursing homes. Open distribution maximizes patient access to a given drug and is generally appropriate for pharmaceutical products that do not require special handling, do not present safety **[**19]** concerns, and are self-administered by the patient or are clinically simple to administer.

By contrast, approximately 30% of the volume of U.S. prescription drugs is sold through some degree of specialty distribution. Also known as closed distribution, a drug that is circulated in a specialty distribution system is referred to in the pharmaceutical industry as being "in specialty" or as having a "class of trade" restriction. Drugs in specialty distribution tend to be novel drugs, have special shipping, handling, and storage requirements (such as cold-chain

---

[13] Statement from FDA Commissioner Scott Gottlieb, M.D., on New Agency Efforts to Shine Light on Situations Where Drug Makers May Be Pursuing Gaming Tactics to Delay Generic Competition, FDA (May 17, 2018), https://www.fda.gov/news-events/press-announcements/statement-fda-commissioner-scott-gottlieb-md-new-agencyefforts-shine-light-situations-where-drug .

[14] The FDA publication Approved Drug Products with Therapeutic Equivalence Evaluations, commonly known as the Orange Book, "identifies drug products approved on the basis of safety and effectiveness by the [FDA] under the Federal Food, Drug, and Cosmetic Act." Orange Book Preface, FDA (January 21, 2021), https://www.fda.gov/drugs/development-approval-process-drugs/orange-book-preface .

storage), or require ongoing clinical monitoring or skilled patient administration (such as injections). Highly closed distribution systems usually lower patient access and reduce sales.

Safety concerns may also mark a particular drug as a prime candidate for specialty distribution. Specialty distribution is more frequent, for instance, when the FDA requires a "black box" warning on the label of drugs that present safety risks or when it has put the drug in a Risk Evaluation and Mitigation Strategies ("REMS") program. REMS is a drug safety program that the FDA may require for certain medications that present serious safety risks.

The **[**20]** percentage of prescription drugs on the U.S. market that are sold in specialty distribution has risen in recent years. This trend, however, is largely driven by the advent of new, complex therapies for illnesses such as cystic fibrosis and cancer. Drug manufacturers do not commonly put oral tablets that do not require complex patient administration in specialty distribution, as closed distribution reduces sales.

II. Retrophin

Shkreli road-tested the scheme at issue here at another company that he founded, Retrophin. Shkreli is thirty-eight years old. He graduated from Baruch College in 2004 with a degree in Business Administration. After graduation, he worked as a healthcare and technology analyst for a hedge fund until he left in 2006 to found his own investment firm. In 2009, Shkreli founded the hedge fund MSMB Capital Management ("MSMB").

While still working at MSMB, in 2011 Shkreli co-founded Retrophin, a publicly-traded biopharmaceutical company, with Mulleady. Mulleady is now thirty-nine years old. He graduated from Rutgers University in 2005, having majored in mechanical and aerospace engineering. He worked in real estate and finance following graduation. While working at Morgan **[**21]** Stanley Smith Barney (now Morgan Stanley **[*598]** Wealth), he met Shkreli in 2011.

Shkreli hired Mulleady as Chief Operating Officer at MSMB, where Mulleady worked from 2011 to 2013. Shkreli served as Retrophin's CEO from December 2012 to September 2014, and designed its business model. Retrophin acquired brand-name drugs approved to treat so-called orphan diseases[15] that were the sole source in the U.S. for that treatment, closed the drugs' distribution to prevent generic drug manufacturers from acquiring the RLD, and substantially increased the drugs' prices. This was a pattern that Shkreli would repeat at Vyera.

At Retrophin, Shkreli closed the distribution systems of two branded drugs, Chenodal and Thiola, to cut off access to the RLD needed for BE testing and impede generic drug competition. Shkreli described his strategy and its purpose frankly in calls with Retrophin investors. On one such call, he explained that "we do not sell Retrophin products to generic companies" and "[t]he whole model that generics rely upon is turned upside down with specialty pharmacy distribution." He explained in another call that a closed distribution system did not allow generic drug companies to access the **[**22]** branded product "to conduct bioequivalence studies." Shkreli boasted in an email to a potential investor that the specialty distribution method Retrophin had adopted "reliably eliminated" generic competition "by refusing to supply the product to generic companies for [BE] studies required for ANDAs."

As noted, Shkreli put his strategy into practice with two drugs. Retrophin acquired Chenodal, a drug approved for the treatment of cerebrotendinous xanthomatosis ("CTX"), and restricted distribution through distributor agreements.[16] Retrophin then raised Chenodal's price from $100,000 to $515,000 per patient per year. Retrophin also licensed Thiola, a drug approved for the prevention of cystine stone formation in patients with cystinuria,[17] restricted its distribution, and raised its price from $4,000 to $80,000 per patient per year.

III. Vyera is Founded.

---

[15] An orphan disease is a rare condition (defined in the United States as affecting fewer than 200,000 people) or a common condition in undeveloped countries that is rare in developed countries.

[16] CTX is a life-threatening cholate excretion disorder. The patient population for CTX is very small, with roughly 2,000 patients in the United States.

[17] Cystinuria is a rare kidney stone disorder, also with a very small patient population.

Only one month after departing Retrophin, in October 2014 Shkreli founded Turing Pharmaceuticals LLC ("Turing"), a privately-held pharmaceutical company with its principal place of business in New York. Shkreli also founded Turing Pharmaceuticals AG ("Turing AG"), Turing's parent company, based in Switzerland. Turing's name was later changed **[**23]** to Vyera, and Turing AG became Phoenixus.

From day one, Shkreli focused his new venture on acquiring sole-source drugs that were the gold standard treatment option for life-threatening diseases with a small patient population and inferior alternative treatments, with the intent to raise their prices, block generic competition, and reap extraordinary profits. Shkreli highlighted to early Turing investors his "track record of successful transactions" at Retrophin and explained that "[e]xclusivity (closed distribution) creates a barrier and pricing power."

Shkreli remained CEO of Turing until his arrest on December 18, 2015 for securities fraud related to his prior business **[*599]** ventures, including at Retrophin. He served as chairman of the Board of Turing AG until January 20, 2016, resigning from the Board entirely on February 10, 2016. After Shkreli departed, Turing was renamed Vyera and Turing AG was renamed Phoenixus in order to distance the companies from Shkreli in the public mind. Shkreli remained the largest shareholder, however, and continued to control them and direct their strategy. At no time after Shkreli left the Board did Vyera deviate from the strategy Shkreli had designed and **[**24]** initiated.

Shkreli brought with him to Vyera several Retrophin executives, including Mulleady, Tilles, Smith, Lau, Edwin Urrutia (a Vyera co-founder and Chief Financial Officer between October 2014 and June 2016), and Patrick Crutcher (a Vyera co-founder and Senior Vice President and Head of Business Development between October 2014 and May 2017). Mulleady in particular was one of Shkreli's closest allies at Vyera before earning Shkreli's ire in 2020. Mulleady held the title of Phoenixus' Managing Director from October 27, 2014 until Vyera terminated his employment on June 3, 2016. Mulleady returned to Vyera a year later when, on June 21, 2017, he was elected to Phoenixus' Board of Directors in a Shkreli power play.

A. Vyera Acquires Daraprim.

At Shkreli's direction, Vyera's sales and business development teams evaluated market opportunities for Vyera to acquire sole-source drugs. By the Spring of 2015, Vyera focused on Daraprim as a prime candidate. Smith, Vyera's Senior Director of Business Development, instructed the sales team in April 2015 to investigate acquiring both Daraprim and another sole-source drug, sulfadiazine (often used in combination with Daraprim), because it would **[**25]** be "the classic closed distribution play." Smith testified that Daraprim provided an opportunity to build a foothold "where no one is paying attention to it." Daraprim was first approved by the FDA in 1953, and approved by the FDA in 1958 for the treatment of toxoplasmosis specifically.

Toxoplasmosis is a parasitic infection that can cause severe disease and death. The parasite is present in approximately 10% of the population, but is usually dormant. An opportunistic infection, toxoplasmosis principally impacts immunosuppressed and immunocompromised individuals such as patients who are HIV positive or recipients of organ transplants. Toxoplasmosis can cause disease in many parts of the body, but the most common manifestations are infections of the brain (toxoplasma encephalitis), eye (ocular toxoplasmosis), and in utero.

Toxoplasma encephalitis is the most common and acute presentation of the disease among immunosuppressed patients. Toxoplasmosis fatalities have dropped significantly since the launch of antiretroviral therapies in 1996, which significantly limited opportunities for a toxoplasmosis infection to become acute in HIV-positive patients. If an infection becomes active and **[**26]** advanced, a patient presenting with toxoplasma encephalitis could die within twelve to twenty-four hours unless treated. There is also a risk of severe brain damage in those who survive. As a result, physicians must have an effective treatment on hand to halt the progress of an active infection as quickly as possible.

The Opportunistic Infections Guidelines (the "Guidelines"), an authoritative publication on which physicians depend,[18] gives its highest recommendation to a pyrimethamine-based regimen for the treatment **[*600]** of acute toxoplasmosis. Pyrimethamine is the API of Daraprim.

The Guidelines rank recommended treatment options for certain diseases with a letter and a numeral. The letter grade signifies the strength of the recommendation and the Roman numerals indicate the quality of the evidence supporting the recommendation. Accordingly, an A-I grade is a recommendation based on the strongest, highest-quality evidence derived from randomized control clinical trials, or, if randomized control trials have not been conducted, methodologically sound cohort studies or meta-analyses. Lower grades are given to treatment options that have been shown to be effective but are not preferred, or are **[**27]** based on less methodologically reliable studies.

Under the Guidelines, pyrimethamine plus sulfadiazine and leucovorin[19] is given the strongest possible recommendation for treating active toxoplasma encephalitis: A-I. The recommended dosage of Daraprim, available only as a 25 milligram tablet, is an initial dose of 200 milligrams (eight pills) followed by 50 to 75 milligrams (two to three pills) daily for at least six weeks. For patients who cannot tolerate a sulfa drug, the recommended treatment is pyrimethamine plus clindamycin.

The pyrimethamine-based regimen is preferred to alternative treatments because of its efficacy and safety, long history of successful clinical use, superior potency in comparison to other treatments, and diagnostic utility when a biopsy is not feasible. A significant decrease in the size, inflation, or number of lesions in the brain following a week or more of treatment confirms the diagnosis. Because a biopsy of the brain carries extreme risks, pyrimethamine's diagnostic utility is particularly important. Pyrimethamine remains the only drug approved by the FDA for the treatment of toxoplasmosis. And, until the entry of FDA-approved generic pyrimethamine in 2020, **[**28]** Daraprim was the only FDA-approved pyrimethamine product on the market.

Before Vyera acquired Daraprim, it commissioned a physician survey to determine whether doctors "would continue to prescribe Daraprim" following a price hike. In response to the survey, doctors indicated that they considered the drug to be the "backbone of therapy" for toxoplasmosis and were "at a loss to think of an appropriate alternative." Shkreli and others at Vyera recognized Daraprim as "the gold standard" therapy for toxoplasmosis, rendering Daraprim "essentially unsubstitutable."

In April 2015, Vyera made Impax Laboratories, Inc. ("Impax"), then the owner of the U.S. licensing rights to Daraprim, an unsolicited offer of $60 million. This offer represented a considerable premium over Daraprim's market value. Annual net sales of Daraprim constituted roughly $4 million at the time, and Impax assessed its net present value as $19 million. In a transaction that closed on August 7, 2015, Vyera paid Impax $55 million, more than eleven times Daraprim's 2014 net revenues.

B. Daraprim's 2015 Price Hike and Vyera's Revenues

Until 2010, Daraprim had been owned by GlaxoSmithKline ("GSK"), a global **[*601]** pharmaceutical company **[**29]** based in the United Kingdom. Between 2011 and 2015, the new owners of Daraprim had raised the list price -- also called the wholesale acquisition cost ("WAC") -- of a tablet from $6.74 to $17.60. These price increases ranged from 15% to 30% at a time. Within days of Vyera's purchase of Daraprim and at Shkreli's direction, Vyera raised the WAC from $17.60 to $750 per tablet effective August 11, 2015. From roughly 2016 to 2019, the average net price of Daraprim (the price per tablet after subtracting discounts, chargebacks, and rebates

---

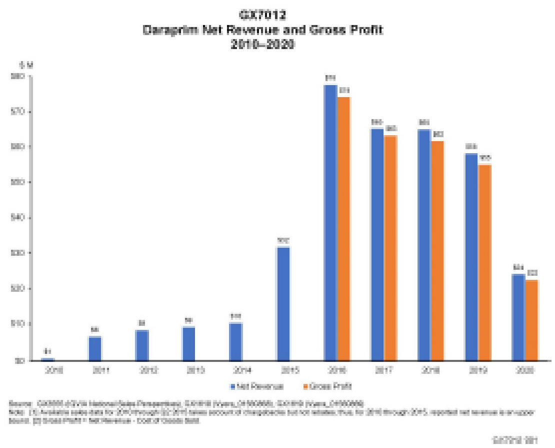
[18] The Guidelines are published by the Centers for Disease Control and Prevention, the National Institutes of Health, and HIVMA. The Guidelines reflect the medical consensus for the benefit of "clinicians, health care providers, patients with HIV, and policymakers in the United States." They are updated and reviewed regularly. The section addressed to the treatment of toxoplasmosis was last updated on July 25, 2017, and last reviewed on June 26, 2019.

[19] Leucovorin is administered to mitigate pyrimethamine's suppression of the bone marrow, which would decrease white and red blood cells if left untreated.

off the WAC) ranged between $228 and $305 per tablet. Dr. Salinas testified that the price hike was the "poster child of everything that is considered wrong about the pharmaceutical industry."

Comparing the nine-month period preceding and following Vyera's price hike, Daraprim's sales volume dropped by 66%. In September 2015, sales data from IQVIA (formerly IMS Health), a commercial data aggregator commonly used for market research in the pharmaceutical industry, indicated that the market size for Daraprim was around one million tablets annually. After that steep decline, the sales volume stabilized at roughly 200,000 to 250,000 tablets per year between **[**30]** 2016 and 2019. These sales remained steady until the first generic pyrimethamine product entered the market in March 2020.

From 2016 through 2019, Vyera made between $55 and $74 million in annual gross profits from its sales of Daraprim. Daraprim revenues in the years between 2010 to 2014 had amounted at most to $10 million a year. Vyera's estimated gross profit margin from Daraprim, calculated by subtracting Vyera's reported production costs, ranged between 89% and 98% in 2016 through 2019. The Figure below illustrates net revenue and gross profit for Daraprim sales between 2010 and 2020.



[*602] From August 2015 to the end of 2019, Daraprim sales amounted to over 96% of Vyera's total revenues.[20]

IV. Vyera's Implementation of a Closed Distribution System for Daraprim

Even before finalizing its acquisition of the rights to the drug, Shkreli made it a priority to close the Daraprim distribution channels. In June 2015, Shkreli directed Retzlaff, who ran Vyera's sales team, to move Daraprim from retail distribution into a closed distribution system "as swiftly as possible." As the interim project manager in charge of the initiative, Mulleady ensured that Shkreli's wishes for Daraprim's closed distribution **[**31]** system were implemented.

Shkreli recognized that generic entry into the pyrimethamine market was inevitable, but Shkreli hoped to delay that entry for at least three years. In July 2015, Shkreli remarked to an investor that he felt "very good that there are no incoming generics and now that it is closed distribution there will not be any going forward . . . even if we get 3 years, it is a great payout."

Daraprim had been in open distribution from its introduction into the market in the 1950s until 2015. After he had initiated his own plans to move Daraprim into specialty distribution, Shkreli learned that a prior owner of Daraprim had already begun to do so. By the time Vyera acquired Daraprim, Daraprim was distributed through two wholesale distributors and specialty pharmacies, AmerisourceBergen Corporation ("ABC") and Walgreens Specialty Pharmacy ("Walgreens").[21] Vyera continued the terms of the assigned contract with Walgreens and slowly expanded the

---

[20] In that period, Vyera earned revenue only from sales of one other drug, Vecamyl.

[21] Impax had just transitioned Daraprim from retail distribution to Walgreens specialty distribution. Orders to Walgreens were to be fulfilled by another distribution partner that Vyera inherited when it acquired Daraprim, ICS, an affiliate of ABC and ASD.

number of distribution partners for Daraprim to five distributors and specialty pharmacies. They were ASD (a subsidiary of ABC), BioRidge Pharma LLC ("BioRidge"), Cardinal, Optime, and Walgreens (together, the "Distributors"). Despite expanding **[**32]** the number of distribution partners, however, Vyera imposed class of trade restrictions in its distribution contracts, limiting the types of customers who could buy Daraprim. The end result was that no Distributor could sell Daraprim to a retail pharmacy or a generic drug company without Vyera's approval.

Vyera's distribution restrictions on Daraprim were not justified by a need to protect either patient health or Vyera from lawsuits asserting that a patient had experienced an adverse drug reaction. As noted above, Daraprim had been sold through open distribution for decades. It was considered a safe drug; the FDA never put Daraprim in a REMS program or required a black box warning on the label. Daraprim is an oral tablet that does not require special shipping, handling, storage, or administration. When the first generic pyrimethamine product was launched in March 2020, it was sold through an open distribution system.

A. Class of Trade Restrictions

Between 2015 and 2020, Vyera's Distributors were restricted to selling only to authorized customers that included government customers, hospitals, specialty pharmacies, and other specialized entities. The authorized customers or types of customers **[**33]** approved to buy Daraprim did not include generic drug companies or their agents. No Distributor was permitted to **[*603]** sell Daraprim to a generic drug manufacturer or their agent without Vyera's express approval. There is no evidence that Vyera ever gave such approval.

Vyera's contract with ASD, executed on September 2015, provides an example of the class of trade restrictions. It simply stated that the "Distributor may only sell Daraprim to Government Customers and hospitals."[22] In 2016, Vyera expanded ASD's authorized customer list to include "certain state AIDS Drug Assistance Programs (ADAPs), subject to the Company's prior written approval." An amendment in 2018 revised the authorized customer clause as follows:

> Distributor may only sell Daraprim to licensed wholesalers and specialty pharmacies that support certain state [ADAPs], subject to the Company's prior written approval, Government Customers, hospitals, and 'covered entities', as defined by *Section 340B of the Public Health Services Act* ("340B Customers"). [Vyera] will approve any new authorized customers via email and will maintain and update a monthly authorized customer file.[23]

Effective February 25, 2020 -- just as the first generic competitor **[**34]** to Daraprim was about to receive FDA approval -- the authorized customer list was expanded to permit sales to "340B contract pharmacies, any customers on the approval list provided by Company, and any new customers approved by Company in writing (with email being sufficient)."

Equivalent restrictions were in place for each Vyera Distributor. For example, as of December 2015, BioRidge was only authorized to distribute Daraprim to Walgreens Specialty Pharmacies. In 2017, Vyera entered a contract with Cardinal that limited distribution to hospitals, ADAPs, and *§ 340B* entities. A 2018 contract with Optime permitted distribution to hospitals, ADAPs, government customers, health departments ("with a valid 340b ID"), hospital distributors ("defined as a distributor that supplies a single hospital system"), and correctional facilities.

Vyera also had contracts with roughly a hundred hospitals to supply them with Daraprim directly at a discounted price so long as they agreed to limit their use of it to their "own use" and not to resell Daraprim. For example, Vyera's agreement with one distinguished medical system provided that "[p]rices available under this Term Sheet

---

[22] Government Customers were defined in the contract as the Department of Veterans Affairs or Department of Defense sites.

[23] Entities covered by *§ 340B* of the Public Health Services Act, a federal discount pricing program for entities that serve indigent populations, may purchase prescription drugs at steep discounts. *42 U.S.C. § 256b*. A *§ 340B* entity was permitted to buy Daraprim for $1 per 100-pill bottle.

shall only apply with respect **[**35]** to product purchased by Hospital for its 'own use' as that term is described in *Abbott Laboratories Inc. v. Portland Retail Druggists, 425 U.S. 1, 96 S. Ct. 1305, 47 L. Ed. 2d 537 (1976)*, [without regard to whether Company is a non-profit entity described in *section 501 of the Internal Revenue Code*]."

B. Bottle Limits

Vyera also controlled the distribution of Daraprim by imposing limits on the number of Daraprim bottles that a single customer could purchase at a time. For example, in December 2015, ASD agreed to cap orders from *§ 340B* program participants to five bottles "per week per order," with any exceptions for larger orders requiring approval from Vyera. Vyera's Director of Patient Access openly admitted that the quantity limits imposed in 2015 were introduced to make it harder for generic drug **[*604]** companies to acquire "large quantities" of Daraprim "in order to copy the drug and compete with it." He was quoted in a news article published on October 5, 2015, stating that if a generic drug maker tried to order Daraprim,

> Most likely I would block that purchase. . . . We spent a lot of money for this drug. We would like to do our best to avoid generic competition. It's inevitable. They seem to figure out a way [to make generics], no matter what. But I'm certainly not going to make it easier for them.

Vyera added similar restrictions to **[**36]** its contracts with other Distributors. For example, under its 2018 contract with Optime, "[a]ll orders greater than 3 bottles require[d] Vyera approval."

As the entry of generic competition became more imminent, Shkreli urged that the limits on the sale of Daraprim bottles be further tightened. On August 8, 2019, while incarcerated following his conviction for securities fraud, Shkreli was recorded asking Mithani about the likelihood that a doctor could order more than one bottle of Daraprim at a time. When Mithani responded that it is "very likely", Shkreli responded that "that's what I've been stressing to you guys for the last three years, to look at that very carefully, you know, meet those doctors." Shkreli went on to say "there has to be some way to tighten the supply chain a bit . . . I just want to make sure you guys are doing everything you can." When Mithani told Shkreli that Vyera "can't say no" to hospitals, Shkreli responded, "Okay. Well, that's a shame."

Just days before, upon learning of the efforts made by the generic pharmaceutical company Fera to purchase Daraprim RLD, Shkreli had urged Vyera to limit all sales of Daraprim to one bottle at a time. Shkreli told Mulleady **[**37]** that

> the company should, you know, just make sure it really doesn't sell more than one bottle at a time, you know. That would be -- the number one thing I would do and just really screen every doctor that, you know -- even if it drops sales a little bit, it's a good -- you know, really make sure he's [referring to Fera's owner] not getting his hands on anything.

C. Surveillance

Vyera monitored its Distributors' daily and weekly sales reports to prevent the diversion of Daraprim to generic drug companies for BE testing. It promptly followed up on any sales it considered unusual to stop any leakage.

The monitoring began as soon as Vyera acquired Daraprim. For example, on August 13, 2015 -- just two days after the Daraprim price hike -- Vyera saw a sales report from ICS reflecting a sale of 40 bottles to a customer. Vyera asked ICS to cap the maximum number of bottles sold to any one customer, explaining Vyera's

> concern that a generic company could access multiple bottles of our product, perhaps attained through a hospital reselling it or distributing product to surrounding retail pharmacies, and use it to create a generic version.

In response, ICS agreed to limit sales to five bottles at a **[**38]** time. Shkreli was informed of the "[n]eed to investigate the 40 unit buy."

Vyera repeatedly instructed its Distributors to refrain from selling Daraprim to potential competitors for clinical trials. For example, in February 2017, a company that obtains RLD for generic pharmaceutical companies ordered a 30-count bottle of Daraprim from ASD. ASD advised Vyera that it had denied the request due to "the conversation around generics." Later in 2017, Vyera directed ASD to rebuff another **[*605]** company that reached out to ASD to buy Daraprim for use in a clinical trial.

The speed and effectiveness of Vyera's surveillance system is dramatically illustrated by its interception of five bottles of Daraprim intended for a generic drug distributor -- Dr. Reddy's -- in April 2018. On April 5, ASD delivered the five bottles to a pharmacy pursuant to an order placed on April 4. Vyera's surveillance system flagged the purchase on April 5, investigated the purchaser, learned the bottles were destined for a company that supplies RLD for bioequivalence and clinical trials, and by April 6, Mulleady met with the company's owner in a parking lot to repurchase the bottles for $750,000. This was twice the price the **[**39]** pharmacy had paid for the bottles.

Vyera's frantic interception of this purchase prompted it to lock down Daraprim distribution even more strictly. Vyera instructed ASD to block that pharmacy's access to any Daraprim. It then dramatically shrank the number of customers to which ASD and Cardinal were permitted to sell Daraprim without specific prior authorization from Vyera. For ASD, this resulted in a reduction of approved customers from approximately 13,000 to roughly 555. Vyera similarly cut Cardinal's list of approved accounts from about 14,700 to fewer than 1,500. Vyera also reduced the number of bottles that ASD could sell to any one of the pre-approved customers, reducing the number to four bottles unless the customer was a *§ 340B* customer.

D. Benefits to Distributors

The Distributors benefitted financially from their contracts with Vyera despite the restrictions on their sales of Daraprim. This was true for as long as Daraprim was sold at a high price. Vyera compensated the Distributors with either a fixed fee (Optime) or a percentage of WAC based on volume sold (ASD, Cardinal, BioRidge, and Walgreens). ASD, for example, received $2,062.50 for each 100-count bottle of Daraprim it sold. **[**40]** By contrast, when Dr. Reddy's launched its generic pyrimethamine product in March 2020, it offered ASD's parent company a price of only $877.50 per bottle.

V. Vyera's Restriction of Access to the API Pyrimethamine

Besides blocking access to the Daraprim that generic drug manufacturers needed to conduct BE testing, Shkreli also worked to block their access to pyrimethamine, the API in Daraprim. He was well aware that the sooner a generic company could find an established API manufacturer the sooner it could launch a generic version of Daraprim. Vyera locked up the supply of pyrimethamine to U.S.-based generic drug companies through exclusive supply agreements with the two most attractive pyrimethamine suppliers: Japan's Fukuzyu Pharmaceutical Company ("Fukuzyu") and India's RL Fine.

A. Fukuzyu

Fukuzyu, an established and prominent Japanese chemical manufacturer, was the long-term supplier of pyrimethamine for Daraprim. Fukuzyu had been producing pyrimethamine since 1966, had held a DMF for pyrimethamine since 1992, and is the manufacturer referenced in Daraprim's NDA. The only other manufacturer to have filed a pyrimethamine DMF, Ipca, had lost its right to sell pyrimethamine in the United **[**41]** States in 2015.[24]

Fukuzyu typically requires a customer to provide an estimate of how much API it will require for a given period. Such clauses mitigate a purchaser's supply risk and **[*606]** help Fukuzyu manage its production schedule.

Fukuzyu's contract with GSK, for example, requires GSK to produce forecasts of how much API it will need for a defined period and requires Fukuzyu to deliver that amount. GSK holds the worldwide rights to Daraprim outside of North America. The contract states that GSK "[s]hall provide [Fukuzyu's] Agent with a rolling forecast schedule of demand showing their estimated requirements for PYRIMETHAMINE for the following twelve (12) months ('Forecast Schedule')," and "[t]he Product detailed in the first 3 months ('Firm Order Period') of each Forecast Schedule will represent firm orders for PYRIMETHAMINE" to which Fukuzyu must respond within five days. "[E]ach Firm Order will be regarded by the Parties as a binding irrevocable commitment" to purchase pyrimethamine from

---

[24] The FDA imposed an import ban on Ipca in 2015.

Fukuzyu, which in turn obligates Fukuzyu to manufacture enough API to meet the order. The GSK contract also requires Fukuzyu to ensure that it has "at all times sufficient manufacturing capacity to meet **[**42]** [GSK]'s . . . requirements for PYRIMETHAMINE as shown in the Forecast Schedule." GSK's contract with Fukuzyu does not include an exclusivity clause.

Impax, the company from which Vyera purchased Daraprim, had purchased pyrimethamine from Fukuzyu through a broker without even entering into a supply contract. Shkreli was immediately interested in reversing that practice. He wanted an exclusive supply agreement with Fukuzyu. With the help of a consultant, Vyera eventually succeeded by representing that it had several ambitious projects and hoped to use Fukuzyu as a long-term API supplier for each of those projects. In October 2016, three Vyera executives traveled to Japan to visit Fukuzyu. They were Pelliccione, then Vyera's Senior Vice President for Regulatory Affairs, Dr. Salinas, and Vyera's Head of Chemistry, Manufacturing, and Controls.

Vyera bluntly explained to Fukuzyu that it needed an exclusive supply contract to prevent generic Daraprim from entering the United States market. In November 2016, Dr. Salinas directed Vyera's consultant to inform Fukuzyu that "[i]f generic products are put on the U.S. market" Vyera will face a "serious problem, and may eventually terminate the marketing **[**43]** of Daraprim as well as the R&D in toxoplasmosis"; that generic pyrimethamine "will hamper" Vyera's plans to develop new pharmaceutical products and "may leave toxoplasmosis as a forgotten disease with insufficient therapeutic effects"; and that Vyera's plans are "ONLY POSSIBLE" if Vyera has exclusive access to Fukuzyu's API. The consultant was also to stress that Fukuzyu would "not benefit" if generic companies sold pyrimethamine in the U.S. market since generic companies would sell pyrimethamine at a "significantly lower" price.

By November 22, 2016, Fukuzyu had agreed not to sell pyrimethamine "to generic companies." According to Vyera's consultant, Fukuzyu's CEO was particularly pleased that Vyera planned to "develop four more new compounds and would like [Fukuzyu] to work together" with it on those compounds.[25]

On January 25, 2017, Phoenixus entered into a three-year exclusive supply agreement with Fukuzyu. The exclusivity term states that

> [Fukuzyu] shall provide the API Bulk Drug Substance, pyrimethamine exclusively to [Phoenixus] for the use, sale, and/or distribution in the Territory. To **[*607]** be clear, the use, sale, and/or distribution of pyrimethamine described in this section refers **[**44]** to the use, sale, and/or distribution of the API Bulk Drug Substance for humans only.[26]

The Territory was defined as the United States.

The Fukuzyu contract also provided that the minimum purchase quantity of pyrimethamine was 50 kilograms. Vyera, which contracts for the manufacture of pyrimethamine, needs 35 kilograms for a batch of Daraprim to be manufactured. Since executing the exclusive supply agreement, Vyera has twice purchased pyrimethamine from Fukuzyu.

The agreement with Fukuzyu does not ensure that Vyera will have a supply of pyrimethamine or require Fukuzyu to prioritize Vyera's orders over those from its other customers. It does not, for instance, require Vyera to forecast its API requirements or obligate Fukuzyu to reserve any quantity of pyrimethamine or manufacturing capacity to produce pyrimethamine. It does not even require Fukuzyu to fill a Vyera order.

Under the agreement, Vyera must submit a purchase order to Fukuzyu. If Fukuzyu does not acknowledge the order in writing within ten days, it has no obligation to fill the order. The agreement states that:

---

[25] As of 2021, Vyera has filed investigative new drug applications ("INDs") for new potential drugs but has not launched any new product.

[26] Since Fukuzyu sells pyrimethamine to a veterinary drug company that uses it to produce drugs for horses in the United States, there was a carveout permitting Fukuzyu to continue selling the API to other U.S. drug companies for use in animals.

> [Daraprim] is historically a low volume product for [Vyera]. Due to the infrequent need to manufacture [Daraprim], [Vyera] **[**45]** will provide [Fukuzyu] a Firm Order for API, in the form of a Purchase Order. Receipt of the Purchase Order denotes [Vyera]'s binding request to purchase API within 180 days of date of Purchase Order. [Fukuzyu] will accept Firm Orders by sending an acknowledgement to [Vyera] within 10 business days of its receipt of the Firm Order.

What Vyera obtained through its agreement with Fukuzyu was the right to bar other buyers, and Vyera strictly enforced that right. For example, in November 2017, Fukuzyu inquired whether it could sell pyrimethamine to a company that intended to resell it to a U.S.-based pharmaceutical company for a drug to be sold in South America. Vyera asked Fukuzyu to include in the sales agreement that the API sold to the US company "will not be used to make pyrimethamine drug product, for human use, that will find its way back to the US for commercial purposes," and "that the API will ONLY be used for drug products sold and used in South America." Fukuzyu agreed.

B. RL Fine

As of 2015, most generic drug companies would have sought to purchase pyrimethamine from Fukuzyu. Vyera closed off that avenue of supply with its exclusive supply agreement with Fukuzyu. After Fukuzyu, **[**46]** RL Fine was the second most attractive source of supply. In 2017, after Shkreli learned that generic companies were going to obtain pyrimethamine from RL Fine, he moved quickly to cut off that source of supply as well.

RL Fine is based in Bangalore, India and had been manufacturing pyrimethamine since at least 2004. RL Fine sells pyrimethamine directly to customers; it does not use distributors. As of 2016, RL Fine had a European pyrimethamine DMF but had not filed a U.S. DMF.

In 2017, in defending against an investigation that preceded the filing of this lawsuit, **[*608]** Vyera emphasized the importance of RL Fine to generic drug manufacturers. It downplayed the significance of its exclusive supply agreement with Fukuzyu in a letter to the Office of the New York Attorney General dated May 5, 2017, by asserting that "generics manufacturers can obtain pyrimethamine API from a variety of sources, even without the option to purchase it from Fukuzyu". It cited RL Fine as one of those alternatives. Vyera explained that

> the cost for a potential competitor to qualify API from the European DMF holder RL Fine Chemicals would be less than $100,000, as the company has already validated its production process **[**47]** and has a DMF ready to file in the United States. Such a cost can hardly be deemed a barrier to entry, especially when viewed as part of the overall process of drug development.

Yet when Vyera learned from its consultant on August 7, 2017, that two generic drug companies, Mylan and Sandoz, were planning to buy pyrimethamine from RL Fine, Shkreli acted quickly to block their access. On August 24, Shkreli drafted an email from prison for Mithani to send to RL Fine. The email represented that Vyera was "looking to purchase 10-20kg/annually of pyrimethamine API with a US DMF" for a "combination product with leucovorin." Mithani sent Shkreli's drafted email to RL Fine verbatim. RL Fine replied that it was "already working on pyrimethamine and would not be able to offer [it] to you." Vyera was undeterred and continued to negotiate with RL Fine.

In October 2017, Vyera received independent confirmation from executives attending a trade conference in Frankfurt that RL Fine was supporting generic drug companies that would soon file ANDAs. On October 25, Shkreli texted Mulleady from prison using a contraband phone:[27] "its shkreli -- trying to get in touch with you urgently -- hearing pyri ANDA approval **[**48]** in december 2017."

Within eight days of that email, on November 2 Mulleady offered RL Fine $1,250,000 per year and other financial enticements "to formalize our exclusive agreement" for pyrimethamine API. In late November, Mulleady and Mithani

[27] For a period of time, Shkreli had a contraband phone in prison that he used to communicate with, among others, Mulleady and Mithani. *Fed. Trade Comm'n v. Vyera Pharms., LLC, No. 20CV00706 (DLC), 2021 U.S. Dist. LEXIS 102757, 2021 WL 2201382 (S.D.N.Y. June 1, 2021)*.

flew to India to meet with RL Fine. By November 25, Vyera and RL Fine had agreed on the terms of an exclusive supply agreement.

Vyera made no bones about its motive for entering this exclusive supply agreement. It needed to block the access of generic manufacturers to RL Fine pyrimethamine. The minutes of the December 15, 2017 Phoenixus board meeting present the rationale for Vyera's costly agreement with RL Fine as "the potential market entry by generics manufacturers and distributors." According to the minutes, "one or two potential competitors are currently in the process of preparing their market entry." The minutes report that Mulleady and Mithani, by then Board members of Phoenixus and in control of the company's management functions, believed "addressing potential generic competitors are in the Vyera Group's interest" and justified the extraordinary price Vyera agreed to pay RL Fine.

On December 17, Vyera executed two contracts with RL Fine: **[**49]** A Distribution and Supply Agreement ("Supply Agreement") and a Product Collaboration Agreement ("Collaboration Agreement"). The twenty-five-page Supply Agreement gave Vyera "the exclusive right to sell, distribute, and market" RL Fine's pyrimethamine for five years and limited RL Fine to **[*609]** selling pyrimethamine for use outside India only "with the consent" of Vyera.

In return, Vyera paid RL Fine $1 million "towards expenses for filing the US" DMF for pyrimethamine. Vyera also agreed to pay RL Fine royalty payments in the amount of 7.5% of net revenues on its sales of Daraprim, with a guaranteed minimum payment of $3 million. Under the Supply Agreement, Vyera's obligation to make royalty payments other than the guaranteed amount of $3 million would terminate if and when a generic pyrimethamine product entered the U.S. market.

Under the Collaboration Agreement, which had a one-year term, Vyera paid a non-refundable $1 million towards R&D expenses and preparation of a DMF. The Collaboration Agreement acknowledged the parties' Supply Agreement.

Having signed the Supply Agreement, RL Fine stopped supplying pyrimethamine to the generic drug manufacturers Cerovene and InvaTech. Vyera has paid **[**50]** RL Fine approximately $300,000 to $450,000 a month in royalty payments. By October 2019, Vyera had paid RL Fine almost $7 million in monthly royalty payments alone, and almost $9.5 million in total. Vyera's payments to Fukuzyu pale in comparison. Over this time period, Vyera has paid Fukuzyu approximately $500,000.

Neither the Supply Agreement nor the Collaboration Agreement required RL Fine to file a DMF with the FDA or conditioned any payment on RL Fine completing any of the steps necessary to file a U.S. DMF. RL Fine never paid even the $57,795 DMF filing fee to the FDA, despite receiving $1 million from Vyera to do so, or took any other steps toward filing a DMF for pyrimethamine. Similarly, Vyera never sought FDA approval to use RL Fine's API in Daraprim, or took any other steps to be able to use RL Fine as a backup supplier of pyrimethamine. Pelliccione, Vyera's executive in charge of regulatory matters, didn't even know of the RL Fine contract until he was preparing for this trial. It had never even crossed his mind that Vyera needed a second source for pyrimethamine. In sum, Vyera received nothing in return for the millions of dollars it paid to RL Fine except the foreclosure **[**51]** of generic competitors' access to RL Fine's pyrimethamine.

Facing regulatory pressure, on October 20, 2019, Vyera paid RL Fine $750,000 to terminate the Supply Agreement. RL Fine threatened to speak to the FTC if it did not get a termination fee.

VI. Delay of Generic Entry

Shkreli's efforts to delay the entry of generic competition to Daraprim succeeded. The following chart sets out the dates on which the four generic manufacturers filed their ANDAs, and the dates on which three of those ANDAs were approved.

Generic	**ANDA Filed**	**Approved**	**Time to Approval**
Cerovene/Dr. Reddy's	5/8/2014	2/28/2020	70 months
InvaTech	7/28/2017	Pending as	53+ months

Generic	ANDA Filed	Approved	Time to Approval
		of January 2022	
Fera	12/19/2019	7/27/2021	31 months
Teva Pharmaceuticals	1/27/2021	8/13/2021	7 months

[*610] Vyera's multifaceted campaign to delay the entry of generic pyrimethamine succeeded in substantially delaying the entry of at least Cerovene and Fera. Vyera made it exceedingly difficult for each of them to obtain the pyrimethamine API and a sufficient quantity of Daraprim RLD for BE testing.

A. Barriers to Entry

As of 2015 only two API suppliers held a pyrimethamine DMF in the United States: Fukuzyu and Ipca. Fukuzyu was the long-term supplier of the API for Daraprim. Because **[**52]** Ipca's supply of pyrimethamine became subject to an FDA-imposed import ban, Fukuzyu was the only option for any pharmaceutical company in the United States seeking a pyrimethamine API supplier that held an active DMF.

RL Fine was the next-best option for a supply of pyrimethamine for generic drug companies seeking to compete with Daraprim because it was familiar with the FDA's requirements; it had DMFs on file with the FDA for other APIs. In addition, it marketed its drug products globally, already manufactured significant quantities of pyrimethamine, and held a European pyrimethamine DMF. Possession of a European DMF typically indicates that one can also meet U.S. DMF standards.

With its exclusive supply agreements, Vyera blocked access to these two sources of API. Shkreli began efforts to obtain an exclusive supply agreement with Fukuzyu in 2015. Vyera and Fukuzyu came to terms in November of 2016 and executed their contract in January of 2017. In 2017, at Shkreli's urging, Vyera also entered into an exclusive supply agreement with RL Fine. It paid RL Fine millions of dollars to do so.

Shkreli also cut off access to the RLD that generic drug companies needed to do the BE testing required **[**53]** for FDA approval of an ANDA. Understanding the importance of access to the RLD, Shkreli adopted a closed distribution system for the sale of Daraprim. This was the model he had adopted at Retrophin to block generic competition to Retrophin's pharmaceuticals.

Against this backdrop, several generic drug companies worked for years to obtain an API supplier and quantities of the RLD, a process that in the ordinary course should have taken weeks. Cerovene was the first to get its ANDA approved and its efforts to obtain an API supplier and the requisite RLD will be described first. Fera's path to entering the market will be described next. Finally, there will be brief descriptions of the experiences of InvaTech and Mylan.

B. Cerovene and Dr. Reddy's Laboratories

Cerovene, a pharmaceutical research and development firm founded in 2006, is focused on the development of generic drugs. Cerovene does not manufacture API, but manufactures the finished drug product, creates the documents necessary to submit the ANDA to the FDA, works with the FDA to gain approval, and produces a finished product for distribution after approval.

Dr. Reddy's is Cerovene's generic pyrimethamine marketing partner. Dr. **[**54]** Reddy's is a large multinational pharmaceutical company that sells about 150 drug products, primarily generic versions of innovator drugs (that is, the first FDA-approved drug created containing a specific API). As it did with Cerovene, Dr. Reddy's often licenses a third party's developed drug or partners with a third party to develop a drug for Dr. Reddy's to bring to market. After a seven-year effort, Cerovene received FDA approval of its ANDA for generic pyrimethamine on February **[*611]** 28, 2020, and Dr. Reddy's launched the generic product on March 20, 2020.

Cerovene began developing generic Daraprim in 2013 and submitted its ANDA to the FDA on May 8, 2014. It expected that a generic version of Daraprim would be profitable based on the price of Daraprim at the time, which was approximately $12 per tablet. In late 2015, Dr. Reddy's explored developing a generic version after Vyera dramatically hiked up Daraprim's price. It learned in March 2016 that Cerovene had already filed an ANDA, and on January 3, 2017, Dr. Reddy's and Cerovene entered into a licensing agreement.

In evaluating the market opportunity of generic Daraprim, Dr. Reddy's conservatively expected that Cerovene's ANDA would **[**55]** be approved by August 2017, with the product launch occurring by early 2018. Dr. Reddy's also projected that Cerovene's generic would launch at a 55-70% discount off Daraprim's list price (depending on how many other generic competitors entered the market) and expected to take a significant fraction of the branded drug's sales.

Cerovene's experience in acquiring RLD to support its 2014 ANDA was typical of the process generic drug companies generally encounter. Cerovene had done the BE testing that it included in its May 2014 ANDA with nine 100-tablet bottles of Daraprim that it had purchased in 2013 from an independent pharmacy for a total price of just over $10,000. Shah, Cerovene's co-founder and President, recalled that it had taken approximately one day for the pharmacy to acquire the nine Daraprim bottles on Cerovene's behalf.

Cerovene then encountered a setback. It had planned to obtain pyrimethamine from Ipca and had referenced Ipca's DMF in its ANDA, but the 2015 FDA import ban on Ipca's products required it to find a new supplier. In October 2015 and March 2016, Cerovene and Ipca wrote letters to the FDA seeking an exemption to the import ban for Ipca-manufactured pyrimethamine. **[**56]** The FDA denied the requests on April 15, 2016.

Meanwhile, Cerovene attempted to purchase 50 kilograms of pyrimethamine from Fukuzyu. Cerovene first contacted Fukuzyu in 2015, and Fukuzyu supplied a sample of pyrimethamine for Cerovene to assess for suitability. By September 2016, Shah believed that Fukuzyu had agreed to supply Cerovene with pyrimethamine to develop its generic product. But in October -- the same month that Vyera executives visited Japan -- Fukuzyu refused to supply the API. In a letter to Cerovene dated October 4, 2016, Fukuzyu explained that it would not supply pyrimethamine "to anyone because of low business potential and high risk associated with the business." Yet, as described above, Fukuzyu executed an exclusive supply agreement with Vyera in January 2017.

Cerovene promptly turned its sights on RL Fine as the next-best option. Although RL Fine did not have an FDA-approved DMF for pyrimethamine, Cerovene considered it a promising alternative supplier due to its experience manufacturing pyrimethamine for use outside the U.S. and because it held DMFs for other products.

On November 16, 2016, Cerovene and RL Fine executed a five-year supply agreement. The agreement **[**57]** obligated RL Fine to provide a pyrimethamine DMF that would be referenced in an amendment to Cerovene's ANDA. In return, Cerovene paid RL Fine $100,000, with another $100,000 due upon approval of its ANDA.

Cerovene's agreement with RL Fine had an exclusivity provision. That provision was intended to protect Cerovene's investment in getting RL Fine qualified as an API supplier in the United States and forestall free riding by other generic drug companies on Cerovene's investment. RL **[*612]** Fine confirmed that it would support Cerovene's pyrimethamine ANDA in early 2017 and supplied 33.5 kilograms of API, which was enough for Cerovene to test and launch its product.

On April 2, 2017, Cerovene submitted a major amendment to its ANDA changing its API supplier from Ipca to RL Fine. In the amendment, Cerovene informed the FDA that RL Fine had been manufacturing pyrimethamine on a commercial basis in European and Asian markets and noted that the FDA had inspected RL Fine as recently as June 2015. Cerovene included RL Fine's manufacturing information as an amendment to its ANDA instead of relying on RL Fine to handle the DMF process separately. This appeared to Cerovene to be the fastest way to get **[**58]** FDA approval.

Because of the switch in supplier from Ipca to RL Fine, the FDA issued a complete response letter to Cerovene's amended ANDA dated December 26, 2017, requiring Cerovene to conduct new BE testing using RL Fine's API and an unexpired lot of RLD. New BE testing was the only substantial correction required by the FDA, but the Daraprim that Cerovene had purchased in 2013 had expired, so Cerovene immediately tried to buy five more bottles.

Cerovene made an extensive search for the RLD that proved futile. It tried and failed to acquire RLD from five different suppliers, on occasion making simultaneous prepayments. It made multiple applications to the FDA requesting partial waivers of the BE retesting requirement. After roughly twelve months of effort, Cerovene had purchased only three bottles of Daraprim. It did so in November 2018 at a total cost of $375,000.

Cerovene first sought RLD on December 29, 2017, from the pharmacy that had supplied it with Daraprim bottles in 2013, but the pharmacy was no longer able to supply it with Daraprim. The next day, Cerovene ordered five bottles at a cost of $112,000 each from another pharmacy but cancelled the order in February 2018 when the **[**59]** pharmacy proved unable to fill the order.

On January 22, 2018, Cerovene asked the FDA to reconsider its new BE testing requirement due to its difficulty acquiring Daraprim RLD. Cerovene explained that "the RLD is inaccessible and unavailable in the US for BE or other testing because it is the subject of a restricted distribution program." On June 29, 2018, the FDA denied Cerovene's requests to conduct new BE testing by using its expired lots of Daraprim or to conduct alternative studies. The FDA noted that it "did not have additional recommendations that can address the issue of RLD inaccessibility" and that "Daraprim is not subject to a REMS, and the restrictions on supply of Daraprim described in your letter are not required by the [FDA]." The agency added,

> If you have been unable to obtain supplies of the drug from the manufacturer or other distributers, and you believe this refusal constitutes anticompetitive behavior, we encourage you to raise the matter with the Federal Trade Commission, which is responsible for addressing anticompetitive practices.

Throughout 2018, Cerovene struggled to find a distributor that could deliver sufficient RLD. Dr. Reddy's did not typically help its **[**60]** partners procure RLD but by the end of January, it had stepped in to aid Cerovene. As a far larger company, Dr. Reddy's believed that its connections might work.

Dr. Reddy's efforts included prepaying $550,000 in March 2018 to Reliant for five bottles of Daraprim. Reliant is a New Jersey-based pharmaceutical wholesale company that "procure[s] branded Innovator Samples/Reference Listed Drugs for bioequivalence **[*613]** and clinical trials." Reliant, however, was unable to purchase any Daraprim from its normal sources.

When Reliant tried to buy Daraprim bottles from ASD, ASD directed Reliant to place its order directly with Vyera. Vyera never responded to Reliant's request for five bottles.

Relying on a family connection, Reliant turned to a small New Jersey pharmacy and arranged for the pharmacy to order five bottles of Daraprim from ASD. As described above, Vyera immediately flagged that transaction and hurried to repurchase the five bottles for twice their purchase price during a meeting in a Starbucks parking lot in New Jersey.

The pharmacy had placed its order with ASD on April 4, 2018 for five bottles, which were delivered the next day. Vyera's Kirby emailed ASD on April 5 to verify that the **[**61]** pharmacy was an "approved account type[]" and requested that ASD put a hold on the pharmacy's account for "placing further orders until we can determine if there is alignment with our distribution model." ASD answered that it had approved the sale in error and confirmed that the purchase could not be stopped as the bottles had already shipped. A Vyera employee then called the pharmacy and spoke to the owner.

Vyera repurchased the five bottles for $750,000 on April 6, 2018. Vyera's CEO Mulleady drove to Parsippany, New Jersey to meet Reliant's owner in a Starbucks parking lot and repurchased the bottles. Mulleady also handed the owner of Reliant a draft contract titled "Product Purchase and Collaboration Agreement." The document proposed that Reliant and its affiliates "agree not to purchase, directly or indirectly, or their own account or on account of others, or to cause or direct any third party to purchase, directly or indirectly, any Daraprim, except directly through normal commercial channels." Reliant never signed the document. Despite its continuing efforts, Reliant only delivered one bottle of Daraprim in June of 2018.

Cerovene and Dr. Reddy's also used a Swiss distributor, ProSupplier **[**62]** GmbH ("ProSupplier"), which also required an advance payment to begin locating Daraprim RLD. Cerovene and Dr. Reddy's initially resisted prepaying both Reliant and ProSupplier for RLD that may never materialize; they had also heard that ProSupplier was in fact attempting to obtain Daraprim through Reliant. As more time passed, however, Dr. Reddy's and Cerovene decided to accept the risk of holding open two orders at the same time and prepaid $375,000 to ProSupplier in September for three bottles of Daraprim, with another $375,000 to be paid after delivery.

ProSupplier delivered three bottles of Daraprim in November 2018, but as they came from a different manufacturing lot than the one bottle obtained by Reliant, the four bottles could not be combined to meet the FDA's BE testing and the RLD retention requirements. With the three bottles in hand, Dr. Reddy's cancelled its outstanding order with Reliant.

Cerovene had written the FDA again in July 2018 to stress that Daraprim appeared to be subject to a restricted distribution program and was inaccessible in the United States. It requested a reduction in the amount of RLD needed for BE testing and retention. In April 2019, the FDA permitted **[**63]** Cerovene to conduct BE testing with just the three bottles of Daraprim that it had been able to acquire from ProSupplier.

Meanwhile, due to Vyera's interference, Cerovene was forced to search for yet another API supplier. During a November 30, 2017 meeting in India, RL Fine informed Cerovene's Shah that, notwithstanding their five-year contract, it would **[*614]** no longer supply Cerovene with any more pyrimethamine.

Cerovene returned to Ipca, which had acquired another company with manufacturing facilities. Cerovene executed a supply agreement on February 19, 2019, that was conditioned on FDA approval of Ipca's affiliate as Cerovene's API supplier. Cerovene invested in developing the company's pyrimethamine manufacturing capacity from scratch, but even with Ipca transferring its manufacturing process, it took until late 2019 for the company to provide Cerovene with the materials necessary to supplement its ANDA.

From May to June 2019, Cerovene proceeded to conduct BE testing using the RL Fine API that it had received in 2017 and the three bottles of Daraprim obtained from ProSupplier in November 2018. It submitted its results to the FDA in September 2019. Then, on February 25, 2020 -- after Vyera **[**64]** terminated its exclusive agreement with RL Fine in October 2019 -- RL Fine agreed once more to supply Cerovene with pyrimethamine pursuant to their 2016 agreement. Three days later, Cerovene's generic pyrimethamine product received FDA approval and an AB rating to Daraprim. Dr. Reddy's launched the generic on March 20, 2020. Cerovene began manufacturing commercial batches of generic pyrimethamine using RL Fine's API in 2021.

Vyera delayed Cerovene's entry into the market by roughly thirty months, that is, from September 2017 to its actual entry date of March 2020. This timeline is premised on Cerovene having been able to obtain API from Fukuzyu in October 2016 and being able to obtain Daraprim without any delay. Cerovene, as explained at trial by its principal, would have needed approximately eleven months to obtain approval for an amended ANDA in these circumstances.[28] Shah testified that it would have taken one month to manufacture a registration batch of the generic drug product. He would have redone the BE testing during the three-month period needed for stability testing. He predicted that he would have filed an amended ANDA changing Cerovene's API supplier to Fukuzyu in or around **[**65]** February 2017. Assuming that the FDA would have taken six months to review of Cerovene's amendment, it would have approved Cerovene's ANDA by August 2017. Dr. Reddy's would have launched Cerovene's FDA-approved generic pyrimethamine one month later, by September 2017.

As was true when Dr. Reddy's actually launched Cerovene's generic competitor to Daraprim in 2020, the effect of the entry of FDA-approved generic pyrimethamine on the price of Daraprim would have been immediate. Upon the

[28] Shkreli did not challenge this testimony at trial.

entry of the Dr. Reddy's generic product, Vyera began to compete on price by offering steep rebates and brand-for-generic deals to various pharmacies and pharmaceutical benefit managers.[29]

C. Fera

The second pharmaceutical company to bring FDA-approved generic pyrimethamine to the market is Fera. Fera is based in Locust Valley, New York, and develops generic and branded drugs. DellaFera founded Fera in 2009 to develop niche products that face barriers to entry and **[*615]** are often overlooked by the pharmaceutical industry.

Fera is a virtual drug company, which means that it does not have its own manufacturing capacity; it contracts with other manufacturers to produce its products. When developing a new drug, Fera **[**66]** usually partners with reputable API suppliers that have experience complying with the FDA's cGMPs regulations.

In September 2015, Fera decided to develop generic pyrimethamine after learning about Vyera's Daraprim price hike in the media. After confirming that about one million tablets of Daraprim were being sold per year at the time, Fera began to search for API suppliers holding a U.S. DMF for pyrimethamine.

In February 2016, Fera inquired of Fukuzyu about purchasing pyrimethamine. Fukuzyu did not respond.

On June 13, 2016, Fera entered into an agreement with another manufacturer to develop a pyrimethamine API manufacturing process exclusively for Fera's use. That manufacturer had never made pyrimethamine. Fera invested about $2 million for the development of a pyrimethamine manufacturing process. The company completed its work in October 2017.[30]

Meanwhile, Fera continued its efforts to acquire the API from an already established source. Despite its investment in an API development process, Fera understood that its ANDA would be approved more quickly if it relied on a supplier that already had an FDA-approved pyrimethamine DMF.

In September 2017, Fera reached out to Fukuzyu a second time. **[**67]** Fera sought a sample of pyrimethamine API to test against the API being produced by its manufacturing partner, and also hoped that Fukuzyu would agree to become its pyrimethamine supplier for generic Daraprim. That proved to be impossible. At Vyera's direction, Fukuzyu's agent told Fera that it had to guarantee that Fukuzyu's pyrimethamine would not be used in a drug for human use in the United States "either via normal prescription drug distribution" or via compounding.[31]

In the Fall of 2016, Fera also sought to purchase Daraprim RLD for BE testing and to use as a comparator with the product being produced by its manufacturing partner. Its efforts were largely fruitless.

On November 7, 2016, Fera's McDougal reached out to Pharmaceutical Buyers, Inc. ("PBI"), a distributor, to acquire samples of Daraprim. PBI responded that Daraprim was "only available to hospitals and government facilities at this time." McDougal next inquired of a hospital pharmacist at a major university, who responded that "according to our hospital policy and distributor contract, I can only procure from what is defined as own use for hospital business." Fera was finally able to acquire small amounts of Daraprim by **[**68]** using a physician's prescription at a pharmacy. That Daraprim would not meet FDA requirements for BE testing, however, because the sample contained too few tablets, was provided in an unsealed vial, and had no manufacturing lot number.

Fera also attempted to procure Daraprim through its contract research organization ("CRO"), Xcelience. Fera had entered into an agreement with Xcelience on **[*616]** December 22, 2016, to develop a generic prototype and

---

[29] A brand-for-generic rebate is a rebate offered on the price of a brand name drug by a pharmaceutical company in exchange for a pharmacy agreeing to dispense the brand name drug in lieu of the generic version when filling prescriptions. The end payer pays the generic cost of the copay despite receiving the brand name drug.

[30] Due to the difficulty obtaining RLD, Fera did not begin working on a DMF until late 2018. It filed the DMF on May 28, 2019.

[31] Drug compounding is a practice whereby a pharmacist combines, mixes, or alters pharmaceutical ingredients to create a medication in a non-FDA-approved facility. Compounded drugs are not reviewed by the FDA for safety or efficacy.

manufacture the end product. Xcelience quickly ran into the same roadblocks Fera had met in its own efforts to acquire RLD. On January 4, 2017, Xcelience relayed to Fera that "the manufacturer is now limiting distribution of Daraprim only to hospitals and government agencies directly." When Xcelience reached out to Vyera, Vyera explained that Fera would have to enter into an agreement accepting full liability from any use of Daraprim. This is the first time a purchase of RLD had been conditioned on Fera executing an indemnification clause. Fera replied by striking the proposed indemnity clause, which ended negotiations.

McDougal continued to inquire of PBI in February and again in May of 2017, to no avail. In July 2017, Fera ended its relationship **[**69]** with Xcelience at least in part because it had failed to procure the RLD.

Fera signed a development contract with another CRO in November 2017. Fera also negotiated a partnership with a contract manufacturing organization ("CMO"). That CMO completed its first manufacture of Fera's generic pyrimethamine product in March 2019.

Meanwhile, in January 2018, Fera succeeded in purchasing two 100-count bottles of Daraprim from Reliant at a cost of $115,000 per bottle. Fera declined to purchase more bottles at that time, partly because the bottles came from a manufacturing lot that expired in Summer 2019, that is, before Fera was sure that it could conduct BE testing. Fera intended to purchase additional bottles from Reliant as its development timeline became clearer. In April 2018, Reliant informed Fera that Vyera's Mulleady had repurchased its inventory of Daraprim and that it could not acquire more.

Using an industry broker, Vyera's Mulleady asked to meet with Fera in April of 2018. DellaFera met with Mulleady in April and May of 2018. Following instructions from Shkreli, Mulleady quizzed DellaFera about his plans, dangling the possibility of a joint venture as he did. Mulleady told DellaFera **[**70]** that he had repurchased Reliant's entire stock of Daraprim. He also related that he had flown to India to lock RL Fine into an exclusive contract in order to prevent it from supplying two major pharmaceutical companies, Mylan and Sandoz, with pyrimethamine. He explained that Vyera was paying RL Fine a royalty on Daraprim sales. When Mulleady added that he knew the identity of Fera's API supplier, DellaFera understood this as a threat that Vyera was willing to interfere with Fera's source of API as well. At this point, DellaFera became concerned that Fera might never get pyrimethamine into the market. DellaFera had no interest in a joint venture with Vyera and the discussions came to a close.

Like Cerovene, Fera had already asked the FDA for a waiver of its BE testing requirements due to difficulty acquiring RLD. In October 2017, Fera proposed performing a pharmacokinetic study, which would not require Daraprim RLD, in lieu of BE testing. Fera explained that

> the unavailability due to the restricted access program created by the RLD has made the development of a generic version of the product largely impossible. Additionally, the cost of the RLD is exorbitant, forcing even patients to **[**71]** forego this medically necessary treatment.

The FDA denied Fera's request.

On June 1, 2018, Fera requested a competitive generic therapy designation from the FDA that would allow for expedited review of Fera's application. It also asked for a meeting with the relevant FDA officials to ensure that its ANDA was on track. In August 2018, Fera sought a waiver "for the minimum number of RLD samples required to be retained from the conduct **[*617]** of the Fed and Fasting BE studies." Fera pointed out that

> [t]he RLD sponsor for this drug product, Vyera, utilizes a closed pharmacy distribution model. This has resulted in extreme difficulty in obtaining sufficient samples of drug product normally needed to meet all ANDA test analysis and BE study requirements.

In January 2019, the FDA again denied Fera's request.

On March 4, 2019, Fera's team participated in a call with the FDA's Office of Generic Drugs. DellaFera stressed how difficult it was to locate RLD and that it had taken over a year to buy just two bottles. He described his conversations with Mulleady, including Mulleady's admission that Vyera had entered an exclusive API supply agreement with RL Fine to eliminate competition from Mylan and Sandoz. **[**72]** In April, Fera formally requested another waiver to conduct BE testing with only two bottles of Daraprim, which the FDA granted in June.

Fera immediately conducted BE testing of its generic pyrimethamine product, undertook six months of stability testing, and filed its ANDA in December 2019. The FDA responded by requiring Fera to conduct additional tests on its API, and in August 2020, the FDA sent Fera a complete response letter citing deficiencies in the impurity profile of Fera's API. Due to the COVID-19 pandemic, it took Fera until December 2020 to complete the resubmission. On July 27, 2021, the FDA approved Fera's generic pyrimethamine ANDA.

Vyera delayed Fera's entry into the generic pyrimethamine market by roughly twenty-four months. This timeline assumes that Fukuzyu would have agreed to supply Fera with pyrimethamine after Fera reached out to it for a second time in September 201 and that Fera had unimpeded access to Daraprim RLD. DellaFera estimates that, operating on those assumptions, Fera's generic Daraprim would have entered the market twenty-three months later, or in August 2019 instead of shortly after Fera's ANDA was approved in July of 2021.

As DellaFera explained at **[**73]** trial, Fera would have acted promptly to finalize an agreement with a CMO partner to manufacture the drug. The CMO would have taken between three o four months -- or up to April 2018 at the latest -- to manufacture the necessary batches of generic pyrimethamine for six months of stability testing, bringing the timeline to October 2018. During this six-month period, Fera would have conducted BE testing, assembled its ANDA, and been prepared to file its ANDA by November 2018. Presuming eight months for review, the FDA would have approved Fera's ANDA in July 2019, avoiding any delays caused by the COVID-19 pandemic. As Fera's CMO would have been producing batches of generic pyrimethamine for commercial sales while awaiting FDA approval, Fera would have been ready to launch its product within a month, or by August 2019.[32]

D. InvaTech

InvaTech has also filed an ANDA for generic pyrimethamine. Identifying RL Fine as its supplier of API, InvaTech filed an ANDA on July 28, 2017. Due to its exclusive supply agreement with Vyera, however, RL Fine stopped cooperating with InvaTech and InvaTech was forced to find a new supplier of API. Although Vyera's actions have delayed InvaTech's entry into the **[**74]** market, there are too many unknowns to attribute any particular period of delay to Vyera. InvaTech has still not received FDA approval for its ANDA.

InvaTech, founded in 2009, is a New Jersey pharmaceutical company that develops **[*618]** and markets around twenty products. In 2014, it began its effort to develop generic pyrimethamine. In October of 2014, InvaTech bought six 100-tablet bottles of Daraprim for a total of just over $8,000.

Like Cerovene, InvaTech initially chose Ipca as its API supplier, but was forced to look elsewhere following the FDA's 2015 Ipca import ban. In the summer of 2015, RL Fine agreed to supply pyrimethamine to InvaTech. In February 2017, InvaTech and RL Fine executed a Preliminary Collaboration Agreement covering pyrimethamine and two other products for which RL Fine would supply the API. RL Fine agreed to file a DMF for pyrimethamine. While the Agreement left RL Fine free to supply pyrimethamine to other companies, InvaTech was given preferential pricing. The Agreement specified that InvaTech would file its pyrimethamine ANDA in either 2017 or 2018.

InvaTech used RL Fine's API to conduct BE testing. Because RL Fine had not yet filed a DMF, InvaTech requested in June **[**75]** 2017 that RL Fine provide it with the documentation regarding its pyrimethamine manufacturing process for InvaTech to include in its ANDA. With that information, on July 28, 2017, InvaTech filed its pyrimethamine ANDA.

On September 11, 2017, the FDA sent a response that included questions about RL Fine's API, setting an answer deadline of September 18. InvaTech sought assistance from RL Fine, but RL Fine ignored each of its requests. By that time, Vyera and RL Fine were in the midst of negotiating their exclusive supply agreement.

---

[32] At trial, Shkreli did not take issue with this timeline.

Given the urgency of the situation, Patel flew to India in September for a two-hour meeting with RL Fine. In that meeting and through other communications, Patel learned that RL Fine would no longer support InvaTech's pyrimethamine ANDA even though it continued to support InvaTech's work on the other two products.

On May 22, 2018, the FDA issued a complete response letter to InvaTech's ANDA. The FDA cited major deficiencies, including deficiencies with the API information. RL Fine again ignored InvaTech's requests for help.

Having lost first Ipca and then RL Fine as its API supplier, InvaTech turned to a third company. On July 31, 2019, InvaTech amended its ANDA **[**76]** to reflect the transfer of its API source to that third company. To this day, InvaTech continues to work toward approval of a generic Daraprim product.

E. Mylan

Vyera was successful in preventing one of the largest manufacturers of generic drugs in the United States from entering the market. Prompted by the dramatic increase in Daraprim's price, Mylan explored developing generic pyrimethamine. In February 2016, Mylan began to search for potential pyrimethamine API suppliers. By December 2016 Mylan concluded that RL Fine was the only supplier that could provide pyrimethamine "off the shelf and not require a development agreement." By that time, however, RL Fine had entered the exclusive supply agreement with Cerovene.

Like Cerovene and Fera, Mylan was also unable to acquire Daraprim RLD through its regular distributors and approved vendors. It could not get "even a single bottle." Mylan's Head of Global Project Management can only recall two or three other times out of hundreds of projects in which Mylan had such trouble. In those instances, the difficulties were easily explained by the fact that the RLD was part of a REMS program. Unable to find a source of the API or to obtain Daraprim, **[**77]** Mylan abandoned its nascent plans to develop generic pyrimethamine.

[*619] VII. Impact of Competition on Prices of Daraprim

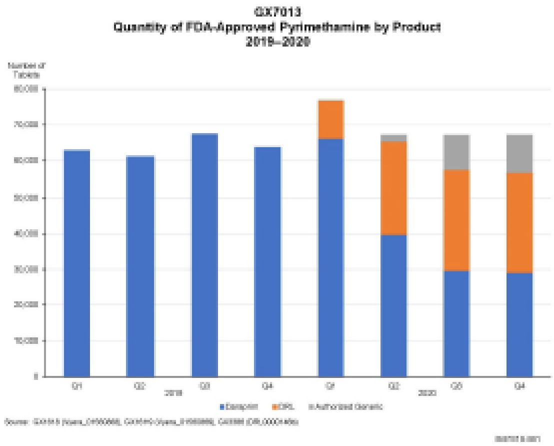
In early 2020, Vyera braced for the imminent approval of Cerovene's ANDA and subsequent launch of Dr. Reddy's FDA-approved generic pyrimethamine product. In an internal forecast prepared in March 2020, Vyera projected that the net price for a Daraprim tablet would immediately drop from $278 to $126 after generic entry, based on the assumption that Dr. Reddy's generic would launch at a 61% discount on April 1, 2020. Assuming that another generic competitor would enter the market on September 1, Vyera projected that the business lost by the end of the year due to generic competition would increase to $2.1 million per month and amount to close to $13 million for the year 2020.

Dr. Reddy's FDA-approved generic pyrimethamine launched with a WAC of $292.50. Daraprim immediately faced stiff price competition, and the net price of FDA-approved pyrimethamine products dropped substantially. During its first nine months on the market, the average net price of Dr. Reddy's generic pyrimethamine was $197 per tablet, a significant discount from $228, which was the average net price of **[**78]** Daraprim in the prior year. By the end of 2020, Dr. Reddy's generic pyrimethamine had captured 41% of the sales volume for all FDA-approved pyrimethamine. At the same time as the price of FDA-approved pyrimethamine dropped, the total volume of FDA-approved pyrimethamine sales increased. The sales volume expanded by 9% when 2020 sales are compared to 2019 sales. This expansion recovered some of the sales lost when Vyera hiked Daraprim's price by 4,000% in 2015.

In March 2020, Vyera launched its own generic pyrimethamine tablet (the "Vyera AG").[33] The Vyera AG had captured only 16% of the FDA-approved pyrimethamine market by the end of 2020.

The chart below illustrates the relative market share of Daraprim, the Vyera AG (identified as "Authorized Generic"), and

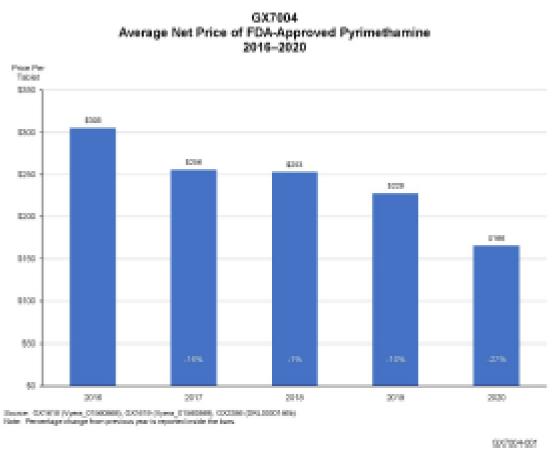
[33] A generic of a brand name drug may be launched under the brand's preexisting FDA approval. It is known as an authorized generic.



[*620]

Dr. Reddy's generic pyrimethamine (identified as "DRL") between the first quarter of 2019 and the last quarter of 2020.

The next chart illustrates the change in the average net price of all FDA-approved pyrimethamine, which dropped from $228 in 2019 to $166 in 2020 -- a decrease of 27%. This rate of decrease exceeded any year-over-year net price drop that had occurred since 2016.



[*621] In response to the entry of Dr. Reddy's generic pyrimethamine, **[**79]** Vyera cut the net price of Daraprim through steep rebates and brand-for-generic offers to pharmacies and pharmacy benefit managers. Despite these offers from Vyera, the availability of generic alternatives to Daraprim allowed pharmacy benefit managers to cover the cheaper generic competitors at the lowest tiers of their formularies and to exclude Daraprim from their formularies. For example, in January 2021 CVS Caremark moved Daraprim to "excluded status" on its standard control formulary. It explained its decision as follows: CVS Caremark, like most payors, promotes a "generic-first strategy." Where the branded drug is expensive and two generics became available, it is "a very cost-effective strategy" to exclude the brand from the formulary. With the entry of more generic competitors in the FDA-approved pyrimethamine market, the price of FDA-approved pyrimethamine can be expected to fall further.

VIII. The Role of Martin Shkreli at Vyera

Shkreli founded Vyera. He did so with the intention to use Vyera to acquire a pharmaceutical that was the sole source of treatment for a life-threatening ailment, raise the drug's price sky-high, and keep it sky-high for as long as possible by blocking **[**80]** generic competition.

Shkreli was Vyera's first CEO, a position he held from October 10, 2014 to December 18, 2015. It was Shkreli who made the decision to acquire Daraprim and to implement his scheme with Daraprim. He directed his team to identify a small, essential drug out of patent protection and without generic competition that could be priced exorbitantly.

That drug was Daraprim. Shkreli signed off on Vyera's unsolicited bid to acquire it at a price far above its present value.

[*622] Shkreli raised the price of Daraprim to $750 per tablet. When Vyera's General Counsel objected to the price hike, Shkreli fired him.

To block generic competition, Shkreli devised a highly restrictive, closed distribution system for Daraprim and told Vyera that it was a top priority to put it in place by the time of the price hike. Shkreli also instructed his staff to buy back Daraprim inventory from wholesalers and distributors.

Having checked the FDA's pyrimethamine DMF list, Shkreli decided to pursue an exclusive supply contract with Fukuzyu. As Tilles, Shkreli's immediate successor as CEO, explained, the 2017 Fukuzyu contract was "something [Shkreli] wanted and it happened." As the arrival of a generic competitor **[**81]** grew more likely, in 2017 Shkreli decided to pursue an exclusive supply contract with pyrimethamine manufacturer RL Fine as well.

Shkreli remained in functional control of Vyera's management and its business strategy even after his arrest in December 2015 and in spite of management's occasional resistance. He was Vyera's largest shareholder and at any one time controlled between 43.07% and 49.44% of its voting shares. Even during his incarceration, Shkreli worked to ensure that his grand strategy not only remained in place but actually worked. Critically, none of the resistance put up by Shkreli's successors included unwinding Vyera's anticompetitive strategy. To the contrary, all of Vyera's CEOs pursued Shkreli's original vision.

Shkreli recruited employees and agents to carry out his vision at Vyera and picked the men who ran Vyera after he stepped down as its CEO. That those agents' names appear on documents executed after Shkreli's formal departure in lieu of his own does not shield him as the scheme's prime mover from individual liability. Shkreli initiated every anticompetitive decision that Vyera pursued to its conclusion. He maintained "shadow control" of the company, staying **[**82]** in close contact with Vyera's directors and officers, providing guidance on how to maintain control of the market, and threatening to use his authority as the largest shareholder to call an extraordinary general meeting ("EGM") that would install more pliant officers and directors. He did exactly that in 2017 and again in 2020, each time installing loyalists.

As Tilles has testified, he couldn't do anything "major" as CEO of Vyera without Shkreli's approval. When Shkreli became frustrated with Tilles, he replaced him with Dr. Salinas. Shkreli quickly became dissatisfied with Dr. Salinas too, proclaiming in one email that Dr. Salinas was a "cockroach that needed to be stomped or crushed."

Utilizing his controlling voting shares, Shkreli replaced Dr. Salinas with Mulleady. In June of 2017, Shkreli called an EGM of the shareholders to vote on a new slate of Directors. The Phoenixus Board and Shkreli put up competing slates.

In its Invitation to shareholders, the Board strongly opposed Shkreli's slate as unqualified and conflicted. The Board advised that

> many third parties -- including regulatory authorities -- will likely deem the newly elected Board members to be serving merely as straw **[**83]** men acting on Mr. Shkreli's behalf, and could further deem Mr. Shkreli to be in a position to influence, direct or control the Board and thus, the Company as well.

At the EGM held on June 21, 2017, Shkreli's slate was elected.

The new Board members notably lacked experience in the pharmaceutical industry. Those new members included Mulleady and Mithani. Tilles had fired Mulleady after **[*623]** Shkreli's arrest because Mulleady lacked "any skills" to offer the company. Mithani had graduated from college just three years earlier. His only prior employment was at a distressed debt brokerage firm, which he had quit to manage his own investment portfolio. Mithani has admitted that he was not qualified to join the board of a pharmaceutical company and that he was placed on the Board because Shkreli wanted "people he can trust."

The next day, the Board placed Dr. Salinas, then interim CEO, on leave and established an Executive Committee to "perform executive functions and take over the task of the Senior Management (CEO, CFO, CCO and CLO)." The Executive Committee had only two members: Mulleady and Mithani.

Mulleady promptly sent a reassuring email to Vyera's sales force, which was confronting an FDA **[**84]** announcement that it would expedite review of pyrimethamine ANDAs. He explained,

> In my opinion, this not an immediate concern. Getting to the point of filing an ANDA is a cumbersome process. Personally, I can tell you the FDA approval is generally not the main barrier to entry for generics in our class. Amongst other necessities, a company would have to successfully create the active ingredient on scale using a well-controlled process and then formulate. Next they would have to obtain RLD (registered listed drug), 10 labelled and unexpired bottles (informed estimation), of Daraprim to complete a study in healthy volunteers to demonstrate bioequivalence.
>
> Getting to the front of the line is helpful, but getting to the line is not an easy task. I can't imagine ANDA submission preparation taking less than 18 months (extremely conservative). Since [Vyera] actively collects competitive intelligence concerning other potential developers, we would most likely be aware of this process going on and have plenty of time to prepare.

Mulleady also ordered a "full out audit" of Daraprim to know where "every bottle" of Daraprim went. He made sure that Shkreli got the audit results.

If anything, Shkreli **[**85]** tightened his control over Vyera as his criminal problems progressed. Concern was expressed at an August 30, 2017 Board meeting that the company was buying back shares at a price below par value "to increase Martin Shkreli's holding in the Company and to facilitate his control over it." At Mulleady and Mithani's urging, the Board nonetheless approved the buyback. The Board then appointed Mulleady CEO in October 2017.[34]

Shkreli kept in regular contact with both Mulleady and Mithani to discuss when a generic Daraprim drug might enter the market and what should be done to slow that entry. As shown in an Excel spreadsheet maintained by Mulleady, between December 26, 2019 and July 14, 2020 alone, at a time when Shkreli was in prison, Mulleady and Shkreli communicated over 1,500 times.

In the few recordings of Shkreli's conversations from prison with Vyera management that are part of the trial record, Shkreli openly discussed his control over Vyera. He observed that he had "EGM power." Shkreli said "I have no problem firing everybody to be frank, if you guys **[*624]** can't figure it out." In September 2020, Shkreli told Mulleady that any dissenters amongst the Directors needed to understand that "being **[**86]** on the board of Phoenixus means, you know, you're on the Martin and Kevin board." Shkreli compared himself to Mark Zuckerberg and Vyera to Facebook, noting that Zuckerberg "just happens to own the thing and that's the way it is," and "[y]ou can't go in there and tell Zuckerberg what to do."

In February 2020, Shkreli used his EGM power to change Vyera's management team once again. This time, he removed Mulleady. Mulleady had added a "confidential" item to the agenda of an upcoming Board meeting. It was intended to address Shkreli's meddlesome involvement with Vyera. But before it could be discussed, Shkreli called for an EGM, Mulleady was removed from the Board, and Shkreli's new directors were installed.

Discussion

The FTC has brought claims against Shkreli for violations of *§§ 1* and *2 of the Sherman Act*. The States have brought claims against Shkreli based on violations of various state statutes and Pennsylvania common law, all of which follow federal precedent. After finding that the Plaintiffs have carried their burden of proving by a

---

[34] Mulleady served as the interim Executive Director of Vyera and Phoenixus from October to December 2017, then became Vyera's CEO from January 1, 2018 until February 19, 2019. Mulleady was removed as the Chairman of the Board of Phoenixus on November 17, 2020 and removed from the Board on December 11 at another EGM called by Shkreli.

preponderance of the evidence that Shkreli violated *§§ 1* and *2 of the Sherman Act* and the state laws at issue here, the Plaintiffs' requests for relief will be addressed.

I. Legal Standard **[**87]**

A. Section 5 of the FTC Act

The FTC brings this action pursuant to authority given to it in the FTC Act. The FTC Act declares "[u]nfair methods of competition" to be unlawful, *15 U.S.C. § 45*, and directs the FTC to prevent violations of the FTC Act. "Unfair methods of competition" under the FTC Act encompass violations of the *Sherman Act*. *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 454-55, 465-66, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*.

B. *Section 1 of the Sherman Act*

Section 1 of the Sherman Act outlaws "[e]very contract, combination . . . , or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. The "primary purpose of the antitrust laws is to protect interbrand competition. Low prices . . . benefit consumers." *State Oil Co. v. Khan, 522 U.S. 3, 15, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*.

To prove a *§ 1* violation, a plaintiff must show that there was "a combination or some form of concerted action between at least two legally distinct economic entities that constituted an unreasonable restraint of trade." *United States v. Apple, Inc., 791 F.3d 290, 313 (2d Cir. 2015)* (citation omitted). "[O]fficers or employees of the same firm do not provide the plurality of actors imperative for a *§ 1* conspiracy" because "an internal agreement to implement a single, unitary firm's policies does not raise the antitrust dangers that *§ 1* was designed to police." *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

"The first crucial question in a *Section 1* case is . . . whether the challenged conduct stems from independent decision or from **[**88]** an agreement, tacit or express." *Apple, 791 F.3d at 314-15* (citation omitted). Courts presumptively apply a rule of reason analysis to challenged agreements to determine whether they restrain trade. *1-800 Contacts, Inc. v. Fed. Trade Comm'n, 1 F.4th 102, 114 (2d Cir. 2021)* (citing *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*). Therefore, "antitrust plaintiffs must demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful." *Texaco, 547 U.S. at 5*. **[*625]** Anticompetitive effects may be shown through direct evidence of increased prices in the relevant market. *1-800 Contacts, 1 F.4th at 118*.

Under the rule of reason,

> [a] plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. After a prima facie case of anticompetitive conduct has been established, the burden shifts to the defendant to proffer procompetitive justifications for the agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means.

Id. at 114 (citation omitted).

The rule of reason analysis requires a court to weigh "the relevant circumstances of a case to decide whether a restrictive practice constitutes an **[**89]** unreasonable restraint on competition." *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 183 (2d Cir. 2012)* (quoting *Monsanto Co. v. Spray—Rite Service Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*). Such factors may include "specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co., 522 U.S. at 10*.

Exclusive dealing arrangements "implicate *§ 1* because they have the potential unreasonably to exclude competitors or new entrants from a needed supply, or to allow one supplier to deprive other suppliers of a market for their goods." *Geneva Pharms. Tech. Corp. v. Barr Lab'ys Inc., 386 F.3d 485, 508 (2d Cir. 2004)*. Exclusive dealing is a § 1 violation "only when the agreement freezes out a significant fraction of buyers or sellers from the market." Id.

Exclusive dealing agreements may "have pro-competitive purposes and effects, such as assuring steady supply, affording protection against price fluctuations, reducing selling expenses, and promoting stable, long-term business relationships." Id. In analyzing the procompetitive effects of these agreements, "courts must take care to consider the competitive characteristics of the relevant market." Id.

C. Section 2 of the Sherman Act

Under § 2 of the Sherman Act, it is unlawful to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States." 15 U.S.C. § 2. A claim brought under § 2 of the Sherman Act has two **[**90]** elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Takeda Pharm. Co. Ltd., 11 F.4th 118, 137 (2d Cir. 2021) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)). "To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct." In re Adderall XR Antitrust Litig., 754 F.3d 128, 133 (2d Cir. 2014) (quoting Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)).

Monopoly Power

Monopoly power is "the power to control prices or exclude competition." Geneva Pharms., 386 F.3d at 500 (quoting United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 334, 81 S. Ct. 1243, 6 L. Ed. 2d 318 **[*626]** (1961)). Defendants with monopoly power have "the ability (1) to price substantially above the competitive level and (2) to persist in doing so for a significant period without erosion by new entry or expansion." AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 227 (2d Cir. 1999). A plaintiff can establish a defendant's monopoly power either "directly through evidence of control over prices or the exclusion of competition, or it may be inferred from a firm's large percentage share of the relevant market." Geneva Pharms., 386 F.3d at 500.

"While market share is not the functional equivalent of monopoly power, it nevertheless is highly relevant to the determination of monopoly power." Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 98 (2d Cir. 1998). As such, "defining a relevant market is generally a necessary component **[**91]** of analyzing a monopolization claim." PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 108 (2d Cir. 2002). "Once a relevant market is determined, the defendant's share in that market can be used as a proxy for market power." Id.

"The relevant market must be a market for particular products or services, the outer boundaries of which are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 64 (2d Cir. 2019) (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)). "[A] single brand of a product or service may be a relevant market under the Sherman Act if no substitute exists for that brand's products or services." US Airways, 938 F.3d at 66 (citation omitted). On the other hand, products "need not be identical" to exist in the same market. AD/SAT, 181 F.3d at 227. Pharmaceutical drugs that are "therapeutically equivalent" can nevertheless exist in separate markets. Geneva Pharms., 386 F.3d at 496. To define the boundaries of the relevant market, courts can look toward

> such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

US Airways, 938 F.3d at 64 (quoting Brown Shoe, 370 U.S. at 325).

Courts will find sufficient cross-elasticity of demand if "consumers **[**92]** would respond to a slight increase in the price of one product by switching to another product." Geneva Pharms., 386 F.3d at 496. One of the tests that courts employ to discern the relevant market is the hypothetical monopolist test ("HMT"). Under that test, courts ask "[w]hether a hypothetical monopolist acting within the proposed market would be substantially constrained from increasing prices by the ability of customers to switch to other products." *United States v. Am. Express Co., 838 F.3d 179, 198-199 (2d Cir. 2016)* (citation omitted).

> The Court implements the HMT by imagining that a hypothetical monopolist has imposed a small but significant non-transitory increase in price ("SSNIP") within the proposed market. If the hypothetical monopolist can impose this SSNIP without losing so many sales to other products as to render the SSNIP unprofitable, then the proposed market is the relevant market. By contrast, if consumers are able and inclined to switch away from the products in the proposed market in sufficiently high numbers to render the SSNIP unprofitable, then the proposed market definition **[*627]** is likely too narrow and should be expanded.

Id. at 199.

The Department of Justice and the FTC most often use a SSNIP of five percent. U.S. Dep't of Justice & Fed. Trade Comm'n, Horizontal Merger Guidelines **[**93]** § 4.1.2 (2010). Once the relevant market is established, courts have found that "a market share of over 70 percent is usually strong evidence of monopoly power." *Tops Markets, 142 F.3d at 99*.

Anticompetitive Conduct

The second element of the monopolization claim "requires a plaintiff to establish that the defendant has engaged in improper conduct that has or is likely to have the effect of controlling prices or excluding competition." *Takeda, 11 F.4th at 137* (citation omitted). "For there to be an antitrust violation, generics need not be barred from all means of distribution if they are barred from the cost-efficient ones." *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 656 (2d Cir. 2015)* ("*Actavis PLC*") (citation omitted).

"[O]nce a plaintiff establishes that a monopolist's conduct is anticompetitive or exclusionary, the monopolist may proffer nonpretextual procompetitive justifications for its conduct. The plaintiff may then either rebut those justifications or demonstrate that the anticompetitive harm outweighs the procompetitive benefit." *Actavis PLC, 787 F.3d at 652* (citation omitted).

II. Plaintiff States' Laws

Seven States have joined in this action. They are the States of New York, California, Ohio, Illinois, and North Carolina, and the Commonwealths of Pennsylvania and Virginia.

A. New York

The New York Donnelly Act, New York's antitrust statute, declares **[**94]** illegal

> Every contract, agreement, arrangement or combination whereby . . . [c]ompetition or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state is or may be restrained or whereby . . . for the purpose of establishing or maintaining any such monopoly or unlawfully interfering with the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state any business, trade or commerce or the furnishing of any service is or may be restrained.

N.Y. Gen. Bus. Law § 340(1). The New York Donnelly Act is "modeled after the *Sherman Act* and should generally be construed in light of Federal precedent." *Biocad JSC v. F. Hoffmann-La Roche, 942 F.3d 88, 101 (2d Cir. 2019)* (citation omitted).

Section 63(12) of the New York Executive Law authorizes the New York Attorney General to seek equitable relief. In relevant part, *§ 63* provides:

> Whenever any person shall engage in repeated fraudulent or illegal acts or otherwise demonstrate persistent fraud or illegality in the carrying on, conducting or transaction of business, the attorney general may apply . . .

> for an order enjoining the continuance of such business activity or of any fraudulent or illegal acts, [and] directing restitution **[**95]** and damages . . . . The term "persistent fraud" or "illegality" as used herein shall include continuance or carrying on of any fraudulent or illegal act or conduct. The term "repeated" as used herein shall include repetition of any separate and distinct fraudulent or illegal act, or conduct which affects more than one person.

N.Y. Exec. Law § 63(12).

"Any conduct which violates state or federal law or regulation is actionable" **[*628]** under *Executive Law § 63(12)*. *People ex rel. Vacco v. World Interactive Gaming Corp., 185 Misc. 2d 852, 714 N.Y.S.2d 844, 848 (N.Y. Sup. Ct. 1999)*. When a defendant engages in conduct within New York prohibited by *Executive Law § 63(12)*, the Attorney General is authorized to seek relief on behalf of out-of-state residents injured by the wrongdoing. *People ex rel. Cuomo v. H & R Block, Inc., 58 A.D.3d 415, 870 N.Y.S.2d 315, 316 (1st Dep't 2009)*; see also *Vyera, 2021 U.S. Dist. LEXIS 183303, 2021 WL 4392481, at *4*.

B. California

The *California Cartwright Act, Cal. Bus. & Prof. Code § 16700 et seq.*, prohibits "conspiracies or agreements in restraint or monopolization of trade." *Exxon Corp. v. Superior Ct., 51 Cal. App. 4th 1672, 60 Cal. Rptr. 2d 195, 200 (1997)*, as modified on denial of reh'g (Feb. 13, 1997). The analysis of claims brought under California's Cartwright Act "mirrors the analysis under federal law because the Cartwright Act . . . was modeled after the *Sherman Act*." *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* (citation omitted).

The California Unfair Competition Law prohibits "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. In actions brought by the Attorney General, courts may "grant such mandatory injunctions as may be reasonably necessary to restore and preserve fair **[**96]** competition in the trade or commerce affected by the violation." *Cal. Bus. & Prof. Code § 16754.5*.

C. Illinois

The Illinois Antitrust Act ("IAA") instructs that "[w]hen the wording of this Act is identical or similar to that of a federal ***antitrust law***, the courts of this State shall use the construction of the federal law by the federal courts as a guide in construing this Act." *740 Ill. Comp. Stat. 10/11*. "Illinois courts interpret the state ***antitrust law*** in harmony with federal case law construing analogous provisions of federal legislation." *McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1062 (7th Cir. 2019)* (citation omitted). *Section 10/7(1) of the IAA* authorizes the Illinois Attorney General to bring actions to prevent and restrain violations of *§ 3 of the IAA*, and courts are directed to enter such judgment as they consider necessary to remove the effects of any such violations. *740 Ill. Comp. Stat. 10/7(1)*.

D. North Carolina

Under the *North Carolina Unfair or Deceptive Practices Act, N.C. Gen. Stat. § 75-1*, "[e]very contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce in the State of North Carolina is hereby declared to be illegal." *N.C. Gen. Stat. § 75-1*. The Attorney General is authorized to investigate "all corporations or persons doing business in this State . . . with the purpose of acquiring such information as may be necessary to enable him to prosecute **[**97]** any such corporation, its agents, officers and employees for crime, or prosecute civil actions against them if he discovers they are liable and should be prosecuted." *N.C. Gen. Stat. § 75-9*.

E. Ohio

The *Ohio Valentine Act, Ohio Rev. Code Ann. § 133*, is "patterned after the *Sherman Antitrust Act*, and as a consequence [Ohio's highest] court has interpreted the statutory language in light of federal judicial construction of the *Sherman Act*." *C. K. & J. K, Inc. v. Fairview Shopping Ctr. Corp., 63 Ohio St. 2d 201, 407 N.E.2d 507, 509 (Ohio 1980)*. "Ohio has long followed federal law in interpreting the Valentine Act." *Johnson v. Microsoft Corp., 106*

Ohio St. 3d 278, 2005- Ohio 4985, 834 N.E.2d 791, 794-95 ***[*629]*** *(Ohio 2005)*. The Ohio Attorney General has a duty to "do all things necessary" to enforce the antitrust laws, by bringing suits for "equitable relief." *O.R.C. § 109.81*.

F. Pennsylvania

To establish a claim under Pennsylvania's common law doctrine against unreasonable restraint of trade, the plaintiff may show that "the illegal bargain tends to create or has for its purpose to create a monopoly in prices or products," or that "competition has in fact been restricted by the monopolistic agreement." *Collins v. Main Line Board of Realtors, 452 Pa. 342, 304 A.2d 493, 496-97 (Pa. 1973)*. The Pennsylvania Supreme Court has applied federal courts' interpretation of the *Sherman Act* to state common law antitrust claims. See id.

G. Virginia

Virginia Code § 59.1-9.5 parallels *§ 1 of the Sherman Act* and provides that "[e]very contract, combination or conspiracy in restraint of trade or commerce of this Commonwealth is unlawful." *Section § 59.1-9.6* parallels *§ 2 of the Sherman Act* **[**98]** and provides that "[e]very conspiracy, combination, or attempt to monopolize, or monopolization of, trade or commerce of this Commonwealth is unlawful." The Virginia Antitrust Act, Va. Code Ann. § 59.1 et seq, requires that the statute "shall be applied and construed to effectuate its general purposes in harmony with judicial interpretation of comparable federal statutory provisions." *Va. Code Ann. § 59.1-9.17*. The Virginia Attorney General may seek "injunctive relief" for violations of the Act. *Virginia Code § 59.1-9.15(a)*.

III. Liability

The Plaintiffs have shown that Shkreli is liable for Vyera's unreasonable restraint of trade and monopolization of the FDA-approved pyrimethamine market in violation of *§§ 1* and *2 of the Sherman Act*. His conduct also violated the competition laws of each of the Plaintiff States.

Shkreli's anticompetitive scheme was made up of two simple but effective sets of vertical restraints.[35] Shkreli does not dispute that it was his intention to impede generic pharmaceutical companies from launching competitive products that would threaten the price of Daraprim. The Plaintiffs have shown that the restraints Vyera implemented succeeded in doing just that.

The two restraints -- restrictive distribution contracts for Daraprim and exclusive supply agreements for pyrimethamine -- exploited **[**99]** features of the FDA approval process for generic drug products by unreasonably and unlawfully restricting the markets for RLD and API. These agreements violated *§ 1 of the Sherman Act*. Through these agreements, Shkreli and Vyera unlawfully and willfully maintained a monopoly in FDA-approved pyrimethamine, which is the relevant market in which Shkreli and Vyera operated their anticompetitive scheme. Vyera maintained that monopoly through anticompetitive conduct and not "from growth or development as a consequence of a superior product, **[*630]** business acumen, or historic accident." *Takeda, 11 F.4th at 137* (citation omitted).

B. The Relevant Market

The analysis under *§§ 1* and *2 of the Sherman Act* relies, as a threshold matter, on the definition of the relevant market. The Plaintiffs have proven that, by any established method, FDA-approved pyrimethamine is the relevant product market and the United States is the relevant geographic market. Shkreli does not dispute that the United States is the relevant geographic market.

---

[35] The Plaintiffs proved at trial that separate provisions in Vyera's contracts with Distributors were intended to impede the entry of generic drug companies into the FDA-approved pyrimethamine market by depriving those companies of accurate information about Daraprim sales. Through these data-blocking provisions, Distributors agreed not to provide Daraprim sales data to data aggregators such as IQVIA, Symphony Health, and Wolters Kluwer. Because the absence of this normally available market data did not impede the entry of either Cerovene or Fera, the data-blocking scheme need not be further described. The Cerovene and Fera experiences are central to the calculation of the disgorgement the State Plaintiffs seek.

Apart from a generic equivalent to Daraprim that receives FDA approval, no reasonably interchangeable substitute for Daraprim exists for the treatment of toxoplasmosis. This is true in terms of both the use of Daraprim to treat **[**100]** toxoplasmosis, particularly active toxoplasma encephalitis, as well as the cross-elasticity of demand for FDA-approved pyrimethamine for treatment of that disease.

In terms of its use, Daraprim is the only pharmaceutical to receive an A-I rating in the Guidelines for the treatment of active toxoplasma encephalitis. It has many unique features. Among other qualities, FDA-approved pyrimethamine targets toxoplasmosis specifically, has been successfully used in its treatment for decades, and permits a diagnosis of toxoplasma encephalitis without resort to a biopsy of the brain, which would present significant risks to patients if performed. Because death and/or significant brain damage can occur within hours, its endorsement in the Guidelines assists physicians throughout the United States to treat a highly dangerous infection with confidence, quickly, and successfully.

An analysis of the cross-elasticity of demand for FDA-approved pyrimethamine confirms this definition of the relevant market. Even in response to Vyera's drastic price hike in August 2015, appreciable numbers of physicians and their patients continued to use Daraprim. Vyera was profitably able to keep Daraprim's list price **[**101]** at $750 per tablet and maintain a high average net price for the drug for the four years and seven months that it marketed Daraprim without generic competition. The average net price was very substantially above the competitive price level, whether that level is measured by Daraprim's price in the years before Vyera acquired it, or in the period after its first generic competitor entered the market. As more generic competitors enter the market, of course, the average net price will fall even further.

The high degree of cross-elasticity in demand between Daraprim and FDA-approved generic pyrimethamine is demonstrated as well by the market reaction to Dr. Reddy's March 2020 launch of its first-to-market generic. In the period following that launch, both the price and sales of Daraprim (as well as Vyera's revenue and profits) promptly declined as Dr. Reddy's generic tablet was substituted for Daraprim. Daraprim sales dropped 49% in the nine-month period after March 2020 compared to the same period prior to entry, and Vyera's revenue and gross profits from Daraprim sales declined 59% between 2019 and 2020.

Finally, practical indicia of the relevant market support a finding that it is FDA-approved **[**102]** pyrimethamine. Shkreli and Vyera considered that to be the relevant market, as did Vyera's consultants and those the consultants interviewed. Generic drug companies also assessed the relevant market to be FDA-approved pyrimethamine. There is no evidence that the price hike for Daraprim affected the prices of any other pharmaceutical. Lastly, FDA-approved pyrimethamine is the only FDA-approved drug that specifically targets toxoplasmosis.

[*631] In response to this cascade of evidence that FDA-approved pyrimethamine is the relevant product market, Shkreli argues that drug therapies trimethoprim-sulfamethoxazole ("TMP-SMX") and compounded pyrimethamine are sufficient economic and medical substitutes for Daraprim and that they must be included in the relevant antitrust market. These therapies are not part of the relevant market.

TMP-SMX is a broad-spectrum antibiotic medication approved by the FDA in 1973 and sold under the brand names Bactrim and Septra. TMP-SMX is FDA-approved to treat certain infections, including pneumocystis jirovecii pneumonia ("PCP"). It is also available as a generic. Although TMP-SMX is not FDA-approved to treat toxoplasmosis, a fact that Vyera itself emphasized to the **[**103]** market, it is prescribed in certain circumstances.

TMP-SMX is an effective prophylactic treatment because it has been effective at preventing multiple opportunistic infections that tend to occur together. For example, TMP-SMX is the recommended medication as primary prophylaxis for PCP, and patients at risk for toxoplasma encephalitis but who are not suffering from an acute infection of the brain are also at risk for PCP. These patients are often prescribed TMP-SMX medications to prevent both infections and reduce the "pill burden" for patients. For this reason, TMP-SMX is also effective at the secondary prophylaxis stage, in which the goal is to prevent a relapse in a patient that has recovered from an active infection. TMP-SMX, which may be administered intravenously, is a recommended alternative treatment when a patient is incapable of swallowing pills; pyrimethamine may only be taken orally.

The most difficult stage in treating toxoplasmosis, however, is an active infection. At that point the treatment goal is to medicate the patient within hours of presenting symptoms. A pyrimethamine treatment regimen is the gold standard treatment in the case of an acute infection of toxoplasmosis. **[**104]** Even Vyera's Dr. Salinas viewed TMP-SMX as "medically inferior" because not enough of the drug reaches the brain or the retina (in the case of ocular toxoplasmosis) to treat an infection properly. Studies have shown that TMP-SMX is 25-to 50-times less potent than pyrimethamine. In the Guidelines, TMP-SMX is graded B-I for the treatment of toxoplasma encephalitis and recommended only "if pyrimethamine is unavailable or there is a delay in obtaining it." As a broad-spectrum antibiotic, TMP-SMX also cannot be reliably used to confirm the diagnoses of toxoplasma encephalitis, while pyrimethamine aids in diagnosis because it is targeted to treat toxoplasmosis. Finally, TMP-SMX cannot be taken by patients with a sulfa hypersensitivity or allergy, which constitutes roughly 30-35% of all HIV-positive patients.[36]

The other therapy suggested by Shkreli as a potential substitute for Daraprim is compounded pyrimethamine, which two specialty pharmacies began selling in 2015. Compounding contains no assurance that the end product will deliver the correct amount of the API, and compounded products are not FDA-approved.

[*632] Vyera itself objected to the mass production of compounded drugs as dangerous. On **[**105]** November 30, 2015, Vyera warned the FDA that Imprimis, a compounding pharmacy, intended to mass produce compounded pyrimethamine. Vyera objected that

> [c]ompounded drugs can pose serious health risks to patients. Compounded drugs are not FDA-approved. There is no FDA premarket review. No data and information are required to demonstrate a compounded drug is safe and effective for its intended purposes . . . . Compounding large volumes of drugs without obtaining FDA approval, which Imprimis apparently intends to do, circumvents important public health requirements. As a result, it is not appropriate to use a compounded product in lieu of an FDA approved, commercially available product unless the compounded drug provides a medically necessary and unavailable drug for a specific patient.

Vyera's alarm that compounded pyrimethamine sales might eat into Daraprim sales was unfounded. Despite compounded pyrimethamine capsules being priced at $1 to $5, there were never significant sales of the compounded drug produced by Imprimis. The only way a patient could get Imprimis' compounded pyrimethamine product was with a specific prescription for that product, which did not permit en masse market substitution. **[**106]** Imprimis sold fewer than 22,000 compounded pyrimethamine capsules in 2016, and its sales declined thereafter. Avella, another compounding pharmacy, sold a total of 1,280 compounded pyrimethamine capsules, with no sales after 2018 due to a lack of customers.

Shkreli has pointed out that demand for Daraprim, represented by sales volume, dropped precipitously immediately after the 2015 price hike. The defendant suggests that consumers must have substituted alternative therapies for Daraprim. None of the parties have offered comparative data regarding TMP-SMX to support or contradict that hypothesis. It would be difficult to draw any conclusions from TMP-SMX data in any event because it is a broad-spectrum antibiotic prescribed for multiple infectious diseases. Sales of mass-production compounded pyrimethamine during the period of Vyera's sale of Daraprim were minimal at best. What can be said with certainty is that the market for FDA-approved pyrimethamine was sufficiently bound that Vyera was able to raise Daraprim's price to never before seen heights and earn record revenues and profits after doing so.

The practical indicia enumerated in *Brown Shoe* and the other evidence described above strongly **[**107]** support the conclusion that doctors and pharmaceutical buyers did not react to the astronomical rise in Daraprim's price by freely switching to other, cheaper drugs to treat toxoplasmosis. The demand for FDA-approved pyrimethamine remained relatively stable at approximately 250,000 tablets per year between 2016 and 2019 after the initial drop in

---

[36] Although Shkreli made no developed argument regarding this third alternative treatment, Shkreli suggests that atovaquone was another therapeutic alternative to Daraprim for the treatment of toxoplasmosis. Atovaquone is an FDA-approved antimicrobial drug for treatment of PCP and is prescribed for patients who cannot tolerate TMP-SMX. The Guidelines give atovaquone a C-III grade for primary prophylaxis of toxoplasmosis and a B-II grade as an alternative treatment for active toxoplasma encephalitis. Shkreli has not shown that atovaquone was either therapeutically or economically substitutable with Daraprim.

sales in 2015. If there had been any material cross-price elasticity between Daraprim and other products at the time of the 4,000% price hike in 2015, purchasers would have abandoned Daraprim in favor of cheaper products on the market. And if alternative toxoplasmosis treatments had been constraining the price of Daraprim before March 2020, generic entry would not have resulted in the significant drop in the price for FDA-approved pyrimethamine that occurred.

In sum, as a result of its distinctive attributes, FDA-approved pyrimethamine constitutes the relevant market. It treats a distinct patient population; in economic terms, it has a distinct kind of customer.

[*633] C. Monopoly Power

Having defined the relevant market, the conclusion that Vyera had a monopoly in that market follows easily. Vyera controlled 100% of the market for FDA-approved pyrimethamine **[**108]** market between August 2015 and March 2020. Shkreli controlled the price of Daraprim, which he acquired precisely because it was a sole-source drug in a market of its own. Vyera profitably charged a per-tablet average net price for Daraprim ranging between $228 and $305 during the full years of 2016, 2017, 2018, and 2019. These prices were also substantially above any competitive price level, which was at most $160.[37]

D. Anticompetitive Conduct

The Plaintiffs have met their burden under *§ 1 of the Sherman Act* of showing that the contracts at issue here were an unreasonable restraint on trade and had an adverse effect on competition. In response, Shkreli has not shown that the contracts had procompetitive benefits.

Shkreli does not dispute that he intended to block generic competition to Daraprim and strove to do so for as long as possible. Each of the API supply agreements and the restrictive distribution agreements was entered in service of that strategy. Similarly, Vyera's continued monopolistic control of the FDA-approved pyrimethamine market did not occur by accident and self-evidently harmed competition. Shkreli raised the price of Daraprim by 4,000%. Over more than four years, the average net price **[**109]** of a single Daraprim tablet remained hundreds of dollars. Its price did not meaningfully decline until Dr. Reddy's generic pyrimethamine penetrated the market barriers Vyera had erected.

a. Distribution Contracts

Vyera's restrictions in its distribution contracts substantially delayed generic pharmaceutical companies from acquiring sufficient RLD to conduct BE testing and receive FDA approval of their ANDAs. Those restrictions included class of trade restrictions and caps on the number of bottles that could be sold to a customer. Vyera drastically reduced the number of customers to which its distributors were authorized to sell. Vyera monitored distributors' sales closely to ensure there was no leakage. It repurchased inventory and conducted audits to learn where every bottle of Daraprim was heading. Vyera's Mulleady even went to a parking lot in New Jersey to buy back five bottles of Daraprim, paying twice the purchase price, to prevent those bottles from going to a generic pharmaceutical company.

This extraordinarily tight control of the supply of Daraprim had its intended effect. It actually delayed the entry of generic pharmaceutical companies.

---

[37] To arrive at a figure of $160, the Plaintiffs' economic expert Hemphill observed the average net price of Daraprim, Dr. Reddy's generic pyrimethamine, and the Vyera AG tablet for a sustained period after Dr. Reddy's generic pyrimethamine entered the market. The real-world evidence of Daraprim's price, volume, and market share after Dr. Reddy's entry in March 2020 starkly demonstrates not only that Vyera had a monopoly over Daraprim, but also that the high price maintained in that monopoly depended entirely on the absence of competition.

Vyera paid a sizeable premium to its **[**110]** downstream partners to keep Daraprim RLD out of the hands of its competitors. Those partners agreed to and enforced the resale restrictions, and in doing so benefitted significantly. They profited handsomely with each sale so long as Daraprim's price remained inflated.

All of Shkreli's purportedly procompetitive justifications for these distribution agreements are pretextual. He has argued **[*634]** that putting Daraprim in specialty distribution benefitted patients by giving them access to services that specialty pharmacies can provide. These purported benefits include advice on defraying the high cost of the drug, assistance in getting insurance coverage, and help reducing and monitoring adverse effects.

Shkreli offered no evidence, however, that patients were assisted in any of these ways. Patients didn't need help figuring out how to pay for Daraprim, of course, until Shkreli raised its price to a scandalous level and put his anticompetitive scheme in place to protect that price. And there is no evidence that FDA-approved pyrimethamine has any serious side effects, much less side effects that could be or were addressed by any specialty pharmacy. Specialty pharmacies and closed distribution **[**111]** are tailor-made for the administration and monitoring of drugs that have an altogether different profile from that of Daraprim. For decades Daraprim was administered safely and without problems through open distribution, and both Dr. Reddy's and Vyera's own generic entrant, the Vyera AG, returned to the open distribution model. In sum, Shkreli has failed to justify his choice of a closed distribution system. It was designed and used solely to restrict competition.

b. Exclusive Supply Agreements

Vyera's agreements with Fukuzyu and RL Fine closed off access to the two most viable suppliers of pyrimethamine for years. Vyera's exclusive supply agreements achieved their intended effect and delayed the entry of generic pyrimethamine into the market.

While the pyrimethamine manufacturing process is relatively simple, it still takes time and money to design the process, set it up, and test it. Shut out of access to Fukuzyu's and then RL Fine's API, Fera, Cerovene, and InvaTech were required to undertake a time-consuming and costly journey to develop alternative API manufacturers. Other than a desire to block competition, there was no reason to tie either Fukuzyu or RL Fine to exclusive supply **[**112]** agreements.

Fukuzyu had provided pyrimethamine for Daraprim in the United States without any exclusive supply agreement, and at times without any supply agreement at all, to Vyera's predecessors. Shkreli decided to change that. After months of courting, Vyera and Fukuzyu entered into an exclusive supply agreement in January 2017. In October 2016, the same month that Vyera's science executives visited Fukuzyu in Japan, Fukuzyu upset Cerovene's plans and refused to supply it with pyrimethamine. In September of 2017, Fukuzyu refused to supply Fera with pyrimethamine in a message that repeated, word-for-word, the restrictions against human use in the United States that Vyera's Pelliccione relayed to Fukuzyu.

Vyera's agreement with RL Fine had a similarly anticompetitive purpose and effect. Vyera had no need for any agreement at all with RL Fine. Learning that generic competitors were working with RL Fine to obtain pyrimethamine, however, Vyera entered into an exclusive supply agreement with RL Fine on December 17, 2017. Vyera's pursuit of this agreement had the immediate effect of disrupting and delaying Cerovene's and InvaTech's ANDA approval process. Vyera paid millions of dollars to RL **[**113]** Fine for the sole purpose of blocking its rivals from access to RL Fine's pyrimethamine. The Phoenixus Board Minutes of December 2017 justified the expense in these very terms. Witness after witness from Vyera has confirmed as much.

The impact on competitors was immediate. In November 2016, Cerovene had entered a five-year exclusive supply agreement with RL Fine. In the months that **[*635]** followed, Cerovene invested heavily first to support RL Fine filing a DMF and then, switching its plans, to support Cerovene itself incorporating the RL Fine manufacturing information and data within its own ANDA. Cerovene amended its ANDA in April 2017 to list RL Fine as its API supplier. But, on November 30, 2017 -- five days after Vyera and RL Fine reached an agreement in principle -- RL Fine reneged on its contract with Cerovene and refused to supply pyrimethamine or cooperate further on a Cerovene pyrimethamine ANDA. RL Fine stopped cooperating as well with InvaTech in the Fall of 2017, preventing

InvaTech from responding to the FDA's questions about RL Fine's API and requiring InvaTech to begin from scratch and develop a new supplier.

Shkreli's attempt to justify the exclusivity provisions in these two **[**114]** agreements fail. He relies on the following procompetitive justifications: that the agreements ensured a steady supply of pyrimethamine and, in the case of Fukuzyu, promoted a long-term business relationship. Shkreli contends that the exclusivity clauses thus mitigated Vyera's supply risk. Neither contract did so.

Shkreli has offered no evidence that any manufacturer of Daraprim had ever been unable to obtain pyrimethamine from Fukuzyu. Moreover, Vyera's contract with Fukuzyu contained no provision that protected it against the risk that Fukuzyu might be unable to supply Vyera with FDA-approved pyrimethamine. For example, it contained no provision requiring Fukuzyu to maintain cGMPs-compliant facilities, to ensure the purity of its API, or to keep an active DMF. It did not even require Fukuzyu to fill Vyera's orders for pyrimethamine. There is nothing in the agreement that prevented Fukuzyu from selling its entire inventory of pyrimethamine to others for use outside the United States or for the treatment of animals in the United States.

There are standard provisions that protect against the risk of a loss of supply. Those provisions were absent in the Vyera contracts, but tellingly, **[**115]** were present in the GSK contract with Fukuzyu. Those provisions include clauses addressed to the forecasting of requirements, customer priority, reserve capacity, and firm order dates.

Moreover, while it may be common for companies to enter into exclusive supply agreements with API manufacturers when a company has invested time and money with that manufacturer to develop a new API manufacturing process, there was no such justification here. Fukuzyu already had a DMF on file and had been supplying pyrimethamine for Daraprim for decades.

Shkreli suggests that its contract with Fukuzyu was motivated by a desire to build a long-term relationship for future toxoplasmosis products. Dr. Salinas testified that Vyera has even filed INDs for some of these nascent projects. While Vyera may have used its promise of future projects to entice Fukuzyu during the contract negotiations, Shkreli has failed to explain the relevance of those projects to his desire to include a pyrimethamine exclusivity clause in the contract. The exclusivity clause had only one purpose, to eliminate competition with Daraprim.

Shkreli's justification for the RL Fine contract fails entirely. Shkreli asserts that it is common **[**116]** in the pharmaceutical industry to have a backup supplier. But, Vyera has failed to offer any evidence that either Vyera or any of its predecessors ever needed a backup supplier of pyrimethamine. Vyera didn't even pursue a contract with RL Fine until it learned that RL Fine was going to supply generic drug companies with pyrimethamine.

[*636] Moreover, Vyera's contract with RL Fine did not ensure that RL Fine could operate as a backup supplier if Vyera ever needed it to do so. The contract did not require RL Fine to file a DMF and RL Fine never did. Nor did the contract require RL Fine to do anything to support Vyera if Vyera amended Daraprim's NDA to include RL Fine's manufacturing process. Instead, during the life of the contract, Vyera paid RL Fine almost $9.5 million to do nothing except stop cooperating with Vyera's competitors. To put this outlay in perspective, through March 2019, Vyera spent only $500,000 buying pyrimethamine from Fukuzyu.

Finally, Shkreli highlights the fact that the exclusive supply agreements were not executed until a date after each supplier refused to supply each generic company. Sophisticated contracts are not executed on the same day they are negotiated. The evidence **[**117]** is overwhelming that Fukuzyu and RL Fine stopped cooperating with generic drug companies who wanted to enter the U.S. market because they were negotiating exclusive supply contracts with Vyera that they considered to be more attractive. The incentives that Vyera offered to RL Fine were so enticing that it even stopped performing on its five-year contract with Cerovene.

c. Degree of Burden on Generic Competitors

Finally, Shkreli argues that the plaintiffs failed to establish that the contracts had a substantial anticompetitive effect in the relevant market. Relying on *Ohio v. American Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)* ("*American Express*"), he emphasizes that it is the Plaintiffs' burden to show a "substantial" anticompetitive effect from his activities and that they have failed to do so. Shkreli contends that, whatever his intent may have been, the generic manufacturers made a series of bad business decisions and were unwilling to spend the money necessary to enter the market faster. Shkreli principally points to occasions on which Fera or Cerovene did not accept an offer by an RLD supplier to find more bottles of Daraprim for them.

Shkreli did not actually prove at trial that RLD suppliers were able to acquire more bottles of Daraprim for generic pharmaceutical **[**118]** companies after Vyera set up its closed distribution system. To the contrary, RLD suppliers struggled to fill orders for Daraprim. And, when Reliant used its personal connection to a pharmacy to circumvent Vyera's closed distribution system and succeeded in obtaining five bottles of Daraprim, Mulleady rushed to buy those bottles back and paid twice their purchase price to do so.

Shkreli similarly argues that Vyera's competitors foolishly pursued doomed requests to the FDA to modify BE testing requirements, and in doing so lost precious time waiting for waivers that never came. He argues that it was their flawed tactics and not his restrictive agreements that were responsible for the delays that occurred here. He is wrong.

The Plaintiffs proved that Shkreli's actions had a very substantial impact on competition. Under *§ 1*, the Plaintiffs may show the existence of anticompetitive effects from restraints on trade through direct evidence of increased prices in the relevant market, which they have done. See *1-800 Contacts, 1 F.4th at 118*. Under the rule of reason test, the Plaintiffs have the burden of showing an "actual adverse effect on competition as a whole in the relevant market." *Id. at 114*. Under *§ 2*, the Plaintiffs must show **[**119]** that Shkreli's improper conduct "has or is likely to have the effect of controlling prices or excluding competition." *Takeda, 11 F.4th at 137* (citation omitted). The Plaintiffs **[*637]** have more than carried each of these burdens.

Shkreli's reliance on *American Express* is misplaced. The holding in that case turned on whether the plaintiffs' direct evidence of price increases on just one side of the two-sided credit card transaction market demonstrated any anticompetitive effect at all. *American Express, 138 S. Ct. at 2287*.

More importantly, *American Express*' unremarkable statement of the law did not revise the longstanding rule of reason test in antitrust cases. As the Supreme Court has explained, the rule of reason steps

> do not represent a rote checklist, nor may they be employed as an inflexible substitute for careful analysis. . . . [W]hat is required to assess whether a challenged restraint harms competition can vary depending on the circumstances. The whole point of the rule of reason is to furnish an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint to ensure that it unduly harms competition before a court declares it unlawful.

Nat'l Collegiate Athletic Ass'n v. Alston, 141 S. Ct. 2141, 2160, 210 L. Ed. 2d 314 (2021) (citation omitted). Even under Shkreli's rigid view of the law, Shkreli's Daraprim scheme substantially impacted **[**120]** competition in the market for FDA-approved pyrimethamine.

Generic drug companies need not undertake herculean efforts to overcome significant anticompetitive barriers specifically erected to prevent their entry into a market. It bears repeating that "generics need not be barred from all means of distribution if they are barred from the cost-efficient ones." *Actavis PLC, 787 F.3d at 656* (citation omitted). "The test is not total foreclosure, but rather whether the challenged practices bar a substantial number of rivals or severely restrict the market's ambit." Id. While exclusive supply and restrictive distribution agreements are not inherently unlawful, here their sole purpose and effect was to foreclose generic pharmaceutical companies from acquiring the API and RLD that would have otherwise been readily available to them in the ordinary course and that were critical to their efforts to compete with Vyera.

E. Shkreli is Individually Liable

An individual may be held liable under the *Sherman Act* to the extent that the individual has "participated in violations of" the antitrust laws, such as by "negotiating, voting for[,] or executing agreements which constituted steps in the progress of the conspiracy." *Hartford-Empire Co. v. United States, 323 U.S. 386, 407, 65 S. Ct. 373, 89 L. Ed. 322, 1945 Dec. Comm'r Pat. 607 (1945)*; see also *Lorain Journal Co. v. United States, 342 U.S. 143, 145* *n.2, 72 S. Ct. 181, 96 L. Ed. 162 (1951)* (officers **[**121]** and directors "participated in the conduct alleged to constitute the attempt to monopolize").

Shkreli is liable for the violations of *§§ 1* and *2 of the Sherman Act* and the parallel violations of state law. Shkreli conceived of, implemented, maintained, and controlled Vyera's anticompetitive and monopolistic scheme. His control continued after he stepped down as Vyera's CEO and even after he entered federal prison. As the company's largest shareholder, he freely changed its management and directed its policy.

Shkreli pioneered Vyera's business model at Retrophin and brought many of Retrophin's employees with him to replicate the "classic closed distribution play" at Vyera. Shkreli frankly and repeatedly acknowledged that his goal was to delay entry of a generic competitor with Daraprim for at least three years. He then planned, managed, and controlled the execution of his scheme. He erected and policed **[*638]** barriers around the FDA-approved pyrimethamine market in order to maintain a monopoly price for Daraprim.

Shkreli emphasizes that he did not sign any of the contracts at issue. The absence of his signature from a document does not immunize him from antitrust liability.

Shkreli argues that after December **[**122]** 2015 he was no longer a Vyera executive and that his ability to influence Vyera's operations was severely restricted after he was imprisoned in September 2017. The Plaintiffs have shown that Vyera remained under Shkreli's control throughout the years it maintained its monopoly on FDA-approved Daraprim. Even when incarcerated, Shkreli managed to direct its policies and choose Vyera's executives. Whether he used a smuggled phone or the prison's authorized phones, he stayed in touch with Vyera's management and exercised his power over Vyera as its largest shareholder.

IV. Remedies

The Plaintiffs seek injunctive relief and the State Plaintiffs seek disgorgement. They have shown that Shkreli should be banned for life from the pharmaceutical industry and required to pay $64.6 million in disgorgement.

A. Injunctive Relief

Section 13(b) of the FTC Act authorizes the FTC to pursue permanent injunctive relief in federal court only "in proper cases . . . and after proper proof." *15 U.S.C. § 53(b)*. Plaintiffs must prove an ongoing or likely future violation of the antitrust laws and that injunctive relief will not only remedy that violation but also "be in the interest of the public." Id. *§ 53(b)(1)-(2)*.

A permanent injunction is **[**123]** appropriate where a plaintiff shows that

> there exists some cognizable danger of recurrent violation, something more than the mere possibility which serves to keep the case alive. . . . To be considered are the bona fides of the expressed intent to comply, the effectiveness of the discontinuance and, in some cases, the character of the past violations.

United States v. W.T. Grant Co., 345 U.S. 629, 633, 73 S. Ct. 894, 97 L. Ed. 1303 (1953) (*Clayton Act*).

To assess the likelihood of recurrence, courts consider

> the fact that defendant has been found liable for illegal conduct; the degree of scienter involved; whether the infraction is an "isolated occurrence;" whether defendant continues to maintain that his past conduct was blameless; and whether, because of his professional occupation, the defendant might be in a position where future violations could be anticipated.

Sec. & Exch. Comm'n v. Commonwealth Chem. Sec., Inc., 574 F.2d 90, 100 (2d Cir. 1978).

In assessing whether to issue injunctive relief, a court balances the equities and considers the public interest. *E.E.O.C. v. KarenKim, Inc., 698 F.3d 92, 100 (2d Cir. 2012)*. "A Government plaintiff, unlike a private plaintiff, must seek to obtain relief necessary to protect the public from further anticompetitive conduct and to redress anticompetitive harm." *Apple, 791 F.3d at 339* (quoting *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S.*

155, 170, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)). "The district court has large discretion to model its judgments to fit the exigencies of the particular case **[**124]** and all doubts about the remedy are to be resolved in the Government's favor." Id. (quoting *E. I. du Pont de Nemours & Co., 366 U.S. at 334*).

In New York, pursuant to the Donnelly Act, the Attorney General may seek and obtain an order on behalf of the **[*639]** State "to restrain and prevent the doing in this state of any act herein declared to be illegal, or any act in, toward or for the making or consummation of any contract, agreement, arrangement or combination herein prohibited." *N.Y. Gen. Bus. Law § 342*. Pursuant to *§ 63(12)* of the Executive Law, New York may seek "an order enjoining the continuance of [illegal or fraudulent] business activity or of any fraudulent or illegal acts." *N.Y. Exec. Law § 63(12)*. Upon finding a violation under *Executive Law § 63(12)*, a court may exercise its discretion to issue a permanent and plenary ban in a particular industry. See, e.g., *People v. Imported Quality Guard Dogs, Inc., 88 A.D.3d 800, 930 N.Y.S.2d 906, 907 (2nd Dep't 2011)* (permanently enjoining the appellant "from selling, breeding, or training dogs, or advertising or soliciting the sale, breeding, or training of dogs").

The Plaintiffs seek a lifetime ban against Shkreli participating in the pharmaceutical industry.[38] Banning an individual from an entire industry and limiting his future capacity to make a living in that field is a serious remedy and must be done with care and only if equity demands. Shkreli's egregious, **[**125]** deliberate, repetitive, long-running, and ultimately dangerous illegal conduct warrants imposition of an injunction of this scope.

The Plaintiffs presented a wealth of evidence that Shkreli conducted a comprehensive scheme that violated the antitrust laws of the United States and the competition laws of the seven States. The FTC and the States are empowered by federal and State law to seek comprehensive equitable relief. The Plaintiffs have demonstrated that a lifetime ban against Shkreli's future participation in the pharmaceutical industry will protect the public from suffering a repetition of the unlawful schemes proven in this case.

Without a lifetime ban, there is a real danger that Shkreli will engage in anticompetitive conduct within the pharmaceutical industry again. Shkreli established two companies, Retrophin and Vyera, with the same anticompetitive business model: Acquiring sole-source drugs for rare diseases so that he could profit from a monopolist scheme on the backs of a dependent population of pharmaceutical distributors, healthcare providers, and the patients who needed the drugs. The Daraprim scheme was particularly heartless and coercive. Daraprim must be administered **[**126]** within hours to those suffering from active toxoplasma encephalitis.

Moreover, in the face of public opprobrium, Shkreli doubled down. He refused to change course and proclaimed that he should have raised Daraprim's price higher.

The context in which Shkreli conducted his schemes cannot be ignored. He cynically took advantage of the requirements of a federal regulatory scheme designed to protect the health of a nation by ensuring that its population has access to drugs that are not only effective but also safe. He recklessly disregarded the health of a particularly vulnerable population, those with compromised immune systems. His scheme burdened those patients, their loved ones, and their healthcare providers.

A lifetime ban would not deprive Shkreli of the opportunity to practice a profession or to exercise a lawful skill for which he trained. In his trial testimony Shkreli does not even express a clear desire to return to the pharmaceutical industry. He reports that he is considering pursuing opportunities **[*640]** "within and outside" the pharmaceutical industry upon his release from prison.

The risk of a recurrence here is real. Shkreli has not expressed remorse or any awareness that his actions **[**127]** violated the law. While he takes full responsibility in his direct testimony for the increase of Daraprim's price from $17.50 to $750 per pill, he denies responsibility for virtually anything else. He argues in his testimony that he is not responsible for Vyera's anticompetitive contracts because he did not negotiate or sign the exclusive supply agreements or the restrictive distribution agreements. He has also denied that what happened here was egregious,

---

[38] In their memorandum, filed with the Pretrial Order, the Plaintiffs requested that Shkreli be banned for twenty years from the pharmaceutical industry.

arguing that the Plaintiffs have not proven that any patient died due to the price he set for Daraprim. He chose to not even attend the trial.

Shkreli presents several legal arguments against a lifetime industry ban. He contends that it amounts to a penalty beyond the proper scope of a court's power in equity. He argues that an industry ban is uncommon and reserved only for the most egregious cases and for cases of fraud. He argues that a ban of this scope is not narrowly tailored to match the challenged conduct. For the reasons laid out above, these arguments are unavailing. This is an egregious case; death is not the only relevant metric. If a court sitting in equity is powerless to impose a lifetime industry ban to protect the **[**128]** public against a repetition of the conduct proven at this trial, then the public could rightfully ask whether its wellbeing has been adequately weighed.

Shkreli appears to suggest that any injunction could be limited to banning him from acquiring commercial assets or engaging in the "day-to-day affairs of commercializing medicine." There is no reason to believe that a narrowly crafted injunction will succeed in providing adequate protection against a repetition of illegal conduct. Shkreli has demonstrated that he can and will adapt to restrictions. With help at times from a contraband phone, Shkreli managed to control his company even from federal prison.

Shkreli's anticompetitive conduct at the expense of the public health was flagrant and reckless. He is unrepentant. Barring him from the opportunity to repeat that conduct is nothing if not in the interest of justice. "If not now, when?" Mishnah, Pirkei Avot 1:14.

B. Disgorgement

The State Plaintiffs seek disgorgement in the amount of $64.6 million to return to victims nationwide.[39] Disgorgement is "a remedy tethered to a wrongdoer's net unlawful profits" and "has been a mainstay of equity courts." *Liu v. Sec. & Exch. Comm'n, 140 S. Ct. 1936, 1943, 207 L. Ed. 2d 401 (2020)*. "The district court has broad discretion **[**129]** not only in determining whether or not to order disgorgement but also in calculating the amount to be disgorged." *S.E.C. v. First Jersey Sec., Inc., 101 F.3d 1450, 1474-75 (2d Cir. 1996)* (federal securities laws violations). "The amount of disgorgement ordered need only be a reasonable approximation of profits causally connected to the violation. . . . So long as the measure of disgorgement is reasonable, any risk of uncertainty should fall on the wrongdoer whose illegal conduct created that uncertainty." *S.E.C. v. Razmilovic, 738 F.3d 14, 31 (2d Cir. 2013)*, as amended (Nov. 26, 2013).

The Second Circuit has "adopted a two-step burden-shifting framework for calculating equitable monetary relief. That framework requires a court to look first to the [plaintiff] to show that its calculations **[*641]** reasonably approximated the amount of the defendants' unjust gains and then shift the burden to the defendants to show that those figures were inaccurate." *Fed. Trade Comm'n v. Moses, 913 F.3d 297, 310 (2d Cir. 2019)* (citation omitted).

New York Executive Law § 63(12) empowers the New York Attorney General to disgorge unlawfully gained profits wherever they were derived. *Vyera, 2021 U.S. Dist. LEXIS 183303, 2021 WL 4392481, at *4*. Contrary to Shkreli's contention, there is no legal distinction between equitable monetary remedies available for fraudulent conduct and other illegal conduct occurring in the State of New York. The Plaintiffs have shown that the anticompetitive **[**130]** conduct in this case is at least as egregious in terms of its willfulness and harm to victims as the frauds typically subject to this equitable remedy under *§ 63(12)*.

The excess profits that Vyera gained from its sales of Daraprim amount, conservatively, to $64.6 million and must be disgorged to the States, subject to a set-off of any amount paid by the settling defendants. Shkreli is liable for this relief.

In arriving at this amount, a threshold determination is the hypothetical date or dates on which generic drug companies would have entered the market but-for Vyera's anticompetitive conduct. Here, the evidence is

[39] The FTC is precluded from seeking disgorgement. *Vyera, 2021 U.S. Dist. LEXIS 183303, 2021 WL 4392481, at *2*.

sufficiently robust to select those dates for two competitors, Cerovene and Fera. The record is insufficiently developed regarding the three other competitors who have entered or tried to enter the market.

a. Cerovene and Dr. Reddy's Hypothetical Entry Date

Cerovene's president Shah estimates that his company's FDA-approved generic pyrimethamine tablet, which entered the market in March of 2020, would have entered the market in September of 2017 if Cerovene had had unfettered access to Fukuzyu's API and the RLD. This is a thirty-month delay. This estimate was unchallenged at trial. **[**131]**

Plaintiff's economic expert Hemphill calculated Vyera's excess profits using two alternative hypothetical entry dates for Cerovene: October 2018 and December 2018. The October 2018 entry date is an extremely conservative date on which to base the calculations, and is adopted for the calculation of excess profits. The difference between October 2018 and March 2020 represents an eighteen-month delay.

b. Fera's Hypothetical Entry Date

Fera's DellaFera estimates that his FDA-approved pyrimethamine tablet, which entered the market soon after it received FDA approval in July of 2021, would have entered the market in August of 2019 if Fera had unfettered access to Fukuzyu's API and to the RLD. This is a delay of roughly twenty-four months. His estimate was unchallenged at trial.

Hemphill calculated Vyera's excess profits on the assumption that Fera's generic drug would have entered the market in October 2019, representing a twenty-three month delay. The October 2019 date is a conservative estimate and is adopted for the calculation of excess profits.

c. Vyera's Excess Profits

Hemphill's model for calculating these counterfactual profits involves four steps. First, he calculated Daraprim's actual **[**132]** revenue from October 2018 to December 2020. Conservatively, it was $130.6 million.

Next, he calculated Vyera's revenue in the but-for world during that same period under a number of conditions, including different generic entry dates, the numbers of generic competitors, and the effect from Vyera launching its own authorized generic earlier. Those calculations based on the October 2018 entry date for Cerovene's drug and the October 2019 entry date for **[*642]** Fera's drug are the relevant calculations here.

Third, using simple arithmetic, Hemphill calculated the difference between Vyera's actual profit and its profits in the but-for world in which competitive entry was not impeded by Vyera's conduct. Hemphill determined that, but-for Vyera's illegal conduct, it would have earned $67.6 million less in Daraprim revenue during that period.

Finally, taking into account that in the counterfactual world Vyera's incremental costs would have been lower because it would be selling less Daraprim, Hemphill deducted an estimated $3 million in costs that Vyera would have avoided. This four-step process yields a conservative estimate of $64.6 million in excess profits.

Shkreli has offered no different calculation **[**133]** of excess profits, including any opposing calculation based on later generic entry dates or competing assumptions. Accordingly, the Plaintiff States' calculation of $64.6 million in excess profits from the sale of Daraprim is adopted.

C. Shkreli's Liability for Vyera's Excess Profits

Disgorgement may be imposed against multiple defendants so long as the order is consistent **[*643]** with equitable principles. See *Liu, 140 S. Ct. at 1949* (remanding to the Ninth Circuit to determine whether "circumstances would render a joint-and-several disgorgement order unjust"). Joint and several liability for disgorgement is properly imposed when multiple defendants have collaborated in an illegal scheme. *S.E.C. v. Pentagon Cap. Mgmt. PLC, 725 F.3d 279, 288 (2d Cir. 2013)*. In *First Jersey*, an individual defendant was required to disgorge net profits accruing to his company where he was "primarily liable" for the fraud that created these profits, was "intimately involved" in the perpetration of the fraud, and was a "controlling person" of the company. *101 F.3d at 1475* (citation omitted).

Shkreli was the prime mover in this anticompetitive scheme. It was his brainchild and he drove it each step of the way. As Vyera's founder and its largest shareholder, any excess profit gained from Shkreli's scheme directly benefited him. Shkreli **[**134]** explains in his direct testimony that he took the actions he did at Vyera based on his belief that the "entry of a generic alternative to Daraprim . . . would have a significant effect on my investment in the company." Liability for the sum of equitable monetary relief determined in this Opinion is, therefore, properly imposed against him.

The sum owed by Shkreli will be reduced by any monies paid by the settling defendants. A settlement payment may properly "be taken into account by the court in calculating the amount to be disgorged." Id.

Shkreli argues that, following the Supreme Court's decision in *Liu*, he may no longer be held jointly and severally responsible for Vyera's excess profits. Shkreli relies on *Liu*'s statement that allowing joint and several liability alongside the remedy of disgorgement "runs against the rule to not impose joint liability in favor of holding defendants liable to account for such profits only as have accrued to themselves." *Liu, 140 S. Ct. at 1945* (citation omitted). According to Shkreli, the amount of disgorgement he may be ordered to pay is limited to any profits he actually took from the scheme, and the Plaintiffs have failed to show that Shkreli personally profited at all.

Liu did **[**135]** not categorically reject a disgorgement order imposed against multiple parties. *Liu* in fact held that joint and several liability for disgorgement orders is permissible as long as they are consistent with equitable principles. *Id. at 1949*. The Supreme Court specifically noted that, since the common law permitted "liability for partners engaged in concerted wrongdoing . . . [t]he historic profits remedy thus allows some flexibility to impose collective liability." Id.

In this case, imposition of a disgorgement order against Shkreli serves the interests of justice, for all the reasons explained above. Shkreli was no side player in, or a "remote, unrelated" beneficiary of, Vyera's scheme. See id. He was the mastermind of its illegal conduct and the person principally responsible for it throughout the years.

Conclusion

Shkreli is liable on each on the claims presented in this action. An injunction shall issue banning him for life from participating in the pharmaceutical industry in any capacity. He is ordered to pay the Plaintiff States $64.6 million in disgorgement.

Opinion

[*759] ORDER GRANTING IN PART AND DENYING IN PART MOTION TO DISMISS WITH LEAVE TO AMEND

Re: Dkt. No. 97

Plaintiffs Maximilian Klein; Sarah Grabert; and Rachel Banks Kupcho (collectively, "Consumers") **[**8]** and Affilious, Inc.; Jessyca Frederick; Mark Young; Joshua Jeon; 406 Property Services, PLLC; Mark Berney; Jessica Layser; Katherine Looper; and Zahara Mossman (collectively, "Advertisers") individually and on behalf of all others similarly situated, sue Defendant Facebook, Inc. ("Facebook").

Before the Court is Facebook's motion to dismiss the Consolidated Consumer Class Action Complaint and the Consolidated Advertiser Class Action Complaint. ECF No. 97. Having considered the parties' submissions, the parties' arguments at the hearing, the relevant law, and the record in this case, the Court GRANTS IN PART and DENIES IN PART Facebook's motion to dismiss with leave to amend.

TABLE OF CONTENTS

[*] Sitting by designation on the United States District Court for the Northern District of California.

Page

[*760] I. PROCEDURAL HISTORY

On December 3, 2020, Plaintiffs Klein and Grabert filed an initial complaint against Defendant Facebook. ECF No. 1. Subsequently, 11 other antitrust cases were filed by consumers and advertisers against Facebook. On February 9, 2021, the Court: (1) granted motions to relate *Sherman v. Facebook, Kupcho v. Facebook, Dames v. Facebook, Steinberg v. Facebook, Layser v. Facebook*, and *Rosenman v. Facebook* to the instant case; (2) concluded that *Affilious v. Facebook* was related to the instant case; and (3) consolidated these cases with the instant case. ECF No. 47. On February 11, 2021, Plaintiff Rosenman voluntarily dismissed her case. *Facebook v. Rosenman*, No. 21-CV-00336-LHK, ECF No. 17.

On February 25, 2021, the Court granted motions to relate *Kovacevich v. Facebook* and *Garvin v. Facebook* to the instant case and consolidated these cases with the instant case. ECF No. 50. On March 16, 2021, the Court granted a motion to relate *Wasvary v. Facebook* to the instant case and consolidated it with the instant case. ECF **[**11]** No. 68. On April 9, 2021, the Court granted a motion to relate *Ryan v. Facebook* to the instant case and consolidated that case with the instant case. ECF No. 85.

After voluntarily dismissing her federal case on February 11, 2021, Plaintiff Rosenman refiled her case in state court, and Facebook removed the refiled case to federal court. *See Rosenman v. Facebook*, No. 21-CV-2108, ECF No. 1. On April 9, 2021, the Court related the refiled *Rosenman Case* to the instant case. ECF No. 85. On April 26, 2021, Rosenman filed a motion to remand, which the Court denied on August 27, 2021. *Rosenman v. Facebook*, No. 21-CV-02108-LHK, ECF Nos. 17, 26.

On March 18, 2021, the Court held a hearing on motions for appointment as interim class counsel. ECF No. 77. That same day, the Court appointed Stephen A. Swedlow of Quinn Emanuel Urquhart & Sullivan, LLP and Shana A. Scarlett of Hagens Berman Sobol Shapiro LLP as Interim Class Counsel for the Consumer class ("Consumers") and appointed Warren Postman of Keller Lenkner and Brian D. Clark of Lockridge Grindal Nauen P.L.L.P. to serve on Plaintiffs' Executive Committee for Consumers. ECF No. 73.

On March 18, 2021, the Court appointed Yavar Bataee of Bathaee **[**12]** Dunne LLP and Kristen M. Anderson of Scott + Scott LLP as Interim Class Counsel for the Advertiser class ("Advertisers") and appointed Tina Wolfson of Ahdoot & Wolfson, PC and Keith J. Verrier of Levin Sedran & Berman LLP to serve on Plaintiffs' Executive Committee for Advertisers. *Id.*

[*761] On April 22, 2021, Consumers filed a Consolidated Consumer Class Action Complaint. ECF No. 87 ("CC"). Consumers are individuals who use Facebook's services, including Facebook, Facebook Messenger, Instagram, and WhatsApp. *Id.* ¶¶ 19, 23, 26. Consumers allege that, "[a]bsent Facebook's anticompetitive scheme, fair competition would have required Facebook to provide consumers greater value in return for consumers' data on a market-wide basis." *Id.* ¶ 10. Consumers seek to represent a class of "[a]ll persons in the United States who maintained a Facebook profile at any point from 2007 up to the date of the filing of this action." *Id.* ¶ 248. Consumers assert five claims: (1) monopolization of the Social Network Market in violation of *§ 2 of the Sherman Act*; (2) attempted monopolization of the Social Network Market in violation of *§ 2 of the Sherman Act*; (3) monopolization of the Social Media Market in violation of *§ 2 of the Sherman Act*; (4) attempted **[**13]** monopolization of the Social Media Market in violation of *§ 2 of the Sherman Act*; and (5) unjust enrichment under California common law. *Id.* ¶¶ 260-317.

On April 22, 2021, Advertisers filed a Consolidated Advertiser Class Action Complaint. ECF No. 86 ("AC"). Advertisers are individuals, entities, and corporations who purchased advertising from Facebook. *Id.* ¶¶ 24-33. Advertisers allege that they paid prices for advertising that were "higher than they would have been absent Facebook's anticompetitive conduct and unlawfully acquired and/or maintained monopoly." *Id.* ¶ 33. Affilious, Inc.; Jessyca Frederick; Joshua Jeon; and 406 Property Services, PLLC seek to represent a class of "[a]ll persons, entities, and/or corporations in the United States who purchased advertising from Facebook between October 1, 2012, and April 3, 2018, but not after April 3, 2018." AC ¶ 529. Mark Berney, Mark Young, Jessica Layser, Katherine Looper, and Zahara Mossman seek to represent a class of "[a]ll persons, entities, and/or corporations in the United States who purchased advertising from Facebook between April 4, 2018, and the present." *Id.* ¶ 532. Advertisers assert three claims: (1) monopolization of the Social Advertising **[**14]** Market in violation of *§ 2 of the Sherman Act*; (2) attempted monopolization of the Social Advertising Market in violation of *§ 2 of the Sherman Act*; and (3) restraint of trade in violation of *§ 1 of the Sherman Act*. *Id.* ¶¶ 547-69.

On May 7, 2021, Facebook filed a motion to disqualify Keller Lenkner. ECF No. 93. On July 13, 2021, the Court granted Facebook's motion to disqualify Keller Lenkner in advance of the July 15, 2021 hearing on Facebook's motion to dismiss in light of the importance of the issues raised by the motion to disqualify. ECF No. 123. The Court noted that the Court was focusing on preparation for the motion to dismiss hearing and would issue a written decision on the motion to disqualify shortly. *Id.* On July 20, 2021, the Court issued a written decision on the motion to disqualify. ECF No. 127.

On May 20, 2021, Facebook filed the instant motion to dismiss. ECF No. 97 ("Mot."). On June 17, 2021, Plaintiffs filed an opposition. ECF No. 109 ("Opp."). On June 28, 2021, the United States District Court for the District of Columbia issued decisions on Facebook's motions to dismiss in *FTC v. Facebook, Inc.*, No. 20-CV-3590-JEB, and *State of New York v. Facebook*, *Inc.*, No. 20-CV-3589-JEB. On July 1, 2021, the Court permitted **[**15]** Plaintiffs to file a supplemental brief regarding those decisions. ECF No. 115. On July 5, 2021, Plaintiffs filed a supplemental brief. ECF No. 116 ("Pls. Supp. Br."). On July 7, 2021, Facebook filed a reply. ECF No. 117 ("Reply"). The Court held a hearing on the instant motion on July 15, 2021.

[*762] Plaintiff Layser voluntarily dismissed her case on August 5, 2021. ECF No. 129. Plaintiff Mossman voluntarily dismissed her case on November 4, 2021. ECF No. 182. Thus, a total of 11 cases remain.

II. LEGAL STANDARD

A. Motion to Dismiss Under *Federal Rule of Civil Procedure 12(b)(6)*

Rule 8(a) of the Federal Rules of Civil Procedure requires a complaint to include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A complaint that fails to meet this standard may be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *Rule 8(a)* requires a plaintiff to plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal **[**16]** quotations omitted).

For purposes of ruling on a *Rule 12(b)(6)* motion, the Court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. Additionally, the Court may consider materials referenced in the complaint under the incorporation by reference doctrine, even if a plaintiff failed to attach those materials to the complaint. *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)*.

The Court, however, need not accept as true allegations contradicted by judicially noticeable facts, *see Shwarz v. United States, 234 F.3d 428, 435 (9th Cir. 2000)*, and it "may look beyond the plaintiff's complaint to matters of public record" without converting the *Rule 12(b)(6)* motion into a motion for summary judgment, *Shaw v. Hahn, 56 F.3d 1128, 1129 n.1 (9th Cir. 1995)*. Nor must the Court "assume the truth of legal conclusions merely because they are cast in the form of factual allegations." *Fayer v. Vaughn, 649 F.3d 1061, 1064 (9th Cir. 2011)* (per curiam) (quoting *W. Mining Council v. Watt, 643 F.2d 618, 624 (9th Cir. 1981)*). Mere "conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss." *Adams v. Johnson, 355 F.3d 1179, 1183 (9th Cir. 2004)*.

B. Leave to Amend

If the Court determines that a complaint should be dismissed, it must then decide whether to grant leave to amend. Under *Rule 15(a) of the Federal Rules of Civil Procedure*, leave to amend "shall be freely given when justice so requires," bearing in mind "the underlying purpose of *Rule 15* to facilitate decision[s] on the **[**17]** merits, rather than on the pleadings or technicalities," *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (alteration and internal quotations omitted). When dismissing a complaint for failure to state a claim, "a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Id. at 1130* (internal quotations omitted). Accordingly, leave to amend generally shall be denied only if allowing amendment would unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has acted in bad faith. *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 532 (9th Cir. 2008)*.

[*763] III. DISCUSSION

Section 2 of the Sherman Act makes it unlawful for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. To state a claim for monopolization under *Section 2 of the Sherman Act*, a plaintiff must allege: "(1) [p]ossession of monopoly power in the relevant market"; (2) "willful acquisition or maintenance of that power" through exclusionary conduct; and (3) "causal antitrust injury." *SmileCare Dental Grp. v. Delta Dental Plan of Cal., Inc., 88 F.3d 780, 783 (9th Cir. 1996)* (internal quotation omitted).

In turn, *Section 1 of the Sherman Act* prohibits "[e]very contract, **[**18]** combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. "To establish liability under *§ 1*, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement was in unreasonable restraint of trade." *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016)*.

Consumers allege that Facebook violated *Section 2 of the Sherman Act* through a "two-pronged anticompetitive strategy." *See* CC ¶ 219. First, Consumers allege that Facebook acquired and maintained monopoly power in the Social Network and Social Media Markets by making false representations to users about Facebook's data privacy practices. For ease of reference, the Court refers to Consumers' claims based on this theory of liability as Consumers' "data privacy claims." Second, Consumers allege that Facebook's "Copy, Acquire, Kill" strategy allowed Facebook to maintain monopoly power in the Social Network and Social Media Markets. The Court refers to Consumers' claims based on this theory of liability as Consumers' "'Copy, Acquire, Kill' claims."

Consumers also allege that Facebook's conduct constitutes unjust enrichment under California common law. The Court refers to this as Consumers' "Unjust Enrichment claim."

Like Consumers, Advertisers challenge Facebook's **[**19]** "Copy, Acquire, Kill" strategy under *Section 2 of the Sherman Act*. Specifically, Advertisers allege that the "Copy, Acquire, Kill" strategy allowed Facebook to maintain monopoly power in the Social Advertising Market. The Court refers to Advertisers' claims based on this theory of liability as Advertisers' "'Copy, Acquire, Kill' claims."

Additionally, Advertisers allege that Facebook maintained monopoly power in the Social Advertising Market by entering a contract with Google called the Google Network Bidding Agreement ("GNBA"). Advertisers also allege that the GNBA was an unreasonable restraint of trade. Thus, Advertisers challenge the GNBA under *Section 1 of the Sherman Act* and *Section 2 of the Sherman Act*. The Court refers to these claims as Advertisers' "GNBA claims."

Facebook moves to dismiss all of these claims. Specifically, Facebook argues that: (1) neither Consumers nor Advertisers have alleged cognizable product markets; (2) Consumers have not plausibly alleged monopoly power; (3) Consumers' data privacy claims are untimely; (4) Consumers' and Advertisers' "Copy, Acquire, Kill" claims are untimely; (5) Consumers have not plausibly alleged that Facebook's deceptive data privacy practices were anticompetitive; (6) neither Consumers nor **[**20]** Advertisers have plausibly alleged that Facebook's "Copy, Acquire, Kill" strategy was anticompetitive; (7) neither Consumers nor Advertisers have adequately alleged causal antitrust injury; and (8) Consumers **[*764]** have not adequately stated a claim for unjust enrichment. Facebook also argues that Consumers' requests for injunctive relief are barred by the doctrine of laches.

The Court rules as follows: (1) Consumers and Advertisers have adequately alleged that Facebook has monopoly power in cognizable product markets; (2) because Consumers have adequately alleged that their data privacy claims are timely, that Facebook's false representations about its data privacy constitute exclusionary conduct, and that Consumers have suffered a causal antitrust injury, the Court DENIES Facebook's motion to dismiss Consumers' data privacy claims; (3) because Consumers' and Advertisers' "Copy, Acquire, Kill" claims are untimely, the Court GRANTS Facebook's motion to dismiss Consumers' and Advertisers' "Copy, Acquire, Kill" claims with leave to amend; (4) because Advertisers have adequately alleged that they were injured by the GNBA, the Court DENIES Facebook's motion to dismiss Advertisers' GNBA claims; **[**21]** and (5) because Consumers have failed to state a claim for unjust enrichment, the Court GRANTS Facebook's motion to dismiss Consumers' Unjust Enrichment claim with leave to amend. Below, the Court discusses each of these conclusions in turn.

A. Consumers and Advertisers Adequately Allege that Facebook Has Monopoly Power in Cognizable Product Markets

The first element of a claim for monopolization under the *Sherman Act* is the "[p]ossession of monopoly power in [a] relevant market." *SmileCare, 88 F.3d at 783*. Accordingly, Consumers and Advertisers must establish "both that a 'relevant market' exists and that [Facebook] has power within that market." *Newcal Indus., Inc. v. Ikon Off. Sol., 513 F.3d 1038, 1044 (9th Cir. 2008)*.

To "plead a relevant market" for purposes of a *Sherman Act* claim, a plaintiff must allege "both a geographic market and a product market." *Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018)*. All parties agree that the relevant geographic market is the United States.

A product market "must encompass the product at issue as well as all economic substitutes for the product." *Newcal Indus., 513 F.3d at 1045*. "Economic substitutes have a 'reasonable interchangeability of use' or sufficient 'cross-elasticity of demand' with the relevant product." *Hicks, 897 F.3d at 1120* (internal citation omitted). Whether products are reasonably interchangeable depends on the products' "price, use[,] and qualities." **[**22]** *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *see also* *United States v. Microsoft Corp., 253 F.3d 34, 51-52, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (explaining that products are in the same market if they are "reasonably interchangeable by consumers for the same purposes"). In turn, there is a cross-elasticity of demand between two products where "an increase in the price of one product leads to an increase in demand for another." *Olin Corp. v. FTC, 986 F.2d 1295, 1298 (9th Cir. 1993)*.

Additionally, "[w]ithin a general product market, 'well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes.'" *Hicks, 897 F.3d at 1121* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*). A plaintiff may allege a distinct submarket for a product by alleging "practical indicia" of the submarket. *Brown Shoe, 370 U.S. at 325*. Examples of "practical indicia" include: "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics **[*765]** and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.*

The Ninth Circuit has held that "what constitutes a relevant market is a factual determination for the jury." *Image Tech. Servs. v. Eastman Kodak, 125 F.3d 1195, 1203 (9th Cir. 1997)*. Furthermore, the Ninth Circuit has held that the "definition of the relevant market is basically a fact question dependent upon the special characteristics of the industry involved." *Twin City Sportservice, Inc. v. Charles O'Finley & Co., 676 F.2d 1291, 1299 (9th Cir. 1982)*. Although a defendant may **[**23]** raise market definition in a motion to dismiss, "the question of whether the market should include other products is better resolved at the summary judgment stage." *Datel Holdings Ltd. v. Microsoft Corp., 712 F. Supp. 2d 974, 997 (N.D. Cal. 2010)*. Accordingly, "[o]n a motion to dismiss, the court need not engage in extensive analyses of reasonable interchangeability and cross elasticity of demand." *In re Webkinz Antitrust Litig., 695 F. Supp. 2d 987, 995 (N.D. Cal. 2010)*. In other words, a plaintiff is "not required to identify every alleged competitor in its pleadings." *FTC v. Facebook, Inc., No. 20-CV-3590-JEB, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *13 (D.D.C. June 28, 2021)*.

In turn, a plaintiff can establish market power either with "direct evidence" or with "circumstantial evidence." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)*. Direct evidence includes "evidence of restricted output and supracompetitive prices." *Id.* (citing *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*). However, "such direct proof is only rarely available." *Microsoft, 253 F.3d at 51*. Accordingly, a plaintiff typically establishes market power with circumstantial evidence. *Id.*

The strongest circumstantial evidence of market power is evidence that the "defendant owns a dominant share" of the relevant market and that the market has "significant barriers to entry." *Rebel Oil, 51 F.3d at 1434*. A showing that the defendant has a market share of greater than 65% typically is sufficient to "establish a prima facie case of market power." *Eastman Kodak, 125 F.3d at 1206*. By contrast, "numerous cases hold that a market share of less than 50 percent **[**24]** is presumptively insufficient to establish market power." *Rebel Oil, 51 F.3d at 1438*. In turn, "[e]ntry barriers are 'additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants,' or 'factors in the market that deter entry while permitting incumbent firms to earn monopoly returns.'" *Id. at 1439* (citing *Los Angeles Land Co. v. Brunswick Corp., 6 F.3d 1422, 1427-28 (9th Cir. 1993)*).

1. Consumers Adequately Allege that Facebook Has Monopoly Power in the Social Network and Social Media Markets

Consumers allege that Facebook has monopoly power in the Social Network and Social Media Markets. Facebook contends that, as defined by Consumers, the Social Network and Social Media Markets are not cognizable product markets. Facebook also contends that, even if those markets are cognizable, Consumers have not plausibly alleged that Facebook has monopoly power. For the reasons below, the Court rejects these arguments.

a. Consumers Adequately Allege that the Social Network and Social Media Markets are Cognizable Product Markets

i. Consumers Adequately Allege the Social Network Market

According to Consumers, a social network service is a distinct type of social **[*766]** media service, which is an online service that enables users "to distribute various forms of media—such as text **[**25]** messages, photos, videos, and music—to other users of the same application." CC ¶ 72. Specifically, a social network service enables "users to find, communicate, and interact with friends, family, personal acquaintances, and other people with whom the users have shared interests or connections." *Id.* ¶ 56. Facebook, for example, allows users to create profiles, to designate other users as "friends," to share media and information with other users, to form groups with other users based on common interests, to plan events with other users, and to play games with other users. *Id.* ¶ 51.

Consumers allege that social network services are not "reasonably interchangeable" with other online services and that there is a distinct Social Network Market, which is a "part or sub-part of the Social Media Market." *Id.* ¶ 56. Under Consumers' definition, Facebook is the only significant social network service and other social network services, such as Diaspora, Ello, Vero, Clubhouse, and Reddit "constitute 'only a very small drop in the ocean compared to Facebook.'" *Id.* ¶ 68. However, in the past, Myspace, Friendster, Orkut, Bebo, Flip.com, and Google+ competed with Facebook in the Social Network Market. **[**26]** *Id.* ¶¶ 36-37.

Facebook contends that Consumers' allegations are inadequate because Consumers have not provided a basis for determining which products are in the Social Network Market and because Consumers unreasonably exclude "countless" services that allow users to "kill time." Mot. at 16-17. For the reasons below, the Court rejects Facebook's contentions.

To plead a product market based on "reasonable interchangeability," a plaintiff must allege details about a product's "'price, use and qualities'" and explain why products without those characteristics are not reasonably interchangeable. *See* Webkinz, 695 F. Supp. 2d at 994 (quoting United States v. Oracle Corp., 331 F. Supp. 2d 1098, 1131 (N.D. Cal. 2004)); *see also* FTC v. Facebook, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *11 (explaining that a plaintiff "may permissibly plead that certain 'factors' of both the service at issue and its potential substitutes—*e.g.*, their 'price, use[,] and qualities'—render them not 'reasonably interchangeable' in the eyes of users"). In other words, the plaintiff must allege that other types of products are not "reasonably interchangeable by consumers for the same purposes." Microsoft, 253 F.3d at 51-52. For example, allegations that a product has "a distinct core functionality," "distinct perceptions by consumers," "distinct customer targeting by manufacturers," "distinct analyses by industry **[**27]** analysts," and "distinct pricing and pricing patterns" are sufficient to establish that there is a distinct market for that product. *See* Datel Holdings, 712 F. Supp. 2d at 997. Additionally, statements by companies explaining which products they see as competitors for their own products are highly probative. *See* Epic Games, Inc. v. Apple Inc., No. 20-CV-05640-YGR, 559 F. Supp. 3d 898, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *51 (N.D. Cal. Sept. 10, 2021).

Furthermore, "[b]ecause every market that encompasses less than all products is, in a sense, a submarket," all the factors relevant for determining whether there is a distinct submarket also "are relevant . . . in determining the primary market." Olin, 986 F.2d at 1299 (citing United States v. Continental Can Co., 378 U.S. 441, 449, 453-55, 84 S. Ct. 1738, 12 L. Ed. 2d 953 (1964)). Thus, a plaintiff may support its product market definition by pleading facts which show "industry or public recognition of the [market] as a **[*767]** separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." Brown Shoe, 370 U.S. at 325.

Consumers allege that social network services have three "peculiar characteristics." *Id.* First, every social network service uses a "social graph," which is a system for tracking connections between users. CC ¶ 57. A social graph records both direct connections, like whether two users have designated each other as "friends," **[**28]** and indirect connections, like whether two users list the same interests. *Id.* Social network services often use social graphs to "encourage their users to expand their networks by suggesting new people the users may connect to." *Id.* Second, social network services "provide substantive features to users which facilitate a wide array of interactions among the wide array of people that make up a user's social graph." *Id.* ¶ 58. For example, social networks allow users to create groups based on common interests, hobbies, and backgrounds; organize events; and play interactive games. *Id.* Third, social networks "provide users with the convenience of a 'one-stop shop'" by "combin[ing] multiple substantive features and functionalities into one product." *Id.* ¶ 59. As Facebook CEO Mark Zuckerberg has put it, this "multi-functionality" means that social network services are the "digital equivalent of the town square." *Id.*

Together, these characteristics give social network services a "distinct core functionality": fostering genuine social experiences between users. Datel Holdings, 712 F. Supp. 2d at 997. Facebook itself has stressed to investors that this distinct core functionality sets Facebook's social network service apart from **[**29]** other online services. For example, in a 2012 presentation to investors, Facebook described its service as "social by design, with people and relationships at the center of every experience." ECF No. 97-6 at 1. According to Facebook, this core functionality "creates social experiences that are powerful and universal" and has "achieved a level of engagement *unlike anything else on the web*." *Id.* (emphasis added).

Indeed, statements by Facebook executives provide strong evidence that Facebook has always viewed other social network services as its primary competitors. The most striking example is a statement made after Google's launch of the Google+ social network. Prior to the 2010 launch of Google+, Google offered at least three significant online services: YouTube, Gmail, and Google Search. CC ¶¶ 73, 131. However, it was not until Google announced Google+ that Facebook began to view Google as a direct competitive threat. With Google+, Google "attempt[ed] to build out a 'social graph' that would leverage a common user identity across Google products, including YouTube and Gmail." *Id.* ¶ 131. Specifically, the "planned features for Google+ included a continuous scroll product called the **[**30]** 'stream'; a companion feature called 'sparks,' which related the 'stream' to users' individual interests; and a sharing app called 'Circles' to share information with one's friends, family, contacts, and the public at large." *Id.* ¶ 132. Facebook immediately realized that Google+ posed a competitive threat unlike any other online service. Indeed, although Facebook had been planning to remove a privacy feature in 2011, a Facebook executive vetoed that plan and stated: "IF ever there was a time to AVOID controversy, it would be when the world is comparing our offerings to G+." *Id.* ¶ 134. The executive added that Facebook should postpone any privacy changes "until the direct competitive comparisons begin to die down." *Id.* These statements indicate Facebook's belief that Google+, a social network service, **[*768]** was a competitive threat in a way that YouTube, Gmail, and Google Search were not.

Other internal communications show that Facebook employees have frequently distinguished between social network services and other types of online services. For example, in August 2012, Facebook VP of Business and Marketing Partnerships David Fischer stated that there are at least six distinct categories **[**31]** of online applications: "Social network apps," which included Google+ and Twitter; "Photo sharing apps"; "Messaging apps"; "Local apps"; "Social search apps"; and "Platforms." AC ¶ 136. Similarly, in November 2012, Facebook VP of Global Operations Justin Osofsky stated that Facebook would be making an effort to "define competitive networks." *Id.* ¶ 143. Indeed, when Facebook began planning to remove public access to Facebook's Platform for developers, a Facebook engineer characterized the plan as a "protectionist grab to make sure no one else can make a competing social network." *Id.* ¶ 180.

These statements strongly support Consumers' allegation that there is a distinct Social Network Market. As discussed, a company's statements indicating that it does not view other products as competitive with its own product support a conclusion that the products are not in the same market. *Epic Games, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *51*. In *Epic*, for example, the court highlighted statements by Microsoft, the manufacturer of the Xbox console gaming system, which indicated that Microsoft did "not consider cellular or tablet devices such as the iPhone or iPad as competitors to the Xbox." *Id.* These statements supported a conclusion that there were separate **[**32]** markets for "console gaming" and "mobile gaming." *2021 U.S. Dist. LEXIS 172303, [WL] at *51-52*. Similarly, all of Facebook's statements about the unique properties of social network services support a conclusion that there is a distinct Social Network Market.

Moreover, Consumers explain in detail why social network services and generic social media services are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*. In contrast to social network services, most social media services do not focus on facilitating social connections and fostering relationships between users. CC ¶ 65. Instead, most social media services focus on the "distribution and consumption of content." *Id.*

Consumers provide two examples to illustrate this distinction: YouTube and TikTok. YouTube is a social media service which "facilitates the sharing of videos of varying temporal length." *Id.* ¶ 36. Unlike a social network service, in which users share content with friends and acquaintances, most videos posted on YouTube can be viewed by "users with a wide range of relationships to the person posting, including by strangers." *Id.* ¶ 65. For example, whereas a "user might use YouTube to access and watch a complete stranger's video—such as a cooking **[**33]** recipe—the same user would use Facebook, not YouTube, to share *that* video with the user's friends, family, and real-world connections." *Id.* (emphasis in original). As the U.S. House of Representative has explained, there is a "fundamental difference" between sharing personal content, like a video of a "child's first steps," with friends on a social network service and "broadcasting it publicly on YouTube." *Investigation of Competition in Digital Markets, Majority Staff Report and Recommendations*, Subcommittee on Antitrust, Commercial, and Administrative Law of the Committee on the Judiciary at 91 (Oct. 6, 2020) ("House Report"), https://bit.ly/32JPE1r. Thus, social network services like Facebook and social media services like YouTube have "distinct **[*769]** core functionalit[ies]," *Datel Holdings, 712 F. Supp. 2d at 997*, and are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*.

In turn, TikTok is a social media service which "allows for the sharing of short-form videos of limited temporal length." CC ¶ 36. Unlike a social network service, users of TikTok primarily post videos to be viewed by strangers. Indeed, TikTok's stated goal is to be a "global platform for users to express their ideas by sharing videos **[**34]** with a broader community." House Report at 91. Accordingly, for all the reasons that apply in the context of YouTube, social network services like Facebook and social media services like TikTok have "distinct core functionalit[ies]," *Datel Holdings, 712 F. Supp. 2d at 997*, and are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*.

For slightly different reasons, Consumers allege that social network services are distinct from mobile messaging service like Apple's "iMessage." CC ¶ 60. Although iMessage is designed to allow users to share media with friends and acquaintances, iMessage cannot be used to communicate with anybody outside a pre-defined list of contacts and does not offer substantive features besides "delivering messages." *Id.* Thus, unlike social network services, iMessage does not "facilitat[e] a broader online social experience." *Id.* Moreover, iMessage cannot be used by people without Apple devices, whereas social network services can "be used across devices." *See* CC ¶ 60 n.23; House Report at 136 n.752. Thus, social network services like Facebook and mobile messaging services like iMessage have "distinct core functionalit[ies]," *Datel Holdings, 712 F. Supp. 2d at 997*, and are not "reasonably interchangeable by consumers for the **[**35]** same purposes." *Microsoft, 253 F.3d at 51-52*.

Additionally, Consumers explain in detail why social network services are distinct from professional networking services like LinkedIn. Although professional networking services use a social graph to facilitate connections between their users, these services have a relatively narrow purpose: help their users find jobs and learn about their industries. CC ¶ 61. This narrow purpose means that many users "have *both* a LinkedIn and a Facebook account, not one or the other," *id.* ¶ 62, and that most consumers do not view LinkedIn as an "economic substitute" for a social network service. *Newcal Indus., 513 F.3d at 1045*. Indeed, LinkedIn itself has stressed that people use social network services and professional networking services for fundamentally different reasons. As explained by LinkedIn in a presentation to potential advertisers, users of "personal networks" typically share "info on friends" and "info on personal interests," whereas users of "professional networks" typically share "career info." *Id.* ¶ 64. Thus, social network services like Facebook and professional networking services like LinkedIn have "distinct core functionalit[ies]," *Datel Holdings, 712 F. Supp. 2d at 997*, and are not "reasonably interchangeable by consumers for the **[**36]** same purposes." *Microsoft, 253 F.3d at 51-52*.

Consumers also explain why social network services are not reasonably interchangeable with online services outside the sphere of social media. For example, online entertainment services like Hulu limit users to viewing media provided by the services themselves and do not allow users to communicate with each other. *See* CC ¶ 75. Thus, such services do not facilitate the distribution of media between "users of the same application," *id.* ¶ 72, let alone "communication and sharing content **[*770]** among groups of friends," House Report at 91. Moreover, whereas social network services make money by showing users advertisements, online entertainment services like Hulu typically "collect from users a per-use monetary fee or a regularly-occurring (monthly or annual) fee." CC ¶ 76. Accordingly, social network services and online entertainment services have both "distinct core functionalit[ies]" and "distinct pricing." *Datel Holdings, 712 F. Supp. 2d at 997*. Social network services are even more distinct from search engines like Google, Yahoo, and Bing, which do not host their own media and do not allow for communications between users. CC ¶ 60. Accordingly, social network services, online entertainment services, and search **[**37]** engines are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*.

Finally, Consumers point out that there has been significant "industry or public recognition of the" Social Network Market "as a separate economic entity." *Brown Shoe, 370 U.S. at 325*. For example, the U.S. House of Representatives found during its recent investigation of competition in digital markets that social network services have the distinct purpose of "facilitating communication and sharing content among groups of friends who choose each other and enjoy content in large part because of those relationships." House Report at 91. Based on this finding, the House concluded that "the Social Network Market and the Social Media Market" are related, but distinct, economic markets. *See* CC ¶ 55; House Report at 90. Additionally, Germany's Federal Cartel Office and the United Kingdom's Competition and Markets Authority have made the same distinction. *Id.* This "public recognition" of the

Social Network Market reinforces the Court's conclusion that Consumers have adequately alleged the Social Network Market. *Brown Shoe, 370 U.S. at 325*.

FTC v. Facebook, Inc., No. 20-CV-3590-JEB, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627 (D.D.C. June 28, 2021), confirms that Consumers have adequately alleged the Social Network Market. In *FTC v. Facebook*, the Federal Trade Commission ("FTC") alleged **[**38]** that Facebook possessed "monopoly power in the market for Personal Social Networking Services." *2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *7*. The FTC's definition of "Personal Social Networking Services" or "PSN services" largely resembled Consumers' definition of "social network services." *2021 U.S. Dist. LEXIS 119540, [WL] at *10*. Specifically, the FTC defined "PSN Services" as "online services that enable and are used by people to maintain personal relationships and share experiences with friends, family, and other personal connections in a shared social space." *Id.* Additionally, like Consumers, the FTC alleged that PSN services have "[t]hree key elements": (1) they "are built on a social graph"; (2) they "include features that many users regularly employ to interact with personal connections"; and (3) they "include features that allow users to find and connect with other users." *Id.*

The FTC's complaint also "explain[ed] why four different kinds of arguably comparable online services are not 'reasonably interchangeable' with PSN services." *Id.* First, the FTC alleged that PSN services are distinct from professional networking services like LinkedIn, which are "designed for and used primarily by professionals for sharing professional content." *Id.* Unlike PSN services, **[**39]** the FTC explained, professional networking services are not used to "maintain personal relationships and share experiences with friends, family, and other personal connections." *Id.* Second, the FTC alleged that PSN services are distinct from "interest-based" networking services that have a specific focus, like physical exercise. *Id.* Third, the FTC alleged that PSN services **[*771]** are distinct from "services that allow for consuming and sharing video or audio content, such as YouTube, Spotify, Netflix, or Hulu." *Id.* "[U]sers of such services," the FTC explained, "mostly consume such content passively or share content created by others (rather than content they have created), and such sharing, where it occurs, is not to the user's network of personal connections but rather to a general and wide audience of unknown users." *Id.* Finally, the FTC alleged that PSN services are distinct from "mobile messaging services," which "lack a 'shared social space' for interaction" and "do not employ a social graph to facilitate users' finding and 'friending' other users." *Id.*

Taking these allegations as a whole, the court concluded that the FTC had adequately alleged a market for PSN services. *2021 U.S. Dist. LEXIS 119540, [WL] at *11-12*. Although Consumers **[**40]** do not address "interest-based" network services, Consumers specifically address every other type of online service addressed by the FTC and provide a detailed explanation for why each service is not reasonably interchangeable with a social network service. Accordingly, the *FTC v. Facebook* court's conclusion that the FTC adequately alleged a market for PSN services confirms that Consumers have adequately alleged the Social Network Market.

