In the first case, *Toledo Mack Sales and Service, Inc. v. Mack Trucks, Inc., 530 F.3d 204 (3d Cir. 2008)*, the plaintiff alleged a Sherman Act § 1 claim involving a two-part conspiracy: it claimed first, that defendant Mack, a manufacturer of heavy-duty trucks, entered into a competition-restricting agreement with its authorized dealers, and second, that Mack dealers entered into agreements with each other not to compete on price. See id. at *530 F. 3d at 210*. "At the close of evidence at trial, the District Court granted Mack's motion for judgment as a matter of law on

Toledo's Sherman Act claim." *Id. at 216*. On appeal, the Court of Appeals bifurcated its consideration of the restraints claimed by the plaintiff. First, the **[*62]** Court held that "[i]t is readily apparent that, if there were an agreement among Mack dealers as alleged, it involved horizontal competitors colluding to control prices, and therefore, would be per se unlawful." *Id. at 221*. The Court then considered Toledo's evidence of an unlawful agreement between the dealers and Mack. The Court explained that, "[i]n contrast to horizontal price-fixing agreements between entities at the same level of a product's distribution chain, the legality of a vertical agreement that imposes a restriction on the dealer's ability to sell the manufacturer's product is governed by the rule of reason." *Id. at 224*, citing *Leegin, 551 U.S. at 906-07*. The Court continued, explaining that "[t]he rule of reason analysis applies even when, as in this case, the plaintiff alleges that the purpose of the vertical agreement between a manufacturer and its dealers is to support illegal horizontal agreements between multiple dealers." *Toledo Mack, 530 F.3d at 225*, citing *Leegin, 551 U.S. at 893*. In a footnote, the Court explained "[a]fter Leegin, vertical agreements to set prices are no longer per se unlawful but subject to the rule of reason. . . . In light of Leegin, we conclude that the rule of reason, not per se analysis, applies to the vertical agreement Toledo alleges was in existence **[*63]** here." *Toledo Mack, 530 F.3d at 225 n.15*.

In the second case, *In re Insurance Brokerage Antitrust Litigation, 618 F.3d 300, 336 (3d Cir. 2010)*, on appeal from orders of dismissal under Rule 12(b)(6), the Court of Appeals considered several agreements involving insurance brokers — middlemen like the distributor defendants in this case — and insurance companies who provided insurance — similar to the grower defendants in this case who provided mushrooms to the distributors. Certain agreements in the case — the "broker centered conspiracies" — were agreements made only between individual insurance companies and the insurance brokers. The Court of Appeals found that it was not possible to "plausibly infer a horizontal agreement among a broker's insurer partners from the mere fact that each insurer entered into a similar contingent commission agreement with the broker." *Id. at 327*. Because there were not "plausible grounds to infer a horizontal agreement," the Court explained that the plaintiffs had not pled "a per se violation of *§ 1 of the Sherman Act*," although this did "not mean that [the] defendants' alleged treatment of insurance purchasers was praiseworthy — or even lawful . . . ." *Id. at 335-36*.

The plaintiffs in the Insurance Brokerage case had also alleged that certain insurance companies had engaged in bid-rigging — "quintessentially **[*64]** collusive behavior subject to per se condemnation" — through a broker that had a vertical relationship with each company. *Id. at 336*. The insurance company defendants argued that the vertical involvement of the broker required their horizontal conspiracy to be judged under the rule of reason. With respect to the bid-rigging allegations, the Court of Appeals explained, "'defendants cannot escape the per se rule [for certain horizontal restraints of trade] simply because their conspiracy depended upon the participation of a 'middle-man', even if that middleman conceptualized the conspiracy, orchestrated it . . . and collected most of the booty.'" *Id. at 337*, quoting *United States v. All Star Indus., 962 F.2d 465, 473 (5th Cir. 1992)* (omission in original). The Court "agree[d] that [the] plaintiffs' allegations portray a conspiracy masterminded and directed by defendant broker Marsh, but this fact does not make implausible the inference of a horizontal agreement among the insurers." *In re Ins. Brokerage, 618 F.3d at 337*. "Marsh may have been an essential conduit and coordinator, but the insurers' agreement to provide protective bids to one another was also instrumental to the operation of the asserted broker-centered conspiracy." *Id. at 338*. Ultimately, the Court found that the plaintiffs' allegations were sufficient **[*65]** to "suggest a plausible horizontal agreement among the insurers" and that while, "[o]n the complaint's own account, the conspiracy was instigated, coordinated and policed by Marsh" this did "not belie the alleged horizontal agreement." *Id. at 344*. The Court cautioned that "[i]f all horizontal agreements that exist to facilitate vertical ones . . . must be tested by the rule of reason, then per se condemnation of hub-and-spoke conspiracies would appear to be impossible."[21] *Id. at 347*.

---

[21] In reaching its conclusion in Insurance Brokerage, the Court also noted that the defendants were "unable to identify among plaintiffs' allegations any procompetitive venture to which the insurers' alleged horizontal agreement not to compete for incumbent business could reasonably be deemed integral." *In re Ins. Brokerage, 618 F.3d at 346*. In contrast in this case, defendants argue that "there is substantial evidence that the EMMC member companies believed that the minimum pricing and supply control policies were necessary to prevent further farm closings and bankruptcies heralded by the bankruptcy of a large

Neither Toledo Mack **[*66]** nor Insurance Brokerage provide a perfect analogy to the facts now before me. By plaintiffs' own characterization, the claimed mushroom price-fixing conspiracy is a horizontal and vertical "hybrid," and there are "intermediate vertical distributors . . . identified . . . as . . . conspirators in the conspiracy." Dkt. No. 628 at 54:12-13; 88:4-7. Plaintiffs contend that "those vertical agreements between the growers and the distributors facilitated the horizontal agreement between the growers to fix the prices." Id. at 26:18-21. If the EMMC members' agreement had been an agreement to fix the prices which EMMC members themselves charged for the sale of mushrooms they themselves grew to third-party distributors, I would find that the per se rule should apply to their agreement. Clearly such an agreement would "involve[] horizontal competitors colluding to control prices, and therefore, would be per se unlawful." *Toledo Mack, 530 F.3d at 221*. But the conspiracy alleged here involves an agreement by the members of the EMMC to fix not the prices which they themselves charged, but rather the prices charged by vertically oriented distributors — some of whom are integrated with EMMC members and some of whom are not. The **[*67]** agreement of the EMMC members is thus also distinguishable from the horizontal bid-rigging agreement in Insurance Brokerage, as there the agreement between the insurance companies mandated conduct to be undertaken by the insurance companies themselves — the provision of protective bids to one another — and did not mandate any particular conduct by the vertically oriented broker. Here, absent cooperation from the vertically oriented distributors, integrated and not, the EMMC's agreement to fix mushroom distribution prices would be meaningless.

Further, to the extent that non-EMMC member distributor defendants followed the EMMC's mushroom pricing policies, they are clearly vertically oriented such that their conduct in the claimed conspiracy should be subject to the rule of reason. "In contrast to horizontal price-fixing agreements between entities at the same level of a product's distribution chain, the legality of a vertical agreement that imposes a restriction on the [distributor's] ability to sell the [grower's] product is governed by the rule of reason." *Toledo Mack, 530 F.3d at 224*, citing *Leegin, 551 U.S. at 906-07*. As I have previously explained, there is not necessarily a "unity of interest between the growers and the distributors **[*68]** in this case." *In re Mushroom Direct Purchaser Antitrust Litig., 621 F. Supp. 2d 274 (E.D. Pa. 2009)*. "[T]he growers are selling to distributors who sell at EMMC prices. . . . In this relationship, the price fixing does not protect the economic interests of the grower and therefore the entities' interests are not congruent." Id.

And finally, here I cannot ignore the presence in the claimed conspiracy of the EMMC-member defendants with integrated growing and distribution operations. The effect of the presence of similar entities with dual roles in the claimed conspiracies was not addressed in either Toledo Mack or Insurance Brokerage. I find that the inclusion of these integrated entities is sufficient to prevent me from finding that the claimed conspiracy in this case is a clear parallel to other conspiracies which have been subjected to per se liability. It has been held that the "per se rule is inapplicable" where a defendant is "both a manufacturer and a retail distributor of its products." *House of Brides, Inc. v. Alfred Angelo, Inc., No. 11-7834, 2014 U.S. Dist. LEXIS 1850, 2014 WL 64657, at *5 (N.D. Ill. Jan. 8, 2014)* (finding that such an arrangement is a "'dual distribution' system" and that "[r]estraints in dual distribution systems are analyzed under the rule of reason") (citations omitted); see also *AT & T Corp. v. JMC Telecom, LLC, 470 F.3d 525, 531 (3d Cir. 2006)* ("Vertical restraints are generally not per se violations of the Sherman Act, even where a distributor **[*69]** and manufacturer also compete at the distribution level, i.e., have some form of horizontal relationship (a/k/a/ dual distributor arrangement) . . . ."); *Beyer Farms, Inc. v. Elmhurst Dairy, Inc., 35 F. App'x 29 (2d Cir. 2002)* ("Beyer alleged in its complaint that Elmhurst and Bartlett were engaged in a dual-distributorship relationship, or both a vertical and horizontal relationship. Had Beyer alleged a purely horizontal relationship between Elmhurst and Bartlett, Beyer would have alleged a per se violation of *§ 1 of the Sherman Act*. Because Beyer did not so plead, its complaint was subject to scrutiny under the 'rule of reason.'"). The presence of the integrated defendants prevents me from simply bifurcating my consideration of the claimed agreement to fix mushroom distribution prices into horizontal and vertical components with the former being subject to per se liability and the latter subject to consideration under the rule of reason. Because I am unable to untangle the vertical and horizontal aspects of the conduct of the integrated defendants in the alleged conspiracy to fix mushroom distribution prices, I find that it is appropriate to apply the rule of reason to the entirety of plaintiffs' claim that defendants violated *Section 1 of the Sherman Act* by "conspir[ing] among **[*70]** themselves and in conjunction with

Canadian-based mushroom producer operating several growing, packaging and distribution facilities in the United States." Dkt. No. 501 at 6.

nonmember distributors to set artificially-inflated prices" for mushrooms. Dkt. No. 185 at ¶ 93. See *In re Aluminum Warehousing Antitrust Litig., No. 13-2481, 2014 U.S. Dist. LEXIS 121435, 2014 WL 4277510, at *25 (S.D.N.Y. Aug. 29, 2014)* ("Most antitrust claims are evaluated under the rule of reason. . . . Most vertical agreements and mixed agreements (those with both horizontal and vertical aspects) are analyzed in this manner.") (emphasis added); see also *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1481 (9th Cir. 1986)* (finding that the rule of reason applied where the alleged conspirators were "in a 'hybrid arrangement composed of both a dual distributorship and a horizontal relationship" because the Court did "not have enough experience with this type of arrangement to say with any confidence that a concerted refusal to deal in this context almost always will be anticompetitive"); *Black Box Corp. v. Avaya, Inc., No. 07-6161, 2008 U.S. Dist. LEXIS 72821, 2008 WL 4117844, at *18 (D.N.J. Aug. 29, 2008)* ("Here, there was a dual distributor arrangement in the market for PBX systems and a horizontal relationship in the service and maintenance aftermarket. . . . [T]his Court does not have enough experience with this type of arrangement to say that it will almost always be anticompetitive. Therefore, the Court concludes that a Rule of Reason analysis is appropriate.").

As counsel to the EMMC explained in 2001, the EMMC is not a "classic" cooperative:

> Most, but not all, agricultural **[*71]** cooperatives differ from EMMC in that they tend to combine grower organizations for the collective purpose of consolidating and sharing the "getting-to-market" function for agricultural products, i.e., processing, handling, sales and marketing. . . . EMMC is not like those cooperatives given that EMMC members will continue to conduct independent businesses.

Dkt. No. 492, Ex. A. at 3. "It is a bad idea to subject a novel way of doing business (or an old way in a new and previously unexamined context, which may be a better description of this case) to per se treatment under ***antitrust law***." *In re Sulfuric Acid Antitrust Litig., 703 F.3d 1004, 1011 (7th Cir. 2012)*. "[E]ven if the agreement is horizontal in the way Plaintiffs now claim, applying the rule of reason is the default position and can be applied to horizontal restraints as well if they do not fit into existing categories of per se violations." *In re Se. Milk, 739 F.3d at 273* (finding that, "especially at the summary judgment stage, [it was] not a 'clear cut' case of an obviously anticompetitive trade restraint").

Where "there is evidence [the growers] were the impetus for a vertical price restraint, there is a greater likelihood that the restraint facilitates a retailer cartel or supports a dominant, inefficient retailer." *Leegin, 551 U.S. at 897-98*. This can be **[*72]** determined, however, through application of the rule of reason which is "designed and used to eliminate anticompetitive transactions from the market." *Id. at 898*; see *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("[A] refusal to compete with respect to the price term of an agreement[] impairs the ability of the market to advance social welfare by ensuring the provision of desired goods and services to consumers at a price approximating the marginal cost of providing them. Absent some countervailing procompetitive virtue — such as, for example, the creation of efficiencies in the operation of a market or the provision of goods and services . . . — such an agreement limiting consumer choice by impeding the ordinary give and take of the market place . . . cannot be sustained under the Rule of Reason.") (citations and internal quotations omitted).[22]

---

[22] "A plaintiff seeking application of the per se rule must present a threshold case that the challenged activity falls into a category likely to have predominantly anticompetitive effects." *Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 298, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)*. "[E]ven when the per se label has been applied to a category of anticompetitive conduct, the cases establish that courts may still look to see whether the economic effects of a particular **[*73]** practice in a particular industry justify abandoning a rule of reason analysis" as the default position. *Behrend v. Comcast Corp., No. 03-6604, 2012 U.S. Dist. LEXIS 51889, 2012 WL 1231794, at *11 (E.D. Pa. Apr. 12, 2012)*. Certain pro-competitive conditions "can render an industry practice 'substantially different from the classic' horizontal restraints subjected to per se treatment." *2012 U.S. Dist. LEXIS 51889, [WL] at *12*, quoting *Eichorn v. AT & T Corp., 248 F.3d 131, 139 (3d Cir. 2001)* (further citations omitted).

Moving defendants argue that their price fixing conduct should be subject to the rule of reason because "the historical procompetitive benefits of growers forming the EMMC [were] clear": to "salvage their farms and the mushroom industry as a whole" during claimed dire market conditions. Dkt. No. 492 (Defs.' Rule of Reason Mem.) at 16-18. Plaintiffs assert that "the

D. Supply Control Claim

Despite my conclusion that the rule of reason should be applied to plaintiffs' price fixing claims, I find that plaintiffs' claim that the supply control program violated *Section 1 of the Sherman Act* is instead subject to per se antitrust liability. "An agreement among competitors to restrict the production of a certain good equates to a price-fixing agreement, because conspiracies to limit output are designed to raise, stabilize, or otherwise fix the price of goods." *In re Sulfuric Acid Antitrust Litig., 743 F. Supp. 2d 827, 867 (N.D. Ill. 2010)*; see also *Westinghouse Elec. Corp. v. Gulf Oil Corp., 588 F.2d 221, 226 (7th Cir. 1978)* ("an agreement to restrict the production of uranium unquestionably is a price fixing arrangement"). The claimed supply control conspiracy is different from the claimed conspiracy to fix the distribution prices of mushrooms because no secondary agreements with vertically aligned distribution entities were necessary to implement the claimed supply control agreement. **[*76]** Instead, the claimed agreement to purchase or lease properties in order to remove them from mushroom production is a straightforward agreement among the members of the EMMC. Such an agreement "facially appears to be one that would always or almost always tend to restrict competition and decrease output." *Broad. Music, Inc., 441 U.S. at 19-20*. As such, the claimed conduct giving rise to plaintiffs' supply control claim is a restraint on competition which is per se unreasonable.

II. Plaintiffs' Motion for Partial Summary Judgment

In their motion for partial summary judgment, plaintiffs argue that because the defendants' "agreement to engage in price fixing and output restrictions was per se illegal and therefore not subject to any defense based on market conditions or business justification," I "should enter summary judgment establishing the liability of the EMMC, its members, and distributors affiliated with EMMC members." Dkt. No. 498 (Pls.' Opp'n Mem.) at 19. But at oral argument, plaintiffs conceded that summary judgment would be inappropriate if the Court were to find that the rule of reason governs plaintiffs' claims. Dkt. No. 628 at 90:14-19 ("if it's rule of reason, we'll have to show that there was actually some **[*77]** anti-competitive effect"). Because that is precisely what I have found with respect to

---

EMMC agreement has no redeeming efficiency producing benefits and was admittedly implemented for the purpose of limiting competition." Dkt. No. 624 (Pls.' Letter Br.) at 1-2. Plaintiffs argue that

> [d]efendants' horizontal conspiracy to fix prices and limit supply created neither a new product nor expanded production. . . . Nor did the EMMC integrate the abilities of its members in any way to create a new and more efficient way of competing. After joining the EMMC, [d]efendants remained separate competitors with separate brands, sales forces **[*74]** and customers. . . . The only benefit of membership was that the EMMC fixed distribution prices and limited supply to keep prices high.

Dkt. No. 624 (Pls.' Letter Br. at 3).

I do not here decide that the procompetitive benefits argued by moving defendants are sufficient on their own to justify application of the rule of reason. I write only to note that the Court of Appeals for the Seventh Circuit has held that "[e]ven price fixing by agreement between competitors [and] . . . . other agreements that restrict competition . . . are governed by the rule of reason, rather than being per se illegal, if the challenged practice when adopted could reasonably have been believed to promote 'enterprise and productivity.'" *In re Sulfuric Acid, 703 F.3d at 1011-12*, citing *Broad. Music, Inc. v. Columbia Broad., 441 U.S. 1, 24, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*, and *Polk Bros., Inc. v. Forest City Enters., Inc., 776 F.2d 185, 189 (7th Cir. 1985)*. The Seventh Circuit has also held that "[a] court must ask whether an agreement promoted enterprise and productivity at the time it was adopted. If it arguably did, then the court must apply the Rule of Reason." *Polk Bros., 776 F.2d at 189* (emphasis added); see also *Procaps S.A. v. Patheon Inc., 36 F. Supp. 3d 1306, 1328 (S.D. Fla. 2014)* ("[D]etermining whether an agreement is 'naked' requires a broader examination of whether the restraint would be likely to increase economic efficiency and render markets more, rather than less, competitive. . . . If the net plausible effects **[*75]** might be procompetitive, then courts will apply the rule of reason to strike the balance.") (citations and internal quotations omitted). But cf. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 221-22, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* ("[Congress] has no more allowed genuine or fancied competitive abuses as a legal justification for [price-fixing] schemes than it has the good intentions of the members of the combination.").

plaintiffs' price fixing claims under *Section 1 of the Sherman Act*, I will deny plaintiffs' motion to the extent that it seeks partial summary judgment on those claims.

To the extent that plaintiffs seek summary judgment with respect to their supply control claims under *Section 1 of the Sherman Act*, I will deny summary judgment as well. Even though I find these claims are subject to per se liability, I find that questions of fact remain with respect to whether each defendant "participate[d]" or "knowingly acquiesce[d]" in the alleged anticompetitive activity. See *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1017 (3d Cir. 1994)*; see also *In re Processed Egg Prods. Antitrust Litig., 821 F. Supp. 2d 709, 723 (E.D. Pa. 2011)* ("[M]ere membership in a trade group . . . cannot alone sufficiently plead agreement to a conspiracy.")

An appropriate Order follows.

ORDER

AND NOW, this 26th day of May, 2015, upon consideration of certain defendants' motion to adjudicate plaintiffs' antitrust claims under the rule of reason (Dkt. No. 492),[23] plaintiffs' opposition to the motion seeking application of the rule of reason and plaintiffs' cross-motion for partial summary judgment on their Sherman Act § 1 claim (Dkt. No. 495), and the responses and replies to each motion (Dkt. Nos. 496, 498, 501-08, 511, 624, 630), following **[*78]** oral argument on the motions and consistent with the accompanying memorandum of law, it is ORDERED that:

1. Defendants' motion to adjudicate plaintiffs' antitrust claims under the rule of reason (Dkt. No. 492) is GRANTED IN PART AND DENIED IN PART as follows:

    a. the motion is GRANTED to the extent that it seeks application of the rule of reason to plaintiffs' claim that defendants violated *Section 1 of the Sherman Act* by "conspir[ing] among themselves and in conjunction with nonmember distributors to set artificially-inflated prices" for mushrooms. Dkt. No. 185 at ¶ 93;

    b. the motion is DENIED to the extent that it seeks application of the rule of reason to plaintiffs' claim that defendants violated *Section 1 of the Sherman Act* through the EMMC's implementation of a supply control scheme — purchasing and leasing mushroom farms in order to place deed restrictions on the properties prohibiting the conduct of business related to the production of mushrooms. Dkt. No. 185 at ¶ 94. The Court will apply per se liability to plaintiffs' *Section 1* supply control claims.

2. Plaintiff's cross motion for partial summary judgment (Dkt. No. 495) is DENIED.

It is FURTHER ORDERED that, because this Order and the accompanying memorandum of law may contain confidential information, it has been filed under seal pending review by the parties to permit them to meet and confer and propose a single jointly redacted version of the Order and the accompanying memorandum of law. The parties shall submit their proposed redacted Order and accompanying memorandum of law, if any, on or before June 8, 2015. Thereafter, the Court will issue a publicly-available version of this Order and the accompanying memorandum of law.

Opinion

I. INTRODUCTION

Defendant, Patriot Underwriters, Incorporated, appeals from an order partially denying its amended motion to compel arbitration against plaintiff, HCF Insurance Agency. Plaintiff filed a first amended complaint containing multiple causes of action against defendant and other parties. As to defendant, plaintiff alleges the following causes of action: contract breach (first); breach of the implied covenant of good faith and fair dealing (second); fraud (third); intentional interference with economic advantage (fourth); and unlawful group boycott in violation of *Business and Professions Code section 16720 et seq.*, also known as the Cartwright Act (ninth). Defendant moved to compel arbitration pursuant **[**2]** to an agreement signed by plaintiff. The trial court ordered arbitration as to the contract and implied covenant breach claims because those two causes of action were within the scope of the arbitration agreement. The trial court denied the arbitration petition as to the fraud and intentional interference with economic advantage causes of action. The trial court ruled those two claims did not fall within the scope of the arbitration agreement. The trial court also denied the arbitration petition as to the Cartwright Act cause of action. The trial court ruled application of the arbitration clause's Florida choice-of-law provision prevented plaintiff from securing any relief. The trial court found the group boycott claim involved an important public policy because it is California's antitrust statute. We affirm the order partially denying defendant's motion to compel arbitration.

II. BACKGROUND

A. Plaintiff's Allegations

On September 12, 2013, plaintiff filed its complaint. Defendant moved to compel arbitration on October 25, 2013. Plaintiff subsequently filed a first **[*524]** amended complaint on December 16, 2013, against: defendant; Intercare Specialty Risk Services, its fictitious business names **[**3]** and successors in interest; Kevin Hamm, president and chief shareholder of Intercare Specialty Risk Services; Renee Iaia, president of Phoenix Risk Management Insurance Services, a related business to Intercare Specialty Risk Services; and Shomer Insurance Agency, Incorporated. We will focus on plaintiff's claims against defendant.

Plaintiff provides brokerage and agency services for casualty, accident and health, property, life and surplus lines of insurance. Plaintiff is a California corporation with its principal place of business in Los Angeles. Plaintiff is authorized to conduct business in California. Shomer Insurance Agency, Incorporated and Intercare Specialty Risk Services are direct competitors with plaintiff in the insurance market in the greater Los Angeles area. They specialize in brokering workers' compensation policies for extended care facilities. Defendant had a sub-producer agreement with Intercare Specialty Risk Services and Shomer Insurance Agency, Incorporated.

Defendant is a Delaware corporation with its principal place of business in Fort Lauderdale, Florida. Defendant is a program administrator and managing general underwriter servicing regional and national workers' **[**4]**

* Judge of the Los Angeles Superior Court, assigned by the Chief Justice pursuant to *article VI, section 6 of the California Constitution*.

compensation insurance carriers. Defendant provides products to insurance agencies and wholesalers with expertise in workers' compensation. Defendant also offers services such as claims and risk management. Defendant is in competition with other managing general underwriters in California such as Safety National Casualty Company.

Defendant specializes in the creation and management of new individual, agency, or group captive insurers for workers' compensation. A captive insurer is a dedicated in-house subsidiary entity which provides insurance to its owner, a parent corporation. The parent corporation pays premiums to the captive insurer rather than an outside firm to insure some business risk. The captive insurer reinvests the premiums it receives and then pays claims by drawing on the principal and return on its investment. Captive insurers can lower costs and facilitate coverage for certain hard-to-insure risks that traditional carriers may not underwrite.

Around July 2012, defendant considered entering into a business relationship with plaintiff. The enterprise was to involve plaintiff's healthcare-based workers' compensation business. Defendant's former regional vice president, **[**5]** David Duvall, requested significant proprietary information. The request was made so defendant could evaluate whether to enter into a group or agency captive insurer agreement. The proprietary information disclosed included five years of confidential client lists, effective dates, premiums, payroll figures and loss ratios. On August 27, 2012, plaintiff and defendant entered into a sub-producer agreement. The August 27, 2012 sub-producer agreement was a precursor to forming captive insurer agreements. The August 27, 2012 sub-producer agreement allowed plaintiff to access defendant's products directly without going through competitors like Intercare Specialty Risk Services or Shomer Insurance Agency, Incorporated. Plaintiff and defendant expected to execute an agency captive insurer agreement in **[*525]** November 2012. Within the first few months after the August 27, 2012 sub-producer agreement was entered into, plaintiff submitted substantial “business” to defendant.

Around late August or early September of 2012, Intercare Specialty Risk Services and Shomer Insurance Agency, Incorporated employees learned of plaintiff's anticipated captive insurer agreement with defendant. Intercare Specialty **[**6]** Risk Services and Shomer Insurance Agency, Incorporated employees agreed to exert pressure on defendant to exclude plaintiff as their brokerage market competitor. During or around September or October 2012, Mr. Hamm telephoned Steve Mariano, defendant's chief executive officer. Mr. Hamm threatened to “pull business” from defendant if it did not cancel its sub-producer agreement with plaintiff. An unidentified employee of Shomer Insurance Agency, Incorporated also communicated with defendant to cease “doing business” with plaintiff.

Defendant agreed to cancel the sub-producer agreement because of the threats of Intercare Security Risk Services' and Shomer Insurance Agency, Incorporated's employees. An unspecified employee of defendant instructed Mr. Duvall not to discuss these conversations with individuals employed by plaintiff. In November 2012, Jason Adelman, plaintiff's president, asked Mr. Duvall if defendant had approved the captive insurer agreement. Mr. Duvall reiterated that Mr. Mariano, defendant's chief executive officer, had approved it. In December 2012, defendant refused to enter into a captive insurer agreement with plaintiff. Defendant refused to do so despite numerous **[**7]** representations the captive insurer agreement was approved and finalized. On or around January 1, 2013, defendant terminated the sub-producer agreement. As previously noted, plaintiff alleges the following causes of action against defendant: contract breach (first); implied covenant breach (second); fraud (third); intentional economic advantage interference (fourth); and unlawful group boycott in violation of the Cartwright Act under *Business and Professions Code section 16720, et seq.* (ninth). Because they are the relevant factual matters in this appeal, we will discuss the allegations in the third, fourth and ninth cause of action in detail.

The allegations in the third cause of action for fraud are difficult to follow. But the following are the relevant allegations. Since 2012, discussions between unspecified employees of plaintiff and defendant were held about entering into a captive insurer agreement. As part of that process, plaintiff shared confidential information with defendant. As noted, Mr. Duvall was defendant's former regional vice-president. On August 27, 2012, Mr. Duvall told Mr. Adelman, plaintiff's president, that defendant had approved group and agency captive insurer agreements. Thereafter for several weeks, Mr. Duvall **[**8]** made similar statements. As late as October 19, 2012, Mr. Duvall relayed a statement by Mr. Mariano, defendant's chief executive officer, of the approval of the agency captive insurer agreement with plaintiff. However, Mr. Mariano's statements were false and he knew them to be so. The purpose of Mr. Mariano's false statements was to: continue negotiation between plaintiff and defendant; maintain the appearance of good faith; keep plaintiff from securing workers' compensation insurance for its clients; continue **[*526]** securing confidential information from plaintiff; and further the boycott's objectives. (We will describe the boycott allegations shortly.) Had unidentified employees of plaintiff known that Mr. Mariano's statements concerning the agency captive insurer agreement were untrue, negotiations would have ceased. Plaintiff would have pursued other agency opportunities with other companies.

For the intentional economic advantage interference cause of action, plaintiff alleges unidentified employees were having similar discussions regarding captive insurer agreements with Safety National Insurance. Plaintiff provided National Safety Insurance with significant confidential information. **[**9]** Defendant knew: of the economic relationship between plaintiff and National Safety Insurance; plaintiff had a significant and profitable “book of business” with National Safety Insurance; and the economic relationship between plaintiff and National Safety Insurance would be interrupted if Mr. Mariano's false statements concerning the captive insurer agreement turned out to be true. By its actions, defendant disrupted and interfered with plaintiff's economic relationship with Safety National Insurance. Defendant caused plaintiff to suspend its negotiations regarding entering a captive insurer agreement with Safety National Insurance.

As to the group boycott antitrust claim, plaintiff alleges, Intercare Specialty Risk Services and Shomer Insurance Agency Incorporated are horizontal competitors. Intercare Specialty Risk Services and Shomer Insurance Agency Incorporated entered into an agreement to threaten defendant. The first amended complaint describes the relationship between plaintiff, Intercare Specially Risk Services and Shomer Insurance Agency Incorporated as follows: “At all relevant times, … Intercare [Specialty Risk Services] and Shomer [Insurance Agency Incorporated] provided **[**10]** brokerage services and sold various lines of specialized commercial insurance products to a significantly overlapping base of actual or potential customers in direct competition with [plaintiff]. In some cases, [plaintiff], Intercare [Specially Risk Services] and Shomer [Insurance Agency Incorporated] were all brokers for defendant.” According to the first amended complaint, Intercare Specially Risk Services and Shomer Insurance Agency Incorporated entered into an agreement to threaten defendant. The purpose of the threat was to force defendant to terminate plaintiff's existing sub-producer agreement. The threat was designed to remove plaintiff as a competitor of Intercare Specially Risk Services and Shomer Insurance Agency Incorporated. The first amended complaint describes the threat thusly: “To remove [plaintiff] as a direct competitor for brokering workers' compensation coverage to extended care facilities, Intercare [Specialty Risk Services] and Shomer [Insurance Agency Incorporated], as horizontal competitors, entered into an agreement to threaten [defendant], and demand that, unless [defendant] terminated [plaintiff's] existing Producer Agreement and refused to engage in further **[**11]** dealings with [plaintiff], Intercare [Specialty Risk Services] and Shomer [Insurance Agency Incorporated] would cease to provide brokerage services and stop doing business with [defendant]. Intercare [Specialty Risk Services'] and Shomer [Insurance Agency Incorporated's] accounts represent a substantial portion of [defendant's] book of business.”
[*527]

In January 2013, defendant terminated the existing sub-producer agreement with plaintiff. Defendant stopped doing business with plaintiff in furtherance of the unlawful group boycott. Plaintiff was thereby denied important access to defendant's unique captive insurer products. Plaintiff's ability to compete has been severely impaired by defendant's conduct. Plaintiff alleges the foregoing anticompetitive conduct produced an antitrust injury.

B. Defendant's Initial and Amended Motion to Compel Arbitration

As noted, on October 25, 2013, defendant moved to compel arbitration. After plaintiff filed its first amended complaint, defendant filed its amended motion to compel arbitration on January 21, 2014. Defendant asserted the sub-producer agreement between plaintiff and defendant contained an arbitration provision.

At Section XVIII, entitled, “ARBITRATION,” **[**12]** the sub-producer agreement provides, “(A) If any dispute, claim or difference arises out of or relates in any fashion or manner to this Agreement (referred to herein after as a ‘dispute’, including a dispute for which a party seeks specific performance, such Dispute shall be [submitted] to arbitration.” At Section XIX, entitled, “APPLICABLE LAW,” the sub-producer agreement provides: “If any question arises at any time as to the validity, construction, interpretation or performance of this Agreement, the law of the

State of Florida shall govern and control, without regard to its conflicts of law principles. The laws of the State of Florida shall be the exclusive law governing any dispute arising under this contract to the exclusion of the laws of any other state or jurisdiction." Under the choice-of-law provision, defendant asserted its motion to compel arbitration pursuant to the Revised Florida Arbitration Code. (*Fla. Stats., § 682.01 et seq.*) On March 20, 2014, plaintiff filed its opposition. Plaintiff argued the arbitration clause was unconscionable. Plaintiff asserted California law must apply because the choice of law provision violates fundamental public policy. Plaintiff contended that its antitrust cause **[**13]** of action would be de facto waived if Florida law applied.

C. Order Denying in Part Defendant's Amended Motion to Compel Arbitration

On May 22, 2014, following a hearing, the trial court granted in part defendant's amended motion to compel arbitration. The amended motion to compel arbitration was granted as to plaintiff's first and second causes of action for contract and implied covenant breach respectively. The trial court ruled the first and second causes of action clearly arise from and relate to the sub-producer agreement. The amended motion to compel arbitration was denied as to the third, fourth and ninth causes of action. The trial court concluded the third and fourth causes of action did not arise from or relate to the sub-producer agreement under Florida law. The trial court found that enforcing the choice of law provision for the ninth cause of action would create a fundamental conflict with California law and denied the motion to compel arbitration. Proceedings concerning the third, fourth and ninth causes of action were stayed pending resolution of arbitration as **[*528]** to the first and second causes of action. Defendant timely appealed the partial denial of its amended motion **[**14]** to compel arbitration.

III. DISCUSSION

A. The Amended Motion to Compel Arbitration is Not Equivalent to Demurrer or Answer

Defendant argues plaintiff should have sought leave of court to file its first amended complaint. Defendant has failed to identify any provision of Florida law that supports this contention. But even if California law applies, defendant's contention has no merit. Defendant relies on *Code of Civil Procedure section 472*, which provides, "Any pleading may be amended once by the party of course, and without costs, at any time before the answer or demurrer is filed, or after demurrer and before the trial of the issue of law thereon … ." Defendant also relies upon *Code of Civil Procedure section 1281.7*, which provides, "A petition pursuant to *Section 1281.2* [to compel arbitration] may be filed in lieu of filing an answer to a complaint." Defendant argues that under these two sections, a petition to compel arbitration is a proper responsive pleading. Under defendant's reasoning, since the petition to compel arbitration is like an answer, plaintiff should have been required to seek leave of court before amending its complaint.

Plaintiff contends defendant failed to preserve this issue on appeal by not raising it before the trial court and thus waiving it. **[**15]** We agree. Defendant never objected to the filing of plaintiff's first amended complaint. Defendant cites to a declaration from its counsel, who declared: "Plaintiff's First Amended Complaint was filed without leave of Court after [defendant] filed its original Motion to Compel Arbitration." This is neither an objection nor is it an argument. It is undisputed plaintiff did not seek leave of the trial court to file the first amended complaint. Nowhere in the declaration nor in any of defendant's papers filed in the trial court does defendant complain that plaintiff's amendment was improper.

Even if this issue was properly raised, we disagree with defendant's argument. *Code of Civil Procedure section 422.10* provides, "The pleadings allowed in civil actions are complaints, demurrers, answers, and cross-complaints." *Code of Civil Procedure section 422.10* unambiguously defines what pleadings are. Motions, such as the petition to compel arbitration, are not listed therein. No California statute states a motion to compel arbitration is the equivalent of an answer or a demurrer. Defendant relies on *Simmons v. Allstate Insurance Co. (2001) 92 Cal. App. 4th 1068, 1073 [112 Cal. Rptr. 2d 397]* (*Simmons*) and argues litigants may not "amend[] around" well-taken motions. In *Simmons*, the defendant, at the hearing on a *section 425.16* special motion to strike, was denied leave to **[**16]** amend his cross-complaint. (*Id. at p. 1072*.) Here, no such facts are present. The concerns raised by the special motion to strike are inapplicable here. No error occurred in connection with the filing of the first amended complaint without the trial court's permission.

[*529]

B. Legal Standard for Arbitration

1. Florida's appellate standard of review of arbitration issues

We apply the following standard of review under Florida law to the issue of whether the parties agreed to arbitrate the fraud and economic interference causes of action: "The question of whether a disputed issue is subject to arbitration is a matter of contract interpretation, and our review is *de novo. Ocwen Fed. Bank FSB v. LVWD, Ltd., 766 So.2d 248, 249 (Fla. 4th DCA 2000)*. In *Citigroup, Inc. v. Boles, 914 So.2d 23 (Fla. 4th DCA 2005)*, this court discussed the application of arbitration provisions: [¶] Notwithstanding that arbitration is favored in the law, construction of an arbitration clause remains subject to the contract law requirement 'that the court discern the intent of the parties from the language used in their agreement.' *Citigroup, Inc. v. Amodio, 894 So.2d 296, 298 (Fla. 4th DCA 2005)*. '[A]rbitration is mandatory only where the subject matter of the controversy falls within what the parties have agreed will be submitted to arbitration.' *Ocwen Fed. Bank FSB v. LVWD, Ltd., 766 So.2d 248, 249 (Fla. 4th DCA 2000)*. '[I]t is the language of the agreement that defines the scope of an arbitration agreement.' **[**17]** *Amodio, 894 So.2d at 298*." (*Florida Environmental Services, Inc. v. Rentoumis (Fla.Dist.Ct.App. 2007) 950 So.2d 466, 470*.) Under Florida law, in determining whether a cause of action is within the scope of an arbitration agreement, we examine the factual allegations of the first amended complaint. (*Ibid.*; *Singer v. Gaines (Fla.Dist.Ct.App. 2005) 896 So.2d 851, 854*.)

In addition, the Federal Arbitration Act applies to this action. "*Section 2* of the [Federal Arbitration Act] … declares that a written agreement to arbitrate in any contract involving interstate commerce or a maritime transaction 'shall be valid, irrevocable, and enforceable, save upon such grounds as exist at law or in equity for the revocation of any contract[]' … ." (*Volt Information Services, Inc. v. Board of Trustees of Leland Stanford Junior University (1989) 489 U.S. 468 [103 L. Ed. 2d 488, 474, 109 S. Ct. 1248]* (*Volt*), citing *9 U.S.C. § 2*.) As previously stated, plaintiff is a California corporation with its principle place of business in Los Angeles, California. Defendant is a Delaware corporation with its principle place of business in Fort Lauderdale, Florida. Our case arises from a contract evidencing a transaction involving commerce.

The United States Supreme Court held: "The [Federal Arbitration Act] was designed 'to overrule the judiciary's longstanding refusal to enforce agreements to arbitrate,' [citation], and place such agreements '"upon the same footing as other contracts,"' [citations]." (*Volt, supra, 489 U.S. at p. 478*.) "Arbitration under the Act is a matter of **[**18]** consent, not coercion, and parties are generally free to structure their arbitration agreements as they see fit. Just as they may limit by contract the issues which they will arbitrate, [citation], so too may they specify by contract the rules under which that arbitration will be conducted. Where, as here, the parties have agreed to abide by state rules of arbitration, enforcing those rules according to the terms of the agreement is fully consistent with the goals of the [Federal Arbitration Act] … ." (*Id. at p. 479*.) Unless subject to the limited preemptive **[*530]** effect of the Federal Arbitration Act, it is undisputed that the arbitration provision at issue is subject to Florida law.

Under Florida's arbitration statutes, the following are the controlling principles which apply to plaintiff's fraud and economic interference claims: "[T]here are three elements for courts to consider in ruling on a motion to compel arbitration of a given dispute: (1) whether a valid written agreement to arbitrate exists; (2) whether an arbitrable issue exists; and (3) whether the right to arbitration was waived. (See *Terminix Int'l Co., LP v. Ponzio (Fla.Dist.Ct.App. 1997) 693 So.2d 104, 106*.)" (*Seifert v. U.S. Home Corp. (Fla. 1999) 750 So.2d 633, 636* (*Seifert*).) The parties do not dispute the existence of a valid arbitration agreement, nor do they **[**19]** argue waiver of the right to arbitrate has occurred. As to whether an arbitrable issue exists, the Florida Supreme Court held: "[T]he determination of whether an arbitration clause requires arbitration of a particular dispute necessarily 'rests on the intent of the parties.' [Citations.] A natural corollary of this rule is that no party may be forced to submit a dispute to arbitration that the party did not intend and agree to arbitrate. [Citations.]" (*Id. at p. 636*; see *Seaboard Coast Line R.R. Co. v. Trailer Train Co. (11th Cir. 1982) 690 F.2d 1343, 1352*.) The Florida Supreme Court concluded in the context of "arising out of or relating to" agreements: "[E]ven in contracts containing broad arbitration provisions, the determination of whether a particular claim must be submitted to arbitration necessarily depends on the existence of some nexus between the dispute and the contract containing the arbitration clause. [¶] Disputes arise in many and varied contexts and the mere coincidence that the parties in dispute have a contractual relationship will ordinarily not be enough to mandate arbitration of the dispute. In other words, the mere fact that the dispute would have arisen but for the existence of the contract and consequent relationship between the parties is insufficient by itself **[**20]** to transform a dispute into one 'arising out of or relating to' the agreement. [Citations.] These cases hold that for a tort claim to be considered 'arising out of or relating to' an agreement, it must, at a minimum, raise some issue the resolution of which requires reference to or construction of some portion of the contract itself. [Citations.]" (*Seifert, supra, 750 So.2d at p. 638*; see *Hersman, Inc. v. Fleming Cos., Inc. (M.D.Ala. 1998) 19 F.Supp.2d 1282, 1286-1287*.)

2. Fraud cause of action

Here, the arbitration clause applied to "any dispute, claim, or difference aris[ing] out of or relat[ing] in any fashion or manner to" the sub-producer agreement. The third cause of action alleges defendant made false representations regarding entering into an agency captive insurer agreement. The proposed agency captive insurer contract is different from the sub-producer agreement. The alleged misrepresentations caused plaintiff to forego other agency captive insurer or similar agreements. The third cause of action concerns issues with defendant's conduct as to the proposed agency captive insurer agreement. This does not arise out of or relate to the sub-producer agreement.

Defendant contends that plaintiff cannot distinguish Florida cases that have held fraud claims fall within the broad scope of the arbitration clause at issue **[**21]** here. **[*531]** Defendant's argument is unmeritorious. Florida courts have held that fraud claims are related to broad arbitration clauses because the deceit allegedly induced the contract formation or actually involved interpretation of the agreement. (See *Jackson v. Shakespeare Foundation, Inc. (Fla. 2013) 108 So.3d 587, 595* [party's fraud claim within scope of arbitration provision and inextricably intertwined with contract]; *Beazer Homes Corp. v. Bailey (Fla.Dist.Ct.App. 2006) 940 So.2d 453, 459* [fraud in inducement claim was within broad arbitration clause as it could have been restated as contract breach claim]; *Passerrello v. Robert L. Lipton, Inc. (Fla.Dist.Ct.App. 1997) 690 So.2d 610, 611* [fraud in inducement claim as to entire contract was within broadly stated arbitration clause].) Here, no such contractual nexus exists between the alleged fraud and the sub-producer agreement. Under Florida law, plaintiff's fraud claim does not "raise some issue the resolution of which requires reference to or construction of some portion of" the sub-producer agreement. (*Seifert, supra, 750 So.2d at 638*; see *Vernett v. American-Indian Enterprises, Inc. (Fla.Dist.Ct.App. 2014) 152 So.3d 856, 858*.)

3. Intentional Prospective Economic Advantage Interference Cause of Action

The fourth cause of action alleges defendant interfered with plaintiff's economic relationship with Safety National Insurance. As previously recounted, plaintiff was also discussing entering into a captive insurer agreement with Safety National Insurance. Because of **[**22]** Mr. Mariano's alleged misrepresentations concerning a potential agreement, plaintiff ceased its negotiations with Safety National Insurance. This interference with a potential agreement with Safety National Insurance does not arise out of or relate to the sub-producer agreement.

Defendant's citation to Florida cases is unpersuasive. None of the Florida cases support defendant's assertion. (See *Xerox Corp. v. Smartech Document Management, Inc. (Fla.Dist.Ct.App. 2007) 979 So.2d 957, 959-960* [intentional interference with advantageous business relationship claim fell within broadly stated clause]; *Henderson v. Idowu (Fla.Dist.Ct.App. 2002) 828 So.2d 451, 453* [intentional interference with advantageous business relationship claim fell within broad arbitration clause because it related to employment contract containing the agreement to arbitrate].) Here, plaintiff's intentional interference with prospective economic advantage cause of action has no nexus to the sub-producer agreement. It does not require "reference to or construction of" the sub-producer agreement. (*Seifert, supra, 750 So.2d at 638*; see *Kolsky v. Jackson (Fla.Dist.Ct.App 2010) 28 So.3d 965, 969*.) The trial court did not err by finding this cause of action not arbitrable.

C. Ninth Cause of Action

The ninth cause of action, violation of the Cartwright Act, raises different issues than the foregoing analysis concerning the third and fourth causes of action. To begin with, **[**23]** the ninth cause of action arises out of or relates to the sub-producer agreement. Plaintiff alleges that defendant terminated the sub-producer agreement under threat from Intercare Specially Risk Services and Shomer Insurance Agency **[*532]** Incorporated. This cause of action thus necessarily requires "reference to or construction of" the sub-producer agreement as it relates to defendant. (*Seifert, supra, 750 So.2d at p. 638*; see *BKD Twenty-One Management Co., Inc. v. Delsordo (Fla.Dist.Ct.App. 2012) 127 So.3d 527, 531*.) Because the ninth cause of action arises out of or relates to the sub-producer agreement, under Florida contract law, it potentially is subject to the arbitration agreement.

Under Florida law, the controlling revision concerning enforcement of arbitration agreements is *Florida Statutes section 682.02, subdivisions (1)* and *(2)* which state: "(1) An agreement contained in a record to submit to arbitration any existing or subsequent controversy arising between the parties to the agreement is valid, enforceable, and irrevocable except upon a ground that exists at law or in equity for the revocation of a contract. [¶] (2) The court shall decide whether an agreement to arbitrate exists or a controversy is subject to an agreement to arbitrate." Any inconsistency between *Florida Statutes section 682.02* and the Federal Arbitration Act must be resolved in favor of the federal law. (*Rewards Hotel Management Company, LLC v. Elite General Contractors, Inc. (Fla.Dist.Ct.App. 2003) 860 So.2d 1011, 1014*; *Trojan Horse, Inc. v. Lakeside Games (Fla.Dist.Ct.App. 1988) 526 So.2d 194, 196*.) Under **[**24]** Florida law, any challenge to the *enforceability* of an arbitration agreement on public policy grounds is resolved by the trial court, not the arbitrator. (*Shotts v. OP Winter Haven, Inc. (Fla. 2011) 86 So.3d 456, 471* (*Shotts*); *AMS Staff Leasing, Inc. v. Taylor (Fla.Dist.Ct.App. 2015) 158 So.3d 682, 685*.)

The Florida Supreme Court has held that an agreement to arbitrate is unenforceable if it violates public policy. (*Gessa v. Manor Care of Florida, Inc. (Fla. 2011) 86 So.3d 484, 493* (*Gessa*); *Shotts, supra, 86 So.3d at p. 465*.) Under Florida law, an arbitration agreement violates public policy if it defeats the purpose of a remedial statute. (*McKenzie Checked Advance of Florida, LLC v. Betts (Fla. 2013) 112 So.3d 1176, 1183*; *Lacey v. Healthcare & Retirement Corp. of America (Fla.Dist.Ct.App. 2005) 918 So.2d 333, 334*.) Similarly, an arbitration agreement that diminishes or circumvents remedies provided by a remedial statute violates public policy and is thus unenforceable. (*Gessa, supra, 86 So.3d at p. 493*; *Shotts, supra, 86 So.3d at p. 474*.) A remedial statute is one that provides redress for a grievance or that confers or changes a remedy. (*Capone v. Philip Morris USA, Inc. (Fla. 2013) 116 So.3d 363, 376*; *Blankfield v. Richmond Health Care, Inc. (Fla.Dist.Ct.App. 2005) 902 So.2d 296, 298*.) A remedial statute provides regulations which are conducive to the public good. (*Capone v. Philip Morris USA, Inc., supra, 116 So.3d at p. 376*; *Lacey v. Healthcare & Retirement Corp. of America, supra, 918 So.2d at p. 334*.)

We now turn to Florida's antitrust laws to determine if their enforcement will diminish any of plaintiff's rights. Florida has its own antitrust statutes. (See *MYD Marine Distributor, Inc. v. Internat. Paint Limited (Fla.Dist.Ct.App. 2011) 76 So.3d 42, 46*; *Duck Tours Seafari, Inc. v. City of Key West (Fla.Dist.Ct.App. 2004) 875 So.2d 650, 652*.) *Florida Statutes section 542.18* states, "Every contract, combination, or conspiracy in restraint of trade or commerce in this state is unlawful." *Florida Statutes section 542.19* states, "It is unlawful for any person to **[*533]** monopolize, attempt to monopolize, or combine or conspire with any other person or persons to monopolize **[**25]** any part of trade or commerce in this state." An unlawful horizontal restraint can occur when competitors conspire to induce an entity which deals with them to cease dealing with another market competitor. (*Parts Depot Company, L.P. v. Florida Auto Supply, Inc. (Fla.Dist.Ct.App. 1996) 669 So.2d 321, 324*; *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc. (Fla.Dist.Ct.App. 1984) 457 So.2d 1028, 1040*.) Plaintiff argues that if Florida ***antitrust law*** applies, it cannot recover for losses incurred outside that state. The only Florida anti-trust decision expressly on point is *Oce Printing Systems USA, Inc. v. Mailers Data Services, Inc. (Fla.Dist.Ct.App. 2000) 760 So.2d 1037, 1041*, which holds: "[I]t appears from the plain language of the Antitrust Act that it is aimed at regulating trade or commerce that occurs in Florida, regardless of where the contract, conspiracy, or monopoly occurs. It is the effect on trade that must occur in Florida, not the actions giving rise to the effect on trade."].) Plaintiff's alleged damages were sustained in California. Plaintiff alleges it, Intercare Specialty Risk Services and Shomer Insurance Agency, Incorporated are competitors in the same insurance field in the greater Los Angeles area. Plaintiff alleges the misconduct all occurred in Los Angeles County. Thus, plaintiff would be unable to state a claim under *Florida Statutes, sections 542.18* and *542.19*. None of the allegations in the first amended complaint allege any effect on trade or commerce in Florida. Under Florida ***antitrust law***, **[**26]** plaintiff is unable to recover *any damages* for any of the conduct occurring in Los Angeles County. Thus, under Florida law, the agreement to arbitrate plaintiff's antitrust claims violates that state's public policy. Plaintiff cannot recover for any damages sustained in Los Angeles County arising from the alleged horizontal restraint on trade under Florida law. Thus, as to plaintiff's horizontal restraint claims, the arbitration agreement is unenforceable. We need not address the parties' alternative arguments concerning a violation of California's fundamental public policies.

IV. DISPOSITION

The order denying in part the amended motion to compel arbitration is affirmed. Plaintiff, HCF Insurance Agency, may recover its appeal costs from defendant, Patriot Underwriters, Incorporated.

Turner, P.J.

We concur:

Opinion

MEMORANDUM OPINION

This matter is before the court on defendants' motion to dismiss plaintiffs' amended complaint. Dkt. # 79. Plaintiffs allege that defendants entered into and enforced an agreement restraining competition for each other's employees in violation of *Section 1* of the Sherman **[*2]** Act, *15 U.S.C. § 1*; the Virginia Antitrust Act, *Va. Code § 59.1-9.5*; and the Virginia Business Conspiracy Act, *Va. Code § 18.2-499*. The issues have been fully briefed, and oral argument was held on January 8, 2015. Because plaintiffs' allegations do not plausibly allege an agreement that unreasonably restrains trade in violation of *Section 1* of the Sherman Act or the Virginia Antitrust Act, and plaintiffs' personal employment interests are not subject to redress under the Virginia Business Conspiracy Act, defendants' motion must be **GRANTED** and the amended complaint dismissed.

I.

Abigail Hanger, J.R. Collins, Chris Howard, Jeanette Alexander Collins, Steven Ferrell, and Matthew Wolf ("plaintiffs")[1] all worked as at-will sales representatives for defendant Great Eastern Resort Corporation ("Great Eastern") at its Massanutten Resort in Rockingham County, Virginia. Am. Compl., Dkt. # 71, at ¶¶ 24-29. Chris Howard currently works as a sales representative for defendant Williamsburg Plantation, Inc., ("Williamsburg Plantation") and Jeanette Alexander Collins worked as a sales representative for Williamsburg Plantation in the past. Id. at ¶¶ 26-27. Defendant The Berkley Group, Inc. ("Berkley Group") shares a common directorate and corporate headquarters **[*3]** with Great Eastern and Williamsburg Plantation and manages the development, sales, and marketing operations of Great Eastern's and Williamsburg Plantation's Virginia resorts.[2] Id. at ¶¶ 30, 33.

At its Massanutten and Williamsburg, Virginia timeshare resorts, Berkley Group employs timeshare salespersons. Berkley Group requires these salespersons to sign an employment agreement containing non-compete, confidentiality, and non-solicitation clauses that, over time, have varied in the time periods and geographic regions covered. Id. at ¶¶ 76, 77. Each of the plaintiffs each entered into an employment agreement containing restrictive covenants against competition for a period of one (1) year within an eighty-five (85) mile radius of their place of employment and against the **[*4]** disclosure of confidential information or solicitation of employees, customers, suppliers, or vendors for two (2) years.[3] Def.'s Mem. In Supp. of Mot. to Dismiss, Ex. A, Dkt. # 80-1.

In 2006, certain Berkley Group sales representatives from Massanutten and Williamsburg, not including the plaintiffs, accepted employment with Bluegreen Corporation ("Bluegreen"), the owner and operator of timeshare resorts in Louisa County and Williamsburg, Virginia. Challenging the legality of these **[*5]** defections, Berkley Group filed lawsuits against Bluegreen in Virginia state court alleging tortious interference with contract and statutory business conspiracy.[4] Am. Compl., Dkt. # 71, at ¶ 69. In addition, Berkley Group sued Bluegreen in federal court in Florida for trademark infringement, unfair competition and unjust enrichment.[5] Ultimately, Berkley Group agreed with Bluegreen to settle all three lawsuits in a Global Settlement Agreement ("GSA") dated October 16, 2007. Id. at ¶ 70.[6]

---

[1] Plaintiffs claim to bring this suit on behalf of themselves and all others employed as sales representatives by one or more of the defendants for at least 90 days beginning on or after February 5, 2010. Because plaintiffs' amended complaint fails to state a claim upon which relief can be granted, class certification need not be addressed.

[2] As appropriate, the court will refer collectively to defendants as "Berkley Group."

[3] It is worth noting that plaintiffs do not challenge the legal validity of their non-competition, non-solicitation and confidentiality agreements with Berkley Group. Nor could they, as the agreements are reasonably limited in substantive scope, time and geography. For example, the non-compete provision is limited in its substantive scope to "performing the same or substantially similar duties they performed for [the Berkley Group resort] in the six (6) months prior to their departure"; in temporal scope to one year; and in geographic scope to an eighty-five (85) mile radius of the Berkley Group resort location where they worked in the six (6) months prior to their departure. Am. Compl., Dkt. No. 71, at ¶ 77.

[4] Great Eastern Resort Corp. v. Bluegreen Corp., et al., CL06-00600 (Va. Cir. 2006) (Rockingham County); Williamsburg Plantation, Inc. v. Bluegreen Corp., et al., CL06000441-00 (Va. Cir. 2006) (James City County).

[5] The Berkley Group, Inc. v. Bluegreen Corp., et al., Case No. 07-8039 (S.D. Fl. 2007).

[6] Plaintiffs refer throughout their Amended Complaint to the GSA but did not attach it as an exhibit. Defendants attached the GSA as Exhibit A to their Memorandum in Support of Defendants' Partial Motion to Dismiss. Dkt. # 14-1. In considering a *Rule 12(b)(6)* motion, the court may consider documents "attached to the motion to dismiss, so long as they are integral to the complaint and authentic." *Philips v. Pitt Cnty. Mem. Hosp., 572 F.3d 176, 180 (4th Cir. 2009)*. Plainly, the GSA is integral **[*6]** to

The GSA had a number of provisions, including payment of substantial monies by Bluegreen (¶ 1); the dismissal of the lawsuits (¶ 2); the transfer of 2,000 Florida timeshare prospects to the Berkley Group (¶ 3); a non-compete acknowledgement and notice provision (¶ 4); and mutual releases (¶ 5).

In this lawsuit, plaintiffs contend ¶ 4 of the GSA violates the antitrust laws. Paragraph 4 states:

> 4. Each party hereto acknowledges that the Berkley Parties and their affiliates, and the Bluegreen Parties and their affiliates, may enter into written employment agreements with their respective employees, which may contain non-competition, non-solicitation or confidentiality provisions. The Berkley Parties (for themselves and their affiliates) and the Bluegreen Parties (for themselves and their affiliates) agree to honor each other's non-competition, nonsolicitation and confidentiality agreements of which they have actual knowledge and are contained in written agreements that have not been held unenforceable by a **[*7]** court of competent jurisdiction as to the particular employee. The Bluegreen Parties agree not to challenge in a judicial proceeding a confidentiality, non-competition or non-solicitation provision contained in any employment agreement between an employee and a Berkley party or to assist any person in challenging any such provision. The Berkley Parties agree not to challenge in a judicial proceeding a confidentiality, non-competition or non-solicitation provision contained in any employment agreement between an employee and a Bluegreen party or to assist any person in challenging any such provision.
>
> To help to enforce this agreement, the Berkley Parties and the Bluegreen Parties shall, and shall cause their affiliates to, include in their pre-employment application process written questions that require the applicant to provide the name of his or her current and previous employers, and to disclose whether he or she has ever entered into a written employment agreement that included a noncompetition, non-solicitation or confidentiality agreement or other employment-related restrictive covenant. The Berkley Parties (for themselves and their affiliates) and the Bluegreen Parties (for themselves **[*8]** and their affiliates), agree that, in the event that any Berkley Party or affiliate or Bluegreen Party or affiliate hires a new employee subject to either a non-competition, non-solicitation or confidentiality agreement that has not been declared unenforceable by a court of competent jurisdiction as to such employee, the hiring party shall terminate the newly-hired employee within 10 days after it receives written notice from the other party of such non-competition or non-solicitation agreement, accompanied by a true copy of such agreement, and such termination shall be the exclusive remedy for such hiring.

The Amended Complaint alleges that after the settlement, senior management of the Berkley Group and Bluegreen monitored compliance with the GSA and corresponded about violations of its terms. Am. Compl., Dkt. # 71, at ¶ 80. For example, plaintiffs allege that in April 2011, Bluegreen refused to hire an applicant who previously entered into an employment agreement with Berkley Group's Williamsburg Plantation resort, despite the fact that he left Williamsburg Plantation's employment in August 2009 and his non-compete expired in August 2010, because of the confidentiality and non-solicitation **[*9]** clauses of longer duration. Id. In making the decision not to hire the applicant, Bluegreen sought the Berkley Group's "position" with regard to the former employee and its "interpretation of paragraph 4 of the [GSA]." Id. at ¶ 81. Berkley Group's counsel responded that

> [Berkley] is not interested in re-negotiating the terms of this agreement. The agreement clearly provides that neither party may hire a former employee of the other who is subject to a noncompetition or non-solicitation agreement. These provisions were part of the deal, reviewed by counsel for both sides, and signed off by both parties.

Id. at ¶ 82. Bluegreen replied that it

> will agree to honor Berkley's interpretation of the GSA (meaning that Bluegreen will not hire an employee who it knows is still covered by a Berkley non-compete or non-solicitation), and in return we expect Berkley to not hire an employee who it knows is still covered by a Bluegreen non-compete OR non-solicitation.

Id. at ¶ 83 (emphasis in original).

---

the complaint, and no issue has been raised as to its authenticity. Therefore, the court will consider the GSA attached to defendants' motion to dismiss in considering the *Rule 12(b)(6)* motion.

Plaintiffs allege that the GSA "ended recruitment and hiring between these competing employers and profoundly chilled employee mobility. Throughout the course of the agreement, Bluegreen repeatedly declined **[*10]** opportunities to hire current or former Berkley sales employees." Id. at ¶ 85. Plaintiffs allege that the GSA disrupted the normal functioning of wage setting and hiring of skilled timeshare sales personnel, id. at ¶¶ 93, and effectively eliminated competition for timeshare sales services. Id. at ¶ 94. Plaintiffs do not allege that they ever sought or were denied employment with Bluegreen because of the GSA or that Berkley Group and Bluegreen entered into an explicit agreement to suppress wages. Rather, they claim that absent the GSA, Bluegreen could freely solicit Berkley Group's employees, thus driving up the overall compensation and mobility of Berkley Group's employees. Id. at ¶ 66.

Berkley Group argues that plaintiffs' allegations fail to plausibly allege an antitrust claim under federal or state law and that plaintiffs' personal employment interests are not subject to redress under the Virginia Business Conspiracy Act. The court agrees.

II.

To survive a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, a complaint must contain sufficient factual matter which, accepted as true, "state[s] a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. This plausibility standard requires a plaintiff to demonstrate **[*11]** more than "a sheer possibility that a defendant has acted unlawfully." Id. When ruling on a motion to dismiss, the court must "accept the well-pled allegations of the complaint as true" and "construe the facts and reasonable inferences derived therefrom in the light most favorable to the plaintiff." *Ibarra v. United States. 120 F.3d 472, 474 (4th Cir. 1997)*. While the court must accept as true all well-pleaded factual allegations, the same is not true for legal conclusions. "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. Similarly, the court need not "accept as true allegations that contradict matters properly subject to judicial notice or by exhibit." *Veney v. Wyche, 293 F.3d 726, 730 (4th Cir. 2002)* (quoting *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001))*. Determining whether a complaint states a plausible claim for relief is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679*.

III.

Section 1 of the Sherman Act states that: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. To prove a *Section 1* violation, a plaintiff must first plead and then prove "(1) a contract, combination, **[*12]** or conspiracy; (2) that imposed an unreasonable restraint of trade."[7] *Robertson v. Sea Pines Real Estate Cos., Inc., 679 F.3d 278, 284 (4th Cir. 2012)* (quoting *Dickson v. Microsoft Corp., 309 F.3d 193, 202 (4th Cir. 2002))*. Where, as here, the plaintiffs' claims stem from an explicit horizontal agreement,[8] the question becomes whether the plaintiffs adequately pleaded an unreasonable restraint of trade.

A.

---

[7] The same analysis applies to the plaintiffs' Virginia Antitrust Act claim. *Va. Code Ann. § 59.1-9.17*; *Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988, 991 n.3 (4th Cir. 1990)*.

[8] "[A]n agreement among competitors on the way in which they will compete with one another." *NCAA v. Bd. of Regents of the Univ. of Okla., 468 U.S. 85, 99, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*.

For this inquiry, "the Supreme Court has authorized three methods of analysis: (1) *per se* analysis, for obviously anticompetitive restraints, (2) quick-look analysis, for those with some procompetitive justification, and (3) the full 'rule of reason,' for restraints whose net impact on competition is particularly difficult to determine." *Cont'l Airlines, Inc. v. United Airlines, Inc., 277 F.3d 499, 508-09 (4th Cir. 2002)*. "The rule of reason is the accepted standard for testing whether a practice restrains trade in violation of *§ 1*." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. "Resort to *per se* rules is confined to restraints ... 'that would always or almost always tend to restrict competition and decrease output.'" *Id. at 888* (quoting *Business Electronics Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (2006))*.

The *per se* rule applies only in those cases where the business practice in question is one, which on its face, has "no purpose except stifling of competition." **[*13]** *White Motor Co. v. United States, 372 U.S. 253, 263, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)*; see also *Northwest Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 289-90, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* (*per se* rule confined to limited types of anticompetitive practices); *Larry Muko, Inc. v. Sw. Pa. Bldg. & Const. Trades Council, 670 F.2d 421, 429 (3d Cir.)* (1982) ("Generally, the application of the *per se* rule has been limited to those 'classic' boycotts in which a group of business competitors seek to benefit economically by excluding other competitors from the marketplace.").

The Supreme Court has been cautious in extending the *per se* approach to claims that fall outside certain previously enumerated categories of liability. See e.g. *NCAA v. Bd. of Regents of the Univ. of Okla., 468 U.S. 85, 100 n.21, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* ("[J]udicial inexperience with a particular arrangement counsels against extending the reach of the *per se* rules."); *Broad. Music, Inc. v. Columbia Broad. Sys. Inc., 441 U.S. 1, 20 n.33, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)* ("[T]he *per se* rule is not employed until after considerable experience with the type of challenged restraint."); *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* ("[E]xperience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it . . . ."). Because of the fact specific inquiry involved in antitrust analysis, the Supreme Court has recognized that claims not within established categories of antitrust liability are more appropriately analyzed under the rule of reason where courts can balance the effect of the alleged anticompetitive activity against its competitive purposes within the relevant product and geographic **[*14]** markets.

Plaintiffs argue that the GSA is a naked restraint of trade subject to *per se* analysis because the GSA serves no purpose other than allocating employees between Berkley Group and Bluegreen based on an employee's current or former employer. Am. Compl., Dkt. # 71, at ¶ 76. This argument is undone, however, by the allegations of the Amended Complaint and the terms of the GSA itself. Rather than reflect a naked restraint of trade, Berkley Group entered into the GSA to resolve multiple lawsuits in multiple forums and to avoid future similar litigation. As such, it is an ancillary restraint that must be analyzed under the rule of reason.

Plaintiffs' allegations mirror those in *Weisfeld v. Sun Chemical Corp. , 210 F.R.D. 136 (D.N.J. 2002)*. Joseph Weisfeld, an employee of Sun Chemical, alleged that Sun Chemical and certain of its competitors violated *Section 1* of the Sherman Act by agreeing to restrain the labor market for technical employees in the printing ink industry. *Id. at 142*. The agreement arose out of the settlement of a lawsuit challenging the hiring of a Sun employee by Flint, one of its competitors. As part of the settlement agreement, Sun and Flint agreed that for a period of five years neither company would solicit the other's employees and agreed **[*15]** to notify the other if they were planning to hire an unsolicited employee. Weisfeld alleged that over time the scope of the unlawful agreement expanded to encompass an agreement not to hire or consider hiring each other's employees for an indefinite period. As a result, Weisfeld claimed, on behalf of himself and a putative class of similarly situated employees, that the agreement constituted a *per se* violation of *Section 1*. *Id. at 137*. Relying on *Eichorn v. AT&T Corp., 248 F.3d 131 (3dCir. 2001)*, a case which applied the rule of reason to no hire agreements executed subsequent to the sale of a company, the Weisfeld court concluded that its "case is properly within the rubric of the rule of reason." *Id. at 143*. Indeed, in Eichom, the Third Circuit found "no relevant case law" supporting those plaintiffs' allegations that a "no-hire agreement was *per se* illegal because it was a horizontal group boycott and a price fixing conspiracy." Eichorn, 248 F.3d at 143.[9]

In arguing for application of the *per se* rule, plaintiffs principally rely on two cases out of the Northern District of California, In re High-Tech Employee Antitrust Litigation, 856 F. Supp. 2d 1103 (N.D. Cal. 2012), and United States v. eBay, Inc., 968 F. Supp. 2d 1030 (N.D. Cal. 2013), but those cases do not resemble the circumstances presented here.

In re High-Tech Employee Antitrust Litigation was a class action suit arising out of an investigation by the Antitrust Division of the Department of Justice into the employment and recruitment practices of several high tech companies, namely Adobe Systems, Inc., Apple Inc., Google Inc., Intel Corp., Intuit Inc., Lucasfilm Ltd. and Pixar. "According to Plaintiffs, the conspiracy consisted of an interconnected web of express bilateral agreements, each with the active involvement and **[*17]** participation of a company under the control of the late Steven P. Jobs . . . and/or a company whose board shared at least one member of Apple's board of directors." 856 F. Supp. 2d at 1110. The plaintiffs claimed the defendants agreed not to recruit employees of each other's companies through cold calling and acted to oversee and enforce their agreements. Defendants moved to dismiss the complaint, arguing that the conspiracy alleged was implausible because the plaintiffs failed to allege a relevant market and that defendants had power within that market. The court disagreed, concluding that the plaintiffs' allegations were sufficient.

> Here, Plaintiffs allege that Defendants are high-tech companies in the market for skilled labor, where cold calling plays an important role in determining salaries and labor mobility. CAC ¶¶ 41-54. Plaintiffs further allege that the labor market for skilled high-tech labor is national. Id. ¶¶ 30, 39. Finally, Plaintiffs allege that "Defendants succeeded in lowering the compensation and mobility of their employees below what would have prevailed in a lawful and properly functioning labor market." Id. ¶ 108. Thus, the Court accepts as true, as the Court must on a motion to dismiss, **[*18]** Plaintiffs' allegation that Defendants succeeded in distorting the market through their agreements. Accordingly, it is reasonable to infer that Defendants had the market power to do so. Cf. *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1001 (9th Cir. 2008)* ("Evidence of restricted output and supracompetitive prices is direct evidence of market power." (quoting Forsyth v. Humana, Inc., 114 F.3d 1467, 1475 (9th Cir. 1997))).

856 F. Supp. 2d at 1122.

Similarly, the court declined to determine whether to apply the *per se* rule, quick look or full blown rule of reason analysis at the motion to dismiss stage in United States v. eBay, Inc., 968 F. Supp. 2d 1030 (N.D. Cal. 2013). In that case, the government alleged that eBay and Intuit entered into a no-solicitation/no-hire agreement with each other. The alleged agreement arose out of conversations between eBay executives and Scott Cook, founder and chairman of Intuit, who also served on eBay's board. The complaint alleged Cook had stated that "'we don't recruit from board companies, period' and '[w]e're passionate on this.'" Id. at 1033. The court concluded the "allegations concerning the agreement between eBay and Intuit, taken as true, suffice to state a horizontal market allocation agreement." Id. at 1039. The court declined to determine at the pleadings stage whether to apply the *per se* rule, determining that factual development was necessary to **[*19]** resolve the question.

> eBay challenges the United States' assertion that the alleged agreement is a naked one, instead arguing that the agreement is ancillary to a legitimate procompetitive business purpose: Mr. Cook's service on eBay's board. The court agrees with eBay's contention that the fact that the United States labeled the agreement a

[9] Plaintiffs argue that the no-hire agreement in Eichom was limited to a period of eight months following the sale of the company, and that the GSA is not so limited. But that argument misses the point of the GSA. To be sure, the GSA itself is not time-limited, but all it does is bind Berkley Group and Bluegreen to honor valid **[*16]** restrictive covenants in each other's employment contracts. The non-competition provision in the Berkley Group employment contracts is limited to one year, and the non-solicitation and confidentiality provisions to two years. In substance, the GSA does little more than bind Berkley Group and Bluegreen not to tortiously interfere with valid employment contracts. Given the context in which the GSA arose, to settle just such lawsuits, the GSA is not properly subject to the *per se* rule.

> naked one does not make it so. By the same token, however, the court cannot hold that the agreement is ancillary simply because eBay posits that it is. The court must instead make that determination based on factual evidence relating to the agreement's formation and character.
>
> * * * *
>
> Though the parties supply substantial legal argument to support their respective positions, they do so without the benefit of discovery, and thus without sufficient factual evidence to support their contentions. At this stage in this action, the court simply cannot determine with certainty the nature of the restraint, and by extension, the level of analysis to apply.

Id. at 1039-40.

This case presents a far different situation — and far different allegations — than those presented in *High-Tech Employees* and *United States v. eBay*. Unlike in either of those two cases, which alleged **[*20]** naked restraints of trade, the amended complaint in this case makes it plain that ¶ 4 of the GSA was not. Rather, the restraint challenged in this lawsuit is one piece of a global settlement agreement between the parties to resolve three suits in two states alleging breach of non-competition agreements, related business torts, trademark infringement and unfair competition. Unlike in *High-Tech Employees* and *United States v. eBay*, where the pleadings did not contain any suggestion that the non-solicitation agreement was ancillary to anything, the pleadings in this case clearly establish that the provisions of ¶ 4 at issue in this case were part of a larger agreement to settle multiple lawsuits in multiple forums. It is clear from the terms of the GSA and the context in which it arose that ¶ 4 exists to keep the parties from becoming embroiled in future lawsuits making similar allegations.

In that regard, it is likewise important to focus on what ¶ 4 of the GSA actually provides. Unlike the allegations in *High-Tech Employees* and *United States v. eBay*, ¶ 4 of the GSA does not contain a blanket no hire, no cold calling or no solicitation agreement. The GSA is far narrower, reflecting only **[*21]** an agreement "to honor each other's non-competition, non-solicitation and confidentiality agreements of which they have actual knowledge that are contained in written agreements that have not been held unenforceable by a court of competent jurisdiction as to the particular employee." Mem. Supp. Partial Mot. to Dismiss, Ex. A, Dkt. #14-1. In short, the agreement is little more than a covenant not to violate the law by intentionally interfering with each other's employment contracts. And because the restrictive covenants in the Berkley Group employment contracts are narrowly drawn in terms of substantive scope, time and geography, the alleged restraint posed by the GSA is correspondingly narrow. For example, as the Berkley Group non-competes are limited to 85 miles surrounding the employee's last place of employment with Berkley Group, the agreement to honor each other's non-competes is necessarily limited only to areas where Berkley Group and Bluegreen have timeshare resorts within 85 miles of one another. The parties also agreed not to challenge the validity of confidentiality, non-competition or non-solicitation provisions of each other's employment agreements, to ask job applicants **[*22]** whether they were subject to such agreements, and to terminate a newly-hired employee subject to such an agreement upon receiving notice from the other party. Id. Having been subject to multiple lawsuits in multiple forums, the agreement crafted by the parties in 4 of the GSA is plainly designed to forestall future litigation. Consistent with the analysis employed by the court in Weisfeld, ¶ 4 of the GSA cannot be divorced from the context in which it arose and its express terms reflecting that it was part of a broader settlement agreement. See *Weisfeld, 210 F.R.D. at 138, 142*. As such, ¶ 4 of the GSA cannot be considered to be a naked restraint of trade with obvious anticompetitive effects subject to the *per se* rule.[10] Rather, the validity of such an agreement must be assessed under the rule of reason.[11]

---

[10] Nor does the "quick look" method of analysis apply here. "'Quick look' is essentially an abbreviated form of rule of reason analysis, to be used in cases in which the likelihood of anticompetitive effects is so obvious that 'an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets.'" *Madison Square Garden, L.P. v. Nat'l Hockey League, 270 F. App'x 56, 58 (2d Cir. 2008)* (quoting *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999))*.

[11] Defendants **[*23]** filed a partial motion to dismiss the original complaint, asking the court to find that plaintiffs' claim that the *per se* rule or quick look approach did not apply to this case. After briefing on argument, the court did just that, stating as follows:

B.

While *§ 1* of the Sherman Act is framed in broad terms, the courts have long limited its application to concerted activity that unreasonably restrains trade. **[*24]** "Not every instance of cooperation between two people is a potential 'contract, combination . . . or conspiracy, in restraint of trade.'" *Loren Data Corp. v. GXS, Inc., 501 Fed. Appx. 275, 280 (4th Cir. 2012)* (quoting *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 189-90, 130 S. Ct. 2201, 176 L. Ed. 2d 947(2010)*. Indeed, "*Section 1* applies only to concerted action that restrains trade." *Am. Needle, 560 U.S. at 190*. Thus, to establish a claim under *§ 1* of the Sherman Act, a plaintiff must establish that the conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets. See, e.g., *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (Analysis under the rule of reason requires "an inquiry into market power and market structure designed to assess the combination's actual effect.") "In the rule of reason analysis, 'the reasonableness of a restraint is evaluated based on its impact on competition as a whole within the relevant market." *Dickson v. Microsoft Corp., 309 F. 3d 193, 206 (4th Cir. 2002)* (quoting *Oksanen v. Page Mem. Hosp., 945 F. 2d 696, 708 (4th Cir. 1991))*. As the Fourth Circuit noted in Dickson v. Microsoft Corp.:

> This evaluation requires a showing of "anticompetitive effect" resulting from the agreement in restraint of trade. To have an "anticompetitive effect," conduct "must harm the competitive *process* and thereby harm consumers." *United States v. Microsoft, 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*. "[H]arm to one or many competitors will not suffice." *Id.* "The [Sherman Act] directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly **[*25]** tends to destroy competition itself." *Id.* (internal quotation marks omitted). Thus, an inquiry into the lawfulness of the restraint begins "by identifying the ways in which a challenged restraint might possibly impair competition." 7 [Phillip E.] Areeda & [Herbert] Hovenkamp [***Antitrust Law***] ¶ 1503a, at 372 (1995). After identifying the type of possible harm to competition alleged, we must proceed "to determine whether that harm is not only possible but likely and significant," which requires "examination of market circumstances," including market power and share. 7 *id.* ¶¶ 1503a 1503b, at 374-77.

309 F.3d at 206.

Berkley Group argues that the amended complaint does not plausibly allege an unreasonable restraint of trade, the existence of market power or relevant product and geographic markets. Plaintiffs respond that the amended complaint sufficiently alleges a conspiracy between Berkley Group and Bluegreen to restrain trade in the purchase of timeshare sales services and posits two relevant geographic markets consisting of the areas around the Great Eastern timeshare resorts at Massanutten and in Williamsburg, Virginia. "'Theorizing about conceivable impairments of competition does not, of course, **[*26]** prove that any such impairment has occurred or is likely,' or much less is 'substantial in magnitude.'" *Dickson v. Microsoft Corp., 309 F.3d at 207* (quoting 7 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1503a, at 373 (1995)). The court must examine whether plaintiffs have "alleged the likelihood of a substantial anti-competitive harm caused by [the GSA], an inquiry that requires [plaintiffs] to allege facts demonstrating 'that defendants played a significant role in the relevant market.'" Id. (quoting *Oksanen. 945 F.2d at 709*).

> [T]his is not a naked, horizontal restraint of trade. This is not horizontal market allocation. This is not bid-rigging. This is not price fixing. This is not an agreement to exchange customers. This is an ancillary restraint of trade, if you call it that, that is resulting from the settlement of a lawsuit over non-competes. And it seems to me that all this thing does is — the agreement says we're not going to violate the law. We won't break the law by stealing your customers if you agree not to break the law by stealing my customers.

Trans. of April 3, 2014 Hearing, Dkt. No. 60, at 3. At that juncture, defendants did not challenge the legal sufficiency of the complaint under the rule of reason. Following the filing of the amended complaint, defendants did so, which the court addresses herein.

"Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant. . . market." *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (2d Cir. 2001)*. Such hesitancy is unwarranted in this case, however, due to the innate implausibility of plaintiff's allegations.

"To survive a *Rule 12(b)(6)* motion to dismiss, an alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes—analysis of the interchangeability of use or the cross-elasticity of demand, and it must be plausible." *Todd, 275 F.3d at 200* (internal citation and quotation marks omitted). "The criteria to be used in determining the appropriate geographic market are essentially similar to those used to determine the relevant **[*27]** product market." *Brown Shoe Co. v. United States, 370 U.S. 294, 336, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. The geographic market must "both correspond to the commercial realities of the industry and be economically significant." *Id. at 336-37* (internal quotations removed).

In product market terms, plaintiffs allege a buyer-side conspiracy affecting the market in which employers compete to purchase the services of timeshare salespersons. Am. Compl., Dkt.# 71, at ¶ 47. While such a broad allegation sounds nefarious, the actual restraint found in the GSA is far less so.

First, the restraint only involves two timeshare owners, Berkley Group and Bluegreen. A relevant product market of purchasers of timeshare salesperson services cannot plausibly be limited to these two entities. While plaintiffs concede in the amended complaint that "[c]ompanies in the same or similar industries often compete to hire and retain talented employees," Am. Compl., Dkt. # 71, at ¶ 47, they make no effort to identify such companies or industries, or even assign market shares to Berkley Group and Bluegreen in their artificially and arbitrarily drawn market. At most, the amended complaint alleges that Bluegreen and Berkley Group are in the timeshare resort business and compete as buyers of timeshare salespersons' services. **[*28]** But the Amended Complaint is devoid of any factual allegation that these two entities have market power, enjoy any measure of market share, are so unique as to constitute the entire product market, or that timeshare sales personnel could not look elsewhere for employment.

In short, plaintiffs seek to define an unreasonably narrow and implausible product market limited to just two timeshare sales companies. In Eichorn, the plaintiffs made similar allegations, seeking to define the market as:

> potential employers within a 35 mile radius of Holmdel/Middletown with the capacity and capability of employing or utilizing large numbers of persons with specialized experience in high speed data communications equipment of the sort Paradyne develops and makes . . . who can provide continuity of the pension benefits which have accrued to [plaintiffs] under the AT & T and/or Lucent pension plans.

248 F.3d at 147 (citation omitted). This definition had the effect of including only the defendants in the relevant market. Id. The Eichorn court held that the proper market definition "includes all those technology companies and network services providers who actively compete for employees with the skills and training possessed **[*29]** by plaintiffs." *Id. at 147-48*. The same is true here. Not only do plaintiffs' allegations fail to consider competition posed by other timeshare resorts, they wholly fail to account for competition posed by purchasers of salespersons' services generally. Even if industry specific knowledge will not directly benefit a prospective employer, sales experience is highly sought after in numerous industries, which the plaintiffs have failed to even attempt to identify. Plaintiffs make no effort to consider, as they must, the reasonable interchangeability and cross-elasticity of demand for their services. Absent some allegation suggesting that Bluegreen and the Berkley Group are the only purchasers of timeshares salespersons' services, there is no plausible basis to suggest, much less allege, that the Bluegreen and Berkley Group constitute the entirety of the relevant market. Plaintiffs cannot, and do not, allege that Bluegreen and Berkley Group are the only buyers of such services to whom persons seeking timeshare sales jobs could turn or have market power in an appropriately defined market. Thus, it is implausible to suggest that the relevant product market be confined just to them.

Even more implausible **[*30]** is the relevant geographic market proposed by plaintiffs. The plaintiffs focus on the two areas of Virginia, Massanutten and Williamsburg, where Berkley Group and Bluegreen have timeshare resorts within eighty-five (85) miles of each other. Am. Compl., Dkt. # 71, at ¶ 88. It is utterly unrealistic to suggest that the relevant geographic market be confined to two enclaves in non-contiguous regions of Virginia. The plaintiffs do not and cannot even allege that these are the only two areas in Virginia having timeshare resorts. In short, it simply makes "no economic sense," *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, for plaintiffs to gerrymand a relevant geographic market exclusively limited to an eighty-five (85) mile area surrounding the Berkley Group timeshare resorts in Massanutten and Williamsburg and ignore, for example, competition posed by timeshare resorts in other parts of Virginia and surrounding areas. For example, while Virginia Beach and the Outer Banks of North Carolina are in close proximity to Williamsburg, plaintiffs arbitrarily exclude timeshare resorts located there from the relevant market. The reason, of course, that plaintiffs must strain to confine the relevant geographic market to these localities is **[*31]** because the GSA itself has only an isolated territorial impact. In the GSA, Bluegreen agrees to honor noncompetition agreements involving Berkley Group employees. These noncompetition provisions are limited to a radius of eighty-five (85) miles surrounding the timeshare resort where the employee worked for defendants. Thus, the GSA only applies to areas where Bluegreen has a timeshare resort within eighty-five (85) miles of a resort operated by Berkley Group. Such a geographic market is entirely artificial and bears no relation to the economic realities of the market. It is utterly implausible. Plaintiffs' failure to properly allege relevant product and geographic markets, and, thus, to plausibly allege Berkley Group and Bluegreen's market share, or the exercise of market power, therein, is fatal to their claims. Absent such plausible allegations, plaintiffs cannot establish that the GSA is "capable of causing any substantial harm to competition." *Dickson, 309 F.3d at 208*.

Because the plaintiffs have failed to plausibly allege an unreasonable restraint of trade and have not put forth a plausible product market or geographic market, they cannot state a claim under either *Section 1* of the Sherman Act or the corresponding **[*32]** Virginia Antitrust Act.

IV.

Plaintiffs also fail to state a claim under the Virginia Business Conspiracy Act, *Va. Code § 18.2-499*. "[I]t is well-settled that [*§ 18.2-499*] applies only to injuries 'to business and property interests, not to personal or employment interests.'" *Shirvinski v. U.S. Coast Guard, 673 F.3d 308, 321 (4th Cir. 2012)* (quoting *Andrews v. Ring, 266 Va. 311, 585 S.E.2d 780, 784 (2003))*. The harm alleged throughout the amended complaint concerns the employment interests of timeshare salespersons. For example, ¶ 67 alleges that "[t]he agreement harmed and continues to harm employees by reducing the pay, benefits, and employment opportunities they might otherwise have earned if competition had not been eliminated." Am. Compl., Dkt. # 71, at ¶ 67. Likewise, in ¶ 90, the amended complaint alleges "[t]he agreement between Berkley and Bluegreen was an ideal tool to suppress employee compensation." Id. at ¶ 90. Paragraph 131 claims that "this agreement suppressed competition between Berkley and Bluegreen for skilled workers, with the natural and intended effect of reducing their compensation, and limiting affected employees' ability to secure better compensation, benefits and working conditions." Id. at ¶ 131. Despite these allegations, plaintiffs seek on brief to skirt this well recognized limitation on the Virginia Business Conspiracy **[*33]** Act by characterizing the injury as suppressed price. But even this argument is unavailing as the price they claim has been suppressed is their compensation. A claim of reduced compensation is simply not actionable under the Virginia Business Conspiracy Act.

In Shirvinski, the plaintiff was a private consultant working at a United States Coast Guard facility. After workplace tensions flared out of hand, the plaintiff was terminated by the subcontractor who employed him. The plaintiff alleged a conspiracy under *Va. Code § 18.2-499*, but the Fourth Circuit Court of Appeals concluded that the plaintiff's claim failed because he could not "demonstrate an injury to a business interest." *673 F.3d at 321*. Because the plaintiff "neither owned a company, did business as a separate organization, nor had a separate tax identification number for his contractor status[ ] . . . [he] suffered damage only to his personal employment prospects." *Id*. Here, plaintiffs' injury is only to their employment interests. Plaintiffs are not private contractors or individual companies, nor do they allege they conduct their timeshare sales as a separate organization or under separate tax identification numbers. The only alleged injury is to their **[*34]** employment interests in their personal wages.

The cases cited by plaintiffs are distinguishable from this case. In *Wuchenich v. Shenandoah Mem. Hosp., 215 F.3d 1324* [published in full-text format at *2000 U.S. App. LEXIS 11557], 2000 WL 665633* (4th Cir. 2000) (unpublished table decision), Dr. Wuchenich provided anesthesiology services to the hospital's patients under a written twelve-month Physician Guarantee Agreement with mutual covenants and agreements. *2000 U.S. App. LEXIS 11557, 2000 WL 665633 at *1*. In order to begin working at the hospital, Dr. Wuchenich closed his well established private practice in California and opened a new private practice in Woodstock, Virginia. Unlike the plaintiffs, Dr. Wuchenich maintained his own business, a private practice, through which he associated with and provided services to the hospital and its patients under a contract. Similarly, in *Luckett v. Jennings, 246 Va. 303, 435 S.E.2d 400, 10 Va. Law Rep. 296 (1993)*, Luckett alleged harm to his separate "business of real estate development." *246 Va. at 305, 435 S.E.2d at 400*. Luckett "describe [d] the nature of [his] business as a real estate developer, including the specific types of activities he undert[ook] in the conduct of his business." *Id. at 307-08, 435 S.E.2d at 402*. In contrast, plaintiffs' claims are solely rooted in their employment relationships with Berkley Group and do not constitute injury to a business or property interest. As such, plaintiffs' employment interests are not subject to redress under the Virginia Business **[*35]** Conspiracy Act.

V.

In sum, plaintiffs fail to plausibly allege an unreasonable restraint of trade in a properly defined relevant product or geographic market. Further, they seek redress for merely employment interests, not business or property interests. As a result, plaintiffs have failed to allege a plausible claim under *Section 1* of the Sherman Act, *15 U.S.C. § 1*; the Virginia Antitrust Act, *Va. Code § 59.1-9.5*; or the Virginia Business Conspiracy Act, *Va. Code § 18.2-499*, and the defendant's motion to dismiss must be **GRANTED**. Plaintiffs have already had an opportunity to amend their complaint, and the court believes that further amendment would be futile. Accordingly, plaintiffs' claim will be dismissed with prejudice.

An appropriate Order will be entered.

United States District Judge

ORDER

For the reasons stated in the accompanying Memorandum Opinion entered this day, defendants' Motion to Dismiss (Dkt. # 79) is hereby **GRANTED**. Accordingly, this case is **DISMISSED WITH PREJUDICE** and **STRICKEN** from the active docket of the court.

It is **SO ORDERED**.

The Clerk is directed to send a copy of this Order to all counsel of record.

Opinion

ORDER

Evanston Northwestern Healthcare merged with Highland Park Hospital and later became NorthShore University HealthSystem. R. 676, Def.'s Sum. J. Br. at 1. Seven years after the merger, this class action was filed, R. 1, Compl.,[1] alleging that the union violated federal antitrust laws. In a pending motion for summary judgment, NorthShore argues that the Class **[*4]** sued too late. R. 675, Mot. Summ. J. Now, the Class wants more time to complete outstanding discovery that it says it must have to respond to NorthShore's motion. To obtain that time and discovery, the Class has moved under *Rule 56(d)*—formerly 56(f)—of the Federal Rules of Civil Procedure. R. 680, 56(d) Mot. As explained below, the motion is granted.

I. Legal Standard

"If a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot present facts essential to justify its opposition, the court may: (1) defer considering the motion or deny it; (2) allow time to ... take discovery; or (3) issue any other appropriate order." *Fed. R. Civ. P. 56(d)*. "[This] Rule places the burden on the non-movant that believes additional discovery is required to 'state the reasons why the party cannot adequately respond to the summary judgment motion without further discovery.'" *Sterk v. Redbox Automated Retail, LLC, 770 F.3d 618, 628 (7th Cir. 2014)* (quoting *Deere & Co. v. Ohio Gear, 462 F.3d 701, 706 (7th Cir. 2006))*.

II. Analysis

The Class's *Rule 56(d)* motion and NorthShore's underlying summary judgment motion turn on when the Class's claims accrued and whether, after they accrued, they were somehow tolled. NorthShore argues the claims accrued on the date of the merger, expired four years later, and were never tolled. R. 690, Def.'s Opp. Br. at 2. The **[*5]** discovery that the Class wants, says NorthShore, could not possibly undermine these premises. The Class disagrees. 56(d) Mot. ¶¶ 3-6. The Class names various accrual rules and tolling doctrines, arguing that, alone or in combination, they might make its claims timely, depending on what the outstanding discovery shows. *Id.*

---

[1] Subject-matter jurisdiction is proper under *28 U.S.C. § 1331*. Citations to the record filings are "R." followed by the docket number and then a page or paragraph number.

For the reasons explained below, both for pragmatic case-management reasons and because the Court disagrees with NorthShore's take on the relevant law, the Class's *Rule 56(d)* motion is granted and NorthShore's motion for summary judgment is denied without prejudice. NorthShore may refile its summary judgment motion following the discovery cutoff, which is now set for July 31, 2015. R. 671. The underlying summary judgment motion is denied—as opposed to deferred—because NorthShore should update and refile the motion to account for what this Order says about the applicable statute-of-limitations law and for what is found in discovery (if anything).

A. Case Management

At this stage of the litigation, case management alone justifies granting the Class's *Rule 56(d)* motion. As discussed later, there is some uncertainty in the limitations-period law that applies to the Class's claims. If the Court **[*6]** were to cutoff limitations-related discovery now, but it turns out later (on appeal, for example) that certain doctrines do apply, then the parties would be without the facts to apply the doctrines. If instead the parties are allowed to engage in the discovery now, then the factual premises will be available for the parties to argue; indeed, the uncovered facts might even render unnecessary definitive decisions on certain doctrines, because the facts might not support them. The point is that it is worth accounting for the possibility that the Seventh Circuit will disagree with this Court's limitations rulings. The Seventh Circuit has not decided the statute-of-limitations questions at issue in the underlying summary judgment motion: it has not decided when purchaser-plaintiffs' merger-based monopolization claims under *§ 2* of the Sherman Act accrue; it has not decided when purchaser-plaintiffs' claims under *§ 7* of the Clayton Act accrue; and it has not decided whether the continuing violation doctrine or the discovery rule apply to either type of claim. And, as two leading commentators on ***antitrust law*** put it, when it comes to antitrust limitations law, "the cases are inconsistent and often **[*7]** hypertechnical." Areeda & Hovenkamp, ***Antitrust Law*** *§ 320* (4th ed., 2014).

Under these circumstances, more information—including the information sought by the Class—is better. More information might assist this Court in reaching an accurate result. And more information might assist the Seventh Circuit in the same way, or perhaps by giving it alternate grounds to consider. *See, e.g., Burns v. Orthotek, Inc. Employees' Pension Plan & Trust, 657 F.3d 571, 575 (7th Cir. 2011)* (Seventh Circuit "can affirm on any ground that the record fairly supports and the appellee has not waived"). It would be better to put the parties in a position to avoid a remand, if possible.

This is especially so because the Class is asking for a modest amount of limitations-related discovery. 56(d) Mot. ¶¶ 7-10, 13. The outstanding discovery—a motion to compel, three depositions (at least two already scheduled), and a document subpoena (already served)—might even conclude by the existing fact-discovery cut-off, just two months away. Even if there is some follow-up discovery, the deadline is do-able, or at least any extension would likely be short. The Class is not proposing an undue discovery undertaking, at least when considered in the context of this already sprawling litigation. They are proposing only **[*8]** to complete what they began—if not as soon as they could have—at least in time to have a reasonable expectation that they would meet the current deadline.

B. Accrual of the Class's Claims

Of course if the answer to the limitations-period questions were clear, there would be no case-management need to allow discovery. NorthShore argues that it has a sure-thing winner on the limitations defense, relying on *Z Technologies Corp. v. Lubrizol Corp., 753 F.3d 594 (6th Cir. 2014)*, and *Midwestern Mach. Co. v. Nw. Airlines, Inc., 392 F.3d 265 (8th Cir. 2004)*. With these cases, NorthShore makes a simple argument: All antitrust claims are subject to a four-year statute of limitations; all antitrust claims challenging mergers accrue on the date of the merger; and here, the Class sued more than four years after the merger. Def.'s Opp. Br. at 1-3. No tolling or alternative accrual doctrines apply, so the Class has no wiggle room. *Id.* at 3. Its claims are hopelessly time barred. For at least two reasons, the situation is not as hopeless as NorthShore thinks.

1. *Berkey Photo, Inc. v. Eastman Kodak Co.*

The Class's monopolization claim under § 2 of the Sherman Act (15 U.S.C. § 2) might well be timely under Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 294-96 (2d Cir. 1979). *Berkey* held that a "purchaser's [§ 2] claim cannot accrue until [the purchaser] actually pays" to the monopolist a supracompetitive price. Id. at 295. Here, the Class members **[*9]** likely made purchases from NorthShore at allegedly supracompetitive prices within the limitations period. So claims based on those payments, at least,[2] would be timely were Berkey to control.

And *Berkey* likely would control. Although the Seventh Circuit has not yet adopted *Berkey*, there are reasons to believe it probably would if given the chance. First, the Seventh Circuit has frequently relied on *Berkey*'s lengthy treatment of what conduct is unlawful monopolization, as distinct from lawful competition. Goldwasser v. Ameritech Corp., 222 F.3d 390, 397 (7th Cir. 2000); Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 65 F.3d 1406, 1412-13 (7th Cir. 1995), *as amended on denial of reh'g* (Oct. 13, 1995); Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 376 (7th Cir. 1986); MCI Commc'ns Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1106 (7th Cir. 1983). Given that *Berkey*'s accrual rule flowed, in part, from its decision that anticompetitive conduct is required to violate § 2 (as opposed to simply possessing monopoly power), it would be odd for this Circuit to approve of *Berkey*'s holding on that point without also adopting its take on accrual of antitrust claims.[3]

What's more, the Seventh Circuit has even cited *Berkey*'s limitations analysis with approval, albeit not in an antitrust case. Taylor v. Meirick, 712 F.2d 1112, 1118 (7th Cir. 1983). *Taylor* cited *Berkey* for the "general principle that the statute of limitations does not begin to run on a continuing wrong till the wrong is over and done with." *Id.*[4] It would be strange **[*10]** for the Court to welcome *Berkey* as a "general principle" but then refuse to apply it in the context it came from. Moreover, if the Circuit were to extend its adoption of *Berkey* formally into antitrust, it would not be alone. Several other courts have followed *Berkey*'s accrual rule. In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 2015 WL 1311352, at *8 (D. Conn. 2015) ("Courts in other districts and circuits have used the same reasoning applied in *Berkey*.") (citing four other district-court cases).

On top of all of that, *Berkey* does make sense. Without it, purchaser-plaintiffs' monopolization claims would supposedly accrue before the plaintiffs are even injured, and it is no surprise that general limitations-period law starts the clock on injury, which is the point in time when plaintiffs know (or should know) that there is a claim. Moreover, the rule NorthShore advocates—that, without exception, all merger-based antitrust claims expire four

---

[2] Overcharges as far back as February 10, 2000—just 40 days after the merger—may also be recoverable. The Class filed its complaint on August 7, 2007. Compl. That would ordinarily only allow the Class to reach back to 2003, but 15 U.S.C. § 16(i) tolls private rights of action whenever overlapping government cases are pending: "[w]henever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws ... the running of the statute of limitations in respect to every private or State right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter." Here, the Federal Trade Commission "instituted" a proceeding against NorthShore based on the merger on February 10, 2004. So the limitations period for all related "right[s] of action" that existed on that date, including the Class's, were then "suspended" until the FTC action resolved. The FTC action lasted until well after the Class filed. Case Timeline, Federal Trade Commission, available at https://www.ftc.gov/enforcement/cases-proceedings/0110234/evanston-northwestern-healthcare-corporation-enh-medical-group . So, in short, whatever rights the Class had 40 days after the merger, were likely still around when the Class filed its complaint.

[3] It is worth noting that the Seventh Circuit often relies on the two leading antitrust commentators mentioned earlier in the opinion, and those commentators approve of the *Berkey* accrual rule. Areeda & Hovenkamp, ***Antitrust Law*** § 320c4 ("[C]ustomers of the monopolist are not injured until after the monopolist causes them injury through higher prices.").

[4] *Taylor*'s treatment of *Berkey* exemplifies how courts have had a hard time categorizing the case. *Taylor*, with its reference to "continuing wrongs," appears to consider *Berkey* a continuing-violation-doctrine case. 712 F.2d at 1118. Other courts identify *Berkey* as a straight-forward application of the rule from Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338-40, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971), which is that "the cause of action for future damages, if they ever occur, will accrue only on the date they are suffered." *See* Rite Aid Corp. v. Am. Exp. Travel Related Servs. Co., 708 F. Supp. 2d 257, 267 (E.D.N.Y. 2010) ("*Berkey*'s purchaser accrual rule is based on the rationale that a purchaser's damages for paying overcharges are 'entirely speculative' until the purchaser actually pays the overcharge.").

years after the merger—lends a potential windfall to companies that merge into monopoly in year zero but then only begin to exploit their market power after year four. NorthShore's rule would leave purchaser-plaintiffs in that situation without recourse—never mind that those plaintiffs may have **[*11]** had no reason to sue until it was too late.

In light of *Berkey*, the cases relied on by NorthShore (*Z Technologies* and *Midwestern*) are less persuasive. For starters, neither case discusses—much less distinguishes—*Berkey. Midwestern* is also distinguishable because it did not involve a monopolization claim under *§ 2* of the Sherman Act. *Midwestern* only dealt with *§ 7* of the Clayton Act (*15 U.S.C. § 18*). *392 F.3d at 268*. This is a crucial point when trying to apply that case here. *Midwestern* relied on the difference between the *§ 2* and *§ 7* claims in deciding that *§ 7* claims accrued on the date of the merger. *Id. at 270-73*. And one of the reasons it accepted the accrual-on-merger rule for *§ 7*, in spite of the possibility that some plaintiffs' claims would expire before those plaintiffs were injured, was because those plaintiffs could still sue under *§ 2*. *Id. at 272* ("Finding that a continuing violation theory does not apply to *§ 7* does not give a 'green light' to monopolists ... because merged firms, like all firms, are still subject to *[§ 2]*."). Contrary to what NorthShore says, this part of *Midwestern* actually implies that *§ 2* claims accrue sometime *after* the merger; that, in effect, *Berkey* is right. Even *Midwestern*'s reasons for rejecting the continuing violation doctrine **[*12]** were specific to *§ 7*, which the court again contrasted against *§ 2*. *Id. at 271* ("Unlike ... maintaining [ ] a monopoly, a merger is a discrete act.").

It is true that *Z Technologies* is not so readily distinguishable, because it involved both *§ 2* and *§ 7* claims. 753 F.3d at 595. But it focused almost exclusively on the continuing violation doctrine. *Id.* at 598-600. In other words, it took accrual-on-merger as a given and then considered tolling. (It appears, from a review of the briefing in the Sixth Circuit in *Z Technologies*, that the parties there did not mention *Berkey*.) So the Court could agree with *Z Technologies* that the continuing violation doctrine does not apply to merger cases and still decide against NorthShore by relying on *Berkey*, all without contradicting anything in *Z Technologies*.

2. The Discovery Rule

Like *Berkey*, the discovery rule might also assist the Class. Under the discovery rule, "[s]tatutes of limitations in federal civil cases ... begin to run upon discovery of the injury from the alleged violation." *In re Sulfuric Acid Antitrust Litig., 703 F.3d 1004, 1014 (7th Cir. 2012)*. The Class argues that the outstanding discovery will help it prove that it could not have discovered its injuries until after the merger; specifically, until long enough after the merger to make its claims timely. **[*13]** NorthShore responds—but does not cite anything in support—that the discovery rule does not apply to merger-based antitrust claims.

NorthShore is almost certainly wrong. Over and over the Seventh Circuit has affirmed that the rule is general to all federal civil statutes absent contrary word from Congress. *See, e.g., In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006)* ("As in other areas of the law, however, in the absence of a contrary directive from Congress this rule is qualified by the discovery rule, which postpones the beginning of the limitations period from the date when the plaintiff is wronged to the date when he discovers he has been injured.") (internal citations and quotations omitted); *Cada v. Baxter Healthcare Corp., 920 F.2d 446, 450-51 (7th Cir.1991)* (discovery rule is "read into statutes of limitations in federal-question cases ... in the absence of a contrary directive from Congress"). There is no word from Congress about merger-based *§ 2* and *§ 7* claims, so if and when the limitations summary-judgment motion is renewed after discovery, the Court likely will rely on the Seventh Circuit's very broad statements of the rule's applicability, even though the Circuit has never expressly held that it applies to cases like this one. Like *Berkey*, the discovery rule justifies the modest delay sought **[*14]** by the Class.

C. NorthShore's Remaining Objections

1. Diligence

The Court does have concerns about the Class's diligence in pursuing the outstanding discovery. The Class has had 1,236 days to conduct that discovery. This, of course, does not count the days when discovery was stayed.[5] The Class has known that NorthShore's statute-of-limitations argument was coming that whole time. It was the only argument in NorthShore's motion to dismiss, R. 32, Mot. Dismiss, which was filed more than seven years ago. Since then, the argument has changed little. The argument relies now, as it did then, on the same principles and even pretty much the same case law. The Court thought long and hard about whether the Class has already had enough time.

The Court came down in the Class's favor for three reasons. First, NorthShore made only a token argument about diligence, offering no specifics. Def.'s Opp. Br. at 4 (a single sentence). Second, the Class could reasonably have believed that all of the limitations-related discovery would have been complete by the current discovery deadline. So this is not the case were there was a total failure to plan; only, at worst, a decision to cut it very close. And finally, **[*15]** in a case of this size and complexity, it is hard for the Court to say definitively—especially absent argument from NorthShore—that the Class's failure to sew up this part of the case earlier was due to a lack of diligence rather than a calculated, reasonable choice to pursue other objectives earlier on.

2. Futility

NorthShore makes two additional arguments that both amount to calling the outstanding discovery futile. First, NorthShore argues that the "undisputed evidence" defeats the Class's potential reliance on the discovery rule. *Id.* at 3. Although NorthShore's recitation of the evidence that the class representatives were aware of the merger is compelling, it is not so lopsided that the Court can say that more discovery is futile. The Court will not, in effect, decide the summary judgment without the benefit of the Class's response and all the information. Next, NorthShore argues that all the information sought by the outstanding discovery came out in the FTC proceeding, the files of which the Class already has. *Id.* at 4. This argument fails because the FTC was not interested in when the Class discovered its claims, so the FTC had no reason to ask the questions or seek the documents that the Class **[*16]** now wants.

3. Class Certification Concerns

NorthShore pointed out that how a class chooses to oppose affirmative defenses can impact the propriety of class certification. *Id.* at 4, n.3; *see also* *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 131 S. Ct. 2541, 2561, 180 L. Ed. 2d 374 (2011)*. Courts have become increasingly cautious about how affirmative defenses might interfere with certification. *See, e.g.,* *Monaco v. Bear Stearns Cos., 2012 U.S. Dist. LEXIS 189628, 2012 WL 10006987, at *9-10 (C.D. Cal. Dec. 10, 2012)* (denying class certification because affirmative defenses raised individual issues that destroyed predominance). The Class is warned that any theory it raises to combat NorthShore's statute-of-limitations defense must be compatible with class certification, or else risk a motion for decertification. In other words, the Class's responses to the limitations defense should rely, if possible, on common proof (to avoid predominance problems) and not assume that NorthShore will be disallowed at trial from presenting its defenses to individual claims (to avoid Rules Enabling Act and Due Process problems).

III. Conclusion

The Class's *Rule 56(d)* motion [680] is granted and, under *Rule 56(d)(1)*, the Court now denies NorthShore's summary judgment motion [675] without prejudice. NorthShore may update the motion to address the Court's take

---

[5] Discovery was open for all purposes from, at the latest, March 11, 2008, until it was stayed on April 6, 2010. R. 56, Scheduling Order ("Full discovery will commence immediately upon entry of this order."); R. 388, Discovery Stay. That period is 756 days. Discovery was reopened on December 16, 2013. R. 588. From then until the motion for summary judgment, R. 675, was filed on April 10, 2015, was an additional 480 days.

on the substantive law—including *Berkey*—and refile after the close of fact discovery. **[*17]** In view of this decision, the parties shall confer further on the limitations-related discovery, and shall promptly bring good-faith, post-conferral disputes to the Court's attention via motion.

Opinion

JURY TRIAL DEMANDED

REPORT AND RECOMMENDATION OF UNITED STATES MAGISTRATE JUDGE

Before the Court is Defendant Blue Cross and Blue Shield of Texas' ("BCBS") Motion to Dismiss Original Petition for Failure to State a Claim Under *Fed. R. Civ. P. 12(b)(1)* and *(6)* ("MOTION") (Doc. No. 6). Plaintiff Texas Spine & Joint Hospital ("Plaintiff") filed a response ("RESPONSE") (Doc. No. 14), and BCBS filed a reply ("REPLY") (Doc. No. 21). The Court held a hearing on Defendant's Motion on February 12, 2015. For the reasons stated below, the Court **RECOMMENDS** that Defendant's Motion be **GRANTED-IN-PART** and **DENIED-IN-PART [*2]** .

BACKGROUND

Texas Spine filed suit in the District Court of Smith County, Texas on November 11, 2014, and BCBS removed this action to the Eastern District of Texas on December 17, 2014 (Doc. No. 1). Plaintiff's Original Petition ("PETITION") (Doc. No. 1-1) alleges: 1) statutory causes of action under the Texas Administrative Code, the Texas Insurance Code, the Texas Business and Commerce Code, and the Texas Free Enterprise and Antitrust Act ("TFEAA")[1]; and 2) common law causes of action for negligence and negligent misrepresentation, promissory estoppel, and quantum meruit.

Plaintiff is an acute care hospital located in Tyler, Texas, specializing in spine and orthopedic surgery. BCBS is a division of Health Care Services Corporation,[2] and insures and administers health care plans in the State of Texas. Plaintiff alleges that it began providing medical services and treatments to patients insured by BCBS in 2002 (PETITION at ¶ 11). Plaintiff does not have a contract with BCBS, and consequently, has been providing medical services and treatment to BCBS's insureds on an out-of-network basis. *Id.* Plaintiff's claims address two interrelated issues. First, Plaintiff's causes of action for violations **[*3]** of the Texas Administrative Code, the Texas Insurance Code, and the Texas Business and Commerce Code, as well as for negligence and negligent misrepresentation, promissory estoppel, and quantum meruit, are all based on alleged misrepresentations made by BCBS regarding the amount of reimbursement BCBS would provide to Plaintiff for out-of-network health insurance benefits claims, and Defendant's alleged failure to pay the full amount of those claims. *See id.* ¶¶ 8-29. The foregoing causes of action seek recovery based on more than 26,000 individual healthcare claims for reimbursement (PETITION at 3).[3] Second, Plaintiff's cause of action under the TFEAA is premised on Defendant's alleged exclusive in-network contract with Trinity Mother Frances Health System.

BCBS moves for dismissal of certain of Plaintiff's claims under *12(b)(1)* and *12(b)(6)*, arguing that: 1) Plaintiff's negligent misrepresentation cause of action, along with its claims under the Texas Insurance Code and the Texas Business and Commerce Code should be dismissed for failure to meet the pleading requirements of *Federal Rule of Civil Procedure 9(b)* (MOTION at 5); 2) Plaintiff's **[*4]** TFEAA claim fails as a matter of law (MOTION at 8-9); 3) Plaintiff's claim under 28 Texas Administrative Code § 19.1724 fails because that section has not appeared in the text of that code since 2012 (MOTION at 13); 4) Plaintiff's promissory estoppel claim fails because Plaintiff does not allege that BCBS made any promise to Plaintiff or that Plaintiff foreseeably relied on any alleged promise (MOTION at 13-14); 5) Plaintiff fails to state a quantum meruit claim (MOTION at 15); and 6) Plaintiff's claims are preempted by ERISA and Federal Employee Health Benefit Act ("FEBHA"), and/or barred by the doctrine sovereign immunity, and under the applicable statutes of limitations (MOTION at 16-24).

Plaintiff responds, arguing that: 1) it has alleged sufficient facts to support its claims for negligence, negligent misrepresentation, Texas statutory violations, promissory estoppel, and quantum meruit ("RESPONSE at 6); 2) *Rule 9(b)* does not apply to its negligent misrepresentation claim, and even if it does, the pleadings meet that standard ("RESPONSE at 8-10); 3) BCBS's arguments based on preemption, sovereign immunity, and the statute of limitations are premature ("RESPONSE at 12-14, 19-20); 4) it has alleged sufficient facts to support **[*5]** its TFEAA claim ("RESPONSE at 14-19); and 5) its claim under 28 Texas Administrative Code § 19.1724 should not be dismissed based on a "scrivener's error", and that its claim is still viable under current sections of the code ("RESPONSE at 21-22).

---

[1] The Texas Free Enterprise and Antitrust Act is codified under Chapter 15 of the Texas Business and Commerce Code.

[2] Blue Cross and Blue Shield of Texas is a division of Health Care Service Corporation, an Illinois Mutual Legal Reserve Company, with its principal place of business located in Chicago, Illinois. *See* Doc. No. 1 at 2. For diversity jurisdiction purposes, Defendant is not considered a citizen of Texas. *See* *Hesse v. Blue Cross Blue Shield of Texas, No. 4:11-CV-362, 2011 U.S. Dist. LEXIS 102012, 2011 WL 4025453, at *2 (E.D. Tex. Aug. 15, 2011)*, *report and recommendation adopted*, *No. 4:11-CV-362, 2011 U.S. Dist. LEXIS 102001, 2011 WL 4025514 (E.D. Tex. Sept. 9, 2011)* ("In this case, it is clear that Defendant is a division of HCSC, an Illinois corporation, with its principal place of business in Illinois. Therefore, Defendant is not a citizen of Texas for diversity purposes, diversity does exist between the parties . . . .").

[3] The Petition references an exhibit containing a comprehensive list of the medical care and treatment Plaintiff allegedly provided to BCBS insureds. In the Petition filed with the Court, Plaintiff states that the foregoing exhibit "will be produced under separate cover to the Defendant's attorney of record, and is not filed with the Court." (PETITION at 3).

LEGAL STANDARDS

Motions to dismiss under *Rule 12(b)(6)* for failure to state a claim "are viewed with disfavor and are rarely granted." *Test Masters Educ. Servs., Inc. v. Singh, 428 F.3d 559, 570 (5th Cir. 2005)*; *Lormand v. US Unwired, Inc., 565 F.3d 228, 232 (5th Cir. 2009)*. The Court utilizes a "two-pronged approach" in considering a motion to dismiss. *Ashcroft v. Iqbal, 556 U.S. 662, 679, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. First, the Court identifies and excludes legal conclusions that "are not entitled to the assumption of truth." *Id.* Second, the Court considers the remaining "well-pleaded factual allegations." *Id.* The Court must accept as true all facts alleged in a plaintiff's complaint, and the Court views the facts in the light most favorable to a plaintiff. *In re Katrina Canal Breaches Litig., 495 F.3d 191, 205 (5th Cir. 2007)*. A plaintiff's complaint survives a defendant's *Rule 12(b)(6)* motion to dismiss if it includes facts sufficient "to raise a right to relief above the speculative level." *Id.* (quotations and citations omitted). In other words, the Court must consider whether a plaintiff has pleaded "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

The Fifth Circuit has consistently recognized that a dismissal for lack of subject matter jurisdiction **[*6]** pursuant to *12(b)(1)* "should be granted sparingly." *Martin v. Morgan Drive Away, Inc., 665 F.2d 598, 602 (5th Cir. 1982)* (quoting *Chatham Condo. Assos. v. Century Village, Inc., 597 F.2d 1002, 1012-13 (5th Cir. 1979))*. In evaluating a *12(b)(1)* motion to dismiss, "a court may evaluate 1) the complaint alone, 2) the complaint supplemented by undisputed facts evidenced in the record, or 3) the complaint supplemented by undisputed facts plus the court's resolution of disputed facts." *Den Norske Stats Oljeselskap As v. HeereMac Vof, 241 F.3d 420, 424 (5th Cir. 2001)*.

ANALYSIS

1. Negligent Misrepresentation, Texas Insurance Code, and Texas Business and Commerce Code

BCBS argues that Plaintiff's negligent misrepresentation claim, along with its claims under Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code*, should be dismissed for failure to meet the pleading requirements of *Federal Rule of Civil Procedure 9(b)* (MOTION at 5).[4] *Rule 9(b)* provides in pertinent part that "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." BCBS asserts that the heightened pleading standard applies because "[t]he majority of Plaintiff's causes of action rest on alleged misrepresentations by BCBSTX" (MOTION at 1), relying primarily on *Frith v. Guardian Life Insurance Co. of America, 9 F. Supp. 2d 734 (S.D. Tex. 1998)*, and *Williams v. WMX Technologies, Inc., 112 F.3d 175, 177 (5th Cir. 1997)*, as cited therein.

Negligent Misrepresentation

With regard to Plaintiff's negligent misrepresentation claim, both *Frith* and *Williams* are inapposite. Those cases stand for the proposition that *Rule 9(b)* applies to negligent misrepresentation **[*7]** claims only when the plaintiff fails to distinguish negligent misrepresentation claims from fraud claims. *See Am. Realty Trust, Inc. v. Hamilton Lane Advisors, Inc., 115 Fed. App'x 662, 668 n.30 (5th Cir. 2004)*; *see also Encompass Office Solutions, Inc. v. Ingenix, Inc., 775 F. Supp. 2d 938, 956 (E.D. Tex. 2011)* (finding 9(b) applicable to negligent misrepresentation claim where plaintiff combined "allegations of fraud and negligent misrepresentation without specifying which allegations are for the fraud claim and which are for the negligent misrepresentation claim."). In *American Realty*

[4] The section of the Petition titled "Insurance Code Violations" includes claims under *Texas Insurance Code §§ 541.051*, *541.052*, and *541.056*, along with claims under the *Texas Business and Commerce Code § 17.46* (titled Deceptive Trade Practices Unlawful) and 28 Texas Administrative Code § 19.1724. For the reasons stated below, Plaintiffs claims under 28 Texas Administrative Code § 19.1724 are dismissed, because that section is no longer a part of the code.

Trust, the Fifth Circuit held that where claims of negligent misrepresentation are sufficiently distinct from claims of fraud, *Rule 9(b)* does not apply to the negligent misrepresentation claims. *115 Fed. App'x at 668 n.30* (recognizing that "plaintiffs properly distinguished between their fraud and negligent misrepresentation claims and correctly argued that the *Rule 9(b)* requirement of particularized pleading of fraud by its terms does not apply to negligent misrepresentation claims."); *see also McArdle v. Mattel Inc., 456 F. Supp. 2d 769, 785 (E.D. Tex. 2006)* ("Our circuit clearly holds that *Rule 9(b)*'s particularity requirement is inapplicable to claims for negligent misrepresentation . . . ." (citing *Am. Realty Trust, 115 Fed. App'x at 668 n.30*)); *Kitchell v. Aspen Exploration, Inc., 562 F. Supp. 2d 843, 852 (E.D. Tex. 2007)* (discussing the difference between the *Williams* line of cases and *American Realty Trust*).

Here, Plaintiff has not alleged a fraud claim. Therefore, the heightened pleading standard of *Rule 9(b)* does not apply. **[*8]** *Gen. Elec. Capital Corp. v. Posey, 415 F.3d 391, 394 (5th Cir. 2005)* ("The district court properly dispensed with the *rule 9(b)* argument, concluding that GECC had not alleged any fraud claims and thus was not subject to the heightened pleading requirements of *rule 9(b)*.").[5] Therefore, Plaintiff's negligent misrepresentation claim, and its claims under the Texas Insurance Code and the Texas Business and Commerce Code are subject to the more liberal pleading standard of *Rule 8(a)*. BCBS does not argue that the pleadings fall short of the requirements of *Rule 8(a)*. In any event, the Court finds that the foregoing claims satisfy that standard. Plaintiff alleges that its employees contacted BCBS, "received preauthorization for all treatment provided to [BCBS] members, and expectations of payment," provided treatment to BCBS members, submitted claims to BCBS for payment, and received reimbursement at a rate of 14.5% and 12.3% of the billed charges for inpatient and outpatient admissions, respectively (PETITION at 3, 4). The foregoing facts give rise to a plausible negligent misrepresentation claim.

Texas Insurance Code and Texas Business and Commerce Code

BCBS argues that Plaintiff's claims under Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code* fail to satisfy the requirements of *Rule 9(b)* because Plaintiff merely recites the code sections, **[*9]** and states that the "causes of action arise out of [those] violations." (MOTION at 6-7 (alteration in original)). While the foregoing claims are likely subject to the *Rule 9(b)* standard, *see Encompass Office Solutions, 775 F. Supp. 2d at 965*, the Court finds that these claims fail even under the more liberal *Rule 8(a)* standard. The section of the Petition alleging violations of Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code* contains the exact type of "formulaic recitation of the elements of a cause of action" devoid of "further factual enhancement" that fails to meet the *Rule 8(a)* pleading standard. *Twombly, 550 U.S. at 555, 557*; *see Iqbal, 556 U.S. at 678*.

Accordingly, the Court **RECOMMENDS** that BCBS's Motion to Dismiss as to Plaintiff's negligent misrepresentation cause of action be **DENIED**. The Court further **RECOMMENDS** that BCBS's Motion to Dismiss be **GRANTED-IN-PART** as to Plaintiff's claims under Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code*. However, the Court further **RECOMMENDS** that Plaintiff should be permitted to amend the Petition for the purpose of alleging claims under Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code*.

2. Texas Free Enterprise and Antitrust Act

---

[5] BCBS also references *Lone Star Fund V (U.S.), L.P. v. Barclays Bank PLC, 594 F.3d 383 (5th Cir. 2010)*, which offers little support for its argument that *Rule 9(b)* applies to Plaintiff's negligent misrepresentation claim. In *Lone Star*, the Court found that the claims "sound[ed] in fraud and negligent misrepresentation," and that *Rule 9(b)* applied because the plaintiff did not urge a separate focus on the negligent misrepresentation claim. *Id. at 387 n.3*. There, the complaint pleaded with particularity the exact representations the plaintiff claimed were false. *Id.* Here—as BCBS argues—Plaintiff has not pleaded with particularity the exact representations it claims are false.

BCBS first argues that Plaintiff is unable to establish standing under the TFEAA because it is neither a competitor nor consumer in relation to BCBS (MOTION at 8). In addition, BCBS argues that Plaintiff's TFEAA claim fails as a matter of law because Plaintiff's "sole **[*10]** factual allegation in support of its TFEAA claim is that BCBSTX has entered into an exclusive provider agreement with another entity." (MOTION at 9). Finally, BCBS argues that Plaintiff's TFEAA claim fails to meet the requirements of the Supreme Court's three-part inquiry to determine whether an exclusive agreement rises to the level of an antitrust violation under *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*.

Standing

Plaintiff has asserted claims under *Sections 15.05(a)* and *(b)* of the TFEAA. Texas courts interpret the TFEAA in harmony with comparable federal antitrust statutes, namely the Sherman and Clayton Acts. *Tex. Bus. & Com. Code § 15.04*; *Caller-Times Pub. Co. v. Triad Commc'ns, Inc., 826 S.W.2d 576, 580 (Tex. 1992)*. Since "standing under the Texas Antitrust Act is co-extensive with the judicial interpretations of the Sherman Act," the federal antitrust standing requirements as articulated by the Supreme Court and the Fifth Circuit apply. *Tessera, Inc. v. Micron Tech., Inc., No. 2:05-CV-94, 2005 U.S. Dist. LEXIS 24759, 2005 WL 1661106, at *1 (E.D. Tex. July 13, 2005)*; *see also* *Abbott Labs. v. Segura, 907 S.W.2d 503, 505 (Tex. 1995)*. Courts in the Fifth Circuit apply the standing factors established in *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, which include: 1) the causal connection between the alleged antitrust violation and the harm to the plaintiff; 2) the nature of the alleged injury, including whether the plaintiff is a consumer or a competitor in the relevant market; 3) the directness of the alleged injury, **[*11]** and whether the alleged damages are too speculative; 4) the potential for duplicative recovery; and 5) the complexity of apportioning damages. *See* *Tessera, 2005 U.S. Dist. LEXIS 24759, 2005 WL 1661106, at *2*; *see also* *Bell v. Dow Chemical Co., 847 F.2d 1179, 1183 (5th Cir. 1988)*. None of the foregoing factors are determinative, and they must be considered on balance. *Tessera, 2005 U.S. Dist. LEXIS 24759, 2005 WL 1661106, at *2*.

BCBS asserts that Plaintiff lacks standing to bring a TFEAA claim because it is neither a consumer nor a competitor of BCBS, relying exclusively on *Maranatha Temple, Inc. v. Enterprise Prods. Co., 893 S.W.2d 92, 105 (Tex. App.—Houston [1st Dist.] 1994, writ denied)* (MOTION at 8). Thus, BCBS's argument is directed only to the second factor of the *General Contractors* analysis—the nature of the alleged injury. Under this factor, courts examine whether a plaintiff has suffered an antitrust injury. In other words, a "plaintiff's injury must be the type that the antitrust laws were intended to prevent." *Bell, 847 F.2d at 1183* (citing *Brunswick Corp v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. "The court's focus must be upon competition in the allegedly restrained market." *Id.* BCBS's assertion that Plaintiff is unable to establish antitrust standing because it is neither a consumer nor a competitor *of BCBS* is misguided. In determining whether a plaintiff has suffered an antitrust injury, the Fifth Circuit examines whether the plaintiff is a consumer or competitor *in the allegedly restrained market. See id.* ("Restraint in the market affects **[*12]** consumers and competitors in the market; as such they are the parties that have standing to sue."); *Norris v. Hearst Trust, 500 F.3d 454, 467 (5th Cir. 2007)* (finding plaintiffs did not suffer antitrust injury because they were "neither consumers nor competitors in the market attempted to be restrained."); *General Contractors, 459 U.S. at 539* (noting that the plaintiff "was neither a consumer nor a competitor in the market in which trade was restrained."). Thus, there is no requirement that Plaintiff be a competitor *of BCBS* in order to have antitrust standing. Here, Plaintiff alleges that BCBS entered into an exclusive in-network agreement with one of its competitors, Trinity Mother Frances Health System, which has resulted in anticompetitive restraint of the Tyler and East Texas hospital healthcare market. *See* PETITION at 9-10. BCBS has made no showing that Plaintiff has failed to satisfy any of the remaining factors under the *General Contractors* antitrust standing test. Accordingly, BCBS has failed to demonstrate that Plaintiff lacks standing to bring a TFEAA claim.

Exclusive Agreement

BCBS argues that Plaintiff's antitrust claim fails as a matter of law because it is premised solely on an alleged exclusive in-network contract between BCBS and Trinity Mother Frances (MOTION **[*13]** at 9). BCBS relies solely on *Apani Southwest., Inc. v. Coca-Cola Enterprises, Inc., 300 F.3d 620, 633 (5th Cir. 2002)*, arguing that, "[a]s a matter of law, the mere assertion that parties have entered into an exclusive agreement is not sufficient to establish an antitrust claim." (MOTION at 9). That is not the holding of *Apani*. In *Apani*, "[t]he district court dismissed all of Apani's antitrust claims, finding Apani's geographic market definition legally insufficient as a matter of law." *300 F.3d at 628*. The Fifth Circuit affirmed the district court's dismissal of the antitrust claims on the same grounds. *Id. at 633*. The Court did not hold that an exclusive agreement is insufficient to establish an antitrust claim as a matter of law.[6] Thus, BCBS's argument in favor of dismissal on this basis fails.

Probable Effect of Substantially Lessening Competition

BCBS also argues that Plaintiff has failed to allege facts sufficient to create an inference that BCBS had enough market power to create a monopoly (MOTION at 10). BCBS asserts that the Petition fails to meet the three-prong test established by the Supreme Court in *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. The *Tampa Electric* test is applied to alleged violations of *Section 3* of the Clayton Act, *15 U.S.C. §14*, and the ultimate question it contemplates is whether a tying or exclusive-dealing arrangement "forecloses **[*14]** competition in a substantial share of the line of commerce involved."[7] *Tampa Elec., 365 U.S. at 329*. *Section 3* of the Clayton Act mirrors *Section 15.05(c)* of the TFEAA. However, Plaintiff has only asserted claims under *Sections 15.05(a)* and *(b)* of the TFEAA.[8] Thus, BCBS's arguments based on *Tampa Electric* are irrelevant for the purposes of this case.

"While a plaintiff must plead facts concerning every element of his antitrust claim, there is no heightened pleading requirement in antitrust cases," and therefore "an antitrust plaintiff is not required to plead the particulars of his or her claim." *Genico, Inc. v. Ethicon, Inc., No. 5:04-CV-229, 2006 U.S. Dist. LEXIS 96909, 2006 WL 7134667, at *3 (E.D. Tex. Mar. 23, 2006)* (internal citation omitted). "Provided the plaintiff has described a defendant's practice in a manner consistent with its antitrust theory, the court considers only whether other allegations made in the complaint undermine the claim." *2006 U.S. Dist. LEXIS 96909, 2006 WL 7134667, at *3*. "In cases where it is uncertain whether relief is available under ***antitrust law***, the district court should not dismiss the claim if there is any interpretation of the facts alleged that would sustain a recovery under some viable antitrust theory." *Id.* (citing *Banks v. Nat'l Collegiate Athletic Ass'n, 977 F.2d 1081, 1093 (7th Cir. 1992))*. As observed above, Plaintiff has asserted antitrust claims **[*15]** under *Sections 15.05(a)* and *(b)* of the Texas Business and Commerce Code.

In order to make out a claim under *Section 15.05(a)*, "a plaintiff must show that the alleged contract, combination, or conspiracy is unreasonable and has an adverse effect on competition in the relevant market." *Marlin v. Robertson, 307 S.W.3d 418, 427 (Tex. App.—San Antonio 2009, no pet.)*. In determining whether a restraint on trade is

---

[6] In affirming the district court's ruling on a separate claim for tortious interference with existing business relations, the Court mentioned "that entering into an exclusive agreement, in and of itself, does constitute an unreasonable restraint on trade." *Apani, 300 F.3d at 634*. Nothing in the opinion indicates that this statement was the basis for affirming the district court's dismissal of the antitrust claim at issue.

[7] BCBS cites the *Tampa Electric* test as applied by the Court in *Apani*. In *Apani*, the plaintiff alleged antitrust claims under *Section 3* of the Clayton Act and *Section 15.05(c) of the Texas Business and Commerce Code*. *See Apani Southwest, Inc. v. Coca-Cola Enters.*, No. 5:00-CV-228, Doc. No. 3 (N.D. Tex. Aug. 2, 2000).

[8] In fact, both *Section 3* of the Clayton Act and *Section 15.05(c) of the Texas Business and Commerce Code* only apply to contracts involving the sale or lease of goods. *Section 15.05(c)* provides in pertinent part: `It is unlawful for any person to sell, lease, or contract for the sale or lease of any goods, whether patented or unpatented, for use, consumption, or resale or to fix a price for such use, consumption, or resale or to discount from or rebate upon such price . . . . `*Tex. Bus. & Com. Code Ann. § 15.05(c)*. Other Courts have reached the same conclusion in the context of *Section 3* of the Clayton Act. *Tri—State Broadcasting Co. v. United Press Intern., Inc., 369 F.2d 268, 269 (5th Cir. 1966)*; *see also Marion Healthcare LLC v. S. Illinois Healthcare, No. 12-CV-871, 2013 U.S. Dist. LEXIS 120722, 2013 WL 4510168, at *6-7 (S.D. Ill. Aug. 26, 2013)* (dismissing *Section 3* claims against health insurer because "[t]he dominant nature of the transaction at issue is surely services . . . .").

unreasonable, courts examine two categories of restrictive practices: 1) those that are illegal per se; and 2) "practices whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons for its imposition." *Id.* (citing *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978))*. For the second category, "courts apply the 'rule of reason' under which the fact-finder weighs all the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Id.* (citing *Cont'l T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 37, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977))*. "To establish a violation under the rule of reason, a plaintiff must prove the restrictive practice has an adverse effect on competition in the relevant market." *Id. at 429*.

To establish a claim under *Section 15.05(b)*, a plaintiff must show two elements: "1) the possession of monopoly power in the relevant market; and 2) the willful acquisition or maintenance of that power **[*16]** as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." *Caller-Times Pub, 826 S.W.2d at 580* (quoting *United States v. I.T.T. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*.

The Court finds that Plaintiff has alleged sufficient facts to support its claims under *Sections 15.05(a)* and *(b)* of the Texas Business and Commerce Code. In the Petition, Plaintiff alleges: 1) BCBS entered into contractual agreements with Trinity Mother Frances Health System to be the exclusive in-network hospital provider for the Tyler, Texas area; 2) Trinity Mother Frances Hospital and Trinity Mother Frances Rehabilitation Hospital are the only two in-network hospital health care providers in the Tyler and East Texas marketplace; 3) that these contractual agreements restrain trade, injure competition in the marketplace, and cause direct injury to Plaintiff; and 4) BCBS attempted or conspired to monopolize the Tyler, Texas market by unlawful means (PETITION at 9-10). Moreover, it is apparent from the Petition that Plaintiff has identified the relevant market as hospital healthcare services in the Tyler and East Texas area. *See id.* at 3, 9-10.

Accordingly, the Court **RECOMMENDS** that BCBS's Motion to Dismiss as to Plaintiff's claims under the TFEAA be **DENIED**.

3. 28 Texas Administrative Code § 19.1724

BCBS seeks dismissal **[*17]** of Plaintiff's claim under 28 Texas Administrative Code § 19.1724 because that section "has not appeared in the text of that code since 2012, and therefore is not currently the basis for a valid claim for relief." (MOTION at 13). Plaintiff acknowledges that Section 19.1724 does not exist under the current version of the Administrative Code, but argues that the relevant portions of its claim fall under *28 Texas Administrative Code §§ 19.1701-19.1719* ("RESPONSE at 21). Plaintiff cannot state a claim based upon a non-existent code provision. Accordingly, the Court **RECOMMENDS** that BCBS's Motion to Dismiss be **GRANTED-IN-PART** as to Plaintiff's claim under Texas Administrative Code § 19.1724. However, the Court further **RECOMMENDS** that Plaintiff should be permitted to amend the Petition for the purpose of alleging a claim under *28 Texas Administrative Code §§ 19.1701-19.1719*.

4. Promissory Estoppel

BCBS seeks dismissal of Plaintiff's promissory estoppel claim, arguing that Plaintiff has not set forth sufficient facts alleging that BCBS made any promise to Plaintiff or that Plaintiff foreseeably relied on any alleged promise (MOTION at 14). In order to state a claim for promissory estoppel, a plaintiff must allege: 1) a promise; 2) foreseeability of reliance on the promise by the promisor; and 3) detrimental reliance by the promise. As discussed **[*18]** in the context of Plaintiff's negligent misrepresentation claim, Plaintiff alleges that its employees contacted BCBS, "received preauthorization for all treatment provided to [BCBS] members, and expectations of payment," provided treatment to BCBS members, submitted claims to BCBS for payment, and received reimbursement at a rate of 14.5% and 12.3% of the billed charges for inpatient and outpatient admissions, respectively (PETITION at 3, 4). Plaintiff further alleges that BCBS "made a promise to pay a reasonable and fair amount for the medical care and treatment provided to its members." *Id.* at 8. Based on the foregoing, the Court finds that Plaintiff has alleged sufficient facts give rise to a plausible promissory estoppel claim under *Rule 8(a)*. Accordingly, the Court **RECOMMENDS** that BCBS's Motion to Dismiss as to Plaintiff's promissory estoppel claim be **DENIED**.

5. Quantum Meruit

BCBS argues that Plaintiff fails to state a quantum meruit claim (MOTION at 15). "To recover under quantum meruit a claimant must prove that: 1) valuable services were rendered or materials furnished; 2) for the person sought to be charged; 3) which services and materials were accepted by the person sought to be charged, used **[*19]** and enjoyed by him; 4) under such circumstances as reasonably notified the person sought to be charged that the plaintiff in performing such services was expecting to be paid by the person sought to be charged." *Vortt Exploration Co. v. Chevron U.S.A., Inc., 787 S.W.2d 942, 944 (Tex. 1990)*. "In addition, the evidence must show that the efforts were undertaken for the person to be charged and not just that the efforts benefitted that person." *KUV Partners, LLC v. Fares, No. 02-09-246-CV, 2011 Tex. App. LEXIS 2005, 2011 WL 944453, at *16 (Tex. App.—Fort Worth March 17, 2011, pet. denied)* (mem. op.) (citing *McFarland v. Sanders, 932 S.W.2d 640, 643 (Tex. App.—Tyler 1996, no writ))*. BCBS asserts that Plaintiff cannot state a quantum meruit claim because Plaintiff did not furnish services directly upon BCBS (MOTION at 15). While the Petition contains sufficient facts explaining how Plaintiff conferred benefits upon BCBS's insureds, Plaintiff fails to explain how it has provided any direct benefits to BCBS. Thus, Plaintiff has failed to plead an integral element of its quantum meruit claim—that "services were rendered . . . for the person sought to be charged."[9] *Vortt Exploration, 787 S.W.2d at 944*; *Encompass Office Solutions, 775 F. Supp. 2d at 966* (granting motion to dismiss quantum meruit claim against healthcare insurer where medical provider plaintiff failed to plead facts showing it conferred benefits on the insurer). Accordingly, the Court **RECOMMENDS** that BCBS's Motion to Dismiss as to Plaintiff's quantum meruit **[*20]** claim be **GRANTED**.

6. ERISA and FEBHA Preemption, Sovereign Immunity, and Statute of Limitations

As BCBS correctly notes, Plaintiff's claims for violation of the Texas Insurance Code, promissory estoppel, and quantum meruit all seek recovery based on more than 26,000 individual healthcare claims for reimbursement (MOTION at 16). First, BCBS argues that any and all of the 26,000 claims for reimbursement governed by ERISA, and FEBHA should be dismissed because they are pre-empted. *Id.* at 16, 19-21. Second, BCBS argues that any of the foregoing claims involving enrollees of the Service Benefit Plan are barred by the doctrine of sovereign immunity. *Id.* at 16-19. Third, BCBS asserts that "each of Plaintiff's purported causes of action . . . rests on and is intertwined with events that occurred as far back as 2008," and that accordingly, certain of Plaintiff's causes of action based on reimbursement claims are barred under the applicable statutes of limitations. *Id.* at 21-24. Fourth, BCBS argues that Plaintiff's TFEAA claim is time barred under the statute of limitations because the cause of action "arose long ago." *Id.* at 23. BCBS also contends that Plaintiff improperly filed suit without understanding and investigating the **[*21]** bases of its allegations (REPLY at 9).

BCBS refers to Exhibit A of the Petition, which apparently contains a comprehensive list of the more than 26,000 individual claims for reimbursement. *See* MOTION at 16. As discussed above, Plaintiff did not attach that exhibit to the copy of the Petition filed with the Court. Moreover, Defendant fails to identify exactly which of the more than 26,000 individual claims should be dismissed, and did not include the exhibit in the instant motion. While certain individual reimbursement claims may be pre-empted, barred by the doctrine of sovereign immunity, and/or time-barred under the relevant statutes of limitation, the Court declines to make a preliminary ruling dismissing Plaintiff's

---

[9] It is unclear how Plaintiff could confer any benefits upon BCBS under these circumstances. *See Electrostim Med. Servs., Inc. v. Health Care Serv. Corp., 962 F. Supp. 2d 887, 899 (S.D. Tex. 2013)* (dismissing quantum meruit claim based on healthcare services provided to beneficiaries of a healthcare insurance policy); *see also Travelers Indem. Co. of Connecticut v. Losco Grp., Inc., 150 F. Supp. 2d 556, 563 (S.D.N.Y. 2001)* ("It is counterintuitive to say that services provided to an insured are also provided to its insurer. The insurance company derives no benefit from those services; indeed, what the insurer gets is a ripened obligation to pay money to the insured—which hardly can be called a benefit.").

claims without Defendant identifying the exact claims it is referring to. Moreover, BCBS has failed to demonstrate that Plaintiff's TFEAA claim is time barred under the applicable statute of limitations. TFEAA claims must be filed within four years after the cause of action accrued. *Tex. Bus. & Com. Code § 15.25(a)*. BCBS vaguely argues that Plaintiff's antitrust cause of action "arose long ago when BCBSTX allegedly entered into the exclusivity contact with Trinity" rather than identifying a specific **[*22]** date when the cause of action actually accrued. In addition, while BCBS argues in passing that Plaintiff failed to investigate the bases for its allegations, BCBS has not established that Plaintiff failed to comply with its obligations under *Rules 8* and *11*.

Accordingly, the Court **RECOMMENDS** that BCBS's Motion to Dismiss based on ERISA and FEBHA Preemption, Sovereign Immunity, and the Statute of Limitations be **DENIED**. However, BCBS may file a letter brief seeking leave to file a motion for summary judgment on the foregoing bases.

CONCLUSION

For the reasons stated above, the Court **RECOMMENDS** that BCBS's Motion to Dismiss (Doc. No. 6) as to Plaintiff's: 1) claims for negligent misrepresentation; 2) alleged violations of the TFEAA; and 3) promissory estoppel be **DENIED**. The Court further **RECOMMENDS** that BCBS's Motion to Dismiss based upon ERISA and FEBHA preemption, sovereign immunity, and the applicable statutes of limitations be **DENIED**. The Court further **RECOMMENDS** that BCBS's Motion to Dismiss be **GRANTED-IN-PART** as to Plaintiff's claim under Texas Administrative Code § 19.1724, but that Plaintiff should be permitted to amend the Petition for the purpose of alleging a claim under *28 Texas Administrative Code §§ 19.1701-19.1719*. The Court further **RECOMMENDS [*23]** that BCBS's Motion to Dismiss be **GRANTED-IN-PART** as to Plaintiff's claims under Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code*, but that Plaintiff should be permitted to amend the Petition for the purpose of alleging claims under Section 541 of the Texas Insurance Code and *Section 17.46 of the Texas Business and Commerce Code*. Finally, the Court **RECOMMENDS** that BCBS's Motion to Dismiss as to Plaintiff's quantum meruit claim be **GRANTED**.

So ORDERED and SIGNED this 28th day of May, 2015.

Judges: STACI M. YANDLE, UNITED STATES DISTRICT JUDGE.

Opinion by: STACI M. YANDLE

Opinion

MEMORANDUM AND ORDER

This matter comes before the Court on (1) defendant Health Care Service Corporation, doing business as BlueCross and BlueShield of Illinois' ("BCBSI") Motion to Dismiss Plaintiff Marion HealthCare, LLC's ("MHC") Second Amended Complaint (Doc. 59); (2) BCBSI's Motion to Strike Amended Complaint (Doc. 61); and (3) Defendant Southern Illinois Healthcare's ("SIH") Motion to Dismiss for Failure to State a Claim (Doc. 62).

Procedural History

In its First Amended Complaint, Plaintiff raised the following five claims against SIH: (1) Count I — exclusive dealing with BCBSI in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*) and Clayton **[*2]** Act (*15 U.S.C. § 14*); (2)

Count III — exclusive dealing with BCBSI in violation of the Illinois Antitrust Act; (3) Count V — tying arrangement with BCBSI in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*) and Clayton Act (*15 U.S.C. § 14*); (4) Count Six — tying arrangement with BCBSI in violation of the Illinois Antitrust Act (*740 ILCS 10/3*); and (5) Count IX — monopolization in violation of *Section 2* of the Sherman Act (*15 U.S.C. § 2*).

In its First Amended Complaint, Plaintiff raised the following six claims against BCBSI: (1) Count II — exclusive dealing with SIH in violation of *Section 1* of the Sherman Act and Clayton Act (*15 U.S.C. § 14*; (2) Count IV — exclusive dealing with SIH in violation of the Illinois Antitrust Act; (3) Count VII - tying arrangement with SIH in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*) and Clayton Act (*15 U.S.C. § 14*); (4) Count VIII - tying arrangement with SIH in violation of the Illinois Antitrust Act (*740 ILCS 10/3*); (5) Count X — price discrimination against MHC in violation of Section 2 of the Clayton Act (*15 U.S.C. § 13*); and (6) Count XI — tortious interference with a business expectancy.

With respect to MHC's First Amended Complaint, Judge Herndon dismissed with prejudice the following claims: (1) Counts I, II, V, VII, and X to the extent those counts stated claims pursuant to *Sections 2* or *3* of the Clayton Act; **[*3]** (2) the tying claim contained in Count VII; (3) the monopolization claim contained in Count IX; (4) the Illinois Antitrust claims contained in Counts III, IV, VI, and VII to the extent that each is based upon the portion of the Illinois law that is substantially similar to the Clayton Act; (5) the Illinois Antitrust claims contained in Count IV as to BCBSI to the extent it is based on the portion of Illinois law that is substantially similar to the Sherman Act based upon tying; and (6) the tortious interference with a business expectancy contained in Count XI claim against BCBSI (Doc. 57).

Judge Herndon dismissed without prejudice the following claims: (1) Plaintiff's Sherman Act claims as to SIH contained in Counts I, V, and IX; (2) the Sherman Act claim as to BCBSI regarding exclusive dealing contained in Count II; (3) the Illinois Antitrust claims contained in Counts III and VI as to SIH to the extent that each is based upon the portion of Illinois law that is substantially similar to the Sherman Act; and (4) the Illinois Antitrust claims contained in Count IV as to BCBSI to the extent it is based on the portion of Illinois law that is substantially similar to the Sherman Act based **[*4]** upon exclusive dealing (Doc. 57).

Thereafter, MHC filed its Second Amended Complaint raising the following claims: (1) Count I — exclusive dealing against SIH in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*); (2) Count II — exclusive dealing against BCBSI in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*); (3) Count III — exclusive dealing against SIH in violation of the Illinois Antitrust Act; (4) Count IV — exclusive dealing against BCBSI in violation of the Illinois Antitrust Act; (5) Count V — tying against SIH in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*); (6) Count VI — tying against SIH in violation of the Illinois Antitrust Act (*740 ILCS 10/3*); and (7) Count VII — monopolization against SIH in violation of *Section 2* of the Sherman Act (*15 U.S.C. § 2*). Defendants bring their Motions to Dismiss MHC's Second Amended Complaint for failure to state a claim.

Background

Plaintiff, MHC, is a multi-specialty freestanding outpatient surgery center which offers outpatient surgical services. Plaintiff does not offer inpatient services. Plaintiff opened for business in 2004, and is located in the relevant geographic area, defined by Plaintiff as the counties of Williamson and Jackson, and the surrounding areas bordering these counties. Defendant SIH is a **[*5]** nonprofit corporation that owns a variety of acute-care hospitals which provide both inpatient and outpatient medical services. Further, SIH owns various freestanding outpatient surgical service providers.

Plaintiff alleges that the relevant product markets consist of two distinct sets, "the first set encompassing the second." The first set consists of "(a) general acute-care inpatient hospital services, including pediatric services and neonatal care services (generally referred to as "hospital services"), and (b) outpatient surgical services, where both (a) and (b) services may be reimbursed by any payors, including commercial insurance, government payors (e.g., Medicare, Medicaid) and self-pay." (Doc. 58 p. 2, par. 1). The second set of relevant product markets are submarkets of the first set and consist of "(1) general acute-care inpatient hospital services, including pediatric services and neonatal care services (generally referred to as "hospital services") reimbursed by commercial health insurers, and (2) outpatient surgical services reimbursed by commercial health insurers." *Id.*

Plaintiff alleges the relevant geographic markets are comprised of Williamson County, Illinois, Jackson **[*6]** County, Illinois and the surrounding area. *Id.* (par. 3). In the relevant geographic market, Plaintiff maintains SIH is a "must have" hospital system for health plans because it is the largest hospital in the region and the only local provider of certain essential services. Plaintiff alleges that within the relevant geographic area, SIH has a 77% market share for inpatient surgical cases (*Id.*, par 81 (h)) and a 76% market share of outpatient surgical cases. *Id.* (p. 30 par. 82 (a)).

Defendant BCBSI is allegedly the largest health insurance company in Illinois and the dominate health insurer in the relevant geographic area. Thus, BCBSI is the dominant provider of health insurance covering inpatient and outpatient services. Plaintiff claims that it has submitted multiple applications to BCBSI seeking acceptance as an in-network provider and that BCBSI has denied their request each time. Plaintiff alleges BCBSI informed them that BCBSI had an exclusive contract with SIH, which prohibited or precluded BCBSI from contracting with competitors for in-network coverage in the area. Plaintiff further alleges that it, and others, cannot remain competitive as long as this agreement with BCBSI and **[*7]** SIH exists. It is this exclusive agreement that forms the foundation of Plaintiff's claims.

Plaintiff claims that SIH willfully maintained and extended its monopoly power through the use of exclusionary contracts. Particularly, Plaintiff alleges that BCBSI had a compelling business need to include SIH in its network of inpatient service providers. Yet, in consideration of discounts to BCBSI on inpatient services, SIH included exclusionary language in the agreements with commercial insurers. Plaintiff argues the agreement improperly and illegally tied discounts for coverage of SIH's inpatient hospital services with exclusive contracting for in-network coverage of SIH's outpatient services and illegally coerced BCBSI into entering the agreement. This arrangement prohibits BCBSI from contracting for in-network coverage with competing freestanding outpatient surgery centers in the region. As such, Plaintiff contends the arrangement constitutes exclusive "dealing and tying" in violation of the Sherman Antitrust Act.

Plaintiff maintains that as a result of the agreement between SIH and BCBSI, SIH has been able to retain monopoly power in the two relevant markets in the defined geographical **[*8]** area. Plaintiff contends that it and others cannot effectively compete because SIH and BCBSI have substantially reduced the number of patients who would otherwise use SIH's competitors. Plaintiff claims that patients have been required to pay more at SIH for services, compared to the same procedure in a non-SIH owned facility. Thus, Plaintiff alleges that SIH's contracts have prevented the public from receiving competitive services from other competitors for the cheapest costs.

In sum, Plaintiff maintains that SIH, via its exclusionary contracts with BCBSI, has violated ***antitrust law*** through exclusive dealing, tying, and monopolization. Plaintiff alleges that SIH's exclusionary contracts with BCBSI violate ***antitrust law*** and have delayed and prevented expansion by competitors in the relevant geographic area, have limited price competition, have reduced quality competition in the area and have reduced healthcare options for patients in need of outpatient surgery, all without a valid business justification.

Analysis

A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* allows for dismissal upon "failure to state a claim upon which relief can be granted." To state a claim, a pleading need only contain "a short **[*9]** and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. Further, the court must review a complaint in the light most favorable to the plaintiff, accept as true all well-pleaded facts alleged, and draw all possible inferences in the plaintiff's favor. *Tamayo v. Blagojevich, 526 F. 3d 1074, 1081 (7th Cir. 2008)*. Detailed factual allegations are not required, but the pleading must contain "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). A plaintiff can plead himself out of court by pleading facts that show that he has no legal claim." *Atkins v. City of*

Chicago, 631 F.3d 823, 832 (7th Cir. 2011). Finally, the court must not apply a heightened pleading standard in antitrust cases. Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000).