Facebook offers several meritless arguments. First, Facebook argues that Consumers "fail to make any factual allegations about 'cross-elasticity of demand.'" Mot. at 17. However, the United States Supreme Court has explained that a plaintiff may establish the "outer boundaries of a product market" with reference to "the reasonable interchangeability of use *or* the crosselasticity of demand between the product itself and substitutes for it." *Brown Shoe, 370 U.S. at 325* (emphasis added). Thus, there is "no authority . . . supporting Facebook's argument that Plaintiff must plead specific facts regarding the price or non-price terms under which . . . users would switch (if ever) to alternatives." *FTC v. Facebook, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *11* (emphasis in original). Indeed, all that is required at the pleading stage is a qualitative description **[**41]** of the product market which shows that "certain 'factors' of both the service at issue and its potential substitutes—*e.g.*, their 'price, use[,] and qualities'—render them not 'reasonably interchangeable' in the eyes of users." *Id.; see also Datel Holdings, 712 F. Supp. 2d at 997* (denying motion to dismiss where complaint described the "distinct" qualities of the product and explained why products without those qualities were not "reasonably interchangeable"). Accordingly, Consumers' failure to address the cross-elasticity of demand is irrelevant.

Facebook also contends that Consumers "fail[] to provide a plausible basis for identifying which firms provide products that consumers consider acceptable substitutes, and which do not." Mot. at 16. According to Facebook, the Social Network Market is implausible because it excludes the "countless gaming, news, messaging, and other apps" that allow users to "kill time." *Id.*

However, even leaving *FTC v. Facebook* aside, Facebook ignores the many cases in which courts have found that entertainment markets may contain multiple distinct submarkets. Indeed, in *Kickflip, Inc. v. Facebook, Inc., 999 F. Supp. 2d 677, 687 (D. Del. 2013)*, the court held that the plaintiff adequately alleged a market for "social-game networks." According to the plaintiff, that market included "Facebook, **[**42]** MySpace, Google+, and other social networks that offer social games to users" and did not include "other platforms that offer games through websites, mobile devices, or stores selling games." *Id.* The plaintiff explained that, in contrast to these **[*772]** other gaming platforms, social network games "allow interactions between players who are not directly connected to a console, are less elaborate and expensive, derive revenue primarily from advertising or in-game purchases, leverage an existing social network, and have a large user base." *Id.* The court held that these allegations were "sufficient to survive Facebook's motion to dismiss." *Id. at 687-88*. Not only does *Kickflip* contradict Facebook's argument that the relevant market must include all online services that allow individuals to "kill time," it directly supports Consumers' argument that social network services are distinct from other types of online services.

Similarly, several courts have found that the market for video games contains multiple distinct submarkets. For example, in *Epic Games v. Apple*, the court rejected Apple's argument that the relevant product market was the "market for all digital video games." *2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *1*. Specifically, after a bench trial, the court found that **[**43]** although there was "some competition amongst the players in the general video game market," this general competition was not "sufficient for purposes of defining a relevant product market." *2021 U.S. Dist. LEXIS 172303, [WL] at *55*. Instead, the evidence showed that the "wider video game market . . . . include[d] at least four distinct submarkets"—(1) "mobile gaming"; (2) "PC gaming"; (3) "console gaming"; and (4) "cloud-based game streaming." *See* *2021 U.S. Dist. LEXIS 172303, [WL] at *47-55*. Similarly, in *Datel Holdings*, the court found plausible the plaintiff's allegation that Microsoft's Xbox 360 and Sony's Playstation 3 were not in the same product market as Nintendo's Wii. *712 F. Supp. 2d at 982, 997*.

Thus, Facebook's suggestion that all "gaming, news, messaging, and other apps" must be included in the same market is implausible. Although it is not Facebook's burden to establish the relevant product market, Facebook's failure to suggest a plausible alternative market supports Consumers' alleged market. Moreover, Facebook's suggestion that social network services are reasonably interchangeable with all online services that can be used to "kill time" directly contradicts Facebook's statement that its social network service has "achieved a level of engagement *unlike anything else on the web*." ECF No. 97-6 **[**44]** at 1 (emphasis added).

Finally, Facebook summarily asserts that Consumers have failed to explain why Twitter, Snapchat, LinkedIn, and TikTok are not substitutes for social network services. Mot. at 16. To the contrary, Consumers explain precisely why social network services, LinkedIn, and TikTok are not "reasonably interchangeable by consumers for the same purposes." *See* *Microsoft, 253 F.3d at 51-52*. Given Consumers' detailed allegations, Facebook's conclusory argument has no merit.

Although the Court agrees that Consumers have not explained why Twitter and Snapchat are not social network services, Facebook does not explain why this omission is fatal to Consumers' complaint. As discussed, the Ninth Circuit has held that "what constitutes a relevant market is a factual determination for the jury." *Eastman Kodak, 125 F.3d at 1203*. Indeed, "the question of whether the market should include other products is better resolved at the summary judgment stage," *Datel Holdings, 712 F. Supp. 2d at 997*, and a plaintiff is "not required to identify every alleged competitor in its pleadings," *FTC v. Facebook, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *13*. Thus, because Consumers "consider and reject multiple conceivably interchangeable substitutes in great factual detail," Consumers have no obligation to address every possible substitute. *RealPage, Inc. v. Yardi* ***[*773]*** *Systems, Inc., 852 F. Supp. 2d 1215, 1225 (C.D. Cal. 2012)*.

Thus, Consumers **[**45]** have adequately alleged the Social Network Market.

ii. Consumers Adequately Allege the Social Media Market

Consumers allege that the "Social Network Market is a distinct part or sub-part of the Social Media Market." CC ¶ 56. Below, the Court finds that Consumers adequately allege the Social Media Market.

As discussed, social media services are online services that enable users "to distribute various forms of media—such as text messages, photos, videos, and music—to other users of the same application." *Id.* ¶ 72. Additionally, instead of "charg[ing] users a monetary price for access," social media services "subject the users to ads . . . or require the users to give up some form of limited data." *Id.* ¶ 76.

Consumers allege that social media services are not "reasonably interchangeable" with other online services and that there is a distinct Social Media Market. *Id.* ¶¶ 72-81. In addition to Facebook, the largest companies in this market are Twitter, TikTok, LinkedIn, Snapchat, and YouTube. *Id.* ¶¶ 36-37. Facebook contends that Consumers' allegations are inadequate because Consumers have failed to identify characteristics that differentiate social media services from other online services **[**46]** and have failed to provide details about the cross-elasticity of demand. Mot. at 17-18. For the reasons below, the Court rejects Facebook's contentions.

To plead a product market based on "reasonable interchangeability," a plaintiff must allege details about a product's "'price, use and qualities'" and explain why products without those characteristics are not reasonably interchangeable. *See* *Webkinz, 695 F. Supp. 2d at 994* (quoting *Oracle, 331 F. Supp. 2d at 1131*). In other words, the plaintiff must allege that other types of products are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*. For example, allegations that a product has "a distinct core functionality," "distinct perceptions by consumers," "distinct customer targeting by manufacturers," "distinct analyses by industry analysts," and "distinct pricing and pricing patterns" are sufficient to establish that there is a distinct market for that product. *See* *Datel Holdings, 712 F. Supp. 2d at 997*. Additionally, statements by companies explaining which products they see as competitors for their own products are highly probative, *see* *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *51*, as is "industry or public recognition of the" product market "as a separate economic entity," *Brown Shoe, 370 U.S. at 325*.

As an initial matter, Facebook executives have recognized that Facebook primarily **[**47]** competes with other social media services. For example, Consumers highlight a 2012 presentation by Facebook COO Sheryl Sandberg which directly compared Facebook to other "social media" companies and stated that Facebook was "95% of all social media." CC ¶ 77. This statement strongly supports a conclusion that there is a distinct Social Media Market. *See* *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *51*.

Moreover, Consumers explain in detail why social media services and other online services which facilitate the consumption of media are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*. First, Consumers explain that social media services are not reasonably interchangeable with online entertainment services like Hulu. Specifically, online entertainment services like Hulu limit users to viewing media provided by the services themselves and **[*774]** do not allow users to communicate with each other. *See* CC ¶ 75. Thus, such services do not facilitate the distribution of media between "users of the same application," *id.* ¶ 72, let alone "communication and sharing content among groups of friends," House Report at 91. Moreover, whereas social media services make money by showing users advertisements, online entertainment services **[**48]** like Hulu typically "collect from users a per-use monetary fee or a regularly-occurring (monthly or annual) fee." CC ¶ 76. Accordingly, because social media services and online entertainment services have both "distinct core functionalit[ies]" and "distinct pricing," they are not "reasonably interchangeable." *See* *Datel Holdings, 712 F. Supp. 2d at 997*.

Second, Consumers explain that social media services are distinct from search engines like Google, Yahoo, and Bing, which do not host their own media and do not allow for communications between users. CC ¶ 73. Thus, social media services and search engines are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*.

Finally, Consumers point out that there has been "industry or public recognition" of the Social Media Market. *See* Olin, 986 F.2d at 1299. For example, the U.S. House of Representatives found during its recent investigation of competition in digital markets that social media services have the distinct purpose of "facilitat[ing] the distribution and consumption of content." House Report at 91. Based on this finding, the House concluded that the "Social Media Market" is distinct from markets for other online services. House Report at 89. This "public recognition" of the Social **[**49]** Media Market reinforces the Court's conclusion that Consumers have adequately alleged the Social Media Market. *See* Brown Shoe, 370 U.S. at 325.

Epic Games v. Apple confirms that Consumers have adequately alleged a distinct Social Media Market. The Epic court found after a bench trial that, for at least two reasons, the "wider video gaming market" contained "distinct submarkets" for "mobile gaming," "PC gaming," "console gaming," and "cloud-based game streaming." Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *47-55. First, the court found that each type of gaming system appealed to a specific demographic group interested in playing a specific type of game. For example, whereas mobile gaming appealed to "women gamers of all ages . . . and gen-x male gamers" with a "focus and interest on casual games," console gaming appealed to "millennial male gamers . . . with an interest in playing action games." 2021 U.S. Dist. LEXIS 172303, [WL] at *49, *52. Second, the court found that each type of gaming system had a distinct pricing model. For example, whereas the "overwhelming majority of gaming revenue in mobile gaming derives from free-to-play games," "the gaming revenue generated by console games . . . derived overwhelmingly from pay-to-play or buy-to-play games." 2021 U.S. Dist. LEXIS 172303, [WL] at *49, *52.

The distinctions between gaming systems identified in Epic mirror the distinctions **[**50]** between social media services and online entertainment services identified by Consumers in the instant case. First, like the different gaming systems described in Epic, social media services and online entertainment services offer fundamentally different types of content and thus appeal to different types of users. *See* Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *49, 52; CC ¶ 72, 74-75. Specifically, whereas social media services provide content created by users, online entertainment services provide content created by the service itself. CC ¶ 75. Second, like the different gaming systems described in Epic, social media services and online entertainment services have **[*775]** distinct pricing models. *See* Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *49, 52; CC ¶ 76. Whereas social media services earn revenue by allowing users to access the services for free and then "subject[ing] the users to ads," online entertainment services "collect from users a per-use monetary fee or a regularly-occurring (monthly or annual) fee." CC ¶ 76. Accordingly, like the different gaming systems in Epic, social media services and online entertainment services are not reasonably interchangeable.

Facebook's arguments to the contrary are unconvincing. Facebook argues that Consumers "fail to define the contours of the 'social media' **[**51]** market by reference to cross-elasticity of demand." Mot. at 18. However, as discussed, the United States Supreme Court has explained that a plaintiff may establish the "outer boundaries of a product market" with reference to "the reasonable interchangeability of use *or* the cross-elasticity of demand between the product itself and substitutes for it." Brown Shoe, 370 U.S. at 325 (emphasis added). Indeed, there is "no authority . . . supporting Facebook's argument that Plaintiff must plead specific facts regarding the price or non-price terms under which . . . users would switch (if ever) to alternatives." FTC v. Facebook, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *11 (emphasis in original). Accordingly, Consumers' failure to address the cross-elasticity of demand is irrelevant at this stage.

Additionally, Facebook contends that Consumers "fail to allege any plausible basis for excluding competitors that provide other forms of online entertainment since they, like Facebook, compete for user attention." Mot. at 18. To the contrary, Consumers specifically allege that social media services are distinct from online entertainment services because social media services and online entertainment services have "distinct core functionalit[ies]" and "distinct pricing and pricing patterns." **[**52]** Datel Holdings, 712 F. Supp. 2d at 997. Facebook's conclusory argument regarding online entertainment fails to address these specific allegations.

Moreover, as discussed, Facebook's argument that all online services which provide "entertainment" are in the same market is implausible. For example, multiple courts have found that, although all video game systems provide users with "entertainment," the "wider video game market" contains multiple distinct submarkets. *See* Epic, 2021

U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *55; Datel Holdings, 712 F. Supp. 2d at 996-97 (holding that the plaintiff plausibly alleged that Microsoft's Xbox 360 is not in the same market as Nintendo's Wii); Kickflip, 999 F. Supp. 2d at 687 (holding that the plaintiff plausibly alleged a market for "social-game networks").

Finally, Facebook contends that Consumers unreasonably include within the market applications "that offer in-app distribution (such as WhatsApp and iMessage) while excluding competitors that allow for the distribution of media outside their own applications," such as SMS messaging and email. Mot. at 17-18. Although the Court agrees with Facebook that Consumers have not made clear why SMS messaging and email are not "reasonably interchangeable" with social media services, Facebook fails to explain why this is fatal to Consumers' complaint. As discussed, the **[**53]** Ninth Circuit has held that "what constitutes a relevant market is a factual determination for the jury." Eastman Kodak, 125 F.3d at 1203. Indeed, "the question of whether the market should include other products is better resolved at the summary judgment stage," Datel Holdings, 712 F. Supp. 2d at 997, and a plaintiff is "not required to identify every **[*776]** alleged competitor in its pleadings." FTC v. Facebook, Inc., 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *13. Thus, because Consumers "consider and reject multiple conceivably interchangeable substitutes in great factual detail," Consumers have no obligation to address every possible substitute. RealPage, 852 F. Supp. 2d at 1225.

Thus, Consumers have adequately alleged the Social Media Market.

b. Consumers Adequately Allege that Facebook Has Market Power in the Social Media and Social Network Markets

As discussed, the Ninth Circuit has held that a plaintiff establish monopoly power at the pleading stage by alleging that: (1) the defendant's share of the relevant market exceeds 65%, Eastman Kodak, 125 F.3d at 1206, and (2) the relevant market has "significant barriers to entry," Rebel Oil, 51 F.3d at 1434. Facebook argues that, even if Consumers have adequately alleged the Social Network and Social Media Markets, Consumers have not adequately alleged market power in either market. Specifically, Facebook argues that, "[i]n both market," Consumers "claim without support **[**54]** that Facebook's 'share' exceeds 65%." Mot. at 18-19. Facebook also argues that Consumers' allegations about barriers to entry are insufficient. *Id.* at 19. The Court addresses these arguments in turn.

i. Consumers Adequately Allege that Facebook's Shares of the Social Media Market and the Social Network Market Are Greater than 65%

Consumers allege that Facebook's share of the Social Media Market is between 80% and 95% and that Facebook's share of the Social Network Market is close to 100%. CC ¶¶ 262, 286. Facebook contends that Consumers' market share allegations are implausible because Consumers do not explain how they calculated the market share and because the alleged markets include other large companies. Mot. at 18-19. For the reasons below, the Court rejects these contentions.

Consumers identify two metrics for measuring market share in the Social Media Market: (1) time spent on social media applications; and (2) advertising revenue. Under either metric, Consumers allege, Facebook's share of the Social Media Market exceeds 65%.

First, Consumers allege that because "more than 80% of the time that consumers in the United States spend using social media is spent on Facebook and Instagram," **[**55]** Facebook's share of the Social Media Market exceeds 80%. CC ¶ 286. Consumers present several pieces of evidence which directly support this allegation. In a 2012 presentation to a "large telecommunications firm," Facebook COO Sheryl Sandberg asserted that "Facebook is now 95% of all social media in the US" in terms of "monthly minutes of use." *See* CC ¶ 77; House Report at 138. The same year, a report by the data analytics firm Comscore, on which Facebook previously relied for market research, found that Facebook was the "third largest web property in the world . . . and accounted for approximately 3 in every 4 minutes spent on social networking sites and 1 in every 7 minutes spent online around the world." *See*

House Report at 144; CC ¶ 159. Finally, a 2018 Facebook report showed that, even excluding Instagram, individuals spent more time on Facebook than on Snapchat and Twitter combined. *See* CC ¶ 78; House Report at 137-38.

Second, Consumers allege that, because social media services "generate virtually all of their value to shareholders in the form of advertising revenue," advertising revenue is an effective metric for measuring market share. CC ¶ 79. Using that metric, "Facebook (including **[**56]** Instagram) has over 85% of the U.S. market, with the second-place competitor, Twitter, claiming **[*777]** *less than 3.5%* market share." *Id.* (emphasis in original). Consumers do not describe Facebook's competitors' revenue in detail, but Consumers highlight that in 2018, "Facebook earned over $55 billion in revenue, almost completely from selling targeted advertising," *id.* ¶ 147, and that in 2019, "Facebook collected $70.7 billion in revenue almost entirely from allowing companies to serve ads to its users," *id.* ¶ 311.

Although Consumers do not calculate Facebook's precise share of the Social Network Market, Consumers allege that Facebook is the *only* significant social network service and that its share of the Social Network Market is close to 100%. *Id.* ¶ 68. Specifically, Consumers allege that Facebook is the "undisputed king of the social network market" and that other social network services, such as Diaspora, Ello, Vero, Clubhouse, and Reddit "constitute 'only a very small drop in the ocean compared to Facebook.'" *Id.* (internal citation omitted). Additionally, Consumers allege that, because the Social Network Market is a "distinct part or sub-part of the Social Media Market," Facebook's share **[**57]** of the Social Network Market necessarily is "higher than its share in the Social Media Market." *See id.* ¶¶ 56, 71, 262. The Court agrees with Consumers that, because the Social Network Market is a submarket of the Social Media Market, it follows that Facebook's share of the Social Network Market must be greater than Facebook's share of the Social Media Market.

Consumers provide additional evidence to bolster their market share calculations. For example, Consumers point out that "Facebook's products include three of the seven most popular mobile apps, measured by monthly active persons, reach, and percentage of daily and monthly active persons." *Id.* ¶ 78. Indeed, as of December 2019, the mobile application for Facebook's social network service "had the third highest reach of all mobile apps" in the United States, "reaching 74% of smartphone users," and the mobile application for Facebook Messenger "had the fourth highest reach" of all mobile apps, "reaching 54.1% of U.S. smartphone users." House Report at 137. By contrast, Snapchat's mobile application reached only 31.4% of smartphone users in the United States. *Id.* Similarly, Facebook's 2012 presentation to investors showed that Facebook **[**58]** had "97% penetration [with] 25-34 year olds" in the United States. ECF No. 97-6 at 2.

Under Ninth Circuit law, Consumers' allegations are more than sufficient. Indeed, because the Ninth Circuit has held that a plaintiff need not plead market share with specificity, courts frequently have held that a rough estimate of the defendant's market share is sufficient at the pleading stage. *See* *Newcal Indus., 513 F.3d at 1045* ("There is no requirement that these elements of the antitrust claim be pled with specificity."). For example, in *United Energy Trading, LLC v. Pacific Gas & Electric Co., 200 F. Supp. 3d 1012 (N.D. Cal. 2016)*, the plaintiff brought a *Sherman Act* claim against Pacific Gas & Electric Company ("PG&E") and offered only a single allegation regarding market share: "PG&E currently holds between 70-90% of the natural gas commodity market." Second Amended Complaint ¶ 2, *United Energy Trading, LLC v. Pacific Gas & Electric Co.*, No. 15-CV-02383-RS (N.D. Cal. May 13, 2016), ECF No. 89. In an order denying PG&E's motion to dismiss, the court held that this allegation was sufficient. *United Energy Trading, 200 F. Supp. 3d at 1020*.

Similarly, in *Teradata Corp. v. SAP SE, No. 18-CV-03670-WHO, 2018 U.S. Dist. LEXIS 209872, 2018 WL 6528009 (N.D. Cal. Dec. 12, 2018)*, the plaintiff brought a *Sherman Act* claim against SAP and alleged only that SAP "possesses a market share that ranges, on **[*778]** information and belief, from 60% to 90%." First Amended Complaint ¶ 67, *Teradata Corporation v. SAP SE*, No. 18-CV-03670-WHO **[**59]** (N.D. Cal. Jul. 11, 2018), ECF No. 24. In an order denying SAP's motion to dismiss, the court stated that this allegation "suffice[d] to plead SAP's market power." *Teradata, 2018 U.S. Dist. LEXIS 209872, 2018 WL 6528009, at *15*.

Finally, in *Datel Holdings*, the plaintiff brought a *Sherman Act* claim against Microsoft and alleged only that "Microsoft's share of the Multiplayer Online Dedicated Gaming Systems market was approximately 66% as of July

2009." Complaint ¶ 44, *Datel Holdings Ltd. v. Microsoft Corp.*, No. 09-CV-05535-EDL (N.D. Cal. Nov. 20, 2009), ECF No. 1. In an order denying Microsoft's motion to dismiss, the court held that this allegation was sufficient. *Datel Holdings, 712 F. Supp. 2d at 997-98*.

Consumers' allegations are far more detailed than the allegations deemed sufficient in *United Energy Trading*, *Teradata*, and *Datel Holdings*. The plaintiffs in *United Energy Trading, Teradata*, and *Datel Holdings* did not provide any explanation for how they calculated market share, let alone any specific facts that could support such calculations. *See* *United Energy Trading, 200 F. Supp. 3d at 1020*; *Teradata, 2018 U.S. Dist. LEXIS 209872, 2018 WL 6528009, at *15*; *Datel Holdings, 712 F. Supp. 2d at 997-98*. By contrast, Consumers provide *two* alternate methods for calculating Facebook's share of the Social Media Market and cite detailed facts, including data produced by Facebook itself, which support Consumers' calculations. Additionally, Consumers have provided a plausible explanation for **[**60]** why Facebook's share of the Social Network Market must be even greater. Thus, Consumers' allegations regarding Facebook's shares of the Social Media and Social Network Markets are sufficient.

FTC v. Facebook confirms that Consumers' allegations are sufficient. In *FTC v. Facebook*, the FTC alleged that Facebook's share of the market for "PSN Services" exceeded 65%. *No. 20-CV-3590-JEB, 2022 U.S. Dist. LEXIS 5415, 2022 WL 103308, at *6 (D.D.C. Jan. 11, 2022)*. The FTC offered three metrics to support that calculation, including "Facebook's share of users' time spent on such services." *Id.* Like Consumers, the FTC cited "Facebook's internal presentations" which assessed Facebook's performance using "time spent per month." *2022 U.S. Dist. LEXIS 5415, [WL] at *7*. According to the court, these allegations plausibly established that "Facebook has maintained a dominant market share during the relevant time period." *2022 U.S. Dist. LEXIS 5415, [WL] at *7*. Given Consumers' similar allegations, the Court reaches the same conclusion in the instant case.

Facebook's arguments to the contrary are unconvincing. According to Facebook, Consumers "claim without support that Facebook's 'share' exceeds 65% . . . but they make no allegations about what this number consists of." Mot. at 18. Facebook adds that "[m]erely reciting a percentage without alleging to what it refers—let alone how **[**61]** it was or could be calculated—is conclusory and is not creditable." *Id.* As an initial matter, there is no authority which suggests that antitrust plaintiffs must explain in their complaints how they calculated market share. Indeed, as discussed, courts have repeatedly held that a rough estimation of the defendant's market share, with no explanation of how that estimation was made, is sufficient at the pleading stage. *See* *United Energy Trading, 200 F. Supp. 3d at 1020*; *Teradata, 2018 U.S. Dist. LEXIS 209872, 2018 WL 6528009, at *15*; *Datel Holdings, 712 F. Supp. 2d at 997-98*. Regardless, Facebook's argument fails on its own terms because Consumers provide two independent methods for measuring Facebook's market share and explain why each method results in a market share that exceeds 80%. CC ¶¶ 71, 77-80, 262, 286.

[*779] Moreover, although Facebook relies heavily on *Korea Kumho Petrochemical v. Flexsys Am. LP, No. C07-01057 MJJ, 2008 U.S. Dist. LEXIS 68559, 2008 WL 686834 (N.D. Cal. Mar. 11, 2008)*, and *Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc., No. 12-CV-05847-JST, 2013 U.S. Dist. LEXIS 89208, 2013 WL 3242245 (N.D. Cal. June 25, 2013)*, those cases do not support Facebook's argument. Indeed, in *Korea Kumho, 2008 U.S. Dist. LEXIS 68559, 2008 WL 686834, at *9*, the court emphasized that a plaintiff "need not necessarily quantify . . . market share with precision." However, because the plaintiff's sole allegation related to market power was that the defendant had achieved "dominance" in the relevant market, the court dismissed the plaintiff's claim. *Id.*

By contrast here, Consumers have alleged that Facebook's share of the Social Media Market and share of the Social Network **[**62]** Market fall within relatively narrow ranges and have provided detailed explanations for how they calculated those ranges.

In turn, in *Rheumatology Diagnostics, 2013 U.S. Dist. LEXIS 89208, 2013 WL 3242245, at *1, *14*, although the plaintiff alleged that the defendant had a "seventy percent market share of the outpatient testing market in Northern California," this allegation provided no information about the defendant's share of the "relevant markets identified in the Complaint": the "Routine Clinical Laboratory Testing market"; the "Anatomic Pathology Laboratory Testing market"; the "Specialty Rheumatologic Laboratory Testing market"; the "Advanced Lipid Testing market"; and the

"Specialty Breast Pathology Testing market." Accordingly, the court concluded that the plaintiff had failed to allege any facts regarding defendant's share of those "relevant markets." *2013 U.S. Dist. LEXIS 89208, [WL] at *14*. That conclusion has no bearing on the instant case.

Finally, the Court rejects Facebook's argument that Consumers' market share allegations are implausible because Consumers fail to account for "large rivals like Apple's iMessage, Twitter, YouTube, Snapchat, and TikTok." Mot. at 18. As discussed, Consumers allege that, in 2018, individuals spent more time on Facebook than on Snapchat and Twitter combined. **[**63]** *See* CC ¶ 78; House Report at 137-38. Similarly, Facebook has provided evidence that, as of December 2019, the mobile application for Facebook's social networking service had more than double the number of users as Snapchat. House Report at 137. Additionally, Consumers allege that Twitter is the second largest social media service and that, measuring market share using advertising revenue, Twitter has "*less than 3.5%* market share." CC ¶ 80 (emphasis in original).

Accordingly, Consumers have adequately alleged that Facebook's shares of the Social Media Market and Social Network Market exceed 65%.

ii. Consumers Plausibly Allege that the Social Network and Social Media Markets Have Significant Barriers to Entry

As discussed, "[e]ntry barriers are 'additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants,' or 'factors in the market that deter entry while permitting incumbent firms to earn monopoly returns.'" *Rebel Oil, 51 F.3d at 1439* (citing *Los Angeles Land, 6 F.3d at 1427-28*).

Consumers allege in detail that the Social Network and Social Media Markets have at least two classic barriers to entry: (1) network effects and (2) switching costs. In response, Facebook offers one conclusory sentence: "naked **[**64]** assertions about barriers to entry do not suffice." Mot. at 19. However, as Mr. Zuckerberg has explained, "there are network effects around social products and a finite number of different social mechanics to invent." *See* CC ¶ 96. Thus, "[o]nce someone wins at a **[*780]** specific mechanic, it's difficult for others to supplant them without doing something different." *See* House Report at 143. Given this and other contemporaneous statements by Facebook about the power of network effects, Facebook's conclusory argument in the instant motion has no merit. Regardless, the Court discusses Consumers' allegations below.

First, social network services and social media services have strong network effects, which means that the value of a service increases as the number of users increases. *See* CC ¶ 83; *see also* *United States v. Microsoft Corp., 84 F. Supp. 2d 9, 20 (D.D.C. 1999)* ("A positive network effect is a phenomenon by which the attractiveness of a product increases with the number of people using it."). A direct network effect is present when a "service becomes more valuable to users as additional others use the . . . service." CC ¶ 83. Because the goal of a social media service is to provide users with content created by other users of the service, social media **[**65]** services exhibit strong direct network effects. *Id.* ¶ 84. In turn, because the goal and design of a social network service is to enable users to form social connections with other users of the service and to facilitate users' sharing of information with other users of the service, social network services exhibit even stronger direct network effects. *Id.* Indeed, in an October 2018 presentation, an economist working at Facebook "recognized that the network effects of Facebook and its products are 'very strong.'" *Id.* ¶ 96.

An indirect network effect is present when a service becomes more valuable to third parties as the service's user base grows. *Id.* ¶ 83. Because social media services and social network services make money by showing advertisements to users, both types of services exhibit strong indirect network effects. *Id.* ¶ 86.

These network effects create high barriers to entry in the Social Network and Social Media Markets because, even if a new service offers higher quality features than incumbent services, the new service is inherently less valuable because it has a smaller user base than incumbent services. *Id.* ¶ 87.

As noted, Facebook CEO Mark Zuckerberg has displayed a keen understanding **[**66]** of the barriers to entry created by network effects. In 2012, when Facebook was in the process of acquiring Instagram, Mr. Zuckerberg explained to Facebook CFO David Ebersman that "there are network effects around social products and a finite number of different social mechanics to invent." *See Id.* ¶ 96; House Report at 152. "Once someone wins at a specific mechanic," Mr. Zuckerberg stated, "it's difficult for others to supplant them without doing something different." *See* House Report at 143. Other Facebook employees have described Facebook's network effects as a "flywheel" and have stated that "[n]etwork effects make it very difficult to compete with us." CC ¶ 96 (internal citation omitted). Moreover, as the U.S. House of Representatives found during its recent investigation of competition in digital markets, "attracting a critical mass of users is essential to delivering a viable social network, as there is no reason for users to start using a social network if there is no one there with whom they can connect." House Report at 89.

Second, social network services and social media services are characterized by "high switching costs." CC ¶ 87. The United States Supreme Court has explained **[**67]** that "switching costs" are present when consumers have become "locked in" to a product and thus "will tolerate some level of . . . price increases before changing . . . brands." *See* *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 476,* ***[*781]*** *112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*.

Social network services and social media services have high switching costs because, "[o]nce a significant number of users adopt" a social network service or social media service, "they will be reluctant to switch to even a superior competitive alternative because the newer offering will not deliver as much value unless many other users make the switch simultaneously." CC ¶ 87.

As a Facebook executive explained in 2014, "the idea is that after you have invested hours and hours in your friend graph or interest graph or follower graph, you are less likely to leave for a new or different service that offers similar functionality." House Report at 145. Indeed, Facebook's "near monopoly" means that, for most users, "the vast majority of the people with whom they want to exchange feeds are likely on Facebook already." House Report at 144 n.817. "[T]he switching cost for any one user is therefore enormous." *Id.*

These switching costs create high barriers to entry because, "[t]o induce a user to adopt a new" service, **[**68]** a new service "must incur not only the expense of building a superior product, but also the added compensation to defray a user's cost of switching." CC ¶ 88. Accordingly, new social network and social media services must incur "additional long-run costs that were not incurred by incumbent firms." *Rebel Oil, 51 F.3d at 1439*.

Because of the powerful network effects and high switching costs present in social networking services, the Social Network Market has uniquely high barriers. Thus, "there are strong tipping points in the social networking market that create competition *for the market*, rather than competition within the market." CC ¶ 85 (quoting House Report at 41) (emphasis in original). Facebook itself has recognized that, "with respect to social networks, 'either everyone uses them, or no-one uses them.'" *Id.* ¶ 87 (internal citation omitted).

FTC v. Facebook confirms that Consumers' allegations are sufficient. In *FTC v. Facebook*, the FTC alleged that "Facebook's dominant position in the U.S. personal social networking market is durable due to significant entry barriers, including direct network effects and high switching costs." *2022 U.S. Dist. LEXIS 5415, 2022 WL 103308, at *9*. Like Consumers, the FTC pointed to Facebook's statements acknowledging the strong networks effects and **[**69]** high switching costs that are present in social products. *Id.* After explaining that "network effects and switching costs are commonly recognized types of barriers to entry," the court concluded that the FTC's allegations were sufficient. *Id.* Given Consumers' detailed allegations, the same is true in the instant case.

Accordingly, Consumers have adequately alleged that Facebook has monopoly power both in the Social Media Market and in the Social Network Market.

2. Advertisers Adequately Allege that Facebook Has Monopoly Power in the Social Advertising Market

Advertisers allege that Facebook has monopoly power in the Social Advertising Market. Although Facebook argues that Advertisers have not adequately alleged the Social Advertising Market, Facebook does not dispute that, if Advertisers have adequately alleged the Social Advertising Market, Facebook has monopoly power. *See* Mot. at 13-18. Thus, the Court need not address whether Advertisers have adequately alleged monopoly power.

According to Advertisers, a social advertisement is a distinct type of online advertisement offered by social media services like Facebook. AC ¶¶ 413-14. Specifically, a social advertisement gives companies the **[**70]** option to target a group of users on a **[*782]** social media service "based on a range of targeting criteria—location, age group, gender, hobbies, interests." *Id.* ¶ 417.

Advertisers allege that, because social advertisements are not "reasonably interchangeable" with other types of online advertising, there is a distinct Social Advertising Market, which is a "submarket of online advertising." *Id.* ¶ 413. Under Advertisers' definition, Facebook, Twitter, and LinkedIn are the "three largest firms competing in the Social Advertising Market." *Id.* ¶ 450. Facebook contends that these allegations are inadequate because markets limited to a single form of advertising are implausible and Advertisers have failed to define the "contours" of the Social Advertising Market. Mot. at 14-15. For the reasons below, the Court rejects Facebook's contentions.

As discussed, a plaintiff may plead a product market based on "reasonable interchangeability" by alleging details about a product's '"price, use and qualities"' and explaining why products without those characteristics are not reasonably interchangeable. *See* *Webkinz, 695 F. Supp. 2d at 994* (quoting *Oracle, 331 F. Supp. 2d at 1131*). In other words, the plaintiff must allege that other types of products are not "reasonably **[**71]** interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*. For example, allegations that a product has "a distinct core functionality," "distinct perceptions by consumers," "distinct customer targeting by manufacturers," "distinct analyses by industry analysts," and "distinct pricing and pricing patterns" are sufficient to establish that there is a distinct market for that product. *See* *Datel Holdings, 712 F. Supp. 2d at 997*. Additionally, statements by companies explaining which products they see as competitors for their own products are highly probative. *See* *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *51*. Furthermore, a plaintiff may plead a distinct submarket by alleging facts which show "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Brown Shoe, 370 U.S. at 325*.

Facebook executives have recognized that social advertising is distinct from other prominent forms of advertising. For example, in October 2012, Facebook COO Sheryl Sandberg stated to investors: "We're not TV, we're not search. We are social advertising." AC ¶ 422. Similarly, in a May 2013 earnings call, Ms. Sandberg stated: "As I said **[**72]** before, the thing about brand advertisers is that they got very used to TV, then they got very used to search, and we are a third thing." *Id.* These statements strongly support a conclusion that there is a distinct Social Advertising Market. *See* *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *51*.

Moreover, there has been widespread "industry . . . recognition of the" Social Advertising Market as distinct from other markets for online advertising. *Brown Shoe, 370 U.S. at 325*. For example, the advertising company Outbrain has stated that "social ads" and "search ads" have fundamentally different purposes. AC ¶¶ 416-18. Outbrain stated that, whereas "[s]ocial ads are best for targeting audience segments who may be interested in your products or services," "search ads" "are great for targeting customers when they are already looking for you." *Id.* Additionally, in October 2019, "industry publication Marketing Lands" published an article which "predicted growth in the social media advertising segment as distinguished from search and television advertising." *Id.* ¶ 421. This industry recognition supports a conclusion that the Social Advertising Market is a **[*783]** "separate economic entity." *Brown Shoe, 370 U.S. at 325*.

Additionally, Advertisers explain in detail why social advertisements and other types **[**73]** of online advertisements are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*. First, social advertisements are not reasonably interchangeable with search advertisements. Search advertisements are shown to people who enter certain terms into search engines. AC ¶ 418. Accordingly, these advertisements allow companies to target customers who are "already looking for [the company] (*i.e.*, they search [the] company name or product") or who "are searching for a specific product, service, or piece of information." *Id.* ¶¶ 418, 437. By contrast, social advertisements help a company find customers who are not already looking for the company's products. *Id.* Additionally, to buy search advertisements, companies must bid against each other for certain search terms. *Id.* ¶¶ 438, 442. By contrast, because "social advertisers like Facebook can tailor audiences," companies who want to purchase social advertisements do not have to bid against each other. *Id.* ¶ 440. Thus, whereas prices for search advertisements are "sensitive to changes in demand" for particular search terms, the price of a social advertisement "is proportional to the generality of the targeting." *Id.* ¶ 439, 442. As a result, **[**74]** "[s]mall businesses that do not generally have the budget to bid on coveted search results" can negotiate with companies that offer social advertisements to show advertisements to "granularly defined audiences." *Id.* ¶ 437. Accordingly, because social advertisements and search advertisements have distinct "uses," "distinct prices," and "distinct customers," *Brown Shoe, 370 U.S. at 325*, they are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*.

For similar reasons, social advertisements are not "reasonably interchangeable" with banner advertisements, which are advertisements that appear as rectangular panels at the top of websites. *See* AC ¶¶ 431-32. Because companies place banner advertisements on pre-determined websites, banner advertisements are most useful for companies who already know what kinds of websites their customers are visiting. Thus, banner advertisements do not enable companies to find new customers in the way that social advertisements do. *Id.* Additionally, as with search advertisements, companies must bid against each other to place banner advertisements on the most coveted websites, which means that the prices of banner advertisements are "sensitive to changes in demand." *Id.* ¶ 439. **[**75]** Thus, because social advertisements and banner advertisements have distinct "uses" and "distinct prices," *Brown Shoe, 370 U.S. at 325*, they are not "reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 51-52*.

Epic Games v. Apple confirms that Advertisers' allegations regarding the Social Advertising Market are sufficient. As discussed, the *Epic* court found after a bench trial that, for at least two reasons, the "wider gaming market" had to be divided into "distinct submarkets" for "mobile gaming," "PC gaming," "console gaming," and "cloud-based game streaming." *2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *47-55*. First, the court found that each type of gaming system appealed to a specific demographic group interested in playing a specific type of game. For example, whereas mobile gaming appealed to "women gamers of all ages . . . and gen-x male gamers" with a "focus and interest on casual games," console gaming appealed to "millennial male gamers . . . with an interest in playing action games." *2021 U.S. Dist. LEXIS 172303, [WL] at *49, *52*. Second, the court found that each type of gaming system had a **[*784]** distinct pricing model. For example, whereas the "overwhelming majority of gaming revenue in mobile gaming derives from free-to-play games," "the gaming revenue generated by console games . . . derived overwhelmingly from **[**76]** pay-to-play or buy-to-play games." *2021 U.S. Dist. LEXIS 172303, [WL] at *49, *52*.

The distinctions between gaming systems identified in *Epic* mirror the distinctions between social advertisements and other types of online advertisements. First, like the different gaming systems described in *Epic*, social advertisements and other types of online advertisements appeal to different types of customers. *See id.* Specifically, whereas social advertisements appeal to companies who want to find new customers, other types of online advertisements appeal to companies with established brand or products. AC ¶ 431. Additionally, social advertisements have a particular appeal to small businesses. *Id.* ¶ 437. Second, like the different gaming systems described in *Epic*, social advertisements and other types of online advertisements have distinct pricing models. *See Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *49, *52*. Whereas prices for social advertisements determined on a company-by-company basis, prices for search-based advertisements and banner advertisements are "sensitive to changes in demand" for particular search terms and particular websites. AC ¶¶ 439, 442. Thus, like the different gaming systems in *Epic*, social advertisements and other types of online advertisements are not reasonably interchangeable.

[77]** Facebook's arguments to the contrary are unconvincing. Although Facebook is correct that *Hicks v. PGA Tour, Inc., 897 F.3d 1109 (9th Cir. 2018)*, requires courts to be skeptical of narrowly defined advertising markets, *Hicks* does not apply where a plaintiff has alleged that two types of advertising have fundamentally different purposes. In *Hicks*, the plaintiffs alleged that there was a distinct submarket for "'in-play' or 'in-action' advertising during professional golf tournaments (*i.e.*, between commercial breaks)." *897 F.3d at 1121*. The Ninth Circuit concluded that this market was implausible because "[c]ompanies aiming to target professional golf fans" had many other options for advertising and that these forms of advertising were used by the same companies for the same fundamental objective: targeting golf fans. *Id. at 1121-22*. By contrast, Advertisers allege that social advertising has a fundamentally different purpose from other forms of online advertising: enabling advertisers to reach specific purchasers with specific attributes. AC ¶¶ 424-30. Advertisers also have explained in detail that this form of advertising appeals to different types of companies. Thus, unlike the plaintiffs in *Hicks*, Advertisers have established that social advertising has a distinct "use" and "distinct customers." *Brown Shoe, 370 U.S. at 325*.

Additionally, Facebook contends that "Advertisers do not include factual allegations sufficient to define the contours of the market" and "offer[] no plausible basis for excluding other forms of advertising." Mot. at 15. Given Facebook's previous statements recognizing the distinct Social Advertising Market, Facebook's argument is not credible. As Advertisers point out, Facebook has previously stated to investors: "We're not TV, we're not search. We are social advertising." AC ¶ 422. Moreover, the Ninth Circuit has held that "what constitutes a relevant market is a factual determination for the jury." *Eastman Kodak, 125 F.3d at 1203*. Indeed, "the question of whether the market should include other products is better resolved at the summary judgment stage." *Datel Holdings, 712 F. Supp. 2d at 997*. Thus, because Advertisers "consider and reject multiple conceivably interchangeable substitutes in **[*785]** great factual detail," Advertisers have sufficiently defined the contours of the market. *RealPage, 852 F. Supp. 2d at 1225*.

Thus, Advertisers have adequately alleged the Social Advertising Market.

B. The Court Denies Facebook's Motion to Dismiss Consumers' Data Privacy Claims

Consumers' first theory of *Sherman Act* liability **[**78]** is that Facebook acquired and maintained monopoly power by making false representations to users about Facebook's data privacy practices. Consumers claim that these misrepresentations were "instrumental to Facebook gaining and maintaining market share at the expense of its rivals." CC ¶¶ 108, 217.

According to a leading antitrust treatise, a "monopolist's misrepresentations encouraging the purchase of its product can fit [the] general test for an exclusionary practice when the impact on rivals is significant." *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 782b (4th and 5th Eds., 2021 Cum. Supp.) ("Areeda"). In *American Professional Testing Service, Inc. v. Harcourt Brace Jovanovich Legal & Professional Publications, Inc., 108 F.3d 1147 (9th Cir. 1997)*, the Ninth Circuit relied on an older version of this treatise and held that, under certain circumstances, a company's "false and misleading advertising" may "constitute[] exclusionary conduct" for purposes of the *Sherman Act*. *See id. at 1152* (citing Phillip E. Areeda & Donald F. Turner, ***Antitrust Law*** ¶ 737b at 280-81 (3d ed. 1978)). Specifically, to state a *Sherman Act* claim based on "false and misleading advertising," a plaintiff must show that the company made representations about its own products or its rivals' products that "were [1] clearly false, [2] clearly material, [3] clearly likely **[**79]** to induce reasonable reliance, [4] made to buyers without knowledge of the subject matter, [5] continued for prolonged periods, and [6] not readily susceptible of neutralization or other offset by rivals." *Id.*[1] Although *American Professional Testing Service* dealt with a claim that the defendant had disparaged its rivals' products, courts have applied the same test to a claim that the defendant made false statements about its own product. *See, e.g., National Ass'n of Pharmaceutical Mfrs., Inc. v. Ayerst Laboratories, 850 F.2d 904, 916 (2d Cir. 1988)* (applying test to claim that pharmaceutical company misrepresented that its generic product was superior to a name brand product); *Genus Lifesciences Inc. v. Lannett Co., Inc., 378 F.*

[1] Courts of Appeals across the country have adopted the same six part test. *See National Ass'n of Pharmaceutical Mfrs., Inc. v. Ayerst Laboratories, 850 F.2d 904, 916 (2d Cir. 1988)*; *Am. Council of Certified Podiatric Physicians and Surgeons v. Am. Board of Podiatric Surgery, Inc., 323 F.3d 366, 371 (6th Cir. 2003)*; *Covad Communs. Co. v. Bell Atl. Corp., 398 F.3d 666, 674-75, 365 U.S. App. D.C. 78 (D.C. Cir. 2005)*; and *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 762 F.3d 1114, 1127 (10th Cir. 2014)*.

Supp. 3d 823, 841 (N.D. Cal. 2019) (applying test to claim that pharmaceutical company misrepresented that its product was approved by the FDA).

Because fraud is an "essential element" of a *Sherman Act* claim based on misrepresentations to buyers, a plaintiff that brings such a claim must satisfy the heightened pleading standard set forth by *Federal Rule of Civil Procedure 9(b)*. *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1103 (9th Cir. 2003)*. *Federal Rule of Civil Procedure 9(b)* provides that, "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." If any "particular averments of fraud are insufficiently pled under *Rule 9(b)*," the Court must "'disregard' those averments, or 'strip' them from **[*786]** the claim." *Vess, 317 F.3d at 1105*. Then, the Court will "examine the allegations that remain." **[**80]** *Id.*

Facebook argues that Consumers' data privacy claims are barred by the statute of limitations. *See* Mot. at 10-11. Additionally, Facebook argues that Consumers' data privacy claims must be dismissed because (1) Consumers have failed to allege fraud with particularity; (2) Consumers have failed to show that Facebook's alleged misrepresentations were "clearly false"; (3) Consumers have failed to show that Facebook's alleged misrepresentations were "not readily susceptible of neutralization"; (4) Consumers have failed to show that Facebook's misrepresentations were "clearly material"; and (5) Consumers have failed to allege causal antitrust injury. *See* Mot. at 10-11, 19-22. Facebook also argues that Consumers' claim for injunctive relief is barred by the doctrine of laches. Mot. at 8-9. For the reasons below, the Court rejects these arguments.

The Court begins by describing Consumers' allegation that Facebook obtained and maintained monopoly power by deceiving Consumers about Facebook's data privacy practices. Because the Court must "disregard" all non-particularized allegations of fraud and "examine the allegations that remain," the Court then addresses whether Consumers have alleged **[**81]** with sufficient particularity that Facebook made clearly false representations about Facebook's collection and monetization of user data. *Vess, 317 F.3d at 1105*. After this threshold inquiry, Court addresses the remainder of Facebook's arguments in turn.

1. Consumers Allege that Facebook Obtained and Maintained Monopoly Power by Repeatedly Deceiving Users About Facebook's Data Privacy Practices

According to Consumers, Facebook knew that users placed a premium on privacy and that the best way to attract users was to promise to keep user data private. At the same time, Facebook could not make money without selling user data to third parties. Thus, Consumers allege, Facebook systematically deceived users about the extent to which Facebook was collecting and selling user data. This deception allowed Facebook to beat out companies that were truthful about their user data practices or did not collect and sell user data.

The Court begins by describing Consumers' allegations about the relationship between privacy and the value of Facebook's platform. The Court then describes Consumers' allegations that Facebook deceived users with false statements about Facebook's privacy practices. Finally, the Court describes Consumers' **[**82]** allegations that Facebook's deceptive privacy practices allowed Facebook to obtain and to maintain monopoly power.

a. Facebook Knew That Privacy Would Attract Users and Repel Advertisers

According to Consumers, users of social network and social media services always have valued data privacy highly. In a 2004 consumer survey, a majority of such users indicated that privacy was a "really important issue that [they] care about often." CC ¶ 108. In another study, Facebook users indicated that they cared more about privacy policies than about terrorism. *Id.* Accordingly, "[p]rivacy practices were a crucial form of competition in the early days of the Social Network and Social Media Markets." *Id.* ¶ 102.

Indeed, Facebook's initial success in the Social Network and Social Media Markets arose directly from competitors' failure to keep users' data private. Initially, a company called Myspace dominated the Social Network Market. *Id.* ¶

102. Founded in 2003, Myspace offered an "open" social network that allowed individuals to sign up **[*787]** with pseudonyms. *Id.* ¶¶ 102-03. By 2006, Myspace was the most visited website in the United States. *Id.*

However, in 2007, negative headlines began drawing attention to **[**83]** Myspace's "lax privacy practices." *Id.* ¶ 104. Specifically, users and commentators "attributed sexual assaults, suicides, and murders to Myspace," whose open network "cloaked wrong-doers with relative anonymity." *Id.* These controversies provided an opportunity for Myspace's nascent competitors, which included Friendster, Orkut, Bebo, Flip.com, and Facebook. *Id.* ¶ 105.

Facebook immediately recognized that it could take market share from Myspace by offering a social network that required users to register with their real names and allowed users to share information only with users designated as "friends." *See id.* ¶¶ 44, 106. The original version of Facebook "was closed to all but those users who could validate their own real-world identities, such as by verifying that their identities were legitimate via an e-mail address issued by an organization, such as a university or firm." *Id.* ¶ 48.

These features provided users with "a perceived degree of safety and comfort" that Myspace did not offer, and users left Myspace for Facebook. *Id.* (internal citation omitted). Between 2006 and 2009, Facebook went from having one-tenth the users of Myspace to having more users than Myspace. *Id.* ¶¶ 107, **[**84]** 122. In 2011, Mr. Zuckerberg explained that Facebook "became the world's biggest community online" because Facebook made users feel safe with regard to the privacy of their data:

> I founded Facebook on the idea that people want to share and connect with people in their lives, but to do this everyone needs complete control over who they share with at all times.
>
> This idea has been the core of Facebook since day one. When I built the first version of Facebook, almost nobody I knew wanted a public page on the internet. That seemed scary. But as long as they could make their page private, they felt safe sharing with their friends online. Control was key. With Facebook, for the first time, people had the tools they needed to do this. That's how Facebook became the world's biggest community online. We made it easy for people to feel comfortable sharing things about their real lives.

See Id. ¶ 109; Mark Zuckerberg, *Our Commitment to the Facebook Community*, Facebook Newsroom (Nov. 29, 2011), https://bit.ly/3zDEs2A.

Additionally, Facebook's purported privacy features allowed Facebook to obtain valuable data. In a 2008 internal report titled "Facebook Secret Sauce," Facebook observed that "'[u]sers **[**85]** will share more information if given more control over who they are sharing with and how they share.'" CC ¶ 109 (internal citations omitted). Because the registration and "friending" process "fostered an incredible amount of trust," users were willing to "post their cell phone numbers and their birthdays, offer personal photos, and otherwise share information they'd never do outside their circle of friends." *Id.* ¶ 48. Such data was more valuable to advertisers and other third parties than the data generated by a service like Myspace. For example, "[k]nowing the internet habits of 'YankeesFan123' is less valuable than knowing the browsing habits of a specific individual whose love of the Yankees can be linked with data about his shopping habits, income, family, friends, travel, dining, dating, and myriad other data points." *Id.* ¶ 50. As Mr. Zuckerberg put it, Facebook is "one of the only services on the web where people are sharing pretty personal and intimate information." *Id.* ¶ 130.

[*788] However, Facebook knew that users would not give Facebook their data if Facebook did not "promise privacy protection." *Id.* ¶ 46. To a certain degree, privacy is inherent in Facebook's "closed-network approach." **[**86]** *Id.* ¶ 106. Because Facebook is a "walled garden," advertisers and other third parties cannot access user data without Facebook's permission. *See id.* Nevertheless, Facebook made additional promises to gain additional trust. For example, in a 2004 Privacy Policy, "Facebook promised users that it would disclose its 'information and privacy practices' and that it would 'not use cookies to collect private information from any users.'" *Id.*

Indeed, Facebook knew that the success of its business depended on two competing forces. The first force was users' desire for increased control over their data. The second force was advertisers' and other third parties' desire to purchase as much data as Facebook could gather. Whereas increasing privacy protections would reduce Facebook's revenue from advertisers and third parties, reducing privacy protections would potentially cause users to stop sharing data or to leave Facebook altogether. For example, when Google launched a rival platform in 2010, Facebook decided to "postpone any changes to its privacy policies 'until the direct competitive comparisons beg[a]n to die down.'" *Id.* ¶ 134.

Facebook "spent the next fifteen years deceiving consumers about **[**87]** the data privacy protections that it provided to users in exchange for access to their data." *Id.* ¶ 111. By selling increased amounts of data to third parties while representing to users that it was keeping data private, Facebook increased its user base *and* its profits. In the next section, the Court describes Consumers' specific allegations about Facebook's data practices and the misrepresentations Facebook made to hide those practices from users.

b. Facebook's Deceptive Collection and Sale of User Data to Third Parties

Consumers allege specific instances in which Facebook misled users about the scope of Facebook's data collection and monetization practices. For example, despite repeated promises that it would protect users' privacy and give users the tools to keep their data safe, Facebook tracked users across the internet with various deceptive tools and provided users' private information to third party application developers without permission. Below, the Court describes each of the instances.

i. The News Feed Protest

In 2006, an incident involving Facebook's "News Feed" feature reaffirmed that Facebook users cared strongly about controlling their data. The "News Feed" provided each **[**88]** Facebook user with a dynamic list of information and media that the user's friends recently have posted and "was intended as a central destination so users did not have to browse through friends' profiles for updates." CC ¶ 113. However, when the News Feed initially launched, users had little control over what information was pulled from their profiles into their friends' News Feeds. *Id.* ¶ 115. Indeed, many users "argu[ed] that the feature was too intrusive, showing every little moment such as Lucy friending Ben or that John and Sarah broke up." *See* Alyssa Newcomb, *Can You Even Remember How You Coped Before Facebook's News Feed?*, NBC News (Sept. 2, 2016), https://nbcnews.to/3nmr7Xp.

After one million of Facebook's then eight million users joined a "Facebook News Feed protest group," Facebook CEO Mark Zuckerberg publicly stated: "This was a big mistake on our part, and I'm sorry for it. But apologizing isn't enough. I wanted to make sure we did something **[*789]** about it, and quickly. So we have been coding nonstop for two days to get you better privacy controls." CC ¶¶ 114-15. Facebook then instituted settings that "purportedly allowed users greater ability to keep their activities private." **[**89]** *Id.* ¶ 115.

ii. Facebook Deceptively Collected Data Despite Beacon's "No, Thanks" Option

Despite its promise that it would give users tools to control their privacy, Facebook deceived users in 2007 about Facebook's practice of using a tool called "Beacon" to track users' purchases on third party websites. *See* CC ¶ 119. Specifically, when Facebook users made purchases on participating third party websites, Beacon would send the users "'pop-up' notification[s] . . . requesting permission to share details regarding the user[s] [purchase] with Facebook." *Id.* The "'pop-up' notifications" provided users with a "No, Thanks" option, which gave users the impression that they could decline to share their information with Facebook. *Id.*

However, Stefan Berteau, a senior research engineer at California's Threat Research Group, examined the software code used to create Beacon and discovered that "Beacon allowed Facebook to track the activity of even those users that clicked the 'No, Thanks' prompt." *See id.* ¶ 120; ECF No. 97-4 at 57-58. Accordingly, the "No, Thanks" prompt deceived users into thinking that Facebook was providing them with control over their purchasing data when, in reality, Facebook **[**90]** was collecting and selling that data.

When rumors about the full extent of Beacon's functionality began to spread, Facebook executives attempted to silence the rumors. In a 2007 interview, Brad Stone of the New York Times asked Chamath Palihapitiya, Facebook's Vice President of Marketing and Operations, whether Beacon provided Facebook with information about a purchase even if a user "decline[d] to publish the purchase" by clicking "No, Thanks." *See* CC ¶ 120 n.92; ECF No. 97-4 at 57 n.87. Mr. Palihapitiya responded: "Absolutely not." ECF No. 97-4 at 57 n.87. Mr. Palihapitiya also stated that Facebook was trying to "dispel a lot of misinformation that [was] being propagated unnecessarily." *Id.*

After an FTC investigation revealed the truth about Beacon, Facebook modified Beacon so that users had a genuine choice to opt out. CC ¶ 121. In response to significant public outrage and litigation, Facebook CEO Mark Zuckerberg called Beacon a mistake and stated: "I'm not proud of the way we've handled this situation and I know we can do better." *Id.*

iii. Facebook Provided Users' Private Information to Third Party Applications Without Users' Permission

Around the same time that Facebook launched **[**91]** Beacon, and unbeknownst to users, Facebook began giving "app developers access to user content and information, including content marked private." CC ¶ 117.

Indeed, "Facebook explained to third-party app developers in May 2007 that Facebook's core value proposition and business model was 'providing access to a new kind of data—social data, which enables you to build applications that are relevant to users.'" *Id.* ¶ 118 (internal citation omitted). Although Facebook had not expressly promised to keep app developers from accessing user data, Facebook's terms of service stated only that user data would be used for targeted advertising. *See id.* ¶¶ 5-6.

In 2009, Facebook started to provide users with a "Central Privacy Page." *Id.* ¶ 123. The Central Privacy Page invited users to "control who can see your profile and personal information" and gave users the option of sharing their information with "Only Friends." *See id.*; Facebook **[*790]** Settles FTC Charges That It Deceived Consumers By Failing To Keep Privacy Promises, Federal Trade Commission (Nov. 29, 2011) ("*2011 FTC Settlement*"), https://bit.ly/3318YHU. The Central Privacy Page did not mention the possibility that application developers could **[**92]** receive users' "personal information." Additionally, although Facebook's "Privacy Settings" stated that applications would receive some of users' information, Facebook assured users that applications would only receive information necessary "for [the applications] to work." Complaint for violation of the *Federal Trade Commission Act* in the matter of Facebook Inc., No. 0923184 at 10 (F.T.C. Dec. 5, 2011) ("*2011 FTC Complaint*"), https://bit.ly/33eqwAa. Taken together, these statements gave users the impression that Facebook was not providing third party application developers with users' personal data for profit. *Id.*

Then, in May 2010, Facebook made three statements that confirmed this impression. First on, May 24, 2010, Facebook CEO Mark Zuckerberg wrote an op-ed in the Washington Post stating that Facebook "do[es] not share your personal information with people or services you don't want," "do[es] not give advertisers access to your personal information," and "do[es] not and never will sell any of your information to anyone." *See* CC ¶ 238(m) n.212; Anita Balakrishnan, et al., *Mark Zuckerberg Has Been Talking About Privacy for 15 Years - Here's Almost Everything He's Said*, CNBC (Apr. 9, 2018), https://cnb.cx/3n7iPTn. **[**93]**

Second, on May 26, 2010, Facebook issued an official press release which stated that Facebook would "give the more than 400 million people who use Facebook the power to control exactly who can see the information and content they share"; that "People have control over how their information is shared"; that "Facebook does not share personal information with people or services users don't want"; that "Facebook does not give advertisers access to people's personal information"; and that "Facebook does not sell any of people's information to anyone." CC ¶ 238(c).

Third, on May 27, 2010, Facebook CEO Mark Zuckerberg stated in an interview with National Public Radio that "[t]here's this false rumor that's been going around which says that we're sharing private information with applications and it's just not true." *Id.* ¶ 238(d).

Despite these statements, Facebook subsequently *increased* the amount of user data that developers could purchase. Specifically, Facebook allowed "third parties to access the data of a Facebook user's friends," even if those friends had not signed up for the third parties' applications. *Id.* ¶ 145.

iv. Facebook Deceptively Collected Users' Data With "Like" Buttons on Third [94] Party Websites**

Around the same time that Facebook increased the amount of user data it was providing to third party applications, Facebook started using the "Like" button tool to collect user data without permission. In early 2010, Facebook began allowing participating third parties to add "Like" buttons as plugins on their external websites. *See* CC ¶ 125. These buttons allowed users to express public approval for a "particular piece of content on a third party's website." *Id.* As of 2018, "Like" buttons "appear[ed] on nearly 3 million websites." ECF No. 97-4 at 41 n.6.

Although users knew that clicking a "Like" button transmitted information to Facebook, "Facebook's 'Frequently Asked Questions' page indicated that 'No data is shared about you when you *see* a social plug-in on an external website.'" *See* CC ¶ 126. However, in 2011, a Dutch computer scientist named Arnold Roosendaal discovered **[*791]** that Facebook used "Like" buttons on third party websites "to monitor users and obtain their data anytime users visited those third-party websites, even when users did *not* click the 'Like' button." *See id.* (emphasis in original); ECF No. 97-4 at 65.

As with Beacon, Facebook attempted to keep the true **[**95]** function of the "Like" button secret. For example, in a May 2011 interview with the Wall Street Journal, Facebook CTO Bret Taylor stated, in reference to the "Like" buttons, "[w]e don't use them for tracking and they're not intended for tracking." ECF No. 97-4 at 66.

v. The 2011 Federal Trade Commission Settlement

In 2011, the FTC filed a complaint against Facebook alleging that Facebook had "deceived customers by telling them they could keep their information on Facebook private, and then repeatedly allowing it to be shared and made public." CC ¶ 127. In particular, the FTC highlighted Facebook's practice of allowing third party app developers to access the data of users' friends. *See id.* ¶ 145; *2011 FTC Complaint, supra*.

Shortly thereafter, Facebook and the FTC agreed to a settlement which "barred Facebook from making any further deceptive privacy claims." CC ¶ 127. Facebook also agreed "to obtain consumers' affirmative express consent before enacting changes that override their privacy preferences," "to prevent anyone from accessing a user's material more than 30 days after the user has deleted his or her account," and "to establish and maintain a comprehensive privacy program designed **[**96]** . . . to protect the privacy and confidentiality of consumers' information." *Id.* ¶ 128.

The settlement also directly addressed Facebook's practice of giving user data to third party app developers. For example, the settlement required Facebook to "give consumers 'clear and prominent' notice and obtain their consent before sharing their information beyond those entities clearly enumerated in consumers' privacy settings." *Id.* ¶ 153.

On November 29, 2011, Mr. Zuckerberg issued a press release which stated that "everyone needs complete control over who they share with at all times." *Id.* ¶ 238(e). Mr. Zuckerberg added that "[t]his idea has been the core of Facebook since day one" and that the reason people originally signed up for Facebook was that, "for the first time," they "could make their page private." Mark Zuckerberg, *Our Commitment to the Facebook Community*, Facebook Newsroom (Nov. 29, 2011), https://bit.ly/3zDEs2A. Indeed, Mr. Zuckerberg explained, the reason "Facebook became the world's biggest community online" was that Facebook "made it easy for people to feel comfortable sharing things about their real lives." *Id.*

Mr. Zuckerberg further stated that, pursuant to the 2011 FTC Settlement, **[**97]** Facebook would be giving users "tools to control who can see your information and then making sure only those people you intend can see it." CC ¶

238(f). Specifically, Mr. Zuckerberg stated that Facebook would be providing users with a "new apps dashboard to control what your apps can access" and a "new app permission dialog that gives you clear control over what an app can do anytime you add one." Mark Zuckerberg, *Our Commitment to the Facebook Community*, Facebook Newsroom (Nov. 29, 2011), https://bit.ly/3zDEs2A.

Mr. Zuckerberg reinforced this message in a February 2012 letter to investors which stated that "giving people control over what they share is a fundamental principle" and, in accordance with that principle, Facebook was dedicated to "build[ing] tools to help people . . . share what they want." CC ¶ 238(g).

[*792] vi. After the 2011 FTC Settlement, Facebook Deceptively Tracked Users Across the Internet With "View Tags"

However, Facebook quickly resumed its deceptive practices. For example, in 2012, Facebook "began using 'View Tags,' which allow advertisers to track Facebook users across the Internet using cookies." CC ¶ 137. View Tags allowed companies to determine whether users who **[**98]** viewed the companies' advertisements on Facebook purchased the companies' products. *Id.* (citing Rebecca Greenfield, *2012: The Year Facebook Finally Tried to Make Some Money*, The Atlantic (Dec. 14, 2012), https://bit.ly/33aUFjF).

This practice contradicted Facebook's 2007 Privacy Policy, which stated that although Facebook would use cookies to collect users' "browser type and IP address," Facebook would use this information only to "confirm that users are logged in." ECF No. 97-4 at 49 n.43, 58. The Privacy Policy also stated that "[t]hese cookies terminate once the user closes the browser." *Id.*

Furthermore, around the time that Facebook started using "View Tags," Facebook made several statements to assure users that Facebook was not using cookies for commercial purposes. For example, in a May 2011 interview with the Wall Street Journal, Facebook CTO Bret Taylor stated that, although "Facebook places cookies on the computers of people that visit facebook.com," the sole purpose of these cookies was to "protect users' Facebook accounts from cyber-attacks." ECF No. 97-4 at 66. Additionally, in September 2011, a Facebook engineer named Arturo Bejar wrote in a blog post that Facebook used **[**99]** cookies only "for safety and protection." *Id.* at 67. Mr. Bejar further stated: "we don't use our cookies to . . . target ads or sell your information to third parties." *Id.* The same month, a Facebook spokesperson stated that Facebook does not use cookies to "track users across the web." *Id.*

vii. After the 2011 FTC Settlement, Facebook Resumed its Practice of Providing Users' Private Information to Third Party Applications Without Users' Permission

Most critically, Facebook resumed its practice of giving third party app developers the data of users who had not signed up for those developers' applications. *See* CC ¶ 145. Indeed, the "volume of data third parties were acquiring from Facebook led one Facebook employee to state: 'I must admit, I was surprised to find out that we are giving out a lot here for no obvious reason.'" *Id.* This practice continued until at least 2018. *Id.* ¶ 146.

Before this practice was uncovered, Facebook made several deceptive statements that obscured the practice from users. For example, in a February 2017 filing with the SEC, Facebook stated that, although "some of our developers or other partners, such as those that help us measure the effectiveness of ads, may **[**100]** receive or store information provided by us or by our users through mobile web applications," Facebook provides only "limited information to such third parties based on the scope of services provided to us." *See id.* ¶ 238(l); Form 10-K Filing for Facebook, Inc., Securities and Exchange Commission (Feb. 2, 2017), https://bit.ly/3q7CtAl.

viii. The Cambridge Analytica Scandal

A 2018 scandal involving the British political consulting firm Cambridge Analytica revealed Facebook's practice of providing users' private information to third party app developers. Specifically, the "Cambridge Analytica scandal" revealed that, although the Cambridge Analytica Facebook application had only 270,000 users, Cambridge Analytica "was able to access the personal data of up to 87 *million* Facebook **[*793]** users." *See* CC ¶ 143 (emphasis added).

Mr. Zuckerberg called the Cambridge Analytica incident a "mistake," pledged to take action against "rogue apps," and stated that "[w]e have a responsibility to protect your data, and if we can't then we don't deserve to serve you."[2] *See* CC ¶ 238(o); *Facebook's Zuckerberg Speaks Out Over Cambridge Analytica 'Breach'*, BBC News (Mar. 22, 2018), https://bbc.in/3GmpZKT.

However, despite **[**101]** Mr. Zuckerberg's statement that Cambridge Analytica was a "mistake," Facebook subsequently announced that at least 10,000 applications had been able to access similar data for the entire period since the FTC settlement. CC ¶ 148.

ix. The 2019 Federal Trade Commission Penalty

Shortly after the Cambridge Analytica Scandal, the Department of Justice ("DOJ") and the FTC filed a complaint alleging that Facebook had breached the 2011 FTC settlement agreement by "deceiv[ing] users about their ability to control the privacy of their personal information." CC ¶¶ 145, 149.

In July 2019, "the FTC and the DOJ announced that Facebook would pay a $5 billion penalty." *Id.* ¶ 149. Although this penalty exceeded the FTC's largest ever penalty by an order of magnitude, the FTC explained that the size was justified because Facebook had made $55.8 billion in 2018 through targeted advertising and because Facebook's promises to users "that they can control the privacy of their information" were central to collecting information for that targeted advertising. *Id.* ¶ 150.

c. Facebook's Deceptive Privacy Practices Helped Facebook Obtain and Maintain Monopoly Power

Consumers allege that Facebook's deceptive practices **[**102]** allowed Facebook to maximize its user base and its revenue. Between 2007 and 2010, Facebook doubled its revenue every year. CC ¶ 124. By 2010, Facebook made over $1 billion in annual revenue and was the "largest social network in the world." *Id.*

In 2012, when Facebook executed an initial public offering, Facebook "had 845 million monthly active users" worldwide. *Id.* ¶ 138. Additionally, data analytics firm Comscore reported that Facebook was the "third largest web property in the world . . . and accounted for approximately 3 in every 4 minutes spent on social networking sites and 1 in every 7 minutes spent online around the world." House Report at 144 (internal citation omitted). Around the same time, Facebook COO Sheryl Sandberg stated in a presentation to a "large telecommunications firm" that Facebook was "95% of all social media" in the United States as measured by "monthly minutes of use." *See* CC ¶ 286; House Report at 138.

In 2018, "Facebook earned over $55 billion in revenue" and had "over 217 million users in the United States." CC ¶ 147. In 2019, Facebook earned over $70 billion in revenue, *id.* ¶ 41, which gave it an 85% share of the Social Media Market as measured by revenue, **[**103]** *id.* ¶ 80.

Additionally, Facebook's deception of users allowed Facebook to prevent sophisticated rivals, like Google, from entering the market. In 2010, Google launched a new social network called Google+. *Id.* ¶ 131. With Google+, Google attempted **[*794]** "to build out a 'social graph' that would leverage a common user identity across Google

---

[2] In 2017, "Facebook disclosed to congressional investigators that it had sold to a Russian company, Internet Research Agency (IRA), ads which psychographically targeted American voters, and that up to approximately 126 million could have been targeted with such ads." ECF No. 97-4 at 42 n.10.

products, including YouTube and Gmail." *Id.* Google poured a "massive" amount of resources into Google+ and "conscripted almost all of the company's products to help build Google+." *Id.* ¶ 133. At its peak, "Google+ involved 1,000 employees from divisions across the country." *Id.*

However, around the time Google+ entered the social network market, "prominent investors . . . noted that the social networking market had 'extreme network effects,' making it 'increasingly hard to see a materially successful new entrant, even with all of Google's resources.'" House Report at 144. Accordingly, Google+ needed a way to distinguish itself from Facebook.

Indeed, Facebook realized that it could not allow users to find out about Facebook's privacy practices while Google+ was a viable alternative. For example, in 2011, a Facebook executive stated that it would be unwise to **[**104]** remove privacy protections because "IF ever there was a time to AVOID controversy, it would be when the world is comparing our offerings to G+." CC ¶ 134. The same executive stated that Facebook could remove those protections after "the directive competitive comparisons begin to die down." *Id.*

Without any way to distinguish itself from Facebook and to overcome the extreme network effects, Google+ was not able to compete with Facebook. *Id.* ¶ 135. Thus, in 2018, Google+ left the market. *Id.* ¶ 140.

2. Consumers Allege with Sufficient Particularity that Facebook Made Numerous "Clearly False" Representations About Its Collection and Monetization of Data

Facebook contends that none of the representations identified by Consumers are "'clearly false'" and that, in any event, Consumers have failed to allege those representations with sufficient particularity. Mot. at 20-21 (quoting *Am. Pro. Testing Serv., 108 F.3d at 1152*). For the reasons below, the Court rejects Facebook's arguments.

Although the Ninth Circuit has not specifically addressed what constitutes a "clearly false" statement in the context of the *Sherman Act*, the Ninth Circuit's cases dealing with securities fraud claims provide useful guidance. The Securities Exchange Commission ("SEC") **[**105]** has interpreted *Section 10(b) of the Securities Exchange Act* to prohibit "any untrue statement of a material fact . . . in connection with the purchase or sale of any security." *17 C.F.R. § 240.10b-5(b)*. Thus, "[t]o plead a claim under *section 10(b)*," a plaintiff must allege "a material misrepresentation or omission." *Oregon Pub. Emps. Ret. Fund v. Apollo Grp. Inc., 774 F.3d 598, 603 (9th Cir. 2014)*. To qualify as a "material misrepresentation," a statement must be "capable of objective verification." *Id. at 606*. By contrast, "subjective assessments" and "vague statements of optimism like 'good,' 'well-regarded,' or other feel good monikers" are "non-actionable puffing." *See In re Cutera Sec. Litig., 610 F.3d 1103, 1111 (9th Cir. 2010)*.

The same principles apply to a *Sherman Act* claim based on "false and misleading advertising." Just as the purpose of a securities fraud claim is to hold a company liable for making misrepresentations that caused investors to purchase the company's securities, the purpose of a "false and misleading advertising" claim under the *Sherman Act* is to hold a "monopolist" liable for making "misrepresentations [that] encourag[ed] the purchase of its product." Areeda ¶ 782b. Indeed, the Ninth Circuit's statement that misrepresentations are anticompetitive only if they are "clearly false" and "clearly material" **[*795]** mirror the basic requirements of a securities fraud claim. *Am. Pro. Testing Serv., 108 F.3d at 1152*.

Additionally, as discussed, *Federal Rule of Civil Procedure 9(b)* requires **[**106]** that "the circumstances constituting the alleged fraud be specific enough to give defendants notice of the particular misconduct . . . so that they can defend against the charge and not just deny that they have done anything wrong." *Vess, 317 F.3d at 1106*. Thus, a plaintiff must allege the "who, what, when, where, and how" of each alleged misrepresentation. *Id.*

Accordingly, the Court must assess whether Consumers have alleged misrepresentations that were "capable of objective verification" and whether Consumers have alleged the "who, what, when, where, and how" of each misrepresentation. As an initial matter, the Court concludes that several of the representations that Consumers highlight are "non-actionable puffing." *See In re Cutera, 610 F.3d at 1111*. For example, Consumers highlight Facebook's statement that "[k]eeping the global community safe is an important part of our mission - and an important part of how we'll measure our progress going forward." CC ¶ 238(n). The Court agrees with Facebook that such representations are "vague statements of optimism" and are not "capable of objective verification." *See In re Cutera Sec. Litig., 610 F.3d at 1111*; *Apollo Grp., 774 F.3d at 606*. Accordingly, the Court must disregard these representations.

However, the Court finds that Consumers have alleged with sufficient **[**107]** particularity that Facebook made numerous "clearly false" representations about Facebook's data privacy practices. Specifically, Consumers have adequately alleged at least the following "clearly false" representations that are "capable of objective verification," *Apollo Grp., 774 F.3d at 606*: (1) Facebook falsely represented that it was not sharing users' private information with third parties, beginning with statements made after the News Feed protest and culminating in statements made during the Cambridge Analytica scandal; (2) Facebook falsely represented that users could prevent the "Beacon" tool from collecting their data; (3) Facebook falsely represented that users could prevent the "Like" button from collecting their data; and (4) Facebook falsely represented that it would not use cookies to collect users' data for commercial purposes, such as tracking users across the internet with "View Tags." Additionally, because Consumers identify the "who, what, when, where, and how" of each of these alleged representations, each alleged representation satisfies *Federal Rule of Civil Procedure 9(b)*. *Vess, 317 F.3d at 1106*.

3. Consumers' Data Privacy Claims Are Timely

Facebook contends that Consumers' data privacy claims are barred by the statute of limitations. *See* Mot. at **[**108]** 6-7. For the reasons below, the Court rejects this contention.

A claim may be dismissed under *Rule 12(b)(6)* on the ground that it is barred by the applicable statute of limitations only when "the running of the statute is apparent on the face of the complaint." *Huynh v. Chase Manhattan Bank, 465 F.3d 992, 997 (9th Cir. 2006)*. Thus, "a complaint cannot be dismissed unless it appears beyond doubt that the plaintiff can prove no set of facts that would establish the timeliness of the claim." *Supermail Cargo, Inc. v. United States, 68 F.3d 1204, 1206 (9th Cir. 1995)*.

The limitations period for private damages claims brought under *Section 2 of the Sherman Act* is four years. *15 U.S.C. § 15b*. However, the "period of limitations for antitrust litigation runs from **[*796]** the most recent injury caused by the defendants' activities rather than from the violation's inception." *Xechem, Inc. v. Bristol-Myers Squibb Co., 372 F.3d 899, 902 (7th Cir. 2004)* (Easterbrook, J.) (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*). Under this "continuing violation" doctrine, "each overt act that is part of the [antitrust] violation and that injures the plaintiff . . . starts the statutory period running again." *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (internal quotations omitted). However, to qualify as an "overt act," the act must satisfy "two criteria: 1) It must be a new and independent act that is not merely a reaffirmation of a previous act; and 2) it must inflict new and accumulating injury on the plaintiff." *Samsung Elecs. Co., Ltd. v. Panasonic Corp., 747 F.3d 1199, 1202 (9th Cir. 2014)* (internal quotations omitted).

Accordingly, **[**109]** because Consumers filed their complaint on December 3, 2020, Consumers must allege "overt act[s] that [are] part of the [antitrust] violation" that occurred after December 3, 2016. *See Klehr, 521 U.S. at 189*.

Because Consumers have adequately alleged that Facebook made at least two false representations after December 3, 2016, Consumers' claim is timely. First, on February 2, 2017, Facebook stated in an SEC filing that Facebook provides only "limited information to [third party application developers] based on the scope of services provided to us." *See* CC ¶ 238(l); Form 10-K Filing for Facebook, Inc., Securities and Exchange Commission (Feb. 2, 2017), https://bit.ly/3q7CtAl. Second, in March 2018, Mr. Zuckerberg called the Cambridge Analytica incident a "mistake," pledged to take action against "rogue apps," and stated that "[w]e have a responsibility to protect your data, and if we can't then we don't deserve to serve you." *See* CC ¶ 238(o); *Facebook's Zuckerberg Speaks Out Over Cambridge Analytica 'Breach'*, BBC News (Mar. 22, 2018), https://bbc.in/3GmpZKT.

As discussed, Consumers have alleged with sufficient particularity that these representations were "clearly false." Facebook's 2017 statement to the FTC **[**110]** would have given reasonable users the impression that Facebook was not providing third party applications with private information. To the contrary, the Cambridge Analytica scandal revealed that Facebook had provided users' private information to numerous third party applications, including applications for which users were not registered. *See* CC ¶ 143. For example, although Cambridge Analytica had only 270,000 users, Cambridge Analytica "was able to access the personal data of up to 87 *million* Facebook users." *See id.* (emphasis added). Similarly, Mr. Zuckerberg's 2018 statement about Cambridge Analytica would have given reasonable users the impression that Cambridge Analytica was a "rogue app" and that Facebook had not been systematically providing users' private information to third party application developers. However, Facebook subsequently announced that at least *10,000 applications* had been able to access similar data for the entire period since the FTC settlement. *Id.* ¶ 148. Accordingly, because each of these representations is an "overt act that is part of the [antitrust] violation" and occurred after December 3, 2016, Consumers' claim is timely. *Klehr, 521 U.S. at 189*.

Facebook's arguments to the **[**111]** contrary are unconvincing. Facebook argues that any false representation made after 2016 "is, as alleged, a 'reaffirmation of a previous' strategy, not a 'new and independent act' capable of restarting the statute of limitations." Reply at 4-5 (quoting *Bay Area Surgical Mgmt. LLC v. Aetna Life **[*797]** Ins. Co., 166 F. Supp. 3d 988, 999 (N.D. Cal. 2015)*). This argument selectively and misleadingly quotes *Bay Area Surgical Management*, which stated in relevant part that an "overt act restarts the statute of limitations if it . . . is 'a new and independent act that is not merely a reaffirmation of a previous *act*.'" *166 F. Supp. 3d at 999* (quoting *Pace Indus. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)*) (emphasis added). Thus, Facebook provides no authority for its argument that an act is not "new and independent" simply because the defendant has previously committed the same type of act as part of a unified anticompetitive strategy.

Facebook's argument ignores the Ninth Circuit's clear guidance that, if a defendant commits the same anticompetitive act multiple times, each new act restarts the statute of limitations for *all* the acts. *See Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)* ("[E]ach time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act."); *Hennegan v. Pacifico Creative Serv., Inc., 787 F.2d 1299, 1301 (9th Cir.1986)* (holding that a new overt act occurred **[**112]** each time tour operators shepherded tourists away from the plaintiffs' shop in exchange for payment). Accordingly, the two representations discussed above were overt acts that restarted the limitations period.

Additionally, Facebook summarily asserts that "even if the post-December 2016 acts could be sufficient, [Consumers] cannot allege—as they must—that the acts inflicted 'new and accumulating injury' on them." Reply at 5. However, this argument ignores Consumers' allegation that each of Facebook's false representations allowed Facebook to maintain a "critical mass of users" by convincing users that Facebook was protecting their data. CC ¶ 217. As the Seventh Circuit has explained, "improperly prolonging a monopoly is as much an offense against the *Sherman Act* as is wrongfully acquiring market power in the first place." *Xechem, 372 F.3d at 902*. Moreover, as explained in the following sections, Consumers have adequately alleged each of the elements required to show that Facebook's false representations had a significant effect on competition. Accordingly, Facebook's conclusory argument is insufficient to show that Consumers "can prove no set of facts that would establish" that each of Facebook's false representations **[**113]** contributed to Consumers' injury. *Supermail Cargo, 68 F.3d at 1206*.

Thus, Consumers' data privacy claims are timely.

4. Consumers Adequately Allege that Facebook's False Representations About Its Data Privacy Practices Were Not Readily Susceptible of Neutralization

Facebook contends that, even if Consumers have adequately alleged that Facebook made false representations, Consumers have failed to allege that these representations were "'not readily susceptible of neutralization or other offset by rivals.'" Mot. at 21-22 (quoting *Am. Pro. Testing Serv., 108 F.3d at 1152*). For the reasons below, the Court rejects this argument.

Although the Ninth Circuit has not explained how to evaluate whether a company's false representations about its own products are reasonably susceptible of neutralization,[3] three cases from the D.C. **[*798]** Circuit provide useful guidance. First, in *Caribbean Broadcasting Sys., Ltd. v. Cable & Wireless PLC, 148 F.3d 1080, 1087, 331 U.S. App. D.C. 226 (D.C. Cir. 1998)*, a radio station in the Caribbean brought a *Sherman Act* claim alleging that a rival radio station had falsely represented to advertisers that the rival station's services "could reach the 'entire Caribbean.'" In reality, the station "reached only a fraction of that area." *Id.* The D.C. Circuit held that these "fraudulent misrepresentations to advertisers" were "well within" the definition of "anticompetitive conduct." **[**114]** *Id.*

Second, in *United States v. Microsoft Corp., 253 F.3d 34, 76, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*, the Department of Justice brought a *Sherman Act* claim alleging that Microsoft had falsely represented to developers that Microsoft's software tools could be used to design applications that would be compatible with other platforms. In reality, "Microsoft's tools included 'certain keywords and compiler directives that could only be executed properly by Microsoft's [software].'" *Id.* (internal citation omitted). The D.C. Circuit held that these false representations fell within the scope of the *Sherman Act*. *Id.*

Third, in *Covad Communs. Co. v. Bell Atl. Corp., 398 F.3d 666, 670, 365 U.S. App. D.C. 78 (D.C. Cir. 2005)*, a provider of Digital Subscriber Line ("DSL") services brought a *Sherman Act* claim alleging that Bell Atlantic had falsely represented to customers in certain areas that Bell Atlantic could provide DSL services. *Id. at 674*. In reality, Bell Atlantic's DSL services were not yet available in those areas. *Id.* However, the D.C. Circuit held that Bell Atlantic's representations were readily susceptible of neutralization because the "falsity of" Bell Atlantic's representation was "necessarily dispelled whenever a consumer trie[d] to obtain the [DSL] service." *Id. at 675*.

The takeaway from these three cases is that a company's false representation is not readily susceptible of neutralization when the representation **[**115]** is about a highly technical aspect of the company's product. In *Caribbean Broadcasting, 148 F.3d at 1087*, the defendant made false representations about the technical capabilities of its radio broadcasting system. Similarly, in *Microsoft, 253 F.3d at 76*, Microsoft made false representations about the technical features of its programming tools. Thus, it would have been difficult for anybody without technical expertise to determine that the representations considered in *Caribbean Broadcasting* and *Microsoft* were false. By contrast, in *Covad, 398 F.3d at 670*, Bell Atlantic falsely represented that its services were available to customers in certain geographic areas. Because any customer who tried to obtain the defendant's services could discover that this representation was false, technical expertise was not required. Indeed, in *Covad*, the D.C. Circuit expressly contrasted Bell Atlantic's representations with the representations considered in *Microsoft. Id.*

Under this standard, Consumers have adequately alleged that Facebook's false representations were "not readily susceptible of neutralization or other offset by rivals." *Am. Pro. Testing Serv., 108 F.3d at 1152*. Consumers explain that Facebook has created a "walled garden" which gives Facebook complete control over user data. *See* CC ¶ 106. Thus, even sophisticated third parties, such as developers **[**116]** and search engines, cannot access user data without Facebook's permission, let alone determine what Facebook is doing with user data. *See id.*

Moreover, Consumers have alleged that each of Facebook's deceptive privacy practices—providing private user data to third party application developers, collecting user data with the Beacon tool, collecting user data with "Like" buttons, and **[*799]** tracking users across the internet with cookies—could not have been revealed by anybody without significant technical expertise. For example, the true nature of the "Beacon" tool was not revealed until "Stefan Berteau, a senior research engineer at California's Threat Research Group" examined the software code

---

[3] The Ninth Circuit's decision in *American Professional Testing Service, 108 F.3d at 1152*, dealt with a claim that the defendant had disparaged a rival by posting fliers which falsely stated that the rival "was in financial trouble" and "had been accused of fraud by the SEC." Because these statements were about the rival, and the rival knew the statements were false, the rival was in a good position to "neutralize" the statements. *See id.*

used to create the "Beacon" tool. ECF No. 97-4 at 57-58. Similarly, the true nature of the "Like" button was not revealed until "Dutch researcher Arnold Roosendaal" published a white paper that analyzed the software code used to create "Like" buttons. *Id.* at 65. In turn, Facebook's provision of user data to third party application developers over a seven year period was revealed only because of the Cambridge Analytica scandal. CC ¶ 146. These examples show that, just like the false representations considered **[**117]** by the D.C. Circuit in *Caribbean Broadcasting, 148 F.3d at 1087*, and *Microsoft, 253 F.3d at 76*, users and rivals could not have discovered that Facebook's representations were false without significant technical expertise or access to Facebook's software code. Thus, Facebook's false representations were "not readily susceptible of neutralization or other offset." *Am. Pro. Testing Serv., 108 F.3d at 1152*.

Facebook's conclusory argument to the contrary is unconvincing. Facebook merely states that the "alleged misrepresentations are on their face reasonably susceptible to neutralization by rivals in obvious ways." Mot. at 21. "For example," Facebook contends, "those firms could have improved their own policies, or called attention to Facebook's supposed misstatements." *Id.* However, Facebook makes no effort to explain how rival firms could have known that Facebook's statements were false when Facebook made them.

Additionally, although Facebook relies on *Genus Lifesciences, 378 F. Supp. 3d 823*, that case does not support Facebook's argument. In *Genus Lifesciences*, the plaintiff, who owned the only FDA approved version of a certain drug, brought a *Sherman Act* claim alleging that the defendant had falsely represented that the defendant's version of the same drug also was FDA approved. *Id. at 841-42*. The court held that this representation was readily susceptible of neutralization **[**118]** because FDA approval is a matter of public knowledge and the plaintiff was fully aware that the defendant's drug was not approved. *Id.* By contrast, in the instant case, there was no publicly available information that Facebook's rival could have consulted to determine whether Facebook's representations about its data privacy practices were true.

Accordingly, Consumers have adequately alleged that Facebook's false representations about its data privacy practices were "not readily susceptible of neutralization or other offset by rivals." *Am. Pro. Testing Serv., 108 F.3d at 1152*.

5. Consumers Adequately Allege that Facebook's False Representations Were "Clearly Material"

Facebook argues that Consumers' data privacy claims must be dismissed because Consumers have not adequately alleged that "Facebook's representations impeded competition." Mot. at 21. According to Facebook, Consumers have failed to explain how "Facebook's alleged misrepresentations prevented other well-resourced firms—like Google or Snapchat—from competing effectively." *Id.* at 22. Additionally, Facebook argues that Consumers' "underlying theory is completely implausible" because there are other "competing theories for Facebook's success," "including Facebook's **[**119]** 'realness,' which is alleged to be Facebook's 'distinguishing feature.'" *Id.*

As an initial matter, Facebook's arguments ignore the Ninth Circuit's specific **[*800]** test for determining whether a "monopolist's misrepresentations encouraging the purchase of its product" impede competition. *See* Areeda ¶ 782b. Indeed, as discussed, the Ninth Circuit has stated that a monopolist's misrepresentations about its products constitute "exclusionary conduct" if the misrepresentations "were [1] clearly false, [2] clearly material, [3] clearly likely to induce reasonable reliance, [4] made to buyers without knowledge of the subject matter, [5] continued for prolonged periods, and [6] not readily susceptible of neutralization or other offset by rivals." *Am. Pro. Testing Serv., 108 F.3d at 1152*. Thus, if Consumers have adequately alleged these six elements, Consumers have adequately alleged that Facebook's misrepresentations impeded competition. *See* *Genus Lifesciences, 378 F. Supp. 3d at 841* (explaining that a *Sherman Act* claim based on false statements to buyers survives a motion to dismiss if the plaintiff "allege[s] cumulative facts that would prove the statements" meet the six elements).

Facebook's arguments are conclusory and inconsistent with the six elements articulated by the Ninth Circuit **[**120]** in *American Professional Testing Service, 108 F.3d at 1152*. However, the Court interprets Facebook's argument about "competing theories for Facebook's success" to be an argument that Facebook's false representations were not "clearly material" to users' decision to sign up for Facebook. For the reasons below, the Court rejects this argument as well.

Although the Ninth Circuit has not addressed the meaning of the term "clearly material" in the context of the *Sherman Act*, cases dealing with securities fraud claims and cases dealing with false advertising claims under the *Lanham Act* provide useful guidance. In the context of a securities fraud claim, an "omitted fact is material if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote." *TSC Industries, Inc. v. Northway, Inc., 426 U.S. 438, 449, 96 S. Ct. 2126, 48 L. Ed. 2d 757 (1976)*. Similarly, in the context of a false advertising claim, a deceptive statement is material if "it is likely to influence the purchasing decision." *Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1139 (9th Cir. 1997)*. Accordingly, to show that a defendant's false representation about its product was "clearly material" for purposes of the *Sherman Act*, the plaintiff must show that customers would consider the representation important in deciding whether to use the defendant's product or that the representation was likely to influence customers to **[**121]** use the defendant's product.

Under this standard, Consumers adequately allege that Facebook's false representations about its data privacy practices were "clearly material." Consumers explain in detail that "[p]rivacy practices were a crucial form of competition in the early days of the Social Network and Social Media Markets." CC ¶ 102. In a 2004 consumer survey, a majority of users indicated that privacy was a "really important issue that [they] care about often." *Id.* ¶ 108. In another study, users indicated that they cared more about privacy than about terrorism. *Id.* Indeed, Facebook recognized on multiple occasions that users would not use Facebook unless Facebook "promise[d] privacy protections." *Id.* ¶ 46. For example, in Facebook's 2008 internal report titled "Facebook Secret Sauce," Facebook observed that "'[u]sers will share more information if given more control over who they are sharing with and how they share.'" *Id.* ¶ 109 (internal citations omitted). Additionally, when Google+ launched in 2010, Facebook decided to "postpone any changes to its privacy policies 'until the direct competitive comparisons beg[a]n to die down.'" *Id.* ¶ 134.

[*801] Indeed, in the aftermath of the 2011 FTC **[**122]** settlement, Mr. Zuckerberg stated that "everyone needs complete control over who they share with at all times" and that this "idea has been the core of Facebook since day one." Mark Zuckerberg, *Our Commitment to the Facebook Community*, Facebook Newsroom (Nov. 29, 2011), https://bit.ly/3zDEs2A. Mr. Zuckerberg added that the reason people originally signed up for Facebook was that, "for the first time," they "could make their page private." CC ¶ 109. Indeed, Mr. Zuckerberg explained, the reason "Facebook became the world's biggest community online" was that Facebook "made it easy for people to feel comfortable sharing things about their real lives." *Id.* As Mr. Zuckerberg put it, Facebook's privacy protections made Facebook "one of the only services on the web where people are sharing pretty personal and intimate information." *Id.* ¶ 130.

Given the value that Facebook's users placed on privacy and given Facebook's express recognition that privacy was the reason "Facebook became the world's biggest online community," it is more than plausible that users would have considered Facebook's representations about its data privacy practices important in determining whether to use Facebook. *Id.* **[**123]** Accordingly, Facebook's false representations about its data privacy practice were clearly material. *See* *TSC Industries, 426 U.S. at 449*; *Southland Sod Farms, 108 F.3d at 1139*.

Genus Lifesciences supports this conclusion. In *Genus Lifesciences*, the plaintiff, who owned the only FDA approved version of a certain drug, brought a *Sherman Act* claim alleging that the defendant had falsely represented that the defendant's version of the same drug also was FDA approved. *378 F. Supp. 3d at 841-42*. To support this claim, the plaintiff alleged that the "FDA approval status of a prescription drug is material to customers because approved drugs provide customers assurance as to the quality of the product not afforded to unapproved prescription drugs." Complaint ¶ 101, *Genus Lifesciences Inc. v. Lannett Co., Inc.*, No. 18-CV-7603 (N.D. Cal. Dec. 18, 2018), ECF No. 1. Citing this allegation, the court concluded that the plaintiff had adequately alleged that the defendant's statements were "clearly material." *Genus Lifesciences, 378 F. Supp. 3d at 842*. Accordingly, because Consumers provide far more detail about the importance of data privacy to users, *Genus Lifesciences* supports Consumers' argument that Facebook's representations about its data privacy practices were "clearly material."

Facebook's arguments to the contrary are unconvincing. Citing *Rambus Inc. v. FTC, 522 F.3d 456, 464, 380 U.S. App. D.C. 431 (D.C. Cir. 2008)*, Facebook argues that Consumers' "theory is not **[**124]** cognizable if they fail to plausibly allege that deception was the but-for cause of Facebook's supposed monopoly." Mot. at 22. However, *Rambus* says nothing of the sort. Instead, *Rambus* explains that deceptive statements are anticompetitive if they "impaired rivals in a manner *tending to bring about or protect* a defendant's monopoly power." *522 F.3d at 464* (emphasis added). Thus, Facebook cites no authority which supports its assertion that conduct is anticompetitive only if it is the "but-for cause" of a defendant's monopoly power.

Additionally, Facebook contends that there are "competing theories for Facebook's success, all more plausible than deception." Mot. at 22. Specifically, Facebook identifies Facebook's "realness" and "its unique emphasis on connecting friends, family, and other 'verified relationships.'" *Id.* (citing CC ¶ 48). However, there is no requirement that deceptive statements be the *only* reason for Facebook's success in **[*802]** order for those deceptive statements to be "clearly material." Instead, as discussed, deceptive statements are clearly material if they influenced users' decision to use Facebook or would have been considered important by users. *See* *TSC Industries, 426 U.S. at 449*; *Southland Sod Farms, 108 F.3d at 1139*.

Moreover, Facebook ignores Consumers' allegations **[**125]** that Facebook's representations about its data privacy practices were essential to creating Facebook's "realness." Although Facebook encouraged users to share their real-world identities and personal information, Facebook knew that it could only induce users to provide their identities and information if it "promise[d] privacy protection." CC ¶ 46. Indeed, the original version of Facebook "was closed to all but those users who could validate their own real-world identities, such as by verifying that their identities were legitimate via an e-mail address issued by an organization, such as a university or firm." *Id.* ¶ 48. Facebook's "Secret Sauce" report expressly recognized that "'[u]sers will share more information if given more control over who they are sharing with and how they share.'" *Id.* ¶ 109 (internal citations omitted). As Mr. Zuckerberg put it, Facebook's privacy protections made Facebook "one of the only services on the web where people are sharing pretty personal and intimate information." *Id.* ¶ 130. Thus, Facebook's perceived "realness" would not have been possible without promises of data privacy.

For all these reasons, Consumers adequately allege that Facebook's false **[**126]** representations about its data privacy practices were "clearly material." Accordingly, Consumers have adequately alleged that Facebook's false representations about its data privacy practices constitute exclusionary conduct under the meaning of the *Sherman Act*.

6. Consumers Adequately Allege Causal Antitrust Injury

Consumers allege that Facebook's monopolization of the Social Network and Social Media Markets has harmed users because, without competition, Facebook can extract additional "personal information and attention" from users. CC ¶¶ 220-22. Facebook contends that Consumers have not adequately alleged causal antitrust injury because "lost 'information and attention' is not a cognizable injury," because users' alleged injury is speculative, and because users' alleged injury was "not caused by lost competition." Mot. at 28-31. For the reasons below, the Court rejects Facebook's arguments.

To plead causal antitrust injury, a plaintiff must allege that the defendant's unlawful conduct caused an injury "that flows" from the unlawful conduct and that is "the type the antitrust laws were intended to prevent." *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*. A cognizable antitrust injury includes harm to a plaintiff's "business or property." *15 U.S.C. § 15* **[**127]** . Business is "that which occupies the time, attention, and labor of [a plaintiff] for the purpose of . . . pecuniary reward." *Fine v. Barry & Enright Prods., 731 F.2d 1394, 1397 (9th Cir. 1984)*. In turn, "property" is a "broad and inclusive" term that includes "anything of material value owned or possessed." *Reiter v. Sonotone Corp., 442 U.S. 330, 338, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*.

Because Consumers explain in detail that "information and attention" has significant "material value," Consumers adequately allege harm to their "business or property." *Reiter, 442 U.S. at 338*. Consumers allege that their "information and attention" has "material value" because Facebook sells users' "information and attention to third parties, including advertisers." CC ¶ 222. Specifically, **[*803]** "Facebook monetizes user information through targeted advertising, which generated most of the company's $55.7 billion in revenues in 2018." *Id.* ¶ 150. In other words, users provide significant value to Facebook by giving Facebook their information—which allows Facebook to create targeted advertisements—and by spending time on Facebook—which allows Facebook to show users those targeted advertisements. If users gave Facebook less information or spent less time on Facebook, Facebook would make less money. Indeed, as Consumers point out, Facebook "describes its massive advertising earnings in terms of average revenue per user ('ARPU') in its public filings." *Id.* ¶ 7. In 2019, for example, "Facebook **[**128]** reported that its ARPU was over $41.00 per user in the United States and Canada." *Id.* Thus, there is no doubt that Consumers' "information and attention" has "material value." *Reiter, 442 U.S. at 338*; *see also* *United Food & Commercial Workers Local 1776 & Participating Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1070 (N.D. Cal. 2014)* (explaining that "courts need not restrict the definition of 'payments' . . . to cash").

This Court's recent decision in *Brown v. Google LLC, No. 20-CV-3664-LHK, 2021 U.S. Dist. LEXIS 244695, 2021 WL 6064009 (N.D. Cal. Dec. 22, 2021)*, confirms that Consumers' allegations are sufficient. In *Brown*, the plaintiffs brought a claim under California's Unfair Competition Law ("UCL") alleging that Google had unlawfully collected their browsing data. *2021 U.S. Dist. LEXIS 244695, [WL] at *14*. Citing the UCL's requirement that a plaintiff must establish "lost money or property as a result of the unfair competition," Google moved to dismiss the UCL claim and argued that the plaintiffs had not "plausibly alleged that they 'lost money or property' as a result of Google's conduct." *Id.* (citing *Cal. Bus. & Prof. Code § 17204*). The Court rejected this argument because the plaintiffs had "allege[d] that the 'cash value' of the data which Google collected 'can be quantified' and that there is an active market for such data." *2021 U.S. Dist. LEXIS 244695, [WL] at *15* (internal citation omitted). Specifically, the plaintiffs cited a "recent study that found that internet users are willing to pay up to $52.00/year to keep their browsing histories **[**129]** private" and identified several companies that were willing to pay users for browsing data. *Id.*

Similarly, in the instant case, Consumers allege that users' "information and attention" has a cash value, which can be approximated by Facebook's reported ARPU. CC ¶ 7. Additionally, like the plaintiffs in *Brown*, Consumers identify examples of companies that have been willing to pay users for information and attention. *See id.* ¶¶ 223-24. Indeed, Facebook itself paid certain users "up to $20.00 per month in return for access to those users' emails, private messages in social media apps, photos and videos, web browsing and search activity, and even location information." *Id.* Thus, Consumers have adequately alleged that, by providing Facebook with their information and attention, they "lost money or property." *Brown, 2021 U.S. Dist. LEXIS 244695, 2021 WL 6064009, at *16*.

Indeed, outside the antitrust context, numerous courts have recognized that plaintiffs who lose personal information have suffered an economic injury. *See* *Calhoun v. Google LLC, 526 F. Supp. 3d 605 (N.D. Cal. 2021)* ("[T]he Ninth Circuit and a number of district courts, including this Court, have concluded that plaintiffs who suffered a loss of their personal information suffered economic injury and had standing."); *In re Marriott Int'l, Inc., Customer Data Sec. Breach Litig., 440 F. Supp. 3d 447, 461 (D. Md. 2020)* ("[T]he growing trend across courts **[**130]** that have considered this issue is to recognize the lost property value of this information."); *In re Yahoo! Inc. Customer Data Sec. Breach **[*804]** Litig., No. 16-MD-02752-LHK, 2017 U.S. Dist. LEXIS 140212, 2017 WL 3727318, at *13 (N.D. Cal. Aug. 30, 2017)* (holding that plaintiffs had adequately alleged injury in fact based on the loss of value of their personal information); *In re Anthem, Inc. Data Breach Litig., No. 15-MD-02617-LHK, 2016 Case No. 20-CV-08570-LHK, 2016 U.S. Dist. LEXIS 70594, 2016 WL 3029783, at *14 (N.D. Cal. May 27, 2016)* (concluding that the plaintiffs had plausibly alleged injury from the loss of value of their personal information). Thus, there is ample support for Consumers' argument that lost information and attention has material value.

Additionally, Consumers adequately allege that their injury "flows" from Facebook's monopolization of the Social Network and Social Media Markets. *Somers, 729 F.3d at 963*. Consumer allege that, had Facebook not eliminated competition in these markets, Consumers would have been able to "select a social network or social media application which offers consumers services that more closely align the consumers' preferences, such as with respect to the content displayed, quantity and quality of advertising, and options regarding data collection and usage practices." CC ¶ 226. To support this allegation, Consumers point out that, in competitive markets, some companies pay users for their data. For example, "[w]hen consumers agree to use Microsoft's 'Bing' search engine and allow **[**131]** Microsoft to collect their data, Microsoft . . . compensates consumers with items of monetary value." *Id.* ¶ 223.

Furthermore, Consumers allege that, had Facebook not eliminated competition, "Consumers could have benefitted from Facebook's social network and social media offerings without having to surrender as much personal data to Facebook and other third parties that use Facebook for app development or targeted advertising." *Id.* ¶ 226. Indeed, during the period of time when Google+ posed a competitive threat to Facebook, a Facebook executive stated that it would be unwise to remove privacy protections because "IF ever there was a time to AVOID controversy, it would be when the world is comparing our offerings to G+." *Id.* ¶ 134. Taken together, these allegations establish that Consumers have suffered an injury because Facebook "detrimentally changed the market make-up and limited consumers' choice to one source of output." *Glen Holly Ent., Inc. v. Tektronix Inc., 343 F.3d 1000, 1010-11 (9th Cir. 2003)*. Accordingly, Consumers have adequately alleged that their injury "flows" from Facebook's anticompetitive conduct. *Id.*

For all these reasons, the Court concludes that Consumers have adequately alleged causal antitrust injury. Thus, the Court DENIES Facebook's motion **[**132]** to dismiss Consumers' data privacy claims.

7. Consumers' Request for Injunctive Relief as a Remedy for Consumers' Data Privacy Claims Is Not Barred by the Doctrine of Laches

Consumers seek two forms of injunctive relief related to their data privacy claims: "(i) an order prohibiting Facebook from continuing to engage in the wrongful acts described herein; and (ii) requiring Facebook to engage third-party auditors to conduct audits and evaluations of Facebook's data privacy practices, commercial surveillance, and acquisition conduct, and ordering them to promptly correct any problems or issues detected by these auditors." CC ¶ 318(b). Facebook argues that the doctrine of laches bars this injunctive relief because Facebook's 2011 "settlement with the FTC regarding the privacy representations at issue was . . . public." Mot. at 8. For the reasons below, the Court rejects Facebook's argument.

"Claims for injunctive relief . . . are subject to the equitable defense of laches." *Oliver, 751 F.3d at 1085*. "Laches is an equitable time limitation on a party's right to bring suit, resting on the maxim **[*805]** that one who seeks the help of a court of equity must not sleep on his rights." *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 835 (9th Cir. 2002)* (internal citations and quotations omitted). **[**133]** To invoke a laches defense, the defendant must show that: (1) "the plaintiff knew (or should have known) of the allegedly [unlawful] conduct" yet delayed "the initiation of the lawsuit," and (2) the delay was unreasonable. *Danjaq LLC v. Sony Corp., 263 F.3d 942, 952, 954 (9th Cir. 2001)*.

In antitrust cases, "the four-year statute of limitations in *15 U.S.C. § 15b* 'furnishes a guideline for computation of the laches period.'" *Samsung Elecs., 747 F.3d at 1205* (quoting *Int. Tel & Tel. Corp. v. Gen. Tel. & Elec. Corp., 518 F.2d 913, 926 (9th Cir. 1975)*). "Therefore, in applying laches, [the Ninth Circuit] look[s] to the same legal rules that animate the four-year statute of limitations." *Oliver, 751 F.3d at 1086*.

Thus, because Consumers' data privacy claims are timely, "the strong presumption is that laches is inapplicable." *See Jarrow Formulas, Inc., 304 F.3d at 835*. Facebook's one sentence argument is insufficient to rebut that presumption. Moreover, Facebook fails to explain why Consumers' knowledge of the 2011 FTC settlement would prevent Consumers from seeking injunctive relief based on the numerous false representations which Facebook made after the 2011 FTC settlement. *See* pp. 49-51, *supra*.

Thus, the Court rejects Facebook's argument that Consumers may not seek injunctive relief related to their data privacy claims.

C. The Court Grants Facebook's Motion to Dismiss Consumers' and Advertisers' "Copy, Acquire, Kill" Claims With Leave to [134] Amend**

According to Consumers and Advertisers, Facebook maintained monopoly power through a multipart strategy called "Copy, Acquire, Kill." Specifically, Facebook identified particularly popular mobile social media applications by using Onavo, a spyware application that was disguised as a security and encryption application, but that deceptively harvested information about its users' mobile applications. Using this deceptively obtained information, Facebook executed a three part strategy to eliminate potential competitors. First, Facebook copied several potential competitors' products. Second, Facebook acquired numerous potential competitors, including several of its most successful potential competitors. Third, Facebook enticed thousands of potential competitors to build their products using Facebook's "Platform" then removed access to the Platform.

Consumers and Advertisers both allege that Facebook's "Copy, Acquire, Kill" strategy violated *Section 2 of the Sherman Act*. Additionally, both are clear that they are not challenging individual aspects of the "Copy, Acquire, Kill" strategy. Consumers state that they are not challenging "single acquisitions in isolation," Opp. at 24, and that their theory of **[**135]** liability "do[es] *not* depend on any 'duty to deal' between Facebook and 'third-party app developers,'" Opp. at 27 (emphasis in original). Instead, Consumers challenge "Facebook's overall anticompetitive scheme." Opp. at 25. Similarly, Advertisers state that they are "not assert[ing] claims that impose upon Facebook a duty to deal with competitors." Opp. at 27. Instead, Advertisers "allege[] a multi-part scheme that *includes* Platform-based conduct." *Id.*

Thus, Consumers and Advertisers rely on what some courts have "referred to as a 'course of conduct' or 'monopoly broth' theory" of antitrust liability. *New York v. Facebook, Inc., No. 20-CV-3589-JEB, 549 F. Supp. 3d 6, 2021 U.S. Dist. LEXIS 127227, 2021 WL 2643724, at *26 (D.D.C. June 28, 2021)* (quoting *In re Intuniv Antitrust **[*806]** Litig., 496 F. Supp. 3d 639, 680 (D. Mass. 2020)*). That theory gets its name from *City of Mishawaka v. American Electric Power Co., Inc., 616 F.2d 976, 986 (7th Cir. 1980)*, in which the Seventh Circuit affirmed the district court's decision to analyze the aggregate effect of a series of anticompetitive acts committed by the defendant. The Seventh Circuit rejected the defendant's argument that the district court had erred by failing to analyze each act separately and stated that "[i]t is the mix of the various ingredients of utility behavior in a monopoly broth that produces the unsavory flavor." *Id.*

In *City of Anaheim v. Southern California Edison Co., 955 F.2d 1373, 1376, 1378 (1992)*, the Ninth Circuit endorsed this "monopoly broth" theory and stated that "it would not be proper to focus on **[**136]** specific individual acts of an accused monopolist while refusing to consider their overall combined effect."

Similarly, in *LePage's Inc. v. 3M, 324 F.3d 141 (3d Cir. 2003)*, the Third Circuit held that it was necessary to analyze the aggregate anticompetitive effect of the defendant's bundled discount and exclusive dealing contracts, rather than the anticompetitive effect of each individual contract.

Under a "monopoly broth" theory of liability, a plaintiff "can state a *Section 2* claim by alleging a series of practices that are anticompetitive, even if some of the activities would be lawful if viewed in isolation." *Free FreeHand Corp. v. Adobe Systems Inc., 852 F. Supp. 2d 1171, 1180 (N.D. Cal. 2012)* (citing *City of Anaheim, 955 F.2d at 1376*); *see also* *Intuniv, 496 F. Supp. 3d at 680* (explaining that "a plaintiff can allege a series of actions that when taken together make out antitrust liability even though some of the individual actions, when viewed independently, are not all actionable"); *Tele Atlas N.V. v. NAVTEQ Corp., No. C-05-01673 RS, 2008 U.S. Dist. LEXIS 145998, 2008 WL 4911230, at *2 (N.D. Cal. Nov. 13, 2008)* ("To appreciate the effect of otherwise lawful acts, the jury must consider the acts' aggregate effect.").

Facebook argues that Advertisers' and Consumers' "Copy, Acquire, Kill" claims are barred by the statute of limitations. *See* Mot. at 6-7, 8-9. Additionally, Facebook argues that both "Copy, Acquire, Kill" claims must be dismissed because (1) copying competitors' products is not anticompetitive; (2) **[**137]** Facebook's acquisitions were not exclusionary; and (3) Facebook did not have a duty to give potential competitors access to Facebook's "Platform." *Id.* at 22-27. Facebook also argues that Consumers' request for injunctive relief is barred by the doctrine of laches. *Id.* at 8-9. For the reasons below, the Court concludes that Consumers' and Advertisers' "Copy, Acquire, Kill" claims are barred by the statute of limitations. Accordingly, the Court need not reach the remainder of Facebook's arguments.

The Court first describes Consumers' and Advertisers' allegations regarding Facebook's "Copy, Acquire, Kill" strategy. Second, the Court explains why Consumers' and Advertisers' "Copy, Acquire, Kill" claims are untimely.

1. Consumers and Advertisers Allege that Facebook's "Copy, Acquire, Kill" Strategy Allowed Facebook to Maintain Monopoly Power

Below, the Court describes Facebook's "Copy, Acquire, Kill" strategy in detail. First, the Court explains why Facebook viewed mobile social media applications as the biggest competitive threats. Next, the Court describes how Facebook deceptively used Onavo to determine which mobile social media applications were the most popular. In the following sections, **[**138]** the Court describes each part of Facebook's strategy. Although Consumers and Advertisers allege the same basic facts, Advertisers include significantly more detail about **[*807]** some aspects of Facebook's strategy. Accordingly, the Court notes where Consumers' and Advertisers' allegations differ.

a. Facebook Realized that Mobile Social Media Applications Posed the Biggest Competitive Threat to Facebook

Advertisers explain that, besides MySpace and Google+, the biggest threat to Facebook's monopoly power came from mobile social media applications. In 2007, shortly before Facebook overtook Myspace, Apple Inc. ("Apple") released its first iPhone. AC ¶ 84. On July 10, 2008, Apple opened the Apple App Store ("App Store"), which provided a marketplace where developers could sell applications that would run on iPhones. *Id.* ¶ 85. Accordingly, mobile applications proliferated rapidly. *Id.* ¶ 87. By September 2008, the App Store had 100 million downloads, and by 2009, it had 1 billion. *Id.* ¶ 86.

This development was a problem for Facebook. Unlike desktop alternatives to Facebook, mobile social media applications "presented their own specialized value propositions." *Id.* ¶ 90. Streamlined, single-purpose **[**139]** applications were easier to use on mobile devices than Facebook's platform, which was not easily transferrable to a mobile version. *Id.* ¶¶ 94-95. Indeed, the first version of Facebook's mobile application was buggy, prone to crashes, and painfully slow. *Id.* ¶ 95. Thus, because it was clear "that within five years, the number of users who accessed the Internet from mobile devices would surpass the number who accessed it from PCs," Facebook knew that mobile applications would continue to peel away Facebook's users. *Id.* ¶ 92. In its 2012 annual report filed with the Securities Exchange Commission ("SEC"), Facebook disclosed that "[g]rowth in the use of Facebook through our mobile products for a substitute for use on personal computers may negatively affect our revenue and financial results." *Id.* ¶ 98.

Although Consumers do not provide the same level of detail, Consumers allege that Facebook was concerned with the competitive threat posed by mobile applications and was intent on finding a way to measure this threat. According to Consumers, Facebook initially "used its own internal data and data from Comscore, a data analytics and measurement firm, to track the growth of competitive threats." **[**140]** CC ¶ 159. However, in April 2012, Facebook Director of Growth Javier Olivan emailed Facebook CEO Mark Zuckerberg about improving Facebook's "competitive research." *Id.* ¶ 160. Mr. Olivan stated: "I keep seeing the same suspects (Instagram, pinterest, . . .) both on our competitive radar . . . I think having the exact data about their users engagement . . . would help us make more bold decisions on whether they are friends or foes. Back to your thread about 'copying' vs. 'innovating' we could also use this info to inspire our next moves." *Id.* Mr. Zuckerberg responded: "Yeah, let's do it." *Id.* ¶ 161.

b. Facebook Deceptively Used Onavo Spyware to Obtain Information About Which Mobile Social Media Applications Were Popular

After Facebook realized that mobile social media applications threatened Facebook's market power, Facebook engaged Onavo, an "Israeli mobile web analytics company," to determine the precise scope of this threat. CC ¶ 162; AC ¶ 247. Onavo had a suite of mobile applications, including a virtual private network ("VPN") application called "Onavo Protect." CC ¶¶ 162, 166; AC ¶ 252. As Consumers explain, a VPN typically "provides security and encryption to a user" by "scrambling" **[**141]** the data sent from a user's phone to internet servers. CC ¶ 162. Indeed, Onavo billed Onavo Protect, which was downloaded **[*808]** over 33 million times, as a tool that mobile phone owners could use to keep their "data safe" and "[a]dd an extra layer of protection to all [their] mobile data traffic." *Id.* ¶ 166; AC ¶ 252.

Regardless of whether Onavo Protect functioned as a VPN, Onavo Protect was valuable to Facebook for another reason: Onavo Protect operated as a spyware program by "monitor[ing] all web and mobile application traffic on a user's mobile device." CC ¶ 166; AC ¶ 252. Indeed, Onavo Protect collected users' data "whether their screens were on or off, whether they used WiFi or cellular data, and even when the VPN was turned off." CC ¶ 210; AC ¶ 261.

As relevant here, Onavo Protect collected information about which social media applications users were accessing most frequently. Consumers allege that Onavo collected the following information: "every app the user has accessed"; "the number of seconds the user spent in the app per day"; "the percent of time the user spent in a specific app out of their total mobile usage time"; "the actions taken by the user in each app"; and the user's **[**142]** demographic information. CC ¶ 165. In turn, Advertisers allege that Onavo kept track of "which apps and features people were using in real time, how frequently they used the apps, and for how long." AC ¶ 253. Accordingly, Onavo permitted Facebook to assess "the two most important metrics for competing mobile applications": an application's reach, *i.e.*, the size of its user base, and an application's engagement, *i.e.*, how frequently users use the application. *Id.* ¶ 249.

Facebook used data collected by Onavo to determine which mobile social media applications were competitive threats. Advertisers allege that Facebook began paying Onavo for this data in 2011. *Id.* ¶ 256. "By April 2013," Facebook was "using Onavo to track Snapchat, Pinterest, WhatsApp, Tumblr, Foursquare, Google, Path, Vine, Kik, Voxer, MessageMe, Viber, GroupMe, Skype, Line, and Tango." *Id.* ¶ 166. Although Consumers do not identify precisely when Facebook engaged Onavo, Consumers allege that, by 2013, Facebook had been acquiring data through Onavo "for years." CC ¶ 164.

In October 2013, Facebook acquired Onavo and placed Onavo under the supervision of Facebook's "Growth team." CC ¶ 164; AC ¶ 250. At that point, Onavo announced **[**143]** on its blog that it "remain[ed] committed to the privacy of people who use our application, and that commitment will not change." AC ¶ 251.

From thereon, Onavo automatically provided all data it gathered directly to Facebook. *See* CC ¶ 166; AC ¶ 253. However, users of Onavo Protect were unaware of Onavo's association with Facebook because "nowhere on the Onavo Protect website, the Apple App Store, the Google Play Store, or in the advertising for Onavo Protect did Facebook or Onavo disclose to consumers . . . that Onavo Protect would not protect and keep secret users' personal activity data, or that Facebook or Onavo would use personal activity data collected from users for the commercial benefit of Facebook or Onavo." CC ¶ 232.

Facebook and Onavo also released a product called "Onavo Bolt," "which locked apps behind a passcode or fingerprint while it covertly surveilled users—and sent Facebook the results." AC ¶ 266. Onavo Bolt was "installed approximately 10 million times." *Id.*

In 2018, Apple removed Onavo Protect from the App Store "because it violated Apple's rules prohibiting applications from using data in ways far beyond what is required to run the app and provide advertising." CC **[**144]** ¶ 209; AC ¶ 260. "In other words, because Onavo Protect was leveraging far more data than any VPN could **[*809]** conceivably need, it was clear that the true purpose of the app was to spy on Onavo users, and Apple would not allow it." CC ¶ 209; AC ¶ 260.

Facebook attempted to circumvent this removal by repackaging Onavo Protect as an application called "Facebook Research." CC ¶ 211; AC ¶ 262. However, when Apple uncovered this ruse in January 2019, Facebook immediately withdrew Facebook Research from the App Store. CC ¶ 212; AC ¶ 263. In a subsequent investigation of Facebook Research, Apple concluded that Facebook clearly had violated Apple's rules for the App Store. CC ¶ 212; AC ¶ 264.

Similarly, when the "surveillance functionality" of Onavo Bolt was discovered, Facebook immediately "shut that app down." AC ¶ 266.

By that time, however, Facebook already had used data acquired from Onavo to eliminate potential competitive threats. As explained in the following sections, Facebook copied the features of potential competitors identified through Onavo; acquired or attempted to acquire potential competitors identified through Onavo; and weakened potential competitors identified through Onavo by denying **[**145]** those competitors access to Facebook's Platform.

c. Facebook Copied the Features of Applications Identified Through Onavo and Acquired Several Applications Identified Through Onavo

Consumers and Advertisers both allege that, after identifying potential competitors through Onavo, Facebook copied or acquired several of its most successful potential competitors. Overall, Facebook acquired at least 63 companies since its founding in 2004 to approximately April 22, 2021. CC ¶ 157. In 2014, a senior executive at Facebook described this acquisition strategy as a "land grab." *Id.* ¶ 98. Mr. Zuckerberg later boasted that Facebook "can likely always just buy any competitive startups." *Id.* Accordingly, Facebook grew from a single social network service to a technology conglomerate. However, because all parties use the term "Facebook" when referring both to the social network service and the conglomerate, the Court follows that convention.

Consumers and Advertisers highlight that Facebook copied or acquired six social media applications. Both Consumers and Advertisers highlight Facebook's acquisitions of Instagram and WhatsApp and note that Facebook copied several of Snapchat's core features. Consumers **[**146]** also allege that Facebook copied Instagram's core feature before acquiring Instagram, that Facebook copied the core feature of Houseparty, and that Facebook acquired Giphy and tbh.

In the following sections, the Court discusses, in order, Facebook's conduct with respect to Instagram, Whatsapp, Snapchat, Houseparty, Giphy, and tbh.

i. Instagram

Instagram launched in October 2010 as a streamlined photo sharing system that encouraged users to share a single photo at a time. *See* CC ¶¶ 186-87; AC ¶¶ 268, 273. As explained by Advertisers, this feature was appealing to smartphone users who took photos often and shared them individually. AC ¶ 278. By contrast, Facebook's then-current photo sharing system was designed for bulk uploads and thus appealed to digital camera users. *Id.* Accordingly, because the increased popularity of smartphones meant that users were more likely to upload individual photos, Instagram posed a unique threat to Facebook. *Id.*

By December 2010, Instagram had been downloaded 1 million times, and by March 2012, Instagram had 27 million users. CC ¶¶ 187-88; AC ¶¶ 274-76. Although Instagram competed only in the Social Media Market, Facebook believed that Instagram had the potential **[**147]** to move into the Social **[*810]** Network Market because it could attract a large user base with its simple photo-sharing feature and then add other features after building up that base. CC ¶ 189; AC ¶ 279.

Thus, in 2011, Facebook started tracking Instagram through Onavo. CC ¶ 189; AC ¶ 268. According to Consumers, Facebook initially attempted to lessen the appeal of Instagram by copying Instagram's core feature. In June 2011, Facebook launched Facebook Camera, "a standalone app allowing users to shoot, filter, and share photos from their mobile device." CC ¶ 191. One Facebook employee called Facebook Camera "an Instagram clone." *Id.* Other members of the Facebook Camera team later admitted that their job was to "kill" Instagram. House Report at 153 n.882.

After Facebook Camera failed to catch on, Facebook decided to take more drastic measures. In February 2012, Facebook CEO Mark Zuckerberg met with Facebook CFO David Ebersman and proposed that Facebook acquire Instagram. House Report at 151-52. Mr. Ebersman asked Mr. Zuckerberg whether the purpose of the acquisition "would be to: (1) neutralize a potential competitor; (2) acquire talent; or (3) integrate Instagram's product with Facebook's to **[**148]** improve its service." *Id.* at 152.

Mr. Zuckerberg responded that the purpose would be "a combination of (1) and (3)." *Id.* Displaying his knowledge of the relevant barriers to entry, Mr. Zuckerberg stated that "there are network effects around social products and a finite number of different social mechanics to invent." *Id.* Accordingly, Mr. Zuckerberg explained, "[o]nce someone wins at a specific mechanic, it's difficult for others to supplant them without doing something different." *Id.* Mr. Zuckerberg added that "one way of looking at this is that what we're really buying is time" because, "[e]ven if some new competitors spring[] . . . up, buying Instagram, Path, Foursquare, etc . . . now will give us a year or more to integrate their dynamics before anyone can get close to their scale again." *Id.*

In March 2012, Mr. Zuckerberg told Facebook CTO Mike Schroepfer that "acquiring Instagram would provide the company with '[i]nsurance for Facebook's main product." AC ¶ 284. Then, in an April 5, 2012, meeting with Facebook employees, Mr. Zuckerberg stated that, because of "Instagram's rapid growth," Facebook would need to "dig [itself] out of a hole." *Id.* ¶ 285. He added that the "bad news is **[**149]** that [Instagram is] growing really quickly, they have a lot of momentum, and it's going to be tough to dislodge them." *Id.* ¶ 285; CC ¶ 190. In April 2012, Facebook offered to acquire Instagram for $1 billion. CC ¶ 192-94; AC ¶ 286. Consumers allege that, after Facebook made its initial offer, Mr. Zuckerberg threatened Instagram CEO Kevin Systrom that "[h]ow we engage now will determine how much we're partners vs. competitors down the line." CC ¶ 193. Following this conversation, Mr. Systrom spoke with a former Facebook executive, who stated that Mr. Zuckerberg would try to "destroy" Instagram if Instagram rejected Facebook's offer. *Id.*

Shortly thereafter, Instagram accepted Facebook's offer. CC ¶ 194; AC ¶ 286. Advertisers allege that, on March 6, 2019, Facebook announced that it would integrate Instagram and Facebook so that users of Instagram could connect with users of Facebook. AC ¶ 524.

ii. WhatsApp

WhatsApp is a messaging service that uses an internet connection, instead of a cellular network connection, to send text messages and photographs between cell phones. CC ¶ 201; AC ¶ 305. Unlike other messaging applications, WhatsApp "monetized **[*811]** its service through subscriptions for a nominal **[**150]** fee after the first year of use." House Report at 156. Indeed, in a blog post on the WhatsApp website, WhatsApp's founders stated that they strongly opposed advertising because "when advertising is involved **you the user** are the product." *Id.* (emphasis in original). They further explained:

> At every company that sells ads, a significant portion of their engineering team spends their day tuning data mining, writing better code to collect all your personal data, upgrading the servers that hold all the data and making sure that it's all being logged and collated and sliced and packaged and shipped out."

Id. Indeed, in June 2012, WhatsApp stated in its privacy policy that it did "not collect names, emails, location data, or the contents of messages sent through WhatsApp." *Id.*

By 2011, WhatsApp was one of the top twenty paid iPhone applications and by February 2013, WhatsApp had 200 million users. AC ¶¶ 307-09. After WhatsApp achieved initial success, Facebook started tracking WhatsApp through Onavo and discovered that WhatsApp "held third place in terms of user reach among mobile messenger apps for iPhone in the U.S. as of April 2013." *Id.* ¶ 310; CC ¶ 202. Data collected through Onavo also **[**151]** showed that users of WhatsApp sent more than double the messages of users of Facebook's similar Messenger service. AC ¶ 311; CC ¶ 202. As another example of WhatsApp's popularity, Onavo data showed that "WhatsApp reached 99.9% of the smartphone population in Spain." AC ¶ 316. According to Advertisers, Facebook understood this data to mean that WhatsApp had the "unique potential" to overcome the barriers to entry faced by most aspiring social network companies. *Id.* ¶¶ 320-23. Thus, as with Instagram, Facebook suspected that WhatsApp would pivot to being a social networking service after solidifying its core user base. *See id.*

In 2014, Facebook acquired WhatsApp. Although WhatsApp had lost $232 million during the first six months of 2014, Facebook's final purchase price was $22 billion. CC ¶ 203; AC ¶ 321. Accordingly, Consumers and Advertisers allege, Facebook's acquisition of WhatsApp did not make "economic sense" unless it was aimed at preventing WhatsApp from becoming a competitor to Facebook. CC ¶ 203; AC ¶ 321. Indeed, Facebook had paid "thousands of times WhatsApp's revenues" in order "to acquire a money-losing company that created software functionality Facebook itself already **[**152]** had as part of its own products." AC ¶ 321.

After the acquisition was finalized, Mr. Zuckerberg stated: "[w]e are absolutely not going to change plans around WhatsApp and the way it uses user data." House Report at 157. Shortly thereafter, the FTC advised Facebook "that WhatsApp 'must continue to honor' its privacy data security commitments to its users." *Id.*

When Facebook acquired WhatsApp in 2014, Facebook represented to European regulators that Facebook did not have the capability "to establish reliable automated matching between Facebook's users' accounts and WhatsApp users' accounts." AC ¶ 518. Advertisers equate this representation to a statement that Facebook would not be able to integrate WhatsApp. *See id.*

However, in an August 2016 update to WhatsApp's "terms of service and privacy policy," Facebook announced that it had the capability to "link[] WhatsApp users' phone numbers with Facebook users' identities." *Id.* Then, in December 2016, the European Commission found that Facebook had misled European regulators in 2014 because the "possibility of automatically matching Facebook and WhatsApp **[*812]** users' identities already existed in 2014." *Id.* On March 6, 2019, Facebook officially announced **[**153]** that it would begin the process of integrating Facebook and WhatsApp so that users of WhatsApp could connect with users of Facebook. *Id.* ¶ 524.

iii. Snapchat

Facebook also used Onavo to track Snapchat. CC ¶ 197; AC ¶ 166. Consumers explain that Snapchat allows users "to send each other communications—including text, photos, and videos—which appear only for a fixed period of time and then disappear." CC ¶ 196. By 2013, Snapchat was among the five most popular social media applications. *Id.* ¶ 202; AC ¶ 312.

Facebook attempted to acquire Snapchat in early 2013. Consumers allege that, before Facebook made an offer to Snapchat, Facebook tried to weaken Snapchat's position by launching an identical product called "Poke." CC ¶ 198. Then, when Facebook CEO Mark Zuckerberg met with Snapchat founder Evan Spiegel, Mr. Zuckerberg intimated that Facebook would "crush" Snapchat. *Id.* Spiegel, however, rejected Facebook's $3 billion offer. *Id.* ¶ 199; AC ¶ 298.

Having failed to acquire Snapchat, Facebook continued trying to weaken Snapchat. In "late 2016," Facebook copied Snapchat's "stories" feature, which allows a user to post a series of images and videos that remain online for twenty-four hours. CC **[**154]** ¶ 200; AC ¶ 298. According to Consumers, Facebook's version of "stories" was more popular than Snapchat's by April 2017. CC ¶ 200.

iv. Houseparty, Giphy, and tbh

Finally, Consumers allege that Facebook used Onavo to track at least three other social media applications and copied or acquired all three applications.

First, Facebook copied Houseparty, a video chat application that referred to itself as "the internet's living room." CC ¶ 204. Specifically, after Houseparty turned down Facebook's acquisition offer, "Facebook announced that its Messenger app would become a 'virtual living room.'" *Id.* ¶ 205. "Houseparty's active user base fell by half between 2017 and 2018." *Id.*

Second, in October 2017, Facebook acquired tbh, an "anonymous social media app." *Id.* ¶ 207. However, Facebook shut down tbh after less than a year. *Id.*

Third, in May 2020, Facebook acquired Giphy, an application that allows users to share animated images called "GIFs." *Id.* ¶ 206. Facebook paid $400 million for Giphy. *Id.*

d. Facebook Enticed Potential Competitors to Build Their Products Using Facebook's Platform Then Removed Access to the Platform

Consumers and Advertisers also allege that Facebook harmed potential competitors **[**155]** by convincing them to build their products using Facebook's Platform and then removing access to the Platform. Additionally, Advertisers allege that Facebook lied to the public about the reasons for removing access to the Platform. Below, the Court describes this conduct in detail.

i. Facebook Initially Allowed Third Party Developers to Use Facebook's Platform to Build Social Media Applications

In response to the competitive threat posed by mobile social media applications, Facebook decided to increase the number of applications available through Facebook. However, instead of building these applications itself, Facebook provided third party developers with access to the Facebook Platform, a set of tools that allowed developers to build applications that worked in conjunction with Facebook. CC ¶ 170; AC ¶ 99.

[*813] At the center of the Platform were Facebook's custom Application Programming Interfaces ("APIs"). CC ¶ 170; AC ¶ 101. In the computer programming field, an API is a prewritten piece of software code that allows a programmer to execute a complex task without having to write the code from scratch every time the programmer wants to perform the task. *See* *Google LLC v. Oracle Am., Inc., 141 S. Ct. 1183, 1191, 209 L. Ed. 2d 311 (2021)*. Facebook's APIs allowed programmers **[**156]** to communicate with the Facebook network and obtain Facebook data. CC ¶ 170; AC ¶ 101.

Consumers and Advertisers highlight two Facebook APIs that were particularly important for developing applications: the "Friends" API and the "Newsfeed" API. *See* CC ¶ 175; AC ¶ 126. The Friends API allowed a programmer to obtain information from Facebook about a particular Facebook user's friends. CC ¶ 174; AC ¶ 126. In turn, the "Newsfeed" API, which Advertisers also refer to as the "Timeline API," allowed a programmer to obtain information from Facebook about a user's news feed posts. CC ¶ 174; AC ¶ 128.

Advertisers provide a detailed explanation of how developers used these APIs. First, in accordance with Facebook's original plan, many developers used these APIs to build applications for Facebook itself. For example, developers built "social games that allowed [Facebook] users to play with and against each other." AC ¶ 114. These applications directly increased the value of Facebook by stimulating user engagement. *Id.*; CC ¶ 174. Second, Facebook created a way for developers building applications independent of Facebook to show advertisements to Facebook users. AC ¶¶ 118-19. Such developers could **[**157]** use the APIs to identify Facebook users who might like the developers' applications and show those users advertisements for the applications. *Id.* Every time a user downloaded an application because of an advertisement, the developer would pay Facebook a fee. *Id.* ¶ 120.

According to Advertisers, Facebook recognized that giving third parties access to the APIs had risks. Indeed, in a 2012 report to investors, Facebook stated that "Platform partners may use information shared by our users through the Facebook Platform in order to develop products or features that compete with us . . . As a result, our competitors may acquire and engage users at the expense of the growth or engagement of our user base, which may negatively affect our business and financial results." *Id.* ¶ 105.

Initially, Facebook determined that the benefits outweighed the risks. The 2012 report explained that "[e]ngagement with our Platform developers' apps and websites can create value for Facebook in multiple ways: our Platform supports our advertising business because apps on Facebook create engagement that enables us to show ads; our Platform developers may purchase advertising on Facebook to drive traffic to their **[**158]** apps and websites; Platform developers use our Payment infrastructure to facilitate transactions with users on personal computers; Platform apps share content with Facebook that makes our products more engaging; and engagement with Platform apps and websites contributes to our understanding of people's interest and preferences, improving our ability to personalize content." *Id.* ¶ 107.

However, as described in the following sections, Facebook eventually decided that the short-term benefits of allowing third party developers to access the Platform were not worth the risk that one of these developers might leverage Facebook's data to build a service that could compete directly with Facebook.

[*814] ii. In 2012, Facebook Covertly Decided to Threaten to Block Certain Selected Competitors

Towards the end of 2011 and continuing into 2012, Facebook CEO Mark Zuckerberg held discussions with other top Facebook executives about how to prevent third party developers from using Facebook APIs to build services that could compete with Facebook. CC ¶ 173; AC ¶ 126. Using data obtained through Onavo, Mr. Zuckerberg and other Facebook executives identified Line, WeChat, and Instagram as applications that relied **[**159]** on Facebook APIs and posed significant threats to Facebook. CC ¶ 173; AC ¶ 123.

Advertisers allege that, during these 2011 and 2012 meetings, Mr. Zuckerberg and the other Facebook executives "proposed modifying the APIs" to make them less useful. AC ¶ 127. Specifically, the group proposed modifying the Friends API so that a developer could not access "information about a user's friends (and the friends of their friends) unless that developer's application was already installed by a user's friends to begin with." *Id.* The group also proposed removing the Newsfeed API entirely. *Id.* ¶ 128.

Additionally, in mid-2012, Facebook began charging "major competitors" a premium for access to Facebook APIs. CC ¶ 176; AC ¶ 133. Facebook required "major competitors" to sign "reciprocity" agreements which obligated these competitors to provide Facebook with their own data. CC ¶ 176; AC ¶ 133. Most notably, Facebook required "reciprocity" from "Twitter, Instagram, Pinterest, and Foursquare." CC ¶ 176; AC ¶ 134.

Advertisers describe this tactic in further detail. Advertisers allege that, in August 2012, Facebook created an expanded list of competitors and proposed either demanding reciprocity from or banning **[**160]** these competitors. AC ¶ 136. Advertisers highlight an email from Facebook VP of Business and Marketing Partnerships David Fischer which observed that a "large part of the market for [Facebook's] network will come from current and potential competitors." *Id.* Mr. Fischer divided "current and potential competitors" into the following categories:

- Social network apps (Google+, Twitter, Path, etc.)
- Photo sharing apps (Picasa, Flickr, LiveShare, Shutterfly, etc.)
- Messaging apps (WhatsApp, Viber, Imo, KakaoTalk, etc.)
- Local apps (Google+ local, Google Offers, Yelp, yp, etc.)
- Social search apps (HeyStaks, Wajam, etc.)
- Platforms (Google Play, Amazon, etc.)

Id.

In the Fall of 2012, Mr. Zuckerberg formalized a plan to "limit the ability for competitive networks to use [Facebook's] platform without a formal deal in place." *Id.* ¶ 141 (internal citation omitted). As detailed in an October 2012 email from Facebook VP for Engineering Michael Vernal, the plan was to modify the key Friends and News Feed APIs to make them less useful, to provide competitors with API access only if the competitors agreed to "formal deals," and to require data reciprocity from all developers. *Id.* ¶¶ 141-42. Mr. Vernal **[**161]** later characterized the amount of data that Facebook would require from developers as "crazy." *Id.* ¶¶ 147, 151. In November 2012, Facebook VP of Global Operations Justin Osofsky provided the following summary of the plan:

> Policy changes: define competitive networks + require they have a deal with us, regardless of size. Maintain size-based thresholds for all other developers to force business deals. Require data **[*815]** reciprocity for user extended info to ensure we have richest identity.

Id. ¶ 143.

On November 19, 2012, Mr. Zuckerberg "broadly announced" to Facebook employees "his decision to block competitors or require full data reciprocity for continued access." *Id.* ¶ 145. However, instead of announcing the decision to the public, Mr. Zuckerberg "decided to enforce the decision selectively and covertly." *Id.* ¶ 153. Indeed, when Mr. Osofsky "pleaded with" Mr. Vernal "to make an announcement that would send a clear signal to developers," Mr. Vernal "responded that" Mr. Zuckerberg "had already rejected that approach." *Id.* ¶ 157.

In January 2013, Mr. Zuckerberg initiated the plan and "ordered that WeChat, Kakao, and Line be restricted from using the Friends and News Feed APIs and even from advertising **[**162]** on Facebook[]." *Id.* ¶ 154. Mr. Fischer protested that "blocking competitors even from the advertising platform was irrational and unworkable" and stated that Facebook "should be secure enough in the quality of [its] products to enable them to compete effectively in the open marketplace." *Id.* ¶ 155. Mr. Zuckerberg was not swayed. Indeed, later in January, Mr. Zuckerberg "ordered that Facebook competitor Vine be 'shut down' from Facebook's API and Platform, including from advertising." *Id.* ¶ 158. Over the next few months, Facebook demanded reciprocity agreements from Yahoo, Amazon, and Refresh.io. *Id.* ¶¶ 162, 164, 165.

The engineers responsible for Facebook's platform expressed serious concerns about Mr. Zuckerberg's plan. For example, in March 2013, Facebook Director of Engineering for Platform Douglas Purdy stated that the "post facto" nature of this conduct was unfair to the developers who had relied on Facebook. *Id.* ¶ 163. Specifically, Mr. Purdy stated: "The way we are structured today, you build an app on FB and then launch and then we may just shut you down, harming users and the developer." *Id.* Additionally, in August 2013, an engineer named Bryan Klimt stated in an email to Facebook **[**163]** Head of Developer Products Ilya Sukhar that the Friends API "is so core to the developer experience . . . that removing it would be ridiculous on its face." *Id.* ¶ 177. According to Mr. Klimt, there were no "solid technical reasons" to remove API access and the only purpose was a "protectionist grab to make sure no one else can make a competing social network." *Id.* ¶ 180. Mr. Klimt's email further asserted: "We're removing the core API in our developer platform. Out of concerns that someone will steal our social network product." *Id.*

iii. In 2015, Facebook Began to Grant API Access on a Discriminatory Basis Despite Contrary Public Statements

Consumers and Advertisers both allege that, in 2015, Facebook "cut off all public access to the Friends and News Feed APIs." CC ¶ 180; AC ¶ 225. However, Facebook continued to provide access to certain developers on the condition that those developers sign "Whitelist and Datasharing Agreements." CC ¶ 181; AC ¶ 225. Although these agreements allowed chosen developers to access non-public APIs, the agreements obligated developers to make advertising purchases from Facebook. CC ¶ 181; AC ¶¶ 217-18. According to Advertisers, Facebook made agreements in **[**164]** 2015 with the following developers: Tinder, Hinge, Netflix, Nissan, Lyft, Microsoft, Hootsuite, and Walgreens. AC ¶¶ 221, 223, 225. Although Advertisers allege that Facebook made similar agreements with "dozens" of other developers, Advertisers state that it is impossible to know "the precise number and identity" of those developers. *Id.* ¶ 226.

Advertisers provide further details about the process that led to Facebook's **[*816]** decision to remove public access to the APIs. In Summer 2013, Facebook determined that over 40,000 applications were using Facebook APIs. *Id.* ¶ 169. Using data obtained through Onavo, Facebook divided these applications into three categories: (1)

applications that "may cause negative press" if their access to APIs were shut down; (2) applications that "provide strategic value"; and (3) applications that were "competitive" or "not useful." *Id.* ¶ 170. As a direct result of this analysis, Facebook immediately decided to restrict all "lifestyle apps" from using the Friends API because Facebook was "ultimately competitive with all of them." *Id.* ¶ 171. Additionally, Facebook developed "a small list of strategic competitors that" Mr. Zuckerberg "personally reviewed" to determine **[**165]** whether they would receive API access. *Id.* ¶ 189.

Facebook continued to keep these changes as secret as possible. Specifically, Mr. Zuckerberg "decided to announce the API removal under the cover of a major change to the Facebook Platform . . . which would be announced at the next Facebook F8 developers conference." *Id.* ¶ 192. Accordingly, "Facebook's engineers were . . . instructed in September 2013 to bury the changes to the API." *Id.* Indeed, "[a]lthough Facebook knew that the APIs were going to be removed by the next F8 conference, it continued to tell developers to rely on them." *Id.* ¶ 194.

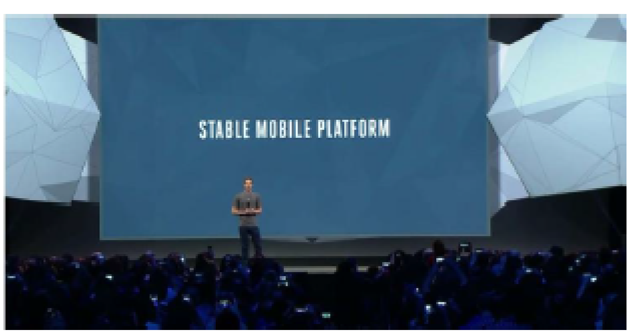
In January 2014, Facebook decided that it would be easier to remove API access from "[t]he bulk of the 41,191 that relied on the Friends or News Feed APIs" and decide on an individual basis which developers should be whitelisted. *Id.* ¶¶ 203-05. For example, "Facebook decided that it would whitelist Tinder and other anointed dating apps and shut down the rest." *Id.*

However, even after this decision was made, "Facebook continued to evangelize the APIs to developers." *Id.* ¶ 206. Indeed, in January 2014, an engineer named George Lee reported to Mr. Purdy and Mr. Vernal, Facebook employees were "still **[**166]** telling people to use" the APIs to build products. *Id.* One Facebook employee remarked that the decision to remove the APIs "seems a little unfair especially when our stance on some of these policies is that they're about ensuring trust[] and a great experience." *Id.* ¶ 208. Facebook Head of Developer Products Ilya Sukhar noted that developers would "get totally fucked," *id.* at 187, by Facebook's removal of the APIs and began referring to the removal as the "switcharoo plan," *id.* ¶ 207. In April 2014, Mr. Vernal remarked to Mr. Sukhar that if the reasons for removing the APIs became public, there would be a "high likelihood of breaking into jail." *Id.* ¶ 210.

On April 30, 2014, Facebook announced the removal of the APIs at the bottom of a long website post about changes to Facebook's Login system. *Id.* ¶ 211. After describing in detail the changes to Facebook's Login system, Facebook stated: "In addition to the above, we are removing several rarely used API endpoints; visit our changelog for details." *Id.* However, the APIs were not rarely used; five out of the top ten Facebook applications in December 2012 relied heavily on the APIs. *Id.* ¶ 212.

The same day, Mr. Zuckerberg took the stage **[**167]** at the F8 Conference and emphasized that Facebook's Platform was a "stable mobile platform":

[*817]



Id. ¶ 213. Mr. Zuckerberg did not mention that Facebook was removing API access. *Id.*

A year later, in April 2015, Facebook "cut off all public access to the Friends and News Feed APIs" and began providing API access only to certain whitelisted developers. *Id.* ¶ 225; CC ¶ 180. According to Advertisers, this practice persisted until April 4, 2018, when Facebook removed access to APIs entirely. AC ¶ 241.

In November 2019, NBC News published internal Facebook documents which revealed to the public Facebook's motivations for removing API access. *Id.* ¶ 516.

2. Consumers' and Advertisers' "Copy, Acquire, Kill" Claims Are Untimely

Because Consumers and Advertisers filed their complaint on December 3, 2020, they must allege that at least one "overt act" that was part of Facebook's "Copy, Acquire, Kill" strategy occurred after December 3, 2016. *See* *Klehr, 521 U.S. at 189*; *15 U.S.C. § 15b*. They must also allege that this overt act "meets two criteria: 1) It must be a new and independent act that is not merely a reaffirmation of a previous act; and 2) it must inflict new and accumulating injury on the plaintiff." *Samsung Elecs., 747 F.3d at 1202*.

Consumers contend that three **[**168]** overt acts that were part of Facebook's "Copy, Acquire, Kill" strategy occurred after December 3, 2016.[4] First, Consumers contend that Facebook "deceptively obtain[ed] data" using Onavo after December 3, 2016. Opp. at 8 (citing CC ¶¶ 209-13). Additionally, Consumers contend that Facebook "acquir[ed] additional competitors" after December 3, 2016. *Id.* (citing CC ¶¶ 206-07). This contention refers to Facebook's October 2017 acquisition of tbh and May 2020 acquisition of Giphy.

In turn, Advertisers contend that four overt acts that were part of Facebook's "Copy, Acquire, Kill" strategy occurred after December 3, 2016. First, similar to **[*818]** Consumers, Advertisers contend that Facebook "spied on users' mobile applications with Onavo spyware" after December 3, 2016. Opp. at 10 (citing AC ¶¶ 247-67). Second, Advertisers contend that Facebook "anticompetitively cloned Snapchat features . . . culminating in the cloned release of Instagram's 'stories' feature at the end of 2016." *Id.* (citing AC ¶¶ 298-99). Third, Advertisers contend that Facebook discriminatorily denied access to the "Platform" "at least until April 4, 2018." ***[**169]*** *Id.* (citing AC ¶¶ 234-44). Fourth, Advertisers contend that Facebook "continued back-end integration of Instagram and WhatsApp into 2020." *Id.* (AC ¶¶ 517-26). In the alternative, Advertisers contend that the limitations period should be tolled under the doctrine of fraudulent concealment. *Id.* at 13-14.

Below, the Court addresses: (1) Consumers' and Advertisers' argument about Facebook's use of Onavo; (2) Consumers' argument about Facebook's acquisitions of tbh and Giphy; (3) Advertisers' argument about Facebook's copying of Snapchat's "stories" feature; (4) Advertisers' argument about Facebook's "Platform"; (5) Advertisers' argument about Instagram and WhatsApp; and (6) Advertisers' fraudulent concealment argument.

a. Consumers and Advertisers Fail to Allege Any Facts That Allow the Court to Evaluate Whether Facebook's Use of Onavo After December 3, 2016 Inflicted a "New and Accumulating Injury"

Consumers and Advertisers both allege that Facebook's use of Onavo Protect was an integral part of the "Copy, Acquire, Kill" strategy and that Facebook collected data with Onavo Protect after December 3, 2016. CC ¶¶ 209-13; AC ¶¶ 247-67. Thus, Consumers and Advertisers contend, their "Copy, Acquire, **[**170]** Kill" claims are timely.

---

[4] Consumers' complaint could be read as alleging that Facebook's copying of Houseparty's video messaging feature occurred after December 3, 2016. Specifically, Consumers allege that, after Facebook copied Houseparty, "Houseparty's active user base fell by half between 2017 and 2018." CC ¶ 205. However, Facebook contends that Consumers' allegations with respect to Houseparty are insufficient, Mot. at 13, and Consumers provide no response, *see* Opp. at 8. Moreover, Consumers incorporate into their complaint an article which suggests that Facebook made plans to copy Houseparty prior to December 3, 2016. *See* CC ¶ 164 n.137; Betsy Morris & Deepa Seetharaman, *The New Copycats: How Facebook Squashes Competition from Startups*, The Wall Street Journal (Aug. 9, 2017), https://on.wsj.com/3qbF0tE. Thus, the Court need not address Consumers' allegations regarding Houseparty.

Opp. at 8, 10. In response, Facebook argues that Consumers and Advertisers fail to allege that Facebook's "deceptive access to data through Onavo is itself anticompetitive." *See* Reply at 4.

With an important caveat, the Court agrees with Facebook. As an initial matter, Facebook's use of Onavo Protect was deceptive, and Facebook made deceptive statements about Onavo Protect up until 2019. For example, Facebook and Onavo, which Facebook acquired in 2013, represented to users of Onavo Protect that Onavo Protect would keep their "data safe" and "[a]dd an extra layer of protection to all [their] mobile data traffic." CC ¶ 166; AC ¶ 252. To the contrary, Onavo Protect "monitored all web and mobile traffic application on a user's mobile device" and sent this data to Facebook. CC ¶ 166; AC ¶ 252. Onavo Protect collected users' data "whether screens were on or off, whether they used WiFi or cellular data, and even when the VPN was turned off." CC ¶ 210; AC ¶ 261. Facebook and Onavo also released a product called Onavo Bolt, "which locked apps behind a passcode or fingerprint while it covertly surveilled users—and sent Facebook the results." AC ¶ 266.

In 2018, Apple removed **[**171]** Onavo Protect from the App Store for violating Apple's "rules prohibiting applications from using data in ways far beyond what is required to run the app." CC ¶ 209; AC ¶ 260. Facebook attempted to circumvent this removal by deceptively repackaging Onavo Protect as an application called "Facebook Research," but Apple uncovered Facebook's deception in January 2019, and Facebook immediately removed Facebook Research from the App Store. CC ¶ 212; AC ¶ 263. Similarly, when the "surveillance functionality" of Onavo Bolt was discovered, Facebook immediately "shut that app down." AC ¶ 266.

However, neither Consumers nor Advertisers have alleged any facts to establish **[*819]** that Facebook used Onavo Protect to inflict "new and accumulating injury" after December 3, 2016. *Samsung Elecs., 747 F.3d at 1202*. Specifically, Consumers and Advertisers have not alleged how Facebook used data obtained through Onavo after December 3, 2016. Accordingly, they have failed to show how Facebook's use of Onavo was an overt act in furtherance of any theory of antitrust liability. Indeed, neither Consumers nor Advertisers identify any companies which Facebook tracked using Onavo after December 3, 2016. Nor do they specify whether any users of Facebook's **[**172]** social networking services also were users of Onavo Protect. To the contrary, Consumers' and Advertisers' allegations indicate that the purpose of Onavo Protect was to track users of other social media applications in order to determine which applications besides Facebook were the most popular. CC ¶ 164; AC ¶ 166.

Given the absence of allegations regarding how Facebook used Onavo data after December 3, 2016, the Court cannot evaluate whether Facebook's collection of data through Onavo inflicted a "new and accumulating injury." *Samsung Elecs., 747 F.3d at 1202*. Thus, the Court cannot conclude that Facebook's collection of data through Onavo after December 3, 2016 was an "overt act" that renders Consumers' and Advertisers' "Copy, Acquire, Kill" claims timely. *Id.*

b. Consumers Fail to Allege Any Facts Which Would Allow the Court to Evaluate Whether Facebook's Acquisitions of tbh and Giphy Inflicted "New and Accumulating Injury"

Consumers allege that Facebook's 2017 acquisition of tbh and 2020 acquisition of Giphy were part of Facebook's "Copy, Acquire, Kill" strategy. CC ¶¶ 206-07. Thus, Consumers contend, Consumers' "Copy, Acquire, Kill" claims are timely. Opp. at 8. Facebook argues that, when Facebook filed the instant **[**173]** motion, Facebook's acquisition of Giphy "ha[d] not yet been completed" and thus could not have harmed Consumers. Mot. at 13 n.8. Additionally, Facebook argues that Consumers have offered "no[] allegations to explain how the tbh acquisition lessened competition." Mot. at 13.

The Court agrees that Consumers fail to allege any facts which could allow the Court to determine whether Facebook's acquisitions of tbh and Giphy had anticompetitive effects. Typically, plaintiffs establish that an acquisition is anticompetitive by offering evidence about the "concentration of firms in [the relevant] market" before and after the acquisition. *See FTC v. H.J. Heinz Co., 246 F.3d 708, 715, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*. Alternatively, plaintiffs can offer direct evidence about the acquired firm to show that removing that firm as a competitor would have a particular anticompetitive effect. *See, e.g., United States v. Aetna Inc., 240 F. Supp. 3d 1,* 43 (D.D.C. 2017) (explaining that an acquisition that "would result in the elimination of a particularly aggressive competitor in a highly concentrated market" could be anticompetitive).

Here, Consumers have failed to offer either type of evidence. Consumers' complaint contains a single sentence about tbh: "Facebook acquired 'tbh'—an anonymous social media app—in October 2017." CC ¶ 207. In **[**174]** turn, although Consumers at least describe the nature of Giphy's business, Consumers provide no information about Giphy which could allow the Court to determine whether Facebook's acquisition of Giphy had anticompetitive effects.[5] **[*820]** *See id.* ¶ 206. Consumers do not, for example, provide any details about Giphy's revenue, user base, or plans for growth.

Given the absence of allegations regarding tbh's and Giphy's businesses, the Court cannot evaluate whether Facebook's 2017 acquisition of tbh and 2020 acquisition of Giphy inflicted a "new and accumulating injury" on Consumers. Samsung Elecs., 747 F.3d at 1202. Accordingly, the Court cannot conclude that those acquisitions were "overt acts" that render Consumers' "Copy, Acquire, Kill" claims timely. *Id.*

c. Advertisers Do Not Adequately Allege that Facebook's Copying of Snapchat Was an Overt Act That Occurred After December 3, 2016

Advertisers allege that "by late 2016," Facebook copied Snapchat's "stories" feature, which allows a user to post a series of images and videos that remain online for twenty-four hours. AC ¶ 298. Because this act was part of Facebook's "Copy, Acquire, Kill" strategy, Advertisers argue, Advertisers' **[**175]** "Copy, Acquire, Kill" claims are timely. Opp. at 10.

The Court rejects this argument. Because Advertisers filed their complaint on December 3, 2016, Advertisers' "Copy, Acquire, Kill" claims are timely only if Advertisers allege overt acts that were part of the "Copy, Acquire, Kill" strategy and occurred *after December 3, 2016.* Klehr, 521 U.S. at 189.

Advertisers' allegations, which state only that Facebook "had launched" a product that copied Snapchat "by late 2016," are insufficient to establish that Facebook copied Snapchat's stories feature after December 3, 2016 for two reasons. AC ¶ 298. First, Consumers' allegation that Facebook copied Snapchat's stories feature "by late 2016" is too vague to support a conclusion that Facebook copied Snapchat's stories feature after December 3, 2016. Second, Consumers' use of the word "launched" does not provide sufficient details about the actions Facebook took to copy Snapchat's stories feature.

Without more specific details, the Court cannot conclude that Facebook's copying of Snapchat's stories feature occurred after December 3, 2016. Thus, that act does not render Advertisers' "Copy, Acquire, Kill" claims timely. Klehr, 521 U.S. at 189.

d. Advertisers Do Not Adequately Allege that Facebook [176] Committed Overt Acts Related to Facebook's APIs After December 3, 2016**

Advertisers allege that, in 2015, Facebook "cut off all public access to the Friends and News Feed APIs" and discriminatorily allowed access only to developers who signed "Whitelist and Datasharing Agreements." AC ¶ 225. Accordingly, Advertisers contend, their "Copy, Acquire, Kill" claims are timely because Facebook continued this discriminatory practice "at least until April 4, 2018." Opp. at 10. For the reason below, the Court rejects this contention.

[5] As noted, Facebook asserts that, as of May 20, 2021, Facebook had not completed its acquisition of Giphy. Mot. at 13 n.8. Moreover, in November 2021, the UK's Competition and Markets Authority blocked Facebook's acquisition of Giphy. Morgan Meaker, *Meta's Failed Giphy Deal Could End Big Tech's Spending Spree*, Wired (Dec. 3, 2021), https://bit.ly/3tkoRUx. Any amended complaint should provide an update on the status of Facebook's acquisition of Giphy.

As an initial matter, Advertisers do not allege that Facebook granted or refused to grant any "Whitelist and Datasharing Agreements" after December 3, 2016. AC ¶ 241. Advertisers allege only that:

- In January 2015, Facebook provided Whitelist and Data Sharing Agreements to the dating apps Tinder and Hinge.
- In February 2015, Facebook refused to provide Airbiquity a Whitelist and Data Sharing Agreement.
- In February 2015, Facebook provided Whitelist and Datasharing Agreements to Netflix, Nissan, and Lyft.

[*821] • In April 2015, Facebook received requests for Whitelist and Data Sharing Agreements with Microsoft, Hootsuite, and Walgreens.

Id. ¶¶ 221-25. Although Advertisers also **[**177]** allege that "dozens of app developers entered into such Agreements with Facebook," Advertisers concede that the "precise number and identity" of these other developers "cannot be known." *Id.* ¶ 226. Moreover, because Advertisers' allegations are "bereft of any dates or details with regards" to Facebook's agreements with these other developers, they do not support Advertisers' argument that Facebook entered Whitelist and Datasharing Agreements after December 3, 2016. *Ryan v. Microsoft Corp., 147 F. Supp. 3d 868, 883 (N.D. Cal. 2015)*.

Because Advertisers have failed to allege that Facebook entered new Whitelist and Data Sharing Agreements after December 3, 2016, Advertisers have failed to allege that Facebook committed an "overt act" related to its discriminatory API restrictions during the limitations period. *Id. at 885*. Thus, those restrictions do not render Advertisers' "Copy, Acquire, Kill" claims timely. *Klehr, 521 U.S. at 189*.

e. Advertisers Do Not Adequately Allege that Facebook's Integration of Instagram and WhatsApp Inflicted a "New and Accumulating Injury"

Advertisers allege that, in 2019, Facebook officially announced that it planned to integrate Facebook, Instagram, and WhatsApp. AC ¶ 524. In essence, integrating Facebook, Instagram, and WhatsApp means that a user of one **[**178]** of those services will be able to communicate with users of the other services without making accounts for those services. *See* Mike Isaac, *Zuckerberg Plans to Integrate WhatsApp, Instagram and Facebook Messenger*, The New York Times (Jan. 25, 2019), https://nyti.ms/3zRQo0Q.[6] Accordingly, Advertisers contend, that their "Copy, Acquire, Kill" claims are timely because Facebook's plan to integrate Facebook, Instagram, and WhatsApp occurred after December 3, 2016 and is an overt act that is part of the Copy, Acquire, Kill strategy. Opp. at 10. For the reasons below, the Court rejects this argument.

Although Advertisers' argument is sparse, Advertisers appear to invoke the "new use" exception to the general rule that, when one firm acquires another firm, subsequent actions by the "merged firm" do not inflict new and accumulating injuries that allow a plaintiff to challenge the original acquisition. *See Midwestern Machinery Co., Inc. v. Northwest Airlines, Inc., 392 F.3d 265, 271-74 (8th Cir. 2004)* ("Even if the merger itself was unlawful, the continued existence of the merged entity is not a continuing violation: It is simply the natural unabated inertial consequence of the merger."). "Under the 'new use' exception, '[i]f assets are used in a different manner from the way that they **[**179]** were used when the initial acquisition occurred, and that new use injures the plaintiff, he or she has four years from the time that the injury occurs to sue.'" *See Free FreeHand, 852 F. Supp. 2d at 1188* (quoting *Midwestern Machinery, 392 F.3d at 273*). However, an important limitation is that the "new use" exception does not apply to an alleged "anti-competitive threat" that "was clear at the time of the merger." *Midwestern Mach., 392 F.3d at 273*. "Otherwise, every business decision could qualify as a continuing violation to restart the statute of limitations **[*822]** as long as the firm continued to desire to be merged." *Id. at 271*.

As an initial matter, Advertisers fail to explain why, when a firm acquires another firm, it is not "clear at the time" of the acquisition that the two firms are going to integrate. *Midwestern Mach., 392 F.3d at 273*. Indeed, a firm's

---

[6] The Court takes judicial notice of the article in order to aid its understanding of Advertisers' argument. *See* ***United States v. Black, 482 F.3d 1035, 1041 (9th Cir. 2007)***

acquisition of another firm is potentially anticompetitive *precisely because* the acquisition could result in a single firm that controls an undue share of the market. *See* H.J. Heinz Co., 246 F.3d at 719. Without additional facts or law, the Court cannot conclude that a firm's decision to integrate a purchased asset into its existing business generally is a "new use" that allows a plaintiff to challenge the original purchase.

Advertisers also fail to explain why, in this specific instance, Facebook's 2019 announcement **[**180]** about WhatsApp and Instagram satisfies the "new use" doctrine. Specifically, Advertisers highlight Facebook's 2014 representation that it would not be able to "establish reliable automatic matching between Facebook's users' accounts and WhatsApp users' accounts" and equates this representation to a statement that Facebook would not be able to integrate WhatsApp. *See* AC ¶ 518. Accordingly, Advertisers allege, it was not clear at the time of the acquisition that Facebook planned to integrate WhatsApp. *Id.* However, even if Advertisers are correct, Facebook publicly announced in August 2016 that it *would* be able to "link[] WhatsApp users' phone numbers with Facebook users' identities." *Id.* ¶ 518. Thus, under Advertisers' own logic, Facebook's plan to integrate WhatsApp was clear in August 2016.

In turn, Advertisers allege no facts which suggest that Facebook's plan to integrate Instagram was not clear at the time Facebook acquired Instagram.

Accordingly, the Court cannot conclude that Facebook's 2019 announcement of its plan to integrate Instagram and WhatsApp qualifies as "overt act" that inflicted "new and accumulating injury" after December 3, 2016. Samsung Elecs., 747 F.3d at 1202.

f. Advertisers Do Not Adequately Allege [**181] Tolling Under the Fraudulent Concealment Doctrine

Under the doctrine of fraudulent concealment, a "statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence." Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012). The purpose of the doctrine "is to prevent a defendant from 'concealing a fraud . . . until such time as the party committing the fraud could plead the statute of limitations to protect it.'" In re Animation Workers Antitrust Litig., 123 F. Supp. 3d 1175, 1194 (N.D. Cal. 2015) (quoting Bailey v. Glover, 88 U.S. (21 Wall.) 342, 349, 22 L. Ed. 636 (1874)). "To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have 'actual or constructive knowledge of the facts giving rise to its claim'; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim." *Id.* (quoting Hexcel, 681 F.3d at 1060). Additionally, the plaintiff must plead these elements with the particularity required by Rule 9(b). *Id.*

Advertisers argue that Facebook fraudulently concealed two sets of anticompetitive acts. First, Advertisers argue that Facebook "made false and misleading statements (and omissions) about the Instagram and WhatsApp mergers . . . to prevent discovery **[**182]** of the anticompetitive purposes of those mergers." Opp. at 14 (citing AC ¶¶ 517-26). Second, Advertisers argue that Facebook fraudulently concealed **[*823]** the anticompetitive nature of its API restrictions by stating false reasons for those restrictions. Opp. at 13-14 (citing AC ¶¶ 211-15, 491-92, 500-16). The Court addresses these arguments in turn.

i. Advertisers Fail to Allege that Facebook's 2014 Representation About WhatsApp Tolls Advertisers' "Copy, Acquire, Kill" Claims

Advertisers allege that Facebook fraudulently concealed the anticompetitive purpose of the WhatsApp acquisition by representing to European regulators in 2014 that Facebook did not have the means "to establish reliable automated matching between Facebook's users' accounts and WhatsApp users' accounts." AC ¶ 518. Advertisers equate this statement to a representation that Facebook would not be able to integrate WhatsApp. *Id.* Thus, Advertisers contend, Facebook's 2014 representation tolled the statute of limitations until 2019, when Facebook officially announced its plan to integrate WhatsApp. Opp. at 10.

However, as discussed, Facebook announced in August 2016 that it *did* have ability to match Facebook's users' accounts **[**183]** and WhatsApp users' accounts. *See* pp. 95-96, *supra*. Thus, even assuming that Facebook's 2014 statement to European regulators misled Advertisers about the anticompetitive purpose of the WhatsApp acquisition, Advertisers had "actual or constructive notice" of this purpose prior to December 3, 2016. *Hexcel, 681 F.3d at 1060*.

Moreover, Advertisers have failed to allege that they "acted diligently in trying to uncover the facts giving rise to [their] claim." *Id.* "Where a plaintiff's suspicions have been or should have been excited, there can be no fraudulent concealment where he [or she] 'could have then confirmed his [or her] earlier suspicion by a diligent pursuit' of further information." **[*824]** *Conmar Corp. v. Mitsui & Co. (U.S.A.), Inc., 858 F.2d 499, 504 (9th Cir. 1988)* (quoting *Rutledge v. Boston Woven Hose & Rubber Co., 576 F.2d 248, 250 (9th Cir. 1978)*). Advertisers fail to explain why Facebook's August 2016 announcement would not have "excite[d] the inquiry of a reasonable person." *Id.* Thus, because Advertisers failed to allege *any* facts that suggest they "acted diligently," Advertisers may not invoke the fraudulent concealment doctrine. *Hexcel, 681 F.3d at 1060*.

Thus, Advertisers have not adequately alleged that Facebook's 2014 statement to the European Commission renders Advertisers' "Copy, Acquire, Kill" claims timely under the fraudulent concealment doctrine. *Id.*

ii. Advertisers Allege [184] No Facts That Show Diligence Regarding Facebook's 2015 Decision to Remove Public Access to APIs**

Advertisers contend that Facebook made a series of misleading statements that concealed the anticompetitive purpose of Facebook's 2015 decision to remove public access to APIs. Opp. at 13-14. According to Advertisers, these statements prevented Advertisers from timely bringing the "causes of action asserted [in the instant case], which all require anticompetitive purpose and/or effect as necessary elements." *Id.* Facebook contends that Advertisers have failed to allege that they were misled by these statements, that Advertisers had actual or constructive notice of the conduct giving rise to their claims, and that Advertisers have failed to allege diligence. Mot. at 9-10. For the reasons below, the Court agrees with Facebook that Advertisers have failed to allege diligence.

"Where a plaintiff's suspicions have been or should have been excited, there can be no fraudulent concealment where he [or she] 'could have then confirmed his [or her] earlier suspicion by a diligent pursuit' of further information." *Conmar, 858 F.2d at 504* (quoting *Rutledge, 576 F.2d at 250*). "The requirement of diligence is only meaningful, however, when facts exist **[**185]** that would excite the inquiry of a reasonable person." *Id.*

As discussed, Advertisers' allegations regarding APIs center on Facebook's decision in 2015 to "cut off all public access to the Friends and News Feed APIs." AC ¶ 225. According to Advertisers, these APIs were so important to developers that Facebook's 2015 decision to remove public API access "simply br[oke] nearly all of the more than 40,000 third-party apps that relied on the APIs." *Id.* ¶ 214.

Advertisers do not allege that they were unaware of Facebook's 2015 decision to remove public access to APIs. Thus, even assuming that Facebook's decision to remove public API access did not itself give Advertisers "actual or constructive knowledge of the facts giving rise to [their] claim," Advertisers' knowledge of Facebook's decision obligated Advertisers to engage in a "diligent pursuit" of "further information." *Hexcel, 681 F.3d at 1060*. Indeed, Facebook's decision to remove public API access in 2015 is the core fact giving rise to Advertisers' claims and Advertisers fail to provide any explanation why this decision would not have "excite[d] the inquiry of a reasonable person." *Conmar, 858 F.2d at 504*.

Accordingly, because Advertisers have failed to allege any facts which suggest **[**186]** that they "acted diligently in trying to uncover the facts" about Facebook's decision to remove public access to APIs in 2015, Advertisers may not invoke the fraudulent concealment doctrine. *Hexcel, 681 F.3d at 1060*. Advertisers' complaint stands in stark contrast to the pleadings of plaintiffs who have successfully invoked the fraudulent concealment doctrine. For example, in *Animation Workers*, the plaintiffs brought a *Sherman Act* claim alleging that their former employers had "engaged in a conspiracy to fix and suppress employee compensation." *123 F. Supp. 3d at 1178-79*. In support of their argument that their employers had fraudulently concealed the conspiracy, the plaintiffs alleged that they had "repeatedly asked Defendants about how compensation was determined and what steps Defendants were taking to retain and attract talented employees." Second Amended Complaint ¶ 183, *In re Animation Workers Antitrust Litig.*, No. 14-CV-04062-LHK (N.D. Cal. May 15, 2015), ECF No. 121. The Court found that this allegation, combined with allegations describing specific instances in which the plaintiffs asked their employers about compensation, were sufficient to show diligence. *See Animation Workers, 123 F. Supp. 3d at 1204-05*. Although Advertisers do not necessarily need to provide this level of detail, Advertisers **[**187]** must allege *some* facts which suggest that they "acted diligently in trying to uncover the facts" about Facebook's removal of public access to its APIs. *Hexcel, 681 F.3d at 1060*.

Because Advertisers have failed to allege any facts about diligence, the Court need not decide what level of allegations would suffice. However, Advertisers' failure to allege diligence is fatal to their fraudulent concealment argument. *Id.*

Thus, the Court GRANTS Facebook's motion to dismiss Consumers' and Advertisers' "Copy, Acquire, Kill" claims. However, because the Court finds that additional allegations may cure the deficiencies outlined above, amendment would not be futile. *Leadsinger, 512 F.3d at 532*. Additionally, neither Consumers nor Advertisers have acted in bad faith, and allowing leave to amend would not unduly prejudice Facebook or cause undue delay. *Id.* Accordingly, the Court grants Consumers and Advertisers leave to amend their "Copy, Acquire, Kill" claims.

[*825] D. The Court Denies Facebook's Motion to Dismiss Advertisers' GNBA Claims

Facebook concedes that Advertisers' GNBA claims are timely. Additionally, Facebook does not dispute Advertisers' allegations that the GNBA was an unreasonable restraint of trade under *Section 1 of the Sherman Act* and exclusionary conduct under **[**188]** *Section 2 of the Sherman Act*. Instead, Facebook argues that Advertisers have not adequately alleged that the GNBA caused them a cognizable antitrust injury. *See* Mot. at 31-34. For the reasons below, the Court rejects this argument.

The Court begins by discussing Advertisers' allegations regarding the GNBA. The Court then explains why Advertisers have adequately alleged causal antitrust injury.

1. The Google Network and Bidding Agreement

In addition to alleging that Facebook maintained monopoly power by strategically eliminating potential competitors, Advertisers allege that Facebook preserved its monopoly power by agreeing with Google not to enter each other's market. This agreement, which Facebook and Google signed in 2018, was called the Google Network Bidding Agreement ("GNBA").

Prior to signing the GNBA, Facebook had taken steps to improve its general advertising capabilities. In 2013, Facebook acquired an advertising program called Atlas. AC ¶ 347. In addition to serving advertisements, Atlas tracked whether a user who clicked on an advertisement eventually purchased a product as a result. *Id.* ¶ 339. Facebook used Atlas to create a robust tracking system which allowed Facebook to determine whether a **[**189]** Facebook user purchased a product at an offline retail store after seeing an advertisement for that product on Facebook. *Id.* ¶¶ 341, 352. After purchasing and implementing Atlas, Facebook acquired a real-time bidding service called LiveRail. *Id.* ¶ 355.

In 2014, Facebook announced a new advertising system called the Facebook Audience Network ("FAN"). *Id.* ¶ 326. FAN allowed advertisers to use Facebook's granular targeting strategies to advertise not just on Facebook but also in mobile applications. *Id.* ¶ 327. Initially, FAN only showed advertisements to users who logged into mobile applications with their Facebook accounts. *Id.* ¶ 334. However, in May 2016, Facebook extended FAN to track Facebook users even when they did not login with Facebook accounts and to show targeted advertisements to those users. *Id.* ¶ 335. Indeed, on April 16, 2018, Facebook revealed in documents provided to Congress that Facebook tracks its users even when they are not logged into Facebook based on: (1) social plugins, such as the Like and Share buttons; (2) Facebook Login, which allows users to use their Facebook account to log into another website or app; (3) Facebook Analytics; and (4) Facebook ads and measurement **[**190]** tools. *Id.* ¶ 366.

These steps positioned Facebook to compete with Google, which provides advertising services on websites across the internet. *Id.* ¶ 369. Google's Ad Manager ("GAM") service helps websites who wish to sell advertising space to find companies who want to place advertisements on those websites. *Id.* ¶ 371. Google uses GAM both to find direct purchasers for advertising space and to sell advertising space to advertising exchanges, "where marketers bid for the [advertising space] in real time." *Id.* Google also operates its own advertising exchange, which is called Google Ad Exchange. *Id.* ¶ 375. Google charges companies fees when they purchase advertising space through Google Ad Exchange. *Id.*

[*826] However, while Facebook was getting better at providing advertisements outside its core applications, Google was getting better at determining the identities of people who visited the websites with which Google worked to sell advertising. From the beginning, Google could obtain basic information about people who visited websites that contracted with GAM or Google Ad Exchange. *Id.* ¶ 378. For example, Google could obtain such a person's "IP address, device identification information, or browser **[**191]** information." *Id.* ¶ 378. Then, in January 2014, Google acquired an artificial intelligence company called DeepMind. *Id.* ¶ 384. This technology allowed Google to "make granular identity determinations" from the basic data that Google had always collected. *Id.* ¶ 378. For example, Google used this information to "study a [person's] decisions and preferences" and make recommendations on its Google Play Store. *Id.* ¶¶ 385-86.

In 2017, Facebook made an overt threat to Google's business. By that time, websites that wanted to sell advertising space had "beg[u]n to adopt a practice called 'header bidding,'" which allowed websites to send a "standardized" advertising space "to several exchanges" at once. *Id.* ¶¶ 391-92. This practice "threatened to cut Google out of the picture" because it obviated the need to go through Google to place advertising space on advertising exchanges. *Id.* ¶ 393. "In March 2017, Facebook publicly announced it would support header bidding." *Id.* ¶ 395.

Following Facebook's announcement, Google reached out to Facebook to broker a deal. *Id.* ¶ 398. Then, in September 2018, Facebook and Google reached the GNBA. *Id.* ¶ 400. Under this agreement, Facebook agreed to drop its support **[**192]** for header bidding. *Id.* ¶ 401. In return, Google agreed that it would: (1) provide Facebook with powerful tools to identify, target, and monetize Facebook's own users on the web and across third party mobile applications and (2) give Facebook the right to show ads to 90% of Facebook's users and twice the amount of time to bid on advertising to Facebook's users. *Id.* ¶¶ 18, 405. Because this arrangement would enable Facebook to identify Facebook users across the internet, Facebook would have more data on those users and could better target advertisements to them. *Id.* ¶ 406.

"Put simply," Advertisers allege, "Google and Facebook agreed to divide and segment markets, allowing Facebook to continue charging a significant price premium for its targeted advertising sold in the Social Advertising Market." *Id.* ¶ 411.

2. Advertisers Adequately Allege that the GNBA Caused Them Injury

To state a claim under either *Section 1* or *Section 2 of the Sherman Act*, a plaintiff must allege causal antitrust injury. *See* *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)* ("In order to state a *Section 1* claim . . . plaintiffs must plead . . . . that they were harmed by the defendant's anti-competitive contract, combination, or conspiracy, and that this harm flowed from an 'anti-competitive aspect **[**193]** of the practice under scrutiny.'") (internal citation omitted); *SmileCare Dental, 88 F.3d at 783* ("In order to state a claim for monopolization under *Section 2 of the Sherman Act*, a plaintiff must prove . . . causal antitrust injury.") (internal quotation omitted). This requirement applies even if the plaintiff has alleged that the defendant's conduct is per se illegal. *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* ("[P]roof of a per se violation and of antitrust injury are distinct matters that must be shown independently.").

To plead causal antitrust injury, a plaintiff must allege that the defendant's unlawful conduct caused an injury "that **[*827]** flows" from the unlawful conduct and that is "the type the antitrust laws were intended to prevent." *Somers, 729 F.3d at 963*. Additionally, "the party alleging the injury must be either a consumer of the alleged violator's goods or services or a competitor of the alleged violator in the restrained market." *Id.* (quoting *Glen Holly, 343 F.3d at 1008*).

Because Advertisers allege that the GNBA allowed Facebook to maintain supracompetitive prices, Advertisers have adequately alleged a cognizable antitrust injury. Specifically, Advertisers allege that the GNBA prevented Google from "leverag[ing] its ability to identify and target Facebook users." AC ¶ 485. Thus, the GNBA "bolstered and reinforced **[**194]** Facebook's dominant position in the Social Advertising Market" and allowed Facebook "to maintain and raise prices with little or no competitive check." *Id.*

Indeed, Advertisers cite specific sources which show that Facebook's advertising prices "increased 122 percent" the year the GNBA was signed and "grew 90 percent" the year after the GNBA was signed. *Id.* ¶ 443. As this Court has explained, "charg[ing] Plaintiffs supracompetitive prices" is a "type of injur[y] that commonly satisf[ies] the antitrust standing requirement." *See Free FreeHand, 852 F. Supp. 2d at 1185*; *see also Glen Holly Ent., Inc. v. Tektronix, Inc., 352 F.3d 367, 374 (9th Cir. 2003)*; *Pool Water Prods. v. Olin Corp., 258 F.3d 1024, 1034 (9th Cir. 2001)* ("[T]he antitrust laws are only concerned with acts that harm 'allocative efficiency and raise[ ] the price of goods above their competitive level or diminish[ ] their quality.'" (quoting *Rebel Oil Co. v. ARCO, 51 F.3d 1421, 1433 (9th Cir. 1995)*)); *Abbyy USA Software House, Inc. v. Nuance Communs., Inc., No. 08-CV-01035, 2008 U.S. Dist. LEXIS 90308, 2008 WL 4830740, at *4 (N.D.Cal. Nov. 6, 2008)* (noting that direct purchasers of software would have antitrust standing stemming from injury of paying supracompetitive prices).

Additionally, Advertisers have adequately explained how Advertisers' injury "flow" from the GNBA. *Somers, 729 F.3d at 963*. Advertisers allege that, by 2018, Google had developed a way to determine the true identities of people who visited Google's partners' websites. *See* AC ¶¶ 377-86. Thus, Google was close to offering "a new, highly targeted form of advertising" **[**195]** that could compete with Facebook's social advertising business by providing companies with the opportunity to target people or groups with specific traits and interests. *Id.* ¶¶ 379-80. However, under the GNBA, Google agreed that, on Google's partners' websites, "Facebook would receive the right to show ads to 90% of the users it recognized as its own" and that, for the remaining 10%, Facebook would receive extra time to place bids. *Id.* ¶ 405. According to Advertisers, the primary effect of this agreement was to make it nearly impossible for companies to show online advertisements to Facebook users without negotiating with Facebook, even when those people are not using Facebook or Facebook-affiliated applications. *Id.* ¶ 406. Thus, "Facebook's users remained uniquely Facebook's to advertise to" and, if Advertisers wanted to reach those users, Advertisers "had to pay Facebook (at a premium)." *Id.* ¶ 409. By providing this description, Advertisers have adequately "sketch[ed] the outline of [the injury to competition] with allegations of supporting factual detail."' *Brantley, 675 F.3d at 1198* (quoting *Les Shockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 508 (9th Cir. 1989)*) (alteration in original).

Facebook's arguments to the contrary are unconvincing. Although Facebook cites *Intel Corporation v. Fortress Investment Group LLC, 511 F. Supp. 3d 1006 (N.D. **[*828]** Cal. 2021)*, to argue **[**196]** that Advertisers are required to "identify the competitive price," Mot. at 32, *Intel* imposes no such requirement. In *Intel*, the plaintiff brought a claim alleging that "companies who licensed [certain] patents from [the defendant] paid supracompetitive prices." *511 F. Supp. 3d at 1027*. However, because the terms of the relevant patent licenses were confidential, the plaintiff "provided no information" about the prices paid under the license agreements. *Id.* Accordingly, the court held that the plaintiff's allegations were too speculative to support an antitrust claim. *Id.*

In contrast to the *Intel* plaintiff, Advertisers have cited specific sources showing that Facebook's advertising prices "increased 122 percent" the year the GNBA was signed and "grew 90 percent" the year after the GNBA was signed. AC ¶ 433. Numerous courts have found similar allegations sufficient. For example, in *Free FreeHand*, the plaintiff supported its claim of supracompetitive prices by alleging that the defendant had raised its prices by 25% the year after committing the alleged antitrust violation. *See* First Amended Complaint ¶ 68, *Free FreeHand Corp. v. Adobe Systems Inc.*, No. 11-CV-02174-LHK (N.D. Cal. Jul. 20, 2011), ECF No. 19. This Court found that allegation **[**197]** sufficient to establish supracompetitive prices. *See* *Free FreeHand, 852 F. Supp. 2d at 1185*. Similarly, in *In re Magnesium Oxide Antitrust Litig., No. 10-CV-5943-DRD, 2011 U.S. Dist. LEXIS 121373, 2011 WL 5008090, at *6 (D.N.J. Oct. 20, 2011)*, the court found sufficient the plaintiffs' allegation "that they were 'injured by having paid more for [the product] than they otherwise would have paid.'" Thus, not only is there no authority for Facebook's argument that Advertisers must allege the "competitive price," there is ample authority showing that Advertisers' allegations regarding prices are sufficient.

Facebook also relies on *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, but that case is inapposite. In *Associated General Contractors*, a construction workers union brought antitrust claims on behalf of contractors and subcontractors who were members of the union. *Id. at 527-28*. The United States Supreme Court held that the union did not have standing to bring claims on behalf of its members. *Id. at 541*. Although the union alleged that it "suffered unspecified injuries in its 'business activities,'" the Court explained that it was "obvious that any such injuries were only an indirect result of whatever harm may have been suffered by 'certain' construction contractors and subcontractors." *Id. at 541-42*. Thus, *Associated General Contractors* merely provides that an entity that has no direct connection with an antitrust violator may not bring **[**198]** claims on behalf of entities who have suffered direct harm. By contrast, in the instant case, Advertisers allege that they are "consumer[s] of [Facebook's] goods or services" and have suffered direct harm because of the Facebook's anticompetitive acts. *See* *Somers, 729 F.3d at 963*. Facebook has not identified a case in which similarly situated plaintiffs have not been allowed to bring antitrust claims.

The remainder of Facebook's arguments involve complicated factual disputes. For example, Facebook argues that Advertisers' theory is implausible because there is no evidence that Google had the capability to peel customers away from Facebook. *See* Mot. at 33. However, this kind of factual dispute cannot be resolved at the pleading stage, and because Advertisers have "'raise[d] a reasonable expectation that discovery will reveal evidence of' an injury to competition," Advertisers' **[*829]** allegations regarding injury from the GNBA are sufficient. *Brantley, 675 F.3d at 1198* (citing *Twombly, 550 U.S. at 556*).

Accordingly, because Advertisers have adequately alleged causal antitrust injury, the Court DENIES Facebook's motion to dismiss Advertisers' GNBA claims.

E. The Court Grants Facebook's Motion to Dismiss Consumers' Unjust Enrichment Claim With Leave to Amend

In addition **[**199]** to alleging claims under the *Sherman Act*, Consumers allege a claim against Facebook for common law unjust enrichment. CC ¶¶ 308-17. Specifically, Consumers allege that Facebook obtained user data through "misrepresentations and deception" and that Facebook has made billions of dollars from selling this data. *Id.* ¶¶ 313-15.

However, as "this Court has repeatedly held, 'California does not recognize a separate cause of action for unjust enrichment.'" *Abuelhawa v. Santa Clara Univ., 529 F. Supp. 3d 1059, 2021 WL 1176689, at *9 (N.D. Cal. Mar. 29, 2021)* (quoting *Brodsky v. Apple Inc., 445 F. Supp. 3d 110, 132-33 (N.D. Cal. 2020)* (collecting California and federal cases)). California law is clear: "Unjust enrichment is not a cause of action." *De Havilland v. FX Networks, LLC, 21 Cal. App. 5th 845, 870, 230 Cal. Rptr. 3d 625 (Cal. Ct. App. 2018)* (quoting *Hill v. Roll Int'l Corp., 195 Cal. App. 4th 1295, 1307, 128 Cal. Rptr. 3d 109 (Cal. Ct. App. 2011)*). Thus, "courts have consistently dismissed stand-alone claims for unjust enrichment." *Brodsky, 445 F. Supp. 3d at 132*.

Accordingly, the Court GRANTS Facebook's motion to dismiss Consumers' Unjust Enrichment claim. Although the Court questions whether Consumers can cure the above deficiencies, the Court cannot conclude that amendment would be futile. *Leadsinger, 512 F.3d at 532*. Additionally, the Court cannot conclude that Consumers have acted in bad faith, or that allowing leave to amend would unduly prejudice Facebook or cause undue delay. *Id.* Therefore, the Court grants leave to amend.

IV. CONCLUSION

For the foregoing reasons, the Court GRANTS IN PART and DENIES IN PART Facebook's **[**200]** motion to dismiss.

Specifically, the Court GRANTS with leave to amend Facebook's motion to dismiss the following claims:

- Consumers' "Copy, Acquire, Kill" claims;
- Advertisers' "Copy, Acquire, Kill" claims; and
- Consumers' Unjust Enrichment claim.

The Court DENIES Facebook's motion to dismiss the following claims:

- Consumers' data privacy claims; and
- Advertisers' GNBA claims.

Plaintiffs shall file any amended consolidated complaints within 45 days of this Order. Failure to do so, or failure to cure deficiencies identified herein or identified in the instant motion to dismiss, will result in dismissal of the deficient claims with prejudice. Plaintiffs may not add new causes of action or add new parties without stipulation or leave of the Court. Plaintiffs are directed to file a redlined complaint comparing the complaint to any amended complaint as an attachment to Plaintiffs' amended complaint.

IT IS SO ORDERED.

Opinion

ORDER GRANTING MOTION TO REMAND

Re: Dkt. No. 14

I. INTRODUCTION

This is one of many cases filed against Defendant **[*2]** Celgene Corporation and its parent Defendant Bristol-Myers Squibb Company ("BMS") regarding Celgene's[1] efforts to protect the market for two of its prescription drugs, Thalomid and Revlimid, from generic competitors. After opting out of an earlier class action and having been dismissed from a case in Minnesota, Plaintiff Molina Healthcare, Inc. ("Molina") brought this action in the California Superior Court for the County of San Francisco,[2] asserting claims under the laws of twenty-three states, including California's Unfair Competition Law (the "UCL"). Defendants removed the case to this Court and move to transfer to the District of New Jersey or dismiss for lack of personal jurisdiction. Molina moves to remand. The Court finds the matter suitable for resolution without oral argument and VACATES the hearing previously set for January 28, 2022. For the reasons discussed below, Molina's motion to remand is GRANTED. The Court does not reach Defendants motions.[3]

II. BACKGROUND

A. Allegations of the Complaint

Molina, a corporation registered in Delaware and headquartered in Long Beach, California is the parent company of a number of regional subsidiaries that provide health insurance, including **[*3]** subsidiaries with names indicating they are based in or focused on California, Florida, Illinois, Kentucky, Michigan, Mississippi, Missouri, New Mexico, New York, Ohio, Puerto Rico, South Carolina, Texas, Utah, Idaho, Virginia, Washington, and Wisconsin. Compl (dkt. 1-1) ¶ 14.[4] Those subsidiaries assigned Molina their claims arising from reimbursing plan members' purchases of Thalomid and Revlimid in Alabama, Arizona, Colorado, Florida, Georgia, Illinois, Kansas, Michigan, Missouri, Mississippi, North Carolina, New Mexico, New York, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Washington, Wisconsin, and—of particular note for the purpose of the present motions—California and New Jersey. *Id.* ¶¶ 14-15. They asserted proper venue in the California Superior Court, where this case was filed, based on purchases in San Francisco. *Id.* ¶ 21.

Molina contends that Celgene has used a number of different strategies to prevent competitors from developing and selling generic versions of Thalomid and Revlimid.[5] First, Molina alleges that Celgene misused the FDA's "REMS" program, a regulatory mechanism for ensuring the safe distribution of prescription drugs, to prevent generic **[*4]** competitors from obtaining samples of Thalomid and Revlimid, in violation of the *Food and Drug Administration Amendments Act of 2007* (the "FDAAA"). *Id.* ¶¶ 95-105.

According to Molina, Celgene pretextually cited FDA approval and other safety concerns to avoid selling samples, or in some cases refused sales without explanation, to potential generic competitors including Mylan (which later obtained a $62 million settlement from Celgene), *id.* ¶¶ 106-56, Exela, *id.* ¶¶ 166-71, Lannett (which later reached a confidential settlement with Celgene), *id.* ¶¶ 172-92, Dr. Reddy's, *id.* ¶¶ 193-99, Teva, *id.* ¶¶ 200-03, Watson, *id.* ¶¶

---

[1] For simplicity, this order generally attributes the alleged conduct at issue to Celgene. Such references should not be construed as rejecting or otherwise addressing the contention that BMS can be held responsible for that conduct on a theory of agency or alter ego liability

[2] In state court, this action was assigned case number CGC-21-592178.

[3] The parties have consented to the jurisdiction of a magistrate judge for all purposes under *28 U.S.C. § 636(c)*.

[4] According to Celgene, each Molina subsidiary is incorporated and based in the state appearing in its name. Notice of Removal (dkt. 1) ¶ 9 n.5.

[5] Thalomid is a brand name for thalidomide, which caused severe birth defects when used as a sedative and anti-nausea medication in the 1950s and 1960s, but for which Celgene found new uses to treat multiple myeloma and a particular complication of leprosy. *See* Compl. ¶¶ 1-3. Revlimid is a brand name for lenalidomide, "a thalidomide analog" used to treat multiple myeloma and other specific conditions. *Id.* ¶ 3.

204-09, and Sandoz, *id.* ¶¶ 210-15. Molina alleges that Celgene also used exclusive contracts with its suppliers and other anticompetitive tactics to prevent generic competitors from entering the market. *Id.* ¶¶ 224-39.

Molina further alleges that Celgene obtained a number of patents through repeated fraud on the U.S. Patent and Trademark Office, *id.* ¶¶ 240-323, by pursuing sham patent litigation against competitors and obtaining anticompetitive settlement agreements, *id.* ¶¶ 331-439, and by filing baseless citizen petitions to the FDA, *id.* ¶¶ 324-30.

Molina contends that as a result of that conduct, Celgene has maintained **[*5]** monopoly power in the market for Thalomid and Revlimid, resulting in Molina's subsidiaries paying higher reimbursement prices when their plan members purchase those drugs. *See id.* ¶¶ 440-66.

Molina's first claim is for "Monopolization and Monopolistic Scheme" in violation of California's UCL, as well as similar statutes of Arizona, Florida, Illinois, Michigan, Mississippi, New Mexico, New York, North Carolina, Oregon, Utah, Vermont, and Wisconsin. *Id.* ¶¶ 467-73. Molina's second claim is for attempted monopolization in violation of the laws of the same states (except Vermont). *Id.* ¶¶ 474-79. Its third claim is for unfair and deceptive trade practices in violation of California's UCL and the laws of Arizona, Colorado, Florida, Illinois, Kansas, Michigan, Mississippi, Missouri, New Mexico, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Utah, and Wisconsin. *Id.* ¶¶ 480-83. Molina's fourth and final claim is for unjust enrichment under the laws of Alabama, Arizona, California, Colorado, Florida, Georgia, Illinois, Kansas, Michigan, Missouri, Mississippi, North Carolina, New Jersey, New Mexico, New York, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Washington, **[*6]** and Wisconsin. *Id.* ¶¶ 484-95. Molina seeks monetary relief as well as a declaration that Celgene's conduct at issue is unlawful. *See id.* at 99 (prayer for relief).

B. Notice of Removal

Defendants removed to this Court after being served with Molina's complaint. Notice of Removal (dkt. 1) ¶ 6. Defendants assert that this Court has federal question jurisdiction under *28 U.S.C. § 1331* because Molina's claims for monopolization and attempted monopolization under the UCL necessarily turn on violations of the federal *Sherman Act*, *id.* ¶ 13, and because its claims implicate a number of issues of federal law pertaining to prescription drug regulation and the prosecution and enforcement of patents, *id.* ¶ 14. Defendants also assert that the Court has diversity jurisdiction under *28 U.S.C. § 1332(a)(1)*, arguing that Molina (which shares Delaware citizenship with Celgene and BMS) is not itself a real party in interest because its claims are based solely on its subsidiaries' injuries and were collusively assigned to evade jurisdiction, that Molina's New York subsidiary (which shares New York citizenship with BMS) is not a proper party because it has no connection to California, and that BMS is fraudulently joined as a defendant because Molina has **[*7]** alleged no wrongdoing by BMS. *Id.* ¶¶ 18-21.

C. Prior and Ongoing Litigation in New Jersey

Mylan sued Celgene under the *Sherman Act* and New Jersey law in the District of New Jersey in 2014, in a case assigned to the Honorable Esther Salas, who ruled on a motion to dismiss and a motion for summary judgment. *See Mylan Pharms., Inc. v. Celgene Corp., No. CV 14-2094 ES, 2014 U.S. Dist. LEXIS 182222, 2014 WL 12810322 (D.N.J. Dec. 23, 2014)* (granting in part and denying in part a motion to dismiss); *Mylan Pharms. Inc. v. Celgene Corp., No. CV 14-2094 (ES)(MAH), 2018 U.S. Dist. LEXIS 242826, 2018 WL 11299447 (D.N.J. Oct. 3, 2018)* (granting in part and denying in part a motion for summary judgment). Mylan and Celgene settled in 2019. *Mylan Pharms. v. Celgene Corp.*, No. CV 14-2094, ECF Doc. No. 425 (D.N.J. Aug. 9, 2019).

Also in 2014, indirect purchasers of Thalomid and Revlimid sued Celgene under state and federal antitrust and unfair competition law in the District of New Jersey in a case assigned to the Honorable Madeline Cox Arleo, which reached a class settlement in 2020 after Judge Arleo denied without prejudice a motion for class certification in 2018. *In re Thalomid & Revlimid Antitrust Litig., No. CV 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118 (D.N.J. Oct. 30, 2018)* (denying class certification); *In re Thalomid & Revlimid Antitrust Litig.*, No. CV 14-6997, ECF

Doc. No. 325 (D.N.J. Oct. 2, 2020) (granting final approval of class settlement). Molina, among other health insurance companies, opted out of that class.

Several cases filed by health insurers that opted out **[*8]** of the class action before Judge Arleo are now pending before Judge Salas. The first of those, filed by Humana Inc. in 2019 in the District of New Jersey, features a complaint largely identical to Molina's complaint here (although it also asserts federal claims), and currently has a motion to dismiss under submission. *Humana Inc. v. Celgene Corp.*, No. 2:19-cv-07532-ES-MAH (D.N.J.); Greenblum Decl. (dkt. 19) Ex. C.

In March of 2020, United HealthCare Services, Inc. filed a nearly identical complaint in the District of Minnesota, which that court transferred to the District of New Jersey later that year. *United HealthCare Servs. v. Celgene Corp., No. CV 20-686 (DSD/ECW), 2020 U.S. Dist. LEXIS 226940, 2020 WL 7074626 (D. Minn. Dec. 3, 2020)* (subsequently assigned case number 2:20-cv-18531-ES-MAH in the District of New Jersey). In June of 2021, Judge Salas administratively terminated a motion to dismiss in that case pending resolution of the motion to dismiss in *Humana*.

Molina and other insurers including BCBSM, Inc. (d/b/a Blue Cross Blue Shield of Minnesota) filed a nearly identical complaint in Minnesota state court in August of 2020. Greenblum Decl. Ex. E. After Celgene removed to the District of Minnesota, that court dismissed Molina (the only non-diverse plaintiff) for lack of personal jurisdiction over its claims and **[*9]** transferred the case to New Jersey. *BCBSM, Inc. v. Celgene Corp., No. 20-cv-02071 (SRN/ECW), 2021 U.S. Dist. LEXIS 52785, 2021 WL 1087662 (D. Minn. Mar. 22, 2021)* (subsequently assigned case number 2:21-cv-06668-ES-MAH in the District of New Jersey). Other insurers filed nearly identical complaints in the District of Columbia and the Eastern District of Pennsylvania, but stipulated to transfer those cases to New Jersey after the transfer motions were decided in *UnitedHealthcare* and *BCBSM. See generally Blue Cross & Blue Shield Assoc. v. Celgene Corp.*, No. 2:21-cv-10187-ES-MAH (D.N.J.); *Cigna Corp. v. Celgene Corp.*, No. 2:21-cv-11686-ES-MAH (D.N.J.).

The parties in *BCBSM, Blue Cross*, and *Cigna* have stipulated to extend Celgene's deadline to respond to those complaints pending resolution of the motions to dismiss in *Humana* and *UnitedHealthcare*.

From 2007 through 2018, Celgene filed a number of patent infringement cases against various potential competitors in the District of New Jersey, assigned to the Honorable Susan Wigenton. *See, e.g., Celgene Corp. v. Barr Labs., Inc.*, No. 07-cv-00286-SDW-MCA (D.N.J.); *see generally* Mot. to Transfer (dkt. 18) at 5 (listing cases). Here, Molina relies on those purportedly sham cases as one basis for liability. The *Barr Laboratories* case also included antitrust counterclaims **[*10]** that substantially overlap with Molina's allegations here.

D. The Parties' Arguments

1. Motion to Transfer

Defendants move to transfer the case to the District of New Jersey, arguing that transfer is appropriate to resolve first, leaving the remaining motions for the District of New Jersey to resolve. *See* Mot. to Transfer (dkt. 18) at 2, 17-19. Molina argues that courts generally consider subject matter jurisdiction, including motions to remand, before turning to other issues, and this case does not warrant an exception. Opp'n to Transfer (dkt. 29) at 5-10. Defendants respond that to the Court is not required to address remand before transfer, and that the circumstances of the case favor transferring it to New Jersey first to allow that court to consider whether to remand. Reply re Transfer (dkt. 36) at 12-15.

According to Defendants, the pending related cases by other parties that opted out of the *In re Thalomid & Revlimid* class action strongly favor transfer of this case to be heard by the same court. Mot. to Transfer at 9, 11-13. They also argue that most relevant witnesses are in or near New Jersey, there is no significant nexus between this forum and Molina's claims, and Molina's **[*11]** choice of forum is entitled to minimal deference because it is not a resident of this district and initially sought to pursue its claims elsewhere. *Id.* at 9-10, 13-15. Molina does not dispute that the District of New Jersey would be one of many appropriate venues if the case fell within federal subject matter jurisdiction (which Molina disputes), but argues that its choice of forum is entitled to deference, that both Molina and Celgene have offices in this district, that transfer would merely shift burdens from Defendants to Molina, and that Defendants have not sufficiently supported their position that most relevant witnesses are located in or near New Jersey. Opp'n to Transfer at 11-16 & n.5. Molina contends that the District of New Jersey has a more crowded docket than this Court, and that although there are several related cases in New Jersey, the fact that they are assigned to a handful of different judges and the existence of other related cases in other courts undermine Defendants' argument that transfer would promote efficiency or avoid inconsistent judgment. *Id.* at 17-18. Molina argues that counsel could ensure that the cases are coordinated even if tried in different forums. **[*12]** *Id.* at 18. Molina also argues that this Court has more familiarity with the law applicable to its California claims, and asserts—incorrectly—that it brings no claim under New Jersey state law. *Id.* at 18-19; *cf*. Compl. ¶ 492 (asserting a claim for unjust enrichment under the law of New Jersey, among other states).

2. Motion to Remand

Molina moves to remand because it "asserts only state law claims and there is not complete diversity between the parties." Mot. to Remand (dkt 14) at 1. Molina argues that its references to federal law do not make its state law claims effectively federal claims. *Id.* at 6-8. It contends that its UCL claims do not turn on federal law because it can prevail on the "unfair" prong of that statute without showing a violation of any other law, *id.* at 8-9, and that its request for declaratory judgment implicates only state law, *id.* at 9-10. Even if its claims implicated federal law, it argues that no federal issue is either actually disputed or substantial. *Id.* at 10-11. Molina contends that allowing Defendants' removal of this case to stand would disrupt the balance of responsibility between state and federal courts. *Id.* at 12.

Defendants argue that Molina's UCL **[*13]** claims for monopolization necessarily raise disputed and substantial issues of federal law because such a theory requires showing a violation of the *Sherman Act*, Opp'n to Remand (dkt. 24) at 7-14, and that Molina's prayer for declaratory relief that the alleged conduct is unlawful necessarily raises federal issues because Molina has alleged violations of federal law, *id.* at 14-18. Defendants clarify in their opposition brief that they do not assert federal question jurisdiction based on complete preemption of state law, but instead based on federal questions necessarily raised by Molina's claims under state law. Opp'n to Remand at 7 n.2.

Turning to Defendants' assertion of diversity jurisdiction, Molina argues that it is the real party in interest because its subsidiaries irrevocably and completely assigned their interests to Molina, and courts have recognized such complete assignments as destroying diversity jurisdiction even where the assignors retained a financial interest in the outcome of litigation. Mot. to Remand at 12-14. Since Molina shares Delaware citizenship with both Celgene and BMS, accepting Molina as the real party in interest would defeat diversity jurisdiction. *See id.* at 14. **[*14]** Defendants respond that the Court should disregard Molina's subsidiaries' assignments as collusive and intended to manipulate jurisdiction. Opp'n to Remand at 19-22. Molina contends that the authority on which Defendants rely for that proposition applies only to assignments to *create* diversity jurisdiction, partial rather than complete assignments, or cases initially filed in federal court. Reply re Remand (dkt. 35) at 10-13.

Molina argues that even if the Court considers its subsidiaries to be the real parties in interest, there is not complete diversity of citizenship because its New York subsidiary shares New York citizenship with BMS, and Defendants cannot show that BMS was fraudulently joined because a state court might hold BMS liable for its subsidiary Celgene's conduct under a theory of agency. Mot. to Remand at 14-15. Molina contends that any question of personal jurisdiction as to the New York subsidiary's claims should be reserved for after this Court determines subject matter jurisdiction, and thus should be left for the state court to decide after remand, because the personal jurisdiction issue is complex and would not resolve the case as a whole. Mot. to Remand at 16-18. **[*15]** Defendants argue that the complaint as written includes no allegations or claims against BMS, and that the California court clearly lacks personal jurisdiction as to the New York subsidiary's claims. Opp'n to Remand at 22-25. Molina responds that the test for fraudulent joinder is not whether its complaint states a viable claim, but instead whether Molina's inability to do so is sufficiently clear that it would not be entitled to leave to amend, and argues that Defendants have not met their burden under that standard. Reply re Remand at 13-14.

3. Motion to Dismiss

Defendants move to dismiss all claims against them for lack of personal jurisdiction, tailoring separate arguments to: (1) claims under the laws of states besides California, Mot. to Dismiss (dkt. 22) at 6-8; (2) California claims against Celgene, *id.* at 9-16; and (3) claims against BMS, *id.* at 16-18. Molina opposes dismissal, or in the alternative seeks leave to conduct jurisdictional discovery. *See generally* Opp'n to Dismissal (dkt. 32). Because the Court does not reach this motion, this order does not address the parties' arguments in detail.

III. ANALYSIS

A. Legal Standard for Remand

Federal courts have limited subject matter **[*16]** jurisdiction, and may only hear cases falling within their jurisdiction. Generally, a defendant may remove a civil action filed in state court if the action could have been filed originally in federal court. *28 U.S.C. § 1441*. The removal statutes are construed restrictively so as to limit removal jurisdiction. *Shamrock Oil & Gas Corp. v. Sheets, 313 U.S. 100, 108-09, 61 S. Ct. 868, 85 L. Ed. 1214 (1941)*. The Ninth Circuit recognizes a "strong presumption against removal." *Gaus v. Miles, Inc., 980 F.2d 564, 566 (9th Cir. 1992)* (citation and internal quotation marks omitted). Any doubts as to removability should generally be resolved in favor of remand. *Matheson v. Progressive Specialty Ins. Co., 319 F.3d 1089, 1090 (9th Cir. 2003)*. The defendant bears the burden of showing that removal is proper. *Valdez v. Allstate Ins. Co., 372 F.3d 1115, 1117 (9th Cir. 2004)*.

B. Legal Standard for Transfer Under *§ 1404(a)*

A case may be transferred "[f]or the convenience of parties and witnesses, in the interests of justice," to "any other district or division where it might have been brought." *28 U.S.C. § 1404(a)*. There are two prongs to this analysis. First, the transferee district must be a district where the case could have originally been filed, meaning the court has jurisdiction and venue is proper. *Wireless Consumers Alliance, Inc. v. T-Mobile USA, Inc., No. 03-3711 (MHP), 2003 U.S. Dist. LEXIS 26802, 2003 WL 22387598, at *1 (N.D. Cal. Oct. 14, 2003)*. The moving party bears the burden to prove this first step. *Commodity Futures Trading Comm'n v. Savage, 611 F.2d 270, 279 (9th Cir. 1979)*. If the first prong is satisfied, the court decides whether to grant or deny a motion to transfer, balancing "the plaintiff's interest to freely choose a litigation **[*17]** forum against the aggregate considerations of convenience of the defendants and witnesses and the interests of justice." *Wireless Consumers, 2003 U.S. Dist. LEXIS 26802, 2003 WL 22387598, at *1*; *28 U.S.C. § 1404(a)*. Some factors a court may consider include:

> (1) plaintiff's choice of forum; (2) convenience of the parties; (3) convenience of the witnesses; (4) ease of access to the evidence; (5) familiarity of each forum with the applicable law; (6) feasibility of consolidation with other claims; (7) any local interest in the controversy; and (8) the relative court congestion and time of trial in each forum.

*Royal Queentex Enters. v. Sara Lee Corp., No. C-99-4787 MJJ, 2000 U.S. Dist. LEXIS 10139, 2000 WL 246599, at *2 (N.D. Cal. Mar. 1, 2000)* (citing *Decker Coal Co. v. Commonwealth Edison Co., 805 F.2d 834, 843 (9th Cir. 1986)*). The specific factors that are relevant may vary depending on the "particular case." *See* *Jones v. GNC Franchising, Inc., 211 F.3d 495, 498-99 (9th Cir. 2000)* (listing "example[s]" of factors "the court may consider" in a contract case).

C. The Court Has Discretion to Transfer Without Resolving Jurisdiction

The parties dispute whether this Court must address subject matter jurisdiction and Molina's motion to remand before deciding Defendants' motion to transfer.

The Court is aware of no binding authority specifically addressing whether a district court may decide a motion to transfer under *§ 1404(a)* before resolving a motion to remand. Addressing the related context of *forum non conveniens*, the Supreme Court has held that because dismissal **[*18]** under that doctrine does not adjudicate the merits of a case, a "district court therefore may dispose of an action by a *forum non conveniens* dismissal, bypassing questions of subject-matter and personal jurisdiction, when considerations of convenience, fairness, and judicial economy so warrant." *Sinochem Int'l Co. v. Malaysia Int'l Shipping Corp., 549 U.S. 422, 432, 127 S. Ct. 1184, 167 L. Ed. 2d 15 (2007)*. "'[J]urisdiction is vital only if the court proposes to issue a judgment on the merits.'" *Id. at 431* (quoting *Intec USA, LLC v. Engle, 467 F.3d 1038, 1041 (7th Cir. 2006)*) (alteration in original). Although the more typical course is to address jurisdiction first, "where subject-matter or personal jurisdiction is difficult to determine, and *forum non conveniens* considerations weigh heavily in favor of dismissal, the court properly takes the less burdensome course." *Id. at 436*.

Molina quotes *Potter v. Hughes, 546 F.3d 1051 (9th Cir. 2008)*, for the proposition that "'*[o]nly where* the other issue itself creates the jurisdictional issue . . . or the resolution of the issue is clear while the jurisdictional issue is difficult . . . is it appropriate for the court to proceed without confirming jurisdiction.'" Opp'n to Transfer at 6 (quoting *Potter, 546 F.3d at 1061* (Ikuta, J., dissenting)) (ellipses and emphasis added in Molina's brief). Molina neglects to note that the quotation at issue comes from a dissent, and that the precedential decision **[*19]** by the majority not only chose to reach other threshold issues without resolving jurisdiction, but expressly disagreed with the dissent's treatment of *Sinochem* as describing the *only* circumstances where other issues may be decided before jurisdiction. *Potter, 546 F.3d at 1056 n.2*. Regardless, assuming for the sake of argument that it is an accurate statement of law, the dissent's framing of the issue still leaves room to determine other threshold issues first where they are clear and the issue of jurisdiction is not.

It is true that "[m]ost courts, when faced with concurrent motions to remand and transfer, resolve the motion to remand prior to, and/or to the exclusion of, the motion to transfer." *Pac. Inv. Mgmt. Co. LLC v. Am. Int'l Grp., Inc., No. SA CV 15-0687-DOC, 2015 U.S. Dist. LEXIS 75355, 2015 WL 3631833, at *4 (C.D. Cal. June 10, 2015)*. Under the reasoning of *Sinochem*, however, courts are not *required* to do so if the circumstances of a particular case warrant a different approach, because transfer to a different district "does not entail any assumption by the court of substantive 'law-declaring power.'" *Sinochem, 549 U.S. at 433* (quoting *Ruhrgas AG v. Marathon Oil Co., 526 U.S. 574, 584, 119 S. Ct. 1563, 143 L. Ed. 2d 760 (1999)*). To the extent district court decisions or pre-*Sinochem* authority suggests otherwise, this Court respectfully disagrees that a rule requiring determination of subject matter jurisdiction before considering a motion to transfer is consistent with that decision of **[*20]** the Supreme Court. *See, e.g., Vu v. Ortho-McNeil Pharm., Inc., 602 F. Supp. 2d 1151, 1153 (N.D. Cal. 2009)* (quoting *Bookout v. Beck, 354 F.2d 823, 825 (9th Cir. 1965)*, for the rule that "jurisdiction must be first found over the subject matter and the person before one reaches venue")).

D. Here, Jurisdiction Should Be Resolved Before Transfer

Although a court may in appropriate circumstances transfer a case before resolving a challenge to subject matter jurisdiction, this is not such a case.

In the context of cases removed from state court and potentially related to multidistrict litigation under *28 U.S.C. § 1407*, some courts considering whether to defer a motion to remand to the transferee court "(1) 'give preliminary scrutiny to the motion to remand'; (2) assess whether 'the jurisdictional issue appears factually or legally difficult'; and (3) consider whether the 'jurisdictional issue is both difficult and similar or identical to those in cases transferred or likely to be transferred.'" *Ernyes-Kofler v. Sanofi S.A., No. 5:16-cv-07307-EJD, 2017 U.S. Dist. LEXIS 29954, 2017 WL 813506, at *1 (N.D. Cal. Mar. 2, 2017)* (quoting *Meyers v. Bayer AG, 143 F. Supp. 2d 1044, 1049 (E.D. Wis. 2001)*). This standard is generally consistent with *Sinochem*'s framing of circumstances where addressing transfer before jurisdiction may be permissible, and by also considering whether the same issues are presented in other related cases, takes into account whether the transferee court is better positioned to address the jurisdictional issue **[*21]** as compared to the court first presented with it.

While the jurisdictional issues presented in Molina's motion to remand are somewhat complex, Defendants have not shown that the District of New Jersey faces the same jurisdictional issues in other related cases. Of the cases most closely related to this one, the lead case there (*Humana*), where a motion to dismiss is currently pending, includes a federal claim and thus does not require the District of New Jersey to consider the disputes the parties have raised here regarding subject matter jurisdiction. Nor would the District of New Jersey's greater familiarity generally with similar claims against Celgene necessarily place it in a better position to determine the key issues for remand in this case—whether Molina (which is not currently a party to any related case in New Jersey) is the real party in interest for the claims its subsidiaries assigned it, whether a UCL claim based on attempted monopolization gives rise to federal question jurisdiction by necessarily incorporating federal law, and whether a request for declaratory relief that conduct is unlawful under state law necessarily raises federal issues where a complaint includes **[*22]** alleged violations of federal law. The Court therefore proceeds to resolve Molina's motion to remand.

E. Defendants Have Not Established Federal Question Jurisdiction

The general test for federal jurisdiction on removal "makes the plaintiff the master of the claim; he or she may avoid federal jurisdiction by exclusive reliance on state law." *Caterpillar Inc. v. Williams, 482 U.S. 386, 392, 107 S. Ct. 2425, 96 L. Ed. 2d 318 (1987)*. But even where a plaintiff asserts only state law claims, "federal jurisdiction over a state law claim will lie if a federal issue is: (1) necessarily raised, (2) actually disputed, (3) substantial, and (4) capable of resolution in federal court without disrupting the federal-state balance approved by Congress." *Gunn v. Minton, 568 U.S. 251, 258, 133 S. Ct. 1059, 185 L. Ed. 2d 72 (2013)*. That exception for state claims that necessarily raise federal issues applies only "[w]here all four of these requirements are met." *Id.*

The Court's analysis here begins and ends with the first element of the *Gunn* test: whether a federal issue is "necessarily raised" by Molina's complaint. "When a claim can be supported by alternative and independent theories—one of which is a state law theory and one of which is a federal law theory—federal question jurisdiction does not attach because federal law is not a necessary element of the claim." **[*23]** *Rains v. Criterion Sys., Inc., 80 F.3d 339, 346 (9th Cir. 1996)*. Defendants have not shown that Molina's complaint necessarily raises any federal issue, either based on Molina's claims under the UCL or based on its prayer for declaratory relief.

1. Molina's UCL Claims Do Not Establish Jurisdiction

Defendants' first argument for federal question jurisdiction is based on Molina's claims under the UCL.

As a starting point, the parties dispute whether Molina's UCL claims are under the "unlawful" or "unfair" prong of that statute. Defendants note that Molina has asserted three claims invoking the UCL (as well as statutes of other states): one for "Monopolization and Monopolistic Scheme under State Law," Compl. ¶¶ 467-73; one for "Attempted Monopolization Under State Law," *id.* ¶¶ 474-79; and one of "Unfair and Deceptive Trade Practices Under State Law," *id.* ¶¶ 480-83. Defendants also note that Molina's monopolization claim asserts that Celgene "unlawfully extended its monopoly power." *Id.* ¶ 466. Nevertheless, the Court is not persuaded that any of Molina's UCL claims necessarily invoke the "unlawful" prong.

The complaint does not specifically assert that Celgene's conduct violated the UCL *because* it was unlawful under some other law. It asserts that Celgene **[*24]** violated the UCL because Celgene monopolized the market and artificially inflated prices, *id.* ¶ 469, because Celgene attempted to monopolize and caused harm to Molina through those efforts, *id.* ¶¶ 475, 478; and because Celgene's conduct was otherwise unfair and deceptive, *id.* ¶ 481. The reference to Celgene "unlawfully extending its monopoly power" does not compel a conclusion that any separate unlawfulness of the conduct is the basis for the state claims Molina asserts, but instead could be read merely as characterizing the conduct as unlawful *because* it violates those state statutes, including the UCL. Accordingly, to the extent that Molina's allegations of efforts to monopolize the market for certain pharmaceuticals could support a claim under the "unfair" prong of the UCL, the complaint could be read as asserting such a claim rather than (or in the alternative to) a claim under the "unlawful" prong. Taking into account precedent that any "doubt regarding the right to removal" will support remand, *Matheson, 319 F.3d at 1090*, and that a federal theory presented in the alternative to theories based on state law is not "necessarily raised," *Rains, 80 F.3d at 346*, the Court concludes that so long the conduct described in each of **[*25]** Molina's claims could support a claim under the "unfair" prong (and not necessarily the "unlawful" prong) of the UCL, the complaint should be construed as such for the purpose of determining whether it necessarily raises a federal issue.

When brought by a *competitor*, a claim under the "unfair" prong of the UCL must "be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 186-87, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. In other words, the plaintiff must prove "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id. at 187*. But whether that requirement applies to claims brought by consumers, rather than competitors, is a question that remains "in flux." *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 735 (9th Cir. 2007)*; *see also* *Hauck v. Advanced Micro Devices, Inc., 816 F. App'x 39, 43 (9th Cir. 2020)* (citing *Lozano*). Some courts require a consumer plaintiff (like a competitor plaintiff) to meet the *Cel-Tech* standard of a direct connection to a particular legislatively declared antitrust policy, while other courts continue to allow consumer plaintiffs to use the balancing test described in *South Bay Chevrolet v. General Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301 (1999)*, which *Cel-Tech* rejected for competitor plaintiffs. **[*26]** *See* *Lozano, 504 F.3d at 735-36* (describing that split of authority). When the Ninth Circuit has affirmed dismissal of consumers' claims under the unfairness prong of the UCL, it has declined to resolve the issue, holding that dismissal was appropriate under either test based on the facts of the cases before it. *Hauck, 816 F. App'x at 43*; *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)*; *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1170 (9th Cir. 2012)*.

In a recent case, the Ninth Circuit described the standard as follows:

> Under the UCL's unfairness prong, courts consider either: (1) whether the challenged conduct is "tethered to any underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***," (*Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 1366, 108 Cal. Rptr. 3d 682 (2010)*); (2) whether the practice is "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers," *Morgan v. AT&T Wireless Servs., Inc., 177 Cal. App. 4th 1235, 1254, 99 Cal. Rptr. 3d 768 (2009)*; or (3) whether the practice's impact on the victim outweighs "the reasons, justifications and motives of the alleged wrongdoer." *Id.*

Doe v. CVS Pharmacy, Inc., 982 F.3d 1204, 1214-15 (9th Cir. 2020), *cert. dismissed*, *142 S. Ct. 480, 211 L. Ed. 2d 291 (2021)*.

The parties here have not addressed the distinction of whether *Cel-Tech* is limited to claims by competitors. Molina alleges that its harm stemmed from its subsidiaries paying higher reimbursement prices when their plan members purchase Celgene's drugs. *See* Compl. ¶¶ 440-66. While **[*27]** perhaps not neatly fitting either category, Molina is more similarly situated to a consumer of Celgene's product than to a competitor of Celgene.[6] Since Molina and Celgene are not competitors, no clear authority limits Molina's unfairness claim under the UCL to actual or threatened violations of the antitrust laws. Molina might be able to prevail by showing Celgene's alleged conduct to monopolize and inflate the price of medication for serious medical conditions was "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers," or by showing that its harms outweighed any legitimate motive. *See* *Doe, 982 F.2d at 1214-15*. It is therefore possible for Molina to prevail under the "unfair" prong without showing a violation of the *Sherman Act*, and Molina's UCL claims can reasonably be understood as asserted under that prong of the statute.

---

[6] The Ninth Circuit has held where the defendant is not itself a competitor of the plaintiff, but the plaintiff's claims are based on conduct by the defendant that unfairly favors the plaintiff's competitors, the case still involves the sort of "business-competitor" claims governed by *Cel-Tech*.*Levitt v. Yelp! Inc., 765 F.3d 1123, 1136 (9th Cir. 2014)*. This is not such a case.

Celgene is correct that some district courts have held that a claim under the "unfair" prong based on unilateral monopolization necessarily raises federal issues sufficient to invoke federal question jurisdiction, because California's primary antitrust statute, the Cartwright Act, addresses only coordinated conduct by multiple actors, not unilateral conduct. *See Rosenman v. Facebook Inc., No. 21-cv-02108-LHK, 2021 U.S. Dist. LEXIS 163171, 2021 WL 3829549, at *5 (N.D. Cal. Aug. 27, 2021)*; **[*28]** *Cent. Valley Med. Grp., Inc. v. Indep. Physician Assocs. Med. Grp., Inc., No. 1:19-cv-00404-LJO-SKO, 2019 U.S. Dist. LEXIS 100265, 2019 WL 2491328, at *3 (E.D. Cal. June 14, 2019)*; *In re: Nat'l Football Leagues Sunday Ticket Antitrust Litig., No. CV 15-09996-BRO (JEMx), 2016 U.S. Dist. LEXIS 41639, 2016 WL 1192642, at *5 (C.D. Cal. Mar. 28, 2016)*).[7]

In the first of those cases, *Sunday Ticket*, a plaintiff asserted various state law claims, including a UCL claim, stemming from DirecTV's alleged monopolization of out-of-market NFL broadcasts. *2016 U.S. Dist. LEXIS 41639, 2016 WL 1192642, at *1*. The district court held that the plaintiff's UCL unfairness claim (among other claims) necessarily asserted a violation of the *Sherman Act* because the claim "relie[d] on Defendants' alleged 'abuse of its monopoly position' and charging 'supra-competitive prices'"—unilateral conduct that implicated the *Sherman Act* but not the Cartwright Act. *2016 U.S. Dist. LEXIS 41639, [WL] at *5*. The court recognized that even under *Cel-Tech* the UCL's unfairness prong might in appropriate cases encompass claims that do not rise to the level of an actual or incipient violation of ***antitrust law***, but held because the that the claim at issue was based on monopolization, it necessarily incorporated the *Sherman Act*. *2016 U.S. Dist. LEXIS 41639, [WL] at *5* (distinguishing *PeopleBrowsr, Inc. v. Twitter, Inc., No. C-12-6120 EMC, 2013 U.S. Dist. LEXIS 31786, 2013 WL 843032, at *4 (N.D. Cal. Mar. 6, 2013)*). Although the plaintiff in *Sunday Ticket* was a consumer, the court did not address the unsettled question of whether *Cel-Tech* governed his claims. *See id.*

In *Central Valley Medical*, the plaintiff specifically alleged that the defendant's conduct "offend[ed] the policies of free competition and free trade and commerce set forth in, inter alia, the federal **[*29]** *Sherman Act*, *Clayton Act*, *Federal Trade Commission Act*, *15 USC § 12 et seq*; *15 USC §§ 45 et seq.*" *2019 U.S. Dist. LEXIS 100265, 2019 WL 2491328, at *3* (quoting the complaint). The plaintiff did not allege or argue that any violation of "policies tethered to California-specific constitutional, statutory, or regulatory provisions" could support its UCL claim. *Id.* Applying *Cel-Tech*—appropriately, since the parties in that case were competitors of each other, *2019 U.S. Dist. LEXIS 100265, [WL] at *1*—the court held that the "unfair" claim must be tethered to a legislative policy. *2019 U.S. Dist. LEXIS 100265, [WL] at *5*.[8] Since the plaintiff asserted only federal policies as a basis for such tethering, the court held that the claim necessarily raised a federal issue. *See 2019 U.S. Dist. LEXIS 100265, [WL] at *3-6*.

As for the recent *Rosenman* decision, although the plaintiff there was a consumer rather than competitor of the defendant, the court applied *Cel-Tech* without addressing the lingering uncertainty regarding its application outside of the competitor context. *2021 U.S. Dist. LEXIS 163171, 2021 WL 3829549, at *2, *3*. The court acknowledged that even *Cel-Tech* does not always require a violation of some other ***antitrust law***, *2021 U.S. Dist. LEXIS 163171, [WL] at *3*, but followed *Sunday Ticket* in holding that "where a plaintiff's UCL unfair prong claim relies on a defendant's alleged abuse of its monopoly position, that claim requires establishing **[*30]** a violation of federal

[7] In an earlier case, Judge Alsup held that a plaintiff's claim under the *unlawful* prong of the UCL necessarily raised a federal issue because the plaintiff asserted no underlying violations of law except as to federal antitrust laws. *Nat'l Credit Reporting Ass'n v. Experian Info. Sols., Inc., No. C04-01661 WHA, 2004 U.S. Dist. LEXIS 17303, 2004 WL 1888769, at *4 (N.D. Cal. July 21, 2004)*. The plaintiff argued that its UCL claim implicated only the unfair and fraudulent prongs of that statute, not the unlawful prong, but Judge Alsup rejected that argument as inconsistent with the claims asserted in the complaint. *Id.* Here, as discussed above, Molina's complaint does not clearly assert a claim under the "unlawful" prong.

[8] The *Central Valley Medical* court acknowledged, but did not address, the language of *Cel-Tech* indicating that the conduct at issue must be "'tethered to some legislatively declared policy *or proof of some actual or threatened impact on competition*.'" *See Cent. Valley Med., 2019 U.S. Dist. LEXIS 100265, 2019 WL 2491328, at *3* (quoting *Cel-Tech, 20 Cal. 4th at 186-87*) (emphasis added). The court's decision suggests that the plaintiff did not argue that it could prevail by showing proof of actual or threatened harm to competition rather than by tethering its claim to legislative policy. *See 2019 U.S. Dist. LEXIS 100265, [WL] at *5*.

antitrust law . . . because no California statute deals expressly with monopolization or attempted monopolization," *2021 U.S. Dist. LEXIS 163171, [WL] at *4* (cleaned up).[9]

All of these cases were decided under the *Cel-Tech* standard. In *Central Valley Medical*, the parties were competitors, and *Cel-Tech* indisputably applied. In *Sunday Ticket* and *Rosenman*, the courts did not consider the question of whether *Cel-Tech* applied to consumer clams. As discussed above, the Ninth Circuit has recognized multiple tests beyond *Cel-Tech* as potentially valid for such claims. *Doe, 982 F.3d at 1214-15*. The Court therefore does not find *Sunday Ticket, Central Valley Medical*, and *Rosenman* persuasive as to whether a *consumer's* claim under the unfair prong of the UCL necessarily raises federal issues by virtue of alleging monopolization or attempted monopolization.

As discussed above, looking beyond *Cel-Tech*, Molina could potentially prevail by showing that Celgene's alleged monopolization or attempted monopolization of the market for certain medications was "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers," or that its harm to victims outweighed any valid justification. *Doe, 982 F.3d at 1214-15*. In *Lawrence v. Provident Savings Bank*, the Central District of California addressed the unsettled **[*31]** test for unfair conduct claims brought by consumers, and held that even where a plaintiff alleged unlawful conduct as one predicate for his UCL claim, the case did not necessarily raise federal issues because the plaintiff also alleged unfair conduct and could prevail on the *South Bay* balancing test without reference to federal law. *Lawrence, No. 5:16-cv-00352-SVW-MRW, 2016 U.S. Dist. LEXIS 68300, 2016 WL 2979194, at *3 (C.D. Cal. May 23, 2016)*. In *Moralez v. Kern Schools Federal Credit Union*, the Eastern District of California reached the same conclusion. *No. 1:15-cv-01444-DAD, 2016 U.S. Dist. LEXIS 63175, 2016 WL 2756427, at *4 (E.D. Cal. May 12, 2016)* ("Indeed, under the tethering test discussed above, plaintiff appears to state a claim based on federal law alone. But, as the Ninth Circuit has concluded, the test for unfairness is broader and the court must determine whether plaintiff has stated a UCL claim when assessed under the balancing test. *Lozano, 504 F.3d at 736*."). The complaints in those cases included language more closely tracking the *South Bay* balancing test than Molina has here, but when Molina has not specifically asserted either that its UCL claim is based on a *Sherman Act* violation or that it is based on the balancing test, inferring the former at the expense of the latter would contravene the rule that any doubt as to jurisdiction must be resolved in favor of remand.

Even **[*32]** if *Cel-Tech* applied here, it left open the possibility that a plaintiff could prevail by showing "proof of some actual or threatened impact on competition," or in other words, that the conduct at issue "otherwise significantly threatens or harms competition," without necessarily showing actual or incipient violation of a specific legislatively declared policy. *Cel-Tech, 20 Cal. 4th at 186-87*. In *PeopleBrowsr*, where *Cel-Tech* applied because the parties were competitors, Judge Chen held not only that the case should be remanded because the plaintiff could prevail by showing "conduct that 'significantly threatens or harms competition,' regardless of whether it represents an actual or incipient violation of an ***antitrust law***," but also that the plaintiff was entitled to its attorneys' fees and costs in moving to remand because the defendant failed to cite any case supporting its "novel legal theory that an 'unfair act' sub-claim asserting solely a state law claim based on facts that *could* also give rise to a federal claim is alone sufficient to confer on this Court federal question jurisdiction." *2013 U.S. Dist. LEXIS 31786, 2013 WL 843032, at *4*.[10]

Neither *Sunday Ticket* and *Rosenman* on the one hand, nor *PeopleBrowsr* on the other, provides a wholly satisfactory treatment of whether an "unfair" claim under **[*33]** *Cel-Tech* necessarily raises a federal issue if it is based on allegations of monopolization. The former cases did not meaningfully address the "otherwise significantly

---

[9] *Rosenman* quotes *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1478 (9th Cir. 1986)*, for the statement that "[n]o California statute deals expressly with monopolization or attempted monopolization." That case considered whether the plaintiff could proceed on a Cartwright Act claim for monopolization or attempted monopolization when that statute was the only authority the plaintiff pleaded for the claim. *803 F.2d at 1478*. It did not consider whether such conduct could be considered "unfair" for the purpose of the UCL.

[10] At the time, *Sunday Ticket* and *Rosenman* were not yet available to lend some support to the defendant's position, distinguishing that case from the present one at least with respect to the reasonableness of Defendants' arguments.

threatens or harms competition" portion of *Cel-Tech*. The latter predated a trend of district courts "dismiss[ing] competitors' claims under this prong of the statute where plaintiffs fail to identify any unusual aspect of the alleged conduct that would make that conduct something that violates the 'policy and spirit' of the antitrust laws without violating the actual laws themselves, comparable to the *Cel-Tech* defendant's privileged status as one of two holders of a lucrative government-licensed duopoly." *See* *Facebook, Inc. v. BrandTotal Ltd., No. 20-cv-07182-JCS, 2021 U.S. Dist. LEXIS 165209, 2021 WL 3885981, at *6 (N.D. Cal. Aug. 31, 2021)* (cleaned up).[11] Regardless, *Lawrence* and *Moralez* are more persuasive in the context of a consumer claim, because they acknowledge that *Cel-Tech* may not even apply to such a claim.

Molina has not specifically asserted a violation of the *Sherman Act* as the basis for its UCL claims. It may be that the monopolization and attempted monopolization that Molina has alleged, if actionable under the alternative paths to an "unfair" claim that do not require tethering to a specific statute, would likely also violate the *Sherman Act*. But so what? A court would not inevitably **[*34]** need to address that question in order to consider whether the conduct is "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers," or "whether the practice's impact on the victim outweighs the reasons, justifications and motives of the alleged wrongdoer." *Doe, 982 F.3d at 1214-15*. Even if it were logically necessary that any monopolistic conduct that met those tests would also violate the *Sherman Act*, that would not mean the court addressing the claim had any need to *consider* the *Sherman Act*. The Court therefore concludes that no federal issue is necessarily raised by Molina's UCL claims.

Moreover, even assuming for the sake of argument that Molina's UCL claims required conduct that violated some other antitrust statutes, Molina has asserted that Celgene violated a host of other states' antitrust and consumer protection statute, at least some of which encompass claims for monopolization. *See, e.g.,* *Pasco Indus., Inc. v. Talco Recycling, Inc., 195 Ariz. 50, 57, 985 P.2d 535, (Ct. App. 1998)* (holding that *Arizona Revised Statutes section 44-1403*, one of the statutes on which Molina bases its claims here, "prohibits monopolistic behavior by individual persons or entities—in other words, unilateral activity"). The parties have not addressed whether a violation of one of those statutes could support a claim under the "unlawful" prong **[*35]** of the UCL, or a claim under the "unfair" prong based on an actual or incipient violation of the letter or spirit of a foreign state's ***antitrust law***.

"Unlawful" practices are defined broadly for the purpose of the UCL, encompassing conduct '"forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made."' *In re Pomona Valley Med. Grp., Inc., 476 F.3d 665, 674 (9th Cir. 2007)* (quoting *Saunders v. Superior Court, 27 Cal. App. 4th 832, 33 Cal. Rptr. 2d 438, 441 (1994)*). "Virtually any law or regulation—federal or state, statutory or common law—can serve as a predicate for an 'unlawful' prong violation." *Candelore v. Tinder, Inc., 19 Cal. App. 5th 1138, 1155, 228 Cal. Rptr. 3d 336 (2018)* (cleaned up). The Ninth Circuit has suggested, albeit in dicta in a nonprecedential decision, that violations of foreign states' laws could support a UCL claim. *Speyer v. Avis Rent A Car Sys., Inc., 242 F. App'x 474, 474-75 (9th Cir. 2007)*. A handful of district court decisions have held that a plaintiff may *not* bring a UCL claim based on a violation of foreign law, but they are not binding on this Court and cite no California authority so holding, at least so long as the violation has some connection to California. *Hilton v. Apple Inc., No. CV 13-7674 GAF (AJWx), 2014 U.S. Dist. LEXIS 184769, 2014 WL 10435005, at *3 (C.D. Cal. Apr. 18, 2014)*; *Van Slyke v. Cap. One Bank, No. C 07-00671 WHA, 2007 U.S. Dist. LEXIS 82690, 2007 WL 3343943, at *14 (N.D. Cal. Nov. 7, 2007)*. Since Defendants have not addressed whether the alleged violations of other states' antitrust laws could support Molina's claims without need to consider any question of federal law, and any doubts must be resolved in favor of remand, Defendants have **[*36]** not met their burden to establish federal question jurisdiction based on Molina's UCL claims.[12]

---

[11] *See also* *Creative Mobile Techs., LLC v. Flywheel Software, Inc., No. 16-cv-02560-SI, 2017 U.S. Dist. LEXIS 24173, 2017 WL 679496, at *6 (N.D. Cal. Feb. 21, 2017)*; *Synopsys, Inc. v. ATopTech, Inc., No. C 13-2965 MMC, 2015 U.S. Dist. LEXIS 104763, 2015 WL 4719048, at *10 (N.D. Cal. Aug. 7, 2015)*.

[12] The Court declines to reach the question of whether, even if Molina's claims required some connection to federal or California ***antitrust law***, Molina's allegations of improper settlement agreements and exclusive supply contracts describe non-unilateral conduct sufficient to bring its monopolization claims with the scope of the Cartwright Act.

One California appellate decision cited by Defendants also warrants a brief discussion. Defendants describe *Chavez v. Whirlpool Corp., 93 Cal. App. 4th 363, 113 Cal. Rptr. 2d 175 (2001)*, as "holding that [a] UCL unfair prong claim premised on conduct 'alleged to be "unfair" because it unreasonably restrains competition' rises and falls with [the] status of such conduct 'under the antitrust laws.'" Opp'n to Remand at 11 (quoting *Chavez, 93 Cal. App. 4th at 375*). That case actually held "that conduct alleged to be 'unfair' because it unreasonably restrains competition and harms consumers, such as the resale price maintenance agreement alleged here, is not 'unfair' if the conduct is *deemed reasonable and condoned* under the antitrust laws." *Chavez, 93 Cal. App. 4th at 375* (emphasis added). The court affirmed dismissal of a claim under the UCL "unfair" prong based on its holding that the conduct alleged was permissible under the Cartwright Act, based on specific rights of the defendant recognized by existing precedent. *See id. at 373-75*. As Judge Chen held in *PeopleBrowsr*, the holding of *Chavez* was based on a "safe harbor" doctrine that "operates, in essence, as a federal defense to the 'unfair act' claim." *PeopleBrowsr, 2013 U.S. Dist. LEXIS 31786, 2013 WL 843032, at *3*. With the exception of complete federal preemption, which **[*37]** Defendants have explicitly declined to assert here, it has long been "settled law that a case may *not* be removed to federal court on the basis of a federal defense." *Caterpillar, 482 U.S. at 393*. Accordingly, *Chavez* provides no support for Defendants' removal of this case.

For the reasons discussed above, the Court holds that Molina's UCL claims do not necessarily raise any federal issue. The Court therefore need not reach the parties' arguments as to whether any such issue is substantial or disputed, or whether hearing this case would disrupt the balance between state and federal courts.

2. Molina's Request for Declaratory Judgment Does Not Establish Jurisdiction

Defendants also argue that Molina's request for declaratory relief necessarily raises a federal issue because it would require a court to determine that Defendants' conduct violated a plethora of federal laws regarding patents and pharmaceutical regulations cited in Molina's complaint. Opp'n to Remand at 14-15. As Molina notes in its briefs, it does not assert a separate *claim* for declaratory judgment, but instead seeks such relief as a remedy under its various state law claims. Mot. to Remand at 9; Reply re Remand at 8. The prayer at issue seeks judgment "[d]eclaring **[*38]** the acts alleged herein to be unlawful under the state statutes set forth above, and the common law of unjust enrichment of the states and territories [sic[13]] set forth above." Compl. at 99.

Defendants are correct that Molina's complaint alleges numerous violations of federal law. *See, e.g.*, Compl. ¶ 100 (asserting that "Celgene's improper use of the REMS program as a shield to refuse to provide samples is contrary to FDAAA," specifically, *21 U.S.C. § 355-1(f)(8)*); *id.* ¶ 246 (alleging that Celgene breached its duty of disclosure to the USPTO); *id.* ¶ 331 (alleging sham patent litigation). But "merely naming a federal statute in a complaint will not confer federal jurisdiction if the only relief the plaintiff actually wants is based on state rather than federal law." *Saturday Evening Post Co. v. Rumbleseat Press, Inc., 816 F.2d 1191, 1195 (7th Cir. 1987)*, *abrogation on other grounds recognized by Glickenhaus & Co. v. Household Int'l, Inc., 787 F.3d 408, 426 (7th Cir. 2015)*. Defendants have not shown that Molina would be required to prove such federal violations as a necessary element of any of its state law claims, including to obtain declaratory relief that the *conduct* at issue violates state law. Granted, if Celgene acted in accordance with federal law, that might immunize some of the conduct at issue from Molina's claims, but the possibility of that sort of federal **[*39]** defense, even if apparent from Molina's allegations, is not a basis for federal jurisdiction. *See Caterpillar, 482 U.S. at 393*; *PeopleBrowsr, 2013 U.S. Dist. LEXIS 31786, 2013 WL 843032, at *3*. While courts have recognized an exception to that rule for complete federal preemption, Defendants specifically disclaim that theory of jurisdiction here. Opp'n to Remand at 7 n.2.

The only case Defendants cite finding federal question jurisdiction based on a prayer for relief is *Wullschleger v. Royal Canin U.S.A., Inc., 953 F.3d 519, 522 (8th Cir. 2020)*, where the plaintiffs sought a declaration specifically that the defendant violated federal law and an injunction against further violations. The relief requested in that case included "[f]inding, adjudging, and decreeing that Defendants have engaged in the violations of law alleged in this Petition" (which included violations of federal law) and "enjoining Defendants to comply with all *federal* and Missouri

[13] No territories are listed in Molina's claim for unjust enrichment. *See* Compl. ¶ 492.

provisions applicable to the manufacture of such drugs." *Wullschleger v. Royal Canin U.S.A., Inc.*, No. 4:19-cv-00235-GAF, ECF Doc. No. 1-1 (Petition) ¶¶ 136, 138 (W.D. Mo. Mar. 26, 2019) (emphasis added).

Defendants raise potentially valid concerns that some of the conduct at issue in Molina's complaint, such as ongoing federal patent litigation, might fall outside of a state court's power to declare unlawful. **[*40]** But the state court is capable of considering such arguments and respecting the limits of its jurisdiction, and such limits do not give rise to a necessary federal issue—except perhaps a federal defense, which is insufficient confer jurisdiction. As another district court has explained:

> While it is clear that a state court is barred from abridging a litigant's right to avail itself of a federal forum, *Felter*[14] does not speak to a right of removal when a state court is requested to do so. . . . Although the defendants herein might move the state court, in reliance upon *Felter*, to dismiss the over broad portions of the prayer for relief seeking to limit their recourse to the federal courts, that potential for dismissal as a matter of law does not lead one ineluctably to the conclusion that removal jurisdiction is likewise appropriate.

*W. Va. ex rel. McGraw v. BlueHippo Funding, LLC, No. CV 2:07-0220, 2007 U.S. Dist. LEXIS 116631, 2007 WL 9718440, at *6-7 (S.D.W. Va. July 23, 2007)*. That some relief Molina seeks might not be available in state court does not in itself grant Defendants the right to remove the case to a federal court potentially more capable of entering broader judgment against them.

With the possible exception of federal defenses, which do not give rise to jurisdiction under *§ 1331*, Defendants have not met their burden to **[*41]** show that Molina's prayer for declaratory relief on its state law claims necessarily raises any issue of federal law. Since, as discussed above, Defendants also have not shown a necessary federal issue embedded in Molina's UCL claims, Defendants have not shown removal to be proper based on federal question jurisdiction.

F. Defendants Have Not Established Complete Diversity of Citizenship

To establish diversity jurisdiction under *28 U.S.C. § 1332(a)*, a removing defendant must show that there is complete diversity of the parties—i.e., no defendant is a citizen of the same state as any plaintiff—and that the amount in controversy exceeds $75,000. *See Caterpillar Inc. v. Lewis, 519 U.S. 61, 68, 117 S. Ct. 467, 136 L. Ed. 2d 437 (1996)*. Here, the parties do not dispute that Molina shares Delaware citizenship with both Celgene and BMS.

Defendants contend that the Court should treat Molina's subsidiaries' assignment of their claims to Molina as a sham to avoid federal jurisdiction, disregard Molina's citizenship, look instead to the citizenship of the subsidiaries, and either disregard BMS's citizenship based on fraudulent joinder or disregard Molina's New York subsidiary's citizenship because this court and the California state court lack personal jurisdiction over Defendants for the purpose **[*42]** of that entity's claims.

Beginning with the question of whether to disregard Molina's citizenship, courts are skeptical of assignments to manipulate jurisdiction, particularly between related entities. *See, e.g., Nike, Inc. v. Comercial Iberica de Exclusivas Deportivas, S.A., 20 F.3d 987, 991-92 (9th Cir. 1994)* (considering an assignment that purported to create rather than destroy diversity jurisdiction). District courts lack jurisdiction where "any party, by assignment or otherwise, has been improperly or collusively made or joined to invoke the jurisdiction of such court." *28 U.S.C. § 1359*. "[T]here is no similar statute prohibiting collusive assignments in order to defeat jurisdiction." *Go Computer Inc. v. Microsoft Corp., No. C 05-03356 JSW, 2005 U.S. Dist. LEXIS 31404, 2005 WL 3113068, at *2 (N.D. Cal. Nov. 21, 2005)*. Nevertheless, in *Attorneys Trust v. Videotape Computer Products, 93 F.3d 593 (9th Cir. 1996)*, the Ninth Circuit held that courts may, in at least some circumstances, disregard assignments that would destroy jurisdiction, noting

[14] *Gen. Atomic Co. v. Felter, 434 U.S. 12, 98 S. Ct. 76, 54 L. Ed. 2d 199 (1977)*.

that "the informing principles are much the same" when an assignment is intended to destroy diversity of citizenship as when it is intended to create diversity. *93 F.3d at 595*.

The *Attorneys Trust* court noted that a "complete" assignment will usually, but not always, be considered valid:

> Broadly speaking, if an assignment is entire, not partial, there is a very good chance that it will be found to be proper. . . .
>
> While motive can often be important, if the assignment is truly absolute and **[*43]** complete, motive often recedes into almost nothing. . . . However, even when there is a complete assignment, collusion may be found. That is most likely to be where there is an excellent opportunity for manipulation, as in transfers between corporations and their subsidiaries or transfers to a shell corporation.

93 F.3d at 596 (citations omitted). There, the plaintiff assignee had been assigned an account for collection and filed suit in federal court, purportedly on behalf of the co-plaintiff assignor, and invoked the assignor's citizenship as grounds for diversity jurisdiction under *§ 1332(a)*. *See* *id. at 594, 599*. The assignee "was to proceed in the attempt to collect the alleged debt and was to receive 12 percent for its trouble." *Id. at 594*. After an adverse result, the plaintiffs argued that although they had invoked the jurisdiction of the district court, they were wrong to do so because the assignee's California citizenship (which it shared with the defendant) should have been considered, and that the judgment was therefore void. *See* *id. at 594*. The Ninth Circuit held that the assignment should be disregarded in determining jurisdiction, and the judgment should therefore stand, for reasons including: the assignee "had no prior interest **[*44]** in the claim, and the assignment was timed to coincide with the commencement of litigation; the assignee gave no consideration other than its own collection work for a contingent fee, which could have been effectuated without an assignment; because 88% was to go to [the assignor], the assignment was partial, and, ultimately, the same counsel represented both [the assignor and assignee]." *Id. at 599*. The opinion also noted that the assignor had been identified as the plaintiff in the district court. *Id.*

In reaching that conclusion, the Ninth Circuit acknowledged "older Supreme Court decisions regarding removal" from the 1880s, where "the Court refused to allow removal of an action filed in state court after a diversity-destroying colorable assignment was made, even if it was for collection only," based on reticence "to interfere with state court jurisdiction," lack of any statutory authority, and litigants' ability to resolve any question of the real parties in interest in state court. *Id. at 598-99* (citing, *e.g.,* *Provident Sav. Life Assur. Soc'y v. Ford, 114 U.S. 635, 5 S. Ct. 1104, 29 L. Ed. 261 (1885)*). In *Provident*, the Supreme Court held that even where "a colorable assignment has been made to deprive the United States court of jurisdiction," it is "not a ground of removing that cause into the federal **[*45]** court," but at most perhaps grounds for a defense in state court based on failure to sue in the name of the real party in interest or for fraudulently manipulating jurisdiction. *114 U.S. at 640-41*.

The Ninth Circuit noted Fifth Circuit authority calling into question that century-old precedent regarding removal, but declined to rely on any doubts as to its validity, instead limiting its holding to cases filed in the first instance in a federal court. *Id. at 599, 600* (citing *Grassi v. Ciba-Geigy, Ltd., 894 F.2d 181, 182-85 (5th Cir. 1990)*). That Fifth Circuit case, while noting that some of "the basic propositions for which *Provident* and its progeny stand have been abandoned," acknowledged that "the Supreme Court has not had formal occasion to reexamine that ruling" and thus "*Provident* remains as precedent," such that "whether the Supreme Court was incorrect in its decision in *Provident* [is] a matter of academic interest only." *Grassi, 894 F.2d at 184*. That court distinguished the case before it on the basis that the assignment was partial rather than complete, and declined to extend *Provident*'s rule to cover partial assignments. *Id. at 185*.

Molina relies on subsequent decisions from this district that have declined to apply *Attorneys Trust* to look past assignments when considering diversity jurisdiction in the context of removal, at least where an assignment is **[*46]** complete and the assignor is not itself a party to the case. *See* *Charles Schwab Corp. v. Banc of Am. Sec. LLC, No. 10-cv-03489-LHK, 2011 U.S. Dist. LEXIS 29530, 2011 WL 864978, at *3-4 (N.D. Cal. Mar. 11, 2011)*; *Go Computer Inc. v. Microsoft Corp., 2005 U.S. Dist. LEXIS 31404, 2005 WL 3113068, at *2*.

In *Go Computer*, Judge White noted that both the Ninth Circuit in *Attorneys Trust* and the Fifth Circuit in *Grassi* declined to hold that the nineteenth-century Supreme Court precedent like *Provident* regarding assignments and removal and had been overturned, instead distinguishing the facts before them—because the case was initially filed in federal court in *Attorneys Trust*, and because the assignment in *Grassi* was partial rather than complete. *Go Computer Inc. v. Microsoft Corp., No. C 05-03356 JSW, 2005 U.S. Dist. LEXIS 31404, 2005 WL 3113068, at *2 (N.D. Cal. Nov. 21, 2005)*. He determined that "[a]lthough the value of the consideration [the assignor] was given for the assignment may vary depending upon the value of any potential recovery . . . the claims were assigned in their entirety to [the assignees], thus ending the Court's inquiry." *2005 U.S. Dist. LEXIS 31404, [WL] at *3*. Judge White concluded that *Provident* remained binding, and that since the assignment in the case before him was complete and presented in the context of removal, that precedent required remand. *2005 U.S. Dist. LEXIS 31404, [WL] at *2-3*.

In reaching a similar conclusion that the assignment was "complete" in *Charles Schwab* despite the assignee having agreed to remit ninety-seven percent of any recovery to the assignor, *2011 U.S. Dist. LEXIS 29530, 2011 WL 864978, at *3*, Judge Koh relied on relatively recent Supreme Court precedent holding **[*47]** that assignment of "all 'rights, title and interest' in claim" constituted assignment "lock, stock, and barrel" sufficient to confer Article III standing, even where the parties agreed by contract that the assignee would remit all proceeds of litigation to the assignor, and the assignor would pay the assignee a fee. *Sprint Commc'ns Co., L.P. v. APCC Servs., Inc., 554 U.S. 269, 272, 286, 291, 128 S. Ct. 2531, 171 L. Ed. 2d 424 (2008)*. Judge Koh concluded that since the complete assignment of claims meant that "no other party (including [the assignor]) has standing to bring the claims" asserted, and since on removal it was not the plaintiff's burden to show that its assignment was proper, the defendant had not established diversity jurisdiction and the case should be remanded. *Charles Schwab, 2011 U.S. Dist. LEXIS 29530, 2011 WL 864978, at *4*. She noted that *Go Computer* addressed "a factual situation very similar to the one presented" in *Charles Schwab*, and distinguished *Attorneys Trust* as "limited to the unusual case where the party attacking diversity jurisdiction initially filed suit in federal court." *Id.*

Here, there is little evidence of the nature of the Molina entities' assignments beyond their express terms. The relevant portions read as follows:

> 2. For good and valuable consideration received, [each subsidiary] hereby irrevocably assigns all rights, titles, ownership, and interests in the Claims to MHI [i.e., **[*48]** Molina]. MHI shall maintain sole discretion in prosecuting such claims and managing and controlling the litigation and all strategy and negotiations related thereto, including with respect to (but not limited to) any settlement, dismissal, or other resolution of the claim.
> 3. In consideration for such assignment from [the subsidiary], MHI shall calculate and remit the net recovery, if any, after attorney's fees, litigation expenses and court costs, with respect to [the subsidiary's] claims to [the subsidiary], subject to any applicable inter-or intra-company agreements and / or other legal requirements.

Kim Dec. (dkt. 15) Ex. A.

Under the terms of these assignments, Molina's subsidiaries have assigned their claims in full to Molina, such that the subsidiaries could no longer bring those claims themselves, and they have not sought to do so by appearing as parties in this case. *Cf. Grassi, 894 F.2d at 185* ("[T]he assignor who makes a fractional assignment remains a party to the action, whose presence enables him to take better advantage of whatever local bias may exist."). These terms are not materially different from the assignments in *Charles Schwab* and *Go Computer*. As in those cases, the assignment is complete, and *Provident* compels remand **[*49]** regardless of the motive behind the assignment[15] or the subsidies' interest in the outcome.

Defendants contend that the assignments are invalid for lack of consideration, because by agreeing to remit all proceeds to the subsidiaries except as needed to cover its costs, Molina itself receives no gain for its efforts to

---

[15] Molina notes that it has used virtually identical assignments in other cases to consolidate its subsidiaries' claims with one entity even where the assignment had no effect on jurisdiction for a federal claim filed in federal court, thus calling into question whether the assignments here were made solely to defeat jurisdiction. In any event, Molina's motive is not relevant to the outcome, and the Court need not resolve it.

prosecute the case. Regardless of whether that argument is correct as a matter of contract law, the Supreme Court has rejected it as a basis for remand. *Provident, 114 U.S. at 641* ("We know of no instance where the want of consideration in a transfer, or a colorable transfer, of a right of action from a person against whom the defendant would have a right of removal to a person against whom he would not have such a right, has been held a good ground for removing a cause from a state to a federal court.").

Defendants cite a single district court decision disregarding an assignment that would have destroyed diversity jurisdiction in the context of removal and remand: *Overrated Prods. v. Universal Music Grp., No. CV 19-2899-RSWL-RAO, 2019 U.S. Dist. LEXIS 216107, 2019 WL 6729718 (C.D. Cal. July 31, 2019)*. There, after members of a band receiving an adverse ruling in a related federal case against a record company regarding royalties for recordings, the producer of the recordings created a California corporation, Overrated Products, and **[*50]** assigned it the rights to royalties that had previously been held by a different company, whose citizenship would have given rise to diversity jurisdiction. *See* *2019 U.S. Dist. LEXIS 216107, 2019 WL 6729718, at *1-2*. The new California corporation sued the record company, which removed, arguing that the corporation was a sham and that as the real party in interest, the producer's Florida citizenship established diversity jurisdiction. *2019 U.S. Dist. LEXIS 216107, [WL] at *2*. The district court initially remanded, holding that the record company had not shown the plaintiff corporation to be a sham, but after additional evidence came to light through state court proceedings, the record company removed again, and the district court declined to remand a second time. *See* *2019 U.S. Dist. LEXIS 216107, [WL] at *2-3*. Citing *Attorneys Trust* as authority for extending *28 U.S.C. § 1359* to disregard collusive assignment that purport to destroy (as opposed to only create) diversity jurisdiction, the district court held not only that the assignment was collusive, but also that the plaintiff corporation was itself a sham. *See* *2019 U.S. Dist. LEXIS 216107, [WL] at *5-7*. The court did not address *Attorney Trust*'s express limitation to cases initially filed in federal court,[16] or the precedential value of the Supreme Court's decision in *Provident*.

The facts of that case are distinguishable, in that Defendants have **[*51]** not argued here that Molina is a sham corporation in its entirety, and instead attack only the validity of the assignments. To the extent *Overrated Products* could be read as supporting a broader rule that *Attorneys Trust* permits looking past collusive assignments in cases filed in state court and removed, it is not persuasive in that it failed to consider that decision's limitation to cases filed in federal court, the Supreme Court precedent of *Provident*, or *Charles Schwab* and *Go Computer*'s holdings that complete assignments can never be pierced for removal. While constraining *Attorneys Trust* to its express limitation creates different standards for the validity of assignments depending on where a case was filed, that outcome is not only compelled by *Provident*, but also consistent with the Ninth Circuit's "strong presumption against removal." *See* *Gaus, 980 F.2d at 566*.

The Court therefore holds that Molina's citizenship is the relevant consideration for diversity jurisdiction, and that its Delaware citizenship—which it shares with both defendants—precludes a finding of complete diversity necessary for jurisdiction under *1332(a)*.

Even if that were not so, the case would be subject to remand based on the shared New York citizenship of BMS and Molina's New York subsidiary. Defendants argue that BMS is fraudulently **[*52]** joined since Molina's complaint only alleges conduct by its subsidiary Celgene, and in fact demands judgment only against Celgene, and that the California court lacks personal jurisdiction over Defendants with respect to claims by the New York subsidiary.

"[F]raudulently joined defendants will not defeat removal on diversity grounds." *Ritchey v. Upjohn Drug Co., 139 F.3d 1313, 1318 (9th Cir. 1998)*. "The term 'fraudulent joinder' is a term of art, used for removal purposes, and does not connote any intent to deceive on the part of plaintiff or his counsel." *Plute v. Roadway Package Sys., Inc., 141 F. Supp. 2d 1005, 1008 n.2 (N.D. Cal. 2001)*. "Joinder of a non-diverse defendant is deemed fraudulent, and the

[16] The same court's earlier decision granting a motion to remand after the first removal acknowledged that "courts have declined to extend *Attorneys Trust* where, as here, the action was filed in state court, the alleged real party in interest . . . is not a party to the action, and the assignment was total." *Overrated Prods. v. Universal Music Grp., No. CV 17-09267-RSWL-RAO, 2018 U.S. Dist. LEXIS 33855, 2018 WL 1136881, at *2 (C.D. Cal. Mar. 1, 2018)*. In denying remand the second time, however, the court did not acknowledge those limitations. *2019 U.S. Dist. LEXIS 216107, 2019 WL 6729718, at *3*.

defendant's presence in the lawsuit is ignored for purposes of determining diversity, if the plaintiff fails to state a cause of action against a resident defendant, and the failure is obvious according to the settled rules of the state," such that there is no possibility a state court would find a valid claim against the non-diverse defendants, and any deficiency could not be cured by amendment. *Morris v. Princess Cruises, Inc., 236 F.3d 1061, 1067 (9th Cir. 2001)*; *see* *GranCare, LLC v. Thrower ex rel. Mills, 889 F.3d 543, 549-50 (9th Cir. 2018)*. At least one court has applied the same test to a purportedly fraudulently joined plaintiff, which would seem to apply to Defendants' argument that Molina's New York subsidiary should be disregarded. *Tahoe Keys Marina & Yacht Club, LLC v. Merkelback, No. 2:12-CV-02582-GEB-AC, 2013 U.S. Dist. LEXIS 7910, 2013 WL 221510, at *1 (E.D. Cal. Jan. 18, 2013)*. **[*53]**

Here, Defendants are correct that the complaint does not state a claim against BMS, but they have not shown that Molina could not cure that deficiency by amendment to include allegations of conduct by BMS or grounds for alter ego liability. Assuming for the sake of argument they are correct as to a lack of personal jurisdiction for claims by the New York subsidiary, any such deficiency there could also potentially be cured by amendment to allege a stronger connection to California for that entity's claims.

That said, the New York subsidiary is not a party to the case, and as discussed above, it is Molina's citizenship that matters. The New York connection would be relevant only if Defendants were correct that the Court may disregard the assignment, which they are not. Based on Molina's shared Delaware citizenship with both Celgene and BMS, the Court lacks diversity jurisdiction under *§ 1332(a)*.

IV. CONCLUSION

For the reasons discussed above, Molina's motion to remand is GRANTED. The Clerk shall remand the case to the California Superior Court for the County of San Francisco and close the file in this Court. Lacking subject matter jurisdiction, **[*54]** the Court does not reach Defendants' motion to transfer and motion to dismiss. Defendants may renew any arguments for dismissal that they wish to pursue before the state court.

IT IS SO ORDERED.

Judges: Robert N. Scola, Jr., United States District Judge.

Opinion by: Robert N. Scola, Jr.

Opinion

Order

This matter is before the Court on the Defendants' motion to dismiss. (ECF No. 60.) The Plaintiff (the "City") filed an opposition (ECF No. 70), and the Defendants filed a reply in support of their motion (ECF No. 79). After careful consideration of the briefs and the relevant legal authorities, the Court **grants in part and denies in part** the Defendants' motion. (**ECF No. 60**.)

1. Background

Over the past few decades, the price of a life-saving drug has risen from approximately $20 to as much as $700. (ECF No. 44 at ¶ 5.) Tracing this astronomical rise in price, the City's amended complaint alleges a price-fixing conspiracy involving fifteen entities that either manufacture insulin and other diabetes medications[1] or manage and negotiate certain pharmacy benefits. (ECF No. 44.) In **[*5]** particular, the City sues Defendants Eli Lilly, Novo Nordisk, and Sanofi (the "Manufacturer Defendants") and CVS Caremark, Express Scripts, OptumRx, and Aetna Rx (the "PBM Defendants").[2]

The Court will start with a brief summary of the general distribution chain. Manufacturers create insulin and other medications, which are then sold to wholesalers. (*Id.* at ¶ 189.) Wholesalers sell to pharmacies and other retail businesses, who then sell to consumers, many of whom have a health plan. (*Id.*) The price paid at each stop on the distribution chain varies, in part because of entities called pharmacy benefit managers ("PBMs"), like CVS Caremark, Express Scripts, OptumRx, and Aetna Rx. (*Id.* at ¶¶ 190, 193.) These entities, a somewhat recent phenomena, state that they manage drug benefits for health plans—such as the City's—and work to lower the price of drugs for those health plans. (*Id.* at ¶¶ 14, 69, 89, 108, 122, 166, 204.) These entities negotiate the "formulary

---

[1] The medications at issue include Humulin N, Humilin R, Humalog, Trulicity, Basaglar, Lantus, Toujeo, Soliqua, Apidra, Novolin R, Novolin N, Novolog, Levemir, Tresiba, Victoza, and Ozempic. (ECF No. 44 at 5 n.9.)

[2] Undefined terms shall have the meaning set out in the Amended Complaint. (ECF No. 44.)

placement" for each drug—in essence, they negotiate what medications will be offered by their health plan clients and covered by insurance. (*Id.* at ¶¶ 3, 14, 224.) These negotiations go in many directions—PBMs negotiate with manufacturers **[*6]** regarding the formulary placement for each manufacturer's medications, they negotiate what health plans will pay for each medication, and they negotiate the price that each pharmacy will receive for this medication. (*Id.* at ¶¶ 194, 199, 201.)

This lawsuit, in large part, focuses on one aspect of these negotiations—rebates paid from the Manufacturer Defendants to the PBM Defendants. In general, medications that are covered by insurance will be utilized at higher rates, putting the PBM Defendants in a powerful negotiating position as a gatekeeper between manufacturers and consumers. (*Id.* at ¶¶ 13, 215, 225.) The PBM Defendants represent that they negotiate lower drug prices for their clients, but insulin prices have not decreased while rebate payments to the PBM Defendants have increased. (*See id.* at ¶¶ 248, 279-287.) Indeed, the Manufacturer Defendants have begun offering increasingly larger rebates (or as the City refers to these payments—kickbacks) to the PBM Defendants in an effort to receive better formulary placements for their diabetes medications. (*Id.* at ¶¶ 16, 199); (ECF No. 70 at 25.) And to negotiate higher rebates, the Manufacturer Defendants raised the prices of their medications. **[*7]** (*Id.* at ¶ 229.) Health plans end up paying a price that is the "reported price," or "Average Wholesale Price," less a discount negotiated by the PBM Defendants—the discount is less than the rebate received by the PBMs. (*Id.* at ¶¶ 195, 261.) The PBM Defendants then reimburse pharmacies a lower price for the medication. (*Id.* at ¶ 256.)

The City alleges a vast conspiracy among and between the Manufacturer Defendants and the PBM Defendants to raise the price of diabetes medications. As evidence of this conspiracy, the City alleges that the medications at issue have not meaningfully changed in the last decade, if not the last 100 years.[3] (*Id.* at ¶¶ 8, 159.) Notwithstanding the lack of advancement, the price of each has increased in a substantially uniform manner. (*Id.* at ¶¶ 177-82.) These price increases occurred despite opacity in the pricing system, in which the rebates, fees, and other payments between the Manufacturer Defendants and the PBM Defendants are not disclosed. (*Id.* at ¶¶ 191, 231.)

Moreover, the City points to price data as evidence of increasing rebate payments to the PBM Defendants. While payments to the PBM Defendants are not disclosed, there is an increasing discrepancy between **[*8]** the Manufacturer Defendants' reported prices (which include rebates and have dramatically increased) and their "net prices" (which are post rebate and have largely been steady). (*Id.* at ¶¶ 248-52.)

As a result of this conspiracy, the City alleges that it pays more in health care costs related to diabetes care. The City provides health benefits to certain individuals as a self-funded health plan. (*Id.* at ¶¶ 272-74.) The City has received services from "one or more" PBM Defendants, yet the City's healthcare costs have risen, despite representations that the PBM Defendants were working to reduce costs. (*Id.* at ¶¶ 277-80, 302, 304, 357.)

2. Legal Standard

When considering a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, the Court must accept all of the complaint's allegations as true, construing them in the light most favorable to the plaintiff. *See* *Pielage v. McConnell, 516 F.3d 1282, 1284 (11th Cir. 2008)*. Under *Federal Rule of Civil Procedure 8*, a pleading need only contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. The plaintiff must nevertheless articulate "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable **[*9]** inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*. "Threadbare recitals of the elements of a cause of action, supported by mere conclusory

---

[3] The City alleges that while the medications at issue have gone largely unchanged, the Manufacturer Defendants engage in "evergreening" their patents—i.e., filing new patent applications for minor changes—and thereby preserve patent protections and minimize new competition. (ECF No. 44 at ¶¶ 310-11.)

statements, do not suffice." *Id.* Thus, a pleading that offers mere "labels and conclusions" or "a formulaic recitation of the elements of a cause of action" will not survive dismissal. *See id.*

In applying the Supreme Court's directives in *Twombly* and *Iqbal*, the Eleventh Circuit has provided the following guidance to the district courts:

> In considering a motion to dismiss, a court should 1) eliminate any allegations in the complaint that are merely legal conclusions; and 2) where there are well-pleaded factual allegations, assume their veracity and then determine whether they plausibly give rise to an entitlement to relief. Further, courts may infer from the factual allegations in the complaint obvious alternative explanation[s], which suggest lawful conduct rather than the unlawful conduct the plaintiff would ask the court to infer.

Kivisto v. Miller, Canfield, Paddock & Stone, PLC, 413 F. App'x 136, 138 (11th Cir. 2011) (citations omitted). These precepts apply to all civil actions, regardless of the cause of action alleged. *See id.*

Where a cause of action sounds in fraud, however, *Federal Rule of Civil Procedure 9(b)* must be satisfied in addition to the more relaxed **[*10]** standard of *Rule 8*. Under *Rule 9(b)*, "a party must state with particularity the circumstances constituting fraud or mistake," although "conditions of a person's mind," such as malice, intent, and knowledge, may be alleged generally. *Fed. R. Civ. P. 9(b)*. "The 'particularity' requirement serves an important purpose in fraud actions by alerting defendants to the precise misconduct with which they are charged and protecting defendants against spurious charges of immoral and fraudulent behavior." *W. Coast Roofing & Waterproofing, Inc. v. Johns Manville, Inc., 287 F. App'x 81, 86 (11th Cir. 2008)* (citations omitted). "When a plaintiff does not specifically plead the minimum elements of their allegation, it enables them to learn the complaint's bare essentials through discovery and may needlessly harm a defendant's goodwill and reputation by bringing a suit that is, at best, missing some of its core underpinnings, and, at worst, [grounded on] baseless allegations used to extract settlements." *U.S. ex rel. Clausen v. Lab. Corp. of Am., Inc., 290 F.3d 1301, 1313 n.24 (11th Cir. 2002)*. Thus, the Rule's "particularity" requirement is not satisfied by "conclusory allegations that certain statements were fraudulent; it requires that a complaint plead facts giving rise to an inference of fraud." *W. Coast Roofing & Waterproofing, 287 F. App'x at 86*. To meet this standard, the complaint needs to identify the precise statements, documents, or misrepresentations made; the **[*11]** time and place of, and the persons responsible for, the alleged statements; the content and manner in which the statements misled the plaintiff; and what the defendant gained through the alleged fraud. *See id.*

With these standards in mind, the Court turns to the City's amended complaint to see whether its claims are sufficiently alleged to withstand dismissal.

3. Analysis

The City brings five claims against all Defendants, alleging causes of action under (1) the *Florida Antitrust Act*, (2) common law fraud, (3) money had and received, (4) unjust enrichment, and (5) civil conspiracy. The Defendants seek to dismiss all claims. The Court holds that the City has met its pleading burden as to the PBM Defendants for all counts except common law fraud. The Court finds that the City only met its pleading burden as to the Manufacturer Defendants for its claims under the Florida Antitrust Act and Civil Conspiracy. The Court will address the parties' argument for each claim.

A. Florida Antitrust Act

At its root, the City alleges a price-fixing conspiracy between and among the Manufacturer Defendants and the PBM Defendants to artificially raise prices of insulin and other diabetes medications in order **[*12]** to facilitate the negotiation of large rebates in exchange for preferential formulary placement. (ECF No. 44 at ¶ 330.) The Defendants argue that this claim must be dismissed, as the City is an indirect purchaser of insulin, the City failed to state a claim, and the City failed to allege a hub-and-spoke conspiracy. (ECF No. 60 at 12-22.) The Court will address these arguments in turn.

1. Indirect Purchaser

Before reaching the legal sufficiency of the City's price-fixing claim, the Defendants argue that the City has no standing to bring such a claim as the City does not purchase insulin from the Manufacturer Defendants. The indirect purchaser rule provides that "purchasers who are two or more steps removed from the [antitrust] violator in a distribution chain may not sue." *Apple Inc. v. Pepper, 139 S.Ct. 1514, 1520, 203 L. Ed. 2d 802 (2019)* (discussing *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*).[4] The Supreme Court has identified multiple rationales for this rule, namely: "(1) facilitating more effective enforcement of antitrust laws; (2) avoiding complicated damages calculations; and (3) eliminating duplicative damages against antitrust defendants." *Apple, 139 S.Ct. at 1524*.

The Defendants argue that the City is an indirect purchaser of insulin. Tracing the distribution chain laid out above, the Defendants contend **[*13]** that the City is not a wholesaler or pharmacy, or even a consumer, that purchases insulin at its inflated price; rather, the City, in its capacity as a self-funded health plan, reimburses others for the medications at a rate that is potentially passed through multiple non-defendant intermediaries. (ECF No. 60 at 12-14); (*see* ECF No. 44 at ¶ 194.) However, the City argues that it is a direct purchaser, as it paid an unnamed PBM Defendant and received services from "one or more" PBM Defendants. (*Id.* at ¶¶ 277, 357.) The City contends that it is of no moment that it does not purchase medication from the Manufacturer Defendants, as it made purchases from at least one of the PBM Defendants, who are within the alleged price-fixing conspiracy.

The indirect purchaser doctrine is a judicial rule of statutory standing, meant to determine whether the plaintiff has adequately alleged an antitrust injury. *See In re Zantac (Ranitidine) Prods. Liab. Litig., MDL No. 2924, 546 F. Supp. 3d 1216, 2021 U.S. Dist. LEXIS 122580, 2021 WL 2685640, at *4 (S.D. Fla. June 30, 2021)* (Rosenberg, J.); *see also Todorov v. DCH Healthcare Authority, 921 F.2d 1438, 1448 (11th Cir. 1991)* ("Antitrust standing is best understood in a general sense as a search for the proper plaintiff to enforce the antitrust laws[.]"). While it is a "bright-line rule," applying the rule is not as simple as merely following the flow of money in a distribution chain. **[*14]** *See Apple Inc., 139 S.Ct. at 1523-24*. Rather, courts look to the alleged antitrust conduct and whether the plaintiff alleged an injury resulting from that conduct. *See id.* ("If the [antitrust defendant's] unlawful monopolistic conduct caused a consumer to pay [the defendant] a higher-than-competitive price, the consumer is entitled to sue[.]"). Therefore, the Court must determine whether the City sufficiently alleged that it was an "[1] immediate buyer [2] from [an] alleged antitrust violator[]." *See id. at 1521*.

The Court holds that the City met its pleading burden. Here, the City alleges that it paid a PBM Defendant for insulin (ECF No. 44 at ¶ 357), which is sufficient at this stage. Contrary to the Defendants' arguments, this allegation is not necessarily inconsistent with the City's allegation that it also contracts with insurance companies which then contract with PBMs. (*Id.* at ¶ 276.) The exact nature of the City's relationship to the PBM Defendants is largely a factual question that cannot be resolved on a motion to dismiss.

Moreover, the Defendants' argument that the City is an indirect purchaser as it did not pay the inflated reported price—which is allegedly paid by wholesalers—is unavailing. The Defendants point to **[*15]** *MSP Recovery*, which dismissed similar claims brought against the Manufacturer Defendants and which held that "the chain of distribution alleged in this matter is fatal" as the plaintiff there did not pay the inflated price directly. (ECF No. 60 at 14 (discussing *MSP Recovery Claims, Series, LLC v. Sanofi Aventis U.S. LLC, No. 3:18-cv-2211, 2019 U.S. Dist. LEXIS 54086, 2019 WL 1418129, at *16 (D.N.J. Mar. 29, 2019)*).) However, here, unlike in *MSP Recovery*, the City also sued the PBM Defendants, to which the City made payments. (*See* ECF No. 44 at ¶ 357); *see MSP Recovery, 2019 U.S. Dist. LEXIS 54086, 2019 WL 1418129, at *3*. Moreover, the court in *MSP Recovery* did not have the benefit of the Supreme Court's decision in *Apple Inc.*, which, as discussed above, focused on the alleged antitrust conduct rather than the chain of distribution. *See Apple Inc., 139 S.Ct. at 1523-24*. Here, the City alleges that the

[4] Florida courts have held that the indirect purchaser rule applies to the Florida Antitrust Act. *See Mack v. Bristol-Myers Squibb Co., 673 So.2d 100, 103 (Fla. Dist. Ct. App. 1996)*; *cf. Fla. Stat. § 542.32*. The City does not contend otherwise, and therefore the Court will apply the indirect purchaser rule to the Florida Antitrust Act.

Defendants agreed to large rebates, increased the reported price of insulin, and then overcharged health plans based on the inflated reported price. (*See* ECF No. 44 at ¶ 256.) At this stage, that is sufficient.

Last, the Defendants complain that the City did not identify the exact PBM Defendant to which it made payments. (ECF No. 60 at 13 n.5.) The City's failure to do so is not fatal. Courts will disregard generalized allegations where they fail to give notice to the defendants of the claims **[*16]** against them. *See Pierson v. Orlando Reg'l Healthcare Sys., Inc., 619 F. Supp. 2d 1260, 1274 (M.D. Fla. 2009)*. But allegations concerning statutory standing are different—such allegations are not primarily intended to apprise defendants of the claims against them, but rather to assure courts that jurisdiction exists. *Cf. Steel Co. v. Citizens for a Better Environment, 523 U.S. 83, 89, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998)* (noting that jurisdiction involves the courts' "statutory or constitutional power to adjudicate the case") (emphasis omitted). Therefore, "'at the pleading stage, general factual allegations . . . may suffice'" to establish statutory standing. *Cf. DiMaio, 520 F.3d at 1301* (quoting *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*). For this reason, the City's general allegation that it purchased insulin from a PBM Defendant suffices, and the City alleged that it was an "immediate buyer from [an] alleged antitrust violator[]." *See Apple Inc., 139 S.Ct. at 1521*.

2. Failure to State a Claim

Next, the Defendants argue that the City has failed to state a claim for violation of the Florida Antitrust Act. To state a claim for price fixing, a plaintiff must allege facts that "suggest 'an agreement or conspiracy[.]'"[5] *See Auto. Alignment & Body Serv., Inc. v. State Farm Mut. Auto. Ins. Co., 953 F.3d 707, 726 (11th Cir. 2020)* (quoting *Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 917 F.3d 1249, 1262 (11th Cir. 2019)*). The agreement may be "tacit or express," but the "crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement[.]" *See Auto. Alignment, 953 F.3d at 726* (quoting *Twombly, 550 U.S. at 553*). To plead such an agreement, a plaintiff may **[*17]** allege either (1) "[d]irect evidence" of such an agreement or (2) "circumstantial evidence" of a conspiracy. *See United Am. Corp. v. Bitmain Inc., 530 F. Supp. 3d 1241, 1258 (S.D. Fla. 2021)* (McAliley, Mag. J.). When alleging circumstantial evidence of an agreement, tacit or express, a plaintiff must do more than merely plead "parallel conduct" among the alleged conspiracy members. *See Auto. Alignment, 953 F.3d at 726*. Rather, a plaintiff must allege additional "plus factors" that make "parallel conduct 'more probative of conspiracy than of conscious parallelism.'" *See id.* (quoting *Quality Auto, 917 F.3d at 1262*). Plus factors can include: (1) price uniformity where market conditions would otherwise "ordinarily result in divergent pricing"; (2) actions contrary to economic self-interest; and (3) an opportunity to exchange information that would otherwise be undisclosed. *See Quality Auto, 917 F.3d at 1263-70*; *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1301 (11th Cir. 2003)*. These plus factors need not prove a conspiracy but need only "tend to exclude the possibility of independent action." *Williamson Oil, 346 F.3d at 1301* (quoting *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 571 n.35 (11th Cir. 1998)*).

Here, the City does not allege direct evidence of a conspiracy but relies on circumstantial evidence. Primarily, the City points to price increases that occurred in tandem and argues that there was no economic justification or self-interested rationale for such increases. (ECF No. 70 at 27-28.) The Defendants argue **[*18]** that this circumstantial evidence does not suffice, as the Manufacturer and PBM Defendants engage in individual rebate negotiations and as parallel price increases alone cannot state a claim for a price-fixing conspiracy. (ECF No. 60 at 16-19.) The Court will discuss the City's allegations concerning rebate negotiations and additional plus factors, although first the Court will briefly discuss the relevant market.

a. Relevant Market

---

[5] Courts look to the federal antitrust laws when evaluating claims brought under the Florida Antitrust Act. *See All Care Nursing Serv., Inc. v. High Tech Staffing Servs., Inc., 135 F.3d 740, 745 n.11 (11th Cir. 1998)* ("Federal and Florida antitrust laws are analyzed under the same rules and case law.").

Before looking to the City's alleged circumstantial evidence, the Court will conduct a brief inquiry into the nature of the relevant market, as alleged. Some knowledge of the market is important because courts must review the alleged antitrust behavior against "rational and competitive business strategy" driven by the relevant market. *See* Quality Auto, 917 F.3d at 1266-67 (quoting Twombly, 550 U.S. at 554). The demand for insulin and related medications is "highly inelastic," meaning that changes in price largely do not affect consumer demand. (ECF No. 44 at ¶ 354.) Moreover, the market is an oligopoly, in which 99% of insulin is manufactured by the Manufacturer Defendants. (*Id.*) And, as alleged, there is little-to-no difference between the vast majority of insulin products. (*See id.* at ¶ 157.) A market run by **[*19]** oligopolists and distinguished by inelastic demand for undifferentiated products is likely highly unresponsive to consumer preference. The City also alleges that demand for each of the Manufacturer Defendants' medications is driven by the PBM Defendants, who act as gatekeepers between the manufacturers, insurance and health plans, and consumers. (*Id.* at ¶¶ 13, 224, 317, 349.) The PBM Defendants, who account for approximately 75% of the PBM industry, negotiate with the Manufacturer Defendants and represent that they negotiate to bring costs down for their clients. (*Id.* at ¶¶ 211, 280, 283, 301.) In a competitive market, the PBM Defendants would compete with each other for both clients and cheaper medications. (*Id.* at ¶¶ 211, 227, 369, 371.)

b. Rebate Negotiations

Turning to the City's allegations concerning the Defendants' rebate negotiations, the Court holds that these allegations do not render the City's price-fixing conspiracy claim less suggestive. The Defendants argue the alleged fact that the Defendants engage in individual negotiations for ever-larger rebates demonstrates the lack of parallel, anticompetitive conduct. (ECF No. 60 at 16-17.) However, price-fixing agreements can **[*20]** take many forms—the general unifying principle is only that the agreement "directly affects price[.]" *See* Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1569 (11th Cir. 1991); United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940) (holding that a price fixing agreement is one with "the purpose and . . . the effect of raising, depressing, fixing, pegging, or stabilizing the price" of a good or service). The fact that the Defendants allegedly engage in individual rebate negotiations alone does not make the alleged conspiracy to fix the reported price of insulin less suggestive.[6] Therefore, the Court denies this basis to dismiss the City's price-fixing claim.

c. Plus Factors

Next, the Court holds that the City has done more than allege mere parallel price increases. As discussed above, a plaintiff must allege "plus factors" in support of a price-fixing conspiracy; a plaintiff may not rely solely on allegations of parallel conduct or conscious parallelism in prices. *See* Auto. Alignment, 953 F.3d at 726; Quality Auto, 917 F.3d at 1264. Of course, the City need not establish the *existence* of an agreement at this stage, but it must only plead allegations that support an inference of an agreement. *See* Twombly, 550 U.S. at 556 (requiring "plausible grounds to infer an agreement" at the motion-to-dismiss stage). The City sufficiently alleges plus factors with its allegations of parallel price increases **[*21]** to nudge its claim to plausibility.

The City alleges that the parallel price increases are contrary to the Defendants' self-interest and that the market would expect to see insulin prices diverge. (ECF No. 44 at ¶¶ 227, 344.) According to the City, as insulin is a largely undifferentiated product, manufacturers in a competitive market would have to compete on price. (*See* ECF No. 44 at ¶ 333); *see also* In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 658 (7th Cir. 2002) (Posner, J.) (noting that where "the product is uniform . . . competition would be expected"). And where costs fall, which the City alleges here, one would expect prices to fall as well. (ECF No. 44 at ¶ 33.) And where manufacturers compete on

---

[6] Moreover, these rebate negotiations are a core component of the City's alleged conspiracy. The City argues that these rebates are kickbacks in exchange for preferential formulary placement. (ECF No. 70 at 25); *cf.* Feaz v. Wells Fargo Bank, N.A., 745 F.3d 1098, 1111 (11th Cir. 2014) ("The defining characteristic of a kickback is divided loyalties.") (quoting Cohen v. Am. Sec. Ins. Co., 735 F.3d 601, 611 (7th Cir. 2013)). A kickback is still illegal even if firms agree to individually bid for it.

price, one would expect to see prices diverge, not converge. (*See id.* at ¶ 300.) Last, the City alleges that in a competitive market, lower insulin prices would follow negotiations by competitive PBMs. (*See id.* at ¶ 369.) The opposite has happened here.

The Defendants argue that this is merely an example of oligopolistic price leadership, which was explained in *Quality Auto. See Quality Auto, 917 F.3d at 1264-65*. Courts have largely found price leadership within concentrated industries to be rational—absent an anticompetitive agreement—when such behavior on price results in increased **[*22]** profit and maintenance of market share. *See id.* (explaining that oligopolists are not likely to reduce price and may instead follow price increases, as doing so will maximize industry profits while maintaining market share); *Williamson Oil, 346 F.3d at 1299* ("[C]onscious parallelism is the practice of interdependent pricing in an oligopolistic market by competitor firms that realize that attempts to cut prices usually reduce revenue without increasing any firm's market share, but that simple price leadership in such a market can readily increase all competitors' revenues.") (quoting *City of Tuscaloosa, 158 F.3d at 570*). In essence, commentators generally find that rational oligopolists follow price increases as it can be profit-maximizing, whereas anticompetitive oligopolists abide by an anticompetitive agreement, which "typically requires firms to do things that are not independently profit-maximizing but that maximize profits only if other participants adhere to the agreement." *See* Areeda and Hovenkamp, ***Antitrust Law*** ¶ 1432(b) n.20 (2017).

Here, the City has plausibly alleged that the Defendants have engaged in practices contrary to rational, competitive self-interest and that price uniformity has converged rather than diverged. First, the City alleges **[*23]** that the oligopolistic Manufacturer Defendants have raised prices without a corresponding increase in the net price (reported price minus rebates and other fees paid to the PBM Defendants). (ECF No. 44 at ¶¶ 186, 228, 249-52.) This suggests that the majority of the price increases have gone into rebates and other payments to the PBM Defendants while net prices remain stable. (*See id.*) Moreover, this suggests that the Manufacturer Defendants have only seen a modest rise in profit following the price increase, a rise that could be threatened by losing market share in rebate negotiations. (*See id.* at ¶¶ 224-25, 227-28.) Following a price increase when there is a concomitant risk of losing market share in subsequent negotiations is plausibly against the Manufacturer Defendants' self-interest, unless the risk of loss of market share is tempered by an anticompetitive agreement. *See* Areeda and Hovenkamp, ***Antitrust Law*** ¶ 1432(b) n.20; *see Quality Auto, 917 F.3d at 1264-65* (explaining that a rational oligopolist follows a price increase if the price increase would maximize industry profits and maintain some promise of stable market shares for each). Therefore, the City has plausibly alleged that the Manufacturer Defendants **[*24]** did not act self-interested in pursuit of profit-maximization, but rather that they agreed to raise prices and maintain market share.

Second, the City has alleged that the PBM Defendants have reaped the benefits of the price increases without negotiating insulin prices down or competing for clients. (*See* ECF No. 44 at ¶¶ 227, 348.) Therefore, despite the PBM Defendants' purported competitive interest in negotiating a reduction in prices, prices have risen. (*See id.* at ¶¶ 227, 371); *see also City of Tuscaloosa, 158 F.3d at 572-73* (holding that competitive oligopolists would likely compete for clients while costs were stable and prices rose).

In total, the City alleges a market where the Manufacturer Defendants do not compete for consumers on price, as one could expect in a market of undifferentiated products. And the City has plausibly alleged that the Manufacturer Defendants do not independently follow price leadership to maximize profits and maintain market share, as one could expect in an oligopoly. Moreover, the City alleges that the PBM Defendants do not compete for clients and for lower prices, as one would expect from oligopolist gatekeepers. Rather, the City alleges that the Manufacturer Defendants compete for formulary **[*25]** placement by increasing prices and bidding up rebates and that the PBM Defendants sell formulary placements in exchange for higher rebates rather than lower prices. (*See* ECF No. 44 at ¶ 330.) Therefore, the City has sufficiently alleged that parallel price increases may not have been enacted in response to legitimate, rational oligopolistic price leadership.[7]

---

[7] In a bullet-point list in its response, the City identifies several additional plus factors. (ECF No. 70 at 27-29.) As the City does not tie these plus factors to allegations in the amended complaint, it is unclear whether the City is contending that each of these factors apply in this case. This ambiguity is heightened as several of these plus factors are merely generalized statements of

3. Hub-and-Spoke Conspiracy

Last, the Defendants argue that the City's price-fixing claim fails as the City does not allege a separate agreement among the PBM Defendants to fix prices. The Defendants characterize the City's alleged conspiracy as a hub-and-spoke conspiracy, in which the hub—the Manufacturer Defendants—conspired with themselves and the various spokes—the PBM Defendants—to illegally raise the price of insulin. (ECF No. 60 at 21.) The Defendants argue that a hub-and-spoke conspiracy requires an agreement among the spokes. (*Id.* (citing *In re K-Dur Antitrust Litig., No. 01-cv-1652, 2016 U.S. Dist. LEXIS 22982, 2016 WL 755623, at *18 (D.N.J. Feb. 25, 2016)*.)

However, as the Defendants point out, all that is required is that the spokes must be "aware of each other and of their common aim." *See nFinanSe, Inc. v. Interactive Commc'ns Int'l, No. 1:11-cv-3728-AT, 2012 U.S. Dist. LEXIS 203106, 2012 WL 13009231, at *8 (N.D. Ga. July 24, 2012)* (quoting *United States v. Seher, 562 F.3d 1344, 1367 (11th Cir. 2009)*). While, as the Defendants argue, the spokes create their own formularies and conduct their own rebate negotiations, the City has alleged **[*26]** that the PBM Defendants, which account for approximately 75% of the relevant PBM market, are aware of each other and have an alleged common aim to maximize profits and increase prices through formulary placement negotiations. (*See generally* ECF No. 44 at ¶¶ 13-15, 211, 215, 307, 338, 342.)

For the reasons set out above, the Court **denies** the Defendants' motion to dismiss the City's price-fixing conspiracy claim.

B. Common Law Fraud

The Defendants also seek to dismiss the City's common-law fraud claim, in which the City alleges that the Defendants misrepresented or concealed the cost and related rebates of the medications at issue. (*See* ECF No. 44 at ¶ 368.) To state a claim for fraud, a party must allege "an intentional material misrepresentation upon which the other party relies to his [or her] detriment." *See Sun Life Assur. Co. of Can. v. Imperial Premium Fin., LLC, 904 F.3d 1197, 1222 (11th Cir. 2018)* (quoting *Lance v. Wade, 457 So.2d 1008, 1011 (1984)*). Moreover, a claim for fraud must be stated with particularity under *Rule 9(b)*; therefore, a plaintiff must allege "(1) the precise statements, documents, or misrepresentations made; (2) the time, place and person responsible for the statement; (3) the content and manner in which these statements misled [it]; and (4) what the defendants gained by the alleged fraud." *Wilding v. DNC Servs. Corp., 941 F.3d 1116, 1127 (11th Cir. 2019)*.

Turning **[*27]** first to the Manufacturer Defendants, the Defendants primarily argue that the City has not alleged any misrepresentations by the Manufacturer Defendants on which it relied. (ECF No. 60 at 22-23.) Courts have held that the publishing of artificially inflated prices constitutes a fraudulent statement. *See Harris Cnty., Tex. v. Eli Lilly and Co., No. H-19-4994, 2020 U.S. Dist. LEXIS 179199, 2020 WL 5803483, at *16 (S.D. Tex. Sept. 29, 2020)*; *MSP Recovery Claims, Series, LLC v. Sanofi Aventis U.S. LLC, No. 3:18-cv-2211, 2019 U.S. Dist. LEXIS 54086, 2019 WL 1418129, at *19 (D.N.J. Mar. 29, 2019)*. As the City alleges that the Manufacturer Defendants published such artificially inflated prices,[8] (*see* ECF No. 44 at ¶¶ 287, 374), the City has adequately alleged that the Manufacturer Defendants made a material misrepresentation.

---

legal principles, not all of which are applicable at this stage. Nonetheless, the Court holds that the plus factors identified above are sufficient to suggest a plausible agreement at the motion-to-dismiss stage.

[8] The Defendants argue that federal law prohibits including rebates in a list price for pharmaceutical products. (ECF No. 60 at 23 (discussing *42 U.S.C. § 1395w-3a(c)(6)(B)* (in relevant part, defining "wholesale acquisition cost" of a pharmaceutical product as "not including prompt pay or other discounts, rebates or reductions in price")).) However, the City's claim is that the Manufacturer Defendants inflated the price of insulin and other medications through the use of fraudulent rebates that served as kickbacks to the PBM Defendants. The Manufacturer Defendants cannot use *Section 1395w-3a(c)(6)(B)* to avoid the City's allegations of wrongdoing.

Next, the City also compiled a number of representations in which the PBM Defendants state that they worked for the benefit of health plans to lower the cost of insulin. (*See* ECF No. 44 at ¶¶ 279-287.) The Defendants argue that these statements amount to no more than puffery. (ECF No. 60 at 24.) Puffery refers to those statements that are "just too boosterish to justify reasonable reliance" and are usually composed of "exaggerated opinion," as opposed to factual misrepresentation. *See* *Carvelli v. Ocwen Fin. Corp., 934 F.3d 1307, 1318-19 (11th Cir. 2019)*. The PBM Defendants do not explain in what ways the statements that the City identified are **[*28]** puffery; rather, the alleged misrepresentations state that the PBM Defendants use the formularies to obtain the cheapest price for their clients. (*See* ECF No. 44 at ¶¶ 283, 285-87.) Such statements do not amount to mere opinion or nonquantifiable and vague claims. Therefore, such claims are not puffery and are actionable alleged misrepresentations.

However, the City has not adequately pled reliance. While the City alleged a number of misrepresentations, the City has not pointed, with the required particularity, to how the City relied on each. *See* *Mizzaro v. Home Depot, Inc., 544 F.3d 1230, 1237 (11th Cir. 2008)* (holding that a plaintiff must plead "the who, what, when, where, and how" under *Rule 9(b)*). The misrepresentations at issue largely concern statements made by various Defendants related to efforts to realize cost savings and health and safety outcomes for the PBM Defendants' clients. (*See* ECF No. 70 at 32.) As discussed above, the City's relationship to the Defendants is unclear. The City does not identify the Defendants with which it contracts, but the City could not detrimentally rely on a Defendant's representations concerning cost-savings or work performed for clients if the City was not a client of that Defendant. *See* *Ambrosia Coal & Constr. Co. v. Pages Morales, 482 F.3d 1309, 1317 (11th Cir. 2007)* (holding that *Rule 9(b)* requires **[*29]** "specific allegations with respect to each defendant"); *GEICO Gen. Ins. Co. v. Hoy, 136 So.3d 647, 651 (Fla. Dist. Ct. App. 2013)* (holding that detrimental reliance is where one "has been placed in a worse position that he or she would have been absent the fraud").

Absent more particularized allegations concerning in what ways the City detrimentally relied on misrepresentations by each Defendant, the Court finds that the City has not adequately alleged fraud. Therefore, the Court **grants** the Defendants' motion to dismiss the City's claim for common law fraud.

C. Unjust Enrichment and Money Had and Received

In Counts Three and Four, the City pleads claims for unjust enrichment and money had and received. Under Florida law, these claims have the same elements; a plaintiff must allege that "(1) [they] conferred a benefit on the defendant; (2) the defendant voluntarily accepted and retained that benefit; and (3) the circumstances are such that it would be inequitable for the defendant[] to retain it without paying the value thereof." *See* *Virgilio v. Ryland Grp., Inc., 680 F.3d 1329, 1337 (11th Cir. 2012)*; *see also* *Hakim-Daccach v. Knauf Int'l GmbH, No. 17-20495-Civ, 2017 U.S. Dist. LEXIS 193058, 2017 WL 5634629, at *7 (S.D. Fla. Nov. 22, 2017)* (Scola, J.) ("Under Florida law, the elements of a claim for money had and received and unjust enrichment are the same.").

Florida law requires that the plaintiff "directly confer" a benefit in order to state a claim **[*30]** for unjust enrichment and money had and received. *See* *Kopel v. Kopel, 229 So.3d 812, 818 (Fla. 2017)* ("[T]o prevail on an unjust enrichment claim, the plaintiff must directly confer a benefit to the defendant."). Here, the City does not allege that it directly conferred a benefit on the Manufacturer Defendants; rather, the City alleges that it contracted with insurance companies and the PBM Defendants, which then had separate relationships with the Manufacturer Defendants. (ECF No. 44 at ¶¶ 193, 276-77, 357.) Therefore, the City does not state a claim for Counts Three and Four against the Manufacturer Defendants. *See* *Belin v. Health Ins. Innovations, Inc., No. 19-61430-Civ, 2019 U.S. Dist. LEXIS 183600, 2019 WL 9575236, at *12 (S.D. Fla. Oct. 22, 2019)* (Seltzer, Mag. J.) (dismissing a claim for unjust enrichment as the plaintiff only directly conferred a benefit on a corporate subsidiary and not the corporate parent).

However, the City states a claim for unjust enrichment and money had and received as to the PBM Defendants. As discussed above, the City alleges that it paid money to and received services from some of the PBM Defendants. (*See* ECF No. 44 at ¶¶ 277, 357.) While the City does not identify specifically the nature of these payments and services, a claim for unjust enrichment and money had and received is "an equitable action and is less restricted and **[*31]** fettered by technical rules and formalities than any other form of action." *See United States v. Jefferson Elec. Mfg. Co., 291 U.S. 386, 402-03, 54 S. Ct. 443, 78 L. Ed. 859, 78 Ct. Cl. 846, 1934-1 C.B. 393 (1934)*. At the motion-to-dismiss stage, the City has adequately pled that the PBM Defendants received a benefit from the City and that it would be inequitable for the PBM Defendants to retain that benefit.

The Defendants argue that these claims, even if sufficiently pled, cannot be asserted against the PBM Defendants because contractual remedies control. *See Diamond "S" Dev. Corp. v. Mercantile Bank, 989 So.2d 696, 697 (Fla. Dist. Ct. App. 2008)* (holding that a claim for unjust enrichment "was precluded by the existence of an express contract between the parties concerning the same subject matter"). The Defendants point to alleged contracts that "guarantee[] [the City] all or some portion of the 'rebates'" received by the PBM Defendants. (ECF No. 60 at 31 (citing ECF No. 44 at ¶ 260).) However, the City alleges that the benefits conferred on the PBM Defendants are more than just the rebates; rather, the benefits include all payments retained by the PBM Defendants. (ECF No. 44 at ¶¶ 261, 379-380.)

In all, the Court **grants in part and denies in part** the Defendants' motion to dismiss the unjust enrichment and money had and received claims. The Court dismisses the claims for unjust enrichment and money **[*32]** had and received only as to the Manufacturer Defendants. These claims against the PBM Defendants were sufficiently pled and may proceed.

D. Civil Conspiracy

In Count Five, the City alleges civil conspiracy against all Defendants, contending that each conspired to violate the Florida Antitrust Act and to commit the torts of fraud, unjust enrichment, and money had and received. (ECF No. 44 at ¶ 393.) To state a claim for civil conspiracy, a plaintiff must allege "(1) an agreement between two or more parties; (2) to do an unlawful act or to do a lawful act by unlawful means; (3) the doing of some overt act in pursuance of the conspiracy; and (4) damage to plaintiff as a result of the acts done under the conspiracy." *Honig v. Kornfeld, 339 F. Supp. 3d 1323, 1345 (S.D. Fla. 2018)* (Middlebrooks, J.).

The Defendants argue that the civil conspiracy claim must be dismissed as the City failed to plead an agreement to commit an underlying independent tort. (ECF No. 60 at 31.) As the Court held that the City sufficiently alleged a claim under the Florida Antitrust Act, the Court also holds that the City adequately pled a civil conspiracy to violate the Florida Antitrust Act. Therefore, the Court **denies** the Defendants' motion to dismiss the civil conspiracy **[*33]** claim.

E. Statute of Limitations

The Defendants argue that each of the City's claims are time-barred by the applicable statutes of limitations. (ECF No. 60 at 32-36.) The City argues that various tolling doctrines apply so as to render its claims timely. (ECF No. 70 at 36-37.) At the outset, the Court notes that, in general, courts are hesitant to bar a claim under the applicable statute of limitations at the motion-to-dismiss stage. *See Spadaro v. City of Miramar, 855 F. Supp. 2d 1317, 1328 (S.D. Fla. 2012)* (Cohn, J.) ("Generally, whether a claim is barred by the statute of limitations should be raised as an affirmative defense in the answer rather than in a motion to dismiss.") (citing *Cabral v. City of Miami Beach, 76 So.3d 324, 326 (Fla. Dist. Ct. App. 2011)*). Therefore, courts will only dismiss a claim if "facts on the face of the pleadings show that the statute of limitations bars the action." *See id.* The Court will discuss the statute of limitations and any applicable tolling doctrine for each remaining claim.

1. Florida Antitrust Act

Claims brought under the Florida Antitrust Act must be brought within four years of accrual. *See Fla. Stat. § 542.26(1)*. The Defendants argue that the City's claims under the Act are time-barred to the extent that the City seeks to recover for payments made prior to June 16, 2017, or four years before the start of **[*34]** this suit. (ECF

No. 60 at 33.) However, courts recognize the "continuing violations" doctrine under the Florida Antitrust Act and hold that such claims are not time-barred if brought within four years "after the defendant commits (1) an overt act in furtherance of the antitrust conspiracy or (2) an act that by its very nature constitutes a 'continuing antitrust violation.'" *See* *Maralago Cay Homeowners Assoc., Inc. v. MHC Op. Ltd. P'ship, No. 21-80049-CV, 2021 U.S. Dist. LEXIS 248397, 2021 WL 6135181, at *4 (S.D. Fla. Aug. 5, 2021)* (Middlebrooks, J.) (quoting *Morton's Mkt., Inc. v. Gustafson's Dairy, Inc., 198 F.3d 823, 827-28 (11th Cir. 1999)*). Courts have held that "ongoing sales or the collection of payments over time" constitutes a continuing antitrust violation. *See id.* (quoting *Bray v. Bank of Am. Corp., 784 F. App'x 738, 741 (11th Cir. 2019)*). The City has alleged continuing payments for the medications at issue, and therefore the City has adequately alleged a continuing violation. (*See* ECF No. 44 at ¶ 304.) Therefore, the City's claim under the Florida Antitrust Act is not time-barred.

2. Money Had and Received, Unjust Enrichment, and Civil Conspiracy

The City's claims for money had and received, unjust enrichment, and civil conspiracy are subject to a four-year statute of limitations. *See* *Fla. Stat. § 95.11(3)(p)*. The Defendants argue that the general rule for accrual of claims applies here—that a common-law claim accrues when the plaintiff is first injured. (ECF No. 60 at 33.) However, the City argues **[*35]** that the discovery rule applies to these claims as well. (ECF No. 70 at 36-37.) The discovery rule provides that claims accrue when "the facts giving rise to the cause of action were discovered or should have been discovered with the exercise of due diligence." *See* *Fla. Stat. § 95.031(2)(a)*; *see also Butler Univ. v. Bahssin, 892 So.2d 1087, 1091 & n.3 (Fla. Dist. Ct. App. 2004)* (referring to this as the "discovery rule" or the "delayed discovery doctrine").

As relevant here, the discovery rule applies to all claims "founded upon fraud," which Florida courts have interpreted to include all claims grounded in fraudulent activity. *See* *Fla. Stat. § 95.031(2)(a)*; *Tejera v. Lincoln Lending Servs., LLC, 271 So.3d 97, 102-03 (Fla. Dist. Ct. App. 2019)* (holding that a civil conspiracy claim involving allegations of fraudulent activity was a claim "founded upon fraud"). Here, the City's remaining claims are all based on the City's underlying allegations of fraudulent antitrust behavior. (*See* ECF No. 44 at ¶¶ 383, 388, 393.) Therefore, the Court will apply the delayed discovery rule to the City's remaining claims.

The Defendants argue that the City should have discovered the facts giving rise to its claims on February 2, 2017, when a lawsuit alleging similar claims was filed against some of the Defendants in New Jersey. (ECF No. 60 at 32.) However, the Defendants do not cite any cases to support the proposition **[*36]** that a plaintiff should have discovered the facts giving rise to their claim merely because a similar lawsuit was filed in another jurisdiction. The Defendants do not argue that this New Jersey-based litigation was widely publicized; therefore, the Court is left to assume that the Defendants argue that reasonable diligence means plaintiffs must trawl court filings across the country for suits involving different plaintiffs with claims that may involve similar facts. Without any authority in support, the Court will not apply such a stringent understanding of reasonable diligence. Rather, the City has adequately pled that it could not have earlier discovered facts giving rise to its fraudulent-antitrust-based claims because of the opacity of the Defendants' pricing methods and the Defendants' refusal to disclose net prices. (*See* ECF No. 44 at ¶ 320.) The Court holds that the City has adequately alleged that its remaining claims are not barred by the statute of limitations.

4. Conclusion

For the reasons set out above, the Court **grants in part and denies in part** the Defendants' motion to dismiss. (**ECF No. 60**.) In particular, the Court **grants** the motion as to the common law fraud claim as **[*37]** well as the claims of money had and received and unjust enrichment as to the Manufacturer Defendants. The Court grants the motion on these claims **without leave to amend**. A request for leave to amend must be made by motion, which the City has not done. *See* *Newton v. Duke Energy Fla., LLC, 895 F.3d 1270, 1277 (11th Cir. 2018)* (holding that a request for leave to amend "has not been raised properly" unless made by motion). The Court **denies** the motion in all other respect.

Done and ordered in Miami, Florida, on January 21, 2022.

Judges: Robert M. Dow, Jr., United States District Judge.

Opinion by: Robert M. Dow, Jr.

Opinion

[*1041] MEMORANDUM OPINION AND ORDER

Pursuant to *Federal Rule of Evidence 702* and the Supreme Court's decision in *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, the parties have moved to exclude or limit the testimony of ten proposed expert witnesses: Edward M. Stroz [859]; Gordon Klein [863]; Daniel L. Rubinfeld [867]; Dr. Kevin Murphy [873]; Dr. Mark Israel [877]; Catharine Lawton [879]; Dr. Michael A. Williams [881]; Allan Stejskal [883]; Nancy Miracle [885]; and **[*1042]** Brian Halpin [887]. For the following reasons, the motions to exclude Williams [881] and Stejskal [883] are granted in part and denied in part. The motions to exclude Klein [863], Rubinfeld [867], Murphy [873], Israel [877], Lawton [879], and Halpin [887] are denied. The motion to exclude Miracle [885] is granted in part, denied in part, and deferred in part. The motion to exclude Stroz [859] is denied in part and deferred in part. As noted in the minute entry issued today, the parties will be given an opportunity to (a) review this comprehensive opinion, (b) submit supplemental briefs on how, if at all, these rulings affect the briefing and proper disposition **[**21]** of the pending summary judgment motions, and (c) advise the Court on any other pertinent developments of which they believe the Court should be aware. The Court will then prepare and issue a second, comprehensive opinion disposing of the summary judgment motions in due course.

I. Background

The background of this MDL has been set forth in multiple opinions, knowledge of which is assumed here. See, e.g., [176], [425], [504], [505], [506], [507], [749], [857]. The Court briefly recounts this background here, to provide context for its analysis of the parties' *Daubert* motions.

A. The DMS Market

A data management system ("DMS") is software that automobile dealers use to help manage their businesses, including accounting, sales, inventory, service, customer information, and human resources functions. Dealers typically store a substantial portion of their data within their DMSs. Virtually every franchised new car dealership in the United States now uses a DMS. Defendants CDK Global, Inc. ("CDK") and The Reynolds and Reynolds Company ("Reynolds") both provide DMSs to auto dealerships throughout the United States. CDK and Reynolds each have significant market power in the DMS market. Together, they control **[**22]** approximately 75% of the United States market by number of dealers and approximately 90% when measured by number of vehicles sold.

B. The DIS Market

To effectively run their dealerships, dealers engage third-party software application providers—also known as "vendors"—to provide services such as inventory management, customer relationship management, warranty services, repair orders, and electronic vehicle registration and titling. Vendors need to access and use data located on dealers' DMSs in order to provide their services to dealers. Vendors generally obtain access by engaging data integrators, which provide data integration services ("DIS") to vendors for a fee. Data integrators (also called "DIS providers") collect and standardize data stored on DMSs. Their DIS services allow vendors to access dealer data and extract, organize, and integrate it into a usable format. They may also provide value-enhancing services, such as putting data from different DMSs into a uniform format and correcting data errors.

CDK and Reynolds each offer data integration to vendors. CDK's DIS is called Third Party Access ("3PA") and Reynolds' is called the Reynolds Certified Interface ("RCI"). 3PA and RCI **[**23]** only provide DIS for Defendants' respective DMSs. There are also independent third-party data integrators—including Plaintiffs Authenticom, Inc. ("Authenticom") and Loop LLC ("Autoloop"), among others—that offer DIS to vendors. CDK owns two third-party data integrators: Digital Motorworks, Inc. ("DMI") and IntegraLink.

C. The Challenged Agreements

Historically, CDK and Reynolds had "open" DMSs, meaning that they did not **[*1043]** take steps to prevent their dealer clients from authorizing third-party access to the dealers' data. Over time, Reynolds began to "close" its DMS by selectively blocking third-party data integrators from accessing dealer data stored on the Reynolds DMS. As Reynolds allegedly reduced competition for DIS through its blocking activities, Reynolds increased the fees it charged for data integration through its own RCI product. CDK, by contrast, marketed its DMS as an "open" system.

Various Plaintiffs (which are specifically identified where relevant in this opinion) allege that by the summer of 2013, Reynolds was taking aggressive action to prevent independent DIS providers from serving dealers who obtained their DMSs from Reynolds. This hampered CDK's ability to provide DIS **[**24]** to those dealers. Around September 2013, CDK allegedly abruptly stopped trying to compete with Reynolds by emphasizing CDK's "openness"—*i.e.*, the ease with which independent App vendors can access data in the dealer's DMS using any DIS service they choose (subject to dealer approval), and the cost of doing so. Plaintiffs posit that this was due to an agreement between Reynolds and CDK to drive independent DIS providers from the market by, among other things, agreeing to a common marketing message on "data security" to condition the market to accept that pretext for excluding independent DIS providers. In return, Plaintiffs allege, Reynolds allowed CDK access to Reynolds' platform.

In February 2015, CDK and Reynolds entered into three written agreements: (1) the Data Exchange Agreement or "Wind Down" Agreement; (2) the 3PA Agreement; and (3) the RCI Agreement. In the Data Exchange Agreement, CDK agreed to wind down its data integration business on the Reynolds DMS, with Reynolds promising not to block CDK's access to the Reynolds system during the wind-down period (approximately 5 years). During that period, Reynolds agreed that CDK could continue to extract dealer data just as it had **[**25]** before, using login credentials provided by dealers. As for other independent data integrators, CDK and Reynolds each agreed not to take any steps to assist any person that it reasonably believed to have plans to access or integrate with the other party's DMS.

The other two written agreements, the 3PA Agreement and the RCI Agreement (collectively referred to as the Data Integration Agreements) provided CDK and Reynolds with reciprocal access to each other's DIS programs. Pursuant to the agreements, Reynolds received five free years of 3PA access. Reynolds also agreed to access CDK's DMS exclusively through 3PA and not to contract with any third parties to access the system. The agreements also provided that CDK and Reynolds would deny data integrators access to each other's DMSs.

In addition to written agreements, senior executives from the two Defendants also allegedly agreed to restrict access to dealer data and "destroy" data integrators like Authenticom. Plaintiffs allege that, by eliminating competition for data integration services, CDK and Reynolds have seized control over dealer data and thwarted dealers' ability to control access to and the usage of their data. As a result, **[**26]** vendors have no choice but to access dealer data through CDK's and Reynolds' own DISs, at much greater cost than they would incur if they purchased services from independent data integrators. Plaintiffs allege that shortly after CDK and Reynolds entered into the Data Exchange Agreement, CDK began renegotiating contracts with vendors for 3PA access and requiring vendors to use 3PA exclusively for all of their dealer-customers on CDK DMSs.

[*1044] D. The EVR Market

Since 1992, CDK and Reynolds have also been parties to a joint venture that wholly owns Defendant Computerized Vehicle Registration, Inc. a/k/a CDK Vehicle Registration, Inc. ("CVR"). CDK owns 80% of CVR, while Reynolds owns 20%. CVR, like Plaintiff Motor Vehicle Software Corporation ("MVSC"), is a provider of electronic vehicle registration and titling services ("EVR"). EVR providers partner with state governments to issue the physical registration, license plates, and titles for vehicles sold at car dealerships. In order to process the registration and title with a state, EVR providers require basic information about the car sale, including the vehicle, buyer, and financing details. That data is stored on a dealership's DMS.

Plaintiff **[**27]** MVSC alleges that in January 2014, and possibly earlier, CDK and Reynolds entered into a horizontal agreement to block MVSC from participating in their third-party access programs (3PA and RCA). In addition to blocking MVSC from participating in their 3PA and RCI programs, CDK and Reynolds have allegedly cut off MVSC's ability to access car sales data through intermediaries. According to MVSC, CDK and Reynolds have intimidated dealers by threatening that they will be in breach of their DMS contracts if they provide MVSC with data from their DMSs.

E. Procedural Matters

Based on these facts, the parties have brought a variety of claims and counterclaims, which have been consolidated in this MDL. Some of the claims have been dismissed, while others have been resolved through settlement. The parties have engaged in extensive discovery and filed cross-motions for summary judgment, which are currently pending. See [777], [949], [954], [963], [964], [967], [970], [976]. Also pending are several motions by Defendants to bar certain claims and theories that, according to Defendants, were not timely disclosed. See [773], [787].

The claims that remain active include: Authenticom's claims against **[**28]** CDK and Reynolds for horizontal conspiracy and exclusive dealing in violation of *Sherman Act § 1*, monopolization in violation of *Sherman Act § 2*, and tortious interference; Autoloop's claims against CDK for horizontal conspiracy and exclusive dealing in violation of *Sherman Act § 1*, monopolization in violation of *Sherman Act § 2*, and parallel Florida state law claims; the proposed Dealership Class's claims against CDK for conspiracy and exclusive dealing in violation of *Sherman Act §§ 1* and *2* and related state antitrust and consumer protection laws; MVSC's claims against Reynolds for conspiracy in violation of *Sherman Act §§ 1* and *2* and related California and Illinois state law laws; and Reynolds and CDK's counterclaims against various Plaintiffs for breach of contract, violations of the *Computer Fraud and Abuse Act ("CFAA")*, the Digital Millennium Copyright Act ("DMCA"), and the *Defend Trade Secrets Act ("DTSA")*, and related Wisconsin and California state law claims.

II. *Daubert* Standard

Rule 702 and *Daubert* provide the legal framework for the admissibility of expert testimony. See *Bielskis v. Louisville Ladder, Inc., 663 F.3d 887, 893-94 (7th Cir. 2011)*; *United States v. Pansier, 576 F.3d 726, 737 (7th Cir. 2009)*. *Rule 702* requires that the district judge act as a "'gate-keeper' who determines whether proffered expert testimony is reliable and relevant before accepting a witness as an expert." *Winters v. Fru-Con Inc., 498 F.3d 734, 741 (7th Cir. 2007)* (quoting *Autotech Tech. Ltd. Partnership v. Automationdirect.com, 471 F.3d 745, 749 (7th Cir. 2006)* (internal quotation marks **[**29]** omitted)); see also *Kumho Tire Co., Ltd. v. Carmichael, **[*1045]** 526 U.S. 137, 147-49, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*; *Daubert, 509 U.S. at 589*.

Under *Federal Rule of Evidence 702*, "[a] witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case." *Fed. R. Evid. 702*; see also *Ortiz v. City of Chicago, 656 F.3d 523, 536 (7th Cir. 2011)*. *Rule 702* and *Daubert* require the district court to engage in a three-step analysis before admitting expert testimony. The court must determine (1) "whether the witness is qualified"; (2) "whether the expert's methodology is scientifically reliable"; and (3) "whether the testimony will 'assist the trier of fact to understand the evidence or to determine a fact in issue.'" *Myers v. Ill. Cent. R.R. Co., 629 F.3d 639, 644 (7th Cir. 2010)* (quoting *Ervin v. Johnson & Johnson, Inc., 492 F.3d 901, 904 (7th Cir. 2007)*). The proponent of the expert bears the burden of demonstrating, by a preponderance of the evidence, that "the expert's testimony would satisfy the *Daubert* standard." *Lewis v. CITGO Petroleum Corp., 561 F.3d 698, 705 (7th Cir. 2009)* (citing *Fed. R. Evid. 702* advisory committee's note (2000 Amends.)). District judges possess considerable discretion **[**30]** in dealing with expert testimony. *Carroll v. Otis Elevator Co., 896 F.2d 210, 212 (7th Cir. 1990)*; see also *General Electric Co. v. Joiner, 522 U.S. 136, 141-43, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997)* (holding that abuse of discretion standard applies in reviewing district court rulings on admissibility of proposed *Rule 702* opinion testimony).

A witness is qualified as an expert if she has sufficient "knowledge, skill, experience, training, or education" relating to the subject matter of her testimony. *Demouchette v. Dart, 2012 U.S. Dist. LEXIS 177324, 2012 WL 6568232, at *3 (N.D. Ill. Dec. 14, 2012)* (quoting *Fed. R. Evid. 702*). "Whether a witness is qualified as an expert can only be determined by comparing the area in which the witness has superior knowledge, skill, experience, or education with the subject matter of the witness's testimony." *Gayton v. McCoy, 593 F.3d 610, 616 (7th Cir. 2010)* (quoting *Carroll, 896 F.2d at 212*).

As to reliability, the Court must ensure that a proposed expert's methodology is "scientifically valid," *Daubert, 509 U.S. at 592-93*, and that her conclusions are "based on sufficient facts or data," *Fed. R. Evid. 702(b)*. "The non-exclusive list of *Daubert* reliability factors for scientific evidence includes whether or not the theory or technique has been (1) tested, (2) subjected to peer review and publication, (3) analyzed for known or potential error rate, and/or is (4) generally accepted within the specific scientific field." *Lapsley v. Xtek, Inc., 689 F.3d 802, 810 (7th Cir. 2012)* (citing *Daubert, 509 U.S. at 593-94*). But this "list of specific factors neither necessarily nor exclusively applies to all experts or in every case." *Kumho Tire, 526 U.S. at 141* (internal **[**31]** quotation marks omitted).

"Rule 702's requirement that expert opinions be supported by 'sufficient facts or data' means 'that the expert considered sufficient data to employ the methodology.'" Manpower, Inc. v. Insurance Co. of Pennsylvania, 732 F.3d 796, 808 (7th Cir. 2013) (quoting Stollings v. Ryobi Technologies, Inc., 725 F.3d 753, 766 (7th **[*1046]** Cir. 2013)). "For example, if an expert seeks to testify about an average gross sales price but is going to base the testimony on sales to only a single customer, a court would appropriately exclude the testimony because a single observation does not provide a sufficient basis for calculating an average." Stollings, 725 F.3d at 766. Whether an expert "selected the best data set to use, however, is a question for the jury, not the judge." Manpower, 732 F.3d at 809; see also A.H. v. Illinois High School Ass'n, 263 F. Supp. 3d 705, 714 (N.D. Ill. 2017) (observing that "the 'sufficient facts or data' requirement is a somewhat Gordian one—an expert must take into account all of those facts which are necessary to support [her] findings, not just some of them, and [she] cannot conveniently disregard contrary evidence, but a party cannot disqualify the other side's expert simply by disputing the facts upon which [she] relied" (internal quotation marks and citation omitted)). Assuming there is "a rational connection between the data and the opinion," the "expert's reliance on faulty information is a matter to be explored on cross-examination; **[**32]** it does not go to admissibility." Manpower, 732 F.3d at 809 (citing Walker v. Soo Line R.R. Co., 208 F.3d 581, 589 (7th Cir. 2000)). "Our system relies on cross-examination to alert the jury to the difference between good data and speculation." Schultz v. Akzo Nobel Paints, LLC, 721 F.3d 426, 432 (7th Cir. 2013).

"[T]he law grants a district court the same broad latitude when it decides *how* to determine reliability as it enjoys in respect to its ultimate reliability determination." Kumho Tire, 526 U.S. at 142; see also Pansier, 576 F.3d at 737; Lewis, 561 F.3d at 704-05. At bottom, the Court's goal is "to assure that experts employ the same 'intellectual rigor' in their courtroom testimony as would be employed by an expert in the relevant field." Jenkins v. Bartlett, 487 F.3d 482, 489 (7th Cir. 2007) (quoting Kumho Tire, 526 U.S. at 152). Its "focus, of course, must be solely on principles and methodology, not on the conclusions that they generate." Daubert, 509 U.S. at 595. Nonetheless, as the Supreme Court has recognized, "conclusions and methodology are not entirely distinct from one another," and while "[t]rained experts commonly extrapolate from existing data[,] ... nothing in either Daubert or the Federal Rules of Evidence requires a district court to admit opinion evidence that is connected to existing data only by the *ipse dixit* of the expert." General Electric, 522 U.S. at 146. "'An expert who supplies nothing but a bottom line supplies nothing of value to the judicial process.'" Wendler & Ezra, P.C. v. Am. Int'l Grp., Inc., 521 F.3d 790, 791-92 (7th Cir. 2008) (quoting Mid-State Fertilizer Co. v. Exch. Nat'l Bank, 877 F.2d 1333, 1339 (7th Cir. 1989)). In short, "[i]t is critical under Rule 702 that there be a **[**33]** link between the facts or data the expert has worked with and the conclusion the expert's testimony is intended to support." United States v. Mamah, 332 F.3d 475, 478 (7th Cir. 2003). Where that link is missing, "[a] court may conclude that there is simply too great an analytical gap between the data and the opinion proffered." General Electric, 522 U.S. at 146.

Finally, the requirement that evidence or testimony assist the trier of fact to understand the evidence or to determine a fact in issue "goes primarily to relevance." Daubert, 509 U.S. at 591. "Expert testimony which does not relate to any issue in the case is not relevant and, ergo, nonhelpful." *Id.* (internal quotation marks and citation omitted); see also Cage v. City of Chicago, 979 F. Supp. 2d 787, 804 (N.D. Ill. 2013).

[*1047] III. Plaintiffs' Antitrust Claims

A. Legal Framework

The primary claims in this case arise under Sections 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1 and 2. Before turning to the parties' specific challenges to the experts who address the Sherman Act claims, the Court finds it useful to outline the legal requirements for such claims, the unique way that summary judgment is applied to them, and the interaction and differences between summary judgment and Daubert analyses in the antitrust context.

Section 1 of the Sherman Act "is designed to prevent businesses from entering into collusive agreements." Omnicare, Inc. v. UnitedHealth Group, Inc., 629 F.3d 697, 705 (7th Cir. 2011). It prohibits "[e]very contract, combination ... or conspiracy, **[**34]** in restraint of trade or commerce," 15 U.S.C. § 1, "though courts have long restricted its reach to agreements that unreasonably restrain trade." *Omnicare, 629 F.3d at 705* (citing *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*). "To prevail under *§ 1* under any theory, plaintiffs generally must prove three things: (1) that defendants had a contract, combination, or conspiracy ('an agreement'); (2) that as a result, trade in the relevant market was unreasonably restrained; and (3) that they were injured." *Id.*; see also *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585-86, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*.

Allegations concerning the existence of an agreement "'usually take one of two forms: (1) direct allegations of an agreement, like an admission by a defendant that the parties conspired; or (2) more often, circumstantial allegations of an agreement, which are claimed facts that collectively give rise to a plausible inference that an agreement existed.'" *Always Towing & Recovery, Inc. v. City of Milwaukee, 2 F.4th 695, 703 (7th Cir. 2021)* (quoting *Alarm Detection Sys., Inc. v. Village of Schaumburg, 930 F.3d 812, 827 (7th Cir. 2019)*). "The task before any plaintiff is thus to find and produce evidence that reveals coordination or agreement[.]" *Kleen Prods. LLC v. Ga.-Pac. LLC, 910 F.3d 927, 936 (7th Cir. 2018)*. "To show concerted action, antitrust plaintiffs must produce evidence that would allow a jury to infer that the alleged conspirators 'had a conscious commitment to a common scheme designed to achieve an unlawful objective.'" *Omnicare, 629 F.3d at 705* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*). Put another way, "the circumstances of the **[**35]** case must reveal 'a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.'" *Id.* (quoting *American Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575, (1946)*). "More evidence is required the less plausible the charge of collusive conduct." *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d 651, 661 (7th Cir. 2002)*.

At the summary judgment stage—the next step in this case—the plaintiff's "'offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently.'" *Kleen Products, 910 F.3d at 934* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*); see also *Matsushita, 475 U.S. at 588*; *Miles Distributors, Inc. v. Specialty Constr. Brands, Inc., 476 F.3d 442, 449 (7th Cir. 2007)* ("When a plaintiff attempts to defeat summary judgment by highlighting circumstantial evidence of a conspiracy, some of the evidence must tend to exclude the possibility that the alleged conspirators **[*1048]** acted independently rather than in concert."). "[A]n antitrust plaintiff, like all others, is entitled to try to meet that burden with either direct or circumstantial evidence." *Kleen Products, 910 F.3d at 934*; see also *In re Text Messaging Antitrust Litigation, 630 F.3d 622, 628-29 (7th Cir. 2010)*; *Miles Distributors, 476 F.3d at 449*). Of course, determining whether an unlawful arrangement exists is "much easier if there [is] a smoking gun," such as an admission by an insider, "buried in [the often] voluminous record." *Omnicare, 629 F.3d at 706*; see also *In re Plasma-Derivative Therapies Antitrust Litigation, 764 F. Supp. 2d 991, 998 (N.D. Ill. 2011)*; cf. *High Fructose Corn Syrup Antitrust Litigation, 295 F.3d at 654* ("admission by the defendants that they agreed to fix their prices is all the proof a plaintiff needs"). But more typically, the plaintiff's evidence will be inferential **[**36]** and "of two types—economic evidence suggesting that the defendants were not in fact competing, and noneconomic evidence suggesting that they were not competing because they had agreed not to compete." *Id. at 655*. "While no single piece of information may win the day, the whole may be greater than the sum of its parts in tending to exclude the possibility of conscious parallelism." *Kleen Products, 910 F.3d at 934*.

In contrast to *Section 1* of the *Sherman Act*, *Section 2* "covers both concerted and independent action, but only if that action 'monopolize[s],' or 'threatens actual monopolization,' a category that is narrower than restraint of trade." *American Needle, Inc. v. National Football League, 560 U.S. 183, 190, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (quoting *15 U.S.C. § 2* and *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*). "'Monopoly power is the power to control prices or exclude competition.'" *Braman v. The CME Group, Inc., 149 F. Supp. 3d 874, 896 (N.D. Ill. 2015)* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*). "To state a claim for monopolization under *Section 2*, a plaintiff must allege that that defendant engaged in predatory or anticompetitive conduct." *In re Dealer Management Systems Antitrust Litigation, 362 F.Supp.3d 477, 497-98 (N.D. Ill. 2019)* (citing *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 854 (7th Cir. 2011)*). "Where defendant has engaged in unlawful restraint of trade that would independently violate *Section 1* ... , it is well established that it also violates *Section 2* if it acquires or maintains a monopoly by means of that restraint of trade." Id. at 498 (quoting Gumwood HP Shopping v. Simon Prop. Group, Inc., 2013 U.S. Dist. LEXIS 92133, 2013 WL 3214983, at *7 (N.D. Ind. Mar. 13, 2013)).

To recover under the antitrust laws, a plaintiff "must prove that [its] damages were caused by the *unlawful* acts of the defendant." **[**37]** MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1161 (7th Cir. 1983) (citing 15 U.S.C. § 15; emphasis in MCI); cf. Omnicare, 629 F.3d at 705 ("section 4 of the Clayton Act, 15 U.S.C. § 15, provides a private cause of action for the enforcement of § 1 [of the Sherman Act]"). "This is the essence of 'antitrust injury'"—*i.e.*, "'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' actions unlawful.'" MCI, 708 F.2d at 1161 (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). In other words, "[i]f a plaintiff has suffered financial loss from the *lawful* activities of a competitor, then no damages may be recovered under the antitrust laws." *Id.*

Once causation of damages has been established, "[c]alculating damages presents a separate challenge." In re Sulfuric **[*1049]** Acid Antitrust Litigation, 743 F. Supp. 2d 827, 866 (N.D. Ill. 2010). "'Damages calculations in antitrust cases seek to compare plaintiffs' actual experience in the real world with what the plaintiffs' experience would have been, 'but for' the antitrust violation.'" In re Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d 14, 56 (D.D.C. 2017) (quoting In re Pool Prods. Distribution Mkt. Antitrust Litigation, 166 F. Supp. 3d 654, 678 (E.D. La. 2016)); see also Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993). "[T]he *amount* of damages may be determined by a just and reasonable estimate as long as the jury verdict is not the product of speculation or guess work." MCI, 708 F.2d at 1161 (emphasis in MCI); see also In re Sulfuric Acid Antitrust Litig., 446 F. Supp. 2d at 924; Fontana Aviation, Inc. v. Beech Aircraft Corp., 432 F.2d 1080, 1087 (7th Cir. 1970) ("Once there is sufficient evidence of the fact of damage to go to the jury, the assessment of the amount is largely a matter of the jury's consideration of all the evidence." (citing Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946))).

The Supreme Court "has **[**38]** been willing to accept a degree of uncertainty in the calculation of damages" in antitrust cases and, therefore, "strict proof of what damages have been caused by which acts has not been required." MCI, 708 F.2d at 1161 (citing Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962); Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 51 S. Ct. 248, 75 L. Ed. 544 (1931)). "Not requiring strict disaggregation of damages among the various unlawful acts of the defendant serves to prevent a defendant from profiting from his own wrongdoing and makes sense when damages arise from a series of unlawful acts intertwined with one another." *Id.* (citing Bigelow, 327 U.S. at 264-65); see also J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 565-67, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981); Ohio-Sealy Mattress Mfg. Co. v. Kaplan, 745 F.2d 441, 448 (7th Cir. 1984); Sulfuric Acid Antitrust Litigation, 446 F. Supp. 2d at 924. "It is essential, however, that damages reflect only the losses directly attributable to *unlawful* competition." MCI, 708 F.2d at 1161 (emphasis in MCI). Plaintiffs must "prove in a reasonable manner the link between the injury suffered and the *illegal* practices of the defendant." *Id.*

Assessing the reliability of experts' economic testimony in the antitrust context presents some unique challenges, as "[t]he Daubert rules were not developed with either antitrust or economics in mind." Phillip E. Areeda & Herbert Hovenkamp, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION ¶ 309a, at 4 (4th & 5th eds. 2015-2021) ("Areeda & Hovenkamp"). "Daubert itself is based on a fairly traditional concept of the scientific **[**39]** method in which investigation proceeds by the formation of a hypothesis, the development of experiments that 'test' the hypothesis, with the durability of the hypothesis increasing and decreasing as tests are repeated"—a concept that "works well for natural and physical sciences," but "is not particularly well suited to economics." *Id.*; see also *id.* at 2 ("economics' criteria for testability ... sometimes fall short of the criteria stated for other sciences"). Antitrust courts have generally "responded to questionable or novel economic testimony by being fairly reluctant to exclude it under Daubert rules," while at the same time "scrutiniz[ing] admitted testimony carefully and often harshly under summary judgment rules." *Id.*

"The cumulative nature of expert and non-expert testimony generally makes summary judgment rather than Daubert exclusion a much more practical vehicle in **[*1050]** antitrust cases, at least in the majority of circumstances where the basic competency of the expert or her methodology is not in issue." Areeda & Hovenkamp

¶ 309c2, at 16. For instance, when an expert opines on whether certain conduct is indicative of collusion, if the challenged testimony "is left in, then the judge considering **[**40]** a motion for summary judgment can look at *all* parts of the record: the economist's testimony showing that the structural conditions, the incentives, or the conduct make a certain agreement plausible or likely; and the testimony of other witnesses concerning whether such an agreement actually occurred." *Id.* "In this process, the court almost always takes into account doubts about the credibility, relevance, or robustness of what the expert had to say." *Id.* Another topic that may be more appropriately left for summary judgment is disaggregation of damages—for instance, where a defendant challenges a damages expert on the basis that she is unable "to show what portion of [the] plaintiff's loss resulted from unlawful conduct." *Id.* at 17. "Assuming that the economist is using acceptable criteria," in many cases "the correct resolution is not exclusion of the testimony under *Daubert* but rather a summary judgment grant because the expert's testimony has not been able to isolate those elements of the plaintiff's damage that were caused by the antitrust violation." *Id.* With these principles in mind, the Court turns to the parties' *Daubert* challenges concerning expert testimony on the *Sherman Act* claims.

B. Economics Experts

[41] 1. Israel [877] — Authenticom, Autoloop, and MVSC's expert on antitrust collusion, damages**

Defendants move to exclude certain opinions of Dr. Mark Israel. See [889-1] (report). Israel has a Ph.D. in economics from Stanford University. He specializes in the economics of industrial organization. He has taught courses at Stanford and the Kellogg School of Management, Northwestern University, concerning business strategy, industrial organization economics, and econometrics. Since 2006, Israel has worked at Compass Lexecon, an economic consulting firm, where his work has focused on the application of economic theory and econometric methods to competitive analysis of the impact of mergers, antitrust issues including a wide variety of singlefirm and multi-firm conduct, class certification, and damages estimation.

Israel has been retained by Plaintiffs Authenticom, AutoLoop, and MVSC to analyze the economic impact of Defendants' alleged unlawful conduct. More particularly, Israel was asked to: (1) analyze the relevant markets in which the alleged conduct occurred; (2) assess the extent of Defendants' market power in those relevant markets; (3) provide an economic analysis of whether and how Defendants' **[**42]** alleged conduct was jointly profitable for Defendants and harmful to competition in the relevant markets; and (4) quantify the impact of that alleged conduct on competition, competitors, and customers in the relevant markets, including a calculation of the damages suffered by vendors. Israel also responds to certain arguments raised by Defendants' economic experts. His "fundamental conclusion," which he elaborates in a 195-page report [889-1], a 160-page reply report [889-2], and deposition testimony [889-3], is as follows: "CDK's and Reynolds' actions have harmed competitors, competition, and consumers in DIS markets and App markets and have harmed competition and consumers in the DMS market. ... [T]he mechanism of this harm was the joint blocking of independent DIS providers from accessing the CDK and Reynolds DMSs, which effectively monopolized CDK's and Reynolds' respective DIS markets, thus leading to **[*1051]** higher DIS prices and higher DIS costs to App vendors, thereby also harming competition in App markets." [889-1] at 10. Israel estimates damages from overcharges due to DIS price elevation, forced switching to CDK or Reynolds' DIS services, and in total. See *id.* at 129-33.

a. Collusion [43]**

Defendants first challenge Israel's opinions concerning collusion by criticizing what they label his testimony on "openness." Israel takes the position that Defendants' actions are indicative of collusion. He explains that for many years Defendants competed on DMS "openness," which is "the ease with which independent App vendors can access data in the dealer's DMS using any DIS service they choose (subject to dealer approval), and the cost of doing so." [1001] at 9. Before Defendants' alleged collusive agreements, Reynolds was less "open" than CDK, because it more vigorously blocked independent DIS providers. CDK competed for customers on the basis that its dealers were free to use independent DIS providers on its platform, which caused Reynolds to lose sales to CDK. Israel recounts that in July 2013, Reynolds began taking more aggressive action to prevent independent DIS providers from serving Reynolds dealers, which hampered CDK's data integration services on Reynolds' DMSs. In September 2013, CDK abruptly stopped competing with Reynolds on the basis of "openness." Among other things, CDK and Reynolds allegedly agreed to convey a common message on data security. In return, Reynolds **[**44]** allowed CDK access to its platform. Israel explains how, based on the framework to which Defendants agreed in 2013, they reached formal agreements aligning their data access policies by February 2015, "setting the stage for CDK's blocking of independent DIS providers." *Id.* at 10 (citing [889-1] at 98). Israel summarizes Defendants' shared strategic goal of eliminating competition from independent DIS providers and the evidence that they explicitly agreed to cooperate in doing so. See [889-1] at 96-97.

Defendants move to exclude Israel's opinion that CDK and Reynolds agreed to eliminate competition on "openness" on the basis that the opinion is "hopelessly vague" and therefore unreliable and unhelpful to the factfinder. [878] at 7. Defendants maintain that "[b]y refusing to provide any firm sense of what an agreement as to 'openness' entails, Dr. Israel can (and does) count any fact he wants as evidence in support of his theory." *Id.* at 11. Defendants further argue that the vagueness of Israel's opinion makes it impossible to test its accuracy.