BCBSI's Motion to Dismiss (Doc. 59)

BCBSI contends Plaintiff's Second Amended Complaint must be dismissed pursuant to Fed. R. Civ. P. 12(b)(6). Specifically, BCBSI asserts that as a matter of law, MHC cannot assert exclusive dealing claims against it as a purchaser of the services at issue. BCBSI further asserts that MHC has failed to plead the essential elements of an exclusive dealing claim against it. BCBSI argues dismissal is appropriate for following reasons: (1) BCBSI cannot be held liable under Section 1 of the Sherman Act or Section 3(4) of the Illinois Antitrust Act **[*10]** because BCBSI is a "purchaser"; (2) MHC's claims fail to the extent they allege the same relevant product markets that this Court rejected when it dismissed MHC's First Amended Complaint for failure to plead a plausible relevant product market; (3) MHC's relevant geographic market definition is too vague to permit an assessment of substantial foreclosure; and (4) MHC only makes conclusory allegations of substantial foreclosure and fails to allege facts sufficient to support a plausible claim of substantial foreclosure from the market for outpatient surgery services. The Court only considers BCBSI's first argument for the following reason.

Section 1 of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." 15 U.S.C. § 1. To plead a violation of § 1 of the Sherman Act, a plaintiff must plead: "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in [a] relevant market; and (3) an accompanying injury." Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 335 (7th Cir. 2012). Because "[t]he purpose of the Sherman Act is to protect consumers from injury that results from diminished competition," **[*11]** "the plaintiff must allege, not only an injury to himself, but an injury to the market as well." Agnew, 683 F.3d at 334-35.

MHC brings its exclusive dealing claims against BCBSI under Section 1 of the Sherman Act and Section 3(4) of the Illinois Antitrust Act. (Doc. 58 Counts II and IV). However, if an exclusive dealing claim "does not fall within the broader prescription of [Section] 3 of the Clayton Act, it follows that it is not forbidden by those of [Section 1]." Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 335, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961). Further, Illinois courts—when interpreting claims under the Illinois Antitrust Act—are tasked with looking to federal courts' construction of antitrust laws that are substantially similar to those of Illinois. State of Ill., ex rel. Burris v. Panhandle E. Pipe Line Co., 935 F.2d 1469, 1479-80 (7th Cir. 1991).

Courts have held that Section 3 of the Clayton Act defines liability in terms of a person who makes a sale or contracts for sale, but does not provide for liability of the buyer. McGuire v. Columbia Broad Sys., Inc., 399 F.2d 902, 906 (9th Cir. 1968); *see* Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1110 (7th Cir. 1984), *cert. denied*, *470 U.S. 1054, 105 S. Ct. 1758, 84 L. Ed. 2d 821 (1985)* (finding a buyer liable under Section 1 of the Sherman Act "'would undermine the principles of competition the antitrust laws were designed to secure'")(citing Dunn& Mavis, Inc. v. Nu-Car Driveaway, Inc., 691 F. 2d 241, 244 (6th Cir. 1982)).

More on point is Genetic Sys. Corp. v. Abbott Labs., 691 F. Supp. 407 (D.D.C. 1988). In that case, defendant Red Cross entered into a two-year exclusive agreement with defendant Abbott Laboratories to supply equipment used to screen donated blood for transmissible diseases, including hepatitis, and the **[*12]** HTLV antibody (AIDS). Id. at 410. Plaintiff Genetic Systems claimed that this agreement effectively froze the plaintiff out of the market for blood test equipment and jeopardized the company's ability to survive. Id. at 412. Plaintiff filed suit against Red Cross and Abbott alleging violations of Section 1 of the Sherman Act and Section 3 of the Clayton Act. Id. at 413. The district court dismissed the exclusive dealing claims against the buyer Red Cross. Id. at 414. Specifically, the district court derived "from the plain language of the statute, the relevant legislative history, and the observations of commentators" that Section 3 of the Clayton Act does not impose any liability on purchasers or buyers for exclusive dealing contracts. Id. at 414 (citing McGuire v. Columbia Broadcasting Sys., Inc., 399 F. 2d 902 (9th Cir. 1968); *see also* J. von Kalinowski, *Antitrust Laws and Trade Regulation*, Section 12.02(3) (1988). Further, the district court determined that this conclusion to not impose liability on the buyer "is consistent with the fundamental antitrust concept that the alleged sins of the sellers should not be visited on buyers because of the risk of chilling competition." *Id. at 415*. Plaintiff nevertheless alleged that the defendant acted as more than solely a purchaser, and entered into "active collaboration" in "knowingly join[ing]" in the exclusionary **[*13]** contract. *Id.* However, the district court determined that the plaintiff's attempt to fit the "square conduct" of the defendant into the "round hole of *Section 3* [of the Clayton Act] cannot succeed." *Id.*

Here we find nearly identical facts to those addressed by the Court in *Genetic Sys.* BCBSI contends that exclusive dealing claims under *Section 3* of the Clayton Act—and thus *section 1* of the Sherman Act and *Section 3(4)* of the Illinois Antitrust Act—may not be brought against the buyer of the at-issue service (Doc. 60). MHC admits that BCBSI is the buyer/purchaser of these outpatient surgical services. Further, MHC does not refute that *Section 3* does not impose liability to buyers or purchasers (Doc. 72, p. 4). Instead, Plaintiff argues that "[i]n the exceptional case where the buyer has actively (and aggressively) promoted the exclusive arrangement, in close collaboration with the seller, the buyer has 'partaken of and promoted the sins' and should, therefore, be liable under *Section 1*." *Id.* (p. 5).

MHC fails, as did the plaintiff in *Genetic Sys.*, to direct the Court's attention to any case that has construed *Section 3* of the Clayton Act to cover "the sins of the purchaser or buyer". Instead, like the plaintiff in *Genetic Sys.*, MHC urges the Court to extend **[*14]** liability because BCBSI has "actively (and aggressively) promoted the exclusive arrangement." However, the Court cannot simply ignore the above-referenced case law.

This Court finds that MHC's claims against BCBSI for violations of *Section 1* of the Sherman Act—as well as *Section 3(4)* of the Illinois Antitrust Act—cannot stand. Thus, BCBSI's Motion to Dismiss Counts II and IV of Plaintiff's Second Amended Complaint is **GRANTED** with prejudice. Given that all counts against BCBSI are dismissed, BCBSI's Motion to Strike (Doc. 61) is **DENIED as MOOT**.

SIH's Motion to Dismiss

MHC alleges three distinct causes of action against SIH in violation of federal and state ***antitrust law***: Count I — exclusive dealing claims against SIH in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*); Count III — exclusive dealing against SIH in violation of the Illinois Antitrust Act (*740 ILCS 10/3*); Count V — tying against SIH in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*); Count VI — tying against SIH in violation of the Illinois Antitrust Act (*740 ILCS 10/3*); and Count VII — monopolization against SIH in violation of *Section 2* of the Sherman Act (*15 U.S.C. § 2*).

SIH moves to dismiss MHC's Second Amended Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*. Specifically, SIH contends that (1) MHC's tying claim under *§ 1* One of the Sherman **[*15]** Act and the Illinois Antitrust Act fails to allege facts supporting Plaintiff's claims that SIH forced or coerced BCBSI to contract with SIH for outpatient surgery services as a condition of contract for inpatient hospital services; (2) MHC's exclusive dealing claim under the *§ 1* of the Sherman Act and the Illinois Antitrust Act fails to allege that the exclusive contract between SIH and BCBSI foreclosed MHC from the alleged market for the sale of inpatient and outpatient surgery services to all potential buyers, including commercial payors, government payors, and patients who self-pay; and (3) MHC fails to allege that SIH acquired or maintained its allegedly dominant position in the alleged relevant markets through anticompetitive conduct. (Doc. 62, p. 2).

In cases involving exclusive dealing, courts have determined that an exclusive-dealing arrangement does not violate antitrust laws unless the court believes that performance of the contract will preclude competition in a "substantial share of the line of commerce affected." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. In *Tampa Elec. Co. v. Nashville Coal Co.*, the Supreme Court set forth factors to consider in order to determine what constitutes a "substantial share" including: **[*16]** (1) "the line of commerce involved must be determined, where it is in controversy, on the basis of the facts peculiar to the case"; (2) "the area of effective competition in the known line of commerce must be charted by careful selection of the market area in which the seller operates, and to which the purchaser can practicably turn for supplies"; and (3) the competition foreclosed by the contract must be found to constitute a substantial share of the relevant market." *Id. at 327-28*. Foreclosure exists when there is a significant limitation on other's ability to enter or remain in the market. *Id.* In order to further determine substantiality, courts have weighed the probable effect the contract will have on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce in relation to the total volume of commerce in the relevant market area, and the immediate and future effects which pre-emption of the share of the market might have on effective competition. *Id. at 329*. However, a mere showing that the alleged contract itself involves a substantial amount of dollars is "ordinarily of little consequence." *Id.*

SIH does not dispute **[*17]** the existence of the first two factors set forth in *Tampa Elec. Co.* Instead, it argues that MHC fails to allege an exclusive dealing claim because it did not properly plead substantial foreclosure from the relevant market. (Doc. 63, p. 7). In particular, SIH contends that MHC only alleges foreclosure from 30 percent of patients in the relevant geographic market, leaving 70 percent for access by MHC. *Id.* (p. 8). Further, SIH argues that this 30 percent is an overstatement, and even if true, is not substantial enough to constitute foreclosure according to case law. *See id.* MHC counters that it is not the percentage of the patients that is at issue, but the revenue generated. (Doc. 71, p. 5). MHC argues that it is foreclosed from the higher reimbursement rates of commercial insurers and cannot make up the difference with the "non-negotiable, typically at or below cost" reimbursements from Medicare, Medicaid and TRICARE. *Id.* (p. 6).

This Court has previously held that a vertical exclusive dealing arrangement, like the one alleged in the current case, is not presumed illegal. (Doc. 57). Thus, the Court determined that the analysis is subject to the Rule of Reason framework. *Id.* Under Rule **[*18]** of Reason analysis (the standard framework):

> The plaintiff carries the burden of showing that an agreement or contract has an anticompetitive effect on a given market within a given geographic area. As a threshold matter, a plaintiff must show that the defendant has market power—that is, the ability to raise prices significantly without going out of business—without which the defendant could not cause anticompetitive effects on market pricing. If the plaintiff meets his burden, the defendant can show that the restraint in question actually has a procompetitive effect on balance, while the plaintiff can dispute this claim or show that the restraint in question is not reasonably necessary to achieve the procompetitive objective.

Agnew, 683 F.3d at 335-36 .

Taking this into consideration, MHC has sufficiently pled its claims against SIH. MHC has alleged substantial foreclosure in detail and provided substantiation of those contentions. (Doc. 58, p. 29-31, par.'s 81-82). Specifically, MHC has alleged that it has been foreclosed access to payments for both inpatient and outpatient surgical services from all payors (*Id.*, par. 81 (b)(72.3%) & 82 (e)(77.2%)). Further, MHC alleges the market power that SIH wields in the **[*19]** relevant geographic area is substantial. The Second Amended Complaint states that within the relevant geographic area, SIH has a 77% market share for inpatient surgical cases (*Id.*, par 81 (h)) and a 76% market share of outpatient surgical cases. *Id.* (p. 30 par. 82 (a)). The complaint further alleges that, as a result of SIH's market power in the relevant product, and geographic market, competitors have been unable to expand. *Id.* (p. 26, par. 76-79). These amounts are well above the 30-40 percent range. As a result, SIH's market power would seem to be a "substantial share" or "significant fraction" of the relevant market. SIH's substantial share of the market power has prevented entry or maintenance in the in-network surgical services market of BCBSI. Accordingly, SIH's Motion to Dismiss Count I and III of MHC's Second Amended Complaint is **DENIED**.

SIH next argues MHC's claims of an illegal tying arrangement alleged in Counts II and IV must be dismissed. An essential characteristic of an invalid tying claim is the "seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all or might have preferred **[*20]** to purchase elsewhere on different terms." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *abrogated on other grounds by* *Ill. Tool Works, Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. When there is "forcing" present, competition on the merits in the market for the tied item is improperly restrained, and there is a violation of the Sherman Act. *Id.* The Supreme Court has condemned tying arrangements where the seller has some "market power" to improperly force a purchaser to do something that he normally would not have done in a competitive market. Id. at 13. In order to establish the *per se* illegality of a tying arrangement, a plaintiff must demonstrate that (1) the tying arrangement is between two distinct products or services, (2) the defendant has sufficient economic power in the tying market to appreciably restrain free competition in the market for the tied product, and (3) a not insubstantial amount of interstate commerce is affected." Reifert v. South Cent. Wisconsin MLS Corp., 450 F.3d 312, 316 (7th Cir. 2006).

MHC alleges that SIH has monopoly power in the inpatient surgical services market. MHC alleged that SIH maintained a 75% share of the market for acute care services and used this power to coerce BCBSI to agree to not provide in-network insurance coverage for outpatient surgical services provided by MHC. (Doc. 58, p. 58-59, par. 157 & par. 158). According to **[*21]** MHC, SIH was able to achieve this agreement by granting BCBSI access to discounted rates from SIH for services in exchange for an "agreement to exclude." *Id.* Lastly, MHC argues that BCBSI would not have agreed to this arrangement had SIH not been a "must have" inpatient surgical services hospital. *Id.* (p. 59, par. 161). SIH maintains that despite the use of "coercion" many times throughout the complaint, BCBSI and SIH negotiated the rates and arrangements of the contract. (Doc. 63, p. 10 (citing Doc. 58, par. 20)). According to the SIH, this negotiation refutes MHC's claims of "coercion." *Id.*

MHC has properly alleged an illegal tying arrangement between SIH and BCBSI in violation of the Sherman Act. MHC asserts that because SIH has significant market power in the in- and out- patient services market (72.3% and 76% respectively), MHC agreed to exclude out-of-network outpatient surgical service providers. MHC further asserts that BCBSI agreed to its arrangement with SIH because SIH is a "must have" surgical services provider hospital. According to MHC, SIH coerced BCBSI, and it was not the exercise reasonable and independent business judgment that led BCBSI to agree to the arrangement. **[*22]** Accordingly, SIH's Motion to Dismiss Count V and Count VI is **DENIED**.

Lastly, SIH seeks to dismiss Count VII of Plaintiff's Second Amended Complaint, arguing MHC fails to plead that SIH acquired or maintained an alleged monopolistic position unlawfully. Section 2 of the Sherman Act, 15 U.S.C. § 2, makes it unlawful for a firm to "monopolize." To prove monopolization under § 2, a plaintiff must allege: "(1) the possession of monopoly power in the relevant market and (2) the willful . . . maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966).

The Supreme Court has defined monopoly power as "the power to control prices or exclude competition." United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). A plaintiff may establish monopoly power by evidence that a firm has profitably raised prices above the competitive level. United States v. Microsoft Corp., 253 F.3d 34, 51, 346 U.S. App. D.C. 330 (D.C. Cir. 2001). In the absence of direct proof, market power may be derived from circumstantial evidence, including "a firm's possession of a dominant share of a relevant market that is protected by entry barriers." *Id.* Without countervailing evidence of the possibility of competition from new entrants, evidence of a dominant market share is sufficient to show monopoly **[*23]** power. *Id.* However, possessing monopoly power does not by itself constitute monopolization.. Grinnell Corp., 384 U.S. at 570-71. Rather § 2 of the Sherman Act makes it unlawful to maintain monopoly power through exclusionary conduct. Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004).

The test for exclusionary conduct is set forth in *United States. v. Microsoft Corp.* First, a plaintiff must prove that a monopolist's conduct has had an "anticompetitive effect." Microsoft, 253 F.3d at 58. Second, if a plaintiff is successful in showing an anticompetitive effect, the alleged monopolist may proffer a non-pretextual "procompetitive justification" for its conduct. Id. at 59. Lastly, if the alleged monopolist's proffering of procompetitive justification is unrebutted, the plaintiff "must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." Id.

Here, MHC has pled sufficient facts to infer market power due to SIH's charging of "supracompetitve prices" for the sustained period, without consequence. *See* Doc. 58, p. 42, par.'s 116-17. Additionally, market-share data, provided by MHC, allows an inference of SIH's monopoly power. *See id.* (p. 29-30).

MHC also alleges that SIH has willfully maintained its monopoly through its actions of exclusive dealing and tying arrangements **[*24]** in violation of *§ 2*. (Doc. 58, p. 66 par. 178). In order to show an anticompetitive effect, MHC alleges significant foreclosure from the most profitable health-insurance contracts and thus, foreclosure from the ability to compete adequately in the market. *See id.* (par. 107). MHC maintains that as a result of this foreclosure, it and others cannot remain viable and competitive with SIH. *Id.* (par. 179) and that this arrangement has prevented significant competition and has harmed consumers in the relevant geographic market. *See id.* (par. 179, 180); *see also* *Microsoft Corp., 253 F.3d at 58* ("[The anticompetitive effect] must harm the competitive process and thereby harm consumers."). MHC claims consumers have suffered direct harm through increased prices for patients and employers, suppressing price competition, decreasing the number of options available, and decreasing the overall quality of care. *Id.* These alleged facts allow the inference that the exclusive dealing and tying arrangements had an anticompetitive effect on the relevant markets. Accordingly, SIH's Motion to Dismiss Count VII of MHC's Second Amended Complaint is **DENIED**.

Conclusion

Defendant BCBSI's Motion to Dismiss Counts II and IV of Plaintiff's Second **[*25]** Amended Complaint (Doc. 59) is **GRANTED with prejudice**. The Court **DENIES** Defendant BCBSI's Motion to Strike (Doc. 61) as **MOOT**.

Defendant SIH's Motion to Dismiss Counts I, III, V, VI, and VII of Plaintiff's Second Amended Complaint (Doc. 62) is **DENIED in its entirety**.

IT IS SO ORDERED.

Opinion

[*532] **ORDER**

Before the Court are Plaintiffs' Application for a Temporary Restraining Order and Preliminary Injunction Before June 3, 2015 and Brief in Support, filed April 29, 2015 (Clerk's Dkt. #10), the responsive pleadings thereto, as well as Amicus briefs filed both in support of, and opposition to, Plaintiffs' application. The Court conducted **[*533]** a hearing on the application on May 22, 2015. Having considered the application, response, record in the case, and the applicable law, the Court is of the opinion that Plaintiff's application for a preliminary injunction should be granted. *See Fed. R. Civ. P. 65(b)*.

I. BACKGROUND

Plaintiffs Teladoc, Inc. and Teladoc Physicians, P.A. (jointly "Teladoc"), Kyon Hood, M.D., and Emmette Clark, M.D. bring this action against defendants the Texas Medical Board ("TMB"), and fourteen **[**4]** members of the TMB in their official and individual capacities[1] challenging recent regulatory changes adopted by the TMB.

The TMB is a state agency "statutorily empowered to regulate the practice of medicine in Texas." *22 Tex. Admin. Code § 161.1*. Teladoc describes itself as providing "telehealth services," utilizing telecommunication technologies to provide health care services outside the traditional models wherein medical professionals provides services in an in-person office or hospital setting. According to Plaintiffs, "[t]elehealth providers are generally available 24 hours per day, 365 days per year, for a fraction of the cost of a visit to a physician's office, urgent care center, or hospital emergency room." (Compl. ¶ 3).

Teladoc's services are typically available to individuals whose employer has contracted with Teladoc for a per-member subscription fee. Individuals register with Teladoc either by **[**5]** telephone or online, creating a personal account, including information such as a medical history, physician, contact information, and medical records.

[1] The members of the TMB have not yet made an appearance in their individual capacities. Only the TMB and its members in their official capacities filed a response to the application for a preliminary injunction. The Court refers herein to both the TMB and its members in their official capacities as the TMB.

Registrants may also upload photographs and medical records to Teladoc's system for inclusion with their medical history. (*Id.* ¶¶ 43-44).

Registrants seeking a physician consultation can log into Teladoc's web portal or call a toll-free number to place a request for consultation. Teladoc employs board certified physicians who are provided specialized training in treatment and diagnosis via telephone. Once a Teladoc physician accepts the request for consultation, the physician reviews the requesting registrant's information and medical records through the website, then calls the registrant by telephone and consults with him or her. Based on the medical records and history, reported symptoms, and other information the physician elicits during the consultation, the physician dispenses medical advice, including referring the registrant to a physician's office, dentist, or emergency room. When deemed appropriate, the physician can prescribe certain medications.[2] Following the consultation, the Teladoc physician enters notes and findings into **[**6]** the registrant's record, which is available to the registrant and, if the registrant chooses, is forwarded to his or her primary-care physician. (*Id.* ¶¶ 45, 68-71, 76-84).

This action relates to the TMB's adoption on April 10, 2015 of revisions to Chapter 190 of the Texas Administrative Code title which governs the TMB. Chapter 190 sets forth disciplinary guidelines for the practice of medicine in Texas. *22 Tex. Admin. Code § 190.1*. Plaintiffs specifically complain of the revisions to *section 190.8(1)(L)* ("New *Rule 190.8*) which sets **[*534]** forth practices the TMB deems to be violations of the Texas Medical Practices Act.

As originally adopted by the TMB in 2003, *section 190.8(1)(L)* ("Old *Rule 190.8*) prohibits prescription of any "dangerous drug or controlled substance" without first establishing a "proper professional relationship" which requires, in pertinent part, "establishing a diagnosis through the use of acceptable medical practices such as patient history, mental status examination, physical examination, and appropriate diagnostic and laboratory testing." *22 Tex. Admin. Code § 190.8(1)(L)*. New **[**7]** *Rule 190.8* prohibits prescription of any "dangerous drug or controlled substance" without first establishing a "defined physician-patient relationship" which "must include," in pertinent part, "documenting and performing" a "physical examination that must be performed by either a face-to-face visit or in-person evaluation" elsewhere defined as requiring the provider and patient to be in the same physical location or at an established medical site. (Def. Resp. Ex. 15).

In 2004 the TMB adopted regulations specifically governing "telemedicine." *22 Tex. Admin. Code §§ 174.1, et seq.* Effective October 2010, the TMB amended its telemedicine regulations, restricting the definition of "telemedicine" to consultations using "advanced telecommunications technology that allows the distant site provider to see and hear the patient in real time." 22 TEX. ADMIN. CODE § 174.2. The amended regulations also made clear that, to establish a "proper physician-patient relationship," telemedicine providers were required to conduct a physical examination of a patient. *Id. § 174.8*.

In June 2011, the TMB issued a letter to Teladoc, stating the language of Old *Rule 190.8* required a "face-to-face" examination prior to prescription of a dangerous drug or controlled **[**8]** substance. The letter makes clear the TMB considered Teladoc and its physicians to be engaging in a prohibited practice by issuing prescriptions following telephone-only consultation. (Plf. Appl. Ex. 1 ("Navikas Decl.") Ex. A).

Teladoc sought legal recourse by bringing suit against the TMB in Texas state court. The court of appeals held the "TMB's pronouncements in its June 2011 letter are tantamount to amendments to the existing text," finding the TMB had effectively substituted "including" for the actual "such as" phrase. *Teladoc, Inc. v. Texas Med. Bd., 453 S.W.3d 606, 620 (Tex. App.—Austin 2014, pet. filed)*. Thus, the court found the " TMB's pronouncements hardly 'track' [Old] *Rule 190.8* . . . rather, they depart from and effectively change that text," rendering the June 2011 letter a procedurally invalid amendment to Old *Rule 190.8*. *Id.*

In response, the TMB issued an "emergency" rule on January 16, 2015, amending Old *Rule 190.8*. The emergency amendment mandated a "face-to-face visit or in-person evaluation" before a physician can issue a prescription.

[2] According to Teladoc, its physicians do not prescribe "DEA-controlled substances (including narcotics) or what are referred to as lifestyle drugs (i.e., Viagra, or diet pills)." (Compl. ¶ 81).

(Compl. ¶ 111). Teladoc sought and obtained a temporary injunction of the emergency rule in Texas state court. (Navikas Decl. Ex. U). The TMB then engaged in a formal rulemaking, resulting in an April 10, 2015 vote by the TMB to adopt New *Rule 190.8*. (Navikas **[**9]** Decl. Ex. B).

Plaintiffs filed this action on April 29, 2015, asserting Defendants have committed a violation of ***antitrust law***, as well as the *Commerce Clause of the Constitution* in adopting New *Rule 190.8*. Plaintiffs now seek a preliminary injunction preventing enforcement of New *Rule 190.8*, which is to go into effect on June 3, 2015. The parties have filed responsive pleadings. The Court conducted a hearing on May 22, 2015 and the matter is now ripe for review.

[*535] II. STANDARD OF REVIEW

A preliminary injunction is an extraordinary remedy and the decision to grant a preliminary injunction is to be treated as the exception rather than the rule. *Valley v. Rapides Parish Sch. Bd., 118 F.3d 1047, 1050 (5th Cir. 1997)*. The party seeking a preliminary injunction may be granted relief *only* if the moving party establishes: (1) a substantial likelihood of success on the merits; (2) a substantial threat that failure to grant the injunction will result in irreparable injury; (3) that the threatened injury out-weighs any damage that the injunction may cause the opposing party; and (4) that the injunction will not disserve the public interest. *See Hoover v. Morales, 146 F.3d 304, 307 (5th Cir.1998)*; *Wenner v. Texas Lottery Comm'n, 123 F.3d 321, 325 (5th Cir. 1997)*; *Cherokee Pump & Equip. Inc. v. Aurora Pump, 38 F.3d 246, 249 (5th Cir. 1994)*. The party seeking a preliminary injunction must clearly carry the burden of persuasion on all four requirements to merit relief. *Mississippi Power & Light Co., 760 F.2d 618, 621 (5th Cir. 1985)*.

III. ANALYSIS

A. Likelihood of Success

Plaintiffs **[**10]** contend they are likely to succeed on the merits both of their antitrust claim as well as their claim under the *Commerce Clause*. To show a substantial likelihood of success, "the plaintiff must present a prima facie case, but need not prove that he is entitled to summary judgment." *Daniels Health Sciences, L.L.C. v. Vascular Health Sciences, L.L.C., 710 F.3d 579, 582 (5th Cir. 2013)*. *See also Janvey v. Alguire, 647 F.3d 585, 596 (5th Cir. 2011)* (same, citing CHARLES ALAN WRIGHT, ARTHUR R. MILLER, MARY KAY KANE, 11A FEDERAL PRACTICE & PROCEDURE § 2948.3 (2d ed. 1995) ("All courts agree that plaintiff must present a prima facie case but need not show that he is certain to win.")).

1. Antitrust

This case presents an atypical situation under antitrust laws. States are generally permitted to regulate their economies in ways they see fit, including "impos[ing] restrictions on occupations, confer[ring] exclusive or shared rights to dominate a market, or otherwise limit[ing] competition to achieve public objectives." *N. Carolina State Bd. of Dental Examiners v. F.T.C., 135 S. Ct. 1101, 1109, 191 L. Ed. 2d 35 (2015)*. Thus, in most situations "federal antitrust laws are subject to supersession by state regulatory programs." *F.T.C. v. Ticor Title Ins. Co., 504 U.S. 621, 632, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)*. As a result, the Supreme Court has "interpreted the antitrust laws to confer immunity on anticompetitive conduct by the States when acting in their sovereign capacity." *Id. at 1110* (citing *Parker v. Brown, 317 U.S. 341, 350-51, 63 S. Ct. 307, 87 L. Ed. 315 (1942)*. Specifically, state regulation is granted *Parker* immunity from ***antitrust law*** where the challenged **[**11]** restraint is "clearly articulated and affirmatively expressed as state policy" and is "actively supervised by the State itself." *California Retail Liquor Dealers Ass'n v. Midcal Alum., Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*.

Significantly, in this case, the TMB declined to assert any immunity defenses, including *Parker* immunity, solely as to Plaintiffs' application for a preliminary injunction. The normal deference afforded to a state under ***antitrust law*** is, therefore, not an issue in reviewing Plaintiff's application for a preliminary injunction. The Court's opinion is properly read through that narrow, and unusual, lens.

[*536] a. Governing Law

Section 1 of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade . . . is declared to be illegal." *15 U.S.C. § 1*. Thus, to establish a violation of *Section 1* of the Sherman Act, "plaintiffs must show that the defendants (1) engaged in a conspiracy (2) that produced some anti-competitive effect (3) in the relevant market." *Abraham & Veneklasen Joint Venture v. Am. Quarter Horse Ass'n, 776 F.3d 321, 327 (5th Cir. 2015)*. More particularly, *Section 1* prohibits concerted action which unreasonably restrained trade in the relevant market. *American Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 190, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* ("*Section 1* applies only to concerted action that restrains trade"); *Marucci Sports, L.L.C. v. Nat'l Collegiate Athletic Ass'n, 751 F.3d 368, 375 (5th Cir. 2014)* (plaintiffs must allege facts showing defendants "unreasonably restrained trade" in market); *Consol. Metal Prods., Inc. v. Am. Petroleum Inst., 846 F.2d 284, 289 (5th Cir.1988)* (only "unreasonable **[**12]** restraint[s]" violate *Section 1*). For the purpose of Plaintiffs' request for immediate injunctive relief, the TMB does not contest the existence of a conspiracy. Rather, it maintains Plaintiffs cannot demonstrate the requisite anti-competitive effect.

To seek relief for anti-competitive conduct, a plaintiff must show both an injury to the plaintiff as well as an "antitrust injury." *Jebaco, Inc. v. Harrah's Operating Co., 587 F.3d 314, 318-19 (5th Cir. 2009)* (quoting *Doctor's Hosp., Inc. v. Se. Med. Alliance, 123 F.3d 301, 305 (5th Cir. 1997))*. Antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl—O—Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Put another way, a plaintiff "must show that the defendants' activities caused an injury to competition." *Doctor's Hosp., 123 F.3d at 307*. *See also* *Felder's Collision Parts, Inc. v. All Star Adver. Agency, Inc., 777 F.3d 756, 757 (5th Cir. 2015)* ("It would not be an antitrust opinion without the line that the antitrust laws were designed for the protection of competition, not competitors") (internal quotation omitted).

Assessing whether an injury to competition has occurred utilizes a sliding scale of analysis. *N. Carolina State Bd. of Dental Examiners v. F.T.C., 717 F.3d 359, 373 (4th Cir. 2013)*, *aff'd*, *135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*. At one end of the scale are practices considered anti-competitive per se. *N. Tex. Speciality Physicians v. FTC, 528 F.3d 346, 362 (5th Cir. 2008)*. At the other end of the scale, restraints are analyzed under the "rule of reason." which "requires the factfinder to decide whether under all the circumstances of **[**13]** the case the restrictive practice imposes an unreasonable restraint on competition." *Id.* (quoting *Arizona v. Maricopa County Med. Soc., 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982))*. Courts apply a middle ground called "quick look" analysis only "when the great likelihood of anticompetitive effects can easily be ascertained," and "after assessing and rejecting [the] logic of proffered procompetitive justifications." *Id.* (quoting *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770-71, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999))*.

b. Discussion

The parties in this case disagree which analysis the Court should apply. Plaintiffs maintain the quick—look analysis is warranted, while the TMB argues the rule of reason should be applied. This dispute need not be addressed as the Court concludes **[*537]** Plaintiffs' challenge succeeds under both analyses.

Plaintiffs maintain the effect of New *Rule 190.8* will be increased prices, reduced choice, reduced access, reduced innovation, and a reduced overall supply of physician services. As the TMB itself concedes, the types of harm identified by Plaintiffs are clearly "the kind of injuries that the antitrust laws were enacted to prevent." (Def. Resp. at 4 (quoting *Nilavar v. Mercy Health Sys.-W. Ohio, 494 F. Supp. 2d 604, 617 (S.D. Ohio 2005))*. However, the TMB argues Plaintiffs have presented only speculation, not concrete data, which shows the identified injuries are actually likely to occur should New *Rule 190.8* go into effect.

The Court **[**14]** disagrees. Plaintiffs' evidence shows the average costs of visits to a physician or emergency room are $145 and $1957, respectively, and the cost for a Teladoc consultation is typically $40. (Plf. Appl. Ex. 8 ("Miller Decl.") ¶ 69). Plaintiffs also cite to research finding companies using Teladoc's services achieved reduced monthly employee healthcare costs. (Miller Decl. ¶ 70). Additionally, Plaintiffs present evidence that patients choose telehealth for a number of reasons, including reduced travel and waiting time. (Plf. App. Ex. 3 ("DePhillips Decl.") ¶ 52; Ex. 5 ("Hood Decl.") ¶ 14. Ex. 7 ("Smythe Decl.) ¶ 28). One physician stated that, without Teladoc, some of his patients would have gone without treatment. (Hood Decl. ¶ 14). Another suggested access to telehealth would reduce delay in obtaining treatment. (Smythe Decl. ¶ 24).

Plaintiffs have also cited evidence that Teladoc increases opportunities for physicians to provide health care. One physician testified telehealth allowed him to continue to practice medicine on a flexible schedule in his semiretirement. (Plf. Appl. Ex. 6 ("Clark Decl.") ¶¶ 15-16). Another testified, without telehealth, he would treat fewer patients. (Hood **[**15]** Decl. ¶ 8). This evidence is significant in light of the evidence presented by Plaintiffs that Texas suffers from a shortage of doctors, particularly in rural areas, and that approximately 50% of Teladoc's client patients do not have a regular physician. (Hood. Decl. ¶ 11; Smythe Decl. ¶ 26; DePhillips Decl. ¶ 18). Elimination of physicians providing healthcare would thus negatively impact not just the competitor physicians, but consumers, a classic antitrust injury.

The Court finally notes the TMB's own evidence supports Plaintiffs' contention that Teladoc provides benefits to the market. As one physician stated, "one cannot help but realize the care [Teladoc is] attempting to deliver decreases the costs for insurance companies and large employers that are self insured." (Def Resp. Ex. 5 ("Curran Aff.") at 3). In addition, a study conducted in California concluded "Teladoc appears to be expanding access to patients who are not connected to other providers." (Def. Resp. Ex. 22 ("RAND study") at 1). Accordingly, the Court concludes Plaintiffs have presented sufficient evidence, at this preliminary stage, to meet their burden to show an anti-competitive effect by New *Rule 190.8*. *See Palmyra Park Hosp., Inc. v. Phoebe Putney Mem'l Hosp., 604 F.3d 1291, 1305 (11th Cir. 2010)* ("higher premiums **[**16]** and decreased choices [are] two evils within the ambit of the antitrust laws.").

The Court thus turns to the second part of the analysis, balancing the anti-competitive effect of the challenged regulation with the pro-competitive justification offered in support. *See PSKS, Inc. v. Leegin Creative Leather Prods., Inc., 615 F.3d 412, 417 (5th Cir. 2010)* (under rule of reason court balances "anticompetitive evils" of challenged regulation "against any procompetitive benefits or justifications"); *Speciality Physicians, 528 F.3d at 362* (to justify quick-look analysis, **[*538]** the burden remains on challenger to demonstrate proffered procompetitive effect does not result in net procompetitive effect). The sole justification the TMB offers is that New *Rule 190.8* will lead to improved quality of medical care. *See McWane, Inc. v. F.T.C., 783 F.3d 814, 841 (11th Cir. 2015)* (noting cognizable procompetitive justifications include improving product quality or service). *See also Marucci Sports, 751 F.3d at 377* (addressing failure to improve quality as anticompetitive evil).

As an threshold matter, the Court notes all physicians licensed by Texas, including Teladoc physicians, are bound to the same standard of care and ethical rules. *See 22 Tex. Admin. Code § 190.8(1)(A)* ("Failure to practice in an acceptable professional manner consistent with public health and welfare within the meaning of the [Medical Practices] Act includes, but is not **[**17]** limited to . . . failure to treat a patient according to the generally accepted standard of care."). As Plaintiffs point out, Teladoc physicians refer patients who cannot be diagnosed reasonably and safely via the telephone to an in-person physician. (DePhillips Decl. ¶ 25). As the TMB itself makes clear, it has the authority to, and regularly does, investigate complaints against physicians who do not meet the standards of care for practicing in Texas. In light of the existing restrictions on poor quality care, the Court finds TMB's assertion of additional improvement in the quality of care by the adoption of New Rule 190.8 suspect.

In support of this contention the TMB first cites to affidavit testimony presented by medical practitioners detailing deficiencies in telephone-only diagnosis. (Def. Resp. Ex. 3 ("Malone Aff") (noting complaint of left shoulder pain without acute injury cannot be diagnosed without face to face encounter with patient); Ex. 4 ("Douglass Aff.") (relating example of mistreatment by Teladoc physician of ear pain with antibiotic ear drops, where correct diagnosis of sinus infection was only made following physical exam); Curran Aff. at 3 (relating two examples where physical **[**18]** examination aided in diagnosis); Ex. 12 ("Yount Aff") (noting two examples of "poor care" provided via telephone contact). As Plaintiffs point out, this testimony is essentially anecdotal, reflecting the opinion of the affiants, but not necessarily statistically reliable evidentiary studies. *See* [Wells v. SmithKline Beecham Corp., 601 F.3d 375, 380-81 (5th Cir. 2010)] (finding testimony based on "anecdotal evidence" did not meet threshold for admission of expert testimony under *Daubert* standard). Moreover, to the degree anecdotal evidence is informative, Plaintiffs have submitted countervailing testimony from patients extolling the value of Teladoc's services. (DePhillips Decl. ¶¶ 33-36 (detailing examples of positive results of Teladoc services); Ex. 10 ("Stowell Decl.") Ex. B (describing incident in which Teladoc physician identified early stages of heart attack and directed patient to immediately go to emergency room, stating "I would definitely not have done this if I did not call Teladoc because I did not understand the severity of the situation.").

It is also worth noting Plaintiffs have submitted expert testimony summarizing pertinent research, and concluding "there is empirical evidence suggesting widespread improper antibiotic prescribing by physicians **[**19]** following in-person physical examination." (Plf. Reply Ex. 2 ("Mehrotra Decl.") ¶ 45).

The TMB also suggests notes made by a regular treating physician, in contrast with a Teladoc consulting physician, become "part of the patient's permanent medical record, which will follow her to future locations and can be accessed by future treating personnel." (Def. Resp. at 11). As **[*539]** the TMB acknowledges, however, Teladoc permits patients to send their Teladoc record to their primary care physician, although apparently only roughly one-third agree to do so. (*Id.).* Moreover, in reality, patients do not have a singular "permanent medical record." Rather, patients have records scattered across a variety of providers. (Mehrotra Decl. ¶¶ 52-53).

Plaintiffs further contend the TMB's contention of increased quality of care is rebutted by the continued acceptance of "on call" coverage by one physician for another's patients. The TMB maintains the service provided by Teladoc is not comparable, relying on affidavit testimony in which physicians describe on call coverage as based on a shared practice, in which physicians have a common knowledge of skills and values, as well as access to the patient's medical **[**20]** record. (Curran Aff. at 2; Def. Resp. Ex. 9 ("Arambula Aff.")). As noted above, Plaintiffs have presented evidence rebutting the notion that a patient has a singular record. The Court additionally notes that, while the TMB's evidence suggests an on call physician has access to patient records, it does not establish the on call physician checks those records before treating a patient. Indeed, one physician has testified that, as an on call physician, he had no access to electronic medical records, and would rely on the patient's account of symptoms and medical history. (Clark Decl. ¶ 5).

Further, affidavit testimony provided by Plaintiffs indicates there may not be empirical evidence supporting the distinction between Teladoc's service and that of an on call physician. (Mehrotra Decl. ¶ 51). Additionally, affidavit testimony from a Texas physician notes that physician assistants in Texas may enter into agreements with supervising doctors delegating prescription writing authority. Under such an agreement, the physician assistant may issue a prescription without examining the patient, by listening to the patient's descriptions of his or her symptoms over the phone. (Smythe Decl. ¶ 25). **[**21]**

Finally, and troublingly, the TMB cites a study performed in California, assessing use of Teladoc by a large public employer. In its proffered justification for adopting New [Rule 190.8], the TMB stated that "[t]he study found:

> Teladoc's model could actually further fragment healthcare;
> Teladoc's physicians are unable to use visual cues to aid in diagnosis;
> The limitations of telephone only consult could lead to misdiagnosis and higher rates of follow-up care - findings that have already been demonstrated with e-visits and telephone consultations;
> The adult users of Teladoc, in the study, were younger and healthier and lived in more affluent communities; and
> The population of patients attracted to Teladoc - a more affluent and likely more technologically savvy group - might have fewer access needs than people living in area's [sic] characterized by shortage of primary care or socio-economic disadvantage. And further research is needed to understand whether Teladoc might be improving access for patients with lower income and those in rural areas, and if not, can it be positioned to do so in the future.

(Def. Resp. Ex. 11 ("Freshour Aff.") Ex. (c) at 12).

Plaintiffs, in turn, have provided the affidavit of one **[**22]** of the two researchers who conducted the study, Ateev Mehrotra ("Mehrotra"). According to Mehrotra, the TMB has mischaracterized his research by "present[ing] to the Court a number of conclusions that are purportedly drawn from my 2014 study that are not accurate descriptions of my findings" but rather **[*540]** "hypotheses laid out in the introduction of the study." (Mehrotra Decl. ¶ 24).

Mehrotra specifically takes exception to the statement that his study "found" that Teladoc consultations "could lead to misdiagnosis and higher need for follow-up visits." (*Id.* ¶ 25). Instead, he states the "data showed that, across the three leading conditions treated by Teladoc, 13% of visits to physicians' offices and 20% of visits to the emergency room led to follow-up care, whereas only 6% of Teladoc calls led to follow-up care," results which "do not support the hypothesis that Teladoc has higher rates of misdiagnosis or mismanagement." (*Id.* ¶ 26).

In fact, the first page of the study, which is attached to the TMB's response to Plaintiffs' application, summarized the study as showing "Patients who uses Teladoc were less likely to have a follow-up visit to any setting, compared to those patients who visited a physician's **[**23]** office or emergency department." (RAND Study at 1). Plaintiffs also cite a second research study examining the impact of Teladoc on employees fo Home Depot. In pertinent part, the researchers concluded "Teladoc users had significantly lower rates of follow-up office visits, ER visits, and hospitalizations at both 7 and 30 days." (Plf. Appl. Ex. 2 ("Gorevic Decl.") Ex. A at 15). In sum, Plaintiffs have presented significant evidence which undermines the TMB's contention that the quality of medical care will be improved by New *Rule 190.8*.

The TMB suggests Plaintiffs' countervailing evidence is an insufficient basis for enjoining New *Rule 190.8*. The TMB points to the Supreme Court's statement that "certain practices by members of a learned profession might survive scrutiny under the Rule of Reason even though they would be viewed as a violation of the Sherman Act in another context." *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 686, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. *See also* *Goldfarb v. Va. State Bar, 421 U.S. 773, 788 n.17, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*. While the decision does indeed include that quotation, in *Professional Engineers* the Supreme Court explicitly rejected the notion that improved public safety was a sufficient justification for a society of professionals to adopt an anti-competitive policy. *Prof'l Eng'rs, 435 U.S. at 695* (attempt to justify anti-competitive policy "on the basis of the potential **[**24]** threat that competition poses to the public safety and the ethics of its profession is nothing less than a frontal assault on the basic policy of the Sherman Act"). The Supreme Court has continued to reject such justifications. *See* *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 463, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* (rejecting argument "that an unrestrained market in which consumers are given access to the information they believe to be relevant to their choices will lead them to make unwise and even dangerous choices" as justification for anti-competitive policy).[3]

The Court thus concludes Plaintiffs have presented evidence and argument which makes a prima facie showing they are likely to succeed on the merits of their claim under the Sherman **[**25]** Act.

[*541] 2. Dormant *Commerce Clause*

Plaintiffs maintain New *Rule 190.8* violates the *Commerce Clause* because it discriminates against physicians who are licensed in Texas, but are physically located out of state. The Supreme Court has made clear "[t]ime and again," that state laws violate the *Commerce Clause* if they mandate "differential treatment of in-state and out-of-state economic interests that benefits the former and burdens the latter." *Granholm v. Heald, 544 U.S. 460, 472, 125 S. Ct. 1885, 161 L. Ed. 2d 796 (2005)* (quoting *Oregon Waste Sys., Inc. v. Dep't of Envt'l Quality, 511 U.S. 93, 99, 114 S. Ct. 1345, 128 L. Ed. 2d 13 (1994))*. The TMB maintains Plaintiffs cannot establish more than "an indirect

[3] The TMB also suggests the proper standard for reviewing its justification is whether its "conclusions are so baseless that no reasonable medical practitioner could have reached those conclusions after reviewing the same set of facts." *Willman v. Heartland Hosp. E., 34 F.3d 605, 611 (8th Cir. 1994)*. At issue in *Willman*, however, was whether specific corrective action against a physician violated antitrust laws if the physician's peer reviewers had legitimate medical reasons to believe that the physician provided substandard care. TMB's reliance on *Willman* in this case is simply not appropriate.

burden on interstate commerce" which does not violate the Commerce Clause. Dickerson v. Bailey, 336 F.3d 388, 396 (5th Cir. 2003).

As the Court has concluded Plaintiffs have shown a likelihood of success on their antitrust claim, Plaintiffs have satisfied the first element of the test for grant of a preliminary injunction. The Court thus declines to address this claim.

B. Substantial Threat of Irreparable Injury

As to the second element, Plaintiffs contend they face irreparable injury. First, the plaintiff physicians maintain they would no longer be able to engage in providing medical care under the Teladoc model. Although the parties do not directly address this issue, as noted above, both Plaintiff Hood and Clark have submitted declarations in support of the application for preliminary injunction. **[**26]** Hood, as a Virginia resident, testifies he would be unable to provide care to Texas residents were New *Rule 190.8* to go into effect and would lose substantial income. (Hood Decl. ¶¶ 27-29). Clark testifies he is nearing retirement and anticipates earning income through Teladoc to support himself. According to Clark, absent that income, he will have to delay his retirement. (Clark. Decl. ¶¶ 15-18).

Monetary losses are generally not considered to satisfy the irreparable injury required to obtain a preliminary injunction. *See* *Bluefield Water Ass'n, Inc. v. City of Starkville, 577 F.3d 250, 253 (5th Cir. 2009)* (there is no irreparable injury where any harm is financial, and monetary compensation will make plaintiff whole if plaintiff prevails). *See also* *Heil Trailer Int'l Co. v. Kula, 542 F. App'x 329, 335 (5th Cir. 2013)* (irreparable injury is one that cannot be undone by monetary damages). However, Clark suggests money damages alone are insufficient to compensate him for delaying his requirement. (Clark. Decl. ¶ 18). Similarly, Hood would be forced to choose between continuing to practice in Virginia or moving to Texas. Finally, implementation of New *Rule 190.8* would eliminate the possibility that Clark and Hood could continue to provide healthcare via telephone consultation, effectively rendering their current business practices impossible. As discussed **[**27]** more fully below, destruction of a business model may constitute irreparable injury.

As to the remaining plaintiffs, succinctly put, Teladoc maintains it would no longer be in business in Texas, or otherwise. Unquestionably, New *Rule 190.8* would prevent Teladoc from providing its telephone-only service to patients in Texas. In 2014 23% of Teladoc's revenue was generated by Texas consultations or service payments. (Gorevic Decl. ¶ 5). Teladoc contends deprivation of its ability to do business in Texas would destroy its business model, causing "harm for which there is no adequate remedy at law." *Daniels, 710 F.3d at 585*. At least two circuit courts have recognized destruction of a business model may constitute irreparable injury. *See* *Stuller, Inc. v. Steak N Shake Enters.,* ***[*542]*** *Inc., 695 F.3d 676, 680 (7th Cir. 2012)* (evidence that change in pricing policy would be significant change to business model, negatively affecting revenue, and that reestablishing previous business model without loss of goodwill and reputation would be difficult, met threshold for irreparable injury); *Ross-Simons of Warwick, Inc. v. Baccarat, Inc., 102 F.3d 12, 18-19 (1st Cir. 1996)* (evidence defendant's product was integral component of plaintiff's business model, customers relied on availability of product, and product line served as "a beacon to attract potential customers," sufficed to show potential loss **[**28]** of consumer goodwill and threat of irreparable injury).

The TMB contends Plaintiffs' claims that they will no longer be able to provide healthcare services in Texas is overblown for two reasons. First, they maintain Plaintiffs have not shown they cannot continue to do business in Texas by utilizing the provisions in the TMB's regulations permitting telemedicine through the use of video equipment.

The Court notes, however, those regulations require "the use of advanced telecommunications technology that allows the distant site provider to *see and hear* the patient in *real time."* *22 Tex. Admin. Code § 174.2(10)* (emphasis added). Under the regulations, a patient presents at an "established medical site," which must be staffed with a licensed health care provider, and then communicates with the distant health care professional via real time video. *Id.* *§ 174.2(2)* & *(7)*. The site must have "sufficient technology and medical equipment to allow for adequate physical evaluation, as appropriate for the patient's presenting complaint." *Id.* *174.2(2)*. The current regulations provide that a "patient's private home is not considered an established medical site." *Id.* However, the regulations have recently been amended to permit **[**29]** a patient's home to be considered an established medical site if the home has "sufficient communication and remote medical diagnostic technology to allow the physician to carry out an adequate physical examination appropriate for the patient's presenting condition while seeing and hearing the patient in real time." (Def. Resp. Ex. 13). In short, these regulations do not permit Teladoc to simply substitute video technology for its current telephone consultation model.

Moreover, the president of Teladoc testifies since 2011 Teladoc has explored operating by way of establishing remote medical sites in Texas, but has concluded the associated costs would prevent it from competing and would prevent it from serving a diffusely located patient population. (Plf. Reply Ex. 2 ("Gorevic Supp. Decl.") ¶ 15). Teladoc also considered partnering with physicians and employers in Texas to provides services at their offices, as well as sending physicians to specific sites at specific times, but rejected both options for the same reasons of cost and diffusely located patients. (Gorevic Supp. Decl. ¶¶ 16-17).

Second, Defendants point out Teladoc has clients in states other than Texas. However, as noted above, **[**30]** Plaintiffs have presented evidence that nearly one-quarter of their business is generated in Texas. Plaintiffs have also presented evidence that its subscribers include multi-state employers who demand healthcare services be available in all states. (Gorevic Decl. ¶ 18; Murphy Decl. App. C).

Additionally, Plaintiffs correctly point out an irreparable injury includes one for which monetary damages would be "especially difficult to calculate.*"* *Heil Trailer, 542 F. App'x at 335*. According to Teladoc's statistics, it has experienced rapid growth, quadrupling its revenues between 2012 and 2014. (Gorevic Supp. Decl. Ex. C-I). Teladoc's evidence further suggests the telehealth industry as a whole **[*543]** is at an early stage, making future growth especially difficult to estimate. (Gorevic Decl. ¶ 20; Murphy Decl. ¶ 44).

Teladoc further maintains it is at an especially vulnerable point in its growth. Teladoc characterizes itself as a young business, dependent on ongoing funding from new sources to maintain and grow its business. (Gorevic Decl. ¶ 22). Further, Teladoc is planning an initial public offering of common stock. Teladoc's president states Teladoc's investment bankers have advised that the stock offering will not go forward **[**31]** if New *Rule 190.8* is put into effect. (Gorevic Decl. ¶ 14; Gorevic Supp. Decl. ¶¶ 8-9). Teladoc additionally points out some of its physicians, the quality of which are key to patient satisfaction and Teladoc's continued viability, are declining to continue to provide services through Teladoc. (DePhillips Decl. Ex. C; Murphy Decl. App. at 22-24).

Finally, Plaintiffs argue they face irreparable injury because, even if monetary compensation was sufficient, it is unlikely they will be able to recover monetary damages from the defendants. According to Teladoc, Plaintiffs' trebled antitrust damages would run into at least the tens of millions of dollars and likely outstrip the individual defendants' ability to pay. (Murphy Decl. ¶¶ 31-36). The Fifth Circuit recently noted the district court did not abuse its discretion in considering there was a "substantial probability that [plaintiff] would be unable to collect a judgment against [defendant]" in finding the plaintiff faced irreparable harm. *Aspen Tech., Inc. v. M3 Tech., Inc., 569 Fed. Appx. 259, 273 (5th Cir. 2014)*. *See also* *Specialty Healthcare Mgmt., Inc. v. St. Mary Parish Hosp., 220 F.3d 650, 658 (5th Cir. 2000)* (noting there is some authority for proposition that inability to actually collect on money judgment may suffice to make injury irreparable). The possibility that the TMB will **[**32]** assert immunity from monetary damages as a state agency also weighs in favor of finding Plaintiffs face irreparable harm. *See* *Crowe & Dunlevy, P.C. v. Stidham, 640 F.3d 1140, 1157 (10th Cir. 2011)* (imposition of money damages that cannot later be recovered for reasons such as sovereign immunity constitutes irreparable injury); *Harris v. Cantu, 81 F. Supp. 3d 566, 2015 U.S. Dist. LEXIS 8351, 2015 WL 338938, at *11 (S.D. Tex. Jan. 26, 2015)* (where defendants entitled to *Eleventh Amendment* immunity from money damages, plaintiff "has suffered and—if no injunction is issued—will continue to suffer irreparable injury for which money damages are inadequate").

The Court thus finds Plaintiffs have shown they face a substantial threat of irreparable injury.

C. Balancing of Respective Interests

The final two prongs of the preliminary injunction inquiry require weighing of the respective interests of the parties and the public. Specifically, that the threatened injury out-weighs any damage that the injunction may cause the opposing party and that the injunction will not disserve the public interest. In this case, the inquiry essentially collapses because the interests asserted by the TMB are in the form of protecting the public from injury.

The TMB contends Plaintiffs have failed to meet their burden to show the harm they would suffer if New *Rule 190.8* were permitted to take effect does not outweigh the **[**33]** threat to public safety the rule poses. The TMB characterizes Plaintiffs' evidence of harm as merely "speculative." As discussed above, however, Plaintiffs have presented specific evidence detailing the financial harm they will suffer, likely including destruction of Teladoc's business model and ability to do business in Texas, in addition to other non-monetary harms. **[*544]** Plaintiffs have also presented evidence casting into doubt their ability to receive monetary damages, even if such damages were sufficient to compensate them for the injury suffered.

As to the threat to public safety and health, the TMB has presented only anecdotal evidence of possible public harm. As reviewed above, Plaintiffs have presented countervailing anecdotal evidence, as well as evidence suggesting the basis for TMB's conclusions concerning Teladoc are poorly founded. In addition, Plaintiffs have presented evidence that consumers will face higher prices for medical care, as well as reduced access.

Finally, Plaintiffs point out a Texas state court considered this very issue in February in considering whether to enjoin enforcement of the emergency rule adopted by the TMB in January 2015. That court concluded "No **[**34]** imminent peril to public health, safety or welfare existed on January 16, 2015, or exists at the present time to justify adoption of the emergency rule." (Navikas Decl. Ex. U ¶ 2). At the injunction hearing, Plaintiffs suggested this ruling should be viewed as collaterally estopping the TMB from asserting otherwise in this action. While the Court declines to adopt Plaintiffs' view, the ruling additionally weighs against the TMB"s arguments.

In light of the evidence presented by Plaintiffs, the Court concludes the balance of respective interests of the parties and the public weigh in favor of granting Plaintiffs' application for a preliminary injunction.

IV. CONCLUSION

Plaintiffs' Application for a Temporary Restraining Order and Preliminary Injunction Before June 3, 2015 (Clerk's Dkt. #10) is hereby **GRANTED**.

Accordingly, it is hereby **ORDERED** that New *Rule 190.8* is enjoined from taking effect and Defendants are enjoined from taking any action to implement, enact and enforce New *Rule 190.8* from taking effect pending final resolution of the claims brought by Plaintiffs in their Complaint.

SIGNED on May 29, 2015.

/s/ Robert L. Pitman

Opinion

MEMORANDUM

Stengel, J.

Ryan Kerwin and Xtreme Caged Combat filed this *pro se* antitrust complaint against several competing mixed martial arts fight promotors, two casinos and one casino executive. Plaintiffs also append a count for tortious interference with prospective contractual relations. The casinos and the executive now move to dismiss the amended complaint. For the reasons that **[*2]** follow, I will grant the motion in part.

I Background

Ryan Kerwin owns and operates Xtreme Caged Combat (XCC). XCC is licensed by the Commonwealth of Pennsylvania to promote mixed martial arts (MMA) events. Am. compl. ¶¶ 3, 4. MMA is a combat sport which features two competitors fighting inside an enclosed area. Id. ¶ 66. Rob Haydak owns defendant Cage Fury Fighting Championships (CFFC). Id. ¶¶ 5, 7. David Feldman owns defendant Xtreme Fight Events (XFE). Id. ¶¶ 6, 8. CFFC and XFE also promote MMA events in Pennsylvania and New Jersey. Id. ¶¶ 5, 6. Since plaintiffs allege that XFE has merged into CFFC, Id. ¶ 45, I will refer to CFFC when discussing allegations against the fight promotor defendants

Plaintiffs allege that CFFC illegally conspired with Chester Downs and Marina LLC and Valley Forge Casino Resort to monopolize and restrict trade in the MMA events market in the Philadelphia Region. Id. ¶¶ 65 - 72. Chester Downs and Marina LLC operates a casino in Chester, Pennsylvania more commonly known as Harrah's. Id. ¶ 9. Valley Forge Casino Resort operates a casino in Valley Forge, Pennsylvania. Id. ¶ 12. Valley Forge employs Joel Freedman as its Vice President of Player Development. Id. **[*3]** ¶ 15. Mr. Feldman and Mr. Freedman are friends, and Mr. Feldman leveraged this relationship to secure exclusive venue agreements between CFFC and each casino. Id. ¶¶ 19, 34, 95.

Pursuant to the exclusive venue contracts, Harrah's or Valley Forge will pay CFFC $10,000 for every match it hosts at its respective casino. Id. ¶¶ 19, 20, 34. The casinos provide CFFC with a free venue, chairs, tables and other perks. Id. The contract gives CFFC the exclusive right to host MMA events at the casinos. Id. As a result, plaintiffs are blocked from hosting events at both casinos. Id. Plaintiffs admit that there are other facilities where they can host MMA events. Id. ¶ 52. However, MMA promotors are unable to make a profit at these other venues. Id. ¶¶ 31, 52. According to plaintiffs, by controlling these casino venues, CFFC will drive its competition out of business and achieve a monopoly in the MMA event market in the Philadelphia region. Id. ¶ 61. As a result of its dominant market position, CFFC has already increased ticket prices for its events. Id. ¶ 60. CFFC has also signed over 60 professional fighters to exclusive deals. Id. ¶ 61.

On September 8, 2014, Mr. Kerwin filed a *pro se* antitrust **[*4]** complaint on behalf of himself and XCC. By orders dated October 27, 2014 and November 10, 2014, I advised Mr. Kerwin, who is not an attorney, that he may not represent XCC. *See* *Simbraw, Inc. v. United States, 367 F.2d 373, 373-74 (3d Cir.1966)* (holding that a corporation may not be represented by its president in court and that an attorney must appear for it and represent it in the litigation). Subsequently, attorney Jordan Rushie entered his appearance for Xtreme Caged Combat. The casino defendants moved to dismiss the complaint. Doc. no. 4 (Valley Forge); doc. no. 39 (Harrah's). Plaintiffs filed an amended complaint, as of right, which added the charges against Mr. Freedman. Doc. no. 45. The casinos and Mr. Freedman renewed their objections to the allegations in separate motions to dismiss the amended complaint. Doc. no. 47 (Valley Forge); doc. no. 53 (Harrah's); doc. no. 56 (Freedman's notice of joinder in Valley Forge's motion).

II Standard of Review

A complaint must set forth "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. This statement must "give the defendant fair notice of what the ... claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. A complaint need not contain detailed factual allegations, **[*5]** but a plaintiff must provide "more than labels and conclusions" or "a formulaic recitation of the elements of a cause of action" to show entitlement to relief as prescribed by *Rule 8(a)(2)*. *Id. at 1965*; *Evancho v. Fisher, 423 F.3d 347, 350 (3d Cir. 2005)*. A defendant may attack a complaint by a motion under *Rule 12(b)(6)* for failure to state a claim upon which relief can be granted.

In deciding a motion to dismiss under *Rule 12(b)(6)*, I may consider "the allegations contained in the complaint, exhibits attached to the complaint and matters of public record." *Pension Ben.Guar. Corp. v. White Consol. Indus., Inc., 998 F.2d 1192, 1196 (3d Cir. 1993)*. The court is required to accept as true all of the factual allegations in the complaint, *Erickson v. Pardus, 551 U.S. 89, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*, and all reasonable inferences permitted by the factual allegations, *Watson v. Abington Twp., 478 F.3d 144, 150 (3d Cir. 2007)*, viewing them in the light most favorable to the plaintiff. *Kanter v. Barella, 489 F.3d 170, 177 (3d Cir. 2007)*. The court is not, however, "compelled to accept unsupported conclusions and unwarranted inferences or a legal conclusion couched as a factual allegation." *Baraka v. McGreevey, 481 F.3d 187, 195 (3d Cir. 2007)* (quotations and citations omitted). If the facts alleged are sufficient to "raise a right to relief above the speculative level" such that the plaintiffs' claim is "plausible on its face," a complaint will survive a motion to dismiss. *Bell Atlantic Corp., 127 S. Ct. at 1965, 1974*; *Victaulic Co. v. Tieman, 499 F.3d 227, 234-35 (3d Cir. 2007)*.

III Discussion

a) Antitrust Standing

Standing is a threshold requirement in all actions in federal court. *Ethypharm S.A. France v. Abbott Labs., 707 F.3d 223, 232 (3d Cir. 2013)*. Section 4 of the Clayton **[*6]** Act creates a private cause of action and confers standing on persons injured by an antitrust violation. The statute provides:

> any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States ... and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15(a). "Questions of statutory standing, like other factual issues, are considered under the same pleading requirements as a motion to dismiss pursuant to *Fed.R.Civ.P. 12(b)(6)*." *Animal Sci. Products, Inc. v. China Minmetals Corp., 34 F. Supp. 3d 465, 2014 WL 3695329 (D.N.J. 2014)* (citing *Baldwin v. Univ. of Pittsburgh Med. Ctr., 636 F.3d 69, 73 (3d Cir.2011)*.

Interpreting the statute, the Supreme Court has recognized that "Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (quoting *Blue Shield of Va. v. McCready, 457 U.S. 465, 477, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982))*. Courts have narrowed antitrust standing and consider the following factors to determine if the complaint is filed by the proper plaintiff:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with **[*7]** neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Ethypharm S.A. France, 707 F.3d at 233 (citing In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir.1993).

The casinos deny that plaintiffs have pleaded an antitrust injury, which "is a necessary but insufficient condition of antitrust standing." Ethypharm S.A. France, 707 F.3d at 233 (citing Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 182 (3d Cir.1997)). Plaintiffs must plead an injury to competition in the relevant market and that plaintiffs are competitors or consumers in the relevant market. *See* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) (An antitrust injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful"); Ethypharm S.A. France, 707 F.3d at 233. The injury cannot impact the plaintiffs alone. Eichorn v. AT & T Corp., 248 F.3d 131, 140 (3d Cir.2001) (citations omitted). The injury must have a wider impact on the competitive market, and plaintiffs' injury must be attributable to the anticompetitive conduct at issue. *Id*.; Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990). "[T]he existence of antitrust injury is not typically **[*8]** resolved through motions to dismiss." Schuylkill Energy Res., Inc. v. Pennsylvania Power & Light Co., 113 F.3d 405, 417 (3d Cir. 1997) (citing Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 876 (3d Cir. 1995)).

To determine the existence of a competitive injury, a court "must always be attuned to the particular structure and circumstances of the industry at issue." ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 283 (3d Cir.2012). Due to the economics of mixed martial arts promotion, a promotor cannot stay in business without access to casino venues. Am. compl. ¶ 52. By restricting access to the casinos, CFFC will eliminate all competition in the relevant geographic market. Id. ¶ 61. CFFC has achieved dominant market position through its control of the casinos and has considerably raised prices as a result. Id. On this basis, plaintiffs have alleged harm to competition. *See* Harrison Aire, Inc. v. Aerostar Int'l, Inc., 423 F.3d 374, 381 (3d Cir. 2005) (supracompetitive pricing is evidence of an antitrust violation); Gulfstream III Associates, Inc. v. Gulfstream Aerospace Corp., 995 F.2d 425, 429 (3rd Cir.1993) (decrease in competition is harm contemplated by antitrust laws).

Contrary to the casinos' position, the amended complaint alleges that plaintiffs are competitors in the MMA market. *See* Gulfstream III Associates, Inc., 995 F.2d at 429 ("The second requirement is generally met if the plaintiff is a 'competitor [ ]or a consumer in the relevant market.'"). According to defendants, plaintiffs are not the proper parties to bring this action because plaintiffs are not licensed to promote MMA **[*9]** events in Pennsylvania. *See* Ethypharm S.A. France, 707 F.3d at 237 (plaintiff drug maker did not suffer antitrust injury because it was not authorized by the FDA to sell relevant product in the United States). This is a compelling argument, but it is based on facts in direct contradiction to plaintiffs' allegations. Accepting as true the well pleaded facts in the amended complaint, Mr. Kerwin holds a matchmaker's license for Xtreme Caged Combat. Am. compl. ¶ 4. Henry Marchione, Mr. Kerwin's employee, holds a promoter's license for Xtreme Caged Combat. Id. With these licenses, Xtreme Caged Combat may legally host and promote MMA events. Id. Defendants' protestations to the contrary are improper at this point in the litigation. Plaintiffs have plausibly claimed an antitrust injury, and for the purposes of this motion, I find that the plaintiffs have standing.[1]

b) Count 1 - Refusal to Deal

In Count 1, plaintiffs allege that defendants have refused to deal in violation of section 1 **[*10]** of the Sherman Act. The statute provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States ... is declared to be illegal." 15 U.S.C. § 1. To state a claim under section 1, plaintiffs must allege concerted effort; an unreasonable restraint on trade and an effect on interstate commerce. Armstrong Surgical Ctr., Inc. v. Armstrong Cnty. Mem'l Hosp., 185 F. 3d 154, 157 (3d Cir. 1999) (citing Fuentes v. South Hills Cardiology, 946 F.2d 196, 201 (3d Cir.1991)).

[1] "[W]hereas lack of antitrust standing affects a plaintiff's ability to recover, but does not implicate the subject matter jurisdiction of the court[,]" Sullivan v. DB Investments, Inc., 667 F.3d 273, 307 (3d Cir. 2011) (internal citations and quotation marks omitted), I will not consider the remaining standing elements *sua sponte*.

1) Concerted effort

Concerted action is the catchall term for contract, combination and conspiracy set out in the Sherman Act. To plead this element, the plaintiffs must allege facts plausibly showing a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*; *see also* *Columbia Metal Culvert Co. v. Kaiser Aluminum & Chem. Corp., 579 F.2d 20, 33 (3d Cir. 1978)* ("[T]he alleged conspirators had a unity of purpose or a common design and understanding or a meeting of minds in an unlawful arrangement."). The casinos challenge the allegations on two fronts. First, the casinos argue that they cannot conspire with CFFC because the casinos are not in competition with CFFC. Second, the casinos deny that plaintiffs have sufficiently alleged the existence of an agreement. I am not persuaded by either argument.

The casinos contend that only direct competitors can conspire to violate the Sherman Act. According to this theory, the amended complaint must be dismissed because it does not allege concerted efforts between Harrah's and Valley Forge.[2] However, the casinos ignore a large swath of ***antitrust law*** scrutinizing agreements between customers and suppliers known as vertical restraints on trade. *See, e.g.*, *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 136, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* (finding that **[*11]** a vertical restraint which deprives a supplier of a potential customer is subject to the rule of reason analysis); *Bus. Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* (distinguishing between vertical and horizontal restraints on trade). In the vertical restraint context, courts have cautioned that exclusive dealing[3] agreements "can have adverse economic consequences by allowing one supplier of goods or services unreasonably to deprive other suppliers of a market for their goods." *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)* (citing *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984))*. Plaintiffs allege a vertical agreement between CFFC and the casinos which prohibits plaintiffs and other promotors from hosting MMA events at the casinos. This is actionable concerted effort in ***antitrust law***.

I recognize the logical force of the casinos' argument, but it lacks support in the law. It is hard to imagine what would motivate the casinos to restrict trade in a market in which they do not compete, but in this section 1 claim, the casinos can be liable even though they have no intent to reduce competition. *See* *Spectators' Commc'n Network Inc. v. Colonial Country Club, 253 F.3d 215, 221 (5th Cir. 2001)* ("Conspirators who are not competitors of the victim may have no interest in curtailing competition in a market in which they do not compete; nevertheless, when they have been enticed or coerced to share in an anticompetitive scheme, there is still a combination within the meaning of the Sherman Act."). It is sufficient to have alleged that CFFC devised a plan to reduce competition in the MMA market, and the casinos consciously committed to CFFC's illegal scheme. *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., 998 F.2d 1224, 1243 (3d Cir. 1993)* ("However, we have made it clear that the defendants need not share the *same* motive. Rather, all that is required is that they each have a motive to conspire" (citing *Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 214-15 (3d Cir.1992)))*. Accordingly, an agreement between the casinos **[*13]** and CFFC is actionable concerted conduct.

---

[2] "Plaintiffs make no factual allegations to state a plausible claim that [Harrah's] agreed with Defendant Valley Forge or any other casino not to deal with Plaintiffs' MMA promotion" Harrah's mot. to dismiss, doc. no. 53, 8; *See* Valley Forge's mot. to dismiss, doc. no. 47, 17.

[3] "Exclusive dealing exists when a buyer and seller enter into an agreement in which the buyer will only purchase goods or services from that one seller and the agreement forecloses competition." *BanxCorp v. Bankrate, Inc., 07-CV-3398, 2009 U.S. Dist. LEXIS 84151, 2009 WL 2986126, at *4 (D.N.J. Sept. 14, 2009)* (citing *Barr Laboratories, Inc. v. Abbott Laboratories, 978 F.2d 98, 110 (3d Cir.1992)*. The venue agreement allegedly **[*12]** provides that the casinos will purchase MMA promotion services from CFFC and no other fight promotor. This foreclosed all other fight promotors from holding MMA events at the casinos, and is exclusive dealing.

In the alternative, the casinos submit the written contracts they executed with CFFC. According to the casinos, the contracts conclusively disprove any exclusive arrangement.[4] The contracts contradict the amended complaint's well pleaded allegation which I must accept as true at this stage of the case. Furthermore, the contracts, provided they are authentic, are not the only evidence of concerted action. *See* *Monsanto Co., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* (concerted effort may be shown through direct and circumstantial evidence). A court will "look past the terms of the contract to ascertain the relationship between the parties and the effect of the agreement 'in the real world.'" *ZF Meritor, LLC, 696 F.3d at 270* (citing *United States v. Dentsply Int'l, Inc., 399 F.3d 181 at 191 (3d Cir. 2005)*. "A plaintiff may plead an agreement by alleging direct or circumstantial evidence, or a combination of the two." *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 99-100 (3d Cir. 2010)*. Among other things, plaintiffs allege that Mr. Feldman must consent before another fight promotor can gain entry into the defendant casinos. Am. compl. ¶¶ 50, 51. The complaint contains circumstantial evidence of exclusive dealing and is adequately pleaded. *See* *W. Penn Allegheny Health Sys. Inc., 627 F.3d at 99-100* ("If a complaint includes non-conclusory allegations of direct evidence of an agreement, a court need go no further on the question **[*14]** whether an agreement has been adequately pled." (citing *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 323 (3d Cir. 2010))*).

2) Unreasonable Restraint on Trade

There are two different standards used to determine if a restraint on trade is unreasonable. Typically, restraints on trade are judged by the rule of reason. *Ins. Brokerage, 618 F.3d at 315* (citing *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 882, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007))*. Under a rule-of-reason analysis, the plaintiffs "bear[] the initial burden of showing that the alleged [agreement] produced an adverse, anticompetitive effect within the relevant [product] and geographic market." *Id. at 315* (citing *Gordon v. Lewistown Hosp., 423 F.3d 184, 210 (3d Cir.2005))*. "If the plaintiff carries this burden, the court will need to decide whether the anticompetitive effects of the practice are justified by any countervailing pro-competitive benefits." *Id. at 316* (citing *Eichorn v. AT & T Corp., 248 F.3d 131, 143 (3d Cir.2001))*. On the other hand, there are some agreements which are deemed *per se* illegal and are conclusively presumed to be unreasonable "because of their pernicious effect on competition and lack of any redeeming virtue...." *United States v. Brown Univ. in Providence in State of R.I., 5 F.3d 658, 669 (3d Cir. 1993)* (citing *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*.

Plaintiffs urge me to find that the agreement alleged **[*15]** between CFFC and the casinos is *per se* illegal. I will decline the invitation because the agreements, as alleged, did not impose price constraints on CFFC or the casinos.[5] *NYNEX Corp., 525 U.S. at 136* ("[V]ertical restraint is not illegal *per se* unless it includes some agreement on price or price levels." (citing *Business Electronics Corp. V. Sharp Electronics Corp., 485 U.S. 717, 735-36, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988))*); *ZF Meritor, LLC, 696 F.3d at 271* ("Due to the potentially procompetitive benefits of exclusive dealing agreements, their legality is judged under the rule of reason." (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320 at 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*). To plausibly state a claim for exclusive dealing subject to the rule of reason, plaintiffs must plead: 1.) the relevant product market; 2.) the relevant geographic market and 3.) that the contract forecloses a substantial share of the competition in the relevant product and geographic markets. *Tampa Elec. Co., 365 U.S. at 327 - 28*. Defendants contend that the relevant markets are ill-defined.

"The outer boundaries of a product market are determined by the reasonable interchangeability **[*16]** of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. In other words, the relevant market includes all products a

---

[4] An amendment to CFFC's contract with Harrah's provides CFFC with a right to first refusal for any MMA event to be scheduled at Chester Downs between August 27, 2013 and March 7, 2014. Harrah's mot. to dismiss am. compl., doc. no. 48, Ex. C.

[5] In response to defendants' motion, plaintiffs assert he alleged a price fixing scheme. The only allegation of price fixing is between CFFC and XFE. How such price fixing could occur after CFFC and XFE merged is questionable. In any event, plaintiffs do not allege that the promotors conspired with the casinos to fix prices.

buyer would purchase if the seller's product was unavailable or too expensive. *See United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 394, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. While the proper product market is best determined by the trier of fact, *Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 199 (3d Cir.1992)*, a complaint is legally insufficient when the proposed market clearly excludes interchangeable products. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*. Such a problem arises when plaintiffs unnecessarily narrow the relevant product market to increase the defendant's relative market power. *See Id. at 438* (Court rejected plaintiff's alleged relevant product market which was limited to pizza ingredients approved for use by Domino's; product market included pizza ingredients used by all pizza restaurants).

The parties dispute what product is at issue in this litigation. Plaintiffs define the relevant product as MMA events. Am. compl. ¶ 65. Defendants, on the other hand, claim that the relevant product market is MMA event venues. Defendants maintain that plaintiffs' product definition is deficient because it fails to consider the interchangeability of casinos with other MMA event venues.[6] Given that this is a motion to dismiss, plaintiffs' **[*17]** theory of the case controls. Plaintiffs aver that CFFC's exclusive access to the casinos will eliminate competition in the MMA event market. The proper interchangeability inquiry considers what other fight events spectators will attend if CFFC becomes the only promoter of MMA events and raises prices.[7] Focusing, instead, on what other venues spectators will patronize is largely irrelevant if CFFC is the only company promoting MMA events. Therefore, plaintiffs have not clearly ignored substitute products by defining the product as MMA events.

Defendants **[*18]** attack plaintiffs' proposed geographic market as impermissibly vague. The geographic market must "correspond to the commercial realities of the industry," and may be as small as a single metropolitan area. *Brown Shoe Co., 370 U.S. at 336*. It is quite clear that plaintiffs have limited the geographic area to the Philadelphia region. Am. compl. ¶68. Indeed, the term "Relevant Geographic Market" is set out in bold under its own heading in the amended complaint. Defendants protest that plaintiffs do not apply this definition consistently throughout the complaint. I disagree. Any pleadings pertaining to events outside the Philadelphia region give context to the allegations and do not alter the defined geographic market. If discovery supports an expansion of the geographic market, I will reconsider the issue on a motion for summary judgment, but for the purposes of this motion, the pleaded geographic market is satisfactory.

3) Affecting interstate commerce

"[T]he interstate commerce requirement of the Sherman Act may be satisfied by demonstrating that defendant's activities either are in interstate commerce or affect interstate commerce." *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 873 (3d Cir. 1995)* (citing *McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 242, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980)*. CFFC's allegedly anti-competitive conduct is purely local; therefore, plaintiffs **[*19]** must identify how CFFC's actions affected activity in interstate commerce. *McLain, 444 U.S. at 242*. According to the amended complaint, CFFC's control of the casino venues has allowed CFFC to sign nearly 100 fighters to exclusive contracts in both Pennsylvania and New Jersey. Am. compl. ¶¶ 59, 60. Given the broad reach of the Sherman Act, these allegations easily satisfy plaintiffs' pleading burden. *See Brader, 64 F.3d at 873*. As a result, plaintiffs have plausibly pleaded each element of a section 1 claim, and I will deny the motions to dismiss Count 1.

c) Count 2 — Essential Facilities Doctrine

---

[6] "There are other casinos in Pennsylvania, Delaware and New Jersey .... None are considered or explained in the context of the supply and demand conditions in Plaintiffs' alleged product market definition. Nor is there any discussion of non-casino venues, such as Plaintiffs' current venue, that can host MMA events. Valley Forge's Mot. to Dismiss, doc. no 47-1, 20.

[7] Defendants also complain that plaintiffs do not consider boxing events in their market definition. I disagree. Plaintiffs' product definition is broad enough to include boxing matches, i.e. a combat sport which features two competitors fighting inside an enclosed area. Am. compl ¶ 66.

"[U]nder the 'essential facilities' or 'bottleneck' doctrine, 'a business or group of businesses which controls a scarce facility has an obligation to give competitors reasonable access to it.'" *Cyber Promotions, Inc. v. Am. Online, Inc., 948 F. Supp. 456, 460 (E.D. Pa. 1996)* (citing *Byars v. Bluff City News Co., Inc., 609 F.2d 843, 846, 856 & n. 34 (6th Cir.1980)*). The elements of an essential facility claim are: "(1) control of the essential facility by a monopolist; (2) the competitor's inability practically or reasonably to duplicate the essential facility; (3) denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility." *Ideal Dairy Farms, Inc. v. John Labatt, Ltd., 90 F.3d 737, 748 (3d Cir. 1996)*.

Plaintiffs cannot plead a viable essential facilities claim against the casinos because plaintiffs have not alleged that the **[*20]** casinos are monopolists. The proper defendant for an essential facility claim is the *monopolist* in control of the facility. *See* *Id., at 748*; *Cyber Promotions, Inc., 948 F. Supp. at 460* (dismissing essential facility claim because defendant was not a monopolist). I am unaware of any caselaw supporting essential facility liability against the *facility* which is controlled by a third party monopolist. CFFC, not the casinos, is the "monopolist" in the plaintiffs' view. There is no allegation that either casino is attempting to monopolize the MMA market in the Philadelphia region. Rather, the casino venues are being controlled by the alleged monopolist. Plaintiffs have not stated an essential facilities claim against the casinos, and I will dismiss Count 2 with prejudice as to the moving defendants.

d) Count 3 — Attempt to Monopolize

Section 2 of the Sherman Act provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States ... shall be deemed guilty of a felony...." *15 U.S.C. § 2*.[8] The Clayton Act authorizes private individuals who are injured by conduct proscribed by the Sherman Act to bring a civil action against the monopolist **[*21]** causing them harm. *15 U.S.C. § 15 (a)*. A plaintiff suing a monopolist under *section 2* of the Sherman Act may assert three distinct causes of action: 1.) monopolization, 2.) attempted monopolization, and 3.) conspiracy to monopolize. *See* *Carpet Grp. Int'l v. Oriental Rug Importers Ass'n, Inc., 256 F. Supp. 2d 249, 282 (D.N.J. 2003)*. While Count 3 is labeled attempt to monopolize, the allegations sound more in conspiracy to monopolize. Either way, the amended complaint fails to state a claim.[9]

The elements of an attempted monopolization claim are: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly **[*22]** power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. A claim of conspiracy to monopolize may arise from conduct demonstrating: "(1) an agreement to monopolize; (2) an overt act in furtherance of the conspiracy; (3) a specific intent to monopolize; and (4) a causal connection between the conspiracy and the injury alleged." *Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 253 (3d Cir. 2010)* (citing *United States v. Yellow Cab Co., 332 U.S. 218, 224-25, 67 S. Ct. 1560, 91 L. Ed. 2010 (1947)*; *Am. Tobacco Co. v. United States, 328 U.S. 781, 788, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946))*.

Count 3 is not a plausible statement of either claim against the casinos. Instead, the pleadings are almost entirely directed at CFFC. The paragraphs detail how CFFC has gained control of the casino venues in order to restrict trade in the MMA event market. Am. compl. ¶¶ 88, 89. The plaintiffs believe that CFFC's control over the casino venues has allowed CFFC to achieve dominant market power. Id. ¶¶ 91, 92. They then jump to the conclusion that, "Both Casino defendants ... have participated in this very same monopoly conspiracy being carried out by [CFFC]."

---

[8] To the extent plaintiffs assert an attempt to monopolize claim under *section 1* of the Sherman Act, the claim is dismissed. An attempt to monopolize claim only exists under *section 2* of the Sherman Act.

[9] To the extent plaintiffs plead a conspiracy to attempt to monopolize, such a claim does not exist. IIIB, Phillip Areeda and Herbert Hoovenkamp, ***Antitrust Law*** ¶809 (3d ed. 2006) ("An occasional complaint has alleged that the defendant conspired to attempt to monopolize. Courts have correctly held that *§2* states no such offense. Nor is there any need for it, because the combination that offends antitrust policy violates *§ 1*.")

This conclusory statement is insufficient to plead a cause of action for either attempted monopolization or conspiracy to monopolize. *See* [Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 255 (3d Cir. 2010)] ("But to survive dismissal it does not suffice to simply say that the defendants had knowledge; there must be factual allegations to plausibly suggest as much." (citing *Twombly, 550 U.S. at 564*)).

Further, the attempted monopolization **[*23]** and conspiracy claims have a common element of specific intent to monopolize. This specific intent requirement sets *section 2* claims apart from section 1 claims. *See* *Int'l Distribution Centers, Inc. v. Walsh Trucking Co., 812 F.2d 786, 793 (2d Cir. 1987)* ("Unlike the proof required to establish a conspiracy to monopolize under *section 2*, a specific intent to create a monopoly is not required under *section 1*."). In support of their section 1 claim, plaintiffs do not allege that the casinos intended to monopolize the MMA event market. Rather, allegations of CFFC's intent to restrict trade in the relevant market combined with the casinos' conscious commitment to the conspiracy were sufficient with respect to Count 1. *See* *Petruzzi's IGA Supermarkets, Inc., 998 F.2d at 1243*. Different standards apply to *section 2* claims; plaintiffs must plead specific intent as to each party. *See* *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1460 n. 35 (11th Cir. 1991)* ("[W]e analyze the conduct of [each defendant] separately to determine whether [plaintiff] has a valid *section 2* claim for relief."). There are no allegations regarding the casinos' intent to monopolize the MMA market. Because the casinos do not compete in the MMA event market, there is no basis to infer they acted with specific intent to monopolize. I will dismiss Count 3 with prejudice.

e) Count 4 — Tortious Interference with Contract

Plaintiffs allege Mr. Freedman tortiously interfered with plaintiffs' **[*24]** prospective contractual relations with Valley Forge. Am. compl. ¶¶ 33, 34, 95; Pls.' Resp. Br., doc. no. 61, 29. To prevail on this claim, plaintiffs must show: "(1) a prospective contractual relation; (2) the purpose or intent to harm the plaintiff by preventing the relation from occurring; (3) the absence of privilege or justification on the part of the defendant; and (4) the occasioning of actual damage resulting from the defendant's conduct." *Kachmar v. SunGard Data Sys., Inc., 109 F.3d 173, 184 (3d Cir. 1997)* (citing *Thompson Coal Co. v. Pike Coal Co., 488 Pa. 198, 412 A.2d 466, 471 (1979)*).[10] Pennsylvania imposes a two year statute of limitations for this cause of action. *42 Pa.C.S. § 5524(3)*; *Torchia v. Keystone Foods Corp., 431 Pa. Super. 83, 635 A.2d 1082, 1086 (1993)*.

As Vice President of Player Development at Valley Forge, Mr. Freedman cannot possibly be liable for interfering with plaintiffs' prospective contract with Valley Forge. "Essential to the right of recovery on this theory is the existence of a contractual relationship between the plaintiff and a party other than the defendant." *Nix v. Temple Univ. of Com. Sys. of Higher Educ., 408 Pa. Super. 369, 596 A.2d 1132, 1137 (Pa. Super. 1991)* (citations omitted). Agency principals dictate that a corporate officer acts on behalf of the corporation; therefore, a corporate officer is not a third party when acting in **[*26]** his official capacity. *Nix, 596 A.2d at 1137* (citing *Menefee v. Columbia Broadcasting System, Inc., 458 Pa. 46, 329 A.2d 216 (Pa. 1974)*). If Mr. Freedman frustrated plaintiffs' efforts to

---

[10] I have federal question jurisdiction over plaintiffs' antitrust claims. *28 U.S.C. § 1331*. I have supplemental jurisdiction over the pendent state law claims. *§ 1367*. When considering the motions to dismiss the state law counts, I must apply Pennsylvania law as interpreted by the Pennsylvania Supreme Court. *McKenna v. Pac. Rail Serv., 32 F.3d 820, 825 (3d Cir. 1994)* (citing *Erie R.R. Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*) ("In so doing, we are not free to impose our own view of what state law should be; we are to apply state law as interpreted by the state's highest court."); *Parkway Garage, Inc. v. City of Philadelphia, 5 F.3d 685, 701 (3d Cir. 1993)* (applying Erie to claims under supplemental jurisdiction). When the Supreme Court has not spoken on the issue, I refer to the decisions of the Pennsylvania Superior Court and Pennsylvania Commonwealth **[*25]** Court to predict how the high court would rule. *See* *McKenna, 32 F.3d at 825*. Additionally, I will follow Third Circuit's interpretation of Pennsylvania law unless it is inconsistent with a subsequent holding of the state Supreme or intermediate appellate courts. *Aceto v. Zurich Ins. Co., 440 F.2d 1320, 1322 (3d Cir. 1971)* ("No one may properly rely upon what we have held as more than persuasive on a question of Pennsylvania law so long as the Pennsylvania Supreme Court has not ruled upon that legal question."); *Largoza v. Gen. Elec. Co., 538 F. Supp. 1164, 1166 (E.D. Pa. 1982)* ("[I]t is axiomatic that this court is bound by a decision of the Third Circuit predicating Pennsylvania law unless the state supreme court issues a contrary decision or it appears from a subsequent decision of the appellate courts that the court of appeals erred.").

host an MMA event at Valley Forge, that was a business decision which does not support a claim for tortious interference.

In response, plaintiffs argue that Mr. Freedman was employed by Harrah's when he interfered with plaintiffs' prospective contract with Valley Forge. Plaintiffs submit a series of emails exchanged between Mr. Kerwin and Jennifer Woodeshick, National Sales Manager for Valley Forge Casino. The emails are dated between November 29, 2011 and December 5, 2011 and discuss scheduling an MMA fight in early April 2012. This conduct happened more than two years before the complaint was filed on September 8, 2014. Any claims arising from the April 2012 events would be time barred. I will dismiss Count 4 as to Mr. Freedman with prejudice.

f) Mr. Kerwin's continued representation of Xtreme Caged Combat

Mr. Kerwin is proceeding in this action *pro se*. Although he is not an attorney, Mr. Kerwin also attempted to represent XCC. By orders dated October 27, 2014 and November 10, 2014, I instructed XCC to retain counsel. Mr. Rushie entered his appearance on behalf of XCC on December 4, 2014, the same day **[*27]** as the Rule 16 conference in this matter. Nonetheless, a filing error suggests that Mr. Rushie's representation is a sham.

Valley Forge moved to dismiss the original complaint on September 29, 2014. Doc. no. 4. As the parties discussed at the Rule 16 conference, plaintiffs chose not to respond to Valley Forge's motion and instead filed an amended complaint. Doc. no. 45. Valley Forge renewed its objections and filed a motion to dismiss the amended complaint on January 2, 2015. Doc. no. 47. Valley Forge served the January 2, 2015 motion on Mr. Rushie by the court's electronic filing system. Since Mr. Kerwin is not an ECF user, Valley Forge attempted to serve the January 2, 2015 motion on Mr. Kerwin by email. However, defense counsel inadvertently emailed Mr. Kerwin the September 29, 2014 motion.

Plaintiffs filed a joint brief in opposition which erroneously responded to the September 29, 2014 motion. Doc. no. 50. This is evident because plaintiffs' brief did not address several key arguments which were made in the January 2, 2015 motion, but were not raised in the September 29, 2014 motion. The parties recognized the error, doc. no. 68 at 13-14, and I granted plaintiffs leave to file a supplemental **[*28]** brief to address the missing arguments. Doc. no. 66.

Mr. Rushie could not have prepared a response to a motion which he never received. Valley Forge served Mr. Rushie with the January 2 motion. Mr. Rushie did not enter his appearance until December 4, 2014, so he did not receive original service of the September 29, 2014 motion. Furthermore, the plaintiffs decided to file an amended complaint on December 4, 2014, so there is no reason to believe that Mr. Rushie ever reviewed the September 29, 2014 motion. Mr. Kerwin, on the other hand, received the September 29, 2014 motion twice. Mr. Kerwin only obtained the January 2, 2015 motion after filing plaintiffs' brief in opposition. Since plaintiffs' opposition responded to the September 29, 2014 motion, which Mr. Kerwin possessed, and not the January 2, 2015 motion, which was served on Mr. Rushie, I can only conclude that Mr. Kerwin prepared the opposition brief on behalf of both plaintiffs without the assistance of Mr. Rushie.

Plaintiffs' conduct is in direct contravention of my orders dated October 27, 2014 and November 10, 2014. Mr. Kerwin's continued representation of XCC is a continuing violation of the rules of procedure and my orders. **[*29]** These continuing violations could lead to a finding of contempt. Appropriate sanctions for contempt may include dismissal of the complaint with prejudice.

IV Conclusion

For the foregoing reasons, I will grant defendants' motions to dismiss in part. Counts 2, 3, and 4 are dismissed with prejudice as to Chester Downs and Marina LLC, Valley Forge Casino Resort and Joel Freedman. The motions are otherwise denied.

An appropriate order follows.

ORDER

AND NOW, this 29th day of May 2015, upon consideration of defendant Valley Forge Casino Resort's motion to dismiss (doc. no. 47), defendant Chester Downs and Marina, LLC's motion to dismiss (doc. no. 48, 53), defendant Joel Freedman's joinder in Valley Forge's motion to dismiss (doc. no. 56), plaintiffs' responses thereto (doc. nos. 50, 61), and upon further consideration of defendants' replies (doc. nos. 63, 67), and plaintiffs' surreplies (doc. nos. 64, 68, 69), **IT IS HEREBY ORDERED** that:

1. Defendants' motions to dismiss (doc. nos. 47, 48, 53) are **GRANTED in part**.

2. Counts 2, 3 and 4 are **DISMISSED WITH PREJUDICE** as to Valley Forge Casino Resort, Chester Downs & Marina LLC and Joel Freedman.

3. The motions to dismiss are otherwise **DENIED**.

4. Ryan **[*30]** Kerwin's legal representation of XCC is a continuing violation of the rules of procedure and the previous orders of this court. These continuing violations could lead to a finding of contempt. Appropriate sanctions for contempt may include dismissal of the complaint with prejudice.

IN RE: AUTO BODY SHOP ANTITRUST LITIGATION

Subsequent History: Adopted by, in part, Modified by, in part, Dismissed by, in part, Dismissed without prejudice by, in part *A & E Auto Body, Inc. v. 21st Century Centennial Ins. Co., 120 F. Supp. 3d 1352, 2015 U.S. Dist. LEXIS 114291 (M.D. Fla., Aug. 17, 2015)*

Magistrate's recommendation at *Legends Collision Ctr., LLC v. State Farm Mut. Auto. Ins. Co., 2016 U.S. Dist. LEXIS 178129 (M.D. Fla., Apr. 29, 2016)*

Prior History: *In re Auto Body Shop Antitrust Litig., 37 F. Supp. 3d 1388, 2014 U.S. Dist. LEXIS 110156 (J.P.M.L., Aug. 8, 2014)*

Core Terms

unjust enrichment, cases, Plaintiffs', insurance company, repairs, unfair, quantum meruit, courts, allegations, cause of action, restitution, recommend, tortious interference, insureds, Defendants', claimants, quasi-estoppel, practices, parties, enrichment, circumstances, complaints, quantum meruit claim, motion to dismiss, consumer, conspiracy, deceptive, amended complaint, violations, customers

LexisNexis® Headnotes

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN1[] **Judges, Discretionary Powers**

District courts have very limited discretion to deny leave to amend when a plaintiff has had only one chance to plead its claims.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Complaints, Requirements for Complaint

Fed. R. Civ. P. (8)(a)(2) requires a short and plain statement of a claim showing that the pleader is entitled to relief so as to give the defendant fair notice of what the claim is and the grounds upon which it rests.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Motion Practice > General Overview

HN3[] Motions to Dismiss, Failure to State Claim

A *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim merely tests the sufficiency of the complaint; it does not decide the merits of the case. In ruling on a motion to dismiss, a court must accept the factual allegations as true and construe the complaint in the light most favorable to the plaintiff. The court must limit its consideration to the pleadings and any exhibits attached to the pleadings. *Fed. R. Civ. P. 10(c)*, *12(d)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Motions to Dismiss, Failure to State Claim

A plaintiff must provide sufficient factual allegations to raise its right to relief above the speculative level, and to indicate the presence of the required elements. Conclusory allegations, unwarranted factual deductions, or legal conclusions masquerading as facts will not prevent dismissal.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] Complaints, Requirements for Complaint

While a complaint need not contain detailed factual allegations *Fed. R Civ. P. 8(a)(2)* demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation. A pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. Nor does a complaint suffice if it tenders naked assertions devoid of further factual enhancement. Where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged—but it has not show—that the plaintiff is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN6[] Heightened Pleading Requirements, Fraud Claims

Allegations of fraud are subject to heightened pleading requirements. *Fed. R. Civ. P. 9(b)* states: In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Ordinarily, a plaintiff cannot satisfy the requirements of *Rule 9(b)* through group pleading.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN7[] Complaints, Requirements for Complaint

The use of group pleading may also result in a complaint failing to meet the more lenient pleading standard in Fed. R. Civ. P. 8(a). Rule 8(a) is violated where a plaintiff, by engaging in group pleading, fails to give each defendant fair notice of the claims against it.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] Complaints, Requirements for Complaint

A complaint which lumps all defendants together and does not sufficiently allege who did what to whom, fails to state a claim for relief because it does not provide fair notice of the grounds for the claims made against a particular defendant. By lumping all the defendants together in each claim and providing no factual basis to distinguish their conduct, a plaintiff's complaint fails to satisfy the minimum standard of Fed. R. Civ. P. 8.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN9[] Complaints, Requirements for Complaint

There are cases in which group pleading may be acceptable. When multiple defendants are named in a complaint, the allegations can be and usually are to be read in such a way that each defendant is having the allegation made about him individually.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN10[] Motions to Dismiss, Failure to State Claim

A district court's task in determining whether a complaint states a claim upon which relief can be granted is a context-specific task that requires the court to draw on its judicial experience and common sense. But, at a minimum, plaintiffs should allege sufficient facts specific to each defendant, or at least each corporate family of defendants, to tie that defendant to the wrongdoing alleged.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN11[] State Regulation, Claims

Michigan, New Jersey, Washington, and Virginia statutes that are similar to the Sherman Act, 15 U.S.C.S. § 1, in that they all outlaw contracts, combinations, and conspiracies in restraint of trade or commerce. To recover under these state statutes, a plaintiff must plausibly plead the existence of an agreement between the defendants.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN12[] **Types of Contracts, Quasi Contracts**

As a measure of recovery, quantum meruit means the reasonable value of the work performed or the services rendered by a plaintiff for a defendant. In addition to being a measure of recovery, quantum meruit is often pleaded as a cause of action. Courts and parties have used the term "quantum meruit," along with its lesser-known cousin "quantum valebant," to refer to two types of cases: those where the parties entered an implied-in-fact contract but did not agree on a specific price, and those where the parties had no contract but it would be unjust for the defendant to retain the benefit on the plaintiff's performance without paying for it. In cases that fall into the latter category, courts often invoke the legal fiction that the parties' conduct creates a "contract implied in law" or "quasi-contract." Liability in these cases is not in reality contractual in character, but is imposed in the absence of any agreement to prevent unjust enrichment.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Trade Secrets Law > ... > Remedies > Damages > Unjust Enrichment

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN13[] **Types of Contracts, Quasi Contracts**

The unjust enrichment principle is the basis not only for "quasi-contract" but also for a host of equitable remedies including constructive trust, subrogation, and equitable lien. There is a trend in American law to affiliate various restitutionary remedies, such as quasi contracts and constructive trusts with a common animating principle of unjust enrichment.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN14[] **Types of Contracts, Quasi Contracts**

Some states retain subsidiary actions like "quantum meruit" or "quasi contract" and require a plaintiff to plead and prove long-established elements of those actions. Courts refer to the action as being for "unjust enrichment." These states typically require a showing that the plaintiff "conferred" a benefit on the defendant, and that the defendant "appreciated" or "knew" of the benefit and "accepted" or "retained" it. They may also focus on whether the plaintiff reasonably expected to receive compensation for the benefit. An unjust enrichment claim requires a showing that: (1) the plaintiff conferred a benefit on the defendant; (2) the defendant appreciated the benefit; and (3) the defendant accepted and retained the benefit under inequitable and/or unjust circumstances. For a party to prevail under the theory of unjust enrichment, they must prove three elements: (1) benefit conferred upon defendant at plaintiff's expense; (2) a resulting appreciation of benefit by defendant; and (3) inequitable retention of benefit without payment for its value. It is well-settled that, to establish unjust enrichment, a plaintiff must establish that (1) the plaintiff conferred a benefit on the defendant; (2) the defendant was aware that it had received a benefit; and (3) under the circumstances, it would be unjust for the defendant to retain the benefit without paying for it.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Contracts Law > Remedies > Restitution

HN15[] Types of Contracts, Quasi Contracts

In California, Michigan, Washington, and Illinois, a plaintiff can establish an unjust enrichment claim by meeting the requirements of section 1 of the Restatements: the defendant was enriched at the plaintiff's expense and the enrichment was unjust. Under the law of restitution, an individual may be required to make restitution if he is unjustly enriched at the expense of another. To sustain an unjust enrichment claim, a plaintiff must demonstrate (1) the defendant's receipt of a benefit from the plaintiff and (2) an inequity to plaintiff as a result. A claim of unjust enrichment requires proof of three elements—(1) the defendant receives a benefit, (2) the received benefit is at the plaintiff's expense, and (3) the circumstances make it unjust for the defendant to retain the benefit without payment.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Contracts Law > Remedies > Restitution

HN16[] Types of Contracts, Quasi Contracts

There is no cause of action in California for unjust enrichment. Unjust enrichment is synonymous with restitution. This distinction appears to be one of form, rather than function. In any event, there is no particular form of pleading necessary to invoke the doctrine of restitution.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN17[] Types of Contracts, Quasi Contracts

Although the elements of an unjust enrichment claim under Michigan law require that the defendant receive a benefit from the plaintiff, Michigan does not require that the benefit be conferred directly by the plaintiff to the defendant.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN18[] Types of Contracts, Quasi Contracts

Courts in Pennsylvania have advanced both formulations for unjust enrichment. Where one party has been unjustly enriched at the expense of another, he is required to make restitution to the other. In order to recover, there must be both (1) an enrichment, and (2) an injustice resulting if recovery for the enrichment is denied. The elements necessary to prove unjust enrichment are: (1) benefits conferred on defendant by plaintiff; (2) appreciation of such benefits by defendant; and (3) acceptance and retention of such benefits under such circumstances that it would be inequitable for defendant to retain the benefit without payment of value.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN19[] Types of Contracts, Quasi Contracts

Under New Jersey law, an unjust enrichment plaintiff must show not only that the defendant was enriched and that the enrichment was unjust, but also that the plaintiff expected remuneration from the defendant at the time it performed or conferred a benefit on defendant and that the failure of remuneration enriched defendant beyond its contractual rights.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN20[] Types of Contracts, Quasi Contracts

To recover for unjust enrichment, a plaintiff must show at least that the defendant obtained a benefit at the plaintiff's expense and that the defendant's enrichment was "unjust" or "inequitable."

Contracts Law > Remedies > Restitution

HN21[] Remedies, Restitution

There is no liability in restitution for an unrequested benefit voluntarily conferred, unless the circumstances of the transaction justify the claimant's intervention in the absence of contract. Instead of proposing a bargain, the restitution claimant first confers a benefit, then seeks payment for its value. When this manner of proceeding is unacceptable—as it usually is, if the claimant neglects an opportunity to contract—a claim based on unjust enrichment will be denied. Because contract is strongly preferred over restitution as a basis for private obligations, restitution is not usually available to a claimant who has neglected a suitable opportunity to make a contract beforehand.

Contracts Law > Remedies > Restitution

HN22[] Remedies, Restitution

One who voluntarily confers a benefit on another, which is to say in the absence of a contractual obligation to do so, ordinarily has no legal claim to be compensated. If the parties could have contracted but did not, the plaintiff generally is denied recovery of the non-cash benefit. Courts in the applicable states deny restitution to those who confer benefits officiously. Moreover, some states require unjust enrichment plaintiffs to show a reasonable expectation of compensation, a requirement that effectively denies recovery to the officious intermeddler.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN23[] Types of Contracts, Quasi Contracts

A plaintiff is not entitled to employ the legal fiction of quasi-contract to substitute one promisor or debtor for another.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Contracts Law > Remedies > Restitution

HN24[] **Types of Contracts, Quasi Contracts**

Section 25 of the Restatement (Third) of Restitution and Unjust Enrichment provides that a plaintiff will have a restitution claim against a defendant who benefits from the plaintiff's uncompensated performance of an obligation to a third party only when: (a) liability in restitution will not subject the defendant to a forced exchange; (b) absent liability in restitution, the plaintiff will not be compensated for the performance and the defendant will retain the benefit of it without paying for it; and (c) restitution will not subject the defendant to an obligation from which the parties understood the defendant would be free. Comment b to this section explains that the second requirement will not be satisfied where the plaintiff sues the defendant for restitution instead of pursuing a viable contract claim against the other party to the plaintiff's contract.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN25[] **Types of Contracts, Quasi Contracts**

Quantum meruit rests upon the equitable principle that a party is not allowed to enrich itself at the expense of another. A quasi-contract, or constructive contract, is based on the equitable principle that a person shall not be allowed to enrich himself unjustly at the expense of another.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN26[] **Types of Contracts, Quasi Contracts**

Michigan and Pennsylvania courts have held that claims for "quantum meruit" and "unjust enrichment" are the same.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN27[] **Types of Contracts, Quasi Contracts**

The Alabama Supreme Court has explained that recovery on a theory of quantum meruit arises when a contract is implied. The court identified two kinds of implied contracts—those implied in fact and those implied in law. Contracts implied in law are more properly described as quasi or constructive contracts where the law fictitiously supplies the promise to pay for the labor or services of another] to prevent a manifest injustice or unjust enrichment, etc. Thus, "quantum meruit" under Alabama law is used to refer both to situations involving contracts implied in fact, which are based on agreement, and contracts implied in law, which are not based on agreements but are legal fictions imposed to prevent unjust enrichment.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN28[] **Types of Contracts, Quasi Contracts**

Illinois courts recognize a cause of action for quantum meruit where (1) the plaintiff performed a service to benefit the defendant, (2) the plaintiff did not perform this service gratuitously, (3) the defendant accepted this service, and (4) no contract existed to prescribe payment for this service. The plaintiff must show that it would be unjust for the defendant to retain any benefit without paying.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN29[] **Types of Contracts, Quasi Contracts**

New Jersey courts recognize a cause of action for quantum meruit that is at least nominally (though probably not functionally) different from a claim for unjust enrichment. To recover under a theory of quantum meruit, a plaintiff must establish: (1) the performance of services in good faith, (2) the acceptance of the services by the person to whom they are rendered, (3) an expectation of compensation therefor, and (4) the reasonable value of the services. In addition, the expectation of compensation must be reasonable.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN30[] **Types of Contracts, Quasi Contracts**

In Kentucky, to recover on a quantum meruit theory, a plaintiff must show (1) that it rendered valuable services or furnished materials; (2) to the defendant; (3) that the services were rendered with defendant's knowledge or consent, or alternatively that the defendant accepted or received them; (4) under such circumstances as reasonably notified the defendant that the plaintiff expected to be paid by the defendant. Recovery under quantum meruit does not depend upon the conferment or retention of a benefit, whereas unjust enrichment requires that a benefit be conferred and retained.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Contracts Implied in Fact

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN31[] **Types of Contracts, Contracts Implied in Fact**

Under Washington law, a claim for quantum meruit is unquestionably different than one for unjust enrichment. Unjust enrichment is the method of recovery for the value of the benefit retained absent any contractual relationship because notions of fairness and justice require it, while quantum meruit is the method of recovering the reasonable value of services provided under a contract implied in fact. The elements of a contract implied in fact are: (1) the defendant requests work, (2) the plaintiff expects payment for the work, and (3) the defendant knows or should know the plaintiff expects payment for the work.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN32[] **Types of Contracts, Quasi Contracts**

Courts in Virginia have listed two different sets of elements for "quantum meruit" claims. Under the first line of authority, the elements of a quantum meruit claim largely parallel those of an unjust enrichment claim. The elements of a quantum meruit claim are listed as (1) a benefit conferred by the plaintiff on the defendant; (2) the defendant's knowledge of the conferring of the benefit; and (3) acceptance or retention of the benefit under circumstances that would make it unjust to retain it without paying for its value. The second line of authority recognizes quantum meruit claims where the plaintiff has shown that (i) he rendered valuable services, (ii) to the defendant, (iii) which were requested and accepted by the defendant, (iv) under such circumstances as reasonably notified the defendant that the claimant, in performing the work, expected to be paid by the defendant.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN33[] **Intentional Interference, Elements**

The elements of claims for tortious interference with business relationships or prospective advantage differ slightly from state to state, but in virtually every state a plaintiff must show that the defendant intentionally and improperly interfered with the plaintiff's prospective contractual relationship and that as a result, the plaintiff failed to reap the benefits of the prospective relationship. Arizona, Michigan, California, Illinois, Washington, Virginia, and Missouri include as an additional element that the defendant must know of the prospective relationship.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

HN34[] **Intentional Interference, Elements**

Arizona, Pennsylvania, New Jersey, and Kentucky use the multi-factor test outlined in the *Restatement (Second) of Torts § 767* to determine when interference for a tortious interference with business and/or contract claim is improper. The factors are: (a) the nature of the actor's conduct, (b) the actor's motive, (c) the interests of the other with which the actor's conduct interferes, (d) the interests sought to be advanced by the actor, (e) the social interests in protecting the freedom of action of the actor and the contractual interests of the other, (f) the proximity or remoteness of the actor's conduct to the interference, and (g) the relations between the parties. Michigan, Oregon, and Washington allow recovery where the defendant has an improper purpose or employs improper means. The improper interference can be shown by either proving (1) the intentional doing of an act wrongful per se, or (2) the intentional doing of a lawful act with malice and unjustified in law for the purpose of invading plaintiffs' contractual right or business relationship. Virginia allows recovery for tortious interference with prospective contracts only when improper methods are used.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

HN35[] **Intentional Interference, Elements**

Other states cast the impropriety requirement for a tortious interference with business and/or contract claim in terms of "justification" or "privilege." Some Pennsylvania courts list the absence of privilege or justification on the part of the defendant among the elements for the tort, although it appears that a showing of impropriety based on the Restatement factors would satisfy this element.

Torts > ... > Contracts > Intentional Interference > Defenses

Torts > ... > Business Relationships > Intentional Interference > Defenses

HN36[] **Intentional Interference, Defenses**

Under Illinois law, for a tortious interference with business and/or contract claim, a party acting to enhance its own business interests has a privilege to act in a way that may harm the business expectancy of others. In Illinois, the privilege to interfere is greater with respect to prospective contracts than it is with respect to existing contracts. Still, acts taken pursuant to the privilege must take a socially sanctioned form. Under Illinois law, privilege is an affirmative defense. By contrast, Missouri requires a plaintiff to produce substantial evidence to establish lack of justification, a burden which is met if the defendant acted with an improper purpose and sought not only to further his own interests, but in doing so employs improper means.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

HN37[] **Motions to Dismiss, Failure to State Claim**

Under Pennsylvania, Illinois and Missouri law, well-pleaded allegations that the defendants made false and defamatory statements about the plaintiffs' businesses should be sufficient to survive a motion to dismiss for a tortious interference with business and/or contract claim.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN38[] **Intentional Interference, Elements**

For a tortious interference with business claim, Alabama uniquely includes an element that the defendant be "a stranger" to the interfered-with relationship. One is not a stranger to the contract just because one is not a party to the contract. If the parties are part of a comprehensive interwoven set of contracts, they are not strangers.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN39[] **Intentional Interference, Elements**

Arizona, Michigan, and Illinois allow a plaintiff to state a claim for tortious interference with prospective contractual relationships based on interference with an identifiable class of customers. By contrast, Washington expressly requires specific, identifiable third parties, and Virginia requires a specific, existing contract or business expectancy. Alabama law requires the existence of a protectable business relationship, and there is no support in Alabama case law for identifiable class tortious interference claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN40[] **Motions to Dismiss, Failure to State Claim**

Absent well pleaded allegations that the defendants joined in a conspiracy or acted in concert, liability for tortious interference must be established on an individualized basis. A general allegation that some unidentified defendants—or all defendants—interfered with some unidentified customers of some unnamed plaintiff does not satisfy the requirements of *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 173 L.Ed.2d 868 (2009)*.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Torts > Business Torts > Commercial Interference > General Overview

Torts > Intentional Torts > Defamation > General Overview

HN41[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b) provides: In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Fraud requires more than misrepresentation, and *Rule 9(b)* will not be triggered simply because the plaintiff alleges that the defendant said something that was not true. Falsity is also a required element in defamation cases, but defamation need not be pleaded with particularity under *Rule 9(b)*. Similarly, tortious interference claims based on a defendant's allegedly false and disparaging statements to prospective customers are not subject to *Rule 9(b)*.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

HN42[] **Consideration, Promissory Estoppel**

"Promissory estoppel" is the term many courts use to describe the doctrine that is recognized in the *Restatement (Second) of Contracts § 90(1)*. *Restatement § 90* provides that a promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance is binding if injustice can be avoided only by enforcement of the promise. Every state with the exception of Virginia, has recognized a cause of action under the circumstances described in *§ 90*.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Authority to Adjudicate

HN43[] Federal & State Interrelationships, Erie Doctrine

Federal courts deciding state-law claims are supposed to apply state law, not rewrite it. While a federal court must be sensitive to the doctrinal trends of the jurisdiction whose law it applies, it is beyond the authority of a federal court in such circumstances to create entirely new causes of action.

Torts > Intentional Torts > Conversion > Elements

HN44[] Conversion, Elements

California only recognizes claims for the conversion of money when there is a specific, identifiable sum involved. Under California law, a generalized claim for money is not actionable as conversion.

Business & Corporate Compliance > ... > Industry Practices > Unfair Business Practices > Private Causes of Action

Governments > Legislation > Statutory Remedies & Rights

Business & Corporate Compliance > ... > Industry Practices > Unfair Business Practices > Unfair Trade Practices Acts

HN45[] Unfair Business Practices, Private Causes of Action

The Pennsylvania Unfair Insurance Practices Act, *40 Pa. Stat. § 1171.1 et seq.*, does not afford a private right of action.

Governments > Legislation > Statutory Remedies & Rights

HN46[] Legislation, Statutory Remedies & Rights

Illinois does not recognize a free-ranging private right of action to enforce statutory duties; rather, the existence of such a claim depends on the particular statute.

Governments > Legislation > Statutory Remedies & Rights

HN47[] Legislation, Statutory Remedies & Rights

As a general matter, when a law expressly provides for a cause of action, courts will not imply one in order to expand the legislature's chosen remedial scheme.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN48[] State Regulation, Claims

The elements of an Illinois Consumer Fraud Act (ICFA), *815 ILCS 505/2*, claim are: (1) a deceptive or unfair act or practice by the defendant; (2) made during a course of conduct involving trade or commerce; (3) made with the intent that the plaintiff rely on the deceptive or unfair practice; (4) causation; and (5) damages. The ICFA proscribes two kinds of practices: those that are "unfair," and those that are "deceptive." A plaintiff may state a claim under the ICFA's unfair" prong without alleging that the conduct is deceptive. The Illinois Uniform Deceptive Trade Practices Act, *815 ILCS 510/2*, by contrast, only outlaws "deceptive" practices, that is, practices that create a likelihood of confusion or misunderstanding. *815 ILCS 510/2(a)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN49[] State Regulation, Claims

The California Unfair Competition Law proscribes "unfair competition," which is defined as any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising. *Cal. Bus. & Prof. Code § 17200*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN50[] State Regulation, Claims

The California Unfair Competition Law (UCL) allows any person who has suffered injury in fact and has lost money or property as a result of unfair competition, to bring a civil action against the person or persons engaged in the unfair competition. *Cal. Bus. & Prof. Code §§ 17203*, *17204*. A court may enjoin violations of the UCL and order restitution. *Cal. Bus. & Prof. Code § 17203*. But, the UCL "s not an all-purpose substitute for a tort or contract action, and does not allow a plaintiff to recover monetary damages.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN51[] Trade Practices & Unfair Competition, State Regulation

Under the California Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200*, statutory unfair competition may take one of three forms: unlawful, unfair, or fraudulent.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Industry Practices > Unfair Business Practices > Unfair Trade Practices Acts

HN52[] Trade Practices & Unfair Competition, State Regulation

By proscribing any unlawful business act or practice, the California Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200*, borrows rules set out in other laws and makes violations of those rules independently actionable. An unlawful act is one forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made. As a general matter, a UCL claim may be based on a violation of a law that itself provides no private right of action. However, UCL claims may not rest exclusively on violations of the California Unfair Insurance Practices Act, *Cal. Ins. Code. § 790 et seq.*

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN53[] **Trade Practices & Unfair Competition, State Regulation**

Even if an act or practice is not prohibited by another statute, it may still qualify as "unfair competition" under the "unfair" or "fraudulent" prongs of the California Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200*. In permitting the restraining of all unfair business practices, the UCL undeniably establishes only a wide standard to guide the courts of equity. Given the creative nature of the scheming mind, the legislature evidently concluded that a less inclusive standard would not be adequate. While the scope of this provision is sweeping, it is not unlimited, and courts may not simply impose their own notions of the day as to what is fair or unfair.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN54[] **Trade Practices & Unfair Competition, State Regulation**

When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *Cal. Bus. & Prof. Code § 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN55[] **Trade Practices & Unfair Competition, State Regulation**

The Oregon Unfair Trade Practices Act (OUTPA) does not expressly limit private claims to consumers, and no Oregon court has addressed whether a plaintiff must be a consumer to have standing under OUTPA. However, the United States District Court for the District of Oregon has held in a number of cases that only "consumers" have standing under OUTPA. Most of these cases have construed the word "person" in OUTPA's civil remedy provision, *Or. Rev. Stat. § 646.638(1)* to mean "consumer." The U.S. District Court for the Middle District of Florida is not persuaded by the reasoning in these decisions for interpreting "person" to mean "consumer."

Governments > Legislation > Interpretation

HN56[] **Legislation, Interpretation**

In interpreting a statute, the court's task is to discern the intent of the legislature.

Governments > Legislation > Interpretation

HN57[] Legislation, Interpretation

The Oregon Supreme Court has cautioned against adopting narrowing constructions of statutorily defined terms based on conclusions about the statute's purpose drawn from legislative history.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN58[] Deceptive & Unfair Trade Practices, State Regulation

The Washington Consumer Protection Act (CPA), *Wash. Rev. Code § 19.86.020*, declares unlawful all unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. Any person who is injured in his or her business or property by a violation of *Wash. Rev. Code § 19.86.020* may bring a civil action for an injunction or damages. *Wash. Rev. Code § 19.86.090*. To prevail in a private CPA action a plaintiff must establish five distinct elements: (1) unfair or deceptive act or practice; (2) occurring in trade or commerce; (3) public interest impact; (4) injury to plaintiff in his or her business or property; and (5) causation.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN59[] Deceptive & Unfair Trade Practices, State Regulation

A plaintiff may establish the first two elements of a Washington Consumer Protection Act, *Wash. Rev. Code § 19.86.020*, claim in one of two ways: first, by showing that (1) the act or practice has a capacity to deceive a substantial portion of the public and (2) has occurred in the conduct of any trade or commerce, or second, by showing that the defendant engaged in an act that the Washington legislature has defined to be a per se unfair trade practice.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Torts > ... > Commercial Interference > Business Relationships > General Overview

HN60[] Deceptive & Unfair Trade Practices, State Regulation

As with tortious interference, liability under the Washington Consumer Protection Act, *Wash. Rev. Code § 19.86.020*, for the sort of conduct proscribed in *Wash. Admin. Code § 284-30-390* must be established on an individualized basis.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN61[] Amendment of Pleadings, Leave of Court

District courts can and should require a litigant who has filed an improper shotgun pleading to replead.

Judges: THOMAS B. SMITH, United States Magistrate Judge.

Opinion by: THOMAS B. SMITH

Opinion

REPORT AND RECOMMENDATIONS

Pending before me on referral from the presiding district judge are Defendants' motions to dismiss Plaintiffs' complaints in the following cases: 6:14-cv-6006 (Arizona); 6:14-cv-6007 (Michigan); 6:14-cv-6009 (Alabama); 6:14-cv-6010 (California); 6:14-cv-6011 (Illinois); 6:14-cv-6012 and 6:14-cv-6013 (New Jersey); 6:14-cv-6014 (Oregon); 6:14-cv-6015 (Washington); 6:14-cv-6008 and 6:14-cv-6020 (Pennsylvania); 6:14-cv-6018 (Kentucky); 6:14-cv-6019 (Virginia); and 6:15-cv-6022 (Missouri) (collectively, the "Pending Cases"). After due consideration, I respectfully recommend that the motions be **granted in part** and **denied in part**, that the complaints in the Pending Cases be dismissed, that the dismissals be without prejudice and with leave to amend except as otherwise stated in this report & recommendations, and that Plaintiffs be afforded 21 days' leave to file amended complaints.

I. Background

Plaintiffs are 64 auto body repair shops in 12 different states, a former owner of such a business, **[*418]** and a trade association for auto body shops based in the state of Pennsylvania. The Defendants are insurance companies that write automobile insurance in the states where Plaintiffs do business. In each case, Plaintiffs allege that Defendants conspired to fix prices and boycott Plaintiffs in violation of *§ 1* of the Sherman Act. Plaintiffs also assert a variety of state common law and statutory claims including unjust enrichment, tortious interference, conversion, quasi-estoppel, violations of state ***antitrust law***, and unfair trade practices. The allegations in these cases are similar to those in *A&E Auto Body, Inc. v. 21st Century Centennial Insurance Co., No. 6:14-cv-00310, 2015 U.S. Dist. LEXIS 16153, 2015 WL 304048, (M.D. Fla. Jan. 21, 2015)*, which the Court summarized in its Order granting the motions to dismiss in that case:

> The Defendants in this case are alleged to "exert control" over the Plaintiffs' businesses (and the hourly rates paid by the Defendants) in a number of ways, beginning with agreements generally referred to as "direct repair programs" or "DRPs". To participate in a particular insurer's DRP, a repair shop typically agrees to certain concessions in regard to such things as the prices it will charge and the priority given to vehicles **[*419]** owned by people who have insurance through that insurer. In exchange, the repair shop is listed as a "preferred provider". However, the Plaintiffs complain that the prices that they were permitted to charge under the DRPs were unfairly manipulated, that even repair shops that were not participating in DRPs were restricted to those price ceilings, and that repair shops that complained about these practices or tried to charge higher prices faced intimidation and boycotts from the insurers.
>
> As a general proposition, each DRP contains language obligating the repair shop to charge the insurance company no more than the "market rate" for repairs in the general area. State Farm Mutual Automobile Insurance Company ("State Farm"), a Defendant in this case, determines this market rate. State Farm surveys the repair shops in a given area, determines the hourly rate charged by each repair technician, and then designates a rate just above the midpoint of all rates charged to be the "market rate." However, the Plaintiffs complain that State Farm alters the survey results to achieve a "wholly artificial 'market rate'" and uses this artificially lowered result to negotiate price decreases from repair **[*420]** shops. If a repair shop attempts to raise its hourly rate, State Farm will, among other things, remove it or threaten to remove it from the DRP.
> The other Defendants, who do not perform such surveys, "specifically advised the Plaintiffs that they will pay no more than State Farm pays for labor." The Defendants refuse to pay a higher labor rate even to Plaintiffs who are not participating in a DRP.
> The Plaintiffs also allege that the Defendants improperly lowered the amounts that they paid for repairs by, among other things, refusing to pay for replacement parts even where the repair shop thought replacement was a better option than repair and by requiring utilization of used parts even where new parts were available.
> The Plaintiffs also complain that the Defendants (1) are refusing to abide by the estimates set forth in the industry's leading collision-repair-estimating databases; (2) that they are refusing to pay for certain required materials and practices on the grounds that those items are included in the price of the repair; and (3) that they have imposed arbitrary caps on the amount they are willing to pay for paint as part of a repair.

*2015 U.S. Dist. LEXIS 16153, [WL] at *1-2*.

Plaintiffs filed these lawsuits in 12 federal **[*421]** district courts between October 27 and November 7, 2014. On December 3, 2014, the United States Judicial Panel on Multidistrict Litigation ("JPML") transferred to this Court the cases from Arizona, Michigan, Alabama, California, Illinois, New Jersey, Oregon, and Washington, and one of the cases from Pennsylvania (6:14-cv-6008). (JPML, Case MDL No. 2557, Docs. 270, 271). Transfer of the Oregon case was stayed on December 6, 2014 (Id., Doc. 274). The JPML transferred the cases from Kentucky and Virginia on December 16, the remaining case from Pennsylvania (6:14-cv-6020) on December 23, and the Missouri action on February 6, 2015 (JPML, Case MDL No. 2557, Docs. 338, 364, 413). On April 1, 2015, the JPML vacated the stay of the transfer in the Oregon case (Id., Doc. 416).

In each case, Defendants have filed motions to dismiss,[1] Plaintiffs have filed a consolidated response, and Defendants have filed replies. District Judge Presnell has referred the pending motions to dismiss to me for preparation of reports and recommendations pursuant to *28 U.S.C. § 636(b)(1)(B)*.

---

[1] In most of the Pending Cases, Defendants have filed two separate motions to dismiss. The Defendants affiliated with GEICO typically filed their own motion **[*422]** to dismiss, although their motion is joined by the CSAA Insurance Group Defendants in the Arizona and California cases and the MetLife Defendants in the Arizona case. With the exception of Oregon, all remaining

II. Legal Standard

HN2[] *Federal Rule of Civil Procedure 8(a)(2)* requires "a short and plain statement of the claim showing that the pleader is entitled to relief" so as to give the defendant fair notice of what the claim is and the grounds upon which it rests, *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*, overruled on other grounds *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. *HN3*[] A *Rule 12(b)(6)* motion to dismiss for failure to state a claim merely tests the sufficiency of the complaint; it does not decide the merits of the case. *Milburn v. United States, 734 F.2d 762, 765 (11th Cir.1984)*. In ruling on a motion to dismiss, the court must accept the factual allegations as true and construe **[*424]** the complaint in the light most favorable to the plaintiff. *SEC v. ESM Group, Inc., 835 F.2d 270, 272 (11th Cir.1988)*. The court must limit its consideration to the pleadings and any exhibits attached to the pleadings. *Fed.R.Civ.P. 10(c)*, *12(d)*; see also *GSW, Inc. v. Long County, Ga., 999 F.2d 1508, 1510 (11th Cir.1993)*.

HN4[] A plaintiff must provide sufficient factual allegations to raise its right to relief above the speculative level, *Twombly, 550 U.S. at 555*, and to indicate the presence of the required elements, *Watts v. Florida Int'l Univ., 495 F.3d 1289, 1302 (11th Cir.2007)*. Conclusory allegations, unwarranted factual deductions, or legal conclusions masquerading as facts will not prevent dismissal. *Davila v. Delta Air Lines, Inc., 326 F.3d 1183, 1185 (11th Cir.2003)*.

In *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, the Supreme Court explained that, *HN5*[] while a complaint need not contain detailed factual allegations *Rule 8(a)(2)* "demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation. A pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. Nor does a complaint suffice if it tenders naked assertions devoid of further factual enhancement." *Id. at 678* (internal citations and quotations omitted). "[W]here the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged—but it has not 'show[n]'—'that the plaintiff is entitled to relief.'" *Id. at 679* (quoting *Fed.R.Civ.P. 8(a)(2)*).

III. Discussion

A. Group Pleading

Defendants **[*425]** argue that the Court should dismiss all of the complaints because Plaintiffs engaged in impermissible group pleading by making collective allegations against "Defendants." In response, Plaintiffs argue that group pleading is perfectly acceptable, and that when they refer to "Defendants" collectively, they are only alleging that all Defendants engaged in the same conduct.

Defendants in each case have filed a "joint motion" to dismiss. In the Michigan case (6:14-cv-6007) and one of the Pennsylvania cases (6:14-cv-6020), no GEICO Defendant is a party so all Defendants have joined the joint motion. When discussing specific motions, the Court will refer to the Defendants who joined GEICO's motion as the "GEICO Defendants" and the Defendants who joined the joint motion as the "Non-GEICO Defendants."

Two defendants in the Oregon case (6:14-cv-6014) have filed their own motions to dismiss. Defendant American Commerce Insurance Company filed a brief five-page motion and notice of joinder in the motions of the GEICO and Non-GEICO Defendants (Id., Doc. 123). The motion asks for dismissal of the complaint "in its entirety and with prejudice" but does not explain why dismissal with prejudice is warranted. Defendant Omni Insurance Company filed a longer motion raising similar arguments to those raised in the two principal motions in the Oregon case, but requesting **[*423]** dismissal with prejudice and an award of attorney's fees under *ORS § 20.105*. (Id., Doc. 129). This motion also does not explain why dismissal with prejudice is warranted. The Eleventh Circuit has emphasized that *HN1*[] district courts have very limited discretion to deny leave to amend when a plaintiff has had only one chance to plead its claims. *Isbrandtsen Marine Services, Inc. v. M/V Inagua Tania, 93 F.3d 728, 734 (11th Cir. 1996)*. Absent some explanation why the Oregon Plaintiff should not be allowed to amend its claims against Defendants American Commerce and Omni, I cannot recommend dismissing the claims against them with prejudice. I recommend that the Court deny Omni's request for attorney's fees without prejudice to Omni re-filing its motion should the Court dismiss the claims against it with prejudice.

Plaintiffs' use of group pleading has been an issue since the start of this litigation. On June 11, 2014, the Court *sua sponte* dismissed the original complaint in the Florida case, in part because of the use of group pleading (Case No. 6:14-cv-310, Doc. 110). The Court explained:

> With limited exceptions, the allegations of wrongdoing are attributed, collectively, to every Defendant and alleged to have been perpetrated upon every Plaintiff. While there may be situations in which such collective descriptions are sufficient, at least some of claims asserted here require individualized allegations.

(Id. at 2). The Florida Plaintiffs amended their complaint by adding the following sentence to each paragraph that referred generally to "Defendants":

> The individual Defendants specifically included within the use of the term "the Defendants" **[*426]** in this paragraph include 21 Century Centennial Insurance Company, 21 Century Indemnity Insurance Company, Acceptance Indemnity Insurance Company, Allstate Fire and Casualty Insurance Company, Allstate Insurance Company, Bristol West Insurance Company, Direct General Insurance Company, Encompass Indemnity Company, Esurance Property & Casualty Insurance Company, Esurance Insurance Company, First Acceptance Insurance Company, Inc., Florida Farm Bureau General Insurance, Florida Farm Bureau Casualty Insurance Company, Foremost Insurance Company, GEICO General Insurance Company, Hartford Accident and Indemnity Company, Hartford Underwriters Insurance Company, Horace Mann Insurance Company, Infinity Auto Insurance Company, Liberty Mutual Insurance Company, Mercury Insurance Company of Florida, MGA Insurance Company, Inc., National General Insurance Online, Inc., Nationwide Insurance Company of Florida, Inc., Nationwide Mutual Insurance Company, Ocean Harbor Casualty Insurance Company, Old Republic Insurance Company, Progressive American Insurance Company, Progressive Select Insurance Company, Safeco Insurance Company of America, Security National Insurance Company, Sentry Insurance A Mutual **[*427]** Company, State Farm Mutual Automobile Insurance Company, The Cincinnati Insurance Company, Travelers Indemnity Company, USAA Casualty Insurance Company, United Services Automobile Association, Westfield Insurance Company, Windhaven Insurance Company, and Zurich American Insurance Company.

See *A & E Auto Body, 2015 U.S. Dist. LEXIS 16153, 2015 WL 304048, at *3*.

In its January 21, 2015 Order dismissing the Florida amended complaint the Court condemned this practice:

> Not surprisingly, the term "the Defendants" appears throughout the Amended Complaint. As a result of the unwarranted inclusion of these names wherever that phrase appears, the Amended Complaint is more than twice as long as the (already lengthy) Complaint, and much more difficult to read. This is unacceptable, and will result in sanctions if not cured in subsequent pleadings. A requirement to provide "individualized allegations" cannot reasonably be read as a requirement to repeat the name of every individual Defendant, over and over.
>
> Counsel for the Plaintiffs argue that, wherever they use the term "the Defendants," they always intend to refer to every single Defendant. But this does not appear to always be the case. For example, in the paragraphs quoted above, the Plaintiffs allege that "the **[*428]** Defendants" enter DRP agreements with the individual Plaintiffs. But according to the list that the Plaintiffs attached to the Amended Complaint, only a handful of the Defendants have entered into DRPs with any Plaintiff. (Doc. 167-4). And some Defendants have informed the Court that they have never participated in a DRP with any repair shop.[footnote] The Plaintiffs should insure that their references to "the Defendants" are, in fact, intended to encompass every single Defendant.

*2015 U.S. Dist. LEXIS 16153, [WL] at *3-4*. In a footnote, the Court observed:

> Plaintiffs have not addressed the Court's concerns over their attempt to proceed collectively on state law claims, such as conversion and unjust enrichment, which would seem to require individualized allegations. As those claims are being dismissed on other grounds, and in the absence of detailed briefing on the issue, the Court will not spend more time on the issue. However, the issue has not been settled, and any party may raise it in connection with future pleadings.

*2015 U.S. Dist. LEXIS 16153, [WL] at *4 n. 8*.

In orders adopting my reports and recommendations on motions to dismiss in the Tennessee, Utah, and Louisiana cases, the Court again addressed group pleading:

> As for the tortious interference claim, Magistrate **[*429]** Judge Smith concluded that the allegations were implausible, in that the Plaintiffs were alleging that all of the Defendants were interfering with the business of all of the Plaintiffs, including those with whom the Defendants had DRPs. Magistrate Judge Smith concluded that the generalized, shotgun nature of the Plaintiffs' contentions does not satisfy the applicable pleading standard and recommended that, in any amended complaint, the Plaintiffs be required to specify which Defendants interfered with which Plaintiffs. The Plaintiffs contend that this is an impractical pleading standard because it seeks to compel them to produce information "which is peculiarly within the possession and control of the Defendants." But there is nothing in the Complaint that explains why the Defendants, but not the Plaintiffs, would have this information. Surely the Plaintiffs must have some basis to believe that certain Defendants interfered with certain of the Plaintiffs' customers. A general allegation that some unidentified Defendants—or all Defendants—interfered with some unidentified customers of some unnamed Plaintiff does not satisfy the requirements of *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 173 L.Ed.2d 868 (2009)*.

*Brewer Body Shop, LLC v. State Farm Mutual Auto. Ins. Co., __ F. Supp. 3d __, __, 2015 U.S. Dist. LEXIS 54836, 2015 WL 1911418, at *1 (M.D. Fla. Apr. 27, 2015)*; *Alpine Straightening Systems v. State Farm Mutual Auto. Ins. Co., No. 6:14-cv-6003, 2015 U.S. Dist. LEXIS 56562, 2015 WL 1911635, at *1 (M.D. Fla. Apr. 27, 2015)* **[*430]** ; *Parker Auto Body Inc. v. State Farm Mutual Auto. Ins. Co., Case No. 6:14-cv-6004, Doc. 118 at 3, 2015 U.S. Dist. LEXIS 56451 (M.D. Fla. Apr. 27, 2015)*; *Southern Collision & Restoration, LLC v. State Farm Mutual Auto. Ins. Co., No. 6:14-cv-6005, 2015 U.S. Dist. LEXIS 54854, 2015 WL 1911768, at *1 (M.D. Fla. Apr. 27, 2015)*.

Most cases addressing the subject of "group pleading" arise in the fraud context. *Frazier v. U.S. Bank Nat'l Ass'n, No. 11 C 8775, 2013 U.S. Dist. LEXIS 45330, 2013 WL 1337263, at *3 (N.D. Ill. Mar. 29, 2013)*. ***HN6***[] Allegations of fraud are subject to heightened pleading requirements. See *Fed. R. Civ. P. 9(b)* ("In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake."). Ordinarily, a plaintiff cannot satisfy the requirements of *Rule 9(b)* through group pleading. *Targum v. Citrin Cooperman & Co., LLP, No. 12 Civ. 6909(SAS), 2013 U.S. Dist. LEXIS 164585, 2013 WL 6087400, at *6 n. 101 (S.D.N.Y. Nov. 19, 2013)*.

HN7[] The use of group pleading may also result in a complaint failing to meet the more lenient pleading standard in *Rule 8(a)*. "*Rule 8(a)* is violated where a plaintiff, by engaging in 'group pleading,' fails to give each defendant fair notice of the claims against it." *Holmes v. Allstate Corp., No. 11-CV-1543, 2012 U.S. Dist. LEXIS 24883, 2012 WL 627238, at *22 (S.D.N.Y. Jan. 27, 2012)*, report & recommendations adopted, *2012 U.S. Dist. LEXIS 24903, 2012 WL 626262 (Feb. 27, 2012)*.[2]

But, ***HN9***[] there are cases in which group pleading may be acceptable. For example, the Eleventh Circuit arguably endorsed the use of group pleading in *Crowe v. Coleman, 113 F.3d 1536, 1539 (11th Cir. 1997)*. In Crowe, the plaintiffs' former neighbor ran a gas station that was eventually shut down and sold. *Id. at 1537-38*. Plaintiffs sued both the current and former owners of the gas station property for nuisance alleging, among other

[2] See also *DeSoto v. Board of Parks and Recreation, 64 F. Supp. 3d 1070, 2014 WL 6680681, at *11 (M.D. Tenn. 2014)* (dismissing § 1983 claim in part based on group pleading, because "under *§ 1983*, a plaintiff must show that each defendant was personally involved in the alleged constitutional deprivation"); *Targum, 2013 U.S. Dist. LEXIS 164585, 2013 WL 6087400, at *6* (concluding that group pleading in complaint "fail[ed] to put [one of the defendants] on notice of the specific allegations against **[*431]** it"); *Eunice v. United States, No. 12cv1635-GPC(BGS), 2013 U.S. Dist. LEXIS 26992, 2013 WL 756168, at *3 (S.D. Cal. Feb. 26, 2013)* ("Lumping all 'defendants' together and facts regarding the incident does not put a particular defendant on notice as to the grounds for the allegations."); ***Tatone v. SunTrust Mortgage, Inc., 857 F. Supp. 2d 821, 831 (D. Minn. 2012)*** (***HN8***[] "A complaint which lumps all defendants together and does not sufficiently allege who did what to whom, fails to state a claim for relief because it does not provide fair notice of the grounds for the claims made against a particular defendant."); *Lane v. Capital Acquisitions & Mgmt. Co., No. 04-60602 CIV, 2006 U.S. Dist. LEXIS 96422, 2006 WL 4590705, at *5 (S.D. Fla. Apr. 14, 2006)* ("By lumping all the defendants together in each claim and providing no factual basis to distinguish their conduct, [Plaintiffs'] Complaint fails to satisfy the minimum standard of *Rule 8*.").

things, that "[t]he defendants have allowed the escape of gasoline from their property onto the property of the plaintiffs." Id. at 1539. The Eleventh Circuit explained **[*432]** that "[w]hen multiple defendants are named in a complaint, the allegations can be and usually are to be read in such a way that each defendant is having the allegation made about him individually." Id.

In *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179 (N.D. Cal. 2009)*, a federal district court rejected challenges to a complaint based on group pleading. The court dismissed the original complaint because it "lacked allegations specific to each defendant," and granted the plaintiffs "leave to amend to more specifically plead how each defendant joined the alleged price-fixing conspiracy." *Id. at 1183*. The plaintiffs left the collective allegations in their amended complaint, but added paragraphs directed at specific defendants. *Id. at 1183-84*. The court rejected the defendants' "group pleading" challenge to the amended complaint because the new allegations "more than adequately allege[d] the involvement of each defendant and put defendants on notice of the claims against them." *Id. at 1184*; see also *id. at 1185* ("The complaints allege a complex, multinational price-fixing conspiracy and, taken as a whole, they sufficiently allege each defendants' participation in that conspiracy, as well as present a factual basis for the allegations of agency.").

The only specific allegations about most of the Defendants **[*433]** in the Pending Cases are that they are insurers who are licensed to do business in particular states. For example, the Arizona complaint mentions only State Farm and Safeco in the factual allegations, and the latter in only one paragraph. Unlike the amended complaint in *Flat Panel*, Plaintiffs' complaints do not include specific allegations linking each Defendant to a price-fixing conspiracy. Nor have Plaintiffs explained how the conduct of one Defendant in steering a customer away from one Plaintiff is related in any way to the conduct of a different Defendant in steering a different customer away from the same or a different Plaintiff. There is nothing in any of the complaints to support attributing the wrongful conduct of one Defendant to unrelated and independent wrongful conduct of another Defendant. Lumping together separate and unrelated conduct in this manner does not put Defendants on notice of the grounds for the claims against them.

This is not to say that I believe Plaintiffs must name, for every body shop and insurer, a customer who was steered by that particular insurer away from that particular body shop. As the Supreme Court emphasized in Iqbal,***HN10***[↑] a district court's task **[*434]** in determining whether a complaint states a claim upon which relief can be granted is "a context-specific task that requires the ... court to draw on its judicial experience and common sense." *556 U.S. at 679*. But, at a minimum, Plaintiffs should allege sufficient facts specific to each Defendant, or at least each corporate family of Defendants, to tie that Defendant to the wrongdoing alleged. Accordingly, I recommend that all of the complaints be dismissed without prejudice based upon improper group pleading.

B. Federal Antitrust Claims

In all of these cases, Plaintiffs bring counts alleging that Defendants engaged in horizontal price-fixing[3] and group boycotts[4] in violation of § 1 of the Sherman Act, *15 U.S.C. § 1*. The Washington Plaintiffs have also alleged that Defendants engaged in steering in violation of the Sherman Act.[5]

---

[3] The counts in each case for price fixing under the Sherman Act are: Count I in Case No. 6:14-cv-6006; Count IX in Case No. 6:14-cv-6007; Count VII in Case No. 6:14-cv-6008 and 6:14-cv-6020; Count VII in Case No. 6:14-cv-6009; Count V in Case No. 6:14-cv-6010; Count VI in Case No. 6:14-cv-6011; Count VI in Case No. 6:14-cv-6012 and 6:14-cv-6013; "Count I" of the "Fifth Claim for Relief" in Case **[*435]** No. 6:14-cv-6014; the first unnumbered count in Case No. 6:14-cv-6015; Count I in Case No. 6:14-cv-6018; Count VI in Case No. 6:14-cv-6019; and Count I in Case No. 6:15-cv-6022.

[4] The counts in each case for group boycott under the Sherman Act are: Count II in Case No. 6:14-cv-6006; Count X in Case No. 6:14-cv-6007; Count VIII in Case No. 6:14-cv-6008 and 6:14-cv-6020; Count VIII in Case No. 6:14-cv-6009; Count VI in Case No. 6:14-cv-6010; Count VIII in Case No. 6:14-cv-6011; Count VII in Case No. 6:14-cv-6012 and 6:14-cv-6013; "Count II" of the "Fifth Claim for Relief" in Case No. 6:14-cv-6014; the third unnumbered count in Case No. 6:14-cv-6015; Count II in Case No. 6:14-cv-6018; Count VII in Case No. 6:14-cv-6019; and Count II in Case No. 6:15-cv-6022. There is no "Count VII" in Case No. 6:14-cv-6011.

[5] The steering count under the Sherman Act is the second unnumbered count in the Washington case (Case No. 6:14-cv-6015).

Defendants argue that Plaintiffs' federal antitrust claims should be dismissed for the reasons stated in the Court's Order in A & E Auto Body, as well as the reasons put forth in the motions to dismiss in that case "and in several other nearly identical cases before the **[*436]** Court." In A & E Auto Body, the Court dismissed Plaintiffs' amended complaint on the grounds that they had failed to allege facts plausibly suggesting that Defendants had made an agreement. *2015 U.S. Dist. LEXIS 16153, 2015 WL 304048, at *11*. The GEICO Defendants also argue that Plaintiffs' claims are subject to the rule of reason standard, and that Plaintiffs must plausibly allege a relevant market, market power, barriers to entry, anticompetitive effects that outweigh procompetitive benefits, and antitrust injury.

The New Jersey Plaintiffs argue that the Non-GEICO Defendants "make no specific arguments," and that their motion fails to meet the requirements of *Fed.R.Civ.P. 7(b)(1)(B)* because it does not state with particularity the grounds for seeking the order (Case No. 6:14-cv-6012, Doc. 39 at 25; Case No. 6:14-cv-6013, Doc. 41 at 24-25). The New Jersey Plaintiffs complain that they are "at a loss to respond" because "[d]ozens of motions have been filed in the Florida Action, with numerous arguments proffered." (Id.). They do, however, address the specific arguments made by the GEICO Defendants.

I disagree with Plaintiffs' suggestion that the Non-GEICO Defendants' motion to dismiss is insufficient. To be sure, Defendants' passing reference to motions **[*437]** to dismiss filed in other MDL cases is not sufficient to raise the arguments in those motions. But, Defendants have also argued that the Court should dismiss these complaints, which are substantively identical to the Florida amended complaint, for the reasons the Court dismissed the Florida amended complaint. In my previous reports and recommendations I have recommended the Court dismiss federal antitrust claims that were "indistinguishable from the claims asserted by the plaintiffs in A & E Auto Body ... for the reasons stated in the dismissal order in A & E Auto Body." See, e.g., *Capitol Body Shop, 2015 U.S. Dist. LEXIS 26509, 2015 WL 859477, at *9*.

In the remaining cases, Plaintiffs have incorporated by reference the arguments made in one of the New Jersey cases (No. 6:14-cv-6013), and in their replies, the Non-GEICO Defendants have incorporated by reference their motion to dismiss and their reply from that case. I do not understand what these Defendants were trying to accomplish by attaching the motion in the New Jersey case to every single reply. The New Jersey motion says nothing that the Non-GEICO Defendants' motions in the other cases do not.

Upon review, I conclude that Plaintiffs' price fixing and group boycott claims are indistinguishable from **[*438]** those asserted by the plaintiffs in A & E Auto Body. The Court's reasoning in dismissing the antitrust claims in that case applies with equal force here. Therefore, I recommend that Plaintiffs' counts for price fixing and group boycotts in violation of the Sherman Act be dismissed.

The steering claim in the Washington case does not allege the existence of an agreement to steer, or an attempt or conspiracy to monopolize a part of trade or commerce. This is a requirement to state a claim under either *§ 1* or *§ 2* of the Sherman Act. Accordingly, I conclude that the Washington Plaintiffs' steering claim under the Sherman Act should also be dismissed.

C. State Antitrust Claims

Plaintiffs in the Michigan,[6] New Jersey,[7] Washington,[8] and Virginia[9] cases allege violations of state antitrust laws. ***HN11***[] These state have statutes that are similar to the Sherman Act in that they all outlaw "contract[s]," "combination[s]," and "conspirac[ies]" "in restraint of trade or commerce." Compare *15 U.S.C. § 1* ("Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."); with *Mich. Comp. Laws § 445.772* ("A contract,

---

[6] Count XI in Case No. 6:14-cv-6007.

[7] Count IV in Case No. 6:14-cv-6012 and 6:14-cv-6013.

[8] The fourth unnumbered count in Case No. 6:14-cv-6015.

[9] Count V in Case No. 6:14-cv-6019.

combination, or conspiracy between 2 **[*439]** or more persons in restraint of, or to monopolize, trade or commerce in a relevant market is unlawful."); *N.J. Rev. Stat. § 56:9-3* ("Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce, in this State, shall be unlawful."); *Va. Code § 59.1-9.5* ("Every contract, combination or conspiracy in restraint of trade or commerce of this Commonwealth is unlawful."); and *WRC 19.86.030* ("Every contract, combination, in the form of trust or otherwise, or conspiracy in restraint of trade or commerce is hereby declared unlawful."). To recover under these state statutes, a plaintiff must plausibly plead the existence of an agreement between the defendants. *Blair v. Checker Cab Co., 219 Mich. App. 667, 558 N.W.2d 439, 442 (Mich. Ct. App. 1996)* (noting that Michigan's ***antitrust law*** and the Sherman Act both "require similar evidence of concerted action or combination"); *Exxon Corp. v. Wagner, 154 N.J. Super. 538, 382 A.2d 45, 48 (N.J. App. Div. 1977)* ("For there to be a contract, combination or conspiracy in restraint of trade in violation of *N.J.S.A. 56:9-3*, there must exist a plurality of actors, that is, two or more persons, and concerted action"); *Reid v. Boyle, 259 Va. 356, 527 S.E.2d 137, 148 (Va. 2000)* (dismissing state-law antitrust claim where Plaintiffs "failed to prove the existence of any contract or conspiracy in restraint of trade or commerce"); *Boeing Co. v. Sierracin Corp., 108 Wn.2d 38, 738 P.2d 665, 677 (Wash. 1987)* ("An illegal combination in restraint of **[*440]** trade requires two factors to be present: (1) two or more actors, and (2) concerted action."). As explained above, see supra Part III.B, Plaintiffs have failed to plead facts raising a plausible inference of an agreement. Therefore, the state-law antitrust claims raised in these cases should be dismissed.

D. Unjust Enrichment and Quantum Meruit

All Plaintiffs assert claims for unjust enrichment and, in all but the Arizona, Missouri, California, and Oregon cases, separate claims for quantum meruit.[10] These claims are based on Plaintiffs' allegations that they were underpaid for parts and services provided to Defendants' insureds and claimants, and that Defendants were unjustly enriched as a result.

"Quantum meruit" is a legal term of ancient vintage that originated in the common-law action of assumpsit. *Alternatives Unlimited, Inc. v. New Baltimore City Board of School Commissioners, 155 Md. App. 415, 843 A.2d 252, 284 (Md. App. 2004)*; RESTATEMENT (THIRD) OF RESTITUTION & UNJUST ENRICHMENT § 31 cmt. e. It literally means "as much as he deserved." BLACK'S LAW DICTIONARY (10th ed. 2014). ***HN12***[] "As a measure of recovery, it means the reasonable value of the work performed or the services rendered by a plaintiff for a defendant." **[*442]** *Alternatives Unlimited, 843 A.2d at 291*. In addition to being a measure of recovery, quantum meruit is often pled as a cause of action. *Murdock-Bryant Constr., Inc. v. Pearson, 146 Ariz. 48, 703 P.2d 1197, 1201 (Ariz. 1985)*. Courts and parties have used the term "quantum meruit," along with its lesser-known cousin "quantum valebant," to refer to two types of cases: those where the parties entered an implied-in-fact contract but did not agree on a specific price, and those where the parties had no contract but it would be unjust for the defendant to retain the benefit on the plaintiff's performance without paying for it. *Murdock-Bryant, 703 P.2d at 1201*; RESTATEMENT (THIRD) OF RESTITUTION & UNJUST ENRICHMENT § 31 cmt. e; see also Candice L. Kovacic, A Proposal to Simplify Quantum Meruit Litigation, *35 Am. U. L. Rev. 547, 553 (1986)*. In cases that fall into the latter category, courts often invoke the legal fiction that the parties' conduct creates a "contract implied in law" or "quasi-contract." See *Alternatives Unlimited, 843 A.2d at 290-91*; *Campbell v. Tennessee Valley Authority, 421 F.2d 293, 296 (5th Cir. 1969)*; *RESTATEMENT (SECOND) OF CONTRACTS § 4, cmt. b*. Liability in these cases "is not in reality contractual in character,

[10] The counts entitled "Quantum Meruit" are: Count II in Case No. 6:14-cv-6007; Count II in Case No. 6:14-cv-6008 and 6:14-cv-6020; Count II in Case No. 6:14-cv-6009; Count II in Case No. 6:14-cv-6011; Count I in Case No. 6:14-cv-6012 and 6:14-cv-6013; the sixth unnumbered count in Case No. 6:14-cv-6015; Count IV in Case No. 6:14-cv-6018; **[*441]** and Count I in Case No. 6:14-cv-6019. The counts entitled "Unjust Enrichment" are: Count IV in Case No. 6:14-cv-6006; Count III in Case No. 6:14-cv-6007; Count III in Case No. 6:14-cv-6008 and 6:14-cv-6020; Count III in Case No. 6:14-cv-6009; Count III in Case No. 6:14-cv-6011; Count II in Case No. 6:14-cv-6012 and 6:14-cv-6013; the seventh unnumbered count in Case No. 6:14-cv-6015; Count V in Case No. 6:14-cv-6018; Count II in Case No. 6:14-cv-6019; and Count IV in Case No. 6:14-cv-6022. In Count I in Case No. 6:14-cv-6010 the California Plaintiffs allege a single count entitled "Quantum Meruit: Contract Implied in Law, Quasi-Contract, and Unjust Enrichment." In the "First Claim for Relief" in Case No. 6:14-cv-6014, the Oregon Plaintiffs allege a single count entitled "Quantum Meruit/Unjust Enrichment."

but is imposed in the absence of any [agreement] to prevent unjust enrichment." *Fidelity & Deposit Co. of Maryland v. Harris, 360 F.2d 402, 409 (9th Cir. 1966)* (citing *Bayne v. United States, 93 U.S. 642, 23 L. Ed. 997 (1876))*.