The Court is not convinced that Israel's opinions are too vague to be reliable or helpful to a jury. As Plaintiffs emphasize, even informal agreements **[**45]** can violate the *Sherman Act*. "[A] conspiracy" that violates *Section 1 of the Sherman Act* can be found not only from "a meeting of minds" in the sense contract law might require, but also if "the conspirators had a unity of purpose or a common design and understanding." *American Tobacco, 328 U.S. at 810*. "[E]ven a wink and a nod" may reveal coordination or agreement. *Kleen Products, 910 F.3d at 936*. Plaintiffs' and Israel's theory is that the evidence shows that CDK agreed to stop criticizing Reynolds' blocking policies in the DMS market; Reynolds agreed to favor CDK's DIS provider; and the parties agreed to adopt a common marketing message with respect to data security and to cooperate in targeting independent DIS providers. See [889-1] at 92-101. Defendants' own experts also use the term "openness" and have been able to describe and respond to Israel's opinions. To the extent that Defendants question the sufficiency of the basis for Israel's opinion, that can be "explore[d] on cross examination **[*1052]** and argument for the benefit of the trier of fact." *In re Disposable Contact Lens Antitrust Litigation, 329 F.R.D. 336, 372 (M.D. Fla. 2018)*.

Defendants' next argument is that Israel applied no reliable methodology to conclude that, absent a conspiracy, CDK and Reynolds acting unilaterally would not have secured their systems in the same manner in which they allegedly colluded. **[**46]** While Israel theorized that CDK would not have acted unilaterally to reduce "openness" because doing so would have risked losing too many DMS customers, he did not test that theory by evaluating the anticipated losses to CDK from unilateral closure or comparing them to the gains, including unilateral increases in 3PA prices or increased security. Defendants further maintain that Israel's interpretation of documents on this topic is not expert analysis because he did not apply any specialized economic knowledge to his interpretation and is no more competent that then average juror in interpreting the evidence.

The Court agrees with Plaintiffs that this is an insufficient basis to exclude Israel's testimony. The general consensus in the case law is that "economic experts may testify as to 'whether certain conduct is indicative of collusion,' or 'consistent' with a conspiracy." *Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d at 52* (quoting *In re Processed Egg Products Antitrust Litigation, 81 F. Supp. 3d 412, 420 (E.D. Pa. 2015)*, and *In re Urethane Antitrust Litigation, 2012 U.S. Dist. LEXIS 181506, 2012 WL 6681783, at *3 (D. Kan. Dec. 21, 2012)*); see also *Disposable Contact Lens Antitrust Litigation, 329 F.R.D. at 372-73* (recognizing that courts "regularly admit expert testimony that certain conduct or evidence is 'consistent with a finding that Defendants engaged in a conspiracy to fix prices'" and collecting cases (quoting *In re Delta/Airtrain Baggage Fee Antitrust Litigation, 245 F. Supp. 3d 1343, 1359 (N.D. Ga. 2017)*); *In re Titanium Dioxide Antitrust Litigation, 2013 U.S. Dist. LEXIS 62394, 2013 WL 1855980, at *4 (D. Md. May 1, 2013)* (same). "Such testimony necessarily involves consideration of the defendants' **[**47]** conduct in the case." *Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d at 52*. For instance, an expert might testify that an alleged arrangement "furthered [Defendants'] collusive interest, but was inconsistent with Defendants pursuing their independent, unilateral self-interest," *id.* as that is "precisely the type of inquiry an economist can be expected to make using his expertise." *Processed Egg Products Antitrust Litigation, 81*

F. Supp. 3d at 424; see also Urethane Antitrust Litigation, 2012 U.S. Dist. LEXIS 181506, 2012 WL 6681783, at *3 (rejecting argument that expert's opinion "that particular events, assuming they occurred, are consistent with a conspiracy" was "not helpful to a jury because it is not based on an economic analysis and thus is not sufficiently scientific or technical as required under Fed. R. Evid. 702," because "structure-conduct-performance analysis by an economist is well-accepted in this field" and it may "be helpful to a jury for an expert to put events into an economic context"). In short, to the extent that an expert, "after reviewing the documentary record, opines as to whether defendants' behavior is consistent with collusion, this is permissible expert opinion." Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d at 52.

To avoid summary judgment, Plaintiffs will need to come forward with evidence of conspiracy that "tend[s] to rule out the possibility that the defendants were acting independently.'" Kleen Products, 910 F.3d at 934. Plaintiffs are "entitled **[**48]** to try to meet that burden with either direct or circumstantial evidence," or both. *Id.* As courts have found sufficient in other **[*1053]** antitrust cases, Israel's testimony synthesizes the economic and non-economic evidence and opines that it supports the conclusion that Defendants' conduct was not equally consistent with their permissible independent interests as it was with improper activity. See Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d at 52. Defendants' own experts (Bresnahan and Whinston) performed similar evaluations of the record and offer opinions that the documents do not support a hypothesis of unlawful collusion. Defendants do not identify any case law requiring Israel to use a formal model quantifying the relative gains from unilateral versus conspiratorial conduct; nor do they identify any model that Israel could have, but did not, use instead. The sufficiency of the evidence relied on by Israel will be left to a battle of the experts.

In a related argument, Defendants contend that Israel's conclusion that their behavior was more consistent with conspiratorial rather that unilateral conduct fails to consider obvious alternative explanations. According to Defendants, Israel failed to consider that DMS switching patterns may **[**49]** have changed (*i.e.* Reynolds' loss of customers to CDK decreased from 2013 on) due to: 1) other changes in the competitive landscape, like the rise of Dealertrack and Auto/Mate as substantial DMS competitors; or 2) the possibility that dealers who preferred open system had already left Reynolds, which had been engaging in "blocking" for years by 2013. Defendants also argue that Israel failed to consider other reasons why Defendants agreed to a "wind-down" concerning DMI's access to Reynolds' DMS. Defendants emphasize that the wind-down avoided disruptions to their customers and that Reynolds used wind-downs with other parties, too.

Plaintiffs respond that Israel did not improperly ignore competition from DMS competitors in evaluating switching data. They explain that the fact that dealers continued to leave Reynolds for other DMS providers—which continued to compete on the basis of greater openness—at undiminished rates but not for CDK "reinforces the conclusion that CDK stepped back its efforts to win that business." [1001] at 20. Plaintiffs also point out that Defendants have no hard evidence that dealers that wanted independent DIS services had already switched from Reynolds to CDK **[**50]** before 2013. As to alternative reasons for Defendants' wind-down agreement, Plaintiff respond that the possibility that Reynolds had non-collusive reasons to negotiate a wind-down with CDK does nothing to undermine Dr. Israel's point: doing so also served the objectives Defendants pursued through collusion. As the foregoing discussion indicates, Israel and Defendants both make arguments that provide "a rational connection between the data and the opinion." Manpower, 732 F.3d at 809. Therefore, they are properly addressed through cross-examination, not *Daubert* motions.

b. Damages

In the portion of his analysis measuring the impact of Defendants' alleged collusion on DIS prices, Israel examined DIS prices from January 1, 2013 to the first part of 2019, measuring price for each combination of application, DIS, and DMS on an average revenue per unit basis. Each data point reflects what a vendor pays for DIS, from a given DIS provider servicing dealers using a given DMS, in a given month.

In their *Daubert* motion, Defendants argue that Israel's pricing analysis and damages regression cannot help the jury because they do not model actual RCI prices or pricing conduct. Rather, Israel relies on 3PA and RCI "average monthly recurring **[**51]** DIS prices per rooftop." Defendants contend that this results in a "composition effects" error because, by using average **[*1054]** revenue per unit, Israel shows RCI price increases in situations where prices remained the same but demand for more expensive RCI products increased. Citing *Blue Cross & Blue Shield of Wisconsin v. Marshfield Clinic, 152 F.3d 588, 594 (7th Cir. 1998)*, Defendants assert that "[t]he Seventh Circuit has rejected an expert's pricing analysis based on similar methodological errors." [878] at 24.

In his reply report, Israel explains why, in his opinion, it would be inappropriate to use RCI's listed prices—*i.e.*, "panel data"—rather than data reflecting actual sales, as Reynolds' expert Bresnahan proposed in part of his report. According to Israel, Bresnahan's proposal was "highly unusual," because in Israel's experience, "the goal where possible is always to base prices on actual invoice data, which tell you how many units (here of a given package) are sold." [889-2] at 95. Israel posits that "[t]he reason this is superior can be seen in all of Professor Bresnahan's figures that use the panel data": "Each of these figures are based on unweighted average prices (*i.e.*, per rooftop per month) across packages, meaning that a package that was sold to just a few rooftops **[**52]** for just a few months would count the same as the largest Apps in the analysis." *Id.* at 95-96. Israel also points out that Bresnahan and CDK's damages expert, Murphy, used the same RCI sales data that Israel used when they "turn[ed] to actual regression analysis of the DIS prices." *Id.* at 96. Plaintiffs acknowledge that while a "composition effects" error may hypothetically be possible, Defendants' experts have not shown that using different data would have produced a materially different result.

Defendants' criticisms of Israel's pricing analysis and damages regression concern "how the selection of data inputs affect the merits of the conclusions produced by an accepted methodology," and thus go to the weight rather than the admissibility of Israel's damages opinion. *Manpower, 732 F.3d at 808*. The parties have advanced competing expert opinions concerning the best inputs to use to calculate damages attributable to DIS price increases. At this gatekeeping stage of the case, it would be inappropriate for the Court to "evaluate the quality of an expert's data, inputs, or conclusions." *Batty v. Zimmer, Inc. (In re Zimmer Nexgen Knee Implant Prods. Liab. Litig.), 2015 U.S. Dist. LEXIS 77475, 2015 WL 3669933, at *25 (N.D. Ill. June 12, 2015)*. Defendants' citation to *Marshfield Clinic* does not convince the Court otherwise. In that case, the Seventh Circuit was reviewing the district **[**53]** court's grant of summary judgment, not a ruling on a *Daubert* challenge. The court of appeals held that damages in a market division case against a medical clinic could not be based on an expert report comparing per-patient (rather than per-service) prices that the clinic charged during the period it engaged in market division with prices charged during the same period by medical service providers in different regions. *152 F.3d at 594*. The court reasoned that the calculation failed to correct for other factors that affected the clinic's prices—most notably, the fact that the "record disclose[d]" that "all there is to the higher average price per patient" charged by the clinic was that the clinic had "referred to it patients who are sicker than average and so require longer treatment." *Id.* Here, by contrast, Defendants have not developed a record suggesting that a hypothetical composition effects error has skewed Israel's calculations in any material way.

Defendants' next criticism of Israel's damages analysis is that he did not assume the proper "but-for" world—that is, what Plaintiffs' experience would have been, 'but for' the antitrust violation.'" *Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d at 56*. In particular, Defendants argue that Israel improperly **[**54]** attributed **[*1055]** all of 3PA's and RCI's price increases after September 2013 to unlawful conduct even though, as he opines in his report, CDK and Reynolds had the unilateral power to raise their prices at least to some extent. Defendants maintain that Israel's model needed to, but did not, account for CDK and Reynolds' lawful ability to raise prices unilaterally and that this failure renders his damages model inadmissible. After all, Defendants contend, "Israel cannot rest his conspiracy opinions on the premise that firms will always maximize profits and simultaneously account for no possibility of unilateral price increases by either CDK or Reynolds over a several year period." [878] at 27.

Plaintiffs respond that because Israel's model "identifies as overcharges the departure from the trends predicted by Defendants' historical pricing behavior—which was oligopolistic, not conspiratorial—facilitated by the conspiratorial exercise of joint market power, the model effectively grants Defendants the estimated expected effects of individual market power." [1001] at 26. In particular, Israel used a "difference-in-differences" (or "DiD") regression econometric model designed to "measure the effect **[**55]** of CDK's and Reynolds' conduct by comparing their DIS prices [to] the prices of a control group, consisting of independent DIS providers, over the same time period." [889-1] at 120-21. Israel also used "time and cross-sectional fixed effects to control for factors that affect DIS prices." *Id.* at 121, n.289. He then "test[ed] whether CDK's and Reynolds' conduct increased DIS prices for 3PA and RCI by more than the increase in prices in the benchmark group during the initial-conspiracy and post-February 2015 periods." *Id.* at 121-22. According to Israel, "[b]y comparing the change in prices charged in the affected group to the changes in prices charged in the benchmark group," he "isolate[d] the effect of the CDK and Reynolds' agreement to block their DMSs from other factors affecting DIS prices over time or across DMS=App combinations." *Id.* at 122. Israel also considered other methods of testing collusion's impact, including one that substituted CDK's and Reynolds' own pre-conduct prices as the relevant baseline and one that used industry control variables. According to Israel, all of the models he used showed the "same fundamental trends: first Reynolds, and then CDK, were able to sustain **[**56]** massive price increases." [1001] at 25. As for Defendants' argument that Israel cannot both assume that firms always act to maximize their profits and fail to account for Defendants' lawful ability to raise prices unilaterally, Plaintiffs respond that this logic just "confirms that, pre-collusion, [Defendants] were exercising what market power they each had, all else equal." *Id.* at 25-26.

Both sides offer seemingly reasonable arguments, supported by testimony from well qualified and respected economists, concerning why their construction of the but-for world is appropriate. (The opinions of CDK's rebuttal expert, Dr. Murphy, are discussed below.) Their competing arguments highlight the extent to which they disagree on the underlying facts, their relevance, and the inferences that should be drawn from them. The experts on both sides have asserted at least some factual basis for their views of the appropriate "but for" world. And both offer a "rational connection between the data and the opinion." *Manpower, 732 F.3d at 809*. *Daubert* does not empower the Court to decide whether either expert "selected the best data set to use." *Id.* This is a question for the factfinder—unless the material facts are undisputed and there **[**57]** is only one reasonable inference to be drawn from them, entitling one party to summary judgment. Cf. *Story Parchment, 282 U.S. at 562* (where the evidence was sufficient to allow "the jury to find that [defendants'] **[*1056]** price cutting and the resulting lower prices were directly attributable to the[ir] unlawful combination," it was error for the lower court to assume that defendants' "acts would have been the same if they had been acting independently of one another, with the same resulting curtailment of prices"). Perhaps the framework of summary judgment will allow the Court to resolve the parties' arguments concerning the appropriate but-for world; perhaps it will not. Regardless, all of the parties' arguments go beyond the proper scope of *Daubert*. See *Syufy Enterprises v. American Multicinema, Inc., 793 F.2d 990, 1003 (9th Cir. 1986)* (concluding that "[i]t was for the jury to consider [plaintiff's] arguments about the [differences between the yardstick and the but-for world] on the validity of comparison and to adjust its damage award accordingly"). *In re Prograf Antitrust Litig., 2014 U.S. Dist. LEXIS 180899, 2014 WL 7641156, at *3 (D. Mass. Dec. 23, 2014)* (recognizing that "[c]ourts have been reluctant to determine comparability before trial"); *Cason-Merenda v. Detroit Med. Ctr., No. 06-15601, 2013 U.S. Dist. LEXIS 57077, 2013 WL 1721651, at *12 (E.D. Mich. Apr. 22, 2013)* (concluding that comparability issues were "another 'battle of the experts' that is not appropriate for resolution in the context of a *Rule 702* motion to exclude an expert's **[**58]** testimony").

Defendants also criticize how Israel defined the relevant antitrust market for dealer data integration services. Defining the market involves identifying which firms/products compete most closely with one another. Israel explains that once a market is defined, "the market shares of the identified participants and a measure of concentration (often the Herfindahl-Hirschman Index or "HHI") can be calculated, which can be a helpful piece in assessing the existence and extent of market power." [889-1] at 30. According to Israel, economists generally define relevant antitrust markets using the "hypothetical monopolist test" to identify the competing products that constrain a firm's behavior. This test works as follows: It "starts with a proposed relevant market—a small set of products that are particularly close competitors—and considers whether a hypothetical monopolist over all those products could raise prices without losing so many customers as to make that price increase unprofitable. If a hypothetical monopolist over all of the products in the proposed relevant market would find it profitable to impose a small but significant and nontransitory increase in price ('SSNIP,' **[**59]** often taken to be a five percent increase in price over the competitive level)—because too few customers would turn to other products outside of the proposed market to defeat the price increase by making it unprofitable—then that set of products constitutes a relevant product market. If a hypothetical monopolist would not find it profitable to impose a SSNIP—because too many customers would turn to other products outside of the proposed market—then the proposed relevant market is too narrow, and a broader set of substitute products is considered. The market definition exercise proceeds by adding products until a large enough set of products is included so that a SSNIP by the hypothetical monopolist would be profitable." *Id.* at 31. Applying the hypothetical monopolist test, Israel arrived at one market for the sale of a DMS to franchise car dealers within the United States; two distinct aftermarkets for the sale of DIS—one to vendors serving CDK dealers, and a second to vendors serving Reynolds' dealers; and distinct aftermarkets for the sale of applications (or "apps") to dealers, which are distinguished both by DMS and by functionality.

Defendants maintain that Israel's definition **[**60]** of the DIS market is flawed because it excluded Dynamic Reporting—a DMS reporting tool offered by Reynolds and used by third parties to obtain data from a **[*1057]** DMS. In arguing that Dynamic Reporting should have been included, Defendants rely on testimony from one of their own experts, Stejskal, and on Israel's acknowledgment that vendors such as MVSC have used Dynamic Reporting "to '[e]ffectively' build their own integration." [878] at 30. Defendants also criticize Israel for failing to distinguish between DIS providers that offer "basic extraction," rather than "complex integration." *Id.* In Defendants' view, these are not functional equivalents because, for example, no third-party data extractor (like Authenticom) could reliably provide "real-time" or "write-back" to vendors, especially on the Reynolds DMS. *Id.*

The Court agrees with Plaintiffs that the proper treatment of particular DIS providers is a battle of the experts that should be left to the factfinder, as there is evidence in the record supporting both sides' positions. Israel explains that he excluded Dynamic Reporting from his DIS market definition based on testimony by vendors and Authenticom's CEO that, in his view, make clear **[**61]** that "automated extraction" of data from a DMS "is far superior to tools" like Dynamic Reporting "that rely on manual actions." [1001] at 29. As to the basic/complex distinction, Plaintiffs point out that the evidence is mixed on independent DIS providers' ability to provide real-time and writeback services. Both parties' opinions are based on data, which can be interpreted in different ways. It is up to the factfinder to evaluate the quality and relative persuasiveness of that data. See *Batty v. Zimmer, Inc. (In re Zimmer Nexgen Knee Implant Prods. Liab. Litig.), 2015 U.S. Dist. LEXIS 77475, 2015 WL 3669933, at *25*; *Sumotext Corp. v. Zoove, Inc., 2020 U.S. Dist. LEXIS 17253, 2020 WL 533006, at *11-12 (N.D. Cal. Feb. 3, 2020)* (denying exclusion of expert's market definition as unreliable for "fail[ing] to substantiate his conclusions under the SSNIP test using empirical analysis" where his "opinions ha[d] a foundation in qualitative data such as employee testimony, third-party industry analyses, and media coverage").

Finally, Reynolds seeks to exclude Israel's purported opinion concerning the economic feasibility of Reynolds' RCI pricing proposal to MVSC. However, MVSC does not offer Israel to testify in that manner, see [1001] at 30, making this portion of the *Daubert* motion moot.

2. Williams [881] — Dealer Plaintiffs' expert on antitrust collusion, damages

In motion [881], CDK moves to exclude the opinions of Dr. Michael Williams. **[**62]** See [889-7] (report). Williams has a B.A. degree in economics from the University of California, Santa Barbara, and received his M.A. and Ph.D. degrees in economics from the University of Chicago. He is currently a Director at Competition Economics, LLC, specializing in analyses involving antitrust, industrial organization, and regulation. Williams has published articles in a number of academic journals and provided testimony in numerous federal and state courts and administrative bodies.

The Dealership Plaintiffs retained Williams to analyze whether "well-accepted methodologies" and "common evidence" exist from which a fact-finder could (1) determine that Defendants conspired to restrain competition and (2) quantify damages. [889-7] at 7-8.

a. Collusion

Defendants argue that Williams' opinions concerning whether the evidence is consistent with the existence of a conspiracy should be excluded because he fails to analyze "the question at the heart of the case"—which, according to Defendants, is "whether Plaintiffs can muster evidence that 'tends to exclude the possibility that' CDK and Reynolds 'acted independently' in deciding to secure their respective DMSs." [882] at 16 (quoting *Matsushita, **[*1058]** 475 U.S. at 588*). **[**63]** Defendants contend that Williams did not attempt to determine whether the conduct he observed could be explained by CDK's and Reynolds' independent, non-conspiratorial incentives, particularly enhanced system security; an ability to charge higher DIS prices; and reduced legal/reputational risk from system breaches. *Id.* at 17-18.

The Court is not convinced that this these arguments present grounds for excluding Williams' opinion. As Plaintiffs point out, *Matsushita* sets a summary judgment standard for cases in which an antitrust plaintiff relies solely on circumstantial evidence to prove the existence of a collusive arrangement in violation of *Sherman Act § 1*. The parties dispute whether Defendants rely solely on circumstantial evidence or also have evidence that would qualify as "direct" under relevant precedent. See, e.g., *Tichy v. Hyatt Hotels Corp., 376 F. Supp. 3d 821, 834 (N.D. Ill. 2019)* (explaining that "[d]irect evidence is 'explicit and requires no inferences to establish the proposition or conclusion being asserted'") (quoting *High Fructose Corn Syrup Antitrust Litigation, 295 F.3d at 661*). The Court finds it unnecessary and premature to resolve that dispute in the context of a *Daubert* motion, as the arguments are not developed and the parties cross-reference their summary judgment motions, which remain pending and will be decided in **[**64]** a subsequent opinion. For purposes of *Daubert*, Williams' testimony need not, standing alone, be sufficient to satisfy *Matsushita*. To be admissible, it suffices that the expert's testimony would "assist the trier of fact to understand the evidence or to determine a fact in issue." *Daubert, 509 U.S. at 591* (quoting *Fed. R. Evid. 702(a)*). Thus, an economist may testify about factors supporting a finding of conspiracy, regardless of whether any of those factors (alone or in combination) "tend to exclude" the possibility of independent action sufficient to defeat summary judgment. *Kleen Prods. LLC v. Int'l Paper, 2017 U.S. Dist. LEXIS 83321, 2017 WL 2362567, at *14 (N.D. Ill. May 31, 2017)* ("Whether [expert] has drawn a reasonable conclusion based on his analysis and actually made a prima facie case for conspiracy is a matter to be examined at summary judgment, and whether he has made a persuasive case is a matter left to the jury.").

In any event, Williams' report does consider whether there were independent, non-conspiratorial incentives for Defendants' behavior. But instead of viewing the evidence in the same manner as Defendants, Williams concludes that Defendants engaged in a number of actions contrary to their independent self-interests but-for the existence of a conspiracy. See [889-7] at 65 *et seq.* For instance, Williams opines that Defendants' explanation **[**65]** that their exclusionary conduct and price increases were necessary to protect data security was pretextual. See *id.* at 74-76.

Defendants also move to exclude Williams on the basis that he "is not 'any more competent than the average juror' at the 'interpretation of correspondence and other evidence'" going to the existence of a conspiracy. [882] at 18. The Court rejects this argument for the same reasons explained in relation to Israel. Testimony that an alleged arrangement "furthered [Defendants'] collusive interest, but was inconsistent with Defendants pursuing their independent, unilateral self-interest," *Rail Freight Fuel Surcharge Antitrust Litigation, 292 F. Supp. 3d at 52*, is "precisely the type of inquiry an economist can be expected to make using his expertise." *Processed Egg Products Antitrust Litigation, 81 F. Supp. 3d at 424*.

Defendants also challenge as unreliable Williams' analysis of seven "plus factors" that allegedly tend to exclude the **[*1059]** inference that CDK acted unilaterally. Where, as here, defendants deny a conspiracy on the basis that they were acting independently, "Courts have allowed plaintiffs to proceed by presenting evidence that there is some 'plus factor' which reduces the probability of independent action." *Alexander v. Phoenix Bond & Indem. Co., 149 F. Supp. 2d 989, 1000 (N.D. Ill. 2001)*. As an initial matter, Defendants question the use of this approach at all, emphasizing **[**66]** that "[i]t has been nearly three decades since the Seventh Circuit has used the phrase "plus factors" in an antitrust case." [882] at 18 (citing *Reserve Supply Corp. v. Owens-Corning Fiberglas Corp., 971 F.2d 37, 51 (7th Cir. 1992)*). However, the Court finds nothing inherently wrong with using a "plus factors" analysis. It appears to be fairly common in this district to refer to "plus factors" in analyzing *Sherman Act § 1* claims. See, e.g., *Tichy, 376 F. Supp. 3d at 834* ("In considering whether Plaintiff's allegations are sufficient [to support finding of an agreement based on circumstantial evidence], the court asks whether Plaintiff has sufficiently alleged (1) parallel conduct and (2) additional factual circumstances, or 'plus factors,' indicating an agreement."); *Plasma-Derivative Protein Therapies Antitrust Litigation, 764 F. Supp. 2d at 998* ("A court faced with a dispositive motion will examine the evidence as follows. First, the court will look for evidence of interdependence or, put another way, that the defendants have an economic motive to behave in concert. Second, the court looks to all the evidence suggesting agreement, or 'plus factors,' which can be in the form of economic or non-economic evidence."); *In re Broiler Chicken Antitrust Litigation, 290 F. Supp. 3d 772, 797-801 (N.D. Ill. 2017)* (discussing "plus factors" identified by plaintiffs in support of *Sherman Act* claim); *Washington County Health Care Authority, Inc. v. Baxter Int'l Inc., 328 F. Supp. 3d 824, 840-44 (N.D. Ill. 2018)* (same); *In re Local TV Adver. Antitrust Litig., 2020 U.S. Dist. LEXIS 208215, 2020 WL 6557665, at *9-10 (N.D. Ill. Nov. 6, 2020)* (same); *Standard Iron Works v. ArcelorMittal, 639 F. Supp. 2d 877, 896 (N.D. Ill. 2009)* (*Sherman Act § 1* case using term "plus factor").

The Seventh Circuit also continues to analyze **[**67]** "plus factors" that may support an inference of conspiracy, even if it has not recently referred to them as such. See, e.g., *Omnicare, 629 F.3d at 709* ("Information exchange can help support an inference of a price-fixing agreement[.]"); *Kleen Products, 910 F.3d at 936* (a firm's "abrupt change in business practices ... might support an inference of conspiracy"). A plus-factor analysis provides a way to organize circumstantial evidence that, in the plaintiff's view, reduces the probability that defendants were acting independently. Williams does not claim that this is a "rigid framework" that must be applied in a particular way, as Defendants suggest. [1030] at 11; see also [889-7] at 76 & n.242 ("I understand that 'courts emphasize that these plus factors should not be viewed in a vacuum but rather should be considered in their entirety as the backdrop against which the alleged behavior takes place.'" (quoting ABA Section of ***Antitrust Law***, ***ANTITRUST LAW*** DEVELOPMENTS, 7th ed., p. 11 (2012))).

Defendants also challenge the reliability of Williams' opinions concerning the seven plus factors that he identifies. Defendants characterize the opinions, overall, as a "superficial and unreliable analysis" that is "fundamentally unhelpful to a jury." **[**68]** [1030] at 11. Citing *Valspar Corp. v. E.I. Du Pont De Nemours & Co., 152 F. Supp. 3d 234, 244 (D. Del. 2016)*, *aff'd*, *873 F.3d 185, 201 (3d Cir. 2017)*, Defendants claim that "Courts have rejected Dr. Williams's liability opinions in cases where he relied on similarly conclusory statements and 'plus factor' analysis rather than genuine economic **[*1060]** expertise." [1030] at 11. *Valspar*, however, was decided on a summary judgment motion; it did not involve *Daubert* issues or suggest that Williams' "plus factor" analysis was not sufficiently relevant or helpful to satisfy *Rule 702*. Rather, the *Valspar* court concluded based on the full summary judgment record in a price-fixing case that evidence the defendants increased the frequency of their price increase announcements was insufficient to create an inference of conspiracy. *152 F. Supp. 3d at 245-53*. More generally, courts considering "plus-factor" analyses in the context of *Daubert* have allowed such testimony, as "[a]n expert's analysis of plus factors focusing on market conditions and firm behavior finds its roots in the extensive antitrust literature." *Titanium Dioxide Antitrust Litigation, 2013 U.S. Dist. LEXIS 62394, 2013 WL 1855980, at *12* (citing scholarly literature, "including the work of Richard A. Posner, Joseph E. Harrington, and W. Kip Viscusi, as well as the Handbook of Antitrust Economics"); see also, e.g., *Fleischman v. Albany Medical Center, 728 F. Supp. 2d 130, 159-60 (N.D.N.Y. 2010)* (identifying a number of "plus factors" as "relevant to the determination of whether circumstantial **[**69]** evidence points to a conspiracy," including "1) a motive to conspire, which can be evidence that the industry is susceptible to price-fixing; (2) noncompetitive behavior, *i.e.*, evidence that the defendants acted contrary to their economic self interest; and (3) evidence of a traditional conspiracy, such as a high level of inter-firm communications that would suggest that the defendants consciously agreed not to compete").

The Court now turns to the seven specific "plus factors" identified by Williams. Overall, Defendants' criticisms of Williams' report—including whether he characterizes particular emails and other pieces of evidence in the same manner as Defendants, or takes into consideration each and every justification Defendants assert for taking particular actions, see [1030] at 11-12—are ones suited for cross-examination, not reasons to exclude Williams' "plus factor" analysis either in full or in part.

In his first plus-factor, Williams opines based on his price analysis that Defendants' actual DMS and DIS prices exceed but-for prices. Defendants argue that the fact that prices are elevated says nothing about whether Reynolds and CDK actually conspired, because Williams recognizes **[**70]** that each Defendant had unilateral power to increase prices without a conspiracy. Plaintiffs respond that Williams' use of a pre-conspiracy benchmark period controls for the impact of nonconspiratorial supply-and-demand factors, including any unilateral market power that CDK or Reynolds may have had. This is a battle of the experts issue that should be explored in cross-examination. Defendants also criticize Williams for quoting from an article that uses the term "super-plus factor" to refer to such pricing evidence. However, Williams does not himself use the term "super-plus factor" and Plaintiffs express no intention of eliciting the use of this term from their witnesses at trial. To the extent that Defendants are worried about this use of terminology, they are free to raise the issue before trial in a motion *in limine*.

Defendants group Williams' second and third plus factors, which are that Defendants' communications and monitoring of one another reflect actions against their self-interests but-for the existence of a conspiracy, and that these information exchanges occurred at high levels in the structural hierarchy of Defendants' firms. For instance, in September 2013, Defendants **[**71]** allegedly spoke of "'forg[ing] a common perspective' on market messaging regarding data security to 'speak with similar voices to the industry,'" [889-7] at **[*1061]** 68, and in December 2014 strategized to "collaborate" on market messaging promoting that it is a "positive outcome" to wind down "unapproved integration," *id.* at 70.

Without going into all of the specific examples provided by Williams, see [889-7] at 67-71, Defendants contend that their communications "have a clear and obvious legitimate business purpose—namely, the negotiation and execution of the February 2015 agreements," [882] at 20. Defendants also maintain that "simply identifying communications between 'high level executives' of two firms does not support an inference of conspiracy." *Id.* at 22. However, "a high level of inter-firm communications that would suggest that the defendants consciously agreed not to compete" has been recognized as a relevant plus-factor. *Fleischman, 728 F. Supp. 2d at 159-60*; see also *Re/Max Int'l v. Realty One, Inc., 173 F.3d 995, 1009 (6th Cir. 1999)* (one "important factor[] to evaluate" in determining whether circumstantial evidence tends to exclude the possibility of independent conduct is "whether the defendants have exchanged or have had the opportunity to exchange information relative to the **[**72]** alleged conspiracy"); *In re Plywood Antitrust Litigation, 655 F.2d 627, 634 (5th Cir. 1981)* (concluding that defendants' parallel pricing conduct plus numerous items of direct evidence of communication between high-level personnel on pricing policy adequately support the jury's verdict for plaintiffs on *Sherman Act § 1* claim).

Defendants group Williams' fourth and fifth plus factors, which are the Data Exchange (or "Wind Down") Agreement and the Reciprocal Data Integration Agreements. Defendants' criticism boils down to disagreement with Williams' opinion that, absent a conspiracy, the agreements would be contrary to Defendants' independent self-interests and Defendants would have competing in the market for DIS service used to access data on Reynolds' DMS. Defendants also argue that Williams is not qualified to offer opinions about the agreements because at his deposition he did not know specifically what the agreements prohibit or allow. See [882] at 23. Williams appropriately did not opine on the legal effect of the agreements. But as an expert in economics, he is qualified to assess whether the level of cooperation embodied in the agreements was anticompetitive and against Defendants' unilateral self-interests. See *Allen v. Dairy Farmers of America, Inc., 2013 U.S. Dist. LEXIS 182157, 2013 WL 6909953, at *11 (D. Vt. Dec. 31, 2013)* (expert may testify about "economic incentives **[**73]** of the various participants" in the conspiracy based on "the contractual relationships between the participants, Defendants' internal documents," pricing structure, and other evidence).

Williams' sixth plus factor is "actions indicating efforts to enforce" the conspiracy—in particular, Defendants' alleged agreement that all written communications about the Data Exchange Agreement, including to vendors, must follow pre-approved templates and should be limited. See [889-7] at 72-73. Defendants argue that these communications were not "enforcement" activities but rather were necessary to effectuate the wind-down. This is another matter of interpretation that should be explored during cross-examination.

The final plus-factor Williams identifies is that Defendants allegedly offered pretextual explanations for their conduct and price increases. Williams focuses on CDK's announcement in June 2015 that it was launching a "SecurityFirst" initiative. Williams points to evidence that, internally, CDK "acknowledged that the 'objective' of the Secure the DMS initiative was 'to prevent and/or severely inhibit non-approved access to DMS, forcing vendors **[*1062]** into the 3PA or other CDK approved access programs **[**74]** and capture additional revenue opportunities.'" [889-7] at 74. Defendants, citing *Lamb's Patio Theatre, Inc. v. Universal Film Exchanges, Inc., 582 F.2d 1068, 1070 (7th Cir. 1978)*, claim that pretextual statements are not plus-factors. But *Lamb* was decided at summary judgment and merely held that pretextual reasons for the defendants' allegedly collusive conduct—standing alone—would not suffice to prove the existence of a conspiracy. See *id.* ("even if Lamb's could show that Universal's announced business reasons were not legitimate, such showing would not satisfy Lamb's burden of establishing the existence of the conspiracy element essential to its prima facie antitrust case"). Defendants' alleged pretextual reasons for their agreement is just one piece of evidence going to whether Defendants conspired.

Finally, Defendants challenge Williams' opinions that the DMS and DIS markets are "highly concentrated" and that there are "substantial antitrust barriers to entry" in the DMS market. Defendants argue that this analysis is unhelpful to a jury because "structural evidence does not 'tend to exclude the possibility of independent action." [882] at 25 (quoting *Kleen Products, 910 F.3d at 935*). The Court agrees with Plaintiffs that this opinion should not be excluded because it may "help the jury to understand the economic **[**75]** characteristics of the DMS market and why they tend[] to make that market relatively more conducive to the formation and maintenance of a conspiracy even if, standing alone, they do not answer the ultimate question of whether Defendants conspired." [992] at 28 (internal quotation marks and citation omitted).

b. Damages

i. *Illinois Brick*

Williams assumes for purposes of his damages calculation that Defendants' alleged conspiracy caused the Dealership Class both "direct" and "indirect" damages. He calculates both using the same methodology—multiplying an "Overcharge to Vendors" by a "Pass-Through Rate." The "Vendors" in this scenario are DIS providers that (1) purchase certified integration from CDK and RCI through their 3PA and RCI programs, respectively; and (2) sell DIS services to members of the Dealership Class. Williams concludes that direct and indirect damages are exactly the same, slightly over $339 million. See [889-7] at 91, 99. This total is composed of approximately $202 million in "overcharges of fees for Reynolds' RCI Program" and $137 million in "overcharges of fees for CDK's 3PA Program." *Id.* at 99.

Defendants argue that Williams' opinion on "direct" damages must be excluded **[**76]** because it ignores the Court's ruling at the motion to dismiss stage that, under *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the Dealership Class could not recover their portion of Defendants' alleged overcharges for DIS. In that ruling [507], the Court explained that under *Illinois Brick*, "a federal antitrust plaintiff may not seek damages based on alleged supracompetitive prices passed through by a purchaser earlier in the distribution chain." *Id. at 19*. The Court concluded that Plaintiffs' exclusive dealing claim based on vendor contracts and their *Section 2* monopoly claim were barred by *Illinois Brick*, because those claims sought to "recover alleged supracompetitive prices passed through to vendors" that paid those prices in the DIS market. *Id. at 21*. "Furthermore," the Court held, "to the extent that Plaintiffs seek to bring a horizontal conspiracy claim based on agreements to restrain competition in the DIS market, Plaintiffs' horizontal conspiracy claim fails under *Illinois Brick* and Plaintiffs may not **[*1063]** proceed under that theory." *Id.* That claim would be "derivative of more direct injuries to participants or direct consumers in the DIS market," which the Dealer Plaintiffs "implicitly recognize[d] would be barred by *Illinois Brick." Id.* at 20. However, the Court declined to dismiss the **[**77]** horizontal conspiracy claim to the extent that it was "based on alleged anticompetitive conduct in the DMS market," rather than the DIS market, "as Plaintiffs allege[d] that its DMS lost functionality and is worth less as a result of CDK's agreements with Reynolds." *Id.*

Defendants argue that Williams' direct damages analysis runs afoul of the Court's motion to dismiss ruling and must be excluded because, "where plaintiffs seek 'direct' damages using the same formula employed 'to calculate their "overcharge" damages,' *Illinois Brick* bars their claims 'notwithstanding the fact that the plaintiffs label these damages' as something else." [882] at 8 (quoting *Drug Mart Pharm. Corp. v. Am. Home Prods. Corp., 2002 U.S. Dist. LEXIS 19954, 2002 WL 31528625, at *8 (E.D.N.Y. Aug. 21, 2002)*). The Dealership Plaintiffs respond that *Illinois Brick* does not apply to them because they are direct purchasers of Defendants' DMSs. They contend that it simply does not matter that Williams "referenced passed-on DIS charges" when calculating direct damages. [992] at 11. "By manipulating DMS interfaces to block data integrators," the Dealers maintain, "Defendants caused dealers' injury—including reductions in the value and functionality of their DMSs." *Id.* at 10. The Dealers explain that they care about "the total value of use in their DMS choice" and "consider **[**78]** data integrator fees when choosing among DMSs." *Id.*

The Court finds Defendants' interpretation of *Illinois Brick* more persuasive and therefore grants their *Daubert* motion to the extent that Williams includes in his analysis "supracompetitive prices passed through vendors" to the Dealers as direct damages incurred by the Dealers on their *Sherman Act § 1* conspiracy claim. [507] at 19. This opinion is contrary to *Illinois Brick* and to the Court's motion to dismiss ruling. "Expert opinions that are contrary to law are inadmissible." *Loeffel Steel Prods. v. Delta Brands, Inc., 387 F. Supp. 2d 794, 806 (N.D. Ill. 2005)*; see also *Luxco, Inc. v. Jim Beam Brands Co., 2016 U.S. Dist. LEXIS 119615, 2016 WL 4611385, at *5 (N.D. Ill. Sept. 6, 2016)*; *System Development Integration, LLC v. Computer Sciences Corp., 886 F. Supp. 2d 873 (N.D. Ill. 2012)* (expert testimony on subcontractor's economic loss was inadmissible where it included lost opportunity costs that were not a proper component of damages under Illinois law).

In *Illinois Brick*, the plaintiffs (the State of Illinois and local governmental entities) purchased finished buildings made with "concrete block [priced] $3 million higher by reason of [a] price-fixing conspiracy" between concrete block manufacturers. *431 U.S. at 727*. (The manufacturers sold to masonry contractors, which in turn sold to general contractors, from whom plaintiffs purchased the block in the form of masonry structures. *Id. at 726*.) The Supreme Court held that only the overcharged direct purchaser, and not others in the chain of manufacture or distribution, **[**79]** were entitled to sue for antitrust damages under the *Clayton Act*. See *id. at 728-29*. The Court applied the rule equally to plaintiffs and defendants: defendants could not use a passon theory as a defense to damages, just as plaintiffs could not use a pass-on theory to obtain damages. See *id. at 724-26*. The Court recognized that a "one-sided" rule would "substantially increases the possibility of inconsistent adjudications and therefore of unwarranted multiple liability for the defendant by presuming that one plaintiff (the direct purchaser) is entitled **[*1064]** to full recovery while preventing the defendant from using that presumption against the other plaintiff." *Id. at 730*. The Court was "unwilling to 'open the door to duplicative recoveries.'" *Id. at 731* (quoting *Hawaii v. Standard Oil Co., 405 U.S. 251, 264, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*).

The Court recognizes that the Dealers, unlike the purchases in *Illinois Brick*, have a direct contractual relationship with Defendants, from whom they purchase DMSs. But the bottom line remains that the Dealers may not recover under federal law for the overcharges that vendors allegedly passed on to them after purchasing services from Defendants' RCI and 3PA programs in the DIS market. If the vendors had not passed on Defendants' alleged RCI/3PA overcharges to the Dealers, then—according to Williams' **[**80]** report, at least—Defendants' alleged conspiracy would have had no measurable impact on the value or functionality of the DMSs that the Dealers purchased from Defendants. Illustrating this point, the overcharges allegedly passed through to the Dealers are the same injury claimed by vendors, including Plaintiffs Authenticom and Autoloop. Their expert, Israel, calculates damages in the same manner as Williams, estimating damages from overcharges due to DIS price elevation. Authorizing the Dealers to pursue the same overcharges as the vendors runs the same risk of duplicate recoveries that concerned the *Illinois Brick* Court. *431 U.S. at 731*. It would also apply in a one-sided manner, allowing both the Dealers and the vendors to pursue overcharges against Defendants but not allowing Defendants to raise vendors' pass-through of overcharges as a defense to their claims.

The Seventh Circuit's analysis in *In re Brand Name Prescription Drugs Antitrust Litigation, 123 F.3d 599 (7th Cir. 1997)*, *abrogated on other grounds by* *Rivet v. Regions Bank of La., 522 U.S. 470, 118 S. Ct. 921, 139 L. Ed. 2d 912 (1998)*, is instructive. In that case, pharmacies brought suit against drug manufacturers for an alleged price-fixing conspiracy in violation of *§ 1 of the Sherman Act*, based on the manufacturers' practice of giving discounts only to hospitals and other favored classes of customers. The pharmacies purchased **[**81]** the drugs through wholesalers, which alleged passed on overcharges that they incurred "by virtue of the price-fixing conspiracy." *Id. at 606*. The court held that *Illinois Brick* barred the pharmacies from complaining about the manufacturers overcharging wholesalers, even if "every cent" of the overcharge was passed on to the pharmacies. See *id.* The Court noted that it could "imagine the ... case reconfigured in a way" that took it "out of the orbit" of *Illinois Brick*, if the manufacturers' consistent rejection of the pharmacies' request to purchase discounted drugs as "buying groups" constituted "a refusal to enter into direct contractual relations with certain retailers" that could be "successfully challenged as a boycott." *Id.* Then, "the *Illinois Brick* rule, which is a rule concerning overcharges, would fall away" and the "plaintiffs would be permitted to prove up whatever damages they could show had flowed from the boycott, *provided they weren't seeking to recover overcharges*, for that would entail to very incidence analysis that *Illinois Brick* bars." *Id.* (emphasis added). However, that was "precisely what th[e] [pharmacies were] seeking," which the court predicted "may be why the plaintiffs have not cast their case in the boycott mold." *Id.* The **[**82]** Dealers, like the pharmacies, seek through Williams' opinion to recover overcharges that vendors paid for DIS—not damages flowing from any allegedly anticompetitive conduct in the DMS market. This is the same "incidence analysis that **[*1065]** *Illinois Brick* bars." *Id.*; see also *Drug Mart, 2002 U.S. Dist. LEXIS 19954, 2002 WL 31528625, at *7-8* (retail purchasers of prescription drugs from wholesalers were barred by *Illinois Brick* from asserting price discrimination claim against drug manufacturers; although claim was characterized as one for lost profits as result of manufacturers' refusal to sell to them directly; pharmacies were in fact indirect purchasers seeking to recover price overcharges).

The Supreme Court's recent decision in *Apple, Inc. v. Pepper, 139 S. Ct. 1514, 203 L. Ed. 2d 802 (U.S. 2019)*, does not affect this conclusion. In *Apple*, the Court held that "iPhone owners [who] purchase apps directly from the retailer Apple, who is the alleged antitrust violator," and "pay the alleged overcharges directly to Apple," were the "proper plaintiffs" under *Illinois Brick* "to maintain [an] antitrust suit." *Id. at 1521*. The Court rejected Apple's theory that *Illinois Brick* "allows consumers to sue only the party who sets the retail price, whether or not that party sells the good or service directly to the complaining party." *Id.* Unlike the *Apple* plaintiffs, the Dealers do not purchase DIS directly **[**83]** from, or pay alleged overcharges directly to, CDK or Reynolds. While "*Apple* confirms that *Illinois Brick* is a bright-line rule allocating the right to sue to direct purchasers alone," *Marion Healthcare, LLC v. Becton Dickinson & Company, 952 F.3d 832, 840 (7th Cir. 2020)*, the Dealers are direct purchasers of Defendants' DMSs—not DISs. Thus, the arrangement through which the Dealer Plaintiffs participate in the DIS market mirrors Judge Wood's classic explanation of the rule of *Illinois Brick*, quoted with approval by Justice Kavanaugh in *Apple*: "'if manufacturer A sells to retailer B, and retailer B sells to consumer C, then C may not sue A.'" *Apple, 139 S. Ct. at 1521* (quoting *Loeb Indus. v. Sumitomo Corp., 306 F.3d 469, 481-82 (7th Cir. 2002)*). Here, Defendants are in the "A" position; non-party vendors are in the "B" position; Dealers are in the "C" position. Under *Illinois Brick* and *Apple*, Dealers can sue Defendants and seek to recover damages as direct purchasers of DMS but cannot—at least under federal law—claim damages stemming from an "overcharge" passed "down a chain of distribution." *Apple, 139 S. Ct. at 1525*. While it is true that "CDK may not gerrymander its way *out of this lawsuit* merely because of the damage calculation method," [992] at 11-12 (emphasis added), it is equally true that Dealers cannot gerrymander into their damages claim overcharges that they did not directly pay for services they did not directly purchase, see **[**84]** [1030] at 6-7. The upshot is that the Court grants Defendants' motion to exclude Williams' opinion to the extent that it includes overcharges passed on to the Dealers as an element of damages under the *Sherman Act*. However, the Court expresses no opinion at this time as to whether Williams can offer the same opinion in support of a claim for damages under the antitrust laws of one or more states, as the parties have not adequately briefed that issue. Therefore, the Court grants Defendants' motion to exclude Williams' opinion concerning the direct damages that the Dealers are allegedly owed under the *Sherman Act*.[1]

[*1066] ii. Other damages arguments

Apart from their *Illinois Brick* challenge to Williams' direct damages model, Defendants challenge both his direct and indirect damages models on the basis of reliability. To calculate damages, Williams (like Israel) uses a difference-in-differences regression model. According to the Dealers, the model controls for supply and demand factors, including legal, unilateral conduct on the part of suppliers. The model is intended to estimate the effects of anticompetitive conduct using changes between the benchmark period and the damages period in an outcome variable (in this case, monthly **[**85]** DIS fees) for a treatment group (CDK and Reynolds) and control group (Authenticom and SIS). According to Williams, changes in Authenticom's and SIS's monthly DIS fees between the

---

[1] Defendants do not claim that a ruling in their favor on the *Illinois Brick* argument makes a ruling on their other damages arguments unnecessary. The Court assumes that it does not; at a minimum, there are still state-law antitrust claims pending that may proceed on an indirect damages theory. See [507] at 26 ("many states expressly have rejected *Illinois Brick*'s bar on indirect purchaser claims by enacting 'repealer statutes' abrogating the Supreme Court's prohibition on indirect-purchaser actions as articulated in Illinois Brick" (quoting *In re Dairy Farmers of Am., Inc. Cheese Antitrust Litigation, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *6 (N.D. Ill. June 29, 2015)*).

benchmark and damages periods should provide the counterfactual estimate of how CDK's and Reynolds' monthly DIS fees would have changed but-for the alleged conspiracy.

Defendants argue that the damages model is unreliable for multiple reasons. First, Defendants contend that Williams fails to justify his damages model's "key" assumption—that Defendants' DIS prices moved in "parallel" with an assumed competitive benchmark prior to the start of the alleged conspiracy period in September 2013. Williams made this assumption by "eyeballing" price charts, even though granular price data was available. Defendants assert that this does not satisfy *Daubert*, especially since Williams admits that he failed to consider a significant non-parallel increase in Reynolds' pricing in August 2013, before the alleged conspiracy period began. In response, the Dealers maintain that Williams used the standard, accepted, peer-reviewed method for determining whether prices are parallel in the benchmark period in a DiD regression analysis—a **[**86]** visual examination of the data. They explain that the "common trends assumption can be investigated using data on multiple periods, where a visual examination of the trends between the treatment group and the control group (to test the parallel paths assumption) is used." [992] at 16.

The Dealers provide several examples from the economics literature, but very little analysis. Their first example, an excerpt from an econometrics book, does not discuss the subject; rather, it is about the relationship between clustering (correlation within a group of observations) and a model's statistical precision. See [989-4]. The other examples consist of, as Defendants characterize them, "dense technical papers with no pincites." [1030] at 7, n.2. Pincites, searchable PDFs, and additional analysis from the Dealers all would have been helpful. Nonetheless, these sources do suggest that in a DiD regression analysis, visual examination is used to compare the paths of the test group and control group prior to and after the event/activity being studied. See [989-6] at 7 (study with charts showing DiD estimates for opioid overdose mortality for non-Hispanic white adults in study examining association **[**87]** between U.S. automotive assembly plant closures and opioid overdose mortality); [989-7] at 4, 13 (study using DiD analysis to examine expansion of a mine's demand for local inputs on local living standards and compare households located close to the mine to households farther away; chart shows until 2001 real income followed similar trends in both locations, then diverged and showed a relative increase in areas located closer to the mine); [987-8] at 19-21 (using DiD analysis to study whether trade liberalization may have fostered per capital income convergence among liberalizers relative to the control group of the rest of the world and drawing "overall message" from visual tables that trade liberalization did not generate any significant, systematic **[*1067]** convergence). Regardless, Defendants fail to explain what more they believe is required or how the examination of more granular price data would have affected Williams' analysis. Further, Williams adequately took into consideration Reynolds' "non-parallel" increase in pricing in August 2013, the month before the "beginning" of the alleged conspiracy period in September 2013. Williams points to evidence that CDK and Reynolds "engaged in **[**88]** anticompetitive communications in the period June 2013 through August 2013, and knew the cooperation was in place." [992] at 16 & n.4. To the extent that Williams relied on "faulty information," this is "a matter to be explored on cross-examination, it does not go to admissibility." *Manpower, 732 F.3d at 809*.

Defendants also argue that Williams' damages opinion should be excluded because it does not assume the proper "but-for" world. As they argued in their motion to exclude Israel, Defendants take the position that Williams erred by attributing all of CDK and Reynolds' 3PA and RCI price increases to unlawful conduct even though, in his opinion, CDK and Reynolds "had the power to raise prices to some extent in the but-for world with no unlawful conduct." [992] at 13. Since Williams "necessarily implies that in the absence of conspiracy a rational firm would have exercised its power to raise prices by some amount," he should not have assumed that the entirety of any measured price increase after September 2013 was attributable to the alleged conspiracy. *Id.* Accordingly, Defendants conclude, "his damages model does not attempt to isolate damages attributable to the alleged conspiracy, meaning his opinions cannot **[**89]** assist the jury." *Id.* at 14 (citing *MCI, 708 F.2d at 1162*).

The Dealers respond that Williams' analysis did consider whether Defendants' conduct could be explained by unilateral motivations. His DiD regression analysis controls for the impact of non-conspiratorial supply-and-demand factors, including any unilateral market power that CDK or Reynolds may have had. Williams also analyzed and disagreed with the arguments offered by CDK's experts (Murphy and Whinston) that even in the absence of a conspiracy, CDK would have closed its DMS and raised its 3PA prices. The Court finds this argument inappropriate for resolution on *Daubert* motions, for the same reasons explained above in relation to Israel.

Finally, Defendants argue that Williams's damages model is unreliable because it incorporates damages from alleged exclusive-dealing provisions that the Court dismissed under *Illinois Brick*. According to Defendants, "[a] damages model agnostic to the defendant's liability— which produces the same result whether or not some of the plaintiff's claims fail on the merits— is inherently unreliable and consequently inadmissible." [882] at 15 (citing *Marshfield Clinic, 152 F.3d at 593*). The Dealers respond that "a claim, as opposed to the conduct, may disappear for reasons **[**90]** other than a determination that such an antitrust claim constitutes legal conduct." [992] at 15. "Simply because a claim in a conspiracy has been dismissed at the initial litigation phase does not convert defendants' conduct (in this case, exclusive dealing contracts) into lawful action." *Id.* (citing *Spray-Rite Service Corp. v. Monsanto Co., 684 F.2d 1226, 1243 (7th Cir. 1982)*). The Court declines to exclude Williams on this basis. If Defendants are able to make a convincing showing at summary judgment that the Dealers will be unable "isolate those elements of the plaintiff's damage that were caused by" unlawful conduct, then they may be entitled to judgment in their favor at that time. See Areeda & Hovenkamp ¶ 309c2, at 17. The Court also notes that, even if it accepts **[*1068]** Defendants' argument, there are many state law antitrust claims still pending, *Illinois Brick* does not apply in many states, and it is therefore unclear what relevance Williams' opinion may have despite the dismissal of the federal exclusive dealings claims.

3. Murphy [873] — CDK's expert rebutting Israel and Williams

In motion [873], the Dealer Class and AutoLoop seek to exclude certain opinions of Dr. Kevin Murphy. Murphy holds a doctorate in economics from the University of Chicago and is the George J. Stigler **[**91]** Professor of Economics in the Booth School of Business and the Department of Economics at the University of Chicago, teaching graduate level courses in microeconomics, price theory, empirical labor economics, and the economics of public policy issues. He has authored or co-authored more than 65 articles in a variety of areas in economics and is a Fellow of the Econometric Society and a member of the American Academy of Arts and Sciences. Murphy is also a Senior Consultant at Charles River Associates ("CRA"), a consulting firm that specializes in the application of economics to law and regulatory matters. He has submitted expert reports in numerous cases and testified in various federal courts and before the U.S. Senate and state regulatory agencies.

Murphy was retained by CDK to review damages analyses submitted on behalf of the Dealer Class and the Vendor Class. Murphy does "not specifically address liability" in his report. [875-11] at 8. Instead, he opines on whether Israel and Williams "have demonstrated with proper economic analysis and empirical evidence that the two putative classes suffered antitrust injury and damages." *Id.* He summarizes his opinions as follows, *id.* at 8-9: **[**92]**

- Plaintiffs' experts improperly attribute essentially all the changes in CDK's and Reynolds' prices for integration with their respective DMSs during the claimed damages periods to the alleged conspiracy, because they ignore the unilateral reasons for changes in policies and pricing by these DMS providers.
- Neither Israel nor Williams provides a proper analysis of economic damages because both assume an improper but-for world and consequent pricing that does not reflect how Defendants would have acted independent of any alleged conspiracy.
- CDK had business reasons, unrelated to reducing competition, for securing its DMS against unauthorized access by third-party data integrators that were unrelated to reducing competition. The impact of doing so on prices charged by 3PA program without the challenged agreements is the proper but-for world from which to calculate economic damages, if any, suffered by Plaintiffs due to the challenged 2015 agreements.

- Neither Israel nor Williams offers a damages analysis specific to claimed anticompetitive injury resulting from CDK's unilateral conduct, even though both claim that CDK possessed "unilateral" market power that enabled it to increase prices **[**93]** for its 3PA program by securing its DMS from unauthorized third-party access. Their implicit assumption that CDK could have accomplished the same goals unilaterally and had an incentive to do so means that damages associated with the alleged conspiracy are either zero or substantially smaller than they have estimated, even accepting their methodologies.

[*1069] Murphy also opines that Israel and Williams' empirical quantifications of damages contain numerous flaws that lead to substantial overestimates of damages, as well as that Williams' passthrough analysis is conceptually and empirically flawed.

Plaintiffs argue that Murphy's opinions should be excluded for three primary reasons. First, Plaintiffs argue that Murphy's opinions are prohibited by the Supreme Court's decision in *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 51 S. Ct. 248, 75 L. Ed. 544 (1931)*. According to Plaintiffs, Murphy's report "assumes the existence of an unlawful conspiracy that harmed MDL Plaintiffs" and, "[f]rom that starting assumption," opines that "CDK would have engaged in the same conduct — blocking third-party integrators and raising 3PA prices — absent that conspiracy." [875] at 15. Plaintiffs assert that Murphy's argument is "no different from the reasoning *Story Parchment* held 'must be rejected as unsound.'" **[**94]** [875] at 15 (quoting *Story Parchment, 282 U.S. at 562*).

Story Parchment involved an alleged conspiracy between three companies to monopolize trade in vegetable parchment, exclude petitioner from the market, and destroy petitioner's business. The jury returned a verdict in petitioner's favor, which was vacated by the appellate court and remanded to the trial court "with directions to enter judgment for respondents upon the ground that petitioner had not sustained the burden of proving that it had suffered recoverable damages." *282 U.S. at 560*. The Supreme Court "rejected as unsound" the appellate court's assumption that respondents' "acts would have been the same if they had been acting independently of one another, with the same resulting curtailment of prices," which the appellate court used to justify vacating the jury's verdict. *282 U.S. at 562*. The appellate court's assumption was "unsound" because the trial record contained sufficient evidence for the jury to conclude that respondents' conspiracy caused petitioner's antitrust injury. In particular, the record contained "evidence from which the jury reasonably could have found that, in pursuance of the conspiracy, respondents sold their goods below the point of fair profit, and finally below the cost of **[**95]** production; that petitioner had an efficient plant and sales organization, and was producing a quality of paper superior to that produced by either of the three [defendant] companies; and that current prices ... were higher during a period antedating the unlawful combination and price cutting in pursuance of it than afterward." *Id. at 561*. The Supreme Court recognized that "[i]t does not necessarily follow, of course, that these higher prices would have continued except for the conspiracy, but it is fair to say that the natural and probable effect of the combination and price cutting would be to destroy normal prices; and there was evidence of the prices received by petitioner before the cut prices were put into operation, and those received after, showing actual and substantial reductions, and evidence from which the probable amount of the loss could be approximated." *Id.* In sum, "[u]pon a consideration of the evidence," the Court was of the "opinion that it was open to the jury to find that the price cutting and the resulting lower prices were directly attributable to the unlawful combination." *Id.*

As to damages, the Court rejected the appellate court's view "that the verdict of the jury ... **[**96]** was based upon mere speculation and conjecture" "in so far as it included damages for" the "difference between the amounts actually realized by petitioner and what would have been realized by it from sales at reasonable prices except for the unlawful acts of the respondents." *Id. at 562*. While it was "true that there was uncertainty as to the extent **[*1070]** of the damage," "there was none as to the fact of damage; and there is a clear distinction between the measure of proof necessary to establish the fact that petitioner had sustained some damage and the measure of proof necessary to enable the jury to fix the amount." *Id.* The Court explained that "[t]he rule which precludes the recovery of uncertain damages applies to such as are not the certain result of the wrong, not to those damages which are definitely attributable to the wrong and only uncertain in respect of their amount." *Id.*

Story Parchment does not preclude Murphy's criticism of Israel and Williams' opinions concerning the appropriate "but-for" world. Nor does the line of cases which, according to Plaintiffs, has "uniformly ... held that where an antitrust plaintiff 'can show damages caused by [a defendant's] antitrust violation, the fact that [the defendant] **[**97]** might have caused the same damages by a lawful' means 'is irrelevant.'" [875] at 14 (quoting *Lee-Moore Oil Co. v. Union Oil Co., 599 F.2d 1299, 1302 (4th Cir. 1979)*; *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 777 n.15 (2d Cir. 2016)*). Rather, *Story Parchment* cautions against taking away from the factfinder the determination of how defendants would have acted but-for the alleged conspiracy and what damages are attributable to the conspiracy. Contrary to Plaintiffs' argument otherwise, Murphy does not assume the alleged conspiracy "harmed MDL Plaintiffs," [875] at 15, or concede that Plaintiffs "can show [any] damages," *id.* at 14. He assumes "that the Court finds that [the 2015] agreements are illegal, by which [he] mean[s] that the Court concludes that it was illegal for CDK and Reynolds to coordinate and enter into formal contracts memorializing the obligations and benefits of those agreements." [875-11] at 32. But he disputes that Israel's or Williams' analyses prove that the alleged conspiracy caused Plaintiffs any antitrust injury. See generally *Greater Rockford Energy and Technology Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)* ("In establishing antitrust injury, courts must first delineate the *type* of interests protected by the antitrust laws, and second, must determine whether the violation was the cause-in-fact of the injury: that 'but for' the violation, the injury would not have occurred" (quoting *MCI, 708 F.2d at 1161*). As **[**98]** Defendants put it, "Murphy does not posit a hypothetical world where Plaintiffs' damages might have or could have been caused by lawful action; he simply points out that Plaintiffs' experts' own affirmative opinions"—which according to Murphy "conflate unilateral and conspiracy damages—infer a but-for world that tends to negate any damages on Plaintiffs' conspiracy claim." [991] at 16-17; see also [875-11] at 29 (Murphy explaining that "[a] more reasonable assumption in specifying a but-for world where the assumed coordination with Reynolds did not occur is that CDK would have undertaken the same conduct with substantially the same impact on integration prices as it did in the actual world"). For the same reasons explained above in relation to Israel's opinion, it is up to the factfinder to decide which expert's "but for" world is the more convincing one in consideration of the facts in the record.

Plaintiffs' second argument for excluding Murphy's opinion is that there are multiple "improper, speculative assumptions underlying his but-for world." [875] at 22. As with Defendants' similar criticisms of Plaintiffs' experts, the Court is not convinced that any of the alleged flaws are **[**99]** so serious as to warrant exclusion of Murphy's opinion. For instance, Plaintiffs argue that Murphy failed to engage in economic analysis to show that it would have been in CDK's unilateral interest to engage in the same blocking conduct absent the alleged conspiracy, or to analyze **[*1071]** CDK's profitability. However, according to Defendants, Murphy did not ignore these issues but simply found them insignificant in comparison to the strong financial incentive that CDK had to secure its DMS, which he summarizes in his report and discussed at his deposition. See [991] at 12-13. Plaintiffs have not shown that their experts performed such an analysis, either. Plaintiffs also argue that Murphy ignores the evidence that CDK only decided to "secure" its DMS in July 2014 after extensive discussions with Reynolds, and only 'locked down" its DMS in February 2015 after entering into written contracts with Reynolds. But Murphy does acknowledge the agreements, and concludes that there is nothing in them that "would prevent CDK and Reynolds from competing strongly with each other, or that commits either one to prevent thirdparty DIS providers from accessing its own or the other's DMS." [875-11] at 35. Murphy **[**100]** and Plaintiffs' experts simply take different views on the significance of the written agreements.

Plaintiffs further contend that Murphy had no basis for opining that in the but-for world, CDK would have "secured" its DMS and doubled its 3PA prices in September 2013. But according to Defendants, this mischaracterizes Murphy's opinion on the timing of the hypothetical price increase. To the extent that there is any inconsistency between the timing set out in his report and in his deposition testimony, this is a matter to explore in cross-examination.

The third and final major criticism of Murphy's opinions—which is advanced by the Dealers only—is that his pass-through regression analysis and criticism of Williams' pass-through regression analysis should be excluded because he assumes facts not present in this case. Williams calculated an average pass-through of the alleged 3PA and RCI overcharges based on a sample of pricing data from 13 apps for which vendors included a line item for "DMS fees" (or similar) on their invoices to dealers. Many vendors did not include such line-items, and were not considered by Williams. Williams found a high level of variation in the pass-through rates **[**101]** in the itemized invoices, with some vendors passing on just a small fraction of the alleged overcharge and other "passing on" DMS fees that were substantially larger than the alleged overcharge. Murphy criticized this approach on the basis that dealers care about the overall price for their apps, rather than how the prices are broken down on their invoices, and have an incentive to portray price increases as increases in their underlying input costs. Murphy therefore found it appropriate to calculate an average pass-through rate differently, looking to how overall app prices changed when vendors' DIS costs changed. However, as Plaintiffs point out, this method has its flaws as well, because app prices are affected by demand and cost factors other than data integration fees charged by data integrators to vendors. It is also possible, and Defendants point to at least some evidence in the record supporting this theory, that vendors may have reduced app prices to offset increases in DIS fees passed on to dealers. See [991] at 24. Neither expert's methodology is flawless, but both at minimum offer a "rational connection between the data and the opinion." *Manpower, 732 F.3d at 809*. This topic is also better left **[**102]** to the trier of fact. See generally *Wipf v. Kowalski, 519 F.3d 380, 385 (7th Cir. 2008)* ("Especially in a case of dueling experts, ... it is left to the trier of fact, not the reviewing court, to decide how to weigh the competing expert testimony.").

4. Lawton [879] and Rubinfeld [867] - Authenticom's lost profits damages expert and Defendants' rebuttal expert, respectively

Motions [879] and [867] both seek to exclude expert opinions concerning Authenticom's **[*1072]** lost profits damages; the latter motion also addresses a number of opinions relating to Defendants' counterclaims, which are addressed below. In motion [879], Defendants move to exclude the opinion of Authenticom's damages expert, Catharine Lawton. See [889-4] (Lawton's expert report). In motion [867], Plaintiffs move to exclude the opinion of the defense expert who rebuts Lawton's opinion, Professor Rubinfeld. See [871-1] (Rubinfeld's rebuttal expert report).

Lawton is a Managing Director at Berkeley Research Group, which provides consulting services on a variety of financial and economic issues. She holds a bachelor of science degree in finance and economics. In her report, Lawton assumes that the factfinder will determine liability in Authenticom's favor. She describes in detail **[**103]** the evidence in the record concerning the background of the DMS industry and Defendants' positions within it; Authenticom's financial performance before and during Defendants' alleged anticompetitive conduct; and the link between Defendants' alleged anticompetitive conduct and harm to Authenticom.

Lawton then attempts to quantify Authenticom's damages using a "yardstick" methodology. Her "yardstick" compares Authenticom's volume of sales to dealerships that use CDK and Reynolds DMSs (its "other connections") with its volume of sales to dealerships that use DMSs other than CDK or Reynolds (its "CDK/Reynolds connections"). It presumes, in essence, that but-for Defendants' alleged illegal conduct, Authenticom's sales to the two groups of dealers would have moved in tandem. She explains that this is an appropriate yardstick because: 1) Authenticom sells the same products at the same (or similar) prices to both categories of dealers; 2) both groups of dealers use DIS providers like Authenticom in a similar manner; and 3) there is a correlation between her yardstick and Authenticom's CDK/Reynolds connections from the period prior to the alleged conspiracy. Lawton also considered whether any **[**104]** adjustments to the yardstick should be made to account for market factors that influenced the yardstick but would not have occurred in a but-for world. She adjusted her estimate of damages downward to account for the possibility that the alleged conspiracy caused some dealers to switch away from CDK and Reynolds to other DMSs. She adjusted the yardstick by using Authenticom's historical growth rates rather than its observed growth rates after February 2018 to account for the fact that Defendants' conduct allegedly forced Authenticom to lay off about 60 percent of its staff in February 2018. Finally, Lawton performed several "reasonableness checks" to ensure that her damages estimate aligned with available contemporaneous economic data. She concluded that her estimates were in line with the internal valuations of Authenticom made by CDK and CDK's investment consultant. She concludes based on her yardstick model that Authenticom's damages from the alleged anticompetitive conduct range between $88.9 million and $107.1 million based on damages starting in March 2015.

Rubinfeld is the Robert L. Bridges Professor of Law and Professor of Economics Emeritus at the University of California, **[**105]** Berkeley and Professor of Law at New York University. Among other qualifications, he has served as Deputy Assistant Attorney General in the Antitrust Division at the U.S. Department of Justice from June 1997 through December 1998; authored two textbooks, Microeconomics and Econometric Models and Economic Forecasts (both with Robert Pindyck); and written several academic articles that focus on damages methodology. Rubinfeld was retained by Defendants to review and assess Lawton's damages analysis and, to **[*1073]** the extent necessary, provide where feasible an alternative estimation of damages.

Rubinfeld opines that Lawton's methodology is flawed because she does not clearly articulate a "but-for" world. Rubinfeld contends that as a result of Lawton's commingling of distinct claims of misconduct—(1) an alleged conspiracy between CDK and Reynolds to block hostile integrators; (2) the allegedly unlawful 2015 Agreements themselves; and (3) the allegedly unlawful exclusive dealing provisions in CDK's and Reynolds' contracts with vendors—her model is incapable of disaggregating damages should a jury find some, but not all, of these alleged practices to be unlawful. Rubinfeld further argues that even **[**106]** if a jury concludes that all of these acts are unlawful, Lawton's damages model is flawed because she fails to identify a realistic butfor world that takes into account the alleged economic reality that, absent any collusive behavior, Reynolds and CDK would have had strong unilateral incentives to secure their DMSs. In addition, Rubinfeld identifies a number of alleged conceptual flaws and methodological errors that, he contends, make Lawton's damages estimates unreliable and unsupportable.

Defendants move to exclude Lawton, while Authenticom moves to exclude Rubinfeld. Several of the parties' criticisms are overlapping and therefore the Court considers them together where possible.

Defendants' first argument for excluding Lawton is that the "yardstick" she chose is not reasonably comparable to the impacted market because it includes thousands of connections that were improperly classified as "other connections. More particularly, Defendants maintain that thousands of connections that Lawton classified as "other connections" should have been classified as "CDK/Reynolds connections"; that Lawton included connections to software application vendors that are not DMSs; and that Lawton should **[**107]** not have included connections to its own inventory management application, Carpod, or connections to "independent" dealers. Lawton and Authenticom respond to each of these criticisms in some detail. See [999] at 17-23. Authenticom, in turn, moves to exclude Rubinfeld's criticism of Lawton on the basis that his critiques of the connections that she included in her yardstick "rely on an insufficient factual basis," [871] at 19, as demonstrated by Rubinfeld's alleged inability to adequately explain his criticisms when he was deposed, see *id.* at 20-22. The Court does not find it useful to go into the details of these arguments because the parties' criticisms all are "really about the correctness of [the experts'] conclusions, not the reliability of [their] methodology." *In re Fluidmaster, Inc., Water Connector Components Prods. Liab. Litig., 2017 U.S. Dist. LEXIS 48792, 2017 WL 1196990, at *22 (N.D. Ill. Mar. 31, 2017)*. As both sides acknowledge, the yardstick approach is a well-established methodology; the parties therefore "cannot complain that the methodology itself is unreliable." Areeda & Hovenkamp, ¶ 399b, at 2. Rather, their criticisms concern "how the selection of data inputs affect the merits of the conclusions produced by an accepted methodology," and therefore are properly handled through cross-examination and "left to the jury" for ultimately resolution. **[**108]** *Manpower, 732 F.3d at 808*; see also *Batty v. Zimmer, Inc. (In re Zimmer Nexgen Knee Implant Prods. Liab. Litig.), 2015 U.S. Dist. LEXIS 77475, 2015 WL 3669933, at *25* ("*Rule 702* does not permit 'the district court to choose between * * * two [competing] studies at the gatekeeping stage' or evaluate the quality of an expert's data, inputs, or conclusions."). As Rubinfeld's alleged correction of Lawton's inputs demonstrates, these are not issues that bear on the reliability of Lawton's methodology or the sufficiency of the available facts or data.

[*1074] Defendants' next argument is that Lawton's "yardstick" was inflated by the alleged anticompetitive conduct because, according to Authenticom's theory of the case, "competition for DMS polling connections has decreased as a result of Defendants' alleged conduct" by forcing other competitors out of business. [880] at 22. Defendants claim that "[c]ourts frequently exclude damages models ... where a but-for-world assumes little competition in a 'supposedly much more attractive environment.'" *Id.* (quoting *Southern Pac. Communications Co. v. American Tel. & Tel. Co., 556 F. Supp. 825, 1077-78 (D.D.C. 1982)*). Assuming this is correct, Defendants have not pointed to concrete evidence that competition to Authenticom for "other connections" has, in fact, decreased substantially since the beginning of the alleged conspiracy. Defendants do not concede this and according to Lawton's report, while a number of DIS **[**109]** providers have exited the market, several others continue to offer DIS today—especially to customers that do not depend on CDK and Reynolds DMSs. Defendants and Rubinfeld also do not suggest what adjustments should have been, but were not, made to Lawton's yardstick. More fundamentally, "[a]rguments about what factors an expert should have controlled for in conducting a yardstick analysis generally go to the weight, rather than the admissibility, of the expert's testimony." *Tawfilis v. Allergan, Inc., 2017 U.S. Dist. LEXIS 122974, 2017 WL 3084275, at *6 (C.D. Cal. June 26, 2017)*; see also *In re Prograf Antitrust Litig., 2014 U.S. Dist. LEXIS 180899, 2014 WL 7641156, at *3* ("Courts have been reluctant to determine comparability before trial." (collecting cases)).

Defendants also make several arguments concerning Lawton's alleged failure to account for the impact that Defendants' lawful, independent actions had on Authenticom's ability to compete in the DIS market. Defendants contend that Lawton failed to adjust her yardstick to take into account certain blocking activities that Reynolds engaged in prior to the start of the alleged conspiracy in September 2013. Relatedly, Defendants argue that Lawton's opinions must be excluded because her damages model fails to isolate damages caused by alleged illegal conduct. According to Defendants, "Lawton concedes that she has included **[**110]** damages in her calculation (which she cannot disaggregate) that were caused by actions Defendants took unilaterally and lawfully before the conspiracy and that they would have continued to take regardless of the conspiracy." [880] at 25. Authenticom disputes, however, whether Reynolds' blocking activities would have continued after September 2013 in the absence of a conspiracy. According to Authenticom, the costs that Reynolds' unilateral blocking efforts from June to August 2013 imposed on Reynolds were among the reasons that Reynolds sought to conspire with CDK. That is, competition from CDK constrained Reynolds' efforts to close its DMS; the conspiracy allegedly eliminated this competitive constraint. On the flip side, Authenticom argues that Rubinfeld should be excluded because at his deposition he "conceded basic facts showing that the conduct of Defendants prior to the conspiracy differed significantly from their conduct after they conspired—and admitted that he had done nothing to account for them." [871] at 17.

As the Court determined above with regard to Israel, the parties' competing arguments on what the "but for" world should look like go beyond the scope of *Daubert*. As Rubinfeld **[**111]** put it at his deposition, "any business decision has pluses and minuses," [871] at 17—leaving ample room for disagreement concerning what actions Defendants could or would have undertaken independently "but for" the alleged conspiracy. These arguments may be explored during cross-examination (assuming neither side is able to convince the court that it is entitled to summary judgment).

[*1075] Defendants' next criticism of Lawton is that she allegedly manipulated Authenticom's profit margins to increase damages. In particular, Defendants contend that Lawton inappropriately categorized Authenticom's development costs as "fixed" rather than "variable." Lawton explains that she classified development costs as she did after speaking with Authenticom's controller, who told her that development costs related to the development of Authenticom products such as DealerVault and did not vary with incremental volume. Defendants also criticize Lawton for cherry-picking the profit margin her analysis assumed based solely on what would produce a higher damages figure. However, Lawton explains why the margin she projected was equal to whichever of two figures was higher—the weighted average of the variable **[**112]** margin for the prior 12 months, or the margins Authenticom actually achieved. Lawton reasons that, "if Authenticom was able to increase its margins despite the negative impacts of the Defendants' alleged anticompetitive conduct on its margins, then those actual margins represent the best estimate of the but-for margins rather than the pre-damages period margins." [999] at 29. Both of Defendants' criticisms raise "battle of the experts" issues that should be resolved through cross-examination, not *Daubert* motions.

Finally, Defendants argue that "three hundred pages of 'factual' advocacy" in Lawton's opinion should be excluded" because they constitute an "improper advocacy-inspired interpretation of evidence." [880] at 29. Defendants do not point to any particular portions of the report that they find to be objectionable. The Court will not exclude any portion of Lawton's report on this ground as it was appropriate—and indeed necessary—for Lawton to disclose the factual basis for her opinions. *Lapsley v. Xtek, Inc., 689 F.3d 802, 810 (7th Cir. 2012)* ("of course, an expert who plans to testify to an opinion must make the basis of that opinion available for evaluation by the court and opposing parties"); *Fed. R. Civ. P. 26(a)(2)(B)(iii)* (requiring expert report to include "the facts **[**113]** or data considered by the witness" in forming her opinions).

The Court now turns to Authenticom's remaining grounds for excluding Rubinfeld's opinions rebutting Lawton. As alluded to above, Authenticom criticizes Rubinfeld for being unable to recall the details of all his opinions during his deposition, which Authenticom suggests is due to Rubinfeld's overreliance on his staff. The Court does not find these sufficient reasons to exclude his opinions. Defendants point out that "Rubinfeld was transparent about his process, pursuant to which he wrote much of the first draft of his reports," supervised his staff, and "thoroughly reviewed portions drafted by his assistants." [994] at 14; see also *Dura Automotive Systems of Indiana, Inc. v. CTS*

Corp., 285 F.3d 609, 612 (7th Cir. 2002) ("An expert witness is permitted to use assistants in formulating his expert opinion, and normally they need not themselves testify."); *Zollicoffer v. Gold Standard Baking, Inc., 335 F.R.D. 126, 149 (N.D. Ill. 2020)* ("Experts can rely on assistants to formulate an opinion, and can rely on an assistant's work within a certain discipline without being an expert in that discipline themselves[.]" (internal citations omitted)). There is no suggestion that Rubinfeld's assistants "exercise[d] professional judgment that is beyond [his] ken." *Dura Automotive, 285 F.3d at 613*. To the extent that Rubinfeld is unable **[**114]** recall particular details of his opinions, or needs to reference his reports before answering, this might hurt the effectiveness of his testimony at trial but is not a sufficient reason to exclude him under *Daubert*.

[*1076] Authenticom also seeks to exclude Rubinfeld's criticism of Lawton's treatment of connections associated with two dealer groups, Lithia and Group 1, on the basis that he failed to disclose this opinion in his rebuttal report, even though at that time he had the data necessary to do so. Authenticom asserts that this testimony should be barred as untimely under *Federal Rules of Civil Procedure 26* and *37*. In response, Defendants represent that Rubinfeld's criticisms were included in his report, in which he showed that the Lithia and Group 1 connections should be categorized as "Non-'Franchise New Car DMSs'" (which should be included in Lawton's yardstick) rather than "Franchise New Car DMSs" (which should not be included). [994] at 21. Even if Rubinfeld had not disclosed this criticism in his report, the Court would not be inclined to exclude it, but rather would provide Authenticom with an opportunity to supplement Lawton's report. To the extent that Authenticom believes that supplementation is necessary, it is free **[**115]** to file an appropriate motion requesting leave to supplement.

For these reasons, the Court denies Defendants' motion to exclude Lawton's opinions [879] and also denies Plaintiff's motion to exclude the opinions of Rubinfeld that rebut Lawton [867]. To the extent that motion [867] addresses other topics and/or rebuts other experts, those issues are considered in the appropriate sections below.

5. Klein [863] - MVSC's expert on lost profits

In motion [863], Reynolds seeks to exclude the testimony of Plaintiff MVSC's damages expert, Gordon Klein ("Klein"). Klein is a certified public accountant ("CPA") and an attorney. He has been a faculty member of UCLA's Anderson School of Management since 1981, teaching a variety of courses, and was a faculty member of UCLA's school of law from 1987 to 2000. He has authored several books on managerial accounting, cost accounting, introductory accounting, and managerial finance. He has served as an expert witness in numerous cases concerning the measurement of lost profits; the measurement of variable, fixed, incremental and non-incremental costs; enterprise valuation, damages, and unjust enrichment. He also has experience as a derivatives trader and **[**116]** consultant in analyzing the business models, financial performance, and valuation of publicly traded and privately held companies and as an advisor to closely held businesses and entrepreneurs.

As recounted in the background section above, MVSC provides EVR (electronic vehicle titling and registration) software to auto dealers. CDK and Reynolds also provide EVR software to dealers through CVR—a joint venture that is 80% owned by CDK and 20% owned by Reynolds. MVSC alleges that CDK and Reynolds blocked MVSC's integration with their DMSs to prevent MVSC from expanding its business in four states: California, Illinois, Virginia, and Wisconsin. More particularly, MVSC alleges that Defendants (1) blocked its membership in CDK and Reynolds' respective third-party access programs; (2) blocked its automated access to data through third-party integrators such as Authenticom; and (3) marketed CVR's status as the EVR provider with "certified" integration to the CDK and Reynolds DMSs through third-party access programs (whereas MVSC was not "certified"). MVSC refers to this generally as Reynolds' and CDK's "interference."

According to MVSC, without DMS integration, its EVR services were slower, **[**117]** required manual entry of data or another workaround, and inhibited MVSC's ability to offer "real-time" registration and titling services, which allow consumers to receive their registration and license plates at the **[*1077]** time of sale. The absence of automated real-time data access allegedly put MVSC at a competitive disadvantage, particularly in states such as Illinois and Virginia that require EVR transactions to be completed at the point of sale. While MVSC has developed certain manual "workarounds," it remains at a competitive disadvantage because the workarounds require dealership employees to expend time and effort in performing manual tasks and learning workaround procedures. Manual workarounds also increase the risk of errors and developing them imposes substantial financial costs of MVSC. MVSC and CDK reached a settlement in October 2019. Since that time, MVSC has had access to CKD's DMS as an approved partner in the 3PA program.

MVSC retained Klein to determine the damages that MVSC has allegedly sustained due to Defendants' interference. See [865-7] at 6 (Klein's report). Klein opines that, as a result of the interference, MVSC has sustained lost profits in four geographic markets: **[**118]** the states of California, Illinois and Virginia (where MVSC currently does business) and Wisconsin (where MVSC has taken steps to enter the EVR market, but has not been authorized to provide service). Klein asserts that his focus on four states only is conservative because, absent Defendants' interference, "it is quite likely that MVSC would have entered additional states, not just Wisconsin." *Id.* at 7.

MVSC began competing in California in 2008 and currently processes approximately 60% of all new vehicle dealership EVR transactions in that state. MVSC began efforts to enter the Illinois market in 2013 and in 2015 was formally authorized by the state of Illinois to "develop an EVR solution." [865-7] at 12. In Virginia, MVSC became an approved EVR vendor in 2014. MVSC has taken steps to enter the Wisconsin EVR market since 2014, but as yet has not been approved by the state to offer EVR services. Klein identifies two primary reasons for attributing this failure to Defendants' interference: First, the interference allegedly has diverted financial and management resources away from expansion efforts toward the costly and time-consuming projects of responding to the interference and developing **[**119]** workarounds to gain access to data. Second, Klein infers that the interference has reduced state regulatory agencies' confidence in MVSC's ability to provide services to the market.

Klein estimates that, but for Defendants' interference, MVSC would have obtained between 60% and 70% of the market share in each of the four states. Klein also considered the possibility that MVSC's damages were attributable to factors unrelated to Defendants' interference (including inadequacy of MVSC's products or services, regulatory barriers in Wisconsin, inability to roll out a product quickly enough, and lack of current availability beyond a few states) and concluded that these factors were insignificant. Based "principally on [his] analysis of MVSC's rapid growth in California prior to the onset of the [i]nterference and based on MVSC's success in Oregon, a state in which MVSC was not impeded by" interference, Klein concludes that interference "has been, at the very least, a substantial factor in causing MVSC's damages." [865-7] at 7. Taking into account incremental costs saved, Klein calculated lost profits as the difference between (a) profits that would have been earned in the absence of interference; **[**120]** and (b) actual profits earned.

Reynolds seeks to exclude Klein's testimony on several grounds. First, Reynolds argues that Klein "fails to disaggregate harm to MVSC caused by an alleged unlawful conspiracy between Reynolds, CDK and CVR from harm caused by each defendant's unilateral conduct which would **[*1078]** still exist in the but-for world." [865] at 13. However, in its opening brief, Reynolds does not identify any particular lawful "unilateral conduct" that it believes caused MVSC's damages. In its reply, Reynolds asserts that Klein "fails to take into account, for example, state budget constraints that impact MVSC's prospects of being approved to provide EVR services; the nature of EVR competition in a particular state; and the price and quality of MVSC's EVR services in a particular state." [1039] at 7. Generally, arguments raised for the first time in a reply brief are waived, due to the lack of opportunity for the other side to respond. See *O'Neal v. Reilly, 961 F.3d 973, 974 (7th Cir. 2020)* ("[W]e have repeatedly recognized that district courts are entitled to treat an argument raised for the first time in a reply brief as waived."); *Narducci v. Moore, 572 F.3d 313, 324 (7th Cir. 2009)* ("[T]he district court is entitled to find that an argument raised for the first time in a reply brief **[**121]** is forfeited."). Regardless, Reynolds does not identify anything in the record suggesting that the factors it mentions in passing do, in fact, contribute to MVSC's alleged lack of ability to compete in the four identified markets. Reynolds' cursory reference to other market forces that may be at place is not enough to convince the Court that exclusion under *Daubert* is required. Cf. *Mitsui Sumitomo Ins. Co. v. Moore Transp., Inc., 500 F. Supp. 2d 942, 950-51 (N.D. Ill. 2007)* (perfunctory, undeveloped, and skeletal arguments are waived).

Neither of two main cases on which Reynolds' argument relies, *MCI, 708 F.2d 1081*, or *Marshfield Clinic, 152 F.3d 588*, was decided in the context of a *Daubert* motion. In *MCI*, the court of appeals reversed, in part, a jury verdict in the plaintiff's favor in an antitrust action brought under *§ 4 of the Clayton Act*. In that case, the complaint contained twenty-two counts. The district court granted summary judgment for the defendant on seven counts, the jury found for the defendant on five of the remaining fifteen, and the court of appeals set aside the jury's verdict in the plaintiff's favor on several others. The plaintiff's damages study, however, assumed that all twenty-two of the defendant's charged acts were illegal, and its lost profits study did "not establish any variation in the outcome depending on which acts of **[**122]** [the defendant] were held to be legal and which illegal." *Id. at 1163*. This left the jury "with no way to adjust the amount of damages to reflect lawful competition," *id.*, and required the case to be "remanded for a proper determination of damages," *id. at 1160*. Here, there has been no determination that any of the conduct on which Klein's damages analysis relies is "lawful." While *MCI* suggests reasons why Defendants could potentially be entitled to summary judgment or a directed verdict—or even that additional work might needed to make "a proper determination of damages"—it does not warrant excluding Klein on the basis of failure to comply with *Daubert*.

In *Marshfield Clinic*, a jury found in the plaintiff's favor in an antitrust case arising out of allegations that the defendant, the dominant provider of medical services in part of Wisconsin, illegally monopolized the provision of certain medical services in its region, enabling it to increase its prices for those services above competitive levels to the detriment of the insurer plaintiff. The appellate court threw out the jury's verdict on all but one claim, for division of markets, and remanded for a new trial limited to damages on that claims. Following remand and additional discovery, **[**123]** the district court granted summary judgment to the defendant on the basis that the plaintiff had produced no evidence that it suffered any injury as a result of the sole remaining claim. See *Marshfield Clinic, 152 F.3d at 590-91*. In affirming the district **[*1079]** court's judgment, the appellate court reviewed multiple reports by the plaintiff's two economic experts, as well as "some nonexpert evidence of damages," and also found that the plaintiff "waived the right to seek damages on the basis of its opponent's expert reports"—which showed that the plaintiff suffered some damages, but much less than the plaintiff's experts calculated. *Id. at 593-95*. Writing for the panel, Judge Posner characterized plaintiffs' two experts reports as "worthless" because they "fail[ed] to correct for salient factors, not attributable to the defendant's misconduct, that may have caused the harm of which the plaintiff is complaining do not provide a rational basis for a judgment." *Id. at 593*. Significantly, "[a]s far as the record disclose[d]," the defendant charged a "higher average price per patient" than other Wisconsin providers of medical services due to "differences in the treatment mix," rather than the defendant's unlawful division of markets. *Id. at 593-94*. In this case, by **[**124]** contrast, Defendants' *Daubert* briefing does not identify, let alone provide a comprehensive assessment of the full record concerning, any lawful causes of MVSC's alleged damages. It would be premature to exclude Klein without having a fuller picture of the EVR market and the panoply of relevant evidence.

In a related argument, Reynolds contends that Klein "applied no expert methodology at all" to opine that Defendants' alleged interference was the primary factor that caused MVSC's harm. [865] at 16. Of course, an expert may not rely solely on his *ipse dixit*; however, that is not what Klein has done, even if there is room for debate about whether he considered all potential causes of MVSC's antitrust injury or gave them their appropriate weight. Reynolds' criticisms suggest that Klein's assumptions are "vulnerable," but not so speculative or lacking in basis as to be inadmissible. *Stollings, 725 F.3d at 768*. To the extent that Reynolds believes that Klein "makes unfounded or incorrect assumptions, [it] remains free to address those deficiencies through vigorous cross-examination." *Africano v. Atrium Med. Corp., 561 F. Supp. 3d 772, 2021 U.S. Dist. LEXIS 178575, 2021 WL 4264237, at *4 (N.D. Ill. Sept. 20, 2021)*.

For the California part of his analysis, Klein analyzed MVSC's growth rate "before and after" the interference, which is a "generally accepted **[**125]** method[] for proving antitrust damages." *Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 793 (6th Cir. 2002)* (citing *Eleven Line, Inc. v. N. Texas State Soccer Ass'n, Inc., 213 F.3d 198, 207 (5th Cir. 2000)*). He also relied on direct record evidence that California dealers had declined to purchase MVSC's services because of interference. Reynolds criticizes this part of his analysis, on the basis that Klein relies on account information provided by MVSC's COO, Joe Nemelka, concerning why certain dealers declined to do business with MVSC. Nemelka provided a sworn declaration explaining that certain dealers had cited MVSC's lack of "certified" access to data or automated access as a primary or significant reason for leaving MVSC or deciding not to use MVSC. Klein also reviewed other records, such as emails, that were consistent with Nemelka's declaration. Despite Reynolds' claim that this was improper, an expert does not run afoul of *Daubert* by relying on representations provided by a client. "[I]t is proper for counsel to furnish factual assumptions to experts as long as the factual assumptions are supported by the record." *Artunduaga v. Univ. of Chi. Med. Ctr., 2016 U.S. Dist. LEXIS 176402, 2016 WL 7384432, at *5 (N.D. Ill. Dec. 21, 2016)*; see also *Williams v. Illinois, 567 U.S. 50, 69, 132 S. Ct. 2221, 183 L. Ed. 2d 89 (2012)* ("Modern rules of evidence continue to permit experts to express opinions based on facts about which they lack personal knowledge[.]"); *Tuf Racing Products, Inc. v.* **[*1080]** *American Suzuki Motor Corp., 223 F.3d 585, 591 (7th Cir. 2000)* (CPA could calculate discounted present value of client's lost future earnings **[**126]** using financial information furnished by client and assumptions given to him by counsel). That Reynolds may be able to point to some contrary evidence does not change the Court's conclusion, as "[e]xperts routinely base their opinions on assumptions that are necessarily at odds with their adversary's view of the evidence." *Richman v. Sheahan, 415 F.Supp.2d 929, 942 (N.D. Ill. 2006)*. To the extent that Klein allegedly "reli[ed] on faulty information," this is "a matter to be explored on cross-examination; it does not go to admissibility." *Manpower, 732 F.3d at 809*.

As to all four states, Klein's conclusion that interference was a substantial factor in causing MVSC's damages relied in part on MVSC's rapid growth in California prior to the onset of the interference and MVSC's success in Oregon—a state in which MVSC was not impeded by interference. [865-7] at 7. Klein also explained why he rejected other potential causal factors based on his experience in business plan development and related areas. First, he considered that MVSC may have offered an inferior product but discounted that possibility due to evidence of dealers' satisfaction with MVSC's product and MVSC's track record of success in other states. Second, Klein explained that MVSC's damages could not be attributed **[**127]** to the length of time taken to develop manual workarounds because that development was resource-intensive, still left MVSC with a subpar method for accessing data on the DMS, and in any case, was only necessary because of the interference. Third, he rejected the possibility that MVSC's low market share in some states could be attributed to its lack of national scale because MVSC was able to obtain 60 percent market share in California without national scale. There is "a link between the facts [and] data" Klein has "worked with and the conclusions [his] testimony is intended to support," which satisfies *Daubert*. *Mamah, 332 F.3d at 478*. "Our system relies on cross-examination to alert the jury to the difference between good data and speculation." *Schultz, 721 F.3d at 432*.

Finally, the Court considers whether Klein adequately considered other potential causes of MVSC's failure to obtain any market share in Wisconsin. In his report, Klein reasoned that MVSC's delayed entry into Wisconsin could not be attributed to regulatory barriers unrelated to the conspiracy both because MVSC had been able to receive approval from other state regulators and because the difficulty that MVSC has had in receiving regulatory approval in Wisconsin is **[**128]** due in substantial part to MVSC's lack of automated or certified data integration to Defendants' DMS. At his deposition, Klein was confronted with correspondence from the Wisconsin Department of Transportation, dated February 2017, indicating that MVSC's application had been rejected because it was not accepting any new vendors into its EVR program. MVSC had not provided this correspondence to Klein (or Reynolds) and Klein did not consider it in his report. See [865] at 22-23 & n.11; [865-2] at 38-41. "Ignoring relevant data is not a scientifically valid method." *Kljajic v. Whirlpool Corp., 2017 U.S. Dist. LEXIS 70784, 2017 WL 1862640, at *15 (N.D. Ill. May 9, 2017)*. However, the Court cannot say that is what Klein has done here, even though it is a close call. As Klein pointed out during his deposition, the February 2017 letter does not state that Wisconsin was closed to other EVR providers at all times relevant to Klein's analysis and is only part of the record concerning this topic. Klein also considered evidence in the record indicating that Wisconsin was "very interested" in MVSC's 2014 application to be an EVR provider, and considered but rejected that application. [1009] at 24-25; **[*1081]** see also [1009-7] at 3; [866-12]. MVSC maintains that it will prove at trial that "the rejection **[**129]** was due in substantial part to the interference as demonstrated by CVR using the fruits of that interference—MVSC's lack of integration—in presentations to Wisconsin regulators." [1009] at 25. Reynolds offers its own experts, Rubinfeld and Bresnahan, to criticize Klein's opinion. The Court finds it appropriate to leave the resolution of the competing experts' testimony to the factfinder. See *Wipf, 519 F.3d at 385* ("Especially in a case of dueling experts, ... it is left to the trier of fact, not the reviewing court, to decide how to weigh the competing expert testimony.").

C. Other Experts

1. Stejskal [883] — Authenticom, Autoloop, MVSC, and the Dealers' expert on DMS switching costs and third-party data integrator security

In motion [883], CDK and Reynolds seek to exclude certain opinions of Allan Stejskal ("Stejskal"), who was retained by Authenticom, MVSC, the Vendor Class, and the Dealership Class ("Plaintiffs") to opine on several facets of the automotive industry, including the DMS market, third-party vendor applications, and access to dealer data and data integration service providers. See [889-12] (Stejskal's report).

Stejskal has over 25 years of experience in the automotive retail industry. From **[**130]** 1995 to 2000, Stejskal was a Vice President of CDK, which was then called ADP Dealer Services, where he ran CDK's nascent e-commerce division. From 2007 to 2014, Stejskal was an executive at Dealertrack, which is the nation's third-largest DMS provider behind CDK and Reynolds. Among other roles, Stejskal was the General Manager running Dealertrack's DMS business from 2010 to 2012. He created Dealertrack's OpenTrack certified data integration program, which allows third parties to access dealer data stored on the Dealertrack DMS. From 2017 to 2018, Stejskal was CEO for an international DMS company, Incadea, which is CDK's primary competitor in Europe and South America. On the dealer side of the automotive industry, Stejskal has served two stints as a senior executive at AutoNation, the largest auto dealership in the United States, most recently from 2006 to 2007. In that role, he was responsible for AutoNation's relationship with DMS companies and oversaw the DMS conversion process when AutoNation acquired new stores. Also from 2006 to 2007, Stejskal founded and was President of Secure Access ("OSA"), an industry coalition that advocated for dealer control over dealer data. During that **[**131]** time, he developed data security guidelines to help dealers safeguard their data.

Motion [883] concerns two of the topics covered by Stejskal's expert report—DMS switching and third-party data integrator security.[2] In the section of his opinion concerning DMS switching, Stejskal identifies reasons why a dealership's decision to switch DMSs is "not taken lightly," which is a hurdle for DMS vendors to overcome when seeking new customers. See [889-12] at 19-24, ¶¶ 40-48. A decision to switch to a new DMS comes with both "hard" and "soft" costs. Hard costs include things like hardware, setup, training, and data conversion from the old system. Soft costs include time devoted to system configuration, training, "go-live" data conversion, impact to customer satisfaction, employee turnover, and lost sales and productivity during the ramp-up time after the dealership "goes live" on the new DMS.

[*1082] Defendants argue that Stejskal's opinions on DMS switching should be excluded because they are based on anecdotes and speculation, rather than any expert methodology. He has not analyzed data concerning switching costs and admits he performed no quantitative analysis concerning DMS switching frequency. At **[**132]** bottom, Defendants argue, Stejskal's opinion is just an observation that switching entails some costs, which would be obvious to a layperson.

Under *Rule 702*, an expert may be deemed qualified "by ... experience," as well as "knowledge, skill, ... training or education." *Fed. R. Evid. 702*; see also *Africano, 2021 U.S. Dist. LEXIS 178575, 2021 WL 4264237, at *3*. "This is a "liberal standard; the expert need only have some 'specialized knowledge that would assist the trier of fact.'" *Id.* (quoting *Wilson v. City of Chicago, 6 F.3d 1233, 1238 (7th Cir. 1993)*). Expert witness testimony need not "be 'scientific' (natural scientific or social scientific) in character." *Tuf Racing Products, 223 F.3d at 591* (quoting *Kumho Tire, 526 U.S. at 150*). "The principle of *Daubert* is merely that if an expert witness is to offer an opinion based on science, it must be real science, not junk science." *Id.* In short, "[a]nyone with relevant expertise enabling him to offer responsible opinion testimony helpful to judge or jury may qualify as an expert witness." *Id.* "An expert's testimony is not unreliable simply because it is founded on his experience rather than on data[.]" *Metavante Corp. v. Emigrant Sav. Bank, 619 F.3d 748, 761 (7th Cir. 2010)*; see also *Viamedia, Inc. v. Comcast Corp., 951 F.3d 429, 484 (7th Cir. 2020)* (district court erred by excluding expert opinion that drew significantly on expertise to add context and supporting information); *Toney v. Quality Resources, Inc., 323 F.R.D. 567, 578-79 (N.D. Ill. 2018)*.

---

[2] Defendants do not dispute Stejskal's qualifications or his opinions concerning the DMS market, third party software applications, or data integration services.

Applying these principles, the Court concludes that Defendants' motion to exclude Stejskal's opinions on **[**133]** DMS switching should be granted in part and denied in part. The Court agrees with Plaintiffs that Stejskal's testimony concerning various ways that DMS switching may be difficult and disruptive for dealers will be helpful to lay jurors. Although they might already understand at a very high level that switching comes with some costs, they would lack familiarity with the inner workers of automotive dealerships and specific disruptions that may come with switching DMS providers. Stejskal's experience has given him familiarity with the types of hard and soft "costs" that may be associated with switching DMSs. On the dealer side, his role at AutoNation required him to oversee the DMS conversion process when AutoNation acquired new stores. He also spent more than a decade working for DMS providers, including CDK (then ADP Dealer Services) and Dealertrack, where he was responsible for running the nation's third largest DMS business. This experience "enabl[es] him to offer responsible opinion testimony" about the general types of hard and soft costs that dealers may face in the DMS conversion process. *Tuf Racing Products, 223 F.3d at 591*; see also, e.g., *National Jockey Club v. Ganassi, 740 F. Supp. 2d 950, 964 (N.D. Ill. 2010)* (banking industry expert was qualified to testify as to banking practices **[**134]** in lawsuit involving breach of a personal guarantee obligation under a lease, where he had extensive experience in relevant aspects of the banking industry); *James Hamlin & Co. PC v. Czarnecki & Schlenker, LLC, 2021 U.S. Dist. LEXIS 200355, 2021 WL 4845780, at *10-11 (E.D. Wis. Oct. 18, 2021)* (person with 25 years of experience in acquiring 20 accounting firms could testify as expert in action alleging breach of asset purchase agreement by describing for jury what he knew about successfully acquiring accounting **[*1083]** firms, such as retaining clients and billing; although views of witness were not "methodology," he did not propose to testify to scientific principles that could be tested empirically and his ideas could be grounded in accepted experience in his field).

However, Stejskal will not be allowed to opine as to how frequently switching costs dissuade dealers from changing DMS vendors. Plaintiffs acknowledge that Stejskal did not analyze data or perform a quantitative analysis on switching frequency. Therefore, any opinion he might provide on switching frequency would be "connected to existing data only by the *ipse dixit* of the expert," which *Daubert* and the Rules of Evidence do not allow. *General Electric, 522 U.S. at 146*. Plaintiffs suggest that this is not the intent of Stejskal's testimony and point out that "Stejskal never said switching DMS providers **[**135]** is impossible or 'not a viable option.'" [996] at 11. But at least one portion of his report could be read as supplying "a bottom line" on how switching costs affect switching frequency. *Wendler & Ezra, 521 F.3d at 791-92*. In particular, Stejskal writes that "[t]he prospect of going through the 'trough of despair'" (his colorful term for the DMS conversion process) "is *frequently* enough to dissuade a dealership from making a switch or even going through the competitive bid process." [889-12] at 23, ¶ 47 (emphasis added). In the accompanying footnote, Stejskal includes a parenthetical citing to deposition testimony of Paul Whitworth that "CDK only lost 1.4% of its dealership customers in 2018, despite 'massive cuts to their customer service' and a marketing push by Dealertrack." *Id.*, n.67. Without performing his own quantitative analysis or analyzing the data provided by others in the litigation, Stejskal has no basis for opining whether dealerships "frequently" or "infrequently" switch DMSs or for associating any particular switching percentages with the generalized "costs" that he outlines. Therefore, at trial, he will be prohibited from drawing such connections.

The second topic at issue in motion [883] is third-party **[**136]** data integrator security. Defendants challenge two of Stejskal's opinions on this topic. First, Stejskal states that in his experience, dealerships take the protection of personally identifiable information ("PII") in written and electronic form "seriously" and "make it a point to train their staffs accordingly." [889-12] at 39. Apart from his own experience in the industry he cites to the deposition of Mark Johnson, a dealership IT director who explained online training modules that employees must complete, and the deposition of Whitworth, who opined that "I think our industry, as with so many industries, by and large does a good job in providing suitable protections for data." *Id.*, n.106.

The Court agrees with Defendants that this opinion fails to satisfy *Daubert* and, therefore, it will be excluded. Stejskal is not an expert in cybersecurity and he has worked for only one dealer group, Auto Nation. His report provides no basis for concluding that he has knowledge concerning how seriously automotive dealers, as an industry, are about cybersecurity or what training, if any, they provide for their staff. Even if Stejskal were qualified to offer his opinion, his report provides "nothing but **[**137]** a bottom line," which "supplies nothing of value to the judicial process." *Wendler & Ezra, 521 F.3d at 791-92*. Stejskal's citation to Whitworth's equally conclusory testimony and Johnson's testimony about the training provided at one dealership does not save his opinion; there is "simply too great an analytical gap between the data and the opinion proffered." *General Electric, 522 U.S. at 146*.

[*1084] Stejskal's second opinion concerning third-party data integrator security is that "[t]here is nothing inherently insecure about dealers choosing to work with third-party data integrators." [889-12] at 39, ¶ 81. In support, he states that "the OSA 'Automotive Retail Data Security Guidelines' explicitly included the ability of dealers to provide third parties of their choosing with User IDs and passwords." *Id.* He concludes that, "[i]n my 20-plus years in the automotive retail market, I am not aware of any data breaches caused by companies like Authenticom and DMI providing data integration services using this method." *Id.*

The Court will exclude this opinion under *Daubert*, as well. Beyond being quite vague (what does "not inherently insecure" mean?; is the PII actually secure, or not?), it does not appear to be tied to any relevant data or experience. The OSA "Guidelines" **[**138]** on which Stejskal relies were developed nearly 15 years ago, during the two-year period when Stejskal was President of OSA. The Guidelines were a "set of operating principles," [889-12] at 36, ¶ 75, which, as Defendants point out, do not discuss the technical aspects of data integration and were never ratified by any formal body. Plaintiffs, claiming that this "misses the point," argue that "the Guidelines provide an appropriate basis of support for Mr. Stejskal's expert opinion because they reflect that a prominent coalition of over 50 industry stakeholders, including CDK ..., studied this issue and concluded that dealers should be entitled to use independent data integrators." [996] at 17. This may be, but it tells the Court nothing about whether the use of third-party data integrators presents any cybersecurity risks, what those risks might be, whether dealers or their third-party data integrators typically take steps to ensure the protection of data, or what steps they take. Finally, without any evidence that a significant proportion of dealers have adopted the Guidelines' suggested "method" of providing third parties with User IDs and passwords, it is simply irrelevant that Stejskal **[**139]** is "not aware of any data breaches caused by companies like Authenticom and DMI providing data integration services using this method." [889-12] at 39, ¶ 81.

2. Stroz [859] — CDK's expert on cybersecurity and APIs

CDK offers Edward Stroz as an expert in cybersecurity. He has more than 35 years of investigative experience, first as a Special Agent for the Federal Bureau of Investigation and then in the private sector. He is the founder and Co-President of Stroz Friedberg, which is now a division of Aon. Stroz Friedberg is an international investigations, intelligence, security, and risk management firm, which assists clients with matters including digital forensic preservation and analysis, security consulting, data breach investigations, fraud investigations, theft of trade secrets, and monitorships. Stroz offers opinions on security concerns faced by DMS providers and security issues posed by hostile DMS access. He also attempts to quantity the number of times that CDK's security measures have been evaded—a topic that is relevant to the calculation of CDK and Reynolds' damages for their DCMA counterclaims, which are discussed further below.

Stroz opines, among other things, that the **[**140]** development of custom application programming interfaces ("APIs") that third-party integrators could use to access the DMS "[would] not adequately address the security concerns from hostile access." [998-2] at 40. Plaintiffs argue that this opinion should be excluded because Stroz's report offers no evidence to support his opinion; he performed no analysis to determine whether APIs could address Defendants' security concerns or what burden **[*1085]** APIs would place on Defendants; and he did not assess the use of APIs by other DMS providers. All of these criticisms go to the weight, not the admissibility, of Stroz's opinions. In his reply report, Stroz lays out a number of reasons why, from Defendants' perspective, APIs would not be an adequate solution. He explains that creating APIs for data brokers like Authenticom would not provide any transparency or accountability as to the actual end-users of the data, because neither CDK nor Reynolds have visibility into which vendors receive which data from Authenticom. This would undermine the reporting tools and information that CDK and Reynolds provide to dealers that are designed to provide transparency into who actually has access to data maintained **[**141]** in their licensed DMS. Stroz also points out that developing custom APIs would require Defendants to expend substantial resources. These efforts would be superfluous because they would duplicate functionality that third-party software vendors are already offered through 3PA and RCI. If Plaintiffs disagree with Stroz's analysis, "[v]igorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means" of presenting their position to the jury. *Daubert, 509 U.S. at 596*.

3. Halpin [887] — Authenticom, Autoloop, and MVSC's expert concerning Cottrell's notes

In motion [887], CDK and Reynolds seek to exclude the expert report and testimony of Brian Halpin, who was retained by Plaintiffs to opine on the authenticity of a Microsoft Word document authored by Authenticom's CEO, Stephen Cottrell. The document on which Halpin opines consists of notes Cottrell made on April 4, 2016, allegedly documenting a conversation he had a day earlier with CDK executive Dan McCray ("McCray"). According to Cottrell and his notes, McCray referenced an agreement between the major DMS companies to effectively lock Authenticom and other third parties out of **[**142]** the market. McCray also allegedly made a profane threat to "destroy" Authenticom. In his expert report, Halpin concludes that the notes' "internal file metadata" reflect that the document "was created on April 4, 2016 at 10:41:00 AM" and "has not been changed since it was last saved on April 4, 2016 at 11:20:00 AM." [889-15] at 13.

Defendants seek to exclude Halpin's opinion on the ground that it is not relevant to any fact at issue and therefore would not be helpful to the jury. Although Defendants dispute that the notes accurately reflect what Cottrell and McCray discussed, they do not dispute when the notes were created or whether they were subsequently modified. Defendants maintain that Halpin's report is not relevant and therefore would not be helpful to a jury because there "are no claims or defenses by any of the parties that rely upon the timing or modification of" the notes. [888] at 5. In addition, Defendants assert, their offer to stipulate that the notes were created on April 4, 2016 and have not since been edited "renders ... Halpin's proposed testimony undeniably improper." *Id.* at 6. Defendants further argue that Halpin's testimony should be excluded because its potential **[**143]** prejudicial effect "far outweighs" its probative value. *Id.* at 8.

The Court denies motion [887] without prejudice to Defendants' ability to challenge Halpin's testimony through motions *in limine* in advance of trial. As noted above, step three of the *Daubert* analysis requires the Court to determine "whether the testimony will 'assist the trier of fact to understand the evidence or to determine a fact in issue.'" *Myers, 629 F.3d at 644* (quoting *Ervin, 492 F.3d at 904*). "Expert testimony must be relevant and factually linked to the case in order to **[*1086]** meet *Rule 702*'s 'helpfulness' requirement." *Mason v. City of Chicago, 631 F. Supp. 2d 1052, 1059 (N.D. Ill. 2009)* (quoting *United States v. Gallardo, 497 F.3d 727, 733 (7th Cir. 2007)*). Halpin's proposed testimony satisfies that standard. Despite Defendants' assertion that none of Plaintiffs' claims rely on when Halpin's notes were created or whether they were later modified, those issues could be relevant to the jury's assessment of whether Cottrell's recollection of the April 3, 2016 conversation is accurate. A jury may find it probative that the notes were taken less than a day after the conversation when, arguably, it was fresh in Halpin's mind and litigation was not yet contemplated.

Defendants argue, based on *In re Brand Name Prescription Drugs Antitrust Litig., 186 F.3d at 786*, that "expert testimony should be excluded where it 'mainly concern[s] a matter not in issue' and can 'be[] removed **[**144]** as an issue at trial by a stipulation of the parties'—precisely as Defendants tried to do here." [888] at 6. But the Court does not read *Brand Name Prescription Drugs* to encourage using *Daubert* in the manner Defendants propose. During the eight-week trial in that case, "[t]he defendants spent days cross-examining" one of the plaintiffs' principal expert witnesses and "ultimately persuaded the district judge to exclude most of his testimony under ... *Daubert*" and grant judgment as a matter of law in their favor. *Brand Name Prescription Drugs, 186 F.3d at 786*. But "what was objectionable about [the expert's] evidence," Judge Posner observed, "actually had nothing to do with *Daubert*; it was that the evidence mainly concerned a matter not in issue." *Id.* The subject of the expert's opinion "should have been removed as an issue at trial by a stipulation of the parties." *Id.*

Here, the Court agrees with Defendants that it would make little sense to waste a jury's time on expert testimony concerning matters to which Defendants are willing to stipulate. Of course, Plaintiffs cannot be forced to stipulate, as a stipulation is "a contract between two parties to agree that a certain fact is true." *United States v. Barnes, 602*

F.3d 790, 796 (7th Cir. 2010); see also United States v. Swiatek, 819 F.2d 721, 731 n.4 (7th Cir. 1987) ("It may be true that the introduction of this evidence was not essential, but . **[**145]** . . [a] party may insist on proving a fact even when there has been an offer to stipulate."). But that does not mean that Defendants are without recourse if Plaintiffs refuse to accept a reasonable stipulation that will streamline and shorten the trial. "Concerns about trial efficiency may fit under various Rule 403 headings: confusion of the issues, undue delay, waste of time, and needless presentation of cumulative evidence." Thompson v. City of Chicago, 722 F.3d 963, 971 (7th Cir. 2013); see also MCI, 708 F.2d at 1171 ("Litigants are not entitled to burden the court with an unending stream of cumulative evidence."). This rule gives the trial judge "considerable latitude even with admittedly relevant evidence in rejecting that which is cumulative, and in requiring that which is to be brought to the jury's attention to be done so in a manner least likely to confuse that body," so long as a party is not "effectively prevented from presenting his or her case." Thompson, 722 F.3d at 971.

Defendants make a number of Rule 403 arguments, which the Court finds unnecessary to resolve until closer to trial. At that point, the parties will have a better understanding of the full universe of witnesses, evidence, and issues that they intend to introduce. The parties will not have limitless time to present their cases **[**146]** and therefore will need to make strategic decisions about how to try the case most efficiently. To the extent they still cannot agree on whether Halpin will testify, the trial judge will be in position to employ "the balancing **[*1087]** process contemplated by" Rule 403, which "is best undertaken at the trial itself." Adams v. Ameritech Servs., Inc., 231 F.3d 414, 428 (7th Cir. 2000).

IV. Defendants' Counterclaims

For ease of reference, in discussing CDK and Reynolds' counterclaims, the Court will continue to refer to CDK and Reynolds as "Defendants" and the Counter-Defendants as "Plaintiffs."

A. Stroz [859] — CDK's expert on damages for DMCA Violations

Congress enacted the DMCA in 1998 "to strengthen copyright protection in the digital age." Universal City Studios, Inc. v. Corley, 273 F.3d 429, 435 (2d Cir. 2001); see also Navistar, Inc. v. New Baltimore Garage, Inc., 2012 U.S. Dist. LEXIS 134369, 2012 WL 4338816, at *3 (N.D. Ill. Sept. 20, 2012). Section 1201 of the DMCA addresses liability for circumventing systems that protect copyrights. See 17 U.S.C. § 1201. It provides that "[n]o person shall circumvent a technological measure that effectively controls access to a work protected under this title." *Id.* § 1201(a)(1)(A). The DMCA defines "circumvent a technological measure" to mean "descramble a scrambled work, to decrypt an encrypted work, or otherwise to avoid, bypass, remove, deactivate, or impair a technological measure, without the authority of the copyright owner." *Id.* at § 1201(a)(3)(A). The term to "circumvent protection **[**147]** afforded by a technological measure" is defined to mean "avoiding, bypassing, removing, deactivating, or otherwise impairing a technological measure." *Id.* at § 1201(b)(2)(A).

In their DMCA counterclaims against Authenticom, CDK and Reynolds allege that dealers are contractually prohibited from granting data integrators like Authenticom access to their DMS. See generally [225] (Reynolds' counterclaims); [299] (CDK's counterclaims). Neither CDK nor Reynolds authorizes such access. Instead, they have instituted various technological measures designed to block data integrators, such as CAPTCHA prompts and a "YES/NO" prompt, which are described in more detail below. They also have disabled user accounts that they believe to be associated with allegedly unauthorized third parties, such as Authenticom. Reynolds alleges that since at least 2009, Authenticom has repeatedly violated the DMCA's anti-circumvention provision, 17 U.S.C. § 1201(a)(1)(A), by bypassing these technological measures to access Reynolds' DMS.

As discussed above, CDK offers Edward Stroz as an expert in cybersecurity. In addition to assessing the extent to which "hostile" access to DMSs poses security risks—a topic addressed in the previous section of this order—Stroz **[**148]** was retained to quantify the number of times that certain Plaintiffs engaged in allegedly unlawful conduct related to accessing DMSs. More particularly, Stroz opines on how often, allegedly in violation of the

DCMA, Authenticom bypassed three CDK security measures: (1) the "YES/NO" prompt; (2) CAPTCHA prompts; and (3) the disabling of user accounts associated with unauthorized third parties.

1. The Yes/No prompt

In June 2016, CDK deployed a prompt on Authenticom accounts that required users to "enter YES to confirm that you are an authorized dealer employee" or to "[e]nter NO to exit this program." [995] at 11. Beginning on June 15, 2016, Authenticom deployed an automated script to respond "YES" and access the DMS. CDK withdrew the prompt on most Authenticom accounts by July 19, 2016. *Id.* Stroz attempted to calculate the number of times that Authenticom used automated means to answer the Yes/No prompt in the 34 days between June 15 and July 19, 2016. CDK had data logs for 98 accounts across 42 DMS servers for the full 34-day period **[*1088]** at issue. Stroz identified these accounts as Authenticom accounts because they met the following criteria: (1) they were used by Authenticom; (2) they used **[**149]** automated means to access the CDK DMS; (3) they were active during the same 34-day window; and (4) CDK decided to deploy the YES/NO prompt against them. Stroz looked at the 98 accounts for the full 34-day period at issue and determined that a total of 22,901 successful Authenticom responses (100% of the successful responses) were automated. There were an average of 7.4 successful responses per day per account.

CDK did not have data for the full set of 2,750 accounts, over 1,300 servers, which it determined to be Authenticom accounts meeting the same four criteria just described. Authenticom also did not provide Defendants with any more information about its YES/NO responses. See [995] at 16. Stroz therefore attempted to extrapolate his findings concerning the 98 accounts to the full set of 2,750 accounts. He determined the average number of accounts that answered a login attempt on each day during the 34-day period (464.5). He multiplied this number by the 98-account subset's average number of successful responses per day per account (7.4), yielding a total of 116,868 automated responses for the 34-day period.

Plaintiffs do not challenge the process Stroz used to determine number of **[**150]** YES/NO responses for the 98 accounts. However, they maintain that Stroz's extrapolation to the full set of accounts was unreliable because he has not demonstrated that the 98 accounts are representative of the full set of 2,750 accounts. Plaintiffs argue that there is reason to question the representativeness of Stroz's sample because "90% of the 91 accounts in his sample were active on 13 of the 14 days in the sample, whereas 90% of the over 2,000 accounts to which he extrapolates the sample were only active on (at most) a single day." [861] at 13. CDK responds that "the data showing the broader population of users who received the prompt did not even purport to show the intensity of access by those users. And to the extent there was any variation in that intensity, the 42-server sample also reflected it." [995] at 17 & n.8. The sample contained a broad distribution of users with a variety of user intensities: from those that averaged less than 1 access per day, to those that accessed on average about 51 times per day. See [998-2] at 54 & n.232.

The Court finds it a close call as to whether the uncertainty of Stroz's extrapolation warrants exclusion under *Daubert*. Although "damages cannot **[**151]** be based on pure speculation or guesswork," they "also need not be proven with the certainty of calculus." *BE & K Constr. Co. v. Will & Grundy Counties Bldg. Trades Council, 156 F.3d 756, 770 (7th Cir. 1998)*; see also *Phoenix Bond & Indem. Co. v. Bridge, 911 F. Supp. 2d 661, 675 (N.D. Ill. 2012)*. And "[w]hen a defendant's wrong makes it difficult for the plaintiff to prove damages, all reasonable doubts about the amount of damages are resolved in the plaintiff's favor." *Id.* CDK's alleged damages stem from Plaintiffs' surreptitious use of technology to avoid the "YES/NO" prompts. The Court therefore begins with the proposition that Plaintiffs should "not benefit from" any "uncertainty [they] created." *Id.*; see also *Mid-America Tablewares v. Mogi Trading Co., 100 F.3d 1353, 1365 (7th Cir. 1996)* ("Speculation has its place in estimating damages, and doubts should be resolved against the wrongdoer.").

That said, the Seventh Circuit has cautioned that a "non-random sample might undermine the reliability of the statistics." *Chavez v. Ill. State Police, 251 F.3d 612, 643 (7th Cir. 2001)* (civil rights **[*1089]** case in which plaintiffs' expert used statistical sampling to determine racial breakdown of motorists stopped by police). Nonetheless, the Court is not convinced that Stroz's extrapolation must be excluded based on the case law cited by Plaintiffs, in which experts could have examined, but apparently ignored, fuller, more detailed data in favor of "convenience" sampling or cherry-picking to achieve more favorable **[**152]** results. See, e.g., *Espenscheid v. DirectSat USA, LLC, 705 F.3d 770, 774-75 (7th Cir. 2013)* (in *Fair Labor Standards Act ("FLSA")* case, rejecting plaintiffs class counsel's proposal to extrapolate from experience of small, unrepresentative sample of 42 proffered class members to that of 2341 to avoid "2341 separate hearings" on damages for hours plaintiffs worked but did not report on time sheets, where "[t]he unreported time for each employee could be reconstructed from memory, inferred from the particulars of the jobs the technicians did, or estimated in other ways"); *American Honda Motor Co., Inc. v. Allen, 600 F.3d 813, 818-19 (7th Cir. 2010)* (expert who tested one vehicle and extrapolated findings to whole fleet of vehicles produced over seven-year period did not offer reliable testimony; he "was not being as thorough as he might otherwise be due to Plaintiffs' reluctance to pay for more testing"); *Farmer v. DirectSat USA, LLC, 2013 U.S. Dist. LEXIS 39912, 2013 WL 1195651, at *4-7 (N.D. Ill. Mar. 22, 2013)* (in FLSA case, excluding expert opinion concerning number of unpaid hours worked by class members where expert relied on 3 months of GPS data from 30 class members' vans, 7 depositions, and timesheets from 4 class members to extrapolate to 500 employees over 16 months—rather than GPS data for 500 employees over the whole 16-month period—where record showed there were large seasonal fluctuations in hours worked, GPS data was questionable, and sample may have been **[**153]** cherry-picked by plaintiffs' counsel); *Allgood v. GMC, 2006 U.S. Dist. LEXIS 70764, 2006 WL 2669337, at *10-11 (S.D. Ind. Sept.18, 2006)* (excluding proposed expert who estimated plaintiffs' risk of developing cancer, where his risk assessment was "performed by using only a limited number of the available samples, and those that would tend to magnify greatly the risk calculation" and he "failed to offer any scientific justification for his sample selection choices"). Rather, Stroz used *all* of the data available to him, which was confined to 98 accounts, to extrapolate to the full set of 2,750 accounts. He proceeded in this manner because this was the data that CDK had, and Plaintiffs never provided any additional data. Plaintiffs do not explain what additional analysis Stroz could or should have done with the limited data available to him to ensure that the accounts he examined in detail were representative of the larger universe of accounts. See [861-7] at 54 (Stroz explaining in reply report that Authenticom's rebuttal witness, Dr. O'Brien, "points to no available data, and I am aware of none, that would allow any further assessment of representativeness").

"*Rule 702* [ ] does not condition admissibility on ... a complete and flaw-free set of data." *Lees v. Carthage Coll., 714 F.3d 516, 524-25 (7th Cir. 2013)* (internal quotation marks omitted). **[**154]** "The critical inquiry" in assessing an expert's extrapolation from existing data "is whether there is a connection between the data employed and the opinion offered." *General Electric, 522 U.S. at 146*. This is not an instance where there is "no rational connection between the data used and the conclusion arrived at." *Kleen Products, 2017 U.S. Dist. LEXIS 83321, 2017 WL 2362567, at *9*. Stroz explains the basis for his belief that the subset of accounts he examined was representative of the larger group of accounts, including that all of the accounts met the same four criteria for being identified as Authenticom **[*1090]** accounts (used by Authenticom; used automated means to access the CDK DMS; were active during the 34-day window; and CDK decided to deploy the YES/NO prompt against them). Stroz's method of extrapolation also apparently took into consideration and excluded accounts for which no access attempts were made on a particular day, since his calculation was based on the average number of accounts that answered a login attempt on each day during the 34-day period (464.5 of the 2,750 total accounts).

What is not clear, however, is whether it was reasonable to assume 7.4 logins per day for the active accounts in the larger group. Neither side assesses this factual issue in any detail. **[**155]** Plaintiffs claim that "[o]ther evidence indicates CDK targeted accounts with more frequent DMS access for more frequent interruption," [1048] at 6. But the larger group of accounts that Stroz considered, like the smaller subset, included only accounts that CDK decided to deploy the YES/NO prompt against. In other words, all of the accounts that Stroz considered were ones that Defendants targeted for interruption with the YES/NO prompts. Plaintiffs' rebuttal expert, Daniel O'Brien, also acknowledged that it is possible that the full set of users who received the prompt accessed the DMS with the same frequency as those in the smaller set. Given the limited information available to Stroz, and the rational connection between the available data and the conclusions he reached, the Court finds on balance that it should be left to a jury to assess whether it was reasonable for Stroz to assume 7.4 logins per day for the active accounts in the larger group. Plaintiffs are "free to use cross-examination to attack the assumption" of 7.4 logins per day and ask Stroz "how altering the assumption would affect his analysis." *Stollings, 725 F.3d at 766*. "A jury should be capable of understanding how the value of the estimate **[**156]** affected [Stroz's] conclusions." *Id. at 767*; see also *In re*

Fluidmaster, Inc., Water Connector Components Prods. Liab. Litig., 2017 U.S. Dist. LEXIS 48792, 2017 WL 1196990, at *30 (concluding that most of defendant's arguments concerning expert survey—including "the survey's small sample size, unrepresentative sample composition, [and] whether the results of conjoint studies can be adequately extrapolated to the retail setting...—go to weight, not admissibility").

In addition to challenging the reliability of Stroz's extrapolation, Plaintiffs argue that Stroz was not qualified to perform this analysis, which "required statistical expertise—including experience in designing statistical models, selecting samples, and measuring the standard error of estimates—that Mr. Stroz does not have." [861] at 10 (citing [861-5], Federal Judicial Center, REFERENCE MANUAL ON SCIENTIFIC EVIDENCE 241 (3d ed. 2011)). CDK responds that Stroz does not need to be a statistician to make the calculations he did. They explain that "[h]e was retained to assess the cybersecurity implications of hostile integration, and the more specific practices in question here (CAPTCHA and YES/NO prompt evasion; and use of the Profile Manager tool), which are at the heart of his general expertise in cybersecurity and forensic investigations, which in turn **[**157]** often require analysis of voluminous data." [995] at 15 n.6.

The reference manual on which Plaintiffs rely provides: "In some instances, the expert is faced with more information than is possible to process. ... If the expert elects to study a sample of the data, the expert needs to have carefully considered how the information will be used to ensure that the data sample is large enough and contains sufficient information. Usually, this requires that the expert has constructed a model of damages and a related sampling plan that includes an estimate of the sampling error. Unless the expert is a **[*1091]** trained statistician, the expert should seek outside help in designing the sampling plan." [861-5] at 25-26. This guidance does not appear to fit what Stroz did, as he was not "sampling" data that was too voluminous to process. He was looking at all the available data, and assessing whether any conclusions could be drawn about the accounts for which fuller information was not available. Plaintiffs do not question whether Stroz was qualified to analyze the 98 accounts and opine on how many times Authenticom evaded Defendants' YES/NO prompts. Plaintiffs focus only on Stroz's qualifications to extrapolate **[**158]** to the 2,750 accounts. They do not explain how an expert in statistics would be better suited to perform that analysis, given the limited data available and given the need for an expert to understand the relevant cybersecurity technology.

Plaintiffs argue further that Stroz's method of calculating Yes/No responses within the sample from the 42 servers does not fit the facts in the record. [861] at 17. But the argument about whether and when certain accounts should be counted is the kind of input to a calculation that goes to an opinion's weight, not its admissibility. *Manpower, 732 F.3d at 807*. Plaintiffs also challenge Stroz's reliance on CDK's tagging accounts as being associated with Authenticom, especially where CDK tagged an account as being associated with multiple vendors or with "unknown vendors." [861] at 18-19. But Stroz also relied on Authenticom's own records and admissions to identify Authenticom accounts, see [861-1] at 87-88, which supports a conclusion that Stroz's input was reliable. If Plaintiffs believe that CDK and Stroz have failed to provide sufficient evidence that certain accounts belonged to Authenticom, they can make those arguments to the jury and, if persuaded, the jury can discount **[**159]** or exclude altogether those accounts from its calculations.

2. Profile Manager

In late 2016, CDK began disabling Authenticom accounts. In response, Authenticom developed a software called Profile Manager, which accessed the DMS's Update User Profile ("UUP") function and automatically reactivated disabled accounts. Authenticom began using Profile Manager at dealerships around November 4, 2016. CDK deployed a security patch to stop Profile Manager on April 25, 2017. In discovery, Authenticom did not produce records of the number of times Profile Manager was launched or successfully re-enabled accounts between November 4, 2016 and April 25, 2017. Authenticom's 30(b)(6) witness also could not answer how often the program ran.

In his report, Stroz attempted to calculate damages based on the number of times that Authenticom launched Profile Manager during the relevant period. Stroz relied on emails from Authenticom indicating that it provided Profile Manager to 4 dealers by November 4, 2016, to at least 100 by January 26, 2017, to more than 200 by

February 8, 2017, and to more than 350 by April 17, 2017. Stroz assumed that between each of those dates, the number of dealers with Profile Manager **[**160]** remained constant (*e.g.*, he assumed that between November 4, 2016 and January 26, 2017, only 4 dealers had Profile Manager). He also reduced the number of dealers for a period in February based on information that Profile Manager service was interrupted, and he subtracted a number of dealers to whom the security patch applied before April 14, 2016.

To determine the number of times Profile Manager launched, Stroz looked for automated access to the UUP function and developed three factors to identify it: the account had a high ratio of access per hour; at least 70% of the accesses took less than 10 seconds; and at least 70% occurred **[*1092]** at 20 minutes after the hour (when Stroz observed that the automated accounts typically accessed the UUP function). He identified 52 accounts that met these three criteria. Stroz then reviewed 16 full days (and 2 partial days) of data regarding accounts accessing the UUP function from March 19-April 5, 2017; this data was provided by Defendants and was the only data available. The 52 accounts that Stroz identified logged in 12,449 times over the 16 full days, an average of 15 times per day. This was consistent with an Authenticom document indicating that Profile **[**161]** Manager was designed to run every hour from 7 a.m. to 10 p.m.—*i.e.*, 15 times per day. Stroz concluded that Profile Manager ran an average of 15 times per day. To calculate the number of times Profile Manager launched between November 4, 2016 and April 24, 2017, Stroz multiplied 15 times the number of dealers with Profile Manager for each day of the relevant period for a total of 64,770 launches.

Stroz also tried to calculate the number of times that Profile Manager re-enabled a disabled account. As of April 2016, CDK was disabling targeted accounts at least once per day, though sometimes more often. Stroz assumed that Profile Manager successfully re-enabled only one user account per day per dealer group, for a total of 4,318 re-enabled accounts over the relevant period.

In addition, Stroz ran his analysis for a particular dealer group, the Warrensburg Counter-Defendants, for a period of March 20, 2017 (the earliest date for which he had data) to August 21, 2019. He used a daily launch number of 11, rather than 15, because that was the dealer group's average during the 2-week sample period. Stroz calculated that the Warrensburg Counter-Defendants ran Profile Manager 9,735 times, which **[**162]** re-enabled a user account at least 36 times.

Plaintiffs challenge the reliability of Stroz's extrapolation from a 16-day sample in March and April 2017 to the entire four-and-a-half-month period (and longer for the Warrensburg Counter-Defendants). The core of the challenges to his extrapolation is the same as described in the prior section on the YES/NO prompts, and CDK's response is the same. The Court's resolution of this challenge is also essentially the same; in this section, the Court focuses on the arguments that are specific to Stroz's Profile Manager analysis.

As with his opinion concerning YES/NO prompts, Stroz was working with limited data. Authenticom allegedly developed the Profile Manager software to evade Defendants' disabling of accounts due to alleged unauthorized access, and it did not produce any records or a 30(b)(6) witness identifying the number of times it launched profile Manager or reactivated disabled accounts. As Authenticom's alleged actions (or inactions) have made it difficult for Defendants to prove damages, reasonable doubts about the amount of damages are properly resolved in Defendants' favor. See *BE & K, 156 F.3d at 770*; *Phoenix Bond, 911 F. Supp. 2d at 675*.

According to Plaintiffs, Stroz's calculations are unreliable **[**163]** because he has not demonstrated that the 16-day period he analyzed (March 19 to April 5, 2017) is representative of the full period (November 4, 2016 to April 25, 2017). In particular, Plaintiffs argue that it is not a reasonable assumption that Profile Manager was launched fifteen times per day per account for the whole period because the earliest there is even anecdotal evidence that the program was running automatically was February 13, 2017—over half-way through the whole period at issue. However, this argument relies on a single, unclear email that Plaintiffs do not adequately explain or support with an affidavit or other evidence **[*1093]** of when Profile Manager became capable of being run automatically. See [861-11] at 2-3. Plaintiffs also do not contest that when Profile Manager was running automatically, it was designed to do so 15 times per day. Nor do Plaintiffs dispute that Profile Manager was running 15 times per day during the 2-week period for which Defendants were able to obtain detailed data. While he did not have "a complete and flaw-free set of data" from which to work, *Lees, 714 F.3d at 524-25*, there was a rational connection between the data on which

Stroz relied and his calculations for the full **[**164]** time period. See *Kleen Products, 2017 U.S. Dist. LEXIS 83321, 2017 WL 2362567, at *9*. And while Plaintiffs criticize Stroz for allegedly failing to use reliable statistical methods like testing the representativeness of his "sample" or calculating a standard error, it does not explain how Stroz could have done so given the limitations in the data Authenticom provided.

Plaintiffs also challenge the reliability of Stroz's calculations on the grounds that he used a different number of average daily launches for the Warrensburg Counter-Defendants (11) than he used for other dealers who deployed Profile Manager (15). However, it was rational to use a daily launch number of 11, rather than 15, for this dealer group because that was the group's average during the 2-week sample period. Any relevant differences between the Warrensburg Counter-Defendants and other dealers can be explored through cross-examination.

3. CAPTCHA

In October 2017, CDK began using CAPTCHA prompts to "combat accounts associated with unauthorized third-parties" attempting to access the CDK DMS. [995] at 6. By requiring the user to enter obscured numbers and letters, a CAPTCHA prompt is designed to prevent automated access (*i.e.*, access by a computer rather than a human). Authenticom developed **[**165]** software to overcome the CAPTCHA prompts. Stroz attempted to determine the number of times that Authenticom circumvented CDK's CAPTCHA prompts. First, he developed four criteria to identify accounts that submitted automated responses: (1) the account submitted a blank answer to at least 80% of the prompts; (2) the account submitted a blank answer at least 95% of the times it faced particular fonts (with a minimum of 20 attempts); (3) the account successfully answered a prompt twice in under one second, or twice in under two seconds at least ten times; and (4) the account attempted to log in more than 300 times in a 24-hour period.

Stroz then attempted to identify accounts that were related to Authenticom. He began with a set of accounts that CDK tagged as belonging to Authenticom. He also tried to identify accounts based on the queries they sent to the DMS. Authenticom ran queries to the DMS in a particular database query language ("ENG"), and Stroz used documents that Authenticom produced to find ENG queries that it commonly ran on CDK's DMS. Stroz reviewed all ENG queries on particular dealer servers from March 13, 2016 to July 24, 2016 to determine which accounts ran ENG queries **[**166]** that Authenticom used. Stroz excluded from consideration any queries that appeared in Authenticom's documents but contained fewer than six output fields, on the grounds that they were too generic to identify an Authenticom-related account. That eliminated from consideration 8 of 60 queries. Stroz concluded that the other 52 queries were sufficiently distinctive to identify Authenticom accounts.

CDK's records of access to the DMS show 1,614 accounts that ran an ENG query associated with Authenticom, 98% of which CDK had also tagged as belonging to Authenticom. Stroz concluded that accounts running Authenticom-related queries **[*1094]** and tagged by CDK as belonging to Authenticom were Authenticom accounts, and he found 126 that had responded to CAPTCHA queries between October 2017 and January 5, 2018. Stroz found that those accounts gave 7,628 successful automated response to CAPTCHA prompts, including 1,256 times on behalf of the Continental Counter-Defendants.

Plaintiffs raise three objections to these opinions. First, Plaintiffs argue that Stroz lacks the expertise to give these opinions because he is not an expert in reading software code. But Plaintiffs do not explain why he needs to be one **[**167]** or why issues like automated responses to database security measures or review of database query logs are not within the scope of his cybersecurity and digital forensic analysis expertise.

Second, Plaintiffs challenge Stroz's methodology on the basis that he purportedly fails to explain how he concluded that the 52 ENG queries with six output fields or more were so distinctive that he could identify them as queries from Authenticom. However, his report explains how he came to this conclusion. He began with an Authenticom document that contained ENG queries that Authenticom commonly used. He then looked at CKD's logs of ENG queries and found the accounts that ran the ENG queries that Authenticom commonly used. He eliminated from consideration simpler ENG queries, a set of 8 with fewer than six output fields, because they were too generic to be used to identify Authenticom. That left 52 ENG queries. If that was an error, it was an error in Authenticom's favor, because it meant that Stroz's analysis pulled in fewer queries and fewer dealer accounts. *U.S. ex rel. Tyson v. Amerigroup Illinois, Inc., 488 F. Supp. 2d 719, 733-34 (N.D. Ill. 2007)* (expert's method was not unreliable when his choices in calculating damages provided a more conservative estimate, which benefited the objecting **[**168]** party); *cf. Kleen Products, 2017 U.S. Dist. LEXIS 83321, 2017 WL 2362567, at *10* (declining to exclude expert opinion because expert's choices were reasonable, "even if not the most conservative"). From those 52 queries, Stroz then identified the number of times those queries were run and the accounts that ran those queries, which Stroz concluded were Authenticom accounts.

He cross-referenced those accounts with a list of accounts that CDK had tagged as Authenticom-related, another move that Plaintiffs contest. But the overlap in the separately-compiled lists—98%—is a suggestion of reliability. Furthermore, CDK used the names of some accounts to tag them as Authenticom (such as "authcom," "dvault," and "dvault1"). [998-4] at 2. None of this is say that Stroz's conclusions are right or wrong, only that his report lays out a method and is supported by the evidence that CDK cites, and therefore should not be excluded on the basis Plaintiffs urge.

4. Grouping of DMCA violations by dealership group

Finally, Plaintiffs argue in several places in their motion that Stroz improperly groups together alleged DMCA violations by dealership, rather than breaking them out by individual dealers. CDK takes the position that the dealers in a group have joint and several **[**169]** liability and therefore it was unnecessary to break out the violations by individual dealer. The Court reserves ruling on this point until summary judgment.

B. Miracle [885] — Authenticom's expert on various issues

In motion [885], Defendants seek to exclude the testimony of Nancy Miracle, who was retained by Authenticom to opine on a number of subjects relating to Authenticom's efforts to obtain data from Defendants' **[*1095]** DMSs and Defendants' attempts to use technological means (including CAPTCHA and challenge questions) to hinder those efforts. Miracle is the president and senior partner of Digital Miracles, LLC, a company she founded that specializes in the evaluation and development of software products with particular emphasis on design-arounds, unusual problem solutions, software reverse engineering, code analysis, prior art/prior use evaluation, and litigation support. She has more than 50 years of expertise in the areas of systems design and analysis and has worked as a programmer and technical manager for a variety of small companies and start-ups. She has served as a litigation consultant for over 20 years.

Miracle's report contains a summary of her opinions. First, she opines that **[**170]** CAPTCHA is not a technological measure to "control access" as that term would be understood in the software design and cybersecurity field because, by design, all information needed to satisfy a CAPTCHA is provided on the face of the prompt itself; that providing the information called for by a prompt does not "circumvent" the prompt; and that the outdated and simplistic CAPTCHA technology used by Defendants was not "effective" even at preventing automated answers to the prompt. Second, she opines that Defendants' challenge questions are not considered technological access control measures in the software design and cybersecurity field for essentially the same reasons CAPTCHA is not such a measure. Third, Miracle opines that Defendants' measures to detect and disable passwords that dealers provided to Authenticom were not measures to "control access" as that term is understood in the field, because they do not require a user to provide information or perform some act that is in the user's possession and that indicates that the uses has authorization to obtain access. Fourth, Miracle opines that Authenticom's use of "profile manager" software to re-enable usernames that had been disabled **[**171]** did not involve "bypassing" or "decrypting" any technological measure that controlled access to CDK's DMS. Fifth, Miracle summarizes that Defendants' CAPTCHA and challenge questions did not "control access" to Defendants' executable program files; those prompts just appeared in the terminal displayed by Defendants' DMSs, which were not part of the executable file or otherwise committed to any fixed form.

Miracle's sixth opinion goes to whether Defendants' CAPTCHA mechanisms protect access to a work of "creative expression" in the ERA-IGNITE program. Miracle states that it is her understanding that the elements in the DMS display or user interface that appear after the CATCHA is solved are common, standard, and functional design elements (specifically, a progress indicator and popup window) that do not, in her opinion, constitute creative expression that is subject to copyright protection. Finally, Miracle provides a rebuttal to part of Stroz's report. She opines that Stroz's estimate of Authenticom's DMCA damages is not reliable because he incorrectly assumes that all queries designed by Authenticom were run by Authenticom, while in fact Authenticom shared its queries with third parties. **[**172]**

Defendants move to exclude Miracle on a number of bases, with their lead, threshold argument being that Miracle's opinions invade the province of the Court by purporting to define statutory terms—including "effectively controls access" and "circumvent a technological measure"—that are already defined in the DMCA. Defendants maintain that Miracle's definitions contradict the plain text of the DMCA and case law interpreting it, in addition to well-accepted technical standards.

[*1096] In response, Authenticom claims that Defendants misunderstand Miracle's report; she is not planning to tell the jury how to construe the DMCA, but rather "will offer testimony on factual issues that will aid the jury in determining whether the DMCA has been violated." [1007] at 11. More particularly, Authenticom asserts that Miracle may offer testimony on "four factual issues that the trier of fact may need to resolve if this Court does not grant Authenticom's motion for summary judgment." *Id.* at 10. These "factual issues" include: (1) whether Defendants' technological measures are capable of distinguishing between would-be users who have authority from Defendants and those who do not, which may be relevant to the **[**173]** jury's determination of whether those measures "effectively control access" within the meaning of the DMCA; (2) the technical means by which Authenticom responded to the Defendants' measures, which may be relevant to the jury's determination of whether Authenticom "circumvented" those measures within the meaning of the DMCA; (3) the process by which Authenticom's software "polled" (that is, accessed) Defendants' DMS, including when and whether that software encountered Defendants' technological measures, which may be relevant to the jury's determination of whether any copyrighted work was protected by the technological measures; and (4) Miracle's response to Stroz's efforts to count alleged DMCA violations.

The Court agrees with Defendants that Authenticom appears, at least in part, to be "backpedal[ing] from [Miracle's] opinions and recast[ing] them as 'testimony regarding technical facts." [1032] at 5. In her report, Miracle offers her own definitions of key terms that are already defined in the DMCA, asserts that her definitions are consistent with the DMCA's definitions, and then applies her definitions to conclude that Authenticom's actions did not violate the DMCA. In particular, **[**174]** Miracle asserts that, "[i]n the field of software design and cybersecurity, a technological measure is considered to 'control access' if it requires a user to provide information (or perform some act) that is in the user's possession and indicates that the user has the computer or network administrator's authorization to obtain access. The simplest and most common example is an administrator-provided or administrator-authorized password." [889-10] at 10-11. She claims that the "field's" understanding of "control access" is "consistent with" the DMCA's definition of 'effectively controls access to a work," *id.* at 11, and then goes on to opine why Defendants' CAPTCHA prompts, challenge questions, disabling of passwords, and activity monitoring are not measures to control access. Similarly, Miracle states that "[i]n the field of software design and cybersecurity, "[t]he terms used in the DMCA to define "circumvention" of a technological access measure also have well-accepted meanings in the software design and cybersecurity field." *Id.* at 11-12. That term is already defined by the DMCA. See *17 U.S.C. § 1201(a)(3)(B)* ("a technological measure 'effectively controls access to a work' if the measure, in the ordinary **[**175]** course of its operation, requires the application of information, or a process or a treatment, with the authority of the copyright owner, to gain access to the work"). Similarly, Miracle expands on the DMCA's definition of "circumvent a technological measure," *17 U.S.C. 1201(a)(3)(A)*, by offering her definitions of what "bypass" and "avoid" mean in the field of software design and cybersecurity. [889-10] at 12. Using these definitions, she states that "it is my opinion that Authenticom did not 'circumvent' the technological barriers that Defendants rely on for their DMCA claim." *Id.* at 12-13.

"Although experts may provide opinions as to the ultimate factual **[*1097]** issues in a case, they may not testify "as to legal conclusions that will determine the outcome of the case" under *Rule 702*." *Scottsdale Ins. Co. v. City of Waukegan, 689 F. Supp. 2d 1018, 1022 (N.D. Ill. 2010)* (citing *Pansier, 576 F.3d at 738*, *Good Shepherd Manor Found. v. City of Momence, 323 F.3d 557, 564 (7th Cir. 2003)*). Miracle's opinions, outlined above, "amount[] to an instruction on the law and application of the law to the facts," which "invades the province of both the jury and this Court." *Andersen v. City of Chicago, 454 F. Supp. 3d 808, 819 (N.D. Ill. 2020)*; see also *Securities & Exchange Comm'n v. Ferrone, 163 F. Supp. 3d 549, 563 (N.D. Ill. 2016)* "(an expert usually cannot testify about how a law should be interpreted or what it means"); *George v. Kraft Foods Global, Inc., 800 F. Supp. 2d 928, 932 (N.D. Ill. 2011)* ("Put simply, expert opinions that seek to define the meaning of statutes are disallowed under the Federal Rules of Evidence."); *Davis v. Duran, 277 F.R.D. 362, 371 (N.D. Ill. 2011)* (rejecting **[**176]** "plaintiff's position ... that since evidence concerning the use of deadly force is relevant, and because [plaintiff's proposed expert] is an expert in the use of force, he is qualified to give the opinion"; that "opinion would not be helpful, since under the Federal Rules of Evidence, it is the role of the judge, not the witness, to instruct the jury on the applicable principles of law"). Therefore, Defendants' motion to exclude Miracle is granted to the extent that her report "set[s] forth [what] she believes the relevant law to be" and "what the legal conclusion should be based on the law and facts that [s]he describes." *Old Republic Ins. Co. v. Ness, Motley, Loadholt, Richardson & Poole, 2006 U.S. Dist. LEXIS 92371, 2006 WL 3782994, at *2 (N.D. Ill. Dec. 21, 2006)*.

The Court still must consider, however, whether Miracle should be allowed to testify about the four "factual issues" that Authenticom identifies in its response brief. The Court will defer its ruling on the first two issues— (1) whether Defendants' technological measures are capable of distinguishing between would-be users who have authority from Defendants and those who do not, and (2) the technical means by which Authenticom responded to the Defendants' measures—until after it has ruled on the relevant summary judgment motions. The Court's decision may moot the **[**177]** proposed testimony in any number of ways. For instance, if the Court construes the DMCA in a manner that conflicts with Miracle's industry definitions of the same terms used in the DMCA (i.e., "effectively control access" and "circumvented"), her factual distinctions between what Authenticom did and what is allegedly allowed under the DMCA may have no relevance.

The Court will also defer ruling on the third issue—the process by which Authenticom's software "polled" Defendants' DMS and its relevance to whether any copyrighted work was protected by the technological measures—and instead give it due consideration when ruling on the parties' summary judgment motions. Miracle's proposed testimony is relevant solely to the issue of copyrightability of the work that Defendants allegedly protected by technological measures. As Authenticom concedes, see [1007] at 21, in the Seventh Circuit, "'copyrightability is always an issue of law,'" *Janky v. Lake County Convention & Visitors Bureau, 576 F.3d 356, 363 (7th Cir. 2009)* (quoting *Gaiman v. McFarlane, 360 F.3d 644, 648 (7th Cir. 2009)*), "which the court will decide." *Pivot Point Int'l, Inc. v. Charlene Products, Inc., 932 F. Supp. 220, 225 (N.D. Ill. 1996)*. In making this determination, "district courts may and do rely on expert testimony to distinguish between protected and unprotected material in a work for which copyright is claimed." *Team Play, Inc. v. Boyer, 391 F. Supp. 2d 695, 699 (N.D. Ill. 2005)*. When resolving the summary **[**178]** **[*1098]** judgment motions, Miracle's testimony will be "merely a factor to be weighed" by the Court, *id. at 700*, and the Court will disregard the testimony to the extent "it is unreliable" or otherwise fails to satisfy *Daubert*. *Robb v. Burlington Northern & Santa Fe. Ry. Co., 100 F. Supp. 2d 867, 872 (N.D. Ill. 2000)* (explaining that evidence that is inadmissible under *Daubert* cannot be used to oppose summary judgment).

Finally, the Court denies Defendants' motion to preclude Miracle from offering testimony to respond to Stroz's efforts to count alleged DMCA violations. As explained in the prior section, Stroz attempted to determine the number of times that Authenticom circumvented CDK's CAPTCHA prompts. Starting with a set of accounts that CDK tagged as belonging to Authenticom, Stroz used documents that Authenticom produced to find ENG queries that Authenticom commonly ran on CDK's DMS. Based on her experience in the industry, Miracle opines that the mere fact that a query was executed on CDK's DMS that resembled a query found in Authenticom documents does not mean that Authenticom was the entity that executed the query. She explains that software programmers share code with third parties for a wide variety of reasons, including efficiency. Defendants emphasize that Miracle did not investigate **[**179]** how often Authenticom shared queries, either generally or in regard to the specific queries at issue here. They argue that, without a way to quantify Authenticom's query sharing, Miracle cannot say whether the potential impact on Stroz's results was inconsequential or significant.

While the Court agrees with Defendants that Miracle cannot go beyond her report by attempting to quantify the impact that code-sharing may have had on the accuracy of Stroz's calculations, her testimony may nonetheless be helpful to the jury in understanding the potential shortcomings of Stroz's calculations. Her testimony on common practices in the industry would be a piece of Authenticom's larger defense, which might also include testimony from and documents authenticated by fact witnesses that have personal knowledge of Authenticom sharing queries. Defendants will be free during cross-examination to bring out the limitations of Miracle's opinion.

C. Rubinfeld [867] — CDK and Reynolds' expert on various issues

1. Trade secrets

CDK brings counterclaims against Authenticom for violation of the Defend Trade Secrets Act, *18 U.S.C. § 1836* and the Wisconsin Uniform Trade Secrets Act. Rubinfeld opines on the reasonable royalty CDK **[**180]** should allegedly be awarded on the trade secrets claim. In his report, he notes that there are several methods for determining reasonable royalties, including established royalties, hypothetical negotiations, the Association of International Certified Professional Accountants ("AICPA") analytical method, and discounted cash flow analysis. See [871-5] at 19-20. The method Rubinfeld chooses is to evaluate the hypothetical negotiation between a willing licensee and a willing licensor at the time of the infringement, which allows him "to derive a measure of the value of the intellectual property obtained from the intellectual property holder." *Id.*; see also *id.* at 32. He opines that the price CDK charges third-party vendors under its 3PA program is a reasonable estimate of the "royalty" or price CDK would have charged Authenticom for unauthorized access to its DMS. According to Rubinfeld, this price most closely approximates the results of a hypothetical negotiation between a willing licensee and willing licensor, since it is the result of actual **[*1099]** transactions between CDK and its 3PA customers.

Authenticom argues that this opinion should be excluded as "incoherent" because Rubinfeld does **[**181]** not clearly define the applicable "trade secret." Authenticom also contends that Rubinfeld's choice of 3PA prices as a benchmark "makes little sense" because he does not do a "rigorous comparison of CDK's 3PA customers to Authenticom, or of 3PA to the DMS access Authenticom required to provide independent integration services" or "address CDK's historical policy of permitting independent integration, or Authenticom's allegations that CDK's 3PA prices were inflated by the anticompetitive conduct at issue." [871] at 29.

None of these criticisms warrant exclusion of Rubinfeld's opinion, but rather are proper topics for cross-examination. A reasonable royalty analysis "necessarily involves an element of approximation and uncertainty." *Lucent Technologies, Inc. v. Gateway, Inc., 580 F.3d 1301, 1325 (Fed. Cir. 2009)* (internal quotation marks and citation omitted). The "hypothetical negotiation" approach chosen by Rubinfeld is a commonly used methodology for determining a reasonable royalty. See *Sunoco Partnership Marketing & Terminals L.P. v. U.S. Venture, Inc., 436 F. Supp. 3d 1099, 1128-29 (N.D. Ill. 2020)*. And, as CDK points out, when actual pricing data is available, it is "usually the best measure of a 'reasonable' royalty . . . because it removes the need to guess at the terms to which parties would hypothetically agree." *Monsanto Co. v. McFarling, 488 F.3d 973, 978-79 (Fed. Cir. 2007)*. In addition to applying a reasonable methodology, **[**182]** Rubinfeld took into account differences in quality between the 3PA integration provided by CDK, which includes real-time and bi-directional (writeback) access to the DMS, and the screen-scraping techniques used by Authenticom. Rubinfeld used the first decile of 3PA prices during the damages period—between $25 and $51 per month—to estimate a reasonable royalty. He explains that this price range aligns with basic, extract-only integration packages available through 3PA, which most closely resemble Authenticom's unauthorized data extractions. To the extent that Authenticom disputes Rubinfeld's assumptions, it can raise its criticisms through cross-examination.

2. CFAA

Finally, Rubinfeld opines on the damages Authenticom should owe CDK on its CFAA claim. As one alternative form of damages, he assessed the impairment to CDK's systems caused by Authenticom's unauthorized access and querying. He relied on testing by CDK performed in 2017 to measure the percentage of its server resources ("reality") consumed by Authenticom at four dealership groups, comprising 78 rooftops. This yielded 96 data points. He calculated an average consumption rate of 3.4%, which he apportioned as a percentage of **[**183]** CDK's server hosting fees for the DMSs regularly accessed by Authenticom during the damages period to calculate minimum impairment damages.

Rubinfeld also calculated system impairment costs incurred by Reynolds, but used a different methodology based on available information. Reynolds provided summaries of direct labor costs incurred during the damages period that were associated with detecting and disrupting unauthorized access to its DMS, which totaled $6,677,169. Rubinfeld allocated 17.3% of these costs ($1,155,550) to Authenticom as damages, representing the percentage of hostile access on the *CDK* DMS that CDK identified as Authenticom between July 2016 and November 2017. He used the percentage ascertained from CDK data because a **[*1100]** Reynolds-specific number was not available.

Plaintiffs argue that Rubinfeld's damages opinion should be excluded because it relies on "plainly unjustifiable extrapolation." [871] at 30. First, Plaintiffs maintain that it was unreasonable for Rubinfeld to use 17.3% as the multiplier for Reynolds' damages, since that percentage was based on data concerning Authenticom's access to *CDK's* DMS. Defendants counter that this was reasonable because "Reynolds did **[**184]** not have visibility as to what percentage of unauthorized access Authenticom represented, in part because Authenticom concealed its access from Reynolds by attempting to trick Reynolds' DMS and deleting evidence of the reports it ran off of Reynolds DMSs." [994] at 32. Defendants also assert that the CDK numbers are likely conservative for Reynolds because Reynolds had already stopped certain hostile integrators from accessing its DMSs. Therefore, Defendants posit, Authenticom likely represented a higher percentage of unauthorized access on Reynolds' DMS during the damages period. Second, Plaintiffs argue that Rubinfeld's calculation of CDK's avoidance damage should be excluded because Rubinfeld cannot and does not justify his "facially arbitrary sampling methodologies," which looked at a single day of data for four dealership groups. [871] at 30-31.

As Stroz did, Rubinstein used the limited available data to make a rough estimate of damages, since Authenticom's alleged actions at concealment made it impossible to obtain better data. "Speculation has its place in estimating damages, and doubts should be resolved against the wrongdoer." *Mid-America Tablewares, 100 F.3d at 1365*. Rubinstein explains why his estimate is likely **[**185]** conservative, which also weighs against finding that his opinion is too unreliable to be admissible. *Tyson, 488 F. Supp. 2d at 733-34*. Plaintiffs are "free to use cross-examination to attack the assumption" of 17.3% and ask Rubinfeld "how altering the assumption would affect his analysis." *Stollings, 725 F.3d at 766*. A jury should be capable of understanding this. Finally, Plaintiffs do not offer any reason to believe that the four dealership groups tested by CDK were significantly different from Authenticom's dealer customers as a whole or that Authenticom's queries were more frequent during the tested days than during other parts of the damages period. This is another topic that can be explored in cross-examination.

V. Conclusion

For these reasons, the motions to exclude Williams [881] and Stejskal [883] are granted in part and denied in part. The motions to exclude Klein [863], Rubinfeld [867], Murphy [873], Israel [877], Lawton [879], and Halpin [887] are denied. The motion to exclude Miracle [885] is granted in part, denied in part, and deferred in part. The motion to exclude Stroz [859] is denied in part and deferred in part. As indicated in today's minute entry, the parties will be given an opportunity to (a) review this comprehensive **[**186]** opinion, (b) submit supplemental briefs on how, if at all, these rulings affect the briefing and proper disposition of the pending summary judgment motions, and (c) advise the Court on any other pertinent developments of which they believe the Court should be aware. The Court will then prepare and issue a second, comprehensive opinion disposing of the summary judgment motions in due course.

Opinion by: SANKET J. BULSARA

Opinion

REPORT & RECOMMENDATION

BULSARA, United States Magistrate Judge:

This report and recommendation resolves Defendant Target Corporation's ("Target") motion to dismiss Plaintiff George & Company LLC's ("George & Co.") Amended Complaint.[1] The Amended Complaint contains two claims against Target: (1) trademark infringement and counterfeiting under *section 32* of the Lanham Act,[2] and (2) false designation of origin, passing off, and unfair competition under *section 43* of the Lanham Act.[3] The suit involves the

---

[1] George & Co. filed this case on October 20, 2020 in the Northern District of Illinois, and the Honorable Charles P. Kocoras granted Target's motion to transfer the case to this District. Mem. Op. dated July 14, 2021, Dkt. No. 31 at 13.

[2] First Am. Compl. dated Jan. 4, 2021 ("Am. Compl."), Dkt. No. 23 ¶¶ 40-49.

[3] *Id.* ¶¶ 50-55.

alleged infringement of various marks related to George & Co.'s game "Left, Center, Right." **[*2]** Target has moved to dismiss on a variety of grounds.[4] The Court concludes that dismissal is only appropriate as to the second claim.

STANDARD FOR MOTION TO DISMISS

"The purpose of a motion to dismiss for failure to state a claim under *Rule 12(b)(6)* is to test the legal sufficiency of [a] . . . claim[] for relief." *Amadei v. Nielsen, 348 F. Supp. 3d 145, 155 (E.D.N.Y. 2018)* (citing *Patane v. Clark, 508 F.3d 106, 112 (2d Cir. 2007)*). In deciding such a motion, the Court must "construe the complaint liberally, accepting all factual allegations in the complaint as true, and drawing all reasonable inferences in the plaintiff's favor." *Palin v. N.Y. Times Co., 940 F.3d 804, 809 (2d Cir. 2019)* (quotations and alteration omitted); *Amadei, 348 F. Supp. 3d at 155* ("[W]hen reviewing a complaint on a motion to dismiss for failure to state a claim, the court must accept as true all allegations of fact in the complaint and draw all reasonable inferences in favor of [the non-moving party].").

Once the facts are construed in the light most favorable to the non-moving party—here, George & Co.—to avoid dismissal there must be sufficient facts that allege a plausible claim. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("To survive a motion to dismiss [pursuant to *Rule 12(b)(6)*], a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face.") (internal citation and quotations omitted). "[A] district **[*3]** court must limit itself to facts stated in the complaint or in documents attached to the complaint as exhibits or incorporated in the complaint by reference. Of course, it may also consider matters of which judicial notice may be taken under *Fed. R. Evid. 201*." *Kramer v. Time Warner Inc., 937 F.2d 767, 773 (2d Cir. 1991)*.

"Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. A complaint must contain more than "naked assertion[s] devoid of further factual enhancement." *Id.* (citation and quotations omitted). In other words, a plausible claim contains "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.*; *Fed. R. Civ. P. 8(a)(2)*. "Factual allegations must be enough to raise a right to relief above the speculative level . . . on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Bell Atl. Corp. v. Twombly, 550 U.S. 554, 555 (2007)* (internal citations omitted). The determination of whether a party has alleged a plausible claim is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Iqbal, 556 U.S. at 679*; *see also Escamilla v. Young Shing Trading Co., No. 17-CV-652, 2018 U.S. Dist. LEXIS 3901, 2018 WL 1521858, at *2 (E.D.N.Y. Jan. 8, 2018)*, *report and recommendation adopted*, *2018 U.S. Dist. LEXIS 29972, 2018 WL 1033249, at *3 (Feb. 23, 2018)*.

FACTS[5]

This action is one of many George & Co. has filed in recent **[*4]** years regarding the trademarks for the dice game that it sells.[6] George & Co.'s "Left, Center, Right" "dice game is distributed and sold throughout the United States and abroad."[7]

---

[4] Def. Target's Mot. to Dismiss dated Jan. 19, 2021 ("Mot. to Dismiss"), Dkt. No. 25.

[5] The facts, which the Court accepts as true for the purposes of considering a *Rule 12(b)(6)* motion to dismiss, *see Friedman v. Bloomberg L.P., 884 F.3d 83, 93 (2d Cir. 2017)*, are drawn from the Amended Complaint and its attached exhibits, unless otherwise noted.

[6] Am. Compl. ¶ 8 (containing photographs of formulations of the game).

[7] *Id.* ¶ 11.

This dispute arises from Target's sale of a competing version of the dice game.[8] Target previously sold George & Co.'s game in about 1,700 stores, but stopped doing so in 2011, and began selling a competing version in 2015.[9] George & Co. alleges that in doing so, Target unlawfully used its registered trademarks, the "LCR Marks."[10] The 13 LCR Marks are in the following table:[11]

Reg. No.	Reg. Date[12]	Trademark
2,802,321	Jan. 6, 2004	
2,989,658	Aug. 30, 2005	LCR
3,854,443	Sept. 28, 2010	PLAY LCR WITH CHIPS OR WHATEVER MAKES IT FUN FOR YOU
3,917,337	Feb. 8, 2011	LCR
3,917,401	Feb. 8, 2011	LCR
3,922,749	Feb. 22, 2011	PLAY LCR WITH CHIPS OR WHATEVER MAKES IT FUN FOR YOU
4,002,630	July 26, 2011	
4,006,384	Aug. 2, 2011	LCR
4,119,570	Mar. 27, 2012	
4,132,929	Apr. 24, 2012	LCR
4,201,291	Sept. 4, 2012	
4,229,002	Oct. 23, 2012	4,419,874	Oct. 15, 2013	LCR WILD

[12]

George & Co. informed Target on February 4, 2015 that it was "using, without authorization, the LCR Marks to offer and sell . . . another version of" George & Co.'s game.[13] George & Co. alleged that this unauthorized use included use of these marks "on labeling and advertising including . . . in-store tags such as shelf talkers" at Target retail locations.[14] Target told George & Co. that it "removed LCR from the store scan . . . effective February 18, 2015."[15] And it also informed George & Co. that it would begin using a "new shelf price tag for the accused products which does not contain 'LCR.'"[16] George & Co. alleges that Target **[*5]** did not fully rid its stores of the LCR Marks, and provided two photographs taken in late July 2020 showing a "Target in-store scanner reading of the Inauthentic

[8] *Id.* ¶ 30. The Amended Complaint refers to the competing version as "Inauthentic Substitute Game," *id.*, which is a game made by Spin Master, as indicated in the correspondence attached to the Amended Complaint. *See* Email Correspondence dated Mar. 25, 2015 ("Mar. 25, 2015 Email"), attached as Ex. C to Am. Compl. at 3; Email Correspondence dated Apr. 3, 2015 ("Apr. 3, 2015 Email"), attached as Ex. D to Am. Compl. at 3.

[16] Apr. 3, 2015 Email at 1.

Substitute Game product listing" using the LCR Marks[17] and an "in-store tag" with the LCR mark hanging on a shelving rod.[18] George & Co. alleges that these tags are part of Target's continuing effort to sell the Inauthentic Substitute Game.[19]

These alleged uses by Target are the basis for the infringement and counterfeiting claim, Count I.[20] George & Co. alleges that Target's use of the LCR Marks was without permission, ongoing, and willful.[21] And this willful use of the LCR Marks "is likely to cause and is causing confusion, mistake, and deception as to the origin and quality of the Inauthentic Substitute Game among the general public," in violation of *15 U.S.C. § 1114*.[22] In support of Count II, the false designation and passing off claim, George & Co. alleges that Target's conduct causes "confusion, mistake, and deception," "as to the true origin and sponsorship of the Inauthentic Substitute Game,"[23] in violation of *15 U.S.C. § 1125*.[24] For both counts, George & Co. seeks damages, fees, and injunctive relief.[25]

On January 19, 2021, Target moved to dismiss **[*6]** the Amended Complaint for failure to state a claim, and in the alternative, requests that George & Co. be required to provide a more definite statement. George & Co. filed a response on February 10, 2021.[26] Following the transfer of this case to this District on July 29, 2021, Target filed a supplemental brief in support of its motion to dismiss on October 25, 2021.[27] That same day, George & Co. filed a supplemental opposition brief.[28] The Honorable Diane Gujarati referred the motion to the undersigned on December 15, 2021.

DISCUSSION

I. Trademark Infringement and Counterfeiting (Count I)

George & Co.'s first claim alleges trademark infringement and counterfeiting in violation of *15 U.S.C. § 1114*.[29] *Section 1114* governs two kinds of trademark claims: (1) a claim best described as "direct infringement of a registered mark," 4 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 25:26 (5th ed. 2021), namely the use of an infringing mark in interstate or foreign commerce in connection with the sale or distribution of goods or services (governed by *§ 1114(1)(a)*); and (2) a claim of infringement by printers and labelers, namely the reproduction, copying, or imitation of a registered mark on a label or sign in connection with **[*7]** the sale or advertising of goods or services (governed by *§ 1114(1)(b)*).

[21] *Id.* ¶¶ 45-47.

[22] *Id.* ¶ 46.

[23] *Id.* ¶¶ 52-53.

[24] *Id.* ¶ 54.

[25] Am. Compl. at 11-13.

[26] Pl.'s Response to Mot. to Dismiss dated Feb. 10, 2021 ("Pl.'s Response"), Dkt. No. 28.

[27] Def.'s Suppl. Br. In Supp. of Def.'s Mot. to Dismiss dated Oct. 25, 2021 ("Target Suppl."), Dkt. No. 52.

[28] Pl.'s Suppl. Mem. in Opp'n to Def.'s Mot. to Dismiss dated Oct. 25, 2021 ("George & Co. Suppl."), Dkt. No. 53.

[29] Count I also cites to *15 U.S.C. § 1116(d)*. That provision details the procedures for obtaining an *ex parte* order for seizure of goods and counterfeit marks, and additional remedies against counterfeiting.

As to which George & Co. is asserting, it never cites to a subsection of *§ 1114* and casually repeats the word "advertising" repeatedly in its papers and the Amended Complaint. (*E.g.*, Am. Compl. ¶¶ 41-42, 43). This is decidedly unhelpful to the Court. But the Court concludes that George & Co., even if it intended to, has not stated a claim under *§ 1114(1)(b)*. That is because to obtain monetary relief for such a violation, a defendant must have committed the prohibited acts of copying or imitation "with knowledge that such imitation is intended to be used to cause confusion." *15 U.S.C. § 1114(1)(b)*. That is, "the registrant must show not only that the infringer infringed, but that he did so with the deliberate intent to cause confusion, mistake or to deceive purchasers; in other words, to purposely palm off the infringer's goods as those of the infringed." *Everest & Jennings, Inc. v. E & J Mfg. Co., 263 F.2d 254, 262 (9th Cir. 1958)*; *see also* *Carl Zeiss Stiftung v. VEB Carl Zeiss Jena, 433 F.2d 686, 707 (2d Cir. 1970)* (citing *Everest, 263 F.2d at 262*). The Amended Complaint contains no such allegation. The Court, therefore, only analyzes whether George & Co. has stated a direct infringement claim under *§ 1114(1)(a)*. *Cf.* *Chanel, Inc. v. RealReal, Inc., 449 F. Supp. 3d 422, 436 n. 13 (S.D.N.Y. 2020)* ("Because Plaintiff's second cause of action cites *15 U.S.C. § 1114(1)* generally, I construe Plaintiff's counterfeiting allegations to assert **[*8]** a trademark infringement claim based on the use of counterfeit goods under *section 32(1)(a)*.").[30]

Turning, therefore, to the direct infringement allegation, to state such a claim a plaintiff "must demonstrate that (1) it has a valid mark that is entitled to protection and that (2) the defendant's actions are likely to cause confusion with [that] mark." *Tiffany & Co. v. Costco Wholesale Corp., 971 F.3d 74, 84 (2d Cir. 2020)* (quotations omitted).

A. Validity of the LCR Marks

As to the first element, "[a] certificate of registration . . . [is] prima facie evidence of the validity of the registered mark, and creates a presumption that the mark is entitled to protection." *Solid 21, Inc. v. Jomashop Inc., No. 19-CV-1179, 2020 U.S. Dist. LEXIS 255464, 2020 WL 9816843, at *3 (E.D.N.Y. Nov. 30, 2020)* (alterations in original) (internal citation and quotations omitted) (citing *Lois Sportswear, U.S.A., Inc. v. Levi Strauss & Co., 799 F.2d 867, 871 (2d Cir. 1986)*). "A registered mark becomes incontestable if it has been in continuous use for five consecutive years subsequent to its registration and is still in use." *Lopez v. Adidas Am., Inc., No. 19-CV-7631, 2020 U.S. Dist. LEXIS 88375, 2020 WL 2539116, at *8 (S.D.N.Y. May 19, 2020)* (quoting *Gruner + Jahr USA Pub., a Div. of Gruner + Jahr Printing & Pub. Co. v. Meredith Corp., 991 F.2d 1072, 1076 (2d Cir. 1993)*).

> If a mark [becomes] incontestable, its registration 'shall be conclusive evidence . . . of the registrant's exclusive right to use the registered mark in commerce[.]' . . . What this means is that a defendant in an infringement suit—where plaintiff has an incontestable mark because of five years' registration—may not succeed in a defense that declares the mark is entitled **[*9]** to no protection because it is descriptive.

Id. (first alteration in original) (quoting *Gruner + Jahr USA Pub., 991 F.2d at 1076-77*). George & Co. alleges it has owned the LCR Marks "with longstanding and prior use," and that the marks "have been extensively and continuously advertised and promoted to the public through various means." (Am. Compl. ¶¶ 18, 23). And as Target admits, the LCR Marks are incontestable: each is registered, and the most recent, No. 4,419,874, was registered on October 15, 2013. (*Supra* at 4-5). The LCR Marks are therefore valid incontestable marks. *Vox Amplification Ltd. v. Meussdorffer, No. CV 13-4922, 2014 U.S. Dist. LEXIS 21577, 2014 WL 558866, at *8 (E.D.N.Y. Feb. 11, 2014)* ("[W]hen considering an incontestable registered trademark, courts 'need not tarry with the first prong of the infringement test.'") (quoting *Savin Corp. v. Savin Grp., 391 F.3d 439, 456 (2d Cir. 2004)*), *report and recommendation adopted*, *50 F. Supp. 3d 355, 376 (E.D.N.Y. 2014)*.[31]

B. Likelihood of Confusion

---

[30] And as for any claim for injunctive relief, none of the cases cited by George & Co. in opposition to the motion to dismiss address *section 1114(1)(b)*. Nor do they allege that Target is a printer which would fall within that subsection. The Court can, therefore, only conclude George & Co. is not seeking an injunction on the basis of *section 32(1)(b)*.

[31] Target argues George & Co. has not demonstrated ownership of the common law marks or unregistered marks the Amended Complaint makes brief reference to. Target Suppl. at 4-5; Mot. to Dismiss at 6; Am. Compl. ¶ 18. The argument is irrelevant. George & Co.'s claims are based on the LCR Marks, Am. Compl. ¶¶ 40-55, which are registered.

"With the first prong of the infringement inquiry presumptively satisfied, the principal question . . . is whether" Target's use of "LCR" "was likely to cause confusion" with any of George & Co.'s registered marks. *Tiffany & Co., 971 F.3d at 84*. This "crucial issue in an action for trademark infringement . . . is whether there is any likelihood that an appreciable number of ordinarily prudent purchasers are likely to be misled, or indeed **[*10]** simply confused, as to the source of the goods in question." *Savin, 391 F.3d at 456* (alteration in original) (quoting *Mushroom Makers, Inc. v. R.G. Barry Corp., 580 F.2d 44, 47 (2d Cir. 1978)*).

"[L]ikelihood of confusion is a fact-intensive analysis that ordinarily does not lend itself to a motion to dismiss." *Van Praagh v. Gratton, 993 F. Supp. 2d 293, 303 (E.D.N.Y. 2014)* (quoting *The Name LLC v. Arias, No. 10 Civ. 3212, 2010 U.S. Dist. LEXIS 121413, 2010 WL 4642456, at *5 (S.D.N.Y. Nov. 16, 2010)*); *see also* *A.V.E.L.A., Inc. v. Est. of Marilyn Monroe, LLC, 131 F. Supp. 3d 196, 213 (S.D.N.Y. 2015)* ("[T]he question of whether a descriptive mark has acquired the secondary meaning necessary to be distinctive generally should not—and here cannot—be resolved on a motion to dismiss.").

The Court evaluates the likelihood of confusion

> using the test articulated in *Polaroid Corp. v. Polarad Elecs. Corp., 287 F.2d 492 (2d Cir. 1961)* ("*Polaroid*"), which balances the following eight factors: (1) the strength of the trademark; (2) the degree of similarity between the plaintiff's mark and the defendant's allegedly imitative use; (3) the proximity of the products and their competitiveness with each other; (4) the likelihood that the plaintiff will 'bridge the gap' by developing a product for sale in the defendant's market; (5) evidence of actual consumer confusion; (6) evidence that the defendant adopted the imitative term in bad faith; (7) the respective quality of the products; and (8) the sophistication of the relevant population of consumers.

Tiffany & Co., 971 F.3d at 84-85 (footnotes omitted). Under the *Polaroid* test, "a court should focus on the ultimate question **[*11]** of whether consumers are likely to be confused[,]" not whether more factors weigh in a party's favor. *Id. at 85* (quoting *Nabisco, Inc. v. Warner-Lambert Co., 220 F.3d 43, 46 (2d Cir. 2000)*). "The pertinence of individual factors varies with the facts of the particular case." *Guthrie Healthcare Sys. v. ContextMedia, Inc., 826 F.3d 27, 37 (2d Cir. 2016)*. "Nevertheless, 'it is incumbent upon the district judge to engage in a deliberate review of each factor, and, if a factor is inapplicable to a case, to explain why.'" *Solid 21, Inc., 2020 U.S. Dist. LEXIS 255464, 2020 WL 9816843, at *3* (quoting *Arrow Fastener Co. v. Stanley Works, 59 F.3d 384, 400 (2d Cir. 1995)*).

Target does not cite *Polaroid*, or go through the factors in any methodical or detailed manner. Some of the arguments that Target does make are pertinent to some of the factors; each is addressed in the appropriate context, where possible. In any event, none of Target's arguments have merit, and the Court concludes that George & Co. has established a likelihood of confusion.

i. Strength of the LCR Marks

"Marks are classified, in ascending order of strength[.]" *Star Indus., Inc. v. Bacardi & Co., 412 F.3d 373, 384-85 (2d Cir. 2005)* (quoting *TCPIP Holding Co. v. Haar Commc'ns, Inc., 244 F.3d 88, 93 (2d Cir. 2001)*). "Arrayed in an ascending order which roughly reflects their eligibility to trademark status and the degree of protection accorded, these classes are (1) generic, (2) descriptive, (3) suggestive, and (4) arbitrary or fanciful." *Abercrombie & Fitch Co. v. Hunting World, Inc., 537 F.2d 4, 9 (2d Cir. 1976)* (Friendly J.). As such, "the law accords broad, muscular protection to marks that are arbitrary or fanciful in relation to the **[*12]** products on which they are used, and lesser protection, or no protection at all, to marks consisting of words that identify or describe the goods or their attributes." *Virgin Enters. Ltd. v. Nawab, 335 F.3d 141, 147 (2d Cir. 2003)*. Ultimately, this classification and the strength of a mark turns on "(1) the degree to which [the mark] is inherently distinctive; and (2) the degree to which it is distinctive in the marketplace," *Solid 21, Inc., 2020 U.S. Dist. LEXIS 255464, 2020 WL 9816843, at *4* (quoting *Car-Freshner Corp. v. Am. Covers, Inc., 980 F.3d 314, 329 (2d Cir. 2020)*), a concept known as "secondary meaning." "[S]econdary meaning . . . occurs when, 'in the minds of the public, the primary significance of a [mark] is to identify the source of the product rather than the product itself.'" *Wal-Mart Stores, Inc. v. Samara Bros., 529 U.S. 205, 211, 120 S. Ct. 1339, 146 L. Ed. 2d 182 (2000)* (quoting *Inwood Laboratories, Inc. v. Ives Laboratories, Inc., 456 U.S. 844, 851 n.11, 102 S. Ct. 2182, 72 L. Ed. 2d 606 (1982)*).

"Determination of strength . . . begins with inquiry as to whether the mark has the inherent distinctiveness that would entitle it to protection in the absence of secondary meaning." *Star Indus., Inc., 412 F.3d at 384*. "Only suggestive and arbitrary or fanciful marks are inherently distinctive and, as a result, automatically protectable." *Giggle, Inc. v. netFocal, Inc., 856 F. Supp. 2d 625, 629 (S.D.N.Y. 2012)*. "Suggestive marks are those that . . . suggest a quality or qualities of the product through the use of 'imagination, thought and perception[.]'" *Star Indus., 412 F.3d at 385* (internal citation omitted) (quoting *Time, Inc. v. Petersen Publ'g Co., 173 F.3d 113, 118 (2d Cir. 1999)*). "Suggestive marks are eligible for protection without any proof of secondary meaning, since **[*13]** the connection between the mark and the source is presumed." *Thompson Med. Co. v. Pfizer Inc., 753 F.2d 208, 216 (2d Cir. 1985)*.

As with many things in the law, context matters. So, even if a mark does not have "inherent distinctiveness," it may have "acquired distinctiveness" based on the "mark's secondary meaning in the marketplace." *Giggle, Inc., 856 F. Supp. 2d at 631*; *Star Indus., 412 F.3d at 385* ("Descriptive marks . . . are protectable provided they have acquired secondary meaning . . . sometimes referred to as 'acquired distinctiveness.'"); *Thoip v. Walt Disney Co., 736 F. Supp. 2d 689, 703 (S.D.N.Y. 2010)* ("Descriptive marks are nonetheless protectable when they acquire secondary meaning.") (quotations omitted). Secondary meaning is determined based on a number of factors: "advertising expenditures; consumer studies linking the mark to a source; sales success; unsolicited media coverage of the product; attempts to plagiarize the mark; and length and exclusivity of the mark's use." *Thompson Med. Co., 753 F.2d at 217* (internal citations omitted).

Registered marks enjoy "a conclusive presumption of distinctiveness." *Savin, 391 F.3d at 457*. "Registration by the PTO without proof of secondary meaning creates the presumption that the mark is more than merely descriptive, and, thus, that the mark is inherently distinctive." *Lane Cap. Mgmt., Inc. v. Lane Cap. Mgmt., Inc., 192 F.3d 337, 345 (2d Cir. 1999)*. When the presumption applies, a defendant "bears the burden to rebut" it. *Id.*

George & Co. alleges that the **[*14]** LCR Marks are "well-known" to the public because of the sale of its dice game using those marks. (Am. Compl. ¶¶ 19-20). To achieve those sales, George & Co. has spent "significant resources advertising and promoting" its game using the LCR Marks, including at toy shows, retail store displays, and on the internet. (*Id.* ¶¶ 22-23). The sale of the game using these marks associates the game with George & Co. (*Id.* ¶¶ 20-24). And as noted, the LCR Marks are each incontestable registered marks.

These allegations are sufficient to establish that the LCR Marks—at this stage—fall into the stronger and more protectable "inherently distinctive" category, and are at least "moderately strong," if not slightly stronger. *See, e.g., Kohler Co. v. Bold Int'l FZCO, 422 F. Supp. 3d 681, 721 (E.D.N.Y. 2018)* ("In light of the Kohler BOLD Marks' barely moderate inherent strength and at least moderate strength in the marketplace, this Court concludes that plaintiff's marks are, for purposes of this motion, barely moderately strong."); *Shawarma Stackz LLC v. Jwad, No. 21-CV-01263, 2021 U.S. Dist. LEXIS 235397, 2021 WL 5827066, at *17 (S.D. Cal. Dec. 8, 2021)* ("SSL's Marks are likely to be found as suggestive, which are inherently distinctive and hold at least a moderate degree of strength.").

In response, Target argues that George & Co. cannot plausibly allege that the abbreviation "LCR" has acquired **[*15]** secondary meaning. (Target Suppl. at 3). This argument is misplaced for several reasons. For one thing, the abbreviation "LCR" is only one of the several marks that George & Co. alleges has been infringed.[32] For another, the concept of secondary meaning becomes pertinent from a pleading perspective only if there is nothing to establish inherent distinctiveness. *Star Indus., 412 F.3d at 384-85*. Said differently, Target's argument suggests that a failure to plead secondary meaning requires dismissal. But where the marks have a conclusive presumption of distinctiveness resulting from registration, secondary meaning need not be pled by the plaintiff. *Artisan Mfg. Corp. v. All Granite & Marble Corp., 559 F. Supp. 2d 442, 450 (S.D.N.Y. 2008)* ("A mark's strength can be shown by

---

[32] Target could have reasonably argued that there is no connection between several of the LCR Marks, some of which are visual images and others which are phrases containing "LCR," and Target's alleged use—depicted in the photographs appended to the Amended Complaint, which only show Target using the label "LCR"—and such marks should be dismissed from the suit. But it did not.

its inherent distinctiveness, by proof that the mark has secondary meaning, or both."). Requiring a plaintiff to allege secondary meaning in the complaint would defeat the concept of a presumption.

To be sure, a defendant can rebut the presumption by showing the absence of secondary meaning, but the defendant bears that burden, and almost always attempts to make that rebuttal through evidence gathered at summary judgment. Resolution of the merits of the argument is nigh-impossible on a motion to dismiss. *See* *Blockchain Luxembourg S.A. v. Paymium, SAS, No. 18 Civ. 8612, 2019 U.S. Dist. LEXIS 133897, 2019 WL 4199902, at *6 (S.D.N.Y. Aug. 7, 2019)* ("'[D]etermining whether a **[*16]** descriptive mark has acquired secondary meaning is a fact-intensive inquiry' that requires the development of a robust evidentiary record. Accordingly, acquired distinctiveness through secondary meaning is a question of fact that this Court cannot decide on a *Rule 12(b)(6)* motion to dismiss.") (internal citation omitted) (quoting *A.V.E.L.A., Inc., 131 F. Supp. 3d at 212-13*).

Besides attempting to argue that George & Co. must plead secondary meaning, Target also tries to rebut the presumption by relying on two court decisions. This effort has no merit.

As an initial matter, Target provides no doctrinal basis on which this Court can rely on those decisions. This is no small matter. Target is essentially invoking collateral estoppel, contending that because George & Co. already lost the issue of secondary meaning and genericness in other litigation about its marks, its claims here must be dismissed. Target, of course, was not a party to either of the two cases it relies upon: *George & Co. LLC v. Imagination Ent. Ltd., 575 F.3d 383 (4th Cir. 2009)* and *George & Co., LLC v. Spin Master Corp., No. 19-CV-04391, 2020 U.S. Dist. LEXIS 223689, 2020 WL 7042665 (E.D.N.Y. Nov. 30, 2020)*. And as a third party, it would have to establish it is entitled to invoke nonmutual collateral estoppel, a doctrine governed by state law which Target does not brief or acknowledge.[33] *Warmin v. New York City Dep't of Educ., No. 16 CIV. 8044, 2018 U.S. Dist. LEXIS 47518, 2018 WL 1441382, at *8 (S.D.N.Y. Mar. 22, 2018)* ("[N]on-mutual collateral estoppel allows a defendant who was not a party to the **[*17]** previous litigation to rely on . . . collateral estoppel to bar . . . issues raised in subsequent litigation, assuming the issue was fully and fairly litigated in the first instance.") (quoting *Ranasinghe v. Kennell, No. 16 Civ. 2170, 2017 U.S. Dist. LEXIS 10512, 2017 WL 384357, at *3 (S.D.N.Y. Jan. 25, 2017)*). But what is fatal to the argument is that the issues decided and marks adjudicated in these two cases were not identical to those here.

As for what was litigated and decided in *George & Co. v. Imagination*, Target cites to a footnote where the Fourth Circuit said that "LCR is an abbreviation of the descriptive term LEFT CENTER RIGHT. LEFT CENTER RIGHT is a descriptive term." *575 F.3d at 395 n.12*; *see also* Target Suppl. at 3. Target inappropriately takes the footnote entirely out of context. The reason the Fourth Circuit added the footnote was because it "harbor[ed] doubt that the LCR mark is suggestive[.]" *Imagination, 575 F.3d at 395*. But it recognized that "[t]he district court concluded that the LCR mark was suggestive," and proceeded to *uphold* that finding.

> Under these circumstances, like the district court, we are constrained to conclude that the LCR mark is suggestive. We are obligated to defer to the determination of the USPTO, which constitutes *prima facie* evidence of whether a mark is descriptive or suggestive. . .. And although Imagination had an opportunity **[*18]** in the district court to rebut the presumption raised by the USPTO's determination, it declined to do so, instead conceding that the LCR mark is suggestive. Accordingly, even though LCR is an abbreviation for LEFT CENTER RIGHT and we harbor doubt that the LCR mark is suggestive, we are not at liberty to take issue with the district court's determination.

Id. In other words, the Fourth Circuit did not decide or find this issue against George & Co., but in its favor (while noting its disagreement). So for Target to say in its papers that this court "conclusively determined that the phrase Left Center Right is descriptive" and rely on the footnote for that assertion, is—to say the least—quite misleading. And it certainly is not a basis to invoke issue preclusion or find that the LCR Marks here are not entitled to the presumption of strength.

---

[33] While in its brief it outlines the elements of collateral estoppel, Mot. to Dismiss at 8; Target Suppl. at 2, Target makes no mention of the non-mutuality, and engages in a cursory analysis of the elements of estoppel.

There is further reason not to do so. Of the 13 LCR Marks that are the subject of this suit, only two were registered at the time of the Fourth Circuit's decision in 2009. The remainder were registered after 2009. (*See* LCR Marks, *supra* at 4-5). Quite obviously, a determination by another court about marks not at issue here has no bearing on this litigation. **[*19]** And Target's assertion regarding the Fourth Circuit's statement that LCR "had not acquired secondary meaning" as of 2008, (Target Suppl. at 3 (quotations omitted)), bears little to no relevance to a litigation brought in 2021 in which Target seeks a dismissal as a matter of law. Perhaps the Fourth Circuit's finding is entitled to some evidentiary weight as a subsequent merits determination in this case (because 2 of the 13 marks are the same), but that is not a reason to apply estoppel here and find that as a matter of law, there is no secondary meaning for all 13 marks.

The other case, this time from this District, runs into similar problems. That case remains pending, and has not reached final judgment, so it itself cannot provide any kind of estoppel or preclusive effect in this case. *Spin Master Corp., 2020 U.S. Dist. LEXIS 223689, 2020 WL 7042665, at *8*; Dkt. Sheet, No. 19-CV-04391; *Purdy v. Zeldes, 337 F.3d 253, 258 (2d Cir. 2003)* ("a valid and final judgment on the merits" is a required element for collateral estoppel) (quotations and citation omitted). But again, Target leaves out the pivotal context and makes misleading presentations. In her decision, Judge Kovner found that George & Co. could not pursue its claims based on the marks "Left Center Right" but *could* proceed with the claims based **[*20]** on the marks "LCR," which are the marks in this case. *Spin Master Corp., 2020 U.S. Dist. LEXIS 223689, 2020 WL 7042665, at *9* ("The motion to dismiss plaintiff's trademark-related claims is accordingly granted as to the LEFT CENTER RIGHT and 'Tagline and Arrows' design marks, but denied as to plaintiff's remaining marks.") (internal citations omitted). And while Judge Kovner did use the Fourth Circuit's case to estop George & Co. from pursuing its "Left Center Right" infringement claims, *2020 U.S. Dist. LEXIS 223689, [WL] at *7—*8*, those were claims that the Fourth Circuit actually decided. As explained earlier, it did not decide issues that would permit estoppel in this case. At various points, Target uses these decisions to argue that the presumption of distinctiveness is rebutted. Given the inapplicability of the decisions, there has been no such rebuttal; and this is not surprising, since doing so on a motion to dismiss is almost impossible. *Lopez, 2020 U.S. Dist. LEXIS 88375, 2020 WL 2539116, at * 8—*9* (declining to analyze secondary meaning at motion to dismiss stage amid defendant's attempt to rebut presumption of distinctiveness without developed record); *Naples Screen Repair, LLC v. Arrow Handyman "LLC", No. 2:20-CV-844, 2021 WL 75124, at *2 (M.D. Fla. Jan. 9, 2021)* (declining to find presumption rebutted because a "motion to dismiss is not the proper vehicle to engage in a fact-specific analysis").

Target also uses the statements from these cases to make a **[*21]** free-standing dismissal argument that appears to be as follows: because the term "LCR" is necessarily an abbreviation for "Left Center Right," and because "Left Center Right" claims have been dismissed—either because the term is descriptive or has no secondary meaning—the LCR claims must also be dismissed. The problem with this syllogism is two-fold. First, to preclude or estop George & Co.—*i.e.*, to have a doctrinal basis in which to anchor the dismissal—some court must have actually decided that issue (that "LCR" necessarily is an abbreviation of "Left Center Right"). And no court has. As noted, the statement "LCR is an abbreviation of the descriptive term" from the Fourth Circuit's decision is the court's gloss on why it would have decided the issues differently from the district court, not how it actually ruled. Second, it does not necessarily follow that because Term A is an abbreviation for Term B, and because Term B is descriptive, that Term A is also descriptive. *Anheuser-Busch Inc. v. Stroh Brewery Co., 750 F.2d 631, 637 (8th Cir. 1984)* ("In no[] [case] is it stated as a matter of law that initials of generic or descriptive phrases are unprotectible."); 2 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 12:37 (5th ed. 2021) (collecting **[*22]** cases where abbreviations of generic terms are also found to be generic and cases where opposite conclusion was reached). So "LCR" could have meaning independent of whether "Left Center Right" does. Indeed, we know that the PTO has registered 11 different LCR Marks since the Fourth Circuit's decision. And we also know that Judge Kovner, in other litigation, permitted George & Co. to pursue infringement claims based on these same LCR Marks. Certainly, even if future evidence showed there is no secondary meaning, and as such, the abbreviation is as generic as the full phrase, or the presumption accorded to registered marks has otherwise been rebutted, the claims could be dismissed on those grounds. But to do so now, at the pleading stage, and rule as a matter of law, solely based on the Amended Complaint and the out-of-context statements from two opinions, is not possible.[34]

As a result, given the registration of the LCR Marks, and the failure to rebut their presumption of distinctiveness, the Court concludes that these marks are, at a minimum, moderately strong. *Lopez, 2020 U.S. Dist. LEXIS 88375, 2020 WL 2539116, at *9* ("The fact that the mark is incontestably registered and that Lopez has raised some allegations supporting strength under **[*23]** these criteria suffices for the moment. This factor favors Lopez and does not support dismissal.").

ii. Degree of Similarity

"The 'similarity of the marks test . . . attempts to discern whether the similarity of the marks is likely to cause confusion among potential customers.'" *E.A. Sween Co., Inc. v. A & M Deli Express Inc., 787 F. App'x 780, 783-84 (2d Cir. 2019)* (quoting *Malletier v. Burlington Coat Factory Warehouse Corp., 426 F.3d 532, 537 (2d Cir. 2005)*). "To apply this factor, courts must analyze the mark's overall impression on a consumer, considering the context in which the marks are displayed and the totality of factors that could cause confusion among prospective purchasers." *Malletier, 426 F.3d at 537* (quotations omitted). "[T]he law requires only confusing similarity, not identity." *Louis Vuitton Malletier v. Dooney & Bourke, Inc., 454 F.3d 108, 117 (2d Cir. 2006)*.

The photographs appended to the Amended Complaint suggest substantial similarity, if not identity, between the marks used by Target and some of the LCR Marks. Five of these marks protect the initials "LCR." This is the identical term on the two photographs. (*See* Scanner Photograph; Tag Photograph). The photographs show Target used "LCR", including on the shelves where it sold the competing game and on the screen where customers checked out. (*See* Scanner Photograph; Tag Photograph). Target does not address this factor; and given this plain identity between the protected marks and the marks **[*24]** used by Target, at this stage of the case, this factor favors George & Co. *See, e.g., Franklin v. X Gear 101, LLC, No. 17 Civ. 6452, 2018 U.S. Dist. LEXIS 122658, 2018 WL 3528731, at *12 (S.D.N.Y. July 23, 2018)* (allegation that "the defendants' mark is a substantial identical replication and copy of plaintiff's ORIGINAL WORK Logo. . . . establishes a significant degree of similarity between the marks" at motion to dismiss stage) (internal quotations and citation omitted), *report and recommendation adopted*, *2018 U.S. Dist. LEXIS 146641, 2018 WL 4103492, at *9 (Aug. 28, 2018)*; *Soter Techs., LLC v. IP Video Corp., 523 F. Supp. 3d 389, 405 (S.D.N.Y. 2021)* (finding factor favored plaintiff where defendant used the exact same term as plaintiff's mark for its website's domain name); *Planned Parenthood Fed'n of Am., Inc. v. Bucci, No. 97 CIV. 0629, 1997 U.S. Dist. LEXIS 3338, 1997 WL 133313, at *8 (S.D.N.Y. Mar. 24, 1997)* ("The two marks, 'Planned Parenthood' and 'plannedparenthood.com' are nearly identical . . . . The degree of similarity between the marks thus increases the likelihood of confusion[.]"), *aff'd*, *152 F.3d 920 (2d Cir. 1998)*.

iii. Proximity and Likelihood that George & Co. Will "Bridge the Gap"

"The proximity of the goods factor asks whether and to what extent the two products compete with each other." *Easy Spirit, LLC v. Skechers U.S.A., Inc., No. 19-CV-3299, 2021 U.S. Dist. LEXIS 220765, 2021 WL 5312647, at *9 (S.D.N.Y. Nov. 16, 2021)*. It "can apply to both the subject matter of the commerce in which the two parties engage and the geographic areas in which they operate." *Guthrie Healthcare Sys., 826 F.3d at 39*. The game sold by Target and the one sold by George & Co. (bearing the LCR Marks) are "sold through the same marketing channels, including the same retail stores," which **[*25]** weighs in favor of a finding of confusion. *Easy Spirit, LLC 2021 U.S. Dist. LEXIS 220765, 2021 WL 5312647, at *9*; *see also* *Solid 21, Inc., 2020 U.S. Dist. LEXIS 255464, 2020 WL 9816843, at *5* (finding that selling the same type of product in the United States weighed in favor of confusion on this factor). The Amended Complaint alleges that Target sold George & Co.'s game and then ceased doing so. (Am. Compl. ¶¶ 25, 27). Target acknowledges this: rather than selling George & Co.'s game, it is "instead selling a similar dice game distributed by Spin Master." (Mot. to Dismiss at 3).

---

[34] Indeed "[e]ach of the cases cited by" Target—in both of its briefs for these arguments—"was decided not on a motion to dismiss, but on a motion for summary judgment or after trial based on a complete factual record," *Kaplan, Inc. v. Yun, 16 F. Supp. 3d 341, 348 (S.D.N.Y. 2014)*, or on a preliminary injunction. *See* Mot. to Dismiss at 5-6, 8-9; Target Suppl. at 3-4.

As for bridging the gap, "because the parties' products 'are already in competitive proximity, there is really no gap to bridge, and this factor is irrelevant to the *Polaroid* analysis in this case.'" *Solid 21, Inc., 2020 U.S. Dist. LEXIS 255464, 2020 WL 9816843, at *5* (quoting *Star Indus., 412 F.3d at 387*). This factor favors George & Co.

iv. Evidence of Actual Consumer Confusion

George & Co. has not identified any specific instances of actual confusion. This factor, therefore, favors Target, even at the pleading stage. But, it could not lead to outright dismissal of the claim, since the analysis under the *Polaroid* factors is holistic, and a plaintiff need only establish a likelihood of confusion to proceed with and prevail on an infringement claim. *See Lois Sportswear, U.S.A., Inc., 799 F.2d at 871, 875*.

v. Evidence that Target Adopted the LCR Marks in Bad Faith

"In analyzing whether a defendant has acted **[*26]** in bad faith, the question is whether the defendant attempted 'to exploit the good will and reputation of a senior user by adopting the mark with the intent to sow confusion between the two companies' products.'" *Tiffany & Co., 971 F.3d at 88* (quoting *Star Indus., 412 F.3d at 388*). "[W]here the allegedly infringing mark is identical to the registered mark, and its use began subsequent to the plaintiff's trade-mark registration, the defendant must carry the burden of explanation and persuasion." *Kiki Undies Corp. v. Promenade Hosiery Mills, Inc., 411 F.2d 1097, 1101 (2d Cir. 1969)*. "But '[p]rior knowledge of a senior user's trade mark does not necessarily give rise to an inference of bad faith and may [actually] be consistent with good faith.'" *Tiffany & Co., 971 F.3d at 88* (alterations in original) (quoting *The Sports Auth., Inc. v. Prime Hosp. Corp., 89 F.3d 955, 964 (2d Cir. 1996)*). "[T]he intent to compete by imitating the successful features of another's product is vastly different from the intent to deceive purchasers as to the source of [one's own] product." *Id.* (first alteration added) (quoting *Nora Beverages, Inc. v. Perrier Grp. of Am., Inc., 269 F.3d 114, 123 (2d Cir. 2001)*).

George & Co. alleges it informed Target of the unlawful use of the LCR Marks and that Target did not stop using them. (Am. Compl. ¶¶ 27-33). Email correspondence between employees of the parties, (Mar. 25, 2015 Email; Apr. 3, 2015 Email), runs in both directions. It confirms that Target was aware of the allegations, but also **[*27]** that it took steps to remove the allegedly unlawful uses of the LCR Marks from its stores. (Apr. 3, 2015 Email at 1, 3). And although George & Co.'s allegations of infringement post-date this remediation, the innocent explanation—the belief that the use of "LCR," an abbreviation, on an in-store tag and on a website is permissible use—is at least as powerful as that of willful improper use. Moreover, none of the correspondence between the parties previously identified such uses as potentially infringing. As such, this factor is neutral.

vi. Respective Quality of the Products

"This factor is primarily concerned with whether the senior user's reputation could be jeopardized by virtue of the fact that the junior user's product is of inferior quality." *Arrow Fastener Co., 59 F.3d at 398*. "When there is no difference in the quality of the products, the factor should thus be treated as neutral rather than as weighing in favor of the defendant." *Solid 21, Inc., 2020 U.S. Dist. LEXIS 255464, 2020 WL 9816843, at *7*. To the extent that the Amended Complaint addresses this factor, it does so only in the most cursory fashion. George & Co. alleges that its game is widely recognized, popular, and well-respected. (Am. Compl. ¶¶ 10-16). While it refers to the game sold by Target as the "Inauthentic Substitute **[*28]** Game," (*e.g., id.* ¶ 30), the Amended Complaint does not say whether the game is of a same or similar quality. It does acknowledge in its briefs that the "products were of similar quality," (George & Co. Suppl. at 3), citing to the similar price of the games, reflected in the photographs appended to the Amended Complaint. (*Id.* at 4; Scanner Photograph; Tag Photograph). Because of the acknowledgement of similar quality between the games, this factor is neutral. *E.g., Streetwise Maps, Inc. v. VanDam, Inc., 159 F.3d 739, 743 (2d Cir. 1998)* ("Factor (# 7)—the quality of defendant's product compared to plaintiff's—is neutral because—as the district court found and plaintiff concedes—both maps are of similar quality.").

vii. Sophistication of the Relevant Population of Consumers

"The sophistication factor recognizes that the likelihood of confusion between the products at issue depends in part on the sophistication of the relevant purchasers." *Cadbury Beverages, Inc. v. Cott Corp., 73 F.3d 474, 480 (2d Cir. 1996)* (quotations omitted). "[A]nalysis of consumer sophistication 'consider[s] the general impression of the ordinary purchaser, buying under the normally prevalent conditions of the market and giving the attention such purchasers usually give in buying that class of goods.'" *Tiffany & Co., 971 F.3d at 90* (quoting *Star Indus., 412 F.3d at 390*). The Amended Complaint contains no allegations **[*29]** touching on customer sophistication. "Where neither party presents direct evidence of consumer sophistication *vel non*, . . . a court may rely solely on indirect indications of sophistication, such as the nature of the product or its price." *Easy Spirit, LLC, 2021 U.S. Dist. LEXIS 220765, 2021 WL 5312647, at *19*. In its brief, George & Co. argues that both its game and the game Target sells "were relatively inexpensive" and that Target's game sold for $5.99. (George & Co. Suppl. at 3-4). With this limited information, it is impossible to make any evaluation of this factor, so it is neutral.

The balance of the factors—particularly the strength of the LCR Marks and the identity between George & Co.'s marks and Target's use—weighs in favor of finding likelihood of confusion.

As noted, Target does not address the *Polaroid* factors. It does make scattershot, miscellaneous arguments to argue that George & Co. cannot state a claim for infringement. None have merit at this stage of the litigation.

First, Target argues that George & Co. has failed to negate "the plausible, alternative explanation" that its use of the mark "LCR" was lawful, because it was merely an abbreviation of "Left, Center, Right," which is not protected. (Target Suppl. at 4). As an initial matter, the **[*30]** argument presumes that "LCR" is not protected (or protectable) and an abbreviation of a generic mark, as a matter of law, can never be infringing. But as explained earlier, this assumption is both legally flawed—no such principle exists in trademark law—and factually without merit here—given that George & Co. has come forward with at least five trademark registrations for "LCR." Furthermore, this argument turns the federal pleading standard on its head. A plaintiff is not required—as a matter of federal procedure or pursuant to substantive trademark law—to dispel, in a complaint, any innocent explanation for the defendant's conduct. Nor is it required to plead facts to demonstrate that the unlawful inference from conduct is stronger than the innocent inference.[35]

The cases that Target cites for this novel position do not support the argument. *Trump v. Vance, 977 F.3d 198, 213-14 (2d Cir. 2020)*, involves the breadth of a grand jury subpoena and is not even remotely pertinent. As for *Twombly* itself, Target takes the relevant quotation—"plausibly suggesting (not merely consistent with)," *550 U.S. at 557*—out of context, suggesting that the Supreme Court was referring to a need to plead "misconduct rather than lawful conduct." (Target Suppl. at 4). The full passage **[*31]** in *Twombly* is as follows:

> The need at the pleading stage for allegations plausibly suggesting (not merely consistent with) agreement reflects the threshold requirement of *Rule 8(a)(2)* that the "plain statement" possess enough heft to "sho[w] that the pleader is entitled to relief." A statement of parallel conduct, even conduct consciously undertaken, needs some setting suggesting the agreement necessary to make out a *§ 1* claim; without that further circumstance pointing toward a meeting of the minds, an account of a defendant's commercial efforts stays in neutral territory.

550 U.S. at 557. The passage is quite obviously talking about the requirements under the Sherman Act for stating a conspiracy claim. And in ***antitrust law***, a plaintiff may compile a series of facts that suggest parallel, not illegal, conduct. To push the complaint into the realm of conspiracy, additional factual allegations are necessary. But even in this antitrust context, the Supreme Court does not require that a plaintiff disprove an "obvious alternative explanation," (Target Suppl. at 4), in its pleading. The question is, and always has been, whether the plaintiff has stated enough facts to allege a plausible violation of the law. And, as applied here, whether **[*32]** George & Co. has plausibly alleged infringement. Given the existence of registered marks and the copying or use of those same

---

[35] One common exception is the securities laws, where a plaintiff must plead facts that the inference of knowing misconduct, scienter, is at least as strong as the innocent explanation. *Tellabs, Inc. v. Makor Issues & Rts., Ltd., 551 U.S. 308, 324, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)* ("A complaint will survive . . . only if a reasonable person would deem the inference of scienter cogent and at least as compelling as any opposing inference one could draw from the facts alleged."). But that exception exists by force of the Private Securities Litigation Reform Act, not the Federal Rules of Civil Procedure. No similar provision exists in the Lanham Act.

marks, it certainly has done so. It need not dispel innocent explanations. No case stands for such a novel reading of *Twombly*.

Second, Target argues that its use of any LCR Mark could not have been infringing. (Target Suppl. at 5 ("George appears to allege that these marks have been infringed solely because Target has used the letters 'LCR' on receipts, in-store scanners, and shelf tags, which is insufficient.")). But the cases it cites are decidedly unlike the present case. For example, in *Lopez v. Bonanza.com, Inc.*, the complaint was deficient because the plaintiff failed to actually allege that the defendant used his marks. *No. 17 CIV. 8493, 2019 U.S. Dist. LEXIS 170715, 2019 WL 5199431, at *10 (S.D.N.Y. Sept. 30, 2019)* ("Plaintiff does not contend that . . . . Defendants placed Plaintiff's marks on any clothing or other goods sold on their respective websites, e-commerce platforms or online marketplaces.") (quotations omitted). In contrast, George & Co. alleges precisely that—that the LCR Marks were used on Target's internal website and on its in-store scanner, (*see* Scanner Photograph), and on shelving, (*see* Tag Photograph), in order to sell another game, by **[*33]** associating it with George & Co.'s product. (Am. Compl. ¶¶ 33-49).[36] And such use may constitute infringement. *E.g., Menashe v. V Secret Catalogue, Inc., 409 F. Supp. 2d 412, 424 (S.D.N.Y. 2006)* ("Prominent use of a mark in a catalog with a picture and description of the product constitutes a display associated with goods and not mere advertising because of the 'point of sale' nature of the display."); *Cache, Inc. v. M.Z. Berger & Co., No. 99 CIV. 12320, 2001 U.S. Dist. LEXIS 226, 2001 WL 38283, at *7 n.6 (S.D.N.Y. Jan. 16, 2001)* ("Whether the display of the tags in close association of the tags with the watches is enough to constitute trademark use depends on consumer perception of the mark. Such a determination involves a factual inquiry[.]") (internal citation omitted); *Lands' End, Inc. v. Manback, 797 F. Supp. 511, 514 (E.D. Va. 1992)* ("The point of sale nature of this display, when combined with the prominent display of the alleged mark with the product, leads this court to conclude that this mark constitutes a display associated with the goods.").

In neither *Lopez* nor *Pub. Free Will Corp. v. Verizon Commc'ns Inc., No. 15-CV-6354, 2017 WL 1047330, at *4, 2017 U.S. Dist. LEXIS 39168 (E.D.N.Y. Mar. 17, 2017)* does the court conclude that use of marks in-store or on a website, as George & Co. alleges here, could not constitute trademark infringement.[37] And finally, in *Cree, Inc. v. Xiu Ping Chen*, the plaintiff's case centered around the use of its marks by defendants on products they sold. *No. 16-CV-1065, 2017 WL 3251580, at *9, 2017 U.S. Dist. LEXIS 119198 (E.D.N.Y. July 28, 2017)*. For one of the marks allegedly infringed **[*34]** upon, the plaintiff had not identified a version of the product with a mark on it, while for others he had. *Id.* But the court did not hold that use of marks on a website or in connection with retail sales—without seeing the mark on a product—could not be infringing. Here, George & Co. has put forth photographs that show use of its marks by Target in connection with the sale of game products. That is sufficient to establish, at the motion to dismiss stage, that Target sold or attempted to sell similar products by using George & Co.'s marks. And that states a claim for infringement. *See, e.g., id. at *7* (relying in part on photographs to deny motion to dismiss infringement claim because plaintiff "sufficiently alleged a likelihood of confusion").

As such, the Court concludes that George & Co. has sufficiently pled a claim for violation of *15 U.S.C. § 1114(1)(a)* to survive a motion to dismiss.

* * * *

Target argues that George & Co. has failed to plead a counterfeiting claim. George & Co. labels Count I as one for "counterfeiting," (Am. Compl. at 9), and cites to *15 U.S.C. § 1114* generally. The statute does prohibit counterfeiting, which is itself a form of infringement. *15 U.S.C. § 1114(1)(a)* (imposing liability on anyone who without consent uses a "counterfeit" **[*35]** of a registered mark). And the Amended Complaint makes allegations that sound in

---

[36] Target's repeated argument that the Amended Complaint fails to allege how it used the trademarks is simply without merit. Mot. to Dismiss at 11. The Amended Complaint may group Target with other unidentified defendants—an issue discussed below—but the photographs and the factual allegations about the relationship between George & Co. and Target detail Target's conduct (and use of the LCR Marks).

[37] Nor do any of these cases stand for the proposition that such use could not constitute use in commerce. Target turns cases where a complaint has been found deficient into ones holding that as a matter of law, certain conduct is either innocent or cannot amount to infringement. But they quite clearly do not say such things.

counterfeiting—"Plaintiff's trademark infringement claims against Defendants are based on Defendants' unauthorized use . . . of counterfeit imitations of the federally-registered LCR Marks in connection with the . . . sale of infringing goods, including the Inauthentic Substitute Game." (Am. Compl. ¶ 41). The Amended Complaint appears to use the counterfeiting as one of the types of infringement that George & Co. is asserting, in addition to the direct use of the LCR Marks, as evidenced in the photographs attached to the Amended Complaint.

The arguments that Target makes to dismiss this part of the infringement claim are without merit. It contends that George & Co. only alleges that Target used the LCR Mark and "fails to even allege the counterfeit mark or product[.]" (Target Suppl. at 5). Target misreads the Amended Complaint. It alleges that Target used the LCR Marks in connection with the products it sold, including the Inauthentic Substitute Game. That is a form of counterfeiting. 4 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 25:10 (5th ed. 2021) ("Counterfeiting is the act of **[*36]** producing or selling a product with a sham trademark that is an intentional and calculated reproduction of the genuine trademark. A 'counterfeit mark' is a false mark that is identical with, or substantially indistinguishable from, the genuine mark."). That George & Co. alleges that Target sold a product through direct use of its marks—as opposed to a distorted or imitation, but not identical, mark—does not make it any less of a counterfeit claim. *See also* 15 U.S.C. § 1127 ("A 'counterfeit' is a spurious mark which is identical with, or substantially indistinguishable from, a registered mark.").[38]

Target's real cavil appears to be that George & Co. has not provided photos of the allegedly counterfeit product or the "Inauthentic Substitute Game." (Target Suppl. at 5-6). But it need not do so. As Target acknowledges, it knows—by virtue of the correspondence attached to the Amended Complaint—that the Inauthentic Substitute Game is a game produced by Spin Master. (Mot. to Dismiss at 3).[39]

II. False Designation of Origin, Passing Off, and Unfair Competition (Count II)

The Court concludes that this Count must be dismissed. George & Co.'s second claim is based on 15 U.S.C. § 1125(a), which "creates two distinct **[*37]** bases of liability: false association, § 1125(a)(1)(A), and false advertising, § 1125(a)(1)(B)." Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 122, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014). A claim for "false association" has different labels, including "false designation of origin," Parks LLC v. Tyson Foods, Inc, 863 F.3d 220, 226 (3d Cir. 2017), passing-off, and "reverse passing off," Silverstein v. Penguin Putnam, Inc., 522 F. Supp. 2d 579, 601 (S.D.N.Y. 2007). These are, in essence, different ways of alleging trademark infringement. These labels are what George & Co. used for its claims in the Amended Complaint. (Am. Compl. at 10 ("False Designation of Origin, Passing Off, and Unfair Competition"); *id.* ¶ 54 ("Defendants' false designation of origin . . .")). In its briefing, when arguing that its pleading "sufficiently pleads both causes of action," George & Co. cites to the two-step test for infringement—the existence of protectable marks and likelihood of confusion—that is used for infringement under § 1114(1)(a). (George & Co. Suppl. at 1-2; Pl.'s Response at 6). Indeed, the "[t]he *prima facie* case required for the two federal claims is the same." OffWhite Prods., LLC v. Off-White LLC, 480 F. Supp. 3d 558, 563 (S.D.N.Y. Aug. 20, 2020), *appeal dismissed*, 2021 WL 1247863 (2d Cir. Feb. 8, 2021).

The point is that George & Co. is not alleging a violation of § 1125(a)(1)(B) for "false advertising." It never uses the label or term "false advertising" in the Amended Complaint or either of its briefs. It has solely alleged a violation of § 1125(a)(1)(A). The problem is that § 1125(a)(1)(A) only applies to *unregistered* ***[*38]*** *marks. See* B & B Hardware, Inc. v. Hargis Indus., Inc., 575 U.S. 138, 144-45, 135 S. Ct. 1293, 191 L. Ed. 2d 222 (2015); Thompson Med. Co., 753 F.2d at 216; BBK Tobacco & Foods, LLP v. Galaxy VI Corp., 408 F. Supp. 3d 508, 520 (S.D.N.Y. 2019). The

[38] *Fischer v. Forrest* is of little assistance to Target's argument. There, the counterfeiting claim failed because the plaintiff's mark was easily distinguished from defendant's mark. No. 14 Civ. 1304, 2017 U.S. Dist. LEXIS 40597, 2017 WL 1063464, at *4 (S.D.N.Y. Mar. 21, 2017) (adopting report and recommendation) (affirming determination that phrases "Bee-Quick" and "Natural Honey Harvester" are "far from identical or substantially indistinguishable"). Again, George & Co. is alleging that Target engaged in counterfeiting by selling goods, made by a different manufacturer, which used the actual LCR Marks.

[39] This admission contradicts Target's later argument in the supplemental papers that George & Co. does not identify the game. Target Suppl. at 2.

Amended Complaint relies only on the LCR Marks, all of which are registered, in this Count. (Am. Compl. ¶¶ 51-53). And the Amended Complaint does not identify any unregistered marks, nor does George & Co. rely on any to assert its claims. (Pl.'s Response at 11 ("Plaintiff's asserted LCR marks are all registered trademarks")). Since *§ 1125(a)(1)(A)* does not apply to registered marks, this claim must be dismissed. *Cf. Lopresti v. Spectrum Press, Inc., No. 00 CIV. 2842, 2001 U.S. Dist. LEXIS 20247, 2001 WL 1568434, at *4 (S.D.N.Y. Dec. 5, 2001)* (dismissing *§ 1114(1)(a)* claim because plaintiff's mark was not registered).

III. Unidentified Defendants

Target argues that the claims against the fictitious John Does, Jane Does, and ABC Companies should be dismissed.

It is generally inappropriate to dismiss John Doe parties on the pleadings unless the primary claims against the identified defendant are also being dismissed or it is definitive that discovery will not lead to identification of the parties.

> When a plaintiff is ignorant as to the true identity of a defendant at the time of filing the complaint, most federal courts typically will allow the use of a fictitious name in the caption so long as it appears that the plaintiff will be able to obtain that information through the discovery process; should that not prove to **[*39]** be true, the action will be dismissed.

5A Alan Wright & Arthur R. Miller et al., *Federal Practice and Procedure* § 1321 (4th ed. 2021) (footnote omitted); *Wakefield v. Thompson, 177 F.3d 1160, 1163 (9th Cir. 1999)* ("[T]he district court erred in dismissing Wakefield's complaint against Doe simply because Wakefield was not aware of Doe's identity at the time he filed his complaint.").[40] And here, George & Co. indicates it will amend, and Target has not explained why discovery would not lead to identification of these individuals or entities.

Target makes a related argument about the "John Does," suggesting that George & Co. improperly engages in group pleading without differentiating between which acts were taken by Target as opposed to the John Does. It objects to the repeated invocation of "Defendants." (Mot. to Dismiss at 11; *see also* Target Suppl. at 2 n.3). And ultimately it uses this to argue the John Doe defendants should be dismissed. (Mot. to Dismiss at 11). This is a close question, because it is difficult to differentiate the conduct alleged done by Target as opposed to by the unnamed persons and entities. But that does not counsel in favor of dismissal now. The allegations about Target are clear and sufficient to state a claim, if only **[*40]** evidenced by the photographs, as discussed above. If and when George & Co. seeks to substitute in actual persons or entities as defendants, it presumably will also seek to amend to detail allegations about their respective conduct and differentiate it, if appropriate, from Target's. If it fails to do so (either amend or differentiate), then it would be appropriate to dismiss these defendants.[41] But it would be incorrect to do so now and not give George & Co. the ability to make the requisite showing.

IV. Motion for More Definite Statement

As an alternative to dismissal, Target asks the Court to order George & Co. "to provide a more definite statement" about a number of items: "which specific marks were allegedly infringed by which defendant" and how those marks

[40] A defendant could presumably also move to dismiss a John Doe defendant on the grounds that the allegations against him failed to state a claim; here those arguments are the same raised by Target on its own behalf. And as noted, they failed to warrant dismissal of the infringement claim.

[41] None of the cases cited by Target addresses the group pleading barrier in the context of the John Doe defendants. The notice problem attendant to group pleading when defendants are present is different from cases where they are unnamed and unknown, since in the former case parties are being forced to defend against a suit without knowledge or understanding of the specific allegation against them. And here, there may be a time where that is also the case, but it would be inconsistent with the liberal standard for amendment to preclude George & Co. from being given the opportunity to identify the John Does and differentiating their conduct.

were infringed, the Inauthentic Substitute Game, and the differentiation between the conduct of Target and those of the unidentified defendants. (Mot. to Dismiss at 12-13).

"For a more definite statement to be warranted, the complaint must be 'so excessively vague and ambiguous as to be unintelligible and as to prejudice the defendant seriously in attempting to answer it.'" *Kuklachev v. Gelfman, 600 F. Supp. 2d 437, 456 (E.D.N.Y. 2009)* (quoting *Kok v. First Unum Life Ins. Co., 154 F. Supp. 2d 777, 781-82 (S.D.N.Y. 2001)*). "The preferred course is to encourage the use **[*41]** of discovery to inform the defendant of the factual basis of the complaint." *Kuklachev, 600 F. Supp. 2d at 456*; *see also* *Stromillo v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 54 F.R.D. 396, 397 (E.D.N.Y. 1971)* ("The tendency under the Federal Rules is to discourage motions to compel more definite complaints and to encourage the use of discovery procedures to apprise the parties of the basis for the claims made in the pleadings.") (collecting cases). And "a *Rule 12(e)* motion should be denied if a complaint comports with the liberal pleading requirements of *Rule 8(a)*." *Home & Nature Inc. v. Sherman Specialty Co., 322 F. Supp. 2d 260, 265 (E.D.N.Y. 2004)*.

The items that Target is asking George & Co. to identify read like interrogatories. And such requests should be provided in discovery, if they have not already been. Because the Court finds that George & Co. has stated a claim for infringement, the proper course is to obtain this information through discovery, not a motion for more definite statement. *E.g., id. at 267* ("*Rule 12(e)* is not the proper vehicle to resolve problems of uncertainty arising due to want of specificity or lack of detail.") (denying *Rule 12(e)* motion where plaintiff stated claim for patent and copyright infringement).

CONCLUSION

For the reasons explained above, it is respectfully recommended that Target's motion to dismiss George & Co.'s Amended Complaint be denied as to Count I and granted as to Count II.

Any objections **[*42]** to the Report and Recommendation above must be filed with the Clerk of Court within 14 days of receipt of this report. Failure to file objections within the specified time waives the right to appeal any judgment or order entered by the District Court in reliance on this Report and Recommendation. *See* *28 U.S.C. § 636(b)(1)*; *Fed. R. Civ. P. 72(b)(2)*; *Caidor v. Onondaga Cnty., 517 F.3d 601, 604 (2d Cir. 2008)* ("[F]ailure to object timely to a magistrate [judge's] report operates as a waiver of any further judicial review of the magistrate [judge's] decision.") (quotations omitted).

SO ORDERED.

Opinion

[*304] MEMORANDUM OPINION AND ORDER

LORETTA C. BIGGS, District Judge.

Before the Court is a Motion to Amend First Amended Complaint filed by Plaintiffs. (ECF No. **[**2]** 36.) Plaintiffs seek relief from the Court's March 17, 2021, Order, (ECF No. 35), and leave to amend their First Amended

Complaint pursuant to *Rules 15(a)* and *60(b) of the Federal Rules of Civil Procedure*. (ECF Nos. 36; 37.) Defendants oppose the motion, arguing that (1) Plaintiffs have not met the requirements of *Rule 60(b)(6)*, and (2) Plaintiffs' **[*305]** proposed Second Amended Complaint ("PSAC") suffers from undue delay, prejudices Defendants, and is futile. (ECF No. 39.) For the reasons stated herein, Plaintiff's motion will be granted in part and denied in part.

I. BACKGROUND

Plaintiffs filed this class action on September 23, 2019, (ECF No. 1), and filed a First Amended Complaint ("FAC") on December 12, 2019, (ECF No. 15). According to the FAC, Plaintiffs Dominique Morrison, Sara Hawes, Cassandra Chiaraluce, and Jonathan Fontaine purchased bed linens labeled as having thread counts of 800 or more from retail stores in Missouri, California, New Hampshire, and Massachusetts.[1] (*Id.* ¶¶ 33, 37, 41, 45.) The sheets were manufactured by Defendant Creative Textile Mills Pvt. Ltd. ("Creative"), an Indian company, and imported and distributed by AQ Textiles LLC ("AQ"), a North Carolina corporation. (*Id.* ¶¶ 48, 50, 90) Plaintiffs alleged that Defendants represented **[**3]** the sheets to have higher thread counts than they actually had. (*Id.* ¶ 90.) More specifically, they claimed that Defendants ignored the "long-standing industry standards for calculating thread counts," (*id.* ¶ 84) and doubled or tripled "the true thread count" by counting plied yarns not as a single thread, but as the number of intertwined strands from which they are comprised, (*Id.* ¶ 76).

Plaintiffs sued on behalf of themselves and six classes to include consumers in California, Massachusetts, Missouri, New Hampshire, North Carolina, and the nation as a whole who purchased sheets that had lower thread counts than Defendants stated on the products' labels. (*Id.* ¶ 98.) The FAC alleged thirteen causes of action arising under the *Magnuson Moss Warranty Act ("MMWA")* (Count I); the Implied Warranty of Merchantability (Count II); an Express Warranty (Count III); common law Negligent Misrepresentation (Count IV); *Missouri's Merchandising Practices Act* (Count V); the North Carolina Unfair and Deceptive Trade Practices Act ("NCUDTPA") (Count VI); the *California Consumer Legal Remedies Act* (Count VII); the *California Unfair Competition Law* (Counts VIII, IX, & X); the *Massachusetts Consumer Protection Law* **[**4]** (Count XI); the *New Hampshire Consumer Protection Act* (Count XII); and common law Unjust Enrichment (Count XIII). (*Id.* at 24-52.)

Defendants moved to dismiss Plaintiffs' FAC for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)* on January 9, 2020. (ECF No. 18.) On September 25, 2020, Defendants additionally moved to dismiss the FAC for lack of subject-matter jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(1)*. (ECF No. 29.)

On March 17, 2021, the Court dismissed Plaintiffs' claims. *Hill v. AQ Textiles LLC, No. 1:19CV983, 2021 U.S. Dist. LEXIS 49987, 2021 WL 1026740, at *3 (M.D.N.C. Mar. 17, 2021)*. The Court found *sua sponte* that Named Plaintiffs had not sufficiently alleged a concrete and particularized injury and, therefore, the Court lacked subject matter jurisdiction. *2021 U.S. Dist. LEXIS 49987, [WL] at *2-3*.

Plaintiffs filed the present motion on March 29, 2021, seeking relief from the Court's Order and leave to again amend their complaint. (ECF No. 36.) In their attached proposed Second Amended Complaint ("PSAC") (ECF No. 36-1), Plaintiffs do not allege any new causes of action but do allege additional facts and limit their **[*306]** proposed classes to include only those consumers who purchased bedding sheets (rather than those who purchased either "bedding or linen"). (*Compare* ECF Nos. 36-1 ¶ 115 *with* 15 ¶ 98.) The factual allegations in Plaintiffs' PSAC include the following: **[**5]**

Plaintiff Fontaine is a resident of Massachusetts. (ECF No. 36-1 ¶ 57.) He purchased Fairfield Square Essex Stay Fit brand queen-size sheets in or around October 2017 from a Macy's retail store in Massachusetts for $84.99 ($79.99 plus tax). (*Id.* ¶¶ 58, 60.) The sheets were manufactured by Defendant Creative and labeled and distributed by Defendant AQ. (*Id.* ¶ 58.) The sheets were labeled "1200 Thread Count." (*Id.*)

---

[1] Plaintiff Amy Hill, also included in the FAC, was voluntarily dismissed from this action on February 8, 2020. (ECF No. 21.)

Plaintiff Hawes is a resident of California. (*Id.* ¶ 48.) She purchased a Somerset Collection brand queen-size sheet set from a Macy's retail store in California in or around May 2017 for $76.11 ($69.99 plus tax). (*Id.* ¶¶ 49, 52.) The sheets were manufactured by Defendant Creative and labeled and distributed by Defendant AQ. (*Id.* ¶ 49.) The sheets were labeled "900 Thread Count." (*Id.*)

Plaintiff Morrison is a resident of Missouri. (*Id.* ¶ 35.) She purchased Grande Estate 800TC Luxurious Sateen Weave sheets from a Ross store in Missouri. (*Id.* ¶ 36.) Plaintiffs estimate that she purchased the sheets for $40.00 in the fall of 2016 or early winter of 2017. (*Id.* ¶¶ 36, 37.) The sheets were manufactured by Defendant Creative and labeled and distributed by Defendant AQ. (*Id.* ¶ 38.) The **[**6]** sheets were represented to have 800 thread count. (*Id.* ¶¶ 39-41.)

Plaintiff Chiaraluce is a resident of Massachusetts. (*Id.* ¶ 53.) She purchased a Bradford Stay Fit brand queen-size sheet set from a Macy's retail store in New Hampshire in or around October 2017 for $69.99. (*Id.* ¶¶ 54, 56.) The sheets were manufactured by Defendant Creative and labeled and distributed by Defendant AQ. (*Id.* ¶ 54.) The sheets were labeled "800 Thread Count." (*Id.*)

After receiving complaints about sheets distributed by AQ, the Texas Department of Agriculture had the thread counts of three AQ products tested in November and December of 2017. (*Id.* ¶ 7.) These tests showed that the Fairfield Square Essex Stay Fit 1200 thread count sheets, the same brand purchased by Plaintiff Fontaine, had an actual thread count of 363 according to industry standards.[2] (*Id.*) Similar AQ sheets advertised at 1200 and 800 thread counts had actual counts of 441 and 293, respectively. (*Id.*)

Plaintiffs Hawes and Morrison then had their sheets independently tested. (*Id.* ¶¶ 12, 13.) Hawes's sheets, which were labeled "900 Thread Count," had an actual thread count of approximately 227 according to industry standards. (*Id.* ¶ 12.) Morrison's **[**7]** sheets, which were labeled "800 Thread Count," had an actual thread count of approximately 224 according to industry standards. (*Id.* ¶ 13.) Plaintiffs allege that they would not have purchased the sheets had they known that the sheets' thread counts were so much lower than represented. (*Id.* ¶¶ 21, 42, 113, 200.)

II. LEGAL STANDARD

Plaintiffs bring their motion pursuant to *Rules 60* and *15 of the Federal Rules of Civil Procedure* "for relief from the Court's Order and for leave to amend their First Amended Complaint." (ECF No. 36 at 1 (internal citations omitted).)

[*307] A. *Rule 60(b)*

Rule 60(b) of the Federal Rules of Civil Procedure provides that a court "may relieve a party . . . from a final judgment, order, or proceeding" in limited circumstances. *Fed. R. Civ. P. 60(b)(1)-(6)*. In the Fourth Circuit, a dismissal without prejudice is not considered a final order or judgment if "the plaintiff could save his action by merely amending his complaint." *Young v. Nickols, 413 F.3d 416, 418 (4th Cir. 2005)* (quoting *Domino Sugar Corp. v. Sugar Workers Local Union 392, 10 F.3d 1064, 1066-67 (4th Cir. 1993)*); *see* *Hui Kun Li v. Shuman, No. 5:14-CV-00030, 2015 U.S. Dist. LEXIS 91432, 2015 WL 4274167, at *2 (W.D. Va. July 14, 2015)* (finding that, for purposes of *Rule 60(b)* analysis, the court's dismissal without prejudice of ten counts did "not operate as a final judgment or order from which relief can be granted" where plaintiffs were permitted to amend their complaint). Such a dismissal is not a final order "unless the grounds for dismissal clearly indicate that 'no amendment [in the complaint] could **[**8]** cure the defects in the plaintiff's case.'" *Domino Sugar, 10 F.3d at 1067* (quoting *Coniston Corp. v. Village of Hoffman Estates, 844 F.2d 461, 463 (7th Cir. 1988)*).

---

[2] Plaintiffs define this industry standard, adopted by the American Society for Testing Materials ("ASTM"), at length in the PSAC. (ECF No. 36-1 ¶¶ 83-88.)

Here, the Court's March 17, 2021, Order made no finding or determination that an amendment could not cure the defects in the FAC. On the contrary, the Court found that Plaintiffs failed to set forth specific facts demonstrating a concrete and particularized injury, such as facts establishing that Defendants sheets were of lower quality, higher prices, or lower thread count. *Hill, 2021 U.S. Dist. LEXIS 49987, 2021 WL 1026740, at *2-3*. Accordingly, the Court dismissed Plaintiffs' claims for lack of standing—a dismissal that "must be one without prejudice, because a court that lacks jurisdiction has no power to adjudicate and dispose of a claim on the merits." *S. Walk at Broadlands Homeowner's Ass'n, Inc. v. OpenBand at Broadlands, LLC, 713 F.3d 175, 185 (4th Cir. 2013)*. The Court's Order did not by its terms terminate the action or enter a judgment dismissing the action. Therefore, the Court finds that its previous Order was not a final judgment or order pursuant to *Rule 60(b)* and is instead an interlocutory order.[3] *See generally* *Am. Canoe Ass'n v. Murphy Farms, Inc., 326 F.3d 505, 514 (4th Cir. 2003)* ("*Rule 60(b)* does not govern relief from interlocutory orders."). As an interlocutory order, it is "subject to reopening at the discretion of the district judge," *Moses H. Cone Memorial Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 12, 103 S. Ct. 927, 74 L. Ed. 2d 765 (1983)*, at "any time prior to the entry of final judgment," *Am. Canoe, 326 F.3d at 515* (quoting *Fayetteville Investors v. Commercial Builders, Inc., 936 F.2d 1462, 1469 (4th Cir. 1991)*). The Court will therefore consider Plaintiffs' motion to amend **[**9]** pursuant to *Rule 15(a)* to determine if Plaintiffs PSAC could cure the defects reflected in the Court's March 17, 2021, Order.

B. *Rule 15(a)*

The determination of whether to grant or deny a motion to amend a pleading under *Rule 15(a)* lies within the sound discretion of the district court. *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Deasy v. Hill, 833 F.2d 38, 40 **[*308]** (4th Cir. 1987)*. Under *Rule 15(a)*, courts should freely grant leave to amend a pleading "when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. "This liberal rule gives effect to the federal policy in favor of resolving cases on their merits instead of disposing of them on technicalities." *Laber v. Harvey, 438 F.3d 404, 426 (4th Cir. 2006)*. Indeed, motions to amend are "[s]o useful . . . and of such service in the efficient administration of justice that they ought to be allowed as a matter of course, unless some particular reason for disallowing them appears." *New Amsterdam Cas. Co. v Waller, 323 F.2d 20, 28-29 (4th Cir. 1963)*.

"[L]eave to amend a pleading should be denied only when the amendment would be prejudicial to the opposing party, there has been bad faith on the part of the moving party, or the amendment would be futile." *Johnson v. Oroweat Foods Co., 785 F.2d 503, 509 (4th Cir. 1986)* (citing *Foman, 371 U.S. at 182*). A plaintiff's request to amend a complaint is futile if the proposed amended complaint could not satisfy the appropriate requirements of the Federal Rules of Civil Procedure and Article III. *See* *U.S. ex rel. Wilson v. Kellogg Brown & Root, Inc., 525 F.3d 370, 376 (4th Cir. 2008)*.

III. DISCUSSION

A. Plaintiffs' motion was not unduly delayed

Defendants **[**10]** first argue that Plaintiffs' motion should be denied for undue delay. (ECF No. 39 at 9-13.) A district court may deny a motion to amend where "the delay in amending, the late hour of the motion to amend, and the burdens it would impose on the opposing party" counsel denial. *Equal Rts. Ctr. v. Niles Bolton Assocs., 602 F.3d 597, 604 n.3 (4th Cir. 2010)* (citing *Smith v. Angelone, 111 F.3d 1126, 1135 (4th Cir. 1997)*; *see also* *Foman,*

---

[3] Even if the Court's Order were construed to be a final judgment, *Rule 15(a)* would still govern Plaintiffs' motion. A court considering a post-judgment motion to amend a complaint "need not concern itself with [*Rule 60(b)*'s] legal standards." *Katyle v. Penn Nat. Gaming, Inc., 637 F.3d 462, 471 (4th Cir. 2011)*. Instead, "[t]he court need only ask whether the amendment should be granted, just as it would on a prejudgment motion to amend pursuant to *Fed. R. Civ. P. 15(a)*," i.e. "for prejudice, bad faith, or futility." *Id.*

371 U.S. at 182 ("In the absence of any apparent or declared reason—such as undue delay . . .—the leave sought should, as the rules require, be 'freely given.'")

Here, however, there was no apparent delay. Plaintiffs filed their motion just twelve days after the Court dismissed their claims for lack of Article III standing. This quick response suggests "diligence" and "dispels any inference of bad faith" or undue delay. *See* Laber, 438 F.3d at 428. Further, Plaintiffs' motion comes in response to this Court's *sua sponte* Article III ruling. Thus, while Plaintiffs may have "known this information [newly asserted in the PSAC] for years" as Defendants claim, (ECF No. 39 at 12), they only knew of the deficiencies in their FAC after the Court's Order. Thus, the Court does not find Plaintiffs' delay to be undue as to justify denying their motion.

B. Any prejudice to Defendants is minimal

Second, Defendants argue that they will be prejudiced **[**11]** if the Court grants Plaintiffs' motion. (ECF No. 39 at 13-14.) Prejudice is a particular concern in assessing post-judgment Rule 15(a) motions, they argue, since "the interest in finality that attaches to every judgment must of necessity weigh in the exercise of the district court's discretion." Laber, 438 F.3d at 433 (Wilkinson, J., concurring). After a court enters judgment for a defendant, "defendants have an interest in the finality of the judgment in their favor and would be prejudiced if they were unable to rely on such a judgment." Logar v. W. Va. Univ. Bd. of Governors, No. CIV.A. 1:10CV201, 2012 U.S. Dist. LEXIS 8926, 2012 WL 243692, at *8 (N.D. W. Va. Jan. 25, 2012), *aff'd*, 493 F. App'x 460 (4th Cir. 2012).

[*309] However, as the Court discussed in Part II.A, *supra*, no final judgment was entered in this case. Unlike in Logar, where plaintiffs' claims were dismissed on summary judgment, this Court dismissed Plaintiffs' claims for without prejudice for lack of standing. Further, Plaintiffs bring no new claims or theories for recovery in their PSAC, but instead merely allege additional facts in an attempt to establish an injury in fact. Thus, the Court finds that any prejudice to Defendants is minimal and outweighed by the Court's interests in judicial economy, disposing with the case on its merits, and avoiding the inefficiencies that could ensue were Plaintiffs to refile their case rather **[**12]** than reinstating this one.

C. Plaintiffs' PSAC is not futile

Finally, Defendants argue that Plaintiffs' PSAC is futile because (1) Plaintiffs' PSAC still does not allege a cognizable injury for purposes of standing under Article III, (2) Plaintiffs do not have standing to represent the purported class; and (3) Plaintiffs' PSAC would not survive a 12(b)(6) motion to dismiss.

i. Plaintiff's PSAC states a concrete and particularized injury

The jurisdiction of a federal court is limited to cases and controversies under Article III of the United States Constitution. U.S. Const. art. III, § 2. To establish constitutional standing, a plaintiff must plausibly allege that they have: "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." Spokeo, Inc. v. Robins, 578 U.S. 330, 338, 136 S. Ct. 1540, 194 L. Ed. 2d 635 (2016). Plaintiffs bear the burden of establishing these elements. Lujan v. Defs. of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992). "Where, as here, a case is at the pleading stage, [Plaintiffs] must 'clearly . . . allege facts demonstrating' each element." Spokeo, 578 U.S. at 338 (quoting Warth v. Seldin, 422 U.S. 490, 518, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)).

To establish an injury-in-fact, a plaintiff "must show that he or she suffered 'an invasion of a legally protected interest' that is 'concrete and particularized' and 'actual and imminent, not conjectural or hypothetical.'" **[**13]** Id. at 339 (quoting Lujan, 504 U.S. at 560). The Supreme Court has held that when a party has "set forth no specific facts demonstrating" the alleged injury, such allegations "are necessarily conjectural." Clapper v. Amnesty Int'l USA, 568 U.S. 398, 412, 420, 133 S. Ct. 1138, 185 L. Ed. 2d 264 (2013) (finding that plaintiffs did not have standing when they "present[ed] no concrete evidence to substantiate their fears" and could "only speculate" as to whether an injury might have occurred or will occur in the future).

This Court dismissed Plaintiffs' FAC for lack of standing. *Hill, 2021 U.S. Dist. LEXIS 49987, 2021 WL 1026740, at *2-3*. Specifically, this Court found that Plaintiffs failed to set forth specific facts demonstrating (1) Defendants' sheets were of lower quality, softness, or comfort than sheets Plaintiffs deem to accurately display corresponding thread counts, (2) Plaintiffs paid more for Defendants sheets than they would have for comparable sheets, or (3) Defendants' sheets actually had thread counts that were lower than advertised. *Id.* Thus, Plaintiffs had failed to allege any concrete and particularized injury. *Id.*

Plaintiffs have rectified this shortcoming in their PSAC. Unlike in their earlier complaint, Plaintiffs specifically allege that Defendants' sheets have been tested by the Texas Department of Agriculture **[*310]** and a New York quality assurance and **[**14]** compliance textile testing lab and were determined to have much lower thread counts than Defendants claimed that they had. (*See* ECF No. 36-1 ¶ 7.) Plaintiffs additionally allege that the sheets purchased by Named Plaintiffs have also been independently tested, and that those tests revealed that the "true thread count" of each set of sheets is less than one-third the represented thread count. (*Id.* ¶¶ 10-13.) Thus, Plaintiffs' allegation that Defendants' sheets were misleadingly labeled is no longer conjecture but instead is rooted in specific factual allegations. Plaintiffs now have a concrete, particularized injury; namely, they expended money for products they "would not have purchased" if they had known of the lower thread count. (*Id.* ¶¶ 42, 113, 200, 336.) This is a tangible injury that was allegedly caused by Defendants' misrepresentation and can be redressed through money damages. *See* *Maya v. Centex Corp., 658 F.3d 1060, 1069 (9th Cir. 2011)* ("Plaintiffs claim that, as a result of defendants' actions, . . . they would not have purchased their homes had defendants made the disclosures allegedly required by law. . . . This is a quintessential injury-in-fact."); *see also* *Sierra Club v. Morton, 405 U.S. 727, 733, 92 S. Ct. 1361, 31 L. Ed. 2d 636 (1972)* ("[P]alpable economic injuries have long been recognized as sufficient **[**15]** to lay the basis for standing").

ii. Plaintiffs have standing to represent the putative class members

Defendants next argue that Plaintiffs' motion is futile because, while Named Plaintiffs may have standing in their own right, they lack standing to represent the class. (ECF Nos. 39 at 18; *see* 30 at 5-18.) Citing cases from select district courts outside this circuit, Defendants contend that class members who bought different products from Named Plaintiffs have different injuries, and therefore cannot be represented by Named Plaintiffs under Article III. (ECF No. 30 at 6 (citing *Kisting v. Gregg Appliances, Inc., No. 16-CV-141, 2016 U.S. Dist. LEXIS 139788, 2016 WL 5875007, at *3 (E.D. Wis. Oct. 7, 2016)*).)

Defendants' position is inconsistent with Supreme Court and Fourth Circuit precedent. While "[t]he strictures of Article III standing are no less important in the context of class actions," *Baehr v. Creig Northrop Team, P.C., 953 F.3d 244, 252 (4th Cir.)*, *cert. denied*, *141 S. Ct. 373, 208 L. Ed. 2d 96 (2020)*, "[t]hat a suit may be a class action . . . adds nothing to the question of standing," *Lewis v. Casey, 518 U.S. 343, 357, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996)*. The Fourth Circuit has consistently held that to assess standing in a class action suit, "we analyze standing based on the allegations of personal injury made by the named plaintiffs." *Baehr, 953 F.3d at 252* (quoting *Hutton v. Nat'l Bd. of Exam'rs in Optometry, Inc., 892 F.3d 613, 620 (4th Cir. 2018)*); *see* *Beck v. McDonald, 848 F.3d 262, 269 (4th Cir. 2017)*; *Doe v. Obama, 631 F.3d 157, 160 (4th Cir. 2011)*. If named plaintiffs lack standing, the class lacks standing. *Baehr, 953 F.3d at 252-53* ("A putative class thus cannot establish Article III standing without a sufficient **[**16]** allegation of harm to the named plaintiff in particular."). Once the named plaintiff has established standing, however, a case or controversy exists under Article III. *Id.*

This does not mean that Article III imposes no restrictions on class action suits. One such restriction is that "[e]very class member must have Article III standing in order to recover individual damages." *TransUnion LLC v. Ramirez, 141 S. Ct. 2190, 2208, 210 L. Ed. 2d 568 (2021)*; *see also* *Allee v. Medrano, 416 U.S. 802, 829, 94 S. Ct. 2191, 40 L. Ed. 2d 566* **[*311]** *(1974)* (Berger, C.J., concurring in the result in part and dissenting in part) ("Standing cannot be acquired through the back door of a class action."). Another is that "standing is not dispensed in gross; rather, plaintiffs must demonstrate standing for each claim that they press and for each form of relief that they seek." *TransUnion, 141 S. Ct. at 2208*. Finally, a class action may only challenge conduct that injured the named plaintiffs—named plaintiffs lack standing to challenge *conduct* that did not cause their injury. *See* *Blum v. Yaretsky, 457 U.S. 991, 999, 102 S. Ct. 2777, 73 L. Ed. 2d 534 (1982)* (holding that an injured plaintiff has standing only to challenge putatively "injurious conduct of one kind" cannot litigate "conduct of another kind, although similar, to which he has not been subject") (citing *Moose Lodge No. 107 v. Irvis, 407 U.S. 163, 166-67, 92 S. Ct. 1965, 32 L. Ed. 2d 627 (1972)*).

The present case, however, is not an unusual one that requires lengthy analysis. As discussed in detail above, Plaintiffs **[**17]** challenge Defendants' alleged practice of advertising their sheets at higher thread counts than the sheets actually possess. This practice allegedly caused Named Plaintiffs to suffer a concrete and particularized injury by inducing them to spend money they otherwise would not have spent. And this injury can be redressed by awarding monetary damages. As defined in Plaintiffs' PSAC, every member of the proposed classes suffered this same injury caused by this same conduct: each was induced to purchase sheets by allegedly inflated thread counts.[4] (ECF No. 36-1 ¶ 115.) The mere fact that the products purchased by class members had different names and were of different sizes is immaterial, since the alleged injury and challenged conduct is uniform across the classes.

The Court finds that Plaintiffs have sufficiently alleged facts to support standing and their motion is not futile for want thereof. To the extent Defendants argue that individual issues concerning product labels, types, and thread counts will predominate in this suit, or that Named Plaintiffs' claims are not typical of class members' claims, those arguments are properly raised at the class certification stage. *Van Buren v. Walmart, Inc., No. DKC 19-0911, 2020 U.S. Dist. LEXIS 38426, 2020 WL 1064823, at *3 (D. Md. Mar. 5, 2020)*, *aff'd*, *855 F. App'x 156 (4th Cir. 2021)*. Defendants **[**18]** may also continue to challenge Plaintiffs' standing in future stages of the litigation. *See* *TransUnion, 141 S. Ct. at 2208* ("Plaintiffs must maintain their personal interest in the dispute at all stages of litigation.").

iii. Plaintiffs' PSAC would survive a motion to dismiss

Finally, Defendants argue that Plaintiffs' motion is futile because it would not survive a *12(b)(6)* motion to dismiss for failure to state a claim. (ECF No. 39 at 18; *see* ECF Nos. 19; 25.)

A plaintiff's request to amend a complaint is futile if the proposed amended complaint could not satisfy the appropriate requirements of the Federal Rules of Civil Procedure, including *Rule 12(b)(6)*. *See* *Wilson, 525 F.3d at 376*. Under *Rule 12(b)(6)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). In considering whether a **[*312]** plaintiff has stated a claim, a court "must accept as true all of the factual allegations contained in the complaint," *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (per curiam), and all reasonable inferences must be drawn in the non-moving party's favor, *Ibarra v. United States, 120 F.3d 472, 474 (4th Cir. 1997)*.

Here, Defendants argue: (1) Plaintiffs' MMWA claim fails because advertised thread counts do not constitute written warranties; (2) Plaintiffs' breach of implied warranty claims fail because they **[**19]** have not alleged that the sheets were unfit for ordinary use; (3) Plaintiffs' breach express warranty claims fail because they did not give Defendants notice of the breach within a "reasonable" time; (4) Plaintiffs' fraud-based claims fail because they failed to plead the time, place, and contents of the alleged fraudulent representations with particularity against individual Defendants; (5) Plaintiffs' claims under *N.C. Gen. Stat. § 75-1.1* fail because they are beyond the scope of that law; (6) Plaintiffs' negligent misrepresentation claims are barred by the economic loss doctrine; (7) Plaintiffs' claims under Massachusetts Consumer Protection Act fail because they did not comply with the law's notice requirement; and (8) Plaintiffs' unjust enrichment claims are duplicative. (ECF No. 19 at 5-22.)

1. Magnuson-Moss Warranty Act ("MMWA") (Count I)

The MMWA provides plaintiffs with a remedy against a defendant who fails to comply with "a written warranty, implied warranty, or service contract." *15 U.S.C. § 2310(d)(1)*. A "written warranty" means:

---

[4] While Plaintiffs' FAC included class members who purchased either bedding or linens, (ECF No. 15 ¶ 98), Plaintiffs appear in their PSAC to limit the classes to customers who purchased bedding sheets, (ECF No. 36-1 ¶ 115).

> any written affirmation of fact or written promise made in connection with the sale of a consumer product by a supplier to a buyer which relates to the nature of the material or workmanship **[**20]** and affirms or promises that such material or workmanship is defect free or will meet a specified level of performance over a specified period of time.

§ 2301(6)(A). An "implied warranty" is defined as "an implied warranty arising under State law . . . in connection with the sale by a supplier of a consumer product." *§ 2301(7)*.

Courts generally distinguished between "written warranties" and mere "product descriptions." *See* *In re Lumber Liquidators Chinese-Manufactured Flooring Durability Mktg. & Sales Practice Litig., No. 1:16MD2743 (AJT/TRJ), 2017 U.S. Dist. LEXIS 105335, 2017 WL 2911681, at *17 (E.D. Va. July 7, 2017)*; *Perez v. Monster Inc., 149 F. Supp. 3d 1176, 1183 (N.D. Cal. 2016)*; *Bowling v. Johnson & Johnson, 65 F. Supp. 3d 371, 378 (S.D.N.Y. 2014)*; *Viggiano v. Hansen Nat. Corp., 944 F. Supp. 2d 877, 898 (C.D. Cal. 2013)*; *see also* *In re Shop-Vac Mktg. & Sales Pracs. Litig., 964 F. Supp. 2d 355, 361 (M.D. Pa. 2013)* (finding claims about a vacuum's horsepower and tank capacity did not constitute a written warranty); *cf.* *Dorsey v. Rockhard Labs., LLC, No. CV 13-07557 DDP RZX, 2014 U.S. Dist. LEXIS 132161, 2014 WL 4678969, at *9 (C.D. Cal. Sept. 19, 2014)* (finding that "Sexual Performance Enhancer for Men" and "Fast & Effective" were claims that "relate to the nature of the product and are not mere product descriptions"). Promises about a product's quality or character do not constitute a "written warranty" unless they promise "a specified level of performance over a specified period of time." *Hawes v. Macy's Inc., 346 F. Supp. 3d 1086, 1092 (S.D. Ohio 2018)*. This interpretation is consistent with the Federal Trade Commission's interpretation of the MMWA, which provides that that certain product representations, such as "energy efficiency ratings" and clothing "care labeling" are product descriptions rather than written warranties because "a written **[*313]** promise of a specified level **[**21]** of performance must relate to a specified period of time in order to be considered a 'written warranty.'" *16 C.F.R. § 700.3(a)*. "A product information disclosure without a specified time period to which the disclosure relates is therefore not a written warranty." *Id.*; *see* *Viggiano, 944 F. Supp. 2d at 898 n.45*; *Kelley v. Microsoft Corp., No. C07-0475MJP, 2007 U.S. Dist. LEXIS 66721, 2007 WL 2600841, at *5 (W.D. Wash. Sept. 10, 2007)*.

Two courts have previously determined that a thread count guarantee is a not a "written warranty." *See* *Hawes, 346 F. Supp. 3d at 1092*; *Beautiful Home Textiles (USA) v. Burlington Coat Factory Warehouse Corp., 2014 U.S. Dist. LEXIS 114010, 2014 WL 4054240, at *12 (S.D.N.Y. Aug. 15, 2014)*. "Even if thread count provides a certain character and quality over time," they held, "the thread count listed on the bedsheets does not list a specified level of performance over a specified period of time." *Hawes, 346 F. Supp. 3d at 1092*; *see* *Beautiful Home Textiles, 2014 U.S. Dist. LEXIS 114010, 2014 WL 4054240, at *12*.

Here, a promised thread count may guarantee a specified level of performance. Accepting all alleged facts as true and making all inferences in plaintiffs favor, thread count is considered by sellers and consumers alike as an objective measure of softness and comfort during sleep and may be the closest thing bedsheets have to an objective promise of performance. (*See* ECF No. 36-1 ¶ 19 n.1 ("[T]he higher the thread count, the denser & smoother the sheet will feel." (quoting Macy's, *Meet the Sheets*, https://www.macys.com/ce/splash/how-to-choose-bed-sheets/index (last visited Dec. 15, 2021))).) Even if this were true, **[**22]** however, Plaintiffs have not alleged that Defendants made any guarantees of performance over a specified period of time. Thus, the Court finds that Plaintiffs have not sufficiently alleged the existence of a "written warranty" under the MMWA.

On the other hand, Plaintiffs have stated a claim for breach of an implied warranty under state law, as determined in Section III.C.iii.2, *infra*. Thus, Plaintiffs have likewise stated a claim under the MMWA. *See* *Clemens v. DaimlerChrysler Corp., 534 F.3d 1017, 1022 (9th Cir. 2008)* ("[T]his court's disposition of the state law warranty claims determines the disposition of the [MMWA] claims.").

Therefore, Plaintiffs' motion to amend will be granted as to their MMWA claims for breach of an implied warranty but denied as to any claim for breach of a written warranty under the MMWA.

2. Breach of implied warranty of merchantability (Count II)

Under the Uniform Commercial Code ("UCC"), "[g]oods to be merchantable must be at least such as . . . (e) are adequately contained, packaged, and labeled as the agreement may require; and (f) conform to any promises or affirmations of fact made on the container or label." *Mass. Gen. Laws ch. 106, § 2A-212(2)(e)-(f)*; *Mo. Rev. Stat. § 400.2A-212(2)(e)-(f)*; *N.C. Gen. Stat. § 25-2A-212(2)(e)-(f)*; *see* *Cal. Com. Code § 2314(2)(e)-(f)* (West); *N.H. Rev. Stat. Ann. § 382-A:2-314(e)-(f)* (West).[5] Courts in the relevant states have found breaches of the implied warranty of merchantability **[**23]** where cans of tuna were underfilled and weighed substantially less **[*314]** than stated on the label, *Hendricks v. StarKist Co., 30 F. Supp. 3d 917, 933 (N.D. Cal. 2014)*; where "all natural" almond milk contained artificial ingredients, *Vass v. Blue Diamond Growers, No. CV 14-13610-IT, 2015 U.S. Dist. LEXIS 175317, 2015 WL 9901715, at *9 (D. Mass. Aug. 11, 2015)*, *report and recommendation adopted*, *No. 14-CV-13610-IT, 2016 U.S. Dist. LEXIS 44739, 2016 WL 1275030 (D. Mass. Mar. 31, 2016)*; and where a deodorant can had an insufficient warning on its label, *Reid v. Eckerds Drugs, Inc., 40 N.C. App. 476, 253 S.E.2d 344, 349-50 (N.C. Ct. App. 1979)*.

Here, Plaintiffs allege that Defendants' sheets were not adequately labeled and did not conform to the affirmations of fact made on the labels, in that the sheets did not have the thread counts promised on the labels. These allegations appear to fit squarely within the definitions of merchantable contained in Sections 2A-212(2)(e) and (f) of the UCC quoted above. Thus, Plaintiffs have stated claims of breach of the implied warranty of merchantability.

Defendants argue that *Hawes v. Macy's* is on point. (ECF Nos. 19 at 10-11 (citing *Hawes, 346 F. Supp. 3d at 1093*; 25 at 4-5). In *Hawes*, a parallel case in which Plaintiffs sued Macy's over the same sheets at issue in this case, the U.S. District Court for the Southern District of Ohio dismissed Plaintiffs' claims for breach of an implied warranty of merchantability. *Hawes, 346 F. Supp. 3d at 1093*. There, however, Plaintiffs argued that the sheets were "unfit for the ordinary purpose for which they are used." *Id.* The court therefore analyzed Plaintiffs' claims under UCC § 2A-212(2)(c), which **[**24]** requires products to "satisfy a minimum level of quality," and found the complaint lacking. *Id.* (citing *Birdsong v. Apple, Inc., 590 F.3d 955, 958 (9th Cir. 2009)*; *Hope v. Nissan N. Am., Inc., 353 S.W.3d 68, 90 (Mo. Ct. App. 2011)*). Here, Plaintiffs argue that Defendants' products do not satisfy UCC § 2A-212(2)(e) or (f). Thus, while the factual allegations in the two cases may be similar, Plaintiffs' divergent legal theories require the Court's analysis, and ultimate conclusion, to differ from the analysis and conclusion in *Hawes*.

Finally, Defendants argue that Named Plaintiff Hawes's implied warranty claim is barred because she failed to notify Defendants of the defect within one year of sale as required by California law. (ECF No. 19 at 11 n.8 (citing *Cal. Civ. Code § 1791.1*.)) However, "[t]here is nothing that suggests a requirement that the purchaser discover and report to the seller a *latent* defect within that time period." *Mexia v. Rinker Boat Co., 174 Cal. App. 4th 1297, 95 Cal. Rptr. 3d 285, 295-96 (Cal. Ct. App. 2009)* (emphasis added) (holding that interpreting the one-year provision as a statute of limitations would be inconsistent with the statute's "legislative intent to *expand* consumer protections and remedies"). Here, Plaintiffs have alleged that the sheets' actual thread count was unobservable to the naked eye and only discovered after independently tested by a textile expert. (ECF No. 36-1 ¶ 10, 244-45.) Thus, the Court finds that these **[**25]** allegations are sufficient to withstand a motion to dismiss on this claim.

Plaintiff's motion will be granted as to this claim.

3. Breach of an express warranty (Count III)

Under the UCC, claims for breach of express warranty must be brought "within a reasonable time after he or she discovers or should have discovered any breach." *Cal. Com. Code § 2607(3)(A)* (West); *see* *Mass. Gen. Laws ch. 106, § 2-607(3)(a)*; *Mo. Rev. Stat. § 400.2-607(3)(a)*; *N.H. Rev. Stat. Ann. § 382-A:2-607(3)(a)* (West); *N.C. Gen. Stat. § 25-2-607(3)(a)*. Whether the time between discovery and suit is "reasonable" is fact and case specific. **[*315]** In one case, three months was too long to wait; in another, three years was still reasonable. *Compare* *P & F*

---

[5] The parties dispute which state's law governs Plaintiffs' implied warranty claims. (ECF Nos. 19 at 8-9; 24 at 5-7; 25 at 2-4.) However, neither party has identified an actual conflict of laws in this case. (*See* ECF Nos. 24 at 7-11 (arguing that Plaintiffs stated a claim under the UCC as adopted by each state); 25 at 4 ("Plaintiffs' breach-of-warranty claims must be dismissed regardless of which state's law applies.")). Thus, the Court need not reach the choice of law issue at this stage.

Construction Corp. v. Friend Lumber Corp., 31 Mass. App. Ct. 57, 575 N.E.2d 61, 64 (Mass. Ct. App. 1991) (finding that "three and one half months is not soon enough" where a construction company notified a door manufacturer of readily apparent flaws after payment was past due), *with* Maybank v. S. S. Kresge Co., 302 N.C. 129, 273 S.E.2d 681, 685 (N.C. 1981) ("While three years might conceivably be a per se unreasonable delay in a commercial context, differing considerations applicable in retail situations may mean that a delay of three years by a consumer in giving notice to a retail seller is within the bounds of a reasonable time.") For this reason, reasonable delay is generally a question of fact for the jury. *See* Gober v. Revlon, Inc., 317 F.2d 47, 52 (4th Cir. 1963) (applying California law); Delano Growers' Coop. Winery v. Supreme Wine Co., 393 Mass. 666, 473 N.E.2d 1066, 1072 (Mass. 1985); Rowe Int'l, Inc. v. J-B Enterprises, Inc., 647 F.2d 830, 833 (8th Cir. 1981) (applying Missouri law); Dudley v. Bus. Exp., Inc., 882 F. Supp. 199, 211 (D.N.H. 1994) (citing Russell v. First National Stores, Inc., 96 N.H. 471, 79 A.2d 573, 577 (N.H. 1951)); Maybank, 273 S.E.2d at 684 n.1.

Here, Named Plaintiffs each notified **[**26]** Defendants of the defects roughly two years after purchase. While the sheets' alleged defect was not readily apparent at the time of purchase, Plaintiffs have failed to allege when the defects were detected. Defendants are correct that "Plaintiffs should not be allowed to benefit from any ambiguity created by their own failure to disclose material facts." (ECF No. 25 at 6.) Nevertheless, the Court cannot find that Plaintiffs' delays were unreasonable as a matter of law so as to render their PSAC futile. Two years is within the range found reasonable by at least one state's supreme court in consumer transactions, and Defendants alleged concealment of the defect and other factors prevent this Court from determining that Plaintiffs' delays are unreasonable as a matter of law at this early stage in the litigation.

Thus, Plaintiffs' motion will be granted as to these claims.

4. Fraud based claims (Counts IV through XII)

"In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." Fed. R. Civ. P. 9(b). Rule 9(b) applies to any cause of action "that has the substance of fraud," not only those labelled as fraud claims. Bakery & Confectionary Union & Indus. Int'l Pension Fund v. Just Born II, Inc., 888 F.3d 696, 705 (4th Cir. 2018) (quoting Cozzarelli v. Inspire Pharms. Inc., 549 F.3d 618, 629 (4th Cir. 2008)). This heightened pleading standard **[**27]** requires the plaintiff to "at a minimum, describe the time, place, and contents of the false representations, as well as the identity of the person making the misrepresentation and what he obtained thereby." *Id.* (internal quotations omitted). "These facts are often referred to as the 'who, what, when, where, and how' of the alleged fraud.'" Wilson, 525 F.3d at 379 (quoting U.S. ex rel. Willard v. Humana Health Plan of Tex. Inc., 336 F.3d 375, 384 (5th Cir. 2003)). Rule 9(b) "serves several policy objectives," Topshelf Mgmt., Inc. v. Campbell-Ewald Co., 117 F. Supp. 3d 722, 725 (M.D.N.C. 2015), including "to provide defendants with fair notice of claims against them and the factual ground upon which they are based, forestall frivolous suits, prevent fraud actions in which all the facts are learned only following discovery, and protect defendants' goodwill and reputation," McCauley v. Home Loan Inv. Bank, F.S.B., 710 F.3d 551, 559 (4th Cir. **[*316]** 2013). Ultimately, the Rule's purpose is to satisfy the court "(1) that the defendant has been made aware of the particular circumstances for which she will have to prepare a defense at trial, and (2) that plaintiff has substantial prediscovery evidence of those facts." Harrison v. Westinghouse Savannah River Co., 176 F.3d 776, 784 (4th Cir. 1999).

Defendants argue that nine of Plaintiffs' thirteen claims sound in fraud, and Plaintiffs do not dispute this characterization. (ECF Nos. 19 at 14; 24 at 13-16.) Defendants further argue that these claims were not plead with sufficient particularity because **[**28]** Plaintiffs (1) failed to identify which Defendant is responsible for the alleged misrepresentations, and (2) base too many allegations on "information and belief." (ECF No. 19 at 15-17.) Thus, Defendants argue, Plaintiffs' request to assert these claims in their PSAC is futile. (ECF No. 39 at 18.)

The Court, however, finds, that the PSAC does satisfy Rule 9(b). With respect to Defendants' first argument, Plaintiffs allege that the sheets in question "were imported and labeled by AQ Textiles," and that "AQ Textiles represented and sold them to consumers as if they were of the higher quality represented on the labels." (ECF No. 36-1 ¶¶ 38, 44.) With respect to Defendants' second argument, it appears that Plaintiffs' allegations are no longer based solely on information and belief. Instead, Plaintiffs have submitted prediscovery evidence, including the content of the alleged misrepresentations (the "what"), as attachments to the PSAC. (*Id.* at 87; *see id.* ¶ 51.) And the "when" and "where" are also based on prediscovery evidence, such as Named Plaintiffs' recollections of the times and places they purchased the sheets. (*See id.* ¶¶ 36, 49, 54, 58.) Finally, Plaintiffs allege that they gave AQ money **[**29]** in exchange for the sheets. (*Id.* ¶¶ 37, 52, 56, 60.) The Court is therefore satisfied that the allegations are supported by prediscovery evidence and put Defendants on notice of the particular circumstances for which they will need to prepare a defense for trial.

Plaintiffs' motion will be granted as to these claims except as otherwise addressed below.

5. N.C. Unfair and Deceptive Trade Practices Act (Count VI)

Defendants next argue that Plaintiffs' claims are beyond the scope of the *North Carolina Unfair and Deceptive Trade Practices Act ("NCUDTPA")*. (ECF No. 19 at 17-18.)

The NCUDTPA declares unlawful "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practice in or affecting commerce." *N.C. Gen. Stat. § 75-1.1(a)*. To state a claim, a plaintiff must allege (1) an unfair or deceptive act or practice; (2) in or affecting commerce; (3) which proximately caused injury to the plaintiff or his business." *Champion Pro Consulting Grp., Inc. v. Impact Sports Football, LLC, 845 F.3d 104, 109 (4th Cir. 2016)* (citing *Walker v. Fleetwood Homes of N.C., Inc., 362 N.C. 63, 653 S.E.2d 393, 399 (N.C. 2007)*). The statute's plain language is broad in scope and applies to all acts or practices "in or affecting commerce," including "all business activities, however denominated." *§ 75-1.1(a)-(b)*. The General Assembly removed language limiting that scope to business "within this state" in **[**30]** 1977, indicating its desire to make the law "applicable 'to the full extent permissible under conflicts of law principles and the Constitution.'" *Hardee's Food Sys., Inc. v. Beardmore, No. 5:96-CV-508-BR(2), 1997 U.S. Dist. LEXIS 9671, 1997 WL 33825259, at *3 (E.D.N.C. June 6, 1997)* (quoting *American Rockwool, Inc. v. Owens-Corning Fiberglas Corp.,* ***[*317]*** *640 F. Supp. 1411, 1427 (E.D.N.C. 1986)*).

Relying on *The 'In' Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494 (M.D.N.C. 1987)*, Defendants argue that the NCUDTPA only reaches cases where the plaintiff has shown an in-state injury. (ECF No. 19 at 17-18.) In *'In' Porters*, a court in this District addressed "whether *section 75-1.1* is available to a foreign plaintiff suing a resident defendant over alleged foreign injuries having a negligible effect, if any, on North Carolina trade or commerce." *"In' Porters, 633 F. Supp. at 501*. Ultimately, the court held that the NCUDTPA could not reach the facts of that case. *Id. at 502-03*.

Since *'In' Porters*, other federal district courts in North Carolina have distinguished its holding. *See* *Hometown Pub., LLC v. Kidsville News!, Inc., No. 5:14-CV-00076-FL, 2014 U.S. Dist. LEXIS 179106, 2014 WL 7499450, at *3 (E.D.N.C. Oct. 3, 2014)*; *Verona v. U.S. Bancorp, No. 7:09-CV-057-BR, 2011 U.S. Dist. LEXIS 33160, 2011 WL 1252935, at *15 (E.D.N.C. Mar. 29, 2011)*; *Ada Liss Group v. Sara Lee Corp., No. 06CV610, 2010 U.S. Dist. LEXIS 59691, 2010 WL 3910433, *12 (M.D.N.C. April 27, 2010)*; *Hardee's, 1997 U.S. Dist. LEXIS 9671, 1997 WL 33825259, at *3*. These courts limit *'In' Porter* to cases concerning "exclusively foreign misconduct with damages to the plaintiff's exclusively foreign operations." *Verona, 2011 U.S. Dist. LEXIS 33160, 2011 WL 1252935, at *14*.

This Court likewise finds *'In' Porters* distinguishable. *'In' Porters*' narrow interpretation of the NCUDTPA was based on concerns about personal jurisdiction under North Carolina's long arm statute, consistency of the NCUDTPA with federal ***antitrust law***, and potential violations of the **[**31]** Commerce and *Due Process Clauses of the U.S. Constitution*. *"In' Porters, 633 F. Supp. at 501-02*. These concerns are not present in this case. There is no personal jurisdiction concern because Defendant AQ is a North Carolina corporation. *See* *N.C. Gen. Stat. 1-75.4(1)(c)*. Since Plaintiffs are U.S. residents, applying the NCUDTPA will also not create the concerning "anomaly" presented in *'In' Porters* that could allow state law to reach farther than federal law in regulating international trade. *See* *'In' Porters, 633 F. Supp. at 502 n. 8*.

Further, while statutes should be construed to avoid constitutional problems, *see* *Boumediene v. Bush, 553 U.S. 723, 787, 128 S. Ct. 2229, 171 L. Ed. 2d 41 (2008)*, Defendants have not shown how applying the NCUDTPA in this case would violate the *Commerce Clause*. *See* *ITCO Corp. v. Michelin Tire Corp., Com. Div., 722 F.2d 42, 48 n. 9 (4th Cir. 1983)* ("Absent some reason to believe that the [NCUDTPA] is an attempt directly to regulate interstate commerce . . . we perceive no cause for constitutional concern."). Unlike in *'In' Porter*, Plaintiffs here invoke the NCUDTPA to regulate Defendant AQ's alleged mislabeling of their products—conduct that appears to have occurred in whole or in part at AQ's headquarters in North Carolina. (ECF No. 36-1 ¶¶ 25-28, 61.) Thus, this is not a case where state law "targets conduct that occurs entirely outside [North Carolina's] borders." *See* *Ass'n for Accessible Medicines v. Frosh, 887 F.3d 664, 671 (4th Cir. 2018)*; *see also* Nat'l Pork Producers Council v. Ross, 6 F.4th 1021, 1029 (9th Cir. 2021) ("A state law is not impermissibly extraterritorial unless it directly regulates conduct **[**32]** that is wholly out of state.").

Lastly, Defendants have not shown how application of the NCUDTPA would violate the *Due Process Clause*. Application of state law may be unconstitutional if a lack of "significant contact or significant aggregation of contacts" between the state and case "creating state interests" renders application of the law "arbitrary" or "fundamentally unfair." *Allstate Ins. Co. v. Hague, 449 U.S. 302, 313,* ***[*318]*** *101 S. Ct. 633, 66 L. Ed. 2d 521 (1981)* (pl. opinion). Here, North Carolina has significant contacts with Defendant AQ in that AQ is a North Carolina corporation and engaged in allegedly proscribed conduct in North Carolina. *See* *id. at 314 n. 19* ("Numerous cases have applied the law of a jurisdiction other than the situs of the injury where there existed some other link between that jurisdiction and the occurrence."). Application of North Carolina law to a North Carolina corporation is not arbitrary or unfair. Consequently, the Court joins the cases cited above and interprets the NCUDTPA broadly to reach some cases where the injury occurred outside of North Carolina.

Defendants alternatively argue that Plaintiffs have failed to adequately allege that Defendants' misconduct occurred in North Carolina. Plaintiffs have alleged:

> 25. Defendant AQ Textiles is a North Carolina LLC with it **[**33]** principal place of business and registered offices located in Greensboro, North Carolina 27410.
> 26. Defendants' improper conduct set forth herein occurred in this District or was conceived of and executed from this District in whole or in part.
> 27. Defendants' decisions to engage in the improper conduct set forth herein were made in this District.
> 28. Further, Defendants' bedding sheets at issue were advertised, marketed, sold and/or distributed in this District.
> . . .
> 70. The sheets at issue were manufactured by Creative Textiles and imported, labeled, and sold by AQ Textiles. . . .

(ECF No. 36-1 ¶¶ 25-28, 70.) These allegations are sufficient to create the reasonable inference that Defendant AQ engaged in the alleged misconduct—labeling sheets with misleadingly high thread counts—in North Carolina.

Therefore, the Court finds that the facts of this case fall within the broad scope of the NCUDTPA. The Court makes no finding as to whether the NCUDTPA applies to this case under North Carolina's choice of law rules, as that issue has not been raised by Defendants nor briefed by the parties. Instead, the Court merely finds that *'In' Porter* does not render Plaintiffs' motion to assert NCUDTPA **[**34]** claims in their PSAC futile.

6. Negligent misrepresentation (Count IV) and economic loss

Defendants next argue that Plaintiffs' negligent misrepresentation claim is barred by the economic loss doctrine. (ECF No. 19 at 18-20.) Plaintiffs argue that their claims fall within an exception to the economic loss rule under North Carolina law. (ECF No. 24 at 18 (citing *Rountree v. Chowan Cty., 252 N.C. App. 155, 796 S.E.2d 827, 830 (N.C. Ct. App. 2017)*).) Defendants argue that North Carolina law does not apply to this case. (*See* ECF No. 25 at 10.)

A federal court sitting in diversity or exercising supplemental jurisdiction over state law claims must apply the substantive law of the forum state, including the form state's choice of law rules. Hitachi Credit Am. Corp. v. Signet Bank, 166 F.3d 614, 623-24 (4th Cir. 1999); *see* Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941) (citing Erie R.R. Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)). North Carolina courts follow the First Restatement of Conflict of Laws in actions sounding in tort and apply the tort law of the state where the injury occurred. *See* SciGrip, Inc. v. Osae, 373 N.C. 409, 838 S.E.2d 334, 343 (N.C.

2020); Boudreau **[*319]** v. Baughman, 322 N.C. 331, 368 S.E.2d 849, 854 (N.C. 1988). Here, Defendants' alleged negligent misrepresentation caused injury where Plaintiffs purchased the sheets: California, Massachusetts, Missouri, and New Hampshire. Thus, Plaintiffs claims are governed by the substantive laws of these states. *See* SciGrip, 838 S.E.2d at 344 (noting that "the lex loci test can be difficult in some circumstances, including cases involving events that **[**35]** occur in and entities associated with multiple jurisdictions.").

All four states recognize the economic loss rule, which limits "remedies for economic loss sustained by reason of damage to or defects in products sold . . . to those under the warranty provisions of the UCC." Renaissance Leasing, LLC v. Vermeer Mfg. Co., 322 S.W.3d 112, 130-31 (Mo. 2010) (en banc); *see* Robinson Helicopter Co. v. Dana Corp., 34 Cal. 4th 979, 22 Cal. Rptr. 3d 352, 102 P.3d 268, 272 (Cal. 2004); Sebago, Inc. v. Beazer E., Inc., 18 F. Supp. 2d 70, 89 (D. Mass. 1998) (citing Jacobs v. Yamaha Motor Corp., U.S.A., 420 Mass. 323, 649 N.E.2d 758, 763 n.5 (Mass. 1995)); Wyle v. Lees, 162 N.H. 406, 33 A.3d 1187, 1190-91 (N.H. 2011). However, the states apply the rule differently to negligent misrepresentation claims. The Eighth Circuit predicted that "the Supreme Court of Missouri, if confronted with the issue, would hold that the economic loss doctrine bars negligent misrepresentation claims." Bruce Martin Constr. v. CTB, Inc., 735 F.3d 750, 752 (8th Cir. 2013) (citing Dannix Painting, LLC v. Sherwin-Williams Co., 732 F.3d 902, 904-05 (8th Cir. 2013)). In Massachusetts, on the other hand, "the economic-loss doctrine does not apply to claims of negligent misrepresentation." Stokes v. Wells Fargo Bank, N.A., 37 F. Supp. 3d 525, 535 n.6 (D. Mass. 2014); Passatempo v. McMenimen, 461 Mass. 279, 960 N.E.2d 275, 294 (Mass. 2012) ("[The economic loss doctrine] does not apply to 'pecuniary loss incurred as a result of an actionable misrepresentation.'" (quoting Nota Constr. Corp. v. Keyes Assocs. Inc., 45 Mass. App. Ct. 15, 694 N.E.2d 401 (Mass. Ct. App. 1998))); *see also* Softub, Inc. v. Mundial, Inc., 53 F. Supp. 3d 235, 260 (D. Mass. 2014) (allowing plaintiff's negligent misrepresentation claim against manufacturer for false promises that pump was suitable for installation in portable spa tubs).[6]

In the remaining two states, it appears that a negligent misrepresentation claim is barred if the misrepresentation constituted a breach of contract but is not barred if the misrepresentation **[**36]** was independent of the contract terms and instead induced contract formation. *Compare* Robinson Helicopter, 102 P.3d at 274 (allowing an intentional misrepresentation claim where defendant falsified certificates of performance, inducing plaintiff's purchase of its products), *and* Banks v. R.C. Bigelow, Inc., 536 F. Supp. 3d 640, 646 (C.D. Cal. 2021) (allowing a claim that alleged the label, "manufactured in the USA," was false and induced plaintiffs' purchase), *and* Wyle, 33 A.3d at 1192 (allowing a claim where defendant's misrepresentation that a property was licensed **[*320]** for immediate occupancy induced plaintiff's purchase), *with* Soil Retention Prods. v. Brentwood Indus., 521 F. Supp. 3d 929, 955 (S.D. Cal. 2021) (barring plaintiff's negligent misrepresentation claims that "allege nothing more than the product it purchased . . . did not live up to the expectations that had been created by Defendant's advertising"), *and* Wyle, 33 A.3d at 1192 (noting that economic loss rule bars claims that "merely relate to a breached promise to perform the terms of the contract or attempt to recharacterize a breach of contract claim as a negligent misrepresentation").

Here, Defendants' alleged misrepresentations go to the nature and performance of the sheets. Plaintiffs repeatedly allege that Defendants' thread count claims were not mere characterizations of the sheets, but product descriptions that created warranties. Thus, this is **[**37]** not a case where alleged promises are independent of the purchase, such as a promise that a product is properly licensed or "manufactured in the USA." In such a case, the plaintiff has received the correct product, but was persuaded to purchase the product by the defendant's misrepresentations. By contrast, Plaintiffs in this case allege they did not receive the products they purchased—luxury sheets with the

---

[6] Defendants cite Sebago, Inc. v. Beazer E., Inc., 18 F. Supp. 2d 70 (D. Mass. 1998), which applied the economic loss rule to a negligent misrepresentation claim after finding in 1998 that "Massachusetts has not expressly decided whether the economic loss doctrine bars claims of negligent misrepresentation where the damages result from a defective product." Id. at 95. State courts have since repeated that negligent misrepresentation is categorically excepted from the economic loss rule, *see* Passatempo, 960 N.E.2d at 294, and the U.S. District Court in Massachusetts has allowed negligent misrepresentation claims related to defective products to proceed, Softub, 53 F. Supp. 3d at 260.

advertised thread counts. Thus, their California and New Hampshire negligent misrepresentation claims merely restate their breach of warranty claims and are barred by the economic loss doctrine.

Plaintiffs' motion will therefore be granted as to the negligent misrepresentation claims brought by Plaintiffs who allegedly suffered an injury in Massachusetts. Plaintiffs' request to assert remaining negligent misrepresentation claims will be denied as futile.

7. Massachusetts Consumer Protection Act ("MCPA") (Count XI)

Defendants next argue that Plaintiffs' request to assert MCPA claims in their PSAC is futile because Plaintiffs did not provide Defendants with sufficient notice. (ECF No. 19 at 20-21.)

The MCPA provides that "[a]t least thirty days prior to the filing of any such action, **[**38]** a written demand for relief, identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered, shall be mailed or delivered to any prospective respondent." *Mass. Gen. Laws ch. 93A, § 9(3)*. "The statutory notice requirement is not merely a procedural nicety, but, rather, 'a prerequisite to suit.'" *Young v. Wells Fargo Bank, N.A., 828 F.3d 26, 34 (1st Cir. 2016)* (quoting *Entrialgo v. Twin City Dodge, Inc., 368 Mass. 812, 333 N.E.2d 202, 204 (Mass. 1975)*). The demand letter "is a prerequisite to suit and as a special element must be alleged and proved." *Baldassari v. Pub. Fin. Tr., 369 Mass. 33, 337 N.E.2d 701, 707 (Mass. 1975)*.

In the class action context, proper demand made by one plaintiff satisfies this requirement for "others similarly situated," so long as the letter (1) identifies him as the claimant, (2) reasonably describes the act or practice being challenged, and (3) reasonably describes his injury. *Id.* In *Bosque v. Wells Fargo Bank, N.A., 762 F. Supp. 2d 342 (D. Mass. 2011)*, the U.S. District Court for the District of Massachusetts held that one named plaintiff's demand put defendant on sufficient notice such that other named plaintiffs could join suit without issuing additional demands. *Id. at 354*.

"One function of the demand letter is to encourage negotiation and settlement by notifying prospective defendants of claims arising from allegedly unlawful **[*321]** conduct." *Casavant v. Norwegian Cruise Line, Ltd., 460 Mass. 500, 952 N.E.2d 908, 913 (Mass. 2011)* (internal quotations omitted); *see also* *Young, 828 F.3d at 34* ("The demand letter requirement puts **[**39]** the defendant on notice of the plaintiff's claim, thereby encouraging negotiation and settlement."). Notice of a plaintiff's claim satisfies this requirement only if it "describes the injuries in sufficient detail to permit the defendant reasonably to ascertain its exposure." *Richards v. Arteva Specialties S.A.R.L., 66 Mass. App. Ct. 726, 850 N.E.2d 1068, 1076 (Mass. Ct. App. 2006)* (internal quotation omitted). Thus, "[i]n order to qualify as a written demand under Chapter 93A, the letter must define the injury suffered and the relief sought and *refer to the nature of the claim as one under the consumer protection act*." *In re Bushay, 327 B.R. 695, 702 (B.A.P. 1st Cir. 2005)* (emphasis added), *aff'd*, *187 F. App'x 17 (1st Cir. 2006)*.

Here, Plaintiffs allege the following:

> 310. Plaintiff Morrison provided Defendants with notice of her and the Classes' claims by letter dated November 27, 2018.
> 311. Plaintiff Hawes provided Defendants with notice of her and the Classes' claims by letter on or around May 17, 2019.
> 312. Plaintiffs Chiaraluce and Fontaine provided Defendants with notice of their and the Classes' claims by letter on or around December 5, 2019.

(ECF No. 36-1 ¶¶ 310-312.) Plaintiffs first raised their MCPA claim in their FAC, filed on December 12, 2019. Thus, only Plaintiff Hawes's letter was mailed or delivered at least thirty days before Plaintiffs filed their MCPA claim. **[**40]** [7]

---

[7] Plaintiffs do not argue that the untimeliness of Plaintiffs Chiaraluce's and Fontaine's demands have been cured by their PSAC, nor does the Court find that this amended complaint cures the defects. Plaintiffs had ample time between January 5, 2020—thirty days after Chiaraluce and Fontaine mailed their letter—and this Court's Order on March 17, 2021, to amend their complaint to cure this defect but failed to do so. After Plaintiffs' suit was dismissed by the Court, Defendants no longer had incentive to

Plaintiffs argue that Hawes's demand was sufficient to put Defendants on notice of other Plaintiffs' claims as well. (ECF No. 24 at 20.) However, Hawes is a citizen of California who purchased her sheets in California, and Plaintiffs have not alleged that Hawes or the sheets she purchased had any connection to Massachusetts. Thus, nothing in her demand letter would have put Defendants on notice that their alleged conduct may have violated the MCPA, nor could it have encouraged settlement of claims which Defendants did not know could be raised. Plaintiffs have therefore failed to allege that they submitted a timely demand for relief.

Accordingly, Plaintiffs' motion will be denied as to claims arising under the MCPA as futile.

8. Unjust enrichment (Count XIII)

Finally, Defendants argue that Plaintiffs cannot maintain unjust enrichment claims alongside their warranty claims. (ECF No. 19 at 21-22.)

It is true that the relevant states' laws do not permit recovery on an unjust enrichment theory when a valid contract governs the subject matter of the parties' dispute. *See* *Progeny Ventures, Inc. v. W. Union Fin. Servs., Inc., 752 F. Supp. 2d 1127, 1135 (C.D. Cal. 2010)* ("As a matter **[*322]** of [California] law, an unjust enrichment claim does not lie where the parties have an enforceable express contract."); **[**41]** *Tomasella v. Nestlé USA, Inc., 364 F. Supp. 3d 26, 37 (D. Mass. 2019)* ("[A] plaintiff who has an adequate remedy at law cannot maintain a parallel claim for unjust enrichment."); *Banner Iron Works, Inc. v. Amax Zinc Co., 621 F.2d 883, 889 (8th Cir. 1980)* (finding of a valid contract precludes recovery on a quantum meruit theory under Missouri law); *Clapp v. Goffstown Sch. Dist., 159 N.H. 206, 977 A.2d 1021, 1025 (N.H. 2009)* ("It is a well-established principle that the court ordinarily cannot allow recovery under a theory of unjust enrichment where there is a valid, express contract covering the subject matter at hand."); *Wireless Communs., Inc. v. Epicor Software Corp., No. 3:10CV556-DSC, 2011 U.S. Dist. LEXIS 2633, 2011 WL 90238, at *7 (W.D.N.C. Jan. 11, 2011)* ("If there is a contract between the parties, the contract governs the claim and the law will not imply a contract [under a theory of unjust enrichment].").

However, at this early stage of the litigation, Plaintiffs are permitted to pursue their unjust enrichment claims in the alternative. *Fed. R. Civ. P. 8(d)(2)* ("A party may set out 2 or more statements of a claim or defense alternatively or hypothetically, either in a single count or defense or in separate ones."). "The fact that a plaintiff cannot simultaneously recover damages for both breach of an express contract and unjust enrichment does not preclude that plaintiff from pleading both theories in her complaint." *Owen v. GMC, No. 06-4067-CV-CNKL, 2006 U.S. Dist. LEXIS 70466, 2006 WL 2808632, at *2 (W.D. Mo. Sept. 28, 2006)*; *see, e.g.*, *Dorney v. Pindrop Sec., Inc., No. 15-CV-11505-ADB, 2015 U.S. Dist. LEXIS 129312, 2015 WL 5680333, at *6 (D. Mass. Sept. 25, 2015)* ("[T]he existence of statutory and contractual claims does not necessitate the dismissal of [plaintiff's] equitable quantum **[**42]** meruit/unjust enrichment claim."); *Performance Sales & Mktg., LLC v. Lowe's Cos., No. 5:07CV140, 2010 U.S. Dist. LEXIS 55522, 2010 WL 2294323, at *5 (W.D.N.C. June 4, 2010)* ("Until the existence of an express contract is proven, [a plaintiff] is allowed to plead quantum meruit and unjust enrichment as alternative theories of recovery.").

Plaintiffs' motion will therefore be granted for these claims.

CONCLUSION

The Court here concludes that its March 17, 2021, Order dismissing Plaintiffs' First Amended Complaint without prejudice was not a final judgment or order and was instead interlocutory. Therefore, the Court will instruct the Clerk to reinstate the case and need not vacate the former Order. The Court further concludes that Plaintiffs' proposed Second Amended Complaint does allege an injury in fact and cures the defect that led the Court to dismiss the First Amended Complaint. Plaintiffs' motion to amend their complaint would survive a motion to dismiss and is not futile, with the exception of their claims for Breach of a Written Warranty under the MMWA (Count I); for Negligent

---

respond to the demand letter and settle the suit. Thus, the purposes of the demand requirement, including to encourage settlement and limit damages, are not served by allowing Plaintiffs to reassert their MCPA claims in their PSAC.

Misrepresentation brought by Plaintiffs Morrison, Hawes, and Chiaraluce, and the California, Missouri, New Hampshire, and North Carolina classes (Count IV); and for violations of the MCPA (Count XI). Finally, the Court concludes that the following **[**43]** Order advances the Court's interests in judicial economy, efficiency, and disposing with cases on their merits.

For the reasons stated herein, the Court enters the following:

ORDER

IT IS THEREFORE ORDERED that the Clerk of the United States District Court for the Middle District of North Carolina shall reinstate the case.

[*323] **IT IS FURTHER ORDERED** that Plaintiffs' Motion to Amend First Amended Complaint, (ECF No. 36), is GRANTED in part and DENIED in part as follows: Plaintiffs' motion to amend is DENIED as to any claim for breach of a written warranty under the MMWA (Count I); any negligent misrepresentation claims brought by Plaintiffs Morrison, Hawes, and Chiaraluce, and the California, Missouri, New Hampshire, and North Carolina classes (Count IV); and any claims arising under the MCPA (Count XI). Plaintiffs' motion will be GRANTED as to all other claims.

This, the 27th day of January 2022.

/s/ Loretta C. Biggs.

LexisNexis® Headnotes

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Evidence > Burdens of Proof > Allocation

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN1[] **Standing, Burdens of Proof**

A plaintiff bears the burden of establishing standing as of the time suit was brought. The constitutional requirement of standing is three-pronged: the plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision. The same requirements apply to an entity seeking to establish associational standing, which is derivative of the standing of the association's members, requiring that they have standing and that the interests the association seeks to protect be germane to its purpose.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Evidence > Burdens of Proof > Allocation

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] Judges, Discretionary Powers

A movant seeking a preliminary injunction must establish (1) a substantial likelihood that the movant will prevail on the merits; (2) a substantial threat the movant will suffer irreparable injury if the injunction is not granted; (3) that the threatened injury to the movant if the injunction is denied outweighs the potential harm to the non-movant if the injunction is granted; and (4) that granting the injunction will not disserve the public interest. A preliminary injunction is an extraordinary remedy which courts grant only if the movant has clearly carried the burden as to all four elements. A preliminary injunction may only be awarded upon a clear showing that the movant is entitled to such relief, and is never awarded as a matter of right but only within the sound discretion of the district court. Ultimately, granting a preliminary injunction is the exception rather than the rule.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

HN3[] Grounds for Injunctions, Irreparable Harm

An irreparable injury is one that cannot be undone by monetary damages or one for which monetary damages would be especially difficult to calculate. There is no irreparable injury where harm is financial and monetary compensation will make plaintiff whole if plaintiff prevailed. Thus, the possibility that adequate compensatory or other corrective relief will be available at a later date, in the ordinary course of litigation, weighs heavily against a claim of irreparable harm. A plaintiff, therefore, must allege harm that cannot be obviated by monetary relief. A party sufficiently proves that monetary damages are not adequate when it brings forward evidence, in the form of affidavits, declarations, or any other support, that shows imminent harm that is difficult to quantify.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

HN4[] Grounds for Injunctions, Irreparable Harm

Exceptional economic harm may constitute irreparable injury where the existence of the business will likely cease, where bankruptcy is imminent, or where the plaintiff is unable to fund ongoing litigation.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN5[] Subject Matter Jurisdiction, Jurisdiction Over Actions

Fed. R. Civ. P. 12(b)(1) permits a party to challenge a court's subject-matter jurisdiction. A claim is properly dismissed for lack of subject-matter jurisdiction when the court lacks the statutory authority or constitutional power to adjudicate the claim. The party asserting jurisdiction bears the burden of proving that subject-matter jurisdiction exists. Lack of subject matter jurisdiction may be found in any one of three instances: (1) the complaint alone; (2) the complaint supplemented by undisputed facts evidenced in the record; or (3) the complaint supplemented by undisputed facts plus the court's resolution of disputed facts. A motion to dismiss for lack of subject-matter jurisdiction should be granted only if it appears certain that the plaintiff cannot prove any set of facts in support of his claims entitling him to relief.

Civil Procedure > ... > Voluntary Dismissals > Court Order > Dismissal With Prejudice

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN6[] **Court Order, Dismissal With Prejudice**

If the court determines at any time that it lacks subject-matter jurisdiction, the court must dismiss the action. *Fed. R. Civ. P. 12(h)(3)*. And, if a court dismisses pursuant to *Fed. R. Civ. P. 12(b)(1)*, it must do so without prejudice.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Sherman Act, Claims**

A plaintiff bears the burden of proving that a court has subject-matter jurisdiction to hear an antitrust claim. As an antitrust claimant, a plaintiff has the burden of establishing that the alleged proscribed practices affect interstate commerce. Jurisdiction may not be invoked under the Sherman Act unless the relevant aspect of interstate commerce is identified; it is not sufficient merely to rely on identification of a relevant local activity and to presume an interrelationship with some unspecified aspect of interstate commerce. To establish jurisdiction a plaintiff must allege the critical relationship in the pleadings. A complaint alleging a Sherman Act claim must allege some nexus between the defendants' conduct and interstate commerce. A plaintiff need not quantify the adverse impact of a defendant's alleged unlawful conduct, but merely show that there was some effect on interstate commerce. Even when business activities are purely local, if it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.

Constitutional Law > ... > Commerce Clause > Interstate Commerce > Prohibition of Commerce

Constitutional Law > ... > Commerce Clause > Interstate Commerce > Tests

HN8[] **Interstate Commerce, Prohibition of Commerce**

If thee allegations of defendant's interstate commerce are controverted the plaintiff must proceed to demonstrate by submission of evidence beyond the pleadings either that the defendants' activity is itself in interstate commerce or, if it is local in nature, that it has an effect on some other appreciable activity demonstrably in interstate commerce.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] **Standing, Requirements**

Tourism can be sufficient to establish an interstate commerce nexus for purposes of an antitrust claim.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN10[] **Amendment of Pleadings, Leave of Court**

Fed. R. Civ. P. 15 allows a court to grant leave to amend when justice so requires. *Fed. R. Civ. P. 15(a)(2)*. The U.S. Court of Appeals for the Fifth Circuit has recognized that in view of the consequences of dismissal on the complaint alone, and the pull to decide cases on the merits rather than on the sufficiency of the pleadings, district courts often afford plaintiffs at least one opportunity to cure pleading deficiencies before dismissing a case, unless it is clear that the defects are incurable or the plaintiffs advise the court that they are unwilling or unable to amend in a manner that will avoid dismissal.

Judges: BARRY W. ASHE, UNITED STATES DISTRICT JUDGE.

Opinion by: BARRY W. ASHE

Opinion

ORDER & REASONS

Before the Court are two motions. The first is an amended motion for preliminary injunction filed by plaintiff Association of Cemetery Tour Guides and Companies L3C d/b/a New Orleans Association of Cemetery Tour Guides and Companies ("ACTGC").[1] Defendant New Orleans Archdiocesan Cemeteries d/b/a New Orleans Catholic Cemeteries ("NOAC") responds in opposition.[2] ACTGC replies.[3] The second is a motion to dismiss pursuant to *Rule 12(b)(1) of the Federal Rules of Civil Procedure* filed by NOAC.[4] ACTGC responds in opposition.[5] NOAC replies.[6] The Court conducted a hearing on the motions on January 6, 2022.[7] ACTGC filed a post-hearing brief.[8] Having considered the parties' memoranda, the argument and representations made at the hearing, the record, and the applicable law, the Court issues this Order & Reasons.

I. BACKGROUND

This case concerns two of New Orleans' most storied cemeteries: St. Louis Cemetery Nos. 1 and 2 (individually, "No. 1" or "No. 2"; together, "Nos. 1 and 2").[9] Situated near the French Quarter, these final resting places of "the famous and forgotten" **[*2]** allegedly attract hundreds of thousands of visitors each year.[10] In 2015, NOAC closed

[9] R. Doc. 16-2 at 2-3, 13.

No. 1 to all but "owning" families and visitors who were willing to pay a $20.00 fee.[11] Tour companies were also allowed entry conditioned upon payment of either $4,500.00 a year or $40.00 for each tour, with an additional dollar charge for each visitor on the tour, which would be remitted to NOAC.[12] In early 2020, however, due to the COVID-19 pandemic, NOAC closed both Nos. 1 and 2 to all but immediate family members of the interred.[13] As of November 2021, both cemeteries remained closed,[14] but the parties represented at the hearing that No. 1 was now open for tours.

At some point and through some process unknown to this Court, NOAC awarded a contract to CTN[15] to "manage tours in St. Louis Cemetery [No.] 1."[16] Afterwards, an email was circulated indicating that CTN would commence tours under new terms dictated by NOAC, including: (1) all tour narratives and routes must be approved by NOAC; (2) only tour guides from CTN are allowed to conduct tours; (3) local company tour guides may escort tour groups, but may not offer commentary; and (4) prices will **[*3]** be fixed at $25.00 for adults and $18.00 for tour wholesalers.[17] No evidence has been provided to the Court that CTN has ever conducted or is currently conducting these "exclusive" tours. Plaintiff ACTGC, an association of New Orleans cemetery tour guides and companies, alleges that its 67 members "stand to be excluded from visiting and providing their services in the public cemeteries Nos. 1 & 2 due to the recently announced business plan of defendants."[18] ACTGC says that "[n]either the general public nor [its] members care if NOAC wants to promote cemetery tour guides who willingly restrict their tours to the topics preferred by NOAC"; rather, ACTGC takes issue with "NOAC's attempt to exclude the general public, including tour guides unwilling to be controlled by NOAC, from public cemeteries" as a result of their alleged plan.[19]

This action was originally filed by now-terminated plaintiff Witches Brew Tours LLC ("WBT"),[20] which moved for a temporary restraining order ("TRO") and a preliminary injunction enjoining the implementation of the business plan of NOAC and CTN (together, "Defendants").[21] The Court denied WBT's motion for a TRO for failure to demonstrate irreparable injury.[22] Thereafter, **[*4]** ACTGC, an entity created only after WBT commenced this action,[23] replaced WBT as the sole plaintiff in the case.[24] ACTGC asserts five theories of liability against Defendants: (1) unlawful

price fixing, in violation of *15 U.S.C. § 1*;[25] (2) monopolization by means of unlawful market allocation or exclusion of competition, in violation of *15 U.S.C. § 2*;[26] (3) unlawful restraint of trade, in violation of *La. R.S. 51:122*;[27] (4) unfair and unreasonable monopoly, in violation of *La. R.S. 51:123*;[28] and (5) "unlawful exclusion of the general public from public religious cemeteries," in violation of general Louisiana cemetery law.[29]

II. PENDING MOTIONS

A. ACGTC's Motion for Preliminary Injunction

In its motion, ACGTC requests a preliminary injunction enjoining NOAC from "(a) granting CTN exclusive access to Nos. 1 and 2 for cemetery tours, (b) fixing the price of cemetery tours at NOAC cemeteries, (c) dictating the topics discussed during cemetery tours, and (d) continuing to unreasonably exclude the public from its public religious cemeteries."[30] "ACTGC and the general public will likely suffer irreparable injury and damages if NOAC and CTN commence their anticompetitive scheme," ACTGC asserts.[31] It argues that Defendants' exclusion **[*5]** of the nonpaying public and city-licensed tour guides violates 200 years of custom and the public's right to free and reasonable access to public cemeteries.[32] By keeping the cemeteries closed, "[ACGTC] continues to be deprived of access to Nos. 1 and 2 for tours and, therefore, a sizeable portion of [the] business income and livelihood of its licensed tour guides," it says.[33] Accordingly, ACGTC submits that, at this early stage in the litigation, NOAC should revert to its pre-pandemic plan of operation, enacted in 2015, wherein all relevant cemeteries were open, with NOAC receiving entry fees from touring companies bringing visitors into the cemeteries.[34]

In opposition, NOAC argues that ACGTC cannot prove the essential elements required for a preliminary injunction.[35] NOAC contends that, assuming ACGTC has standing and that the *Sherman Act*, as supplemented by the *Clayton Act*, applies, ACGTC cannot establish that NOAC has enacted an unreasonable restraint upon trade.[36]

---

[25] *Id.* at 4-5.

[26] *Id.* at 5-6. Claims for unlawful market allocation are typically brought under *15 U.S.C. § 1*. *See, e.g., United Biologics, LLC v. Allergy & Asthma Network/Mothers of Asthmatics, Inc, 2019 U.S. Dist. LEXIS 27778, 2019 WL 830967, at *3 (W.D. Tex. Feb. 21, 2019)*; *Impax Lab'ys, Inc. v. Fed. Trade Comm'n, 994 F.3d 484, 493 (5th Cir.)*, *cert. denied*, ***142 S. Ct. 712, 142 S. Ct. 712, 211 L. Ed. 2d 400 (2021)***.

[27] R. Doc. 10 at 6-7.

[28] *Id.* at 7-8.

[29] *Id.* at 8-9. The Court notes that in ACGTC's most recent supplemental briefing, it clarifies that, should an amended complaint be necessary, it intends to bring a possessory action to replace the fifth cause of action presently listed in the complaint. R. Doc. 37 at 6.

[30] R. Doc. 16-2 at 17. In its complaint, however, ACTGC says it seeks a preliminary injunction prohibiting NOAC from "(a) treating any of its religious cemeteries as privately owned cemeteries and (b) reopening any of its cemeteries to only a single or small group of cemetery tourism industry participants." R. Doc. 10 at 10.

[31] R. Doc. 16-2 at 17.

[32] *Id.* at 1, 17

[33] *Id.* at 21.

[34] *Id.* at 17-18.

[35] R. Doc. 18 at 2.

[36] *Id.* at 2.

In addition, it argues that ACGTC's price-fixing and market-allocation claims are not cognizable because (1) the Act contemplates an antitrust scheme between competitors, which NOAC and CTN are not; and (2) ACGTC has failed to define the relevant **[*6]** market.[37] As a result, argues NOAC, the Court does not have subject-matter jurisdiction over either the federal or state-law claims.[38] NOAC argues further that ACGTC fails to establish a likelihood of success on the merits for its state-law claims because its characterizations of No. 1 as public property that confers certain rights to the public and of Louisiana custom are without merit.[39]

In reply, ACGTC reiterates that all of NOAC's cemeteries are public and, as a result, Defendants cannot legally exclude the nonpaying public or city-licensed tour guides.[40] Further, it argues that an injunction would cause no harm to Defendants, would curtail most of the harm to ACGTC's members and the general public, and would allow ACGTC to remit funds to NOAC to help with its cemetery needs, such as preventing vandalism.[41]

B. NOAC's Motion to Dismiss

In its motion, NOAC argues that ACTGC has no standing to bring this action and, therefore, this Court lacks subject-matter jurisdiction over ACTGC's claims.[42] First, NOAC argues that because ACTGC was not in existence at the time the action was initiated, it cannot have suffered any injury in fact or any invasion of a legally protected interest sufficient **[*7]** to confer standing.[43] Second, NOAC contends that ACTGC has failed to establish federal jurisdiction pursuant to the *Sherman Act*, as supplemented by the *Clayton Act*, because ACTGC failed to demonstrate that (1) NOAC's alleged conduct substantially and directly affects interstate commerce; (2) the restraints in place are unreasonable; (3) the cemetery tours constitute the kind of market to which the *Sherman Act*, as supplemented by the *Clayton Act*, applies; or (4) NOAC's decisions have had anticompetitive effects harmful to consumers.[44] Accordingly, NOAC concludes that because the Court cannot exercise original jurisdiction over ACTGC's federal claims or supplemental jurisdiction over ACTGC's state-law claims, the suit must be dismissed.[45]

---

[37] *Id.* at 3-5.

[38] *Id.* at 5.

[39] *Id.* at 6-8, 11-12.

[40] R. Doc. 30 at 10.

[41] *Id.* at 6, 10.

[42] R. Doc. 17 at 1.

[43] R. Doc. 17-1 at 2-3. NOAC thus observes that this litigation was brought on November 5, 2021, and ACTGC filed its formation documents with the Louisiana Secretary of State on November 10, 2021. *Id.* at 3 (citing R. Doc. 17-2). So, NOAC raises the issue whether an entity that was created after an action was filed may have standing to sue as the sole plaintiff. This raises an additional issue whether the injuries of ACGTC's members are "fairly traceable." ***HN1***[] A plaintiff bears the burden of establishing standing as of the time suit was brought. *Carney v. Adams, 141 S. Ct. 493, 499, 208 L. Ed. 2d 305 (2020)* (citing *Lujan v. Defs. of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* (plaintiff bears the burden of proving standing), and *Friends of the Earth, Inc. v. Laidlaw Env't Servs. (TOC), Inc., 528 U.S. 167, 191, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)* (standing is assessed "at the time the action commences")). The constitutional requirement of standing is three-pronged: the plaintiff must have "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v. Robins, 578 U.S. 330, 338, 136 S. Ct. 1540, 194 L. Ed. 2d 635 (2016)* (citing *Lujan, 504 U.S. at 560-61*). The same requirements apply to an entity seeking to establish associational standing, which is "derivative of the standing of the association's members, requiring that they have standing and that the interests the association seeks to protect be germane to its purpose." *OCA-Greater Hous. v. Texas, 867 F.3d 604, 609-10 (5th Cir. 2017)*. It is unclear from the complaint whether the complained-of conduct is the 2020 cemetery closure or the alleged "anticompetitive scheme," and whether any allegedly resulting injury is fairly traceable to Defendants' conduct.

[44] R. Doc. 17-1 at 2, 2-5.

In opposition, ACTGC argues that it has sufficiently alleged standing.[46] ACTGC has associational standing, it contends, because it has brought this suit on behalf of its 67 members, even though it does not have standing on its own.[47] Further, ACTGC says that NOAC's attack on its statutory (*i.e.*, antitrust) standing is not jurisdictional, but instead an attack under *Rule 8 of the Federal Rules of Civil Procedure*.[48] It argues that it has asserted "uncontested facts" demonstrating Defendants' violation of ***antitrust law*** and, therefore, satisfies the **[*8]** statutory standing requirement.[49] Accordingly, argues ACTGC, the Court should deny NOAC's motion to dismiss or, in the alternative, grant ACTGC leave to amend its complaint to address any identified failings.[50]

In reply, NOAC argues that ACTGC has not established associational standing because it provides no support that an entity created after a complaint was filed and "solely for the purpose of soliciting clients for this litigation" can establish standing as of the time suit was first filed — especially when that entity replaced the sole plaintiff in the action.[51] And further, says NOAC, ACTGC has not established that the *Sherman Act*, as supplemented by the *Clayton Act*, applies because ACTGC avoided addressing the issue in its briefing altogether.[52]

III. LAW & ANALYSIS

A. Preliminary Injunction — no irreparable harm shown

HN2[] A movant seeking a preliminary injunction must establish (1) a substantial likelihood that the movant will prevail on the merits; (2) a substantial threat the movant will suffer irreparable injury if the injunction is not granted; (3) that the threatened injury to the movant if the injunction is denied outweighs the potential harm to the non-movant if the injunction is granted; and **[*9]** (4) that granting the injunction will not disserve the public interest. *Garcia v. Jones, 910 F.3d 188, 190 (5th Cir. 2018)*. "A preliminary injunction is an extraordinary remedy which courts grant only if the movant has clearly carried the burden as to all four elements." *Guy Carpenter & Co. v. Provenzale, 334 F.3d 459, 464 (5th Cir. 2003)*. A preliminary injunction "may only be awarded upon a clear showing that the [movant] is entitled to such relief," *Winter v. Nat. Res. Def. Council, Inc., 555 U.S. 7, 22, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*, and is never awarded as a matter of right but only within the sound discretion of the district court. *Munaf v. Geren, 553 U.S. 674, 689-90, 128 S. Ct. 2207, 171 L. Ed. 2d 1 (2008)*; *Miss. Power & Light Co. v. United Gas Pipe Line Co., 760 F.2d 618, 621 (5th Cir. 1985)*. Ultimately, granting a preliminary injunction is "the exception rather than the rule." *Miss. Power & Light Co., 760 F.2d at 621*.

ACGTC has not carried its burden to show irreparable injury because there is simply no evidence of irreparable harm in the record. ***HN3***[] "An irreparable injury is one that cannot be undone by monetary damages or one for which monetary damages would be especially difficult to calculate." *Heil Trailer Int'l Co. v. Kula, 542 F. App'x 329, 335 (5th Cir. 2013)* (footnotes and quotation omitted); *see also* *Bluefield Water Ass'n, Inc. v. City of Starkville, 577 F.3d 250, 253 (5th Cir. 2009)* (concluding that there is no irreparable injury where harm is financial and monetary

[51] R. Doc. 30 at 2-3 (emphasis omitted).

[52] *Id.* at 3.

compensation will make plaintiff whole if plaintiff prevailed). Thus, "'[t]he possibility that adequate compensatory or other corrective relief will be available at a later date, in the ordinary course of litigation, weighs heavily against a claim of irreparable **[*10]** harm.'" *Dennis Melancon, Inc. v. City of New Orleans, 703 F.3d 262, 279 (5th Cir. 2012)* (quoting *Morgan v. Fletcher, 518 F.2d 236, 240 (5th Cir. 1975)*) (alteration in original omitted). A plaintiff, therefore, must allege harm that cannot be obviated by monetary relief. *Id. at 279-80*. "A party sufficiently proves that monetary damages are not adequate when it brings forward evidence, in the form of affidavits, declarations, or any other support, that shows imminent harm that is difficult to quantify." *ADT, LLC v. Capital Connect, Inc., 145 F. Supp. 3d 671, 697 (N.D. Tex. 2015)*.

HN4[] While exceptional economic harm may constitute irreparable injury where the existence of the business will likely cease, *see* *Atwood Turnkey Drilling, Inc. v. Petroleo Brasileiro, S.A., 875 F.2d 1174, 1179 (5th Cir. 1989)*, where bankruptcy is imminent, *see* *Doran v. Salem Inn, Inc., 422 U.S. 922, 932, 95 S. Ct. 2561, 45 L. Ed. 2d 648 (1975)*, or where the plaintiff is unable to fund ongoing litigation, *see* *Milsen Co. v. Southland Corp., 454 F.2d 363, 367 (7th Cir. 1971)*, ACGTC failed to present credible evidence of any of these circumstances. As noted, the record is devoid of any evidence whatsoever. Even though ACGTC was put on notice that the Court would conduct a hearing on the motion for preliminary injunction, ACGTC still failed to put on evidence at the hearing. With no evidence of irreparable harm to consider, the Court cannot grant a preliminary injunction.[53]

The absence of evidence does not aid an amended complaint that is already unclear as to what harm ACGTC claims its members suffered. Regardless, ACGTC offers no explanation as to why monetary damages would **[*11]** be an insufficient remedy. It is true that ACGTC professes in its complaint that it is not seeking monetary damages,[54] but it is ACGTC's burden in seeking injunctive relief to come forward with evidence that monetary damages cannot remedy the harm suffered. *See* *Dennis Melancon, Inc., 703 F.3d at 279-80*. ACGTC has not done so. Because ACGTC has failed to establish irreparable harm, the Court need not analyze the remaining three requisites for a preliminary injunction.

Accordingly, the motion for a preliminary injunction is DENIED.

B. Dismissal under *Rule 12(b)(1)* - no nexus to interstate commerce shown

HN5[] *Rule 12(b)(1) of the Federal Rules of Civil Procedure* permits a party to challenge a court's subject-matter jurisdiction. "[A] claim is 'properly dismissed for lack of subject-matter jurisdiction when the court lacks the statutory authority or constitutional power to adjudicate' the claim." *Griener v. United States, 900 F.3d 700, 703 (5th Cir. 2018)* (quoting *In re FEMA Trailer Formaldehyde Prods. Liab. Litig., 668 F.3d 281, 286 (5th Cir. 2012)*). The party asserting jurisdiction bears the burden of proving that subject-matter jurisdiction exists. *Id.* "Lack of subject matter jurisdiction may be found in any one of three instances: (1) the complaint alone; (2) the complaint supplemented by undisputed facts evidenced in the record; or (3) the complaint supplemented by undisputed facts plus the court's resolution of disputed facts." *Ramming v. United States, 281 F.3d 158, 161 (5th Cir. 2001)*. "A motion **[*12]** to dismiss for lack of subject-matter jurisdiction should be granted only if it appears certain that the plaintiff cannot prove any set of facts in support of his claims entitling him to relief." *Sureshot Golf Ventures, Inc. v. Topgolf Int'l, Inc., 754 F. App'x 235, 235 (5th Cir. 2018)* (citing *Wagstaff v. U.S. Dep't of Educ., 509 F.3d 661, 663 (5th Cir. 2007)*).

HN6[] "If the court determines at any time that it lacks subject-matter jurisdiction, the court must dismiss the action." *Fed. R. Civ. P. 12(h)(3)*. And, if a court dismisses pursuant to *Rule 12(b)(1)*, it must do so without prejudice. *Cox, Cox, Filo, Camel & Wilson, L.L.C. v. Sasol N. Am., Inc., 544 F. App'x 455, 456-57 (5th Cir. 2013)* ("[T]o

---

[53] Not only did ACGTC fail to present evidence of irreparable harm, it also failed to explain how circumstances have changed since November 8, 2021, when this Court denied then-plaintiff WBT's motion for a TRO for want of irreparable harm. *See* R. Doc. 5.

[54] R. Doc. 10 at 1.

dismiss with prejudice under Rule 12(b)(1) is to disclaim jurisdiction and then exercise it. Our precedent does not sanction the practice ...."); *see also* OnPath Fed. Credit Union v. U.S. Dep't of Treasury, Cmty. Dev. Fin. Institutions Fund, 2020 U.S. Dist. LEXIS 176166, 2020 WL 5749166, at *2 (E.D. La. Sept. 25, 2020).

Defendants contend that the Court has no original or supplemental jurisdiction over ACGTC's claims because ACGTC "has failed to adequately state in [its] complaint the substantial and direct effect on interstate commerce, as required to bring a federal antitrust claim, which permits supplemental jurisdiction for the State law claims."[55] **HN7**[] A plaintiff bears the burden of proving that a court has subject-matter jurisdiction to hear an antitrust claim. *See* Ancar v. Sara Plasma, Inc., 964 F.2d 465, 469 (5th Cir. 1992) ("As an antitrust claimant, [a plaintiff] has the burden of establishing that the alleged proscribed practices affect interstate commerce."). "[J]urisdiction may not be invoked under [the Sherman Act] unless **[*13]** the relevant aspect of interstate commerce is identified; it is not sufficient merely to rely on identification of a relevant local activity and to presume an interrelationship with some unspecified aspect of interstate commerce. To establish jurisdiction a plaintiff must allege the critical relationship in the pleadings ...." McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 242, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980); *see also* Gulf Coast Hotel-Motel Ass'n v. Miss. Gulf Coast Golf Course Ass'n, 658 F.3d 500, 504 (5th Cir. 2011) ("A complaint alleging a Sherman Act claim must allege some nexus between the defendants' conduct and interstate commerce."). A plaintiff need not quantify the adverse impact of a defendant's alleged unlawful conduct, but merely show that there was some effect on interstate commerce.[56] Gulf Coast, 658 F.3d at 505. "Even when business activities are purely local, if 'it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.'" Camps Newfound/Owatonna, Inc. v. Town of Harrison, 520 U.S. 564, 573, 117 S. Ct. 1590, 137 L. Ed. 2d 852 (1997) (quoting Heart of Atlanta Motel, Inc. v. United States, 379 U.S. 241, 258, 85 S. Ct. 348, 13 L. Ed. 2d 258 (1964)).

Defendants say that it is "unfathomable" that entry restrictions put in place at both Nos. 1 and 2 would either restrain trade in interstate commerce or have a substantial and direct effect on interstate commerce.[57] And ACGTC failed to brief the interstate commerce issue.[58] In response to the Court's questions at the January 6, 2022 hearing, however, ACGTC identified national and international tourism **[*14]** as the interstate commerce nexus. Yet, no evidence was presented in support of this assertion. **HN9**[] Tourism can be sufficient to establish an interstate commerce nexus for purposes of an antitrust claim. *See* Gibbs v. Babbitt, 214 F.3d 483, 492 (4th Cir. 2000) ("The relationship between red wolf takings and interstate commerce is quite direct — with no red wolves, there will be no red wolf related tourism, no scientific research, and no commercial trade in pelts."). For example, in *Gulf Coast Hotel-Motel Association*, the Fifth Circuit concluded that the economic activity of "bringing out-of-state tourists to hotels to play gulf" was sufficient to establish the jurisdictional nexus to interstate commerce required for an antitrust claim. Gulf Coast, 658 F.3d at 505. The case concerned two competing programs for the sale of golf vouchers to be used at certain courses across the Mississippi Gulf Coast. Id. at 502.

The Gulf Coast court observed that the allegations in the complaint were "sparse," yet held they were sufficient to survive a motion to dismiss. Id. at 506. It noted, with approval, that the complaint alleged the out-of-state tourist connection in three separate paragraphs, which stated: (1) that out-of-state tourists purchased the plaintiff hotel association's vouchers; (2) that out-of-state **[*15]** tourists purchased the defendant golf course association's vouchers; and (3) that out-of-state tourists played on the defendants' golf courses. Id. at 502-03, 507. But the court

---

[55] R. Doc. 17 at 1.

[56] **HN8**[] "[I]f these allegations are controverted [the plaintiff] must proceed to demonstrate by submission of evidence beyond the pleadings either that the defendants' activity is itself in interstate commerce or, if it is local in nature, that it has an effect on some other appreciable activity demonstrably in interstate commerce." McLain, 444 U.S. at 242 (citing Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 186, 202, 95 S. Ct. 392, 42 L. Ed. 2d 378 (1974)). Here, Defendants have controverted the claimed interstate commerce nexus. Yet, ACGTC did not present any evidence of the interstate commerce nexus at the hearing.

[57] R. Doc. 17-1 at 5.

[58] *See* R. Doc. 23.

noted, with disapproval, that "[t]he complaint also allege[d], without further elaboration, that the voucher program affects interstate commerce." *Id. at 503*. "[T]he allegations in this complaint that [the defendants'] anticompetitive acts 'substantially affected interstate commerce' are not sufficient on their own," the court reasoned, but, when read as a whole, the complaint proved sufficient. *Id. at 506*. Because the complaint alleged "that voucher customers 'are comprised of out-of-state persons visiting the Mississippi Gulf Coast,' that the golf courses at issue are used by out-of-state visitors and that [the plaintiff's] vouchers are sold through hotels and motels to patrons of those lodgings," it concluded that it was reasonable to infer "that money was sent across state lines, that tourists were attracted to the Mississippi Gulf Coast by the voucher program, and that if the alleged conspiracy [among the competing association and its golf course members to prevent consumers from using the plaintiff's program] were successful, consumers would **[*16]** not have the option of the [plaintiff's] voucher program." *Id. at 507*. Accordingly, the court held that the effect of the defendants' conduct on interstate commerce was sufficient to support antitrust jurisdiction. *Id. at 507*.

Unlike the complaint at issue in *Gulf Coast*, ACGTC's complaint falls short of establishing an interstate commerce nexus. In its complaint, ACGTC intones, again and again, that No. 1 "receives up to 90% of the cemetery tourism business in New Orleans and up to 500,000 visitors each year."[59] ACGTC also states that the New Orleans cemetery tour industry "generates millions of dollars of tourism income each year for hundreds of directly and indirectly participating individuals and businesses from local, national, and international tourists."[60] While these allegations, if proven, may establish that tourists from around the globe visit No. 1, they do not tie Defendants' conduct to interstate commerce. *See* *Gulf Coast, 658 F.3d at 504* (concluding that a complaint must allege the nexus between defendants' conduct and interstate commerce). Instead, ACGTC's complaint, even when read as a whole, falls prey to the deficiency the *Gulf Coast* court identified in pleading at too general a level the interstate commerce nexus and, then, failing to **[*17]** link it to Defendants' allegedly injurious conduct. *See* *id. at 507*. Thus, ACGTC's generalized references to tourism in the complaint are not sufficient on their own to establish the interstate commerce nexus, and, as a result, fail to support subject-matter jurisdiction. Therefore, Defendants' motion to dismiss is GRANTED, but ACGTC will be given an opportunity to file a second amended complaint to cure the noted pleading deficiencies.[61]

IV. CONCLUSION

Accordingly, for the foregoing reasons,

---

[59] R. Doc. 10 at 4, 5, 7, 8, 9.

[60] *Id.* at 2.

[61] In addition to the concerns discussed above, *supra* note 43, Defendants' motion to dismiss raises other questions the Court does not now answer but which ACGTC may want to address in its second amended complaint. Defendants contend that ACGTC has failed to establish antitrust standing. Standing to bring an antitrust claim requires a plaintiff to show: (1) "injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct"; (2) antitrust injury; and (3) "proper plaintiff status, which assures that other parties are not better situated to bring suit." *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. All., Inc., 123 F.3d 301, 305 (5th Cir. 1997)*. Antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful. The injury should reflect the anticompetitive **[*18]** effect either of the violation or of anticompetitive acts made possible by the violation." *Id.* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*). The "proper plaintiff" inquiry considers "(1) whether the plaintiff's injuries or their causal link to the defendant are speculative, (2) whether other parties have been more directly harmed, and (3) whether allowing this plaintiff to sue would risk multiple lawsuits, duplicative recoveries, or complex damage apportionment." *McCormack v. Nat'l Collegiate Athletic Ass'n, 845 F.2d 1338, 1341 (5th Cir. 1988)*. ACGTC should ensure that its second amended complaint satisfies the requisites for antitrust standing.

Defendants also argue that ACGTC has failed to allege key elements of its antitrust claims. For example, Defendants highlight ACGTC's failure to define the relevant product and geographic market. ACGTC should ensure that its second amended complaint addresses these additional concerns.

IT IS ORDERED that ACGTC's amended motion for preliminary injunction (R. Doc. 16) is DENIED for failure to establish irreparable harm.[62]

IT IS FURTHER ORDERED that Defendants' motion to dismiss for lack of jurisdiction (R. Doc. 17) is GRANTED. ACGTC has fifteen (15) days from the date of this Order & Reasons to file a second amended complaint to cure the pleading deficiencies in the amended complaint noted herein.[63]

New Orleans, Louisiana, this 27th day of January, 2022.

Opinion

ORDER DENYING DEFENDANTS' MOTION TO DISMISS

This case is before the Court on defendants' motion to dismiss, ECF No. 49, renewed at ECF No. 83. For the reasons stated below, the motions are DENIED.

I. FACTUAL BACKGROUND

This case arises from an alleged conspiracy between various companies and individuals who owned and operated outpatient medical facilities across the country. ECF No. 1 at ¶¶1-7. Count 1 alleges a conspiracy to allocate the market through an agreement not to solicit the senior employees of co-conspirators. *Id.* at ¶¶9-12. The agreement allegedly began as early as February 2012 and continued through July 2017. *Id.* at **[*3]** ¶9. The indictment explains how the agreement was reached (ECF No. 1 at ¶11(a)-(b)), enforced (¶11(c)-(f)), and followed (¶11(g)). Count 1 of the indictment alleges that "[t]he charged conspiracy consisted of a continuing agreement, understanding, and concert of action among DaVita, Thiry, and their co-conspirators, the substantial terms of which were that DaVita and [co-conspirator] SCA would allocate senior-level employees by not soliciting each other's senior level employees across the United States." ECF No. 1 at ¶10. Count 1 alleges that DaVita and its co-conspirators allegedly carried out the conspiracy by meeting to discuss the terms of the agreement (*id.* at ¶11(a)); instructing certain executives and employees to refrain from soliciting senior employees from co-conspirator companies (*id.* at ¶11(c)); monitoring compliance with the agreement by requiring senior employees to notify their current employer before seeking employment with a co-conspirator company (*id.* at ¶11(d)—(e)); taking steps to remedy any violations of the agreement (*id.* at ¶11(f)); and generally refraining from soliciting the senior employees of parties to the agreement (*id.* at ¶11(g)).

Count 2 makes substantially **[*4]** similar allegations, but as to all employees instead of just senior employees. Count 2 alleges a conspiracy to allocate the market through an agreement not to solicit *any* employees of the competitor companies. *Id.* at ¶¶17-18. This agreement allegedly began in April 2017 and continued until at least July 2019. *Id.* at ¶17. For Count 2, the government alleges that the co-conspirators carried out the conspiracy by meeting to discuss the terms of the agreement (*id.* at ¶19(a)); agreeing not to solicit the employees of co-conspirator companies and reassuring co-conspirator companies of the parties' commitment to the agreement (*id.* at ¶19(b), (c)); monitoring compliance with the agreement by requiring employees to notify their current employer before seeking employment with a co-conspirator company (*id.* at ¶19(d), (e)); and generally refraining from soliciting the employees of co-conspirator companies (*id.* at ¶19(f)).

The government filed a superseding indictment that added a third count. ECF No. 74. Count 3 alleges a conspiracy identical to Count 2 except that it was executed between DaVita and a different co-conspirator, Company C. *Id.* at ¶¶25-26. For Count 3, the government alleges that **[*5]** the co-conspirators carried out the conspiracy by meeting to discuss the terms of the agreement (*id.* at ¶27(a)); reaching an agreement and monitoring compliance, both internally and with the other co-conspirator (*id.* at ¶27(b)—(e)); requiring employees to notify their current employer before seeking employment with a co-conspirator company (*id.* at ¶27(f)); reporting violations of the agreement (*id.* at ¶27(g)); and generally refraining from soliciting the employees of co-conspirator companies (*id.* at ¶27(h)).[1]

---

[1] Defendants renewed their joint motion to dismiss in light of the superseding indictment. ECF No. 83. They stated that because the superseding indictment's allegations regarding Count 3 "are substantially the same as the allegations in support of Counts 1 and 2," therefore Count 3 "fails as a matter of law for the same reasons that Counts 1 and 2 fail." *Id.* at p. 2. This opinion will therefore cite primarily to the briefing regarding dismissal of the original indictment.

The grand jury indicted defendants on violations of *Section 1 of the Sherman Antitrust Act (15 U.S.C. § 1 (2004))*. Ultimately, defendants moved to dismiss for failure to state an offense under *Federal Rule of Criminal Procedure 12(b)(3)(B)(v)*. Oral argument was held on the motion on November 19, 2021.

II. STANDARD OF REVIEW

An indictment is tested "solely on the basis of the allegations made on its face, and such allegations are to be taken as true." *United States v. Qayyum, 451 F.3d 1214, 1218 (10th Cir. 2006)* (quoting *United States v. Reitmeyer, 356 F.3d 1313, 1316 (10th Cir.2004)*). "A court may always ask 'whether the allegations in the indictment, if true, are sufficient to establish a violation of the charged offence' and dismiss the indictment if its allegations fail that standard." *United States v. Pope, 613 F.3d 1255, 1260 (10th Cir. 2010)* (quoting *United States v. Todd, 446 F.3d 1062, 1068 (10th Cir.2006)*). An indictment "must be a plain, concise, and definite written statement of the essential facts constituting **[*6]** the offense charged." *Fed. R. Crim. P. 7(c)(1)*. When determining the sufficiency of an indictment, the question "is not whether the government has presented sufficient evidence to support the charge, but solely whether the allegations in the indictment, if true, are sufficient to establish a violation of the charged offense." *United States v. Todd, 446 F.3d 1062, 1068 (10th Cir. 2006)* (citations omitted).

III. LEGAL BACKGROUND

Violations of *Section 1* are analyzed under the rule of reason as a default. *United States v. eBay, Inc., 968 F. Supp. 2d 1030, 1037 (N.D. Cal. 2013)* (citing II Phillip E. Areeda, Herbert Hovenkamp, Roger D. Blair & Christine Piette Durrance, ***Antitrust Law***, ¶ 305e at 68 (3d ed. 2007)). A rule-of-reason analysis requires the court to examine "a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*.

However, courts have found that the complex analysis required by the rule of reason is unnecessary for certain classes of restraints on trade that are so "manifestly anticompetitive" and "lacking any redeeming virtue" that they will almost always be illegal. *See* *eBay, 968 F.3d at 1037*. Such classes of restraints, which include price fixing, bid rigging, and horizontally allocating a market, are deemed per se unreasonable **[*7]** restraints on trade in violation of the *Sherman Act*. *See* *Diaz v. Farley, 15 F. Supp. 2d 1138, 1144 (D. Utah 1998)*, aff'd, *215 F.3d 1175 (10th Cir. 2000)*. Only after "considerable experience with certain business relationships" will courts classify them as per se violations of the *Sherman Act*. *United States v. Topco Assocs., Inc., 405 U.S. 596, 607-08, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*.

Even an agreement that falls into a traditional per se category will not receive per se treatment under the *Sherman Act* unless it is a "naked" rather than "ancillary" agreement. *See* *eBay, 968 F.3d at 1037*. "Naked" restraints have "no purpose except stifling competition." *Topco, 405 U.S. at 608*. Naked restraints contrast with those that are "ancillary to a legitimate procompetitive business purpose." *eBay, 968 F.3d at 1039* (quoting *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*).

Horizontal market allocation agreements are traditionally subject to per se treatment under *Section 1 of the Sherman Act*. *Topco, 405 U.S. at 608* (holding that the Court has "reiterated time and time again" that naked horizontal market allocation agreements have no purpose but to stifle competition). A horizontal market allocation agreement is an agreement between competitors at the same level of the market structure to allocate a market order to minimize competition. *Id.* This can be accomplished by dividing geographic territory between competitors, *id.*, by "allocate[ing] or divid[ing] customers between competitors," *United States v. Kemp & Assocs., Inc., 907 F.3d 1264, 1273 (10th Cir. 2018)*, or by allocating or dividing an employment market. *See* *eBay, 968 F.3d at 1038-39*. There is less **[*8]** precedent on per se treatment of horizontal market allocation agreements allocating employment markets, but that makes no difference. Even if there were no such history, anticompetitive practices in the labor market are equally pernicious—and are treated the same—as anticompetitive practices in markets for goods and services. *See* [Roman v. Cessna Aircraft Co., 55 F.3d 542, 544 (10th Cir. 1995)] ("[P]laintiffs whose opportunities in the employment market have been impaired by an anticompetitive agreement directed at them as a particular segment of employees have suffered an antitrust injury."); *see also* [Mandeville Island Farms v. Am. Crystal Sugar Co., 334 U.S. 219, 236, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)] (The [Sherman Act] statute does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. . . . The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated." (internal citations omitted)).

IV. ANALYSIS

A. Defendants' Argument that the Indictment Did Not Allege a Horizontal Market Allocation Agreement.

Defendants' argued, in their motion to dismiss and at oral argument, that the practice alleged in the indictment was not a horizontal market allocation agreement but instead a non-solicitation agreement. While the question of whether a non-solicitation **[*9]** agreement can be a horizontal market allocation agreement as a legal matter will be dealt with later, as a preliminary matter, I want to address the argument that the indictment did not allege a horizontal market allocation agreement.

If the indictment failed to allege a naked horizontal market allocation agreement at all, as defendants assert, the indictment would have failed to state an offense. However, the indictment does allege that the non-solicitation agreement allocated the market. Though the indictment does not use the phrase "horizontal market allocation agreement," it does allege the agreement was one. The indictment alleges in Count 1 that the co-conspirators entered an "agreement, understanding, and concert of action" to "allocate senior-level employees by not soliciting each other's senior-level employees across the United States." ECF No. 1 at ¶10. The allegation for Counts 2 and 3 are substantially similar. ECF No. 1 at ¶18 ("The charged conspiracy consisted of a continuing agreement, understanding, and concert of action among [defendants] and their co-conspirators, the substantial terms of which were that DAVITA and Company B *would allocate employees* by Company B's **[*10]** not soliciting DAVITA's employees." (emphasis added)); ECF No. 74 at ¶26 ("The charged conspiracy consisted of a continuing agreement . . . that DAVITA and Company B *would allocate employees* . . . ." (emphasis added)). These are clear allegations, for both counts, that the agreement entered was a horizontal market allocation agreement carried out by non-solicitation.

B. Defendants' Factual Argument

Defendants' next make the factual argument that the indictment does not contain sufficient facts to support its allegation that the non-solicitation agreement was a tool used by defendants to allocate the market.

Count 1 of the indictment alleges that "the charged conspiracy consisted of a continuing agreement, understanding, and concert of action among DaVita, Thiry, and their co-conspirators, the substantial terms of which were that DaVita and Company B would allocate employees by Company B's not soliciting DaVita's employees." ECF No. 1 at 6. Count 1 alleges that the co-conspirators carried out the conspiracy by meeting to discuss the terms of the agreement (*id.* at ¶11(a)); instructing employees not to solicit senior employees from co-conspirator companies (*id.* at ¶11(c)); monitoring compliance **[*11]** with the agreement (*id.* at ¶11(d)—(e)); taking steps to address violations of the agreement (*id.* at ¶11(f)); and not soliciting senior employees of co-conspirator companies (*id.* at ¶11(g)).

For Count 2, the government alleged that the co-conspirators carried out the conspiracy by meeting to discuss the terms of the agreement (*id.* at ¶19(a)); agreeing not to solicit the employees of co-conspirator companies and assuring co-conspirators of their commitment to the agreement (*id.* at ¶19(b), (c)); monitoring compliance with the agreement (*id.* at ¶19(d), (e)); and not soliciting the employees of co-conspirator companies (*id.* at ¶19(f)). Count 3 makes similar factual claims. ECF No. 73 at ¶27.

The indictment also alleges facts indicating that the agreement imposed additional burdens and restrictions on the parties' and their employees beyond a simple prohibition on solicitation. They allege that the agreement also required employees to tell their employers if they intended on seeking a job from a co-conspirator. *Id.* at ¶11(e).

These allegations support the claim that this was an agreement to allocate the market. They outline the ways that the agreement made it difficult for employees to move **[*12]** between co-conspirator companies to the point where the market was allocated. They support the allegation that the purpose and effect of the agreement was to allocate the market. At this stage, the indictment need only establish that if the allegations are true, they show a violation of the charged offense. *Todd, 446 F.3d at 1068*. For purposes of this motion, I must take these allegations as true. If true, these allegations are sufficient to state a per se violation of *Section 1 of the Sherman Act*—the government has alleged that defendants allocated the market.

C. Defendants' Legal Arguments

Defendants present three legal arguments that, as a matter of law, the alleged agreements cannot be subject to per se treatment. However, before I proceed to those arguments, I want to clarify an issue that comes up in each of those arguments.

There are potentially three steps in determining whether per se treatment for charged conduct is appropriate. The preliminary step is to determine if the conduct falls into a category that has been found to be subject to per se treatment. *See eBay, 968 F.3d at 1037*. A second potential step, if the conduct does not fall into such a category, is the consideration by the court of whether the creation of a new category of per **[*13]** se unreasonableness covering the conduct is appropriate. *See Northrop Corporation v. McDonnell Douglas Corporation, 705 F.2d 1030, 1050 (9th Cir. 1983)*. If the conduct is found to be in a traditional per se category or the court determines creation of a new category of per se treatment is appropriate, the court will proceed to the final step: the consideration of whether the practice was naked or ancillary. The court still cannot subject the conduct to per se treatment until it finds that the conduct was naked, i.e. it had "no purpose except stifling competition." *Topco, 405 U.S. at 608*.

Many of defendants' arguments mistake the legal standards that apply to one step for the legal standards of another, which was the cause of much confusion in the briefing and at oral argument. The standards used to determine the propriety of creation of a new category of per se unreasonableness or to determine if conduct is a naked restraint simply do not apply when determining if that conduct falls into an existing category subject to per se treatment. With that understanding, I will proceed through defendants' legal arguments that per se treatment is inappropriate for the conduct in this case.

1. Some Non-Solicitation Agreements Can be Properly Categorized as Horizontal Market Allocation Agreements.

Defendant's **[*14]** first argument is that non-solicitation agreements are not subject to per se treatment because the precedent does not show that they are. They argue that there are no cases holding non-solicitation agreements illegal, aside from one readily distinguishable case. The government responds that the non-solicitation agreement in this case is a horizontal market allocation agreement, and that such agreements have long been per se unreasonable under *Section 1 of the Sherman Act*.

Violations of *Section 1* are analyzed under the rule of reason as a default. *eBay, Inc., 968 F. Supp. 2d at 1037* (citing II Phillip E. Areeda, Herbert Hovenkamp, Roger D. Blair & Christine Piette Durrance, ***Antitrust Law***, ¶ 305e at 68 (3d ed. 2007)). Horizontal market allocation agreements are traditionally subject to per se treatment under *Section 1 of the Sherman Act*, meaning they need not be subjected to a rule-of-reason analysis. *Id. at 608* (holding that the Court has held "time and time again" that naked horizontal market allocation agreements have no purpose but to stifle competition).

Defendants are right that there are no cases perfectly analogous to this case. But that is the nature of *Section 1 of the Sherman Act*: as violators use new methods to suppress competition by allocating the market or fixing prices these new methods **[*15]** will have to be prosecuted for a first time.

One case, however, is sufficiently analogous to inform my analysis of the current case. In *United States v. Cooperative Theatres of Ohio, Inc. 845 F.2d 1367 (6th Cir. 1988)*, the government alleged that defendants engaged in horizontal market allocation by agreeing not to solicit the customers of horizontal competitors. *Id. at 1371*. Defendants in that case were corporations that served as middlemen between movie production companies and movie theaters, for whom they found and booked movies to be shown in each theater. *Id. at 1368*. Specifically, the parties to the agreement agreed they "would not attempt to become the booking agent for any theatre that was already served by [the other]." *Id. at 1371* (internal quotations omitted). The district court found the agreement alleged was a horizontal market allocation agreement subject to per se treatment. *Id. at 1370*.