"Unjust enrichment" is a much newer term in the Anglo-American common-law system. Although courts have long appealed to notions of justice when imposing liability in the absence of an express **[*443]** contract, see 1 Dan B. Dobbs, LAW OF REMEDIES 251 (2d ed. 1993) (citing Lord Mansfield's opinion in Moses v. MacFerlan, 2 Burr. 1005, 97 Eng. Rep. 676 (K.B. 1760)), the idea that quasi-contract is justified by a broader principle of preventing unjust enrichment was first proposed in the late 1800s, see William Albert Keener, A TREATISE ON THE LAW OF QUASI-CONTRACTS 19-20 (1893) (arguing that the theory of quasi contract "rests upon the doctrine that a man shall not be allowed to enrich himself unjustly at the expense of another"); see also Review, A Treatise on the Law of Quasi-Contracts, 7 Harv. L. Rev. 245 (1893) (noting that Keener's "doctrine of unjust enrichment has not been acknowledged in terms to any great extent by the courts"); Ben Kremer, Review, Restatement Third of Restitution and Unjust Enrichment by the American Law Institute, *35 Melb. U. L. Rev. 1197, 1198 (2011)* (describing Keener's treatise as "a seminal work"). Keener's thesis—that liability in quasi-contract rests on the principle that one should not be allowed to enrich himself at the expense of another—has gained "almost universal assent" in academic literature, see Joseph M. Perillo, Restitution in a Contractual Context, 73 Colum. L. Rev. 1208, 1208-09 (1973), and has been repeated in some form by high courts in virtually every state, including the 12 where these 14 cases **[*444]** originated.[11] It is also the starting point for each of the Restatements of Restitution. RESTATEMENT (THIRD) OF RESTITUTION & UNJUST ENRICHMENT § 1; *RESTATEMENT (FIRST) OF RESTITUTION § 1*.

HN13[] The unjust enrichment principle is the basis not only for "quasi-contract" but also for a host of equitable remedies including constructive trust, subrogation, and equitable lien. 1 Dobbs, LAW OF REMEDIES 565. Scholars have identified a trend in American law "to affiliate various restitutionary remedies, such as quasi contracts and constructive trusts" with "a common animating principle" of unjust enrichment. Kelvin H. Dickinson, Divorce and Life Insurance: Post Mortem Remedies for Breach of a Duty to Maintain a Policy for a Designated Beneficiary, *61 Mo. L. Rev. 533, 569-70 (1996)*; see also 1 Dobbs, LAW OF REMEDIES 564 (stating that "the modern view is that unjust enrichment is a unifying principle" for a broad range of narrow common law and equitable actions). The Restitution Restatements, published 74 years apart, reflect this trend. The Restatement (First) of Restitution recognized the common unjust enrichment principle underlying quasi-contract and constructive trust, but was organized into separate parts for **[*445]** each. The Restatement (Third) of Restitution and Unjust Enrichment, by contrast, is organized into four parts, the first stating general principles, the second more specific substantive rules, the third addressing remedies and the fourth defenses.

As is typical in evolving areas of law, some states are faster to adopt changes than others. ***HN14***[] Some states retain subsidiary actions like "quantum meruit" or "quasi contract" and require a plaintiff to plead and prove long-established elements of those actions. See, e.g., *A & E Auto Body, 2015 U.S. Dist. LEXIS 16153, 2015 WL 304048, at *5* (citing *Hull & Co., Inc. v. Thomas, 834 So.2d 904 (Fla. 4th DCA 2003))*. Courts in these states sometimes refer to the action as being for "unjust enrichment." See id. (citing *Hillman Constr. Corp. v. Wainer, 636 So.2d 576, 577 (Fla. 4th DCA 1994))*. These states typically require a showing that the plaintiff "conferred" a benefit on the defendant, and that the defendant "appreciated" or "knew" of the benefit and "accepted" or "retained" it. They may also focus on whether the plaintiff reasonably expected to receive compensation for the benefit. Missouri, Virginia, Kentucky, Alabama, and Oregon fall into this category. See *Binkley v. American Equity Mortgage, Inc., 447 S.W.3d 194, 199 (Mo. 2014)* ("An unjust enrichment claim requires a showing that: '(1) the plaintiff conferred a benefit on

[11] See *Kentucky Ass'n of Counties All Lines Fund Trust v. McClendon, 157 S.W.3d 626, 632-33 (Ky. 2005)*; *Village of Bloomingdale v. CDG Enterprises, Inc., 196 Ill. 2d 484, 752 N.E.2d 1090, 1102, 256 Ill. Dec. 848 (Ill. 2001)*; *Hamm v. Scott, 258 Va. 35, 515 S.E.2d 773, 775 (Va. 1999)*; *Kammer Asphalt Paving Co. v. East China Township Schools, 443 Mich. 176, 504 N.W.2d 635, 640 (Mich. 1993)*; ***Carr v. Carr*, 120 N.J. 336, 576 A.2d 872, 880 (N.J. 1990)**; *Lynch v. Deaconess Medical Center, 113 Wn.2d 162, 776 P.2d 681, 683 (Wash. 1989)*; *Murdock-Bryant Constr., Inc. v. Pearson, 146 Ariz. 48, 703 P.2d 1197, 1201-02 (Ariz. 1985)*; *Opelika Production Credit Ass'n v. Lamb, 361 So.2d 95, 99 (Ala. 1978)*; *J.A. & W.A. Hess, Inc. v. Spencer, 364 Mo. 97, 259 S.W.2d 804, 807 (Mo. 1953)*; *Ruinello v. Murray, 36 Cal. 2d 687, 227 P.2d 251, 253 (Cal. 1951)*.

the defendant; (2) the defendant appreciated the benefit; and (3) the defendant accepted **[*446]** and retained the benefit under inequitable and/or unjust circumstances.'"); *Schmidt v. Household Finance Corp., II, 276 Va. 108, 661 S.E.2d 834, 838 (Va. 2008)* ("To state a cause of action for unjust enrichment, Schmidt had to allege that: (1) he conferred a benefit on Household Finance; (2) Household Finance knew of the benefit and should reasonably have expected to repay Schmidt; and (3) Household Finance accepted or retained the benefit without paying for its value."); *Jones v. Sparks, 297 S.W.3d 73, 78 (Ky. App. 2009)* ("For a party to prevail under the theory of unjust enrichment, they must prove three elements: (1) benefit conferred upon defendant at plaintiff's expense; (2) a resulting appreciation of benefit by defendant; and (3) inequitable retention of benefit without payment for its value."); *Portofino Seaport Village, LLC v. Welch, 4 So.3d 1095, 1098 (Ala. 2008)* ("To prevail on a claim of unjust enrichment under Alabama law, a plaintiff must show that: (1) the defendant knowingly accepted and retained a benefit, (2) provided by another, (3) who has a reasonable expectation of compensation."); *Winters v. County of Clatsop, 210 Or. App. 417, 421, 150 P.3d 1104 (Or. App. 2007)* ("It is well-settled that, to establish unjust enrichment, a plaintiff must establish that (1) the plaintiff conferred a benefit on the defendant; (2) the defendant was aware that it had received a benefit; and (3) under the circumstances, it would be unjust for the defendant to retain **[*447]** the benefit without paying for it.").

By contrast, ***HN15***[] in California, Michigan, Washington, and Illinois, a plaintiff can establish an unjust enrichment claim by meeting the requirements of *section 1 of the Restatements:* the defendant was enriched at the plaintiff's expense and the enrichment was unjust. See *Ghirardo v. Antonioli, 14 Cal. 4th 39, 57 Cal. Rptr. 2d 687, 924 P.2d 996, 1003 (Cal. 1996)* ("Under the law of restitution, an individual may be required to make restitution if he is unjustly enriched at the expense of another.")[12]; *AFT Michigan v. Michigan, 303 Mich. App. 651, 660-61, 846 N.W.2d 583 (Mich. App. 2014)* ("To sustain an unjust enrichment claim, a plaintiff must demonstrate (1) the defendant's receipt of a benefit from the plaintiff and (2) an inequity to plaintiff as a result." (citing *Dumas v. Auto Club Ins. Ass'n, 437 Mich. 521, 473 N.W.2d 652, 663 (Mich. 1991)*))[13]; *Norcon Builders, LLC v. GMP Homes VG, LLC, 161 Wn. App. 474, 254 P.3d 835, 844 (Wash. App. 1st Div. 2011)* ("A claim of unjust enrichment requires proof of three elements—'(1) the defendant receives a benefit, (2) the received benefit is at the plaintiff's expense, and (3) the circumstances make it unjust for the defendant to retain the benefit without payment.'" (quoting *Young v. Young, 164 Wn.2d 477, 191 P.3d 1258, 1262 (Wash. 2008)*)); *HPI Health Care Services, Inc. v. Mt. Vernon Hospital, Inc., 131 Ill. 2d 145, 545 N.E.2d 672, 679, 137 Ill. Dec. 19 (Ill. 1989)* ("To state a cause of action based on a theory of unjust enrichment, a plaintiff must allege that the defendant has unjustly retained a benefit to the plaintiff's detriment, and that defendant's retention of the benefit violates the fundamental principles of justice, equity, and good conscience."). Although they use slightly **[*448]** different elements, Arizona courts require a plaintiff to satisfy the Restatement criteria plus "the absence of a remedy provided by law," a requirement which is satisfied by denying that a contract governs the relationship between the parties. See *Freeman v. Sorchych, 226 Ariz. 242, 245 P.3d 927, 936 (Ariz. App. 2011)* ("To recover under a theory of unjust enrichment, a plaintiff must demonstrate five elements: (1) an enrichment, (2) an impoverishment, (3) a connection between the enrichment and impoverishment, (4) the absence of justification for the enrichment and impoverishment, and (5) the absence of a remedy provided by law."); *In re Automotive Parts Antitrust Litig., 29 F. Supp. 3d 982, 1016 (E.D. Mich. 2014)*

---

[12] California appellate courts often describe these claims as being for restitution, not unjust enrichment. For example, in *Dunkin v. Boskey, 82 Cal. App. 4th 171, 98 Cal. Rptr. 2d 44 (2000)*, the court explained: "The phrase 'Unjust Enrichment' does not describe a theory of recovery, but an effect: the result of a failure to make restitution under circumstances where it is equitable to do so. *84 Cal. App. 4th at 198 n. 18* (citations and quotations omitted). See also *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 1370, 108 Cal. Rptr. 3d 682 (2010)* (***HN16***[] "'[T]here is no cause of action in California for unjust enrichment.' Unjust enrichment is synonymous with **[*449]** restitution." (quoting *Melchior v. New Line Productions, 106 Cal. App. 4th 779, 793, 131 Cal. Rptr. 2d 347 (2003)*)). This distinction appears to be one of form, rather than function. See *Dunkin, 82 Cal. App. 4th at 198 n. 18* ("'[I]n any event, ... there is no particular form of pleading necessary to invoke the doctrine' of restitution." (quoting *Dinosaur Development, Inc. v. White, 216 Cal.App.3d 1310, 1316, 265 Cal. Rptr. 525 (1989)*)).

[13] ***HN17***[] Although the elements of an unjust enrichment claim under Michigan law require that the defendant receive a benefit from the plaintiff, Michigan does not require that the benefit be conferred directly by the plaintiff to the defendant. See *In re Automotive Parts Antitrust Litig., 29 F. Supp. 3d 982, 1021 (E.D. Mich. 2014)*.

("Arizona courts define the adequate remedy at law element as 'whether there is a contract which governs the relationship between the parties.'" (citing *Trustmark Ins. Co. v. Bank One, Ariz., NA, 202 Ariz. 535, 48 P.3d 485, 491 n. 5 (Ariz. App. 2002))*).

HN18[] Courts in Pennsylvania have advanced both formulations. Compare *Meehan v. Cheltenham Township, 410 Pa. 446, 189 A.2d 593, 595 (Pa. 1963)* ("Where one party has been unjustly enriched at the expense of another, he is required to make restitution to the other. In order to recover, there must be both (1) an enrichment, and (2) an injustice resulting if recovery for the enrichment is denied."); with *Mitchell v. Moore, 1999 PA Super 77, 729 A.2d 1200, 1203 (Pa. Super. 1999)* ("The elements necessary to prove unjust enrichment are: '(1) benefits conferred on defendant by plaintiff; (2) appreciation of such benefits by defendant; and (3) acceptance and retention of such benefits under such circumstances that it would be inequitable for defendant to retain the benefit without payment of value.'" (quoting *Schenck v. K.E. David, Ltd., 446 Pa. Super. 94, 666 A.2d 327, 328 (Pa. Super. 1995))*).

Finally, New Jersey takes a hybrid approach. ***HN19***[] Under New Jersey law, an unjust enrichment **[*450]** plaintiff must show not only that the defendant was enriched and that the enrichment was unjust, but also that the plaintiff "expected remuneration from the defendant at the time it performed or conferred a benefit on defendant and that the failure of remuneration enriched defendant beyond its contractual rights." *VRG Corp. v. GKN Realty Corp., 135 N.J. 539, 641 A.2d 519, 526 (N.J 1994)* (citations omitted).

Despite these differences, there is a common set of basic elements for unjust enrichment claims in these states. ***HN20***[] To recover, a plaintiff must show at least that the defendant obtained a benefit at the plaintiff's expense and that the defendant's enrichment was "unjust" or "inequitable."

1. Benefit

Case law differs from state to state regarding what counts as a "benefit" (or an "enrichment") for purposes of an unjust enrichment claim. In A & E Auto Body, the Court held that under Florida law, a third party who renders a benefit to an insured or claimant that the insurance company is ultimately responsible for paying for does not "confer" a benefit on the insurance company for purposes of an unjust enrichment claim. *2015 U.S. Dist. LEXIS 16153, 2015 WL 304048, at *5* (citing *Adventist Health System/Sunbelt, Inc. v. Medical Savings Ins. Co., 2004 U.S. Dist. LEXIS 30976, 2004 WL 6225293, at *6 (M.D. Fla. Mar. 8, 2004))*. Adventist, in turn favorably cited (among other cases) *Myrtle Beach Hospital, Inc. v. City of Myrtle Beach, 341c S.C. 1, 532 S.E.2d 868 (S.C. 2000)*, where the South Carolina Supreme Court rejected a quantum meruit claim by **[*451]** a hospital that provided uncompensated or undercompensated medical services to pre-trial detainees against the city that housed them. In Myrtle Beach, the court reasoned that the detainees, and not the city, received and retained the benefits conferred by the hospital. *Id. at 873*.

But other courts define "benefit" more broadly. In *Emergency Physicians Integrated Care v. Salt Lake County, 2007 UT 72, 1c67 P.3d 1080 (Utah 2007)*, the Utah Supreme Court explicitly rejected the South Carolina Supreme Court's holding in Myrtle Beach and concluded that a jailer did benefit from the provision of emergency medical care to inmates under his charge. *Id. at 1085*. The New Jersey Supreme Court reached a similar conclusion in *St. Barnabas Medical Center v. County of Essex, 111 N.J. 67, 543 A.2d 34 (N.J. 1988)*.[14] And, in Adventist the court noted (and disagreed with) a Pennsylvania appellate decision holding that a hospital conferred a benefit on a managed care company by providing health care services to the company's members. *2004 U.S. Dist. LEXIS*

[14] The New Jersey Plaintiffs interpret St. Barnabas to mean that whenever a plaintiff performs a duty owed by a defendant to a third party, the defendant is not only enriched, but *unjustly* enriched at the plaintiff's expense (Case No. 6:14-cv-6013, Doc. 41 at 4). But, in St. Barnabas, the New Jersey Supreme Court emphasized the fact that the hospital was under **[*452]** a duty, imposed by state regulation, to treat the indigent inmates. *Id. at 38*. Here, the New Jersey Plaintiffs were under no duty to repair the vehicles belonging to Defendants' insureds and claimants. Additionally, the county in St. Barnabas requested that the hospital provide medical care to the inmates; here, by contrast, the New Jersey Plaintiffs have not pled that Defendants or Defendants' agents asked them to perform any repairs.

30976, 2004 WL 6225293, at *5 n.7 (citing Temple Univ. Hospital, Inc. v. Healthcare Mgmt. Alternatives, Inc., 2003 PA Super 332, 832 A.2d 501, 507-08 (Pa. Super. Ct. 2003)).

Defendants urge the Court to adopt the reasoning of A & E Auto Body, Adventist, and Myrtle Beach and dismiss Plaintiffs' quantum meruit and unjust enrichment claims on this basis. However, in several of these cases Defendants cite little or no state-specific authority to advance their argument that the relevant states would interpret "benefit" narrowly, like Florida and South Carolina, rather than broadly, like Utah, Pennsylvania, New Jersey[15] and the comments to the Restitution Restatements. Because the states are divided on this issue, and because the complaints must be dismissed on other grounds, I do not address this issue on a state-by-state basis in this report and recommendations.[16]

2. Failure to Bargain

Assuming Plaintiffs' performance of repairs for Defendants' insureds and claimants constitutes a benefit, the unjust enrichment claims must still be dismissed because Plaintiffs have failed to allege facts showing that it would be unjust to allow Defendants to retain any benefit Plaintiffs may have conferred. The Restatement (Third) of Restitution and Unjust Enrichment explains that ***HN21***[] "[t]here is no liability in restitution for an unrequested benefit voluntarily conferred, unless the circumstances of the transaction justify the claimant's intervention in the absence of contract." Id. § 2(3). Comment (d) to this section explains:

> Instead of proposing a bargain, the restitution claimant first confers a benefit, then seeks payment for its value. When this manner of proceeding is unacceptable—as it usually is, if the claimant neglects an opportunity to contract—a claim based on unjust enrichment will be denied.
>
> The limitation of § 2(3) is traditionally expressed by denying restitution to a claimant characterized as "officious," an "intermeddler," or a **[*455]** "volunteer." This section states the same rule, substituting a functional explanation for the familiar epithets. Because contract is strongly preferred over restitution as a basis for private obligations, restitution is not usually available to a claimant who has neglected a suitable opportunity to make a contract beforehand.

As Judge Posner explained in Indiana Lumbermens Mutual Insurance Co. v. Reinsurance Results, Inc.,

> ***HN22***[] One who voluntarily confers a benefit on another, which is to say in the absence of a contractual obligation to do so, ordinarily has no legal claim to be compensated. E.g., *In re Grabill Corp., 983 F.2d 773, 776 (7th Cir.1993)*; American Law Institute, *Restatement (First) of Restitution § 2* (1937). If while you are sitting on your porch sipping Margaritas a trio of itinerant musicians serenades you with mandolin, lute, and hautboy, you have no obligation, in the absence of a contract, to pay them for their performance no matter how much you enjoyed it; and likewise if they were gardeners whom you had hired and on a break from their gardening

[15] Some case law from the District of New Jersey follows the no-benefit rule **[*453]** stated in Adventist and applied by this Court in the Florida case. See, e.g., *Broad Street Surgical Center, LLC v. Unitedhealth Group, Inc., Civ. No. 11-2775(JBS/JS), 2012 U.S. Dist. LEXIS 30466, 2012 WL 762498, at *8 (D.N.J. Mar. 6, 2012)*. Whether Broad Street can be reconciled with St. Barnabas on this issue is a question best left for a later time.

[16] In their memorandum in support of their motion to dismiss in the Kentucky case and their replies in the Alabama, New Jersey, and Washington cases, the GEICO Defendants suggest that Plaintiffs can never establish that performance of repairs constitutes a benefit to the insurance companies because "[i]t is common knowledge that insurance companies have a duty to pay for the damage to a vehicle, not to repair the vehicle." (Case No. 6:14-cv-6009, Doc. 27 at 4 n. 2; Case No. 6:14-cv-6013, Doc. 43 at 4 n. 3; Case No. 6:14-cv-6015, Doc. 24 at 3 n. 2; Case No. 6:14-cv-6018, Doc. 117 at 12, n. 2). This is hardly "common knowledge" or "obvious," and may not be true. GEICO's standard auto insurance policy for the state of Kentucky for example, expressly gives GEICO an option to "repair or replace the damaged or stolen property" instead of "pay[ing] for the loss." (See E.D. Ky. Case No. 5:14-cv-363-DCR-RW, Doc. 1-3 at 12). In any event, the Court cannot consider "matters outside the pleadings" without converting the **[*454]** motion to one for summary judgment, *Fed. R. Civ. P. 12(d)*, and even then, unsworn assertions in a brief or memorandum of law are not evidence, *Travaglio v. American Express Co., 735 F.3d 1266, 1270 (11th Cir. 2013)*.

> they took up their musical instruments to serenade you. When voluntary transactions are feasible (in economic parlance, when transaction costs are low), it is better and cheaper to require the parties to make their own **[*456]** terms than for a court to try to fix them-better and cheaper that the musicians should negotiate a price with you in advance than for them to go running to court for a judicial determination of the just price for their performance. In contrast, "when a businessman renders a valuable service in circumstances in which compensation would normally be expected, and though he is acting without the knowledge or consent of the recipient of the service there is no alternative because transacting with the owner would be infeasible (maybe the owner can't be located), an award of compensation is appropriate to encourage a valuable activity." *Nadalin v. Automobile Recovery Bureau, Inc., 169 F.3d 1084, 1086 (7th Cir.1999)*. That is the case of prohibitively high transaction costs. This is not such a case.

513 F.3d 652, 656-57 (7th Cir. 2008). Accord 1 Dobbs, Law of Remedies § 4.9(4) ("If the parties could have contracted but did not, the plaintiff generally is denied recovery of the non-cash benefit.").

Courts in the applicable states deny restitution to those who confer benefits officiously.[17] Moreover, some states require unjust enrichment plaintiffs to show a reasonable expectation of compensation, see, e.g., *Portofino, 4 So.3d at 1098 (Alabama)*, a requirement that effectively denies recovery to the officious intermeddler.

There is no allegation in any of these complaints that Defendants (rather than their insureds or claimants) asked any of the Plaintiffs to perform repairs. Plaintiffs must therefore plead facts sufficient to support a conclusion that their failure to bargain with Defendants before performing repairs was justified under the circumstances. The facts pled by Plaintiffs suggest the opposite is true. Plaintiffs do not allege that it was impossible or even impractical for them to bargain with Defendants over price before agreeing to perform repairs. Cf. *K.A.L. v. Southern Medical Business Services, 854 So.2d 106, 107-09 (Ala. App. 2003)* (patient liable to hospital for services rendered when patient was unconscious). Nor do they allege that agreeing to perform and performing any particular repairs was necessary to discharge a legal duty of their own or to otherwise protect their own interests. Cf. *Temple Univ. Hospital, 832 A.2d at 515-16* (allowing unjust enrichment claim by **[*458]** hospital against managed care organization, because the hospital was required to provide emergency medical care to the organization's members under the federal Emergency Medical Treatment and Active Labor Act). They also do not allege that they performed the repairs on account of any good faith mistake of fact. Cf. *Herman v. Jackson, 405 S.W.2d 9, 11-12 (Ky. App. 1966)* (allowing recovery to plaintiff who performed under mistaken belief that the parties had a contract). On the contrary, Plaintiffs' complaints allege that they knew Defendants would not pay what they were asking for. See *Capitol Body Shop, 2015 U.S. Dist. LEXIS 26509, 2015 WL 859477, at *6* ("Defendants' repeated and persistent refusal to pay the amounts demanded by Plaintiffs makes unreasonable any expectation on the part of Plaintiffs that Defendants would abruptly begin paying the amounts Plaintiffs believe their services are worth."); *Blue Ash Auto Body, Inc. v. Progressive Casualty Ins. Co., 2011-Ohio-5785, at ¶ 12, 2011 WL 5444201, at *3 (Ohio App. 2011)* (auto body shops could not demonstrate that any enrichment of insurance company was unjust, where shops entered into agreements with insureds knowing in advance insurance company's estimates for the work and were free to refuse to do the work).

The fact that insureds and claimants under Defendants' policies asked Plaintiffs **[*459]** to perform repairs does not justify Plaintiffs' failure to bargain separately with Defendants. As Dobbs explains in his treatise on remedies,

> A may contract with B but not with C, although the three are involved in a single project. The parties could have contracted each with both others, but they did not. The separate contracts convey clearly the limited kinds of

---

[17] See, e.g., ***Allstate Ins. Co. v. Reeves, 440 So.2d 1086, 1089 (Ala. App. 1983)***; *Gould v. American Water Works Service Co., 52 N.J. 226, 245 A.2d 14, 16 (N.J. 1969)*; *Watkins v. Richmond College Trustees, 41 Mo. 302, 308-09 (1867)*; see also *Lynch v. Deaconess Medical Ctr., 113 Wn.2d 162, 776 P.2d 681 (Wash. 1989)* (an **[*457]** unjust enrichment plaintiff "cannot be a mere volunteer"); *Freeman v. Sorchych, 245 P.3d at 936-37* (under Arizona law, plaintiff must show that benefit was not conferred officiously); *Stein v. Simpson, 37 Cal. 2d 79, 230 P.2d 816, 821 (Cal. 1951)* ("A person who officiously confers a benefit upon another is not entitled to restitution."); *Plastics & Equipment Sales Co. v. DeSoto, Inc., 91 Ill. App. 3d 1011, 415 N.E.2d 492, 498, 47 Ill. Dec. 487 (Ill. App. 1st Dist. 1980)* ("Quasi-contractual relief is not available, however, where the benefit is conferred officiously....").

> liability and exposure each party has in mind. Each party may benefit by the work or payments of both other parties, but the parties understand that their responsibilities and rights are only those set up by the contract. Respect for that contract arrangement requires the courts to refuse restitution between the parties who did not contract with each other.

1 Dobbs, LAW OF REMEDIES § 4.9(4), p. 697. In other words, ***HN23***[] "[a] plaintiff is not entitled to employ the legal fiction of quasi-contract to 'substitute one promisor or debtor for another.'" *Callano v. Oakwood Park Homes Corp., 91 N.J. Super. 105, 219 A.2d 332, 335 (N.J. App. Div. 1966)* (quoting *Cascaden v. Magryta, 247 Mich. 267, 225 N.W. 511, 512 (Mich. 1929))*; see also *Chandler v. Washington Toll Bridge Authority, 17 Wn.2d 591, 137 P.2d 97, 102 (Wash. 1943)*; *Roman Mosaic & Tile Co. v. Vollrath, 226 Pa. Super. 215, 313 A.2d 305, 307 (Pa. Super. 1973)* (both citing Cascaden for the same proposition).[18] For this reason, I recommend that all of Plaintiffs' unjust enrichment claims be dismissed.

E. Legally Independent Quantum Meruit Claims

In the cases in which Plaintffs assert separate claims entitled "quantum meruit," they make clear that these quantum meruit claims are based on the unjust enrichment principle (Compare Case No. 6:14-cv-6011, Doc. 1, ¶ 148 (***HN25***[] "Quantum meruit rests upon the equitable principle that **[*461]** a party is not allowed to enrich itself at the expense of another"); with id. ¶ 152 ("A quasi-contract, or constructive contract, is based on the equitable principle that a person shall not be allowed to enrich himself unjustly at the expense of another.")). Consequently, there is significant overlap between Plaintiffs' unjust enrichment and quantum meruit claims in the cases in which they assert both.

HN26[] Michigan and Pennsylvania courts have held that claims for "quantum meruit" and "unjust enrichment" are the same. *Shafer Electric & Constr. v. Mantia, 96 A.3d 989, 993 (Pa. 2014)* (recognizing that "quantum meruit is essentially a claim for unjust enrichment"); *Morris Pumps v. Centerline Piping, Inc., 273 Mich. App. 187, 729 N.W.2d 898, 904 (Mich. App. 2006)*. Arizona courts describe "quantum meruit" as the measure of recovery in unjust enrichment cases. See, e.g., *Murdock-Bryant Constr., Inc. v. Pearson, 146 Ariz. 48, 703 P.2d 1197, 1202 (Ariz. 1985)* (explaining that a person may be entitled "to restitution in quantum meruit to prevent ... unjust enrichment"). Thus, the quantum meruit claims in the Michigan, Pennsylvania, and Arizona cases have no independent legal significance and should be dismissed for the same reasons as the unjust enrichment claims in those cases.

The six remaining states recognize claims for quantum meruit with elements at least formally different from claims for unjust enrichment. I discuss these states in **[*462]** turn.

1. Alabama

In *Mantiply v. Mantiply, 951 So.2d 638, 656 (Ala. 2006)*, ***HN27***[] the Alabama Supreme Court explained that "[r]ecovery on a theory of quantum meruit arises when a contract is implied." The court identified "'two kinds of implied contracts—those implied in fact and those implied in law. Contracts implied in law are more properly described as quasi or constructive contracts where the law fictitiously supplies the promise [to pay for the labor or services of another] to prevent a manifest injustice or unjust enrichment, etc.'" Id. (quoting *Green v. Hospital Building Authority of Bessemer, 294 Ala. 467, 318 So.2d 701, 704 (Ala. 1975))*. Thus, "quantum meruit" under Alabama law is used to refer both to situations involving contracts implied in fact, which are based on agreement,

---

[18] Plaintiffs' claims also fail under § 25 of the Restatement (Third) of Restitution and Unjust Enrichment. ***HN24***[] Section 25 of the Restatement provides that a plaintiff will have a restitution claim against a defendant **[*460]** who benefits from the plaintiff's uncompensated performance of an obligation to a third party only when: (a) liability in restitution will not subject the defendant to a forced exchange; (b) absent liability in restitution, the plaintiff will not be compensated for the performance and the defendant will retain the benefit of it without paying for it; and (c) restitution will not subject the defendant to an obligation from which the parties understood the defendant would be free. Comment b to this section explains that the second requirement will not be satisfied where the plaintiff sues the defendant for restitution "instead of pursuing a viable contract claim" against the other party to the plaintiff's contract. Nowhere in any of these complaints do Plaintiffs allege that they cannot recover the contract price for the repairs from Defendants' insureds and claimants.

and contracts implied in law, which are not based on agreements but are legal fictions imposed to prevent unjust enrichment. To the extent that the Alabama Plaintiffs' quantum meruit claim is based on a contract implied in fact, it must be dismissed because they failed to allege '"mutual assent to terms essential to the contract."' Id. (quoting *Steiger v. Huntsville City Board of Education, 653 So.2d 975, 978 (Ala. 1995))*. To the extent that the Alabama Plaintiffs' quantum meruit claim is based on a contract "implied in law," it is functionally the same as their unjust enrichment claim and must be dismissed for the reasons explained in the **[*463]** previous section.

2. Illinois

HN28[] Illinois courts recognize a cause of action for quantum meruit where "(1) [the plaintiff] performed a service to benefit the defendant, (2) [the plaintiff] did not perform this service gratuitously, (3) [the] defendant accepted this service, and (4) no contract existed to prescribe payment for this service." *Installco Inc. v. Whiting Corp., 336 Ill. App. 3d 776, 784 N.E.2d 312, 317-18, 271 Ill. Dec. 94 (Ill. App. 1st Dist. 2002)*. The plaintiff must show that it would be unjust for the defendant to retain any benefit without paying. *Stark Excavating, Inc. v. Carter Constr. Services, Inc., 2012 IL App (4th) 110357, 967 N.E.2d 465, 475, 359 Ill. Dec. 735 (Ill. App. 4th Dist. 2012)*. The Illinois Plaintiffs have failed to plead facts showing that it would be unjust to deny them compensation from Defendants for any unrequested benefits they provided Defendants. Therefore, the Illinois Plaintiffs' quantum meruit claim should be dismissed.

3. New Jersey

HN29[] New Jersey courts recognize a cause of action for quantum meruit that is at least nominally (though probably not functionally) different from a claim for unjust enrichment. "To recover under a theory of quantum meruit, a plaintiff must establish: '(1) the performance of services in good faith, (2) the acceptance of the services by the person to whom they are rendered, (3) an expectation of compensation therefor, and (4) the reasonable value of the services.'" *Starkey, Kelly, Blaney & White v. Estate of Nicolaysen, 172 N.J. 60, 796 A.2d 238, 242-43 (N.J. 2002)*. In addition, the expectation **[*464]** of compensation must be reasonable. *Weichert Co. Realtors v. Ryan, 128 N.J. 427, 608 A.2d 280, 285 (N.J. 1992)*.

The New Jersey Plaintiffs could not have reasonably expected Defendants to pay them what they thought their services were worth, given Defendants' persistent refusal to do so in the past. To the extent that the New Jersey Plaintiffs provided a service to Defendants, the facts alleged show that it was not provided at Defendants' request or by mistake, or that doing the repairs without first negotiating price with Defendants was necessary to protect the interests of Plaintiffs, Defendants, or any third parties. Cf. *Cohen v. Home Ins. Co., 230 N.J. Super. 72, 552 A.2d 654, 659 (N.J. App. Div. 1989)* ("'A person who without mistake, coercion or request has unconditionally conferred a benefit upon another is not entitled to restitution, except where the benefit was conferred under circumstances making such action necessary for the protection of the interests of the other or of third persons.'" (quoting *Restatement (First) of Restitution § 112*)). Accordingly, the New Jersey Plaintiffs' quantum meruit claims must be dismissed.

4. Kentucky

At least one Kentucky appellate court has recognized quantum meruit and unjust enrichment as legally distinct claims. See *JP White, LLC v. Poe Companies, LLC, Nos. 2010-CA-000267-MR, 2010-CA-000299-MR, 2011 Ky. App. Unpub. LEXIS 392, 2011 WL 1706751 (Ky. App. May 6, 2011)*. However, **[*465]** as the Non-GEICO Defendants point out in their reply, Kentucky courts often conflate quantum meruit and unjust enrichment (See Case No. 6:14-cv-6018, Doc. 118 at 3 n. 3 (citing *Quadrille Business Systems v. Kentucky Cattlemens Ass'n, 242 S.W.3d 359, 365 (Ky. App. 2007)*; *Community Ties of America, Inc. v. NDT Care Services, LLC, No. 3:12-cv-00429-CRS, 2015 U.S. Dist. LEXIS 14990, 2015 WL 520960, at *18 (W.D. Ky. Feb. 9, 2015))*). Assuming arguendo that JP White accurately reflects Kentucky law on this point, the Kentucky Plaintiff's quantum meruit claim still fails.

HN30[] In Kentucky, to recover on a quantum meruit theory, the plaintiff must show (1) that it rendered valuable services or furnished materials; (2) to the defendant; (3) that the services were rendered with defendant's knowledge or consent, or alternatively that the defendant accepted or received them; (4) under such circumstances as reasonably notified the defendant that the plaintiff expected to be paid by the defendant. *JP White, 2011 Ky.*

App. Unpub. LEXIS 392, 2011 WL 1706751, at *5 (quoting Quadrille Business Systems v. Kentucky Cattlemens Ass'n, Inc., 242 S.W.3d 359, 366 (Ky. App. 2007)). In JP White, the court said that "recovery under quantum meruit does not depend upon the conferment or retention of a benefit," whereas unjust enrichment requires that "a benefit ... be conferred and retained." Id.

The Kentucky Plaintiff's quantum meruit claim fails because it has not alleged that it rendered any services or furnished any materials to Defendants (as opposed **[*466]** to Defendants' insureds and claimants). The services provided to insureds and claimants may (or may not, depending on state law) have conferred a "benefit" on Defendants that would satisfy the first element of an unjust enrichment claim, but conferral of a benefit is not one of the elements of a quantum meruit claim under Kentucky law.

5. Washington

HN31[] Under Washington law, a claim for quantum meruit is unquestionably different than one for unjust enrichment. In Young v. Young, 164 Wn.2d 477, 191 P.3d 1258 (Wash. 2008), the Washington Supreme Court "clarif[ied] the distinction between 'unjust enrichment' and 'quantum meruit.'" Id. at 1261. The court explained that "[u]njust enrichment is the method of recovery for the value of the benefit retained absent any contractual relationship because notions of fairness and justice require it," while "'quantum meruit' is the method of recovering the reasonable value of services provided under a contract implied in fact." Id. at 1262. "[T]he elements of a contract implied in fact are: (1) the defendant requests work, (2) the plaintiff expects payment for the work, and (3) the defendant knows or should know the plaintiff expects payment for the work." Id. at 1263. The Washington Plaintiffs fail to state a claim for quantum meruit under Washington law **[*467]** because they have not pled that any Defendant—as distinct from an insured—requested that any Plaintiff perform any repairs.

6. Virginia

HN32[] Courts in Virginia have listed two different sets of elements for "quantum meruit" claims. Under the first line of authority, the elements of a quantum meruit claim largely parallel those of an unjust enrichment claim. See, e.g. Centex Constr. v. Acstar Ins. Co., 448 F. Supp. 2d 697, 708 (E.D. Va. 2006) (listing the elements of a quantum meruit claim as (1) a benefit conferred by the plaintiff on the defendant; (2) the defendant's knowledge of the conferring of the benefit; and (3) acceptance or retention of the benefit under circumstances that would make it unjust to retain it without paying for its value). The Virginia Plaintiffs' claim fails under this first line of reasoning for the same reason their unjust enrichment claim fails: they have not alleged facts showing that it would be unjust to deny them compensation from Defendants for any unrequested (by Defendants) benefits they conferred on Defendants.

The second line of authority recognizes quantum meruit claims where the plaintiff has shown that "(i) he rendered valuable services, (ii) to the defendant, (iii) which were requested and accepted by the defendant, (iv) under **[*468]** such circumstances as reasonably notified the defendant that the claimant, in performing the work, expected to be paid by the defendant." Raymond, Colesar, Glaspy & Huss, P.C. v. Allied Capital Corp., 961 F.2d 489, 491 (4th Cir. 1992). The Virginia Plaintiffs have not stated a claim under this second line of cases because they have not pled that any Defendant requested any Plaintiff to perform any repair.

F. Tortious Interference

All Plaintiffs assert claims for tortious interference with business relationships or prospective advantage.[19] ***HN33***[] The elements of these claims differ slightly from state to state, but in virtually every state a plaintiff must show that

[19] The tortious interference counts are: Count III in Case No. 6:14-cv-6006; Count V in Case No. 6:14-cv-6007; Count V in Case No. 6:14-cv-6008 and 6:14-cv-6020; **[*469]** Count V in Case No. 6:14-cv-6009; Count II in Case No. 6:14-cv-6010; Count V in Case No. 6:14-cv-6011; Count V in Case No. 6:14-cv-6012 and 6:14-cv-6013; the "Third Claim for Relief" in Case No. 6:14-cv-6014; the eighth unnumbered count in 6:14-cv-6015; Count III in Case No. 6:14-cv-6018; Count IV in Case No. 6:14-cv-6019; and Count III in Case No. 6:15-cv-6022. The titles vary, with some complaints specifying the interference as being with "Business Relations" and others with "Prospective Economic Advantage," but the substance of each claim is the same.

the defendant intentionally and improperly interfered with the plaintiff's prospective contractual relationship and that as a result, the plaintiff failed to reap the benefits of the prospective relationship. See *Restatement (Second) of Torts § 766B*. Arizona, Michigan, California, Illinois, Washington, Virginia, and Missouri include as an additional element that the defendant must know of the prospective relationship. *Wagenseller v. Scottsdale Memorial Hospital, 147 Ariz. 370, 710 P.2d 1025, 1041 (Ariz. 1985)*, superseded by statute on other grounds as stated in, *Powell v. Washburn, 211 Ariz. 553, 125 P.3d 373 (Ariz. 2006)*; *Cedroni Ass'n, Inc. v. Tomblinson, Harburn Assocs., Architects & Planners, Inc., 492 Mich. 40, 821 N.W.2d 1, 3 (Mich. 2012)*; *Blank v. Kirwan, 39 Cal. 3d 311, 216 Cal. Rptr. 718, 703 P.2d 58, 70 (Cal. 1985)*; *Callis, Papa, Jackstadt & Halloran, P.C. v. Norfolk & Western Ry., 195 Ill. 2d 356, 748 N.E.2d 153, 161, 254 Ill. Dec. 707 (Ill. 2001)*; *Pacific Northwest Shooting Park Ass'n v. City of Sequim, 158 Wn.2d 342, 144 P.3d 276, 280 (Wash. 2006)*; *Glass v. Glass, 228 Va. 39, 321 S.E.2d 69, 76-77 (Va. 1985)*; *Community Title Co. v. Roosevelt Federal Savings & Loan Ass'n, 796 S.W.2d 369, 372 (Mo. 1990)*.

Defendants make several arguments for dismissal of the tortious interference claims. First, depending on the state, they either assert a privilege to interfere in the relationships between Plaintiffs and prospective customers because they would ultimately be responsible for paying the cost of repairs, or argue that any interference under these circumstances was not improper. Second, they argue that Plaintiffs' tortious interference claims should be dismissed because Plaintiffs failed to identify specific customers with whom Defendants interfered. In the same vein, Defendants argue that Plaintiffs' use of group pleading warrants dismissal **[*470]** of the tortious interference claims. Lastly, Defendants argue that heightened pleading requirements apply to the tortious interference claims, and that the claims should be dismissed because Plaintiffs failed to plead them with particularity. I address each of these arguments in turn.

1. Improper Interference/Privilege

The most significant difference between the states in this area of law is the way in which they determine when interference is improper. ***HN34***[] Arizona, Pennsylvania, New Jersey, and Kentucky use the multi-factor test outlined in the *Restatement (Second) of Torts § 767*.[20] *Wagenseller, 710 P.2d at 1043*; *Maverick Steel Co. v. Dick Corp./Barton Malow, 2012 PA Super 173, 54 A.3d 352, 355 (Pa. Super. 2012)*; *Nostrame v. Santiago, 213 N.J. 109, 61 A.3d 893, 901 (N.J. 2013)*; *NCAA ex rel. Bellarmine College v. Hornung, 754 S.W.2d 855, 858 (Ky. 1988)*. Michigan, Oregon, and Washington allow recovery where the defendant has an improper purpose or employs improper means. *Advocacy Organization for Patients & Providers v. Auto Club Ins. Ass'n, 257 Mich. App. 365, 670 N.W.2d 569, 580 (Mich. App. 2003)* ("The improper interference can be shown by either proving (1) the intentional doing of an act wrongful per se, or (2) the intentional doing of a lawful act with malice and unjustified in law for the purpose of invading plaintiffs' contractual right or business relationship."); *Top Service Body Shop, Inc. v. Allstate Ins. Co., 283 Ore. 201, 582 P.2d 1365, 1370-71 (Or. 1978)*; *Pacific Northwest, 144 P.3d at 280*. Virginia allows recovery for tortious interference with prospective contracts only when improper methods are used. *Peterson v. Cooley, 142 F.3d 181, 186* (citing *Duggin v. Adams, 234 Va. 221, 360 S.E.2d 832, 836, 4 Va. Law Rep. 820 (Va. 1987)*).

At least some of the conduct alleged by Plaintiffs in their complaints qualifies as improper interference under the law of each of these states. For instance, all Plaintiffs allege that Defendants made misrepresentations about Plaintiffs' integrity and the quality of their work. Making false and disparaging statements about another's business is tortious in and of itself, and such conduct, if properly alleged, should survive a motion to dismiss in states that follow the Restatement as well as states that use an improper means test.

HN35[] Other states cast the impropriety requirement in terms of "justification" or "privilege." Some Pennsylvania courts list "the absence of privilege or justification on the part of the Defendant" among the elements for the tort, see, e.g., *Foster, 2 A.3d at 655*, although it appears that a showing of impropriety based on the Restatement factors

---

[20] The factors are: (a) the nature of the actor's conduct, (b) the actor's motive, (c) the interests of the other with **[*471]** which the actor's conduct interferes, (d) the interests sought to be advanced by the actor, (e) the social interests in protecting the freedom of action of the actor and the contractual interests of the other, (f) the proximity or remoteness of the actor's conduct to the interference, and (g) the relations between the parties. Id.

would satisfy **[*472]** this element, see *Adler, Barish, Daniels, Levin & Creskoff v. Epstein, 482 Pa. 416, 393 A.2d 1175, 1184 (Pa. 1978)* (using Restatement factors for determining whether conduct is "improper" to evaluate whether conduct is privileged).

HN36[] Under Illinois law, a party acting "to enhance its own business interests ... has a privilege to act in a way that may harm the business expectancy of others." *Curt Bullock Builders, Inc. v. H.S.S. Development, Inc., 225 Ill. App. 3d 9, 586 N.E.2d 1284, 1290, 167 Ill. Dec. 12 (Ill. App. 4th Dist. 1992)*. In Illinois, the privilege to interfere is greater with respect to prospective contracts than it is with respect to existing contracts. Id. Still, acts taken pursuant to the privilege must take a socially sanctioned form. *Miller v. Lockport Realty Group, Inc., 377 Ill. App. 3d 369, 878 N.E.2d 171, 176, 315 Ill. Dec. 945 (Ill. App. 1st Dist. 2007)*. Under Illinois law, privilege is an affirmative defense. *General Motors Corp. v. State Motor Vehicle Review Board, 224 Ill. 2d 1, 862 N.E.2d 209, 220, 308 Ill. Dec. 611 (Ill. 2007)*. By contrast, Missouri requires a plaintiff to "produce substantial evidence to establish lack of justification," a burden which is met if "the defendant act[ed] with an improper purpose and s[ought] not only to further his own interests, but in doing so employs improper means." *Community Title Co., 796 S.W.2d at 372*.

HN37[] Under Pennsylvania, Illinois and Missouri law, well-pled allegations that Defendants made false and defamatory statements about Plaintiffs' businesses should be sufficient to survive a motion to dismiss. See *Topper v. Midwest Division, Inc., 306 S.W.3d 117, 126 (Mo. App. W. Dist. 2010)* ("Misrepresentations and defamation certainly constitute improper means that serve to destroy any justification the defendants had."); *Soderlund Bros., Inc. v. Carrier Corp., 278 Ill. App. 3d 606, 663 N.E.2d 1, 10, 215 Ill. Dec. 251* ("As noted **[*473]** above, acts of competition which are never privileged include fraud, deceit, intimidation or deliberate disparagement.").

HN38[] Alabama uniquely includes an element that the defendant be "a stranger" to the interfered-with relationship. *White Sands Group, L.L.C. v. PRS II, LLC, 32 So.3d 5, 14 (Ala. 2009)*. "'One is not a stranger to the contract just because one is not a party to the contract.'" *Tom's Foods, Inc. v. Carn, 896 So.2d 443, 454 (Ala. 2004)* (quoting *Atlanta Market Center Mgmt. Co. v. McLane, 269 Ga. 604, 503 S.E.2d 278, 282 (Ga. 1998))*. If the parties are part of "a comprehensive interwoven set of contracts," they are not strangers. *Id. at 454-55*.[21] All of the Defendants argue that they are not strangers to the relationships between Plaintiffs and the insureds and claimants whose vehicles Plaintiffs repaired (Case No. 6:14-cv-6009, Doc. 23 at 23-24, Doc. 24 at 9-12). The Non-GEICO Defendants cite *Kirby's Spectrum Collision, Inc. v. Gov't Employees Ins. Co., 744 F. Supp. 2d 1220 (S.D. Ala. 2010)*, where a federal district court in Alabama rejected a tortious interference claim materially indistinguishable from the claim asserted by the Alabama Plaintiffs on the ground that an insurer was not a stranger to the relationship between the body shop and the insurer's insureds and third-party claimants. *Id. at 1234-36*. The Alabama Plaintiffs do not respond to this argument or address the stranger requirement in their brief. I agree with the analysis of Alabama law in *Kirby's Spectrum Collision* and recommend dismissal **[*474]** of the tortious interference claim in the Alabama case on this basis.

2. Prospective Contractual Relationship

Another point of difference between the laws of the different states is the level of specificity and certainty required before a prospective contractual relationship will be protected from interference. ***HN39***[] Arizona, Michigan, and Illinois allow a plaintiff to state a claim for tortious interference with prospective contractual relationships based on interference with an identifiable class of customers. *Dube v. Likins, 216 Ariz. 406, 167 P.3d 93, 101 (Ariz. App. 2007)*; *Lucas v. Monroe County, 203 F.3d 964, 979 (6th Cir. 2000)* (citing *Schipani v. Ford Motor Co., 102 Mich. App. 606, 302 N.W.2d 307, 314 (Mich. App. 1981))*; *Downers Grove Volkswagen, Inc. v. Wigglesworth Imports, Inc., 190 Ill. App. 3d 524, 546 N.E.2d 33, 37, 137 Ill. Dec. 409 (Ill. App. 2d Dist. 1989)*. By contrast, Washington expressly requires specific, identifiable third parties, *Pacific Northwest, 144 P.3d at 281* & n. 2, and Virginia requires a "*specific, existing* contract or business expectancy," *Masco Contractor Services East, Inc. v. Beals, 279 F. Supp. 2d 699, 709 (E.D. Va. 2003)* (emphasis in original).[22] Alabama law requires "the existence of a protectable

---

[21] Alabama also recognizes an affirmative defense of justification in tortious interference cases, and a competitor's privilege to interfere. *White Sands, 32 So.3d at 12*; *Tom's Foods, 896 So.2d at 457-58*. However, the privilege does not allow the use of improper means. *Tom's Foods 896 So.2d at 458*.

business relationship," and there is no support in Alabama case law for "identifiable class" tortious interference claims. See *Hope for Families & Community Service, Inc. v. Warren, 721 F. Supp. 2d 1079, 1185-88 (M.D. Ala. 2010)*; *Pouncy v. Vulcan Materials Co., 920 F. Supp. 1566, 1585 (N.D. Ala. 1996)*. In the remaining states, the situation is less clear, as there is either no or very limited **[*475]** case law on the issue, or the parties cite conflicting cases.

3. Group Pleading

Even in those states that allow a plaintiff to establish a claim for tortious interference with business relationships or prospective economic advantage based on interference with an identifiable class of customers, rather than specific customers, a plaintiff must still plead the claim with sufficient **[*476]** factual detail to satisfy the requirements of *Rule 8(a)*. For the reasons I have already explained, all of the Plaintiffs' complaints fall short of this standard because they attribute "'allegations of wrongdoing ... collectively to every Defendant.'" Supra, Part III.A (quoting Case No. 6:14-cv-310, Doc. 110 at *2). ***HN40***[] Absent well pled allegations that the Defendants joined in a conspiracy or acted in concert, liability for tortious interference must be established on an individualized basis. As the Court explained in its Orders dismissing the Tennessee, Utah, and Louisiana actions, "[a] general allegation that some unidentified Defendants—or all Defendants—interfered with some unidentified customers of some unnamed Plaintiff does not satisfy the requirements of *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 173 L.Ed.2d 868 (2009)*." *Brewer Body Shop, __ F. Supp. 3d at __, 2015 U.S. Dist. LEXIS 54836, 2015 WL 1911418, at *1*; *Alpine Straightening Systems, 2015 U.S. Dist. LEXIS 56562, 2015 WL 1911635, at *1*; *Parker Auto Body, Case No. 6:14-cv-6004, Doc. 118 at 3, 2015 U.S. Dist. LEXIS 56451*; *Southern Collision, 2015 U.S. Dist. LEXIS 54854, 2015 WL 1911768, at *1*. Because none of the Plaintiffs have adequately pled their tortious interference claims, I recommend the Court dismiss all of these claims.

4. Particularized Pleading

In several cases, Defendants argue that Plaintiffs' tortious interference claims should be dismissed because Plaintiffs allege Defendants made misrepresentations but do not plead any misrepresentations with particularity. **[*477]** I disagree. ***HN41***[] *Rule 9(b)* provides, "In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." Fraud requires more than misrepresentation, and *Rule 9(b)* will not be triggered simply because the plaintiff alleges that the defendant said something that was not true. Falsity is also a required element in defamation cases, but defamation need not be pled with particularity under *Rule 9(b)*. *Caster v. Hennessey, 781 F.2d 1569, 1570 (11th Cir. 1986)* (per curiam); *Wenner v. Bank of America, NA, 637 F. Supp. 2d 944, 954 (D. Kan. 2009)*; *Banco Surinvest, S.A. v. Suntrust Bank, Alberta, 78 F. Supp. 2d 1366, 1370-71 (N.D. Ga. 1999)*. Similarly, tortious interference claims based on a defendant's allegedly false and disparaging statements to prospective customers are not subject to *Rule 9(b)*. *Banco Surinvest, 78 F. Supp. 2d at 1371*.

In the Michigan case, Defendants argue that state law requires Plaintiffs to plead "'with specificity[] affirmative acts by the defendant that corroborate the improper motive of the [tortious] interference.'" (Case No. 6:14-cv-6007, Doc. 36 at 15 (quoting *Nicklas v. Green Green & Adams, P.C., No. 299054, 2012 Mich. App. LEXIS 1087, 2012 WL 2126066 (Mich. App. Jun. 12, 2012))*). Any "heightened pleading standard" applied by Michigan courts to tortious interference claims is inapplicable in this Court, where *Rules 8* and *9 of the Federal Rules of Civil Procedure* control. *Caster, 781 F.2d at 1570* (citing *Hanna v. Plumer, 380 U.S. 460, 85 S. Ct. 1136, 14 L. Ed. 2d 8 (1965))*.

---

[22] Plaintiff cites *AWP, Inc. v. Commonwealth Excavating, Inc., No. 5:13cv031, 2013 U.S. Dist. LEXIS 103881, 2013 WL 3830500, at *8 (W.D. Va. 2013)*, in support of its argument that it can plead a tortious interference claim by alleging nothing more than interference with its customer base generally. In AWP, the plaintiff alleged that the defendant poached four "specific customers" with whom the plaintiff expected to reach an agreement. All Plaintiffs have offered in these cases are general allegations that Defendants interfered with a broadly defined class of potential customers. Indeed, the facts of this case are much closer to those in the case the AWP court distinguished. Like the plaintiff in *Gov't Employees Ins. Co. v. Google, 330 F. Supp. 2d 700 (E.D. Va. 2004)*, the Virginia Plaintiffs' tortious interference claim is "founded upon mere speculation that some unidentified potential ... customers" might take their business elsewhere. *AWP, 2013 U.S. Dist. LEXIS 103881, 2013 WL 3830600, at *8* (citing *GEICO 330 F. Supp. 2d at 705-06*).

G. Quasi-Estoppel

Plaintiffs in 12 cases assert claims for "Quasi Estoppel,"[23] "Estoppel/Quasi-Estoppel,"[24] or "Equitable Estoppel."[25] Defendants uniformly argue that these claims should be dismissed because, **[*478]** while many of these states recognize the doctrine of quasi-estoppel, none recognize it as an independent cause of action. No Plaintiff—in these 14 cases or the other seven in which the Court has already ruled on motions to dismiss—has identified a single case holding that quasi-estoppel is recognized as a cause of action in any jurisdiction.

The New Jersey Plaintiffs argue that New Jersey courts "have long permitted parties to assert quasi-estoppel offensively as both a claim and a counterclaim." (Case No. 6:14-cv-6013, Doc. 41 at 16). In support of this assertion, they point to *Kazin v. Kazin, 81 N.J. 85, 405 A.2d 360 (N.J. 1979)*, *Green v. State Health Benefits Commission, 373 N.J. Super. 408, 861 A.2d 867 (N.J. App. Div. 2004)*, and *Gilbert v. Durand Glass Manufacturing Co., 258 N.J. Super. 320, 609 A.2d 517 (N.J. App. Div. 1992)*. Kazin was a divorce case in which the wife sought alimony and equitable distribution or, in the alternative, separate maintenance. *405 A.2d at 361*. The husband defended that the parties were not lawfully married because his wife's prior Mexican divorce was invalid. Id. The New Jersey court held that the husband was estopped from making this claim because he played an active role in helping his wife obtain the Mexican divorce. *Id. at 367*. Thus, in *Kazin*, the Court allowed quasi-estoppel not as an independent cause of action, but simply to prevent a party from taking a position inconsistent with his prior conduct. Gilbert, was an "employment wrongful discharge action," *609 A.2d at 518*, and Green was an "appeal [of] a final determination of" a state agency regarding the scope of coverage under a health insurance plan issued to state employees, *861 A.3d at 868*. These cases do not support the New Jersey Plaintiffs' **[*480]** claim that quasi-estoppel is a free-standing cause of action under New Jersey law.

The Pennsylvania Plaintiffs suggest that a federal district court in their state "inchoately accepted" quasi-estoppel as a cause of action in *Sheehan v. Mellon Bank, N.A., Civ. No. 95-2969, 1996 U.S. Dist. LEXIS 14725, 1996 WL 571779 (E.D. Pa. Oct. 3, 1996)*, by dismissing "a claim for quasi-estoppel ... not because the claim was invalid but because the defendant had never occupied inconsistent positions." (Case No. 6:14-cv-6008, Doc. 95 at 16) In reality, the Sheehan court dismissed a § 1983 claim, not a claim for quasi-estoppel.

The Pennsylvania Plaintiffs argue that the Court should allow their quasi-estoppel claim because Pennsylvania has recognized a cause of action for promissory estoppel. ***HN42***[] "Promissory estoppel" is the term many courts use to describe the doctrine that is recognized in the *Restatement (Second) of Contracts § 90(1)*. *Restatement § 90* provides that "[a] promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance is binding if injustice can be avoided only by enforcement of the promise." Every state with the exception of Virginia, see *W.J. Schafer Assocs., Inc. v. Cordant, Inc., 254 Va. 514, 493 S.E.2d 512, 516 (Va. 1997)*, has recognized a cause of action under the circumstances described in *§ 90*. But, Plaintiffs still have not identified **[*481]** a single state that recognizes a free-standing cause of action for quasi-estoppel. This may be because promissory estoppel lends itself to enforcement as a cause of action in a way quasi-estoppel does not, because promissory estoppel involves the enforcement of a promise, while quasi-estoppel merely operates to prevent an opposing party from taking a particular position.

---

[23] Count V in Case No. 6:14-cv-6006; Count IV in Case No. 6:14-cv-6007; Count IV in Case No. 6:14-cv-6011; Count III in Case No. 6:14-cv-6012 and 6:14-cv-6013; the "Second Claim for Relief" in Case No. 6:14-cv-6014; and Count III in Case No. 6:14-cv-6019.

[24] Count IV in Case No. 6:14-cv-6008 and 6:14-cv-6020; Count IV in Case No. 6:14-cv-6009; and the first of two counts numbered "Count VI" in Case No. 6:14-cv-6018.

[25] Count V in Case No. 6:15-cv-6022. Although the Missouri Plaintiff entitles this Count as one for "Equitable Estoppel," it refers to the doctrine of "quasi-estoppel" in the body of the complaint (Doc. 1, ¶ 137) and calls the claim one for "quasi-estoppel" in its response to the motions to dismiss and does not attempt to rebut Defendants' arguments that "equitable estoppel" is not a cause of action under Missouri law (Doc. 64 at 14). The Court **[*479]** will assume the Missouri Plaintiff meant to allege a claim for quasi-estoppel.

Finally, Plaintiffs in several cases argue that the Court should recognize a cause of action for quasi-estoppel because no state-court precedent holds that it is not a cause of action. The Court should decline this invitation. ***HN43***[] Federal courts deciding state-law claims "are supposed to apply state law, not rewrite it." *Bonney v. Canadian Nat'l Ry., 800 F.2d 274, 280 (1st Cir. 1986)*; see also *Wolk v. Saks Fifth Avenue, Inc., 728 F.2d 221, 223 (3d Cir. 1984)* ("While a federal court must be sensitive to the doctrinal trends of the jurisdiction whose law it applies, it is beyond the authority of a federal court in such circumstances to create entirely new causes of action.").

After due consideration, I conclude that the laws of Arizona, Michigan, Pennsylvania, Alabama, Illinois, New Jersey, Oregon, Kentucky, Virginia, and Missouri do not recognize quasi-estoppel as a cause of action. Therefore, I recommend that these claims be dismissed with prejudice. **[*482]**

H. Conversion

In nine cases, Plaintiffs have asserted claims for conversion.[26] Defendants argue that all of these claims should be dismissed because none of the applicable states recognize a conversion claim for failure to pay an ordinary debt. In all but two cases, Plaintiffs concede that their conversion claims should be dismissed.[27]

The Michigan Plaintiffs assert three distinct conversion claims for "Common Law Conversion of Profits,"[28] "Statutory Conversion of Profits,"[29] and "Common Law Conversion of Business."[30] Defendants argue that these conversion claims must fail because the failure to pay **[*483]** a debt does not amount to conversion, and the Michigan Plaintiffs have failed to identify the specific money or property Defendants allegedly converted (Case No. 6:14-cv-6009, Doc. 36, at 18-19). The Michigan Plaintiffs make no counterarguments. Instead, they suggest the Court should "decline to address" the conversion claims "at this time" because the Michigan Supreme Court recently heard oral argument in a case addressing "the parameters of claims in conversion." (Case No. 6:14-cv-6009, Doc. 38 at 17); see also *Aroma Wines & Equipment, Inc. v. Columbia Distribution Services, Inc., 497 Mich. 864, 852 N.W.2d 901 (Mich. 2014)* (order granting leave to appeal). Delaying resolution of the pending motions while the Michigan Supreme Court makes a decision would not further the just, speedy, and efficient resolution of this case. The conversion claims asserted by the Michigan Plaintiffs should be dismissed.

The California Plaintiffs emphasize the broad scope of conversion claims under California law (See Case No. 6:14-cv-6010, Doc. 22 at 16 (quoting *Welco Electronics, Inc. v. Mora, 223 Cal. App. 4th 202, 211, 166 Cal. Rptr. 3d 877 (2014)*, for the proposition that "every intangible benefit and prerogative susceptible of possession" may be the subject of a conversion claim)). However, ***HN44***[] California **[*484]** only recognizes claims for the conversion of money when "there is a specific, identifiable sum involved." *PCO, Inc. v. Christensen, Miller, Fink, Jacobs, Glaser, Weil & Shapiro, LLP, 150 Cal. App. 4th 384, 395, 58 Cal. Rptr. 3d 516 (2007)*. Under California law, "[a] 'generalized claim for money [is] not actionable as conversion.'" Id. (quoting *Vu v. California Commerce Club, Inc., 58 Cal. App. 4th 229, 235, 68 Cal. Rptr. 2d 31 (1997))*. The California "Plaintiffs are seeking sums that they believe should have been paid to them, not specific money of which they have been deprived or that could be returned, as required to state a claim for conversion." *A & E Auto Body, 2015 U.S. Dist. LEXIS 16153, 2015 WL 304048, at *9*.

The California Plaintiffs note that California law imposes a statutory repairman's lien on repaired vehicles, and they suggest that "[b]y parity of reasoning..., the Plaintiff shops have at least an equitable claim to a lien on the funds or

[26] Count VI in Case No. 6:14-cv-6006; Counts VI—VIII in Case No. 6:14-cv-6007; Count VI in Case No. 6:14-cv-6008 and 6:14-cv-6020; Count VI in Case No. 6:14-cv-6009; Count III in Case No. 6:14-cv-6010; the ninth unnumbered count in Case No. 6:14-cv-6015; the second "Count VI" in Case No. 6:14-cv-6018; and Count VI in Case No. 6:14-cv-6022.

[27] See Case No. 6:14-cv-6006, Doc. 77 at 16; Case No. 6:14-cv-6008, Doc. 95 at 22; Case No. 6:14-cv-6020, Doc. 25 at 22; Case No. 6:14-cv-6009, Doc. 26 at 16; Case No. 6:14-cv-6015, Doc. 22 at 15; Case No. 6:14-cv-6018, Doc. 116 at 25; Case No. 6:15-cv-6022, Doc. 64 at 15.

[28] Count VI in Case No. 6:14-cv-6007.

[29] Count VII in Case No. 6:14-cv-6007.

[30] Count VIII in Case No. 6:14-cv-6007.

policy reserves in the accounts of the Defendant Insurers." (Case No. 6:14-cv-6010, Doc. 22 at 16). "If performance of repairs ... created a property interest in funds held in insurance company bank accounts, one would expect such an interest to ... be set out in some statute," like the repairman's lien, "or at least in some judicial decision." *Alpine Straightening Systems, 2015 U.S. Dist. LEXIS 56562, 2015 WL 1911635, at *8 n. 4*. Therefore, I recommend that the conversion claim in the California case be dismissed.

I. Insufficient Payment Claims

Plaintiffs in the Michigan,[31] Pennsylvania,[32] Alabama,[33] and Illinois[34] **[*485]** actions allege that Defendants breached their legal obligation to pay for repairs "[t]hrough intimidation, coercion, collusion, boycotts, and simple flat refusal." (Case No. 6:14-cv-6007, Doc. 1, ¶ 118; Case No. 6:14-cv-6008, Doc. 1, ¶ 142; Case No. 6:14-cv-6020, Doc. 1, ¶ 76; Case No. 6:14-cv-6009, Doc. 1, ¶ 126; Case No. 6:14-cv-6011, Doc. 1, ¶ 146). "Specifically," Plaintiffs aver,

> the Defendants have failed to provide the necessary proper and fair repairs through:
>
> a. Refusal to pay and/or fully pay for necessary and required procedures and processes to return a vehicle to its pre-accident condition;
>
> b. Utilizing used and/or recycled parts in contravention of the repair shops' expert professional opinion in order to save money and thereby compromising the safety of both the driver and passengers as well as all other members of the traveling public; and
>
> c. Requiring shops to purchase replacement parts of unknown manufacture, reliability, and/or quality merely because it is the least expensive option.

(Id.).

The Michigan Defendants seek dismissal of this claim because Plaintiffs **[*486]** have not identified the source of the alleged legal obligation. In their response, the Michigan Plaintiffs assert that "Defendants have a duty and obligation to pay for the repairs to the vehicles of their respective insureds and claimants so as to return those vehicles to pre-accident condition." (Id., Doc. 38 at 17). Tellingly, the Michigan Plaintiffs still have not identified the source of this alleged duty, and they do not cite any authority suggesting that Michigan law recognizes a cause of action for breach of an unspecified legal duty. Therefore, I recommend the Court dismiss Count I in the Michigan case.

The Pennsylvania Plaintiffs allege that Defendants violated regulations promulgated by the Pennsylvania Insurance Commissioner pursuant to the Commissioner's authority to enforce the Pennsylvania Unfair Insurance Practices Act ("UIPA"), *40 Pa. Stat. § 1171.1 et seq.*[35] See also *31 Pa. Code § 146.8*. Defendants argue that there is no private right of action under the UIPA. In their response, the Pennsylvania Plaintiffs do not contend that there is a private right of action to enforce the UIPA or its implementing regulations. Instead, they argue that violations of those statutes may provide the basis for a cause **[*487]** of action under the Pennsylvania Unfair Trade Practices and Consumer Protection Law (Case No. 6:14-cv-6008, Doc. 95 at 8-9). After due consideration, I find that ***HN45***[] the UIPA does not afford a private right of action to the Pennsylvania Plaintiffs, and recommend that Count I in the Pennsylvania cases.

The Alabama Plaintiffs withdrew their claim after Defendants filed their motion to dismiss (Case No. 6:14-cv-6009, Doc. 26 at 5). Accordingly, I recommend the Court dismiss Count I in the Alabama case.

---

[31] Count I in Case No. 6:14-cv-6007, entitled "Defendants Have Breached Their Legal Obligation."

[32] Count I in Case No. 6:14-cv-6008 and 6:14-cv-6020, entitled "Defendants Have Breached Their Statutory Obligation."

[33] Count I in Case No. 6:14-cv-6009, entitled "Defendants Have Breached Their Statutory and Regulatory Obligation."

[34] Count I in Case No. 6:14-cv-6011, entitled "Defendants Have Breached Their Statutory Obligation."

[35] Plaintiffs also cite the Pennsylvania Motor Vehicle Physical Damage Appraiser Act in their complaints, but do not allege a violation of the statute (See Case No. 6:14-cv-6008, Doc. 1, ¶ 141; Case No. 6:14-cv-6020 Doc. 1, ¶ 75).

In their complaint, the Illinois Plaintiffs actually cite two separate statutes, which presumably provide the source of the obligation Defendants allegedly breached. Plaintiffs cite *§ 2* of the Illinois Consumer Fraud Act ("ICFA"), *815 ILCS 505/2*, which prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices" including practices defined as "deceptive" under *§ 2* of the Illinois Uniform Deceptive Trade Practices Act ("IUDTPA"), *815 ILCS 510/2*. ***HN46***[] Illinois does not recognize a free-ranging **[*488]** private right of action to enforce statutory duties; rather, the existence of such a claim depends on the particular statute. See *Fisher v. Lexington Health Care, Inc., 188 Ill. 2d 455, 722 N.E.2d 1115, 1117-18, 243 Ill. Dec. 46 (Ill. 1999)* (setting forth factors used by Illinois courts to determine when a private right of action should be implied in a statute). The Illinois Plaintiffs' decision to label this claim as one for "breach[]" of "statutory obligation" is difficult to understand given that both the ICFA and IUDTPA expressly authorize civil suits by private parties. See *815 ILCS 505/10a* (allowing "[a]ny person who suffers actual damage" as a result of a violation of the ICFA to sue damages); *815 ILCS 510/3* (allowing "[a] person likely to be damages by a deceptive trade practice" to sue for an injunction). ***HN47***[] As a general matter, when a law expressly provides for a cause of action, courts will not imply one in order to expand the legislature's chosen remedial scheme. Cf. *In re D.W., 214 Ill. 2d 289, 827 N.W.2d 466, 479, 292 Ill. Dec. 937 (Ill. 2005)* (noting that "where the legislature has expressly provided a private right of action in a specific section of a statute, the legislature did not intend to imply private rights of action to enforce other sections of the same statute"); *Fleischmann Distilling Corp. v. Maier Brewing Co., 386 U.S. 714, 720, 87 S. Ct. 1404, 18 L. Ed. 2d 475 (1967)* ("When a cause of action has been created by a statute which expressly provides the remedies for vindication of the cause, **[*489]** other remedies should not readily be implied."); *Baptist Health v. Murphy, 2010 Ark. 358, 373 S.W.2d 269, 288 (Ark. 2010)* ("Where there is a statute enacted by the General Assembly that purports to give plaintiffs a private cause of action, the remedy is limited to what the statute expressly provides.").

HN48[] The elements of an ICFA claim are: (1) a deceptive or unfair act or practice by the defendant; (2) made during a course of conduct involving trade or commerce; (3) made with the intent that the plaintiff rely on the deceptive or unfair practice; (4) causation; and (5) damages. See *Avery v. State Farm Mutual Auto. Ins. Co., 216 Ill. 2d 100, 835 N.E.2d 801, 850, 296 Ill. Dec. 448 (Ill. 2005)*; *Rob Siegel v. Shell Oil Co., 612 F.3d 932, 934 (7th Cir. 2010)* (citing *Robinson v. Toyota Motor Credit Corp., 201 Ill. 2d 403, 775 N.E.2d 951, 960, 266 Ill. Dec. 879 (Ill. 2002))*. The ICFA proscribes two kinds of practices: those that are "unfair," and those that are "deceptive." A plaintiff may state a claim under the ICFA's "unfair" prong without alleging that the conduct is deceptive. *Id. at 935* (citing *Saunders v. Michigan Avenue Nat'l Bank, 278 Ill. App. 3d 307, 662 N.E.2d 602, 608, 214 Ill. Dec. 1036 (1996))*. The IUDTPA, by contrast, only outlaws "deceptive" practices, that is, practices that "create[] a likelihood of confusion or misunderstanding." *815 ILCS 510/2(a)*.

The Illinois Plaintiffs have failed to state a claim under ICFA's "deceptive" prong or under IUDTPA because they have failed to allege that Defendants engaged in any deceptive act or practice. The conduct that forms the basis for this claim—namely, "fail[ing] to provide ... necessary ... repairs" through refusing **[*490]** to pay for "procedures" necessary "to return a vehicle to its pre-accident condition," requiring shops to use used or recycled products, and requiring shops to purchase parts "of unknown manufacturer, reliability, and/or quality"—is not "deceptive" in any relevant sense. In their response, Plaintiffs belatedly refer to paragraphs in their complaint that allege steering, but these allegations should have at least been referenced in the allegations under this particular count.

To the extent the Illinois Plaintiffs intended to assert an ICFA "unfair" practice claim, it must be dismissed for improper group pleading. Plaintiffs have not pled facts raising a plausible inference that Defendants conspired with each other or acted in concert, and absent such allegations, liability for ICFA violations must be established on an individualized basis. If they choose to raise a count based on the ICFA or IUDTPA in an amended complaint, then to avoid unnecessary confusion the Illinois Plaintiffs should identify the statute they are suing under.

J. State Laws Banning Unfair Trade Practices and Unfair Competition

1. California Unfair Competition Law

The California Plaintiffs have brought a claim under **[*491]** their state's Unfair Competition Law ("UCL").[36] As its name suggests, ***HN49***[] the law proscribes "unfair competition," which is defined as "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. The California Plaintiffs identify the following practices which they allege are unfair or unlawful under the UCL: the DRP surveys, the suppression of labor rates, suppression of repair and material costs, steering, and "making an end-run around the 1963 Consent Decree." (Case No. 6:14-cv-6010, Doc. 1, ¶ 123).

HN50[] The UCL allows any "person who has suffered injury in fact and has lost money or property as a result of ... unfair competition," to bring a civil action against the person or persons engaged in the unfair competition. Id. *§§ 17203*, *17204*. A court may enjoin violations of the UCL and order restitution. Id. *§ 17203*; *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 63 P.3d 937, 947-48, 131 Cal. Rptr. 2d 29 (Cal. 2003)*. But, the UCL "is not an all-purpose substitute for a tort or contract action," and does not allow a plaintiff to recover monetary damages. *Cortez v. Purolator Air Filtration Products Co., 23 Cal. 4th 163, 96 Cal. Rptr. 2d 518, 999 P.2d 706, 712 (Cal. 2000)*.

HN51[] Under the UCL, statutory unfair competition may take one of three forms: **[*492]** unlawful, unfair, or fraudulent. See *Zhang, 304 P.3d at 174*. The California Plaintiffs do not allege that Defendants' conduct was fraudulent within the meaning of the UCL (see Case No. 6:14-cv-6010, Doc. 1, ¶ 124 (alleging that "Defendants' acts or practices are unlawful and unfair")). Accordingly, I will limit my discussion to the unlawful and unfair prongs.

HN52[] "By proscribing 'any unlawful' business act or practice, the UCL 'borrows' rules set out in other laws and makes violations of those rules independently actionable." *Id. at 167* (quoting *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 561 (Cal. 1999))*. "An unlawful act is one 'forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made.'" *In re Pomona Valley Medical Group, Inc., 476 F.3d 665, 674 (9th Cir. 2007)* (quoting *Saunders v. Superior Court, 27 Cal App 4th 832, 838, 33 Cal. Rptr. 2d 438 (Cal. App. 1994))*. As a general matter, a UCL claim may be based on a violation of a law that itself provides no private right of action. See, e.g., *Rose v. Bank of America, N.A., 57 Cal. 4th 390, 159 Cal. Rptr. 3d 693, 304 P.3d 181 (Cal. 2013)* (violation of federal Truth in Savings Act); *Stop Youth Addiction, Inc. v. Lucky Stores, Inc., 17 Cal. 4th 553, 71 Cal. Rptr. 2d 731, 950 P.2d 1086 (Cal. 1998)* (violation of state criminal law), superseded by statute on other grounds as stated in, *Arias v. Superior Court, 46 Cal. 4th 969, 95 Cal. Rptr. 3d 588, 209 P.3d 923 (Cal. 2009)*. However, in Zhang, a majority of the California Supreme Court held that UCL claims may not "rest exclusively on" violations of the California Unfair Insurance Practices Act ("UIPA"), *Cal. Ins. Code. § 790 et seq. 304 P.3d at 176*.

Although the California Plaintiffs allege that Defendants engaged **[*493]** in "unlawful" practices, they do not—either in their complaint or their response to the motions to dismiss—tether their UCL claim to any particular law Defendants allegedly violated.[37] The alleged Sherman Act violations cannot support an "unlawful"-act-or-practice UCL claim because the California Plaintiffs failed to adequately plead that any Defendant violated the Sherman Act. And, the California UIPA, which Plaintiffs cite elsewhere in their memorandum, cannot alone furnish the basis for a UCL claim. *Zhang, 304 P.3d at 176*. Therefore, I find that the California Plaintiffs have failed to adequately plead that Defendants engaged in an "unlawful act or practice" within the meaning of the UCL.

HN53[] Even if an act or practice is not prohibited by another statute, it may still qualify as "unfair competition" under the "unfair" or "fraudulent" prongs of the UCL. *Cel-Tech, 973 P.2d at 540*. "In permitting the restraining of all 'unfair' business practices," the UCL "undeniably **[*494]** establishes only a wide standard to guide the courts of equity." *Barquis v. Merchants Collective Ass'n, 7 Cal. 3d 94, 101 Cal. Rptr. 745, 496 P.2d 817, 830 (Cal. 1972)*. "[G]iven the creative nature of the scheming mind, the Legislature evidently concluded that a less inclusive standard

---

[36] Count IV in Case No. 6:14-cv-6010.

[37] While a Plaintiff are not required to "'set out a legal theory for [their] claim for relief,'" *Johnson v. City of Shelby, Miss., 135 S. Ct. 346, 347, 190 L. Ed. 2d 309 (2014)* (quoting 5 Wright & Miller, FEDERAL PRACTICE & PROCEDURE § 1219), they cannot hide the ball indefinitely and expect the Court to search for an unspecified statute the Defendants violated.

would not be adequate." Id. While the scope of this provision "is sweeping, it is not unlimited," and "[c]ourts may not simply impose their own notions of the day as to what is fair or unfair." *Cel-Tech, 973 P.3d at 541*. In Cel-Tech, the California Supreme Court articulated a standard for "unfairness" under the UCL:

> ***HN54***[] When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *section 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Id. at 544. The Cel-Tech court said in a footnote that this test was limited to the context of UCL actions brought "by competitors alleging anticompetitive practices." *Id. at 544 n. 12*. In Zhang, the court observed that "[t]he standard for determining what business acts or practices are 'unfair' in consumer actions under the UCL is currently unsettled." **[*495]** *Id. at 174 n. 9*; see also *In re Adobe Systems, Inc. Privacy Litig., 66 F. Supp. 3d 1197, 2014 WL 4379916, at *17 (N.D. Cal. 2014)* (noting that definition of "unfair" is "in flux" in California courts and identifying two tests for whether conduct is "unfair" in consumer UCL actions).

The California Plaintiffs are not "consumers" or "competitors" of the Defendant insurance companies; rather, they are businesses in one industry (automotive repair) alleging harm caused by anticompetitive practices in another industry (insurance). This makes it even less clear what test the Court should apply to determine whether a practice is unfair. Eventually, the Court may reach this issue. For now, I find that the California Plaintiffs' UCL claim must be dismissed based on their use of group pleading, and because they have failed to allege the existence of any agreement or conspiracy or common scheme that would provide some connection between the conduct of the different Defendants. Therefore, like their tortious interference claims, the California Plaintiffs' collective allegations in their UCL count are insufficient to survive a motion to dismiss.

2. Oregon Unfair Trade Practices Act

The Oregon Plaintiff alleges that Defendants violated the Oregon Unfair Trade Practices Act ("OUTPA") "by making false and disparaging **[*496]** comments to their insureds about Plaintiff's services."[38] This count must be dismissed because of Plaintiff's improper reliance on group pleading. As with the tortious interference claims, the Oregon Plaintiff attributes wrongdoing collectively to every defendant. And, as noted above, see supra Parts III.A, III.F.3, III.J.1, such collective allegations are insufficient to survive a motion to dismiss.

Defendants argue that this claim should be dismissed with prejudice because the Oregon Plaintiff is not a consumer of Defendants' products and therefore does not have "standing" to bring a claim under OUTPA. The GEICO Defendants ask for a fee award, on the grounds that Plaintiff lacked an objectively reasonable basis for bringing this claim (Case No. 6:14-cv-6014, Doc. 121 at 25). ***HN55***[] The statute does not expressly limit private claims to consumers, and no Oregon court has addressed whether a plaintiff must be a consumer to have standing under OUTPA. *CollegeNet, Inc. v. Embark.Com, Inc., 230 F. Supp. 2d 1167, 1172 (D. Or. 2001)*. However, the United States District Court for the District of Oregon has held in a number of cases that only "consumers" have standing under OUTPA. See, e.g., *Benson Tower Condominium Owners Ass'n v. Victaulic, 22 F. Supp. 3d 1126, 1136 (D. Or. 2014)*; *Volm v. Legacy Health Systems, 237 F. Supp. 2d 1166, 1175 (D. Or. 2002)*; *CollegeNet, 230 F. Supp. 2d at 1174*; *Oregon Laborers-Employers Health & Welfare Trust Fund v. Philip Morris, Inc., 17 F. Supp. 2d 1170, 1180 (D. Or. 1998)*. Most of these cases have **[*497]** construed the word "person" in OUTPA's civil remedy provision, *ORS § 646.638(1)* to mean "consumer." See, e.g., *Benson Tower, 22 F. Supp. 3d at 1135-36*; *CollegeNet, 230 F. Supp. 2d at 1172-75.*

I am not persuaded by the reasoning in these decisions for interpreting "person" to mean "consumer." ***HN56***[] "In interpreting a statute, the court's task is to discern the intent of the legislature." *Portland General Electric Co. v. Bureau of Labor & Indus. ("PGE"), 317 Ore. 606, 859 P.2d 1143, 1145 (Or. 1993)* (citing *ORS § 174.020*), superseded in part by statute as recognized in, *State v. Gaines, 346 Ore. 160, 206 P.3d 1042 (Or. 2009)*. In doing so, the court must apply the three-step process outlined in PGE, as modified in Gaines. See *Gaines, 206 P.3d at*

[38] The "Fourth Claim for Relief" in Case No. 6:14-cv-6014.

1050-51. Because the issue of standing under OUTPA is not necessary to resolve the motions to dismiss, I will not undertake a full-blown PGE-Gaines analysis in this report and recommendations. However, I will note several concerns I have with interpreting "person" to mean "consumer" in § 646.638(1), which lead me to recommend against dismissing this claim with prejudice.

First, when the legislature uses the same term throughout a statute, this "indicates that the term has the same meaning throughout the statute." *Atkinson v. Board of Parole & Post-Prison Supervision, 341 Ore. 382, 143 P.3d 538, 541 (Or. 2006)*. Under the interpretation of § 646.638(1) adopted in CollegeNet, the word "person" means two different things *in the same sentence*. OUTPA's civil remedies provision allows "a person" to sue "another **[*498]** person" for injuries to property caused by unfair trade practices, but no court has or ever would construe OUTPA to permit only suits by "a" consumer against "another" consumer.

Second, the laundry list of unfair trade practices identified in the statute includes unfair practices that harm business as much as or more than consumers. Unsolicited telephone calls and faxes, for example, inflict injury on businesses in the same manner as they do consumers. Cf. *ORS § 646.608(1)(ff)*, *(hh)—(jj)*. The most recent addition to the list of unfair trade practices—a ban on asserting bad faith infringement claims—almost exclusively harms businesses. *ORS § 646.608(1)(vvv)*; Or. Laws, ch. 19 § 2 (2014). A narrow, atextual construction of the word "person" as used in § 646.638(1) would seem to thwart the Oregon legislature's intent in adding these provisions to the unfair trade practices law.

Finally, ***HN57***[] the Oregon Supreme Court has cautioned against adopting narrowing constructions of statutorily defined terms, including the very term at issue here, based on conclusions about the statute's purpose drawn from legislative history. See *Hamilton v. Paynter, 342 Ore. 48, 149 P.3d 131 (2006)* (refusing to construe the word "person," as used in *ORS § 12.155*, to mean "insurer," given the general statutory definition of "person" in *ORS § 174.100(5)* as including **[*499]** "individuals, corporations, associations, firms, partnerships, limited liability companies and joint stock companies," unless "the context or a specifically applicable definition requires otherwise").

At the very least, whether a "person" must be a "consumer" to have standing under OUTPA is a much closer question than some of the case law suggests. And there certainly is no need to "mak[e] [an] unnecessary Erie 'guess[],'" *Keener v. Convergys Corp., 312 F.3d 1236, 1241 (11th Cir. 2002)*, before the Oregon Plaintiff has plausibly pled a "non-consumer" UTPA claim, assuming such a claim exists under Oregon law. Accordingly, I will not recommend dismissal with prejudice of Plaintiff's OUTPA claim for lack of standing. GEICO's request for attorney's fees should be denied because, as explained above, Plaintiff's reading of the statute is plausible (indeed, it may well be correct), and neither the Oregon Supreme Court nor the Oregon Court of Appeals has rejected that reading. Cf. *Mantia v. Hanson, 190 Ore. App. 412, 79 P.3d 404, 415 (Or. App. 2003)* (denying fee award under *§ 20.105* where Court of Appeals "had not conclusively determined" a key issue and that question "was unsettled and manifestly subject to reasonable dispute").

3. Washington Consumer Protection Law

The Washington Plaintiffs make a claim under the Washington Consumer Protection **[*500]** Act ("CPA"), WRC 19.86 et seq., alleging that Defendants engaged in unfair or deceptive acts or practices in violation of that statute.[39] ***HN58***[] *WRC 19.86.020* declares unlawful all "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." "Any person who is injured in his or her business or property by a violation of *WRC 19.86.020* ... may bring a civil action" for an injunction or damages. *WRC 19.86.090*. "[T]o prevail in a private CPA action ... a plaintiff must establish five distinct elements: (1) unfair or deceptive act or practice; (2) occurring in trade or commerce; (3) public interest impact; (4) injury to plaintiff in his or her business or property; and (5) causation." *Hangman Ridge Training Stables, Inc. v. Safeco Title Ins. Co., 105 Wn.2d 778, 719 P.2d 531, 533 (Wash. 1986)*.

---

[39] The fifth unnumbered count in Case No. 6:14-cv-6015.

HN59[] A plaintiff may establish the first two elements of a CPA claim in one of two ways: first, by showing that "(1) [the] act or practice ... has a capacity to deceive a substantial portion of the public [and] (2) has occurred in the conduct of any trade or commerce," or second, by showing that the defendant engaged in an act that the Washington legislature has defined to be a per se unfair trade practice. Hangman Ridge, 719 P.2d at 535-36. The Washington **[*501]** Plaintiffs allege that Defendants engaged in per se unfair and deceptive acts enumerated in the § 284-30-390 of the Washington Administrative Code, including

> (1) Failing to make a good faith effort to communicate with the repair facility chosen by the claimant.
> (2) Arbitrarily denying a claimant's estimate for repairs ... (b) If the insurer pays less than the amount of the estimate from the claimant's chosen repair facility, the insurer must fully disclose the reason or reasons it paid less than the claimant's estimate, and must thoroughly document the circumstances in its claim file.
> (4) Failing to prepare or accept an estimate provided by the claimant that will restore the loss vehicle to its condition prior to the loss.
> (6) Failing to consider any additional loss related damage the repair facility discovers during the repairs to the loss vehicle.

(Case No. 6:14-cv-6015, Doc. 1, ¶ 6.20). The Washington Plaintiffs aver that "Defendants' conduct alleged herein violates these regulations defining conduct that is per se unfair or deceptive violates [sic] the Consumer Protection Act." (Id. ¶ 6.21). Plaintiffs also assert that "Defendants' conduct alleged herein was unfair and deceptive and violative of the Consumer Protection Act." (Id. ¶ **[*502]** 6.22).

The Washington Plaintiffs' CPA claim fails for at least two reasons. First, the use of group pleading renders the claim insufficient. HN60[] As with tortious interference, liability under the CPA for the sort of conduct proscribed in § 284-30-390 of the Washington Administrative Code must be established on an individualized basis. Federal courts in Washington have dismissed CPA claims that improperly relied on group pleading, see, e.g., Stafford v. Sunset Mortgage, Inc., No. C12-1877MJP, 2013 U.S. Dist. LEXIS 61807, 2013 WL 1855743, at *3 (W.D. Wash. Apr. 29, 2013), and I recommend this Court do so here.

The Washington complaint is also "a model 'shotgun' pleading of the sort [the Eleventh Circuit] has been roundly, repeatedly, and consistently condemning for years, long before this lawsuit was filed." Davis v. Coca-Cola Bottling Co., 516 F.3d 955, 979 (11th Cir. 2008). In most (although not all) counts, Plaintiffs re-allege the preceding paragraphs, including those of the previously-stated counts, without specifying what allegations relate to what claims. While courts and opponents confronted with a shotgun pleading can usually discern which factual allegations relate to which counts, doing so requires the expenditure of time and effort that could be avoided by the filing of a properly framed pleading. The Washington CPA claim is remarkably opaque, even for a shotgun pleading. **[*503]**

It alleges, without offering any further detail, that "Defendants' conduct alleged herein was unfair and deceptive and violative of the Consumer Protection Act." (Case No. 6:14-cv-6015, Doc. 1, ¶ 6.22). Exactly what "conduct alleged herein" violates the CPA, the reader is left to wonder. Is it State Farm's refusal to "disclose any of the methods" it uses to conduct its survey and establish a "market rate"? (Case No. 6:14-cv-6015, Doc. 1, ¶ 5.17). Is it one or more unspecified Defendant's insistence on using "used and/or recycled parts" in repairs? (Id., ¶ 5.40). Does it refer to Defendants telling customers whether or not a shop is on a "preferred provider list"? (Id., ¶ 5.54). Or is it something else?

It is not the Court's job to search the complaint for facts that might support a particular claim for relief. "Judges are not like pigs, hunting for truffles buried in [complaints]." United States v. Dunkel, 927 F.2d 955, 956 (7th Cir. 1991). Nor, for that matter, is opposing counsel expected to sift through factual allegations like a prospector panning for gold. The Eleventh Circuit has made clear that HN61[] district courts can and should require a litigant who has filed an improper shotgun pleading to replead. United States ex rel. Atkins v. McInteer, 470 F.3d 1350, 1354 n. 6 (11th Cir. 2006). Therefore, I recommend the Court dismiss **[*504]** Plaintiffs' Washington CPA claim.

IV. Conclusion

Upon consideration of the foregoing, I respectfully recommend:

1. That all Defendants' motions to dismiss in the Pending Cases be **granted in part** and **denied in part**;

2. That the complaints in the Pending Cases be **dismissed**;

3. That the dismissals be without prejudice, except for Plaintiffs' claims for "Quasi-Estoppel," "Estoppel/Quasi-Estoppel," and "Equitable Estoppel."

4. That Plaintiffs be afforded 21 days in which to amend their complaints.

Specific written objections to this report and recommendations may be filed in accordance with *28 U.S.C. § 636*, and *M.D. Fla. R. 6.02*, within fourteen (14) days after service of this report and recommendations. Failure to file timely objections shall bar the party from a de novo determination by a district judge and from attacking factual findings on appeal.

RESPECTFULLY RECOMMENDED at Orlando, Florida on June 3, 2015.

/s/ Thomas B. Smith

LexisNexis® Headnotes

Torts > Intentional Torts > Invasion of Privacy > Appropriation

HN1[] **Invasion of Privacy, Appropriation**

Tennessee's common law acknowledges a property right in the use of one's name, photograph or likeness. In addition to the right of publicity under the common law, Tennessee provides statutory protection to that right. The Tennessee Legislature codified the right of publicity in 1984 when it enacted the Tennessee Personal Rights Protection Act (TPRPA). The TPRPA was intended to create an inheritable property right for those people who use their names or likenesses in a commercial manner, such as an entertainer or sports figure — someone who uses his or her name for endorsement purposes.

Torts > Intentional Torts > Invasion of Privacy > Appropriation

HN2[] **Invasion of Privacy, Appropriation**

At least two courts in Tennessee have indicated that the statutory and common law rights to publicity are co-extensive. Coextensive means extending over the same space or time; corresponding exactly in extent.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN3[] **Federal & State Interrelationships, Choice of Law**

The Tennessee Supreme Court has stated that when there is a conflict between the common law and a statute, the provisions of the statute must prevail.

Torts > Intentional Torts > Intentional Infliction of Emotional Distress

HN4[] **Intentional Torts, Intentional Infliction of Emotional Distress**

There is no known Tennessee authority for the proposition that participants in sporting events have a right to publicity under the common law. This is unsurprising since it appears virtually all courts in jurisdictions that have decided the matter under their respective laws have held to the contrary for a variety of reasons.

Torts > Intentional Torts > Invasion of Privacy > Appropriation

HN5[] **Invasion of Privacy, Appropriation**

The Tennessee Personal Rights Protection Act (TPRPA) speaks in terms of the use of an individual's name, photograph, or likeness for purposes of advertising products, merchandise goods or services. The TPRPA also specifically states that it is deemed a fair use and no violation of an individual's rights shall be found, for purposes of this part, if the use of a name, photograph, or likeness is in connection with any news, public affairs, or sports broadcast or account. *Tenn. Code Ann. § 47-25-1107(a)*. Thus, the TPRPA clearly confers no right of publicity in sports broadcast, or with respect to any advertisement if the advertisement is in connection with such a broadcast.

Constitutional Law > Substantive Due Process > Scope

HN6[] **Constitutional Law, Substantive Due Process**

Tenn. Const. art. I, § 8 provides that no man shall be taken or imprisoned, or disseized of his freehold, liberties or privileges, or outlawed, or exiled, or in any manner destroyed or deprived of his life, liberty or property, but by the judgment of his peers or the law of the land, with "law of the land" being synonymous with "due process of law" under the *Fifth* and *Fourteenth Amendments to the United States Constitution*. Accordingly, unless a fundamental right is implicated, a statute comports with substantive due process if it bears a reasonable relation to a proper legislative purpose and is neither arbitrary nor discriminatory.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

***HN7*[ ] Judicial Review, Standards of Review**

The Tennessee Constitution, like that of the United States, guarantees all citizens the equal protection of the law, meaning that all persons similarly circumstanced shall be treated alike. With regard to equal protection challenges, the Tennessee Supreme Court has stated: this Court has adopted an analytical framework similar to that used by the United States Supreme Court in analyzing equal protection challenges. Under this framework, one of three standards of scrutiny applies, depending upon the nature of the right asserted or the class of persons affected: (1) strict scrutiny; (2) heightened scrutiny; or (3) reduced scrutiny, applying the rational basis test. Strict scrutiny applies when the classification at issue: (1) operates to the peculiar disadvantage of a suspect class; or (2) interferes with the exercise of a fundamental right.

Constitutional Law > Bill of Rights > Fundamental Rights

***HN8*[ ] Bill of Rights, Fundamental Rights**

Fundamental rights are rights deeply rooted in this Nation's history and tradition, and implicit in the concept of ordered liberty, such that neither liberty nor justice would exist if they were sacrificed. As can be expected, the list of liberty interests and fundamental rights is short, and the Supreme Court has expressed very little interest in expanding it. In addition to the specific freedoms protected by the *Bill of Rights*, fundamental rights include such thing as the right to marry; have children (and direct their education and upbringing); to marital privacy; to use contraception; to bodily integrity, and to an abortion. The ability to profit from a right of publicity simply does not rise to the level of a fundamental right.

Constitutional Law > Bill of Rights > Fundamental Rights > General Overview

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

***HN9*[ ] Bill of Rights, Fundamental Rights**

In the absence of the deprivation of a fundamental right or intentional discrimination against a suspect class, a statute is entitled to rational basis review which is exceedingly deferential. Under rational basis review, a law is upheld so long as it is rationally related to a legitimate government purpose. There is a strong presumption of constitutionality and the regulation will be upheld so long as its goal is permissible and the means by which it is designed to achieve that goal are rational. This standard is highly deferential; courts hold statutes unconstitutional under this standard of review only in rare or exceptional circumstances. Under rational basis scrutiny, government action amounts to a constitutional violation only if it is so unrelated to the achievement of any combination of legitimate purposes that the court can only conclude that the government's actions were irrational. Finally, under rational basis review, the government has no obligation to produce evidence to sustain the rationality of its action; its choice is presumptively valid and may be based on rational speculation unsupported by evidence or empirical data. Moreover, those seeking to invalidate a statute using rational basis review must negative every conceivable basis that might support it.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

Torts > Intentional Torts > Invasion of Privacy > Appropriation

HN10[] **Judicial Review, Standards of Review**

The Tennessee Personal Rights Protection Act (TPRPA), *Tenn. Code Ann. § 47-25-1107*, passes rational basis review if for no other reason than it is related to the legitimate goal of avoiding unreasonable impediments to the broadcasting of important matters of public interest, including sporting events.

Antitrust & Trade Law > Sherman Act > Claims

HN11[] **Sherman Act, Claims**

Under the *Sherman Act*, every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is declared to be illegal. *15 U.S.C.S. § 1*. For a plaintiff to successfully bring an antitrust claim under *Section 1 of the Sherman Act*, the plaintiff must establish that the defendant's actions constituted an unreasonable restraint of trade which caused the plaintiff to experience an antitrust injury.

Antitrust & Trade Law > Sherman Act > Claims

HN12[] **Sherman Act, Claims**

An antitrust claim under *Section 1 of the Sherman Act* will survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss if it alleges facts sufficient to raise a plausible inference of an unlawful agreement to restrain trade. To survive a motion to dismiss, these allegations must be specific enough to establish the relevant "who, what, where, when, how or why." To plead unlawful agreement, a plaintiff may allege either an explicit agreement to restrain trade, or sufficient circumstantial evidence tending to exclude the possibility of independent conduct.

Antitrust & Trade Law > Sherman Act > Claims

HN13[] **Sherman Act, Claims**

The United States Court of Appeals for the Sixth Circuit has addressed whether an NCAA eligibility rule should be deemed commercial for purposes of an antitrust challenge. In Bassett, a former college coach brought a complaint which alleged, among other things, that the NCAA's enforcement of its recruiting and improper inducement rules violated the *Sherman Act*. Finding no violation, the Sixth Circuit noted that, for the *Sherman Act* to apply, the challenged action must be commercial in nature. The appropriate inquiry is whether the rule itself is commercial, not whether the entity promulgating the rule is commercial.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN14[] **Standing, Requirements**

To have standing to pursue any claim, an aggrieved party must suffer an injury-in-fact. A plaintiff suffers an injury in fact when his legally protected interest has been invaded. Moreover, because protecting competition is the sine qua non of the antitrust laws, a private antitrust plaintiff, in addition to having to show injury-in-fact and proximate cause, must allege, and eventually prove, antitrust injury. Antitrust injury is an injury of the type the antitrust laws were intended to prevent and one that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN15[] **Standing, Sherman Act**

The antitrust injury doctrine is designed to ensure that the injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. The Supreme Court has further explained the requirement as ensuring that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and, more specifically, it ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. The Sixth Circuit, it is fair to say, has been reasonably aggressive in using the antitrust injury doctrine to bar recovery where the asserted injury, although linked to an alleged violation of the antitrust laws, flows directly from conduct that is not itself an antitrust violation.

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN16[] **Particular Subject Matter, Right of Publicity**

The *Lanham Act*, *15 U.S.C.S. § 1125(a)*, is constitutional because it only regulates commercial speech, which is entitled to reduced protections under the *First Amendment*. Commercial speech is generally speech that does no more than propose a commercial transaction. Broadcasting sporting events does not propose a commercial transaction. Rather, it depicts a real event and distributes desired speech (sports programming) to the public, and, thus, it is not commercial speech for purposes of *First Amendment* jurisprudence.

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN17[] **Particular Subject Matter, Right of Publicity**

False endorsement occurs when a celebrity's identity is connected with a product or service in such a way that consumers are likely to be misled about the celebrity's sponsorship or approval of the product or service.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Motions to Dismiss, Failure to State Claim**

In the absence of a motion to amend, defendants are entitled to a review of the complaint as filed pursuant to *Fed. R. Civ. P. 12(b)(6)*; plaintiffs are not entitled to an advisory opinion from the court informing them of the deficiencies of the complaint and then an opportunity to cure those deficiencies.

Opinion by: KEVIN H. SHARP

Opinion

[*820] **[***1971]** **MEMORANDUM**

This is a putative class action brought by current and former Student Athletes who played National Collegiate Athletic Association ("NCAA") football (at the Football Bowl Subdivision "FBS" level) or Division I college basketball. Named as Defendants are **[**6]** a host of conferences, networks, and licensors who allegedly profited from the broadcast and use of those Student Athletes' names, likenesses and images without permission. Pending before the Court are Motions to Dismiss (Docket Nos. 214, 218 & 226) filed on behalf of all Defendants. The Court heard oral arguments on those Motions on April 13, 2015, and, for the reasons that follow, will grant the Motions.

I. Background

Plaintiffs are eight former college football players (three each from Vanderbilt University and the University of Tennessee, and one each from the University of Washington and the University of Tennessee, Chattanooga) and two former college basketball players (one each from Tennessee State University and the University of Maryland Eastern Shore).

Defendants are more than two dozen separate entities that fall into three camps. The assorted athletic conferences, specifically the Atlantic Coast Conference, Big East Conference, Inc., Big 12 Conference, The Big Ten Conference, Inc., Conference USA, Ohio Valley Conference, Pac-12 Conference, and Southeastern Conference (collectively, the "Conference Defendants"), manage athletic competition among teams and sell the rights to **[**7]** broadcast **[*821]** conference games. The networks, specifically, ESPN Inc., CBS Broadcasting Inc., NBCUniversal Media, LLC, ABC, Inc., Fox Broadcasting Company, Big Ten Network, LLC, SEC Network, and Longhorn Network (the "Network Defendants")[1] purchase media content, including college sports from content owners, or produce it internally, and then telecast that content to television viewers. The licensing agencies, specifically, Outfront Media Sports, Inc. (f/k/a CBS Collegiate Sports Properties, Inc.), IMG Worldwide, LLC, IMG College, LLC, William Morris

[1] The Network Defendants are collectively referred to in the Complaint as the "Broadcast Defendants."

Endeavor Entertainment, LLC, JMI Sports LLC, Learfield Sports LLC, T3 Media, Inc., and TeleSouth Communications, Inc. (collectively, the "Licensing Defendants"), offer brand development and management and act as a conduit in licensing college teams' intellectual property.

Plaintiffs have filed a 194-paragraph, 39-page Complaint, the essence of which is that they "and other similarly situated current and former FBS football and NCAA Division I basketball Student Athletes . . . have been foreclosed from the market for the licensing, use, and sale **[**8]** of their names, images, and likenesses[.]" (Docket No. 1, Complaint ¶ 4). The Complaint alleges:

> 5. Defendants' collective action of excluding Student Athletes from the marketplace of their own names, images, and likenesses has caused the unlawful result of fixing the amount that current and former Student Athletes are paid for the licensing and sale of their names, images, and likeness at zero or, at most, their "cost of attendance."[2]
>
> 6. Defendants' use of Student Athletes' names, images, and likenesses is unauthorized **[***1972]** because Student Athletes have not legally assigned their publicity rights to Defendants, the NCAA, or third parties acting on behalf of the NCAA.
>
> * * *
>
> 8. Broadcast Defendants have conspired to fix the amount Student Athletes are paid for the licensing, use, and sale of their names, images, and likenesses at zero or, at most, a portion of the cost of attendance, by colluding with the NCAA and Conference Defendants. Broadcast Defendants, to their own commercial advantage, refuse to negotiate or enter into contracts with Student Athletes. In so doing, Broadcast Defendants have adopted and implemented the restrictive bylaws and rules of the NCAA and Conference Defendants.
>
> 9. **[**9]** Licensing Defendants have conspired to fix the amount Student Athletes are paid for the licensing, use, and sale of their names, images, and likenesses at zero or, at most, a portion of the cost of attendance, by colluding with the NCAA and Conference Defendants. Licensing Defendants refuse to negotiate or enter into contracts with Student Athletes. In so doing, Licensing Defendants have adopted and implemented the restrictive rules and bylaws of the NCAA and Conference Defendants.
>
> 10. The conspiracy between and among the Broadcast Defendants, Licensing Defendants, Conference Defendants and the NCAA has created a marketplace resembling a plantation type arrangement where Defendants financially benefit in the collective amount of billions of dollars, while Student Athletes, the driving force of college sports, **[*822]** receive nothing more than their cost of attendance. This conspiracy has created an anticompetitive marketplace in which all Defendants commercially exploit the substantial value of each Student Athletes' images.

(Id. ¶¶ 5-6 & 8-10, internal parenthetical omitted).

Though the NCAA is alleged to be a part of the conspiracy, it not named as a Defendant in this action. Nevertheless, Plaintiffs' tacitly concede that any discussion of the alleged unlawfulness must acknowledge its existence and the role it plays in college sports.

According to the Complaint, the NCAA was founded in 1906[3] and "is an unincorporated association consisting of more than 1,200 colleges, universities, and athletic conferences" in the United States and "serves as the governing body of its member schools and athletic conferences." (Id. ¶ 76). The fundamental purpose of the NCAA is to:

> maintain intercollegiate athletics as an integral part of the education program and the athlete as an integral part of the educational program and the athlete as a part of the student body and, by so doing, retain a clear line of demarcation between intercollegiate athletics and professional sports.

(Id. ¶ 97).

---

[2] "Cost of attendance" is defined in the Complaint as the total cost of attending college, including tuition, fees, room, **[**10]** board, books and supplies, transportation, and miscellaneous expenses.

[3] Originally, the NCAA was known as the Athletic Association of the United States.

In accordance with NCAA rules, intercollegiate sports are limited to participation of "amateur" athletes:

> Student-athletes shall be amateurs in **[**11]** intercollegiate sport, and their participation should be motivated primarily by education and by the physical, mental and social benefits to be derived. Student participation in intercollegiate athletics is an avocation, and student-athletes should be protected from commercial exploitation by professional and commercial enterprises.

(Id. ¶ 95). A Student Athlete may lose his or her amateur status if he or she:

> a. Uses his or her athletics skill (directly or indirectly) for pay in any form in that sport;
>
> b. Accepts a promise of pay even if such pay is to be received following completion of intercollegiate athletics participation;
>
> c. Signs a contract or commitment of any kind to play professional athletics, regardless of its legal enforceability or any consideration received;
>
> d. Receives, directly or indirectly, a salary, reimbursement of expenses or any other form of financial assistance from a professional sports organization based on athletics skill or participation, except as permitted by NCAA rules and regulations;
>
> e. Competes on any professional athletics team [under the governing Bylaw], even if no pay or remuneration for expenses was **[***1973]** received, except as permitted [by the governing **[**12]** Bylaw];
>
> f. After initial full-time collegiate enrollment, enters into a professional draft; or
>
> g. Enters into an agreement with an agent.

(Id. ¶ 99).

In order to participate in NCAA sports, Student Athletes are required to sign a "Form 08-3a," that "allows the NCAA to use the Student Athlete's name or picture to 'generally promote' NCAA championships or other NCAA events, activities or programs." (Id. ¶ 132). Plaintiffs allege that "Student Athletes desiring to extend their athletic careers beyond high school are left with no comparable alternative to accepting a scholarship from an FBS football or Division I basketball school," because **[*823]** "[b]oth the National Football League ('NFL') and the National Basketball Association ('NBA') prohibit high school players from entering their leagues directly after high school." (Id. ¶ 137).[4] As a consequence, in order to play at a competitive level, Student Athletes have little or no choice but to accept a scholarship[5] and sign Form 08-3a, making the Form "a contract of adhesion and unenforceable." (Id. ¶ 139).

Plaintiffs claim that the NCAA and Defendants have "multi-billion dollar agreements," yet "the Student Athlete, receives nothing or, at most, the cost of attendance." (Id. ¶ 114). The restrictive NCAA and Conference rule which "even go as far as to place quotas on the number of meals a Student Athlete may eat," allegedly "have deprived Student Athletes from realizing the commercial value of their images." (Id. ¶ 115). That is, while the NCAA "purports to protect Student Athletes from commercial exploitation, [it] has conspired with Defendants to create an anticompetitive market where Student Athletes are powerless to realize the commercial value of their names, images and likenesses." (Id. ¶ 128 **[**14]**).

Plaintiffs contend that the NCAA and Defendants have benefitted enormously from the status quo, all to the detriment of Student Athletes. Just by way of examples, Plaintiffs claim:

- A basketball scholarship at the University of Kentucky is worth approximately $12,000 per year, yet the basketball team consisting of no more than 13 scholarship players, generated approximately $23 million dollars in revenue in 2012.

---

[4] "To be eligible for the NFL draft, a player must be at least 3 years removed from high school. To be eligible for the NBA draft, a player must be at least **[**13]** 1 year removed from high school." (Id.).

[5] Even with a scholarship, Plaintiffs assert that "college athletes can be left to pay sports-related medical bills," may be required "to pay thousands of dollars in out-of- pocket educational related expenses," and can lose the scholarship for any reason. (Id. ¶ 116). They also assert that "[t]he room and board provisions in full scholarship leave 85% of players living on campus and 86% of players living off campus living below the federal poverty line." (Id. ¶ 118).

‣ Approximately 50% of NCAA football and men's basketball players are left without a college degree.

‣ According to a study, the average FBS football student athlete has a fair market value of $456,612 "above and beyond" the value of their scholarship, and the average men's basketball player has a fair market value of $1.06 million over four years, not including his scholarship.

(Id. ¶¶ 115, 127-128).

Plaintiffs' Complaint contains Seven Causes of Action. The first two Causes, against all Defendants, allege a statutory violation of the right of publicity under *Tenn. Code Ann. § 47-25- 1105* (First Cause) and a violation of the right to publicity under Tennessee common law (Second Cause); the Third Cause, also against all Defendants, alleges a civil conspiracy; the Fourth Cause, again against all **[**15]** Defendants, alleges a violation of *Section 1* of the Sherman Antitrust Act; the Fifth Cause, against only the Licensing and Network Defendants, alleges false endorsement in violation of *Section 43(a) the Lanham Act*; and the Sixth Cause, against all Defendants, alleges unjust enrichment; and the Seventh Cause seeks an accounting as to all Defendants.

II. Application of Law

Defendants' Motions to Dismiss seek dismissal of all of Plaintiffs' claims.[6] The **[*824]** standards governing such Motions are well known, and it suffices simply to note that this Court's review is governed primarily by *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, **[***1974]** and the Supreme Court's application of that Rule in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1950, 173 L. Ed. 2d 868 (2009)*, and *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

A. Right of Publicity — First And Second Causes of Action

"The right of publicity is, somewhat paradoxically, an outgrowth of the right of privacy." *ETW Corp. v. Jireh Pub., Inc., 332 F.3d 915, 928 (6th Cir. 2003)*. It has been formally acknowledged to be a part of Tennessee's common law:

> "[T]he recognition of individual property rights is deeply embedded in our jurisprudence. These rights are recognized in *Article I, Section 8 of the Tennessee Constitution* and have been called "absolute" by the Tennessee Supreme Court. . . . In its broadest **[**16]** sense, property includes all rights that have value. It embodies all the interests a person has in land and chattels that are capable of being possessed and controlled to the exclusion of others. Chattels include intangible personal property such as choses in action or other enforceable rights of possession. . . . Tennessee's common law thus embodies an expansive view of property. Unquestionably, a celebrity's right of publicity has value. It can be possessed and used. It can be assigned, and it can be the subject of a contract.

State ex rel Elvis Presley v. Crowell, 733 S.W.2d 89, 96-97 (Tenn. Ct. App. 1987). That is, ***HN1***[] Tennessee's common law acknowledges a "property right in the use of one's name, photograph or likeness." *Polygram Records, Inc. v. Legacy Ent. Grp., LLC, 205 S.W.3d 439, 445 (Tenn. Ct. App. 2006)*.

In addition to the right of publicity under the common law, Tennessee provides statutory protection to that right. "The Tennessee Legislature codified the right of publicity in 1984 when it enacted the Tennessee Personal Rights Protection Act ('TPRPA')." *Gauck v. Karamian, 805 F. Supp.2d 495, 500 (W.D. Tenn. 2011)*. The TPRPA "was intended to 'create an inheritable property right for those people who use their names or likenesses in a commercial manner, such as an entertainer or sports figure — someone who uses his or her name for endorsement purposes.'"

[6] Many of the arguments overlap. For ease of reference, the Court will at times simply refer to the arguments collectively, as if raised by all of the Defendants.

Wells v. Chattanooga Bakery, Inc., 448 S.W.3d 381, 390 (Tenn. Ct. App. 2014) (quoting Apple Corps Ltd. v. A.D.P.R., Inc., 843 F. Supp. 342, 348 (M.D. Tenn. 1993)).

Defendants argue that the TPRPA **[**17]** supplants whatever right to publicity that may exist under the common law. For two reasons, this Court agrees.

First, **HN2**[] at least two courts in Tennessee have indicated that the statutory and common law rights to publicity are "co-extensive." Judge Trauger so stated in Moore v. Weinstein Co., LLC, 2012 U.S. Dist. LEXIS 72929, 2012 WL 1884758, at *30 (M.D. Tenn. May 23, 2012), as did Judge McCalla in Gauck, 805 F. Supp.2d at 500 n.5. While Plaintiffs point out that "[n]either Gauck nor Moore defines the term 'coextensive,'" (Docket No. 257 at 5), "'[c]oextensive' means 'extending over the same space or time; corresponding exactly in extent.'" Paselk v. Texas, 2013 U.S. Dist. LEXIS 167995, 2013 WL 6187005, at *6 (E.D. Tex. Nov. 26, 2013) (quoting THE NEW OXFORD AMERICAN DICTIONARY 331 (2001)); see also, Chotkowski v. State, 240 Conn. 246, 690 A.2d 368, 385 (Conn. 1997) (quoting Webster's Third New International Dictionary for the proposition that "'[c]oextensive' is defined as 'having the same scope or boundaries'").

Second, Plaintiffs cite no case from any court in Tennessee that recognizes a right **[*825]** to publicity in sports broadcasts. Even if they could point to such a case, **HN3**[] the Tennessee Supreme Court has stated that "'[w]hen there is a conflict between the common law and a statute, the provision[s] of the statute must prevail.'" House v. Edmondson, 245 S.W.3d 372, 380 n.7 (Tenn. 2008) (quoting Lavin v. Jordon, 16 S.W.3d 362, 368 (Tenn. 2000)).

It is no answer, as Plaintiffs argue, that (1) "at least seven years earlier than the enactment of the TPRPA," courts recognized the existence of a common law right to publicity; (2) "where a common **[**18]** law tort has been recognized by courts prior to the enactment of a companion statute, 'the Legislature is presumed aware of this prior recognition'"; (3) "'where the remedies subsequently provided by the [Act] are not expressly stated to be exclusive, then the statutory remedies must be considered cumulative'"; and (4) "the TPRPA states that the remedies it provides 'are cumulative and shall be in addition to any others provided by law.'" (Docket No. 257 at 5-6, quoting, Guy v. Mut. of Omaha Ins. Co., 79 S.W.3d 528, 536 (Tenn. 2002) & Tenn. Code Ann. § 47-25-1106(e)). The very **[***1975]** case on which Plaintiffs rely prefaces its remarks by indicating that the "primary task in construing a statute is to give effect to the intent and purpose of the General Assembly 'without unduly restricting or expanding a statute's coverage beyond its intended scope.'" Guy, 79 S.W.3d at 536 (citation omitted). Furthermore, State *ex rel.* Presley, on which Plaintiffs rely for the proposition that the common law right to publicity existed years before enactment of the TPRPA , acknowledged that "[w]hile Tennessee's courts are capable of defining the parameters of the right of publicity on a case by case basis, the General Assembly also has the prerogative to define the scope of this right [and] undertook to do so in 1984 when it enacted" **[**19]** the TPRPA, 733 S.W.2d at 99.[7] In exercising that prerogative, the General Assembly specifically defined the right of publicity as it relates to sports broadcast (as discussed in more detail below), something which apparently had not been addressed by the courts in this state before.

Even if Tennessee's common law and statutory rights to publicity are not coextensive as that term is commonly understood, and even if the General Assembly did not effectively delimit the law regarding the right to publicity of sports broadcast, the first two Causes of Action in Plaintiff's Complaint are bound to be dismissed. This is because Plaintiffs' allegations do not set forth a plausible claim for relief, either under the common **[**20]** law or the TPRPA.

As noted, Plaintiffs' cite **HN4**[] no Tennessee authority for the proposition that participants in sporting events have a right to publicity under the common law. This is unsurprising since it appears virtually all courts in jurisdictions that

[7] The Court in State *ex rel.* Presley also stated that nothing in the TPRPA "should be construed to limit vested rights of publicity that were in existence prior to the effective date of the act" because "[t]o do so would be contrary to Article I, Section 20 of the Tennessee Constitution." Id. However, it is likely that, when the statute was enacted, none of the Plaintiffs were yet born, and most certainly not college athletes, since all Plaintiffs are alleged to have played either college football or college basketball between the 2008 and 2013 seasons.

have decided the matter under their respective laws have held to the contrary for a variety of reasons. See, e.g., *Dryer v. Nat'l Football League, 55 F. Supp. 3d 1181, 1195-1200 (D. Minn. 2014)* (holding that (1) NFL's use of video footage of players in games was entitled to *First Amendment* protection, outweighing players' rights to publicity; (2) programs fell within "newsworthiness" exception under various state's right of **[*826]** publicity laws, and (3) plaintiffs' "play in the NFL was and continues to be the subject of public interest"); *Nat'l Football League v. Alley, Inc., 624 F. Supp. 6, 10 (S.D. Fla. 1983)* (no common law violation of right to publicity where use of "player's professional personalities has not been shown to be an advertising use," and no violation of statutory rights where players' consented and "individual's name and likeness" did not "directly promote[] a commercial product or service"); *Gionfriddo v. Major League Baseball, 94 Cal. App. 4th 400, 114 Cal. Rptr.2d 307, 313 & 315 (Cal. App. 2001)* ("common law right does not provide relief for every publication of a person's name or likeness," and where defendant "is simply making historical facts available to the public through game programs, **[**21]** Web sites and video clips . . . the recitation and discussion of factual data concerning the athletic performance of these plaintiffs commands a substantial public interest, and, therefore, is a form of expression due substantial constitutional protection").

The sole exception to this line of authority appears to be *In re NCAA Student Athlete Name and Likeness Litig., 37 F. Supp.3d 1126 (N.D. Cal. 2014)*, which Plaintiffs cite for the proposition that "[r]ecent precedent specifically affirms that collegiate athletes have recognizable right of publicity related to sports broadcasts." (Docket No. 257 at 8). The only value that case has for present purposes, however, is that there *might* be a right of publicity under Minnesota law for sports broadcast, itself a dubious proposition given a more recent interpretation of that state's caselaw.

In re NCAA Student-Athlete involved 23 current and former student athletes who played at the Division I level beginning in 1953. The sole issue presented in that opinion[8] was whether the NCAA violated federal ***antitrust law*** by conspiring to restrain competition **[***1976]** in the market for the commercial use of the players' names, images and likeness. In addressing that issue, the court found it necessary to "discuss the scope of student-athletes' publicity rights" **[**22]** in the context of "whether those rights could, absent the challenged restraint, give rise to a market for group licensing," but pointedly repeated that "[t]he court does not analyze the viability of Right-of-Publicity Plaintiffs' claims which remain stayed[.]" *Id. at 1140 n. 6*. Nevertheless, the court noted that "the NCAA has not shown that each of the named Plaintiffs is, in fact, domiciled in a state that refuses to recognize an athlete's right of publicity in live broadcasts of sporting events," that two of the named plaintiffs "are domiciled in Minnesota," and that "recent case law suggests that athletes may bring such claims under Minnesota law to recover for the unauthorized use of their names and images in at least certain kinds of broadcast footage." *Id. at 1146*, citing *Dryer v. Nat'l Football League, 689 F. Supp. 2d 1113, 1123 (D. Minn. 2013)*.

The court's statements in In re NCAA Student **[**23]** Athlete about the right to publicity in sports broadcasts are clearly *dicta*. Moreover, Plaintiffs' right of publicity claims here are based exclusively on Tennessee law, and Defendants argue (and Plaintiffs do not dispute) that the plaintiffs in In re NCAA Student Athlete conceded **[*827]** that Tennessee recognizes no right of publicity in sports broadcasts. Additionally, the Dryer court issued a subsequent opinion in which it held that plaintiffs did not establish that the NFL's use of video footage in television productions violated their publicity rights under Minnesota law, nor, for that matter under New York, New Jersey, California, or Texas law. *Dryer, 55 F. Supp.3d at 1195-1200*.[9] Thus, the decision in In re Student Athlete is of no

---

[8] That same court, after a bench trial, found that certain "NCAA rules unreasonably restrain trade in the market for certain educational and athletic opportunities offered by NCAA Division I schools," and that "[t]he procompetitive justifications that the NCAA offers do not justify this restraint and could be achieved through less restrictive means." *O'Bannon v. NCAA, 7 F. Supp. 3d 955, 963 (N.D. Cal. 2014)*. Again, the NCAA is not a Defendant in this action.

[9] The Court notes that while this opinion was in its final draft, the Eighth Circuit addressed the approval of a settlement for players who remained a part of the class action in Dryer. In so doing, the court noted that "[t]he district court carefully and thoughtfully considered the strength of the plaintiffs' case and all of the potential **[**24]** risks they would face by continuing to litigate." *Marshall v. NFL, 787 F.3d 502, 2015 U.S. App. LEXIS 8373, 2015 WL 2402344, at *11 (8th Cir. 2015)*. It noted that the three plaintiffs "who opted out of the settlement and proceeded to the merits of their claims had their claims entirely dismissed by

real help to Plaintiffs in establishing an individual participant's right of publicity in a sports broadcast under any state's laws, let alone under Tennessee law.

Plaintiffs' statutory claim fares no better. In general, the TPRPA provides:

> Any person who knowingly uses or infringes upon the use of another individual's name, photograph, or likeness[10] in any medium, in any manner directed to any person other than such individual, as an item of commerce for purposes of advertising products, merchandise, goods, or services . . . without such individual's prior consent, or, in the case of a minor, the prior consent of such minor's parent or legal guardian . . . shall be liable to a civil action.

Tenn.Code Ann. § 47-25-1105(a) (footnote added).

Tellingly, ***HN5***[] the TPRPA speaks in terms of the use of an individual's name, photograph, or likeness "for purposes of advertising products, merchandise goods or services." Id.; see *Clark v. Viacom Intern., Inc., 2014 U.S. Dist. LEXIS 67145, 2014 WL 1934028, at *15-16 (M.D. Tenn. May 13, 2014)* (citation omitted) (stating that "'[o]nly the use of an individual's identity in advertising infringes on the persona,'" and finding plaintiff right of publicity claim failed where he "fail[ed] to allege that defendants' "statements used his name in connection with any advertisement"); *Apple Corps, 843 F. Supp. at 347* (the "Tennessee legislature . . . has narrowed the common law prohibition, proscribing only the unauthorized use of another's name or likeness in advertising"). The Act also specifically states that "[i]t is deemed a fair use and no violation of an individual's rights shall be found, for purposes of this part, if the use of a name, photograph, or likeness is in connection with any news, public affairs, or sports broadcast or account." *Tenn. Code Ann. § 47-25-1107(a)*. Thus, the TPRPA clearly confers no right of publicity in sports broadcast, or with respect to any advertisement **[***1977]** if the advertisement is in connection with such a broadcast.

At the hearing on the Motions to Dismiss, Plaintiffs' **[**26]** counsel argued that the sports broadcast defense under the TPRPA "does not immunize defendants from liability here because they are using Plaintiffs' images during broadcasts to advertise products that are completely unrelated **[*828]** to sports broadcast[s]." (Transcript, Docket No. 280 at 42). However, they do not plead specific facts which show that any of their names, images, or likenesses have been used in any advertisement, nor do they specify which Defendant(s) created and placed the advertisement, or in what medium it was placed. See *Moore, 2012 U.S. Dist. LEXIS 72929, 2012 WL 1884758, at *30* (citation omitted) ("The TPRPA is 'narrowly drawn' to have a particular scope, 'proscribing only the unauthorized use of another's name or likeness in advertising'"); *Gauck, 805 F. Supp.2d at 502* (plaintiffs must "demonstrate[] a causal connection between the defendants' use of their persona and a direct, non-incidental benefit to the defendants from that use); *McKee v. Meltech, Inc., 2011 U.S. Dist. LEXIS 49612, 2011 WL 1770461, at * 12 (W.D. Tenn. May 9, 2011)* (complaint failed where nothing suggested that defendant's used plaintiff's "likeness for advertising or endorsement purposes").

Thus far, the Court has concluded that the statutory and common law right to publicity are co-extensive under Tennessee law, that the common law in Tennessee does not recognize a individual participant's right **[**27]** to publicity in sports broadcasts, and that, in any event, the TPRPA circumscribes whatever rights may exist under the common law insofar as sports broadcast are concerned. Nevertheless, a couple of further points need to be addressed in order to give full consideration to Plaintiffs' right to publicity arguments.

Plaintiffs rely on *Zacchini v. Scripps-Howard Broad. Co., 433 U.S. 562, 97 S. Ct. 2849, 53 L. Ed. 2d 965 (1977)* and *Wisconsin Interscholastic Athl. Ass'n v. Gannett Co., Inc., 658 F.3d 614 (7th Cir. 2011)* to support their right of

---

the district court," and that "the district court rejected every single one of the plaintiffs' claims under every state law and under every single theory and defense." Id. While the merits of the claims were not before the Eighth Circuit, that court observed the "district court's order is nevertheless strong evidence that it meant what it said in its order approving the settlement regarding the likelihood of success on the merits." Id.

[10] "Likeness" **[**25]** is defined in the Act as "the use of an image of an individual for commercial purposes." *Tenn. Code Ann. § 47-25-1102(3)*.

publicity claims, and to defend against any contention that the *First Amendment* bars such claims in the context of sports broadcasts. They argue that, like the plaintiff in Zacchini, they do "'not seek to enjoin the broadcast of [their] performance but simply want[] to be paid for it[.]'" (Docket No. 257 at 2, citation omitted). The key to those cases, Plaintiffs insist, is the distinction drawn between reporting about sports events, as opposed to broadcasting entire sporting event, with the former being protected as newsworthy and of public interest, and the latter not.

There is no doubt that Zacchini and Wisconsin Interscholastic draw the distinction made by Plaintiffs in this case, and the court in In re NCAA Student-Athlete relied on that distinction in holding that "the *First Amendment* does **[**28]** not guarantee media organization an unlimited right to broadcast entire college football and basketball games." *In re NCAA Student-Athlete, 37 F. Supp.3d at 1142*. But, stating that the *First Amendment* does not guarantee unlimited broadcast rights does not mean that it correspondingly establishes a right to publicity by the athletic participants when entire games are broadcast. Moreover, just as with all cases, Zacchini and Wisconsin Interscholastic must be read in context and, when so read, are inapposite.

Hugo Zacchini was a "human cannonball" who performed the feat of being shot from a cannon into a net 200 feet away. In the summer of 1972, he performed his act at a county fair in Ohio and, over his protest, a local news reporter filmed the entire 15-second performance, which was then broadcast on the local eleven o'clock news. Mr. Zacchini brought an "action for damages, alleging that he is 'engaged in the entertainment business,'" and asserted that defendant "'showed and commercialized the film of his act without his consent,' and that such conduct was an 'unlawful appropriation of [his] professional property.'" *433 U.S. at 564*.

Unlike the situation here, Mr. Zacchini was not only a performer, he was also the **[*829]** producer of his one-man show and, as a consequence, **[**29]** "Ohio's decision to protect [his] right of publicity here rests on more than a desire to compensate the performer for the time and effort invested in his act; the protection provides an economic incentive for him to make the investment required to produce a performance of interest to the public." *Id. at 576*. The Supreme Court went on to observe that "[t]his same consideration underlies the patent and copyright laws long enforced by this Court," laws that "were 'intended definitely to grant valuable, enforceable rights' in order to afford greater encouragement to the production of works of benefit to the public." *Id. at 576-77*. It is a mistake, the Court believes, to read **[***1978]** Zacchini as supporting a right of publicity by anyone who performs in an event produced by someone else.

Wisconsin Interscholastic involved a high school athletic association's challenge to the streaming of a tournament game by news organizations in violation of exclusive licensing agreements entered into between the association (which sponsored the tournaments) and a video production company. On its face that case does not aid Plaintiffs because the Seventh Circuit affirmed the association's right to enter into exclusive contracts for broadcasting **[**30]** entire games, noting that "tournament games are a performance product of [the association] which it has a right to control." *658 F.3d at 616*. True, the court stated that "[t]he distinction between coverage or reporting on the one hand, and broadcast of an 'entire' act on the other hand, was central to Zacchini," but the court also observed that Zacchini stands for a second proposition: "Zacchini makes clear that the producer of entertainment is entitled to charge a fee in exchange for consent to broadcast; the *First Amendment* does not give the media the right to appropriate, without consent or remuneration, the products of others." *Id. at 624*.

Here, Plaintiffs are the players in broadcast football and basketball games. The networks are the producers and the games are their products.

In their reply brief, Plaintiffs assert that they, "and the majority of Student Athletes are African American," and argue that "the sports broadcast exception, if applied . . . would adversely impact a suspect class disproportionately." (Docket No. 257 at 8). Plaintiffs continue:

> Since the TPRPA's sports broadcast exception serves to limit fundamental rights protected under the Tennessee Constitution, it is subject to strict scrutiny under state law. **[**31]** . . . Further, the exception creates a separate classification of persons with a right to publicity. Where the classification at issue "(1) operates to the peculiar disadvantage of a suspect class; or (2) interferes with the exercise of a fundamental right," strict scrutiny applies."

(*Id. at 9*, citation omitted).

If for no other reasons, Plaintiffs' constitutional challenge is subject to dismissal because no facts are alleged in the Complaint to support such a claim, nor is any such cause of action asserted. Moreover, Plaintiffs have not shown compliance with the notice requirements *Rule 5.1 of the Federal Rules of Civil Procedure* for a constitutional challenge to a state statue. Regardless, Plaintiffs' constitutional claim fails on the merits.

HN6[] *Article I, section 8 of the Tennessee Constitution* provides "[t]hat no man shall be taken or imprisoned, or disseized of his freehold, liberties or privileges, or outlawed, or exiled, or in any manner destroyed or deprived of his life, liberty or property, but by the judgment of his peers or the law of the land," *Tenn. Const. art. I, § 8*, with "law of the land" being synonymous with "due process of law" under the *Fifth* and *Fourteenth Amendments to the United States Constitution*. **[*830]** *Mansell v. Bridgestone Firestone No. Am. Tire, LLC, 417 S.W.3d 393, 407 (Tenn. 2013)*. "Accordingly, unless a fundamental right is implicated, a statute comports with substantive due process if it bears 'a reasonable relation to a proper legislative **[**32]** purpose' and is 'neither arbitrary nor discriminatory.'" *Gallaher v. Elam, 104 S.W.3d 455, 463 (Tenn. 2003)*.

In addition, ***HN7***[] the Tennessee Constitution, like that of the United States, guarantees all citizens the equal protection of the law, meaning that "'all persons similarly circumstanced shall be treated alike.'" *Newton v. Cox, 878 S.W.2d 105, 109 (Tenn. 1994)* (quoting *Tenn. Small School Sys. v. McWherter, 851 S.W.2d 139, 153 (Tenn. 1993))*. With regard to equal protection challenges, the Tennessee Supreme Court has stated:

> this Court has adopted an analytical framework similar to that used by the United States Supreme Court in analyzing equal protection challenges. . . . Under this framework, one of three standards of scrutiny applies, depending upon the nature of the right asserted or the class of persons affected: (1) strict scrutiny; (2) heightened scrutiny; or (3) reduced scrutiny, applying the rational basis test. . . . Strict scrutiny applies when the classification at issue: (1) operates to the peculiar disadvantage of a suspect class; or (2) interferes with the exercise of a fundamental right.

Gallaher, 104 S.W.3d at 463.

Whether grounded in the *due process clause* or the *equal protection clause*, Plaintiffs' assertion that the TPRPA is subject to strict scrutiny fails because they have not adequately argued, let alone pled, that the statute operates **[***1979]** to the peculiar disadvantage of a suspect class or that it interferes **[**33]** with a fundamental right.

It is difficult to perceive how a facially neutral statute that creates exemptions for news, public affairs and sports broadcasts singles out a specific class, and Plaintiffs do not suggest how that could be so. Even within the world of sports, the statute does not target specific types of broadcasts such as football or basketball, or even just athletes as opposed to the countless others whose name and images might appear in such broadcasts. Yet to prevail on an equal a claim, Plaintiffs would have to "prove the existence of a racially discriminatory purpose behind the statute," *Wilson v. Collins, 517 F.3d 421, 432 (6th Cir. 2008)*, something which Plaintiffs do not even allege.

Nor have Plaintiffs alleged that the TPRPA impacts a fundamental right. ***HN8***[] Fundamental rights are rights "deeply rooted in this Nation's history and tradition, and implicit in the concept of ordered liberty, such that neither liberty nor justice would exist if they were sacrificed." *Washington v. Glucksberg, 521 U.S. 702, 720-21, 117 S. Ct. 2258, 117 S. Ct. 2302, 138 L. Ed. 2d 772 (1997)* (citations and quotations omitted). As can be expected, "[t]he list of liberty interests and fundamental rights 'is short, and the Supreme Court has expressed very little interest in expanding it.'" *EJS Props., LLC v. City of Toledo, 698 F.3d 845, 860 (6th Cir. 2012)* (quoting *Seal v. Morgan, 229 F.3d 567, 574-75 (6th Cir. 2000))*. "In addition to the specific freedoms protected by the **[**34]** *Bill of Rights*," fundamental rights include such thing as the right to marry; have children (and direct their education and upbringing); to marital privacy; to use contraception; to bodily integrity, and to an abortion. *Glucksberg, 521 U.S. at 720*.

The ability to profit from a right of publicity simply does not rise to the level of a fundamental right. While Plaintiffs cite cases for the proposition that fundamental rights "include the right to privacy," (Docket No. 257 at 7), as the

[*831] Network Defendants correctly observe, an "athlete who takes the field before 100,000 fans at Neyland Stadium can hardly claim that a broadcast of the game threatens any constitutionally protected 'privacy right.'" (Docket No. 269 at 7).

HN9[] In the absence of the deprivation of a fundamental right or intentional discrimination against a suspect class, a statute is entitled to rational basis review which is exceedingly deferential. The Sixth Circuit has explained:

> Under rational basis review, a law is upheld so long as it is rationally related to a legitimate government purpose. There is a strong presumption of constitutionality and the regulation will be upheld so long as its goal is permissible and the means by which it is designed to achieve that goal **[**35]** are rational. . . . . "This standard is highly deferential; courts hold statutes unconstitutional under this standard of review only in rare or exceptional circumstances." . . . "Under rational basis scrutiny, government action amounts to a constitutional violation only if it is so unrelated to the achievement of any combination of legitimate purposes that the court can only conclude that the government's actions were irrational." . . . . Finally, under rational basis review, the government "has no obligation to produce evidence to sustain the rationality of its action; its choice is presumptively valid and 'may be based on rational speculation unsupported by evidence or empirical data.'"

Liberty Coins, LLC v. Goodman, 748 F.3d 682, 693-94 (6th Cir. 2014) (internal citations omitted). Moreover, "[t]hose seeking to invalidate a statute using rational basis review must 'negative every conceivable basis that might support it.'" *Craigmiles v. Craig, 312 F.3d 220, 224 (6th Cir. 2002)* (quoting *Lehnhausen v. Lake Shore Auto Parts Co., 410 U.S. 356, 364, 93 S. Ct. 1001, 35 L. Ed. 2d 351 (1973)*). *HN10*[] The TPRPA passes that review if for no other reason than it is related to the legitimate goal of avoiding unreasonable impediments to the broadcasting of important matters of public interest, including sporting events.

Finally, the Court notes that the parties advance numerous authorities to support their respective positions **[**36]** that *Section 301(a)* of the Copyright Act either does, or does not, preempt Plaintiffs' right of publicity claims. In light of this Court's conclusion that Plaintiffs fail to state a claim under either Tennessee's common law or the TPRPA, the Court declines to consider the matter. See *Casias v. Wal-Mart Stores, Inc., 695 F.3d 428, 437 n.1 (6th Cir. 2012)* (declining to address whether federal law preempted state statute where plaintiff failed to state a claim under the statute); *Andretti v. Borla Performance Indus., Inc., 426 F.3d 824, 829 (6th Cir. 2005)* (refusing to address copyright preemption and **[***1980]** standing arguments where plaintiff could not establish damages).

B. *Section One of the Sherman Act* — Fourth Cause of Action

HN11[] Under the *Sherman Act*, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal." *15 U.S.C. § 1*. "For a plaintiff to successfully bring an antitrust claim under *Section 1* of the Sherman Act, the plaintiff must establish that the defendant's actions constituted an unreasonable restraint of trade which caused the plaintiff to experience an antitrust injury." *In re Se. Milk Antitrust Litig., 739 F. 3d 262, 270 (6th Cir. 2014)*. Plaintiffs have failed to adequately allege either element.

HN12[] "A Section One complaint will survive a *Rule 12(b)(6)* motion to dismiss if it alleges facts sufficient to raise a plausible inference of an unlawful agreement to restrain **[**37]** trade." *Erie Cnty. v. Morton **[*832]** Salt, Inc., 702 F.3d 860, 869 (6th Cir. 2012)*. "To survive a motion to dismiss, these allegations must be specific enough to establish the relevant "who, what, where, when, how or why." *Carrier Corp. v. Outokumpu Oyj, 673 F.3d 430, 445 (6th Cir. 2012)*. "To plead unlawful agreement, a plaintiff may allege either an explicit agreement to restrain trade, or 'sufficient circumstantial evidence tending to exclude the possibility of independent conduct.'" *Watson Carpet & Floor Covering, Inc. v. Mohawk Indus., 648 F.3d 452, 457 (6th Cir. 2011)*.

In the Complaint, Plaintiffs attack the NCAA amateurism rules, describing them as anticompetitive agreements. Beginning in the introductory paragraph, the Complaint alleges that "[t]he defendants — broadcasters, athletic conferences and licensing entities — have conspired with each other and the NCAA to promulgate, enforce, adopt, implement and/or exploit rules that are inherently anticompetitive in forbidding Student Athletes from competing in the marketplace for the value of their rights of publicity." (Docket No. 1, Complaint Intro. Para.). This theme underlies the entire Complaint, and is carried over to the "Background of the Anticompetitive Restraints" section, in which Plaintiffs allege, among other things, that "[s]ince its inception, the NCAA has gradually evolved into an environment that exploits its member athletes, all in the name of amateurism." **[**38]** (*Id. at ¶ 94*).

The Conference Defendants are alleged to "jointly enforce this clear demarcation between Student Athletes and professional athletes by permitting only 'amateur' Student Athletes to participate in intercollegiate sports," and have not only approved the NCAA's rules, but have mandated that its members follow those rules. (*Id. ¶¶ 98*, 102-103). The claim against the Network Defendants is more attenuated, with the allegation being those Defendants have entered into lucrative contracts with the NCAA and Conference Defendants which "effectively adopt and implement" the restrictive rules and bylaws of the NCAA. (*Id. ¶¶ 105, 112*). The claim against the Licensing Defendants is thinner still, alleging that "[t]he agreements between the Licensing Defendants and NCAA member institutions purportedly encompass the commercial value of Student Athletes' rights of publicity, yet Licensing Defendants refuse to negotiate or enter into agreements with Student Athletes to obtain such rights." (*Id. ¶ 123*).

By necessarily linking their antitrust claims to the NCAA amateurism rules and attacking those rules, Plaintiffs are faced with a fundamental problem, notwithstanding that the NCAA is not a Defendant **[**39]** in this action. Their attack runs counter to a line of cases which have addressed the amateurism rules in a variety of circumstances, including *NCAA v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*, decided more than thirty years ago.

Board of Regents involved an antitrust challenge to an NCAA plan to limit the number of football games Division I schools were allowed to televise each season in order to "reduce, insofar as possible, the adverse effects of live television upon football game attendance." *Id. at 94*. Applying the rule of reason (as opposed to the *per se* rule) for antitrust challenges, the Supreme Court found that the plan violated *Section One of the Sherman Act* because it constituted illegal price fixing and established unlawful horizontal market restraints.

However, in arriving at its conclusion, the Supreme Court stated that "the role of the NCAA must be to preserve a tradition that might otherwise die." *Id. at 120*. The Court also made a couple of salient observations:

> **[*833]** What the NCAA and its member institutions market in this case is competition itself — contests between competing institutions. **[***1981]** Of course, this would be completely ineffective if there were no rules on which the competitors agreed to create and define the competition to be **[**40]** marketed. A myriad of rules affecting such matters as the size of the field, the number of players on a team, and the extent to which physical violence is to be encouraged or proscribed, all must be agreed upon, and all restrain the manner in which institutions compete. Moreover, the NCAA seeks to market a particular brand of football—college football. The identification of this "product" with an academic tradition differentiates college football from and makes it more popular than professional sports to which it might otherwise be comparable, such as, for example, minor league baseball. In order to preserve the character and quality of the "product," athletes must not be paid, must be required to attend class, and the like. And the integrity of the "product" cannot be preserved except by mutual agreement; if an institution adopted such restrictions unilaterally, its effectiveness as a competitor on the playing field might soon be destroyed. Thus, the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed which might otherwise be unavailable. In performing this role, its actions widen consumer choice — not only **[**41]** the choices available to sports fans but also those available to athletes — and hence can be viewed as procompetitive.

Id. at 101-02. The Court also wrote:

> The NCAA plays a critical role in the maintenance of a revered tradition of amateurism in college sports. There can be no question but that it needs ample latitude to play that role, or that the preservation of the student-athlete in higher education adds richness and diversity to intercollegiate athletics and is entirely consistent with the goals of the *Sherman Act*.

Id. at 119.

Here, of course, Plaintiffs were subject to the NCAA's eligibility rules, and in Smith v. NCAA, 139 F.3d 180, 189 (3rd Cir. 1998), the Third Circuit observed that the Supreme Court in Board of Regents "did not comment directly on whether the Sherman Act" would apply to those rules. Nevertheless, after noting that no court of appeals had expressly addressed the issue but numerous lower courts had, the Third Circuit "agree[d] with th[o]se court that the eligibility rules are not related to the NCAA's commercial or business activities," and, as a consequence, held that "the Sherman Act does not apply to the NCAA's promulgation of eligibility requirements." Id. at 185-86.

Smith is not controlling and, as Plaintiffs argue, the language in Board of Regents **[**42]** about amateurism and players not being paid may well be *dicta*. Still, that language cannot be blithely ignored.

To the contrary, Board of Regents has recently been read to mean that "most [NCAA] regulations will be 'a justifiable means of fostering competition among amateur athletic teams,' and are therefore procompetitive." Agnew v. NCAA, 683 F.3d 328, 341 (7th Cir. 2012) (quoting Bd. of Regents, 468 U.S. at 117). It also has been read as giving courts "a license to find certain NCAA bylaws that 'fit into the same mold' as those discussed in Board of Regents to be procompetitive 'in the twinkling of an eye,' — that is, at the motion-to-dismiss stage." Id. (quoting Bd. of Regents, 468 U.S. at 110 n.39). "Accordingly, when an NCAA bylaw is clearly meant to help maintain the 'revered tradition of amateurism in college **[*834]** sports' or the 'preservation of the student-athlete in higher education,' the bylaw will be presumed procompetitive, since [a court] must give the NCAA 'ample latitude to play that role.'" Id. at 342-34 (quoting Bd. of Regents, 468 U.S. at 120).

Like Smith, Agnew is not controlling, but ***HN13***[] the Sixth Circuit, too, has addressed whether an NCAA eligibility rule should be deemed commercial for purposes of an antitrust challenge. In Bassett v. NCAA, 528 F.3d 426 (6th Cir. 2008), a former college coach brought a complaint which alleged, among other things, that the NCAA's enforcement **[**43]** of its recruiting and improper inducement rules violated the Sherman Act. Finding no violation, the Sixth Circuit noted that, for the Sherman Act to apply, the challenged action must be commercial in nature, and that cases like Smith draw the distinction between rules which provide a commercial advantage and those that seek to ensure fair competition in college sports.

The "appropriate inquiry is 'whether the rule itself is commercial, not whether the entity promulgating the rule is commercial.'" Id. at 433 (quoting Worldwide Basketball & Sport Tours, Inc. v. NCAA, 388 F.3d 955, 958 ***[***1982]*** (6th Cir. 2004)). Finding that the complaint lacked "the critical commercial activity component required to permit application of the Sherman Act," the court affirmed dismissal, writing:

> Similar to the eligibility rules in Smith, NCAA's rules on recruiting student athletes, specifically those rules prohibiting improper inducements and academic fraud, are all explicitly non-commercial. In fact, those rules are anti-commercial and designed to promote and ensure competitiveness amongst NCAA member schools. Violation of the applicable NCAA rules gives the violator a decided competitive advantage in recruiting and retaining highly prized student athletes. It also violates the spirit of amateur athletics **[**44]** by providing remuneration to athletes in exchange for their commitments to play for the violator's football program. . . .

Id. at 433; see also, Gaines v. NCAA, 746 F. Supp. 738, 744 (M.D. Tenn. 1990) ("The overriding purpose of the eligibility rules . . . is not to provide the NCAA with commercial advantage, but rather the opposite extreme — to prevent commercializing influences from destroying the unique 'product' of NCAA college football").

The same conclusion must be reached here. Right or wrong, under NCAA rules, other than the requirement that an athlete be a student, there can be no more basic eligibility rule for amateurism than that the athlete not be paid for playing his or her sport.

Notwithstanding the allegations in the Complaint, Plaintiffs argue in their response brief to the Licensing Defendants' Motion to Dismiss that "the amateurism rules that preclude Student Athlete Compensation are not the restraint at issue." (Docket No. 259 at 1). Rather, "the restraints at issue include, but are not limited to, the multi-million dollar broadcast contract and multi-media agreements that purport to transfer the right to use the [names and likeness] of Student Athletes." Id. Their attempt to distance themselves from a fundamental, underlying **[**45]** premise of their case only trades one problem for another.

HN14[] To have standing to pursue any claim, an aggrieved party must suffer an injury-in-fact. "A plaintiff suffers an 'injury in fact' when his legally protected interest has been invaded[.]" *Kiser v. Reitz, 765 F.3d 601, 607 (6th Cir. 2014)*. Here, Plaintiffs claim injuries because of their exclusion from a broadcasting marketplace in which they do not (or did not) get paid. However, the Court has concluded that, as **[*835]** a matter of law, Plaintiffs do not have a right to publicity in sports broadcasts. Because Plaintiffs do not have a right to publicity under Tennessee law — the very basis of their claim that they have a right to be paid for appearing in television broadcasts of games and in advertisements for such broadcasts — they cannot plead any antitrust injury.[11] And, they cannot have been injured by a purported conspiracy to deny them the ability to sell non-existent rights. See *Square D Co. v. Niagara Frontier Tariff Bur., Inc., 476 U.S. 409, 416, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986)* ("Injury implies violation of a legal right.").

Moreover, "[b]ecause protecting competition is the *sine qua non* of the antitrust laws," *Care Heating & Cooling, Inc. v. Am. Std., Inc., 427 F.3d 1008, 1014-15 (6th Cir. 2005)*, "[a] private antitrust plaintiff, in addition to having to show injury-in-fact and proximate cause, must allege, and eventually prove, 'antitrust injury.'" *In re Cardizem CD Antitrust Litig., 332 F.3d 896, 909 (6th Cir. 2003)*. Antitrust injury is an "injury of the type the antitrust laws were intended to prevent" and one "that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

HN15[] "[T]he antitrust injury doctrine is designed to ensure that 'the injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.'" *In re Cardizem, 332 F.3d at 909* (quoting *Brunswick Corp., 429 U.S. at 489 (1977))*. "'The Supreme Court has further explained the requirement as ensur[ing] that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the **[**47]** antitrust laws in the first place,' and, more specifically, **[***1983]** it 'ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.'" Id. (quoting *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342-343, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. "The Sixth Circuit, it is fair to say, has been reasonably aggressive in using the antitrust injury doctrine to bar recovery where the asserted injury, although linked to an alleged violation of the antitrust laws, flows directly from conduct that is not itself an antitrust violation." *Ky. Speedway LLC v. National Ass'n of Stock Car Auto Racing, 588 F.3d 908, 920 (6th Cir. 2009)*; *Valley Prods., Inc. v. Landmark, 128 F.3d 398, 403 (6th Cir. 1997))*.

Undoubtedly, there is stiff competition among the conferences to secure air time for games, among the networks to broadcast those games, and among the licensors to market college games, and Plaintiffs' allegations suggests as much. Maybe a market where players get paid would result in more competition, or at least vastly different competition. However, Plaintiffs fail to show how Defendants' behavior (most particularly that of Network and Broadcast Defendants), in complying with NCAA rules, can be said to be the cause of reduced competition and any concomitant antitrust injury. See *In re* ***[*836]*** *Canadian Import Antitrust Litig., 470 F.3d 785, 792 (8th Cir. 2006)* (antitrust complaint properly dismissed where plaintiffs alleged they were injured by increased prices for **[**48]** prescription drugs because they were unable to import less expensive drugs from Canadian pharmacies, but prohibition was based upon regulatory scheme of the government, not the conduct of the defendants).