On appeal, the defendants argued that the district court erred in applying the per se rule to the agreement because the agreement only prevented the competitors from "actively soliciting" each other's customers. *Id. at 1371*. The defendants argued that this agreement was a "no-solicitation agreement," rather than a horizontal market allocation agreement, and that this type of restraint on trade had never been challenged **[*16]** before, so a per se rule was inappropriate. *Id.* They cited *TopCo* for the proposition that per se treatment is inappropriate until there is considerable experience with the challenged practice. *Id.* Defendants in this case have raised the same arguments.

The Sixth Circuit rejected these arguments. It affirmed the requisite two-part finding that the non-solicitation agreement was both a horizontal market allocation agreement and a naked restraint on trade. *Id. at 1372* (holding that the agreement was "plainly a form of customer allocation and, hence, is the type of 'naked restraint' which triggers application of the per se rule of illegality"). It further found that the non-solicitation agreement alleged was "undeniably a type of customer allocation scheme which courts have often condemned in the past as a per se violation of the *Sherman Act*." *Id.*

Defendants here argue that there are two significant differences between the current case and *Cooperative Theatres*. First, in *Cooperative Theatres* the agreement was to allocate customers, and here the alleged agreement was to allocate employees. Second, the *Cooperative Theatres* defendants failed to raise any potential pro-competitive justifications for the agreement, while here the defendants have raised several possible procompetitive **[*17]** justifications.

On the first point, defendants cite *Northrop Corporation v. McDonnell Douglas Corporation* for the proposition that "in determining whether a practice is per se illegal, courts must go further than determining the general type of practice at issue and examine the business context." ECF No. 72 at 6 (internal quotations omitted). However, the court in *Northrop* only proceeded to the issue of differing business contexts *after* it had concluded that the practice was not a horizontal market allocation agreement, i.e., only after it determined that the practice did not fall into any existing category subject to per se treatment. *Northrop 705 F.2d at 1050*. The question of business context is only relevant in determining whether a novel practice should be considered a *new* category subject to per se treatment. That is not necessary here. I found above that the government sufficiently alleged that this non-solicitation agreement falls under the umbrella of an existing category subject to per se treatment: horizontal market allocation agreement. Because the Court need not create a new per se category to find the indictment survives defendants' motion to dismiss, the difference in business contexts are irrelevant.

On the second potential difference, the ostensible procompetitive **[*18]** benefits alleged here do not change the analysis at this stage of litigation. Whether a practice has procompetitive aspects is only relevant in two circumstances. First, a court will consider the procompetitive elements of a practice when determining if a practice is a naked restraint on trade. *See Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1155 (9th Cir.2003)* (holding that "when a defendant advances plausible arguments that a practice enhances overall efficiency and makes markets more competitive," i.e. argues that the practice is ancillary rather than naked, "per se treatment is inappropriate, and the rule of reason applies"). Second, if a practice is deemed not to fall into a category that is traditionally subject to per se treatment, courts will consider the procompetitive qualities of that practice to determine if the practice should be its own, new category subject to per se treatment under *Section 1*. *See Northrop, 705 F.2d 1052* ("that a practice enhances overall efficiency and makes markets more competitive, per se treatment is inappropriate, and the rule of reason applies"); *see also United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 220-21, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* (holding that procompetitive justifications should not be considered when an alleged act falls into an existing per se category). The situation here does not fall into either of these **[*19]** categories. Here, defendants have chosen not to raise the argument that the agreement was ancillary to a procompetitive purpose in the instant motion, reserving their right to litigate that issue later. ECF No. 49 at n. 1. And I held above that this falls into the established category of horizontal market allocation; there is no need to determine if a new category subject to per se treatment should be created. This difference between *Cooperative Theatres* and this case is immaterial.

These two differences do not change the point made by the Sixth Circuit regarding non-solicitation agreements. The Sixth Circuit agreed that the district court had properly classified the non-solicitation agreement alleged as a horizontal market allocation agreement and therefore properly subjected it to per se treatment. *See* *Cooperative Theatres, 845 F.2d at 1372*. None of the differences between this case and *Cooperative Theatres* justify a departure from the outcome in *Cooperative Theatres*, at least for the purposes of this motion. *Cooperative Theatres* rebuts defendants' argument that non-solicitation agreements can never properly be subject to per se treatment.

Though *Cooperative Theatres* is the only case finding a pure non-solicitation agreement to be a potential violation of *Section 1*, it remains persuasive because of the unique nature of the *Sherman Act*—there **[*20]** will always have to be a first prosecution when there is a new method of allocating the market. *See* *Socony-Vacuum Oil Co., 310 U.S. at 223* (holding that, in the context of price fixing, "the machinery employed by a combination for price-fixing is immaterial"—the practice of price fixing remains subject to per se treatment even if carried out by an otherwise-lawful agreement with powerful procompetitive justifications). Even if there were *no* prior cases finding that a non-solicitation agreement had violated *Section 1*, that would not prevent me from finding that this non-solicitation agreement was sufficiently alleged to have allocated the market, and thus that per se treatment was appropriate.

However, other than the proposition that some non-solicitation agreements can be subject to per se treatment, it is of limited help in determining the outcome of this motion. The issue addressed by this order is whether *this* non-solicitation agreement has been sufficiently alleged to have allocated the market.

2. A New Category of Per Se Treatment Specific to Non-Solicitation Agreements is not Warranted.

Defendants' second argument in support of their contention that no non-solicitation agreements are per se unreasonable is that there is no precedent **[*21]** that would warrant this court finding that non-solicitation agreements should be made into a new category subject to per se treatment. ECF No. 49 at 10. I agree. For per se treatment to be warranted, a practice must be so "manifestly anticompetitive" and "lacking any redeeming virtue," that they will almost always be unreasonable. *See* *eBay, 968 F.3d at 1037*. It is only after considerable experience with certain business relationships that courts classify them as per se violations of the *Sherman Act*. *Topco Assocs., Inc., 405 U.S. at 607-08*.

There are no cases finding that non-solicitation agreements are so pernicious, in and of themselves, that they should be classified as per se unreasonable. The only case finding a pure non-solicitation agreement unreasonable, *Cooperative Theatres*, so found because the agreement fell under an existing category of per se treatment. *See* *Cooperative Theatres of Ohio, Inc., 845 F.2d at 1371*. The court did not find that the practice of entering non-solicitation agreements was pernicious. Rather, the problem was that the non-solicitation agreement in that case was a naked agreement to allocate the market. *Id. at 1371-73*. Even if non-solicitation agreements and no-hire agreements were to be lumped into the same category, a long judicial history is lacking. Those agreements have been held illegal where they are **[*22]** naked agreements to allocate the market. *See* *Kemp & Assocs., Inc., 907 F.3d at 1277*. Where they have been found not to allocate the market or to be ancillary, courts have not found no-hire agreements to be inherently anticompetitive. There is no long judicial experience that would justify creating a new category subject to per se treatment. However, as I have found above that the agreement at issue fell into an existing category of per se unreasonableness, this argument does not affect my disposition of the motion.

3. The Conflicting Precedent on Per Se Treatment of No-Hire Agreements.

Lastly, defendants argue that this non-solicitation agreement cannot be subject to per se treatment even if the specifics of the agreement make it a no-hire agreement. Defendants say this is because no-hire agreements have not conclusively been found subject to per se treatment themselves. However, this lack of uniformity on the per se unreasonableness for no-hire treatment makes perfect sense. Like non-solicitation agreements, no-hire agreements are not themselves so pernicious that they would almost always be unreasonable restraints on trade. But no-hire agreements that nakedly *allocate the market* are per se unreasonable because they would **[*23]** almost always be an unreasonable restraint on trade. Defendants are correct that no-hire agreements have not been made into their own category subject to per se treatment. However, those naked no-hire agreements that allocate the market have been considered per se unreasonable as horizontal market allocation agreements.

For example, in *Bogan v. Hodgkins* the Second Circuit held that the no-hire agreement, as alleged, was not a per se violation because it did not "fit into any of the established per se categories." *166 F.3d 509, 515 (2d. Cir. 1999)*. Though plaintiff alleged that the practice was a naked supplier allocation, the Second Circuit found that it was not—the record revealed no geographic or market allocation. *Id.* This no-hire agreement was not per se unreasonable because it was not a naked horizontal market allocation agreement.

On the other hand, where no-hire agreements have been found per se unreasonable, it has been because the court found that the agreement was (or was alleged to be, depending on the stage of litigation) a naked agreement to allocate the market. *See, e.g., eBay, 968 F.2d at 1039* (holding that the government adequately alleged that a no-hire agreement allocated the market and thus, if naked, would be subject **[*24]** to per se treatment); *United States v. Suntar Roofing, Inc., 897 F.2d 469, 473 (10th Cir. 1990)* (finding that the government had presented sufficient evidence at trial for a jury to find that defendants' no-hire agreement allocated the market). Defendants' argument that because not all no-hire agreements are per se unreasonable, therefore no no-hire agreement could ever be per se unreasonable does not correspond with the law.

D. A Legal Argument From the Government

There is one more legal argument I want to address. That argument is the government's apparent assertion that *all* non-solicitation agreements and *all* no-hire agreements are horizontal market allocation agreements and thus per se unreasonable. *See* ECF No. 67 at 6. I do not agree. As the precedents on no-hire agreement show, there are no-hire agreements that do not allocate the market, and I assume the same is true of non-solicitation agreements.

My conclusion regarding non-solicitation and no-hire agreements is much more limited than the government's argument. Here, the government has sufficiently alleged that defendants allocated the market with their non-solicitation agreement. It does not follow that every non-solicitation agreement or even every no-hire agreement would allocate the market and **[*25]** be subject to per se treatment. And as discussed in a prior section, my conclusion is also more limited than the defendants' argument on this point—I do not agree with defendants' contention that non-solicitation agreements are *never* properly subject to per se treatment as horizontal market allocation agreements. What I conclude is that if naked non-solicitation agreements or no-hire agreements allocate the market, they are per se unreasonable.

E. Defendants' Argument that Allowing this Case to Proceed Under a Per Se Theory Violates Their Due Process Rights

Defendants argue that application of a "per se rule to agreements like those alleged here for the first time would violate defendants' right to 'fair warning' under the *Due Process Clause*." ECF No. 49 at 14. Fair warning is the principle of due process that no person "shall be held criminally responsible for conduct which he could not reasonably understand to be proscribed."' *Bouie v. City of Columbia, 378 U.S. 347, 351, 84 S. Ct. 1697, 12 L. Ed. 2d 894 (1964)* (quoting *United States v. Harriss, 347 U.S. 612, 617, 74 S. Ct. 808, 98 L. Ed. 989 (1954)*). "Due process bars courts from applying a novel construction of a criminal statute to conduct that neither the statute nor any prior judicial decision has fairly disclosed to be within its scope." *United States v. Lanier, 520 U.S. 259, 266, 117 S. Ct. 1219, 137 L. Ed. 2d 432 (1997)*.

This decision makes no novel construction of *Section 1 of the Sherman Act*. Horizontal market **[*26]** allocation agreements have long been held per se unreasonable. *See Topco Assocs., Inc., 405 U.S. at 608*. Non-solicitation agreements are a method of allocating the market that have rarely, if ever, been prosecuted. However, as discussed at length above, the conduct proscribed by *Section 1* is allocating the market, an action that defendants knew or should have known was illegal. The fact that defendants allegedly allocated the market in a novel way—by using a non-solicitation agreement—does not matter. Defendants had ample notice that entering a naked agreement to allocate the market would expose them to criminal liability, however they did it.

One more due process issue I want to address is the question of what happens after I deny this motion. At oral argument there was some confusion about whether the denial of this motion was essentially a finding that these defendants were guilty without a trial. *See* ECF No. 90 at 13-14. This is not the case for two reasons.

First, defendants have limited this motion to the question of whether non-solicitation agreements fall into a category subject to per se treatment. However, even after a practice is found to fall into a category traditionally subject to per se treatment, per se unreasonableness **[*27]** will not be applied unless the practice is also found to be a naked agreement, an agreement whose main purpose was stifling competition. *Topco, 405 U.S. at 608*. Defendants chose not to raise this issue in this motion but could choose to challenge the government's allegations that this was a naked agreement to escape a per se designation.

Second, at trial, the government will not merely need to show that the defendants entered the non-solicitation agreement and what the terms of the agreement were. It will have to prove beyond a reasonable doubt that defendants entered into an agreement with the purpose of allocating the market for senior executives (Count 1) and other employees (Counts 2 and 3). This understanding of the trial is confirmed by *United States v. Socony-Vacuum Oil Co.*, a criminal price fixing case, where the Supreme Court agreed with the district court's decision to instruct the jury that per se liability for price fixing was appropriate, but the government had to prove that certain business practices were undertaken in order to fix prices. *See* *310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. The district court instructed the jury that it could only find defendants guilty "if you find that . . . the defendants and these other persons acting with them have knowingly engaged in **[*28]** a combination to raise or fix the price to be charged for gasoline to jobbers or consumers in the Mid-Western area as charged in the indictment." *United States v. Socony-Vacuum Oil Co., 105 F.2d 809, 832 (7th Cir. 1939)*, rev'd, *310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. Similarly, here, the government will have to prove more than that defendants had entered into a non-solicitation agreement—it will have to prove that the defendants intended to allocate the market as charged in the indictment. This order, holding that the case can proceed under a per se theory, will not deprive defendants of their right to a full and fair jury trial.

ORDER

For the reasons above defendants' motion to dismiss, ECF No. 49, renewed at ECF No. 83, is DENIED.

DATED this 28th day of January, 2022.

BY THE COURT:

/s/ R. Brooke Jackson

R. Brooke Jackson

Senior United States Senior District Judge

LexisNexis® Headnotes

Patent Law > Infringement Actions > Claim Interpretation > Fact & Law Issues

Patent Law > Infringement Actions > Claim Interpretation > Scope of Claim

HN1[] **Claim Interpretation, Fact & Law Issues**

Claim construction is a question of law, the purpose of which is to determine what is covered by the patent's claims. That process is geared toward elaborating the normally terse claim language in order to understand and explain, but not to change, the scope of the claims.

Patent Law > Infringement Actions > Claim Interpretation > Scope of Claim

HN2[] **Claim Interpretation, Scope of Claim**

When faced with an actual dispute regarding the proper scope of a patent claim, the court must construe the allegedly infringed claim to determine its meaning and scope. But the converse is also true: a trial court need not construe claim terms whose meaning the parties do not dispute. At any rate, although a court may have the authority to adopt claim constructions which have not been proposed by either party, it should be hesitant to do so.

Patent Law > Infringement Actions > Claim Interpretation > Fact & Law Issues

HN3[] Claim Interpretation, Fact & Law Issues

It is duty of trial court to inform jurors of claim construction rulings on disputed terms, When the parties raise an actual dispute regarding the proper scope of claims, the court, not the jury, must resolve that dispute.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Motions to Dismiss, Failure to State Claim

To survive a motion to dismiss under Fed. R. Civ. P. 12(b)(6), a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. That factual matter may be drawn from the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint. The complaint is to be construed liberally, and all reasonable inferences must be drawn in the plaintiff's favor. If the complaint and its additional materials—when viewed through that pro-plaintiff lens—are not enough to raise the plaintiff's right to relief on a claim above the speculative level, that claim must be dismissed.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Patent Law > Anticipation & Novelty > New Uses & Nonanalogous Art

HN5[] Inequitable Conduct, Anticompetitive Conduct

A patentee has the exclusive right to manufacture, use, and sell his invention. The purpose behind granting a patent is to incentivize invention, investment, and disclosure by granting a statutory right to exclude other competitors. By a patent's very nature, then, the commercial advantage gained by new technology and its statutory protection by patent do not convert the possessor thereof into a prohibited monopolist.

Antitrust & Trade Law > Sherman Act > Defenses

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN6[] **Sherman Act, Defenses**

There are at least two ways that a patent holder can run afoul of ***antitrust law***. For the first, in Walker Process, the Supreme Court held that a plaintiff could bring an action under § 2 of the Sherman Act based on the alleged maintenance and enforcement of a fraudulently obtained patent. The gist of a claim is that an unlawful patent should be stripped of its usual immunity from antitrust liability. Whether a patentholder deserves to lose out on its monopolistic immunity is a question to be answered only under Federal Circuit law. However, questions of ***antitrust law*** beyond the alleged patent fraud are decided under the law of each regional circuit.

Antitrust & Trade Law > Sherman Act > Claims

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN7[] **Sherman Act, Claims**

There are two global elements to a Walker Process claim: (1) that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and (2) all other elements of a Sherman Act monopolization claim are also met.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

HN8[] **Attempts to Monopolize, Elements**

For an attempted monopolization claim under § 2 of the Sherman Act, the elements are: (1) predatory or anticompetitive conduct; (2) informed by a specific intent to monopolize; with (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN9[] **Antitrust & Trade Law, Federal Trade Commission Act**

The Supreme Court held in Federal Trade Commission v. Actavis, Inc. that a patentholder may, in certain circumstances, be held liable for using the patent to unreasonably restrain trade.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] **Relevant Market, Geographic Market Definition**

One essential element of all antitrust claims is the existence of a relevant geographic and product market subjected to the defendant's anticompetitive conduct.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN11[] **Relevant Market, Product Market Definition**

To survive a motion to dismiss, a claimed product market must provide analysis of the interchangeability of use or the cross-elasticity of demand for products in the market while establishing a product market that strikes the court as plausible. Reasonable interchangeability of use or cross-elasticity of demand between the product itself and its substitutes determine the outer boundaries of a product market. (cleaned up).

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Relevant Market, Product Market Definition**

Generally, defining a market involves a deeply fact-intensive inquiry, so courts are wary of granting a motion to dismiss based on a failure to adequately plead the relevant market. Even so, a plaintiff's definition of the product market that fails to reference the rule of reasonable interchangeability and cross-elasticity of demand or else clearly does not encompass all interchangeable substitute products is legally insufficient and may be dismissed even at the pre-answer stage.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN13[] **Relevant Market, Product Market Definition**

Effectively, the rule of reasonable interchangeability means that a plaintiff's market definition must include all products reasonably interchangeable by consumers for the same purposes. The logic behind the rule is that the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN14[] **Relevant Market, Product Market Definition**

Although a plaintiff claiming an antitrust violation for medical products need not address every conceivable alternative to the products it claims make up the market, it must allege sufficient facts about other treatments to make its proposed product market plausible.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN15[] **Relevant Market, Product Market Definition**

The law is clear that an inventor of new technology does not violate the antitrust laws merely because its patented product is favored by consumers.

Torts > ... > Contracts > Intentional Interference > Elements

HN16[] **Intentional Interference, Elements**

Under New York law, a claim for tortious interference charges a plaintiff with proving five elements: (1) a valid contract between the plaintiff and a third party; (2) about which the defendant knew; (3) defendant's intentional procurement of the third-party's breach of the contract without justification; (4) the contract was actually breached; and (5) damages. In establishing that the defendant caused the contract's breach, the plaintiff must prove that but-for the defendant's intervention, the contract would have been performed.

Governments > Legislation > Statute of Limitations > Time Limitations

HN17[] **Statute of Limitations, Time Limitations**

The statute of limitations for tortious interference claims is three years. N.Y. C.P.L.R. § 214(4). The clock begins to tick once the claim becomes enforceable, or when all elements of the tort can be truthfully alleged in a complaint.

Evidence > Burdens of Proof > Allocation

Governments > Legislation > Statute of Limitations > Equitable Estoppel

HN18[] **Burdens of Proof, Allocation**

Even if the statute of limitations has long since run, though, a defendant may be equitably estopped from invoking it as a defense if the plaintiff was induced by fraud, misrepresentations, or deception to refrain from filing a timely action. But the plaintiff bears the burden of establishing that it brought the claim within a reasonable time after the deception has come to light.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Torts > ... > Statute of Limitations > Tolling > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN19[] **Tolling of Statute of Limitations, Fraudulent Concealment**

Unlike federal law, New York state law does not differentiate between doctrines of fraudulent concealment (equitable tolling) and equitable estoppel.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Estoppel

Contracts Law > ... > Affirmative Defenses > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Equitable Estoppel

HN20[] **Affirmative Defenses, Estoppel**

It is worth keeping in mind that equitable estoppel is not a general remedy to punish secretive wrongdoing, but a corrective measure aimed at preventing a defendant from reaping the benefits of deceiving a potential plaintiff to head off a lawsuit. In other words, equitable estoppel is only appropriate where the plaintiff is prevented from filing an action within the applicable statute of limitations due to defendants' misconduct toward the potential plaintiff, not a community at large. In addition, the equitable estoppel doctrine is not available to a plaintiff who possesses timely knowledge sufficient to place him or her under a duty to make and ascertain all the relevant facts prior to the expiration of the applicable statute of limitations.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Governments > Legislation > Statute of Limitations > Pleadings & Proof

HN21[] **Motions to Dismiss, Failure to State Claim**

A statute of limitations defense may only be granted on a Fed. R. Civ. P. 12 motion if it appears beyond doubt that the plaintiff can prove no set of facts in support of its claim which would entitle it to relief.

Governments > Legislation > Statute of Limitations > Time Limitations

HN22[] **Statute of Limitations, Time Limitations**

Under New York law, a claim asserted for the first time in an amended complaint relates back to the date of the initial complaint for the purposes of calculating the statute of limitations if the facts in the amended and initial complaints cover the same transaction or occurrence.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Estoppel

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Insurance Law > Claim, Contract & Practice Issues > Estoppel & Waiver > Equitable Estoppel

HN23[] **Affirmative Defenses, Estoppel**

Misconduct aimed at community at large cannot satisfy equitable estoppel.

Civil Procedure > ... > Entry of Judgments > Stays of Judgments > Multiple Claims & Parties

Evidence > Burdens of Proof > Allocation

Governments > Courts > Authority to Adjudicate

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Stay

HN24[] Stays of Judgments, Multiple Claims & Parties

The power to stay proceedings is incidental to the power inherent in every court to control the disposition of the cases on its docket with economy of time and effort for itself, for counsel, and for litigants. The party seeking the stay bears the burden of demonstrating that it is entitled to one.

Business & Corporate Compliance > ... > Patent Law > US Patent & Trademark Office Proceedings > Reexamination Proceedings

HN25[] US Patent & Trademark Office Proceedings, Reexamination Proceedings

When a stay request is instigated by a pending Patent & Trademark Office proceeding digging into the validity of patents at issue in the lawsuit, courts generally consider three factors: (1) whether a stay would unduly prejudice or present a clear tactical disadvantage to the non-moving party; (2) whether a stay will simplify the issues in question and trial of the case; and (3) whether discovery is complete and whether a trial date has been set. Those factors are not exclusive, and the inquiry embraces the totality of the circumstances.

Business & Corporate Compliance > ... > Patent Law > US Patent & Trademark Office Proceedings > Reexamination Proceedings

HN26[] US Patent & Trademark Office Proceedings, Reexamination Proceedings

As far as prejudice goes, courts typically consider an additional four sub-factors: (1) the timing of the review request; (2) the timing of the stay request; (3) the status of the external review; and (4) the relationship of the parties. However, when the parties are direct competitors, the stayed party is usually prejudiced.

Business & Corporate Compliance > ... > Patent Law > US Patent & Trademark Office Proceedings > Reexamination Proceedings

HN27[] US Patent & Trademark Office Proceedings, Reexamination Proceedings

Courts routinely find stays of multiple years to be long enough to result in prejudice to the non-moving party.

MEMORANDUM-DECISION and ORDER

I. INTRODUCTION

On June 19, 2020, pharmaceutical companies Novartis Pharma AG, Novartis Pharmaceuticals Corporation, and Novartis Technology LLC (together "Novartis") filed a complaint (the "'631 Patent case") in **[*33]** this district alleging patent infringement against rival Regeneron Pharmaceuticals, Inc. ("Regeneron"). Essentially, Novartis claims that it has a valid patent for syringes which come pre-filled with a certain medication used to treat degenerative eye disease. By extension, Novartis takes issue with Regeneron's introduction of a competing prefilled syringe—designed to treat the same disease—into the market notwithstanding its patent.

On July 17, 2020, Regeneron fired back with a complaint of its own, alleging four antitrust claims and an additional claim for tortious interference with a contract (the "Antitrust case"). In addition to Novartis, Regeneron also directed some of **[**3]** these claims at Vetter Pharma International GMHB, a pharmaceutical supply chain provider whose niche in the medical marketplace includes filling Novartis's—and formerly Regeneron's—syringes.

According to Regeneron, Vetter and Novartis conspired together to circumvent a binding contract giving Regeneron an ownership interest in any of Vetter's innovations. At the same time, Regeneron claims that Vetter and Novartis defrauded the Patent and Trademark Office ("PTO") to secure for Novartis a stranglehold on the market for prefilled syringes designed to treat degenerative eye disease.

There are three separate pending motions in these two cases. First, in the '631 Patent case, Novartis and Regeneron have submitted their opening claim construction briefs in advance of a potential hearing as contemplated by *Markman v. Westview Instruments, Inc., 517 U.S. 370, 116 S. Ct. 1384, 134 L. Ed. 2d 577 (1996)*. Second, in the Antitrust case, Novartis and Vetter have both moved to dismiss Regeneron's complaint against them in its entirety under *Federal Rule of Civil Procedure ("Rule") 12(b)(6)*. And third, in both cases, Regeneron has moved for a stay in proceedings while the PTO conducts an *inter partes* review of the validity of Novartis's patent. All three motions, having been fully briefed, will now be decided on the submissions and without oral argument. **[**4]**

II. BACKGROUND

At their core, these two cases are about three different drugs: EYLEA, made by Regeneron, and LUCENTIS and BEOVU, both made by Novartis.[1] *Regeneron Pharms., Inc. v. Novartis Pharma AG*, 1:21-CV-1066, Dkt. 87 ("Antitrust Compl."), ¶ 5. All three drugs are designed to inhibit the body's production of vascular endothelial growth factor ("VEGF"), a naturally occurring protein that erodes vision if overproduced, and in particularly extreme cases can cause blindness. *Id.* ¶¶ 5-6.

EYLEA, LUCENTIS, and BEOVU each need to be injected directly into the eye regularly to do their job as "anti-VEGF" agents. Antitrust Compl. ¶ 6. Traditionally, like most injectable liquids, EYLEA, LUCENTIS, and BEOVU were transported in vials. *Id.* The physician would then have to pierce the vial with a syringe, draw some of the drug out, and inject it into the patient's eye. *Id.*

A. Developing the Prefilled Syringe

According to Regeneron, though, it came up with a better idea. Regeneron claims that in 2005, it and Vetter began working together to develop a prefilled **[*34]** syringe ("PFS") that contained EYLEA. Antitrust Compl. ¶¶ 2, 152. The theory went that a prefilled syringe would remove the intermediate step **[**5]** of drawing out the drug, reducing the risk of contamination and making the process safer. *Id.* ¶¶ 76-81. As part of their collaboration, Vetter helped Regeneron by filling its syringes during the testing phase for the EYLEA PFS. *Id.* ¶ 152.

In addition to filling the EYLEA PFS systems, though, Regeneron alleges that it and Vetter also worked together to develop and commercialize the EYLEA PFS. Antitrust Compl. ¶ 152. That collaboration was carried out under an agreement styled the EYLEA PFS Development Agreement (the "Development Agreement"). *Id.*

According to Regeneron, by the terms of the Development Agreement, Regeneron could claim ownership rights to "any inventions, improvements, enhancements, or alike made during the Term [of the agreement] and conceived or reduced to practice or generated by Regeneron and/or Vetter" relating to an anti-VEGF delivered to Vetter by Regeneron. Antitrust Compl. ¶ 153. The Development Agreement apparently bore fruit, because the Australian government approved EYLEA FPS in 2012. *Id.* ¶ 154.

In the meantime, Regeneron alleges that Novartis and Vetter were also working together to produce a PFS. Antitrust Compl. ¶ 155. That collaboration was similarly successful, **[**6]** and Novartis and Vetter eventually produced LUCENTIS PFS. *Id.* ¶ 141. According to Regeneron, several Vetter employees made "significant contributions" along the way. *Id.* Regeneron further alleges that those significant contributions involved the same anti-VEGF drug from which EYLEA is made. *Id.* ¶ 143.

But Novartis and Vetter's joint efforts did not go off entirely without a hitch. Apparently, on February 27, 2013, Vetter sent Novartis a letter objecting to certain patent applications that Novartis had filed in Germany and Australia. Antitrust Compl. ¶ 142. At bottom, Vetter objected that Novartis claimed credit for inventions and improvements allegedly made by Vetter personnel. *Id.*

Novartis and Vetter met to discuss the matter, and apparently came to a final agreement signed by both parties by October 2, 2013 (the "2013 Amendment"). Antitrust Compl. ¶¶ 145-46. By the terms of that agreement, Novartis agreed that Vetter significantly contributed to developing its PFS patent family. *Id.* ¶ 146. It must be said, though, that the 2013 Amendment specifically excludes crediting Vetter with contributing to "any [i]nvention." *Id.*

On January 25, 2013, Novartis filed a patent for the LUCENTIS PFS **[**7]** ("the '631 Patent"). Antitrust Compl. ¶ 143. The '631 Patent relates back to Novartis's German patent, and apparently claims the same subject matter. *Id.* ¶ 144. What Regeneron claims the '631 Patent does not do, however, is credit any Vetter employee as an inventor.

---

[1] For the purposes of Novartis and Vetter's motions to dismiss under *Rule 12(b)(6)*, the Court takes the facts in Regeneron's complaint as true. The Court notes that in addition to the redacted First Amended Complaint on the docket, Regeneron has also filed a "clean" version of that document under seal. The Court has consulted the clean version where necessary but will cite to the official version.

Id. ¶ 147. To the extent any of them qualify, that poses a problem, because *35 U.S.C. § 116* requires that all inventors jointly file for a patent, unless a joint inventor refuses to join in the patent application or cannot be found.

The PTO issued the '631 Patent on December 29, 2015. Antitrust Compl. ¶ 147. Apparently, Novartis only planned on marketing LUCENTIS PFS outside the United States. *See Id.* ¶ 53. For the purposes of serving the United States ("U.S.") market, Novartis licensed the patent for the LUCENTIS PFS to a separate company, Genentech, Inc. ("Genentech"). *Id.* ¶¶ 53-54. Genentech then launched LUCENTIS PFS in the U.S. in early 2017. *Id.* ¶ 84. According to Regeneron, Novartis has a 33.3% ownership stake in Genentech's parent **[*35]** company, Roche. *Id.* And in any case, when BEOVU PFS—another anti-VEGF—is launched, Novartis appears to intend to market it in the U.S. *Id.* ¶ 2.

Summing up, according to Regeneron, Novartis got the jump on its efforts to market an anti-VEGF PFS. But **[**8]** in doing so, Novartis allegedly recruited Vetter's help. Regeneron claims that Novartis's overture towards Vetter violates its rights because any ideas by Vetter relating to EYLEA PSF were contractually Regeneron's property.

And because one of the drugs used in developing the LUCENTA PSF was functionally identical to EYLEA, Regeneron claims that Vetter's contributions to that patent qualified as relating to EYLEA PSF. From Regeneron's perspective, Novartis's exclusion of Vetter's assistance from the patent application was a calculated move to prevent the '631 Patent from becoming Regeneron's property by virtue of the Development Agreement. Antitrust Compl. ¶¶ 147-48.

B. Regeneron's Negotiations with Vetter

In the meantime, Regeneron claims that its experiences with Vetter took a sharp and downward turn once the 2013 Amendment was signed. According to Regeneron, in October 2013, the same month the agreement had taken effect, Vetter sent a sublicense demand to Regeneron. Antitrust Compl. ¶ 166. The letter claimed that the EYLEA PFS would be covered under Novartis's then-pending '631 Patent. *Id.* By extension, if Regeneron wanted to continue to try to market EYLEA PFS, it would have to agree to take out a sublicense **[**9]** from Vetter first. *Id.*

However, Vetter would only agree to offer a sublicense if Regeneron agreed to use Vetter exclusively to fill its EYLEA PFS products for the duration of the '631 Patent, a term of nearly twenty years. Antitrust Compl. ¶ 167. In addition, Vetter's proposed agreement required that Regeneron promise never to challenge the validity of the '631 Patent. *Id.* ¶ 170.

Previously, Vetter had filled EYLEA vials without any exclusivity requirement, so Regeneron claims that it was wary of the sudden pivot. Antitrust Compl. ¶ 167. On top of that, the lengthy duration of the exclusivity clause gave Regeneron pause. *Id.* Finally, Regeneron claims that it felt that Vetter and Novartis's agreement and general relationship with each other raised concerns on Regeneron's part that Vetter would prioritize Novartis's interests over its own. *Id.* ¶ 168.

For these reasons and more, Regeneron refused to sign the agreement. Antitrust Compl. ¶ 174. As a result, Vetter stopped filling EYLEA PFS. *Id.* ¶ 175. Regeneron then found a new supplier but claims that doing so required some alterations to EYLEA PFS's design and took a substantial toll on its time and resources. *Id.*

In 2017, Regeneron claims that it approached Vetter **[**10]** again to discuss working together. Antitrust Compl. ¶ 176. Vetter responded with the same offer it had extended in 2013. *Id.* Regeneron once again refused. *Id.*

C. Novartis's Patent Suit

Despite the '631 Patent, Regeneron released EYLEA PFS sometime around December of 2019. *Novartis Pharma AG v. Regeneron Pharms., Inc.*, 1:20-CV-690, Dkt. 70 ("Patent Compl."), ¶ 29.[2] From **[*36]** Novartis's perspective, that amounts to infringement, because the '631 Patent gives Novartis the exclusive right to market prefilled, sterilized syringes containing an anti-VEGF solution. *Id.* ¶ 15. And according to Novartis, the EYLEA PFS is precisely that. *Id.* ¶¶ 20-28 (describing attributes of EYLEA PFS that allegedly fall under terms of '631 Patent).

But based on Regeneron's version of events, there were some internal hoops Novartis needed to jump through before it could bring the infringement suit. Antitrust Compl. ¶ 186. Apparently, the 2013 Amendment contained a clause which gave Vetter the exclusive right to sublicense the '631 Patent. *Id.* ¶ 156. But on December 18, 2019—around the same time EYLEA PFS was hitting the market—the 2013 Amendment was itself amended (the "2019 Amendment"). *Id.* ¶ 186. By the terms of the new agreement, Novartis was given sole enforcement **[**11]** authority concerning the '631 Patent in exchange for a cut of all license income. *Id.*

On June 19, 2020, after the 2019 Amendment took effect, Novartis sued Regeneron for infringing the '631 Patent by marketing EYLEA PFS. *Novartis*, 1:20-CV-690, Dkt. 1. At the same time, Novartis filed a complaint with the United States International Trade Commission ("ITC") claiming infringement of the same patent. *Novartis*, 1:20-CV-690, Dkt. 27, p. 1.[3]

On July 28, 2020, Regeneron moved to stay Novartis's claim before this Court pending resolution of the ITC complaint. *Novartis*, 1:20-CV-690, Dkt. 27, p. 1. Novartis did not oppose, and the stay was granted on July 30, 2020. *Id.*

On April 8, 2021, Novartis voluntarily withdrew its ITC complaint to focus its efforts on this case. *Novartis*, 1:20-CV-690, Dkt. 38-1, pp. 3-6. The stay was then lifted on June 11, 2021. *Novartis*, 1:20-CV-690, Text Minute Entry Dated 6/11/2021.

D. <u>Regeneron's Antitrust Suit</u>

Regeneron was not sitting idle while Novartis's patent claim proceeded. On July 17, 2020, Regeneron filed the antitrust claim against both Novartis and Vetter. *Regeneron*, 1:21-CV-1066, Dkt. 1. Essentially, that complaint alleges that Novartis and Vetter conspired together to freeze Regeneron **[**12]** out of the market for anti-VEGF PFS products by forcing it into a long-term contract with Vetter and requiring it to respect the '631 Patent. *See generally id.*, *passim*. To make matters worse, Regeneron sees itself as the rightful owner of the '631 Patent based on the Development Agreement and accuses Novartis of arranging for Vetter's breach of that contract. In addition, Regeneron accuses Novartis of intentionally omitting information material to the '631 Patent relating to a prior art. Antitrust Compl. ¶¶ 219-22.

More specifically, Regeneron's complaint asserts five causes of action: (I) attempted monopolization through a scheme of patent fraud under *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)* for omitting prior arts in violation of *§ 2 of the Sherman Act*; (II) attempted monopolization in violation of *§ 2 of the Sherman Act* even without *Walker Process* fraud; (III) unreasonable restraint on trade in violation of *§ 1 of the Sherman Act*; (IV) attempted monopolization through *Walker Process* fraud for omitting the contributions of Vetter inventors in violation of *§ 2 of the Sherman Act*; and (V) tortious interference with a contract **[*37]** under New York state law.[4] Regeneron brings Count III against both Novartis and Vetter. For the remainder, Novartis alone is accused of wrongdoing.

---

[2] The Court refers to the complaint in the '631 Patent case solely to provide context to the parties' disputes. In no way will this complaint be relied upon in reaching a decision on the present motion practice, especially Novartis and Vetter's *Rule 12(b)(6)* motions.

[3] Pagination corresponds with CM/ECF.

[4] The parties do not dispute that Regeneron's tortious interference claim comes under New York law.

E. The Present Motion Practice

Once the stays were lifted at the conclusion **[**13]** of the ITC proceedings, both cases continued. On October 15, 2021, Novartis and Vetter each moved to dismiss Regeneron's First Amended Complaint—the current operative pleading in the Antitrust case—for failure to state a claim. *Regeneron*, 1:21-CV-1066, Dkts. 184; 186.

But on November 5, 2021, Regeneron moved to stay both the '631 Patent case and the Antitrust case. *Novartis*, 1:20-CV-690, Dkt. 98; *Regeneron*, 1:21-CV-1066, Dkt. 216. Apparently, on April 16, 2021, while the ITC complaint was still pending, Regeneron had asked the PTO for an *inter partes* review to declare the '631 Patent invalid. *Novartis*, 1:20-CV-690, Dkt. 98-4, p. 85; *Regeneron*, 1:21-CV-1066 Dkt. 216-4, p. 85. On October 26, 2021, the PTO agreed. *Novartis*, 1:20-CV-690, Dkt. 98-3, p. 1; *Regeneron*, 1:21-CV-1066 Dkt. 216-3, p. 1. Thus, Regeneron argues that both cases should be stayed until the PTO has an opportunity to determine whether the '631 Patent is valid.

Finally, on December 23, 2021, Novartis and Regeneron both filed their *Markman* briefs in the '631 Patent case. *Novartis*, 1:20-CV-690, Dkts. 103; 104. This decision now follows to resolve all three pending motions.

III. DISCUSSION

The first step in untangling the knot these cases have worked themselves into is deciding **[**14]** which thread to pull on first. To that end, the only dispute concerning the '631 Patent's claim construction is whether there is actually a dispute in the first place. There is little harm in reaching that simple question first before considering a stay that would leave that dispute unaddressed. After that, should Novartis and Vetter's motions to dismiss have merit, the Antitrust case could be dismissed in its entirety, which would obviously moot the question of staying that case. Accordingly, the Court will turn to the motion to dismiss second, and only reach the motion to stay after considering both other active motions.

A. Claim Construction

HN1[] "Claim construction is a question of law, the purpose of which is to determine what is covered by the patent's claims." *Verint Sys. Inc. v. Red Box Recorders Ltd., 166 F. Supp. 3d 364, 374 (S.D.N.Y. 2016)* (citing *Markman, 517 U.S. at 384*. That process is geared toward "elaborating the normally terse claim language in order to understand and explain, but not to change, the scope of the claims." *Verint Sys., 166 F. Supp. 3d at 374* (cleaned up) (citing *Embrex, Inc. v. Serv. Eng'g Corp., 216 F.3d 1343, 1347 (Fed. Cir. 2000)*).

HN2[] "When faced with 'an actual dispute regarding the proper scope' of a patent claim, the court must construe the allegedly infringed claim to determine its meaning and scope." *PPC Broadband, Inc. v. Corning Optical Commc'ns RF, LLC, 2014 U.S. Dist. LEXIS 119226, 2014 WL 4199244, at *2 (N.D.N.Y. Aug. 21, 2014)*. But the converse is also true: "a trial court need not construe claim terms **[**15]** whose meaning the parties do not dispute." *Holmberg v. United States, 124 Fed. Cl. 610, 613 (2016)*.

[*38] At any rate, although a court "may have the authority to adopt claim constructions which have not been proposed by either party[, it] should be hesitant to do so." *Holmberg, 124 Fed. Cl. at 613* (citing *Yoon Ja Kim v. ConAgra Foods, Inc., 465 F.3d 1312, 1319 (Fed. Cir. 2006)*).

As required under Local Patent Rule for the Northern District of New York ("Local Patent Rule") 4.4, both Regeneron and Novartis submitted a joint claim construction setting out their agreed definitions of the terms of the

'631 Patent.[5] *Novartis*, 1:20-CV-690, Dkt. 100. In that document, Novartis agreed with Regeneron's construction of all terms. *See generally id.*, *passim*.

But Novartis's apparent consent does not, it seems, resolve the issue of claim construction on its own. According to Regeneron, Novartis intends to sandbag it and the Court by making arguments at trial contrary to the terms upon which the parties agreed. Specifically, Regeneron claims that Novartis has not disavowed an intent to argue that a syringe is "terminally sterilized" only if it has been: (1) subjected to stability testing; and (2) protected from further contact after the sterilizing agent has been applied and stability testing conducted.

The problem, it seems, is that the proposed construction of **[**16]** "terminally sterilized" makes no mention of those two additional requirements. In Regeneron's opinion, the only solution is for the Court to take the further step of precluding Novartis from arguing that anything more is required for a syringe to be "terminally sterilized" than what is described in the proposed claim construction.

Regeneron is mistaken. After all, if the proposed construction would foreclose Novartis's argument, then the Court's adoption of that construction would give Regeneron the relief it is requesting without further tampering. On the other hand, the Court can think of only two possible reasons that adopting the proposed claim would *not* foreclose that line of argument.

First, it may be that the construction of the claim has nothing to do with Novartis's argument, in which case it would be an overreach for the Court to hamstring Novartis at the claim construction stage. Or second, it may be that Regeneron could have requested a more favorable construction of the claim and failed to do so. In that case, Regeneron is asking the Court to take the disfavored step of adopting a construction without a proposal simply to cover for its own tactical misstep. *Holmberg, 124 Fed. Cl. at 613* (holding that **[**17]** courts should be hesitant to adopt claim constructions not proposed by parties). Under none of those circumstances would the Court be moved to produce its own more restrictive version of the proposed claim construction as Regeneron requests.

Neither is the Court persuaded by Regeneron's argument that the Court is obliged to go looking for disputes that do not appear on the face of the *Markman* briefing. In support of that argument, Regeneron relies on *PPC Broadband, 2014 U.S. Dist. LEXIS 119226, 2014 WL 4199244* and *Defenshield, Inc. v. First Choice Armor & Equipment, Inc., 2013 U.S. Dist. LEXIS 134684, 2013 WL 5323752 (N.D.N.Y. Sept. 20, 2013)*.

[*39] Both of those cases refer to a court's obligation to resolve disputes in claim construction. *See PPC Broadband, 2014 U.S. Dist. LEXIS 119226, 2014 WL 4199244, at *2* (noting that court is obligated to resolve dispute in claim scope to prevent parties from impermissibly arguing claim construction to jury); *Defenshield, 2013 U.S. Dist. LEXIS 134684, 2013 WL 5323752, at *8-9* (deciding to construe claim despite potential for common meaning to prevent submitting claim construction question to jury).

HN3[] But the purpose for that obligation lies in making sure that the jury isn't tasked with trying to sort out the definition of a claim when that should be up to the Court. *See Sulzer Textil A.G. v. Picanol N.V., 358 F.3d 1356, 1359 (Fed. Cir. 2004)* (explaining that it is duty of trial court to inform jurors of claim construction rulings on disputed terms); *see also O2 Micro Int'l Ltd. v. Beyond Innovation Tech. Co., Ltd., 521 F.3d 1351, 1360 (Fed. Cir. 2008)* ("When the parties raise an actual dispute regarding the proper scope of [ ] claims, the **[**18]** court, not the jury, must resolve that dispute.").

There is no danger of that in this case because the Court *is* construing the claim Regeneron argues to be disputed. In fact, the Court is construing it in precisely the manner that Regeneron requested. The jury will thus be instructed

[5] Both parties would also file short responsive claim construction briefs on January 24, 2022. *Novartis*, 1:20-CV-690, Dkts. 109; 111. In Regeneron's brief, it requested leave to file a reply brief in the event that Novartis filed a responsive brief, because Novartis's initial submission was decidedly barebones. However, because Novartis's responsive brief only dealt with Regeneron's arguments and continues to disavow any true dispute of the claim construction, permitting Regeneron to file a reply brief would be a waste of time and effort that this Court will not indulge.

on the '631 Patent's claims in accordance with Regeneron's proposed construction, and the Court need not—and will not—devise its own construction beyond what Regeneron requested. *See, e.g.*, *Holmberg, 124 Fed. Cl. at 613*. The Court thus adopts the proposed claim construction in its entirety and will not require a *Markman* hearing.

B. Novartis's Motion to Dismiss

Having settled the matter of claim construction, the Court turns to Novartis and Vetter's *Rule 12(b)(6)* motions to dismiss the Antitrust case. ***HN4***[] To survive a motion to dismiss under that Rule, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. That factual matter may be drawn from "the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint." *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*.

Importantly, "the complaint is to be construed liberally, and all reasonable inferences must be drawn in the **[**19]** plaintiff's favor." *Ginsburg v. City of Ithaca, 839 F. Supp. 2d 537, 540 (N.D.N.Y. 2012)* (citing *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*). If the complaint and its additional materials—when viewed through that pro-plaintiff lens—are not enough to raise the plaintiff's right to relief on a claim above the speculative level, that claim must be dismissed. *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

1. Antitrust Claims

HN5[] "A patentee has the exclusive right to manufacture, use, and sell his invention." *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 690 (2d Cir. 2009)* (citing *Zenith Radio Corp. v. Hazeltine Rsch., Inc., 395 U.S. 100, 135, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*). The purpose behind granting a patent is to incentivize "invention, investment, and disclosure" by granting a "statutory right to exclude" other competitors. *Abbott Labs. v. Brennan, 952 F.2d 1346, 1355 (Fed. Cir. 1991)*. By a patent's very nature, then, "[t]he commercial advantage gained by new technology and its statutory protection by patent do not convert the possessor thereof into a prohibited monopolist." *Id. at 1354*.

[*40] None of that is meant to say that a patent automatically forecloses liability for antitrust violations. ***HN6***[] Instead, there are at least two ways that a patent holder can run afoul of ***antitrust law***. For the first, "[i]n *Walker Process*, the Supreme Court held that a plaintiff could bring an action under *§ 2 of the Sherman Act* based on the alleged maintenance and enforcement of a fraudulently[ ] obtained patent." *TransWeb, LLC v. 3M Innovative Props. Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)* (citing *Walker Process, 382 U.S. at 173-74*).

The gist of a *Walker Process* claim is that an unlawful patent should be stripped of its usual immunity **[**20]** from antitrust liability. *See* *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998)*. Whether a patentholder deserves to lose out on its monopolistic immunity is a question to be answered only under Federal Circuit law. *See id.* However, questions of ***antitrust law*** beyond the alleged patent fraud are decided under the law of each regional circuit. *Id.*

HN7[] There are two global elements to a *Walker Process* claim: (1) "that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement;" and (2) all other elements of a *Sherman Act* monopolization claim are also met. *TransWeb, 812 F.3d at 1306*.

HN8[] For an attempted monopolization claim under *§ 2 of the Sherman Act*, like those that Regeneron brings against Novartis, the elements are: (1) predatory or anticompetitive conduct; (2) informed by a specific intent to monopolize; with (3) "a dangerous probability of achieving monopoly power." *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 651 (2d Cir. 2015)*.

HN9[] As for the second means of establishing an antitrust violation even with patent protections in play, the Supreme Court held in *Federal Trade Commission v. Actavis, Inc.* that a patentholder may, in certain circumstances, be held liable for using the patent to unreasonably restrain trade. *570 U.S. 136, 147, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

HN10[] In any case, though, one essential **[**21]** element of all antitrust claims is the existence of a relevant geographic and product market subjected to the defendant's anticompetitive conduct. *Xerox Corp. v. Media Scis. Int'l, Inc., 511 F. Supp. 2d 372, 383 (S.D.N.Y. 2007)*. Novartis, Vetter, and Regeneron all agree that the relevant geographic market in this case is the United States, so that first requirement is met.

But the parties are decidedly less in agreement when it comes to defining the relevant product market. *HN11*[] To survive a motion to dismiss, a claimed product market must provide "analysis of the interchangeability of use or the cross-elasticity of demand" for products in the market while establishing a product market that strikes the court as plausible. *Chapman v. N.Y. State Div. for Youth, 546 F.3d 230, 237 (2d Cir. 2008)* (citation omitted). Reasonable interchangeability of use or cross-elasticity of demand between the product itself and its substitutes determine "the outer boundaries of a product market." *Id.* (cleaned up).

HN12[] Generally, defining a market involves "a deeply fact-intensive inquiry," so courts are wary of granting a motion to dismiss based on a failure to adequately plead the relevant market. *Chapman, 546 F.3d at 238*. Even so, a plaintiff's definition of the product market that fails to reference the rule of reasonable interchangeability **[*41]** and cross-elasticity of demand or else clearly **[**22]** does not encompass all interchangeable substitute products is legally insufficient and may be dismissed even at the pre-answer stage. *Id.*

That marks the second reference to the rule of reasonable interchangeability, so this is a good time to define the term. *HN13*[] Effectively, the rule of reasonable interchangeability means that a plaintiff's market definition must include "all products reasonably interchangeable by consumers for the same purposes." *City of N.Y. v. Grp. Health Inc., 649 F.3d 151, 155 (2d Cir. 2011)* (internal citations and quotation marks omitted). The logic behind the rule is that "the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level." *Id.*

HN14[] Although a plaintiff claiming an antitrust violation for medical products need not address every conceivable alternative to the products it claims make up the market, "it must allege sufficient facts about other treatments to make its proposed product market plausible." *Bayer Schering Pharma AG v. Sandoz, Inc., 813 F. Supp. 2d 569, 578 (S.D.N.Y. 2011)* (citing *Rome Ambulatory Surgical Ctr., LLC v. Rome Mem'l Hosp. Inc., 349 F. Supp. 2d 389, 419 (N.D.N.Y. 2004)* (noting that "a court cannot accept the market boundaries offered by plaintiff without at least a theoretically rational explanation for excluding alternatives" (cleaned up))).

For Regeneron's part, it defines its proposed market as follows: "anti-VEGFs in prefilled **[**23]** syringes that are approved by the FDA for the treatment of certain ophthalmic diseases." Antitrust Compl. ¶ 191. Meanwhile, by the antitrust claim's own terms, the '631 Patent covers a PFS containing any anti-VEGFs. *Id.* ¶ 8.

In other words, the relevant market that Regeneron claims is identical to the protection afforded to Novartis by the '631 Patent. Strange as it may seem that the market should be limited to anti-VEGFs in a PFS when the same drug comes in a vial as well, Regeneron nevertheless tries to justify this more limited scope to the relevant market in three ways.

First, Regeneron argues that PFSs have performance-based advantages over their counterparts in vials because they are quicker, easier, and safer. Antitrust Compl. ¶¶ 196-97. Second, Regeneron also points out that manufacturing anti-VEGF vials requires different equipment than making a PFS. *Id.* ¶ 199. Third, Regeneron states that "a small, but significant, price increase in the PFS version would not cause physicians to substitute the vial version for PFS . . . ." *Id.* ¶ 200.

None of those three reasons plausibly justifies Regeneron's narrow market. From the outset, that there might be a difference in the equipment required to produce a PFS **[**24]** as opposed to a vial says nothing about whether a consumer would find a vial and PFS interchangeable. Antitrust Compl. ¶ 199; *see* Grp. Health Inc., 649 F.3d at 155 (explaining that inquiry into product market looks at interchangeability of products to consumer).

Additionally, Regeneron's other two bases for explaining away the interchangeability of vials and PFS packages fail because they would allow any patented product to be a unique market by itself. After all, most any patent will carry with it improvements to a product's efficacy. And that small boost in usefulness will often be valuable enough to merit some heightened costs. The resultant commercial advantage is a sacrifice that the law is willing to make to spur technical and technological advancement. Abbott Labs., 952 F.2d at 1355 **[*42]** (describing patent's right to exclude as incentive for innovation).

That commercial advantage evaporates if Regeneron's theory carries water. After all, if a patent allows its owner to exclude other firms from producing products covered by its terms, and an antitrust plaintiff can define a market so narrowly that the patent itself creates its own market, then plaintiffs could never fail to plead out an antitrust claim against a patent owner as long as they raised **[**25]** a colorable challenge to the patent's validity. In re DDAVP Direct, 585 F.3d at 690. In other words, if the Court accepts Regeneron's proposed market, then all patents would immediately confer complete monopoly power to the inventor.

The problem with that outcome is obvious as soon as Walker Process enters the equation. After all, if a plaintiff could simply limit the scope of the relevant product market to the scope of a patent, then each of the three elements of an attempted monopolization claim would be met as a matter of course. *See* New York ex rel. Schneiderman, 787 F.3d at 651. The patent would exclude other firms from participating in the market, which is the definition of anticompetitive conduct. *Id.* Similarly, the mere act of seeking the patent evinces a clear intent to monopolize because a patent is itself a lawful monopoly. *Id.* From there, the patent would not only establish a dangerous probability of monopoly power, but a certainty, because no other firm could compete with the patent holder. *Id.*

In short, defining the relevant product market as narrowly as Regeneron alleges would collapse the second prong of the Walker Process inquiry for every patented product. *See* TransWeb, 812 F.3d at 1306 (noting that Walker Process requires proof of patent fraud and every element of antitrust claim). By extension, every instance **[**26]** of patent fraud would give rise to an antitrust claim by definition. If that theory of an antitrust claim were viable, there would have been no need for the Supreme Court to carve out the Walker Process framework in the first place. Instead, it could simply have held that patent fraud is itself an antitrust violation.

HN15[] It did not. On the contrary, the law is clear that "an inventor of new technology [does not] violate the antitrust laws merely because its patented product is favored by consumers." Monsanto Co. v. McFarling, 302 F.3d 1291, 1298 (Fed. Cir. 2002). Accordingly, Regeneron has failed to meaningfully explain why anti-VEGF vials are not a reasonable substitute for an anti-VEGF PFS.

Of course, one can imagine a circumstance where the subject of a patent is so novel that there really is no fitting substitute, and the relevant product market would have to be constrained to the patented product. But Regeneron bore the burden of alleging that this case fits that bill. Chapman, 546 F.3d at 238 (noting that plaintiff has burden of establishing relevant product market). Instead of explaining why consumers would not be so free to choose between a vial or PFS delivery system for an anti-VEGF as to create a separate market, Regeneron merely explained that the PFS is, like all valuable **[**27]** patented products, at least marginally superior to the vial. Antitrust Compl. ¶¶ 196-200. That is not enough.[6]

[*43] By extension, Regeneron's proposed market fails. As a consequence, all four of Regeneron's antitrust claims must be dismissed. *See, e.g.,* Chapman, 546 F.3d at 238-39 (affirming motion to dismiss antitrust claims because

[6] Although the Court notes that Regeneron alleges that some 80% of anti-VEGF patients switched from vial to PFS once the latter option was introduced, that exodus at current price points does not suggest that if Novartis attempted to raise prices beyond a "small" discrepancy that those patients could not or would not simply switch back to their vials. Thus, Regeneron has still failed to allege that the availability of vials as an alternative would not constrain Novartis's ability to set prices as required to establish a product market. *See* Grp. Health, 649 F.3d at 155.

plaintiff's definition of relevant market was too narrow); *see also, e.g.,* *Bayer Schering, 813 F. Supp. 2d at 577-78* (dismissing antitrust claim for failure to plead sufficient facts to demonstrate unavailability of acceptable substitutes when pleadings did not foreclose possibility that two other drugs taken together could achieve same result as single drug plaintiff attempted to use to define market).

2. Tortious Interference with a Contract

However, disposing of Regeneron's antitrust claims says nothing about its state law claim for tortious interference with a contract. ***HN16***[] To that end, under New York law, a claim for tortious interference charges a plaintiff with proving five elements: (1) a valid contract between the plaintiff and a third party; (2) about which the defendant knew; (3) "defendant's intentional procurement of the third-party's breach of the contract without justification"; (4) the contract was actually breached; **[**28]** and (5) damages. *Rich v. Fox News Network, LLC, 939 F.3d 112, 126-27 (2d Cir. 2019)* (citing *Lama Holding Co. v. Smith Barney Inc., 88 N.Y.2d 413, 668 N.E.2d 1370, 1375, 646 N.Y.S.2d 76 (N.Y. 1996)*). In establishing that the defendant caused the contract's breach, the plaintiff must prove that but-for the defendant's intervention, the contract would have been performed. *Rich, 939 F.3d at 127*.

Novartis principally argues that Regeneron's tortious interference with a contract claim came only after the statute of limitations had run out. ***HN17***[] To that end, "the statute of limitations for tortious interference claims is three years." *Enzo Biochem, Inc. v. Amersham PLC, 981 F. Supp. 2d 217, 225 (S.D.N.Y. 2013)* (citing *N.Y. C.P.L.R. § 214(4)*). The clock begins to tick once the claim becomes enforceable, or "when all elements of the tort can be truthfully alleged in a complaint." *Enzo Biochem, 981 F. Supp. 2d at 225*.

HN18[] Even if the statute of limitations has long since run, though, a defendant may be equitably estopped from invoking it as a defense if the plaintiff was "induced by fraud, misrepresentations[,] or deception to refrain from filing a timely action."[7] *Weizmann Inst. of Sci. v. Neschis, 229 F. Supp. 2d 234, 252 (S.D.N.Y. 2002)* (citation omitted). But the plaintiff bears the burden of establishing that it brought the claim within a reasonable time after the deception has come to light. *Id.*

HN20[] Yet it is worth keeping in mind that equitable estoppel is not a general remedy to punish secretive wrongdoing, but a corrective measure aimed at preventing a defendant from reaping the benefits of deceiving **[**29]** a potential plaintiff to head off a lawsuit. *See* *Twersky v. Yeshiva Univ., 993 F. Supp. 2d 429, 442 (S.D.N.Y. 2014)*. In other words, equitable estoppel is only "appropriate where the plaintiff is prevented from filing an action within the applicable statute of limitations due to defendants' misconduct toward the potential plaintiff, not a community at large." *Id.* (internal citations and quotation marks omitted) (finding equitable estoppel unsupported **[*44]** where defendant made alleged misrepresentation to public, not specifically to plaintiff for purpose of preventing lawsuit).

In addition, "the equitable estoppel doctrine is not available to a plaintiff who possesses timely knowledge sufficient to place him or her under a duty to make and ascertain all the relevant facts prior to the expiration of the applicable statute of limitations." *Gonzales v. Nat'l Westminster Bank PLC, 847 F. Supp. 2d 567, 572 (S.D.N.Y. 2012)*.

HN21[] In any case, a statute of limitations defense may only be granted on a *Rule 12* motion if it "appears beyond doubt that the plaintiff can prove no set of facts in support of [its] claim which would entitle [it] to relief." *Ortiz v. Cornetta, 867 F.2d 146, 148 (2d Cir. 1989)* (citing *Abdul-Alim Amin v. Universal Life Ins. Co., 706 F.2d 638, 640 (5th Cir. 1983)*).

Although Regeneron provided a staunch defense for the timeliness of its antitrust claims, it spent not a single word defending its tortious interference claim. That oversight would justify dismissal **[**30]** on its own. *See* *In re Jumei Int'l Holding Ltd. Sec. Litig., 2017 U.S. Dist. LEXIS 3206, 2017 WL 95176, at *5 n.4 (S.D.N.Y. Jan. 10, 2017)* (noting

---

[7] ***HN19***[] "Unlike federal law, . . . New York state law does not differentiate between doctrines of fraudulent concealment (equitable tolling) and equitable estoppel." *In re Fischer, 308 B.R. 631, 656 (E.D.N.Y. 2004)*.

that arguments not addressed in opposition briefing are conceded). But in the alternative, even if the Court were to read Regeneron's arguments so broadly as to reach its tortious interference claims as well as its antitrust claims, those arguments would still fail.

It is clear that the breach that Regeneron complains of involved Novartis's persuading Vetter to violate the Development Agreement by helping it develop LUCENTIS PFS. Antitrust Compl. ¶¶ 285-91. The culminating act that Regeneron argues amounted to a breach of the Development Agreement was the omission of Vetter employees from the list of inventors for the '631 Patent. *Id.* ¶ 290. But the '631 Patent issued in December of 2015. *Id.* ¶ 147.

In other words, the statute of limitations would have run out on Regeneron's tortious interference claims no later than December of 2018. Even if the Court assumes that Regeneron's tortious interference with a contract claim relates back to its initial complaint, the first antitrust complaint was not filed until July 17, 2020.[8] *Regeneron*, 1:21-CV-1066, Dkt. 1. That claim appears to be plainly untimely.

But Regeneron would stave off that seeming inevitability. By its logic, Novartis and Vetter **[**31]** embarked on a pattern of fraudulent concealment[9] that kept their **[*45]** wrongdoing hidden until December of 2020, when Regeneron received discovery cluing it in on the terms of the 2013 Amendment. Regeneron's position is that Novartis should be equitably estopped from arguing that the statute of limitations bars Regeneron's tortious interference with a contract claim.

However, several of its allegations make equitable estoppel impossible. Taking its allegations as true, Novartis and Vetter sought to deceive the PTO and the market at large by concealing Vetter's inventorship. Antitrust Compl. ¶ 147. This alleged public deception, even if it was carried out exactly as Regeneron claims, was not tailored to prevent Regeneron from bringing a suit, but instead attempted to secure an advantageous patent for Novartis. In other words, the PTO and every other medical supply company were just as much the targets of Novartis's alleged deception as was Regeneron. *See id.* ***HN23***[] Because a public deception cannot justify equitable estoppel, Regeneron's claims are not timely and must be dismissed. *See Twersky, 993 F. Supp. 2d at 442* (explaining that misconduct aimed at community at large cannot satisfy equitable estoppel).

In addition, Regeneron's **[**32]** own allegations establish that it had notice sufficient to call for further investigation into whether it had a tortious interference claim as early as 2013. *See Gonzales, 847 F. Supp. 2d at 572* (explaining that equitable estoppel is not available when plaintiff had access to information requiring it to investigate further into claim).

Also, Regeneron alleges that in 2013 Vetter suddenly pivoted from a mutually productive relationship to a demand that Regeneron work exclusively with Vetter. Antitrust Compl. ¶¶ 167-68. Vetter's new terms were also so conspicuously protective of Novartis's new patent for an anti-VEGF PFS that Regeneron felt uncomfortable agreeing to them because it believed Vetter would be more interested in protecting Novartis's interests than Regeneron's. *Id.*

---

[8] ***HN22***[] Under New York law, a claim asserted for the first time in an amended complaint relates back to the date of the initial complaint for the purposes of calculating the statute of limitations if the facts in the amended and initial complaints cover the same "transaction or occurrence." *Smith v. Bank of N.Y. Mellon Corp., 2011 U.S. Dist. LEXIS 44018, 2011 WL 1642318, at *1 (S.D.N.Y. Apr. 25, 2011)*. Because the initial antitrust complaint also dealt with an alleged breach of the Development Agreement, Regeneron's tortious interference claims likely relate back to the filing of the initial antitrust complaint. However, since both complaints were filed well after 2018, the exercise of relating back is largely academic, so the Court will simply assume relation back for the purposes of the present motion practice.

[9] Because Regeneron exclusively defended the timeliness of its antitrust claims, it frames its arguments that the statute of limitations should be tolled as "fraudulent concealment" by Novartis and Vetter using the language employed in antitrust claims. *See Schenker AG v. Societe Air France, 102 F. Supp. 3d 418, 424 (E.D.N.Y. 2015)* (describing fraudulent concealment defense to statute of limitations in antitrust cases). For the purposes of the present hypothetical exercise the Court will assume that Regeneron also meant to argue for equitable estoppel under a theory of fraudulent concealment under state law.

But most damning of all, Regeneron alleges that Novartis should have known the rough outline of the Development Agreement between Regeneron and Vetter because similar agreements are so commonplace among pharmaceutical suppliers and developers when they work together to produce a drug. Antitrust Compl. ¶ 164. By the same logic, Regeneron should by its own allegations have drawn the inverse inference that Vetter and Novartis worked together on the **[**33]** LUCENTIS PFS given the apparent agreement between the two geared towards protecting Novartis's impending patent rights.

In other words, Regeneron cannot justify its own failure to dig into the details concerning Novartis and Vetter's relationship by clinging to common industry knowledge to support Novartis's awareness of the Development Agreement with one hand while pushing that knowledge away with the other once its own expected awareness gets put at issue.

Regeneron claims that one of the things that made it most suspicious of Vetter's renegotiated contract was its insistence on protecting the '631 Patent. Antitrust Compl. ¶ 170. And it also felt from the start that it could not trust that its needs would be prioritized given the apparently—and suddenly so—close relationship between Novartis and Vetter. *Id.* ¶ 168.

Regeneron knew as early as October of 2013 that Vetter had a sudden and powerful interest in protecting Novartis's '631 Patent and claims that similar collaborations on products often involve binding agreements. By extension, Regeneron had ample information to urge it to investigate further into Novartis and Vetter's relationship **[*46]** as early as 2013. It cannot now claim that Novartis and Vetter wrongfully **[**34]** deceived it when it failed to diligently ascertain whether it was harmed in the first place.

Regeneron's claim for tortious interference with a contract must, as a consequence, be dismissed as time-barred.[10] *See* Gonzales, 847 F. Supp. 2d at 572 (finding equitable estoppel unavailable at Rule 12(b)(6) stage where facts alleged in complaint put plaintiff unquestionably on notice that alleged wrongdoing was possible).

As a result, every claim in Regeneron's antitrust complaint must be dismissed. The only remaining question is whether that complaint's dismissal should be with prejudice or without. Because Regeneron is a counseled litigant that has already amended its complaint once, the Court sees no reason to grant it a third bite at the apple, especially when it has not even asked for one. *See, e.g.,* Marks v. Energy Materials Corp., 2015 U.S. Dist. LEXIS 75320, 2015 WL 3616973, at *10 (S.D.N.Y. June 9, 2015) (noting that dismissal with prejudice is appropriate where counseled plaintiff has already amended complaint once and failed to request leave to amend in response to motion to dismiss). Accordingly, the antitrust complaint must be dismissed with prejudice in its entirety.[11]

C. Regeneron's Motion to Stay

Finally, the Court turns to Regeneron's motion to stay the '631 Patent during the PTO's *inter partes* review of the '631 Patent's validity. ***HN24***[] On that score, "[t]he **[**35]** power to stay proceedings is incidental to the power inherent in every court to control the disposition of the cases on its docket with economy of time and effort for itself, for counsel, and for litigants." Rensselaer Polytechnic Inst. v. Apple Inc., 2014 U.S. Dist. LEXIS 5186, 2014 WL 201965, at *3 (N.D.N.Y. Jan. 15, 2014) (citing Landis v. N. Am., Co., 299 U.S. 248, 254, 57 S. Ct. 163, 81 L. Ed. 153 (1936)). The party seeking the stay bears the burden of demonstrating that it is entitled to one. Rensselaer Polytechnic Inst., 2014 U.S. Dist. LEXIS 5186, 2014 WL 201965, at *3.

---

[10] To whatever extent Regeneron intended to argue that the continuing violation doctrine would save the timeliness of its tortious interference claims, the Court notes that "[t]ortious interference with contract claims are not continuing torts, instead accruing when the defendant performs an action or inaction that constitutes interference." Tarazi v. Truehope Inc., 2017 U.S. Dist. LEXIS 120155, 2017 WL 5957665, at *19 (S.D.N.Y. July 28, 2017) (citation omitted). That theory thus cannot save Regeneron's tortious interference claims, either.

[11] By extension, Novartis's request for oral argument is denied as moot.

HN25[] When a stay request is instigated by a pending PTO proceeding digging into the validity of patents at issue in the lawsuit, courts generally consider three factors: "(1) whether a stay would unduly prejudice or present a clear tactical disadvantage to the non-moving party; (2) whether a stay will simplify the issues in question and trial of the case; and (3) whether discovery is complete and whether a trial date has been set." *Rensselaer Polytechnic Inst., 2014 U.S. Dist. LEXIS 5186, 2014 WL 201965, at *3* (citation omitted). Those factors are not exclusive, and the inquiry embraces the totality of the circumstances. *Id.*

Of those factors, there is some debate among lower courts as to which is the most important. *Compare, e.g., RetailMeNot, Inc. v. Honey Sci. LLC, 2020 U.S. Dist. LEXIS 11210, 2020 WL 373341, at *3 (D. Del. Jan. 23, 2020)* ("The most important factor bearing on whether to grant a stay is whether the stay is likely to simplify the issues at trial."); *British Telecommunications PLC v. IAC/InterActiveCorp, 2019 U.S. Dist. LEXIS 166651, 2019 WL 4740156, at *7 (D. Del. Sept. 27, 2019)* (same); *Intellectual Ventures* ***[*47]*** *II LLC v. BITCO Gen. Ins. Corp., 2016 U.S. Dist. LEXIS 79778, 2016 WL 4394485, at *3 (E.D. Tex. May 12, 2016)* (same), *with, e.g., InVue Sec. Prods. Inc. v. Vanguard Prods. Grp., Inc., 2019 U.S. Dist. LEXIS 142486, 2019 WL 3958272, at *1 (M.D. Fla. Aug. 22, 2019)* ("Prejudice against the non-movant is probably the most important factor **[**36]** to consider when determining whether a stay is appropriate."); *Puget BioVentures, LLC v. Med. Device Bus. Servs., Inc., 2017 U.S. Dist. LEXIS 221953, 2017 WL 6947786, at *2 (N.D. Ind. Sept. 22, 2017)* (same); *ADA Sols., Inc. v. Engineered Plastics, Inc., 826 F. Supp. 2d 348, 350 (D. Mass. 2011)* (same). In any case, there can be little doubt that simplification of the issues and prejudice to the opposing party are more important than the case's state of completion.

HN26[] As far as prejudice goes, courts typically consider an additional four sub-factors: (1) the timing of the review request; (2) the timing of the stay request; (3) the status of the external review; and (4) the relationship of the parties. *Wiesel v. Apple Inc., 2021 U.S. Dist. LEXIS 209450, 2021 WL 5038764, at *1 (E.D.N.Y. Oct. 29, 2021)*. However, when the parties are direct competitors, the stayed party is usually prejudiced. *Boston Sci. Corp. v. Cordis Corp., 777 F. Supp. 2d 783, 789 (D. Del. 2011)* ("Courts are generally reluctant to stay proceedings where the parties are direct competitors."); *see Nidec Cor. v. LG Innotek Co., Ltd., 2009 U.S. Dist. LEXIS 46123, 2009 WL 3673433, at *4 (E.D. Tex. Apr. 3, 2009)* (collecting cases for proposition that stay usually incurs prejudice when party opponents are direct competitors).

Regeneron's stay request presents the Court with a close question. The only certainty about where the relevant factors stack up in terms of priority is that the third factor of the extent discovery has been completed and whether trial has been set is of the least importance. And that factor is decidedly mixed. On the one hand, a trial date has yet to be set for the '631 Patent case. But on the other, the parties have **[**37]** agreed that the extensive discovery from the ITC review will carry over for the '631 Patent case before this Court. *Novartis*, 1:20-CV-690, Dkt. 101-9, p. 4.

Ultimately, though, the fact that the Court has just disposed of the issue of claim construction pushes the '631 Patent case forward. Also, the substantial discovery that has been wrapped up through the ITC review similarly suggests that this case is not quite so short in the tooth as Regeneron would like. Taken together, these facts cut against imposing the stay. *See Sunbeam Prods., Inc. v. Hamilton Beach Brands, Inc., 2010 U.S. Dist. LEXIS 45654, 2010 WL 1946262, at *3 (E.D. Va. May 10, 2010)* (explaining that case not being ready for trial does not cut in favor of stay so much as suggest that if stay is to be granted it is best to do so in early stages).

Which leaves the Court to consider the two more substantial factors: the extent to which a stay would simplify matters on the one hand and the resulting prejudice to Novartis on the other. On the first point, Regeneron argues that there is a chance that the '631 Patent will be struck down entirely, in which case there is neither need nor benefit to allowing the '631 Patent case to continue towards resolution. But Novartis counters that many of Regeneron's intended arguments in the '631 Patent case will not be available to it during the *inter partes* review. **[**38]** In fact, only its argument for obviousness will. As a result, if the '631 Patent survives the *inter partes* review, this case will not be simplified in any meaningful way.

Many courts in similar positions have held that even if it is possible that the issues will be simplified by a complete dismissal during an *inter partes* review, a stay is typically not warranted if there is a potential that only one issue among many will be resolved. *See* *Imax Corp. v. In-Three, Inc., 385 F. Supp. 2d 1030, 1032* **[*48]** *(C.D. Cal. 2005)*. The Court finds that logic persuasive, given the abundance of arguments Regeneron raises about the '631 Patent's invalidity, including their fraud challenge that formed the backbone of the Antitrust case. Accordingly, though some simplification may result from the PTO's review, this factor only slightly favors Regeneron.

By contrast, Novartis has amply demonstrated that prejudice to it is likely to result from a stay. For one thing, there can be no doubt that Novartis and Regeneron are direct competitors, which counsels strongly in favor of finding prejudice to Novartis. *Boston Sci. Corp., 777 F. Supp. 2d at 789*.

To refute that apparent prejudice, Regeneron points out that the board conducting the *inter partes* review owes the parties a final decision no later than October of 2022. *35 U.S.C. § 316(a)(11)*. But as Novartis correctly counters, **[**39]** the review board may extend the deadline to issue a decision another six months, to April of 2023. *Id.*

On top of that, Regeneron explicitly requests that the Court stay the '631 Patent case until any appeals of the *inter partes* review to the Federal Circuit have concluded. *37 C.F.R. § 90.3* (requiring that any appeals of PTO decision be taken to Federal Circuit). Given that court's heavy caseload, it would not come as a surprise for that process to take more than another year to come to an end. In total, then, a stay while the PTO examines the validity of the '631 Patent could tack on at least another two or three years to this case. ***HN27***[] Courts routinely find stays of multiple years to be long enough to result in prejudice to the non-moving party. *See, e.g.,* *ADA Sols., 826 F. Supp. 2d at 351* (finding prejudice when delay between competitors could stretch on for years).

In other words, upon careful review, though there is at least a chance that the issues in the '631 Patent case could be simplified if the Court sat until the PTO had its say, that possibility is not enough to outweigh the near-certainty of prejudice to Novartis if the stay is granted. All the more so when the bulk of the discovery in this case has already been completed. Regeneron's request for a stay must **[**40]** therefore be denied. *See, e.g.,* *ADA Sols., Inc. v. Engineered Plastics, Inc., 826 F. Supp. 2d at 350-52* (declining to grant stay where some issues would be clarified by stay and trial was in early stages but prejudice would result to patent plaintiff).

IV. CONCLUSION

These two cases are not without their complications, to say the least. Between the multiple competing claims, the various avenues of external review, and the three disparate yet roughly contemporaneous motions, the result was something of a quagmire. Nonetheless, at the close of the present motion practice, it is the Court's hope that a clearer path forward has opened. The definitions of all necessary terms for the '631 Patent have been set. The Antitrust case has been dismissed. And the '631 Patent case is proceeding forward towards its resolution. Whether that path will in fact turn out to be as clear as it seems is a question for another day. For now, there is nothing else to do but to let the parties to begin to walk it.

Therefore, it is

ORDERED that

1. Regeneron Pharmaceuticals, Inc.'s proposed claim construction is adopted in its entirety, and the Court affixes the meanings suggested by Regeneron Pharmaceuticals, Inc. to every disputed claim term;

2. Novartis Pharma AG, Novartis Pharmaceuticals Corporation, Novartis **[**41]** Technology LLC, and Vetter Pharma International GMBH's motion **[*49]** to dismiss Regeneron Pharmaceuticals, Inc.'s complaint in *Regeneron Pharmaceuticals, Inc. v. Novartis Pharma AG*, 1:21-CV-1066 is GRANTED;

3. Regeneron Pharmaceuticals, Inc.'s complaint in *Regeneron Pharmaceuticals, Inc. v. Novartis Pharma AG*, 1:21-CV-1066 is DISMISSED with prejudice;

4. The clerk of court is directed to enter judgment accordingly and close the case file for *Regeneron Pharmaceuticals, Inc. v. Novartis Pharma AG*, 1:21-CV-1066; and

5. Regeneron Pharmaceuticals, Inc.'s motion to stay proceedings in *Novartis Pharma AG v. Regeneron Pharmaceuticals, Inc.*, 1:20-CV-690 pending the Patent and Trademark Office's *inter partes* review of the validity of the '631 Patent is DENIED.

IT IS SO ORDERED.

Judges: LORNA G. SCHOFIELD, UNITED STATES DISTRICT JUDGE.

Opinion by: LORNA G. SCHOFIELD

Opinion

OPINION AND ORDER

LORNA G. SCHOFIELD, District Judge:

This case concerns an alleged conspiracy, or conspiracies, among banks to fix prices in the foreign exchange ("FX") market. On September 3, 2019, a Rule 23(c)(4) class was certified on two issues: (1) the existence of a conspiracy to widen spreads in the FX spot market and (2) participation in the conspiracy by Defendants Credit Suisse Group AG, Credit Suisse AG and Credit Suisse Securities (USA) LLC (collectively, the "CS Defendants" or "Credit Suisse"). The CS Defendants move for summary judgment on the basis that there is no single conspiracy or that the CS Defendants did not participate in such a conspiracy. Plaintiffs cross-move for summary judgment on the basis **[*19]** that there is a conspiracy and the CS Defendants participated in it. For the reasons set forth below, both motions are denied.

In this action, Plaintiffs sued sixteen defendant banks, which are among the world's largest banks engaged in trading in the FX market. Fifteen of the sixteen banks have settled with Plaintiffs, paying over $2.31 billion, one of the largest antitrust settlements in the *Sherman Antitrust Act*'s 125-year history. The fifteen banks settled after filing motions to dismiss. In the case of each bank, the final order approving the settlement included a term barring claims for contribution or indemnification against the settling banks for any amounts awarded in this or any other action by way of settlement, judgment or otherwise.

With only Credit Suisse remaining, Plaintiffs moved to certify two Rule 23(b)(3) classes. Plaintiffs' motion was denied -- one class because of the lack of predominance, and the other class because of the absence of adequacy. *In re Foreign Exch. Benchmark Rates Antitrust Litig., 407 F. Supp. 3d 422, 430, 438 (S.D.N.Y. Sept. 3, 2019)*. Instead, a Rule 23(c)(4) class was certified. *Id. at 436*. The two issues certified, and the only issues that remain on a class basis, are: (1) the existence of a conspiracy to widen spreads in the FX spot market and (2) Credit Suisse's participation in the conspiracy. *Id.* The **[*20]** decision certifying the issues noted that "if the CS Defendants are found not to have joined any conspiracy, then all of the claims against it are resolved." *Id. at 437*.

The two certified issues have great financial significance because an adverse finding on both of these issues would mean that Credit Suisse is potentially liable for all of the wrongful conduct of the conspiracy, and thus Credit Suisse could be liable for all of the damages that have not already been paid through the settlements with the other banks.

See *New York v. Hendrickson Bros., Inc., 840 F.2d 1065, 1086 (2d Cir. 1988)* ("An amount recovered by a plaintiff from a coconspirator in settlement of the former's antitrust claims is not deductible from the amount of damages determined by the jury, though it may be deductible from the damages award after it has been trebled."); *In re Foreign Exch. Benchmark Rates Antitrust Litig., No. 13 Civ. 7789, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *7 (S.D.N.Y. Sept. 20, 2016)* (collecting cases discussing joint and several liability in the antitrust context).

Credit Suisse moves for summary judgment on the basis that there was no "single conspiracy" to widen spreads in the FX spot market. Tellingly, it does not directly argue that no conspiracy existed.

I. BACKGROUND

The following facts are drawn from the parties' submissions, including their Local Civil Rule 56.1 statements, are undisputed and provide an overview of the **[*21]** context of the parties' dispute.

Plaintiffs are over-the-counter ("OTC") purchasers of foreign exchange ("FX") spot, forward and/or swap trades who transacted directly with Defendants. Over-the-counter transactions involve counterparties who trade directly with each other without an intermediate exchange. CS Defendants participate in the FX market as dealers, market-makers or liquidity providers.

The FX market[1] is the largest and most actively traded financial market in the world. Between December 1, 2007, and December 31, 2013 (the "Class Period"), as much as $5.3 trillion per day was traded in the FX market worldwide. Trading occurs twenty-four hours per day and over 252 trading days per year. During the Class Period, FX trading by volume was primarily conducted OTC. Currencies are bought or sold in pairs.

Trading in the FX market occurs in two tiers: (1) the interdealer or interbank tier and (2) the dealer-to-customer tier. This case concerns the dealer-to-customer tier. In that tier, Defendants, large banks, acted as market makers or dealers. Market makers quote prices to customers at which they are willing to buy or sell a certain volume of a currency pair. For example, a customer **[*22]** contacts a salesperson at a market-making bank to request a price quote in a designated volume of a specific currency pair. The salesperson relays the request to an FX trader, who provides a two-way quote that includes the prices at which the trader is willing to buy the currency and sell the currency. The difference between the buy or ask price and the sell or offer price is the bid-ask spread.

In late 2006 and early 2007, FX traders who worked for different Defendants began using Bloomberg and Reuters chat rooms to communicate with each other. FX traders continued using chat rooms to communicate with traders at other banks through 2012 and 2013. FX traders discussed bid-ask spreads for various currency pairs in the chat rooms. Chat rooms could exist for years, and some traders communicated with other traders daily in the course of their employment. At least one trader, from Barclays, participated in five chat rooms, which provided him access to traders from ten other banks. Because individual traders participated in multiple chat rooms, eight chat rooms connected employees of all sixteen Defendant banks. At least some FX traders sometimes asked about the same spread simultaneously **[*23]** in different chat rooms. Some banks, including Credit Suisse, encouraged their employees to use interbank chat rooms and discuss bid-ask spreads in those chat rooms.

II. STANDARD

---

[1] CS Defendants frequently refer to "FX markets" instead of the FX market in their Rule 56.1 statement. [Dkt. 1594-53 ¶¶ 39, 40]. However, CS Defendants provide no basis for viewing the FX market as a series of markets. The expert report the CS Defendants cite refers to "the FX Market" and in their Answer to the Third Consolidated Amended Class Action Complaint, CS Defendants refer to the "FX market" without denying the appropriateness of referring to it as a single market. CS Defendants dispute the use of the word "market." However, in their answer to the operative complaint and in their expert report, "market" is used. As a result, "market" is adopted here.

A. Summary Judgment

Summary judgment is proper where the record establishes that "there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine dispute exists "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *accord* *Electra v. 59 Murray Enters., 987 F.3d 233, 248 (2d Cir. 2021)*. "Only disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment." *Liberty Lobby, 477 U.S. at 248*; *accord* *Saleem v. Corp. Transp. Grp., 854 F.3d 131, 148 (2d Cir. 2017)*.

Courts must construe the evidence and draw all reasonable inferences in the non-moving party's favor. *Electra, 987 F.3d at 248*. When evaluating cross-motions for summary judgment, the Court reviews each party's motion on its own merits and draws all reasonable inferences against the party whose motion is under consideration. *Cayuga Nation v. Tanner, 6 F.4th 361, 2021 WL 3160077, at *8 (2d Cir. 2021)*. When the movant properly supports its motion with evidentiary materials, the opposing party must establish a genuine issue of fact by citing to particular parts of materials in the record. *Fed. R. Civ. P. 56(c)(1)(A)*.

B. *Sherman Act*

Section 1 of the Sherman Act provides, "Every contract, combination **[*24]** in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several [s]tates, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. An antitrust plaintiff must show: (1) "a combination or some form of concerted action between at least two legally distinct economic entities" and (2) "that the agreement constitute[s] an unreasonable restraint of trade either per se or under the rule of reason." *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)*. "Price-fixing agreements . . . fall into the category of arrangements that are per se unlawful." *In re Vitamin C Antitrust Litig., 8 F.4th 136, 147 (2d Cir. 2021)* (quoting *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*) (explaining that "certain types of anticompetitive conduct are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality" under the *Sherman Act*). "Independent action is not proscribed." *Meredith Corp. v. Sesac, LLC, 1 F. Supp. 3d 180, 201 (S.D.N.Y. 2014)* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*).

At the summary judgment stage, "to raise a genuine issue of material fact as to an antitrust conspiracy, the plaintiff must present direct or circumstantial evidence that 'tends to exclude the possibility that the alleged conspirators acted independently.'" *Anderson News, L.L.C. v. Am. Media, Inc., 899 F.3d 87, 98 (2d Cir. 2018)* (quoting *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*). A plaintiff need not "disprove all nonconspiratorial explanations for the defendants' conduct; rather the evidence need be sufficient only to allow a reasonable **[*25]** fact finder to infer that the conspiratorial explanation is more likely than not." *Id.* (internal quotation marks omitted).

"Absent direct evidence of conspiracy, such as an admission by one of the defendants, antitrust plaintiffs must rely on circumstantial evidence to support their conspiracy claims." *Anderson News, L.L.C., 899 F.3d at 103*. "One powerful form of circumstantial evidence is parallel action—proof that defendants took identical actions within a time period suggestive of prearrangement." *Id. at 104*. Parallel action is not sufficient on its own to prove the existence of a conspiracy. *Id.* When parallel behavior is the basis of a *Sherman Act* claim, a plaintiff must show additional circumstances, referred to as "plus factors" to permit a factfinder to infer a conspiracy. *Id.* Plus factors include "traditional evidence of conspiracy," such as statements permitting an inference that defendants entered into an agreement and indirect evidence such as "a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications." *Id.* (internal quotation marks omitted); *see also United States v. Apple, Inc., 791 F.3d 290, 315 (2d Cir. 2015)* (discussing plus factors). **[*26]** "[D]efendants' conduct and communications must be evaluated in context and with the overall picture in mind." *Anderson News, L.L.C., 899 F.3d at 104* (internal quotation mark omitted).

To demonstrate the existence of a conspiracy, an "antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the [defendant] and others had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co., 465 U.S. at 764* (internal quotation marks and citation omitted); *accord* *Anderson News L.L.C., 899 F.3d at 97*. "Circumstances must reveal a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 183 (2d Cir. 2012)* (internal quotation marks omitted); *accord* *In re Keurig Green Mt. Singleserve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 241-42 (S.D.N.Y. 2019)*.

"Whether the [plaintiff] has proved a single or multiple other independent conspiracies is a question of fact for a properly instructed jury." *United States v. Sureff, 15 F.3d 225, 229 (2d Cir. 1994)* (internal quotation marks omitted); *accord* *United States v. Freedman, No. 18 Crim. 217, 2019 U.S. Dist. LEXIS 122647, 2019 WL 3296967, at *2 (S.D.N.Y. July 23, 2019)*. Multiple conspiracies may be found when "the evidence shows separate networks operating independently of each other, but it is not warranted when the evidence shows that each alleged member agreed to participate in what he knew to be a collective venture directed toward a common goal." *United States v. Dawkins, 999 F.3d 767, 797 (2d Cir. 2021)* (internal quotation marks omitted) (finding no error in refusal to **[*27]** give a multiple conspiracy jury instruction). "Even schemes involving 'two or more phases or spheres of operation' may nevertheless amount to a single conspiracy, 'so long as there is sufficient proof of mutual dependence and assistance' among the conspirators." *United States v. Pena, 846 Fed. App'x 49, 51 (2d Cir. 2021)* (summary order) (quoting *United States v. Berger, 224 F.3d 107, 114-15 (2d Cir. 2000)* (considering overriding goal, overlap of leadership, and common participants as evidence that several schemes fell within same conspiracy)). "In determining whether a jury could have found a single conspiracy, courts generally examine three factors: (1) whether there was a common goal, (2) the nature of the scheme, and (3) the overlapping of participants in the various dealings." 1 Modern Federal Jury Instructions-Criminal P 19.01 (2021). Although the issue of a single versus multiple conspiracies arises more frequently in criminal cases, the same principles have been applied in civil antitrust cases to assess whether there are multiple conspiracies or a single conspiracy. *See, e.g.*, *Sitts v. Dairy Farmers of Am., Inc., 417 F. Supp. 3d 433, 467 (D. Vt. 2019)*; *In re Air Cargo Shipping Servs. Antitrust Litig., No. 06 MD 1175, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *37-38 (E.D.N.Y. Oct. 15, 2014)*, *report and recommendation adopted*, *2015 U.S. Dist. LEXIS 90402, 2015 WL 5093503 (E.D.N.Y. July 10, 2015)*.

In addition to showing that there is a conspiracy, a plaintiff must show that the defendant joined the conspiracy. To show that a defendant joined a conspiracy, a plaintiff "need **[*28]** not show that the defendant knew all of the details of the conspiracy, so long as [the defendant] knew of its general nature and extent." *In re Interest Rate Swaps Antitrust Litig., 261 F. Supp. 3d 460, 482 (S.D.N.Y. 2017)* (quoting *United States v. Huezo, 546 F.3d 174, 180 (2d Cir. 2008)*); *accord* *United States v. Khalupsky, 5 F.4th 279, 288 (2d Cir. 2021)*. A plaintiff need not show that the defendant knew the identities of all the other conspirators. *Id.* (internal quotation marks omitted).

III. DISCUSSION

A. Existence of a Conspiracy

Construing the evidence in favor of Plaintiffs on CS Defendants' motion, a reasonable jury could find that a single conspiracy existed to fix spreads in the FX market and that the supporting evidence tends to exclude the possibility that the alleged co-conspirators acted independently. Conversely, construing the evidence in favor of CS Defendants on Plaintiffs' motion, a reasonable jury could conclude that no single overarching conspiracy existed, and that only multiple smaller conspiracies existed. While significant uncontroverted evidence shows at least some conspiratorial activity in the FX market in which Credit Suisse participated, questions remain about the scope of the shared illegal goal and extent of the conspirators' mutual dependence and assistance. "If the evidence at trial supports an inference that there was more than one conspiracy, then, **[*29]** whether multiple conspiracies existed is a question of fact for the jury." *United States v. Vazquez, 113 F.3d 383, 386 (2d Cir. 1997)*; *accord* *Khalupsky, 5 F.4th at 288*.

1. Economic Plausibility

To survive summary judgment and "raise a genuine issue of material fact as to an antitrust conspiracy, the plaintiff must present direct or circumstantial evidence that 'tends to exclude the possibility that the alleged conspirators acted independently.'" *Anderson News, L.L.C., 899 F.3d at 98* (quoting *Matsushita Elec. Indus. Co., 475 U.S. at 588*); *accord* *DPWN Holdings Inc. v. United Air Lines, Inc., No. 11 Civ. 564, 2019 U.S. Dist. LEXIS 63202, 2019 WL 1515231, at *13 (E.D.N.Y. Feb. 21, 2019)*. The quality of evidence required to satisfy the "tends to exclude" standard "varies with the economic 'plausibility' of the alleged agreement." *Id. at 99*. "[W]here context reveals that the alleged agreement is one that simply makes no economic sense, the plaintiff must come forward with more persuasive evidence to support its claim than would otherwise be necessary." *Id.* (internal quotation marks omitted). "In a case where the alleged scheme is short-term and relatively simple in operation," a plaintiff's burden is lighter. *Apex Oil Co v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987)*.

Because "the quality of evidence required to satisfy *Matsushita's* 'tends to exclude' standard varies with the economic 'plausibility'" of an alleged agreement, it is important to analyze the alleged agreement at issue before weighing the evidence. *Anderson News L.L.C., 899 F.3d at 99*. For the reasons explained below, the alleged **[*30]** agreement makes economic sense, even though the concerted action took place over a nearly five-year period and involved a significant number of actors at sixteen banks.

Plaintiffs allege a horizontal price fixing scheme in which Defendants, who are frequently competing dealers in the FX spot market, conspired to fix the bid-ask spreads for fifty-two currency pairs in the foreign exchange market. By fixing the spreads, Defendants could keep the spread wide while buying low and selling high. Most dealers want wider spreads because wide spreads increase their probability of making money.

Plaintiffs' theory makes economic sense. Defendants had an incentive to fix spreads and keep them as wide as possible because wider spreads would enable them, as market makers, to increase the profitability of their trading activity in the FX market. Because spreads could remain stable for lengthy periods of time in normal market conditions and can correlate across trade size and sometimes across certain currency pairs, the wide spreads could have a lasting and reinforcing impact on the market.

CS Defendants do not specifically contest the economic plausibility of Plaintiffs' theory. CS Defendants argue **[*31]** that the number of currencies, the global 24/7 nature of trading and the speed at which liquidity conditions changed would require "an extraordinary level of coordination and monitoring" among traders at the sixteen Defendant banks. The number of currencies and the global 24/7 nature of trading are elements that add to the complexity of the agreement alleged by Plaintiff, but they do not directly make Plaintiffs' theory less economically plausible because Defendants' rational economic motive is the same regardless of the number of currencies impacted or the amount of time in which trading occurs. *See* *Anderson News, L.L.C., 899 F.3d at 102* (considering economic plausibility through the lens of defendants' "rational economic motive" to join the alleged conspiracy). The parties disagree about the speed at which the market changes. Plaintiffs offer chat transcripts in which traders point to spreads that remained stable for more than twelve months. CS Defendants offer testimony that pricing information could be stale some of the time and the market could be unpredictable "even in [the] next second." CS Defendants' evidence that prices sometimes changed rapidly does not preclude that, at other times, prices remained stable over **[*32]** months-long periods.

Because Plaintiffs advance a plausible economic theory behind the alleged conspiracy, this is not a situation where they must come forward with more persuasive evidence to support their claim than would otherwise be necessary. Plaintiffs' overall burden is not low, however, because the conspiracy alleged is vast and its impact is complex.

2. Evidence of a Conspiracy

a. Direct Evidence of a Conspiracy to Achieve a Common Goal

Chat transcripts between Credit Suisse and the other Defendants provide direct evidence of an agreement and common goal to widen spreads. This evidence also shows cooperative and parallel conduct to achieve that goal.

Plaintiffs identify a chat room in which traders from Goldman Sachs, Credit Suisse and RBS agreed, at the Credit Suisse trader's suggestion, to "sign a pact on spreads." The RBS trader previously suggested "agree[ing] on the same spreads [because] it [is] pointless otherwise and we keep cutting spreads more and more." The Credit Suisse trader later testified at a deposition that he had been joking about the pact in March 2007, but the record shows not only that the traders continued exchanging spread information after suggesting a **[*33]** pact, but also that he prodded the RBS trader to confirm his participation in the pact by asking "u in." Plaintiffs offer multiple examples of traders in that chat room encouraging each other to widen spreads and avoid tight spreads. So even if the pact was a joke, the evidence still shows the traders endeavoring to widen spreads with competing banks. The Credit Suisse trader asked a trader at Goldman Sachs for the "spread in 500 usdjpy." The Goldman Sachs trader responded that 25 is good but suggested showing a wider spread of 30. The Credit Suisse trader responded "ok." In another instance involving the New Zealand Dollar and U.S. Dollar, the RBS trader asked what the spread should be. The Credit Suisse trader said, "in [a] normal [market] 20" but, "at the mo" 28. The RBS trader responded, "ok ta."

Plaintiffs point to at least fourteen instances in chat transcripts of Credit Suisse traders encouraging others to use wider spreads or acceding to wider spreads at the request of other traders. (1) In March 2008, a trader from RBC asked about the spread for "200 eursek," a trader from Deutsche Bank suggested 175 to 200 pips and a Credit Suisse trader suggested it should be 200. (2) Later **[*34]** in the same chat room in September 2008, a Credit Suisse trader asked for the spread in "50 eurjpy," and when traders at other banks told him that it should be 8 or 8 to 10, he responded that 10 is fair. (3) A Bank of America trader in the same chat room in January 2009, when told that the spread in "30 usd nok" is 200, responded that "[you] know [I] am not going to be narrower" although he had worked it out as 115. (4) Also in January 2009, a trader from Credit Suisse told a trader from another bank that he showed the Euro-U.S. Dollar spread in 200 as 18, but he would actually be 20. On that same day in the same chat room, a trader from Goldman Sachs proclaimed, "the day of customers holding us to ransom over spreads is over." (5) In a different chat room in May 2010, a Credit Suisse trader asked, "how wide you guys make in 100usdmxn" because "all our mxn traders out we're clueless." (6) In another chat room in June 2010, a trader from Bank of America shared that he widened the British Pound U.S. dollar spread he offered, and a trader from Credit Suisse confirmed that the wider spread "is good." (7) In that same month, in response to suggested spreads for Euros to Swedish Krona and **[*35]** Norsk Krone, a Credit Suisse trader responded that he thought the spreads on his chart "were too tight" so he was "widening [them] now." (8) In September 2010, a Credit Suisse trader asked a Deutsche Bank trader if 50 and 100 "gbpnok prices" are "125 and 225," the Deutsche Bank trader said "its wider than u think" and the Credit Suisse trader responded that he'll "say 130 and 250." (9) In a discussion about the spread for "100 noksek" in December 2010, a Credit Suisse trader responded to a suggestion that the spread is 10 with "no chance" it is like "10-12 in 100." (10) In February 2011, when a Credit Suisse trader asked for a "normal morning spread in 25 eursek" and a trader from Deutsche Bank said "3040 . . . i'd show 40 then come in if u need," the Credit Suisse trader responded that he said 40. (11) In October 2011, a Credit Suisse trader asked, "how wide 75 eur, 4?" and was encouraged by traders from Société Générale and Bank of America to go with 5, to which he responded, "ok." (12) In March 2012, when asked if the spread in 200 Australian Dollars to U.S. Dollars is 12, a Credit Suisse trader responded it is a "bit wider, 14." (13) In April 2012 the "Yen Cartel" chat room, when **[*36]** asked if "400 usdjpy" is 14, a Credit Suisse trader responded it is "15 I think." (14) In August 2012, during a discussion about the Euro to Japanese Yen spread, a Credit Suisse trader said the spread is "too tight but it[']s what [customers] expect . . . unless we all decide to make wider, we have the power." A Morgan Stanley trader responded with a wider spread and the Credit Suisse trader responded "done," and a JP Morgan trader responded "[I] agree." Plaintiffs also identify numerous examples of traders at other banks encouraging traders to use wider spreads.

In 2012, as some banks began instructing their traders to close their permanent chat rooms that included traders from other banks, a trader from JP Morgan in the "Yen Cartel" chat room messaged a Credit Suisse and Bank of

America trader, "what the hell are u two planning, this chat is a compliance dream." The Credit Suisse trader wrote, "we are mearly [sic] sharing market information to get the best possible rates for our [customers] and the our [sic] banks," to which the Bank of America trader responded, "hahahah," and the JP Morgan trader responded, "ya sure."

A trader who pleaded guilty to a conspiracy for conduct in one **[*37]** chat room testified that he participated in similar conduct in a separate chat room called "Old Gits." He testified that his conduct in the chat room for which he pleaded guilty was "extremely explicit" in comparison. "Old Gits" included traders from HSBC, Barclays, Citi, Bank of America, Standard Chartered and Credit Suisse at various points in time. In the "Old Gits" chat room, the Credit Suisse trader told the other traders to "just both quote them wide and same that way they have no tight price." CS Defendants do not dispute that this is evidence of an FX trader encouraging others to exchange spreads to get on the same page with competitors.

Plaintiffs identify traders who testified to the practice of inquiring about spreads from competitors directly in response to requests for quotes from clients. For example, a Citibank trader who pleaded guilty to price-fixing charges testified that when clients called for a quote from multiple banks, participants in a chat room would convey what they were being asked and indicate the price they were showing to the client. A trader who worked at BNP and Barclays testified that the exchange of prices in chat rooms should not happen because banks **[*38]** are supposed to be independent and that exchanging spreads among competitors can affect the prices shown to clients. A trader from Morgan Stanley, immediately after discussing spreads, wrote, "can never be a bad thing colluding spreads."

Plaintiffs offer evidence that traders took action to enforce parallel conduct. For example, when a trader at Barclays heard that someone at HSBC was quoting a narrower spread than the Barclays trader, he reached out to traders at JP Morgan and RBS to check their spreads. The Barclays trader asked the RBS trader to check with someone at HSBC and, if the HSBC trader was quoting a narrower spread, tell them to stop. The RBS trader messaged the HSBC trader, who responded that he was not quoting the narrower spread. In another chat room, a different trader from HSBC warned traders from Standard Chartered, Bank of America and Citi not to show a certain narrow spread. Plaintiffs also present multiple examples of traders inquiring about spreads with competitors while stating that they need the spreads to come up with values for grids, which could be shown to customers as indicative spreads for normal market conditions.

CS Defendants' only suggestion that the **[*39]** sharing of pricing information is not part of a conspiracy is that traders shared "market color." CS Defendants do not submit a definition of market color but suggest that traders were not agreeing to fix spreads but merely talking about them. CS Defendants cite in their memorandum of law in support of their motion for Summary Judgment a "key industry guide to appropriate behavior in the FX markets." The portion of the guide they quote states, "The timely dissemination of Market Colour between Market Participants can contribute to an efficient, open, and transparent FX Market through the exchange of information on the general state of the market, views, and anonymised and aggregated [client order] flow information." Nothing in that guide suggests that real-time price spreads are considered market color to be shared. The guide refers to market color as information on "the general state of the market, views, and . . . aggregated flow information." Even if traders thought they were just sharing "market color" when they provided pricing information in exclusive chat rooms, CS Defendants, in their memoranda of law, do not point to any evidence suggesting that exchange was pro-competitive **[*40]** or consistent with any sort of independent action.

b. Circumstantial Evidence of a Conspiracy

Plaintiffs offer significant evidence of "plus factors" in support of finding a conspiracy (i.e., agreement) to widen spreads, including a high level of communication among the conspirators, conduct that was sometimes against the conspirators' economic self-interest, and invoking the *Fifth Amendment* privilege against self-incrimination.

One important plus factor is "evidence of a high level of interfirm communications." *Anderson News, L.L.C., 899 F.3d at 104*. Plaintiffs present a chart, based on chat logs, that displays more than 400 instances of interfirm communication regarding spreads for a variety of currency pairs. As discussed above, while many of these instances involved direct discussions of widening spreads, in hundreds of other conversations, traders at competing banks exchanged data about various currency bid-ask spreads. Plaintiffs also demonstrate that Credit Suisse was connected to all of the other Defendants through just four overlapping chat rooms in which traders exchanged information about spreads.

Plaintiffs point to significant evidence that permit an inference that Defendants entered into an agreement. Two chat rooms, including **[*41]** one with a Credit Suisse trader, had the word cartel in their names. Traders in multiple chat rooms discussed collusion and regulators' concerns that sharing spreads is collusion. A Credit Suisse trader testified that Credit Suisse encouraged him to use interbank chat rooms and talk about spreads in the FX market. The same trader worked at HSBC and Barclays, which also encouraged him to participate in chat rooms. Multiple traders testified that it was their belief that the exchange of spreads in chat rooms was a common practice in the FX market.

Plaintiffs provide evidence of traders' motives to widen spreads even though it is not always in their economic self-interest to do so. Wider spreads increase the likelihood that a trade will be profitable for dealers, like Defendants. One Credit Suisse trader encouraged traders from other banks to "just both quote them wide and same that way they have no tight price." Credit Suisse does not dispute that this motive exists and instead emphasizes that a common motive is insufficient on its own to establish a conspiracy. But a common motive does support a finding of a single conspiracy rather than multiple conspiracies. To undercut Plaintiffs' **[*42]** motive argument, CS Defendants point to evidence that widening spreads is against the economic self-interest of the banks, and that sometimes traders prefer a narrower spread, which would make a customer more likely to deal with them as opposed to a competitor. However, this argument concedes that efforts to widen spreads are not in the economic self-interest of Defendants, which is a plus factor that contributes to evidence that a conspiracy existed, *see* *Anderson News, L.L.C., 899 F.3d at 104*. Wider spreads may decrease the likelihood of making a single trade in one instance, but maintaining wider spreads with competitors could increase the likelihood of dealers profiting on each trade.

That three former Credit Suisse employees, as well as many other of the other Defendants' employees, asserted their *Fifth Amendment* privilege against self-incrimination contributes to the circumstantial evidence of a conspiracy. *See* *Baxter v. Palmigiano, 425 U.S. 308, 318, 96 S. Ct. 1551, 47 L. Ed. 2d 810 (1976)* ("[T]he *Fifth Amendment* does not forbid adverse inferences against parties to civil actions when they refuse to testify in response to probative evidence offered against them . . . ."); *LiButti v. United States, 178 F.3d 114, 120 (2d Cir. 1999)* (holding that trial court did not abuse its discretion in drawing and relying on an adverse inference where other evidence also supported the inference); **[*43]** *Sausa v. Vill. of W. Hampton Dunes, No. 18 Civ. 3802, 2021 U.S. Dist. LEXIS 185801, 2021 WL 4443712, at *4 (E.D.N.Y. Sept. 28, 2021)*; *Amusement Indus. v. Stern, No. 7 Civ. 11586, 2016 U.S. Dist. LEXIS 106555, 2016 WL 4249965, at *7 (S.D.N.Y. Aug. 11, 2016)*, *report and recommendation adopted*, *2016 U.S. Dist. LEXIS 163036, 2016 WL 6820744 (S.D.N.Y. Nov. 10, 2016)*, *aff'd*, *721 F. App'x 9 (2d Cir. 2018)* (summary order). Three former Credit Suisse traders asserted their *Fifth Amendment* rights when asked whether Credit Suisse conspired on spreads with its competitors. CS Defendants challenge the admissibility of traders' invocations of the *Fifth Amendment* privilege but offer no argument in support of their challenge.

c. Single Versus Multiple Conspiracies

Plaintiffs provide sufficient evidence of a single conspiracy to survive the CS Defendants' motion for summary judgment, but facts in dispute preclude Plaintiffs from prevailing on their motion for summary judgment. In other words, a reasonable jury could find for either Plaintiffs or Defendants on the issue of whether there existed a single conspiracy, as Plaintiffs allege, or multiple conspiracies, as Defendants' argue, depending on the inferences that are drawn and the evidence that is credited.

To determine whether there was one overarching conspiracy to widen spreads, or multiple smaller conspiracies (for example, each chat room representing a separate conspiracy), the inquiry is what binds the alleged conspirators and their conduct together. As Defendants point out, parallel action is insufficient. *See* *Apex Oil, 822 F.2d at 252*

("[E]vidence **[*44]** of parallel conduct alone cannot suffice to prove an antitrust conspiracy."). Tweaking Defendants' example, it would be wrong to say that many drivers exceed the speed limit, use common means to do so and have a common goal for traffic to move more quickly and therefore are engaged in a single global conspiracy. Although a common goal is essential, and parallel conduct is probative, the evidence must provide something more to bind the participants and their conduct together to show a collective venture -- and hence an illegal conspiracy -- rather than independent unlawful conduct.

i. Overlapping Participants

Overlapping participants support a finding of a single conspiracy rather than multiple conspiracies. *See Berger, 224 F.3d at 114-15*. Here, the sixteen alleged co-conspirator banks all, through their agents, participated with each other in an interconnected network of chat rooms where they exchanged information related to spreads in the FX markets. Individual traders participated in multiple chat rooms, so that eight chat rooms connected employees of all sixteen Defendant banks. Credit Suisse overlapped with the fifteen other banks in just four multi-bank chat rooms. A single trader, from Barclays, participated **[*45]** in five chat rooms, which provided him access to traders from ten other banks. Some FX traders asked about the same spread simultaneously in different chat rooms. The participants shared information regarding different currency pairs at different times, but the record shows that each Defendant participated in the soliciting and provisioning of spreads in the FX market.

CS Defendants argue that there "is no legally cognizable theory under which hundreds of traders in dozens of exclusive chat rooms, who often undercut and competed even with other chat room members, can be connected into a single conspiracy." The argument is unpersuasive for three reasons. First, CS Defendants base this argument largely on the theory of hub-and-spoke conspiracies, which is not applicable to this case. Hub-and-spoke conspiracies involve "an entity at one level of the market structure, the 'hub,' coordinat[ing] an agreement among competitors at a different level, the 'spokes.'" *Apple, Inc., 791 F.3d at 314*. Plaintiffs do not allege a hub-and-spoke conspiracy. Instead, Plaintiffs contend that the co-conspirator banks all acted at the same level of the market structure and participated in a single horizontal conspiracy. Second, CS Defendants' **[*46]** argument ignores that the hundreds of FX traders each worked for one of sixteen Defendants and were agents of a Defendant when they entered chat rooms and shared information with traders at other banks. That all hundreds of FX traders did not convene or further the conspiracy and that no single chat room involved all Defendants does not preclude the existence of a single conspiracy. *See Khalupsky, 5 F.4th at 288*; *In re Interest Rate Swaps Antitrust Litig., 261 F. Supp. at 482*; *In re Elec. Books Antitrust Litig., 859 F. Supp. 2d 671, 690 (S.D.N.Y. 2012)* (holding that a defendant's involvement "in only a portion" of a conspiracy "does not undermine the existence of the conspiracy itself or [the defendant's] role as a participant"). Third, instances of price competition and examples of offered spreads narrower than the spreads discussed in chat rooms does not undermine the existence of an agreement and conduct aimed at widening spreads. *See Gelboim v. Bank of Am. Corp., 823 F.3d 759, 776 (2d Cir. 2016)* (recognizing a difference between the existence of a conspiracy and its efficacy and that an antitrust claim may be "based on the influence that a conspiracy exerts on the starting point for prices").

CS Defendants' contention that the invitation-only nature of chat rooms "refutes any notion of vast cooperation" is unavailing. That the Defendants shared pricing information only in small subgroups does not negate **[*47]** the scale of the information sharing among the Defendants or the number of connections between each of the Defendants. The venture is no less a collective one because actions were carried out in small part by different participants in the conspiracy. *See Khalupsky, 5 F.4th at 288* (recognizing that a defendant need not know all of the details of a conspiracy); *In re Elec. Books Antitrust Litig., 859 F. Supp. at 690* (holding that a defendant's involvement "in only a portion" of a conspiracy "does not undermine the existence of the conspiracy itself or [the defendant's] role as a participant").

ii. Cooperation in a Collective Venture

Plaintiffs have provided strong evidence to show that the sixteen co-conspirators cooperated in a collective venture directed to a common goal. The cooperative and collective nature of the scheme is shown through chat transcripts, in which traders working for Defendants referred to their activity as based on a "pact" and as a "cartel." Traders also frequently spoke about keeping the same spread, making the "cartel gold," getting on the "same page" and maintaining the "right" spread. Traders, including those at Credit Suisse, frequently encouraged other traders to adopt wider spreads. A few traders understood that there existed a "gentleman's **[*48]** agreement" not to undercut spreads agreed upon in chat rooms. At least some FX traders sometimes asked about the same spread simultaneously in different chat rooms. Here, the collective nature of the venture is apparent; CS Defendants and the alleged co-conspirators could not widen or stabilize spreads without mutual assistance and cooperation.

CS Defendants' argument about the implausibility of a global conspiracy rests on testimony that misconstrues the alleged conspiracy. CS Defendants point to testimony about the size of the market, the frequency of pricing changes and the volume of trading to contend the conspiracy alleged by Plaintiffs is implausible. But much of that testimony rests on a belief that Plaintiffs allege Defendants "pre-determined" spreads or "dominat[ed]" the market. The conspiracy alleged by Plaintiffs is more subtle than a venture to preset all prices and maintain them through complete market domination.

CS Defendants' contention that evidence in the chat rooms of traders competing to take business from one another prevents Plaintiffs from showing that Defendants knew they were engaged in a common venture directed at a common goal is unavailing. Competition may **[*49]** be evidence that the conspiracy existed but did not achieve its goal, or that there was no conspiracy; but evidence of competition does not preclude the existence of a conspiracy. *See* *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* ("It is the 'contract, combination . . . or conspiracy in restraint of trade or commerce' which *§ 1* of the [Sherman] Act strikes down, whether the concerted activity be wholly nascent or abortive on the one hand, or successful on the other."); *Gelboim, 823 F.3d at 776* ("*Socony-Vacuum* allows an antitrust claim based on the influence that a conspiracy exerts on the starting point for prices."); *Iowa Pub. Emps. Ret. Sys. v. Merrill Lynch, Pierce, Fenner & Smith Inc., 340 F. Supp. 3d 285, 320 (S.D.N.Y. 2018)* ("[T]he presence of some divergent conduct does not negate the allegations of other, parallel conduct.").

iii. Interdependence

Plaintiffs have provided strong evidence of mutual dependence, or interdependence between co-conspirators and their agents, though not necessarily between chatrooms. The strongest evidence of interdependence is that each Defendant relied on other Defendants to provide pricing information when asked in chat rooms and Defendants furnished such information in return when requested. *See* *United States v. Container Corp. of Am., 393 U.S. 333, 335, 89 S. Ct. 510, 21 L. Ed. 2d 526 (1969)* (holding that requests by a defendant from its competitor for information on pricing and competitors providing that information with the expectation **[*50]** that it would receive reciprocal information when it wanted was "sufficient to establish the combination or conspiracy, the initial ingredient of a violation of *§ 1 of the Sherman Act*"). In other words, sharing information to fix spreads, like sharing information to fix prices, is by its nature interdependent. Interdependence is also shown by traders' efforts to ensure that information regarding spreads is not used against the bank providing the information and traders' apologies for being slow to provide spread information when asked.

CS Defendants advance two unconvincing arguments against Plaintiffs' theory of interdependence. First, CS Defendants argue that it is not possible to square exclusivity of membership in chat rooms with interdependence. But, here, exclusivity was used to monitor the use of the information provided particularly because information about spreads could be used to undercut competitors and grow market share. Second, CS Defendants argue that Plaintiffs' theory of interdependence is overbroad because every participant in every industry would be interdependent if Plaintiffs' theory is credited. CS Defendants misconstrue Plaintiffs' theory to make this argument. Plaintiffs' **[*51]** theory of interdependence is that sharing nonpublic pricing information and expecting it in return creates an interdependence because of the risk that competitors will use the information to undercut the information provider. CS Defendants refer to the risk of being undercut as "simple economics," but ignore that Plaintiffs' theory rests on the initial step of trusting competitors with nonpublic information -- that mutual trust creates interdependence.

A more difficult question is whether and to what extent there was interdependence between or among chat rooms to support the inference of one global conspiracy versus multiple conspiracies comprised of each chat room. It is unclear from the parties' briefing what the relevant evidence shows, and it is not the Court's responsibility to go searching for this evidence. *See* *Amnesty Am. v. Town of W. Hartford, 288 F.3d 467, 470 (2d Cir. 2002)*; *725 Eatery Corp. v. City of New York, 408 F. Supp. 3d 424, 456 (S.D.N.Y. 2019)*. Nevertheless, mutual dependence is just one factor suggesting a single conspiracy, and the parallels and interconnections among the chatrooms discussed above may be sufficient to prove a single conspiracy, raising a question of fact for the jury.

d. Evidence as a Whole

Viewing the overall picture, Plaintiffs' evidence tends to exclude the possibility that the Defendant **[*52]** banks acted independently, but the parties dispute the material facts of the scope of the purported conspiracy. As Defendants argue, parallel conduct in the abstract is not enough to prove a conspiracy. But as Plaintiffs argue, the chatrooms and their participants here were all engaged in illegal conduct, unrestricted to any particular chatroom, currency pairs or traders. Those facts plus the others discussed above could support the inference of a global conspiracy or may be found to support only independent conspiracies. Ultimately, the weighing of inferences and conclusions to be drawn are for the finder of fact, precluding summary judgment for either Plaintiffs or Defendants.

CS Defendants argue that there was no participation in a single conspiracy because there was no "single document or testimony excerpt in which anyone acknowledges the existence of a single global conspiracy." They argue that "if a global conspiracy had existed, then certainly *one* of its hundreds of supposed participants, in millions of unguarded communications over a six-year period, would have said *something* about it." This argument is incorrect as a matter of law. "[I]t has long been settled that explicit **[*53]** agreement is not a necessary part of a *Sherman Act* conspiracy." *United States v. Gen. Motors Corp., 384 U.S. 127, 142-43, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *see also* *Brown v. Pro Football, 518 U.S. 231, 241, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)* ("***Antitrust law*** also sometimes permits judges or juries to premise antitrust liability upon little more than uniform behavior among competitors, preceded by conversations implying that later uniformity might prove desirable . . . ."). An agreement can be "tacit or express" and in most antitrust cases a "'smoking gun' can be hard to come by." *Gamm v. Sanderson Farms, Inc., 944 F.3d 455, 465 (2d Cir. 2019)*.

CS Defendants rely heavily on the decision in *Meredith Corp. v. Sesac, LLC, 1 F. Supp. 3d 180 (S.D.N.Y. 2014)*, to argue that Plaintiffs' claims are defective. CS Defendants' comparison of Plaintiffs' case to *Meredith* is misplaced. The plaintiffs in *Meredith* alleged a conspiracy between the defendant, a performing rights organization, and its 20,000 affiliates, individual musicians. *Meredith, 1 F Supp. 3d at 210*. There, the plaintiffs did not depose any of the 20,000 affiliates. *Id.* Here, Plaintiffs' claims are much more circumscribed, and Plaintiffs have offered strong evidence as to each of the purported co-conspirators.

B. Credit Suisse's Participation

Neither party is entitled to summary judgment on the issue of Credit Suisse's participation in the purported conspiracy because the scope of the conspiracy or conspiracies is disputed. The question of whether or not there was a single conspiracy **[*54]** or multiple conspiracies needs to be resolved before asking whether and what Credit Suisse joined. However, as discussed in detail above, there is uncontroverted evidence that Credit Suisse participated in at least some conspiratorial conduct in the FX market, and CS Defendants do not argue that, even if there was a conspiracy, they did not participate in it.

Credit Suisse erroneously argues that they could not have participated in a single global conspiracy because "there is no evidence suggesting that anyone was aware of . . . some enormous worldwide scheme." This argument attempts to inject a new requirement for the proof of a conspiracy -- that a conspirator understood the full scope of the conspiracy. The law of this Circuit is not so exacting. Instead, a conspirator need only know of a conspiracy's "general nature and extent" to have joined it. *Huezo, 546 F.3d at 180*. One need not have full knowledge of all the details of a conspiracy or its scope to be a member. *See Blumenthal v. United States, 332 U.S. 539, 557, 68 S. Ct. 248, 92 L. Ed. 154 (1947)* (recognizing that "[s]ecrecy and concealment are essential features of successful conspiracy" and that, as a result, "the law rightly gives room for allowing the conviction of those discovered . . . without requiring evidence of knowledge **[*55]** of all its details or of the participation of others"); *United States v. Yannotti, 541 F.3d 112, 122 (2d Cir. 2008)* ("It is well-settled that a conspirator need not be fully informed about his co-conspirators' specific criminal acts provided that he agreed to participate in the broader criminal conspiracy . . . ."); *Meredith, 1 F. Supp. 3d at 213* ("To be held a part of a conspiracy, a conspirator need not know all dimensions of the wrongful conduct taken in its furtherance."). Defendants cite *Monsanto Co. v. Spray-Rite Services Corporation, 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*, in support of their argument, but *Monsanto* provides that there must be a "conscious commitment to a common scheme," not that each conspirator must know the full scope of the conspiracy. *Id. at 764*.

IV. CONCLUSION

For the reasons stated above, CS Defendants' motion for summary judgment is DENIED and Plaintiffs' motion for summary judgment is DENIED. The Clerk of Court is respectfully directed to close the motions at Dkt. Nos. 1574 and 1580.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

To survive a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted, a complaint must include sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A complaint must offer more than labels and conclusions, a formulaic recitation of the elements of a cause of action, or naked assertions devoid of further factual enhancement in order to survive dismissal. The ultimate question is whether a claim has facial plausibility, i.e., the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Determining whether a complaint states a plausible claim for relief will be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. Put another way, the plausibility requirement calls for enough fact to raise a reasonable expectation that discovery will reveal evidence supporting the claim.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN3[] Inequitable Conduct, Anticompetitive Conduct

In FTC v. Actavis, the Supreme Court held that antitrust cases premised on reverse-payment settlements of patent litigation—reverse because the settlement requires the patentee to pay the alleged infringer rather than the other way around—can sometimes violate the antitrust laws and must be evaluated under the rule of reason.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Evidence > Burdens of Proof > Burden Shifting

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN4[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The courts that have considered reverse-payment agreements have stated that, to trigger antitrust concern under Actavis, a settlement term must be (1) a payment that is (2) made in reverse—that is, from the patent holder to the alleged infringer—and is (3) large, and (4) unexplained. Because the existence and degree of any anticompetitive effects may vary depending on the particular settlement and the relevant industry, plaintiffs must show that the settlements are anticompetitive under the rule of reason analysis applied to other types of antitrust claims. Moreover, in the Second Circuit, the rule of reason analysis involves three steps: First, the plaintiff bears the initial burden of showing that the defendant's conduct had an actual adverse effect on competition as a whole in the relevant market. If plaintiff satisfies this burden, the burden then shifts to the defendant to offer evidence that its conduct had pro-competitive effects. If the defendant is able to offer such proof, the burden shifts back to plaintiff, who must prove that any legitimate competitive effects could have been achieved through less restrictive alternatives.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN5[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In a reverse payment case, a plaintiff can meet the pleading standard without describing in perfect detail the world without the reverse payment, calculating reliably the payment's exact size, or preempting every possible explanation for it. If a plaintiff plausibly alleges that an agreement's anticompetitive effects outweigh its procompetitive virtues, the district court must accept that allegation and allow the plaintiff to take discovery. If genuine issues of material fact remain, the rule-of-reason analysis is for the factfinder, not the court.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN6[] **Inequitable Conduct, Anticompetitive Conduct**

To plausibly allege an unjustified reverse payment, an antitrust plaintiff need only allege the absence of a convincing justification for the payment. Allegations that the value of the released patent litigation claims far exceeds any litigation costs the brand manufacturer avoided by settling are sufficient. All that need be alleged, at the motion-to-dismiss stage is that those saved litigation costs fail to explain the hundreds of millions of dollars of liability released by the brand manufacturer. Finely calibrated litigation cost estimates are unnecessary at this stage of the litigation.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN7[] **Complaints, Requirements for Complaint**

Conduct that is equally consistent with a pro-competitive as with an anticompetitive justification is not sufficient to nudge plaintiffs' claims across the line from conceivable to plausible.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN8[] **Inequitable Conduct, Anticompetitive Conduct**

To determine what the plaintiff must plausibly allege at the outset of a lawsuit, the court usually asks what the plaintiff must prove in the trial at its end. Thus, to state a claim under Actavis, a plaintiff must allege more than a general statement simply asserting that a reverse payment is large and unjustified (or was made pursuant to a simultaneously executed side agreement) and that the generic manufacturer agreed not to enter the market before the patent expired. Rather, the plaintiff must plead facts that would support the claim that the reverse payment was "large" and "unjustified," i.e., that it was not simply possible that the defendants engaged in the anticompetitive conduct of paying the generic manufacturer to forego entering the market but that it was plausible.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN9[] **Inequitable Conduct, Anticompetitive Conduct**

A showing that a reverse payment is large can be established by factual allegations plausibly suggesting that the payment is larger than the payor's anticipated future litigation costs. Actavis specifically directs courts to consider the reverse payment's scale in comparison to the payor's anticipated future litigation costs—not relative to other figures such as the possible profits a generic manufacturer could make by entering the market for the brand-name drug or the brand manufacturer's profits on that drug. It is also not necessary that the plaintiff allege very precise and particularized estimates of actual anticipated litigation costs; such facts likely are in the exclusive possession of defendants and may require expert analysis.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN10[] **Complaints, Requirements for Complaint**

A plaintiff must allege facts to plausibly suggest that the reverse payment is unjustified. An unjustified reverse payment is one that does not reflect traditional settlement considerations such as avoided litigation costs or fair value for services.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN11[] **Motions to Dismiss, Failure to State Claim**

A plaintiff need not preempt every possible explanation for the reverse payment to survive a motion to dismiss, but a plaintiff must plead at least some facts of this nature to sufficiently allege an unjustified agreement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Motions to Dismiss, Failure to State Claim**

A settlement agreement may be very simple or tremendously complex, and it may involve all manner of consideration; and if, when viewed holistically, it effects a large and unexplained net transfer of value from the patent-holder to the alleged patent-infringer, it may fairly be called a reverse-payment settlement. Where a plaintiff has plausibly pleaded that several agreements are connected, the Court must accept those allegations as true on a motion to dismiss.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN13[] **Inequitable Conduct, Anticompetitive Conduct**

Where there are multiple generic manufacturers, it does not follow that simply because a reverse-payment agreement with one Generic Defendant is anticompetitive, the brand manufacturer's agreements with every other Generic Defendant is anticompetitive. Likewise, the fact that one or more reverse-payment agreements a brand manufacturer has with a Generic Defendant is not large or is justified would not establish that no other reverse agreement is anticompetitive. A patent owner who legitimately secures an agreement with one or more potential generic competitors that would prevent the generic from entering the market may still enter an anticompetitive agreement with the remaining potential competitors.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN14[ ] **Motions to Dismiss, Failure to State Claim**

Determining whether a complaint states a plausible claim for relief will be a context-specific task.

Torts > Procedural Matters > Multiple Defendants > Joint & Several Liability

HN15[ ] **Multiple Defendants, Joint & Several Liability**

Under the doctrine of joint and several liability, if the tortious conduct of each of two or more persons is a legal cause of harm that cannot be apportioned, each is subject to liability for the entire harm, irrespective of whether their conduct is concurring or consecutive. The doctrine requires that each liable person engage in tortious conduct.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

HN16[ ] **Complaints, Requirements for Complaint**

The Second Circuit has held that a plaintiff may plead facts upon information and belief where the facts are peculiarly within the possession and control of the defendant, or where the belief is based on factual information that makes the inference of culpability plausible.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Civil Procedure > ... > Settlement Agreements > Enforcement > Breach of Contract Actions

HN17[ ] **Types of Contracts, Settlement Agreements**

An allegation of an actionable reverse-payment settlement does not require an enforceable contract.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[ ] **Motion Practice, Content & Form**

A complaint cannot be amended by the briefs in opposition to a motion to dismiss.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN19[ ] **Inequitable Conduct, Anticompetitive Conduct**

It is not enough that two parties entered into a new agreement at the same time as they settled the patent litigation for a reverse payment; the plaintiff must allege that there is something about that agreement other than its timing and the fact that it results in the generic manufacturer honoring a patent that supports the inference that it is anticompetitive.

Governments > Courts > Authority to Adjudicate

HN20[] **Courts, Authority to Adjudicate**

The Second Circuit has stated that although it traditionally treats personal jurisdiction as a threshold question to be addressed prior to consideration of the merits of a claim, that practice is prudential and does not reflect a restriction on the power of the courts to address legal issues. In cases involving multiple defendants—over some of whom the court indisputably has personal jurisdiction—in which all defendants collectively challenge the legal sufficiency of the plaintiff's cause of action, the court may address first the facial challenge to the underlying cause of action and, if it dismisses the claim in its entirety, decline to address the personal jurisdictional claims made by some defendants.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN21[] **Judges, Discretionary Powers**

It is within the Court's discretion to sua sponte grant leave to amend. The Second Circuit strongly favors liberal grant of an opportunity to replead after dismissal of a complaint under *Fed. R. Civ. P. 12(b)(6)*. The Court should freely give leave when justice so requires. *Fed. R. Civ. P. 15(a)(2)*. A district court has discretion to deny leave for good reason, including futility, bad faith, undue delay, or undue prejudice to the opposing party, and the decision to grant leave to amend is within the sound discretion of the trial court.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN22[] **Standing, Clayton Act**

Under the United States Supreme Court's decision in Illinois Brick, indirect purchasers of products sold at supra-competitive prices lack standing to sue under federal antitrust statutes. However, under its later decision in California v. ARC Am. Corp., indirect purchasers may still bring suit under state antitrust laws, if a state permits such claims. Therefore, it is common in private antitrust litigation for two groups of purchasers, direct and indirect, to file separate cases arising out of the same nucleus of operative fact, but to allege different causes of action—direct purchasers under federal law and indirect purchasers under state laws.

Opinion

[*462] OPINION AND ORDER

LEWIS J. LIMAN, United States District Judge:

This civil antitrust action alleges an illegal scheme to delay competition from generic versions of Bystolic (nebivolol hydrochloride), a prescription medication **[**3]** approved by the U.S. Food and Drug Administration to treat high blood pressure.

Plaintiffs are: a putative class of direct purchasers of Bystolic and generic versions of Bystolic ("Direct Purchaser Plaintiffs");[1] a putative class of indirect purchasers, **[*463]** including consumers, health insurers, and welfare plans, of Bystolic and generic versions of Bystolic ("End-Payor Plaintiffs");[2] and several retail chains that bring individual lawsuits as assignees of direct purchasers ("Retailer Plaintiffs")[3] (collectively, "Plaintiffs"). Defendants are

[1] Direct Purchaser Plaintiffs are J M Smith Corporation d/b/a Smith Drug Company and KPH Healthcare Services, Inc. a/k/a Kinney Drugs, Inc., on behalf of themselves and all others similarly situated.

[2] End Payor Plaintiffs are the Mayor and City Council of Baltimore ("City of Baltimore"), UFCW Local 1500 Welfare Fund ("Local 1500"), Teamsters Western Region & Local 177 Health Care Plan ("Local 177"), Fraternal Order of Police, Miami Lodge 20, Insurance Trust Fund ("FOP"), Law Enforcement Health Benefits, Inc. ("LEHB"), Teamsters Local No. 1150 Prescription Drug Benefit Plan ("Local 1150"), and Teamsters Local 237 Welfare Fund and Teamsters Local 237 Retirees' Benefit Fund ("Local 237"), on behalf of themselves and all others similarly situated.

[3] Retailer Plaintiffs are CVS Pharmacy, Inc., Rite Aid Corporation, Rite Aid Hdqtrs. Corp., Walgreen Co., The Kroger Co., Albertsons Companies, Inc., and H-E-B, L.P. The first three plaintiffs are the plaintiffs in *CVS Pharmacy, Inc. et al v. AbbVie Inc.*

the manufacturers and marketers of Bystolic (collectively referred to as "Forest")[4] and their generic-drug competitors ("Generic Defendants")[5] (collectively, "Defendants"). Generic Defendants include Hetero, Torrent, Alkem, Indchemie, Glenmark, Amerigen, and Watson.

Plaintiffs allege that Forest agreed to pay Generic Defendants to drop their challenges to a Bystolic patent and to delay launching less expensive, competing generic versions of Bystolic for years. Direct Purchaser Plaintiffs bring a class action complaint ("Direct Purchaser Plaintiffs' **[**4]** Complaint" or "DPP Complaint") and Retailer Plaintiffs bring complaints ("Retailer Plaintiffs' Complaints") against Defendants, seeking damages under federal ***antitrust law***. Second Consolidated and Amended Class Action Complaint, Dkt. No. 250 ("DPP Compl."); Second Amended Complaint, *CVS Action*, 20-cv-10087 (S.D.N.Y.), ECF No. 35; Second Amended Complaint, *Walgreen Action*, 20-cv-9793 (S.D.N.Y.), ECF No. 34. End-Payor Plaintiffs bring a class action complaint ("End-Payor Plaintiffs' Complaint" or "EPP Complaint") against Defendants under state antitrust and consumer-protection laws and for injunctive relief under federal ***antitrust law***. End-Payor Plaintiffs' Consolidated Amended Class Action Complaint, Dkt. No. 251 ("EPP Compl.").

Pending before the Court are four related motions to dismiss. All Defendants move to dismiss Direct Purchaser and Retailer Plaintiffs' Complaints **[*464]** for failure to state a claim, Dkt. No. 267, and move to dismiss End-Payor Plaintiffs' Complaint for failure to state a claim, Dkt. No. 271, pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. Defendant Teva Israel also moves pursuant to *Federal Rule of Civil Procedure 12(b)(2)* to dismiss the claims against it for lack of personal jurisdiction. Dkt. No. 260. And a group of twenty-eight Defendants **[**5]** not at home in New York ("Nonresident Defendants")[6] move pursuant to *Federal Rule of Civil Procedure 12(b)(2)* to dismiss for lack of personal jurisdiction the End-Payor Complaint's ninety-nine non-New York, state-law claims. Dkt. No. 265.

BACKGROUND

On each of the four motions to dismiss, the Court accepts as true the allegations of the relevant complaints, and the documents incorporated by reference.[7]

I. Overview of the Alleged Scheme

From October 2012 through November 2013, Forest allegedly entered into a series of reverse-payment deals (also known as "pay for delay" deals) with Generic Defendants under which each Generic Defendant (1) agreed not to compete with Forest or enter the market with its generic version of Bystolic prior to September 17, 2021 (three

---

et al ("*CVS Action*"), 20-cv-10087 (S.D.N.Y.), and the latter group of plaintiffs are the plaintiffs in *Walgreen Co. et al v. AbbVie Inc. et al* ("*Walgreen Action*"), 20-cv-9793 (S.D.N.Y.).

[4] "Forest" refers collectively to: Forest Laboratories, Inc., Forest Laboratories Holdings, Ltd., Forest Laboratories, LLC, and Forest Laboratories Ireland Ltd.; AbbVie, Inc. ("AbbVie"); and Allergan, Inc., Allergan Sales, LLC, and Allergan USA, Inc. (collectively, "Allergan").

[5] Generic Defendants are: Hetero USA Inc., Hetero Labs Ltd., and Hetero Drugs Ltd. (collectively, "Hetero"); Torrent Pharmaceuticals Ltd. and Torrent Pharma Inc. (collectively, "Torrent"); Ascend Laboratories, LLC and Alkem Laboratories Ltd. (collectively, "Alkem"); Indchemie Health Specialties Private Ltd. ("Indchemie"); Glenmark Generics Inc., USA, Glenmark Generics Ltd., Glenmark Pharmaceuticals Ltd., and Glenmark Pharmaceuticals S.A. (collectively, "Glenmark"); ANI Pharmaceuticals, Inc., Amerigen Pharmaceuticals, Inc., and Amerigen Pharmaceuticals, Ltd. (collectively, "Amerigen"); Teva Pharmaceuticals Industries Ltd. ("Teva Israel"); Watson Laboratories, Inc. (NV), Watson Laboratories, Inc. (DE), Watson Laboratories, Inc. (NY), Watson Laboratories, Inc. (CT), Watson Pharma, Inc., Watson Pharmaceuticals Inc., Actavis, Inc., and Teva Pharmaceuticals USA, Inc. (collectively with Teva Israel, "Watson").

[6] Nonresident Defendants include all Defendants except for Watson Laboratories, Inc. (NY), Forest Laboratories, Inc., and the latter's successors—Forest Laboratories, LLC and Allergan Sales, LLC.

[7] This opinion cites the DPP Complaint as the other plaintiffs' complaints are substantially identical.

months before patent expiration), unless another Generic Defendant entered that market earlier; and in exchange (2) received "side-deals" and cash payments from Forest. DPP Compl. ¶ 3.

Earlier, Forest had sued each Generic Defendant for patent infringement. *Id.* ¶ 4. Although Generic Defendants would have allegedly succeeded in the patent litigation, as Forest's claim was weak, and they would have been ready to launch their generic versions of Bystolic well before September **[**6]** 17, 2021, Generic Defendants agreed to side deals with Forest to end the patent fight. *Id.* ¶¶ 5-7. Each Generic Defendant agreed to stay off the market until September 17, 2021 in exchange for a share of Forest's monopoly profits in the form of reverse payments. *Id.* ¶¶ 6-7. In other words, but for these payments, Generic Defendants would have launched their generic products earlier and Plaintiffs would have paid substantially less for nebivolol hydrochloride, i.e., Bystolic. *Id.* ¶ 26. As a result, the entry of less expensive, generic versions of Bystolic was delayed, the price of nebivolol hydrochloride was fixed at the price of Bystolic, and 100% of the United States market for nebivolol hydrochloride was allocated to Forest until September 17, 2021. *Id.* ¶ 28.

These allegations are discussed in greater detail next.

II. Relevant Regulatory Framework for Generic Drugs

HN1[] Under the *Federal Food, Drug, and Cosmetic Act ("FDCA")*, manufacturers of a new drug must obtain approval from the U.S. Food and Drug Administration ("FDA") by filing a New Drug Application ("NDA"). *21 U.S.C. §§ 301-392*; DPP Compl. ¶ 93. Among the information contained in an NDA is information on applicable patents. *Id. § 355(a)*, *(b)*; DPP Compl. ¶ 93. **[**7]** When the FDA approves a drug manufacturer's NDA, the manufacturer may list certain patents in the "Approved Drug Products with Therapeutic Equivalence Evaluations" (known as the "Orange Book"). DPP Compl. ¶ 94. The listed patents are those that could reasonably be asserted against a generic manufacturer **[*465]** of the branded drug before the patents expire. *Id.*

Manufacturers of generic versions of a branded drug may receive FDA approval through a different pathway. The Hatch-Waxman Amendments, enacted in 1984, simplified the regulatory hurdles for prospective generic manufacturers by eliminating the need to file lengthy and costly NDAs. *See Drug Price Competition and Patent Term Restoration Act, Pub. L. No. 98-417, 98 Stat. 1585 (1984)*; DPP Compl. ¶ 96. Instead, a generic manufacturer may file an Abbreviated New Drug Application ("ANDA"). DPP Compl. ¶ 96. While an ANDA must show that the generic drug is therapeutically equivalent to the brand drug, it can rely on the scientific findings of safety and effectiveness included in the brand manufacturer's original NDA. *Id.* Generic drugs that are therapeutically equivalent to and are of the same dosage strength and form as their approved branded counterpart are assigned an "AB" rating **[**8]** by the FDA. *Id.*

For the FDA to approve an ANDA, a generic manufacturer must certify that the generic drug will not infringe any patents listed in the Orange Book. *Id.* ¶ 100. One of the four possible certifications is "that the patent for the brand drug is invalid or will not be infringed by the generic manufacturer's proposed product" (a "Paragraph IV certification"). *Id.*; *21 U.S.C. § 355(j)(2)(A)(vii)*. If a generic manufacturer files a Paragraph IV certification, it must notify the brand manufacturer, and the brand manufacturer can delay FDA approval of the ANDA by suing the generic manufacturer for patent infringement. DPP Compl. ¶ 101. If the brand manufacturer sues for patent infringement within forty-five days of receiving notice of the Paragraph IV certification, the FDA will not grant final approval of the ANDA until the earlier of (a) thirty months after the receipt of the Paragraph IV notice; or (b) a court decision that the patent is invalid or not infringed by the generic manufacturer's ANDA. *21 U.S.C. § 355(j)(5)(B)(iii)*; DPP Compl. ¶ 101. Thus, simply by filing suit, the brand manufacturer can forestall entry of the competitor drug for a period of time not to exceed thirty months.

To incentivize the manufacturing of generics, the **[**9]** Hatch-Waxman Amendments grants a 180-day exclusivity period to the first generic manufacturer that files a substantially complete ANDA with a Paragraph IV certification. DPP Compl. ¶ 103; *21 U.S.C. § 355(j)(5)(B)(iv)*, *(D)*. During this exclusivity period, the FDA may not grant final approval to any other generic manufacturer's ANDA for the same brand drug. *Id.* Where multiple generic companies are the first to file substantially complete ANDAs with Paragraph IV certifications, they may be eligible to share the 180-day exclusivity period. *Id.* ¶ 106; *21 U.S.C. § 355(j)(5)(B)(iv)*.

III. Implications of Competition from Generics and a Brand Manufacturer's Incentives to Delay Generic Entry

On average, generic versions of brand drugs are 50% to 80% less expensive than brand drugs when there are multiple generic competitors on the market for a given brand drug. DPP Compl. ¶ 107. Every state has adopted laws that either require or permit pharmacies to automatically substitute less-expensive AB-rated generic equivalents for brand prescriptions (unless the prescribing physician has affirmatively requested the brand). *Id.* ¶ 108. Once a generic equivalent enters the market, the generic quickly captures sales of the brand drug, often capturing 80% or more of **[**10]** the brand's sales within the first six months. *Id.* Once multiple generic competitors enter, the competitive process accelerates, and multiple generic sellers typically compete **[*466]** vigorously with one another for sales by driving prices down. *Id.* ¶ 109.

Generic competition enables purchasers of the drug to purchase substantially cheaper generics instead of the more expensive brand drug and to benefit from when the brand company lowers prices to compete with generics. *Id.* ¶ 110. Accordingly, when generic entry is delayed, purchasers are harmed by having to pay more than they otherwise would have to pay. *Id.* ¶ 111.

Competition from generic drugs is viewed by brand-drug companies as a grave financial threat. *Id.* ¶ 109. When exclusivity is lost and generic entry occurs, the brand manufacturer can expect a significant drop in profits. *Id.* ¶ 112. Brand manufacturers thus have financial incentives to delay generic entry. *Id.* ¶ 113. One way to delay generic entry is through the regulatory waiting period initiated in response to patent litigation, as discussed above. *Id.* Brand manufacturers thus frequently take aggressive positions in listing patents in the Orange Book and then bring patent lawsuits **[**11]** against any generic competitor that files an ANDA with a Paragraph IV certification. *Id.* These patent lawsuits are often litigated to delay generic entry rather than to enforce valid patents against infringing products. *Id.* If the brand manufacturer can keep the litigation going long enough, it can obtain for itself a thirty-month delay in the entry of the generic competitor.

Brand manufacturers also can forestall competition from a generic manufacturer of a generic product by entering into settlements to resolve the lawsuits in which the generic competitor drops its patent challenge and agrees to delay entry in exchange for a payment from the brand manufacturer. *Id.* ¶ 114. These settlements are sometimes called "pay-for-delay" or "reverse-payment agreements." *Id.* As regulatory and other scrutiny of such agreements has increased, brand manufacturers and generic competitors have allegedly entered into increasingly elaborate agreements in an attempt to mask the fundamentally anticompetitive character of their agreements. *Id.* ¶ 115.

IV. Forest's NDA for Bystolic and Generic Defendants' ANDAs for Generic Versions of Bystolic

As part of the NDA for Bystolic, Forest listed two patents for inclusion **[**12]** in the FDA's Orange Book: U.S. Patent No. 6,545,040 ("the '040 Patent") and U.S. Patent No. 5,759,580 ("the '580 Patent"). *Id.* ¶¶ 4, 124. The '040 Patent issued on April 8, 2003 and expired on December 17, 2021. *Id.* ¶ 125. The '580 Patent issued on June 2, 1998 and expired on June 2, 2015. *Id.* ¶ 124.

Bystolic qualified for a five-year marketing exclusivity period during which no ANDAs may be filed. *Id.* ¶ 101. This period is reduced to four years if, at the end of four years, an ANDA is filed with a Paragraph IV certification. *21 U.S.C. § 355(j)(5)(F)(ii)*; DPP Compl. ¶ 101. If the manufacturer of a branded drug sues within forty-five days of receiving the Paragraph IV certification, the approval waiting period is extended to the earlier of (a) 7.5 years after the original NDA's approval; or (b) a court decision that the patent is invalid or not infringed by the generic manufacturer's ANDA. DPP Compl. ¶ 101. In the interim, the FDA may only grant tentative approval and not final approval of the ANDA. *Id.*

In December 2011, the seven Generic Defendants filed ANDAs with the FDA containing Paragraph IV certifications regarding the Bystolic patents. *Id.* ¶¶ 4, 140. They were the first generic manufacturers to file substantially complete ANDAs with Paragraph IV certifications. *Id.* As such, Generic Defendants were eligible to potentially **[**13]** share the 180-day exclusivity period **[*467]** during which the FDA would not grant final approval to any other generic manufacturer's ANDA for generic Bystolic. *Id.* ¶ 141. In February 2012, Generic Defendants notified Forest of their Paragraph IV certifications. *Id.* ¶ 142. Forest then had forty-five days to sue for patent infringement.

V. Bystolic Patent Litigation and the Settlement Agreements and Side Agreements between Forest and Generic Defendants

On March 13, 2012, in response to the Paragraph IV certification notices, Forest filed a patent infringement lawsuit in the U.S. District Court for the District of Delaware against Generic Defendants Torrent, Watson, Amerigen, Glenmark, and Hetero. *Id.* ¶ 144; *see also Forest Laboratories, Inc. v. Torrent Pharms. Ltd. et al*, 12-cv-305 (D. Del. Mar. 13, 2012). Though some of the notices related to both the '040 and the '580 Patents, Forest only asserted the '040 Patent and declined to sue on the '580 Patent. DPP Compl. ¶¶ 124, 144.

The next day, on March 14, 2012, Forest filed a patent infringement lawsuit in the U.S. District Court for the Northern District of Illinois against Generic Defendants Indchemie and Alkem. *Id.* ¶ 145; *see also Forest Laboratories, Inc. v. Indchemie Health Specialties* ***[**14]*** *PVT. LTD. et al*, 12-cv-1855 (N.D. Ill. Mar. 14, 2012). Again, Forest only asserted the '040 Patent and declined to sue on the '580 Patent. DPP Compl. ¶ 145.

Pursuant to *28 U.S.C. § 1407*, the District of Delaware action was transferred to the Northern District of Illinois, and the two patent cases were consolidated into one action (the "Nebivolol Patent Litigation"). *See In re Nebivolol Patent ('040) Litig.*, 12-cv-5026 (N.D. Ill. June 12, 2012). These lawsuits automatically triggered stays so that the FDA could not grant final approval of Generic Defendants' ANDAs before June 18, 2015, absent an earlier favorable decision in the suits for Generic Defendants. DPP Compl. ¶ 4.

From October 2012 through November 2013, Forest entered into settlements and side deals with the seven Generic Defendants to resolve the Nebivolol Patent Litigation. *Id.* ¶¶ 3, 151. In their settlement agreements with Forest, each Generic Defendant agreed not to sell generic Bystolic until September 17, 2021, three months before the expiration of the '040 Patent, unless another Generic Defendant entered the market earlier. *Id.* ¶ 3. Each settlement agreement allegedly also had a side deal. *Id.* ¶ 8.

The DPP Complaint alleges that, in connection with a merger between **[**15]** Forest and Actavis in 2014, Forest's outside counsel sought to review "all of the Bystolic settlement and licensing agreements as well as the side agreements with those generic companies." *Id.* Forest's in-house counsel responded to outside counsel that Forest had entered into settlement agreements with Generic Defendants and that "[a]ll had side deals (one side was struck with Alkem, which is a related company with Indchemie)." *Id.* ¶¶ 8, 151. The merger agreement disclosed Forest's "material contracts," which were defined to include:

> any Contract involving the settlement of any action or threatened action (or series of related actions) (A) which will (x) involve payments after the date hereof of consideration in excess of $15,000,000 or (y) impose monitoring or reporting obligations to any other Person outside the ordinary course of business or (B) with respect to which material conditions precedent to the settlement have not been satisfied.

Id. ¶ 9. Forest listed the following agreements as material contracts in connection **[*468]** with the settlement of the Bystolic patent dispute:

- Hetero: "SETTLEMENT AGREEMENT between Forest Laboratories, Inc. and Forest Laboratories Holdings, Ltd., and Hetero **[**16]** USA Inc. and Hetero Labs Ltd. dated October 24, 2012 . . . together with the FINAL TERM SHEET between Hetero Drugs Ltd. and Forest Laboratories Ireland Ltd. dated October 5, 2012, in connection with the settlement of BYSTOLIC patent dispute." *Id.* ¶ 12.

- Torrent: "SETTLEMENT AGREEMENT between Forest Laboratories, Inc. and Forest Laboratories Holdings, Ltd., and Torrent Pharmaceuticals Ltd. and Torrent Pharma Inc. dated November 21, 2012 . . . together with the PATENT ASSIGNMENT AGREEMENT between Torrent Pharmaceuticals Ltd. and Forest Laboratories Holdings Ltd. dated November 21, 2012, in connection with the settlement of BYSTOLIC patent dispute." *Id.* ¶ 13.

- Alkem/Indchemie: "SETTLEMENT AGREEMENT between Forest Laboratories, Inc. and Forest Laboratories Holdings, Ltd., and Alkem Laboratories Ltd. dated November 27, 2012 . . . together with the TERM SHEET between Alkem Laboratories Ltd., Indchemie Health Specialties Private Ltd., and Forest Laboratories Ireland Ltd. dated November 28, 2012 in connection with the settlement of BYSTOLIC patent dispute. AMENDMENT NO. 1 TO SETTLEMENT AGREEMENT was executed on January 9, 2013 . . . . SETTLEMENT AGREEMENT between Forest Laboratories, Inc. **[**17]** and Forest Laboratories Holdings, Ltd., and Indchemie Health Specialties Private Ltd. dated November 27, 2012 . . . together with the TERM SHEET between Alkem Laboratories Ltd., Indchemie Health Specialties Private Ltd., and Forest Laboratories Ireland Ltd. dated November 28, 2012, in connection with the settlement of BYSTOLIC patent dispute." *Id.* ¶ 14.

- Glenmark: "SETTLEMENT AGREEMENT between Forest Laboratories, Inc. and Forest Laboratories Holdings, Ltd., and Glenmark Generics Inc., USA and Glenmark Generics Ltd. dated December 21, 2012 . . . together with the COLLABORATION AND OPTION AGREEMENT between Glenmark Pharmaceuticals S.A. and Forest Laboratories Holdings Ltd. dated December 21, 2012, in connection with the settlement of BYSTOLIC patent dispute." *Id.* ¶ 15.

- Amerigen: "SETTLEMENT AGREEMENT between Forest Laboratories, Inc. and Forest Laboratories Holdings, Ltd., and Amerigen Pharmaceuticals, Inc. and Amerigen Pharmaceuticals, Ltd. dated July 18, 2013 . . . together with the BINDING TERM SHEET COLLABORATION AGREEMENT between Forest Laboratories, Inc. and Amerigen Pharmaceuticals, Ltd. dated July 18, 2013, in connection with the settlement of BYSTOLIC patent dispute." *Id.* **[**18]** ¶ 16.

- Watson: "SETTLEMENT AGREEMENT between Forest Laboratories, Inc. and Forest Laboratories Holdings, Ltd., and Watson Laboratories, Inc. (NV), Watson Laboratories, Inc. (DE), Watson Laboratories, Inc. (NY), Watson Laboratories, Inc. (CT), Watson Pharma, Inc., and Actavis, Inc. dated November 6, 2013 . . . together with (a) the LETTER from Forest Laboratories, Inc. to **[*469]** Moksha8, Inc. dated November 1, 2013 and (b) TERMINATION AND RELEASE AGREEMENT between Actavis, Inc. and Moksha8, Inc. dated November 4, 2013, in connection with the settlement of BYSTOLIC patent dispute." *Id.* ¶ 17.

All of the settlement agreements with Generic Defendants provided licenses permitting them to launch their respective generic versions of Bystolic as of the date that is the later of (a) three calendar months prior to expiration of the '040 Patent, (b) the date of final FDA approval of the Generic Defendant's ANDA, or (c) earlier in certain circumstances. *Id.* ¶ 21. The earlier circumstances refer to the agreements' respective "contingent launch provisions" or "acceleration clauses," which permit a Generic Defendant to enter the market at the same time as any of its competitors if a competitor can enter the market earlier **[**19]** for some reason. *Id.* Unless an exception applied, the agreements allowed Forest to maintain monopoly profits and not face generic competitors until at least September 17, 2021, three months before patent expiration. *Id.* ¶ 23. Each of these settlement agreements and side agreements is discussed in greater detail below.

In light of the settlements, Forest avoided certain litigation costs. *Id.* ¶ 170. The DPP Complaint alleges that, according to the American Intellectual Property Law Association's 2013 Report of the Economic Survey, the median cost of patent litigation at that time for cases with more than $25 million at stake was $5-6 million. *Id.* It also alleges that, since the two separately filed patent cases were consolidated for proceedings in the Nebivolol Patent Litigation, Forest likely would have expended substantially less, in total, than it would have expended had the two patent cases involved a series of different and distinct patents and issues, or if they had proceeded independently of one another. *Id.* As a result, the DPP Complaint alleges that Forest's saved litigation costs with respect to each Generic Defendant were far less than $5-6 million. *Id.*

It is alleged that but **[**20]** for the agreements settling the patent litigation, Generic Defendants would have launched their generic products earlier at one of three possible times: (a) "at risk," meaning when a generic has received final approval from the FDA to market its product but while the patent litigation is continuing; (b) upon prevailing against Forest in the underlying patent litigation; or (c) via lawful settlement agreements providing for earlier negotiated entry dates unaffected by any induced delay. *Id.* ¶ 26. Under these scenarios, Plaintiffs would have paid substantially less for nebivolol hydrochloride, and Defendants' conduct delayed the entry of less expensive nebivolol hydrochloride, fixed the price of nebivolol hydrochloride, and allocated the whole United States market for nebivolol hydrochloride to Forest until three months before patent expiration. *Id.* ¶¶ 27-28.

PROCEDURAL HISTORY

This case involves two sets of lawsuits based on substantially identical facts. The first actions in this case were filed in July 2020. The first set of lawsuits are brought by Direct Purchaser Plaintiffs and Retailer Plaintiffs who bring claims for damages under federal ***antitrust law***. The second set of lawsuits **[**21]** are brought by End-Payor Plaintiffs under state antitrust and consumer-protection laws and for injunctive relief under federal ***antitrust law***. The Direct Purchaser Plaintiffs' actions were consolidated, the End-Payor Plaintiffs' actions were consolidated, and the two consolidated actions and the two Retailer Plaintiffs' actions were coordinated with one another under one docket to promote efficiency in managing and litigating the cases. Dkt. Nos. 50, 82, 86, 204; *CVS Action*, 20-cv-10087 **[*470]** (S.D.N.Y.), ECF No. 19; *Walgreen Action*, 20-cv-9793 (S.D.N.Y.), ECF No. 20. Though Defendants moved to transfer the cases to the District of New Jersey, Dkt. No. 79, the Court denied the motion to transfer venue, Dkt. No. 178. On December 3, 2020, Direct Purchaser Plaintiffs filed their Consolidated and Amended Class Action Complaint, Dkt. No. 111, and End-Payor Plaintiffs filed their Consolidated Class Action Complaint, Dkt. No. 113. On December 23, 2020, Retailer Plaintiffs filed their respective amended complaints. *CVS Action*, 20-cv-10087 (S.D.N.Y.), ECF No. 20; *Walgreen Action*, 20-cv-9793 (S.D.N.Y.), ECF No. 21. Thereafter, Nonresident Defendants moved to dismiss the End-Payor Plaintiffs' complaint **[**22]** for lack of personal jurisdiction, Dkt. No. 215; Teva Israel moved to dismiss all claims against it for lack of personal jurisdiction, Dkt. No. 218; Defendants moved to dismiss Direct Purchaser and Retailer Plaintiffs' complaints for failure to state a claim, Dkt. No. 223; and Defendants moved to dismiss End-Payor Plaintiffs' complaint for failure to state a claim, Dkt. No. 226. In response to Defendants' various motions to dismiss, all Plaintiffs elected to amend their complaints, Dkt. No. 240, and the Court denied the motions to dismiss without prejudice as moot, Dkt. No. 241.

On March 15, 2021, the operative amended complaints in this case were filed: the DPP Complaint, Dkt. No. 250; the Retailer Plaintiffs' Complaints, *CVS Action*, 20-cv-10087 (S.D.N.Y.), ECF No. 35; *Walgreen Action*, 20-cv-9793 (S.D.N.Y.), ECF No. 34; and the EPP Complaint, Dkt. No. 251. The Direct Purchaser and Retailer Plaintiffs' Complaints bring claims for violations of *Section 1 of the Sherman Act*, *15 U.S.C. § 1*, alleging agreements not to compete with brand and generic Bystolic between Forest and Generic Defendants, and claims for violations of *Section 2 of the Sherman Act*, *15 U.S.C. § 2*, alleging conspiracy to monopolize as to brand and generic Bystolic through agreements **[**23]** between Forest and Generic Defendants and alleging monopolization and monopolistic scheme against Forest. DPP Compl. ¶¶ 203-345; *CVS Action*, 20-cv-10087 (S.D.N.Y.), ECF No. 35 ¶¶ 182-307; *Walgreen Action*, 20-cv-9793 (S.D.N.Y.), ECF No. 34 ¶¶ 184-309. The EPP Complaint brings claims for monopolization and monopolistic scheme under various state antitrust laws against Forest; for conspiracy to monopolize under various state antitrust laws against all Defendants; for combination and conspiracy in restraint of trade under various state antitrust laws against all Defendants; for unfair or deceptive trade practices under various state consumer-protection laws against all Defendants; and for declaratory and injunctive relief against all Defendants under *Section 16 of the Clayton Act*, *15 U.S.C. § 26*, for all Defendants' violations of *Sections 1* and *2 of the Sherman Act*. EPP Compl. ¶¶ 290-457.

On April 23, 2021, Defendants moved to dismiss the Direct Purchaser and Retailer Plaintiffs' Complaints, Dkt. No. 267, and moved to dismiss End-Payor Plaintiffs' Complaint, Dkt. No. 271. That same day, Defendant Teva Israel moved pursuant to *Federal Rule of Civil Procedure 12(b)(2)* to dismiss the claims against it for lack of personal jurisdiction, Dkt. No. 260, and the Nonresident Defendants moved **[**24]** pursuant to *Federal Rule of Civil Procedure 12(b)(2)* to dismiss for lack of personal jurisdiction the EPP Complaint's ninety-nine non-New York, state-law claims, Dkt. No. 265. After the four motions to dismiss were fully briefed, the Court held oral argument on the motions on December 14, 2021.

DISCUSSION

I. Motion to Dismiss Direct Purchaser and Retailer Plaintiffs' Complaints

The Court turns first to Defendants' motion to dismiss the Direct Purchaser **[*471]** and Retailer Plaintiffs' Complaints for failure to state a claim. For brevity, in this section of the discussion, the Court's references to "Direct Purchaser Plaintiffs" and the "DPP Complaint" encompass Retailer Plaintiffs and Retailer Plaintiffs' Complaints, respectively.

Defendants argue that the settlement agreements and side agreements between Forest and each of the Generic Defendants are lawful, that the Direct Purchaser Plaintiffs' Complaint depends on improper generalized group pleading, that Direct Purchaser Plaintiffs' theories of causation fail as a matter of law and should be struck from the pleading, and that Direct Purchaser Plaintiffs' construction of the *Sherman Act* violates due process. Dkt. No. 269.

HN2[] To survive a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim **[**25]** upon which relief can be granted, a complaint must include "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 554, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). A complaint must offer more than "labels and conclusions," "a formulaic recitation of the elements of a cause of action," or "naked assertion[s]" devoid of "further factual enhancement" in order to survive dismissal. *Twombly, 550 U.S. at 555, 557*. The ultimate question is whether "[a] claim has facial plausibility, [i.e.,] the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "Determining whether a complaint states a plausible claim for relief will . . . be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679*. Put another way, the plausibility requirement "calls for enough fact to raise a reasonable expectation that discovery will reveal evidence [supporting the claim]." *Twombly, 550 U.S. at 556*; *see also* *Matrixx Initiatives, Inc. v. Siracusano, 563 U.S. 27, 46, 131 S. Ct. 1309, 179 L. Ed. 2d 398 (2011)*.[8]

A. Large and Unjustified Reverse Payments Under *FTC v. Actavis*

The theory of Direct Purchaser Plaintiffs' case relies heavily on *FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. ***HN3***[] In *FTC v. Actavis*, the Supreme Court held that antitrust cases premised **[**26]** on reverse-payment settlements of patent litigation—"reverse" because the settlement requires the patentee to pay the alleged infringer rather than the other way around—can sometimes violate the antitrust laws and must be evaluated under the rule of reason. *Id. at 140, 159*. That case arose in a similar context as that alleged by Direct Purchaser Plaintiffs here.

In *FTC v. Actavis*, two generic drug manufacturers—Actavis, Inc. and Paddock Laboratories ("Paddock")—filed ANDAs for a generic drug modeled after the brand-name drug AndroGel, and the brand **[*472]** manufacturer Solvay Pharmaceuticals ("Solvay") initiated paragraph IV patent litigation against the two generic manufacturers

[8] Defendants argue that Direct Purchaser Plaintiffs' allegations that the side agreements were pretextual sound in fraud and therefore must be pleaded with particularity in accordance with *Federal Rule of Civil Procedure 9(b)*. Dkt. No. 269 at 16-17. The Court will not apply a heightened pleading standard. In *FTC v. Actavis*, when faced with similar allegations—that the "true point of the payments" from the brand manufacturer to the generics "was to compensate the generics for agreeing not to compete against [the brand-name drug] until 2015," *570 U.S. 136, 145, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*—the Supreme Court did not impose the heightened pleading standard of *Rule 9(b)*.

pursuant to the Hatch-Waxman regulatory framework. *Id.* at 144-45. A fourth manufacturer, Par Pharmaceutical ("Par"), did not file its own application but joined forces with Paddock. *Id.* Solvay settled the patent litigation with the generic manufacturers in 2006. *Id.* at 145. Under the terms of the settlement, Actavis agreed not to bring its generic product to market until a date in 2015, nine years after the date of the settlement but sixty-five months before the brand manufacturer's patent expired. *Id.* Actavis also agreed to promote AndroGel to **[**27]** urologists. *Id.* The other generic manufacturers made generally similar promises. *Id.* In exchange, the brand manufacturer agreed to pay millions of dollars to each generic manufacturer—$12 million in total to Paddock; $60 million in total to Par; and about $19 to $30 million annually for nine years to Actavis. *Id.*

The Federal Trade Commission ("FTC") sued the brand manufacturer and the three generic manufacturers for violating *Section 5 of the Federal Trade Commission Act*, *15 U.S.C. § 45*. The FTC's theory was that the parties had engaged in a thinly camouflaged agreement to restrain trade: The generic manufacturers had agreed to refrain from launching their own generic products to compete with AndroGel for nine years in exchange for a share of the brand manufacturer's monopoly profits. *Actavis, 570 U.S. at 145*. The implicit premise was that, but for the agreement, the generic manufacturers would have been able to launch their competing products earlier. Although the pharmaceutical companies argued that the payments compensated the generics for services promised to be performed, the FTC claimed that the payments compensated the generics for agreeing not to compete against AndroGel until 2015. *Id.* The district court dismissed the FTC's complaint for failing to **[**28]** set forth an ***antitrust law*** violation, and the Court of Appeals for the Eleventh Circuit affirmed. *Id. at 145-46*.

The Supreme Court reversed and held that the FTC's dismissed complaint alleged reverse-payment settlements that may violate the antitrust laws and that the FTC's lawsuit should have been allowed to proceed. *Id. at 141*. The *Actavis* Court noted that "[t]he FTC alleges that in substance, the plaintiff agreed to pay the defendants many millions of dollars to stay out of its market, even though the defendants did not have any claim that the plaintiff was liable to them for damages." *Id. at 147*. And the Supreme Court continued that "[t]hat form of settlement is unusual" and that "there is reason for concern that settlements taking this form tend to have significant adverse effects on competition." *Id. at 147-48*.

The *Actavis* Court based its conclusion on five sets of considerations. *Id. at 153*. First, reverse-payment settlements of patent litigation have "the potential for genuine adverse effects on competition." *Id.* (internal quotation marks omitted). A "payment in return for staying out of the market . . . simply keeps prices at patentee-set levels, potentially producing the full patent-related $500 million monopoly return while dividing that return **[**29]** between the challenged patentee and the patent challenger"—"[t]he patentee and the challenger gain; the consumer loses." *Id. at 154*. Where there are indications that the brand manufacturer pays a generic manufacturer a sum even larger than what the generic would gain in profits if it won the paragraph IV litigation and entered the market, "a payment of this size cannot in every case be supported by traditional settlement considerations." *Id.* "The payment may instead provide **[*473]** strong evidence that the patentee seeks to induce the generic challenger to abandon its claim with a share of its monopoly profits that would otherwise be lost in a competitive market." *Id.*

Second, the Supreme Court recognized that "these anticompetitive consequences will at least sometimes prove unjustified." *Id. at 156*. "[O]ffsetting or redeeming virtues are sometimes present." *Id.* The *Actavis* Court explained:

> The reverse payment, for example, may amount to no more than a rough approximation of the litigation expenses saved through the settlement. That payment may reflect compensation for other services that the generic has promised to perform—such as distributing the patented item or helping to develop a market for that item. There may be **[**30]** other justifications. Where a reverse payment reflects traditional settlement considerations, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement. In such cases, the parties may have provided for a reverse payment without having sought or brought about the anticompetitive consequences we mentioned above.

Id. Yet, the Supreme Court continued, the possibility that a reverse payment may in some circumstances be supported by legitimate reasons "does not justify dismissing the FTC's complaint." *Id.* Rather "[a]n antitrust defendant may show in the antitrust proceeding that legitimate justifications are present, thereby explaining the presence of the challenged term and showing the lawfulness of that term under the rule of reason." *Id.*

Third, the Supreme Court reasoned that "where a reverse payment threatens to work unjustified anticompetitive harm, the patentee likely possesses the power to bring that harm about in practice." *Id. at 157*. And "[a]t least, the size of the payment from a branded drug manufacturer to a prospective generic is itself **[**31]** a strong indicator of power—namely, the power to charge prices higher than the competitive level." *Id.*

Fourth, the *Actavis* Court set forth the reasons for why such an antitrust action would not be administratively infeasible. *Id.* "[I]t is normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham)." *Id.* (citation omitted). Rather:

> An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness.

Id. In short, "the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself." *Id. at 158*.

The fifth and final consideration was that "the fact that a large, unjustified reverse payment risks antitrust liability does not **[**32]** prevent litigating parties from settling their lawsuit" in other ways. *Id.* For example, the brand manufacturer may "allow[] the generic manufacturer to enter the patentee's market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point." *Id.* When a settlement includes a reverse payment, the relevant antitrust question is why. "If the basic reason is a desire to maintain and to share patent-generated **[*474]** monopoly profits, then, in the absence of some other justification, the antitrust laws are likely to forbid the arrangement." *Id.*

The *Actavis* Court thus summarized its discussion:

> [A] reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects; one who makes such a payment may be unable to explain and to justify it; such a firm or individual may well possess market power derived from the patent; a court, by examining the size of the payment, may well be able to assess its likely anticompetitive effects along with its potential justifications without litigating the validity of the patent; and parties may well find ways to settle patent disputes without the use of reverse payments.

Id. These considerations **[**33]** led the *Actavis* Court to conclude that such settlements should not be categorically shielded from antitrust scrutiny. *Id.*

At the same time, however, the Supreme Court also rejected the FTC's argument that reverse-payment settlements should be deemed "presumptively unlawful" and be reviewed "via a 'quick look' approach." *Id. at 158-59*. Under that approach, any agreement pursuant to which a generic manufacturer agreed to honor a patent and to refrain from entering the market prior to the patent's expiration would be presumptively unlawful if the generic received payment in exchange for that promise, and the burden would then shift to the parties to that agreement to provide a legitimate pro-competitive justification for it. A complaint based solely on those allegations would survive a motion to dismiss, and the defendants would have to prove that "any money that changed hands was for something other than a delay, such as the generic manufacturer's provision of property or services unrelated to the brand-name manufacturer's monopoly." Brief for the Petitioner at 37, *FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* (No. 12-416) (internal quotation marks and citation omitted). The Supreme Court rejected the FTC's argument. *Actavis, 570 U.S. at 158-59*. It held that a quick-look approach **[**34]** "is appropriate only where an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *Id. at 159* (internal quotation marks omitted). The reverse-payment agreement did not fit into that category; it was not presumptively wrongful. *Id.* The Supreme Court reasoned that the anticompetitive nature of the agreement would depend on more particularized facts because "the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." *Id.* "These complexities," including also the variance among industries in the "existence and degree of any anticompetitive consequence," justified application of the rule of reason. *Id.*

Since *Actavis*, the lower federal courts have struggled with the standards set forth by the Supreme Court.[9] *See, e.g.*, *In **[*475]** re Namenda Indirect Purchaser Antitrust Litig., 2021 U.S. Dist. LEXIS 110081, 2021 WL 2403727, at *11 (S.D.N.Y. June 11, 2021)* (describing the Supreme Court's *Actavis* decision as "an opinion that has long bedeviled district courts"); *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 242 (D. Conn. 2015)* ("District courts applying *Actavis* have . **[**35]** . . had relatively little guidance on the question of what constitutes a 'large' and 'unjustified' reverse payment . . . ."); *In re Lipitor Antitrust Litig., 868 F.3d 231, 254 (3d Cir. 2017)* ("For its part, the Supreme Court in *Actavis* was deliberately opaque about the parameters of reverse payment antitrust claims."). The Second Circuit has not yet addressed what is sufficient to plead a large and unjustified reverse payment to overcome a motion to dismiss. ***HN4***[] The courts that have considered reverse-payment agreements have stated that, "[t]o trigger antitrust concern under *Actavis*, a settlement term must be '(1) a "payment" that is (2) made in "reverse"—that is, from the patent holder to the alleged infringer—and is [(3)] "large," and (4) "unexplained."'" *Sergeants Benevolent Ass'n Health & Welfare Fund v. Acta Vis, PLC, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *13 (S.D.N.Y. Sept. 13, 2016)* (quoting *In re Actos End Payor Antitrust Litig., 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *11 (S.D.N.Y. Sept. 22, 2015)*). "Because the existence and degree of any anticompetitive effects may vary depending on the particular settlement and the relevant industry, plaintiffs must show that the settlements are anticompetitive under the rule of reason analysis applied to other types of antitrust claims." *Id.* (internal quotation marks omitted). Moreover,

> [i]n this Circuit, [the rule of reason analysis] involves three steps: First, the plaintiff bears the initial burden of showing that the defendant's conduct had an actual **[**36]** adverse effect on competition as a whole in the relevant market. If plaintiff satisfies this burden, the burden then shifts to the defendant to offer evidence that its conduct had pro-competitive effects. If the defendant is able to offer such proof, the burden shifts back to plaintiff, who must prove that any legitimate competitive effects could have been achieved through less restrictive alternatives.

Id. (alterations adopted) (citing *Arkansas Carpenters Health & Welfare Fund v. Bayer AG, 604 F.3d 98, 104 (2d Cir. 2010)*).

However, those general statements beg the question what makes a payment "large" or "unjustified" and what facts must be alleged to plead a claim and open the doors to discovery. "In *Actavis*, the Court did not say what constitutes a 'large' or 'unjustified' reverse payment, but it instead instructed courts (1) to compare a payment to the payor's future litigation costs as a measure of scale to determine if it was 'large,' and (2) to consider whether a payment 'reflects traditional settlement considerations, such as avoided litigation costs or fair value for services' to determine if it was justified." *2016 U.S. Dist. LEXIS 128349, [WL] at *14*.

Courts in this Circuit have taken somewhat different approaches to those questions. For example, in *In re Actos End Payor Antitrust Litigation*, Judge Abrams **[**37]** concluded that "to meet their pleading burden as to whether the payments were 'large' and 'unjustified,' Plaintiffs must plausibly allege a factual basis for the Court to reasonably estimate the value of the settlement terms." *2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *19*. Judge Abrams continued, "Although **[*476]** Plaintiffs need not provide precise calculations at the pleading stage, here,

---

[9] The challenge is compounded by some ambiguity within *Actavis* itself. In summarizing its holding, the Supreme Court stated, "a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects," and also stated, "one who makes *such* a payment may be unable to explain and justify it." *Id. at 158*. The *Actavis* Court elsewhere stated that where the plaintiff has alleged a large and unjustified payment, "[a]n antitrust defendant may show in the antitrust proceeding that legitimate justifications are present, thereby explaining the presence of the challenged term and showing the lawfulness of that term under the rule of reason." *Id. at 156*. It is not clear from the four corners of the opinion the circumstances where a reverse payment may be both large and unjustified and still able to be explained and justified by the defendant.

they do not even attempt to provide a factual basis for the 'tens' and 'hundreds of millions' of dollars allegedly paid by [the brand manufacturer]." *Id.* Accordingly, those "bare allegations" were "insufficient for the Court to make a reasonable estimate of the settlements' value and determine whether they constituted large and unjustified payments." *Id.; see also* *In re Opana ER Antitrust Litig., 2016 U.S. Dist. LEXIS 23319, 2016 WL 738596, at *8-9 (N.D. Ill. Feb. 25, 2016)* ("[I]n order to raise a right to relief above the speculative level, [plaintiffs] must provide some reliable foundation to show an estimated value of the reverse payment and how that estimate was calculated. Further, [plaintiffs'] allegation that the reverse payment was 'an amount far above any litigation costs saved by Endo (or Impax) by settling,' fails to calculate what those saved costs actually were. Without this information, it is impossible to determine whether the payment was 'large' **[**38]** or 'unjustified' in comparison to the avoided litigation costs and any other services provided from Impact to Endo." (citation omitted)).

In *In re Aggrenox Antitrust Litigation*, Judge Underhill acknowledged that, "among the stronger of the defendants' arguments" is the argument that "the plaintiffs have not attempted to assign dollar values with significant precision or very obvious methodological justification to the various provisions of the settlement." *94 F. Supp. 3d at 244*. But he ultimately concluded that such allegations were not necessary because "very precise and particularized estimates of fair value and anticipated litigation costs may require evidence in the exclusive possession of the defendants, as well as expert analysis, and . . . these issues are sufficiently factual to require discovery." *Id.* Judge Underhill could not "conclude simply from the absence of precise figure that the pleadings represent formulaic recitations of elements and allegations that fail to rise above the speculative." *Id. at 244-45*. Rather, the complaints made "specific allegations about the terms of the settlement and their relative value that are plausible on their face." *Id. at 245*. The plaintiffs had "alleged that the total payment [was] **[**39]** far greater than the fair value of the services falling under [a] Co-Promotion Agreement, and therefore constitute[d] a large and unjustifiable reverse payment, which they allege[d was] especially clear since payment [was] guaranteed even without the generation of additional sales." *Id. at 243*. They also "allege[d] that [the brand manufacturer] agreed not to launch its own 'authorized generic' during [the generic manufacturer's] 180-day exclusivity period under the *Hatch-Waxman Act*, which further enlarged the reverse payment by constituting an additional unexplained transfer of value to [the generic]." *Id. at 244*. "Whether the plaintiffs can substantiate those allegations may be an issue for summary judgment or trial, but for purposes of the motions to dismiss, [the court] must accept the allegations as true and draw all reasonable inferences in the plaintiffs' favor." *Id. at 245*.

Similarly, in *Sergeants Benevolent Association Health and Welfare Fund v. Acta Vis, PLC*, Judge McMahon determined that the questions of whether a reverse payment is large and unjustified represent "intrinsically fact-based determinations [that] cannot be made on a pre-answer motion to dismiss." *2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *14*. There, the plaintiffs had alleged that, contemporaneously **[**40]** with the execution of each of the settlement agreements, the brand manufacturer made payments to cover the generic manufacturers' litigation costs and to provide other compensation for promoting the brand drug and also granted early-entry licenses, which allowed the generics to manufacture a generic version **[*477]** of the drug three months before patent expiration. *2016 U.S. Dist. LEXIS 128349, [WL] at *13-14*. Judge McMahon concluded that "[d]iscovery [was] needed to reveal whether the payments Forest made to the Generic Defendants were actually commensurate with the legal fees they expected to pay over the course of the ANDA A patent litigation, or constituted reasonable compensation for promoting brand-name Namenda IR to doctors and patients." *2016 U.S. Dist. LEXIS 128349, [WL] at *14*. The "[p]laintiffs [had] alleged that these payments exceeded reasonable costs and compensation." *Id.* And "without evidence related to what the Generic Defendants had already paid in legal fees and what they reasonably could be expected to continue paying if they had continued to litigate the patent infringement actions, the Court cannot say, as a matter of law, that the payments were not large and unjustified." *Id.* It appears that under Judge McMahon's approach, as well as under Judge Underhill's **[**41]** approach, a plaintiff need only plead the approximate amount of a payment and that it is large and unjustified in order to state a claim for relief under the general pleading standards of *Rule 8 of the Federal Rules of Civil Procedure*.

The Third Circuit has taken a similar approach. ***HN5***[] It has held that "[a] plaintiff can meet this pleading standard without describing in perfect detail the world without the reverse payment, calculating reliably the payment's exact size, or preempting every possible explanation for it." *Fed. Trade Comm'n v. AbbVie Inc, 976 F.3d 327, 356 (3d Cir. 2020)*; *see also* *In re Lipitor Antitrust Litig., 868 F.3d at 254*. "If a plaintiff plausibly alleges that an agreement's anticompetitive effects outweigh its procompetitive virtues, the district court must accept that allegation and allow the plaintiff to take discovery. If genuine issues of material fact remain, the rule-of-reason analysis is for the factfinder, not the court." *Fed. Trade Comm'n v. AbbVie Inc, 976 F.3d at 356*.

In describing the level of detail required to be pleaded for a reverse payment to be considered "large," the Third Circuit recounted the allegations in *Actavis* on the size of the reverse payment:

> There, the FTC alleged simply that a patentee "agreed to pay [a generic manufacturer] $10 million per year for six years," "agreed to pay [another generic manufacturer] $2 million per year for six years," and **[**42]** "projected that it would pay [a third generic manufacturer] about $19 million during the first year of its agreement, rising to over $30 million annually by the end of the deal."

In re Lipitor Antitrust Litig., 868 F.3d at 254-55 (alterations in original) (citations omitted). Further, "the FTC's complaint did not preemptively negate justifications for the reverse payments" and instead "simply alleged that the payments were meant to, and did, induce delay of likely successful patent challenges through the sharing of monopoly profits." *Id. at 255*. ***HN6***[] In other words, "[t]o plausibly allege an unjustified reverse payment, an antitrust plaintiff need only allege the absence of a convincing justification for the payment." *Id. at 256* (internal quotation marks omitted). Allegations that the value of the released patent litigation claims far exceeds any litigation costs the brand manufacturer avoided by settling are sufficient. *Id.* "[A]ll that need be alleged, at this juncture [i.e., the motion-to-dismiss stage], is that those [saved litigation] costs fail to explain the hundreds of millions of dollars of liability released by [the brand manufacturer]." *Id.* "[F]inely calibrated litigation cost estimates . . . are unnecessary at this stage of the litigation." *Id.*

[43]** In determining what must be pleaded to survive a motion to dismiss, the Court in the instant case takes additional guidance both from the Supreme Court's decision in *Twombly* and from the *Actavis* Court's **[*478]** rejection of the FTC's quick-look approach to reverse-payment settlements. The approach taken by those courts that have permitted complaints to go forward only on general allegations that a reverse payment is large and unjustified seems to be animated by a concern that applying the pleading standards too rigidly would permit many anticompetitive agreements to go unprosecuted and could render *Actavis* and the Sherman Act's protection against pay-for-delay agreements an empty promise: Clever competitors would shield their agreement from any review by characterizing those payments that are for delay as for consideration for some other service. Although some such characterizations might be accurate, a consumer who lacks information about the value of the service or the motivation for entering the agreement would have no means to challenge the competitors' characterization, obtain discovery, and ask a court to decide whether it was pretextual.

The Supreme Court addressed in *Twombly* the generalized concern that a requirement that a plaintiff plead facts to support a claim might result in some, and perhaps much, anticompetitive conduct going unredressed. The question there was whether allegations of parallel conduct along with the claim that the defendants entered into an agreement to restrain competition and to prevent competitive entry into each other's respective markets was sufficient to state a claim for relief and to require **[**44]** an answer and at least some minimal discovery. Justice Stevens' dissent reasoned that the alleged conduct was "entirely consistent with the *presence* of the illegal agreement alleged in the complaint," that plaintiffs were entitled to an answer at least "denying a charge that [defendants] in fact engaged in collective decisionmaking," and that any concerns that "[p]rivate antitrust litigation can be enormously expensive" can be addressed by "careful case management, including strict control of discovery." *Twombly, 550 U.S. at 573-74* (Stevens, J., dissenting). The Supreme Court majority answered that conduct that is consistent with and equally explicable by a pro-competitive justification—by each defendant acting in its own independent interest—and that raises only the possibility of anticompetitive conduct is not sufficient to state a claim and to subject the defendants to what it characterized as the "potentially enormous expense of discovery." *Id. at 559*; *see also id. at 556*. The *Twombly* Court was not oblivious to the fact that "in antitrust cases, . . . the proof is largely in the hands of the alleged conspirators," *id. at 586* (Stevens, J., dissenting) (internal quotation marks omitted) (quoting *Hospital Building Corp. v. Trustees of Rex Hospital, 425 U.S. 738, 746, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*), and that its decision would allow certain anticompetitive **[**45]** conduct to go unpunished. It was just skeptical that careful case management could weed out unmeritorious claims; and the majority concluded that the cost to defendants and to the judicial system of "allowing a potentially massive factual controversy to proceed" outweighed the risk that some meritorious claims might be dismissed. *Id. at 558* (quoting *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*).

The same concern—that wily defendants not be permitted to escape review and should be required to at least answer—also appears to have motivated the FTC's "quick-look" argument in *Actavis*. In its argument before the Supreme Court, the FTC recognized that a reverse-payment agreement was not necessarily anticompetitive and could be consistent with pro-competitive conduct. The FTC stated that an agreement might not be anticompetitive if "the payment was commensurate **[*479]** with the litigation costs that the brand-name manufacturer avoided by settling." Brief for the Petitioner at 38, *FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* (No. 12-416). According to the FTC, it also might not be anticompetitive if "the parties could show that any money that changed hands was for something other than a delay, such as the generic manufacturer's provision of property or services unrelated to the brand-name manufacturer's **[**46]** monopoly." *Id.* at 37 (internal quotation marks and citation omitted). "Although there is no fixed formula for making that showing, and a court would need to consider the totality of the circumstances surrounding the agreement," *id.*, the FTC provided a list of relevant considerations for a court to consider, including:

> whether the payment reflected bona fide fair consideration for the property or services; whether other terms of the side transaction comported with industry standards; the existence of previous dealings between the parties on the subject matter of the side transaction; a history of demonstrated interest in or need for the property or services on the part of the brand-name manufacturer; and the course and content of the manufacturers' negotiations over the agreements.

Id. at 37-38. The FTC simply argued that it should be up to the defendants to prove those facts and that, if the plaintiff proved the existence of an agreement pursuant to which the generic manufacturer agreed not to enter the market before a patent expired and the brand manufacturer agreed to pay the generic money or consideration, the agreement should be presumed to be anticompetitive, thus shifting the burden to **[**47]** the defendants in a rule-of-reason analysis to offer a procompetitive justification. *Id.* at 33, 37.

The Supreme Court, however, rejected the FTC's proposed quick-look approach to such agreements, *see* *570 U.S. at 159*, and held instead that it is insufficient for a plaintiff to merely establish the existence of a reverse-payment agreement to shift the burden to the defendants to offer procompetitive reasons to justify it. The Supreme Court thus held that it was not up to the defendants to show evidence in the first instance that the agreement was consistent with pro-competitive conduct. Rather, it appears that the *Actavis* Court concluded that the plaintiffs must show the absence of one or more of the factors that would be consistent with a pro-competitive justification. If, for example, a payment from a brand manufacturer to a generic manufacturer would be pro-competitive (even if the generic manufacturer also agreed to honor a patent) because it was consistent with "previous dealings between the parties on the subject matter of the side transaction" or "a history of demonstrated interest in or need for the property or services on the part of the brand-name manufacturer," it would fall to the plaintiff in the first instance **[**48]** to allege facts suggesting the absence of any such pro-competitive justification. ***HN7***[] In the words of the *Twombly* Court, conduct that is equally consistent with a pro-competitive as with an anticompetitive justification is not sufficient to "nudge[] [plaintiffs'] claims across the line from conceivable to plausible." *550 U.S. at 570*.

HN8[] "[T]o determine what the plaintiff must plausibly allege at the outset of a lawsuit, [the court] usually ask[s] what the plaintiff must prove in the trial at its end." *Comcast Corp. v. Nat'l Ass'n of Afr. Am.-Owned Media, 140 S. Ct. 1009, 1014, 206 L. Ed. 2d 356 (2020)*. It thus appears, and the Court holds, that to state a claim under *Actavis*, a plaintiff must allege more than a general statement simply asserting that a reverse payment is large and unjustified (or was made pursuant **[*480]** to a simultaneously executed side agreement) and that the generic manufacturer agreed not to enter the market before the patent expired. Such a standard would replicate at the pleading stage the "quick-look" approach the Supreme Court rejected at least for the trial stage. Rather, the plaintiff must plead *facts* that would support the claim that the reverse payment was "large" and "unjustified," i.e., that it was not simply possible that the defendants engaged in the anticompetitive conduct of paying the generic **[**49]** manufacturer to forego entering the market but that it was plausible.

HN9[] A showing that a reverse payment is "large" can be established by factual allegations plausibly suggesting that the payment is larger than the payor's anticipated future litigation costs. *See* Actavis, 570 U.S. at 159 (describing likelihood of reverse payment bringing about anticompetitive effects as dependent on payment's "scale in relation to the payor's anticipated future litigation costs"); Sergeants Benevolent Ass'n, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *14; In re Opana ER Antitrust Litig., 162 F. Supp. 3d at 718; *cf.* In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 243 ("[P]ayments smaller than avoided litigation costs are presumptively not large and unexplained under Actavis, and represent a *de facto* safe harbor . . . ."). Actavis specifically directs courts to consider the reverse payment's scale in comparison to the payor's anticipated future litigation costs—not relative to other figures such as the possible profits a generic manufacturer could make by entering the market for the brand-name drug or the brand manufacturer's profits on that drug. *See* In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2015 U.S. Dist. LEXIS 125999, 2015 WL 5458570, at *9 (D. Mass. Sept. 16, 2015) ("Actavis specifically provided that an appropriate benchmark for the size of a reverse payment is 'its scale in relation to the payor's anticipated future litigation costs.'" (alteration adopted)). It is also not necessary that the plaintiff allege "very precise and particularized" **[**50]** estimates of actual anticipated litigation costs; such facts likely are in the exclusive possession of defendants and may require expert analysis. In re Aggrenox Antiturst Litig., 94 F. Supp. 3d at 244-45.

HN10[] In addition, a plaintiff must allege facts to plausibly suggest that the reverse payment is "unjustified." An unjustified reverse payment is one that does not reflect traditional settlement considerations such as avoided litigation costs or fair value for services. *See* Sergeants Benevolent Ass'n, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *14; In re Opana ER Antitrust Litig., 162 F. Supp. 3d at 718. The FTC in Actavis mentioned both of these considerations in explaining what might justify a reverse payment. *See* Brief for the Petitioner at 37-38, FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013) (No. 12-416) (discussing payments that "reflect[] bona fide fair consideration for the property or services" or are "commensurate with the litigation costs that the brand-name manufacturer avoided by settling"). Thus, for example, if the payment on its face is for some services (and not for avoided litigation costs), the plaintiff might satisfy its pleading burden with facts showing the negative of what the FTC claimed would be evidence of a pro-competitive agreement—e.g., that the terms of the side transaction were not for fair value; that the terms did not comport with industry standards; that there were no previous dealings **[**51]** between the parties on the subject matter of the side transaction; that there was no history of demonstrated interest in or need for the property or services on the part of the brand-name manufacturer; or that the course and content of the manufacturers' negotiations **[*481]** over the agreements suggested that the purported justification for the agreement was pretextual and that the real reason for the payment was to preserve the brand manufacturer's monopoly. *See id.*; In re Lipitor Antitrust Litig., 868 F.3d at 256 ("To plausibly allege an unjustified reverse payment, an antitrust plaintiff need only allege the absence of a 'convincing justification' for the payment."). Allegations regarding these types of considerations are relevant to whether a reverse-payment agreement is "unjustified." HN11[] A plaintiff need not "preempt[] every possible explanation" for the reverse payment to survive a motion to dismiss, Fed. Trade Comm'n v. AbbVie Inc, 976 F.3d at 356, but a plaintiff must plead at least some facts of this nature to sufficiently allege an unjustified agreement.

With these principles in mind, the Court turns to the allegations of the DPP Complaint.

B. The Alleged Settlement Agreements and Side Agreements

In their motion to dismiss for failure to state a claim, Defendants argue that the **[**52]** settlement agreements and side agreements between Forest and each of the Generic Defendants are not unlawful reverse-payment agreements under *Actavis*. Dkt. No. 269 at 7-40. More specifically, Defendants argue that the settlement agreements, considered separately from the side agreements, include payments for avoided litigation costs and are not large and unexplained. *Id.* at 7-10. Further, they argue that it is not pleaded that the payments associated with the side agreements are related to the decision to settle or that they exceed the fair value of services rendered, are unexplained, or are large. *Id.* at 11-19.

Direct Purchaser Plaintiffs respond that the payments from the settlement agreements and the side agreements together represent large reverse payments and that they allege the payments exceed the fair market value of any goods or services agreed to be provided (though, they maintain, this latter allegation is not required at the pleading stage). Dkt. No. 285 at 15-22. They also argue that the payments are unexplained and that Defendants have the burden of justifying the reverse payments. *Id.* at 22-24.

The parties first debate whether the complaint plausibly alleges that the settlement **[**53]** agreements and side agreements are related to one another. The Court concludes that the complaint does so. ***HN12***[] "A settlement agreement may be very simple or tremendously complex, and it may involve all manner of consideration; and if, when viewed holistically, it effects a large and unexplained net transfer of value from the patent-holder to the alleged patent-infringer, it may fairly be called a reverse-payment settlement." *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 243*. Where a plaintiff has plausibly pleaded that several agreements are connected, the Court must accept those allegations as true on a motion to dismiss. *See Fed. Trade Comm'n v. AbbVie Inc, 976 F.3d at 358* ("Here, the FTC plausibly alleged that AbbVie's settlement with Teva and the TriCor deal were linked. The Court had to accept that allegation as true."); *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 752 (E.D. Pa. 2014)* ("[D]efendants may not improperly 'dismember' plaintiffs' Consolidated Amended Complaints by examining each of the three settlement agreements in isolation. Rather, the Licensing Agreement must be read in conjunction with the Co-Promotion and Manufacturing Agreements executed that same day." (citations omitted)); *In re Opana ER Antitrust Litig., 162 F. Supp. 3d at 718* (disagreeing with defendants' assessment of the components of a settlement "in piecemeal fashion" and instead stating that "[t]he Court must determine **[**54]** whether, **[*482]** when taken as a whole, the total payment" received under the agreements was large and unjustified).

Here, Direct Purchaser Plaintiffs have sufficiently and plausibly alleged that Forest admitted that each settlement agreement and each side agreement was connected to the settlement of the Bystolic patent dispute. The DPP Complaint does not simply assert the conclusion but instead alleges facts to support that conclusion. In particular, it alleges that outside counsel for Forest, in connection with work on the Forest-Actavis merger, asked for "all of the Bystolic settlement and licensing agreements as well as the side agreements with those generic companies" before counsel engaged in discussions with the FTC. DPP Compl. ¶ 8. Forest responded that it had "side deals" with all of the companies with whom it had settlement agreements. *Id.* ¶¶ 8, 151. In the Forest-Actavis merger agreement, Forest also allegedly listed all of the settlement agreements and the side agreements as material contracts in connection with the settlement of the Bystolic patent dispute. *Id.* ¶¶ 9-17. That allegation, and Forest's characterization of the agreements as "side deals," is sufficient at this stage **[**55]** to support the inference that they are related, particularly given that each of the side agreements was executed in close temporal proximity—sometimes on the same day—with the related settlement agreements.

The Court now turns to the agreements with each of the Generic Defendants to determine whether Direct Purchaser Plaintiffs sufficiently allege that such agreements (the settlement agreement and side deal read together) support the plausible inference of a large and unexplained reverse payment under *Actavis*. The Court analyzes Forest's agreements with each of the Generic Defendants separately by Generic Defendant. ***HN13***[] Where there are multiple generic manufacturers, it does not follow that simply because a reverse-payment agreement with one Generic Defendant is anticompetitive, the brand manufacturer's agreements with every other Generic Defendant is anticompetitive.[10] **[*483]** Likewise, the fact that one or more reverse-payment agreements a brand manufacturer

---

[10] Relatedly, Direct Purchaser Plaintiffs argue that the contingent launch provision in each of the settlement agreements supports joint and several liability for all Defendants if one or more of them have been found liable for agreeing to an unlawful reverse payment. Dkt. No. 285 at 43-45, 44 n.19. To support this argument, Direct Purchaser Plaintiffs rely on tort principles and cite to *In re Modafinil Antitrust Litigation, 837 F.3d 238 (3d Cir. 2016)*. This argument is not sound. ***HN15***[] "Under the doctrine of joint and several liability, '[i]f the tortious conduct of each of two or more persons is a legal cause of harm that cannot be apportioned, each is subject to liability for the entire harm, irrespective of whether their conduct is concurring or consecutive.'" *Id. at 262 n.29* (alteration in original) (quoting *Restatement (Second) of Torts § 879* (1979)). The doctrine requires that each liable person engage in tortious conduct. By analogy, each defendant to be held jointly and severally liable must have engaged in anticompetitive conduct. But Direct Purchaser Plaintiffs seek to hold liable even those that have *not* agreed to an anticompetitive reverse-payment agreement by virtue of a contingent launch provision, which by itself has the effect of increasing competition if activated. Similarly, *In re Modafinil Antitrust Litigation* does not support Direct Purchaser Plaintiffs' conclusion. In that case, which involved similar allegations of reverse-settlement agreements, the defendants appealed the district court's class

has with a Generic Defendant is not large or is justified would not establish that no other reverse agreement is anticompetitive. A patent owner who legitimately secures an agreement with one or more potential generic competitors that would prevent **[**56]** the generic from entering the market may still enter an anticompetitive agreement with the remaining potential competitors. ***HN14***[] As the Supreme Court observed in *Iqbal*, "[d]etermining whether a complaint states a plausible claim for relief will . . . be a context-specific task." *Iqbal, 556 U.S. at 679*.

1. Hetero

Forest executed the settlement agreement with Hetero to resolve the patent litigation on October 24, 2012. DPP Compl. ¶ 153. In addition to releasing the claims, the agreement included a maximum payment of $200,000 for Forest's avoided litigation fees and Hetero's litigation fees. *Id.*; Dkt. No. 270-1. Hetero also received a license to sell generic Bystolic three months before the patent expired, i.e., September 2021, and agreed to not otherwise manufacture or market any generic equivalent of Bystolic prior to the expiration of the patent. Dkt. No. 270-1.

A few weeks earlier, on October 5, 2012, Forest and Hetero also executed a final term sheet for a supply agreement for [TEXT REDACTED BY THE COURT]. DPP Compl. ¶ 153. The final term sheet included a term requiring Forest to [TEXT REDACTED BY THE COURT] of the supply agreement to be entered into by the parties. Dkt. No. **[**57]** 270-2. Based on Forest's stated estimate of requirements for [TEXT REDACTED BY THE COURT], Forest would allegedly pay Hetero $[TEXT REDACTED BY THE COURT] million (before any price adjustments). DPP Compl. ¶ 153; Dkt. No. 270-2. The parties "agree[d] that their respective obligations contained in the 'Obligations' section of this term sheet are effective as of the Term Sheet Date." Dkt. No. 270-2. The Obligations section provides:

Following execution of this Term Sheet by both Parties:

- the Parties shall negotiate and enter into the Agreement, which shall contain the terms set forth in this Term Sheet and other terms and conditions that are typical for manufacturing and supply agreements of [TEXT REDACTED BY THE COURT];
- the Parties shall cooperate in good faith to obtain the FDA's approval [TEXT REDACTED BY THE COURT]; and
- Forest shall use good faith efforts to amend its current supply agreements with [TEXT REDACTED BY THE COURT]. Forest expects full cooperation from [TEXT REDACTED BY THE COURT] and that such amendment will be completed together with the completion of the Agreement.

Id.

Direct Purchaser Plaintiffs allege that, prior to the Hetero agreement, Forest had been able to obtain **[**58]** sufficient amount of [TEXT REDACTED BY THE COURT] without a supply agreement with Hetero, and that, on information and **[*484]** belief, Forest did not need such an agreement in October 2012. DPP Compl. ¶ 154. They also allege, on information and belief, that the payments under the supply agreement exceeded the fair value of any

---

certification decision. One of the defendants' arguments was that predominance under *Rule 23(b)(3)* cannot be demonstrated because the plaintiffs' theory of liability must isolate the harm that each individual reverse-payment settlement agreement caused each individual class member under the doctrine of antitrust standing. *Id. at 261*. The defendants argued that the plaintiffs were attempting to circumvent the doctrine of antitrust standing by asserting the theory of joint and several liability. *Id. at 262*. The Third Circuit rejected the defendants' argument and determined that "because all four [generic manufacturers allegedly] entered into these reverse-payment settlement agreements and prevented a competitive market from forming, each contributed to the market-wide harm, and each can be held jointly and severally liable for such harm." *Id. at 266*. Putting aside that this discussion was in the context of a class certification decision, the Third Circuit's conclusion also explicitly relied on all four generic manufacturers allegedly entering into anticompetitive arrangements with the brand manufacturer. In other words, each entity to be held jointly and severally liable had entered into an anticompetitive agreement. By contrast, Direct Purchaser Plaintiffs here, solely based on the competition-increasing contingent launch provisions, attempt to hold liable even those Defendants who are not determined to be parties to anticompetitive reverse-settlement agreements.

products or services rendered by Hetero and that the agreement itself was a pretextual conduit of cash from Forest to induce Hetero to agree not to compete in the nebivolol market until September 2021. *Id.*

The alleged $[TEXT REDACTED BY THE COURT] million payment that Forest would make to Hetero under the terms of the final term sheet for the supply agreement is large under *Actavis* as it is well beyond any estimated or anticipated avoided litigation costs. The DPP Complaint alleges that Forest's saved litigation costs with respect to each Generic Defendant were far less than $5-6 million; but, even assuming the comparator to be an upper-bound figure of $5-6 million, the alleged reverse payment is large.

Though Direct Purchaser Plaintiffs plead a large reverse payment, they have failed to plead that it is unjustified and have thus not "nudged their claims across the line from **[**59]** conceivable to plausible." *Twombly, 550 U.S. at 570*. The allegations with respect to Hetero squarely raise the questions—also directly presented by the allegations regarding Forest's agreements with the other Generic Defendants—what kinds of allegations should be considered to be "labels and conclusions" or "naked assertion[s]" devoid of further factual enhancement under *Twombly, id. at 555, 557*, and to what extent a party can rely on "information and belief" allegations to satisfy its *Rule 8* pleading obligations to state an antitrust claim. ***HN16***[] The Second Circuit has held that a plaintiff may plead facts "upon information and belief where the facts are peculiarly within the possession and control of the defendant, or where the belief is based on factual information that makes the inference of culpability plausible." *Arista Recs., LLC v. Doe 3, 604 F.3d 110, 120 (2d Cir. 2010)* (internal quotation marks and citations omitted). The allegations that the payments pursuant to the [TEXT REDACTED BY THE COURT] supply agreement exceeded the fair value of any products delivered or services rendered by Hetero and that the agreement was a pretextual conduit of cash in exchange for an agreement not to compete, in isolation, are labels and conclusions. They could be asserted in every case in which there **[**60]** is a side agreement with a generic manufacturer who agrees to honor a patent. If those naked allegations were enough to require an answer and to shift the burden to the defendant to prove fair value and the absence of pretext, there would be nothing left of the Supreme Court's rejection of the per se rule in *Actavis*.

The only remaining allegation is that, on information and belief, Forest did not need a supply agreement with Hetero in October 2012 because Forest had been able to obtain sufficient amounts of [TEXT REDACTED BY THE COURT] from its existing supplier, [TEXT REDACTED BY THE COURT]. It is true that alleging facts regarding the lack of a history of demonstrated interest in or need for the property or service on the part of Forest could raise an inference that the reverse payment is unjustified. But Direct Purchaser Plaintiffs here do not allege such facts. Direct Purchaser Plaintiffs have not pleaded, for instance, that Forest had expressed no interest in entering into a new supply agreement, that Forest was content was its current arrangement with [TEXT REDACTED BY THE COURT] that Forest entered this new agreement suddenly and without standard negotiations, or any other facts suggesting **[**61]** something unusual in Forest's new supply agreement with Hetero. Instead, they merely plead, on information and belief, that Forest had no need for the supply agreement based on the allegation that Forest had been able to obtain **[*485]** sufficient [TEXT REDACTED BY THE COURT] in the absence of a new agreement with Hetero. However, the allegation of sufficient existing supply, alone, does not "make[] the inference of culpability plausible." *Arista Recs., 604 F.3d at 120*. Simply alleging that Forest had been acquiring [TEXT REDACTED BY THE COURT] from another source (i.e., [TEXT REDACTED BY THE COURT]) is insufficient to raise a plausible inference that Forest had no need for another source of supply or that the [TEXT REDACTED BY THE COURT] supply agreement with Hetero is unjustified. Indeed, the fact that Forest had sufficient [TEXT REDACTED BY THE COURT] could be entirely consistent with the opposite conclusion from the one offered by Direct Purchaser Plaintiffs—i.e., that Forest was in great need of another supplier. *Cf. Twombly, 550 U.S. at 554* (finding allegations "consistent with conspiracy, but just as much in line with a wide swath of rational and competitive business strategy" insufficient to state an antitrust claim). Though Forest was **[**62]** obtaining sufficient [TEXT REDACTED BY THE COURT], there is nothing pleaded to indicate that Forest was not simultaneously expressing dissatisfaction with its arrangement with [TEXT REDACTED BY THE COURT] or actively seeking alternative or supplemental suppliers. Even after drawing all inferences in favor of the non-movant, as the Court must on a motion to dismiss, there is nothing about Forest's sufficient existing supply of [TEXT REDACTED BY THE COURT] alone that plausibly pleads an unjustified reverse payment.

Aside from these allegations, the DPP Complaint offers nothing to support why the reverse-payment agreement is unjustified. Direct Purchaser Plaintiffs do not offer any facts alleging, for example: that while Forest agreed to pay $[TEXT REDACTED BY THE COURT] million to Hetero for [TEXT REDACTED BY THE COURT], Forest could have obtained that same [TEXT REDACTED BY THE COURT] from another supplier at a significantly lower price; that the terms of Forest's [TEXT REDACTED BY THE COURT] agreement with Hetero were unusual when compared with industry standards; that Forest and Hetero had never had any previous dealings on supply agreements and that Forest had previously expressed **[**63]** no interest in entering into a supply agreement with Hetero; or that the course and content of Forest's negotiations with Hetero revealed a reason why the agreement would be unjustified. Factual allegations like these might plausibly support that the reverse payment is unjustified. But without further factual enhancement, Direct Purchaser Plaintiffs' allegations remain in "neutral territory" and fall short of stating a claim. *Twombly, 550 U.S. at 557*.

Direct Purchaser Plaintiffs offer several arguments against dismissing their claim with respect to Hetero, but none of these arguments cures their defective pleading. Direct Purchaser Plaintiffs first rebut Defendants' argument that it was a reasonable business decision for Forest to negotiate a possible [TEXT REDACTED BY THE COURT] supply agreement with Hetero, [TEXT REDACTED BY THE COURT], in order to reduce its dependence on [TEXT REDACTED BY THE COURT]. *See* Dkt. No. 285 at 27; *see also* Dkt. No. 269 at 21, 23. Direct Purchaser Plaintiffs are correct that these allegations are not in the DPP Complaint, and thus, the Court cannot credit them on a motion to dismiss. The Court does not rely on Defendants' contrary allegations in holding that Direct Purchaser Plaintiffs' **[**64]** have failed to state a claim. As discussed, the DPP Complaint itself does not provide the factual grounding sufficient to allege an unjustified reverse payment.

Direct Purchaser Plaintiffs are also correct in arguing that Defendants cannot obtain dismissal by asserting that the Hetero supply agreement represented a potential savings for [TEXT REDACTED BY THE COURT]. Dkt. No. 285 at 27. Defendants submit a copy of the [TEXT REDACTED BY THE COURT] agreement in connection with their motion to dismiss and argue that the terms of this agreement reveal that Forest would have received more favorable price terms under the supply **[*486]** agreement with Hetero than its existing agreement with [TEXT REDACTED BY THE COURT].[11] Dkt. No. 269 at 14, 23. In other words, Defendants argue that Forest had an "economically rational incentive" to enter in the supply agreement envisioned by the term sheet. *Id.* at 14. Defendants contend that the final term sheet with Hetero represents a potential savings in the purchase of [TEXT REDACTED BY THE COURT] because the term sheet shows that Forest would initially be paying [TEXT REDACTED BY THE COURT] while the [TEXT REDACTED BY THE COURT] agreement required Forest to pay **[**65]** up to a maximum of [TEXT REDACTED BY THE COURT]. *Id.* at 23. But the [TEXT REDACTED BY THE COURT] agreement contains a cap on what Forest would be required to pay; neither the agreement nor the DPP Complaint reveals what Forest actually paid or was expecting to pay [TEXT REDACTED BY THE COURT]. Without this information, Defendants' argument that the [TEXT REDACTED BY THE COURT] agreement on its face discredits any allegation of overpayment is without merit.

Direct Purchaser Plaintiffs are also correct that the unfinalized nature of the final term sheet does not stand as a barrier to stating a claim. Dkt. No. 285 at 28-29. Defendants highlight that the side deal was reflected only in a final term sheet but not in a finalized supply agreement. Dkt. No. 269 at 21-22. According to Defendants, the final term sheet merely described the terms of a potential supply agreement, which was contingent on the response of an unrelated third party ([TEXT REDACTED BY THE COURT]), FDA approval for use of Hetero's supply, and finalizing the agreement. *Id.* However, Defendants do not dispute that the term sheet created obligations on Forest (as well as on Hetero) and that those obligations had value. **[**66]** The term sheet obligated the parties to: (1) negotiate and enter into a finalized supply agreement containing the terms of the term sheet—including the [TEXT

---

[11] As Direct Purchaser Plaintiffs refer to the [TEXT REDACTED BY THE COURT] agreement in the DPP Complaint and rely on its effect, the Court may consider it on a motion to dismiss. *See* *Broder v. Cablevision Sys. Corp., 418 F.3d 187, 196 (2d Cir. 2005)* ("Where a plaintiff has 'rel[ied] on the terms and effect of a document in drafting the complaint,' and that document is thus 'integral to the complaint,' [the court] may consider its contents even if it is not formally incorporated by reference." (alteration in original) (quoting *Chambers v. Time Warner, Inc., 282 F.3d 147, 153 (2d Cir. 2002)*)).

REDACTED BY THE COURT] pricing and quantity terms allegedly amounting to $[TEXT REDACTED BY THE COURT] million in payments from Forest to Hetero; (2) "cooperate in good faith to obtain the FDA's approval or deemed approval" for use of Hetero's [TEXT REDACTED BY THE COURT] in Bystolic; and (3) "use good faith efforts to amend its current supply agreements with [[TEXT REDACTED BY THE COURT]] to permit Forest to meet the Purchase Minimum." Dkt. No. 270-2. Thus, at a minimum, the final term sheet appears to constitute a preliminary agreement of the Type II variety, which "creates an 'obligation to negotiate the open issues in good faith in an attempt to reach the [ultimate contractual objective] within the agreed framework.'" *Brown v. Cara, 420 F.3d 148, 157 (2d Cir. 2005)* (alteration in original) (quoting *Tchrs. Ins. & Annuity Ass'n of Am. v. Trib. Co., 670 F. Supp. 491, 498 (S.D.N.Y. 1987)*). The final term sheet thus created an obligation to negotiate a finalized agreement, "which shall contain the terms set forth in this Term Sheet." Dkt. No. 270-2. ***HN17***[] "An allegation of an actionable reverse-payment settlement, however, does not require an enforceable contract." **[**67]** *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2015 U.S. Dist. LEXIS 125999, 2015 WL 5458570, at *9* (citing *Am. Tobacco Co. v. United States, 328 U.S. 781, 809, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*, for the proposition that "[n]o formal agreement is necessary to constitute an unlawful conspiracy"). Even if the term sheet here did not itself bind Forest to the ultimate contractual goal, it did obligate Forest to "negotiate and enter **[*487]** into a finalized supply agreement" that would include the [TEXT REDACTED BY THE COURT] pricing and quantity terms amounting to $[TEXT REDACTED BY THE COURT] million in payments from Forest to Hetero. The fact that final papers were not yet documented and signed does not itself prevent the agreement the parties did reach from being considered anticompetitive under *Actavis. See id.* (rejecting argument that lack of legal commitment and requirement that parties negotiate in good faith to reach a definitive licensing and partnership agreement is insufficient to state a claim under *Actavis*).

In any event, Direct Purchaser Plaintiffs cannot overcome their failure to plead that the large reverse payment is unjustified. For that reason, the Court holds that Direct Purchaser Plaintiffs have failed to state a claim with respect to the Hetero agreements.

2. Torrent

Forest's settlement agreement with Torrent was executed on November 21, 2012, and, in addition to **[**68]** releasing the claims, the agreement granted Torrent a license to sell generic Bystolic three months before patent expiration, i.e., September 2021; obligated Torrent to not otherwise manufacture or market any generic equivalent of Bystolic before the patent expired; and included a payment of up to $1 million from Forest to Torrent for Torrent's expended litigation fees and in partial consideration of Forest's saved legal fees. DPP Compl. ¶ 156; Dkt. No. 270-12. On the same day, Forest and Torrent executed a patent assignment agreement under which Forest agreed to purchase ten patents related to manufacturing nebivolol for a non-refundable, upfront payment of $[TEXT REDACTED BY THE COURT] million plus an additional $[TEXT REDACTED BY THE COURT] million in milestone payments, for a total of $[TEXT REDACTED BY THE COURT] million. DPP Compl. ¶ 156; Dkt. No. 270-13. Direct Purchaser Plaintiffs allege that the conditions of the milestone payments were not difficult to satisfy. DPP. Compl. ¶ 157. They also allege that, because Forest had manufactured and marketed nebivolol in the United States and other jurisdictions without licenses from Torrent, Forest already had all of the intellectual **[**69]** property that it needed to successfully manufacture and sell Bystolic, and thus the Torrent patents had little or no value to Forest. *Id.* ¶ 158. They allege, on information and belief, that Forest knew about Torrent's patents prior to the patent assignment agreement, and only executed the patent assignment agreement in exchange for Torrent's agreement to refrain from marketing generic Bystolic until September 2021. *Id.* They further allege, on information and belief, that the payments related to the patent assignment agreement exceeded the fair value of any products delivered or services rendered by Torrent and that the agreement itself was a pretextual conduit of cash from Forest to induce Torrent not to compete in the nebivolol market until September 2021. *Id.*

The alleged payment from Forest to Torrent under the patent assignment agreement represents a large reverse payment. In exchange for ten patents, the agreement allegedly provided for a $[TEXT REDACTED BY THE COURT] million payment and an additional $[TEXT REDACTED BY THE COURT] million in milestone payments, which were allegedly easy to achieve, for a total of $[TEXT REDACTED BY THE COURT] million—significantly larger than Forest's **[**70]** saved litigation costs, which are pleaded to be less than $5-6 million. This is so even assuming the saved litigation costs are in the range of $5-6 million. Defendants' arguments to the contrary are not persuasive. Defendants argue that the DPP Complaint does not allege that payments were actually made under the patent assignment agreement. Dkt. No. 269 at 32. But the thrust of the DPP Complaint's allegation is that Forest and Torrent entered into an **[*488]** agreement that binds Forest to make such payments to Torrent. Defendants also argue that the maximum possible payment of $[TEXT REDACTED BY THE COURT] million corresponds to $[TEXT REDACTED BY THE COURT] million per patent, which is not large. *Id.* But Defendants cite no authority supporting their methodology of dividing the total alleged payment into certain smaller units before determining whether a payment is large. Courts, in fact, favor reviewing the total payment received by a generic manufacturer under an agreement "as a whole" rather than reviewing the components of the agreement "in piecemeal fashion." *In re Opana ER Antitrust Litig., 162 F. Supp. 3d at 718*; *see* *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 243* ("A settlement agreement may be very simple or tremendously complex, and it may involve all manner of consideration; and **[**71]** if, *when viewed holistically*, it effects a large and unexplained net transfer of value from the patent-holder to the alleged patent-infringer, it may fairly be called a reverse-payment settlement." (emphasis added)). Direct Purchaser Plaintiffs have therefore alleged enough to plead a large reverse payment under *Actavis*.

As with the DPP Complaint's allegations regarding the Hetero agreements, however, the allegations about the Torrent agreements fall short of the requirement that the allegedly large reverse payment be unexplained or unjustified. As with the Hetero agreements, the Court does not credit or rely upon the conclusory allegation here that the payments related to the patent assignment agreement exceeded the fair value of any products delivered or services rendered by Torrent and that the agreement was a pretextual conduit of cash from Forest to induce Torrent not to compete. Additionally, the allegation, pleaded on information and belief, that Forest only executed the patent assignment agreement in exchange for Torrent's agreement to refrain from marketing generic Bystolic until September 2021 is similarly conclusory. All that remains are the allegations that the Torrent patents **[**72]** had little or no value to Forest because Forest had been able to successfully manufacture and sell Bystolic without that intellectual property and that, on information and belief, Forest knew about Torrent's patents before executing the patent assignment agreement. But, for reasons analogous to the ones given above with respect to the Hetero allegations, these allegations cannot plausibly support that the large reverse payment is unjustified. It does not plausibly follow that, because Forest had been able to manufacture and sell Bystolic, the Torrent patents had little or no value to Forest; there is a missing link between the first statement and the conclusion of no value. If the DPP Complaint contained factual allegations to support that the Torrent patents had little or no value to Forest, the DPP Complaint would then speak to the absence of bona fide fair consideration for the patents and the lack of Forest's need for these patents, both of which suggest the existence of an unjustified reverse payment. But what is pleaded is deficient.

Again, Direct Purchaser Plaintiffs could have, for example, pleaded facts: independently estimating the value of the patents; explaining why this **[**73]** patent assignment agreement did not comport with industry standards; showing that there had not been any previous dealings or discussions between Forest and Torrent on these patents; demonstrating that Forest had previously expressed no interest in these patents; or describing negotiations that were out of the ordinary for such patent assignment agreements. Such facts might plausibly plead that the large reverse payment is unjustified here. In fact, in their memorandum of law opposing Defendants' motion, Direct Purchaser Plaintiffs argue that "having sold billions of dollars' worth **[*489]** of Bystolic without the use of Torrent's patents, it is not plausible that Forest would reformulate the product at the end of its lifecycle." Dkt. No. 285 at 30. This assertion—reflecting why the patent assignment agreement may depart from standard industry practice—gets closer to the type of factual allegations that might be sufficient to show that the agreement is unjustified. ***HN18***[] But the DPP Complaint does not contain this allegation, and "[i]t is axiomatic that the Complaint cannot be amended by the briefs in opposition to a motion to dismiss." *Cambridge Cap. LLC v. Ruby Has LLC, 565 F. Supp. 3d 420, 2021 U.S. Dist. LEXIS 188635, 2021 WL 4481183, at *19 n.11 (S.D.N.Y. Sept. 30, 2021)* (alteration in original) (internal quotation marks omitted) **[**74]** (quoting *United States ex rel. Foreman v. AECOM, 454 F. Supp. 3d 254, 268 (S.D.N.Y. 2020)*); *see also* *Soules v. Connecticut, Dep't of Emergency Servs. & Pub. Prot., 882 F.3d 52, 56 (2d Cir. 2018)* ("Ordinarily, parties may not amend the pleadings through motion papers."). Thus, as pleaded, the DPP Complaint is lacking.

Direct Purchaser Plaintiffs argue that the Court may not rely on Defendants' narrative that such patent assignment agreements are "*de rigueur*" and that the patents covered a process that could be valuable to Forest and its customers. Dkt. No. 285 at 29-30. Direct Purchaser Plaintiffs are correct that such allegations by the movant are not included in the DPP Complaint and are thus not properly before the Court on a motion to dismiss. The Court does not credit Defendants' allegations in finding the DPP Complaint wanting. Rather, it falls short for not pleading facts regarding why the large reverse payment is unjustified.

The Court therefore holds that Direct Purchaser Plaintiffs have failed to state a claim with respect to the Torrent agreements.

3. Alkem/Indchemie

Forest executed settlement agreements with Alkem and Indchemie on November 27, 2012, which granted them licenses to sell generic Bystolic three months before patent expiration, i.e., September 2021, and obligated them to not otherwise manufacture or market any generic Bystolic before **[**75]** expiration of the patent. Dkt. Nos. 270-7, 270-8. The settlement agreement with Alkem also included a $1 million payment for a portion of Forest's avoided legal fees and Alkem's litigation fees. DPP Compl. ¶ 159; Dkt. No. 270-7. The next day, Forest and Alkem/Indchemie executed a term sheet pursuant to which Alkem/Indchemie agreed to supply Forest with two finished drug products—[TEXT REDACTED BY THE COURT]. DPP Compl. ¶ 159. Under the term sheet, Forest agreed to pay Alkem/Indchemie a total of at least $[TEXT REDACTED BY THE COURT] million, including:

- An upfront payment of $[TEXT REDACTED BY THE COURT] million [TEXT REDACTED BY THE COURT];
- Milestone payments up to $[TEXT REDACTED BY THE COURT] million, contingent upon the completion of certain steps in the development of each product, but with Forest required to pay any of the milestone payments if the completion of the corresponding milestone(s) was delayed by [TEXT REDACTED BY THE COURT];
- [TEXT REDACTED BY THE COURT];
- A commitment to purchase a minimum of [TEXT REDACTED BY THE COURT]; and
- A $[TEXT REDACTED BY THE COURT] million [TEXT REDACTED BY THE COURT].

Id.

At the time the term sheet was executed, Direct Purchaser Plaintiffs **[**76]** allege that Forest had not yet submitted its NDA for [TEXT REDACTED BY THE COURT] and that the NDA was not submitted until February 2014. *Id.* ¶ 160. They allege, on information and belief, that submission of the NDA in February 2014 would have triggered the delay provision **[*490]** and therefore required Forest to make the milestone payments to Alkem/Indchemie associated with Byvalson. *Id.* Direct Purchaser Plaintiffs also claim, on information and belief, that, prior to the term sheet, Forest had no need for a supply agreement for Bystolic and that Forest had expressed no interest in working with Alkem/Indchemie on [TEXT REDACTED BY THE COURT]. *Id.* ¶ 161. And they allege, again on information and belief, that the payments pursuant to the term sheet exceeded the fair value of any products delivered or services rendered by Alkem/Indchemie and that the agreement itself was a pretextual conduit of cash from Forest to induce Alkem/Indchemie not to compete in the nebivolol market until September 2021. *Id.*

With respect to the agreements between Forest and Alkem/Indchemie, the DPP Complaint does not state a claim under *Actavis*. While the pleading plausibly alleges a large reverse-payment agreement (the alleged **[**77]** $[TEXT REDACTED BY THE COURT] million reverse payment as compared to the pleaded less than $5-6 million in avoided litigation costs), it provides no factual support for the contention that the large reverse payment is unexplained or unjustified. The allegation—recited verbatim with respect to Forest's agreements with each of the Generic Defendants—that the payments under the term sheet exceeded the fair value of any products delivered or services rendered by Alkem/Indchemie is conclusory and a "label" insufficient alone to state a claim. Direct Purchaser Plaintiffs do allege that, prior to entering into the term sheet, Forest had no need for a supply agreement for [TEXT REDACTED BY THE COURT] and had not expressed an interest in working with Alkem/Indchemie on [TEXT REDACTED BY THE COURT]. DPP Compl. ¶¶ 160-161. But these allegations—which might be sufficient if supported by fact—are alleged only on information and belief. Direct Purchaser Plaintiffs assert no facts to support the claim that Forest had no need for additional products or services from Alkem and/or Indchemie to support anticipated market demand for [TEXT REDACTED BY THE COURT] products. *See Brodie v. Green Spot Foods, LLC, 503 F. Supp. 3d 1, 13 (S.D.N.Y. 2020)* ("When allegations are made **[**78]** upon information and belief, the plaintiff must support them by offering facts upon which that belief is founded."). Nor are the facts to support this claim in the exclusive possession of Defendants. They further do not allege facts to support that, prior to signing the settlement agreements and term sheet with Alkem/Indchemie, Forest had expressed no interest in an agreement with those companies. This cannot be enough to satisfy *Actavis*. ***HN19***[] It is not enough that two parties entered into a new agreement at the same time as they settled the patent litigation for a reverse payment; the plaintiff must allege that there is something about that agreement other than its timing and the fact that it results in the generic manufacturer honoring a patent that supports the inference that it is anticompetitive.

For these reasons, Defendants' motion to dismiss is granted with respect to the Alkem/Indchemie agreements for failure to state a claim.

4. Glenmark

Forest executed its settlement agreement with Glenmark on December 21, 2012, and the agreement included a payment of up to $1.2 million to Glenmark for a portion of Forest's avoided legal fees and Glenmark's litigation costs. DPP Compl. ¶ 163; Dkt. No. **[**79]** 270-14. The agreement also granted Glenmark a license to sell generic Bystolic three months before patent expiration, i.e., September 2021, and bound Glenmark to not otherwise manufacture or market any generic Bystolic before patent expiration. Dkt. No. 270-14. The same day that the settlement agreement was executed, Forest and Glenmark executed a collaboration and option agreement under **[*491]** which the two companies would jointly develop [TEXT REDACTED BY THE COURT] products for at least [TEXT REDACTED BY THE COURT] absent earlier termination and Forest would pay Glenmark $[TEXT REDACTED BY THE COURT] million in upfront and milestone payments. *Id.* The $[TEXT REDACTED BY THE COURT] million in payments included an upfront payment of $[TEXT REDACTED BY THE COURT] million, which consisted of:

- A $[TEXT REDACTED BY THE COURT] million [TEXT REDACTED BY THE COURT] and
- A $[TEXT REDACTED BY THE COURT] million [TEXT REDACTED BY THE COURT]

Id. The additional $[TEXT REDACTED BY THE COURT] million in payments included: $[TEXT REDACTED BY THE COURT] million [TEXT REDACTED BY THE COURT]; and $[TEXT REDACTED BY THE COURT] million [TEXT REDACTED BY THE COURT]. *Id.* All intellectual property developed by **[**80]** Glenmark in connection with [TEXT REDACTED BY THE COURT] remained exclusively with Glenmark except for Forest's option for a right of first negotiation of an exclusive license to use the technology. *Id.*

Direct Purchaser Plaintiffs further allege, on information and belief, that prior to executing the agreements, Forest had expressed no interest to Glenmark concerning Glenmark's development of [TEXT REDACTED BY THE COURT]. *Id.* ¶ 164. They also allege, on information and belief, the payments under the collaboration and option agreement exceeded the fair market value of any products delivered or services rendered by Glenmark. *Id.*

Direct Purchaser Plaintiffs' allegations regarding the Glenmark agreements suffer from the same deficiencies as their allegations regarding the Alkem/Indchemie agreements. Though they have plausibly alleged a large reverse payment—$[TEXT REDACTED BY THE COURT] million in payments as compared to the alleged less than $5-6 million in avoided legal fees—they have failed to offer any factual allegations for why the allegedly large reverse payment is unexplained or unjustified. First, as with the other agreements, the allegation that the payments under the collaboration **[**81]** and option agreement exceeded the fair value of Glenmark's products or services is simply a conclusory allegation that cannot support whether Direct Purchaser Plaintiffs have plausibly stated a claim under *Actavis*. Second, it is true that Direct Purchaser Plaintiffs allege, on information and belief, that Forest had previously expressed no interest in Glenmark's development of [TEXT REDACTED BY THE COURT] And factual allegations of this type relate to whether a reverse-payment agreement is unjustified because they shed light on whether there exists a history of demonstrated interest in or need for the property or services. *See supra* Section I.A. But, as discussed in relation to Alkem/Indchemie, *supra* Section I.B.3, all facts about Forest's interest in

Glenmark's development of [TEXT REDACTED BY THE COURT] are not within the exclusive possession of Defendants, and Direct Purchaser Plaintiffs have provided no factual basis for their belief that Forest had expressed no such interest prior to the agreement. Thus, this allegation pleaded on information and belief without any additional factual basis cannot plausibly support the claim that the reverse-payment agreement is unjustified.

For these **[**82]** reasons, Defendants' motion to dismiss is granted with respect to the Glenmark agreements for failure to state a claim.

5. Amerigen

The Forest-Amerigen settlement agreement was executed on July 18, 2013. DPP Compl. ¶ 165. Pursuant to the agreement, Amerigen was granted a license to sell generic Bystolic three months before patent expiration, i.e., September 2021, and agreed to not otherwise manufacture or market generic Bystolic before patent expiration. Dkt. No. 270-17. The agreement also included a payment of $2 million to Amerigen for a portion of Forest's saved litigation fees and Amerigen's litigation fees. DPP Compl. ¶ 165; Dkt No. 270-17. On the same day this settlement agreement **[*492]** was executed, Forest and Amerigen executed a binding term sheet collaboration agreement under which Forest agreed to invest in the development of eight Amerigen products. DPP Compl. ¶ 165. This agreement included a non-refundable, upfront payment of $[TEXT REDACTED BY THE COURT] million plus $[TEXT REDACTED BY THE COURT] million in milestone payments contingent upon certain product development and launch events. *Id.* The agreement also included an option for Forest to commercialize up to eight Amerigen **[**83]** products in Latin America and South America, which Amerigen had the right to supply to Forest for its manufacturing costs plus [TEXT REDACTED BY THE COURT], and on other customary and reasonable terms. *Id.*

Direct Purchaser Plaintiffs allege, on information and belief, that prior to executing the settlement and collaboration agreements, Forest had expressed no interest in Amerigen's products and that the payments under the collaboration agreement exceeded the fair value of any products delivered or services rendered by Amerigen. *Id.*

With respect to the Amerigen agreements, Direct Purchaser Plaintiffs fail to state a claim under *Actavis* for the same reasons they did not state a claim regarding the Alkem/Indchemie and Glenmark agreements. They again plausibly allege a large reverse payment—$[TEXT REDACTED BY THE COURT] million in payments as compared to the pleaded figure of less than $5-6 million in avoided legal fees—but they do not allege facts to support the claim that the large reverse-payment agreement is unjustified. Akin to their pleadings with respect to the Alkem/Indchemie and Glenmark agreements, Direct Purchaser Plaintiffs offer only conclusory allegations on information and belief **[**84]** that relate to whether there was bona fide fair consideration for the property or services and whether there was a history of demonstrated interest in or need for the property or services on the part of the brand manufacturer. Without factual allegations on these points, there are not enough factual allegations to plausibly state a claim of a large and unjustified reverse-payment agreement under *Actavis*.

For these reasons, Defendants' motion to dismiss is granted with respect to the Amerigen agreements for failure to state a claim.

6. Watson

Forest executed a settlement agreement with Watson on November 6, 2013; the agreement granted Watson a license to sell generic Bystolic three months before patent expiration, i.e., September 2021; obligated Watson to not otherwise manufacture or market generic Bystolic prior to patent expiration; and included a payment of up to $2 million to Watson in partial consideration of Forest's saved litigation fees and Watson's litigation fees. DPP Compl. ¶ 166; Dkt. No. 270-4. Shortly before this settlement agreement was executed, Forest and Watson entered into a series of agreements related to Moksha8, Inc. ("Moksha8"), a Brazilian startup drug manufacturer with **[**85]** which both Forest and Watson were involved in equity investment or financing transactions. DPP Compl. ¶ 166 & n.95. Under those agreements, Forest agreed to extend financing to Moksha8 despite Moksha8's failure to meet existing loan conditions; Watson's agreements with Moksha8 were terminated; Watson agreed to pay $[TEXT REDACTED BY THE COURT] million to Moksha8; and Watson received releases of potential claims by Moksha8. *Id.* ¶¶ 166-168.

More specifically, in a November 1, 2013 letter agreement, Forest agreed to make $[TEXT REDACTED BY THE COURT] million in loan amounts available to Moksha8. *Id.* ¶¶ 166-167. Forest was not obligated to make any loans or any other extensions of credit to Moksha8 because Moksha8 failed to meet certain **[*493]** loan conditions. *Id.* ¶ 167. But in exchange for a release, Forest agreed to make a portion of certain loans available to Moksha8. *Id.* Additionally, three days later, on November 4, 2013, Watson and Moksha8 executed a termination and release agreement. *Id.* ¶ 166. This agreement terminated certain contractual relationships between Watson and Moksha8 including, for example, [TEXT REDACTED BY THE COURT], and [TEXT REDACTED BY THE COURT]. *Id.* ¶¶ 166, 168. In **[**86]** exchange for Watson paying $[TEXT REDACTED BY THE COURT] million to Moksha8, the agreement also included mutual releases of claims arising out of these terminated agreements, as well as of claims in any way related to the transactions contemplated by an [TEXT REDACTED BY THE COURT]. *Id.*

Direct Purchaser Plaintiffs plead, on information and belief, that the value of these broad releases exceeded any consideration that Watson paid for the releases. *Id.* ¶ 166. They also allege, on information and belief, that the transactions in early November 2013 involving Forest, Watson, and Moksha8—including specifically Moksha8's release of all claims against Watson arising out of the [TEXT REDACTED BY THE COURT]—disguised significant payments from Forest to Watson through the Moksha8 venture that exceeded Watson's $[TEXT REDACTED BY THE COURT] million payment and the fair value of any other products delivered or services rendered by Watson in connection with those agreements. *Id.* ¶ 169.

As a threshold matter, the Court considers the settlement agreement, the Forest-Moksha8 letter agreement, and the Watson-Moksha8 termination and release agreement together. Defendants argue that there are no facts **[**87]** connecting Forest's loan to Moksha8 with the separate agreement entered between Moksha8 and Watson aside from rough temporal proximity. Dkt. No. 269 at 26. But there is more alleged than rough temporal proximity. As discussed, *see supra* Section I.B, the DPP Complaint alleges that Forest admitted that all of the settlement agreements related to the Bystolic litigation had side agreements and that, as part of an unrelated merger transaction, Forest listed these three agreements as material contracts in connection with settling the Bystolic patent dispute. DPP Compl. ¶¶ 17, 151.

Even considering these three agreements together, however, the Court determines that Direct Purchaser Plaintiffs have not sufficiently pleaded the existence of a reverse payment—that is, a payment from Forest to Watson. Forest allegedly extended to Moksha8 a "payment," i.e., something of value, in making loan funds available to Moksha8 even though Moksha8 did not meet certain loan criteria. *See* *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 243* ("I must conclude that large and unjustified reverse payments that 'can bring with [them] the risk of significant anticompetitive effects' can bring those effects regardless of the particular form the transfer of value **[**88]** takes and thus are not limited to cash payments." (alteration in original) (citation omitted)); *In re Actos End Payor Antitrust Litig., 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *13* ("The majority view [is] that *Actavis*'s holding is not limited to payments made in cash. This view is consistent with traditional understandings of the term 'payment,' which is defined in Black's Law Dictionary as the '[p]erformance of an obligation by the delivery of money *or some other valuable thing* accepted in partial or full discharge of the obligation.'" (alteration in original) (citations omitted)). But the complaint notably lacks factual allegations regarding how that transfer of value, or "payment," to Moksha8 was then conveyed to Watson, thereby constituting a reverse payment from Forest to Watson through intermediary Moksha8. The best Direct Purchaser Plaintiffs can do is plead, on information and belief, that Moksha8's release **[*494]** of all claims against Watson was more valuable than any consideration Watson paid for the releases. In other words, Direct Purchaser Plaintiffs appear to be alleging that the "payment" from Forest to Moksha8 was then passed on from Moksha8 to Watson through an imbalanced exchange of value in the termination and release agreement. They allege as much on information **[**89]** and belief; namely, they allege, on information and belief, that the transactions in early November 2013 involving Forest, Watson, and Moksha8 disguised significant payments from Forest to Watson through the Moksha8 venture that exceeded Watson's $[TEXT REDACTED BY THE COURT] million payment and the fair value of any other products delivered or services rendered by Watson in connection with those agreements. But these allegations are entirely conclusory and cannot serve to plausibly support Direct Purchaser Plaintiffs' claim. Indeed, the caveat in the conclusory allegation that the value of the releases exceeded Watson's $[TEXT REDACTED BY THE COURT] million payment highlights how Watson actually paid Moksha8 a sum of money as part of the agreement, which goes in the opposite direction from the alleged reverse payment from Forest through intermediary Moksha8 toward Watson. Aside from these conclusory allegations, there are no facts in the DPP Complaint to raise a plausible inference that the releases were relatively more valuable than the $[TEXT REDACTED BY THE COURT] million and other consideration rendered by Watson to Moksha8. For example, the DPP Complaint could have included facts **[**90]** describing the releases, explaining why the releases were valuable to Watson, and providing context to estimate their relative value even if precise estimates are not alleged. Absent facts of that nature or other facts, Direct Purchaser Plaintiffs are missing a link in their theory and have failed to plead the existence of a reverse payment from Forest to Watson.

Direct Purchaser Plaintiffs argue that Forest itself characterized the Moksha8 transaction as a side deal with Watson that involved the exchange of at least $15 million in connection with the Bystolic patent settlement. Dkt. No. 285 at 34. But Direct Purchaser Plaintiffs overread the scope of Forest's admission. It is true that, as part of an unrelated merger agreement, Forest disclosed its material contracts and listed the agreements involving Watson and Moksha8 as material contracts in connection with the settlement of the Bystolic patent dispute. "Material contracts" were defined to include:

> any Contract involving the settlement of any action or threatened action (or series of related actions) (A) which will (x) involve payments after the date hereof of consideration in excess of $15,000,000 or (y) impose monitoring or reporting **[**91]** obligations to any other Person outside the ordinary course of business or (B) with respect to which material conditions precedent to the settlement have not been satisfied.

DPP Compl. ¶ 9. Direct Purchaser Plaintiffs argue that inclusion in this list of material contracts indicates that the agreements involved payments in excess of $15 million. But with this interpretation, they mischaracterize the inclusion criteria and focus on only one of the three disjunctive criteria for disclosure as a material contract. The DPP Complaint does not plead any facts to plausibly tip the scales away from the other inclusion criteria in favor of the one indicating that the agreement involved payments over $15 million. As discussed, Forest's admission indicates that the various agreements are related to the settlement of the Bystolic litigation and that they should be considered together, as the Court has done. Forest's admission, however, does not automatically show that there was a payment in excess of $15 million from Forest to Watson.

[*495] For the reasons given, Defendants' motion to dismiss with respect to the Watson agreements is granted.

C. Defendants' Remaining Arguments

Since the Court dismisses Direct **[**92]** Purchaser Plaintiffs' claims as to all Defendants, the Court need not reach Defendants' remaining arguments for dismissal: that Direct Purchaser Plaintiffs improperly group the thirty-two Defendants into ten corporate families and fail to offer individual facts to support claims against a couple particular Defendants; that Direct Purchaser Plaintiffs' theories of causation fail as a matter of law; and that Direct Purchaser Plaintiffs' construction of the *Sherman Act*'s reach under *Actavis* violates Defendants' due process rights.

On causation, the Court notes only that Defendants do not provide an independent ground for dismissal. Direct Purchaser Plaintiffs allege three theories of causation—namely that but for the alleged reverse-payment agreements, Generic Defendants would have launched their less expensive generic versions of Bystolic earlier than September 17, 2021: (1) at risk during pendency of the Nebivolol Patent Litigation; (2) upon prevailing against Forest in the Nebivolol Patent Litigation; or (3) via lawful, procompetitive settlement agreements providing for earlier negotiated entry dates untainted by the delay caused by the unlawful reverse payments. DPP Compl. ¶ 174. Defendants argue that **[**93]** the first two theories are too speculative as a matter of law and that the at-risk launch theory fails to account for the regulatory bar on generic launch before June 2015. Dkt. No. 269 at 45-50. Defendants further argue that the third causation theory is precluded by the Hetero settlement because that settlement provides what the earliest entry date would be. *Id.* at 50-52. Putting aside Defendants' arguments with respect to the first two causation theories, the Court observes that Defendants' argument about Direct Purchaser Plaintiffs' third causation theory assumes that the agreements settling the litigation with Hetero involved a small and justified reverse payment. In other words, this argument relies on the allegations about Hetero failing to meet the *Actavis* standard and does not provide an independent ground of dismissal.

The Court also need not address defendant Teva Israel's motion to dismiss the DPP Complaint for lack of personal jurisdiction. ***HN20***[] The Second Circuit has stated that "[a]lthough we traditionally treat personal jurisdiction as a threshold question to be addressed prior to consideration of the merits of a claim, that practice is prudential and does not reflect a restriction **[**94]** on the power of the courts to address legal issues." *ONY, Inc. v. Cornerstone Therapeutics, Inc., 720 F.3d 490, 498 n.6 (2d Cir. 2013)* (citation omitted). In cases involving "multiple defendants—over some of whom the court indisputably has personal jurisdiction—in which all defendants collectively challenge the legal sufficiency of the plaintiff's cause of action, we may address first the facial challenge to the underlying cause of action and, if we dismiss the claim in its entirety, decline to address the personal jurisdictional claims made by some defendants." *Chevron Corp. v. Naranjo, 667 F.3d 232, 247 n.17 (2d Cir. 2012)*. Accordingly, having dismissed the claims in their entirety, the Court declines to address Teva Israel's arguments on personal jurisdiction. *See, e.g., Chen v. China Green Agric. Inc., 2021 U.S. Dist. LEXIS 189780, 2021 WL 4481045, at *4 (S.D.N.Y. Sept. 30, 2021)* ("Because the Court finds that the Amended Complaint does not make out a claim for which relief can be granted, and dismisses the case in its entirety, it does not address the personal jurisdiction arguments."); *Fratelli **[*496]** BVBA v. APM Music Servs., LLC, 2021 U.S. Dist. LEXIS 184494, 2021 WL 4429417, at *6 (S.D.N.Y. Sept. 27, 2021)* ("Because dismissal of the unjust enrichment claims terminates All Parts from this action, the Court does not address its argument for dismissal for lack of personal jurisdiction."); *Oklahoma L. Enf't Ret. Sys. v. Telefonaktiebolaget LM Ericsson, 2020 U.S. Dist. LEXIS 4918, 2020 WL 127546, at *9 (S.D.N.Y. Jan. 10, 2020)* ("The Court need not and does not reach Defendants' other arguments for dismissal, including their contention that the Court lacks personal jurisdiction over individual **[**95]** Defendant Mellander." (citing *ONY, 720 F.3d at 498 n.6*)); *LLM Bar Exam, LLC v. Barbri, Inc., 271 F. Supp. 3d 547, 574 n.8 (S.D.N.Y. 2017)*, *aff'd*, *922 F.3d 136 (2d Cir. 2019)* ("The Court plainly has personal jurisdiction over, for example, the New York Law Schools. Thus, even if the Court were to hold that it lacks personal jurisdiction over the Non-New York Law Schools, it would have to consider their merits arguments about the First Amended Complaint, which arguments are identical to those of the New York Law Schools. Instead of adopting that piecemeal approach, the Court will dismiss the First Amended Complaint as to all Defendants under *Rule 12(b)(6)*.").

* * *

The Court therefore dismisses Direct Purchaser Plaintiffs' Complaint and Retailer Plaintiffs' Complaints without prejudice. ***HN21***[] The Court is not aware of any request by Direct Purchaser or Retailer Plaintiffs to replead if their complaints are dismissed, but "[i]t is within the Court's discretion to *sua sponte* grant leave to amend." *Safe Step Walk in Tub Co. v. CKH Indus., Inc., 242 F. Supp. 3d 245, 271 (S.D.N.Y. 2017)*. The Second Circuit "strongly favors liberal grant of an opportunity to replead after dismissal of a complaint under *Rule 12(b)(6)*." *Porat v. Lincoln Towers Cmty. Ass'n, 464 F.3d 274, 276 (2d Cir. 2006)*. *Federal Rule of Civil Procedure 15(a)(2)* provides that the Court "should freely give leave when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. "A district court has discretion to deny leave for good reason, including futility, bad faith, undue delay, or undue prejudice to the opposing **[**96]** party," *McCarthy v. Dun & Bradstreet Corp., 482 F.3d 184, 200 (2d Cir. 2007)*, and "[t]he decision to grant leave to amend is within the sound discretion of the trial court," *Bay Harbour Mgmt., LLC v. Carothers, 474 F. Supp. 2d 501, 502 (S.D.N.Y. 2007)*. Because Direct Purchaser and Retailer Plaintiffs did not previously have the benefit of the Court's views, because the Court cannot say that any amendment would be futile, and because this Circuit favors an opportunity to replead after dismissal under *Rule 12(b)(6)*, the Court grants Direct Purchaser Plaintiffs and Retailer Plaintiffs leave to amend their complaints.

II. Motions Regarding End-Payor Plaintiffs' Complaint

The Court now turns to the motions to dismiss End-Payor Plaintiffs' Complaint. ***HN22***[] "Under the United States Supreme Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 745-46, 97 S. Ct. 2061, 52 L. Ed. 2d 707*

(1977), indirect purchasers of products sold at supra-competitive prices lack standing to sue under federal antitrust statutes. However, under its later decision in *California v. ARC Am. Corp., 490 U.S. 93, 105-06, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*, indirect purchasers may still bring suit under state antitrust laws, if a state permits such claims." *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, PLC, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *1 (S.D.N.Y. Dec. 26, 2018)*. "Therefore, it is common in private antitrust litigation for two groups of purchasers, direct and indirect, to file separate cases arising out of the same nucleus of operative fact, but to allege different causes of action—direct **[*497]** purchasers under federal law and indirect purchasers under **[**97]** state laws." *Id.* As a district court in this Circuit has observed, "[t]he problem for the indirect purchasers is that the indirect-purchaser rule of *Illinois Brick* blocks them from recovery under federal ***antitrust law***," and, therefore, "[i]n an effort to get in on the *Actavis* game, they attempt to build a Frankensteinian equivalent of *Actavis* to reach the very same conduct but without that formidable obstacle, by stitching together a hodge-podge of state-law claims." *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 255*. End-Payor Plaintiffs have done just that here.

Based on the same factual allegations of the DPP Complaint, End-Payor Plaintiffs bring 101 state-law claims. In particular, End-Payor Plaintiffs allege: claims for monopolization and monopolistic scheme against Forest under the antitrust laws of twenty-three states; claims for conspiracy to monopolize against all Defendants under the antitrust laws of twenty-seven states; claims for combination and conspiracy in restraint of trade against all Defendants under the antitrust laws of twenty-seven states; and claims for unfair or deceptive trade practices against all Defendants under the consumer-protection laws of twenty-four states.[12] EPP Compl. ¶¶ 290-452.

Because the Court dismisses the federal antitrust **[**98]** claims, however, End-Payor Plaintiffs' claims under the antitrust laws of various states—based on the same factual allegations—fail too. *See, e.g., In re Tamoxifen Citrate Antitrust Litig., 277 F. Supp. 2d 121, 139 (E.D.N.Y. 2003)*, *aff'd*, *466 F.3d 187 (2d Cir. 2006)* ("[S]ince Plaintiffs fail to state a claim under the *Sherman Act*, and since the state ***antitrust law*** claims are based on the same allegations, those claims are also dismissed."); *In re Androgel Antitrust Litig. (No. II), 687 F. Supp. 2d 1371, 1382 (N.D. Ga. 2010)* ("Because the Plaintiffs' allegations do not state a plausible antitrust claim under federal law, the Indirect Purchasers also do not state a plausible antitrust claim under state law."). In a footnote in their opposition to Defendants' motion to dismiss, End-Payor Plaintiffs argue that it is "overstated" to say that *Actavis* controls the interpretation of all state antitrust laws. Dkt. No. 286 at 3 n.4. But End-Payor Plaintiffs have not explained the ways in which the various state antitrust laws differ from federal ***antitrust law*** and how those differences would apply to the facts alleged here. End-Payor Plaintiffs point to statements by the California Supreme Court indicating that the state's ***antitrust law*** may be broader than the *Sherman Act* and that federal ***antitrust law*** is instructive rather than conclusive when construing the state's ***antitrust law***. *Id.* But End-Payor Plaintiffs **[**99]** offer no argument that this broader state ***antitrust law*** reaches the conduct alleged here or that the other state antitrust laws under which they bring their claims are also broader than federal law and apply here. Indeed, for example, in bringing their claims for combination and conspiracy in restraint of trade against all Defendants, End-Payor Plaintiffs recount the same allegations as the DPP Complaint does and then merely list citations to the antitrust laws of twenty-seven states and the District of Columbia. EPP Compl. ¶ 334. They plead their other claims under the antitrust laws of various states in the same manner. But **[*498]** while they may "have *listed* claims under very many state laws, . . . they have not truly *pleaded* claims under those laws sufficient to show their entitlement to recovery under them, as required by *Rule 8*." *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 255*.

The same can be said about End-Payor Plaintiffs' remaining twenty-four claims for unfair or deceptive trade practices under state consumer-protection laws. The fundamental deficiency with these claims is that they rely on the existence of anticompetitive conduct, which the Court has found insufficiently pleaded in the context of Direct Purchaser and Retailer Plaintiffs' **[**100]** federal antitrust claims. In their complaint, End-Payor Plaintiffs essentially attempt to rely on the factual foundation for federal antitrust claims—which in this case were found insufficient—and then "merely allege that those claims are also actionable under general consumer-protection laws." *In re Aggrenox*

---

[12] End-Payor Plaintiffs withdrew their claim under the Virginia Consumer Protection Act. Dkt. No. 286 at 12 n.30. End-Payor Plaintiffs also bring a claim for injunctive relief under the federal antitrust laws. EPP Compl. ¶¶ 453-457. The Court dismisses the End-Payor Plaintiffs' claim under the federal antitrust laws for the same reasons it dismisses the DPP Complaint's federal antitrust claims.

Antitrust Litig., 94 F. Supp. 3d at 255. "But the plaintiffs cannot simply enumerate a long list of state-law claims for states where they might otherwise have no available antitrust recovery and rely on the defendants and the court to sort out whether or how those laws can act as surrogates for ***antitrust law***." *Id. at 255-56*. End-Payor Plaintiffs have not provided a basis on which these claims survive when federal antitrust claims based on the same factual foundation fail. *See In re Actos End Payor Antitrust Litig., 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *28* ("Plaintiffs merely restate their antitrust allegations as separate consumer protection claims, providing no distinct factual basis for a violation of consumer protection law. This is insufficient to meet the *Rule 8* pleading standard under *Twombly* and *Iqbal*.").

For these reasons, Defendants' motion to dismiss End-Payor Plaintiffs' Complaint for failure to state a claim is granted without prejudice to repleading the state-law claims in light of the dismissal of the federal antitrust claims. **[**101]** Accordingly, the Court need not consider the arguments from Nonresident Defendants' motion to dismiss the End-Payor Plaintiffs' Complaint's ninety-nine non-New York, state-law claims for lack of personal jurisdiction and Teva Israel's motion to dismiss the claims against it for lack of personal jurisdiction. *See ONY, Inc., 720 F.3d at 498 n.6*; *Chevron Corp., 667 F.3d at 247 n.17*.

CONCLUSION

Defendants' motion to dismiss the Direct Purchaser and Retailer Plaintiffs' Complaints for failure to state a claim is GRANTED, and the Direct Purchaser and Retailer Plaintiffs' Complaints are DISMISSSED without prejudice to Direct Purchaser Plaintiffs and Retailer Plaintiffs filing amended complaints by February 22, 2022. Defendants' motion to dismiss the End-Payor Plaintiffs' Complaint for failure to state a claim is GRANTED, and the End-Payor Plaintiffs' Complaint is DISMISSED without prejudice to End-Payor Plaintiffs filing an amended complaint by February 22, 2022. Nonresident Defendants' motion to dismiss the End-Payor Plaintiffs' Complaint's ninety-nine non-New York, state-law claims for lack of personal jurisdiction and Teva Israel's motion to dismiss for lack of personal jurisdiction are DENIED without prejudice as moot.

The Clerk of Court is respectfully **[**102]** directed to close Dkt. Nos. 260, 265, 267, 271.

SO ORDERED.

Dated: February 2, 2022

Opinion

ORDER ON MOTION TO DISMISS

Re: Dkt. Nos. 60, 61

Plaintiff Ralph Peterson is a medical doctor who alleges that various defendants associated with the Sutter network of healthcare facilities unlawfully steer away unprofitable procedures, give kickbacks to physicians who comply, and **[*2]** punish physicians who do not. He contends that the Medical Board of California ("MBC") facilitates these actives by using its disciplinary authority against physicians, like him, who will not comply. He also asserts that it discriminates against African American doctors like him. He alleges that, from 2009 to 2013, the defendants conspired to punish him through investigations and disciplinary proceedings. And in late 2019, he learned through public reporting that the California Attorney General had sued Sutter and entered into a confidential settlement with it regarding Sutter's anti-competitive behavior. Peterson brings numerous claims that fall into three groups: federal civil rights violations, federal antitrust violations, and violations of California state law.

The defendants move to dismiss. The MBC is shielded by sovereign immunity and it is dismissed with prejudice. The state-law claims against individual MBC members are likewise dismissed with prejudice. The federal civil rights claims against those individuals are dismissed as barred by sovereign immunity (in the defendants' official capacities) or absolute immunity (in their individual capacities), but Peterson has leave **[*3]** to amend to adequately plead that *Ex parte Young* applies or that absolute immunity does not apply. His federal antitrust claim is time-barred, but Peterson has leave to amend to allege that it should be delayed or tolled. The private parties' motion is granted with prejudice on a claim under the Health Care Quality Improvement Act ("HCQIA") because Peterson has not shown that it creates a private right of action.

Most remaining claims against the private parties are dismissed as time-barred, but Peterson has leave to amend to adequately allege that their statutes of limitations are delayed or tolled. And the motion to dismiss is denied when it comes to certain claims that he would not have had notice to bring until the California Attorney General's investigation was made public, because the discovery rule applies to toll the statute of limitation.

BACKGROUND

I. FACTUAL BACKGROUND

A. The Parties

Peterson is a medical doctor who was licensed to practice medicine in California. First Amended Complaint ("FAC") [Dkt. No. 47] ¶ 2. He has sued two groups of defendants.

The first I refer to collectively as the "Sutter Defendants." Sutter Bay Medical Foundation ("Sutter Bay") and Sutter Bay Hospitals **[*4]** d/b/a Alta Bates Summit Medical Center ("Alta Bates") are tax-exempt corporations doing business in Alameda County.[1] *Id.* ¶¶ 3-5. These entities are, collectively, "Sutter." Neil Stollman, Rod Perry, and Phillip Rich are licensed physicians who sat on Sutter's "peer review panels." *Id.* ¶¶ 7-9, 52. Rich also was president of Alta Bates's medical staff. *Id.* ¶ 9.

The second I refer to as the "MBC Defendants." Cathy Lozano was, during the events of this case, an employee investigator for the Medical Board of California ("MBC"), the agency that regulates the practice of medicine in California. *Id.* ¶ 11. Kristina Lawson was a "public member"—that is, a non-physician member—of the MBC from October 2015 onward; in 2020, she was elected its president. *Id.* ¶ 12.[2] Howard Krauss, Randy Hawkins, Dev

[1] Sutter East Bay Medical Foundation and Sutter East Bay Hospitals were named as defendants, but the FAC alleges that they merged into, respectively, Sutter Bay in 2017 and Alta Bates in 2018. FAC ¶¶ 3-4.

Gnanadev, Ronald Lewis, Richard Thorp, Felix Yip, Michael Bishop, Sharon Levine, and Asif Mahmood were physician members of the MBC. *Id.* ¶¶ 13-14, 17-18, 20-21, 23, 25-26. Richard Fantozzi was a physician member of the MBC and served as its secretary, vice president, and president at various times. *Id.* ¶ 15. Denise Pines was a physician member of the MBC and served as its secretary and president. *Id.* ¶ 24. **[*5]** Hedy Chang was a board member and its secretary from 2007 to 2011. *Id.* ¶ 16. Laurie Lubiano, Eserick Watkins, and Jamie Wright were public members of the MBC. *Id.* ¶¶ 19, 22, 28. Evelyn "Gerrie" Schipske was a board member and its secretary. *Id.* ¶ 27. Linda Wright is executive director of the MBC. *Id.* ¶ 29.

B. Sutter's Allegedly Unlawful Activities

Sutter owns and operates 24 hospitals with 53,000 employees. *Id.* ¶ 39. According to Peterson, it "monopolizes" healthcare and medicine in Northern California. *Id.* He alleges that Sutter uses "unlawful strategies" to maintain this monopoly, which he refers to as its "MediCal Strategy." *Id.* ¶ 40. He claims that it uses "medical discipline" by placing "cooperating or compliant physicians" and attorneys on peer review panels and the MBC. *Id.* ¶ 42. It allegedly uses these institutions to control physician referrals and acquisition of physician practices to "punish" physicians that do not "cooperate." *Id.* ¶ 41. This "cooperation," Peterson states, is that Sutter only performs profitable procedures and steers unprofitable procedural to county medical facilities. *Id.* ¶ 43. Sutter also allegedly manipulates charges and coding to increase revenue, **[*6]** performs unnecessary medical procedures, charges for unused materials, and takes other actions. *Id.* ¶ 51. Sutter then uses its revenue to pay kickbacks and acquire medical practices. *Id.* ¶ 44. Among other things, Peterson pleads that Stollman (who sits on a peer review panel) received kickbacks from Sutter. *Id.* ¶ 61.

C. Peterson's History with Sutter

Peterson, who is African American, has practiced medicine in California since 1983. *Id.* ¶¶ 55-57. He alleges that he serves Oakland's Indigent and . . . MediCal community." *Id.* ¶ 56. From 1999 to 2009, he had privileges at Alta Bates to perform endoscopies. *Id.* ¶ 58.

In February 2009, Stollman and Perry—who were members of Alta Bates's peer review board—ordered Peterson to "appear . . . without explanation." *Id.* ¶ 63. Peterson requested a hearing under the HCQIA and notice of the allegations against him. *Id.* ¶ 64. He claims that they never provided either. *Id.* Several days later, Perry ordered Peterson to "increase his 'call coverage'" (from context, how much he would cover for Sutter) or pay a fee. *Id.* ¶ 65. Peterson requested from Stollman to cover more calls, but Stollman allegedly refused to provide it "without payment of an unreasonable **[*7]** fee." *Id.* ¶ 67. In March 2009, Rich (also a member of the peer review panel) ordered Peterson to resign his privileges, but Peterson refused. *Id.* ¶¶ 68-69. In April 2009, he claims that his privileges were suspended without a complaint, investigation, or hearing. *Id.* ¶ 70. He claims that Alta Bates then "forced" him to resign his privileges under threat of MBC discipline. *Id.* ¶ 71. An adverse action report prepared by Sutter states that Peterson "resigned to avoid further investigation into various quality of care complaints." *Id.* ¶ 72. Several months later, Peterson opened an independent endoscopy facility. *Id.* ¶ 74.

D. First MBC Investigation

In November 2009, Peterson was notified that the MBC had opened an investigation into the allegations in the Sutter adverse action report. *Id.* ¶ 76. Soon after, a formal accusation was filed and Peterson was given a summary of the investigation. *Id.* ¶¶ 77-78. Peterson claims that the summary contained false and misleading statements. *Id.*

---

[2] The MBC has 15 members: 13 appointed by the governor and confirmed by the Senate, one appointed by the Senate Committee on Rules and one appointed by the speaker of the Assembly. *See* ***Cal. Bus. & Prof. Code § 2001***. Seven of the MBC's members are public members—that is, members who are not licensed by the MBC. *Id.* ***§ 2007***. The remaining members must be licensed physicians or surgeons. *Id.*

¶ 78. In October 2010, Peterson was informed that a "medical consultant" determined the allegations were not "extreme enough to warrant pursuing administration action." *Id.* ¶ 80 (internal quotation marks omitted). **[*8]**

E. Second MBC Investigation and Patient Suit

In 2010, a longtime patient of Peterson's filed a complaint against Peterson that he calls "unfounded." *Id.* ¶¶ 81-87. Peterson alleges that Sutter "encouraged and participated in" filing that complaint. *Id.* ¶ 87. Peterson allegedly referred the patient to cardiologists but the patient did not come to the appointments. *Id.* ¶¶ 82-85. Instead, the patient eventually went to Sutter, which allegedly discharged her to "steer" her to a county healthcare facility. *Id.* ¶ 83. In 2009, the patient had a stroke and was treated by Sutter. *Id.* ¶¶ 85-86.

In 2011, the same MBC investigator that carried out the previous investigation looked into this complaint. *Id.* ¶ 88. According to Peterson, the MBC determined that Sutter had discovered an artery blockage in the patient but "failed, refused and/or neglected to treat her," steering her to a county medical facility. *Id.* ¶ 89. In October 2011, the MBC's executive director (Whitney) allegedly signed a formal accusation that, according to Peterson, "concealed Sutter's refusal and/or failure to diagnose, treat" the patient. *Id.* ¶ 90. Peterson asserts that a provider contract he had with Cigna was terminated due **[*9]** to "online accusations" from MBC. *Id.* ¶ 94. Later, a Health Net provider contract was terminated due to the existence of the MBC case. *Id.* ¶ 95. In 2013, Peterson was denied provider status with Hill Physicians Medical Group, Alta Bates, and Blue Shield of California; in 2014, he was denied provider status with Aetna. *Id.* ¶¶ 103, 110, 114, 118. According to him, the MBC refused to provide him a complete file on the investigation and its supporting evidence. *Id.* ¶ 97. In January 2013, Peterson attempted to testify in front of the MBC as a witness on behalf of another physician but was not allowed to do so. *Id.* ¶ 99.

In April 2013, the estate of the deceased patient sued Peterson in state court. *Id.* ¶ 104. Peterson claims that the case was "prompted, perpetuated and encouraged by Sutter, [the] peer review panel members and" the MBC for his alleged refusal to cooperate in Sutter's unlawful tactics. *Id.* ¶ 105. The court eventually entered judgment in Peterson's favor and dismissed the action with prejudice. *Id.* ¶ 113.

In July 2013, the MBC allegedly "determined that there were no quality of care issues" in treating Peterson's patient "but did not disclose that finding" to Peterson. *Id.* ¶ **[*10]** 111. Yet in December 2013, it found that Peterson had not maintained sufficient records about his treatment of the patient. *Id.* ¶ 115. He alleges that these accusations were fabricated. *Id.*

F. State-Court Suit

In November 2012, Peterson filed an action in California Superior Court against Perry and Stollman for allegedly "misusing the physician disciplinary process." *Id.* ¶ 98. The law firm Hanson & Bridgett is alleged to have represented Sutter, the peer review panel, and MBC. *Id.* ¶ 101. That is also the firm at which defendant Lawson, president of the MBC, is an attorney. *Id.* ¶ 12. Peterson claims that this representation was a conflict and was not disclosed to him. *Id.* ¶ 101. In May 2013, the court "issued a tentative order against" Peterson. *Id.* ¶ 107. The California Court of Appeal eventually dismissed Peterson's appeal (and the California Supreme Court denied review). *Id.* ¶¶ 122-23.[3]

G. California Attorney General Investigations and Suit

In 2013, the California Attorney General's Office was investigating Sutter about the use of kickbacks. *Id.* ¶ 102. Peterson also alleges that a separate investigation—apparently also by the California Attorney General—was conducted into MBC discrimination **[*11]** against African American and Hispanic doctors. *Id.*

---

[3] The parties' unopposed requests for judicial notice of filings in the state-court action are GRANTED. *See* Dkt. Nos. 62, 67.

In March 2018, the California Attorney General sued Sutter for anti-competitive behavior. *Id.* ¶ 127. Sutter and the state eventually entered a confidential settlement that has been publicly reported to be worth more than $600 million, 10 years of monitoring, and a consent decree barring kickbacks. *Id.* ¶¶ 129-31, 133. According to Peterson, the Attorney General asserted that Sutter's physician referral program violated the law and that Sutter gave kickbacks. *Id.* ¶ 130.

The Sacramento Bee allegedly first publicly reported about the kickback lawsuit on November 4, 2019. *Id.* ¶ 129. The Attorney General's Office revealed the investigation two weeks later. *Id.* ¶ 130.

II. PROCEDURAL BACKGROUND

Peterson filed this suit in June 2021. Dkt. No. 1. He moved to enter default against many defendants, some of which the Clerk of Court entered and some of which the Clerk denied. Dkt. No. 24. Eventually, after the defendants appeared and moved to set aside their defaults, the parties agreed to moot those motions, withdraw the defaults, and permit Peterson to file the FAC. Dkt. No. 45.

As currently pleaded, the FAC contains 17 causes of action. The following **[*12]** are against all defendants: (1) violation of the *First Amendment*; (2) violation of constitutional due process; (3) discrimination against Peterson and his indigent patients under the Constitution, the HCQIA, Title VII, and other unspecified statutes; (4) failure to prevent discrimination and retaliation (presumably under the same sources); (5) retaliation in violation of the HCQIA; (7) violation of federal ***antitrust law***; (11) negligence; (12) intentional interference with contractual relationships; (13) business disparagement; (14) intentional infliction of emotional distress; (15) negligent infliction of emotional distress; (16) violation of California's Unfair Competition Law ("UCL"); and (17) violation of the Unruh Civil Rights Act. The following are against Sutter: (6) antitrust interference with business relationships and (8) breach of contract. Peterson also alleges a breach of contract claim (9) against the MBC. And he alleges a breach of the covenant of good faith and fair dealing (10) against Sutter and the MBC.

LEGAL STANDARD

I. MOTION TO DISMISS FOR LACK OF SUBJECT MATTER JURISDICTION

A motion to dismiss filed pursuant to *Federal Rule of Civil Procedure ("FRCP") 12(b)(1)* is a challenge to the court's subject matter jurisdiction. *See* *Fed. R. Civ. P. 12(b)(1)*. "Federal **[*13]** courts are courts of limited jurisdiction," and it is "presumed that a cause lies outside this limited jurisdiction." *Kokkonen v. Guardian Life Ins. of Am., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)*. The party invoking the jurisdiction of the federal court bears the burden of establishing that the court has the requisite subject matter jurisdiction to grant the relief requested. *Id.*

A challenge pursuant to *Rule 12(b)(1)* may be facial or factual. *See* *White v. Lee, 227 F.3d 1214, 1242 (9th Cir. 2000)*. In a facial attack, the jurisdictional challenge is confined to the allegations pled in the complaint. *See* *Wolfe v. Strankman, 392 F.3d 358, 362 (9th Cir. 2004)*. The challenger asserts that the allegations in the complaint are insufficient "on their face" to invoke federal jurisdiction. *See* *Safe Air Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. To resolve this challenge, the court assumes that the allegations in the complaint are true and draws all reasonable inference in favor of the party opposing dismissal. *See* *Wolfe, 392 F.3d at 362*.

"By contrast, in a factual attack, the challenger disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction." *Safe Air, 373 F.3d at 1039*. To resolve this challenge, the court "need not presume the truthfulness of the plaintiff's allegations." *Id.* (citation omitted). Instead, the court "may review evidence beyond the complaint without converting the motion to dismiss into a motion for summary judgment." **[*14]** *Id.* (citations omitted). Once the moving party has made a factual challenge by offering affidavits or other evidence to dispute the allegations in the complaint, the party opposing the motion must "present affidavits or any other evidence necessary to satisfy its burden of establishing that the court, in fact, possesses subject matter jurisdiction." *St. Clair v. City of Chico, 880 F.2d 199, 201 (9th Cir. 1989)*; *see also* *Savage v. Glendale Union High Sch. Dist. No. 205, 343 F.3d 1036, 1040 n.2 (9th Cir. 2003)*.

II. MOTION TO DISMISS FOR FAILURE TO STATE A CLAIM

Under *FRCP 12(b)(6)*, a district court must dismiss a complaint if it fails to state a claim upon which relief can be granted. To survive a *Rule 12(b)(6)* motion to dismiss, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible when the plaintiff pleads facts that "allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *See* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citation omitted). There must be "more than a sheer possibility that a defendant has acted unlawfully." *Id.* While courts do not require "heightened fact pleading of specifics," a plaintiff must allege facts sufficient to "raise a right to relief above the speculative level." *See* *Twombly, 550 U.S. at 555, 570*.

In deciding whether the plaintiff has stated a claim upon which relief can **[*15]** be granted, the Court accepts the plaintiff's allegations as true and draws all reasonable inferences in favor of the plaintiff. *See* *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. However, the court is not required to accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *See* *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*.

If the court dismisses the complaint, it "should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *See* *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)*. In making this determination, the court should consider factors such as "the presence or absence of undue delay, bad faith, dilatory motive, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party and futility of the proposed amendment." *See* *Moore v. Kayport Package Express, 885 F.2d 531, 538 (9th Cir. 1989)*.

DISCUSSION

I. MBC DEFENDANTS' MOTION TO DISMISS

The MBC Defendants' motion to dismiss states that it is brought by the State of California, through the MBC and the MBC Defendants. *See* MBC Defendants' Motion to Dismiss ("MBC Mot.") [Dkt. No. 60] 1. It seeks to dismiss all claims against those entities.

A. The State of California and MBC

The MBC Defendants move to dismiss the claims to the extent **[*16]** they are against the State of California or MBC based on their sovereign immunity. MBC Mot. 6-7.

i. State of California

The State of California has not been named as a defendant, none of the claims are brought against it, and Peterson's brief does not respond to the argument about it. Accordingly, there is no dispute between the parties on this point and the case cannot proceed against the State of California itself.

ii. MBC

The MBC is not named as a defendant and, as far as the record shows, has not been served with process. Despite this, two of the substantive claims in the FAC state that they are against it. *See* FAC ¶¶ 288-300 (breach-of-contract claim against MBC), 301-313 (bad-faith claim against Sutter and MBC). And MBC has appeared in this action, filed a *Rule 12* motion, and does not object on service-of-process or personal-jurisdiction grounds, so it has waived those challenges. *See Fed. R. Civ. P. 12(h)*. It also proceeds on "the understanding that MBC is an intended Defendant to this action," so I do as well. MBC Mot. 2 n.1.

I agree with MBC that it is shielded from liability by sovereign immunity. In general, "an unconsenting State is immune from suits brought in federal courts by her own citizens as well **[*17]** as by citizens of another state." *Pennhurst State Sch. & Hosp. v. Halderman, 465 U.S. 89, 100, 104 S. Ct. 900, 79 L. Ed. 2d 67 (1984)* (internal quotation marks and citation omitted). That immunity includes suits against states' agencies and departments. *Id.* The Ninth Circuit has held that the MBC's predecessor board was an agency of the state for purposes of sovereign immunity. *Forster v. Cty. of Santa Barbara, 896 F.2d 1146, 1149 (9th Cir. 1990)*. The statute it relied on for that conclusion remains the same when it comes to MBC. *See id.*; *Cal. Bus. & Prof. Code § 2001*. Peterson's brief does not address MBC's argument that it is immune (for instance, to argue that the state consented to suit or that Congress abrogated its immunity).

Accordingly, MBC is immune from suit for the two state-law claims here. *See Pennhurst, 465 U.S. at 100* (explaining that immunity applies "regardless of the relief sought"); *see also Stanley v. Trustees of California State Univ., 433 F.3d 1129, 1134 (9th Cir. 2006)* (holding that the supplemental-jurisdiction statute does not abrogate sovereign immunity for state-law claims). The claims against the MBC are DISMISSED WITH PREJUDICE.

B. State-Law Claims Against the MBC Defendants

Peterson's brief clarifies that he sues the MBC Defendants in their official and individual capacities. *See* Opposition to the MBC Mot. ("MBC Oppo.") [Dkt. No. 68] 7. The MBC Defendants move to dismiss the claims for both types of liability. The MBC Defendants argue that all of Peterson's **[*18]** claims against them are barred by sovereign immunity. *See* MBC Mot. 7. In response, Peterson contends that the claims may proceed (1) to the extent they are against the MBC Defendants in their official capacities under *Ex parte Young, 209 U.S. 123, 28 S. Ct. 441, 52 L. Ed. 714 (1908)*, and (2) to the extent they are in their individual capacities under *42 U.S.C. § 1983* ("*Section 1983*"). *See* MBC Oppo. 6-8.

I first address the claims brought under California state law. In general, a suit against a state official in her official capacity is a suit against the state for purposes of sovereign immunity. *Pennhurst, 465 U.S. at 102-103*. Under *Ex parte Young*, that immunity does not generally bar suits against state officials that challenge the constitutionality of their action and seek redress through prospective injunctive relief. *Id.* But Peterson's state-law claims do not challenge the constitutionality of the MBC Defendants' actions, they allege violations of California law. The Supreme Court has expressly held that the *Ex parte Young* exception does not apply to state-law claims. *Id. at 106*. Accordingly, the state-law claims cannot proceed against the MBC Defendants in their official capacities.

Section 1983 provides a cause of action against state officials "who, under color of any statute, ordinance, regulation, custom, or usage, of any State . . . subjects, **[*19]** or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws." *42 U.S.C. § 1983*. As the Supreme Court has explained, "the *Eleventh Amendment* does not erect a barrier against suits to impose individual and personal liability on state officials under *§ 1983*." *Hafer v. Melo, 502 U.S. 21, 30-31, 112 S. Ct. 358, 116 L. Ed. 2d 301 (1991)* (internal quotation marks and citation omitted). But Peterson's state-law claims are not cognizable under *Section 1983*, which only provides a cause of action to redress violations of *federal* law. *Lovell By & Through Lovell v. Poway Unified Sch. Dist., 90 F.3d*

367, 370 (9th Cir. 1996). The state-law claims cannot proceed against the MBC Defendants in their individual capacities on this basis either.[4]

Peterson offers no other ground to overcome the MBC Defendants' sovereign immunity for the state-law claims; he does not argue, for instance, that the state has waived sovereign immunity as a matter of state law. Accordingly, the state-law claims against the MBC Defendants are DISMISSED WITH PREJUDICE.[5]

C. Federal Claims Against the MBC Defendants

The MBC Defendants move to dismiss the claims based on federal law and the U.S. Constitution. *See* MBC Mot. 6-17.[6]

i. Official Capacity

First, the MBC Defendants argue that they **[*20]** are entitled to sovereign immunity to the extent the federal claims are against them in their official capacities. MBC Mot. 6-7. As noted above, suits against state officials in their official capacities are generally suits against the state and barred by sovereign immunity. *Pennhurst, 465 U.S. at 102-103*. And as noted, *Ex parte Young* creates an exception to that immunity for suits challenging the constitutionality of officials' actions and seeking prospective injunctive relief. *Id.*

Peterson has not adequately pleaded that this case falls into *Ex parte Young*'s ambit. "In determining whether the doctrine of *Ex parte Young* avoids an *Eleventh Amendment* bar to suit, a court need only conduct a straightforward inquiry into whether the complaint alleges an ongoing violation of federal law and seeks relief properly characterized as prospective." *Verizon Md. Inc. v. PSC, 535 U.S. 635, 645, 122 S. Ct. 1753, 152 L. Ed. 2d 871 (2002)* (internal quotation marks and citations omitted). The typical example is a complaint that asks that officials be enjoined from violating federal law. *See id.* (collecting examples).

Here, the complaint is backward-looking. All of the causes of action are about discrete past events and seek monetary redress for Peterson's past injuries. There is no indication that the MBC Defendants are currently or are imminently going to carry out another **[*21]** alleged violation of federal law. Accordingly, *Ex parte Young* is inapplicable. *See id.* While the UCL claim *can* lead to prospective relief, it is not cognizable under *Ex parte Young* as a state-law claim. Future antitrust violations can lead to injunctive relief too, *see 15 U.S.C. § 26*, but that claim is dismissed on other grounds and, in any case, Peterson does not plead anything about future antitrust harm. Indeed, the complaint references injunctive relief exactly once: in asking that the defendants be enjoined under the UCL. *See* FAC at 54. In short, the complaint does not allege any "ongoing violation of federal law" or seek "relief properly characterized as prospective" to halt that violation. *Verizon, 535 U.S. at 645*. Peterson has leave to amend if he believes he can satisfy this requirement.

ii. Absolute Immunity

---

[4] Peterson passingly asserts that the state-law claims are not barred by sovereign immunity because the FAC alleges that they acted unlawfully, acted outside the scope of their authority, and took ministerial actions. MBC Oppo. 8. While these types of allegations may affect whether an official is entitled to the separate protection of absolute immunity from *Section 1983* damages actions (discussed below), Peterson cites no authority for the position that they overcome *sovereign immunity*, and this positions would contradict its fundamental principles.

[5] Because the state-law claims are dismissed on this basis, there is no need to address the MBC Defendants' argument that they are also immune under state statute.

[6] For the reasons explained below, Peterson has not shown that the HCQIA creates a private right of action, so that claim is dismissed with prejudice on this basis.

The MBC Defendants argue that they are entitled to absolute immunity from damages liability. *See* MBC Mot. 9-10.

As a general matter, state executive officials "are absolutely immune from *§ 1983* suits if they perform 'special functions' which, because of their similarity to functions that would have been immune when Congress enacted *§ 1983*, deserve absolute protection from damages liability." *Buckwalter v. Nevada Bd. of Med. Examiners, 678 F.3d 737, 740 (9th Cir. 2012)*, *as amended* (June 8, 2012) (internal quotation marks and **[*22]** citations omitted). To determine whether the MBC Defendants are entitled to absolute immunity, I look to the "nature of the function performed, not the identity of the actor who performed it." *Id.* (internal quotation marks and citation omitted). Judges and prosecutors perform the "paradigmatic" functions entitled to absolute immunity. *Id.* Accordingly, courts examine whether the defendants' functions are "analogous" to those of a judge or prosecutor. *Id.* This immunity can extend to administrative proceedings. *Butz v. Economou, 438 U.S. 478, 517, 98 S. Ct. 2894, 57 L. Ed. 2d 895 (1978)*.

The Ninth Circuit has repeatedly held that certain quasi-prosecutorial and quasi-judicial functions of the members of independent state medical boards are entitled to absolute immunity because they are "functionally comparable to judges." *See* *Buckwalter, 678 F.3d at 740*; *Mishler v. Clift, 191 F.3d 998, 1007 (9th Cir. 1999)*. Peterson does not dispute that the MBC shares all of the salient features that led the court to extend protection to other states' similar boards. But, as the Ninth Circuit has also explained, this holding alone does not settle the case because absolute immunity is assessed action-by-action. *Buckwalter, 678 F.3d at 740*. Accordingly, the question is whether the challenged actions are "judicial" or "closely associated with the judicial process." *Id.* (internal quotation **[*23]** marks and citation omitted).

Peterson argues that several types of alleged actions are not entitled to immunity: steering certain procedures to county medical facilities, kickbacks, medical billing fraud, threats of physician discipline, actual discipline, price fixing, bid ridding, discrimination, retaliation, Sutter controlling the disciplinary process, and "Due Process violations." MBC Oppo. 10.

Peterson's allegations and argument on this issue are not sufficient to state a claim that survives an immunity challenge. The relevant portion of Peterson's brief cites more than one-hundred paragraphs from the FAC with virtually no elaboration. *See id.* But he never attempts to show what behavior each MBC Defendant did to expose him to liability. The MBC Defendants sat on the board or were officers of it at different times, some of which appear not to be connected to the events of this case. The paragraphs that Peterson cites often refer to *Sutter's* actions, not the actions of MBC members. *See, e.g.*, FAC ¶ 43 ("As a result of its "MediCal Strategy", Sutter performed only profitable procedures, steering away unprofitable procedures to county medical facilities."). Indeed, Peterson's core theories **[*24]** about steering, kickbacks, billing fraud, and price fixing are that *Sutter* carried them out. Other allegations that Peterson cites simply refer vaguely to things that MBC *as an institution* did. *See, e.g., id.* ¶ 124 (alleging that MBC engages in race discrimination in the disciplinary process). Yet MBC cannot itself be held liable, and each MBC Defendant can only be held liable for his or her own actions, not actions attributed only generally to the agency. *Buckwalter, 678 F.3d at 737*. Further, at least some of this behavior, even if properly pleaded, appears to be shielded by absolute immunity, such as that involved in the disciplinary process—even if it were discriminatory. *See Mishler, 191 F.3d at 1008* ("There is no question that acts occurring during the disciplinary hearing process fall within the scope of absolute immunity."); *Cleavinger v. Saxner, 474 U.S. 193, 199-200, 106 S. Ct. 496, 88 L. Ed. 2d 507 (1985)* ("Such immunity applies however erroneous the act may have been, and however injurious in its consequences it may have proved to the plaintiff." (internal quotation marks and citation omitted)).

As far as I can tell, and as far as Peterson argues in his brief, *see* MBC Oppo. 23, the only MBC Defendants about whom there are specific allegations are Lozano (the employee who investigated the accusations against **[*25]** Peterson) and Whitney (the executive director who signed the second accusation). *See* FAC ¶¶ 90, 169. But it is unclear which of the actual claims, if any, are premised on these allegations, as opposed to the actions of the MBC members; Peterson's brief does not clarify this. And while it is not entirely possible to determine because of the state of the allegations, there is a colorable argument that these acts are entitled to absolute immunity too. *See Mishler, 191 F.3d at 1008* (holding that "signing the disciplinary complaint under penalty of perjury is entitled to absolute immunity").

I will grant leave to amend so that Peterson can make clear which defendants took which alleged actions that allegedly violated specific rights. In drafting the amended complaint, Peterson hould be mindful of the principles of immunity discussed above.[7]

iii. Antitrust Claim

The MBC Defendants move to dismiss the antitrust claim against them.[8] *See* MBC Mot. 12-13.

1. State-Action Immunity

Section 1 of the Sherman Antitrust Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. To state a claim under the Act, a plaintiff must plead: "(1) a contract, combination or **[*26]** conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*.

In *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, the Supreme Court established an exception to the *Sherman Act*: It does "not apply to anticompetitive restraints imposed by the States as an act of government." *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 370, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* (internal quotation marks and citation omitted). To determine whether a state's actions are immune from Sherman-Act liability, courts employ a two-step test: "First, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy; second, the policy must be actively supervised by the State itself." *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)* (internal quotation marks and citations omitted).

The MBC Defendants have not shown that the alleged antitrust violations here fall within *Parker*'s exception. Peterson alleges that the MBC Defendants engaged in anticompetitive behavior by using their authority to give unlawful preference to Sutter and punish physicians that did not adequately comply with its demands. *See* FAC ¶¶ 225-36. The MBC Defendants have pointed to no "clearly articulated and affirmatively expressed **[*27]** . . . state policy" in favor of that type of behavior. *Midcal, 445 U.S. at 105*. The MBC Defendants' argument is, instead, that "MBC investigatory, charging, and reprimand procedures which Plaintiff complains form part of the State's comprehensive disciplinary structure for its medical profession." MBC Mot. 13. That is correct, but that a state has generally given the MBC regulatory authority over this broad area does not mean that it has affirmatively chosen a policy of pursuing the *specific* alleged anti-competitive behavior at issue.

2. Statute of Limitations

The MBC Defendants also argue that the antitrust claim is time-barred.[9] As the parties agree, the statute of limitations on the antitrust claim is four years after the cause of action accrues. *See* *15 U.S.C. § 15b*. An antirust claim accrues "each time a plaintiff is injured by an act of the defendants." *Program Eng'g, Inc. v. Triangle Publications, Inc., 634 F.2d 1188, 1194 (9th Cir. 1980)*. A motion to dismiss based on a statute of limitations can only be granted when its running "is apparent on the face of the complaint." *Huynh v. Chase Manhattan Bank, 465 F.3d 992, 997 (9th Cir. 2006)* (internal quotation marks and citation omitted). The MBC Defendants argue that "[b]ecause Plaintiff's claims under the *Sherman Act* ran no later than sometime in 2017, his attempt to pursue those claims in this 2021 lawsuit are time barred." MBC **[*28]** Mot. 14. It contends that "the complaint lists the last overt

---

[7] Because the state of the claims is unclear, I do not address the MBC Defendants' alternative argument that the claims are time-barred.

[8] The antitrust claim is not brought under *Section 1983*, so that statute's immunity doctrines do not apply.

[9] The Sutter Defendants also make this argument, and the reasons stated in this section apply equally to them.

act by MBC and its board members toward Plaintiff as occurring in 2013, when Plaintiff entered a stipulated settlement." *Id.*

Peterson first responds that the discovery rule postpones the running of the statute, because he did not know of the alleged anti-competitive behavior until late 2019, when the California Attorney General's investigation was publicized. MBC Oppo. 20. The problem for Peterson is that, in this Circuit, accrual of antitrust claims is governed by an injury rule, not the discovery rule. *See* *Beneficial Standard Life Ins. Co. v. Madariaga, 851 F.2d 271, 274 (9th Cir. 1988)*; *In re Animation Workers Antitrust Litig., 87 F. Supp. 3d 1195, 1209 (N.D. Cal. 2015)* (Koh, J.) (extensively surveying authorities). The Ninth Circuit has explicitly contrasted a discovery rule for accrual with the "accrual rule applicable to antitrust suits." *Beneficial Standard, 851 F.2d at 274-75*. Under that antitrust-specific rule, "the plaintiff's knowledge is generally irrelevant to accrual, which is determined according to the date on which injury occurs." *Id.* Peterson cites no contrary authority.

In the section of his brief on the antitrust claim's statute of limitations, Peterson relies solely on the discovery rule. *See* MBC Oppo. 20. Other sections of his brief do, however, refer to several other tolling doctrines. I will assume **[*29]** that he contends that those doctrines toll this claim as well.

One is the continuing violations doctrine. *Id.* 14-15. "***Antitrust law*** provides that, in the case of a 'continuing violation,' say, a price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff." *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (internal quotation marks and citations omitted). "But the commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt acts outside the limitations period." *Id.*

Peterson has identified no overt act within the limitations period. The allegation he relies on is that "Sutter, its peer review panel and the "CMB's" [sic] unlawful conduct constitutes an ongoing anti-competitive restraint of trade." FAC ¶ 264. That allegation is threadbare and conclusory, so it fails to satisfy Peterson's burden to plead that the claim is tolled. The allegation, moreover, does not identify any injury to Peterson, but the continuing violation doctrine "is one in which the *plaintiff's interests* are repeatedly invaded and a cause of action arises each time *the plaintiff is* ***[*30]*** *injured*." *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)* (emphasis added). Peterson identifies no injury to him that occurred within the limitations period. Peterson also appears to rely on the allegation that he continues to suffer damages to his reputation and business, *see* FAC ¶ 341, but the doctrine only tolls the claim for continuing *violations*, not simply when the *harm happens to last* into the limitations period. *See* *Klehr, 521 U.S. at 189* (explaining that the doctrine requires a new "act" that "injures" the plaintiff).

Next is the fraudulent concealment doctrine. Antitrust statutes of limitations "may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence." *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*. Peterson must "plead facts showing that [the defendants] affirmatively misled [him], and that [he] had neither actual nor constructive knowledge of the facts giving rise to its claim despite [his] diligence in trying to uncover those facts." *Conmar Corp. v. Mitsui & Co. (U.S.A.), 858 F.2d 499, 502 (9th Cir. 1988)*. A plaintiff has constructive knowledge if he "had enough information to warrant an investigation which, if reasonably diligent, would have led to the discovery of the fraud." *Hexcel, 681 F.3d at 1060*. And the plaintiff must plead facts supporting its **[*31]** showing of diligence. *Id.* Because it sounds in fraud, fraudulent concealment must be pleaded with particularity under *FRCP 9(b)*. See *Vanella v. Ford Motor Co., No. 3:19-CV-07956-WHO, 2020 U.S. Dist. LEXIS 32151, 2020 WL 887975, at *5 (N.D. Cal. Feb. 24, 2020)*. That means that Peterson must plead with "particularity the circumstances constituting the fraud," and the allegations must "be specific enough to give defendants notice of the particular misconduct . . . so that they can defend against the charge and not just deny that they have done anything wrong." *See* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009)* (citation omitted). "Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged." *Vess v. Ciba-Geigy Corp., 317 F.3d 1097, 1106 (9th Cir. 2003)* (citation omitted).

Peterson has failed to adequately allege that the doctrine applies. First, much of what he discusses is simply that he was never told the relevant information, but that is insufficient to constitute fraudulent concealment. *Conmar, 858 F.2d at 502*. Second, his pleading does not satisfy *Rule 9(b)*. He vaguely discusses that the Sutter Defendants hid their actions in closed meetings and by using attorney client privilege. *See* Opposition to the Sutter Mot. ("Sutter Oppo.") [Dkt. No. 66] 12-13. Even assuming that this would be sufficient to constitute fraudulent concealment, Peterson must plead the "who, **[*32]** what, when, where, and how" of these alleged acts. *Vess, 317 F.3d at 1106*. He has leave to amend to do so.

Another is the "overt act" doctrine from conspiracy law. But it does not toll the claim because, as explained above when discussing the continuing violation doctrine, Peterson has identified no overt act against him in the limitations period. *See* *People ex rel. Kennedy v. Beaumont Inv., Ltd., 111 Cal. App. 4th 102, 111, 3 Cal. Rptr. 3d 429 (2003)*, *as modified on denial of reh'g* (Sept. 9, 2003).

The final tolling doctrine referenced in Peterson's brief is equitable tolling. But the high bar for it is not met for largely the same reasons that fraudulent concealment is not: Peterson has not, as he must, pointed to some "extraordinary" external event beyond his control that prevented him from discovering this information. *See* *Menominee Indian Tribe of Wisconsin v. United States, 577 U.S. 250, 255, 136 S. Ct. 750, 193 L. Ed. 2d 652 (2016)*.

Because I cannot say that leave to amend is futile, Peterson has leave to amend if he wishes to more clearly plead why these doctrines apply.

D. MBC Defendants Conclusion

The State of California is not a party to this case. The MBC is dismissed with prejudice due to sovereign immunity. The state-law claims against the MBC Defendants are dismissed with prejudice due to sovereign immunity. The federal claims against the MBC Defendants are dismissed with leave to amend so that Peterson **[*33]** can adequately plead that *Ex parte Young* applies and that the MBC Defendants are not entitled to absolute immunity for damages. The antitrust claim is dismissed with leave to amend so that Peterson can plead that it is tolled.

II. SUTTER DEFENDANTS' MOTION TO DISMISS

The Sutter Defendants move to dismiss all of the claims against them as time-barred, barred by claim preclusion, and for failing to state a claim. *See* Sutter Defendants' Motion to Dismiss ("Sutter Mot.") [Dkt. No. 61].

A. Statute of Limitations on Federal Civil Rights Claims

As noted, a motion to dismiss based on a statute of limitations can only be granted when its running "is apparent on the face of the complaint." *Huynh, 465 F.3d at 997* (internal quotation marks and citation omitted). *Section 1983*, the basis for Peterson's federal civil rights claims, borrows the "personal injury statute of limitations of the state in which the cause of action arose." *Alameda Books, Inc. v. City of Los Angeles, 631 F.3d 1031, 1041 (9th Cir. 2011)*. As the parties agree, California's personal injury statute of limitations is two years from when the claim accrues. *See* Cal. Civ. P. Code § 335.1. But "federal law controls the question of when a claim *accrues*." *Johnson v. State of Cal., 207 F.3d 650, 653 (9th Cir. 2000)* (emphasis added). Absent a rule delaying accrual or tolling the statute, "a claim accrues when the plaintiff knows, or should know, **[*34]** of the injury which is the basis of the cause of action." *Id.*

The events that make up the core of this case occurred from 2009 to 2013, so the defendants argue that the claims are time-barred no matter which of them triggered the limitations period. Peterson relies on a number of doctrines to delay accrual or toll the statute. For the reasons that follow, I agree with him that it is not established on the face of the complaint that he did know or should have known of the facts underlying two of his federal civil rights claims until November 2019, when the kickbacks were made public. But I agree with the Sutter Defendants that the other two claims are time-barred.

Peterson frames the first of his arguments in terms of the discovery rule. The federal accrual standard is essentially the same as the discovery rule. *See* *Lukovsky v. City & Cty. of San Francisco, 535 F.3d 1044, 1048 (9th Cir. 2008)*. And California law's discovery rule (which some courts appear to have applied in *Section 1983* cases) is identical in substance: It "postpones accrual of a cause of action until the plaintiff discovers, or has reason to discover, the cause of action." *Fox v. Ethicon Endo-Surgery, Inc., 35 Cal. 4th 797, 807, 27 Cal. Rptr. 3d 661, 110 P.3d 914 (2005)*. A reason to discover exists when the plaintiff has reason "at least to suspect a factual basis for its elements." *Id.* (internal quotation **[*35]** marks and citation omitted). Both rules require the plaintiff to adequately show his diligence. *See id.;* *Mangum v. Action Collection Serv., Inc., 575 F.3d 935, 940 (9th Cir. 2009)*.

Peterson's first claim alleges that the Sutter Defendants violated his *First Amendment* rights by "punishing" him with the peer review process when he "refused" to accept kickbacks. FAC ¶¶ 142-45. The second claim alleges that he was denied constitutional due process because the peer review and MBC accusation processes were tainted. *Id.* ¶¶ 153-88. The third claim alleges discrimination based on the fact that he his African American and, it seems, based on the "protected class" of his patients who were indigent or on MediCal. *Id.* ¶¶ 200-11. The fourth claim alleges failure to prevent discrimination and retaliation premised on this. *Id.* ¶¶ 214-24.

Peterson has plausibly alleged that the discovery rule saves the *First Amendment* and due process claims. He alleges that the Sutter Defendants maintained a *secret* policy of providing kickbacks to compliant doctors and punishing uncompliant ones. *See* Sutter Oppo. 11. He has adequately pleaded that he could not reasonably have discovered that information until it was made public in November 2019, when the previously confidential California Attorney General investigation **[*36]** was publicized. *See* *Lukovsky, 535 F.3d at 1048* (holding that a claim accrues when the plaintiff knows or has reason to know the "underlying facts" and the "cause" of the injury); *Bibeau v. Pac. Nw. Rsch. Found. Inc., 188 F.3d 1105, 1108 (9th Cir. 1999)*, opinion amended on denial of reh'g, *208 F.3d 831 (9th Cir. 2000)* ("[T]he statute only begins to run once a plaintiff has knowledge of the 'critical facts' of his injury, which are that he has been hurt and who has inflicted the injury." (emphasis added)). Because of the nature of the alleged violation here, "what [Peterson] knew and when [he] knew it are questions of fact." *Bibeau, 188 F.3d at 1108*.

The two discrimination-based claims are not saved by the discovery rule. The Ninth Circuit has expressly held that, in an employment discrimination case, the claim accrues when the plaintiff is subject to an adverse employment action, not when the plaintiff suspects it was discriminatory. *Lukovsky, 535 F.3d at 1050*. Though Peterson does not allege *employment* discrimination, he alleges discrimination in supervision by medical authorities. The Ninth Circuit's decision emphasized that the federal accrual standard applies across disparate case types. *Id. at 1049*. In fact, in an on-point case about discipline from a state medical board that alleged religious discrimination, the Ninth Circuit held that the claim accrued when the **[*37]** plaintiff was denied license reinstatement—that is, when the adverse action was taken. *Olsen v. Idaho State Bd. of Med., 363 F.3d 916, 927 (9th Cir. 2004)*. Accordingly, the discrimination claims accrued when Sutter took the allegedly unlawful acts.

Nor are the discrimination claims saved by the other miscellaneous doctrines that Peterson invokes. He has not shown any "continuing violation" because he has not pointed to a way he was discriminated against within the limitations period. *See* *Williams v. Owens-Illinois, Inc., 665 F.2d 918, 924 (9th Cir. 1982)*, *opinion modified on denial of reh'g*, *No. 79-4110, 1982 U.S. App. LEXIS 18481, 1982 WL 308873 (9th Cir. June 11, 1982)* (federal doctrine); *Aryeh v. Canon Bus. Sols., Inc., 55 Cal. 4th 1185, 1192, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)* (state doctrine). He cannot rely on equitable tolling because he has not shown that he diligently pursued investigating this issue after the allegedly discriminatory events, that any "extraordinary" external circumstance stood in the way of filing the claim, or that there is a "technical forfeiture" of his rights that would be unjust to enforce. *Menominee, 577 U.S. t 255* (federal standard); *Lantzy v. Centex Homes, 31 Cal. 4th 363, 370, 2 Cal. Rptr. 3d 655, 73 P.3d 517 (2003)*, *as modified* (Aug. 27, 2003) (state standard). He cannot rely on the fraudulent concealment doctrine because he does not allege an affirmative act that kept him from discovering the information, as opposed to merely not revealing it. *Grisham v. Philip Morris U.S.A., Inc., 40 Cal. 4th 623, 637, 54 Cal. Rptr. 3d 735, 151 P.3d 1151 (2007)*. And he cannot rely on the "overt act" doctrine from conspiracy liability because he alleges no "overt act" contributing **[*38]** to a civil conspiracy to discriminate that occurred within the limitations period. *Kennedy, 111 Cal. App. 4th at 111*.

I cannot say that it would be futile to grant leave to amend to plead that the discrimination claims are tolled. Peterson has leave to amend.

B. Statute of Limitations on Antitrust Claims

As discussed in section I.C.iii.2 above concerning the MBC Defendants, the federal antitrust claims are subject to a somewhat different analysis based on antitrust-specific accrual rules. And for the reasons explained there, the antitrust claims against the Sutter Defendants are also dismissed as time-barred.

C. Statute of Limitations on State-Law Claims

Each of Peterson's state-law claims has a specific statute of limitations, but the parties agree that they range between one and four years; because the challenged events ended in 2013 and the lawsuit was filed in 2021, neither has pointed to anything that turns on these differences. Instead, just as with the federal civil rights claims, the parties' dispute is whether accrual is delayed by the discovery rule or otherwise tolled. The heart of all of the state-law claims is that the Sutter Defendants' peer review process was unlawfully tainted by retaliatory animus and **[*39]** that the Sutter Defendants "used" the MBC discipline process to punish Peterson for not complying with their alleged kickback scheme.

Peterson first argues that the discovery rule saves the claims. As noted, California's discovery rule "postpones accrual of a cause of action until the plaintiff discovers, or has reason to discover, the cause of action." *Fox, 35 Cal. 4th at 807*. Again, a reason to discover exists when the plaintiff has reason "at least to suspect a factual basis for [the cause of action's] elements." *Id.* (internal quotation marks and citation omitted).

For the reasons explained above, Peterson has adequately alleged that he could not reasonably have discovered the facts underlying and cause of *some* of these injuries earlier than when the California Attorney General investigation was made public. He was certainly aware of the actions taken that injured him, but it is plausible he did not and could not have known that those actions were part of a larger unlawful scheme—so he would not have been on notice to bring his action. In particular, he plausibly would not have been on notice sufficient to bring the breach of contract, breach of the covenant of good faith and fair dealing, negligence, intentional **[*40]** infliction of emotional distress ("IIED"), negligent infliction of emotional distress, and UCL claims. Having knowledge of the elements of those claims depends on having knowledge of the kickbacks. To take one example, Peterson alleges that the *violation* of the covenant of good faith and fair dealing was precisely that the treatment of him was pretextual and part of this scheme. To take another example, what is "outrageous" for purposes of the IIED claim, he alleges, is the secret rationale of the Sutter Defendants' actions.

Not all of the claims qualify under this doctrine. Knowing the facts underpinning the interference with contractual relationships and business disparagement claims does not depend on knowing the allegedly unlawful motivation. Put another way, Peterson had an entire claim for both of these when his professional prospects were allegedly harmed by the Sutter Defendants' actions. *See* *Fox, 35 Cal. 4th at 807*. He may not have known the internal motive for those actions, but that is not relevant because he was aware of all pertinent facts. In another vein, the Unruh Act claim does not survive because it is for discrimination. As explained above, the federal accrual standard *is* the discovery **[*41]** rule, and Ninth Circuit precedent holds that the discovery rule is satisfied when the adverse discriminatory event occurs, regardless of actual knowledge of discriminatory motive. Peterson has cited no contrary authority from the California courts applying their discovery rule differently.

I therefore turn to whether the grab-bag of tolling doctrines saves these three claims. They do not. The Unruh Act claim does not qualify for the same reasons the federal discrimination claims do not, as explained above. There, I applied California's doctrine (and the federal one) to each of the theories Peterson puts forward, but none save the discrimination claim. The interference with contractual relations and business disparagement claims also do not qualify. Even assuming that the continuing violation doctrine applies to claims like these, Peterson has pointed to no invasion of his rights of this kind within the limitations period that is part of a broader course of unlawful conduct. *See* Aryeh, 55 Cal. 4th at 1192. He cannot rely on equitable tolling because he had full knowledge of the basis of these claims since they accrued, as explained above; nothing turned on the newly discovered kickbacks. *See* Lantzy, 31 Cal. 4th at 370. Because he had **[*42]** full knowledge—not just constructive knowledge—at the time of injury, the fraudulent concealment doctrine has no role to play here. *See* Grisham, 40 Cal. 4th at 637. And again, he has not pointed to any "overt act" within the limitations period that is part of a civil conspiracy to commit these torts. Kennedy, 111 Cal. App. 4th at 111.

Again, I cannot rule out that there might be some allegation that saves the claims, so leave to amend is granted.

D. HCQIA Claim

The Sutter Defendants move to dismiss the claim for retaliation in violation of the HCQIA. *See* Sutter Mot. 10. As a general matter, the HCQIA establishes national standards for professional review of physicians. *See* 42 U.S.C. §§ 1101 et seq. The courts of appeals that have addressed the question have unanimously held that the HCQIA "does not create a private right of action against hospitals, physicians, or other entities involved in peer review activities for failure to comply with HCQIA standards." Rowell v. Valleycare Health Sys., No. C 10-02816 CRB, 2010 U.S. Dist. LEXIS 113213, 2010 WL 4236797, at *2 (N.D. Cal. Oct. 21, 2010) (collecting authorities). Peterson has pointed to no provision that explicitly creates a private right of action and does not argue that there is any indication that Congress implicitly intended to create one. *See* Scalia v. Emp. Sols. Staffing Grp., LLC, 951 F.3d 1097, 1103 (9th Cir. 2020) (discussing this private-right-of-action standard). **[*43]** Accordingly, Peterson has not shown that his claim is cognizable in a private civil suit.[10] It is DISMISSED WITH PREJUDICE against all defendants.

E. Claim Preclusion

In the alternative, the Sutter Defendants argue that all of these matters are subject to claim preclusion from the 2012 lawsuit that Peterson brought against Stollman and Perry. I address only the claims that survive the analysis so far: the First Amendment, due process, and specific state-law claims discussed above.

In a federal-question case like this, "federal courts participate in developing uniform federal rules of res judicata." Taylor v. Sturgell, 553 U.S. 880, 891, 128 S. Ct. 2161, 171 L. Ed. 2d 155 (2008) (internal quotation marks, alteration, and citation omitted). "The preclusive effect of a judgment is defined by claim preclusion and issue preclusion, which are collectively referred to as 'res judicata.'" Id. at 892 In claim preclusion, "a final judgment forecloses successive litigation of the very same claim, whether or not relitigation of the claim raises the same issues as the earlier suit." *Id.* (internal quotation marks and citation omitted). To apply, there must be "(1) an identity of claims in the two actions; (2) a final judgment on the merits in the first action; and (3) identity or privity between the **[*44]** parties in the two actions." Frank v. United Airlines, Inc., 216 F.3d 845, 850 (9th Cir. 2000). "[I]dentity of claims exists when two suits arise from 'the same transactional nucleus of facts.'" Tahoe-Sierra Pres. Council, Inc. v. Tahoe Reg'l Plan. Agency, 322 F.3d 1064, 1078 (9th Cir. 2003) (internal quotation marks and citation omitted).

The parties argue over several aspects of the doctrine, such as identity of the claims, whether the parties are in privity, and even whether the previous judgment was procured by fraud. The Sutter Defendants' argument that the claims are precluded fails for a more fundamental reason: Claim preclusion applies only to claims that were or *could have been* brought in the first action. *See, e.g.,* Frank, 216 F.3d at 850; Owens v. Kaiser Found. Health Plan, Inc.,

[10] The two state-court cases that Peterson cites do not hold or suggest that the HCQIA creates a private right of action for his claim. *See* Fahlen v. Sutter Cent. Valley Hosps., 58 Cal. 4th 655, 685, 168 Cal. Rptr. 3d 165, 318 P.3d 833 (2014); Clark v. Columbia/HCA Info. Servs., Inc., 117 Nev. 468, 480, 25 P.3d 215 (2001).

244 F.3d 708, 713 (9th Cir. 2001). Said otherwise, it only applies when the party had a "full and fair opportunity" to litigate the claim earlier. *Allen v. McCurry, 449 U.S. 90, 95, 101 S. Ct. 411, 66 L. Ed. 2d 308 (1980)* (internal quotation marks and citation omitted). But, as I have explained, at this point it is plausible that the claims I address here could not have been brought in the 2012 suit because a reasonable person would not have known he could bring them until late 2019 at the earliest.[11] As the Ninth Circuit has explained, "[t]he rule that a judgment is conclusive as to every matter that might have been litigated does not apply to new rights acquired pending the action which might have been, but which were not, **[*45]** required to be litigated." *Los Angeles Branch NAACP v. Los Angeles Unified Sch. Dist., 750 F.2d 731, 739 (9th Cir. 1984)* (internal quotation marks and citation omitted). Or as the Second Circuit put it, "[i]f significant new evidence is uncovered subsequent to the proceeding said to result in an estoppel of the present action, then it cannot be found that a party was afforded a full and fair opportunity to present his case in the absence of that evidence." *Khandhar v. Elfenbein, 943 F.2d 244, 249 (2d Cir. 1991)*. The claims are not precluded on the face of the complaint. This issue may be re-raised once the record is developed and it is established what Peterson knew (or should have known) and when he knew it.

F. UCL Standing

The Sutter Defendants argue that Peterson has not alleged that he possesses statutory standing under the UCL. To possess statutory standing, a party must have "suffered injury in fact and ha[ve] lost money or property as a result of the unfair competition." *Kwikset Corp. v. Superior Ct., 51 Cal. 4th 310, 322, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)* (internal quotation marks and citation omitted). The Sutter Defendants argue only that Peterson does not *allege* any losses, but the FAC alleges that his client pool was shrunk by the kickback scheme. FAC ¶ 371. While that allegation appears to be relatively speculative and perhaps will not be cognizable, it is an allegation of loss and so is sufficient to **[*46]** defeat the Sutter Defendants' cursory argument. Whether it is too speculative or attenuated can be answered at a later stage and has not been challenged today.

G. Sutter Defendants Conclusion

The claims for federal discrimination, violation of the Unruh Act, intentional interference with contractual relations, and business disparagement are dismissed with leave to amend. The motion to dismiss is otherwise denied.

CONCLUSION

The MBC Defendants' motion is GRANTED WITH PREJUDICE to the extent the FAC is against the State of California and the MBC and on the state-law claims against the MBC Defendants. It is GRANTED WITH LEAVE TO AMEND on the federal claims against the MBC Defendants. The Sutter Defendants' motion is GRANTED WITH PREJUDICE on the HCQIA claim. It is GRANTED WITH LEAVE TO AMEND on the federal discrimination, Unruh Act, intentional interference with contractual relations, and business disparagement claims. It is DENIED IN PART on the other claims.

IT IS SO ORDERED.

Opinion by: Dana M. Sabraw

Opinion

ORDER DENYING DEFENDANTS' MOTION FOR PARTIAL SUMMARY JUDGMENT AGAINST DIRECT ACTION PLAINTIFFS ON STATUTE OF LIMITATIONS GROUNDS

(ECF No. 2010)

Pending before the Court in this multidistrict litigation is a partial motion for summary judgment against the Direct Action Plaintiffs ("DAPs"). Specifically, Defendants Bumble Bee Foods LLC ("Bumble Bee"), **[*43]** Lion Capital LLP, Lion Capital (Americas), Inc. and Big Catch Cayman LP, and Defendants StarKist Company ("StarKist") and its current and former owners Dongwon Industries Co., Ltd. ("DWI") and Del Monte Corporation, respectively, filed a motion for partial summary judgment against DAPs (Defs.' Mot. for Partial Summ. J., ECF No. 2010) on statute of limitation grounds. Liaison counsel for DAPs filed an opposition to the motion (DAPs' Opp'n to Defs.' Mot., ECF No. 2088), and some but not all of the Defendants filed a reply brief. (Reply Mem. of P. & A. in Further Supp. of Defs.' Mot., ECF No. 2188.)[1]

I.

BACKGROUND

The general background and history of this litigation is well documented and extensively discussed in prior orders. (ECF Nos. 2454, 2654.) For purposes of the present motion, the Court sets out the following facts:

On August 3, 2015, DAPs filed a complaint alleging an antitrust conspiracy by the three largest domestic tuna brands and their parent companies, including Defendants herein, to fix and maintain packaged tuna prices above competitive levels in violation of state and federal antitrust laws. Shortly thereafter, on August 24, 2015, **[*44]** groups of End Payer Plaintiffs ("EPPs") and Commercial Food Preparer Plaintiffs ("CFPs") filed a complaint alleging the same conspiracy. On December 9, 2015, these parallel civil actions based on the same conspiracy were consolidated in a multidistrict litigation for pretrial proceedings before this Court. DAPs seek relief in the form of compensatory damages, attorney's fees, costs, and interest.[2]

Defendants request summary judgment that claims outside the relevant statute of limitations (four years for federal antitrust claims and one to six years for state antitrust and consumer protection claims) are time-barred. (Defs.' Mot. for Partial Summ. J., ECF No. 2010.) DAPs oppose, arguing that this Court should apply the fraudulent concealment doctrine, *Am. Pipe & Const. Co. v. Utah (American Pipe), 414 U.S. 538 (1974)*, and the discovery rule to preserve and toll all claims. (DAPs' Opp'n to Defs.' Mot., ECF No. 2088.) The Court denies the motion because the evidence provided by DAPs raises genuine issues of material fact regarding whether Defendants engaged in fraudulent concealment of their anticompetitive activity, thus tolling the statutes of limitation.

II.

LEGAL STANDARD

Federal Rule of Civil Procedure 56 empowers the Court to **[*45]** enter summary judgment on factually unsupported claims or defenses. Summary judgment or adjudication of issues is appropriate if depositions, answers to

---

[1] As previously noted in the Order Granting in Part and Denying in Part DAPs and EPPs' Mot. for Partial Summ. J. Against StarKist Co. Based on Guilty Pleas and Admis. in Parallel Criminal Proceedings (ECF No. 2654), Bumble Bee filed for bankruptcy protection. *See In re: Bumble Bee Parent, Inc. et al.*, Case No. 19-12502-LSS (Bankr. D. Del.). As a result, proceedings against Bumble Bee are currently stayed and all claims against it have been administratively closed. (ECF No. 2286.) Accordingly, this Order identifies Bumblebee only insofar as it was one of the original Moving Parties. In addition, Lion Capital LLP (a British private equity firm that purchased Bumble Bee in 2010) and Big Catch Cayman LP (a holding company that wholly owns Bumble Bee) have been dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (ECF No. 2270.) A motion for reconsideration is pending. (ECF No. 2285.) Lion Capital (Americas), a U.S. subsidiary of Lion Capital LLP, remains in the case. The Reply brief was therefore filed by Defendants StarKist, DWI, Del Monte and Lion Capital (Americas) and Specially Appearing Defendants Lion Capital LLP and Big Catch Cayman LP.

[2] For purposes of the present Order, the Fourth Amended Complaint filed on October 5, 2018, in *The Kroger Co., et al. v. Bumble Bee Foods LLC, et al.*, Case No. 16-cv-00051 (the "Kroger Complaint"), is in all material respects representative of the operative DAP amended complaints. (*See* ECF No. 492 at 2 n.2 (generally treating "DAP Kroger's Second Amended Complaint as a valid exemplar of all DAPs' Complaints")).

interrogatories, and admissions on file, together with the affidavits, if any, show there is no genuine dispute as to any material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*, *(c)(1)*. A fact is material when, under the governing substantive law, it could affect the outcome of the case. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A dispute about a material fact is genuine if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id.*

The burden on the party moving for summary judgment depends on whether it bears the burden of proof at trial.

> When the party moving for summary judgment would bear the burden of proof at trial, it must come forward with evidence which would entitle it to a directed verdict if the evidence went uncontroverted at trial. In such a case, the moving party has the initial burden of establishing the absence of a genuine issue of fact on each issue material to its case.

C.A.R. Transp. Brokerage Co., Inc. v. Darden Rest., Inc., 213 F.3d 474, 480 (9th Cir. 2000); *see also* *Rookaird v. BNSF Ry. Co., 908 F.3d 451, 459 (9th Cir. 2018)* ("Where the moving party will have the burden of proof at trial, the movant must affirmatively demonstrate that no reasonable **[*46]** trier of fact could find other than for the moving party.").

On the other hand, if the moving party would *not* bear the burden at trial, it can meet its burden on summary judgment by "either of two methods:"

> produce affirmative evidence . . . negating an essential element of the nonmoving party's case, or, after suitable discovery, the moving party may . . . meet its initial burden of production by showing—that is, pointing out to the district court—that there is an absence of evidence to support the nonmoving party's case.

Nissan Fire & Marine Ins. Co., Ltd. v. Fritz Companies, Inc., 210 F.3d 1099, 1105-06 (9th Cir. 2000) (quoting *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*).

If the moving party carries its burden of production, the nonmoving party must "go beyond the pleadings and by [its] own affidavits, or by the depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial." *Celotex, 477 U.S. at 324*. In this regard, the nonmoving party:

> must do more than simply show that there is some metaphysical doubt as to the material facts[, and] must come forward with specific facts showing that there is a genuine dispute for trial. Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial.

Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986).

In ruling **[*47]** on a motion for summary judgment, "courts may not resolve genuine disputes of fact in favor of the party seeking summary judgment." *Tolan v. Cotton, 572 U.S. 650, 656, 134 S. Ct. 1861, 188 L. Ed. 2d 895 (2014)*. "[A] judge's function at summary judgment is not to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." *Id.* "[T]he evidence of the nonmovant is to be believed, and all justifiable inferences are to be drawn in his favor." *Id. at 651*; *see also* *id. at 657*. "Credibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge." *Anderson, 477 U.S. at 255*.

"The district court may limit its review to the documents submitted for the purpose of summary judgment and those parts of the record specifically referenced therein." *Carmen v. San Francisco Unified Sch. Dist., 237 F.3d 1026, 1030 (9th Cir. 2001)*. The court is not obligated "to scour the record in search of a genuine issue of triable fact." *Keenan v. Allan, 91 F.3d 1275, 1279 (9th Cir. 1996)*.

III.

DISCUSSION

As stated above, Defendants request the Court enter summary judgment in their favor because DAPs' claims are time-barred. The Court addresses DAPs' federal claims first, and then turns to the state law claims.

A. Federal Claims

Antitrust actions under the *Sherman Antitrust Act* are subject to a four-year statute of limitations. *15 U.S.C. § 15(b)*. Defendants contend **[*48]** DAPs injuries began as early as December 2007, therefore their federal claims, filed on August 3, 2015, are untimely. (Defs.' Mot. for Partial Summ. J., ECF No. 2010 at 7.) DAPs concede they filed their actions outside the four-year statute of limitations, but contend the limitations period was tolled by Defendants' fraudulent concealment. (DAPs' Opp'n to Defs.' Mot., ECF No. 2084 at 2.)[3]

To prove fraudulent concealment, the burden is on the plaintiff to establish that: "(1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have 'actual or constructive knowledge of the facts giving rise to its claim'; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim." *In re Animation Workers Antitrust Litig., 123 F. Supp. 3d 1175, 1194 (N.D. Cal. 2015)* (quoting *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*). An application of the fraudulent concealment doctrine is necessarily a fact-based inquiry. *Conmar Corp. v. Mitsui & Co. (U.S.A.), 858 F.2d 499, 502 (9th Cir. 1988)*; *Goodman v. Dohmen, 777 F. App'x 895, 896 (9th Cir. 2019)*. Each element is addressed in turn.

1. Affirmative Acts to Mislead

To establish a fraudulent concealment defense, a plaintiff has the burden to illustrate that its lack of notice of its claim was directly attributable to affirmative conduct by the defendant. *Conmar, 858 F.2d at 505* ("A plaintiff alleging fraudulent concealment must establish that its failure to have notice **[*49]** of its claim was the result of affirmative conduct by the defendant."). Affirmative conduct that supports a finding of fraudulent concealment includes "public pretextual statements, alteration or destruction of documents, and evidence that employees used methods to communicat[e] sensitive information that would not leave a trail." *In re Korean Ramen Antitrust Litig., 281 F.Supp.3d 892, 905 (N.D. Cal. 2017)*. Case law in the Ninth Circuit dictates that "affirmative acts" must consist of more than passive concealment. *Conmar, 858 F.2d at 505*; *Rutledge v. Bos. Woven Hose & Rubber Co., 576 F.2d 248, 250 (9th Cir. 1978)*; *Volk v. D.A. Davidson & Co., 816 F.2d 1406, 1416 (9th Cir. 1987)* ("Appellees' silence or passive conduct does not constitute fraudulent concealment."). Affirmative acts need not be separate and apart from acts purported to be in furtherance of the conspiracy, but must be more than acts that "by nature are self-concealing." *Garrison v. Oracle Corp., 159 F. Supp. 3d 1044, 1076 (N.D. Cal. 2016)*; *Ryan v. Microsoft Corp., 147 F. Supp. 3d 868, 886 (N.D. Cal. 2015)*.

Here, DAPs provide evidence of several instances whereby Defendants did not merely commit to conveying public pretextual statements, but coordinated directly with competitors on messaging for the "rightsizing" initiative.[4] For instance, on April 11, 2008, Scott Cameron of Bumble Bee received a presentation from Del Monte outlining talking points and strategies regarding the initiative. (DAPs' Opp'n to Defs.' Mot., Ex. 9, ECF No. 2084.) On May 1, 2008, Cameron received a fax enclosing **[*50]** Chicken of the Sea's ("COSI") presentation materials to retailers. (DAPs' Opp'n to Defs.' Mot., Ex. 12, ECF No. 2084.) This exchange of proprietary business information allegedly resulted in StarKist, Bumblebee, and COSI echoing the same talking points—that can downsizing would prevent cost increases and that the high-price elasticity for packaged tuna lent itself to can downsizing and price increases. (DAPs' Opp'n to Defs.' Mot., Ex. 9-12, ECF No. 2084.)

---

[3] The public redacted version of this briefing can be found at ECF No. 2088. The version cited here is the sealed brief.

[4] According to a presentation prepared by StarKist and Del Monte, the "rightsizing plan" was a proprietary and confidential initiative aimed at "enabling category growth the right way." (DAPs' Opp'n to Defs.' Mot., Ex. 9, ECF No. 2084.) The plan outlines that StarKist would "reduce select canned business net weight from 6.0oz to 5.0oz while increasing fish fill percentage by over 4.0pts." (*Id.*) It proceeds to outline all other modifications in can sizes, can weights, and fish fill in a variety of products. (*Id.*)

DAPs also provide evidence that on June 17, 2008, Bumble Bee received Del Monte's presentation deck which offered justifications for the price increases and can downsizing that were underway. (DAPs' Opp'n to Defs.' Mot., Ex. 13, ECF No. 2084.) Under the guise of "smoke and mirrors," (*id.*), as Bumble Bee's Kenneth Worsham put it, the three major players in the tuna market allegedly came forth and published remarkably similar justifications for these economic modifications:[5]

bang Del Monte[6] Chicken of the Sea[7] Bumble Bee[8]

Further, DAPs point to evidence suggesting that Defendants altered or destroyed documents. For example, upon receipt of competitively sensitive information from Bumble Bee, Stephen Hodge of StarKist wrote to his team **[*51]** to destroy the sensitive information. Specifically, Hodge wrote: "I wouldn't post this to an official DM/SK site. Probably something legally there we don't want to mess with. He can save it to a shared drive and we can let folks know where to find it ... leave it there for a couple of days and then get rid of it off the server." (DAPs' Opp'n to Defs.' Mot., Ex. 44, ECF No. 2084.)

DAPs also cite evidence that Defendants engaged in obfuscatory behavior to conceal their misconduct. That evidence consists of thousands of telephonic communications between high-level executives and consultants at Bumble Bee, StarKist, and COSI.[9] Other evidence reflects Defendants used private emails, and email addresses of family members, to avoid possible detection. (*See* DAPs' Opp'n to Defs.' Mot., 22-26, ECF No. 2084) (email communications concerning pricing information sent between private email addresses.) In one example, DAPs point to an email, presumably drafted by Hubert Tucker of COSI, where he receives StarKist's price increase letter and reminds himself to send COSI's letter to Bruce Bollmer of StarKist. Notably, the email is sent to Tucker's wife and the subject line reads, "I miss you! Come home!" **[*52]** (DAPs' Opp'n to Defs.' Mot., Ex. 27, ECF No. 2084; *see also id.*, Ex. 28-30) (emails Tucker sent or received on his wife's email account.)

DAPs further point to evidence of clandestine meetings between top executives from Bumble Bee and COSI. The evidence suggests that although top executives were to meet at Bumble Bee's office, the venue was changed to a restaurant where customers and lower-level Bumble Bee employees would not learn of the meeting. (DAPs' Opp'n to Defs.' Mot., Ex. 19-20, ECF No. 2084.) DAPs also point to Chris Lischewski's indictment where the United States offered, and a Grand Jury affirmed, that Lischewski and his co-conspirators, "employed measures to conceal their conduct, including, but not limited to, using code when referring to coconspirators, meeting at offsite locations to avoid detection, limiting distribution and discouraging retention of documents reflecting conspiratorial contacts, and providing misleading justifications for prices." (DAPs' Opp'n to Defs.' Mot., Ex. 21, ECF No. 2084.)

The foregoing evidence raises triable issues of fact regarding whether Defendants engaged in affirmative acts to mislead. Defendants do not directly rebut this evidence, but **[*53]** instead argue that the doctrine of fraudulent concealment does not apply because DAPs had actual or constructive knowledge by July 2008 of facts sufficient to excite suspicion and alert them to their antitrust claims at issue.

2. Actual or Constructive Knowledge

---

[5] The following chart is a modified version of a chart which can be found in Pls.' Opp'n to Defs.' Mot. for Summ. J. on Statute of Limitations Grounds. (DAPs' Opp'n to Defs.' Mot. at 18, ECF No. 2084.) All modifications were made to make each quotation as complete as possible.

[6] All quotations from this column can be found at DAPs' Opp'n to Defs.' Mot., Ex. 14, ECF No. 2084.

[7] All quotations from this column can be found at DAPs' Opp'n to Defs.' Mot., Ex. 16, ECF No. 2084.

[8] All quotations from this column can be found at DAPs' Opp'n to Defs.' Mot., Ex. 17, ECF No. 2084.

[9] For example, there is evidence of numerous calls between and among Kenneth Worsham and Scott Cameron of Bumble Bee, Stephen Hodge and Robert Worsham (father of Ken) of StarKist, and Bruce Reynolds and Mike White of COSI, among others. (Pls.' Joint Statement of Undisputed Facts in Supp. of *Rule 56* Mots., Ex. 40, ECF No. 2003.)

DAPs carry the burden to establish that they did not have "actual or constructive knowledge of the facts giving rise to the claim." *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*. However, to defeat Defendants' motion for summary judgment on statute of limitations grounds, DAPs need only demonstrate that triable issues of fact exist regarding whether they had knowledge of facts giving rise to their claims more than four years before filing the complaint at issue. Specifically, the doctrine of fraudulent concealment (and tolling of the statute of limitations) may be negated on summary judgment only if the defendant introduces uncontroverted evidence that "'irrefutably demonstrates that a plaintiff discovered or should have discovered [the cause of action] but failed to file a timely complaint.'" *Conmar, 858 F.2d at 502*. Thus, "[w]here a plaintiff's suspicions have been or should have been excited, there can be no fraudulent concealment where he 'could have then confirmed his earlier suspicion by **[*54]** a diligent pursuit' of further information.'" *Id. at 504* (citation omitted). However, as *Conmar* makes clear, proving that a plaintiff has knowledge of facts giving rise to its claim, is difficult to do on a motion for summary judgment. *Id.* (stating facts must "excite the inquiry of a reasonable person" and put plaintiff on inquiry notice of its claim to start the limitations period).

In *Conmar*, the Ninth Circuit considered whether an antitrust lawsuit filed by Conmar against Mitsui on July 21, 1986, "four years to the day" after Mitsui was criminally indicted on July 20, 1982, was barred by the four-year statute of limitations. *858 F.2d at 502*. Conmar, a "post-tension" concrete contractor, sued Mitsui for illegally importing and selling PC-strand (steel wire that is embedded in concrete and used to tension and strengthen it) at "illegally low prices" to a competitor, VSL Corp. ("VSL"), which allowed VSL to unfairly submit low bids for "post-tensioning jobs." *Id.at 501*. Mitsui argued that "prior to the filing of the indictment [against it], all the information it contained was in the public domain[,]" thus putting Conmar on notice of its antitrust claim outside the limitations period. *Id.* The information in the public domain at **[*55]** that time was extensive, and included widespread national news coverage (San Francisco Chronicle, The Los Angeles Times, The New York Times, Business Week and San Jose Mercury News), an earlier guilty plea by VSL for aiding and abetting Mitsui (January 1982), an indictment against another competitor of Conmar, Pacific Steel & Supply Co. ("Pacific Steel"), who was also complicit with Mitsui (June 30, 1981), a public unsealing of a federal agent's affidavit, which was the basis for a warrant to search Mitsui's San Francisco office (March 28, 1981), and a civil antitrust lawsuit filed by another concrete contractor against Pacific Steel and Matsui (July 1981) based on the indictment of Pacific Steel. Despite this wealth of information, the court in *Conmar* found there were triable issues of fact whether that "information ... was enough to put Conmar on notice of its antitrust claim and start the limitations period." *Id. at 502-504*.

In so holding, *Conmar* set out a demanding standard. It quickly dispensed with the argument that Conmar had actual knowledge of facts giving rise to its antitrust claim, noting that Conmar alleged Mitsui engaged in an "elaborate scheme of false documents and secret payments[,]" that Conmar's **[*56]** president, Lawrence Yegge, "had not read any of the newspaper articles nor known of Mitsui's legal troubles until sometime after the indictment[,]" and that Conmar "did not know that Mitsui supplied VSL with PC-strand." *858 F.2d at 502*. Given those disputed facts, the court defined the "central question [as] not whether Conmar had actual knowledge of its antitrust cause of action, but ... whether before [before the Mitsui indictment], it should have been alerted to facts that, following duly diligent inquiry, could have advised it of its claim." *Id.*

Addressing the central question, the *Conmar* court noted that, "[o]nly one San Francisco Chronicle article mentioned PC-strand, as did one Wall Street Journal article, which also mentioned that sales to VSL were being investigated." *Id. at 503*. The court also noted that while the federal agent's affidavit "detailed Mitsui's dumping of PC-strand, it contained no reference to VSL, and the news articles reporting it made no mention of VSL or PC-strand." *Id.* The court further noted that the "only mention of VSL's January 1982 guilty plea ... was in an article identified in an affidavit as a Wall Street Journal article, undated and unlocated as to page." *Id.* The court noted **[*57]** that the indictment against Pacific Steel on June 30, 1981, focused on a different steel product, "steel nails[,]" and not PC-strand. *Id.* Finally, the court noted that while a competitor of Conmar filed suit against Pacific Steel and Mitsui within a month of the Pacific Steel indictment, the suit was not publicized and would not in any event put Conmar on inquiry notice of its claim against Mitsui:

> Even if Conmar were charged with knowledge of [that lawsuit] because it was a matter of public record, that knowledge would not necessarily justify the filing of a complaint, and so the issue of whether the statute of limitations was tolled would be inappropriate for summary judgment.

Id. at 504.

It is apparent from the nature and quantity of information publicly available to Conmar that it should have known of some information about Mitsui and its steel products "dumping" scheme with VSL and Pacific Steel before Mitsui was indicted and outside the limitations period. Yet, the court stated that summary judgment is inappropriate "even where the defendant has demonstrated that the plaintiff should have known of *some* information arousing his inquiry." *Id. at 503-04* (citing *In re Beef Industry Antitrust Litigation, 600 F.2d 1148, 1171 (5th Cir. 1979)* (emphasis added). The "leap" from Conmar's **[*58]** knowledge of some information to charging it with inquiry notice of its antitrust claim and starting the limitations period involved factual issues for a trier of fact to decide. *See id. at 504*.

So it is here. The information that DAPs allegedly had or should have had is far less illuminating than the information available to the plaintiff in *Conmar*. Defendants argue the uncontroverted evidence in the record shows DAPs had knowledge of facts giving rise to their claims "no later than July 2008[,]" well before DAPs filed the complaint at issue on August 3, 2015. (Defs.' Mot. for Partial Summ. J. at 1, ECF No. 2012.) Defendants rely heavily on an allegation in DAPs' complaints. There, DAPs assert that downsizing would have made economic sense to the Defendants only if they had conspired with one another. (Defs.' Mot. for Partial Summ. J., ECF No. 2012 at 11; *Id.*, Ex. 1.)[10] Specifically, Defendants rely on the following allegation:

> [a]bsent an agreement among all three Defendants to reduce packaging size, it would have been against the individual interest of any one Defendant to make the shift for fear of losing market share as major customers were opposed to downsizing and threatened to drop any brand that **[*59]** made the switch in favor of a brand that did not make the switch.

(Defs.' Mot. for Partial Summ. J., Ex. 1, ECF No. 2012.)

Defendants contend that allegation constitutes a judicial admission. (Defs.' Mot. for Partial Summ. J. at 11, ECF No. 2012.) "Factual assertions in pleadings and pretrial orders, unless amended, are considered judicial admissions conclusively binding on the party who made them." *Am. Title Ins. Co. v. Lacelaw Corp., 861 F.2d 224, 226 (9th Cir. 1988)*. But this does not advance Defendants' motion, as triable issues of fact remain regarding *when* Defendants learned the facts underlying that allegation.

DAPs point out, and Defendants do not dispute, that "prior to receiving Defendants' grand jury production on March 30, 2017, no DAP made the [foregoing] allegation." (DAPs' Opp'n to Defs.' Mot. at 9, ECF No. 2084.) DAPs further note that only after receiving Defendants' grand jury productions on March 30, 2017, did they "amend[] their claims to allege that the 2008 can-downsizing was the result of collusion" (*Id.*). Based on information from those grand jury productions, DAPs amended their complaints to include "allegations detailing numerous specific communications between the Defendants that led to the can downsizing and that supported the **[*60]** allegation that Defendants recognized that the downsize would not succeed if they did not all make the change." (*Id.*) Notably, Defendants have not produced any evidence showing that any DAP was aware of that kind of information before March 2017.

Lastly, Defendants suggest it is irreconcilable for DAPs to allege they had no actual or constructive knowledge of claims when they concede they had access to supply and demand information throughout the length of the conspiracy.[11] Defendants point to admissions by DAPs that supply and demand data suggests that packaged tuna prices ought to have been dropping, instead of rising. Although this argument has some base-level appeal, it inequitably assigns the price change and can downsizing a greater weight than the information later adduced from discovery—such as the alleged means of concealment and each Defendant's involvement in the conspiracy. As this Court previously stated:

---

[10] The public redacted version of this briefing can be found at ECF No. 2010. The version cited here is the sealed brief.

[11] DAPs allege that they "had neither actual nor constructive knowledge of the facts constituting their claims for relief" and that they "did not discover and could not have discovered through the exercise of reasonable diligence, the existence of the conspiracy alleged herein until at least July 2015." *See, e.g.*, Affiliated Foods Plaintiffs' Fourth Amended Complaint at ¶¶ 249-50 (ECF No. 1431); The Kroger Complaint at ¶ 179 (ECF No. 1422).

> Simply put, there is no reason a particular piece of information should have a fixed amount of relevance regardless of the context in which it is viewed. For example, a lone puzzle piece may, in isolation, give no further indication as to the larger picture into which it **[*61]** fits, and yet at the same time be an integral component of the final product once all corresponding pieces are assembled.

In re Packaged Seafood Prods. Antitrust Litig., 242 F.Supp.3d 1033, 1099 (S.D. Cal. 2017) (Sammartino, J.).

In this case, it is entirely possible DAPs had access to supply and demand information (a lone puzzle piece), which delivered no further indication to the larger picture into which it fits. When contextualized with later developing events such as a government investigation, extensive media coverage, and discovery in a federal court, the larger picture becomes more apparent. Accordingly, the Court finds DAPs have raised genuine issues of material fact concerning whether they had actual or constructive knowledge of facts giving rise to their present claims against Defendants before 2011. Defendants have failed to introduce evidence that irrefutably demonstrates that DAPs discovered or should have discovered their causes of action against Defendants but failed to timely file their complaints.

3. Due Diligence

The final element in the fraudulent concealment analysis is due diligence. A diligent examination of potential misconduct is only warranted under the doctrine of fraudulent concealment where, "facts exist that would excite the inquiry of **[*62]** a reasonable person." *Conmar, 858 F.2d at 504*. No due diligence analysis is required where "there is a genuine issue of material fact whether the facts publicly available were sufficient to excite [plaintiff's] inquiry." *Id. at 504-05*. Because there are triable issues of fact regarding whether the information available to DAPs was sufficient to excite inquiry, no due diligence need be demonstrated by DAPs to survive summary judgment. *Id.* While the Court need not address this factor, two points deserve mention.

First, Defendants identify DAPs as "sophisticated commercial actors" who employ "category managers" with expertise in their respective fields who are tasked with negotiating and understanding a respective portion of the market. (Defs.' Mot. for Partial Summ. J. at 14, ECF No. 2012.) Defendants argue that DAPs could have acted "diligently in trying to uncover the facts giving rise to [their] claims," given they had these resources at their disposal, yet failed "to verify the reasons" behind the tuna industry's parallel price increase. *Garrison v. Oracle Corp., 159 F. Supp. 3d 1044, 1073 (N.D. Cal. 2016)*. This argument ignores that the packaged tuna industry is an oligopolistic market where parallel pricing is an established economic norm. *In re Dynamic Random Access Memory Indirect Purchaser Litig., No. 4:18-CV-2518-JSW-KAW, 2020 U.S. Dist. LEXIS 249753, 2020 WL 8459279, at *4 (N.D. Cal. Nov. 24, 2020)*. Further, a defendant's public offering of **[*63]** a legitimate explanation for parallel pricing can be enough to show a dispute of material fact as to fraudulent concealment. *In re Titanium Dioxide Antitrust Litig., 959 F.Supp.2d 799, 831 (D. Md. 2013)*; *Sulfuric Acid Antitrust Litig., 743 F.Supp.2d 827, 855 (N.D. Ill. 2010)*; *In re Bulk Extruded Graphite Prod. Antitrust Litig., No. CIV 02-6030 WHW, 2007 U.S. Dist. LEXIS 25070, 2007 WL 1062979, at *3 (D.N.J. Apr. 4, 2007)*; *In re Atchison, Topeka & Santa Fe Ry. Co. v. Chevron U.S.A., Inc., No. 82 C 3034, 1988 U.S. Dist. LEXIS 3404, 1988 WL 37820, at *4 (N.D. Ill. Apr. 20, 1988)*; *United Nat. Recs., Inc. v. MCA, Inc., 609 F.Supp. 33, 38 (N.D. Ill. 1984)*. Here, evidence exists suggesting Defendants offered legitimate explanations for parallel pricing in the public domain. (DAPs' Opp'n to Defs.' Mot. at 18, ECF No. 2084.)

Second, DAPs' alleged failure to capture any illicit activities, even with the assistance of category managers and access to information such as raw material costs and comparisons to private label tuna information, suggests that reasonable diligence would not have resulted in different results. Indeed, the evidence reflects that Defendants utilized their sophistication and commercial power[12] to clandestinely communicate with their competitors and alter

---

[12] According to Affiliated Foods Plaintiffs' Fourth Amended Complaint (Pls.' Fourth Am. Compl. for Violation of the Sherman Act, *15 U.S.C. § 1*, ECF No. 1431), "StarKist, Bumble Bee, and Chicken of the Sea sell Packaged Tuna in the United States. The United States Packaged Tuna industry generates annual sales of approximately $1.7 billion. Defendants dominated the United States market for Packaged Tuna throughout the Relevant Period, with a combined market share of 80-85%. Each Defendant's

the markets in such a way that would have averted detection by category managers. (DAPs' Opp'n to Defs.' Mot. at 20, ECF No. 2084; Pls.' Fourth Am. Compl. for Violation of the Sherman Act, 15 U.S.C. § 1 at 20, ECF No. 1431.) The evidence provided by DAPs raises triable issues of fact whether Defendants engaged in fraudulent concealment, thus tolling the limitations period on DAPs' federal claims. Accordingly, Defendants' motion for summary judgment on **[*64]** this ground is denied. In light of this finding, the Court declines to address tolling under *American Pipe* and the "discovery rule."

B. State Law Claims

Defendants also argue the Court should grant summary judgment in their favor on DAPs' state law claims because those claims are time-barred. Defendants focus specifically on DAPs' claims under the *Kansas Restraint of Trade Act, K.S.A. 60-501 et seq.* ("KRTA") and the *South Carolina Antitrust Act, S.C. Code § 39-3-10 et seq.* ("SCAA"). DAPs argue, *inter alia*, that the statutes of limitation on these claims have been tolled under the fraudulent concealment doctrine and *American Pipe*.

Given the Court's discussion above on the federal claims, the issue of the state law claims is easily resolved, as long as the doctrine of fraudulent concealment applies to these claims. Noting the absence of on-point authority from each of the respective states, the Court looks to how sister courts have applied the fraudulent concealment doctrine to these claims.