Accordingly, Plaintiffs' antitrust claim under *Section One of the Sherman Act* must be dismissed.

---

[11] Plaintiffs argue that the Conference Defendants are mistaken when they assert that the absence of an enforceable right of publicity under Tennessee law is fatal to Plaintiffs' antitrust claim. Plaintiffs' point out that "the proposed Class includes Student **[**46]** Athletes from every state," and assert that "[t]he anticompetitive restraint at issue is national in character — the anticompetitive effects of which are palpable in every state in the country." (Docket No. 258 at 6). That may be so, but the only right of publicity pled is under Tennessee law. It is not this Court's duty to scour or canvass the law of every jurisdiction in order to determine whether Plaintiffs have stated a viable claim.

C. False Endorsement Under the *Lanham Act* — Fifth Cause of Action

For their Fifth Cause of Action, Plaintiffs bring a false endorsement claim against the Network and Licensing Defendants. Specifically, they claim:

> 178. Broadcast and Licensing Defendants have used, and continue to use, thousands of Class Members' names, images, and likenesses in connection with their advertisements for nationally televised airings of FBS football and NCAA Division I basketball games, for the explicit purpose of promoting the airings, increasing their brand awareness, and driving revenue to the Broadcast and Licensing Defendants.
> 179. Broadcast and Licensing Defendants have used, and continue to use, thousands of Class Members' names, images, and likenesses in the nationally televised airings of FBS football and NCAA Division I basketball games.
>
> 180. The names, images, and likenesses of many Class Members that **[**49]** Broadcast and Licensing Defendants use to promote their products are highly recognizable to consumers deciding whether to watch or order the Broadcast and Licensing Defendants' broadcasts of FBS football and Division I basketball games. FBS football and Division I basketball players also wear uniforms, and numbers, making them easily identifiable to consumers.
> 181. Broadcast and Licensing Defendants' use of Class Members' images in advertisements and nationally televised airings of FBS football and Division I basketball games has caused actual confusion among members of the public as to Class Members' support and endorsement of Defendants' broadcasts.
>
> 182. The use of Class Members' images in Broadcast and Licensing Defendants' advertisements and televised airings constitutes a false endorsement in violation of Plaintiffs; and Class Members' rights under *§ 43(a)* of the Lanham Act, *15 U.S.C. § 1125(a)*.

(Docket No. 1, Complaint ¶¶ 178-182).

Section 43(a)(1)(A) of the Lanham Act states:

> (1) Any person who, on or in connection with any goods or services, or any container for goods, uses in commerce any word, term name, symbol, or device, or any combination thereof . . . ,
> which-
>
> (A) is likely to cause confusion, or to cause mistake, or to **[**50]** deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person . . .
>
> **[***1984]** shall be liable in a civil action by any person who believes that her or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a). For two reasons, neither of which need be discussed in great detail given the ground that has already been plowed, Plaintiffs' *Lanham Act* claim must be dismissed.

First, ***HN16***[] "[t]he *Lanham Act* is constitutional because it only regulates commercial speech, which is entitled to reduced protections under the *First Amendment*." **[*837]** *Taubman Co. v. Webfeats, 319 F.3d 770, 774 (6th Cir. 2003)* (citing *Cent. Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n of New York, 447 U.S. 557, 563, 100 S. Ct. 2343, 65 L. Ed. 2d 341 (1980))*. "Commercial speech" is generally "speech that does no more than propose a commercial transaction[.]" *United States v. United Foods, 533 U.S. 405, 409, 121 S. Ct. 2334, 150 L. Ed. 2d 438 (2001)*.

Broadcasting sporting events does not "propose a commercial transaction." Rather, it depicts a real event and distributes desired speech (sports programming) to the public, and, thus, it is not "commercial speech" for purposes of *First Amendment* jurisprudence. See, *Dryer, 55 F. Supp.3d at 1184-87* (clips of game footage are protected by the *First Amendment* because they are noncommercial speech and convey factual information about football games).

Second, Plaintiffs fail to adequately allege likelihood of confusion, **[**51]** which is "the controlling issue" for the ordinary "false endorsement claim[.]" *ETW Corp. v. Jireh Pub., Inc., 332 F.3d 915, 925 (6th Cir. 2003)*. ***HN17***[] "False endorsement occurs when a celebrity's identity is connected with a product or service in such a way that consumers are likely to be misled about the celebrity's sponsorship or approval of the product or service." *Id. at 925-26*.

Plaintiffs' Complaint centers on the broadcast of sporting events, specifically, the airing of college football and basketball games. They merely allege that they played in games that were shown on television, and that advertisements appeared in the broadcast of the games. They plead no specific facts indicating when any of their images were used and, if so, by whom.

At the hearing on the Motions to Dismiss, Plaintiffs' counsel played a video clip from a St. John University versus San Diego State University tournament basketball game. The clip captured a player preparing to shoot a free-throw, while an advertisement for an upcoming television program appeared on the bottom of screen.

None of the present Plaintiffs are alleged to have played ball at either university. Regardless, it is simply implausible to conclude that the shooter or those along the key were in anyway endorsing the upcoming **[**52]** program, any more than Tennessee Titans players, their opponents, or spectators endorse Louisiana-Pacific building products (or, indeed, any of the host of other products displayed on the scoreboard) when games are played at LP field, even though such advertisements may be captured in the background during the game.

The broadcasts Plaintiffs complain about show football players or basketball players playing their sport. There is no confusion about what they are doing. Accordingly, their *Lanham Act* claim is subject to dismissal.

D. Civil Conspiracy, Unjust Enrichment & Accounting - Third, Sixth and Seventh Causes of Action

In light of the foregoing conclusions, all of Plaintiffs' remaining claims must be dismissed. Their civil conspiracy claim is linked to their right to publicity, *Sherman Act*, and *Lanham Act* claims, none of which survive; their unjust enrichment claims is based upon the alleged "unlawful agreements, contracts, combinations, and conspiracy"; and their request for accounting seeks an accounting to the extent that Defendants' unlawfully "misappropriated" their names, likenesses, and images.

III. Conclusion

College basketball and football, particularly at the Division I and **[**53]** FBS levels, is big business. Of that there can be little **[*838]** doubt. Many believe that "amateur" when applied to college athletes today is a misnomer — an artificial label and anathema, placed on players, like Plaintiffs, whose efforts on the court and field lead to untold riches for others, such as Defendants. Cogent arguments have been raised that it is time Student Athletes share in the bounty, above and beyond any scholarships they may receive.

In this case, however, the Court is not called upon to address the larger picture of whether, as a matter of recognition, equity or **[***1985]** fundamental fairness, Student Athletes should receive "pay for play." Nor is it the Court's task to pass on the wisdom of the NCAA's eligibility rules that bar compensation, or whether those rules capture reality, given the present nature and environment of college sports. The Court expresses no opinion on those issues.

Rather, the Court's sole task is to determine whether present Plaintiffs have alleged sufficient facts or stated a viable claim that they are entitled to monetary compensation because they play in televised games. The Court finds that Plaintiffs have not done so under any of the theories that they set forth. **[**54]** Accordingly, the Motions to

Dismiss filed by the Network Defendants, the Conference Defendants, and the Licensing Defendants will be granted. Said dismissal will be with prejudice.[12]

An appropriate Order will be entered.

/s/ Kevin H. Sharp

KEVIN H. SHARP

UNITED STATES DISTRICT JUDGE

ORDER

For the reasons set forth in the accompanying Memorandum, the Motions to Dismiss filed by the Conference Defendants (Docket No. 214), the Licensing Defendants (Docket No. 218), and the Network Defendants (Docket No. 220) are hereby GRANTED and this case is hereby DISMISSED WITH PREJUDICE. The Motions to Dismiss for Lack of Jurisdiction (Docket Nos. 226 & 231) are hereby DENIED AS MOOT.

The Clerk of the Court shall **[**55]** enter a final judgment in accordance with *Rule 58 of the Federal Rules of Civil Procedure*.

It is SO ORDERED.

/s/ Kevin H. Sharp

KEVIN H. SHARP

UNITED STATES DISTRICT JUDGE

End of Document

[12] In their moving papers, Defendants repeatedly request that dismissal of the claims be with prejudice. ***HN18***[] In the absence of a Motion to Amend, defendants are "'entitled to a review of the complaint as filed pursuant to *Rule 12(b)(6)*'"; plaintiffs are "'not entitled to an advisory opinion from the Court informing them of the deficiencies of the complaint and then an opportunity to cure those deficiencies.'" *La. Sch. Bd. Emps' Ret. Sys. v. Ernst & Young, LLP, 622 F.3d 471, 478 (6th Cir. 2010)* (quoting *Begala v. PNC Bank, Ohio, Nat. Ass'n, 214 F.3d 776, 784 (6th Cir. 2000))*. Notwithstanding Defendants' request, Plaintiffs have not moved to amend to cure any deficiencies.

Opinion

MEMORANDUM AND ORDER

COGAN, District Judge.

Plaintiff *pro se*, who paid the requisite filing fee for this action, is suing defendants under numerous federal statutes. His submission consists of three documents: (1) a complaint; (2) a "Memorandum of Law and Discussion in Support of the Complaint;" and (3) a "Suplamental [*sic*] Qui Tam complaint." For the reasons discussed below, the complaint is dismissed as frivolous, and plaintiff is directed to show cause why he should not be barred from filing future frivolous complaints related to these allegations without leave of the Court.

BACKGROUND

I. The Complaint

The Complaint purports to assert jurisdiction under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), the Federal Tort Claims Act ("FTCA"), *42 U.S.C. §§ 1981-89*, *Bivens v. Six Unknown Named Agents of Federal Bureau of Narcotics, 403 U.S. 388, 91 S. Ct. 1999, 29 L. Ed. 2d 619 (1971)*, "Antitrust," and "Civil Conspiracy." However, not a single one of these claims is alleged with particularity. Plaintiff asserts that the "Fanjul Organized Crime Family" has conspired with the Federal Bureau of Investigation ("FBI") in a variety of nefarious misdeeds, including the destruction of plaintiff's financial firm, **[*2]** Revcon; the assassinations of President John F. Kennedy and Robert Kennedy; "entrapp[ing] President Clinton with Monica Lewinski hoping to impeach the President"; fixing the 2000 presidential election; "destroy[ing] the lives of some 300 Palm Beach residents [who] . . . ended up in, divorce, bankruptcy and some in suicide"; and causing the downfall of "Madoff" (presumably Bernard Madoff), MF Global, Lehman Brothers, and other financial institutions. Plaintiff alleges that the Town of Palm Beach and its police department harassed him and other residents, as "RICO enterprises promoting the interest of the Fanjul Organized Crime Family."

Plaintiff further alleges that "there is a tangible pattern of some 60 federal and state cases that I was involved be assigned to judges formerly in criminal justice and friends of high level FBI officials or Judges from the Caribbean that the Fanjul Brothers could secretively bribe offshore" [*sic*]. As a result, he alleges that multiple cases have been decided against him, including bankruptcy filings, creditor cases, and civil rights actions in the United States District Court for the Southern District of New York. Plaintiff alleges that the assigned judges are "biased or corrupt" **[*3]** and selected "for the benefit of the FBI and the Fanjul Crime Family." He asserts that his prior filings in this district assigned to the Honorable Dora L. Irizarry were also the result of "prejudicial judicial assignments" because Judge Irizarry was a former prosecutor and criminal court judge and a "native of Puerto Rico." "Naturally all [of plaintiff's] cases were dismissed as frivolous." In filing the instant case, plaintiff asserts: "The unknown Judge that this case might be assigned, with prior connections to the DOJ, Criminal Justice, Enforcement or the Caribbean is also preemptively named as a Defendant."

The Complaint further alleges that the State and City of New York "have clearly rigged their courts for the benefit of the FBI and the Fanjul Crime Family and the Town of Palm Beach." According to the Complaint, plaintiff's Family Court actions were improperly decided because his ex-wife was awarded custody of his son and given "150% of a $15 million marital estate." Plaintiff states that his state court cases against the FBI and other entities and individuals were "instantly dismissed," including his claims of "vicious injuries inflicted by NYPD during an arrest," whereas **[*4]** he was found liable in cases brought by his creditors and was prosecuted on criminal charges. His efforts to have records at a mental institution sealed in another case were denied. In a criminal case brought against plaintiff in state court, he alleges that one of the presiding judges ordered his incarceration and detention in a psychiatric center. "Two months after closure of this case Judge Amaker purchased a $1 million mansion . . . putting down a hefty $500,000 which she could not possibly have saved being a 9 year Bronx Assistant DA."

Plaintiff seeks damages against New York City and New York State "for arresting me, prosecuting me, imprisoning me, detaining me in a mental institution, inflicting cruel and unusual punishment and even shoving syringes in me . . . all because I was exercising my constitutional right to free speech." He states that the statute under which he was arrested, Aggravated Harassment in the Second Degree, was later rendered unconstitutional. The complaint does not include details, including the date or location, of any specific incident.

Plaintiff asserts that he was forced to live near former United States Attorney General Michael Mukasey, and that this **[*5]** proximity allowed "FBI agents and Fanjul thugs working togother, with Mukasey's and ISTA [Management]'s permission and cooperation . . . [to] easily come to my floor, enter my apartment and inflict injuries." He alleges that he was drugged, causing him to injure his femur; that his apartment "was infested with mosquitoes carrying an antibiotic resistant virus" that left numerous scars; and that Mukasey threw a party at which "someone closely resembling Judge Preska" attended. That individual pointed towards plaintiff's apartment.

Plaintiff seeks to recover $5 billion, "which is what my net worth would have reasonably been today had defendants not conspired to deprive me of my constitutional rights." It seeks an additional "trembled [*sic*] damages of $10 billion pursuant to RICO," "[u]nspecified damages," punitive damages, interest, costs, and "reasonable attorney fees." Plaintiff also seeks "to vacate every decision rendered by any Judge named as a defendant in this conspiracy."

Finally, he requests injunctions, one seeking the removal of named and unnamed judges from his cases, and another "restraining the FBI and the Fanjul Borthers from directly or indirectly interfering in my life."

II. "Memorandum [*6] of Law and Discussion in Support of the Complaint"

The second document plaintiff submitted states, "This Memorandum of Law and discussion are offered for the purpose of preventing errors by the Court in dismissing [] this case as frivolous." It describes plaintiff's court cases in West Palm Beach, the S.D.N.Y., and the E.D.N.Y., as well as the allegedly corrupt and biased judges who presided over his cases. It also mentions his arrest, prosecution, and detention, but does not provide any details. Plaintiff acknowledges potential concerns about *res judicata* and judicial immunity, but asserts that "Antitrust and Civil Conspiracy" and "RICO claims for the period 2011-2015 remain entirely un-adjudicated and cannot be dismissed as res judicata."

As a basis for federal jurisdiction, plaintiff asserts the FTCA, RICO, and "***Antitrust" law***, based on his claims that "the FBI/FCF badmouthed my son in every private school" near Palm Beach, destroyed his finance firm, forced him to live next door to Michael Mukasey, and prevented him from hiring a civil rights attorney and CPA. The Memorandum also raises "Qui Tam Claims" and asserts that "a judge can not dismiss Qui Tam Claims for 60 days to enable **[*7]** notified interested Government parties to take over the case or join."

The Memorandum includes three exhibits: (1) a Federal Claim form alleging, "Life Systematically Destroyed by the FBI for profit;" (2) a New York City Notice of Claim form; and (3) an email from Phyllis Ann Good, describing her own claims against the Fanjuls.

III. "Suplamental [*sic*] Qui Tam Complaint"

In the third document, plaintiff purports to bring a *qui tam* action pursuant to *31 U.S.C. §§ 3729-3733*, which plaintiff describes as the "Whistleblowers Act." In it, plaintiff asserts that the "Whistleblowers Act" permits him to bring this action on behalf of the United States, that the complaint must be filed under seal for 60 days, and that it cannot be *sua sponte* dismissed during that time period. Plaintiff states that he seeks to recover funds "on behalf of the bankruptcy estates of Lehman, MF Global, Refco, Madoff Securities, Papadopoulos, the US Trustees and SIPC." He seeks recovery of "an estimated amount in excess of $40+ billion."

The document repeats the allegations about the Fanjul brothers' past crimes and corruption and their conspiracy with the FBI. It also includes new material about "Plaintiff's personal experiences," "the Madoff **[*8]** incident," and other failed financial institutions alleged to have been brought down by "FBI/FCF."

IV. Prior Litigation:

Plaintiff is a prolific filer of lawsuits — "filing or defending" approximately 60, by his own estimation. In addition to the multiple cases he describes in the Florida and New York courts, he has filed at least 13 civil actions in the S.D.N.Y., and 3 prior actions in this district.[1] By Order dated February 8, 2011, plaintiff was barred from filing further

---

[1] His S.D.N.Y. cases include Fair Credit Reporting Act claims, *Papadopoulos v. Tenet Good Samaritan Inc., 08 Civ. 989 (DLC), 2008 U.S. Dist. LEXIS 76866* (bill collection action removed by Papadopoulos to federal court, where it was dismissed for lack of personal jurisdiction), bankruptcy appeals, *In Re: Gregory Papadopoulos, et al., No. 14 Civ. 3713 (KPF), 2014 U.S. Dist. LEXIS 111599*; In Re: Gregory Papadopoulos, No. 14 mc 148 (ER); *In Re: Gregory Papadopoulos; No. 14 Civ. 4750 (ER), 2015 U.S. Dist. LEXIS 27168*; **[*9]** In Re: Gregory Papadopoulos, No. 15 Civ. 1642 (PGG), Social Security cases, *Papadopoulos v. Comm'r of Soc. Sec., No. 10 Civ. 7980 (RWS), 2011 U.S. Dist. LEXIS 126804*; *Papadopoulos v. Comm'r of Soc. Sec., No. 13 Civ. 3163 (RWS), 2014 U.S. Dist. LEXIS 67586*, and civil rights actions, *Papadopoulos v. United States Gov't, et al., No. 08 Civ. 11256 (RMB), 2010 U.S. Dist. LEXIS 81018, 2010 WL 3155037 (Aug. 9, 2010)* (granting defendants' motions to dismiss plaintiff's civil rights claims against the Palm Beach Police and the FBI); *Papadopoulos v. Mineeva, et al., No. 10 Civ. 4882, 2011*

actions in the S.D.N.Y. without prior permission from the court. *Papadopoulos v. Mineeva, et al., No. 10 Civ. 4882, 2011 U.S. Dist. LEXIS 157219 (S.D.N.Y. Feb. 8, 2011)*. Although that case was filed *in forma pauperis*, the filing injunction neither relied on *28 U.S.C. § 1915(e)* nor limited the ban to cases seeking IFP status.

Plaintiff filed three prior cases in this district. In **[*10]** *Papadopoulos v. Amaker, et al., No. 12 Civ. 3608 (DLI), 2013 U.S. Dist. LEXIS 89796*, he sued the judge presiding over his 2011 state court criminal prosecution (and other defendants) regarding the proceeding and his detention in the Manhattan Psychiatric Center. It also included references to his Family Court proceedings and the alleged conspiracies involving the FBI and "Palm Beach Mafia" that are the subject of the instant complaint. Judge Irizarry granted defendants' motions to dismiss and warned plaintiff that the future filing of non-meritorious complaints could result in the issuance of a filing injunction.

While that case was pending, plaintiff filed two additional actions, *Papadopoulos v. Obama, et al., No. 13 Civ. 0810 (DLI), 2013 U.S. Dist. LEXIS 55093*, and *Papadopoulos v. Fanjul, et al., No. 13 Civ. 2456 (DLI), 2013 U.S. Dist. LEXIS 86622*. Judge Irizarry found that these cases advanced "frivolous and fantastic allegations of the purported conspiracy between the Palm Beach Mafia and various members and branches of government." *Papadopoulos v. Amaker, et al., No. 12 Civ. 3608, 2013 U.S. Dist. LEXIS 89796, 2013 WL 3226757, at *5 (E.D.N.Y. Jun. 25, 2013)*. Thus, she dismissed both cases *sua sponte* and warned plaintiff that further frivolous litigation could result in issuance of a filing injunction. See, e.g., *Papadopoulos v. Fanjul, No. 13 Civ. 2456, 2013 U.S. Dist. LEXIS 86622, 2013 WL 3149455, at *2 (E.D.N.Y. Jun. 19, 2013)*.

DISCUSSION

I. Dismissal of the Complaint

The Court is mindful that "[a] document filed *pro* ***[*11]*** *se* is to be liberally construed, and a *pro se* complaint, however inartfully pleaded, must be held to less stringent standards than formal pleadings drafted by lawyers." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)* (internal quotation marks and citations omitted). If a liberal reading of the complaint "gives any indication that a valid claim might be stated," the Court must grant leave to amend the complaint. See *Cuoco v. Moritsugu, 222 F.3d 99, 112 (2d Cir. 2000)*. Moreover, at the pleading stage of the proceeding, the Court must assume the truth of "all well-pleaded, nonconclusory factual allegations" in the complaint. *Kiobel v. Royal Dutch Petroleum Co., 621 F.3d 111, 123 (2d Cir. 2010)* (citing *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949-50, 173 L. Ed. 2d 868 (2009)*. A complaint must plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 1960, 167 L. Ed. 2d 929 (2007)*. Although "detailed factual allegations" are not required, "[a] pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do." *Ashcroft, 556 U.S. at 678, 129 S. Ct. at 1949* (internal quotation marks and citations omitted). "Factual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555, 127 S. Ct. at 1965*.

Regardless of whether a plaintiff has paid the filing fee, a district court has the inherent power to dismiss a case, *sua sponte*, if it determines that the action is frivolous or the court lacks jurisdiction over the matter. *Fitzgerald v. First East Seventh St. Tenants Corp., 221 F.3d 362, 363-64 (2d Cir. 2000)*; *Fed. R. Civ. P. 12(h)(3)*. An **[*12]** action is "frivolous" when either: (1) "the factual contentions are clearly baseless, such as when allegations are the product of delusion or fantasy"; or (2) "the claim is based on an indisputably meritless legal theory." *Livingston v.*

U.S. Dist. LEXIS 157219 (S.D.N.Y. Feb. 8, 2011) (barring plaintiff from filing further actions in the court without prior permission and noting June 23, 2010 Order dismissing the case as frivolous and duplicative); Papadopoulos v. City of New York, et al., No. 10 Civ. 9454 (GBD) (dismissed in light of the February 8, 2011 filing injunction); *Papadopoulos v. Obama, et al., No. 12 Civ. 8736 (LAP), 2012 U.S. Dist. LEXIS 190430* (same); and Papadopoulos v. The Clerk of the Court for the SDNY, No. 13 Civ. 724 (LAP) (request for leave to file dismissed as meritless). In addition to the publicly available cases, plaintiff makes a reference to "Papadopoulos v. Gazes et al 13-1506 for similar claims prior to 2013." That case is filed under seal.

Adirondack Beverage Co., 141 F.3d 434, 437 (2d Cir. 1998) (internal quotation marks and citation omitted). "[A] finding of factual frivolousness is appropriate when the facts alleged rise to the level of the irrational or the wholly incredible, whether or not there are judicially noticeable facts available to contradict them." *Denton v. Hernandez, 504 U.S. 25, 33, 112 S. Ct. 1728, 1733, 118 L. Ed. 2d 340 (1992)*. "A court may dismiss a claim as 'factually frivolous' if the sufficiently well-pleaded facts are 'clearly baseless'—that is, if they are 'fanciful,' 'fantastic,' or 'delusional.'" *Gallop v. Cheney, 642 F.3d 364, 368 (2d Cir. 2011)* (quoting *Denton, 504 U.S. at 32-33, 112 S. Ct. at 1733*).

In this case, plaintiff's submissions allege a vast conspiracy between a few Florida individuals and various government officials at all levels in events ranging from the assassination of President Kennedy, to the collapse of global financial entities, to the manipulation of plaintiff's divorce and bankruptcy cases, to the interference with plaintiff's ability to find an apartment or hire a CPA or attorney. These allegations "rise to the level of the irrational or the wholly incredible." *Denton, 504 U.S. at 33, 112 S. Ct. at 1733*. Plaintiff's three **[*13]** prior cases in this district alleged similar fantastic claims and were dismissed. Since the instant complaint is devoid of any basis in law or fact, this action is also dismissed as frivolous without leave to amend, as any such amendment would be futile. See *Cuoco, 222 F. 3d at 112*.

II. No Basis for *Qui Tam* Action

Plaintiff also purports to bring his claims as a *qui tam* complaint pursuant to the "Whistleblowers Act." The False Claims Act ("FCA"), *31 U.S.C. § 3729 et seq.*, provides for liability when any person "knowingly presents, or causes to be presented, a false or fraudulent claim for payment or approval." *31 U.S.C. § 3729(a)(1)*. The *qui tam* provisions of the FCA allow a private individual, known as a relator, to "bring a civil action for a violation of *section 3729* for the person and for the United States Government . . . in the name of the Government." *31 U.S.C. § 3730(b)(1)*. "The complaint shall be filed in camera, shall remain under seal for at least 60 days, and shall not be served on the defendant until the court so orders." *31 U.S.C. § 3730(b)(2)*. During this 60-day period, the United States may elect to intervene in the action or allow the relator to proceed on behalf of the United States, or move to dismiss the action. *31 U.S.C. §§ 3730(b)(4)* and *(c)(2)(A)*.

A *qui tam* action under the FCA is brought "on behalf of and in **[*14]** the name of the government" while the "government remains the real party in interest." *U.S. ex rel Kreindler & Kreindler v. United Technologies Corp., 985 F.2d 1148, 1154 (2d Cir. 1993)*. The *qui tam* relator acts in a representative capacity and not on his own behalf. *Pro se* litigants can only act on their own behalf and not for the benefit of any other party or interest. See *Iannaccone v. Law, 142 F.3d 553, 558 (2d Cir. 1998)*. Accordingly, a *qui tam* relator cannot proceed *pro se*. See *United States ex rel. Mergent Servs. v. Flaherty, 540 F.3d 89, 93 (2d Cir. 2008)*.

Plaintiff argues that his proposed *qui tam* suit cannot be *sua sponte* dismissed until 60 days have elapsed and the United States government has decided whether to intervene. He is mistaken. One provision of the FCA provides that an action brought under the FCA "may be dismissed only if the court and the Attorney General give written consent to the dismissal and their reasons for consenting." *31 U.S.C. § 3730(b)(1)*. However, *Rule 12(h)(3) of the Federal Rules of Civil Procedure* establishes the general rule: "Whenever it appears by suggestion of the parties *or otherwise* that the court lacks jurisdiction of the subject matter, the court *shall* dismiss the action." *Fed.R.Civ.P. 12(h)(3)* (emphasis added). In this case, plaintiff cannot proceed *pro se* under the FCA; thus the Court lacks jurisdiction over his claims. See *U.S. ex rel. Rafael Manuel Pantoja v. Citigroup, Inc., et al., No. 12 Civ. 4964, 2013 U.S. Dist. LEXIS 15548, 2013 WL 444030 (E.D.N.Y. Feb. 5, 2013)* (dismissing action *sua sponte* because *pro se* plaintiff cannot proceed as a relator in a *qui tam* case); see also *Ananiev v. Freitas, 37 F. Supp. 3d 297, 307 (D.D.C. 2014)* (dismissing *sua sponte* ***[*15]*** where "[t]he plaintiff's FCA claims . . . fail to state a claim upon which relief may be granted because he is impermissibly attempting to proceed *ex relatione* without counsel.").

Plaintiff *pro* se may not proceed as a relator in a *qui* tam action. Therefore, because the Court lacks subject matter jurisdiction in this case, plaintiff's proposed claims under the FCA are dismissed *sua sponte*.

III. Proposed Filing Injunction

The federal courts have limited resources. Frequent frivolous filings work to diminish the ability of the courts to manage their dockets for the efficient administration of justice. "The district courts have the power and the obligation to protect the public and the efficient administration of justice from individuals who have a history of litigation entailing vexation, harassment and needless expense to other parties and an unnecessary burden on the courts and their supporting personnel." *Lau v. Meddaugh, 229 F.3d 121, 123 (2d Cir. 2000)* (internal quotation marks omitted). "If a litigant has a history of filing vexatious, harassing or duplicative lawsuits, courts may impose sanctions, including restrictions on future access to the judicial system." *Hong Mai Sa v. Doe, 406 F.3d 155, 158 (2d Cir. 2005)* (internal quotations and citations omitted). "The unequivocal rule in this **[*16]** circuit is that the district court may not impose a filing injunction on a litigant *sua sponte* without providing the litigant with notice and an opportunity to be heard." *Moates v. Barkley, 147 F.3d 207, 208 (2d Cir. 1998)*.

Plaintiff is already on notice. He is already barred from filing future actions in the United States District Court for the Southern District of New York without prior permission. *Papadopoulos v. Mineeva, 10 Civ. 4882, 2011 U.S. Dist. LEXIS 157219 (S.D.N.Y. Feb. 8, 2011)*. In this district, he has thrice been warned that further filing of non-meritorious complaints may result in limitations on his ability to file future complaints. The instant complaint raises the same fantastic allegations that were previously asserted and dismissed in prior cases in this district and in the S.D.N.Y. The Court finds that plaintiff's frequent frivolous filings detract from the legitimate cases before it. Accordingly, plaintiff is directed to show cause, by written affirmation, within 20 days of the date of this Memorandum and Order, why the Court should not bar the acceptance for filing of any future frivolous complaints related to these allegations without leave of the Court. If plaintiff fails to show cause within the time allotted, he shall be barred **[*17]** from filing any future frivolous complaints related to these allegations without leave of the Court.

CONCLUSION

For the reasons set forth above, this action is dismissed as frivolous. Plaintiff is directed to show cause by written affirmation, within 20 days of the date of this Memorandum and Order, why he should not be barred from filing future frivolous complaints related to these allegations without leave of the Court. Although plaintiff paid the filing fee to bring this action, the Court certifies pursuant to *28 U.S.C. § 1915(a)(3)* that any *in forma pauperis* appeal from this order would not be taken in good faith. *Coppedge v. United States, 369 U.S. 438, 444-45, 82 S. Ct. 917, 920-21, 8 L. Ed. 2d 21 (1962)*.

SO ORDERED.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss should be granted under *Fed. R. Civ. P. 12(b)(6)* where the pleadings fail to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. The court must accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party, drawing all reasonable inferences from those facts in the nonmoving party's favor. A complaint may be dismissed if it does not allege enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. However, a complaint does not suffice if it tenders naked assertions devoid of further factual enhancement, and the court need not assume the truth of legal conclusions merely because they are cast in the form of factual allegations. If a motion to dismiss is granted, a court should normally grant leave to amend unless it determines that the pleading could not possibly be cured by allegations of other facts.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN2[] **Antitrust & Trade Law, Sherman Act**

The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act, *Cal. Bus. & Prof. Code § 16700*, was modeled after the Sherman Act.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN3[] **Sherman Act, Claims**

The offense of monopoly under § 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To violate the second element, a defendant must use its monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To be actionable under § 2 of the Sherman Act, a monopolist's conduct must have an anticompetitive effect. That is, it must harm the competitive process and thereby harm consumers. In contrast, harm to one or more competitors will not suffice. Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN5[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To be actionable under § 2 of the Sherman Act, a monopolist's conduct must foreclose competition in a substantial share of the line of commerce affected. Establishing that a substantial share of the relevant market is foreclosed is necessary because, for the monopolist's conduct to adversely affect competition, the opportunities for other traders to enter into or remain in that market must be significantly limited. To determine substantiality in a given case, it is necessary to weigh the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] **Deceptive & Unfair Trade Practices, State Regulation**

To plead a claim under the California Unfair Practices Act, *Cal. Bus. & Prof. Code §§ 17043*, *17044*, the plaintiff must allege defendant's sales price, its cost in the product and its cost of doing business. To satisfy the pleading requirements of *§ 17043*, the plaintiff must allege defendant's sales price, its cost in the product and its cost of doing business.

Opinion

[*829] ORDER GRANTING MOTION TO DISMISS WITH LEAVE TO AMEND

Re: Dkt. No. 20

INTRODUCTION

Plaintiffs seek to assert antitrust and related state-law claims against defendant **[*830]** Quest Diagnostics Incorporated for its alleged monopoly pricing for routine diagnostic testing services. Plaintiffs' claims fail because they have not sufficiently alleged that they were injured by Quest's anticompetitive practices or that Quest's conduct foreclosed competition in a substantial share of the relevant market. Plaintiffs' complaint is DISMISSED WITH LEAVE TO AMEND.

BACKGROUND

Plaintiffs Colleen Eastman, Christi Cruz, and Carmen Mendez are individuals who have paid **[**2]** for out-patient routine diagnostic testing services by Quest. Compl. ¶¶ 33-35 [Dkt. No. 1]. Their payments to Quest were "as a result of" or "to fulfill" their "co-payment and deductible obligations." *Id.* They allege that Quest was able to charge above-competitive prices for its diagnostic testing services as a result of its exclusionary anti-competitive practices, including eliminating competitors and colluding with major health plans to limit competition in the diagnostic testing services market. *Id.* ¶¶ 115-117.

Plaintiffs allege four causes of action against Quest: (i) monopolization in violation of Section 2 of the Sherman Act; (ii) violation of California's Unfair Competition Law, Cal. Bus. & Prof. Code § 17200; (iii) violation of California's Unfair Practices Act, Cal. Bus. & Prof. Code §§ 17043, 17044; and (iv) monopolization in violation of California's Cartwright Act, Bus. & Prof. Code § 16700.

LEGAL STANDARD

HN1[] A motion to dismiss should be granted under Federal Rule of Civil Procedure 12(b)(6) where the pleadings fail to state a claim upon which relief can be granted. Fed. R. Civ. P. 12(b)(6). The court must "accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party," Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008), drawing all "reasonable inferences" from those facts in the nonmoving party's favor, **[**3]** Knievel v. ESPN, 393 F.3d 1068, 1080 (9th Cir. 2005). A complaint may be dismissed if it does not allege "enough facts to state a claim to relief that is plausible on its face." Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). "A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009). However, "a complaint [does not] suffice if it tenders naked assertions devoid of further factual enhancement," *id.* (quotation marks and brackets omitted), and the court need not "assume the truth of legal conclusions merely because they are cast in the form of factual allegations," W. Min. Council v. Watt, 643 F.2d 618, 624 (9th Cir. 1981). If a motion to dismiss is granted, a court should normally grant leave to amend unless it determines that the pleading could not possibly be cured by allegations of other facts. Cook, Perkiss & Liehe v. N. Cal. Collection Serv., Inc., 911 F.2d 242, 247 (9th Cir.1990).

DISCUSSION

Quest moves to dismiss the complaint, arguing that (i) plaintiffs lack Article III and statutory standing because they do not allege that Quest's conduct had any impact on the amount they paid for Quest's services; (ii) the monopolization claims fail because plaintiffs do not plead facts necessary to show that Quest's conduct injured competition; (iii) plaintiffs do not plead Quest's pricing and costs necessary to sustain **[**4]** the Unfair Practices Act claim; and (iv) the Unfair Competition Law claim is derivative of the other claims. I heard **[*831]** oral argument on May 13, 2015 and now address each argument in turn.

I. STANDING

A. Article III and statutory standing

Quest argues that plaintiffs lack Article III and statutory standing because plaintiffs do not allege that their co-payments or deductibles are higher because of Quest's conduct or would be lower if their testing had been referred to a competitor of Quest. Plaintiffs respond that the purchase of products affected by an anti-competitive overcharge is sufficient to establish standing and that they have satisfied this showing because they allege that "they were injured by the monopoly overcharges that they paid for routine diagnostic testing performed by Quest." Dkt. No. 25 at 19.

Plaintiffs cite to paragraphs 1 and 115-117 of their complaint. *Id.* Those paragraphs state, in their entirety:

> 1. This is a class action under the Sherman Act and related state laws on behalf of health plans and out-patients to recover monopoly overcharges that they have paid directly to Quest Diagnostics Incorporated for routine diagnostic testing.
>
> 115. As a result of its long-term **[**5]** and persistent pattern of kickbacks, exclusionary contracting with aligned health insurers, and acquisitions to advance its overall scheme to monopolize, Quest has injured, and

> continues to injure, competition in the relevant market for plan/out-patient billing. The injury to competition is manifest in at least three ways: above-competitive prices, inferior quality of testing, and reduction in choice among providers of routine diagnostic testing.
> 116. There is ample evidence that Quest has controlled prices in the relevant market in Northern California since at least 2011.
> 117. Quest is a rational monopolist. It often substantially discounts its prices in the physician billing market to well below cost to get pull-through business in the relevant plan/out-patient billing market; therefore, it must add a monopoly premium for pull-through testing to compensate for its below-cost prices. The fact that it has been able to charge such premiums for over a decade is strong evidence of its control over pricing in the relevant market for plan/out-patient billing.

Paragraphs 1 and 115-117 do not allege that plaintiffs made any payments to Quest, what portion of their co-payment or deductible obligations **[**6]** relate to testing performed by Quest, or that any payments were higher as a result of Quest's anticompetitive conduct. Plaintiffs allege elsewhere that they made payments to Quest "as a result of" or "to fulfill" their "co-payment and deductible obligations," Compl. ¶¶ 33-35, but they do not identify their health plans, whether they are covered by an HMO, PPO, or indemnity plan, or the amount they paid to Quest.

At oral argument, counsel for plaintiffs argued that plaintiffs sufficiently alleged antitrust injury because paragraph 115 alleges that "[t]he injury to competition is manifest in . . . above-competitive prices." But merely alleging that Quest charged above-competitive prices, without alleging facts demonstrating that plaintiffs were injured as a result of Quest's anticompetitive conduct, is insufficient. As plaintiffs have pleaded no facts from which I can conclude that they have been injured, they lack both Article III and statutory standing. *See, e.g.,* *Gerlinger v. Amazon.com, Inc., 526 F.3d 1253, 1254 (9th Cir. 2008)* ("the plaintiff **[*832]** lacks standing because he did not show that he ever purchased an item for a higher price than he would have paid had there been no marketing agreement and thus has suffered no injury-in-fact"); *Spindler v. Johnson & Johnson Corp., No. 10-cv-01414 JSW, 2011 U.S. Dist. LEXIS 158559, 2011 WL 12557884, at *4 (N.D. Cal. Aug. 1, 2011)* **[**7]** (dismissing antitrust claims where plaintiffs identified how much they paid alleged conspirators for medications, but did not allege that their co-payments increased as a result of the alleged anti-competitive conduct).

The cases cited by plaintiffs are inapposite. *Perez v. State Farm Mut. Auto. Ins. Co., 319 F. App'x 615 (9th Cir. 2009)* is an unpublished memorandum disposition and is not precedential. In any event, it did not involve alleged harm based on co-payments or deductibles. Rather, the plaintiffs in *Perez* alleged that the defendant automobile insurers conspired to "artificially inflate[] premiums." *Id. at 617*. There is no such allegation here. *Giuliano v. SanDisk Corp.* also involved alleged products purchased from defendant at above-competitive prices and is likewise inapposite. *10-cv-02787 SBA, 2014 U.S. Dist. LEXIS 132163, 2014 WL 4685012, at *3 (N.D. Cal. Sept. 19, 2014)* ("Ritz has alleged that it purchased tens of millions of dollars of flash memory products from SanDisk, and that, due to SanDisk's monopolization of the relevant market for flash memory products, Ritz paid above-competitive prices for such products").

Because plaintiffs have not sufficiently alleged that they were injured as a result of Quest's conduct, they lack standing and their claims are DISMISSED WITH LEAVE TO AMEND.

B. Standing on behalf [8] of health plans**

Plaintiffs seek to represent a class of "out-patients *or health plans* residing in Northern California who have paid Quest directly for routine diagnostic testing on or after January 29, 2011 under plan/out-patient billing arrangements." Compl. ¶ 40 (emphasis added). Quest argues that the named plaintiffs, who are individuals who allegedly received diagnostic testing from Quest, lack standing to represent health plans.

Plaintiffs contend that they have standing to assert claims on behalf of health plans because "both the out-patients and the plans that are members of the class are harmed in exactly the same way. Both pay Quest directly and both are subject to Quest's overcharging." Dkt. No. 25 at 21. In support, plaintiffs cite my statement in *Ang v. Bimbo Bakeries USA, Inc.*, that:

> The Ninth Circuit, consistent with *Gratz*, has cautioned courts that when addressing standing in the context of a class action, in 'determining what constitutes the same type of relief or the same kind of injury, we must be careful not to employ too narrow or technical an approach. Rather, we must examine the questions realistically: we must reject the temptation to parse too finely, and consider **[**9]** instead the context of the inquiry.'

*No. 13-cv-01196-WHO, 2014 U.S. Dist. LEXIS 34443, 2014 WL 1024182, at *4 (N.D. Cal. March 13, 2014)* (citing *Armstrong v. Davis, 275 F.3d 849, 867 (9th Cir. 2001))*.

Ang was a food mislabeling case and is inapposite. There I held that class representatives had standing to assert claims on behalf of class members who purchased substantially similar products that were mislabeled in the same way because the alleged injury was identical. *Ang, 2014 U.S. Dist. LEXIS 34443, 2014 WL 1024182, at *8* ("The injury allegedly suffered by the plaintiffs is identical to the injury suffered by consumers who purchased the other type of bread."). Unlike *Ang*, the complaint here does not **[*833]** allege facts from which I can conclude that the alleged injuries suffered by the named plaintiffs and health-plans are identical. Any injury to health plans would depend on the pricing agreements the health plans have with Quest and how those prices have been affected by the challenged conduct. Given the different nature of the relationship between individual patients and Quest on one hand and between health plans and Quest on the other, plaintiffs' conclusory statement that the injuries are identical is insufficient to confer standing for health plans.

II. MONOPOLIZATION CLAIMS[1]

Plaintiffs allege that Quest competes in two relevant product markets for the sale of routine diagnostic testing in Northern California: (i) the plan/out-patient market and (ii) the physician billing market. Compl. ¶¶ 3-4. In the plan/out-patient market, routine diagnostic testing is billed directly to health plans or out-patients. The plan or the out-patient typically pays Quest directly for testing, on a test-by-test basis ("fee-for-service testing"). In many instances, the bills are paid jointly by the plan and the out-patient (through deductibles or other plan terms). In contrast, in the physician billing market, Quest bills medical providers directly for routine diagnostic testing.

Plaintiffs allege that Quest has monopolized and "substantially foreclosed competition" in the plan/out-patient market through three exclusionary practices:

> (1) it has paid kickbacks to medical providers (in the form of dramatically below-cost **[**11]** billings) in the relevant market for physician billing to induce them to refer all other routine diagnostic testing done in the relevant market for plan/out-patient billing to Quest exclusively regardless of Quest's pricing or its testing quality[2];
> (2) it has colluded with two major private health insurers [Blue Shield of California and Aetna] to suppress its competition in the relevant market for plan/out-patient billing; and
> (3) it has acquired its competitors for plan/out-patient billing in order to eliminate their competition. As a result of these exclusionary practices, since at least 2011, Quest has been able to charge above-competitive prices to members of the Class while providing inferior quality service.

Compl. ¶ 20; *see also id.* ¶¶ 30, 70, 130, 148.

The three alleged exclusionary practices by Quest were previously considered in this district in *Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc.*, No. 12-cv-05847, a separate matter brought by various medical **[**12]**

---

[1] I analyze plaintiffs' monopolization claims under the Sherman Act and California's Cartwright Act (first **[**10]** and fourth causes of action) jointly under federal law because the Cartwright Act mirrors the Sherman Act. *See Cnty of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* (***HN2***[] "The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act was modeled after the Sherman Act.").

[2] Plaintiffs do not allege that Quest has monopolized the physician billing market itself. Rather, it alleges that Quest leveraged its position in the physician billing market to foreclose competition in the plan/out-patient market.

diagnostic laboratories against Quest and other defendants which included monopolization claims similar to those at issue here. Judge Tigar granted the defendants' motion to dismiss with leave to amend in *Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc., No. 12-cv-05847-JST, 2013 U.S. Dist. LEXIS 89208, 2013 WL 3242245 (N.D. Cal. June 25, 2013)* ("*Rheumatology I*"). The matter was **[*834]** subsequently transferred to me. In *Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc., No. 12-cv-05847-WHO, 2013 U.S. Dist. LEXIS 151128, 2013 WL 5694452 (N.D. Cal. Oct. 18, 2013)* ("*Rheumatology II*"), I granted the defendants' motion to dismiss the monopolization claims in the first amended complaint with leave to amend, finding that the plaintiffs did not sufficiently allege that the practices foreclosed competition. The plaintiffs did not allege monopolization claims in their second amended complaint. *See Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc.*, No. 12-cv-05847, Dkt. No. 122-3 (N.D. Cal. November 18, 2013) (second amended complaint).

Plaintiffs argue that Quest's three alleged exclusionary practices are actionable if their "combined effect is to foreclose a 'substantial share of the relevant market.'" Dkt. No. 25 at 10-11 (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 328, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*. That is true, but the three alleged exclusionary practices cannot sustain plaintiffs' monopolization claims here **[**13]** for the same reasons they failed in *Rheumatology Diagnostics:* plaintiffs have not sufficiently pleaded that the alleged practices, whether independently or in combination, caused antitrust injury or foreclosed competition in a substantial share of the relevant market, the plan/out-patient market in Northern California.[3]

A. Law regarding Sherman Act § 2 claims

HN3[] "The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (citation omitted).

To violate the second element, a defendant must use its monopoly power "to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *Id. at 482-83* (citation omitted). Accordingly, ***HN4***[] to be actionable under *section 2*, a monopolist's **[**14]** conduct "must have an 'anticompetitive effect.' That is, it must harm the competitive *process* and thereby harm consumers. In contrast, harm to one or more *competitors* will not suffice." *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (emphasis in original) (citations omitted); *see also Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws....").

In addition, ***HN5***[] to be actionable under *section 2*, a monopolist's conduct must "foreclose competition in a substantial share of the line of commerce affected." *Kolon Indus. Inc. v. E.I. DuPont de Nemours & Co., 748 F.3d 160, 175 (4th Cir.) cert. denied, 135 S. Ct. 437, 190 L. Ed. 2d 352 (2014)* (quoting *Tampa Elec, 365 U.S. at 328*). Establishing that a substantial share of the relevant market is foreclosed is necessary because, for the monopolist's conduct to adversely affect competition, "the opportunities for other traders to enter into or remain in that market must be significantly **[*835]** limited." *Id.* (quoting *Tampa Elec., 365 U.S. at 328*). The Supreme Court has explained that:

> To determine substantiality in a given case, it is necessary to weigh the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant **[**15]** market area,

[3] Because I determine that plaintiffs have not sufficiently pleaded foreclosure or antitrust injury in the relevant market and, separately, lack standing as discussed above, I do not address whether plaintiffs have sufficiently alleged monopoly power in a relevant product market.

and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein.

Tampa Elec., 365 U.S. at 329.

B. Kickbacks to medical providers

Plaintiffs allege that Quest has discounted its pricing on testing that is billed to medical providers to as much as 50% or more below cost in exchange for commitments by the medical providers to refer all additional testing done under plan/out-patient billing to Quest exclusively. Compl. ¶ 21. According to plaintiffs, these discounts effectively function as kickbacks to the medical providers, in exchange for which the providers refer all of their routine diagnostic testing in the plan/out-patient market to Quest, regardless of whether Quest can provide the lowest cost or highest quality testing. *Id.* ¶ 22. Plaintiffs refer to sales realized through this referral process as "pull-through sales." *Id.* They allege that this practice allows Quest to build market share and charge monopoly prices in the plan/out-patient market. *Id.* ¶ 23.

Judge Tigar rejected monopolization claims based on the same allegations in *Rheumatology I* for lack of antitrust injury. He explained that the plaintiffs had not shown how the **[**16]** alleged below-cost pricing to medical providers allowed Quest to raise prices above competitive levels in the plan/out-patient market. *Rheumatology I, 2013 U.S. Dist. LEXIS 89208, [WL] at *14* ("there is no allegation that Quest is able to raise prices on its [plan/out-patient market] business, and the effect of the alleged arrangement on "loss-leader" services would be to keep prices low"). I subsequently rejected the same allegations in the first amended complaint. *Rheumatology II, 2013 U.S. Dist. LEXIS 151128, [WL] at *15* ("the FAC fails to allege that such business is priced above a competitive level, or that Quest's alleged scheme will lead to its raising the prices of laboratory diagnostic services above supra-competitive levels. Without these allegations, the plaintiffs cannot support their causes of action for monopolization.").

As in *Rheumatology*, Quest's alleged discounts to medical providers do not show antitrust injury. Plaintiffs allege that the discounts allow Quest to charge "monopoly prices" or "above-competitive prices" on its plan/out-patient business, but they have not alleged what Quest's prices are or how they compare to competitive prices. *See, e.g.*, Compl. ¶¶ 23, 31, 58. Rather, they assert that Quest "*must* add a monopoly premium for pull-through testing to compensate for **[**17]** its below-cost prices." Compl. ¶ 117 (emphasis added). This allegation is conclusory and speculative and does not satisfy the requirement to plead plausible claims. *See, e.g.,* Intellectual Ventures I LLC v. Capital One Fin. Corp., 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *6 (E.D. Va. Dec. 18, 2013) (dismissing monopolization counterclaim where counter-plaintiff "provide[d] nothing other than conclusory allegations that IV has demanded and received 'supracompetitive prices'"). In the absence of antitrust injury, the alleged discounts provided by Quest are presumably pro-competitive and not actionable under the antitrust laws. *Cf.* Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986) ("cutting prices in order to increase business often is the very essence of competition").

[*836] C. Collusion with Aetna and Blue Shield to suppress competition

Plaintiffs allege that Quest "has paid large sums" to Blue Shield of California and Aetna, Inc., the third and fourth largest private health insurers in Northern California, "to induce them to exclude competitors of Quest from their networks, which has made it impossible or very difficult for these other laboratories to compete with Quest." Compl. ¶¶ 24-25. Specifically, they assert that Quest induced Aetna to kick 400 of Quest's competitors out of the Aetna network nationwide, including two competitors that were located in Northern California: **[**18]** Hunter Laboratories and Western Health Sciences Medical Laboratory. *Id.* ¶¶ 25, 88. Similarly, they contend that Quest gave Blue Shield a 10% discount in exchange for Blue Shield's agreement to kick two of Quest's competitors, Westcliff Medical Laboratories and Hunter Laboratories, out of the Blue Shield network in Northern California. *Id.* ¶¶ 25, 101. They state that Aetna and Blue Shield cooperate with Quest to "crack the whip" over physicians to coerce them not to refer plan/out-patient business to Quest's competitors and that "physicians face retaliation if they refuse to cooperate, including threats to terminate their plan contracts." *Id.* ¶ 27.

I considered the same allegations in *Rheumatology II*. They were insufficient to sustain plaintiffs' monopolization claims because the plaintiffs "d[id] not say how Quest has grown or maintained its market position or how competition generally has fared relative to Quest" as a result of those alleged agreements.[4] *Rheumatology II, 2013 U.S. Dist. LEXIS 151128, [WL] at *15*; *see also* *Rheumatology Diagnostics I, 2013 U.S. Dist. LEXIS 89208, [WL] at *11* (rejecting same allegations because plaintiffs did not allege that Quest obtained its market share because of the alleged agreements or specify how the agreements affected competition generally).

The same is true here. Plaintiffs have not alleged sufficient facts from which I can conclude that Quest's alleged agreements with Aetna and Blue Shield foreclosed competition in a substantial share of the plan/out-patient market in Northern California. The two agreements, in combination, allegedly resulted in the elimination of three of Quest's competitors in Northern California: Hunter Laboratories, Western Health Sciences Medical Laboratory, and Westcliff Medical Laboratories. But without allegations regarding those competitors' prior market **[**20]** shares or the number or lack of other competitors, plaintiffs have at most alleged harm to those competitors, not to competition. *See* *Rheumatology II, 2013 U.S. Dist. LEXIS 151128, [WL] at *12* ("It may very well be that Hunter, Westcliff, and SPA constitute a 'substantial share' of the relevant market or markets, but with only what the plaintiffs present, the Court cannot tell. All that can be said is that three of Quest's alleged competitors were injured, but the antitrust laws are meant to protect competition, not competitors.").

Although plaintiffs allege that Blue Shield and Aetna are "the third and fourth largest private health insurers in Northern California," Compl. ¶ 25, they do not address the circumstances of other health **[*837]** insurers in the relevant market, including two which are apparently larger than Blue Shield and Aetna. Plaintiffs cannot rely on Quest's arrangements with Blue Shield and Aetna to establish foreclosure of a substantial share of the plan/out-patient market in Northern California without accounting for other players which significantly impact competition in the market. *See, e.g.,* *Tampa Elec., 365 U.S. at 329* (discussing various factors necessary to determine substantiality of foreclosure); *cf.* *Microsoft, 253 F.3d at 69* ("Because an exclusive deal affecting a small fraction **[**21]** of a market clearly cannot have the requisite harmful effect upon competition, the requirement of a significant degree of foreclosure serves a useful screening function.").

D. Quest's acquisition of competitors in the plan/out-patient market

Plaintiffs allege that Quest was the second largest provider of diagnostic testing in Northern California in 2003 when it acquired its largest competitor, Unilab Corporation. Compl. ¶ 28. According to plaintiffs, "the acquisition of Unilab allowed Quest to increase its market share from 17% to 53% [in the plan/out-patient and physician billing markets combined], making it by far the largest competitor in the market." *Id.* ¶ 29. They allege that Quest increased its share of the combined by approximately another 3% in 2013 by acquiring the out-patient testing laboratories of Dignity Health. *Id.* ¶ 114.

As plaintiffs acknowledge, Quest's acquisition of Unilab Corporation was cleared by the FTC after certain divestitures by Quest. *Id.* ¶ 112. The FTC noted in its analysis of the consent decree approving the acquisition that "after the divestiture, competition in the market for providing Laboratory Services to physician groups in Northern California will **[**22]** remain virtually unchanged by the proposed acquisition." *See* Compl. ¶ 112 n.1 (citing *FTC*

---

[4] *Rheumatology II* involved the same **[**19]** agreements with Aetna and Blue Shield that plaintiffs allege here. *See* *Rheumatology II, 2013 U.S. Dist. LEXIS 151128, [WL] at *5* (plaintiffs alleged that "Aetna, which insures approximately nine percent of the United States population, conspired with Quest to eliminate or exclude 400 regional laboratories from Aetna's provider network in exchange for discounts. Hunter and PBP have been denied in-network status with Aetna . . . ."), and *2013 U.S. Dist. LEXIS 151128, [WL] at *6* (plaintiffs alleged that "Quest threatened not to renew its contract with BSC [Blue Shield of California] unless BSC agreed not to renew its contracts with Westcliff and Hunter; to further induce BSC, Quest offered a 10 percent discount that 'forced' BSC to accept.").

Analysis of Quest Consent Decree, File No. 021 0140, Docket No. C-4074)[5]. Plaintiffs' allegations do not raise any doubt about that conclusion.

The acquisition of Dignity Health only increased Quest's market share by a relatively insubstantial 3%. A similar allegation did not save the complaint in *Rheumatology. See Rheumatology II, 2013 U.S. Dist. LEXIS 151128, [WL] at *5*; *see also Tampa Elec., 365 U.S. at 333, 335* (summarily dismissing *section 2* claim where conduct affected less than 1% of the market). Further, the asserted market share figures relate to the *combined* plan/out-patient and physician billing markets. Plaintiffs' monopolization claims relate to the allegedly *separate* plan/out-patient market. Accordingly, their allegations do not establish foreclosure of substantial share of the relevant market.

For the reasons stated, plaintiffs' monopolization claims under *section 2* of the Sherman Act and California's Cartwright Act are DISMISSED WITH LEAVE TO AMEND.

III. UNFAIR PRACTICES ACT

Plaintiffs allege that Quest violated California's Unfair Practices Act ("UPA"), *Cal. Bus. & Prof. Code §§ 17043*, *17044* because it sold testing services in the physician billing market below cost or as a loss leader[6] in **[**23]** order to injure class member **[*838]** and suppress competition in the plan/out-patient market. Compl. ¶¶ 143-44. Quest contends that this claim fails because the UPA protects competitors, not consumers. Quest also asserts that even if a UPA claim were actionable by consumers, plaintiffs here cannot prove injury resulting from Quest's alleged below-cost pricing (because plaintiffs benefit from Quest's alleged below-cost services).[7] Quest further argues that the UPA claim fails because plaintiffs have not alleged any of Quest's prices, the costs of any of its services, or its costs of doing business. In opposition, plaintiffs argue that the UPA is not limited to competitors and that they have plausibly pleaded injury because Quest's below-cost services destroy competition.

HN6[] To plead a UPA claim, "the plaintiff must allege defendant's sales price, its cost in the product and its cost of doing business." *Rheumatology I, 2013 U.S. Dist. LEXIS 89208, [WL] at *15*; *see also G.H.I.I. v. MTS, Inc., 147 Cal. App. 3d 256, 275, 195 Cal. Rptr. 211 (Ct. App. 1983)* ("to satisfy the pleading requirements of *section 17043*, the plaintiff must allege defendant's sales price, its cost in the product and its cost of doing business"). Plaintiffs have not pleaded Quest's prices or costs, nor did plaintiffs provide any authority in their opposition brief indicating that this is not required. Their allegations are insufficient to state a UPA claim. *See, e.g., Rheumatology I, 2013 U.S. Dist. LEXIS 89208, [WL] at *16* (dismissing UPA claim where "the Complaint makes no attempt to allege Quest's sales prices, costs, or cost of doing business. Instead, it merely alleges that Quest's capitated rate contracts are provided at 'below cost'").

In addition, plaintiffs have not pleaded actionable injury. Even assuming that injury to consumers (as opposed to injury to competitors) is actionable under the UPA, plaintiffs have not alleged injury here. As noted above, plaintiffs' allegation that Quest's below-cost pricing in the physician billing market led to above-competitive pricing or reduced competition in the plan/out-patient market is purely speculative and cannot sustain plaintiffs' claims. **[**25]** Plaintiffs' UPA cause of action is DISMISSED WITH LEAVE TO AMEND.[8]

---

[5] The FTC's analysis is available at *https://www.ftc.gov/sites/default/files/documents/cases/2003/02/ftc.gov-questanalysis.htm*

[6] Loss leader means "any article or product sold at less than cost: (a) Where the purpose is to induce, promote or encourage the purchase of other merchandise; or (b) Where the effect is a tendency or capacity to mislead or deceive purchasers or prospective purchasers; or (c) Where the effect is to divert trade from or otherwise injure competitors." *Cal. Bus. & Prof. Code § 17030*.

[7] Quest argues that plaintiffs may at most seek injunctive relief under the UPA. **[**24]**

[8] Given the deficiencies in the UPA claim, as currently pleaded, I do not at this point address whether injury to consumers is actionable under the UPA.

IV. UNFAIR COMPETITION LAW

Plaintiffs allege that Quest has violated the "unfair" and "illegal" prongs of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200*. These claims are derivative of plaintiffs' monopolization and UPA claims and fail for the same reasons as those claims. *See* Compl. ¶¶ 137-40. The UCL cause of action is DISMISSED WITH LEAVE TO AMEND.

CONCLUSION

Quest's motion to dismiss is GRANTED. Dkt. No. 20. Plaintiffs' complaint, including all four causes of action, is DISMISSED WITH LEAVE TO AMEND. Any amended complaint shall be filed within 20 days of this order,

IT IS SO ORDERED.

Opinion

[*989] PER CURIAM:

We have had the benefit of oral argument, and have carefully reviewed the briefs and the relevant parts of the record. We affirm the district court's grant of summary judgment dismissing plaintiffs' monopolization claim pursuant to *Section 2* of the Sherman Act, *15 U.S.C. §2*.[1] We conclude that the judgment of the district court should be affirmed for the numerous reasons fully explored at oral argument, some of which are discussed also herein.

Initially, we cannot disagree with the district court, which concluded that plaintiffs had failed to adduce genuine issues of material fact with respect to the crucial prerequisite of harm to competition in general, as opposed to harm to a particular competitor. In the district court, the only even arguably specific evidence **[**3]** of harm to competition in general was belatedly submitted to the district court in the form of a report by Dr. Simpson. The report was submitted after all the briefing was completed in the district court. Moreover, the plaintiffs indicated that Dr. Simpson's report was unnecessary. Doc. No. 132 at 3 ("Plaintiffs sought to supplement their response for a limited purpose. Namely, to address issues unraised by Defendants and unnecessary to Defendants' summary judgment motion but for which the Court may have additional questions and which further elaborate on Defendants' plan and its impact."). Thus, with no guidance at all to the district court with respect to the significance of any aspect of the report, the district court concluded that plaintiffs had adduced no evidence of harm to competition among pharmacy providers, either in Dr. Simpson's report or elsewhere in the **[*990]** record. We cannot conclude that the district court erred. *HN1*[] "Neither the district court nor this Court has an obligation to parse the summary judgment record to search out facts or evidence not brought to the court's attention." *Atlanta Gas Light Co. v. UGI Utilities, 463 F.3d 1201, 1208 n.11 (11th Cir. 2006)*. Moreover, even on appeal, plaintiffs have pointed to insufficient evidence of harm to competition **[**4]** generally. Even if we consider the evidence provided by Dr. Simpson, plaintiffs' initial brief points to only three ways that Dr. Simpson indicated there was harm to competition. First, Dr.

[*] Honorable David Bryan Sentelle, United States Circuit Judge for the District of Columbia Circuit, sitting by designation.

[1] The district court remanded several of plaintiffs' state law claims. The plaintiffs' other claims that the district court rejected on the merits have been expressly abandoned by plaintiffs, leaving only plaintiffs' *Section 2* monopolization claim before us.

Simpson indicated that an excluded pharmacy can no longer compete for the business of the defendants' enrollees. However, the summary judgment record indicates that only plaintiffs' pharmacies have declined to join defendant's network of providers, virtually all others having eventually joined. Thus, this indication of harm is harm only to a single competitor (i.e., plaintiffs) and not harm to competition in general amongst pharmacies.

Second, plaintiff points to Dr. Simpson's opinion that the defendant's lower reimbursement rate reduces the profit that a pharmacy obtains from serving an additional customer, which profit incentivizes pharmacies to provide better point-of-sale services. We agree with the district court that this is merely unsupported speculation.

Finally, plaintiffs point to Dr. Simpson's opinion that lower reimbursement rates and reduced profit can jeopardize a pharmacy's long-term viability and diminish the ability of pharmacies to expand. We conclude that this too is mere speculation. **[**5]** Indeed, the record would seem to be to the contrary. There is virtually no evidence of pharmacies closing because of defendant's reimbursement rates, notwithstanding the fact that there are a significant number of pharmacies which have agreed to the reimbursement rates and joined the defendant's network of providers.

Thus, we agree with the ground upon which the district court granted summary judgment. We proceed below to mention other grounds which would, separately and independently, provide a basis for affirming the judgment of the district court. One such ground is that plaintiffs' initial brief on appeal contains only conclusory assertions with respect to the prerequisites for proving a monopolization claim.

Plaintiffs' initial brief on appeal asserts only in conclusory fashion that defendants possessed monopoly power (or because this case involves the market power of a purchaser, monopsony power). This crucial element is asserted only in a few conclusory sentences, with no factual support provided. Even plaintiffs' reply brief suggests that plaintiffs demonstrated monopsony power only by adducing direct evidence of actual anti-competitive effects, coupled with their legal argument **[**6]** that monopoly power can be demonstrated by actual, sustained adverse effects on competition even in the absence of an elaborate market analysis. We can assume arguendo, without deciding, plaintiffs' legal argument. However, plaintiffs' reply brief has pointed to no evidence of actual, sustained adverse effects on competition. The only such "direct evidence" of monopsony power to which the reply brief points is the fact that defendant was able to negotiate a lower price (a lower reimbursement rate) with the pharmacies which did join its network of providers. However, plaintiffs cite no case, and our research has uncovered no case, which holds that a single purchaser's ability to negotiate a lower price with a number of sellers does, by itself, demonstrate monopsony power. Indeed, common sense and common experience make it clear that ***HN2***[] the ability of a single purchaser to negotiate a lower sales price does not, by itself, constitute monopsony **[*991]** power. Moreover, it is clear that the instant defendant does not have monopsony power. It controls a mere five percent of the purchases in the market. The plaintiffs, and all other pharmacies which are not in defendant's network of providers, have **[**7]** the remaining ninety-five percent of the available purchases in the market, and plaintiffs are free to join networks of providers competing with the defendant. Thus, plaintiffs can compete not only for that ninety-five percent, but also, through other networks' competition with defendant, plaintiffs can compete even for the five percent of purchasers represented by the defendant. This lack of monopsony power is a sufficient ground in and of itself to affirm the judgment of the district court.

III.

For the foregoing reasons,[2] and for other reasons fully explored at oral argument, the judgment of the district court is AFFIRMED.

Opinion

ORDER GRANTING DEFENDANTS' MOTION TO DISMISS

Re: Dkt. No. 29

The motion to dismiss the First Amended Complaint is granted with leave to amend.

"In order to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a 'relevant market.' That is, the plaintiff must allege both that a 'relevant market' exists and that the defendant has power within that market." *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008)*. The "relevant market" **[*2]** has two components, "a relevant product market and a relevant geographic market." *Sidibe v. Sutter Health, 4 F. Supp. 3d 1160, 1174 (N.D. Cal. 2013)*. "The process of defining the relevant market is a factual inquiry for the jury." *High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)*. However, "a complaint may be dismissed under *Rule 12(b)(6)* if the complaint's 'relevant market' definition is facially unsustainable." *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008)*.

Killian has adequately pled relevant product markets—the markets for installation and servicing of tube-in-the-wall pest control systems. HomeTeam contends that the product market must include other forms of pest control, but "in some instances one brand of a product can constitute a separate market," *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*, and it's reasonable to infer from the allegations in the complaint that tube-in-the-wall pest control systems are quite distinct, such that they form a separate market from the market for other forms of pest control. *See, e.g., RealPage, Inc. v. Yardi Sys., Inc., 852 F. Supp. 2d 1215, 1225 (C.D. Cal. 2012)* (allegation that particular cloud computing services were distinct from "generic" cloud computing services); *TYR Sport Inc. v. Warnaco Swimwear Inc., 679 F. Supp. 2d 1120, 1129 (C.D. Cal. 2009)* (allegation that "high-end competitive swimwear" was distinct from other types of swimwear).

Killian has not, however, adequately defined the relevant geographic market. The complaint alleges that HomeTeam installs tube-in-the-wall systems in a number of states across **[*3]** the nation, "including the states of California, Arizona, Florida, Georgia, Maryland, Missouri, Nevada, New Mexico, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia." But the complaint provides no details about whether customers in states other than the ones listed—or even whether customers throughout each of the listed states—"can practicably turn" to HomeTeam for installation of tube-in-the-wall systems. *See Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*.

The complaint further alleges that HomeTeam's website is "available nationwide," but obviously the mere fact that people all over the country (and presumably the world) can access HomeTeam's website has no bearing on where HomeTeam's system is actually available to customers. And the complaint alleges that "HomeTeam engages in national planning of the installation of tube-in-the-wall systems," but without a better understanding of where the systems are actually available, an allegation of national planning is not enough. *Compare United States v. Grinnell Corp., 384 U.S. 563, 575, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

Overall, Killian's "definition of the relevant geographic market [for installation of tube-in-the-wall systems] is vague and conclusory." *See Orchard Supply Hardware LLC v. Home Depot USA, Inc., 939 F. Supp. 2d 1002, 1010 (N.D. Cal. 2013)*.

Similarly, in describing the geographic market for servicing tube-in-the-wall **[*4]** systems, the complaint alleges that "HomeTeam[] services tube-in-the-wall systems nationwide, including at least the states of California, Arizona, Florida, Georgia, Maryland, Missouri, Nevada, New Mexico, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia." It also alleges that HomeTeam's "customers are located in every state in which HomeTeam operates, including California, Arizona, Florida, Georgia, Maryland, Missouri, Nevada, New Mexico, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia." These allegations are vague, but they seem to work against Killian by implicitly acknowledging that HomeTeam does not in fact operate throughout the United States. Thus, the complaint does not plead sufficient facts to plausibly allege that HomeTeam's "area of effective competition" in the tube-in-the-wall servicing market is nationwide.

The FAC alternatively alleges "geographic markets for the servicing of tube-in-the-wall systems . . . correspond[ing] to the areas of service for the individual offices providers [*sic*] of such servicing." But the complaint doesn't say anything specific about the "areas of service" for "individual offices." And it provides **[*5]** no details about the competitive structure—the alternative sources of supply or lack thereof—in these individual local markets. "Information about the reach of th[ese] market[s] is not exclusively within the Defendants' possession. Plaintiff should plead the geographic range of the relevant market[s] with greater specificity." *Orchard Supply, 939 F. Supp. 2d at 1010 (N.D. Cal. 2013)*.

Because the federal claims must be dismissed for failure to adequately plead the relevant geographic market, the Court does not reach HomeTeam's remaining objections to the federal claims (except for HomeTeam's arguments pertaining to the product market, which have been rejected). However, the hearing on the motion to dismiss, as well as HomeTeam's briefs, have put Killian on notice of other potential defects, and the Court assumes that the next version of the complaint will represent Killian's best and last shot to state a claim. In addition, because it is highly likely Killian can state an antitrust claim with respect to the market for servicing tube-in-the-wall systems, and because this case has already languished for quite some time, discovery may proceed on Killian's claims relating to the servicing market immediately upon the filing of an amended complaint. The discovery stay **[*6]** remains in place, however, for Killian's claims relating to the installation market.

Killian's state-law antitrust claims are dismissed for the same reasons as his Sherman Act claims. *See* *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* ("The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act was modeled after the Sherman Act." (citation omitted)).

Killian's claims under California's Unfair Practices Act are also dismissed. The First Amended Complaint alleges that HomeTeam charges builders $75 to install the tube-in-the-wall system, and alleges that this price is below HomeTeam's cost. But this is not enough to state a claim. "To satisfy the requirements of *section 17043*, a plaintiff must allege, in other than conclusionary terms, the defendant's sales price, costs in the product, and cost of doing business." *Fisherman's Wharf Bay Cruise Corp. v. Superior Court, 114 Cal. App. 4th 309, 7 Cal. Rptr. 3d 628, 639 (Ct. App. 2003)*.

Finally, Killian acknowledges that his claims under California's Unfair Competition Law rise and fall with the success of his other claims. *See* Docket No. 32, p. 13. Because the Court grants HomeTeam's motion to dismiss each of these other claims, Killian's UCL claim is likewise dismissed.

Accordingly, HomeTeam's motion to dismiss is granted with respect to each claim, with leave to **[*7]** amend. Any amended complaint must be filed within 21 days of the date of this order, or the dismissal shall be with prejudice.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(6)*, a defendant may move to dismiss a claim in a complaint for failure to state a claim upon which relief can be granted. In evaluating such a motion, a court must assume the truth of the plaintiff's well-pleaded factual allegations and view them in the light most favorable to the plaintiff. In ruling on such a motion, the dispositive inquiry is whether the complaint contains enough facts to state a claim to relief that is plausible on its face. Granting a motion to dismiss is a harsh remedy which must be cautiously studied, not only to effectuate the spirit of the liberal rules of pleading but also to protect the interests of justice. Thus, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope

HN2[] **Sherman Act, Claims**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. *§ 1*. Notably, *§ 1* prohibits only concerted, multilateral action. Because *§ 1* does not prohibit all unreasonable restraints of trade but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express. Accordingly, at the pleading stage, stating a *§ 1* claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made, and to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. Such an agreement is established by evidence that the conspiring parties had a conscious commitment to a common scheme designed to achieve an unlawful objective. If the complaint does not directly allege an agreement but instead makes only allegations of parallel conduct in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action. That is, the complaint must contain allegations plausibly suggesting (not merely consistent with) agreement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss, the law requires only a complaint with enough factual matter (taken as true) to suggest that an agreement was made, and to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.

Opinion

[*1182] ORDER DENYING DEFENDANTS' MOTIONS TO DISMISS

Plaintiffs Kissing Camels Surgery Center, LLC ("Kissing Camels"), Cherry Creek Surgery Center, LLC ("Cherry Creek"), Arapahoe Surgery Center, LLC ("Arapahoe"), **[**2]** and Hampden Surgery Center, LLC ("Hampden") (collectively "Plaintiffs") bring this antitrust action alleging violations of the *Sherman Act*, *15 U.S.C. §§ 1 et seq.*, and the Colorado Antitrust Act, *Colo. Rev. Stat. §§ 6-4-101 et seq.* (Sec. Am. Compl. ("SAC") (ECF No. 213) at 56-62.) Before the Court are four Motions to Dismiss (collectively "Motions"), filed by Defendants Rocky Mountain Hospital and Medical Service, Inc., d/b/a Anthem Blue Cross and Blue Shield of Colorado ("Anthem"), UnitedHealthCare of Colorado, Inc. ("United"), Aetna, Inc. ("Aetna") (collectively the "Insurer Defendants" or "Insurers"), and Colorado Ambulatory Surgery Center Association, Inc. ("CASCA").[1] (ECF Nos. 259, 260, 261, 264.) For the reasons set forth below, the Motions are denied.

I. LEGAL STANDARD

HN1[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a defendant may move to dismiss a claim in a complaint for "failure to state a claim upon which relief can be granted." In evaluating such a motion, a court must "assume the truth of the plaintiff's well-pleaded factual **[**3]** allegations and view them in the light most favorable to the plaintiff." *Ridge at Red Hawk, LLC v. Schneider, 493 F.3d 1174, 1177 (10th Cir. 2007)*. In ruling on such a motion, the dispositive inquiry is "whether the complaint contains 'enough facts to state a claim to relief that is plausible on its face.'" *Id.* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Granting a motion to dismiss "is a harsh remedy which must be cautiously studied, not only to effectuate the spirit of the liberal rules of pleading but also to protect the interests of justice." *Dias v. City & Cnty. of Denver, 567 F.3d 1169, 1178 (10th Cir. 2009)* (quotation marks omitted). "Thus, 'a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.'" *Id.* (quoting *Twombly, 550 U.S. at 556*).

II. BACKGROUND

Plaintiffs are four ambulatory surgery centers ("ASCs") performing outpatient surgical procedures and treatments in a non-hospital environment. (SAC ¶¶ 1, 19.) Plaintiff Kissing Camels provides services in the area of Colorado Springs, Colorado, and the other three Plaintiffs provide services in the Denver, Colorado metropolitan area. (*Id. ¶¶ 6-9*.)

Defendant Centura Health Corporation ("Centura") owns a system of hospitals and surgery centers in both Denver and Colorado Springs, which compete with Plaintiffs to provide **[**4]** ambulatory surgery services in both geographic areas. (*Id. ¶¶ 10*, 36-39.) Former defendant Audubon is an ASC which is a joint venture between Centura and several local physicians, and Centura holds more than 40% ownership of **[*1183]** Audubon. (*Id. ¶¶ 38, 123*.) Audubon competes with Plaintiff Kissing Camels to provide ambulatory surgery services in the Colorado Springs area. (*Id. ¶ 40*.) Former defendant HCA, Inc. owns former defendant HCA-HealthONE LLC ("HCA"), which operates a system of hospitals and surgery centers in Metro Denver that compete with Plaintiffs Cherry Creek, Arapahoe, and Hampden to provide ambulatory surgery services. (*Id. ¶¶ 27-28*.)

Defendant CASCA is a trade association purporting to represent the interests of ASCs, to which Centura and HCA both provide substantial financial support. (*Id. ¶¶ 45, 83*.) At least two HCA employees sit on CASCA's Board of Directors, and six Board members are employed by companies with contractual relationships with Centura, including one, Brent Ashby, who is the Administrator of Audubon and another of Centura's joint venture ASCs. (*Id. ¶¶ 46, 53*.) Plaintiffs allege that CASCA worked directly with the Colorado Association of Health Plans ("CAHP"), **[**5]** an association of insurers whose Board of Directors includes executives from United and Anthem, to assist in formulating the alleged conspiracy. (*Id. ¶¶ 46, 53, 101*.) Defendants Anthem, United, and Aetna are health insurance companies doing business in Colorado. (*Id. ¶¶ 13-15*.)

Plaintiffs Arapahoe and Kissing Camels began doing business in 2010. (*Id. ¶ 28*.) Plaintiffs allege that, beginning that year, Centura and HCA conspired to reduce competition for ambulatory surgery services by not doing business with Plaintiffs, and by using their market power to pressure physicians and insurers with whom HCA and Centura have relationships not to do business with Plaintiffs. (*Id. ¶¶ 47-50*.) CASCA allegedly joined the conspiracy at the

[1] A fifth pending Motion to Dismiss was filed by Audubon Ambulatory Surgery Center, LLC ("Audubon"). (ECF No. 266.) As Plaintiffs have since stipulated to dismiss Audubon as a Defendant (ECF No. 290), Audubon's Motion is denied as moot.

behest of HCA and Centura, holding strategy meetings at which the conspiracy was formed and meeting separately with CAHP and various Insurers to coordinate action against Plaintiffs. (*Id.* ¶¶ *59, 75*, 90-93, 99-102, 125.) Despite the fact that Plaintiffs were CASCA members, CASCA acted in secret and excluded Plaintiffs from meetings at which the conspiratorial objectives were discussed. (*Id.* ¶¶ *95, 133*.)

A non-hospital ASC is required to have transfer agreements with **[**6]** hospitals to ensure that a patient requiring emergency hospitalization receives rapid and adequate care. (*Id.* ¶ *66*.) HCA and Centura have both refused to sign transfer agreements between their hospitals and Plaintiffs' facilities, despite the predicted benefit to the hospital of increased patient flow. (*Id.* ¶¶ *66-67*.) In December 2010, a Centura-owned hospital canceled a planned patient transfer agreement with Plaintiff Kissing Camels, and in February 2012, a HCA hospital refused to sign a transfer agreement with Cherry Creek. (*Id.*)

Plaintiffs' allegations make reference to specific pieces of evidence, principally emails and meeting notes, in which Defendants discussed strategies to lessen the competitive threat posed by Plaintiffs. (*See id.* ¶¶ 42, 51-55, 59-62, 70, 77-78, 80, 91-95, 99-102, 124.)

Spearheaded by CASCA and CAHP, a conference call meeting to discuss actions against Plaintiffs was held on May 18, 2012, which was attended by representatives from Aetna, Anthem, United, and other insurance companies, as well as CASCA Board members. (*Id.* ¶¶ *94-95*.) A follow-up meeting, which was scheduled in order for the "right" Insurer personnel to attend, was held on August 29, 2012, and **[**7]** was attended by CASCA Board members, including Mr. Ashby of Audubon, and executives from Anthem, United, and Aetna (by phone), as well as other insurance companies. (*Id.* ¶¶ *95-97*.) Based on notes taken by a CAHP representative, **[*1184]** Plaintiffs allege that the meeting participants agreed to follow a strategy of "stop[ping] the flow of dollars" from the Insurers to Plaintiffs. (*Id.* ¶¶ *98-99*.) Subsequent e-mails between CASCA and CAHP indicate that both parties would work to take indirect action against Plaintiffs through governmental agencies, CASCA, and insurer actions against physicians referring patients to Plaintiffs. (*Id.* ¶ *100*.)

At the request of Centura and HCA, and pursuant to the agreement among the alleged co-conspirators, CASCA's Executive Director sent a letter to the Colorado Department of Regulatory Agencies ("DORA") alleging that Plaintiffs violated state law prohibiting them from waiving or discounting insurance copayments and deductibles and asking DORA to take legal action against Plaintiffs. (*Id.* ¶ *103*.) DORA took no action against Plaintiffs based on this letter, and noted that no complaints had been received by the Colorado Medical Board for unlawful billing practices. (*Id.*) Plaintiffs **[**8]** allege that their billing practices did not violate state law, and that these claims were mere pretext for Defendants' conspiratorial actions. (*Id.* ¶ *128*.)

Plaintiffs allege that, starting in 2010, Centura and Audubon asked the Insurers to penalize physicians referring business to Plaintiffs. (*Id.* ¶¶ *118, 124*.) The Insurers were compelled to comply because they needed Centura's and HCA's hospitals in their provider networks. (*Id.*) The Insurers renewed their efforts to take action against Plaintiffs as a result of the agreements reached at the May 18, 2012 conference call and August 29, 2012 meeting. (*Id.* ¶ *104*.)

Mr. Ashby of Audubon notified United in 2010 of Kissing Camels' opening and raised concerns regarding its billing practices. (*Id.* ¶ *123*.) United conducted an investigation which concluded that such concerns were unfounded and that its network contracts with physicians permitted out-of-network referrals to Kissing Camels, but nevertheless agreed to take action against physicians referring patients to Plaintiffs. (*Id.*) In 2011, United threatened Dr. Steven Topper of Colorado Hand Center with termination for breach of his network contract based on his referral of patients to Kissing **[**9]** Camels, and terminated his contract by letter on December 16, 2011. (*Id.* ¶ *72*.) On August 31, 2012, two days after the CASCA/CAHP meeting, United terminated another facility, Metro Denver Pain Management, purportedly "for cause" due to its regular use of Plaintiff Arapahoe's facility. (*Id.* ¶ *106*.) United also threatened primary care physicians with termination from its network because they referred patients to specialists that used Plaintiffs' facilities. (*Id.* ¶¶ *72-23*.) Plaintiffs assert, based on e-mail evidence, that United's threatening letters were strategically targeted at physicians referring patients to Kissing Camels. (*Id.* ¶¶ *57, 70*.)

Beginning in at least October 2011, Anthem contacted physicians who were using Plaintiffs' facilities, and sent letters threatening network termination for purportedly inappropriate referrals. (*Id. ¶ 75*.) Anthem employees met with CASCA and HCA regarding strategies for such actions against Plaintiffs. (*Id. ¶ 75*.) Plaintiffs allege that, based on e-mails sent by senior Anthem employees, Anthem coordinated its actions with HCA, CASCA, and CAHP. (*Id. ¶¶ 77-78*.) On August 31, 2012, two days after the CASCA/CAHP meeting, Anthem sent a threatening letter **[**10]** to Colorado Orthopaedic Consultants regarding referrals to Plaintiffs, and a week later it sent similar letters to Colorado Hand Center and Interwest Rehabilitation. (*Id. ¶¶ 109-10*.)

Beginning in at least May 2012, Aetna threatened physicians with termination **[*1185]** from its provider network based on their referrals to Plaintiffs, and threatened to post information on its provider website that those physicians were referring patients to out-of-network providers, which would increase costs for patients. (*Id. ¶ 80*.) Aetna also sent certified letters terminating physicians for out-of-network referrals to Plaintiffs' facilities within a few days of the August 29, 2012 CASCA/CAHP meeting. (*Id. ¶ 112*.)

Plaintiffs allege that the justifications the Insurers provided for their threatening letters to physicians—namely, breaches of network contracts and unlawful billing practices—were pretexts for the anti-competitive goal of driving Plaintiffs out of business. (*Id. ¶ 128*.) Indeed, Plaintiffs allege, Audubon and other ASCs had the same billing practices as Plaintiffs. (*Id. ¶ 131*.)

On November 15, 2012, Plaintiffs filed a Complaint against HCA, Centura, CASCA, and Kaiser Foundation Health Plan of Colorado, **[**11]** bringing claims under the *Sherman Act* and the Colorado Antitrust Act. (ECF No. 1.) Plaintiffs filed their FAC on April 3, 2013, adding claims against Arapahoe, Anthem, United, and Aetna. (ECF No. 70.) Plaintiffs subsequently stipulated to dismiss their claims against Kaiser (ECF No. 140) and HCA (ECF No. 175).

On February 13, 2014, the Court granted Motions to Dismiss filed by CASCA, Aetna, Anthem, United, and Audubon ("Dismissal Order"), based largely on Plaintiffs' failure to plead sufficient facts establishing the predicate agreement for their conspiracy claims. (ECF No. 177.) Plaintiffs then moved to amend their complaint to restate their claims against the dismissed parties, and the Court permitted the amendment. (ECF Nos. 179, 212, 242.) The SAC was thus accepted as filed. (ECF No. 213.)

On September 30, 2014, Centura filed a Motion for Summary Judgment, which remains pending. (ECF No. 228.) The instant Motions to Dismiss, as well as a similar motion by Audubon, were filed on December 17, 2014. (ECF Nos. 259, 260, 261, 264, 266.) Plaintiffs filed an Omnibus Response (ECF No. 283), and Anthem, Aetna, CASCA, and United filed Replies (ECF Nos. 284, 285, 287, 288). Plaintiffs subsequently **[**12]** stipulated to dismiss Audubon from this action (ECF No. 290), rendering moot its Motion to Dismiss (ECF No. 266). The other four Motions are fully briefed and ripe for disposition.

III. ANALYSIS

CASCA and the Insurers each move for dismissal of Plaintiffs' claim under *§ 1 of the Sherman Act* (Count I), and the analogous state claim pursuant to *Colorado Revised Statutes § 6-4-104* (Count IV), the only claims asserted against them. (ECF Nos. 259, 260, 261, 264; *see* SAC ¶¶ 134-38, 149-53.) As federal ***antitrust law*** principles control both the federal and state antitrust claims, the Court will consider the two challenged claims together. *See Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1220 n.1 (10th Cir. 2009)*.

Plaintiffs' claims under *§ 1 of the Sherman Act* allege that Defendants conspired to put Plaintiffs out of business, which unreasonably restrained trade in the Denver and Colorado Springs markets for ambulatory surgery services and damaged Plaintiffs. (SAC ¶¶ 134-38, 149-53.) ***HN2***[] *Section 1 of the Sherman Act* prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations . . . ." *15 U.S.C. § 1*. Notably, *§ 1* prohibits only concerted, multilateral action. *See Bell v. Fur Breeders Agric. Coop., 348 F.3d 1224, 1232 (10th Cir. 2003)*. "Because *§ 1 of the Sherman Act* does not

[*1186] prohibit all unreasonable **[**13]** restraints of trade but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express." *Twombly, 550 U.S. at 553* (internal citations and brackets omitted). Accordingly, at the pleading stage, stating a *§ 1* claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. . . [and] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id. at 556*. Such an agreement is established by evidence that the conspiring parties "had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*.

If the complaint does not directly allege an agreement but instead makes only "allegations of parallel conduct . . . in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Twombly, 550 U.S. at 557*. That is, the complaint must contain "allegations plausibly suggesting (not merely consistent with) agreement." *Id.*

1. CASCA

CASCA's Motion argues that Plaintiffs have failed to allege sufficient **[**14]** facts to establish that it was a member of a conspiracy to put Plaintiffs out of business. (ECF No. 262 at 8-14.) CASCA further argues that its letter petitioning DORA to take action against Plaintiffs is protected by the *First Amendment* and the *Noerr-Pennington* doctrine, and that its alleged coordination of negative statements to the press is protected commercial speech. (*Id.* at 7-8, 14-15.)

In the Dismissal Order, the Court found that Plaintiffs' allegations in the FAC that CASCA provided a venue at which the conspiracy was formed were insufficient to state a claim that CASCA itself was a co-conspirator. (ECF No. 177 at 13.) Ultimately, the Court found that "Plaintiffs' allegations suggest that CASCA provided passive facilitation of the conspiracy, not that it agreed to participate, tacitly or expressly," and noted that "Plaintiffs apparently concede that CASCA was a tool of the conspiracy, rather than a co-conspirator . . . ." (*Id.* at 14.)

As to CASCA's actions in petitioning DORA to take action against Plaintiffs, the Court held in the Dismissal Order that "the Supreme Court's decisions in *[Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)]* and [*United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)]* establish that no *Sherman Act* liability arises from 'a concerted effort to influence public officials, regardless of [anticompetitive] **[**15]** intent or purpose.'" (ECF No. 177 at 13-14 (quoting *Pennington, 381 U.S. at 670*).) CASCA reasserts its argument in the instant Motion, but Plaintiffs fail to respond to CASCA's *Noerr-Pennington* or *First Amendment* arguments in their Response. (*See* ECF No. 283.) On the same basis as that asserted in the Dismissal Order, the Court concludes that the allegations of government petition and speech to the press cannot support a claim for a *§ 1* conspiracy.

However, Plaintiffs' SAC now includes direct allegations that CASCA was a co-conspirator, not a mere tool of the conspiracy. (*See* SAC ¶¶ 3, 59, 75, 90-93, 99-102, 125.) Through Centura's and **[*1187]** HCA's joint venture partners' membership on CASCA's Board of Directors, Plaintiffs allege that Centura and HCA dominate CASCA and it thereby represents their interests to Plaintiffs' detriment. (*Id. ¶¶ 39*, 45-46.) Plaintiffs allege that CASCA worked with CAHP to develop a strategy among the Insurer Defendants and to execute that strategy against Plaintiffs. (*Id. ¶¶ 46, 51*.) In support of these allegations, Plaintiffs also assert that in July 2012, HCA's CEO sent an e-mail in response to an HCA employee's e-mail confirmation that one of the Plaintiffs' facilities had recently opened, which stated, **[**16]** "TIME TO CALL IN THE DOGS!!!!!," and "can we discuss Round 2 with the payer [insurer] community—off-line not on email?" (*Id. ¶ 61*.) A follow-up e-mail between HCA executives included the statements, "Can we add more pressure to the payers to stop the proliferation of the out-of-network [Plaintiff] ASCs? Their letters aren't working." (*Id.*) This latter e-mail was copied to an HCA representative on CASCA's Board. (*Id.*) Plaintiffs allege meetings between Insurers and CASCA in furtherance of this strategy, culminating in the October 29, 2012 CASCA/CAHP meeting at which a plan was established for the Insurers to "stop the flow of dollars" to Plaintiffs. (*Id. ¶¶ 75, 78, 91*.)

The Court finds these allegations sufficient to plausibly allege that CASCA was a participant in the alleged conspiracy. While CASCA contends that one Board member's receipt of HCA's e-mail insufficiently implicates it in HCA's attempts to involve the Insurers in taking action against Plaintiffs (ECF No. 262 at 13), the Court finds that this allegation supports Plaintiffs' contention that CASCA coordinated meetings the following month on behalf of HCA in order to instigate action by the Insurers. These allegations also **[**17]** support Plaintiffs' assertion in the SAC that CASCA joined the conspiracy as an active participant, and was not merely a venue at which the conspiracy was formed. (*See* SAC ¶ 125.) Plaintiffs further allege a motive for CASCA's conspiratorial participation, namely that its Board members—which operate competing ASCs—feared competition from Plaintiffs, and note that CASCA hid its actions from Plaintiffs and never attempted to get Plaintiffs to change their allegedly unlawful conduct directly. *(Id.* ¶¶ 93, 125, 133.)

CASCA's Motion emphasizes certain of Plaintiffs' allegations, noting that each of them could just as easily have been innocent. However, ***HN3***[] on a motion to dismiss, the law requires only "a complaint with enough factual matter (taken as true) to suggest that an agreement was made. . . [and] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Twombly, 550 U.S. at 556*. The Court finds that Plaintiffs' SAC meets this standard. CASCA's Motion is therefore denied.

2. Insurer Defendants

The Motions filed by Aetna, Anthem, and United each argue that Plaintiffs' allegations are insufficient to establish an agreement to conspire against Plaintiffs. (ECF Nos. 259, 260, 264.) **[**18]**

In the Dismissal Order, the Court held that Plaintiff's First Amended Complaint ("FAC") contained insufficient allegations of conspiracy against the Insurer Defendants. (ECF No. 177 at 16-20.) Specifically, the Court noted as follows:

> Plaintiffs' allegations of the specific actions each Insurer Defendant took against physicians and health care providers using Plaintiffs' facilities are numerous and detailed. However, with regard to an agreement to conspire, these allegations fall short. Although Plaintiffs allege that Centura and HCA requested that the Insurers perform these **[*1188]** kinds of actions in furtherance of the conspiracy, Plaintiffs do not directly allege that the Insurers made such an agreement, nor do they allege facts directly evidencing the Insurers' agreement with Centura and HCA. Instead, Plaintiffs' allegations only indirectly support an inference of such an agreement, pleading parallel acts by each Insurer against physicians that were using Plaintiffs' facilities.

(*Id.* at 18.) While Plaintiffs had not explicitly alleged an agreement, the Court noted that Plaintiffs could still state a *§ 1* claim through allegations of "conscious parallel conduct" that "raise[] a suggestion of a preceding **[**19]** agreement." *Twombly, 550 U.S. at 557*. However, such allegations are insufficient if they establish "merely parallel conduct *that could just as well be independent action*." *Id.* (emphasis added). The Court concluded that Plaintiffs' allegations failed on this front as well, noting that Plaintiffs had alleged plausible legitimate, independent reasons for the Insurers' actions.

> Plaintiffs' allegations of the Insurers' parallel conduct, which targeted physicians using Plaintiffs' facilities and caused indirect injury to Plaintiffs, are insufficient to reasonably suggest that the parallel conduct was the result of an agreement and not the result of independent factors. . . . [T]he FAC sets forth no facts supporting the inference of pretext, nor does the FAC clearly assert pretext. Instead, Plaintiffs ask the Court to reasonably infer that the Insurers, under pressure from powerful hospitals and in the face of allegations that Plaintiffs were violating state law, did not terminate these physicians' network contracts because their out-of-network referrals breached those contracts, but instead terminated them because the Insurers had previously agreed with the hospitals to conspire to put Plaintiffs out of business. While **[**20]** such an inference is possible, Plaintiffs' FAC does not "raise[] a suggestion of a preceding agreement" or otherwise make it plausible. *Twombly, 550 U.S. at 557*. Plaintiffs' allegations with respect to the Insurers do not suggest that they made "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto, 465 U.S. at 764*. Instead, the Court finds that the Insurers' parallel conduct could just as well be independent action. *See* *Twombly, 550 U.S. at 557*.

(*Id.* at 18-20.) Consequently, the Court dismissed Plaintiffs' claims against the Insurers. (*Id.*)

The Insurers' Motions now argue that Plaintiffs' SAC contains the same deficiencies as the FAC, and that Plaintiffs' new allegations fail to support a conspiracy. (ECF Nos. 259, 260, 261, 264.) These arguments ignore the simple basis for the Court's decision in the Dismissal Order: Plaintiffs' FAC did not explicitly allege that the Insurer Defendants *agreed* with Centura and HCA to take action against Plaintiffs, nor did it explicitly assert that the Insurers' reasons for their actions were pretextual. (*See* ECF No. 177 at 18-20.) In contrast, Plaintiffs' SAC now contains explicit allegations of agreement, and goes further by alleging the existence of evidence supporting those allegations. (**[**21]** *See, e.g.*, SAC ¶¶ 42, 51-55, 59-62, 70, 77-78, 80, 91-95, 99-102, 124.)

In particular, the Court finds compelling Plaintiffs' allegations regarding the alleged October 29, 2012 meeting, including an attendee's notes evidencing the establishment of a strategy by the participating Insurers to prevent Plaintiffs from obtaining patients, and the actions taken by each of the Insurer Defendants within a matter of days after that meeting in accordance with the agreement. These allegations support the SAC's direct assertion **[*1189]** that the Insurers entered into an agreement to take action against Plaintiffs, and thus suggest that the Insurers "had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto, 465 U.S. at 764*. Furthermore, the temporal proximity of the October 29, 2012 meeting and subsesquent Insurers' actions against physicians for their referrals to Plaintiffs "tends to exclude the possibility that . . . [they] were acting independently." *Id.* The Court consequently rejects Aetna's argument that its participation in a trade association meeting is necessarily innocent, as Plaintiffs have alleged that the participants explicitly agreed on a strategy for the Insurers to take actions **[**22]** against Plaintiffs at that meeting, that such actions were taken within days afterward, and that CASCA organizers purposefully excluded Plaintiffs from those meetings. (*See* ECF No. 264 at 7-9; SAC ¶¶ 95-100, 112.)

The Court finds that Plaintiffs have directly alleged a conspiracy and supported it with plausible factual allegations. As a result, the Court need not consider the Insurers' arguments relating to allegations that merely establish "conscious parallel conduct," namely that Plaintiffs have failed to exclude other plausible explanations for their actions. *See* *Twombly, 550 U.S. at 557*. While these arguments might well be persuasive before a jury, they need not be preemptively defeated by a plaintiff directly alleging an anticompetitive agreement in a well-pled complaint, as all such allegations are taken as true on a motion to dismiss.[2] *See* *id. at 570*. Accordingly, the Insurers' Motions are denied on this basis.

United's Motion raises a second argument, namely that an antitrust claim does not lie against a party alleged to have joined an unlawful boycott where the party had no rational motive to join the boycott. (ECF No. 260 at 13 (citing *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587-88, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986))*.) This argument is easily rejected. Plaintiff's SAC explicitly alleges that the Insurers entered the conspiracy at the behest of Centura and HCA because those hospitals possessed great market power and were essential to the Insurers' networks. (*See* SAC ¶¶ 123, 128.) As to United in particular, Plaintiffs allege that Centura threatened to terminate its contract, and notes that despite United's independent investigation that Plaintiffs were not causing breaches of physician contracts, it nonetheless took action against Plaintiffs. (*Id. ¶ 123*.) Faced with threats of losing valuable customers, the Court finds that the Insurers **[**24]** had a plausible, rational motive to join the alleged conspiracy. Accordingly, the Court denies the Motions on that basis.

IV. CONCLUSION

---

[2] For example, Aetna's Motion argues that two e-mails on which Plaintiffs' SAC relies contain evidence that Aetna attempted to bring Plaintiffs into its provider network, which contradicts Plaintiffs' allegations that Aetna sought to put Plaintiffs out of business. (ECF No. 264 at 9-13.) While Aetna correctly **[**23]** notes that a document referred to in a complaint may be considered on a motion to dismiss, the Court finds that the evidence contained therein does not make Plaintiffs' claims implausible, and instead raises a dispute of fact more appropriate for resolution by a jury. Therefore, the Court will not dismiss Plaintiffs' claims on this basis.

For the reasons set forth above, the Court ORDERS as follows:

1. The Motions to Dismiss filed by Defendants Rocky Mountain Hospital and Medical Service, Inc, d/b/a Anthem Blue Cross and Blue Shield of Colorado (ECF No. 259), UnitedHealthCare of Colorado, Inc. (ECF **[*1190]** No. 260), Colorado Ambulatory Surgery Center Association, Inc. (ECF No. 261), and Aetna, Inc. (ECF No. 264) are DENIED; and

2. The Motion to Dismiss filed by Audubon Ambulatory Surgery Center, LLC (ECF No. 266) is DENIED AS MOOT.

Dated this 16th day of June, 2015.

BY THE COURT:

Judges: WILLIAM H. PAULEY III, UNITED STATES DISTRICT JUDGE.

Opinion by: WILLIAM H. PAULEY III

Opinion

[*111] MEMORANDUM & ORDER

WILLIAM H. PAULEY III, District Judge:

Plaintiffs The Dial Corporation, Henkel Consumer Goods Inc., H.J. Heinz Company, H.J. Heinz Company, L.P., Foster Poultry Farms, Smithfield Foods, Inc., HP Hood LLC, BEF Foods, Inc., and Spectrum Brands, Inc. (collectively, "Plaintiffs") are consumer packaged goods firms ("CPGs"). They allege that Defendants News Corporation, News America Inc., News America Marketing FSI L.L.C., and News America Marketing In-Store Services L.L.C. (collectively, "News Corp.") maintain a monopoly in the market for **[**2]** in-store promotion ("ISP") services, and extract artificially high prices from their customers. Plaintiffs move to certify a class of CPGs that have "directly purchased in-store promotions from News [Corp.] at any time on or after April 5, 2008[.]" For the following reasons, Plaintiffs' motion for class certification under *Rule 23(b)(3)* is granted.

BACKGROUND

News Corp. serves as a middleman in the ISP market between CPGs on the one hand, and groceries, drug stores, and other mass retailers on the other. Plaintiffs purchase a wide variety of ISPs, including print and electronic signage, end-of-aisle displays, shelf-mounted displays, freezer displays, and floor signage from News Corp. Those ISPs allow Plaintiffs to promote their products inside retail stores. (Fourth Amended Complaint (hereinafter, "FAC") ¶ 54.) ISPs are a key component of Plaintiffs' marketing because they reach consumers at the point of purchase, unlike other promotional tools, such as media advertising, which occur outside of the store.

News Corp. entered the ISP business in 1996 and gained a significant foothold by purchasing Heritage Media for $1.3 billion dollars the following year. Thereafter, News Corp. acquired FLOORgraphics, **[**3]** Inc. along with its retail network. News Corp. later settled a lawsuit with another competitor, Insignia, and etched a deal to distribute Insignia's services through News Corp.'s retail network. (FAC ¶ 61.) Currently, News Corp. controls approximately 80% of the ISP market and is defending against monopolization claims by its only remaining competitor, Valassis, in the Eastern District of Michigan.

[*112] News Corp.'s network of 52,500 retail stores is the only "one-stop shop" for nationwide access to a wide variety of ISPs. (FAC ¶ 57.) Access to retailers is essential to News Corp.'s success. Plaintiffs allege that to maintain its monopoly and erect barriers to competitive entry, News Corp. enters into long-term contracts with retailers for exclusive access to their stores. For example, if News Corp. provides at-shelf coupon dispensers for a retailer, News Corp.'s agreement prohibits that retailer from contracting with others to place at-shelf coupon dispensers elsewhere in the store. News Corp. also enters into exclusive, long-term contracts with CPGs to advertise their products. For example, News Corp. offers a specific "tactic" (i.e., shelf coupons) for a fixed period of time to only one **[**4]** CPG for a particular product category (i.e., cereal).

Plaintiffs allege that News Corp. maintains its monopoly by using these long-term, exclusive contracts with retailers and CPGs. (FAC ¶¶ 10-17, 74-85, 108-15.) Plaintiffs also allege that News Corp. engages in additional anti-competitive conduct by: hacking into computerized customer lists and marketing materials of its competitor, FLOORgraphics; staggering the terms of exclusive contracts; enforcing shelf exclusivity; using cash guarantees to derail competitor contracts; defacing competitor advertisements; and disparaging competitors' compliance rates and their financial viability. (FAC ¶¶ 86-104.)

In addition to ISPs, Plaintiffs purchase free-standing-insert coupons ("FSIs") from News Corp. for placement in newspapers nationwide. (FAC ¶ 66.) Plaintiffs allege that News Corp. also maintains market power in the FSI product market through similar long-term, exclusive contracts. (FAC ¶ 120.)

DISCUSSION

I. Class Certification

Plaintiffs' definition of the proposed class has morphed since they filed their Fourth Amended Complaint. Back then, Plaintiffs defined two separate classes: (1) the "News In-Store Class"; and (2) the "News FSI Class." **[**5]** More recently, in their class certification motion, they abandoned the "News FSI Class," and defined the "News In-Store Class" as follows:

> Persons residing in the United States who have directly purchased in-store promotions from News Corp. at any time on or after April 5, 2008, and have not purchased these services under News Corp. contracts with mandatory arbitration clauses.

(ECF No. 141.) But that definition seems overbroad given the focus of the parties' arguments on the certification motion. The issue presented is whether the proposed class plaintiffs are representative of CPGs. And in their reply papers, Plaintiffs offer a further refinement of the proposed class definition to exclude "retail purchasers of ISP." For the purposes of the following discussion, this Court defines the proposed class as follows:

> Non-retailer consumer packaged goods firms residing in the United States which have directly purchased in-store promotions from News Corp. at any time on or after April 5, 2008, and were not subject to mandatory arbitration clauses.

a. Requirements of *Rule 23(a)*

A party seeking class certification must first show that the proposed class meets the requirements of *Federal Rule of Civil Procedure 23(a)*, which "requires that a **[**6]** proposed class action (1) be sufficiently numerous, (2) involve questions of law or fact common to the class, (3) involve class plaintiffs whose claims are typical of the class, and (4) involve a class representative or representatives who adequately represent the interests of the class." *Myers v. Hertz Corp., 624 F.3d 537, 547 (2d Cir. 2010)*. "The party must also satisfy through evidentiary proof at least one of the provisions of *Rule 23(b)*." *Comcast v. Behrend, 133 S. Ct. 1426, 1432, 185 L. Ed. 2d 515 (2013)*. Here, Plaintiffs rely on *Rule 23(b)(3)*, which "requires the party seeking certification to show that 'questions of law or fact common to class members predominate over any questions affecting only individual members' and that class treatment would be superior to individual litigation." *Myers, 624 F.3d at 547* (quoting *Fed. R. Civ. P. 23(b)(3)*).

[*113] *Rule 23* "does not set forth a mere pleading standard." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011)*. Rather, "[t]he party seeking class certification must affirmatively demonstrate compliance with the Rule, and a district court may only certify a class if it is satisfied, after a rigorous analysis, that the requirements of *Rule 23* are met." *In re Am. Int'l Grp., Inc. Sec. Litig., 689 F.3d 229, 237-38 (2d Cir. 2012)*. Plaintiffs must show compliance with *Rule 23*'s requirements by a preponderance of the evidence. *Teamsters Local 445 Freight Div. Pension Fund v. Bombardier Inc., 546 F.3d 196, 202 (2d Cir. 2008)*.

i. Numerosity

Numerosity is presumed when a class consists of forty or more members. See *Consol. Rail Corp. v. Town of Hyde Park, 47 F.3d 473, 483 (2d Cir. 1995)*. News Corp. does not contest numerosity.

ii. Commonality **[**7]**

A party seeking certification must show "there are questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. "That language is easy to misread, since '[a]ny competently crafted class complaint literally raises common 'questions.'" *Wal-Mart, 131 S. Ct. at 2551* (quoting Richard A. Nagareda, Class Certification in the Age of Aggregate Proof, 84 N.Y.U. Law Rev. 97, 131-32 (2009)). However, class claims "must depend upon a common contention . . . capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart, 131 S. Ct. at 2551*. "What matters to class certification . . . is not the raising of common 'questions'—even in droves—but, rather the capacity of a classwide proceeding to generate common answers apt to drive the resolution of the litigation. Dissimilarities within the proposed class are what have the potential to impede the generation of common answers." *Wal-Mart, 131 S. Ct. at 2551* (emphasis in original) (quoting Nagareda, *supra, at 132*).

Because "the predominance criterion is far more demanding" than the commonality requirement, when plaintiffs move for certification of a class pursuant to *Rule 23(b)(3)*, "*Rule 23(a)(2)*'s 'commonality' requirement is subsumed under, or superseded by, the more stringent *Rule 23(b)(3)* requirement" of predominance. **[**8]** *Amchem Prods, Inc. v. Windsor, 521 U.S. 591, 609, 624, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*.

Here, there are several questions common to the class and capable of resolution through common proof, including: (1) News Corp.'s liability under the Sherman Act and the Clayton Act; (2) the definitions of the relevant geographic and product markets; and (3) News Corp.'s market power in the relevant market. And the majority of News Corp.'s alleged predatory conduct involves its dealings with competitors and retailers, not the putative class members. This suggests that resolution is capable through common proof for the class. Plaintiffs have met the requirements of

Rule 23(a)(2). Cf. *Wal-Mart, 131 S. Ct. at 2556* ("We quite agree that for purposes for *Rule 23(a)(2)*, even a single common question will do[.]") (internal quotations and citations omitted).

iii. Typicality

Typicality "requires that the claims of the class representative[] be typical of those of the class, and 'is satisfied when each class member's claim arises from the same course of events, and each class member makes similar legal arguments to prove the defendant's liability.'" *Marisol A. v. Giuliani, 126 F.3d 372, 376 (2d Cir. 1997)* (quoting *In re Drexel Burnham Lambert Grp., Inc., 960 F.2d 285, 291 (2d Cir. 1992))*. "The commonality and typicality requirements tend to merge into one another." *Marisol, 126 F.3d at 376*. "Since the claims only need to share the same essential characteristics, and need not be identical, the typicality **[**9]** requirement is not highly demanding." *Bolanos v. Norwegian Cruise Lines Ltd., 212 F.R.D. 144, 155 (S.D.N.Y. 2002)*. "When it is alleged that the same unlawful conduct was directed at or affected both the named plaintiff and the class sought to be represented, the typicality requirement is usually met irrespective **[*114]** of minor variations in the fact patterns underlying individual claims." *Robidoux v. Celani, 987 F.2d 931, 936-37 (2d Cir. 1993)*.

News Corp. asserts that Plaintiffs are not representative of the class. Specifically, BEF Foods and Spectrum did not purchase ISPs over the last several years. Other Plaintiffs differ in whether they purchase ISPs across the entire News Corp. network. For instance, HP Hood focuses its marketing in New England, while Foster Farms markets to West Coast retailers. And Dial's spending on ISPs fluctuates rather dramatically. Accordingly, News Corp. argues that these Plaintiffs cannot be typical of a nationwide class of ISP purchasers.

However, Plaintiffs demonstrate that all class representatives made some ISP purchases during the damages period. Differences in amounts or characteristics of the class representatives' purchases do not defeat typicality. See *In re Sumitomo Copper Litig., 182 F.R.D. 85, 92 (S.D.N.Y. 1998)* ("[T]he simple fact that Class members may have purchased and sold copper futures at different times, for different purposes" does **[**10]** not defeat typicality).

iv. Adequacy

"Adequacy 'entails inquiry as to whether: 1) plaintiff's interests are antagonistic to the interest of other members of the class and 2) plaintiff's attorneys are qualified, experienced and able to conduct the litigation.'" *In re Flag Telecom Holdings, Ltd. Sec. Litig., 574 F.3d 29, 35 (2d Cir. 2009)* (quoting *Baffa v. Donaldson, Lufkin & Jenrette Sec. Corp., 222 F.3d 52, 60 (2d Cir. 2000))*. "The fact that plaintiffs' claims are typical of the class is strong evidence that their interests are not antagonistic to those of the class." *Damassia v. Duane Reade, Inc., 250 F.R.D. 152, 158 (S.D.N.Y. 2008)*. News Corp. does not contest adequacy,

b. Requirements of *Rule 23(b)*

i. Predominance

News Corp. contends that Plaintiffs do not meet *Rule 23(b)(3)*'s predominance requirement. *Rule 23(b)(3)* is an "'adventuresome innovation' . . . framed for situations 'in which class-action treatment is not as clearly called for.'" *Wal-Mart, 131 S. Ct. at 2558* (quoting *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 614-15, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*. "Class-wide issues predominate if resolution of some of the legal or factual questions that qualify each class member's case as a genuine controversy can be achieved through generalized proof, and if these particular issues are more substantial than the issues subject only to individualized proof." *Moore v. PaineWebber, Inc., 306 F.3d 1247, 1252 (2d Cir. 2002)*. Courts are required "to take a 'close look' at whether common questions predominate over individual ones." *Comcast, 133 S. Ct. at 1432* (quoting *Amchem, 521 U.S. at 615*).

To certify a class in an antitrust action, Plaintiffs must demonstrate that **[**11]** the elements of their underlying claims can be proven by common evidence. Those elements include: "(1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages[.]" *Cordes & Co. Fin Servs. v. A.G. Edwards & Sons, 502 F.3d 91, 105 (2d Cir. 2007)* (quotations omitted). Each element is analyzed in turn.

a. Violation of Antitrust Laws

The issues relevant to proving a violation of the antitrust laws in this case include the geographic market definition, the product market definition, News Corp.'s monopoly power, the extent of News Corp.'s exclusionary conduct, and causation. These liability issues can be proven through class-wide, common evidence because they focus on News Corp.'s conduct, not on the actions of putative class members. See *In re Flonase Antitrust Litig., 284 F.R.D. 207, 219 (E.D. Pa. 2012)*. Indeed, if each class member pursued its claims individually, the class member would have to prove the same antitrust violations using the same documents, witnesses, and other evidence. A violation of the antitrust laws is capable of common proof.

b. Antitrust Injury

To satisfy the *Rule 23(b)(3)* predominance requirement, Plaintiffs must demonstrate **[*115]** that class-wide injury or "impact" is capable of proof at trial through evidence that is common to the class rather than individual to its members. See *Comcast, 133 S. Ct. at 1430*. Plaintiffs attempt to show that **[**12]** common, class-wide proof exists that all putative class members paid more than they would have in the but-for world. Because each putative class member negotiated with News Corp. sales staff and purchased one or more of 12 different ISP products for placement in one or more of 52,500 retail stores, News Corp. contends that the substantial variation in News Corp.'s ISP prices across customers precludes class-wide proof. While Plaintiffs acknowledge that prices may differ, they counter that those prices depend, predominantly, on common and observable factors, and all CPGs would face lower prices in the but-for world.

1. Plaintiffs' Model

To support their argument, Plaintiffs rely on Dr. MacKie-Mason, Dean of the School of Information at the University of Michigan. Dr. MacKie-Mason's analysis employs a regression model that correlates News Corp.'s transaction prices to product attributes, contract attributes, and product costs—such as regional coverage, time period, placement frequency—to determine class-wide impact. (MacKie-Mason Report at 74, 79.) Dr. MacKie-Mason's model uses transaction data provided by News Corp. that tracks third party ISP sales from 2000 through 2014. (MacKie-Mason **[**13]** Report at 75.) His regression analysis concludes that 72% of the price variation in News Corp.'s transaction data can be explained using only common attributes. (MacKie-Mason Report at 79.) According to Plaintiffs, although the highest actual price paid by a putative class member was $90, and the lowest was $4, prices are largely determined by common, observable characteristics of the products, the quantities purchased, and the geographic market. (MacKie-Mason Rebuttal at 18-19.)

Plaintiffs also advance documentary evidence and deposition testimony to support their statistical showing that antitrust injury is capable of common proof. For example, until at least 2011, News Corp. used rate cards that refer to attributes such as tactic, cycle, sales category, trade class, geography, and store count, to provide a matrix of ISP prices. (MacKie-Mason Report at 74; MacKie-Mason Rebuttal at 20-21.) Rate cards were the starting point for negotiations to help customers understand ISP price differences. News Corp.'s commitment letters also tracked the same characteristics that were factored into rate cards. (MacKie-Mason Rebuttal at 21.)

News Corp. counters with an expert report by Dr. Jerry Hausman, Professor of Economics at Massachusetts Institute of Technology. Unsurprisingly, **[**14]** Dr. Hausman's statistical analysis is at odds with that of Dr. MacKie-Mason. Dr. Hausman insists that common factors explain only a "small fraction in the variation in ISP prices" and that Dr. MacKie-Mason's regression analysis suffers from "omitted variable bias" because Dr. MacKie-Mason failed to include customer-specific variables. (Hausman Report at 61.) Thus, Dr. Hausman contends that Dr. MacKie Mason's methodology causes him to overstate that portion of the ISP price variation explained by common attributes. (Hausman Report at 58, 61.) Performing an eponymous "Hausman specification test" to account for the bias, and "correcting" Dr. MacKie-Mason's regression analysis, Dr. Hausman's results suggest that customer-specific factors account for 76% of ISP prices and "common attributes explain a lot less than what Dr. MacKie-Mason thought." (Hausman Report at 62; Hausman Dep. Tr. at 85.)

Courts may not shy away from a "battle of the experts" at the class certification stage. See, e.g., *In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d 244, 255, 406 U.S. App. D.C. 371 (D.C. Cir. 2013)* (noting that *Rule 23* requires courts to take a "hard look at the soundness of statistical models that purport to show predominance[.]"). To support class certification, Plaintiffs must advance a workable methodology **[**15]** to demonstrate that antitrust injury can be proven on a class-wide basis. See *In re Currency Conversion Fee Antitrust Litigation, 224 F.R.D. 555, 565 (S.D.N.Y. 2004)*; *In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litig., 256 F.R.D. 82, 100 (D. Conn. 2009)* ("The real **[*116]** question . . . is whether the plaintiffs have established a workable multiple regression equation, not whether plaintiffs' model actually works[.]"); see also *In re Elec. Books Antitrust Litig., No. 11 MD 2293 (DLC), 2014 U.S. Dist. LEXIS 42537, 2014 WL 1282293, at *14 (S.D.N.Y. Mar. 28, 2014)* (accepting a regression analysis which explained "90% of the variance" among pricing).

The differences between the parties' regression analyses raise some alarms. But courts may consider regression models if they include variables accounting for the major factors. See *In re Urethane Antitrust Litig., 768 F.3d 1245, 1260-61 (10th Cir. 2014)*; see also *Koger v. Reno, 98 F.3d 631, 637, 321 U.S. App. D.C. 182 (D.C. Cir. 1996)* ("[C]ourts have taken the view that a defendant cannot undermine a regression analysis simply by pointing to variables not taken into account that might conceivably have pulled the analysis's sting."); cf. *Bazemore v. Friday, 478 U.S. 385, 400, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)* ("Normally, failure to include variables will affect the analysis' probativeness, not its admissibility."). It appears that Dr. MacKie-Mason's model takes account of the significant variables affecting price. Indeed, Dr. Hausman acknowledges that Dr. MacKie-Mason's model includes important product variables including volume and number of stores. (See Hausman Dep. Tr. at 94-95.)

When measured against Dr. Hausman's critique, **[**16]** Dr. MacKie-Mason's regression analysis may be of diminished probative value. See *Bazemore, 478 U.S. at 400*. Nevertheless, Plaintiffs' model suggests that pricing is capable of proof on a class-wide basis when combined with the deposition testimony, and documentary evidence such as the rate cards and commitment letters.[1] Although prices may differ on an individual level in both the actual and but-for worlds, Plaintiffs' evidence suggests that prices are systematic and, thus antitrust injury is measurable with common proof.

2. Applicability of Comcast

Seizing on the Supreme Court's holding in *Comcast v. Behrend, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*, News Corp. argues that Plaintiffs' motion fails to satisfy *Rule 23(b)(3)*'s predominance requirement. In *Comcast*, plaintiffs alleged that Comcast's acquisition of competitor cable television providers in sixteen counties clustered around Philadelphia violated the Sherman Act. In support **[**17]** of their claims, the Comcast plaintiffs offered four theories of antitrust injury or impact, i.e., four explanations for Comcast's ability to charge higher prices. The district judge concluded that only one theory was susceptible to class-wide proof: Comcast's clustering around Philadelphia reduced competition from "overbuilders," that is, competitors who build competing cable networks where incumbent cable providers already exist.[2] *Comcast, 133 S. Ct. at 1430-31*.

Writing for the majority, Justice Scalia held that the plaintiffs' expert opinion could not withstand the "rigorous analysis" necessary for the *Rule 23(b)(3)* predominance test because plaintiffs were entitled only to damages on a single theory of injury. *Comcast, 133 S. Ct. at 1433*. Because the damages model proposed by plaintiffs' expert was not based solely on the "overbuilder" theory of injury certified by the **[**18]** district court, *Comcast, 133 S. Ct. at 1433-34*, the Supreme Court concluded that "*Rule 23(b)(3)* cannot authorize treating [cable] subscribers within the Philadelphia cluster as members of a single class." *Comcast, 133 S. Ct. at 1435*. But Justices Ginsburg and Breyer in a vigorous dissent cautioned that "[t]his Court's ruling is good for this day and case only." *Comcast, 133 S. Ct. at 1437* (Ginsburg & **[*117]** Breyer, dissenting). And the Second Circuit read Comcast narrowly in *Roach v. T.L.*

---

[1] News Corp. relies on the reasoning in Allied Orthopedic Appliances, Inc. v. Tyco Healthcare Group L.P, to support its argument that Plaintiffs have not shown common proof of antitrust impact. *247 F.R.D. 156 (C.D. Cal. 2007)*. Unlike Dr. MacKie-Mason, the experts in *Allied* made no statistical showing that the prices paid by the putative class members were determinable by common factors.

[2] The other three theories of injury were that Comcast's clustering: (1) permitted it to withhold local sports programming from satellite competitors, thereby reducing competitor market penetration; (2) "reduced the level of 'benchmark' competition on which cable customers rely to compare [provider] prices"; and (3) "increased Comcast's bargaining power relative to content providers." *Comcast, 133 S. Ct. at 1430-31*.

Cannon Corp., 778 F.3d 401 (2d Cir. 2015). There, the Court of Appeals maintained that class certification need not hinge on a class-wide damages model to meet Rule 23(b)(3):

> Comcast, then did not hold that a class cannot be certified under Rule 23(b)(3) simply because damages cannot be measured on a classwide basis . . . . The Court did not hold that the proponents of class certification must rely upon a classwide damages model to demonstrate predominance.

Roach v. T.L. Cannon Corp., 778 F.3d 401, 407 (2d Cir. 2015); see also Sykes v. Mel S. Flarris and Assocs. LLC, 780 F.3d 70, 87-88 (2d Cir. 2015).

News Corp. argues that Dr. MacKie-Mason's regression model fails for the same reason as the plaintiffs' model in Comcast. Plaintiffs set forth at least nine categories of News Corp.'s allegedly exclusionary conduct in the Complaint. (See FAC ¶¶ 10-17, 74-85, 86-104, 108-15.) The "primary anticompetitive conduct alleged" by Plaintiffs is the "exclusion of News [Corp.'s] competitors from access to an essential input," i.e., **[**19]** News Corp.'s exclusionary contracts with retailers. (See MacKie-Mason Report at 72.) In his rebuttal report, Dr. MacKie-Mason acknowledges that "News [Corp.] acquired its monopoly in in-store promotions through the cumulative effect of a number of exclusionary acts[.]"[3] (MacKie-Mason Rebuttal at 5.) And as a result of these activities, News Corp. overcharged its customers. Dr. MacKie-Mason's model assumes that in a but-for world of competitive pricing, none of those exclusionary strategies would exist. (MacKie-Mason Tr. at 158:3-159:4.)

News Corp. points out that Dr. MacKie-Mason's model does not attempt to isolate the effects of any one (or more) of the nine categories of News Corp.'s exclusionary conduct **[**20]** in its damages model. This, News Corp. argues, is the model's fatal flaw, since under Comcast, damages must be tethered to plaintiffs' theory, or theories, of liability. See Comcast, 133 S. Ct. at 1433. As in Comcast, News Corp. argues that Dr. MacKie-Mason's model cannot disaggregate or distinguish injuries attributable to the nine theories that Plaintiffs assert are appropriate for class treatment (the primary theory being News Corps. exclusionary contracts with retailers).

However, News Corp. does not contend that only one of the nine theories of liability had an impact on prices. Cf. Behrend v. Comcast Corp., 264 F.R.D. 150, 166 (E.D. Pa. 2010) aff'd, 655 F.3d 182 (3d Cir. 2011) rev'd, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013) (noting that Comcast argued that the other three theories of liability, i.e., the rejected theories, had no impact on prices.) In fact, Plaintiffs argue the opposite—that News Corp. acquired its monopoly in ISPs through the "cumulative effect" of a number of related exclusionary acts, including News Corp.'s exclusive contracts with retailers, the terms of those contracts, and use of cash guarantees. (MacKie-Mason Rebuttal at 5.) Based on the evidence presented, this Court declines to reject any of the exclusionary acts as incapable of common proof. To establish that News Corp. committed any (or all) of these exclusionary acts will require **[**21]** Plaintiffs to put forth the same evidence for all members of the class. Indeed, these exclusionary acts were allegedly committed by News Corp. in its interactions with retailers and competitors, and are thus capable of common proof.

In Comcast, the Supreme Court noted that if all four types of anticompetitive injury had been approved for certification by the district court, the plaintiffs' damages methodology "might have been sound, and might have produced commonality of damages." Comcast, 133 S. Ct. at 1434. Because this Court declines to reject any of the theories of anticompetitive injury set forth in the Complaint, **[*118]** Plaintiffs' damages model is consistent with Comcast.

c. Damages

---

[3] Aside from News Corp.'s contracts with retailers and CPGs, Plaintiffs also allege that News Corp. engages in additional anti-competitive conduct by hacking into computerized customer lists and marketing materials of its competitor, FLOORgraphics; staggering the terms of exclusive contracts; enforcing shelf exclusivity; using cash guarantees to derail competitor contracts; disparaging competitors' compliance rates; defacing competitor advertisements; and disparaging competitor financial viability. (FAC ¶¶ 86-104.)

Plaintiffs must also show that the damages resulting from the antitrust injury are measurable on a class-wide basis through use of common methodology. *Comcast, 133 S. Ct. at 1430*. It used to clearly be the case that individual damages determinations would not defeat class certification. See *Seijas v. Republic of Arg., 606 F.3d 53, 58 (2d Cir. 2010)*. But, as discussed above, in Comcast, the Supreme Court decertified a class where the plaintiffs' damages model "[fell] far short of establishing that damages are capable of measurement on a classwide basis." *133 S. Ct. at 1433*. After Comcast, courts in this District and elsewhere have struggled **[**22]** with whether the predominance requirement can ever be met if individual damages calculations are required.

Several courts found that Comcast requires class-wide damages determinations as a prerequisite to class certification. See *Jacob v. Duane Reade, Inc., 293 F.R.D. 578, 583-84 (S.D.N.Y. 2013)* (discussing cases and granting partial class certification). But, barring class actions where individual damages determinations are necessary would have been a dramatic shift in the law. Indeed, before Comcast, "[r]ecognition that individual damages calculations do not preclude class certification under *Rule 23(b)(3)* [was] well nigh universal." *Comcast, 133 S. Ct. at 1437* (Ginsburg & Breyer, dissenting). And even after Comcast, the Second Circuit held that individual damage determinations will not necessarily defeat class certification under *Rule 23(b)(3)*. *Roach, 778 F.3d at 407*; see also *Sykes, 780 F.3d at 87-88*.

1. Plaintiffs' Model

Dr. MacKie-Mason employs a "benchmarking" or "yardstick" technique to calculate overcharges and antitrust damages, which he argues are capable of determination through common proof. The "yardstick" method for calculating damages is an accepted means of measuring damages in an antitrust action. See, e.g., *In re NASDAQ Market-Makers Antitrust Litigation, 169 F.R.D. 493, 521 (S.D.N.Y. 1996)*. Dr. MacKie-Mason's model accounts for variations in the News Corp. promotions purchased by individual CPGs, including whether the transaction **[**23]** was a list price or the product of a separate negotiation, the class of CPG customer, and the method of purchase. His analysis identifies benchmark competitive margins for firms similar to News Corp. in terms of capitalization and other factors. Averaging these competitive margins, he estimates how News Corp.'s monopoly pricing would have shifted downward if News Corp. had earned a competitive margin instead of a monopoly margin, with a concomitant savings for the CPGs. (MacKie-Mason Report at 82-85.)

Specifically, Dr. MacKie-Mason calculates News Corp.'s monopoly profit margin for its in-store promotions. (MacKie-Mason Report at 80-82.) He then identifies benchmark firms by surveying the companies likely to be as profitable as News Corp. in a market unaffected by monopolization. Dr. MacKie-Mason chose the benchmarks based on their capital intensity, rate of growth, size and the competitiveness of the market. (MacKie-Mason Report at 82-85.) Next, he used the average of these benchmark margins for each year in the damages period to estimate declines in News Corp.'s monopoly pricing. Dr. MacKie-Mason estimates that if News Corp. earned the competitive benchmark margin, prices would have **[**24]** declined by 40%. For the years 2008-2013, he estimates that News Corp. monopoly overcharges would vary from 31% and 43%. (MacKie-Mason Report at 85.) Dr. MacKie-Mason then proposes to apply that monopoly overcharge to prices paid by individual putative class members to calculate individual damages.

News Corp. contends that the benchmark firms Dr. MacKie-Mason chose are not similar to News Corp. in significant ways, including product, firm, and market comparability. News Corp. also disputes Dr. MacKie-Mason's use of the average benchmark firms' profit margin, as opposed to margins at the high or low end of the spectrum.

However, Dr. MacKie-Mason's selection of benchmark firms is appropriate given the limitations inherent in this case. Because **[*119]** News Corp. has allegedly maintained a monopoly in the market for ISPs since at least 2000, creating a benchmark using News Corp.'s prices during a time of "robust competition" is not feasible. (MacKie-Mason Rebuttal at 29.) And as Plaintiffs point out, the selection of perfectly comparable benchmark firms aside from News Corp. is impossible where News Corp.'s alleged monopoly prevents comparable firms from operating within its market. Indeed, the twenty benchmark firms selected **[**25]** by Dr. MacKie-Mason were not chosen arbitrarily: he chose the firms based on their capital intensity, growth, and size. (See MacKie-Mason Rebuttal at 29-31.)

Plaintiffs' damages model is sufficient to show that damages are measurable through use of a common methodology. Although characterized as a dispute over the feasibility of Plaintiffs' damages model, News Corp. essentially argues that Plaintiffs' model does not prove what they claim it proves—class-wide damages. See *In re EPDM Antitrust Litig., 256 F.R.D. at 100* ("In essence, the defendants are asking the court to determine which regression model is most accurate, which is ultimately a merits decision.") (emphasis in original). To the extent that Dr. Hausman proposes an alternative damages model using different methodology and different benchmark firms, he is free to do so at the merits stage.

2. Benefits to Putative Class Members

News Corp. maintains that class certification under *Rule 23(b)(3)* is inappropriate because increased competition in the market for ISPs may actually harm certain putative class members, while benefitting others, in varying degrees. Dr. Hausman characterizes the ISP industry as "two-sided . . . with network effects." (Hausman Report at 32.) The industry is "two-sided" because ISP providers compete **[**26]** by negotiating with retailers on one hand, and CPGs on the other. The industry has "network effects" because CPGs may place more value on a larger network. As a result, "enhanced competition for retailer space will, other things equal, reduce the value of that space to CPGs and raise third-party ISP providers' costs." (Hausman Report at 30-31.) News Corp.'s network may be less valuable to CPGs because it is smaller, and the "reduction in value will be larger for CPGs who place a higher value on the ability to use a large, national network." (Hausman Report at 31.) The existence of these "network effects" are contested by Plaintiffs. (MacKie-Mason Rebuttal at 5-9.) And, as Plaintiffs point out, News Corp.'s former CEO has previously testified that such network effects may not "necessarily" exist. (See Briody Decl. Ex. 25.)

News Corp. also argues that the steep discounts on ISPs offered to buyers when bundled with FSI would not exist in the but-for world. (See FAC ¶¶ 122-26.) For some members of the putative class, those discounts may be greater than the overcharges calculated by Dr. MacKie-Mason. Indeed, according to News Corp., nearly 20% of its customers receive ISP discounts in the actual world that are greater than the **[**27]** alleged overcharges. This fact alone, News Corp. contends, is fatal to a showing of predominance. Plaintiffs disagree and argue that discounts on bundled offerings would exist to some extent in the but-for world. (MacKie-Mason Rebuttal at 10.)

Finally, News Corp. argues that putative class members may benefit from News Corp.'s network in other ways such as lower transaction costs due to the convenience of buying from a single supplier, rather than multiple suppliers, the ability to schedule placements of ISPs in advance, and category exclusivity. (Hausman Report at 49-51.) Plaintiffs dispute the existence of these benefits.

News Corp.'s suggestion that any alleged anticompetitive conduct benefits class members in varying degrees presents a nettlesome and unsettled question of law. Compare *Kohen v. Pacific Inv. Management Co. LLC, 571 F.3d 672, 677 (7th Cir. 2009)* ("[A] class will often include persons who have not been injured by the defendant's conduct[.]") with *In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d 244, 252, 406 U.S. App. D.C. 371 (D.C. Cir. 2013)* (vacating a district court's certification of a class where plaintiffs could not prove "through common evidence, that all class members were in fact injured"). On June 8, 2015, the Supreme Court granted certiorari **[*120]** in Tyson Foods, Inc. v. Bouaphakeo to address whether a class may be certified or maintained under *Rule 23(b)(3)* when the class **[**28]** consists of uninjured class members. In Tyson, the Eighth Circuit affirmed a lower court's certification of a class of employees, at least 212 of whom were uninjured because they did not work any unpaid overtime. See Tyson Foods, Inc. v. Bouaphakeo, 14 Civ. 1146, 2015 WL 1285369 (8th Cir. March 19, 2015). A decision by the Supreme Court may provide some guidance through the predominance thicket.

In this case, the existence of "network effects," bundled discounts, and other ancillary benefits are questions of fact subject to common proof at trial. These benefits may affect the amount of damages incurred by certain putative class members, not necessarily whether they were injured. But even assuming News Corp.'s theory that discounts and benefits negate injury, the fact that some putative class members may be uninjured does not automatically defeat predominance. See *In re Currency Conversion Fee Antitrust Litigation, 264 F.R.D. 100, 117 (S.D.N.Y. 2010)*; see also *In re Elec. Books Antitrust Litig., No. 11 MD 2293 (DLC), 2014 U.S. Dist. LEXIS 42537, 2014 WL 1282293, at *22 (S.D.N.Y. Mar. 28, 2014)* (rejecting the notion that a plaintiff must prove that all class members were in fact injured at the class certification stage). Damages calculations may require individual determinations.

ii. Whether Predominance is Satisfied

The predominance inquiry requires a "qualitative assessment" of the relative importance of issues in a case. *Butler v. Sears, Roebuck and Co., 727 F.3d 796, 801 (7th Cir. 2013)*. "The mere existence **[**29]** of individual issues will not be sufficient to defeat certification. Rather, the balance must tip such that these individual issues predominate." *Sykes v. Mel S. Flarris and Assocs. LLC, 780 F.3d 70, 87 (2d Cir. 2015)*. "An issue 'central to the validity of each one of the claims' in a class action, if it can be resolved 'in one stroke,' can justify class treatment." *Butler, 727 F.3d at 801* (quoting *Wal-Mart, 131 S. Ct. at 2551*).

These important questions, at least, are common: (1) whether News Corp. violated the antitrust laws; (2) whether, assuming Plaintiffs paid supra-competitive prices, that payment was caused by News Corp.'s pattern of exclusionary conduct stemming from, inter alia, exclusionary contracts with retailers, staggering the terms of those contracts, and cash guarantees; and (3) whether the injury suffered by Plaintiffs is an antitrust injury. News Corp. disputes that it is a monopolist (see Dec. 12, 2014 Tr. at 20), and Plaintiffs will need to proffer complex expert testimony to prove their theories. Additionally, the definitions of the relevant geographic and product markets are also questions common to the class.

This Court recognizes that even if News Corp. is liable under the antitrust laws, individual issues may exist as to damages. However, proving damages pales in comparison to the **[**30]** central questions regarding liability, which are susceptible to common proof. As the Second Circuit has acknowledged, individual damages determinations do not defeat class certification. See *Roach, 778 F.3d at 407*; *Sykes, 780 F.3d at 88* ("Comcast did not rewrite the standards governing individualized damage considerations: it is still clear that individualized monetary claims belong in *Rule 23(b)(3)*.") (citations omitted). *Comcast* requires Plaintiffs to show that their damages stem from News Corp.'s actions that created the legal liability. See *Sykes, 780 F. 3d at 88*. Plaintiffs make that showing here.

To the extent that individual issues arise, they can be addressed as this litigation unfolds. See *In re Visa Check/MasterMoney Antitrust Litigation, 280 F.3d 124, 141 (2d Cir. 2001)*, overruled on other grounds by *In re IPO, 471 F.3d 24 (2d Cir. 2006)* (listing possible "management tools" available to a district court to address individualized damages issues). With looming issues regarding damages, a liability-only class, or the creation of subclasses, may be the most efficient vehicle to move this action forward. See *Butler v. Sears, Roebuck and Co., 727 F.3d 796, 799-802 (7th Cir. 2013)* (noting that "the district judge might decide to create subclasses" but "this possibility [is] not an obstacle to certification of a single mold class at the **[*121]** outset"). Dr. Hausman suggests that the putative class members who purchased ISP from News Corp. can be divided **[**31]** into one of three categories: (1) customers who purchase ISP from News Corp. and do not purchase FSI from News Corp. or Valassis; (2) customers who purchase ISP and FSI from News Corp. under a "right of first refusal" or share contract; and (3) customers who purchase ISP from News Corp. but purchase FSI from Valassis under a "right of first refusal" or share contract. (Hausman Report at 43-44.) While this may offer a template for a later stage in this litigation, predominance under *Rule 23(b)(3)* is satisfied for purposes of this class certification motion.

iii. Superiority

In determining whether "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy," a court must consider:

> (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action.

Fed. R. Civ. P. 23(b)(3).

Here, there is little interest in class members bringing their own actions. In most **[**32]** cases, a class member's potential recovery would be outweighed by the costs of litigation. Class relief is superior where, as here, class-wide litigation of common issues will reduce litigation costs and promote judicial efficiency. Cf. *In re IndyMac Mortgage-Backed Sec. Litig., 286 F.R.D. 226, 243 (S.D.N.Y. 2012)*. Accordingly, the superiority requirement is met.

c. Certification Under *Rule 23(b)(2)*

Plaintiffs also seek to certify an injunctive relief class under *Rule 23(b)(2)*. But they do so in passing. They raise this point in a single footnote in their opening brief and one paragraph in their reply brief. Those perfunctory references are insufficient to present this issue for serious consideration at this time. *In re Global Crossing, Ltd. Sec. Litig., 471 F. Supp. 2d 338, 351 n.13 (S.D.N.Y. 2006)*.

II. Appointment of Class Counsel

Finally, Plaintiffs ask this Court to appoint five law firms as class counsel, without offering any justification as to why appointing five firms is appropriate under *Rule 23(g)*. (See Briody Decl. Exs. 13, 19-22.) While this Court appreciates the desire of counsel to represent their respective clients, class certification is intended to streamline proceedings and introduce efficiencies into case management. This Court is not convinced that those objectives will be furthered with five law firms representing the class. See *In re Crude Oil Commodity Futures Litig., 11 Civ. 3600, 2012 U.S. Dist. LEXIS 23084, 2012 WL 569195, at *2 (S.D.N.Y. Feb. 14, 2012)* **[**33]** ("[T]his Court must balance the[] desire to create a 'dream team' against the competing considerations of efficiency and economy."); see also Manual for Complex Litig., § 10.221 (4th ed. 2004). Accordingly, counsel are directed to confer to decide who among them will act as lead Plaintiffs' counsel. Plaintiffs should propose no more than two law firms to serve as co-lead counsel. Failing an agreement among Plaintiffs' counsel, this Court will entertain applications for appointment of lead counsel.

CONCLUSION

For the foregoing reasons, Plaintiffs' motion for class certification under *Rule 23(b)(3)* is granted. This Court certifies a class of:

> Non-retailer consumer packaged goods firms residing in the United States which have directly purchased in-store promotions from News Corp. at any time on or after April 5, 2008, and were not subject to mandatory arbitration clauses.

Counsel for Plaintiffs are directed to confer regarding the appointment of lead counsel and advise this Court of any agreement they reach consistent with this Memorandum & Order by June 26, 2015. The Clerk of Court is directed to terminate the motion pending at ECF No. 141.

Dated: June 18, 2015

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[ ] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 8(a)*, a complaint must contain a short and plain statement of the claim showing that the plaintiff is entitled to relief. *Fed. R. Civ. P. 8(a)*. If a complaint fails to do this, the defendant may move to dismiss it under *Fed. R. Civ. P. 12(b)(6)*. *Fed. R. Civ. P. 12(b)(6)*. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim that is plausible on its face. A claim is plausible on its face when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Factual allegations must be enough to raise a right to relief above the speculative level. Thus, there must be more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility that the plaintiff is entitled to relief.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN3[] **Amendment of Pleadings, Leave of Court**

Where a district court grants a motion to dismiss, it should provide leave to amend unless it is clear that the complaint could not be saved by any amendment. Dismissal without leave to amend is improper unless it is clear, upon de novo review, that the complaint could not be saved by any amendment. But leave to amend is properly denied if amendment would be futile.

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

HN4[] **Unfair Labor Practices, Union Violations**

Section 303 of the Labor Management Relations Act, *29 U.S.C.S. § 187*, provides a judicial forum to pursue damages resulting from certain unfair labor practices committed by a union.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

HN5[] **Justiciability, Standing**

The requirement under § 303 of the Labor Management Relations Act (LMRA), *29 U.S.C.S. § 187*, that an injury occurs "by reason of" an LMRA *§ 8(b)(4)*, *29 U.S.C.S. § 158(b)(4)*, violation imposes standing limitations. To determine whether § 303 standing exists, courts are to look to: (1) the nexus between the injury and the statutory violation; and (2) the relationship between the injury alleged and the forms of injury that Congress sought to prevent or remedy by enacting the statute. And to determine the relationship between the injury and the statutory violation, courts examine whether the plaintiff was within the target area of the defendant's illegal practices and was not only hit, but also aimed at.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

HN6[] **Justiciability, Standing**

Employees of an enterprise injured by a union's violation of *§ 8(b)(4)(D)* of the Labor Management Relations Act (LMRA), *29 U.S.C.S. § 158(b)(4)(D)*, do not have standing under § 303 of the LMRA, *29 U.S.C.S. § 187*, to maintain a suit for damages against the offending union.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

***HN7*[]** **Justiciability, Standing**

When a case involves plaintiffs who are unions rather than employees who are members of a union, the analysis of standing under § 303 of the Labor Management Relations Act (LMRA), *29 U.S.C.S. § 187* remains the same. The union plaintiffs must demonstrate that there is a nexus between the injury and the statutory violation, and that the relationship between the injury alleged is one of the forms of injury that Congress sought to prevent or remedy by enacting the statute. A decrease in union dues is not a necessary and integral aspect of an LRMA violation under *29 U.S.C.S. § 158(b)(4)*.

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

***HN8*[]** **Unfair Labor Practices, Union Violations**

Section 8(b)(4)(ii)(A) of the Labor Management Relations Act (LRMA), *29 U.S.C.S. § 158(b)(4)(ii)(A)*, prohibits a union from forcing or requiring an employer to enter into a "hot cargo" agreement prohibited by *§ 8(e)*, *29 U.S.C.S. § 158(e)*. An example of such an agreement is a "union signatory" clause, which prohibits the employer from subcontracting with all employers who are not union signatories. To state an LMRA claim, plaintiffs must therefore adequately allege that the defendants have violated *§ 8(b)(4)* by enforcing an agreement that is prohibited under *§ 8(e)*, and that they consequently suffered damages as a result.

Labor & Employment Law > Collective Bargaining & Labor Relations > Labor Arbitration

Labor & Employment Law > ... > Unfair Labor Practices > Union Violations > Secondary Activities

***HN9*[]** **Collective Bargaining & Labor Relations, Labor Arbitration**

In rare cases, a union can commit a predicate unfair labor practice through its conduct in an arbitration proceeding. In such cases, the violation of *§ 8(b)(4)* of the Labor Management Relations Act, *29 U.S.C.S. § 158(b)(4)*, occurs the moment the union pursues arbitration with an unlawful secondary motive. In this context, labor agreements are considered either "primary" or "secondary," the former being permissible while the latter are not. For purposes of determining whether an agreement is primary or secondary, the touchstone is whether the agreement or its maintenance is addressed to the labor relations of the contracting employer vis-à-vis its own employees—that is, whether the agreement's object is to benefit the employees of the bargaining unit represented by the union rather than to apply pressure to a neutral employer in order to require it to accede to union objectives.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN10[] **Standing, Sherman Act**

Unions will often lack antitrust standing because it is often not clear whether a union's interests would be served by enhanced competition in the market. As a general matter, a union's primary goal is to enhance the earnings and improve the working conditions of its membership; that goal is not necessarily served, and indeed may actually be harmed, by uninhibited competition among employers striving to reduce costs in order to obtain a competitive advantage over their rivals. Set against this background, a union, in its capacity as bargaining representative, will frequently not be part of the class the Sherman Act was designed to protect, especially in disputes with employers with whom it bargains. Nevertheless, in each case a union's alleged injury must be analyzed to determine whether it is of the type that the antitrust statute was intended to forestall.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN11[] **Standing, Requirements**

"Antitrust standing" is a distinct inquiry from that of constitutional standing. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action. This determination of antitrust standing requires an evaluation of the plaintiff's harm, the alleged wrongdoing by the defendant, and the relationship between them.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Standing, Requirements**

The Supreme Court has identified a number of factors that courts are to apply when evaluating whether an antitrust plaintiff has standing. These factors include: (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Standing, Requirements**

The first antitrust standing factor addresses whether the plaintiffs' alleged injury is the result of anti-competitive behavior that ***antitrust law*** was intended to forestall—that is, whether it was the result of anti-competitive behavior. The requirement that the alleged injury be related to anti-competitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors. A plaintiff who is neither a competitor nor a consumer in the relevant market does not suffer "antitrust injury."

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN14[] **Standing, Requirements**

The second factor to determine antitrust standing considers the directness of the alleged injury. When analyzing this factor, the chain of causation between the injury and the alleged restraint in the market should lead directly to the immediate victims of any alleged antitrust violation. Generally, employees have been denied standing where their injuries were merely derivative of that of the employer.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN15[] **Standing, Requirements**

Victims who suffer indirect injuries have antitrust standing when the harm was clearly foreseeable and when there can be no question but that the loss was precisely the type of loss that the claimed violations would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN16[] **Standing, Requirements**

For purposes of determining antitrust standing, two factors have been identified by the Supreme Court as indicating the speculative nature of a damage claim: (1) the indirectness of the alleged injury, and (2) that the alleged effects may have been produced by independent factors.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN17[] **Standing, Requirements**

The final factor for determining antitrust standing is the risk of duplicative discovery. The risk to be avoided under this factor is that potential plaintiffs may be in a position to assert conflicting claims to a common fund, thereby creating the danger of multiple liability for the fund.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] **Standing, Requirements**

For purposes of determining antitrust standing, the exception recognized in Ostrofe II is limited to those cases in which a dismissed employee is an essential participant in an antitrust scheme, the dismissal is a necessary means to accomplish the scheme, and the employee has the greatest incentive to challenge the antitrust violation.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN19[] **Defenses, Demurrers & Objections, Motions to Dismiss**

Whether a case can be dismissed on the pleadings depends on what the pleadings say. A plaintiff may plead herself out of court. If the pleadings establish facts compelling a decision one way, that is as good as if depositions and other expensively obtained evidence on summary judgment establishes the identical facts. The court may not consider evidence or factual matter not presented in the pleadings or judicially noticed documents.

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

HN20[] **Labor, Nonstatutory Exemptions**

To determine whether the nonstatutory labor antitrust exemption applies, the U.S. Court of Appeals for the Ninth Circuit has adopted the U.S. Court of Appeals for the Eighth Circuit's test from Mackey v. National Football League. Under that test, the parties to an agreement restraining trade are exempt from antitrust liability only if (1) the restraint primarily affects the parties to the agreement and no one else, (2) the agreement concerns wages, hours, or conditions of employment that are mandatory subjects of collective bargaining, and (3) the agreement is produced from bona fide, arm's-length collective bargaining. To obtain dismissal of the plaintiffs' antitrust claims, the defendants must demonstrate that the factual allegations in the complaint establish each of these factors. The U.S. District Court for the Central District of California has rejected an attempt to impose the additional requirement that the provisions in question must address the labor relationship between an employer and its employees. The three-part test from Mackey was designed to be applicable to different types of cases.

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

HN21[] **Labor, Nonstatutory Exemptions**

To determine whether the nonstatutory labor antitrust exemption applies, a court must consider whether the matter is peculiarly suitable for resolution within the collective bargaining framework and amenable to the collective bargaining process.

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

HN22[] **Collective Bargaining & Labor Relations, Bargaining Subjects**

Work assignments are mandatory subjects of collective bargaining, even if the employer is assigning work outside of the collective bargaining unit.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Affirmative Defenses

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN23[] **Defenses, Demurrers & Objections, Affirmative Defenses**

Plaintiffs are not required to plead on the subject of an anticipated affirmative defense. When an affirmative defense is obvious on the face of a complaint, however, a defendant can raise that defense in a motion to dismiss.

Antitrust & Trade Law > Exemptions & Immunities > Labor > Nonstatutory Exemptions

Civil Procedure > Pleading & Practice > Pleadings > Complaints

Evidence > Judicial Notice

HN24[] **Labor, Nonstatutory Exemptions**

To determine that the nonstatutory labor antitrust exemption applies at the pleading stage, it must be clear either from the allegations in the complaint or from judicially noticed facts that all three elements of the Mackey test are satisfied.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Appeals > Appellate Jurisdiction > Lower Court Jurisdiction

HN25[] **Appellate Jurisdiction, Interlocutory Orders**

A district court retains jurisdiction over an interlocutory order—and thus may reconsider, rescind, or modify such an order—until a court of appeals grants a party permission to appeal.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN26[] **Attempts to Monopolize, Elements**

The Sherman Act prohibits monopolies and attempts to form monopolies. *15 U.S.C.S. § 2* provides that every person who shall monopolize, or attempt to monopolize, or conspire with any other persons, to monopolize any part of the trade or commerce commits a felony. To prevail on a claim of attempted monopoly, plaintiffs must establish (1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving monopoly power; and (4) causal antitrust injury. This fourth element requires that the plaintiffs only be compensated for injuries that the antitrust laws were intended to protect.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN27[] **Judges, Discretionary Powers**

A district court's discretion to deny leave to amend is particularly broad where the plaintiff has previously amended the complaint.

ORDER RE: MOTION TO DISMISS [48]

I. INTRODUCTION

Pending before the Court is Defendants' motion to dismiss Plaintiffs' Second Amended Complaint ("SAC") pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (Dkt. No. 48.) After consideration of the papers filed in support of and in opposition to the instant motion, the Court deems this matter appropriate for decision without **[*1224]** oral argument of counsel. *See* *Fed. R. Civ. P. 78*; *C.D. Cal. L.R. 7-15*. For the following reasons, Defendants' motion is **GRANTED in part** and **DENIED in part**.

II. BACKGROUND

A. The Parties

Plaintiffs are comprised of two primary groups. First, Plaintiffs Surf City Steel, Inc. and Sarens USA, Inc. (collectively, the "Employer Plaintiffs") are each California corporations that constitute "employers" within the meaning of *29 U.S.C. § 152(2)*.[1] (SAC ¶¶ 5-6.) Plaintiffs allege that the Employer Plaintiffs each perform work within the relevant market area described in the SAC and performed relevant work within that market area. (SAC ¶ 7.) Second, Plaintiffs International Association of Bridge, Structural, **[**2]** Ornamental and Reinforcing Iron Workers ("Iron Workers"), International Association Local 378, International Association Local 377, International Association Local 433, International Associations Local 29, and International Association of Bridge, Structural, Ornamental and Reinforcing Iron Workers Local 86 (collectively, the "Union Plaintiffs") are labor unions whose members perform relevant work. (SAC ¶¶ 8-13.)

Defendants are also labor unions that "conduct[] activities as a labor organization" in the relevant market area as defined in the SAC. (SAC ¶¶ 14-18.) The named Defendants in this action include International Longshore Warehouse Union ("ILWU"), ILWU Local 10, ILWU Local 8, ILWU Local 19, **[**3]** and ILWU Local 13. (SAC ¶¶ 14-18.)

B. The Relevant Market Area and Relevant Work

As defined in the SAC, the "relevant market area" consists of "those port facilities on the West Coast of the United States within the States of California, Oregon and Washington, including the Long Beach, California Port Facility;

---

[1] *Section 152(2)* states: ***HN1***[] "The term 'employer' includes any person acting as an agent of an employer, directly or indirectly, but shall not include the United States or any wholly owned Government corporation, or any Federal Reserve Bank, or any State or political subdivision thereof, or any person subject to the Railway Labor Act, as amended from time to time, or any labor organization (other than when acting as an employer), or anyone acting in the capacity of officer or agent of such labor organization."

the Los Angeles, California Port Facility; the Oakland, California Port Facility; the San Francisco Port Facility; the Portland, Oregon Port Facility; and the Seattle/Tacoma, Washington Port Facility." (SAC ¶ 19.)

The SAC also defines the "relevant work" as: "the labor and services necessary for the non-operational structural maintenance and structural modification of cranes and movement of cranes and all other work in connection therewith; and the jacking, erection and modification of new cranes and of existing cranes and movement of new cranes and existing cranes in connection therewith. This includes the relocation of such cranes when such relocation or movement involves either the installation of new cranes or the jacking, erecting, and modification of existing cranes, including the removal, wrecking and dismantling of such cranes and rubber gantry cranes." (SAC ¶ 20.)

C. Factual [4] Background**

Plaintiffs allege that Defendants have acted in concert with various port managers who conduct business in the relevant market area to monopolize the relevant work market and exclude Plaintiffs from conducting business in the relevant work market area. (SAC ¶ 27.) According to Plaintiffs, in 2008 Defendants entered into **[*1225]** an agreement with the port managers—known as the Pacific Coast Longshore Contract Document ("PCLCD")—which covers the relevant work involving ports along the West Coast, including in Long Beach, Los Angeles, Oakland, Oregon, and Washington State. (SAC ¶ 38.) Plaintiffs allege that the purpose and intent of the PCLCD is to eliminate the competition that Defendants would face from Plaintiffs in the relevant market. (SAC ¶ 45.) Plaintiffs further allege that the agreement is not designed to preserve work that Defendants have historically performed, but instead for Defendants to monopolize labor in the relevant market to control the price of labor. (SAC ¶¶ 41-58.) Plaintiffs claim that the PCLCD has no pro-competitive justification. (SAC ¶ 59.)

Additionally, the PCLCD includes a mandatory grievance and arbitration process, by which Defendants have enforced the **[**5]** agreement against Plaintiffs. (SAC ¶ 39.) The SAC asserts that the PCLCD's arbitration mechanism effectively prohibits Plaintiffs—who are not signatories to the PCLCD—from bidding on projects and performing work that they have traditionally performed in the relevant market area. (SAC ¶¶ 60-68.) In support of these allegations, Plaintiffs provide a number of factual examples in which Plaintiffs were precluded from bidding or working on certain projects in the relevant market area because they were not ILWU contractors. (*See* SAC ¶¶ 69-89.)

D. Procedural History

As a result of these allegations, Plaintiff Iron Workers sent ILWU a letter in June 2014 in which Iron Workers accused Defendants of violating federal antitrust laws. (SAC ¶ 68.) When ILWU did not respond, Plaintiffs filed their Complaint on July 18, 2014. (Dkt. No. 1.) On October 9, 2014, Defendants filed a motion to dismiss the Complaint, (Dkt. No. 27), which the Court granted on January 20, 2015 with leave to amend, (Dkt. No. 40). Plaintiffs then filed a First Amended Complaint on February 9, 2015. (Dkt. No. 41.) On February 23, 2015, Defendants filed a motion to dismiss the First Amended Complaint, (Dkt. No. 42), which the Court **[**6]** granted on April 6, 2015, again with leave to amend, (Dkt. No. 46).

Plaintiffs then filed the SAC on April 20, 2015. (Dkt. No. 47.) In the SAC, Plaintiffs allege three causes of action for: (1) violation of sections 1 and 2 of the Sherman Act, (SAC ¶¶ 90-130); (2) breach of contract, (SAC ¶¶ 131-42); and (3) violation of section 303 of the Labor-Management Relations Act ("LMRA"), *29 U.S.C. § 187*, (SAC ¶¶ 143-62). Defendants then brought the instant motion to dismiss the SAC on May 4, 2015. (Dkt. No. 48.) Plaintiffs opposed this motion on May 21, 2015, (Dkt. No. 50), and Defendants replied on June 8, 2015, (Dkt. No. 51).

III. LEGAL STANDARD

HN2[] Under *Rule 8(a)*, a complaint must contain a "short and plain statement of the claim showing that the [plaintiff] is entitled to relief." *Fed. R. Civ. P. 8(a)*. If a complaint fails to do this, the defendant may move to dismiss it under *Rule 12(b)(6)*. *Fed. R. Civ. P. 12(b)(6)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. A claim is plausible on its face "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "Factual allegations must be enough **[**7]** to raise a right to relief above the speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Thus, there must be "more **[*1226]** than a sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678*. "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility'" that the plaintiff is entitled to relief. *Id.*

HN3[] Where a district court grants a motion to dismiss, it should provide leave to amend unless it is clear that the complaint could not be saved by any amendment. *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)* ("Dismissal without leave to amend is improper unless it is clear, upon de novo review, that the complaint could not be saved by any amendment."). But leave to amend "is properly denied . . . if amendment would be futile." *Carrico v. City & Cnty. of S.F., 656 F.3d 1002, 1008 (9th Cir. 2011)*.

IV. DISCUSSION

As in the previous two motions to dismiss, Defendants seek dismissal of each of Plaintiffs' claims for (1) violation of section 303 of the LMRA; (2) violations of federal ***antitrust law***; and (3) breach of contract. The Court will discuss each claim in turn.

A. Section 303 of LMRA

HN4[] Section 303 of the LMRA "provides a judicial forum to pursue damages resulting from certain unfair labor practices committed by a union." *Am. President Lines, Ltd. v. Int'l Longshore & Warehouse Union, Alaska Longshore Div., Unit 60, 721 F.3d 1147, 1149 (9th Cir. 2013)*. Plaintiffs allege that Defendants have committed unfair labor practices because their conduct **[**8]** violates section 8(b)(4) of the LMRA, *29 U.S.C. § 158(b)(4)*. (SAC ¶ 143.) Defendants make two arguments in favor of dismissing Plaintiffs' LMRA claims. First, Defendants argue that the Union Plaintiffs lack standing to assert such a claim. Second, Defendants contend that Plaintiffs have failed to allege a "secondary objective" as required by section 303 of the LMRA.

1. The Union Plaintiffs Lack Standing

The Ninth Circuit has held that *HN5*[] "Section 303's requirement that an injury occurs 'by reason of' a Section 8(b)(4) violation 'imposes standing limitations.'" *Am. President Lines, 721 F.3d at 1153* (quoting *Fulton v. Plumbers & Steamfitters, 695 F.2d 402, 405 (9th Cir. 1982))*. To determine whether section 303 standing exists, courts are to look to: "(1) the nexus between the injury and the statutory violation; and (2) the relationship between the injury alleged and the forms of injury that Congress sought to prevent or remedy by enacting the statute." *Id.* And to determine the relationship between the injury and the statutory violation, courts "examine whether the plaintiff 'was within the target area of the defendant's illegal practices and was not only hit, but also aimed at.'" *Id.* (quoting *Fulton, 695 F.2d at 406*).

In their SAC, Plaintiffs allege that the Union Plaintiffs have standing to pursue their LMRA claims because the Union Plaintiffs suffered the injury of lost union members and thus lost dues resulting from their **[**9]** members' decision to withdraw and join Defendants. (SAC ¶¶ 107(c), 159(c); *see also* Opp'n at 2, 5 & n.2.) Defendants, however, argue that the Ninth Circuit's holding in *Fulton* forecloses the Union Plaintiffs from having standing under section

303, regardless if they express their injury in terms of their members' interests or their ability to acquire member dues. (Mot. at 4.)

In *Fulton,* the Ninth Circuit held that ***HN6***[] "employees of an enterprise injured by a union's violation of *section 8(b)(4)(D) of the LMRA* [do not] have standing under section 303 of the LMRA to maintain a suit for damages against the offending union." **[*1227]** *695 F.2d at 405, 407-08*. In doing so, the court noted that the "principal object of [defendant] unions' illegal activities was to pressure the site employer to reassign work from the members of the [plaintiffs' union] to members of the [defendant's] unions," which caused the site employer to "respond[] by suspending operation and temporarily laying off workers." *Id. at 407*. The court found that "[t]his consequence was not a 'necessary and integral' aspect of the section 8(b)(4)(D) violation," and therefore that "[t]he injury alleged [was] too remote from the alleged violation to warrant section 303 standing." *Id.; accord Prater v. United Mine Workers of Am., Dists. 20 & 23, 793 F.2d 1201, 1206 (11th Cir. 1986)* (applying *Fulton* to determine **[**10]** that employees lack standing to sue under section 303); *Starks v. Perloff Bros., 760 F.2d 52, 53 (3d Cir. 1985)* (finding that plaintiffs—warehousemen who were members of defendant union—lacked standing to sue defendant under section 303); *Schrader v. Sheet Metal Workers Int'l Ass'n Local Union No. 20, 656 F. Supp. 1487, 1498 (N.D. Ind. 1987)* ("Courts have held in a variety of factual situations . . . that employees may not sue for damages pursuant to § 303 arising out of secondary activity.").[2]

HN7[] While this case involves plaintiffs who are unions rather than employees who are *members* of a union, the analysis remains the same. The Union Plaintiffs must demonstrate that there is a "nexus between the injury and the statutory violation," and that the "relationship between the injury alleged" is **[**11]** one of the "forms of injury that Congress sought to prevent or remedy by enacting the statute." *Am. President Lines, 721 F.3d at 1153* (quoting *Fulton, 695 F.2d at 405*). Here, however, the injury alleged in the SAC is even more remote from the alleged violation of section 303 than that described in the initial Complaint. In their original Complaint, Plaintiffs alleged that Defendants' conduct had caused signatories to the PCLCD to "cease or refrain from doing business with Plaintiff employers and others who are signatory to an agreement with Plaintiff Unions," (Compl. ¶ 93), which consequently prevented members of the Union Plaintiffs from working. In their First Amended Complaint and in the SAC, Plaintiffs have added another layer to the causal chain, claiming that because the union members are not working, they are leaving the unions, which in turn causes the Union Plaintiffs to suffer a decrease in the union dues that they collect. (*See* SAC ¶¶ 107(c), 159(c).) But a decrease in union dues is not a "necessary and integral aspect" of the alleged LRMA violation, *Fulton, 695 F.2d at 407*, and thus Plaintiffs' allegation does not form a sufficient nexus between the injury and statutory violation. *Id. at 405*. The Court therefore concludes that the Union Plaintiffs lack standing to pursue **[**12]** their LMRA claims.

2. Secondary Objective

Defendants also argue that all Plaintiffs' LMRA claims should be dismissed because they fail to state a viable **[*1228]** claim in the SAC. Plaintiffs' LMRA claim is predicated upon a violation of ***HN8***[] *section 8(b)(4)(ii)(A) of the LMRA*, which prohibits a union from "forc[ing] or requir[ing] an employer to enter into a 'hot cargo' agreement prohibited by *Section 8(e)*." *Am. President Lines, 721 F.3d at 1153*. An example of such an agreement is a "union signatory" clause, "which prohibits the employer from subcontracting with all employers who are not union signatories." *Id.; accord N.L.R.B. v. Hotel & Rest. Emps. & Bartenders' Union Local 531, 623 F.2d 61, 67 (9th Cir. 1980)* ("[I]t is well settled that union signatory clauses violate *section 8(e)*."). To state an LMRA claim, Plaintiffs must

[2] The District of Columbia Circuit persuasively explained the reasons for limiting standing pursuant to section 303: "The practical reasons justifying the view that section 303 imposes significant standing requirements are quite simple. Absent such requirements, 'unlimited liability under § 303 might produce financial disaster for unions and inhibit the exercise of the right to strike.' In light of these considerations, it has been clear to the courts that 'the imposition of unlimited liability under section 303 would tend to subvert our national labor policy.'" *Charvet v. Int'l Longshoremen's Ass'n, AFL-CIO, 736 F.2d 1572, 1575, 237 U.S. App. D.C. 207 (D.C. Cir. 1984)* (internal citations and modifications omitted) (quoting *W.J. Milner & Co. v. Int'l Bhd. of Elec. Workers, Local 349, 476 F.2d 8, 12 (5th Cir. 1973)*; *Fulton, 695 F.2d at 408*).

therefore adequately allege that Defendants have violated section 8(b)(4) by enforcing an agreement that is prohibited under *section 8(e)*, and that they consequently suffered damages as a result. *Am. President Lines, 721 F.3d at 1157*.

Plaintiffs state in the SAC that Defendants have, pursuant to the PCLCD, conspired with port managers to prohibit them from doing business with contractors who are not signatories to the PCLCD, thus precluding the Employer Plaintiffs from bidding on certain projects. (*See, e.g.*, SAC ¶¶ 27, 38, 39, 45-51.) Plaintiffs contend that Defendants carried out this conspiracy by including a "cease doing business" provision **[**13]** in violation of *section 8(e) of the LMRA*, which they have enforced through a grievance and arbitration process. (Opp'n at 14.) As in their previous complaints, Plaintiffs cite the following language from the PCLCD as evidence of a "cease doing business" provision:

> Section 1.7. This contract document shall apply to the maintenance and repair of containers of any kind and of chassis, and the movement incidental to such maintenance and repair.
>
> Section 1.71. This contract document shall apply to the maintenance and repair of all stevedore cargo handling equipment.
>
> Section. 1.72. It is agreed that the jurisdiction of the ILWU shall apply to the maintenance and repair of all present and forthcoming stevedore cargo handling equipment in accordance with Sections 1.7 and 1.71 . . . .

(SAC ¶ 38.) Yet Plaintiffs do not demonstrate how these sections actually constitute a "cease doing business" provision. Instead, Plaintiffs again rely on conclusory allegations to support this position, stating, for example: "These provisions have been interpreted and enforced by the Defendants, through grievance and arbitration procedures to require that the relevant work performed in the relevant market area must be assigned to the Defendants and to contractors who only employ ILWU members." **[**14]** (SAC ¶ 39.)

The Ninth Circuit has noted that, ***HN9***[] "[i]n rare cases, [a] union can commit a predicate unfair labor practice through its conduct in an arbitration proceeding." *Am. President Lines, 721 F.3d at 1149*. In such cases, "[t]he Section 8(b)(4) violation occurs the moment the union pursues arbitration with an unlawful secondary motive." *Id. at 1155*. In this context, labor agreements are considered either "primary" or "secondary," the former being permissible while the latter are not. *See N.L.R.B. v. Int'l Longshoremen's Ass'n, AFL-CIO, 473 U.S. 61, 78-79, 105 S. Ct. 3045, 87 L. Ed. 2d 47 (1985)*. For purposes of determining whether an agreement is primary or secondary, "[t]he touchstone is whether the agreement or its maintenance is addressed to the labor relations of the contracting employer vis-à-vis [its] own employees," *Nat'l Woodwork Mfrs. Ass'n v. N.L.R.B., 386 U.S. 612, 645, 87 S. Ct. 1250, 18 L. Ed. 2d 357 (1967)*—that is, whether the agreement's "object . . . is to benefit the employees of the bargaining **[*1229]** unit represented by the union" rather than to apply pressure to a "[neutral] employer in order to require [it] to accede to union objectives." *A. Duie Pyle, Inc. v. N.L.R.B., 383 F.2d 772, 776 (3d Cir. 1967)*; *accord Peabody Holding Co. v. United Mine Workers of Am., Int'l Union, 41 F. Supp. 3d 494, 2014 WL 4258087, at *9 (E.D. Va. 2014)*.

Here, Plaintiffs allege that the purpose of Defendants' grievance and arbitration mechanism "is to eliminate competition which Defendants would face from Plaintiff unions and their affiliated contractors," and that the agreement **[**15]** is "an effort to restrain trade and monopolize the relevant work by prohibiting non-ILWU signatory contractors and unions from bidding the relevant work." (SAC ¶¶ 44-45.) These bare assertions of a secondary purpose are conclusory. Plaintiffs do not allege any *facts* from which the Court could infer that the purpose of these arbitration proceedings was to pressure contractors not to allow Plaintiffs (or other non-ILWU signatories) to work or bid on their projects. Without any specific factual allegations from which the Court could infer that Defendants actually instituted such a "cease doing business provision," Plaintiffs have failed to adequately plead a violation of *section 8(e) of the LMRA*. Accordingly, the Court finds that Plaintiffs have again failed to state a claim under the LMRA.

B. Antitrust

Defendants seek to dismiss Plaintiffs' antitrust claims on three grounds. First, Defendants claim that the Union Plaintiffs lack standing to assert an antitrust claim. Second, Defendants contend that their alleged conduct is exempt from ***antitrust law***. And third, Defendants argue that Plaintiffs have failed to state a claim for attempted monopoly.

1. The Union Plaintiffs Lack Standing

To begin, Defendants assert that the Union Plaintiffs **[**16]** lack standing to pursue an antitrust claim.[3] Indeed, the Supreme Court has observed that ***HN10***[] unions will often lack antitrust standing because it is often not clear whether a union's interests would be served by enhanced competition in the market:

> As a general matter, a union's primary goal is to enhance the earnings and improve the working conditions of its membership; that goal is not necessarily served, and indeed may actually be harmed, by uninhibited competition among employers striving to reduce costs in order to obtain a competitive advantage over their rivals. . . . Set against this background, a union, in its capacity as bargaining representative, will frequently not be part of the class the Sherman Act was designed to protect, especially in disputes with employers with whom it bargains.

Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpetners, 459 U.S. 519, 539-40, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983) [hereinafter *AGC*]. Nevertheless, the Court held that, "[i]n each case [a union's] alleged injury must be analyzed to determine whether it is of the type that the antitrust statute was intended to forestall." *Id.*

[*1230] In *AGC*, ***HN12***[] the Supreme Court identified a number of factors that courts are to apply when evaluating whether an antitrust plaintiff has standing. These factors include: "(1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1054 (9th Cir. 1999)*.[4] The Court will address each of these factors in light of Plaintiffs' amendments to the First Amended Complaint.

a. The Nature of the Union Plaintiffs' Alleged Antitrust Injury

HN13[] The first factor addresses whether the Union Plaintiffs' alleged injury is the result of anti-competitive behavior **[**18]** "that ***antitrust law*** was intended to forestall"—that is, whether it was the result of anti-competitive behavior. *Eagle, 812 F.2d at 540*. "The requirement that the alleged injury be related to anti-competitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors." *Id.* A plaintiff "who is 'neither a competitor nor a consumer' in the relevant market does not suffer 'antitrust injury.'" *Vinci v. Waste Mgmt., Inc., 80 F.3d 1372, 1376 (9th Cir. 1996)* (quoting *In re Ins. Antitrust Litig., 938 F.2d 919, 926 (9th Cir. 1991))*. In their SAC, Plaintiffs define the relevant market as including the "labor and services necessary for the non-operational structural maintenance and structural modification of cranes and movement of cranes and all other

---

[3] ***HN11***[] "Antitrust standing" is a distinct inquiry from that of constitutional standing. *See Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. "Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury **[**17]** in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action." *Id.* "This determination of antitrust standing requires an evaluation of the plaintiff's harm, the alleged wrongdoing by the defendant, and the relationship between them." *Bubar v. Ampco Foods, Inc., 752 F.2d 445, 448-49 (9th Cir. 1985)*.

[4] The Ninth Circuit has summarized the *AGC* factors in various ways, but the analysis remains the same in each case. *See, e.g., R.C. Dick Geothermal Corp. v. Thermogenics, Inc., 890 F.2d 139, 146 (9th Cir. 1989)*; *Sacramento Valley, Chapter of the Nat'l Elec. Contractors Ass'n v. Int'l Bhd. of Elec. Workers, Local 340, 888 F.2d 604, 605 (9th Cir. 1989)*; *Eagle v. Star—Kist Foods, Inc., 812 F.2d 538, 540 (9th Cir. 1987)*.

work in connection therewith; and the jacking, erection and modification of new cranes and of existing cranes and movement of new cranes and existing cranes in connection therewith." (SAC ¶ 20.)

This Court previously held that the Union Plaintiffs are neither consumers nor competitors in the market of construction, maintenance, and structural modification of cranes and movement of cranes, and that, consequently, the Union Plaintiffs were not in competition in the market in which the alleged antitrust violation occurred. (Dkt. No. 40 **[**19]** at 12-13.) Nevertheless, Plaintiffs argue that they compete with Defendants "to supply the labor used by the contractors who perform the relevant work." (Opp'n at 8 (citing SAC ¶¶ 22, 38-43).) As this sentence implicitly concedes, however, it is the laborers they supply—*i.e.*, the employees whom the Union Plaintiffs represent—who perform the relevant work and who thus are the competitors in the market. *See Eagle, 812 F.2d at 541* ("The vessel owners are requisite 'sellers' in the relevant market, not the crewmembers or the union. Thus, the class members have not alleged the type of injury antitrust laws were intended to forestall, because the alleged anticompetitive conduct was directed at the vessel owners, not the crewmembers or the union.").[5] The Union Plaintiffs' participation in the relevant market is thus derivative of **[*1231]** the work performed by the laborers whom they represent.[6]

Alternatively, Plaintiffs argue that the labor and services markets are separate, but that they are so inextricably intertwined that the Union Plaintiffs' injuries were suffered as participants in the relevant market. (Opp'n at 8-9.) In support of this position, Plaintiffs cite to *In re Lithium Ion Batteries Antitrust Litigation, No. 13-MD-2420 YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *12 (N.D. Cal. Oct. 2, 2014)*, as an example of markets that are so inextricably linked that an antitrust violation in one is sufficient to find an antitrust injury in the other. As Defendants argue, however, the Union Plaintiffs are not competitors or consumers in either the labor or services markets. Rather, the Employer Plaintiffs provide the services in the relevant market, and their employees provide the labor. As collective bargaining **[**21]** agents, the Union Plaintiffs participate in these markets only derivatively based on their representation of the direct participants. That is insufficient to confer antitrust standing. *See Eagle, 812 F.2d at 541*. Thus, this factor weighs against finding antitrust standing.

b. The Directness of the Alleged Injury

HN14[] The second factor to determine antitrust standing considers the directness of the alleged injury. When analyzing this factor, "[t]he chain of causation between the injury and the alleged restraint in the market should lead directly to the 'immediate victims' of any alleged antitrust violation. Generally, employees have been denied standing where their injuries were merely derivative of that of the employer." *Id.* Plaintiffs argue that the alleged injury was direct because the Union Plaintiffs were the intended target of Defendants' wrongful conduct. (Opp'n at 10-11.)

The Court has already held that the economic injury of lost revenue from union dues is derivative of the alleged injury suffered by the union members. (Dkt. No. 40 at 13-14; 46 at 12.) As the Court explained, any economic injury suffered by the Union Plaintiffs must be a result of the dues paid to them by their members, which presumably decrease **[**22]** when their members are prevented from bidding or working on certain projects. (Dkt. No. 40 at 13.) Nevertheless, Plaintiffs rely on *Blue Shield of Virginia v. McCready, 457 U.S. 465, 479 (1982), 102 S. Ct. 2540, 73 L. Ed. 2d 149*—as they did in opposing Defendants' previous motion to dismiss—for the proposition that unintended victims with indirect injuries may still have antitrust standing, and that, consequently, intended victims would

[5] To the extent that *Connecticut Ironworkers Employers Association v. New England Regional Council of Carpenters, No. 3:10CV165 SRU, 2012 U.S. Dist. LEXIS 37523, 2012 WL 951793, at *14 (D. Conn. Mar. 20, 2012)*, suggests otherwise, the Court respectfully declines to follow this holding in light of the Ninth Circuit's holding in *Eagle.*

[6] Were Plaintiffs to define the relevant market as, for example, that of labor union **[**20]** membership dues, the result may be different, as the Union Plaintiffs' only alleged injury is a reduction of such dues as a result of their members terminating their membership and joining Defendants' unions. (*See, e.g.*, SAC ¶ 159(c).) It is thus plausible to conclude that the Union Plaintiffs are competing with Defendants for union membership dues, but it is not reasonable to conclude that they compete in the relevant market as defined in the SAC.

necessarily have antitrust standing. In McCready, the Supreme Court held that **HN15**[] victims who suffer indirect injuries have antitrust standing when the harm was "clearly foreseeable" and when "there can be no question but that the loss was precisely 'the **[*1232]** type of loss that the claimed violations . . . would be likely to cause.'" *Id.* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. The plaintiff in *McCready* was a consumer in the relevant market who was injured by the defendants' acts to restrain competition in that market. *See AGC, 459 U.S. at 538* (discussing *McCready*).

Here, the Union Plaintiffs offer no facts to support the position that the alleged injury was "clearly foreseeable" or "the type of loss that the claimed violations . . . would be likely to cause." *McCready, 457 U.S. at 479*. Instead, Plaintiffs provide only the conclusory statement that the Union Plaintiffs were the target of Defendants' unlawful conduct and therefore **[**23]** have standing. (Opp'n at 10.) That is insufficient. *See Lucas v. Bechtel Corp., 800 F.2d 839, 846 n.9 (9th Cir. 1986)* (rejecting similar argument). As a result, the Court finds that the Union Plaintiffs are not consumers within the relevant market and therefore are not the parties who would likely suffer from the claimed violation. The Union Plaintiffs fail to provide facts to demonstrate a direct injury, and thus the second factor weighs against antitrust standing.

c. The Speculative Measure of the Damages

As in its previous orders, the Court will consider the third factor—whether the measure of damages is speculative—and the fifth factor—the complexity in apportioning damages—together. (*See* Dkt. Nos. 40, 46.) **HN16**[] "Two factors have been identified by the Supreme Court as indicating the speculative nature of a damage claim: (1) the indirectness of the alleged injury, and (2) that the alleged effects may have been produced by independent factors." *Eagle, 812 F.2d at 542*. In the context of a union's indirect injuries in an antitrust case, distinguishing the Union Plaintiffs' injuries from those of its members can prove troublesome. *See Sacramento Valley, 888 F.2d at 609*.

The Union Plaintiffs claim that the measure of their damages is simple because the damages only include lost revenue from the lost member **[**24]** dues of employers who left the Union Plaintiffs for Defendants. (Opp'n at 11-12.) Yet Plaintiffs ignore that this injury is indirect, which necessarily raises the issue of additional independent factors in the analysis of damages. *See Eagle, 812 F.2d at 542*; *Sacramento Valley, 888 F.2d at 609* ("[T]he alleged 'loss of work opportunities' could be the result, at least in part, of a wide variety of independent factors having nothing to do with the alleged conspiracy."). Therefore, Plaintiffs' assertion that the measure of damages will be "easy" is conclusory and unsupported. Moreover, as the Court explained in its prior orders, the Union Plaintiffs' injury is derivative of its members' inability to bid for work or obtain work in the relevant market area. (Dkt. No. 40 at 14; 46 at 13.) Consequently, the Union Plaintiffs' injury must be calculated by determining an undefined share of their members' losses. Simply referring to this determination as "easy" does not cure the deficiencies that the Court has identified in the Union Plaintiffs' pleadings. Accordingly, these factors both weigh against finding antitrust standing because permitting the Union Plaintiffs to proceed on their antitrust claim could cause "problems of identifying damages and apportioning **[**25]** them among directly victimized contractors and subcontractors and indirectly affected employees and union entities." *AGC, 459 U.S. at 545*.

d. The Risk of Duplicative Discovery

HN17[] The final factor is the risk of duplicative discovery. "The risk to be avoided under this factor is that potential plaintiffs may be in a 'position to assert conflicting claims to a common fund . . . thereby creating the danger of multiple liability for the fund.'" *Eagle, 812 F.2d at 542* (modification in original) (quoting *AGC, 459 U.S. at 544*). Plaintiffs again rely on the assertion that calculating the Union Plaintiffs' damages will be "simple" and based on the decrease in union members paying dues to the Union Plaintiffs. Plaintiffs are asking this Court to measure "damages and apportion[] them among directly victimized contractors **[*1233]** and subcontractors and indirectly affected . . . union entities." *AGC, 459 U.S. at 545*. Yet such a task would require the Court to determine "the extent to which the affected employees absorbed their losses and continued to pay union dues" to the Union Plaintiffs, and these employees could potentially still be linked to damages affecting the Employer Plaintiffs. *Id.* As a result, the

Union Plaintiffs' damages result from the injuries allegedly sustained by their **[**26]** members, and allowing both the affected union members *and* the unions themselves to sue would create the potential for multiple liability. *See id. at 544*. ("[P]otential plaintiffs at each level in the distribution chain would be in a position to assert conflicting claims to a common fund, . . . thereby creating the danger of multiple liability for the fund and prejudice to absent plaintiffs."). Accordingly, this factor also weighs against antitrust standing.

As discussed above, all five factors identified by the Supreme Court in *AGC* weigh against finding that the Union Plaintiffs have antitrust standing. As a result, the Union Plaintiffs' antitrust claims are hereby **DISMISSED**.[7]

2. The Nonstatutory Labor Exemption

Defendants next argue that the conduct alleged in **[**27]** the SAC is exempt from ***antitrust law*** under the nonstatutory labor exemption. (Mot. at 14.) Plaintiffs contend that consideration of the nonstatutory exemption is inappropriate at this stage of the proceedings on the basis that it is an affirmative defense. (Opp'n at 18-19.) As the Court explained in its prior orders, however, ***HN19***[] "[w]hether the case can be dismissed on the pleadings depends on what the pleadings say. '[A] plaintiff may plead herself out of court.' If the pleadings establish facts compelling a decision one way, that is as good as if depositions and other expensively obtained evidence on summary judgment establishes the identical facts." *Weisbuch v. Cnty. of L.A., 119 F.3d 778, 783 n.1 (9th Cir. 1997)* (second modification in original) (citation omitted) (quoting *Warzon v. Drew, 60 F.3d 1234, 1239 (7th Cir. 1995))*. While the Court may not consider evidence or factual matter not presented in the pleadings or the judicially noticed documents, the Court can determine whether Defendants' conduct, as alleged by Plaintiffs, is exempt under the nonstatutory labor exemption. *See Int'l Longshore & Warehouse Union v. ICTSI Or., Inc., 15 F. Supp. 3d 1075, 1090-95 (D. Or. 2014)* [hereinafter *ICTSI*] (finding defendant union's conduct to be exempt under nonstatutory labor exemption on motion to dismiss). The only possible "agreement in restraint of trade" that Plaintiffs identify in the SAC is the PCLCD, **[**28]** so it is that agreement that the Court will consider in determining whether Defendants' conduct is exempt.

Defendants argue that the PCLCD's provisions requiring its signatories to assign projects to ILWU labor are covered by the nonstatutory labor exemption. ***HN20***[] To determine whether the nonstatutory labor exemption applies, the Ninth Circuit has adopted the Eighth Circuit's test from *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*. *See Phoenix Elec. Co. v. Nat'l Elec. Contractors Ass'n, 81 F.3d 858, 861 (9th Cir. 1996)*. "Under that test, the parties to an agreement restraining trade are exempt from **[*1234]** antitrust liability only if (1) the restraint primarily affects the parties to the agreement and no one else, (2) the agreement concerns wages, hours, or conditions of employment that are mandatory subjects of collective bargaining, and (3) the agreement is produced from bona fide, arm's-length collective bargaining." *Phoenix Elec. Co., 81 F.3d at 861*. To obtain dismissal of Plaintiffs' antitrust claims, Defendants must demonstrate that the factual allegations in the SAC establish *each* of these factors.[8]

---

[7] The Court finds Plaintiffs' reliance on *Ostrofe v. H.S. Crocker Co., 740 F.2d 739, 746 (9th Cir. 1984)* [hereinafter *Ostrofe II*], to be inapposite. Since its holding in *Ostrofe II*, the Ninth Circuit has made clear that ***HN18***[] "[t]he exception recognized in *Ostrofe II* is limited to those cases in which a dismissed employee is an 'essential participant' in an antitrust scheme, the dismissal is a 'necessary means' to accomplish the scheme, and the employee has the greatest incentive to challenge the antitrust violation." *Vinci, 80 F.3d at 1376*.

[8] Plaintiffs claim that there are actually five elements to this test "when these cases are considered in context," but they do not adequately explain what the additional elements should be. (*See* Opp'n at 20.) Moreover, the Court has already rejected Plaintiffs' **[**29]** attempt to impose the additional requirement that "the provisions in question must address the labor relationship between an employer and its employees," (Opp'n at 20). (*See* Dkt. No. 46 at 15.) And as the Court explained in its prior order, the three-part test from *Mackey* was designed to be applicable to different types of cases. *See Phoenix Elec. Co., 81 F.3d at 861*; *Mackey, 543 F.2d at 613-14* ("Although the cases giving rise to the nonstatutory exemption are factually dissimilar from the present case, certain principles can be deduced from those decisions governing the proper accommodation of the competing labor and antitrust interests involved here.").

a. The PCLCD Primarily Affects Only the Parties to the PCLCD

First, the Court considers whether the PCLCD "primarily affects" only the parties to the agreement.[9] The copy of the PCLCD of which the Court has previously taken judicial notice makes clear that the parties are Defendant ILWU and the Pacific Maritime Association ("PMA"). Moreover, the very same agreement was the subject of the court's analysis in *ICTSI*, in which the court described the agreement as a "collective bargaining agreement covering commercial ports along the West Coast, which governs the terms and conditions of employment **[**30]** of all Longshore workers." *15 F. Supp. 3d at 1086*.

Defendants argue that the PCLCD does not affect other parties who are not signatories to the agreement. As the Court concluded in its prior order, the terms of the PCLCD support Defendants' position. (Dkt. No. 46 at 16.) The PCLCD does not on its face impose any obligations on third parties who are not signatories to the agreement.[10] Yet Plaintiffs allege that they are primarily affected because they can no longer compete for the relevant work in the relevant market, while Defendants are not primarily affected because they are not required to change any of their practices based on the agreement. (Opp'n at 21.)

In support of their position, however, Plaintiffs merely provide conclusory allegations that they are the ones primarily affected by the PCLCD. (Opp'n at 21-22; *see, e.g.*, SAC ¶ 117 ("The Plaintiff unions and contractors are primarily affected by these provisions in that the work which otherwise would be awarded to and performed by the Plaintiff contractors and Plaintiff unions must be awarded to the **[*1235]** Defendants.").) Yet Plaintiffs provide no facts (other than a general description of the parties' historic practices prior to the year in which the PCLCD was enacted, (*see* SAC ¶¶ 29-39)) to suggest that the PCLCD imposes its terms on any third party, relying instead on this conclusory statement that the PCLCD had a primary effect on a third party. In absence of such factual allegations, and in light of the PCLCD's plain language imposing obligations only on the signatories to the agreement, the Court concludes that Plaintiffs are not primarily affected by the PCLCD.

b. The PCLCD Concerns Mandatory Subjects of Collective Bargaining

Second, the Court considers **[**32]** whether the PCLCD concerns "mandatory subjects of collective bargaining." Plaintiffs contend that the subcontracting provision at issue in the PCLCD—which requires PCLCD signatories to use ILWU labor in relevant work projects—is not a mandatory subject of collective bargaining because work assignment through subcontracting is not necessarily a mandatory subject. (Opp'n at 22 (citing *Fibreboard Paper Prods. v. N.L.R.B., 379 U.S. 203, 85 S. Ct. 398, 13 L. Ed. 2d 233 (1964)*; *N.L.R.B. v. Wehr Constructors, 159 F.3d 946, 953 (6th Cir. 1998)*; *AMCAR Div., ACF Indus., Inc. v. N.L.R.B., 596 F.2d 1344, 1348 (8th Cir. 1979))*.) Pursuant to the authorities cited by Plaintiffs, ***HN21***[] the Court must consider whether the matter is "peculiarly suitable for resolution within the collective bargaining framework" and "amenab[le] . . . to the collective bargaining process." *Fibreboard, 379 U.S. at 211*.

As the Court explained in its prior order, (Dkt. No. 46 at 17), the relevant provisions of the PCLCD define the work at issue and assign that work to ILWU members, (*see* Dkt. No. 28 at 21). In fact, this Court has already found that the PCLCD's subcontracting clause constitutes a work assignment. (*See* Dkt. No. 40 at 18-19) And the caselaw is clear that ***HN22***[] "[w]ork assignments are mandatory subjects of collective bargaining, even if the employer is

[9] The Court has already taken judicial notice of the PCLCD and Article XX of the American Federation of Labor-Congress of International Organizations ("AFL-CIO") Constitution in its first order granting Defendants' motion to dismiss. (Dkt. No. 40.)

[10] While the factual findings of the court in *ICTSI* are not binding on this case, the Court notes that the court interpreted the PCLCD as primarily affecting only the ILWU and PMA—the parties to the agreement. *See* *ICTSI, 15 F. Supp. 3d at 1093* ("The requirement that ILWU workers be assigned the work, however, is only binding on PMA members, who are parties to the collective bargaining agreement."); *id. at 1093 n.8* ("Here, the alleged agreement is **[**31]** the PCLCD, and it does not impose the requirement that ILWU-represented workers be assigned reefer work on any nonsignatory party.").

assigning work outside of the collective bargaining unit." *ICTSI, 15 F. Supp. 3d at 1094*.[11] Plaintiffs do not allege any other subject covered by the PCLCD that is not a **[**33]** mandatory subject of collectively bargaining. Accordingly, the Court finds that the second factor of the *Mackey* test is satisfied as well.

c. Arm's-Length Collective Bargaining

Third, the Court examines whether the PCLCD was the product of bona fide, arm's-length collective bargaining. Unlike in the initial Complaint, which was silent on this issue, Plaintiffs now claim that the PCLCD was *not* the result of bona fide arms-length bargaining. (*See* SAC ¶ 125.) While these statements are largely conclusory, ***HN23***[] Plaintiffs are "not required **[*1236]** to plead on the subject of an anticipated affirmative **[**34]** defense." *United States v. McGee, 993 F.2d 184, 187 (9th Cir. 1993)*; *accord Rivera v. Peri & Sons Farms, Inc., 735 F.3d 892, 902 (9th Cir. 2013)* ("[P]laintiffs ordinarily need not plead on the subject of an anticipated affirmative defense. When an affirmative defense is obvious on the face of a complaint, however, a defendant can raise that defense in a motion to dismiss." (internal citation and quotation marks omitted)). As explained above, ***HN24***[] to determine that the nonstatutory labor exemption applies at this stage, it must be clear either from the allegations in the complaint or from judicially noticed facts that all three elements of the *Mackey* test are satisfied. *See Weisbuch, 119 F.3d at 783 n.1*. And it is not clear from either the text of the PCLCD or the SAC that the PCLCD is the product of arm's-length collective bargaining. *Cf. ICTSI, 15 F. Supp. 3d at 1094* (finding this element satisfied with respect to the PCLCD on a motion to dismiss because plaintiffs did not challenge this element in their complaint and because the complaint conceded that, "[f]or many years, the ILWU and PMA have negotiated successful collective bargaining agreements").

Accordingly, while it is clear from the allegations in the complaint and judicially noticed facts both that the PCLCD primarily affects only the parties to the agreement and that the PCLCD concerns a mandatory subject of collective bargaining, **[**35]** the Court finds that it is unclear whether the PCLCD is the result of bona fide, arm's-length collective bargaining. Because Defendants must establish that all three of the *Mackey* factors are satisfied for the nonstatutory exemption to apply, the Court declines to find that the nonstatutory exemption applies at this stage.[12] Nevertheless, should discovery reveal that the PCLCD was the result of arm's-length collective bargaining, Defendants may raise this issue on a motion for summary judgment.

3. Attempted Monopoly

Next, Defendants also argue that Plaintiffs' claims of Defendants' attempted monopoly in the relevant market are deficient. (Mot. at 18-20.) ***HN26***[] The Sherman Act prohibits monopolies and attempts to form monopolies. *15 U.S.C. § 2* ("Every person who shall monopolize, or attempt to monopolize, or conspire with any other persons, to

---

[11] *Accord N.L.R.B. v. Solutia, Inc., 699 F.3d 50, 70 (1st Cir. 2012)* (stating that "'jurisdictional' clauses that define the assignment of work to union members . . . address[] a mandatory subject of bargaining"); *McKenzie Eng'g Co. v. N.L.R.B., 303 F.3d 902, 908 (8th Cir. 2002)* (observing that "assignment of work to union members" was "a mandatory subject of collective bargaining"); *Local 58, Int'l Bhd. of Elec. Workers, AFL-CIO v. Se. Mich. Chapter, Nat'l Elec. Contractors Ass'n, Inc., 43 F.3d 1026, 1032 (6th Cir. 1995)* (noting that "work assignment" and "jurisdiction" are "two mandatory subjects of bargaining"); *Chem. Leaman Tank Lines, Inc. v. Cent. Conference of Teamsters Int'l Bhd. of Teamsters, Chauffeurs, Warehousemen & Helpers of Am., No. 93 C 51, 1993 U.S. Dist. LEXIS 8295, 1993 WL 214119, at *5 (N.D. Ill. June 17, 1993)* ("It is well settled that clauses concerning the assignment of work to union members are mandatory subjects of bargaining . . . ."); *Antelope Valley Press, 311 N.L.R.B. 459, 460 (1993)* ("The assignment of work affects terms and conditions of employment, and therefore is a mandatory bargaining subject . . . .").

[12] To the extent this ruling is inconsistent with the Court's analysis in a previous order, the Court hereby reconsiders its prior holding. *See City of L.A., Harbor Div. v. Santa Monica Baykeeper, 254 F.3d 882, 886 (9th Cir. 2001)* (***HN25***[] "A district court . . . retains jurisdiction over an interlocutory order—and thus may reconsider, rescind, or modify such an order—until a court of appeals grants a party permission to appeal.").

monopolize any part of the trade **[**36]** or commerce . . . [commits a felony]."). To prevail on a claim of attempted monopoly, Plaintiffs must establish "(1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving 'monopoly power'; and (4) causal antitrust injury." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)* (quoting *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988))*. This fourth element requires that plaintiffs only be compensated for "injuries that the antitrust laws were intended to protect." *Id.*

Defendants argue primarily that Plaintiffs have failed to state a claim for monopoly or attempted monopoly because their allegations in the SAC are insufficient and because the PCLCD operates pursuant to federal labor policy. (*See* Mot. at 18-20.) In the SAC, Plaintiffs allege that Defendants, through operation **[*1237]** of the PCLCD, have attempted to monopolize the relevant work in the relevant market area. (*See, e.g.*, SAC ¶¶ 44, 51, 58, 90, 104, 106, 108, 116, 121.) Although Defendants argue that Plaintiffs' claim is "subject to dismissal" because the SAC contains insufficient facts to support such a claim for attempted monopoly, Defendants do not specifically identify the alleged deficiencies. Accordingly, **[**37]** it remains unclear whether Plaintiffs have stated a viable claim for attempted monopoly. Defendants' motion is therefore **DENIED** as to Plaintiffs' claim for attempted monopoly at this stage.

C. Breach of Contract

Finally, Defendants address Plaintiffs' breach of contract claim by Iron Workers, in which Plaintiffs allege that ILWU breached Article XX of the AFL-CIO Constitution. It is undisputed that Iron Workers is affiliated with the AFL-CIO and that the ILWU *was* party to the AFL-CIO Constitution until September 2013 when they withdrew. (SAC ¶¶ 131, 140.) Iron Workers now claims that the ILWU breached section 3 of Article XX of the AFL-CIO Constitution, which states: "Each affiliate shall respect the established work relationship of every other affiliate . . . . No affiliate shall by agreement or collusion with any employer or by the exercise of economic pressure, seek to obtain work for its members as to which an established work relationship exists with any other affiliate except with the consent of such affiliate." (SAC ¶ 133.)

Defendants argue that the SAC once again fails to state a claim for breach of the AFL-CIO Constitution. By its terms, Article XX prohibits signatories to the Constitution from interfering with the "established **[**38]** work relationship" of other signatories, which is deemed to exist with regard to any work that is "customarily performed at a particular plant or worksite." (SAC ¶ 133.) According to Defendants, the SAC fails to state a breach of this provision because Plaintiffs have failed to allege facts from which the Court may infer the existence of any "established work relationship" with which Defendants interfered within the meaning of Article XX.

In dismissing this cause of action in Plaintiffs' initial Complaint for failure to state a claim, the Court observed that while "[t]he Complaint [wa]s replete with allegations that Plaintiffs historically performed *this type of work*," Plaintiffs had failed to "allege that they customarily performed it at the sites in question so as to demonstrate the 'established work relationship' that Article XX seeks to protect." (Dkt. No. 40 at 23.) Plaintiffs then alleged in the First Amended Complaint that "[t]he International Association and its members have customarily performed the relevant work at the port facilities described in the relevant market area set forth." (First Am. Compl. ¶ 116.) Again finding Plaintiffs' allegations inadequate, the Court noted that the mere **[**39]** addition of the word "customarily," unsupported by additional facts, does not demonstrate that Plaintiffs actually customarily performed work at the sites in questions so as to demonstrate the "established work relationship" that Article XX seeks to protect.

Plaintiffs have now amended their complaint again, in which they allege that: "For at least twenty (20) years prior to 2008, the relevant work was exclusively performed by the International Association at the ports in the relevant market area. Neither the Longshoremen, nor any other non-Iron Worker union or affiliate of the AFL-CIO performed this work at these ports." (SAC ¶ 135.) Plaintiffs further allege that, "[a]t each of these ports, the International Association performed at least ten (10) projects, and in some cases, more than one hundred (100) projects consisting **[*1238]** of relevant work prior to 2008." (SAC ¶ 136.) As Defendants argue, however, alleging that a plaintiff has a history of performing work "at the *ports* in the relevant market area" is not equivalent to alleging a history of performing work "at a particular plant or work site" located within those ports. Accordingly, these amendments fail to cure the deficiencies in Plaintiffs' **[**40]** breach of contract claim identified by the Court in its prior orders.

V. CONCLUSION

For the foregoing reasons, Defendants' motion is **GRANTED in part** and **DENIED in part**. Plaintiffs' first cause of action is **DISMISSED** as it relates to the Union Plaintiffs for lack of standing, and Plaintiffs' second and third causes of action are **DISMISSED** as to all Plaintiffs for failure to state a claim. This is the third time that the Court has dismissed Plaintiffs' first cause of action with respect to the Union Plaintiffs and Plaintiffs' second and third causes of action with respect to all Plaintiffs. (*See* Dkt. Nos. 40, 46.) Accordingly, Plaintiffs' second and third claims are hereby **DISMISSED with prejudice**, as is Plaintiffs' first cause of action with respect to the Union Plaintiffs. *See* *Desaigoudar v. Meyercord, 223 F.3d 1020, 1026 (9th Cir. 2000)* (***HN27***[ ] "The district court's discretion to deny leave to amend is particularly broad where plaintiff has previously amended the complaint." (quoting *Allen v. City of Beverly Hills, 911 F.2d 367, 373 (9th Cir. 1990))*). Defendants' motion is **DENIED** as it relates to Plaintiffs' first cause of action brought by the Employer Plaintiffs.

The hearing set for June 22, 2015 is **VACATED**.

IT IS SO ORDERED.

HN2[] **Infringement Actions, Exclusive Rights**

Patents endow their holders with certain superpowers, but only for a limited time. In crafting the patent laws, Congress struck a balance between fostering innovation and ensuring public access to discoveries. While a patent lasts, the patentee possesses exclusive rights to the patented article—rights he may sell or license for royalty payments if he so chooses. *35 U.S.C.S. §154(a)(1)*. But a patent typically expires 20 years from the day the application for it was filed. *§ 154(a)(2)*. And when the patent expires, the patentee's prerogatives expire too, and the right to make or use the article, free from all restriction, passes to the public.

Governments > Courts > Judicial Precedent

HN3[] **Courts, Judicial Precedent**

Overruling precedent is never a small matter. Stare decisis—in English, the idea that today's court should stand by yesterday's decisions—is a foundation stone of the rule of law. Application of that doctrine, although not an inexorable command, is the preferred course because it promotes the evenhanded, predictable, and consistent development of legal principles, fosters reliance on judicial decisions, and contributes to the actual and perceived integrity of the judicial process. It also reduces incentives for challenging settled precedents, saving parties and courts the expense of endless relitigation.

Governments > Courts > Judicial Precedent

HN4[] **Courts, Judicial Precedent**

Respecting stare decisis means sticking to some wrong decisions. The doctrine rests on the idea that it is usually more important that the applicable rule of law be settled than that it be settled right. Indeed, stare decisis has consequence only to the extent it sustains incorrect decisions; correct judgments have no need for that principle to prop them up. Accordingly, an argument that the U.S. Supreme Court got something wrong—even a good argument to that effect—cannot by itself justify scrapping settled precedent. Or otherwise said, it is not alone sufficient that the Court would decide a case differently now than the Court did then. To reverse course, the Court requires as well what the Court has termed a special justification—over and above the belief that the precedent was wrongly decided.

Governments > Courts > Judicial Precedent

HN5[] **Courts, Judicial Precedent**

Stare decisis carries enhanced force when a decision interprets a statute. Then, unlike in a constitutional case, critics of a U.S. Supreme Court ruling can take their objections across the street, and Congress can correct any mistake it sees. That is true regardless whether the Court's decision focused only on statutory text or also relied on the policies and purposes animating the law. Indeed, the Court applies statutory stare decisis even when a decision has announced a judicially created doctrine designed to implement a federal statute. All of the Court's interpretive decisions, in whatever way reasoned, effectively become part of the statutory scheme, subject (just like the rest) to congressional change. Absent special justification, they are balls tossed into Congress's court, for acceptance or not as that branch elects.

Governments > Courts > Judicial Precedent

HN6[] **Courts, Judicial Precedent**

In the contexts of cases involving property and contract rights, considerations favoring stare decisis are at their acme. That is because parties are especially likely to rely on such precedents when ordering their affairs.

Governments > Courts > Judicial Precedent

HN7[] Courts, Judicial Precedent

When the U.S. Supreme Court reverses its statutory interpretations, the Court most often points to subsequent legal developments—either the growth of judicial doctrine or further action taken by Congress—that have removed the basis for a decision.

Governments > Courts > Judicial Precedent

HN8[] Courts, Judicial Precedent

What the U.S. Supreme Court can decide, the Court can undecide. But stare decisis teaches that the Court should exercise that authority sparingly.

Lawyers' Edition Display

Decision

[*463]** Patentee receiving royalties for sales made after patent expired held not warranted since policy favored unrestricted use of expired patents and stare decisis favored settled law.

Summary

Overview: HOLDINGS: [1]-Overruling a long-standing precedential decision which held that a patentee could not continue to receive royalties after expiration of the patent was not warranted since the doctrine of stare decisis favored settled law, the precedent did not preclude business arrangements other than royalties, there was a broad policy favoring unrestricted use of patents after their expiration, overruling the precedent could threaten other precedents, and the precedent was simple and workable; [2]-Whether the precedent relied on an economic misjudgment concerning the competitive effects of post-expiration royalties and tended to suppress technological innovation were matters within the realm of Congress to provide any required remedy.

Outcome: Judgment affirmed. 6-3 Decision; 1 Dissent.

Headnotes

PATENTS §239 > ROYALTIES -- EXPIRATION OF PATENT > Headnote:
LEdHN[1][] [1]

A patent holder cannot charge royalties for the use of his invention after its patent term has expired. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

[*464]**

PATENTS §15 PATENTS §232 > EXPIRATION OF PATENT -- RIGHT TO MAKE OR USE > Headnote:
LEdHN[2][] [2]

Patents endow their holders with certain superpowers, but only for a limited time. In crafting the patent laws, Congress struck a balance between fostering innovation and ensuring public access to discoveries. While a patent lasts, the patentee possesses exclusive rights to the patented article--rights he may sell or license for royalty payments if he so chooses. *35 U.S.C.S. § 154(a)(1)*. But a patent typically expires 20 years from the day the application for it was filed. *§ 154(a)(2)*. And when the patent expires, the patentee's prerogatives expire too, and the right to make or use the article, free from all restriction, passes to the public. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

COURTS §766 > STARE DECISIS -- ADHERENCE TO FORMER DECISION > Headnote:
LEdHN[3][] [3]

Overruling precedent is never a small matter. Stare decisis--in English, the idea that today's court should stand by yesterday's decisions--is a foundation stone of the rule of law. Application of that doctrine, although not an inexorable command, is the preferred course because it promotes the evenhanded, predictable, and consistent development of legal principles, fosters reliance on judicial decisions, and contributes to the actual and perceived integrity of the judicial process. It also reduces incentives for challenging settled precedents, saving parties and courts the expense of endless relitigation. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

COURTS §775 > STARE DECISIS -- DEPARTURE > Headnote:
LEdHN[4][] [4]

Respecting stare decisis means sticking to some wrong decisions. The doctrine rests on the idea that it is usually more important that the applicable rule of law be settled than that it be settled right. Indeed, stare decisis has consequence only to the extent it sustains incorrect decisions; correct judgments have no need for that principle to prop them up. Accordingly, an argument that the U.S. Supreme Court got something wrong--even a good argument to that effect--cannot by itself justify scrapping settled precedent. Or otherwise said, it is not alone sufficient that the Court would decide a case differently now than the Court did then. To reverse course, the Court requires as well what the Court has termed a special justification--over and above the belief that the precedent was wrongly decided. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

COURTS §775.5 > STARE DECISIS -- INTERPRETATION -- STATUTE > Headnote:
LEdHN[5][] [5]

Stare decisis carries enhanced force when a decision interprets a statute. Then, unlike in a constitutional case, critics of a U.S. Supreme Court ruling can take their objections across the street, and Congress can correct any mistake it sees. That is true regardless whether the Court's decision focused only on statutory text or also relied on the policies and purposes animating the law. Indeed, the Court applies statutory stare decisis even when a decision has announced a judicially created doctrine designed to implement a federal statute. All of the Court's interpretive decisions, in whatever way reasoned, effectively become part of the statutory scheme, subject (just like the rest) to congressional change. Absent special justification, they are balls tossed into Congress's court, for acceptance or not as that branch elects. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

[*465]**

COURTS §779 COURTS §780 > STARE DECISIS -- PROPERTY AND CONTRACT RIGHTS > Headnote:
LEdHN[6][] [6]

In the contexts of cases involving property and contract rights, considerations favoring stare decisis are at their acme. That is because parties are especially likely to rely on such precedents when ordering their affairs. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

COURTS §775.5 > STATUTORY INTERPRETATION -- REVERSAL > Headnote:
LEdHN[7][] [7]

When the U.S. Supreme Court reverses its statutory interpretations, the Court most often points to subsequent legal developments--either the growth of judicial doctrine or further action taken by Congress--that have removed the basis for a decision. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

COURTS §766 > STARE DECISIS > Headnote:
LEdHN[8][] [8]

What the U.S. Supreme Court can decide, the Court can undecide. But stare decisis teaches that the Court should exercise that authority sparingly. (Kagan, J., joined by Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ.)

Syllabus

[2403]** **[*446]** **[1942]** Respondent Marvel Entertainment's corporate predecessor agreed to purchase petitioner Stephen Kimble's patent for a Spider-Man toy in exchange for a lump sum plus a 3% royalty on future sales. The agreement set no end date for royalties. As the patent neared the end of its statutory 20-year term, Marvel discovered *Brulotte v. Thys Co., 379 U.S. 29, 85 S. Ct. 176, 13 L. Ed. 2d 99*, in which this Court held that a patentee cannot continue to receive royalties for sales made after his patent expires. Marvel **[***466]** then sought a declaratory judgment in federal district court confirming that it could stop paying Kimble royalties. The district court granted relief, and the Ninth Circuit affirmed. Kimble now asks this Court to overrule *Brulotte*.

Held: Stare decisis requires this Court to adhere to *Brulotte*. *Pp. ___ - ___, 192 L. Ed. 2d, at 469-478*.

(a) A patent typically expires 20 years from its application date. *35 U.S. C. §154(a)(2)*. At that point, the unrestricted right to make or use the article passes to the public. See *Sears, Roebuck & Co. v. Stiffel Co., 376 U.S. 225, 230, 84 S. Ct. 784, 11 L. Ed. 2d 661, 1964 Dec. Comm'r Pat. 425*. This Court has carefully guarded the significance of that expiration date, declining to enforce laws and contracts that restrict free public access to formerly patented, as well as unpatentable, inventions. See, **[****2]** *e.g., id., at 230-233, 84 S. Ct. 784, 11 L. Ed. 2d 661*; *Scott Paper Co. v. Marcalus Mfg. Co., 326 U.S. 249, 255-256, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616*

[2404]** *Brulotte* applied that principle to a patent licensing agreement that provided for the payment of royalties accruing after the patent's expiration. 379 U.S., at 30, 85 S. Ct. 176, 13 L. Ed. 2d 99. The Court held that the post-patent royalty provision was "unlawful *per se*," id., at 30, 32, 85 S. Ct. 176, 13 L. Ed. 2d 99, because it continued "the patent monopoly beyond the [patent] period," id., at 33, 85 S. Ct. 176, 13 L. Ed. 2d 99, and, in so doing, conflicted with patent law's policy of establishing a "post-expiration . . . public domain," *ibid.*

The *Brulotte* rule may prevent some parties from entering into deals they desire, but parties can often find ways to achieve similar outcomes. For example, *Brulotte* leaves parties free to defer payments for pre-expiration use of a patent, tie royalties to non-patent rights, or make non-royalty-based business arrangements. Contending that such alternatives are not enough, Kimble asks this Court to abandon *Brulotte*'s **[*447]** bright-line rule in favor of a case-by-case approach based on ***antitrust law***'s "rule of reason." Pp. ___ - ___, 192 L. Ed. 2d, at 469-471.

(b) The doctrine of *stare decisis* provides that today's Court should stand by yesterday's decisions. Application of that doctrine, though "not an inexorable command," is the "preferred course." Payne v. Tennessee, 501 U.S. 808, 828, 827, 111 S. Ct. 2597, 115 L. Ed. 2d 720. Overruling a case always requires "special justification"--over **[****3]** and above the belief "that the precedent was wrongly decided." Halliburton Co. v. Erica P. John Fund, Inc., 573 U.S. 258, 266, 134 S. Ct. 2398, 189 L. Ed. 2d 339 at 349. Where, as here, the precedent interprets a statute, *stare decisis* carries enhanced force, since critics are free to take their objections to Congress. See *e.g.,* Patterson v. McLean Credit Union, 491 U.S. 164, 172-173, 109 S. Ct. 2363, 105 L. Ed. 2d 132. Congress, moreover, has spurned multiple opportunities to reverse *Brulotte*, see Watson v. United States, 552 U.S. 74, 82-83, 128 S. Ct. 579, 169 L. Ed. 2d 472, and has even rebuffed bills that would have replaced *Brulotte*'s *per se* rule with the standard Kimble urges. In addition, *Brulotte* implicates property and contract law, two contexts in which considerations favoring *stare decisis* are "at their acme," Payne, 501 U.S., at 828, 111 S. Ct. 2597, 115 L. Ed. 2d 720, because parties are especially likely to rely on such precedents when ordering their affairs.

[*467]** Given those good reasons for adhering to *stare decisis* in this case, this Court would need a very strong justification for overruling *Brulotte*. But traditional justifications for abandoning *stare decisis* do not help Kimble here. First, *Brulotte's* doctrinal underpinnings have not eroded over time. The patent statute at issue in *Brulotte* is essentially unchanged. And the precedent on which the *Brulotte* Court primarily relied, like other decisions enforcing a patent's cut-off date, remains good law. Indeed, *Brulotte*'s close relation **[****4]** to a whole web of precedents means that overruling it could threaten others. Second, nothing about *Brulotte* has proved unworkable. See Patterson, 491 U.S., at 173, 109 S. Ct. 2363, 105 L. Ed. 2d 132. To the contrary, the decision itself is simple to apply- **[1943]** -particularly as compared to Kimble's proposed alternative, which can produce high litigation costs and unpredictable results. Pp. ___ - ___, 192 L. Ed. 2d, at 471-474.

(c) Neither of the justifications Kimble offers gives cause to overrule *Brulotte.* Pp. ___ - ___, 192 L. Ed. 2d, at 474-478.

(1) Kimble first argues that *Brulotte* hinged on an economic error--*i.e.,* an assumption that post-expiration royalties are always anticompetitive. This Court sees no error in Kimble's economic analysis. But even assuming Kimble is right that *Brulotte* relied on an economic misjudgment, Congress is the right entity to fix it. The patent laws are not like the Sherman **[**2405]** Act, which gives courts exceptional authority to shape the law and reconsider precedent based on better economic analysis. Moreover, Kimble's argument is based not on evolving economic **[*448]** theory but rather on a claim that the *Brulotte* Court simply made the wrong call. That claim fails to clear *stare decisis*'s high bar. In any event, *Brulotte* did not even turn on the notion that post-patent royalties harm competition. **[****5]** Instead, the *Brulotte* Court simply applied the categorical principle that all patent-related benefits must end when the patent term expires. Kimble's real complaint may go to the merits of that principle as a policy matter. But Congress, not this Court, gets to make patent policy. Pp. ___ - ___, 192 L. Ed. 2d, at 474-477.

(2) Kimble also argues that *Brulotte* suppresses technological innovation and harms the national economy by preventing parties from reaching agreements to commercialize patents. This Court cannot tell whether that is true. *Brulotte* leaves parties free to enter alternative arrangements that may suffice to accomplish parties' payment deferral and risk-spreading goals. And neither Kimble nor his *amici* offer any empirical evidence connecting *Brulotte*

to decreased innovation. In any event, claims about a statutory precedent's consequences for innovation are “more appropriately addressed to Congress.” *Halliburton, 573 U.S., at 277, 134 S. Ct. 2398, 189 L. Ed. 2d at 356*. *Pp. ___ - ___, 192 L. Ed. 2d, at 477-478*.

727 F. 3d 856, affirmed.

Counsel: Roman Melnik argued the cause for petitioners.

Malcolm L. Stewart argued the cause for the United States, as amicus curiae, by special leave of court.

Thomas G. Saunders argued the cause for respondent.

Judges: Kagan, J., delivered the opinion of the Court, in which Scalia, Kennedy, Ginsburg, Breyer, and Sotomayor, JJ., joined. Alito, J., filed a dissenting opinion, in which Roberts, C. J., and Thomas, J., joined, *post*, ___.

Opinion by: KAGAN

Opinion

[*468] [*449]** Justice **Kagan** delivered the opinion of the Court.

In *Brulotte v. Thys Co., 379 U.S. 29, 85 S. Ct. 176, 13 L. Ed. 2d 99 (1964)*, this Court held that **[****6]** ***HN1***[] ***LEdHN[1]***[] [1] a patent holder cannot charge royalties for the use of his invention after its patent term has expired. The sole question presented here is whether we should overrule *Brulotte*. Adhering to principles of *stare decisis*, we decline to do so. Critics of the *Brulotte* rule must seek relief not from this Court but from Congress.

I

In 1990, petitioner Stephen Kimble obtained a patent on a toy that allows children (and young-at-heart adults) to role-play as “a spider person” by shooting webs—really, pressurized foam string—“from the palm of [the] hand.” U.S. Patent No. 5,072,856, Abstract (filed May 25, **[**2406]** 1990). [1] Respondent Marvel Entertainment, LLC (Marvel) makes and markets products featuring Spider-Man, among other comic-book characters. Seeking to sell or license his patent, Kimble **[*450]** met with the president of Marvel’s corporate predecessor to discuss his idea for web-slinging fun. Soon afterward, but without remunerating Kimble, that company began marketing the “Web Blaster”—a toy that, like Kimble’s patented invention, enables would-be action heroes to mimic Spider-Man through the use of a polyester glove and a canister of foam.

Kimble sued Marvel in 1997 alleging, among other things, patent infringement. The parties ultimately settled that litigation. Their agreement provided that Marvel would purchase Kimble’s patent in exchange for a lump sum (of about a half-million dollars) and a 3% royalty on Marvel’s future sales of the Web Blaster and similar products. The parties set no end date for royalties, apparently contemplating that they would continue for as long as kids want to imitate Spider-Man (by doing whatever a spider can).

And then Marvel stumbled across *Brulotte*, the case at the heart of this dispute. In negotiating the settlement, neither side was aware of *Brulotte*. But Marvel must have been pleased to learn of it. *Brulotte* had read the patent laws to prevent a patentee from receiving royalties for sales made after his patent’s expiration. See *379 U.S., at 32, 85 S. Ct. 176, 13 L. Ed. 2d 99*. So the decision’s effect **[1944]** was to sunset the settlement’s royalty clause. [2] On

---

[1] Petitioner Robert Grabb later acquired an interest in the patent. For simplicity, we **[****7]** refer only to Kimble.

making that discovery, Marvel sought a declaratory judgment in federal district court confirming that the company could cease paying royalties come 2010—the end of Kimble's patent term. The court approved that relief, holding that *Brulotte* made "the royalty provision **[****8]** . . . unenforceable after the expiration of the Kimble patent." *692 F. Supp. 2d 1156, 1161 (Ariz. 2010)*. The Court of Appeals for the Ninth Circuit affirmed, though making clear that it **[*451]** was none too happy about doing so. "[T]he *Brulotte* rule," the court complained, **[***469]** "is counterintuitive and its rationale is arguably unconvincing." *727 F. 3d 856, 857 (2013)*.

We granted certiorari, *574 U.S. 1058, 135 S. Ct. 781, 190 L. Ed. 2d 649 (2014)*, to decide whether, as some courts and commentators have suggested, we should overrule *Brulotte*. [3] For reasons of *stare decisis*, we demur.

II

HN2[] ***LEdHN[2]***[] [2] Patents endow their holders with certain superpowers, but only for a limited time. In crafting the patent laws, Congress struck a balance between fostering innovation and ensuring public access to **[**2407]** discoveries. While a patent lasts, the patentee possesses exclusive rights to the patented article—rights he may sell or license for royalty payments if he so chooses. See *35 U.S.C. §154(a)(1)*. But a patent typically expires 20 years from the day the application for it was filed. See *§154(a)(2)*. And when the patent expires, the patentee's prerogatives expire too, and the right to make or use the article, free from all restriction, passes to the public. See *Sears, Roebuck & Co. v. Stiffel Co., 376 U.S. 225, 230, 84 S. Ct. 784, 11 L. Ed. 2d 661, 1964 Dec. Comm'r Pat. 425 (1964)*.

This Court has carefully guarded that cut-off date, just as it has the patent laws' subject-matter limits: In case after case, the Court has construed those laws to preclude measures that restrict free access to formerly patented, as well as unpatentable, inventions. In one line of cases, we have **[*452]** struck down state statutes with that consequence. See, *e.g.*, *id., at 230-233, 84 S. Ct. 784, 11 L. Ed. 2d 661, 1964 Dec. Comm'r Pat. 425*; *Bonito Boats, Inc. v. Thunder Craft Boats, Inc., 489 U.S. 141, 152, 167-168, 109 S. Ct. 971, 103 L. Ed. 2d 118 (1989)*; *Compco Corp. v. Day-Brite Lighting, Inc., 376 U.S. 234, 237-238, 84 S. Ct. 779, 11 L. Ed. 2d 669, 1964 Dec. Comm'r Pat. 421 (1964)*. By virtue of federal law, we reasoned, "an article on which the patent has expired," **[****10]** like an unpatentable article, "is in the public domain and may be made and sold by whoever chooses to do so." *Sears, 376 U.S., at 231, 84 S. Ct. 784, 11 L. Ed. 2d 661, 1964 Dec. Comm'r Pat. 425*. In a related line of decisions, we have deemed unenforceable private contract provisions limiting free use of such inventions. In *Scott Paper Co. v. Marcalus Mfg. Co., 326 U.S. 249, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616 (1945)*, for example, we determined that a manufacturer could not agree to refrain from challenging a patent's validity. Allowing even a single company to restrict its use of an expired or invalid patent, we explained, "would deprive . . . the consuming public of the advantage to be derived" from free exploitation of the discovery. *Id., at 256, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616*. And to permit such a result, whether or not authorized "by express contract," would impermissibly undermine the patent laws. *Id., at 255-256, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616*; see also, *e.g.*, *Edward Katzinger Co. v. Chicago Metallic Mfg. Co., 329 U.S. 394, 400-401, 67 S. Ct. 416, 91 L. Ed. 374 (1947)* (ruling that *Scott Paper* applies to licensees); *Lear, Inc. v. Adkins, 395 U.S. 653, 668-675, 89 S. Ct. 1902, 23 L. Ed. 2d 610 (1969)* **[***470]** (refusing to enforce a contract requiring a licensee to pay royalties while contesting a patent's validity).

---

[2] In *Brulotte,* the patent holder retained ownership of the patent while licensing customers to use the patented article in exchange for royalty payments. See *379 U.S., at 29-30, 85 S. Ct. 176, 13 L. Ed. 2d 99*. By contrast, Kimble sold his whole patent to obtain royalties. But no one here disputes that *Brulotte* covers a transaction structured in that alternative way.

[3] See, *e.g.,* *Scheiber v. Dolby Labs., Inc., 293 F. 3d 1014, 1017-1018 (CA7 2002)* (Posner, J.) (*Brulotte* has been "severely, and as it seems to us, with all due respect, justly criticized . . . . However, we have no authority to overrule a Supreme Court decision no matter how dubious its reasoning strikes us, or even how out of touch with the Supreme Court's current thinking the decision seems"); Ayres & Klemperer, Limiting Patentees' Market Power Without Reducing Innovation Incentives: The Perverse **[****9]** Benefits of Uncertainty and Non-Injunctive Remedies, *97 Mich. L. Rev. 985, 1027 (1999)* ("Our analysis . . . suggests that *Brulotte* should be overruled").

Brulotte was brewed in the same barrel. There, an inventor licensed his patented hop-picking machine to farmers in exchange for royalties from hop crops harvested both before and after his patents' expiration dates. The Court (by an 8-1 vote) held the agreement unenforceable—"unlawful *per se*"—to the extent it provided **[****11]** for the payment of royalties "accru[ing] after the last of the patents incorporated into the machines had expired." *379 U.S., at 30, 32, 85 S. Ct. 176, 13 L. Ed. 2d 99*. To arrive at that conclusion, the Court began with the statutory provision **[1945]** setting the length of a patent term. See *id., at 30, 85 S. Ct. 176, 13 L. Ed. 2d 99* (quoting the then-current version of *§154*). Emphasizing that a **[*453]** patented invention "become[s] public property once [that term] expires," the Court then quoted from *Scott Paper*: Any attempt to limit a licensee's post-expiration use of the invention, "whatever the legal device employed, runs counter to the policy and purpose of the patent laws." *379 U.S., at 31, 85 S. Ct. 176, 13 L. Ed. 2d 99* (quoting *326 U.S., at 256, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616*). In the *Brulotte* Court's view, contracts to pay royalties for such use continue "the patent monopoly beyond the [patent] period," even though only as to the licensee affected. *379 U.S., at 33, 85 S. Ct. 176, 13 L. Ed. 2d 99*. And in so doing, those agreements conflict with patent law's policy of establishing a **[**2408]** "post-expiration . . . public domain" in which every person can make free use of a formerly patented product. *Ibid.*

The *Brulotte* rule, like others making contract provisions unenforceable, prevents some parties from entering into deals they desire. As compared to lump-sum fees, royalty plans both draw out payments over time and tie those payments, in each month **[****12]** or year covered, to a product's commercial success. And sometimes, for some parties, the longer the arrangement lasts, the better—not just up to but beyond a patent term's end. A more extended payment period, coupled (as it presumably would be) with a lower rate, may bring the price the patent holder seeks within the range of a cash-strapped licensee. (Anyone who has bought a product on installment can relate.) See Brief for Memorial Sloan Kettering Cancer Center et al. as *Amici Curiae* 17. Or such an extended term may better allocate the risks and rewards associated with commercializing inventions—most notably, when years of development work stand between licensing a patent and bringing a product to market. See, *e.g.,* 3 R. Milgrim & E. Bensen, Milgrim on Licensing §18.05, p. 18-9 (2013). As to either goal, *Brulotte* may pose an obstacle.

Yet parties can often find ways around *Brulotte*, enabling them to achieve those same ends. To start, *Brulotte* allows a licensee to defer payments for pre-expiration use of a patent into the post-expiration period; all the decision bars are **[*454]** royalties for using an invention after it has moved into the public domain. See *379 U.S., at 31, 85 S. Ct. 176, 13 L. Ed. 2d 99*; *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 136, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. A licensee could agree, for example, to pay the licensor **[****13]** a sum equal to 10% of sales during the 20-year patent term, but to amortize that amount over 40 years. That arrangement would at least bring down early outlays, even if it would not do everything the parties might want to allocate risk over a long **[***471]** timeframe. And parties have still more options when a licensing agreement covers either multiple patents or additional non-patent rights. Under *Brulotte*, royalties may run until the latest-running patent covered in the parties' agreement expires. See *379 U.S., at 30, 85 S. Ct. 176, 13 L. Ed. 2d 99*. Too, post-expiration royalties are allowable so long as tied to a non-patent right—even when closely related to a patent. See, *e.g.,* 3 Milgrim on Licensing §18.07, at 18-16 to 18-17. That means, for example, that a license involving both a patent and a trade secret can set a 5% royalty during the patent period (as compensation for the two combined) and a 4% royalty afterward (as payment for the trade secret alone). Finally and most broadly, *Brulotte* poses no bar to business arrangements other than royalties—all kinds of joint ventures, for example—that enable parties to share the risks and rewards of commercializing an invention.

Contending that such alternatives are not enough, Kimble asks us to abandon *Brulotte* in **[****14]** favor of "flexible, case-by-case analysis" of post-expiration royalty clauses "under the rule of reason." Brief for Petitioners 45. Used in ***antitrust law***, the rule of reason requires courts to evaluate a practice's effect on competition by "taking into account a variety of factors, including specific information about the relevant business, its condition before and after the [practice] was imposed, and the [practice's] history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Of primary importance in this context, Kimble posits, is whether a patent holder has power in the relevant market and so might be **[*455]** able to curtail competition. See Brief for Petitioners **[**2409]** 47-48; *Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 44, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* ("[A] patent does not necessarily confer market power"). Resolving that issue, Kimble notes, entails "a full-fledged economic inquiry into the definition of the market, barriers to entry, and the like." Brief for

Petitioners 48 (quoting 1 H. Hovenkamp, M. Janis, M. Lemley, & C. Leslie, IP and Antitrust §3.2e, p. 3-12.1 (2d ed., Supp. 2014) (Hovenkamp)).

[1946] III

HN3[] ***LEdHN[3]***[] [3] Overruling precedent is never a small matter. *Stare decisis*—in English, the idea that today's Court should stand by yesterday's decisions—is "a foundation stone of the rule of law." *Michigan v. Bay Mills Indian Community, 572 U.S. 782, 798, 134 S. Ct. 2024, 188 L. Ed. 2d 1071, 1089 (2014)*. Application of **[****15]** that doctrine, although "not an inexorable command," is the "preferred course because it promotes the evenhanded, predictable, and consistent development of legal principles, fosters reliance on judicial decisions, and contributes to the actual and perceived integrity of the judicial process." *Payne v. Tennessee, 501 U.S. 808, 827-828, 111 S. Ct. 2597, 115 L. Ed. 2d 720 (1991)*. It also reduces incentives for challenging settled precedents, saving parties and courts the expense of endless relitigation.

HN4[] ***LEdHN[4]***[] [4] Respecting *stare decisis* means sticking to some wrong decisions. The doctrine rests on the idea, as Justice Brandeis famously wrote, that it is usually "more important that the applicable rule of law be settled than that it be settled right." *Burnet v. Coronado Oil & Gas Co., 285 U.S. 393, 406, 52 S. Ct. 443, 76 L. Ed. 815, 1932 C.B. 265, 1932-1 C.B. 265 (1932)* (dissenting opinion). Indeed, **[***472]** *stare decisis* has consequence only to the extent it sustains incorrect decisions; correct judgments have no need for that principle to prop them up. Accordingly, an argument that we got something wrong—even a good argument to that effect—cannot by itself justify scrapping settled precedent. Or otherwise said, it is not alone sufficient that we would decide a case differently now than we did then. To reverse course, we require as well **[*456]** what we have termed a "special justification"—over and above the belief **[****16]** "that the precedent was wrongly decided." *Halliburton Co. v. Erica P. John Fund, Inc., 573 U.S. 258, 266, 134 S. Ct. 2398, 189 L. Ed. 2d 339, 349 (2014)*.

HN5[] ***LEdHN[5]***[] [5] What is more, *stare decisis* carries enhanced force when a decision, like *Brulotte*, interprets a statute. Then, unlike in a constitutional case, critics of our ruling can take their objections across the street, and Congress can correct any mistake it sees. See, *e.g., Patterson v. McLean Credit Union, 491 U.S. 164, 172-173, 109 S. Ct. 2363, 105 L. Ed. 2d 132 (1989)*. That is true, contrary to the dissent's view, see *post, at ___ - ___, 192 L. Ed. 2d, at 481-482* (opinion of Alito, J.), regardless whether our decision focused only on statutory text or also relied, as *Brulotte* did, on the policies and purposes animating the law. See, *e.g., Bilski v. Kappos, 561 U.S. 593, 601-602, 130 S. Ct. 3218, 177 L. Ed. 2d 792 (2010)*. Indeed, we apply statutory *stare decisis* even when a decision has announced a "judicially created doctrine" designed to implement a federal statute. *Halliburton, 573 U.S., at 274, 134 S. Ct. 2398, 189 L. Ed. 2d at 354*). All our interpretive decisions, in whatever way reasoned, effectively become part of the statutory scheme, subject (just like the rest) to congressional change. Absent special justification, they are balls tossed into Congress's court, for acceptance or not as that branch elects.

And Congress has spurned multiple opportunities to reverse *Brulotte*—openings as frequent and clear as this Court ever sees. **[**2410]** *Brulotte* has governed licensing agreements for more than half a century. See *Watson v. United States, 552 U.S. 74, 82-83, 128 S. Ct. 579, 169 L. Ed. 2d 472 (2007)* (stating **[****17]** that "long congressional acquiescence," there totaling just 14 years, "enhance[s] even the usual precedential force we accord to our interpretations of statutes" (internal quotation marks omitted)). During that time, Congress has repeatedly amended the patent laws, including the specific provision (*35 U.S.C. §154*) on which *Brulotte* rested. See, *e.g.*, Uruguay Round Agreements Act, §532(a), 108 Stat. 4983 (1994) (increasing the length of the patent term); Act of Nov. 19, 1988, §201, 102 Stat. 4676 **[*457]** (limiting patent-misuse claims). *Brulotte* survived every such change. Indeed, Congress has rebuffed bills that would have replaced *Brulotte*'s *per se* rule with the same antitrust-style analysis Kimble now urges. See, *e.g.,* S. 1200, 100th Cong., 1st Sess., Tit. II (1987) (providing that no patent owner would be guilty of "illegal extension of the patent right by reason of his or her licensing practices . . . unless such practices . . . violate the antitrust laws"); S. 438, 100th Cong., 2d Sess., §201(3) (1988) (same). Congress's continual reworking of the patent laws—but never of the *Brulotte* rule—further supports leaving the decision in place.

Nor yet are we done, for the subject matter of *Brulotte* adds to the case for adhering to precedent. *Brulotte* lies at **[***473]** the intersection **[****18]** of two areas of law: property (patents) and contracts (licensing agreements). ***HN6***[] ***LEdHN[6]***[] [6] And we have often recognized that in just those contexts—"cases involving property and contract rights"—considerations favoring *stare decisis* are "at their acme." *E.g., Payne, 501 U.S., at 828, 111 S. Ct. 2597, 115 L. Ed. 2d 720*; *Khan, 522 U.S., at 20, 118 S. Ct. 275, 139 L. Ed. 2d 199*. That is because parties are especially likely to rely on such precedents when ordering their affairs. To be sure, Marvel and Kimble disagree about **[1947]** whether *Brulotte* has actually generated reliance. Marvel says yes: Some parties, it claims, do not specify an end date for royalties in their licensing agreements, instead relying on *Brulotte* as a default rule. Brief for Respondent 32-33; see 1 D. Epstein, Eckstrom's Licensing in Foreign and Domestic Operations §3.13, p. 3-13, and n. 2 (2014) (noting that it is not "necessary to specify the term . . . of the license" when a decision like *Brulotte* limits it "by law"). Overturning *Brulotte* would thus upset expectations, most so when long-dormant licenses for long-expired patents spring back to life. Not true, says Kimble: Unfair surprise is unlikely, because no "meaningful number of [such] license agreements . . . actually exist." Reply Brief 18. To be honest, we do not know (nor, we suspect, do Marvel **[****19]** and Kimble). But even uncertainty on this score cuts in Marvel's direction. So long as we see a reasonable **[*458]** possibility that parties have structured their business transactions in light of *Brulotte*, we have one more reason to let it stand.

As against this superpowered form of *stare decisis*, we would need a superspecial justification to warrant reversing *Brulotte*. But the kinds of reasons we have most often held sufficient in the past do not help Kimble here. If anything, they reinforce our unwillingness to do what he asks.

First, *Brulotte*'s statutory and doctrinal underpinnings have not eroded over time. ***HN7***[] ***LEdHN[7]***[] [7] When we reverse our statutory interpretations, we most often point to subsequent legal developments—"either the growth of judicial doctrine or further action taken by Congress"—that have removed the basis for a decision. *Patterson, 491 U.S., at 173, 109 S. Ct. 2363, 105 L. Ed. 2d 132* (calling this "the primary reason" for overruling statutory precedent). But the core feature of the patent laws on which *Brulotte* relied remains just the same: *Section 154* now, as then, draws **[**2411]** a sharp line cutting off patent rights after a set number of years. And this Court has continued to draw from that legislative choice a broad policy favoring unrestricted use of an invention **[****20]** after its patent's expiration. See *supra, at ____ - ____, 192 L. Ed. 2d, at 469-470*. *Scott Paper*—the decision on which *Brulotte* primarily relied—remains good law. So too do this Court's other decisions refusing to enforce either state laws or private contracts constraining individuals' free use of formerly patented (or unpatentable) discoveries. See *supra, at ____ - ____, 192 L. Ed. 2d, at 469-470*. *Brulotte*, then, is not the kind of doctrinal dinosaur or legal last-man-standing for which we sometimes depart from *stare decisis*. Cf., *e.g., Alleyne v. United States, 570 U.S. 99, 119-121, 133 S. Ct. 2151, 186 L. Ed. 2d 314, 330 (2013)* (Sotomayor, J., concurring). To the contrary, the decision's close relation to a whole web of precedents means that reversing it could threaten others. If *Brulotte* is outdated, **[***474]** then (for example) is *Scott Paper* too? We would prefer not to unsettle stable law. [4]

---

[4] The only legal erosion to which Kimble gestures is a change in the treatment of patent tying agreements—*i.e.,* contracts conditioning a licensee's right to use a patent on the purchase of an unpatented product. See Brief for Petitioners 43. When *Brulotte* was decided, those agreements counted as *per se* antitrust violations and patent misuse; now, they are unlawful only if the patent holder wields power in the relevant market. See Act of Nov. 19, 1988, §201, 102 Stat. 4676 (adding the market **[****21]** power requirement in the patent-misuse context); *Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 41-43, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* (relying on that legislative change to overrule antitrust decisions about tying and to adopt the same standard). But it is far from clear that the old rule of tying was among *Brulotte*'s legal underpinnings. *Brulotte* briefly analogized post-expiration royalty agreements to tying arrangements, but only after relating the statutory and caselaw basis for its holding and "conclud[ing]" that post-patent royalties are "unlawful *per se*." *379 U.S., at 32, 85 S. Ct. 176, 13 L. Ed. 2d 99*. And even if that analogy played some real role in *Brulotte*, the development of tying law would not undercut the decision—rather the opposite. Congress took the lead in changing the treatment of tying agreements and, in doing so, conspicuously left *Brulotte* in place. Indeed, Congress declined to enact bills that would have modified not only tying doctrine but also *Brulotte*. See *supra, at ___, 192 L. Ed. 2d, at 472* (citing S. 1200, 100th Cong., 1st Sess. (1987), and S. 438, 100th Cong., 2d Sess. (1988)). That choice suggests congressional acquiescence in *Brulotte*, and so further supports adhering to *stare decisis*.

[*459] And second, nothing about *Brulotte* has proved unworkable. See, *e.g., Patterson, 491 U.S., at 173, 109 S. Ct. 2363, 105 L. Ed. 2d 132* (identifying unworkability as another "traditional justification" **[****22]** for overruling precedent). The decision is simplicity itself to apply. A court need only ask whether a licensing agreement provides royalties for post-expiration use of a patent. If not, no problem; if so, no dice. *Brulotte*'s ease of use appears in still sharper relief when compared to Kimble's proposed alternative. Recall that he wants courts to employ ***antitrust law***'s rule of reason to identify and invalidate those post-expiration royalty clauses with anti-competitive consequences. See *supra, at ___ - ___, 192 L. Ed. 2d, at 471*. But whatever its merits may be for deciding antitrust claims, that "elaborate inquiry" produces **[1948]** notoriously high litigation costs and unpredictable results. *Arizona v. Maricopa County Medical Soc., 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. For that reason, trading in *Brulotte* for the rule of reason would make the law less, not more, workable than it is now. Once again, then, the case for sticking with long-settled precedent grows stronger: Even the most **[*460]** usual reasons for abandoning *stare decisis* cut the other way here.

IV

Lacking recourse to those traditional justifications for overruling a prior decision, **[**2412]** Kimble offers two different ones. He claims first that *Brulotte* rests on a mistaken view of the competitive effects of post-expiration royalties. He contends next that **[****23]** *Brulotte* suppresses technological innovation and so harms the nation's economy. (The dissent offers versions of those same arguments. See *post, at ___ - ___, 192 L. Ed. 2d, at 478-480*.) We consider the two claims in turn, but our answers to both are much the same: Kimble's reasoning may give Congress cause to upset *Brulotte*, but does not warrant this Court's doing so.

A

According to Kimble, we should overrule *Brulotte* because it hinged on an error about economics: It assumed that post-patent royalty "arrangements **[***475]** are invariably anticompetitive." Brief for Petitioners 37. That is not true, Kimble notes; indeed, such agreements more often increase than inhibit competition, both before and after the patent expires. See *id., at 36-40, 85 S. Ct. 176, 13 L. Ed. 2d 99*. As noted earlier, a longer payment period will typically go hand-in-hand with a lower royalty rate. See *supra, at ___, n. 3, 192 L. Ed. 2d, at 470*. During the patent term, those reduced rates may lead to lower consumer prices, making the patented technology more competitive with alternatives; too, the lesser rates may enable more companies to afford a license, fostering competition among the patent's own users. See Brief for Petitioners 38. And after the patent's expiration, Kimble continues, further benefits follow: Absent high barriers **[****24]** to entry (a material caveat, as even he would agree, see Tr. of Oral Arg. 12-13, 23), the licensee's continuing obligation to pay royalties encourages new companies to begin making the product, figuring that they can quickly attract customers by undercutting the licensee on price. See Brief for Petitioners 38-39. In light of those realities, Kimble **[*461]** concludes, "the *Brulotte per se* rule makes little sense." *Id.,* at 11.

We do not join issue with Kimble's economics—only with what follows from it. A broad scholarly consensus supports Kimble's view of the competitive effects of post-expiration royalties, and we see no error in that shared analysis. See *id.,* at 13-18 (citing numerous treatises and articles critiquing *Brulotte*). Still, we must decide what that means for *Brulotte*. Kimble, of course, says it means the decision must go. Positing that *Brulotte* turned on the belief that post-expiration royalties are always anticompetitive, he invokes decisions in which this Court abandoned antitrust precedents premised on similarly shaky economic reasoning. See Brief for Petitioners 55-56 (citing, *e.g.*, *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*; *Illinois Tool Works, 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26*). But to agree with Kimble's conclusion, we must resolve two questions in his favor. First, even assuming **[****25]** Kimble accurately characterizes *Brulotte*'s basis, does the decision's economic mistake suffice to overcome *stare decisis*? Second and more fundamentally, was *Brulotte* actually founded, as Kimble contends, on an analysis of competitive effects?

If *Brulotte* were an antitrust rather than a patent case, we might answer both questions as Kimble would like. This Court has viewed *stare decisis* as having less-than-usual force in cases involving the Sherman Act. See, *e.g., Khan, 522 U.S., at 20-21, 118 S. Ct. 275, 139 L. Ed. 2d 199*. Congress, we have explained, intended that law's reference to "restraint of trade" to have "changing content," and authorized courts to oversee the term's "dynamic potential." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 731-732, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*. We have therefore felt relatively free to revise our **[**2413]** legal analysis as economic understanding evolves and (just as Kimble notes) to reverse antitrust precedents that misperceived a practice's competitive consequences. See *Leegin, 551 U.S., at 899-900, 127 S. Ct. 2705, 168 L. Ed. 2d 623*. Moreover, because the question in those cases was **[*462]** whether the challenged activity restrained trade, the Court's rulings necessarily turned on its understanding of economics. See *Business Electronics **[***476]** Corp., 485 U.S., at 731, 108 S. Ct. 1515, 99 L. Ed. 2d 808*. Accordingly, to overturn the decisions in light of sounder economic reasoning was to take them "on [their] own terms." *Halliburton, 573 U.S., at 271, 134 S. Ct. 2398, 189 L. Ed. 2d at 352*.

[1949] But *Brulotte* is a patent rather **[****26]** than an antitrust case, and our answers to both questions instead go against Kimble. To begin, even assuming that *Brulotte* relied on an economic misjudgment, Congress is the right entity to fix it. By contrast with the Sherman Act, the patent laws do not turn over exceptional law-shaping authority to the courts. Accordingly, statutory *stare decisis*—in which this Court interprets and Congress decides whether to amend—retains its usual strong force. See *supra, at ___, 192 L. Ed. 2d, at 472*. And as we have shown, that doctrine does not ordinarily bend to "wrong on the merits"-type arguments; it instead assumes Congress will correct whatever mistakes we commit. See *supra, at ___ - ___, 192 L. Ed. 2d, at 471-472*. Nor does Kimble offer any reason to think his own "the Court erred" claim is special. Indeed, he does not even point to anything that has changed since *Brulotte*—no new empirical studies or advances in economic theory. Cf., *e.g.*, *Halliburton, 573 U.S., at 270-274, 134 S. Ct. 2398, 189 L. Ed. 2d at 352* (considering, though finding insufficient, recent economic research). On his argument, the *Brulotte* Court knew all it needed to know to determine that post-patent royalties are not usually anticompetitive; it just made the wrong call. See Brief for Petitioners 36-40. That claim, even if itself dead-right, fails to **[****27]** clear *stare decisis*'s high bar.

And in any event, *Brulotte* did not hinge on the mistake Kimble identifies. Although some of its language invoked economic concepts, see n. 4, *supra*, the Court did not rely on the notion that post-patent royalties harm competition. Nor is that surprising. The patent laws—unlike the Sherman Act—do not aim to maximize competition (to a large extent, the opposite). And the patent term—unlike the "restraint **[*463]** of trade" standard—provides an all-encompassing bright-line rule, rather than calling for practice-specific analysis. So in deciding whether post-expiration royalties comport with patent law, *Brulotte* did not undertake to assess that practice's likely competitive effects. Instead, it applied a categorical principle that all patents, and all benefits from them, must end when their terms expire. See *Brulotte, 379 U.S., at 30-32, 85 S. Ct. 176, 13 L. Ed. 2d 99*; *supra, at ___ - ___, 192 L. Ed. 2d, at 469-470*. Or more specifically put, the Court held, as it had in *Scott Paper*, that Congress had made a judgment: that the day after a patent lapses, the formerly protected invention must be available to all for free. And further: that post-expiration restraints on even a single licensee's access to the invention clash with that principle. See *Brulotte, 379 U.S., at 31-32, 85 S. Ct. 176, 13 L. Ed. 2d 99* (a licensee's **[****28]** obligation to pay post-patent royalties conflicts with the "free market visualized for the post-expiration period" and so "runs counter to the policy and purpose of the patent laws" (quoting *Scott Paper, 326 U.S., at 256, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616*)). That patent (not antitrust) policy gave rise to the Court's conclusion that post-patent royalty contracts are unenforceable—utterly "regardless of a demonstrable effect on competition." 1 Hovenkamp §3.2d, at 3-10.

[*477] [**2414]** Kimble's real complaint may go to the merits of such a patent policy—what he terms its "formalis[m]," its "rigid[ity]", and its detachment from "economic reality." Brief for Petitioners 27-28. But that is just a different version of the argument that *Brulotte* is wrong. And it is, if anything, a version less capable than the last of trumping statutory *stare decisis*. For the choice of what patent policy should be lies first and foremost with Congress. So if Kimble thinks patent law's insistence on unrestricted access to formerly patented inventions leaves too little room for pro-competitive post-expiration royalties, then Congress, not this Court, is his proper audience.

B

Kimble also seeks support from the wellspring of all patent policy: the goal of promoting innovation. *Brulotte*, he **[*464]** contends, "discourages **[****29]** technological innovation and does significant damage to the American economy." Brief for Petitioners 29. Recall that would-be licensors and licensees may benefit from post-patent royalty arrangements because they allow for a longer payment period and a more precise allocation of risk. See *supra, at ___, 192 L. Ed. 2d, at 470*. If the parties' ideal licensing agreement is barred, Kimble reasons, they may reach no agreement at all. See Brief for Petitioners 32. And that possibility may discourage invention in the first instance. The bottom line, Kimble concludes, is that some "breakthrough technologies will never see the light of day." *Id., at 33, 85 S. Ct. 176, 13 L. Ed. 2d 99*.

Maybe. Or, then again, maybe not. While we recognize that post-patent royalties are sometimes not anticompetitive, we just cannot say whether barring them imposes any meaningful drag on innovation. As we have explained, *Brulotte* leaves open various ways—involving both licensing and other business arrangements—to accomplish payment deferral **[1950]** and risk-spreading alike. See *supra, at ___, 192 L. Ed. 2d, at 471*. Those alternatives may not offer the parties the precise set of benefits and obligations they would prefer. But they might still suffice to bring patent holders and product developers together and ensure **[****30]** that inventions get to the public. Neither Kimble nor his *amici* have offered any empirical evidence connecting *Brulotte* to decreased innovation; they essentially ask us to take their word for the problem. And the United States, which acts as both a licensor and a licensee of patented inventions while also implementing patent policy, vigorously disputes that *Brulotte* has caused any "significant real-world economic harm." Brief for United States as *Amicus Curiae* 30. Truth be told, if forced to decide that issue, we would not know where or how to start.

Which is one good reason why that is not our job. Claims that a statutory precedent has "serious and harmful consequences" for innovation are (to repeat this opinion's refrain) "more appropriately addressed to Congress." *Halliburton,* ***[*465]*** *573 U.S., at 277, 134 S. Ct. 2398, 189 L. Ed. 2d at 356*. That branch, far more than this one, has the capacity to assess Kimble's charge that *Brulotte* suppresses technological progress. And if it concludes that *Brulotte* works such harm, Congress has the prerogative to determine the exact right response—choosing the policy fix, among many conceivable ones, that will optimally serve the public interest. As we have noted, Congress legislates actively with respect to patents, **[****31]** considering concerns **[***478]** of just the kind Kimble raises. See *supra, at ___, 192 L. Ed. 2d, at 472*. In adhering to our precedent as against such complaints, we promote the rule-of-law values to which courts must attend while leaving matters of public policy to Congress.

[2415]** V

HN8[] ***LEdHN[8]***[] [8]What we can decide, we can undecide. But *stare decisis* teaches that we should exercise that authority sparingly. Cf. S. Lee & S. Ditko, Amazing Fantasy No. 15: Spider-Man!, p. 13 (1962) ("[I]n this world, with great power there must also come—great responsibility"). Finding many reasons for staying the *stare decisis* course and no "special justification" for departing from it, we decline Kimble's invitation to overrule *Brulotte*.

For the reasons stated, the judgment of the Court of Appeals is affirmed.

It is so ordered.

Dissent by: ALITO

Dissent

Justice **Alito**, with whom The Chief Justice and Justice **Thomas** join, dissenting.

The Court employs *stare decisis*, normally a tool of restraint, to reaffirm a clear case of judicial overreach. Our decision in *Brulotte v. Thys Co., 379 U.S. 29, 85 S. Ct. 176, 13 L. Ed. 2d 99 (1964)*, held that parties cannot enter into a patent licensing agreement that provides for royalty payments to continue after the term of the patent expires. That decision was not based on anything that can plausibly be regarded as an interpretation **[****32]** of the terms of the Patent Act. It was based instead on an **[*466]** economic theory—and one that has been debunked. The decision interferes with the ability of parties to negotiate licensing agreements that reflect the true value of a patent, and it disrupts contractual expectations. *Stare decisis* does not require us to retain this baseless and damaging precedent.

I

A

The Patent Act provides that a patent grants certain exclusive rights to the patentee and "his heirs or assigns" for a term of 20 years. *35 U.S.C. §§154(a)(1)* and *(2)*. The Act says nothing whatsoever about post-expiration royalties. In *Brulotte*, however, the Court held that such royalties are *per se* unlawful. The Court made little pretense of finding support for this holding in the language of the Act. Instead, the Court reasoned that allowing post-expiration royalties would subject "the free market visualized for the post-expiration period . . . to monopoly influences that have no proper place there." *379 U.S., at 32-33, 85 S. Ct. 176, 13 L. Ed. 2d 99*. Invoking antitrust concepts, the decision suggested that such arrangements are "an effort to enlarge the monopoly of the patent by t[y]ing the sale or use of the patented article to the purchase or use of unpatented ones." *Id., at 33, 85 S. Ct. 176, 13 L. Ed. 2d 99*.

Whatever the merits of this economic **[****33]** argument, it does not represent a serious attempt to interpret the Patent Act. A licensing agreement that provides for the payment of royalties after a patent's term expires does not enlarge the patentee's monopoly or extend the term of the patent. It simply gives the licensor a **[***479]** contractual right. Thus, nothing in the text of the Act **[1951]** even arguably forbids licensing agreements that provide for post-expiration royalties.

Brulotte was thus a bald act of policymaking. It was not simply a case of incorrect statutory interpretation. It was not really statutory interpretation at all.

B

[*467] Not only was *Brulotte* based on policymaking, it was based on a policy that is difficult to defend. Indeed, in the intervening 50 years, its reasoning has been soundly refuted. See, *e.g.,* 10 P. Areeda & H. Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶1782c.3, pp. 554-556 (3d ed. 2011); See & Caprio, The Trouble with *Brulotte*: **[**2416]** The Patent Royalty Term and Patent Monopoly Extension, 1990 Utah L. Rev. 813, 846-851; *Scheiber v. Dolby Labs., Inc., 293 F. 3d 1014, 1017 (CA7 2002)*; Brief for Petitioners 23-25, and n. 11 (collecting sources); *ante, at ___, n. 3, 192 L. Ed. 2d, at 469*.

Brulotte misperceived the purpose and effect of post-expiration royalties. The decision rested on the view that **[****34]** post-expiration royalties extend the patent term by means of an anticompetitive tying arrangement. As the Court understood such an arrangement, the patent holder leverages its monopoly power during the patent term to require payments after the term ends, when the invention would otherwise be available for free public use. But agreements to pay licensing fees after a patent expires do not "enlarge the monopoly of the patent." *379 U.S., at 33, 85 S. Ct. 176, 13 L. Ed. 2d 99*. Instead, "[o]nce the patent term expires, the power to exclude is gone," and all that is left "is a problem about optimal contract design." Easterbrook, Contract and Copyright, *42 Hous. L. Rev. 953, 955 (2005)*.

The economics are simple: Extending a royalty term allows the parties to spread the licensing fees over a longer period of time, which naturally has the effect of reducing the fees during the patent term. See *ante, at ___, 192 L. Ed. 2d, at 470*. Restricting royalty payments to the patent term, as *Brulotte* requires, compresses payment into a shorter period of higher fees. The Patent Act does not prefer one approach over the other.

There are, however, good reasons why parties sometimes prefer post-expiration royalties over upfront fees, and why **[*468]** such arrangements have pro-competitive effects. Patent holders and licensees **[****35]** are often unsure whether a patented idea will yield significant economic value, and it often takes years to monetize an innovation. In those circumstances, deferred royalty agreements are economically efficient. They encourage innovators, like universities, hospitals, and other institutions, to invest in research that might not yield marketable products until decades down the line. See Brief for Memorial Sloan Kettering Cancer Center et al. as *Amici Curiae* 8-12. And they allow producers to hedge their bets and develop more products by spreading licensing fees over longer periods. See *ibid*. By prohibiting these arrangements, *Brulotte* erects an obstacle to efficient patent use. In patent law and other areas, we have abandoned *per se* rules with similarly disruptive effects. See, *e.g.*, *Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*; *Leegin Creative Leather Products,* **[***480]** *Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

The majority downplays this harm by insisting that "parties can often find ways around *Brulotte*." *Ante, at ___, 192 L. Ed. 2d, at 470*. But the need to avoid *Brulotte* is an economic inefficiency in itself. Parties are not always aware of the prohibition—as this case amply demonstrates. And the suggested alternatives do not provide the same benefits as post-expiration royalty agreements. For instance, although an agreement to amortize **[****36]** payments for sales during the patent term would "bring down early outlays," the Court admits that such an agreement might not reflect the parties' risk preferences. *Ante, at ___, 192 L. Ed. 2d, at 470*. Moreover, such an arrangement would not necessarily yield the same amount of total royalties, particularly for an invention or a medical breakthrough that takes decades to develop into a marketable product. The sort of agreements that *Brulotte* prohibits would allow licensees to spread their costs, while *also* allowing patent holders to capitalize on slow-developing inventions.

[2417]** C

[*469] On top of that, *Brulotte* most often functions to upset the parties' expectations.

This case illustrates the point. No one disputes that, when "negotiating the settlement, neither side was aware of *Brulotte*." *Ante, at ___, 192 L. Ed. 2d, at 468*. Without knowledge of our *per se* rule, the parties agreed that Marvel would pay 3% in royalties on all of its future sales involving the Web Blaster and similar products. If the parties had been aware of *Brulotte*, they might have agreed to higher payments during the patent term. Instead, both sides expected the **[1952]** royalty payments to continue until Marvel stopped selling toys that fit the terms of the agreement. But that is **[****37]** not what happened. When Marvel discovered *Brulotte*, it used that decision to nullify a key part of the agreement. The parties' contractual expectations were shattered, and petitioners' rights were extinguished.

The Court's suggestion that some parties have come to rely on *Brulotte* is fanciful. The Court believes that there is a "reasonable possibility that parties have structured their business transactions in light of *Brulotte*." *Ante, at ___, 192 L. Ed. 2d, at 473*. Its only support for this conclusion is Marvel's self-serving and unsupported assertion that some contracts might not specify an end date for royalties because the parties expect *Brulotte* to supply the default rule. To its credit, the Court stops short of endorsing this unlikely prediction, saying only that "uncertainty on this score cuts in Marvel's direction." *Ante, at ___, 192 L. Ed. 2d, at 473*.

But there is no real uncertainty. "[W]e do not know" if Marvel's assertion is correct because Marvel has provided no evidence to support it. *Ibid.* And there are reasons to believe that, if parties actually relied on *Brulotte* to supply a default rule, courts would enforce the contracts as the parties expected. See, *e.g.,* 27 R. Lord, Williston on Contracts §70:124 (4th ed. 2003). What we **[****38]** know for sure, however, is **[*470]** that *Brulotte* has upended the parties' expectations here and in many other cases. See, *e.g., Scheiber, 293 F. 3d, at 1016*; *Boggild v. Kenner Products, 853 F. 2d 465, 466-467 (CA6 1988)*; *Pitney Bowes, Inc. v. Mestre, 701 F. 2d 1365, 1367, 1373 (CA11 1983)*. **[***481]** These confirmed problems with retaining *Brulotte* clearly outweigh Marvel's hypothetical fears.

II

In the end, *Brulotte*'s only virtue is that we decided it. But that does not render it invincible. *Stare decisis* is important to the rule of law, but so are correct judicial decisions. Adherence to prior decisions "'promotes the evenhanded, predictable, and consistent development of legal principles, fosters reliance on judicial decisions, and contributes to the actual and perceived integrity of the judicial process.'" *Pearson v. Callahan, 555 U.S. 223, 233, 129 S. Ct. 808, 172 L. Ed. 2d 565 (2009)* (quoting *Payne v. Tennessee, 501 U.S. 808, 827, 111 S. Ct. 2597, 115 L. Ed. 2d 720 (1991)*). But *stare decisis* is not an "inexorable command." *Id.*; *Washington v. W. C. Dawson & Co., 264 U.S. 219, 238, 44 S. Ct. 302, 68 L. Ed. 646 (1924)* (Brandeis, J., dissenting). "Revisiting precedent is particularly appropriate where, as here, a departure would not upset expectations, the precedent consists of a judge-made rule

. . ., and experience has pointed up the precedent's shortcomings." Pearson, supra, at 233, 129 S. Ct. 808, 172 L. Ed. 2d 565.

Our traditional approach to *stare decisis* does not require us to retain *Brulotte*'s *per se* rule. *Brulotte*'s holding had no basis in the law. Its reasoning has been thoroughly disproved. It poses economic barriers that stifle **[****39]** innovation. And it unsettles contractual expectations.

[2418]** It is not decisive that Congress could have altered *Brulotte*'s rule. In general, we are especially reluctant to overturn decisions interpreting statutes because those decisions can be undone by Congress. See, *e.g.,* John R. Sand & Gravel Co. v. United States, 552 U.S. 130, 139, 128 S. Ct. 750, 169 L. Ed. 2d 591 (2008); Patterson v. McLean Credit Union, 491 U.S. 164, 172-173, 109 S. Ct. 2363, 105 L. Ed. 2d 132 (1989). The Court calls this a "superpowered form of *stare decisis*" **[*471]** that renders statutory interpretation decisions nearly impervious to challenge. Ante, at ___, n. 3, 192 L. Ed. 2d, at 473. I think this goes a bit too far.

As an initial matter, we do not give super-duper protection to decisions that do not actually interpret a statute. When a precedent is based on a judge-made rule and is not grounded in anything that Congress has enacted, we cannot "properly place on the shoulders of Congress" the entire burden of correcting "the Court's own error." Girouard v. United States, 328 U.S. 61, 69-70, 66 S. Ct. 826, 90 L. Ed. 1084 (1946). On the contrary, we have recognized that it is appropriate for us to correct rules of this sort. See, *e.g.,* Leegin, supra, at 899-900, 127 S. Ct. 2705, 168 L. Ed. 2d 623; State Oil Co. v. Khan, 522 U.S. 3, 20-21, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997).

The Court says that it might agree if *Brulotte* were an antitrust precedent because *stare decisis* has "less-than-usual force in cases involving the Sherman Act." Ante, at ___, 192 L. Ed. 2d, at 475. But this distinction is unwarranted. We have been more willing to reexamine antitrust precedents because they have attributes **[****40]** of common-law decisions. I see no reason why the same approach should not apply where the precedent at issue, while purporting to apply a statute, is actually based on policy concerns. Indeed, we should be even more willing to reconsider such a precedent **[***482]** because the role implicitly assigned to the federal courts under the Sherman Act has no parallel in Patent Act cases.

[1953] Even taking the Court on its own terms, *Brulotte* was an antitrust decision masquerading as a patent case. The Court was principally concerned with patentees improperly leveraging their monopoly power. See 379 U.S., at 32-33, 85 S. Ct. 176, 13 L. Ed. 2d 99. And it expressly characterized post-expiration royalties as anti-competitive tying arrangements. See id., at 33, 85 S. Ct. 176, 13 L. Ed. 2d 99. It makes no sense to afford greater *stare decisis* protection to *Brulotte*'s thinly veiled antitrust reasoning than to our Sherman Act decisions.

The Court also places too much weight on Congress' failure to overturn *Brulotte*. We have long cautioned that "[i]t **[*472]** is at best treacherous to find in congressional silence alone the adoption of a controlling rule of law." Girouard, supra, at 69, 66 S. Ct. 826, 90 L. Ed. 1084. Even where Congress has considered, but not adopted, legislation that would abrogate a judicial ruling, it cannot be inferred that Congress' **[****41]** failure to act shows that it approves the ruling. See Central Bank of Denver, N. A. v. First Interstate Bank of Denver, N. A., 511 U.S. 164, 187, 114 S. Ct. 1439, 128 L. Ed. 2d 119 (1994). "'[S]everal equally tenable inferences may be drawn from such inaction.'" *Ibid*. (quoting Pension Benefit Guaranty Corporation v. LTV Corp., 496 U.S. 633, 650, 110 S. Ct. 2668, 110 L. Ed. 2d 579 (1990)).

Passing legislation is no easy task. A federal statute must withstand the "finely wrought" procedure of bicameralism and presentment. INS v. Chadha, 462 U.S. 919, 951, 103 S. Ct. 2764, 77 L. Ed. 2d 317 (1983); Clinton v. City of New York, 524 U.S. 417, 440, 118 S. Ct. 2091, 141 L. Ed. 2d 393 (1998); see U. S. Const., Art. I, §7. Within that onerous process, there are additional practical hurdles. A law must be taken up for discussion and not passed over in favor of more pressing matters, **[**2419]** and Senate rules require 60 votes to end debate on most legislation. And even if the House and Senate agree on a general policy, the details of the measure usually must be hammered out in a conference committee and repassed by both Houses.

* * *

A proper understanding of our doctrine of *stare decisis* does not prevent us from reexamining *Brulotte.* Even the Court does not defend the decision on the merits. I would reconsider and overrule our obvious mistake. For these reasons, I respectfully dissent.

Judges: HONORABLE JEROME B. SIMANDLE, Chief United States District Judge.

Opinion by: JEROME B. SIMANDLE

Opinion

[*649] SIMANDLE, Chief Judge:

I. INTRODUCTION

This patent infringement action, one of twenty-five related actions under the Hatch-Waxman Act, *35 U.S.C. §§ 271*, *281*, generally concerns Plaintiff Otsuka Pharmaceutical Co, Ltd.'s (hereinafter, "Otsuka") position that Torrent Pharmaceuticals Limited, Inc.'s, Torrent Pharma Inc.'s, and Hetero Labs Limited's (hereinafter, "Torrent") proposed generic aripiprazole product infringes one or more claims of two of the various patents covering Otsuka's Abilify® aripiprazole product, U.S. Patent Nos. 8,017,615 ("the '615 patent") and 8,580,796 ("the '796 patent").

Otsuka now moves to dismiss Torrent's **[**2]** Fifth and Sixth Counterclaims for "Unlawful Monopolization" and for "Patent Misuse" (hereinafter, the "Counterclaims") pursuant to *Federal Rule of Civil Procedure 12(b)(6)* and, in the alternative, to bifurcate and stay Torrent's Counterclaims pending resolution of the primary patent infringement issues pursuant to *Federal Rule of Civil Procedure 42(b)*. [Docket Item 43.]

Otsuka argues, in particular, that Torrent's antitrust Counterclaim must be dismissed, because Torrent has not alleged, nor will Torrent ever suffer, the "anticompetitive injury" required for antitrust standing, and because Torrent's "cursory conclusions" fail to plausibly overcome Otsuka's *Noerr-Pennington* immunity. (Otsuka's Reply at 2-5; Otsuka's Br. at 5-11.) Ostuka similarly asserts that Torrent's patent misuse Counterclaim must be dismissed, because its allegation of baseless infringement fails as a matter of law to state a cognizable claim for patent misuse. (See Otsuka's Reply at 5-6; Otsuka's Br. at 11-12.) In the alternative, Otsuka requests that the Court follow the "'standard practice'" of bifurcating for trial the patent issues raised in this litigation from the antitrust and/or patent misuse issues. (Otsuka's Br. at 13 (citations omitted).)

Torrent, however, submits that its antitrust **[**3]** Counterclaim demonstrates the "real and immediate" risk of injury required for purposes of antitrust standing, because absent "this bad faith litigation," Torrent would have an "unencumbered path to launch its ANDA product." (Torrent's Opp'n at 4-5.) With regard to Otsuka's claim of *Noerr-Pennington* immunity, Torrent similarly asserts that its antitrust Counterclaim sets forth sufficient factual matter to demonstrate that this litigation constitutes a sham, because Otsuka initiated suit despite Torrent's detailed non-infringement statement and despite the fact that Torrent's abbreviated new drug application (hereinafter, "ANDA") is non-infringing on its face. (Id. at 3-7.) Finally, Torrent submits that dismissal of its Counterclaims would, at this early stage of discovery, be inappropriate to the extent undeveloped factual issues remain concerning whether Otsuka's conduct constitutes patent misuse and/or an antitrust violation. (Id. at 8-9.)

[*650] The principal issues before the Court are whether the allegations of Torrent's Counterclaims suffice to confer antitrust standing, to overcome Otsuka's *Noerr-Pennington* immunity, and to state a plausible claim for patent misuse.

For the reasons that **[**4]** follow, Otsuka's motion will be granted in part and denied in part.

II. BACKGROUND

A. Factual and Procedural Background[1]

Otsuka, a pharmaceutical company primarily organized and existing under the laws of Japan, holds New Drug Application (hereinafter, "NDA") No. 21-436, approved by the Food and Drug Administration (hereinafter, the "FDA"), for aripiprazole tablets, which Otsuka markets under the trade name Abilify®. (Am. Compl. at ¶¶ 1, 17-18, 25-30.)

In connection with Abilify's® listing in the Orange Book, the FDA's book of drug products approved under the Food, Drug, and Cosmetic Act (hereinafter, the "Orange Book"), *21 U.S.C. § 355(j)*, Otsuka identifies the '615 patent and the '796 patent, both of which Otsuka owns by virtue of assignment. (Id. at ¶¶ 14, 17, 26, 29.) The listing, in particular, discloses Abilify®'s active ingredient as "aripiprazole," the dosage form as a "tablet" or "oral," and the strengths as 2 mg, 5 mg, 10 mg, 15 mg, 20 mg, and 30 mg. (Counterclaim at ¶ 13 (quotation marks omitted).)

In late 2013, Torrent filed ANDA No. 20-1519 with the FDA, seeking approval to **[**5]** market generic 2 mg, 5 mg, 10 mg, 15 mg, 20 mg, and 30 mg aripiprazole tablets in the United States, prior to the expiration of the '615 and the '796 patents. (See Countercl. at ¶ 14.) Torrent's ANDA filing included a "paragraph IV certification" pursuant to *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*, in which Torrent set forth its assertion that the Abilify® patents would not be infringed by the commercial manufacture, use, or sale of Torrent's generic product. (See id.)

---

[1] For purposes of the pending motion, the Court accepts as true the facts set forth in Torrent's Answer and Counterclaims. [Docket Items 19 & 26.]

On January 4, 2014, Torrent mailed notice of its ANDA certification to Otsuka, and provided "a detailed statement of the factual and legal bases of Torrent's ANDA certifications for the '615 and '796 patents," i.e., a detailed explanation of the bases for Torrent's position that its generic aripiprazole tablets would "not infringe any valid or enforceable claim of the Orange Book-listed '615 and '796 patents." (Id. at ¶ 15.) In order to substantiate its non-infringement position, Torrent then provided the relevant portions of its ANDA on February 20, 2014. (Id. at ¶ 16.)

Otsuka filed an initial and Amended Complaint in this District, alleging that Torrent's proposed generic product "will, if approved and marketed," infringe at least one claim of the '615 and '796 patents. (Am. Compl. at ¶¶ 22-23, 33-34.) On October 22, **[**6]** 2014, Torrent filed an Answer to Otsuka's Amended Complaint and, as a relevant here, asserted Counterclaims for "Unlawful Monopolization in Violation of the Sherman Act: Sham Litigation" and for a "Declaratory Judgment of Unenforceability of the '615 and '796 Patents for Patent Misuse." (Countercl. at ¶¶ 34-62.)

Torrent's "Unlawful Monopolization" Counterclaim alleges, in particular, that Otsuka "has the power to control prices and/or exclude competition in, or prevent entry into" the aripiprazole market, and claims that Otsuka has wielded that power **[*651]** "to monopolize" the market. (Id. at ¶¶ 42-45.) Indeed, Torrent alleges that Otsuka "has engaged in an overall predatory scheme to monopolize the [aripiprazole market] through, but not limited to, initiating objectively baseless and sham judicial proceedings designed" to "entrench and enhance [Otsuka's] monopolistic position in the [aripiprazole] market and to stifle and eliminate competition and competitors with no economic, market or competitive benefit." (Id. at ¶¶ 45, 47.) Torrent, accordingly, alleges that Otsuka initiated this "sham" and "bad faith" litigation against it not upon a genuine belief that Torrent's ANDA products would infringe the '615 and **[**7]** '796 Patents, but "for an improper purpose, and as a means of directly interfering with and harming Torrent's business and in order to forestall, frustrate and prevent competition by Torrent," in violation of the Sherman and Clayton Acts, *15 U.S.C. §§ 2*, *15*, and *26*.[2] (Id. at ¶¶ 48-51.) Moreover, as a result of this "exclusionary" and "anticompetitive" conduct, Torrent has purportedly "suffered, and will continue to suffer," significant injury, "including lost profits and business opportunities." (Id. at ¶¶ 57-58.)

Torrent's patent misuse Counterclaim largely reiterates the allegations of its antitrust Counterclaim, and specifically alleges that Otsuka filed this action without "any good faith factual basis" to support its infringement positions against Torrent, and "for the purpose of delay[ing] Torrent's entry" into the aripiprazole market **[**8]** by "burden[ing] Torrent with litigation costs and making baseless accusations of infringement." (Id. at ¶¶ 60-62.)

The pending motion followed.

III. STANDARD OF REVIEW

Under *Federal Rule of Civil Procedure 12(b)(6)*, the court must generally accept as true the factual allegations of the defendant's counterclaims, and construe all "reasonable inferences" in the light most favorable to the defendant. *Revell v. Port Auth. Of N.Y., N.J., 598 F.3d 128, 134 (3d Cir. 2010)*; see also *Fleisher v. Standard Ins. Co., 679 F.3d 116, 120 (3d Cir. 2012)* (same). However, "[a] pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action" fails to suffice. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Rather, the factual allegations must be facially sufficient to demonstrate a "plausible" right to relief, by pleading factual content sufficient for the Court "to draw the reasonable inference that the [plaintiff] is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*); see also *Umland v. Planco Fin. Servs., 542 F.3d 59, 64 (3d Cir. 2008)*.

---

[2] As relevant here, *section 2* of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. In that respect, the Sherman Act seeks to protect the public from the failures of the market and "conduct which unfairly tends to destroy competition itself." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

In evaluating whether a counterclaim meets this pleading standard, the Court strips away conclusory statements and reviews instead the "well-pled factual allegations, assume[s] their veracity, and then determine[s] whether" the allegations demonstrate a plausible "entitlement to relief." *Iqbal, 556 U.S. at 678* (internal quotation marks omitted).

IV. DISCUSSION

As stated above, Otsuka moves to dismiss Torrent's antitrust Counterclaim for **[*652]** lack of standing and **[**9]** on immunity grounds, and moves to dismiss Torrent's patent misuse Counterclaim for failure to state a plausible claim for relief. The Court will address each issue in turn.

A. Torrent has Alleged Sufficient Facts to Demonstrate Antitrust Standing

Article III constitutional standing, a principle moored in the notion "that the judiciary's power only extends to cases or controversies," constitutes a threshold requirement in all actions in federal court. *Ethypharm S.A. France v. Abbott Labs., 707 F.3d 223, 232 (3d Cir. 2013)* (citing *U.S. Const. art. III, § 2*; *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*. The principles of constitutional standing are, however, "'augmented'" by prudential considerations aimed at preserving the effective enforcement of the antitrust laws. Id. (quoting *City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 264 (3d Cir. 1998))*. Indeed, the Supreme Court has specifically recognized that "Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (citation omitted).

As a result, a party suing under federal antitrust laws, as here,[3] must meet the prudential requirement of "'antitrust standing.'"[4] *Ethypharm S.A. France, 707 F.3d at 232* (citation omitted). In Associated Gen. Contractors of Cal., Inc., the Supreme Court articulated the considerations relevant to whether a complainant possesses antitrust **[**10]** standing, which the Court of Appeals for the Third Circuit subsequently organized into the following multifactor test:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Ethypharm S.A. France, 707 F.3d at 232-33 (citing *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir. 1993))* (hereinafter, the "AGC factors"). Of these factors, the second, antitrust injury, constitutes the "'necessary but insufficient condition of antitrust standing.'" Id. (citation omitted). Thus, in the absence of a plausible allegation of antitrust injury, the only factor challenged by Otsuka in this instance, the Court need not address the remaining AGC factors.

Therefore, the Court notes that, in order to plead an antitrust injury, the party **[*653]** must allege facts showing (1) that it suffered an injury of the type the antitrust laws seek to prevent, e.g., anticompetitive behavior, and (2) that the

---

[3] *Section 4* of the Clayton Act provides the statutory authority for a private antitrust cause of action, and **[**11]** specifically states that, "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" may maintain a "private action for treble damages." *15 U.S.C. § 15*.

[4] Unlike Article III standing, lack of antitrust standing does not deprive a court of subject matter jurisdiction. *Ethypharm S.A. France, 707 F.3d at 232* (citation omitted). Rather, it bars "a plaintiff from recovering under the antitrust laws." Id. (citation omitted)).

injury resulted from the adversary's unlawful or anti-competitive acts. See In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 753 (E.D. Pa. 2014) (quoting In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 534 (D.N.J. 2004)). The federal antitrust laws, however, foster "'the protection of competition not competitors.'" Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 76-77 (3d Cir. 2010); see also Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) (citation omitted) (noting that Congress enacted the antitrust laws "for 'the protection of competition, not competitors'"). As a result, the pleaded facts must show "that 'the challenged action has had an actual adverse effect on competition as a whole in the relevant market,'" rather than just an adverse effect on the particular competitor.[5] Irish v. Ferguson, 970 F. Supp. 2d 317, 365 (M.D. Pa. 2013) (citations **[**12]** omitted); see also Eichorn v. AT&T Corp., 248 F.3d 131, 140 (3d Cir. 2001) (noting that an antitrust injury does not lie unless the allegedly anticompetitive conduct "has a wider impact on the [overall] competitive market"). Moreover the alleged injuries must, as with all types of standing, be both 'real and immediate,' not 'conjectural' or 'hypothetical.'" City of L.A. v. Lyons, 461 U.S. 95, 102, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983); see also Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 321 (3d Cir. 2007) ("The prospective harm to competition must not ... be speculative.")

In seeking to dismiss Torrent's federal antitrust claim, Otsuka asserts that Torrent cannot be heard to claim that the pendency of this litigation has caused Torrent to suffer any antitrust or anticompetitive injury, because Torrent "voluntarily chose[] not to surmount the legal and regulatory" hurdles to its market entry until **[**13]** after the April 2015 expiration of the primary compound patent for Abilify, U.S. Patent No. 5,006,528 (hereinafter, the "'528 Patent"), and because Torrent's allegations of delayed market entry lack the immediacy required for purposes of antitrust standing. (Otsuka's Br. at 5-7; Otsuka's Reply at 2-4.) The Court, however, finds Otsuka's position without merit.

Critically, the hallmark for evaluating the plausibility of an allegation of antitrust injury is, as stated above, that the actions alleged to be anticompetitive when viewed "as a whole" bear consequence for the overall market, rather than only for an individual competitor. TransWeb, LLC v. 3M Innovative Props. Co., No. 10-4413, 2011 U.S. Dist. LEXIS 59095, 2011 WL 2181189, at *18 (D.N.J. June 1, 2011)

Distilled to its essence, Torrent's Counterclaim alleges that Otsuka has initiated meritless infringement actions in order to "stifle and eliminate competition and competitors," to exclude or prevent competitors' entry into the aripiprazole market, and to maintain its exclusive monopoly over the aripiprazole market. (Countercl. at ¶¶ 34-58.) The Counterclaim **[*654]** further alleges that, as result of Otsuka's purportedly "exclusionary, anticompetitive and unlawful activities," Otsuka has been able to maintain its aripiprazole monopoly to the detriment of competition and consumers **[**14]** and has, in particular, hampered Torrent's ability to enter and compete, resulting in "lost profits and business opportunities." (Id. at ¶¶ 54, 57-58.)

In these respects, Torrent's Counterclaim plausibly alleges the elements of an antitrust injury, namely, an injury of the type protected by the antitrust laws, and that the injury derived, at least in part, from anti-competitive acts. Indeed, the pursuit of litigation that forestalls entry into the generic market, as alleged here, constitutes "anti-competitive behavior" of the type the antitrust laws seek to prevent. AstraZeneca AB v. Glenmark Generics Ltd., No. 14-665, 2014 U.S. Dist. LEXIS 151215, 2014 WL 5366050, at *1 (D. Del. Oct. 9, 2014); see also Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 275 n.1 (3d Cir. 1999) (noting that, "protecting a competitor's ability to compete" clearly rests within "the interest of competition"). Moreover, Torrent has specifically alleged that Otsuka's pursuit of "objectively baseless and sham judicial proceedings" has adversely affected competition in the overall aripiprazole market by encumbering the path of generic entry and effectively extending Otsuka's long-held monopoly.[6] See Rochester Drug Co-op., Inc. v. Braintree Labs., *712 F. Supp. 2d 308, 316 (D. Del. 2010)* (finding

---

[5] In that respect, the antitrust injury requirement helps ensure that the claimed harm "'corresponds to the rationale for finding a violation of the antitrust laws in the first place,'" e.g., anticompetitive behavior, and prevents a party from basing a suit upon "'losses that stem [only] from competition.'" W. Penn Allegheny Health Sys., Inc., 627 F.3d at 101 (citations omitted); see also Eichorn v. AT&T Corp., 248 F.3d 131, 140 (3d Cir. 2001) (noting that an antitrust injury does not lie unless the allegedly anticompetitive conduct "has a wider impact on the [overall] competitive market").

similar allegations sufficient). Therefore, the Court rejects Otsuka's position that Torrent has failed to plead a cognizable antitrust injury.

Nor does the Court find that these alleged injuries constitute conjectural possibilities, rather than the real and immediate injury required for purposes of antitrust standing. See *Broadcom Corp., 501 F.3d at 321*. Indeed, even if Torrent "voluntarily" declined to mount any legal challenge to Otsuka's aripiprazole monopoly until after the expiration of the '528 Patent in **[**17]** April 2015, the exclusivity associated with the '528 Patent has since passed, and **[*655]** therefore interposes no present barrier to Torrent's entry into the aripiprazole market as Otsuka's active competitor. Nor does the status of Torrent's FDA approval render the alleged injury any less imminent, because the FDA's own records reflect that Torrent obtained final FDA approval for its ANDA product on April 28, 2015.[7] See Press Release, FDA, FDA approves first generic Abilify to treat mental illnesses (Apr. 28, 2015), available at, *http://www.fda.gov/NewsEvents/Newsroom/PressAnnouncements/ucm444* 862.htm. As a result, the pendency of this litigation constitutes the only encumbrance to Torrent's free ability to enter the aripiprazole market, rendering the alleged injuries both real and immediate.[8]

Moreover, even if Torrent's Counterclaim relies, at least in part, upon some ultimate facts, such as that Otsuka's actions evince a "specific intent to restrain competition," (id. at ¶ 45), Torrent need not "'plead detailed evidentiary matter in order to survive a motion to dismiss.'"[9] *In re Niaspan Antitrust Litig., 42 F. Supp. 3d at 756* (citations omitted). Rather, the inquiry for purposes of the pending motion to dismiss turns upon the plausibility of the allegations, not upon whether Torrent has "alleged sufficient facts to 'compel' the inference" that Otsuka committed

---

[6] The Court notes, as a matter of public record, that Otsuka **[**15]** has initiated litigation against every ANDA filer. See Otsuka Pharm. Co., Ltd. v. Alembic Global Holding SA, Civil Action No. 14-2982 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Zydus Pham. USA Inc., Civil Action No. 14-3168 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Aurobindo Pharma Ltd., Civil Action No. 14-3306 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Intas Pharm. Ltd., Civil Action No. 14-3996 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Zydus Pham. USA Inc., Civil Action No. 14-3168 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Sun Pharm. Indus., Ltd., Civil Action No. 14-4307 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Mylan Inc., Civil Action No. 14-4508 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Torrent Pharm., Inc., Civil Action No. 14-4671 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Zhejiang Huahai Pharm. Co., Civil Action No. 14-5537 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Ajanta Pharm. Ltd., Civil Action No. 14-5876 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Teva Pharm. USA, Inc., Civil Action No. 14-5878 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Intas Pharm. Ltd., Civil Action No. 14-6158 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Sun Pharm. Indus., Ltd., Civil Action No. 14-6397 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Teva Pharm. **[**16]** USA, Inc., Civil Action No. 14-6398 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Aurobindo Pharma Ltd., Civil Action No. 14-6890 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Lupin Ltd., Civil Action No. 14-7105 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Actavis Elizabeth LLC, Civil Action No. 14-7106 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Zydus Pham. USA Inc., Civil Action No. 14-7252 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Alembic Pharm., Ltd., Civil Action No. 14-7405 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Apotex Corp., Civil Action No. 14-8074 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Hetero Drugs, Ltd., Civil Action No. 15-161 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Amneal Pharm. Co, Ltd., Civil Action No. 15-1585 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Sandoz Inc., Civil Action No. 15-1716 (JBS/KMW); Otsuka Pharm. Co., Ltd. v. Indoco Remedies Ltd., Civil Action No. 15-1967 (JBS/KMW).

[7] In deciding the pending motion to dismiss, the Court "may take judicial notice of public records [or documents] of the FDA" relating to the aripiprazole products at issue in this litigation. *Kaiser v. Depuy Spine, Inc., 944 F. Supp. 2d 1187, 1192 n.2 (M.D. Fla. 2013)* (citation omitted); see also ***Rollins v. St. Jude Med., 583 F. Supp. 2d 790, 805 (W.D. La. 2008)*** (citation omitted) (same).

[8] For that reason, the Court rejects Otsuka's reliance upon Ethypharm S.A. France. Indeed, in Ethypharm S.A. France, the Court of Appeals for the Third Circuit found the plaintiff could not "be considered a competitor for purposes of antitrust **[**18]** injury," because "legal barriers particular to the pharmaceutical market" precluded the plaintiff's from marketing a competing product. *707 F.3d at 236*. Here, however, the legal barriers that once plagued Torrent's ability to enter the aripiprazole market, namely, expiration of the '528 Patent and final FDA approval, no longer present any impediment. Therefore, in the absence of this litigation, Torrent could immediately become, without reticence, Otsuka's lawful competitor.

[9] Nor are direct factual allegations of Torrent's chances of litigation success required; "inferential allegations" can suffice. See *In re Niaspan Antitrust Litig., 42 F. Supp. 3d at 757 n.18* (citations omitted)

the alleged violations. Id. Here, Torrent's allegations, accepted as true, support an inference that Torrent has suffered an ***antitrust law*** injury flowing from Otsuka's allegedly anticompetitive conduct. (See generally Countercl.) **[**19]** These allegations therefore suffice at the pleading stage to state a plausible claim for relief, particularly given the fact that the existence of antitrust injury "involves complex questions of fact," often ill-suited for resolution upon a "motion[] to dismiss." *Schuylkill Energy Res., Inc. v. Pa. Power & Light Co., 113 F.3d 405, 417 (3d Cir. 1997)* (citing *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 876 (3d Cir. 1995)* (collecting cases)); see also *In re Niaspan Antitrust Litig., 42 F. Supp. 3d at 757 n.19* (collecting cases that have declined to resolve the existence of antitrust injury through motions to dismiss).

For all of these reasons, the Court rejects Otsuka's argument that Torrent's antitrust Counterclaim should be dismissed for lack of antitrust standing, and turns to Otsuka's position that *Noerr-Pennington* immunity bars the Counterclaim.

B. Torrent Alleges Sufficient Facts to Plausibly Overcome Otsuka's *Noerr-Pennington* Immunity

Under the *Noerr-Pennington* doctrine, a patent owner's initiation of patent **[*656]** infringement litigation receives presumptive immunity from attack under the antitrust laws. See generally *Eastern R.R. Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; see also *Rochester Drug Co-op., Inc., 712 F. Supp. 2d at 316* (considering *Noerr-Pennington* immunity in the patent infringement context). Parties who file "sham litigation" **[**20]** are, however, excepted from the benefit of immunity under *Noerr-Pennington. Prof'l Real Estate Investors v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*. An allegation of sham litigation consists of two elements: first, "the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." Id. (internal quotations and citations omitted). Second, "the baseless lawsuit [must] conceal[] an attempt to interfere directly with the business relationships of a competitor," rather than reflect a legitimate effort to obtain judicial review. Id.

In seeking the dismissal of Torrent's antitrust Counterclaim, Otsuka argues that Torrent pleads little more than "bare labels and legal conclusions," by claiming that Otsuka initiated "objectively baseless and sham judicial proceedings," "baselessly and improperly wielded the '615 and '796 Patents," and that the pending litigation qualifies as "both objective and subjectively baseless." (Otsuka's Br at 8-10 (citation omitted).) Those allegations, standing alone, do indeed constitute conclusory allegations of the type routinely found insufficient to overcome *Noerr-Pennington* immunity under the federal pleading standards. Nevertheless, Torrent's Counterclaim includes more detailed factual matter.

Indeed, **[**21]** in addition to the allegations cited by Otsuka, Torrent specifically alleges that it provided a "detailed statement of the factual and legal bases" for its position on the non-infringement of Torrent's ANDA, and that it subsequently provided the confirming "portions" of Torrent's ANDA. (Countercl. at ¶¶ 15-16.) Torrent therefore alleges that the infringement claims asserted by Otsuka in this litigation lack an objectively reasonable basis, because "[n]o reasonable litigant could expect to secure favorable relief against Torrent upon the merits under the '615 and '796 patents." (Id. at ¶¶ 45, 47, 49-50.) Moreover, because Otsuka "initiated litigation" despite Torrent's allegedly dispositive evidence of noninfringement, Torrent submits that Otsuka filed this action "in bad faith, for an improper purpose, and as a means of directly interfering with," forestalling, frustrating, and preventing competition by Torrent, and not in order to "obtain an adjudication of a valid claim." (Id. at ¶¶ 46, 49.)

These allegations, accepted as true for purposes of this *Rule 12(b)(6)* motion, plausibly allege facts sufficient to overcome Otsuka's presumptive antitrust immunity under the *Noerr-Pennington* doctrine.[10] See, e.g., *Abraxis*

---

[10] Torrent's submission of Paragraph IV certification under *21 U.S.C. § 355(j)(2)(A)(vii)* compels no different result. Indeed, in its Paragraph IV certification, Torrent specifically certified that the Torrent aripiprazole tablets would "not infringe any valid claim of the '615 and '796 patents." (Countercl. at ¶ 15.) In that respect, even though Torrent's certification provided the technical act of constructive infringement necessary to initiate an action under *35 U.S.C. § 271(e)(2)(A)*, nothing in a paragraph IV certification

*Bioscience, Inc. [*657] v. Navinta LLC, No. 07-1251, 2008 U.S. Dist. LEXIS 63598, 2008 WL 2967034, at *7 (D.N.J. July 31, 2008)* (finding the **[**22]** defendant's limited allegations sufficient to overcome *Noerr-Pennington* immunity in connection with a motion to dismiss); *Knoll Pharm. Co. Inc. v. Teva Pharm. USA, Inc., No. 01-1646, 2001 U.S. Dist. LEXIS 12999, 2001 WL 1001117, at * 4 (N.D. Ill. Aug. 24, 2001)* (finding the objectively baseless prong met where the defendant in an infringement action alleged that, before the plaintiff filed suit, the defendant sent a detailed letter providing the bases for the defendant's position on invalidity); *In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 618, 643-44 (E.D. Mich. 2000)* (denying motion to dismiss antitrust claim on *Noerr-Pennington* grounds where the claimant alleged that the plaintiff prosecuted the infringement action solely as a basis for litigation to delay and exclude the claimant from the market).

Moreover, even assuming the allegations proved insufficient, the inquiry into whether Otsuka maintains in this action "objectively and subjectively baseless" infringement claims turns upon issues of reasonableness and intent—issues which are premature to consider upon the present record. Indeed, resolution of these inherently factual issues requires consideration of whether Otsuka undertook a reasonable investigation in advance of pursuing **[**24]** its infringement claims, whether Otsuka undertook this action for an improper and anticompetitive purpose, and whether a reasonable litigant could have realistically expected success on the merits at the time of filing. All of these determinations require inquiry into issues of fact, which cannot be resolved in the context of a motion to dismiss, and prior to discovery. See *S3 Graphics Co., Ltd. v. ATI Techs. ULC, No. 11-1298, 2014 U.S. Dist. LEXIS 16928, 2014 WL 573358, at *3* (finding resolution of *Noerr-Pennington* immunity "not proper before discovery"); *Shionogi Pharma, Inc. v. Mylan, Inc., No. 10-1077, 2011 U.S. Dist. LEXIS 98547, 2011 WL 3860680, at *6 (D. Del. Aug. 31, 2011)* (declining to resolve the application of *Noerr-Pennington* immunity upon a motion to dismiss); *Hoffman-La Roche Inc. v Genpharm Inc., 50 F. Supp. 2d 367, 380 (D.N.J. 1999)* ("Reasonableness is a question of fact, and the Court cannot make such factual determinations on a factual controversy roiled by a motion to dismiss.")

For all of these reasons, the Court rejects Otsuka's argument that Torrent's Counterclaim should be dismissed on *Noerr-Pennington* immunity. If, however, Torrent fails to meet its burden of proof as to "sham" litigation" upon litigation of the patent infringement claims[11] and upon discovery as to Torrent's Counterclaims, Otsuka may renew its claim of *Noerr-Pennington* immunity. Moreover, even if Torrent ultimately overcomes *Noerr-Pennington* immunity, in order to **[*658]** succeed on its Counterclaim, **[**25]** Torrent must still establish a substantive antitrust violation. See *Organon Inc. v. Mylan Pharms., Inc., 293 F. Supp. 2d 453, 461 (D.N.J. 2003)* (citation omitted).

The Court next addresses whether Torrent states a plausible Counterclaim for patent misuse

C. Torrent Fails to Allege a Plausible Claim of Patent Misuse

Several decades-worth of Supreme Court jurisprudence makes clear that the defense of patent misuse must be based upon allegations that the patentee "extend [ed] the term of his [patent] monopoly beyond that granted by law." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 136, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; see also *Blonder-Tongue Lab. v. University of Illinois Found., 402 U.S. 313, 343-44, 91 S. Ct. 1434, 28 L. Ed. 2d*

---

necessarily compels the institution of an infringement suit. Indeed, it is commonplace for NDA owners not to file suit after analyzing the contents **[**23]** of an ANDA filer's notice and certification, and the case law cited by Otsuka provides little support for its position that the filing of a paragraph IV certification renders this litigation per se reasonable. Critically, in Celgene, the Court considered the factual and legal basis of the litigation in the context of a request for sanctions under *Federal Rule of Civil Procedure 11*, not in connection with a *Noerr-Pennington* analysis. See *2008 U.S. Dist. LEXIS 55700, 2008 WL 2856469, at *3*. In *AstraZeneca AB v. Mylan Labs., Inc., 2010 U.S. Dist. LEXIS 50049, 2010 WL 2079722, at *4 (S.D.N.Y. May 19, 2010)*, a case that relied upon Celgene, then addressed the defendant's antitrust counterclaims and *Noerr-Pennington* immunity, following "a 42-day bench trial" on the allegations of the plaintiff's claims and based, at least in part, upon the public records associated with that lengthy bench trial. *2010 U.S. Dist. LEXIS 50049, [WL] at *4*. No such record has been developed in this instance.

[11] The Court will, as stated below, bifurcate and stay Torrent's antitrust Counterclaim, pending resolution of the patent infringement issues.

788 (1971) (generally describing the public's "paramount interest" in restraining patent monopolies to "their legitimate scope"); Transparent-Wrap Mach. Corp. v. Stokes & Smith Co., 329 U.S. 637, 643-44, 67 S. Ct. 610, 91 L. Ed. 563, 1948 Dec. Comm'r Pat. 662 (1947) ("a patentee [is limited] to the monopoly found within the four corners of the grant" and may not use that monopoly power "to acquire a monopoly not embraced in the patent").

In applying the Supreme Court's long line of patent misuse decisions, the Court of Appeals for the Federal Circuit has further stated that a claim of patent misuse requires an allegation that the patent owner "'impermissibly broaden[ed] the physical or temporal scope' of the patent grant with an anticompetitive **[**26]** effect."[12] Princo Corp. v. Int'l Trade Comm'n, 616 F.3d 1318, 1328 (Fed. Cir. 2010) (quoting Windsurfing Int'l, Inc. v. AMF, Inc., 782 F.2d 995, 1001 (Fed. Cir. 1986). District courts throughout this Circuit have, in turn, uniformly enforced the requirement that a plausible claim for patent misuse include an allegation of a patentee's attempt to impermissibly broaden the physical or temporal scope of the disputed patent. See, e.g., Micron Tech., Inc. v. Rambus Inc., 917 F. Supp. 2d 300, 320 n.19 (D. Del. 2013); Altana Pharma AG v. Teva Pharms. USA, Inc., No. 04-2355, 2012 U.S. Dist. LEXIS 79166, 2012 WL 2068611 (D.N.J. June 7, 2012); Cordance Corp. v. Amazon.com, Inc., 727 F. Supp. 2d 310, 333-34 (D. Del. July 23, 2010); In re Gabapentin Patent Litig., 648 F. Supp. 2d 641, 652 (D.N.J. 2009).

Here, the Court need not belabor Torrent's Sixth Counterclaim for patent misuse, which alleges, in its entirety, that:

> 59. Torrent restates and realleges each of the foregoing paragraphs as if fully set forth herein.
>
> 60. [Otsuka] does not have any good faith factual basis to allege that the products described in the Torrent **[**27]** ANDA infringe any claim of the '615 and '796 patents, and nevertheless filed and are continuing to maintain this lawsuit.
>
> 61. [Otsuka] filed this action without regard for the merits of its infringement claims and instead did so for the purpose **[*659]** of delay Torrent's entry in into the marketplace for aripiprazole tablets by, inter alia, burdening Torrent with litigation costs and making baseless accusations of infringement.
> 62. The claims of the '615 and '796 patents are unenforceable as a result of Plaintiff's patent misuse, including [Otsuka's] bad faith assertion of the '615 and '796 patents against Torrent.

(Countercl. at ¶¶ 59-62.) As is evident from even a cursory review of Torrent's pleading, Torrent's Counterclaim hinges upon Otsuka's allegedly bad faith conduct in pursuing its "baseless" patent infringement action against Torrent. Torrent, however, has failed to plead any allegation that Otsuka has impermissibly broadened the physical or temporal scope of the '615 and '796 patents with an anticompetitive effect. Indeed, Torrent's responsive pleading, in its entirety, contains no allegation concerning any improper expansion of the physical or temporal breadth of the disputed patents. Torrent's Counterclaim therefore lacks an essential allegation, **[**28]** and fails to state a plausible claim for relief as a matter of law. Torrent's patent misuse Counterclaim will, accordingly, be dismissed. Nevertheless, because it remains conceivable that Torrent could plausibly allege this additional requirement, this dismissal will be without prejudice and the Court will grant Torrent leave to file a motion to amend to attempt to assert a counterclaim for patent misuse within fourteen (14) days. Any proposed amended counterclaim must be consistent with this Opinion's directives and findings.

The Court last addresses Otsuka's request to bifurcate and stay.

D. Torrent's Antitrust Counterclaim Will be Bifurcated and Stayed

---

[12] Torrent attempts to sidestep this elemental requirement, but provides no support for its position that a claim of patent misuse can survive without an allegation of an impermissibly broadened patent. Nor does Torrent's sole citation to Altana Pharma AG v. Teva Pharms. USA, Inc., No. 04-2355, 2012 U.S. Dist. LEXIS 79166, 2012 WL 2068611 (D.N.J. June 7, 2012), compel any contrary result. Indeed, in Altana, the defendants specifically alleged that the plaintiff engaged in patent misuse by amending certain license agreements to treat the disputed patent as if it remained "in force for an additional six months past the expiration date." 2012 U.S. Dist. LEXIS 79166, [WL] at *2. Torrent has proffered no similar allegation in this instance.

To the extent Torrent's Counterclaims survive Otsuka's motion to dismiss, as the antitrust Counterclaim has, the parties uniformly assert that the Court should bifurcate and stay the Counterclaim pending resolution of the patent infringement issues. (See Otsuka's Br. at 13; Torrent's Opp'n at 1 (noting Torrent's "accordance with Otsuka's request" to bifurcate and stay); Otsuka's Reply at 6.)

Federal Rule of Civil Procedure 42(b) provides, in relevant part, that the Court may "order a separate trial of one or more separate issues, claims, crossclaims, counterclaims, or third-party **[**29]** claims," in order to encourage "convenience, to avoid prejudice, or to expedite and economize." *Fed. R. Civ. P. 42(b)*. In determining whether to bifurcate under *Rule 42(b)*, courts possess broad discretion. See *Barr Lab., Inc. v. Abbott Lab., 978 F.2d 98, 115 (3d Cir. 1992)* (citing *Idzojtic v. Pa. R.R. Co., 456 F.2d 1228, 1230 (3d Cir. 1972))*. Nevertheless, in order to properly exercise that discretion, courts must carefully balance "considerations of convenience, avoidance of prejudice, and efficiency," and must preserve the litigant's constitutional right to a jury. See *Celgene Corp. v. Barr Labs., Inc., No. 07-286, 2008 U.S. Dist. LEXIS 47639, 2008 WL 2447354, *1 (D.N.J. June 13, 2008)*; *Fed. R. Civ. P. 42(b)* ("When ordering a separate trial, the court must preserve any federal right to a jury trial.").

Considering the various factors presented in this action, and the parties' agreement, the Court finds the bifurcation and stay of Torrent's antitrust Counterclaim warranted. Critically, resolution of the patent infringement issues may render Torrent's antitrust Counterclaim moot, thereby serving the interests of judicial economy. Bifurcation of antitrust Counterclaim and patent infringement claims further enhances "the parties' right to jury trial by making the issues the jury must consider less complex." *Warner Lambert Co. v. Purepac Pharm. Co., Nos. 98-2749,* ***[*660]*** *99-5948, 00-2053, 2000 U.S. Dist. LEXIS 22559, 2000 WL 34213890, *11 (D.N.J. Dec. 22, 2000)* (internal quotation marks omitted). In that respect, the Court will follow the practice of separating for trial patent issues and antitrust issues. *In re Innotron Diagnostics, 800 F.2d 1077, 1084 (Fed. Cir. 1986)* (affirming the severance **[**30]** of patent and antitrust claims as in the interests of judicial economy); see also *Eurand Inc. v. Mylan Pharms., Inc., No. 08-889, 2009 U.S. Dist. LEXIS 92542, 2009 WL 3172197, at *2 (D. Del. Oct. 1, 2009)* (granting motion to sever and stay antitrust and patent misuse counterclaims and affirmative defenses from the patent infringement action); See *Abraxis Bioscience, Inc., 2008 U.S. Dist. LEXIS 63598, 2008 WL 2967034, at *8* (denying a motion to dismiss, but granting an alternative request to bifurcate and stay antitrust counterclaims).

For all of these reasons, the Court will bifurcate Torrent's antitrust Counterclaim, and will stay discovery with respect to this Counterclaim pending resolution of the patent infringement issues.

V. CONCLUSION

For the reasons stated above, Otsuka's motion will be denied with respect to Torrent's antitrust Counterclaim, and granted with respect to Torrent's patent misuse Counterclaim, with leave to amend. Torrent's antitrust Counterclaim will, however, be bifurcated and stayed pending resolution of the patent infringement issues. An accompanying Order will be entered.

ORDER

This matter comes before the Court by way of Plaintiff Otsuka Pharmaceutical Co., Ltd.'s (hereinafter, "Otsuka") motion to dismiss Defendants Torrent Pharmaceuticals **[**31]** Limited, Inc.'s and Torrent Pharma Inc.'s (collectively, "Torrent") Counterclaims for unlawful monopolization in violation of the Sherman Act, *15 U.S.C. § 2*, and the Clayton Act, *15 U.S.C. §§ 15* and *26*, and for patent misuse [see Docket Item 43]; and the Court having considered the parties' submissions; and for the reasons explained in the Opinion of today's date; and for good cause shown;

IT IS this 22nd day of June, 2015, hereby

ORDERED that Otsuka's motion to dismiss [Docket Item 43] shall be, and hereby is, **DENIED** to the extent it requests the dismissal of Torrent's Fifth Counterclaim for antitrust violations, **GRANTED** to the extent it seeks the dismissal of Torrent's Sixth Counterclaim for patent misuse, and **GRANTED** to the extent it requests that the Fifth Counterclaim for antitrust violations be bifurcated and stayed; and it is further

ORDERED that Torrent's Fifth Counterclaim for antitrust violations shall be, and hereby is, **BIFURCATED** and **STAYED**, pending further Order of the Court; and it is further

ORDERED that Torrent's Sixth Counterclaim for patent misuse shall be, and hereby is, **DISMISSED WITHOUT PREJUDICE**, with leave to file a motion to amend to attempt to assert a counterclaim for patent misuse within **[**32]** **fourteen (14) days** of entry of this Order, consistent with the accompanying Opinion.