In *In re Vitamins Antitrust Litig.*, the United States District Court of the District of Columbia was tasked with applying the fraudulent concealment doctrine to the KRTA. *No. MISC99-197, 2000 U.S. Dist. LEXIS 11351, 2000 WL 1524912 (D.D.C. July 14, 2000)*. There, the court held that the doctrine of fraudulent concealment could be extended to toll the three-year statute of limitations governing **[*65]** a Kansas antitrust claim. *Id. at *3*. The district court acknowledged that "Kansas state courts have not directly addressed the application of fraudulent concealment under the Kansas Antitrust Statutes[.]" *Id.* However, the court analyzed the historical applications of the fraudulent concealment doctrine in Kansas state courts and how those applications have been loosened in recent years to apply to claims that do not sound in fraud. *Id. at *3-4*. Finding no Kansas authorities to the contrary and recognizing the loosening in Kansas law regarding the applicability of the fraudulent concealment doctrine, the *Vitamins* court applied fraudulent concealment to the KRTA claims. *Id.* This Court finds the reasoning in *Vitamins* persuasive, and adopts it. Under that reasoning, the doctrine of fraudulent concealment would apply to the claims under Kansas law. *O'Brien v. Leegin Creative Leather Prod., Inc., 294 Kan. 318, 352 (2012)*; *Seaboard Corp. v. Marsh Inc., 295 Kan. 384, 419, 284 P.3d 314 (2012)*.

Not unlike Kansas, South Carolina state courts have not directly addressed the applicability of the fraudulent concealment doctrine to the SCAA. Nevertheless, "South Carolina has long adhered to a policy of following federal precedents in matters relating to state trade regulation enforcement. The South Carolina Supreme Court has consistently relied on federal **[*66]** precedents in deciding cases under section 39-3-10." *In re Wiring Device Antitrust Litig., 498 F. Supp. 79, 87 (E.D.N.Y. 1980)* (citing *State v. Virginia-Carolina Chemical Co., 71 S.C. 544, 51 S.E. 455 (1905)*; *South Carolina Cotton Growers' Co-Op Ass'n v. English, 135 S.C. 19, 133 S.E. 542 (1926)*). Federal statutory frameworks provide, and South Carolina statutory frameworks do not contradict, that statutes of limitation are universally tolled until the plaintiff knew, or reasonably should have known, the facts giving rise to a cause of action. *Bailey v. Glover, 88 U.S. 342, 347, 22 L. Ed. 636 (1874)*; *United States v. CFW Const. Co., 649 F. Supp. 616, 619 (D.S.C. 1986)*; *In re Liquid Aluminum Sulfate Antitrust Litig., No. CV 16-MD-2687 (JLL), 2019 U.S. Dist. LEXIS 39364, 2019 WL 1125589, at *7 (D.N.J. Mar. 11, 2019)* ("[C]laims brought under South Carolina's state ***antitrust law*** will be interpreted the same as claims brought under federal ***antitrust law***."). As explained above on the federal claims, DAPs have raised triable issues of fact regarding fraudulent concealment. Because summary judgment is inappropriate under the circumstances, DAPs' SCAA claims survive. In light of this ruling, the Court declines to address the balance of Defendants' arguments regarding timeliness of DAPs' state law claims.

---

share of the market is almost identical to what it was at the beginning of the Relevant Period: StarKist (40-44%); Bumble Bee (24-25%); and Chicken of the Sea (15-17%)." (*Id.* at ¶ 97-98.)

III.

CONCLUSION

For the foregoing reasons, Defendants' motion for partial summary judgment on statute of limitations grounds against DAPs is denied; DAPs and Defendants shall file unredacted versions of their briefs (ECF Nos. 2010, 2088) and related statements of undisputed facts, oppositions, exhibits, as well as the response thereto (ECF No. 2188); and they shall identify these documents on the docket **[*67]** as "unredacted" versions of their prior filings and in each instance reference the docket number of the previous "redacted" version.

IT IS SO ORDERED.

For Plaintiff(s): Jason Stillman (via Audio) for Lane M. Nussbaum

For Defendant(s): Cayla K. Whitley (via Video)

NATURE OF PROCEEDINGS: Hearing on Demurrer - without Motion to Strike to Plaintiff

Venture Investment Group, LLC's Complaint for Damages [Res. ID# 302986954780]; Case Management Conference

The matters are called for hearing.

The Court's tentative ruling is posted online for the parties/counsel to review.

The parties submit to the tentative ruling of the Court. The Court adopts its tentative ruling as the final order of the Court as follows:

Pursuant to *California Rule of Court 3.1308(a)(1)*, the Court does not desire oral argument on the demurrer. As required by *Rule 3.1308(a)(2)*, any party seeking oral argument should notify ALL OTHER PARTIES and the staff of Department 76 of their intent to appear and argue. Notice to Department 76 may be sent by email to smcdept76@lacourt.org. If notice of intention to appear is not given and the parties do not appear, the Court will adopt **[*2]** the tentative ruling as the final ruling.

Plaintiff alleges that it made a loan to Defendant Nostra for energy improvements to the property, secured by a deed of trust. Then almost immediately, Defendant obtained two Property Assessed Clean Energy (PACE) loans on the property for the same energy improvements on the same property, which loans became super priority liens on the property which superseded the deed of trust held by Plaintiff. Defendant Nostra defaulted on the loans and recorded a deed in lieu of foreclosure, conveying the property back to Plaintiff. However, the property was encumbered by the PACE liens, and when Plaintiff sold the property, it had to pay the PACE debt in full through the escrow proceeds.

Defendants Nostra Cosa Realty & Investment Group, LLC, Julie N. Medina, and Victor Hugo Quijano demur to the Complaint.

TENTATIVE RULING

Defendants Nostra Cosa Realty & Investment Group, LLC, Julie N. Medina, and Victor Hugo Quijano's demurrer to the Complaint is SUSTAINED with leave to amend as to the first, second, third, and fifth causes of action, and OVERRULED as to the fourth cause of action.

Demurrer

Request For Judicial Notice

Defendant requests that the Court **[*3]** take judicial notice of the following: (1) Deed in Lieu of Foreclosure recorded on April 15, 2020; (2) Deed of Reconveyance recorded on April 21, 2020.

Requests Nos. 1 and 2 are GRANTED. The Court may take judicial notice of recorded documents. (*Evans v. California Trailer Court, Inc. (1994) 28 Cal.App.4th 540, 549*, overruled on other grounds in *Black Sky Capital, LLC v. Cobb (2019) 7 Cal.5th 156, 165*; *Alfaro v. Community Housing Improvement System & Planning Assn., Inc. (2009) 171 Cal.App.4th 263, 274*).

Meet and Confer

The Declaration of Karl P. Schlecht reflects that the meet and confer requirement set forth in *CCP § 430.41* was satisfied.

Discussion

Although Plaintiff's Opposition may have been filed one day late, the Court will consider it on the merits, unless Defendants request more time to prepare the reply. If so, the Court will continue the hearing to permit Defendants such additional time.

Otherwise, the Court will proceed to address the merits of the demurrer.

1. First Cause of Action (Fraud).

Defendants argue that the Deed in Lieu of Foreclosure, which was recorded as part of a settlement, forecloses Plaintiff's fraud claim. (RJN Exhs. 1 and 2.) Defendants argue that the Deed in Lieu of Foreclosure explicitly states that the deed was given for fair and adequate consideration and satisfies all obligations. Defendants argue that this Deed in Lieu of Foreclosure, combined with the Deed of Reconveyance, shows that no **[*4]** fraud exists.

This argument is not persuasive. It is a question of fact as to whether this language in the Deed In Lieu of Foreclosure referred only to the contractual loan obligations between Plaintiff and Defendant, and did not address the two PACE loans on the property, which Plaintiff had to pay off in order to sell the property. (Complaint, ¶¶ 20, 21.) The fact that Plaintiff received title to the property back pursuant to the Deed of Reconveyance is consistent with Plaintiffs theory that it was forced to repay the two PACE loans, which were not both used for the same improvements to the property. (Complaint, ¶ 26.)

Defendants also argue that Plaintiff failed to provide any evidence of a written contract or promissory note that explicitly prohibited Defendants from taking out two PACE loans. However, on demurrer, Plaintiff need not produce any evidence, only allegations.

"To establish a claim for deceit based on intentional misrepresentation, the plaintiff must prove seven essential elements: (1) the defendant represented to the plaintiff that an important fact was true; (2) that representation was false; (3) the defendant knew that the representation was false when the defendant **[*5]** made it, or the defendant made the representation recklessly and without regard for its truth; (4) the defendant intended that the plaintiff rely on the representation; (5) the plaintiff reasonably relied on the representation; (6) the plaintiff was harmed; and (7) the plaintiff's reliance on the defendant's representation was a substantial factor in causing that harm to the plaintiff. (Citations omitted.)" (*Manderville v. PCG&S Group, Inc. (2007) 146 Cal.App.4th 1486, 1498* [italics omitted].)

Fraud causes of action must be pled with specificity. (*Hills Transportation Co. v. Southwest Forest Ind., Inc. (1968) 266 Cal.App.2d 702, 707*.) The complaint must allege facts as to '"how, when, where, to whom, and by what means the representations were tendered.'" (*Stansfield v. Starkey (1990) 220 Cal.App.3d 59, 73*.) "The requirement of specificity in a fraud action against a corporation requires the plaintiff to allege the names of the persons who made the allegedly fraudulent representations, their authority to speak, to whom they spoke, what they said or wrote, and when it was said or written. (Citations omitted.)" (*Tarmann v. State Farm Mut. Auto. Ins. Co. (1991) 2 Cal.App.4th 153, 157*.)

Less specificity is required to plead fraud by concealment. (*Jones v. ConocoPhillips Co. (2011) 198 Cal.App.4th 1187, 1199*.) However, "[i]f a fraud claim is based upon failure to disclose, and 'the duty to disclose arises from the making of representations that were misleading or false, then those allegations should be described.' (Citation **[*6]** omitted.)" (*Morgan v. AT&T Wireless Services, Inc. (2009) 177 Cal.App.4th 1235, 1262*.)

[T]he elements of a cause of action for fraud based on concealment are: '"(1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage. [Citation.]' [Citation.]" (Citation omitted.)

(*Kaldenbach v. Mutual of Omaha Life Ins. Co. (2009) 178 Cal.App.4th 830, 850*.)

"There are 'four circumstances in which nondisclosure or concealment may constitute actionable fraud: (1) when the defendant is in a fiduciary relationship with the plaintiff; (2) when the defendant had exclusive knowledge of material facts not known to the plaintiff; (3) when the defendant actively conceals a material fact from the plaintiff; and (4) when the defendant makes partial representations but also suppresses some material facts. [Citation.]' "(Citations omitted.) Where, as here, there is no fiduciary relationship, the duty to **[*7]** disclose generally presupposes a relationship grounded in "some sort of transaction between the parties. [Citations.] Thus, a duty to disclose may arise from the relationship between seller and buyer, employer and prospective employee, doctor and patient, or parties entering into any kind of contractual agreement. [Citation.]" (Citation omitted.)

(OCM Principal Opportunities Fund, L.P. v. CIBC World Markets Corp. (2007) 157 Cal.App.4th 835, 859.)

Here, as to the allegation that Defendant Nostra concealed that it never intended to pay back its loan with Plaintiff (Complaint, ¶ 28), the Deed In Lieu of Foreclosure may have extinguished Defendant's loan obligations and Plaintiff's claim for a deficiency s due to the failure to repay the loan. However, Plaintiff also alleges that Defendant Nostra concealed that it intended to place two PACE loans on the property when completing the mortgage loan with Plaintiff, both of which would be for paying for the same improvements. (Complaint, ¶¶ 23, 24.)

However, Plaintiff fails to allege any misrepresentations made by Nostra (or any other demurring Defendants) with specificity, as to exactly what was said, to whom, when and in what manner (orally or in writing), why such representation was known to be false when made, and Plaintiff's actual reliance **[*8]** on such representation, causing Plaintiff damage.

Further, as to a concealment theory, Plaintiff fails to pled why Defendant Nostra, as borrower, had a duty to Plaintiff, as lender, to disclose that it was applying for PACE loans as well.

As such, the demurrer to the first cause of action is SUSTAINED with leave to amend.

2. Second Cause of Action (Breach of The Implied Covenant of Good Faith and Fair Dealing).

Defendants argue that Plaintiff fails to plead a breach of contract claim or to attach a written agreement between the parties. As such, Defendants argue, there is no underlying contract required for a breach of implied covenant of good faith and fair dealing cause of action.

The elements of a breach of the implied covenant of good faith and fair dealing sounding in contract are: (1) the existence of a contractual relationship between the parties (Racine & Laramie, Ltd. v. Department of Parks & Recreation (1992) 11 Cal.App.4th 1026, 1031); (2) defendant was not expressly permitted by the contract to engage in the conduct which constitutes the alleged breach (Wolf v. Walt Disney Pictures & Television (2008) 162 Cal.App.4th 1107, 1120-1121); (3) defendant =subjectively lacked a good faith belief in the validity of the act or the act was intended to frustrate the common purpose of the agreement (Wolf, supra, 162 Cal.App.4th at 1123) or defendant's conduct was objectively unreasonable (**[*9]** Carma Developers, Inc. v. Marathon Development California, Inc. (1992) 2 Cal.4th 342, 372-73); (4) the act or conduct was contrary to the contract's express purposes or the parties' legitimate expectations as expressed in a specific contractual obligation (Carma Developers, supra, 2 Cal.4th at 373) or otherwise frustrates the other party's rights to express contractual benefits (Racine & Laramie, Ltd., supra, 11 Cal.App.4th at 1031-32; Pasadena Live v. City of Pasadena (2004) 114 Cal.App.4th 1089, 1094); and (5) resulting damages (Thompson Pacific Construction, Inc. v. City of Sunnyvale (2007) 155 Cal.App.4th 525, 541).

Here, the Complaint does not identify the actions Defendants undertook which were not expressly permitted by the subject contract, were undertaken without good faith belief in its validity, were intended to frustrate the common purpose of the agreement or were objectively unreasonable and were contrary to the express contractual purpose or the parties' legitimate expectations or otherwise frustrated the rights to express contractual benefits.

Although Plaintiff alleges that Defendants interfered with Plaintiffs rights to the Property by encumbering the property with fraudulent PACE loans from Co-Defendants Ygrene and Fortifi (Complaint, ¶ 31), Plaintiff fails to allege why Nostra's taking out of PACE loans frustrated the common purpose of the mortgage loan agreement between Plaintiff and Defendant Nostra (Id.) Under the facts pled in the Complaint Nostra, as borrower, breached the contractual obligation to **[*10]** repay the loan (Complaint, ¶ 31). However, a breach of implied covenant claim which merely duplicates a breach of contract claim is superfluous and may be dismissed. (Guz v. Bechtel National, Inc. (2000) 24 Cal.4th 317, 352-53.)

The demurrer to the second cause of action is SUSTAINED with leave to amend.

3. Third Cause of Action (Unjust Enrichment).

a. Re: Failure To State Facts Sufficient To Constitute A Cause of Action.

Defendant argues that unjust enrichment is not a valid cause of action under California law. This is correct and, moreover, there are no facts pled to support an alternative implied contract between Plaintiff and Defendant FortiFi.

"We find "there is no cause of action in California for unjust enrichment." (*Melchior v. New Line Productions, Inc. (2003) 106 Cal.App.4th 779, 793 [131 Cal. Rptr. 2d 347]*.)" (*Everett v. Mountains Recreation & Conservation Authority (2015) 239 Cal.App.4th 541, 553*.)

"Unjust enrichment is not a cause of action, however, or even a remedy, but rather ' " 'a general principle, underlying various legal doctrines and remedies' " .... [Citation.] It is synonymous with restitution.' " (*McBride v. Boughton (2004) 123 Cal.App.4th 379, 387 [20 Cal. Rptr. 3d 115]*.) Like the trial court, we will construe the cause of action as a quasi-contract claim seeking restitution.

"[A]n action based on an implied-in-fact or quasi-contract cannot lie where there exists between the parties a valid express contract covering the same subject matter." (*Lance Camper Manufacturing Corp. v. Republic Indemnity Co. (1996) 44 Cal.App.4th 194, 203 [51 Cal. Rptr. 2d 622]*.) However, "restitution may be **[*11]** awarded in lieu of breach of contract damages when the parties had an express contract, but it was procured by fraud or is unenforceable or ineffective for some reason." (McBride v. Boughton, supra, 123 Cal.App.4th at p. 388.) Thus, a party to an express contract can assert a claim for restitution based on unjust enrichment by "alleg[ing in that cause of action] that the express contract is void or was rescinded." (Lance Camper Manufacturing Corp. v. Republic Indemnity Co. supra, at p. 203.) A claim for restitution is permitted even if the party inconsistently pleads a breach of contract claim that alleges the existence of an enforceable agreement. (*Klein v. Chevron U.S.A., Inc. (2012) 202 Cal.App.4th 1342, 1389 [137 Cal. Rptr. 3d 293]*.)

(*Rutherford Holdings, LLC v. Plaza Del Rey (2014) 223 Cal.App.4th 221, 231*.)

Here, the third cause of action does not allege why a contract between Plaintiff and Defendants was void or rescinded.

The demurrer to the third cause of action is SUSTAINED with leave to amend.

4. Fourth Cause of Action (Violation of *California Business and Professions Code § 17200*).

Defendants argue that this cause of action does not plead publicly relevant claims, and that Plaintiff fails to provide any sort of evidence that Defendants were not allowed to obtain more than one PACE loan.

As noted above, Plaintiff need not present any evidence in a pleading or to overcome a demurrer. The Complaint alleges that Defendants' scheme is unfair to Plaintiff and deceptive to the public because both of the PACE loans **[*12]** were recorded as assessments against the property, but the scope of the improvement was only listed in one of the assessment, so the public would be deceived into believing that upwards of $250,000 of PACE funded improvements existed on the property, when in fact only half of that amount was actually spent on the property as the improvement was only completed once. (Complaint, ¶ 40.)

Plaintiff does not allege that its concept of unfairness is tethered to a violation of a constitutional, statutory or regulatory provision, or proof of some actual or threatened impact on competition. (*Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 612-13*.)

The standard for determining what business acts or practices are "'unfair'" under the UCL for consumer actions remains unsettled. (Citation omitted.) In Cel-Tech, the Supreme Court addressed the term "unfair" in the context of actions between competitors alleging anticompetitive practices, but it broadly criticized previous attempts to define "unfair" as "too amorphous" to provide guidance. (Cel-Tech, supra, 20 Cal.4th at pp. 184-185.) Previously, courts defined "unfair" as a practice that offends public policy or " 'is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers' " or required courts to " ' "weigh the utility **[*13]** of the defendant's conduct against the gravity of the harm to the alleged victim." ' " (*Id. at p. 184*.)

The Cel-Tech court concluded it must "require that any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition" and, in actions challenging a direct competitor's unfair act, defined the term as "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (Cel-Tech, supra, 20 Cal.4th at pp. 186-187.)

Thereafter, the appellate courts split regarding the definition of "unfair" business practices in consumer action. We described this split in the case of *In re Ins. Installment Fee Cases (2012) 211 Cal.App.4th 1395, 1418 [150 Cal. Rptr. 3d 618]*:

"One line of cases applied a pre-Cel-Tech balancing test for determining whether a business practice is unfair, under which the court examines the practice's ' " 'impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim .... **[*14]** [Citations.]' … [A]n 'unfair' business practice occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.' " ' (Citation omitted)

"A second line of cases adopted the following test or factors for determining unfairness set forth in *section 5* of the Federal Trade Commission Act [*613] (*15 U.S.C. § 45(n)*: '(1) [t]he consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided.' (Citation omitted.)

"A third line of cases, represented by *Gregory v. Albertson's, Inc. (2002) 104 Cal.App.4th 845 [128 Cal. Rptr. 2d 389]* (Gregory), applied a more rigorous test for unfairness in consumer UCL actions. The Gregory court disagreed with the balancing test applied by courts before Cel-Tech, stating: 'Cel-Tech … may signal a narrower interpretation of the prohibition of unfair acts or practices in all unfair competition actions and provides reason for caution in relying on the broad language in earlier decisions that the [Cel-Tech] court found to be "too amorphous." Moreover, where a claim of an unfair act or practice is predicated **[*15]** on public policy, we read Cel-Tech to require that the public policy which is a predicate to the action must be "tethered" to specific constitutional, statutory or regulatory provisions."'

This court has consistently followed the *Gregory v. Albertson's, Inc., supra, 104 Cal.App.4th 845]* line of cases and has held a plaintiff alleging an unfair business practice must show the "defendant's 'conduct is tethered to an[] underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***.'" (Citation omitted.)

Without acknowledging these authorities, Graham relies on the pre-Cel-Tech definition of "unfair" by asserting the utility of defendant's conduct must be weighed against the gravity of the harm to the alleged victim. We decline Graham's invitation to apply this test.

Graham does not allege defendants' conduct related to his loan processing was unfair because he does not allege any statements about the appraisal or opinions about the possible future value of the home constitute conduct tethered to a violation of a constitutional, statutory or regulatory provision. (Citation omitted.) (*Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 612-13*.)

As to Plaintiffs theory that the public is likely **[*16]** to be deceived into believing that there was twice as much PACE-funded improvements made to the property than were actually performed is a question of fact outside the scope of this demurrer. In other words, it is sufficient to plead a cause of action for fraudulent business practices by Defendant.

Historically, in order to state a cause of action under either the UCL or the FAL, case law only required a showing that "'members of the public [were] likely to be deceived.' [Citations.]" (Citation omitted.) Allegations of actual deception, reasonable reliance and damage were unnecessary. (Ibid.) The "likely to be deceived" standard was not altered by Proposition 64. (Citation omitted.)

(*Pfizer Inc. v. Superior Court (2010) 182 Cal.App.4th 622, 629-30*.)

The demurrer to the fourth cause of action is OVERRULED.

5. Fifth Cause of Action (Negligence).

"The elements of a cause of action for negligence are (1) a legal duty to use reasonable care, (2) breach of that duty, and (3) proximate [or legal] cause between the breach and (4) the plaintiff's injury. [Citation.]" (Citation omitted.) (*Phillips v. TLC Plumbing, Inc. (2009) 172 Cal.App.4th 1133, 1139*.) "The existence of a duty of care toward an interest of another worthy of legal protection is the essential prerequisite to a negligence cause of action, determined as a matter **[*17]** of law by the court. (*Bily v. Arthur Young & Co. (1992) 3 Cal. 4th 370, 397 [11 Cal. Rptr. 2d 51, 834 P.2d 745]*.)" (*Software Design & Application v. Hoefer & Arnett (1996) 49 Cal.App.4th 472, 478*.)

Defendants argue that Plaintiff fails to plead that Defendants breached a duty by applying for more than on e PACE loan because there is no allegation that Plaintiff informed Defendants the initial loan was exclusive.

Plaintiff alleges that Defendant Nostra had a duty to act as a reasonable borrower, and breached that duty by applying for two PACE loans funding the same improvements for a property that was allegedly overencumbered already. (Complaint, ¶ 44.)

Plaintiff does not allege facts giving rise to a special relationship between Plaintiff and Defendant Nostra which would bring the alleged economic loss suffered by Plaintiff outside the rule that there is ordinarily no duty to prevent economic loss to third parties in one's own financial transactions. (*Lake Almanor Associates L.P. v. Huffman-Broadway Group, Inc. (2009) 178 Cal.App.4th 1194, 1205*.)

"The threshold element of a cause of action for negligence is the existence of a duty to use due care toward an interest of another that enjoys legal protection against unintentional invasion. [Citations.]" (*Bily v. Arthur Young & Co. (1992) 3 Cal.4th 370, 397 [11 Cal. Rptr. 2d 51, 834 P.2d 745]* (Bily).) Whether a duty exists is a question of law to be determined by the courts. (Ibid.) In the absence, as here, of a duty that arises by statute or contract, we assess whether the nature of **[*18]** the activity or the relationship of the parties gives rise to a duty. (*Ratcliff Architects v. Vanir Construction Management, Inc. (2001) 88 Cal.App.4th 595, 605 [106 Cal. Rptr. 2d 1]* (Ratcliff).) "Recognition of a duty to manage business affairs so as to prevent purely economic loss to third parties in their financial transactions is the exception, not the rule, in negligence law" (*Quelimane Co. v. Stewart Title Guaranty Co. (1998) 19 Cal.4th 26, 58 [77 Cal. Rptr. 2d 709, 960 P.2d 513]*), so courts are reluctant to impose duties to prevent purely economic harm to third parties (*Bily, at p. 403*; *Ratcliff, at p. 605*; Mission Oaks, supra, 65 Cal.App.4th at p. 725).

(*Lake Almanor Associates L.P. v. Huffman-Broadway Group, Inc. (2009) 178 Cal.App.4th 1194, 1205* (bold emphasis and underlining added).)

Plaintiff cites no case law whereby a borrower owes a duty of care to a lender in connection with other loans it takes out which are secured by the same property. Nor is the Court aware of any such authority.

As such, the demurrer to the fifth cause of action is SUSTAINED with leave to amend.

Plaintiff is given 30 days' leave to amend.

On the Court's own motion, the Case Management Conference scheduled for 02/15/2022 is continued to 04/20/2022 at 08:30 AM in Department 76 at Stanley Mosk Courthouse.

The parties may file a stipulation to request for the Court to set an Informal Discovery Conference (if necessary).

Notice is waived.

Harris Cnty. v. Eli Lilly & Co.

United States District Court for the Southern District of Texas, Houston Division

February 16, 2022, Decided; February 16, 2022, Filed, Entered

CIVIL ACTION H-19-4994

Reporter

2022 U.S. Dist. LEXIS 27715 *; 2022 WL 479943

HARRIS COUNTY, TEXAS, Plaintiff, v. ELI LILLY AND COMPANY et al., Defendants.

Core Terms

Manufacturer, alleges, prices, conspiracy, pharmacy, antitrust, purchaser, diabetes, medications, motion to dismiss, Insulin, co-conspirator, unjust enrichment, formulary, drugs, consumers, indirect, conspired, price-fixing, payors, inflated price, at-issue, civil conspiracy, courts, proximate causation, money-had-and-received, intermediaries, overcharge, rebates, amended complaint

Counsel: **[*1]** For County of Harris, Texas, Plaintiff: Christopher George Hollins, LEAD ATTORNEY, Hollins Law Group PLLC, Houston, TX; Debra Tsuchiyama Baker, LEAD ATTORNEY, Connelly Baker et al, Houston, TX; Joanne Cicala Inscore, R Johan Conrod, LEAD ATTORNEYS, The Cicala Law Firm PLLC, Dripping Springs, TX; Richard Martin Schechter, LEAD ATTORNEY, Attorney at Law, Houston, TX; Vincent Reed Ryan, Jr, LEAD ATTORNEY, Harris County Attorney, Houston, TX; Earnest William Wotring, William David George, Baker Wotring LLP, Houston, TX; Joshua Timothy Wackerly, The Cicala Law Firm, Dripping Springs, TX.

For Eli Lilly And Company, Defendant: Henry B Liu, Shankar Duraiswamy, LEAD ATTORNEYS, Covington & Burling LLP, Washington, DC; Bryce Lee Callahan, Yetter Coleman LLP, Houston, TX.

For Novo Nordisk, Inc., Davis Polk & Wardwell LLP, Defendant: Andrew Yaphe, Menlo Park, CA; David B Toscano, LEAD ATTORNEY, Davis Polk & Warwell LLP, New York, NY; Neal A Potischman, LEAD ATTORNEY, Davis Polk & Wardell LLP, Menlo Park, CA; Randall L Christian, LEAD ATTORNEY, Bowman and Brooke LLP, Austin, TX.

For Sanofi-Aventis U.S. LLC, Defendant: Alexander Giomi Hughes, Joshua Fuchs, LEAD ATTORNEYS, Jones Day, Houston, TX; Geoffrey **[*2]** S Irwin, William D Coglianese, LEAD ATTORNEYS, Jones Day, Washington, DC.

Judges: Gray H. Miller, Senior United States District Judge.

Opinion by: Gray H. Miller

Opinion

MEMORANDUM OPINION AND ORDER

Pending before the court is Defendant OptumRx Inc.'s ("OptumRx") motion to dismiss. Dkt. 148. Having considered the motion, response, reply, briefings on supplemental authority, and applicable law, the court is of the opinion that the motion should be GRANTED.

I. BACKGROUND

In its Fourth Amended Complaint (the "FAC"), the County alleges that a price-fixing conspiracy involving fifteen entities that either manufacture diabetes medications or manage and negotiate certain pharmacy benefits is behind the dramatic rise in drug costs. *See* Dkt. 127. In particular, the County sues Defendants Eli Lilly, Novo Nordisk, and Sanofi (the "Manufacturer Defendants") and CVS Caremark, Express Scripts, OptumRx, and Aetna Rx (the "PBM Defendants"). Though only OptumRx has thus far moved to dismiss the FAC, the court will briefly review the general contours of the price-fixing conspiracy allegedly behind the **[*4]** rising costs of diabetes medications and discuss the relationships between the Manufacturer Defendants and the PBM Defendants.

A. The Insulin Pricing Scheme

According to the FAC, Eli Lilly joins Novo Nordisk and Sanofi as the three principal companies that manufacture, promote, and distribute pharmaceutical drugs, including diabetes medications and various insulins. *Id.* 8 ¶ 2. Together, these Manufacturer Defendants produce the "vast majority" of diabetes medications on which approximately six million people across the country rely. *See id.* 7-8 ¶¶ 1-2. Though they only cost Manufacturer Defendants $5 to produce (and were marketed for $20 during the 1990s), today's insulins are priced between $300 and $700. *Id.* 8 ¶ 5. Since 2003, the reported price of certain insulins has far outpaced inflation; some have increased by more than 1000%. *Id.* 50 ¶ 234. By 2016, the average price per month of the four most popular types of insulin rose to $450. *Id.* ¶ 235. For one drug, Humulin R (500U/ML), Eli Lilly has raised the price from $165 to $1,784 since 1999. *Id.* ¶ 236. For another, Humalog, Eli Lilly has raised the reported price for a package of the medication from less than $200 to $663 since 2008. **[*5]** *Id.* 52 ¶ 237. The County alleges that Manufacturer Defendants have "in lockstep raised the reported prices of their respective diabetes drugs." *Id.* 8 ¶ 4, 56-61 ¶¶ 243-50.

The County also sues the PBM Defendants that "manage the pharmacy benefits for the vast majority of individuals in the United States" and "establish national formularies"—or lists of approved drugs for a given health plan—"that...set the baseline for which diabetes medications are covered by insurance and which are not." *Id.* 8 ¶ 3, 20 ¶ 78, 95 ¶ 420. The PBM Defendants "contract with payors" like the County. *Id.* 85 ¶ 367. A PBM develops the payor's drug formulary, processes claims, creates a network of retail pharmacies, sets the prices in coordination with the Manufacturers that the payor will pay for prescription drugs, and is paid by the payor to reimburse pharmacies for the drugs utilized by the payor's beneficiaries. *Id.* 63 ¶ 265. Harris County "relies on PBMs as administrative agents, for the alleged purposes of limiting administrative burden and controlling pharmaceutical drugs costs." *Id.* 92 ¶ 406.

The County alleges that together, Manufacturer Defendants and PBM Defendants conspired "to create a secret spread"—known **[*6]** as the Insulin Pricing Scheme—"between the reported price for diabetic treatments (on which Harris County's payments are based) and the true net price of those same drugs." *Id.* 10 ¶ 10. In that sense, the

"Insulin Pricing Scheme was designed to, and did, encourage others, including diabetics and payors...to advocate the use of [Manufacturer Defendants'] products and pay for those diabetes medications based on a fraudulently inflated price." *Id.* 121 ¶ 533.

At the heart of this conspiracy are what the County terms "Manufacturer Payments"— refunds (or kickbacks) in the form of "rebates, discounts, credits, concession fees, and the like that serve as a 'quid pro quo for formulary inclusion.'" *Id.* 11 ¶ 16. What payors and their health plans pay for a prescription drug is "directly tied to the reported price" that the Manufacturer Defendants and PBM Defendants have allegedly fixed. *See id.* ¶ 266, 62 ¶¶ 256-63. PBMs also contract with a network of retail pharmacies, which the PBMs pay after they dispense drugs to patients. *Id.* 64 ¶ 267. However, the amount PBMs pay to pharmacies is "not the same as the amount paid by the payor." *Id.* ¶ 268. Instead, payment is "negotiated...and not disclosed." **[*7]** *Id.* Sometimes, though, the PBM and the pharmacy operate as part of a larger whole, such as when the PBM owns a mail-order or specialty pharmacy. *See id.* ¶ 269. In those scenarios, the mail order pharmacy purchases and takes possession of the prescription drugs and directly supplies the drugs to patients by mail. *Id.* But, as a general matter, the PBMs "negotiate the price that payors pay for a prescription drug; they separately negotiate a different price that pharmacies receive for that same drug; and they also negotiate the amount the manufacturers pay back to the PBM for each drug sold." *Id.* ¶ 273.

Here is how the conspiracy between the Manufacturer Defendants and the PBM Defendants allegedly works: Manufacturer Defendants "artificially and willingly raise their reported prices" to gain formulary access "and then secretly refund a significant portion of that price back to PBM Defendants." *Id.* 11 ¶ 16. The PBM Defendants then grant formulary status based upon the highest inflated price and the largest refund amount. *Id.* ¶ 17. The Insulin Pricing Scheme enables Manufacturer Defendants "to buy their preferred formulary position—which significantly increases their revenue—without sacrificing **[*8]** their profit margins." *Id.* ¶ 18. At the same time, it enables PBM Defendants to profit from the inflated reported prices by retaining a significant percentage of the secret refund payments and "pocketing an additional pricing spread between what a payor pays the PBM for an insulin script based on the inflated price and a lower price that the PBM reimburses the pharmacy for the same drug." *Id.* 11-12 ¶ 19. The PBM Defendants also profit by using those same artificial prices in their own mail-order pharmacies and "charging pharmacies hidden fees based on the inflated price." *Id.*

According to the County, certain professional associations and conferences facilitate the conspiracy. For example, each Manufacturer Defendant is a member of the Pharmaceutical Research and Manufacturers of America ("PhRMA") and "has routinely communicated through PhRMA's meetings and platforms in furtherance of the alleged Insulin Pricing Scheme." *Id.* 68 ¶ 289. PBM and Manufacturer Defendants also use trade associations and industry conferences to "routinely communicate" with one another. *See id.* ¶ 291. One conference, the Pharmaceutical Care Management Association ("PCMA"), served as a central meeting place for **[*9]** the Insulin Pricing Scheme. *See id.* 69 ¶ 294. The current PCMA board includes executives from several PBM Defendants. *Id.* ¶ 293.

All PBM Defendants are "members" of the PCMA, and all Manufacturer Defendants are "affiliate members" of the organization. *Id.* ¶ 295. But the Manufacturer Defendants are more than just mere affiliate members. According to the County, they are "Presidential Sponsors" of the PCMA conferences. *Id.* ¶ 297. As "Presidential Sponsors," the Manufacturer Defendants hosted "private meeting rooms" that offered "excellent opportunities for...one-on-one interactions between PBM and pharma executives." *Id.* ¶ 298. During the PCMA's annual meetings and business forums, "representatives from each Manufacturer Defendant met privately with representatives from each PBM Defendant, as well as their co-conspirator Cigna Pharmacy Management." *Id.* ¶ 299, 69 ¶ 296. Prior to, and in preparation for, these meetings, the County alleges that "dedicated teams of executives from each Defendant would spend weeks preparing PCMA 'pre-reads' and reports," allegedly "demonstrat[ing] the deep involvement of each Defendant in the Insulin Pricing Scheme" and the "tangled web that gave rise to the **[*10]** scheme." *Id.* 69-70 ¶ 300. In addition, "all PCMA members...are invited to join...an invitation-only LinkedIn Group and online networking community," that provided the defendants with a "year-round, non-public online forum" enabling them to further their conspiracy. *Id.* ¶¶ 302-03.

From the County's perspective, these PCMA meetings are significant because "key at-issue lockstep price increases occurred shortly after [their conclusion]." *Id.* 70 ¶ 302. For example, on September 26 and 27, 2017, the

PCMA held its annual meeting where each of the Manufacturer Defendants hosted private rooms, and executives from both sets of defendants met throughout the conference. *Id.* 70-71 ¶ 304. Several days after the conference, on October 1, 2017, Sanofi increased the list prices for two medications, Lantus and Toujeo, by 3% and 5.4%, respectively. *Id.* A few weeks later, Novo Nordisk approved a 4% list price increase for its drugs to match the Sanofi increase. *Id.* Years earlier, in 2014, a few weeks after a PCMA conference, Novo Nordisk acted similarly by raising the list price of one of its medications, Levemir, several hours after Sanofi increased its list price. *Id.* 71 ¶ 305.

B. Harris County and Its [*11] Injury

Harris County is a body corporate and politic under the laws of the State of Texas. *Id.* 13 ¶ 30. The County's government serves nearly five million residents. *Id.* ¶ 31. As an employer, the County provides health benefits to approximately 38,000 employees, retirees, and their dependents (collectively, "Beneficiaries"). *Id.* 13-14 ¶ 31. Harris County reimburses its employees "for diabetes medications through their health plans" and purchases diabetes medications "to be administered directly in government-run facilities." *Id.* 61 ¶ 251. The County reimburses beneficiaries through its own self-funded health plan, meaning that it provides health benefits using its own funds, including those contributed by its Beneficiaries. *Id.* 91 ¶ 403. In addition, Harris County also purchases diabetes medications to administer directly to inmates in Harris County jails. *Id.* 13-41 ¶ 31, 92 ¶ 404, 162 ¶ 172.

Neither Harris County nor the employees it reimburses ostensibly purchases the at-issue drugs from the drug manufacturer themselves. That is because, as the County alleges, "[t]he prescription drug industry consists of a deliberately opaque network of entities engaged in multiple distribution and **[*12]** payment structures." *Id.* 62 ¶ 256. And, generally, the at-issue diabetes medications are "distributed from manufacturer to wholesaler, wholesaler to retail or mail-order pharmacy, and pharmacy to patient/consumer." *Id.* ¶ 257.

Nevertheless, the County contends that "[a]t different periods during the relevant time, each of the PBM Defendants *in coordination with their co-conspirators*, provided PBM services to [the County]." *Id.* 92 ¶ 407 (emphasis added). In terms of direct relationships, the County contends that, from 2003 to 2010, AetnaRx provided PBM services to Harris County. *Id.* ¶ 408. Following CVS Caremark and Aetna's 12-year contract related to PBM services, AetnaRx and CVS Caremark coordinated to provide PBM services to the County from January 2011 through March 2017. *Id.* These services included developing and offering formularies for the County's prescription plan, constructing and managing the County's pharmacy network, processing pharmacy claims, and providing mail-order pharmacy services to the County. *Id.* In providing those services, AetnaRx and CVS Caremark "set the amount the County paid for the at-issue drugs in coordination with the Manufacturer Defendants and utilize[ed] **[*13]** the false price generated by the Insulin Pricing Scheme." *Id.* ¶ 409. Moreover, "[i]n providing these PBM services to Harris County, Aetna RX and CVS Caremark also received payments for the at-issue drugs and, in turn, reimbursed the pharmacies that dispensed drugs to Harris County beneficiaries." *Id.* 93 ¶ 410. As a general matter, the County maintains that no other intermediary in the pharmaceutical supply chain "has control over or is responsible for the reported prices on which nearly all diabetics and payors, including Harris County's payments, are based other than those involved in the conspiracy." *See id.* 151 ¶ 664.

C. The County's Allegations Against OptumRx

OptumRx is named as a defendant in its capacity as a PBM and mail-order pharmacy.[1] *Id.* 36 ¶ 175. The County alleges that from March 2017 through 2019, OptumRx and Cigna Pharmacy Management worked in coordination to

---

[1] From March 2017 through 2019, OptumRx managed the County's pharmacy network, which entailed processing pharmacy claims for prescriptions dispensed to Harris County's Beneficiaries and operated mail-order pharmacies that delivered prescription drugs to Harris County's Beneficiaries. Dkt. 127 at 92 ¶ 411. In OptumRx's capacity as a mail-order pharmacy, the County alleges that OptumRx "dispensed diabetes medications...nationwide and in Texas, including in Harris County." *Id.* 39 ¶ 189. The County does not allege that it directly purchased diabetes medications from OptumRx through its mail-order pharmacies. *See id.*

provide its PBM services. *Id.* 93 ¶ 411. Cigna is not named as a defendant in this case and it appears that the County only directly contracted with it, not OptumRx.[2] *See id.* ¶ 413.

While the County did not utilize any formularies developed by OptumRx, the latter's relationship with Cigna appears **[*14]** to date back to the days of its predecessor, Catamaran. A frequent attendee of the PCMA conferences, Catamaran "entered into a contract with Cigna to become Cigna's 'exclusive pharmacy benefit partner' in a strategic 10-year agreement to provide PBM services to the more than 8 million Cigna clients and members." *Id.* 37 ¶ 179, 70 ¶ 301. In its capacity as the PBM for Cigna's clients, "Catamaran negotiated with drug manufacturers on behalf of Cigna with respect to rebates and formulary placement." *Id.* 38 ¶ 180. OptumRx continued to provide pharmacy benefit services to Cigna's customers and members after it acquired Catamaran in 2015. *Id.* ¶ 181.

Harris County was one of Cigna's members and clients during the six years spanning 2013 and 2019 that OptumRx contracted with Cigna to provide PBM services. *Id.* ¶ 182. Due to its agreements with OptumRx, Cigna Pharmacy Management allegedly "utilized and profited from the specific false and inflated prices generated by the Insulin Pricing Scheme and has benefitted from OptumRx's at-issue conduct with regard to the at-issue drugs." *Id.*

Even more generally, the County alleges that OptumRx "coordinates" with Eli Lilly, Novo Nordisk, and Sanofi "regarding **[*15]** the price of the at-issue diabetes medications, as well as for the placements of these firms' diabetes medications on [Defendant] Express Script's national formularies." *Id.* 36 ¶ 176. It alleges that OptumRx had "express agreements with Defendants Novo Nordisk, Sanofi, and Eli Lilly related to the Manufacturer Payments paid by the Manufacturer Defendants to OptumRx, as well as agreements related to the Manufacturers' at-issue drugs sold through OptumRx's mail order pharmacies." *Id.* 39 ¶ 190. The Manufacturer Defendants' executive teams even allegedly met with executives from OptumRx and its parent company, UnitedHealth Group, "to discuss their coordinated efforts related to the at-issue drugs." *Id.* 36 ¶ 177.

D. Procedural History

This case is entering its third year of life. After the defendants removed Harris County's initial complaint to this court on December 23, 2019, the County filed its First Amended Complaint on January 31, 2021. Dkt. 20. In the First Amended Complaint, Harris County brought claims under the *federal Racketeer Influenced and Corrupt Organization Act ("RICO")* pursuant to *18 U.S.C. §§ 1962, et seq.*, the *Sherman Act* pursuant to *15 U.S.C. § 1, et seq.*, the *Texas Free Enterprise and Antitrust Act ("TFEAA")* pursuant to *Tex. Bus. & Com. Code Ann. §§ 15.01, et seq.*, the **[*16]** Texas Deceptive Trades Practices-Consumer Protection Act, common law fraud, money had and received, unjust enrichment, and civil conspiracy. *Id.* On April 14, 2020, both Manufacturer Defendants and PBM Defendants moved to dismiss. Dkts. 40, 41.

On September 29, 2020, the court issued a Memorandum Opinion and Order (the "September 2020 Order") granting in part and denying in part the defendants' motions to dismiss. Dkt. 66. Apart from dismissing the County's DTPA claim (which it also permitted the County to amend), the court denied the motions to dismiss. *See id.* at 36. With respect to the RICO claims, the court concluded that the indirect purchaser bar articulated in the Supreme Court's *Illinois Brick* decision did not preclude the County's claims because the County "allege[d] that it pa[id] the

[2] The County also alleges that following Cigna's merger with Express Scripts in December 2018 and Cigna Pharmacy Management's consolidation with Express Scripts, Express Scripts and Cigna Pharmacy Management worked in coordination to provide PBM services to Plaintiff Harris County. Dkt. 127 at 93 ¶ 412. These services included developing and offering formularies for the County's prescription plan, constructing and managing the County's pharmacy network, processing pharmacy claims, and providing mail-order pharmacy services to the County. *Id.* In providing these services to the Harris County, Express Scripts and Cigna Pharmacy Management set the amount the County paid for the at-issue drugs in coordination with the Manufacturer Defendants and utilizing the false price generated by the Insulin Pricing Scheme, received payments for the at-issue drugs and, in turn, reimbursed the pharmacies that dispensed drugs to Harris County beneficiaries. *Id.* ¶ 413. Cigna merged with defendant Express Scripts at an unstated date. *See id.* 66 ¶ 283.

PBM Defendants directly for the overcharges of the diabetes medications...not an intervening distributor or other link in the distribution chain." *Id.* at 29 (internal quotations omitted).[3]

On October 13, 2020, Harris County filed its Second Amended Complaint. Dkt. 68. The defendants collectively moved to dismiss the County's DTPA claims on November 20, 2020. Dkt. 76. The court denied their motion **[*17]** on March 25, 2021 (the "March 2021 Order"). Dkt. 82. The County amended its complaint again on July 27, 2021. Dkt. 110. Though several defendants answered the County's Third Amended Complaint, *see* Dkts. 111-15, the County moved for leave to file the instant Fourth Amended Complaint on August 25, 2021. Dkt. 118. The court granted the County's motion and the County subsequently filed its FAC on September 27, 2021. Dkts. 126, 127. OptumRx filed its motion to dismiss under *Rule 12(b)(6)* on October 18, 2021. Dkt. 148.

II. Legal Standard

A. *Rule 12(b)(6)*

"*Federal Rule of Civil Procedure 8(a)(2)* requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief.'" *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. At the pleading stage, the court must "accept all well-pleaded facts in the complaint as true and view the facts in the light most favorable to the plaintiff." *O'Daniel v. Indus. Serv. Sols., 922 F.3d 299, 304 (5th Cir. 2019)*. "Motions to dismiss are viewed with disfavor and are rarely granted." *Test Masters Educ. Servs., Inc. v. Singh, 428 F.3d 559, 570 (5th Cir. 2005)*. In considering a motion to dismiss, usually the court "may rely on only the complaint and its proper attachments." *Dorsey v. Portfolio Equities, Inc., 540 F.3d 333, 338 (5th Cir. 2008)*.

III. Analysis

The County brings eight claims against OptumRx. It alleges one claim each that OptumRx violated the federal RICO statute, *18 U.S.C. § 1962(c)*, for its participation in the Eli Lilly-PBM RICO enterprise, the Novo Nordisk-PBM **[*18]** RICO enterprise, and the Sanofi-PBM enterprise. Dkt. 127 at 110-11 ¶¶ 488-91, 124 ¶¶ 548-53, 139 ¶¶ 612-17. It also alleges OptumRx violated RICO, *18 U.S.C. §§ 1962(c)-(d)*, by facilitating the Insulin Pricing Scheme through its respective RICO enterprises. *Id.* 153 ¶¶ 676-85. Finally, it brings four state law claims for violations to the Texas Deceptive Trades Practices-Consumer Protection Act ("DTPA"), money-had-and-received; unjust enrichment; and civil conspiracy. *Id.* 155-68 ¶¶ 686-724. The court grants OptumRx's motion to dismiss for each claim.

A. RICO Standing

Antitrust standing principles apply equally to allegations of RICO violations. Dkt. 66 at 27-28. *See also* *Holmes v. Sec. Investor Protection Corp., 503 U.S. 258, 268-70, 112 S.Ct. 1311, 117 L. Ed. 2d 532 (1992)* ("We may fairly credit the 91st Congress, which enacted RICO, with knowing the interpretation federal courts had given the words earlier Congresses had used first in *§ 7 of the Sherman Act*, and later in the *Clayton Act's § 4*."); *McCarthy v.*

---

[3] In concluding that the County "allege[d] that it pa[id] the PBM Defendants directly," the court cited the County's response to the defendants' motions to dismiss. *See* Dkt. 66 at 29 (citing Dkt. 48 at 13). That portion of the County's motion argued that "Harris County paid...the at-issue overcharges to the PBMs, not an intervening distributor or other link in the distribution chain." Dkt. 48 at 13. However, the Fifth Circuit has instructed that, with limited exception not applicable here, a "district court may not go outside the complaint" when deciding a *Rule 12(b)(6)* motion. *Scanlan v. Texas A&M Univ., 343 F.3d 533, 536 (5th Cir. 2003)*. The portion of the First Amended Complaint that lent the most support to the County's assertion that it directly paid the PBM defendants is found in paragraph 207, which explained that "[a] PBM develops the health plan's drug formulary...and is paid by the health plan for the drugs utilized by the health plan's beneficiaries." Dkt. 20 at 44 ¶ 207.

Recordex Serv., Inc., 80 F.3d 842, 855 (3d Cir. 1996) ("The precepts taught by *Illinois Brick* and *Utilicorp* apply to RICO claims, thereby denying RICO standing to indirect victims."); *Wooten v. Loshbough, 951 F.2d 768, 770 (7th Cir. 1991)*; *County of Oakland v. City of Detroit, 866 F.2d 839, 851 (6th Cir. 1989)*, *cert. denied*, *497 U.S. 1003, 110 S. Ct. 3235, 110 S. Ct. 3236, 111 L. Ed. 2d 747 (1990)*; *Terre Du Lac Ass'n v. Terre Du Lac, Inc., 772 F.2d 467, 473 (8th Cir. 1985)*, *cert. denied*, *475 U.S. 1082, 106 S. Ct. 1460, 106 S. Ct. 1461, 89 L. Ed. 2d 718 (1986)*. As it did previously, *see* Dkt. 66, the court looks to ***antitrust law*** to resolve whether the County has standing to bring its RICO claims against OptumRx.

Though broadly worded, the **[*19]** federal antitrust statutes are read against the backdrop of common law principles like proximate causation. *Associated Gen. Contractors of California, Inc. v. Carpenters, 459 U.S. 519, 529-33, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Law students across the country tend to first encounter the principle of proximate causation in *Palsgraf v. Long Island Railroad Company*, the famous Court of Appeals of New York case where a rail commuter, in his attempt to catch a train, precipitated a series of unfortunate events ultimately resulting in an explosion that dislodged scales at the other end of the train platform, striking and injuring the plaintiff. *248 N.Y. 339, 341, 162 N.E. 99, 99 (1928)*. Under a proximate causation framework, an antitrust plaintiff's demonstration of a traceable injury is insufficient: it must also show that "the harm alleged has a sufficiently close connection to the conduct the statute prohibits." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 133, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*; *see also* *Sanger Ins. Agency v. HUB Int'l, Ltd., 802 F.3d 732, 737 n. 5 (5th Cir. 2015)*. Adherence to principles of proximate causation ensures that defendants are not responsible for the "remote consequences" of their conduct. *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 490 n.8, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)* (quoting *Southern Pacific Co. v. Darnell-Taenzer Lumber Co., 245 U.S. 531, 533, 38 S. Ct. 186, 62 L. Ed. 451 (1918)*); *see* *Holmes, 503 U.S. at 268* (describing proximate causation as a judicial tool "used to limit a person's responsibility for the consequences of that person's own acts.").

In the context of antitrust litigation, this constraint operates both defensively and offensively. *Hanover Shoe*, for instance, instructs **[*20]** that an antitrust defendant may not avoid liability when the antitrust plaintiff "passed on" the inflated prices to its customers. *392 U.S. at 490-93*. Likewise, in *Illinois Brick Co. v. Illinois*, the Supreme Court limited antitrust actions to plaintiffs who are the direct purchasers of a price-fixed product. *431 U.S. 720, 737, 97 S.Ct. 2061, 52 L. Ed. 2d 707 (1977)*.

Because their holdings and logic govern here, the court finds it useful to review *Illinois Brick* and its progeny. In *Illinois Brick*, state and local governments brought price-fixing claims against manufacturers of concrete blocks. *431 U.S. at 724-27*. Though the plaintiffs had not purchased the blocks from the defendants, they argued that the price-fixing conspiracy harmed them because they had hired contractors who had directly contracted with the defendants and passed on part or all of the defendants' overcharges in setting their prices. *Id. at 726-27*.

The Court rejected this argument, reasoning that "allowing offensive but not defensive use of pass-on [damages] would create a serious risk of multiple liability for defendants," because both direct and indirect purchasers would be entitled to recover for the same overcharge. *Id. at 730*. The Court emphasized the practical and empirical difficulties with measuring pass-on damages that motivated **[*21]** its decision in *Hanover Shoe*, explaining that "apportion[ing] the recovery" in antitrust suits "among all potential plaintiffs that could have absorbed part of the overcharge . . . would add whole new dimensions of complexity" to antitrust litigation and "seriously undermine [its] effectiveness." *Id. at 737*.

The Court reiterated its desire to "avoid burdening [antitrust] actions with damages issues giving rise to the need for massive evidence and complicated theories" just five years later in *Blue Shield of Virginia v. McCready, 457 U.S. 465, 475 n. 11, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. As *McCready* cautioned, that "[a]n antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy" was no reason to empower "every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages." *457 U.S. at 476*.

Those concerns guided the Court's holding in *California State Council of Carpenters* one year later. *459 U.S. at 544-45*. That case asked whether union plaintiffs had antitrust standing to bring allegations that a multiemployer association and its members coerced third parties and association members to enter business relationships with nonunion firms. *Id. at 520-21*. The Ninth Circuit reversed the district court's dismissal on the grounds that the union "was within the area of the economy **[*22]** endangered by a breakdown of competitive conditions" and that the defendants "specifically intended" to harm the union. *Id. at 525*. The County echoes some of these same concerns in its briefing, noting that it "has been damaged by the fraudulent scheme by paying for the at-issue drugs at...egregiously inflated prices" while defendants, including OptumRx, profited. *See* Dkt. 169 at 7. "That alone," the County declares, "should be dispositive on OptumRx's motion to dismiss." *Id.* But the *Carpenters* Court was unpersuaded by similar policy gestures. Instead, looking to principles of proximate causation, it concluded that only the "immediate victims of coercion by [the] defendants" could have a cause of action against them. *459 U.S. at 532, 541-42*.

The Supreme Court's embrace of *Illinois Brick*'s indirect purchaser bar has both paralleled its commitment to principles of proximate causation and evolved, somewhat, beyond them. Whereas the *Carpenters* Court described "the directness or indirectness of the asserted injury" as one of "[a] number of...factors [that] may be controlling," *459 U.S. at 538-41*, the Court would later describe the indirect purchaser bar as a "bright line" rule. Seven years after *Carpenters*, this fashioning of *Illinois Brick* as a bright-line rule animated **[*23]** the Court's refusal to create an exception to the indirect purchaser bar even when complicated damage calculations were not in issue. *See Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 204, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*. *UtiliCorp* featured a price-fixing conspiracy similar to the one here. *See id.* There, an investor-owned public utility purchased natural gas from a pipeline company for its own use and for commercial and residential resale. *Id. at 204*. The supposed antitrust violators consisted of a pipeline company and several gas-production companies that had together conspired to fix the price paid by the utilities. *Id.* The state petitioners asserted claims on behalf of the consumers themselves, as well as state agencies, municipalities, and other political subdivisions that had purchased gas from the defendants. *Id. at 205*. On appeal, the Tenth Circuit held that the state was not the proper plaintiff for its citizen-consumers who paid inflated prices for natural gas when the lawsuit already included the first actor to experience the overcharge: the public utilities. *Id. at 205-06*.

The Supreme Court agreed because the consumers represented by the state were indirect purchasers. *Id. at 207-08*. In rejecting the states' multifaceted challenges to the application of *Illinois Brick*'s logic to the facts on hand, the *UtiliCorp* Court **[*24]** was unmoved. To be sure, it acknowledged that "[t]he rationales underlying *Hanover Shoe* and *Illinois Brick* will not apply with equal force in all cases." *497 U.S at 216*. Despite this, it concluded that "[t]he possibility of allowing an exception, even in rather meritorious circumstances, would undermine the rule." *Id. at 216*. In that vein, the Court explicitly cautioned lower courts from engaging in "an unwarranted and counterproductive exercise to litigate a series of exceptions" to *Illinois Brick*. *Id. at 217*.

The resulting "bright line" rule is straightforward: "if manufacturer A sells to retailer B, and retailer B sells to consumer C, then C may not sue A. But B may sue A if A is an antitrust violator. And C may sue B if B is an antitrust violator." *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1521, 203 L. Ed. 2d 802 (2019)* (citing *Loeb Industries, Inc. v. Sumitomo Corp., 306 F.3d 469, 481-482 (7th Cir. 2002)* (Wood, J.)). By this logic, if B does not sell to C, C cannot recover from B, even if B is an antitrust violator.[4] *See id.*

That is a formula the County cannot satisfy. The County does not allege that OptumRx directly provided it with PBM services. Rather, it alleges that OptumRx's predecessor, Catamaran, "entered into a contract with Cigna to become Cigna's exclusive pharmacy benefit partner...to provide PBM services to more than 8 million Cigna clients and **[*25]** members," including the County. Dkt. 127 at 37 ¶ 179. To be sure, OptumRx continued this arrangement after acquiring Catamaran. *Id.* 38 ¶ 181. But—because Cigna is the apparent intermediary—at no point does the County allege it directly paid OptumRx for its PBM services. *See id.* ¶ 182. Nor can the County surmount *Illinois*

---

[4] Treatment of *Illinois Brick* as a bright-line rule does not represent a departure from the principle of proximate causation so much as it illustrates a tightening of the requisite causal nexus between the injury and injurious conduct. Indeed, as the Supreme Court has explained elsewhere, "[t]he proximate-cause inquiry is not easy to define, and over the years it has taken various forms." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 133, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*.

Brick insofar as it sues OptumRx in its capacity as a mail-order pharmacy. Though the County alleges that OptumRx "dispensed diabetes medications...nationwide and in Texas, including in Harris County," it fails to allege that it directly purchased diabetes medications from OptumRx. *Id.* 39 ¶ 189. Accordingly, and in keeping with *Illinois Brick*'s indirect purchaser bar, the court concludes that the County lacks standing to bring its RICO claims against OptumRx.

The County challenges this conclusion. It argues that *Illinois Brick* does not apply if the complaint alleges that a defendant participated in a RICO conspiracy and the plaintiff directly paid a co-conspirator. Dkt. 169 at 7-8. To use the *Apple* Court's language, the "co-conspirator exception" posits that C may sue A, even though A did not sell to C, because A worked with B and B sold to C. *See* *139 S. Ct. at 1521*. This court previously **[*26]** adopted this so-called "co-conspirator" exception in its September 2020 Order, concluding that the County had standing to bring claims against the Manufacturer Defendants from whom it did not directly purchase diabetes medications. Dkt. 66 at 32-34. Looking to that Order, the County seeks to apply the co-conspirator exception to an alleged horizontal conspiracy between OptumRx and the PBM Defendants, including Cigna, CVS Caremark, and AetnaRx—the three PBMs with whom it directly contracted for PBM services. *See* Dkt. 127 at 92-93 ¶¶ 407-10. Because OptumRx allegedly conspired with direct formulary servicers, the County contends that it should be held jointly and severally liable under basic notions of conspirator liability. *See* Dkt. 169 at 17; *see also* Dkt. 127 at 37-38 ¶¶ 179-80.

Though no Fifth Circuit case is on point, the County's position finds some support in certain courts of appeals. In *Paper Systems*, for instance, the Seventh Circuit concluded that:

> If [Defendant] Nippon Paper participated in a [cartel conspiracy] . . . then it is jointly and severally liable for the cartel's entire overcharge. That the plaintiffs did not buy from Nippon Paper directly, or at all, does not matter **[*27]** . . . It was improper to dismiss Nippon Paper as a defendant while its status as a member of the cartel remains to be determined.

Paper Sys. Inc. v. Nippon Paper Indus. Co., 281 F.3d 629, 634 (7th Cir. 2002). Were the court to follow *Paper Systems*, the legal issues would be narrowed to whether the County sufficiently alleged a horizontal conspiracy between OptumRx and CVS Caremark, AetnaRx, and Cigna—an issue the parties devote considerable attention to in their briefing. *See* Dkts. 148 at 17-18, 169 at 10-18, 173 at 2-3.

The co-conspirator exception was one of many that proliferated throughout the lower courts following *Illinois Brick*. The Ninth Circuit's 1984 decision in *State of Arizona v. Shamrock Foods Company* offered the first full articulation of the exception within the circuit courts.[5] *729 F.2d 1208, 1211 (9th Cir. 1984)*. In that case, consumers sued a dairy wholesaler for fixing the prices of dairy products sold through grocery stores and by home-delivery. *Id. at 1210*. Though the consumer plaintiffs initially omitted them from their suit, they modified their price-fixing theory to include both the dairy producers and the grocery stores, arguing that the producers conspired amongst themselves and with the stores to fix the price of products. *Id. at 1210-11*. In a "two-tier conspiracy," the Ninth Circuit concluded **[*28]** that *Illinois Brick*'s aim of avoiding complex damage computations was not frustrated because overcharges were "not passed on to the consumers through any other level of the distribution chain." *Id. at 1214*.

More recently, in *In re National Football League's Sunday Ticket Antitrust Litigation*, a divided Ninth Circuit panel relied on the co-conspirator exception to resolve a standing dispute when plaintiffs alleged injury from a multi-tiered conspiracy involving DirecTV and the NFL. *933 F.3d 1136, 1157 (9th Cir. 2019)*. Looking to the principles of proximate causation, that court concluded that "when co-conspirators have jointly committed the antitrust violation,

[5] From this court's research, the Seventh Circuit's decision in *Fontana Aviation, Inc. v. Cessna Aircraft Company* was the first amongst the Courts of Appeals to support suspending *Illinois Brick* in the context of multi-tiered price-fixing conspiracies. *See* *617 F.2d 478, 481 (7th Cir. 1980)*. In that case, a divided panel opined that it was "not satisfied that the *Illinois Brick* rule directly applies in circumstances where the manufacturer and the intermediary are both alleged to be co-conspirators in a common illegal enterprise resulting in intended injury to the buyer." *Id. at 481*. Before that, the co-conspirator exception's roots can be traced to *Gas-A-Tron of Ariz. v. Am. Oil Co., No. CIV 73-191-TUC-WCF, 1977 U.S. Dist. LEXIS 12513, 1977 WL 1519, at *2 (D. Ariz. Dec. 7, 1977)*.

a plaintiff who is the immediate purchaser from any of the conspirators is directly injured by the violation." *Id. at 1157*.[6]

Though it is still the law of the Ninth Circuit, other courts of appeals (or panels therein) have commented that "*UtiliCorp* implies that the only exceptions to the *Illinois Brick* doctrine are those stated in *Illinois Brick* itself"—and the co-conspirator exception is not one of them. *See In re Drugs Antitrust Litig., 123 F.3d 599, 605 (7th Cir. 1997)*, *abrogated on other grounds by Rivet v. Regions Bank of La., 522 U.S. 470, 118 S. Ct. 921, 139 L. Ed. 2d 912 (1988)*. For its part, even before **[*29]** *UtiliCorp*, the Fifth Circuit declined to recognize the co-conspirator exception. *See In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1163 (5th Cir. 1979)* ("[W]e do not think that the reasoning of *Illinois Brick* permits recognizing the exception when, as here, the alleged co-conspirator middlemen are not named as parties defendant."). *See also Dickson v. Microsoft Corp., 309 F.3d 193, 215 (4th Cir. 2002)* (declining to resolve whether it would recognize a co-conspirator exception to *Illinois Brick*).

Apart from the Supreme Court's admonishment that courts not engage in the "unwarranted and counterproductive" creation of exceptions to *Illinois Brick, UtiliCorp, 497 U.S. at 217*, the court notes that the co-conspirator exception rests upon the rejection of *Hanover Shoe* and *Illinois Brick*'s core logic. Application of the direct purchaser rule in the context of a multi-tiered conspiracy would limit actions to the intermediary conspirators, the so-called middlemen. Holding the intermediaries liable for their own anticompetitive conduct ostensibly deters them from participating in vertical price-fixing conspiracies in the future. *See* Herbert Hovenkamp, *The Rationalization of Antitrust*, *116 Harv. L. Rev. 917, 941 (2003)* ("The other justification for the rule against indirect purchaser recovery is that focusing the entire damage action on the first purchaser in line *increases enforcement incentives* by concentrating **[*30]** relatively large amounts of damages on relatively few plaintiffs.") (emphasis added). But what of the manufacturers? In justifying exceptions to the *Illinois Brick* rule, some courts have determined that extending liability to the highest echelons of a price-fixing conspiracy "is another vital instrument for maximizing deterrence." *See Paper Sys., 281 F.3d at 633* (citing Lewis A. Kornhauser & Richard L. Revesz, *Sharing Damages Among Multiple Tortfeasors*, *98 Yale L. J. 831 (1989)*). Without extending liability to these bad actors in the context of a price-fixing conspiracy, consumers would have little recourse to address anticompetitive conduct originating at the top, leaving manufacturers to enjoy the fruits of their illegality while the intermediaries foot the bill. If that bill sufficiently deterred the intermediaries from participating in a multi-tiered-price-fixing-conspiracy, manufacturers could nevertheless still conspire amongst themselves to fix prices and be shielded from suit if the intermediaries refrained from suing and, instead, passed on the costs to consumers.

And, yet, that is the very scenario that the *Illinois Brick* Court sanctioned when it barred indirect purchasers from bringing antitrust claims. To boot, the Court **[*31]** explained that "allowing indirect purchasers to recover using pass-on theories...would transform treble-damages actions into massive multiparty litigations *involving many levels of distribution* and including large classes of ultimate consumers *remote from the defendant*." *See 431 U.S. at 740* (emphasis added). If the intermediaries who directly purchase price-fixed products do not sue the manufacturers, it is because the *Illinois Brick* Court's gamble "to identify the most efficient plaintiff for the overcharge in price-fixing cases" failed to pay off. *See* William H. Page, *The Scope of Liability for Antitrust Violations*, *37 Stan. L. Rev. 1445, 1488-90 (1985)*. That is not a doctrinal change this court can make. Thus, while the County initially persuaded the court of the co-conspirator exception's applicability and legality, a new amended complaint, and a close reading of the caselaw with fresh eyes reveals the exception's inconsistencies with the Supreme Court's holdings and express admonitions. *See UtiliCorp, 497 U.S. at 216-17*; *Illinois Brick, 431 U.S. at 740*.

---

[6] The subsequent procedural developments in *Sunday Ticket* merit mention. Following the Ninth Circuit's decision, the National Football League appealed to the Supreme Court. Though the Court denied the League's petition for a writ of certiorari, Justice Kavanaugh issued a statement explaining that the interlocutory posture of the case counseled against further review. *See Nat'l Football League v. Ninth Inning, Inc., 141 S. Ct. 56, 57, 208 L. Ed. 2d 291 (2020)* (Kavanaugh, J., respecting the denial of certiorari). More importantly, Justice Kavanaugh opined that the *Sunday Ticket* "plaintiffs may not have antitrust standing to sue the NFL" because the Court's "case law 'authorizes suits by *direct* purchasers but bars suits by *indirect* purchasers.'" *Id.* (citing *Apple Inc., 139 S.Ct. at 1520*) (emphasis original). In a concluding remark, Justice Kavanaugh offered that if the NFL did not "prevail at summary judgment or at trial," it could "raise those legal arguments again in a new petition for certiorari." *Id.*

Returning to *Paper Systems*—the Seventh Circuit decision upon which the County's liability theory is based—it joins the Ninth Circuit's *Shamrock* decision on the wrong side of *Illinois Brick*'s "bright line." As a different Ninth Circuit panel **[*32]** helpfully observed after *UtiliCorp, Paper Systems* "contradicts the Supreme Court's admonition not to 'carve out exceptions to the [direct purchaser] rule for particular types of markets.'" *In re ATM Fee Antitrust Litig., 686 F.3d 741, 755 n. 7 (9th Cir. 2012)* (quoting *UtiliCorp, 497 U.S. at 216*)). This court agrees. The County's strongest theory—that OptumRx engaged in a horizontal conspiracy to price-fix with the PBM defendants from whom the County directly paid—does not surmount *Illinois Brick*'s tall wall against indirect purchaser suits. Accordingly, OptumRx's motion to dismiss is GRANTED as to the County's antitrust and RICO claims.

B. The County's State Law Claims

OptumRx also moves to dismiss the County's DTPA, unjust enrichment, money-had-and-received, and civil conspiracy claims. Dkt. 127 at 155. OptumRx contends that the County's DTPA claim must be dismissed because the County no longer alleges that it conferred a direct benefit on OptumRx. Dkt. 148 at 7. The absence of a direct benefit is also, OptumRx argues, fatal to the County's unjust enrichment and money-had-and-received claims. *Id.* Finally, because the County's civil conspiracy claim derives from its underlying tort allegations, it must also be dismissed. *Id.* The County responds that these claims survive because **[*33]** it successfully alleged facts against OptumRx's co-conspirators and that OptumRx is liable under conspirator liability. *See* Dkt. 169 at 30-31.

1. DTPA Claims

The DTPA grants consumers a cause of action for false, misleading, or deceptive practices or acts. *Tex. Bus. & Com. Code Ann. § 17.50(a)(1)*; *Amstadt v. U.S. Brass Corp., 919 S.W.2d 644, 649 (Tex. 1996)*. Among other things, the DTPA prohibits "any unconscionable action or course of action," which it defines as "an act or practice which, to a consumer's detriment, takes advantage of the lack of knowledge, ability, experience, or capacity of the consumer to a grossly unfair degree." *Tex. Bus. & Com. Code Ann. §§ 17.45(5)*, *17.50(a)(3)*.

Two or more entities can be held liable for a conspiracy to violate the DTPA. *Laxson v. Giddens, 48 S.W.3d 408, 411 (Tex. App.—Waco 2001, pet. denied)*. *See also* *Off. Stanford Invs. Comm. v. Greenberg Traurig, LLP, No. 3:12-CV-4641-N, 2015 U.S. Dist. LEXIS 199175, 2015 WL 13741905, at *7 (N.D. Tex. Feb. 4, 2015)* ("Texas Courts have held generally that any agreement to undertake an unlawful act may support a claim for conspiracy.") However, because anticompetition allegations raised in a DTPA claim must "be harmonized with federal ***antitrust law***," the court must determine if the County's DTPA conspiracy claim is "virtually identical to [its] [RICO] allegations." *See* *Abbott Lab'ys, Inc. (Ross Lab'ys Div.) v. Segura, 907 S.W.2d 503, 505 (Tex. 1995)* (citing *Tex. Bus. & Com. Code Ann. § 15.04*).

OptumRx observes that the County no longer alleges an underlying DTPA violation against it because it "no longer alleges that it had a relationship with OptumRx." Dkt. 148 at 24. The County appears **[*34]** to concede this, but it argues that its DTPA claim against OptumRx may still proceed because it "has sufficiently alleged that OptumRx conspired with the other Defendants." Dkt. 169 at 31.[7]

In support of its claim that the Defendants conspired to violate the DTPA, the County alleges that "each of the PBM and Manufacturer Defendants, as well as their co-conspirator Cigna, agreed to and carried out acts in furtherance of the Insulin Pricing Scheme that artificially...inflated the price of diabetes medications." Dkt. 127 at 159 ¶ 694(a). The County alleges that CVS Caremark, Express Scripts, and OptumRx each "had express agreements" with the Defendant Manufacturers "related to the Manufacturer Payments paid by the Manufacturer Defendants." *Id.* 28 ¶¶ 123, 169, 190. It also alleges that some of the Manufacturer Defendants even "admitted" to the United States House of Representatives Committee on Energy and Commerce that "they agreed to and did participate in the

[7] The court previously denied the defendants' motion to dismiss on the County's DTPA claims in its March 2021 Order, concluding that the County plausibly pleaded underlying DTPA claims against all the defendants. Dkt. 82 at 13.

Insulin Pricing Scheme and that the rise of insulin prices was a direct result of the scheme." *Id.* 78 ¶ 339. For example, Novo Nordisk "directly admitted that 'as the manufacturer, we do set the [reported] price and have full accountability **[*35]** for those increases.'" *Id.* ¶ 340. Novo Nordisk reported that price increases were necessary for it to stay on the PBM's preferred formularies. *Id.* In addition, Novo Nordisk explained that:

> There is this perverse incentive and misaligned incentives (in the insulin pricing system) and this encouragement to keep [reported] prices high. And we've been participating in that system because the higher the [reported] price, the higher the rebate . . . There is a significant demand for rebates. We spent almost $18 billion in rebates in 2018 . . . If we eliminate all the rebates . . . we would be in jeopardy of losing [our formulary] positions.

Id. ¶ 341. Eli Lilly also allegedly admitted that "it raises reported prices as a *quid pro quo* for formulary positions," noting that "drug makers sharply raise reported prices without a corresponding increase in net price" because "PBMs demand higher rebates in exchange for including the drug on their preferred-drug lists." *Id.* ¶ 342. For their part, the "PBM Defendants also admitted at the April 2019 Congressional hearing that they grant preferred...formulary position because of higher rebates." *Id.* 79 ¶ 346.

By its own terms, the FAC reflects that these **[*36]** allegations, at bottom, refer to the same anticompetitive conduct raised in its RICO claims:

> In a competitive market such as this one unilateral price increases would result in loss of market share and removal from preferred positions on PBM Defendants' formularies. Thus, it would have been economically irrational for any one Manufacturer Defendant to raise its prices without assurance that its competitors would also increase prices and assurances from PBM Defendants that it would receive preferred formulary positions in exchange for these inflated prices.

Id. 160 ¶ 694e. *Compare* Dkt. 127 at 160 ¶¶ 694(e), 694(h)-(j), *with* Dkt. 127 at 111-51 ¶¶ 489-670.

The Texas Supreme Court's decision in *Segura* controls here. That case began on the state's allegations that manufacturers "conspired with each other to fix the wholesale price of infant formula and with [the American Academy of Pediatrics] to monopolize markets for infant formula and infant formula advertising." *Segura, 907 S.W.2d at 504*. The state initially raised these claims under Texas' ***antitrust law***, but a lower court dismissed them after concluding that the state was an indirect purchaser. *Id. at 504*. Infant formula consumers then intervened and "brought claims for damages **[*37]** against the manufacturers for the same conduct alleged by the state," including allegations that they implemented nearly identical price increases. *Id. at 504-05*. Rather than follow the state and bring their claims under the *Antitrust Act*, the intervenors alleged that the anticompetitive conspiracy violated the DTPA's prohibition against unconscionable conduct.[8] *Id. See also Tex. Bus. & Com. Code Ann. § 17.50(a)(3)*.

Though raised under the DTPA, the *Segura* Court observed that the intervenors' claims were "in essence antitrust claims." *907 S.W.2d at 507*. And, because the legislature required courts to harmonize Texas' ***antitrust law*** with federal ***antitrust law***, that court determined that *Illinois Brick*'s indirect purchaser bar applied to the intervenors' DTPA claims as they, too, had failed to show that they directly purchased the infant formula from the manufacturers. *Id. at 507*. Indeed, the court advised that it would "not interpret the DTPA in a manner that rewards creative pleading at the expense of consistent legal principles." *Id.*

Like in *Segura*, the County's conspiracy allegations "masquerade" as "consumer protection" claims despite mirroring "prohibited antitrust" claims under federal law. *See id. See also* Dkt. 127 at 159-63 ¶¶ 694-95. Just as *Illinois Brick* foreclosed **[*38]** the County's RICO claims against OptumRx, so, too, does it stand as a firewall against its DTPA conspiracy claims. So, for the County's anticompetition DTPA conspiracy claims against OptumRx to survive, there would have to be a co-conspirator exception to the indirect purchaser bar. For reasons already discussed, there is no co-conspirator exception recognized by the Fifth Circuit or the Supreme Court, and the

---

[8] The manufacturers argued that "classic antitrust claims of price-fixing and monopolization" were not cognizable under the DTPA. *Segura, 907 S.W.2d at 504*. The *Segura* Court did not decide that issue.

exception recognized in other circuits is inconsistent with *Illinois Brick* and its progeny. Accordingly, the Court GRANTS OptumRx's motion to dismiss the County's DTPA claims.

2. Unjust enrichment, money-had-and-received, and civil conspiracy

The court now turns to the County's unjust enrichment, money-had-and-received, and civil conspiracy claims. "Unjust enrichment claims are based on quasi-contract." *Fortune Prod. Co. v. Conoco, Inc., 52 S.W.3d 671, 683 (Tex. 2000)*.[9] "The principal function of quasi-contract is generally said to be that of prevention of unjust enrichment." Calamari et al., The Law of Contracts, § 1-12 (3d ed. 1987). But when an express contract exists, "there can be no recovery under a quasi-contract theory."[10] *Fortune, 52 S.W.3d at 684*. As the Fifth Circuit has observed, "[g]ood reason supports that rule: quasi-contract actions *presuppose* no contract **[*39]** governs the dispute." *See* *Villarreal v. First Presidio Bank, 744 F. App'x 204, 206 (5th Cir. 2018)* (emphasis original); *MGA Ins. Co. v. Charles R. Chesnutt, P.C., 358 S.W.3d 808, 815 (Tex. App.—Dallas 2012, no pet.)* ("The quasi-contractual action for money had and received is a cause of action for a debt *not* evidenced by a written contract between the parties.") (emphasis added). Thus, as *§ 107* of the Restatement (First) of Restitution provides:

> A contracting party is entitled to receive from another contracting party what the other has promised and if the contract is between persons of full capacity and is not voidable, he is not entitled to receive more than this, unless the other has failed to perform. On the other hand, a person is not entitled to compensation on the ground of unjust enrichment if he received from the other that which it was agreed between them the other should give in return.

Restatement (First) of Restitution § 107(a)(1) (1937).

Other courts agree that this principle presents a high hurdle for plaintiffs alleging price-fixing claims to surmount. For example, in *In re Intel Corp. Microprocessor Antitrust Litigation*, the plaintiffs bought—and paid the purchase price for—computers whose microprocessors were artificially inflated. *496 F. Supp. 2d 404, 421 (D. Del. 2007)*. Like the County, the *Intel* plaintiffs did not allege that they did not receive the benefit of their bargain, but objected to the **[*40]** artificially inflated price that they paid. *Id. See also* *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 210 (D. Me. 2004)* ("In any event, unjust enrichment ordinarily does not furnish a basis for liability where parties voluntarily have negotiated, entered into and fully performed their bargain, as consumers do in buying vehicles.").

In that respect, just as in *Intel*, the County's claims sound more in contract than in quasi-contract. In the FAC's own words, the PBM Defendants "contract with payors." Dkt. 127 at 85 ¶ 367. The Defendants "set[] prices for...diabetes medications marketed and sold" and that "payors, including [the County],...paid for diabetes medications based on fraudulently inflated prices." *Id.* 168 ¶¶ 720-21. Against OptumRx's co-defendants, the County paid its purchase price for PBM services, obtained them, and does not assert that it failed to receive the benefit of its bargain.

---

[9] The court analyzes the County's unjust enrichment and money-had-and-received claims under the same rubric because "[a] cause of action for money had and received belongs conceptually to the doctrine of unjust enrichment." *Amoco Prod. Co. v. Smith, 946 S.W.2d 162, 164 (Tex. App. 1997, no writ)*.

[10] To be sure, there are some exceptions to this rule. A claim for restitution or unjust enrichment might still be made when, for instance, a defendant verbally contracted to sell a certain item at an agreed-upon price sells it and later denies his counterpart an interest in the proceeds of the sale. *See, e.g.,* *Staats v. Miller, 150 Tex. 581, 243 S.W.2d 686, 687-88 (1951)* (allowing restitution for excess money held by defendant after selling plaintiffs' cotton harvester pursuant to oral contract). Likewise, restitution might be available where a party overpays an agreed-upon rate. So, for instance, if A contracts to buy widgets from B for $65.00 and B then refuses to deliver the widgets unless A pays him $110.00, A may bring an unjust enrichment claim. *See, e.g.,* ***Bowers v. Missouri, Kan. & Tex. Ry. Co., 241 S.W. 509, 510-11 (Tex. App.—Texarkana 1922, no writ)*** (allowing restitution for freight charges paid in excess of rates specified in shipping contract); *Nat. Gas Pipeline Co. of Am. v. Harrington, 246 F.2d 915, 921 (5th Cir. 1957)* (agreeing that plaintiff was entitled to restitution where it paid, "involuntarily and under protest," in excess of contracted-for price). These exceptions do not apply here.

Generally, for these reasons, the court would just conclude that the County's unjust enrichment claim against OptumRx fails. However, it pauses to note the unique procedural background of this case. The County bases its unjust enrichment claim against OptumRx based on conspirator liability—that "OptumRx is responsible for all alleged acts done by any of **[*41]** the conspirators in furtherance of the Insulin Pricing Scheme." Dkt. 169 at 9. *See also* Dkt. 127 at 168 ¶¶ 726. The court previously found in its September 2020 Order that the County alleged stand-alone unjust enrichment claims against the defendants. *See* Dkt. 66 at 40. In that order, the court mistakenly concluded that because the County pleaded fraud—a bad act—and because allegations of a bad act were necessary to state a claim for unjust enrichment, the County had sufficiently pleaded its claim. *See id.* at 39-40. Alternatingly reticent to challenge and ready to embrace the court's prior order, both parties spill ink debating whether the County sufficiently alleged a conspiracy between OptumRx and its co-defendants. *See* *Off. Stanford Invs. Comm., 2015 U.S. Dist. LEXIS 199175, 2015 WL 13741905, at *7* (observing that conspirator liability may apply to torts). In the end, whether it did does not matter: allegations of the bad act are insufficient to move the County out of the realm of contract and into the domain of quasi-contract, and the unjust enrichment claims on which the County bases its conspiracy allegations cannot stand on their own. Accordingly, the court GRANTS OptumRx's motion to dismiss the County's unjust enrichment and money-had-and-received claims. **[*42]**

Finally, civil conspiracy is a derivative tort. *Agar Corp., Inc. v. Electro Circuits Int'l, LLC, 580 S.W.3d 136, 140-42 (Tex. 2019)*. Because the County's DTPA, unjust enrichment, and money-had-and-received claims fail, its civil conspiracy claim also fails. Accordingly, the court GRANTS OptumRx's motion to dismiss the County's civil conspiracy claim.

CONCLUSION

For the reasons outlined above, the Court rules as follows:

1. OptumRX's motion to dismiss is GRANTED for the County's RICO claims;
2. OptumRX's motion to dismiss is GRANTED for the County's Texas Deceptive Trades Practices-Consumer Protection Act claim;
3. OptumRX's motion to dismiss is GRANTED for the County's unjust enrichment claim;
4. OptumRX's motion to dismiss is GRANTED for the County's money-had-and-received claim; and
5. OptumRX's motion to dismiss is GRANTED for the County's civil conspiracy claim.
6. All claims are dismissed with prejudice.

Signed at Houston, Texas on February 16, 2022.

Opinion

MEMORANDUM OPINION AND ORDER

This matter is before the Court on Direct Action Plaintiffs Bojangles' Restaurants, Inc.'s and Bojangles OPCO, LLC's Motion to Compel 30(b)(6) Deposition of Cheney [ECF **[*42]** No. 4932]. For the reasons set forth below, the Motion is denied.

FACTUAL BACKGROUND

Bojangles Restaurants, Inc. and Bojangles OPCO, LLC (together, "Bojangles DAPs") and Cheney Bros., Inc. ("Cheney") are direct action plaintiffs ("DAPs") that opted out of one of the class actions that are part of this *In re Broiler Chicken Antitrust Litigation*, which has been pending in this District since September 2016. Cheney along with other DAPs filed a complaint against Defendants Tyson Foods, Inc., *et al.*, Case No. 1:18-cv-06693, on October 3, 2018, which case was reassigned to this docket on October 16, 2018. [ECF No. 1286]. After Cheney's lawsuit had been pending for over two years, Bojangles DAPs filed their own opt out complaint against Defendants Tyson Foods, Inc., *et al.*, Case No. 1:20-cv-07734, which was reassigned to this docket on December 28, 2020. [ECF Nos. 4120-1, 4126].

After Bojangles DAPs filed their complaint, they say they learned, presumably in late 2020 or early 2021, that Cheney already had asserted a claim for damages arising from purchases of Broiler chickens that allegedly included some of the same purchases of Broiler chickens that underlie Bojangles DAPs' claim. Specifically, **[*43]** Bojangles DAPs assert that Cheney included within its damage claim purchases of proprietary Broiler products that Bojangles DAPs' distributor, Pate Dawson (which had been acquired by Cheney in 2016), had made on behalf of the Bojangles DAPs during the relevant period.

To better understand the basis for Cheney's damage claim, Bojangles DAPs served Cheney with a *Rule 45* subpoena to produce documents on January 27, 2021, followed by a second *Rule 45* subpoena to produce documents on February 10, 2021. Cheney served objections and responses to those subpoenas but also produced responsive documents on February 26, 2021, and March 19, 2021. Bojangles DAPs did not pursue any further discovery from Cheney for nearly four months. Then, on July 14, 2021, more than one month after the applicable June 11, 2021, fact discovery deadline in the *In re Broiler Chickens Antitrust Litigations* case,[1] Bojangles DAPs sent Cheney a Notice of *Rule 30(b)(6)* Deposition via e-mail to Cheney's counsel seeking the deposition of a Cheney corporate witness. *See* Notice of Deposition [ECF No. 4993], at Exhibit C. Cheney objects to the requested deposition on several grounds. The Court will address each argument in turn.

DISCUSSION

I.

Cheney first **[*44]** contends the Bojangles DAPs' notice of deposition is procedurally defective because Cheney is not a party to Bojangles DAPs' lawsuit against the Tyson Defendants, *et al.* Cheney says that Bojangles DAPs should have served a *Rule 45* subpoena for the *Rule 30(b)(6)* deposition just like they did when they served *Rule 45* subpoenas for the documents they previously requested from Cheney. Since Bojangles DAPs did not serve

---

[1] *See* Scheduling Order No. 15 [ECF No. 4641] (entered on May 13, 2021); and Scheduling Order No. 16 [ECF No. 4748] (entered on June 17, 2021).

Cheney with a subpoena, Cheney argues that the Bojangles DAPs' motion to compel is procedurally improper and should be denied.

Despite having previously served two third-party subpoenas for documents on Cheney, Bojangles DAPs argue that they did not need to serve a *Rule 45* subpoena for Cheney's *Rule 30(b)(6)* deposition because Cheney is "not a 'third party' to this case." Bojangles DAPs' Memorandum of Law [ECF No. 4933], at 4. Nevertheless, on July 27, 2021, during a meet and confer regarding this issue, counsel for Bojangles DAPs offered to serve a *Rule 45* subpoena if that would resolve Cheney's objection to the deposition. Cheney said that even if Bojangles DAPs would have served a *Rule 45* subpoena, it still would argue that the subpoena was untimely and Bojangles DAPs had not shown good cause to take the deposition. Bojangles did **[*45]** not serve a subpoena, but instead filed this motion to compel a *Rule 30(b)(6)* deposition of Cheney.

As a threshold matter, the Court agrees with Cheney that Bojangles DAPs were required to serve a subpoena to take a *Rule 30(b)(6)* deposition of a Cheney corporate representative absent Cheney's agreement to appear voluntarily for such a deposition. It is well-settled law that a party cannot compel the presence of a non-party at a deposition without serving a subpoena. *See* *Bueker v. Atchison, Topeka and Santa Fe Ry. Co., 175 F.R.D. 291, 292 (N.D. Ill. 1997)*; *Metzger ex rel. Anderson v. Francis W. Parker School, 2001 U.S. Dist. LEXIS 12492, 2001 WL 910443, at *3 (N.D. Ill. Aug. 10, 2001)* (holding that "when a party wants a non-party to testify at a deposition or to produce documents, *Rule 45* requires a subpoena and permits the non-party the opportunity to object"); *see also* 9A Charles Alan Wright & Arthur R. Miller, Federal Practice and Procedure § 2452 (3d ed. 2021) (stating that "a subpoena is necessary to compel someone who is not a party to appear for the taking of a deposition").

Cheney and the Bojangles' parties each filed separate lawsuits, and their individual cases have been reassigned to this *In re Broiler Chicken Antitrust Litigation* docket because they are related to other such cases that have been filed. Bojangles DAPs and Cheney have no pending claims against each other, and they asserted their own claims against various **[*46]** Defendants in separate complaints after they opted out of the direct purchaser class action.[2] Cheney's position is simple—a subpoena is required because Cheney is not a party to the Bojangles DAPs' individual case even though both Cheney and Bojangles DAPs are plaintiffs in the *In re Broiler Chicken Antitrust Litigation*. The Court agrees. Bojangles DAPs' prior service on Cheney of two *Rule 45* subpoenas for documents confirms their acknowledgement that Cheney is a third-party to Bojangles DAPs' individual case. The Court is not persuaded by Bojangles DAPs' argument to the contrary. Bojangles DAPs' motion to compel, therefore, could be denied on this ground alone, but the Court will address the remaining arguments made by the parties.

II.

Cheney next argues that Bojangles DAPs' notice of deposition and their motion to compel are untimely under Scheduling Order No. 16. *See* Scheduling Order No. 15 [ECF No. 4641] (entered on May 13, 2021) and Scheduling Order No. 16 [ECF No. 4748] (entered on June 17, 2021). The Court agrees with Cheney that Bojangles DAPs' notice of deposition and their subsequent motion to compel are untimely. Bojangles DAPs did not serve Cheney with a notice of a *Rule 30(b)(6)* deposition **[*47]** until July 14, 2021, more than one month after the June 11, 2021 fact discovery deadline in this case. The Court had extended fact discovery to July 30, 2021, solely to allow parties to complete discovery that already had been served or was then at-issue as the fact discovery close date was fast

[2] Although the all the DAPs in this case, at the Court's instance [ECF Nos. 3653, 3700], have filed an omnibus complaint that accumulates in one place the factual allegations and legal claims being made by more than 150 DAPs in their individual complaints, they have maintained the independent legal existence of their individual cases. *See* Direct Action Plaintiffs' Amended Consolidated Complaint and Demand for Jury Trial [ECF No. 4244], at 2 (stating "DAPs understand the Court's orders to preserve the independent legal existence of each DAP case").

approaching. That "extension" was not an invitation to serve new discovery that could have been served timely during the period allowed for fact discovery.[3]

Generally, a deadline is a deadline. It is not a suggestion to be taken lightly or complied with only as a matter of choice.[4] Bojangles DAPs do not offer any reasonable explanation for their lack of diligence in pursuing the Cheney deposition during the period when deposition discovery was to take place within the confines of the Court's Scheduling Orders. Bojangles DAPs served timely *Rule 45* subpoenas on Cheney earlier in the discovery period. Bojangles DAPs should have raised the issue of a Cheney *Rule 30(b)(6)* deposition months before they did so, and their desire to take that deposition now, and to compel it in the eleventh hour, comes too late.

III.

Finally, putting aside the procedural defects of an untimely notice of deposition, the Court also **[*48]** finds Bojangles DAPs have not shown that the discovery they are seeking is relevant or proportional to the needs of their case within the meaning of *Federal Rule of Civil Procedure 26((b)(1)*. Bojangles DAPs do not need the information they are seeking to support their affirmative claim for relief alleged in their complaint. If they need the information at all, it would be to respond to a Defendant's potential argument that Bojangles DAPs do not own the claim they are asserting. As far as the Court can tell, however, no Defendant has made that argument as of now. A potential dispute between Bojangles DAPs and Cheney as to who is the rightful owner of certain claims for damages they have asserted in their individual cases is not part of this case at this time.[5]

Therefore, in the Court's view, the discovery Bojangles DAPs are seeking is not relevant to a claim or defense in their case or, importantly, proportional to the needs of that case at this time within the meaning of *Federal Rule of Civil Procedure 26(b)(1)*. If the information Bojangles DAPs are seeking becomes relevant to a claim or defense in the future, and discovery of that information is proportional to the needs of the case at that time, the Court can address the issue in that context.

---

[3] The parties have taken almost 400 depositions in this case. *See* Tyson Defendants' Opposition to Aldi's Motion to Compel Individualized Discovery [ECF No. 4865], at 2. As the Court made clear during a May 24, 2021 hearing when it extended the fact discovery close date to July 30, 2021 to allow the parties to complete discovery that was then in progress and had been timely served or noticed, the extension of the fact discovery close date was not intended to give anyone free rein to serve new discovery. *See* May 24, 2021 Hearing Transcript [ECF No. 4814], at 20; 21-22 ("I would extend fact discovery to July 30th for the taking of depositions and for the completion of discovery timely served."). Although the Court noted that depositions could be taken during that time, the Court did not necessarily mean that depositions that had not yet been noticed would be allowed.

[4] In *McCann v. Cullinan, 2015 U.S. Dist. LEXIS 91362, 2015 WL 4254226 (N.D. Ill. July 14, 2015)*, Judge Johnston recognized the importance of deadlines that are set by the court and concluded that "[c]ounsel must calendar and meet dates. And if counsel is going to miss a deadline, then counsel should file a motion seeking an extension *before* the deadline has passed." *2015 U.S. Dist. LEXIS 91362, [WL] at *2* (citing cases). In *Hard Surface Sols., Inc. v. Sherwin-Williams Co., 271 F.R.D. 612 (N.D. Ill. 2010)*, Judge Cole noted "[u]nder the Federal Rules of Civil Procedure, it is the court's prerogative-indeed, its duty-to manage its caseload and to set and enforce discovery and other significant deadlines.... A party does not have the option of complying with those deadlines or ignoring them and then demanding that the court and the opposing party restructure the discovery schedule to accommodate the violation." *Id. at 617* (citing *Reales v. CONRAIL, 84 F.3d 993, 996 (7th Cir. 1996)*).

[5] The word "Cheney," for example, does not appear in Bojangles' original complaint [ECF No. 4120-1] or in its amended complaint [ECF No. 4347]. A footnote in paragraph 61 of the Direct Action Plaintiffs' Amended Consolidated Complaint and Demand for Jury Trial does reference the existence of a dispute between Bojangles and Cheney as to the proper party to assert claims arising from Bojangles' purchases of Broiler chickens through its distributor, Pate Dawson, which Cheney acquired in 2016. The footnote then says, "Bojangles reserves all of its rights on this issue." [ECF Nos. 4243, 4244], at 67-68, ¶ 61, n.5. In their Consolidated Answer, Defendants do not respond to the Bojangles DAPs' statement in footnote 5 of the Consolidated Complaint about its dispute with Cheney, presumably because no response was required. Defendants' Consolidated Answer and Affirmative Defenses to Direct Action Plaintiffs' Amended And Consolidated Complaint [ECF No. 4417], at 77-78, ¶ 61.

CONCLUSION

Accordingly, **[*49]** for all these reasons, Bojangles' Restaurants, Inc. and Bojangles OPCO, LLC's Motion to Compel 30(b)(6) Deposition of Cheney [ECF No. 4932] is denied.

It is so ordered.

Opinion

[*976] ORDER DENYING IN PART AND GRANTING IN PART MOTION TO DISMISS

Re: Dkt. No. 65

The plaintiffs are consumers who purchased clear dental aligners to straighten their teeth. The bulk of the plaintiffs' allegations concern Align's alleged monopolization of the market for aligners sold to consumers through dentists.

These allegations mirror those that survived a motion to dismiss in a related suit brought by dentists. *See* *Simon & Simon, PC v. Align Technology, Inc., 533 F. Supp. 3d 904 (N.D. Cal. 2021)*. But the plaintiffs have tacked on a set of tangentially related allegations concerning agreements between Align and SmileDirectClub, an emerging competitor that sells aligners directly to consumers, rather than through dentists. The plaintiffs allege that Align and SmileDirectClub entered into a set of agreements in which Align agreed not to compete in the direct-to-consumer market, and SmileDirectClub agreed not to compete in the dentist-directed market.

Align has moved to dismiss the complaint in its entirety. This ruling discusses the new allegations concerning SmileDirectClub. Because the plaintiffs have plausibly alleged that Align's agreement not to compete in the direct-to-consumer market was a naked restraint on trade, the plaintiffs' **[**3]** *Section 1* claim survives. But because the reverse restraint—SmileDirectClub's commitment not to compete in the dentist-directed market—was not anticompetitive, some of the plaintiffs' state law claims must be dismissed. The remainder of Align's motion to dismiss is addressed in an accompanying order.

I

Align has dominated the aligner market for decades through its business model of selling its aligners (called Invisalign) through dentists.[1] But in 2014, SmileDirectClub entered the scene with a new approach: selling aligners directly to consumers. People could either go to a physical store (called "SmileShops") for an intraoral scan or use an at-home kit. Scans would then be sent to a SmileDirectClub dentist or orthodontist who would confirm that the treatment plan was simple enough for SmileDirectClub's services. If so, the consumer would be approved for treatment.

The beauty of SmileDirectClub's service is that it cuts out the middleman: "A customer using SmileDirectClub could conceivably go through the entire process of straightening their teeth without ever once having met with an orthodontist." There are limits to this approach, as SmileDirectClub can only handle minor cosmetic changes. **[**4]** For this reason, there is little **[*977]** overlap between the markets for aligners sold through dentists and those sold directly to consumers (at least as alleged in the complaint). Still, the emergence of a (cheaper) direct-to-consumer option gave Align reason to worry. Why go to the dentist if you can straighten your teeth from the comfort of your own home?

But Align had something that SmileDirectClub did not: patents. In 2015, Align filed a patent infringement lawsuit against SmileDirectClub, alleging that SmileDirectClub infringed fourteen Align patents related to the manufacture and sale of clear aligners. The lawsuit settled. In a pair of agreements (the "Supply Agreement" and "Operating Agreement"), Align and SmileDirectClub constructed a deal whereby SmileDirectClub could continue selling aligners directly to consumers with Align's blessing—subject to certain conditions.

In the Supply Agreement, Align agreed to supply aligners to SmileDirectClub. In exchange, SmileDirectClub promised to refer any patients who did not qualify for its services to Align. As part of the Operating Agreement, Align purchased a 17% stake in SmileDirectClub for $46.7 million. The agreements contained mirror restrictive **[**5]** covenants: SmileDirectClub agreed not to enter the dentist-directed market and Align agreed not to sell aligners directly to consumers.[2]

---

[1] Unless otherwise noted, the facts described in this section come from the well-pleaded allegations in the complaint. As is required at this early stage, all inferences are drawn in favor of the plaintiff. *See* *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555-56, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

[2] Align disputes this characterization, arguing that the agreements do not limit SmileDirectClub's ability to sell aligners through dentists. While Align may have the better reading of the contracts, the plaintiffs' reading is plausible. Drawing all inferences in the plaintiffs' favor, as must be done at this stage, the Court accepts the plaintiffs' interpretation for the purposes of this motion. *See* *Twombly, 550 U.S. at 555-56*.

According to the complaint, the "overall effect" of these covenants was to "allocate the two product submarkets" between Align and SmileDirectClub, in direct defiance of the antitrust laws. The plaintiffs argue that the restraint on Align's ability to enter the direct-to-consumer market constitutes a per se violation of *Section 1 of the Sherman Act*. As for the restraint on SmileDirectClub, the plaintiffs argue that it contributes to Align's unlawful monopolization of the dentist-directed market, recognized under *Section 2*.

II

The plaintiffs' *Section 1* claim stands apart from their other allegations. While most of the plaintiffs' claims concern harm to the dentist-directed market, the *Section 1* claim—brought on behalf of a class of consumers who purchased aligners from SmileDirectClub—alleges harm to the direct-to-consumer market.

A

Section 1 of the Sherman Act prohibits "[e]very contract, combination . . . or conspiracy, in restraint of trade." *15 U.S.C. § 1*. Despite the categorical language of this provision, the Supreme Court has interpreted this text "to outlaw only unreasonable restraints." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Under Section 1, agreements in restraint of trade **[**6]** are evaluated under two standards. Some restraints are subject to the rule of reason, a "fact-specific assessment of 'market power and market structure'" to determine the restraint's "'actual effect' on competition." *Ohio v. American Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)* (quoting *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*). But other types of agreements are "conclusively presumed to be unreasonable" due to their "pernicious effect on competition **[*978]** and lack of any redeeming virtue." *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. This class of agreements—which includes horizontal price fixing and market allocation—is deemed illegal per se. *See* *Copperweld Corp., 467 U.S. at 768*; *American Express, 138 S. Ct. at 2283-84*.

The class of restraints that is illegal per se has been narrowed further. "[T]he *per se* rule is designed for 'naked' restraints rather than agreements that facilitate productive activity." *Polk Brothers, Inc. v. Forest City Enterprises, Inc., 776 F.2d 185, 188 (7th Cir. 1985)*. When a procompetitive agreement contains some anticompetitive elements, a court must determine whether the restrictions on competition are "naked" or "ancillary." *Id. at 188-89*. For example, "[i]f two people meet one day and decide not to compete, the restraint is 'naked'; it does nothing but suppress competition." *Id. at 189*. On the other hand, "[i]f A hires B as a salesman and passes customer lists to B, then B's reciprocal covenant not to compete with A is 'ancillary.'" *Id.* In this latter world, the agreement between **[**7]** A and B expands output by "putting B to work." *Id.* The covenant not to compete, which would be reasonably necessary to induce A to contract with B, is therefore not automatically problematic under the antitrust laws. Therefore, while naked restraints are unlawful per se, ancillary restraints are evaluated under the rule of reason. *See* *Aya Healthcare Services, Inc. v. AMN Healthcare, Inc., 9 F.4th 1102, 1109 (9th Cir. 2021)*.

The threshold question of whether an agreement is naked or ancillary has two parts. First, to be ancillary, the restraint must be "subordinate and collateral to a separate, legitimate" (that is, procompetitive) transaction. *Id.* (quoting *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 224, 253 U.S. App. D.C. 142 (D.C. Cir. 1986)*). Second, the restraint must be "'reasonably necessary' to achiev[e] that transaction's pro-competitive purpose." *Id.* (quoting *United States v. Addyston Pipe & Steel Co., 85 F. 271, 281 (6th Cir. 1898)*, *aff'd*, *175 U.S. 211, 20 S. Ct. 96, 44 L. Ed. 136 (1899)*).

B

To begin, Align argues that its agreement with SmileDirectClub should be understood as a vertical restraint—a restraint "imposed by agreement between firms at different levels of distribution." *Business Electronics Corp. v.*

Sharp Electronics Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988). Align wants to characterize its agreement this way because, unlike horizontal restraints, vertical restraints are presumptively subject to the rule of reason. *See* American Express, 138 S. Ct. at 2284.

But as alleged in the complaint, Align and SmileDirectClub were potential competitors, both in the market for dentist-directed **[**8]** aligners and the market for direct-to-consumer aligners. Moreover, the plaintiffs highlight a few instances in which this potential competition edged into the actual—for example, when Align attempted to open its own brick-and-mortar shop, only to be sued by SmileDirectClub and enjoined by an arbitrator enforcing Align's agreement not to compete. This is sufficient to put the agreements in the "horizontal" category. As the Supreme Court has recognized, a market division agreement between potential competitors constitutes a horizontal restraint on trade. *See* Palmer v. BRG of Georgia, Inc., 498 U.S. 46, 49, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990).

C

The thrust of the agreement between Align and SmileDirectClub was to **[*979]** permit SmileDirectClub to sell aligners, despite Align's patents.[3] This agreement had serious benefits to consumers. Assuming (as the complaint seems to) that Align's patents were valid and legitimately infringed by SmileDirectClub, SmileDirectClub would not have been able to sell *any* aligners without Align's permission. This is a consequence of the lawful monopoly that a product patent confers on a patentholder. *See* 35 U.S.C. § 154(a)(1) (granting patentholders "the right to exclude others from making, using, offering for sale, or selling" the covered product). The arrangement therefore **[**9]** had the potential to greatly increase output, as a new crop of consumers would have the ability to purchase aligners. The challenged restraint on trade is thus but one collateral aspect of a broader, procompetitive agreement.

The more challenging issue is whether the restraint on Align's ability to enter the direct-to-consumer market was "reasonably necessary" to the parties' procompetitive collaboration. The "reasonably necessary" test asks whether this cooperation would have been possible absent the challenged restraint. *See* Aya Healthcare, 9 F.4th at 1110; Polk Brothers, 776 F.2d at 190. This is an inherently fact-specific inquiry that is difficult to determine with certainty at the motion to dismiss stage. *See* In re Juul Labs, Inc., 555 F. Supp. 3d 932, 2021 WL 3675208, at *19 (N.D. Cal. 2021). But at this juncture, the question is whether the plaintiffs have plausibly alleged that the parties would have entered into the cooperative agreement absent this restriction.

The plaintiffs' story goes something like this. Faced with SmileDirectClub's burgeoning competition, Align had two options: shut it down or join forces. Align opted for the latter, crafting the deal in its favor in three ways. First, Align received a new stream of income from SmileDirectClub's purchases of its aligners through the Supply Agreement. Second, Align **[**10]** received referrals from SmileDirectClub, increasing its customer base. And third, Align gave SmileDirectClub a monopoly over the direct-to-consumer market, but took a cut of the monopoly profits through its newly acquired ownership interest in SmileDirectClub. In the plaintiffs' telling, the first two advantages were sufficient to induce Align to collaborate. The third was merely icing on the cake.

Whether the allegations in the complaint adequately support this story—as opposed to being "merely consistent with" it—is a close question, because alternative explanations for Align's conduct are available. Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). For example, Align suggests that its investment in SmileDirectClub was not for the purpose of splitting monopoly profits, but to protect its cooperative enterprise. If SmileDirectClub went under, Align would lose the benefits of the deal—its new income stream and potential referrals. In Align's version of the story, the Operating Agreement was a necessary aspect of the broader cooperative arrangement as it increased the likelihood that SmileDirectClub would be around long enough to benefit Align.

---

[3] The fact that Align and SmileDirectClub structured this deal through two contracts, as opposed to one, does not impact the analysis, as antitrust liability does not hinge on such formalities. The challenged restraint must be considered in the context of the agreement as a whole.

But this story is not fully satisfying either. For one thing, nothing in the complaint suggests **[**11]** that SmileDirectClub was **[*980]** short on cash. It would therefore be inappropriate to make this inference against the plaintiffs at this stage of the proceedings. And the plaintiffs' story is consistent with the underlying power dynamics between Align and SmileDirectClub. Consider it this way: When Align sued SmileDirectClub for patent infringement, Align held all the cards. If it wanted to, it could prevent SmileDirectClub from selling any aligners, to anyone, for the life of its patents. The restrictions on SmileDirectClub therefore make sense and were likely reasonably necessary for the cooperative agreement to take place at all. But the reverse is not true. Given the power imbalance between Align and SmileDirectClub, there was no reason for Align to restrain itself to induce SmileDirectClub to come to the table. The plaintiffs have therefore plausibly alleged that the restriction on Align's ability to sell aligners directly to consumers was not reasonably necessary for the cooperative undertaking.

The plaintiffs' story somewhat teeters on the edge of plausibility. But ultimately, it tips in the plaintiffs' favor. Whether discovery will reveal an alternative explanation for this restriction **[**12]** is, of course, an open question.

D

Finally, the statute of limitations has not run on this claim. "[E]ach time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act." *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)*. This logic applies with equal force here. The plaintiffs plausibly allege that Align and SmileDirectClub entered into a horizontal market allocation agreement that inflated prices in the direct-to-consumer market. The named plaintiff for this claim, Dana Bozian, purchased SmileDirectClub aligners in June 2020—less than one year before this lawsuit was filed. The claim therefore falls well within the four-year statute of limitations period. *15 U.S.C. § 15b*.

III

The remainder of the plaintiffs' claims concern Align's alleged monopolization of the dentist-directed aligner market. Under federal ***antitrust law***, indirect purchasers—those who "are two or more steps removed from the violator in a distribution chain"—cannot recover damages under the *Sherman Act*. *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1520, 203 L. Ed. 2d 802 & n.1 (2019)*; *see* *Illinois Brick Co. v. Illinois, 431 U.S. 720, 746, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Many states have taken a different tack, however, passing so-called "*Illinois Brick* repealer statutes" that clarify that indirect purchasers *may* sue for damages under the state cause of **[**13]** action. *See, e.g.*, *Cal. Bus. & Prof. Code § 16750(a)*; *Conn. Gen. Stat. § 35-46a(1)*.

The plaintiffs allege that Align has unlawfully monopolized the dentist-directed aligner market in violation of *Section 2 of the Sherman Act*. In this market, however, the plaintiffs are indirect purchasers; they purchased aligners from dentists, not Align itself. Their only recourse for damages is therefore under state law. Align has moved to dismiss many of the plaintiffs' state law claims, only one of which will be discussed here: the plaintiffs' claim under California's Cartwright Act. The remaining state law claims are addressed in an accompanying order.

A

Before jumping into the Cartwright Act claim, a brief description of the plaintiffs' remaining allegations is necessary. The plaintiffs allege that Align secured its dominance **[*981]** over the dentist-directed aligner market by tying the sale of its aligners to its scanners—the tool with which dentists create an image of a patient's teeth and jaw that serves as a blueprint for the patient's custom aligners. This scheme was accomplished through three sets of challenged conduct. First, Align terminated an interoperability agreement it had with a rival scanner manufacturer, forcing dentists to use Align's scanner if they wanted to sell Invisalign-brand **[**14]** aligners. Second, Align launched a discount program (the "Fusion Program") through which dentists received a discount on their Align-brand scanner if they committed to making a minimum number of Invisalign orders. Finally, Align entered into multiyear contracts with two dental service organizations (DSOs) in which the DSOs agreed to only work with Align in providing its member dental offices with both scanners and aligners.

In a related lawsuit, a group of dentists sued Align under Section 2 of the Sherman Act for these same allegations. *See* Simon & Simon, 533 F. Supp. 3d 904. The dentists' Section 2 claim survived a motion to dismiss, as the termination of the interoperability agreement "amounts to a section 2 violation on its own." *Id. at 913*. With respect to the Fusion Program and DSO contracts, although they were somewhat "problematic from an antitrust standpoint," they were insufficient to state a claim (even considered together) in the absence of the interoperability agreement. *Id.*

B

California's Cartwright Act declares "every trust . . . unlawful." *Cal. Bus. & Prof. Code § 16726*. An unlawful trust is defined as "a combination . . . by two or more persons" for certain enumerated purposes. *§ 16720*. The Act has therefore been interpreted as mirroring *Section 1 of the Sherman Act* and only addressing concerted action, as opposed to unilateral **[**15]** conduct. *See Free FreeHand Corp. v. Adobe Systems Inc., 852 F. Supp. 2d 1171, 1185 (N.D. Cal. 2012)*; *G.H.I.I. v. MTS, Inc., 147 Cal. App. 3d 256, 266, 195 Cal. Rptr. 211 (Cal. Ct. App. 1983)*. To state a claim under the Cartwright Act, then, the plaintiffs must allege that 1) there was an agreement between two or more entities; and 2) the agreement was an unreasonable restraint of trade. *See Free FreeHand Corp., 852 F. Supp. 2d at 1185*.

The plaintiffs point to three separate actions on the part of Align that they argue constitute concerted, as opposed to merely unilateral, action. First, the plaintiffs argue that the agreement between Align and SmileDirectClub unlawfully "allocated the dentist-directed market to Align." Second, the plaintiffs contend that "Align's termination of the interoperability agreement is actionable under the Cartwright Act because it was done to effectuate" a coercive tying agreement. Finally, the plaintiffs point to Align's exclusive dealing agreements with DSOs.

1. Agreement with SmileDirectClub: Align's agreement with SmileDirectClub can only serve as the basis for a Cartwright Act claim if the plaintiffs plausibly allege that it is an unreasonable restraint of trade. But this argument fails for the same reason the argument concerning the mirror restraint prevailed: Align's patents, Align's rules.

Given Align's patents, it would have been lawful for Align to prevent SmileDirectClub **[**16]** from entering either aligner market. That Align permitted SmileDirectClub to enter one market, even if not both, was therefore procompetitive. And as discussed above, the additional concessions that Align was able to extract from SmileDirectClub were reasonably necessary to **[*982]** achieve the cooperative purpose underlying the agreements. With respect to this aspect of the agreement, then, Align and SmileDirectClub "were cooperating to produce, not to curtail output; the cooperation increased the amount of [aligners] available and was at least potentially beneficial to consumers; [and] the restrictive covenant made the cooperation possible." *Polk Brothers, 776 F.2d at 190*. The restriction on SmileDirectClub's ability to sell aligners to dentists is therefore merely an ancillary restraint on trade, evaluated under the rule of reason. *See id.*

To determine whether a restraint violates the rule of reason, courts "apply a three-step, burden-shifting framework." *Aya Healthcare, 9 F.4th at 1111*. But at the motion to dismiss stage, the focus is on step one: whether the plaintiff has plausibly alleged "that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market." *American Express, 138 S. Ct. at 2284*; *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197-98 (9th Cir. 2012)*. The plaintiffs have not met that burden **[**17]** here. Whether or not Align and SmileDirectClub entered into this agreement, SmileDirectClub would not have been able to enter the dentist-directed market. The restraint on SmileDirectClub's ability to sell aligners through dentists therefore flowed not from the agreement, but from Align's patents.[4]

---

[4] The plaintiffs point out that the restraint on SmileDirectClub's ability to enter the dentist-directed market extended to December 31, 2019, while at least some of Align's patents were set to expire in late 2017. This fact alone is insufficient to plausibly allege

The fact that an agreement "fall[s] within the scope of the exclusionary potential of [a] patent" does not necessarily "immunize the agreement from antitrust attack." *FTC v. Actavis, Inc., 570 U.S. 136, 147, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* (first quoting *FTC v. Watson Pharms., Inc., 677 F.3d 1298, 1312 (11th Cir. 2012)*, *rev'd*, *570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343*). In *Actavis*, the Supreme Court recognized that, in certain limited contexts, a settlement of a patent dispute may violate the antitrust laws, even if the settlement does not exceed the scope of the patent. But the concerns raised in *Actavis* are not present here. *Actavis* concerned the unique context of "reverse payment" settlements—settlements of patent infringement litigation that require "the claimed infringer[] not to produce the patented product until the patent's term expires" in exchange for payment. *Id. at 140*. Such agreements are somewhat suspicious, as "a party with no claim for damages . . . walks away with money simply so it will stay away from the patentee's market." *Id. at 152*. The situation alleged here—a party with a strong claim **[**18]** extracting favorable contract terms from an infringer—does not raise similar concerns of collusion. The aspects of the Supply and Operating Agreements that restrict SmileDirectClub's ability to compete in the dentist-directed market are therefore not cognizable under the antitrust laws and cannot be the concerted action on which the plaintiffs' Cartwright Act claim relies.

2. Termination of Interoperability Agreement: The plaintiffs next argue that Align's unilateral termination of the interoperability **[*983]** agreement resulted in a "combination" in restraint of trade because it roped dentists into its scheme—when Align terminated the interoperability agreement, dentists faced a "*de facto* tying restraint where they had to purchase Trios scanners (the tied product) as a condition for placing orders for Invisaligners (the tying product)."

To begin, the plaintiffs' reliance on Align's termination of the interoperability agreement suffers from a fatal flaw: the named plaintiff for the Cartwright Act class, Cindy Ellis, purchased her aligners prior to Align's termination of the interoperability agreement. Cindy Ellis therefore does not have standing to challenge Align's allegedly unlawful tie.

But **[**19]** substituting in a different plaintiff would not save this claim. In support of their argument that Align's unilateral termination of the interoperability agreement constitutes concerted action, the plaintiffs point to cases in which California courts have held that a "combination" in restraint of trade exists "where a trader uses coercive tactics to impose restraints upon otherwise uncooperative businesses." *G.H.I.I., 147 Cal. App. 3d at 268*. But this "single trader" theory only extends to situations in which the trader pressures the unwilling participant into some sort of agreement, like a pricing arrangement or boycott. *Id.* That logic does not extend to the allegations here. It is true, to some extent, that Align "coerced" dentists to purchase its aligners and scanners by virtue of the alleged tie. But to find the dentists an "unwilling participant" in a "combination" on that basis would virtually erase the Cartwright Act's concerted-action requirement as every sale of goods involves multiple parties. It cannot be that a monopolist conspires with its customers every time they purchase tied products. The dentists here are victims of Align's alleged acts—not co-conspirators. *See, e.g., Free FreeHand Corp., 852 F. Supp. 2d at 1186*.

3. DSO Contracts: Finally, **[**20]** the plaintiffs point to the exclusive-dealing agreements between Align and the DSOs. But as this Court has already held, these agreements do not establish a standalone claim. *See Simon & Simon, 533 F. Supp. 3d at 913*. They therefore cannot be the basis for a Cartwright Act claim.

Because the plaintiffs failed to allege any concerted action, the Cartwright Act claim is dismissed with leave to amend.

* * *

In conclusion, the motion to dismiss the *Section 1* claim is denied and the motion to dismiss the Cartwright Act claim is granted.

---

that the restraint had anticompetitive effects. For one thing, the plaintiffs do not clearly allege when SmileDirectClub would have lawfully been able to enter the dentist-directed market in the absence of this restraint. Further, the plaintiffs have not alleged that any delay resulted in anticompetitive effects, when considered within the context of the broader, procompetitive agreement. After all, this restraint would not have prevented other firms from entering the dentist-directed market upon the expiration of Align's patents.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

HN1[] **Complaints, Requirements for Complaint**

A complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. When faced with two possible explanations for a defendant's conduct, only one of which results in liability, a plaintiff cannot offer allegations that are merely consistent with their favored explanation but are also consistent with the alternative explanation. Something more is needed. The plaintiff must plead facts excluding the possibility that the obvious alternative explanation is true, which requires factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN2[] **Sherman Act, Claims**

A complaint alleging a conspiracy in violation of Section 1 of the Sherman Act must allege that Defendants (1) engaged in a conspiracy, (2) that restrained trade, (3) in the relevant market. The plaintiff must allege an agreement between two or more persons, since unilateral conduct is excluded from the Sherman Act's purview. A conclusory allegation of agreement at some unidentified point is not sufficient to survive a motion to dismiss. Moreover, an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Instead, a plaintiff must plead factual allegations sufficient for the Court to draw a reasonable inference that Defendants made a conscious commitment to a common scheme designed to achieve an unlawful objective.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN3[] **Conspiracy to Monopolize, Elements**

Antitrust law limits the range of permissible inferences from ambiguous evidence in a § 1 of the Sherman Act case. Any conduct that is as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. And an inference of a conspiracy is always unreasonable when it is based solely on parallel behavior that can be explained as the result of the independent business judgment of the defendants.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] **Sherman Act, Claims**

Where a plaintiff's § 1 of the Sherman Act claim relies on alleged parallel conduct, the plaintiff must plead so-called plus factors that are indicative of conspiracy. While there is no exhaustive or finite list of plus factors, some recognized plus factors include: actions that would be against the defendants' self-interest if the defendants were acting independently, but consistent with their self-interest if they were acting in concert; a motive to conspire; opportunities to conspire; market concentration and structure conducive to collusion; pretextual explanations for anticompetitive conduct; sharing of pricing information; signaling among competitors; and other traditional facts suggestive of conspiracy. Plausible factual allegations that tend to demonstrate that the parallel conduct was not in the alleged conspirators' independent self-interest absent an agreement is generally considered the most important plus factor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] **Conspiracy to Monopolize, Elements**

Common attendance at trade association meetings is insufficient to infer a conspiracy in violation of § 1 of the Sherman Act. It is not sufficient to allege simply that some defendants may have conversed with other defendants; there must be factual support that those conversations were for the intent and purpose of reaching an agreement to unreasonably restrain trade.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN6[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Because the *First Amendment* protects the ability of citizens, including businesses, to petition the government, joint efforts to influence public officials do not violate the antitrust laws, even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act. Courts routinely dismiss antitrust complaints seeking to impose liability for conduct covered by Noerr-Pennington.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN7[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Joint efforts by competitors to influence government decision-makers are protected by the Noerr-Pennington doctrine and cannot be a basis for liability.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Torts > ... > Elements > Causation > Intervening Causation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] **Remedies, Damages**

To state an antitrust claim, a plaintiff must plead antitrust standing, which requires establishing 1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit. To satisfy antitrust standing, a plaintiff's injury must be proximately caused by the defendants' conduct. But when the plaintiff's damages are the result of a superseding cause, such as government action or the plaintiff's own decisions, that causal chain is broken, and the plaintiff does not have an actionable claim.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Torts > ... > Contracts > Intentional Interference > Defenses

Torts > ... > Contracts > Intentional Interference > Elements

HN9[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Although the Noerr-Pennington doctrine initially arose in the antitrust field, it is rooted in the First Amendment and therefore courts have readily applied it to other types of claims, such as common-law tortious interference with contractual relations.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN10[] Conspiracy to Monopolize, Sherman Act

SBecause the Texas Free Enterprise and Antitrust Act utilizes the same standards as the Sherman Act for establishing a violation, the Sherman Act analysis applies to a plaintiffs' state law claims as well. Tex. Bus. & Com. Code Ann. § 15.04 provides that the Texas Antitrust Act shall be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Torts > ... > Contracts > Intentional Interference > Elements

HN11[] Remedies, Damages

Where a plaintiff has tied its state law tort claims to asserted antitrust violations, the claims rise and fall together; where the antitrust claims are unsubstantiated, so must be the tortious interference claims.

Opinion

[*589] **MEMORANDUM & ORDER**

On January 27, 2022, the Court **[**2]** held a hearing on Defendants' Motions to Dismiss. Docs. 46, 47. The Court took the motions under advisement and allowed the parties to file supplemental briefing if desired. Plaintiff filed a supplemental memorandum. Doc. 83. Having considered the parties' briefing and oral arguments, the Court now **GRANTS** the Motions to Dismiss for the reasons set forth below.

I. BACKGROUND

A. Alleged Facts

1. JSW

Plaintiffs JSW Steel (USA) Inc. and JSW Steel USA Ohio, Inc. (collectively, "JSW") brought this lawsuit. JSW is a small U.S. manufacturer of finished steel products that owns and operates facilities in Baytown, Texas, and Mingo Junction, Ohio. Compl. ¶ 2. It is part of a steel conglomerate based in India.

This case involves domestically manufactured steel slab—the critical feedstock that JSW and other manufacturers use in the production of their finished products. *Id.* ¶ 44, 53. JSW has certain chemical and metallurgical requirements for the slab it purchases and uses to make high-quality finished steel pipe, plate, and coil products. *Id.* ¶¶ 2, 43. JSW sells the pipe, plate, and coil products for use in critical infrastructure projects, such as natural gas and oil transmission pipelines, shipbuilding, **[**3]** transmission pole towers, wind towers, railroad tank cars, and other heavy equipment industries in the United States. *Id.*

From 2015 until early 2019, JSW enjoyed steadily increasing sales. *Id.* ¶ 60. As a result of this growth, in early 2018, JSW announced and began implementing two significant expansion projects in Baytown and Mingo Junction. First, JSW publicly announced a $500 million investment project at its Baytown facility to build the most technologically advanced and eco-friendly electric arc furnace ("EAF), slab caster, and plate mill in the world. *Id.* ¶ 55-59, 61, 78. The project was designed to transform JSW's Baytown facility into the only melt and manufacture ("M&M") plate mill in the United States with a contiguous pipe mill capable of supplying large diameter welded steel pipe for oil and gas transmission. *Id.* ¶ 61. JSW broke ground on this project in Fall 2018; it had entered into construction and supply contracts and obtained a New Source Review Air Permit from the U.S. Environmental Protection Agency. *Id.* ¶ 62.

Second, JSW announced plans and took steps to ramp up and modernize its Mingo Junction, Ohio, facility, to make hot-rolled coil bands. *Id.* ¶¶ 66, 77. JSW expected **[**4]** **[*590]** significant revenue growth from these projects. *Id.* ¶ 75.

2. Defendants

Defendant Nucor is a Delaware corporation with its principal place of business in North Carolina. It is a leading domestic producer of sheet steel, plate steel, structural steel, bar steel, and steel coils. It operates five sheet mills that produce flat-rolled steel for automotive, appliance, construction, pipe and tube, and other industrial and consumer applications. *Id.* ¶ 34. Nucor currently maintains about 31% market share of domestic steelmaking capacity, making it the second largest manufacturer in the U.S. *Id.* ¶ 49.

Defendant U.S. Steel is a Delaware corporation with its principal place of business in Pennsylvania. It is a fully integrated steel producer with operations in the U.S., Canada, and Europe, where it manufactures semi-finished steel slab that it uses to produce finished steel products, including sheet steel, steel plate, and steel coils. *Id.* ¶ 35. It is the third largest steel producer in the U.S. and maintains about 19% market share of domestic steelmaking capacity. *Id.* ¶ 51.

Defendant AK Steel is a Delaware corporation with its principal place of business in Ohio. It is an integrated producer of **[**5]** flat-rolled carbon, stainless, and electrical steel products, primarily for the automotive, infrastructure and manufacturing, and distributor and converter markets. Around March 13, 2020, AK Steel was acquired by Cleveland-Cliffs Inc. It became a direct, wholly owned subsidiary of Cleveland-Cliffs, operating under the name AK Steel Holding Corporation. *Id.* ¶ 36.

Defendant Cleveland-Cliffs is an Ohio corporation with its principal place of business in Ohio. Cleveland-Cliffs is a fully integrated producer of custom-made iron ore pellets; flat-rolled carbon, stainless, electrical, plate, tinplate and long steel products; and carbon and stainless-steel tubing. *Id.* ¶ 37. With the acquisitions of AK Steel and ArcelorMittal (a major producer not named in this lawsuit and not alleged to have joined in any conspiracy), Cleveland-Cliffs holds approximately 34% market share of domestic steelmaking capacity, making it the largest steel producer in the United States. *Id.* ¶ 52.

Defendants U.S. Steel, AK Steel, and Cleveland-Cliffs are purportedly domestic manufacturers of steel slab in the size and chemistry that is the feedstock for JSW end products. Nucor is also a domestic manufacturer of slab, **[**6]** though Nucor uses that slab as part of its continuous manufacturing process and cannot offload any to customers like JSW. *Id.* ¶ 37.

3. U.S. Steel Tariff Program and Meetings Involving Defendants

JSW does not itself produce steel slab; rather, it must buy slab from other producers to make its finished products. *Id.* ¶ 3. Historically, JSW has imported steel slabs from India, Mexico, and Brazil to support its U.S. operations. *Id.* ¶¶ 81, 94. Tariffs could challenge JSW's ability to benefit from imported slab.

In April 2017, the U.S. Department of Commerce ("Commerce") began investigating the effects of steel imports on U.S. national security pursuant to *Section 232* of the Trade Expansion Act, *19 U.S.C. § 1862*. U.S. Dep't of Commerce, *Notice Request for Public Comments and Public Hearing on Section 232 National Security Investigation of Imports of Steel*, at 1 (Apr. 21, 2017). The investigation concluded that a robust American steel industry is an essential component both of domestic economic viability and national security. U.S. Dep't of Commerce, *The Effect of Imports of Steel on the National Security*, at 1-2, 13, 23 (Jan 11, 2018) (appendix **[*591]** omitted).[1] The Commerce Department further determined that the importation **[**7]** of cheap foreign steel "adversely impact[s] the economic welfare of the [U.S. steel] industry." *Id.* at 27.

Accordingly, on March 1, 2018, then-President Trump announced that the U.S. would impose a 25% tariff on most steel imports. Compl. ¶ 79; *see also 15 C.F.R. Pt. 705, Supp. 1*. "Most of the domestic steel industry"—including JSW—professed "uniform support of the tariffs." Compl. ¶ 83.

Around this time, Defendants (and other domestic steel producers) met with the President, *id.* ¶ 81, the House of Representatives, *id.* ¶¶ 83, 88, and officials in the Department of Commerce, *id.* ¶¶ 90, 91. Plaintiffs suggest that these meetings were at least partly for the purpose of organizing the alleged conspiracy, while Defendants maintain that these meetings were solely to discuss advocacy efforts related to the tariff. For example, on September 6, 2018, representatives from Nucor and U.S. Steel met after Nucor's representative stated: "We spoke with Nazak Nikakhtar [Department of Commerce] a few weeks ago about possible changes to the steel *Section 232* exclusion process. Last Friday she suggested that we also meet with Earl [likely Earl Comstock, Department of Commerce] to discuss this issue. **Ideally, the meeting would be with [**8] both Nucor and U.S. Steel because both**

---

[1] The Court can "take judicial notice of agency records and reports" such as the Commerce Report, which appears in the Federal Register. *See Terrebonne v. Blackburn, 646 F.2d 997, 1000 (5th Cir. 1981)*. Plaintiffs presented no opposition to Defendants' arguments on judicial notice.

companies have been working together." Compl. ¶ 91 (emphasis in original). There is a factual dispute whether the companies were "working together" on issues beyond the tariff on imported steel. On Plaintiffs' information and belief, Defendants have also participated in trade association meetings from 2018 to the present. *Id.* ¶ 92.

As part of the tariff program, the Department of Commerce created a process to exclude from the tariffs any steel product that "could not be sourced domestically." *Id.* ¶ 82. Under this process, an exclusion request may be granted if the Department of Commerce's Bureau of Industry and Security ("BIS") determines that the product to be imported is not domestically available in sufficient quantity and quality. *15 C.F.R. Pt. 705, Supp. 1 (c)(6)*.

Domestic steel producers can object to a tariff exclusion request if they can demonstrate that the product to be imported is available domestically. *Id.* ¶ 82; *see also* *15 C.F.R. Pt. 705, Supp. 1 (d)(4)*. These regulations do not require objectors to demonstrate that the steel product available domestically "be identical," but only that it "be equivalent as a substitute product." *15 C.F.R. Pt. 705, Supp. 1 ¶ (c)(6)(ii)*. Objections to an exclusion request must be submitted within a 30-day **[**9]** public comment period. *Id.* at ¶ (d)(3). From there, both the importer and objector(s) are afforded a final opportunity to respond through a rebuttal process. *Id.* at ¶¶ (f)(4), (g)(4). Then, BIS alone determines whether to grant or deny the request. *Id.* at ¶ (c)(6).

If an exclusion request is denied, but it later comes to light that the product was not, in fact, available domestically, then the importer may submit a new exclusion request that refers to the original request. *Id.* at ¶¶ (c)(6)(i), (ii).

Congress has vested "exclusive jurisdiction" in the U.S. Court of International **[*592]** Trade to hear challenges to "tariffs, duties, fees, or other taxes on the importation of merchandise for reasons other than the raising of revenue," including the *Section 232* tariffs and denials of exclusion requests. *28 U.S.C. § 1581(i)(1)(B)*; *see* *Commodities Exp. Co. v. U.S. Customs Serv., 957 F.2d 223, 227 (6th Cir. 1992)* ("Congress invested the CIT with exclusive jurisdiction over a wide range of trade matters encompassing complex regulatory schemes in order to allocate power between the CIT and the district courts"). The CIT and Federal Circuit, which hears appeals from the CIT, have upheld Government actions under *Section 232* against various challenges. *See* *American Inst. for Int'l Steel, Inc. v. United States, 806 F. Appx. 982 (Fed. Cir. 2020)* (rejecting constitutional challenge to *Section 232* tariffs); *Transpacific Steel LLC v. United States, 4 F.4th 1306, 2021 WL 2932512, at *1333 (Fed. Cir. July 13, 2021)* (rejecting challenge to **[**10]** temporary increased tariff on steel from Turkey).

4. JSW's 2018 Tariff Exclusion Requests

JSW alleges that, "due to quotas and other limitations on quantity, and to significant tariffs imposed beginning in 2018, imports were not available in the quantity JSW requested." *Id.* ¶ 3. "Anticipat[ing] that it would need a temporary tariff exemption," in the spring of 2018 JSW filed exclusion requests for imported slab under the Commerce regulations described above. *Id.* ¶ 93. Domestic steel companies thus had 30 days to object. *15 C.F.R. Pt. 705, Supp. 1 § (d)(3)*.

Nucor, a U.S.-based steel producer, filed objections to JSW's requests for exclusions from the national security tariffs on May 31, 2018, and again on August 30, 2018. Compl. ¶¶ 90, 99, 100; Doc. 45, Exh. B-C.[2] While Nucor makes slab at its steel mills, Nucor consumes that slab internally in its production of finished steel products; as mentioned above, JSW alleges that Nucor does not "offload [its slab] to customers like JSW." Compl. ¶ 38. Although Nucor's objections did not represent that Nucor itself could supply JSW with domestically produced slab, Nucor cited publicly available data[3] to support its position that "adequate supplies of slab . . . are readily

---

[2] The Court can consider JSW's exclusion requests and Defendants' related filings because they are "referred to in the plaintiff's complaint and ware central to [its] claim[s]." *Collins v. Morgan Stanley Dean Witter, 224 F.3d 496, 498-99 (5th Cir. 2000)* (quotation omitted). Plaintiffs presented no opposition to Defendants' arguments on judicial notice.

[3] In support of its objection, Nucor cited: (1) JSW's own exclusion request writing; (2) trade association data; (3) public information that various manufacturers, including U.S. Steel and ArcelorMittal, had idled or under-utilized facilities that could

available **[**11]** from both domestic sources and from countries exempted from the Section 232 tariffs." Doc. 45, Exh. B, at 1; Doc. 45, Exh. C, at 1.

JSW alleges that U.S. Steel and AK Steel also filed objections to JSW's slab exclusion requests on roughly the same 30-day timetable set by the Commerce regulations. Compl. ¶¶ 93-98.[4] JSW alleges that—unlike Nucor—U.S. Steel and AK Steel asserted in their objections that they themselves could, and would be willing to, supply JSW's slab needs. *Id.* ¶¶ 93-98

In response, JSW submitted rebuttals arguing that AK Steel and U.S. Steel could not produce slabs to the technical specifications **[*593]** or dimensions that JSW requested. Nucor and U.S. Steel then filed sur-rebuttals pointing out domestic availability of the specified slabs, including acceptable substitute products. *See, e.g.*, Doc. 46, Exh. H, *[U.S. Steel's] Sur-rebuttal and Supplement to Objection Filed Against Excl. Req. 1227* (clarifying that JSW's exclusion requests were not for 12" slab, but for the range of 275 mm to 310 mm, which U.S. Steel could supply). AK Steel did not submit a sur-rebuttal.

In April and May 2019, after considering the full record of information submitted both by JSW and by Defendants, BIS formally **[**12]** denied each of JSW's 12 exclusion requests in separate decision memoranda. *See, e.g.*, Doc. 46, Exh. I, *BIS Decision Document—Excl. Req. 1227*. For each request, BIS concluded that the requested steel slab "[wa]s produced in the United States in a sufficient and reasonably available amount and of a satisfactory quality" and "that no overriding national security concerns require[d] that th[e] exclusion request be granted." *Id.; see* Compl. ¶ 107.

5. JSW's "Firm Inquiries" to Purchase Domestic Slab

After JSW's exclusion requests were denied, JSW contacted AK Steel and U.S. Steel in May 2019 with "firm inquiries" to purchase steel slab. Compl. ¶ 107. On May 8, 2019, JSW sent AK Steel a firm inquiry for a large purchase of 30,000 tons of 10- to 12-inch-thick continuous cast carbon slab. *Id.* ¶¶ 110-111, 115. Upon receiving JSW's inquiry, AK Steel requested that JSW establish its creditworthiness by providing either financial statements or a standby letter of credit written on a U.S. bank. *Id.* ¶¶ 111-112. JSW refused, offering instead to supply a documentary letter of credit. *Id.* AK Steel nonetheless reviewed JSW's proposal and provided preliminary feedback to JSW, offering to sell it the slab **[**13]** subject to JSW's acceptance of certain technical exceptions and a credit check. JSW ended the discussions based on its allegation that "the exception sheet ran contrary to AK Steel's certified statements that it 'has the ability to produce' the projects subject to JSW's exemption requests—including to the sizes and exacting chemistries that JSW required." *Id.* ¶¶ 113-114. JSW alleges that AK Steel rendered any transaction impossible by erecting pretextual creditworthiness requirements and seeking significant deviations from JSW's requested chemistries and sizes; JSW maintains, on information and belief, that this conduct constituted a refusal to deal based on a conspiracy. *Id.* ¶¶ 116.

JSW's interactions with U.S. Steel followed a similar pattern. On May 8, 2019—the same day JSW initially contacted AK Steel—JSW also sent U.S. Steel a firm inquiry to purchase nearly 30,000 tons of 10-12 inch thick continuously cast carbon steel slab. *Id.* ¶ 115. Robert Oster from U.S. Steel informed JSW that it would need to provide evidence of JSW's creditworthiness. *Id.* ¶ 116. The same day, U.S. Steel credit department sent JSW a list of the information it needed to complete the credit check. *Id.* JSW **[**14]** never provided the information, nor does it allege that it attempted to comply with the request. *Id.* U.S. Steel nonetheless reviewed the technical specifications that JSW requested. *Id.* ¶ 117. U.S. Steel told JSW that it could produce the steel slab that JSW wanted with a few technical "deviations" after JSW produced evidence of its creditworthiness. *Id.* JSW does not allege that it responded to U.S. Steel's proposal. *Id.*

---

make slab; and (4) a U.S. Transportation Department determination of "adequate capacity for the U.S. steel industry to meet a demand for semi-finished steel slab if the market price is adequate." Doc. 45, Exh. B, at 1-3; *id.*, Exh. C, at 2-3.

[4] JSW alleges that AK Steel filed on May 29, 2018, two days before the deadline (when U.S. Steel filed). Compl. ¶ 94.

In April 2021, U.S. Steel reached back out to JSW to explain that U.S. Steel planned to start an EAF and steel slab caster at its Fairfield, Alabama, facility. *Id.* at ¶ 145; Doc. 46 at 15. U.S. Steel inquired whether it could source steel for JSW from **[*594]** that new facility. *Id.* JSW does not allege that it responded to this offer. *Id.*

6. JSW's Appeal of Commerce's Decisions on Its 2018 Exclusion Requests

On July 30, 2019, JSW filed a complaint in the Court of International Trade challenging BIS's denial of its 2018 exclusion requests. Compl., July 30, 2019, ECF No. 2, *JSW Steel (USA) Inc. v. United States*, No. 1:19-00133, slip op. 20-111 (Ct. Int'l Trade Aug. 5, 2020).[5] JSW argued that the denials were "arbitrary, capricious, and an abuse of discretion"; it alleged that BIS **[**15]** "undertook no efforts to verify [Defendants' objections]" and "ignored the conclusive evidence that these companies [were] unable to produce the subject products in the required quantity or quality." *Id.* ¶ 8. The Court of International Trade remanded the decisions to BIS for reconsideration. *JSW Steel*, No. 1:19-00133, slip op. 20-111 at 2-3.

On September 21, 2020, JSW and the Commerce Department resolved the dispute through a stipulated judgment. Stip. J., Sept. 18, 2020, ECF No. 103, *JSW Steel (USA) Inc.*, No. 1:19-00133. Among other provisions, Commerce refunded an undisclosed amount of the tariffs paid by JSW "as a full and complete settlement of all claims subject to this action." *Id.* ¶¶ 6-7.

7. The Parties' Financial Performance

JSW alleges that its upward financial trajectory came to a halt because of Defendants' boycott. *Id.* ¶ 119. Its slab acquisition and overall manufacturing costs increased dramatically, as it was forced to slow its production and pay more for imported slab. *Id.* JSW Baytown's sales revenue dropped by over 25%—over $100 million—in the fiscal year ending in March 2020 compared to the prior year. The following fiscal year, Baytown's overall sales revenue fell by **[**16]** over 65% compared to 2019. *Id.* ¶ 121. The company stopped its Baytown expansion project, terminating contracts into which it had already entered, resulting in termination fees of $20 million. *Id.* ¶ 125.

Meanwhile, Defendants have recently enjoyed strong financial performance:

- Nucor reported "record earnings" in 2018 and "record operating cash flow of approximately $2.8 billion" in 2019. *Id.* ¶ 136. In 2020, Nucor reported that it "set record[s] for profitability." *Id.* For the first quarter of 2021, the company reported its "best quarter in Nucor's history." *Id.* It had announced a plan to build its own state-of-the-art steel plate mill, which JSW alleges is strikingly similar to the mill JSW had to abandon. *Id.* ¶ *137*.

- In 2018, AK Steel reported having the company's "best year in a decade." *Id.* ¶ 133. Following its acquisition of AK Steel and ArcelorMittal USA, Cleveland-Cliffs reported earnings up 158% from the previous year. *Id.* ¶ 134.

- In the first quarter of 2021, Cleveland-Cliffs announced profits of $513 million, representing a 79% increase over the previous quarter, while projecting a nearly 200% rise in profit to $1.2 billion in the second quarter of 2021. *Id.*

- U.S. Steel reported **[**17]** its "strongest performance since 2008" for fiscal **[*595]** year ending December 31, 2018. *Id.* ¶ 135.

8. JSW's 2021 Tariff Exclusion Requests

---

[5] The Court "may take judicial notice of a 'document filed in another court . . . to establish the fact of such litigation and related filings.'" *Taylor v. Charter Med. Corp., 162 F.3d 827, 830 (5th Cir. 1998)* (citation omitted). Plaintiffs presented no opposition to Defendants' arguments on judicial notice.

JSW filed 83 additional exclusion requests in March and April 2021, this time for steel slab imported from Brazil and India. Compl. ¶ 141. JSW claimed in its new requests that it had been unsuccessful in purchasing steel slab from AK Steel and U.S. Steel in 2019. *Id.*

U.S. Steel, Nucor, and now Cleveland-Cliffs objected to JSW's new exclusion requests. *Id.* ¶¶ 142-143. BIS has granted all 83 exclusion requests over Defendants' objections. *See* U.S. Dep't of Commerce Website, Section 232 Steel and Aluminum, Published Exclusion Requests filtered to JSW Steel (USA) Inc., https://232app.azurewebsites.net/ (status "Granted" for each of JSW's 83 exclusion requests). BIS's decision memoranda included an analysis conducted by a Commerce Department subject matter expert, who determined that both Cliffs and U.S. Steel produce slabs of sufficient weight and with sufficient chemical and dimensional properties for JSW's needs. *See, e.g.*, Doc. 46, Exh. J, BIS Decision Document—Excl. Req. 89352. Nevertheless, the exclusions were granted on the basis that Cleveland-Cliffs and **[**18]** U.S. Steel did not address a standard cited in JSW's request. *Id.*

B. Procedural History

JSW filed this Complaint on June 8, 2021, alleging that Defendants (1) violated *Sherman Act § 1* and *Clayton Act § 4*; (2) violated the Texas Free Enterprise and Antitrust Act, *Tex. Bus. & Com. Code Ann § 15.01 et seq.*; (3) engaged in civil conspiracy in violation of Texas state law; (4) tortiously interfered with existing contracts; and (5) tortiously interfered with prospective business relationships.

The now-pending motions to dismiss (one filed Nucor, another filed by the remaining Defendants) were filed on August 17, 2021.

Amid briefing on the motions to dismiss, Defendants filed a Motion to Stay Discovery Pending the Motions to Dismiss; the Court granted this motion on December 7, 2021.

The Court held a hearing on the motions to dismiss on January 27, 2022. Plaintiff subsequently filed supplemental briefing.

II. MOTIONS TO DISMISS

a. Legal Standards

1. MTD

HN1[] "[A] complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). When faced with two possible explanations for a defendant's conduct, only one of which results in liability, a plaintiff cannot offer allegations that are "merely consistent **[**19]** with" their favored explanation but are also consistent with the alternative explanation. *Twombly, 550 U.S. at 557*. "[S]omething more" is needed. *Id. at 560*. The plaintiff must plead facts excluding the possibility that the "obvious alternative explanation" is true, *id. at 567*, which requires "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*.

2. Sherman Act § 1 Claims Based on Alleged Parallel Conduct

HN2[] A complaint alleging a conspiracy in violation of *Section 1 of the Sherman Act* **[*596]** must allege that Defendants (1) engaged in a conspiracy, (2) that restrained trade, (3) in the relevant market. *Apani Sw., Inc. v.*

Coca-Cola Enters., Inc., 300 F.3d 620, 627 (5th Cir. 2002). JSW must allege an agreement between two or more persons, since "unilateral conduct is excluded from [the Sherman Act's] purview." Johnson v. Hosp. Corp. of Am., 95 F.3d 383, 392 (5th Cir. 1996). A "conclusory allegation of agreement at some unidentified point" is not sufficient to survive a motion to dismiss. Twombly, 550 U.S. at 557.

Moreover, "an allegation of parallel conduct and a bare assertion of conspiracy will not suffice." Id. at 556. Instead, a plaintiff must plead factual allegations sufficient for the Court to draw a reasonable inference that Defendants made a "conscious commitment to a common scheme designed to achieve an unlawful objective." Marucci Sports, L.L.C. v. NCAA, 751 F.3d 368, 373-74 (5th Cir. 2014) (quotation omitted); *see also* Abraham & Veneklasen v. Am. Quarter Horse Ass'n ("A&V"), 776 F.3d 321, 330 (5th Cir. 2015) (agreement requires **[**20]** a "common design and understanding, or a meeting of the minds in an unlawful arrangement") (citation omitted).

HN3[] Moreover, "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a § 1 case." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). "Any conduct that is as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." A&V, 776 F.3d at 331 (citation omitted). And an "inference of a conspiracy is always unreasonable when it is based solely on parallel behavior that can be explained as the result of the independent business judgment of the defendants." Southway Theatres, Inc. v. Georgia Theatre Co., 672 F.2d 485, 494 (5th Cir. 1982) (emphasis added).

HN4[] Because JSW's § 1 claim relies on alleged parallel conduct, JSW must plead so-called "plus factors" that are indicative of conspiracy. In re Pool Products Distrib. Market Antitrust Litig., 988 F. Supp. 2d 696, 711 (E.D. La. 2013) (citing cases). While there is no exhaustive or finite list of plus factors, some recognized plus factors include: actions that would be against the defendants' self-interest if the defendants were acting independently, but consistent with their self-interest if they were acting in concert; a motive to conspire; opportunities to conspire; market concentration and structure conducive to collusion; pretextual explanations for anticompetitive conduct; **[**21]** sharing of pricing information; signaling among competitors; and other traditional facts suggestive of conspiracy. Id., 988 F. Supp. 2d at 711. Plausible factual allegations that tend to demonstrate "that the parallel conduct was not in the alleged conspirators' independent self-interest absent an agreement is generally considered the most important 'plus factor.'" *Id.* (citations omitted).

b. Nucor's Motion to Dismiss

Nucor argues that: (1) JSW fails to allege that Nucor entered into an agreement restraining trade; (2) JSW's claims are barred by the *Noerr-Pennington* doctrine (described below); (3) JSW does not allege an antitrust injury; and (4) the state law claims should be dismissed for lack of personal jurisdiction and failure to state viable claims for relief.

1. Whether Nucor plausibly entered into an agreement restraining trade

Nucor argues that Plaintiff's Sherman Act § 1 claim must fail because **[*597]** there is no "agreement" between multiple parties. Nucor asserts that JSW fails to allege any actual conduct or inaction by Nucor that could support an inference of an illegal agreement. The only allegations about Nucor's conduct relate to its petitioning activities in support of the Section 232 national security tariffs and against unfounded **[**22]** exclusion requests. JSW never alleges that it reached out to Nucor to inquire about purchasing of domestic slab; rather, it admits that Nucor's operations are not set up to "offload [slab] to customers like JSW." Compl. ¶ 38.

In opposition, JSW points to its allegation that Nucor was receiving confidential information from the other Defendants, which it could only have done if they were illegally conspiring. *Id.* ¶ 102 ("Upon information and belief, given the proprietary nature of AK Steel and U.S. Steel's product, pricing, and production capabilities, Nucor would have no way of knowing at what prices and in what quantities U.S. Steel and AK Steel would or would not have been able to sell slab to JSW absent consultation and/or coordination with them."). The Court agrees with Nucor's assertion that JSW mischaracterizes its objection, which was based on public, rather than proprietary, information about the collective capabilities of the domestic industry in the aggregate (*see* Sec. I(A)).

JSW also notes the closeness in time between Nucor's objection submissions and those of U.S. Steel and AK Steel. *Id.* ¶¶ 93 ("***simultaneously proclaimed***"), 95 ("***two days later***"; "simultaneous August 30, **[**23]** 2018 statements by U.S. Steel and Nucor"), 99 ("on the same day"), 103 ("***within the span of two days***"; "on the ***exact same day***") (all emphases in original). The Court finds this argument similarly unavailing. The Commerce regulations governing the adjudication of exclusion requests imposed a 30-day deadline on such objections. *15 C.F.R. Pt. 705, Supp. 1 § (d)(3)*. It is unremarkable that all objectors filed on or around the deadline.

Nucor also attacks JSW's suggestion that trade association meetings attended by Defendants' executives over a two-year period presented an opportunity to conspire. ***HN5***[] However, common attendance at trade association meetings is insufficient to infer a conspiracy. *See, e.g., In re Travel Agent Comm'n Antitrust Litig., 583 F.3d 896, 910-11 (6th Cir. 2009)*; *In re Online Travel Co. (OTC) Hotel Booking Antitrust Litig., 997 F. Supp. 2d 526, 541-42 (N.D. Tex. 2014)*. It is not sufficient to allege simply that some defendants may have "conversed with other defendants"; there must be "factual support that those conversations were for the intent and purpose of reaching an agreement to unreasonably restrain trade." *Haygood v. Begue, 2016 U.S. Dist. LEXIS 34354, 2016 WL 1069685, at *6 (W.D. La. Mar. 16, 2016)*. Nucor argues that JSW fails to provide such factual support.

The Court concludes that JSW has failed plausibly to allege that Nucor entered into a conspiratorial agreement in violation of *Sherman Act § 1*. JSW fails to offer factual allegations that would reasonably substantiate an inference **[**24]** of conspiracy. For this reason alone, the Court must dismiss the *Sherman Act* claim. Nonetheless, the Court continues to Nucor's arguments regarding the *Noerr-Pennington* doctrine and antitrust injury, which provide additional and alternative grounds for dismissal of the *Sherman Act* claim against Nucor.

2. Whether JSW's claims are barred by the Noerr-Pennington *doctrine*

Nucor argues that, to the extent JSW alleges parallel conduct by Nucor at all, it alleges parallel *petitioning* conduct that is protected by the *Noerr-Pennington* **[*598]** doctrine. ***HN6***[] Because the *First Amendment* protects the ability of citizens, including businesses, to petition the government, "[j]oint efforts to influence public officials do not violate the antitrust laws, even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as part of a broader scheme itself violative of the *Sherman Act*." *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *see also E.R.R. Pres. Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *accord Bayou Fleet, Inc. v. Alexander, 234 F.3d 852, 861 (5th Cir. 2000)*; *Video Int'l Prod., Inc. v. Warner-Amex Cable Comm'cns, Inc., 858 F.2d 1075, 1082 (5th Cir. 1988)*; *Coastal States Mktg., Inc. v. Hunt, 694 F.2d 1358 (5th Cir. 1983)*. Courts routinely dismiss antitrust complaints seeking to impose liability for conduct covered by *Noerr-Pennington. See, e.g., Tricon Precast, Ltd. v. Easi Set Indus., Inc., 395 F. Supp. 3d 871, 884 (S.D. Tex. 2019)*; *id. at 884 n.2* (collecting cases).

As discussed above, the only conduct by Nucor alleged in the Complaint involves (a) Nucor's public advocacy relating to the *Section 232* national security tariffs, and (b) objections Nucor **[**25]** filed with Commerce to oppose JSW's exclusion requests. JSW repeatedly emphasizes an email mentioning Nucor and U.S. Steel "***working together***," which JSW calls an "admission" making Nucor the "ringleader" of the conspiracy. Compl. ¶ 5 (emphasis in original), Heading VII (p. 27), 86, 91. However, a more reasonable reading of the full quotation indicates that what Nucor and U.S. Steel were "working together" on was advocacy to Commerce about "possible changes to the steel Section 232 process." Compl. ¶ 91; Doc. 45, Exh. A.[6] The email's purpose was to schedule a meeting between

---

[6] The Court can go outside the four corners of the Complaint to consider the email exchange because it is "referred to in the plaintiff's complaint and [is] central to [its] claim[s]." *Collins v. Morgan Stanley Dean Witter, 224 F.3d 496, 498-99 (5th Cir. 2000)* (quotation omitted).

Commerce, Nucor, and U.S. Steel to discuss those changes. Doc. 45, Exh. A. Nucor argues that this is classic *Noerr-Pennington* conduct.

Nucor asserts that the doctrine similarly applies to the White House "face-to-face meeting and press conference with then-President Trump," Compl. ¶ 87; CEOs' joint appearances "before the Congressional Steel Caucus," *id.* ¶ 88; and the exclusion objection filings, *id.* ¶¶ 85, 93-106, 140-44. ***HN7***[] Joint efforts by competitors to influence government decision-makers are protected by the *Noerr-Pennington* doctrine and cannot be a basis for liability.

In its Response, JSW counters that *Noerr-Pennington* ***[**26]*** does not apply under these circumstances. According to JSW, it alleged an illegal conspiracy to boycott JSW and refuse to sell it domestic slab. JSW emphasizes that the Complaint does not allege that Defendants lobbied Congress or petitioned the Commerce Department for any government decision regarding domestic slab.

The Court, however, finds that JSW's (seemingly revised) position appears irreconcilable with the fact that the only conduct by Nucor alleged in the Complaint involves Nucor's petitioning activities. *See, e.g., id.* ¶¶ 87 (alleging Nucor CEO attended White House meeting in support of tariffs), 88 (alleging Nucor CEO gave congressional testimony supporting tariffs), 91 (referencing email about setting up joint industry meeting with Commerce to discuss changes to the *Section 232* exclusion process).

[*599] The Court further finds that, under these circumstances, the topics of foreign steel and domestic steel are inextricably interwoven. The tariffs' purpose was to stem the national security threat posed by unfairly traded imports to domestic steel production. Procl. of Mar. 8, 2018, *83 Fed. Reg. 11625 (Mar. 15, 2018)*. And the touchstone for exclusion requests is whether the product is "produced in the United States in a sufficient **[**27]** and reasonably available amount" and "satisfactory quality." *15 C.F.R. pt. 705, Supp. 1 § (c)(5)*. With respect to Nucor, JSW focuses on Nucor's statements about domestic availability of domestic slab, as made in a slab exclusion objection addressed to Commerce. Compl. ¶¶ 94, 95, 99, 100, 102. Thus, JSW's attempt to avoid *Noerr-Pennington* by characterizing Nucor's petitioning of the Government as unrelated to domestic slab is unconvincing.

JSW's other argument—that it is premature at the MTD stage for the court to consider the applicability of *Noerr-Pennington*—is similarly unavailing. In the cases cited by JSW, the plaintiffs invoked the "sham" exception to *Noerr-Pennington*, creating fact-bound issues. *See Pro. Real Est. Invs., Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (outlining narrow "sham" exception). In this case, by contrast, JSW does not invoke the sham exception. *See* Doc. 45, at 19 n.12 (pointing out lack of sham allegations); Doc. 51, at 28-29 (no sham argument in JSW's opposition). Nor could it. Nucor's petitioning was successful, and "successful effort[s] to influence governmental action . . . cannot be characterized as a sham." *Tricon, 395 F. Supp. 3d at 885-86* (quotation marks omitted); *Bayou Fleet, 234 F.3d at 862*.

Accordingly, the Court concludes that the *Sherman Act* claim should be dismissed based additionally and independently on the **[**28]** Noerr-Pennington doctrine.

3. Whether JSW alleges a cognizable antitrust injury

HN8[] To state an antitrust claim, a plaintiff must plead antitrust standing, which requires establishing "1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit." *Sanger Ins. Agency v. HUB Int'l, Ltd., 802 F.3d 732, 737 (5th Cir. 2015)*. To satisfy antitrust standing, a plaintiff's injury must be proximately caused by the defendants' conduct. *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. All., Inc., 123 F.3d 301, 305 (5th Cir. 1997)*. But when the plaintiff's damages are the result of a superseding cause, such as government action or the plaintiff's own decisions, that causal chain is broken, and the plaintiff does not have an actionable claim. *See* 1 Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 2.02[C] at 166 (4th ed. 2018).

Nucor argues that JSW's alleged injuries stem fundamentally from the U.S. Government's national security tariffs and its (initial) refusal to exempt JSW from those tariffs—not from any antitrust violation. To help illustrate why dismissal is appropriate under these circumstances, Nucor—like the other Defendants—cites *In re Canadian Import Antitrust Litigation, 470 F.3d 785, 791 (8th Cir. 2006)*, where individuals **[**29]** who wanted to import cheaper prescription drugs from Canada alleged that major pharmaceutical companies "unlawfully conspired to suppress the importation" of such drugs by engaging in group boycotts and other anticompetitive conduct. *Id. at 787-88*. The fatal flaw in those claims was that such importation was prohibited by FDA. The plaintiffs in **[*600]** that case argued that "they nonetheless may pursue an action under the federal antitrust laws based on the defendants' allegedly anti-competitive behavior." *Id. at 791*. The court rejected that argument because plaintiffs' "inability to import less expensive drugs distributed by Canadian pharmacies" did not constitute antitrust injury. *Id.* Rather, the alleged injury was "caused by the federal statutory and regulatory scheme adopted by the United States government, not by the conduct of the defendants." *Id.; see also* *Pennington, 381 U.S. at 671* (holding that plaintiff "could not collect any damages under the *Sherman Act* for any injury which it suffered from the action of the Secretary of Labor*");* *RSA Media, Inc. v. AK Media Grp., 260 F.3d 10, 15 (1st Cir. 2001)*; *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187, 219-20. (2d Cir. 2005)*.

Here, as in *In re Canadian Import Antitrust Litigation*, "private parties may have influenced or persuaded the government to act, but the government's decision to act reflects an independent governmental choice, **[**30]** constituting a supervening 'cause' that breaks the link between a private party's request and the plaintiffs injury." Areeda & Hovenkamp, ***Antitrust Law***, ¶ 202[C], at 166.

Nucor further notes that enforcement of the antitrust injury requirement here does not deprive it of a remedy. First, the Commerce regulations provide that if a representation by an objector that it can timely supply domestic steel is shown to be inaccurate, the exclusion applicant is encouraged to refile and bring that information to Commerce's attention. After JSW allegedly was not able to procure domestic slabs in 2019, JSW utilized the remedy in 2021 by filing new exclusion requests and "explicitly detail[ing]" its 2019 experiences; those exclusion requests were all granted (*see* Sec. I(A)).

Second, Nucor points out that JSW already brought a lawsuit challenging the same denials of its 2019 exclusion requests, using the same arguments it does here. It brought that other lawsuit in the Court of International Trade, which JSW admitted has "exclusive jurisdiction" over challenges to "tariffs, duties, fees, or other taxes on the importation of merchandise for reasons other than the raising of revenue." Doc. 45, Exh. **[**31]** D ¶ 9 (quoting *28 U.S.C. § 1581(i)(1)(B)*). After over a year of litigation in the CIT, JSW settled that lawsuit with prejudice, securing some of the slab exclusions it sought, withdrawing others, obtaining refunds of some of the same tariff payments it now seeks as damages in this case, and waiving its right to further "challenge, or to make any claim with respect to or arising from the [2018] exclusion requests." Doc. 45, Exh. E ¶ 9 (emphasis added). Any further recovery by JSW would be duplicative, Nucor argues.

In its Response, JSW argues that it in fact suffered significant antitrust injury due to Defendants' conspiracy. The conspiracy, it argues, cut it off from domestic slab, which caused its acquisition and overall manufacturing costs to increase dramatically and forced it to stop its Baytown expansion project.

JSW argument is unavailing. First, Nucor's position is the more reasonable: the federal government made tariffs on *imported* slab more expensive to promote domestic slab production capacity. Because JSW imported much of its slab, its costs necessarily rose. Defendants, on the other hand, produce slab domestically, so they were *intended* to benefit from the tariffs, as reflected in their record-breaking **[**32]** profits. And in any event, again, JSW never alleges that Nucor refused to sell it domestic slab, and it has not plausibly alleged facts from which the Court can infer an illegal agreement between Nucor and the **[*601]** other Defendants regarding a refusal to deal. None of Nucor's actions can be plausibly linked to Plaintiff's alleged antitrust injury.

Therefore, Plaintiff's failure to plausibly allege antitrust injury additionally and independently requires dismissal of the *Sherman Act* claim.

4. Whether JSW's state law claims do not state viable claims for relief

Nucor, unlike the other Defendants, argues that the Court lacks personal jurisdiction over Nucor with respect to JSW's state-law claims. The Court need not parse this question because, even if the Court concluded it had jurisdiction, the state-law claims must fail for the following reasons, which apply equally to all Defendants:

First, the *Noerr*-*Pennington* doctrine applies to JSW's state-law claims just the same as it does to JSW's federal claim. That doctrine similarly bars the state-law claims as well. ***HN9***[] "[A]lthough the *Noerr-Pennington* doctrine initially arose in the antitrust field," it is rooted in the *First Amendment* and therefore courts have readily applied **[**33]** it to other types of claims, such as "common-law tortious interference with contractual relations." *Video Int'l Prod., Inc. v. Warner-Amex Cable Communications, Inc., 858 F.2d 1075, 1084 (5th Cir.1988)*, *cert. denied*, *491 U.S. 906, 109 S. Ct. 3189, 105 L. Ed. 2d 697 (1989)*; *see also Tricon, 395 F. Supp 3d at 886* (Texas Antitrust Act); *RRR Farms, Ltd. v. Am. Horse Prot. Ass'n, Inc., 957 S.W.2d 121, 128 (Tex. App. 1997)* (civil conspiracy).

HN10[] Second, "[b]ecause the Texas Free Enterprise and Antitrust Act utilizes the same standards as the *Sherman Act* for establishing a violation, the *Sherman Act* analysis applies to Plaintiffs' state law claims as well." *A&V, 776 F.3d at 325 n.1*; *see Tex. Bus. & Com. Code Ann. § 15.04* (Texas Antitrust Act "shall be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes"); *Tricon, 395 F. Supp. 3d at 882*. Therefore, the same defects that require dismissal of JSW's Sherman Act claim—lack of plausible allegations of conspiracy, *Noerr-Pennington*, and lack of antitrust injury and causation—equally compel dismissal of the Texas antitrust claim.

Third, JSW's civil conspiracy and tortious interference counts must also be dismissed because these claims require an "independently tortious or unlawful" act by Nucor, which JSW has failed to plead. *See MMR Int'l Ltd. v. Waller Marine, Inc., 2013 U.S. Dist. LEXIS 103342, 2013 WL 3864271, at *5 (S.D. Tex. July 24, 2013)* ("A plaintiff must prove another substantive tort on which to base a civil conspiracy claim.") (citing *Tilton v. Marshall, 925 S.W.2d 672, 681 (Tex. 1996)*); *Wal-Mart Stores, Inc. v. Sturges, 52 S.W.3d 711, 713 (Tex. 2001)* (tortious interference with business expectancy requires "conduct that was either independently tortious or unlawful"). ***HN11***[] Further, where, as here, **[**34]** a plaintiff has "tied [its] state law claims to the asserted antitrust violations," the "claims rise and fall together"; "as the antitrust claims are unsubstantiated, so must be the tortious interference claims." *Stewart Glass & Mirror, Inc. v. US Auto Glass Discount Ctrs., 200 F.3d 307, 316 (5th Cir. 2000)*.

Fourth, JSW's tortious interference claims must also be dismissed because JSW has not plausibly alleged that Defendants knew any specific information about JSW's contracts or prospective business relations. *See Mark III Sys., Inc. v. Sysco Corp., 2007 Tex. App. LEXIS 1339, 2007 WL 529960, at *5 (Tex. App. Feb. 22, 2007)* (requiring "knowledge of the contract or relation" and "of the fact that [defendant] is interfering with the performance of that contract"); *Frost Nat'l Bank v. Alamo Nat'l Bank, 421 S.W.2d 153, 156* ***[*602]*** *(Tex. App. 1967)* (actual knowledge required; mere notice insufficient). JSW offers only conclusory statements that JSW's contracts "were a matter of public knowledge" and that "Defendants" as a group were "aware" of those contracts. *Id.* ¶ 170. For these reasons, the Court must dismiss the state-law claims, along with the *Sherman Act* claim, against Nucor. Nucor's motions to dismiss is **GRANTED**.

c. U.S. Steel, AK Steel, and Cleveland-Cliffs, Inc.'s Joint Motion to Dismiss

The discussion above supporting dismissal as to the claims against Nucor generally apply to the claims against the other Defendants as well. The Court incorporates the relevant conclusions **[**35]** rather than redundantly restating them here.

The main difference between the factual context as to Nucor on one hand, and that as to the other Defendants on the other, is that JSW allegedly dealt *directly* with U.S. Steel and AK Steel (which has since been acquired by Cleveland-Cliffs) when it sent "firm inquiries" about domestic slab. JSW makes much of Defendants' creditworthiness checks and technical variations, alleging that they were pretextual and effectively amounted to a refusal to deal "against their admitted self-interest" to profit from the sales. JSW argues that these actions against the Defendants' own stated self-interests—along with the "common motive" to boycott JSW to suppress a competitor, their dominance in the market, and opportunities to conspire at trade association meetings—support an inference of conspiracy.

Plaintiff's conclusory allegations still fail. Defendants' actions can just as easily be explained as the result of their "independent business judgment." *Southway Theatres, 672 F.2d at 494*. Since JSW inquired about purchasing 30,000 tons of steel, it is unsurprising that the sellers sought to ensure that JSW could pay for the purchase through creditworthiness checks.

Further, JSW's resort to **[**36]** the Defendants' *present* 84% combined domestic steelmaking capacity, Doc. 51 at 21-22, is misleading. In 2018 and 2019, when most of the events described in the Complaint allegedly occurred, ArcelorMittal was an independent competitor, as JSW admitted (Compl. ¶ 52); yet JSW now includes ArcelorMittal in its share calculation. (Doc. 51 at 21). JSW, which imports steel slab for domestic production, Compl. ¶ 3, also insufficiently explains why "domestic steelmaking capacity" constitutes the relevant market.

Finally, based on the facts alleged, it appears it was JSW that left the negotiating table. Had it not done so, it could have, for example, addressed Defendants' proposed variations from the initial request or pushed AK Steel to accept a documentary letter of credit in lieu of the required standby letter of credit.

Thus, despite the added factual detail about JSW's dealings with U.S. Steel and AK Steel, the Court still concludes that JSW failed to plausibly allege a conspiracy regarding AK Steel, U.S. Steel, and Cleveland-Cliffs. For this reason—in addition to those relating to the *Noerr-Penning* doctrine and lack of antitrust injury, *see* Secs. II(B)(b)(2), (3)—the Court **GRANTS** U.S. Steel, **[**37]** AK Steel, and Cleveland-Cliffs' Joint Motion to Dismiss.

* * *

Despite Plaintiff's lengthy Complaint and briefing, it has failed to sufficiently allege a *Sherman Act* claim because: (A) it does not plausibly allege a conspiracy among Defendants; (B) the *Noerr-Pennington* doctrine applies to the Defendants' alleged conduct related to the *Section 232* **[*603]** tariffs; and (C) JSW has failed to plausible allege an antitrust injury.

The state-law claims also fail because: (A) they rise and fall along with the *Sherman Act* claim, (B) the *Noerr-Pennington* similarly applies to them, and (C) JSW has not sufficiently alleged that Defendants knew any specific information about JSW's contracts or prospective business relations.

Thus, the Court **GRANTS** both motions to dismiss in their entirety. JSW's claims are dismissed with prejudice.

IT IS SO ORDERED.

SIGNED at Houston, Texas, on February 17, 2022.