HN1[] **Clayton Act, Claims**

Section 7 of the Clayton Act prohibits mergers or acquisitions the effect of which may be substantially to lessen competition, or to tend to create a monopoly in any line of commerce or in any activity affecting commerce in any section of the country. 15 U.S.C.S. § 18. When the Federal Trade Commission (FTC) has reason to believe that a corporation is violating, or is about to violate, § 7 of the Clayton Act, it may seek a preliminary injunction under § 13(b) of the FTC Act to prevent a merger pending the FTC's administrative adjudication of the merger's legality. Section 13(b) provides for the grant of a preliminary injunction where such action would be in the public interest—as determined by a weighing of the equities and a consideration of the FTC's likelihood of success on the merits.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Mergers & Acquisitions Law > Antitrust > Remedies

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] Remedies, Injunctions

The Section 13(b) of the Federal Trade Commission Act standard for preliminary injunctions differs from the familiar equity standard applied in other contexts. Congress intended this standard to depart from what it regarded as the then-traditional equity standard, which it characterized as requiring the plaintiff to show: (1) irreparable damage, (2) probability of success on the merits and (3) a balance of equities favoring the plaintiff. Congress determined that the traditional standard was not appropriate for the implementation of a federal statute by an independent regulatory agency where the standards of the public interest measure the propriety and the need for injunctive relief.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Mergers & Acquisitions Law > Antitrust > Remedies

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN3[] Remedies, Injunctions

Under Section 13(b) of the Federal Trade Commission Act's "public interest" standard, the Federal Trade Commission is not required to establish that the proposed merger would in fact violate § 7 of the Clayton Act. Rather, to demonstrate the likelihood of success on the merits, the government need only show that there is a reasonable probability that the challenged transaction will substantially impair competition.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Remedies

HN4[] Remedies, Injunctions

A trial court evaluating a demand for injunctive relief must measure the probability that, after an administrative hearing on the merits, the Federal Trade Commission (FTC) will succeed in proving that the effect of the proposed merger may be substantially to lessen competition, or to tend to create a monopoly in violation of § 7 of the Clayton Act. The FTC satisfies this standard if it has raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals. This standard reflects Congress' use of the words "may be substantially to lessen competition" in § 7, as Congress' concern was with probabilities, not certainties of decreased competition.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Mergers & Acquisitions Law > Antitrust > Remedies

HN5[] **Remedies, Injunctions**

Though more relaxed than the traditional equity injunction standard, § 13(b) of the Federal Trade Commission Act's public interest standard nevertheless demands rigorous proof to block a proposed merger or acquisition. The issuance of a preliminary injunction prior to a full trial on the merits is an extraordinary and drastic remedy. That is because the issuance of a preliminary injunction blocking an acquisition or merger may prevent the transaction from ever being consummated. Given the stakes, the FTC's burden is not insubstantial. A showing of a fair or tenable chance of success on the merits will not suffice for injunctive relief.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Evidence > Burdens of Proof > Burden Shifting

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Evidence > Inferences & Presumptions > Presumptions

Mergers & Acquisitions Law > Antitrust > Remedies

HN6[] **Remedies, Injunctions**

Under the Baker Hughes framework, the Federal Trade Commission (FTC) bears the initial burden of showing that a merger would lead to undue concentration in the market for a particular product in a particular geographic area. Such a showing establishes a presumption that the merger will substantially lessen competition. The burden then shifts to the defendant to rebut the presumption by offering proof that the market-share statistics give an inaccurate account of the merger's probable effects on competition in the relevant market. The more compelling the prima facie case, the more evidence the defendant must present to rebut it successfully. A defendant can make the required showing by affirmatively showing why a given transaction is unlikely to substantially lessen competition, or by discrediting the data underlying the initial presumption in the government's favor. If the defendant successfully rebuts the presumption, the burden of producing additional evidence of anticompetitive effect shifts to the government, and merges with the ultimate burden of persuasion, which remains with the government at all times. A failure of proof in any respect will mean the transaction should not be enjoined. The court must also weigh the equities, but if the FTC is unable to demonstrate a likelihood of success, the equities alone cannot justify an injunction.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN7[] **Clayton Act, Claims**

Merger analysis starts with defining the relevant market. The relevant market has two component parts. First, the "relevant product market" identifies the product and services with which the defendants' products compete. Second, the "relevant geographic market" identifies the geographic area in which the defendant competes in marketing its products or service. Defining the relevant market is critical in an antitrust case because the legality of the proposed merger in question almost always depends upon the market power of the parties involved.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN8[] **Relevant Market, Product Market Definition**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Stated another way, a product market includes all goods that are reasonable substitutes, even though the products themselves are not entirely the same.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN9[] **Relevant Market, Product Market Definition**

In the context of defining a product market, whether goods are "reasonable substitutes" depends on two factors: functional interchangeability and cross-elasticity of demand. "Functional interchangeability" refers to whether buyers view similar products as substitutes. Whether there are other products available to consumers which are similar in character or use to the products in question may be termed functional interchangeability. If consumers can substitute the use of one for the other, then the products in question will be deemed "functionally interchangeable." Courts will generally include functionally interchangeable products in the same product market unless factors other than use indicate that they are not actually part of the same market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN10[] **Relevant Market, Product Market Definition**

In the context of defining a product market, as for cross-elasticity of demand, there the question turns in part on price. If an increase in the price for product A causes a substantial number of customers to switch to product B, the products compete in the same market. Price is not, however, the only variable in determining the cross-elasticity of demand between products. Cross-elasticity of demand also depends on the ease and speed with which customers can substitute the product and the desirability of doing so. Thus, substitution based on a reduction in price will not correlate to a high cross-elasticity of demand unless the switch can be accomplished without the consumer incurring undue expense or inconvenience.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN11[ ] **Relevant Market, Product Market Definition**

Three established principles maybe critical to defining the relevant product market in a case. The first is that the "product" that comprises the market need not be a discrete good for sale. There is no barrier to combining in a single market a number of different products or services where that combination reflects commercial realities.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN12[ ] **Relevant Market, Product Market Definition**

Three established principles maybe critical to defining the relevant product market in a case. In the second, the mere fact that a firm may be termed a competitor in the overall marketplace does not necessarily require that it be included in the relevant product market for antitrust purposes. That is because market definition hinges on whether consumers view the products as "reasonable substitutes." So, for example, fruit can be bought from both a grocery store and a fruit stand, but no one would reasonably assert that buying all of one's groceries from a fruit stand is a reasonable substitute for buying from a grocery store.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN13[ ] **Relevant Market, Product Market Definition**

Three established principles maybe critical to defining the relevant product market in a case. In the third, market definition is guided by the "narrowest market" principle. That is, a relevant market cannot meaningfully encompass an infinite range of products. The circle must be drawn narrowly to exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn. The analysis begins by examining the most narrowly-defined product or group of products sold by the merging firms to ascertain if the evidence and data support the conclusion that this product or group of products constitutes a relevant market. If not, the analysis shifts to the next broadest product grouping to test whether that is a relevant market. This process continues until a relevant market is identified.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN14[ ] **Relevant Market, Product Market Definition**

Courts look to two main types of evidence in defining the relevant product market: the "practical indicia" set forth by the U.S. Supreme Court and testimony from experts in the field of economics. The boundaries of a product market may be determined by examining such practical indicia as industry or public recognition, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. These indicia seem to be evidentiary proxies for direct proof of substitutability. Courts have relied on the Brown Shoe factors in a number of cases to define the relevant product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN15[] **Relevant Market, Product Market Definition**

The mere fact that a firm may be termed a competitor in the overall marketplace does not necessarily require that it be included in the relevant product market for antitrust purposes.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN16[] **Relevant Market, Product Market Definition**

One of the primary methods used by economists to determine a product market is called the "hypothetical monopolist test." This test asks whether a hypothetical monopolist who has control over a set of substitutable products could profitably raise prices on those products. If so, the products may comprise the relevant product market. The theory behind the test is straightforward. If enough consumers are able to substitute away from the hypothetical monopolist's product to another product and thereby make a price increase unprofitable, then the relevant market cannot include only the monopolist's product and must also include the substitute goods. On the other hand, if the hypothetical monopolist could profitably raise price by a small amount, even with the loss of some customers, then economists consider the monopolist's product to constitute the relevant market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN17[] **Relevant Market, Product Market Definition**

The hypothetical monopolist test requires that a hypothetical profit-maximizing firm, not subject to price regulation, that was the only present and future seller of those products likely would impose at least a small but significant and non-transitory increase in price (SSNIP) on at least one product in the market, including at least one product sold by one of the merging firms. The SSNIP is intended to represent a small but significant increase in the prices charged by firms in the candidate market and is typically assumed to be five percent of the price paid by customers for the products or services to which the merging firms contribute value.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN18[] **Relevant Market, Product Market Definition**

The purpose of an "aggregate diversion analysis" is to determine the amount of sales that a hypothetical monopolist of broadline distribution could lose before a price increase becomes unprofitable.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN19[] **Relevant Market, Product Market Definition**

Aggregate diversion analysis has three basic steps. The first is to determine the threshold aggregate diversion ratio, which is the percentage of customers that would need to stay within the broadline market to make a price increase profitable. This is strictly a mathematical step, with the aggregate diversion ratio a function of the subject product's gross margin. The gross margin is defined as the price of selling one additional product minus the cost of selling the additional product. The second step is to determine the actual aggregate diversion—that is, the actual percentage of customers of a single broadliner that would switch to another broadliner after a price increase. Since these lost sales are recaptured within the proposed market, they are not lost to the hypothetical monopolist. The final step is to compare the two: if the actual aggregate diversion is greater than the threshold ratio, then the hypothetical monopolist could profitably raise prices and the candidate market is the relevant product market. In other words, if the percentage of customers of a single broadliner who would switch to another broadliner in response to a price increase is greater than the percentage of customers needed to stay within the market to make a price increase profitable, then the relevant product market is properly defined as broadline distribution.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN20[] **Relevant Market, Product Market Definition**

Determination of the relevant market in the end is a matter of business reality—of how the market is perceived by those who strive for profit in it.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Evidence > ... > Testimony > Expert Witnesses > General Overview

Mergers & Acquisitions Law > Antitrust > Remedies

HN21[] **Remedies, Injunctions**

Although courts certainly must evaluate the evidence in § 13(b) of the Federal Trade Commission Act proceedings and may safely reject expert testimony they find unsupported, they trench on the Federal Trade Commission's role when they choose between plausible, well-supported expert studies.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Merger Guidelines

HN22[] **Relevant Market, Product Market Definition**

The U.S. Dep't of Justice & FTC, Horizontal Merger Guidelines (Merger Guidelines) are not binding, but courts have looked to them for guidance in merger cases. Section 4.1.4 of the Merger Guidelines provides that if a hypothetical monopolist could profitably target a subset of customers for price increases, the agencies may identify relevant markets defined around those targeted customers, to whom a hypothetical monopolist would profitably and separately impose at least a small but significant and non-transitory increase in price. Merger Guidelines § 4.1.4. Markets to serve targeted customers are also known as price discrimination markets. Successful price discrimination means that the disfavored geographic or product class is insulated from the favored class and, if the discrimination is of sufficient magnitude, should be counted as a separate relevant market. The concern underlying price discrimination markets is that certain types of captured or dedicated customers could be targeted for monopolist pricing even if a price increase for all customers would not be profitable. Merger Guidelines § 3.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN23[] **Relevant Market, Product Market Definition**

When determining the relevant product market, courts often pay close attention to the defendants' ordinary course of business documents.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN24[] **Relevant Market, Product Market Definition**

Centralized station security services operated on a national level is a relevant product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Merger Guidelines

HN25[] **Relevant Market, Product Market Definition**

As the U.S. Dep't of Justice & FTC, Horizontal Merger Guidelines (Merger Guidelines) state, markets for targeted customers may exist when prices are individually negotiated and suppliers have information about customers that would allow a hypothetical monopolist to identify customers that are likely to pay a higher price for the relevant product. Merger Guidelines § 4.1.4.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Mergers & Acquisitions Law > Antitrust > Market Definition

HN26[] Relevant Market, Geographic Market Definition

The U.S. Supreme Court has stated that, for § 7 of the Clayton Act, the relevant geographic market is the area in which the goods or services at issue are marketed to a significant degree by the acquired firm. Stated differently, the proper question to be asked is where, within the area of competitive overlap, the effect of the merger on competition will be direct and immediate. Like the product market, the geographic market must correspond to the commercial realities of the industry and be economically significant. The U.S. Supreme Court has recognized that an element of fuzziness would seem inherent in any attempt to delineate the relevant geographical market, and therefore such markets need not—indeed cannot—be defined with scientific precision. That said, the relevant geographic market must be sufficiently defined so that the court understands in which part of the country competition is threatened.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Evidence > Inferences & Presumptions > Presumptions

Mergers & Acquisitions Law > Antitrust > Remedies

HN27[] Remedies, Injunctions

The government must show that a merger would produce a firm controlling an undue percentage share of the relevant market, and would result in a significant increase in the concentration of firms in that market. Such a showing establishes a presumption that the merger will substantially lessen competition. The Federal Trade Commission (FTC) can establish its prima facie case by showing that the merger will result in an increase in market concentration above certain levels. Market concentration is a function of the number of firms in a market and their respective market shares.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Mergers & Acquisitions Law > Antitrust > Remedies

Mergers & Acquisitions Law > Merger Guidelines

HN28[] Remedies, Injunctions

A common tool used to measure changes in market concentration is the Herfindahl-Hirschmann Index (HHI). U.S. Dep't of Justice & FTC, Horizontal Merger Guidelines (Merger Guidelines) § 5.3. Hal figures are calculated by summing the squares of the individual firms' market shares, a calculation that gives proportionately greater weight to the larger market shares. Merger Guidelines § 5.3. Sufficiently large ME figures establish the Federal Trade Commission's prima facie case that a merger is anti-competitive. The Merger Guidelines, which provide a useful illustration of the application of BM, state that a market with an HHI above 2,500 is considered "highly concentrated"; a market with an HHI between 1,500 and 2,500 is considered "moderately concentrated"; and a market with an HHI below 1,500 is considered "unconcentrated," Merger Guidelines § 5.3. Furthermore, a merger that results in highly concentrated markets that involve an increase in the HHI of more than 200 points will be presumed to be likely to enhance market power. Merger Guidelines § 5.3. An increase in HHI by 510 points creates, by a wide margin, a presumption that the merger will lessen competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > Antitrust > Market Definition

HN29[ ] **Market Definition, Relevant Market**

A reliable, reasonable, close approximation of relevant market share data is sufficient.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Mergers & Acquisitions Law > Antitrust > Remedies

HN30[ ] **Remedies, Injunctions**

Courts have recognized that a merger that eliminates head-to-head competition between close competitors can result in a substantial lessening of competition. In such circumstances, a merger is likely to have unilateral anticompetitive effect if the acquiring firm will have the incentive to raise prices or reduce quality after the acquisition, independent of competitive responses from other firms. Unilateral anticompetitive effects can arise in a host of different settings. On the other hand, even if the merging parties had large market shares, if they were not particularly close competitors, then the market shares might overstate the extent to which the merger would harm competition. The merging parties need not be the top two firms to cause unilateral effects.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Mergers & Acquisitions Law > Antitrust > Remedies

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

HN31[ ] **Remedies, Injunctions**

Where the Federal Trade Commission (FTC) has established a presumption that a proposed merger will substantially lessen competition, defendants may rebut that presumption by showing that the traditional economic theories of the competitive effects of market concentration are not an accurate indicator of the merger's probable effect on competition or that the procompetitive effects of the merger are likely to outweigh any potential anticompetitive effects. The more compelling the FTC's prima facie case, the more evidence the defendant must present to rebut the presumption successfully. A defendant can make the required showing by affirmatively showing why a given transaction is unlikely to substantially lessen competition, or by discrediting the data underlying the initial presumption in the government's favor.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > General Overview

HN32[ ] **Clayton Act, Remedies**

Aside from the U.S. Supreme Court's guidance that the relief in an antitrust case must be effective to redress the violations and to restore competition, there is a lack of clear precedent providing an analytical framework for addressing the effectiveness of a divestiture that has been proposed to remedy an otherwise anticompetitive merger.

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > General Overview

HN33[] **Clayton Act, Remedies**

The 2004 U.S. Department of Justice's Policy Guide to Merger Remedies provides that restoring competition requires replacing the competitive intensity lost as a result of the merger rather than focusing narrowly on returning to premerger HHI levels. Antitrust Div., U.S. Dep't of Justice, Antitrust Division Policy Guide to Merger Remedies 5 (Oct. 2004) (2004 Policy Guide). A more recent U.S. Department of Justice Policy Guide provides: The touchstone principle for the Division in analyzing remedies is that a successful merger remedy must effectively preserve competition in the relevant market. Antitrust Div., U.S. Dep't of Justice, Antitrust Division Policy Guide to Merger Remedies 1 (June 2011) (2011 Policy Guide). Both the 2004 Policy Guide and the 2011 Policy Guide add that an effective divestiture should address: Whatever obstacles (for example, lack of a distribution system or necessary know-how) lead to the conclusion that a competitor, absent the divestiture, would not be able to discipline a merger-generated increase in market power. That is, the divestiture assets must be substantial enough to enable the purchaser to maintain the premerger level of competition, and should be sufficiently comprehensive that the purchaser will use them in the relevant market and be unlikely to liquidate or redeploy them. 2004 Policy Guide at 9; 2011 Policy Guide at 8.

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > General Overview

HN34[] **Clayton Act, Remedies**

In order to be accepted, curative divestitures must be made to a willing, independent competitor capable of effective production. It can be a "problem" to allow continuing relationships between the seller and buyer of divested assets after divestiture, such as a supply arrangement or technical assistance requirement, which may increase the buyer's vulnerability to the seller's behavior.

HN35[] Clayton Act, Remedies

If a court finds that there exists ease of entry into the relevant product market, that finding can be sufficient to offset the government's prima facie case of anti-competitiveness. The prospect of entry into the relevant market will alleviate concerns about adverse competitive effects only if such entry will deter or counteract any competitive effects of concern so the merger will not substantially harm customers. U.S. Dep't of Justice & FTC, Horizontal Merger Guidelines § 9. Ease of entry must be timely, likely, and sufficient in its magnitude, character, and scope to deter or counteract the competitive effects of concern.

HN36[] Clayton Act, Defenses

Although the U.S. Supreme Court has never recognized the "efficiencies" defense in a § 7 of the Clayton Act case, the D.C. Court of Appeals as well as the U.S. Dep't of Justice & FTC, Horizontal Merger Guidelines recognize that, in some instances, efficiencies resulting from the merger may be considered in rebutting the government's prima facie case. Where the court finds high market concentration levels, defendants must present proof of extraordinary efficiencies to rebut the government's prima facie case. Even if evidence of efficiencies alone is insufficient to rebut the government's prima facie case, such evidence may nevertheless be relevant to the competitive effects analysis of the market required to determine whether the proposed transaction will substantially lessen competition.

Antitrust & Trade Law > Clayton Act > Defenses

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Evidence > Burdens of Proof > Allocation

HN37[] Clayton Act, Defenses

In the context of an "efficiencies" defense in a § 7 of the Clayton Act case, the court must undertake a rigorous analysis of the kinds of efficiencies being urged by the parties in order to ensure that those efficiencies represent more than mere speculation and promises about post-merger behavior. Specifically, the court must determine whether the efficiencies are "merger specific"—meaning they represent a type of cost saving that could not be achieved without the merger—and "verifiable"—meaning the estimate of the predicted saving must be reasonably verifiable by an independent party. Defendants bear the burden of demonstrating that their claimed efficiencies are merger specific, which requires demonstrating that the efficiencies cannot be achieved by either company alone. And, defendants must also demonstrate that their claimed efficiencies would benefit customers.

Antitrust & Trade Law > Clayton Act > Defenses

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN38[] Clayton Act, Defenses

The critical question raised by the efficiencies defense in a § 7 of the Clayton Act case is whether the projected savings from the merger are enough to overcome the evidence showing that possibly greater benefits can be achieved by the public through existing, continued competition.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Mergers & Acquisitions Law > Antitrust > Remedies

HN39[] **Remedies, Injunctions**

Section 13(b) of the Federal Trade Commission Act's "public interest" standard requires the court to weigh the public and private equities of enjoining the merge.

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Mergers & Acquisitions Law > Antitrust > Remedies

HN40[] **Remedies, Injunctions**

Section 13(b) of the Federal Trade Commission Act embodies Congressional recognition of the fact that divestiture is an inadequate and unsatisfactory remedy in a merger case.

TABLE OF CONTENTS

[*14] INTRODUCTION

Americans eat outside of their homes with incredible frequency. The U.S. Department of Commerce, for instance, recently reported, for the first time since it began tracking such data, that Americans spent more money per month at restaurants and bars than in grocery stores.[1] Of course, Americans eat out at many other places, too—sports arenas, school and workplace cafeterias, hotels and resorts, hospitals, and nursing homes, just to name a few. The foodservice distribution industry supplies food and related products to all of these locations. Foodservice distribution is big business. In 2013, the market grew to $231 billion. By some estimates, there are over 16,000 companies that compete in the foodservice distribution marketplace.

[*15] The two largest foodservice distribution companies in the country are Defendants Sysco Corporation ("Sysco") and US Foods, Inc. ("USF"). Both are primarily "broadline" foodservice distributors. As the name implies, a broadline foodservice distributor sells and delivers a "broad" array of food and related products to just about anywhere food is consumed outside the home. In 2013, Sysco's broadline sales were over $[TEXT REDACTED BY THE COURT] a billion and USF's were over $[TEXT REDACTED BY THE COURT] a billion.

In December 2013, Sysco and USF announced that they had entered into an agreement to merge the companies. Fourteen months later, in February 2015, Sysco and USF announced that they intended to divest 11 USF distribution facilities to the third largest broadline foodservice distributor, Performance Food Group, Inc., if the merger received regulatory approval.

On February 20, 2015, the Federal Trade Commission ("FTC") and a group of states filed suit in this court seeking an injunction to prevent the proposed merger. Specifically, under *Section 13(b) of the Federal Trade Commission Act*, the FTC asked this court to halt the proposed **[**7]** merger until the FTC completes an administrative hearing—scheduled to begin on July 21, 2015—to determine whether the proposed combination would violate *Section 7 of the Clayton Act.*

The precise question presented by this case is whether the court should enjoin Sysco and USF from merging until the proposed combination is reviewed by an FTC Administrative Law Judge. The real-world impact of the case, however, is more consequential. Sysco and USF have announced that they will not proceed with the merger if the court grants the requested injunction.

The proceedings in this case have been extraordinary. The FTC investigated the proposed merger for more than a year before filing suit. Then, within a two-month period, the parties worked tirelessly to exchange millions of

[1] Michelle Jamrisko, *Americans' Spending on Dining Out Just Overtook Grocery Sales for the **[**6]** First Time Ever*, Bloomberg Business (Apr. 14, 2015), *http://www.btoomberg.com/news/articles/2015-04-14/americans-spending-on-dining-out* just-overtook-grocery-sales-for-the-first-time-ever .

documents, depose dozens of witnesses, and secure over a hundred declarations. The court heard live testimony for eight days in early May 2015. Counsel for the parties have done all of this work while exhibiting the highest degree of skill and professionalism.

Congress passed the Clayton Act to enable the federal government to halt mergers in their incipiency that likely would result in high market concentrations. Congress was especially **[**8]** concerned with large combinations that would impact everyday consumers across the country. The court has considered all of the evidence in this case and has reached the following conclusion: The proposed merger of the country's first and second largest broadline foodservice distributors is likely to cause the type of industry concentration that Congress sought to curb at the outset before it harmed competition. The court finds that the FTC has met its burden under *Section 13(b) of the Federal Trade Commission Act* of showing that the requested injunction is in the public interest. The court, therefore, grants the FTC's motion for preliminary injunctive relief.

BACKGROUND

I. THE FOODSERVICE DISTRIBUTION INDUSTRY

A. Overview

Defendants operate in a $231 billion foodservice distribution industry, where over 16,000 companies battle daily to sell food and related products to restaurants, resorts, hotels, hospitals, schools, company cafeterias, and so on—everywhere food is served outside the home. Hr'g Tr. 1324; DX-00329 at 17. The types of customers served by the foodservice distribution industry come in all shapes and sizes. They **[*16]** range from independent restaurants, to well-known quick-service and casual **[**9]** dining chains (*e.g.*, Five Guys, Subway, and Applebee's), to hospitality procurement companies and hotel chains (*e.g.*, Avendra, Hilton Supply Management, and Starwood Hotels and Resorts), to government agencies (*e.g.*, the U.S. Department of Veterans Affairs), to foodservice management companies (*e.g.*, Aramark, Sodexo, and Compass Group), to healthcare group purchasing organizations (*e.g.*, Premier, Novation, and Navigator).

The industry recognizes four general categories of foodservice distribution companies: (i) broadline distributors, (ii) systems distributors, (iii) specialty distributors, and (iv) cash-and-carry and club stores. Customers commonly purchase from foodservice distributors in one or more of these different categories, or "channels," mixing and matching to suit their needs. For example, customers may purchase products directly from a broadline distributor; they may contract with a brand-named food manufacturer (*e.g.*, Tyson Foods for chicken or Kellogg's for cereal) and use a broadline or systems distributor for warehousing and delivery; they may use specialty distributors for select items such as produce or seafood; or they may make their purchases at a cash-and-carry **[**10]** or club store (*e.g.*, Restaurant Depot or Costco).

Understanding these different channels of distribution and the different customers they serve is central to the antitrust analysis that this case demands. The court, therefore, describes below the sellers and buyers of foodservice distribution in the United States.

B. Channels of Foodservice Distribution

1. Broadline Distributors

Broadline distribution is characterized by several key features, including: (i) product breadth and depth; (ii) availability of private-label products; (iii) frequent and flexible delivery, including next-day service; and (iv) "value-added" services, such as menu and nutrition planning.

Broadline distributors offer thousands of distinct items for sale—known as "stock keeping units" ("SKUs") for inventory management purposes—in a wide array of product categories, including canned and dry goods, dairy, meat, poultry, produce, seafood, frozen foods, beverages, and even janitorial supplies such as chemicals, cleaning equipment, and paper goods. Broadliners also sell "private label" goods, which are akin to "Trader Joe's" or "Safeway" brand products found in those grocery stores. "Private label" products are often comparable **[**11]** in quality to their name-brand counterparts, but are cheaper in price. Because they are able to offer such a diverse array of products, broadline distributors market themselves to customers as a "one-stop shop," by virtue of their ability to supply most—if not all—food and related products needed by their customers. Customers value the breadth of product offerings and the opportunity to aggregate a substantial portion of their purchases with one distributor, allowing them to save costs. They also appreciate broadliners' high level of customer service, which usually includes next-day and emergency deliveries. Focusing heavily on individualized customer service, broadline distributors employ much larger salesforces than the other channels.

Broadline distributors come in different sizes. The largest, by any measure, are Sysco and USF. In 2013, Sysco and USF made $[TEXT REDACTED BY THE COURT] billion and $[TEXT REDACTED BY THE COURT] billion in broadline sales, respectively. PX09350-236, Table 44. The next largest broadliner made less than $6 billion. *Id.* **[*17]** Sysco and USF are also the only two broadliners with true nationwide service capability. Sysco and USF have 72 and 61 distribution centers, **[**12]** respectively—each with more than twice the number of distribution centers operated by the next-largest broadliners. Because of their nationwide footprint, Sysco and USF are often referred to as "national" broadliners. Combined, Defendants employ over 14,000 sales representatives. No other broadliner employs more than 1,600. Defendants together operate over 13,000 trucks. The next largest broadliners have just over 1,600.

The next tier of companies are "regional broadliners," so called because their distribution capabilities are concentrated in discrete regions of the United States. The largest regional broadliner, Performance Food Group ("PFG"), is the country's third-largest broadliner in terms of sales. PFG operates 24 broadline distribution facilities, mainly in the eastern and southern parts of the country and, in 2013, earned $6 billion in broadline revenue. The next five largest regional broadline distributors, in order of 2013 revenues, are: (i) Gordon Food Service, which has 10 distribution centers mainly in the Midwest, Florida, and Texas; (ii) Reinhart Foodservice, which has 24 distribution centers, primarily in the East and Midwest; (iii) Ben E. Keith Company, which has seven **[**13]** distribution centers in Texas and bordering states; (iv) Food Services of America, which has 10 distribution centers, concentrated in the Northwest; and (v) Shamrock Foods, which has four distribution centers in the Southwest and southern California. These regional broadliners had 2013 revenues ranging from approximately $[TEXT REDACTED BY THE COURT] billion to $[TEXT REDACTED BY THE COURT] billion.

The last tier of broadliners have five or fewer distribution centers and 2013 revenues of less than $1.1 billion. Many of these operate in a single locality or region, like Shetakis Wholesalers, which has one distribution center in Las Vegas, Nevada.

Regional broadline distributors have formed consortiums to compete for customers with multi-regional distribution needs. The largest consortium is Distribution Market Advantage ("DMA"). DMA is a supply chain sales and marketing cooperative owned by nine independent regional distributors, which are also its members, including Gordon Food Service, Ben E. Keith, and Reinhart Foodservice. DMA does not own any trucks or distribution facilities; rather, its purpose is to coordinate the bidding, contracting, and operational processes of its members **[**14]** to meet the needs of large customers that require a distributor with extensive geographic coverage. Another consortium is Multi-Unit Group ("MUG"), an alliance of 19 broadline distributors who are part of UniPro Foodservice, a larger consortium that includes distributors in different channels. As explained later, these regional consortia have had mixed results in competing for large, geographically dispersed customers.

2. Systems Distributors

Systems distributors, also referred to as "custom" or "customized" distributors, primarily serve fast food, quick service, fast casual, and casual chain restaurants (*e.g.*, Burger King, Wendy's, and Applebee's), which have fixed or limited menus. Unlike broadliners, systems distributors do not carry a large, diverse number of SKUs. Rather, their inventory profile is a small number of proprietary SKUs, which are manufactured specifically for the customer. For instance, the systems distributor for Wendy's carries and delivers the food products needed for Wendy's' menu and does not make those products available to others. As a result, systems distributors typically provide only warehousing and **[*18]** transport services. They do not offer private label products **[**15]** or value-added services such as menu planning, and they have very small salesforces, if any. Systems distributors make large, limited-SKU deliveries on a fixed, limited schedule, and typically do not offer next-day or emergency deliveries.

Some foodservice distribution companies operate both systems and broadline divisions. For instance, Sysco operates SYGMA, a systems distribution division. SYGMA is run by a different set of executives and, for the most part, operated out of separate distribution centers. PFG offers systems distribution through PFG Customized, which is run separately from its broadline division.

3. Specialty Distributors

Specialty distributors offer a limited and focused grouping of products within one or more product categories—typically fresh produce, meat, seafood, dairy or baked goods. Other specialty distributors focus on a specific type of cuisine, such as Italian fare. Many customers, especially independent restaurants, use specialty distributors to supplement their purchases from broadline distributors because the specialty distributor offers higher quality or fresher products than the broadline distributor or provides unique products that the broadline distributor **[**16]** does not carry, such as products from local farmers. Both in terms of number of SKUs and geographic coverage, specialty distributors are typically smaller than broadline distributors.

To compete with specialty distributors, some broadliners operate specialty divisions. Sysco, for instance, operates several specialty divisions separately from its broadline division. So, too, does PFG, which operates Roma, a specialty division for Italian food products.

4. Cash-and-Carry and Club Stores

Cash-and-carry stores offer a "self-service" model of food distribution, in which customers make purchases at the store and transport the purchased goods themselves. Club stores like Costco and Sam's Club also fall within this distribution channel. With limited exceptions, cash-and-carry stores do not deliver. They also offer fewer products than broadline distributors. For example, the largest cash-and-carry store, Restaurant Depot, only carries up to [TEXT REDACTED BY THE COURT] SKUs. Additionally, cash-and-carry stores do not have sales personnel dedicated to individual customers. Because of these features, the prices offered by cash-and-carry stores are significantly lower than those offered by broadliners. **[**17]** The typical cash-and-carry customer is an independent restaurant that either does not meet broadline distributors' minimum purchase requirements or needs to supplement its broadline deliveries.

C. Foodservice Distribution Customers

Foodservice distribution customers are a heterogeneous group. The largest customers, such as group purchasing organizations and foodservice management companies, buy hundreds of millions of dollars of product a year, whereas a single independent restaurant buys a small fraction of that amount. Some customers choose to buy from a single line of distribution; others mix distribution channels. Some customers demand fixed pricing, whereas others buy based on daily market rates. Generally speaking, however, customers can be grouped into several categories.

1. Group Purchasing Organizations

Group purchasing organizations, or GPOs, are entities that, through the collective buying power of their members, obtain lower prices for foodservice products. **[*19]** GPOs negotiate direct contracts with food manufacturers and thereby secure lower prices than a member could individually.

GPOs do not have their own distribution capabilities. Rather, they contract with broadline distributors **[**18]** for warehousing, delivery, and operational services. When a member purchases a GPO-contracted good, the member pays the broadliner on a "cost-plus" basis: it pays for the "cost" of the product based on the GPO's contract with the manufacturer, "plus" the distributor's markup, which is negotiated between the GPO and distributor. GPOs also contract with broadliners to allow their members to purchase products from broadline distributors (rather than from manufacturers), in which case they pay the broadline distributor both the distribution margin (markup) and the cost for the product set by the distributor. GPO members also buy from specialty distributors.

GPOs are prominent in the healthcare and hospitality industries. The largest healthcare GPOs include Premier, Novation, and Navigator. One of the largest hospitality GPOs is Avendra. These companies annually spend hundreds of millions of dollars on broadline distribution.

2. Foodservice Management Companies

Foodservice management companies operate cafeterias or other dining facilities at educational institutions, sports venues, and workplaces. Like GPOs, foodservice management companies negotiate contracts with food manufacturers and rely **[**19]** on broadliners for storage and delivery; they also purchase directly from broadliners and specialty distributors. Sodexo, Compass Group, and Aramark are among the country's largest foodservice management companies. Those three companies each spend approximately $[TEXT REDACTED BY THE COURT] billion annually on broadline distribution.

3. Hospitality Chains

Hospitality chains are also large purchasers. Hilton Hotels, for example, uses a system similar to a GPO. It has a subsidiary, Hilton Supply Management LLC, which negotiates contracts on behalf of over 4,000 members to obtain food and related items at a discounted price. Other hospitality companies, such as Hyatt Hotels, purchase most of their foodservice products through Avendra, the largest hospitality GPO. Starwood Hotels and Interstate Hotels & Resorts, on the other hand, directly manage food procurement and distribution contracts for their properties. Regardless of the food purchasing model, hospitality chains also buy food directly from broadliners and rely on them for their storage and delivery needs. These companies spend hundreds of millions of dollars annually on broadline distribution. Individual hotels and resorts also buy **[**20]** directly from specialty distributors, as needed.

4. Restaurant Chains

Restaurant chains come in many sizes with a wide variety of characteristics. This customer category includes nationwide fast food or quick service restaurants such as Burger King and Subway, each with thousands of locations in all regions of the country. It also includes regional fast casual restaurant chains such as Culver's (primarily in the Midwest) and Zaxby's (primarily in the Southeast), as well as nationwide sit-down restaurant chains, such as Applebee's and Cheesecake Factory. The channel of distribution a chain restaurant uses depends, in part, on the number of locations and menu variety. The greater the number of locations and the fewer the menu items, the more amenable the chain restaurant is to systems distribution.

[*20] *5. Government Agencies*

Some government agencies, notably the Defense Logistics Agency and the U.S. Department of Veterans Affairs, are large buyers of broadline distribution services. Those agencies, for instance, spend hundreds of millions of dollars each year on broadline foodservice.

6. "Street" Customers

Customers with only one location, or a handful of locations, are referred to in the industry **[**21]** as "street," "local," or "independent" customers. Examples of this type of customer include independent restaurants and resorts. Unlike the types of customers identified above, street customers usually do not have written contracts with broadliners; instead, they negotiate prices on a weekly or other short term basis. They also tend to diversify their purchases among multiple distribution channels. Indeed, according to a study conducted by an industry trade group, the International Foodservice Distributors Association, the typical independent customer uses up to twelve different supply sources. DX-00293 at 29.

II. CASE HISTORY

A. Sysco and USF

Defendant Sysco is a publicly-traded corporation headquartered in Houston, Texas. As the largest North American foodservice distributor, Sysco distributes food to approximately 425,000 customers in the United States, generating sales of about $46.5 billion in fiscal year 2014. Compl. for TRO and Prelim. Inj. Pursuant to *Section 13(b) of the FTC Act*, ECF No. 3 at ¶ 24 [hereinafter Compl.]. Sysco's business is divided into three divisions: (i) Broadline (81 percent of revenue); (ii) SYGMA, which provides systems distribution (13 percent of revenue); and (iii) "Other," which provides, among other things, **[**22]** specialty produce distribution (6 percent of revenue). *Id.* ¶ 25. Sysco's broadline division operates out of 72 distribution centers located across the United States. *Id.*

Defendant US Foods, Inc., is a privately-held corporation based in Rosemont, Illinois, and is a wholly owned subsidiary of Defendant USF Holding Corp. USF is controlled by the investment funds of Clayton, Dubilier & Rice, Inc., and KKR & Co., L.P. The second-largest foodservice distributor in the United States, USF operates 61 broadline distribution centers across the country and serves over 200,000 customers nationwide. *Id.* ¶ 27. In fiscal year 2013, USF generated approximately $22 billion in revenue. *Id.*

B. History of the Merger

On December 8, 2013, Sysco and USF signed a definitive merger agreement, whereby Sysco agreed to acquire all shares of USF for $500 million in cash and $3 billion in newly issued Sysco equity. Sysco also agreed to assume $4.7 billion in USF's existing debt, for a total transaction value of $8.2 billion. The merger agreement expires on September 8, 2015.

After announcing the merger, Defendants filed a notification regarding the merger as required by the Hart-Scott-Rodino Antitrust Improvements **[**23]** Act, *15 U.S.C. § 18a*. As a result of this filing, the FTC commenced an investigation to determine the effects of the proposed combination. The FTC is an administrative agency of the United States federal government that derives its authority from the Federal Trade Commission Act ("FTC Act"), *15 U.S.C. §§ 41 et seq.* Among other duties, the FTC is vested with authority and responsibility for enforcing Section 7 of the Clayton Act, *15 U.S.C. § 18*, and Section 5 of the FTC Act, *15 U.S.C. § 45*.

[*21] During the FTC's investigation, and with the hope of gaining regulatory approval, on February 2, 2015, Sysco and USF announced an asset purchase agreement with regional broadline distributor Performance Food Group, Inc. ("PFG"), to sell 11 of USF's 61 distribution centers to PFG, contingent upon the successful completion of the merger. The 11 USF distribution centers—intended to increase PFG's geographic footprint—are, for the most part, located within the western half of the country, where PFG at present has only one distribution center. Currently, the 11 distribution centers account for approximately $4.5 billion in broadline sales. PX09250-011. The parties also executed a Transition Services Agreement. Under the two agreements, PFG would acquire all assets and employees at the **[**24]** 11 distribution centers, all customers under those contracts (assuming the customers consent), and the right to use USF private label products at those facilities for up to three years.

C. History of these Proceedings

On February 19, 2015, the Commissioners of the FTC voted 3-2 to authorize the filing of an administrative complaint in the FTC's Article I court to block the proposed merger, based on a finding that there was reason to believe that the merger would violate Section 7 of the Clayton Act, *15 U.S.C. § 18*, and Section 5 of the FTC Act, *15 U.S.C. § 45*. Trial before an Administrative Law Judge is scheduled to begin on July 21, 2015.

Also, on February 19, 2015, the Commission authorized the FTC staff to seek a preliminary injunction in federal court under S*ection 13(b) of the FTC Act* in order to prevent Defendants from completing the merger. The FTC filed this action on February 20, 2015, seeking a temporary restraining order ("TRO") and preliminary injunction to maintain the status quo until the conclusion of the administrative trial. The FTC is joined in this action by the District of Columbia and the following states: California, Illinois, Iowa, Maryland, Minnesota, Nebraska, North Carolina, Ohio, Tennessee, Pennsylvania, and Virginia (collectively, the "Plaintiff **[**25]** States"). By and through their respective Attorneys General, the Plaintiff States have joined with the FTC in this action pursuant to Section 16 of the Clayton Act, *15 U.S.C. § 26*, in their sovereign or quasi-sovereign capacities as *parens patriae* on behalf of the citizens, general welfare, and economy of each of their states.

On February 24, 2015, Defendants stipulated to a TRO, agreeing not to merge until three calendar days after this court rules on the FTC's Motion for Preliminary Injunction. The court entered the stipulated TRO on February 27, 2015. Defendants have since represented that they will abandon the transaction if this court grants the preliminary injunction.

On March 4, 2015, the court scheduled a preliminary injunction hearing to start on May 5, 2015. The parties' counsel accomplished an extraordinary amount of work in the two months leading up to the evidentiary hearing. They exchanged approximately 14.8 million documents and took 72 depositions. Moreover, in addition to the more than 90 industry participant declarations that accompanied the FTC's motion for preliminary injunction, Defendants obtained 65 new declarations or counter declarations, while the FTC obtained an additional 25 new **[**26]** or counter declarations. During the eight-day evidentiary hearing, the court heard testimony from 20 witnesses, either live or via video deposition. The parties submitted a total of 185 declarations into evidence, as well as over 3,500 exhibits and excerpts of **[*22]** over 70 depositions. The court heard closing arguments on May 28, 2015.

LEGAL STANDARD

I. SECTION 7 OF THE CLAYTON ACT

HN1[] Section 7 of the Clayton Act prohibits mergers or acquisitions "the effect of [which] may be substantially to lessen competition, or to tend to create a monopoly" in "any line of commerce or in any activity affecting commerce in any section of the country." *15 U.S.C. § 18*. When the FTC has "reason to believe that a corporation is violating, or is about to violate, Section 7 of the Clayton Act," it may seek a preliminary injunction under *Section 13(b) of the FTC Act* to "prevent a merger pending the Commission's administrative adjudication of the merger's legality." *FTC v. Staples, Inc., 970 F. Supp. 1066, 1070 (D.D.C. 1997)* (citing *15 U.S.C. § 53(b)*). "Section 13(b) provides for the grant of a preliminary injunction where such action would be in the public interest—as determined by a weighing of the equities and a consideration of the Commission's likelihood of success on the merits." *FTC v. H.J. Heinz Co., 246 F.3d 708, 714, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)* (citing *15 U.S.C. § 53(b)*).

II. SECTION 13(B) STANDARD FOR PRELIMINARY INJUNCTIONS

HN2[] The Section 13(b) standard for preliminary injunctions differs from the familiar equity standard applied **[**27]** in other contexts. As the Court of Appeals explained in *Heinz*: "Congress intended this standard to depart from what it regarded as the then-traditional equity standard, which it characterized as requiring the plaintiff to show: (1) irreparable damage, (2) probability of success on the merits and (3) a balance of equities favoring the plaintiff." 246 F.3d at 714 (internal citation omitted). The court continued: "Congress determined that the traditional standard was not 'appropriate for the implementation of a Federal statute by an independent regulatory agency where the standards of the public interest measure the propriety and the need for injunctive relief.' *Id.* (quoting H.R. Rep. No. 93-624 at 31 (1971)); *see also* FTC v. Exxon Corp., 636 F.2d 1336, 1343, 205 U.S. App. D.C. 208 (D.C. Cir. 1980) ("In enacting [Section 13(b)], Congress further demonstrated its concern that injunctive relief be broadly available to the FTC by incorporating a unique 'public interest' standard in 15 U.S.C. [§] 53(b), rather than the more stringent, traditional 'equity' standard for injunctive relief ").

HN3[] Under Section 13(b)'s "public interest" standard, "[t]he FTC is not required to *establish* that the proposed merger would in fact violate section 7 of the Clayton Act." Heinz, 246 F.3d at 714. Rather, to demonstrate the likelihood of success on the merits, "the government need only **[**28]** show that there is a reasonable probability that the challenged transaction will substantially impair competition." Staples, 970 F. Supp. at 1072 (citation omitted) (internal quotation marks omitted).

HN4[] A trial court evaluating a demand for injunctive relief therefore must "measure the probability that, after an administrative hearing on the merits, the Commission will succeed in proving that the effect of the [proposed] merger 'may be substantially to lessen competition, or to tend to create a monopoly' in violation of section 7 of the Clayton Act.'" Heinz, 246 F.3d at 714 (quoting 15 U.S.C. § 18). The FTC satisfies this standard if it "has raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals." Id. at 714-15 **[*23]** (citations omitted) (internal quotation marks omitted). This standard reflects Congress' use of the words "*may* be substantially to lessen competition" in Section 7, as Congress' concern "was with probabilities, not certainties" of decreased competition. Id. at 713 (citing Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)) (other citations omitted).

HN5[] Though more relaxed than the traditional equity injunction standard, Section 13(b)'s public interest standard **[**29]** nevertheless demands rigorous proof to block a proposed merger or acquisition. "[T]he issuance of a preliminary injunction prior to a full trial on the merits is an extraordinary and drastic remedy." Exxon, 636 F.2d at 1343 (citations omitted) (internal quotation marks omitted). That is because "the issuance of a preliminary injunction blocking an acquisition or merger may prevent the transaction from ever being consummated." *Id.* "Given the stakes, the FTC's burden is not insubstantial . . . ." FTC v. Arch Coal, 329 F. Supp. 2d 109, 123 (D.D.C. 2004), *case dismissed*, No. 04-5291, 2004 U.S. App. LEXIS 19405, 2004 WL 2066879 (D.C. Cir. Sept. 15, 2004). "[A] showing of a fair or tenable chance of success on the merits will not suffice for injunctive relief." *Id.* (citation omitted) (internal quotation marks omitted).

III. *BAKER HUGHES* BURDEN-SHIFTING FRAMEWORK

In United States v. Baker Hughes, Inc., 908 F.2d 981, 982-83, 285 U.S. App. D.C. 222 (D.C. Cir. 1990), the Court of Appeals established a burden-shifting framework for evaluating the FTC's likelihood of success on the merits. *See* Heinz, 246 F.3d at 715 (applying *Baker Hughes* "to the preliminary injunctive relief stage"). HN6[] Under the *Baker Hughes* framework, the FTC bears the initial burden of showing that the merger would lead to "undue concentration in the market for a particular product in a particular geographic area." Baker Hughes, 908 F.2d at 982; *see also* Heinz, 246 F.3d at 715 (quoting United States v. Phila. Nat'l Bank, 374 U.S. 321, 363, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)) ("[T]he government must show that the merger would produce 'a firm controlling **[**30]** an undue percentage share of the relevant market, and [would] result[ ] in a significant increase in the concentration of firms in that market."). Such a showing establishes a "presumption" that the merger will substantially lessen competition. Baker Hughes, 908 F.2d at 982.

The burden then shifts to the defendant to rebut the presumption by offering proof that "the market-share statistics [give] an inaccurate account of the [merger's] probable effects on competition in the relevant market." Heinz, 246 F.3d at 715 (quoting United States v. Citizens & S. Nat'l Bank, 422 U.S. 86, 120, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975)) (internal quotation marks omitted); *see also* Baker Hughes, 908 F.2d at 991 ("[A] defendant seeking to rebut a presumption of anticompetitive effect must show that the prima facie case inaccurately predicts the relevant transaction's probable effect on future competition."). "The more compelling the prima facie case, the more evidence the defendant must present to rebut it successfully." Baker Hughes, 908 F.2d at 991. "A defendant can make the required showing by affirmatively showing why a given transaction is unlikely to substantially lessen competition, or by discrediting the data underlying the initial presumption in the government's favor." *Id.*

"If the defendant successfully rebuts the presumption, the burden of producing additional evidence of anticompetitive effect **[**31]** shifts to the government, and merges with the ultimate burden of persuasion, which remains with the government at all times." Id. at 983. "[A] failure **[*24]** of proof in any respect will mean the transaction should not be enjoined." Arch Coal, 329 F. Supp. 2d at 116. The court must also weigh the equities, but if the FTC is unable to demonstrate a likelihood of success, the equities alone cannot justify an injunction. *Id.*

DISCUSSION

I. THE RELEVANT MARKET

HN7[] Merger analysis starts with defining the relevant market. United States v. Marine Bancorp., 418 U.S. 602, 618, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974) (Market definition is "'a necessary predicate' to deciding whether a merger contravenes the Clayton Act.") (quoting United States v. E.I. Du Pont De Nemours & Co., 353 U.S. 586, 593, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)); *see also* FTC v. Swedish Match, 131 F. Supp. 2d 151, 156 (D.D.C. 2000). The relevant market has two component parts. "First, the 'relevant product market' identifies the product and services with which the defendants' products compete. Second, the `relevant geographic market' identifies the geographic area in which the defendant competes in marketing its products or service." Arch Coal, Inc., 329 F. Supp. 2d at 119; *see also* FTC v. CCC Holdings Inc., 605 F. Supp. 2d 26, 37 (D.D.C. 2009) (same). "Defining the relevant market is critical in an antitrust case because the legality of the proposed merger[ ] in question almost always depends upon the market power of the parties involved." FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 45 (D.D.C. 1998).

Market definition has been the parties' primary battlefield in this case. According to **[**32]** the FTC, the relevant product market is broadline foodservice distribution. Compl. ¶ 40. Because broadline distribution is defined by a number of distinct attributes—such as a vast array of product offerings, private label offerings, next-day delivery, and value-added services—the FTC contends that the other modes of distribution are not reasonable substitutes for broadline distribution and thus must be excluded from the product market.

The FTC further contends that, within the product market for broadline distribution, there is another product market for foodservice distribution sold to "national" customers. *Id.* ¶ 44. These customers, the FTC asserts, are distinct from "local" or "street" customers in multiple respects. National customers have a nationwide or multi-regional footprint and, because of that footprint, typically contract with a broadliner that has geographically dispersed distribution centers; they usually make purchases under a single contract that offers price, product, and service consistency across all facilities; and they award contracts through a request for proposal or bilateral negotiations. National customers include, among others, GPOs, foodservice management **[**33]** companies, hospitality chains, and national chain restaurants. By contrast, the FTC says, the typical "local" or "street" customer is an independent restaurant, which does not require multiple, geographically dispersed distribution centers; purchases in smaller quantities; and ordinarily does not have a contract with its foodservice distributor(s) as it negotiates purchases on a weekly or other short-term basis. The FTC contends that for national customers the geographic market is nationwide. For local customers, it argues that the geographic market is localized near Defendants' distribution centers.

Defendants counter that the foodservice distribution market cannot be sliced and diced as advocated by the FTC. According to Defendants, the relevant market is the entire $231 billion foodservice distribution industry, consisting not only of broadline food distributors, but also specialty **[*25]** distributors, systems distributors, and cash-and-carry stores. All of these modes of distribution, Defendants argue, compete for foodservice distribution customer spending. Based on this market definition, Defendants assert that together, they make up approximately 25 percent of total foodservice distribution **[**34]** sales. They also dispute that there is a product market for "national customers," asserting that such a market has been created by the FTC out of whole cloth to artificially inflate Defendants' market shares. According to the FTC, Defendants combined have, at least, a 59 percent share of the national customer product market.

A. Broadline Distribution as a Relevant Product Market

1. Legal Principles Affecting the Definition of the Relevant Product Market

The Supreme Court in *Brown Shoe* set forth the general rule for defining a product market: ***HN8***[] "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe, 370 U.S. at 325*. Stated another way, a product market includes all goods that are reasonable substitutes, even though the products themselves are not entirely the same. *Cardinal Health, 12 F. Supp. 2d at 46*; *Staples, Inc., 970 F. Supp. at 1074* (stating the question as "whether two products can be used for the same purpose, and if so, whether and to what extent purchasers are willing to substitute one for the other").

HN9[] Whether goods are "reasonable substitutes" depends on two factors: functional interchangeability and cross-elasticity of demand. "Functional **[**35]** interchangeability" refers to whether buyers view similar products as substitutes. *See id.* ("Whether there are other products available to consumers which are similar in character or use to the products in question may be termed 'functional interchangeability. "If consumers can substitute the use of one for the other, then the products in question will be deemed 'functionally interchangeable.'" *Arch Coal, 329 F. Supp. 2d at 119*; *see also* *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 393, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))* ("Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another."). "Courts will generally include functionally interchangeable products in the same product market unless factors *other than* use indicate that they are not actually part of the same market." *Arch Coal, 329 F. Supp. 2d at 119*.

HN10[] As for cross-elasticity of demand, there the question turns in part on price. *E.I. Du Pont De Nemours, 351 U.S. at 400* ("An element for consideration as to cross-elasticity of demand between products is the responsiveness of the sales of one product to price changes of the other."). If an increase in the price for product A causes a substantial number of customers to switch to product B, the products compete in the same market. **[**36]** *See id.* ("If a slight decrease in the price of cellophane causes a considerable number of customers of other flexible wrappings to switch to cellophane, it would be an indication . . . that the products compete in the same market."); *Arch Coal, 329 F. Supp. 2d at 120*. Price is not, however, the only variable in determining the cross-elasticity of demand between products. Cross-elasticity of demand also depends on the "ease and speed with which customers can substitute [the product] and **[*26]** the desirability of doing so." *FTC v. Whole Foods Market, Inc., 548 F.3d 1028, 1037 (D.C. Cir. 2008)* (Brown, J.). Thus, substitution based on a reduction in price will not correlate to a high cross-elasticity of demand unless the switch can be accomplished without the consumer incurring undue expense or inconvenience. *See* *Phila. Nat'l Bank, 374 U.S. at 358* (observing that "[t]he factor of inconvenience localizes banking competition as effectively as high transportation costs in other industries").

HN11[] Three other established principles are critical to defining the relevant product market in this case. The first is that the "product" that comprises the market need not be a discrete good for sale. As the Supreme Court has made clear: "We see no barrier to combining in a single market a number of different products or services where that combination **[**37]** reflects commercial realities." *United States v. Grinnell Corp., 384 U.S. 563, 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Phila. Nat'l Bank, 374 U.S. at 356* (citation omitted) (finding that "the cluster of products . . . and services . . . denoted by the term 'commercial banking'. . . composes a distinct line of commerce"). Thus, what is relevant for consideration here is not any particular food item sold or delivered by Defendants, but the full panoply of products and services offered by them that customers recognize as "breadline distribution."

HN12[] Second, "the mere fact that a firm may be termed a competitor in the overall marketplace does not necessarily require that it be included in the relevant product market for antitrust purposes." *Staples, 970 F. Supp. at 1075*; *Cardinal Health, 12 F. Supp. 2d at 47* (same). That is because market definition hinges on whether consumers view the products as "reasonable substitutes." *Cardinal Health, 12 F. Supp. 2d at 46*. So, for example, fruit can be bought from both a grocery store and a fruit stand, but no one would reasonably assert that buying all of one's groceries from a fruit stand is a reasonable substitute for buying from a grocery store. *See Whole Foods, 548 F.3d at 1040 (Brown, J.)* ("The fact that a customer might buy a stick of gum at a supermarket or at a convenience store does not mean there is no definable groceries market."). Thus, as applicable here, the fact that buyers may cross-shop between **[**38]** modes of food distribution does not necessarily make them part of the same market for the purpose of merger analysis.

HN13[] Third, market definition is guided by the "narrowest market" principle. *Arch Coal, 329 F. Supp. 2d at 120*. That is, "a relevant market cannot meaningfully encompass [an] infinite range [of products]. The circle must be drawn narrowly to exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn." *Times-Picayune Publ'g Co. v. United States, 345 U. S. 594, 612, 73 S. Ct. 872, 97 L. Ed. 1277 n.31 (1953)*. Judge Bates in *Arch Coal* succinctly described the "narrowest market" principle in practice as follows:

> The analysis begins by examining the most narrowly-defined product or group of products sold by the merging firms to ascertain if the evidence and data support the conclusion that this product or group of products constitutes a relevant market. If not, the analysis shifts to the next broadest product grouping to test whether that is a relevant market. This process continues until a relevant market is identified.

Arch Coal, 329 F. Supp. 2d at 120; *see also* *United States v. H&R Block, Inc., 833 F. Supp. 2d 36, 58-60 (D.D.C. 2011)* (explaining "the principle that the relevant product **[*27]** market should ordinarily be defined as the smallest product market that will satisfy the hypothetical monopolist test").

The critical question here, therefore, is whether **[**39]** broadline food distribution qualifies as the relevant product market, or whether the product market should be expanded to include other modes of distribution.

2. The Brown Shoe "Practical Indicia"

HN14[] Courts look to two main types of evidence in defining the relevant product market: the "practical indicia" set forth by the Supreme Court in *Brown Shoe* and testimony from experts in the field of economics. The court turns first to the *Brown Shoe* factors.

According to *Brown Shoe*, "[t]he boundaries of [a product market] may be determined by examining such practical indicia as industry or public recognition . . . , the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Brown Shoe, 370 U.S. at 325*. "These indicia seem to be evidentiary proxies for direct proof of substitutability." *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 218, 253 U.S. App. D.C. 142 (D.C. Cir. 1986)*; *H&R Block, 833 F. Supp. 2d at 51*. Courts have relied on the *Brown Shoe* factors in a number of cases to define the relevant product market.[2] *See, e.g.*, Staples, 970 F. Supp. at 1075-80; Cardinal Health, 12 F. Supp. 2d at 46-48; Swedish Match, 131 F. Supp. 2d at 159-64; CCC Holdings, 605 F. Supp. 2d at 39-44; H&R Block, 833 F. Supp. 2d at 51-60.

The court finds that the *Brown Shoe* factors support the FTC's position that broadline foodservice distribution is the relevant product market for evaluating the proposed merger. As discussed below, an analysis of those factors demonstrates that other modes of foodservice distribution are not functionally interchangeable with broadline foodservice distribution,

a. Product breadth and diversity

The most distinguishing feature of broadline distribution is its product breadth and diversity. Broadliners stock thousands of SKUs across every major food and food-related category in their distribution centers. *See* Staples, 970 F. Supp. at 1078 (comparing SKU selections among different sales outlets). The average Sysco or USF distribution center carries over [TEXT REDACTED BY THE COURT] SKUs. Regional broadliners carry fewer SKUs than Defendants, but still maintain between 6,000 to 19,000 SKUs in their distribution centers. PX093 50-215, Table 22. Broadliners also offer "private label" products, which are a broadliner's branded products. Sysco has over [TEXT REDACTED BY THE COURT] private-label SKUs, and USF has over **[**41]** [TEXT REDACTED BY THE COURT]. PX09350-219, Table 32. This product breadth and diversity enables broadliners to serve a wide variety of customers and to be a one-stop shop, if the customer wishes. As USF's Executive Vice President of Strategy David Schreibman testified at the FTC's Investigational Hearing: "[W]e have such a broad selection of SKUs because that is a key consideration of our customer base, you have to have what they want." Investig'l Hr'g Tr., PX00590-006 at 24.

The other distribution channels pale in comparison to broadline in terms of product **[*28]** breadth and diversity. Systems distributors carry a limited number of SKUs—usually only a few thousand—in their distribution centers. PX09350-215, Table 22. These SKUs are ordinarily proprietary in nature and used only by the customers for which they were developed, meaning that systems products are not readily sellable to other customers. Specialty distributors also carry a limited number of SKUs, usually for niche products—such as fresh produce, meat, seafood, dairy, or bakery items—which tend to complement broadline offerings. As Sysco's CEO William DeLaney explained: "We own [specialty] to create great traction with our customers,... **[**42]** we felt we had some gaps in our [broadline] product offerings, whether it was special produce, special cut steaks. . . ." Investig'l Hr'g Tr., PX00580-010 at 38. Cash-and-carry stores likewise do not have the same breadth and diversity of products as broadline distributors. One of the largest cash-and-carry stores, Restaurant Depot, carries [TEXT REDACTED BY THE COURT] SKUs. USF's CHEF'STORE carries less than 4,000. PX09350-216, Table 26. A number of customer declarants stated that cash-and-carry store products tended to be less uniform and inferior in quality to products carried by broadliners.

b. Distinct facilities and operations

No one entering a systems, specialty, or cash-and-carry outlet would mistake it for a broadline distribution facility. *See* Staples, 970 F. Supp. at 1079 ("No one entering a Wal-Mart would mistake it for an office superstore .... You certainly know an office superstore when you see one."). Broadline distribution centers are massive. The average size of a Sysco distribution center is over 380,000 square feet; for USF, it is over 270,000 square feet. Some regional distributors also have distribution centers ranging from 200,000 to 400,000 square feet. PX09350-215, Table 25. Non-broadline **[**43]** facilities are generally smaller in size and cannot readily be converted into a broadline facility or accommodate broadline customers.

Broadline facilities also have large salesforces attached to them. Broadline facilities typically have dozens of sales representatives, while systems distributors have few sales representatives at their facilities. PX09350-215, Table 23. Cash-and-carry stores generally do not have dedicated account representatives at all. Because the model of

[2] The Brown Shoe practical indicia may indeed be "old school," as Sysco's counsel asserted at oral argument, Closing Arg. Hr'g Tr. 44, and its analytical framework relegated "to the jurisprudential sidelines," **[**40]** *see* ***Whole Foods, 548 F.3d at 1059*** (Kavanaugh, J., dissenting). But Brown Shoe remains the law, and this court cannot ignore its dictates.

distribution is self-service, cash-and-carry sales representatives do not learn the individualized needs of their customers in a systematic manner.

Additional proof that broadline foodservice distribution is a separate product market comes from the corporate structure of large foodservice distributors. Major foodservice distributors offer distribution in other channels besides broadline, but they run those businesses separately from their broadline businesses. *See, e.g.,* H&R Block, 833 F. Supp. 2d at 56 (observing that digital do-it-yourself tax preparation was a distinct product market from assisted tax preparation because H&R Block ran them as "separate business units"). Sysco runs its systems distribution business, SYGMA, as a separate division. **[**44]** So, too, does PFG, which runs a systems business known as PFG Customized. Sysco also runs separate specialty divisions, such as Fresh Point, a fresh produce supplier. So, too, does PFG, which has its own specialty division, Roma, which supplies Italian restaurants and pizza parlors. And USF runs a separate cash-and-carry operation, CHEF'STORE. This type of corporate structuring shows that those who run and manage foodservice companies view broadline as distinct from other modes of distribution,

[*29] e. Delivery

Timely and reliable delivery is critical in the food distribution industry. Unless customers can get the food they want when they need it, their businesses are at risk of losing clients and money. Broadliners have the capacity—due in large part to their extensive fleet of service vehicles, PX09350-217, Table 29—to offer frequent and flexible delivery schedules to meet customer needs, including next-day delivery. Ample evidence shows that, for a wide array of broadline customers—from large GPOs to individually-owned restaurants—next-day delivery is crucial to meeting their needs.

Neither systems distributors nor cash-and-carry stores offer the same degree of frequency and flexibility **[**45]** of delivery as broadliners.[3] Systems distributors tend to make large, limited-SKU deliveries on a fixed schedule. Also, systems fleets, on average, travel longer distances than broadline fleets to make deliveries. Carry-and-carry stores, for the most part, do not deliver. Rather, their primary model is self-service—that is, the customer transports the merchandise on her own. Some cash-and-carry outlets do offer delivery options. Costco, for example, offers limited-mileage delivery from some of its stores, and Restaurant Depot leases refrigerated trucks to its best customers. But those programs are quite limited and cannot substitute for the comprehensive and flexible delivery networks offered by broadliners to all of their customers.

d. Customer service and value-added services

Another distinguishing feature of broadline distributors **[**46]** is their high degree of customer service and value-added service offerings. For example, broadliners offer menu and nutritional- meal planning services to, among others, healthcare, hospitality, and restaurant customers. They also offer value-added services at their distribution facilities, such as food safety training and new product updates. Other modes of delivery do not generally offer comparable value-added services.

e. Distinct customers

Due in large part to the breadth of their product and service offerings, broadliners are capable of serving a wide range of customers, including classes of customers that the other channels cannot reach. Systems is a more efficient and cost-effective mode of distribution for fast food and quick service restaurants. Specialty distributors can provide higher quality and fresher products in certain categories, but have limited product offerings and charge higher prices than broadliners. Cash-and-carry stores are less expensive and more accessible for buyers such as independent restaurants, but their lack of delivery service makes them unsuitable for the large majority of foodservice customers.

---

[3] There was little evidence presented about the delivery capabilities of specialty distributors, aside from the fact that they have a limited geographic range of delivery. *See* PX00427-002 (Sodexo declarant indicating that specialty distributors covered a limited geographic range); PX00594-012 at 45 (MedAssets stating the same); PX00407-002 (Amerinet stating the same).

These other channels, therefore, simply cannot and do not **[**47]** serve as wide an array of customers as broadliners do. The largest broadline customers, such as GPOs, foodservice management companies, and hospitality providers, cannot use systems or cash-and-carry for their needs. They purchase only modest quantities of product from specialty distributors. Even most independent restaurants cannot use cash-and-carry stores as a reasonable substitute **[*30]** for their broadliner, even though such stores offer lower prices.

f. Distinct pricing

Broadliners generally compete only against other broadliners on pricing. PFG's President and CEO, George Holm, who has over 37 years of industry experience, testified that systems and specialty distributors do not significantly affect the pricing and services that PFG offers to its customers. Hr'gTr. 575-76,643. And, although broadliners recognize that cash-and-carry stores provide lower prices, the record does not show broadliners benchmarking their prices against cash- and-carry stores or lowering prices to compete with them. To the contrary, as USF's Executive Vice President of Strategy David Schreibman succinctly stated in an email comparing pricing between USF as a broadliner and its own cash-and-carry division, CHEF'STORE: **[**48]** "In the store, we will be competitive with [TEXT REDACTED BY THE COURT] on a similar cost model. On the truck, we will be competitive with broadline distributors on a similar cost model." PX03114-003.

g. Industry or public recognition

Overwhelmingly, the evidence shows that players in the foodservice distribution industry—both its suppliers and customers—recognize broadline, systems, specialty, and cash- and-carry to be distinct modes of distribution. *See* Rothery Storage, 792 F.2d at 219 n.4 ("The 'industry or public recognition of the submarket as a separate economic' unit matters because we assume that economic actors usually have accurate perceptions of economic realities."). The court received both live and out-of-court sworn testimony from Defendants' executives; executives from other broadline distributors; officers of non-broadline companies; and customers, large and small. They uniformly observed that these modes of distribution are distinct in the variety of ways described above. In short, the industry widely recognizes that broadline distributors offer a unique cluster of products and services that is not functionally interchangeable with other modes of distribution.

h, Defendants' response to Brown Shoe "practical **[**49]** indicia"

Defendants do not, for the most part, contest the above-described distinctions between broadline and other channels of distribution. Instead, Defendants contend that defining the relevant market to include only broadliners "misunderstands consumer behavior." Memo of Defs. Sysco Corp., USF Holding Corp. and US Foods, Inc., in Opp'n to Pis.' Mot. for A Prelim. Inj., ECF No. 130 at 19 [hereinafter Defs.' Opp'n Br.]. They argue "customers simultaneously can, and routinely do, choose to patronize competitors of all stripes offering fungible goods through different but overlapping distribution channels." *Id.* What matters, Defendants claim, is that non- broadliners are able to constrain a broadliner's pricing by competing for customers who are able to move their entire purchasing, or portions of their purchasing, between channels. *Id.* at 19 ("Whether a substitute channel is a 'comprehensive' substitute is irrelevant to that question."). Defendants offer as one compelling example the burger chain Five Guys, which recently reallocated over $300 million in annual business from USF to a collection of regional broadliners and systems distributors.

Defendants are indisputably correct that customers **[**50]** buy across channels, especially independent restaurants. They are also unquestionably correct that some customers, particularly quick service and fast food restaurant chains, are capable of moving large segments of business from broadline to systems. But the fact that Defendants sometimes compete against other channels of distribution in the larger marketplace **[*31]** does not mean that those alternative channels belong in the relevant product market for purposes of merger analysis. *See* Staples, 970 F. Supp. at 1075 (***HN15***[] "[T]he mere fact that a firm may be termed a competitor in the overall marketplace does not necessarily require that it be included in the relevant product market for antitrust purposes."); *see also* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 565b (4th ed. 2014) ("[I]t would be improper to group complementary goods into the same relevant market just because they occasionally substitute for one another. Substitution must be effective to hold the primary good to a price near its costs[.]").

Two key decisions from this jurisdiction, *Whole Foods* and *Staples*, support this conclusion. In *Whole Foods*, the question was whether there existed a product market **[**51]** for premium natural and organic supermarkets ("PNOS") separate from ordinary supermarkets. The Court of Appeals' ultimate decision was fractured—each judge issued a separate opinion, leaving no controlling opinion from the Court. Two judges, however, concluded that PNOS is a separate product market from ordinary supermarkets, even though there was evidence that customers "cross-shopp[ed]" between the two. *548 F.3d at 1040 (Brown, J.)*; *id*. ("But the fact that PNOS and ordinary supermarkets 'are direct competitors in some submarkets ... is not the end of the inquiry.'") (quoting *United States v. Conn. Nat. Bank, 418 U.S. 656, 664 n.3, 94 S. Ct. 2788, 41 L. Ed. 2d 1016 (1974))*; *id. at 1048 (Tatel, J.)* ("That Whole Foods and Wild Oats have attracted many customers away from conventional grocery stores by offering extensive selections of natural and organic products thus tells us nothing about whether [they] should be treated as operating in the same market as conventional groceiy stores."). Both judges agreed that just because customers were able to buy some categories of groceiy products from both outlets—similar to how broadline customers are able to purchase some products from other modes of distribution—did not mean that PNOS was in the same product market as grocery stores. *See id. at 1040 (Brown, J.)* (citing testimony that "Whole Foods competes actively with **[**52]** conventional supermarkets for dry groceries sales, even though it ignores their prices for high-quality perishables"); *id. at 1049 (Tatel, J.)* ("As Judge Brown's opinion explains, this suggests that any competition between Whole Foods and conventional retailers may be limited to a narrow range of products that play a minor role in Whole Food's profitability.").

The court in *Staples* held much the same. There, the question was whether consumable office supplies sold by office superstores constituted a separate product market from office supplies sold elsewhere. *See Staples, Inc., 970 F. Supp. at 1073*. The court acknowledged that no matter who sells them, office supply products—to some extent, like food products—are "undeniably the same." *Id. at 1075*. The court nevertheless held that the sale of office supplies through superstores constituted the relevant product market. "[T]he unique combination of size, selection, depth and breadth of inventory offered by the superstores distinguishes them from other retailers." *Id. at 1079*. Those words apply with equal force to broadline distributors relative to other food distribution channels. *See also Cardinal Health, 12 F. Supp. 2d at 47* (concluding that the wholesale drug industry "provide[s] customers with an efficient way to obtain prescription drugs through centralized warehousing, **[**53]** delivery, and billing services that enable the customers to avoid carrying **[*32]** large inventories, dealing with large number of vendors, and negotiating numerous transactions").

Defendants have not convincingly distinguished *Whole Foods* or *Staples.*[4] Instead, they urge the court to look to *United States v. Sungard Data Sys., Inc., 172 F. Supp. 2d 172 (D.D.C 2001)*, as an analogous case. There, the question was whether different types of disaster recovery services for computer data comprised the same product market. *Id. at 183*. The court rejected the government's product market definition as limited only to shared hotsite services because "the government's market contains an extremely heterogeneous group of customers," *id. at 182*, who "are simply too varied and too dissimilar to support any generalizations," *id. at 193*. Here, it is unquestionably true that foodservice distribution customers are incredibly varied in their needs, buying habits, and price sensitivities. But *Sungard* differs in one critical respect. The court there observed that "the striking heterogeneity of the market, particularly as reflected by the *conflicting evidence relating to customer perceptions and practices*," undercut the government's market definition. *Id. at 182-83* (emphasis added). Here, that simply is not the case.

[4] In neither their opposition to the FTC's motion for preliminary injunction nor their proposed findings of fact and conclusions of law do Defendants attempt to distinguish *Whole Foods* or *Staples*. At oral argument, Defendants distinguished *Staples* based on the fact that in *Staples* the FTC had pricing data to show that prices were lower in markets where both merging firms were present. Closing Arg. Hr'g Tr. at 38-40. Defendants also sought to distinguish *Whole Foods* on the facts, arguing that in *Whole Foods* the defendants could not show that in the event of a price increase consumers of PNOS could go to a standard grocery store. *Id.* at 40-41. But the court finds these efforts **[**55]** to distinguish *Staples* and *Whole Foods* unconvincing. It is true that there was stronger pricing data in *Staples*, but pricing data alone did not lead to the court's conclusion. The factual similarities between this case and *Staples*, particularly the *Brown Shoe* practical indicia, are otherwise strong. As for *Whole Foods*, it is even more factually analogous to this case than is *Staples*. If anything, the proof that other channels of distribution are not reasonable substitutes for broadline is more compelling in this case than the evidence in *Whole Foods* that ordinary grocery stores are not a reasonable substitute for PNOS.

Though the customers **[**54]** may be varied, the court has little doubt that the industry, from the perspective of both sellers and buyers, perceives broadline to be a separate mode of food distribution. Witnesses of all stripes had little trouble distinguishing among the different channels of distribution, and Defendants offered no evidence of any industry confusion among them. Those facts make this case fundamentally different from *Sungard. See id. at 183* ("Customer responses were also often vague and confused" and product definitions were "consistently unclear.").

Defendants also argue that the FTC's definition of broadline as the relevant market improperly excludes other modes based on "a small number of customers' subjective preferences for broadline distribution." Defs.' Opp'n Br. at 17 (footnote omitted). But the evidence, as it relates to broadline versus other distribution channels, is hardly selective. Defendants' own executives acknowledged the fundamental differences between broadline and other modes of distribution.[5] So, too, did **[*33]** executives of regional broadliners, such as PFG,[6] Shamrock,[7] Reinhart Foodservice,[8] and Shetakis **[**56]** [9]; consortiums, such as UniProl[10]; systems distributors, such as Maines[11]; and cash-and-carry stores, such as Restaurant Depot.[12] Likewise, customers of every size recognized the differences between broadline and the other food distribution modes. In short, this is not the kind of case in which the testimonial evidence failed to demonstrate a consensus among the industry's players regarding the boundaries of the product market.

3. Expert Testimony

Having concluded that the *Brown Shoe* "practical indicia" support a product market for broadline foodservice distribution, the court turns next to the second type of evidence that courts consider in product market definition: expert testimony in the field of economics.***HN16***[] One of the primary methods used by economists to determine a product market is called the "hypothetical monopolist test." This test asks whether a hypothetical monopolist who has control over a set of substitutable products could profitably raise prices on those products. If so, the products may **[**58]** comprise the relevant product market. *See H&R Block, 833 F. Supp. 2d at 51-52*. The theory behind the test is straightforward. If enough consumers are able to substitute away from the hypothetical monopolist's product to another product and thereby make a price increase unprofitable, then the relevant market cannot include only the monopolist's product and must also include the substitute goods. On the other hand, if the hypothetical monopolist could profitably raise price by a small amount, even with the loss of some customers, then economists consider the monopolist's product to constitute the relevant market.

---

[5] *See, e.g.*, DX-00319 at 32-36 (Sysco's CEO, William DeLaney, explained that systems is a "tailored, customized approach to certain types of customers" and the "model is not to serve GPO customers"); Hr'g Tr. 1369-70 (DeLaney stated that, compared to cash-and-carry, broadline is a "value package" that includes delivery services and menu consulting); Hr'g Tr. 1452 (David Schreibman of USF stated that "specialty distributors compete by having a broader array of products within their expertise" that "broadliner[s] may not have in [their] portfolio"); Investigat'l Hr'g Tr., PX00580-008-010 at 32-39 (DeLaney explained that broadline and specialty are "two different businesses," whereas broadline distribution includes "a full range of products"); Investigat'l Hr'g Tr., PX00584-060 at 239-40 **[**57]** (Louis Nasir, the Pacific Market President for Sysco, maintained that cash-and-carry stores "don't have the same selection" of products and "also don't have consistent inventory" compared with broadliners); Investigat'l Hr'g Tr., PX00590-011 at 42 (Schreibman stated that he was not aware of a cash-and-carry store that delivers).

[6] *See* PX00429-002-007; Hr'g Tr. 571-73.

[7] DX-00285 at 115-16, 164-66.

[8] DX-00295 at 16-17, 22.

[9] PX00414-001.

[10] DX-00260 at 139.

[11] DX-00264 at 64, 141; PX00424-001 (Maines is predominantly systems, but [TEXT REDACTED BY THE COURT] percent of 2013 revenues were from broadline sales).

[12] DX-00314 at 146-47.

The hypothetical monopolist test, which courts have applied, is set forth in the U.S. Department of Justice and FTC's Horizontal Merger Guidelines. *See* U.S. Dep't of Justice & FTC Horizontal Merger Guidelines § 4.1.1 (2010) [hereinafter Merger Guidelines]; *H&R Block, 833 F. Supp. 2d at 51-52*; *CCC Holdings, 605 F. Supp. 2d at 40*; *Arch Coal, 329 F. Supp. 2d at 120 & n.7*. As stated in the Merger Guidelines:

> ***HN17***[] [T]he test requires that a hypothetical profit-maximizing firm, not subject to price regulation, that was the only present and future seller of those products . . . likely would impose at least a small but significant and non-transitory increase in price ("SSNIP") on at least one product in the market, including at least one product sold by one of the merging firms.

[*34] Merger Guidelines **[**59]** § 4.1.1. The SSNIP "is intended to represent a 'small but significant' increase in the prices charged by firms in the candidate market" and is typically assumed to be "five percent of the price paid by customers for the products or services to which the merging firms contribute value." Merger Guidelines § 4.1.2.

As applied to this case, the hypothetical monopolist test asks: If there was only one broadline food distributor, could it profitably raise price by five percent, or would that price increase result in a substantial number of customers moving enough of their spend to other modes of distribution—systems, specialty, or cash-and-carry—such that the price increase would be unprofitable? If the price increase would be profitable, then the relevant product market is broadline distribution; if unprofitable, it means that the relevant market must include at least one other channel of distribution. Each side presented expert testimony from economists who performed the hypothetical monopolist test but who came to different results.

a. Dr. Mark Israel

For its expert economic evidence, the FTC presented the testimony of Dr. Mark Israel, who received a doctorate in economics from Stanford University and **[**60]** now serves as Executive Vice President at Compass Lexecon, a consulting firm. Dr. Israel's testimony served two primary functions. First, he acted as a *de facto* summary witness, synthesizing the mass of testimonial and documentary evidence gathered by the FTC. Dr. Israel's summary of that evidence parallels the discussion in the above sub-sections, so the court does not revisit it here. Second, Dr. Israel conducted a SSNIP test, using what is known as ***HN18***[] an "aggregate diversion analysis." Its purpose is to determine the amount of sales that a hypothetical monopolist of broadline distribution could lose before a price increase becomes unprofitable. *See* *Swedish Match, 131 F. Supp. 2d at 160* (describing the related methodology of "critical loss analysis"); *H&R Block, 833 F. Supp. 2d at 63* (same). A detailed recitation of Dr. Israel's aggregate diversion analysis is necessary because Defendants challenge the basic elements of his work.

HN19[] Aggregate diversion analysis has three basic steps. The first is to determine the threshold aggregate diversion ratio, which is the percentage of customers that would need to stay within the broadline market to make a price increase profitable. *See* *H&R Block, 833 F. Supp. 2d at 63*. This is strictly a mathematical step, with the aggregate diversion ratio a function **[**61]** of the subject product's gross margin. The gross margin is defined as the price of selling one additional product minus the cost of selling the additional product.[13] The second step is to determine the *actual* aggregate diversion—that is, the actual percentage of customers of a single broadliner that would switch to another broadliner after a price increase. "Since these lost sales are recaptured within the proposed market, they are not lost to the hypothetical monopolist." *Id.* As will be seen, this step involved an analysis of Defendants' actual sales data. The final step is to compare the two: if the actual aggregate diversion is greater than the threshold ratio, then the hypothetical monopolist could profitably raise prices and the candidate market is the relevant product market. *See id.* In other words, as applied here, if the percentage of customers of a single broadliner who would switch to another broadliner (as opposed to another mode of **[*35]** distribution) in response to a price increase is greater than the percentage of customers needed to stay within the market to make a price increase profitable, then the relevant product market is properly defined as broadline distribution.

[13] Gross **[**62]** margin is calculated as follows: (Revenue-Cost of Goods Sold)/Revenue.

At step one of his aggregate diversion analysis, Dr. Israel assumed a gross margin of 10 percent, a figure lower than the gross margin contained in the parties' financial reporting.[14] A 10 percent gross margin, according to Dr. Israel, yields a 50 percent threshold aggregate diversion ratio based on a formula devised by two economists, Michael Katz and Carl Shapiro.[15]

Next, Dr. Israel calculated the actual aggregate diversion based on three different data sets. He constructed the first two data sets from national and regional requests for proposals ("RFPs") and "bidding" summary **[**63]** information and documents produced by each Defendant to the FTC. Based on this information, Dr. Israel built a database for each company that tracked, for each bidding opportunity, the incumbent distributor, the winning distributor, and the competing bidders. PX09350-104. Based on Sysco's RFP/bidding data, he found that, when Sysco lost a bid, [over 70%] of the time (based on potential revenue from sales opportunities) it was to another broadliner; the remaining losses were to another mode of distribution. PX09350-056. Based on USF's RFP/bidding data, the percentage was even higher—USF lost to other broadliner [over 70%] of the time. *Id.*

Dr. Israel constructed his third data set from USF's "Linc" database. Linc is a customer relations management tool that USF local sales representatives used until recently to track sales opportunities. The Linc database contains fields that sales representatives can complete to describe a sales opportunity, including a "main competition" field. Dr. Israel assumed that, if USF did not win an opportunity, it was won by the identified "main competitor." The Linc database contained hundreds of thousands of observations, about a third of which included information **[**64]** on the "main competitor." Based on this data, Dr. Israel concluded that [over 70%] of the local sales opportunities lost by USF (again, based on potential revenue of those sales opportunities) were lost to other broadliners. PX09350-056.

At the third step, Dr. Israel compared the aggregate diversion ratio of 50 percent to the actual diversion percentages derived from the three data sets. He concluded that, because each of the three actual diversion percentages was higher than the 50 percent threshold aggregate diversion ratio, broadline distribution was the relevant product market. In other words, Dr. Israel found that only 50 percent of broadline customers would need to remain within the broadline market to make a price increase profitable, while according to three different data sets, the actual percentage of customers who would remain within the broadline market (by switching to another broadliner) was greater than 50 percent. Therefore, Dr. Israel's calculations indicated that broadline distribution was the relevant product market.

[*36] b. Defendants' experts

Defendants mounted an aggressive challenge to Dr. Israel's work through their own expert witnesses. Defendants first presented Dr. **[**65]** Jerry Hausman, a professor of economics at Massachusetts Institute of Technology. Dr. Hausman testified, in short, that Dr. Israel's aggregate diversion analysis was wrong because (i) he used the wrong gross margin and (ii) he used the wrong mathematical formula to calculate the threshold aggregate diversion ratio. According to Dr. Hausman, Dr. Israel excluded certain variable costs from his gross margin. The actual gross margin was not 10 percent, according to Dr. Hausman, but between [TEXT REDACTED BY THE COURT] percent and [TEXT REDACTED BY THE COURT] percent. Also, Dr. Hausman testified that the aggregate diversion formula Dr. Israel used was incorrect and led to an overly narrow market definition.[16] Using the proper margins and the

---

[14] Dr. Israel testified that the parties' reported gross margins are between 15 and 20 percent, but to be conservative he used a 10 percent margin. Hr'g Tr. 1004-05.

[15] The Katz-Shapiro formula that Dr. Israel used is L = X/(X + M), where L is the aggregate diversion ratio, or "critical loss," X is the price increase, and M is the margin. PX09350-055 at n.134. For his aggregate diversion analysis, Dr. Israel used a 10 percent price increase and a 10 percent margin, for a resulting critical loss of 50 percent, *i.e.*, .50 = .10/(.10 + .10). Hr'g Tr. 1004-07.

[16] According to Dr. Hausman, the correct formula is L = X/M, where L is the aggregate diversion ratio, or "critical loss," **[**66]** X is the price increase, and M is the margin. Dr. Hausman testified that this is the more appropriate formula in an asymmetric

correct formula, Dr. Hausman opined, the aggregate diversion ratio is not 50 percent, but rather over 100 percent, which is an impossibility (*i.e.*, more than 100 percent of customers cannot switch in response to a price increase). Thus, he concluded, the relevant product market is not broadline, but all channels of food distribution.

While Dr. Hausman challenged Dr. Israel's calculation of the threshold aggregate diversion ratio, Defendants' other expert, Dr. Timothy Bresnahan, a professor of economics at Stanford University, critiqued Dr. Israel's use of the RFP/bidding and Linc data sets to calculate the actual aggregate diversion. Regarding the RFP/bidding data, Dr. Bresnahan described the data as contrived and unreliable—a point that Defendants consistently articulated to the FTC during the investigation phase. Dr. Bresnahan explained that the companies do not keep comprehensive RFP or bidding data in the ordinary course of business and that the information Dr. Israel relied upon **[**67]** was pulled together at the insistence of the FTC, in part based on employees' unreliable notes and memories. As for the Linc data, it too was flawed, Dr. Bresnahan suggested, because it is a prospective sales database, not an actual transactions database in which USF sales personnel were accurately recording wins and losses. Moreover, neither the RFP/bidding data nor the Linc data describes whether Sysco or USF lost a customer for a price-based reason or some reason having nothing to do with price.

c. The court's finding as to the expert testimony

Having weighed the competing expert testimonies and considered them in light of the evidentiary record as a whole, the court finds Dr. Israel's aggregate diversion analysis and conclusion to be more persuasive than that advanced by Defendants' expert, Dr. Hausman.[17] Dr. Israel's **[*37]** reliance on the RFP/bidding and Linc data sets for calculating the aggregate diversion is problematic for the reasons Defendants have identified and, for those reasons, the court hesitates to rely on Dr. Israel's precise aggregate diversion percentages. But, when evaluated against the record as a whole, Dr. Israel's conclusions are more consistent with the business realities **[**68]** of the food distribution market than Dr. Hausman's. *See* Cardinal Health, 12 F. Supp. 2d at 46 (stating that "the ***HN20***[] determination of the relevant market in the end is 'a matter of business reality—[ ] of how the market is perceived by those who strive for profit in it.'" (alteration in original) (quoting *FTC v. Coca-Cola Co., 641 F. Supp. 1128, 1132 (D.D.C. 1986)*, *vacated as moot*, *829 F.2d 191, 264 U.S. App. D.C. 406 (D.C. Cir. 1987)*); *Arch Coal, 329 F. Supp. 2d at 116* ("[A]ntitrust theory and speculation cannot trump facts[.]"); *H&R Block, 833 F. Supp. 2d at 65* (bearing in mind the shortcomings of the expert's analysis and treating the analysis as "another data point" in determining the relevant market, rather than as conclusive).

The court finds Dr. Hausman's conclusion—that the actual aggregate diversion ratio is greater than 100 percent—inconsistent with business reality. On cross-examination, Dr. Hausman admitted that his conclusion meant that a hypothetical monopolist who had control over ***[**69]*** *every single broadline distributor* in the country could *not* profitably impose a SSNIP on customers, because enough customers would switch to other channels of distribution. Hr'g Tr. 2003-04. Yet many industry leaders testified either that other channels of distribution did not constrain the prices charged by broadliners or that other channels were not substitutes for broadline distribution. For instance, PFG's President and CEO, George Holm, testified that systems and specialty distributors do not significantly affect the pricing and services that PFG's broadline division offers to its customers. Hr'g Tr. 575-76. He also testified that systems and specialty distributors were not substitutes for broadliners. Hr'g Tr. 573. Such evidence from industry leaders,[18] which the court credits, contradicts Dr. Hausman's conclusion that a hypothetical monopolist of broadline

market, like food distribution, which involves suppliers and customers with different costs, different types of customers, and a different mix of products. Hr'g Tr. 1960-64; DFF at 285-86 (citing to DX-05028 at 11). The formula used by Dr. Israel, on the other hand, is more appropriate in a symmetric market, that is, a market marked by homogeneity among suppliers and customers. Hr'g Tr. 1960, 1965-66; DX-05028 at 10-11.

[17] In finding Dr. Israel's conclusion more persuasive than that advanced by Defendants' expert, the court might be doing more than it is required to do. As Judge Tatel stated in *Whole Foods*: ***HN21***[] "Although courts certainly must evaluate the evidence in *section 13(b)* proceedings and may safely reject expert testimony they find unsupported, they trench on the FTC's role when they choose between plausible, well-supported expert studies." ***Whole Foods, 548 F.3d at 1048 (Tatel, J.)***.

[18] *See also* PX00429-004-007 (George Holm, President and CEO of PFG, explaining that systems, specialty, and cash-and-carry distributors are not substitutes for customers needing broadline distribution); DX-00285 at **[**70]** 125-26 (John Roussel,

services would not be able to impose a SSNIP because enough customers would switch to other channels of distribution.

4. Conclusion as to the Broadline Product Market

In conclusion, based on the vast record of evidence the parties have presented, the court finds that the FTC has carried its burden of demonstrating that broadline distribution is the relevant product market.

B. National Broadline Distribution as a Relevant Product Market

The FTC asserts that, within the broader product market for broadline distribution, there is a narrower but distinct product market for "broadline foodservice distribution services sold to National Customers." Compl. ¶ 44. According to the FTC, "[d]ue to [their] geographic dispersion, **[*38]** National Customers typically contract with a broadline foodservice distributor that has distribution centers proximate to all (or virtually all) of their locations." *Id.* ¶ 42.

> National Customers typically contract with a broadliner that **[**71]** can provide—across all of their locations—product consistency and availability, efficient contract management and administration (e.g., centralized ordering and reporting, a single point of contact, and consistent pricing across all locations), volume discounts from purchasing, and the ability to expand geographically with the same broadline foodservice distributor.

Id. National customers include healthcare GPOs; foodservice management companies; and large hotel and restaurant chains. *Id.* ¶ 41. The FTC contends that Sysco and USF "are the only two single-firm broadline distributors with national geographic reach and, as such, are best positioned to serve National Customers." *Id.* ¶ 63.

Defendants vigorously dispute that there is such a thing as a "National Customer." They contend that a product market built around so-called national customers is "contrived," Defs.' Opp'n Br. at 16, and that the FTC's distinction between national and local customers is "factually and economically meaningless," *id.* at 13. They counter that the national-local distinction is not, as the FTC claims, built on differentiating customer characteristics, but is improperly based on an administrative distinction as to whether **[**72]** the customer prefers to be managed at the corporate level (making it a "national" customer) or at the local distribution center (making it a "local" customer). *Id.* at 12-15. The so-called national customer category, they also argue, is improperly based on a "few core customers who say they prefer the merging parties." *Id.* at 13. In addition, Defendants assert that Dr. Israel did not perform a SSNIP test to assess the existence of a national customer market. *Id.* at 12.

1. Legal Basis for Defining Relevant Product Market Based on Customer Type

Before turning to the evidence, the court first considers the legal basis for defining a product market based on a type of customer. Neither side comprehensively addressed this issue. Admittedly, defining a *product* market based on a type of *customer* seems incongruous. After all, one ordinarily thinks of a customer as purchasing a product in the market, and not as the product market itself. But, in this case, according to the FTC, the national customer and broadline product converge to define a market for broadline products sold to national customers. Broadline distributors must offer a particular kind of "product"—a cluster of goods and services that can be delivered across a **[**73]** broad geographic area—to compete for national customers. In that sense, the customer's requirements operate to define the product offering itself.

The clearest articulation of this approach to product market definition comes from the Merger Guidelines. ***HN22***[] The Merger Guidelines are not binding, but the Court of Appeals and other courts have looked to them for guidance

---

COO of Shamrock Foods, stating that it's "not possible" or "practical" for a broadline customer to use a systems distributor); DX-00260 at 139 (Bob Stewart, interim CEO of Unipro, explaining that a broadline customer cannot easily switch to a systems distributor and a broadline customer's needs are different than a systems customer's needs).

in previous merger cases. *See, e.g., Heinz, 246 F.3d at 716 n.9*; *H&R Block, 833 F. Supp. 2d at 52 n.10*. Section 4.1.4 of the Merger Guidelines provides that "[i]f a hypothetical monopolist could profitably target a subset of customers for price increases, the Agencies may identify relevant markets defined around those targeted customers, to whom a hypothetical monopolist would profitably and separately impose at least a SSNIP." Merger Guidelines **[*39]** § 4.1.4. Markets to serve targeted customers are also known as "price discrimination markets." *Id.* Professors Areeda and Hovenkamp have endorsed market definition of this kind, as well: "Successful price discrimination means that the disfavored geographic or product class is insulated from the favored class and, if the discrimination is of sufficient magnitude, should be counted as a separate relevant market." 2B Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law**: **[**74]** An Analysis of Antitrust Principles and Their Application* ¶ 534d (3d ed. 2007). The concern underlying price discrimination markets is that certain types of captured or dedicated customers could be targeted for monopolist pricing even if a price increase for all customers would not be profitable. *See* Merger Guidelines § 3; Areeda & Hovenkamp 3d ed., *supra*, ¶ 533d ("[S]ellers may be able to discriminate against buyers who have fewer alternatives or for whom the product performs a more valuable function[.]").

Defining a market around a targeted customer, as the FTC urges here, is not free from controversy, as the different opinions in *Whole Foods* demonstrate.[19] Relying on an earlier version of the Merger Guidelines that recognized price discrimination against "targeted buyers," Judge Brown explained that "core consumers"—in that case, those committed to premium and natural organic supermarkets—"can, in appropriate circumstances, be worthy of antitrust protection." *Whole Foods, 548 F.3d at 1037 (Brown, J.)* (citing DOJ and FTC, 1992 Horizontal Merger Guidelines § 1.12, 57 Fed. Reg. 41,552, 41,555 (1992)). Judge Brown went on to say:

> In particular, when one or a few firms differentiate themselves by offering a particular package of goods or services, it is quite possible for there to be a central **[**75]** group of customers for whom "only [that package] will do." . . . Such customers may be captive to the sole supplier, which can then, by means of price discrimination, extract monopoly profits from them while competing for the business of marginal customers.

Whole Foods, 548 F.3d at 1038 (Brown, J.) (quoting *Grinnell, 384 U.S. at 574*) (alteration in original).

Judge Kavanaugh, in dissent, rejected defining a market around a "core customer." *Whole Foods, 548 F.3d at 1062* (Kavanaugh, J., dissenting). According to Judge Kavanaugh, "there is no support in the law for that singular focus on the core customer. Indeed, if that approach took root, it would have serious repercussions because virtually *every* merger involves some core customers who would stick with the company regardless of a significant price increase."[20] *Id.* The relevant question for market definition, according to Judge Kavanaugh, is not whether a die-hard **[*40]** group of core customers would be impacted by a substantial **[**76]** price increase, but whether the merged company "could increase prices by five percent or more without losing so many marginal customers as to make the price increase unprofitable." *Id.*

2. Evidence Supporting a National Broadline Product Market

Ultimately, the court here need not resolve the *Whole Foods* disagreement over defining a market around a "core" customer. That is because the ordinary factors that courts consider in defining a market—the *Brown Shoe* practical

---

[19] The FTC cites to the "distinct customers" factor in *Brown Shoe* as support for defining a market around a targeted customer. However, *Brown Shoe* only listed "distinct customers" as one of many factors for courts to consider in defining a market. *Brown Shoe, 370 U.S. at 325*. It did not endorse defining a market around a group of targeted customers.

[20] The Merger Guidelines do not, for instance, set forth how a court is to distinguish a "targeted" group of customers from customers in general. This gives rise to the question of what limiting principles or factors a court should apply in defining a price discrimination market. Absent limitations, price discrimination against a single customer might be used to justify blocking a merger. This is not a mere theoretical possibility. According to the Merger Guidelines, "Off prices are negotiated individually with customers, the hypothetical monopolist test may suggest relevant markets that are *as narrow as individual customers*." Merger Guidelines § 4.1.4 (emphasis added).

indicia and the Merger Guidelines' SSNIP test—support a finding **[**77]** that broadline distribution to national customers is a relevant product market. *See, e.g.*, Areeda & Hovenkamp 3d ed., *supra*, ¶ 533d ("If the defendant *can* profit by charging pharmacies a price significantly over its cost, then the pharmacy sales are a relevant market[.]").

a. Industry and public recognition

Among the most compelling evidence supporting a product market for national customers is the fact that regional broadliners have formed cooperatives, such as DMA and MUG, to compete for customers with a geographically dispersed footprint. Regional distributors, because of their limited footprints, do not have the capacity to serve customers with multi-regional needs across all of their locations. Only Sysco and USF have that capacity. These cooperatives were formed specifically to compete against Sysco and USF, by enabling regional competitors to combine to provide nationwide or multi-regional delivery and, importantly, to offer a single point of contact for the customer. Dan Cox, the President and CEO of DMA, explained that DMA was formed in 1988 as a competitive response to Sysco's merger with another company, Continental. *See* PX00565-051 at 202. He explained that "[w]hen that industry **[**78]** event took place, it was the first time that there was truly a national platform for foodservice distribution." *Id.* Put simply, business ventures like DMA would not exist if there were not a separate market for customers who have national or multi-regional distribution needs. *See* Rothery Storage, 792 F.2d at 218 n.4 (stating that courts must "assume that economic actors usually have accurate perceptions of economic realities").

Equally compelling evidence of the national-local distinction comes from a report done by the management consulting firm, McKinsey & Co., whom Sysco hired to assist with merger integration. After closely analyzing the two companies' operations, McKinsey prepared a presentation in July 2014, titled "National, Intermediate, and Field Coverage Models." The presentation observed that "Sysco and US Foods have different approaches to *grouping customers* and determining service models. . . . Both companies effectively operate two service models with distinct capabilities to serve *two types of customers*." PX09010-002 (emphasis added). The presentation described "National Customers" as those who "use complex contracts with margin schedules, make online purchases of proprietary products, require auditing **[**79]** support, and coordinate across multiple markets." *Id.* By contrast, "Field Customers" were those who "make weekly purchases through in-person consultations, receive specialist support tailored to independent restaurants, require minimal auditing support, and operate in 1 or few markets." *Id.* McKinsey further observed that national customers' "requirements" included "[s]et margin schedule contract[s]"; "[e]fficient ordering across multiple locations"; "Marge number[s] of deviated, proprietary and close-coded **[*41]** products"; "[r]egulatory and audit support"; "[i]n-depth reporting"; and "[c]onsistency of service, pricing and products across multiple [m]arkets." PX09010-004. Field customers' "requirements," on the other hand, included the "[a]bility to make decisions each week along with consultation"; "[a]ccess to national, commodity, and some proprietary products"; "[f]ull business, culinary, and product support for independent businesses"; and "minimal" "[c]oordination across geographies." *Id.* McKinsey ultimately recommended that the companies recognize and build a new service model around a third kind of customer—an "Intermediate" customer—who would be identifiable based on five variables: (i) national contract/no contract; (ii) nature of industry; (iii) number of markets; (iv) number of regions; **[**80]** and (v) size of annual sales. PX09010-007. The McKinsey presentation identified as "conclusively" national those customers who operate in three or more markets or two or more regions. *Id.*

McKinsey is not the only industry analyst or expert to acknowledge that national customers form a market distinct from local buyers. Cleveland Research Company, an investment research firm, produced an analyst report on Sysco after the merger's announcement and recognized that Sysco and USF serve a distinct group of national customers. One of the report's conclusions was that "Sysco/USF will [be] able to keep most of their larger contracted and *national account customers* for the near- and medium-term due to national scale and existing contracts . . . . Based on our research, most national operators prefer to deal with one distributor because it is more efficient and less expensive than dealing with several regional players." PX09332-006 (emphasis added).

The industry's trade group, the International Food Distributors Association ("IFDA"), also recognizes a distinction between national and local customers. IFDA produces a Quarterly Operations survey that reports separate sales figures for "national" **[**81]** and "street" accounts. PX00570-004 at 78. IFDA's President, Mark Allen, explained that

IFDA distinguishes between the two because "the dynamics between the two [types of] businesses might be a little bit different. The operating metrics might be a little bit different." *Id.* at 80.

Defendants' ordinary course documents also recognize the national-local distinction and tout their strategic advantage as to the former. *See* *H&R Block, 833 F. Supp. 2d at 52* (***HN23***[] "When determining the relevant product market, courts often pay close attention to the defendants' ordinary course of business documents."). A Sysco "Investor Day" presentation from 2010 distinguishes the company's "Contract Sales (Broadline)" from "Street Sales," PX03101-010, and separates its "Key Competitors - National," from regional competitors, PX03101-020. Similarly, a presentation entitled "Board of Directors Strategy Sessions," dated July 2010, distinguishes between Sysco's market size for "corporate contracts"—defined to include "major foodservice management (FSM) sales, major group purchasing organization (GPO) sales, and major chain sales (non FSM or GPO)"—and "Street" business. PX01008-006.

USF has similar documents. An internal USF presentation, titled "Business **[**82]** Overview," describes "[USF's] Customers" as falling into three categories: (i) "Street: Independent restaurants or small local chains"; (ii) "National Accounts: Contracted customers located across the country," including acute and long-term healthcare facilities, hotels and the hospitality industry, **[*42]** schools, and U.S. military and government agencies; and (iii) "National Chain Restaurants: Fast food and quick-serve establishments." PX03122-004. *See also* PX03034-006 (similarly categorizing the company's customers). A USF "Investor Presentation" from November 2012 describes USF as the "2nd" largest national broadline distributor," PX03000-006, and touts its "[a]bility to leverage our national scale to cost effectively service customers nationally," PX03000-014. Further, it distinguishes between "National Scale," where "US Foods is the second-largest broadline foodservice distributor in the U.S.," and "Local Scale," where "US Foods is estimated #1 or #2 position in [TEXT REDACTED BY THE COURT] of served markets," PX03000-014. *See also* PX03007-007 (internal document in which KKR & Co., one of USF's private equity owners, distinguishes between "Street and National Account customer segments").

Other **[**83]** key players in the industry also recognize that national customers are different. For instance, the President and CEO of PFG, George Holm, agreed that "Sysco and US Foods are the only two distributors for broadline with the capability to serve national broadline customers with locations dispersed throughout the United States," including foodservice management companies, GPOs, large healthcare systems, and certain restaurant chains. Hr'g Tr. 596. Representatives of DMA and Reinhart likewise referred to national customers as those that are geographically dispersed and need a single point of contact. *See* PX00412-002-003; PX00415-004.

b. Distinct customer needs

There is ample record evidence that national customers' needs differ from those of local customers. The McKinsey analysis described above concisely summarized those distinctions. PX09010-004.

For starters, national customers, because of their dispersed geographic presence, often require a broadliner to meet their foodservice needs in more than one region. As a result, the number of distribution centers in a broadliner's network is often an important factor for such customers. In sharp contrast, according to Sysco, "all, or almost all," **[**84]** of its "local contract customers" are served by only one distribution center. PX01400-001.

The Defendants' ordinary course documents highlighted their comprehensive distribution networks as a competitive advantage for serving national customers. *See, e.g.*, PX03000-014 (USF presentation touting its "[a]bility to leverage our national scale to cost effectively service customers nationally"); PX00247-001-002 (USF email communication to [TEXT REDACTED BY THE COURT] describing the "US Foods Value Proposition" as including "Privately held National Distribution footprint company"; "Single IT operating platform nationally"; and a "Single Point of Contact"); PX01062-005 (Sysco presentation to Aramark highlighting that Sysco's "national footprint, strong service approach and our breadth of product offerings is what differentiates us from our competition"). As USF's David Schreibman acknowledged during the evidentiary hearing, "US Foods['] leading national market position is due to US Foods['] geographic presence that includes 62 distribution centers across the United States." Hr'g Tr. 1520-21. He also acknowledged that Sysco was the only company with greater scale than USF. *Id.* at 1522.

In addition to multi-regional **[**85]** distribution capabilities, national customers generally demand a set margin contract that applies across multiple locations. As PFG's George Holm testified, a single contract enables customers to simplify contract administration and to reduce administrative **[*43]** costs. *Id.* at 600-02. Additionally, national customers often use RFPs and/or bilateral negotiations to award broadline foodservice distribution contracts. *Id.* at 1595-97. In sharp contrast, pricing for local or "street" customers, according to Sysco, "[is] ultimately the result of individual negotiations between the customer and [broadliner]" and "can vary on a weekly and even daily basis." PX06057-032.

National customers also seek a single technology platform for handling their purchases. Consolidating purchasing through a single ordering platform creates efficiencies and cost savings, particularly as it relates to managing direct contracts with manufacturers and administering price changes. The importance of this feature is evidenced by DMA's development of a single ordering platform that enables customers to purchase from its members. Indeed, DMA promotes its technology platform as superior to Sysco's and USF's. PX00565-006 at 23-24. If national customers **[**86]** had not demanded such a feature, DMA would not have developed it.

Finally, product consistency is a factor for some national customers, particularly for those who wish to purchase private label products. *See* PX09010-004 (McKinsey report identifying as a "Customer requirement[]" for "National" customers "consistency of service, pricing, and products across multiple Markets"). Large customers can achieve a high degree of product consistency through direct contracting with product manufacturers or by purchasing proprietary brands stocked by Defendants. DX-01359 at 73 (Dr. Bresnahan report observing that "one way customers that value consistency achieve it is through direct negotiation with manufacturers to create propriety products" and that "[c]ustomers can also rely on national brands to ensure consistency"). However, because private label goods offer a strong value benefit, if a national customer wishes to purchase such goods and have them available across all of its locations, it can do so most efficiently through a broadliner with national geographic scope. *See* Hr'g Tr. 600 (George Holm of PFG stating that one reason national customers prefer to contract with Sysco or USF is that "[w]here they have **[**87]** a preference for a private brand, [ ] it is the same product [across] their system").

c. Defendants' Operations

Both Sysco and USF operate dedicated sales groups from their national headquarters that are responsible for negotiating and managing contracts with customers who use multiple distribution centers. *See* *Grinnell, 384 U.S. at 572-74* (holding that ***HN24***[] centralized station security services operated on a national level is a relevant product market). Sysco refers to these customers as "corporate multi-unit customers," or CMUs. USF refers to them as "national sales customers." According to USF's Senior Vice President for National Sales, Tom Lynch, each national customer in his group has a single USF representative who is responsible for that customer. The largest customers are assigned a full-time dedicated employee to manage the account. PX00517-014-015 at 56-58.

d. SSNIP Test

Contraiy to what Defendants contend, Dr. Israel did perform a SSNIP test to determine whether there is a separate product market for national customers. That SSNIP test was performed as an element of the SSNIP test that Dr. Israel used to assess whether broadline distribution was a relevant product market. As Dr. Israel testified, he applied **[**88]** to national customers the same 10 percent gross margin that he used to calculate the aggregate diversion ratio for all customers. Hr'g Tr. 1005 (stating that he used a 10 percent **[*44]** gross margin "to both local and national customers"). He derived the actual diversion for national customers based on the RFP/bidding data provided by the defendant companies. *Id.* at 1009 (describing the "RFP/bidding data" as "really national [customer] data"). Using the same methods discussed above, Dr. Israel calculated the actual diversion for Sysco's national customers to be [over 70%] and the actual diversion for USF's national customers to be [over 70%]. In other words, over [70%] of the time (based on potential revenue from sales opportunities), when Sysco or USF lost a bid opportunity for a national customer, it was to another broadliner. Because these percentages were greater than the aggregate diversion ratio of 50 percent, Dr. Israel concluded that broadline service to national customers was a relevant market. In other words, Dr. Israel found that only 50 percent of national broadline customers would need to remain within the broadline market to make a price increase profitable, while the actual percentage **[**89]** of national customers who would remain within the broadline market (by switching to another broadliner) was greater than 50 percent. Dr. Israel's calculations, therefore, indicated that broadline distribution to national customers was the relevant product market.

The court already has expressed its reservations about relying on the RFP/bidding data to precisely calculate the aggregate diversion ratio. But, as before, the court finds that the ultimate conclusion of the SSNIP test—that broadline foodservice to national customers is a relevant product market—is supported by the weight of the evidence. Numerous national customer witnesses testified that other channels of distribution were not adequate substitutes for broadline distribution.[21] Although Defendants have shown that some national customers who were served by broadliners are now served by systems or systems-like distributors—most notably, Subway and Five Guys—those are the exceptions. Subway and Five Guys, because of their limited menus, are more amenable to substituting to a systems model. The same simply cannot be said of other large national customers, like GPOs, foodservice management companies, and hospitality chains, which **[**90]** rely heavily on broadliners.

e. Defendants' arguments against a national customer market

Asserting that there **[**91]** is no separate product market for national broadline customers, Defendants first argue that the national-local distinction is "arbitrary" because it is based on nothing more than customer preference about account management. Defendants' executives testified that Sysco's CMU customers and USF's national customers are so designated, not because of any particular characteristic or group of characteristics, but purely because the customer prefers to have its **[*45]** account managed by the headquarters sales team, instead of by its local distribution center. The FTC's and Dr. Israel's reliance on the companies' administrative designation, Defendants argue, leads to arbitrary classifications. For example, some of Defendants' customers who use a small number of distribution centers are counted by the FTC as "national" customers. As Dr. Hausman demonstrated, 37 percent of Sysco's CMU customers use five or fewer distribution centers and 55 percent use ten or fewer. And, for USF, 51 percent of their national customers use five or fewer distribution centers and 67 percent use ten or fewer. Hr'g Tr. 1976. Additionally, similarly situated customers—in terms of size, number of distribution centers, revenues, **[**92]** etc.—are sometimes treated differently. One customer may be identified as national and another as local, simply because one prefers to be managed from headquarters and the other from the local distribution center.

Defendants are correct that their "national" customer lists are over-inclusive—not every customer on those lists has multi-regional distribution needs. And they are also correct that the FTC could have more accurately defined a class of "national" customers by testing each candidate national customer against specific "national" criteria, such as the number of distribution centers used. But, ultimately, for the purpose of defining a product market, the court finds that the parties'"national" customer designation is a useful proxy for customers requiring geographically dispersed distribution and attendant services.

As the graphic below prepared by Dr. Israel shows, if the merger were to occur, a significant proportion of the combined company's national customer revenues would come from customers who use a large number of distribution centers. PX09375-077, Figure 3. National customers using more than 35 distribution centers would account for [TEXT REDACTED BY THE COURT] percent **[**93]** of a merged Sysco-USF's revenue; national customers using more than 24 distribution centers would account for [TEXT REDACTED BY THE COURT] percent of revenue; and national customers using at least 10 distribution centers would account for [TEXT REDACTED BY THE COURT] percent of revenue. Those figures demonstrate that Defendants' national-customer designations capture those key customers (based on revenues) who use a large number of distribution centers. The "national"

---

[21] *See* Hr'g Tr. 143-145 (Christine Szrom, fact witness for U.S. Department of Veteran Affairs, explaining that she is not familiar with systems distribution and could "absolutely not" use a cash-and-carry distributors); Hr'g Tr. 214-17 (James Thompson, Head of Procurement for Interstate Hotels and Resorts, stating that "it would be very difficult if not impossible" to operate Interstate's foodservice distribution without a broadliner and that specialty is not a substitute for broadline distribution); PX[TEXT REDACTED BY THE COURT]-002 (Joan Ralph, Group Vice President at Premier, Inc., saying that "[e]ven if we choose one day to contract with systems distributors, specialty distributors, or cash and carry stores, each would be as additional, distinct service for our members who may need a quick, last-minute item or two; none could replace or serve as a substitute for broadline distribution services"); PX[TEXT REDACTED BY THE COURT]-002 ([TEXT REDACTED BY THE COURT], noting that [TEXT REDACTED BY THE COURT] cannot contract with a systems distributor or use other forms of distribution).

designation includes, among others, the largest GPOs, like Premier, Novation, and MedAssets, each of whom uses over [TEXT REDACTED BY THE COURT] distribution centers; the largest foodservice management companies, like Sodexo, Aramark, and Compass, each of whom uses more than [TEXT REDACTED BY THE COURT] distribution centers; the largest hotel management company, Hilton, which uses [TEXT REDACTED BY THE COURT] distribution centers; and the second largest government customer, the U.S. Department of Veterans Affairs, which uses [TEXT REDACTED BY THE COURT] distribution centers (the largest is the U.S. Department of Defense, which uses [TEXT REDACTED BY THE COURT] distribution centers). PX09375-076, Table 5. Thus, for these **[**94]** customers, the label "national" is not merely administrative; it accurately reflects this high revenue-generating group's actual needs. The fact that some smaller customers are included among the Defendants'"national" designations does not mean that the designation lacks evidentiary value for defining a market for national customers.

[redacted]

Next, Defendants assert that defining a price discrimination market around national customers is untenable because the FTC **[*46]** failed to show that so-called national customers shared any objectively observable characteristics that would enable the combined company to price discriminate against that group. *See* Merger Guidelines § 3 (stating that "differential pricing" is an essential element of price discrimination, which "may involve" offering different pricing to different types of customers "based on observable characteristics"). In other words, they argue that this grouping of customers is so heterogeneous that there is no common, identifiable characteristic that could serve as a proxy for determining which customers in the broadline market have inelastic demand.

Defendants are undoubtedly correct that, even among their largest customers, there is great variety **[**95]** in the customers' servicing needs and requirements. But price discrimination can occur even when customers do not have common observable characteristics. ***HN25***[] As the Merger Guidelines state, markets for targeted customers may exist "when prices are individually negotiated and suppliers have information about customers that would allow a hypothetical monopolist to identify customers that are likely to pay a higher price for the relevant product." Merger Guidelines § 4.1.4; *see also* Carl Shapiro, *The 2010 Horizontal Merger Guidelines: From Hedgehog to Fox in Forty Years*, 77 Antitrust L.J. 49, 93 (2010) (observing that, in markets for intermediate goods and services, "prices typically are negotiated and price discrimination is common").

Here, the evidence is clear that Defendants engage in individual negotiations with their national customers and possess substantial information about them. Indeed, the fact that Defendants employ substantially more sales representatives than other broadliners, PX09350-218, Table 30, and assign full-time dedicated employees to some of their largest customers is indicative of the "know-your-customer" philosophies of both firms. Defendants, therefore, already have substantial customer information that **[**96]** would allow them to predict which of their customers have inelastic demand and which do not. Price discrimination can occur in such a marketplace, even if the targeted customers do not share specific identifiable traits.

Finally, Defendants contend that a product market of targeted national customers does not comport with business realities. This argument has two main elements. First, they assert that, contrary to what the FTC contends, Compl. ¶¶ 5, 42, national customers do not require a broadline foodservice distributor that is national in scope. Rather, they argue, even at current prices, many large customers spread their distribution needs over multiple regional suppliers. For instance, Defendants cite GPOs, like [TEXT REDACTED BY THE COURT], [TEXT REDACTED BY THE COURT], Amerinet, and large government agencies, like the Defense Logistics Agency, as using a regional contracting approach. Defs.' Opp'n Br. at 15. They also refer to one of the largest foodservice management companies, Sodexo. which splits its distribution into [TEXT REDACTED BY THE COURT] regions. *Id.* And, then there is Subway and Five Guys, two large chain restaurants that have regionalized and purchase from multiple **[**97]** suppliers. *Id.* at 15-16. Because these types of customers can regionalize or credibly threaten to regionalize. Defendants argue, the merged company would not be able to discriminate against them on price.

But Defendants' argument founders when faced with the actual purchasing habits of the industry's largest customers. The evidence shows that the bulk of the bloodline purchasing done by most geographically dispersed broadline customers is still done through Sysco and USF. Of Avendra's members' broadline spend, [TEXT REDACTED BY THE COURT] **[*47]** percent is with Sysco and USF. Pl.'s Corrected Proposed Findings of Fact and Conclusions of Law, ECF No. 173 at 114 [hereinafter PFF]. Members of other GPOs similarly purchase a large percentage of their goods from Sysco and USF. The total broadline spend of Premier,[22] Novation, MedAssets, and HPSI members with Sysco and USF is, respectively, [TEXT REDACTED BY THE COURT] percent, [TEXT REDACTED BY THE COURT] percent, [TEXT REDACTED BY THE COURT] percent, and [TEXT REDACTED BY THE COURT] percent. *Id.* at 113-15; FTC Closing Arg. Slides at 35. Large foodservice management companies similarly make the bulk of their broadline purchases from Sysco and UST'. Sodexo, Aramark, Compass and Centerplate, respectively, **[**98]** spend [TEXT REDACTED BY THE COURT] percent. [TEXT REDACTED BY THE COURT] percent, [TEXT REDACTED BY THE COURT] percent, and [TEXT REDACTED BY THE COURT] percent of their broadline foodservice distribution dollars with Sysco and USF. PFF at 113-16; FTC Closing Arg. Slides at 35. The story is similar for large hospitality customers. Two of the largest, Hilton and Interstate, allocate [TEXT REDACTED BY THE COURT] percent and [TEXT REDACTED BY THE COURT] percent of their broadline spend, respectively, to the two companies. PFF at 114, 116; FTC Closing Arg. Slides at 35. Even the Defense Logistics Agency, which contracts regionally, dedicates [TEXT REDACTED BY THE COURT] percent of its broadline spend to Sysco and USF. PFF at 116; FTC Closing Arg. Slides at 35.

The court infers from this evidence that geographically dispersed customers view Sysco and USF as having significant comparative advantages over regional distributors, particularly because of their far-reaching distribution networks. Though some customers have spread their business over multiple broadliners, a significant portion (as measured by total revenues) have not. Indeed, PFG's George Holm observed that the "*clear trend* ***[**99]*** amongst national broadline customers is to move toward a single nationwide provider." Hr'g Tr. 598 (emphasis added); PX09081-002 (letter from PFG's counsel to FTC, dated November 14, 2014, stating the same). *See [Brown Shoe, 370 U.S. at 332]* (footnote omitted) ("Another important factor to consider is the trend toward concentration in the industry."). Mr. Holm further admitted that either Sysco or USF essentially wins every RFP issued by a national customer. Hr'g Tr. 598-99. And PFG acknowledged by letter to the FTC that, even as the country's third-largest broadliner, "PFG has difficulty competing for national broadline accounts because it does not have a nationwide footprint of broadline distribution centers." PX09081-001. Other large regional broadliners have said the same about their own businesses models.[23] Defendants' contention—that a product market defined around national customers

[22] As to Premier, the person responsible for its foodservice program, Joan Ralph, testified that [FOOTNOTE REDACTED BY THE COURT]. Hr'g Tr. 474; PX00475-001-0002.

does not comport with business reality because such customers have regionalized or can regionalize—is thus belied by the record evidence.

Second, Defendants argue that margin data shows that, as a merged entity, they would not be able to price discriminate against national customers. Dr. Hausman demonstrated that Defendants' margin on sales to customers who use fewer distribution centers is actually *higher* than their margin on sales to those who use more. DX-01355 at 58-61. Defendants contend **[*48]** that under the FTC's theory, they presently have a duopoly as to national customers, yet they do not earn duopoly profits on that customer class. Defendants thus maintain that, just as they cannot today price discriminate to earn duopoly profits, they would not be able to price discriminate after the merger to earn monopoly profits.

Defendants' argument, however, is unconvincing. Defendants' present inability to earn duopoly profits on national customers is probably because large customers can keep prices down by leveraging the defendant companies against one another. As the Cleveland Research Company observed: "Based on our research, **we believe both Sysco and US Foods have priced each other down competing for larger national/regional [**101] contract accounts** over the last several years." PX09332-004. The ability of large buyers to keep prices down, functioning as what is known in antitrust literature as "power buyers," *see* *Cardinal Health, 12 F. Supp. 2d at 58-59*; Merger Guidelines § 8, depends on the alternatives these large buyers have available to them, *see* Shapiro, *supra*, at 95; Areeda & Hovenkamp 3d ed., *supra*, ¶ 943a. If a merger reduces alternatives, the power buyers' ability to constrain price and avoid price discrimination can be correspondingly diminished. *See* Merger Guidelines § 8 ("Normally, a merger that eliminates a supplier whose presence contributed significantly to a buyer's negotiating leverage will harm that buyer."). Thus, the fact that Defendants are currently unable to price discriminate against national customers does not mean that they would be unable to do so as a merged firm.

C. Product Market Summary

Having considered and weighed the parties' arguments and evidence, the court concludes that the FTC has carried its burden of showing that, for purposes of merger analysis, (i) broadline foodservice distribution is a relevant product market, and (ii) broadline foodservice distribution to national customers is also a relevant product market.

D. Relevant Geographic [**102] Market

The court now turns to the second part of defining the relevant market, which involves determining the relevant geographic market. ***HN26***[] The Supreme Court has stated that, for *Section 7 of the Clayton Act*, the relevant geographic market is "the area in which the goods or services at issue are marketed to a significant degree by the acquired firm." *Marine Bancorp., 418 U.S. at 620-21*. Stated differently, "[t]he proper question to be asked. . . [is] where, within the area of competitive overlap, the effect of the merger on competition will be direct and immediate." *Phila. Nat. Bank, 374 U.S. at 357*; *see also* *Cardinal Health, 12 F. Supp. 2d at 49* (citation omitted) (internal quotation marks omitted) (stating that the relevant geographic market is "the area to which consumers can practically turn for alternative sources of the product and in which the antitrust defendants face competition"). Like the product market, the geographic market must "correspond to the commercial realities of the industry and be economically significant." *Brown Shoe, 370 U.S. at 336-37* (footnote omitted) (internal quotation marks omitted). The Supreme Court has recognized that an "element of 'fuzziness would seem inherent in any attempt to delineate the relevant geographical market," and therefore "such markets need not—indeed cannot—be defined with scientific **[**103]** precision." *Conn. Nat. Bank, 418 U.S. at 669* (quoting *Phila. Nat'l Bank, 374 U.S. at 360 n.37*). That said, the **[*49]** relevant geographic market "must be sufficiently defined so that the [c]ourt understands in which part of the country competition is threatened." *Cardinal Health, 12 F. Supp. 2d at 49*.

---

[23] *See, e.g.*, PX00415-004 (Reinhart); PX00416-003 (Merchants); PX00434-003-004 (Labatt); PX00438-002-003 (Cash-Wa); PX00443-005 (Ben E. Keith); PX00449-003 (Jacmar); PX00451-005 (Services Group **[**100]** of America); PX00458-004 (Nicholas & Co.); PX00460-002-003 (Shamrock); PX00529-047-048 at 188-89 (Gordon).

The FTC contends that there are two relevant geographic markets in this case. For national broadline customers, the relevant geographic market is nationwide. For local broadline customers, the relevant geographic markets are localized around Defendants' distribution centers.

With regard to national customers, for essentially the same reasons that the FTC asserts that there is a product market for broadline distribution to national customers, the FTC asserts that the geographic market for those customers is nationwide. The FTC relies on the fact that Defendants plan on a national level and have "national account" teams dedicated to national customers; their contractual pricing and service terms with national customers apply across regions; and their competition for national customers is largely other broadliners with nationwide coverage.

As for local customers, as discussed in more detail below, the FTC's local geographic markets were constructed by Dr. Israel and are premised **[**104]** on customers' proximity to Defendants' distribution centers. The basic idea is that, for local customers, distance to a distribution center is a key service factor and, for Defendants, distance traveled from a distribution center to make deliveries is a critical cost component. The FTC alleges that the merger threatens to harm competition in 32 local geographic markets where Sysco and USF together currently have dominant market shares. Compl. ¶ 60.

Defendants dispute that there is a nationwide geographic market for the same reasons that they contend that there is no national customer product market. As for the local geographic markets, Defendants aggressively challenge the methodology that Dr. Israel used in defining local markets. Their primary criticism is that the geographic areas are drawn so narrowly that they exclude actual competition from the relevant market. This results, they contend, in local market concentrations that artificially inflate Defendants' market shares.

1. National Market

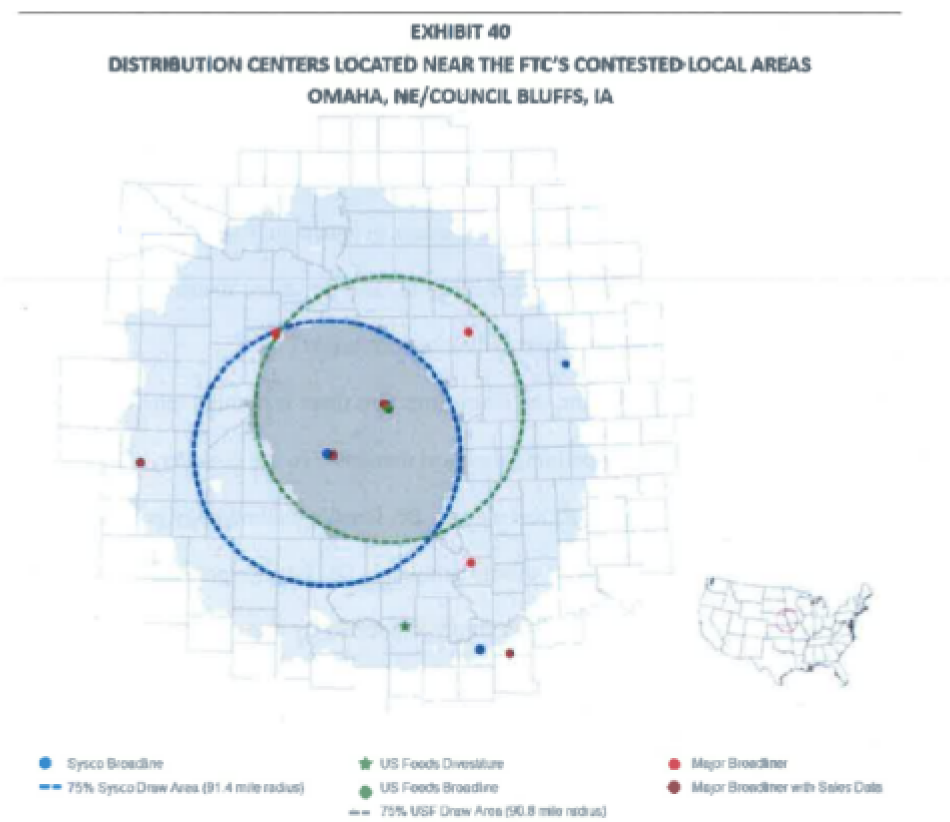
Although the physical act of delivering food products occurs locally, for national customers the relevant geographic area for competitive alternatives is nationwide, primarily because of their **[**105]** geographically dispersed footprint. Defendants compete within this market by touting their nationwide distribution capabilities to these customers; bidding against other broadliners with multi-regional capabilities (which is to say, against each other and the regional cooperatives); coordinating the marketing, negotiating, and managing of these customers through their "national account" teams; and entering with these customers into a single contract whose terms, including pricing, apply across regions. For these reasons, the court finds that the relevant geographic market for broadline foodservice to national customers is nationwide. *See* *Grinnell, 384 U.S. at 575-76* (finding a national geographic market where central station services "operated on a national level," and there was "national planning," a nationwide schedule of prices, and nationwide contracting for multi-state businesses); *Cardinal Health, 12 F. Supp. 2d at 50* (finding a national geographic market where evidence showed that "GPOs negotiate contracts with several wholesalers, making the same prices available throughout the country to all of their members—local, regional, or national").

[*50] *2. Local Markets*

Defining the local geographic market presents a far greater challenge. Not surprisingly, **[**106]** there is no industry standard for delineating the area that makes up a local geographic market for broadline distribution. Each local market has its own unique attributes. Customer composition and concentration differs across markets; so does the demand for products, with SKU variations reflecting local tastes and palettes. Average driving distances for foodservice distributors vary depending on the density of the area, with longer hauls more common in rural parts of the country and shorter trips more prevalent in urban areas. And, of course, the competitors vary from market to market.

The FTC tasked Dr. Israel with defining the local geographic markets. He constructed them as follows. In his first step, Dr. Israel drew circles around the location of each Sysco and USF distribution center. To determine the size of each circle, Dr. Israel used a radius, referred to as the "draw distance," that, on average, captured 75 percent of the distribution center's sales to local customers. The length of each distribution center's 75 percent draw radius differed. For example, the 75 percent draw distance around Sysco's Billings, Montana, facility was 262 miles, whereas the 75 percent draw distance **[**107]** around Sysco's Jersey City, New Jersey, facility was only 24 miles. PX09350-221-224, Table 38. What that means is Sysco drives over 200 miles further to capture 75 percent of its local sales in Billings than it does in Jersey City. That disparity makes sense, as more populated areas correspond to higher customer concentrations and shorter delivery distances.

In his second step, Dr. Israel identified each company's local customers that fell within an area of intersection between the draw circle around the Sysco distribution center and the draw circle around the USF distribution center. This area of intersection was termed the "overlap area." These "overlap customers," according to Dr. Israel, were the customers most likely to suffer harm from the merger, because these were the customers who would be left with one less alternative supplier after the merger. Exhibit 40 from Dr. Bresnahan's report, which is reproduced below, shows Dr. Israel's methodology in the Omaha, Nebraska, area. The blue-dotted circle corresponds to Sysco's 75 percent draw area, and the green-dotted circle corresponds to USF's. The dark gray area corresponds to the "overlap customers." DX-01359, Ex. 40.



[*51]

In his third **[**108]** step, Dr. Israel identified the broadline distributors who could compete for the customers in the overlap area. To do this, Dr. Israel drew circles around each overlap customer using the 75 percent draw radius. This created a larger circle that moved the outer boundaries of the overlap area by the same radius as the 75 percent draw area, which is represented by the light gray area in Exhibit 40 above. According to Dr. Israel's analysis, the light gray area is the area to which customers can practically turn for alternative sources of broadline distribution. All of the competitors located within the light gray area were factored into Dr. Israel's local market share computations.

Defendants attack Dr. Israel's "circle drawing exercise" as "arbitrary" and not reflective of industry realities. Defs.' Opp'n Br. at 27. Specifically, they assert that Dr. Israel's methodology is flawed because it assumes that competitors will drive no greater distance than Sysco's or USF's 75 percent draw radius to serve customers.

Defendants point to competitor declarations and testimony showing that in many of the 32 local markets in which the FTC claims Defendants have a dominant market share, competitors **[**109]** are willing to, and do, drive distances greater than the 75 percent draw radius to compete for and deliver to customers.

Notwithstanding this criticism, the court finds that there is nothing inherently "arbitrary" about Dr. Israel's methodology in defining the local markets. To the contrary, given the absence of an industry standard for defining a local market, Dr. Israel's methodology provides a practical approach and solution to an otherwise thorny problem. Dr. Israel's premise in defining these markets—that driving distance matters—is amply supported by the record and common sense. Customers who are farther away from a distribution center cost more to service. Longer distances **[*52]** correspond to, among other things, higher gas usage, more labor hours, and increased wear and tear on trucks. Given that the geographic market need not be defined by "metes and bounds," *Conn. Nat'l Bank, 418 U.S. at 669* (citation omitted) (internal quotation marks omitted), Dr. Israel's 75 percent draw methodology identifies "the area of competitive overlap, [where] the effect of the merger on competition will be direct and immediate," *Phila. Nat'l Bank, 374 U.S. at 357*. *See also* *Conn. Nat'l Bank, 418 U.S. at 670 n.9* (remanding to the district court to define the local market and observing that the "federal bank **[**110]** regulatory agencies define a bank's service area as the geographic area from which the bank derives 75% of its deposits"). The court therefore concludes that the relevant local geographic markets are the areas of overlap resulting from Dr. Israel's 75 percent draw methodology.

Ultimately, what really troubles Defendants about Dr. Israel's "circle drawing exercise" is not the resulting geographic areas, but what those areas mean for calculating Defendants' local market shares. The court considers those arguments in the next section.

II. THE PROBABLE EFFECTS ON COMPETITION

Having concluded that the FTC has carried its burden of establishing a relevant market—both a nationwide market for broadline foodservice to national customers and various local markets for broadline foodservice to local customers—the court turns next to "the likely effects of the proposed [merger] on competition within [those] market[s]." *Swedish Match, 131 F. Supp. 2d at 166*. As the Court of Appeals explained in *Heinz*, ***HN27***[] the government "must show that the merger would produce 'a firm controlling an undue percentage share of the relevant market, and [would] result[ ] in a significant increase in the concentration of firms in that market.'" *246 F.3d at 715* (quoting *Phila. Nat'l Bank, 374 U.S. at 363*). "Such a showing **[**111]** establishes a 'presumption' that the merger will substantially lessen competition." *Id.* (citation omitted).

The Court of Appeals has held that the FTC can establish its *prima facie* case by showing that the merger will result in an increase in market concentration above certain levels. *Id.* "Market concentration is a function of the number of firms in a market and their respective market shares." *Arch Coal, 329 F. Supp. 2d at 123*. ***HN28***[] A common tool used to measure changes in market concentration is the Herfindahl-Hirschmann Index (111-11). *Heinz, 246 F.3d at 716*; *see also* Merger Guidelines § 5.3. Hal figures are "calculated by summing the squares of the individual firms' market shares," a calculation that "gives proportionately greater weight to the larger market shares." Merger Guidelines § 5.3. "Sufficiently large ME figures establish the FTC's prima facie case that a merger is anti-competitive." *Heinz, 246 F.3d at 716*. The Merger Guidelines, which provide "a useful illustration of the application of BM," *FTC v. PPG Indus., Inc., 798 F.2d 1500, 1503 n.4, 255 U.S. App. D.C. 69 (D.C. Cir. 1986)*, state that a market with an HHI above 2,500 is considered "highly concentrated"; a market with an HHI between 1,500 and 2,500 is considered "moderately concentrated"; and a market with an HHI below 1,500 is considered "unconcentrated," Merger Guidelines § 5.3. Furthermore, **[**112]** a merger that results in "highly concentrated markets that involve an increase in the HHI of more than 200 points will be presumed to be likely to enhance market power." *Id.* In *Heinz*, the Court of Appeals recognized that an increase in **[*53]** HHI by 510 points "creates, by a wide margin, a presumption that the merger will lessen competition." *246 F.3d at 716*.

A. Concentration in the National Broadline Customer Market

I. Dr. Israel's National Broadline Customer Market Shares Calculations

In some cases the merging parties' market shares and post-merger HEM are seemingly uncontroversial. *See, e.g., Staples, 970 F. Supp. at 1081-82*; *H&R Block, 833 F. Supp. 2d at 71-72*. Not so here. Because there are no industry-recognized market shares for national broadline customers, the FTC tasked Dr. Israel with calculating the market shares and the HEM. Not surprisingly, Defendants vigorously contested his methodology and conclusions.

Dr. Israel calculated Defendants' national customer shares as follows. As his first step, he identified Defendants' individual sales to national broadline customers, *i.e.*, the numerator for the market share calculation. Those sales figures came directly from the parties' "national" customer designations: for Sysco, its sales to CMU customers, and for USF, its **[**113]** sales to national customers.

Next, Dr. Israel determined the total sales by all broadline distributors to national customers, *i.e.*, the denominator for the national share calculation. Again, because there is no industry-recognized figure for such sales, Dr. Israel estimated them. He did so in two ways. First, he aggregated the national sales of the three principal competitors for national customers—Sysco, USF, and DMA—and added in another share equal to DMA's. This total comprised the denominator for his "baseline" shares calculation. PX093 50-074. The addition of another DMA-sized share to the denominator was premised on his observation from the RFP/bidding data that the size of sales to national customers by all broadliners other than Sysco, USF, and DMA was about the same as DMA's.

Dr. Israel also used a second method to calculate the total sales to national customers. He aggregated the national sales reported by the largest 16 broadliners, including DMA and MUG, in response to the FTC's civil investigative demands. This data is referred to as CID data. Dr. Israel ran several "sensitivities" on this sum, adding in sales to account for variations in CID responses (e.g., some distributors **[**114]** did not segregate "national" from total sales). Dr. Israel also aggregated the national sales of Sysco, USF, DMA, and MUG, plus an estimate of national sales for all other responding distributors based on the assumption that each distributor's national-local sales ratio was the same as Defendants' ratio. Dr. Israel's various approaches yielded a total national broadline sales estimate of $28 to $30 billion. Hr'g Tr. 1177-78; *see also* PX09060-006 (PFG business plan estimating the size of the national customer market to be approximately $20 billion).

As his last step, Dr. Israel adjusted his market shares to account for the divestiture to PFG. The chart below reflects Dr. Israel's post-merger, post-divestiture market share and ?HI calculations. For his "baseline" calculation, Dr. Israel determined that the parties' post-merger national broadline customer market share would be 71 percent with an ?? increase of nearly 2,000 points. His ?ID data-based calculations, shown as (i) through (vi) in the chart, also yielded high post-merger shares and significantly increased HHIs. Dr. Israel's most conservative approach, in which he assumed that the top 16 broadliners had national to local sales **[**115]** ratios that were equal to Defendants' ratio **[*54]** of such shares—(iv) in the chart below—resulted in a post-merger market share of 59 percent and an ?? increase of 1,500 points. PX09350-186, Table 18.

Table 18

Shares of Sales to National Breadline Customers, After Accounting for the Proposed Divestiture

	Post-Divestitue Shares
	Combilled Share
Baseline	71%
(i) National	68%
(ii) National + Imputed National	65%
(iii) National + Regional	66%
(iv) Nationals + Systems	62%
(v) National + Regional + Systems	61%
(vi) Parties' Ratio of National	59%

	Post-Divestiture HHI's	
	HHI	HHI
Baseline	5.119	1.966
(i) National	4.935	1.953
(ii) National + Imputed National	4.549	1.799
(iii) National + Regional	4.614	1.822
(iv) Nationals + Systems	4.217	1.643
(v) National + Regional + Systems	4.087	1.590
(vi) Parties' Ratio of National	3.809	1.500

2. Defendants' Arguments

Defendants raise a host of objections to the reliability of Dr. Israel's methodology and calculations. They contend that his use of their "national" sales in the numerator was arbitraiy because, as discussed above, not all of Defendants'"national" sales are to customers with a multiregional footprint. The inclusion of those sales, they contend, overstated Defendants' national market share. They **[**116]** also argue that Dr. Israel's numerator included some sales to systems-like customers, such as to Five Guys, but his denominator excluded competitors' systems sales. This asymmetry, they assert, also resulted in an overstatement of Defendants' share. They further contend that the denominator used in Dr. Israel's "baseline" calculation is unreliable because it relies on the flawed RFP/bidding data set. And, finally, they argue that the denominator in the ?ID data calculation excludes over $30 billion in sales—though the source of this number is unclear.[24] They contend that these errors in developing the numerator resulted in biased market share calculations.

None of these arguments ultimately persuade the court that Dr. Israel's methodology or his market shares and HHI calculations are unreliable. The FTC need not present market shares and ?HI estimates with the precision of a NASA scientist. The "closest available approximation" often will **[**117]** do. *PPG, 798 F.2d at 1505* (citation omitted); *see also* *H&R Block, 833 F. Supp. 2d at 72* (stating that ***HN29***[] a "reliable, reasonable, close approximation of relevant market share data is sufficient"). Indeed, in *PPG*, the FTC presented, and the Court of Appeals accepted, share calculations for "every market the evidence suggests is remotely possible," which "yield[ed] results of similar magnitudes in market concentration." *798 F.2d at 1506*. Similarly, Dr. Israel ran multiple variants of his market shares and concentration analysis, using two different data sets and modifying one of these data sets, the CID data, in six different ways. Most convincing to the court was Dr. Israel's final method of calculating shares using the CID data, which assumed that all 16 of the top broadliners had the same national-local sales ratio as Defendants did. That approach yielded a **[*55]** low-end market share of 59 percent and an ?HI increase of 1,500 points—almost three times the 510 points that the Court of Appeals in *Heinz* found created a presumption of harm by a "wide margin." *246 F.3d at 716*. This variation almost certainly *underestimated* Defendants' market shares, as smaller broadliners are unlikely to have a ratio of national-local sales comparable to Defendants' ratio.

Another reason Defendants' arguments **[**118]** do not sway the court is that other evidence in the record supports Dr. Israel's calculations. As discussed above, the largest customers for broadline distribution in the country—healthcare GPOs, foodservice management companies, hospitality companies, and large government agencies—make the vast majority of their broadline purchases from Defendants. These customers individually spend hundreds of millions of dollars (or more) on broadline distribution—totaling approximately half of the national broadline market (based on Dr. Israel's calculation of a total market of $28 to $30 billion). *See* FTC Closing Arg. Slides at 35. If the largest customers are presently spending between 60 to 100 percent of their total food budget with Defendants, *id.*, then Dr. Israel's low-bound, post-merger combined market share of 59 percent is consistent with market realities.

[24] "Dr. Israel acknowledged that he left out $30 billion in systems distribution in the "sensitivity analysis purporting to account for systems sales." Defs.' Proposed Findings of Fact and Conclusions of Law, ECF No. 171 at 263 (citing Hr'gTr. 1259-60).

In addition, the only independent market share analysis of the broadline industry identified by the parties corroborates Dr. Israel's conclusions. The foodservice industry research firm Technomic collected 2014 sales data from the country's 43 largest broadliners. DX02016. Taken together, Technomic estimated total broadline sales to be $125 billion. Of that total, **[**119]** Sysco accounted for $35.7 billion and USF $23 billion, for a combined sum of $58.7 billion—nearly 47 percent of U.S. sales. *See id.; see also* PX09045-015 (PFG presentation to FTC stating that "[t]he two largest broadliners (Sysco and US Foods) accounted for 51% of all broadline sales in 2010," based on a study by Hale Group, "Focus on Foodservice Distribution," dated April 11, 2013); PX09045-014 (PFG presentation to FTC highlighting a 2011 Technomic study showing that Sysco and USF had a combined market share of 58 percent among the top 10 broadline food distributors).

Technomic's 47 percent combined market share estimate for *total broadline* sales is consistent with Dr. Israel's low-end, post-divestiture estimate of 59 percent for *national broadline* sales. The Technomic data did not segregate national and local broadline customers. However, because the largest customers buy disproportionately from Sysco and USF, it stands to reason that the companies' combined market share for national customers would be greater than 47 percent, as Dr. Israel found. Even a combined market share of 47 percent (admittedly, a pre-divestiture number) can give rise to a presumption of harm. *See* *Phila. Nat'l Bank, 374 U.S. at 364* ("Without attempting **[**120]** to specify the smallest market share which would still be considered to threaten undue concentration, we are clear that 30% presents that threat").

3. The Court's Finding as to National Broadline Customer Market Shares

The court thus finds that the FTC has shown, through Dr. Israel's testimony and other evidence, that a merger of Sysco and USF will result in a significant increase in market concentration in the market for national broadline customers. The FTC therefore has established a rebuttable presumption that the merger will substantially lessen competition in the market for national broadline distribution.

[*56] B. Concentration in the Local Markets

1. Dr. Israel's Local Broadline Customer Market Shares Calculations

In addition to the market for national customers, the FTC also contends that the merged firm would create highly concentrated local markets for broadline foodservice distribution. To be precise, the FTC asserts that, in 32 different local markets, the merger between Sysco and USF would result in dramatic increases in HHIs, thereby substantially lessening the competition in those markets. Compl. ¶ 60, App. A. The FTC also maintains that the divestiture to PFG will not resolve **[**121]** Defendants' post-merger local market dominance.

As with the market for national customers, there is no industry study of local market shares. *See* PX09045-019 ("PFG is not aware of any systematic industry market share data."). The FTC again relied on Dr. Israel for those numbers. His starting point for calculating local share percentages was his 75 percent draw area methodology for defining the local geographic markets. *See* PX09350-058. As already discussed, Dr. Israel first identified the 75 percent overlap area in each local market and then identified the competitors that could serve those customers by drawing a circle with a radius equal to the 75 percent draw distance around each overlap customer. Next, to calculate the overall local market shares, Dr. Israel calculated a customer-specific market share. That is, for each customer in the overlap area, he calculated the market shares for the competitors who were located within the customer's 75 percent draw distance radius. Dr. Israel then aggregated each of these customer-specific shares to the local level, using weighted averages across all overlap customers. The consequence of this methodology was that, the greater the competitor's **[**122]** distance from the center of the overlap area, the less weight that competitor would receive in the overall local market share calculations. Stated differently, because these distant competitors' market shares would only come into the calculation due to customers on the borders of the overlap area, those competitors' shares would be smaller than the shares of competitors whose distribution centers were closer to the middle of the overlap area—namely, Sysco and USF.

When calculating market shares, Dr. Israel used three different metrics: (i) square footage of distribution centers; (ii) local broadline sales; and (iii) number of sales representatives. Dr. Israel used the first and third variables as proxies for revenues and as a way to confirm the market share calculations that were based on the second variable, sales revenues. To calculate shares based on revenues, Dr. Israel used the Defendants' sales data for the numerator. For the denominator, he used the sales numbers, where available, for local broadliners. For those local competitors for whom he did not have actual sales data, he estimated the sales revenue based on the size of the distribution center. PX09350-134 at n.410. Based **[**123]** on those metrics, in local markets with the 20 highest increases in pre-divestiture HHIs, Defendants' combined market shares ranged from 100 percent in San Diego, California, to over 65 percent in multiple markets. The HHT increases in each of top 20 markets were over 2,000 points. PX09350-135-137.

Dr. Israel also calculated post-divestiture market concentrations and HHI increases. According to the table below, in Memphis, Tennessee; Omaha, Nebraska; Sacramento, California; and Charleston, South Carolina, the post-divestiture combined markets shares remain above 80 **[*57]** percent with HHI increases in excess of 4,100, 1,400, 2,900, and 2,900 points, respectively. PX09350-213, Table 21. In seven other local markets, Dr. Israel calculated the post-divestiture combined market shares to be between 57 percent and 76 percent, with HHI increases in each case in excess of 1,500 points. *Id.*

Table 21

Examples of Areas with Large Change in HHI despite Divestitures

CBSA	**Post-Merger Combined Share**	**Delta HHI**
Omaha-Council Bluffs. NE-LA	90.3%	1.410
Sacramento--Roseville--Arden-Arcade. CA	88.6%	2.974
Durham-Chapel Hill. NC	75.4%	2.807
Charleston-North Charleston. SC	80.2%	2.947
Birmingham-Hoover. AL	57.5%	1.542
Jackson, MS	66.0% **[**124]**	2.155
Memphis, TN-MS-AR	93.8%	4.123
Columbia, SC	72.8%	2.315
Raleigh, NC	71.3%	2.188
Lynchburg, VA	63.3%	1.588
Rochester, NY	63.7%	1.574

2. Defendants' Arguments

Defendants attack Dr. Israel's local market share calculations in much the same way they did his national market share calculations--by contesting his methodology and inputs. Defendants assert that Dr. Israel's methodology was premised on the unreliable assumption that no competitor would drive a greater distance than Sysco or USF currently does to provide broadline services. In other words, they criticize Dr. Israel's use of the same draw radius to identify the relevant local competition as he did to identify the overlap area. As a result, they argue, Dr. Israel's local market share calculations excluded sales from broadliners who travel greater distances and thereby overstated Defendants' combined market shares.

To demonstrate this point, Dr. Bresnahan presented an analysis of the Omaha, Nebraska market. He testified that, according to Dr. Israel's analysis, Defendants had combined sales in Omaha of $95 million and a combined market share of 90 percent. According to Dr. Bresnahan, Dr. Israel's methodology did not factor in at least $[TEXT **[**125]** REDACTED BY THE COURT] million in sales by another local distributor, Cash-Wa, whose distribution facility is 129 miles west of Omaha—farther out than the 91-mile 75 percent draw radius that Dr. Israel had used for the area.

Dr. Bresnahan based his conclusion on sales data per zip code produced by Cash-Wa, which Dr. Israel had not considered in his analysis. According to Dr. Bresnahan, the zip code data showed that in 2013, Cash-Wa made sales to customers in zip codes within the 75 percent overlap area—at least $[TEXT REDACTED BY THE COURT] million worth—which Dr. Israel did not account for because of his driving distance assumption. Had these Cash-Wa sales been taken into account, Defendants' combined market shares and increase in HHIs would have been lower. As illustrated by his Omaha study, Dr. Bresnahan concluded that Dr. Israel's local market share methodology produced unreliable results.

Dr. Bresnahan's Omaha study convincingly demonstrated that Dr. Israel's 75 percent draw area methodology resulted in underreported competitor sales in the **[*58]** Omaha market. But what it did not show convincingly was by *how much*. Dr. Bresnahan's initial expert report stated that Cash-Wa's sales in the **[**126]** overlap area were over $[TEXT REDACTED BY THE COURT] million. DX01359-139. At the evidentiary hearing, however, he said that Cash-Wa's sales into that area were "at least $[TEXT REDACTED BY THE COURT] million," DX-05029 at 42, and he did not explain why that number differed from his report.[25] More fundamentally, Dr. Bresnahan's reliance on zip code data had its limits. As Dr. Bresnahan conceded, the zip code data did not differentiate between local and national customers or broadline and systems customers. Hr'g Tr. 2186. Dr. Israel explained that he did not use the zip code data for that very reason, as well as the additional reason that he did not have zip code data for all local market competitors. In addition, Cash-Wa does substantial business selling tobacco products; however, the zip code data does not segregate those sales. *Id.* As a result, although the court agrees with Defendants that Dr. Israel's methodology excluded some local broadline sales in Omaha, the court cannot reliably determine the extent of the underestimation. And, notably, even if Dr. Bresnahan's $[TEXT REDACTED BY THE COURT] million figure consisted entirely of local broadline sales, Defendants would still have **[**127]** a high combined local market share of [TEXT REDACTED BY THE COURT] percent ($95 million/$[TEXT REDACTED BY THE COURT] million + $95 million) = [TEXT REDACTED BY THE COURT] percent).

Ultimately, the court finds that Dr. Israel's specific local market calculations is informative, but not conclusive evidence, of the merger's potential harm to local broadline customers. As the Omaha study showed, because Dr. Israel's 75 percent draw methodology excluded some competitor sales and because each local market has nuances that cannot be captured by his methodology, the court cannot rely conclusively on Dr. Israel's precise local share calculations as a measure of competitive harm.

The court, however, finds variations on Dr. **[**128]** Israel's 75 percent draw methodology to provide persuasive evidence of the merger's impact on local markets. Dr. Israel did more than calculate local share percentages based on 75 percent draw areas. He also used a 90 percent draw area and a weighted 95 percent draw area. Those increased draw areas captured some of the competitor sales that the 75 percent draw area excluded.[26] Dr. Israel then aggregated the local market share figures across all overlap customers in all markets, using distribution center square footage, adjusted revenues, and number of sales representatives to estimate market share. PX09350-137-139. As shown in the table below,[27] these alternative approaches— **[*59]** designated as variations (i) and (ii)—demonstrate that for half of the customers in overlap areas, Defendants would have a post-merger combined local market share of more than 50 percent and the HHI would increase at least 1,300 points. PX09350-139, Table 7. A

[25] The court infers that the sales figure was reduced, in part, to estimate only Cash-Wa's *broadline* sales, as opposed to all sales. But that reason, if correct, was not made clear on the record. Additionally, in his report, Dr. Bresnahan reported over $[TEXT REDACTED BY THE COURT] million in sales by another broadliner, Reinhart. However, he made no mention of Reinhart's sales in his testimony. That may be because Reinhart reported that [TEXT REDACTED BY THE COURT]. PX09034-019.

[26] In a third variant, Dr. Israel went beyond the overlap areas and performed market calculations that took into account all local broadline customers, regardless of whether they fell into the overlap area. Dr. Israel also used a fourth variant—though not entirely clear from his report—in which he appears to have re-run his 75 percent draw methodology using all of Defendants' broadline customers in the overlap area, not just local broadline customers. PX09350-137-138.

[27] These figures are pre-divestiture share calculations. But the local market share percentages and HHI increases are so high that, even taking into account the divestiture, when aggregated across numerous markets, these figures are unlikely to decrease enough to change the overall picture. *See* PX09375-103-104.

quarter of the overlap customers would face even greater market concentrations: Defendants post-merger would have at least 68 percent in combined local market share and the HHI would increase by at least 2,000 points. And, 10 percent of the overlap customers would **[**129]** face a combined market share north of 74 percent and an HHI increase of greater than 2,500 points. The picture that clearly emerges from these numbers is that, in many areas across the country, USF and Sysco already control a substantial share of the market for local broadline distribution. A merger between the two would lead to a significant increase in market concentration in many areas.

Table 7

Summary Statistics for [130] Local Market Shares under Alternative Methodologies**

	Combined Share		
	Median	**75th Petile**	**90th Petile**
Square footage shares			
Baseline	59.8%	71.8%	81.5%
(i) 90% distribution distance	58.3%	68.3%	75.3%
(ii) Continuous distribution distance	55.7%	68.3%	82.6%
(iii) All local CBSA customers *	58.9%	70.4%	80.8%
Adjusted revenue shares **	60.9%	70.6%	78.3%
Baseline	62.6%	74.7%	86.0%
(i) 90% distribution distance	57.2%	71.6%	79.2%
(ii) Continuous distribution distance	54.6%	70.6%	83.3%
(iii) All local CBSA customers	59.8%	74.6%	85.7%
(iv) All overlap CBSA customers *	66.7%	80.2%	86.1%
Sale representative shares			
Baseline	62.5%	70.S%	80.8%
(i) 90% distribution distance	58.0%	68.0%	74.8%
(ii) Continuous distribution distance	52.7%	70.5%	86.5%
(iii) All local CBSA customers	61.1%	70.4%	80,3%
(iv) All overlap CBSA customers *	61.6%	69.8%	79,4%

	Δ HHI		
	Median	**75th Petile**	**09th Petile**
Square footage shares			
Baseline	1.763	2.375	3.169

Baseline	1.854	2.406	3.152
(i) 90% distribution distance	1.594	2.217	2.531
(ii) Continuous distribution distance	1.545	2.039	2.655
(iii) All local CBSA customers	1.595	2.308	3.099
(iv) All overlap CBSA customers *	1.777	2.306	2.749

* Includes all customers.

** For variation (iv) unadjusted revenues are used.

Defendants' combined strength in local markets is corroborated by documents compiled during the Defendants' ordinary course of business. For example, in an Investor Presentation, dated November 2012, USF represented that it "estimated [having the] #1 or #2 position in [TEXT REDACTED BY THE COURT] of served markets." PX03000-014. Mr. Schreibman's investigational hearing testimony confirmed the present-day accuracy of that statement. Investigat'l Hr'g Tr., PX00515-017 at 65. He also confirmed that, in many of those markets, Sysco occupied the number one or two market position. *Id.*

Another USF document, a strategy document created in 2011, shows USF and Sysco with sizeable "market penetrations" in many local markets. PX03073-023-030. Mr. Schreibman testified that "market penetration" was different from "market **[**132]** share," as the former reflected the percentage of customers that purchased even $1 of product, whereas the latter reflected percentages of overall sales volumes. Hr'g Tr. 1508-09. But even if "market penetration" and "market share" have different **[*60]** definitions, both concepts are a measure of market strength, and the "market penetration" percentages show USF and Sysco to be first and second in numerous markets. Indeed, the very same strategy document lists 54 separate markets and identifies Sysco as a competitor in each of them. Of those 54 markets, USF estimated that Sysco had the number one position in [TEXT REDACTED BY THE COURT] markets and that, within those [TEXT REDACTED BY THE COURT] markets, USF was number two in [TEXT REDACTED BY THE COURT]. USF also estimated that it was number one in [TEXT REDACTED BY THE COURT] markets, with Sysco ranked number two in those same [TEXT REDACTED BY THE COURT] markets. And, in [TEXT REDACTED BY THE COURT] markets, USF viewed itself as tied for number one with Sysco. Thus, of the [TEXT REDACTED BY THE COURT] local markets, USF viewed Sysco or USF as the leading broadliner in [TEXT REDACTED BY THE COURT] and as the number two broadliner (or tied **[**133]** for first) in [TEXT REDACTED BY THE COURT]. This internal assessment clearly supports Dr. Israel's local market share calculations.

Defendants offer a different ordinary course document to rebut Dr. Israel's market share calculations. In 2013, relying on a sizeable third-party sales database of 335,000 independent restaurants, USF calculated its share of sales to independent restaurants in 53 local markets. That study showed USF with market shares much lower than that shown by Dr. Israel's calculations, ranging from a high of [TEXT REDACTED BY THE COURT] percent in Columbia, South Carolina, to a low of [TEXT REDACTED BY THE COURT] percent in the "Northwest." DX-00397-002.

But Defendants' reliance on the independent restaurant study as an indicator of local market shares is problematic for several reasons. First, there is no evidence that the underlying database differentiated between purchases from broadline distributors and purchases from other channels of distribution. The evidence has shown that, among foodservice customers, independent restaurants are among the most likely to buy from other channels, such as specialty and cash-and-carry. In other words, unless broadline sales are **[**134]** segregated from the rest—which the restaurant study appears not to have done—the resulting market share estimate will underestimate USF's actual share of only broadline purchases. A market share calculation that uses at its numerator purchases from *all channels* cannot be relied upon to determine USF's *broadline* market shares.

Second, no evidence was presented showing that the buying habits of independent restaurants is representative of other local broadline customers. Thus, by focusing only on independent restaurant purchasing, the data set does not provide an accurate picture of local market shares.

Third, the independent restaurant study's results conflict with other documents. For instance, USF's 2011 strategy document describes the company as having a "[s]olid #[TEXT REDACTED BY THE COURT]" position in "Reno/Sacramento," PX03073-019, but the restaurant study finds a less than 10 percent share in Reno, DX-00397-002. Similarly, the strategy document describes USF as having the "#[TEXT REDACTED BY THE COURT] position" in St. Louis, PX03073-018, but the restaurant study reported only a 13.3 percent share in the "Missouri Group," DX-00397-002.

Finally, Dr. Israel's conclusions are corroborated **[**135]** by PFG's analysis of the local markets. In January 2014, PFG made a presentation to the FTC in which it addressed the state of competition in various local markets. PFG, at the time, was represented by antitrust counsel, Kirkland & Ellis. Because there was no comprehensive industry data for local market shares, PFG "estimated local broadline market shares based upon [distribution center] square footage, which PFG uses to gauge **[*61]** competitor strength in the ordinary course of business"—one of the very methods that Dr. Israel used for calculating market shares. PX09045-019. PFG observed that, "[w]hile not perfect, we believe this approach produces *directionally correct results* and can be useful in flagging areas that merit closer consideration." *Id.* (emphasis added). PFG's analysis showed that in six major markets—New York, Philadelphia, Detroit, Denver, Las Vegas, and Los Angeles—a combined Sysco-USF, based on distribution center square footage, would control between 45 percent (New York City) to 80 percent (Las Vegas) of those local broadline markets. PX09045-020. PFG also calculated that a merger in those markets would result in HHI increases ranging from 1,000 points (New York City) to 3,100 **[**136]** points (Las Vegas). *Id.* Consistent with Dr. Israel's market shares and HHI calculations, PFG concluded that the "[p]reliminary findings indicate significant concentration in many local markets." *Id.*

3. The Court's Finding as to Local Broadline Customer Market Shares

The court thus finds, based on Dr. Israel's testimony and other evidence, that the FTC has shown that a merged Sysco-USF will significantly increase concentrations in local markets for broadline distribution. The FTC therefore has made its *prima facie* case and established a rebuttable presumption that the merger will lessen competition in the local markets.

C. **Additional Evidence of Competitive Harm**

The FTC did not rely solely on increased HHIs to establish that Defendants' proposed merger would cause competitive harm. *See* *Baker Hughes, 908 F.2d at 992* ("The Herfindahl- Hirschman Index cannot guarantee litigation victories."). It offered additional evidence to strengthen its *prima facie* case, to which the court now turns.

1. Unilateral Effects—National Customer Market

The FTC advanced a "unilateral effects" theory to argue that the merger would harm competition in both the national and local broadline distribution markets. In this section, the court considers the evidence **[**137]** of unilateral effects in the national customer market and subsequently turns to the evidence regarding local customer markets.

HN30[] Courts have recognized that a merger that eliminates head-to-head competition between close competitors can result in a substantial lessening of competition. *See* *Heinz, 246 F.3d at 717-19* (holding that elimination of competition between second- and third-largest jarred baby food manufacturers would weaken competition); *Swedish Match, 131 F. Supp. 2d at 169* (finding a likelihood of unilateral price increase where merger would eliminate one of Swedish Match's "primary direct competitors"); *Staples, 970 F. Supp. at 1083* (finding anticompetitive effects where the "merger would eliminate significant head-to-head competition between the two lowest cost and lowest priced firms in the .. . market."); *see also* Merger Guidelines § 6 ("The elimination of competition between two firms that results from their merger may alone constitute a substantial lessening of competition."). In such circumstances, a merger "is likely to have unilateral anticompetitive effect if the acquiring firm will have the incentive to raise prices or reduce quality after the acquisition, independent of competitive responses from other firms." *H&R Block, 833 F. Supp. 2d at 81*.

Unilateral anticompetitive effects can arise **[**138]** in a host of different settings. *See* ***[*62]*** *generally* Merger Guidelines § 6. Here, the FTC's case for unilateral effects rests on the fact that the broadline distribution industry is marked by negotiations between buyers and sellers. In such a market, "buyers commonly negotiate with more than one seller, and may play sellers off against one another." *Id.* § 6.2. If two competitors merge, buyers will be prevented from playing the sellers off one another in negotiations. *See id*. This elimination of competition "can significantly enhance the ability and incentive of the merged entity to obtain a result more favorable to it, and less favorable to the buyer, than the merging firms would have offered separately absent the merger." *Id.*

On the other hand, even if the merging parties had large market shares, if they were not particularly close competitors, then the market shares might overstate the extent to which the merger would harm competition. Although the merging parties need not be the top two firms to cause unilateral effects, *see, e.g.,* Heinz, 246 F.3d at 717-19; H&R Block, 833 F. Supp. 2d at 83-84, the FTC argues that the potential for unilateral effects here is magnified because Defendants are particularly close competitors and many national customers consider **[**139]** them the top two choices for broadline distribution. *See* Merger Guidelines § 6.2 ("Anticompetitive unilateral effects . . . are likely in proportion to the frequency or probability with which, prior to the merger, one of the merging sellers had been the runner-up when the other won the business.").

The FTC offered various sources of evidence to show that the proposed merger will result in unilateral anticompetitive effects. The evidence includes empirical data collected and analyzed by Dr. Israel, Defendants' ordinary course documents, and testimonial evidence from other market actors.

a. Dr. Israel's RFP/bidding study

To show that Defendants were frequent head-to-head competitors—indeed, each other's closest rivals—Dr. Israel analyzed each company's bidding opportunities for national customers based on the RFP/bidding database that he compiled from the companies' records. The RFP/bidding records that Dr. Israel collected spanned a seven-year period, from 2007 to 2014. PX09375-088. He formed the database not only from the parties' reconstructed RFP data, but also from a host of ordinary course records reflecting bidding opportunities, PX09375-089-091. From this evidence, Dr. Israel concluded: **[**140]** "[I]n competitions for National Broadline Customer business, both USF and Sysco compete with and lose to one another much more than they compete with or lose to any other distributor and, indeed, more than all other distributors combined." PX09375-088. More specifically, based on Sysco's RFP/bidding records, Dr. Israel observed that USF appeared as a competitor for national broadline business twice as often as the next competitor and that, when Sysco lost, it lost to USF two and a half times more often than it lost to the next competitor. Similarly, based on USF's RFP/bidding records, Dr. Israel observed that Sysco appeared as a competitor for national broadline business four times as often as the next competitor and that, when USF lost, it lost to Sysco three and a half times more often than it lost to the next competitor. PX09350-105-109.

Defendants disputed the reliability of Dr. Israel's RFP/bidding data study in two primary ways. First, as already discussed, they forcefully challenged the underlying data set, arguing that neither company keeps ordinary course RFP and bidding records and that Dr. Israel's reliance **[*63]** on these artificially created data sets to calculate an empirical "win-loss" **[**141]** analysis is inherently flawed. As previously explained, the court has found that drawing precise conclusions based on the RFP/bidding data is problematic because of the data's limitations.

Second, to demonstrate that the merger would not create unilateral anticompetitive effects, Defendants offered a "switching study" conducted by Dr. Bresnahan. A switching study, as the name implies, analyzes customers' decision to "switch" their business to other competitors. For his study, Dr. Bresnahan acquired from a company called Aggdata the location information of tens of thousands of restaurant and hotel chain customers that are on either Sysco's or USF's "national customer" roster. He then analyzed Defendants' transaction records by quarter from the first quarter of 2011 to the third quarter of 2013 to determine if either company provided broadline distribution to a specific restaurant or hotel location. If either Defendant provided broadline distribution, he tracked the company's sales to the location and noted if it lost sales to the location during the period. If the company lost sales in a particular quarter, he checked the other defendant company's transaction records to see if it picked **[**142]** up the customer. If it did not, Dr. Bresnahan assumed that some other competitor did.

So, for example, if USF's records showed that a particular Sonic franchise did not purchase from USF in a particular quarter, he would tum to Sysco's records to see if Sysco had picked up the customer; if it did, he counted it as a switch to Sysco; if not, he assumed that the customer purchased from another distributor and counted it as a switch to a competitor other than Sysco. Based on this analysis, Dr. Bresnahan concluded that Sysco and USF are not uniquely close competitors. He found that USF lost business to Sysco 15 percent of the time based on both revenue and number of locations, and that Sysco lost business to USF 57 percent of the time based on revenue and 39 percent of the time based on number of locations. These percentages of switches, Dr. Bresnahan testified, were much lower than what one would have expected to see if Dr. Israel's national market shares were accurate.

For a variety of reasons, the court cannot agree with Dr. Bresnahan's ultimate conclusion—that USF and Sysco are not uniquely close competitors—based on his switching study. First, though the number of observations in Dr. **[**143]** Bresnahan's study were significant, they were limited almost exclusively to restaurant and hotel locations (including, it appears, restaurants served by Sysco's systems division, SYGMA).[28] The observations did not include other types of large national customers, such as GPOs, foodservice management companies, and large government agencies, which, as the evidence showed, spend large percentages of their foodservice distribution budget on Defendants. As Dr. Bresnahan admitted, he does not claim that his switching analysis reflects the buying habits of these national customers. Hr'g Tr. 2180-82.

Second, the time period of Dr. Bresnahan' s study—two-and-a-half years—is shorter than the seven-year time period covered by Dr. Israel's RFP/bidding analysis. Significant switches that might have occurred between Defendants outside the two-and-a-half year period, therefore, were not counted.

[*64] Third, the switching analysis does not capture the full extent of competition between Defendants (or between other competitors, for that matter), because it only tracks switches, not instances where a customer might have **[**144]** played one broadliner off the other to get better pricing. That kind of situation reflects actual competition at least as much as a switch, but such competition is not reflected in the data.

Fourth, unlike an RFP or bid situation, a switch does not necessarily equate to actual competition. A switch might have occurred for any number of reasons having nothing to do with pricing or service (*e.g.*, the customer's sister-in-law went to work for a competitor), but the study treats every switch as a loss for competitive reasons.

Fifth, Dr. Israel's rebuttal report pointed out a number of limitations in Dr. Bresnahan's switching analysis, including the exclusion of certain switches between Defendants and the treatment of actual switches, such as timed phase outs from one Defendant to the other, as non-switches. PX09375-08 I-084. Although Dr. Bresnahan testified that he corrected for these criticisms and that the adjustments did not materially alter his results or conclusion, the need for those adjustments reflects the limitations of drawing firm conclusions from such undifferentiated data.

Finally, Dr. Bresnahan's conclusion that USF and Sysco are not close competitors brings him into conflict **[**145]** with Defendants' other expert, Dr. Hausman. Dr. Bresnahan testified that, although he agrees that Sysco and USF are competitors, he did not think that one was a "particularly strong price constraint" on the other. Hr'g Tr. 2183. Dr. Hausman, on the other hand, unequivocally agreed that "USF is a strong price constraint on Sysco." *Id.* at 2005. He testified Sysco and USF "compete and they compete hard. I'd be the first to agree." *Id.* at 1986; *see id.* at 2037 ("I am not arguing with you that—or disagreeing with you that Sysco and US Foods are important competitive constraints on each other."). Defendants do not explain how Dr. Bresnahan's switching study can be reconciled with Dr. Hausman's unqualified opinion that Defendants mutually constrain each other's prices, which can only mean that they are close competitors; if they were not, the pricing of one would not matter to the other.

In the end, the court finds that Dr. Israel's RFP/bidding analysis is more persuasive than Dr. Bresnahan's switching study. Both empirical studies are imperfect for the reasons already discussed. But Dr. Israel's analysis better captures instances of actual competition across a more representative cross-section of national customers over **[**146]** a longer period of time. Additionally, Dr. Israel's conclusions are corroborated by other evidence in the record, which, as discussed below, indicate that Sysco and USF are close competitors, particularly for large national customers.

b. <u>The parties' ordinary course documents</u>

---

[28] The study did include one health care organization, Kaiser Permanente, and one GPO, Amerinet.

The FTC presented ordinary course documents, from both Defendants and third parties, which support Dr. Israel's conclusion that Sysco and USF are particularly close competitors. For example, a 2012 USF presentation, titled "Strategy Refresh," explains that one reason for strategic rethinking is that "[c]ustomers perceive little difference between us and *our main competitor*," identified as Sysco. PX0303 l-003 (emphasis added). The same presentation devotes a section to "Performance v. Sysco" and describes the companies as "[i]ndustry leaders." PX0303 l-010-0l l. Another USF document **[*65]** describes Sysco as USF's "major rival." PX03032-043.

Similarly, a Sysco presentation to its Board of Directors describes USF as its "next largest competitor" and puts forth "recent intelligence" about USF and two other competitors. PX01007-018; PX01007-023. Another Sysco strategy document focusing on the healthcare sector states that "US Foodservice is our **[**147]** strongest competitor for Healthcare GPO dollars." PX01388-004. In addition, there are many specific instances in the record demonstrating fierce competition between Sysco and USF for national customer accounts.[29] These documents indicate that Sysco and USF compete aggressively against one another on price; non-price incentives, such as signing bonuses; service; and other value-added offerings.

Industry analysts also have recognized the close competition between Defendants. For instance, the Cleveland Research Group's January 2014 market report on Sysco noted the Cleveland Research Group's assessment that "both Sysco and US Foods have priced each other down competing for larger national/regional contract accounts over the last several years" and that "the acquisition removes a key price competitor (particularly with larger contract accounts)." PX09332-004.

c. Testimonial evidence

A number of industry actors testified that they view Sysco and USF to be close competitors for national customers. Particularly compelling testimony came from Mark Allen, the head of the foodservice distributors' trade group, IFDA. In his deposition, Mr. Allen **[**148]** agreed that Sysco and USF were "closest competitors" for national accounts, such as GPOs, hospitality, and foodservice management companies. PX00570-012; PX00570-014. He further described Sysco and USF as "powerful competitors" for independent customers, PX00570-l 13, and testified that, in his experience, GPOs, foodservice management companies, and hospitality chains use Sysco and USF to keep each other honest on price and service, PX00570-019. The testimony of the PFG's President and CEO, George Holm, was to the same effect. He testified that in his experience "foodservice management companies, GPOs[,] and certain restaurant groups" have "obtained lower prices by bidding Sysco and US Foods against each other." Hr'g Tr. 651.

d. Conclusion on unilateral effects in the national customer market

The court's finding that Sysco and USF are close competitors in the national customer market is no surprise, given the uncontested facts of this case. Sysco and USF are the country's two largest broadliners by any measure. They have far more distribution centers, SKUs, private label products, sales representatives, and delivery trucks than any other broadline distributor. That they rely on these **[**149]** competitive advantages to compete, and compete aggressively against one another in the market for national customers, is amply born out on this record.

Based on all of the evidence presented, the court finds that, because the proposed merger would eliminate head-to-head competition between the number one and number two competitors in the market for national customers, the merger is likely to lead to unilateral anticompetitive effects in that market. Evidence of probable unilateral effects strengthens the FTC's *prima facie* case that the merger will lessen competition in the national customer market. *See Heinz, 246 F.3d at 717* (footnote omitted) (finding that "the FTC's market concentration **[*66]** statistics are bolstered by the indisputable fact that the merger will eliminate competition between the two merging parties"); *Whole Foods, 548 F.3d at 1043 (Tatel, J.)* (citation omitted) (internal quotation marks omitted) (stating that "there can be little doubt that the acquisition of the second largest firm in the market by the largest firm in the market will tend to harm competition in that market").

[29] *See, e.g.*, PX01066-001-002; PX03064-001; PX01061-001-006.

2. Merger Simulation Model—National Customer Market

To further show that the merger would harm national customers, Dr. Israel ran a merger simulation model to **[**150]** predict the merger's effect. Dr. Israel used an "auction model" to estimate the harm to national customers based on his real-world observation that national customers used RFP processes that "typically involve[d] competitive bids and bilateral negotiations between distributors and foodservice operators" to award business. PX09350-110. Under an auction model, the terms offered by the winning bidder are determined (or at least heavily influenced) by the second-best bidder, because the winning bidder will offer price and service terms that are just good enough to win the business. In theory, if the top two bidders merge, price and service terms will be determined (or at least heavily influenced) by the previously third-best bidder, who in a post-merger world would move into the number two spot. An auction model predicts harm to customers if, as here, the top two bidders merge and the next best bidder is a distant third. The magnitude of the harm is defined as the difference between the values offered by the companies that had been the pre-merger second-and third-place bidders. PX09350-113-114; *see* CCC Holdings, 605 F. Supp. 2d at 69 (describing a similar auction model for predicting a price increase).

Practically speaking, **[**151]** the premise of Dr. Israel's auction model was that, in the pre-merger world, Sysco and USF are national customers' top two choices and, therefore, each company sets the other company's price. But, if they were to merge, the winning bidder's price would only be subject to competitive pressure by a pre-merger third-place bidder, such as PFG or some other distant competitor. If the next best bidder is not a major competitor, and therefore does not play a significant role in affecting prices, national customers will be harmed. An email dated December 12, 2013, summarizing a "USF Senior Teams" webcast addressing the proposed merger, perfectly captures this core premise of Dr. Israel's model. The email identified as one of the "key messages": "The 'distance' between the combined company and the next set of regional players *is huge*. Those regional players will have an even harder time trying to play catch up going forward because they simply won't have the resources that the combined company has to transform the industry." PX00103-002 (emphasis added). The "huge" distance between the merged entity and the rest of the field corresponds to the merger harm that Dr. Israel's model predicts.

To **[**152]** quantify the likely harm to national customers, Dr. Israel performed calculations that used as inputs, among others, his estimates of the parties' national customer market shares and their price-cost margins. PX09350-118. He concluded that, absent significant efficiencies and other mitigating factors, the merger would harm national customers on the order of more than $1.4 billion annually. PX09350-120; PX09350-220. Factoring in the divestiture to PFG and its increased market share, Dr. Israel calculated likely merger harm of more than $900 million annually. PX09350-189; PX09350-237.

[*67] Defendants assert that Dr. Israel's model is flawed for the same reason that they criticize his national market share calculations—both rely on the unreliable RFP/bidding data. Specifically, Defendants argue that, because the merger simulation model relies on the national market share calculations as a critical input, and because those market shares depend on the unreliable RFP/bidding data, Dr. Israel's estimate of likely merger harm is likewise unreliable. As discussed, the court agrees that the RFP/bidding data set is imperfect and its resulting market share calculations are imprecise to some degree. **[**153]** Dr. Israel's most conservative market share analysis, however, did not rely on the RFP/bidding data but rather on the CID data, and provided a reasonable approximation of the parties' share of the national customer market. Dr. Israel ran his merger simulation using that lower-bound market share estimate and still reached the conclusion that, absent significant efficiencies, the merger would likely cause significant harm. PX09350-121 n.363 ("Finally, I tested the robustness of my results to Sysco and USF having lower combined shares. I found that even when I use the lowest (and almost certainly too low) Sysco and USF shares presented in **Table 1**, the required efficiencies predicted by the model still far outweigh the efficiencies claimed by the parties."). The court, therefore, concludes that Dr. Israel's merger simulation model strengthens the FTC's *prima facie* case that the merger will substantially lessen competition in the market for national customers.

3. Unilateral Effects—Local Markets

As it did for the national customer market, the FTC presented empirical, documentary, and testimonial evidence to demonstrate the potential for unilateral effects to harm local markets. That evidence, **[**154]** however, presented a more muddled picture of the potential for unilateral effects than did the evidence for the national customer market.

a. Dr. Israel's empirical analysis

As he did with the national customer market, Dr. Israel looked at Defendants' business records to determine how closely they compete in local markets. The data came from two sources—USF's Linc database and Sysco's request for incentives (RFI) records. The Linc database, as discussed earlier, is a customer relations management tool used by USF sales personnel to manage and store information on existing and prospective customer accounts. RFIs are internal Sysco records that sales personnel were required to submit to regional presidents to obtain approval to offer incentives to customers to either switch to Sysco or stay with the company.

Starting with the Linc database, Dr. Israel observed and analyzed nearly 100,000 business opportunities between January 2011 and June 2014 and divided them into two groups—USF wins and USF losses. When USF won the business, sales personnel identified Sysco as the main competitor 43 percent of the time (and 48 percent of the time measured by revenue); when USF lost the business, USF sales **[**155]** personnel identified Sysco as the main competitor 46 percent of the time (and 68 percent of the time measured by revenue). PX09350-143, Table 11. Whether USF won or lost, sales personnel identified Sysco as the main competitor eight times more frequently than the next most mentioned competitors (PFG and Gordon Food Service). Dr. Israel also segregated the Linc database's mentions of competitors in 20 local markets. That study showed that sales personnel in every market identified Sysco as USF's main competitor by a wide **[*68]** margin, especially when measured by revenues. PX09350-145, Table 14.

The RFI data painted a similar picture from the Sysco perspective. Dr. Israel reviewed 224 Sysco RFIs, covering a three-year period from 2011 to 2014, when Sysco discontinued the practice. In more than 66 percent of the RFIs, Sysco sales personnel identified USF as the reason for the incentive request. No other competitor appeared more than 10 percent of the time. PX09350-146-147.

Defendants attacked Dr. Israel's reliance on the Linc database, as they did when he used it in his aggregate diversion analysis. They asserted that Dr. Israel improperly relied on the Linc database as a win-loss record, when **[**156]** it was never intended as such. USF's Executive Vice President of Strategy, David Schreibman, testified that sales people did not use the database consistently and would sometimes enter competitor information simply to fill in the database; ultimately, USF did not rely on it to identify market competition. Hr'g Tr. 1505-06. Defendants also presented a local switching study performed by Dr. Bresnahan, which used the same switching methodology as described above but applied to local customers. According to Dr. Bresnahan, when local customers switch away from Sysco, they switch to USF only 11 percent of the time; and when they switch away from USF, they switch to Sysco only 15 percent of the time. Hr'g Tr. 2163. In other words, according to Dr. Bresnahan's switching analysis, when local customers switched away from Sysco it was typically to distributors other than USF.[30]

The court finds that the empirical evidence, on balance, shows that Sysco and USF are close competitors for local customers. As the court has already observed, relying on the Linc database to draw firm conclusions is problematic for the reasons raised by Defendants. That said, even recognizing the data's limitations, it so overwhelmingly demonstrated primary competition between Sysco and USF based on a sizeable number of observations (nearly 100,000 entries) that it cannot be wholly disregarded as evidence of close competition. Furthermore, the court found the RFI analysis especially compelling; indeed, Defendants did little to contest it. Although the number of observations was low, the RFI data overwhelmingly showed Sysco seeking incentives to attract or keep local customers in response to USF's efforts far more often than Sysco attempted to respond to any other competitor's efforts.

---

[30] Dr. Bresnahan also did another switching study to support his findings. He conducted a study of fresh chicken purchases by customers in San Diego, from which he concluded that customers "turn off and on buying fresh chicken from Sysco" and that most of the time when they "turn off" Sysco they buy from someone other than USF. **[**157]** Hr'g Tr. 2162.

Dr. Bresnahan's switching study provided some counterweight to Dr. Israel's work. Like his national switching analysis, however, it did not account for competition when customers used Sysco and USF as leverage against each other, as many local customers said regularly occurred. The local **[**158]** switching study also relied heavily on chain restaurants and hotels and thus did not factor in the buying habits of other types of local customers, particularly independent restaurants. Therefore, notwithstanding the limits of the data sets relied on by Dr. Israel, the court finds that the empirical evidence supports the conclusion that Sysco and USF are close competitors in local markets.

[*69] b. The parties' ordinary course documents

Two notable ordinary course documents also support the conclusion that Sysco and USF are close competitors for local customers. The first is USF's November 2012 "Investor Presentation," which represented that "US Foods is estimated #1 or #2 position in [TEXT REDACTED BY THE COURT] of served markets." PX03000-014; *see also* PX03118-006. As previously noted, USF's David Schreibman confirmed both the present-day accuracy of that statement and the fact that, in many of those markets, Sysco occupied the number one or two position. DX-00272 at 62, 65. The second is the July 2011 USF acquisitions strategy document, which estimated USF's position in 54 separate markets, apparently based on market penetration rather than market share. USF estimated that either Sysco **[**159]** or USF was the leading broadliner in [TEXT REDACTED BY THE COURT] of those markets and was the number two broadliner (or tied for first) in [TEXT REDACTED BY THE COURT]. *See also* PX03002-009 (Clayton, Dubilier & Rice document, titled "Operating Review," acknowledging that one of Sysco's strengths is "[g]eographic coverage in all the key markets in the U.S. - #1 or #2 in virtually all the markets in which they operate"); PX03004-001 (Clayton, Dublier & Rice memo stating that USF is a "leader in both national and local markets" and that "Sysco [is the] closest competitor with similar business mix"). Sysco's and USF's leading positions in multiple local markets shows that they are close competitors in those markets.

c. Testimonial evidence

The testimonial evidence was more equivocal about the closeness of competition between Defendants. It demonstrated that Sysco and USF are strong competitors for local customers in several markets, but it also showed that other broadliners are competing effectively in many of those areas. The FTC's case featured four local markets: (i) Columbia/Charleston, South Carolina; (ii) Omaha, Nebraska; (iii) Raleigh/Durham, North Carolina; and (iv) Southwest Virginia. For **[**160]** each of those markets, the FTC presented testimonial evidence supporting Defendants' leading market positions. For instance, PFG's George Holm agreed that Sysco and USF were the largest and two most "competitively significant" broadline distributors in Columbia/Charleston, Raleigh/Durham, and Southwest Virginia. Hr'g Tr. 653-57; DX-00276 at 70-72. Mark Allen, IFDA President, agreed with those assessments, calling Defendants the "dominant" or "strongest" competitors in those three markets (and Las Vegas). DX-00294 at 170; *see also* Hr'g Tr. 1800 (testimony from Sysco Mid-Atlantic President Mike Brawner stating that USF is a "strong competitor" in Columbia, Raleigh/Durham). USF's ordinary course materials corroborate those observations, at least in terms of market penetration. PX03118-007-008 (showing USF as a "Strong #[TEXT REDACTED BY THE COURT]," based on market penetration, in Raleigh, Columbia, and Roanoke, with Sysco as number two in those areas, and showing Sysco as the number one broadliner in Omaha with USF a "Distant #[TEXT REDACTED BY THE COURT]").

Yet, when customer-level testimony is considered, the evidence of Defendants' leading market positions and their post-merger ability **[**161]** to increase prices becomes less clear. Both sides deposed and obtained numerous declarations from various customers in these local markets. The customer testimony obtained by the FTC invariably decried the merger's impact on local markets, whereas Defendants' customer witnesses emphasized alternatives in the marketplace and the ability to switch broadliners if the merged company **[*70]** attempted to impose a price increase.[31] Because of these conflicting local market assessments, the court cannot draw firm conclusions about the competitiveness of the local broadline markets from the testimonial evidence.[32]

d. Conclusion on unilateral effects in the local markets

In the final analysis, after considering all of the record evidence on local markets, the court finds that the FTC has shown that unilateral effects are likely to occur in many local markets because the merger will eliminate one of the top competitors in those markets. Though the court finds the evidence of unilateral effects in the local markets **[**164]** to be less convincing than in the national customer market, the evidence nevertheless strengthens the FTC's *prima facie* case of merger harm.

4. Local Event Studies

To further show that the merger would adversely impact local customers, the FTC presented the results of an econometric event study conducted by Dr. Israel. Dr. Israel analyzed Sysco's opening of two distribution centers—one in Long Island, New York, in July 2012, and one in Riverside, California, in June 2013—to determine the impact those openings had on prices paid by USF customers served from a nearby competing facility. Known as an "entry study," Dr. Israel selected the Long Island and Riverside events because they were the only two recent instances in which Sysco had opened a new distribution center in the same market as a USF distribution center. From these event studies, the FTC hoped to show that prices fell **[*71]** when Sysco and USF directly competed and that the merger's elimination of USF as a competitor would have an upward effect on pricing.

Dr. Israel found that Sysco's entry in Long Island resulted in a 1.4 percent decline in USF's prices for customers in the 75 percent overlap area. PX09350-148. He also ran variations **[**165]** of his regression analysis on other groupings—customers within a 50 percent overlap area, customers purchasing more than 100 SKUs, and customers buying private label products—and found that the price decrease on these groupings was even greater. PX09350-148. By contrast, Dr. Israel found a less significant price impact in the Riverside entry study—a negligible price decline of only .06 percent.

---

[31] *Compare* PX07020-002 (Champ McGee, owner of Little Pigs Barbeque and FTC-sponsored declarant expressing "serious concerns" about merger's effect on business in the Columbia market), *and* Hr'g Tr. 344 (FTC witness, Gary Hoffman, Vice President and Corporate Executive Chef of Upstream Brewing Company from the Omaha market, expressing concern that the proposed merger would prevent him from playing Defendants off one another), *and* PX00487-005 (FTC-sponsored declarant Jason Smith of 18 Restaurant Group, from the Raleigh/Durham market, expressing concerning about the merger "because it eliminates one **[**162]** of our only two options for broadline distribution services" and rejects other competitors), *and* Hr'g Tr. 544-45 (FTC witness, Daniel Schablein, Controller at Wintergreen Resort from the southwestern Virginia market, stating that Sysco and USF were the only legitimate broadliners for his business), *with* DX-00227 at 2 (Justin Brooks, owner of Frayed Knot Restaurant and Defendants-sponsored declarant, stating "I do not believe that Sysco could raise prices or reduce services on my business" in the Columbia market because of competition from PFG, Merchants, Reinhart, and Gordon Food Service), *and* DX-00191 at 2 (Defendants-sponsored declarant Anthony Fucinaro of Anthony's Steakhouse, from the Omaha market, stating, "If Sysco were to raise prices or lower service levels, I would move my contract to Reinhart, Martin Brothers, and/or Cash-Wa"), *and* DX-00232 at 2 (Defendants-sponsored declarant Patrick Cowden of Tobacco Road Sports Cafe, from the Raleigh/Durham market stating, "If Sysco tried to raise prices or decrease service quality following the merger, I could and would replace them with any of the other bidders in a heartbeat"), *and* DX-00209 at 1 (Defendants-sponsored declaration from **[**163]** George Huger of Southern Inn Restaurant, from the southwestern Virginia market, stating that he would have alternatives, including PFG and Staunton Foods, if he became dissatisfied with Sysco's prices or service after the merger).

[32] The FTC did not present testimony or customer declarations about many of the markets that it claims will be highly concentrated after the merger. That is not, however, fatal to its case. *See* Brown Shoe, 370 U.S. at 339, 341 (rejecting the argument that the government had not proven its case because it did not present evidence "in each line of commerce and each section of the country" and stating that "[t]here is no reason to protract already complex antitrust litigation by detailed analyses of peripheral economic facts, if the basic issues of the case may be determined through study of a fair sample").

Dr. Israel explained that neither of these events were clean entry studies because, in both cases, Sysco already had an existing distribution facility in the area, and thus already was competing against USF. In his opinion, the resulting price effects, therefore, were actually understated. Dr. Israel also found the results of the Long Island event more compelling than the Riverside event for two reasons. First, the Long Island facility was a greater distance away from Sysco's existing facility than the new Riverside facility was from its existing facility. Second, the Long Island facility served more new business than the Riverside facility. For those reasons, he concluded, the Long Island study better approximated a true entry event. Hr'g Tr. 1097-98. Dr. Israel ultimately concluded, based largely **[**166]** on the Long Island study, that the merger's elimination of USF as a competitor would have an upward pricing effect in local markets.

The court does not find Dr. Israel's entry studies to be convincing evidence that the merger will harm local customers. Dr. Israel's efforts to distinguish the Long Island and Riverside events simply do not hold up. Defendants' expert, Dr. Bresnahan, showed that the difference in distance between the Riverside facility and its nearby existing facility, on the one hand, and the Long Island facility and its nearby existing facility, on the other, was a mere 14 miles. He also showed that both new Sysco facilities served a similar fraction of existing Sysco customers. Thus, the two entry events were not as dissimilar as Dr. Israel testified, yet they produced very different results—one showing a significant price decrease, the other showing a negligible one. There may be location-specific reasons for the different results, but the reasons offered by Dr. Israel do not withstand scrutiny and no other evidence explained the difference. The court thus cannot conclude from these seemingly conflicting entry studies that the merger will harm local customers.

The court **[**167]** further notes that the pricing evidence here is far weaker than that found in other merger cases. In *Staples*, for instance, there was "compelling evidence" showing that prices were 13 percent higher in markets where Staples did not have competition from another office superstore. *970 F. Supp. at 1075-76* (pricing study). Similarly, in *Whole Foods*, an entry study showed that Whole Foods dropped its prices by five percent when another organic supermarket opened in the area. *548 F.3d at 1046-47 (Tatel, J.)*. In fairness, the FTC was unable to conduct pricing studies like those done in *Staples* and *Whole Foods* here because Defendants have competing facilities in nearly every local market. But the absence of convincing pricing effects evidence is the weakest aspect of the FTC's case.

5. Summary

In summary, the FTC has bolstered its *prima facie* case with additional proof that **[*72]** the merger would harm competition in both the national and local broadline markets. Although the FTC's case would have been strengthened with more convincing pricing effects evidence, the court nevertheless finds that the FTC has presented a compelling *prima facie* case of anticompetitive effects. *See* *Baker Hughes, 908 F.2d at 991* ("The more compelling the prima facie case, the more evidence the defendant **[**168]** must present to rebut it successfully."). The court now turns to Defendants' rebuttal arguments.

III. DEFENDANTS' REBUTTAL ARGUMENTS

HN31[] The FTC has established a presumption that the proposed merger will substantially lessen competition. Defendants, however, may rebut that presumption by showing that the traditional economic theories of the competitive effects of market concentration are not an accurate indicator of the merger's probable effect on competition or that the procompetitive effects of the merger are likely to outweigh any potential anticompetitive effects. *Heinz, 246 F.3d at 715*. The more "compelling the [FTC's] prima facie case, the more evidence the defendant must present to rebut [the presumption] successfully." *Baker Hughes, 908 F.2d at 991*. "A defendant can make the required showing by affirmatively showing why a given transaction is unlikely to substantially lessen competition, or by discrediting the data underlying the initial presumption in the government's favor." *Id.*

Defendants advance four arguments to support their claim that the food industry will remain competitive after the merger: (i) a post-divestiture PFG will be a strong competitor for customers seeking nationwide distribution; (ii) competition from other broadliners **[**169]** and other distribution channels will continue and grow; (iii) the entry of new competition and the repositioning of existing competitors will keep the industry competitive; and (iv) customers will benefit from efficiencies arising from the merger. The court addresses each of those arguments in turn and finds that, even taken collectively, Defendants cannot overcome the FTC's strong presumption of anticompetitive harm.

A. PFG Divestiture

HN32[] Aside from the Supreme Court's guidance that "[t]he relief in an antitrust case must be 'effective to redress the violations' and 'to restore competition,'" *Ford Motor Co. v. United States, 405 U.S. 562, 573, 92 S. Ct. 1142, 31 L. Ed. 2d 492 (1972)* (footnote omitted) (quoting *United States v. E.I. Du Pont De Nemours & Co., 366 U.S. 316, 326, 81 S. Ct. 1243, 6 L. Ed. 2d 318 (1961))*, there is a lack of clear precedent providing an analytical framework for addressing the effectiveness of a divestiture that has been proposed to remedy an otherwise anticompetitive merger. *Compare* *CCC Holdings, 605 F. Supp. 2d at 56-59* (applying the framework for market entry analysis in assessing the effectiveness of a licensing agreement that would enhance the competitiveness of an existing competitor) *with* *FTC V. Libbey, Inc., 211 F. Supp. 2d 34, 47-48 (D.D.C. 2002)* (finding defendants' proposed "fix" inadequate—without going into market entry analysis—because competitor would face higher costs).

Here, both sides cite to ***HN33***[] the 2004 U.S. Department of Justice's "Policy **[**170]** Guide to Merger Remedies," which provides the following guidance: "Restoring competition requires replacing the *competitive intensity* lost as a result of the merger rather than focusing narrowly on returning to premerger HHI levels." Antitrust Div., U.S. Dep't of Justice, Antitrust Division Policy Guide to Merger Remedies 5 (Oct. 2004) [hereinafter 2004 Policy Guide] (emphasis **[*73]** added); *see also* Areeda & Hovenkamp 3d ed., *supra*, ¶ 990d (citing 2004 Policy Guide). A more recent U.S. Department of Justice Policy Guide provides: "The touchstone principle for the Division in analyzing remedies is that a successful merger remedy must effectively preserve competition in the relevant market." Antitrust Div., U.S. Dep't of Justice, Antitrust Division Policy Guide to Merger Remedies 1 (June 2011) [hereinafter 2011 Policy Guide] (footnote omitted). Both the 2004 Policy Guide and the 2011 Policy Guide add that an effective divestiture should address:

> [W]hatever obstacles (for example, lack of a distribution system or necessary know-how) lead to the conclusion that a competitor, absent the divestiture, would not be able to discipline a merger-generated increase in market power. That is, the divestiture assets **[**171]** must be substantial enough to enable the purchaser to *maintain the premerger level of competition*, and should be sufficiently comprehensive that the purchaser will use them in the relevant market and be unlikely to liquidate or redeploy them.

2004 Policy Guide at 9 (emphasis added) (footnotes omitted); *see also* 2011 Policy Guide at 8. With these principles in mind, the court analyzes the effect of the proposed divestiture.

1. *Competitive Pressure Exerted by Post-Divestiture PFG*

Defendants argue that the divestiture of 11 "strategically located" USF distribution centers to PFG, coupled with PFG's "aggressive" expansion across the country, will "replace [any] competitive intensity lost as a result of the merger." Defs.' Proposed Findings of Fact and Conclusions of Law, ECF No. 171 at 156 [hereinafter DFF] (alteration in original) (quoting 2004 Merger Guidelines at 5). In addition to the 11 divested distribution centers, PFG's owner, The Blackstone Group, a leading private equity firm, has committed $490 million to develop seven more distribution centers (called "foldouts") and to expand capacity in 16 existing facilities. Hr'g Tr. 724, 767-69; DFF at 155. Defendants also point to the industry acumen **[**172]** and experience of PFG's executives, particularly that of its President and CEO, George Holm, who has over 37 years of experience in the foodservice distribution industry. The court does not doubt Blackstone's financial commitment to PFG or Mr. Holm's leadership capabilities. However, based on the evidence presented, the court is not persuaded that post-merger PFG will be able to step into USF's shoes to maintain—certainly not in the near term—the pre-merger level of competition that characterizes the present marketplace.

PFG's five-year business plan shows that post-merger PFG will not be nearly as competitive as USF is today. In the lucrative market for national customers, the plan projects that PFG will have approximately §[TEXT REDACTED BY THE COURT] billion in national broadline sales by 2019—*less than half* of USF's 2013 national broadline sales of §[TEXT REDACTED BY THE COURT] billion. PX09350-074; PX09060-002; PX09060-004; PX09060-006; PX09253-023. Stated in terms of market share, PFG estimates that it will grow to 20 percent of the national broadline market over five years, with the merged Sysco-USF company having the "remaining share of the national broadline business." PFF at 220; Hr'g **[**173]** Tr. 719, 721-22. That percentage is smaller than USF's share of the national broadline customer market today. PX09350-187 (Dr. Israel's report stating "the best case scenario under the divestiture is the emergence of a significantly smaller competitor than USF even several years into the future"). Defendants are correct that the **[*74]** divestiture does not have to replicate pre-merger HHI levels. However, the fact that PFG only expects to achieve less than *half* of USF's current national customer sales in five years—assuming that its planned expansion efforts are successful—does not demonstrate that PFG will be sufficiently able to "discipline a merger-generated increase in market power." *See* 2011 Policy Guide at 8 (footnote omitted).

The court's concern about PFG's ability to compete effectively in the post-merger world is not limited to sales and market share projections. PFG's short-term effectiveness will depend in large part on its ability to incorporate the 11 formerly-USF-held distribution centers. Even assuming that PFG can do so seamlessly, the new PFG will have only 35 distribution centers—far fewer than the at least 100 distribution centers owned by the combined Sysco/USF. Having **[**174]** only one-third of the merged company's distribution centers will put PFG at a significant disadvantage in competing for national customers. Indeed, as Dr. Israel demonstrated, Defendants' largest national customers use more than 35 distribution centers. Those customers represent [TEXT REDACTED BY THE COURT] percent of Sysco's national broadline revenues, and [TEXT REDACTED BY THE COURT] percent of USF's national broadline revenues. PX09375-075-077, Figure 3. The court is not convinced that these large national customers will consider a post-merger PFG to be as capable of meeting their needs as USF is today.

Defendants counter that "PFG will be able to compete aggressively with its additional distribution centers because the fewer the distribution centers used for a particular customer, the greater the inbound efficiencies." DFF at 161-62. Because of higher volume per warehouse and lower freight costs, Defendants claim, many customers *prefer* to be served out of fewer distribution centers—so having a larger number of distribution centers is not necessarily a competitive advantage. *Id.* at 28, 161-62; Hr'g Tr. 1570-71, 1573-74; DX-00264 at 122-23. For example, to serve Zaxby's, a regional quick serve chain, PFG trucks **[**175]** drive past some of their own distribution centers because the longer drive "proves cheaper for the customer." DFF at 161; Hr'g Tr. 852. PFG can also take advantage of "shuttling," a technique of caravanning multiple trailers on a single truck, to increase efficiencies. DFF at 162; Hr'g Tr. 855-57. Mr. Holm even stated at his deposition that he believed that PFG would be able to serve [TEXT REDACTED BY THE COURT] out of 35 distribution centers more effectively than USF currently does out of [TEXT REDACTED BY THE COURT] DX-00276 at 96.

The court is skeptical of Defendants' claim that, even with far fewer distribution centers, PFG will be on equal competitive footing with the merged firm, especially for national customers. Defendants' own growth belies this fact. Both Sysco and USF have, over time, increased their number of distribution centers, demonstrating that Defendants view more distribution centers to be a competitive advantage. Indeed, when Defendants presently compete for national business, they highlight their nationwide geographic coverage to potential customers. <u>See, e.g.</u>, PX03000-014 (USF presentation touting its "[a]bility to leverage our national scale to cost effectively service customers nationally); **[**176]** PX00247-001-002 (USF email communication to [TEXT REDACTED BY THE COURT] describing the "US Foods Value Proposition" as including a "Privately held National Distribution footprint company"); PX01062-005 (Sysco presentation to [TEXT REDACTED BY THE COURT] highlighting that Sysco's "national footprint, strong service approach and our breadth of product offerings is what differentiates us from our competition"); PX00279-001 (USF email to [TEXT REDACTED BY THE COURT] (a restaurant chain), mentioning "national footprint and scale" as a **[*75]** selling point); PX00281-006 (slide presentation to [TEXT REDACTED BY THE COURT] touting USF's "extensive" distribution network). USF's Executive Vice President of Strategy David Schreibman also testified that USF has the ability to leverage its national scale to cost-effectively service customers, and that USF views its national scale as a significant competitive advantage. Hr'g Tr. 1521-22; *see also* PX03010-001 (internal USF document stating that the "[o]nly 'true' options for both Premier and Novation is either

Sysco or USF[;] [t]he regional players will bid, but not be seriously considered"). Furthermore, there was no evidence presented that Defendants have moved **[**177]** to consolidate their distribution facilities to take advantage of the supposed benefits of having fewer distribution centers.[33]

Notably, not even PFG has always considered the divestiture of only 11 distribution centers to be sufficient for it to compete on a national level. A PFG internal strategy document, dated April 3, 2014, sets forth two "final" proposals for additional distribution centers "necessary to establish a national broadline network." One proposal included options of 16 to 20 distribution centers, and the other included a list of 14 to 15. Hr'g Tr. 669-71 (discussing PX09193). Six months later, in October 2014, after PFG had started negotiations with Sysco about the divestiture, internal PFG communications re-affirmed the need for more than 11 distribution centers. Following Sysco's proposal to sell only seven distribution centers, a PFG board member wrote to George Holm:

> I would still find a way to tell the FTC that we think it takes 13 but that Sysco won't **[**178]** let us look at more than 7 *which will get us nowhere near a national solution*. We need the package size to be bigger to have any chance of winning *and to ever compete nationally*. . . . [We] should proactively educate the FTC why 13 opcos [another word for distribution center] is the *bare mimimum*.

PX09192-001 (emphasis added); *see also* PX00526-036; PX00526-141-142; PX09190. PFG did just that when it met with the FTC, making the case that it needed 13 distribution centers to "compete effectively for national business." PX00526-039 at 153; PX09070 (PFG's presentation to the FTC with a map of 13 USF distribution centers needed by PFG, which included the four metropolitan areas mentioned below). Ultimately, PFG was not able to negotiate the sale of more than 11 distribution centers, with Sysco having made the decision that it "would rather litigate w[ith] the FTC than sell more than 11." PFG felt that it was "prudent to engage on 11 for now to keep the momentum/dialogue going." PX09157-002; PX00526-041 at 163.

Having fewer distribution centers means that PFG will face coverage gaps in the geographic areas where it sought, but did not receive, a distribution center. Those areas include: Cincinnati, **[**179]** Ohio; Omaha, Nebraska; Oklahoma City, Oklahoma; and Los Angeles, California, where PFG received a different, smaller distribution center than it requested. PX00526-039 at 155-56; *see also* PX09070.

Defendants argue that PFG's requests to Sysco for a larger number of distribution centers than they actually received was part of a bargaining strategy. Closing Arg. Hr'g Tr. 115-16. However, PFG's recognition that it needed more than 11 distribution centers to compete **[*76]** nationally is reflected in internal documents that were created months before PFG began negotiating with Sysco. The court credits those internal projections over PFG's current position that an additional 11 distribution centers is enough to compete for national customers. *See* Amicus Br. of PFG, ECF No. 133 at 22-24 (arguing that PFG will be able to compete effectively with 35 distribution centers).

Defendants argue that, with the planned "foldouts," *i.e.*, new distribution facilities located in contiguous geographic markets, PFG will have more than the 13 distribution centers it was seeking, including one in Cincinnati. DX-01706 at 14. However, PFG has never done a foldout, and according to internal estimates, these facilities **[**180]** may not be operational until, at the earliest, several years following the merger.[34] Defendants assert that "PFG will be well-positioned to *bid* on Day One," because even after the bids are submitted, discussions between a customer and a distributor can take up to a year before a contract is finalized, and PFG can continue its foldout efforts in the meantime. DFF at 160 (emphasis added). According to Defendants, if the customer needs service sooner, PFG can provide service via shuttling until the foldout is complete. *Id.* at 161. However, there is substantial evidence showing that customers value having distribution centers close to their locations and that distribution costs increase with driving distance. Thus the court is not persuaded that—even with promises of foldouts and the use of shuttling—a

---

[33] Defense counsel at oral argument represented that USF recently had closed two distribution centers, Closing Arg. Hr'g Tr. 113, but counsel for the FTC noted that USF also recently had opened a new distribution center, *id.* at 125-26.

[34] PFG's Senior VP of Operations estimated that PFG's "priority" foldouts in Cincinnati, Ohio, Detroit, Michigan and Buffalo, New York, will not be operational until fiscal year 2018, and Montgomery, Alabama will **[**181]** not be operational until 2017. Hr'g Tr. 735-38.

sufficient number of national customers will view PFG as a viable alternative to the merged entity "on day one" to maintain the intensity that characterizes the present competition between Sysco and USF.

2. Additional Disadvantages Faced by Post-Merger PFG

In addition to its lack of nationwide geographic coverage, the court has other concerns about PFG's ability to compete against the merged entity. Because it will purchase in smaller product volumes than the merged Sysco entity, PFG could face higher product acquisition costs, or cost of goods sold ("COGS"), than its competitor. PX05051-003 (Blackstone Memorandum indicating that "due to its scale, USF has better procurement than PFG and the 11 [distribution centers] will likely spend more to acquire private label products and get less supplier rebate dollars"); PX09350-205 (Dr. Israel's opinion that, even with the divestiture, PFG is unlikely to make up the gap in COGS between itself and the parties today). PFG also will offer substantially fewer SKUs than the merged entity. PFG today sells less than half the total number of SKUs as USF and one third the number of private label SKUs. PX06055-004 (USF offers 350,000 SKUs, of which 30,000 are private label); PX09507-007; PX09507-013 (PFG offers 150,000 SKUs, of which [TEXT REDACTED BY THE COURT] are private label). PFG's fewer SKU offerings **[**182]** will be a competitive disadvantage.

PFG also will face disadvantages in terms of human resources. Defendants point out that, as part of the divestiture package, PFG would acquire over "4,400 USF personnel, including senior executives and personnel with healthcare expertise at the 11 distribution centers, and corporate regional leadership, national sales personnel, merchandising personnel, and others with national sales expertise; [and] a 12 month non-solicit of PFG employees at the 11 distribution centers." DFF at 155 (citing Hr'g Tr. 815-25; DX-06100 at 1). **[*77]** However, even assuming that every USF employee at the 11 distribution centers becomes a PFG employee, PFG will still have fewer than half the sales representatives of either Sysco or USF today and less than one-quarter of the sales representatives of the combined firm. PX09350-181-184, Figure 18. And, PFG will only receive, at most, one-fifth of the national sales employees at USF dedicated to serving national customers. Hr'g Tr. 1528-31 (stating that only about 20 percent of USF's national account team will be made available for PFG to hire).

Moreover, PFG will be at a competitive disadvantage in its ability to offer value-added services. **[**183]** The lucrative healthcare segment is illustrative. George Holm conceded that PFG has had limited success with national healthcare customers. Hr'g Tr. 716-17. Some of that lack of success is due to PFG's limited footprint, but it is also attributable to PFG's lack of expertise in the healthcare segment and its inability to deliver value-added services to those customers. *See, e.g.*, PX00594-025 at 100 (PFG has a very small portion of [TEXT REDACTED BY THE COURT] members' business because PFG lacks acute care expertise); PX00474-001 ("PFG offers a more limited selection of healthcare-specific products than US Foods."). Even if over time PFG can acquire health care expertise, in the short run it will be at a competitive disadvantage as compared to the merged entity.[35] For instance, Joan Ralph, Group Vice President of Premier testified that, even with the healthcare employees PFG acquires through the divestiture. PFG will have significantly less healthcare expertise than USF today. Hr'g Tr. 413: PX09350-211-212. And, as IFDA President Mark Allen testified, Sysco and USF have the best understanding of the healthcare class of trade. DX-00294 at 121. The merger would only enhance that strategic **[**184]** advantage.

3. *Post-Merger PFG as an Independent Competitor*

---

[35] PX [TEXT REDACTED BY THE COURT]-002 ([TEXT REDACTED BY THE COURT] stating that USF is able to offer "certain value-added services that are especially important to healthcare facilities"); PX [TEXT REDACTED BY THE COURT]-002 (Joan Ralph of Premier stating, "[i]t is critical to Premier that its members have access to foodservice representation with healthcare expertise who can provide nutritional guidance, menu-planning services, and [TEXT REDACTED BY THE COURT]."); PX [TEXT REDACTED BY THE COURT]-004 ([TEXT REDACTED BY THE COURT] discussing his concern that PFG "may lack the ability to provide the information technology services" like dynamic item ordering [TEXT REDACTED BY THE COURT] currently receives from USE); PX [TEXT REDACTED BY THE COURT]-009 ([TEXT REDACTED BY THE COURT] stating "I do not know whether PEG has the healthcare experience, which [TEXT REDACTED BY THE COURT] highly; values.").

A final factor that cuts against the divestiture as a proposed fix is that PFG will be dependent on the merged entity for years following the transaction.***HN34***[] "In order to be accepted, curative divestitures must be made to ... a willing, *independent* ***[**185]*** competitor capable of effective production ...." *CCC Holdings, 605 F. Supp. 2d at 59* (quoting *White Consol. Indus. v. Whirlpool Corp., 781 F.2d 1224, 1228 (6th Cir. 1986))* (internal quotation marks omitted). As the court observed in *CCC Holdings*, it can be a "problem" to allow "continuing relationships between the seller and buyer of divested assets after divestiture, such as a supply arrangement or technical assistance requirement, which may increase the buyer's vulnerability to the seller's behavior." *Id.* (internal quotation marks omitted). Under the Transition Services Agreement. PFG will have complete access to USF private label products for three years at its 11 new distribution centers, and therefore will be relying on the merged entity to license those products to PFG. *See* DX-06100 at 1; PX09060-005. PFG will also have the right to license USF's database for at least **[*78]** five years, with a continuing option for five more. PFG, therefore, will not be a truly independent competitor.

For the foregoing reasons, the court is not persuaded that the proposed divestiture will remedy the anticompetitive effects of the merger.

B. Existing Competition

1. Regionalization

Defendants assert that existing competition can and will constrain potential price increases or other unilateral effects in the national **[**186]** customer market. Their primary argument is that the ability of national customers to switch or threaten to switch to a network of regional distributors will inhibit anticompetitive behavior by the merged company. *See* Defs.' Opp'n Br. at 40-41. Defendants point to many large national customers who multi-source their foodservice distribution needs, including using various regional broadliners to service individual locations. Defendants cite as examples Amerinet, Sodexo, the Defense Logistics Agency, [TEXT REDACTED BY THE COURT], Subway, and [TEXT REDACTED BY THE COURT], all of whom operate regionally under multiple contracts. *See id.* at 15.

But, for several reasons, the ability to regionalize is not likely to inoculate national customers from potential anticompetitive effects. The decision of many large customers to predominantly use one broadline distributor is not simply a preference, as Defendants would characterize it, but a rational business decision. As already discussed, for the most part, the largest national customers—particularly GPOs, foodservice management companies, and hospitality companies—predominantly rely on Sysco or USF for their broadline distribution needs. The largest customers, **[**187]** generally speaking, make from 61 percent to 100 percent of their broadline purchases from Sysco or USF. *See* FTC Closing Slide 35; PFF at 113-16. Even customers who contract regionally, such as [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT], buy in very high quantities from Defendants.

Regionalization is available today, as it will be after the merger. But market actors are not moving to that model. To the contrary, as PFG's George Holm testified, the "clear trend" among large customers is to move to a single nationwide provider. Hr'g Tr. 597-98. The court can only infer from this trend that regionalization is not a reasonable option for many national customers. Regionalization likely has not taken hold for a variety of reasons. The record shows that when a customer increases its number of distributors, it incurs greater management and supply chain costs, making it far less desirable to switch to a multi-regional model. The court found the deposition testimony of Dan Cox, the President and CEO of DMA, particularly illuminating, given that the reason for DMA's existence is to consolidate the product and service offerings of multiple regional distributors and compete for national customers. **[**188]** Mr. Cox testified that using a sole source broadliner "forms the most efficient supply chain." DX00265 at 44. He explained that "[m]ore products at each delivery reduces our cost to service and therefore reduces their supply chain costs. . . . By aggregating [customers'] spend it makes the delivery system more efficient." *Id.* at 44-45.

A regional arrangement also brings with it the disadvantage of multiple points of contact. As Mr. Cox testified, a single point of contact simplifies communications, which DMA touts as an advantage over multi-sourcing broadline distribution. *Id.* at 14, 46, 68. He also added that a single information technology system is important to national customers, and DMA offers such a platform to attract them. As **[*79]** Mr. Cox explained: "[I]f they come to DMA and deal with five different members, they wouldn't have to learn and understand five different order entry platforms. We have just one platform." *Id.* at 68. A multi-regional approach thus likely would require a customer to develop greater information technology capabilities to manage its foodservice distribution contracts.

Another downside of a multi-regional model is the difficulty in obtaining consistent products—particularly private label products—across a **[**189]** national customer's different locations. Mr. Cox offered the example of [TEXT REDACTED BY THE COURT], with which DMA does over [TEXT REDACTED BY THE COURT] million in business. [TEXT REDACTED BY THE COURT] demands that DMA comply with its product specifications "at a level of 90 percent," *id.* at 74, indicating that even when a large customer uses multiple regional distributors, they impose rigorous demands with regard to product consistency. Product consistency, of course, can be achieved by purchasing from multiple distributors who carry the same brand-named products. But that approach would limit a customer's ability to purchase private label products, which typically offer a better value proposition than branded products.

PFG's George Holm concurred with Dan Cox's assessment of national customers' business needs and why they avoid regionalization. When asked why large national customers contract mainly with either Sysco or USF and why there is a clear trend toward those customers using a single broadliner, Holm offered numerous reasons: the "ability to get SKUs in quickly"; "one place to contact"; "[o]ne IT system"; "[o]ne sales contract"; "[o]ne person to deal with"; "the same product [across] their system"; **[**190]** writing "one check as opposed to several"; "simplified contract administration"; and easier "management of approved item lists and specifications." Hr'g Tr. 600-04. The court thus concludes that the possibility of regionalizing broadline foodservice is not likely to protect national customers from the merger's anticompetitive effects.

2. DMA

Today, the only other competitor with a nationwide footprint is DMA. Defendants claim that DMA is capable of effectively competing against the merged entity because it provides a single point of contact, a single contract with consistent terms across customer locations, and a single ordering platform. DFF at 165-66 (citing DX-00265 at 63-64, 66, 68). The court disagrees.

Defendants acknowledge that DMA is not a one-stop-shop for national customers as Sysco and USF are today. Indeed, Defendants recognize that "larger customers 'look to [DMA's] members regionally . . . rather than DMA as a national solution.'" *Id.* at 164-65 (quoting DX-00265 at 86).

[TEXT REDACTED BY THE COURT] As Dan Cox, the President and CEO of DMA, explained:

> [TEXT REDACTED BY THE COURT]

DX-00265 at 64-65. As a result, [TEXT REDACTED BY THE COURT] *Id.* at 65.

National customers who value private label products, such as **[**191]** GPOs or foodservice management companies, [TEXT REDACTED BY THE COURT] *Id.* at 79-80. [TEXT REDACTED BY THE COURT] *See id.* at 224-26.

And, even if a national customer wanted to switch to DMA, [TEXT REDACTED BY THE COURT] As Mr. Cox explained, [TEXT REDACTED BY THE COURT]" *Id.* at 99. [TEXT REDACTED BY THE COURT] *Id.* at 100, 157. For example, [TEXT REDACTED BY THE COURT] recently considered switching its business to DMA, but decided to stay with Sysco [TEXT REDACTED BY THE COURT]. *Id.* at 227-29. [TEXT REDACTED BY THE COURT], the court does not view DMA as a viable competitor that can constrain a post-merger Sysco.

[*80] *3. Conclusion as to Existing Competition*

Based on the evidence presented, the court is convinced that national customers will be better off in a marketplace that has two strong competitors capable of nationwide broadline distribution than in a marketplace in which there is a single undisputed heavyweight of broadline distribution whose only competitive constraints is a transitioning PFG, DMA, and a collection of regional players.

C. Entry of New Firms and Expansion of Existing Competitors

Defendants argue that the entry of new competitors and the expansion of existing competitors will keep the industry competitive. ***HN35***[] If a court finds that "there exists ease of entry into the relevant product market," that finding "can be sufficient **[**192]** to offset the government's prima facie case of anti-competitiveness." *Cardinal Health, 12 F. Supp. 2d at 55*. "The prospect of entry into the relevant market will alleviate concerns about adverse competitive effects only if such entry will deter or counteract any competitive effects of concern so the merger will not substantially harm customers." Merger Guidelines § 9. Ease of entry must be "*timely, likely*, and *sufficient* in its magnitude, character, and scope to deter or counteract the competitive effects of concern." *Id.* (emphasis added). As with their other rebuttal arguments, Defendants bear the burden of demonstrating the ability of other distributors to "fill the competitive void" that will result from the proposed merger. *See Swedish Match, 131 F. Supp. 2d at 169*. Defendants assert that a lack of technological, legal, and regulatory barriers makes entry into the foodservice distribution industry relatively easy. Yet although all it may take is a "guy and a truck" to become a foodservice distributor, becoming a *broadline* foodservice distributor with the ability to compete for national customers is another thing altogether.

The broadline foodservice distribution industry is extraordinarily capital and labor intensive. It costs roughly $35 million to build **[**193]** a single distribution center. Hr'g Tr. 586. In addition, the distribution center must be stocked with goods. A fleet of expensive, refrigerated trucks is required to deliver the products. People—lots of them—are needed to sell the broadline service, maintain and stock the warehouse, and deliver the products. *See Swedish Match, 131 F. Supp. 2d at 171* (finding high barriers to entry where the evidence showed "substantial sunk costs in plant construction, product development, and marketing" required to compete). And, even if a newcomer were to make the substantial investment to start a broadline distribution company, there is no guarantee that customers will follow. Incumbency is a powerful force in the foodservice distribution industry. *See H&R Block, 833 F. Supp. 2d at 75* (finding that "importance of reputation and brand in driving consumer behavior" limited an existing competitor's ability to expand). Even if it were possible for a new entrant to overcome the incumbent's advantage, it would take years. These high barriers to entry will further entrench the merged company's market power. PX03003-005 (USF lender presentation describing broadline foodservice distribution as having "High barriers to entry for scale players").

Defendants also contend that **[**194]** existing firms have demonstrated the capacity to expand to compete against the merged firm. They highlight the fact that other broadline distributors—including Shamrock, Ben E. Keith, and Reinhart—started out as small businesses serving only limited items to local customers, but were able to grow to regional prominence. They **[*81]** describe examples of competitors that have recently opened new facilities or plan to do so.

But none of these examples overcome the fundamental problem with expansion as a constraint on the merged company—like new entry, successful expansion is extraordinarily capital intensive and demands a long time horizon. Based on their assessment that expansion would not be an economically viable strategy, regional distributors have said that they have no plans to expand or reposition in order to serve national customers. [TEXT REDACTED BY THE COURT], which has [TEXT REDACTED BY THE COURT] distribution centers mostly located in the [TEXT REDACTED BY THE COURT], has told the FTC that such a massive expansion would not be "viable" in the short term, given the "time and cost required." PX[TEXT REDACTED BY THE COURT]-006. Other regional distributors, including [TEXT REDACTED BY **[**195]** THE COURT] have similarly been dissuaded by the time, costs, or risks of expansion. PX[TEXT REDACTED BY THE COURT]-036 at 139-42; PX[TEXT REDACTED BY

THE COURT]-004; PX[TEXT REDACTED BY THE COURT]-003; PX[TEXT REDACTED BY THE COURT]-005-006; PX[TEXT REDACTED BY THE COURT]-048-049.

Companies rarely enter new markets without an existing customer base because the costs and risks are prohibitive. There is a real "chicken-and-egg" problem with such expansion, known in the industry as "greenfield" expansion. Companies will not make the significant capital expenditure of building a new distribution center unless they already have customers to serve, but customers will not commit to a distributor unless it has demonstrated the ability to serve its needs. As a result, expansion in the industry is typically done through "foldouts"—building distribution centers in contiguous geographic areas—so that customers can be served from an existing facility until the new facility is built. But even foldouts take time to succeed. They can take from one to three years to complete, and it can take four to five years for a foldout facility to achieve sales per square foot similar to established broadline facilities. **[**196]** PX00529-042 at 166-68; Hr'g Tr. 837-39; *see also* PX00558-051 at 201-04. Although a foldout strategy may preserve competition in a particular local market, it cannot effectively be used to replace the competition benefitting national customers lost by the merger. The only way in which a regional player could expand sufficiently and quickly enough to compete with the merged company would be through a sizeable acquisition of multiple distribution centers.

In summary, the court finds that, absent a substantial acquisition opportunity, expansion by regional players will not be timely, likely, and of sufficient magnitude to counteract anticompetitive harm. *See* *Cardinal Health, 12 F. Supp. 2d at 58* ("Although the smaller wholesalers may adequately compete and expand to service both the primary and secondary needs of local customers, this Court finds that they would not sufficiently expand to compete with the nationals.").

D. Efficiencies

1. Requirement for Merger-Specific and Verifiable Efficiencies

HN36[] Although the Supreme Court has never recognized the "efficiencies" defense in a Section 7 case, the Court of Appeals as well as the Horizontal Merger Guidelines recognize that, in some instances, efficiencies resulting from the merger may be **[**197]** considered in rebutting the government's *prima facie* case. *Heinz, 246 F.3d at 720* (citations omitted). Where, as in this case, the court finds high market concentration levels, defendants must present "proof of extraordinary efficiencies" to rebut the government's *prima facie* case. *Id.* (citations omitted) (requiring "extraordinary" efficiencies to rebut an increase in HHI of 510 points); *see also* **[*82]** Areeda & Hovenkamp 3d ed., *supra*, ¶ 971f (requiring "extraordinary" efficiencies where the "HHI is well above 1800 and the HHI increase is well above 100"). The court is not aware of any case, and Defendants have cited none, where the merging parties have successfully rebutted the government's *prima facie* case on the strength of the efficiencies. *See* *CCC Holdings, 605 F. Supp. 2d at 72* (stating that "courts have rarely, if ever, denied a preliminary injunction solely based on the likely efficiencies"). Yet even if evidence of efficiencies alone is insufficient to rebut the government's *prima facie* case, such evidence may nevertheless be "relevant to the competitive effects analysis of the market required to determine whether the proposed transaction will substantially lessen competition." *Arch Coal, 329 F. Supp. 2d at 151* (citations omitted).

HN37[] The court must "undertake a rigorous **[**198]** analysis of the kinds of efficiencies being urged by the parties in order to ensure that those 'efficiencies' represent more than mere speculation and promises about post-merger behavior." *Heinz, 246 F.3d at 721*. Specifically, the court must determine whether the efficiencies are "merger specific"—meaning they represent "a type of cost saving that could not be achieved without the merger"—and "verifiable"—meaning "the estimate of the predicted saving must be reasonably verifiable by an independent party." *H&R Block, 833 F. Supp. 2d at 89* (internal quotation marks omitted) (citing Merger Guidelines § 10); *Cardinal Health, 12 F. Supp. 2d at 62* ("In light of the anti-competitive concerns that mergers raise, efficiencies, no matter how great, should not be considered if they could also be accomplished without a merger."). Defendants bear the burden of demonstrating that their claimed efficiencies are merger specific, *H&R Block, 833 F. Supp. 2d at*

90, which requires demonstrating that the efficiencies "cannot be achieved by either company alone," Heinz, 246 F.3d at 722. And, Defendants must also demonstrate that their claimed efficiencies would benefit customers. CCC Holdings, 605 F. Supp. 2d at 74.

Defendants claim that the merger will generate over one billion dollars in annual cost savings and operational synergies and, "[e]ven when discounted substantially for unforeseen **[**199]** integration complications, possible customer loss, and the divestiture, the merged company's efficiencies are expected to generate over $600 million in savings." DFF at 178. Defendants argue that the $600 million efficiencies estimate is "the product of meticulous analysis and planning," which occurred over the course of eight months and involved over 100 employees at McKinsey, an independent consulting firm, and over 170 Sysco and USF employees who are extremely familiar with the business. *Id.* at 179. As Defendants explained, "Sysco, USF, and McKinsey reviewed a back-breaking amount of information from the merging firms, analyzed historical integration data, modeled possible cost-savings opportunities, and built a new organizational structure around the companies' combined customer base, and designed detailed day 1, day 100, and year 1 plans for integration." *Id.* Of the $600 million cost savings identified by McKinsey, Defendants' expert Dr. Hausman identified more than $490 million as merger specific. To rebut Dr. Hausman's opinion on efficiencies, the FTC presented Mr. Rajiv Gokhale of Compass Lexecon as an expert in financial economics. He opined that at least 65 percent of Defendants' efficiencies **[**200]** were not merger specific. PX09351-007.

The court does not question the rigor and scale of the analysis conducted by **[*83]** McKinsey. Nor does the court have any reason to question the accuracy of McKinsey's total annual cost savings estimate. But that is not the issue before the court. The issue is whether Defendants have shown that the projected "merger-specific" cost savings are substantial enough to overcome the presumption of harm arising from the increase in market concentration and other evidence of anticompetitive harm. As to that question, the court is unpersuaded that Defendants' combination would result in $490 million in merger-specific cost savings. Defendants have not shown that that amount, or at least a substantial portion of it, could not be achieved independently of the merger. Nor does it appear that Dr. Hausman conducted any independent analysis of the McKinsey estimate to determine which savings, if any, can be achieved without the merger.

Sysco did not hire McKinsey to identify merger-specific savings for antitrust purposes. Rather, it initially hired McKinsey in the fall of 2013 to determine whether a merged company could achieve enough cost savings to make the combination **[**201]** worthwhile. Hr'g Tr. 1862-63. After McKinsey concluded that the merger would generate sufficient cost savings and Sysco and USF announced the merger, McKinsey began a more in-depth analysis beginning in January 2014 to identify "particular synergies that would arise from the deal." *Id.* at 1864-65. Carter Wood, the McKinsey Director who led the effort, testified that his firm was hired "to estimate what is possible by combining these two companies such that, number one, they would have confidence or not to go ahead with the deal; and two, to create value for the newly integrated company." *Id.* at 1914. McKinsey was not given instructions on identifying merger-specific savings, and Mr. Wood testified that he was not familiar with the term "merger specific." *Id.* at 1904.

Dr. Hausman used McKinsey's projections as his baseline for identifying merger-specific savings. *Id.* at 2053. However, it is not clear what independent analysis Dr. Hausman did to reduce McKinsey's projected savings of $600 million annually to $[TEXT REDACTED BY THE COURT] million in merger-specific savings. In his report, Dr. Hausman explained:

> In my previous academic research I have emphasized the effect of cost saving efficiencies on marginal cost, which can be approximated **[**202]** by average variable cost. Thus I will take a conservative approach to the estimated efficiencies and focus on cost savings from changes in variable costs that arise from the merger and would not occur otherwise.

DX-01355 at 67 (footnote omitted). It is not apparent, however, how Dr. Hausman calculated merger-specific savings using this approach, as neither his testimony nor his report spell out precisely how he went about identifying the amount of variable cost savings to include in his merger-specific estimate.

Table 4a of Dr. Hausman's rebuttal report illustrates the difficulties with verifying his analysis. Dr. Hausman itemized the "run-rate of merger-specific variable cost synergies" into four **[*84]** categories: (i) Merchandising, (ii) Operations, (iii) Sales, and (iv) Corporate. In each of those four categories, Dr. Hausman listed the component parts (in the first column) and the corresponding amounts (in the fourth column) that comprise the category cost savings estimate. Yet for each of these elements, Dr. Hausman relied exclusively on documents created by either McKinsey or Defendants. *See* DX-01353 at Ex. C, 2 n.i. He performed no independent analysis to verify these numbers. *Id.* ("All **[**203]** source material is either Sysco, US Foods, or McKinsey material and I take those materials at face value.").

Table 4a: Estimated Cost Efficiencies			
Adjusted for Divestiture, Customer Loss, and Contingencies			
Category	Run-Rate Synergies	Run-Rate of Variable Cost Synergies	Run-Rate of Merger Specific Variable Cost Synergies

[*85] But even taking Dr. Hausman's variable cost savings numbers as presented, the court is not convinced that the full $490 million in projected savings is merger specific. For example, nearly half of the $[TEXT REDACTED BY THE COURT] million in merger-specific savings identified by Dr. Hausman come from the "Merchandising" category, also known as "category management." The $281 million that Dr. Hausman attributed to category management cost savings comes directly from McKinsey's calculations. Category management refers to a process of optimizing a distributor's product assortment by gaining insights into which SKUs its customers value and then optimizing the SKU inventory to match customers' demands and procure those products in the most cost-efficient manner. Hr'g. Tr. 1881. Both companies prior to the merger already were undertaking category management efforts. PX00592-035 at 137-40; PX00592-049 at 193-94.

Although McKinsey Director Mr. Wood testified that McKinsey made an effort to identify only incremental merchandising savings, that is, savings arising only because of the merger, **[**204]** he could not say whether the $281 million included some cost savings that Defendants might have been able to achieve separately. For instance, before the merger, Sysco was undergoing a category management program, called Project Naples, which was due to end in June 2015. However, Project Naples covered only two-thirds of Sysco's product categories; Sysco planned to complete the remaining categories at a later date. Mr. Wood testified that the $281 million figure was in addition to the Project Naples costs savings, but he could not say whether or not that number was in addition to the cost savings that Sysco could achieve through its continued cost savings efforts beyond June 2015.

USF, meanwhile, suspended its category management project after the merger's announcement. At the time the merger was announced, USF had only conducted category management on [TEXT REDACTED BY THE COURT] to [TEXT REDACTED BY THE COURT] categories out of 300. PX00592-035 at 139; PX00592-048-049 at 192-93. Mr. Wood could not say whether the $281 million was in addition to cost savings that USF might have achieved had it continued its category management program. Thus, Dr. Hausman's estimate of $281 million in **[**205]** "merger-specific" savings in Merchandising—a number that, again, relied exclusively on McKinsey's calculations—likely overstates the achievable merger-specific category management savings.

The FTC has pointed to, and Defendants have not rebutted, other ways in which Dr. Hausman's reliance on McKinsey's estimates likely overstated the savings arising from the merger. During the hearing, Mr. Wood acknowledged that part of the sales synergy estimate—which represents savings from combining the salesforces of the two companies—would be achieved by having customers place orders via an e-commerce platform. However, migration to electronic ordering can be achieved by either company independently of the merger. Hr'g Tr. 1904-05. Another savings strategy identified by McKinsey, "maximizing backhaul," refers to having delivery trucks stop by suppliers to reload goods on their way back to the warehouse, in order to save an extra trip to those suppliers. Hr'g Tr. 1894-95. However, backhaul savings can also be achieved independently of the merger. *See* Hr'g Tr. 1905-06.

2. Insufficiency of Estimated Merger-Specific Savings

Even if the court were to credit Dr. Hausman's total estimate of merger-specific **[**206]** efficiencies, the figure would only amount to less than one percent of the **[*86]** merged entity's annual revenue. PX09375-118 (Dr. Israel's rebuttal report stating that Dr. Hausman's original estimate of merger-specific, variable cost efficiencies $[TEXT REDACTED BY THE COURT] of million per year represents only one percent of Sysco and USF's combined annual broadline revenue).[36] Even assuming that 100 percent of the cost savings would be passed on to customers, the savings are unlikely to outweigh the competitive harm to customers. Since the savings are equal to a small percentage of the combined company's total revenue, even a modest increase in price could offset any cost savings generated by the efficiencies. At oral argument, Defendants' response to this concern was that the market would not allow even a slight price increase, as customers would exercise their other options, such as regionalizing. *See* Closing Arg. Hr'g Tr. 117-18. Having found that this merger will result in high national customer and local market concentration levels, the court does not share Defendants' confidence that the market would not tolerate such a price increase. As the court observed in *Cardinal Health*,***HN38***[] "[t]he critical **[**207]** question raised by the efficiencies defense is whether the projected savings from the merger[ ] are enough to overcome the evidence [showing] that possibly greater benefits can be achieved by the public through existing, continued competition." *12 F. Supp. 2d at 63*. Here, Defendants have fallen short of making that showing.

E. Conclusion

Upon consideration of all of the evidence presented, the court concludes that Defendants' rebuttal evidence is not sufficient to overcome the presumption of anticompetitive harm that the FTC was able to establish through evidence of high post-merger market concentrations and other evidence of competitive harm. The court thus concludes that the FTC has met its burden of demonstrating a likelihood of success. That is, the FTC has raised "questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance **[**208]** and ultimately by the Court of Appeals." *Heinz, 246 F.3d at 714-15* (citation omitted) (internal quotation marks omitted).

---

[36] In 2013, Sysco and USF's combined broadline revenue was [TEXT REDACTED BY THE COURT] PX09350-216, Table 27. One percent of that sum is greater than Dr. Hausman's merger-specific cost savings estimate of $[TEXT REDACTED BY THE COURT] million.

IV. THE EQUITIES

Although the court has found that the FTC has shown a likelihood of success on the merits and thus created a presumption in favor of injunctive relief, *see* *Swedish Match, 131 F. Supp. 2d at 172*, ***HN39***[] Section 13(b)'s "public interest" standard still requires the court to weigh the public and private equities of enjoining the merge, *Heinz, 246 F.3d. at 726*. Here, the primary public interests to be considered include (i) the public interest in effectively enforcing antitrust laws and (ii) the public interest in ensuring that the FTC has the ability to order effective relief if it succeeds at the merits trial.

The public's interest in enforcing ***antitrust law*** plainly favors enjoining Defendants' proposed merger. *See id.* ("The principle public equity weighing in favor of issuance of preliminary injunctive relief is the public interest in effective enforcement of the antitrust laws."); *Swedish Match, 131 F. Supp. 2d at 173* ("There is a strong public interest in effective enforcement of the antitrust laws that weighs heavily in favor of an injunction in this case.").

[*87] The second public interest factor—preserving the FTC's ability to order effective relief after the administrative hearing—also supports **[**209]** an injunction. As stated by the Court of Appeals, "if the merger were ultimately found to violate the Clayton Act, it would be impossible to recreate pre-merger competition" because the merging parties would have already combined their operations and they would be difficult to separate, even by a subsequent divestiture order. *Id.* ***HN40***[] ("*Section 13(b)* . . . embodies Congressional recognition of the fact that divestiture is an inadequate and unsatisfactory remedy in a merger case."). That problem is amplified here because the proposed merger involves two transactions, not just one: (i) Sysco's merger with USF and (ii) PFG's purchase of USF's distribution centers and other assets. The parties have represented that, absent an injunction, Sysco and USF will merge their operations and divest 11 distribution centers and associated assets—including personnel, IT Systems, and USF private label products—to PFG, which will incorporate those assets into its own operations. As the FTC has pointed out, it would face an especially daunting and potentially impossible task of "unscrambling" the eggs (*i.e.*, returning the merging companies to their pre-merger state) if the ensuing administrative proceedings were to determine **[**210]** that the merger violates *Section 7 of the Clayton Act*. Additionally, it is difficult to conceive how a subsequent divestiture order—which would attempt to restore the parties to their pre-merger state—could be fulfilled without causing significant disruption to the foodservice distribution industry, its customers, and the ultimate consumers—Americans who eat outside the home.

Defendants contend that the public equities weigh against granting the preliminary injunction because the merger will generate substantial efficiencies that will be passed on to customers. They claim that, if the FTC obtains the injunction, Defendants and their customers will be harmed because "Sysco and US Foods will abandon the merger and consumers will be deprived of its benefits." DFF at 186-87 (citing Hr'g Tr. 1516-17). But the court cannot conclude, on this record, that the merger's cost savings will outweigh the potential harm to customers from losing the country's second largest broadline distributor as a competitor for their business. Dr. Israel's merger simulation model predicted that, even taking into account the estimated cost savings, the merger would harm customers. PX09350-114-121, Table 3. Although the court has reservations **[**211]** about some of Dr. Israel's merger simulation model inputs, the court finds that the record as a whole—at the very least—raises substantial questions about whether the merger will harm consumers. Therefore, the public equities here favor granting the preliminary injunction.

The court recognizes the extraordinary amount of time, energy, and money that Sysco, USF, and PFG have devoted to the proposed merger. Their efforts, and the risk that the parties will abandon the merger rather than proceed to an administrative trial on the merits is, however, "at best, a private equity" which cannot overcome the significant public equities weighing in favor of a preliminary injunction. *See* *Heinz, 246 F.3d at 727* (internal quotation marks omitted).

CONCLUSION

In the end, after considering the record in its entirety, the court returns to Judge Tatel's observation in *Whole Foods*: "[T]here can be little doubt that the acquisition of the second largest firm in the market by the largest firm in the market will tend to harm competition in that market." *Whole Foods, 548 F.3d at 1043 (Tatel, J.)* (citation omitted) (internal quotation **[*88]** marks omitted). The court finds that the FTC has carried its burden of showing a "reasonable probability" that a merger of the country's two largest **[**212]** broadline foodservice distributors, Sysco and USF, would harm competition. Defendants' merger is likely to cause unduly high market concentrations in two relevant markets—broadline foodservice distribution to national customers and broadline foodservice distribution to local customers—and eliminate a key competitor in those markets, USF. The evidence offered by Defendants to rebut the FTC's showing of likely harm was unavailing. The equities also favor granting the requested preliminary injunction. The FTC, therefore, has established that it is likely to succeed in proving, after a full administrative hearing, that the effect of Sysco's proposed acquisition of USF "may be substantially to lessen competition, or to tend to create a monopoly" in violation of *Section 7 of the Clayton Act*.

The court thus grants the FTC's Motion for Preliminary Injunction. A separate order accompanies this Memorandum Opinion.

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F.Supp.3d.]

[*none] **ORDER**

On June 23, 2015, the court provided the parties under seal the court's Memorandum Opinion, ECF No. 180, and directed them to submit proposed redactions before Thursday, June 25, 2015, at 5 p.m. The court also granted permission **[**213]** to Distribution Market Advantage to propose redactions of its commercially sensitive information contained in the Memorandum Opinion. ECF No. 181.

The court has reviewed all suggested redactions and has accepted them, except as set forth below:

(1) *Passim*—The parties inconsistently proposed redactions relating to amounts in the "millions" or billions." The court has decided to redact numerical values, but will retain the word "million" or "billion" following the numerical value.
(2) Pgs. 36-37, 51-52—The court has replaced Dr. Israel's actual diversion percentages with "over 70%," which is consistent with his testimony in open court. Hr'g Tr. 1010-11.
(3) Pg. 52 n.21—Citation to Joan Ralph's Declaration has not been redacted because she disclosed similar information in open court. Hr'g Tr. 380-87.
(4) Pg. 53—Dr. Jerry Hausman's testimony regarding the number of distribution centers used by USF and Sysco customers has not been redacted because he testified to this information in open court. Hr'g Tr. 1976.

(5) Pg. 57—The names of businesses using regional contracting have not been redacted because these companies were identified in open court. Hr'g Tr. 1075 (Five Guys); Hr'g Tr. 1528 (Subway); **[**214]** Hr'g Tr. 1572 (Sodexo); Hr'g Tr. 2074 (Amerinet).
(6) Pgs. 79, 95—References to the "54 markets" in which USF identified Sysco as a competitor have not been redacted because the information is not competitively sensitive information.
(7) Pg. 93—Information regarding the percentage of time when Sysco employees identified USF as the reason for an incentive request has not been redacted because Dr. Israel testified to this number in open court. Hr'g Tr. 1095.

(8) Pg. 104—The reference to Zaxby's has not been redacted because the restaurant was mentioned in open court. Hr'g Tr. 852-53.
(9) Pg. 108—Reference to the number of private label SKUs offered by USF has not been redacted because the information is available in a public filing available on the Securities and Exchange Commission's website.
(10) Pg. 109 n.35—Citation to Joan Ralph's Supplemental Declaration has not been redacted, except for one phrase, because she disclosed similar information in open court. Hr'g Tr. 380-81.

(11) Pg. 110—The names of businesses using regional contracting have not been redacted because these companies were identified in open court. Hr'g Tr. 1528 (Subway); Hr'g Tr. 1572 (Sodexo); Hr'g Tr. 2074 (Amerinet). **[**215]**
(12) Pg. 122-23—McKinsey's estimate regarding incremental merchandising savings has not been redacted because it was revealed in public testimony. Hr'g Tr. 2325-26.
(13) Pg. 124 n.36—The court has replaced Sysco and USF's actual combined broadline revenue with the phrase "over $50 billion" because that number was testified to in open court. Hr'g Tr. 2362.

A redacted, publicly available version of the court's Memorandum Opinion has been filed with this order. ECF No. 190.

Judges: HARRY S. MATTICE, JR., UNITED STATES DISTRICT JUDGE.

Opinion by: HARRY S. MATTICE, JR.

Opinion

ORDER

Before the Court is Defendant McWane, Inc.'s Motion to Dismiss Direct Purchaser Plaintiffs' Consolidated Amended Complaint (Doc. 178), Motion to Dismiss Indirect Purchaser Plaintiffs' Consolidated Amended Complaint (Doc.

176), and Motion to Dismiss Consumer Plaintiffs' Consolidated Amended Complaint (Doc. 177); Defendant Charlotte Pipe's Motion to Dismiss Direct Purchaser Plaintiffs' Consolidated Amended Complaint (Doc. 181), Motion to Dismiss Indirect Purchaser Plaintiffs' Consolidated Amended Complaint (Doc. 182), and Motion to Dismiss Consumer Plaintiffs' Consolidated Amended Complaint (Doc. 183); Defendants' Motion to Strike Indirect Purchaser Plaintiffs' Class Action Allegations (Doc. 151) and Motion to Strike Consumer Plaintiffs' Class Action Allegations (Doc. 154); and Defendant Cast Iron Soil Pipe Institute's Motions for Joinder (Docs. 162, 163, 185, 191).

I. BACKGROUND[1]

Cast iron soil pipe ("CISP") is manufactured predominantly from cast iron and is primarily used in residential, commercial, industrial, and government buildings for sanitary and storm drain, waste, and vent piping applications. (Doc. 122 at 7; Doc. 124 at 7; Doc. 121 at 13). It replaced wooden systems and has been used in the United States since the beginning of the Nineteenth Century. (Doc. 122 at 7; Doc. 121 at 13). CISP is standardized and must meet the requirements of the American Society for Testing and Materials. (Doc. 122 at 11; Doc. 124 at 10; Doc. 121 at 17). CISP is a versatile product and it can be installed above flooring, below flooring, and underground. (Doc. 122 at 7; Doc. 124 at 13; Doc. 121 at 14). The most frequent purchasers of CISP are plumbing wholesalers, although it is also purchased by end users such as construction companies, plumbers and developers. (Doc. 122 at 10; Doc. 124 at 14; Doc. 121 at 16).

Plastic or polymer pipes are not a functional substitute **[*10]** for CISP because (1) CISP is more effective at reducing plumbing noise; (2) cast iron has a high degree of strength and resistance to tree roots, penetration by rodents, and failure because of ground shifts; (3) cast iron expands and contracts far less than other materials; and (4) CISP is non-combustible and will not burn if there is a building fire. (Doc. 122 at 12; Doc. 124 at 11; Doc. 121 at 18). State, municipal, and local codes often require the use of CISP rather than plastic piping for certain types of construction. (Doc. 122 at 7; Doc. 124 at 11; Doc. 121 at 14, 18).

There are three producers of CISP in the United States: Defendant Charlotte Pipe, Defendant AB&I Foundry ("AB&I"), and Defendant Tyler Pipe Company ("Tyler Pipe").[2] (Doc. 122 at 11; Doc. 124 at 9; Doc. 121 at 2, 16). The Court will refer to McWane and its divisions collectively as "McWane". (Doc. 122 at 11; Doc. 124 at 9). Defendant Randolph Holding Company, LLC is a wholly-owned subsidiary of Charlotte Pipe, and the Court will refer to Charlotte Pipe and its subsidiaries collectively as "Charlotte Pipe." (Doc. 124 at 6). Together, McWane and Charlotte Pipe account for 90 percent of the market for CISP. (Doc. 122 **[*11]** at 11; Doc. 124 at 7; Doc. 121 at 2, 16). To enter the CISP market, a producer would need to build or acquire a foundry and the specialty manufacturing tools to produce CISP and develop a distribution network and relationships with plumbing distributors and consumers. (Doc. 122 at 11; Doc. 124 at 10; Doc. 121 at 17).

In 1949, the Cast Iron Soil Pipe Institute ("CISPI") was organized by CISP manufacturers and consisted of 24 CISP manufacturers. (Doc. 122 at 12; Doc. 124 at 6; Doc. 121 at 9). CISPI has its headquarters in Hixson, Tennessee. (Doc. 121 at 11). As of August 2014, CISPI consists solely of Defendants of McWane and Charlotte Pipe and their entities. (Doc. 122 at 12-13; Doc. 124 at 7, 12; Doc. 121 at 9). Charlotte Pipe and McWane are CISPI's sole funders. (Doc. 122 at 13; Doc. 121 at 9). Executives of McWane and Charlotte Pipe attend CISPI events together at least twice a year. (Doc. 122 at 13; Doc. 124 at 6, 12; Doc. 121 at 11).

There are three groups of plaintiffs in this multidistrict litigation: (1) Direct Purchasers of CISP; (2) Indirect Purchasers of CISP **[*12]** for resale; and (3) Consumer Purchasers of CISP.

---

[1] In large part, the allegations stated within the Consolidated **[*9]** Amended Complaints share similar facts. Thus, the Court has combined the background section for the Motions, and it will differentiate between the Consolidated Amended Complaints only when necessary to its analysis.

[2] Defendants AB&I, Tyler Pipe, AB&I Service Center, Tyler Coupling, and Tyler Pipe Penn are divisions of Defendant McWane.

The Direct Purchasers consist of A&S Liquidating, Inc., Aaron & Co., Hi Line Supply Company, Ltd., and Red River Supply, Inc. ("Direct Purchaser Plaintiffs" or "Direct Purchasers"). A&S Liquidating, Inc. is a corporation located in Grand Blanc, Michigan that purchased CISP manufactured by at least one of the Defendants. (Doc. 122 at 4). Aaron & Co. is a corporation located in Piscataway, New Jersey that purchased CISP manufactured by at least one of the Defendants. (Doc. 122 at 4). Hi Line Supply Company, Ltd. is a corporation located in Peoria, Illinois that purchased CISP manufactured by at least one of the Defendants. (Doc. 122 at 5). Red River Supply, Inc. is a corporation located in Shreveport, Louisiana that purchased CISP manufactured by at least one of the Defendants. (Doc. 122 at 5).

The Indirect Purchasers consist of Craig Mechanical, Inc. and Keith McNeill Plumbing Contractor, Inc. ("Indirect Purchaser Plaintiffs" or "Indirect Purchasers"). Craig Mechanical, Inc. is a plumbing contractor located in Riverside, California, that performs commercial and industrial plumbing projects and purchased CISP manufactured by at least one **[*13]** of the Defendants. (Doc. 124 at 4-5). Keith McNeill Plumbing Contractor, Inc. is a plumbing contractor located in Tallahassee, Florida, that purchased CISP manufactured by at least one of the Defendants. (Doc. 124 at 5).

The Consumer Purchasers consist of Jerry Adkins and Rena Lundmark ("Consumer Plaintiffs" or "Consumer Purchasers"). Jerry Adkins is an Arkansas resident who purchased CISP from one or more of the Defendants for his personal use. (Doc. 121 at 6). Rena Lundmark is an Arkansas resident who purchased CISP from one or more of the Defendants for her personal use. (Doc. 121 at 6).

Plaintiffs allege that McWane and Charlotte Pipe have been fixing prices of CISP since at least January 1, 2006 through December 31, 2013. (Doc. 122 at 14; Doc. 124 at 14; Doc. 121 at 20). In 2005 or 2006, an employee of Charlotte Pipe's cast iron foundry in North Carolina learned from Charlotte Pipe's Senior Vice President of the Cast Iron Division, Marshall Coble, that McWane and Charlotte Pipe were fixing prices of CISP. (Doc. 122 at 14; Doc. 124 at 15; Doc. 121 at 20). Coble stated that Charlotte Pipe and McWane were meeting at the bi-annual trade association meeting that summer or fall to agree **[*14]** on pricing for CISP. (Doc. 122 at 14; Doc. 121 at 20).

McWane and Charlotte Pipe often announced identical price increases at close intervals after a trade association meeting. In early September 2010, Charlotte Pipe and AB&I announced a future price increase of 7.5%, which would take effect on January 1, 2011. (Doc. 122 at 14; Doc. 124 at 15; Doc. 121 at 21). Additionally, Charlotte Pipe and McWane had identical prices for the years 2006, 2007, 2009, 2010, 2011, 2012, and 2013 for the 3"x 10' No-Hub Pipe, 4" x 10' No-Hub Pipe, 3" No-Hub 1/4 Bend, 4" No-Hub 1/8 Bend, 4" x 3" Wye, 3" x 10' Single Hub Pipe, 4" x 10' Single Hub Pipe, 3" Hub & Spigot 1/4 Bend, and 4" Hub & Spigot 1/8 Bend. (Doc. 122 at 15-17; Doc. 121 at 21-22). These prices have "steadily increased" since January 1, 2006 even though total spending on construction has declined significantly during that time period. (Doc. 122 at 17; Doc. 124 at 19; Doc. 121 at 22). Additionally, the primary cost determinants for CISP such as scrap iron and natural gas have increased at rates "substantially less" than the price increases made by the Defendants. (Doc. 124 at 22; Doc. 121 at 23).

McWane and Charlotte Pipe agreed not to compete **[*15]** for one another's CISP customers. (Doc. 124 at 23; Doc. 121 at 23). Sales representatives at Tyler Pipe were directed to "stay away from Charlotte Pipe's CISP customers" and instead maintain their current market position. (Doc. 122 at 18; Doc. 124 at 23; Doc. 121 at 23).

Star Pipe entered the CISP market in 2007. (Doc. 122 at 18; Doc. 124 at 8; Doc. 121 at 24). Star Pipe sought membership to CISPI, but Defendants did not permit it to join. (Doc. 122 at 19; Doc. 124 at 23; Doc. 121 at 24). To gain market share in the CISP market, Star Pipe priced its CISP lower than the prices of McWane and Charlotte Pipe. (Doc. 122 at 19). On July 14, 2010, Charlotte Pipe executed a confidential Asset Purchase Agreement with Star Pipe, which permitted it to acquire all of Star Pipe's CISP business including its inventory, production equipment, business records, and customer lists for $19 million. (Doc. 122 at 19; Doc. 124 at 23; Doc. 121 at 24). After acquiring Star Pipe's CISP business, it destroyed all of Star Pipe's equipment. (Doc. 124 at 23; Doc. 121 at 24).

Along with the Asset Purchase Agreement, the parties signed a confidential agreement that prohibited Star Pipe and certain of its employees **[*16]** from competing with Charlotte Pipe in North America for six years after the agreement was signed. (Doc. 122 at 19; Doc. 124 at 8; Doc. 121 at 24-25). Star Pipe also agreed to send a letter to its CISP customers letting them know that it was out of the CISP business. (Doc. 122 at 19; Doc. 124 at 24; Doc. 121 at 25). Following Charlotte Pipe's acquisition of Star Pipe's CISP business, CISP prices "rose significantly" in January 2011. (Doc. 122 at 19). In addition to the Star Pipe acquisition, Charlotte Pipe had also purchased other CISP businesses "in recent history." (Doc. 122 at 20; Doc. 124 at 8). These businesses included Matco-Norca in 2009, DWV Casting Company in 2004, and Richmond Foundry, Inc. in 2002. (Doc. 124 at 24).

In 2013, the Federal Trade Commission ("FTC") challenged Charlotte Pipe's acquisition of Star Pipe. (Doc. 122 at 20; Doc. 124 at 24; Doc. 121 at 25). The FTC ultimately entered into a consent agreement with Charlotte Pipe to "address the anticompetitive effects resulting from Charlotte Pipe's 2010 acquisition of the [CISP] business of Star Pipe." (Doc. 122 at 20; Doc. 124 at 24-25; Doc. 121 at 25). The consent agreement provided that, for ten years following the **[*17]** execution of the agreement, Charlotte Pipe must notify the FTC before acquiring other entities engaged in the manufacture or sale of CISP products so that the FTC could "guard against future anticompetitive transactions." (Doc. 124 at 25; Doc. 121 at 25). The agreement also required Charlotte Pipe to inform its customers and the public about the acquisition of Star Pipe and other CISP acquisitions and invalidated the non-compete and confidentiality clauses set forth in the Star Pipe Asset Purchase Agreement. (Doc. 122 at 20; Doc. 124 at 25; Doc. 121 at 25-26).

The FTC's redacted complaint regarding Charlotte Pipe's acquisition of Star Pipe's CISP business was filed on April 2, 2013, which is when Plaintiffs allege they became aware of the existence of the conspiracy. (Doc. 122 at 20-21; Doc. 124 at 27; Doc. 121 at 26). Plaintiffs generally allege that Defendants concealed the existence of their CISP conspiracy by communicating secretly with one another regarding CISP prices, meeting at trade association meetings to discuss and fix CISP prices, justifying price increases based on false reasons, and agreeing with one another not to reveal the nature of their conspiracy. (Doc. 122 at 25; **[*18]** Doc. 124 at 31; Doc. 121 at 27). Plaintiffs submit in their Consolidated Amended Complaints that these actions amount to fraudulent concealment and permit Plaintiffs' claims to be tolled. (Doc. 122 at 25; Doc. 124 at 31; Doc. 121 at 30).

Regarding fraudulent concealment, Plaintiffs allege that Defendants took the following actions to conceal their conspiracy: (1) AB&I falsely informed its customers in March 2008 that its price increase was "simply a cost pass through" because earlier increases were insufficient to cover the rise in scrap iron prices; (2) AB&I falsely informed its customers in November 2009 after a price increase that it had tried to "put off this price increase for as long as [it] could"; (3) Charlotte Pipe falsely informed its customers on September 1, 2010 that price increases were the result of cost increases in raw materials and operating expenses; (4) AB&I falsely informed its customers in September 2010 that it was raising its prices for CISP because of raw material cost increases; (5) Charlotte Pipe announced price increases on September 7, 2011, and falsely attributed them to cost increases in raw materials; and (6) Charlotte Pipe falsely informed customers **[*19]** on September 20, 2011 that price increases were on account of cost increases in raw materials and operating expenses. (Doc. 122 at 23-24; Doc. 124 at 29-30; Doc. 121 at 28-29).

This multidistrict litigation was transferred to the undersigned on February 18, 2014. (Doc. 7). On June 9, 2014, the Court entered the Initial Case Management and Scheduling Order, in which it set forth the timeline for filing consolidated amended complaints and motions to dismiss. (Doc. 89 at 2, 3). Plaintiffs filed their respective Consolidated Amended Complaints on August 11, 2014. (Docs. 121, 122, 124).

Direct Purchaser Plaintiffs are bringing their claims pursuant to *Federal Rules of Civil Procedure 23(a)* and *23(b)(3)* for themselves and a class consisting of:

> All persons or entities that purchased cast iron soil pipe or cast iron soil pipe fittings in the United States directly from any of the Defendants, their subsidiaries, predecessors, or affiliates, from January 1, 2006 through December 31, 2013 (the "Class Period"). Excluded from the Class are Defendants, their parent companies, subsidiaries, predecessors, and affiliates, any co-conspirators, federal and state governmental entities and instrumentalities of federal and state governments.

(Doc. 122 **[*20]** at 26). Direct Purchaser Plaintiffs seek to bring their claims as a class action because (1) the class is numerous and joinder of all members is impracticable; (2) the Direct Purchaser Plaintiffs share the same injury and were damaged by the same Defendants as the class members; (3) Direct Purchaser Plaintiffs will fairly and adequately represent and protect the interests of the class; (4) the counsel for Direct Purchaser Plaintiffs are experienced in this type of litigation; and (5) this action presents common issues of law and fact that predominate over questions that would affect individual members of the class. (Doc. 122 at 27). The common questions of law and fact that Direct Purchaser Plaintiffs identify include: (1) whether Defendants engaged in a conspiracy to fix CISP prices and the duration of that conspiracy; (2) whether the existence of such a conspiracy violated *Section 1 of the Sherman Act*; (3) whether the conspiracy artificially inflated the price of CISP; (4) whether Charlotte Pipe's acquisition of Star Pipe was done in furtherance of the conspiracy; (5) whether Defendants agreed to allocate CISP customers; (6) whether Defendants' conduct caused injury to class members; and **[*21]** (7) the measure and amount of damages incurred by the class. (Doc. 122 at 27).

Direct Purchaser Plaintiffs have identified two claims in their Consolidated Amended Complaint. First, Direct Purchaser Plaintiffs claim that Defendants violated Section 1 of the Sherman Act, *15 U.S.C. § 1*, by conspiring to unreasonably restrict trade by agreeing to fix, raise, maintain, and stabilize the price of CISP in the United States. (Doc. 122 at 28). Second, Direct Purchaser Plaintiffs claim that Defendants violated *Section 7 of the Clayton Act* by substantially lessening competition and creating a monopoly in the CISP market. (Doc. 122 at 29). Direct Purchaser Plaintiffs allege that Defendants violated the Clayton Act by acquiring Star Pipe's CISP business, which caused severe anticompetitive effects in the CISP market. (Doc. 122 at 30).

Indirect Purchaser Plaintiffs are bringing their claims pursuant to *Federal Rules of Civil Procedure 23(a)* and *23(b)(3)* for themselves and a class consisting of:

> All Indirect Purchasers that purchased cast iron soil pipes or cast iron soil pipe fittings indirectly from any of the Defendants, their subsidiaries, predecessors, or affiliates, from January 1, 2006 through December 31, 2013 (the "Class Period") in the following states: Alabama, Arizona, **[*22]** Arkansas, California, District of Columbia, Florida, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin.

(Doc. 124 at 34). Indirect Purchaser Plaintiffs seek to bring their claims as a class action because (1) the class is numerous and joinder of all members is impracticable; (2) the Indirect Purchaser Plaintiffs share the same injury and were damaged by the same Defendants as the class members; (3) Indirect Purchaser Plaintiffs will fairly and adequately represent and protect the interests of the class; (4) the counsel for Indirect Purchaser Plaintiffs are experienced in this type of litigation; and (5) this action presents common issues of law and fact that predominate over questions that would affect individual members of the class. (Doc. 124 at 34-35). The common questions of law and fact that Indirect Purchaser Plaintiffs identify include: (1) whether Defendants engaged in a conspiracy to fix CISP prices and the duration of that conspiracy; (2) whether **[*23]** the existence of such a conspiracy violated state antitrust statutes and state consumer and unfair competition statutes; (3) whether the conspiracy artificially inflated the price of CISP; (4) whether Charlotte Pipe's acquisition of Star Pipe was done in furtherance of the conspiracy; (5) whether Defendants' conduct caused injury to class members; and (6) the measure and amount of damages incurred by the class. (Doc. 124 at 35).

Indirect Purchaser Plaintiffs have identified two claims in their Consolidated Amended Complaint. First, Indirect Purchaser Plaintiffs claim that Defendants have violated the antitrust statutes of the states of Alabama, Arizona, Arkansas, California, the District of Columbia, Hawaii, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. (Doc. 124 at 38-41). Second, Indirect Purchaser Plaintiffs claim that Defendants have violated state consumer protection and unfair competition statutes in the states of Arizona, Arkansas, California, the District of Columbia, Florida, Hawaii, Kansas, **[*24]** Massachusetts, Michigan, Minnesota, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, and Rhode Island. (Doc. 124 at 43).

Consumer Plaintiffs are bringing their claims pursuant to *Federal Rules of Civil Procedure 23(a)* and *23(b)(3)* for themselves and a nationwide class consisting of:

> All persons in the United States who purchased products for personal use and not for resale containing, in some form, CISP manufactured by one or more of the Defendants or co-conspirators, or any predecessors, parents, subsidiaries, or affiliates thereof, during the Class Period.
>
> Excluded from the Class are Defendants, their parent companies, subsidiaries, predecessors, and affiliates, any co-conspirators, federal and state governmental entities and instrumentalities of federal and state governments.

(Doc. 121 at 31-32). Alternatively, Consumer Plaintiffs bring this action on behalf of a multistate class consisting of:

> All persons who lived in the Consumer States who purchased products for personal use and not for resale containing, in some form, CISP manufactured by one or more of the Defendants or co-conspirators, or any predecessors, parents, subsidiaries, or affiliates thereof, during the Class Period.

(Doc. 121 at 32). **[*25]** The "Consumer States" are listed in the Consumer Consolidated Amended Complaint as Arizona, Arkansas, California, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. (Doc. 121 at 32 n. 1).

Consumer Plaintiffs seek to bring their claims as a class action because (1) the class is numerous and joinder of all members is impracticable; (2) the Consumer Plaintiffs share the same injury and were damaged by the same Defendants as the class members; (3) the Consumer Plaintiffs will fairly and adequately represent and protect the interests of the class; (4) the counsel for the Consumer Plaintiffs are experienced in this type of litigation; and (5) this action presents common issues of law and fact that predominate over questions that would affect individual members of the class. (Doc. 121 at 32-33). The common questions of law and fact that Consumer Plaintiffs identify include: (1) whether Defendants engaged in a conspiracy **[*26]** to fix CISP prices and the duration of that conspiracy; (2) whether Defendants engaged in unfair, false, deceptive or unconscionable behavior; (3) whether Defendants' conduct artificially inflated the price of CISP; (4) whether Charlotte Pipe's acquisition of Star Pipe was done in furtherance of the conspiracy; (5) whether Defendants agreed to allocate CISP customers; (6) whether Defendants' conduct caused injury to class members; and (7) the measure and amount of damages incurred by the class. (Doc. 121 at 34).

Consumer Plaintiffs have identified five claims in their Consolidated Amended Complaint. First, Consumer Plaintiffs claim that Defendants have violated the Tennessee Trade Practices Act ("TTPA") by entering into a conspiracy which lessened the full and free competition in the market for CISP. (Doc. 121 at 35). Second, Consumer Plaintiffs claim that Defendants have violated the antitrust statutes of the states of Arizona, California, the District of Columbia, Hawaii, Illinois, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, South Dakota, Tennessee, Utah, Vermont, West Virginia, **[*27]** and Wisconsin. (Doc. 121 at 34-54). Third, Consumer Plaintiffs claim that Defendants have violated the state consumer protection statutes of the states of Arkansas, California, the District of Columbia, Florida, Massachusetts, Missouri, Montana, New Mexico, New York, North Carolina, Rhode Island, South Carolina, and Vermont. (Doc. 121 at 55-66). Fourth, Consumer Plaintiffs claim that Defendants have been unjustly enriched under the law of the Consumer States. (Doc. 121 at 66). Fifth, Consumer Plaintiffs claim that Charlotte Pipe's acquisition of Star Pipe violated *Section 7 of the Clayton Act*. (Doc. 121 at 67).

On September 22, 2014, McWane and Charlotte Pipe filed a Motion to Strike the Indirect Purchaser Plaintiffs' Class Action Allegations and a Motion to Strike the Consumer Plaintiffs' Class Action Allegations. (Docs. 151, 154). McWane and Charlotte Pipe each filed motions to dismiss the consolidated amended complaints of each Plaintiffs group. (Docs. 176, 177, 178, 181, 182, 183). CISPI filed motions for joinder regarding these motions. (Docs. 162, 185). On December 19, 2014, the Court held a hearing on these motions. (Doc. 230).

II. MOTIONS TO DISMISS

A. Standard of Law

The Federal Rules **[*28]** of Civil Procedure provide, in relevant part, that all pleadings must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *See Fed. R. Civ. P. 8(a)(2)*. While *Rule 8(a)* does not require plaintiffs to set forth detailed factual allegations, "it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal, 556 U.S. 662, 679, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. At a minimum, *Rule 8(a)* requires the plaintiff to "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests" — that is, *Rule 8(a)(2)* "requires a 'showing,' rather than a blanket assertion, of entitlement to relief." *Bell Atlantic v. Twombly, 550 U.S. 544, 555, 556 n.3, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A motion to dismiss for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)* is thus not a challenge to the plaintiff's factual allegations, but rather, a "test of the plaintiff's cause of action as stated in the complaint." *Flanory v. Bonn, 604 F.3d 249, 252 (6th Cir. 2010)*.

"[O]nly a complaint that states a plausible claim for relief survives a motion to dismiss." *Iqbal, 556 U.S. at 679*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 678* (citing *Twombly, 550 U.S. at 556*). The reviewing court must determine not whether the plaintiff will ultimately prevail, but whether the facts permit the court **[*29]** to infer "more than the mere possibility of misconduct," which is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679*; *Twombly, 550 U.S. at 570* (holding that a complaint is subject to dismissal where plaintiffs failed to "nudg[e] their claims across the line from conceivable to plausible"). Although the Court must take all of the factual allegations in the complaint as true, "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements do not suffice," and a plaintiff's legal conclusions couched as factual allegations need not be accepted as true. *Iqbal, 556 U.S. at 678*; *see Fritz v. Charter Twp. of Comstock, 592 F.3d 718, 722 (6th Cir. 2010)*. Therefore, to survive a motion to dismiss under *12(b)(6)*, plaintiff's "factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all the allegations in the complaint are true." *Ass'n of Cleveland Fire Fighters v. City of Cleveland, Ohio, 502 F.3d 545, 548 (6th Cir. 2007)* (citing *Twombly, 550 U.S. at 555*).

B. Analysis

In its Motion to Dismiss, Charlotte Pipe moves the Court to dismiss the Plaintiffs' Consolidated Class Action Complaints on the grounds that (1) the Complaints do not establish an agreement sufficient to comply with *Twombly*; (2) Plaintiffs' claims are subject to statutes of limitations because they failed to plead due diligence; **[*30]** (3) the Indirect Purchaser and Consumer Plaintiffs lack Article III standing to invoke laws of states in which they do not reside or were not injured; (4) the Indirect Purchaser and Consumer Plaintiffs' injuries are too remote and attenuated to establish antitrust standing; (5) the Indirect Purchaser and Consumer Plaintiffs fail to address essential elements of the state antitrust claims; (6) the Indirect Purchaser and Consumer Plaintiffs' consumer protection and unfair competition claims must be dismissed for numerous reasons; (7) the Consumer Plaintiffs' unjust enrichment claims fail to allege that the Consumer Plaintiffs conferred any benefit on the Defendants and do not meet particular state pleading requirements; (8) the Direct Purchasers' Clayton Act claim fails because they were not injured by the Star Pipe acquisition; and (9) the Consumer's Clayton Act claim is barred by black letter law. (Doc. 184).

In its Motion to Dismiss, McWane moves the Court to dismiss Plaintiffs' Consolidated Class Action Complaints on the grounds that (1) the Indirect Purchaser Plaintiffs lack standing to assert their claims and thus the Court lacks subject matter jurisdiction over those claims; (2) **[*31]** the Indirect Purchaser Plaintiffs remaining claims should be dismissed for failure to state a claim under California and Florida law; (3) Consumer Plaintiffs cannot pursue a claim under the TTPA; (4) Consumer Plaintiffs lack standing to assert their claims and thus the Court lacks subject matter jurisdiction over those claims; (5) Consumer Plaintiffs have failed to state a claim for relief under Arkansas law; (6) Consumer Plaintiffs cannot maintain an illegal merger claim against McWane as a matter of law; (7) Direct

Purchaser Plaintiffs have not alleged facts to state a plausible conspiracy claim under the Sherman Act; and (8) Direct Purchaser Plaintiffs cannot maintain an illegal merger claim against McWane as a matter of law. (Doc. 179).

In their Motions, Defendants McWane and Charlotte Pipe each submit that they have incorporated each other's briefs and arguments where appropriate. (Doc. 179 at 9; Doc. 184 at 6 n.2). Defendant CISPI has also filed several Motions for Joinder (Docs. 185, 162) and an Amended Motion for Joinder (Doc. 191) wherein it adopts by reference and relies upon the Defendants' Motions to Dismiss and Motions to Strike. In its Amended Motion for Joinder, in addition **[*32]** to adopting and relying on Defendants' Motions, CISPI also argues for dismissal of Plaintiffs' claims. *See* Doc. 191. CISPI's Motions for Joinder (Docs. 185, 162, 191) are hereby **GRANTED** to the extent that they are seeking joinder, and the Court will consider CISPI's arguments for dismissal along with the other Defendants' positions.[3] The Court will turn to each Plaintiffs' Consolidated Amended Complaint and the arguments for dismissal associated with it in turn.

1. Direct Purchaser Plaintiffs

a. Sherman Act Conspiracy Allegations under *Twombly*

In their Motions, Defendants argue that the Direct Purchaser Plaintiffs have failed to state a claim for conspiracy pursuant to the standard required under *Twombly*. Specifically, Charlotte Pipe submits that (1) the Direct Purchaser Plaintiffs fail to allege facts showing any agreement between the Defendants; (2) parallel pricing between the Defendants was the result of the CISP industry being an oligopoly; (3) Direct Purchaser Plaintiffs' allegations regarding the Defendants' trade association membership does not plausibly suggest **[*33]** a conspiracy; (4) Direct Purchaser Plaintiffs' allegations regarding conspiratorial discussions is a conclusory assertion that is not sufficient to "save" their claims; (5) and the United States Supreme Court and the United States Court of Appeals for the Sixth Circuit have "routinely dismissed" complaints with similar allegations. (Doc. 184 at 13-23). McWane also argues that Direct Purchaser Plaintiffs have failed to state a conspiracy under *Section 1 of the Sherman Act* because their Consolidated Amended Complaint does not suggest that there was a conspiracy between McWane and Charlotte Pipe, but rather alleges "conduct that is entirely consistent with independent decision-making." (Doc. 179 at 42). In response, Direct Purchaser Plaintiffs argue that Defendants rely on legal standards governing summary judgment motions rather than motions under *12(b)(6)*, fail to evaluate the conspiracy allegations as a whole, attempt to impose heightened pleading requirements, demand direct evidence of conspiracy despite precedent holding otherwise, ignore allegations that contradict their positions, and seek to have factual inferences drawn in their favor. (Doc. 201 at 20).

Section 1 of the Sherman Act provides in **[*34]** relevant part that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. The United States Court of Appeals for the Sixth Circuit has described the essential elements of a Sherman Act claim as "(1) a contract, combination or conspiracy; (2) affecting interstate commerce; (3) which imposes an unreasonable restraint of trade." *White & White, Inc. v. Am. Hosp. Supply Corp., 723 F.2d 495, 504 (6th Cir. 1983)* (citing *Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 827 (6th Cir. 1982)* and *Davis-Watkins Co. v. Serv. Merch., 686 F.2d 1190, 1195-96 (6th Cir. 1982))*.

The agreement between the conspiring parties may "ultimately be proven either by direct evidence of communications between the defendants or by circumstantial evidence of conduct that, in the context, negates the likelihood of independent action and raises an inference of coordination." *Erie Cnty., Ohio v. Morton Salt, Inc., 702 F.3d 860, 868 (6th Cir. 2012)*. Evidence of a conspiracy must be evaluated as a whole rather than "dismembering it and viewing its separate parts." *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*; *see also* *In re Refrigerant Compressors Antitrust Litig., 795 F. Supp. 2d 647, 661 (E.D. Mich. 2011)* ("this Court concludes that *Twombly* does not support such a dismemberment or carve out approach to assessing the sufficiency of a complaint."); *In re Se. Milk Antitrust Litig., 555 F. Supp. 2d 934, 943 (E.D. Tenn. 2008)*. Once a conspiracy is established, "it is presumed to continue until there is an affirmative

[3] CISPI's Motion for Joinder (Doc. 163) that was based on previously-filed motions to dismiss is hereby **DENIED AS MOOT**.

showing that it has been abandoned." *United States v. Hayter Oil Co. of Greeneville, Tenn., 51 F.3d 1265, 1270-71 (6th Cir. 1995)*.

The United States Supreme Court **[*35]** case *Bell Atlantic v. Twombly* specifically addressed the level of detail in which a plaintiff must plead a claim brought pursuant to *Section 1 of the Sherman Act*. *550 U.S. at 556*. The Court provided that to state a plausible claim for conspiracy, there must be "enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id.* With respect to parallel conduct by competitors, the Court found that "when allegations of parallel conduct are set out in order to make a § 1 claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Id. at 557*. Thus, although parallel conduct "gets the complaint close to stating a claim," in order to establish plausibility, a plaintiff must provide further "factual enhancement." *Id.* Accordingly, if a plaintiff pleads only parallel conduct allegations without a context demonstrating "a meeting of the minds, an account of a defendant's commercial efforts stays in neutral territory." *Id.*

At the outset of this discussion, the Court is cognizant that the issue before it does not fall under a heightened pleading standard and is not presented at the summary judgment **[*36]** stage of this litigation. *See* *In re Auto. Parts Antitrust Litig., 2014 U.S. Dist. LEXIS 120725, 2014 WL 4272784, at *6 (E.D. Mich. Aug. 29, 2014)* ("there is no heightened pleadings requirement for stating an antitrust claim"); *In re Se. Milk Antitrust Litig., 555 F. Supp. 2d at 943* ("These complaints, while not answering all specific questions about 'who, what, when and where,' do put defendants on notice concerning the basic nature of their complaints against the defendants and the grounds upon which their claims exist."). Accordingly, as the Direct Purchaser Plaintiffs discuss in their brief, the Court will analyze Defendants' requested relief under the appropriate *12(b)(6)* standard rather than the legal standard applicable for determining summary judgment. *See* Doc. 201 at 21.

Turning to the merits of Defendants' arguments, the parties appear to agree that parallel pricing, standing alone, is not sufficient to state a claim under *Section 1 of the Sherman Act*. However, in cases such as the instant one, where plaintiffs assert allegations of parallel pricing as well as additional allegations, the United States Court of Appeals for the Sixth Circuit has identified "plus factors" for a district court to consider when evaluating the additional allegations. Specifically, it is important for a district court to consider:

> (1) whether the defendants' actions, if taken **[*37]** independently, would be contrary to their economic self-interest; (2) whether defendants have been uniform in their actions; (3) whether defendants have exchanged or have had the opportunity to exchange information relative to the alleged conspiracy; and (4) whether defendants have a common motive to conspire. Ordinarily, an affirmative answer to the first of these factors will consistently tend to exclude the likelihood of independent conduct.

In re Travel Agent Comm'n Antitrust Litig., 583 F.3d 896, 907 (6th Cir. 2009) (quoting *Re/Max Int'l, Inc. v. Realty One, Inc., 173 F.3d 995, 1009 (6th Cir. 1999))*. Considering all of the allegations in the Direct Purchasers Consolidated Amended Complaint, the Court must determine whether the stated facts "plausibly suggest, rather than [are] merely consistent with, an agreement to restrain trade in violation of the Sherman Act." *Watson Carpet & Floor Covering, Inc. v. Mohawk Indus., Inc., 648 F.3d 452, 457 (6th Cir. 2011)* (internal quotation omitted).

In their brief, the Direct Purchaser Plaintiffs argue that the following allegations are sufficient to plausibly state a claim for conspiracy under *Section 1 of the Sherman Act*: (1) Charlotte Pipe and McWane engaged in parallel pricing beginning at least as early as 2006 and continuing until 2013; (2) the Defendants used CISPI at least twice a year to communicate and coordinate CISP price fixing, maintain their market share, and exclude foreign competition; **[*38]** (3) Defendants would increase prices shortly after meeting at CISPI; (4) CISPI's Executive Vice President provided weekly reports about bidding and pricing information to Defendants and alerted them when customers were being solicited by foreign manufacturers; (5) Senior Vice President of Charlotte Pipe's Cast Iron Division, Marshall Coble, made statements to employees stating that Charlotte Pipe and McWane were agreeing on pricing; (6) McWane and Charlotte Pipe agreed to limit competition for each other's customers; (7) McWane and Charlotte Pipe raised prices despite a decline in construction spending; and (8) the CISP market in the United States is susceptible to collusion because it has a high degree of concentration, an inelastic demand for CISP, high entry barriers, and homogeneity. (Doc. 201 at 25-36).

Considering the allegations stated within the Direct Purchaser Plaintiffs' Consolidated Amended Complaint, the Court finds Defendants' position that it fails to state a claim to be unconvincing. While it is true that the most concrete allegations lie in Defendants' uniform conduct of years of parallel pricing, the Court finds that there is sufficient factual enhancement elsewhere **[*39]** in the Consolidated Amended Complaint to state a claim under *Section 1 of the Sherman Act*. As the Direct Purchaser Plaintiffs identify, the Defendants had an agreement to limit competition with one another's customers, which is clearly against their economic self-interest. Additionally, the particularized setting of the CISP market—namely that Defendants control 90 percent of the CISP market with there being no comparable substitute for CISP—further supports Direct Purchaser Plaintiffs' claim alleging a conspiracy. Further, not only did Defendants act uniformly and against their economic self-interest, but they also had opportunity to exchange information regarding the price-fixing conspiracy at CISPI, an organization at which they were the only members. If these factors were not enough on their own, Defendant employee Marshall Coble also allegedly confirmed the price-fixing. Based on these factors as well as the other allegations stated in the Direct Purchaser Plaintiffs' Consolidated Amended Complaint, the Court is unable to conclude that Defendants' actions were the result of independent conduct at this stage in the litigation. Rather, the Court finds that Direct Purchaser Plaintiffs have **[*40]** stated a plausible claim under *Section 1 of the Sherman Act*, and Defendants' Motions to Dismiss will be **DENIED** as to this claim.

b. Statutes of Limitations

Defendants next move the Court to dismiss any Direct Purchaser Plaintiff claim for a purchase made prior to the statute of limitations because the Direct Purchaser Plaintiffs have not pled due diligence in their Consolidated Amended Complaint. (Doc. 184 at 26). Direct Purchaser Plaintiffs submit that the statute of limitations must be tolled because their Complaint adequately pleads fraudulent concealment. (Doc. 201 at 38).

The initial Direct Purchaser Plaintiff complaint was filed on October 2, 2013, and the Direct Purchaser Plaintiffs allege that the conspiracy ran from January 1, 2006, through December 31, 2013. However, a plaintiff may only bring a claim arising under the Sherman Act "within four years after the cause of action accrued." *15 U.S.C. § 15b*. Thus, in order for Direct Purchaser Plaintiffs to recover damages for conduct relating back to the beginning of the alleged conspiracy, they rely on the doctrine of fraudulent concealment.

As a general matter, a court should not extend a statute of limitation "by even a single day" absent "compelling equitable **[*41]** circumstances." *Graham-Humphreys v. Memphis Brooks Museum of Art, Inc., 209 F.3d 552, 561 (6th Cir. 2000)*; *see also* *Wood v. Carpenter, 101 U.S. 135, 139, 25 L. Ed. 807 (1879)* ("Statutes of limitation are vital to the welfare of society and are favored in the law."). The doctrine of fraudulent concealment is a "longstanding exception," which permits a court to toll a statute of limitations if a defendant has concealed a cause of action from a plaintiff. *Pinney Dock & Transp. Co. v. Penn Cent. Corp., 838 F.2d 1445, 1465 (6th Cir. 1988)*. In the Sixth Circuit, a Plaintiff alleging fraudulent concealment must establish that "1) defendants concealed the conduct that constitutes the cause of action; 2) defendants' concealment prevented plaintiffs from discovering the cause of action within the limitations period; and 3) until discovery, plaintiffs exercised due diligence in trying to find out about the cause of action." *Egerer v. Woodland Realty, Inc., 556 F.3d 415, 422 (6th Cir. 2009)*. The burden of proving the elements falls on the plaintiff seeking to toll the statute of limitations. *Pinney Dock & Transp. Co., 838 F.2d at 1465*; *see also* *Lutz v. Chesapeake Appalachia, L.L.C., 717 F.3d 459, 475 (6th Cir. 2013)*.

Regarding a defendant's acts of concealment, the Sixth Circuit requires that a defendant engage in "affirmative acts of concealment." *Hamilton Cnty. Bd. of Comm'rs v. Nat'l Football League, 491 F.3d 310, 319 (6th Cir. 2007)*. Thus, fraudulent concealment is "invoked in cases where the defendant takes active steps to prevent the plaintiff from suing in time, such as by hiding evidence or promising not to plead the statute of limitations." *Bridgeport Music, Inc. v. Diamond Time, Ltd., 371 F.3d 883, 891 (6th Cir. 2004)*. Put another way, to meet this element, **[*42]** "mere silence or unwillingness to divulge wrongful activities is not sufficient." *Helmbright v. City of Martins Ferry, Ohio, 61 F.3d 903 (6th Cir. 1995)*.

As for the due diligence element of fraudulent concealment, only "[a]ctions such as would deceive a reasonably diligent plaintiff will toll the statute; but those plaintiffs who delay unreasonably in investigating circumstances that should put them on notice will be foreclosed from filing, once the statute has run." *Campbell v. Upjohn Co., 676*

F.2d 1122, 1128 (6th Cir. 1982). For a plaintiff to establish that he was reasonably diligent in discovering his claim, he must show "that he neither knew nor, in the exercise of due diligence, could reasonably have known of the offense." *In re Polyurethane Foam Antitrust Litig., 799 F. Supp. 2d 777, 802 (N.D. Ohio 2011)* (quoting *Klehr v. A.O. Smith Corp., 521 U.S. 179, 195, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997))*. Whether a plaintiff acted with due diligence depends on "the circumstances, and that reasonableness turns in part on how well the defendant has hidden its wrongdoing." *Venture Global Eng'g, LLC v. Satyam Computer Servs., Ltd., 730 F.3d 580, 588 (6th Cir. 2013)*. Based on this standard, it is possible that doing nothing may be reasonable "where nothing suggests to a reasonable person that wrongdoing is afoot." *Id.*

A plaintiff alleging fraudulent concealment must plead the requisite elements with particularity pursuant to *Federal Rule of Civil Procedure 9(b)*. *Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389, 394 (6th Cir. 1975)*. *Rule 9 of the Federal Rules of Civil Procedure* addresses pleading special matters. *Fed. R. Civ. P. 9*. To plead a claim for fraud or mistake under *Rule 9*, "a party must state with particularity the circumstances constituting **[*43]** fraud or mistake. Malice, intent, knowledge and other conditions of a person's mind may be alleged generally." *Fed. R. Civ. P. 9(b)*. Although *Rule 9* heightens the pleading standard for special pleadings, it "does not require a plaintiff to be omniscient, ... [and] the main purpose behind *Rule 9(b)* is to provide notice of a plaintiff's claim to a defendant so that the defendant may be able to prepare an informed responsive pleading." *BAC Home Loans Servicing LP v. Fall Oaks Farm LLC, 848 F. Supp. 2d 818, 827 (S.D. Ohio 2012)* (citing *Coffey v. Foamex, L.P., 2 F.3d 157, 161-62 (6th Cir. 1993)*.

In support of their allegation of fraudulent concealment, Plaintiffs submit that Defendants concealed their actions by giving customers false information regarding why prices were increasing in 2008, 2009, 2010, and 2011. *See* Doc. 201 at 39. Plaintiffs also argue that the secretive and exclusive nature of CISPI permitted Defendants to conspire and communicate with one another regarding the price-fixing conspiracy. *Id.* at 40. Defendants, however, take the position that the parallel pricing activity, which was publically available, was sufficient to put Direct Purchaser Plaintiffs on notice that they may have a cause of action against Defendants. (Doc. 184 at 28).

Turning to the elements of fraudulent concealment, and taking all well-pled allegations of the Consolidated Amended Complaint **[*44]** as true, the Court finds that Defendants did affirmatively act to conceal the alleged price-fixing conspiracy in such a way that a reasonable purchaser would not be put on notice of a cause of action. Although Defendants argue that the evidence of parallel pricing could have arguably put Direct Purchaser Plaintiffs on notice of their cause of action, Direct Purchaser Plaintiffs are able to identify with sufficient specificity several instances of Defendants allegedly misrepresenting their reasons for raising prices. *See* Doc. 122 at 22-23. The Court finds it noteworthy that the reasons Defendants gave for raising prices, such as increased costs of materials, were credible justifications for price increases since CISP price is in part determined by the cost of scrap iron and other metals. As Defendants affirmatively misrepresented these price increases with a veil of credible justifications, the Court finds it unlikely that a reasonable purchaser of CISP would discern that they might have a cause of action against Defendants. Additionally, if Defendants had not concealed their reasons for raising prices in this manner, it is likely that Direct Purchaser Plaintiffs would have discovered **[*45]** their cause of action within the applicable statute of limitations by exercising reasonable diligence. Accordingly, the Court finds that Direct Purchaser Plaintiffs have met their burden of establishing fraudulent concealment, and the statute of limitations will be tolled.

c. Clayton Act Claim

Regarding the Direct Purchaser Plaintiffs' Clayton Act claim, the Defendants take separate positions. Charlotte Pipe argues that the Direct Purchaser Plaintiffs' Clayton Act claim must be dismissed because it does not plausibly allege that they were injured by the Star Pipe acquisition. (Doc. 184 at 48). Specifically, Charlotte Pipe argues that Direct Purchaser Plaintiffs fail to allege that they purchased CISP after the acquisition or that the acquisition caused prices of CISP to increase. (*Id.* at 49). McWane, on the other hand, submits that the Clayton Act claim against McWane should be dismissed because it did not acquire Star Pipe. (Doc. 179 at 43-44).

The Clayton Act is "designed to arrest and prohibit mergers and acquisitions that lessen competition or tend to create a monopoly." *Z Technologies Corp. v. Lubrizol Corp., 753 F.3d 594, 604 (6th Cir. 2014)* (internal quotation omitted). *Section 7 of the Clayton Act* provides in relevant part:

> No person engaged in commerce or in any activity **[*46]** affecting commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no person subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another person engaged also in commerce or in any activity affecting commerce, where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

15 U.S.C. § 18. To state a claim under *Section 7*, a plaintiff must allege that: "(1) a person or entity; (2) engages in commerce or an activity affecting commerce; (3) merges with another person also engaged in commerce, and (4) the effect of the merger is to substantially lessen competition or tend to create a monopoly." *HTC Sweden AB v. Innovatech Products & Equip. Co., 2008 U.S. Dist. LEXIS 76690, 2008 WL 4510710, at *14 (E.D. Tenn. Sept. 30, 2008)*. The Sixth Circuit has described *Section 7 of the Clayton Act* as dealing in "probabilities, not certainties" because of Congress's inclusion of the term "may" when discussing the effect of an acquisition. *ProMedica Health Sys., Inc. v. F.T.C., 749 F.3d 559, 564 (6th Cir. 2014)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*; *see* *United States v. Dairy Farmers of Am., Inc., 426 F.3d 850, 858 (6th Cir. 2005)* ("The Supreme Court has explained that Congress used the words may be substantially to lessen competition to indicate that its concern was with probabilities, **[*47]** not certainties.") (internal quotation omitted). Thus, it is not a requirement that "anticompetitive power manifest itself in anticompetitive action before *§ 7* can be called into play." *Dairy Farmers of Am., Inc., 426 F.3d at 858*.

The Court finds Charlotte Pipe's arguments to be unpersuasive. While Charlotte Pipe submits that the Direct Purchaser Plaintiffs have failed to allege that they were injured by the Star Pipe acquisition, this position is directly refuted by the language of the Consolidated Amended Complaint. Specifically, Direct Purchaser Plaintiffs allege that the acquisition of Star Pipe eliminated the downward pressure on CISP prices and resulted in CISP prices rising "significantly" in January 2011. *See* Doc. 122 at 19. Direct Purchaser Plaintiffs have also alleged that they have bought CISP from Charlotte Pipe after the Star Pipe acquisition, which further refutes Charlotte Pipe's arguments. *Id.* at 25. Accordingly, as Defendant has not identified any other reasons why this claim should be dismissed, Charlotte Pipe's Motion to Dismiss will be **DENIED** as to this claim.

As for McWane, Direct Purchaser Plaintiffs clarify in their response brief that they "do not contend that McWane is liable under *Section 7*." (Doc. 201 at 45). Direct Purchaser **[*48]** Plaintiffs also confirmed this at the December 19, 2015 Hearing on the instant Motion. (Doc. 235 at 48) ("We're not making the illegal acquisition claim under *Section 7 of the Clayton Act* against McWane."). Based on Direct Purchaser Plaintiffs' submission, the Court finds that they have expressly abandoned any claim arising under *Section 7 of the Clayton Act* against McWane. Accordingly, McWane's Motion to Dismiss as to that claim will be **GRANTED**, and this claim will be **DISMISSED WITH PREJUDICE**.

2. Indirect Purchaser Plaintiffs and Consumer Plaintiffs

In their Motions, Defendants frequently address the Indirect Purchaser Plaintiffs and Consumer Plaintiffs together as "Downstream Plaintiffs." Additionally, the Indirect Purchaser Plaintiffs and the Consumer Plaintiffs have filed a consolidated response brief. Thus, the Court will discuss the arguments and responses as they are raised, discussing the two plaintiff groups together as "Downstream Plaintiffs" and distinguishing between them when appropriate.

a. Standing Issues

Before the Court turns to the Defendants' arguments regarding the sufficiency of the Downstream Plaintiffs' Complaints, the Court will first address the issues the Defendants raise regarding **[*49]** standing. Article III standing and antitrust standing "are not one and the same, and [a court] not only may—but [it] must—reject claims under *Rule 12(b)(6)* when antitrust standing is missing." *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449 (6th Cir. 2007)*; *see also* *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters ("AGC"), 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("the focus of the doctrine of antitrust standing is somewhat different from that of standing as a constitutional doctrine").

In their Motions to Dismiss, Defendants submit that the Downstream Purchasers lack Article III standing and antitrust standing. (Doc. 184 at 29; Doc. 179 at 10). In Response, the Downstream Plaintiffs argue that Defendants' position (1) conflates Article III standing with the requirements for class certification under *Federal Rule of Civil Procedure 23*; (2) is not supported by the Sixth Circuit or by the overwhelming case law from federal courts; and (3) is an issue that is properly deferred until the Court makes a ruling on class certification. (Doc. 202 at 15).

i. Article III Standing

"Article III of the Constitution gives federal courts subject matter jurisdiction over actual cases or controversies, neither of which exists unless a plaintiff establishes his standing to sue." *Murray v. U.S. Dep't of Treasury, 681 F.3d 744, 748 (6th Cir. 2012)*; *see* *Simon v. E. Kentucky Welfare Rights Org., 426 U.S. 26, 37, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976)* ("No principle is more fundamental **[*50]** to the judiciary's proper role in our system of government than the constitutional limitation of federal-court jurisdiction to actual cases or controversies"). Article III standing is a threshold question in federal cases and concerns whether a plaintiff is the proper party to bring a lawsuit. *Raines v. Byrd, 521 U.S. 811, 818, 117 S. Ct. 2312, 138 L. Ed. 2d 849 (1997)*.

Article III standing, or "constitutional standing," has three elements. First, a plaintiff must have suffered "an injury in fact—an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical." *Kardules v. City of Columbus, 95 F.3d 1335, 1346 (6th Cir. 1996)*. This element is often interpreted as the plaintiff having a "personal stake" in the outcome of the controversy. *Baker v. Carr, 369 U.S. 186, 204, 82 S. Ct. 691, 7 L. Ed. 2d 663 (1962)*; *Loren v. Blue Cross & Blue Shield of Mich., 505 F.3d 598, 607 (6th Cir. 2007)*. Second, the injury must be "fairly traceable to the challenged action of the defendant." *Cleveland Branch, N.A.A.C.P. v. City of Parma, OH, 263 F.3d 513, 524 (6th Cir. 2001)*. Third, it must be likely rather than speculative that "the injury will be redressed by a favorable decision. *White v. United States, 601 F.3d 545, 551-51 (6th Cir. 2010)* (internal quotation marks omitted).

It is a plaintiff's burden to establish standing. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. Plaintiffs must support each element of standing "in the same way as any other matter on which the plaintiff bears the burden of proof, *i.e.*, with the manner and degree of evidence required at the successive stages of the **[*51]** litigation." *Fednav, Ltd. v. Chester, 547 F.3d 607, 614 (6th Cir. 2008)*. As this issue is before the Court on a motion to dismiss, the Court must construe the Complaints in the light most favorable to Plaintiffs and accept as true all well-pleaded factual allegations. *Mixon v. Ohio, 193 F.3d 389, 400 (6th Cir. 1999)*.

With regard to Article III standing, Defendants argue that the Indirect Purchasers lack standing because the injury they allege—being forced to pay higher prices for CISP—could have only occurred in the two states where the named Indirect Plaintiffs reside, Florida and California. (Doc. 179 at 11). Thus, for the remaining claims brought under the other 26 state antitrust laws and 17 state consumer protection laws, Defendants argue that the Indirect Purchasers lack standing to pursue these claims because they do not reside in these states, have not alleged that they purchased CISP in these states, and have not alleged that they suffered an injury that can be addressed under the laws of these states. (*Id.* at 12). The Downstream Plaintiffs respond that the named Plaintiffs have met the requisite elements to establish individual standing and that the concerns raised by Defendants are more appropriate addressed when the Court addresses class certification. (Doc. 202 at 17).

In support of **[*52]** their position, the Downstream Purchasers cite the United States Court of Appeals for the Sixth Circuit case *Fallick v. Nationwide Mutual Insurance Company. 162 F.3d 410 (6th Cir. 1998)*. In *Fallick*, the Sixth Circuit highlighted the distinction between a plaintiff's standing under Article III and "the relationship between a potential class representative and absent class members." *Id. at 422*. The Sixth Circuit elaborated on the distinction between these two matters as follows:

> Threshold individual standing is a prerequisite for all actions, including class actions. A potential class representative must demonstrate individual standing vis-[a]-vis the defendant; he cannot acquire such standing merely by virtue of bringing a class action. As this Court has made clear, however, once an individual has alleged a distinct and palpable injury to himself he has standing to challenge a practice even if the injury is of a sort shared by a large class of possible litigants Once his standing has been established, whether a plaintiff will

> be able to represent the putative class, including absent class members, depends solely on whether he is able to meet the additional criteria encompassed in *Rule 23 of the Federal Rules of Civil Procedure*.

Id. at 423 (internal citation and quotation omitted). Certain district courts have followed **[*53]** the line of reasoning set forth in *Fallick* and have concluded that "class certification is logically antecedent [to Article III concerns] where its outcome will affect the Article III standing determination." *In re DDAVP Indirect Purchaser Antitrust Litig., 903 F. Supp. 2d 198, 213 (S.D.N.Y. 2012)* (internal quotation omitted).

Federal courts are split regarding the appropriate procedural juncture for a court to decide Article III standing in a class action case. The cause for this split regarding when standing must be determined was created by the combination of two United States Supreme Court cases: *Ortiz v. Fibreboard Corp., 527 U.S. 815, 831, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)* and *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. In *Amchem*, a case concerning the legitimacy of a class certification sought to achieve global settlement of asbestos-related claims, the Court found the class certification issues in the case to be dispositive because their resolution was "logically antecedent to the existence of any Article III issues." *521 U.S. at 612*. In *Ortiz*, a global settlement of claims against a manufacturer of asbestos-containing products, the Court concluded that the class certification issues before the Court should be "treated first" because they were "logically antecedent to Article III concerns, and themselves pertain[ed] to statutory standing." *527 U.S. at 831*. The parties have derived the "logically antecedent" language from **[*54]** these cases and have reached differing conclusions as to its meaning.

In considering both parties' positions, the Court notes that the Sixth Circuit has not explicitly determined the meaning of the phrase "logically antecedent" or decided whether a court must consider class certification before standing in the states in which a named plaintiff is not a resident. *See In re Polyurethane Foam Antitrust Litig., 799 F. Supp. 2d at 805*; *In re Packaged Ice Antitrust Litig., 779 F. Supp. 2d 642, 654 (E.D. Mich. 2011)* ("The United States Court of Appeals for the Sixth Circuit has not ruled on the issue. Within this district, courts have issued conflicting opinions on the subject."). Indeed, the fact that the Sixth Circuit has not weighed in on this issue explains the divergent positions of the parties in the instant litigation. Considering the current, unsettled state of the law on this issue, the Court is left to decide which avenue is most appropriate in *this* litigation to resolve Defendants' standing challenges.

Even though the Sixth Circuit has not explicitly ruled on this issue, the Court finds that *Fallick* supports a conclusion that, in instances such as the present matter, issues related to Article III standing are more appropriately resolved *after* a ruling on class certification. Defendants acknowledge, with certain caveats, **[*55]** that the Downstream Plaintiffs could assert claims in their home states, and the relief they are seeking in the states in which they do not reside is sought for absent class members. If the Court were to decide the standing issue at this juncture on the basis that the named plaintiffs do not reside in some of the states under whose laws they bring claims on behalf of the class, it would not be giving due appreciation to the complex nature of Article III standing in class actions and the nuances of class certification. Keeping this in mind, the Court concludes that "the better path is to defer this issue until the class certification stage" when the class itself will be determined. *In re Auto. Parts Antitrust Litig., 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *11 (E.D. Mich. June 6, 2013)*. Accordingly, Defendants' Motion to Dismiss with respect to this issue will be **DENIED**.

ii. Antitrust Standing

Even if a plaintiff has Article III standing, the Court must also determine "whether the plaintiff is the proper party to bring a private antitrust action." *AGC, 459 U.S. at 535 n.31*. As evidenced by *Twombly*, antitrust standing is a "threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement [a court] must dismiss it as a matter of law—lest the antitrust laws become a treble-damages **[*56]** sword rather than the shield against competition-destroying conduct that Congress meant them to be." *NicSand, Inc., 507 F.3d at 450*. Indeed, the Sixth Circuit has described antitrust standing as "the glue that cements each suit with the purposes of the antitrust laws, and prevents abuses of those laws." *HyPoint Tech., Inc. v. Hewlett-Packard Co., 949 F.2d 874, 877 (6th Cir. 1991)*.

Relying on principles identified in *AGC*, the Sixth Circuit has set forth several factors that a court can consider in determining whether a plaintiff has antitrust standing:

> 1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation.

Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1085 (6th Cir. 1983).

A pivotal case in the development of an indirect purchaser's right to bring a private antitrust action was the United States Supreme Court case *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. In *Illinois Brick*, the Court held that indirect purchasers in **[*57]** an antitrust action could not bring a lawsuit to recover overcharges passed onto them because "the overcharged direct purchaser, and not others in the chain of manufacture or distribution, is the party injured in his business or property." *Id. at 728* (internal quotation omitted). Following the *Illinois Brick* decision, several states enacted legislation designed to repeal the impact of *Illinois Brick* to permit indirect purchasers to bring claims. *In re Auto. Parts Antitrust Litig., 29 F. Supp. 3d 982, 2014 WL 2993742, at *12 (E.D. Mich. 2014)*. As the Downstream Purchasers in the instant case are bringing their claims under various state statutes (aside from the Consumer's claim under the Sherman Act), the Court will not delve into the intricacies of the *Illinois Brick* repealer statutes. *See California v. ARC Am. Corp., 490 U.S. 93, 103, 109 S. Ct. 1661, 1666, 104 L. Ed. 2d 86 (1989)* ("nothing in *Illinois Brick* suggests that it would be contrary to congressional purposes for States to allow indirect purchasers to recover under their own antitrust laws."). Rather, the issue before the Court is whether to apply the Sixth Circuit factors to the Downstream Plaintiffs' claims even though they are bringing their claims pursuant to state statutes.

In their Motions, Defendants argue that all but four of the state antitrust statutes under which Plaintiffs seek relief require application **[*58]** of the federal antitrust standing principles. (Doc. 184 at 32). In response, Plaintiffs agree that the four states of Arkansas, Minnesota, South Carolina, and Tennessee do not require the application of federal antitrust standing principles and argue that "Defendants have greatly overstated each state's position as to *AGC*" and the application of federal antitrust standing principles. (Doc. 202 at 25). Specifically, Plaintiffs contend that (1) Defendants have ignored "persuasive authority" that undermines the application of *AGC* to antitrust claims brought under Alabama, Arizona, California, Hawaii, Mississippi, and North Carolina statutes; (2) the statutes that Defendants cite for Arizona, District of Columbia, Hawaii, Michigan, Nebraska, Oregon, Rhode Island, South Dakota, Utah, Vermont, and West Virginia only "suggest that state antitrust laws should be harmonized with federal ***antitrust law***"; (3) the cases that Defendants have cited for the District of Columbia, Iowa, Michigan, New York, North Dakota, Vermont, and Wisconsin are inapplicable to the instant matter; (4) the cases that Defendants have cited for the District of Columbia, Iowa, Michigan, New York, North Dakota, Vermont, **[*59]** and Wisconsin involve plaintiffs who were not indirect purchasers and "had a more remote relationship with the defendants"; and (5) courts that have addressed this issue have declined to apply the *AGC* factors. (Doc. 202 at 25-26).[4]

Whether the *AGC* factors should be applied to the Downstream Purchasers' claims is a matter of state law. In considering legal questions controlled by state law, the Court is "bound by the rulings of the state supreme court." *In re Darvocet, Darvon, & Propoxyphene Products Liab. Litig., 756 F.3d 917, 937 (6th Cir. 2014)*. If the state supreme court has not issued a determinative ruling regarding this issue, the Court may also consider "how the court would rule by looking to all available data, including decisions of the states' appellate courts." *Id.* Courts in this Circuit have described this as a two-part process: (1) considering whether the states at issue in an action have explicitly adopted the *AGC* factors; and (2) applying the *AGC* factors to the states that have adopted them. *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *9 (E.D. Mich. Apr. 9, 2013)* *motion to certify appeal denied*, *2013 U.S. Dist. LEXIS 109410, 2013 WL 4009023 (E.D. Mich. Aug. 5, 2013)* *and*

---

[4] Although Plaintiffs advance many arguments through both the text of their brief and the corresponding footnote, Plaintiffs have not addressed Defendants' argument with respect to the claims brought in Illinois and New Hampshire.

appeal dismissed **[*60]** , 731 F.3d 586 (6th Cir. 2013). The twenty-five states that are at issue here for this determination are Alabama, Arizona, California, Washington D.C., Hawaii, Illinois, Iowa, Kansas, Maine, Michigan, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Vermont, West Virginia, and Wisconsin. (Doc. 184-4).

Although the Court has considered the parties' positions, as it is deferring ruling on the Article III standing issue, it will also defer ruling on this antitrust standing issue at this juncture. *See* Ross v. Bank of Am., N.A.(USA), 524 F.3d 217, 222 (2d Cir. 2008) ("A court proceeds to an antitrust standing analysis only after Article III standing has been established"); *see also* Static Control Components, Inc. v. Lexmark Int'l, Inc., 697 F.3d 387, 405 (6th Cir. 2012) *aff'd*, 134 S. Ct. 1377, 1388, 188 L. Ed. 2d 392 (2014) ("Antitrust causation is much more limited than Article III standing"); Hyland v. Homeservices of Am., Inc., 2008 U.S. Dist. LEXIS 65250, 2008 WL 4000546, at *3 (W.D. Ky. Aug. 25, 2008) ("Antitrust standing "requires more than the constitutional minimum for the 'case or controversy' that brings jurisdiction to Article III court"). Accordingly, Defendants' Motions with respect to this issue will be **DENIED**.

b. Conspiracy Allegations under *Twombly* and Statute of Limitations Issues

In their Motions, Defendants each argue that the Downstream Plaintiffs have failed to state a claim for conspiracy at the standard required **[*61]** under *Twombly*. Although the Downstream Plaintiffs have not alleged a claim under the Sherman Act and rather identify claims under state law, the arguments against these conspiracy claims address the same issues. Namely, whether the Consolidated Amended Complaints fail to show a price-fixing agreement between the Defendants, whether the allegations they state support a plausible inference that a price-fixing conspiracy existed pursuant to their respective state law claims, and whether the Downstream Plaintiffs adequately plead fraudulent concealment. For the reasons articulated *supra* with respect to the Direct Purchasers, Defendants' Motions to Dismiss will also be **DENIED** on this ground with respect to the Downstream Purchasers.

c. State Antitrust Claims

Defendants next argue that the Downstream Plaintiffs have failed to address the essential elements of their state antitrust claims. (Doc. 184 at 36). In support of their position, Defendants submit that the claims of the Downstream Plaintiffs should be dismissed because: (1) Rhode Island has followed *Illinois Brick* and barred indirect purchaser actions; (2) the District of Columbia, Mississippi, Nevada, New York, North Carolina, South **[*62]** Dakota, Tennessee, West Virginia, and Wisconsin require that a plaintiff plead allegations establishing a sufficient nexus between a defendant's conduct and intrastate commerce and the Downstream Plaintiffs have failed to do so; and (3) Arkansas does not provide a private right of action for price-fixing claims. (Doc. 184 at 36-40).

Rhode Island

In response to Defendants' position regarding Rhode Island, the Downstream Plaintiffs submit that Rhode Island permits indirect purchasers to bring an antitrust claim under Rhode Island General Laws Section 6-36-12(g). Section 6-36-12(g) provides:

> In any action under this section the fact that a person or public body has not dealt directly with the defendant shall not bar or otherwise limit recovery. Provided, however, that the court shall exclude from the amount of monetary relief awarded in the action any amount of monetary relief that duplicates amounts that have been awarded for the same injury. No provision of this chapter shall be construed to limit the standing of any person or public body, whether the person or public body is a direct or indirect purchaser, from bringing suit on his or her own behalf.

R.I. Gen. Laws § 6-36-12(g). In interpreting this statute in 2002, the Supreme Court of Rhode Island held that § 6-36-12 "reserves to **[*63]** the Attorney General as *parens patriae*, the right to sue on behalf of indirect purchasers for monetary damages resulting from a violation of the Antitrust Act" and concluded that individual indirect purchasers could not bring their claims. Siena v. Microsoft Corp., 796 A.2d 461, 465 (R.I. 2002). However, on July 15, 2013, the Rhode Island legislature passed an *Illinois Brick* repealer statute. Since the enactment of this statute, courts have interpreted this statute as applying solely prospectively. *See* In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 2015 U.S. Dist. LEXIS 35634, 2015 WL 1311352, at *21 (D. Conn. Mar. 23, 2015) ("In the absence of evidence of the Rhode Island legislature's intent to the contrary, I conclude that the law applies only prospectively."); *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 759 (E.D. Pa. 2014)* ("the repealer statutes of both states are presumed to apply only prospectively, absent evidence of legislative intent to the contrary"). Accordingly, Defendants' Motion to Dismiss regarding the Indirect Purchasers' claims brought pursuant to Rhode Island's Antitrust Act will be **GRANTED** as to claims alleging overcharges before July 15, 2013.

Arkansas

Defendants also submit that Indirect Purchaser's claim under the Arkansas Unfair Practices Act must be dismissed because "Arkansas does not provide a private right of action for price-fixing claims." (Doc. 184 at 40). In response, the Indirect Purchaser's **[*64]** cite to *Arkansas Code Annotated § 4-75-211*, which provides:

> Any person, firm, private corporation, or municipal or other public corporation, or trade association, may maintain an action to enjoin a continuance of any act or acts in violation of this subchapter and, if injured thereby, for the recovery of damages.

Ark. Code Ann. § 4-75-211(a). Indeed, federal district courts in Arkansas have interpreted this statute as permitting private plaintiffs to bring a cause of action under this subsection of the Arkansas Unfair Practices Act. *See* *Goodner v. Clayton Homes, Inc., 2014 U.S. Dist. LEXIS 133418, 2014 WL 4722748, at *1 (W.D. Ark. Sept. 23, 2014)*; *Coffee.org, Inc. v. Green Mountain Coffee Roasters, Inc., 2012 U.S. Dist. LEXIS 18577, 2012 WL 511485, at *3 (W.D. Ark. Feb. 15, 2012)*.

However, the Indirect Purchasers' argument becomes problematic based on the fact that Arkansas' prohibition on price-fixing is located is a separate subchapter of the Arkansas Unfair Practices Act, in which actions are only permitted by the Attorney General. *See* *Ark. Code Ann. § 4-75-309*; *Ark. Code Ann. § 4-75-310*; *Ark. Code Ann. § 4-75-315* (providing that the Attorney General may bring an action on behalf of injured persons); *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1191 (N.D. Cal. 2009)* ("Defendants contend—and plaintiffs do not disagree—that plaintiffs do not have standing to seek relief under Arkansas ***antitrust law*** because that law only permits predatory pricing claims alleging that items were sold at less than cost and does not create a private right of action for an alleged conspiracy to raise prices.") (internal quotation omitted). Thus, **[*65]** as this subsection of the statute does not provide for a private individual to bring an action and only permits actions by the Attorney General, the Indirect Purchasers' claim must be **DISMISSED**.

Illinois

Defendants next argue that the Consumers' claims under Illinois's antitrust statute must be dismissed because the statute expressly bars indirect purchasers from bringing class actions. (Doc. 184 at 40); *740 Ill. Comp. Stat. 10/7* ("Provided further that no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole exception of this State's Attorney General"); *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 2014 WL 6792663, at *27 (E.D. Pa. 2014)*. Consumers failed to respond to this argument in their brief. *See generally* Doc. 202. The Court has reviewed the Illinois statute and, finding Defendants' position well-supported and unopposed by the Consumers, will **GRANT** Defendants' Motion to Dismiss with respect to this claim.

Hawaii

With respect to the claims brought under Hawaii's antitrust statute, Defendants argue that a plaintiff must notify the Hawaii Attorney General before bringing a claim under this provision, and that the Downstream Purchasers have failed to comply with this requirement. (Doc. 184 at **[*66]** 40). However, in their Response, Indirect Purchasers submit that they notified the Hawaii Attorney General of their intent to bring their claims on August 15, 2014. (Doc.

202 at 55; Doc. 202-1). As the Indirect Purchasers established that they complied with this requirement, Defendants' Motion to Dismiss will be **DENIED** with respect to the Indirect Purchasers' claim.

It is unclear from the parties' filings whether the Consumer Purchasers have also complied with this requirement. Courts that have reached this issue are split regarding whether a plaintiff's failure to comply with this requirement bars him from proceeding with his unfair competition claims. *In re Aggrenox Antitrust Litig., 2015 U.S. Dist. LEXIS 35634, 2015 WL 1311352, at *22*; *In re Chocolate Confectionary Antitrust Litig., 749 F. Supp. 2d 224, 232 (M.D. Pa. 2010)* ("Under *§ 480-13.3(a)*, any action based upon unfair competition must adhere to the attorney general notification procedures enumerated by statute; the [] plaintiffs' failure to comply with the statutory provision therefore warrants dismissal"); *In re Aftermarket Filters Antitrust Litig., 2009 U.S. Dist. LEXIS 104114, 2009 WL 3754041, at *6 (N.D. Ill. Nov. 5, 2009)* ("the statute does not provide for dismissal of the action for failure to comply, and that dismissal is inconsistent with the remedial purposes of the statute"). Given the parties' limited discussion of this issue, the split of authority regarding whether this is a bar to proceeding with an unfair competition **[*67]** claim, and the remedial nature of Hawaii's antitrust statute, the Court declines to dismiss the Consumer Purchasers' claim under Hawaii's antitrust statute on this ground.

District of Columbia, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, West Virginia, and Wisconsin

Turning to Defendants' next argument for dismissal, Defendants argue that the claims under the laws of the states of the District of Columbia, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, West Virginia, and Wisconsin must be dismissed because the Downstream Plaintiffs fail to allege a connection to the intrastate commerce of the individual states. In response, the Downstream Plaintiffs argue that they have described "a pervasive price-fixing scheme that affected the entire CISP market and impacted commerce nationwide." (Doc. 202 at 52). In addition to reviewing the parties' positions, the Court has examined the laws of the District of Columbia, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, West Virginia, and Wisconsin. *See* *D.C. Code § 28-4502* ("Every contract, combination in the form of a trust or otherwise, or conspiracy in restraint of trade or commerce all or **[*68]** any part of which is within the District of Columbia is declared to be illegal."); *Miss. Code. Ann. § 75-21-1*; *Nev. Rev. Stat. Ann. § 598A.060*; *N.Y. Gen. Bus. Law § 340*; *N.C. Gen. Stat. Ann. § 75-1* ("Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce in the State of North Carolina is hereby declared to be illegal"); *S.D. Codified Laws § 37-1-3.1* ("A contract, combination, or conspiracy between two or more persons in restraint of trade or commerce any part of which is within this state is unlawful."; *Tenn. Code Ann. § 47-25-101*; *W. Va. Code Ann. § 47-18-3* ("Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce in this State shall be unlawful"); *Wis. Stat. Ann. § 133.03*. The Court has also reviewed the Downstream Purchasers' allegations regarding their claims brought under these statutes. The Court will first summarize the state of the law in each state before reaching a conclusion regarding whether the Downstream Purchasers have stated a claim under the laws of these states.

Mississippi

District courts that have examined Mississippi's Antitrust Act have construed it "to require allegations of at least some activity or conduct occurring in intrastate commerce or trade." *California v. Infineon Technologies AG, 531 F. Supp. 2d 1124, 1158 (N.D. Cal. 2007)*; *see also* *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d at 1188* ("The Court agrees with defendants that the Mississippi Antitrust Act requires some allegations of intrastate **[*69]** conduct, but finds that plaintiffs have sufficiently alleged such conduct."); *In re Graphics Processing Units Antitrust Litig., 540 F. Supp. 2d 1085, 1099 (N.D. Cal. 2007)*.

District of Columbia

As for the District of Columbia, the case law interpreting this statute is relatively limited. The courts that have interpreted the statute have described it as paralleling *Section 1 of the Sherman Act*. *Atl. Coast Airlines Holdings, Inc. v. Mesa Air Grp., Inc., 295 F. Supp. 2d 75, 87 (D.D.C. 2003)*; *In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 682, 692 (E.D. Mich. 2000)*; *GTE New Media Servs., Inc. v. Ameritech Corp., 21 F. Supp. 2d 27, 45 (D.D.C. 1998)*. However, a district court in the District of Columbia described the District of Columbia antitrust statute as "not requir[ing] an interstate nexus, but rather a connection within this jurisdiction." *GTE New Media Servs., 21 F. Supp. 2d at 45*.

Nevada

In Nevada, the antitrust statute "prohibits conduct that is part of a conspiracy in restraint of trade in Nevada. " *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d 869, 889 (E.D. Mich. 2014)*. Courts considering this statute have dismissed claims that have failed "to allege a causal connection between [the plaintiff's] injuries and the conduct prohibited by the laws of those states, which require a showing that such conduct occurred, or whose effect was felt, in-state." *In re Magnesium Oxide Antitrust Litig., 2011 U.S. Dist. LEXIS 121373, 2011 WL 5008090, at *8 (D.N.J. Oct. 20, 2011)*; *see also Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 397 (E.D. Pa. 2010)* ("Nevada requires only that the plaintiffs show that some part of the prohibited activity caused harm in Nevada, not that the commencement of the sham litigation took place there.").

New York

New York's antitrust statute—the Donnelly Act—is also modeled on the Sherman Act, **[*70]** and courts typically interpret claims brought under the Donnelly Act consistent with claims brought under the Sherman Act. *See In re Aluminum Warehousing Antitrust Litig., 95 F. Supp. 3d 419, 2015 U.S. Dist. LEXIS 38743, 2015 WL 1378946, at *27 (S.D.N.Y. Mar. 26, 2015)*; *TechReserves Inc. v. Delta Controls Inc., 2014 U.S. Dist. LEXIS 47080, 2014 WL 1325914, at *10 (S.D.N.Y. Mar. 31, 2014)*, *appeal dismissed* (Sept. 4, 2014); *Solla v. Aetna Health Plans of New York, Inc., 14 F.Supp.2d 252, 259-60 (1998)*, *aff'd*, *182 F.3d 901 (2d Cir.1999)* ("It is well-established that the Donnelly Act was modeled on the Sherman Act and is generally to be construed in accordance with federal antitrust precedents."). However, unlike the Sherman Act, the Donnelly Act "makes clear that it applies to contracts in restraint of trade relating to the 'conduct of any business, trade or commerce or in the furnishing of any service *in this state* . . . '" *Conergy AG v. MEMC Elec. Materials, Inc., 651 F. Supp. 2d 51, 61 (S.D.N.Y. 2009)* (emphasis original) (quoting *N.Y. Gen. Bus. Law § 340(1)*.

North Carolina

To allege a claim under the North Carolina antitrust statute, a plaintiff must establish that "the injuries [alleged] have a 'substantial in-state effect on North Carolina trade or commerce.'" *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 540 (E.D. Pa. 2010)* (quoting *Lawrence v. UMLIC-Five Corp., 2007 NCBC LEXIS 20, 2007 WL 2570256, at *7 (N.C. Super. June 18, 2007)*. Thus, to state a claim under this statute, plaintiffs must allege that at least part of the violation took place in North Carolina. *In re DDAVP Indirect Purchaser Antitrust Litig., 903 F. Supp. 2d at 231*.

South Dakota

South Dakota's antitrust statute provides that a "contract, combination, or conspiracy between two or more persons in restraint of trade or commerce any part of which is within this state is unlawful." *S.D. Codified Laws § 37-1-3.1*. Similar to the other statutes, **[*71]** South Dakota's antitrust statute requires that part of the anticompetitive conduct occur within South Dakota or have an effect within South Dakota. *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d at 581*; *In re Dynamic Random Access Memory (Dram) Antitrust Litig., 516 F. Supp. 2d 1072, 1098*

(N.D. Cal. 2007); In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 172 (D. Me. 2004) ("plaintiffs need only allege that a part of the trade or commerce occurred within South Dakota").

Tennessee[5]

As for the TTPA, the Supreme Court of Tennessee has concluded that it "does not contain any language indicating that the legislature intended that the scope of the act be limited to intrastate commerce." Freeman Indus., LLC v. Eastman Chem. Co., 172 S.W.3d 512, 522 (Tenn. 2005). In support of its conclusion, the court noted that if "the legislature intended such a limitation, the legislature simply could have included the limitation in the act." However, in Tennessee, a plaintiff bringing a claim must allege that "the alleged anticompetitive conduct affects Tennessee trade or commerce to a substantial degree." Id. at 523.

West Virginia

A plaintiff seeking to state a claim under the West Virginia Antitrust Act must also allege that the wrongful conduct **[*72]** has produced "in-state effects." In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d at 582. Thus, a plaintiff must show that the wrongful conduct occurred in West Virginia or was felt in West Virginia to assert a violation of the West Virginia Antitrust Act. In re Magnesium Oxide Antitrust Litig., 2011 U.S. Dist. LEXIS 121373, 2011 WL 5008090, at *8. A federal district court in West Virginia has even described the ***antitrust law*** as being "directed towards intrastate commerce." Anziulewicz v. Bluefield Cmty. Hosp., Inc., 531 F. Supp. 49, 53 (S.D.W. Va. 1981).

Wisconsin

Under Wisconsin's antitrust act, a plaintiff bringing a claim must allege that:

> (1) actionable conduct, such as the formation of a combination or conspiracy, occurred within this state, even if its effects are felt primarily outside Wisconsin; or (2) the conduct complained of "substantially affects" the people of Wisconsin and has impacts in this state, even if the illegal activity resulting in those impacts occurred predominantly or exclusively outside this state.

Olstad v. Microsoft Corp., 2005 WI 121, 284 Wis. 2d 224, 700 N.W.2d 139, 158 (Wis. 2005); *see also* Sheet Metal Workers Local 441 Health & Welfare, 737 F. Supp. 2d at 402 ("The Wisconsin Supreme Court has expressly ruled that the Act applies to interstate commerce").

Turning to whether the Downstream Purchasers' pleadings are sufficient for this group of states, the Court finds that identifying one state as an example to be informative. Thus, the Court has selected the Downstream **[*73]** Purchasers' allegations with respect to their claims brought in the District of Columbia to serve as an example of the deficiencies within these allegations.

The Consumers, in support of their claim under the District of Columbia antitrust statute, alleged that:

> Defendants' combinations or conspiracies had the following effects (1) CISP price competition was restrained, suppressed, and eliminated throughout the District of Columbia; (2) CISP prices were raised, fixed, maintained, and stabilized at artificially high levels throughout the District of Columbia; (3) Plaintiffs and members of the classes, who resided in the District of Columbia and/or purchased products containing CISP in the District of Columbia, were deprived of free and open competition, in the District of Columbia; and (4) Plaintiffs and members of the classes, who resided in the District of Columbia and/or purchased products containing CISP in

---

[5] Mirroring the way the parties have structured their own arguments, this section only applies to the Downstream Purchasers' multi-state class claim under the statute. The Consumer Plaintiffs' first claim for relief under the TTPA will be addressed separately *infra*.

> the District of Columbia, paid supracompetitive, artificially inflated prices in the District of Columbia for products containing CISP.

(Doc. 122 at 42). It is clear that these allegations do not specifically identify certain details relating to the wrongful conduct or identify **[*74]** a connection between the District of Columbia and the wrongful conduct. It also cannot be said the Consumers have made any attempt to meaningfully address intrastate commerce. As such, the Court finds that Consumers have failed to state a claim under the District of Columbia antitrust act.

As for the Indirect Plaintiffs, the only district-specific allegation they have stated regarding the District of Columbia is that "Defendants engaged in a contract, combination, or conspiracy in unreasonable restraint of trade and commerce in violation of *District of Columbia Code Annotated, §§ 28-4501, et seq.*" While the Court is cognizant of the relatively flexible standard it must use to consider claims at this stage in litigation, it is unable to conclude that these allegations are sufficient to state a claim under the District of Columbia antitrust act. The Indirect Plaintiffs have not alleged any facts specific to the District of Columbia and fail to address how Defendants' actions have in any way affected intrastate commerce in the District of Columbia. Similar to the Consumer Plaintiffs, these allegations are not sufficient to establish a connection within the District of Columbia. As the Downstream Purchasers' allegations under the states **[*75]** of Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, Wisconsin, and West Virginia are similarly conclusory without addressing any connection between the individual state and the wrongful conduct, these allegations are also insufficient. Accordingly, the Indirect Plaintiffs' and Consumer Plaintiffs' claims under these statutes will be **DISMISSED**.

Defendants next argue that the Indirect Purchasers have failed to state a claim under California ***antitrust law***. (Doc. 179 at 18). Defendants argue that the allegations stated in the Indirect Purchasers' Consolidated Amended Complaint fail to meet the heighted pleading standard under California's Cartwright Act.[6]

The Cartwright Act is the California antitrust statute that "prohibits combinations in unreasonable restraint of trade. *Marsh v. Anesthesia Serv. Med. Grp., Inc., 200 Cal. App. 4th 480, 493, 132 Cal. Rptr. 3d 660 (2011)*. To sufficiently state a claim under the Cartwright Act, a plaintiff must allege "(1) the formation and operation of the conspiracy; (2) illegal acts **[*76]** done pursuant thereto; and (3) damage proximately caused by such acts." *Kolling v. Dow Jones & Co., 137 Cal. App. 3d 709, 718, 187 Cal. Rptr. 797 (Ct. App. 1982)*; *see also* *Asahi Kasei Pharma Corp. v. CoTherix, Inc., 204 Cal. App. 4th 1, 8, 138 Cal. Rptr. 3d 620 (2012)* ("A Cartwright Act violation requires a combination of capital, skill or acts by two or more persons that seeks to achieve an anticompetitive end") (internal quotation omitted). "Cartwright Act claims are properly dismissed 'where the complaint makes conclusory allegations of a combination and does not allege with factual particularity that separate entities maintaining separate and independent interests combined for the purpose to restrain trade.'" *In re Netflix Antitrust Litig., 506 F. Supp. 2d 308, 320 (N.D. Cal. 2007)* (quoting *Freeman v. San Diego Ass'n of Realtors, 77 Cal. App. 4th 171, 189, 91 Cal. Rptr. 2d 534 (1999))*.

Defendants argue that the Indirect Purchasers' claims under the Cartwright Act fail because their Consolidated Amended Complaint consists of conclusory allegations rather than alleging "the required facts necessary to suggest that anyone from McWane conspired with anyone from Charlotte Pipe to fix list prices, multipliers, or rebates for CISP." (Doc. 179 at 20). In response, the Indirect Purchasers argue that they have "provided clear evidence" that Defendants violated the Cartwright Act through the following allegations: (1) Defendants used CISPI to further their conspiracy; (2) Defendants restrained competition for their customers; (3) Defendants **[*77]** eliminated competition by buying and destroying the assets of potential competitors such as Star Pipe; (4) the FTC investigated Defendants' activities; (5) the CISP market is ripe for collusion because of its structural features; (6) Defendants parallel price increased their CISP for unjustified reasons; and (7) the Indirect Purchasers suffered injury based on Defendants' unlawful actions. (Doc. 202 at 41).

---

[6] The Court will address Defendants' arguments with respect to Plaintiffs' claims brought under California's Unfair Competition Law and the Florida Deceptive and Unfair Practices Act *infra* with the other consumer protection and unfair competition claims.

Viewing the Indirect Purchasers' allegations in the light most favorable to them, the Court finds that they have sufficiently stated a claim under the Cartwright Act. While Defendants make many compelling points about potential weaknesses in the Indirect Plaintiffs' case, the Court can only evaluate the merits of the claim on the Consolidated Amended Complaint, not on speculation. The allegations identified by the Indirect Plaintiffs are sufficient to establish the elements of a Cartwright Claim at the pleading stage of litigation. Thus, based on the allegations stated in the Consolidated Amended Complaint, the Court concludes that the Indirect Purchasers have stated a claim under the Cartwright Act, and Defendants' Motions to Dismiss will be **DENIED** as to this claim.

d. Consumer Protection **[*78]** and Unfair Competition Claims

Defendants advance several arguments in support of their position that the Downstream Purchasers have failed to state a claim under certain state consumer protection and unfair competition statutes. (Doc. 184 at 40). Specifically, Defendants submit that: (1) Arkansas, Michigan, New Mexico, and Rhode Island bar the Downstream Plaintiffs from asserting claims under their statutes; (2) the District of Columbia, Hawaii, Michigan, Missouri, Montana, Nevada, and Rhode Island do not permit businesses to bring claims under their unfair and deceptive trade practices statutes; (3) California, Montana, New Hampshire, New York, and North Carolina require that a plaintiff bringing a claim under their consumer protection statutes establish a substantial effect on intrastate commerce and the Downstream Plaintiffs have failed to do so; (4) Montana and South Carolina prohibit private plaintiffs from bringing class actions under their state consumer protection statutes; (5) California, Florida, and Michigan only permit plaintiffs to bring class actions under their state consumer protection statutes on behalf of persons residing in or injured in their states; (6) North Carolina **[*79]** has indicated that plaintiffs are only allowed to bring class actions under its state consumer protection statutes on behalf of persons residing in or injured in North Carolina; and (7) Massachusetts requires that a plaintiff provide notice before bringing an action. (Doc. 184 at 41-44). The Court will address each of the Defendants' arguments by state.

As a preliminary matter, the Court notes that the Downstream Plaintiffs have withdrawn their respective claims under the consumer protection statutes of Arizona, Kansas, Mississippi, and Minnesota. (Doc. 202 at 55 n.33). Additionally, Defendants raise issues regarding the claims brought under the state statutes of Nebraska, New York, and Vermont based on antitrust standing principles. As the Court has deferred ruling on this issue, it will not discuss Defendants' arguments related to standing.

Arkansas

With respect to their claims under the Arkansas Deceptive Trade Practices Act ("ADTPA"), the Downstream Plaintiffs claim that courts have liberally construed the act and permitted "price-fixing actions to proceed." (Doc. 202 at 58). The ADTPA prohibits many specific deceptive and unconscionable trade practices, and includes a catch-all provision **[*80]** prohibiting "[e]ngaging in any other unconscionable, false, or deceptive act or practice in business, commerce, or trade." *Ark. Code Ann. § 4-88-107(a)(10)*. A person "who suffers actual damage or injury as a result of an offense or violation" of the ADTPA can recover actual damages and reasonable attorney's fees. *Ark. Code Ann. § 4-88-113*.

The Supreme Court of Arkansas has recognized that "liberal construction of the [A]DTPA is appropriate." *State ex rel. Bryant v. R & A Inv. Co., 336 Ark. 289, 985 S.W.2d 299, 302 (1999)*. Courts that have examined whether the ADTPA extends to price fixing claims in the antitrust context have held that, "even in light of the broad definition of unconscionability adopted by the Arkansas Supreme Court, in absence of authority from Arkansas courts that the ADTPA extends to price-fixing claims, those claims should be dismissed." *In re Lidoderm Antitrust Litig., 103 F. Supp. 3d 1155, 2015 U.S. Dist. LEXIS 58979, 2015 WL 2089223, at *7 (N.D. Cal. May 5, 2015)* (collecting cases); *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1029 (N.D. Cal. 2007)*. However, many courts have also held that the ADTPA encompasses price-fixing claims and permitted plaintiffs' claims to proceed. *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d 836, 859 (E.D. Mich. 2014)* (collecting cases). Given the state of the law on this issue and the fact that a district court in the Sixth Circuit has permitted these ADTPA price-fixing claims to proceed, the Court is reluctant to dismiss the Downstream Plaintiffs' claims on this basis. Accordingly, Defendants' Motion to Dismiss will be **DENIED** with respect to this **[*81]** claim.

Michigan

Under Michigan's Consumer Protection Act ("MCPA"), "[u]nfair, unconscionable, or deceptive methods, acts, or practices in the conduct of trade or commerce are unlawful[.]" *Mich. Comp. Laws Ann. § 445.903(1)*. As Defendant notes in its brief, the MCPA defines certain acts that fall within these categories, including "[c]harging the consumer a price that is grossly in excess of the price at which similar property or services are sold," but does not explicitly include price fixing. *Mich. Comp. Laws Ann. § 445.903(1)(z)*. The Court has reviewed the parties submissions regarding this state, and notes that the Indirect Purchasers have neither addressed Defendants' argument with respect to Michigan nor cited any authority specific to the state of Michigan. *See* Doc. 202 at 58-59 (arguing that its claims under the states of Arkansas, New Mexico, and Rhode Island should not be dismissed). In the absence of definitive case law to the contrary and the Downstream Plaintiffs' apparent lack of opposition to Defendants' position, the Court agrees that the plain language of the statute does not include price fixing and concludes that the Indirect Purchasers' claims must be **DISMISSED**.

New Mexico

The New Mexico Unfair Practices Act ("NMUPA") prohibits "[u]nfair or deceptive trade practices **[*82]** and unconscionable trade practices in the conduct of any trade or commerce." *N.M. Stat. Ann. § 57-12-3*. Similar to the ADTPA, the provisions of the NMUPA has been construed broadly to facilitate its remedial purpose. *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d at 585*. Courts generally permit plaintiffs to bring price-fixing claims under the NMUPA so long as the "plaintiff alleges a 'gross disparity' between the price paid for a product and the value received." *Id.* (collecting cases). Thus, in order to state a claim for price-fixing under the NMUPA, a plaintiff must "allege that as a result of defendants' alleged price-fixing, there was a gross disparity in the value of products received and the amount that they paid for those products." *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1127 (N.D. Cal. 2008)*. As the Downstream Purchasers have pled that Defendants' actions created artificially high prices for CISP, the Court finds that the Downstream Purchasers' claims have been sufficiently plead under the NMUPA. Accordingly, Defendants' Motion to Dismiss will be **DENIED** as to this claim.

Rhode Island

The Rhode Island Deceptive Trade Practices Act ("RIDTPA") prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *R.I. Gen. Laws Ann. § 6-13.1-2*. Courts that have examined the RIDTPA have found it to **[*83]** encompass price fixing claims because price fixing is "likely to offend public policy[.]" *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 536 F. Supp. 2d 1129, 1145 (N.D. Cal. 2008)*; *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d at 892*. Accordingly, the Court will **DENY** Defendants' Motion with respect to these claims on this ground.

Defendant also argues that Indirect Plaintiffs cannot bring a claim under the RIDTPA because only consumers can bring claims under RIDTPA. Specifically, RIDTPA contains a section that addresses private and class actions, which provides:

> Any person who purchases or leases goods or services primarily for personal, family, or household purposes and thereby suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment by another person of a method, act, or practice declared unlawful by *§ 6-13.1-2*, may bring an action under the rules of civil procedure in the superior court of the county in which the seller or lessor resides; is found; has his or her principal place of business or is doing business; or in the superior court of the county as is otherwise provided by law, to recover actual damages or two hundred dollars ($200), whichever is greater

R.I. Gen. Laws Ann. § 6-13.1-5.2; *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d at 1130*. As Indirect Purchasers have not purchased CISP for primarily personal purposes, Defendants' Motion to Dismiss will be **[*84]** **GRANTED** as to Indirect Purchaser's claim under the RIDTPA.

District of Columbia

The District of Columbia Consumer Protection and Procedures Act ("DCCPPA") "affords a panoply of strong remedies, including treble damages, punitive damages and attorneys' fees, to consumers who are victimized by unlawful trade practices." *Ford v. Chartone, Inc., 908 A.2d 72, 80-81 (D.C. 2006)*. Courts overseeing multidistrict litigation as well as state courts in the District of Columbia have correctly held that "[t]ransactions along the distribution chain that do not involve the ultimate retail customer are not 'consumer transactions' that the [DCCPPA] seeks to reach. Rather, it is the ultimate retail transaction between the final distributor and the individual member of the consuming public that the [DCCPPA] covers." *Adam A. Weschler & Son, Inc. v. Klank, 561 A.2d 1003, 1005 (D.C. 1989)*; *In re Lidoderm Antitrust Litig., 2015 U.S. Dist. LEXIS 58979, 2015 WL 2089223, at *5*. Thus, the DCCPPA "does not apply to commercial dealings outside the consumer sphere. . . [and] a valid claim for relief under the [DC]CPPA must originate out of a consumer transaction." *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *22* (internal quotation omitted). Accordingly, as the Indirect Purchasers are not consumers within the meaning of the DCCPPA, the Indirect Purchasers' claims arising under the DCCPPA will be **DISMISSED**.

Hawaii

Hawaii's unfair competition statute prohibits "[u]nfair methods of competition and **[*85]** unfair or deceptive acts or practices in the conduct of any trade or commerce." *Haw. Rev. Stat. § 480-2*. The statute also provides that "[n]o person other than a consumer, the attorney general or the director of the office of consumer protection may bring an action based upon unfair or deceptive acts or practices declared unlawful by this section" but that "[a]ny person may bring an action based on unfair methods of competition declared unlawful by this section." *Haw. Rev. Stat. § 480-2*. *Haw. Rev. Stat. § 480-2* (West). The term "consumer" is defined as "a natural person who, primarily for personal, family, or household purposes, purchases, attempts to purchase, or is solicited to purchase goods or services or who commits money, property, or services in a personal investment." *Haw. Rev. Stat. § 480-1*. The term "person" is defined as "individuals, corporations, firms, trusts, partnerships, limited partnerships, limited liability partnerships, limited liability limited partnerships, limited liability companies, and incorporated or unincorporated associations, existing under or authorized by the laws of this State, or any other state, or any foreign country." *Haw. Rev. Stat. § 480-1*. Thus, based on Hawaii's unfair competition statute, the Indirect Purchasers will only be able to bring their claim based on grounds **[*86]** of unfair methods of competition. *In re Static Random Access Memory (SRAM) Antitrust Litig., 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *2 (N.D. Cal. Dec. 8, 2010)* ("However, by its terms, the restriction applies only to claims involving deceptive acts or practices, not unfair competition; no such restriction applies to claims for unfair competition."). Accordingly, to the extent the Indirect Purchasers were seeking to bring a claim based on unfair or deceptive acts or practices under Hawaii's unfair competition statute, that claim will be **DISMISSED**.

Missouri

Missouri's Merchandising Practices Act ("MMPA") prohibits "[t]he act, use or employment by any person of any deception, fraud, false pretense, false promise, misrepresentation, unfair practice or the concealment, suppression, or omission of any material fact in connection with the sale or advertisement of any merchandise in trade or commerce." *Mo. Ann. Stat. § 407.020(1)*. Regarding who can bring civil actions, Missouri's consumer protection statute provides:

> Any person who purchases or leases merchandise primarily for personal, family or household purposes and thereby suffers an ascertainable loss of money or property, real or personal, as a result of the use or employment by another person of a method, act or practice declared unlawful by section 407.020, may bring a private civil action in either the **[*87]** circuit court of the county in which the seller or lessor resides or in which the transaction complained of took place, to recover actual damages.

Mo. Ann. Stat. § 407.025(1).

While the Indirect Plaintiffs argue that the Court should extend this language to include businesses, they have not provided convincing authority that supports their interpretation of the MMPA. *See* In re Auto. Parts Antitrust Litig., 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *23 ("[plaintiffs] have offered no authority from Missouri to support their expansive interpretation of the statutory language. The Court finds no reason to reach a different conclusion here."). Thus, Defendants' Motion to Dismiss will be **GRANTED** as to this claim, and the Indirect Purchasers' claim under the MMPA will be **DISMISSED**.

Nevada

Turning to the Nevada Deceptive Trade Practices Act ("NDTPA"), and to specifically, the section regarding actions by victims of fraud, the section provides that an action "may be brought by any person who is a victim of consumer fraud." Nev. Rev. Stat. Ann. § 41.600 (defining consumer fraud as including NDTPA sections 598.0915 to 598.0925). Courts have interpreted this language as permitting only natural persons to bring claims under the NDTPA. *See* In re DDAVP Indirect Purchaser Antitrust Litig., 903 F. Supp. 2d at 226; In re Chocolate Confectionary Antitrust Litig., 749 F. Supp. 2d at 234; In re Wellbutrin XL Antitrust Litig., 260 F.R.D. 143, 163 (E.D. Pa. 2009). Accordingly, as the Indirect Purchasers are not natural persons, their claim under this statute will be **DISMISSED [*88]** .

California

California's Unfair Competition Law ("UCL") prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by Chapter 1 (commencing with Section 17500) of Part 3 of Division 7 of the Business and Professions Code." Cal. Bus. & Prof. Code § 17200. In interpreting the meaning of the UCL, California courts "have specifically held that California's UCL does not support claims by non-California residents where none of the alleged misconduct or injuries occurred in California." Meridian Project Sys., Inc. v. Hardin Const. Co., LLC, 404 F. Supp. 2d 1214, 1225 (E.D. Cal. 2005). However, courts have found that alleging that overcharges occurred in California establishes this intrastate nexus. In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 2014 WL 6792663, at *26; In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *19 ("these cases would support a request to dismiss claims under the statute by non-California residents who do not allege misconduct or injuries that occurred in California."). As the Indirect Purchasers are located in California and operated their business in California at the time of the alleged injuries, the Court finds this sufficient to establish an intrastate nexus. Accordingly, Defendants' Motion to Dismiss will be **DENIED** as to these claims.[7]

Montana and South Carolina[8]

Montana's Consumer Protection Act ("MCPA") prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." Mont. Code Ann. § 30-14-103. The MCPA defines trade or commerce as "the advertising, offering for sale, sale, or distribution of any services, any property, tangible or intangible, real, personal, or mixed, or any other article, commodity, or thing of value, wherever located, and includes any trade or commerce directly or indirectly affecting the people of this state." Mont. Code Ann. § 30-14-

---

[7] As the Court has denied Defendants' Motions to Dismiss with respect to Plaintiffs' Cartwright Act **[*89]** claim, Defendants' argument that Plaintiffs' UCL claim should be dismissed because their actions were permissible under California's antitrust laws has effectively been rendered moot. (Doc. 179 at 21).

[8] As the Indirect Purchasers' note in their brief, they have not brought a claim under Montana law and only the Consumers have brought a claim under Montana law. (Doc. 202 at 59 n.37).

102(8). While the MCPA permits a consumer to bring an individual action under the statute, the explicit language of the statute does not permit a consumer to bring a class action. Mont. Code Ann. § 30-14-133(1) ("A consumer who suffers any ascertainable loss of money or property, real or personal, as a result of the use **[*90]** or employment by another person of a method, act, or practice declared unlawful by 30-14-103 may bring an individual but not a class action").[9]

Similar to the MCPA, the South Carolina Unfair Trade Practices Act ("SCUTPA") provides that a person who has suffered "ascertainable loss of money or property, real or personal, as a result of the use or employment by another person of an unfair or deceptive method, act or practice declared unlawful by § 39-5-20 may bring an action individually, but not in a representative capacity, to recover actual damages." S.C. Code Ann. § 39-5-140(a). Thus, the question before the Court in regard to the Downstream Purchasers' claims brought under the SCUTPA and MCPA is whether the Downstream Purchasers may bring these claims even though the state statutes provide **[*91]** otherwise.

In the United States Supreme Court case *Shady Grove Orthopedic Assocs. v. Allstate Ins. Co., 559 U.S. 393, 401, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)*, the Supreme Court held that "[r]ule 23 permits all class actions that meet its requirements, and a State cannot limit that permission by structuring one part of its statute to track Rule 23 and enacting another part that imposes additional requirements." Courts that have interpreted *Shady Grove* in this context have concluded that these state prohibitions do not affect the substantive rights of the individuals because "a rule barring class actions does not prevent individuals who would otherwise be members of the class from bringing their own separate suits or joining in a preexisting lawsuit." *See In re Hydroxycut Mktg. & Sales Practices Litig., 299 F.R.D. 648, 654 (S.D. Cal. 2014)*; *In re Auto. Parts Antitrust Litig., 50 F. Supp. 3d at 861* ("Rule 23 applies in federal court unless it "abridge[s], enlarge[s] or modif[ies] any substantive right" under the Rules Enabling Act, 28 U.S.C. § 2072(b).") Thus, the Court concludes that the state prohibitions are procedural in nature. Because these provisions of the MCPA and the SCUTPA regarding class actions are procedural and not substantive in nature, Rule 23 will govern the Downstream Purchasers' claims under the SCUTPA and MCPA, and Defendants Motion to Dismiss on this ground will be **DENIED**.

New Hampshire, New York, and North Carolina

New Hampshire's consumer protection laws make it "unlawful **[*92]** for any person to use any unfair method of competition or any unfair or deceptive act or practice in the conduct of any trade or commerce within this state." N.H. Rev. Stat. Ann. § 358-A:2. Courts that have reviewed the issue of the extent to which a plaintiff is require to plead allegations regarding intrastate commerce have frequently "acknowledged that the [consumer protection act] requires the proscribed conduct to occur within the state; merely selling a good in New Hampshire is not enough when the proscribed conduct occurs elsewhere." *In re Lithium Ion Batteries Antitrust Litig., 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *22 (N.D. Cal. Oct. 2, 2014)*; *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *18*; *but see In re Ductile Iron Pipe Fittings (DIPF) Indirect Purchaser Antitrust Litig., 2013 WL 5503308, at *22 (D.N.J. Oct. 2, 2013)*("courts interpreting New Hampshire's consumer protection law disagree as to whether a nationwide scheme in which the plaintiffs pay a higher price in the state is sufficient to satisfy the statute's requirement.").

New York's Consumer Protection Act ("NYCPA") "was enacted to provide consumers with a means of redress for injuries caused by unlawfully deceptive acts and practices." *Goshen v. Mut. Life Ins. Co. of New York, 98 N.Y.2d 314, 774 N.E.2d 1190, 1194, 746 N.Y.S.2d 858 (2002)*. Similar to New Hampshire's consumer protection law, the NYCPA specifically provides that "[d]eceptive acts or practices in the conduct of any business, trade or commerce

---

[9] Defendants argue that the Consumer Plaintiffs' claim must be dismissed because they have not established that the wrongful conduct had a substantial effect on intrastate commerce in Montana, but the authority they have provided in support of their position is not conclusive on this issue. *See In re Dynamic Random Access Memory (Dram) Antitrust Litig., 516 F. Supp. 2d at 1103*. Accordingly, Defendants' Motion to Dismiss will be **DENIED** on this ground with respect to the Consumer Plaintiffs' claims brought under the MCPA.

or in the furnishing of any service *in this state* are hereby declared unlawful." N.Y. Gen. Bus. Law § 349(a) (emphasis added); *see* In re Foreign Exch. Benchmark Rates Antitrust Litig., 74 F. Supp. 3d 581, 2015 WL 363894, at *15 (S.D.N.Y. 2015); Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 263 F.R.D. 205, 214 (E.D. Pa. 2009) **[*93]** ("the claim must be dismissed in this case because the alleged deceptive conduct in this case neither occurred in New York nor was directed at consumers").

The North Carolina Unfair Trade Practices Act ("NCUTPA") prohibits "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce." N.C. Gen. Stat. Ann. § 75-1.1(a). North Carolina federal courts have interpreted the NCUTPA as addressing "primarily local concerns." *The In* Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494, 502 (M.D.N.C. 1987) (quoting Am. Rockwool, Inc. v. Owens-Corning Fiberglas Corp., 640 F. Supp. 1411, 1428 (E.D.N.C. 1986)); Merck & Co. Inc. v. Lyon, 941 F. Supp. 1443, 1463 (M.D.N.C. 1996) ("plaintiffs have failed to allege a substantial effect on any in-state business operations, and therefore that their claim falls outside the reach of the North Carolina Trade Practices Act").

Considering the Downstream Plaintiffs' failure to plead allegations specific to New Hampshire, New York, and North Carolina, the Court once again finds that Plaintiffs have failed to meaningfully address intrastate commerce with respect to these claims. Accordingly, the Downstream Plaintiffs' claims brought under New Hampshire's consumer protection act, the NYCPA, and the NCUTPA will be **DISMISSED**.

Florida

Florida's Deceptive and Unfair Trade Practices Act ("FDUTPA") prohibits "[u]nfair methods of competition, unconscionable acts or practices, and **[*94]** unfair or deceptive acts or practices in the conduct of any trade or commerce." Fla. Stat. Ann. § 501.204(1). While nothing in the language of the statute suggests this limitation, certain Florida courts have concluded that "only in-state consumers can pursue a valid claim under the Unfair Trade Act." Oce Printing Sys. USA, Inc. v. Mailers Data Servs., Inc., 760 So. 2d 1037, 1042 (Fla. Dist. Ct. App. 2000); Coastal Physician Servs. of Broward Cnty., Inc. v. Ortiz, 764 So. 2d 7, 8 (Fla. Dist. Ct. App. 1999). A review of the more recent court decisions regarding this issue reflects that "courts have expanded coverage to claims of out[-]of-state consumers if the offending conduct occurred predominantly or exclusively in Florida." Karhu v. Vital Pharm., Inc., 2013 U.S. Dist. LEXIS 112613, 2013 WL 4047016, at *9 (S.D. Fla. Aug. 9, 2013) (collecting cases); F.T.C. v. Info. Mgmt. Forum, Inc., 2013 U.S. Dist. LEXIS 91229, 2013 WL 3323635, at *6 (M.D. Fla. June 28, 2013). The Court agrees with this latter position, that a claim can be brought by out-of-state residents under the FDUTPA as long as "the offending conduct took place predominantly or entirely in Florida." Karhu, 2013 U.S. Dist. LEXIS 112613, 2013 WL 4047016, at *10. Similar to many of its other claims, the Downstream Plaintiffs have failed to allege state-specific allegations in their Consolidated Amended Complaints. Thus, they fail to establish that their claims occurred predominantly in Florida, and their claims under the FDUTPA will be **DISMISSED**.

Massachusetts

Massachusetts' consumer protection law declares unlawful "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." Mass. Gen. Laws Ann. ch. 93A, § 2. Section 9 of **[*95]** this act provides:

> (1) Any person, other than a person entitled to bring action under *section eleven of this chapter*, who has been injured by another person's use or employment of any method, act or practice declared to be unlawful *by section two* or any rule or regulation issued thereunder . . . may bring an action in the superior court, or in the housing court as provided in section three of chapter one hundred and eighty-five C whether by way of original complaint, counterclaim, cross-claim or third party action, for damages and such equitable relief, including an injunction, as the court deems to be necessary and proper.
>
> . . .

> (3) At least thirty days prior to the filing of any such action, a written demand for relief, identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered, shall be mailed or delivered to any prospective respondent. . . .

Mass. Gen. Laws Ann. ch. 93A, § 9 (emphasis added). Although Defendants claim that the Downstream Plaintiffs have not complied with this provision, the Downstream Plaintiffs submit that they are not required to comply with this provision because they are bringing their claims pursuant to Sections 2 and 11 of the statute, **[*96]** not section 9. *See* Landworks Creations, LLC v. U.S. Fid. & Guar. Co., 2008 U.S. Dist. LEXIS 17688, 2008 WL 660341, at *7 (D. Mass. Feb. 6, 2008) ("Defendant asserts that plaintiff's failure to send a demand letter is a bar to the ch. 93A claim. Such a letter is only a jurisdictional prerequisite to suit under ch. 93A, § 9, not § 11, which governs here") (internal quotation omitted). The Court finds the Downstream Plaintiffs' position to be well taken considering the language of the statute, and thus Defendants' Motion to Dismiss will be **DENIED** as to this claim.

e. Consumer Plaintiffs' Unjust Enrichment Claim

Defendants next argue that the Consumer Plaintiffs' unjust enrichment claims consist of conclusory allegations, justifying dismissal of these claims. (Doc. 184 at 45). Defendants also argue that, even if the Consumer Plaintiffs' had tailored their claims to the specific state laws, they should still be dismissed because they fail to allege that the Consumer Plaintiffs "conferred an identifiable benefit on a Defendant." (*Id.* at 45). In their response to Defendants' Motions to Dismiss, the Consumer Plaintiffs argue that they have adequately pled the unjust enrichment claims because they have alleged that "Defendants benefitted from their illegal price fixing conspiracy and that retaining that benefit would be inequitable." (Doc. **[*97]** 202 at 71).

In their Consolidated Amended Complaint, the Consumer Plaintiffs bring unjust enrichment claims under the laws of the Consumer States and allege that Defendants have been unjustly enriched "by the receipt of, at a minimum, unlawfully inflated prices and unlawful profits on CISP." (Doc. 122 at 67). Courts faced with multi-state unjust enrichment claims have recognized that, "although the particular elements of unjust enrichment vary from jurisdiction to jurisdiction, when stripped to its essence, a claim of unjust enrichment requires [Plaintiffs] to allege sufficient facts to show that Defendants received a benefit and under the circumstances of the case, retention of the benefit would be unjust." In re Auto. Parts Antitrust Litig., 29 F. Supp. 3d 982, 1014 (E.D. Mich. 2014); *In re Flonase Antitrust Litig., 692 F. Supp. 2d at 541* ("almost all states at minimum require plaintiffs to allege that they conferred a benefit or enrichment upon defendant and that it would be inequitable or unjust for defendant to accept and retain the benefit"); In re Whirlpool Corp. Front-Loading Washer Products Liab. Litig., 684 F. Supp. 2d 942, 959 (N.D. Ohio 2009), *as amended* (Nov. 4, 2009) ("Rather than describing the specific conduct of the defendant, the 'unjust, inequitable, or wrongful' element of an unjust enrichment claim speaks to the general circumstances of the parties."). In reviewing the Consumer Plaintiffs' Consolidated **[*98]** Amended Complaint, the Court finds that they have sufficiently pled these elements and therefore declines to dismiss the Consumer Plaintiffs' unjust enrichment claims on the ground that they are conclusory allegations.[10] The Court will now perform a state-by-state analysis regarding the specific states under which Defendants argue that Plaintiffs have failed to state a claim for unjust enrichment.[11]

Arkansas

---

[10] Although Defendants argue that the Consumer Plaintiffs should have connected "their alleged overpayment to intermediate CISP sellers . . . through builders, plumbers, contractors, distributors, and the direct purchasers," the Court finds that this level of detail is not required pursuant to Federal Rule of Civil Procedure 8 and Twombly, 550 U.S. at 556.

[11] As the Consumer Plaintiffs note in their Response, Defendants have not raised specific arguments for dismissal with respect to the District of Columbia, Hawaii, Illinois, Iowa, Massachusetts, Minnesota, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, Oregon, Rhode Island, South Dakota, Vermont, West Virginia, and Wisconsin. (Doc. 202 at 72 n.49). Thus, Defendants' Motion to Dismiss will be **DENIED** as to these claims.

In Arkansas, unjust enrichment is defined as "an equitable doctrine **[*99]** that allows a party to recover for benefits conferred on another. It is restitutionary in nature and focuses on the benefit received." *Ashley Cnty., Ark. v. Pfizer, Inc., 552 F.3d 659, 665 (8th Cir. 2009)*. A party pleading unjust enrichment must not only plead that a party has received "something of value, to which he was not entitled and which he must restore," but also allege that there was "some operative act, intent, or situation to make the enrichment unjust and compensable." *Hatchell v. Wren, 363 Ark. 107, 211 S.W.3d 516, 522 (Ark. 2005)*; *Dews v. Halliburton Indus., Inc., 288 Ark. 532, 708 S.W.2d 67, 69 (Ark. 1986)*. As the Consumer Plaintiffs have failed to plead an operative act, intent, or situation by the Defendants in support of their claim for unjust enrichment under Arkansas law, the Court concludes that this claim will be **DISMISSED**.

California

Many courts have recognized the split in authority regarding whether a plaintiff can bring an individual unjust enrichment claim or whether it can only serve as an equitable remedy. *See In re ConAgra Foods Inc., 908 F. Supp. 2d 1090, 1113 (C.D. Cal. 2012)*. The two cases at the heart of this dispute are *Melchior v. New Line Prods., Inc., 106 Cal. App. 4th 779, 131 Cal. Rptr. 2d 347, 357 (Cal. Ct. App. 2003)*, in which an appellate court in California held that "there is no cause of action in California for unjust enrichment," and *Ghirardo v. Antonioli, 14 Cal. 4th 39, 57 Cal. Rptr. 2d 687, 924 P.2d 996, 1002 (1996)*, in which the California Supreme Court held that a plaintiff was "entitled to seek relief under traditional equitable principles of unjust enrichment." In reconciling these cases and **[*100]** the body of case law that has developed around them, the court in *In re Conagra Foods* held that "a cause of action for unjust enrichment is not cognizable. Rather, unjust enrichment is a theory that permits recovery on other recognized causes of action." *In re ConAgra Foods Inc., 908 F. Supp. 2d at 1114*. The Court finds this to be the proper interpretation of these cases, and thus holds that the Consumer Plaintiffs cannot plead a claim of unjust enrichment under California law. Accordingly, the Consumer Plaintiffs' claim for unjust enrichment in California will be **DISMISSED**.

Florida, Kansas, Maine, Michigan, North Carolina, North Dakota, and Utah

In both of their briefs, the parties have grouped together the states of Florida, Kansas, Maine, Michigan, North Carolina, North Dakota, and Utah. Defendant submits that these seven states "require that a plaintiff confer a direct benefit on the defendant in order to state a claim for unjust enrichment." (Doc. 184 at 47). In response, Consumer Plaintiffs submit that the word "'direct' is intended to refer not to the relationship between the parties, but to a type of benefit that is not 'incidental.'" (Doc. 202 at 72).

For these states, the Court recognizes that there is a split of case law **[*101]** regarding whether a plaintiff can plead unjust enrichment solely through a direct benefit, or if it is possible for a plaintiff to plead unjust enrichment through an indirect benefit. *See In re Auto. Parts Antitrust Litig., 29 F. Supp. 3d at 1020* (denying defendant's argument with respect to claims for unjust enrichment brought in Maine); *In re Processed Egg Products Antitrust Litig., 851 F. Supp. 2d 867, 929 (E.D. Pa. 2012)* (collecting split of Florida, Kansas, North Carolina, Utah cases on this issue and denying defendant's motion to dismiss); *In re Static Random Access Memory (SRAM) Antitrust Litig., 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *7 (N.D. Cal. Dec. 8, 2010)* ("A claim for unjust enrichment under Michigan law does not require that the plaintiff confer a direct benefit on the defendant."); *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d at 1190* (collecting cases regarding split in North Carolina and Michigan and denying defendant's motion to dismiss). Thus, based on the parties' submissions and the number of courts that have permitted plaintiffs to bring unjust enrichment claims through an indirect benefit, the Court declines to dismiss the Consumer Plaintiffs' claims on this basis.

The outlier of this group of states is North Dakota. The Consumer Plaintiffs have failed to cite any authority supporting their position that a direct benefit is not required while Defendants cite to the North Dakota Supreme Court case, *Apache Corp. v. MDU Res. Grp., Inc., 1999 ND 247, 603 N.W.2d 891 (N.D. 1999)*. In *Apache*, the North Dakota Supreme Court confirmed that "[t]he essential element **[*102]** in recovering under a theory of unjust enrichment is the receipt of a benefit by the defendant from the plaintiff which would be inequitable to retain without paying for its value." *Id. at 895* (quoting *Zuger v. North Dakota Ins. Guar. Ass'n, 494 N.W.2d 135, 138 (N.D. 1992))*. As the Consumer Plaintiffs are unable to allege a direct benefit in support of their unjust enrichment claim in North Dakota, those claims will be **DISMISSED**.

New York

The parties agree that New York permits plaintiffs to bring unjust enrichment claims as long as the relationship between the plaintiff and the defendant is not "too attenuated." *Sperry v. Crompton Corp., 8 N.Y.3d 204, 863 N.E.2d 1012, 1018, 831 N.Y.S.2d 760 (N.Y. 2007)*; *see also* *State ex rel. Spitzer v. Daicel Chem. Indus., Ltd., 42 A.D.3d 301, 840 N.Y.S.2d 8, 12 (N.Y. 2007)*. However, the parties dispute whether the relationship between the Consumer Plaintiffs and the Defendants is sufficient under this standard. The Court has considered the parties' positions and finds that Consumer Plaintiffs have not stated a sufficient relationship with Defendants to meet this standard. Specifically, the connection between the parties and the fact that they had no dealings directly with each other leads the Court to conclude that the relationship does not support a claim for unjust enrichment. *See* *Laydon v. Mizuho Bank, Ltd., 2014 U.S. Dist. LEXIS 46368, 2014 WL 1280464, at *14 (S.D.N.Y. Mar. 28, 2014)*; *Malone & Co. v. Rieder, 19 N.Y.3d 511, 973 N.E.2d 743, 747, 950 N.Y.S.2d 333 (2012)*. Accordingly, the Consumer Plaintiffs unjust enrichment claims brought in New York will be **DISMISSED**.

South Carolina

The elements **[*103]** of a claim for unjust enrichment in South Carolina are: "(1) a benefit conferred upon the defendant by the plaintiff; (2) realization of that benefit by the defendant; and (3) retention by defendant of the benefit under conditions that make it inequitable for him to retain it without paying its value." *Ellis v. Smith Grading & Paving, Inc., 294 S.C. 470, 366 S.E.2d 12, 15 (S.C. Ct. App. 1988)*. In their briefs, the parties dispute whether the Consumer Plaintiffs were required to establish that Defendants owed them a duty under South Carolina law. (Doc. 184 at 48; Doc. 202 at 73 n.50).

The courts that have determined that South Carolina requires pleading the existence of a duty have mischaracterized the cases which have discussed this proposition. The case relied on by the Defendants, and which is often cited by other multidistrict litigation courts, is *Pitts v. Jackson Nat. Life Ins. Co., 352 S.C. 319, 574 S.E.2d 502, 512 (S.C. Ct. App. 2002)*. In *Pitts*, a South Carolina appellate court found that a plaintiff "failed to establish any duty to disclose or other cause of action that would allow recovery for unjust enrichment" because he had failed to allege any benefit conferred to defendants that would be unjust for them to retain. *Id.* Specifically, "the plaintiff purchased an insurance policy from an insurance agent with whom he had no previous relationship and later **[*104]** discovered that he was eligible for a less expensive policy." *In re Microsoft Corp. Antitrust Litig., 401 F. Supp. 2d 461, 464 (D. Md. 2005)*. The Court finds *Pitts* to be distinguishable from the instant case because Plaintiffs have pled that it would be unjust for Defendants to retain the money made off of the inflated prices and profits on CISP. Additionally, a court in this Circuit has recently held that there is "no requirement to allege the existence of a duty." *In re Auto. Parts Antitrust Litig., 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *36* . Accordingly, the Court will **DENY** Defendants' Motion to Dismiss with respect to Consumer Plaintiffs' claim for unjust enrichment in South Carolina.

Mississippi

Mississippi permits plaintiffs to bring a claim for unjust enrichment when "the defendant holds money which in equity and good conscience belongs to the plaintiff." *Owens Corning v. R.J. Reynolds Tobacco Co., 868 So. 2d 331, 342 (Miss. 2004)* (quoting *Fordice Construction Company v. Central States Dredging Company, 631 F.Supp. 1536. (S.D.Miss. 1986))*. Although Defendants argue that Mississippi only permits unjust enrichment claims to be brought when money has been paid based on a mistake of fact, numerous courts have rejected this position. *See* *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 2014 WL 6792663, at*

36* (collecting cases). While it is true that a plaintiff can bring a claim for unjust enrichment when he has mistakenly paid another party, this does not mean that this is the only way that a plaintiff can bring an unjust enrichment claim. Accordingly, Defendants' Motion to **[*105] Dismiss with respect to Consumer Plaintiffs' Mississippi unjust enrichment claims will be **DENIED**.

f. Consumer Clayton Act Claim

In their Motions, Defendants argue that the Consumer's Clayton Act Claim is barred by black letter law. Specifically, Defendants submit that the Consumers' claim under *Section 7 of the Clayton Act* should be dismissed because they fail to allege an antitrust injury proximately caused by Charlotte Pipe's acquisition of Star Pipe. Defendants also submit that Consumers are indirect purchasers and lack standing to bring a claim for treble damages and that it is not possible to grant Consumers injunctive relief because the acquisition was completed in 2010 and remedied by the Consent Order. (Doc. 184 at 51-52). In response to Defendants' position, at the December 19, 2015 Hearing on this Motion, the Consumers conceded that Count V of their Amended Consolidated Complaint should be dismissed. *See* Doc. 235 at 103. Accordingly, Defendants' Motions to Dismiss with respect to the Consumers Clayton Act Claim will be **GRANTED** and this claim will be **DISMISSED**.

g. Consumer TTPA Claim

Defendants next argue that the Consumer's class action under the TTPA should be dismissed because it does **[*106]** not comply with the Tennessee Supreme Court case *Freeman Industries, LLC., 172 S.W.3d at 512*. Additionally, Defendants argue that the Consumer Plaintiffs are Arkansas residents who purchased CISP from Arkansas sellers, leaving them no connection with the state of Tennessee. (Doc. 179 at 28). In response, the Consumer Plaintiffs argue that they have "alleged sufficient factual detail of substantial effects of Defendant manufacturers' conspiracy on Tennessee commerce" in order to withstand Defendants' Motions to Dismiss. (Doc. 202 at 70).

The TTPA provides that:

> [a]ll arrangements, contracts, agreements, trusts, or combinations between persons or corporations made with a view to lessen, or which tend to lessen, full and free competition in the importation or sale of articles imported into this state, or in the manufacture or sale of articles of domestic growth or of domestic raw material, and all arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer of any such product or article, are declared to be against public policy, unlawful, and void.

Tenn. Code Ann. § 47-25-101. The Tennessee Supreme Court reviewed the purpose **[*107]** and construction of the TTPA in *Freeman*. The plaintiff in *Freeman* was attempting to bring a claim under the TTPA based on defendant's conduct of (1) communicating with co-defendants at in-person meetings to create a price-fixing agreement; (2) implementing the agreement by drafting price schedules, adjusting prices, and taking orders from customers at the new prices; and (3) concealing its conduct by limiting the employees that had knowledge of the price-fixing agreement. *Freeman, 172 S.W.3d at 524*. The court ultimately found these allegations "primarily relate[d] to the defendants' actions in conspiring and implementing the conspiracy" rather than the effects of the conduct on Tennessee commerce and concluded that the claim did not fall within the scope of the TTPA. *Id.*

In its analysis of the TTPA, the court described the TTPA's plain language as prohibiting "arrangements that decrease competition or affect the prices of goods even if those goods arrived in Tennessee through interstate commerce." *Freeman, 172 S.W.3d at 522*. The court also noted that the legislature had not intended to limit the TTPA's scope to intrastate commerce, otherwise it would have included such a limitation. *Id.* In regard to the standard that should be applied in determining **[*108]** the effects of the anticompetitive conduct on Tennessee interstate commerce, the court concluded that the substantial effects standard was the correct one. Under the substantial effects standard, "courts must decide whether the alleged anticompetitive conduct affects Tennessee trade or commerce to a substantial degree." *Id. at 523*. The meaning of the phrase "substantial degree" turns on the circumstances of a given case and constitutes some measure between "mathematical nicety" and "the demise of Tennessee businesses." *Id.* Thus, based on *Freeman*, a non-resident indirect purchaser can bring a TTPA claim as long as the alleged anticompetitive conduct had a substantial effect on Tennessee trade and commerce.

Both parties agree that another case decided in this District, *In re Skelaxin (Metaxalone) Antitrust Litig., 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185, at *23 (E.D. Tenn. May 20, 2013)*, is relevant to the instant determination of whether the Consumer Plaintiffs have sufficiently plead a TTPA claim. In *Skelaxin*, the court reviewed the *Freeman* decision to determine whether indirect purchasers, consisting of non-resident pharmacies and other purchasers for resale who were forced to pay more for metaxalone products due to Defendants' unlawful conduct, sufficiently pled a TTPA claim. *Id.* The court found that, viewing **[*109]** the facts in the light most favorable to the indirect purchasers, the acts alleged in the complaint would have substantially affected intrastate commerce because: (1) the defendant had its corporate headquarters and principal place of business in Tennessee; (2) the indirect purchasers "paid possibly hundreds of millions of dollars in overcharges" and the defendant "likely received a significant portion of the sales"; (3) a "substantial portion" of the overcharges likely "flowed back to Tennessee"; and (4) at least some of the money used to further the anticompetitive scheme deprived the state of Tennessee of additional funds. *Skelaxin, 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185, at *24*.

Turning to the facts of the instant case, Consumer Plaintiffs allege that CISP was sold in Tennessee by one or both Defendants, CISPI had its principal place of business in Hixson, Tennessee, the Defendants used CISPI to communicate about the alleged price fixing and coordinate their activities, and the Defendants had bi-annual meetings at CISPI for the purpose of implementing their price-fixing agreement. Based on these facts, Consumer Plaintiffs submit that "[m]illions of dollars in revenue is generated for the . . . Defendants by the utilization of [CISPI] in Tennessee" **[*110]** and Defendants "[d]erived substantial revenue in Tennessee from CISP sold, purchased, and used in Tennessee and throughout the United States." (Doc. 121 at 12).

Taking these facts in the light most favorable to the Consumer Plaintiffs, as the Court is required to do, the Court finds that they fail to establish that the alleged wrongful conduct of Defendants McWane and Charlotte Pipe would have substantially affected intrastate commerce. The allegations stated in the Amended Consolidated Complaint are similar to the conduct alleged in *Freeman*, and thus they fail to state a claim on the same grounds. Specifically, the conduct alleged relates to the Defendants' actions in forming and implementing the conspiracy rather than focusing on the effect of the conspiracy on Tennessee commerce. As for Defendant CISPI, the Court concludes that the conduct alleged could have a substantial effect on interstate commerce in Tennessee. *See Skelaxin., 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185, at *24*. In fact, the majority of the Consumer Plaintiffs allegations relating to Tennessee-specific conduct are based around CISPI and its role in the price-fixing conspiracy. *See* Doc. 202 at 69. Accordingly, Defendants' Motion to Dismiss will only be granted with respect to Consumer **[*111]** Plaintiffs' TTPA claims brought against Charlotte Pipe and McWane but not to the claim against CISPI.

III. MOTIONS TO STRIKE

Defendants move to strike the Indirect Purchasers' class action allegations because "applying the law of thirty states in a multi-state class action renders the class unmanageable." (Doc. 152 at 3). Defendants move to strike the Consumer Plaintiffs' class action allegations on the same grounds stated in their Motion against the Indirect Purchasers, and also argue that the Consumer Plaintiffs' class action under the TTPA should be stricken. (Doc. 153).

A. Standard of Law

Federal Rule of Civil Procedure 12(f) states that "a court may strike only material that is contained in the pleadings," which are defined as "a complaint and answer; a reply to a counterclaim denominated as such; an answer to a cross-claim, if the answer contains a cross-claim; a third party complaint, if a person who was not an original party is summoned under the provisions of *Rule 14*; and a third-party answer, if a third-party complaint is served." *Fox v. Mich. State Police Dep't, 173 F. App'x 372, 375 (6th Cir. 2006)* (quotation omitted).

The Sixth Circuit has stated that "a district court should defer decision on class certification issues and allow discovery 'if the existing record is inadequate for resolving **[*112]** the relevant issues.'" *Bearden v. Honeywell Int'l*

Inc., 720 F. Supp. 2d 932, 942 (M.D. Tenn. 2010) (quoting In re Am. Med. Sys., 75 F.3d 1069, 1086 (6th Cir. 1996). For a court to determine class certification issues at the pleadings stage of the litigation, there "must be an adequate statement of the basic facts to indicate that each requirement of the rule is fulfilled." Weathers v. Peters Realty Corp., 499 F.2d 1197, 1200 (6th Cir. 1974). Additionally, this determination ordinarily "should be predicated on more information than the pleadings will provide." *Id.*; In re Allstate Ins. Co. Underwriting & Rating Practices Litig., 917 F. Supp. 2d 740, 751 (M.D. Tenn. 2008) ("the plaintiffs are entitled, based on their showing to this point, to develop this case and seek class certification based on developments in discovery.").

Although the ordinary course of proceedings is for this matter to be decided on a class certification motion, there are circumstances in which class certification issues can be decided based on a pleading. These circumstances include when "further discovery and briefing on the certification issue would simply postpone the inevitable conclusion that the putative class cannot be certified." Loreto v. Procter & Gamble Co., 2013 U.S. Dist. LEXIS 162752, 2013 WL 6055401, at *3 (S.D. Ohio Nov. 15, 2013); Cowit v. CitiMortgage, Inc., 2013 U.S. Dist. LEXIS 32219, 2013 WL 940466, at *2 (S.D. Ohio Mar. 8, 2013) ("A court may strike class action allegations before a motion for class certification where the complaint itself demonstrates that the requirements for maintaining a class action cannot be met").

The requirements that a claimant must establish in bringing a claim on behalf of **[*113]** a class as identified in Federal Rule of Civil Procedure 23 are:

(1) the class is so numerous that joinder of all members is impracticable;
(2) there are questions of law or fact common to the class;
(3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and
(4) the representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a)(1-4). Rule 23(c)(1)(A) provides that the court must determine whether an action will be certified as a class action at "an early practicable time after the person sues."

B. Analysis

In support of their position that these class action allegations should be dismissed, Defendants cite to Pilgrim v. Universal Health Card, LLC, 660 F.3d 943 (6th Circuit 2011). In *Pilgrim*, two consumers were seeking to represent a nationwide class of people who had joined a healthcare discount program created by Universal Health Card and Coverdell & Company. Id. at 945. Universal Health Card filed a motion to strike the class action allegations, and the district court concluded that Ohio's choice-of-law rules required it to analyze each class member's claim under the laws of his or her home state, and that this made the class "unmanageable." *Id.* The Sixth Circuit Court of Appeals reviewed this decision and found that the district court did not **[*114]** abuse its discretion in finding that the plaintiffs could not demonstrate that common questions of fact or law to class members predominated over questions of law and fact affecting individual members. Id. at 946. The court reached this conclusion for several reasons: (1) different laws governed the class members' claims; (2) common issue of fact could not overcome the difference in laws; and (3) the conclusion was consistent with other decisions in this Circuit. Id. at 946-49. A court that has examined the *Pilgrim* decision found it distinguishable on the basis that the "minimal facts set forth in the pleadings demonstrated—and the plaintiffs readily conceded—that the class was 'purposely' overbroad and was not ascertainable." Modern Holdings, LLC v. Corning Inc., 2015 U.S. Dist. LEXIS 41138, 2015 WL 1481459, at *4 (E.D. Ky. Mar. 31, 2015).

Defendants also cite to In re Skelaxin (Metaxalone) Antitrust Litig., 299 F.R.D. 555 (E.D. Tenn. 2014) in support of their position. The Court briefly reviewed Skelaxin supra, but with respect to this argument, Defendants cite to a later decision made by the court regarding a motion for class certification. Considering the posture of the litigation at the time the class certification order was issued in *Skelaxin*—the parties having conducted discovery and thoroughly briefed the issue—the Court finds the *Skelaxin* decision to be unhelpful in determining the **[*115]** instant matter.

The Court notes that this issue is typically handled through a class certification motion and extensive briefing. *See Modern Holdings, 2015 U.S. Dist. LEXIS 41138, 2015 WL 1481459, at *7*; *Bearden v. Honeywell Int'l Inc., 720 F. Supp. 2d 932, 942 (M.D. Tenn. 2010)* ("Here, the briefing on class issues is relatively cursory. As discussed below, the court will defer its decision on whether the fraud claims are appropriate for class resolution."); *In re Allstate Ins. Co. Underwriting & Rating Practices Litig., 917 F. Supp. 2d at 751*. Thus, while the Court does not find Defendants' Motion to be procedurally improper, it recognizes the limitations of deciding this issue at the pleadings stage as well as the wealth of information to be gained through class discovery. *See Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)* ("Sometimes the issues are plain enough from the pleadings to determine whether the interests of the absent parties are fairly encompassed within the named plaintiff's claim, and sometimes it may be necessary for the court to probe behind the pleadings before coming to rest on the certification question").

In reviewing the parties' briefs, the Court finds Defendants' concern about the Downstream Purchasers' class action claims to be well taken. The numerous states under which the Downstream Purchasers bring their antitrust and consumer protection claims will almost certainly raise issues with some of the requirements under *Rule 23*. However, **[*116]** with the facts stated in the Complaint, the Court is reluctant to strike these allegations at this stage in the litigation. While it is possible that the Downstream Plaintiffs will be unable to meet the class certification requirements, the Court is unwilling to deem it an impossibility based on the pleadings alone. Rather, the Court finds that class discovery will clarify whether Plaintiffs are able to meet the requirements identified in *Federal Rule of Civil Procedure 23(b)*. Thus, a ruling on this issue at this juncture could only be considered premature, and Defendants' Motions to Strike Class Action Allegations (Docs. 151, 154) will be **DENIED**.

IV. CONCLUSION

For the reasons stated herein:

- Defendants' Motions to Dismiss Direct Purchaser Plaintiffs' Consolidated Amended Complaint (Docs. 178, 181) are hereby **GRANTED IN PART** and **DENIED IN PART**;
    - The Direct Purchaser Plaintiffs' claim under the Clayton Act against McWane is hereby **DISMISSED**;
- Defendants' Motions to Dismiss Indirect Purchaser Plaintiffs' Consolidated Amended Complaint (Doc. 176, 182) are hereby **GRANTED IN PART** and **DENIED IN PART**;
    - The Indirect Purchaser Plaintiffs' claims under the antitrust laws of Rhode Island (prior to July 15, 2013), Arkansas, District **[*117]** of Columbia, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, Wisconsin, and West Virginia are hereby **DISMISSED**;
    - The Indirect Purchaser Plaintiffs' claims under the consumer protection and unfair practices laws of Michigan, Rhode Island, District of Columbia, Missouri, Nevada, New Hampshire, New York, North Carolina, Florida, and Hawaii (with respect to claims for unfair or deceptive acts or practices) are hereby **DISMISSED**;
- Defendants' Motions to Dismiss Consumer Plaintiffs' Consolidated Amended Complaint (Docs. 177, 183) are hereby **GRANTED IN PART** and **DENIED IN PART**;
    - The Consumer Plaintiffs' claims under the antitrust laws of Illinois, District of Columbia, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, Wisconsin, and West Virginia are hereby **DISMISSED**;
    - The Consumer Plaintiffs' claims under the consumer protection and unfair practices laws of New Hampshire, New York, North Carolina, and Florida are hereby **DISMISSED**;

○ The Consumer Plaintiffs' claims under the unjust enrichment laws of Arkansas, California, North Dakota, and New York are hereby **DISMISSED**;

○ The Consumer Plaintiffs' claim under the Clayton Act is hereby **DISMISSED**;

○ The **[*118]** Consumer Plaintiffs' claims against Charlotte Pipe and McWane under the TTPA are hereby **DISMISSED**;

• Defendants' Motion to Strike Indirect Purchaser Plaintiffs' Class Action Allegations (Doc. 151) and Motion to Strike Consumer Plaintiffs' Class Action Allegations (Doc. 154) are hereby **DENIED**;

SO ORDERED this 24th day of June, 2015.

/s/ Harry S. Mattice, Jr.

HARRY S. MATTICE, JR.

Judges: VIKTOR V. POHORELSKY, United States Magistrate Judge.

Opinion by: VIKTOR V. POHORELSKY

Opinion

REPORT AND RECOMMENDATION

POHORELSKY, Magistrate Judge:

Currently pending before the court is a motion brought by defendants Hellmann Worldwide Logistics GmbH & Co. KG ("Hellmann GmbH") and Hellmann Worldwide Logistics Limited Hong Kong ("Hellmann HK"), seeking dismissal under *Fed. R. Civ. P. 12(b)(6)* of the claims brought against them in the plaintiffs' Corrected Third Amended Complaint ("CTAC"). The CTAC, which has been brought as a class action, alleges that Hellmann GmbH and Hellmann HK (along with dozens of other entities) "combined, conspired and agreed . . . to fix, inflate and maintain new charges or prices for U.S. Freight Forwarding Services . . . in violation of *Section 1 of the Sherman Antitrust*

Act, *15 U.S.C. §1*." CTAC at ¶ 1. The Honorable John Gleeson has referred the motion to me pursuant to *28 U.S.C. 636(b)(1)(B)* for a report and recommendation. For the reasons **[*16]** that follow, I recommend that the motion be granted.

I. BACKGROUND

A. Factual[1] and Procedural History

This putative class action concerns multiple alleged conspiracies to fix prices in the international commercial freight forwarding industry. The plaintiffs are various businesses who purchased freight forwarding services from the defendants during the class period, which is defined in the CTAC as "the period from at least as early as January 1, 2001 to [ ] January 4, 2011." *See* CTAC at ¶ 18. The defendants are sixty-four domestic and foreign providers of international freight forwarding services, three trade associations, and "John Doe Defendants 1-10." Plaintiffs allege eleven different conspiracies in violation of *Section 1 of the Sherman Act*—nine "local conspiracies," six of which comprise an overarching "Global Agreement" conspiracy, and the remaining three of which comprise an overarching Japanese regional conspiracy.

Plaintiffs initiated this action by filing their initial complaint on January 3, 2008. *See* Dkt. No. 1. On July 21, 2009, the plaintiffs filed their First Amended Class Action Complaint ("FACAC") (Dkt. No. 117), which was followed by the October 7, 2010 Second Amended Class Action **[*17]** Complaint ("SACAC") (Dkt. No. 460). Numerous motions to dismiss were then filed and addressed by this court in its January 4, 2011 report and recommendation (the "First R&R"), *see* Dkt. No. 468, which recommended dismissal without prejudice, with leave to replead the majority of the claims in the SACAC.[2] Judge Gleeson adopted the First R&R in its entirety on August 13, 2012 (*see* Dkt. No. 628).

Plaintiffs then filed a Third Amended Class Action Complaint ("TAC") on November 15, 2012, *see* Dkt. No. 677 (sealed version), and the CTAC on March 27, 2013. *See* Dkt. No. 746 (sealed version); Dkt. No. 772 (redacted version). Several individual and joint motions to dismiss were served on or about February 27, 2013 and filed on May 24, 2013. The court considered these motions in its September 20, 2013 report and recommendation (the "Second R&R"), *see* Dkt. No. 878 (sealed version); Dkt. No. 903 (redacted version),[3] which recommended denial of the majority of the dismissal motions. On January 28, 2014, Judge Gleeson adopted the Second R&R in its entirety. *See* Dkt. No. 992.[4]

---

[1] As discussed below, the court has previously issued two reports and recommendations which detail the facts underlying this action. Familiarity with the prior R&Rs is assumed and facts not directly relevant to the instant motion will not be repeated.

[2] Although the dismissal motions were submitted before the filing of the SACAC, because the latter consisted of "ministerial changes" from the prior complaint, *see* First R&R at p. 4 n.3, the motions to dismiss were deemed responsive to the SACAC. *Id.*

[3] This opinion will refer to the page numbers in the ECF versions of the First and Second R&Rs. The First R&R is also available at *Precision Associates, Inc. v. Panalpina World Transp. (Holding) Ltd., No. 08 Civ. 42 (JG)(VVP), 2011 U.S. Dist. LEXIS 51330, 2011 WL 7053807 (E.D.N.Y. Jan. 4, 2011)*, *report and recommendation adopted*, *No. 08 Civ. 00042 (JG)(VVP), 2012 U.S. Dist. LEXIS 113829, 2012 WL 3307486 (E.D.N.Y. Aug. 13, 2012)*, and the Second R&R is available at *Precision Associates, Inc. v. Panalpina World Transp., (Holding) Ltd., No. 08 Civ. 42 (JG)(VVP), 2013 U.S. Dist. LEXIS 177023, 2013 WL 6481195 (E.D.N.Y. Sept. 20, 2013)*, *report and recommendation adopted*, *No. 08 Civ. 00042 (JG)(VVP), 2014 U.S. Dist. LEXIS 10345, 2014 WL 298594 (E.D.N.Y. Jan. 28, 2014)*.

[4] One significant point warrants discussion at the outset. Hellmann GmbH and Hellmann HK have correctly pointed out that the Second R&R (as well as the First R&R, for that matter) considered motions that were served before they were named as defendants in this case. To be sure, it might be procedurally improper if the court were to rely on a law-of-the-case theory to address their arguments for dismissal. *See, e.g.*, *In re Manhattan Inv. Fund Ltd., 310 B.R. 500, 513 (Bankr. S.D.N.Y. 2002)* ("The District Court's ruling in that class action is not binding upon the Trustee because she was not a party to that action.")

B. The Hellmann Defendants

According to the CTAC, **[*18]** Hellmann GmbH is the parent company of both Hellmann HK and Hellmann Worldwide Logistics, Inc. ("Hellmann Inc."). *See* CTAC at ¶ 69. The first instance of any Hellmann entity being sued in this litigation was the July 21, 2009 filing of the FACAC, which named Hellmann Inc. as a defendant. *See* Dkt. No. 117. Hellmann GmbH and Hellmann HK were not named as defendants until the filing of the CTAC on March 27, 2013. Although the Second R&R considered the allegations in the CTAC, because the motions to dismiss that were the subject of that R&R were served before the filing of the CTAC (and accordingly, before Hellmann GmbH and Hellmann HK were parties to this action), the court granted Hellmann GmbH and Hellmann HK[5] leave to submit a post-amendment motion to dismiss. *See* Dkt. No. 933 at p. 9.

II. LEGAL STANDARDS

A motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* tests the legal, not the factual, sufficiency of a complaint. *See* *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974)*, *abrogated on other grounds by* *Harlow v. Fitzgerald, 457 U.S. 800, 102 S. Ct. 2727, 73 L. Ed. 2d 396 (1982)*; *Sims v. Artuz, 230 F.3d 14, 20 (2d Cir. 2000)* ("At the *Rule 12(b)(6)* stage, '[t]he issue is not whether a plaintiff is likely to prevail ultimately, but whether the claimant is entitled to offer evidence to support the claims.'") (quoting *Chance v. Armstrong, 143 F.3d 698, 701 (2d Cir. 1998))*.

Under the standard set forth by the Supreme Court, "a complaint must contain **[*19]** sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. At this stage, the court accepts as true all factual allegations in the complaint, views the complaint in the light most favorable to the plaintiffs, and draws all reasonable inferences in their favor. *See* *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*; *Gregory v. Daly, 243 F.3d 687, 691 (2d Cir. 2001)*. Conclusory allegations or conclusions of law "couched" as factual allegations need not be accepted as true, however. *See* *Iqbal, 556 U.S. at 678*; *Twombly, 550 U.S. at 555*. To avoid dismissal, plaintiffs must plead facts that "nudg[e] their claims across the line from conceivable to plausible." *Twombly, 550 U.S. at 570*; *Iqbal, 129 S. Ct. at 1949* (requiring factual allegations that "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged"). "This standard requires factual allegations that, taken as true, demonstrate 'more than a sheer possibility that a defendant has acted unlawfully.'" *McAllister v. Metropolitan Transit Authority, No. 13 Civ. 2060, 2013 U.S. Dist. LEXIS 120996, 2013 WL 4519795, at *3 (E.D.N.Y. Aug. 26, 2013)* (citing *Iqbal, 556 U.S. at 678*). "If a complaint allows a court to infer no more than 'the mere possibility of misconduct, the complaint has alleged—but it has not 'show[n]'—'that the pleader is entitled to relief.'" *Id.* (quoting *Iqbal, 556 U.S. at 679* (quoting *Fed. R. Civ. P. 8(a)(2)*) (alteration in original).

Courts may also consider documentary exhibits or written instruments annexed to **[*20]** the complaint, documents integral to the parties' case and on which the complaint relies heavily, and matters subject to judicial notice. *See* *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)* (citing 5B

(citing *Ackerman v. Schultz, 250 B.R. 22, 27-28 (Bankr. E.D.N.Y. 2000))*; *Bricklayers & Allied Craftsmen, Local Union No. 44 v. Corbetta Constr. Co., 511 F. Supp. 1386, 1390 (S.D.N.Y. 1981)* ("[A]pplication of the [law of the case] doctrine would be particularly inappropriate [in part because] Laborers was not a party to the prior proceeding."). However, although the present opinion invokes—and discusses in considerable detail—the analyses contained in the prior R&Rs, I do not consider those opinions as binding against the newly-named Hellmann GmbH and Hellmann HK. Rather, I refer to the prior R&Rs to obviate the need to begin the instant analysis at square one. Hellmann GmbH's and Hellmann HK's absence from the prior proceedings does not bar the court from doing so. And to the extent Hellmann GmbH and Hellmann HK contend they were not afforded the opportunity to formally object to prior R&Rs, they have had ample opportunity in their submissions on this motion to take issue with the court's previous rulings.

[5] Except where otherwise indicated, the court hereinafter refers to Hellmann GmbH and Hellmann HK collectively as "Hellmann."

Charles A. Wright & Arthur R. Miller, *Federal Practice and Procedure* §1357 (3d ed. 2004 and Supp. 2007)); *ATSI Commc'ns, Inc. v. Shaar Fund, 493 F.3d 87, 98 (2d Cir. 2007); Int'l Audiotext Network, Inc. v. AT&T, 62 F.3d 69, 72 (2d Cir. 1995)*; *Kramer v. Time Warner Inc., 937 F.2d 767, 773 (2d Cir. 1991)*; *see also* Fed. R. Civ. P. 10(c).

III. HELLMANN'S MOTION TO DISMISS

Hellmann's motion proceeds on three grounds. It first asserts that the CTAC impermissibly lumps together each of the three independent Hellmann entities, thus failing to give any one of them adequate notice of the claims against them. It next attacks the sufficiency of four of the claims asserted against Hellmann. Finally, it argues that the claims against Hellmann are time-barred under the *Sherman Act*'s four-year statute of limitations. As discussed below, the court rejects Hellmann's first two arguments, but agrees that the claims asserted against them in the CTAC are time-barred and should therefore be dismissed with prejudice. Accordingly, the court first addresses Hellmann's statute of limitations argument, since it is on that ground that the court recommends granting Hellmann's motion. It then considers Hellmann's other two arguments for dismissal, which will become relevant in **[*21]** the event the court's statute of limitations analysis is rejected.

A. STATUTE OF LIMITATIONS

1. Introduction and Continuing Violation Doctrine

Hellmann argues for dismissal of the third, fifth, sixth, eighth, ninth and tenth claims on statute of limitations grounds. The statute of limitations for Sherman Act claims is "four years after the cause of action accrued," *15 U.S.C. §15(b)*, and "[t]here is no dispute . . . that an antitrust cause of action generally accrues 'when a defendant commits an act that injures a plaintiff's business.'" *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 2015 WL 1311352, at *6 (D. Conn. 2015)* (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971))* (emphases removed); First R&R at p. 92 (same). "Thus, with certain exceptions, a complaint that relies on acts committed prior to the four-year limitations period will usually be barred by the statute of limitations." First R&R at p. 92.

"If, however, an antitrust violation consists of a series of acts that repeatedly invade a plaintiff's interests and continue over time, a cause of action may accrue each time the plaintiff is injured anew." *Rite Aid Corp. v. Am. Exp. Travel Related Servs. Co., 708 F. Supp. 2d 257, 267 (E.D.N.Y. 2010)* (citing authorities); *see also* *Zenith Radio Corp., 401 U.S. at 338* (in antitrust context, "each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and . . . as to those **[*22]** damages, the statute of limitations runs from the commission of the act") (citing cases). Such "[a] continuing conspiracy or continuing violation occurs when 'the violator's actions consist not only of some definitive act in violation of the antitrust laws, but also of a series of subsequent acts that cause further injury to the plaintiff.'" First R&R at p. 92 (quoting 2 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 320(c), p. 285 (3d ed. 2007)).

"When the continuing violation exception applies, '[a]n overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act.'" *Rite Aid, 708 F. Supp. 2d at 268* (quoting *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987))*; *see also* *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1984)* (In "a price—fixing conspiracy . . . , 'each overt act that is part of the violation and that injures the plaintiff,' *e.g.*, each sale to the plaintiff, 'starts the statutory period running again . . . .'") (quoting 2 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 338b p. 145 (rev. ed. 1995) and citing cases). Significantly, though, "[a] plaintiff cannot . . . 'use an independent, new predicate act as a bootstrap to recover for injuries caused by other earlier predicate acts that took place outside the limitations period.' The continuing violation exception only allows **[*23]** a plaintiff to recover damages caused by overt acts committed inside the limitations period." *Rite Aid, 708 F. Supp. 2d at 268* (quoting *Klehr, 521 U.S. at 189-90*) (internal citation omitted).

Hellmann takes great pains to establish that the last overt acts underlying each of the claims alleged against it occurred more than four years prior to the filing of the CTAC. Accordingly, it argues that the plaintiffs' claims against it are time-barred because "[n]one of the actual dates pleaded . . . fall within the four years prior to March 27, 2013, when Plaintiffs filed their CTAC against the Hellmann defendants." *See* Defendants Hellmann Worldwide Logistics GmbH & Co. KG and Hellmann Worldwide Logistics Limited Hong Kong's Memorandum in Support of their Motion to Dismiss Plaintiffs' Corrected Third Amended Class Action Complaint ("Motion to Dismiss") at pp. 19-22.

While not incorrect that the latest dates explicitly pled in the CTAC predate March 27, 2009,[6] Hellmann's argument employs an overly strict standard. As this court wrote in the First R&R,

> [a]ntitrust law provides that, in the case of a "continuing violation," say, a price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, "each overt act **[*24]** that is part of the violation and that injures the plaintiff," *e.g., each sale to the plaintiff*, 'starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times.'"

First R&R at pp. 92-93 (quoting *Klehr, 521 U.S. at 189* and citing *In re Nine W. Shoes Antitrust Litig., 80 F. Supp. 2d 181, 192 (S.D.N.Y. 2000))* (emphasis added in First R&R). Accordingly, the plaintiffs may satisfy the overt act requirement by demonstrating that the plaintiffs sold to them freight forwarding services at artificially inflated prices during the limitations period. As such, the contention that none of the conspiratorial acts explicitly pleaded in the CTAC fall within the limitations period, even if accurate, is of no moment.

The court again turns to the First R&R to derive the applicable standard:

> There is no requirement that the plaintiffs identify specific conduct on the part of a defendant during the limitations period. The Complaint clearly alleges that the defendants formed a conspiracy that was active in selling price-fixed freight forwarding services until a time unknown and that the conspiracy could have been continuing to the date of the filing of the Complaint. It is possible that discovery will reveal that no overt acts did in fact occur **[*25]** during the limitations period, but reading the Complaint in the light most favorable to the plaintiffs, these allegations are sufficient to raise the inference that price fixing did indeed occur within the four-year period before the operative complaints were filed.

First R&R at p. 96 (citing *Thomas v. Petro-Wash, Inc., 429 F. Supp. 808, 812 (M.D.N.C. 1977))* (internal citation omitted). Accordingly, the plaintiffs are not, as Hellmann suggests, required to "identify specific conduct on the part of a defendant during the limitations period," *see id.*; *see also* Motion to Dismiss at pp. 19-22, but instead must simply "raise the inference that price fixing did indeed occur within the four-year period before the operative complaints were filed." *See* First R&R at p. 96.

Nevertheless, even under the more lenient standard articulated in the First R&R, the CTAC fails to "plausibly" state antitrust claims arising during the four-year period prior to the filing of the CTAC. The First R&R is now instructive largely by way of contrast. The "operative complaints" considered there were the original complaint, filed on January 3, 2008, and the FACAC, filed on July 21, 2009. Accordingly, the question before the court was whether it was reasonable to infer that price fixing occurred at some point after **[*26]** January 3, 2004, or alternatively, July 21, 2005. In light of, among other things, a Department of Justice Press Release stating "that these conspiracies extended to dates in 2006 and 2007," and the fact that "it is in 2007 that antitrust authorities announced their investigations into the international freight forwarding industry," *see id.* at pp. 94-95; the court answered this question in the affirmative. *See id.* at p. 96.

But with the CTAC as the presently "operative complaint[]," the court's calculus—and more significantly, its conclusion—is entirely different. As stated, the court must now be able to reasonably infer that price fixing occurred

---

[6] Specifically, the last overt acts to be alleged in connection with each claim asserted against Hellmann occurred as follows: Third Claim: November 2004, *see* CTAC at ¶ 346; Fifth Claim: March 2006, *id.* at ¶¶ 439-40; Sixth Claim: January 2008, *id.* at ¶ 450; Eighth Claim: February 2005, *id.* at ¶ 525; [TEXT REDACTED BY THE COURT] he First Claim, which alleges a final overt act in October 2001. *Id.* at ¶ 314.

at some point within four years of the filing of the CTAC. The facts set forth above, while previously leading the court to make a parallel inference in regard to earlier complaints, now compel the opposite conclusion. The conspiracies at issue arguably extended until some point in late 2007, when "various worldwide antitrust authorities announced investigations into possible price-fixing conspiracies in the freight forwarding industry." *See id.* at p. 90. It is simply unreasonable to infer that the plaintiffs were still incurring damages in the form of conspiratorily inflated prices **[*27]** roughly eighteen months later. Thus, although the CTAC alleges in the abstract, for example, that "[t]he pricing practices that were unlawfully and systematically created . . . continued after November 2007 and until January 4, 2011," and that the defendants reaped the benefits of these practices "until at least January 4, 2011," *see* CTAC at ¶ 182, in the absence of specific allegations of conspiratorial activity occurring after March 2009, the CTAC falls short of plausibly "rais[ing] the inference that price fixing did indeed occur within the four-year period before the [CTAC was] filed." *See* First R&R at p. 96.[7]

Significantly, despite Hellmann's comprehensive (albeit slightly misguided) argument that no overt conspiratorial acts occurred within four years of the filing of the CTAC, the plaintiffs make no effort to establish that any requisite acts, in the form of inflated sales or otherwise, did indeed occur within the statutory period. Instead, their Opposition relies *solely* on the doctrines of relation back and fraudulent concealment to render timely their claims against Hellmann. The court agrees with Hellmann that this amounts to a concession on the part of the plaintiffs that the CTAC does not **[*28]** raise the inference that price-fixing occurred within four years of March 27, 2013.

Accordingly, unless salvaged on the grounds of either relation back or fraudulent concealment, the plaintiffs' claims against Hellmann should be dismissed. The court now considers in turn these possible exceptions to the four-year statute of limitations.

2. <u>Fraudulent Concealment</u>

A plaintiff who seeks to toll the statute of limitations on the basis of fraudulent concealment must establish "(1) that the defendant concealed the existence of the cause of action from the plaintiff; (2) that the plaintiff brought suit within the applicable limitations period upon learning of the cause of action; and (3) that the plaintiff's ignorance of the claim did not result from a lack of diligence." First R&R at p. 97 (citing cases). Although a plaintiff must plead fraudulent concealment in accordance with *Fed. R. Civ. P. 9(b)*'s "particularity" standard, "at the *Rule 12(b)(6)* stage, a plaintiff need only plead fraudulent concealment, as opposed to affirmatively proving it." *Id.* (citing cases).

a. *First Prong - Concealment of the Cause of Action*

A plaintiff may satisfy the first prong by demonstrating "either that (1) 'the defendant took affirmative steps to prevent the plaintiff's **[*29]** discovery of his claim or injury' or (2) 'that the wrong itself was of such a nature as to be self-concealing.'" *Id.* at p. 98 (quoting *State of N.Y. v. Hendrickson Bros., 840 F.2d 1065, 1083 (2d Cir. 1988)* and citing *In re Nine W. Shoes Antitrust Litig., 80 F. Supp. 2d 181, 192 (S.D.N.Y. 2000))*.

In the First R&R, the court concluded that although the operative allegations did not support a finding of affirmative concealment, "[t]he plaintiffs here have . . . set forth sufficient allegations to demonstrate that the defendants' price fixing conduct was inherently self-concealing." *Id.* at pp. 100-01 (discussing features of alleged conspiracies evincing their self-concealing nature).

Hellmann's argument to the contrary is of no avail. It disputes the conspiracies' self-concealing nature only in passing, simply quoting the CTAC's allegation that the conspiracies were inherently self-concealing and stating that the plaintiffs have failed to establish with particularity "how Hellmann GmbH or Hellmann HK participated in any of the conspiracies alleged in the CTAC." *See* Motion to Dismiss at p. 23.[8] Because, however, (1) the court finds that

[7] The court acknowledges that it wrote in the First R&R that "[t]aking the allegations at face value, the plaintiffs continued to buy freight forwarding services from the defendants throughout the entire [class] period," which extended until the filing of the FACAC on July 21, 2009. *See* First R&R at pp. 3, 94. This does not dictate, however, that the conspiracies at issue lasted until that date.

the CTAC's allegations sufficiently connect Hellmann to the alleged conspiracies, *see generally* Section III.C, *infra*, and (2) the CTAC's discussion of fraudulent concealment is, with one minor exception, identical to that considered **[*30]** in the First R&R, the court is unmoved that a departure is warranted from its finding that the defendants' price-fixing conduct was inherently self-concealing.

b. *Third Prong - Due Diligence*

Hellmann devotes a single sentence to arguing that the due diligence requirement has not been satisfied, writing that the plaintiffs have failed to make any "allegations regarding any actions that they took to discover their alleged claims against the Hellmann defendants." *See* Motion to Dismiss at p. 23. This argument is nearly identical to that offered in the defendants' Joint Motion to Dismiss, which wrote that the plaintiffs failed to allege "any specific inquiries of [Defendants], [or] detail when such inquiries were made, to whom, regarding what and with what response." First R&R at p. 102 (quoting Joint Motion to Dismiss at p. 28).

The First R&R acknowledged the accuracy of this contention, but disagreed with the premise that it necessitates a conclusion that the due diligence prong has not been satisfied. It noted that "[i]n the antitrust context, '[t]he requisite notice required to defeat a claim of fraudulent concealment is an awareness of sufficient facts to identify . . . the particular cause of action at **[*31]** issue.'" *Id.* at p. 103 (quoting *Molecular Diagnostics Labs. v. Hoffmann-La Roche Inc., 402 F. Supp. 2d 276, 284 (D.D.C. 2005)* and citing *Merck & Co. v. Reynolds, 559 U.S. 633, 130 S.Ct. 1784, 1798, 176 L. Ed. 2d 582 (2010))*. The defendants point to no such awareness here. The mere fact that several defendants simultaneously imposed similar surcharges is not sufficient, because that "could be reflective not of any collusive agreement, but of the fact that the competitors were confronted with the same sets of external variables and already had similar pricing structures in place," and "[i]t is natural to assume that . . . such a reaction would not result from any conspiracy." *Id.* at p. 103 (quoting *In re Air Cargo Shipping Servs. Antitrust Litig., No. 06-MDL-1775 (JG) (VVP), 2010 U.S. Dist. LEXIS 146377, 2010 WL 10947344, at *19 (E.D.N.Y. Sept. 22, 2010))*. Thus, because there were no public statements concerning the existence of a possible conspiracy until October 2007, the court declined to find that plaintiffs had failed to satisfy the due diligence prong, and concluded that "the question of diligence for purposes of fraudulent concealment is better left for" summary judgment or trial. *Id.* at pp. 104-05 (citing cases).

In sum, plaintiffs' failure to affirmatively plead acts of diligence in pursuing a potential cause of action is eclipsed by the overarching fact that the defendants have not identified information of which the plaintiffs were, or should have been, aware that would have triggered **[*32]** the requirement that they take action to discover their claims. Accordingly, ignorance of their claims arose not from their lack of diligence, but instead from the nature of the defendants' activities, which reasonably could have been construed as innocuous, parallel reactions to market forces. Hellmann having offered no novel arguments regarding the due diligence requirement, the court once again adheres to its prior conclusion that the absence of any allegations concerning plaintiffs' affirmative acts of diligence is not fatal to their fraudulent concealment argument.

c. *Second Prong - Timely Initiation of Action*

Finally, the court turns to the question of whether the plaintiffs brought their claims against Hellmann within four years of discovery. In the First R&R this court wrote that "nothing indicates that the plaintiffs have not asserted their claims within four years of discovering them," since the plaintiffs first discovered their claims in October 2007 and subsequently filed the original complaint in January 2008, and the FACAC in July 2009, both of which are well within the four-year limitations period. *See* First R&R at pp. 101-02. Accordingly, plaintiffs argue that since "this Court has already **[*33]** upheld Plaintiffs' fraudulent concealment allegations," it follows that "[t]he analysis is

---

[8] Hellmann similarly states that since the plaintiffs "failed to plead facts sufficient to allege conspiratorial conduct on behalf of the Hellmann Defendants, Plaintiffs have failed to plead facts supportive of the first element of fraudulent concealment as to the Hellmann Defendants." Defendants Hellmann Worldwide Logistics GmbH & Co. KG and Hellmann Worldwide Logistics Limited Hong Kong's Memorandum in Support of their Motion to Dismiss Plaintiffs' Corrected Third Amended Class Action Complaint ("Motion to Dismiss") at p. 23.

equally applicable to the Hellmann Defendants." *See* Plaintiffs' Memorandum of Law in Opposition to the Hellmann Defendants' Motion to Dismiss the Third Amended Class Action Complaint ("Opposition") at p. 13.

The court disagrees with the plaintiffs' broad-brush conclusion. Unlike the original complaint and the FACAC, the filing of the March 27, 2013 CTAC (which, as noted, was the first time that Hellmann GmbH and Hellmann HK were named as defendants in this action) did not take place within four years of the plaintiffs' discovery of their claims. Accordingly, the court's prior fraudulent concealment analysis is decidedly not "equally applicable to the Hellmann Defendants." To the contrary, unless the CTAC is held to relate back to the prior complaint (a question addressed in detail below), satisfaction of the second fraudulent concealment prong will require the plaintiffs to demonstrate that they were not aware of their specific claims against Hellmann GmbH and Hellmann HK until March 27, 2009, *i.e.* four years before the claims were first brought against these defendants. *Cf.* *Schenker AG v. Societe Air France, 102 F. Supp. 3d 418, 2015 WL 1951422, at *5 (E.D.N.Y. 2015)* (where allegations **[*34]** "permitt[ed] the inference that [plaintiff] did not suspect Qantas was involved in the conspiracy," court accepted fraudulent concealment argument that plaintiff lacked knowledge of potential antitrust claim against Qantas) (citing *DPWN Holdings (USA), Inc. v. United Air Lines, Inc., No. 11 Civ. 564 (JG), 2014 U.S. Dist. LEXIS 130154, 2014 WL 5394950, at *2 (E.D.N.Y. Sept. 16, 2014))*; *DPWN Holdings, 2014 U.S. Dist. LEXIS 130154, 2014 WL 5394950, at *2* (denying motion to dismiss centering on plaintiff's knowledge of potential antitrust claim where plaintiff "allege[d] that it did not have any direct evidence of United's participation in the conspiracy until" a later date).

A careful reading of the various complaints as well as plaintiffs' motion papers, however, belies such an interpretation. As discussed in Section III.A.3, *infra*, plaintiffs go to great lengths to establish that their naming in the FACAC of only Hellmann Inc. and not Hellmann GmbH or Hellmann HK was the result of a mistake as to the proper defendants' identity. *See* Plaintiffs' Supplemental Memorandum in Further Opposition to the Motion of Defendants Hellmann Worldwide Logistics GmbH & Co. KG and Hellmann Worldwide Logistics Hong Kong to Dismiss Plaintiffs' Corrected Third Amended Class Action Complaint ("Plaintiffs' Supplemental Opposition") at pp. 1-2 ("[T]he FACAC . . . mistakenly alleged that Messrs. Poon, Hellmann and Lai [who were **[*35]** invited to attend meetings concerning the Peak Season Surcharge] were employees of Hellmann [Inc.]. In fact, . . . they were employees of Hellmann HK. Plaintiffs corrected their mistake by adding Hellmann [GmbH] and Hellmann HK as Defendants in the CTAC . . . ."); *id.* at p. 10 ("The FACAC mistakenly identified Hellmann [Inc.] as invited [to] and/or participating, through identified individuals, in meetings concerning surcharge conspiracies. Plaintiffs fixed this mistake in the CTAC . . . .").

As impliedly conceded by plaintiffs, therefore, this case (unlike *Schenker* and *DPWN Holdings*) is not one in which, at the time they filed the FACAC, the plaintiffs lacked the information necessary for the discovery of Hellmann GmbH's and Hellmann HK's involvement in the alleged conspiracies. To the contrary, Plaintiffs' Supplemental Opposition expressly states that "[a]s corrected, the CTAC alleges Hellmann's involvement in the same conspiratorial meetings, through the same identified individuals, as the FACAC does." *See id.* at p. 10. Accordingly, the fact that the court previously recommended that the statute of limitations be tolled in part because the prior complaints were brought within four years of the plaintiffs **[*36]** learning of their cause of action does not, as plaintiffs assert, dictate that the same holds true here. Rather, because the plaintiffs failed to bring any claims against Hellmann GmbH or Hellmann HK within four years of possessing the information necessary to bring an action against those defendants, the second requirement for fraudulent concealment is not satisfied.

Plaintiffs' fraudulent concealment argument thus fails. Accordingly, the claims against Hellmann GmbH and Hellmann HK are timely only if the filing of the CTAC relates back to the date of the FACAC. It is to this issue which the court now turns.

3. Relation Back

a. *Introduction*

The parties' supplemental memoranda address the question of whether *Fed. R. Civ. P. 15*'s relation back doctrine renders timely the plaintiffs' addition of Hellmann HK and Hellmann GmbH in the CTAC. Because, as discussed above, the CTAC was filed after the expiration of the applicable statute of limitations, the amendment would be time-barred if it is not held to relate back to the filing of the FACAC.

Fed. R. Civ. P. 15(c)(1)(C) provides that an amendment to a pleading relates back to the date of the original pleading when

> the amendment changes the party or the naming of the party against whom **[*37]** a claim is asserted, if *Rule 15(c)(1)(B)* is satisfied[9] and if, within the period provided by *Rule 4(m)*[10] for serving the summons and complaint, the party to be brought in by amendment:
> (I) received such notice of the action that it will not be prejudiced in defending on the merits; and
> (ii) knew or should have known that the action would have been brought against it, but for a mistake concerning the proper party's identity.

Fed. R. Civ. P. 15(c)(1)(C). The parties' key point of contention is whether the plaintiffs' failure to name Hellmann HK and Hellmann GmbH in the FACAC was the result of a "mistake" within the meaning of the Rule.

The Supreme Court's decision in *Krupski v. Costa Crociere, 560 U.S. 538, 130 S. Ct. 2485, 177 L. Ed. 2d 48 (2010)* provides the starting point for the *Rule 15(c)(1)(C)(ii)* "mistake" inquiry. In *Krupski*, the plaintiff was injured aboard a cruise ship and sued Costa Cruise Lines, which had issued her ticket. *Id. at 541*. Costa Cruise Lines thereafter informed the plaintiff that Costa Crociere, the ship's carrier, was the proper defendant. *See id. at 543*. After the statute of limitations had expired, the plaintiff sought, and was granted, leave to amend her complaint to add Costa Crociere as a defendant. *Id. at 544*. When the plaintiff then filed an amended complaint and Costa Cruise Lines was dismissed from the case, Costa Crociere moved for dismissal **[*38]** on the grounds that the amended complaint did not relate back to the prior complaint and was therefore untimely. *Id. at 544-45*. The Court rejected Costa Crociere's argument, concluding that, on those facts, *Rule 15*'s "mistake" requirement had been met. *See id. at 556-57*.

Krupski primarily stands for the notion that the correct inquiry under *Rule 15(c)(1)(C)(ii)* is not whether a plaintiff knew or should have known that the proposed defendant was the proper party to be sued, but instead "whether [the proposed defendant] knew or should have known that it would have been named as a defendant but for an error." *Id. at 548*. Information in the plaintiff's possession is relevant only insofar as is "bears on the defendant's understanding of whether the plaintiff made a mistake regarding the proper party's identity." *Id.*

The most immediately significant portion of *Krupski* lies elsewhere, however. The Court stated that "it would be error to conflate knowledge of a party's existence with the absence of mistake," that is, a plaintiff may know of a party's existence and still "mak[e] a mistake with respect to that party's identity." *Id. at 548-49*. Accordingly,

> [a] plaintiff may know that a prospective defendant—call him party A—exists, while erroneously believing him to have **[*39]** the status of party B. Similarly, a plaintiff may know generally what party A does while misunderstanding the roles that party A and party B played in the "conduct, transaction, or occurrence" giving rise to her claim. If the plaintiff sues party B instead of party A under these circumstances, she has made a "mistake concerning the proper party's identity" notwithstanding her knowledge of the existence of both parties.

Id. at 549.

As such, a plaintiff who knows that a prospective defendant exists, but, due to a misunderstanding about that party's status or role with respect to her claim, mistakenly chooses to sue a different defendant, may still satisfy the requirements of *Fed. R. Civ. P. 15*. *See id.* By contrast, the requirements of *Rule 15* are not satisfied when "the

---

[9] *Rule 15(c)(1)(B)* requires that "the amendment asserts a claim or defense that arose out of the conduct, transaction, or occurrence set out—or attempted to be set out—in the original pleading."

[10] The relevant time period is 120 days after the complaint is filed. *Fed. R. Civ. P. 4(m)*.

failure to name the prospective defendant in the original complaint was the result of a fully informed decision as opposed to a mistake concerning the proper defendant's identity." *Id. at 552*.

In a vacuum, *Krupski* is straightforward enough and, for present purposes, can be summarized as follows: initially, a court considering the question of "mistake" for relation back purposes must consider the knowledge in the possession of the prospective defendant, not the plaintiff. **[*40]** Further, a *Rule 15(c)* "mistake" is not necessarily limited to instances in which the plaintiff is unaware of the prospective defendant's existence; rather, the rule contemplates scenarios in which the plaintiff knows of a party's existence, but nonetheless harbors a mistake about its status or involvement in the events underlying the plaintiff's claim.

There has emerged, however, significant discord within the Second Circuit concerning one aspect of *Krupski*'s reach. In *In re Vitamin C Antitrust Litig., 995 F. Supp. 2d 125 (E.D.N.Y. 2014)*, Judge Cogan framed the following binary regarding two types of relation back cases:

> The first category, "wrong party" cases, is where a plaintiff has sued the wrong party or used the wrong name and seeks to amend to substitute the right party or the right name. The second category, "additional party" cases, is where the defendants originally sued are indeed exposed to liability on the theories alleged, but the plaintiff has omitted an additional party against whom the plaintiff also could have stated a claim.

Id. at 129 (internal citation omitted). *Krupski* "was a wrong party case if ever there was one, and emphatically not an additional party case," *id. at 130*, insofar as the plaintiff sued one defendant, and upon learning that defendant to be the **[*41]** wrong party, later sought to sue the "right" one. It is beyond cavil that this constitutes a *Rule 15* mistake, and that relation back applies in these situations. What remains unclear, however, is whether an amendment may also relate back in "additional-party" cases; those where a plaintiff sues one defendant, and later seeks to add another one. The instant matter falls squarely within the latter camp, and as such, the parties now contest whether the "mistake" prong articulated in *Rule 15* and construed by the *Krupski* Court applies in the present "additional-party" case. As discussed below, the court agrees with Hellmann's argument (which is premised almost entirely on *Vitamin C*) that this question should be answered in the negative, and therefore finds that the relation back doctrine does not render timely the CTAC's addition of Hellmann GmbH and Hellmann HK.

b. *In re Vitamin C Antitrust Litig.*

As noted, the *Vitamin C* court considered

> whether [*Rule 15*'s] final clause—the proposed party "knew or should have known that the action would have been brought against it, but for a mistake concerning the proper party's identity"—refers not only to the substitution of a proper party for an erroneously named party, but **[*42]** also to the addition of a new party when all of the parties previously named were themselves proper parties.

See *id. at 128*.

The court in *Vitamin C* answered the question as follows:

> *Rule 15(c)(1)(C)* does not encompass just any mistake. It requires a mistake "concerning *the proper party's identity*." (Emphasis added.) As a matter of plain language, this provision would appear to include only "wrong party" cases, and not "additional party" cases. This is because the "mistake" has to "concern[ ]" the "identity" of the "proper party [ ]." In an "additional party" case . . . , there generally will be no "mistake concerning" the proper party's "identity." The plaintiff has sued the right defendant, and simply neglected to sue another defendant who might also be liable. If the drafters of *Rule 15* had meant to allow relation back in this situation, they could have easily done so.

Id. at 129. Judge Cogan found support in the Rule's Advisory Committee notes, writing that an interpretation that limits *Fed. R. Civ. P. 15* to wrong party cases "is consistent with the Advisory Committee notes to *Rule 15(c)*, which address the concept of 'wrong party' cases without ever mentioning 'additional party' cases." *See id.* n.2.[11] He concluded that "Rule 15(c)(1)(C) is addressed to the situation where **[*43]** a plaintiff has sued the wrong party, and the right party, reasonably aware of the error, sits on the sidelines while the statute of limitations runs out." Id. at 130.

Citing several of the cases upon which Hellmann's present argument is premised, *see* Section III.A.3.c *infra*, Judge Cogan "recognize[d] that, in the wake of the Supreme Court's decision in *Krupski*, several district courts have . . . held that Rule 15(c) can be satisfied where the plaintiff '[lacked] knowledge regarding the conduct or liability' of the newly added party, even where the originally named party was proper." *See id.* (citing cases and quoting Abdell v. City of New York, 759 F. Supp. 2d 450, 457 (S.D.N.Y. 2010)) (internal citation omitted). However, Judge Cogan took issue with these courts' construction of *Krupski*, writing that

> although *Abdell* and the other decisions cited relied on *Krupski*, they failed to recognize that *Krupski* was a wrong party case if ever there was one, and emphatically not an additional party case. . . . Because *Krupski* spent so much analysis considering the proposed new defendant's knowledge that it was the party that should have been sued (and discounting the significance of the plaintiff's knowledge), it **[*44]** is easy to slide into the belief, as *Abdell* and its progeny did, that all that matters is what the proposed new party knows. However, the starting point for *Krupski* was a suit against the wrong party, and all of its discussion of knowledge must be seen in that context. Where a plaintiff has not mistakenly sued the wrong party, a court need not consider what a defendant knows and when the defendant knew it; the threshold requirement for Rule 15(c)(1)(C)—a "mistake concerning the proper party's identity"—has not been met.

Id. at 130-31 (citing Turner v. Nicoletti, No. 12 Civ. 1855, 2013 U.S. Dist. LEXIS 108580, 2013 WL 3989071, at *3 (W.D. Pa. Aug. 2, 2013)).

Applying this distinction, Judge Cogan wrote that, unlike the plaintiff in *Krupski*, the *Vitamin C* plaintiffs "did not 'mistakenly choose to sue' [the original defendant] based on any 'misimpression.' They correctly sued [the original defendant], and for whatever reason did not sue [the proposed additional defendant] as well." Id. at 131. He therefore concluded that the proposed claims did not relate back under Rule 15 to the timely-filed complaint. *See id.*

In the short time since its passage, *Vitamin C* has been met with approval. The court in Velasquez v. Digital Page, Inc., No. 11 Civ. 3892 (LDW)(AKT), 2014 U.S. Dist. LEXIS 68538, 2014 WL 2048425 (E.D.N.Y. May 19, 2014), for example, cited *Vitamin C* for the proposition that "Rule 15(c) does not apply in cases where a plaintiff seeks to add an *additional* party as a defendant." **[*45]** 2014 U.S. Dist. LEXIS 39321, [WL] at *3; *see* Erdogan v. Nassau Cnty., No. 10 Civ. 05837 (AKT), 2014 U.S. Dist. LEXIS 39321, 2014 WL 1236679, at *11 (E.D.N.Y. Mar. 25, 2014) (same); *see also* Zeller v. PDC Corp., No. 13 Civ. 5035 (ARR)(JO), 2015 U.S. Dist. LEXIS 32573, 2015 WL 1223719, at *2 (E.D.N.Y. Mar. 17, 2015) (quoting *Vitamin C* that "[a]s a matter of plain language, this provision [subsection (C)] would appear to include only 'wrong party' cases, and not 'additional party' cases.").

c. *Analysis*

To be sure (and as acknowledged by Judge Cogan), there exists substantial authority to the contrary. The court in Doe v. Whelan, No. 3:08 Civ. 846 (CSH), 2010 U.S. Dist. LEXIS 130021, 2010 WL 5093102 (D. Conn. Dec. 8, 2010), for example, addressed the question whether, on a motion to amend a complaint pursuant to Rule 15, "Mysogland may be *added* as a third defendant, as Plaintiffs wish, or whether, as Defendants argue, Mysogland must be *substituted* for an existing defendant . . . who must in turn be dismissed." 2010 U.S. Dist. LEXIS 130021,

---

[11] The court agrees that the Advisory Committee Notes betray a concern for situations involving changing, rather than adding, parties. *See* Fed. R. Civ. P. 15 advisory committee's note ("In actions between private parties, the problem of relation back of amendments *changing* defendants has generally been better handled by the courts, but incorrect criteria have sometimes been applied, leading sporadically to doubtful results. Rule 15(c) has been amplified to provide a general solution.") (emphasis added) (internal citation omitted). The Advisory Committee's statement that "a complaint may be amended at any time to correct a *formal defect such as a misnomer or misidentification*" further suggests a narrow, substitution-centric reading of Rule 15. *See id.* (emphasis added).

[WL] at *1. In permitting the addition of the new defendant, the court expressly declined to read *Krupski* as requiring the substitution of one defendant for another. *See* 2010 U.S. Dist. LEXIS 130021, [WL] at *3 n.3 ("Regardless of whether [*Krupski*] involved the addition or substitution of defendants, the rationale expressed therein for permitting the relation back, namely the preference for enabling decisions on the merits by permitting the correction of errors, supports a finding that it is appropriate here as well."); *see also* Patrick v. Garlick, 66 F. Supp. 3d 325, 2014 WL 6883634, at *2-3 (W.D.N.Y. 2014) (permitting addition of defendant to relate back where naming of original defendant demonstrated **[*46]** that plaintiffs "clearly harbored a misunderstanding as to" latter's status); S.A.R.L. Galerie Enrico Navarra v. Marlborough Gallery, Inc., No. 10 Civ. 7547 (KMW) (RLE), 2013 WL 1234937, at *5 (S.D.N.Y. Mar. 25, 2013) (court applied relation-back to additional defendants where "the information regarding their involvement only recently came to light," thus constituting a mistake under Rule 15), *reconsideration denied*, No. 10 Civ. 7547 (KMW)(RLE), 2013 U.S. Dist. LEXIS 150273, 2013 WL 5677045 (S.D.N.Y. Oct. 18, 2013); Bayerische Landesbank v. Aladdin Capital Mgmt. LLC, 289 F.R.D. 401, 405 (S.D.N.Y. 2013) ("[T]he three-year statute of limitations does not prohibit an amendment adding ACH as a defendant at this stage because the proposed Second Amended Complaint relates back to the original complaint."); Roe v. Johnson, No. 07 Civ. 2143 (RJD)(RER), 2011 U.S. Dist. LEXIS 155584, 2011 WL 8189861, at *4 (E.D.N.Y. Aug. 12, 2011) (*Krupski*'s "holding applies equally to cases where the 'mistake concerning the proper party's identity' results in the substitution or addition of defendants") (citing cases), *report and recommendation adopted*, No. 07 Civ. 2143 (RJD) (RER), 2012 U.S. Dist. LEXIS 92352, 2012 WL 2575340 (E.D.N.Y. July 3, 2012); Abdell, 759 F. Supp. 2d at 456-57 (S.D.N.Y. 2010) ("Careful review of the *Krupski* opinion . . . belies [a] narrow understanding of a Rule 15(c) 'mistake'" under which relation back is limited to wrong-party cases and does not contemplate mistakes consisting of "lack of knowledge regarding the involvement of additional parties.").[12]

In light of the above, it is clear that there exists considerable authority supporting the notion that a Rule 15 "mistake" permits the addition—as opposed to merely the substitution—of a defendant to relate back to **[*47]** the original complaint. This is true even if the plaintiff was aware of the proposed defendant's existence at the time of the initial pleading, so long as the plaintiff can demonstrate that she misapprehended that party's status or role in the events underlying her claim. Such a reading entails an extension of the decidedly "wrong-party" *Krupski* to the "additional-party" arena.

Ultimately, however, the court is persuaded by Judge Cogan's compelling analysis in *Vitamin C*, which demonstrated that the plain meaning of Rule 15, the Rule's Advisory Committee Notes, and *Krupski* all evince a preference for limiting Rule 15(c) mistakes to wrong-party cases. The Rule plainly refers to mistakes concerning the proper party's identity, which, as Judge Cogan noted, "would appear to include only 'wrong party' cases, and not 'additional party' cases," Vitamin C, 995 F. Supp. 2d at 129, an interpretation that finds support in the Rule's Advisory Committee Notes. Similarly, *Krupski* contemplated a scenario in which "the plaintiff sues party B instead of party A." Krupski, 560 U.S. at 549. It did not, however, discuss one in which the plaintiff sues *only* party B instead of *both* party A and party B. The implication, then, is that *Krupski* is directed toward those scenarios in **[*48]** which one party is sued instead of another party—*i.e.* wrong party cases—to the exclusion of additional party cases, where a plaintiff's need for an amendment stems from her failure to vigorously determine the identities of all potential defendants. In view of this "starting point," therefore, the court agrees with *Vitamin C* that "all of [*Krupski*'s] discussion of knowledge must be seen in th[e wrong party] context," *see* Vitamin C, 995 F. Supp. 2d at 130, a significant factor that appears to have been overlooked by the opposing authority.

Because the present case, like *Krupski*, does not involve John Doe defendants, *Barrow* and its progeny (*e.g.*, *Hogan* and *Scott*) is not directly applicable. It is instructive, however, insofar as both John Doe cases and garden-variety additional-party cases such as this contemplate the same general type of "mistake" arising from a plaintiff's failure to sue a party she knows (or should know) to be involved in her cause of action. In the former instance, this takes the form of the plaintiff being unable to specifically identify the additional party; in the latter, it presents as the

---

[12] Plaintiffs also cite as support VKK Corp. v. National Football League, 244 F.3d 114 (2d Cir. 2001), in which the Second Circuit allowed the addition of a defendant to relate back to the timely-filed complaint. *See* id. at 128-29. However, *VVK Corp.* well predates *Krupski*, and as such, carries limited weight.

plaintiff, "for whatever reason," choosing not to sue it. *See* Vitamin C, 995 F. Supp. 2d at 131. Since the plaintiff in both scenarios has **[*49]** or should have at least a general awareness that the additional party should have been sued, it follows that her "lack of knowledge does not constitute a 'mistake' for relation back purposes." *See* id. at 130 (citing Barrow, 66 F.3d at 470). Wrong-party cases such as *Krupski*, however, are analytically distinguishable in that their geneses is not a correctly-sued party, but instead a more fundamental mistake as to the correct target of the litigation. Stated otherwise, additional-party cases are, for present purposes, conceptually analogous to John Doe cases, where the Second Circuit does not allow lack of information about the identities of additional parties to constitute a "mistake" under Rule 15. Thus, although John Doe cases such as *Barrow*, *Hogan*, and *Scott* are categorically distinguishable from the case *sub judice*, they provide indirect support for the court's conclusion that *Krupski* should not extend to additional-party matters.

Despite being widely discussed amongst the district courts, *Krupski* has been cited only twice by the Second Circuit. Both matters, *Hogan v. Fischer, 738 F.3d 509 (2d Cir. 2013)* and *Scott v. Vill. of Spring Valley, 577 F. App'x 81 (2d Cir. 2014)* were "John Doe" cases in which the plaintiff sought to amend a complaint to name defendants whose identities were unknown at the time the original complaint **[*50]** was filed. *Hogan* and *Scott* both relied upon the seminal "John Doe" decision in *Barrow v. Wethersfield Police Dep't, 66 F.3d 466 (2d Cir. 1995)*, where the Second Circuit wrote that "the failure to identify individual defendants when the plaintiff knows that such defendants must be named cannot be characterized as a mistake." *Barrow, 66 F.3d at 470*.

In light of the above, the court finds that *Fed. R. Civ. P. 15(c)(1)(C)(ii)*'s "mistake" prong has not been satisfied.[13] The CTAC's claims against Hellmann therefore do not relate back to the filing of the prior complaint and, accordingly, are time-barred.

B. CORPORATE GROUPING

The discussion that follows addresses corporate grouping and plausibility, the two other areas of argument advanced by Hellmann in support of its motion. As noted at the outset of this opinion, this discussion becomes significant only if the court rejects the recommendation above that the claims against Hellmann be dismissed on statute of limitations grounds.

1. Introduction

Hellmann has also sought dismissal on the strength of an improper corporate grouping argument with which the Court is intimately familiar, having addressed similar arguments in both the First and Second R&Rs. *See* First R&R at pp. 28-41; Second R&R at pp. 22-31. Hellmann contends that the plaintiffs have "impermissibly lumped" together Hellmann GmbH, Hellmann **[*51]** HK, and Hellmann Inc. without providing any factual basis to distinguish their conduct. These allegations, according to Hellmann, fail to satisfy the minimum pleading standard, since none of the individual Hellmann entities has been provided fair notice of the claims asserted against it. *See generally* Motion to Dismiss at pp. 6-8.

Armed with the benefit of having previously considered two sets of corporate grouping allegations—the first in the SACAC, which the First R&R deemed insufficient to withstand dismissal, and the second in the CTAC, which the Second R&R held to satisfy the pleading standard—the court need not begin its analysis at square one. Instead, its task in assessing Hellmann's grouping argument is straightforward: it must determine whether the allegations concerning Hellmann's corporate structure more strongly resemble the analogous portions of the SACAC or the CTAC previously considered by the court. Further, because both the First and Second R&Rs invoked the SACAC's and CTAC's allegations concerning the corporate structure of defendants Panalpina World Transport (Holding) Ltd. and Panalpina, Inc. (collectively "Panalpina") as specific examples, respectively, of insufficient **[*52]** (in the

[13] In view of this conclusion, it is unnecessary to address the question of whether the relation back requirements set forth in *Fed. R. Civ. P. 15(c)(1)(B)* and *Fed. R. Civ. P. 15(c)(1)(C)(I)* have been satisfied.

SACAC) and sufficient (in the CTAC) allegations concerning corporate structure, a comparison of the CTAC's allegations discussing the Hellmann corporate family with the similar portions of the SACAC and CTAC concerning Panalpina will serve as a useful springboard for the court's analysis.

2. SACAC / First R&R

As noted, the First R&R considered the SACAC's allegations regarding Panalpina's corporate structure, the entirety of which was a brief discussion of Panalpina World Transport (Holding) Ltd.'s status as Panalpina, Inc.'s parent, and assertions that both the parent and subsidiary "directly or through [their] subsidiaries and/or affiliates, sold Freight Forwarding Services throughout the United States." *See* SACAC at ¶¶ 23-24. Accordingly, the court wrote that while the plaintiffs "allege that a representative of 'Panalpina' participated in a meeting on a certain date, seeking to attribute the agreement to conspire on that date to all Panalpina entities," they fail to explain "why *these* Panalpina entities, rather than any other Panalpina entities, entered into the agreements to fix prices." *See* First R&R at p. 29.

Observing that "[t]his type of pleading is repeated for the majority of the defendants," **[*53]** the court continued that

> [t]he plaintiffs do not specifically allege that the parents, subsidiaries, or affiliates of these corporate defendants either joined the alleged conspiracies individually nor were aware of their existence. They also make no claim that the separate corporate existence of these entities should be ignored. Instead, they rely on what appears to be a joint liability theory to put entire corporate families on the hook for antitrust violations. . . . The plaintiffs' complaint thus fails the basic pleading requirement that . . . [they] "indicate clearly the defendants against whom relief is sought, and the basis upon which relief is sought against the particular defendants." . . . [T]he plaintiffs wish to put individual defendants on the hook for antitrust violations based on corporate affiliation alone, arguing that because they have alleged that each defendant "directly or through its subsidiaries and affiliates, sold Freight Forwarding Services throughout the United States" the Court can infer that those subsidiaries and affiliates also conspired in violation of antitrust laws. This is not a reasonable inference to be drawn. The conduct that forms the basis for **[*54]** the plaintiffs' conspiracy claims is collusion in the charging of fixed fees and surcharges, not the sale of freight forwarding services generally.

Id. at pp. 29-30, 34-35 (quoting *Yucyco, Ltd. v. Republic of Slovenia, 984 F. Supp. 209, 219 (1997))*.

We thus concluded that "the plaintiffs['] corporate group pleading method only leaves 'open the possibility that [they] might later establish some set of [undisclosed] facts to support recovery' against the affiliates. This is not enough." *Id.* at p. 38 (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 558, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))* (internal citation and quotation marks omitted). The court therefore recommended dismissal (without prejudice) of the claims asserted against the improperly grouped defendants. *See id.* at pp. 39-40.

3. CTAC / Second R&R

In contrast to the SACAC's meager allegations concerning the defendants' corporate structures, the plaintiffs in the CTAC offered a thorough exposition of how "the various corporate families acted as single enterprises with the parent companies exercising substantial control over their subsidiaries." *See* CTAC at p. 36; *id.* at ¶¶ 105-79. Included are allegations concerning (1) the nature of the freight forwarding industry; (2) defendant representatives acting on behalf of their entire corporate families; (3) collusive agreements being directed from the top-down; and (4) perhaps most significantly, **[*55]** itemized, defendant-specific "[e]xamples of corporate control over subsidiaries and affiliates and unified activity between corporate families."[14] *See generally* CTAC at ¶¶ 105-79.

[14] For instance, the CTAC alleged that the Panalpina "parent corporation treats its subsidiaries as mere divisions of the company rather than separate entities" and that it exerts "substantial control over its subsidiaries such that it is a single enterprise." *See* CTAC at ¶¶ 140-41.

Accordingly, in the Second R&R we wrote the following regarding the defendants' improper grouping argument:

> The plaintiffs [in the CTAC] have offered extensive allegations as to both the defendants' corporate structure and the means and method of executing the conspiracies. The allegations support the inference that corporate affiliates both entered into the agreements and aided and assisted in executing them. The allegations of the [C]TAC, which provide significantly more detail as to the role of the affiliated entities in the alleged conspiracies than the previous complaint, adequately allege that each entity joined the conspiracy and/or acted as an agent of its affiliates in carrying out the conspiracies. . . . Unlike the SAC[AC], . . . the [C]TAC includes significant detail that establishes how the antitrust misconduct here naturally involved (and often required) the knowledge and participation of the members of corporate families in the conspiracies. Thus, the [C]TAC includes allegations that each representative **[*56]** at a meeting or discussion acted on behalf of its affiliates and reported the agreements to the entire corporate family.

Second R&R at pp. 23-24 (citing CTAC at ¶¶ 105, 107).

In light of the foregoing—coupled with "[t]he plaintiffs' allegations regarding the nature of the industry and the methods of executing the conspiracies"—we recommended denial of the defendants' improper corporate grouping argument. *See generally* Second R&R at pp. 25-31.

4. Application

Against this backdrop the court now turns to the CTAC's allegations concerning Hellmann's corporate structure. As was the case with the CTAC's allegations against Panalpina (and the other corporate defendants, for that matter), the allegations regarding Hellmann suffice to survive dismissal on improper grouping grounds.

First, almost all of the portions of the CTAC referenced in the Second R&R's core grouping discussion either find an expressly Hellman-centric analogue in the CTAC, or, by logical extension, apply with the same force to Hellmann as to the other defendants. *See* Second R&R at pp. 24-26 (citing CTAC ¶¶ 34-97 (discussing each defendant's corporate structure), ¶¶ 105-08 (nature of freight forwarding industry necessitated companies to operate as single enterprises), ¶¶ 109-33 (examples of how **[*57]** defendants "required an integrated enterprise in order to achieve their conspiratorial aims," discussions of corporate representatives acting on behalf of "entire corporate famil[ies]" and collusive agreements being directed from top down)).

Significantly, the Second R&R's conclusion was not undercut by the fact that the CTAC lacked examples for each corporate defendant "of instances where co-conspirators communicated and oversaw their affiliates' knowing participation in the surcharge conspiracies"; such were not necessary because, "[g]iven the nature of the industry and the conspiracies at issue in the [C]TAC, it makes economic sense and is reasonable to infer that the corporate affiliates grouped together acted in concert and individually joined the conspiracies." *See id.* at p. 26. Similarly, although the CTAC's illustrations of "how employees of one corporate family member would report back to its corporate affiliates regarding the collusive surcharges . . . do not include every corporate family, that is not fatal because on a motion to dismiss, the plaintiffs need not prove their allegations; they only have to make plausible ones." *Id.* at p. 28. To this end, the fact that Hellmann is not mentioned in **[*58]** the section of the CTAC that provides "examples of how the Defendants . . . required an integrated enterprise in order to achieve their conspiratorial aims," *see* CTAC ¶¶ 109-33, does not undermine the Second R&R's applicability.

Further, among the CTAC's "[e]xamples of corporate control over subsidiaries and affiliates and unified activity between corporate families" is a discussion of Hellmann GmbH's "corporate control" over its subsidiaries as well as the "unified activity" between the three Hellmann entities. *See* CTAC at ¶ 179. The CTAC's Hellmann-specific allegations thus suggest the same conclusion as that reached in the Second R&R—that the plaintiffs "adequately allege that each [Hellmann] entity joined the conspiracy and/or acted as an agent of its affiliates in carrying out the conspiracies." *See* Second R&R at p. 24.

It also follows that the Second R&R's discussion of *In re Cathode Ray Tube (CRT) Antitrust Litig., 738 F. Supp. 2d 1011 (N.D. Cal. 2010)* ("CRT") and *In re: TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179 (N.D. Cal.*

2009) ("*Flat Panel*")—which, notably, Hellmann has not even attempted to distinguish—is as apposite here as in its original context. Specifically, the court's assertion that "[t]he defendants' arguments are without merit because the allegations in the [C]TAC are very similar to, and at times even more detailed, than those cited **[*59]** as sufficient in *CRT* and *Flat Panel*," Second R&R at p. 28, applies four-square to Hellmann.[15]

Hellmann's arguments to the contrary do not compel a departure from the court's conclusion in the Second R&R. Perhaps most telling is Hellmann's somewhat disingenuous attempt to sidestep the impact of the court's prior holdings. In its motion, Hellmann states that "Plaintiffs allege nothing beyond corporate affiliations, which the Court has already held is insufficient to satisfy pleading requirements." Motion to Dismiss at p. 7. In purported support, however, Hellmann proceeds to quote from Judge Gleeson's August **[*60]** 13, 2012 Order adopting the *First* R&R—which concerned the SACAC, *not* the CTAC. Moreover, after writing that "[p]laintiffs plead only the following bare allegations" regarding the individual Hellmann entities, Hellmann cites only the portion of the CTAC (¶ 69) which provides general information about the Hellmann corporate family, while ignoring the curative ¶ 179, which mirrors the portions of the CTAC previously deemed sufficient to defeat the joint defendants' corporate grouping argument. *See* Motion to Dismiss at pp. 7-8. Hellmann's argument thus relies upon facts and conclusions of law that ceased to be relevant once the plaintiffs filed the TAC, and subsequently, the CTAC.

In sum, the allegations concerning Hellmann's corporate structure (which are supported by entries from Hellmann's website and corporate linkedin.com page) are analogous to those which the court has previously held sufficient to survive a motion to dismiss, and far more robust than those which the court has found to be inadequate. Accordingly, the court recommends denying Hellmann's motion insofar as it seeks dismissal on the grounds of improper corporate grouping.[16]

---

[15] In addition, since the issuance of the Second R&R, both *CRT* and *Flat Panel* have been met with approval. The court in *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420 (YGR), 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377 (N.D. Cal. Oct. 2, 2014)*, for example, relied upon these decisions in denying a motion to dismiss premised upon an improper corporate grouping argument. Citing both cases as support, the *Lithium* court wrote that "[t]he mere failure to observe fine distinctions among corporate entities . . . does not . . . render implausible the suggestion of collusion." *2014 U.S. Dist. LEXIS 141358, [WL] at *32*. It concluded that

> "[a]lthough Plaintiffs will need to provide evidence of each Defendants' participation in any conspiracy, they now [*i.e.* at the motion to dismiss stage] only need to make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy." . . . The inference . . . that generic references to NEC . . . implicate both NEC Corp. and NEC Tokin—is plausible, and the competing inference, that in informal communication defendants' employees carefully delineated between similarly branded corporate entities . . . is not.

*2014 U.S. Dist. LEXIS 141358, [WL] at *34* (quoting *In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 904 (N.D. Cal. 2008))*.

[16] Hellmann also argues that the CTAC does not support a plausible inference of liability on either corporate veil-piercing or agency theories. *See generally* Motion to Dismiss at pp. 8-12. As stated in the Second R&R, however,

> [i]n antitrust cases, courts analyze **[*61]** allegations that group together corporate families under various standards — they look to the standards for agency, for piercing of the corporate veil, or to whether the allegations sufficiently allege that each corporate affiliate individually joined the conspiracy. There is not a clear distinction in the cases between these standards — rather, it depends primarily on the type of case, type of industry, and nature of the antitrust violation.

Second R&R at p. 23.

Accordingly, the paramount inquiry is "whether, based on the allegations, one can plausibly infer that each defendant knowingly joined and played some role in the conspiracy." *See id.* Having answered this question in the affirmative based on the foregoing corporate grouping analysis, the court need not separately address the related doctrines of veil-piercing and agency. *See id.* at p. 24 n.12 (declining to conduct veil-piercing analysis, but noting that "the allegations in the TAC are sufficient to allege that some of the parent defendants here controlled their subsidiaries as to the transactions at issue.") (citing *American Fuel Corp. v. Utah Energy Development Co., Inc., 122 F.3d 130, 134 (2d Cir. 1997))*.

C. PLAUSIBILITY OF THE CLAIMS

Hellmann further argues for dismissal of the Third, Fifth, Ninth, and Tenth Claims for their failure to make specific allegations against Hellmann supportive of a claim under *Section 1 of the Sherman Act*. It also asserts that the Tenth Claim should be dismissed because the allegations contained therein are "[i]nherently [c]ontradictory." The court now addresses *seriatim* the plausibility of these claims' allegations as asserted against Hellmann.

1. Third Claim - New Export System

Fee Agreement ("NES Claim")

Hellmann contends that the CTAC's third claim, which concerns the 2002 New Export System Fee ("NES") Agreement, must be dismissed as against it for failing to satisfactorily allege a claim under the Sherman Antitrust **[*62]** Act. The court in the Second R&R considered a similar individual motion seeking to dismiss the NES claim as against the DSV Defendants. Like Hellmann, DSV argued that the allegations concerning its representative's involvement in the NES conspiracy fell "far short of alleging that any DSV entity engaged in any conduct that constitutes entering into a price fixing agreement." *See* Dkt. No. 779 at p. 7 (citing *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))*.

The court disagreed and upheld the Third Claim as against the DSV Defendants. Its conclusion rested on the allegations that an employee of DFDS (one of the entities comprising the DSV Defendants, *see* CTAC at ¶ 61) [TEXT REDACTED BY THE COURT]. *See* Second R&R at pp. 52-53 (citing CTAC at ¶¶ 342-51). The court wrote that "[s]uch allegations, that a defendant knowingly agreed to a conspiracy to fix prices with its competitors, are sufficient to state a claim against that defendant." *Id.* at p. 53 (citing *Mayor and City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 135-36 (2d Cir. 2013)*; *Anderson News, L.L.C. v. American Media, Inc., 680 F.3d 162, 184 (2d Cir. 2012))*.

The NES allegations against Hellmann carry equal weight. The CTAC alleges that Peter Cochrane, a Hellmann representative, attended a meeting with representatives from several other corporate defendants at which the attendees "agreed to implement a NES fee on their customers" and "discussed how they would monitor **[*63]** each other's compliance with their agreement." *See* CTAC at ¶¶ 345-46; *id.* at ¶ 349 [TEXT REDACTED BY THE COURT] The CTAC also alleges that the NES Defendants (a group to which Hellmann is alleged to have belonged, *see id.* at p. 99) imposed the agreed-upon NES fee. *See id.* at ¶ 348. Having found essentially identical allegations sufficient to withstand DSV's motion to dismiss, the court sees no reason to grant dismissal of the NES claim as against Hellmann.[17]

---

[17] Hellmann here also rehashes its improper corporate grouping argument, asserting that the NES claim fails because it makes the Hellmann entities "a 'corporate family' unit without alleging a basis for doing so," and accordingly "fail[s] to allege sufficient facts to support a claim of conspiracy" against any of the individual Hellmann entities. *See* Motion to Dismiss at p. 12. In the Second R&R, the court considered the DSV Defendants' similar argument for dismissal which asserted that the plaintiffs "do not allege which corporate entity employed [a DSV representative] nor do plaintiffs allege he was acting for either DSV A/S or DSV Solutions." *See* Dkt. No. 779 at pp. 6-7. Although, as we do here, the Second R&R found this argument to fail "[f]or the reasons discussed in the grouping section above," the court's elucidation for its DSV-specific finding—namely, that the plaintiffs adequately alleged that the DSV parent and a DSV subsidiary "are responsible for the conduct of [a second DSV subsidiary] or independently joined the agreements," *see* Second R&R at pp. 53-54—further supports the court's identical holding here. To wit, the court noted that "[t]he TAC alleges that DSV A/S . . . is the parent company of both DSV Solutions and DFDS." *Id.* at p. 54 (citing TAC ¶¶ 59-61). This, coupled with "the allegations of corporate control, the nature of the freight forwarding industry, and the allegations that the participation of corporate affiliates was necessary to the conspiracies" sufficed to "make[ ] it plausible that these defendants acted in concert and individually joined the conspiracies." *See id.* Here too, the CTAC alleges that Hellmann Inc. and Hellmann HK are subsidiaries of Hellmann GmbH, *see* CTAC ¶ 69, and, as noted above, the discussions of corporate

The only novel argument set forth by Hellmann is that the NES claim provides an overly vague time frame, thereby failing to provide Hellmann with fair notice of the claims pleaded against it. *See* Motion to Dismiss at pp. 13-14. Hellmann's argument is unavailing. First, the NES Claim provides an October 1, 2002 date for the meeting attended by Hellmann representative Peter Cochrane, *see* CTAC at ¶¶ 345-46, as well as several critical dates for the creation and implementation of the NES conspiracy. *See, e.g.*, CTAC at ¶ 339 ("Such Defendants made and implemented this agreement through the use of code words, emails and clandestine meetings held on or about October 1, 2002, in June 2004, and in October 2004 as alleged below."). Further, **[*64]** the fact that the alleged conspiracy continued "until a date unknown" does not, as Hellmann argues, preclude fair notice of the claims, nor does Hellmann provide any authority that it does. *See, e.g., Young-Wolff v. McGraw-Hill Sch. Educ. Holdings, LLC, No. 13-CV-4372 KMW, 2015 U.S. Dist. LEXIS 39643, 2015 WL 1399702, at *4 (S.D.N.Y. Mar. 27, 2015)* (complaint that "although somewhat imprecise, provides fair notice of the approximate time period of Defendants' alleged [misdeeds] . . . is all that *Rule 8* requires.") (citing cases); *accord United States v. Miller, 771 F.2d 1219, 1227 (9th Cir. 1985)* ("Although it is true that this [antitrust] indictment places the conspiracies within an open-ended time frame, this defect alone does not automatically render it insufficient. . . . [I]t does contain sufficient factual particularity to afford appellants adequate notice of the charges against them.").

In light of the above, the court recommends that Hellmann's argument for dismissal of the NES Claim be rejected.

3. Fifth Claim - 2005 Chinese Currency Adjustment Factor Surcharge Agreement ("CAF Claim")

Hellmann has also moved to dismiss the CTAC's Fifth Claim, which concerns allegations of a 2005 Chinese Currency Adjustment Factor ("CAF") surcharge. In addition to rehashing its contentions of improper corporate grouping and lack of notice due **[*65]** to the CTAC's indefinite time frame, Hellmann contends that dismissal is warranted because the allegations of its involvement in the CAF Conspiracy are particularly anemic. The argument has some appeal. Indeed, Hellmann is named only twice throughout the sixty-seven-paragraph CAF Claim: once in ¶ 397, which provides that [TEXT REDACTED BY THE COURT] *see* CTAC at ¶ 389, and once in ¶ 402, which references [TEXT REDACTED BY THE COURT]

Although the specific allegations against Hellmann are not particularly damning, the court finds that the plaintiffs have sufficiently alleged Hellmann's participation in the CAF Conspiracy. As Judge Gleeson wrote in his August 13, 2012 Order adopting this court's First Report and Recommendation, "only 'slight evidence' is necessary to connect a defendant to an antitrust conspiracy once the conspiracy is established." *See* Dkt. No. 628 at p. 3 and n.4 (citing *Vandervelde v. Put & Call Brokers & Dealers Ass'n, 344 F. Supp. 118, 154-55 (S.D.N.Y.1972)* ("Courts have commented with respect to antitrust conspiracies that once the conspiracy itself has been established only 'slight evidence' is necessary to connect individual defendants with it."), *opinion supplemented*, *344 F.Supp. 157 (S.D.N.Y.1972)*; *Safeway Stores, Inc. v. F.T.C., 366 F.2d 795, 801 (9th Cir. 1966)* ("Once the existence of the common scheme is established, very little is required **[*66]** to show that defendant became a party — slight evidence may be sufficient to connect a defendant to it.") (internal quotation marks omitted); *accord United States v. Consol. Packaging Corp., 575 F.2d 117, 126 (7th Cir. 1978)* ("Even a single act may be sufficient to draw a defendant within the ambit of a conspiracy where the act is such that one may infer from it an intent to participate in the unlawful enterprise.") (citing *United States v. Cardi, 478 F.2d 1362, 1369 (7th Cir. 1973)*, *cert. denied*, *414 U.S. 852, 94 S. Ct. 147, 38 L. Ed. 2d 101 (1973))*.

To this end, the court has previously denied motions to dismiss made by defendants with similarly tenuous links to various conspiracies. In addressing defendants Kintetsu's and Nippon's motion to dismiss the Peak Surcharge Claim, for example, the court wrote, in language equally applicable here, that the

> allegations of parallel conduct, while sparse, are sufficient to tie these defendants to the conspiracy asserted in the Peak Season Surcharge claim. The plaintiffs have provided a great amount of detail as to the who, what,

---

control, the nature of the freight forwarding industry, and the necessity of the full participation of corporate affiliates apply with equal force to Hellmann as they did to DSV. So too, therefore, does the conclusion that these entities plausibly "acted in concert and individually joined the conspiracies."

> when, where and how of the Peak Season Surcharge conspiracy, and in most instances have identified the defendants who were present at in-person meetings and have alleged that other unidentified individuals were also present at the meetings. In this context, allegations that a co-conspirator told others **[*67]** that he would inform Kintetsu and Nippon of the conspiracy and that Kintetsu and Nippon later imposed the conspiratorial surcharges makes it plausible that they joined the conspiracy.[18]

Second R&R at p. 61. Accordingly, where the "who, what, when, where, and how" of a conspiracy is well-described, parallel conduct, *i.e.* imposition of the surcharge, is sufficient to tie a defendant to the conspiracy.

This principle serves to plausibly connect Hellmann to the CAF Conspiracy. Initially, the CTAC describes the formation and execution of the CAF Conspiracy in considerable detail, including allegations of an email group (the "Yahoo Group"), a series of five meetings, and a conference call—all geared toward furthering the alleged conspiracy—as well as additional steps taken to implement the surcharge through the Shanghai International Freight Forwarding Association. *See generally* CTAC at ¶¶ 379-446.
